Another concern which seems likely to earn reduced profits is the North Caucasian Company. The double excess profits tax, and the deterioration in the rouble exchange are, unfortunately, certainties which must be taken into account, however fluctuating other conditions may be. Output prospects are distinctly promising, however, and the setback, from the net earnings point of view, ought only to be temporary. To the end of May the weekly returns showed a fine advance on the figures of the preceding two years: 198,719 tons, as against 140,799 tons and 132,583 tons for the other periods respectively. For 1914 the directors were able to declare a dividend of 25 per cent.

It is difficult to account for the setback which Lobitos shares have encountered since the report was issued. The year's accounts were very satisfactory indeed, and showed a jump in the net profit of nearly £30,000. This excellent result was achieved after placing £15,000 (against £10,000) to reserve, raising the dividend from 10 to 15 per cent., and carrying forward £32,447 instead of £18,890. Notwithstanding this very sound position, the shares have gone back from 40s. to 38s. 3d., and it is difficult to visualise the reason for the decline. It has been stated that the reason is to be found in the unexplained and uncontradicted rumours that the Standard Oil Company desires to obtain control of Lobitos; but it is possible that the outlook has something to do with the decline. Profits from the steamers will be affected by the loss of the tanker El Zorro, while the output to the end of May shows a decrease of 1,820 tons. With a company of the standing of Lobitos, however, these factors ought not to have been strong enough to affect share-values; but the market is always a kittle-cattle sort of creature, and that is all there is to say about it just now.

The recent successes of the Russian armies in the Bukovina will be a godsend to some of the Roumanian concerns. There is the Roumanian Consolidated Oilfields Company, for example. The production record has not been particularly satisfactory lately; but its shares have been in some demand at solidly firm prices. The last return, which was for the week ended June 10, made better reading, showing as it did an increased output of 203 tons—612 tons against 409. The financial year of the company ends with this month, and later on we shall be able to see how things really stand.

German post offices no longer accept letters for delivery in Greece, it being practically impossible to deliver them even in those parts of Greece not occupied by the Allies, says a message dated June 27.

TRADE OPENINGS.

The Director of Stores, Department of Public Health, Cairo, invites tenders for the supply of paints, mainly for the scavenging and watering service. Date, July 15.

The Physical Service Department, Cairo, invites tenders for the supply of weighing machines, balances and weights required for Government during 1916-17. Date, July 15.

The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of agendas required for Government Departments. Date, July 12.

The superintendent of Stores, Ministry of Education, Cairo, invites tenders for the supply of 3,600 table serviettes required for the school year 1916-17. Date, July 5.

The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of globes, bees-wax, and mats necessary for the Hejaz. Date, July 1.

The director, Coastguard Stores, Arsenal, Alexandria, invites tenders for the supply of fresh and dry rations required for the service men at depot, Mex, and for crews of cruisers at Alexandria, for one year commencing September 1, 1916. Date, July 15.

The tender of the Egyptian Salt and Soda Co., Ltd., for the supply of cotton-seed oil to the War Department Stores, Tura, at a total cost of £E6,144.200, has been accepted. The tender for coconut oil for the same department, amounting to £E882,500, of Mr. S. di M. Riso, of Cairo, has been accepted. The tender of the Cairo Gas Company for the supply of coke at the Abbassia and Tura Supply Stores has been accepted. The amount is £E1,333.

ENEMY FIRMS IN EGYPT.

The following notices appear in the *Official Journal*:—

The licences granted to the firms of R. and O. Lindemann and the Egyptische Egrenir Fabriken have been cancelled. Mr. H. Bridson, 6, Rue de l'Ancienne Bourse, Alexandria, the Receiver, has been instructed to liquidate the businesses.

Mr. C. W. Green, Anglo-Egyptian Bank, Alexandria, receiver of the business of Franz Neumann, 24, Rue Cherif Pasha, Alexandria, has been instructed to liquidate the same.

The following businesses have also been ordered to be liquidated:—Messrs. A. Mayer and Co., Cairo and Alexandria (Receiver, Mr. R. E. Moore, Savoy Chambers, Cairo); The Société Anonyme de Tuyaux et Poteaux en Ciment Armé (Système Siegivart) (Receiver, Mr. F. H. Russell, Gresham House, Cairo); Messrs. Schneider and Rothacker, Alexandria (Receiver, Mr. E. D. Joyce, Imperial Ottoman Bank, Alexandria).

LICENCES TO TRADE.

The following firms have been granted a licence to trade without special restrictions, in place of the restricted licence granted to them:—Adda, Elie and César V., 11, Rue Tewfik, Alexandria; Sachs, Halifa and Sons, 7, Souk el Attarine, Alexandria.

The firm of Joseph Sursock and Fils, 30, Rue Cherif Pasha, Alexandria, has been granted a licence to trade in Egypt with the British Empire and with Allies of Great Britain.

TRADERS' BLACK LIST.

The following names have been added to the list of firms with whom trading is prohibited:—

Assael, Peppo, Allatini Han, Salonika; Gottlich, Martin, Candia; Jenny and Vock (Fridolin Jenny; Emil Vock), Rue Franque, Salonika; Lianos, Soulakas and Goumas, Piræus; Lochner, Hermann, Patras; Pfister and Assael (Rudolph Von Pfister and Peppo Assael), Allatini Han, Salonika; Rossini, Alexander (alias Rosalini), Odos Vasilissa Olga, 162A, Salonika, and Porto Lagos; Schewend, August, Candia, Crete; Yeni, Samuel Judah, Salonika; Hajji Muhammad Hussain Kazeruni, Ispahan, and Shebarek, Georges, Teheran.

The following names have been removed from the list:—

Amin-ut-Tujjar (alias Agha Isfahansi), Ispahan; Christodoroff, Zares, Resht; Keprielli, Meshed; Missirian, Kerman, and Tabibian, M., Resht.

NEWS FROM ALL SOURCES.

The *London Gazette* of June 16 notifies that the Greek vessel Ayios Cicolaos has been detained at Malta.

Of nineteen vessels sunk by the enemy in the week ended June 24, nearly all were lost in the Mediterranean. Only one was of much value.

Messrs. C. J. Webb and Co., Limited, were recently the successful tenderers to the Police Stores, Bulac, for the supply of ghafir clothing.

One of the results of the war is that Turkey carpets have gone "out of fashion" and Indian carpets have come in. Good Indian carpets are now realising 12s. per yard, which represents an increase of from 33 to 40 per cent.

According to the *Journal* of the Sudan Chamber of Commerce in April the price of gum reached a price unknown since the occupation of the Sudan. At one time P.T. 214 per cantar of 120 rottles was quoted at El Obeid.

In announcing the receipt through the Foreign Office of telegraphic information of the increases of certain Greek customs duties, the Board of Trade states that it awaits the detailed report which Sir F. Elliot is forwarding.

Mr. William Smellie has, it is understood, resigned his seat on the board of the Roumanian Consolidated Oilfields Company. Mr. Smellie is a member of the Liverpool firm of oil importers, Messrs. Meade-King, Robinson, and Co.

The Board of Trade have received from Gibraltar a copy of the "Revenue (Amendment) Ordinance, 1916," dated May 31, 1916, which provides that on and after that date the duty on all tobacco imported into the colony shall be at the rate of 2½d. per lb., instead of at the rate of 2d. per lb.

Sir James Roberts, of the well-known wool stapling company of Sir Titus Salt, Sons, and Company, has given £10,000 to the university of Leeds to found and maintain a professorship of Russian language and literature. The gift is appropriate, since the great success of the firm has been made out of Russian wool.

A Lloyd's message from Carthagena on June 26 stated that, according to a report from Cape Palos Wireless Station, the Greek steamer Nitsa foundered three miles north-east of Ormigas. The crew were saved by a Spanish steamer. A message from Alicante states that the steamer sank after being torpedoed off Cape Palos.

The Director of the War Trade Department has decided that manufactured articles with a small constituent part of steel containing chrome, nickel, cobalt, or vanadium, may be exported without licence. This is subject to the production of a certificate from the Cutlers' Company that the weight of steel containing the prohibited alloy does not represent more than 10 per cent. of the total weight of the whole manufacture, and also to the manufactured article not being otherwise prohibited.

CROPS AND FOOD IN CYPRUS.

(From Our Own Correspondent.)

Nicosia, June 3.

Cereal crops have been reaped under favourable conditions throughout the island, always according to the laborious, patriarchal methods which still prevail. There has been a good fall in the prices of wheat and barley and of various articles of food, in view of the new harvest.

As regards the bread supply of Nicosia, the stock of Government tithe wheat being exhausted, bakers can no longer obtain supplies which enabled them to sell the loaf at 3 piastres (4d.) the oke; but it is hoped, for the sake of the poor, that the Government will again issue the incoming tithe wheat in due course on the same conditions as before. Bakers now sell bread at 3½ piastres the oke for first, and 3¼ piastres for second quality.

Some discontent was caused by the prohibition to export all Cyprus cheese. A number of manufacturers have addressed a petition to the Government praying that certain kinds, not much used in the island, may be exempted from the order. Inquiries as to the stocks available have been made. From the vine-lands reports are, so far, satisfactory, and the carob crop promises to be a very good one.

PRODUCE REPORT.

Currants.

London, June 29.

Demand continues strong, but available stocks are so very small that prices have hardened, limiting sales daily. Provincials are quoted from 41s. to 49s.; Amalias, 48s. to 53s.; Patras, 53s. to 59s.; Gulf, 56s. to 59s.; Vostizza, 55s. to 60s. Zante, 53s. to 58s.; and smalls, 46s. to 60s.

Sultanas.

Only in moderate demand, but all sales are being effected at full rates. Afghanistan and Indian fruit sell at 85s. to 100s., whilst Greek is quoted 86s. to 110s.

Dates

There has been a good demand this past week, and prices are much firmer. Egyptians are selling well at 32s. to 36s., and Persians at 22s. to 32s.

Seeds.

Linseed has been quiet and easier, London-Calcutta spot, and afloat, also June-July and July-August, 66s. 6d.; whilst August-September is quoted 67s., and Bombay, July-August, is selling at 67s. 6d. Cotton-seed is dull; London-Egyptian, June, is quoted at £13; and Sakelarides at £12 10s. per ton. Rapeseed is quiet, brown Cawnpore, July-August, being offered at 60s., and Toria 60s. 6d. Canary-seed is in small demand, and prices are in buyers' favour. Lentils are in good demand at 21s. to 23s. per 100 lb.; whilst Rangoon beans are steady at the recent decline, 18s. 6d. per cwt.; and Egyptian, 50s. per 480 lb.

Oils.

Linseed oil has declined during the week, and spot pipes are offered at £33, and barrels £34, landed; month, £32 15s. July-August, £33; and September-December, £34 10s. Rape-oil is quiet, and prices are lower. Cotton-oil is also quiet, and crude has declined; whilst refined remains unchanged. Crude spot pipes is quoted at £42, and refined pipes, pale, £47; barrels sweet, £52 to £54., as to make.

Oilcakes.

Egyptian cotton cakes are in moderate supply, and prices are well maintained. Best Egyptian in bags sells at £9 15s., ex-store, and £9 12s. 6d. ex-ship. English cotton cakes are quoted at £9 17s. 6d. to £10, whilst Bombay is offered at £9 12s. 6d. per ton. Linseed cakes—Owing to the remarkable absence of inquiry, this market has been depressed, and holders in some cases reduced their quotations considerably. Best London made, also East India seed pures, are nominally quoted at £12 10s. to £12 15s.

Locust Beans.

There has been a very good demand, but there is great scarcity of available supplies, and prices are firmly held up at £10 15s. for whole, and £11 15s. for kibbled.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.

GERMAN AIMS IN THE NEAR EAST.

The following extracts are from an article, the second of a series of three, which appeared on Saturday in *The Times*, under the heading of "The Real Germany":—

Pan-German Ambitions.

"During the last ten or fifteen years much has been said in the European Press about pan-German ambitions and the extension of German political control over the whole route from Hamburg to the Persian Gulf; but I doubt whether any outsider really understood how deeply this idea had penetrated into the mind of the German people. Every well-informed and thoughtful German knew that what used to be called 'The Eastern Question' must be solved in favour of Germany, by war or otherwise. The opening up of land and waterways from Germany to the East has been the practical object of German ambitions, which popular instincts have supported. Austria was egged on to pick her quarrel with Serbia for no other reason. Bulgaria was induced to adhere to the German cause for the same purpose. When the British blockade began to be effective it became more than ever necessary for Germany to open the way to Constantinople and Baghdad, to subjugate the Balkans, and to secure such control over the Straits and Turkey as to make of Asiatic Turkey not only a granary, but a source of supply for all important raw materials like cotton, wool, metals, and petroleum. The Turco-German 'commercial' agreement recently concluded provides, I understand, for the substitution of Turkish supplies of fruit for those of Italy on the markets of Germany.

Danube, Rhine, and Elbe.

"Is it any wonder that having secured, as they believe, the highway to the East, and, with it, the power to throttle Russia on the Bosphorus at their pleasure, the Germans should be confident? The best proof of their confidence lies in the efforts they are now making to organize, develop, and extend their inland waterways so as to make it possible for vessels of 1,000 tons to pass from Antwerp, Hamburg, Bremen, or any other port on any large German river or canal to the Black Sea by way of the Danube. This 'Danube question' is to-day the foremost question in Germany. Preparations are being made to link up by a system of canals not only the Rhine, Danube, and Elbe, but every important German waterway. In the past this 'canal scheme' has been chiefly Bavarian. Now it has become national and imperial. The King of Bavaria has long been its most powerful advocate. The Bavarian Canal Association, founded twenty-four years ago, has always enjoyed his protection and support. He recently attended the general meeting of the association at Kelheim and delivered a speech of great importance, in which he briefly expressed public feeling as I have described it, and urged the absolute necessity of linking up Rhine, Danube, and Elbe, creating a huge united 'economic territory' based upon 'a constantly increasing and more fruitful development of the old and new relationships between Germany and her Allies.'

"Meetings like this have been held during the last two or three months in all the chief German towns, among others at Düsseldorf, Hamburg, Dresden, Berlin, Munich, and Ratisbon (Regensburg). There is hardly an important centre in which some general assembly has not been organized with the object of forming local executives, enlisting a technical staff, and raising funds. The enterprise has become Imperial instead of being Bavarian—a development which implies a delicate compliment to the King of Bavaria and insensibly tightens the ties which bind Bavaria to the Empire. Whereas Bavaria has recently shown a desire to maintain her separate individuality in the Empire by rejecting the proposals for an Imperial postage scheme, this Danube and canal enterprise is being used to bind her more tightly than ever to the Empire.

"One of the objects of the 'Danube scheme' is to secure for Germany the control of both banks of the Danube from source to mouth. Throughout Austria and Hungary and along the Serbo-Bulgarian shore the control is assured. It is hoped to bring Roumania into the scheme by persuasion or force, and to compensate her by securing for her possession of the Russian shore of the Lower Danube. Thus German control of the whole waterway would be complete, and would, together with the control of the railway route, link Germany indissolubly with the East."

TEUTON CANAL SCHEMES.*

Danube, Save, and Morava.

At the recent "Central Europe" Congress at Munich, Professor Oelwein, of Vienna, gave a clear account of the canal schemes which are now being promoted with so much vigour throughout Germany and Austria-Hungary. He declared that the canal system must make the Central Powers independent of British sea power, and give them access to markets hitherto controlled by British sea power. He sketched the ideal canal system thus:—

1. The Central Canal connecting all the navigable streams, from the Rhine to the Vistula, which flow into the North Sea and the Baltic.
2. Navigable connection of the North Sea and Baltic ports with the Danube and the Black Sea by way of the Danube-Oder Canal.
3. Navigable connection of the Rhine with the Danube and the Black Sea by the canalization of the Main and the construction of a new Ludwig Canal.

These canals would form the main arteries from West to East and from North to South-East. The subsidiary waterways would be as follows:—

4. The Rhine, connected with the Dortmund-Ems Canal in the north, and, after canalization of the way from Basel to Schaffhausen, connection with Lake Constance in the south.
5. Continuation of the Weser to the Main and to the Danube and to Munich.
6. The Elbe, connected with the ways that are already being canalized to Prague.
7. The Oder.
8. The Vistula, connected with the continuation of the Danube-Oder Canal to Cracow.
9. Continuation of the Danube-Oder-Vistula Canal to the Dniester.
10. Canalization of the Save, connected on the one hand with the Danube by a canal from Bukovar to Samatz, and on the other hand with Fiume and the Adriatic.
11. A waterway from Semendria on the Danube through the valleys of the Morava and the Vardar to Salonika.

EGYPTIAN CURRENCY

The Egyptian correspondent of the *Pioneer Mail* writes as follows:—

"Every year we have a silver 'crisis,' usually in the early autumn, when large numbers of labourers have to be paid daily throughout the country in connection with the cotton crop; but the crisis usually is over by Christmas and is met by imports of newly minted coin, which have to be obtained in the ordinary course. The war has, however, completely changed the situation. The increase in the army has necessitated the putting into circulation of far more nickel and silver currency than ever before, and the financial authorities took early steps to obtain the necessary extra supply. Things would not have been so bad if the shipments in the Persia and the Maloja had not been lost. During 1915 new coin to the value of £720,000 was imported, whereas the average of the preceding five years had only been £140,000, and the previous recorded maximum annual import was £694,000, in 1886, when the system was remodelled. The Sudan, it should be mentioned, uses the same currency as Egypt, and a good deal of British gold and Egyptian silver remains every year in the interior of that dependency. India appears to have been the only part of the Empire which had any silver coin to spare, and by special arrangement the Egyptian Government imported a certain quantity of silver rupees, which, it is stated, have now been declared legal currency in this country. Whether in order to facilitate trade between Egypt and the Sudan they will also be made legal currency in the latter dependency is not known."

* See "Engineering Notes" on p. 212.

ROUMANIAN RAILWAY TARIFFS.

(From Our Own Correspondent.)

Bucharest, May 27.

When the Budget was voted it was decided to raise railway tariffs, the change coming into effect on July 1. Fares for first-class travellers will be raised by about 20 per cent., for second-class 15 per cent., and for third-class passengers 10 per cent.

The tariff for goods is to be increased by about 10 per cent., that for alimentary products being at the same time reduced.

The tariff for the transport of cereals and of oil will be raised by about 12 per cent.

ROUMANIAN LOAN.

(From Our Own Correspondent.)

Bucharest, May 27.

Total subscriptions to the National Loan sent in, far exceed the sum of 400 million francs, but the State has refused the surplus.

The National Bank authorities are preparing a report on the loan, giving the sums subscribed together with the social condition of the subscriber. This ought to prove interesting reading from many points of view.

EGYPTIAN COTTON CROP.

H.M. Consul-General at Alexandria (Mr. D. A. Cameron, C.M.G.) has furnished the following information, received from a reliable source, relative to the Egyptian cotton crop for the 1915-16 season.

The crop is estimated at about 4,600,000 cantars (= 99.05 lbs.), as compared with 6,373,000 cantars in the preceding season; but the higher general prices both for cotton and seed, coupled with an increased cultivation of the more valuable Sakellarides variety, has given an increased value of about £E3,000,000 (£E = £1 0s. 6½d.) to the grower, viz., £E21,500,000 as against between £E18,000,000 and £E19,000,000 in the 1914-15 season. Prices throughout the season were favourable with a continued advancing tendency till the end of February, by which time practically all growers had disposed of their crops. The Government's decision to limit the area under cotton cultivation in 1915 was the chief reason for the reduction in the size of the crop.

COTTON STATISTICS.

The number of bales of cotton imported into the United Kingdom during the twenty-four weeks ended June 15, 1916, was 1,937,951. This included 7,031 bales of British East African cotton and 153 bales of foreign East African cotton.

In the same period 271,933 bales of Egyptian cotton were imported and 149,459 bales were exported. The total imports were as follows:—

	Bales.
American	1,532,690
Brazilian	141
East Indian	72,061
Egyptian	271,933
Miscellaneous	61,126
Total	**1,937,951**

Exports for the same period were as follows:—

American	57,091
Brazilian	100
East Indian	21,295
Egyptian	149,459
Miscellaneous	3,777
Total	**231,72**

CITY OF ALEXANDRIA FOUR per CENT. LOAN.—The National Bank of Egypt announces that COUPON No. 29 of the City of Alexandria Four per Cent. Loan due July 1, will be PAID at 6 and 7, King William Street, E.C.

AGRICULTURAL BANK OF EGYPT FOUR per CENT. CUMULATIVE PREFERRED SHARES.—The National Bank of Egypt announces that COUPON No. 24 of the Agricultural Bank of Egypt Four per Cent. Cumulative Preferred shares, due July 1, will be Paid at its offices in Cairo, Alexandria, and London (6 and 7, King William Street).

Engineering Notes.

Rhine—Danube Waterway.

In a previous issue (May 25) the project for linking up the Rhine with the Danube was referred to in these notes, and the serious effect that the accomplishment of such a project would have on British trade with the Near East, especially with Roumania, Serbia, Bulgaria, South Russia, etc., was pointed out. The trade in heavy goods, such as engines, steam boilers, heavy machinery, iron bridges, etc., was particularly mentioned as the most likely to be seriously affected, for this class of goods are shipped, as a rule, at higher than the ordinary rates of freight, whilst their landing at the port of destination often costs as much as the freight from England.

Cost of Handling Heavy Goods.

There are very few ports in the Near East which can boast of the possession of moderately efficient means for landing very heavy goods from ships. Take, for instance, the Roumanian port of Constanza, in the Black Sea, which, as the British Vice-Consul in his recent report says, "is a transit port for the whole of Roumania," but which "offers few facilities for dealing with imported cargo." This disadvantage, the Consul says, is especially conspicuous in the winter months, when imports destined for all parts of the country are landed. The quays are then crowded with bales and cases, which sometimes remain in the open several weeks, protected by tarpaulins only. The port would greatly benefit by the erection of adequate warehouses on the quay for the storage of goods, and by the acquisition of cranes for discharging direct from the ship to the railway wagon.

Hints to our Manufacturers.

Under such shipping, landing, and transporting disadvantages in the principal seaport of a country which is considered one of the most desirable markets in the Near East, what chance will the British manufacturers have in competition with their German rivals who, when the linking up of the Rhine with the Danube has been realized, will be able to send their goods—no matter how heavy—by this waterway, safely and cheaply from the centres of industry to the banks of the Danube in Roumania? The same applies to Serbia, Bulgaria, and South Russia, however. What can be done against such unequal competition? The recent Economic Conference of the Allies in Paris undoubtedly included this important question in the resolutions, the outlines of which were published last week. In the meantime, we do not see what more effective measures can be taken to anticipate such a competition than a change in the regulations for the navigation of the Lower Danube.

Damietta and Rosetta Barrages.

Work on these projects is likely to be deferred for the present, on account of the financial disabilities imposed by the war. Writing on this subject recently *Al-Ahram* quoted the Ministry of Finance as authority for the statement that before the Ministry accords "its approval of the expense it must be sure that the interest of the money to be spent on these barrages is less than the annual cost of the construction of the dams the barrages will replace. In any case, these barrages will not be begun in the present financial situation, especially as there are other projects more urgent and useful to the nation and the country." It has been explained previously that the object of the Rosetta project is to keep the salty sea water from mixing with the fresh water of the Rosetta Branch (which work is at present carried out by a special temporary "sudd" of earthwork mixed annually in summer) and of improving the irrigation of the surrounding lands in Behera and Gharbieh Provinces. The exact place where this barrage is to be constructed has not yet been decided.

"Penny in the Slot" Water.

The new automatic fountain for supplying water, which has been set up recently by the corporation of an English Midland town, will be of great interest to many municipal authorities in the Near East who, at the present time and every summer, are at their wits' end how to find water, and how to prevent its waste. Careless consumers let it run in their gardens while others are parched with thirst; others use it extravagantly without payment, and others consume it for manufacturing purposes when they have no right to do so. Then there are the steam vehicles which, going about the town, obtain large quantities from the public fountains in the streets free of charge; and when there is no water there is generally a "protest" meeting of the inhabitants for the deposition of the entire corporation! To save their position and civic dignity the unfortunate corporations should obtain, and use in their system of water supply, the new "penny-in-the-slot" device, such as the one to which we refer above. It is a water-delivery pillar, which can only be worked by the introduction of a standard disc. It applies the principle of the "penny-in-the-slot" machine to the delivery of water. The discs are issued by the corporation to individual users at a fixed charge, which in the case of the town referred to is 3d. per disc. At present there is no measure of the quantity of water supplied for the disc. The flow is maintained so long as the lever which operates the mechanism is held down. It is said, however, that an improved type of the machine will soon be introduced which would put either a time-limit or a limit of quantity upon the supply for each disc.

A *Times* Athens message of June 27 states that the Decree ordering a general demobilization of the Greek Army takes effect on Saturday. One half of the Reservists of the 1913 Class will be kept with the colours until the end of August, while the other half will remain until the 1915 recruits are called up. The British and French Ministers have recommended their respective Governments to make an advance to the Greek Government.

ROUMANIAN OIL PRODUCTION.

The production of crude oil in Roumania during the second half of May (old style) was at the rate of 4,500 to 4,600 tons per day, the improvement which took place in the first half of the month, when the production reached about 5,000 tons per day, not having been maintained (according to *Oil News*). At the end of the month Bustenari crude was quoted at 76 to 78 fr. per ton for prompt delivery, and correspondingly good prices were obtainable for Tzintea and Baicoi. Paraffinous oils, after a period of neglect, also enjoyed a fair market at favourable rates. Lack of new drilling equipment has restricted the quantity of crude offered in the open market, and it is to this circumstance that the high prices are mainly attributed. Exports have been curtailed by the congestion of the railway at Ploesti-Prédéal, and to relieve this a certain number of trains are being despatched viâ Palanca.

OIL OUTPUTS.

ANGLO-EGYPTIAN.—Gemsah—Production for week, 12 tons (previous week 20 tons); Hurgada, 428 tons, against 446 tons.

BAKU RUSSIAN PETROLEUM.—Production up to June 17, 84,000 poods.

BIBI EIBAT OIL COMPANY.—Production for weeks ended May 28, 63,466 poods; June 4, 62,600 poods; June 11, 62,600 poods.

BLACK SEA AMALGAMATED.—Production for week ended June 22, 22,760 poods.

CHELEKEN.—Production for fortnight ended June 17, 17,610 poods.

EUROPEAN.—Production to week ended June 18, 110,500 poods.

MAIKOP COMBINE.—Production for week ended June 22, 5,180 poods.

NEW CAUCASIAN.—Cable.—"Well No. 1, 14 ins. casing, depth 2,072 feet."

NEW SCHIBAIEFF.—Month of May.—Gross 518,420 poods (8,345 tons); net, 304,792 poods (4,919 tons).

ROUMANIAN CONSOLIDATED OILFIELDS.—Production, 516 tons.

RUSSIAN PETROLEUM.—Production for week ended June 17, 60,100 poods; for week ended June 24, 58,300 poods.

POSSIBILITIES OF EGYPTIAN FRUIT INDUSTRY.

The process of making apricot paste is very simple, and the industry is one which could easily be worked by peasant proprietors. Recently the Horticultural Section of the Egyptian Ministry of Agriculture has conducted public demonstrations at the Mudiria, Giza. Between May 25 and 31 nearly 300 people availed themselves of the invitation to be present, including many well-known Egyptians and British residents.

There is no reason why the making of apricot paste should not become an Egyptian industry, says the *Egyptian Gazette*. Usually about £E25,000 of the fruit thus dried is imported each year into Egypt from Syria; and this large sum could in future be kept in the country.

Another experiment going forward is the drying of whole apricots. Some very excellent specimens of dried fruit were on view in the Section. An apparatus for evaporating the moisture is used for this, as well as the open air. When the evaporator is used, about ten hours will complete the process, while the drying in the sun takes several days and the fruit must be shielded from dew at night. Specimens of apricot jam and jelly were on view which looked wholesome and appetising.

It is understood that the preservation of tomatoes will next receive the attention of the Horticultural Department, and visitors will also be invited to be present at demonstrations with this useful fruit.

ANGLO-EASTERN PUBLISHING CO., LTD.—Particulars of £500 debentures, created May 7, 1916, filed pursuant to section 93 (3) of the Companies (Consolidation) Act, 1908, the amount of the present issue being £450. Property charged: The company's property, present and future, including uncalled capital. No trustees.

EGYPT'S NATIVE INDUSTRIES.

From a Bradford paper we cull the following:—

Mr. W. A. Stewart, the former hon. secretary of the Bradford Arts Club, is finding in Egypt his work grow under his hand. He went out to reorganise the technical training of the native population in Egypt, and to try to revive the old textile and other art industries which once made Egyptian craftsmen famous, and the work is succeeding admirably. Even since the war commenced the work has shown development. Dyestuffs from England are replacing those previously imported from Germany, so that the weaving industry, now very extensive, shall not suffer, and an effort is being made to cultivate still larger quantities of indigo this year. Many new industries have been started to supply demands for articles no longer obtainable from abroad, including factories for cheese, brush, and bootmaking on a wholesale scale, and tanneries and dyeworks are also flourishing. A big exhibition of Egyptian industries is to be held during the summer at Alexandria, and it will be transferred to Cairo in the autumn. A permanent exhibition of the work done in the trade schools has been set up, and a constant demand for carpets, inlay and metal work, is now established.

The weaving school at Mehalla is to be further extended with the addition of power looms for silk and cotton weaving, and it is hoped to establish presently a weaving school at Damietta, and a school of applied design in the heart of the Cairo bazaars. In his work Mr. Stewart has received considerable assistance this year from an Egyptian student, who, after a course of study at the textile department of the Bradford Technical College, has returned to Egypt.

GREEK TENDERS FOR KHAKI.

The London correspondent of the *Birmingham Post*, writing on Friday last, said: "There has been speculation in wool trade circles here as to the outcome of an invitation to British manufacturers from the Greek War Office for offers to supply 300,000 metres of khaki cloth. Firms were given specifications at the beginning of April, and were asked to telegraph preliminary offers to Athens within a week, supplementing these by letters with full details and samples. One of the conditions laid down by the Greek Government was delivery at the Piræus. Not many manufacturers were in a position to tender on account of previous commitments, and now the whole business has been postponed indefinitely, as the British Government, I hear, owing to the condition of affairs in Greece, have not seen their way to grant permission for the delivery of the goods in the event of the contract being placed in this country."

THE GREEK DEBT.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to April 30, 1916 (New Style: January 14 to May 13, 1916):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, Apr.,	1916	2,517,882	2,064,000
Do. do. do	1915	3,110,115	2,205,274
Estimated Receipts for 4 months (Law of Control)		9,633,333	3,566,666
Actual do. do.	1916	11,817,723	9,550,000
Do. do. do.	1915	12,717,086	8,842,887
Difference between estimated and actual receipts for 4 months	1916	+ 2,184,389	+ 5,983,333
	1915	+ 3,083,753	+ 5,276,220

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate of the month is above par the conversion is made at that average rate.

COMPANY MEETINGS.

ALEXANDRIA WATER COMPANY.

The thirty-eighth annual general meeting of the Alexandria Water Company, Limited, was held at Alexandria on Monday, June 5, at 4 p.m. The number of shares represented at the meeting was 29,730, or almost exactly 25 per cent. of the total number of shares.

The Chairman, Mr. A. L. Gorra, before opening the proceedings, expressed, in the name of the board of directors, their deepest regret at the death of their old and valued colleague, Baron J. L. de Menasce, on the 2nd instant. It is thirty years ago since Baron de Menasce was elected on the Alexandria committee of the board, in the days when the board of the company was in London. He never failed to take the keenest interest in all affairs connected with the company, and his profound experience and judgment in all financial matters has been of undoubted value to the administration. The proceedings of the meeting were suspended for five minutes as a mark of respect to the late Baron de Menasce.

The following is an extract of the directors' report to the shareholders and of the accounts:—

The directors, in submitting to the shareholders their annual report and balance-sheet for the past year's working ending March 31, 1916, have pleasure in stating that, in spite of the exceedingly difficult conditions under which it has been necessary to work owing to the war, the heavy increase in the prices of all commodities and the corresponding decrease in rental value of houses, the results obtained may be considered highly satisfactory. The question of coal supply has caused the greatest anxiety, and the prices have steadily increased up to 164s. per ton; during some months of last summer liquid fuel was used with great success, the supply, however, failed for a time; this has now been resumed, and although the prices are abnormally high, there is still a considerable economy effected by its use in place of coal. The total quantity of water pumped was 21,462,000 cubic metres, showing an increase of 4,135,000 cubic metres over the previous year. The water supply to transports in the harbour has necessitated some extension of mains and hydrants on the quays and about 1,500 metres of new pipes have been laid to meet these demands. An additional steam water barge has been purchased, and all the steam barges have been working practically day and night throughout the year. In order to cope with the military requirements and to compensate for the lack of pressure due to the large draw-off of water for temporary camps and hospitals, two important new mains have been laid, one of 1,250 metres of 12 inches and 425 metres of 8 inches up to the village of Mex, and the other of 2,450 metres of 18-inch main between the pumping station and Ibrahimieh. This latter will also provide an ample supply for a quarter which has developed very rapidly during the past few years. The total length of mains laid during the year was 8,856 metres. At the main pumping station two additional "Jewell" filters have been erected, bringing the number of these up to 24; a project is now in course of preparation for further extensions in this respect, which it is hoped will be put into execution when conditions are more favourable. A sum of £16,250 has been spent on new works during the course of the year. The high pressure fire service continues to give entire satisfaction. Apart from buildings fitted with automatic sprinklers it has been called into operation during the year on five occasions for the extinction of fires in buildings which were not fitted with these appliances. The total receipts amount to £191,605, as against £142,849 realized last year. This increase is almost entirely due to the extra water supplied for military purposes. The increase in the working expenses has been £9,133, a figure which might have been very much higher had we not had considerable quantities of coal in stock and on order at prices not much above normal. It is anticipated that there will be a further increase in our expenditure on fuel for this current year. The value of our machinery, mains, etc., and the various rates of depreciation fixed by the board, give the sum of £12,000 as the amount to be written off annually. The board, in view of the extraordinary receipts and the extra amounts spent on new works, has considered it necessary to write off, besides the £12,000 for this year, a further £10,000, thereby making the total depreciation figuring in the balance-sheet correspond to the value of the assets in question. It should be pointed out in this respect that our plant has been subjected to more wear and tear this year owing to the greater strain under which it has been working. The value of our securities, based on the market price at March 31, 1916, shows a further depreciation of £18,500 after taking into account the £15,000 which their valuation at the time of our last balance-sheet had shown. The board has, therefore, decided to write off the "profit and loss" account this sum of £18,500, carrying it over to the credit of the special account "provision for depreciation of securities" for the same reason and under the same conditions expressed in their last report. This provision thus stands at £33,500. The balance of the "profit and loss" account, after making the above depreciations and the usual allowances, and after deducting the interim dividend of 4 per cent. paid on December 15, 1915, is £81,000, from which should first be deducted 6 per cent. to complete, with the interim dividend, the 10 per cent. on the capital, £36,000, leaving a balance of £45,000, of which one half is due to the Municipality according to our convention—£22,500—and the other half to the shareholders—£22,500, which represents 3s. 9d. per share, and this, added to the 6 per cent. above mentioned, makes a total of 9s. 9d. per share for the dividend of June 15, 1916. The directors therefore recommend the shareholders to fix the dividend payable on June 15, 1916, at 9s. 9d. per share, which, with the interim dividend of 4s. paid on December 15, 1915, makes a total dividend of 13s. 9d. for the year. There are two vacancies on the board which it has been decided to fill by naming as directors Mr. A. G. M. Dickson, Sub-Governor of the National Bank of Egypt, and Mr. H. R. C. Blagden, M.Inst. C.E., the present manager of the company. These two nominations are submitted to the meeting, and, in the case of Mr. Blagden, Art. 106a of the articles of association must first be declared suspended in his favour. According to Art. 84 of the articles of association, Messrs. S. C. Salvago and H. E. Barker are the two directors who retire by rotation, and, being eligible, offer themselves for re-election.

The report and accounts were unanimously approved by the meeting, and all the above proposals confirmed. Messrs. A. G. M. Dickson and H. R. C. Blagden were duly elected as directors, and Messrs. S. C. Salvago and H. E. Barker, the two directors retiring by rotation, were re-elected.

EGYPTIAN MARKETS.

The annual general meeting of the Egyptian Markets, Limited, was held at Winchester House, Old Broad Street, London, E.C., on Wednesday, Major W. I. Le Breton (chairman) presiding.

The Secretary (Mr. F. J. Horne) having read the notice convening the meeting and the auditors' report,

The Chairman said: Gentlemen, I will first go through the usual form of asking your permission to take as read the directors' report and the accounts for the year 1915. A year ago I had to regret a falling off in our profits, and a consequent reduction in our dividend to 8 per cent. for the year. On the present occasion I have to express our satisfaction at the improvement in our profits, and at this early opportunity of returning to the 10 per cent. dividend to which we had become accustomed when our business was interrupted by the war. Our trading profits for the past year are the biggest ever earned in the history of the company—(hear, hear)—and our net profits have only been exceeded on one occasion; that was in 1911. Compared with the previous year (1914), our profits have increased by more than £9,000, but this statement, taken alone, would convey an exaggerated impression of our progress, for it has to be remembered, as explained by me when I was last privileged to address you, that the year 1914 was considerably short of the profits which we felt we ought to have earned, had it not been for the upset caused by the war. I think, therefore, it will convey a more correct idea of our position if we describe the result of our working for the year 1915 as £2,700 better than the pre-war year 1913. It is £2,000 short of the best year (1911) we ever had, but this is entirely due to higher charges for income-tax and bank interest. This result of the year's business is far more favourable than any of us could reasonably have expected, and it will, I think, have come as a surprise to any who have not followed our published weekly returns. In the previous year we had suffered considerably from the existence of war conditions during five months only, whilst in 1915 these unfortunate conditions, including martial law in Egypt, prevailed for the whole period, and yet we have not only made good the losses of the previous year, but have improved upon the profits of the last pre-war year, 1913, although that year had the advantage of the sale of cotton seed for the Government, which we lost. I have explained to you that it was taken away from us to be given to the Lalakas, which were established by Lord Kitchener. It would look as if the war had ceased to have any detrimental effect upon our business, if, indeed, it had not assisted it. Here, again, I have to guard against conveying an impression quite incorrect. The countries both east and west of Egypt have continued no less hostile, and we have, consequently, suffered no less seriously from the absence of supplies of camels and sheep therefrom. In certain districts our business has also been injured by the departure of considerable numbers of the inhabitants for employment by the Military Department at places altogether beyond the zone of our operations. Further, we cannot point to any gain to us from the war, except it be the indirect one due to the presence of large bodies of troops and the consequent rise in the prices of their local requirements. The advantage of this has, to a great extent, fallen to the districts, and this, I admit, is more to our advantage than all the money made by the towns in normal seasons. We have suffered less than we might have done by the restrictions placed by the Government upon the cultivation of cotton. In spite of these restrictions there was a crop approaching five million cantars, against an ordinary year's crop of, say, seven millions, and both the quality and prices were satisfactory. The restrictions referred to have now been withdrawn.

Our expenses show a reduction of £694 compared with the previous year, but this is unreal, and is due to the temporary absence of some of the staff on military service and to the larger credit to these expenses by debit to our nitrate business. The latter, as I have told you, increased very much, and it has to bear a fixed charge per ton sold for services rendered by the markets staff. Reduction of expenses is not a direction in which we can look for improvement. Claims for increases of salaries and wages are always before us, and deserve our consideration, both on the grounds of excellent service rendered and greatly increased cost of living in Egypt. Our net profits have more than doubled in the last seven years, and the dividends on our ordinary shares have quadrupled, while those on the deferred shares have risen from nothing to £6 per share. (Hear, hear.)

I will now refer briefly to existing circumstances in the light of their effect upon the current year. According to our latest advices, we have improved upon our last year's earnings to the extent of £746 at June 22. I have told you that the war certainly does us no good, and the sooner it is over the better for us. I may remind you that our acquisition of outside markets was, as it were, nipped in the bud by the outbreak of war and the consequent necessity for husbanding our resources. The termination of the war will enable us to proceed to the completion of negotiations for several of these markets, which, until then, must necessarily remain in abeyance. We have, according to our latest information, thirty-five markets closed at present, the majority of which are closed to all but camels and donkeys, owing to foot-and-mouth disease. We are led to believe that this is not likely to continue for long. There is but little sign of cattle plague, and in this important connection I see no reason to depart from my previously-expressed opinion that we have seen the worst of it and its consequences, nor from my hope that we may soon see the end of it. I am afraid that our business in chemical manures must suffer, as we have not seen our way to laying in sufficient stocks of nitrate of soda except at a risk which we did not dare to incur. I have no doubt many here have experiences of the consequences of the high freights and insurance charges which have recently prevailed, and it will consequently suffice for me to say that when nitrate of soda approached double its pre-war price, owing simply to the cost of conveyance, we decided not to lay in stocks from the sale of which we could, at best, only expect reduced profits, and which, under a change of circumstances, might result in very serious loss to the company.

I have told you that our business in another chemical manure, the product of the Egyptian Phosphate Company, is proving satisfactory, and we hope that to some extent this may counteract our losses on nitrates. We also hope to derive some advantage from a contract recently entered into with the Government of Egypt for the purchase, on their account, of fodder for the year for the mounted troops in Egypt. I admit that the making of a profit out of this has not been the only consideration of your Board. We were also actuated by a desire to be of use to the military authorities. A year ago we placed to reserve a sum of £750 to meet the consequences of deficiencies which had just been discovered. We did this in spite of our general manager's representation that such provision was, at any rate, excessive. I am glad to tell you that Mr. Duffield has succeeded in meeting the greater part of these deficiencies without having to draw upon this reserve—(hear, hear)—and it is now highly improbable that all of it will be required for the purpose. Our experience has, however, taught us that we are always more or less in danger of losses such as these or others due to depreciation in the value of stocks held by us. In the accounts which we have been considering we show two separate reserves, aggregating £5,600, including £1,500 set aside on this account from the profits of the past year. The services of our general manager, Mr. C. E. Duffield, of our assistant managers and of our entire indoor and outdoor staff, continue deserving of all praise. No less than seven of our European staff are now engaged in military duty, and amongst these are several of our most experienced and valuable officers. It says much for Mr. Duffield's management and for the loyal assistance rendered to him by those remaining that, although we were very short-handed, the work of the year has been so well conducted that we have attained the satisfactory results shown in the accounts. (Applause.)

The Chairman moved: "That the report of the directors, dated June 17, 1916, together with the audited statement of accounts and balance-sheet for the year ended December 31, 1915, be and they are hereby approved and adopted."

Captain A. St. John Cooke seconded the resolution, and it was carried unanimously.

The Chairman: I have much pleasure in moving: "That the interim dividend of 4 per cent., less income tax at 2s. 8d. in the £, declared on the ordinary share capital of the company and paid on January 31, 1916, be, and it is hereby confirmed, and that a further dividend of 6 per cent., less income tax at 2s. 8d. in the £, on the ordinary share capital of the company, making 10 per cent. for the year, be and it is hereby declared to be paid to the holders of ordinary shares recorded on the registers of the company on June 19, 1916, and to holders of ordinary share warrants to bearer."

Mr. W. Home seconded the resolution, and it was unanimously agreed to.

The Chairman: I beg to move: "That the sum of £1,836 5s. 9d. (equal to £6 2s. 5d. per share), plus or minus one-third of such additional amount (if any) as may be found due from or to the Egyptian Government, as the case may be, beyond the £3,200 (the amount estimated as due to Government), less income tax at 2s. 8d. in the £, be declared as dividend on the deferred share capital of the company, payable to holders of the deferred shares on the company's registers on June 19, 1916. That of such figure £4 10s. per share, less income tax at 2s. 8d. in the £, be paid on June 30, 1916, and the balance (if any) immediately after ascertainment thereof."

This was seconded by Captain St. John Cooke and carried unanimously.

Capt. St. John Cooke moved the reappointment of the chairman as a director, remarking that Major Le Breton wanted to retire from the board in 1914, but, at the special request of his colleagues, decided to stay on. He had helped the company immensely, and personally he wished to thank Major Le Breton for what he had done.—Mr. W. Home seconded the resolution.—Mr. Leigh Wood said he would not like the resolution to be passed without adding a special word of appreciation on behalf of the shareholders of the work done by the chairman. He hoped the chairman's health would permit him to retain the position which he had filled for so many years with distinction.—The resolution was carried unanimously.

The Chairman thanked the meeting and hoped his health would allow him to remain for some time longer with the company, and if so, he would do his best for the shareholders. (Applause.)

Mr. Evans moved: "That Mr. George Herbert Redwood be and he is appointed a director of the company." He said he could do so with all the more confidence from his knowledge of Mr. Redwood and his capabilities.

Mr. Morrison, in seconding the resolution, spoke highly of Mr. Redwood's qualifications, remarking that Mr. Redwood was one of the founders of Borax, Limited, a company which had a capital running into millions, and a company which had been one of the greatest commercial successes.

The resolution was carried unanimously.

Mr. Leigh Wood then moved the following extraordinary resolution:—"That the maximum number of directors be increased to six." The resolution was the result of a good deal of conversation between the respective interests of the company, and he could assure the shareholders that it had been arrived at

Digitized by Google

in the best interests of the shareholders and of the company generally.

The resolution was seconded by Mr. Morrison, and carried unanimously.

Mr. Leigh Wood then moved :—"That after the word 'Chairman,' appearing in Article 79 of the articles of association, the following words shall be added : 'And as from the 1st day of January, 1915, and thereafter, a further lump sum of £600 per annum, which shall be divided amongst the directors in such manner as the board may from time to time determine.'" In doing so, he said that originally the fees of the directors amounted to £2,350, but in 1909 they were reduced to £1,126, so that the company had saved a substantial sum in the past seven years. During those seven years the directors had had £200 a year, which was not a large amount, and in view of the fact that the shareholders were now getting a very good dividend he thought the time had come when the fees might be raised. (Hear, hear.)

The resolution was carried unanimously.

MORTGAGE COMPANY OF EGYPT.

The eighth ordinary general meeting of the Mortgage Company of Egypt, Ltd., was held on June 23, at the Cannon Street Hotel, E.C., the Right Hon. Viscount Milner, G.C.B., G.C.M.G. (the Chairman), presiding.

The Secretary (Mr. R. H. Eggar) read the notice and the auditors' report.

The Chairman, in moving the adoption of the report and accounts, said that they were much more cheerful than those presented a year ago. (Hear, hear.) It would be too much to say the company had completely recovered from the effects of the financial upset caused to Egypt by the sudden outbreak of war and the exceptionally bad cotton season which immediately succeeded it, because several years would be needed to effect a complete recovery, but they had certainly gone further on the road of recuperation than they could have anticipated a year ago and the prospect was far brighter. The past year had been one of momentous and terrible events, and at one time it seemed as if Egypt were likely to become one of the principle scenes of conflict, but this danger was now much diminished. There might still be a good deal of desultory fighting on the borders of Egypt, but there was hardly likely to be another serious attempt at invasion, and in the absence of invasion internal tranquillity would not be disturbed. Egypt had in her present Sultan a good ruler, devoted to the interests of his subjects and faithful to his British friends. The principal British officials were very capable administrators, and there was a strong army of occupation. Good prices for the produce of the soil had put money into the pockets of the people. They had become used to rumours of wars and were no longer scared by them. Thus political and social conditions were once more almost normal. On the economic side the outstanding feature of the situation was the great rise in the price of cotton. Last season's crop was one of the smallest on record, but the diminished yield—the main cause of which was the restriction of the area of cultivation by the Government in the autumn of 1914—had been more than compensated for by the favourable state of the market. Moreover, the higher price was likely to be maintained and even improved upon in the approaching season. In other respects also the cultivators had been doing well. The sugar crop was good, though the fact that the Government fixed a maximum price deprived the growers of the full benefit of the increased yield. The rest of the produce of the land, especially bersim, was disposed of at exceptionally high prices owing to the large requirements of the Army. In consequence of all this the Government finances had experienced a remarkable recovery, and the improvement had affected all the leading financial institutions, this company among the number.

Land owners, small and great, had been in a much better position to meet their obligations, and the actual cash receipts of the company during 1915-16 had shown a very gratifying increase over those of the preceding twelve months. The difficulty and delay in obtaining payment of the sums due, which was so greatly aggravated by the most unfortunate year to which he had several times referred, showed itself in the accounts in two ways—namely, in the growth of arrears and in the larger figure standing against the unwelcome item "Properties acquired by foreclosure." With regard to the latter, the increase this year was not very great. It had gone up from £120,000 to £148,000, but personally he did not anticipate much, if any, loss of capital in this respect. As to arrears, the experience of past years had shown that they did ultimately recover all but a small portion of them. Nevertheless, they had deemed it prudent to add £50,000 to the reserve—the same amount as they added last year, when prospects were far less favourable. There was, however, this great difference in the two cases. After setting aside the £50,000 last year they had nothing left, whereas after setting aside the same amount this year they were still able to pay a full twelve months' dividend to the Preference shareholders. This was a gratifying contrast. At the same time he did not forget that they were still six months behind in the payment of the Preference dividend, and that, until the leeway had been made up, they could not give anything to the Ordinary shareholders. While, therefore, greatly rejoicing at the improved condition of the company's affairs, he fully admitted that there was ample room for further improvement. How far they were likely to attain it in the year 1916-17 depended, apart from political considerations, almost entirely upon the prospects of cotton, and those prospects were on the whole very good, though there were elements of uncertainty which should induce them to be cautious. The area under cotton was very much larger this year than it was last, and with the remarkable recovery in price there was every hope of a large and very remunerative crop. On the other hand, there was always the danger of injury from the pink boll-worm, and there was a new trouble about coal. The Egyptian cultivator was dependent upon an adequate supply of fuel to work the pumps which, in many cases, were a necessity for raising water on to the land, and also for draining it; but the price of coal had risen enormously, and there was some doubt whether Egypt would be able to obtain a full supply this year at any price. These were serious drawbacks, but he did not think they would be sufficient to counteract the effects of the increased area of cultivation and the better prices. It was a reasonable anticipation that the growers of cotton, even if they did not realise all their hopes, would see a progressive improvement in their receipts and in their ability to meet their obligations.

The Hon. A. H. Mills seconded the motion, which was unanimously adopted.

COMPANY NOTES.

Lake Copais.

The report of the Lake Copais Company for 1915 states that the net profit in Greece amounted to £51,185, increased by London revenue to £52,211. After providing for London expenses and charging interest on the prior lien bonds amounting to £6,686 18s., applying in writing down investments £835, transferring to reserve £2,000, carrying to "A" debenture stockholders' interest account £7,920, and to "B" debenture stockholders' interest account £14,220, there remains £17,950. This amount has been transferred to bondholders' suspense account pending consideration of the resolutions which are to be submitted on the 27th instant to holders of the several classes of bonds and debenture stock. Subject to the passing of the resolutions, it is proposed to distribute, on July 31, 1916, 4 per cent. in cash (subject to deduction for income-tax) on the "A" debenture stock. It is also proposed to distribute at the same time 6 per cent. on the "B" debenture stock, of which 2 per cent. will be in fully-paid 6 per cent. second prior lien bonds at par, and the balance in cash, subject to deduction of income-tax. Fractions of £5 of second prior lien bonds will be paid in cash. On January 24 last tenders of 7 per cent. prior lien bonds were invited, and £7,300 of fully-paid bonds and £10,400 of partly-paid bonds have since been redeemed. At the same time, the balance of 20 per cent. remaining unpaid on £23,100 of the 7 per cent. prior lien bonds was called up. The total amount of these bonds now outstanding is thus £52,300 fully paid, against £70,000, of which £63,300 was paid up. The area of land cultivated was 41,357 acres, against 35,375 acres in the previous year. The crop on 1,170 acres failed, being for the most part maize sown by tenants on land where no provision existed for irrigation. The total area from which the crops were harvested was thus 40,187 acres, which compares with 30,673 acres in the previous year. The increase in the area cultivated is largely due to the new irrigation and drainage works.

BALKAN COAL COMPANY.

A company under the style of the Balkan Coal Company, with domicile in Berlin, and a capital of 4,000,000 marks, has just been started, says the *Engineer*. The company's object is to supply Turkey and the Balkan States with fuel, in place of the English coal formerly used. Hitherto the Balkan States and European Turkey have imported about 2,500,000 tons of coal annually from England.

THE ALEXANDRIA WATER COMPANY, LIMITED.

PAYMENT OF DIVIDEND.

Notice is hereby given that a Dividend of Nine Shillings and Ninepence per £5 Share on Coupon No. 55 is Payable on and after June 15, 1916, at Messrs. Barclay and Company, Limited, 1, Pall Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Limited, Alexandria, Egypt, upon the making of a declaration as to ownership in the form required by the above Banks, forms of which will be supplied upon application.

By Order of the Board,

H. R. C. BLAGDEN,
Manager.

Alexandria, Egypt.
June 5, 1916.

THE GHARBIEH LAND COMPANY, CAIRO.

Notice is hereby given that a Resolution was passed at the Ordinary General Meeting of this Company in Cairo on May 31, 1916, adjourning the meeting to July 31, 1916, at 11 a.m.

NOTES OF THE WEEK.

A break in the arrival of news from the Hejaz was to be anticipated after the conclusion of the first stage of the Arab revolt. As there has been no confirmation of the capture of Medina by the Grand Shereef's forces, it is probable that the report was premature. But with the destruction of the railway for a distance of nearly a hundred miles the city must be effectually isolated for the time being, and the Turkish attempt to relieve it may well precipitate an engagement which will exercise considerable influence upon the course of the revolt. In spite of withdrawals of troops from Palestine and Syria for other spheres it is probable that there are still sufficient Turkish forces in this part of the Empire to make the task of the Arab levies a difficult one. The configuration of the country in the region of the Holy Cities militates against the employment of heavy artillery; but, if the Turks command any large supply of maxim guns, they will have a marked advantage over their opponents. We can only hope that the Arabs will proceed warily and be content to consolidate their position rather than advance any farther against the Turks. The revolt is of their own contrivance; but it comes opportunely for the Allied Powers, and there should be no hesitation in affording the Shereef of Mecca any support of which he may be in need.

Despatches from the Commander-in-Chief in India giving an account of the fighting near Aden have now been published. The period covered is from the outbreak of the war with Turkey until the beginning of the present year. At the outset the Turks were found to be preparing to act against the Aden Protectorate and, with a view to breaking up their concentration, orders were given to a British force proceeding from India to Suez to capture Sheikh Sa'id, the south-westerly point of Arabia at the entrance to the Red Sea, and to destroy the works, armaments, and wells at that place. These operations were duly carried out in November, 1914, but, as was to be expected, only gave Aden temporary relief from the attentions of the Turks. By the end of June, 1915, it was learned that an attack on Lahej, twenty-three miles north of Aden, was imminent. The Aden Troop was sent ahead to protect the town, and the Movable Column followed on July 3. General Sir Beauchamp Duff continues:—"The intense heat, sand, and shortage of water rendered the march and the subsequent operations most trying, but nevertheless the advanced guard reached their objective, and engaged the Turks just beyond Lahej on the evening of July 4. But the desertion of the hired camels and the severe climatic conditions so delayed and distressed the main body as to necessitate a withdrawal from Lahej to Khor Maksar on July 5." It was accordingly found advisable to increase the Aden garrison. The Turks were attacked and routed at Sheikh Othman on July 21; a month later they fell back on Lahej, and a further reverse was inflicted on them on September 25. They made an attempt to coerce the tribes in the east of the Protectorate at the beginning of this year; but as a result of a successful action fought by the Aden Movable Column "the Turkish pressure on the Arab tribes is reported to have been relieved."

No very great importance attaches to the Aden operations; but it will be gathered from the despatches quoted that, as in the case of the Mesopotamian and the first East African Expedition, no attempt was made to organize and equip the British forces in any way adequate to the task they had on hand. It is not stated at what date the first strengthening of the Aden garrison took place, but presumably several months elapsed between the arrival of the first reinforcements and the advance on Lahej. During this period it ought to have been possible for a force designated the Aden Movable Column to have been so equipped that it could move two days' march from Aden without running short of water.

Such news as there is from Greece is of a satisfactory nature. The Greek lamb is overcoming any fears it may have had at the prospect of having to lie down with the Allied lion. Prince Andrew can only have intended to play with the latter's tail, without twisting it, when he spoke to some disbanded reservists of the King as making at present a great fight on behalf of Greece, and asked them not to be frightened by the aspect of external events, because "when the weak fight against the strong, they may succumb in body; but morally never." The whole speech seems to have been somewhat reminiscent of the Hohenzollern manner; but is not likely to be followed by any worse consequences for the author than a cordial invitation to visit Berlin. Meanwhile, at the suggestion of the Allied Powers, demobilization has been expedited, and should be completed by the third week of July. The elections, according to present arrangements, are fixed for September 17. M. Venizelos announces that the Liberal party will "throw itself body and soul" into the contest, and it is probable that his opponents will endeavour to

Digitized by Google

hide their own discomfiture by representing a vote for the Venizelists to be a vote against the King.

There has been little change in the situation at Salonika. If the reports of the withdrawal of Austro-German troops from the Balkans should be accurate, the enemy will be deprived of some of the advantages accruing to him from the long time which he has been given in order to prepare for the Allies' advance. It is not to be supposed that the Bulgarians have been entirely deserted by the Central Powers. Messages from Salonika speak of the daily bombardment by German batteries on the Vardar front. As the expenditure of shells is out of all proportion to the results attained, it is probably incurred in the hope of arresting any forward movement on the part of the Allies. In the meantime, Allied, particularly French, aircraft have been active. On July 3 a French aeroplane carried out another raid on Sofia, covering the three hundred miles, there and back, in less than five and a-half hours. Whatever the material results of such a raid, the fact that only anti-aircraft batteries attempted to deal with the invader points to the enemy being not too well supplied with aircraft. When the time comes for the Allies to advance their superiority in the air should prove of considerable advantage.

"No material change" and "no event of importance" are the phrases used to describe the situation in Mesopotamia. We have, therefore, to infer that General Gorringe remains in occupation of Dujailar Fort, a few miles south of Kut, while the Turks continue to hold the Es Sinn position, an equal distance to the east of the town. The weather, that is to say, the midsummer heat, must be against military operations; but it is also possible that the success of the Turks in driving back the Russians from the frontier between Baghdad and Kermanshah has imposed a halt on the British forces. It was well known that the Russians had advanced on Khanikin with a comparatively small force, and the doubt was expressed in these columns whether, in spite of its successful record, this force was adequate to the task of advancing on Baghdad. The arrival of Turkish reinforcements has settled the question. As a result of the enemy's pressure the Russians have had to fall back until Kermanshah is reported to be once more in the hands of the Turks, and for the moment any hope of a combined movement on Baghdad from the north-east and south has to be abandoned. News of "desultory fighting" between Arabs and a party of irregular marauders in Turkish pay in the neighbourhood of Nasiriyeh shows that the enemy are still paying attention to the British garrison at this place, and that some of the Arab tribes are now with us. A force of Indian cavalry assisted the Arabs, and the marauders were dispersed without difficulty. It would be of interest to know whether the Arab tribesmen concerned have been loyal to the British throughout the campaign, or whether they have turned against the Turks either as the result of a general movement in the Arab world or in connection with the events that are said to have occurred at Kerbellah.

According to information received by *The Times* a rising against the Austrians has broken out in Montenegro. The insurrectionaries have taken to the wooded parts of the country under the leadership of a former War Minister. There can be little doubt that the rising has been prompted by the state of destitution to which the inhabitants have been reduced by the Austrians. Little news of what has been taking place in Montenegro has been allowed to leak out of the country; but even if most of the reports which are believed by Montenegrin exiles are discredited, there is ground for supposing that for some time past the condition of the people has been desperate. A rising in existing circumstances, with the country cut off from outside help, can have little chance of success, and can only have been undertaken as an alternative to slow starvation. We can but hope that it will serve to direct the attention of the Allied and neutral Governments to the situation in Montenegro, with a view to devising some means of alleviating the lot of the hapless inhabitants.

The subject is dealt with in a report drawn up by Mr. Alexander Devine, who was recently entrusted with a mission by the Montenegrin Red Cross and Relief Fund of London. Mr. Devine's chief object was to obtain information regarding Montenegrin refugees on the Continent and to take such steps as might be deemed necessary for the immediate relief of those who were found to be destitute. He was able to establish that there were less than 3,000 refugees in all, for the most part distributed between Italy, France, and Switzerland; but he was compelled as a result of the information which reached him to devote special attention to the problem of Montenegro itself and its inhabitants, with a view to devising some practical means of sending relief into the country. Mr. Devine was able to enlist the sympathy of the Vatican for the Montenegrins, and the scheme he recommends to his committee for the consideration of the Allied Governments is based on the Vatican's proposals. These are that, in conjunction with the Spanish Red Cross and with the strongest guarantees obtained through the Nuncio in Vienna that the wishes and stipulations of the Allied Powers should be strictly observed, a convoy of ships of relief should be sent to Montenegro in charge of Spanish officials, together with officials of the Vatican, and a committee in Montenegro, consisting of Montenegrins; that bases of supply should be formed at four points, and that the officials designated should with their own hands distribute the relief, reporting subsequently to the Allied Governments. Whether these proposals will be acceptable to the latter remains to be seen. It will be remembered that at an earlier date the British Government adopted the attitude that it was the duty of the occupying Power to provide for the well-being of the population in the occupied country, and it protested against the callousness of those who, "by deliberately starving populations under their control, attempted to blackmail the Allied Powers into replenishing supplies which ought never to have been taken from the country." Unfortunately, neither protest nor appeal to humanitarian principles has the least effect on the Central Powers; and a stage is soon reached when the Allies have to submit to be blackmailed in this way. They will, however, have themselves to blame if full retribution is not exacted hereafter from Germany and Austria.

Amid the competitive claims of numerous refugee funds it is to be hoped that the people of Great Britain will not allow their own fellow-countrymen who are refugees from Turkey to go unprovided for, because their need is not insisted upon with all the glamour of a flag day or public entertainment. Nothing could be more pathetic than the appeal wrung from Lady Lowther as chairman of the Executive Committee of the British Refugees from Turkey Fund. "Must British refugees," she asks in THE NEAR EAST of last week, "go without, while Allied refugees are being splendidly helped with British money?" But the resources of the fund which is so carefully administered on behalf of the refugees from Turkey will be exhausted by August unless further contributions are forthcoming. Some of the refugees are in great penury, helplessly stranded through no fault of their own, many with valuable property confiscated by Germans and Turks within the Ottoman Empire. We cannot believe that Lady Lowther's appeal for £5,000 will be made in vain.

It is with the liveliest satisfaction that we learn that the report of the death of Sister Augustine Bewicke proves to be untrue. A letter dated June 26 has been received from her, in which she states that she is "now quite well." During her long residence in the Near East Sister Augustine, as sister of charity in the French convent at Salonika, has endeared herself to all sections of the population in that town and to a large portion of Macedonia. Her death would have been a great blow to the people who have special need of her beneficence at this period, and no doubt the anxiety caused by her illness gave rise to the happily erroneous report concerning her.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 22.

The Sultan Visits Mansura.

H.H. the Sultan is continuing his journeys into the interior and has just concluded a visit to Mansura, the capital of the province of Dakahlia and one of the most important agricultural and industrial centres of the Delta. On his way from Alexandria his Highness stopped at Dessuk and Mehalla el Kubra, two of the principal towns in the Gharbia, at both of which places he held receptions. At Mansura the Sultan, who was accompanied by the Ministers, was received by the Mudir and the Provincial Council. From the station he drove to the various State schools, all of which he inspected most thoroughly, and after visiting the ophthalmic hospital, presented to the town by Badrawi Pasha Ashur, he proceeded to his own tent and held a reception of the local notables. Luncheon was then partaken of. His Highness made a stirring speech to the people, and afterwards drove to the station, visiting the Agricultural School en route, and returned by special train to Alexandria. The visit was a splendid success throughout, and his Highness was received with enthusiastic acclamation by the people wherever he appeared. Mansura is a busy and prosperous centre; but it has of recent years gained an unenviable reputation as a "Nationalist" stronghold. One can only hope that the people in the province of Dakahlia will take their Sovereign's words of counsel and encouragement to heart and occupy themselves more with matters that are far more profitable to their country and to themselves than all the political propaganda in which some of them have dabbled of late.

Memorial Services to Lord Kitchener.

Following on their participation in the ceremony which took place at Kasr-el-Nil Barracks on the 13th inst., the Jewish and Coptic communities this week held special services in Cairo and Alexandria in memory of Lord Kitchener. These services were attended by representatives of the Anglican Church, the High Commissioner, and the G.O.C. the British troops in Egypt. The Bishop in Jerusalem made a point of being present at the ceremony in the Great Synagogue, where the Grand Rabbi delivered a stirring address. The Coptic Patriarch, also, paid an eloquent tribute to the late British Agent.

In my letter last week I mentioned that the Grand Mufti was present on the platform with the heads of the other religious sects in support of the Bishop of London at the Kasr-el-Nil memorial service to Lord Kitchener. I am afraid, however, that I did not lay sufficient stress on the significance of this feature. In the past Moslem religious dignitaries have collaborated with Christians in civil ceremonies, but this is the first occasion in modern Egyptian history where the Grand Mufti and his sheikhs have sat on the same platform with non-Moslems during the celebration of a Christian ceremony. This departure from precedent, apart from the fact that it constitutes a remarkable tribute to the prestige of the late War Secretary, is certainly a welcome sign of the times.

False Coinage Cases.

A series of very interesting false coinage cases is at present before the Assize Courts. The most important is that in which the cashier of the Native Court of Appeal is implicated. It appears that some little time ago one of the judges wanted some small change, and sent to the Court cashier to get it. He changed a £5 note, and when he got home gave some of the money to his wife. The latter subsequently went shopping, and when she wanted to pay for her purchases at one of the big shops she was informed that the silver she tendered was false. She was taken to the *caracol*, but at once released; an inquiry was opened, and the Parquet sent the Appeal Court cashier and another man for trial before the Cairo Assizes. Both men pleaded "not guilty," but while the case was being heard a letter addressed to the cashier by a leading engineering firm was received in Court announcing the arrival from England of a piece of machinery which he had ordered, and which, whilst it might be used for perfectly legitimate purposes, could also be utilised for the manufacture of false coins. The hearing was at once adjourned for further investigation, and it is expected that when the case comes on definitely for trial some interesting light will be thrown on the extraordinary amount of false silver which has come into circulation of late years.

The Fuel Question.

It was recently announced that in order to assist the cultivators, who annually require large quantities for the irrigation of their land, and in response to urgent representations as to the serious situation created by the shortage in and high price of coal in the country, the Egyptian Government had secured a substantial stock of coal, and was prepared to sell it to *bona-fide* cultivators at prices considerably below the cost price of coal delivered at Alexandria. This last week a rumour has gone round that some hitch had occurred in the deliveries to the Egyptian Government, and that the latter was about to raise its price slightly. There is not a particle of truth in this, and as for the underlying insinuation that the stock held by the State is becoming exhausted, it appears that the fellaheen are by no means rushing to avail themselves of the concession made to them by the Government. In point of fact, we are being afforded one more illustration of the old saying that in Egypt the unexpected always happens; for the cultivators who were expected to be clamouring for the coal on which they have in the past been accustomed to rely for their pumping machinery, etc., have made no such move, and have turned to the national substitute lying to their hand—cotton sticks and the trees in the districts. What is even more surprising is that, although it is known that large numbers of trees (Sunt) have been felled, the country does not appear to be threatened with the deforestation which the alarmists predicted would take place when coal and wood-fuel imports fell off. The satisfactory feature in the situation is that the substantial amount that usually goes abroad for the purchase of coal has been kept in the country. The people have, in fact, drawn on their own fuel resources, and now that they have found out that coal is not indispensable it is to be hoped that they will continue in the future to make use of the excellent material which annually lies so near to their hand.

Feeling in the Greek Colony.

At the beginning of this month the Greek community sent a telegram to King Constantine expressing the pain they felt at the Bulgarian occupation of Greek forts, and imploring their Sovereign to seize this last opportunity and throw in his lot with the Entente. Much to their surprise and indignation, this message has been returned to them—presumably from Athens—through the Greek Agency, on the ground that it was too disrespectful to be delivered to the King. The Greek colony is in a very excited state, and the relations between the Venizelist and opposing elements are exceedingly strained. The anti-Venizelist Press has contained of late very violent articles of a nature that certainly deserves the serious attention of the local authorities. It is interesting to note that the pro-German element has been completely ostracised by the rest of the colony.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, June 9.*

The Occupation of Fort Rupel.

The handing over of Fort Rupel to the Bulgaro-Germans has caused a painful impression throughout the country. Fourteen millions were expended on this fort, which constituted the defence of the Beles pass, and the details of which were not known even to the higher officers of the Greek army. And to-day it is in the hands of the Bulgarians! In a powerful article published in the *Kyrix* M. Venizelos accuses the Government, under pressure from the General Staff, of having violated Greek neutrality in favour of the Germans and their allies, the enemies of Greece, by abandoning Fort Rupel; while the Serbians, her allies, have been refused passage through Greek territory. Seeing that after the arrival of the Serbians at Salonika the balance of strength was with the Franco-British forces, it was wished (says the *Kyrix*) to strengthen the Bulgaro-Germans by handing over to them the fort that is the key to a Bulgarian invasion of Eastern Macedonia, as it is to a Greek advance upon Sofia. The Government's Germanophilism, the writer goes on, has carried it so far that it desires a Bulgarian victory in order that Germany may not be beaten, and it allows the struggle to extend to Greek territory in order to avoid a Franco-British invasion of Bulgarian territory.

The Blockade.

The surrender of Fort Rupel, constituting a violation of the promise of "very benevolent" neutrality given to the Entente by the present Government, has naturally aroused afresh all the mistrust that the Allied Powers have felt for the Skouloudis Cabinet ever since it announced that if the Franco-British troops had to retire into Greek territory it would have to disarm and intern them. The four Powers declared last week, through their representatives in Athens, that if the Bulgaro-Germans were allowed to advance without opposition by the Greek forces the consequences would be serious. Now, since the Greek Government has received that announcement unfavourably, the Allied Fleet has for the past five days put a stop to the movement of Greek shipping, closing most of the ports of the kingdom to Greek vessels, and sending some of them to Bizerta. This has created a deep impression throughout the country. The Ministerial Press ceased its insulting language regarding the Entente, and the *Nea Himera* advised the Government to give proofs of Greek neutrality. One wondered what these "proofs" might be; when a few hours later a supplement to the same journal announced that the Government had decided "spontaneously" to disband twlve classes of the reserve and to give leave to twelve more classes.

The Partial Demobilization.

The news of this partial demobilization, which was quite unexpected, has brought about a general relaxation of the tension in the country, upon which the absolutely useless mobilization had so long weighed like a nightmare. Needless to say, the measure was the direct result of the blockade, and the Government took it only in the hope of pacifying the Entente; though M. Skouloudis in the Chamber sought to make it appear that the Government acted entirely on its own initiative and with a view to pacifying the country. The Ministerial Press, not knowing how to account for the sudden *volte face*—for the Government had always asserted that the maintenance of the mobilization was an absolute necessity—declare that the Government has *now* been able to obtain satisfactory guarantees from the Central Powers, appearing to forget that they have hundreds of times assured the country that such guarantees had already been given!

General Demobilization. June 13.*

The Government, having been informed by the Greek Ministers abroad that the Entente Powers would not be satisfied with partial demobilization, and that they would insist upon a general demobilization, hastened to proceed to such general demobilization, in a disguised way, and seeking to make it appear that it acted on its own initiative. Thus, as the Royal Decree already promulgated only provided for the demobilization of twelve classes, the Minister for War has addressed a circular to all the army corps, in which the partial demobilization is, by a species of jugglery, transformed into a general demobilization. At the same time, the Minister declared to certain journals that the Government had actually intended to proceed to a general demobilization when it ordered the partial demobilization!

M. Venizelos on Fort Rupel.

In the *Kyrix* M. Venizelos shows clearly that had the Government ordered the defence of Fort Rupel it would not have run any risk of war with the Bulgaro-Germans; for had the latter had any intention of fighting they would not have stopped at the armed resistance offered by the Greeks. In stopping, they proved that they had no intention of occupying the fort by force. In fact, if Germany meant to make war on Greece, she would not have failed to announce her intention through diplomatic channels. Her failure proved that if the coup had not succeeded she would have disavowed the military authorities' action at Fort Rupel.

Attacks on Newspaper Offices.

Cowed by the vigorous action of the Powers, the Government has sought to avenge itself on the Venizelist party, regarding M. Venizelos as the author of its misfortunes, which are, of coure, really due to its own crass folly. Thus, after having organized a meeting of protest against the blockade and the "violation of liberty" by the Entente Powers, it sought to give the impression that public opinion was hostile to M. Venizelos. A military fête was held at the Stadium yesterday for the benefit of the mobilized men's families, and after this fête a part of the crowd escorted the King to his palace, where somebody delivered an oration of sorts. A student, addressing another in a loud voice, remarked that all these *claqueurs* were in the pay of Baron Schenck. Thereupon some of the gentry referred to attacked the student, and a police officer haled him and his companion off to the police-station.

Meantime another group of manifestants went off to the Place de la Constitution, where they were harangued by an unprepossessing individual, who constituted himself the champion of the Government, and incited his hearers against M. Venizelos. His listeners, amongst whom, it is said, there were many secret police, proceeded promptly to act on his incitement, and to break the windows of the Venizelist journals. It is significant that they were well provided with stones, which they must have been carrying with them, since the Athens streets are mostly asphalted; so that the whole business was clearly premeditated. The police made no attempt to check the demonstrators, who, after breaking into a shop and destroying all the portraits of M. Venizelos they could find, proceeded to that statesman's house and indulged in hoots and hisses. The conduct of the police was so disgraceful that it has been condemned even by the Governmental Press.

The *Patris* explains how these anti-Venizelist disorders are arranged and organized. It seems that, in addition to the regular gendarmes, there are 900 probationers, who, not having been enrolled, are held at the disposal of the police, and who, while still retaining their civilian garb, are employed as *claqueurs*, to applaud Ministers and so forth; for example, on the occasion of the King's fête day, when, says the *Patris*, they applauded also certain other people—meaning evidently the Ministers of the Central Powers. In fact, I noticed that on the Place de la Constitution the motor-car in which the German Minister was driving was received with applause—a strange thing, quite contrary to the national feeling, and one which surprised and disgusted everybody. These creatures it was, according to the *Patris*, who provoked the disturbances at the Church of St. Constantine during the Requiem attended by the refugees from Asia Minor, and who insulted the Mayor when he left the memorial service for the Emperor Constantine Palæologus, having acclaimed the Minister of the Interior and his colleagues.

* Delayed in transmission.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 13.

A Diplomatic "Gaffe"—

It is possible that Count Czernin's hint to the effect that M. Také Jonescu should "voluntarily" return his decoration was prompted by a not unfriendly spirit. The fact remains that his action represents a diplomatic "gaffe," for which in all probability his Government will not assume responsibility. Governments sometimes make scapegoats of their worthiest representatives, and are certainly not inclined to screen the vexatious doings of a blundering Minister. To do so would be running counter to the best established traditions of the diplomatic service. The Austro-Hungarian Government will presumably create no innovations in this direction. Count Czernin is not a professional diplomat. He was appointed to Bucharest, it is said, at the express wish of the late heir to the Austrian Throne, who honoured him with his friendship, and upon whose protection he could possibly have counted had the Archduke been alive. A diplomat who was less of a novice than Count Czernin might have avoided the pitfall. Meanwhile, the Count has gone to Vienna "on leave," and (for all we know) there may reign within the Imperial German Legation a spirit akin to jubilation. . . . .

—And its Sequel.

The banquet which it was proposed to give in honour of M. Také Jonescu and the other persons who had returned their Austrian and German decorations took place on June 4. Besides assuming proportions that surpassed all expectation (over 500 covers were laid), the occasion was used for springing upon unsuspecting guests a piece of political news, the importance of which cannot be denied. The first toast, in honour of M. Také Jonescu, was proposed by M. Olanescu in the name of M. Nico Filipesco, leader of the Conservative Party, who was himself prevented by an indisposition from attending the banquet. In the speech which was read on his behalf, M. Filipesco stated that a great debt was due to M. Také Jonescu for the attitude he had adopted since the outbreak of the European conflict; that there existed between them the closest ties, and the most complete understanding on all political questions, external as well as internal; and that they had resolved to solve these questions together, whether they happened to be in power or in opposition. He had the pleasure of informing the assembly that the fusion between the Conservative and the Conservative-Democrat parties was an accomplished fact.

Many speeches were made in the further course of the banquet, some of these—that of Dr. Jean Cantacuzène, for example—representing thought of a very lofty character. Suffice it to say that one and all were expressive of a spirit of intense hostility towards the Central Powers, and of unmixed confidence in and admiration for the generous cause supported by the Allies.

It is interesting to hear that the fusion of the two parties has taken place under the combined leadership of MM. Nico Filipesco and Také Jonescu, and that these two will work hand in hand in organising the fusion throughout the country.

The Incorrigible Radeff.

A Liberal member has made the following statement to the correspondent of a leading newspaper:—

The fire at the Army Pyrotechnic is the exclusive work of Bulgarian *komitajis*. It was originated by M. Simeon Radeff, the Bulgarian Minister in Bucharest, in complicity with Langheben, a pyrotechnic engineer, living at Rustchuk. This engineer is a man of vast competence in pyrotechnic matters. Their object in destroying our pyrotechnic establishment was to prevent Roumania from facing the exigencies of a military undertaking directed against the Central Powers. The fact that M. Radeff left Bucharest quite suddenly on leave before the nefarious plan could be put into execution is evidence that the Bulgarian Minister was afraid of discovery. I can further tell you that the Roumanian Government is aware of these facts, having received precise information from our diplomatic representatives in Bulgaria. I need only refer to the confidential reports received by our Government in the course of the last few days, which, I affirm, not only exist, but contain in black and white the information which I have given you.

The *Viitorul*, a Government organ, asserts that these statements are devoid of all foundation.

Lord Kitchener's Death: Roumanian Opinion.

The news of Lord Kitchener's death caused genuine consternation among Roumanians. Loudest of all are the doleful lamentations of those at whom people point a finger while they whisper in your ear the word "Germanophil." (Here it may be observed in passing that the fact of anyone harbouring tender feelings for the Teuton sufficing to single him out for special attention is the best evidence that he and his fellows do not form the majority. No one will nudge you and hint that Mr. So-and-so is a Francophil. It is an understood thing, unless the contrary is expressly stated.) These folk assume funereal expressions and gulp forth remarks such as "terrible catastrophe," "irremediable loss," "will precipitate peace," "worse than the naval disaster," and others no less grotesque. Most thinking people, while deploring the loss of our great soldier and administrator at this still critical time, judge that he had accomplished the greater portion of his task of organization, and that men of less conspicuous talents will suffice to carry on his work. They scoff at the suggestion that the disappearance of any one individual can have the significance of an irreparable national catastrophe to a Great Power like Britain, or can, as in the present instance, modify the course or issue of the war.

CYPRUS NOTES.

(From a Correspondent.)

Nicosia, June 19.

The Troodos Summer Season.

The movement of civilian families to the pleasant summer quarters at Olympus has almost ended. Many will stay in the plains and brave the heat. Thanks to the hospitality of those who can get away, friends who remain below are often invited to break the monotony of the trying months by a visit to the hills, and a few weeks of the invigorating air work wonders for those who drag through the tedious season or suffer from fever.

Prices at the camp, as, indeed, more or less elsewhere, are very high and tend to rise, and this may well be a contributing cause which will lessen the number of visitors to Mount Troödos.

Jewish Refugees.

Rumours are current that pecuniary help is being sought from local funds for Hebrew refugees sent to Cyprus. One at least of the Greek papers strongly objects to the proposal. The Jews, it asserts, have many societies, as well as wealthy persons, in all countries who can well afford to care for their own poor; and it is not fair that the impoverished island and government of Cyprus should be called upon to provide money for this cause.

FOR BRITISH PRISONERS IN BULGARIA.

The splendid work done on behalf of British prisoners in Bulgaria by Madame Jonescu, the wife of M. Také Jonescu, the well-known Roumanian statesman, is familiar to most readers of The Near East. By means of a fund raised in Roumania, and with the assistance of the United States Minister in Sofia, Madame Jonescu has been able to provide many comforts for our imprisoned countrymen, and her kindness, and that of her friends in Roumania, has been most heartily appreciated by the prisoners. Now, however, the time has come when Madame Jonescu realises that to continue her good work further funds are absolutely essential. She is, therefore, appealing for subscriptions in this country, and we take pleasure in warmly commending her appeal to the notice of our readers. Bulgaria is a poor country; it is badly in need of many necessities of life at the present time, and the lot of the British prisoners can hardly be a happy one at best. There is, however, no doubt that Madame Jonescu will be able to make certain that all funds intended for the benefit of our countrymen are so employed, and subscribers to the fund need have no fears on this score. The Bank of Roumania has expressed its willingness to open an account for the fund, and the Earl of Bessborough has kindly consented to act as hon. treasurer. All subscriptions should be sent to him at the Bank of Roumania, Limited, 27, Throgmorton Street, E.C.

As a result of the inquiry into the causes of disorder at Galatz, the authorities have arrested a number of Syndicalists. During the disorder eight persons were killed and nine injured. The Syndicalists are said to be German and Bulgarian agents.

The Bulgarian-Roumanian frontier (says a Bucharest telegram) has been partially opened at Svistova and Lom Palanka. The principal points—Rustchuk and Pazarjik—remain closed. Bulgaria's attitude causes a painful impression, and the Press demands reprisals.

BULGARIAN NOTES.

(From a Correspondent.)

Bucharest, June 11.

"Tsar" Ferdinand's Dream.

Those acquainted with "Tsar" Ferdinand's sentiments know that he cherishes very tender feelings for the Hungarians. He looks upon Hungary as his real native land, and he would stick at nothing to serve it. The last visit of Bulgarian deputies to Hungary, Austria, and Germany has served to throw a strong light on his true preferences; for of all the towns and cities these deputies visited, Budapest was the only one to receive a telegram of thanks for the reception accorded them. Bulgaria and Hungary appear to be united in the dreams in which the "little Tsar" indulges. Perhaps, in his incurable megalomania, he conjures up a vision of uniting the crowns of St. Stephen of Pressburg and of Constantine of Constantinople!

Bulgaria and the U.S.

The Bulgarian Press goes into ecstasies over the fact that the American Legation at Sofia has, for the first time, hoisted its flag on the national fête day of SS. Cyril and Methodius. Says the *Mir*:—"Though we are separated by a great distance, excellent relations have always existed between ourselves and the United States, and it is particularly agreeable to us to record the attention shown to us by the American Legation on the occasion of our national fête. America is called upon to play a great rôle, not only with regard to the conclusion of peace, but also in the development of future international relations. And we can count on American sympathy being on our side." Another Bulgarian delusion!

The Bulgarising Process.

It is notorious that thousands of people are starving in Macedonia, but, instead of sending them bread, M. Radoslavoff's Government prates to them of "Bulgarian liberty," and sends them Bulgarizing books and pamphlets for distribution! Now, to hasten the process of Bulgarization of a country, which, in spite of *komitajis*, endeavours to preserve its individuality, the Government has decided to establish, so to say, several factories for the creation of "patriotic priests," who may later be entrusted with the mission of governing spiritually, in Bulgarian fashion, the unfortunate Macedonian Christians. Two seminaries and five schools for priests will be opened shortly in Macedonia. In the "priest schools" all *komitajis* who can pronounce a few formal phrases will be able to obtain in a few months the diploma necessary to qualify them for priestly work.

In the Department of Prizrend, one of the most Serbian regions of New Serbia at present in Bulgarian occupation, there is such a shortage of men that it is impossible to find enough even to constitute parish councils. Nearly all the male population has fled before the Bulgarian hordes, or has been exterminated. In order to make some show of communal administration, the Bulgarian authorities have set up in each district central municipalities which control all villages in their own district. These central municipalities will be under Bulgarian commissaries appointed by the Prefect.

Closing of the Frontier.

A few days ago—on the 9th inst., to be precise—the Military Commandant at Rustchuk and the Chief of Police called on M. Padeanu, the Roumanian Consul in that town, and on the agent of the Navigazione Fluviale Roumain, and informed them that from that date the Bulgaro-Roumanian frontier would be closed for passengers and goods, and that steamers between Giurgevo and Rustchuk would not be allowed to call. The news has caused a great sensation in Bulgaria, and at Rustchuk it was thought to indicate a rupture of relations between the two countries. Probably, however, movements of troops really account for the action.

Russian Prisoners in Bulgaria.

Germany is sending into Bulgaria large numbers of Russian prisoners, who have to be fed free whilst travelling in the country. These prisoners have on their caps, or on the cuffs of their coats, the initials "K. W."

There is no foundation for the report, Reuter's Agency is authoritatively informed, that the Entente Powers are exerting any sort of pressure, concerted or otherwise, upon Roumania with a view to influencing her course of action in regard to the war.

The Austrian military authorities in the occupied Serbian territory have ordered the compulsory teaching of the Magyar language in all Serbian schools (writes a Bucharest correspondent). German is already taught as an obligatory subject, and this new order presumably aims at restoring the Austro-Hungarian equilibrium. A Hungarian, one Janos Farego, a former Inspector of Schools in Hungary, is nominated as Director of Public Instruction in the invaded Serbian territory.

ASSYRIAN REFUGEES.

Mr. Paul Shimmon, representative of Mar Shimun, the Patriarch of the Assyrian Church, wrote to Persia some months ago requesting that photographs depicting the actual situation of the Nestorian (Assyrian Syrian) refugees be sent to the U.S.A. In response to his request he has received a letter in Syriac, the only one of the three copies to reach its destination. It is from Mr. Yoel B. Rustam, a graduate of Urmi College, about twenty-five years of age. He is well known to Dr. Shedd, the Archbishop's missionaries, and to Mr. Shimmon. He writes from Urumia, Persia, in April, 1916. The translation of his letter, from which the following extracts are taken, was made by Mr. Shimmon and revised in conference with Professor Rockwell, of the Publication Committee of the American Committee for the Armenian and Syrian Relief, and confirms Mr. Phillips Price's impressions of that region.

Those who live in Bashkala, on the frontier of Turkey and Persia, are in a most wretched condition. Up to the present (March) once only have some ninety loads of wheat been sent to them by the American missionaries. But what will this do for some 6,600 souls? Some have gone into the fields and villages to find remnants of unharvested wheat and pick them up to live on. Here and there a man had a sheep or mule which he was able to take along in his flight; that has since been sold and entirely eaten up. Now starvation is carrying them off mercilessly. Over one-third of them have died this winter. . . .

About 4,000 have gone to Khoi, a city in the north-western corner of Persia, and there they were in just as bad a condition. Nearly 1,500 of these have died. There are no houses in which they can live. Khoi is now altogether inhabited by Moslems, and they could not think of polluting their premises by the presence of Christians, whom they consider religiously unclean. The Mohammedan Governor compelled the Moslems, through the influence of the Russians there, to open their barns and stables for some to live in. The Christians are so lean and emaciated that death will get at them wholesale.

I went into the villages of Salmas (in Persia) where these Christian Highlanders are existing, and went from house to house and saw their condition. I visited Khusrabad first, a great centre where in normal times some 600 Syrian families live beside the newly arrived 13,000 that had been scattered through the villages of this plain (Salmas). In Khusrabad there were 3,200 refugees at the beginning. For some of them there are houses in which they have been accommodated. Others are living in barns, sheds, or stables. For others not even these are to be had, and they are living out in the streets, sitting under the walls on the highways. They suffer from cold, as they have nothing in the way of bedding and winter clothing, and the winter months are severe. (It is 4,000 to 5,000 feet above sea-level.) In every room, stable, or barn there are living anywhere from five to thirty souls. They are given six roubles per month for their support. The rouble has very much depreciated in value, and they do not know what is best to do with the money—whether to spend it for wheat, bread, fuel, clothing, kerosene, etc. Bread is now high. Many, therefore, purchase wheat and grind it with hand-mills and then boil and eat it. These people are dying for actual lack of nourishment and from bitter cold. Those who are so fortunate as to be in the houses gather around the ovens, which are dug in the ground, and spread a quilt on a low table placed over the oven in which they have put a few pieces of charcoal; and then they tuck their feet inside the quilt to get warm. They call this arrangement a *kursi*. A quilt has been given by the missionaries to each family of five or more to spread over them. They have nothing under them, and they sleep on the bare ground. Those who are sick and those who are well are all huddled together under this *kursi*. There is hardly a house in which there are no sick.

In passing through a village I came to a wood on the outskirts. Near it there was a barn which was partly unroofed; it had no door. I saw two boys of fifteen and five years of age sleeping outside this barn. On going inside I saw two other boys about ten and eight years of age. They had buried themselves in the chaff. I asked them: "Why do you do that?" They answered: "Because there is no room for us in the village. We have nothing to cover ourselves with, so we have buried ourselves in the chaff; it is both a quilt and a mattress." They further said: "We four are brothers. Our father died only the day before yesterday. Our mother died a week before he did. We have also lost another brother." They were so pale that it made one almost sick to look at them. They had no fire. There were no other relatives to look after them. I doubt very much if they could keep alive much longer in that condition. All I saw they had of this world's goods was an old

Digitized by Google

teapot and one dish. Then they had bought a quilt a few days before for their father, which they were now using for themselves.

Of one family of seven three had died and two others were so sickly that one could not expect them to get well. I went a little way into the woods near the village and saw a person who had been buried four days previous. He had been ill and had been thrown into the wood, as he had no one to look after him. After he had died one of the boys in the barn had gone and dug a place for him in the woods, and had merely thrown some dirt over him. In some cases the wife or the daughter buries the family dead.

Out of the 3,200 in the village of Khusrabad one thousand had died, and there were many who were very ill. In another place I saw a mother and two children, a girl and a boy, sitting under the *kursi* warming themselves The mother was groaning faintly, but the voice of the little girl could hardly be heard, as she was nearly starved to death. The little boy was lying quietly beside his mother, and made no sound. The father and two daughters had already gone to their rest.

In another village, Ula, I was told that many of the people from Quchanes (the seat of Mar Shimun, the Syrian Patriarch) and other people were living there. At the beginning, in the fall, when they came here, there were about 900 people there altogether. Now only some 350 are left, and they are in the condition that I have described already. Late in the evening, while passing through this same village, I saw a woman with nothing but a thin spread wrapped over her, and she was lying near the wall in the street, and could not be expected to live many days.

From all the investigations that I was able to make, and from my own personal observation, I am sure that over 5,000 out of the 13,000 that had stayed in the plain have perished, and this is the opinion of others also.

These refugees are too far removed from centres of interest, and are still surrounded by Moslems, so that very little practical help comes to them other than that which is given by the charitable organisations; and this is not sufficient to satisfy their hunger and to give them enough clothing and bedding to be comfortable at night.

(Contributions to this work may be sent to the Hon. Secretary, Archbishop of Canterbury's Assyrian Mission, Church House, Westminster, London.)

DISTRESS IN SYRIA.

In connection with the distress prevalent in Syria, and especially in the district of Mount Lebanon, the Syrians residing in Manchester held a private meeting on Thursday afternoon last week, when a provisional committee was appointed to act as a branch of the "Syrian Relief Fund," the headquarters of which are in Cairo. A subscription list was opened, and over £1,000 was at once raised amongst those present. It was also decided that no appeal should be made to their friends and sympathisers in Manchester, unless an assurance is forthcoming that the relief intended for the sufferers can be undertaken and distributed by the officials and agencies of the United States in Syria.

The Provisional Committee elected consisted of: Mr. K. Jebara, Chairman; Mr. S. J. Cohen, Vice-Chairman; Mr. E. Kahla, Mr. J. Majdalany, and Mr. F. Hourani, Hon. Sec. The principal subscribers to the fund were:—Messrs. S. and S. Sednaoui, £200; Mr. E. Kahla, £200; Mr. J. Majdalany, £100; Messrs. Hourani and Racy, £100; Mr. K. Jebara, £100; and Mr. S. J. Cohen, £50.

BOOK NOTES.

Messrs. Stanford's "Map of the Russian Battle Front in Europe" (war map No. 19) is of much interest at the present time. It shows the Russian front in April of 1915 and that held after the great retirement, whence the present advance is being made, and though it is to a small scale (1:2,217,600), it is full of detail, very clearly drawn, and excellently produced. The price of the sheet (25 ins. x 18 ins.) is 2s. 6d., or the map can be obtained mounted either to fold in case or to hang on the wall, for 4s. 6d.

Messrs. Hutchinson and Co. will shortly publish "Through the Serbian Campaign," by Mr. G. Gordon-Smith. The author, who is an Englishman, accompanied the Serbian army as correspondent of a New York paper, and thus had opportunities of collecting authentic information at first hand. His book will be illustrated by photographs, many of which have been supplied by a Serbian army photographer.

Messrs. Longmans have just published "With the Twenty-Ninth Division in Gallipoli," by the Rev. O. Creighton. The book, which contains two maps, is priced at 3s. 6d. net.

A book published recently (Young, Liverpool) is "With Gypsies in Bulgaria." Its character is indicated by its title. The author travelled (in 1913) from Varna to Rustchuk with a party of gypsies in the guise of a Turkish peasant, and his experiences, though neither very adventurous nor very exciting, provide good material for an interesting book.

NEAR EAST BOOKSHELF.

GERMANY'S TURKISH DUPE.*

Readers who turn to this little book expecting to find it a mine of information regarding the city of the Khalifs, Mesopotamia, and Syria, will, we fear, be disappointed. The author's long residence in the East, his frequent journeys up and down the country, and the opportunities he has enjoyed of studying many types and mixing with many classes of the native population, undoubtedly qualify him to write a book of the kind we have in mind. But in the present instance he—like most of us just now—is more concerned with the great war; and he is bent on doing what lies in his power to show how carefully Germany laid her plans to conquer the East, as a first step to conquering the world. Especially is he keen on showing how, by gross treachery to the rest of Europe and to the cause of civilisation and humanity, Germany contrived to secure her hold upon Turkey, the evil effects of which we all deplore to-day. This being his object, the sub-title of his book is certainly appropriate; and if we cannot help regretting that he tells us little or nothing new about the East which he knows so well, we may, at the same time, feel grateful to him for helping the public to form a true conception of German policy in regard to Turkey, and, for that matter, in regard to the Near and Middle East in general. The more widely that policy is understood in this country the better.

Canon Parfit has little to say that will be new to anyone who has followed events in the Near East at all closely during the past quarter of a century. But it is obvious that he writes not for such students, but for the man who knows little or nothing of the subject. Indeed, the book consists of a series of articles which appeared originally in an evening paper; and it is obvious throughout that the author is appealing to a special audience—a "popular" audience, and not a "select" one. He certainly makes many points so clear that the dullest of readers can hardly fail to see how widespread was the German net, how deep-laid were the plans for stirring up the Moslem world against the enemies, not of Islam, but of Germany! The tale of the Kaiser's unholy bargain with Abdul Hamid and, later, with Enver Pasha, is told in graphic fashion; we are shown how the wily Teuton, by means of his missions, his schools, his acquisition of all sorts of commercial and financial privileges, obtained his grip on the unhappy Turk; and his readiness to sacrifice the Armenians without a flicker of compunction so long as it subserved his own purposes is made only too clear. The Canon's personal observations of the rapid increase in the number of Germans in Turkey during his residence in the country are noteworthy; so is what he writes (on pp. 66-67) regarding the honesty of German methods in competing for such an important business as the importation of oil engines into Syria. We would especially commend these pages to the notice of British engineering firms and of our Government.

The book, being in the nature of a patriotic offering to the cause that we all have at heart just now, it would be ungracious to criticise it too closely. We would, however, suggest that Canon Parfit sometimes generalises too freely. Thus, when he writes: "To suggest a deep dark plot to a Turk is to capture his interest and support; to advise him to be honest and just is to suggest the imposition of intolerable restrictions against which his whole being must rebel," he is certainly unfair. The observation might be true if applied to the official class—which is the class Canon Parfit would be most likely to meet in Baghdad and Jerusalem. But the "Turkish" official is very seldom a true Turk, and we have it on the authority of such good judges as Mr. D. G. Hogarth, Sir Mark Sykes, and many others, that the true Turk—the Anatolian Turk—is one of Nature's gentlemen—simple, honest, and admirable indeed.

We could wish that the author had avoided such a horrible German spelling of Rashid as "Raschid," which sets one's teeth on edge; and we do not admire "Bedowi" for "Bedawi" or "Bedawee." Again, to write of the Druzes as having "long been loyal to Great Britain" is surely neither quite discreet nor quite accurate. These, however, are trifling matters. We must thank Canon Parfit for a sturdy effort to hammer another nail into the coffin of German ambitions in the East, and trust that the nailing down process will be performed thoroughly and quickly.

TANGIER TO TEHERAN.

An illustration of M. Venizelos' popularity is brought out in the following incident, reported by an Athens correspondent:—"Quite recently a well-known merchant in Mitylene and a large shipper of olive oil, had a lot of two to three hundred casks of oil ready for shipment. The dock labourers, however, refused to move the casks because the merchant was well known as an anti-Venizelist. After certain negotiations, the labourers only agreed to shift the casks on condition that the merchant first stood up on the casks and called out 'Zito Venizelos,' ('Long live Venizelos') three times; which he eventually consented to do, much to the amusement of the spectators."

***

The same correspondent writes (on June 23):—"The temperature in Athens during the last ten days has been tropical, reaching on Wednesday last 112 deg. Fahrenheit in the shade. In connection with this abnormal heat coinciding with the presentation of the Note by the Allied Ministers, a street hawker was heard to remark, "Of course, what can you expect once Germany is all ablaze."

***

A few weeks ago, in writing of the German and Turkish efforts to mislead the Moslem world, I mentioned a remarkable document that I had received from a correspondent, and indicated that I hoped to refer to the subject again. The document lies before me at the present minute, and, frankly, the more I consider it the more puzzled do I become. It is entitled "The Fetva of the Jehad," and it starts off with the following announcement (in italics):—

The issuance by the head of Islam of the Fetva, or proclamation, announcing a Holy war, called upon all Mussulmans capable of carrying arms—and even upon Mussulman women—to fight against the powers with whom the Sultan was at war. In this manner, according to Constantinople newspapers, the Holy war became a duty not only for all Ottoman subjects, but for the 300,000,000 Moslems of the earth.

There follows a short appeal—intended, I fancy, to be fiery, but somehow missing the mark, and seeming utterly to lack conviction—to Moslems to "open their eyes" and to "grasp their weapons," and announcing there is "no longer a difference of nationality; there is no longer a difference of Culture." Then comes the Fetva; and, finally, we have "The Sultan's Proclamation to His People at the Declaration of War Against France, Russia, and England."

***

Now, as I have said, this thing puzzles me. It is quite clear, of course, that it aims at making all the trouble it can for ourselves and our Allies; but that is the only point about it that seems certain. There is, naturally enough, no indication whatsoever of its origin; and though it is quite well printed, the printer's name is discreetly omitted. It is, be it noted, in English, and not at all bad English either. But to whom do its authors hope that it will appeal? Or, rather, we might say, to whom *did* they hope that it would appeal? For to-day their hopes must be pretty well dead. The Moslem world has taken the measure of the Turco-German combine and has very little use indeed for it. It knows that the German idea of assisting Islam in Africa, for instance, is to encourage pig-breeding; and it recognises that the gang of adventurers who have usurped all power and authority at Constantinople would barter their nominal Sovereign and Khalif away as readily as they have bartered away their country's freedom; that they would bombard Medina and Mecca itself with as little scruple as they have bombarded the shrines of Meshed Ali and Meshed Hussein, if they thought it would serve their own selfish ends and purposes.

***

To whom, then, I ask again, did those who were responsible for this strange document hope that it would appeal? To educated Moslems in India? To Syrians in Europe and America, who left the Ottoman Empire because they could not and would not tolerate the Ottoman yoke? I give the problem up, happy to think that the wonderful production is unlikely to have had any great effect. But I admire one or two touches in it. The saving clause, "according to Constantinople newspapers," quoted in the introduction above, is distinctly neat. It suggests that the author of the effusion had his tongue in his cheek when he penned it. And the reference to the absence of any further "difference of culture" is quite pleasing. "Kultur" and "culture." Was it not Macaulay who detested the latter word, by the way? Finally, I observe that the Sultan's proclamation is dated: "On the 22 Djilhidje, 1332, or October 29, 1914." This corresponds with November 11 of the Gregorian calendar. Yet the proclamation talks of the British and French fleets having bombarded the Dardanelles and so forth, which, unless my memory plays me very false indeed, seems to be a trifle previous.

***

"Love," says some cantankerous poet, "makes a man a fool"; and what passes for Love amongst certain savage and semi-savage peoples certainly makes some men behave in a very foolish fashion. In the Sudan it was at one time a usual thing for two rivals to one fair's favours to submit to an ordeal known as "Mobatanah." This consisted in the rivals taking turns in giving one another a number of lashes with a whip, or blows with a stick, on the back, and the one who held out longest without any expression of pain was regarded as victor, and received the title of "Brother of the Girls." Naturally this survival of savagery has not been encouraged by the Sudan Government. It has, in fact, been practically stamped out in the towns. The *Sudan Times*, however, reports that a case of the kind took place recently at Hillet-el-Dabeh, near Khartoum North, and that one of the rivals expired as a result of the punishment he received. The victor, in this case, has failed to gain the prize of his victory, finding himself in prison instead of in the arms of his lady love. I wonder whether he thinks the charmer worth it all!

THE LATE LORD KITCHENER.

(FROM A CORRESPONDENT.)

ATHENS, June 23.

A service was held in the English Protestant Church here on the 13th inst., at 11 a.m. (coinciding with the service held at St. Paul's), in memory of the late Lord Kitchener and all those who perished in H.M.S. Hampshire, also of the officers and sailors who lost their lives in the naval battle off Jutland.

The congregation included H.R.H. Princess Alice (Princess Andrew of Greece), Sir Francis Elliot and several members of the Legation, Colonel Fairholm, Military Attaché, Commander W. F. Sells, Naval Attaché, many military and naval officers *en passage*, and the members of the British Naval Mission to Greece, in all about twenty in full uniform. The British colony was fairly well represented, there being about 150 present.

The service was very short, but very impressive. The Rev. W. Gardner preached an eloquent sermon on the excellent qualities of the late Lord Kitchener as a soldier and a gentleman, making also sympathetic reference to all those who perished in the Hampshire, as well as to the brave and gallant 5,500 who lost their lives in the naval battle. The service was brought to a close by singing the first verse of the National Anthem.

ON THE SUDAN FRONTIER.

Sir Reginald Wingate has forwarded to Sir Henry McMahon, the High Commissioner in Egypt, an account of the suppression of a revolt by a Congolese chief, Sultan Bangazagene, against the French by combined French, British, and Belgian troops. The territory in question lies close to the frontier of the Bahr-el-Ghazal province of the Sudan, in the angle where the British French, and Belgian frontiers meet.

In February last Bangazagene suddenly attacked the French post at Mopoi, and the Chef de Division was forced to retire to the Belgian post of Bangaro, on the Mbomu. Major R. F. White, Essex Regiment, with a detachment of the Equatorial Battalion, posted guards on the frontier, and entered into communication with the rebel chief, who refused to surrender unless permitted to settle in the Bahr-el-Ghazal. On March 4 Major White, accompanied by Captain J. A. Clark, R.A.M.C., with eighty Equatorial troops and 600 native levies, crossed the frontier, and on the 16th occupied the post of Mopoi. Major White's camp was attacked that night and the following day by Bangazagene's band. The same day, March 17, the French Captain E. J. R. Lebouc, at the head of French and Belgian troops, besides native levies, who were approaching Mopoi, met and dispersed with heavy loss a party of the rebels. On March 18 combined operations were undertaken against the rebels. Many were killed and wounded, many were captured, and numbers surrendered. Bangazagene himself and a few followers escaped pursuit, but the French flag was rehoisted at Mopoi, and on March 20 Major White and his detachment returned to the Bahr-el-Ghazal. This was the first occasion on which arrangements concluded in 1915 for co-operative action by the local British, French, and Belgian forces were put in force. The prompt help rendered by Major White was most cordially recognised by M. Merlin, the Governor-General of French Equatorial Africa.

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

"FROM MOSCOW TO THE PERSIAN GULF."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—May I request the courtesy of your columns to answer certain statements made in a review of my book "From Moscow to the Persian Gulf" which appeared in THE NEAR EAST on June 23?

I am aware that a writer who chooses to publish his work is bound to accept criticism, however unfavourable, but I consider that it is his duty to protest against mis-statements, and, more particularly, falsified quotation. Your reviewer says that my judgment is disqualified by "Russophobism"; in reality, I was a lover of Russia many years before the present war made it a fashion for English reviewers to express a blind admiration of everything Russian. I shall, therefore, take up your reviewer's statements in the order made.

I did not ignore "the omnipresence of German spies" in Turkestan, but, like everyone who has ever been in the country, I was perfectly well aware that Russian police regulations at the time when I travelled in Turkestan were intended to prevent in as far as possible the entrance not of Germans, but of Englishmen. Nothing in my book warrants the remark that I am "a strong partisan of the late Treasurer-General," and share his "suspicion of Russia." While fully appreciating all that Mr. Shuster accomplished, I am also conscious of his mistakes. There are very few references to "Muscovite outrages" in my book, and instead of retailing every story told me "without taking the trouble to sift truth from fiction," I have in the few cases where I relate such stories been careful to cite them, not as facts, but as the statements of Persians whose principal interest lay in their expression of Persian feeling. Even your reviewer will not deny that the Russians violated the shrine at Mashhad and hung the mullas at Tabriz. Surely one may be permitted to mention regrettable incidents in the history of a nation without being considered an enemy of that nation. Moreover, a person is not necessarily guilty of what your reviewer quaintly calls "illogism" because he regrets that a race should become so decadent as to provoke foreign intervention by its inability to exercise the natural right of self-government, and at the same time admits that such interference is both inevitable and salutary.

Your reviewer's misstatements are, however, of minor importance. What I must emphatically protest against is a deliberately falsified quotation. Your reviewer attributes the following assertion to me:—"Great Britain has been compelled by political necessity to violate her best traditions *in bringing Southern Persia within her sphere of influence.*" No such sentence is to be found in my book; it is composed of certain words of mine to which your reviewer has added his own conclusion. The dishonesty of such a proceeding needs no comment. As a matter of fact, my words did not refer to Southern Persia, and were completed by the quotation of a statement made to me by a British official of the highest rank. As I dislike political discussions, they were carefully avoided in my book; but, without entering into one here, I may state that many British officials, whom I have the honour of knowing and who are qualified to judge by their intimate knowledge of Persian affairs, agree with my idea, expressed in passing—namely, that Great Britain has violated her best traditions in Persia. There is, however, nothing in my book to indicate that they or I consider this violation of tradition to be other than inevitable, and, on the whole, productive of good. I may deplore certain incidents, yet heartily agree with your reviewer that "recent events have amply vindicated Anglo-Russian policy." As my admiration for both Great Britain and Russia is great, even if not blind, I feel justified in objecting to the manner in which he credits me with opinions that I neither expressed nor hold.

In regard to the transliteration of Persian names occurring in my book, I would say that most of the examples quoted with blame are to be found not in the text itself, but in the headings of the illustrations. The proofs of the text I corrected myself, but those of the illustrations I was forced by circumstances to leave to a proof-reader; he did his work badly, making innumerable mistakes that I regret more than anyone. Your reviewer might have realised that such spellings as Moskov and Mawruz (not, as he says, Mowroz) are typographical errors, and not blunders that even a passing traveller would commit. As I make no pretence of being a Persian scholar, but dislike the confusing spelling of Persian names formerly in use, the work of transliteration was done not by myself, but by a professor of Persian quite able to defend his ideas on the subject. Turkomen is, of course, a careless slip of my own, which deserves criticism. However, it does not follow that a person who does not read Persian "knows no language but his vernacular," nor is an "American" necessarily "a young journalist." I would suggest to your reviewer that when one knows absolutely nothing about the writer whose work is being criticised a sense of courtesy might cause one to omit rather than to insert personalities.—I am, etc.,

BENJAMIN BURGES MOORE.

No. 31, rue de Valois, Paris, June 29, 1916.

RAMADAN.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I read in *Le Matin* that this July 1 being also the first day of Ramadan, during which lunar month Mussulmen are enjoined by the Koran to fast from sunrise to sunset, orders were given that all facilities be accorded Mussulman troops for observing this injunction. It is, no doubt, very considerate on the part of our gallant Allies to do this, but it betrays at the same time an ignorance of the Koranic law, which explicitly dispenses from fasting anyone who happens to be during Ramadan ill or on a journey, and, *a fortiori*, fighting! We must, therefore, not be surprised or shocked if these troops do not fast this Ramadan, as even water and smoke are not permitted to touch a fasting lip. The higher fast is, of course, to keep a clean heart and tongue, and this entails no physical hardship, and can be observed at all seasons.—I am, etc.,

ALEXANDER SEFI.

London, July 1, 1916.

THE TRANSLITERATION OF PROPER NAMES.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—My thanks to you and "F. H. S.," but I must really ask you, Sir, to provide yourself with some Persian "type," as the point of my letter is entirely lost without the reproduction of the Persian script to show the true Persian renderings of the words referred to; because, after all, the transliteration of Persian is a mere matter of opinion, and it is no proof of pedantry if it is transliterated in such a fashion as to render it easily and correctly pronounceable by the veriest tyro. I hold, on the other hand, that it is consummate pedantry to retain obsolete forms which are absolutely wrong and do not even approximate to the correct sounds of the words intended. "The vast majority of readers," knowing no better, accept what the pedant imposes on them; but it does not follow that they thereby obtain even a colourable substitute for the correct word—"household," or otherwise. Two wrongs do not make a right.

I quite agree with "F. H. S." that the author of a book containing Eastern words, and who confesses his ignorance of Oriental languages, should ask some competent person to correct his transliteration, but it becomes again a matter of opinion as to who *is* competent.

It must not be forgotten that the bastard Persian spoken and written in India is not suitable to the transliteration of *real* Persian.

May I ask, for instance, if "F. H. S." would say "nau kar" for "servant"—"au" representing the sound of "au" in "taut"?

"F. H. S." fails to tell us from whence he derives the word "Dilkhusha." I am familiar with the forms (Hunterian) "Dil-khwush" and "Dil-khwushee" (Del-khush), which mean "glad" and "glee," as applied to something causing the heart to rejoice from sensual contentment and consolation—e.g., good news; but there is a distinct and subtile difference between the meaning of "Del-khush" and "Del-gushau," which expresses something attracting the heart through the visual sense, as a landscape or garden.

No educated Persian would use these two words indiscriminately. At least, that is my experience.

May I suggest that "F. H. S." means "Dilkusha" (Hunterian), the Indian form of "Del-gushau" with the Kaf-e-'Arabi instead of the "Kaf-e-Farsi"?

I certainly have never met the form "Dilkhusha" as here written and pronounced, and venture to suggest that there is no such word in the Persian language.—I am, etc., B. W. S.

An unconfirmed Salonika report states that numerous cases of cholera have broken out in the garrisons and among the civil population of Constantinople and Smyrna.

A considerable number of private letters have been received in Australia from prisoners of war in Turkey, and in every case, apparently, the prisoner is being well treated by his captors.

General Callaris, the Greek Minister of War, has issued a circular to commanders of units reprobating anti-Venizelist demonstrations on the part of the reservists in process of disbandment.

According to an Athens report, telegraphic communication between Greece and Turkey viâ Bulgaria has been cut off since June 27. This is attributed to Bulgarian military activity on a large scale in Thrace. Another Athens message says that the Bulgarians have shot the Greek Archbishop of Ossiani at Ghevgeli.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. July	1916. June.		1334. Ramadan	5676. Tamuz
7	24	Friday	6	6
8	25	Saturday.....	7	7
9	26	Sunday	8	8
10	27	Monday	9	9
11	28	Tuesday	10	10
12	29	Wednesday	11	11
13	30	Thursday	12	12

Wednesday is the birthday of King Peter of Serbia, who was born in Belgrade on June 29, 1844 (O.S.).

Wednesday is also the birthday of Prince John, the fifth son of the King and Queen, who was born at Sandringham in 1905.

On the occasion of the Shah's birthday last week (Thursday), Sir Arthur Walsh, his Majesty's Master of the Ceremonies, called on the Persian Minister and conveyed his Majesty's felicitations and good wishes.

The Hereditary Princess of Montenegro has arrived at the Hôtel Lotti, Paris, from Bordeaux.

Lady Inchcape and the Hon. Elsie and the Hon. Effie Mackay joined Lord Inchcape at Achnacarry, Spean Bridge, Inverness-shire, last week.

Lady Maxwell was reported to be a little better at the end of last week, but was still confined to the house.

Sir William Willcocks left Port Said for England on June 17.

M. Radovitch, the Montenegrin Premier and Minister of Foreign Affairs and Finance, has arrived in London to arrange certain matters affecting his country. In connection with these questions he has called at the Foreign Office, and was also received on Monday by the Russian Ambassador.

The Roumanian Minister and Mme. Misu and M. Slavko Grouitch were among the guests entertained at dinner on Monday evening by Lord and Lady Swaythling.

Sir Edward Grey saw the Greek Minister at the Foreign Office on Wednesday afternoon.

The Crown Prince of Serbia has conferred upon the Lord Mayor the Grand Cross of the Order of St. Sava and upon Mr. Alderman and Sheriff Touche, M.P., Mr. Sheriff Shead, and Alderman Sir Henry Knight the Order of St. Sava (II. Class).

The marriage arranged between A. Gordon Haynes Lovell, M.D., F.R.C.S., only son of Mr. and Mrs. Haynes Lovell, of 3a, Hans Crescent, and Dorothy Constance, only daughter of the late Canon Marriott, of Redhill Rectory, Havant, and St. George's College, Jerusalem, and of Mrs. Marriott, of Ellesmere, King's Acre Road, Hereford, will take place at Hereford in August.

Lieutenant-Colonel John Harington, D.S.O., Rifle Brigade, who is officially reported wounded, saw service in the Sudan and took part in the battle of Omdurman. He also served in the South African War.

Judge Walter Bond, Vice-President of the Native Court of Appeal, left Cairo on June 15 for England. He was seen off at the station by his colleagues of the Court of Appeal, Ahmed Bey Loutfi, President of the Native Bar Council, and several others.

Mr. H. Griffith, Chief Inspector of the Mines Department, Egyptian Government, is coming to England on duty in connection with the recent coal discoveries at Esna. On completion of his duty he will be granted two months' leave to be spent in England.

Major H. D. Pearson has returned to Khartoum from his mission to Lake Tsana. The other members of the party, Mr. A. B. Buckley and Mr. O. L. Prowde, of the Egyptian Irrigation Service, stopped for a few days at Makwar. Major Thomson, R.A.M.C., who was also a member of the party, stopped at Roseires to resume his duties there.

M. Slavko Grouitch, the Secretary-General of the Serbian Ministry for Foreign Affairs, who is now in London, is taking an active part with the American Red Cross Society and the Swiss Committee for the relief of the starving Serbians.

The *London Gazette* announces that "the King has been pleased, by Letters Patent under the Great Seal of the United Kingdom of Great Britain and Ireland, to confer the dignity of a Baron of the said United Kingdom upon the Right Hon. Sir Arthur Nicolson, Baronet, G.C.B., G.C.M.G, G.C.V.O., K.C.I.E., by the name, style, and title of Baron Carnock of Carnock, in the county of Stirling."

A British colonel in Mesopotamia, in a private letter received at Grahamstown (Cape Colony), writes that the Turkish Commander at Kut-el-Amarah and General Townshend were both brought up in France, where they were schoolfellows and friends in the same school. They immediately recognised each other.

The *World* understands that Sir George Arthur, Bart., is writing the biography of Lord Kitchener, with special assistance from Lord Derby. Sir George knew Lord Kitchener intimately for thirty years.

The will of Lord Kitchener was proved last week, the gross value of the estate being £171,421, and the net value £146,586. The will is dated November 2, 1914. Lord Kitchener appointed Arthur Henry Renshaw, of Watlington Park, Oxford, and the Hon. Algernon Henry Mills, of 67, Lombard Street, as the executors and trustees of the estate. He bequeathed £1,000, free of duty, to his brother, Colonel Henry Elliott Chevallier Kitchener, adding: "I give him this legacy and nothing else because he is already well off and because of the large benefits conferred by my will on his issue." He devised his house and estate in Kent, known as Broome Park, to the use of Commander Henry Franklin Chevallier Kitchener, R.N., son of his brother, H. E. C. Kitchener, and his assigns during his life. All the furniture, china, statuary, works of art, and effects at Broome Park are vested in his trustees and devolve upon the same trusts as Broome Park. His swords of honour, plate, and other gifts presented to him by public, municipal, or official bodies, are to be enjoyed as heirlooms with the Broome Park estate. He bequeathed £20,000 for investments upon trust for his nephew, Henry Hamilton Kitchener; £5,000 upon trust to his half-sister, Letitia Henrietta Emma Kawara Kitchener; to Arthur Henry Renshaw £2,000 upon trust for his son, Horatio Herbert Renshaw (Lord Kitchener's godson); and £200, free of duty, to his godson, Maurice Bovill.

Under the auspices of the Serbian Relief Fund, an exhibition of Serbian needlework, made in the workrooms of the Fund in Corsica, will be held at 5, Cromwell Road, from July 10 to July 15. H.E. the Serbian Minister will open the exhibition on Monday afternoon at 3 o'clock, and it will be open each afternoon of the week from 3 to 6.

The Commander-in-Chief of the Allied Forces in Salonika makes an urgent appeal for contributions to his hospitals for wounded soldiers. He asks for mineral waters, light muslin for windows, pyjamas for the wounded, rocking armchairs and folding deck-chairs. Stationery, ink and pencils, and all kinds of games will be welcome. Donations in goods or money should be addressed to Countess Morella, President for the Assistance aux Hopitaux, 24, Grosvenor Square, W.

SUDAN PROMOTIONS.

Mr. P. Ball, one of the six British officials who have passed the higher standard of the Arabic Examination for British officials in the Sudan, is a Third Inspector of the White Nile Province, stationed at Geteina, and he has been in the service of the Sudan Government since the end of September, 1913.

Mr. J. H. Goldsmith, also a successful candidate in the higher standard, is a Third Inspector in the Red Sea Province, stationed at Port Sudan. He has seen some three years' service, having first joined in June, 1913.

Mr. A. D. Home, whose name appears in the same list, is a Third Inspector in the Kassala Province, quartered at Gallabat, and has had less than three years' service. Mr. J. G. Monteath and Mr. J. A. Reid fill the position of Third Inspector respectively in the Berber and the Kordofan Provinces, both officials being at present on leave. It is noteworthy that these two gentlemen, as well as Mr. A. D. Home, additionally passed the Law Examination held at Khartoum on March 30 and April 1 last.

Mr. E. G. Coryton, a Third Inspector in the Kordofan Province, who is at present on leave from the Sudan upon medical grounds, and Mr. W. I. Cheesman, a Third Inspector in the Halfa Province, stationed at Wadi Halfa, have also passed the Law Examination held at Khartoum.

The appointment of Captain J. F. Bassett to the Governorship of the Upper Nile is in accordance with expectation. For some years he had been Senior Inspector of that province and Acting-Governor, with official residence at Malakal. Captain Bassett has been in the Administration since May of 1907, and succeeds Captain F. W. Woodward as Governor. He moved his headquarters to Malakal from Kodok in the early part of 1914. The former Senior Inspector of the Upper Nile Province, Captain G. B. Wauchope, now Senior Inspector of Kassala, is now Acting-Governor of the province, the Governor, Major C. H. Townsend, being on leave, owing to indisposition.

Captain Bassett will now have for his Senior Inspector Captain C. H. Stigand, who has been promoted from the post first of Second and later of First Inspector. Stationed formerly at Nasser and now at Malakal, the headquarters of the Administration, Captain Stigand has been over six years in the service of the Government.

Mr. F. P. Osborne, who for some time occupied the position of Second Inspector of the Legal Department (Kanuni), with residence at Renk, has been appointed Province Judge at El Damer, in the Berber Province, the appointment dating from January 1. Mr. Osborne has had some eleven years' service to his credit in the Government.

Mr. W. D. C. L. Purves, a Third Inspector in the Administration of the Berber Province, who has been granted absence on sick leave until July 9, has been gazetted a First-class Magistrate under the Code of Criminal Procedure.

DOMESTIC ANNOUNCEMENTS.

The Charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

MARRIAGES.

GIBSON—BERNARD.—On June 27, at the Minster, Wimborne, by the Rev. T. S. Gibson, assisted by Canon Fletcher, Ralf Sumner Gibson, Captain R.M.L.I. (attached Egyptian Army), second surviving son of the Bishop of Gloucester, to Anne Christina, second daughter of the Rev. E. R. Bernard, Chancellor of Salisbury.

OAKES—JONES.—On June 3, at St. Saviour's, Oxton, Francis Edward Oakes, Sudan Government Railways, youngest son of the late Colonel Richard Francis Oakes, R.E., to Kathleen Frances, youngest daughter of the late Frederick Gregory Jones, of Liverpool.

FRENCH, English, Spanish, Italian, German, Scandinavian Languages, Greek, etc., rapidly taught by natives.
Σχολὴ Γλωσσῶν. Διδασκαλία συστηματικὴ.
Διερμηνεῖς κ.λ.π. Δίδακτρα μέτρια.

APPOINTMENTS, PROMOTIONS, ETC.

A Reuter's message from Athens announces that Admiral Damianos, the new Minister of Marine, took up his duties on Wednesday.

The *Egyptian Gazette* reports that Mr. Arthur B. Geary, H.M.'s Vice-Consul at Alexandria, has been transferred to Salonika for the time being.

Mr. Ireland, Inspector General of Irrigation for Upper Egypt, has been granted three and a-half months' leave of absence, to be spent in England. Mr. Baxwell, Inspector, Fourth Circle of Irrigation, will act as Inspector General of Irrigation, Upper Egypt, during Mr. Ireland's absence.

The *Egyptian Gazette* (June 21) reports: The Marquess Salvago-Raggi will, it is stated, be shortly sent to Egypt by the Italian Government on an extraordinary mission. The Marquess is a distinguished Italian diplomatist, and some years ago was on the staff of the Italian Diplomatic Agency at Cairo.

Major Whishaw has returned to Khartoum after an absence of over a year.

The following British officers have been attached to the Egyptian Army as special service officers, granted the temporary rank of Bimbashi, and attached for duty as follows:—

Major E. Keith Roach, Lancashire Fusiliers, to Khartoum District.

Captain A. F. Vingoe, Middlesex Regiment, to Sobat Pibor District.

Captain R. A. Colville, Worcestershire Yeomanry, to Sobat Pibor District.

Lieutenant S. F. Austin, Berks Yeomanry, to Khartoum District.

El Miralai N. W. Gardner Bey, Officer Commanding Arab Battalion, has retired from service in the Egyptian Army.

OBITUARY.

SIR GASTON MASPERO, K.C.M.G.

Widespread regret was caused last week by the announcement, conveyed in a Reuter's message from Paris, of the death of Sir Gaston Maspero, the famous Egyptologist and Permanent Secretary to the Academie des Inscriptions et Belles Lettres. He died last Friday while attending a meeting of the Academy.

Born in Paris June 23, 1846, Sir Gaston was educated at the Lycée le Grand and the Ecole Normale. The subject of hieroglyphic writing interested him very early in his career, and while he was still at the Ecole Normale he made the acquaintance of Mariette, who was at the time in Paris as Commissioner for the Egyptian section of the International Exhibition. The great Egyptologist gave him some recently-discovered hieroglyphic texts on which to test his skill, and in a fortnight young Maspero produced some very creditable translations, a feat of no mean order, since Egyptology was then in its infancy, and he had few, if any, "authorities" to guide or aid him. This established his reputation, and in 1869 he became Professor of Egyptology at the Ecole des Hautes Etudes. In 1874, having meanwhile (1873) become a Docteur ès Lettres, he was appointed Professor of Egyptian Philology and Archæology at the College of France. In 1880 he went to Egypt for the first time, as head of an archæological mission despatched by the French Government; and shortly afterwards succeeded Mariette as director of the Boulak Museum. About this time he deciphered, translated into French, edited, and published the texts of the Sakkarah Pyramids. His translation, though not perfect, was a remarkable piece of work, which has been of great value to other Egyptologists, and is likely, as Dr. Wallis Budge says, to "remain for a very long time the base of all investigations" of such texts. In 1887 his services to science were recognised by the University of Oxford, which honoured itself in conferring on him the Hon. D.C.L. During the five years he served as Director-General of Excavations and of the department of Antiquities, he carried out important work at Luxor, where he cleared the Temple; at Karnak, where he restored the Hypostyle Hall of the great Temple; and at Thebes.

He returned to Egypt in 1899 as Director of Excavations and head of the Department of Antiquities, and remained there till 1914, during which time the transfer of the great national collection of antiquities from Gizeh to the new museum at Kasr-en-Nil was effected. His work in superintending the classification, re-arrangement, and cataloguing of exhibits laid students of Egyptology under a fresh debt to him, and the manner in which he carried out his duties gave general satisfaction, even to the archæologists, who are not perhaps as a body very easily satisfied as a rule.

He was the author of many books, amongst those published in English being "The Dawn of Civilisation," a popular account of Ancient Egypt and Babylonia; "Egyptian Archæology," "The Struggle of the Nations," "New Light on Ancient Egypt," "The Passing of the Empires," "Egypt, Ancient Sites and Modern Scenes," and "Art in Egypt." His profound knowledge of his subject did not prevent his writing in a popular style, quite lacking the "dry-as-dust" touch of many Egyptological writers, and many of his attempts to set before our eyes the life of the ancient Egyptians or the old-time inhabitants of Mesopotamia are eminently successful.

King Edward bestowed an Hon. K.C.M.G. upon Professor Maspero in 1909, in recognition of his labours in the field of archæology, and the news of the honour was received both in Egypt and in this country with as much satisfaction as it was in France.

Professor Maspero was twice married, first (1871) to Harriet Yapp, who died three years later; and, secondly, to Louise d'Estournelles Constant de Rebecque. He leaves two sons and one daughter.

The death of Major-General Augustus E. Warren occurred at his residence in Cornwall Gardens on Sunday in his eighty-seventh year. He served with the 82nd Foot in the Crimea, being at the siege and fall of Sebastopol and receiving the medal with clasp and the Turkish medal. He also served in the Indian Mutiny, when he was at the relief of Lucknow, and took part in a number of other operations, and in the Afghan War of 1880. Later he was in command of the 77th Regimental District, and retired in 1885.

The death took place at Torquay last Saturday of Colonel Lucius F. B. Cary, Lord of the Manor of Torre Abbey and St. Marychurch. Colonel Cary served both in the Navy and Army. He remained in the Navy for about five years, being attached to the Black Sea Fleet during the Crimean campaign. He was in the old sailing ship Albion, and was at the bombardment of Odessa and Sebastopol. In 1857 he joined the Rifle Brigade, and served in it for thirty-one years. His active service included the Ashanti and Burma campaigns. Colonel Cary lost his brother in the Crimean War.

The recent notification in the Roll of Honour that Second Lieut. G. H. Fox, R.A., formerly reported missing after the engagement at Katia, must now be considered killed, records the heaviest loss that the Ministry of Justice in Cairo has suffered through the war, says the *Egyptian Gazette*. Judge Fox went to Egypt in July, 1906, as Inspector in the Ministry of Justice, and was raised to the Bench in the Court of First Instance of Tantah in January, 1913. A keen lawyer, an indefatigable worker, and a capable Arabic scholar, he soon earned the respect of his native colleagues and the warm regard of all those who were admitted to his friendship. Like so many others, he, being unmarried and under forty, felt it his duty to volunteer for active service, and obtained leave to join the Army in August of last year. He spent six months training with the Royal Artillery at Newcastle, and had recently been sent out to Egypt, where, owing to his knowledge of Arabic, he was employed as Intelligence Officer. He joined the force with which it was his tragic fate to see his first and last fight only a few hours before the engagement. One among many of the brilliant careers sacrificed to the war, his loss bears with peculiar hardship upon a judiciary whose ranks can ill suffer the loss of so much ability and devotion to duty.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.

THE SYRIAN PROBLEM.

Syria presents a two-fold problem, in the present condition of its unfortunate inhabitants and in regard to the future of the country. A not unnatural reluctance to raise the latter question at this period threatens to prevent the necessary steps being taken to cope with the existing state of affairs; but if there be the least foundation for the reports of all that the Syrians are suffering, uncertainty regarding the ultimate status of the country ought not to hinder efforts being made to alleviate as far as possible the lot of this people. Their troubles comprise not only a serious shortage of food, but also active persecution at the hands of the Turks. We have been able to record in these pages the measures recently set on foot to secure the dispatch of foodstuffs to Syria. The Syrians in Egypt were the first to move in the matter, and they are now meeting with generous support in America, where a deputation of their fellow-countrymen has waited upon President Wilson and received a formal promise of help. Little difficulty should be experienced in raising a substantial sum of money for Syrian relief purposes; but it may be a more serious matter to provide for the distribution of supplies in a satisfactory manner. The good offices of the Americans must again be relied upon, and it is gratifying to know that they are willing to help. The first desideratum is that no time should be lost. Between the collection of the necessary funds in Egypt or the United States and the arrival of provisions in Syria there must be a considerable hiatus. The interval, unless other steps are taken to deal with the problem, may prove fatal to large numbers of Syrians. For this reason, and with a view to dealing with the persecution to which their leading men are being subjected, it is to be hoped that the American Government will endeavour to effect an immediate amelioration of the conditions in Syria by means of emphatic representations in Constantinople. Quite apart from the humanitarian grounds which would justify such action, the United States, as a Cairo correspondent pointed out a few weeks ago in these columns, have moral and economic interests in Syria which they cannot afford to neglect and leave exposed to such risks as the present conditions are calculated to cause. The Syrian Protestant College at Beyrout has played much the same rôle in Syria as the Robert College outside Constantinople in the spread of Western education and ideas in European Turkey and Bulgaria. America can hardly be willing to see her educational work stultified by the wholesale destruction of a people for whom she has shown special solicitude. She was too late to save the Armenians; but there is, in all probability, still time to intervene on behalf of the Syrians, and there can be little doubt that both the Turks and their German mentors will prove more amenable to American representations than they were a year ago.

The most effective method of relieving the lot of the Syrians would be the dispatch of an expedition to oust the Turks from Syria. As there is little chance of this course being pursued in the present state of the war, we must rely upon relief funds and diplomatic representations. When so much is at stake for the Allied Powers on half-a-dozen battlefields, some difficulty is felt in certain quarters in realizing that Syria can have any special claim upon their attention. But to Great Britain it bears an even closer relation than Armenia does to Russia. As a writer in the *Nineteenth Century*, quoted in our last issue, reminds us, the significance of Asiatic Turkey may best be gauged by imagining the Turkish Government in Asia replaced by that of a strong and ambitious military Power. "A strong European military Power, firmly settled in Asiatic Turkey, disposing of two million Turkish-Asiatic soldiers and of a sufficiency of railways and a fleet, could make Constantinople and Egypt almost untenable." The contention is a strong argument for regulating the future status of Asiatic Turkey in a way which will prevent it from being a standing menace to the world's peace. Syria in such a scheme would play a prominent part on account of its proximity to Egypt. Great Britain, therefore, can never be indifferent to its fate. If the Turks are now engaged in an attempt to depopulate the country, it may be taken for granted that they and the Germans have good reasons for ridding themselves of the people whose destruction they are working. The Allied Powers have no belief in achieving peace in any region at the price of creating a wilderness. Whatever may be the ultimate political fate of Syria, the Entente must wish to see it populous and prosperous. Its agricultural potentialities are by no means negligible, and, if duly fostered, may win for the country a conspicuous place in the economic world. Turco-German anxiety to do away with the greater part of the present population not only supplies the reason for prompt action on the part of the Allied Powers and neutral States to thwart the enemy's object on humanitarian grounds, but also threatens the future of Syria and its usefulness when peace is restored.

It is generally understood that the reluctance of the Allied Powers to deal with the Syrian question arises from the fact that any proposed settlement introduces so many complications that the Governments concerned instinctively wish to defer the day when they will be compelled to deal with the subject. In a war of this magnitude a sense of proportion must be maintained, and it cannot be urged that Syria has prior claims over the regions where fighting has already taken place. But it is difficult to subscribe to the theory that a Government worthy of the name is able to cope with only a limited number of foreign problems. It would be thought that a Government's capacity in these matters must necesarily be coextensive with its responsibilities. There are cogent reasons for deferring a final settlement of the Syrian question until after the war; but these ought not to be allowed to interfere with measures for the relief of the present sufferings of the Syrians. The movement for the emancipation of Syria from Turkish rule originates with the people themselves; it formed no part of the objects which the Allies had in view in accepting Germany's challenge, but, as a result of Turkey's entry into the war, it must naturally be taken into consideration in any peace settlement. Among the suggestions canvassed by the Syrians four may be said to hold the field. They are, annexation by France, the establishment of a dual Sultanate of Egypt and Syria, an autonomous State on the lines of an enlarged Lebanon, and incorporation in a future Arab confederation. There is no need to analyse these different proposals at this time. They all presuppose "cutting the painter" as far as Turkey is concerned, and the substitution of a distinct relationship, varying only in point of closeness, with the Grand Alliance. The Allies, therefore, have a duty to perform to the Syrians more definite than in the case of any other of the subject races of Turkey. A settlement of the Syrian question must be found on lines which commend themselves to the bulk of the Syrian people as conforming to the principle of nationality, or at least as offering the best scope for the maintenance and development of Syrian nationality. In such a settlement there ought not to be any room for differences of opinion among the Allied Powers; still less ought the prospect of such a settlement to offer any embarrassment to the respective Governments in arriving at a decision for dealing with the present situation in Syria. Relief funds and American representations in Constantinople, as already stated, are the most practical means of securing an immediate improvement in the lot of the Syrians; but these measures are likely to be shorn of their effectiveness, unless it is made clear that they have the strong backing of the Allied Powers.

JUSTICE IN EGYPT.

THE JUDICIAL ADVISER'S REPORT.—II.

(By Our Cairo Correspondent.)

The Mixed Tribunals.

The outstanding feature of the past year in the Mixed Courts has been the reduction in the size of the benches, which has been rendered possible by the disappearance from these courts of the chief opponents of the scheme, Germany and Austria. The benches of the Appeal Court have been reduced from eight to five counsellors, and those of the First Instance Courts from five to three judges. These are, of course, early days to say whether the hopes of the Government, and of those who supported it, have been realised, for the reorganization has only been in operation seven judicial months. It would appear, however, from the tables presented for the Appeal Court that there has already been an increase of 26.6 per cent. in the number of judgments on appearance delivered by that court during the period in question. This is in itself an indication of what should be the result of a full year's work in all the courts, but we shall not be able to judge this until the next report. All things considered, the work of the Mixed Tribunals, despite the disadvantage under which they laboured owing to vacancies and absence through ill-health of several judges, has been satisfactory; and although the new cases set down during the year increased by 30 per cent., the arrears at the end of the judicial year were substantially the same as at the close of the preceding one.

Revision of the Codes.

The Commission instituted in 1913 for the purpose of revising the Code of Civil and Commercial Procedure has continued its sittings during the year under review. Numerous discussions, ranging over practically the whole field of procedure, with the exception of execution of proceedings on real property, have taken place; and the study has so far advanced that a preliminary project of certain chapters has been submitted for discussion. The Adviser refers to the many difficulties that have to be encountered in the preparation of a code of this nature, and points out the conflicting standpoints that have to be conciliated. But whilst "we must do our best to guard against the danger of too precipitate and profound a break with the past, it is no less necessary to eschew excessive timidity and exaggerated caution in the introduction of novel features." At the inaugural meeting it was decided that the mission of the Commission should be to innovate freely in existing institutions, and this is the spirit in which the work is being tackled. The existing Mixed and Native Codes of Procedure are directly based on the French Code of Procedure; but the latter is hopelessly out of date, as many leading authorities have freely pointed out, and little assistance in the matter of reform is to be obtained from French sources. Many other Continental countries whose laws, being based on Napoleonic precedents, are nearly akin to Egyptian legislation, have introduced notable reforms into their law and practice during the past century, and the Commission has endeavoured to profit by their labours. Whilst, however, there may be objections to making brusque and radical changes in a substantive law, "which has now been in force in Egypt for some forty years, and in spite of many defects has, on the whole, stood the test of experience fairly well," such objections are not so strong when it comes to changes in procedure. For this reason the champions of English procedure stand a good chance of winning the day; and with the precedent of Canada, where an essentially French system of law has been effectively combined with purely British machinery in its administration, before his eyes, the Adviser anticipates "that the new Procedure Code will draw largely on English models, while endeavouring to adapt them effectively to Egyptian conditions and fit them harmoniously into its somewhat complicated organization." The task of producing a code which, while not free from criticism, "may yet, in its entirety, be found acceptable by both native and European opinion," is not an easy one, and "an early solution of all the difficulties encountered is hardly to be looked for in spite of the zeal and diligence of those concerned in its execution." The Judicial Adviser here pays a graceful tribute to the Government officials and public-spirited private persons who have given up so much of their time during the past year to this arduous work.

Legislation.

During the year under review there has been no legislation of any importance by the ordinary channels. Such legislation as has been found to be necessary, has been effected by means of proclamations under the martial law régime. Those responsible for the military control of Egypt have, however, been by no means hampered "by all the embarrassments which attended the rulers of Egypt in peaceful times." Where public safety was concerned, they recognised no distinction between native and foreigner, and "the privileged jurisdiction of the capitulatory régime has been powerless to dispute" the uniform sway of their power. New offences were created, punishable by military courts and corresponding with the regulations made in England under the Defence of the Realm Acts, and where other enactments of the military authority might equally well have been made by departmental order, the particular benefit of the proclamation lay in the fact that it was enforceable against the whole population without exception. There is little doubt that the measures introduced under the military régime have been most salutary and helpful. In the first place, it has been possible to deal far more drastically than in the past with the sale of deleterious liquors, which went on to such a scandalous extent during peace time and which acquired alarming proportions on the outbreak of war and the advent of large numbers of troops. Secondly, the aid of the military authority was obtained in the matter of stopping undue speculation in articles of prime necessity, and also to reinforce the local law in regard to the powers of expropriation in the public interest enjoyed *vis-à-vis* foreigners by the Government.

Perhaps the most striking instance of the military régime coming to the aid of the civil authority and setting a term to a state of affairs which could never have arisen but for the existence of extra-territorial privilege was the proclamation ordering all and sundry to pay the *ghafir* tax whenever the demand might be made to them. The local force of *ghafirs*, which is necessary to the preservation of public order, is partly maintained by the levying of contributions, in return for service, on the inhabitants; but as the collection of the tax had never been agreed to by the various Powers, in practice it was only enforceable against natives. On the ground, however, that the maintenance of a proper and sufficient force of *ghafirs* was essential in the interests of public security, the military authority ordered all inhabitants, no matter what their nationality, to pay what was demanded of them, under pain of being punished for disobeying a military order in the event of their failure to comply with this request. Thus "equality before the Military Law suspended the régime of chartered privileges before the local authority."

The Adviser draws attention to the fact that by proclamation civil cases between enemy subjects, which would, under ordinary circumstances, have come before the German or Austrian Consular Courts, were handed over to the British Consular authorities sitting as special courts, applying the foreign personal law, whenever it was appropriate, the foreign civil law whenever the contract was between two Germans or two Austrians, and in other cases English law. The procedure was, however, to be that of a British Court. The Adviser says that "it is another example of the tolerance, which has characterised the treatment of enemy subjects in Egypt, that British judges in time of war should be called upon to administer the family law and the law of civil obligations of the enemy"; and he closes this brief survey of military ordinances in their effect upon foreign privileges with the statement that "it heralds the coming of an epoch in which there shall be unity and uniformity of legislative and administrative rules for all residents in the country whether native or foreign." The negotiations for the abolition of the anomalous Capitulatory privileges, which were in course, have perforce had to be suspended, but meanwhile "some valuable experience has been gained in the working of a system which establishes one rule for all who are resident in the country, whether in regard to penal offences, administrative measures, local rates, or the regulation of trade."

Some Interesting Decisions.

Since the country is on the eve of some new judicial organization, Sir Malcolm considers it opportune to cite some decisions of the Courts which "illustrate at once the peculiar complications of jurisdiction and law which arise in the cosmopolitan society and the peculiar conditions under which the law is moulded by a Court consisting of judges of various countries and various traditions not accepting the English idea of binding precedent." At the same time some of them illustrate "strikingly the tangles of legal relationship, which arise from the present absence of international agreement upon conflicts of private law." Problems arising out of marriage between persons of different nationality are of frequent occurrence, and considerable conflict of opinion has been evident in the Courts. The nationality of a European woman who marries an Ottoman subject has been the subject of differing decisions, but the Mixed Court of Appeal has now definitely held that she loses her nationality and becomes an Ottoman subject herself. A notorious case where an Egyptian Mohammedan Princess under interdiction married a Russian resulted in her marriage being declared null in Egypt, though perfectly valid in Russia, an anomaly which is "inevitable so long as there is not one single law or an International Court of Conflicts for the civilised world."

Whilst willing to deal, according to the accepted rules of private international law, with disputed questions of nationality,

which formerly were settled through diplomatic channels, the Mixed Courts take particular care in matters of foreign personal status either to leave them to the Consular Courts or to give full effect in their decisions to the rules of the personal law in question; and there have been during the past year several interesting judgments in this respect. They have also shown their willingness to extend their sphere in other directions. Thus on two occasions last year the question was raised of the competence of the Mixed Courts to deal with cases between natives and Bulgarians, on the ground that Bulgaria was not a party to the Reforme Judiciaire. Having regard to the fact that the Mixed Courts "have frequently asserted that they are the courts of general jurisdiction in civil and commercial matters, competent between all persons of different nationality residing in Egypt," and that they have on several occasions claimed to deal with suits between Persians, Moors, Brazilians, and natives, the Court of Appeal, after decisions to the contrary in the lower jurisdictions, decided that the Mixed Tribunals have jurisdiction in all ordinary civil and commercial cases between foreigners, even if they are subjects of Powers that were not parties to the Reforme Judiciaire. The Adviser points out that "the Mixed Courts have indeed developed from the class of exceptional to that of general jurisdiction, and their claim to decide all mixed cases has come to be recognized by the native courts."

Enemy Subjects.

The treatment of enemy subjects before the Courts has also given rise to some interesting decisions. When war broke out the status of those subjects and of trading firms having partial or entire enemy membership was not clearly defined. It was forbidden to enter into new contracts with persons resident in enemy territory, but the execution of existing contracts and the payment of past debts were left unprovided for. Moreover, Egypt did not possess, like England, a common-law doctrine rendering illegal all intercourse with enemies. In January, 1915, a Proclamation was issued dealing more fully with these matters, and certain precautionary measures were taken for the control of local branches of enemy firms. The Proclamation "adopted the English criterion of residence as against nationality for determining capacity to appear, and it adopted also the English rule of recognizing the independent character of branches of enemy houses situated in the country in regard to transactions exclusively connected with the branch." It has fallen to the Mixed Courts to interpret this part of the Proclamation and its amending orders. Their decisions are certainly interesting. They decided to "strike out of the lists any case in which the plaintiffs were in enemy territory, even though the cause had already been pleaded and was ready for judgment," and declared "the nullity of an assignment of the interest of an alien enemy in an Egyptian firm to a person resident in Egypt, when the other partners failed to approve of the assignment." The Courts held that "the branches of two enemy firms could not litigate in Egypt during the war about the right to trade-marks placed upon goods manufactured in the enemy territory," but "where the proprietor of a trade-mark who was an enemy subject and had registered his mark in an enemy country was carrying on business in Egypt, he was held to be entitled to rely on his registration in an action for passing-off before the Egyptian Courts." In addition, the Mixed Courts held that the alien enemy's incapacity to sue created by the Proclamation did not involve an incapacity to be sued or to appear as defendant in the Courts of Egypt; and also that the alien enemy's incapacity to sue could not be used in cases where an enemy firm had appealed against a judgment in the lower Court, "as a device to deprive successful litigants in first instance, who were under no incapacity, of the final determination of their rights." At the same time the Courts refused to "allow the claims of plaintiffs genuinely established in Egypt to be defeated because of an alleged connection with the enemy." An exceedingly interesting case was that which dealt with the capacity of a firm constituted in Egypt with a majority of German members and under a German régime alleged to be unknown to, and not meeting with the requirements for an ordinary or limited partnership of, the Mixed Law. The Court of Appeal held "that the firm constituted a valid partnership under Mixed Law, although its claim to trade with limited liability failed, and that the character of the partnership and not that of its members was alone to be taken into consideration. The result of this decision was "that the association itself had a valid character, and was an Egyptian juristic person, and as such entitled to carry on its business in Egypt during the war without regard to the personal status of its members." A subsequent Proclamation, however, rectified this by providing that "persons of enemy nationality (including firms and companies in which a certain number of partners or shareholders were of enemy nationality) should no longer be authorised during the continuance of the war to carry on business in Egypt except under a licence." Thus, the régime applicable to enemy persons in this country has been made very much more restrictive.

A special Service of Intercession for the Serbian Nation was held at St. Margaret's, Westminster, on Sunday afternoon. The preacher, the Rev. Father Nicolai Velimirovitch, Professor of Theology at Belgrade University, in the course of his sermon, said the culmination and decisive point of the Balkan crusades was the battle of Kossovo. The Serbians were leaders in the battle, as they were from the beginning of the Turkish invasion of the Balkans. The Greeks were too exhausted, the Albanians too weak, the Bulgarians too materialistic to lead the Balkan Christianity in the most tragic days in its history. The Serbs undertook the hard task and fulfilled it, if not with victory, at least with honesty and enthusiasm.

STARVING MONTENEGRO.

Deputation to Foreign Office.

A deputation representing the Montenegrin Red Cross and Relief Fund waited upon the Minister of Blockade, Lord Robert Cecil, at the Foreign Office last week, for the purpose of laying before him a scheme for the relief of the population of Montenegrin territory now in the occupation of Austria. The deputation was introduced by Mr. Ronald McNeill, M.P., and included amongst others Mr. Alex. Devine (Special Commissioner to the Continent for the Committee), Sir J. Roper Parkington, D.L., J.P. (Consul-General for Montenegro), Admiral the Hon. Sir Edmund Fremantle, G.C.B., Dr. Clemow, and Major Sir Fairfax-Lucy.

Mr. Ronald McNeill, in introducing the deputation, referred to a question he put to Lord Robert Cecil some time ago on the matter of relieving starving Montenegro. In replying to that question Lord Robert Cecil had said that the Government was most anxious to do everything that was possible consistent with military operations, but that they felt very strongly that it was the duty of the invading and occupying Power to provide for the people in the country. Lord Robert said further that it was desirable that nothing should be done to gratify the desire of the enemy to blackmail—for that was what it came to—people on whom the duty did not lie. He thought everybody who heard that reply to his question must have been in full agreement with the principle laid down, and he did not think any member of the deputation would dispute it for a moment. However, some facts which would be laid before Lord Robert Cecil would go far to show that there were limits, even to that principle, and that there might come a time when a humane nation with a reputation, such as England had, to keep up, might even allow itself to be blackmailed, in the last resort, rather than allow an innocent population to suffer starvation. The proposals would be laid before Lord Robert Cecil by Mr. Alex. Devine, who was a member of the Committee of the Montenegrin Red Cross and Relief Fund, who, as a Special Commissioner, had examined throughout Europe the whole question regarding the Montenegrin refugees.

Mr. Alex. Devine, who put before Lord Robert Cecil the case of the deputation, referred to the fact that even in normal times Montenegro was dependent upon imports for its sustenance, and it was not difficult to imagine a state of affairs subsequent upon enemy occupation, to say nothing of the sudden stoppage of imports and the effect of the Serbian retreat. Case after case had been brought before them of people who had actually died of starvation. The price of foodstuffs is prohibitive where they are obtainable at all. Bread has risen to 7s. 6d. per lb., milk 1s. 6d. a pint, and meat is practically not obtainable. In fact, the army of occupation has barely enough food for its own needs, a condition of affairs which renders the position desperate. The Austrians having commandeered all the cattle have thus deprived the Montenegrins of their entire milk supply.

Replying to the deputation, Lord Robert Cecil said that he should be very glad, personally, to see all the starving populations fed, but he did not think it would be fair to hold out any hope that Montenegro would receive exceptionally favourable treatment. In the first place, we should have to ascertain the views of Italy before we did anything at all. Then, we should have to put the most stringent conditions on any foodstuffs going into Montenegro, not because the actual amount of foodstuff going into a little country like Montenegro would matter very much, but because it would form a precedent which we could not disregard. Therefore, we were bound to put some conditions forward. He was bound to tell the deputation that his experience was that when these conditions were put forward, they were found to be so stringent that the Germans and Austrians would not have anything to do with them. At least, that had been our experience with regard to Poland. But the first thing would be that we should have to consult the Italians. He could not promise to do that, but he would see whether anything in that direction could be done.

Replying to Mr. Devine, Lord Robert Cecil stated that he could not say anything definite at that point as to the conditions the Foreign Office might impose on any scheme.

Mr. McNeill thanked Lord Robert Cecil for receiving the deputation, and the proceedings terminated.

Mr. Devine's Report.

We have received a copy of the report presented by Mr. Alex Devine to the Montenegrin Red Cross and Relief Fund of London. From this deeply interesting document we take the following brief extracts, which speak for themselves of the admirable spirit of the Montenegrin refugees, and of the good work of the Fund. Mr. Devine, it will be remembered, travelled through France and Italy, visited Sicily and the Lipari Islands, and afterwards went to Switzerland:—

"I wish to pay the highest testimony to the loyalty and sincerity of the Montenegrin people I have met on my journey. With regard to officials generally, my report will give details of the help I have received, and the spirit in which I have been met, but, from the point of view of the poor people themselves—the refugees—I have been greatly struck by their gratitude and appreciation of Great Britain, and the absence of all spirit of grumbling or grievance. Uprooted and bereft as they have been, separated from their families, left behind in a desolate country, destitute and strangers, no word of reproach as to the disasters that have befallen them has passed their lips. They naturally think that it is unfortunate that help and rescue was not sent to them, but all, with one accord, realise

Digitized by Google

that the best was done. Furthermore, I wish to bear strong testimony to the honesty and steadiness of these poor people, one or two instances of which I venture to give you in this report."

Referring to a certain lack of co-ordination and to the advisability of recognizing the efforts and work of "official France" on behalf of the Slavonic peoples, Mr. Devine writes: "I have found no trace of any effort at investigation generally as to the condition of the refugees all over Europe, and in several cases I have communicated with other relief authorities, giving them information with regard to their refugees that I felt would doubtless help them. The Montenegrin people are held to be the guests of France at the present moment—as are also the Serbian refugees, and in all these cases the French Government constitute themselves their protectors and provide, through their Prefects, the necessities of life, food and shelter, and are making attempts to include education in the case of children.

"To Bordeaux came those described as *fonctionnaires*, who, on the breaking of the storm, dispersed, and who are now returning to headquarters. These *fonctionnaires* are paid through the Montenegrin headquarters at Bordeaux by the French and English Governments. It became quite clear to me that from the point of view of the officials at Bordeaux there were two classes of refugees; first, and most important, the *fonctionnaires*, and, secondly, the ordinary refugees. I understood that the monthly advances the Government allowed were sufficient for the Montenegrin officials at Bordeaux to help the *fonctionnaires* to a certain extent, and, with regard to the second class of refugees, they had no funds, but the Prefects of the various Departments help.

"I should like to conclude my report on my work in Marseilles by giving an example of one of the refugees as showing the spirit these men exhibit. It is one out of very many similar illustrations that testify strongly to the excellent personal character of so many of these men. I met a Montenegrin at that city who had not only been severely wounded but was suffering intensely from the privations of the retreat and was in hospital for treatment for 'lupus.' I had a talk with him and told him that the London Committee would be willing and glad to help him on hearing as to his plans and wishes. He was very grateful and spoke of how much England was caring for Montenegro, but, when it came to paying him money, he said 'No, when I come out of hospital I have some good work to go to: I do not want to trouble anyone. You must give this money to many who really need it; I can manage for myself I am sure.'"

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Position in Mesopotamia. July 3.

Mr. TENNANT, replying to Sir H. Dalziel, said: I fear I cannot add anything to what I said last week about the position and prospects of the troops in Mesopotamia.

Sir H. DALZIEL asked whether the right hon. gentleman could go so far as to say that he regarded the position as satisfactory. Mr. Tennant suggested that the question should be postponed a little longer. He did not think it desirable to make any statement just now.

British Prisoners in Bulgaria. July 4.

Mr. MALCOLM asked whether the Secretary of State for Foreign Affairs would now publish such reports as had reached him upon the condition of British prisoners and prisoner camps in Bulgaria and Turkey.

Sir E. GREY: No recent reports have been received from the United States representative at Constantinople as to the condition of our prisoners in Turkey, and we are inquiring when reports that may be published may be expected. With regard to Bulgaria, we are informed that all the British prisoners have been assembled at Philippopolis, with the exception of a small number who are employed in construction work in the interior. As soon as this work is finished they will be sent to Philippopolis. The prisoners are treated on an equal footing with Bulgarian soldiers. Parcels are being distributed to them. Their health is good.

Mr. MALCOLM: Is the right hon. gentleman satisfied with that report?

Sir E. GREY: It would be too much to say that I am satisfied with it, but I have nothing that I can publish.

Large gatherings assembled in Victoria Park on Sunday on the occasion of a demonstration in honour of Kossovo Day. A number of Serbian refugees attended, and the flags of the Allies were displayed. Mr. F. A. Renton, on behalf of North-East London, extended a welcome to the Serbian visitors, and expressed the belief that when the war was concluded the Serbian people would be re-established in their own country to develop the virtues and characteristics which had distinguished them in the past. Dr. Elsie Inglis, who spent ten months in Serbia, described the wonderful spirit which the Serbians had exhibited not only throughout this war, but in all the 500 years which had succeeded the great day of Kossovo. In common with the people of this country, the Serbians never knew when they were beaten. At the commencement of hostilities they defeated the Austrians in three battles. Then came the great outbreak of typhus. She did not suppose it would ever be known how many people had died in the course of that awful epidemic, but the figure must have been enormous. Dr. Vosniak, M. D. Janitsch (President of the Jugoslav Society of Serbs), M. Ostovic, Mr. N. Rhys, and others spoke.

THE PRESS ON THE NEAR EAST

Constantine of Constantinople.

The following quotation is taken from a recent number of the *Independent* (New York), and refers to a mass meeting of Athenians who assembled to express their sympathy with the American President as being a victim of "British tyranny":—

This harks back to 1453, when the eleventh and supposedly the last of the Constantines was struck down by a Turkish sword and cried in vain for a Christian to cut off his head. The Turks who that day battered down the walls of Byzantium with their new weapon, the cannon, have held the city ever since, but now there are many aspirants for it, the Czar of the Russias, the Czar of the Bulgars, and the King of the Hellenes among them. The last-mentioned, half Dane and half Russian and married to a German, has no claim to the succession by right of Byzantine descent. The imperial line ran out with Ferdinando Paleologus, who found a humble grave in St. John's Churchyard, Barbados.

The people who now live in Greece have perhaps as little of the old Greek blood as they show of the old Greek spirit, but because they speak Greek and because they have named their king Constantine they claim to be heirs of the ancient glory of the Greek Empire on the Bosphorus. That is why they refuse to join with the Allies in giving Constantinople to the Czar. Better the Turk than the Russian, they think, because the Turk's hand is weakening, but the Russian bear never lets go what he gets his claws on.

The Turks in Arabia.

Country Life (July 1) publishes an article under the above heading by Mr. Douglas Carruthers, from which we quote below:—

The situation is a strange one. The Caliph is head of some 100,000,000 of human beings. For four hundred years the Sultan of Turkey has been regarded as that head. Throughout the ages his adherents have increased vastly, for even after twelve centuries Islam is still a living missionary force, and its converts number hundreds of thousands yearly. From China to the Congo, from Siberia to the Malays, hosts of human beings look to Stambul rather than to the actual rulers under whose dominion they dwell. But to-day it is a fact that the Caliphate has passed out of the hands of the Ottoman Sultan. What the effect will be it is hard to guess. It may be that the golden cord of Islam is broken, that the Moslem world is divided against itself. It may be that the true followers of the Prophet will hold together and succeed in casting off the Turkish incubus—the mock-Moslems, who, having usurped the Protectorship of their faith, betrayed them.

For the moment Islam is without a leader, the Faith is being put to the test. It is my opinion that Turkey will fall, and that Islam will not only survive, but rejuvenate. . . .

The story of the Turks in Arabia is not a pleasant one. It is one of intrigue, murder, and appalling mismanagement. Yet the fact remains, they have managed, by hook or by crook, to keep possession of Mecca. With great determination the Sultans have held out the temporal power represented by the possession of the Holy City, which is their chief claim to the title of Caliph. Although Turkey has never conquered outright and laid the whole peninsula under her sway, she has stuck to the one important point; for after all Arabia *is* Mecca, and Mecca is the core of Islam. It is a strange fact that the Turk is as unwelcome in Arabia as any Christian would be.

The Serbs at Salonika.

A special correspondent of the *Evening Standard* at Salonika contributes an interesting article to his paper regarding the Serbs who are waiting the order to advance to the deliverance of their country.

Here, at Salonika, all that is left of the Serbian Army are waiting with a fierce impatience for the forthcoming day of

battle. It is almost impossible to describe in sufficiently strong terms the wild longing that the Serbs feel to be once more meeting the Bulgarians in deadly conflict, for, as the Prince Regent said during an interview that I had with him at Corfu, "the Bulgar and the Serb feel nothing but the bitterest hate of each other, and the Serbs are determined to drive their enemy out of Serbia, even if they perish to the last man in the attempt."

They are a wonderful army at the present moment—sadly shrunken in numbers, of course, for four years of hard fighting have reduced Serbia's troops from 400,000 to 150,000; still, the men she can still put into the field are men who will fight with a desperate courage, soldiers who can be relied upon to give a fine infantry attack and slashing cavalry charges, though it is doubtful if the army could stand a very long and hard campaign, for greatly—enormously—as the Serbs have benefited from their stay at Corfu—fine, sunburnt fellows as they look to-day—they must still be feeling the terrible strain of the grim famine march across the Montenegrin and Albanian mountains, their strength cannot be wholly restored to them.

The Serbs themselves would like to attack at once, but this correspondent urges caution. He continues:—

England and France have contributed to the complete re-equipment of the Serbs, and very well the soldiers look in their khaki uniforms. They sang their old battle-songs as they sailed away from Corfu, and here, at Salonika, they are filled with the old fighting spirit. It is pleasant to be able to record how great a friendship prevails between the British and the Serbian troops; they will fight well side by side, and it is very interesting to note the mutual admiration that the tall, lean Serbs and the more heavily-built British entertain for each other.

The forthcoming Balkan campaign is going to be a big affair when it starts, and there will be little quarter given or taken. The Serbs have desperate wrongs to avenge, and they plead to be put in the front rank of the battle; and when Bulgar and Serb meet, the two opponents will fight, if need be, with their very teeth, for this will be the death grapple of the two nations—a grim wrestle for supremacy in the Balkans.

Victory for the Allies would mean undoubtedly the shortening of the war, but it would mean more than this—it would prove to generations yet unborn that the supreme courage the starving Serbian army displayed during the ghastly retreat last winter has had its reward, and that the men who fell out day after day during the long march—sinking down dying by the roadside—did not offer up their lives in vain.

The Truth about Bulgaria.

The attitude of certain English politicians who still apparently regard Bulgaria as a possible ally was dealt with by Mr. Alfred Stead in the *English Review* recently. Mr. Stead writes:—

Of course, it must be out of the question to give Macedonia to Bulgaria: the argument that, before the Balkan wars, Serbia was ready to forego much of this territory, and that during the present war, under unjustifiable pressure from her Allies, she was ready to hand part of Macedonia to Bulgaria, has nothing to do with the situation to-day. Bulgaria, by joining the camp of our enemies, has forfeited all right to any concessions whatever; she has earned the right of being wiped off the map. It is doubtful whether we have any more ardent enemies than the Bulgarians in the ranks of our adversaries—the outlaw who has committed the basest of crimes must necessarily fight to the end against the forces of law and order. It palliates nothing that Bulgaria appears more base because of the incredible stupidity and blindness of the Allies before the open declaration of war. Bulgaria has for years been pro-Austrian, and every year has seen the last traces of Russian influence, based on a supposed gratitude of a notoriously ungrateful savage people, grow less and less. Under the rule of Ferdinand the whole tendency of Bulgaria has been towards Austria; the whole of the army and the governing circles—those puppets of the throne—have been Austrianised. The writing was on the wall for all to read, but we preferred to believe the soft words and sweet singing of that wonderful *causeur*, Ferdinand of Coburg, the ruler of Bulgaria.

The writer quotes from Bulgarian papers to show the real attitude of the Bulgars towards the Allies, and Britain in particular, and continues:—

If we treat with Bulgaria seriously we risk not gaining Roumania—we gain nothing with Bulgaria, save smirching our national honour and a worn-out second-rate army. In losing Roumania we lose 600,000 men, well trained in war, fully officered, with trained reserves of another 500,000 men. All these strategically placed where they can do the most good.

German and Austrian.

We quote the following anecdote regarding the relations between German and Austrian from an article entitled "The Tragedy of Serbia," by Dr. Elsie Maud Inglis, in the *Englishwoman* (June):—

The most hopeful sign of the situation as we saw it was the fact that no love is lost between Germans and Austrians—there is contempt on one side, and irritation on the other. One incident which Dr. Hutchison gives shows how easily this smouldering hostility could burst into flame. She and her unit had been taken into Austria as prisoners. They were travelling in a horse-box, and both doors were open. To the one door came a young Austrian officer who had been very kind to them during the whole journey. At the other door appeared a German private, who shouted some insulting and disgusting remarks into the carriage. "Take care what you are saying," called out the Austrian. "It is no concern of yours," answered the German. The young Austrian flushed scarlet. "Do you know whom you are speaking to?" he cried. "I am an officer." "And I," said the man, "am a German." Being a private in a strictly-disciplined army, he realised that he had gone too far, and made off down one side of the train, while the Austrian made after him on the other. In a little while he came back, saying he had made the man over to the proper authorities; but the incident speaks for itself—"*I* am a German."

Austria and Peace.

Mr. Francis Gribble, writing in the *Manchester Daily Despatch*, considers it not unlikely that Austria might be induced to abandon her Ally in the near future. He concludes an interesting article with the passages which we quote below, and which summarise the foundations upon which his views are based:—

In the first place, though their Ally has saved them from destruction, he has also treated them with contempt. He has deposed their generals, and assumed the supervision of their armies. His newspapers have ridiculed their failure in Serbia; the man in his street has mocked at their incapacity and thrown doubt upon their courage. "Those Austrian rabbits" was an expression often to be heard in Germany when I was there; "the routed Austrians" is an expression which has appeared in a German order of the day found by the Russians in one of their prisoners' pockets. That sort of thing does not make for harmony.

In the second place, the German plans for the future, based on the assumption of German success, have been drafted without much regard to Austrian desires and interests. Austria was to be dragged, willy-nilly, into the Zollverein, in order that Germany might be the better able to fight the threatened boycott. There was to be a new political unit known as Central Europe; and that, as many Austrians have perceived, was a thinly-veiled scheme for incorporating Austria in an extended German Empire of which the hegemony would be retained by Prussia. And that project is not agreeable to Austrian pride.

So long, of course, as the Central Powers were winning, Austria, even if dissatisfied, had nothing to gain by breaking with Germany, but when the tide turns, Austria will have no motive for holding out to the last because Germany is too proud to give in. On the political as well as the military *terrain* breaking point will be sooner reached in Austria than in Germany, and then the line of least resistance will lead the Austrian Government into negotiations. Austrian statesmen know perfectly well that Austria is not, except in Serbia, hated quite as Germany is hated; and, if the spirit of Metternich is not quite dead in the country, then they are unlikely to lose much more time in taking advantage of that fact.

Articles to Note.

"A Greek Island," by G. E. H.; "At Ctesiphon"; and "Earl Kitchener of Khartoum," in *Blackwood's Magazine* (July).

"The Rescue of an Army," by Lieut.-Commander E. Hilton Young, M.P., in the *Contemporary Review* (July).

"Persia and the Frustration of German Schemes," by Robert Machray, in the *Fortnightly Review* (July).

"There Resteth to Serbia a Glory," by Alice and Claude Askew; and "Kitchener," by John Helston, in the *English Review*.

The temperature during the past month at Cairo exceeded 90 degrees Fahrenheit daily. The maximum reading was 112 Fahrenheit, which occurred three times. The heat wave continues.

A Reuter's message from Athens, dated July 1, reports: "According to present arrangements, the elections will take place on September 17.

Sir Francis Elliot, British Minister at Athens, has promised to recommend that facilities be accorded for the return to their homes of Greek time-expired Reservists resident in Egypt.

According to private information received in Bucharest, the Bulgarian Government has issued a decree ordering the internment of all enemy alien subjects at present in Bulgaria, and the sequestration of the property of commercial houses and industrial and other companies of enemy nationality.

A Turkish newspaper has been regaling its readers with an alleged interview with General Townshend, the defender of Kut, who is represented as vilifying his chief, General Nixon, and reserving his praises for Khalil Pasha, to whom he surrendered. There is, of course, not a word of truth in the narrative, no such interview having been given by General Townshend.

The Armenian Refugees (Lord Mayor's) Fund has received a telegram from their hon. secretary, the Rev. Harold Buxton, now in Van (Turkish Armenia), asking for all available money to be sent immediately in order that he may organise the rebuilding of the ruined homes of Armenians who, as a result of the Russian victories, are now able to return to their own land. The money is urgently required in order that shelter for this stricken people may be provided before the coming of winter, which is very severe in Armenia. Funds will be received by the Hon. Treasurer, Armenian Refugees (Lord Mayor's) Fund, 96, Victoria Street, S.W.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Recent news from the Balkan States has been significant. Item one—the idea of a commercial agreement between Roumania and Turkey has been definitely abandoned, which shows that our Bucharest friends continue to be well advised. Second—it has been decided that the Bucharest Stock Exchange, which has been closed for a year, shall be reopened for cash business—excellent evidence of the abundance of money. Third—Britain has agreed to supply to Roumania the sulphate of copper which France was unable to send, a satisfactory event indeed. I have already had something to say on this subject; but this budget of news is certainly reassuring in character.

***

According to a message from Zurich, dated July 1, the Central Powers had invited Roumania to be represented at the Danube Conference, to be held shortly in Vienna. Writing on this subject on June 14, the Correspondent of THE NEAR EAST in Bucharest said: "I am able to inform you that Roumania has *not* been invited to take part in the Conference. Roumania has since the beginning of the war preserved strict neutrality, and to invite her to participate in the Conference would have been the equivalent of asking her to disclose her intentions. Even the refusal to accept such an invitation would have been embarrassing—possibly to both parties."

***

This is true to some extent; but Roumania could, nevertheless, have been represented, if only to safeguard her own interests; that would not have been a breach of neutrality. As I have frequently pointed out in these columns, the question of the Lower Danube—now controlled by Germany because Bulgaria commands the middle lower reach of the river—is one that interests Roumania very considerably, and no arrangements regarding the river can be made by any States or Powers that do not concern her directly. This is a point which must be borne in mind by our diplomats, not only now in connection with our friendly relations with Roumania, but later, when peace terms are discussed. My readers will do well to consult the exhaustive article on the subject by M. D. Mitrany which appeared in last week's issue of this journal.

***

One of the most interesting of the telegrams affecting our enemies received last week, I think, was that which gave us the details of Bulgaria's financial position. We have had all sorts of rumours before, of course, but most of them have been suspect—we are always prepared to believe that the enemy is in trouble. In the present instance, however, there is no reason to doubt the accuracy of the statement placed before us. We are told that the Budget Bill now before the Sobranje shows that the deficit in 1914—in a year of apparent peace, let it be noted—was, roughly, 22,000,000 fr. This serious figure expanded in 1915 to 60,000,000 fr., while the estimated deficit this year is about 100,000,000 fr. On May 31 last the National Debt was 1,697,756,972 fr., and it is stated that by the end of the present year this sum will have been increased to 2,000,000,000 fr.

***

A debt of £80,000,000 sterling is not excessive from the national point of view, perhaps. It may be argued, indeed, that none of the Powers of Western Europe is less indebted. That is perfectly true; but even the most financially weak of them—and I am prepared to back Germany for that position—will have some prospect, when peace has been restored, of being able to make some sort of terms with its creditors. Germany will be able to trade, she will be able to re-establish her industries, and in course of time rid herself of her heavy mortgage debts. But Bulgaria is without hope. Her present allies would not help her if they could. She has played to Russia the part the serpent played to the Roman woodman, and from that quarter Bulgaria may expect nothing but stern and uncompromising justice. Roumania will have her own policy to follow, and Greece has a task almost as formidable as Bulgaria's to perform. There are Austria and Turkey remaining among her friends, and the Bulgarians themselves know what measure of help is to be expected from those quarters. Unhappy Bulgarians! Truly, they got down the wrong side of the fence.

***

Our American friends are very shrewd business people, notwithstanding their methods of hustle, which I have always suspected have been employed merely to hide from us the fact that they are really very go-ahead. I am led to these reflections by the perusal of an able report which Mr. Consul Ralph H. Bader has made from Teheran to his Government. Of course, it deals with trade and trade possibilities, and covers a particularly wide ground, from soft-goods and needles to kerosine oil, and it is in dealing with this latter commodity that he is most interesting, at any rate to readers of THE NEAR EAST. In regard to oil, Consul Bader has not much use for the northern portion of his territory; he is wide-awake enough to know that, there, "the proximity of Baku makes it impossible for petroleum from other countries to compete with the Russian article." It is only in South Persia, he tells us, that American and European oil is sold, and he calculates that "if oil from the wells at Abadan, in the Persian Gulf, is refined and put on the market the future of American petroleum in Persia would not be bright." I believe I could tell Consul Bader that the future of American oil in Persia is *not* bright.

***

A word of congratulation to our Roumanian shipping friends. A correspondent in Colombo tells me that, for the first time in the history of the port, a vessel flying the Roumanian flag has called there—she was the "Bucaresti," was bound from Marseilles to Vladivostok, was of 2,269 tons, and was commanded by Captain C. Lalomit. Add to that the fact that the vessel was owned by the Roumanian State Maritime Service, and there is a complete note of progress to place on record. By-and-by, perhaps, the fact that many Roumanian ships are trading in Indian waters will be recorded, for there is no doubt that much scope exists for tonnage at all times. The country will enter upon a new era of prosperity if it can build up a really great overseas trade, carried by its own ships—here's the hope that such will be accomplished.

***

I read that the London Chamber of Commerce has instructed its Post and Telegraph Committee to "consider and report upon the desirability of advocating the extension of the cash-on-delivery system in connection with the Parcel Post service with foreign countries." I am glad that the Chamber has taken an initiative in this matter, which is important from the trading point of view, but I should like to point out that if the C.O.D. system has not been such a success in this country as it has been in Germany the fault does not lie so much with lack of facilities as it does with the indifference of the British trader to its advantages. Take Egypt as a case in point. When the C.O.D. system between Great Britain and Egypt was introduced it was only with the greatest difficulty that British tradespeople could be persuaded to fulfil orders against payment on delivery of goods; they wanted payment in advance. This obstinacy on our part naturally drove a lot of trade to Germany and Austria, where no such scruples about cash payment on delivery exist. Therefore, my argument is that if a C.O.D. system with foreign countries is to be a success the British trader must be taught to use and not ignore it.

***

It would have been worth the while of dealers in Mediterranean countries to have been present, either by agent or personally, at one or other of the exhibitions, which have been held in a number of industrial centres in this country, of samples of German and Austrian goods which have been collected from markets throughout the world—including Malta and Cyprus, to mention two topical names. Altogether, there are now about 8,000 samples of goods of great variety representing many scores of trades and industries. Later on, I understand, an attempt will be made to compile a list of wares of which German and Austrian makers have practically had a monopoly, but which British manufacturers will pay special attention to in the future.

***

As I indicated last week, the trouble which led to the dislocation of the Spies' operations in the Grozny oilfields was connected with labour—which is a pretty prolific source of trouble at the best of times—and that it was adjusted. I hear now that the men struck for an increase of wage which did not conform with the views of the employers' representatives on the spot. The men were already in receipt of a war bonus, and the management was prepared to increase this; but the workers were obdurate, and they actually downed tools on June 2, not resuming work until June 22. I believe further concessions were made before the men turned to; wages and bonus were both increased, which, with the loss incurred as a result of suspended production for twenty days, will make a hole in the revenue account.

Prosperity of Egypt in 1915-16.

Surplus of More than Three Millions.

(From Our Own Correspondent.)

Cairo, June 27.

The State accounts for March have just been published, and with them the closing figures for the financial year 1915-1916. As the statements of the three preceding months and the Financial Adviser's Note on the new Budget led one to foresee, the year has closed with a record surplus. The final figures are:—Revenue £E17,759,418, expenditure £E15,324,259, leaving a surplus of £E2,435,159.

An idea of the wonderful manner in which the State finances have recovered and have falsified all expectations—at any rate, in so far as concerns the actual extent of that recovery—can be obtained from the following figures:—

	Budget. 1915.	Actual Results. 1915.	1914.	1913.
	£E.	£E.	£E.	£E.
Revenue ..	14,756,000	17,759,418	15,389,124	17,703,898
Exp'ndit're	15,900,000	15,324,259	16,857,783	17,659,961
Surplus....	− 1,144,000	+ 2,435,159	−1,468,659	+ 43,937

Normal Revenue.

Thus the results of the year just closed are £E3,579,159 better than the original estimate, the revenue having exceeded the figure assessed by a shade over three millions, or 20 per cent. on the estimate, whilst the expenditure is £E575,741 less than the budgetary credits. The same table shows that the revenue for 1915 has returned to the figure for 1913, the last normal year previous to the outbreak of war, and that the expenditure is about £E2,300,000 less than that incurred two years ago.

During the year direct taxes improved by £E340,218, Customs by £E477,089, tobacco dues by £E247,873, legal fees by £E42,428, railways by £E548,128, telegraphs by £E44,850, Post Office by £E13,075, rent of Government land by £E22,882, Domains receipts by £E419,718, investment of funds by £E89,729, divers receipts by £E336.850. The principal decreases were in ports dues, £E174,532; military exemption, £E21,140; and sale of property, £E23,953.

Perhaps a clearer impression of the recovery made by the country will be obtained if one compares the position under each head of revenue at the end of the 1914-1915 financial year (which included seven months only of war conditions) and of the one now under review with that at the close of the 1913-1914 accounts, which were for an entirely normal year.

The appended table gives this information:

—	Position on 31/3/15.	31/3/16.
	£E.	£E.
Land and Direct Taxes	− 263,758	+ 76,460
Customs.....	− 772,258	− 295,169
Tobacco Dues	+ 22,549	+ 270,422
Port Dues	− 126,112	− 300,644
Legal Fees	− 362,311	− 319,883
Railways	− 687,815	− 139,687
Telegraphs	− 7,341	+ 37,509
Post Office.....	− 47,073	− 33,998
Rent of Land	− 14,008	+ 8,874
Domains.....	− 51,040	+ 368,678
Military Exemption	− 32,177	− 53,317
Investment of Funds.....	− 40,443	+ 49,286
Sale of Land.....	− 4,074	− 28,027
Sundry Heads	+ 71,087	+ 415,016
	− 2,314,774	+ 55,520

+ As compared with that at the same date in 1914.

Improved Conditions.

From this it can be seen that, whilst on the one hand the falling-off recorded at the end of March, 1915, in direct taxes, telegraphs, rent of land, Domains, and investment of funds has been converted into an increase, those in the other heads, with the exception of port dues, military exemption, and sale of land, have been considerably reduced, and the increase in tobacco receipts has gone on progressing. It is true that various means were resorted to last year to obtain an expansion in the revenue—some of the Customs tariffs were raised and an increase was made in the passenger rates of the railways and in the postal and telegraph charges. Generally speaking, however, the true effect of these expedients will not make themselves felt for some time, especially as regards the Customs tariffs (excluding, of course, tobacco). Consequently, since the recovery is most marked in heads that always reflect the economic situation in the country, such as Customs, railways, telegraphs, and Post Office, there can be no disputing the fact that it must (in the main) be attributed to the general improvement in the condition of the people, consequent on the excellent cotton position and on the continued presence of such large numbers of troops in the country.

The record surplus which has resulted is due not only to the recovery in the revenue, but also to the economy effected in the expenditure, which, if allowance is made for the supplementary credits granted during the year, was £E852,112 below the total authorised. The economy principally reflected itself in irrigation, £E189.265; railways, £E187,780; education, £E63,939; War Office, £E84,593; public health, £E57,861; town drainage, £E33,529; interior, £E39,627; ports and lights, £E34.854; police, £E24,659; and coastguards, £E25,306. It is somewhat remarkable that in a year like the past one economy should have been possible in what were already war estimates for the police, coastguards, and army. The explanation is possibly that, owing to the difficulty in getting supplies from abroad, the stocks of equipment have not all been replenished, in which case part of these replacements will have to be borne by the current year.

It is interesting to note that the percentage of working expenses to receipts of the railways, which rose to 82.1 in 1914-1915, fell to 62.0 last year, thus more nearly approaching the normal, as typified by 1913-1914, which stood at 57.8. Both Telegraphs and Post Office paid their way, whereas the previous year they had been a burden to the State. Indeed, the former has considerably contributed to the Exchequer.

Trade "Looking Up."

Compared with the results of the past financial year, the estimates for the current one leave a very wide margin, in so far as concerns the revenue. The latter is set down at £E16,530,000, or £E1,229,418 less than that now realised. On the other hand, the expenditure is fixed at £E16.630.000, or £E1,305,741 more than that of the year just closed. These estimates have been framed in a most cautious manner, and it may already be predicted that the draft of £E100,000 on the reserve fund, which has been provided to bring about the balancing of the Budget, will not be required. Last July we predicted that the draft of £E1,144,000 on the reserve, which the estimates provided to meet the anticipated deficit, would not be required. Our forecast has come true, though we must admit that we never anticipated that the result of the year's working would be so brilliant, and what we said of the 1915-1916 deficit holds good in the case of the current one. The position is indeed a highly satisfactory one. The prosperity of the people continues. They are still deriving great benefit from the continued presence of British troops, trade in general is looking up, and, with a rising cotton and cereal market, the prospects of the coming crops is excellent. So that there is little doubt that the expectations of the financial authorities will be fully attained.

The surplus of £E2,435,159 has all been placed to reserve, £E1,270,407 being used to write off the depreciation undergone by the securities in which that fund is invested. This is an exceedingly wise step, and the reserve fund now stands at its actual value—i.e., £E4.799.642. At the end of the 1913-1914 financial year the fund stood at £E5,103.549, so that its present amount is still £E303,907 off its pre-war figure. It should, however, be remembered that at that date the securities had already begun to undergo depreciation, estimated at the time by the Financial Adviser at 2 per cent. of their book value, and that the reserve to-day stands at the net value of those securities. In these circumstances, therefore, it is permissible to say that the finances of Egypt stand at the end of eighteen months of war conditions almost exactly where they were before the outbreak of hostilities, thus giving her what is to all intents and purposes a unique position amongst the belligerent countries of the world. All concerned have indeed reason to congratulate themselves on this remarkable achievement, for, although the recuperative powers of the country have accounted for much in the attainment of this result, an important contributory factor has undoubtedly been the caution and firmness displayed by those who held the purse-strings.

CONTINUED PROGRESS.

Cairo, June 22.

Last night the Customs returns for May were published. They show a continuation of the general trade improvement. Imports rose by £E1.391.283 to £E2.970.052, and exports by £E701,305 to £E2.079.511 during the month. It is interesting to note that at the end of May imports stood at practically the same figure as at the same date in 1914, whilst exports were over a million better.

The principal increases under imports were:—Preserved fish by £E19.834, leather goods by £E10,984, jams and preserves by £E31,592, beer by £E71.065, liqueurs by £E45,597, petroleum by £E74.139, mineral oils by £E33.434, stationery by £E30,107, coal by £E257,966 (whilst the value more than doubled, the quantity was 13,000 tons less), textiles by £E552,862, and worked iron and steel by £E55,764. The only important decreases were rice, by £E51,535, owing to the abundant local crop, and chemical manures by £E21,882.

Exports reveal a further expansion in the sale abroad of the country's products. Sugar exports increased by £E90,523, although the 1915 figures were already far above those for 1914; alcohol by £E39,830, as against nothing previously; maize by £E211.012, skins by £E12,146, cotton seed by £E56.333, and cotton by £E350,866. Eggs and onions showed slight decreases, £E12.323 and £E42.340 respectively, but in the case of the former the amount already exported is far superior to that of preceding years. Gold and silver bar fell off slightly, whilst cigarettes remained comparatively stationary. Specie movements were confined to the imports of silver and nickel coins for the local circulation and to the export of £E48,400 Maria Theresa dollars for account of the Sudan Government, through the Egyptian Ministry of Finance.

The lion's share under both imports and exports again fell to Great Britain, with £E1,679.262 and £E1,114.603 respectively. Her chief sales to Egypt were flour, £E29,523; beer and liqueurs, £E104,864 (70 per cent. of the whole imports); all the coal, cotton tissues, £E530.047 (out of a total of £E641,965); and worked iron and steel, £E80,020. All the eggs and cotton seed went to Great Britain, and nearly half the cotton and 90 per cent. of the maize.

Amongst the other countries, America increased her exports by £E36,604, France hers by £E45,817, Italy hers by £E178,159, Japan hers by £E31,944, whilst the only noticeable changes in exports from Egypt were a falling off of nearly 50 per cent. in purchases made by the United States and a considerable increase in those made by France (cotton and alcohol), Italy (sugar and cotton), Russia and Switzerland (cotton).

Trade between Egypt and the Sudan improved very much during May. Exports from south to north jumped from £E46,175 to £E100.596, and traffic the other way from £E78.923 to £E137.661. Exports from the Sudan to Egypt were mainly cereals £E14.010, live-stock £E5.557, charcoal £E5.006, and cotton £E58,588, whilst the principal imports were refined sugar £E49.878, cotton tissues £E24,888, and cereals £E6,715.

TRADE OPENINGS.

The Director of Stores, Department of Public Health, Cairo, invites tenders for the supply of paints, mainly for the scavenging and watering service. Date, July 15.

The Physical Service Department, Cairo, invites tenders for the supply of weighing machines, balances and weights required for Government during 1916-17. Date, July 15.

The Director, Coastguard Stores, Arsenal, Alexandria, invites tenders for the supply of fresh and dry rations required for the service men at depot, Mex, and for crews of cruisers at Alexandria, for one year commencing September 1, 1916. Date, July 15.

The Director of Personnel and Equipment Department (Supplies Office) invites tenders for the supply of photographic material required, for a period of one year commencing on August 1, 1916, and ending on July 1, 1917, for the Ministry and the Identification Service of the Ministry. Date, August 1, 1916.

Tenders Accepted.

The Egyptian Cement Company's tender for the supply of twenty tons of cement to the Domains Administration has been accepted for £E85.84.

Messrs. Compton and Sons have obtained the contract for the supply of blue uniforms for the School of Arts and Trades for the next scholastic year.

TRADERS' BLACK LIST.

The *Official Journal* of Egypt, dated June 15, 1916, contains a proclamation by the Officer Commanding-in-Egypt, adding a large number of names to the list of firms with which trading by British subjects is prohibited. The following Greek firms are in the list:—

Abramiantz and Co., Lalezar, Teheran; Barouh, Solomon and Levi, Volo; Brazzafoli, Domenico, Syra; Carnik Khan Dalguidjan, Teheran; Constantacopoulos and Co., Patras; Dimitrelias, John Vathy, Samos; Fels and Co., Corfu; Frandzis, P., and Fiorentino, G., Vathy, Samos; Galanis and Goldstein and Hadjiandreou, Samos; Haim, Ezra, Hamadan; Haji Ahmedagha Teheranji, Teheran; Haji Mohamed Ibrahim, Teheran; Hanemoglou, Resht; Pugin; Lianos, C., Frères, Piræus; Muller, Karl, Patras; Lochner, Max, Patras; Lucas and Co., Patras; Spiliotopoulos, C., Patras; Stoltenhof and Lucas, Patras.

The following names have been removed from the list of firms with which trading is prohibited:—

Haji Abdur Rahim Shirazi, Bombay and Shiraz; Ittahadie Fils, Teheran; Mir Abdul Baghi and Sons, Kermanshah; Rahim Ittahadie (Ittahadie Fils), Teheran; Shohet, Selim David, and Co.; Sofer, D.J. and S., Hamadan; Zorour, Sion, Hamadan, and Zilka, Abraham Joseph, Kermanshah.

Mr. F. H. Russell, of Gresham House, Cairo, has been appointed receiver of the property and assets of the German Evangelical Union of Cairo, with directions to take charge of and manage same as he may think fit, subject to any instructions of the Licensing Officer.

EGYPTIAN COTTON IN JUNE.

Egyptian cotton did well in June. In Manchester, middling American began, on June 2, at 8.43d. per lb.—the lowest figure it had reached since May 5, when it touched 8.20d.—and by June 23 it had dropped to 8.29d. Egyptian, on the other hand, began at 11.53d.—the highest price attained since April 28—and advanced to 11.85d. per lb., the best result since February 18, when it reached the same figure. Incidentally, it may be mentioned that this is the highest price realised in Manchester for fully good fair Egyptian for a very long time.

In the yarn market business was quieter than it was in May, but here again Egyptian lines did exceedingly well.

The railways in the western regions of the French Protectorate of Morocco, which were constructed merely as military lines, have now been thrown open to public traffic, although priority will be given to military requirements.

SUDAN RAILWAYS IN 1915.

Although the revenue of the Sudan Government Railways in 1915 declined by £E3,803, the public receipts rose by £E26,359, a very satisfactory feature, which was due to the remarkable growth in the export traffic which was developed in the Sudan in the period under review. Unfortunately, the revenue result of this development was more than counteracted by the falling off in the receipts from the Government, which were less than in the previous year by rather more than £E30,000.

The year has been one in which it was necessary to observe the most rigid economy. "On the railways," says the annual report, a copy of which has just been received, "the ratio of expenditure to earnings has been reduced from 74.6 per cent. to 63.4 per cent. This is due to the suspension of the relaying programme, the use of reserve stores and other reductions in expenditure which were decided upon on account of the war, and the great uncertainty of the financial situation. Actually, during the past twelve months the railway has done better than at first appeared probable, but we are by no means out of the wood yet. In the first place, prices and freights have risen, while certain articles are unobtainable at any price. Coal is both difficult to get and very expensive. The last quotation for Welsh coal delivered at Port Sudan was 72s. 6d. per ton, as against a pre-war price of 27s." Since the report was published the price has risen, we are told, to 110s. per ton.

The management does not ignore the fact that while the policy of shutting down all possible work, living on reserve stores, "and so on is economical enough for the moment, it must react sooner or latter, and if the emergency lasts longer than anticipated, may react very seriously."

The report proceeds:—

It has to be recognised that while certain work can be stopped, e.g., relaying and renewals of locomotives and rolling stock, without bringing the line immediately to a standstill, this does not apply to stocks of coal and stores. The latter must be maintained, and should be increased rather than diminished, because the coincidence of unexpected accidents or delays may produce a situation where the normal reserve, adequate enough under ordinary circumstances, gives out. With regard to relaying, the circumstances of the war have practically taken charge of the situation. Sleepers are unobtainable at any reasonable price, and for the time being we must patch with what we have in hand and exercise the greatest care and watchfulness to prevent failure and consequent accident. This is entailing considerable added responsibility upon the engineering staff.

With regard to renewals, certain work in hand when the war started has been completed, but anything in the way of further expansion has been stopped. The difficulty now is to prevent slipping back and loss of efficiency. Here again everything depends on the foresight and constant care of the mechanical engineers both at headquarters and out-stations. With all the care and watchfulness in the world, however, it needs no great discernment to realise that permanent way, engines and trucks under continual wear and tear must deteriorate, and that, however carefully they may be patched and mended, if it is no longer possible to make provision for regular renewals on a systematic basis, the cost of so doing will be felt all the more heavily at some future date.

The statistics given claim some interest; some of them are:—

Imports have decreased by 33,043 tons. Dura and flour account for 13,584 tons, and coal for 10,608 tons. Sugar was less by 5,937 tons. Exports increased by 88,010 tons, principally owing to 70,801 tons of dura having been exported. The export of simsim also increased by 6,004 tons.

Regarding passenger traffic, we are told that there was practically no tourist business in 1915, and the receipts under this heading have declined by £E5,964. The bad harvest in 1914 still had an effect on the fourth-class native traffic, which shows a loss of revenue of £E9,498, compared with last year. There are, however, says the report, indications that this traffic is now improving. On the total the receipts from the coaching traffic have declined by £E30,829.

Mr. Munari, the agent at Cairo of the Khedivial Mail Steamship Co., has been recalled to Italy for military service.

NEWS FROM ALL SOURCES.

The Nile flood is now rising rapidly everywhere.

The new Turkish Customs tariff is to be enforced from September 14.

Following the example of the Austrians, the Germans have organised at Sofia a bureau for the purchase of all descriptions of raw material.

The United States Consul at Patras reports that there is considerable demand in the district for ready-made garments of all kinds—men's, women's and children's. The ready-made suit in most popular demand is made of cheap material.

In the week ended June 22 1,479 bales British East African, 906 bales foreign East African, and 5,442 bales Egyptian cotton were imported into the United Kingdom. In the same period the exports were 8,510, 1,059, and 2,086 bales respectively.

An amalgamation of cotton mills is reported from Italy. The concerns are those of Schlaepfer, Wenner and Co., at Fratte, near Salerno, and the weaving mills of Aselmeyer and Company, at Naples. The new company will be called the Cotonifici Riuniti di Salerno. The share capital, which is fully paid up, is 8,800,000 lire.

The commandant in the French zone in Morocco has ordered that all goods intended for Fez and Mequinez, which were not landed in a port in the French zone in Morocco, shall, on arrival at the ports named, be deposited in special stores, whence they shall not be withdrawn except on production by the consignee of a certificate of origin.

Profiting from the experience gained in the construction of the Kaid Bey branch breakwater, the Alexandria Municipality is considering an amendment of the scheme for the construction of a branch of the breakwater in the eastern harbour from Fort Silsileh. It has been decided to consult Mr. Luigi, an expert in construction work of that character.

The Board of Trade have collected more than 5,000 specimen catalogues of German origin. To enable British manufacturers to familiarise themselves with German methods of publicity, these may be inspected at the Foreign Samples Section of the Commercial Intelligence Branch, 32, Cheapside, London. The catalogues are printed in many languages, including Roumanian, Russian, Hungarian, and Greek.

The Roumanian Government has decided on the seizure of 250 empty goods wagons and six engines belonging to the Austro-Hungarian railways, which were sent into Roumanian territory in consequence of the Russian invasion of the Bukovina, together with six wagon-loads of ammunition, says a Reuter's message from Bucharest. The Roumanian Government several days ago again issued a rigorous prohibition of the exportation of petroleum, flour and other products to Turkey. All exportation to Bulgaria has also been suspended.

PRODUCE REPORT.

LONDON, July 6.

Currants.

The market has been quieter this week, partly owing to the available supply of good qualities being very small and partly owing to the firmness of holders in asking extreme prices for all kinds. Quotations are as reported last week.

Sultanas.

There has been a better demand during the week with a fair amount of business done at prices showing a slight advance from last week's quotations. It is expected that prices will soon be higher, and holders are not eager to sell.

Figs and Dates.

The market is fairly active, and prices are well maintained.

Seeds.

Linseed is dearer this week, with London-Calcutta afloat selling at 68s. 6d. to 69s., July-Aug. and Aug.-Sept., 70s.; Bombay, small grain July-Aug. is offered at 69s. 6d. Rape seed is dull, but prices quoted last week have not changed. Cotton-seed has declined, London-Egyptian afloat being quoted at £12 10s., and Sakelarides ditto £12 per ton. Canary seed had a better inquiry, quotations being 83s. to 110s. per 464 lbs.

Oils.

Linseed oil is dearer, spot pipes being quoted at £35, barrels ditto £36 landed terms. Cotton oil is quiet. Crude spot pipes £41 10s., refined pale pipes £44 10s., and barrels, sweet, £52 to £54. Rape oil remains unaltered at £48 to £50 for English refined barrels, while ordinary brown naked spot is nominal.

Oilcakes.

Cotton cakes: Owing to some fairly heavy arrivals of Egyptian the market has been somewhat depressed this week, and sellers of best brands quote at £9 10s. ex-quay and £9 5s. ex-ship, while English makes are unchanged at £9 10s. to £9 12s. 6d., with Bombays at £9 5s. per ton. Linseed cakes are extremely dull, with only small retail business passing at prices quoted last week. Rice Meal: A quantity of white Egyptian in store is offered at £9 15s., and second quality at £8 per ton; while Rangoon parcels afloat are quoted at £8 17s. 6d. to £9 ex-ship terms.

Locust Beans.

Market being quieter prices declined slightly, £10 10s. per ton whole and £11 10s. for kibbled.

BRITISH TRADE PRODUCTS.

We have received an advance proof of the interesting introduction to the annual special supplement of the London Chamber of Commerce *Journal*. The "Trade Products of the British Empire," as the supplement is aptly called, will be read with interest by all who are concerned with the development of British trade. Published for several years past, the supplement has consistently emphasised the fact that the British Empire can produce practically everything required by the Mother Country in the way of foodstuffs and raw materials for industries.

What will be particularly valuable in the supplement is a statistical review of the import trade of the United Kingdom in food products and raw materials for industries, special attention being given to the trade sources of these imports within the British Empire.

The tax on postal packets in Italy, both for the kingdom and for the Italian colonies, has been increased, as and from July 1. The increase varies according to the weight of the packets.

A Bucharest message states that the Bulgarian Government has issued a decree ordering the internment of all enemy subjects at present in Bulgaria and the sequestration of the property of commercial houses and industrial and other companies of enemy nationality.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co.,Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.
CONTRACTORS TO GOVERNMENT.

CYPRUS AGRICULTURE.

(From Our Own Correspondent.)

Nicosia, June 19.

Unfortunately, reports now show that the wheat harvest has given disappointing results, this yield being far smaller than was hoped, and inferior to that of last year. The wide plains of the Mesoria and Morphoa are the great producing areas, and although prospects were not so good recently in the former, it was not anticipated that crops would fall short in the latter. The outlook for the wheat supply of the island, therefore, causes some anxiety, and hopes are expressed that Government will prohibit the export of cereals. The failure, such as it is, is attributed in great measure to the parching heat-wave of May, which caused, also, no little injury to fruit trees, especially olives.

The grafting of wild trees—locust beans and olives—has proceeded in the usual rather haphazard manner. The Agricultural Department continues to do much useful work, in the matter of practical instruction in rural districts. It has sent experts to instruct villagers in the art of grafting. In many places the peasants are themselves skilful; but much still remains to be done in rendering vast numbers of wild trees fruitful. There is also a very large field for the cultivation of locust bean trees from seed, and the transplanting of young trees. Neglect to extend this profitable branch of industry is still largely due to the old obstacles, which still operate—the principal being want of water during the hot months, the ravages of goats, and malicious injury by villagers. The two latter evils have been dealt with by legislation, but full advantage cannot yet be taken of the law regarding goats, owing to ambiguities in the Act. These have been remedied by amendments during the session recently ended; but the latter have not yet received Imperial sanction, and so the evil drags on. In many places, too, villagers have not taken advantage of the law to exclude these destructive animals from their lands.

AGRICULTURAL COMMERCE IN EGYPT.

An indictment of Indian-made gunny bags and a eulogy of inexpensive American machinery were marked features of the proceedings at the third meeting of the Commission of Agricultural Commerce, held in Cairo on June 5. The question came up on a discussion regarding the possibility of making sacks in Egypt from "til" in order to replace, to some extent, the imported gunny from India. Naus Bey said that in previous years he had experienced great difficulty with Indian bags owing to defective sewing. The Société Générale des Sucreries et de la Raffinerie d'Egypte used about a million bags a year, which they now made themselves with the aid of inexpensive American machinery. The daily capacity of the plant is about 4,000 bags, and the plant did not cost more than about £700 or £800.

The president, Mr. Gerald C. Dudgeon, Consulting Agriculturist to the Ministry, said the manufacture of "til" sacks might become profitable if the raw material could be produced more cheaply, as there was good reason to believe it could. "Til," he said, was identical with Bimlipatam "hemp," which was used as a substitute for jute in the manufacture of many articles. Eventually it was agreed, on the suggestion of Mr. W. E. Kingsford, to experiment with a process designed by Mr. John Wells, formerly of the Mines Department, and to send the fibre to England to be spun.

A discussion followed on the condition of the dairying industry, in the course of which the president said the Ministry of Agriculture was considering possible developments in the making of butter and cheese. Many of the members remarked upon the decline of stock-raising. During the discussion on wheat and flour, the interesting point was made that although the value of flour imported in 1915 was less than that of the previous year by a million sterling, there had been little inconvenience, and they had been able to export more than 400,000 ardebs of wheat. This excellent result was due to the increased acreage placed under wheat in 1915.

TROUBLES OF BULGARIA.

(From a Correspondent.)

Bucharest, June 1.

Wool merchants in Bulgaria have lodged a protest with the Ministry of War because the military authorities have sequestered all the wool the former had in hand. The stocks were earmarked to supply the manufacturers of cloth who, in turn, were under contract to supply clothing in execution of war contracts. The dispute has been complicated somewhat by the allegation that illicit traders are at work and that they buy up what stocks remain at prices that are very much higher than those fixed by the Committee of Public Supply.

It is announced from Amsterdam that the big German banks have formed a syndicate, with a capital of 7,000,000 frs., to exploit the Bulgarian coal-mines.

The sugar supply has given out entirely in Sofia. The municipality has notified the inhabitants that in the complete absence of supplies petitions will be fruitless.

The Government has ordered that all sugar in transit through the country shall be detained, and 20 per cent. of the total be retained to help in the supply of public requirements. According to official statistics, the production of sugar in the country has fallen from 22,000,000 kilos in 1914-15 to 7,300,000 kilos in 1915-16.

Military service is becoming increasingly unpopular throughout the country. Recently, the Ministry of Agriculture complained in an official *communiqué* of the enormous number of petitions which had been received soliciting intervention to secure the exemption of the applicants from military service. The Ministry attributes "this unusual attitude of the male population to the mischievous writings which have appeared in some of the newspapers." To put an end to "these intolerable conditions," the Ministry has addressed a circular to the heads of the police instructing them to bring to the knowledge of the people the fact that no petition for exemption can be considered.

Between January 1 and May 18, 1916, large quantities of foodstuffs, all of which are mentioned in the official List of Articles of First Necessity, as well as articles required for the manufacture of military stores and equipment, have been despatched to Germany. The returns from the various Customs houses show that the total exports of the goods mentioned in the period aggregated about 33,300,000 kilos (32,500 tons approximately).

POST-WAR PREPARATIONS.

The Sub-Committee appointed by the Council for the Organisation of British Engineering Industry to report on engineering education and research (consisting of Messrs. A. P. M. Fleming, of the British Westinghouse Electric and Manufacturing Company; J. G. Maxwell Garnett, Principal of the School of Technology and Dean of the Faculty of Technology, Manchester University; and Mr. Miles Walker, Professor of Electrical Engineering in the School of Technology and in Manchester University) have published their report. It indicates some of the changes which the Committee considers it most necessary to make in our present methods of educating engineers, suggests legislative and administrative means of effecting some of these changes, and points out the need for greatly increasing the volume of research in connection with the British engineering industry.

TO ASSIST BRITISH FIRMS.

The President of the Board of Trade has appointed a Committee to consider the best means of meeting the needs of British firms after the war as regards financial facilities for trade, particularly with reference to the financing of large overseas contracts and to prepare a detailed scheme for that purpose.

The Committee will consist of :—The Lord Faringdon (Chairman), Mr. B. P. Blackett, C.B.; Sir W. H. Clark, K.C.S.I., C.M.G.; Mr. F. Dudley Docker, C.B.; Mr. Gaspard Farrer; Mr. W. H. N. Goschen; Right Hon. F. Huth Jackson; Mr. Walter Leaf; Hon. Algernon Mills; Mr. J. H. Simpson; and Mr. R. Vassar-Smith.

Mr. Hartley Withers will act as secretary to the Committee.

SHIPPING NOTES.

The steamer Orleanian (2,293 tons gross register), which left New York on December 23, bound for Malta, has not arrived at her destination, and has been reported at Lloyd's as missing.

A message confirming the sinking of the Moeris (3,409 tons) has reached the Moss Line at Liverpool. It adds that three of the crew were killed, Chief-Engineer Smith, Greaser Hunt, and Fireman Brennan. The rest are safe. The Moeris was well known in Alexandria, having been engaged in trade between that port and Liverpool.

The Greek steamer Fofo, which stranded near Corunna last Thursday, has been floated. This is a most unusual success to achieve on the western coast of Spain. The vessel struck the rocks of Carromeiro Chico in Corcubion Bay, while bound from Genoa for Hartlepool with iron ore, some of which had to be jettisoned. The Fofo has been towed to Corcubion Harbour.

EGYPTIAN SHIPPING IN 1916.

According to the shipping returns for the first quarter of 1916, just published by the Ports and Lights Administration—considering the abnormal conditions imposed by the war—the shipping trade may be regarded as satisfactory. In January 95 vessels of a tonnage of 149,774 discharged 90,467 tons of merchandise, the figures of the corresponding period of 1914 being 295 vessels, of 566,142 tons, merchandize 384,194. Passengers this year fell from 9,256 to 710.

In February and March almost the same proportions were maintained, the statistics being (1914 first): vessels, 875, and 265; tonnage, 1,697,174 and 408,745; merchandize disembarked, 1,151,426 and 255,664; passengers, 29,862 and 1,894. These figures do not include transports and military stores, which have led to the greatest activity at Alexandria, Port Said, and Suez; and which have more than compensated for the falling off in the tourist traffic.

As to the vessels passing through the Canal, these totalled 598 ships, of a tonnage of 1,865,715 as compared with 1,323 ships of a tonnage of 4,276,787 in the corresponding period of 1914, military and naval movements not being included.

SHIPPING AFTER THE WAR.

Many French commercial men are imbued with the idea that France will take the place of Germany after the war, so far as shipping is concerned, and many articles have appeared in the Paris Press advocating the adoption of an energetic policy by the French Mercantile Marine. The views of the correspondent of *La Dépêche Coloniale* in the Persian Gulf will, therefore, be read with some little interest :—

"Without a great commercial fleet furrowing the seas of the world, France will experience a thousand difficulties in developing her colonial and economic enterprises," he writes. "Numerous steamers are absolutely necessary to bring about the desired result.

"British shipping has predominated for the past twenty years in the Persian Gulf, the French flag being seldom seen, except in the case of a few sailing ships. Before the war Russian and German steamers came regularly. At the present time Dutch and Japanese vessels frequent the ports. Such a situation cannot be other than regrettable, because the Messageries Maritimes have even discontinued the call at Bombay, which was once so frequent. It is now rumoured in French industrial centres that a French Persian Gulf Company has been formed at Paris, whose objects will be devoted to trade and shipping.

"It is to be noted that the seven ports of the Persian Gulf, so much neglected by us and actively worked by others, are the entry and clearance ports of Eastern and Central Arabia, all Mesopotamia, and three-quarters of the whole of Persia. A purely French firm, having its own steamers, factories, and agents, would make money in these regions, to the benefit of the prestige of France."

The total olive crop for the departments of the Marches, Umbria, Latium, Abruzzi, and Molise, with the island of Sardinia added, was 256,000 metric tons in 1915, compared with 220,000 tons in 1914.

Engineering Notes.

Electricity and Agriculture.

The recently invented electrical process for the destruction of insect and germ life harmful to plants and trees will interest agriculturists, fruit and wine growers in Europe, where, owing to war restrictions, the necessary chemicals for spraying are not to be obtained, and valuable crops are damaged or totally destroyed by various pests. The electrical process takes the place to a great extent of the usual spray and other methods. It consists of applying a solution, say of saline water, to the ground to be treated, and then causing a current of electricity to pass through the soil, whereupon the gas generated will rid the soil of germs, larvæ, and insects without the least injury to vegetation. Where a larger area is involved, it has been found desirable to dig shallow trenches at opposite sides of the area to be treated, and the electric terminals are placed in these. An application of a somewhat more powerful current will rid the entire area of pests.

Propellers' Efficiency.

A very simple, yet most important, device has recently been invented by which the efficiency of propellers for steam or motor-boats can be substantially increased at only a small additional cost. The arrangement consists of putting a tip on the end of the blades of the propeller, the tip being nothing more than a piece of sheet brass brazed on at right angles to the blade, and standing up on the propeller on which the experiments were made to about an inch and a-half at the burrowing point and terminating about one and three-quarter inches long, tapered at that point to nothing. It is claimed that with this device the slip of the propeller is diminished, and that the speed of any relatively small boat can be increased. An experiment was tried on a motor-boat to which was fitted a propeller 16 inches diameter and 24 inches pitch. It is said that a considerable increase in speed in the boat was attained, and the fact that the propeller apparently had no backwash and vibration indicates that the design is on the right lines.

Electric Transmission for Automobiles.

One of the latest improvements in automobiles is an electric transmission system, which seems to possess considerable advantages. With this system the engine fly-wheel, clutch pedal, gears, starting and lighting apparatus, etc., are eliminated. The transmission unit consists of a generator, the field of which is bolted to the engine crank-shaft, and a motor whose armature is attached to the same shaft to which the armature of the generator is fastened, and whose field is stationary. There is no mechanical connection between the rear axle and the gasoline engine, but the torque of the engine is transmitted to the driving axle electrically, and the car is operated through what is in effect a slipping clutch. Instead, however, of wasting in resistances the energy generated by the slip, the power is utilised at intermediate driving speeds. The two armatures are identical, and both are fastened to a hollow shaft, which is attached to the propeller shaft. Change in speeds is accomplished by gradually decreasing the motor-field excitation and finally short-circuiting the generator brushes at high speed. The car is operated by a six-cylinder engine, which is started by the generator operating as a motor and taking energy from the battery. On the first car motion the field windings of the generator are connected through resistance, the control lever being placed in the first position. In the second position the generator field is short-circuited. In the third position resistance is switched into the field coils of the motor, thereby throwing a greater load on the generator, which is equivalent to tightening the magnetic grip on the armature. In the fourth position more resistance is put into the motor-field. In successive positions resistance is added until the seventh (high-speed position), when all the energy generated is utilised to drive the armature. When the car is running the electric transmission acts as a brake as the lever is turned to the neutral position.

The Lower Danube.

The delta of the Danube is enormous. Two of the mouths, in the Black Sea, are sixty miles apart, but only the smallest (the Sulina) is available for navigation. The port of Sulina is the headquarters of the European Commission, which regulates the navigation of the Lower Danube. This Commission was appointed after the Crimean War, when the Danube was thrown open to international navigation, subject to regulations established at the Vienna Congress. The Commission includes representatives of most European Powers, and has jurisdiction from the harbours at Sulina to the Iron Gates; it possesses a regular police, a flag, flotilla, and revenue. Up river, the Danube Steamship Company almost monopolises trade, two other rival companies having met with an untimely end in the Bankruptcy Courts of Bavaria and Hungary. On the Lower Danube English steamers are in the majority, then Greek, followed by Austrian and Italian. An excellent new channel constructed at Vienna has greatly facilitated navigation. This work took twenty-three years to complete, and cost thirty-two million florins.

River Dues.

The navigation dues fixed by the European Commission in 1898 are on a simple and ingenious scale. (1) All men-of-war, vessels of specially small tonnage, and tug-boats not employed as lighters, are exempt from dues: (2) All ships entering or leaving the harbour in ballast pay sixteen centimes per ton register; (3) Vessels unloading or loading at Sulina, or up the river, pay for each ton register on the following graduated scale: From 200 to 400 tons, 55 centimes in harbour or 1 fr. 10 cent. in the river; 400 to 600 tons, 75 cent. in harbour, 1 fr. 30 cent. in river; 600 to 800 tons, 1 fr. 10 cent. in harbour, 1 fr. 70 cent. in river; 800 to 1,000 tons, 1 fr. 20 cent. in harbour, 1 fr. 80 cent. in river; 1,000 tons, and upwards, 1 fr. 25 cent. in harbour, 1 fr. 90 cent. in river. Mailboats carrying passengers regularly pay 60 per cent. less; (4) Every vessel pays full dues on its first voyage each year, and on subsequent voyages only 88 per cent; (5) 100 fr. is charged for each vessel loading in Sulina Roads; (6) Lighters bringing them cargo pay 55 centimes per ton; (7) Every raft or float of timber putting to sea pays according to width and draught of water. These dues pay for all Commission works and improvements for lighthouses, pilotage service in the harbour, and up river to Braela. Companies employing their own pilots obtain a reduction of 20 per cent. on the up-river navigation dues. The revised regulations for the navigation of the Lower Danube were signed by the European Commission of the Danube in the month of November, 1911, and were finally issued on June 17, 1912. No alterations, however, of great importance appear to have since been made, but their revision for the protection of the Allies' trade, and against German projects, would be found to be effective in the forthcoming trade war.

ALEXANDRA PRIZE COURT.

The "Lutzow" (Ex-Cargo).

In the Supreme Court for Egypt, sitting at Alexandria in Prize, his Honour Judge Cator has delivered judgment in a case relating to cargo ex the s.s. Lutzow, the facts being set forth in the judgment as follows:—

These goods form part of the cargo of the German s.s. Lutzow, and are now in course of being sold. They belonged to two partnerships established in the Straits Settlements under two firm names. One branch, known as Rautenberg Schmidt and Co., did business in Singapore; the other, passing as Schmidt Kustermann and Co., traded in Penang. The partners in both firms are identical, and share equally in the profits of both. According to the declaration of Mr. Robert Sturzenneger, who supplies the foregoing information, there are three partners—Mr. Sturzenneger himself, a Swiss subject, resident at Scaffhausen, in Switzerland; Martin Suhl, described as of German nationality, born in Singapore and resident in Singapore and Penang for about twenty years, who is now interned as a prisoner of war in Australia; and Max Hasche, of German nationality, born in Penang and resident in Hamburg since 1909.

Assuming that Suhl, though born a British subject, has become German in the eye of the law, and has since acquired a trade domicil in British territory, and that the partners only do business in the Straits Settlements, prize law will deal with the property of the partnership as follows.—The share of Sturzenneger will be released to him as a neutral, resident in a neutral country. That of Hasche falls to be condemned as the property of an alien enemy, while that of Suhl, who is in a similar position to Hehlen in the Clan Grant case, will escape condemnation by reason of the fact that, although an enemy, he has a British commercial domicil.

The President of the English Prize Court has dealt with this branch of prize law so fully in the "Clan Grant" case (I. Trehern, 272) that it is quite unnecessary for me to travel over the same ground, and on the general subject of commercial domicil I have nothing to add to what I said in the Knauf case.

But the Procurator has raised a further question, which, so far as I know, is not covered by any direct authority. He contends that an enemy holding an interest in a house of trade in the enemy country is debarred from all benefit to which he would be otherwise entitled by reason of a commercial domicil in British territory. And he submits that in all probability Suhl is a partner in a firm which trades in Hamburg, for, on letter paper of his firm at Penang, below the words Schmidt Kustermann and Co., Penang, are printed in somewhat smaller characters the words Kautenberg Schmidt and Co., Singapore, and Schmidt and Kustermann, Hamburg.

Before I deal with this contention there is one point in relation to domicil that I wish to make quite clear. As I understand the law, a commercial domicil can only attach to individual traders. It can never be acquired by a partnership or house of business; and even when it becomes necessary to attribute a domicil can only be a civil or a quasi civil domicil, as described by Dicey in his "Conflict of Laws," and never the commercial

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. domicile known to prize law. The distinction is of no consequence in the case of a partnership doing business only in an enemy country, and it might be immaterial in other cases if we released all goods attributable to a house of trade situate in British or neutral territory without inquiring into its constituent elements. But as we probe into its constitution, and make the release of goods depend upon the personal domicil of the individuals who compose it, clear thought demands that we should not attribute to a firm a quality which is only applicable to its members.

To deal now with Mr. Suhl's case. For the sake of argument, I will assume that the composition of the three firms trading in Penang, Singapore, and Hamburg is identical. Why should this affect Suhl's interest in goods attributable only to the Penang and Singapore houses? It seems to me that I can labour under no greater disability than his enemy character; and as that does not disentitle him to the advantage which, by the indulgence of our law, attaches to his commercial domicil in British territory, I think he can incur no further or special disability because he is also a member of a firm which does business in an enemy country.

The root idea of commercial domicil in any country is to place its possessor on the same footing as subjects of that country in regard to his business carried on there; and if a interest in a foreign house is to taint Mr. Suhl's share of a business in British territory, it seems to me that the Court will have to confiscate Mr. Sturzenneger's share on similar grounds, and would have to mete out the same measure even to a British partner resident in British territory if such there were.

Given that Mr. Suhl can establish a British trade domicil, I think the Court is not concerned with the nature of any of his trade interests elsewhere. But whether he has, in fact, such a domicil is another question, and the probability that he is a partner in a Hamburg house justifies a very minute inquiry as to his status in the Straits Settlements. The affidavit of Mr. Sturzenneger on this point does not satisfy me, and I must have evidence from a responsible British source as to his establishment, habits, and movements during the past few years, including the number and nature of any absences from the colony, coupled with an explanation of his internment in Australia.

Even if he can establish a commercial domicile in British territory, Mr. Suhl must not expect that his share will be released to him personally. I should propose to deal with it as I dealt with that of the claimant in Knauf's case, by carrying it to a special account in the Court books. But this is a question which can be discussed if and when Mr. Suhl satisfies the Court that he has British trade domicil, and the case must be adjourned for the production of the further evidence that I require.

I release the share of Mr. Sturzenneger as a neutral, and confiscate that of Max Hasche as an alien enemy.

"FUEL IN TURKEY."

Owing to pressure on our space, we have been compelled to hold over until next week the final instalment of Mr. Leon Dominian's paper which is to be read at the Arizona meeting of the American Institute of Mining Engineers in September.

COMPANY REPORTS.

Anglo-Egyptian Oilfields.

The report of the Anglo-Egyptian Oilfields, Limited, for 1915 states that the total production was 34,961 tons of oil. Although the production was again insufficient to provide full employment for the refinery, the directors were able to arrange to work crude oil and distillate imported from other sources, for the refining of which £31,988 was received. The directors regret to report that the efforts to recover the production of the Gemsah wells Nos. 10 and 13 have resulted only in an intermittent production. At Hurghada, well No. 1, which became plugged with sand in October, 1914, was reopened in March, 1915, and produced until the end of April, when it ceased flowing. Since then a small, but regular, production has been pumped out of this well. Well No. 3 kept up a steady production during the whole of the year. In well No. 7 a strong gusher was struck in November, 1915, accompanied by much sand and mud, which periodically blocked the well. All efforts were made to obtain a regular production, and since February, 1916, the well has been flowing steadily at the rate of about 56 tons a day. Several new wells were started in 1915 at Gemsah, two of which have reached depths of 2,027 ft. and 2,370 ft. respectively, and at Hurghada, but none of them have yet reached a productive stage. At Dish tel Taba, which lies to the south of the Hurghada field, granite was reached in the only well commenced, making the prospects hopeless, and it has been decided for the present not to drill further in this territory. The war very greatly increased the cost of materials and stores required for the refinery and for the fields, and it has often been difficult to obtain the requisite supplies. The oil products were readily sold by the Asiatic Petroleum Co. (Egypt), Limited, at gradually rising prices, which to some extent compensated for the increased costs of production and refining. The receipts have been sufficient to enable operations to be continued without calling upon the shareholders for further capital, as was contemplated towards the close of last year. The Egyptian Government have expressed their appreciation of the arrangements which the company has been able to make; while the cordial relations prevailing between the Government and the company have rendered it unnecessary to send out a special representative, as was announced in a circular issued to the shareholders on October 15 last. The congestion at the North Basin, Suez, referred to in the report for 1915, was unfortunately continued during the year under review. Meeting, Winchester House, July 13, at 2.30.

United Egyptian Lands.

The report of the United Egyptian Lands, Limited, for the year ended March 31 states that on the Kom El Akhdar property the cotton grown by the purchasers of land and by the tenants has again been affected by the pink bollworm, and the crop only amounted to 1,200 cantars. This explains the increase in the arrears due by the purchasers, whose accounts have been charged with about £600, the expenses incurred in having their contracts transcribed at the tribunals. The supply of water for the property was insufficient, and on this account nearly 800 feddans remained idle which otherwise would have given crops. Steps have been taken to improve the supply of water, and it is hoped that this question of irrigation, which is so important, will shortly be settled in a way beneficial to the property. The revenue of the property has only been sufficient to leave a small balance after meeting the ordinary expenses, and in consequence the arrears due to the Mortgage Company of Egypt, Limited, under the two loans have considerably increased. The profit and loss account shows a loss of £E1766,682 m. The directors, however, point out that this account has been charged with the interest (£E1816,670 m.) due under the supplementary loan which was granted for the reclamation of "boor" lands, and which in previous years has been added to the cost price of the lands. No work in the nature of reclamation has been carried out on these lands during the last two years. The management of the properties continues in the hands of the judicial receiver with the approval of the secured creditors.

Malta and Mediterranean Gas.

The report of the Malta and Mediterranean Gas Company for the year ended March 31 shows that the balance of the general revenue account is £6,388. The directors recommend a dividend of 4 per cent., free of tax, on the ordinary capital, making 6 per cent. for the year, leaving £1,211 to be carried forward. Meeting, 11th instant, 11.30 a.m., 59 and 60, Gracechurch Street, E.C.

COMPANY NOTES.

Meetings.

Anglo-Egyptian Oilfields. — The annual general meeting will be held at Winchester House, on July 13, at 2.30 p.m.

Carmanian Iron Corporation.—The ninth ordinary general meeting will be held at 56, Cannon Street, London, E.C., on July 10, at 3.15 p.m.

Greek Iron Ore Corporation.—The eighth ordinary general meeting will be held at 56, Cannon Street, London, E.C., on July 10, at 3 p.m.

Alexandria and Ramleh Railway Co., Limited.—Dividend of 4s. per share, payable July 1 at the company's office, 17, Boulevard de Ramleh, on presentation of Coupon No. 13.

Dividends, etc.

Egyptian Markets.—Final dividend of 6 per cent., payable on and after June 30 at the Anglo-Egyptian Bank, Clement's Lane, London, E.C.

Port Said Salt Association.—Dividend of one shilling, payable at the office of the Credit Lyonnais, Alexandria, July 1, on presentation of Coupon No. 14.

Roumanian Consolidated Oilfields.—Warrants for debenture interest for the half-year to June 30 have been posted.

Messrs. R. Raphael and Sons notify that the coupons and drawn bonds of the Piræus, Athens and Peloponnesus Railway Three per Cent. bonds, due on July 15, will be paid on and after that date at their office, Austin Friars House, E.C.

General.

Anglo-Persian Oil.—In reply to a member, the Under-Secretary for Foreign Affairs stated in the House of Commons, last week, that he would cause a copy of the accounts of the Anglo-Persian Oil Company, with the directors' report and balance-sheet for 1914-15, to be presented to the House of Commons. He said that the report and accounts for the year 1915-16 were still under preparation.

Sudan Plantations.—Speaking on June 29 at a meeting of the Central Mines and Investment Corporation, Limited, Sir Lionel Phillips said that the prospects of the Sudan Plantations Syndicate, Limited, might be considered satisfactory. Negotiations with the Sudan Government in connection with the development of the Gezira Plain would, he believed, shortly be resumed.

A decree passed recently by the Council of Ministers authorises the organisation of a new company, called "The Egyptian Land Company."

Oil Outputs.

Anglo-Egyptian Oilfields.—Gemsah production for week, 100 tons (last week, 12 tons). Hurgada production for week, 436 tons (last week, 428 tons).

Baku Russian.—Week ended June 24: 83,300 poods.

Bibi Eibat.—Week ended June 18, 61,867 poods; week ended June 25, 62,000 poods.

British Maikop Oil.—Production last week, 2,613 poods (about 42 tons) crude oil.

European Oilfields.—Week ended June 25: 106,000 poods.

International Russian.—Production well on plot No. 107, four weeks ended June 24: 9,110 poods.

Lobitos Oilfields.—Production for June, 7,282 tons.

Maikop Pipeline and Transport.—Received for pumping, week ended June 17; 23,811 poods; week ended June 24, 49,979 poods.

North Caucasian.—Week ended May 24-June 6, 347,736 poods; week ended May 31-June 13, nil; week ended June 7-June 20, 287,634 poods. (Note.—Production was interrupted for about a fortnight by a strike at Grosny, which has now been settled.) Week ended June 14/27, 587,457 poods.

Roumanian Consolidated.—Week ended June 24: 739 tons.

Spies.—Week ended June 25: 133,750 poods (including 12,150 poods from ambars). Total, 4,045,515 poods, against 6,555,470 poods.

Ural Caspian.—Week ended June 22 141,142 poods.

Serbia, Montenegro, and the occupied part of Albania are now officially described in Austria-Hungary as "the occupied Slav Provinces." Engineers and surveyors have been instructed to prepare the plans of a net of railways, the building of which it is proposed to start immediately. The three lines will (1) lead through Bosnia and the Drina Valley, continue through Northern Albania, and terminate at Avlona; (2) connect Uskub with San Giovanni di Medua, and (3) continue the existing Salonika-Monastir Railway, *viâ* Resnia, Ochrida, and Ljes to Avlona. The concessions have been granted to a Hun banking syndicate, led by the Deutsche Bank of Berlin. These railways are to "constitute a new trade route to Egypt and North Africa."

The following statement, dated July 5, has been circulated:—The attention of the Roumanian Consolidated Oilfields, Limited, has been called to a paragraph which appears in numerous newspapers to-day to the effect that the Central Roumanian Petroleum Company in Roumania has received orders immediately to discontinue the export of petroleum to Germany and Austria-Hungary. The Roumanian Consolidated Oilfields wishes to point out that it acquired over three years ago the undertaking of the Central Roumanian Petroleum Company, and that there is no foundation whatever for the statement so published in the Press. The Roumanian Consolidated Oilfields has during the war neither sold nor exported any portion of its output to any enemy country.

SUEZ CANAL DUES.

A further rise of 50 centimes (5d.) per ton in the Suez Canal dues is announced to take effect as from October 5, bringing the rate for laden ships to 7 frs. 25 c. (6s.) per ton, and for ships in ballast to 4 frs. 75 c. (3s. 11d.) per ton. The dues were raised as from April 1 last by 50 centimes, and the possibility of the present increase was mentioned at the annual meeting of the company held in Paris early last month. It was then pointed out that in consequence of the war the transit receipts last year declined by nearly 24 per cent. and the total receipts by nearly 27,000,000 frs. (£1,080,000).

In the years immediately preceding the war there was a steady reduction of the dues, and the increase now announced will raise the rates to the level of 1911.

CANAL RECEIPTS.

The Traffic Receipts of the Suez Canal have been as follows on the days named:—

	1915. Frs.	1916. Frs.

NOTES OF THE WEEK.

Greece does not seem destined to find the path leading back to a real constitutional régime a particularly smooth one. German intrigue has received a decided setback as a result of the firm action taken by the Allies, but it has by no means been eliminated. The Minister for War has found it necessary to issue a further order to the army prohibiting all officers from taking any part in political questions. But the influences at work may be clearly seen in the speech, quoted in these columns last week, which Prince Andrew saw fit to address to certain reservists on the occasion of their disbandment. He deliberately encouraged the soldiery to think politically, if not unconstitutionally. It is now announced that Prince Andrew and his elder brother, Prince Nicholas, have left suddenly for Denmark and Petrograd on a visit to their mother, the Queen Dowager Olga, who resides in Russia. Their tour, it is to be hoped, will enable them to envisage Greek politics from a broader point of view than they have been able to acquire at Athens.

The situation in Greece has been well summed up by the Russian Minister at Athens, who speaks of the two opposing sections of the Greek Press being busily engaged in digging the gulf deeper between the citizens of Greece. This moment in the world crisis, he points out, has been badly chosen for such a fratricidal campaign, for it is a time when every effort should be made for conciliation and enlightenment and real mutual understanding. Almost identical words have been used in these pages, in which it has been frequently contended that throughout the whole controversy the Allies have never once lost sight of the real interests of Greece. The régime instituted by the Gounaris and Skouloudis Cabinets, under which espionage was rampant and free speech and constitutional liberty were suppressed, could never be in keeping with Hellenic interests; it relied solely upon German support, financial or otherwise, for its continued existence. The Allied Powers insist upon the elimination of German intrigue, not the substitution of their domination for that of Germany's. They have no wish to interfere in Greek affairs, but could not stand by and see Germany taking charge of them. They invite the Greek people to resume control of their own affairs in their own interests. Now that the Allies have had to resort to the drastic measures entailed in the ultimatum presented to the late Greek Government, it would be inconsistent on their part to shrink from further interference, if necessary, to prevent the good so far accomplished from being undermined by a few Greek henchmen of a German paymaster.

On the other hand, no opportunity should be lost of refuting the assertions of the small clique of unfriendly Greeks that the Allies are set upon making themselves masters of Greece much in the same way as Germany has taken control in Turkey and Bulgaria. For this reason it is satisfactory to learn that the Greek officers at Salonika who were arrested for assaulting the editor of a Venizelist newspaper are to be handed over to the Greek authorities. It seemed likely at one time that the French might insist upon their rights in this matter, especially as the incident is typical of the attitude of mind of some of the officers of the Greek Army, who affect not to acquiesce in the Allies' occupation of Salonika. But when once French authority has been vindicated and the offenders placed under arrest, it is a tactful course to adopt to show confidence in the new Greek Government by handing over the officers to be dealt with by their own military authorities.

The Turks have so far not been able to get at grips with the Arab revolt, primarily owing to the sound tactics adopted in tearing up some hundred miles of the track of the Hejaz Railway. Meanwhile, the Arabs are making the most of the respite, and the movement is spreading. To the south of Mecca the Idrissi of Asir, who has been the object of several unsuccessful Turkish expeditions in the past, has made common cause with the Grand Shereef of Mecca, and has captured the town and fort of Kunfidah on the Red Sea, taking prisoners the garrison of eight Turkish officers and 190 men. It it reported that the Arabs as far north as Damascus are standing in with the Grand Shereef. If their support should take a practical form, the difficulties of the Turks in conducting operations in the Hejaz will be considerably enhanced. The Allies have a strong interest in taking measures to prevent the free movement of Turkish troops towards Medina. If they are unable to interpose any force in the way of the Turks and cannot hope to distract their attention by an attack elsewhere, it should at least be possible to supplement the damage already done to the Hejaz Railway by air-raids from suitable points on the Red Sea coast.

We welcome the signs of growing impatience over the Mesopotamian campaign, while regretting that there should be any cause for it. On another page we deal with the political importance of these operations, and suggest reasons why Great Britain cannot afford to allow

Digitized by Google

the war in this part of the world to have an indeterminate conclusion and to be decided by the course of events in Europe. Criticism in Parliament and the Press is still inclined—not unnaturally, it must be admitted—to harp upon past shortcomings in the conduct of the expedition, under the uncomfortable suspicion that the conditions under which the force is still fighting leave much to be desired. There is reason to suppose that the whole equipment of the expedition has been at fault from the very beginning. In these circumstances the delay in publishing the despatches of the different Commanders-in-Chief and the report of the Commission appointed to inquire into the medical arrangements is particularly to be deplored. The Government cannot be surprised at the public showing a disposition to dictate how this campaign ought to be conducted in the face of its own inability to make up its mind on the subject. Any hope based on the transfer of the campaign from the charge of the India Government to that of the War Office have so far been disappointed. The same lack of interest seems to brood over the expedition, finding expression in the absence of reports and in the failure to extract despatches from any of the General Officers who have held command at one time or another, or to compel the two medical authorities entrusted with a special inquiry to submit their findings within a reasonable time.

According to information received by the *Russkoe Slovo* from Teheran, German agents are again showing activity in Persia. The news dates from June 21, and speaks of well-armed bands of Persian horsemen, recruited from the nomadic tribes, being mobilized with a view to taking the Russians in the rear as they advanced on Baghdad, while the Turks attacked them in front. There would seem to have been some miscarriage of the plan, for at the time when the horsemen were ready to strike the Turks were not in a position to play their part. Accordingly the Persians turned their attention to promiscuous brigandage, and are said to have started operations in the territory between Ispahan, Teheran, Sultanabad, and Kermanshah. The Russians have been successful in their first encounter with the tribesmen, but it is probable that the existence of these bands has helped to bring about General Baratoff's rather rapid withdrawal from the Turco-Persian frontier. In these circumstances it is perhaps fortunate that the original Turco-German scheme of a simultaneous attack on the Russians from the East and the West miscarried. The absence of news from Persia had encouraged the belief that the Russians had the situation well in hand. It is to be feared that the German agents profited from the lack of co-ordination between the Russian and the British authorities. When the former became too active for their peace of mind they escaped to Southern Persia. By the time the British were ready to deal with them the Russians had relaxed their hold on certain districts in the northern sphere in order to place as many troops as possible under General Baratoff's command. If the work of clearing Persia of Turco-German agents has to be carried out again, care should be taken that the Allies move simultaneously in their respective spheres.

The report of a rising in Montenegro, to which reference was made last week, finds confirmation in the advices received in Serbian circles at Salonika, according to which local insurrectionary movements have sprung up both in Montenegro and in Serbia. For the moment, however, it is not clear whether General Vechovitch, a former Minister of War, whose name was connected with the rising in Montenegro, is at the head of it. A *communiqué* issued by the Austrian Government admits that General Vechovitch is "at large," and that a price has been put upon his head; it is added that he is believed to have escaped into Serbia. According to the Austrian version, which makes no reference to a general rising in Montenegro, it was found necessary in the middle of June "to deprive General Vechovitch of all opportunity of exercising an unfavourable influence on his own countrymen." He was, therefore, summoned to leave the country and take up his residence in Austria-Hungary. General Vechovitch's reply to this summons, according to this statement, was to assassinate the bearer and then take to flight. All the male members of his family who had not previously fled were seized as hostages. It is, of course, impossible to place absolute reliance upon the Austrian version. The one fact that emerges from all the evidence is that conditions in Montenegro are desperate. A rising, however, would seem to have little chance of success, unless the Austrians had very materially reduced the strength of their garrison in the country. Even so, they will be in a position to suppress any movement before help can reach it from the outside world. A later report speaks of Cettinje having been burned by the Austrians. We must wait for confirmation of the statement before its accuracy is accepted. In any case there would seem to be good reason for pushing on with any arrangements that can be made for conveying relief to the destitute population of Montenegro. The view of the British Government is that, as far as official action is concerned, the matter is entirely in the hands of the Italian Government. Funds would, no doubt, be forthcoming from Great Britain, but Italy would have to make herself responsible for the distribution.

It was a happy inspiration to commemorate by a service in St. Paul's Cathedral those who have fallen during the present war in the defence of Serbia—Serbians and British, soldiers, doctors, and nurses. The chivalrous and philanthropic instinct of the British race makes no distinction between our Allies; its help is given to all alike according to their need and to the utmost of its power. But there are special reasons why the country should show how deeply the plight of Serbia has appealed to it. Belgium was overwhelmed before it was possible to strike an adequate blow on her behalf. The Allies, however, had ample warning of the fate in store for Serbia; but they failed to make the effort for her protection in time. Not until Serbia was almost entirely overrun did an Anglo-French force land at Salonika; its presence in comparative idleness at that port ever since has served to emphasise the failure to relieve the Serbians, for it has not yet found any other real work to do. Serbia, therefore, has been the victim of circumstances not altogether beyond the control of the Allied Powers. She is entitled to special consideration at the hands of the country whose Government pledged itself to give her support against an Austro-German invasion. The service at St. Paul's Cathedral told of a general appreciation of her peculiar position in the hearts of the Allies, and was an earnest of the resolve to see that the Serbians shall one day come into all that they have a right to consider their own.

The recapture of Mamakhatun, south-west of Erzeroum, indicates that the success registered by the Russians over the Turks last week in this sector was something more than a temporary check of the enemy's advance. It is more than six weeks since Mamakhatun fell into the Turks' hands, and its capture merely marked a fresh stage in the steady pressure which was forcing the Russians back towards Erzeroum. The latest *communiqués*, however, point to a very decided recovery on the part of the Grand Duke Nicholas's army. In the fighting between July 2 and July 8 the Turks lost 1,800 prisoners, while it is reported that large quantities of arms and ammunition mark the line of their retreat. It is to be hoped that the Russian success is the result of the arrival of considerable reinforcements, which will once more allow the Allies to advance on Erzinjan, and prevent the Turks from detaching any troops from this part of Asia Minor for service elsewhere. Signs that the Turks are feeling the stress of war continue to multiply. The process will be accelerated, if greater pressure can be brought to bear upon them simultaneously on every front. At the moment it has to be admitted that Great Britain is not pulling her weight in the Allied boat, as far as the war in this part of the world is concerned. Except in Mesopotamia, victory over the Turks may not be an end in itself; but it will prove of the utmost importance, if it results in detaching Turkey from Germany and deprives the Central Powers of the moral support they derive from the adhesion of the Bulgarians and Turks.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 29.

The Heat Wave.

We have for the past fortnight been in the throes of a heat-wave. A marked improvement has taken place this last day or two; fortunately so, for the conditions—intense humidity with an abnormally high temperature—were becoming almost more than even the most hardened old stagers could bear. Usually the great consolation during periods of protracted heat is that we are suffering for the good of the country; for high temperature, especially when it continues after sunset, promotes the growth of the cotton plant. This year, however, we are not quite certain that there will be this compensation for the discomfort we have suffered, as the high temperature was accompanied by excessive humidity, and the dread cotton-worm flourishes in direct proportion to the rise in the percentage of the latter.

The Mecca Revolt.

The news of the revolt of the Shereef of Mecca was very well received out here. Certainly no event since the outbreak of war has created such a state of suppressed excitement. Amongst the local elements the only ones who are at all worried or perturbed are the Nationalists, who are nowadays all Turcophile, and the Turkish students at Al Azhar. They realise that whether the movement succeeds or not the bottom will have been knocked out of the attempt made by Enver and Co. to proclaim a "jehad," and that the Moslem world will now begin to think that all is far from well with the administration of the Turkish dominions, especially the Holy Places. Except for that dissentient element, Egypt is quite sympathetic; indeed, some sections of the indigenous community are manifestly rejoicing. At Al Azhar the Syrians and Mesopotamians plumped unanimously for the Shereef, and it is a remarkable thing that outside Syrian Christians as well as Moslem Christians expressed delight at the movement. That may, perhaps, be understood, because it is a movement in the direction for which all Syrians have been agitating for some time—the autonomy of the Syrian vilayets, or, at any rate, their decentralization, from Constantinople—and they feel that it brings their desire within sight. The other elements in the world-famed University expressed lively sympathy with the Shereef, whilst the Egyptians, with characteristic caution, are disinclined to declare themselves until they see how the revolt progresses. At this early stage, then, in the proceedings at least 60 per cent. of the thinking population is openly for the Shereef; 30 per cent. is inclined to "wait and see," but quite prepared to support the movement as soon as it shows signs of success; and the remaining 10 per cent., being by nature Turcophile, is hostile. In these circumstances the course of events in Arabia is being anxiously watched; more especially will this be so as the time for the pilgrimage approaches, for the safety of the road to Mecca and Medina is entirely contingent on the re-establishment of the "gendarmerie," which the Shereef is striving to effect, and which must be directly dependent on the success of his armies in clearing all the elements hostile to his movement out of the districts in question. It is not quite clear whether the only two other chiefs who count in Arabia—Imam Yahya and Seyd Idrissi—have declared for the Shereef; but it is felt that, even if their traditional jealousy of one another and of all other rivals for supremacy prevents them joining hands with Shereef Hussein, their desire to seize this opportunity to strike a blow for their own interests will cause them to make a decision helpful to the Hejaz revolt.

Educational Reforms.

Following on the suppression of the Primary Certificate, owing to its unsatisfactory effect on the standard of work done in the primary schools, the Ministry of Education has introduced a further excellent reform by establishing what are to be known as "Higher Elementary Schools." These schools, broadly speaking, are to stand to the Maktabs in much the same relation as the secondary stand to the primary schools, and are intended to provide boys leaving the Maktabs and having no intention of continuing their studies after their fifteenth birthday with a more practical education than has in the past been afforded by the primary schools. The latter were the only "finishing" institutions open to Maktab pupils, but as they served merely as a preparatory course for the secondary schools they were not of much real utility to those pupils. In addition to this, the style of instruction given in them tended to imbue their pupils with an inclination towards clerical as opposed to agricultural, commercial, or industrial employment.

The "Higher Elementary Schools," from the nature of the scheme of work laid down for them, ought effectually to put a stop to this regrettable tendency. They are to be divided into urban and rural schools. In both categories Arabic will be the sole medium of instruction, and the usual school subjects will be taught. For the urban schools, however, lessons will also be given on materials, machines, and manufactures, and a large amount of training in manual occupations will be afforded the pupils; whilst the course in the rural schools will comprise, in addition, lessons in rural science and nature-study, practical agricultural work, and a certain amount of rural training. Each school will have a workshop attached to it, and, in addition, a plot of land will be allotted to each rural school, to enable the pupils to study and receive practical instruction in the various phases of country life.

These schools are not intended to turn out craftsmen or farmers, *quâ* such. Their object is to develop the minds of the pupils on practical, as opposed to the purely intellectual, lines to which the system hitherto existing has necessarily confined itself; to cultivate the "thinking hand"; to give them a more self-reliant outlook on life; and to develop the all-round capacities of the pupils, so that they will the better be fitted to carry out whatever work they may be called upon to do in after-life. The institution of these new schools is a laudable attempt to grapple with what threatens to become a serious problem, and it should go a long way towards stopping the swelling of the ranks of aspirants for purely clerical, and notably Government, employment, to the detriment of commerce, industry, and agriculture, which has of late years been an unfortunate feature.

Simultaneously it has been decided to establish a certain number of Higher Elementary Schools for girls. Many girls remain on at the Maktabs either because they are too young to enter one of the training colleges or because their parents, while not wishing them to proceed to one of those institutions, do not want them as yet to leave school. It is obvious that these girls are wasting valuable time, and the Ministry of Education has decided to transform certain of the girls' Maktabs into Higher Elementary Schools, where girls who have completed their Maktab course will receive practical instruction in domestic service and hygiene. They will thus have received a thorough grounding in these very necessary subjects by the time they are eligible for the training colleges or, more important still, when they return to their homes. This may be regarded as a further important step in the extension of female education in Egypt.

The Coptic Community.

During the past few weeks a certain amount of restlessness has been noticeable in the Coptic community. The cause is a grievance of long standing, going back as it does to the days of the late Riaz Pasha—the attitude taken up by the Patriarch in the matter of the internal affairs of the community. There has always been much discontent on the part of the majority of the laity at the manner in which these affairs, especially the Coptic Wakfs, have been handled. Up to about ten years ago everything was in the hands of the Patriarch. At that date, owing to the consistent complaints that were publicly registered, a body called the "Meglis Milli" was formed at the instigation of the then Prime Minister, the Copt Butros Pasha Ghali, to deal with matters of personal status, education, and Wakfs, an undertaking being, however, given to the Patriarch that the Meglis should not interfere with any of the Church Wakfs. The Patriarch, who resented this action, soon began making difficulties, and for five years very little progress was made. At last in 1912 new elections to the Meglis Milli were ordered, and it was arranged that it should restrict its activities to education and matters of

Digitized by Google

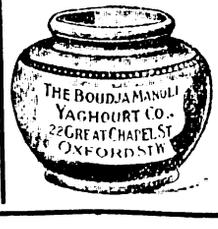
personal status, leaving all the Wakfs, private as well as Church, to the Patriarch. Still the latter was not satisfied, and continued energetically to obstruct the work, even going so far as to lock the doors of the council chamber, so that the Meglis could not meet. Complaints were made to Lord Kitchener, and at his instigation an effort was made to bring about a settlement. Unfortunately, the war intervened, and the negotiations lapsed.

What has now caused a resuscitation of the agitation is a somewhat scandalous matter concerning one of the principal monasteries. The abbot in charge was suspended some time ago by the Patriarch for having misappropriated a large sum of money belonging to the Wakfs attached to the monastery. This action pleased the laity, for, knowing all the facts, they thought they saw in it an indication that a change for the better was coming over the attitude usually adopted in such matters by the Patriarch. Judge, then, of their horror and disgust when about a month ago they learnt that the abbot had been restored to favour and reinstated without any explanation being vouchsafed. The monks of the monastery, who knew even better than the community what irregularities had gone on, were loud in the expression of their indignation, but the agitation proved unavailing.

The lay Copts consider this a good case on which to base the renewal of their claim for complete reform in the administration of their internal affairs. They demand that the jurisdiction of the Patriarch shall be confined to purely ecclesiastical matters, and that the Wakfs—which are worth £E1,500,000, with an annual income of £E100,000—as well as education and questions of personal status, shall be dealt with by a special office or administration, with a consultative council, and with direct responsibility to a high Coptic official appointed by the Government. In other words, they want an organisation to be created on the lines of the Ministry of Wakfs.

There is a good deal to be said for these demands. It would be only right that the community should have some regular and impartial channel through which questions of personal status could be settled satisfactorily. It is also only right that the community as a whole should benefit from the Wakfs belonging to it and left by its members, and that it should have some means of assuring itself that the funds are properly administered. At present no account of the administration of these Wakfs is rendered to anyone but the Patriarch, who is a very aged gentleman, entirely in the hands of his entourage, and no useful expenditure is made of the income, which apparently is either hoarded or swallowed up by the upkeep of the estates and the monasteries. If the Wakfs were administered by a responsible board it would be possible to do a lot of good work within the community and to extend education. Incidentally, it would be possible to create what the laity has long clamoured for—a college for the training of the Coptic clergy, who at the present moment, with a very few exceptions, are amongst the most ignorant members of the community, and whose low intellectual standard is resented by the mass of Copts as being inconsistent with the dignity of the great Church to which they belong.

Meetings have been held by prominent Coptic laymen and resolutions have been passed calling for the intervention of the Egyptian Government. Whilst, however, the community is at one on the point of the necessity of reform on the lines mentioned above, it appears unfortunately to be divided into two distinct parties in so far as concerns the putting into effect of this reform. One faction, consisting mainly of the older members, who remember the failure which their efforts encountered in the past, considers that as the chief obstruction, the Patriarch, is an aged man, and cannot have much longer to live, it would be wiser and safer to wait to introduce the reforms until a successor has to be appointed. The other faction, consisting of the younger members, thinks that immediate action should be taken. They say that they have already been put off for several years by the argument that the Patriarch has not long to live, and that they may quite possibly have some considerable time yet to wait before he goes the way of all flesh. In the meantime more wastage of funds will take place, and they point to the monastery scandal as an illustration of the danger of further procrastination. It is obvious that in these circumstances the Egyptian Government can take no notice of any petitions submitted to it. It could only intervene if it were requested to do so by the lay heads of the community and if it were assured that its efforts would meet with the active support of all elements of the laity. Until, therefore, the young Copts can persuade their elders to join hands with them in their appeal for immediate intervention it is to be feared that no outside assistance can be afforded the Coptic community.



THE WORLD-FAMOUS
YAGHOURT
may be obtained, in 6d. and 1s. jars, of
MANOLI-CORBETTI,
22, Great Chapel Street, Oxford Street.
Also LEVANT PRODUCE:
Tomato Paste, Black Olives, Locoums, Bamias, &c.
Recommended by Mrs. Frank Barker.

SUDAN MISSION TO LAKE TSANA.

(From a Correspondent.)

After an absence of some months, the Special Mission despatched by the Sudan Government to Lake Tsana for survey purposes, under the command of Major Hugh Drummond Pearson, R.E., Director of Sudan Surveys, has returned to Khartoum, having, it is understood, successfully accomplished its object. The party included Mr. A. B. Buckley, inspector of the White Nile Division of the Egyptian Department represented in the Sudan in connection with the Gezira canalisation scheme, Mr. O. L. Prowde, of the Egyptian Irrigation Service, and Major Thomson, R.A.M.C., who is stationed at Roseires, in the Province of Sennar.

Lake Tsana, also known as Tana and Dembea, is an immense sheet of water in Abyssinia, crossed by 120 deg. N. lat., 20 m.s. of Gondar (the Abai, or Blue Nile, issuing from its side) and having a superficial area of some 1,200 square miles. Although the sources of the Blue Nile, the river which gives its name to one of the most prosperous provinces of the Anglo-Egyptian Sudan, and which was for a long time considered as the main river, were, as early as 1770, discovered by Bruce to be Lake Tsana, to this day the actual course of the Blue Nile between the lake and Famaka (on the Abyssinian-Sudan border) has never been accurately laid down. But enough of it is known to enable it to be said that the Tsana lake has but a small influence upon the Blue Nile water supply at any period of the year. This river is at its lowest in the month of May, when its discharge at times shrinks to practically nothing. It begins to rise in June, and attains its maximum about the end of August. The lake itself is surrounded by picturesque mountains, which, on a fine day, can be distinctly seen from Gallabat, where the Anglo-Egyptian joint flags were hoisted on December 7, 1898, by Colonel Collinson, C.B., although the Abyssinian flag was already flying on the fort there.

Lake Tsana, which is at an altitude of 5,700 ft. above sea level, and has a length of forty-five miles, receives the waters of the Blue Nile after flowing northwards at its south-west corner. Between the lake and the mountainous regions beyond rises the Rahad river, which, taking at first a northerly direction, after entering the Sudan, flows generally north-west in an extraordinarily winding bed to its junction with the Blue Nile, almost opposite the town of Wad Medani.

In the treaty made between Great Britain and the Empire of Ethiopia (or Abyssinia) at Adas Abeba, on May 11, 1902, it is agreed, in Article III., that "the Emperor Menelik II., King of Kings of Ethiopia," is not to "construct or allow to be constructed any work across the Blue Nile, Lake Tsana, or the Sobat River which would arrest the flow of their waters into the Nile, except in agreement with his Britannic Majesty's Government and the Government of the Sudan." It is hardly necessary to point out that this agreement is of the first importance, since whatever projects may be hereafter decided upon in connection with irrigation in the Sudan, it is clear that it is to the Blue Nile that the Sudan must look for its great Gezira scheme of irrigation, the White Nile being already ear-marked as the source of increased water supply for Egypt. It is not at present feasible, for political reasons, to adopt any scheme having for its object the formation of a reservoir at Lake Tsana.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, June 22.

The Allies' Demands.

June 21/9 will remain a memorable date in the history of Greece. Since the Western Powers put pressure on Greece, through her shipping, without informing her of the reasons that led them to take that course, and since their Ministers in Athens avoided any contact with M. Skouloudis, the Government had begun to realise that its position was very unsafe. That was why it proceeded, in the first place, to a partial demobilization; next, proclaimed a general demobilization; and finally, having been informed by the Legations in Paris and London that the measures taken and announced were aimed chiefly against itself, and that very severe pressure would be exercised by the three Protecting Powers of Greece, it decided to give in its resignation the day before yesterday (Tuesday). The Allies' Note was to have been presented this morning, but as the result of instructions received from Paris and London it was delivered yesterday at 1 p.m. to the Director-General of the Ministry of Foreign Affairs, M. Politis, and was at the same time published in Greek in the newspapers and distributed at various points in the city. Although the public had been more or less expecting very stiff demands, the contents of the Note, and especially its character of an ultimatum, caused a species of panic, in view of the consequences that might follow if the Government—and especially the King—should refuse to submit. The public excitement was increased by the dispatch of troops and artillery to Phalerum, which seemed to indicate that it was intended to oppose a French landing. The Anglo-French Fleet had not arrived at the Piræus, its arrival being announced for this morning.

Happily—and thanks chiefly to the sagacity of M. Zaimis, who, having been called upon to form a Cabinet, had already been consulted by the King—at the last moment wisdom prevailed; and at a Council of Ministers held at the Palace, under the presidency of the King, it was decided that all the demands formulated in the Note should be accepted. M. Zaimis, having after this agreed to form a Cabinet, went at eight o'clock in the evening to the French Legation, where the other Ministers had assembled, and informed them that, having undertaken the formation of a Cabinet, he would fulfil the demands of the three Powers literally. A similar announcement was made to the Italian Minister, who had associated himself with the *demarche* of his colleagues.

The news, becoming known in the city at once, exercised a tranquillising effect upon the people, who had for many hours been in a most trying state of suspense. Thus Greece passed through a crisis which might have had consequences of the gravest kind, and might very easily have led up to a civil war.

End of a Reign of Terror.

The Note of the Powers, which, while dealing vigorously with the Government, evidenced much interest in, and sympathy for, the Greek people, has created an excellent impression. The demand for a general and immediate demobilization affords proof of the friendliness of the Powers, and the elimination of the Skouloudis Cabinet frees the country from a veritable nightmare. Under the late régime everyone felt suffocated; it was impossible to speak openly for fear of police spies and informers, who were spread all over the city, who kept watch on everybody, and who daily arrested supporters of M. Venizelos on the pretext that they had spoken against the King. It was an abominable régime, mediæval and reminiscent of the worst days of Abdul Hamid. There was always a police agent at the door of the Serbian Legation to take note of those entering or leaving the building; and the Legations of the Entente were watched day and night by police spies for the same purpose. The day before yesterday, on leaving the French Legation in company with Sir Francis Elliot, I noticed that we were closely followed by one of these police spies. On drawing the attention of the Minister to this fact I observed that the spy made off at a great pace. I should never have thought it possible that here in Athens, amidst a people intensely liberal in feeling, such a régime would have been tolerated. It is to such ignoble manœuvres and to the threats constantly made against the Entente Powers, by the Press and from the tribune of the Chamber and elsewhere, that one must attribute the measures taken by the Powers to protect their interests against the Germanophil Cabinet and to restore the constitutional liberty of which the Greek people have been deprived.

Thus, this Cabinet, which represented nothing and nobody, has inflicted a great humiliation on the country, and, pretending to support the King, has only lowered his prestige. Its members wished to show their zeal by being more royalist than the King, who, I am in a position to state, is not responsible for all the hostility shown to the Entente. M. Gounaris has been chiefly responsible for the harm done. He is a politician of the old school, resembling the late M. Delyannis, but without the moderation that M. Delyannis always showed to his political opponents when he was in power. M. Gounaris when he was President of the Council abused his powers. It is to be hoped, for the sake of this country, that he will not be the leader of the Opposition against M. Venizelos. M. Streit, the former Minister for Foreign Affairs, who follows a German policy from sincere conviction, would seem to be the man indicated to lead the anti-Venizelists in the Chamber. He is a man of great experience and fervent patriotism, but a gentleman, and incapable of employing in party polemics certain methods which are condemned by all modern ideas.

The New Cabinet.

As for M. Zaimis, he is a circumspect politician of experience and balance, who, having been called upon in all recent times of crisis for his country, has always saved the situation by his tact and sagacity. It was he who after the unfortunate war of 1897 made peace and negotiated the difficult financial situation. Amongst his Ministers, M. G. Rallis is one of Greece's most excellent politicians, by reason of his experience and especially of his upright and honourable character.

A LARNACA FUNCTION.

(From a Correspondent.)

Larnaca, June 26.

On Saturday, June 24, the members of the Larnaca Club gave a dinner in honour of Mr. C. B. Wodehouse, who has been Commissioner of Larnaca for about nine years, and who is shortly retiring upon pension. On account of the abnormal heat, the dinner was held at the Club, and the tennis court provided a cool and pleasant spot with picturesque surroundings. After the toasts of the King and the President of the French Republic had been honoured, on the proposition of the Chairman, Mr. T. J. Greenwood, Local Commandant of Police, the health of the guest of the evening was proposed in most felicitious terms by Mr. W. H. H. Thorne, President of the District Court. Mr. Thorne spoke of the pleasure it had been to him to work with Mr. Wodehouse for the past five years, of the entire absence of friction of any kind, and of the great ability with which the Commissioner had always carried out his duties. The next speaker, Mr. L. Z. Pierides, who was for many years the Commissioner's chief clerk, referred to the great interest Mr. Wodehouse had always shown in arboriculture, in the reclamation of marshes and in the making of roads, and to his efforts to establish village savings banks. Mr. Wodehouse's great work, Mr. Pierides pointed out, was the reclamation of the St. Lazarus Marsh, and its conversion from a noisome swamp and a breeding place for countless mosquitoes, in the heart of the town, into a pleasure garden full of beautiful trees. This work has not received the recognition that was its due, but it will remain for many years as a monument to the retiring Commissioner.

In proposing the toast of "The Ladies," Mr. K. W. Stead, Collector of Customs, paid a tribute to the hospitality and kindness always shown by Mrs. Wodehouse to the residents of the town and to any visitors, especially on those occasions when portions of the Mediterranean Fleet paid the port a visit.

Mr. Baldassarre, manager of the Imperial Ottoman Bank, who made a fluent and eloquent speech in French, mentioned that Mr. Wodehouse's son, who was once a police official in Cyprus, had been serving with the English Army since the beginning of the war. Mr. Watts, Assistant Director of Surveys, suggested that St. Lazarus Gardens should be renamed "Wodehouse Gardens"; and Dr. Badre thanked Mr. Wodehouse on behalf of the many refugees from Syria, who had been nearly two years in Larnaca and had received so much help and kindness from him.

Mr. Wodehouse, in replying, reviewed the twenty-three years he had spent in Cyprus, and referred with great feeling to his old and valued friend, Mr. Greenwood, with whom he had been associated for many years in each of the districts in which he had been stationed.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, June 28.

No mails have come from Constantinople during the past four weeks. Letters occasionally arrive through Switzerland, but are a long time on the way, and the latest received here is dated May 22.

Information of a later date has, however, come to hand, through official sources, to the effect that several British subjects were arrested in Constantinople on June 6, as a measure of reprisal. It is probable that the victims are some of those who have hitherto been unmolested, as Mr. Percy Wills is one of them. The names of the others are not yet known.

It is surmised that the "reprisal" referred to is connected with recent events in Smyrna. There are reports of troubles there; but it has not been possible to ascertain what has actually happened. It is known that aeroplanes have been dropping bombs on military establishments in Smyrna, and it is alleged that some damage has been done in the Turkish quarter. The Vali threatened retaliation against the English and French residents if the bombardment of the town did not cease; and it is said that some of the English have actually been sent to Aidin. The arrest of the British subjects in Constantinople is probably only a temporary measure, and they will possibly be released on the necessary assurances being given by the Allies.

A correspondent writes that on the whole the general situation in Constantinople has not much changed during the past six months. Coal is fairly abundant, and a steamer had recently arrived with a full cargo from Zunguldak.

Troops are constantly being raised and sent to the Caucasus front or to Mesopotamia. Enver has been on a tour of inspection, and has asked for reinforcements for the Caucasus.

There are the usual rumours of dissension in the Committee of Union and Progress, and the resignation of the Sheikh-ul-Islam and the Minister of Justice are reported, in connection, it is said, with certain changes which the Huns want to introduce in the Law Courts.

THE ARAB REVOLT.

The following extracts are from a letter written from Egypt by a Syrian correspondent who has followed closely the various phases of the Arab movement for independence. The writer first mentions that the Shereef of Mecca is said to be extremely cautious, and therefore unlikely to embark upon a course of action without first weighing the possible consequences carefully. He then goes on to speak of the Shereef's "proud and valiant" son, Emir Faisal:—

Emir Faisal has long been chafing under the Turkish yoke, lightly though it has lain upon the Arab shoulders. A few months before the war, while returning from Constantinople, where he had been attending the Parliamentary sessions as deputy for Mecca, a Christian notable made his acquaintance, and so won his sympathy that the Emir pressed him to come to Mecca as his guest. . . . In the course of the ensuing conversation he openly expressed his indignation at the fact of a handful of upstarts (as he qualified the Young Turks in power) trying to dictate terms to the noble descendants of the Prophet, and vowed that the day would come when their henchmen in Arabia would be turned out bag and baggage. . . . He is said to be fair, tall, and slender, with a thin beard, and a man of action, but few words.

The forces that rallied under the Shereef's banner are said to have been divided into three bodies—one under the leadership of his eldest son, Emir Faisal, distinguished for his prowess and horsemanship; the second under his second son, Abdullah, renowned for his diplomatic skill and sound judgment; and the third under his third son.

Emir Faisal has assumed the hardest task of laying siege to Medina, where the Turks are in great force, and have behind them the railway; while his brother Abdullah marched upon and conquered Taief, taking most of the Turkish garrison prisoners, and returning to Mecca victorious; and the third brother marched on Jeddah and reduced it by cutting off the water supply. The garrison there, numbering about 1,400, surrendered without destroying any of the rifles, guns, or ammunition, as it was threatened with vengeance. There was a battery of field guns, a quantity of maxims and rifles, with a lot of ammunition intact.

The fall of Medina is considered inevitable, as the Idrisi of Asir is said to have lent his support to the Shereef. As to the Imam Yehya of Yemen, the relations between him and the Shereef have always been of a friendly nature. The brilliant success of the Shereef is likely to secure the co-operation of the smaller chiefs, who up till now have been wasting their strength through mutual jealousies and rivalries. Indeed, the Arabs are a people who, when fired by enthusiasm for a great cause, may be swayed as one man and led from glory to glory.

THE STATE OF SYRIA.

(From a Correspondent.)

Cairo, June 30.

The orgy of destruction indulged in by the Young Turks in the Lebanon seems to have reached its climax in the arrest of his Beatitude the Maronite Patriarch and his trial before the court-martial at Aley, together with some of the bishops of that historic community. This report is published by no less an authority than the *Temps* of Paris; and although some incline to the belief that the information may have been derived from two private letters sent from Cairo to a spiritual dignitary in Rome, and based on the rumour then circulating that the Patriarch was arrested and the Bishop, Boulos Awad, appointed as Acting Patriarch, yet there is ground for fearing it may be true. The fact that only a short while before the Patriarch was said to have been received and sent off with honours on the occasion of his visit to Jemal Pasha at Aley cannot be taken as a proof of the falsity of this rumour; indeed, it is in accordance with Turkish tradition treacherously to lure on a victim before doing away with him. Furthermore, the recent decision of the Foreign Committee of the French Chamber to call upon the Government of the Republic to threaten the Turkish authorities in Syria with punishment for the unlawful acts of persecution they are committing against the defenceless civil population, and to take steps for carrying this threat into effect, may be taken as an indication of the extreme gravity of the situation in Syria. The French Government cannot allow the extinction of the Maronite clergy and the disappearance of the leading Maronites, who constitute their staunchest supporters in the Lebanon and Syria.

There are other considerations calling for prompt intervention. Plague and cholera are said to be working havoc in Palestine and Syria, and the Turks are reported to be quartering sick troops on the villages and towns without taking the slightest measures of precaution. The almost total absence of drugs and doctors adds to the hopelessness of the situation.

The Syrians everywhere are manifesting a most generous spirit in collecting funds for the relief of their compatriots, and in America some of the notables among them have succeeded in enlisting the sympathy of the highest official quarters. It is feared, however, that the mobilizing of these moral influences will not mend matters much. It is now weeks since the appeal was made to the President of the United States, and so far it is not known what has been the result of his negotiations with the Turkish Government. Even if they were successful, it would be weeks before material relief could be afforded, and the obstacles that the Turco-Germans will put in the way can easily be foreseen. An actual occupation would seem to be the only effective remedy. The freeing of Syria from Turkish rule is a necessary corollary to the campaigns now conducted in Arabia and Mesopotamia, inasmuch as it will complete the detaching of the Arab provinces from Turkey.

STARVING SYRIA.

A Reuter's message from Washington, dated July 6, reports:—The State Department has directed the United States Chargé d'Affaires at Constantinople again to call the attention of Turkey to the fact that nothing has been done in regard to the request of the United States Government that neutrals should be permitted to feed the starving Christians in Syria. The Chargé d'Affaires is instructed to state that "the failure on the part of Turkey to heed the request has severely strained the relations between Turkey and the United States." Reports received by the State Department declare that from fifty to eighty thousand Syrians have already perished, and that the Turkish military authorities are still continuing to drain the food supplies.

Information from Palestine says that the Turks have called up all able-bodied men between the ages of 17 and 50. Cholera has now begun to make serious progress, and all the Government measures against it have failed.

In June the maximum shade temperature taken at a hospital in the Suez Canal zone varied from 94 degs. to 116 degs. In the hospitals the clinical thermometers had to be kept in ice water, and the readings were taken while the instruments were still under the patients' tongue.

The Postmaster-General finds it necessary to announce that in future all parcels for prisoners of war in Bulgaria and Turkey must be packed in wood, tin, canvas, linen, or similar material. Parcels packed merely in paper or cardboard will not be accepted at Post Offices.

Sir J. Roper Parkington, Consul-General for Montenegro, has been officially informed that the rising in Montenegro organised by General Vechevitch, the former Minister of War, has spread into the northern districts of Albania, and that the Austrian troops have retreated from the Montenegrin villages towards Cettinje.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 17.

Russian Troops on Roumanian Territory.

On the night of June 11 the inhabitants of a number of villages in the extreme north of Moldavia, especially of that of Mamornitza, were awakened by the sound of heavy gunfire in their vicinity; and it was soon discovered that the region had been occupied by Russian troops, who were waging a regular battle with the Austrians across the Bukovinian border. The engagement continued part of the night, the village of Mamornitza suffering considerable damage from the shell fire. A number of casualties are reported among the natives. The Prime Minister, having been duly advised, convoked a Council of Ministers, to which King Ferdinand was hastily summoned from the Danube, on which he was touring with other members of the Royal Family; and a division from Botoshani under the command of General Patrashco was sent to the scene of the combat. The Russian troops withdrew on representations being made by the Roumanian General to the Russian Commander. Commissions of inquiry have been sent to the spot by the Russian as well as the Roumanian Governments, apologies have presumably been offered and accepted, and, according to the official version the whole affair is due to a mistake on the part of the Russian forces, which in the heat of the combat retreated across the Bukovinian frontier without being aware that they were passing on to Roumanian territory, the boundary not being well defined at this point. There is at least one other version, not official.

It is not known what number of troops were involved, though there is talk of at least several regiments. The Russians are said to have had considerable losses, the Austrian casualties being, of course, unknown.

It is interesting to note that, apart from the German-bought Press, the violation of Roumanian territory on the part of Russian troops caused but little indignation —and that among the few. This attitude of the public is significant. The general impression is that a similar mistake on the part of the Austro-Hungarians might be productive of different results.

War Refugees.

Whether Czernowitz has fallen or not is uncertain at the moment of writing, but all the localities east of the Pruth have been occupied by the Russians, and the city itself seems to have been invested on three sides. The administrative authorities have retired to Dorna, and evacuation on the part of the garrison appears imminent. Meanwhile an exodus of the civil population is taking place, many inhabitants having been deposited by train and other vehicles at Itzcani and Suceava on the Roumanian frontier. These and other places along the frontier are said to be occupied by 40,000 refugees, mostly old people, women, and children. They are camping in the streets and public gardens, and are reported to be suffering great privations. The Roumanian authorities are considering the advisability of sending them relief.

June 21.

Two Public Meetings.

A large meeting took place in the Dacia on Sunday morning at the instigation of the Committee of the Unionist Federation, at which a number of speeches were delivered, all directed against the policy of neutrality and advocating active participation in the war on the side of the Entente. M. Také Jonescu spoke with his usual eloquence and lucidity, and finally recommended his hearers to disperse quietly, promising a further meeting at a near date. The Prefect had taken unusual steps to prevent disturbances. The garrison was called out in addition to the police force, special troops being posted about the German and Austro-Hungarian Legations and in the vicinity of the Palace.

While the meeting of the Unionist Federation was in progress a large crowd was collecting on the Boulevard Carol around the statue of Costake Rosetti, to celebrate the centenary of the birth of this great patriot, who was one of the leading figures of the generation of '48. Delegates from all parts of the country were present, and speeches were delivered by several members of the Government, including the Prime Minister.

Austrian Refugees.

The Austro-Hungarian Government is reported to have requested the Roumanian Government to permit the passage across Roumanian territory of Austrian officials, who left the town of Czernowitz as soon as the Russian occupation became imminent. These people will, it is said, be conveyed by special trains from Burdujeni to the frontier point Palanka, where they will gain Hungarian territory.

M. Themistocle Bocaucla, a well-known Czernowitz lawyer of Roumanian nationality, is said to have been appointed by the Russian command as mayor of the Bukovinian capital.

The War and the Weather.

In Moldavia there have been heavy rainfalls, followed by floods, which have submerged innumerable villages. Many victims are reported, and great damage has been caused in agricultural districts. In other parts there have been violent hailstorms, which have destroyed the harvest completely. Hailstones the size of hen's eggs were picked up. There is a widespread belief that we have to thank the terrific Russian artillery fire for the inclement vagaries of the weather.

BRITISH PRISONERS IN BULGARIA.

(From Our Bucharest Correspondent.)

Mrs. Take Jonescu, who has taken our prisoners in Bulgaria under her protection, now disposes of some thirty thousand francs, which have been contributed for their relief. A concert given by Mrs. Take Jonescu in her own drawing-rooms brought in about 1,500 frs., and the "Regal" Cinema gave a special representation of English films, sent out by the British Government, for the same charitable purpose, thus swelling the fund by another 3,000 frs. The British Prisoners' Fund has sent out £120.

It would be unfair to refer to this point without mentioning the names of two ladies who have supported the scheme with complete devotion and untiring energy. These are Miss Fifield and Mrs. Rook Carnegie. I understand that the latter has collected through her personal efforts more than half the total amount of the fund.

In a previous letter I referred to the individual parcels which have been made up by these ladies with the help of other members of the British colony, each containing a number of very useful articles, carefully selected, and packed in neat red bags. Some four hundred of these have now reached Philippopolis. Parcels are now being sent through from time to time containing tea, sugar, cocoa, chocolate, macaroni, semolina, jam, tinned fish, etc. But I hear that clothes are still wanted, especially trousers.

Mr. Vopicka, the United States Minister in Bucharest and Sofia, continues to take the most friendly interest in our prisoners. He has recently returned from Sofia, where the Ministers for War and for Foreign Affairs had promised him that they would have all the British prisoners sent to Philippopolis within fifteen days. He has likewise prevailed upon the authorities to improve the prisoners' fare; for they were apparently only getting haricot beans and rather indigestible meat at one time. Mr. Vopicka has promised to return to the charge in the event of these improvements not being realised within a reasonable time.

Mr. Einstein, who did so much for the prisoners, is at present in England on leave, the United States Consul, Mr. Murphy, remaining as acting diplomatic agent.

It is satisfactory to hear that The Near East has been instrumental in putting prisoners in touch with their families in England, as in the case of Captain Harris, who, I am told, has received assistance from his friends as a result of the notices which appeared in these columns on April 14 and May 5. I seize the opportunity of reminding prisoners' friends that cheques, crossed "Bank of Roumania," can be sent direct to Mrs. Take Jonescu, Strada Atena, 25, Bucharest, who will, on behalf of the prisoners, make purchases such as experience has proved to be most useful.

Reuter's correspondent at Bucharest telegraphs (July 4):—An offensive from Salonika, which especially interests Roumania, is looked for with a certain degree of impatience, and would be hailed with joy.

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

A MEMORIAL CATHEDRAL FOR CAIRO.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The death of Lord Kitchener has deeply affected the plans which we have been gradually developing for the erection of a cathedral in Cairo, and I venture at once to ask your kind help in making our position known.

For some years past All Saints', the old Anglican church in Cairo, has been totally inadequate for our needs. After prolonged and careful consideration, the congregation and church committee decided some time ago that it must be rebuilt, owing to the fact that the structure is beyond hope of satisfactory and permanent repair, the accommodation is not nearly enough for our congregation, and the increasing noise from a main street just outside the windows most seriously affects the quiet, the worship, and the devotion of our services.

Then, more than a year ago, it fell to my lot to point out that, with the proclamation of a British Protectorate over Egypt, and the growing importance of our position in the country, something more was required than the mere rebuilding of a parish church. I suggested that the time had come for the erection in Cairo of a church worthy of our religion and our name, that would be a mother church to the other British communities scattered up and down the Nile Valley. It seems strange to many that in Cairo, the biggest city in Africa, larger than all but two cities in the Empire overseas, the capital and seat of government in Egypt, where every other Church—Coptic, Greek, Roman Catholic, Armenian—already has a cathedral, the Church of England alone has none. Such a church would be as much a witness and a symbol of our Christian faith to the people of Egypt as is the cathedral in Khartoum to those of the Sudan. To ourselves it would be not only a symbol, but the outward expression of our inward faith, the centre of our religious life, and a new and perpetual incentive to worship.

The Anglican community took up the suggestion very heartily, and plans were being gradually matured, when a new and almost overwhelming incentive was added. The old church itself bequeaths to us the graven memorials of many gallant deeds—Kassassin, Tel-el-Kebir, Toski, the Nile Campaigns—and then came a name that will be even more deeply burnt into the memories of us all—Gallipoli.

None who were here then will ever forget the dreadful processions that came back to fill our hospitals—and, alas, our cemeteries—the shattered remnants of the men who had spent long months of training here, whom we had learnt to know, and for whom—none can testify to this with better knowledge than I—the British residents spent themselves to the uttermost.

From Gallipoli they came, from the Canal, from the Western desert frontier, and from Mesopotamia, too, so that the old valley of the Nile, lined with graves through immemorial ages, now shelters the sons of thousands of distant homes—British, Indian, Australian, New Zealand, South African, Canadian, West Indian. Does anyone wonder that we had already decided that our cathedral should enshrine the immortal memory of our brave dead?

Then while we were planning, came the news that Kitchener himself was dead; to all in Egypt not merely the Secretary of State for War and hero of a hundred fights, but the man every one of us—British or Egyptian—relied upon and loved as friend.

This is not the time to dwell upon what our project has lost, in the death of the man who—more powerfully than any other—would have helped us when his great war task was over, but it leads us to rely with all the more confidence on the kindly support of friends throughout the whole Empire who value the work accomplished by him for our country, and who would wish to see a fitting memorial erected in the land with which his name has been so long and so closely identified. There must be many who responded to his call for a college in memory of Gordon at Khartoum who will now respond to the call for a cathedral in memory of Kitchener of Khartoum at Cairo.

British residents in Egypt are already giving, and some large contributions have been received, but we are fully conscious that we cannot accomplish our purpose without other aid. A strong Building Committee, under the presidency of the High Commissioner, Sir Henry McMahon, has been formed to assist me in the working out of all plans, and further details will be published later. Contributions may be sent to me direct, to the Governor of the National Bank of Egypt, in Cairo, or to the Manager of the National Bank of Egypt, 6 and 7, King William Street, London, E.C.

We shall probably not attempt any actual building until after the conclusion of the war, but we ask for gifts now, especially as all such gifts will help both our project and the steady prosecution of the war, for we have decided to invest all we receive in Exchequer Bonds or other war securities which may be issued.

I am, etc.,

RENNIE MACINNES,
Bishop in Jerusalem.

Bishop's House, Kasr-el-Doubara, Cairo,
June 29, 1916.

NEAR EAST BOOKSHELF.

A TURKISH POET.*

The translation of poetry is always a difficult task, and it is very rarely accomplished satisfactorily. To a skilled translator it may be a comparatively easy matter to convey the poet's thoughts exactly to the reader; he may even, if he be extraordinarily gifted, succeed in reproducing some of that delicate play upon words and with shades of meaning which are so baffling in, for example, Arabic poems; but if he essays to do these things in lines that shall scan correctly and rhyme truly he is, in practically every case, attempting the impossible. His difficulties are probably greater in the case of turning Oriental poetry into English verse than in any other. Dr. Léon's knowledge of Turkish and of English fit him to undertake such a Herculean labour with as much chance of success as any living scholar; but, frankly, we cannot say that he has succeeded. He gives us (one feels) the thoughts and ideas of the poet with a good deal of accuracy; and since these thoughts are often elevated and noble, this is something to be thankful for. But in aiming at rhyming lines the translator hampers himself sadly, and occasionally the results are far from happy. Thus, in the poem "Sleep and His Brother Death" the first verse runs:—

Upon the just dawn'd world, the new-born infant opes its eye,
In wonderment, to gaze on what before it there may lie,
Then weary of the sight, e'en tho' it be but e'er a peep,
Doth nestle on its mother's bosom calmly there to sleep.

Which is not happy. We like best of all the translations "The Ever-closed Door," of which the first verses are as follows:—

There is a door to which I've found no key,
There is a veil thro' which I cannot see,
Much talk, much toil, and speculation free
There is, and then—the end of thee and me.

'Tis strange, yet true, of many myriads, who
Have pass'd, long since, that door of darkness thro',
Not one has come to tell to me, to you,
The road o'er which we have to travel too.

This, one of Sheikh Haroun Abdullah's most popular poems, as Dr. Léon tells us in his Introduction, certainly does bear "a striking analogy" to some of the *Rubaiyat* of Omar Khayyam. Dr. Léon adds:—

Inasmuch as the poem of Omar Khayyam is 400 years older than that of the Sheikh, and as Persian poetry has always been popular in Turkey, and Haroun Abdullah was well acquainted with that language, it is quite within the bounds of probability that the writer of the *Dayma Qapalli Qapassu* was acquainted with the Rubaiyat and influenced thereby. This, however, does not in the least diminish or detract from the beauty of his poem. Like a skilful jeweller, he has so cleverly and artistically re-set the gem, in so elegant and appropriate a setting, that its pristine beauty is enhanced and improved.

As to that we are not in a position to judge. But we like Dr. Leon's Introduction, which gives a sympathetic sketch of Sheikh Haroun's life, and helps us to understand the poems much better than we could otherwise do. The poet was one of the most famous sheikhs of the Mevlevi Dervishes, and his life was full of ups and downs, as the lives of all poets in the East seem to be. Exiled on account of one of his poems, which was regarded as reflecting on the Sultan and his Court, he was restored to favour as the result of another, and was "loaded with honours" in true Oriental style. His love story is pretty, though sad; and he was clearly a man of fine character and lofty ideals.

Gratitude being a rare virtue, it is pleasant to find Dr. Léon, who "experienced . . . many kindnesses" at the hands of the ex-Sultan Abdul Hamid, declaring in his Preface that he will "always cherish feelings of affection, gratitude, sympathy, and respect" for his Imperial patron. Most of the translations in this little book, we learn, were made at Yildiz Kiosk. They will certainly repay perusal, and we are grateful to Dr. Léon for giving us the opportunity of making acquaintance with them in this form, since we cannot do so in the original.

* "Sheikh Haroun Abdullah: A Turkish Poet, and His Poetry." By Henri M. Léon, M.A., Ph.D., etc. (For La Société Internationale de Philologie, Sciences et Beaux-Arts.)

TANGIER TO TEHERAN.

Here is a true story of the Gallipoli affair, which may now —I trust!—be told without arousing the ire of the Censor. As to the principal actor in it, he died ere the withdrawal; and in any case he would hardly object to my telling of his prowess, even if he still lived. For he was a mule, a white mule—outwardly; but his heart and his thoughts were indescribably black and hopelessly evil. Those who were brought into contact with him—usually involuntarily—called him The Whited Sepulchre and other, much worse, names. He killed four men, and it was no fault of his that the score was not a larger one. From all this I conclude that he was not an Asiatic mule, but an American. For your Asiatic mule may be tricky, cunning, and lazy, but he is seldom downright vicious, and as a rule has no homicidal instincts. The American variety, especially the South American variety, I am given to understand, is a holy terror in nine cases out of ten. And no doubt The Whited Sepulchre was a native of the New World. At any rate, he was as wicked and full of vice as that yellow horse which Mr. Kipling has immortalized in "The Day's Work."

***

Well, The Whited Sepulchre was employed on one of the most famous "beaches," where the friend who told me the story was also stationed; and the constant attentions of the enemy's artillery did nothing to improve his temper. In the intervals of dodging shells and thinking out plans for murdering more men he fought other mules and ate any camp equipment or stray cartridges that he could find. And his disposition became daily more wicked. Then one day he put the British Army—or a distinguished fraction of it—to rout. My friend described the incident thus: "We were sitting about in a comparatively safe spot near the foot of the cliffs when we saw a General walking in our direction, accompanied by an Aide. Their course took them close to The Whited Sepulchre, and we watched events, not without interest."—My friend, I may remark, belongs to the Senior Service.—"The mule backed, in that suggestive way some mules have, and then things happened rapidly. The next thing we saw clearly was the General sprinting for all he was worth; while his Aide described a graceful parabola, which finished in the shallow water." "And the mule?" I asked, after inquiring respectfully after the General's fate and learning that he escaped with his life. "Oh," said my informant, "he died shortly afterwards. He was shot; and nobody ever felt quite sure whether it was a Turkish bullet or one of our own. But we all cheered no end."

***

As I have mentioned before, many of our countrymen who knew the Turkish Empire in those distant and happy days "before the War" are now turning to good account the knowledge acquired on journeys undertaken in the interests of science, of archæology, or of business, and even on mere pleasure trips, just as our friend the enemy is doing, of course, and very rightly, in the interests of *his* country. Sometimes some of these gentlemen have droll experiences when they run across an old acquaintance. Thus on one occasion an archæologist, who is now—well, not an archæologist for the time being, having been sent ashore at a certain point on the Turkish coast, with a sufficient escort to make his inquiries profitable, recognised in the *Kaimakam* who received him (not too willingly) an old friend. The caller, who is not given to standing on ceremony, greeted the official cordially, expecting prompt recognition. But the *Kaimakam* merely blinked like an owl, and "thought there was a mistake. He had not the pleasure of the Englishman's acquaintance." Thereupon the latter adapted himself to the situation, and proceeded with his investigations. But presently chance threw him and the *Kaimakam* together for a minute with no observers near. At once the Turkish official beamed and grasped the other's hand. "Forgive me," he whispered, hurriedly. "Of course, I remembered you at once. But I did not think it would be wise to acknowledge it before witnesses. It might get me into trouble, you understand." Poor man!

***

A leading illustrated weekly presented its readers recently with one of those pictorial relief maps which are now ordinary features of such journals. It showed Arabia and the neighbouring countries, and the pilgrim routes to Mecca and Medina were prominently marked. Some of these routes were undoubtedly correctly shown; but in other cases, it seemed to me, the artist had allowed his fancy to have very free play. He may be right and I may be quite wrong; and what follows is written not with any desire to criticise, but in the hopes that some reader able and willing to set my doubts at rest may be kind enough to do so. The first route, then, which rouses my curiosity is one marked "Pilgrim Route from India," which is shown as running from Karachi to Muskat and thence overland, following the coast as far as Ajer, and on by way of Riadh. Now, it is perfectly true that there is a recognised "road" which follows this line, but I have never heard of any considerable number of Indian pilgrims making use of it, and, frankly, I do not believe they would dare to face its risks and hardships. The second doubtful route is one marked "Alternative Pilgrim Route" (from Teheran), by way of Shuster, Busreh, Koweit, and Riadh again, to Mecca. The same objection applies to this route as to number one, I fancy. The third route that raises doubts in my mind is the "Pilgrims' Route from E. Africa, etc.," which is shown as striking boldly up from Aden through the highlands to Sana and Taif. This is admittedly a feasible, if difficult (and costly!), route to follow; but I doubt whether one pilgrim "from East Africa, etc.," follows it for every hundred who go by sea to Jeddah. The fact is, unless I am much mistaken, that most of the overland routes to Mecca are too dangerous for any but the very poorest pilgrims to follow them as a rule, and that an overwhelming majority of the pilgrims to-day prefer the sea route. Of course, the Hejaz Railway does, in normal times, carry a number of pilgrims, and many *hajjis* toil along the route through Sinai and the Hejaz. But the other routes have lately, I fancy, fallen into disrepute, and are so little used by the pilgrims that I fear the artist's neat arrow-headed lines are rather misleading.

***

Another feature of the same map that worries me is that Persia is shown as a kind of vast hollow, a sort of Eastern Holland. Towering mountain ranges are marked, correctly, along the coast of the Gulf, extending right up to Tiflis, and other, lesser, ranges are shown on the northern and eastern frontiers. But these mountains are so drawn that they give the effect mentioned above. As a matter of fact, the greater part of Persia is a high plateau, from 2,000 to 6,000 ft. above sea level, with numerous high mountain ranges—as much unlike Holland as it well could be.

***

I have read with lively sympathy some extracts from a letter written by a member of the Anzac Corps, protesting against "some of the English newspapers and their infernal soft-soapy 'Anzacs' articles." The writer and his friends are frankly "fed up" with these journals, and he declares that "the way they record our little aches and pains—a petty raid on the Boches' trenches, padded up with such rot as 'These giant athletes leaping the trenches,' makes one sick." I am not surprised that he and his fellows feel that way about it; such journalism *is* nauseating. But the sentence in his letter which warms my heart to him is what follows: "It is all on a par with the daily drivel in the same papers about the petty doings of the actresses and chorus girls." It *is*. And the wonder to me is that any paper can print such stuff. The interest in our Australian and New Zealand fighting men is legitimate enough; but if anything could kill it, it would be the "drivel" of which the writer complains; and to be put on the level of the "actresses and chorus girls" is indeed an insult.

***

From time to time we are informed that cargoes of coal continue to find their way from Zunguldak to Constantinople, that the service of steamers on the Bosphorus is being maintained—even improved, according to one report—and that the electric trams are maintaining a regular service. These reports alternate fairly regularly with others, according to which the city is practically in darkness owing to a shortage of coal and of oil, and the trams are at a standstill. It is rather confusing, and we can only hope that when the war is over we shall find that some trustworthy person in the Turkish capital has been keeping a full diary which, being given to the world, will enable us to form a correct, if belated, opinion on the true state of affairs. In the meantime I suspect that there is some truth in both classes of reports. No doubt coal from Zunguldak does reach Constantinople more or less regularly; but in all probability the bulk of it is commandeered by the military authorities, to keep the munition factories, etc., going. But it is clear that private individuals find it not only difficult, but practically impossible, to obtain either coal or oil. Here is a brief extract from the letter of a correspondent who is fortunately placed for receiving trustworthy news of the city—"Some of the trees in one of the lovely gardens on the Bosphorus, belonging to a Robert College professor, have had to be cut down for fuel, since it was impossible to obtain coal or kerosine." There is a fact that speaks for itself. It is to be hoped that the tree-felling has not been carried out extensively on the shores of the Bosphorus; for that would mean robbing the scenery of one of its chief charms.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. July	1916. July.		1334. Ramadan	5676. Tamuz
14	1	Friday	13	13
15	2	Saturday.....	14	14
16	3	Sunday	15	15
17	4	Monday	16	16
18	5	Tuesday	17	17
19	6	Wednesday	18	18
20	7	Thursday	19	19

Thursday is the birthday of H.R.H. Prince George of Greece, Duke of Sparta, who was born in 1890.

Wednesday being the birthday of the King of Serbia, the Hon. Sir Arthur Walsh visited the Serbian Legation with a message of congratulation from King George. A service was held at the Russian Chapel, Welbeck Street, and there was a reception at the Serbian Legation.

The King and Queen of Montenegro, accompanied by Princess Xenia and Princess Vera, left Bordeaux last Friday for Vichy.

H.H. the Sultan of Egypt favours some useful institution, such as a maternity hospital, with a medical school for women, as the Egyptian memorial to Lord Kitchener, and is prepared to head the subscription list with £500.

Prince Nicholas and Prince Andrew of Greece left Athens on Monday for Denmark and Petrograd, viâ Messina, in order to visit their mother, the Queen Dowager, who resides in Russia.

Princess Zoutzo, the wife of the Roumanian Military Attaché to the Legation in Paris, arrived in London on Monday on a short visit.

M. Pashitch, who left Paris for Nice last week, proceeded to Rome, where he arrived on Sunday.

Dr. V. Marinkovitch, Serbian Minister of Agriculture, arrived in London last week from France.

H.E. the Roumanian Minister visited the Foreign Office on Monday afternoon and was received by the Permanent Under-Secretary for Foreign Affairs. H.E. the Greek Minister was amongst the callers at the Foreign Office the same day.

Lady Maxwell's condition was not quite so satisfactory at the end of last week, and she was unable to go to Ireland. On Sunday she underwent another slight operation, but is now progressing as favourably as can be expected.

M. de St. Aulaire, the newly appointed French Minister to Roumania, arrived in London from Tangier on Monday.

Lieutenant-Commander Harry Pirie-Gordon, R.N.V.R., had the honour of being received by the King at Buckingham Palace on Saturday morning, when His Majesty conferred the Distinguished Service Cross upon him.

Sir David Semple, Director-General, Public Health Department, Cairo, left Egypt for England on leave at the end of last month.

FRENCH, English, Spanish, Italian, German, Scandinavian Languages, Greek, etc., rapidly taught by natives.
Σχολὴ Γλωσσῶν. Διδασκαλία συστηματική.
Διερμηνεῖς κ.λ.π. Δίδακτρα μέτρια.
Lyceum Institute, 85, New Oxford Street, and 64, Haymarket.

The *Egyptian Gazette* of June 26 announces: Lewa Bernard Pasha, Financial Secretary to the Sudan Government, will spend a month in Cairo and Alexandria, and then depart for Europe on leave.

Madame Slavko Grouitch, who is now in America collecting funds for the starving Serbians, expects to return to England in the autumn.

The King has granted to Mr. Charles Greenway, chairman of the Anglo-Persian Oil Company, Limited, authority to wear the Insignia of Grand Officer of the Order of the Lion and the Sun, conferred on him by the Shah of Persia.

Lieutenant Charles Carol MacNamara, Royal Irish Rifles, who is reported wounded, was in 1908 employed with the Egyptian Army. He was gazetted to the Staff last March.

Egyptian papers received by the last mail announce that the marriage was to take place on July 3, at St. Mark's Church, Alexandria, of Major Vernon Jarvis, of the Cairo City Police, and Miss Itala Tedeschi, the daughter of Mme. Veuve F. Tedeschi.

M. A. Radovitch, Prime Minister of Montenegro, accompanied by Sir Roper Parkington, was the guest of the Lord Mayor at luncheon at the Mansion House on Wednesday.

On Sunday afternoon a special Intercession Service for Serbia was held in the Chapel Royal, Savoy. The Rev. Hugh B. Chapman officiated. Serbian hymns were sung by M Voyiflad Yanic, and the Rev. H. J. Fynes-Clinton delivered a short address on Serbia.

Last Friday evening, at the Mansion House, the Lord Mayor and Lady Mayoress, in the presence of the Serbian Minister and other visitors, received about 300 Serbian boys who recently reached this country. Most of them have lost their parents and are now being educated in England.

An interesting little ceremony took place at General Headquarters of the Egyptian Expeditionary Force recently when General Sir Archibald Murray by command of the King conferred upon Lt.-Colonel Vitale di Pontagio, Italian Military Attaché with the Expeditionary Force, the insignia of an Honorary Companion of the Distinguished Service Order.

Mr. Louis Raemaekers has presented to the Armenian Refugees (Lord Mayor's) Fund a cartoon for the Committee to use in any way they think fit.

Sir Peter McBride, Agent-General for Victoria, Australia, has presented to the Prime Minister of Montenegro a cheque for £800 to be expended in the alleviation of distress among the Montenegrin refugees, this amount being part of the proceeds of a collection which was made in Victoria on "King George's Day," June 2.

The Athens correspondent of the *Morning Post* writes that the departure from Greece of Commander H. S. Cardale, R.N., who has been recalled by the British Admiralty for service at home, has called forth sincere expressions of regret in Greek naval circles, from Admiral Coundouriotis down. Commander Cardale had nearly completed four years' service in the Greek Navy, during which time he had done valuable work, both on active service afloat and in organisation on land. On the outbreak of the present war he obtained leave of absence from the Greek Government, and at the request of the Serbian Government proceeded to Serbia, where he took command of the Allied naval forces, with headquarters at Belgrade. He was with the Serbian troops at the evacuation and reoccupation of that city in November-December, 1914, and organised the defences of the place. After his return to Greece he was appointed Director of the new School of Naval Reserve Officers, which he practically organised, and during the absence of Vice-Admiral Mark Kerr acted as chief of the British Naval Mission.

APPOINTMENTS, PROMOTIONS, ETC.

H.E. the Serbian Minister (M. Matheas Boshkovitch) has left London. He goes with regret and leaves behind him many friends. He will not at once take up a new post, but will go to France for a very necessary holiday. He has worked strenuously since the war began and needs rest and change. After his holiday he will take up a new post under the Serbian Government at Corfu. We understand that M. Yovan Yovanovitch, formerly Serbian Minister in Vienna, has been appointed Serbian Minister in London.

Vice-Admiral Sir Richard H. Peirse, K.C.B., M.V.O., has been appointed Naval Member of the Central Committee of the Board of Invention and Research. He became a member of the Ordnance Board in 1907, and was Inspector of Target Practice from 1909 to 1911. He served during the Egyptian and South African wars, has commanded the First Battle Squadron, Home Fleet, and was Commander-in-Chief, East Indies Station, and was last year on service in the Eastern Mediterranean.

Our Bucharest Correspondent writes (June 22):—

Mr. Hearst, late British Consul in Sofia, having obtained permission to leave Bulgaria, is now in Bucharest awaiting further orders.

Mr. Rook Carnegie has been appointed Acting Vice-Consul in Bucharest in place of Mr. Schöndorff, whose death had caused the post to become vacant.

At its meeting on June 28 the Egyptian Council of Ministers approved of the appointment of Mr. Hayler, the Sultanian Counsellor, as Acting Judicial Adviser during the absence of Sir William Brunyate on leave.

Captain Hugh Massie Blomfield, son of Sir Massie Blomfield, formerly Director-General of the Egyptian Ports and Lights Administration, after getting through the whole of the Mesopotamian relief campaign without a scratch, has been appointed Assistant Political Officer to Colonel Knox at Busreh. Captain Blomfield is in the Buffs.

Bimbashi W. L. Clinton, Camel Corps, has been struck off the strength of the Egyptian Army on reversion to his unit in the British Army.

Mr. F. Atterbury, of the Sudan Slave Trade Repression Department, has been granted the temporary rank of Kaimakam while employed as Commandant of Police in the newly occupied District of Darfur.

The *Hestia* learns that Captain Baron von Senarclens-Grancy, the German Naval Attaché at Athens, has been transferred to Washington to succeed Captain Boy-Ed, who was recalled on the demand of the United States Government.

DOMESTIC ANNOUNCEMENTS.

The Charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

PRICE.—On July 6, at Wyaston Grove, Ashbourne, Derby, the wife of Major Sir Francis Price, Bart., Glamorgan Yeomanry (attached Egyptian Army), of a son (William Russell Rose).

RALLI.—On July 7, at 1, Livingston Drive North, Liverpool, to the wife (*née* Vlasto) of Alexander C. Ralli, of a son.

MARRIAGE.

KITCHENER—BLUCK.—On July 8, at St. John's Church, Chelsea, London, by the Rev. J. H. Harvey, assisted by the Rev. W. C. Ward, Capt. Henry Hamilton Kitchener, R.E., Royal Flying Corps, son of the late Lieut.-General Sir F. W. Kitchener, K.C.B., and Lady Kitchener, to Winifred Esther Everest, eldest daughter of the Hon. A. W. Bluck, M.C.P., and Mrs. Bluck, of Hamilton, Bermuda.

OBITUARY.

SIR EDWIN H. EGERTON, G.C.M.G., K.C.B.

The Right Hon. Sir Edwin Henry Egerton, formerly British Ambassador at Athens, died in London last Saturday morning, in his seventy-fifth year. He entered the diplomatic service in 1859, and his connection with the Near East began in 1881, when he went to Athens as Secretary of Legation, and when he twice acted as Chargé d'Affaires. From April to September of 1884, and from July, 1885, to January, 1886, he was Acting-Agent and Consul-General in Egypt, having been meanwhile (March, 1885) promoted Secretary of Embassy at Constantinople. During the years immediately following his time was spent chiefly in Paris; but in 1892 he was promoted to be Envoy Extraordinary and Minister Plenipotentiary to the King of the Hellenes, and he remained in Athens till the end of 1903. His tenure of the post coincided with a difficult period, which witnessed the Cretan insurrection and the disastrous Græco-Turkish war, and his services to his Government were of great value. He had a close personal knowledge of the country, of which he visited almost every part, and he took an active interest in the British School of Archæology and its work. From Athens he was sent to Madrid, and thence, in 1905, was transferred to Rome. In December, 1908, he retired.

He was made a C.B. in 1886, and promoted K.C.B. in 1897; was made a K.C.M.G. in 1902; and in 1904 was sworn a Privy Councillor. He married, in 1895, Olga, widow of M. Michel Katkoff and daughter of Prince Nicholas Lobanoff Rostowski. His only son was killed in action a few months ago.

ADMIRAL D'ARCY-IRVINE, K.C.B.

Admiral Sir St. George D'Arcy-Irvine, has died at Aix-les-Bains in his eighty-fourth year. A son of the Rev. G. Marcus D'Arcy-Irvine, he was born on May 23, 1833, and entered the Royal Navy in 1845. During the early stages of the Crimean War he served in H.M.S Megæra in the Black Sea, and at the landing at Eupatoria he was in command of part of the Naval Brigade. The next year he was on service in the Baltic, and at the close of the war he was awarded the Crimean medal with clasp, the Baltic medal, and the Turkish medal. In 1862 he was senior lieutenant of the Doris, the escorting ship on the Eastern tour of the Prince of Wales. In the Turco-Russian War of '78 he was in command of the Hotspur in Besika Bay and up the Dardanelles, and in 1882 he took part in the bombardment of Alexandria, commanding H.M.S. Penelope. For his services on this occasion he was made a C.B., and was given the Egyptian medal and the Khedive's bronze star. This terminated his connection with the East, but he afterwards did good work as second in command of the Channel Squadron (1888-89). He became rear-admiral in 1888, vice-admiral in 1891, and admiral in 1897, in which year he was placed on the retired list. In 1902 he was promoted K.C.B. He married, in 1868, Katherine, the only daughter of Vice-Admiral Sir Horatio Austin.

LIEUT.-COLONEL P. W. MACHELL, C.M.G., D.S.O.

It was announced last Friday, unofficially, that Lieutenant-Colonel Percy Wilfred Machell, C.M.G., D.S.O., of Crakenthorpe Hall, Westmorland, commanding a battalion of the Border Regiment, was killed on July 1, while leading his men in an attack. The news has been received with feelings of the deepest regret both in this country and in Egypt, where Colonel Machell had spent many years of his life, and where he had numerous friends.

Born in 1862, he was the son of Canon Machell and the Hon. Emma Machell, sister of the eighth Lord Middleton. He was educated at Clifton and Sandhurst, and joined the Army in 1882, as a lieutenant in the 56th Regiment. Two years later he went to Egypt with the Nile Expeditionary Force, thus beginning a connection with the country which was to prove a long one and one full of honour for himself. In 1886 he joined the Egyptian Army, and he was in command at the capture of Fort Khor Moussa, for which he was awarded the Order of the Osmanieh (4th Class). Subsequently he took part in the actions of Gamaizah and Toski and the capture of Tokar, these services securing him two clasps, the Order of the Mejidieh (4th Class), and the Bronze Star. In 1891 he was appointed to command the 12th Sudanese Battalion, which command he held till 1895. In the following year he became Inspector-General of the Egyptian Coastguard, and in 1898 he was appointed Adviser to the Egyptian Ministry of the Interior, a position which he filled with conspicuous ability for ten years. Amongst other things he accomplished was the weeding out of numerous favourites of the Khedive from various departments of the Interior; and the mudirs he introduced were men of a better class, and worked harmoniously with the English inspectors. He was also instrumental in making the Provincial Councils of real use and in getting some work out of the local municipalities. By the natives generally he was much liked. In 1902 he was awarded the Grand Cordon of the Order of the Mejidieh. In 1908 he left Egypt and returned to this country. For some time he served as an Alderman of the London County Council, and he was also a Justice of the Peace for Westmorland.

On taking up his appointment with the Egyptian Coastguard he had retired from the British Army, being placed on the Reserve of Officers. But on the outbreak of the present war he raised, formed, and trained the battalion of the Border Regiment which he commanded, and in November of last year he went to the front. Last May he was awarded the D.S.O., as recorded in these columns (June 9). He married in 1905 Countess Victoria Gleichen, daughter of H.S.H. Prince Victor of Hohenlohe-Langenburg. He leaves a son, who was born in 1908.

In a letter to the *Times*, Lord Cromer writes: "Colonel Machell has been numbered amongst those who have lain down their lives in the service both of their country and of the civilization of the world. Like so many who have done invaluable but unostentatious work, his name was but little known to the mass of his countrymen. That is an additional reason which prompts me to testify to the admirable services which he rendered as virtual head of the Ministry of the Interior in Egypt. Firm, just, genial, and thoroughly straightforward, this fine specimen of an English gentleman gained the sympathy and respect of all alike, and especially of the natives of Egypt, to whom he became endeared. Germany, with all her erudition and highly organized system of education, cannot produce Imperial agents of the type well represented by Colonel Machell. To us they constitute national assets of priceless value."

Major Frederick Christian Heneker, Leinster Regiment, attached Northumberland Fusiliers, has been killed in action. Born in 1873, he joined the Leinster Regiment in 1894, and was promoted lieutenant in 1896 and captain four years later. From 1901 to 1905 he was employed with the Egyptian Army, and from 1909 to 1913 he was an officer of the Corps of Gentlemen Cadets at the Royal Military College.

Second-Lieutenant Francis (Frank) Barnes, of the King's Liverpool Regiment, who was killed in France, was the eldest son of Mr. and Mrs. F. W. Barnes, of Wavertree, Liverpool, and before the war was in the Accountancy Department of the British-American Tobacco Company at Liverpool, and at one time represented that concern in Constantinople and Trebizond.

Among the Alexandrians who have recently met their death on the French front is Arthur Ecclestone, the eldest son of Mr. Ecclestone, who has resided at Alexandria since 1884.

Major J. Leadbitter Knott, who has been killed in action, was the last surviving son of Mr. James Knott, founder and managing director of the Prince Line. All the sons, three in number, have now sacrificed their lives in the war—two in France, the other at the Dardanelles—says a Liverpool contemporary. Thirty-three years of age, Major Knott, who was deputy managing director of the Prince Line, joined the Colours shortly after the outbreak of war. He was looked upon as the prospective Unionist candidate for the Hyde division. His home was at Wylam-on-Tyne. He had been in France twelve months. A short time ago he was awarded the D.S.O. for gallantry on the field, and recently he was placed on the roll of magistrates for the City of Newcastle.

WHERE TO STAY.

FRIDAY, JULY 14, 1916.

THE MESOPOTAMIAN CAMPAIGN AND ITS OBJECTIVE.

Having discovered a weak spot in the long Russian line stretching from Trebizond to Central Persia, the Turks are making the most of their opportunity. When it was realised that Turco-German intrigues were proving a menace to Persian neutrality and to the Indian frontier, the Russians set columns moving in Persia with a view to breaking up any hostile formations in the country and to restoring order at least in the North. One of these columns under General Baratoff found the enemy organisation, based on Kermanshah, more formidable than had been expected, and was compelled to undertake a definite campaign in Western Persia. An unbroken series of successes led the Russians to Hamadan and Kermanshah, and thence on to the Turco-Persian frontier near Khanikin. For a moment it looked as if the road to Baghdad had been left open for them; but the force which had approached the border was altogether inadequate to advance against a city so strongly held, and before reinforcements could be brought up, the Turkish command at Baghdad, benefiting, no doubt, by the capitulation of Kut, which freed a number of troops, was able to turn the tables on the Russians. During the last few weeks the Russians under General Baratoff have been steadily pressed back by superior numbers. Kasr-i-Shirin, Kerind, and now Kermanshah have in turn been evacuated. The Russians, evidently realising that there was little hope of the early arrival of reinforcements, have wisely decided to avoid a repetition of the history of Kut, and have preferred to impose upon the Turks the embarrassment of lengthening lines of communications, while shortening their own. This retirement is unfortunate, if only for the effect it will have on the local population. Their belief in the Russians may be temporarily shaken, for the Turks will probably be at pains to impress upon them by approved methods that they have indeed "put their money on the wrong horse." In itself the Russian withdrawal is of small military importance. There is no definite objective that the Turks are likely to reach, the capture of which would have an important bearing on the main operations, such as would have been the case, if Baghdad had fallen into Russian hands. On the other hand, until the sequence of events belies the expectation, we may count on the Russians arresting the Turkish advance before it reaches Hamadan and eventually rolling it back.

The proper co-ordination of the military efforts of the Allies in the Middle East calls for a very vigorous thrust on the part of the British Mesopotamian Expedition at this moment with a view to relieving the pressure on the Russians in Western Persia. Baghdad has been proclaimed far too emphatically as the British objective in this region to allow the campaign to come to an end before British troops enter the city. It would, therefore, be a grave mistake to regard the Mesopotamian Expedition now as merely a side issue of the European War. Whatever it may have been in its origin, it has become, owing to the course which the operations have taken, an entirely distinct enterprise. On the battlefields of Europe the Allies are fighting for the cause of liberty and justice among the nations. In Mesopotamia—no good purpose can be served by attempting to hide the fact—the issues at stake are British prestige throughout the whole Arab world and the future peace of India. If the resistance of the Central Powers collapsed to-morrow and the Allies dictated peace a few days later in Berlin, the Middle East would remain largely unaffected in its estimate of British power, and would base its future attitude towards Great Britain on the facts of which it has been able to take note itself, namely, that the British were flung back from Ctesiphon by a Turco-Arab force, were compelled to capitulate at Kut, and were unable to register a decisive success against the Turks. In these circumstances there can be no question of the Mesopotamian campaign being an unimportant appendage of the European war. It can only be regarded as a separate war, albeit a small one, and it requires to be treated as such. In other words, thanks to the way in which the campaign has been handled, or mishandled, Great Britain cannot afford to rely upon the Allies' ultimate success in Europe covering up failure in Mesopotamia, but must see the expedition through to a victorious finish, if there is to be lasting peace in the East as well as on the Continent. We are not concerned now with the antecedents of the campaign, or with the question whether it was necessary or advisable to advance beyond Kurnah in the first instance. The salient points are that a British force has matched itself against the Turks and their Arab levies in this region, and that it has been so far unsuccessful. Before the campaign can be allowed to come to an end failure must be wiped out, and this can only be done by the entry of British troops into Baghdad.

In the great majority of campaigns it may not be in accordance with military instinct for a belligerent to announce too clearly his actual intentions. With regard, however, to the Mesopotamian expedition, which, after falling back from Ctesiphon, is once more advancing, or trying to advance, up the Tigris, military considerations can hardly claim to impose reticence on the subject of the original British objective. On the other hand, in view of the sound dislike of military authorities towards the dissipation of strength, there is a danger that at this period of the European war the policy of merely holding the Turks while the final issue is being fought out in Europe may commend itself to a General Staff which has its hands full already, and prides itself on being freed from the shackles of political considerations. A clearer appreciation of all the factors in the situation, we hold, will prove that for once in a way political considerations, or rather the sole issue now raised by this particular campaign, must determine the military plans. The late Under-Secretary for War was right in contending that "it is undesirable to make public any information regarding the strength or dispositions of the British troops on the Euphrates line, or the intentions of our command in that quarter." These are details of military operations which must be kept as far as possible from the knowledge of the enemy. But the nation has the right to require that its interests in these regions shall not be sacrificed or even prejudiced by failure on the part of the Government to understand the issues at stake. In the face of all that has happened in Mesopotamia, including the despatch of an expedition ill-equipped and the absence of satisfactory measures for its reinforcement, there is a natural anxiety lest ignorance in high quarters should make the supreme blunder of all, and lay up a serious heritage of trouble for a time when the world is looking forward to an era of peace. No one asks that military secrets should be revealed, but it should be possible to allay the public anxiety lest Mesopotamia and the importance of its campaign should continue to be ignored. In many quarters the feeling is entertained that, if the steps that ought to have been taken to retrieve the mishaps of this expedition had been taken in time, General Lake's force would have been in a position to render timely aid to our Allies, now being pressed back in Persia.

EIGHTEEN YEARS OF JUDICIAL REFORM IN EGYPT.

(By Our Cairo Correspondent.)

Recently I announced the forthcoming retirement of Sir Malcolm McIlwraith from the post of Judicial Adviser to the Egyptian Government, which he has held since 1898. Somewhat appropriately he concludes his report (just published) on the work of the Ministry of Justice for the year 1914-1915 with a brief review of the reforms effected during the past eighteen years in the judicial and administrative machinery of the country. The changes involved by the declaration of a British Protectorate in the place of the previous Ottoman suzerainty, and the creation of a Sultanate of Egypt, which will undoubtedly affect the Department of Justice as much as, if not more than, any other administration in the country, "mark the end of an epoch in Egyptian history and the commencement of a new era," when a more or less complete upheaval of the system existing hitherto may be expected; and Sir Malcolm gives this review, as he says, "not assuredly in any boastful spirit . . . but simply as a possibly convenient record and reminder of the principal landmarks in the recent history of judicial institutions in this country." The review is divided into four main heads, viz. :—Law Reform, Native Tribunals, Mixed Tribunals, and Mehkemehs and Meglis Hasbys.

The most important law reform has been that carried out in the criminal jurisdiction. The Native Codes, which are founded on the French, are an adaptation made in 1883 of the Mixed Codes of 1876. They proved very unsatisfactory, and in 1898 it was decided to revise the Penal and Criminal Procedure Codes. This work took five years, and the new codes, "which were largely the work of Mr. (now Sir William) Brunyate," and were well received by judges and lawyers, included the introduction of a First Offenders' Law, more rational treatment of juvenile offenders, the complete recasting of the provisions concerning Recidivism, Attempted Complicity, etc., and the modification of the procedure in regard to Appeals and Provisional Execution of Sentences. In 1905, as a natural sequel to the provision of better treatment of juvenile offenders, Children's Courts were instituted in Cairo and Alexandria, and the Adviser mentions that the first judge selected to deal with these cases was the present Minister of Justice, "one of the most distinguished of our younger magistrates," H.E. Sarwat Pasha, whose report on the first year's workng of the courts contained observations "which have served as a most useful guide to subsequent judges in these courts." Three years later a Vagrant Children Law was passed, giving power to magistrates to send to the reformatory for an undefined period, not extending beyond their eighteenth year, waifs and strays found begging in the streets, whose surroundings were corrupting their morals, or who showed signs of precocious criminal tendencies. This law has had very good results. In 1908 the system of indeterminate sentences for habitual offenders was introduced, and dangerous criminals were segregated to special establishments for indefinite maximum periods. Other important penal law reforms were the promulgation of a Law of Criminal Conspiracies, in 1910, a Law for the Repression of Usury, in 1912, and a Law of Unlawful Assemblies in 1914. In the civil jurisdiction the most important reform undertaken was the revision of civil procedure, which was commenced in 1906. The discussions were somewhat protracted, but the first fruits were produced in 1909 by the promulgation of a law regulating the practice of the profession of experts, who play a prominent part in the procedure of the Native Tribunals, and whose freedom of action had been a very unsatisfactory feature. This was followed in 1910 by the institution of a Preparatory Judge in all the central courts for the clear settlement of the issues for trial and the acceleration of procedure. Both these reforms have proved most satisfactory. In view of the imminence of an extensive judicial reorganization and the necessity of undertaking a more thorough and systematic revision of Civil Procedure, a large representative Commission was constituted in 1913, and the work done by the previous revisors was taken over by it.

In regard to the Native Tribunals, the policy pursued by the Ministry "has been one of gradual decentralization." When this jurisdiction was first started centralization was somewhat excessive, owing to the scanty element available to form an efficient native magistracy, but thanks to the subsequent development of legal education it was found possible in 1892 to transfer jurisdiction in all cases of misdeameanour from the three-judge chambers of the Central Tribunals, which numbered seven, to some thirty Summary Tribunals, each composed of one judge, sitting all over the country. For the first time it became possible to deal effectively with misdeameanours, and in 1904 a further step was taken in the direction of decentralization by the establishment of Markaz (District) Tribunals sitting in every Markaz of the country and presided over by a peripatetic judge, who was able to dispose of all police offences and most petty misdeameanours in the locality where they were committed. These judges had fairly extensive powers, and a distinctive feature of the reform was that the enquiry and prosecution were entrusted solely to the police instead of to the Parquet (Public Prosecutor's office). The next step was the institution of Assize Courts in 1905. These were composed of Appeal Court judges, who sat monthly and disposed of all crimes, without appeal save on points of law, the prisoners being committed by Committing Magistrates instead of by the Parquet as formerly. That the innovation was bound to be more satisfactory than the previous organization was certain; for up to then prisoners had been tried in first instance by the Central Tribunals, from whom an appeal could be made to the Court of Appeal in Cairo, which, in practice, took its decision on the papers only. Everyone agrees that the new organization, which owed to Lord Cromer its introduction in the teeth of strong opposition, has proved a marked success, both as regards the greater guarantees of justice and increased celerity of trial. In connection with the latter feature it may be pointed out that the average interval between the commission of the crime and the final sentence on the offender is to-day 106 days, as against 230 days under the old organization. Further decentralization was effected in 1912 by the institution of Cantonal Courts, due to the iniative of Lord Kitchener. These courts, which are composed of unpaid notables, sit in the villages and dispose of petty civil cases up to £E5 in value, in conformity with local usage; and also punish minor contraventions. "Justice is thus brought very much nearer to the doors of the people." With the introduction of these courts the previous Markaz Courts disappeared except in the Governorates, their powers reverting to the Summary Courts, and a Summary Judge was established in every Markaz where there is now also a Parquet. The manner in which decentralization has been carried out may be gauged from the fact that, whereas in 1898 there were 43 Summary Courts, with 105 judges and 95 members of the Parquet, to-day there are 90 of these courts, with 172 judges and 182 Parquet substitutes, with, in addition, 236 Cantonal Courts. Reference to the Native Tribunals would not be complete without some mention of the School of Law, where the future magistrates are educated. Up to 1899 instruction was given only in French, but in that year an English section was introduced. To-day the influx of French-speaking students has practically stopped, and the last of them will receive their diplomas in 1918. It is interesting to note that, whereas in 1898 there were 73 students in this school, with fourteen lecturers, to-day the number is 238, with no fewer than 27 lecturers.

In regard to the Mixed Tribunals, the hands of the Ministry have been considerably tied by the Capitulations, under which not even the simplest changes could be effected in legislation without the consent of fifteen Powers. The Powers were induced to consent to the formation of International Commissions "composed of their Diplomatic or Consular Representatives in Egypt, assisted by their senior judge of the Mixed Tribunals as technical adviser." But this was a very dilatory way of dealing with questions of legislation, for the judges were usually too occupied with their tribunal work to give much time to the Commission. All the same, certain important improvements were effected, such as the promulgation of a Pre-emption Law, a Law of Pawnbrokers' Establishments, a Law of Bankruptcy, introducing the system of composition and conferring criminal jurisdiction on these Courts in the case of bankruptcy offences, a Law of Expropriation for purposes of public utility, and a Stock Exchange Law, validating bargains in "Futures" and regulating Stock and Produce Exchanges. For many years a scheme for the amalgamation of the Land Registries and the introduction of a system of Registration of Title was studied by the Ministry; but it aroused very strong political opposition, and the assent of the Powers could never be obtained to this very necessary reform. As the Judicial Adviser says, "if one of the most defective branches of the law in Egypt and the most fertile source of lawsuits is the uncertainty of titles to real property, the responsibility for this state of affairs cannot be laid at the door of the Ministry of Justice." It was obvious to all that the machinery of legislation by International Commission was quite impracticable for a country developing so rapidly as Egypt was doing, and efforts were made to get the Powers to agree to some more simplified procedure for the amendment of mixed legislation. It was not, however, until 1911 that at length H.E. Rushdi Pasha, then Minister of Foreign Affairs, managed to obtain the assent of the Powers to the establishment of a Legislative Assembly of the Mixed Courts, composed of the Appeal Court Judges in general meeting supplemented by the senior judge of each of the Treaty Powers not already represented on the Appeal Court Bench. This assembly received power to amend and add to the Mixed Codes without touching any question dealt with by the Statute of Judicial Organization. The Egyptian Government has the exclusive right to initiate legislation, and the Powers can demand a reconsideration of any project within three months of the date at which it was approved, any project not promulgated within three months after that period being deemed to have lapsed. The new machinery "has proved a very useful institution in practice," and under it certain long-awaited reforms have been effected, notably a revised law for the expropriation of immovables, for the *revendication* of movables and for the abolishing of the dilatory procedure known as "defaut faute de conclure," to which must be added the now famous Homestead or Five Feddan Law establishing the immunity from seizure and sale of small agricultural holdings not exceeding five feddans. As the general application of this latter measure has "been retarded by the necessity of giving time for the liquidation of the existing situation there are not at present sufficient data for judging of its efficacy."

The reform of the Mehkemehs has always been a delicate problem owing to the opposition of persons interested in hindering reforms or to the natural susceptibilities of the people

As far back as 1899 an attempt was made to modify the constitution of these courts by introducing into the Supreme Mehkemeh two Moslem judges from the Native Court of Appeal, who would sit with two Ulema under the presidency of the Grand Kadi. But this proposal "was declared to be incompatible with religious principles and had to be abandoned. Yet, despite the opposition to any tendency towards amalgamation of the lay and religious courts, and as a result of persistent efforts on the part of the Ministry, considerable improvements have been effected in the organization and procedure. First, the Mehkemeh Bar was reorganized in 1900. Then regulations were issued in 1907 simplifying the procedure for the execution of judgments, thus assisting poor suitors, especially women, in the recovery of debts. In 1909-1910 an important reorganization of procedure was effected, and whilst the existing courts were redistributed, much of the old formalism was swept way, a more reasonable tariff of costs was introduced, and the hearing of cases was much accelerated. In addition, the Kadi has been empowered to commit to prison for a period not exceeding one month persons possessing adequate means who disobey an order for the payment of alimony to their wives and children. "In view of the prevalence and the facility of divorce in this country, and of the peculiarly helpless position of the Mohammedan wife whom her husband is tired of and declines any longer to support, the utility of some measure of coercion in such cases is self evident," and it is satisfactory to note that although some hesitation, due to past experience, was at first felt in regard to entrusting the Kadi with such powers, they have been judiciously used and have proved remarkably efficacious. Finally, the Ministry started in 1898 on the task of classifying and indexing the Mehkemeh Archives. The latter, which contain title deeds of great importance, were in a chaotic state, and it was often difficult to find documents. The work of reorganization took until 1911, and an idea of what it entailed can be gathered from the facts that 78,000 registers "facilitating searches for the last 400 years," and 32,000 general registers containing deeds of all kinds, "thus rendering it easy to make searches back to the origin of the Mehkemehs themselves—a period of remote antiquity"—were indexed, and 700,000 files of lawsuits and 1,000 miscellaneous files of various kinds were classified chronologically. "All kinds of deeds can now be produced in a few minutes, whereas such searches formerly required weeks, and sometimes months, and, even then, were not infrequently ineffectual." In addition, a Training College for Kadis was inaugurated in 1901. The organization of the Meglis Hasbys, which look after the fortunes and persons of minors and lunatics, etc., has also been tackled; but, although some alterations have been carried out and matters have been improved, the only solution admitting of any permanent and satisfactory improvement in the present treatment of these cases is that they should all be dealt with by the ordinary law courts, where, if errors and abuses did occur, "they would certainly not be so numerous, and supervision would be more effective." A revised code of Personal Status had been prepared by a committee of competent persons, but the war broke out, and financial considerations prevented anything further being done in the matter. In view, however, of the grave abuses which go on at present to the detriment of the weakest classes of the community, "it is greatly to be hoped that it will be one of the first matters to be reconsidered when the political and financial conditions again permit."

The foregoing is necessarily but a rough outline of the judicial reforms introduced since 1898, and it does but scanty justice to the efforts made by the Anglo-Egyptian legal authorities to purge the administration of all the inefficient and corrupt elements which pervaded it two decades ago, and to secure to the people, without distinction of class, a simple and easily accessible form of justice, which, in the peculiar circumstances, had hitherto been unknown to them. One could fill reams with the details of the difficulties that had to be overcome, the abuses that had to be eradicated, and the intrigues on the part of interested parties that had to be counteracted. At times, it seemed quite hopeless to try to attain the desired object, but courage, dogged perseverance, and patience have triumphed over the traditional inertia and conservatism of the East, and the marked improvement noticeable to-day in the tone of the judicial administration of the country, in the methods of dispensation of justice, and in the attitude of the people towards the various jurisdictions, as compared with the state of affairs eighteen years ago, constitutes an achievement of which Sir Malcolm McIlwraith and his successor, Sir William Brunyate, who has had a prominent hand in all the reforms, may, together with all the other members of the Ministry of Justice, feel justly proud.

The Alexandria Municipal Delegation has approved a proposal for raising funds for the erection of a statue to Lord Kitchener in the city and for giving his name to the Bab-es-Sharki Garden.

A disturbance is reported to have been caused in Belgrade owing to the Governor commanding the clergy to hold mourning services on the anniversary of the Archduke Francis Ferdinand's death.

The efforts of the Montenegrin Red Cross and Relief Fund to provide succour for the half million people in Montenegro have met with gratifying success, mainly through the labours of the Fund's chairman, Sir Roper Parkington, and Mr. A. Devine. The consent of Austria to carry out relief work has now been obtained. The Allies are desirous that steps should be taken to guarantee that none of the food reaches enemy hands, and it is considered probable that America will act as overseer of the operations. It is proposed that the relief expedition shall start from an Italian port.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Mesopotamia Papers. July 11.

Viscount MIDLETON asked when the papers relating to the Mesopotamian campaign would be published.

The Marquess of CREWE said that further examination of the paper which it was proposed to publish had shown that the military objections to certain portions were stronger than was at first believed. He understood that the delay in publication was due to that cause only.

HOUSE OF COMMONS.

Turks and Arabs. July 6.

Mr. TENNANT, replying to Sir J. J. Jardine, said: It is, of course, undesirable to make public any information regarding the strength or dispositions of the British troops on the Euphrates line or the intentions of our Command in that quarter. Reports have been received that, owing to local dissatisfaction with Turkish actions, disturbances broke out at Kerbellah about April 22, and continued until May 14, when a Turkish force sent from Baghdad attacked the inhabitants. The attack, however, failed, and the Turks were compelled to retire in the direction of Baghdad. During the fighting on May 14 the Turks are reported to have bombarded and seriously damaged the sacred domes of Kerbellah. No report has been received of any rising of the Arabs near Babylon. Some irregular marauders have recently given us trouble both north and south of the Hamar Lake. These have been dealt with effectively, as announced in the War Office communiqués issued on June 16 and 30.

Mohammerah-Khoremmabad Railway. July 10.

LORD ROBERT CECIL, replying to Colonel Yate, said that the military situation in South-western Persia had rendered any further development of the scheme for the Mohammerah-Khoremmabad railway impossible for the time being. When the local situation improves further steps will be taken in consultation with the Government of India.

The Kut Relief Expedition.

Mr. FORSTER informed Mr. Peto that the dispatches relating to the Kut-el-Amara relief expedition, and particularly to the action fought under General Aylmer on March 8, had not yet been received by the War Office.

Our Troops in Mesopotamia. July 12.

Captain AUBREY HERBERT asked the Prime Minister whether he would give a day for the discussion of the conduct of the campaign in Mesopotamia.

Mr. ASQUITH: I do not think that the present moment is opportune for such a discussion, but I will, of course, bear my hon. friend's question in mind.

SIR E. CARSON: Is this House and the country never to get at any time reports of what is going on in Mesopotamia? May I also ask whether these reports are being purposely kept back, and whether the right hon. gentleman does not know that there is amongst a considerable portion of the people who have connections with men in that country the very gravest anxiety as to the negligence that has taken place in reference to the whole of the operations in Mesopotamia?

Mr. ASQUITH: There is no desire to keep anything back. The House is entitled to have, and I hope will have, the fullest possible information about it. No one is more desirous than the Government that the matter shall be fully and thoroughly discussed, but I do not know that this is a particularly opportune moment. The suggestion that we are burking discussion is entirely unfounded. The condition of the troops in Mesopotamia is engaging our whole attention, and the most careful steps are being taken to remedy defects proved to exist and to supply immediate necessities.

SIR E. CARSON: I shall put a question to the right hon. gentleman early next week, and in the event of my not getting an answer I shall ask leave to move the adjournment of the House.

CAPTAIN AUBREY HERBERT: May I ask whether the right hon. gentleman does not think that it would be in the national interest now to fix the responsibility for the economy that has governed and hampered the whole of the Mesopotamian campaign from its initiation to the last few months—to fix the responsibility on the individuals concerned?

No answer was returned.

THE MESOPOTAMIA OPERATIONS.

The Secretary of the War Office made the following announcement last Friday:—A report has been received from General Sir Percy Lake to the effect that marauders in Turkish pay have lately occasioned some trouble on the Tigris front. About Sanna-i-Yat (north bank of the Tigris) there was some reciprocal activity during the night of June 29-30, without any special incident or particular result. The general situation remains unchanged both on the Tigris and the Euphrates line.

Climatic conditions in Mesopotamia are particularly trying at present, but some improvement in this respect may be anticipated when the *shamal* (north-west wind) sets in. It is already overdue.

According to the Athens *Hestia*, demonstrations are being made by disbanded Greek reservists with a view to influencing the coming elections. The *Hestia* hints that these demonstrations are being engineered, and says that their effect must be to increase the difficulties of M. Zaimis.

THE PRESS ON THE NEAR EAST

On Going to the Devil.

Last Friday the *Morning Post* published a despatch (dated June 24) from its Athens correspondent describing the presentation of the Allied Note and its effect in Athens. The general feeling was one of intense relief and a spirit of "cheerfulness, even of gaiety," was to be seen in the crowds. The writer concludes his article as follows:—

Of course, the Press supporting the late Government (which, as I have pointed out more than once hitherto, is identical with the Press subsidised by the German propaganda) has not ceased to fulminate against the "brutal insult" offered by the Allies to Greece's independence and sovereignty as a State. It is hardly worth while noticing these hireling diatribes. But one article in the *Nea Himera* deserves mention, as this journal claims with some reason to voice the sentiments of the Palace. It is entitled "The Greek People Master of Its Destinies," and in tragic language informs the public that by the terms imposed by the "brutality" of the three Powers the Greek people are now once more "in control of their destinies," and that if M. Venizelos should be returned to power by the new elections and should again disagree with the King upon the country's foreign policy King Constantine, "who has thus far twice saved Greece from great disasters by his wise and patriotic policy, will no longer exercise his constitutional right of veto," but will let the country go to the devil in its own way. This apostrophe to the nation, with its implied threat and its indirect admission that up to the date of the Allies' ultimatum the Greek people were *not* masters of their own destinies, is naïve, to say the least. And there is every reason to believe that if the Greek people must go to the devil they would rather do so in their own way than in anybody's else's. If this article may be taken as indicating a change of heart upon the Throne of Greece, and King Constantine proposes to keep his activities hereafter within the spirit of the Greek Constitution, this will not be the least of the benefits accruing to Greece through the "high-handed" interference of the three Protecting Powers.

A Word for the Greek Point of View.

In an article entitled "The Position in Greece," which he contributes to *Country Life* (July 8), Mr. George Lamley emphasizes the fact that Greece is "for all practical purposes an insular kingdom." This has its advantages, but also its disadvantages, and for Greece the disadvantages are very great:—

There is not a town of importance that could not be destroyed by modern battleships, nearly all of them being on the coast, and Athens itself less than four miles from the sea. As recent events have shown, a strict blockade is just sufficient to reduce the capital to submission, if continued for a few weeks; but even if a reserve of grain were accumulated, so that it could hold out for a long period, the idea held by many Greeks, and expressed by some of their papers, that neither France nor England would dare to bombard Athens for fear of damaging the Parthenon and the other magnificent ruins on or near the Acropolis, betrays a woeful ignorance of modern gunnery. It is true that the modern city lies behind the Acropolis, and is screened by it, but most of its principal buildings are from half a mile to a mile away from any of the great monuments of antiquity, and the latter would therefore not run the slightest risk of damage. Their opinion, however, is an unconscious tribute to our higher culture, for they tacitly admit that the question of damage to the greatest works of ancient art the world possesses would have had no weight with the Germans.

Another point to be taken into consideration in fairness to the Greeks is that "we do not hold the command of the sea in the Eastern Mediterranean in the same way that we do in the North Sea, and that the Austrians have one of the finest naval bases in the world, the Bocca di Cattaro, less than 300 miles from the nearest point of the Greek coast . . . and that there was always the risk, if Greece joined in the war on our side, that the Austrians might break through, and, running down the coast, wreck vengeance on the practically unprotected ports of Patras, Corinth, and the Piræus, and even on Athens itself." The risk, one thinks, is a very slight one, but perhaps it looms large in the eye of the Greek. The writer considers that the anxiety of nearly every Greek to keep out of the war "is quite understandable."

With the object-lesson of Belgium before them, deliberately designed as it probably was to exert a deterrent influence on all the smaller states whose sympathies might be with the Allies, and later on that of Serbia, close at their doors, no Greek would care to incur the hostility of Germany, who had it in her power to overrun and devastate Macedonia with her own or Bulgarian troops, and seriously threaten Thessaly and Epirus and the northern provinces; and to face at the same time, as previously pointed out, the risk of naval attacks by the Austrians.

Again, the Greeks have not forgotten their long struggle for independence; there are few in the country "who have not to mourn some relative or friend who lost their lives or have been permanently disabled, either in their war with Turkey in 1900 or in the wars with Turkey and afterwards with Bulgaria in 1912 and 1913." And the writer asks:—

With such memories, is it to be wondered at that many patriotic Greeks wish to keep out of the struggle if possible, although their sympathies are strongly with the Allies, and in spite of the temptation held out to them of adding to their kingdom some of the territories now under foreign rule in which the major portion of the inhabitants are Greek? Those who consider the Greeks are guilty of base ingratitude in not throwing in their lot with the three protecting Powers, to whom they owe their existence as an independent state, should weigh these facts carefully, and will then probably admit that there is much to be said for the Greek point of view.

"A Forgotten Force."

Under the above title *The Times* on Wednesday devoted a leading article to our Mesopotamian Expedition. It presses for publication of papers, but declares: "Our principal concern just now is the improvement of the condition of the troops in Mesopotamia." There would certainly appear to be room for improvement, if complaints received by *The Times* "from the troops themselves, from their relatives at home, from correspondents in India, and from persons who have returned to this country from the Tigris, regarding the condition of the force and its frequent lack of necessaries," are well founded:—

The force appears to be rationed upon principles which would be appropriate for operations in Spitzbergen in mid-winter, but a different scale of diet is required in Chaldean deserts when the temperature is considerably above 100 degrees in the shade. The men would, however, put up with rations of any sort, if they only got them regularly in sufficient bulk; but we gather that the work of the commissariat on the Tigris is uncertain and irregular, and we receive frequent allegations of scanty food. The troops in Mesopotamia feel, moreover, that while necessaries are sometimes denied them, they receive a very inadequate share of the "comforts" which are showered upon the forces in France and elsewhere.

As to the question of transport, we read:—

Failure of the transport arrangements is at the root of all our difficulties in Mesopotamia, and there is absolutely no excuse for the want of foresight which was shown. The characteristics of the Tigris are almost as well known in India as those of the Thames, and the reckless way in which this expedition was allowed to expand without making proper provision for river transport is quite unpardonable.

The whole subject of the expedition, says *The Times*, calls for searching inquiry.

More light ought to be thrown upon its inceptions, the unwarrantable enlargement of its objects, the obscurities of the decision to advance from Kut to Baghdad, the mishandling of the relief columns, the deplorable failure to save General Townshend, and the continued use of the force. The Government do not appear to have made up their minds about what they hope to achieve in Mesopotamia, any more than they made up their mind about the Dardanelles.

Arab Views on the Arab Revolt.

The *Egyptian Gazette* (June 27) translates from the *Ahram* portions of an article by Sheikh Hamid Ibrahim, who discusses the Shereef of Mecca's declaration of Arabia's independence. After referring to the various views taken of the event, the writer proceeds:—

Yet arguments cannot change the established fact that the people of Arabia have for a long time past longed to attain independence, and made various efforts to secure it, owing to the misrule and injustice of the Turks. Their attempts failed on previous occasions because every one of their Emirs thought himself fit for the leadership. Matters have now changed. The present movement has been started by an Emir whose superiority cannot be doubted, for he is the influential descendant of the Prophet and the inheritor of the wisdom, courage, and prudence of his worthy ancestors of the Koreish and Abd Munaf. All other chiefs must bow before the Grand Shereef of Mecca, and follow him in the realisation of the long-cherished hope of Arab independence and the revival of the old glory of the people. . . . Those among Moslems who have a sense of fair play will see that the Shereef's movement is only right. It cannot be disapproved, for all that the Moslems of the world desire in this respect is to have a safe path in the Hejaz to the Holy Shrines, and it is to be hoped that the pillage and robbery which prevailed in the Holy Land of Islam will henceforth cease to exist under the independent rule of the greatest Arab Emir.

In its next issue (June 28) the *Gazette* gives a translation from an article in another native journal, the *Ahaly*, dealing with the same subject. The writer considers that the two principal reasons that induced the Shereef to take his momentous step were: (1) that "the Governors who had been entrusted with the administration of Arabia did not know how to deal with the people of that country, and they failed to establish public security on a sound basis"; and (2) that "the Arabs have found themselves oppressed in this war owing to

Digitized by Google

the fact that they live in a country of poor resources which relies essentially on imports and the pilgrimage season." He continues:—

When the Ottoman Empire was blockaded by the Allies Arabia was left without any external profits, and its inhabitants then felt the oppression befalling them. As there was no war between the Arabs and the Allies, the former saw no harm in emerging from their situation to remove that oppression. It is evident that this serious movement, the echo of which is now rumbling throughout the world, would not have occurred had Turkey remained out of the arena of the war and refrained from following the Germans in a campaign where she has no real interests to serve.

Turkey's "Cynical Adventurers."

The *Spectator* (July 8) detects signs of "a reaction in the attitude of the British people towards Turkey," and welcomes these signs thus:—

Because at Gallipoli the Turks happened to be somewhat more chivalrous fighters than the Germans when opposed to British and French troops, and were willing to make arrangements to succour the wounded in the land between the trenches, a sort of tradition grew up that the Turks were gentlemen and clean fighters, and our Turkish enemies became almost popular. This was a great mistake. The gentlemanly behaviour of Turkish officers at Kut and Gallipoli cannot make us forget the horrors of the Armenian massacres or condone the action of the Turkish Government in selling themselves to Germany. If Enver Pasha and the crew of cynical adventurers who surround him were to be allowed to retain their hold upon Turkey it would be an evil day for this country. It is quite possible that when they begin to realise that they put their money on the wrong horse in supporting Germany attempts may be made by them to save their own skins, and obtain security to continue to oppress not merely the Christians of Syria and Asia Minor, but that great Arab population to whom they have proved almost, if not quite, as cruel masters as they have to the Christians.

A Plea for Action.

Writing in the *World* (July 11), Mr. West F. de Wend-Fenton urges strongly that the Allies should take vigorous action in the Balkans. His article is entitled "The Urgency of a Balkan Offensive," and the following extracts will serve to indicate the writer's line of argument, which certainly seems a sound one:—

Even if she were to sustain far more decisive defeats on the Western front than she has experienced at present, or, indeed, than seem within the bounds of possibility at the time of writing—even if Russia continues to deal staggering blows in Galicia and the Bukovina—so long as the "Balkan Zug" runs merrily on its way between Vienna and Constantinople, so long as German and Austrian influence is dominant in the Balkan Peninsula, so long as the Franco-British force is cooped up in Salonika, the German High Command can reassure the nation by pointing out triumphantly that all the combined might of the Allies has not been potent to restrain the creation of a "Mitteleuropa" whose tentacles are in a fair way to extend from Hamburg to the Persian Gulf. If this position is allowed to continue—and at the present moment there has been no serious attempt made to overthrow it—British naval supremacy will exist only in name, and no amount of trade conferences or commercial agreements among the Allies will have the slightest effect in destroying the Teuton dream of Pan-Germanism.

If we wish to avoid another disastrous war before the ink is dry on the treaties which will mark the end of the present conflict, we must prevent the creation of the Mitteleuropa of Tannenberg, of Liszt, of Naumann, and of Helfferich. We shall only succeed in that by force—not by conferences or tariffs—and the force must be applied in the locality where the danger lies.

If we wish to check the permeation of the Balkan Peninsula by the Central Powers before it has gone too far we must make an upward move from Salonika. Directly this is started, Roumania will pour troops over the Bulgarian frontier as she did in 1913. Bulgaria will be pulverised, Austria will be threatened in yet another vital spot, and the one outlet from the ring which is encircling the Germanic Powers will be effectually closed. It is not too much to say that a successful offensive in Macedonia—which would be assured of the co-operation of Roumania from the moment of its inception—would do more to shorten the war than half a dozen brilliant successes on either the Eastern or the Western Front. . . . Once a definite advance against Bulgaria is made by the Allied troops, Roumania will let loose her long-pent-up forces over the frontier, and the rest will be easy. An upward move from the Balkans, in conjunction with General Brusiloff's advance in Galicia, would be the last nail in the coffin of the tottering Austrian Empire, and, moreover, its moral effect in Turkey would be so pronounced that the Turks would probably seize the opportunity of definitely relinquishing a struggle which has long been distasteful.

A successful offensive from Salonika would exercise a decisive influence on the war. Continued stagnation there will mean that Germany will develop her plans for the domination of the Near East until their overthrow will present almost insuperable difficulties. Are we to sit by with folded hands, or shall we strike when the blow may well prove a *coup de grâce?*

Concerning El Islam.

To the *New Age* (July 6) Mr. Marmaduke Pickthall contributes the first of a series of articles, "Islam and Progress," which promises to be both interesting and instructive. In the course of his article Mr. Pickthall remarks, parenthetically, that educated Moslems "are generally much better informed concerning the theory and practice of Christianity than are educated Christians with regard to the teaching of Islam." This is certainly true, and equally certainly deplorable—at least as regards those who are brought into contact with Moslems and those who judge Islam on very insufficient data. These articles, therefore, should be of real value if studied carefully and with an open mind. Mr. Pickthall's opening paragraph is a challenge:—

The opinion prevalent in Christian countries with regard to El Islâm is that, as compared with Christianity, it is a religion essentially unprogressive, and, to some extent, degrading to the human intellect. Nothing could be further from the truth. The sort of lethargy, comporting ignorance and superstition, which has weighed upon the Muslim masses for the last three centuries is the result of historical circumstances very similar to those which darkened Western Europe in the period before the Renaissance. It has little more than a geographical connection with the Mohammedan religion; and now, with the revival of a scientific education, it is at an end. It would be a serious mistake to suppose, in view of the relatively backward state of the Islâmic world, that El Islâm itself is unprogressive in the modern meaning of the word. How can it be, when one reflects that modern progress is the outcome, not of Christian doctrine, but free thought, and that Islâm, unlike Christianity, prescribes free thinking as a duty for believers.

Again, he tells us that—

In El Islâm the mind of each individual man is entrusted with that authority and jurisdiction which in orthodox Christianity is reserved for a close priesthood; man's mind is God's vice-regent upon earth, with full liberty of judgment over everything which it is capable of understanding. Only God, the great encircling mystery, is outside its faculty of comprehension or imagination, and must remain the object of devout belief and holy fear.

The subject is, of course, highly controversial, but Mr. Pickthall writes on it with much restraint, and what he writes is full of interest.

Articles to Note.

"On the Turko-Egyptian Front," by Nimrod, in *Chambers's Journal* (July).

"The Gallant Serbians," by Oliver Bainbridge; and "Lord Kitchener of Khartoum," by Lieutenant-General F. H. Tyrrell, in the *Asiatic Review* (July).

"The Rising of the Arabs," by A Forty Years' Resident in Turkey, in the *World* (July 4).

"The Prophet of Serbia's Renascence: Life and Work of Ivan Mestrovitch," by George Glasgow, in the *Christian Commonwealth* (July 12).

SERBIAN NEEDLEWORK.

An interesting collection of Serbian needlework, embroidery, handwoven carpets, etc., is on view this week at the premises of the Serbian Relief Fund, 5, Cromwell Road, S. Kensington, where it can be seen each afternoon from 3 o'clock to 6. Most of the exhibits are the work of Serbian refugees at present in Corsica, but there are also examples of antique embroidery and dresses lent by Lady Paget and others. There are close on 4,000 Serbian refugees in Corsica, and the Relief Committee has sought to find them an employment interesting in itself, which should enable them to supplement the grant made by the French Government, and which might be the beginning of a permanent industry if people in England and France can be sufficiently interested. The artistic needlework and embroidery of Serbia has a history dating from about the ninth century, when a French princess married a Serbian king, and introduced it into her new country. She took with her ten ladies, all expert needlewomen, and from them the other ladies of the Court learned the art. In the survivals of the needlework and embroidery of that early period there can still be found a modified fleur-de-lis and other evidence of the French origin of the art. The Turkish invasion and conquest introduced a new element, of which the effect can be seen down to our own day; from this, however, the Serbian needlewomen are now emancipating themselves, and in the embroidered towels, etc., now on view the principal foreign influence that can now be traced is that of Russia. The starting of a new work always has its difficulties. In this case there were difficulties first of getting the right kind of wool, and next with regard to dyes. Aniline dyes are not used, and the refugees thought there was little prospect of their finding in Corsica the plants from which they are accustomed to prepare dye-stuffs in their own land. However, the plants were sought for, and the bright colouring of the embroidery on view is the evidence that they were found.

H.E. the Serbian Minister (M. Boshkovitch) formally opened the Exhibition on Monday last. He said it was a pleasure to think of the refugees being found some of their own national work to do. But he was sorry there was not among them one of the professional carpet-makers of Pirot, for he would have remembered or originated so many designs. The thanks of the Serbian Legation were due to the ladies who had originated the work in Corsica.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

It has long since been recognised that when the war comes to an end there will be many problems in regard to our commerce and industry which will require solution, and which will be very difficult in the solving. The matter has attracted a great deal of attention, and it is no secret in the City that very strong representations were made to those who sit in high places, and also that the authorities readily admitted the necessity for action, as readily, indeed, as commercial people themselves. There were difficulties in the way of immediate action at the moment, many of them connected with questions of grave national importance, which first had to be settled. But the matter was tackled eventually, and, as stated in THE NEAR EAST last week, the President of the Board of Trade appointed a Committee "to consider the best means of meeting the needs of British firms after the war as regards financial facilities for trade, particularly with reference to the financing of large overseas contracts, and to prepare a detailed scheme for the purpose."

***

On the whole, the names of the Committee will be regarded as satisfactory, although I confess to unbelief in respect of the usefulness of Sir William Clark, lately returned from India, where for five years he was an indifferent Member for Finance and Commerce in the Government; the selection of Lord Faringdon, better known as Sir Alexander Henderson, is unexceptional, and the same may be said also of Mr. Dudley Docker, Mr. J. H. Simpson, and Mr. W. H. N. Goschen. As to the others, we must "wait and see." Their names stand high in British commercial and industrial councils—a fact which speaks for itself.

***

I want to say this, however—the Committee will not achieve a maximum of success. It is an incomplete body—that is, unless only firms in the United Kingdom are to be assisted. If that is the case, nothing more is to be said. But can it be so? Surely in the Dominions, in the Colonies and Dependencies the problem to be attacked will be as acute as it is in the United Kingdom. Are our friends oversea to be left to fend for themselves? Let us remember that they have all borne their share of the heat and burden of the day: they have carried burdens, made sacrifices, suffered restrictions in trade, and consented to divert their energy and skill to unknown fields. When the war is over they will have to retrace their steps, and it will be a costly proceeding. It will be argued, perhaps, that that will be a matter for the Dominions and the Colonies themselves. Well, suppose we concede that—for the sake of argument only—is it to be argued, further, that the Mother Country is without responsibility? It is obvious that on this Committee there should have been overseas representatives, the work should have been regarded as Imperial in the widest sense of the word, and no corner of the Empire should have been left out of account. By all means let Australia, and India, and Egypt, and South Africa, and all the rest of them finance their own people, as far as may be; but an Empire Committee would have arrived at a more comprehensive estimate of what the real need will be than the merely parochial body that has been evolved.

***

In the July number of *Kelly's Monthly Trade Review* there is a forcible and informing article dealing with this question of capturing German trade, and although it is general in terms the principles it enunciates are on sound lines. "We require organisations abroad as sentinels of British business at every centre where markets exist," says the writer. "It is surely incumbent on the Board of Trade, the Foreign Office, and our Chambers of Commerce to prepare the way now; but it is equally incumbent on our manufacturers, shippers and traders to study the possibilities of establishing agencies abroad where markets can be greatly developed." But my suggestion goes farther than that. The Board of Trade and the Foreign Office are all very well in their way, and their help will be useful; but in this matter a healthy and vigorous Chamber of Commerce will be able to do more by a simple agreement between its members in a day than the official bodies will accomplish in a year.

***

My commercial and industrial friends in Egypt, who learned to disapprove of German methods before the war, will be prepared to adopt any straight strategical proposition designed to prevent the Huns from regaining any of their old ascendancy when the armed conflict has ended. Frankness is necessary in this important matter, however, and it is frankness, not ill-nature, that leads me to observe that in Egypt there are so many trading firms and persons not of British nationality that special efforts will be necessary if the Germans and Austrians are to be kept in the outer darkness when the rest of the world will once more be walking in the light. It is not to be expected, perhaps, that aliens will take up our quarrel for us, and let us be thankful that we are strong enough to do without them; but it will almost be useless for British concerns in Egypt to restrict their relations with the Huns if others resume their old trade relations with them. I believe this point of view will appeal to all my readers, who, I am sure, will be able to exert an influence over their non-British but non-enemy neighbours.

***

Those who know Egypt and the East generally will agree with me that sentiment plays a great part in our relationships with our neighbours. All else being equal, there is a tendency to ignore racial differences in the desire for amity and good-fellowship. If all things *were* equal, it would be desirable that this benevolent attitude should continue; unfortunately, however, that is no longer possible if we are to do our duty to our own people and to our Allies. It is unthinkable that the men who have desolated wantonly and ruthlessly some of the fairest lands in Europe, who have committed excesses of which even hardened men of the world can only speak with bated breath, who have torn up and repudiated the most solemn compacts, can ever again be treated with friendship and confidence. That is the case in brief against the Hun. It is important to remember, too, that the German and Austrian soldier of to-day will be the merchant and trader of to-morrow. Will you trust them? I think not. Furthermore, reasonably careful men will utterly decline to trust those who do, which is a reason to include among the Huns all those who are prepared to deal with them. Therefore, I say, the motto of Egypt should be—"Watch your alien neighbour," and for its Chamber of Commerce, "Don't wait for the Foreign Office."

***

The statement—which lacks official confirmation up to the time of writing—that the Powers of the Entente are prepared to assist the Greek Government in a loan has aroused much interest in Great Britain. I need hardly say that we have in this country many who are interested in the Greek loans, and that if default were to be made in respect to these many British investors would stand in as considerable losers. I hope the circumstances will "justify" steps to be taken which will enable the Government at Athens to meet their obligations. Meanwhile the drawing for repayment at par of £29,000 5 per cent. bonds of "the Privileged Company to Protect the Production and Trade in Currants" is an indication that fair financial weather is setting in, and I hope the indications will materialise into the more substantial fact.

***

I wonder what the few British shareholders in the Oriental Railways Company think about their investments therein. As stated elsewhere in this issue, the dividend of 5 per cent. of last year has been repeated—it has been declared, at least—and it has been arranged that the coupon £T1 1/10 shall be payable at the rate of 31¾ crowns in Austria, 22¼ marks in Germany, 22 fr. in Switzerland, and 110 piastres in Turkey. It will be seen that our Allies share in the cold exclusion imposed upon us. I suppose it is another case of that very philosophical reflection, "After the war!"

***

One of the most practical reports submitted to the Board of Trade for a long time is published in the *Journal* for July. It is from Mr. D. A. Cameron, C.M.G., Consul-General at Alexandria, and he recounts some interesting experiences for the benefit of firms hoping to do business in Egypt. Mr. Cameron emphasises the advantage to be gained by the use of travellers and by direct business rather than by correspondence, which "often leads to litigation or to the annoyance of cutting losses." The report is printed elsewhere in this issue. It is worth reading, and will speak for itself.

***

Friends of Roumania will have learned with much satisfaction that, consequent on the fine wheat harvest, the financial position of the country has been still further improved. On July 3 the stock of gold in the National Roumanian Bank amounted to 500,000,000 frs. This means that the circulation of notes is covered in the proportion of 66 per cent., which is double the legal minimum. Securities have risen on the Bourse, the feeling throughout the country is confident, and the people are prosperous. The Government have been wise enough to steer clear of the commercial trap which contracts with Turkey would have involved, and I am waiting hopefully for the news of developments at Bucharest which will be of profound interest in this country.

COMMENTATOR.

Trade After the War.

The Attitude of British Traders in Egypt and the Near East Towards Enemy Aliens.

There is some fear, perhaps, that people will grow tired of the eternal cry that is being made regarding trade after the war; it is our failing that we are inclined to begin a campaign with enthusiasm, only to relax effort and energy when we imagine that we have achieved a measure of success. To that failing we must attribute the established fact that in the last twenty years we have permitted our trade rivals of Central Europe to overwhelm us in certain markets, and to establish powerful monopolies in certain profitable lines. Particularly since the war broke out it has become fashionable to lament that our rivals—now our enemies—obtained their ascendancy not because they were better traders than we are, but because they are entirely unscrupulous, were never afraid to exceed the bounds of proper conduct, and utilised subterfuge and intrigue to the fullest possible extent.

Now, this indictment is true. On the other hand the statement that the success of our enemies is entirely the result of their malpractices is a fairy tale, good enough, perhaps, for those who know nothing of trade possibilities; but only a poor jest to those who know the markets of the world, and who are brave enough to admit the almost amazing ineptitude British merchants and traders have displayed in the last few years.

Unprofitable Recriminations.

The time must not be wasted in unprofitable recriminations, however. We must put an end to laments and reflections. All the indications point to the fact that we have awakened to the need of sharp, definite, and immediate action; and it is in this that our only hope of commercial and industrial salvation lies. We begin to-day with the knowledge that we have closed the markets of the world, temporarily, at any rate, to our enemies; with that knowledge there must be a definite realisation that at the end of the war those markets will again be open to all who care to enter them. A great deal of wild and hysterical talk has been indulged in, mainly that we have got the German out and that we are going to keep him out. That is sheer unadulterated nonsense; and those who believe it are living in a fool's paradise. The German will come in as surely as one day the war will end, and it is that event against which we must be prepared. We must not ignore the fact that the German is preparing for it.

"Great anxiety appears to prevail in Germany in regard to the prospects of obtaining, after the war, the supplies of raw materials required for German industries, which they have hitherto so freely obtained from abroad," the *Journal* of the London Chamber of Commerce told us in its recently published "Trade Products Supplement." "Commercial interests in Germany have demanded that the peace treaties must include provisions to ensure that German importation of raw materials shall not be placed at a disadvantage," the *Journal* continues. "These statements will afford encouragement to those who desire that the raw materials produced within the British Empire shall not in the future be placed freely at the disposal of German industries to the disadvantage of the commercial, industrial, and manufacturing interests of the peoples of the British Empire and of our Allies." That ought to be the text of all the sermons on commercial policy that are being, and will be, preached in the Empire. First, Germany will make a desperate effort to re-establish her position as a buyer of raw materials in overseas markets; and, second, British producers abroad must be induced, first, to supply the needs of British consumers. Absolute boycott, of which we have heard so much recently, is an economic heresy; preferential treatment for our own people is another matter, and a very important matter, too.

The Neutral Trader.

In the Near Eastern markets this question will assume important dimensions; and it will be a difficult question to handle. We cannot hope that aliens will be impressed particularly by the need of British markets and manufacturers. Greece and all the Balkan States—all producers to a more or less important extent — have suffered greatly through the restrictions imposed by the war, and their solvency will depend almost entirely upon the rapid reconstruction of their overseas trade. Naturally, their first efforts will be in this direction, and they will accept the best markets they can find. Free competition, therefore, will be the rule so far as their products are concerned.

The case should be different, however, in Egypt and other territories in which British influences are supreme, although it is a serious fact that, in all the countries of the Eastern Mediterranean, the foreign trader is a potency it would be folly to ignore. We need not enter upon a discussion of his methods of business, nor need we speculate regarding his attitude towards the various belligerents; whatever these may be, we may be sure that he, like his compatriots at home, will take a purely personal view of the possibilities of the post-war situation, and will allow no sentiment to interfere with his trade development. Let us realise that before we begin our work of preparation, or when the time comes we shall find that we are once more hopelessly left. "Nothing for nothing and very little for sixpence" is a pretty general gospel all the world over; and we shall find in the future, as we have found in the past, that the alien trader, let us say in Egypt, is a pretty expert exponent of it; and it must be acknowledged also that he would be foolish not to live up to it. But that by the way.

Near Eastern Resources.

It is not necessary to enter into a detailed description of all the raw materials produced in Egypt which British manufacturers require, for they will suggest themselves readily enough to readers of THE NEAR EAST; they are as many as they are diverse in character, and the production is increasing with their importance every year. Cotton, cotton-seed, gum arabic, wool, oil-seed cake, and ivory are some of the products in question, and all of them are important to our manufacturers beyond words. Since the war began exports of these products to the United Kingdom have increased to an enormous extent, as the figures of trade returns for 1914 and 1915 will show.

Here are some of the figures :—

COTTON.

In 1914 Egypt sent to the United Kingdom 3,361,021 centals of cotton, valued at £13,682,095. From the Sudan came 21,683 centals, valued at £80,573.

In the following year our imports were :—Egyptian, 4,484,908 centals, of the value of £15,186,631; Sudan, 55,045 centals, worth £176,291.

COTTON-SEED.

The imports from Egypt of cotton-seed in 1914 were 213,879 tons, valued at £1,735,778. Last year (1915) these figures had increased to 393,922 tons, which were valued at £3,343,497.

OILSEED-CAKES.

Egypt exported to the United Kingdom in 1914, 73,560 tons of this by-product, and in the following year increased its shipments to 106,537 tons, the respective values being £374,239 and £698,492.

GUM ARABIC.

Similar developments are to be noted in respect of gum arabic. In 1914 the exports to the United Kingdom were 78,718 cwt., of the value of £148,646. In 1915 the figures were 87,454 cwt. at £160,318.

WOOL.

The figures regarding wool are also illuminating. Exports to the United Kingdom in 1914 were 4,196,348 lbs. of the returned value of £136,955. In 1915 the exports were 6,526,462 lbs., worth £209,973.

It will be seen from these returns that not only are the resources of Egypt in regard to an important class of raw materials very considerable, but that with the outbreak of the war Great Britain was able to take over the output which would have, in normal times, gone to the German and Austrian markets. There need be little fear that the advent of peace will limit Britain's capacity for consumption; on the other hand, it is probable that our manufacturers will be prepared to increase their takings. In many of the industries in which the products specified are used as raw material there are proceeding developments and extensions which will demand larger supplies. On the other hand, it must not be forgotten that whether or not Germany has accumulated large stocks of manufactured goods, ready for dumping on her old overseas markets, there is little reason to doubt that her masters of industry are organising themselves with the view to replenishing their stocks of raw materials, and this is what we must be prepared for. All the old methods of chicanery and sharp practice, the insidious under-cutting of which the German is so perfect an exponent, the old treachery, and the same propaganda of untruth and innuendo—these are the weapons against which the British trader will have to contend, against which even now he is preparing.

The Task in Egypt.

The task of the British subject in Egypt will be difficult—that is, if he intends to be loyal to his birth and breeding. The alternative would be to take the less troubled way of non-resistance, to admit the enemy-alien, and his agent, on equal terms with his own people, and to accept all the risks which such a proceeding would involve. A great deal depends upon the choice which our own people will make in this connection. If it is the latter the German will get back all that which we hope he has lost. He will be subsidised by his Government, he will be in a position to enlist the services of capable buyers, and his manufacturer at home will be able again to compete, with all the old unfair advantages, with our own factories and mills.

Perhaps, the greatest difficulty to be met with will be the secret agent. There is only one known way of countering this class of gentry, and that is to make it incumbent upon every purchaser to disclose his principal and the destination to which his purchases will be shipped. That is not a matter altogether for the law, but for the British trader, who is, or ought to be, strong enough to insist upon open trade. It would be necessary to embark upon an educational campaign among those who are unable, for various reasons, fully to understand what the rehabilitation of the German would mean. If such a campaign were to be conducted with discretion and ability it ought to succeed, for it would be an easy matter to state a case against the German that would appeal irresistibly to every man who has suffered from oppression.

Steps are being taken in many British oversea Dominions and Colonies to make certain the position after the war. India, Australia, South Africa, and Canada are all busy devising the restrictions which are to be placed on the Hun trader when once again he presents himself—with humble and obsequious mien, but with craft and cunning—begging to be admitted to the old good-fellowship. British traders in the Near East for their own sakes, not to speak of the common weal of the Empire, should not stand aloof from this movement.

SUDAN BUDGET FOR 1916.

(From Our Own Correspondent.)

Cairo, June 25.

At the beginning of the current year the Sudan Government issued a circular to its departments to the effect that, pending the publication of the new Budget, they should confine their expenditure within the same limits as those laid down for 1915. The issue of this circular was taken as an indication that the financial authorities were encountering some difficulty in framing their estimates. The Budget has now been published, and whatever difficulties lay in the way have been successfully overcome, for the estimates balance with an assessed revenue of £E1,542,500.

That it has been found possible to balance the Budget without any deficit reflects very great credit on the officials concerned. The Sudan has always been and still is in a very special position. As has been explained on more than one occasion in articles reviewing the financial situation of the country—and more especially in The Near East of March 19, 1915, on the occasion of the analysis of the estimates for 1915—the country for fourteen years was enabled to establish its budgetary equilibrium solely thanks to the annual subvention given to it by the Egyptian Government. In 1913 that subvention was abruptly stopped and the Sudan had to stand on its own.

Unfortunately for it, a period of low floods and short rains set in, followed by the outbreak of war, and so the proper expansion of its revenues, which had been a remarkable feature of the previous decade's administration, could not continue to the same extent. Further, it had no reserve fund in the proper sense of the word, for the Egyptian subvention had never been more than was necessary to balance the estimates, which were always closely controlled by the Egyptian authorities. Capital works of an urgent nature, which could not be provided for in the ordinary Budget, had to be debited against the comparatively modest sums which the wonderful expansion of the revenue gave as a surplus every year, so that, when the Sudan was accorded its financial emancipation in 1913, it had nothing in hand against the inevitable rainy day.

In point of fact, in the years before the subvention was stopped the Sudan always showed a deficit in its final accounts. It was only the Egyptian contribution that saved it from a debit balance; for instance, at the end of 1912, when, with a Budget estimate of £E1,302,950 and a subvention of £E163,000, a surplus of £E97,301 was shown. That in the following two years actual surpluses of £E35,289 and £E12,203 respectively were obtained was due entirely to the skill with which the financial authorities handled the situation and took advantage of every good opportunity that offered itself.

In reality it would have been the easiest thing in the world to have shown an even greater surplus, but that would undoubtedly have been at the expense of the ultimate welfare and the efficient administration of the country. The Sudan, all said and done, is still in a very backward and transitory state, and just as a boy in his youth must not be stinted of food or opportunity to develop his mental and physical faculties for fear of his growth being stunted and his not being able to hold his own in the fight for existence when he reaches man's estate, so in the case of the Sudan any restriction of expenditure necessary to its development at the present stage of its existence might very likely, and most probably would, have put its eventual development back to a very serious extent. This is what the financial authorities have ever had to bear in mind, and they have found that the progress made by the country has been so rapid that willy-nilly they have had to meet the demands made from time to time upon them, although the state of the Budget may not have appeared to justify those credits.

The great difficulty in drawing up the Budget for 1916 reposed in the fact that the authorities were convinced that a limit to the curtailment of the expenditure consistent with prudence had been reached. They had to take into consideration that, albeit the trade of the country had undergone and was still undergoing great development, nevertheless the war very probably might continue to set the same obstacles in the way of its deriving the full benefit of that development as had been experienced during the past eighteen months; for instance, there is a fear that the difficulty in the matter of finding ships for the export of the country's products may increase in the near future instead of diminishing, and that consequently, whilst the Customs and Railway receipts, which are the main items in the revenue, may not attain their proper proportions, the holding up of large stocks may affect the tax collections. In addition, extra expenditure has been forced upon the Sudan Government owing to the temporary cessation of the credits rendered available by the £3,000,000 Loan which was floated in London three years ago. This loan was, it may be remembered, mainly for the purpose of carrying out the great irrigation works, the undertaking of which, it was generally recognised, was vital to the welfare of the country. Apart from the fact that the war had stopped these works, and so has put back the date of the fuller development of the country's resources, the Government has been obliged to provide money for the keeping in order of such of the initial work as had already been completed, for it was obvious that any neglect in this respect would have serious results when the more important part of the project eventually came to be resumed, and would entail much more additional expense than is represented by the cost of upkeep.

Such being the case it at first appeared inevitable that a deficit would have to be budgeted for. Happily, before a definite decision had been come to, reports were received from the provinces and departments which showed that an improvement had set in and that a more optimistic view might reasonably be taken of the revenue prospects. In point of fact, at one time it looked as if the accounts for 1915, which according to the Budget, should have balanced, would show a deficit. Affairs have, however, improved so much that a small surplus will result.

The authorities therefore proceeded to recast their Budget, and whilst exercising the same caution and prudent foresight as have characterised their administration during the past eighteen years, they considered that the situation justified a slight raising of the railway and steamer rates to compensate for the extra cost of coal, etc., and consequently an increase in the revenue estimates to meet the increased general expenditure.

Compared with the estimates for 1915, the Budget for 1916 shows an increase of £E141,500 in revenue and expenditure. The main increases under revenue are Railways by £E140,000 and Customs by £E30,000, but provincial receipts, which are mainly made up of royalties and animal, land and date taxes, are estimated to yield £E55,600 less. On the other hand, expenditure shows the following increases, Provincial by £E12,044, Railways by £E117,058, whilst Steamers decrease by £E7,739 owing to reduction in the services due to the shrinkage in the traffic as a result of the war.

Whilst in the current estimate the authorities have in certain items allowed for the maximum expansion on both sides of the account, and in others there is still a margin, and whilst past experience has shown that in the actual results expenditure has always been less than and revenue generally has exceeded the estimates, we cannot entirely rely on such features repeating themselves under present conditions, when the war makes it difficult to foresee what the morrow has in store for us. There is, indeed, no disguising the fact that the situation will require most careful watching and handling. There is, however, no reason to be despondent, and, given ordinary luck, added to the financial and commercial acumen displayed by Bernard Pasha and his able staff in overcoming the obstacles set up during the past three years, we may rest assured that all will go well with the Sudan during the coming year, and that, whatever happens, the country will be kept in a state that will enable it to take the fullest advantage of the opportunities for commercial and economic expansion which the cessation of hostilities will undoubtedly afford to it.

TRADE OPENINGS.

The Army Finance Department, Cairo, invite tenders for the supply of fourteen tons of candles to be delivered c.i.f., Alexandria or Port Said. Date, September 5, 1916.

The Director of Personnel and Equipment Department (Supplies Office) invites tenders for the supply of photographic material required, for a period of one year commencing on August 1, 1916, and ending on July 31, 1917, for the Ministry and the Identification Service of the Ministry. Date, August 1, 1916.

EGYPTIAN INSOLVENCIES.

We take the following from the report for 1915 of the Ministry of Justice, Egypt, presented by the Judicial Adviser :—

There was some increase in the number of bankruptcies declared last year, viz., 273, as compared with 216 in the previous year. This figure, however, is considerably below that for 1912-1913, viz., 380. There were 392 other bankruptcies pending at the commencement of the year, so that the Tribunals had to deal with 665 bankrupties altogether. Of these, 214 only were terminated, as against 293 in 1913-1914 and 474 in the year before.

The Tribunals delivered, in the course of the year, 271 judgments on applications for a declaration of bankruptcy, as well as 1,045 special judgments dealing with various matters in bankruptcy cases. During the year 187 applications for preventive compositions (*concordats préventifs*) were made, but composition was granted in 105 only.

In a memorandum dated October last, 1915, the Import Trade Association (Association du Commerce d'Importation) returns to the suggestions and proposals already put forward by that body, with a view to remedying certain defects of the existing law of bankruptcy. In my report last year I dwelt at some length upon the more important of these suggestions, and I need not, therefore, discuss them further.

On the subject of composition, however, the association raises an interesting point on which a few words may be said here. According to the authors of the memorandum, the majority of creditors which passes a composition is frequently an artificial one. What happens is that relatives or friends of the debtor acquire the rights of some of the creditors, on terms undoubtedly more advantageous to the latter than those offered to the mass, and so are able to vote, in place of their assignors, for propositions of arrangements which would not have been accepted without their intervention. The matter is dealt with in Italy by Article 15 of the Law of May 24, 1903, which excludes from voting on the composition all creditors related to the debtor up to the fourth degree as well as all persons who acquire their claims by assignment or adjudication during the year within which the composition is proposed, and all assignees of claims who have acquired their rights after the summoning of the creditors.

These devices evidently constitute a serious fraud, with which it would be advisable to deal here, if possible, whenever general legislation in such matters becomes practicable, as in a new law of bankruptcy.

There is an increase of 1,389 in the number of commercial cases, which reached the figure of 4,588 cases, as compared with 3,199 in 1913-1914.

NEWS FROM ALL SOURCES.

The exportation or re-exportation of sheepskins from the French zone in Morocco has been prohibited.

The late Mr. E. A. Cohan, head of Messrs. H. E. Moss and Co., shipowners, left net personal estate of £674,545.

A Simla message, dated July 10, states that trade between Indian ports and Jeddah is now permitted without restrictions.

It is reported from Athens that the Entente Powers have offered to lend 30,000,000 drs. to the Greek Government to meet the expenses of demobilisation.

Messrs. Gray, Dawes and Co. have admitted into partnership Messrs. William Langridge and Arthur Reiner, both of whom have for long been associated with the firm.

The *Telegraaf* (Amsterdam) says that the Allies are contemplating measures to prevent Dutch cotton goods from being exported to Roumania, "as it has been proved that goods consigned thither are either intended for Germany or are stopped in Germany under pretext."

It is estimated that the area sown under wheat in Roumania for the season 1916 is 4,862,278 acres. This is an increase of 1 1-5 per cent. on last year's acreage and 6 1-5 per cent. above the average of the past ten years. A later telegram, dated July 4, states that the wheat harvesting has nearly been completed, and that the crops are excellent in quality and quantity.

Thanks partly to the development of its art industries (writes *Drawing*), the population of Egypt has risen to the occasion of replacing advantageously many things of use and beauty which were formerly imported from enemy countries. Greatly owing to the efforts of Mr. W. A. Stewart, the technical training of the native population has been reorganised on historical and ethnological lines. The textile industry is very prosperous, and the technical schools initiate students into designing for the loom. Carpets are in great demand, and the art schools receive more orders than their present organisation can supply. Great prosperity is evidently in store for Egypt's art industries, and this prosperity will help the greater prosperity of the British Empire.

TO EGYPTIAN TRADERS.

Mr. D. A. Cameron, C.M.G., Consul-General at Alexandria, writes to the Board of Trade *Journal* that the stringent rule in force which prevents British subjects from leaving Alexandria for abroad without having their passports viséd at the British Consulate-General in Alexandria has afforded him the pleasure of meeting many commercial travellers. Their statements are all to the same effect, namely, that if a firm hopes to do good business in Egypt, it is worth its while to spend £100 to £150 a year on sending out a competent agent to make the annual contracts and to judge of the opportunities for business. They agree that this is really the most satisfactory system, and that they easily cover their expenses by obtaining orders which, in their absence, would not have come to their firms.

H.M. Consul-General adds that too much stress cannot be laid on the fact that during the last thirty years all the big British business houses in Cairo or in Alexandria have begun with the visit of an agent who has settled down quietly and gradually created an establishment. On the other hand, the appointment by correspondence of a stranger as agent is much less satisfactory, and often leads to litigation or to the annoyance of cutting losses.

FUEL IN TURKEY.

The Oilfields of Mesopotamia.

(*Concluded from page 212.*)

The paper to be read at the Arizona meeting of the American Institute of Mining Engineers, in September, by Mr. Leon Dominian, of New York, a well-known authority on mining questions in the Ottoman Empire, is concluded to-day.

Last week's instalment of this important paper carried us to an analysis of the oilfields in Mesopotamia.

Proceeding southward from Alyak on the Great Zab, the important wells of Gayara are attained. The supply of oil at this point is believed to be considerable. The fuel flows from numerous sources, forming oil lakelets which attain 200 ft. in diameter. The quality of the yield is stated to be excellent, the oil being particularly free from sulphur and brine. Thick deposits of asphalt are also found in this locality. The southern end of this deposit reaches El Fatha Defile, where the Tigris passes through Jebel Hamrin. Here bitumen exudes abundantly in long threads, which darken the whitish-coloured limestone cliffs. The heavy flow of oil throughout the Gayara district has enabled the natives to create a refining industry, which, although primitive, satisfies local needs.

West of Gayara lie the ruins of ancient Hatrae, known to the Arab dwellers of the region by the name of El Hadr. Here a number of unexploited oil springs are met in the vicinity of the settlement.

At Baba Gurgur, in the low sandstone and conglomerate ridges surrounding the town of Kerkuk, an area of about fifty acres constitutes the site of primitive operations by the natives. The oil collected here is derived from pits dug to a depth of about 4 m. It is shipped to Baghdad and all of Eastern Mesopotamia. This locality is noted for the abundance of natural gases escaping from the vicinity of the springs. It owes its Arabic name of "father of murmurs" to this phenomenon. During 1901 a fire, which spread to the entire field of work, caused the suspension of the small native industry. Refining of the oil is also undertaken here by the natives. From a technical standpoint this district is interesting chiefly on account of the presence of alabaster and salt, the association of which with hydrocarbons has been noted in Sicily

High-grade Oil.

High-grade petroleum is derived at Guil. Although crude methods of refining are in vogue at this locality, the burning qualities of the final product are such as to lead the natives to prefer it to imported brands. This does not appear to be the case at Nimroud, however, where the oil is impure and almost black in colour throughout a band of 800 m. in length, from which it flows into the river.

A rich field is found at Tuz-Khurmatli, where a heavy flow of oil can be observed for a distance of over one mile along the right bank of an affluent of the Shatt-el-Adhaim.

Deposits of asphalt attaining a total depth of 4 m. to 5 m. are found at this point. In spite of the quantity of the oil, the consumption is limited to local needs and occasional unimportant shipments in sheepskin bags to neighbouring villages.

To the south-east of this favoured locality the springs of Kifri appear at a distance of about two miles east of the settlement and at the foot of Neft Dagh (Naphta Mountain). Here, again, an asphalt deposit about 6 ft. in thickness surrounds the springs.

Flows of minor intensity yield their product in the Jebel Oniki Imam, and at Zahru, on an island in the Chabur district. The last-named locality is credited with abundant reserves, upward of thirty oil rivulets having been counted along a river front eight miles long.

In the vilayet of Baghdad the environs of Hit have been exploited for oil and bitumen by the natives since time immemorial. The occurrences are found south of the village between two wadys—the Kubessah and Mohammedieh. Two of the largest springs are seen at about one mile's distance from the town. They present the appearance of circular ponds, from which naphtha bubbles up with gas. Shallow reservoirs are also provided for the water, the evaporation of which leaves salt, which is a valuable product to the natives. The alluvial plain is dotted in this locality with grey buttes, from the base of which asphalt is emitted at a temperature of about 25 deg. C. The viscous product trickles slowly towards the river over previously deposited layers of the same substance. The oil flowing from the natural wells in this region is accompanied by intensely saline sulphurous waters. The same phenomena can be observed at Ramadieh, about 20 m. farther south. At Naphata, in the same district, the quality of the oil deteriorates, according to the testimony of the natives. Hit is also the centre of a native boat-building industry, which provides coracles and rafts for fluvial navigation. Bitumen is used extensively for calking these vessels. The shipwrights buy it from the gatherers in the form of small cakes, which the Turks call "Karasakiz" and the Arabs "Jir." It is applied hot, after having been melted over a fire made in the ground in close proximity to the primitive shipyards, and after having been reduced to proper consistency by admixture of sand and earth.

The Mendali Basins.

Perhaps the most important of the Mesopotamian basins is found at Mendali, at a short distance north-west of the town. Observers concur in admitting that copious flows are noticeable in this locality. A dozen springs from which oil is emitted with considerable force exist here. The high-grade character of the petroleum is revealed by the refined product, which has excellent burning qualities, in spite of the crude process by which it has been obtained by the Arabs. The wells were worked in 1888, and the product transported to Baghdad in skins on camels. A certain quantity of the product was exported to India for consumption by paint dealers in the preparation of their colours. The oil was used for lighting purposes in its crude state until superseded by refined foreign products. At present oil is refined by the natives at Mendali according to the methods used at Gayara. In addition to the foregoing localities, oil is reported from Zacho, Saad, and Doyat, in the vilayet of Mosul, as well as from Darondieh, Kizil-Rubati, Yakouba Ana, and El-Haim, in the vilayet of Baghdad. Ainsworth also records a site of oil springs in his "Table of Sites on the River Euphrates," as occurring between Shifat and Deir, north of the point of confluence of the Khabur River. It might be added here that the Mesopotamian oil question was a "burning" one during the work of revising the Turco-Persian frontier in 1913. As a result of agreements reached by the two countries involved, the springs at Chiarsukh are now in Turkish territory, as well as at Kasr-i-Shirin, in Persia.

The Chiarsukh springs occur at the foot of the Koh-i-Ahengeran, along an anticlinal fold which fringes the Chiarsukh River. The oil flows, accompanied by brine and ozokerite, from sandstone strata underlying marls. An insignificant native industry is based on the existence of the fuel. It is proposed to pipe the oil from this area to Baghdad.

At Kasr-i-Shirin a small English refinery is operated. Its output supplies the requirements of the Kermanshah and Hamadan trade.

The Persian wells are encountered at Shuster, whence the product is collected at a tank station south of the town on the Karun River. A pipe from this point carries the flow past Mohammerah to the Abadan refinery. Oil is also obtained at Bender Hormuz, south-west of Shuster.

The Mesopotamian oilfield should not be regarded as an isolated basin. There is reason to believe that it is merely a part of a vast oil-bearing belt, which can be traced in Burmah, the Mekran, and Quatta, whence it proceeds to the Persian Gulf, and is prolonged northward through Mesopotamia and Armenia to the highly developed Russian districts of the Caspian Sea. The occurrences described above constitute sufficient indications of the probable existence of considerable quantities of the liquid fuel. Nevertheless, abundance of flow at the surface cannot be considered as evidence of vast subterranean reserve. The data of experience culled in the exploited fields tends to prove that steady flow is to be preferred to copious jets. The intensity of folding within the fringe of Tertiary rocks lying east of the oil region might, perhaps, provide criteria of economic value. At all events it yet remains to be seen whether the maximum yield will be derived from the Mesopotamian Valley itself or the petroliferous region extending farther north.

European Turkey.

In European Turkey, oil exists in the Tertiary formations north of Gallipoli. The district was visited and described by Lieut.-Colonel T. English. This observer states that oil was obtained in fair quantity from borings about 300 ft. deep at a distance of forty miles south-east of Keshan, close to the junction of Deli Osman River and Milos Brook. The locality is situated at 320 ft. above sea-level. The flow of oil was accompanied by excessively saline waters. Its specific gravity was determined at 0.825, and its paraffin contents at 10 per cent. The oil-bearing formations extend for a distance of 15 m. between Sarkeui and Ganos and attain a thickness of about 1,000 ft. A small variety of *Melanopsis* was found in them. North-east of the exploratory drill holes, the same rock series occur as far as the village of Milos, where they are capped by conglomerates containing *Planorbis* and *Cyrena*.

During the past few years American and Russian exporters of oil have built great hopes on the Mesopotamian market. One of the consequences of the important reclamation work undertaken by the Turkish Government in the region, has been that a large number of oil engines and pumps have been imported into the district for irrigation purposes. By the end of 1913, 500 engines averaging 10 h.p. were operated in southern Mesopotamia. Five to seven-inch centrifugal pumps and 7½ h.p. kerosene engines are in constant demand for irrigation purposes. The crops raised on the lands irrigated by these engines are valued at present at 1,500,000 dollars annually. It is believed that the employment of these engines will increase, and that the imports of oil into the district will also be heavier. At present about 100,000 cases of petroleum are imported annually from the United States.

The construction of the Baghdad railway, which of late has proceeded very satisfactorily, will undoubtedly stimulate the development of the region. The line traverses the eastern part of the basin. Trials have been made in recent years to use oil as fuel on German railroads, and it is stated that the results have been satisfactory enough to induce the railway company to build large storage tanks.

The growing use of oil as a fuel and its actual replacement of coal in many regions—the entire Pacific Coast from Alaska to Peru is a notable instance—attaches more than ordinary interest to the Mesopotamian field. As a power generator oil tends to supplant coal on sea, the present tendency being to increase the number and size of ships operated by internal combustion engines. The "Wotan," a motor ship equipped with a 2,000-b.h.p., 2-cycle Diesel motor, with tank space for 6,750 tons of oil, besides 900 tons of bunker oil and 100 tons of water could recently be seen in New York harbour. By the year 1912 one-third of the ships in the active list of the British Navy were run either entirely by fuel oil or supplementarily to coal. The problems involved in the safe storage and thorough atomization of the oil appear to have been satisfactorily solved.

[The previous instalments of this paper appeared in our issues of June 23 and June 30.]

A Bucharest correspondent writes:—

"General satisfaction has been caused among vine-growers by the announcement that England was prepared to send Roumania eighty wagons of sulphate of copper. This material had been bought by Roumania some time ago, but, having been claimed by the French, its exportation had not been authorised."

ENGINEERING NOTES.

The Submersible Cargo Boat.

Undue significance has been given to the achievement of the German submersible boat Deutschland, in crossing the Atlantic with a few hundred tons of cargo. Her performance in escaping the vigilance of the Allies' fleet is really more significant. Once she eluded the Argus and emerged in the Atlantic safely, her voyage thence to America was nothing remarkable, for it has been done before, though in the opposite direction, by other and smaller submarines. Two months ago it was reported from America that the Hamburg-Amerika Line had made arrangements for a trans-Atlantic submarine service between Hamburg and New York; and it was mentioned that the first submersible boat would arrive on July 4, but one or two of the German papers characterised the report at the time as "fantastic nonsense." The arrival, therefore, of the Deutschland within a few days of the date mentioned has created considerable surprise. How far the German plans for a trans-Atlantic submarine service can be realized one cannot say definitely. We live in an age of surprises. But while a submarine service may be very effective in relieving a blockaded country with an extensive coastline in an open sea, such as the British Isles, France, Spain, and Portugal, Italy, Greece, the South Mediterranean coast, etc., a similar service, especially "trans-Atlantic," for helping Germany and Austria-Hungary, which have comparatively only narrow "windows" on seas commanded by their enemy, is, if not "fantastic nonsense," a very doubtful enterprise.

The Ship.

The Deutschland, according to reports, is 300 ft. long, with 40 ft. beam, and is propelled by 600 h.p. Diesel engines. She carried, again according to reports, 1,000 tons of cargo, chiefly drugs, dyestuffs, and mails, "including an autograph letter to the President from the Kaiser"! Now, supposing that this boat is of the Krupp submersible type, which is largely used in the German Navy, with a reserve buoyancy (the difference of displacement on the surface and submerged) of, say, 30 to 35 per cent., there will be water ballast carried in a special compartment at the bottom of the hull, and also tanks which form a kind of shoulder on each side of the main hull. With the machinery and other accessories, this boat could not have carried more than 350 to 400 tons of cargo. However, the Deutschland is perhaps one of the smallest of the submersible liners, and her return will be watched with great interest.

Germany's Shipping Preparations.

Whether it is intended to act as a paregoric for the Germans to mitigate their distress, or as a scare to disturb the Allies' plans for the economic war, the statements of Herr Ballin, in an interview with the *Berlinske Tidende*, regarding the building of great liners in Germany, must not be taken altogether as mere brag. This personal friend of the Kaiser said that as a proof that Germany was not inactive regarding her trade after the war he might instance that the Hamburg-Amerika Line is at present building a ship, the Bismarck, the largest ship in the world, of 56,000 tons; also the Tirpitz, of 32,000 tons, and three other ships of 22,000 tons each, at the Vulcan Works. At Bremen no fewer than nine ships are building, four of which, with 18,000 tons capacity, will be the largest freight steamers in the world. At Tecklenberg two freight steamers of 17,000 tons each are being constructed for traffic through the Panama Canal. The Norddeutscher Lloyd is building at Dantzig two big, fast steamers, the Columbus and Hindenburg, of 35,000 tons each, and twelve smaller ships of 12,000 tons each. The Bremen-Africa Line is building six, the Hansa Line eight, and the Kosmos Line ten ships, the sizes of which vary from 9,000 to 13,000 tons. Therefore (according to Herr Ballin's statement), in all fifty-four large liners are building, the smallest of which is 9,000 tons and the largest 56,000 tons.

Cum Grano Salis.

From a technical point of view the simultaneous construction of so many big ships in a country is nothing extraordinary; but in Germany, where, at present, every shipbuilding yard is fully occupied with the construction and urgently needed repairing of battleships, cruisers, torpedo-destroyers, submarines, and a variety of other war-vessels and accessories, and where, as it is well known, there is not enough skilled labour to cope with such important and urgently needed war-work, the alleged building of so many large ships for trading purposes after the war must be accepted with caution. In the meantime, it may be asked if the Germans are so sure of securing victory why are they so very anxious to build under such difficulties new merchant ships while their big liners and freight steamers are intact and safe in American and other neutral ports? Evidently they are not so sure of their victory, nor of re-acquiring their ships.

RAILWAYS IN PERSIA.

In the House of Commons on July 10 Colonel Yate asked the Under-Secretary of State for Foreign Affairs why, considering that the Russian railway from Julfa to Tabreez, in the North of Persia, had been completed despite the war and disturbed local conditions, no progress had been made with the British concession for the Muhammorah-Khurramabad railway in South Persia, which, at any rate, could have been laid as far as Dizful; and, if the British Government were too much engaged to take the matter up, would the Secretary of State for Foreign Affairs hand over the political control of Southern Persia to the Government of India.

Lord Robert Cecil replied: The military situation in South-Western Persia has rendered impossible for the time being any further development of the scheme for a railway from Muhammorah to Khurramabad.

METRIC SYSTEM.

Speaking at the London City Corporation at a recent meeting in support of a resolution advocating the adoption of the metric system of coinage and weight, a member said that a British consul had reported as an undoubted fact that the preference which Germany had obtained over Great Britain as regards railway material was mainly owing to the existence of metric classification. When peace came, continued the speaker, the competition of the Central Powers for the markets of the world would be fiercer than ever it had been in the past. Even now factories were piling up stocks which German and Austrian travellers would offer to our customers in terms of weight and measurement which they would understand. Why should not British travellers do the same?

ALEXANDRIA PRIZE COURT.

S.S. Annaberg (ex Cargo).

His Honour Judge Cator, in the Supreme Court for Egypt sitting at Alexandria in Prize, has delivered the following judgment (extracts) in a case in respect of cargo ex the s.s. Annaberg:—

In this case the claimant, Knauf, is a German who, prior to the outbreak of war, resided and traded in Australia, and is now interned in that country. Had he been a British subject the Procurator would have released his goods; but as he is an enemy, the Crown submits that, unless he can show that he has no German domicile, his property must be condemned.

I think this contention is based upon a certain confusion of ideas as to the meaning of the word domicile. The word is a term of art in English law. There are times when it becomes necessary to determine the country in which a man has, or is deemed to have, his permanent home, and that country we call his domicile. It may be a domicile of choice, for it is open to everyone to choose his own home, or it may be one of origin, but a domicile of some kind he must have. This domicile, which, for convenience, following Dicey, I will refer to as civil domicile, is founded in intention. It is generally accompanied by residence, but residence alone does not constitute civil domicile. To ascertain this domicile is sometimes no easy matter, but I need not enlarge upon the tests and presumptions which the law employs to decide the question, or the difficulties which may attend such enquiries.

Quite apart from his civil domicile, prize law recognises another relationship which a man may have with a country by trading in it. This relationship is usually termed a "trade" or "commercial" domicile. Here intention plays but a minor part. The intention to trade is usually patent from the conditions, and it will be but seldom that such questions of intention will need to be determined as came before the Court in the case of the Harmony (2, C. Rob. 312). Commercial domicile is a loose cloak easily assumed and as easily discarded. It is acquired by the mere act of residing and trading in a country. It is lost so soon as a man gives up his residence and trade. It is a creature of circumstance rather than intention. So much so that it is quite possible for a man to have a civil domicile in one country and, at the same time, to be possessed of a trade domicile elsewhere. Residence, which is immaterial to the conception of civil domicile, is essential to constitute a trade domicile, using that term in the sense generally attributed to it in the text-books. But the residence must, I think, be of a semi-permanent character.

A clear distinction is to be drawn between the enemy merchant who resides and does business in his own country, but at the same time has a house of trade in a foreign land, and his fellow-citizen who, without intending to change his nationality or his civil domicile, settles in the same foreign country and trades there in person. The latter acquires a trade domicile; the former does not. The distinction is of capital importance in prize law, for in the former case the goods of the enemy merchant, even though they appertain only to his foreign house, are subject to condemnation, whereas those belonging to the enemy merchant actually residing in the same country will be restored. The reason for the distinction may be that in the one case the profits of the business will probably be remitted out of the country, whereas in the other they are likely to be spent locally. But whatever the reason, the rule seems to be well established. . . .

To apply the principles which I have enunciated to the facts before us.

The evidence in the case consists of two affidavits sworn by a Mr. Scott on December 15, 1914, and February 8, 1916. Mr. Scott is one of the managers of the Commercial Banking Company of Sydney, Limited, which advanced moneys on this and other cargoes, and seems to be the party principally interested in the result of these proceedings, although it can make no claim on its own behalf, and can only be recognised as an agent for Knauf, who is the actual owner. Mr. Knauf is mentioned in par. 10 in relation to certain bills of lading as "R. Knauf, carrying on business in Sydney afore-

Digitized by Google

said," and again in par. 12 in regard to a consent, which is erroneously alleged to be annexed to the affidavit and stated to be an authority to the company to receive the goods.

I understand that the Procurator has granted releases in respect of other consignments in which the bank was interested, but demanded further information about Knauf, whereupon Mr. Scott made a second affidavit, from which it appears that this gentleman is a German subject, but that, except for a visit paid to Germany about the year 1913, the length of which is not stated, he has resided in Sydney for the last eight or nine years, and that he has carried on the business of a merchant in dried fern in Australia. At the time the affidavit was sworn Mr. Knauf had been interned by the military authorities at some distance from Sydney, but we are not told how long after the outbreak of war the internment was effected. Par. 5 states that the deponent is not aware of any circumstance from which Knauf could be considered as residing in or carrying on business in enemy territory. This, I think, is sufficient evidence to establish that Knauf had a British commercial domicile at the outbreak of hostilities, of which the Prize Court must take account, and the fact that he has been interned does not affect his rights in that respect. We have no evidence as to his civil domicile, but I am of opinion that the question of civil domicile is irrelevant, and that even if it be German it will not operate as a bar to his claim in the Prize Court.

As it is established that Knauf has a British commercial domicile, his goods, being attributable to his business in Australia, take the complexion of British merchandise and cannot be condemned. Such, as I understand it, is the law, and, however repugnant it may be to our feelings to restore property to an enemy, good reasons can be adduced in support of it. For, leaving out of account all motives of humanity towards private individuals, it cannot be doubted that the goods and trade of a man must primarily and chiefly benefit the country in which he resides and carries on his business, so that even an enemy subject settled in British territory benefits our country to the extent to which he trades in it. And the restoration of the traders' goods is but the complement and logical outcome of the policy which we show to an enemy residing within our dominions. We do not strip such an enemy of his possessions. Even if we deem it necessary that he should be interned, we do not deprive him of his property. Sometimes, it is true, we control his business so that it shall not subserve enemy interests, and sometimes we cause it to be wound up, but the property is preserved and will be restored at the conclusion of hostilities.

In the case before us I am not quite sure what course the Prize Court should adopt, for, although I cannot condemn the goods, I do not hold myself bound to restore them to an enemy subject unconditionally, especially when I know that he has been interned. Possibly the New South Wales Government has appointed someone to manage or wind up Mr. Knauf's business, and, at any rate, I think that Government should be consulted before I part with the property. An order for sale has already been made, and I propose that the proceeds should be carried over to a special account in the Court books, to be entitled "The Account of R. Knauf, an enemy subject residing in British territory, subject to the claim of the Crown to administer the fund and the claim of the Commercial Banking Company of Sydney, Limited, as mortgagees."

By entitling the account in this manner I do not mean to decide that the bank has a right to ask for the money to be paid out to itself, but I see no reason why it should still be debarred from coming into Court. For although its claim as a mortgagee could not be considered in a question of prize between the owner and the Crown, that objection no longer holds good, now that the Court has pronounced in favour of Mr. Knauf. And in carrying over the fund to this special account, I give liberty to any person interested to apply for payment.

SHIPPING NOTES.

The Greek steamer Kiki Issaias, which went ashore eight miles west of Agami, Alexandria, has been refloated and entered harbour.

The Italian steamer Moltke, which stranded near Father Point while bound from Montreal to the Mediterranean with a cargo of grain, has been floated.

A Malta telegram dated July 6, stated that the Royal Mail liner Monmouthshire had sunk the Ellerman steamer Persian, formerly the Kaffir, in collision. The latter was from Calcutta.

Proceedings have been instituted in the Prize Court at Gibraltar in respect of the steamer Telde. This is the German vessel which was sheltering at Teneriffe, and during heavy weather on May 2 drifted seawards and was captured by a British cruiser.

The Board of Trade has awarded a piece of plate to Captain Honoré Thémèze, master of the French steamship Ville d'Alger, of Marseilles, for his services to the shipwrecked crew of the West Hartlepool steamer Trunkby, whom he rescued in the Mediterranean on May 27.

GERMAN SHIPPING AFTER THE WAR.

The North-German Lloyd, although it is not allowed to publish an annual report, has issued a short account of "its activities in the second year of war." It says that as regards the future much will depend upon the "compensation" which is to be made to the German shipping companies for their war "sacrifices." The following general observations are added :—

"The future of German mercantile shipping is to-day too much in the dark for anything definite to be said about it. It is, however, certain that, if they are helped over the first and worst period when, themselves weakened by long inactivity and the great damage caused by the war, they will have to face the greatly strengthened enemy and neutral shipbuilding concerns in sharpest competition, the German companies will stand this most severe test and recover the lost ground. This will be so, in spite of the 'war after the war' which German trade is promised by its enemies. With the same rapidity with which Germany has temporarily become a self-contained commercial State, she will resume her relations with the world market when the doors of world trade are opened again and the seas again become free for peaceful activity."

COMPANY REPORTS.

Suez Canal.

The British directors of the Suez Canal having presented to Sir Edward Grey their report for the year 1915, the document has just been published as a White Paper.

We take the following extract therefrom :—

The net tonnage which passed through the Canal last year shows a decrease of 4,143,340 tons as compared with that of 1914, and a decrease of 4,767,729 tons as compared with that of 1913. The reduction of the transit dues to 6.25 frs. per ton from January 1, 1913, together with the reduction of tonnage, had the effect of reducing the gross receipts, which amounted in 1915 to 93,522,616 frs., as compared with 122,248,853 frs. in 1914 and 126,650,934 frs. in 1913. The increase of 50 centimes per ton in the transit dues, which came into effect on April 1 of the present year, is expected to compensate partly for the reduction in the receipts caused by the decreased tonnage.

The number of vessels which passed through the Canal was 5,085 in 1913, 4,802 in 1914, and 3,708 in 1915, of which 2,951 in 1913, 3,078 in 1914, and 2,736 in 1915 carried the British flag. There was a decrease of 1,254,240 tons last year as compared with 1914 in the tonnage of British vessels, which amounted to 12,052,484 tons in 1913, 12,910,278 tons in 1914, and 11,656,038 tons in 1915. During the same period the tonnage of German vessels decreased from 3,352,287 tons in 1913, 2,118,946 tons in 1914, and disappeared entirely in 1915. The percentage of British vessels and their net tonnage in 1915 was 73.8 and 76.3 respectively, against 64.1 and 66.5 in 1914 and 58 and 60.2 in 1913.

The number of troops carried through the Canal last year was 119,812 as against 228,720 in 1914, being a decrease of 108,908. There was an increase of 715 French, 143 Dutch, and 51 Belgian, against a decrease of 82,969 British, 14,782 Turkish, 6,075 German, 5,999 Italian, and 2 Spanish as compared with 1914. The number of civilian passengers was 86,653 in 1915 against 155,183 in the preceding year, being a decrease of 68,530; while the number of pilgrims, emigrants, and convicts was 4,065 in 1915 compared with 7,869 in 1914, or a decrease of 3,804. In the year 1870 only 26,758 civil and military passengers were carried through the Canal.

Persian Railways Syndicate, Ltd.

The directors in their report for the year ended November 30, 1915, state :—

Since the date of the last report further calls to the extent of 5s. per share have been made on the 7,551 shares last issued, bringing the total calls in respect of these shares up to 17s. 6d. per share. South-Western Persia continues in an unsettled state, and consequently the survey of the Dizful to Khoramabad section of the Mohammerah to Khoramabad line still remains suspended. A further statement of expenditure up to November 30, 1915, amounting to £3,243 11s. 3d., has been submitted to the Persian Government. The total amount now due to the syndicate for expenditure up to the above date is £19,382 12s. 2d., and application has been made for payment of this amount. The Persian Government being now in a better position to meet its financial obligations, it is hoped that payment will be secured at an early date.

With a view to keeping down expenses as much as possible while the operations of the syndicate are in a state of suspension, the

NATIONAL BANK OF GREECE.

secretaries have reduced their charge for secretarial work and office rent to £100 per annum, as from June 30, 1915. The directors retiring, in accordance with the articles of association, are Mr. C. Greenway and Mr. J. R. Preece, who, being eligible, offer themselves for re-election. Mr. Ralph M. Everett retires from his position as auditor to the syndicate, and, being eligible, offers himself for re-election.

COMPANY NOTES.

Oil Outputs.

Anglo-Egyptian.—Last week: Gemsah, 930 tons (against 100 tons); Hurghada, 502 tons (against 436 tons).

Baku Russian Petroleum.—Week to July 1: 84,400 poods.

Bibi Eibat Oil.—Week ended July 2: 60,600 poods.

Black Sea Amalgamated.—Week ended June 24: 23,159 poods. Week ended July 3: 23,657 poods.

European Oilfields.—Week ended July 2: 100,400 poods.

Maikop Combine.—Week ended June 24: 4,456 poods. Week ended July 1: 4,163 poods.

Roumanian Consolidated.—Week ended July 1: 811 tons.

Russian Petroleum.—Week ended July 1: 62,400 poods.

Spies.—Week ended July 2: 370 poods from ambars, 162,740 poods. Total to July 2: 4,208,255 poods, against 6,822,420 poods.

Ural Caspian.—Week ended June 29: 123,542 poods; July 6: 139,830 poods.

Meetings.

Egyptian Markets.—Extraordinary general meeting at 213, Gresham House, Old Broad Street, London, E.C., July 17, 1916, at noon.

Dividends, etc.

Privileged Currant Trade Company.—The numbers are announced of bonds of the 5 per cent. sterling loan of the Privileged Company to Protect Production and Trade in Currants, drawn for redemption at par on August 1, in London by Messrs. Emile d'Erlanger and Co., 8, Crosby Square, E.C., also at the offices of the Bank of Athens and its branches.

Transfer Books, etc.

Anglo-Persian Oil.—The transfer books of the cumulative six per cent. participating preference shares will be closed from July 18 to 31 inclusive.

Earnings, etc.

Oriental Railways.—Last year the Oriental Railways Company made a net profit of 5,941,216 fr., against 3,945,715 fr. in 1914. A dividend of 5 per cent. has been declared, but British shareholders (if any) appear to be excluded from the arrangements for the payment of the same. The annual meeting of the company is due to be held in Constantinople on July 26.

Piræus-Athens-Peloponnesus. — For the month of May:—898,301.65 drs., against 584,938.85 drs. Total, 4,199,058.80 drs.; inc., 1,349,182.80 drs.

INTEREST PAYMENTS IN EGYPT.

The following notice under Martial Law is issued by General A. J. Murray, Commanding-in-Chief H.B.M. Forces in Egypt, and published in the *Official Gazette* of June 30:—

"Whereas it has come to the notice of the General Officer Commanding-in-Chief that doubts have arisen, in view of the terms of the Proclamation of November 18, 1915, and subsequent Proclamations, as to the form of declaration which may properly be taken from payees by persons charged with the payment of dividends and interest on bearer securities or of drawn bonds, the public is hereby notified:—

"(1) That in the case of securities held in Egypt the military authorities will consider as sufficient the following declaration: 'I hereby declare that the following securities (or the securities from which the following coupons are detached) are held in conformity with the Proclamation of November 18, 1915, and that the proceeds thereof will not be applied otherwise than in accordance with the Proclamations concerning payments during the war.'

"(2) That in the case of securities held abroad the provisions of Art. 6 of the Proclamation of January 25, 1915, are applicable."

RUSSIAN AND ROUMANIAN OIL.

We take the following from the speech of Sir Marcus Samuel (chairman), delivered at the annual meeting of the Shell Transport and Trading Company, held in London on July 11:—"I regret to say that we cannot extend our venture in the Russian oilfields until the conditions under which the Government invite purchasers to explore are radically altered. In fixing maximum prices for crude oil, the Government will not allow the producer to compensate himself for the great expenses in connection with the leasing of the fields, because they demand an enormous increase in royalty. Under these circumstances, our Russian companies are compelled to refrain from applying for Government oil territories. The possible profits that might be realised are so small in comparison with the great risk that we can more profitably employ our capital elsewhere.

"In Roumania this company has not now (nor has it ever) had any representation on the board of the Astra Romana, and we do not follow the operations of the company. We are informed that the production amounted to 341,532 tons in 1915, as against 466,604 tons in 1914, the reduction being brought about owing to the prohibition by the Roumanian Government of the export of benzine and liquid fuel. Notwithstanding these drawbacks, the company paid a larger dividend than in the preceding year."

NOTES OF THE WEEK.

The unsatisfactory state of affairs in Macedonia, which the Prime Minister has admitted to be a legitimate subject of criticism, has taken so strong a hold on public opinion that it has become necessary to set aside a date in Parliament for the discussion of the question. On the day that these pages go to press Sir Edward Carson, on behalf of the Unionist War Committee, will propose that Select Committees be appointed forthwith to inquire respectively into the conduct of the operations in Gallipoli and the Dardanelles and in Mesopotamia, "including the supply of equipment to the troops, the provision for the sick and wounded, and the responsibility of those departments of the Government whose duty it has been to minister to the wants of the forces in these theatres of war respectively."

It is perhaps a matter for regret that the Dardanelles venture should thus be bracketed with the present campaign in Mesopotamia. The one has come to an end, and there is reason to believe that those who were responsible for military blunders are no longer in a position to repeat them. In regard to Mesopotamia, on the other hand, the primary object of criticism at this juncture must be to improve a state of affairs which there is reason to believe still leaves much to be desired. The question of responsibility for the advance on Baghdad is on a par with that of the responsibility for the Dardanelles enterprise. The Government has distributed impartially a share in the responsibility among every possible body of authority between London and Simla, and the culprits cannot be expected to sit in judgment on their own shortcomings. Not until other authorities are in power will it be possible for the nation to know enough to benefit from the experience of past mistakes. But that is no reason why the failure to equip the Mesopotamian forces should be allowed to continue month after month. Mr. Asquith has given reasons why he considers there is at last an improvement in conditions in that theatre of war. He has, however, so repeatedly shown his inability to grasp the most elementary rudiments of military knowledge that the House of Commons has ignored his assurances and intends to thresh the matter out for itself.

The more superstitious among the Greeks are likely to find an omen in the disastrous forest fire which destroyed King Constantine's château and some thirty thousand acres of the beautiful woods at Tatoi. Others of a more matter-of-fact turn of mind will, it is to be hoped, accept the tragic occurrence as a warning to the country to take some practical steps to deal with a danger which has already denuded large areas. The world at large will be moved to sympathise with the Greek Royal Family over the disaster, which has not only destroyed their favourite residence, and taken its toll of Greek lives, but has resulted in a slight accident to King Constantine himself. While superintending the attempts to stem the progress of the flames, his Majesty found his retreat by the road cut off, and had to jump into a deep ravine in order to reach a place of safety. In so doing he sprained his ankle, and made good his escape with some difficulty.

Forest fires on a large scale were at one time of common occurrence in Greece. They arose generally from the desire of the pastoral community for wider grazing grounds, and were the outcome of systematic incendiarism. The steps taken to cope with this evil ultimately had a salutary effect, and although forest fires continued, they have in recent years been attributed to accidental, if preventible, causes. Nothing, however, would seem to have been done by means of a forestry organisation to reduce the possible areas of these conflagrations. Tatoi lies on the slopes of Mount Parnes, facing Mount Pentelicus, within sight of Athens. The forests on the latter mountain have been burnt within recent years, and it might have been expected that the royal demesne would at least have been rendered immune by means of fire belts from the possibility of such a calamity as that which has overtaken it. When the present fire broke out everyone on the estate was mustered to combat the flames, and soldiers and bluejackets were hurried up from Athens and the Piræus. But their improvised efforts could not be expected to make good the lack of scientific precautions.

Private accounts from Greece testify to the difficulties which the Liberal party has to contend against at the forthcoming elections. With a persistency which does more credit to their political instinct than to their national *amour propre*, the opponents of M. Venizelos are endeavouring to narrow the issue down to the choice between war and no war. In other words, they claim to know so accurately the feeling of the Greek army that they believe that they have only to hold up the bogey of war against Bulgaria, with possibly a few Germans thrown in, in order to secure a regular stampede of voters against M. Venizelos. The friends of Greece can only

Digitized by Google

hope that the army, in spite of the existence of Reservists' Leagues, will not lend its support to such a monstrous slander. After eight months' mobilization without fighting, the Greek soldiery are, not unnaturally, keen to return to their homes and normal avocations; but it is difficult to credit the aspersions of M. Gounaris's party on the physical courage of the whole army. Demobilization has brought relief to the Allied forces in Macedonia. A certain proportion of the Greek officers, and perhaps the majority of the civil authorities, spent their time in playing Germany's game. In many instances they made no attempt to disguise their point of view. They were obsessed with the fear of Germany doing to Greece what she has done to Belgium, and felt obliged to keep in with the Germans. If the Central Powers should ultimately be beaten, they were confident that Great Britain's friendship could be relied upon to prevent Greece from suffering any harm or loss of territory. Any right-minded Greek must be overwhelmed with humiliation to feel that this point of view is in danger of being regarded as the national attitude, owing to the conduct of those who have been responsible for the direction of Hellenic affairs.

A national memorial to Lord Kitchener must of necessity take the form of something eminently practical, in strict accordance with the character of the man whose memory it is sought to perpetuate. We welcome, therefore, the project, which has secured the patronage of Queen Alexandra and for which a representative council has made itself responsible, to raise a fund, to be known as the "Lord Kitchener National Memorial Fund," for the purpose of providing in perpetuity for officers and men of the Royal Navy and Army who have been disabled and whose pecuniary circumstances preclude them from obtaining such attention and comforts as they need. A portion of the fund will be immediately applied to equipping a home for disabled officers, for whose assistance, it is pointed out, nothing of a permanent nature has yet been considered. The fund has made a splendid start. All remittances should be sent to the "Lord Kitchener National Memorial Fund," Mansion House, London.

The recovery of the Russian army in Armenia is not only giving back to our Allies the ground they had previously occupied, but is carrying them, at least in one direction, beyond their former conquests. Baiburt, the chief town on the way to Ardasa, is now in their hands for the first time. The capture of the latter will give the Russians possession of the road from Trebizond to Erzeroum, and facilitate the provisioning and reinforcement of the troops in this theatre of the war. According to the latest reports, the advance is making steady headway over a wide front, which includes the columns operating from Mush, sixty miles south of Erzeroum. Whether the Turks will be able to make any substantial stand east of Erzinjan remains to be seen. Operations in this region must depend to a large extent on the facilities for bringing up reinforcements. Neither side is well situated in this respect, and until the Russians command the route from Trebizond there may well be slight swayings of the battle front. The Turks have had ample time, if they can command the material, to place Erzinjan in a strong state of defence.

For news of the Russian troops in Persia we still have to rely mainly on the Turkish *communiqués*, which are probably correct where towns serve to locate the actual scene of operations. Thus, in the course of falling back, the Russians are said to have reached a point half-way to Hamadan from Kermanshah. It is evident that the Turks have benefited not only by the fall of Kut, but also by the inaction of General Lake's force, in order to detach troops for service in Persia.

Any difficulty that the German authorities may experience in explaining away to their own people the Allies' offensive on every front will be enhanced when they are called upon to reassure their Bulgarian and Turkish allies. The numbers of the German and Austrian troops in the Near East must have been considerably reduced of late in order to feed their Western and Eastern lines. Policy will dictate the retention of a large Austro-German garrison in Constantinople, but there are signs that the Turks are not as satisfied as they have claimed to be in the past with German invincibility. It may be for this reason that we hear of the despatch of a German dirigible to Constantinople and of German submarines to Turkish waters. The former may not be of much practical value, but its usefulness for impressing the lay mind in Turkey will be considerable, and it may serve to make up for any diminution in the number of German troops sent to protect the Turkish Government. There can be little doubt that the connection with the Central Powers is the only thing that keeps Bulgaria and Turkey galvanised into action. When the line of communication is cut neither of the two vassal States is likely to give the Allies much further trouble, and their defection will in turn react on the confidence felt in Germany. Hence the importance of a forward movement in the Balkans, which it is difficult to believe can long be delayed.

The Roumanian Government is understood to have prohibited the export of corn until August 28. A German correspondent at Bucharest says that it is clear that the chief aim of the Government is to gain time and to await further developments of military events before taking its final decision. This interpretation of Roumania's action can be accepted as substantially correct, although some people may be tempted to go further and to see in August 28 "the appointed day." By that date the harvest will have been gathered, and sufficient time, we may hope, will have been given to the Russians to advance far enough to drive the Austrians from the Roumanian frontier and allow the Roumanian army, if it be so minded, a chance of trying conclusions with the oppressors of Transylvania on more equal terms than is possible so long as the Austrians command the higher portions of the Carpathians. Already Russian cavalry is reported to have reached one of the passes in the south of Bukovina, and the population of the frontier counties in Hungary has been warned to be prepared to meet a third Russian invasion.

A letter from Mr. Lovat Fraser, which we publish in this issue, takes exception to the point that it was sought to establish in our leading article of last week, that the record of failure in Mesopotamia must be wiped out before the campaign is brought to a termination, and that this can only be done by the entry of British troops into Baghdad. Mr. Fraser suggests that, if this process of reasoning were sound, it must also be held that our failure at the Dardanelles can only be wiped out by the entry of British troops into Constantinople. There is, of course, no analogy between Mesopotamia and the Dardanelles, and it is a matter for surprise that such a shrewd observer should have fallen into a mistake which, it is to be feared, is responsible for the bracketing of the Dardanelles and Mesopotamian campaigns in the public demand for despatches. At the Dardanelles we were fighting against the Turks, with whom there will be a final reckoning somewhere. In Mesopotamia we are concerned with Arabs, who are likely to be brought hereafter into direct touch with British administration. The contention in the leading article to which our correspondent takes exception was that, in order to safeguard British prestige among the Arabs, they must not be allowed to say (on the strength of their own observations, *i.e.*, in Mesopotamia) that the British were unable to register any decisive success against the Turks.

As we go to press we learn that the expected debate upon the conduct of operations in Mesopotamia did not take place in the House of Commons on Thursday. Before Sir Edward Carson rose to introduce his motion, the Prime Minister announced that a Bill would be introduced almost immediately for the appointment of a Commission to investigate the whole subject. Its investigations would, if necessary, be private. Sir Edward Carson thereupon withdrew his motion.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 6.

The Fast of Ramadan.

We are now in the midst of the great Moslem fast of Ramadan. As happened last year, some difficulty was encountered with regard to the official fixing of the commencement of the fast, and the Ulema Commission, which settles the question of the "Roza," or seeing of the moon, announced on Friday that as no one had been found to testify to the appearance of the new moon the fast could not start until the Sunday. But at the last moment a telegram was received from the Palace that the new moon had been seen, and accordingly the fast was decreed to start on Saturday, July 1. It is a great pity that the Ulema Commission cannot accept astronomical evidence as to the appearance of the moon, which would save a lot of trouble and inconvenience, and avoid a recurrence of what happened last year. There was a time when the Moslem religious heads refused to accept telegrams notifying that the new moon had been seen as evidence, even when they came from authoritative sources. To-day such telegraphic messages rank with oracular testimony when it comes to the matter of deciding the "Roza," and there is surely no reason why, having up to this point acknowledged the progress made by science and the feasibility of invoking its assistance in certain cases, the Moslem doctors of religion should not break altogether with what is, after all, but an antiquated procedure handed down from mediæval and even earlier times, and accept as final and conclusive the certified calculations as to the appearances of the moon made by the Government astronomers.

The Retiring Judicial Adviser.

Sir Malcolm McIlwraith, the retiring Judicial Adviser, proceeded to England by the last P. and O. liner. He has been accorded, as a special case, a pension of £E1,200 per annum, although the maximum he could have claimed was a little over half that sum. Sir William Brunyate, who is to succeed him, and who is at present on a mission in London, will not be officially gazetted until October, as Sir Malcolm is taking three months' leave prior to his retirement. During Sir William Brunyate's absence the duties of the Judicial Adviser will be performed by Mr. W. G. Hayter, Legal Adviser to the Ministry of Finance, who, it may be recollected, was one of the members of the historic Denshawai Court, on which he took the place of the retiring Judicial Adviser.

Sir Malcolm McIlwraith has been accorded a very hearty farewell by the members of the Ministry of Justice. Sarwat Pasha, the Minister, gave a banquet in his honour at San Stefano, and Shukry Pasha, Under-Secretary for State, organised a tea-party at the Ministry in Cairo. At the latter function it was announced that a fund, subscribed to by the officials of the Ministry of Justice as a mark of respect and affection for their retiring chief, had been established for the annual award of two prizes for civil and criminal law at the Sultania School of Law, and of two other prizes for Mohammedan jurisprudence at the School for Kadis. All these prizes will be known as the "Sir Malcolm McIlwraith Prizes." A personal souvenir from the Ministry *personnel*, in the shape of two chairs and a lamp copied from the originals in the Arab Museum, was presented to Sir Malcolm, some handsome embroidery to Lady McIlwraith, and a portfolio inlaid with mother-of-pearl to Miss McIlwraith. Prior to his departure Sir Malcolm McIlwraith received a visit from Hussein Teymour Bey, of the Sultania household, who handed him, on behalf of the Sultan, a signed photograph of his Highness.

Purification of Cairo.

The new Summary Military Court which has been established in Cairo commenced its sittings on Saturday last. The court is to deal with offences against the various proclamations, and primarily with those deemed prejudicial to military interests. Especially will it give its attention to offences against public decency and morality, the police having been instructed to bring to its notice all offences of an indecent or unnatural nature. The exposure or sale of objectionable publications, the holding of objectionable entertainments or exhibitions, and the treating of contagious diseases, particularly those known sometimes as "secret diseases," by unqualified persons are to be considered as offences prejudicial to military interests. Incidentally, offences against traffic regulations, such as dangerous driving by civilian or military drivers, will come within the jurisdiction of the court, which will, generally speaking, act as a local petty sessional court, and will in its decisions be guided by the principles of English Law.

Everyone will approve of the motive underlying the establishment of this court; for vice in all its forms has undergone considerable extension in Egypt since the outbreak of war. The Egyptians have received the creation of the court very well, but not unnaturally they clamour for some clearer exposition than has been vouchsafed so far of the policy which will be followed by the court, whose powers, as can be seen, are very wide. Those responsible for its establishment are, however, up against a far more difficult problem than they imagine; and very great care will have to be taken to ensure, on the one hand, that the police do not in their excess of zeal arbitrarily interfere with innocent citizens or subject European offenders to unnecessary or unwarrantable hardships, and, on the other hand, that this very praiseworthy attempt to purify Cairo does not end in driving vice further underground, as has happened in the case of so many previous similar efforts.

The Nile.

At this time of year the thoughts of all those interested in agriculture turn to the upper reaches of the Nile for news of the coming flood. The latest records show that the river is rising quite normally compared with the mean gauge of 1906-1914, which has been fixed by the Ministry of Public Works as the standard on which annual comparisons are to be made. (It is true that some of the gauge records date back much further than 1906, but, as the earliest for the far southern points are for that year, it has been decided that for simplicity of working the 1906-1914 period should be taken as the standard throughout.) The river prospects are in these circumstances quite good. The great rise at Mongalla, in comparison with its normal, may quite possibly indicate an early flood, and it is hoped that as a consequence a sufficiency of water will exist next summer.

OUR UNBURIED HEROES.

General Gordon—F.M. Earl Kitchener of Khartoum, K.G.

He sought for Gordon; but he found him not.
Ah! "Somewhere dead far in the waste Sudan"
Was he whose loss Britain hath ne'er forgot—
True type of high nobility in man.
We know not if his mortal form doth rest
By sacred stream, or 'neath the desert sand;
He was of Britain's bravest and her best,
And freely gave his life for his loved land.

And now, amid the clangorous din of strife,
We seek for him who sought; for he is gone—
Gone in the very fulness of a life
That also with surpassing grandeur shone.
Near lonely islands in the Northern Sea,
The swirling waters sucked him swiftly down;
But for heroic souls no death can be,
He lives for ever, haloed with renown.

And so he passed, a strong man and a great,
As did those other heroes of the wave
Who with him sailed, and others, too, of late,
Who, e'en though victors, found an ocean grave.
There the enshrouding waters of the main
In one vast sepulchre entomb them all:
So, 'neath the surface of the watery plain,
Our hero waits the final trumpet call.

His deathless spirit still to us is nigh,
Nerving us all to do our part as men;
Whene'er he spoke to us our hearts rose high,
And his great soul inspires us now, as then.
Barbarous hordes fair lands of earth deface,
Soon would they 'whelm the whole wide world in blood:
We shall not stay our hands till, by God's grace,
We've stemmed the torrent of this Teuton flood.

Robey F. Eldridge.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, July 5.

The Coming Electoral Campaign.

It is obvious that in imposing fresh elections upon Greece the Entente Powers wished to ascertain the feeling of the country, and whether the Greek people approved of the late Cabinet's Germanophile policy or of the Ententist policy of M. Venizelos. It was thus that M. Venizelos put the question on Sunday to a meeting of merchants and manufacturers, and he will put it in the same way to the electors. He will ask them whether they wish for the friendship of France, England, and Russia, the creators and protectors of free Greece, or whether they would prefer that of Germany and Austria, the allies of the Bulgars and the Turks. As for his opponents, M. Skouloudis, M. Gounaris, and the others, they have not the courage to proclaim their Germanophil programme, for they are well aware that the Greek people would never countenance a policy of such ingratitude towards the protecting Powers. Moreover, it is still remembered in Greece that it was Germany who egged Turkey on to make war on this country in 1897, who imposed the control on Greek finances, and who has left the Turks free to exterminate the Greeks in Turkey during the past two years.

It is such considerations as these which make the opponents of M. Venizelos anxious to conceal their true attitude under a cloak of "neutrality." However, as they realise that, after what they have done against the Entente, this will not suffice for their purpose, they have begun to hedge; and since the delivery of the Powers' Note they have been announcing through their papers that in the event—which they affect to regard as certain—of the defeat of the Venizelists at the forthcoming elections the Government that will come into power—that is to say, the Gounarists—will declare a very benevolent neutrality towards the Western Powers. It may be observed parenthetically that both M. Gounaris and M. Skouloudis made a precisely similar declaration when they came into power, and the world knows how they kept their promise! They flatter themselves if they think they will be able to deceive the Entente Powers again, after being turned out of office for their hostility towards them. M. Gounaris, however, has had the hardihood to protest in the *Neon Asty* against the charge of being a Germanophil, maintaining that he has never shown any hostility to the Entente, to whom he is, indeed, friendly, and that M. Venizelos has calumniated him in accusing him of Germanophilism. Yet it was M. Gounaris who, having on February 26, 1915 (O.S.), published a communiqué declaring that he considered it "a supreme duty of the country" to honour its engagements and alliances, and having given promises to the Entente Powers who were interested in the fate of Serbia, in August of the same year informed Bulgaria that Greece would not fulfil the obligations imposed upon her by her alliance with Serbia.

Anti-Venizelist Intrigues.

Taking advantage of the depressed state of mind in which the reservists found themselves as a result of what they and their families—left unprovided for by the Skouloudis Government—have had to go through during the past nine months, and by their natural reluctance to be called to the colours again, certain anti-Venizelist officers have been inciting these reservists to manifestations against M. Venizelos. According to a detailed report published by the *Kyrix*, at Corinth, where there have been disorders of this kind, the officers, in bidding farewell to the reservists, informed them—in an Order of the Day—that they ought to hold themselves in readiness to join the colours at an early date if M. Venizelos came into power, since he would make war. The *Kyrix* deplores this mixing in politics on the part of the officers in such a scandalous way. The *Hestia* gives some interesting details of the addresses delivered to the reservists in all regiments and all classes on their dismissal. Thus, some reservists at Trikkala were exhorted as follows: "'Blackball Venizelos!' That should be your watchword henceforth, in the train, at the stations, in your own village, and everywhere you go." The reservist who gave this information to the *Hestia* added that at the stations there were officers who gave the signal for cries of "Blackball, blackball!" (Venizelos) to departing reservists.

A reservist surgeon-captain just discharged from Kavalla states that four days ago certain officers informed the reservists that Germany was everywhere victorious, that Verdun had fallen, that the Germans were bombarding Paris with their "42's," and that Venizelos wished Greece to affront Germany. "Blackball him!" The same journal reports that even in Athens some soldiers (undischarged), while passing through the streets, raised the same cry, which shows that the capital is not free from similar propaganda.

Reservists' Associations.

Similar agencies have been at work to induce the discharged reservists to form anti-Venizelist societies. Such bodies have been formed in nearly all the provinces, and have sent telegrams to the King informing him that they are ready to rejoin the colours the instant that he, and *only* he, may deem it necessary.

In such circumstances it seems very doubtful whether the aim of the Powers—that the Greek people, by its vote, should pronounce itself freely and uninfluenced by any pressure—will be attained. To the military influence must be added that of the public officials—prefects and others—nominated by the late Government, and not yet replaced by the present Cabinet. Nor is it possible to ignore the fact that the arrest of the Greek officers at Salonika, ordered by General Sarrail, for attacking a newspaper editor, has done nothing to strengthen the Ententist party of M. Venizelos.

The Elections.

The Decree dissolving the Chamber, which will also fix the date for the elections, has not yet been issued, but it is understood that October 1 (September 18, O.S.) will be the date. It would be to the advantage of M. Venizelos to have as long as possible to explain his programme, to enlighten voters who have been misled by the German propaganda, and to counteract the numerous influences that have been brought to bear against him. It is to be hoped that the Greeks will show their appreciation of his splendid patriotism and his great abilities, and will not allow themselves to be exploited by unscrupulous politicians. In the uncertain situation everyone is asking what would happen if the Venizelists were defeated, which would in effect amount to an expression of disapproval of, almost of enmity to, the protecting Powers. In such case those Powers could not—if the people had voted freely—force Greece to be friendly to them. But it would equally be open to them to cease to take any interest in Greece and to give up protecting her; nor would they have any further reason to give her assistance, financial, commercial, or political.

Under date of July 14, *The Times* correspondent in the Balkan Peninsula reports from Constantza:—The prices of all foodstuffs continue to fall in Constantinople, where, according to the latest reports, abundance now reigns.

The *Daily Chronicle's* special correspondent at Milan reports that some of the most wonderful archæological finds of the century have been unearthed at the Roman baths at Cyrenaica. These include a colossal statue of Alexander the Great, over 55 ft. high, which has been recovered entire; a head of Athene, derived from a Greek original of the fifth century before Christ; a well-preserved Eros, and the most perfect specimen of a sculptured satyr on record. A later message announces that as a sequel to the fresh impetus which the new Italian Colonial Minister has given to exploration work on the part of the garrison troops there, the Temple of Jupiter is being laid bare. Though the digging is still in the initial phase, some important inscriptions dating back to the periods of the Emperors Hadrian and Antoninus Pius are among the finds.

CYPRUS NOTES.

(From Our Correspondent.)

Cyprus, June 26.

It would appear that June will be a record month for heat. Another wave of most oppressive weather set in, attaining a maximum in the third week. At Nicosia the thermometer has frequently registered over 110° in the shade and over 97° in the coolest rooms of houses. Hot winds have prevailed during several consecutive days. Fortunately for the capital, it has been dry, but on the coasts excessive damp has added to the trials. In the rural districts villagers have found the sun and hot blasts almost unendurable, and have had to leave work on threshing floors, etc., to seek for shade and cooling springs. No such heat in June is remembered. The summer bids fair to equal, if not to surpass, that of 1878, the year of the British Occupation.

Fevers and other maladies have been prevalent, but none of a serious or epidemic type. The natives now pay far greater attention to safeguards to health, and all-round improvement in living has had many good results. The Medical Department exercises praiseworthy vigilance throughout the island. Much, too, has already been done in carrying out the anti-mosquito campaign, as advised by Sir Ronald Ross, and every year should contribute to progress in this direction. In the towns much remains to be done for sanitation, though the municipalities in many places are doing excellent work. At Nicosia, for example, good service is being rendered by Dr. A. Hadjigavziel, who closely inspects public resorts, eating houses, cafés, etc. It must be hoped that it will soon be possible for the Municipal Council to take in hand improvements in the water supply.

There is often more serious crime during the hot months than at other seasons. Notwithstanding the activity of the police, and the fines inflicted under the law which prohibits the carrying of dagger knives, stabbing cases have been numerous of late, among Moslems as well as Christians. Poisoning cases are not numerous; but recently a village girl of the Kyrenia district, aggrieved by the conduct of a young man who failed to carry out a promise of marriage, placed poison in a water vessel, from which she knew he would drink. Unfortunately, not only the faithless lover but four other villagers partook of the contents, with serious consequences not yet ended. Medical aid was obtained as soon as possible.

Accidents on the railway are rare, but on June 22 the goods van of a train running between Famagusta and Nicosia caught fire from a spark from the engine. Before it could be extinguished the contents, consisting largely of fruit and vegetables, were destroyed.

July 3.

The Government examinations in English took place last week. The number of youths who present themselves is a large and increasing one. No less than 142 candidates for the lower class came up. The greater number of them no doubt desire, if successful, to obtain in due course Government employment, but it is obvious that only a small percentage can attain this object, laudable as are the efforts. There is an increasing difficulty in Cyprus in obtaining suitable work in which the French and English languages would be useful, as is also the case in Greece. A fair number are able to obtain places in mercantile houses in Egypt and other countries, and an adventurous few seek fortunes in various British colonies. The Cypriots become very good linguists, and learn English with remarkable facility.

Lieutenant Hamilton has arrived from Salonika in connection with the engagement of interpreters knowing English and Turkish, as well as Greek, to serve with the British forces in that region.

The heat has moderated, but June has been an exceptionally trying month, as it has been in Egypt.

FOR WOUNDED SERBIANS.

Major Alwyne Maude, who a few months ago went out to Corfu as administrator to the nursing unit despatched to the aid of Serbian sick and wounded soldiers by the Wounded Allies' Relief Committee, of Sardinia House, Kingsway, has lately returned to report, and gives an interesting account of the work accomplished. Of the Serbians who came under his control he says:—"Have had to do with the peasantry of many lands, but I have never found any so 'facile' or so 'douce' as the Serbians. They are like large, strong children." And speaking of the sufferings that many of the convalescent endured, he tells of how, on leaving Vido, where they sought refuge for a time, they went straight from their beds to tramp nine miles through the burning sun with their packs on their backs to the French camp for Serbian convalescents at Moraitike. Subsequently Mr. Maude picked up several of them on the road in a more or less dying condition, and took them home.

At San Stefano a hospital of 200 beds is doing excellent work, but much remains to be done, and the Committee of the W.A.R.C. will welcome further help.

THE STATE OF SYRIA.

(From a Correspondent.)

Cairo, June 5.

Further information regarding the situation in Syria has been received through two persons who left that country as late as the 18th ult. and arrived at Port Said by a French warship. The details are more depressing than ever. Famine is spreading, and the village from which these two travellers came, and which used to be one of the most prosperous in the Lebanon, has lost one-quarter of its inhabitants through starvation. Many of the dead were being buried without the performance of any religious rites, as the few priests left are not sufficient to cope with the large number of burials. If anybody happens to die outside his village he is promptly buried without anybody conveying the news to his relations.

It appears from three letters, written as far back as the latter part of December and beginning of January, from Hasbeya, a rich village in the Anti-Lebanon, that famine began to be seriously felt at that time, and embraced the greater part of Syria. These letters have been published in an Arabic paper in San Paolo, Brazil, and, in spite of the relentless scissors of the censor, enough has been left to betray the serious condition of the country. The oke (2½ lbs.) of wheat was even then at about a shilling, and men up to the age of fifty-two were being enrolled.

The reign of terror seems to be increasing in ferocity. The number of persons hanged up to the beginning of June last is said to have amounted to twenty-three, and of those whom the Court Martial at Aley condemned to death, without (so far) the sentences being executed, is over 200; while the number of those exiled to the interior runs up to several hundreds.

The news about Beyrout, save for the cases of hanging, is rather more reassuring. There seems to be complete security. It can hardly be otherwise, when the only care of the people is to fight starvation. Living, however, is extremely dear, and medicines are almost completely lacking. The tramway is still running and the town is still lit with gas, although the number of lamps has been reduced by half. Passenger trains are leaving Beyrout only once a week.

The American College has been compelled to include in its curriculum the teaching of German and Turkish. The students registered in the vilayets had lately to answer the call to the colours, but the Lebanese are still exempt from military service, although they are allowed to go about in the town only if they are provided with a permit from the local authorities and documents proving their Lebanese subjection.

The Ottoman Bank is still open, and the Government accepts payment in gold only, their object being evidently to drain the country of its gold and silver reserve.

The latest Arabic papers from the United States are full of accounts of Syrian affairs, and reveal the deep concern with which the large Syrian community in America regards the situation in their unhappy country. The Syrians' activities there have not been confined to collecting funds for the relief of their compatriots; they are also stirring up American opinion and enlisting the sympathy of the highest officials, including the President of the Republic himself.

The distribution of 1,000 oxen to 2,000 Armenian families in forty-six villages in the Russian Caucasus is announced by the American committee for Armenian and Syrian relief. These families are returning to their homes, following the advance of the Russian armies into Turkey.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 27.

Hungarian Troops on Roumanian Soil.

From Moldavia it is reported that the Russians, who had occupied the town of Campulung, have now reached Dorna Vatra. However this may be, we have ample evidence that the Russian army is advancing with giant strides, for Hungarian troops have passed on to Roumanian territory while attempting to escape the clutches of the Russian bear. Their total number is not known. Yesterday morning I was assured that a whole division had surrendered. A reputable evening paper spoke of the force constituting "almost a regiment," and this morning's *Dimineatza* reduces the captured force to a squadron of hussars. Whether it was by inadvertence that they crossed the frontier, or with the fixed intention of surrendering to the Roumanian military authorities in place of the Russians, has not been established; but the latter seems the more plausible explanation, and is supported by the statements made by some of the soldiers. Yesterday morning at an early hour some of the Hungarian officers were conducted through the streets of Bucharest, and they are said to have been hooted as they passed.

Refugees from Bukovina.

The Russian advance has provoked a regular exodus of Bukovinian fugitives. Some twenty thousand have crossed into Roumania. They are mostly old men, women, and children, and nearly all Jews. They continue to arrive at Burdujeni and other places on the frontier, and are then picked up by express trains, which convey them into Hungary through the frontier point of Palanka: and meanwhile a committee formed for the purpose is showing great activity in providing the refugees with food in the railway stations at which the trains stop, for their state of misery and starvation is pitiable.

On the Bulgarian Frontier.

The Bulgars continue to keep their frontier with Roumania carefully closed, even to diplomatic personages. Indeed, if diplomatic relations had been broken off the state of affairs would not be very different. To representations made by the Roumanian Military Attaché at Sofia and the Commercial Attaché at Constantinople that they should be allowed to rejoin their respective posts by way of Rustchuk the Bulgarian Legation is said to have replied that nothing prevents them from travelling to Sofia by way of Budapest!

The Bulgarian Minister, M. Radeff, is still away from Bucharest "on leave." He is said to have been on a mission to Macedonia, and to have returned now to Sofia. Since the explosion which took place at the Bucharest arsenal he apparently regards the Roumanian climate as unhealthy. And perhaps he is right in so far as his particular constitution is concerned.

The Unionist Federation.

The second meeting of the Unionist Federation was held at the Dacia on Sunday last, amid much enthusiasm. Speeches were made tending to stir up the national feeling, the assembly finally dispersing without any disturbance. The Conservative and Conservative-Democrat parties seem to have united with the fixed purpose of leaving no stone unturned in their efforts either to upset the present Government or force it to take an active part in the war against the Central Powers.

Disturbances at Galatz.

The authorities at Galatz having vetoed on Sunday last a syndicalist meeting which was to take place at the Royal Theatre, the syndicalists declared a general strike, in which the tramway employees and others took part, and began manifesting in the town. A battalion of infantry was sent to the spot to prevent the advance of the strikers, but, the latter attempting to force their way through, and a soldier having been severely wounded by a revolver bullet, the officer in command ordered his men to fire on the crowd, with the result that half-a-dozen strikers were killed and many wounded. The remainder thereupon fled.

"Regrettable—But Inevitable."

The other day, the members of the two Conservative Clubs having celebrated the fall of Czernowitz, the sympathising crowd passed a well-known open-air restaurant where the German and Austrian Ministers were dining together with several members of their staffs. The crowd soon caught sight of them, and commenced a hostile demonstration, which finally obliged these gentlemen to abandon their beer and make good their escape through a back door. Perhaps it would be more prudent for Messrs. Busche and Czernin to take their meals at a restaurant somewhat further removed from the Conservative Club at a time when the defeat of the Central Powers is being celebrated. "Such provocations," writes an evening paper, "on the part of foreign Ministers who are in a position to know what degree of sympathy they enjoy among the people cannot have consequences other than those they experienced the other night—consequences which are regrettable but inevitable."

A Russian Aeroplane in Moldavia.

A Russian aeroplane carrying a lieutenant and a sub-lieutenant was obliged to land a few days ago on the outskirts of Botoshani in consequence of a slight defect in the motor. It was coming from Bukovina. Great was the gallant officers' dismay on learning that they were not on Russian soil, for they were the bearers of important news. But the rules of war are inexorable, so they had to surrender, and have now arrived in Bucharest.

Delicate Flattery.

An ultra-patriotic English lady, who is spending the hot season at a summer resort not many miles from the Hungarian frontier, has hoisted a Union Jack over her villa. The Roumanian troops, who are here very numerous, rarely pass the house without giving the flag the regular salute—a delicate attention which, we may assume, has completely won the heart of the Union Jack's fair owner.

BULGARIAN PROPAGANDA.

(From a Bucharest Correspondent.)

For some time lately the Bulgarian Government has done everything possible towards propaganda in other countries. With this object Alexander Kyroff, the well-known Bulgarian journalist, was sent to Switzerland, where he published a pamphlet, with the title "The Truth About Bulgaria," in the German language. His mission was official. On his return from Switzerland he was received by the Prime Minister, M. Radoslavoff, to whom he submitted a report on the results of his mission. The journals of Sofia noted the satisfaction of the Prime Minister with his success. M. Kyroff belongs to the Liberal and Progressive Party, the chief of which is Dr. Daneff. This party has, however, expressed dissatisfaction with M. Kyroff. According to information from Vienna, the Bulgarian Consul there, M. Tabanoff, and M. Kostoff are to be sent on a propagandist mission. The Democrat member of Parliament, M. Vassielieff, has also gone to Germany with a similar object. These facts prove that the Bulgarian Government has decided to employ the greatest activity in propaganda work abroad, and, in order to arrive at the desired end, to employ members of the Opposition.

AN INTERESTING EXPERIMENT.

A local paper published at Piteshti, Roumania, recently requested its subscribers to send in replies to the query:—"Should Roumania, in your opinion, abandon the policy of neutrality, and, if so, with which group do you consider that she should co-operate?"

Nine hundred and forty replies were elicited. Of these 900 advocated active participation in the war alongside the Entente, thirty-seven were in favour of permanent neutrality, and only three supported military co-operation with the Central Powers.

The Home Office gives notice that the provisions of Article 19 of the Aliens Restriction Order, which require the registration of alien friends, and which are already in force in the rest of the country, have been extended to male aliens above the age of eighteen of French, Italian, Russian, or Serbian nationality residing in the Metropolitan Police District. This requirement comes into force on July 22. Instructions as to the place and time of registration have been published by the Commissioner of Police, and may be obtained at any police station. The penalty for failure to register is a fine of £100 or imprisonment for six months.

According to Bucharest messages, the King of Roumania last Friday conferred with the Russian Minister, and afterwards received other Entente Ministers.

IN OLD SERBIA.

(From a Bucharest Correspondent.)

The following notes on the present state of Serbia have been supplied by a person who has lately passed through the country and are up-to-date and trustworthy:—

Belgrade has regained a little of its former animation on account of the presence of the enemy troops, but the Austrians have modified the shop-signs, hotel names, etc. Thus the Rousky Tzar (Tsar Restaurant) has become the Kaiser Franz Josef Halle, and so on. Some of the factories have recommenced work, but only those with Austrian capital from the Andrévitch Bank.

In April the Austrians interdicted the population from eating meat on Tuesdays and Fridays, two months in prison being the penalty for any contravention of the law.

The invaders have established in Serbia a régime practically analogous to that imposed by the Germans on Belgium. The Germans have reorganised the Serbian municipalities after the Prussian system, establishing councils of citizens which are obliged to ratify the sovereign decisions of a military autocracy.

The privileges of the Serbian National Bank have been suspended, and a branch of the Austrian Bank has been established at Belgrade, and has issued new notes. Serbian money is exchanged at the rate of 50 hellers for a dinar, or at the rate of 50 centimes to the franc. The Wiener Bank Verein has also started business in Belgrade.

At Svietka Petka, near Nish, the Germans have constructed an iron bridge, in connection with which there are so many precautionary rules that neither the Bulgarian soldiers nor their officers have the right to approach it. A Sofia newspaper echoes the discontent of the Bulgars, who declare themselves humiliated by this want of confidence on the part of their allies.

A GIFT FROM LONDON'S CHILDREN.

The London County Council is exhibiting for a few days at its Day Training College in Southampton Row some clothes that have been made by its school children for the use of Belgian and Serbian refugees. The exhibition was formally opened on Wednesday last, when speeches were delivered by, among others, Monsieur Voislav Antonievitch, First Secretary of the Serbian Legation. In the course of his remarks, he said that the saddest feature of the war, as it affected his people, was the unspeakable suffering of the children. It surpassed all imagination. Forty thousand children left Serbia for the great retreat over the Albanian Mountains, but of these only ten thousand arrived at Corfu. Those who had been fortunate enough to escape would be happy to realise that they had not been forgotten, and the generosity of the London children would for ever live in their grateful memories.

Miss Frere, speaking of the "beautiful Serbian costumes," said the little girls of London had thoroughly enjoyed making them. Next to a national anthem and a national flag, a national dress made the most wonderful appeal to the human heart.

Mr. Albert Smith, member of the Central Committee of the Belgian and Serbian Children's Clothing Fund, described how the work had been initiated and developed. The London school children had been instructed not to ask their parents for money, and anyone who had seen them bringing their pennies, halfpennies and farthings would realise that it was entirely their own gift. With the money thus realised materials had been purchased, and the girls had made these into clothes. The amount collected to date in the manner stated was £2,550, apart from small sums spent locally on trimmings.

The financial report of the Serbian Relief Fund, which was lately completed by the hon auditors, shows that for the year ended April 30 last management expenses were well under 2 per cent., while publicity, advertising, cost of flag days, etc., worked out at less than 5 per cent.

"The Author to whom we owe the most finished and faithful rendering ever yet given of the character of the British soldier."—John Ruskin.

London: EAST AND WEST, LTD., 3, Victoria Street, S.W. - 1916.

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by th writer's full name and address, not necessarily for publication, but as an evidence of good fasth. They should be worded as briefly as possible and must be written on one side of the paver only.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

JUDICIAL REFORMS IN EGYPT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I have not seen Sir M. McIlwraith's valedictory report, but from the article appearing in The Near East of July 14 Sir M. McIlwraith appears to have taken to himself and Sir W. Brunyate all the credit for the many reforms introduced in the Penal Codes during his tenure of office.

Amongst other legislation, your correspondent cites "First Offenders' Law"; "more rational treatment of juvenile offenders"; "complete recasting of provisions concerning Recidivism"; "Vagrant Children Law"; "indeterminate sentences"; "the segregation of dangerous criminals in special establishments."

If I may be allowed to correct your Cairo Correspondent, not *one* of these laws originated in the Ministry of Justice. In fact, most of them were very strongly opposed by both Sir M. McIlwraith and Sir W. Brunyate, and looked on with grave suspicion by that very conservative body the Judicial Bench. I may add that many of these laws only got on to statute at all owing to Lord Cromer's support. For Sir M. McIlwraith now to claim the credit of these reforms (if he does) without any reference to the department responsible for their conception is, to say the least, colossal effrontery.—I am, etc.,

"THE MESOPOTAMIAN CAMPAIGN AND ITS OBJECTIVE."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—May I say a word on the subject of your leading article, "The Mesopotamian Campaign and Its Objective"? You urge that "failure must be wiped out, and this can only be done by the entry of British troops into Baghdad." I venture to observe that if your process of reasoning is sound, which I do not admit, then it must also be held that our failure at the Dardanelles can only be wiped out by the entry of British troops into Constantinople.

One thing is certain. The "very vigorous thrust" which you call for "at this moment" in Mesopotamia cannot be delivered in the height of the hot weather.—I am, etc.,

Lovat Fraser.

The White House, Slough,

[*This subject is referred to in our "Notes of the Week."* Ed.]

WANTED—A DARJEELING.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The exigencies of the war have drawn attention to this want in the fair island of Cyprus. No official obtained leave of absence last year—none will get it this summer. Their families hesitate to go to England on account of submarines, delays on the journey, and the uncertainty of return.

What then happens to the children? The majority must swelter, and at the present moment are sweltering, in the plains. Why don't they go to Mount Troodos, 6,000 ft. above sea-level? Some do. Why do all not go? Because the accommodation is strictly limited. A few Government huts are placed at the disposal of the officials who are in attendance on the High Commissioner. There is a small visitors' camp, run by private enterprise, and there is a wooden erection called an hotel which would not be tolerated in the Yosemite valley of California, and would be deemed a very second-rate caravanserai in a mining town in the Western States of America. I must do justice to the proprietor: he recognises the defects in his establishment quite as much as the general public does. But his hands are tied. The land is leased by the British War Office, and the military authorities will not permit the erection of a stone and lime edifice, such as one finds in the Lebanon or in Syria generally.

People call for a Darjeeling. Let us admit that the Government staff are sufficiently housed. What about the families I have already alluded to? What about the visitors from Egypt, attracted partly by what they read in the Cyprus Handbook and partly by the advertisement of the Grand Hotel Olympus? I am afraid most of them re-

Digitized by Google

turn southward disappointed. With whom, then, lies the blame? I am afraid it must be placed on the shoulders of the island Government. For thirty-six years I have watched and waited. No one individual can be held responsible. Inertia is the cause. Downing Street and the Treasury may have contributed to the somnolence. Undoubtedly from time to time outsiders have made application to do things and have been cold-shouldered. Can nothing be done? Certainly something can be done, and ought to be done speedily. Whenever a proposal is made it should be sympathetically received. If no proposals are received, then it is the duty of the Government to try to obtain some, aided by a subsidy. France takes £45,000 a year out of the island. Were these thousands retained here, life might be made much pleasanter for officials and summer visitors alike.—I am, etc.,

GEORGE L. HOUSTOUN.

ARMENIA AND THE ALLIES.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—If THE NEAR EAST can in any way prevent England from making any more blunders in the Near East like those she made in the past century by persistently maintaining and supporting the Turk against Russia and against the poor Christian subjects of those bloody massacre-mongers, you will surely have rendered a great service to the honour of your own country and to suffering humanity. The difference between Germany and the Allies in Near Eastern questions is that Germany is frankly and brutally selling the Christians away for her interest, while the Allies, after having betrayed us all again and again, find themselves in the position of having been pulled by the Turks and the Germans.

These are the reflections of a passionately—

PRO-ALLY-ARMENIAN.

Hartford, Conn., U.S.A., June 28, 1916.

BOOK NOTES.

Two books of interest published recently are:—"Armenia: Past and Present," by W. L. Williams (King, 3s. 6d. net); and "Zionism: Problems and Views" (Unwin, 6s. net). The latter is edited by Paul Goodman and Arthur D. Lewis.

The July *Quarterly Statement* of the Palestine Exploration Fund, of which we have received a copy, contains, besides a report of the annual general meeting of the Fund, a particularly interesting instalment of the "Occasional Papers on the Modern Inhabitants of Palestine," by Dr. E. W. G. Masterman and Professor Macalister. A table showing the weight in grains of various Egyptian, Phœnician, Assyrian, and Greek weights now in the Fund's museum is contributed by Mr. W. Airy, and Mr. Joseph Offord has many interesting Archæological Notes, largely concerned with Babylonian inscriptions.

Messrs. Macmillan announce that they will publish immediately a new edition of their "Guide to Egypt and the Sudan," which will embody the latest information available up to the time of going to press. The whole work has been submitted to critical and detailed revision by an Anglo-Egyptian acquainted with all the most recent developments in Egypt and the Sudan.

The Council for the Study of International Relations (1, Central Buildings, Westminster) has published at the price of threepence "The Problem of Small Nations in the European Crisis," by Professor T. G. Masaryk, lecturer at the School for Slavonic Studies, London University. Amongst other topics dealt with by the writer are: Great Britain and the Oriental Question; Serbia-Croatia, the barrier against Germany's *Drang nach Osten:* and the relations between Britain and the Slavonic world.

"The Tragedy of the Jews in the European War Zone," by Leon Levison, is a pamphlet issued by the Russian Jews Relief Fund. It tells a moving tale of suffering, and makes a forcible appeal to the charitably disposed on behalf of these victims of the Great War.

Two pamphlets published for the Kossovo Day Committee are: "Heroic Serbia," from the French of M. Victor Bérard, and "Serbia and Kossovo," by Dr. S. Georgevitch.

In "Behold the Woman," by T. Everett Harvé (published by Messrs. Lippincott), the scene is laid in Alexandria at the close of the fourth century, and the story deals with the conversion to Christianity of a beautiful courtesan.

We have received from Messrs. Curtis and Harvey a copy of their "Shooter's Year-Book" for 1916-17. It contains much information of value to the sportsman, set out in handy form, and we advise any of our readers who go in for shooting to obtain a copy, which they can do by writing to the publishers (at Cannon Street House, London, E.C.), and enclosing a penny stamp for postage.

NEAR EAST BOOKSHELF.

FERDINAND OF COBURG.*

King Ferdinand of Bulgaria is anything but an attractive personality; on the contrary, he is distinctly repulsive. There was a King of France—Louis XI.—who was equally false, superstitious, cowardly, and unscrupulous, but his life's work was stamped with success and the hall-mark of greatness. In the case of Ferdinand, however, duplicity has engendered failure, and an autocratic policy, Hun-inspired, is rapidly depriving Bulgaria of any serious claim to our respect. The author of the book under review is explicit in his condemnation of the man who threw Bulgaria into the arms of Austria, and he does not veil his contempt for the "shoddy Tsar." Personally, we do not approve of that class of literature which consists in "mud-slinging," in collecting gossip and tittle-tattle and then rushing it into print. A portrait in black, without lights, may have its own *raison d'être*, but it can hardly be expected to appeal to those who desire to obtain a faithful impression of a ruler who, whatever his vices and shortcomings, has certainly influenced the course of recent events in no small measure. It is indeed surprising how King Ferdinand was able to bamboozle the British, French, and Russian statesmen into the belief that Bulgaria, if paid her price, would come in on our side—or, at the worst, remain neutral—whereas he had already signed a definite agreement with Berlin, through Vienna. It is not for us here to analyse the hidden springs of a very complex character and the willing or duped tools by means of which "Tsar" Ferdinand was able to carry out his policy of rank duplicity. It will be the duty of the historian of the future to do this, and by him also will the Autocrat of Bulgaria finally be judged.

In the meantime it can safely be said that, whatever the influence—and it was great—brought to bear by King Ferdinand on the present war, it was and has been directly antagonistic to the Allied interests, and this, in spite of the fact that the ruler's mother was a French princess of the Bourbon family, and that Russia is, so to speak, Bulgaria's godmother. This, when the day of reckoning comes, can neither be forgiven nor forgotten, and, whatever the fate of Bulgaria as a State or people, the man who led her armies twice traitorously against the Serb will have to abandon the Balkan Peninsula, and be made to pack up his regalia and leave Sofia to work out her own salvation as best she may; or, as the author says:

> One effect of Ferdinand's intervention was to unite Constantinople with Berlin, and to make the British evacuation of the peninsula of Gallipoli a necessity. Thus the Tsar of Bulgaria was instrumental in striking the hardest blow at the prestige of the British arms that has been inflicted in the memory of living man. He effected it, not by prowess in the field, but by an act of base and shameless treachery. . . . It will be the fault of Great Britain itself if the punishment for it is not conceived on a similar scale of magnitude.

In conclusion, it may be pointed out that the author frequently confounds Thrace and Macedonia—an almost unpardonable sin in a book devoted to a Near Eastern subject.

TANGIER TO TEHERAN.

Turkey has always been a happy hunting ground for the man who wanted to gather strange experiences, and in this respect the war has not changed it. A sub-lieutenant in the R.N.V.R. who took part in the Gallipoli fighting will certainly bear me out in this. He had the misfortune to be made prisoner, and, for some obscure reason, the Turks insisted on regarding him as a spy, or something super-objectionable of that kind. Accordingly he was placed in close confinement and subjected to somewhat rigorous treatment while inquiries were set afoot regarding him, and for two days he was very far from happy. Then, suddenly, the clouds lifted and a change came o'er the scene with a vengeance. He was taken out of his stuffy quarters and informed that his captors had ascertained that he really was what he had represented himself, and very handsome apologies were offered for the mistake. "We hope," said the Turks, "you won't rub it in too hard"—or words to that effect—"for it really was a genuine error on our part. Now we want to make up for what you have gone through; so we are going to give you a week's 'leave' in Constantinople, and you will be shown all the sights of the place, with an officer to look after you." The sub. thought at first, and not unnaturally, that his leg was being very severely pulled. But not a bit of it. The Turks were as good as their word, and he was given a quite "high old time" in the capital, taking joy rides in a motor, and all sorts of dissipations of that kind. And then came the climax. "Look here," said his captors, "we are still not quite happy about having treated you so scurvily at first; so we think we had better set you free, and if you will give us your word not to fight against us again in this war, you may go." Needless to say, the lucky man did not take long to make up his mind. He gave his word as desired, and he was sent off down the coast—to Smyrna, I think it was—and there set at liberty. What a contrast to the conduct of the Huns! And this, mark you, is a true story.

***

Which reminds me. A few days ago I was talking with an officer who had been all through the Gallipoli affair, and had had exceptionally good opportunities of judging the qualities of the Turk as a fighter. I asked what opinion he had formed of the enemy there; had they fought cleanly and well, or were the stories to that effect mere clap-trap. "They fought splendidly," he assured me, "and, as far as I could ascertain, wonderfully cleanly. The best proof of that is that the Australians, who landed with the idea that the Turks were everything that was vile and rotten, left the peninsula their best friends, so to say."

***

A few days ago I was shown a letter written recently by an English lady in Salonika, and was struck by one passage, which I have permission to quote: "I shall be very glad when the Greek soldiers are withdrawn from Macedonia, as they are continually playing us up and working against us." By itself this little bit of evidence might be regarded as merely the expression of a prejudice. Unfortunately, it does not stand alone—far from it! One hears the same story from nearly all our officers and men who return from Salonika. Of course, it does not mean that all Greeks are anti-Entente, or pro-German; for, as I have pointed out before, the Greeks are a shrewd people, and know quite well that the triumph of the Central Powers, involving the triumph of their old enemies, the Bulgarians, would be no good thing for them. And if they do not understand that it would mean the permanent loss to them of Salonika and good-bye to all dreams of Hellenic expansion, I should be very surprised. But it does show how bold are the pro-German elements—which are strong in the Army—under the protection of MM. Gounaris and Co., and how very offensive they succeeded in making themselves to the Allies. Now, let us hope, all that has been changed. But I trust that M. Gounaris and his friends are "marked men" so far as we and our Allies are concerned, and that we shall not be in a hurry to forget their late activities.

***

The fact is, of course, that the Greek's love of money makes him rather good ground for any *agent provocateur* to work upon; and I fancy that it is this trait in his character that accounts for all his—eccentricities, shall we call them? At the same time, he is not so ready to sacrifice his comfort for the sake of filthy lucre as are certain other people one might mention. Nor is he, as a rule, as ready to work hard for the sake of gain as, say, the Armenian. These points are illustrated in the same letter, from which I have quoted above. The writer says that the hotels are not only "very expensive"—a not uncommon feature in hotels, by the way!—but also "very dirty" and "abominably run," and she adds that the Greeks and Jews appear to be firmly convinced that the Allies are in Salonika "just to be exploited." "For instance," she writes, "the proprietor's wife and wife's family of six people have taken the best part of the —— Hotel for themselves, whilst I and our people are given small top rooms. The wife was heard to say: 'The English pay just the same for a bad room as for a good one, so why should not I have the best?'" Which strikes me as being very typical: shrewd-seeming on the surface, but short-sighted in reality.

***

One other point in the same letter is worth mention. And this time it is a pleasant subject. The lady writes that she observed a great improvement in the regulation of traffic at a certain spot in Salonika since her previous visit to the town. And she goes on to inform her correspondent that, looking round for the cause of the improvement, she discovered it in the form of an ex-City policeman, now clad in khaki, whom she had often seen on duty at "the Bank" in pre-war days. So it is not only "somewhere in France" that our wonderful London police have been giving object-lessons in such matters to the natives.

***

I am indebted to a correspondent, whose name is very well known indeed in Cyprus and in Egypt, for the following information on a subject that is beginning to be debated with some anxiety in Berlin. You may have heard it—or read it—before. I had not. At any rate, it is, I think, worth placing on record:—

> Absolute knowledge have I none:
> But my aunt's charwoman's sister's son
> Heard a policeman, on his beat,
> Say to a housemaid in Downing Street
> That he has a son, who has a friend
> Who *knows* when the war is going to end.

This being so, it is high time for the Turk and (his) Brother Bulgar to take stock of their position seriously. Perhaps, if the policeman in the poem is the same as the one on point duty in Salonika, Enver and Radoslavoff might find it worth while to go to Salonika, suitably disguised, and interview him.

***

I am indebted to a correspondent in Bucharest for the following story, which seems to me to be eloquent of the lot of the Roumanians under Austro-Hungarian rule:—

A Roumanian peasant from Bukovina was recently in a northern town of Moldavia on business connected with his family, and he was about to set out upon his return journey when I had the opportunity of exchanging a few words with him. A few questions were asked relative to the state of affairs in the Bukovina, but he proved pretty reticent, merely imparting the fact that his brother, who was fifty-four, had been enrolled. So I tried another line, and suggested guilelessly that, on the whole, he and his friends must be fairly satisfied with life where they were, things being normally well ordered in the Bukovina, the Austrians possessing good administrative methods, etc. His answer was characteristic. "'Have you never observed," he asked, "the troubled and anxious appearance of a group of geese that have become separated from the main flock? Their joyous cries and precipitate swoop when once more they catch sight of their fellows? Ask me no more; I am an Austrian subject, and return to-morrow."

CORSAIR.

The *World* reports that a British officer who was severely wounded at Ctesiphon says of the Turks after that engagement: "A barge-load of our wounded (300) stuck in the mud, and, with some medical personnel on board, had to be abandoned. The Turks towed the barge down stream, and, under cover of the white flag, sent the whole lot, including the medical personnel, back to the British camp, unharmed in any way. I know of two British officers left out on the night of the battle who were found by the Turks. The Turks took away all their equipment, but both men say that they were not harmed in any way, and, in the case of one man, they gave him water to drink, loosened his coat, and made him more comfortable. They left both for our people to collect next morning."

THE NEW ARMENIA

A LITERARY AND POLITICAL PERIODICAL.

THE NEW ARMENIA, published semi-monthly, is the only English Periodical in America for those who are interested in Armenian life and letters; and for all devotees of justice who believe, with the late Gladstone, that "To serve Armenia is to serve civilisation."

Agents in London: "The Near East" Office.

Yearly Subscription, $2.00 in advance. Foreign countries, $2.50.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. July	1916. July.		1334. Ramadan	5676. Tamuz
21	8	Friday	20	20
22	9	Saturday.....	21	21
23	10	Sunday	22	22
24	11	Monday	23	23
25	12	Tuesday	24	24
26	13	Wednesday	25	25
27	14	Thursday	26	26

Tuesday is the birthday of H.M. the Queen of the Belgians.

Tuesday is also the birthday of H.R.H. the Duchess of Connaught, who was born in 1860.

Queen Alexandra presided at the first meeting of the council of the "Lord Kitchener National Memorial Fund," which was held at Marlborough House last Friday. There were present the Duke of Norfolk, the Duke of Devonshire, the Duke of Portland, the Earl of Rosebery, the Earl of Cromer, Field-Marshal Lord Grenfell, Lord Desborough, Admiral Lord Beresford, the Hon. Arthur Stanley, Admiral of the Fleet the Hon. Sir Hedworth Meux, General Sir Dighton Probyn, Sir George Arthur, Sir Frederick Treves, Sir William Garstin, Sir Robert Hudson, Sir Hedley Le Bas, Mr. Alfred de Rothschild, Mr. H. J. Creedy, Mr. Pandeli Ralli, and Mr. Arthur Renshaw.

A memorial service for the Right Hon. Sir Edwin Henry Egerton, G.C.M.G., formerly British Ambassador at Athens, was held at noon last Friday in the Chapel of St. Michael and St. George, St. Paul's Cathedral. The King was represented by Viscount Valentia, and Queen Alexandra by Earl Howe, who was the bearer of a large cross of pink and white Malmaisons and lilies from her Majesty. Sir Edward Grey was represented by Mr. Cecil Dormer, of the Foreign Office, and amongst others present were Lady Egerton, Mr. Katkoff, the Hon. Lady Egerton, Captain A. C. and the Hon. Mrs. Egerton, Mrs. Beauchamp Tower, Mrs. Louis Egerton, the Duchess of Buckingham and Miss M. Egerton and Miss K. Egerton, Countess Fortescue, Lord and Lady Carnock, Sir Walter Townley, Sir Vincent Corbett, Sir Maurice de Bunsen, Mr. D. G. Metaxas (formerly Greek Minister in London), and Miss Metaxas, Mrs. John Talbot, and Miss Mary Hogarth.

The Cairo correspondent of *The Times* states that Sir A. H. McMahon, the High Commissioner, cordially endorses the Sultan's suggestion that Egypt's memorial to Lord Kitchener should be of a practical character, directly beneficial to the people, whose social and economic welfare was Lord Kitchener's foremost consideration.

DIRECTORY and "ROLL OF HONOUR."

Owing to pressure on our space, we have recently been unable to publish our "Directory" of former British residents in Turkey and the "Roll of Honour" of British subjects from the Near East serving in His Majesty's Forces. In response to a number of requests from our readers, however, we hope to be able to publish both lists very shortly. In the meantime, we shall be obliged if readers included in either list will kindly forward us particulars of any changes in address or other necessary alterations. We shall be happy to supply free a copy of either list, according to our own latest information, on application for same.

The Roumanian Minister called at the Foreign Office on Monday afternoon, and had a prolonged interview with Sir Edward Grey.

The Crown Prince of Serbia, in recognition of the bravery of the British and French soldiers who have fallen upon the battlefields of Serbia during the war, has decided to award to the widows and relatives the Serbian Military Cross.

Mr. Arthur Bradley Kettlewell, I.C.S. Additional Secretary, Punjab Government, who is now on two years' furlough, leaves England to-morrow for Athens, where, we understand, he will be temporarily attached to the British Embassy.

M. Guillemin, French Minister at Athens, has been visiting the Allied lines at Salonika.

M. Voislav Marinkovitch, the Serbian Minister of Commerce, has left London for Paris on a special mission. Later he will go to Corfu.

M. Andre Radovitch, the Minister for Foreign Affairs for Montenegro, has left London for Paris.

M. Alexis Catargi, the Secretary to the Roumanian Legation in Paris, with Madame Catargi, née Princess Ghika, has arrived in London from France.

Prince Antoine Bibesco, Secretary to the Roumanian Legation, has left London for Bucharest on short leave of absence.

M. Athos Romanos, Hellenic Minister in Paris, who has been for some time in Athens, is expected shortly to visit London.

M. St. Aulaire, the newly appointed French Minister to Bucharest, left London last week for Roumania, to take up his duties.

M. Pavlé Karovitch, Secretary to the Serbian Legation, has returned to London from Paris, where he has been on leave.

A marriage has been arranged, and will shortly take place, between Captain Hugh Massie Blomfield, of the 1/5th Batt. The Buffs, attached Political Service, Mesopotamia, only surviving son of Admiral Sir R. Massie and Lady Blomfield, of 35, Holland Park Avenue, W., and Ida Marie, only daughter of Mr. and Mrs. Sydney Chancellor, of "Overstrand," Bognor.

Mr. J. MacDowall Russell, formerly of Smyrna, who returned to his post of British Postmaster at Shanghai about the beginning of last month, has since undergone an operation for appendicitis.

Dr. James van Millingen, nephew of the late Professor A. van Millingen, has been given a commission in the Royal Army Medical Corps.

Mr. A. van Millingen has arrived in London from Alexandria, and is staying at Byfleet for the summer.

Mr. Bertram Christian, who has been chairman of the Serbian Relief Fund since its inauguration in September, 1914, has relinquished that position in consequence of undertaking official work connected with the war, and Lord Henry Cavendish Bentinck, M.P., has accepted the chairmanship.

Writing from Austria, where he is a prisoner of war, Captain Stanley Wilson, M.P., states there is a possibility of his being exchanged. Captain Wilson and Colonel Napier, formerly British Military Attaché at Sofia, it will be remembered, were taken off a Greek steamer by an Austrian submarine last December.

One of the exchanged British prisoners who arrived in London from Germany last Saturday was Captain Heaton-Armstrong, who performed distinguished service during the defence of Durazzo.

Mr. E. Bonham Carter, C.M.G., Legal Secretary to the Sudan Government, who was passing through Alexandria on his way home on leave, was on July 2 received in private audience by the Sultan of Egypt, who handed to him the 2nd Class of the Order of the Nile conferred on him a few months ago.

Our Cyprus Correspondent writes (July 2):—

Mr. Stanley Fisher, Puisne Judge at Nicosia, with Mrs. Fisher, is proceeding to Troödos.

Mr. Stelios D. Pavlides, who was recently called to the Bar, in London, has returned to Cyprus. He is a member of one of the leading families in Paphos.

Queen Alexandra and the Princess Royal visited the Fine Art Society's Galleries, 148, New Bond Street, on Monday afternoon, and viewed the Serbian cartoons by Mr. Radovani.

Mr. Alexander Séfi is to deliver a lecture on "Sufism" at the house of Comte de Zogheb in Bruton Street, W., to-morrow afternoon.

The Rev. Ronald Irwin, chaplain, Indian Ecclesiastical Establishment, who has returned from Mesopotamia, where he was wounded, has recently undergone a successful operation at 17, Park Lane. He hopes shortly to be able to communicate with the relatives of the officers and men of his division who fell in Mesopotamia, and to whom he wrote at the time.

Apropos of the Sudan Mission to Lake Tsana, an account of which we published last week, a correspondent writes:—

Major Hugh Drummond Pearson, R.E., who has been responsible for the whole of the excellent survey work carried on by the Sudan Government since 1905, in 1913 received the Murchison Award from the Royal Geographical Society, an honour which was thoroughly well deserved. As Director of Surveys, Major Pearson has introduced many valuable reforms into his Department, not the least of which has been the standard of work destined to provide incentives to study surveying, and covering a system of examinations which surveyors have to pass before enjoying promotion to higher grades.

Under the auspices of the Victoria Park Patriotic Committee demonstrations on behalf of Serbia were held in Victoria Park on Sunday. There were good gatherings both morning and afternoon.

APPOINTMENTS, PROMOTIONS, ETC.

It is announced that President Wilson has nominated Mr. Abram Elkus as U.S. Ambassador to Turkey in succession to Mr. Morgenthau, who has retired. This appointment was anticipated in these columns some weeks ago.

Sir Edward Grey is taking a short holiday, and Lord Crewe is acting for him at the Foreign Office.

Major R. P. Lewis Bey, of the Intelligence Department, Sudan Government, has been transferred to the Cairo office of the Department, and it is anticipated that he will be appointed Assistant Director of Intelligence in Cairo.

Our Cyprus Correspondent reports (July 2):—

The Greek Judge in Nicosia, M. Markides, is on the sick list, and his duties are being performed by M. S. Stavrinakes.

Naim Moussa Effendi, son of Sami Effendi, Turkish Judge in Nicosia, has been appointed Village Judge of Letka.

Our Athens Correspondent writes (July 5):—M. Siciliano, who has been up to now First Secretary at the Hellenic Legation in Paris, has been transferred to the Ministry of Foreign Affairs as Director of the Press Bureau. M. Siciliano, who is one of the most distinguished and promising members of the Service, possesses special qualifications for carrying out his duties successfully, having directed the same Bureau on a previous occasion.

The following promotions and appointments are announced in the *Sudan Times*:—

Bimbashi (temporary Kaimakam) F. W. L. Edwards, Deputy Assistant Adjutant-General and Aide-de-Camp to H. E. the Sirdar, and Bimbashi W. Middleton, Khartoum District, have been promoted to the rank of Kaimakam.

Kaimakam N. B. de L. Forth Bey, second in command, Arab Battalion, has been appointed as Officer Commanding, Arab Battalion, and Kaimakam W. H. McCowan Bey has been appointed second in command.

OBITUARY.

SIR VICTOR HORSLEY.

We regret to learn that Sir Victor Horsley died on Sunday last, July 16, from heat stroke while serving as a consultant with the Forces in Mesopotamia. Sir Victor volunteered for service in Mesopotamia last March, and, his patriotic offer being accepted, left at once for India, whence he went to the scene of operations. At first he was stationed at the base at Busreh, but within a short period he passed up to Amara, where, it is reported, his death took place.

"Sir Victor," says the *Times*, "did not consider his years when the chance of being useful offered itself, and the welfare of our soldiers was his first anxiety. Very early in the war he was in France on behalf of the British Red Cross Society, and later, on being gazetted colonel, he was sent to Egypt as a consultant by Sir Alfred Keogh. He had served also in the Boer War. . . . Born in Kensington in 1857, he was 59 years of age at the time of his death. He was the son of the late J. C. Horsley, R.A., and married, in 1887, Eldred, third daughter of Sir Frederick Bramwell, who, with two sons and a daughter, survives him." He was knighted in 1902.

COLONEL C. C. MACNAMARA.

It was officially announced on Wednesday that Lieutenant-Colonel Carroll Charles Macnamara, Royal Irish Rifles, died from wounds received while commanding his regiment on July 1. The eldest son of Charles Nottidge Macnamara, F.R.C.S., of Chorley Wood, Herts, he was educated at Winchester and entered the Army in 1896. While serving with his regiment in South Africa, he was appointed A.D.C. to Lord Milner. Later he served in India and at Wei-hai-Wei; and in 1908 he was seconded for service with the Egyptian Army. He held the rank of Kaimakam, Commanding the Equatorial Battalion, which he commanded on active service, and received the Order of the Nile. He resigned his command in Egypt to serve in Gallipoli, where he was wounded. After serving as brigade-major at Bedford, he rejoined the Royal Irish Rifles at the front in May last. He was forty-one years of age.

Lieutenant-Colonel Edward H. Trotter, D.S.O., Grenadier Guards, commanding a Service Battalion of the King's (Liverpool) Regiment, is reported killed in action on July 8. Born in December, 1872, he was the third son of the late Major-General Sir Henry Trotter, G.C.V.O., of Merton Hall, Midlothian. He was gazetted second lieutenant in the Grenadier Guards from the Militia in June, 1893, and was promoted lieutenant in August, 1897, captain in January, 1900, and major in 1908. In September, 1914, he was appointed temporary lieutenant-colonel in command of a battalion of the Liverpool Regiment. Colonel Trotter was in the Nile Expedition of 1898, and fought in the Battle of Omdurman, for which he received the Egyptian medal, Queen's medal, and the Khedive's medal with clasps. During the South African War he served with the City of London Volunteers as captain on the Staff, taking part in the operations in the Orange Free State, and was mentioned in despatches.

Lieutenant-Colonel Alfred St. Hill Gibbons, Liverpool Regiment, news of whose death in action has been received, was best known as the explorer of the Upper Zambesi, who completed the work which Livingstone had begun over half a century before. In 1898, at the request of Cecil Rhodes, he visited Central Africa, and he and his assistants in that and the following year completed the survey of Barotseland and the Zambesi, tracing that river to its source. Major Gibbons, as he then was, continued his journey northward by the Great Lakes and the Nile, the reconquest of the Sudan during the course of his travels having opened the route by Khartoum. He was, it is believed, the second white man to cross the continent from the Cape to Cairo.

Mrs. Max Müller, widow of the Right Hon. Friedrich Max Müller, the Orientalist and philologist, died on Monday evening at her house in Oxford, aged 81.

The death is announced as having occurred at Monte Carlo, on the 13th inst., of Mr. B. L. Mosely, LL.B., formerly a judge of the Native Tribunals in Cairo. The late judge had lived in retirement for a number of years, but was an annual visitor to Egypt.

Colonel Richard Leigh, who has died at Torquay in his seventy-fourth year, took part in the Egyptian Expedition of 1882, and was present at the battle of Tel-el-Kebir, where his conduct earned him mention in despatches and the brevet rank of lieutenant-colonel. Subsequently he commanded the 2nd Highland Light Infantry, and the rank of full colonel was conferred on him in 1895.

Much sympathy will be felt for Mr. F. G. Davidson, of Suez, who has this month lost both his sons in the service of their King and country. The elder, Mr. R. H. W. Davidson, who died on July 1, was a lieutenant in the Devonshire Regiment, and before the war had been employed in Perak, Federated Malay States. His younger brother, Mr. G. L. Davidson, died of wounds received on the 10th inst. He was a lieutenant in the Dorset Regiment, and was for some time before the war at Manilla, in the Philippine Islands.

We regret to learn that Mr. and Mrs. Charles Vinicombe, of Constantinople, have lost their younger son, Second Lieutenant Lionel Frank Vinicombe, Royal West Kent Regiment, who was killed in action on June 29.

Midshipman Leonard John Bidwell, R.N., who was accidentally killed on July 17, was the son of Mrs. Bidwell, of 15, Upper Wimpole Street, W., and the late Leonard A. Bidwell, F.R.C.S., and the grandson of Sir J. Roper Parkington. Born in 1897, he joined the Royal Naval College, Osborne, in Easter term, 1910, and in H.M.S. Cumberland took part in the fighting in the Cameroon, where he was wounded in October, 1914. He was employed at the time of his death by the Admiralty on special service.

A cable was received in Alexandria on the 3rd inst. announcing that 2nd Lieutenant C. A. Wilkinson, of the Middlesex Regiment, had been wounded in France. Mr. Wilkinson, who was until some months ago sub-editor of the *Egyptian Gazette*, obtained his commission in Egypt and saw service in the western desert campaign.

The death took place at Cairo on June 27 of Negib Bey Azoury, proprietor of the *Times of Egypt*, and late manager for several years of the *Egyptian Morning News*.

DOMESTIC ANNOUNCEMENTS.

The Charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

ALI BAIG.—On Sunday, July 16, 1916, at 1, Berkeley Place, Wimbledon, S.W., the wife of M. Abbas Ali Baig, of a son.

SELBY-LOWNDES.—On the 16th inst., at Rosefield, Bexhill-on-Sea, the wife of the Rev. G. N. Selby-Lowndes, C.F. (Temp.), Egypt, of a daughter.

MARRIAGE.

DIXON—TOOMBS.—On July 15, at St. Andrew's, Wells Street, W., by the Rev. W. S. Dixon, M.A., uncle of the bridegroom, assisted by the Rev. E. Lewis, Precentor, Ernest Harry Dixon, R.N.V.R., Anti-Aircraft Corps, only son of Mr. and Mrs. Harry Dixon, of 70, Kensington Gardens Square, W., to Josephine, younger daughter of the late Mr. George Toombs, of Bucharest, Roumania, and Mrs. Toombs, of Highgate.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

NAJEM HOURY'S CYPRUS HOTELS CO., LTD.

MESOPOTAMIA IN PARLIAMENT.

The growing dissatisfaction with the conduct of the Mesopotamian campaign led to a formal statement on the subject by the Prime Minister last Tuesday. In reply to the demand for the publication of despatches Mr. Asquith announced that the collection of papers dealing with the subject had been prepared by the India Office, and that the Army Council, after carefully considering them, was strongly opposed to their immediate publication, on the ground that such publication would furnish the enemy with valuable information. The Government felt bound to accept the view of their military advisers, and was obliged to refuse papers either on the Mesopotamian campaign or on the Dardanelles enterprise. Mr. Asquith admitted, however, that there were two main points in connection with Mesopotamia which appeared to be legitimately subjects for comment and criticism. These were, in the first place, the object and wisdom of the campaign, and, secondly, the actual conduct of the campaign. He promised that Parliament should have an opportunity of discussing these points, and then proceeded, as far as he was able, to cut away the ground from under the feet of possible critics. In regard to the first point, he declared that "from first to last the political have never been allowed to override the military considerations. Every step has been taken by the Government on the consentient advice of all its military authorities." On the subject of the medical arrangements, Mr. Asquith made the following statements:—That Sir John Nixon, at the end of last November, after the action at Ctesiphon, in a report from Busreh, stated that in his opinion the medical arrangements had been quite satisfactory; that in December and January reports from various sources seemed to point to a very different state of things, and in consequence of these reports the Commission of Inquiry was appointed in February; that the Commissioners, after having concluded their investigations on the spot, when asked whether any immediate action was called for, declared that in the conditions which existed when they left Mesopotamia everything possible was being done; that in May, presumably a few weeks after the Commissioners' declaration, Surgeon-General O'Donnell, having been sent out from France, reported that "in some respects at that time there was a shortage of necessaries," and, Mr. Asquith added, "every indication which he gave of deficiency has been peremptorily required to be made good." Finally, on the question of transport, "the Government are quite convinced that, in consequence of these careful examinations on the spot, the difficulties of transport are being largely remedied, and will soon, as far as local circumstances are concerned, completely disappear."

We have no wish to challenge the reasonableness of the Government contention that papers which would be worth publication might convey to the enemy knowledge which would be useful to him. It is difficult, however, to follow Mr. Asquith through his statement of the official case without arriving at the conclusion that the Cabinet entirely misunderstands the public attitude. The publication of despatches is asked for not from malicious motives or from love of criticism, but for the very reasons for which despatches are written—that, the officer commanding having rendered an account of his stewardship, the authorities over him may decide whether he has done well or badly, and have the benefit of his experience. If this work were satisfactorily done by those into whose hands it has been entrusted, there would be no demand for official papers. It is because the Government neglects to conduct the war in every single detail with the energy, determination, and thoroughness which the national spirit expects that despatches are called for as a means of enabling the public to decide how far short of its requirements the conduct of the war in reality is. What good purpose the Government hopes to serve by posing as the champions of muddle and ineptitude in the face of a national resolve to have things done properly it is difficult to say. There has been mismanagement in Mesopotamia. It is in the interests of the Government, even more so, indeed, it might be thought than in the interests of the public, to stop the evil and to take steps to see that it does not occur again. But, instead of adopting this course, the Cabinet appears to take sides with the mismanagement in an endeavour to cover it up and palliate it. Of course, this is not what actually happens; the mismanagement is duly investigated, and steps are taken to remedy it, but the absence of driving power at the source of authority and the failure to identify Government and people in a common endeavour to bring the war to a successful conclusion lend colour to the belief that either the Cabinet is incapable of recognizing incompetence, even when it is brought to its notice, or that there is not a mistake that has been made in the course of the war for which it is not in some way responsible.

In regard to Mesopotamia we cannot help thinking that the Government would have been well advised, in admitting, as it did, the mismanagement, to have announced that disciplinary measures had been taken in the proper quarters. Mr. Asquith, in his statement to the House of Commons on Tuesday, allowed that there was sufficient *primâ-facie* evidence of mismanagement to justify a discussion on unofficial reports, but he would not, or could not, admit that the Government had dealt with it in the only way possible in war-time. Can it be wondered that the nation in its present temper has little patience with half-truths and attempts to beat about the bush? Its confidence in the Government's honesty of purpose may remain unshaken; but confidence in its competence to deal with military matters in any shape or form is being more and more undermined. Mr. Asquith's own words point to a lack of grip somewhere. Sir John Nixon sends a report "at the end of last November, after the action at Ctesiphon . . . from Busreh." A month later his report is shown to have been inaccurate—for "a very different state of things" existed. Yet if the Government had been in touch with the situation in Mesopotamia, it would have known that Sir John Nixon's report could have no reference to the medical arrangements of General Townshend's force, as the latter was then falling back from Ctesiphon, and had not reached Kut. Moreover, General Nixon must have explained that he had himself been at Ctesiphon, and withdrew down the river ahead of the wounded; consequently, his statements could only have dealt with conditions at Busreh, if he succeeded in reaching that town before the end of November, or with conditions on his own transport, if he was still hurrying down the Tigris. Again, the statement that "from first to last the political have never been allowed to override the military considerations" must surely be classed with Mr. Asquith's amazing declaration of April 20, 1915—that there was no truth in the statement that our efforts in France were being crippled, or, at any rate, hampered, by want of ammunition. When confronted with the known facts of the case and with his own previous statement that the British advance on Baghdad had for its object, *inter alia*, "generally to maintain the authority of our flag in the East," the British public can only come to the conclusion that the Prime Minister is as little able to appreciate the position in Mesopotamia as he was the munition requirements of our Army last year. If the war is to be brought to an end within a reasonable time it is evident that there must be a tightening up of authority somewhere. The Prime Minister knows more on the subject of guns and shells to-day than he did when he encouraged munition workers to believe that the Army had all it wanted. In due course he may become equally conversant with events in Mesopotamia, and the situation will then show a similar improvement. In the meantime ignorance and flabbiness of purpose at the top must inevitably beget slackness and incompetence in subordinate spheres.

SUPERSTITIONS IN SYRIA.

BY G. M. FARRELL.

One cannot be long in Syria without noticing the hold that superstition has upon the people. All sects and creeds, all classes, high and low, rich and poor, seem to be under the spell of "magic" in some form or other. This, of course, is largely due to ignorance; but not entirely so, as some educated people are very superstitious. Custom, no doubt, has much to do with it, for the people are very conservative, and do not readily give up the habits of years. As their fathers did so do they.

Sorcery.

One of the commonest forms of superstition in Syria to-day is the belief in sorcery. Men, women and children all practise it to a greater or less degree, and the credulity of the popular mind is marvellous. I came across a man, a shoemaker by trade, a Greek Orthodox by religion, whose fame as a sorcerer has spread far and wide, people of all sects and creeds consulting him on every conceivable subject. He lives in one of the villages of the Lebanon, plying his trade in both branches—shoes and sorcery. Is anything stolen? The people hurry off to him to find the thief. Has anyone failed to get letters from absent relatives abroad? Off they go to their "master," who will tell them the exact state of the son, brother, or husband who is away. Is anyone tormented by the "evil eye"? Is anyone sick? Every conceivable thing is discussed, and relief obtained—so the people declare!—through his agency.

This man drives a very brisk trade in charms, which he makes by stitching small pieces of leather together to form a case for some sacred writing, usually from the Gospel. These he calls "Kitabs," because they are written, "Kátábá" being the Arabic for writing, and "Kitab" being "book." I never had the curiosity to examine one of these "Kitabs"—my time was taken up in trying to get the sorcerer to give up the practice—so I only saw the outside of the little talismans, which were worn round the necks of the poor, ignorant people who bought them. Half a *beshlik* (about 3d.) was usually the price paid for one.

Many of the peasantry resort to sorcery as a means of livelihood. I know a pretty Druze girl—she is married now and has entirely given up the practice—who used this art. The common name for it is "Bossur," which means "seeing," or "the seeing one." Doubtless the name arises from the use of a bottle containing water, the sorcerer or sorceress claiming to see a figure—generally a negro—in the water. I remember once in a little gathering of Druze women and girls asking one of the latter, a "sorceress," to show me how the magic was done. She produced a glass of water, gazed at it for a few moments, and then said to her mother: "How is it, Mother? I can't do anything to-night." I had broken the spell!

It was somewhat amusing to be taken for a sorceress. I used to take a magic lantern about with me; and at first the people really thought it was magic. So much so that it created quite a controversy in one village, and I had to give up the obnoxious word "magic" and call my lantern "a lantern of pictures." Once in a Moslem village, away up under the Hermon range, quite a crowd of women and girls collected round me, and were much disappointed to find that I was not a witch!

Charms.

There are many kinds of charms and many ways of charming off evil spirits. The commonest charms are blue beads. Any person, animal, or thing that is greatly valued is adorned with one or more blue beads. Precious little boys have a blue bead sewn on to their tarboosh in front. Horses, mules and donkeys have trappings of blue beads. The greater the number no doubt the stronger the protection! Bones, rags, anything to distract the "evil eye"—and a blue one is worse than all!—are hung on fruit trees and over newly-built houses.

Sacred names and symbols are used to charm away evil spirits. The phrase, "In the name of God" is most frequent amongst Moslems and Druzes; and the names of innumerable saints and angels are used by the various Christian sects; also "Name of the Cross." A very strange custom amongst the members of the Greek Orthodox Church, especially in the villages, is to call their children, both girls and boys, by the names of wild beasts, "Wolf," "Leopard," etc. On asking the reason I was told: "That they may live"!

There are numerous superstitions connected with the seasons and months of the year, feast days, fast days, and so forth. Thus amongst the Greeks of the Orthodox Church, the dough is supposed to rise without being leavened on the Feast of the Epiphany, and leaven made from this dough must on no account be lent to anyone; although in the ordinary way dough, or rather leaven for it, is frequently borrowed from one's neighbour. February is feared by the aged, as there is a common saying that old people die in that month, so the "old ones" of the land are always thankful when February is past. Here, however, there may be some natural explanation of the superstition.

It is most "unlucky" to call anywhere immediately after having visited a house of mourning. And—as in certain other lands, which consider themselves far more enlightened—the howling of a dog and the screeching of an owl are both regarded as "signs of a death."

Evil Spirits.

Evil spirits are still active in the land. They are of various kinds. The Jann, familiar to all readers of the "Arabian Nights," are the most common. All kinds of evil spirits are supposed to be most active at night, and for that reason people are afraid to be out after dark, and no one will sleep in a room without a light burning all night. When muleteers are obliged to travel by night they tie bells on their animals, the noise being supposed to frighten away the evil spirits.

An eclipse is a specially unlucky event; and during a lunar eclipse one night in Lebanon, when I was aroused from my peaceful slumbers by shouts and banging of tin cans to drive away the devil, I was not disposed to dispute this particular belief! Comets also are the precursors of terrible things and woes innumerable.

It is very unlucky to mention Satan. If you do so, someone invariably says hastily: "Satan is a stranger." But though it is unlucky to mention the Devil, as a person, those who are "clever" or "strong" are often likened to Satan!

The "Afreet" is a mischief-loving demon, and mothers, in joke, often call their babies "afreet" or "afreetè," the latter form being the feminine, to show how intelligent they are.

The Christians use the sign of the cross for luck, chalking it on the doors of their houses or on any part of their property. They also constantly ejaculate "Ism al Saleeb" when anything astonishes them, or if they are in any danger. The Maronites, however, more generally exclaim: "Oh, our Lady Mary!" Names of the saints are also used by all the Christian sects, and pictures of saints, cheap gaudy-coloured prints, are pinned up in their houses. The Moslems and Druzes write sentences from the Koran, which are used as charms, enclosed in tin cases by the poor, and in gold and silver by the rich, and worn. Writing incantations is much practised among the Druzes, and is a constant source of terror to the weak-minded. Some poor peasants have, indeed, been driven out of their minds by this practice.

Sentences from the Koran are printed, framed, and hung up in their houses. And both books—the Bible and the Koran—are placed on the heads of those who are sick. The Koran is carefully put away, and only brought out on special occasions to be used as a charm by the ignorant peasantry. It matters little if the words are not understood; the great thing is to repeat them over and over again.

Survival of Tree Worship.

Old trees abound in the country, and a certain superstitious reverence still seems to attach to some of them. The oak was apparently a very sacred tree in the past, for there are traces of old altars under it in various parts of the country, and the tombs of "holy men" are also frequently placed under its shadow. Near Baruk there is a venerable oak known as "Sitt" (or Lady) Sarah, and people flock to it from villages miles around, to tie bits of rag to its branches. Whether this is evidence of a survival of tree-worship I cannot pretend to say, but it is clear that those who tie the rags to the tree do so in the hope of "bringing luck," just as is the case with regard to similar practices throughout other parts of Turkey and the Near East generally. The East has been called the "home of superstition," and Syria is perhaps no more superstitious than other countries in the East—or even, if we could see into the hearts of men, of the West as well.

THE PRESS ON THE NEAR EAST

Mesopotamia and the Dardanelles.

In considering "The Demand for 'Papers'" in connection with the Dardanelles campaign and the Mesopotamian operations a military correspondent of the *Morning Post* (July 18) asks:—"Is this a time for raking up and squabbling over past events? Do members of Parliament, when they demand 'papers,' want to have incomplete and garbled accounts? Can they seriously suppose that the full facts are going to be disclosed with regard to any military undertakings actually in progress? If they do, we sorely need a Cromwell to send them about their business." As to the Dardanelles, he reminds us that:—

We are not fighting the Central Powers and the Ottoman Empire and Bulgaria all by ourselves. We have Allies, and our Allies were not wholly unconcerned in the attempt upon the Dardanelles. The primary object of the undertaking was to open to Entente shipping, for the benefit of Russia, the great waterway that joins the Black Sea to the Ægean. It is unreasonable, on the face of it, to imagine that Russia did not contemplate participating in some form or other in an enterprise to which British and French naval and military forces were committed for her special advantage. Nor does it seem to be beyond the bounds of possibility that the situation in the Near East had been considerably altered from the Russian point of view, between the early part of 1915 (when the Dardanelles affair took shape) and the middle of the year (when its success had become extremely doubtful), by changes which had taken place in the military position in Galicia and Poland in the meantime. Then, again, there is the fact that the French participated in the undertaking both on land and on the sea, and there is the further fact that the Dardanelles operations became mixed up with another set of operations altogether—the Salonika campaign. There are, moreover, some grounds for believing that British and French views as to the latter enterprise have not always been absolutely identical; the whole history of war, indeed, proves that the views of Allies seldom are completely in accord on all points, and it would be extraordinary if they always were. To lay incomplete papers on the Table of the House would be highly improper. To lay complete papers must necessitate reference to actions and agreements on the part of our Allies to some extent, and it would in all likelihood involve allusions to the Salonika operations which are still in progress

As to the Mesopotamian campaign, he observes that it differs from the Dardanelles undertaking "in that we are in the thick of it still, and this makes the production of official documents and correspondence even more objectionable than it would be in the other case."

There do, at the same time, seem to be some points in connection with the Tigris operations, as these now stand, on which the public have a right to learn something. Distressing accounts have reached this country concerning the sufferings of the wounded, and with regard to inadequate hospital arrangements at a stage of the undertaking which we may now hope has passed. We are entitled to know whether that sullied leaf has really been turned over, and to be assured that the injured and the sick now receive such prompt attention, and are now being taken to the rear in such reasonable comfort, as the soldiers of a mighty Empire have a right to expect. Disclosures on this subject, be they satisfactory or be they the reverse, will convey little information to the enemy of a nature to assist the hostile plans. But that is a totally different thing from official announcements to the effect that the Tigris Expeditionary Force is, or is not, provided with necessary equipment of all kinds.

It is the writer's opinion that "no complete or fair investigation can take place at the present time," owing to the difficulties surrounding such investigation; and that all attention should be concentrated until the business is over on the object of winning the war. Which seems to be sound advice.

Machiavellianism.

Sir W. M. Ramsay contributes to *Land and Water* (July 13) a deeply interesting article entitled "The Kaiser as a Diplomatist," in which he outlines what he considers the Kaiser's policy in the Balkans to have aimed at—and very nearly achieved. We quote the concluding portion of this article. The author has been pointing out how Bulgaria, acting on German instigation, as he holds, had prepared to deliver her treacherous blow at Greece, secretly concentrating her army "in large force in a great camp not very far from Salonika," and taking extraordinary measures to prevent the secret from leaking out. He continues:—

The blow was struck suddenly, without warning or declaration of war, at the weak point of the opposing line. And it failed disastrously. Here the Kaiser's diplomacy showed itself completely successful. A weak Bulgaria was what he needed: the strength of any one of the Balkan Powers was an impediment in the way of Austro-German strategy, which did not want any one of these Powers to be strong enough to make a bid for Salonika, or to be anything but a mere slave of the Austro-German Government. The way to the Ægean harbour must be kept completely under the influence, if not actually in the possession of Austria, just as the way to Constantinople must be kept absolutely under the influence of Germany.

The Kaiser, therefore, encouraged Greece privately, and warned it of the impending Bulgarian stroke. A strategic plan was indicated to the King, and all preparations were made by the Greeks to meet the sudden blow. Thus it came about that everything on the Greek side was ready at the critical moment; and the Bulgarians, in place of attacking an unprepared army, peacefully encamped, found an army in the highest pitch of carefully prepared strength, ready to meet the attack at that particular point. The Kaiser's diplomacy was here entirely successful. He relieved Greece, he posed as the friend of Greece in that country, just as of Bulgaria at Sofia and of Turkey at Constantinople.

As an illustration of the difficult feat of running with the hare and hunting with the hounds, this would be hard to beat. But the facts seem to fit in quite easily with what the world now recognizes as the policy of the Kaiser and of Germany. The writer goes on to say that the weakness of Greece, Bulgaria, and Turkey is "equally necessary for the success of German plans":—

Greece has ever since been pluming itself on the generalship which foresaw and prepared for the Bulgarian attack; but the Kaiser gets the gratitude and the services of those who knew and those who governed Greece. Bulgaria, having once put itself in slavery, remains the helpless slave of the Kaiser and the bound ally of Turkey. Turkey has suffered most of all; but the dominant party knows that it must obey Germany or be precipitated from power. When Austro-German forces attacked Serbia in 1915 Greece was ready at the proper moment to join, and thus a new Balkan alliance of Bulgaria, Turkey, and Greece would have come into operation. The inevitable result would have been to force Roumania into the same boat, for there was no one to help her.

From this result the world was saved by the foresight and energy of France, which, hard pressed at home, sent troops to Salonika and induced Britain, slowly at first, to join in. But the Kaiser's diplomacy was within an ace of achieving a triumphant success.

Serbia on the Rack.

Under the title "Serbia's Reign of Terror," the *Daily Graphic* published last Friday an article by Mr. G. Gordon Smith, who endeavours to answer the question, "What are the conditions in Serbia under the conquerors?" He writes:—

This question is not easy to answer, as the invaders leave no stone unturned to establish a Chinese wall between the conquered territory and the outer world. Very little news is allowed to filter through. But, in spite of martial law and repression in every shape and form, slowly, but surely, the story of the terrible plight of Serbia is beginning to be known. I have obtained it from sources that are above suspicion. It does not make pleasant reading.

It does not! Many of the details given would not be new to readers of THE NEAR EAST, who have been informed of the efforts made by the Bulgarians to "Bulgarize" the "conquered" territory. But since the terrible state of Serbia cannot be kept too much to the fore, we quote one paragraph:—

As a preliminary to the installing of Austrian rule in Northern Serbia, the Germans paved the way for their allies by instituting a reign of terror on the most approved Belgian lines. It is even forbidden, under pain of death, to criticise the acts of the Austrians. The Serbian prisoners of war are practically being treated like slaves by their German conquerors. The sanitary condition is terrible. At Zemuri an outbreak of Asiatic cholera took place among the imprisoned Serbians, and a further outbreak has occurred at Metkovich. But the chief ravage in Serbia is being caused by an epidemic of tuberculosis, a disease almost unknown in Serbia. This is the result of the privations endured by the starving population. There are cases in almost every house in Belgrade and other towns. The terrible plight of the unfortunate population excites no pity among their Austrian conquerors, who are carrying out a régime of "Austrianisation" with great severity.

It is interesting also to note that "the Austrians have officially announced that King Peter and all members of the Karageorgevitch dynasty are exiled for ever from Serbian territory. In order to emphasise this decision, the monument to Karageorge, the founder of the dynasty, erected in the Kalimegdan Park in Belgrade, has been destroyed." We need only observe that "for ever" is a rather strong expression, especially for use in an "official announcement."

Wounded at Ctesiphon.

"At Ctesiphon" is the title of an article in the current *Blackwood* which gives a very vivid picture of certain phases of the battle, in which the writer took part, and of the incredible hardships which our wounded had to suffer before reaching hospital—if they were fortu-

Digitized by Google

nate enough to do so at all. Here are two paragraphs describing the trying period of waiting for the battle to begin:—

The bank of the water-channel, while providing excellent cover from view, would not have protected us properly from shell fire, so we started to dig ourselves in. By daybreak we were safely entrenched and could hear a good deal of gun and rifle fire going on to the south of us. We were compelled, however, to content ourselves with hearing, since to have looked over the edge of our bank would probably have given away our position to the Turks.

We sat in the trenches and had "breakfast." This consisted of two or three biscuits and a tiny tin of potted-meat from our haversacks; the whole was washed down with a little water out of our bottles, though it went against the grain to tap what might be our entire supply for the next two days. After "breakfast" we continued to wait in our trenches. It was a trying time, listening to a battle which we could not see, but in which we expected momentarily to take part. The monotony was broken by such little interludes as the discomfiture of Corporal K., who was next to me, and down whose neck a shower of mould was suddenly shot. The cause was not enemy's shrapnel, but the eagerness of a Sepoy orderly to keep off the skyline while leaping across the top of the trench. No one was sorry to get a good laugh.

Another incident of a humorous character is thus described:—

When we withdrew, I noticed the man next to me, a bomber who had been carrying his rifle all day with a grenade fixed in it, waiting for a good target at close quarters. As I looked at him there was a click, and a bullet took the stock clean off his rifle. We could not help being amused at the misadventure; he was so very surprised, and rather annoyed at having to go through the business of fixing his precious grenade on to another rifle.

The writer's description of what he and other wounded had to go through, owing apparently to lack of adequate arrangements, is extraordinarily vivid. We can quote only two short passages, but advise our readers to study the article in the original:—

All the wounded were hastily put in a deep communication trench, and I found myself sitting cross-kneed and wedged in with a lot of others, most of whom were unable even to change their positions. Indeed, I was barely able to move my left arm. The shells continued to come over, and when one landed on the parapet just in front of me, I began to wonder what would happen if they dropped one into the trench, packed as it was with wounded and helpless men.

There came a lull in the firing on our front, and the Medical Officer came round and told us that all who could possibly get away were to do so. I decided to take my chance rather than risk being captured. It was not an easy matter to get out of the trench, and after I had been helped on to the parapet could scarcely stand up, so cramped was I after sitting for fifteen hours in one position. Luckily I saw a Jaipur cart coming out of the perimeter, and managed to get on to it with about three badly wounded sepoys more or less on the top of me. Hardly had we got on than the Turks opened a fresh fusillade all round us, and the bullets began to fly unpleasantly close. Our best chance was to bolt, and I got the driver to whip his ponies into a gallop. . . . . We were thrown against each other mercilessly, and could not have borne a much quicker speed. Luck, however, was with us; the rifle fire died down, and by daybreak we were out of immediate danger.

Articles to Note.

"The Roumanian Factor," by J. A. R. Marriott, in the *Edinburgh Review* (July).

"East and West," by the Earl of Cromer, O.M., in the *Quarterly Review* (July).

"The Delay in the Balkans," by West F. de Wend-Fenton, and "Celebrities at Home—The Hon. Aubrey Nigel Herbert, M.P., F.R.G.S., in the *World* (July 18).

"Serbian Saints and Sinners" (report of an address given at St. Margaret's, Westminster, on July 2, by Fr. Nicolai Velimirovitch, D.D.), in the *Church Times* (July 14).

"Responsibilities in Mesopotamia" (July 14) and "More About Mesopotamia" (July 15), in *The Times*.

"France et Roumanie," by Léo Claretie; and "La 'Nation Serbe en France,'" in *Correspondance d'Orient* (July 10).

An official return of aliens registered at the Home Office as naturalised in this country in 1915 shows that there were thus registered 1 Bulgarian, 9 Greek, 31 Roumanian, and 12 Ottoman subjects.

A Turkish official *communiqué* states that the operations against the Russians on the Persian front are developing in their favour with the assistance of the Persian Mudjahids. The latter are well organized by Riza Mel Sultaneh.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Operations in Mesopotamia. July 13.

Viscount MIDLETON asked whether, if the Government were not in a position at the present time to publish complete papers with regard to the operations in Mesopotamia, it would be possible to furnish information with regard to the failure of transport, hospital service, and medical and other supplies, or to appoint a Committee of Inquiry which would be able to satisfy Parliament and the country on matters about which there was serious misgiving.

The Duke of SOMERSET said he had an opportunity that morning of reading three or four very long letters from officers who had been serving in Mesopotamia. He could assure their Lordships that the cruelties our men must have suffered through the utter incompetence of the authorities, both in India and at home, were simply too disgraceful. He would give one or two instances. In one case a thousand wounded were sent down in a ship, with one medical officer and one orderly to look after the whole of them. They were all mixed up together—men with dysentery and men with shattered limbs all in the same ship, and there was not a bit of morphia or a drop of chloroform. One officer who was sent down wounded never had his wound dressed from the time he was picked up until he got to Bombay. He could give other instances, but he had been asked not to speak further on the subject, because there was to be a debate. He could assure their Lordships, however, that it was the most disgraceful thing he had ever read.

The Marquess of CREWE said that since Lord Midleton last raised this question he had been in consultation with more than one of his colleagues on the subject. It was evident that the feelings of people both in that House and out of it were deeply stirred by what they had heard. He understood that the Prime Minister would make a statement regarding papers on Tuesday in the House of Commons and he (the speaker) would ask their Lordships to allow him to make one on the same day.

Mesopotamia and the Dardanelles. July 18.

The Marquess of CREWE, in reply to the Marquess of Salisbury, made a statement similar to that made by Mr. Asquith in the House of Commons, to the effect that it was impossible at present to present papers with regard either to the Dardanelles Expedition or the Mesopotamia Campaign. He added that Lord Wemyss had put down a motion for Thursday dealing with the subject, and their Lordships would probably prefer to postpone until then anything like a general discussion. It certainly was not the desire of the Government to evade or avoid an inquiry.

Viscount MIDLETON said that, although noble Lords had pressed for the publication of papers, he did not think they had failed on any occasion to respond to an appeal from the Government for non-publication of papers the issue of which might impair the use of our troops or their position in regard to the war. He felt sure noble Lords, on that side of the House, at all events, would be willing to acquiesce in the very disappointing decision which had been conveyed to them.

HOUSE OF COMMONS.

For Prisoners in Bulgaria. July 13.

Mr. FORSTER, replying to Mr. R. Gwynne, said, that although it was essentially the duty of the Bulgarian Government to clothe its prisoners of war properly, the War Office, far from refusing to recognise the needs of British prisoners in Bulgaria, had been trying for some time past to discover a sure means of despatch for articles of clothing required. Arrangements were made a short time ago which would, it was hoped, prove satisfactory.

Greece and the Allies. July 17.

Sir E. CORNWALL asked whether the Foreign Under-Secretary would state the terms of the last Allied Note to the Greek Government; and whether he could give any information as to the nature of the Greek reply and the extent to which the demobilisation of the Greek army had been carried out.

Lord ROBERT CECIL said that the Government could not lay an Allied Note before Parliament except after consultation and in agreement with their Allies. It was undesirable to make public statements in detail about the demobilisation of armies. It would perhaps be sufficient to say that the relations with the present Greek Government were satisfactory.

Medical Arrangements in Mesopotamia.

Sir H. CRAIK asked whether steps would be taken to procure the prompt production of the report upon the medical arrangements for the Mesopotamian Expedition.

Mr. CHAMBERLAIN: I have asked the Viceroy to expedite the consideration of the report by the authorities in India, and to transmit it to me with their observations as early as possible.

Sir H. CRAIK: Could not a summary of the report and the chief recommendations be submitted by telegram?

Mr. CHAMBERLAIN: I think the House will see it is right that, before the report is published, the Government of India should have an opportunity of examining it, and that the Government at home should have the same opportunity. I gather that my hon. friend's anxiety is lest something should now be left undone which can be done to ameliorate the conditions. I am informed by the Viceroy that he specifically put that question to Sir W. Vincent and General Bingley, and that they both replied that

Digitized by Google

there was nothing now to be done in anticipation of the full consideration of their report.

The Dardanelles— July 18.

Mr. ASQUITH said that, with the leave of the House, he had during the last few days postponed answering several questions regarding the presentation of papers on the subject of the Dardanelles and Mesopotamia. He now proposed to answer them. With regard to the Dardanelles, the Colonial Secretary, on the motion for the adjournment at Easter, undertook to present papers, subject to two limitations: first, that there might be documents of so confidential a character that they ought not to be published; and, next, that it might be necessary to withhold some papers which might give information useful to the enemy with regard to operations still in progress. That statement was made after consultation with the speaker, and with his full authority. Until the papers were actually gone through, it was impossible to judge how far the observance of those limitations would detract from the comprehensiveness of the information that could be published. Each of the three Departments concerned—the Admiralty, War Office, and Foreign Office—was asked in the first instance to make a compilation of its own papers. The result of the examination by these Departments had been that the naval, military, and diplomatic advisers of the Government had informed the War Committee that they were unanimously of opinion that the publication at the present time of the papers could not be made, consistently with the reservations laid down by Mr. Bonar Law, without omissions so numerous and so important that the papers actually presented would be incomplete and misleading. The Government, therefore, felt that the presentation of the papers must be postponed.

—And Mesopotamia.

In regard to Mesopotamia (Mr. Asquith continued), the collection of papers had been prepared in the India Office and circulated to the Departments concerned for examination. After carefully examining them, the Army Council were strongly opposed to their immediate publication on the ground that such publication would furnish the enemy with information of value to him under existing conditions; and it was the opinion of the Imperial General Staff that the publication would prejudice the success of the operations now in progress in Mesopotamia. The Government felt bound to accept this advice. "But," the Prime Minister went on to say, "I do not wish to leave the matter there. The operations in Mesopotamia have excited, and are exciting a widespread interest and anxiety." There are two main points which appear to be legitimate subjects for comment and criticism. The first is the object and wisdom of the campaign itself, and particularly of the advance on Baghdad; and the second is the manner in which the campaign was conducted. In regard to the first point, I will only for the moment say this, that from first to last the political have never been allowed to override the military considerations; every step has been taken by the Government on the consentient advice of all its military authorities. In regard to the second point, there undoubtedly have been and are incidents which arouse anxiety and doubt as to whether the best means have been adopted to secure the ends in view. In particular the points which exercise public attention have been the medical provision for the sick and wounded, and, to some extent, perhaps, the provision of food for the troops, and, still more important, the question of transport. All these points, I agree, invite and deserve debate. I should like to say, without entering into any controversial matter in a statement like this, that in regard to the medical provision for sickness and for wounded soldiers, Sir John Nixon, the General who was then in command, at the end of last November, after the action at Ctesiphon, in a report made to the Secretary for India from Busreh, stated that in his opinion the medical arrangements had been quite satisfactory. In the months of December and January my right hon. friend and other members of the Government received from various sources statements of an unofficial character which seemed to point to a very different state of things, and accordingly, I think early in February, the Government of India appointed a Commission of inquiry consisting of highly competent persons, who were despatched to Mesopotamia and directed to investigate the whole of these matters fully, with the object, if possible, of attaching responsibility to those who were answerable for the failure to make due provision in these respects. That Commission went to Mesopotamia early in March and spent something like two months in a thorough and exhaustive examination on the spot, both at the base and at the front, of the condition of things, and their report has now been received by the Government of India. The Government of India, before transmitting it home, have asked that General Sir Beauchamp Duff, the Commander-in-Chief in India, should be allowed to submit his observations upon it. But in reply to a question put to them by the Viceroy the Commissioners declared that in the conditions which existed when they left Mesopotamia everything possible was being done. Not satisfied with that, we also despatched one of the most eminent of our medical officers in France, who went out early in May. He made a report which showed that in some respects at that time there was a shortage of necessaries, and every indication which he gave of deficiency has been peremptorily required to be made good.

I pass from that to the question of transport, which is the most important of all. There, again, we have had two inquiries made—first by Sir G. Buchanan, an expert in river navigation, who was despatched early in the year by the Government of India, and who has twice exhaustively reviewed the geographical conditions from the point of view of river transport; and the other by General Gilmour, a distinguished Staff officer, who was sent by the War Office here in March, and who examined not only the river but the whole question of accelerating the transport. The Government are quite convinced that, in consequence of these careful examinations on the spot, the difficulties of transport are being largely remedied and will soon, as far as local circumstances are concerned, completely disappear. It is only fair to remember that when the Expedition was first sent it consisted of two divisions. I do not believe there has been any military expedition more skilfully and ably conducted in its early stages; but in consequence of the reverses which subsequently occurred, and in particular the beleaguerment of General Townshend at Kut, the expedition was increased to seven divisions; and the urgency of relieving General Townshend was such that it was thought right to push the troops on ahead, apart from their transport, in the hope that his relief might be effected. I believe it will be found on examination that the substantial part of the difficulties connected with transport are due to the promptitude and rapidity of action with enormous increase in the numbers of men which were thought necessary for the immediate purpose.

I do not want in a statement of this kind to enter upon any controversial matter, but I think it right to say so much in order that the House may realise that for months past this matter has engaged the most careful and daily attention both of the Government of India and the Government here at home. But I agree that it is desirable that an early opportunity should be afforded to the House of reviewing the whole matter, and bringing out in detail, as many hon. members are well qualified to do, the special information they have received or are in possession of, bearing on allegations with regard to the conduct of the campaign. I would therefore suggest to the House that we might devote Thursday to a discussion of the matter. I hope that that suggestion may meet the general acceptance of the House.

Sir E. CARSON.—As I understand the statement of the right hon. gentleman, we are to have a review of the whole matter without any papers. May I suggest that we might at all events have the reports from which he has quoted, or to which he has referred? May I also ask why a definite promise is made in this House of the production of papers on matters which are causing the gravest anxiety in the country without taking beforehand the views of the military authorities as to whether or not the papers can be given? Again, will it be open to us as far as we have information on the discussion of this terrible business in Mesopotamia to raise the question of what was the provision for armament for the troops, and whether they were asked to fight these battles with obsolete guns, and questions of that kind? When the right hon. gentleman talks of the reports that he has now received regarding stores and transports, may I ask him whether he could not lay upon the table of the House the information that the Government had beforehand, of what would be necessary for stores and transports, because it occurs generally to the public that it is not after disaster, but before the operations begin, that these reports upon the necessities of stores and transports ought to be made?

Mr. J. REDMOND: May I ask the Prime Minister whether it is his intention that on Thursday the question of the Dardanelles should be discussed as well as that of Mesopotamia? It seems to me that it would be as easy to have a satisfactory discussion on rumours and on private information about the Dardanelles, as it would be on the question of Mesopotamia. The right hon. gentleman spoke of several inquiries or investigations which are being made with regard to the Mesopotamia scandal. I should like to ask him has any investigation been made with regard to the Dardanelles scandal? He told us some time ago that there could not be a proper investigation of the Dardanelles scandal, because all the persons chiefly concerned in the transaction were at the other side of the world. I believe I am right in saying that every one of them is in this country now. Why should there not also be an investigation into the Dardanelles question?

Mr. CHURCHILL: In regard to the Dardanelles, can the right hon. gentleman say whether Lord Kitchener was consulted as to the propriety and convenience of laying those papers on the table?

Mr. ASQUITH: I had many conversations with Lord Kitchener on the subject. Since my right hon. friend has introduced his name in connection with the presentation of papers, I may say that the publication of these papers is rendered difficult by the death of Lord Kitchener.

Mr. CHURCHILL: Are we to understand that Lord Kitchener agreed to and approved of the declaration of the Prime Minister that the papers should be published?

Mr. ASQUITH: I did not consult him on that particular occasion. I am sure he would have done. I spoke to him afterwards on the subject.

Mr. A. HERBERT: While it is obviously undesirable that when a campaign is in progress papers should be published, will the Prime Minister consider the possibility and advisability of publishing the medical papers in regard to the Mesopotamia campaign?

Mr. ASQUITH: We have not got the Vincent report; it is still in India.

British Prisoners in Turkey. July 19.

Mr. FORSTER, answering an inquiry by Mr. M. Barlow whether he was aware that parcels sent to British prisoners in Turkey failed to arrive, and whether he could do anything to secure a more satisfactory arrangement, said:—I fear that the facts are as stated in the question as regards the prisoners taken in Mesopotamia. I am informed that, notwithstanding all the efforts of the United States Ambassador at Constantinople—for which efforts his Majesty's Government are very grateful—it has been impossible as yet to learn where the greater number of the British prisoners just referred to are interned. Unless parcels are accurately addressed the eventual receipt of them by the addressee is of course doubtful. The United States Embassy in Constantinople are doing all they can to obtain accurate information as to the location of the British prisoners in Turkey, and to get this information as soon as possible.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

According to all accounts, coal is coming into Constantinople again from Zunguldak with almost regular frequency. On the other hand, news of Russian naval successes in the Black Sea seem to be on the wane, which may account for the renewed running of coal down through the Bosphorus. Again—and this may be the real reason of this unfortunate *contretemps*—it is reported on good authority that the Boches have been able to send several large submarines to the Golden Horn, and their raids into the Black Sea have obliged the Russian Fleet to be more wary in their movements. This notwithstanding, it seems to me that a few fast-steaming destroyers and smaller craft could be advantageously used in interfering with Constantinople's coal supply, even if the bombardment of the quays and wharves at Zunguldak is at present impracticable. The less coal allowed to be run through the Bosphorus, the more rapid will be the collapse at Stamboul.

***

At the recent meeting of the Shell Transport and Trading Company, the Chairman, Sir Marcus Samuel, made a passing reference to the Egyptian Oilfields, and said that the territory in which the company had a large stake "continued disappointing." It may be as well to point out that, as has been mentioned previously in these columns, there are mining engineers and oil experts in Egypt who maintain that the disappointing results hitherto obtained are due to the fact that no deep-boring, in the modern acceptation of the word, has ever been attempted on the company's properties. The oil deposits which have been tapped up to now are "shallow," and until the presence or absence of deep oil has been proven, no judgment can be passed on Egypt as an oil-producer. Perhaps, if the company's experts were to give a fair trial to deep boring, the disappointing character of their territory would improve. Incidentally, I am pleased to note from the chairman's speech that the Anglo-Egyptian Company controlled by the "Shell" is not working at a loss "at present." Moreover, and as regards the Roumanian "Astra Romana," Sir Marcus stated that the "Shell" have not and never have had any representation on the board of that company, and did not follow its operations. He was able to inform the meeting, however, that the production of the Astra in 1915 amounted to 341,532 tons, as against 466,604 tons in 1914, the reduction being due to the Roumanian prohibition of exports of benzine and liquid fuel. Nevertheless, in spite of this, the company was paying a larger dividend than in the preceding year.

***

Apropos my note last week relating to direct representation of British firms in Egypt, I am glad to see that at the annual conference of the Northern and Midland Federation of Commercial Travellers" Associations, held at Birmingham recently, this matter of foreign representation was discussed. The secretary of the Association read a paper, in which he argued that "it would be to the immense advantage, not only of the British commercial travellers, but to British commerce itself, that British manufacturers should in future be represented by trained commercials of their own country." This I regard as sound common-sense, and I hope soon to see that merchants and shippers themselves have taken the matter up. After all, the decision rests with them and not with the travellers and the Press, who can only advise.

***

I have much pleasure this week in introducing readers of THE NEAR EAST to a new contributor who will, from time to time, furnish us with information regarding commercial and industrial developments in Morocco. He is particularly well placed in commercial circles in the country, and readers of THE NEAR EAST may rely upon him for accuracy and insight. In his Notes this week our correspondent describes several new schemes connected with road communications and new port works which will not fail to be of interest to British merchants and exporters who were interested in the country before the war, and who hope to renew those interests profitably after the struggle has come to an end.

***

Not the least interesting of his remarks is that in which he refers to the development of Tangier. He says, it will be noted, that with the establishment there of a large port, and the development of the Tangier-Fez line, Algiers will find a very formidable rival. The last time I was at the latter port, which was shortly before the war broke out, I was greatly impressed by the boundless activity which continued from early morning to evening. The harbour was full of shipping, representing all the great maritime Powers of Europe; but even then it was apparent that Germany had a great deal to say in the matter of trade. The officials were all French, of course, and so far, at least, we may be sure that there has been no Germanisation of the essential institutions of the port and city. I am almost ashamed to say that I entered the harbour in a North German-Lloyd steamer, and I remember now that the chief officer, with true Hunnish arrogance, predicted that the time was coming when his "pals" would dominate the port. Since then the war has come and, I should say, put an end to whatever hopes the Germans might have had in this respect. I cannot say, of course, what has been happening in the meantime; but if things have been kept going it ought to be a long time before Tangier will be able to claim to be a successful rival of Algiers. We must wait and see, however.

***

Mr. Charles Plowden, chairman of the British Chamber of Commerce for Italy, who is not unknown in Egypt, is, I see, visiting the Manchester Chamber this month, and will discuss there trade relations between Lancashire and Italy after the war. I mention this because it would seem that other Chambers in the Mediterranean could do worse than follow the example.

***

Frequent reference has been made in these columns to the mineral wealth of Serbia, and I am inclined to think that after the war the City will be asked to take more than a mere passing interest in the country's mining possibilities. Copper is, of course, Serbia's greatest known asset, and French capital controls the largest mine. There are smaller mines, however, of only desultory exploitation, which are deserving of more energy and attention; besides, in all probability the enemy have, within the past year, been actively engaged in working all available copper mines. In Belgrade, before the war, it was an open secret that the Austrians knew more about the economic possibilities of Serbia than did the Serbs, and Austria's mining engineers and geologists overran the country in search of likely mineral deposits. Some of these will, in all probability, have known the miner's spade by now, and thus, when the Serbs return to their hearths and homes, they will find that the enemy has perforce been obliged to do them a good turn, as he has also done, willy-nilly, in the case of railway construction.

***

But copper is not the country's only mineral asset. Strata of coal—hard, soft, and lignite—are numerous, and the output of silver, lead, and antimony has grown within recent years. Gold has been mined, likewise, in the south-west of Old Serbia, and there seems to be good foundation for its reported presence in practical quantities along the upper reaches and tributaries of the Vardar. The exploitation, however, of Serbia's mineral wealth requires capital, and it is to be hoped that, when the time comes, the City will not turn a deaf ear to attractive proposals. It is in the interests of both Serbia and the Empire that the links which unite us now should be strengthened in the near future, and that Serbia's mineral output should find a ready market in this country rather than in Germany.

***

If I may judge from some correspondence in the *Malta Daily Chronicle*, there are people on the island who are looking for opportunities to get rich quickly. Following the example of some people in England, it is said they are trying to corner foodstuffs, and have made a beginning with potatoes. One correspondent offers to produce evidence that certain farmers are holding on to their crops of potatoes and refusing to sell, as they hope to induce the authorities to permit larger exports and to raise the maximum price to local consumers. Surely a contemptible way of "building up" trade, and I hope the authorities will "jump" on the offenders very promptly and heavily. The Malta potato trade is a pretty profitable one, and there is no need to resort to methods of that sort. I am told that merchants have been refusing to accept so good a price as 6d. per pesa; as Irish seed potatoes can be bought in the Valletta market at 4d. or 5d., the cupidity of the "ring" needs little comment.

***

To what extent is the war affecting the weather? A summer such as the one we are experiencing here is rare—and disagreeable; in Germany, in parts, the crops have been wrecked by the continual showers, and, according to our Roumanian Correspondent, quoted last week, the heavy rainfalls in Moldavia, near the fighting in the Bukovina, have caused great damage in agricultural districts. The Russian artillery, it is believed in Roumania, is the cause of the wet weather, and I see no reason why the bursting of high explosives, on a scale of intensity never achieved before, should not affect atmospheric conditions.

COMMENTATOR.

Industry and Commerce in Palestine.

Palestine at the moment is more or less a closed book, but, thanks to an excellent little work which has just been published by John Murray (Albemarle Street, London, W.), we are able to obtain an inside view of a great industrial movement which, given fair conditions, ought to open up great possibilities of profitable trade after the war. "Zionism and the Jewish Future" is rather a curious subject to find in the commercial columns of THE NEAR EAST, but Mr. H. Sacher, the editor of the book in question, has succeeded in securing at least two chapters which will not fail in interest to all who have, or who hope to have, commercial relations in that part of the Near East.

Agricultural Colonies.

In the chapter on "The Jews and the Economic Development of Palestine," Mr. S. Tolkowsky, agricultural engineer, Jaffa, describes at length, and in interesting fashion, the establishment of the agricultural colonies for which Sir Moses Montefiore did so much so long ago as 1854. But more than two centuries earlier, we are told, it was "reported that the Jews of Palestine were engaged in the cultivation of cotton, cereals, and vegetables, and in the rearing of silkworms and bees." This early activity in industrial pursuits, however, did not last, and we are told that a century ago the 8,000 or 10,000 Jews who inhabited Palestine were strictly confined to a few towns, and had no relations with any Jewish community outside the country. That was the condition, apparently, in which Sir Moses found them, for it was only after he had visited the country several times that he determined to see what could be done for his co-religionists. We need not go over all the troubled and difficult ground which Sir Moses had to traverse before he could achieve his object: that would be a wearisome task, and unnecessary withal. Sufficient to say that by 1908 there were many prosperous colonies in existence, and in 1910 it was considered a sound proposition to found the Palestine Land Development Company, Limited, to purchase land, and to resell it to private individuals. This company and the Jewish Bank (the Anglo-Palestine Company) have been factors of considerable bearing on the development of Palestine.

The opinion has frequently been expressed that Jews are incapable of becoming good agriculturists. The sociologists and economists who held and preached this opinion have been proved to be wrong, for Jewish agriculture has been a wonderful success in Palestine. At the beginning the new farmers were met by most adverse conditions. The writer tells us:—

> In a country where fodder, and, in consequence, cattle and manure, are scanty, the Arabs for centuries have practised a system of tillage which has seriously impoverished the soil; moreover, the yield of their crops is very meagre. Thanks to a wise use of chemical manure and the cultivation of green manures, destined to restore to the land the fertilising elements of which the crops have robbed it, the Jews have succeeded in increasing the productive qualities of the soil to a marked degree; while, at the same time, the employment of adequate machinery has introduced modern methods of cultivation, and has enabled them to raise the produce of various crops to quite remarkable proportions.

Improved Crops.

If we may judge from the results which Mr. Tolkowsky quotes, the success achieved has justified all he claims on behalf of his people. Thus, in the cultivation of cereals the average annual yield of the Arab fellaheen is about £1 an acre, whereas in the oldest of the Jewish colonies it varies between £2 8s. and £3 8s. In the orange groves the Jews produce rather more than double the crop of oranges that the Arabs do, and the fact is mentioned with some pride that—

> During the past few years Arab landowners have repeatedly had recourse to Jewish labourers for the establishment of their plantations and the pruning and grafting of their fruit trees.

Profit in Oranges.

In this apparently small matter of orange cultivation there is a valuable lesson for those who hitherto have scorned to adopt modern plant and methods. The Jews have succeeded because they changed their industrial politics. They abandoned conservative prejudice for modern methods, and in place of the primitive Arab chain-pumps, set in motion by a camel or a mule that walks round and round with its eyes blindfolded, they introduced modern pumps, worked by oil or gas motors, for the irrigation of their groves. Indeed, in 1913, on the banks of the River Audja, not far from the colony of Petach-Tikwah, a Jewish company instituted great waterworks, which, on payment of a certain tax per *dunam*, furnish the surrounding planters with all the water they want for irrigation purposes. Another development of this remarkable movement is the Agricultural Experiment Station at Zichron-Jacob and Atlit, near Haifa. This station was founded, and is maintained, by the generosity of a group of American Jews, with the main object of introducing and improving the cultivation of varieties of cereals and other plants which are not very exacting, and have an ample power of resisting bad weather, disease, and parasites. There are laboratories and experimental fields, and since work was begun on the station in 1910 almost incredible results have been achieved. Five new species of wheat and barley have been created, which show an amazing power of resistance to the sirocco, and some species of wheat, peculiarly rich in gluten, and accordingly lending themselves specially to the manufacture of macaroni. They have also succeeded in isolating a new form of sesame, the yield of which, other things being equal, is more than double that of the product ordinarily grown in the country. The station has also succeeded in acclimatising a variety of table grape, which ripens three weeks earlier than the precocious varieties of the region. This will in course of time be a serious matter for cultivators in Smyrna and Cyprus, which between the end of July and the end of October send £80,000 worth of table grapes to Egypt. The Palestine variety ripens three weeks earlier, and, therefore, have that time to the good in the Egyptian market. So much for agriculture.

ndustries

Up to a very short time ago the industries exploited by the Jews had not been developed very considerably. The main cause of this we are told is "the inland duties, which until 1910 were levied on goods conveyed from one province to another." These duties once rose as high as 8 per cent.; on the other hand, the only duty on imported goods is one of 11 per cent. It does not require much reflection to realise that industry was not likely to thrive under such paralysing fiscal conditions as these. Nevertheless, the colonists simply refused to be crushed, and went ahead with their programme. They established modern oil works, which by "improved chemical processes succeed in extracting as much as 10 per cent. of oil from the residues left by the primitive Arab oil works." Another important branch of activity is oil and brandy production, and, allied to this, of course, is the coopering industry. Still another line of exploitation is the distilling of essential oils, particularly essence of geranium and thyme. Building and the manufacture of cement-stones have also been taken up on a fair scale; indeed, this trade is almost entirely in the hands of the Jews. Carpet-weaving has progressed so considerably that in the School of Arts and Crafts there are 500 pupils, while another section is devoted to the manufacture of silver filigree ware. There is a mother-of-pearl workshop for the making of buttons and devotional objects; at Jerusalem there is a professional school comprising workshops for carpentry, machinery, iron-smelting, and weaving, as well as a smithy and dye-shop. Then there are the beginnings of cottage industries. Among the poorer families of Jerusalem knitting machines have been distributed, the cost being repayable by small annual instalments. In all the important towns schools for girls and women have been established for instruction in the manufacture of a special kind of Oriental lace.

Exports and Imports.

Not a bad beginning, indeed; but the real worth of an industrial system can only be judged by its final results, as seen in export trade and in the import of manufacturing materials. The Jews of Palestine do not altogether fail when this test is applied to their work. The foreign trade of Jaffa amounts to nearly 40 per cent. of the entire trade of Palestine. In 1912 this reached the figure of £2,080,000, the imports being more than the exports. Jewish exports of oranges and wines alone accounted for nearly a quarter of Jaffa's total exports, while a large proportion of the imports was of materials bought by the Jews for their factories.

It is interesting to note the export trade is in the hands mainly of the producer, who avoids the middleman, thus reducing his expenses and increasing his profits. In ordinary conditions of industry this is rarely possible; but in the Jewish colonies have been formed four large co-operative sale syndicates, two of which are concerned with the export of oranges, and the others with the export of wines and almonds. The main factor which has been responsible for the success of the industries is the Anglo-Palestine Company, which was founded in 1903. The original capital was £39,000, but this has since been raised to £100,000. The bank began with the principle that the credit which may be allowed to a borrower is not always determined by the object which serves as the basis of credit, but often by the debt-collecting ability which the lender can show when payment falls due. Not very sound banking rules from a purely Western point of view, perhaps; but we are told that "the Anglo-Palestine Company has succeeded in organising in Palestine a modern system of credit." It has introduced short term credits against the deposit, as security, of goods or bills of exchange. In order to facilitate the granting of credit to farmers, labourers, and small tradesmen, the bank has arranged the formation of a co-operative society based on the joint guarantee of the members. At the end of 1913 fifty-two of these societies were in existence, with 2,289 members who possessed at credit with the Anglo-Palestine Bank deposits amounting to more than £4,000. This bank, we may note in passing, enjoys the supreme confidence of the people, and its business shows a slow but steady advance, despite the cramping political complications of the past few years. In 1910 the turnover was £5,840,000, and since then this total has increased.

The Outlook.

Here, then, is a brief outline of the beginning of wisdom by the Jews of Palestine. The industrial system which has been established is not yet great; it is still strictly communal; but when the war is over, and the country is able once more to pursue its way under the blessings of peace there ought to be great developments, leading to the enhanced prosperity of a people who have proved in the face of many difficulties that they are capable of industrial enterprise, that they are able and willing to break away from old prejudices and methods which, those who know Oriental peoples will agree, have wrecked many promising industrial schemes and killed many enterprises. At present, the Jewish population in Palestine is not large. The forty-five colonies which exist have a population of about 15,000, and cover an area of about 110,000 acres, approximately 2 per cent of the entire area of the country, but about 10 per cent. of the cultivated area.

East of the Jordan are vast territories, almost uninhabited and entirely uncultivated, the soil of which is said to be excellent arable land. "This country," says Mr. Tolkowsky, "which to-day contains merely a few hundred thousand inhabitants, supported ten times that number during the first centuries of the Christian era, and was then considered the granary of the Roman Empire. It only needs an industrious and intelligent population in order to recover its pristine fertility, and to regain its old economic importance."

MOROCCO NOTES.

(From Our Own Correspondent.)

Tangier, July 13.

Morocco, which has so often been the cause of trouble, and has had, though indirectly, its share in bringing about the present war, is now enjoying what, for most practical purposes, is profound peace. Many of the native inhabitants, largely Berbers from the Atlas, have fought excellently under French officers in the heaviest of the fighting on the Western front; some of the most brilliant French commanders are men who during the last few years have done much campaigning in this country, and on the whole the country has increased rather than diminished French resources.

The tranquillity is not absolute, however. German emissaries are still busy in some of the unpacified parts of the French and Spanish zones; and in the Atlas, especially near the opening which has been made in the mountain barrier between East Morocco and Algeria, frontier fighting continues as the French outposts close in on and confine the hostile tribes.

But this desultory fighting—in districts where tribal wars have always been annual fixtures, with dates arranged to suit harvesting and other necessities—does not in the least affect the life and commerce of the country as a whole, and Morocco is now steadily preparing for development after the war.

At the present moment the people are busy gathering in the profits of a good agricultural year. The locusts, as the Moors with some reason say, only come in good years, and they have come this year; but they have done little harm to the main harvest. The whole of the grain crop, as well as most agricultural products, is being bought by the French military authorities at fixed prices, and export by private individuals is forbidden. The natives are, therefore, not making anything like the profit which free competition would have brought them, but are nevertheless prosperous.

New Schemes.

Though the country is well off and peaceful it is far from stagnant. Many schemes, besides the one which is to give Casablanca a vast port, are being developed. The Tangier-Fez line, for which most of the surveys have been completed, will soon reach the construction stage on a great part of the route; a motor-lorry service is now running between Fez and Taza, the half-way town on the road through the Atlas mountains; a few days ago a motor-car arrived at Casablanca from Tunis via Taza in a little over four days; the narrow gauge military line from the Algerian frontier towards Fez is soon to be replaced by broad gauge, and it is intended, as soon as possible, to place Algeria in direct rail communication with the Atlantic ports of Morocco. A military line, recently made conditionally available for civilian passengers and merchandise, now runs from Casablanca to Rabat, and thence to Fez. Lastly, the most immediately important work of all, permanent roads are being made from the Atlantic ports to the interior, and, in conjunction with the coast roads, which already connect some of the chief ports, will soon make travelling between all the chief centres easy and rapid at all seasons of the year.

These facts are of considerable importance to Great Britain. British commercial interests here have long been important, and they should, if they receive the support and encouragement they deserve, soon become vastly greater. Great Britain, chiefly, of course, Manchester, supplies yearly about a million pounds' worth of cotton fabrics alone, and despite all recent political changes a large part of the chief import and export firms are British. It is not only as a market which has grown enormously in the last few years, and must increase still more rapidly in the future, that Morocco is of interest to Great Britain, but as a country of immense interest to travellers, and to those who seek a perfect climate, and pleasant surroundings in which to pass the winter.

Improved Communications.

Morocco is chiefly known to British travellers owing to the Royal Mail Steam Packet Co., the steamers of which, until the war, used to bring twice a month some fifty passengers who were able to land for a few hours at most of the coast ports. The interior, except to those to whom time and money were not very important, was closed. Soon, probably in a few months, that interior, with its two capitals, which are among the most perfect pictures that still exist of Eastern life as it was lived 500 and more years ago, will be accessible from the coast at the cost of a few hours and very moderate expense. In the extreme north, too, changes are taking place. The time seems to be approaching when Tangier will no longer be cut off from the rest of Morocco. A few weeks ago communication by land was opened between the Atlantic ports—Laraiche and Arzila—and the Mediterranean ports—Ceuta and Tetuan, and the road from Tangier to Tetuan once more came into use. During last week further military operations, in which as in the other recent advances, the irrepressible brigand, till lately Spain's most formidable enemy, Raisuli, took, as arranged, the brunt of the fighting, have been carried out against Anjera. That lawless, plucky little tribe, living almost within range of Gibraltar's guns, is one of the best suppliers and most regular customers of Tangier markets; but its fiercely independent spirit, and, within its own borders, truculence, makes its pacification a regrettable necessity, and a desirable accompaniment though not quite a condition of Tangier's full development.

Rival to Algiers.

The arrangements for building at Tangier a large port, which will be a very formidable rival to Algiers, are far advanced, and, with the Tangier-Fez line, destined in a few years to put Tangier in touch by rail with the rest of Morocco and North Africa, and roads to the French zone will enable the international town to start fairly on the career which its position offers to it. In that career, as a great port, one of the gates, if not the chief gate of Morocco, and a place of residence with extraordinary natural advantages of site, beauty, interest, and climate, Great Britain, which has always possessed in Tangier important interests, and a very considerable colony, can hardly fail to be deeply interested.

GERMANS IN GREECE.

An interesting report from the British Vice-Consul at Zante is published in the "Board of Trade Journal" of July 13.

"Even in so small a place as Zante," he writes, "there are indications that German traders are already making preparations to resume business operations and to retrieve their position in trade as soon as the war is over. It may not be amiss, therefore, for British traders to be advised to take the necessary steps to forestall this competition, and they should bear in mind that German exporters will spare no pains or expense in order to secure the desired object.

"Prior to the war, imports from the United Kingdom into Zante had been gradually giving way before German competition. This was due to the energy and attractive methods of the German trader, such as extended terms of payment, rebates regulated according to the position of clients, advice as to selection, prompt despatch of goods to Zante, quotation of c.i.f. prices, and other facilities to which buyers all over Greece are now habituated.

"With the exception of codfish, pickled fish and salmon, herrings, unwrought iron, sulphate of copper, soda ash, some textiles and yarns, etc., which are of British origin, most of the imports into Zante came from Germany and Austria. Imports from these latter countries comprised cutlery, hardware, glassware, enamelled ware, crockery, cotton and woollen manufactures, leather goods, lamps of all kinds, stationery and paper, domestic and household requisites, toys, dyes, drugs, medicines, brushes of all descriptions, etc.

"If United Kingdom manufacturers will adapt their methods to the requirements of the Greek market, there is no reason why they should not secure the greater part of the trade in the goods hitherto supplied by Germany and Austria, as soon as the war is over; a great advantage in their favour is the admitted superiority of British goods of all kinds."

TRADE OPENINGS

The Army Finance Department, Cairo, invite tenders for the supply of fourteen tons of candles to be delivered c.i.f., Alexandria or Port Said. Date, September 5, 1916.

The Director of Personnel and Equipment Department (Supplies Office) invites tenders for the supply of photographic material required, for a period of one year commencing on August 1, 1916, and ending on July 31, 1917, for the Ministry and the Identification Service of the Ministry. Date, August 1, 1916.

Mr. A. Hodson, British Consul for Southern Abyssinia, reports that there would be a fair demand in his territory for the following goods, which at present are not imported:—Axes, hoes, knives, choppers, spoons, ladles, candlesticks, and candles.

The British Vice-Consul at Laraiche, Morocco, reports that a local firm wishes to get into communication with British manufacturers of the following goods, with a view to obtaining agencies therefor:—Cotton goods, cleansing polishes and powders, washing blue, men's hats, glassware, paints, and varnishes, linoleum and oilcloth, bedsteads and inks. Information may be obtained from the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

A French subject at Tetuan desires to secure the representation in Tangier and the Spanish zone of Morocco of British manufacturers of glassware of all kinds. Apply for information to the Commercial Intelligence Branch of the Board of Trade.

NEWS FROM ALL SOURCES.

The Alexandria Bourse was officially reopened on July 17.

As a result of proceedings before the prize court in Malta, the vessels Euterpe and Zoodochos Pigi were condemned on June 27.

A *Times* message of July 14 states:—"The prices of all foodstuffs continue to fall in Constantinople, where, according to the latest reports, abundance now reigns."

The Mercantile Marine Service Association is continuing its work for the benefit of those seamen who are interned in enemy camps at Magnesie, Turkey, and elsewhere.

Much regret was felt at the sudden death on May 27 of Sheikh Akasha Khalil Khayal, one of the best-known merchants in the gum market, and a familiar figure in the Sudan.

The supplement to the Board of Trade *Journal* of July 13 contains revised and consolidated lists of articles the exportation of which is prohibited from the countries named. The entire supplement of 167 pages is devoted to similar lists relating to all the Dominions and Colonies in the Empire.

In regard to the failure of Anglet, Ltd., tobacco manufacturers, it is reported that it was due to the failure of the firm to secure control of the stock of Latakia tobacco. With a view to obtaining control the firm purchased 4,408 bales for £28,443, and ultimately had to sell at a loss of £10,576. The accounts show liabilities £4,005, against assets £285, and a deficiency of £13,729 to contributories.

ROUMANIAN HARVEST.

(From Our Own Correspondent.)

Bucharest, June 27.

M. Démètre Greciano, who represents the large landowners, having very kindly complied with my request to let me have the benefit of his views on the present state of agricultural affairs, I am able to send you the following summary of what he said on this subject :—

So far as the coming harvest is concerned, the Government is pre-occupied with the question of victualling the Army and the communes, the calculation for the needs of the former being made on the assumption that there are 1,200,000 men to provide for. Before any exportation of wheat is authorised there will be laid aside a reserve of 120,000 wagonloads. The remainder will be available for exportation after it has been warehoused, but not before the month of September. This confirms the statement made previously that questions regarding the sale of the next harvest have not yet arisen. When the reserve of wheat remaining over from the year 1915 becomes available, it will be transferred to the British Bureau in completion of the purchase of 80,000 truckloads.

At the suggestion of M. Greciano, the Government have decided to place all available troops at the disposal of agriculturists, so that the work of gathering in the crops may be accomplished as expeditiously as possible, in view especially of the political situation. The harvest of wheat promises to be medium, the estimate being 220,000 wagonloads. That of spring produce (peas, oats, and barley) will be above the average.

According to official figures, the Austro-German *consortium* has exported the following cereals between January 1 and June 1:—

	Tons.
Wheat	45,128
Indian corn	224,642
Haricot beans	6,368
Rye	11,178
Flour	8,719
Peas	1,487

The export taxes paid on the above amount to 19,000,000 fr. (gold).

The country is threatened with another sugar crisis, the reserve stock having been reduced to ninety wagonloads. There are still 100 wagons due from Austria-Hungary in accordance with an old-standing contract. As no sugar will be produced in the country until September, the population will be practically deprived of this article before the end of summer.

The surveys for the extension on the broad gauge system of the Ujda line towards Taza and Fez are being carried out. There is as yet no question of actual construction.

AUSTRO-GERMAN RIVALRY AT BUCHAREST.

Bucharest, July 8.

A curious rivalry has manifested itself here between the Germans and Austrians. Some time ago a great joint Austro-German organisation was set up at Bucharest to secure the export of cereals, petroleum, and groceries, and the importation of various goods from Germany and Austria. The Austrians, however, soon found that the Germans, according to their habit, were absorbing everything. Consequently, the Austro-Hungarian Legation obtained from its Government leave to establish a separate bureau, and it has now leased, at enormous expense, a big building, in which, in co-operation with the Germans, the export and import trade with Austria-Hungary is promoted and fostered.

The Germans have started an express train, which they call Carmen Sylva, running between Berlin and Bucharest. The Austrians now have their own train from here to Budapest and Vienna. It is called Mercury.—Reuter.

All the cattle which were in quarantine parks and on hand in the Khartoum and Costi districts have been forwarded to Egypt. The demand there, however, is very poor.

PRODUCE REPORT.

LONDON, July 20.

Currants.

It is reported from Greece that the new crop will be about 25 per cent. less than last year's; but it must be remembered that such calculations are based on the present and visible state of the still growing crop, as well as on the existing condition of the weather. The harvest has begun, and in some districts the fruit is already being dried on the drying-grounds, but until the harvest and drying is completed calculations must not be considered as conclusive, for it depends on the weather. There is no doubt, however, that the crop will be much less than last year's; the scarcity of copper-sulphate for spraying and the scarcity of labour at the time of cultivation are chiefly the cause of this. Under the circumstances, therefore, the opening prices must be expected much higher than the present. In the meantime the market here is quiet, with only few transactions taking place at full rates.

Sultanas.

There has been some demand with small business done at recent rates.

Figs and Dates.

There has been a good demand this past week, especially for dates, the prices of which are firmer.

Seeds.

Linseed is dull, London-Calcutta afloat being sold at 71s., while July-August is quoted 71s. 6d. Rapeseed is not in much request in view of the new crop coming on the market; Toria July-August, 60s. 6d.; August-September, 62s. Cottonseed is quiet; London-Egyptian July offered at £13, and Fayoumi September £12 per ton. Rangoon beans are steady at last week's improved rates.

Oils.

Linseed oil is easier this week. Spot pipes landed, £34 10s., and barrels ditto, £35 10s. Rape oil is firmer; English refined barrels, £48 to £50. Cotton oil is quiet; crude spot pipes, £39 5s.; refined pipes, pale, £44 10s.; and barrels, sweet, £52 to £54, as to make.

TURKISH CURRENCY LAWS.

A translation is now available of the Turkish provisional law, dated April 14, 1916, on the unification of the currency. The law states that the basis of the monetary system of the Ottoman Empire is the gold standard. The piastre, which represents the monetary unit in gold, is coined in nickel and is worth 40 paras. The fractions of the piastre, the pieces of 20, 10 and 5 paras, are in nickel; the pieces of 2, 5, 10, and 20 piastres are in silver, and those of 25, 50, 100, 250, and 500 are in gold. In coinage, pure nickel is used, the silver is 830 fine, and the gold is 916 2-3 fine.

The limit of the amount acceptable in silver money is 300 piastres, and in nickel money 50 piastres. No creditor can be obliged to accept a larger amount of money in silver or in nickel. The rates of exchange of money accepted by custom in the different parts of the Empire are abolished. Speculations in money at higher or lower rates than the legally fixed value are prohibited, and the offenders will be punished. All monetary operations tending to cause differences in the legal rate of the currency are prohibited. Offenders will be punished by imprisonment from three months to two years. If the offence is committed by a company, the offender will be subjected to the same penalty, and its place of business will be closed for a period of from one week to three months.

If debts incurred prior to the date of the publication of the law are payable in piastres, without specifying in any way the amount or value of the money, they shall be paid according to the rate of the money at the time the debts were contracted. If the kind or value of the money were specified the debts shall be paid accordingly. The Treasury constitutes an exception to this rule.

EGYPTIAN COTTON CROP.

The monthly bulletin of the Ministry of Agriculture, dated July 1, gives the condition of the Lower Egypt cotton crops as 2 per cent. above the average, while the Upper Egypt crop is indicated as being up to the average.

The bulletin adds that the weather has been favourable. The water supply was practically sufficient everywhere, except in some few places situated near the tails of canals. In Daqahlia, however, much difficulty has been experienced in the watering of the crop. Hoeing and watering are still in progress. The cotton worm attack is more general and heavier than last year, but has caused no damage, owing in a great measure to the excessively hot weather prevailing late in the month, which has entirely destroyed the new brood of worms and the predatory insects, chiefly the rover beetle, which have also contributed to the destruction of the worm. The presence of ordinary and pink boll worms is reported in a few provinces; the former's attack is insignificant, but the latter is causing serious mischief to the flowers and young bolls. The wilting disease has caused some damage in a few fields in Aga Markaz, Daqahlia, where it appears to be endemic. Owing to the continuance of favourable weather the crop is obviously in advance of the normal, and looks very healthy. Flowering is profuse.

EGYPT WANTS BRITISH FIRMS.

The Association of Chambers of Commerce has received the following information compiled by the Egyptian Government as a result of an inquiry made by a representative of the War Trade Department in Cairo. The following is an extract:—

"As a result of the war a number of enemy firms which used to handle about a third of Egypt's cotton crop, valued at, say, £10,000,000 sterling, are being liquidated under official supervision. This is creating a gap in the distributing machinery of Egypt, which in recent years had not increased in nearly the same proportion as the size and value of the goods handled by it. So far there is no sign of any British or Allied firm preparing to fill this gap. On the other hand, there are first-class cotton experts here and agents in England, U.S.A., Russia, etc., who have lost their old standing connections, and are looking round trying to form new ones. In the opinion of the gentleman I referred to above, who is a banker, and has specialised in cotton, a good firm with relatively little capital, say £40,000 to £50,000, would soon be handling 40,000 to 50,000 bales annually, on which a normal net profit of 10s. to 15s. per bale can be looked for. It is, however, imperative that the very promptest action be taken, as I learn that within the last few weeks three new local non-British firms have arranged to start business, and they will not neglect to engage the services of the best cotton experts and foreign agents."

SUDAN NOTES.

The recent occupation of El Fasher by the Sultan's troops will eventually result in adding a vast area to the Anglo-Sudan territory, and open up new fields to the enterprising trader. At present the question of transport from the existing railhead is serious, but when the European war is over, the Sudan Government Railways will (says the Sudan Chamber of Commerce *Journal*) doubtless consider the advisability of extending their system further into the interior, and thus increase the facilities for trade and incidentally the prosperity of the country.

The cotton market at Tokar was closed on May 31. The total arrivals of cotton during the season amounted to 127,303 cantars of unginned cotton, which exceeded all expectations. Prices during the latter end of May rose considerably in spite of the inferior quality of the cotton, owing to keen competition amongst the buyers, and the small arrivals, and as much as P.T. 105 per cantar was paid for a poor second-class quality. Most of the cotton was shipped to Alexandria, where it was sold almost immediately. About 1,300 bales, or one-fifth of the crop, was shipped to Liverpool direct.

SHIPPING NOTES.

The Greek steamer Nitsa, which foundered three miles north-east of Ormigas, at the end of last month, has been reported a total loss. It was erroneously stated that the vessel was torpedoed. The Nitsa was a vessel of 3,370 tons, was owned by S. and A. Pandermaly and E. Yannagas, and was valued at £110,000.

It was reported from Naples, on July 13, that the fire on board the Greek steamer Sophia Couppa had been extinguished. Up to that time about 6,000 bags of sugar out of 14,000 in No. 1 hold had been discharged into lighters. Other bags still on board were said to be badly damaged.

The steamer Mecklenburg, of Leith, from Tyne for Leghorn, and the Greek steamer Antonios, Treport for Tyne, in ballast, collided on July 17 near the Knock John Buoy. Both vessels have reached port damaged.

Three steamers were reported by Lloyd's agents on July 18 to have been sunk by submarine in the Mediterranean—the Virginia, Euphorbia, and Sirra. The captain and forty-seven men of the British steamer Virginia have been taken into Malta, and six wounded Lascars have been removed to hospital. The chief officer, Prescott, is dead, and one Lascar was also killed. The Virginia was of 4,279 tons, built in 1901, and owned by E. Grey and Company. The crews of the British steamer Euphorbia and the Italian steamer Sirra have been landed at Algiers. The Euphorbia was of 3,837 tons, built in 1907, and owned by the Stag Line, Limited, and the Sirra was of 3,203 tons, built in 1897, and owned at Genoa.

The French steamer Ville de Rouen has been sunk by an enemy submarine. A Lloyd's message from Algiers states that the unarmed British steamer Wiltonhall and the Italian steamer Angelo have also been sunk. The Greek steamer Evangelistria is believed to have been sunk.

GREEK CUSTOMS TARIFF.

The translation of the Bill, which has been presented to the Greek Chamber, providing for a general increase of the Greek tariff rates of duty by 10 per cent., and making provision for certain other alterations in the Customs régime, has been received by the Foreign Office and the Board of Trade.

The following are the principal provisions of the measure:—

Article 1.—A surtax of 10 per cent. is added to the duties established by the Greek Customs Tariff, except in the case of the duties under Tariff Nos. 19, 20, and 21 (wheat, meslin and other cereals in the grain, roasted barley, and flours), of the duties on petroleum and cigarette paper, and of the duties fixed by conventions between Greece and other countries.

Article 3.—Articles imported into Greece from Turkey and the countries bordering on Greece by Greeks who come to establish themselves in Greece are subjected, by special permission of the Ministry of Finance, to the Greek Tariff duty, reduced by an amount equal to the duty paid on the importation of the articles into those countries, subject to the production of a certificate from the Consular authority or of other proof of the origin of such goods.

The Ministry of Finance is authorised to grant permission for the duty-free importation of phonographic machines for the technical teaching of foreign languages by special methods.

Article 6.—Such merchandise stored in the private storage warehouses at Salonika, or stored in transit at the Customs warehouses, as can be proved to have been destroyed, or such as may be destroyed in the warehouses in the country by military operations after the landing of foreign military forces at Salonika, may be exempted from import and all other duties by decision of the Minister of Finance.

ENGINEERING NOTES.

Limitations of Persia.

The statement was made recently that one of the countries that would be useful after the war from a trade point of view was Persia. That may be so in regard to small wares, textiles, etc., but makers of engineering stores, machinery, etc., may leave the country out of account and prepare to devote their energies to a more potentially profitable object. There is no market, at least in the interior of the country, for machinery of any sort, although if the people were reasonably alive to the possibilities of the soil and agriculture there ought to be a great chance for makers of agricultural plant. It is not so, however, and a word in season to friends who are on the look-out for new openings may not be out of place.

Lumber Possibilities.

There ought to be an excellent chance of establishing a lumber industry in Persia after the war, however. Up to the time of the outbreak of hostilities Persia imported most of its timber, principally from Russia. Why, can only be explained by the constitutional apathy of the people. As a matter of fact, it ought not to be necessary to import a foot of wood into the country. There are resources to produce all the timber that could possibly be needed, for there are vast forests in all the districts along the Caspian Sea. They are not utilised simply because the people concerned will not exploit them. For men with enterprise, who are prepared to launch out upon an initial expenditure for the purchase of machinery, the employment of labour of the right sort and the organisation of transport there is money waiting.

Driving Belts for Russia.

The great demand in Russia for driving belts continues without weakening, and has done so for several months, so that the market for these goods has become very strained. The stocks are gradually being worked off, but the production of the Russian factories and the arrivals of belts from abroad have not constituted enough to satisfy the demand and fill up the blanks in the stocks, says the *Financier*. In consequence of this, during the past two or three months the demand and the supply have not agreed. Therefore, the speculators have been tempted into this market, and have screwed the prices up to quite extraordinary levels. Some days ago the largest houses engaged in the manufacture of driving belts sent a circular to their clients saying that, owing to the continuous increase in prices for labour, the dearness of raw material, and the shortage of the same, they were obliged to send out a revised price list. On driving belts—English, American, balata, camel hair, universal, etc.—the prices are raised by from 5 to 25 per cent.

Prices.

Leather belt makers will be interested in the prices their goods now command in Russia, adds our contemporary. Russian leather belting, ordinary, sells as follows :—1-in. wide, 85 copecks per arscheen; 2-in., 1 rouble 72 copecks per arscheen; 3-in., 2 roubles 87 copecks; 4-in., 3 roubles 90 copecks. Thereafter, every additional inch in the width adds a rouble per arscheen, so that a 12-in. belt comes to 13 roubles 5 copecks per arscheen. These belts double are priced as follows :—Beginning with 2 inches wide, 3 roubles 35 copecks per arscheen, and finishing for 14-in. wide at 30 roubles 15 copecks. The difference between the width per inch is fixed at about 2 roubles. The prices of the strongest balata belts run as follows :—1½-in. wide, 2 roubles 85 copecks; 2-in., 3 roubles 71 copecks; 3-in., 5 roubles 83 copecks; 4-in., 8 roubles 60 copecks. Then the price increases up to 14 roubles 85 copecks for 6½-in. wide. The prices for camel hair belting have gone up 20 per cent. The same applies to English belts.

Demand for Iron, etc.

Those who are interested in iron, steel, and rails will do well to note the growing demand for these in Russia, a demand which is likely to continue and expand after peace has been attained. According to figures given out by the "Prodameta" syndicate, the demand in May showed a considerable increase compared with the corresponding figures for 1915 and 1914. The increase extends over the whole list, except in respect to girders and sleepers, the orders for which fell by about two-thirds. But the total for the first five months of the current year shows a decline compared with the years 1915 and 1914. The total weight of orders received by the Prodameta for the period named was 41,700,000 poods, against 56,100,000 poods in the period January-May, 1915, and 58,300,000 poods in the corresponding period of 1914. The orders for sheet-iron came to 5,176,000 poods, against 7,306,000 poods. But the figures for girders and sleepers are very striking, namely, 1,560,000 poods only, against 6,755,000 poods in 1915. The explanation is, of course, the great decline in the building industry. On the other hand, there was a great increase in the demand for merchant iron, namely, to 31,749,000 poods from 28,236,000 poods in 1915. The demand for rails showed a great decline.

TRADE AFTER THE WAR.

That great public interest is centred in this important question is evidenced by the letters we have received in connection with the article published in these pages last week.

It is satisfactory to observe that the Prime Minister has appointed a Committee to consider the commercial and industrial policy to be adopted after the war, with special reference to the conclusions reached at the Economic Conference of the Allies, and to the following questions:—

(a) What industries are essential to the future safety of the nation, and what steps should be taken to maintain or establish them?

(b) What steps should be taken to recover home and foreign trade lost during the war, and to secure new markets?

(c) To what extent and by what means the resources of the Empire should and can be developed? and

(d) To what extent and by what means the sources of supply within the Empire can be prevented from falling under foreign control?

The Committee is composed as follows:—Lord Balfour of Burleigh (Chairman), Mr. Arthur Balfour, Mr. H. Gosling, Mr. W. A. S. Hewins, M.P., Mr. A. H. Illingworth, M.P., Sir Joseph Maclay, Sir Alfred Mond, Bart., M.P., Mr. Arthur Pease, Mr. R. E. Prothero, M.P., Sir Frederick H. Smith, Bart., and Mr. G. J. Wardle, M.P., together with the following, who are presiding over Board of Trade Committees on the position of important industries after the war:—Sir Henry Birchenough, Lord Faringdon, Sir Clarendon Hyde, Sir Charles Parsons, K.C.B., Lord Rhondda, and Mr. G. Scoby-Smith. Mr. Percy Ashley, of the Board of Trade, and Mr. G. C. Upcott, of the Treasury, have been appointed secretaries to the Committee.

Who's Who.

Lord Balfour of Burleigh, who has had much experience as chairman of commissions, is one of the best-known Unionist Free-Traders. Some years ago he was Parliamentary Secretary to the Board of Trade. Mr. Arthur Balfour is the well-known ex-Master Cutler of Sheffield; Mr. Gosling is a member of the Port of London Authority, with special knowledge of Labour questions; Mr. Hewins, Unionist M.P. for Hereford, is an authority on economics, and secretary of the Tariff Commission; Mr. Illingworth, Liberal M.P. for the Heywood Division of Lancashire, is a prominent Bradford business man; Sir Joseph Maclay is a Glasgow shipowner; Sir Alfred Mond is managing director of Brunner, Mond, and Co., Ltd., and other companies, and treasurer of the Free Trade Union; Mr. Pease is a northern colliery owner; Mr. Prothero, Unionist M.P. for Oxford University, is the well-known authority on agriculture and food supply; Sir F. H. Smith is an indiarubber and cotton manufacturer and colliery director in North Wales; and Mr. Wardle is Labour member for Stockport and editor of the *Railway Review*. Sir Henry Birchenough is a director of the British South Africa Company, and served on the Commission on Shipping Rings; Lord Faringdon (formerly Sir Alexander Henderson) is chairman of the Great Central Railway, and became a member of the Tariff Commission in 1904; Sir Clarendon Hyde, formerly Liberal M.P. for Wednesbury, is chairman of the Cannock Chase Minimum Wage Board, and a partner in the firm of S. Pearson and Son (contractors); Sir Charles Parsons developed the steam turbine, and is chairman of the Parsons Marine Steam Turbine Company; Lord Rhondda, one of the New Year peers, is still better known as Mr. D. A. Thomas, managing director of the Cambrian Colliery Combine.

Business Names.

An important point has been made by the Select Committee of the House of Lords on the Registration of Firms Bill. The Committee say in their report that the title of the Bill should be "Registration of Business Names," as the Bill is not confined to trading firms, but includes professional partnerships.

The object of the Bill being to include not all partnerships, but only those where the style conceals the identity of the actual traders, the Committee think the most convenient limit would be expressed by requiring registration by all who do not use their true surnames to designate their business. It is very difficult to provide a means of enforcing registration which shall not be either ineffective or oppressive. The Committee propose that anyone coming within the Act who does not register shall be disabled from suing on a contract made while he is in default, but that the Court in proper cases shall be able to give relief from this disability.

The Committee express their strong opinion that the Bill would be of special value under the conditions both of the warfare now prevailing and of the state of things which may be expected to arise immediately afterwards. Events have shown how desirable it would have been to have had at the beginning of the war and still would be to have ready to hand such information as this Bill provides, and without entering upon any controversial matter relating to trade after the war, it may be generally accepted that the identity of those concerned with trade will be in the future an element of the greatest importance. The Committee accordingly venture to submit the Bill to the House as one which ought to be pressed forward without delay.

We hope to see this vital principle extended to the Oversea Dominions.

SILK PRODUCTION IN 1915.

The Union of the Raw Silk Merchants of Lyons has published provisional statistics for the production of raw silk throughout the world for the year 1915. The figures for the Levant and Central Asia are as follows:—

	Pounds.
Asiatic Turkey:—	
Anatolia	385,809
Syria and Cyprus	771,618
Other Provinces	143,300
European Turkey—Adrianople	66,138
Balkans—Bulgaria, Serbia, and Roumania	220,462
Greece, Salonika, and Crete	176,370
Caucasus	275,578
Turkestan and Central Asia (exports)	110,281
Persia (exports)	88,185
Total	2,237,691

The figures are much below those of the preceding year, but though the crops show a weakening tendency, the importance of the deficit is due only to the war.

COMPANY MEETINGS.

Union Fonciere d'Egypte.

At the postponed annual general meeting of the Union Foncière d'Egypte, held at Alexandria on June 15, the accounts for the year ended March 31, 1915, were approved. The report, which was also adopted, stated that the area of cotton cultivated during the past year by the company was 1,936 feddans, as compared with 2,669 feddans in the previous year. The total kantars were 2,590, as against 4,428 in the previous year. This represents a falling-off of one-third of a kantar to the feddan. This was due to the ravages of the worm. The decline in the returns has been particularly compensated by the rise in price, and the company's cotton this year has been sold at an average of PT468, while last year the average was PT262.2 mills. The past year's working closed with an actual loss of £E5,286.492 mills, which, with what remained over from the former year's working, brings the total to £E9,783.638 mills. The following is the profit and loss account to March 31 last:—

COMPANY NOTES.

Anchor Line (Henderson Bros.)

There is an increase of £16,262 in the net profits of the Anchor Line (Henderson Brothers) for the year ended April 30 last as compared with the previous twelve months, the amount being £323,539. The smallness of the increased profits is accounted for by the fact that provision is made for a special reserve for war taxation. Including £95,413 brought in the available balance is £418,952, and after writing off £128,699 for depreciation, against £125,867, and again placing £100,000 to the reserve account, it is proposed to pay a dividend on the ordinary shares of 10 per cent. and a bonus of 10 per cent., both tax free, carrying forward £107,606.

NOTES OF THE WEEK.

The most striking feature in the chronicle of events for the past week in the East is supplied by the Russians. Their recovery in Armenia, after having been forced back some distance for nearly two months, has been so complete that the Turks were unable to rally at any one point. Within three weeks after our Allies resumed the offensive Erzinjan has fallen. Although not a large town, it is the most important military depôt in this part of Asia Minor, and its capture completes the Russian conquest of Armenia. The failure of the Turks to offer a successful resistance at Erzinjan is eloquent of the extent to which their organisation has broken down. It would be of interest to know whether this collapse has been brought about by the inherent difficulties connected with long lines of communication or by the absence of the German support and supervision which were available on Gallipoli. To the north of Erzinjan the Russians have also made rapid progress. The whole road from Trebizond to Erzeroum is in their hands with the exception of a small stretch between Ardasa and Jevizlik, where the Turks, according to the latest report, were holding a high pass. But the advance of the Russians west and south-west of Trebizond should enable them to turn this position without much difficulty.

The Government has submitted to the House of Commons its proposals for the composition of the Special Commissions to carry out inquiries into the Mesopotamian campaign and the Dardanelles operations. For the former the names proposed are Lord George Hamilton (Chairman), Lord Donoughmore, Lord Hugh Cecil, M.P., Sir Archibald Williamson, M.P., and Mr. John Hodge, M.P.; for the latter, Lord Cromer (Chairman), Mr. Andrew Fisher (High Commissioner for Australia), Sir Thomas Mackenzie (High Commissioner for New Zealand), Sir Frederick Cawley, M.P., Mr. J. A. Clyde, M.P., and Mr. Stephen Gwynne, M.P. The composition of these Commissions it to be discussed in Committee. Mr. Asquith stated that the Government was quite willing to accept any proposal for strengthening them. It had, however, come to the conclusion, after careful consideration, that it would be more satisfactory to have neither naval nor military advisers on the Commissions.

Whether it will be the opinion of the House that the Commissions can be strengthened by the inclusion or substitution of other names remains to be seen. As they stand they will command general confidence, although it would be possible to suggest the names of many public men, whose services might equally well have been utilized. It is a matter for satisfaction that Lord Cromer should have felt himself able to stand the strain of such an investigation, and his presence on one Commission justifies the expectation that the labours of both—as there will necessarily be a healthy rivalry in this respect—will be carried out with thoroughness and despatch. It remains to add that the Government has promised that the scope of the inquiry shall include the question of the initiation of the campaigns. It welcomes as wide an inquiry as possible; but there will hardly be general agreement with the Prime Minister's contention that the Cabinet's responsibility is shared in part by members of the House of Commons as well.

There is little news from Persia apart from an occasional Turkish *communiqué*, which represents the Russians as falling back on Hamadan, both along the Kermanshah road and by a second route lying to the north. On the other hand, the tenour of private advices is satisfactory. The work which the India or British Government ought to have taken in hand at a much earlier stage in the war is now being carried out systematically. Sir Percy Sykes, who was last reported at Kerman, is engaged in organising a new gendarmerie, which with the help of other forces should before long be in a position to restore confidence and order in southern and south-eastern Persia. One point, we understand, that has given rise to some surprise is that the officers selected for the gendarmerie should in several cases be entirely devoid of Eastern experience. It is held that there must be many officers of the Indian Army who have not been able to leave for France or Mesopotamia, from whom a small selection might be made for gendarmerie purposes in Persia. Even if a knowledge of the Persian language is not considered an essential qualification, it is suggested that acquaintance with Eastern ways and traditions on the part of the officers under him must enable Sir Percy Sykes to bring his gendarmerie up to the requisite standard of efficiency more rapidly than if he has to rely upon officers who are now in the East for the first time in their lives.

This question of the selection of suitable officers for the new Persian Gendarmerie is one that the authorities concerned will do well to bear in mind. The greatest confidence is felt in Sir Percy Sykes, but he ought to be given the best support available in order that his mission may be assured of success. It is, of

▲

Digitized by Google

course, impossible to generalise on the subject. In this connection it is of interest to note the testimony to our new officials in Mesopotamia contributed by Lord Cromer on the strength of a communication "written from Mesopotamia by a well-known lady, who can speak with an almost unrivalled knowledge of Arabian affairs." In the letter, dated June 12, from which Lord Cromer quotes, is the following passage:—". . . and more interesting still is the new administration in the making, the wavering of sheikhs between the Turks and ourselves, and the complicated tribal politics which result. On the whole, I think we have done it wonderfully well; the actual administration is really almost beyond praise. I am lost in admiration of the young men I meet in high places, ruling a town, administering justice, learning Arabic so as to free themselves of interpreters, and showing a fine combination of patience and common sense." If the young men referred to are new to the East, there is no reason why a similar experiment should not be successful in Persia; if they have all had Eastern experience, there is no reason why the authorities should not exercise the same discretion in making their selections for the Persian Gendarmerie.

From the sudden silence of the German Press in regard to Persia and Afghanistan it has to be inferred that the Berlin authorities have realised that they have shot their bolt in that part of the world. It is, however, unkind of them not to display more interest in the German mission sent to Afghanistan for the purpose of stirring up the Afghans and creating trouble on the Indian frontier. The mission, there is every reason to believe, did its best; but found the Amir, we are glad to state, loyal to Great Britain. Consequently, it has decided that there is nothing to be achieved by staying on in Kabul, and it is now concerned in retracing its steps. It is reported to have started on its homeward journey more than a month ago. If the members should succeed in making their way across Persia the achievement would be a testimony to the power of German gold. But the situation in Persia has changed since they entered Afghanistan; there are fewer German agents at large, and a considerable distance will have to be covered before the mission can join hands with any Turkish troops.

It is to be hoped that the attention of the Allied Governments has been directed to the terms of the warrant issued by Field-Marshal von Weber, Military Governor-General of Montenegro, in connection with the flight of General Radomir Veshovitch. General Veshovitch is accused of having, in company with two of his brothers, assassinated the officer sent to acquaint him with the Austrian Government's decision that he must leave Montenegro and take up his residence in Austria. The warrant continues:—

> In view of this dastardly act, unworthy of an honourable man, I now make the following order:—If General Veshovitch and his two brothers do not voluntarily report themselves to some representative of the Imperial and Royal Military Authority within five days, his father and his third brother, who are in our hands, will suffer death on the gallows. . . . I am severely punishing the whole district of Kolasin, and especially the clan Vasoyevitch, for the crime committed by men from their midst.

If this version of the text of the warrant should prove correct, it is obvious that Field-Marshal von Weber comes within the undertaking given by the British Prime Minister that the Allied Governments will hold individually responsible those of the enemy who can be proved to have violated the canons of civilised warfare. If General Veshovitch has rendered himself amenable to Austro-Hungarian law, whether military or civil, he is doubtless prepared to answer for his acts, when captured. But that vengeance should be wreaked on a man's relations places the State which countenances such acts on the part of its high officials outside the pale of civilisation. If General Veshovitch's father should have been hanged, it will be in the interests of the hapless Montenegrins that the Russian Government should lose no time in announcing the penalty to be paid by Field-Marshal von Weber before peace is ratified with Austria-Hungary.

The Turkish garrison continues to hold out in Medina, but, up to the present, the Arab revolt has progressed without anything in the nature of a setback. On the occasion of a recent sortie from the town the Turks are said to have lost 2,500 men, the Arabs 500. The number of the Turkish casualties, if approximately accurate, points to Medina being strongly held, and there may be truth in the report that Enver's recent visit was connected with the strengthening of the garrison. Mention is now made of the advance of the forces of Said Idris. If these effect a junction with the Grand Shereef's armies before Turkish troops arrive on the scene, the Arab position will be considerably improved. So far, the only step that the Turkish Government is known to have taken to deal with the revolt is to announce the deposition of Grand Shereef Hussein Pasha and the appointment in his place of Ali Haidar Bey, Vice-President of the Turkish Senate. The latter was formally installed in his new office in Constantinople at the beginning of July. A few days earlier, it is learned from the German Press, the Turkish Embassy in Berlin had been at pains to deny "categorically" the statement in the Allied Press that there had been a revolt in the Hejaz.

In view of the climatic conditions at this time of the year in the greater part of the Near and Middle East the general lull in the operations, however unfortunate, is almost inevitable. Even the Turks have felt called upon to quote the temperature in Mesopotamia. On the other hand, they have despatched a force from El Arish, which is reported to be entrenching itself some five miles east of Katia. In spite of the successful air-raid on El Arish on June 18 the enemy is still able to send machines to the Canal. A number of these dropped bombs on Suez on July 20, causing a few casualties. Turkish air-raids are probably the only inconvenience the Egyptian population has suffered from the war. It would be more satisfactory, if it could be rendered immune even from these occasional visitations.

The dispassionate manner in which the attitude of Roumania is now discussed in the German Press is significant of a chastened frame of mind. Neutrality is still held to be the wisest course for the Roumanians to pursue in regard to a war which, we are asked to believe, is to end in a draw; but few, if any, of the German correspondents in Roumania seem confident that neutrality will be maintained until the end. Various versions of the negotiations between the Roumanian Government and the Allies are given. They agree in accepting a Roumanian leaning towards the Entente Powers, and differ only in respect of the alleged demands made by the Allies as a *quid pro quo* for the munitions for which Roumania must wait before she can join in the struggle. For the rest, they insist upon points to which attention has already been drawn in these columns, the difficulty Roumania will have in attacking the Austrians on the immediate frontier line, where the advantage of position is altogether in favour of the latter, and the natural anxiety of the Government to have the harvest gathered before hostilities begin. For these reasons the German correspondents, writing at the beginning of July, expected Roumania to announce her final decision in August.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 13.

The Kitchener Memorial.

The proposal to create a memorial to the late Lord Kitchener is steadily gaining ground, and subscriptions have already been offered in the provinces. The original idea in general favour was to erect a statue or statues, and, pending the raising of the requisite funds, to name certain streets after the celebrated Field-Marshal. The Alexandria Municipality at a recent sitting took a decision to this effect. Both these projects bid fair to be supplanted by something of a more practical nature. In the first place, there is very strong objection to the street-naming idea, for the simple reason that the character of districts in towns out here changes very quickly. We have no wish for a repetition of what has happened in Alexandria, where the street named after Gordon Pasha has become one of the most disreputable in the city. Secondly, the erection of statues in these circumstances in Western countries may be very desirable, but in a country situated as Egypt is it is sheer waste of money, which could be expended in a manner of more practical utility to the people. H.H. the Sultan has taken a most praiseworthy initiative in this respect. Through the medium of an interview with Dr. Sarruf, one of the proprietors of *Al Mokattam*, his Highness strongly deprecated the proposals made by the Alexandria Municipality. Egypt was still in a backward state as compared with other countries, and if the Egyptians wanted to create some permanent memorial to the men who had done so much for them, they could not do better than raise a subscription for the building of some useful institution, such as a maternity home, a first-aid hospital, or a lunatic asylum, none of which exist in Alexandria; or for the provision of training on an extensive scale of women doctors, who are sadly lacking in Egypt, and through whom coming generations would benefit morally and physically to a very great degree. His Highness added that he was all the more in favour of some such memorial, seeing that Lord Kitchener, if it had been possible to ascertain his views, would most certainly have declared against the statue idea and have pronounced himself in favour of a project of practical utility to the Egyptians, whose material welfare had always been his first consideration. This intervention on the part of Sultan Hussein, which will be applauded by all who know the circumstances of the country, serves but still further to prove what a practical-minded, enlightened Prince he is; and it is to be hoped that the committees that are being formed for the purpose of setting up memorials in various parts of the country will follow the excellent advice given them by their Sovereign, who with characteristic generosity has contributed £E500 towards the execution of any of the projects suggested by him.

The New Summary Military Court.

With regard to the new Summary Military Court, to which I referred last week, more information is now available as to its procedure and powers. Europeans are for the present not subject to the jurisdiction of the court, which will have power to inflict imprisonment, with or without hard labour, up to three months; whipping, up to twenty lashes; fines, up to £E10; police supervision, up to one year; or any combination of these penalties. Actual arrests will, as far as possible, not be made, offenders being served with summonses, and formalities of every description will be avoided so long as the liberty of the defence and the validity of the proceedings are not affected. The motive of the creation of the court is to deal with offences which, though not indictable under Egyptian civil law, have become so under martial law in virtue of the military proclamations, and its object is to assist and supplement the civil machinery in the maintenance of law and order and decency in Cairo. The court's fair but firm treatment of the cases already brought before it has not passed unnoticed amongst the masses, and, if the methods initiated are only persevered in, its operation should have an excellent deterrent effect.

That the martial law régime does on occasion materially assist the civil authorities, especially in a country situated as Egypt is, has been evident in the case of the liquor trade. In an admirable report on the work done during 1915, to which I hope on some subsequent occasion to do more justice than is possible within the limits of this letter, Mr. A. Lucas, Director of the Government Analytical Laboratory, clearly sets forth the serious abuses that were practised by the local trade to the detriment, moral as well as physical, of the great number of those who frequented the bars, cafés, and other establishments of the lower quarters. Prior to the war greater freedom was enjoyed in Egypt in regard to the manufacture and sale of alcoholic liquors than probably in any other country in the world, owing to the fact that the trade was largely in the hands of foreigners, and that the Capitulations prevented the Egyptian Government from adopting any satisfactory measures to control it. The declaration of martial law removed this obstacle, and a series of proclamations made by the General Officer Commanding the British Forces in Egypt, primarily for the protection of the troops, have given the civil authorities a more or less effective control over the Egyptian liquor trade. It is not contended that these proclamations have stopped all the former abuses, but the fact remains that they have conduced to a marked improvement in the quality of alcoholic liquors retailed in the lower quarters, and there can, therefore, be no doubt as to the assistance rendered by the martial law régime in this respect to the civil authorities.

The Egyptian Dispatches.

Great interest has naturally attached to the dispatches recently published in London from General Sir John Maxwell with regard to the defence of Egypt since the outbreak of war up to the date of his relinquishment of his post. It is noticeable that although the "recommendations" include a list of civil officials concerned in the administration of the country, and Sir John Maxwell was in supreme charge of that administration, nothing is said with regard to the various political events that have taken place here or the general state of the country during the eighteen months in question. There may, however, be very good reasons for this silence; so we must possess our souls in patience until the powers that be consider it opportune to publish the report that must undoubtedly have been written in this connection.

Attention must, however, be drawn to one point, because unwittingly an injustice is being done. General Maxwell made what is understood to be a departure from precedent by including in a military dispatch names of ladies who had rendered services worthy of mention in connection with the military and civil administrations. This was indeed a very graceful act on the part of the late G.O.C., and as such due recognition thereof is accorded to him. But his list is lamentably short, and is certainly quite incommensurate with the

work done by the women of Anglo-Egypt. No one wishes for one moment to detract from the merit of the ten ladies whose names are mentioned. Of one accord it is admitted that they have rendered very signal assistance. But at the same time so did many others, and a recital of the names of merely the more important of those omitted from the list would certainly indicate that sufficient care was not paid to the drawing up thereof. It is a thousand pities that this should have happened; for although those who so ungrudgingly gave of their services never did so with any *arrière pensée* that their action would cause their names to figure in official dispatches, nevertheless the fact that it should have been considered necessary to make such a list, and that it should have been so meagre, is bound to create unnecessary irritation and leave the impression that the services rendered by the ladies in question at a time when, it is no exaggeration to say, they saved the situation, have not been appreciated. I feel sure—in fact, I know—that Sir John Maxwell was fully alive to the valuable work done by the women of Anglo-Egypt, but the mere knowledge of that opinion cannot affect the unfortunate impression left by the careless editing of the list, and it is to be hoped that in the circumstances an early opportunity will be taken to put on record the great debt which the military administration owes to the women of Anglo-Egypt.

RAMADAN AT KHARTOUM.

Our Khartoum Correspondent writes, under date of June 30:—The new moon was duly observed, and procession made round the town with flags and drums to warn the Faithful that Ramadan had begun.

The weather has been the chief source of interest recently. Almost every day has had a dust storm, and there has been some rain. This brings a very welcome coolth, but disturbs the European colony by making the ground too soft for tennis or golf.

JUDICIAL REFORMS IN EGYPT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—My attention has been called to a letter in your issue of July 21 from Coles Pasha, late Inspector-General of Prisons in Egypt, concerning his own share in certain judicial reforms in that country. In this letter he charges me, hypothetically, with taking all the credit for a number of reforms for which he alone was responsible. I have hesitated to trouble you with an answer, since such personal matters can have but little interest for the public. Inasmuch, however, as his letter, if allowed to pass unchallenged, might give an entirely false impression to a number of people in Egypt and elsewhere who are unacquainted with the truth of these matters, it appears to me to call for a few words in reply. Coles Pasha is in such a hurry to attack me that he has not even waited to peruse my report—which is on sale to the public—in order to ascertain what I had really said before launching hypothetical charges against me. Had he done so he would have found that I have claimed no credit for anything, and that my account of legislation was a bare summary, giving the references to the Annual Reports for the full history of the inception of these measures. Coles Pasha undoubtedly took the initiative in several laws during his service in Egypt, and his action received due recognition in my Annual Reports at the time. When, however, he asserts that none of the laws about the various matters he enumerates (the more important of them being the work of the Penal Code Committee, with which he had nothing whatever to do) originated in the Ministry of Justice, that most of them were strongly opposed by that department, and that all of them were due to his own efforts, he is either himself guilty of "colossal effrontery," or is labouring under a profound and highly remarkable delusion.—I am, etc.,

MALCOLM MCILWRAITH.

Travellers' Club, Pall Mall, S.W.,
July 24, 1916.

Writing from Kordofan respecting the recent operations against the Sultan of Darfur, a Staff non-commissioned officer says: "By the acquisition of Darfur we have gained an exceedingly rich and fertile province, and one that is worth a thousand times more than all the trouble and expense we have been put to. The work had to be done, for the Sultan Ali was a menace to the whole Sudan, and now that all is over so much the better for Egypt and ourselves."

At the annual general meeting of the British Academy (held on the 14th inst.) Lord Bryce announced that the Academy had appointed a Committee to deal with the question of the transliteration into English of names and words in Russian and other Slavonic languages and in the languages of the Nearer East.

CYPRUS NOTES.

(FROM OUR OWN CORRESPONDENT.)

CYPRUS, July 10.

The Island and the War.

The successes on all fronts have given great satisfaction amongst all parties here. Among the Greeks interpreters are being engaged, and mules are being purchased at present by officers who have arrived recently. Native muleteers are being taken to look after them.

So far there have been no English visitors from Egypt or elsewhere. Few or any are likely to come from Egypt, partly owing to the difficulty which ladies would be likely to meet with in returning, the regulations not being relaxed. Nor is it likely that there will be many of other nationalities, so that the season is not likely to be a profitable one.

The Price of Blood.

An important decision of the Supreme Court respecting the pecuniary compensation which a person convicted of murder, or the village community to which he belongs, is liable to pay to the heirs of the victim has caused no little interest. The question arose out of a claim for £250 by the heirs of a peasant who was murdered by a fellow-villager. The District Court charged the properties of the perpetrator with payment of £180 as compensation. The Court of Appeal, confirming the decision, has further laid down certain principles for guidance, applicable to cases in which the murderer is not discovered.

If, *e.g.*, the murder is committed in the road or streets of a village the whole community is liable to pay the price of blood, just as it is (in accordance with a law passed since the British occupation) for malicious injury to property by a person or persons unknown. The amount of compensation is fixed according to all the circumstances, including age, of the victim. Justification for the decision that the village collectively should be held responsible is found in the practical certainty that in every case the victim cries out for help, and, the cry being heard, fellow-villagers, if they do their duty, could hardly fail to identify the criminal.

If the murder is committed inside a house, the occupiers, whether owners or tenants, are held liable. If the crime is committed outside a village, but within the lands of the community, or on forest land within a distance from which the human voice can be heard in the village, the entire community is similarly held responsible.

The carefully considered judgment, which deals at length with the whole subject, is of no little interest and importance, and may have very good results, as has been the case with the "Malicious Injury to Property Law." Murders are far too frequent in the island, and the payment of money is a consideration which weighs more strongly than any other with the Cypriot. In the case of premeditated crime, the knowledge of the prospect now made clear may have a deterrent effect. It is, at any rate, very satisfactory that details of this judgment should be published far and wide in the rural districts.

WATER COLOURS OF EGYPT.

Mr. Talbot Kelly, a collection of whose water colours of Egypt, together with a few oil paintings, are now on view at the Fine Art Society's Galleries in New Bond Street, is one of the few artists who are really capable of translating Egyptian scenes in terms of colour. A realist before all else, he brings to his work an imagination which gives it an infinite and, it may be added, an inimitable charm. The realism is always present, but it is coloured with just that flavour of romance necessary in a finished work.

The present exhibition contains a number of excellent examples of Mr. Talbot Kelly's style, notably 2—"Tombs of the Mameluks, from the Mokattam Hills," an exquisite study in grey tints, with a suspicion of colour in the group in the right foreground. The remarkable colour in this picture merits more than a cursory examination. Towards the horizon the grey takes on a purple hue, while above it is the bluish grey sky. Another kind of subject is presented in 4—"The Nile, near Toski," which is interesting for its curious colour contrasts. In the foreground the water is purple, and further back it changes by the reflection of the sunset to a light gold, and then to a light blue, fringed by the purple of the wooded shores, while above is a glorious sky effect with a crescent-shaped moon just visible.

As a study in clever shading, 7—"A Corner of Luxor Temple"—may be noted. There white and grey and purple stand out in strong contrast against a limitless blue sky. 9—"A Dust Storm at Assuan"—is an imaginative piece of work, notable for its fineness of perception. On the water in front lies a solitary dahabieh, and behind the rising shore wrapped in a gentle mist of purple. In 11—"Tel-el-Kebir"—an admirable representation of a desert scene, the sense of distance is indicated with pleasing effect. Of the remaining water-colours mention may be made of 19—"The Theban Hills, from Luxor"—an interesting river scene, with the grey and purple banks, faintly relieved with touches of green; 35—"Squally Weather at Beni Hassan"—a wonderful cloud effect; and 31—"The Desert by Night"—a fine night study, with the deep grey in front in striking contrast with the dark blue sky.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 4.

Government and Opposition.

The parties representing the Parliamentary Opposition cannot be accused on the whole of having placed many obstacles in the path of M. Bratiano during the time that the war has been in progress. They knew too well that the Prime Minister's duty was to view current events in an objective spirit, keeping in the background his national instincts as a Roumanian and suppressing any blind impulse to ill-considered action which, while doing him credit as a patriot, might compromise him as a statesman and cause him to fail in the great responsibility he bore towards the country.

Roumania's position as a small nation, without reserves and geographically separated from any friendly Power capable of supporting her in a war of long duration, was recognized by all parties to be most precarious, from whatever point of view matters were regarded. M. Bratiano's responsibilities demanded a clear head, a spirit of extreme prudence; while the fluctuating course of international events made a careful balancing of pros and cons imperative. Any serious action tending to dull the clearness of his vision or hamper his movements would have been indicative of a party spirit unworthy of the Opposition in such moments of national crisis. Then, too, is not the Sphinx-like reserve of a Bratiano calculated to inspire confidence among a quick-witted people to whom speech comes but too readily? However, silence maintained beyond a certain limit tends to become irksome, and the initial confidence is succeeded by distrust; and this is what seems to have occurred in the present instance. Moreover, there are questions connected with the internal administration which have given rise to discontent, matters relating to export and contraband which have been productive of general economic distress, and to which I have purposely avoided giving undue prominence in my letters. Conservatives will tell you that the toleration shown in regard to such practices has exceeded the limit of their patience; that the mal-administration has become a crying scandal; and that when a Government has shown such flagrant incapacity to maintain order within the frontiers it cannot claim a greater degree of confidence in its ability to direct with judgment the external affairs of the nation. Finally, we shall not be far out if we assume that recent military events have given an extra spurt to the agitation of the Nationalists, for there ever hovers above their heads, like the sword of Damocles, the harrowing concern lest the opportune moment should fail to be seized.

These are reasons why the third meeting organized by the Unionist Federation, which took place on Sunday, July 2, surpassed in magnitude all previous gatherings of this kind. The Dacia was as crowded as the proverbial tin of sardines, and thousands of people who could not find accommodation within the building occupied the passages, the courtyard, and the adjacent street. An imposing reception was given to Messrs. Michel Cantacuzène, Greceano, Argetoiano, and other members of the Federation, all staunch interventionists and Quadruplists, who denounced the Government's vacillating attitude in scathing terms.

The Fusion of Opposition Forces.

On the day preceding the date of the great assembly at the Dacia M. Take Jonescu delivered an address at the headquarters of the Conservative-Democrat Club, in which he stated that the fusion of the two Opposition parties was an accomplished fact, and that the resulting Conservative party would be directed conjointly by M. Filipesco and himself.

What is the real meaning of the fusion? The matter, as we understand it, is simple enough. The parties representing the Opposition have come to the conclusion that the greatest pressure must be brought to bear on M. Bratiano to determine him to take the necessary steps for the realization of the nation's legitimate claims and aspirations by an active support of the Allies. Failing this, they will forsake the more or less peaceful tactics pursued up to the present, and use their united forces for the purpose of overthrowing the Government.

BULGARIAN NOTES.

(From Our Correspondent.)

Bucharest, July 3.

Hun-Welcome Guests.

In order to give more *éclat* to the reception of its German guests the Bulgarian Government was obliged to invoke the aid of the Sofia schoolboys. And as it feared that the young scholars might not be sufficiently enthusiastic regarding the eleven German Deputies who were gracing the capital with their presence, special instructions were issued to them as to the interjections and exclamations to be employed on the appearance of the group representing the new and powerful "Ally" of their country. "The scholars," say the instructions issued to the boys, "will be arranged in rows on each side of the road, from the Sharénix Bridge to the Hotel Bulgaria. They must carry Bulgarian and German flags, must throw flowers at the guests, and shout "Hoch" and "Hurrah."

In spite of these instructions, however, the enthusiasm could only be kept slightly above zero by great efforts on the part of the authorities. The cheering was of the feeblest, and there is little doubt that the German deputies must have observed quite plainly that the excitement was forced and weak.

The most significant fixture in the programme for the reception of the German Deputies was undoubtedly the visit to the Pernik mine, where a luncheon was served. This mine was ceded to Germany some months before the commencement of the war, when the big loan was made to Bulgaria. It is, in German eyes, one of the most satisfactory proofs of Germany's hold on Bulgaria. The visit to the mine was no doubt regarded as an "appetiser" by the Germans, a foretaste of what is to come later as regards Bulgaria—if the Allies permit it.

Deserters' Stories.

Deserters from the Bulgarian Army continue to arrive daily in both Greece and Roumania; in the former country the rate is from six to thirty per day. All show signs of the miserable state in which the army in general now is, being almost in rags and uniformly thin, and all tell tales of acts of insubordination, and state that a spirit of revolt exists in nearly all quarters.

Except for the high commands, everybody seems sick of the war, if these men are to be believed, and an advance on the part of the Allies would be welcome, inasmuch as it would soon put an end to the war as far as Bulgaria is concerned. One deserter, an officer, states that King Ferdinand has not visited the front for months, for obvious reasons.

Queen Eleonore in Dresden.

Queen Eleonore has arrived at Dresden, where she intends remaining for two months, being greatly fatigued by her strenuous work among the wounded. It is, in fact, three years now since she last quitted Bulgaria, and she may be said to have been entirely occupied with her works of charity and benevolence during that time. It was principally due to Queen Eleonore's good offices that Lady Ralph Paget's unit received such good treatment.

IN BULGARIA: "OPPOSITION" AND THE GOVERNMENT.

Whatever may have been the case before the outbreak of hostilities, it is only too clear that to-day all parties in Bulgaria are in thorough sympathy with the Government of King Ferdinand, at least as regards matters connected with the war. We are able to give in this connection the plain statements, first, of an "Opposition" Bulgarian paper, and, secondly, of the Sofia correspondent of the Budapest paper, the *Pester Lloyd*.

The Gueshoff organ, *Mir*, in its issue of June 20, states:—"In Bulgaria the Opposition has proved itself equal to the situation. Ever since we have been at war the Opposition has never sought by any means to allege that the Government was asleep. It never did anything to weaken the spirit of the Bulgarian nation in arms. On the contrary, in everything connected with the war or that demanded the unity of the Bulgar nation, the Opposition avoided rupture with the Government, and gave it its wholehearted support."

The Sofia correspondent of the *Pester Lloyd* (June 22) reports as follows:—"I have had an opportunity of speaking to people in widely different circles in Bulgaria, about Macedonia and the opposition between Serbs and Bulgars on the Macedonian question. No matter what social stratum they occupy, no matter to what party they belong—whether they be Russophile or Russophobe by conviction or training—on the Macedonian question all are at one. From personal explanations I was able to convince myself that on the Macedonian question the Socialist leader holds the same opinions as the most devoted adherent to the Government party, and from no single Bulgarian scholar did I ever hear a different opinion expressed upon the Macedonian question than that held by the great mass of the nation."

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, July 6.

Postal communications between Turkey and Greece appear now to be entirely suspended.

It is reported that Mr. James Gatheral is also one of those who were arrested on June 6. They were eight in all, corresponding, it is said, to the number of Ottomans arrested by the British authorities at Mytilene, whose arrest appears to have been the cause of this reprisal at Constantinople. Mr. Scudamore has been exiled to Broussa, and his daughter (Phyllis) has been allowed to join him.

Constantinople appears to have come within the range of the great heat wave which has recently visited these parts, and it is reported that cholera is spreading there as well as in Smyrna.

The town is evidently more "Hunnish" than ever; the Turk appears to have no power or initiative, and the animosity between the Germans and the Turks increases rather than diminishes.

Munition-laden trains arrive daily at Constantinople, and men and material are hurried to Asia Minor. It is not yet known what effect the insurrection in Arabia had had on the Turks in Constantinople; but there is a rumour that Jemal has refused to take his army to fight against the Arabs. There are also rumours of air raids over Smyrna, with much loss of life and destruction of property, but it is impossible to learn what has really happened.

We are indebted to a correspondent for permission to publish the following extracts from letters received recently from Constantinople:—

". . . but as regards our property at Constantinople, that is quite a different story. ——'s house, as well as yours and mine, are only fit to be burned! —— has managed to save some of our furniture, and her house is packed from top to bottom with our belongings, but the houses themselves are worse than stables; they are full of sick—not only wounded, but sick with disease and vermin. Your kitchen is the operating-room; ——'s roof is the laundry for the bedding, on which stains of disease are visible. Of course, all his tiles are broken, and the rain pours into the house. Two-thirds of our fir trees are dead. The front of your house has the appearance of a bottle of ink or some dye having been spilled at a top window, and this the rain has carried in streaks all down the façade. Our piano went on a journey to ——, and then —— had it brought back to her, together with your grand, which had been made use of as a stand for medicine bottles and the like. The doors to our gardens are kept open all day long, and stray horses and cows are often to be seen grazing on what foliage there remains.

"——'s stamp collection is safe—at least, it was when —— left. Of course, even the furniture she has saved has suffered in the hasty moving, as it had to be carried off surreptitiously. The gas is kept burning in our houses all night; but as the mantles are all broken, the shades and chandeliers and ceilings have suffered in consequence. To cut this short, our houses are no longer habitable, but are only fit to be burned. God save the King and help the Allies! This is our share of trouble in the common cause; let us bear it bravely. We must hope that the Turks will be made to pay heavily for this in the end.

"As to our personnel: *à tout seigneur tout honneur!* Our cook has been disposing of my wife's dresses, and her worthy spouse, the gardener, of my clothes. After being kept on and fed for a year, this is their idea of gratitude.

"The cost of living is enormous. One can still find almost everything if one can pay the price. A pair of shoes costs £4. Bread is sold at 6, 8, and 10 piastres a loaf; lemons, 5 piastres each. A suit length of Anatolian cloth costs £4 wholesale without the tailoring. Misery all around, it is painful to see professional men, lawyers, architects, doctors, and ladies begging for food to eat and living on charity!"

According to a telegram from Berlin the participation of Turkish troops in the fighting against the Russians in Galicia may shortly be expected. The telegram adds:—"This fact proves the military preparedness of Turkey and the uniformity of the battle front of the Central Powers."

The Turkish Red Crescent, in reply to the protest lodged by the Russian Red Cross against the torpedoing of the hospital ship "Vperiode" in the Black Sea, states that it was unable to find the "Vperiode" in the list of registered hospital ships. The Russian Red Cross has replied giving the date on which the vessel was registered.

A message from Athens to the Paris *Journal* states that M. Zaimis has asked Germany to intervene at Sofia to put an end to the doings of the Bulgar *komitajis* on the Greek frontier.

It has been arranged to hold a meeting of the British community in Cairo on the occasion of the second anniversary of the war, at which a resolution affirming determination to carry on the war to a successful conclusion will be moved.

THE "YOUNG TURKS" AND ISLAM.

A correspondent in Cairo sends us the following translation of an article which appeared recently in *Al Mokattam* under the title "The Atrocities of the Turkish Government and its Unlawful Conduct in this War." The article is said to have been written by one of the Moslem Ulema:—

It seems to be generally believed by the majority of people, Moslems, Christians, and Jews, that the Turkish Government is a Moslem Government. It is, however, our bounden duty, according to the *Sheriat*, to expose this error and destroy this belief.

Islam rests on five fundamental conditions and rules, without which it cannot stand, and which are elementary knowledge to those who are at all conversant with the books of Moslem law. Now, the persons holding the reins of the present Turkish Government possess few or none of these essential qualifications, and certainly not the first, which indeed underlies the other conditions and constitutes the vital constituent thereof, viz., belief in Allah and His Angels and His Holy Books and Prophets. We, the Believers, find them [the present Turkish Government] devoid of Faith. For have they not openly declared in their books, and confirmed it by word and deed, that Islam has been harmful to them, and the cause of their retrogression; that (supreme blasphemy) it has been a great calamity to them? It is notorious that their governors in Yemen and Syria neither pray nor fast, nor perform the sacred duties of pilgrimage and almsgiving; but rather drink wine in the day and during the holy month of Ramadan. All this is directly contrary to Islam, by the unanimous judgment of the nation and by the Book and the *Sunna*. They have no notion of the great precepts enjoined by the *Sheriat*, such as the ordering of good and the forbidding of evil, and the maintenance of justice. In short, they ignore the fundamental principles of Islam, both religious and moral, lacking the veneration due to the exalted position of the Prophet and his *Suhaba*. Have we not heard with our own ears, and read with our own eyes, how they, in 1330 [A.H.] delegated to Medina their philosopher and great writer, known as the Akshoura, who on his return started preaching to the people in Syria, saying that the existence of the Prophet and of his Tomb in Medina is a fiction, that there is no proof of the existence of that God whom they worship, and that the Arabs are a people ruled by empty dreams and superstitions, and such like preachings, calculated to mislead and poison the minds of the young? Some of them have gone so far as to recommend the effacing of the names of the first four Khalifs, Abu Bekr, Omar, Othman, and Ali, from the pillars of their mosques, and the replacing thereof by great Turkish names for the perpetuation of their memory, as representatives of a young and vigorous race that has come to supersede the effete Arab race. Thus do they cast derision on the four great Khalifs who consolidated the foundations of our faith and work, and upheld Allah and His Prophet, by offering all their possessions and their very selves for that noble cause.

Furthermore, their disdain of the Arabic tongue, and their systematic efforts for the suppression thereof in their books and schools and official correspondence, all this is a patent act of hostility. Besides, Islam without the Arabic tongue is an unthinkable proposition.

As to their acts in connection with this war, they are again directly contrary to the *Sheriat*, and essentially anti-Moslem. Witness the fact of their throwing themselves and the country into the arms of Germany without consulting the leading heads of the Moslem world, such as the Shereef of Mecca and other notable chieftains and Ulema, and their audacious attempt at consecrating such an act by the pretended application thereto of the *Sheriat*. What rules of the *Sheriat* can they invoke to justify their despotic actions in regard to Moslem families whom they dispossessed of all their belongings and whose men they enrolled by force for the attainment of the aims of Germany, who proved to be the enemy of Islam and the Moslems by their declarations and deeds, as has been officially confirmed and clearly seen by us of late? Indeed, far from Germany being the defender of Islam, it has been the cause of its misfortunes.

Among their most unlawful acts is their expulsion of Moslem women. The Moslem law ordains the punishment of women, when convicted of an unlawful act, at the place where it is committed, thus differentiating between the case of man and woman, even where the offence committed is the same. But when, as in the present case, the women are innocent and yet treated thus, the persons committing this act against them are deserving not only of contempt, but also of curses. These Moslem women had interfered in no way in this war or in politics in general; and no real Moslem can refrain from condemning the Turks in the strongest terms for their mean and unlawful conduct towards them, or from expressing his wonder at their impiety reaching such a degree of disregard for the Sacred Law.

We have just learned, through their papers, that their commander-in-chief in Syria has expelled hundreds of families from Syria to the interior of Turkey for acts for which the women are in no way responsible, and which are supposed to have been committed by their husbands or sons. Such an act is foreign to Islam and true Moslems, and the original author of it can only be Germany. Moslems cannot admit of a Moslem government being under the direction of such a Power as Germany, as this is clearly contrary to law.

NEAR EAST BOOKSHELF.

THE TURCO-PERSIAN FRONTIER.*

Two years ago the Turco-Persian frontier would have seemed very remote from everyday life in Great Britain. Students of foreign affairs would have known of it vaguely as a fruitful source of international trouble; if they had been particularly well posted in contemporary history they would have recalled that at that very moment a Joint Commission of representatives of Turkey, Persia, Russia, and Great Britain was engaged in delimiting the frontier. To-day no one would be willing to confess that this part of the world had no interest for him. True, the actual *tracé* of the frontier may seem at this moment a matter of minor concern; but public attention has been strongly attracted to the Middle East, and a book which adds to our knowledge of its topography and of its inhabitants is assured of a welcome. Mr. G. E. Hubbard was Secretary to the British delegation of the Commission of Delimitation, and in these pages he records his personal experiences and impressions of the people and countries through which he passed. Politics, he tells us, have been eschewed; but in the circumstances they can hardly be considered a loss. The story of Great Britain's connection with Mesopotamia is told succinctly, and to this chapter the average reader will turn with particular interest. For the rest, Mr. Hubbard deals with country which witnessed the landing and early progress of Indian Expeditionary Force D., is the scene of the swaying battle-front between Baghdad and Kermanshah, and was the ground over which the Turks started their massacres of the Armenian population on the occasion of their first raid into Persian territory.

Fate, the author reminds us in connection with the delimitation of the Turco-Persian frontier, has contrived to stage this particular scrap of history in her most dramatic style by arranging a "curtain" for each one of the three principal acts in the shape of a European war—the Crimean, the Russo-Turkish, and, lastly, the Armageddon of to-day. Unless we are mistaken, she has reserved her worst tricks for the last. For seventy years this frontier has been the subject of diplomatic *pourparlers*, special delimitation commissions, and international conferences; but when, for the first time, the demarcation has been invested with an appearance of finality, Fate steps in and promises to make the whole business a labour of supererogation. The future of the Middle East is for the moment uncertain. It may, however, be taken for granted that the Turco-Persian frontier, so carefully marked out by this last Delimitation Commission as the result of ten months' work, is already consigned to the melting-pot. Some, perhaps many, of its boundary stones may still be utilised; but that they will indicate the division between Turkish and Persian territory the whole length of their 1,180 miles is by no means likely.

A chapter devoted to the history of the Kurds introduces the reader to the customs and character of these tribesmen in the intervals of their less reputable pursuits. The author sums up the Kurd as a loyal clansman, a pretty fair rogue, and a born fighter. His rôle as Turkish butcher cannot be denied; but, as he has to be dealt with in the near future, and persuaded into better ways, it is as well that we should try to discover his good points. It was unfortunately the marauding tendency of the Kurd which brought the author's connection with the Commission to a sudden end before Mt. Ararat was reached. With four others he was shooting partridges within a mile or two of camp, when the party was attacked by local tribesmen, and Mr. Hubbard was wounded. The injury necessitated his removal to civilisation as rapidly as could be arranged, and for this reason he was not present at the ceremony which recorded the end of the Commission's labours—the construction of an unobtrusive stone pillar beneath the shadow of the 17,000-ft. peak.

Mr. Hubbard relates his experiences simply, but picturesquely. He has filled out his narrative with references to other authors, and the whole makes an interesting book, which may be commended to those who wish to know something of the Middle East. The volume contains a large number of excellent photographs.

BOOK NOTES.

In "Le Déclin de l'Hellenisme" MM. Louis Paul Alaux and Réné Puaux endeavour to show that Hellenism is dying, if not already dead, as a result of recent events. The book is published in Paris (Payot, 106, Boulevard St. Germain) at 2 fr. 50 c.

The Armenian atrocities and the causes that led up to them are described in Part 101 of "*The Times* History and Encyclopædia of the War," which contains a special map of Eastern Turkey in Asia and a number of photographs of refugees.

"From Dartmouth to the Dardanelles," which is published by Mr. Heinemann (1s. net), is the "log" of a midshipman in one of our warships which was lost in the Dardanelles. It is edited by the author's mother, who has, however, left his own words for the greater part, and wisely so, since he writes with great vividness and no little skill.

M. Nijhoff, The Hague, has published "Assyrian Sculptures: Palace of Sinacherib," by the Rev. A. Paterson.

Professor Pavlé Popovic's interesting letter on "Serbian Macedonia," which was published in this journal last autumn, has now been reprinted in pamphlet form, and Mr. A. H. E. Taylor has provided a short preface. The price of the pamphlet is 3d., and should any difficulty be experienced in obtaining copies they can be had from THE NEAR EAST Offices.

"The Story of a Red Cross Unit in Serbia," by James Berry, F. May Dickinson Berry, W. Lyon Blease, and others, was published yesterday by Mr. Churchill. The price is 6s.

Behold the Woman! By T. Everett Harré. (Lippincott. 6s.)

SUFISM AND MOHAMMEDAN EVOLUTION.

At the lecture given by Mr. Alexander Sefi at Count Zogheb's house in Bruton Street on Saturday, it was refreshing to listen to words of love for God and for His creation, and to the sweet Sufi poetry, in the midst of the strife and struggle of the present more than Titanic war.

The lesson which the lecturer sought to convey was that Sufism, taking its origin in Arabia, was the best antidote to the prevailing fanaticism and ignorance in the Mohammedan world, as it was the best subjective philosophy that the world has known. Sufism, however, in its full sense could never be mastered except with full learning and deep meditation, which will ever be denied to the great masses necessarily engaged in their daily round of worldly pursuits. A small part of it nevertheless would suffice to give the masses that sense of happiness which is desirable and felt by anyone who feels himself to be at peace with himself and his neighbour. In the lecturer's opinion Sufism derived its inspiration from men like Cus ben Saidat, Bishop of Nejran, and consequently was nothing more than the Islamic name for the Christian aspirations of saintly lives as lived of old in monasteries and hermitages. He is opposed to prevailing notions about it, that it is Pantheism or that it teaches what certain Mohammedans believe, the dogma of "Helul." He views it simply as no new dogma, but purely a subjective, elevating feeling applicable to all thoughtful and religiously inclined people of all creeds. With Sufism there could be no massacres, murders, or any base action or intention; while theological problems are all talked of or looked upon with the utmost kindness and respect to individual thought.

Mr. Sefi translated a few lines from the great Syrian Sufi poet, Sheik Omar El-Farid, giving the basis of Sufism, and showing the beauty of Arabian poetry, but space will not allow us to do more than express regret to have no opportunity of hearing and knowing more of that spirit so dear to humanists, as it is helpful to our Eastern and Western every-day folks, especially as Sufism urges utmost industry in all life's walks, and proscribes neither harmless pleasure nor the just redistribution of crime.

A RARE M.S.

"Slavonic scholars and others interested in Serbia will be glad to learn that the famous 'Gospel of Miroslav,' which is the oldest ecclesiastical document extant in the Serbian language, but which had been missing since 1903, has turned up at Corfu," writes the Rome correspondent of the *Morning Post*. "This book of the Gospels, which was written in Cyrillic characters for Miroslav, Prince of Zachlumia (the present Horzegovina), and brother of the famous Serbian ruler Stephen Nemanja, about the year 1180, was one of the treasures of the Serbian Monastery of Chilandar, on Mount Athos. When the late King Alexander of Serbia visited the monastery in 1896 the monks made him a present of this precious codex, and in the following year it was phototyped by Ljubomir Stojanovich, and published at Vienna. It disappeared from the Palace at Belgrade during the revolution of 1903, but information now reaches me that it has been found in Corfu, whither it must have been brought by one of the Serbian refugees."

THE PRESS ON THE NEAR EAST

The Armenian Tragedy.

On Tuesday *The Times* published a leading article entitled "Nemesis in Armenia." The ruthless massacre of the Armenians was, says the writer, "no spontaneous outburst of fanaticism or of race hatred"—

It was a deliberate attempt, organized from Constantinople and executed with the help of German officers, to realize the "Pan-Turanian idea" in the form of a scheme suggested by a German writer, Dr. Rohrbach. The scheme involved the "removal" of the Armenian population that separated the Turks in the heart of the Anatolian Peninsula from the other Turkish-speaking populations in North-Western Persia and Russian Caucasia. The original "Pan-Turanian idea" is believed to have been extracted from a notable "Introduction à l'Histoire de l'Asie," published twenty-two years ago in Paris by an eminent Franco-Jewish Orientalist, M. Léon Cahun, whose record of the aims and exploits of Jenghiz Khan fired the imagination of Young Turkish fanatics like Dr. Nazim and others. Its practical application has resulted in the massacre of hundreds of thousands of innocent people under Turco-German auspices. In his analysis of Turkish characteristics M. Cahun placed foremost that of blind obedience to orders. When the Turk is told to behave himself he obeys; when he is told to torture and massacre, he tortures and massacres.

Apropos of the same subject, in the course of an article entitled "Germany's Blackest Crime," which is "written upon information supplied from entirely reliable sources, by those who have recently returned from Turkey," the *Christian* asks:—

Why did a prominent German officer in Constantinople recently tap his fez significantly, and say: "We wear the Turkish fez, and it is to our advantage to make those who wear the fez hate those who wear the hat"? Why was it that, toward the end of last year, at a meeting of the leaders of the Union and Progress Party in the Turkish capital, the Germans tried to exact from them a written official statement that their hands were free of blood in all this devil's business, and the Turks laughed in their faces and refused to give it to them?

The answer to these queries was given recently to an American missionary on his journey from the interior to Constantinople, by a German officer with whom he conversed: "Yes; it is wretched, wretched business, the worst I have ever looked upon. It is simply unspeakable, barbaric, but"—and this Teuton spoke true to the ideal of his Fatherland, as that ideal has been instilled into the German mind from Potsdam—"to interfere would stand in the way of our reaching our military goal." That is why Germany did nothing and said nothing to restrain the blood-lust of the half-civilised Turk. It might have interfered with reaching her military goal!

"Union" and "Progress."

Under the titles, "La Fin d'un Peuple" and "Les Caravanes de la Mort," *Le Messager d'Athènes* publishes (July 2 and July 4) articles which give a truly harrowing picture of the massacres of the Armenians at Trebizond and on the Euphrates. At Trebizond, we are told definitely, three individuals—a Turk *and two Germans*—organised the massacres, and must bear the chief responsibility for them. The names of these three are given as: Irail Bey, President of the Union and Progress Party at Trebizond; the German artillery officer, Schtange, and the German Consul at Tiflis, who is named Schallenberg. The first article concludes:—

Parmi la horde sauvage des massacreurs, les "tchetas," les gendarmes et les Turcs Deunmés se distinguèrent par leur férocité.

Les horreurs commises furent telles qu'elles indignèrent et terrifièrent la majorité de la population musulmane qui s'efforça, au moins pendant les premiers jours, de sauver quelques victimes. Un Turc, Echadir Oglou, tenta même de s'opposer, les armes à la main, aux tueries, mais il fut tué dans les montagnes avec quelques Arméniens des villages environnants qui s'étaient joints à lui.

A Trébizonde, l'œuvre d'extermination a été complète. Sur les 14,000 Arméniens qui habitaient la ville, il ne reste plus aujourd'hui que "deux familles" et "quatorze femmes" isolées qui, grâce à la protection de Grecs, ont réussi à échapper à la férocité turque. En outre, selon l'opinion du consul américain, on pourrait espérer retrouver dans les villages environnants quelques centaines de petits enfants arméniens.

The "Young Turks" and the Germans are surely running up an account which it should be the duty of the civilised world to see that they pay to the uttermost farthing.

"Audi Alteram Partem."

The following passage is taken from a leading article ("The Supreme Decision") in the *Morning Post* of Monday:—

Wherever the war is being decided it is not in Mesopotamia, and the more we consider that adventure the more we regret the wild and amateur strategy which led us into such places as the Tigris Valley and the Gallipoli Peninsula. It is easy to see now how valuable that hundred thousand men we lost in Gallipoli would have been on the Western Front, where men have to fight not with disease and sunstroke and Turks, but with Germans and Germans alone. They are the enemy, and against them our blows should have been directed from the first. When, for example, Lord Crewe argues that our prestige in the Persian Gulf is important he forgets that Baghdad is a very long way from the Gulf. Certainly no prestige is to be gained from an inadequate attempt with an ill-equipped force at an eccentric objective. This is perfectly true, but the harm done, in our opinion, has come from not making an adequate attempt to reach Baghdad with a well-equipped force. Geographically Baghdad is a long way from the Gulf, but its political fortunes are bound up with those of the Gulf. Our contemporary, however, concludes its article with the expression of an opinion—apropos of the Mesopotamia Inquiry—with which we are in entire accord:—

We trust also that Parliament will see to it that a Committee is appointed which will be both fearless and impartial. We do not want another Marconi Committee when the lives of our soldiers, and not merely the reputations of our politicians, are at stake.

The Wolf and the Lamb.

The Balkans bulk large in "The Little Nations and the War," an interesting article which Mr. E. Bruce Mitford contributes to the current *Fortnightly*. "The Imperialists of Potsdam," says the writer, "looked to achieve the Germanisation—piecemeal, and without a world-war if possible, but with one if necessary—of all the little States, both on the north and on the south of the Germanic Empire." And he continues:—

Had there been no British Fleet invincible there can be no doubt as to the direction in which the imprisoned soul of *Kultur* would first have sought relief. As it was, the call of the East prevailed. And not without reason. *Drang nach Osten* opened to the Pan-German mind a vista of splendid possibilities. The Turk was not only valuable as an ally, but as a testator. In the taking up of his estate no more serious opposition need be looked for than the passive resistance of a party-logged administration in Britain. Already Asia Minor was as good as German. Beyond lay the wide plains of Mesopotamia; Syria, Egypt—Persia, too, perhaps, and the rich gateway of the Indies; nay, all the vast spaces of the Middle East waited but the waving of the Hohenzollern wand to bloom again as a Greater Germany. . . . In pursuit, then, of that universal dominion hypocritically described by German publicists as "a place in the sun," the Teutonic plan was, in the first instance, to take the line of least resistance. It was more prudent, and the *milieu* favoured. Out of the troubled waters of the Nearer East he would be a poor Chancellor who—without unduly stirring them—could fail to catch some fish.

Egged on by Germany, "the Hapsburgs soon became as wolfish in their dealings with the Balkan peoples as any Hohenzollern could wish"; and though the result of the first Balkan War and the rise of the Balkan League imposed a check on the Teutonic designs, it was only for a moment. "A few months later the assassination of the Archduke Ferdinand—as the result of a plot hatched not a hundred miles from Berlin, to remove all possibility of danger from the Heir Apparent's pro-Slav proclivities—furnished an unexceptionable pretext and set the ship of *Welt-politik* fairly on her blood-course." The only thing to save the situation in the Near East, the writer holds, would have been the restoration of the Balkan League. That might have seemed impossible, but he believes that "prompt action on the part of the Entente would have made it possible." He continues:—

In the interests of the States themselves it was the appropriate reply to the Pan-German "*divide et impera*." Bulgaria, still smarting under the rebuffs embodied in the Treaty of Bucharest, was the sole obstacle. But the policy of Bulgaria was one of unblushing opportunism. What, indeed, could be expected from the statesmen who had initiated the system of brigandage in Macedonia for the express purpose of aggrandisement at their neighbour's expense, who fell treacherously upon their allies in the dark, who turned their backs upon their liberator, Russia? Bulgaria was out for the highest bidder. So keen was the competition to secure her war-services that that small State, with armed forces not exceeding a quarter of a million men, conceived herself to hold in her hands the balance of power in Europe. The only way to bring her over to the side of the Entente was to convince her that we could "deliver the goods."

But our Foreign Office—ever in the world but not of it—merely sought to heap Macedonian coals of fire—at the expense of our Allies—on the head of "the spoilt child of the Balkans," while the fox-Tsar bargained with Berlin the price of betrayal.

Sins of Omission.

But it is not the Allies alone who have lost opportunities in the Near East, says Mr. Mitford.

Greece, like Bulgaria, by proving false to her past, has marred her future. . . . Yesterday an empire awaited her in Asia Minor—a Greater Greece, where four millions of people of Greek descent look for their deliverance from Turkish misrule. As that is an empire which the Pan-German has ear-marked for himself, the course for Greece to take was obvious. She chose, instead, a shameful neutrality. Greece, the child of Freedom, stood by while her Ally was butchered to make a German road; and, as many an unborn Greek will painfully reflect, the Empire that might have been was lost through a woman—consort of a pro-German King, kinswoman of the Hun.

The Allies themselves, however, "are not without sin" in the tragedy of Serbia's destruction. Had they acted more promptly in regard to sending troops to Salonika, had they cut the Central Empires off from their Turkish Ally, there would, perhaps, have been a different tale to tell.

The Situation at Salonica.

Writing in the *Field* (July 22) on "The Present Situation at Salonica," Mr. H. Charles Woods remarks:—

Whilst it may be logical to say that the Allies were either right or wrong originally to send an expeditionary force to Macedonia, that in the former case we ought at once to push forward our attack, cost what it may, and that in the latter we ought now to withdraw altogether, there may well have actually arisen a situation in which we are proved to have made an initial mistake, but that situation may not be such as to justify us at present in retiring from this theatre of war. But if this be so, and personally I think that it is so, it would obviously render a complicated position worse confounded to endeavour to insist that because we happen to be at Salonica the Allied forces based upon that town should immediately do something to justify their presence there, and that they must at once undertake a far-reaching offensive in order to conform to the movements in progress in other theatres of war.

During the first stage of the Salonica campaign—that is, so long as the Allies were endeavouring directly to prevent the subjugation of Serbia—we were compelled to conform to the enemy's movements. Since then, however, and particularly since we have turned Salonica into one vast fortified camp, the conditions have been entirely reversed. We can move or we can refuse to move, and in the former case we can choose the most expeditious moment for the making of our "push."

He also points out that

Outside the Balkans the Central Powers have a military advantage in that the Kaiser's General Staff is in a position to control the nature of the enemy's plan of campaign, and in that the interests of Germany and of her Austrian ally are in the main common. In the Near East, however, the situation is quite the opposite. Whatever she does elsewhere, Germany must here angle for the whole-hearted support of Bulgaria and of Turkey—countries which were led to go to war not really for Germany, but for more local reasons. She (Germany) cannot therefore sanction the inauguration of any policy which might still further alienate public opinion in these countries, or which might bring their interests into open opposition to one another or to those of Austria.

And he concludes that, "so far as the Balkans are concerned, the aspirations of the Germanic Powers and of their Allies are so conflicting and the situation is so complicated, that, left to themselves, friction and internal trouble are almost sure to arise—friction and trouble the favourable meaning and results of which for the Allies it is obviously impossible to discuss here."

The "Hajj Railway."

The following passage is taken from an interesting article, "The 'Pilgrimage Railway,'" contributed to *Chambers's Journal* (July) by A. Hilliard Atteridge:—

The line is officially known as the Hedjaz Railway, but it is sometimes called the "Hajj Railway"—that is, the "Pilgrimage Line." The work of constructing it was begun in 1901. I have seen it stated that the construction was proposed under German influence at Constantinople, and the work carried out by German engineers. But I doubt if this is true. Indeed, I suspect that this theory of its origin is an afterthought, prompted by the fact that the line has lately proved useful for the movement of Turkish troops from Damascus to the eastern edge of the Sinai desert, in connection with the German projects for an invasion of Egypt. I believe that, as a matter of fact, the only foreign engineers employed in the construction of the railway were Italians. Military labour was largely used, detachments of the Damascus army corps being employed in making the cuttings and embankments, and generally preparing the road-bed for the track. This made the work very economical, as the soldiers were given only a small addition to their ordinary pay. It is very likely that this economic method of construction was suggested by the fact that, a few years before, Lord Kitchener had used the same method in the laying of the Soudan Railway. Indeed, it is not improbable that the successful construction of the Sirdar's railway across the deserts of the Upper Nile suggested the making of the Hedjaz line.

An Eastern Poe.

The current issue of the *Asiatic Review* contains a short story by the famous Armenian writer Raffi, translated by "Varténie." It is a grimly fascinating tale, the scene of which is laid at Bibi Sharabani, "a cemetery surrounded on all sides by high walls, which still exists not very far from Teheran, amongst the ruins of the old town of Ray." Here is the description of this spot, as given in the opening passages of the tale:—

A lonely road, leading in a south-easterly direction from Teheran, brings the traveller to a desert place, where he will notice a large enclosure surrounded by high walls. One who is accustomed to seeing Asiatic towns will at once take it for an enchanted city swallowed up in its ramparts—only the walls are to be seen—not even a minaret or a tower is visible from the outside. But where is the entrance?

This enchanted city has no gate either.

The stories told about it by old people in Persia are fabulous. They say that inside those walls, so calm and silent in the daytime, fearful sounds are to be heard at night; that myriads of ghosts then hover about the ramparts; that they never wander far away, but cluster near the walls, where they keep their fiendish revels. But when the dawn approaches everything melts away, stillness reigns, and the silent ramparts are again painted out upon the desert in their gigantic stretches. The superstitious Persian never approaches these walls, and even in broad daylight there is no trace of any human being to be seen there. Only the great vulture hovers above, describing various curves and circles in the air; you might almost take him for one of the ghosts that are said to haunt the place.

The story itself is not unworthy to rank with Poe's efforts of the imagination, but it is distinctly Oriental in its style and its details. As an editorial note says, it is a good example of Raffi's short stories, "combining as it does imaginative qualities with the terrible facts of everyday life as he knew it."

In Crete.

A delightful article in the July *Blackwood* is "A Greek Island," by "G. E. H." Not the least interesting part of it is that devoted to Cretan antiquities, in the course of which the writer pays a well-merited tribute to Sir Arthur Evans for his judicious work of restoration of the palace of Minos; and draws a comparison between the antiquities of Egypt, Greece, and the island. This, however, must be read in the original to be justly appreciated. Here is a telling little bit about the intense independence of the modern Cretan:—

The one-ox threshing floor is a feature . . . which is particularly typical of Crete. Co-operation is quite unknown in the island, and independence is exalted almost to a vice, so that a man will rather have the tiniest threshing-floor of his own than combine with his neighbour for their mutual benefit. A Cretan once quoted to me a local proverb to illustrate this point. It ran thus: "To every Cretan his own olive-tree—be it only to hang himself from!"

And here is a pleasing note reminding us of the Venetian occupation:—

The Venetians, who possessed Crete in the Middle Ages, were solid builders, and the walls with which they surrounded the three small cities of their island dominion were of such massive proportions and excellent workmanship that the combined ravages of the Turk and time have done but little to deface them. The lion of their patron Apostle, which so invariably betrays Venetian handiwork, still stands watch above the gateways and on the bastions of the great harbour walls. Walking along the quayside at Canea you come upon a row of some half-a-dozen long, narrow buildings, which serve nowadays as the Customs warehouse, and are crowded with casks and bales. They were originally the old Venetian galley-sheds, and one can form an interesting idea, by studying their shape, of the curious long proportions of war-vessels of that day—they were certainly *longæ naves* with a vengeance! In the days when the galley-sheds and the harbour walls were built, the Mediterranean, of course, teemed with pirates, and the fortified Cretan ports must have spelt safety to many a flying merchantman hard pressed by Barbarossa's corsairs.

Articles to Note.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. July	1916. July.		1334. Ramadan	5676. Tamuz
28	15	Friday	27	27
29	16	Saturday.....	28	28
30	17	Sunday	29	29 Ab.
31 Aug.	18	Monday	30 Shawwal	1
1	19	Tuesday	1	2
2	20	Wednesday	2	3
3	21	Thursday	3	4

Wednesday is the birthday of H.R.H. Prince Alexander of Greece, who was born at Talji in 1893, and is the second son of King Constantine.

Prince George, who for some time has been at school at St. Peter's Court, Broadstairs, has passed the qualifying literary examination for a naval cadetship, and will enter the Royal Naval College, Osborne, in September.

The Countess of Cromer left London on Wednesday for Scotland.

M. Pashitch, the Serbian Prime Minister, arrived at Corfu on Sunday from Rome, accompanied by M. Jovan Jovanovitch, Minister Plenipotentiary.

Prince Cantacuzene of Roumania left London for Ireland on Tuesday.

Lady Maxwell is progressing very favourably, and hopes soon to go to Ireland.

H.E. the Hellenic Minister was received by the Marquess of Crewe, Acting Foreign Secretary, at the Foreign Office on Wednesday.

Madame Také Jonescu is now at Sinaia.

Mme. Boerescu, the wife of the late Roumanian Minister for Foreign Affairs, is spending the summer at Sinaia.

M. Alexis Catargi, of the Roumanian Legation in Paris, has taken a house for the summer at Weybridge.

It is expected that Sir Murdoch MacDonald, Under-Secretary of State for the Egyptian Ministry of Public Works, will arrive in this country on leave shortly.

M. A. S. Levitch, the Director-General of the Serbian Ministry of Finance, who is now in London, will visit Paris prior to returning to Corfu.

Madame Criezis, the wife of Captain A. Criezis, Naval Attaché to the Greek Legation in London, has left with her daughter for Athens.

Colonel Lazar Guentchitch, Chief of the Medical Department of the Serbian Military Headquarter Staff, has left for Salonika.

The engagement is announced of Mr. Arthur B. Geary, H.B.M.'s Vice-Consul at Alexandria, with Miss Grace Summerhayes, daughter of Mr. Arthur Alport and of Mrs. Alport, of Johannesburg.

Mr. McKillop, Chief Inspector to the Egyptian Ministry of Agriculture, left for England on leave on the 10th inst.

Mr. and Mrs. Alfred Silley and family have arrived in London from Athens.

Dr. E. W. G. Masterman, who has for the past two years been serving as Senior House Surgeon at the Coventry and Warwick Hospital, has been appointed—for the duration of the war—Medical Superintendent of the Camberwell Infirmary. He will take up his new appointment about the middle of August.

Writing on July 10, our Cyprus Correspondent informs us that the English Chaplain at Limassol and Mrs. Taylor have left the island, and will not return.

Our Khartoum Correspondent writes (June 30):—

Mr. Sandford has returned from England, where he has had a spell of leave, and the Governor, Mr. R. E. More, is expected shortly from Alexandria, where he has been upholding the best traditions by his success in winning the doubles at tennis, scoring 100 in a cricket match against the I.Z., and winning two races at the last meeting.

Captain F. Balfour has returned from Cairo, where he has been working in G.H.Q. He is reported to be appointed to Gedaref.

Captain Field, R.A.M.C., also returned from Cairo, where he was married a short time ago.

In a later letter (July 9) our Khartoum Correspondent writes:—

Lt.-Col. C. E. Palmer, D.S.O., O.C. Ordnance, left Khartoum for Cairo on July 3, on his way to England, as he is leaving the service of the Egyptian Army. A guard of honour was at the station, and a salute was fired. A number of his friends were there to see him off.

Major Spinks, who will probably succeed Lt.-Col. Palmer, arrived recently from Darfur and proceeded to Erkowit to report to the Sirdar and Governor-General.

Amongst other passengers for North on the same train were Major Coutts, Director of Stores and Prisons; Major and Mrs. Mostyn, who came from Singa and have recently been on a trip to Fazogli and Roseires; and Mr. Norton, of the National Bank of Egypt.

On Saturday, July 8, a farewell dinner was given to Lt.-Col. W. H. Drake, C.M.G., Adjutant-General of the Egyptian Army, at the Sudan Club. He left with the usual military honours on the 10th for Cairo. Universally popular, he will be much missed in Khartoum, and bears with him the good wishes of both the Army and the Sudan Government in his future career.

Major Townsend returned from leave and passed through Cairo at the beginning of July. He is going straight back to Kassala.

Mr. Bethune William, the manager of the Um Nabardi, who has been spending a month in Cairo, returned on July 7.

Mr. McGillivray is returning to Khartoum again to examine the development of his company's farms, and see the year's prospects. Several of the company's employees are being employed on special service in connection with the Darfur expedition.

Mr. Jackson, Inspector in the Blue Nile Province, is returning from Egypt, where he has been attached to the Western Frontier Force.

A message has been received in London, stating that Mr. T. D. Cree, of Baghdad, who was taken prisoner (for the second time) by the Turks at Kut-el-Amarah, is now at Aleppo. By the kindness of the Turkish authorities, Mrs. Cree and their children have been allowed to join him in Aleppo, having been sent on from Mosul, where they had been detained with other British prisoners from Baghdad. An earlier message, sent in May by way of Busreh, had already allayed any uneasiness on the part of Mr. Cree's friends, since it stated that he was being kindly treated by his Turkish captors.

Mr. A. W. M. Tod, manager of Messrs. Lynch's Baghdad house, who was in Kut at the time of the surrender, is reported by the American Embassy in Constantinople to have been removed to Aleppo by the Turks. No recent news has been received of Mr. J. L. Battey, the second member of Messrs. Lynch's staff who was at Kut throughout the siege. At the time of the surrender he was reported safe, and there is every reason to believe that he is well and unharmed; but he is probably still in Baghdad or else at Mosul.

Sec.-Lieut. Charles A. M. van Millingen, 7th Rifle Brigade, elder son of the late Rev. Professor van Millingen, D.D., of Robert College, Constantinople, has been wounded at the front, and is now in hospital out there, and going on well.

Dr. and Mrs. MacGill, of the American Mission at Nasir, arrived in Khartoum on July 1 en route for Egypt and America on furlough.

Mr. F. P. Archbold, of Braila, Roumania, who is at present staying in England, has three sons serving in the Army. Two have recently been gazetted. The eldest son, Mr. F. B. Archbold, who is a 2nd Lieutenant in the Royal Fusiliers, came home from Chile to enlist; the second, Mr. K. Archbold, is in the Rifle Brigade; and the youngest, Mr. C. B. Archbold, has been in the Intelligence since January 1. All three enlisted as privates, and the two elder brothers are now taking part in the "big push," where we wish them the best of fortune.

Mr. Pearce, the Australian Minister of Defence, has written a letter to Borton Pasha, the Postmaster-General, Egypt, conveying to him the thanks of the Commonwealth Government for the courteous and valuable assistance rendered by the Egyptian Postal Administration to the various units of the Australian Imperial Forces quartered at various times in Egypt.

Our Bucharest Correspondent reports (July 4):—

M. Derussi, Roumanian Minister in Bulgaria, to whom we are all indebted for the services he has rendered to our prisoners in Bulgaria, has returned to his post. By special favour of the Bulgarian authorities he was authorised to return by way of Rustchuk.

M. Langa Rashcano, who has been in charge of the Roumanian Legation in Sofia during the absence of M. Derussi, is expected to return home shortly on leave.

Mr. Hearst, who recently arrived in Bucharest from Sofia, has remained in charge of the British Vice-Consulate here.

M. Psychas, the Greek Minister, has left Bucharest and returned to Athens. M. Ranghabé, who has recently arrived in the country, will act as Chargé d'Affaires.

M. Svilicositch, Serbian Consul-General in Bucharest, has left the capital on leave. M. Nastassiewitch remains in charge during his absence.

M. Simeon Radeff, the Bulgarian Minister in Roumania, has now returned to Bucharest, after a prolonged absence in his own country. He is most unwelcome in the Roumanian capital, where his presence is rightly looked upon with extreme suspicion.

The *Egyptian Mail* of July 5 reports:—Mr. J. I. Craig, Director of the Statistical Bureau, has gone on leave. During his holiday he intends to prepare a report on the industrial and economic situation in Egypt and on the possibilities of co-operation. He will also study the question of a protective tariff for Egypt.

The hon. secretary of the Central Islamic Society announces that the annual festival of Eid of Ramadan will take place on the morning of August 1, at the Mosque, Woking, Surrey, at 11.30.

Major Clement Ignatius Ryan, Essex Regiment, who is reported wounded and missing, believed killed, was son of the late Major-General T. Ryan, R.A., Scarteen, County Limerick, and of Mrs. Ryan, and son-in-law of Colonel C. Maguire. Born in July, 1876, he entered the Essex Regiment in 1897, became lieutenant two years later, and captain in 1904. He was employed with the Egyptian Army from 1907 to 1910, and received the Egyptian medal in connection with operations in the Blue Nile Province, 1908, and a clasp was added for the part he took in operations in the Jebel Nyima District of Southern Kordofan.

The Society for the Promotion of Hellenic Studies benefits by a legacy of £200 under the will of the Rev. Henry Fanshawe Tozer, of Norham Gardens, Oxford, who died on June 2, leaving estate valued at £37,755.

Digitized by Google

Sir Charles Moore Watson, K.C.M.G., C.B., R.E., of Wilton Crescent, S.W., a Pasha in the Egyptian Army, and in 1866 Governor of Suakim, in which post he was succeeded by the late Lord Kitchener, left property valued at £4,158.

Lieut.-Colonel Oswald Arthur Gerald Fitz-Gerald, King George's Own Lancers, Indian Cavalry, personal military secretary to the late Lord Kitchener, who was drowned at sea in the sinking of his Majesty's ship Hampshire, has left personal property of the value of £976. It will be remembered that Lord Kitchener left to Colonel Fitz-Gerald all his lands and estates in East Africa, with the plantations, buildings, crops, and articles of every kind, free of duty.

The British Farmers' Red Cross Fund has this week paid to the British Red Cross Society £2,000 for the purchase and upkeep of two motor soup kitchens, to be sent to the Grand Duke Nicholas, for the use of the Caucasian Red Cross. These will bear inscriptions showing whose gift they are. Further help is urgently needed, and all offers of assistance should be sent to the Secretary (Room 5), Tower Bridge Flour Mills, Shad Thames, S.E.

At the annual general meeting of the British Academy Lord Cromer was elected an honorary Fellow. Only two honorary Fellows may be elected in any one year. His lordship was proposed "as a man of the highest distinction in statesmanship, as an author, and as one who has retained a keen interest in scholarship through a long life eminently useful to his country and the Empire."

Apropos of the destruction of the Chateau Tatoi, a member of the staff of the *Manchester Dispatch* gives some particulars of the place, which were given him by Mr. Thomas H. Mawson. He writes:—"The present King and Queen have always been extremely fond of Tatoi, where they have been in the habit of residing for many months during the spring, summer, and autumn. But the house has been much too small for the needs of their big family and retinue, and so a new residence has been in contemplation for some years. Indeed, plans for a new villa in the Georgian manner were prepared rather more than two years ago by Mr. George Nott in consultation with Messrs. Thomas H. Mawson and Sons, of Lancaster and London, who have prepared the plans for the Royal burial ground at Tatoi, and who are now at work upon the important scheme for replanning the ancient city of Athens. The new villa is to occupy a slightly more elevated site than the old villa, and when completed will equal in size and elegance the finest example of our Georgian country houses. Terraces, with fountains and statuary, will connect the house to the landscape, which is of a very picturesque and romantic character."

APPOINTMENTS, PROMOTIONS, ETC.

Mr. N. Wilkinson, Inspector, Repression of Slave Trade Department, Sudan Government, has been granted the 3rd Class Order of the Nile in recognition of his long and faithful services to the Government.

Mr. Ireland, Inspector-General of Irrigation, Upper Egypt, who has been granted three and a-half months' leave of absence, left for England on the 6th inst. Mr. Molesworth will act for him during his absence.

Mr. H. Symes Prideaux, L.D., L.R.C.S., has been appointed Honorary Surgeon to the Medical Department, Sudan Government.

Mr. H. Malcolm, late deputy manager of the Agricultural Bank, Cairo, who some time ago obtained a commission in the Argyll and Sutherland Highlanders, has now been ordered for service in Egypt. He will assist Mr. Hornsby in the organisation of a new department in connection with enemy property.

Lieutenant A. J. R. Lamb, 2nd Dragoon Guards, and G. H. Heinekey, 4th Hussars, have been selected for service with the Egyptian Army.

OBITUARY.

GENERAL SIR H. J. T. HILDYARD, K.C.B.

General Sir Henry John Thoroton Hildyard died on Tuesday at Aspley Heath House, Woburn Sands, the residence of his sister, at the age of seventy years. The son of Mr. Thomas B. Thoroton Hildyard, of Flintham Hall, Newark, he was educated at the Royal Naval Academy, Gosport. He entered the Royal Navy in 1859, but retired in 1864, becoming an ensign in the Highland Light Infantry three years later. General Hildyard served in the Egyptian Expedition in 1882 as Deputy Assistant Adjutant-General and Quartermaster-General, being mentioned in despatches and receiving the brevet of lieutenant-colonel. In the South African War he was first in command of a brigade and subsequently of a division, with the rank of lieutenant-general. Upon several occasions his services were mentioned in despatches, and he was created a K.C.B. General Hildyard temporarily commanded the First Army Corps at headquarters in 1901-2, and was Director of Military Education and Training in 1903-4. In 1905 he was appointed General Officer Commanding-in-Chief in South Africa, where he remained until 1907. He retired in 1911. He married in 1871 Annette, daughter of Admiral James C. Prevost.

Major Henry Gerald Pelly, late R.A., eldest son of General H. J. Pelly, died on Tuesday at Tunbridge Wells, aged fifty-nine years. Major Pelly entered the Army in 1876, and saw active service in the Afghan War of 1880, receiving the medal. He was also with the Egyptian Expedition in 1882, being at the battle of Tel-el-Kebir, and was awarded the medal with clasp and bronze star.

Lieut. Hugh B. Laird, Yorkshire Regiment, who has been killed in action, was the son of the Rev. David M. W. Laird, M.A., of the New College, Edinburgh. His sister, Dr. J. Stewart Laird, is attached to the French forces at Salonika, and was in the Serbian Relief Medical Unit. His brother, Dr. David Laird, is at present serving in France.

The Imperial Ottoman Bank has lost two more members of its staff at the front: 2nd Lieutenant Bruce N. Dickinson was killed in action on June 29, and 2nd Lieutenant G. S. Samuel on July 14, both in France. These losses bring the total of killed from the London and Manchester offices up to six, and yet another member is missing and believed to be dead. Four others have been wounded. The number of those who joined the Forces was fifty-six, so the proportion of killed is extremely high.

Captain Robert Alexander Farmer Chard, Royal Fusiliers, who was killed in action on July 8, was the third and youngest son of the late Colonel W. W. Chard, late of Pathe, Othery, Somerset, and Mount Tamar, St. Budeaux, Devon, who commanded the 1st Battalion Royal Fusiliers in Egypt, and of Mrs. Chard, of Pathe, Whimple, Devon.

The *Vossische Zeitung* last week announced the death of Prince Jelal-ed-Din, nephew of the Sultan of Turkey.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

DOUGLAS-HAMILTON. — On July 20, at Mazarita, Alexandria, Egypt, to Mr. and Mrs. C. A. A. Douglas-Hamilton—a daughter.

RICHARDS.—On Sunday, July 16, the wife of Captain Owen Richards, D.S.O., R.A.M.C., surgeon to Kasr-el-Ainy Hospital, Cairo—of a daughter.

MARRIAGE.

RICHMOND—KELLY.—On July 8, at the Consulate, Alexandria, Egypt, Captain Arthur Eaton Richmond, R.A.M.C., S.R., eldest son of Richard Richmond, of Wimbledon, to Margaret May, daughter of William Kelly, Esq., of Tuam, Co. Galway.

DEATH.

SUMMERS.—On July 24, after a short illness, at Summit Cottage, Surbiton, Mary Garrod Summers, wife of Montagu Summers, of Langdan Hall, Worcester, and Gizeh Lodge, Cairo.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

NAJEM HOURY'S CYPRUS HOTELS CO., LTD.

Open all the Year Round—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.

For Summer Season—
PLATRES—Platres Hotel: 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel: 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.

For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Ltd.
LIMASSOL, CYPRUS,
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres.
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

SCHOOLS for BOYS & GIRLS
TUTORS for ARMY & ALL EXAMS.
REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

J. and J. PATON,
EDUCATIONAL AGENTS.

FRIDAY, JULY 28, 1916.

THE MESOPOTAMIAN COMMISSION.

There are three aspects of the Mesopotamian campaign which the country will do well to keep separate in its mind in connection with the Commission of Inquiry about to be appointed. They are, what was meant to be done, how it was done, and what remains to be done. For the moment public attention is mainly concentrated on the second question; but we cannot lose sight of the first and third, which are concerned with the Expedition's objective. A tendency exists in some quarters to condemn any advance whatever on Baghdad, because the first attempt failed. We believe that the instinct which prompted the Government to countenance an advance was sound, and that it would be prejudicial to British interests in the Middle East if any attempt were made by Ministers to evade their political responsibility by representing the advance to have been a purely military conception. In stating the reasons which called for the dispatch of a force to the Persian Gulf, Lord Crewe, in the House of Lords, indicated why such a force had sooner or later to proceed up the Tigris. In August, 1914, he said, the Turks in Asia Minor had shown no little sign of restlessness. In Baghdad and the neighbourhood there were many threats against Great Britain, and the property of British subjects had been forcibly seized. It was also known that a strong movement was on foot, no doubt under German inspiration, to induce the proclamation of a holy war against us. It was difficult to foresee, Lord Crewe added, what the effect on Persia and on the Arabian peninsula would have been, if Islam so far east had declared itself as hostile to the Allies. To the contention that the objects in view might have been attained by the occupation of Busreh and Kurnah there is the unanswerable reply that from a military point of view the Power which holds Busreh must hold the country to the north of it and for some distance beyond Baghdad. For the advance in the circumstances in which it was actually undertaken some excuse may be found by the Commission of Inquiry; none is apparent at present. Not even the earlier successes attained by the Expedition ought to have obscured the physical impossibility of General Townshend's small force being able to hold Baghdad, when it had taken it, and the extreme unlikelihood of adequate reinforcements reaching it in time to forestall Turkish attacks. On the other hand, as Lord Wemyss pointed out in his indictment of the campaign, the Expedition entrenched at Busreh or some other place, improving its position, organising its transport, and gathering together all it needed, might have been a potential force of enormous value, available for effective use at the right moment.

In the discussion in the House of Commons, on July 20, by far the most helpful contribution was made by Colonel Sir Mark Sykes. Speaking with personal knowledge of the Mesopotamian Expedition in its earlier stages, he recalled the fact that it had at one time achieved one of its objects. "It did immense work for our prestige." Further, he was of opinion that its actions diverted large forces of the enemy down to Mesopotamia, "and this enabled our Allies in the North to make progress which otherwise they might perhaps not have been able to make." Then came the surrender at Kut, "the greatest success to the Turkish army since it surrounded Peter the Great on the Pruth in 1711," while "for an English surrender of like magnitude we have to go back to 1781." Sir Mark Sykes proceeded to insist upon the point which we have urged for so many weeks in these pages. What he hoped would emerge from the debate would be a feeling in the enemy's mind that the force in Mesopotamia was not disheartened, and that the Government and the people in England were absolutely united in the resolution to avenge the surrender of Kut. He believed that in Mesopotamia we were fighting an enemy which used to regard us with fear, and now regarded us with something like contempt. He hoped, therefore, that there would be a feeling that the Commission was appointed not merely to punish some particular official, but to assist us in carrying on and to enable us to win to victory. Here we have the third object, but in reality the primary object, of the inquiry into the Mesopotamian campaign. Little of the bitterness and exasperation which the conduct of the operations has aroused would have been felt, if the unsatisfactory condition of things to which attention was first called last December had been promptly remedied. It is the knowledge that a state of affairs which has been described as a scandal has been allowed to continue until quite recently, while a misleading description was being applied to the wholly inadequate steps being taken to remedy it, that has shaken public confidence. The Commission will have to allocate responsibility for the mistakes made, if only to ensure that those concerned are not left in a position to lower British prestige again; but its object is also to reassure public opinion that all previous shortcomings have been remedied or, if any still exist, to point out the remedy.

While the Commission is thus charged with duties which by right belonged to the General Officer Commanding the troops, or, failing him, to the authority controlling the Expedition, the Government cannot divest itself of its present responsibility in regard to the conduct of the campaign during the time that the Commission is carrying out its investigations. In this respect considerable satisfaction is to be derived from the assurances given by the new Secretary of State for War. Sir William Robertson, Chief of the Imperial General Staff, is now responsible for the direction of the operations, and very considerable orders have been given for the construction of river steamers and all kinds of river craft. Arrangements have also been made for the construction of a light railway part of the way—a fatal omission in the past, which in itself reflects gravely on the competence of those in charge of the Expedition, if they did not recommend such a line, or on the responsible authorities, if they would not sanction it. Further, Mr. Lloyd George was able to give the assurance that the mere fact of setting up a Commission of inquiry was not going to interfere in the least with the activities of the War Office in doing its best to put matters right. It is of good augury that steps are being taken to provide an adequate supply of river craft. Such a decision points to a resolve to go forward in due time. The importance of a strong flotilla of river boats for an advance up the Tigris is self-evident, but it receives confirmation from an article in the *Cologne Gazette* describing the activity of "the Germany Navy" in Mesopotamia. According to this journal the German naval personnel restored the flotilla of river boats which the British left in the hands of the Turks on their retirement after the battle of Ctesiphon. "They were placed under German command, and performed useful work in the battles near Kut and against the advancing British relief force. To the mines and guns of this flotilla it must be attributed that the British made no attempt to relieve the beleaguered city by employing fully their river war material." The statement is no doubt highly coloured, but whatever the strength of the Turco-German river fleet, it will have to be reckoned with when the British advance takes place. In the meantime, the instructions of the country to the Special Commission could be summed up in the words, "Get on with your work, in order that we may get on with the campaign in Mesopotamia."

"MAGIC CUPS."

(By Our Cairo Correspondent.)

From time immemorial popular superstition has played a prominent part in the everyday life of nations. Even to-day, wherever we go, we find relics, religious and otherwise, to which marvellous curative and sedative powers are attributed, and which are held in deep reverence for this reason by the people of the country, and, for that matter, often by those of other countries. Amongst Moslems a great place has been, and still is, given to what are known as "Magic Cups," and that able Arab scholar, Ahmed Zeki Pasha, the Secretary of the Council of Ministers, who has made many valuable contributions to Arab literature and to the study of Arab art, read a highly interesting paper before the Egyptian Institute recently with regard to one of these cups, which is in the possession of the old Coptic Church of Moallaca, in Old Cairo.

"Cups of Terror."

Magic Cups fall into two categories—those which cure the sufferings caused by violent and sudden emotions, which the Arabs call "Cups of Terror," and those which serve to cure maladies, physical as well as moral, and even domestic troubles. The "Cups of Terror" are jealously preserved by those who possess them, and are in general use to this day in Egypt. The owners willingly lend them to their suffering fellow mortals; one condition, however, attaches to such loans, non-compliance with which will cause the cup to lose its charm for ever—the borrower must make a monetary deposit. Zeki Pasha related that in the case of one of these cups, which he produced, he had had to pay the sum of £T5 to the mother of the head of the family possessing it.

The following is the procedure that must be followed to work the charm of the "Cup of Terror." The cup has to be filled with water at the hour when the Faithful proceed to the mosque for the dawn prayer. A bunch of keys and other metal trinkets, all of them rusty, are then dipped in the water, which is left out in the open, and which the person to be cured has to drink the next morning. This ceremony, repeated three, seven, or forty consecutive nights, as the case may be, invariably cures anyone suffering from the effects of strong emotions. The cure is probably achieved by the good effect produced by oxide of iron on certain cases.

The other category, which is far more interesting from both the superstitious and the historic point of view, falls into two classes, those that are anonymous—i.e., undated, and those that bear either the name of a distinguished personage or a definite date. It is to the second class of this category that the cup forming the subject of the paper belongs.

The Saladin Cup.

This cup Zeki Pasha calls the Saladin Cup, because of the dedication which is inscribed upon it. The inside, made of white brass, bears a circular inscription consisting of mystic and cabalistic letters, which, albeit several Arabic letters and cyphers are distinguishable, are so intermingled that it is quite impossible to make anything out of them. Above this inscription are sixteen medallions, identical in form but with alternating Koranic and mystic inscriptions on them. The Koranic medallions contain the formula: "In the name of God, the Merciful and All-Forgiving." The original bottom of the cup has disappeared, and has been replaced by a curious piece of copper, on which there are no inscriptions. On the outside of the cup, which is made of red copper, is the dedicatory formula, which is worth reproducing. It runs as follows:—

> Honour to our lord, the Sultan King, the defender of the cause of God, who is supported (by Him) the victorious, Abou-l-Mouzaffar, Yusef, the co-sharer of the Commander of the Faithful! (This cup) has been proved by experience (to be a cure for) viper and scorpion bites, fever, to bring about the return of her husband to the divorced and abandoned woman, to cure (the bites of a) mad dog, intestinal pains, colic, headache . . . to destroy the effects of witchcraft (to stop) bleeding, to exorcise the evil eye, to drive away sadness and heart qualms, and all ills and infirmities except death . . . to prevent the vexations caused by troublesome children. (It should be) placed at the head (of the patient) and be used as a bath by the old maid (to help her get a husband).

Below this inscription are ten medallions, alternately round and trapezoid in form. All are covered with mystic signs entirely incomprehensible to us to-day. Underneath the medallions is a circular inscription in Arabic characters, some of which are obliterated, but from which, with the help of contemporary cups in the Arab Museum, it has been possible to reconstruct the following text:—

> Made after astrological observations reproduced and engraved during the apogee of the star and according to the horoscopes derived from the astral tables. This has been agreed upon and adopted by the principal religious heads of the Rashidite Caliphs in order to safeguard the Moslem community. Executed at Mecca in the year . . . for all ills and infirmities.

As the original bottom of the cup is missing, it is not possible to say exactly what procedure was actually prescribed for this particular cup, but thanks to other cups in the Arab Museum and elsewhere we can fill in the blank. It was very simple. The cup was to be filled with oil, milk, or water, which was at once to be drunk by the person afflicted, or, on his or her behalf, by a third party delegated for the purpose. In the bath it was used to anoint the patient.

Zeki Pasha explains the loss of the original bottom by the fact that the cup was in constant use, owing not only to its miraculous powers but also to the dedication to Saladin inscribed upon it, which was in itself supposed to give it a supreme charm. The acids which this constant use and friction set up in the end ate the bottom away, and the owners, when they saw this happening, very ingeniously put in a new one to enable the cup to continue its good work. All the other "Magic Cups" are practically intact, which proves the popularity of the "Saladin Cup."

In the opinion of the lecturer this cup was undoubtedly dedicated to Saladin. In the first place the dedicatory formula calls the dedicatee "Co-sharer of the Commander of the Faithful," which is a title that was peculiar to the Moslem Princes of Egypt. Moreover, that dedicatee had the name of Yusef. The only ruler of Egypt who has borne that name was the celebrated Saladin. Again, the cup gives him the "Kounia" or surname of Abou-l-Mouzaffar. Custom has it that the Moslem princes, in addition to their other titles, called themselves often "Abou" (father of), and as a matter of fact Saladin did call himself Abou-l-Mouzaffar and had a son named Mouzaffar. He is so referred to in authoritative works, such as De Slane's "Biographical Dictionary," and also on the commemorative plates on the Cairo Citadel, which was built by him.

A Tolerant Prince.

That this cup is amongst the most precious treasures of a Coptic Church need cause no surprise, and is, indeed, further proof that it is dedicated to Saladin. The latter was notoriously tolerant towards the followers of other religions who dwelt under his rule. He afforded the Christian and the Jew his fullest protection against the persecution of the more fanatical Moslems. So grateful indeed were the Copts that they gave a special place in their churches to his portrait. Moslem poets have recorded this fact, which is further proved by a reproduction of one of those portraits which was in a monastery, and which the lecturer exhibited to his audience.

Apropos of portraits, Saladin was the first Moslem prince to have his effigy placed on coins. He caused these coins to be struck showing him wearing a turban, and seated cross-legged on a throne, holding the globe in his left hand and with his right hand resting on his hip. Specimens of these coins are in the British Museum and at Paris.

Zeki Pasha terminated his paper by relating two stories that showed the tolerant nature of the régime introduced by Saladin into Egypt, and his chivalrous and kindly character. A Jew domiciled in Spain was forced to embrace Islam in order to avoid exile. For sixteen years he professed the Moslem religion and distinguished himself by his knowledge of the Koran and of Malekite law; but at the bottom of his heart he remained a Jew, and, being unable to stand the strain any longer, he left Spain, and after wandering through Morocco and Syria, came and settled in Egypt, where he began again to worship his Creator in the manner of his fathers. He traded in precious stones, and at the same time gave lessons in philosophy, medicine, and theology. For several years he lived in peace, close to the Moallaca church. But one fine day an Andalusian lawyer arrived, and, recognising his fellow-countryman, and finding that he was now professing as a Jew, he denounced him. The Jew was brought before the Kadi and his fate seemed certain; for the Islamic law punished apostasy with death. But the Kadi was imbued with the broad-minded views and sense of justice of which Saladin was a shining example. To the general surprise he acquitted the Jew, on the ground that his conversion had been made by force, and was, therefore, illegal. The Jew, it is interesting to note, was the famous Rabbi, Maimonides, who became the principal physician to Saladin and his successors, and whose premature death would have deprived Judaism of a great exponent and the medical faculty of a brilliant member.

The other story is that Saladin was himself a doctor by profession, and that it was he who went and attended Richard Cœur de Lion when he was sick. Zeki Pasha admits that this is really a legend, but he adds that Arab authors nevertheless record that Saladin made it a rule to send his own doctors to attend his enemies, as he scorned to take advantage of their momentary physical weakness and preferred to conquer them face to face on the field of battle. It is also known that on one occasion Richard I. actually appealed to his arch-enemy for medical assistance, which he received. It would be interesting to know whether there are any references to this in Western literature, which might throw some light on this legendary incident.

A Reuter's message from Amsterdam, dated July 26, states:—Advices from Smyrna report that an entire Turkish regiment at Saydikeui has mutinied and fled to the forest on Mount Similou. Turkish troops have been sent in pursuit and have set fire to the forest. It is further reported that all the Austro-German forces in the vilayet of Aidin have been recalled and have already left for Constantinople on their way home.

TANGIER TO TEHERAN.

The freakish nature of explosions has always interested me, and a friend who knows this recently told me about a Turkish (or German) shell which, on the Gallipoli Peninsula, did things that certainly illustrate this freakishness very well. It was a 16-inch shell, and it chose for its billet a dug-out in which a sergeant and two privates were engaged in sorting out a newly-arrived mail. Making its way without any ado through the roof of this dug-out, it exploded, according to my informant, *on* the small table between the three soldiers. The sergeant was killed instantaneously—blown to bits, poor man, in thorough fashion: I refrain from giving details in consideration of my readers' feelings—but his two assistants, though badly shaken up, bruised, and buried in débris, were dug out otherwise uninjured. And the table, though actually dented, was not pierced or broken. It was this latter fact that most impressed my informant; and at first I shared his astonishment. But another friend suggests a theory which seems to me to account for the wonder. He thinks the shell must have exploded not *on* the table, but just before reaching it, and the dent must have been made by a small fragment. Readers learned in such matters may argue the matter out amongst themselves. To me the theory propounded by my second friend seems likely to be correct.

***

I have not yet read Colonel Patterson's new book, "With the Zionists in Gallipoli," but I look forward to doing so at an early opportunity, for I enjoyed the author's "Man-Eaters of Tsavo" immensely, and Gallipoli ought to provide him with some good material. Meantime I am wondering whether he has anything to say about the ill-fortune that seemed to dog the footsteps of the members of the Mule Corps in the matter of being suspected as spies. An officer who had quite exceptional opportunities for observing the facts assured me that it seemed to be the fate of these men to be arrested by vigilant sentries and suspicious soldiers or sailors with amazing frequency. Indeed, in his own picturesque phraseology, "The entire corps seemed to be dragged in nearly every night, and usually had to wait till daylight before they could establish their bona fides. Nobody could make them out, and they had a pretty rough time of it."

***

Writing of the Battle of Jutland some weeks ago, I asked whether anybody in Turkey or Bulgaria would really swallow the thumping lie that Germany was in such a hurry to foist off on the world. Apparently official Bulgaria made a really gallant attempt to do so. We read long ago of General Jekoff's fulsome telegram to the German Navy. Now we are able, thanks to Professor Popovitch, to see what the Bulgarian Press comments were like. The *Narodni Prava*, for instance, writes:—

> German genius has on this occasion vanquished also the English power at sea. The fruit of centuries has been broken by the creation of half a century. Science has been victorious over numerical superiority. Quality has destroyed quantity.

This was on June 2. Does the *N.P.*, I wonder, still pretend to believe such bosh? And here is the *Echo de Bulgarie's* comment:—

> This battle is the first great naval victory of the Germans and the first great defeat of the English: it is, after an interval of one hundred years, a second Trafalgar, in which the English are the vanquished. The dogma of British invincibility has received a formidable shock, whose reaction will pass beyond the frontiers of the belligerents. Germany has by this victory established her power at sea, just as by her countless victories on the Continent she has established her invincibility on land. . . .

Poor little *Echo!* Should it not be renamed "Echo de Berlin"? If *that* is the sort of stuff the German Lie Bureau turns out, one may feel very thankful that this country has no such clumsy agents.

***

But the creamiest paragraph of all that Professor Popovitch has been kind enough to translate for us is from the once-respectable *Mir*, which remarks:—

> The English cannot prevent the losses to their fleet in this new manner of fighting, for which the Germans are apparently better prepared. Nothing can hinder them from repeating that they are masters of the sea, that their fleet is invincible, that only individual admirals are to blame for the defeat they have suffered, . . . but it is certain that their eagerness for fresh battles with the German fleet has greatly decreased; and it need not amaze anybody if, *instead of the German ships*, English men-of-war will now begin to skulk in British harbours.

We must admit that the Germans are apparently "better prepared" for this "new manner of fighting"—by scuttling back to port; but it is a pity that the *Mir's* scribe cannot meet a real British sailor, when he would learn whether those brave fellows' "eagerness for fresh battles" had "greatly decreased." What does he mean by his foolish talk about blaming individual admirals? I, for one, give the puzzle up! And why he should think that the German ships are now likely to "skulk" in British harbours instead of in their own I fail to understand. But I suspect that the Germans will hardly admire his naive admission that their ships *had been* skulking before the battle. That "instead of the German ships" is a beautiful touch. Perhaps the *Mir* does not, after all, love its German Allies so very, very greatly.

***

Apropos of this subject, I observe that the *Neuste Nachrichten*, in the course of a typical article, inspired by news of the destruction of a few English trawlers, vaunts the prowess of the German navy. "The German shells," it goes on to say, "that hit the houses of Seaham proclaim to England the fact that German warships are in undisturbed possession of the North Sea. Jellicoe is powerless, the British Fleet is impotent, and German bluejackets triumph as the real masters of the North Sea." How truly German! A single submarine, sneaking under the seas, bombards an undefended port, and—"German bluejackets triumph," etc. Neutrals will believe that Germany rules the waves when her surface vessels dare show their flag on the high seas. Not before. Even the Kaiser's submarines are by no means "undisturbed" in their "possession" of the North Sea. Does the German public know how many of them have been "accounted for" so far? Germans who do know can hardly feel happy.

CORSAIR.

THE B XI.'S FEAT.

In the Prize Court on Monday Sir Samuel Evans had before him a motion on behalf of Lieutenant Norman Holbrook, V.C., and the ship's company of H.M. submarine B XI., for a declaration that they were entitled to prize bounty in respect of the destruction of the Turkish battleship Messudieh in the Dardanelles, on December 13, 1914.

Lieutenant Holbrook stated that he received information that a Turkish battleship was lying off Chanak, and that she was being used as the headquarters of the Dardanelles German Naval Staff. He accordingly proceeded up the Dardanelles and, having dived under five lines of Turkish mines, extending across the channel, sighted the Messudieh at anchor off Chanak. He fired a torpedo at her at 800 yards. He heard the torpedo explode, and after an interval of three minutes came up and saw that the quarter deck of the battleship was awash. She was going down by the stern. He returned as he had come, by diving under the minefield once more.

The President: What was your complement?—Fourteen men and two officers, including myself. At the time, added witness in reply to questions, the nearest British warship was seventeen miles away.

The President: All I can say is that you showed splendid courage.

After some discussion as to the complement of the Messudieh, the President said: "I do not think this is a case in which I ought to encourage any splitting of straws. I declare that the officers and crew of his Majesty's submarine B X1 are entitled to prize bounty as being present at, and having brought about, the destruction of the Turkish battleship Messudieh. I declare the number of persons on board the battleship to be 700. The amount of the prize bounty, at the rate of £5 per head, therefore, will be £3,500."

FOR BRITISH PRISONERS IN BULGARIA.

The following is a first list of donations to the fund, which Madame Také Jonescu is raising in this country in aid of British prisoners in Bulgaria:—

Parish of Christ Church, Clifton, per Miss M. Mackenzie, £1 1s.; Colonel Gleig, £3; Miss C. Taylor, £2 2s.; Mr. H. Mallaby Firth, £2 2s.; the Misses Green, 10s.; Mrs. Howard Tozer, £1 1s.; Anonymous, 5s.; Miss M. E. Maingay, £1; Mrs. Kinsey Peile, 5s.; Lady Kennedy, £5; C. Simmons, £5; Mrs. Basil Braithwaite, £5; L. and N.W. Ry. Loco. Staff, Willesden Junction (Wounded Soldiers' Fund), £1; Sydney (N.S.W.) Chamber of Commerce, through the London Chamber of Commerce, £50; total, £87 6d.

As already announced in these columns, the Bank of Roumania has opened an account for the fund, and the Earl of Bessborough has kindly consented to act as Honorary Treasurer. All subscriptions should be sent to him at the Bank of Roumania, Limited, 27, Throgmorton Street, E.C.

A Sofia telegram to the *Vossische Zeitung* states that M. Radoslavoff, the Bulgarian Prime Minister, by his speech, agreeing to the demand of the Opposition that the Budget, as passed, should be restricted to three months, has disarmed the extremists of the Ghenadieff group, and that it now only remains to turn out of the Cabinet M. Apostoloff, the Minister of Railways, who belongs to the Ghenadieff group and refuses to resign voluntarily.

The Serbian boys who were entertained at the Mansion House on "Kossovo Day" have written to the Lord Mayor thanking him for their reception, adding that when they go back to their own country they will try to use the knowledge they have acquired in England for the benefit of their countrymen and in gratitude to their great English friends.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

The Mesopotamia Expedition. July 20.

The Earl of WEMYSS moved that a full inquiry ought to be held into the whole conduct of the Mesopotamia campaign, especially in relation to the transport arrangements and the provision for the wounded. Since the curtain fell on the tragedy of Kut, so many rumours had gathered about the question that to clear the air of them would be to the public advantage. He was prepared to believe that for the original expedition—not the later develop- of Baghdad—a very good case could be made out; that, entrenched at Busreh or some other place, improving its position, organizing its transport, and gathering together all it needed, the force might have been a potential force of enormous value, the moment for using which might by this time have already come. It was a matter of common knowledge that General Townshend objected to the advance, but, having lodged a protest, he did his duty as a British soldier. It was a most unfortunate coincidence that the advance on Baghdad should have coincided with the obvious failure of the Dardanelles expedition. Many people thought the advance was a gambling venture on the part of the Government. He did not hold that opinion, but he believed the mistake was that they did not connect the Dardanelles expedition with the advance on Baghdad; for so long as there was a chance of the Dardanelles expedition succeeding there would have been a chance of the advance to Baghdad coming off. The moment that expedition failed the advance ought to have been abandoned. It was an extraordinary thing that nobody, either in the Cabinet or on the General Staff, appeared to have thought, even if the expedition got to Baghdad, what would happen to it afterwards. If the expedition had been able to get into Baghdad, and to remain there, the only way that could really have been brought about was by having an expedition of the most perfectly equipped kind. Yet those who were responsible for this expedition neglected nothing that lack of foresight and organization could effect to eliminate any possible chance of success that there might have been. It would be wrong to put the whole failure down to lack of transport, because General Townshend's force was armed with artillery so obsolete and inadequate that if it had not been for the loss of prestige he might just as well have handed it over to the Turks. At the battle that took place on January 21, when it was all important that the troops should get across the river, the sappers had no material of any sort to make a breach, or the cable necessary to make a flying bridge. All the comforts which were so rightly given to the troops on other fronts were absolutely lacking for the troops in Mesopotamia. And this was the expedition of which the Prime Minister had said that he did not think that in the whole course of the war there had been a series of operations more carefully contrived, more brilliantly conducted, or with better prospects of success! As regarded the treatment of the wounded, when they heard of what went on in Mesopotamia people rubbed their eyes and wondered whether they were back in the days of the Crimea. He could not believe that the Government realised the rage and exasperation with which our troops in Mesopotamia read the debates in Parliament, which led them to think that the Government cared more for its Parliamentary position than for the lives of the people. Two things were required in Mesopotamia: one, that everything possible should be taken out of the hands of the Indian Government, in which the troops there had no confidence at all, and put into the hands of Sir William Robertson, in whom they had every confidence; the other was that an inquiry should be held at once, and the very fact of an inquiry being instituted would do a good deal to remove what was complained of. If he were accused of washing dirty linen in public, his reply was that it was better to wash it in public than to wear it indefinitely in public. The time for cleaning up this subject was long overdue. He did not move for an inquiry in any desire to find a scapegoat, but rather in the faint hope that some things that were alleged might be found to be exaggerated, and, above all, in the confident belief that ventilation of this subject would render for all time impossible a recurrence of scandals which, whatever the result of the war, would be a blot on our otherwise magnificent share in the conduct of it.

The Marquess of CREWE, after a graceful compliment to the previous speaker, announced the intentions of the Government regarding the appointment of a Commission of Inquiry. Referring to the reasons for the expedition to Mesopotamia he said:—In August, 1914, although we were not at war with Turkey, and did not become so for some months, the Turks in Asia had shown no little sign of restlessness. At Baghdad and the neighbourhood many threats had been uttered against this country and the property of British subjects had been forcibly seized. It was also known that a strong movement was on foot, no doubt under German inspiration, to induce the proclamation of a Holy War against us. It was absolutely necessary for us also to support the interests of our tried and faithful friends, the Arab Chiefs on the Gulf. We were also bound to protect as far as possible the valuable oilfields, in which not long ago we acquired an interest of much importance to our naval oil supply. At the beginning of November we found ourselves at war with Turkey. Our preparations had been carefully made—although without perpetrating an act of any kind which could be said to have had a shadow of hostility against Turkey—and on November 6 we landed in the face of some resistance. Two brigades were available, and after some sharp fighting Busreh was occupied on November 22. It was always possible that if we had not then shown our strength Islam as a whole might have been deflected against us. It is impossible to foresee what the effect on Persia and on the Arabian peninsula would have been if Islam so far East had declared itself as hostile to the Allies. Further, we had to consider the position and prospects of the great Moslem population of Africa, which in turn might easily have been roused against us and our Allies. From those dangerous possibilities, in our judgment, we were altogether saved by the prompt move to the head of the Persian Gulf.

Lord BERESFORD said that nothing could be said too laudatory of General Townshend; it was not the enemy who beat him, but famine and bad management. Why were General Townshend and his officers reduced to less than half-pay? The General received £200 a month when he was in command of the force and maintained the credit of the British name before the world, but since he had been unfortunate enough to have to surrender his pay had been reduced to £83. That was a scandal.

Viscount MIDLETON asked whether what had been complained of in the past had been set right. It was alleged that at a recent period there was still a lack of transport and barges and a considerable insufficiency of doctors. There was also total absence of the comforts which had been provided in France most generously.

Lord ISLINGTON said that within the last forty-eight hours a telegram had been received containing the satisfactory announcement that all the troops in Mesopotamia were on full rations, with the exception that there was a shortage of vegetables and milk. In order to assure that what was sent should find its way to the troops up the river a supply officer of high rank was going out to control matters of supply.

HOUSE OF COMMONS.

The Dardanelles and Mesopotamia. July 20.

Sir E. CARSON had on the paper the following motion:—"That, in the opinion of this House, Select Committees should be appointed forthwith to inquire, respectively, into the conduct of operations (a) in Gallipoli and the Dardanelles, and (b) in Mesopotamia, including the supply of equipment to the troops, the provision for sick and wounded, and the responsibility of those Departments of the Government whose duty it has been to minister to the wants of the forces employed in those theatres of war, respectively."

When Sir Edward was about to propose his resolution, however,

Mr. ASQUITH rose and announced that the Government thought it right to institute two separate inquiries in regard to the two sets of transactions. These inquiries, he went on to say, should be conducted by small bodies on which both Houses of Parliament would be represented, but which were not to be confined to members of those Houses—Australia, for instance, ought to be represented on the Dardanelles inquiry. When necessary the Commissions would sit in secret, and their constitution and the terms of reference would be submitted to Parliament by a Bill which would confer the power to compel the attendance of witnesses.

Sir E. CARSON thought it would be futile to proceed to discuss the question after the Prime Minister's statement. He added that he had great confidence in Sir William Robertson, "a man of great judgment and ability, and, above all things, a man who could not be influenced by the politicians." He would not pursue the motion he had put on the paper, but hoped the Bill would be prepared and brought in at once, and put through all its stages quickly, and that public confidence would be restored by a real and thorough investigation.

Sir H. DALZIEL thought it would have been better if the House itself had appointed the tribunal, which was going to inquire into the acts of Ministers as well as soldiers, rather than that it should be appointed by the Government.

Captain A. HERBERT could not feel that the Prime Minister's statement was entirely satisfactory. They wanted to have the responsibility fixed, and fixed soon.

Colonel Sir M. SYKES said that the Mesopotamia campaign was conducted by a very small force, which, however, felt itself, against anything but overwhelming odds, invincible. He imagined that a force never went into the field in which there was more splendid co-operation between the various commanders than there was in this case; the staff and the regimental officers were absolutely as brothers, and that wonderful little force met the enemy on six occasions—an enemy superior in one arm as seven to fifteen, in another arm, two aganist three, and in another, one against thirty, and always it emerged victorious. There was courage, decision, and immense hope, and its action diverted large forces of the enemy down to Mesopotamia which he was certain enabled our Allies in the North to make progress which they might perhaps otherwise not have been able to make. More than that, they conquered an enemy province and a half and retained it to this day. These were things we should not forget in regard to that little force. It did immense work for our prestige. The picture which we had now was not so happy. We had had a sad surrender. It was well we should not minimise a thing which the enemy did not minimise. The surrender of Kut was the greatest success the Turkish arms had had since it surrounded Peter the Great on the Pruth in 1711. For an English surrender of that magnitude we had to go back to 1781. From the correspondence one saw one could not help feeling that people regarded that force as disheartened. He hoped there would emerge from the debate a feeling in the enemy's mind that that force was not disheartened, and that the people in England and the Government were absolutely united in the determination to

Digitized by Google

avenge the surrender at Kut. He believed that in Mesopotamia we were fighting an enemy which used to regard us with fear, but which now regarded us with something like contempt. He hoped that there would be a feeling that the Committee was appointed not merely to wreak vengeance on one particular official, but to enable us to win to victory, and that the united purpose of that House and the Government was to co-ordinate our military brain to achieve that end. If the enemy once recognised that this country was united and determined he would pass from contempt to the sense that he was not going from one victory to another, but that he was going to fail.

Mr. LLOYD GEORGE announced that the Prime Minister wished him to give an undertaking on his behalf that the Bill should be introduced on Monday, and he also announced that, under an arrangement come to within the last few days with the Government of India, while the force in Mesopotamia would continue to be administered by the Commander-in-Chief in India, the latter would receive his instructions from and be responsible to the Army Council in matters of personnel and supplies. Arrangements had been made to send to India men representing the War Office to assist in the organization of supplies. The War Office would take responsibility for transport, which had been the main difficulty. Supplies at the base at Busreh were abundant at the present moment, but the transport had broken down.

The Kut Prisoners.

July 24.

Lord R. CECIL informed Sir E. Cornwall that the Foreign Office was without any information as to the treatment of the non-commissioned officers and men who were taken prisoners at Kut-el-Amara. The United States Embassy at Constantinople were sparing no effort to obtain the information.

Dardanelles and Mesopotamia.

Mr. ASQUITH asked leave to introduce a Bill constituting Special Commissions to inquire into the conduct of the war in the Dardanelles and Mesopotamia. The Commissions would have to decide for themselves whether, with regard to the special conditions of the questions involved, their proceedings should be in public or in private; and they would exercise that discretion in connection with particular cases as they arose. An important provision would authorise the holding of sittings in India. If sittings were required elsewhere, as, for instance, in Egypt or a Crown Colony, authority would be given by Order in Council. As to Mesopotamia or any place not under British sovereignty, the military authorities must be relied upon to order persons under military law to attend the Commission. He suggested that the Bill should be circulated before the House engaged in a general discussion. It would be put down for the next day.

Leave was given and the Bill was introduced and read a first time.

Prisoners in Bulgaria.

July 25.

Lord R. CECIL informed Sir E. Cornwall that copies of a report, dated June 19, by the United States Consul-General-in-Charge at Sofia regarding the treatment of British prisoners of war in Bulgaria had recently been received. The report was of a satisfactory character. The Government had asked the United States Ambassador whether there was any objection to its being published.

Occupied Greek Territory.

Mr. FORSTER, replying to Sir E. Cornwall, said:—As far as is known the only parts of Greek territory occupied by Bulgarian or other enemy forces are the Rupel Pass and its vicinity to the southern slopes of the Belasica Range, north of the railway, between Doiran and Demirhissar.

Want in Serbia.

July 26.

Lord R. CECIL, replying to Sir E. Cornwall, said that information received by the Foreign Office with regard to the condition of things in Serbia was to some extent conflicting, but unfortunately there seemed little doubt that in some parts of the country distress from want of food was serious, and reflected great discredit on the occupying Power.

Dardanelles Prisoners.

Mr. FORSTER informed Mr. Malcolm that the number of officers and men captured in the Dardanelles who were now prisoners in the hands of the Turks were believed to be 19 and 359 respectively. These figures represented the totals of the lists received from the Turkish Government, after check and verification at the War Office and collation with information received from other sources.

Sir Percy Sykes's Mission.

Mr. MALCOLM asked the Secretary for India if he could state the result of General Sykes's campaign in the direction of Kerman.

Mr. CHAMBERLAIN: Brig.-General Sir Percy Sykes left Bunder Abbas in the latter half of May. He arrived at Kerman, without encountering any opposition, on June 2. He was welcomed there and found the officials anxious to do all in their power to carry out the instructions of the Persian Government in restoring order and controlling the disturbers of neutrality.

Mesopotamia and the Dardanelles Commission.

On the motion for the second reading of the Special Commissions (Dardanelles and Mesopotamia) Bill,

Mr. ASQUITH announced the names of the Commissioners who, the Government proposed, should undertake the Mesopotamia and Dardanelles inquiries (these names are given elsewhere); and pointed out that the Government had suggested as the terms of reference the actual words of Sir Edward Carson's motion last week.

Mr. CHURCHILL suggested that there should be an interval of twenty-four hours between the announcement of the names and the discussion of the Bill in Committee.

Mr. ASQUITH said he would only ask the House to read the Bill a second time that day, leaving the Committee stage till Thursday.

Sir H. DALZIEL considered that the reference to the two Commissions was not wide enough. The public wanted to know all the circumstances relating to the initiation of the Dardanelles expedition and also who it was that ordered the advance on Baghdad, and everything connected with that operation. Both Commissions should have power to cross-examine Cabinet Ministers and the heads of public Departments, and to call for all relevant documents, unofficial as well as official.

Colonel A. HERBERT suggested that the Commission should be empowered to strengthen themselves by co-opting members. He hoped that the appointment of the Commissions would have immediate effects. He looked forward to men in high positions trembling in their shoes now that the inquiry was started, and that result would be good for our people. The bonds of red tape would be looser and rather less glutinous than they had been in the past, and that would be for the good of our men in India, Mesopotamia, and in Bushire. The Commissions would find themselves up against something more than individual incompetence and negligence; they would be up against a very big system which was even more cumbrous in India than at home. All knew of the loyalty of the Indian troops and the generosity and loyalty of the Indian princes. The Secretary of India, in the fine defence he made the other day, which was characterised by that loyalty to his colleagues and subordinates for which he was distinguished, said that nothing was refused by the Government of India that was asked for. He could only say he believed the right hon. gentleman had been misinformed. The campaign had been starved from its very initiation. It had been fought on lines of heroism by the soldiers and conducted on lines of pauperisation by the Administration. In no other theatre of war had our soldiers to put up with so much as in Mesopotamia. To him the country was like ancient Egypt with all the plagues. The only difference was that the plagues in Mesopotamia went on all the time; they might change their form, but they never ceased. Things important and trivial were asked for and refused by the Government of India. It might be said in reply that the men in Mesopotamia did not want anything, that they were happy with the mosquitos and did not want nets, that they did not mind drinking water from a river with dead bodies in it, and did not want filters, and that they did not want to be pampered with high explosives. As the men were human they wanted those things, and did not get them. The question was whether the Commander-in-Chief in India received application for those essentials; whether he believed they were necessary; and whether he asked for them to be sent.

Mr. T. M. HEALY said the whole of our misfortunes in the East were due to the failure to arrest the German ships Goeben and Breslau in the Straits of Messina, yet those responsible for that failure did not come within the purview of the inquiry. He attributed a great deal of the Sinn Fein bitterness in Ireland to the neglect to publish the immortal deeds of the Dublin and Munster Fusiliers and the 29th Division generally at Gallipoli.

Mr. ASQUITH, replying to various points raised in the course of the debate, said that the Government desired to make the scope of the reference as wide as possible, and had no objection to the insertion of the word "initiation." The Commissioners would have the advantage of the best naval and military evidence, and they were a thoroughly competent body of men, competent to pronounce judgment without any special assistance. Mr. Healy had suggested that the operations which led to the escape of the German battleship and cruiser should be included. These subjects had been inquired into by naval tribunals, and he did not think it desirable to complicate either of these inquiries by such matters. These things took place before Turkey declared war.

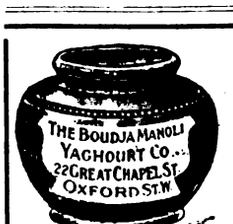
Mr. CHURCHILL asked whether the indemnity clause in the Bill simply meant that it gave protection from punishment for giving evidence.

Mr. ASQUITH: That is what I understood. It is put into every Bill. The Commissions are bound to present a public report and will not shroud under a veil of secrecy any part of the inquiry which they think could be legitimately and in the public interest conducted in public. But there is the relation of these military and naval operations to the future conduct of the war. There are also diplomatic negotiations of a very delicate and secret kind. I hope the House will read the Bill a second time, and be assured that the Government desire that the inquiry should be as comprehensive, impartial, and exhaustive as possible.

Sir J. REES hoped that the Commissions would be instructed to present interim reports on the more pressing matters with which they would deal.

Mr. ASQUITH: That is provided for in the Bill.

Mr. CHAMBERLAIN, answering two questions, said the inquiry would cover the Army and medical administration in India, and the representatives of Australia and New Zealand upon the Commissions were not the nominees of their respective Governments, but the invitees of the British Government, sitting with the knowledge and assent of their own Governments.



THE WORLD-FAMOUS
YAGHOURT
may be obtained, in 6d. and 1s. jars, of
MANOLI-CORBETTI,
22, Great Chapel Street, Oxford Street.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The resumption of trade between Egypt and the Hejaz is to be welcomed, and doubtless the Khedivial Mail Line will come again into a little of its former commercial importance in those waters. Apparently a steamer has left, or is about to leave, an Egyptian port for Jeddah, and probably—unless the unexpected happens—a more or less regular service will be re-inaugurated. The effect, both in Egypt and throughout the Moslem world, of communication between the holy places of Islam and enlightened El Masr will be great indeed, and will lead to greater intercommunication between the two shores of the Red Sea. Incidentally, it may be pointed out that, thanks to the benevolence of the British Government, occasional "sambuks" laden with foodstuffs for the famished inhabitants of the Hejaz have been permitted to load at Port Sudan for Jeddah. Now, however, and in view of the new steamer service, the supply of commodities for the brave Arabs who are fighting for the tents of Islam against the Ottoman dupe of the Huns will be greater and more regular.

***

The fact that Great Britain and France have agreed to place a sum of £800,000 to the credit of the Greek Government in the Bank of France is to be welcomed as definite proof of the Allies' belief that matters in Athens are improving. At the time of the downfall of the Skouloudis Cabinet I gave it as my opinion that the direct cause of the crisis was the opposition of France and Great Britain to that hare-brained financial scheme whereby the paper currency of the country was to be heavily augmented to the detriment of the Greek exchange. I see no reason now to alter my previous opinion, and therefore look upon the present financial arrangement as a barometric reading pointing to fair weather. May I not be mistaken as our diplomats were as regards Bulgaria's sincerity!

***

Matters between Roumania and Bulgaria are not improving. The question of transit across the Danube has become more difficult, owing to Bulgarian highhandedness, with the result that Roumania, not to be ordered about by her impertinent neighbour, has ordered the suspension of all transit traffic. The matter, to us, may appear unimportant at the present moment; but later on, when a state of normality has been granted to Europe, the question of the right of an upstart State like Bulgaria to interfere with traffic up and down and across the Danube will have to come up for definite settlement. In other words, we have in Bulgaria's present attitude towards Roumania an apt illustration of the whole Danube problem as frequently dealt with in these columns. The future must see Roumania, with whom the Danube is as important as it is to Austria, in a position to carry on her river trade without hindrance from neighbours. The Boches, I have every reason to believe, are well aware of the importance of the Danube—the great fluvial artery of the Near East—in all political combinations, and doubtless the Kaiser, in sending another German Prince to the Court at Bucharest, is attempting, among other things, to compromise between Bulgaria and Roumania as regards river traffic.

***

Put a beggar on horseback and he will ride to the devil, and that is apparently the destination of Bulgaria and her politicians. Reference to the letter of our Bucharest Correspondent, published today, will show that the Sofia mob, not content with their treacherous ingratitude to Russia, are preparing a quarrel with their Austro-Hungarian Allies and are issuing a direct challenge to Greece and Roumania. A challenge is certainly involved in the "hint" given to Bulgaria's "neighbours" to prepare to fall in with the new railway arrangements by which she proposes to serve her "new frontiers." The ambitious programme of railway extension set out by the *Echo de Bulgarie* is so obviously an "echo" that I need not lend dignity to it by discussing it. I will venture to agree with the paper, however, so far, that Bulgaria will have new frontiers after the war; but they will not enclose as much of Bulgaria as they do at this moment. There is a day of reckoning coming soon for these creatures of Attila, a day for which we can afford to wait with confidence and calm.

***

The Central Powers made a bold and unprincipled attempt to extort from Roumania several millions of francs in gold, but the authorities at Bucharest were not such easy victims. The Roumanian tax on cereals exported to Germany and Austria amounted to about 19,000,000 francs, and, as per contract, Roumania demanded payment of the money in gold. The Central Powers are fully aware that the law in Roumania is that no gold shall be exported from the country. Notwithstanding this, however, Berlin and Vienna have combined to demand that Roumania shall pay them in gold for merchandise imported into Roumania. I am glad to see that Bucharest has resisted this preposterous claim. Whatever might have been the case a year ago, the Central Powers are no longer in a position to threaten force. A threat to overwhelm Roumania by sending half-a-million apostles of Hunnish "kultur" would have no effect now, unless it was to produce a good deal of amusement.

***

A correspondent writes as follows from Casablanca, Morocco:—"It is, I think, apparent that British interests in Morocco may only prove a pawn in the game of International politics, and that all that those interests can hope is that there is no indecent hurry in 'swapping' them. It seems pretty evident that we may be on the eve of surrendering the Capitulations in exchange for something of the same sort in Egypt, and an excellent market may, perhaps, be lost to England, as have been Algeria and Tunis. Whether Great Britain can afford to sacrifice any markets after she comes out of this war is not for me to appreciate. But that the matter should have full and public discussion, and not be settled by a ring of politicians—of that I am perfectly sure."

***

The writer of this letter is a keen and able man of business who may be relied upon to know what is happening in the country in which he is living and working. Without prejudice, as the lawyers would say, to the accuracy or otherwise of his estimate of the situation—and I have no reason to doubt it—I agree that the matter is one that requires very careful attention indeed. We must not forget, however, that the British Chamber of Commerce, formed in Tangier some time ago, is a watchful and discerning body, not likely to allow a threat against our interests to go by default. Moreover, we have the Bank of British West Africa now at work, with a statesman interested in its welfare in the person of Lord Milner. This combination may be trusted to be watchful.

***

I am entirely in sympathy with the sentiment which has led the Australian Government to request traders and manufacturers to refrain from adopting as trademarks, or for other commercial purposes, the word "Anzac." Its use in connection with trade has been forbidden entirely in the Commonwealth. The name has tragically glorious associations with the Australian people, and it is little wonder that they should desire to keep it sacred; indeed, the wonder to me is that, as so many of our own splendid fellows, both of the Mother Country and from India, were associated with the Australians in Gallipoli, the use of the name was not anticipated by prohibition in this country as well as "Down Under."

***

At the risk of being charged with importunity I must refer again to the fact that the Huns are already beginning to prepare for the days in which "open" trade will be the rule, and to refer readers of THE NEAR EAST who, so far, have not realised the importance of being in earnest in this matter, to the report of the British Vice-Consul at Zante. It is obvious from this document, which was published in a recent issue of THE NEAR EAST, that time lost in pushing trade now will be difficult to recover later on. "There are indications," we read, "that German exporters are already making preparations to resume business operations and to resume their position in trade as soon as the war is over." It is better to be sure than sorry, and business "left over" until "to-morrow" is always potential sorrow.

***

The British Government have always suffered through their tendency to be long-suffering and of great mercy, and I am therefore glad to observe that during the last week or two they have given some sign that they are now proposing to add a certain amount of discretion to their benevolence. The decision to withdraw from the Declaration of London was the first sign of an awakening; last week we had another, that is if the President of the Board of Trade may be regarded as a responsible representative of the Government. The Minister has laid it down that "as British traders are unable to obtain payment of amounts due to them by enemies, he is disposed to think that it would be inexpedient as a general rule to diminish the capital available for carrying on their businesses by compelling them to pay to the Public Trustee the debts which they owe to enemies." The only wonder is that it has taken two years of war with the most barbarous and unscrupulous enemy the world has ever known for Britain to find the way of wisdom.

The One Hundred Firms.

Why Manufacturers should Co-operate with Producers of Raw Materials.

We take the following from the *Morning Post*:—"For some little time past there have been informal talks among several of the leaders of British manufacturing industry as to the need for a strong organisation to represent the national interests. Various attempts have hitherto been made in this direction, but have all, for one reason or another, come short of expectations. The present movement, which began in a private conversation, had for its central idea that a hundred strong firms should each put down £1,000 as a guarantee, and that they should then meet and discuss the project more closely. It is an excellent sign of the spirit of the country that the hundred firms were soon forthcoming, and indeed the number is now considerably more."

John Wesley once said that if he could get a sinner convicted of sin he would get him "saved," no matter how great a sinner he might be. Similarly, if the British manufacturer could be induced to submit himself to a course of thorough self-examination, and then to admit his shortcomings, he would soon be able to free himself from the condemnation which has been his for so many years. It is satisfactory to observe the indications that he is approaching the stool of repentance. He has certainly entered upon his self-examination and, given the requisite frankness and the inclination to tear himself away from his old and cherished heresies, he will emerge from the ordeal a regenerated man. But the lost British position in industry and commerce is not going to be won back merely by talk, or by newspaper publicity, or by tentative promises of amendment. To win there must be definite action in two directions—backwards, for the tearing up of the effete and obsolete, and forward, for the adoption of the modern and scientific. That is the only way of salvation, and those who are not prepared to pursue it may as well get out of the way of others who have abandoned the old road, with all its paralysing inadequacies, and require all the room they can get in the new.

Manufacturers' Association.

The movement spoken of in the first paragraph of this article culminated in a meeting last week of a number of British manufacturers, led by Sir William Peet and Mr. Dudley Docker. The general drift of the speaking, we are told, was that the national interest of the kingdom had suffered terribly in the immediate past by the fact that our manufacturers were disorganised and helpless. It was decided to form an association the policy of which would be decided by events; pressing problems would have to be settled as they came up. Other points which concerned the meeting were the need to combine on a national basis to meet the competition of other countries after the war, and the unfair manner in which the Government had taken advantage of the patriotism of controlled firms. It was strongly emphasised, too, that the association should be exclusively British and exclusively manufacturing. We do not propose now to concern ourselves with the charge against the Government, although it is possible that arguments may be found to support it. It can be dealt with later, however, when there is time and opportunity to embark upon a complete and general survey of the relations of the Government with our great national industries. The outstanding vital need of the moment is to discover how lost ground is to be made good, how best to co-operate with British producers of raw material, how to get into close and sympathetic touch with markets at home and abroad, and how to compete in them with those who are our most formidable rivals. If we are to accomplish this great task successfully—and time is the very essence of it—we shall have no time to waste on recriminations. There must be a truce to such diversions in the fullest sense of the word, and it must be a matter of honour to observe the truce, for division at home will mean failure abroad.

Before the war broke in upon our national self-complacency complaints were made very frequently—so frequently, indeed, that hope was almost killed—that our manufacturers had become so indifferent to the march of events that they had ceased to care whether they were out of touch with modern demands or not. It was said of them that they were hopelessly conservative, selfish, and self-sufficient, and that they refused to adapt themselves to the needs of the time. As a matter of fact, some of the charges were true, some of them were false, and some of them were exaggerated; but in any case it was obvious that, whatever the reason was, the British manufacturer had lost a lot of ground. That, we think, was fairly recognised, as was the proposition that before we could hope to recover what had been lost confidence had to be restored—the charges had to be disproved if they were false, or, if they were true, guarantees had to be given of absolute and permanent conversion.

One of the Guarantees.

The movement which has just been inaugurated may be regarded as one of the guarantees, probably the most serious guarantee that has been given, and those who are concerned with it are to be congratulated upon the apparently definite steps they propose to adopt. In one respect, however, we would venture upon a suggestion. It is that the association will do well to take the Oversea Dominions into fellowship. There was a time, perhaps, when exclusively home deliberations could not be described as parochial; but that time has passed never, let us hope, to return. For some years now there has been a demand for closer commercial relations between the mother country and the Dominions, and in theory, at least, the demand has been conceded. Conferences have been held, visits have been exchanged, and a good deal of policy has been outlined; but up to the outbreak of the war the result, practically speaking, was nil.

Catastrophe though it has been in the loss of so many splendid men and so much treasure, the war came to prove to us the reality of what, previously, some people had believed mere conventional claptrap. Whenever and wherever a Colonial met a Home-born Britisher—if the audience were sufficient—we heard from both sides of "the tie that binds." It came to be regarded as a platitude, as a patriotic propriety that sounded well. The war has proved it to be a cable of hope. It was neither a platitude nor a propriety; it was a fact, and to be just we must admit that most of the sacrifices that were necessary to realise this ideal of Empire have been made by the Dominions. In this war we very properly took upon ourselves the defence of a principle, or a group of principles, the foremost among them being the right of the smaller nations to exist alongside their more powerful neighbours free from the risk of aggression and the injustices which aggression must inevitably produce. In fighting for this great principle it was inevitable that we should come into conflict with nations less scrupulous than, and as powerful as, ourselves and our Allies, and the result is that the original issue of the struggle has been widened to include our national existence. That is the point at which the Dominions came in. The responsibility was entirely our own. If they had left us to settle with the enemy single-handed, while our sentiment would have been mortally wounded we could not have found fault with their decision. Happily, however, they made the cause of the mother country theirs; they shouldered part of the burden which would have been too heavy for us to carry alone, and with us have shown to the world an example of unity which is unparalleled in all the ages. That is one of the reasons why the Dominions should be given an opportunity of coming into this association.

Another Reason.

In a recent article we discussed the question of preserving British produce for British manufacturers, and that brings us face to face with another reason why this exclusively British manufacturing fellowship should open its doors to the oversea producer. We may assume that British manufacturers attach some importance to the availability of an unfettered supply of raw material, and to the possibility of establishing such relations with oversea British producers as would enable them to secure something of the character of preferential treatment. That would be an advantage which the manufacturer is not likely to undervalue. The question he has to consider in that matter is how to secure it. It would be futile for the producer to commit himself to a policy of preference if the manufacturer did not first undertake to utilise to the fullest extent all the opportunities which the producer would provide and, second, make some return to the producer for the sacrifices his restricted market would impose upon him. To achieve these results a definite alliance between the two would be imperative: alone neither could hope to succeed; together, they could not very well fail. And let this be remembered: it is the manufacturer who has the most to gain from the partnership. The producer could always find buyers for his wares, even if the British manufacturer went out of work to-morrow. Egypt, India, and Canada, to mention three, would be welcome in any market they chose to enter. India's jute, cotton, seeds, ore, minerals, hides and skins, and a hundred other articles, mention of which is to be found in the trade returns, are indispensable to industry. In 1914 we were glad to buy nearly £40,000,000 worth of these goods, and they were not bought merely to give India a show. To a less extent the same is to be said of Egypt and the Anglo-Egyptian Sudan, with their rapidly expanding production, and of Canada, which sent to us in the same year food and materials to the value of £40,000,000. These are facts and figures worth thinking about, and the manufacturer will do well to ask himself if, in planning means to extend and develop his operations, he can afford not to co-operate with peoples great enough to produce these masses of materials, if he can afford to ignore the possibility of securing them on the basis of preferential treatment.

Sellers and Buyers.

There is another factor to be considered also. The Dominions are not only countries of production: they are also among the largest buyers we have. Let us go back to the Indian Returns and place against sales to us our sales to India. Still taking 1914 as the basis, we find that India bought from British manufacturers goods valued at nearly £55,500,000. Canada purchased to the extent of £17,380,000, while Egypt and the Anglo-Egyptian Sudan accounted for a very considerable sum. It comes to this in the end, that in many cases the British manufacturers find in the Dominions their largest supplies of raw material and afterwards secure in them their best customers for the goods they manufacture from them. Could any greater evidence in support of the contention on behalf of co-operation be submitted?

We can answer for this: if between the manufacturer at home and the producer of raw materials in the Dominions there were faith and confidence there would be no risk of aliens coming in to steal the trade. The markets of both would be assured. In this matter the onus lies on both, but chiefly on the manufacturer at home. The producer abroad would never refuse the advances of the other: on the contrary, he would welcome them. Together they would make an invincible combination, and it is a point for the new association to choose—successful ready-made trade with co-operation on the one hand, or isolated action in a fight for markets on the other. Which shall it be?

PROSPERITY OF THE SUDAN.

(From Our Own Correspondent.)

Cairo, July 11.

The Sudan Government has just published the final accounts for the year 1915, and we find ourselves face to face with another entirely unexpectedly favourable state of affairs. My review of the accounts for the preceding year terminated with the remark that we must be prepared for the possibility of a deficit at the end of 1915, for reasons which the recent note on the 1916 budget clearly set out. This prediction bade fair even at a late date in the year to become realised, but fortunately a sudden improvement set in, and as a result the Sudan Government has been able to close its books with a revenue figure which is but a few thousands less than the budgetary one, viz.: £E1,495,227, against an estimated £E1,501,000. By dint of rigorous economy, in which the loyal co-operation of the entire personnel played a prominent part, the expenditure was kept down to £E1,463,934, or £E37,066 less than the credits originally provided. The net outcome of the year's working is a surplus of no less than £E31,293, which was a result never for one moment contemplated even by the most optimistic, and which constitutes a remarkable testimony alike to the ability of the responsible authorities, and to the extraordinary manner in which, despite adverse circumstances, the Sudan has managed to recover some of the leeway lost during the past three years.

The revenue realised is £E48,322, and the expenditure registered £E67,412 less than those of the preceding year. The difference in revenue bears principally on the following heads, viz., increases: Ushur (Land Tax), £E18,399; and rent from Government property, £E12,149; decreases: animal tax, £E13,227; Customs, £E14,932; steamers, £E32,594; railways, £E4,443; whilst under expenditure, provinces diminished by £E11,167, forests by £E8,963, steamers by £E30,217, and railways by £E59,187 (General Central Services of the Finance increased by £E48,805).

Increased Figures.

It is interesting to note that the Budget figures for 1916 are somewhat higher than the results of 1915. Thus, the revenue and expenditure, which have been fixed at £E1,642,500, are respectively £E147,273 and £E178,566 in excess of those figures. The chief items where the current year's figures exceed those for 1915 are, under receipts: provincial, which include tribute £E33,379; Customs, £E5,068; agriculture and forests, £E22,651; public works, £E16,627; railways, £E76,058; and steamers, £E10,774; and under expenditure, provincial, £26,122; agriculture and forests, £E11,948; veterinary department, £E5,246; steamers, £E6,458; posts and telegraphs, £E7,491; and railways, £E117,196.

The peculiar position in which the Sudan finds herself was dealt with in full in the recent review of the Budget figures for 1915, which appeared in The Near East of July 14, and I do not to-day propose to repeat what I said on that occasion with regard to the future prospects. This much I will say, however. The increase in the estimates over and above the realised receipts of the year just closed are fully justified by the excellent reports on the agricultural situation in the Sudan, and by the general improvement in internal trade, which the opening up of Darfur is bound to produce. The financial result of the administration of the Sudan during 1915 in the circumstances under which it was obtained serves but to confirm the expression of confidence as to the future of the country which has been so often voiced in your columns—a confidence that is bound to subsist and meet with justification so long as those who have controlled its career during the past years remain at the helm.

The joint Austro-German organisation set up at Bucharest to secure the export of cereals, petroleum, and groceries, and the importation of various goods from Germany and Austria, has not worked to the satisfaction of the Austrians, who found that the Germans were absorbing everything, says a telegram to the *Morning Post*. The Austro-Hungarian Legation has therefore established a separate bureau.

RED SEA TRADE.

(From Our Own Correspondent.)

Khartoum, June 30.

The opening of trade with certain ports in the Red Sea has provided an outlet for a considerable quantity of grain for export. In the Gezira, where the chief supply of grain (durra) for commercial purposes is grown, there is said to be still a third of last year's crop in store against the possibilities of a bad year. As the prospects of this year are good so far, it will be advisable for the native owner to "unload" his old grain if he can, and the Arabian Peninsula, which is in great need of foodstuffs, offers a good opportunity.

Reports from the date palm districts tend to show that the crop of dates will be moderate only. This is due partially to the fact that the Nile only remained at high level for a very short period last year, and still more to the locusts, who ate down the fronds of the trees and thereby weakened them. Apparently the tall trees suffered worse than the young ones from the depredations of the locusts, possibly owing to the greater care with which the pest could be driven off the shorter trees; but the latter are said to be bearing very well, whilst the tall ones have little or no fruit. The dry date of the Sudan is consumed almost entirely locally and in Egypt. It has no sale in Arabia owing to the liability of the dates to be attacked by worms or boring beetles.

SUDAN DARI AS POULTRY FOOD.

A pamphlet has been issued by the Commercial Intelligence Branch, Central Economic Board, Sudan Government, in which the value of Sudan Dari (dura) as poultry food is explained.

Dari, it is pointed out, has been known to poultry keepers in the United Kingdom for many years, and used in grain form for feeding growing chickens as an alternative to millet, to which it is distinctly superior. A small percentage of dari is generally to be found in poultry mixtures. Hitherto it has not been regarded with favour for adult stock or laying-hens. This is due in large measure to its seed-like form, and also to the fact that the total supplies are comparatively small. This grain—for such it is—varies considerably. Some samples are small, whilst others are larger, the last-named of which are generally preferred, due to the fact that there is less risk of wastage when fed as grain. It is flat, with a fine skin, and the flour content of that generally exported from the Sudan is white and soft, even though it is the product of a hot country, and it is low in water contents. As revealed by analysis, the amount of fibre and ash is relatively small—in one sample only 2.7 per cent.—so that the percentage of nutrients is high. Poultry are very fond of dari, as it is palatable and easily digested by them. Hitherto it has not been fed in meal form. With extended use that will be changed.

Until the outbreak of war, Sudan dari was sold at about the same prices as maize, with which it was, to a limited degree, in competition. Experiments at Armstrong College, Newcastle-on-Tyne, and elsewhere in feeding milk-cattle, have given as good results with dari as with maize. For poultry, a decided advantage possessed by dari is that the fats are white—not yellow, as in the case of maize, which makes yellow, oily yolks in eggs and yellow flesh on birds. Recently, the price of dari has been lower than that of maize by several shillings per quarter of equal weights (480 lbs.), although the advance in freights has affected both classes of grain. With greater shipments from Port Sudan the difference in values should be maintained. Dari is the better food for poultry, not alone by reason of more perfect balance and greater percentage of proteins, which supply the elements for eggs and flesh, but from the fact that it is higher in digestibility—the chief factor in appreciation of food values.

The large size of Sudan dari enables it to be fed among litter in scratching sheds without waste. Greater use of Sudan dari for feeding poultry of all species and ages will enlarge the range of feeding stuffs and cheapen the cost of producing eggs and poultry.

Copies of the pamphlet may be obtained on application to the offices of the Sudan Government Railways, Northumberland Avenue, S.W.

TRADE OPENINGS.

The Army Finance Department, Cairo, invite tenders for the supply of fourteen tons of candles to be delivered c.i.f., Alexandria or Port Said. Date, September 5, 1916.

The Director of Personnel and Equipment Department (Supplies Office) invites tenders for the supply of photographic material required, for a period of one year commencing on August 1, 1916, and ending on July 31, 1917, for the Ministry and the Identification Service of the Ministry. Date, August 1, 1916.

Accepted Tenders.

Citadel Stores, Alexandria and Cairo.—Vacuum Oil Company's tender for petroleum, value £E1,139.326m.; Paul Lifshitz's (Cairo) tender for copper cooking utensils, value £E179.326m.

War Department Stores.—Banco di Roma's tender for wheat, value £E14,572.500m.

TRADERS' BLACK LIST.

United Kingdom.

By an Order in Council, dated July 18, the following additions have been made to the statutory list of firms abroad with whom trading is prohibited:—

Haji Amin-ut-Tujjar Brothers, Ispahan, Persia.

The following name has been removed from the list:—Constantacopoulos and Co., Patras.

The *London Gazette* announces that orders have been made by the Board of Trade requiring the undermentioned business to be wound up:—

Roumanian Oil Trading Company, Ltd., 6, Lloyd's Avenue, E.C., shipping agents of a Roumanian company. Controller: Rodway Stephens, 31, Lombard Street, E.C.

Egypt.

Mr. E. D. Joyce, Imperial Ottoman Bank, Alexandria, has been appointed receiver of and instructed to liquidate, the business of A. Stross.

Mr. R. E. Moore, Savoy Chambers, Cairo, has been appointed Receiver of, and instructed to liquidate, the business of the Gasmotoren-Fabrik Deutz.

TRADE FACILITIES.

Commenting upon the work of the committee appointed to investigate the best methods of providing financial facilities for trade after the war, with special regard to the financing of overseas contracts, the *Financial News* writes:—"The composition of this committee is such as to inspire confidence that their report will provide a solution of this vexed question, and that such report will be issued in good time to enable the necessary steps to be taken before the declaration of peace. If the German papers are to be relied upon, German bankers and merchants, with the aid of their Government, have already perfected a scheme for the prosecution of a gigantic trade war immediately the seas are once again open to them, and it would be a thousand pities if the commencement of their new campaign should find this country in a state of unpreparedness."

ADVANCE SERBIA.

The little kingdom, so cruelly treated in the course of the European war, is in a parlous economic condition, but it will get back its own, with compound interest, when the "special settlement" takes place. Hence the demand for Serbian bonds at rising prices on the Paris Bourse, the Four and a-Half per Cents. selling at 59¼. I recently mentioned the shares of the Bor Copper mines, freely dealt in both there and in Geneva, dividends being paid in spite of the German-Bulgarian occupation. Serbia has large mineral resources, which will be exploited to her great advantage "after the war."—"Alert II." in the *Financier*.

A report from Petrograd says that in Merv the market prices for carpets have risen by about 80 to 90 per cent. Carpets that cost 50 roubles before the war now cost 80 or 90 roubles, whilst goods worth 100 roubles before the war cannot be had now for less than 180 roubles. The cause for the dearness in carpets is the material prosperity of the Turkomans, who can sell agricultural products at good prices, a large demand for carpets in Persia and the fall in the Russian exchange compared with Persian money.

EGYPT'S FOREIGN TRADE.

We take the following from a translation of an interesting article on the import trade of Egypt in 1916, which appeared in a recent issue of the journal of the Hellenic Chamber of Commerce, Egypt.

The monthly statistics issued by the Egyptian Customs on Egypt's foreign trade from January 1 to May 31, 1916, show a persistent increase in imports, a fact which is considered by those acquainted with the actual dullness of the market, as an ill-omened symptom, which might have rather serious consequences unless a return to the old activity and demand sets in.

The following table shows a progressive increase in imports as compared with those of the corresponding period in 1915.

	Imports in 1916. £E.	Imports in 1915. £E.	Increase in 1916. £E.
January	1,695,054	990,166	704,888
February	2,254,517	1,165,174	1,089,343
March.....	2,469,781	1,332,390	1,137,391
April	2,348,274	1,476,767	871,507
May.....	2,970,052	1,578,769	1,391,283
Total	£E11,737,678	£E6,543,266	£E5,194,412

In this large increase in imports during the first five months of the year, amounting to £E5,19,412, England ranks first with an increase of £E3,022,457, being 58 per cent. of the total increase table :—

Imports from the United Kingdom	1916. £E.	1915. £E.	Increase in 1916. £E.
January	781,287	436,786	344,501
February	1.087,062	608,677	478,385
March.....	1,228,720	643,176	585,544
April	1,287,275	588,645	698,630
May.....	1,679,262	763,865	915,397
Total	£E6,063,606	£E3,041,149	£E3,022,457

Out of the amount of £E11,737,678 representing the value of general imports from January 1 to May 31, 1916, a sum of £E3,138,597 represents the value of groceries, foodstuffs, liquors and other colonial products as against £E1,834,885 during the corresponding period in 1915, being an increase in 1916 of £E1,293,712.

The great activity of trade in these commodities in 1915, which was not due to the buying capacity of the people, but to the presence of many troops, drawing at that time their supplies direct from the market, turned the heads of the traders and tempted them, besides many outsiders, to throw themselves recklessly into the import trade, with the results as shown in the figures given above. Many companies have been started for this exclusive object.

At the outset, the supply could not, indeed, cope with the growing demand, and this induced the merchants and traders to pass orders, especially to the United Kingdom, for large quantities of goods, expecting that the demand on the spot would continue.

In this expectation they have been badly disappointed. Experience proves that such is the usual end of a trade activity based on an unstable factor such as large expeditionary forces, which are always on the move. On the one hand, large numbers of troops left unexpectedly, and on the other, the Army Commissariats found time to make arrangements for supplying the remaining troops by arrivals direct from England. The principal factor of trade activity, therefore, ceased just at the very moment when it was most necessary to the market. Unluckily for traders, most of their orders, owing to scarcity of tonnage, were accumulated at the docks in the United Kingdom and were almost all shipped at one and the same time. To make matters worse, British manufacturers and merchants availed themselves of the growing advance in prices and invoiced old and fresh orders alike at the highest limit. Of course, manufacturers always reserve the right to charge prices ruling at the time of shipment, but this is meant, we think, to apply to orders for prompt shipment and not to orders having been executed months ago and delayed through lack of tonnage.

The market is now consequently much overstocked and does not know how to dispose of the goods, many of which are principally consumed by troops. Some of those liable to damage have been re-exported to England, but the bulk remains unsold, and it is most advisable that the market should in some way dispose of the goods and so be relieved from undue overstocking.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co.,Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c.. &c.
CONTRACTORS TO GOVERNMENT.

PRODUCE REPORT.

LONDON, July 27.

Currants.

There has been more activity in the market during this week; but the amount of business done was comparatively small. Prices are hardening for all grades, and with the unfavourable advices from Greece regarding the new crop, and the anticipation of higher freights, it is expected that they will be very high this year. New crop fruit has been offered for early September shipment, at 49s. for Pyrgos, but there were no buyers. However, owing to later advices such offers were withdrawn and in some quarters higher prices are asked now. There is no doubt that under the circumstances there will be a certain amount of speculation.

Sultanas.

The demand is very moderate, business being done more or less in Afghan fruit of the cheaper grades. Prices, however, are well maintained.

Seeds.

Linseed is firm, but quiet, London-Calcutta spot and afloat offered at 71s. 6d., July-August 73s., August-September 73s. 6d., and Bombay ordinary August-September 74s. 6d., while small grain ditto 73s. 6d. Rapeseed is dull, Toria being quoted, July-August 60s. 6d. and August-September 62s. Cotton-seed is quiet; London-Egyptian July is offered at £13 5s., and Fayoumi, September, £12 15s. per ton.

Oils.

Linseed oil has been very steady, and pipes on spot are quoted £34 15s., barrels ditto £35 15s., landed terms. Rapeoil is firmer, ordinary brown, naked, nominal; whilst English, refined, barrels is offered at £48 to £50. Cotton oil is firm, crude spot, pipes selling at £40; refined pipes, pale, quoted £44 10s., and barrels sweet £52 to £54, as to make.

Oilcakes.

Cottoncakes.—Only a small quantity of Egyptian is available on spot, for which £9 12s. 6d. to £9 15s. is asked. English makes are dear, £9 5s. to £9 15s. per ton being asked. Linseed cakes are in better demand and prices are advancing owing to an anticipation of further enhanced prices. Best London made are quoted at £13 to £13 5s., and fine seedy Calcutta at £12 17s. 6d. to £13 ex ship.

IF GERMANY RULED.

Lord Cromer's contribution to a recent debate in the House of Lords, initiated by Lord Haldane's motion regarding education, appears to have occasioned some heartburning in Germany. Our amiable friend, the *Cologne Gazette*, says:—

It makes an immense difference whether one pursues humane studies with a private income of £2,500 a year, or whether one is appointed to a German Gymnasium with a commencing salary of £150. Lord Cromer is also very enthusiastic about the capable British agents—the Proconsuls of the British World-Empire. Give our administrative officials Burma and the Sudan and India to govern, and it would be a miracle if they did not produce splendid results—probably something just as good as is produced by the English gentlemen from Oxford and Cambridge.

Commenting upon this comic lament in a letter to *The Times*, Lord Cromer writes:—

It is not probable that the Germans will ever have an opportunity of letting the world judge whether, either in the case of Burma, the Sudan, or India, the "miracle" of turning out capable and sympathetic German administrators can be accomplished. The precedents afforded by the treatment of Schleswig, the Polish provinces of Prussia, and South-West Africa, where the Herreros have been well-nigh exterminated, foster the belief that, even if the opportunity were afforded, it would not be seized. The Germans appear to have failed to grasp the fact, which lies outside the question of the personal fitness of individuals, that their Imperial policy, being based on a process of ruthless Germanisation, is the extreme antithesis of that persistently, and in most cases successfully, adopted by the Governments and people of this country.

BULGARIAN NOTES.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, July 3.

A quarrel has been in progress for some time between Bulgaria and the Austro-Hungarian Danubian steamship companies regarding the rate of freight charged by the companies, which introduced a system altogether unjust and arbitrary. Negotiations were protracted, and as there seemed no chance of the steamer people coming to reason, the Bulgarians settled the question, to their own satisfaction at least, by seizing all their ally's steamers that happened at the moment to be in Bulgarian ports on the Danube.

Some time ago all the Opposition members of the Committee of Public Supply resigned as a protest against the action of the Government in converting that body into an instrument of party intrigue. With the disappearance of the Opposition representatives the only independent members of the Committee left were the delegates of the various Chambers of Commerce who declined to support the Government policy, desiring that the Committee should preserve its legitimate character. This attitude did not satisfy the Government, who ousted the commercial men and replaced them with more complacent tools. This action has elicited a spirited protest from the Chambers of Commerce.

Ambitious Railway Projects.

The *Echo de Bulgarie*, the publication of which was suspended for some time, has reappeared as an official organ, and has signalised its new life with a vehement demand for the recognition of Bulgaria's "new frontiers." "The new Bulgarian frontiers," it writes, "will need the institution of new railway routes, and our neighbours should now make their arrangements to come into line with our organisation of the same." The new lines suggested by the paper are:—"(1) Eastern Hungary: Arsova-Rustchuk-Varna-Constantinople; (2, Budapest - Arsova - Sistor - Tirnovo - Stara-Platina-Constantinople or Dedeagach-the Ægean Sea; (3) Budapest-Arsova-Lom-Sofia-Constantinople or Dedeagatch-the Ægean Sea; (4) Budapest-Arsova or Basiach-Bridge over the Danube-Valley of the Timok-Pirot-Sofia-Constantinople or Dedeagatch; (5) Budapest-Belgrade-Nish-Skopje-Valley of the Vardar-Salonika or Kavalla; (6) Nind and Western Hungary-Mitrovitza-Skopje-the Valley of the Vardar-Salonika-Kavalla.

TURKEY'S PAPER CURRENCY.

The American Chargé d'Affaires at Constantinople has transmitted to the Washington Government, under date of May 5, 1916, a translation of a Turkish law as passed in final form by the Ottoman Parliament on December 31, 1915-January 13, 1916, providing for the issuing of 150,000,000 fr. of paper money, based upon a deposit of gold with the Ottoman Public Debt Administration. The law provides that this paper shall be received in exchange in the same manner as coin, in all expenditures and commercial operations in any part of the Ottoman Empire, whether between the Government and individuals, or between individuals. Those who do not obey this obligation are to be punished by a fine of £T1 to £T15 and from twenty-four hours to one month's imprisonment.

The equivalent of this paper money will be paid to the bearer in gold upon presentation at Constantinople six months after the conclusion of peace. In case this paper money shall not be presented for payment, according to this provision, within five years from the date it falls due, the provisions of the statute of limitations are to apply in favour of the Treasury.

"The activity of cultivation in Turkey has led to the foundation of an Ottoman Agricultural Bank, and that as an efficient adviser on the credit system the Chief Counsellor of Finance, Herr Kautz, of Berlin, has been appointed general director of the Sultan's new bank," is a statement for which the *Frankfurter Zeitung* has made itself responsible.

NEWS FROM ALL SOURCES.

Lime is reported to have been discovered close to Raga, Bahr-el-Ghazal Province, Sudan.

Orders of some magnitude from Cairo for steel tools are being executed in Sheffield workshops.

Persians living in the British Isles are reminded that they must have a Persian "passeport de séjour."

It is estimated that over 120,000 Bursh mats were exported to Egypt from the Berber Province last year.

According to a recent message from Bucharest, the recent rains and the resulting considerable improvement in the crops induced the chief export committee to continue the export of maize, in accordance with the second treaty with the Central Powers.

The increase of the Greek tariff rates of duty by 10 per cent., which was proposed by Article 1 of the Bill recently introduced in the Greek Chamber, and provisionally enforced, has now been suppressed, and the sums already paid to the Greek Customs in respect to this increase will be refunded.

In return for permission to bring 7,000 tons of Roumanian petroleum and 4,000 tons of benzine across Austria, it is reported Switzerland has had to promise Austria 150 tons of salad oil, 50 tons of sulphur, 50 tons of cotton, 50 tons of Manila hemp, and 350 tons of coffee.

It is reported that the central railway station at Benghasi is now open, and that the line from Benghasi to Er-Regana is in working condition. This line will, in due course, be prolonged to Merg, Cirene, and Derna, and will follow the coast beyond to Tobruk and the Egyptian frontier. A second line from Benghasi to Gidalia is said to be contemplated.

Writing to a London newspaper from Kordofan respecting the recent operations against the Sultan of Darfur, a Staff non-commissioned officer says: "By the acquisition of Darfur we have gained an exceedingly rich and fertile province, and one that is worth a thousand times more than all the trouble and expense we have been put to. The work had to be done, for the Sultan Ali was a menace to the whole Sudan, and now that all is over so much the better for Egypt and ourselves."

NEW TURKISH LOAN.

According to a Constantinople telegram, dated July 25, the *Official Gazette* (says Reuter) publishes a law authorising the Government to conclude in Germany an advance of £T2,359,000, which raises the amount of the third advance to £T9,599,000. An equivalent for the new advance will be deposited by the German Government in German Exchequer bonds, against which the Turkish Government, as heretofore, can issue paper money to such amount as it thinks necessary, and on the same conditions as the previous advance.

ENGINEERING NOTES.

Looking Ahead—for Serbia.

An interesting reference was made recently to the future of Serbia when she shall have been released from the devastating presence of her enemies. In a paper read before the Municipal Electrical Association the other day, Mr. W. T. Kerr dealt with the uses of electricity in agriculture. The paper was based on the writer's experience in farm electric supply, and he described in detail how the necessary energy is supplied in agricultural areas in various continental countries. Farmers in Switzerland, North Italy, Austria-Hungary, and Germany are very well served by numerous hydro-electric installations, both as to availability and cost. Serbia, said the lecturer, need not be without these advantages when she has been liberated. If her resources of water power are developed along scientific lines the establishment of hydro-electric installations will not be a difficult matter. The uses of these valuable power works are not confined to agriculture, it goes without saying, and we may look forward to the industrial resurrection of Serbia with great hope. It is too early, perhaps, to form estimates of what may happen, but this much may be said with some assurance, namely, that no scheme for the rehabilitation of the presently stricken country could leave out of account the restoration of her suspended industries.

Handicaps on British Firms.

A large number of complaints have been made recently, both at home and abroad, that orders placed with British engineering firms are very much in arrears, and that, in consequence, they are likely to suffer in future through the diminished confidence of customers. Already, it is said, inquiries are not being made in anything like the same volume that was the case up to a short time ago. This was to be expected, perhaps, in all the circumstances, and we are glad to see that the *Sheffield Daily Telegraph* has given some prominence to an explanation which, for once, clears the British manufacturer from the usual charge of indifference and slacking. According to our contemporary, the trouble is due "to the gradual development of all industrial machinery and organisation by war demands. In the ratio in which these demands become more pronounced must private trade disappear." It is, we think, desirable that this point should be emphasised, for buyers in neutral countries are not disposed to be patient for long periods, especially when other markets are possibly open to them. So long as this war lasts, British war orders must receive exclusive attention, for if we are to resume normal or, as we hope, increased trade afterwards, we must win the war. At the same time, it would be a wise proceeding to let the facts be known. Foreign customers would be more ready to forgive delay of which they have had warning, than being kept waiting when they expected quick delivery.

A Sheffield Story.

A great story which exemplifies the success which the Huns have achieved in scientific research is told in a report just issued by the Board of Trade of evidence given to the Advisory Committee in connection with the manufacture of cutlery. "Some time ago," the story runs, "Sheffield largely used 'dyed stag.' A German, wishing to ascertain the process, sent a sample to Leipzig, where experiments were made, the method discovered and improved upon, and the result given to Solingen manufacturers. Sheffield now buys 'dyed stag' from Germany." It would be interesting to know in what other of our great manufacturing industries piracy has been made so easy for the pushful German. One of the reasons why the British manufacturer has lost trade, it has been said frequently, is the disinclination he has shown to strike out in new lines. Another, it would seem, is that in his innocence he is prepared to give away his trade secrets. One really wonders which is the greatest, the assumption of innocence by the cunning foreigner or the real thing in the Briton.

A Scathing Indictment.

Although it refers to the cutlery trade, it will do good to British manufacturers generally to read this scathing indictment, contained in the same report as that referred to in a previous note. Reference is made to the suggestion that dumping of German goods is extensive in the United Kingdom. Read this:—"This dumping could be prevented . . . . but the decline in the trade is really caused, it is alleged, by incompetence in management, ignorance of workmen, and mischievous interference by old-fashioned trade union officials, while after the war, it is added, a slight measure of protection will be needed to foster industries which have been allowed to decline largely by apathy and neglect on the part of manufacturers." Will this indictment of an important British industry go unheeded? If so the less energy that is given up in Sheffield to an after-the-war propaganda the better. It will be infinitely more profitable to begin now to set a tumbling house in order.

The Rare-Earth Industry.

Another amazing example of German exploitation of a purely British product is that of Rare-Earth. At the annual meeting of the Society of Chemical Industry, held in Edinburgh last week, Mr. S. J. Johnstone read a paper on the subject. He said that notwithstanding the fact that the most valuable deposits of monazite sand so far discovered are in territory under British protection, that is, in Travancore, these deposits and the gas mantle industry dependent on them, were before the war virtually under German control. The sand was obtained in Travancore at a cost of about £4 per ton and shipped to Germany, for the use of the manufacturers of thorium nitrate and incandescent gas mantles in that country. Only a limited quantity of the sand was allowed to be sold to gas mantle manufacturers and others in the United Kingdom, and from them a price of about £36 per ton was demanded and obtained. For most of the mantles made in England, however, thorium nitrate made in Germany was used.

German Slimness.

The manner in which the Germans obtained control of the monazite deposits is characteristically German. A lease for working the deposits was granted some years ago by the Travancore Durbar, with the approval of the Government of India, to the London Cosmopolitan Tin Mining Company, a condition being that the concession could be transferred only to a British company. The Travancore Minerals Company was formed to work the deposits and contracted to sell the whole of its output to a German firm. Soon after the outbreak of war it was found that the whole of the preference shares and 11,000 of the ordinary shares of the Travancore Minerals Company were held in trust for the Auer Company, of Berlin. The India Office has now decided that in future all the directors of the company working the concession must be British-born. German contracts have been cancelled, and the company must be ready at all times to sell monazite sand direct and at a fair price to British firms. A second company, Thorium, Limited, has now obtained a twenty years' lease to work 150 acres in Travancore for monazite sand and is now exporting the sand and manufacturing thorium nitrate from it at works in this country.

Pirates and Copyists.

Like others who could be named, the Persian workmen are clever copyists. For example, the cans in which they buy their petroleum are converted into imitations of European stoves, the tin linings of packing cases in which goods are exported to the country are converted into lanterns, "steel" trunks, boxes, lamps, and a variety of other domestic articles. There is no great durability in these home-made articles, of course, but they serve the purpose of the Persian peasant, and nothing else matters. Wherefore, manufacturers of all kinds keep your travellers employed elsewhere.

SOUTHERN ABYSSINIA.

According to a recent report submitted by Mr. A. Hodson, the British Consul for Southern Abyssinia, the country abounds with opportunities for trade which Egyptian traders would do well to look into. Mr. Hodson gives a pretty long list of imports into his district, viz., coloured cloths, black muslin, silk for head-cloths, cotton and woollen blankets, cooking utensils, enamelled ware, sewing needles, brass wire for earrings, bracelets, tea, sugar, tobacco, soap, matches, cowrie shells, lead, glass, amber, beads, etc.

The report continues: The Boran Province is chiefly remarkable for its livestock and is almost entirely pastoral. The chief places of entry into the province are Moyale and Dolo. Through Dolo a large trade takes place with Italian Somaliland. Through Moyale the chief trade with British East Africa is in cattle, horses, mules, tobacco, grain, and coffee (unhusked) of excellent quality, mainly from the Sidamo Province. The other provinces of Southern Abyssinia produce nearly every kind of cereal and, in addition, coffee, tobacco, cotton, rubber, pepper, chilies, beeswax, honey, vegetables, butter, etc. They would also appear to posssess great mineral possibilities. There are a few Greek traders in Sidamo, which is probably the most productive province, and they do a large trade. These traders obtain their goods from merchants at Adis Abeba for whom, as a rule, they work on commission.

Egyptian currency is not used in Southern Abyssinia; the dollar is the coin almost universally used. There are two kinds of dollars: the Maria Theresa, which is universally accepted, and the Menelik, which, outside Adis Abeba, is not as yet generally current. The Bank of Abyssinia is about to introduce paper money in the form of bank notes, and their use will greatly facilitate trade.

It is necessary to take great care in the packing of goods for Abyssinia, and it should be borne in mind that goods landed at Djibouti are liable to suffer from the damp heat at that port. As all transport to the south is by mules and donkeys it is recommended that boxes or bales should not exceed 80 lbs. in weight. The roads are extremely hilly, and, therefore, it is best to err on the side of lightness. A suitable size of box is 21 ins. by 14 ins. by 15 ins.

BRITISH COTTON IMPORTS.

The number of bales of cotton imported into the United Kingdom during the week ended July 6, 1916, was 54,353 (including 237 bales foreign East African), and the number imported during the twenty-seven weeks ended July 6, 1916, was 2,130,636 (including 8,510 bales British East African and 1,296 bales foreign East African). The number of bales exported during the week ended July 6, 1916, was 3,736, and during the twenty-seven weeks 246,309.

In the month of June, 1916, 24,754 bales of Egyptian cotton were imported, compared with 34,030 in the same week in the previous year. In the six months ended June the total imports of Egyptian cotton amounted to 287,593, as compared with 391,261 in the first six months of 1915.

SHIPPING NOTES.

Enemy submarines continue to be busy in the Mediterranean, and have succeeded in sinking many more British and Allied merchant vessels. Most of the information regarding these losses is reaching this country through Lloyd's agent at Algiers. The latest telegrams give the following vessels as having been sunk:—Knutsford, formerly Greywell, 3,842 tons; Llongwen (W. A. and C. T. Jones Steamship Co., Ltd.), 4,683 tons; Wolf, 2,443 tons. All the above vessels are British. The French steamer Cettois is also reported to have been sunk.

Lloyd's Register reports that during the quarter ended December 31, 1915, 254 steam vessels of all nationalities, of a total tonnage of 332,329 net and 546,757 gross, were totally lost, condemned, etc., of which 164 vessels, of 249,793 tons net and 408,646 tons gross, were war losses. For the United Kingdom alone the total losses of steam vessels were 121, of 178,878 tons net and 291,710 tons gross, of which 83, of 143,170 tons net and 233,177 tons gross, were war losses.

GREEK ACTIVITY.

In actual tonnage of merchant vessels, Greece is to-day eleventh among maritime countries, writes the United States Vice-Consul at Athens in a recent consular report to his Government. In proportion to population, however, Greece is third in rank, England and Norway alone possessing more ships per capita. On January 1, 1916, the register of Hellenic shipping contained 433 steam vessels, with a total of 829.991 tons, and 329 sailing vessels, of 85,750 tons.

From the earliest times the Greeks have been seafaring people, but modern scientific navigation was brought to Greece by the inhabitants of the island of Hydra, who some centuries ago procured charts and nautical instruments from Venice. In the Greek revolution against Turkey the inhabitants of this country were able to muster 700 sailing vessels of 175,000 tons, 18,000 sailors, and 500 fire ships. By 1848 Greek tonnage amounted to 967,000. Sailing vessels have declined from 1,283 in 1886 to 784 in 1915.

The entry of steam as a factor in Greek merchant marine conditions was rather late, but after its introduction it began rapidly to crowd the old-fashioned "windjammers" off the seas. In the eleven years between 1875 and 1886 the number of steam vessels under the Greek flag rose from twenty-eight of 13,000 tons to seventy-four of 30,000 tons. Only one-twentieth of Greek shipping is devoted to passenger traffic. No subsidy is paid by the Greek Government to any of its ships. On the contrary, the merchant marine is a source of actual revenue to the State, and if certain plans now contemplated concerning the taxation of war profits are put into effect this revenue will be greatly increased. In 1915 Greek owners possessed 433 steamers of 892.991 tons. In the twenty-five-year period 1890-1915, Greece developed her shipping to such an extent that the increase was no less than 1,063 per cent., or eleven times.

One thousand and eighty-three head of cattle were exported from the Sudan in May, 1916, as compared with 1,502 in May, 1915—a decrease of 419. In the same month 1.231 head of sheep were exported, as compared with 4,208 in May, 1915.

A QUESTION OF DOMICILE.

In the Supreme Court for Egypt, sitting at Alexandria, his Honour Judge Cator recently delivered an important judgment in which he held that the part-owners of the Greek steamer Nicolaos, who are Ottoman subjects, were domiciled in Constantinople when the war broke out and not at Athens as claimed. His Honour declared their interest in the vessel forfeit to the Crown.

The facts, as stated in the judgment, were as follows:—

The Nicolaos is a Greek vessel of 1,369 tons gross registered at the Piræus. She was formerly British, but was purchased in April, 1914, on a joint account by Messrs. Aivatoglou Brothers, an Ottoman firm of grain merchants doing business in Constantinople, and a Greek subject named Ktistakis. Sixty per cent. of the purchase money was found by Aivatoglou Brothers, the remaining 40 per cent. by Ktistakis, and inasmuch as the Court is no longer bound to give effect to Article 57 of the Declaration of London, it is not disputed that I am at liberty to ascertain the true ownership of the vessel, even though she flies a neutral flag.

It was arranged that the ship should be transferred to the Greek register and not to that of Turkey. The reason why the parties did not wish to fly the Ottoman flag are immaterial, but since (as we are told) no ship can be registered as Greek unless the major part of the ownership is of that nationality, 11 per cent. of the Aivatoglou holding was inscribed in the name of a Greek subject named Stratis as trustee for the firm, so as to place a nominal Greek ownership of 51 per cent. on the register.

The firm of Aivatoglou Brothers consisted of two partners, John Nicolas Aivatoglou and Charalambos Nicolas Aivatoglou. They had an office in Constantinople which was open for a long time after war broke out and was only closed when there was no more business to be transacted

In August, 1915, John Nicolas Aivatoglou left Turkey and went to Athens, and on September 21, 1915, he was naturalized by Royal Decree as a Greek citizen, but he does not pretend to have obtained the necessary consent from the Turkish authorities to change his nationality, and there can be no doubt that in the eyes of the Turks he is still an Ottoman subject. Charalambos Aivatoglou left Turkey in November, 1915, and is now residing in Athens, and tells us that he wishes to obtain Greek naturalisation too; but his family is still in Constantinople.

On these facts I am asked to say that the Brothers Aivatoglou have obtained a commercial domicile in Greece which will entitle them to a release of their share in the Nicolaos.

Now, in January, 1916, the claimants described themselves in their petition to the British Minister at Athens as Ottoman subjects resident in Constantinople, and that, in my opinion, was substantially correct, for I am satisfied that they are still Ottoman subjects even though one of them may have acquired a double nationality, and although at the present moment they are not in the Ottoman Dominion. I consider that they may properly be described as ordinarily resident in Constantinople.

COMPANY MEETING.

Anchor Line (Henderson's.)

Sir Alfred Booth, presiding on Wednesday at the annual meeting of the Anchor Line at Liverpool, referred to the large sums which would find their way to the Exchequer through the large profits being made, and said that he had always been of opinion that the excess profits tax was a blunder for which the country would have to pay sooner or later. From a strictly economic point of view it was indefensible. In the case of shipping the political and social benefits which the tax was thought to secure were far outweighed by the harm done. The money taken by the Exchequer ought to have been turned as quickly as possible into new ships if we were to maintain the size and efficiency of our mercantile marine. The burden which the war was imposing would have to be met by increased production on the part of the working classes and of decreased consumption of luxuries and superfluities on the part of the rich. The only way to achieve the latter end was by means of taxation. He believed that the industrial unrest prevailing prior to the war was largely caused by the glaring inequalities between the standard of living of the poor and the luxurious life of the rich. If we wished to increase the productivity of the country we must stop talking to the working man about thrift and must teach him to spend. If the high wages earned in war time had taught the working man new wants he believed the first step in the right direction had already been taken. The meeting declared a 10 per cent. dividend and 10 per cent. bonus.

COMPANY REPORT.

Maikop Combine.

The report of the Maikop Combine, Limited, states that the profit and loss account shows a gross profit of £85,810. After writing off £31,597 on account of general expenditure for the years 1913-14 there remains a sum of £54,212. The directors propose to write off £5,283 in respect of underwriting commission, debenture issue, and preliminary expenses, and to place to depreciation account £16,305, carrying forward, subject to income-tax, the balance of £32,622. The transactions for the year have been taken at the exchange of 16 roubles per £1, the rate ruling on January 13 last. The normal exchange previous to the war was 9.5 roubles per £1. The average price obtained for the oil at Ekaterinodar was 54 copecks per pood. Since the date of making up the accounts a further sum of £28.330 has been paid under an arrangement with the debenture holders, whereby they agree to extend the time for payment of the balance of the debenture debt (£28,330) upon the condition that this amount is paid off in three equal yearly instalments, the first of which becomes due on February 1, 1917. As additional security the company has already deposited in the names of the trustees for the debenture holders 290,729 roubles. The production of the company for the twelve months to January 13 was 4,291,928 poods. The fountain well on plot 457 is now being repaired. In accordance with the programme outlined at the last ordinary general meeting,

NATIONAL BANK OF GREECE.

ESTABLISHED IN 1841.

CAPITAL - Dr. 20,000,000. **RESERVES - Dr. 13,500,000.**

active drilling operations have been carried out on plots 457, 435, and 573. From the wells approaching completion satisfactory results are anticipated. The directors have also decided to drill a well on plot 407, approximately two miles to the north-west of plot 457, which, according to the latest geological information, is favourably situated.

COMPANY NOTES.

Astra Romana.

In the House of Commons, Mr. Harcourt said he had no official information as to the directorate of the Astra Romana Co., which was registered and carried on business in Roumania. He understood that the Shell Transport and Trading Co. was interested in the Astra Romana Co. to the extent of 2,740,000 lei out of a total capital of 60,000,000 lei. It had also an interest as the owner of 40 per cent. of the capital of the Bataafsche Co., which, in turn, controlled the Consolidated Co., which owned capital to the value of 37,600,000 lei in the Astra Romana. He had no knowledge of how the products of the company had been dealt with during the war.

Anglo-Persian Oil.

Questions are still being asked in the House of Commons regarding the cash payment by the British Government to the Anglo-Persian Oil Company, Limited. On Tuesday Sir Edwin Cornwall put questions to the Chancellor of the Exchequer and the First Lord of the Admiralty regarding the payment of the sum of £1,001,000. He asked how the money had been spent, and whether the policy indicated by the First Lord of the Admiralty on July 7, 1914, had been departed from.

Mr. McKenna said the agreement with the company provided for payment by the Treasury as to one-fourth on application for the shares and as to the remainder as and when required by the company, subject to one month's notice. Two ex-officio directors were appointed by the Treasury, who watched the interests of his Majesty's Government under the agreement.

Mr. Macnamara said the Government was assured through its representatives on the board of directors that the money was being properly expended on the development of the company. It was not desirable either in the public interest or in that of the company as a commercial concern to give details of the expenditure at the present stage. The heads of expenditure were given by the First Lord on June 15, 1914. From these there has been no departure.

Oil Outputs.

Anglo-Egyptian Oilfields.—Gemsah.—Production for week, 437 tons (last week, 502 tons). Hurgada.—Production for week, 450 tons (last week, 479 tons).

Baku Russian Petroleum.—Week ended July 15, 82,400 poods.

Bibi Eibat Oil.—Week ended July 16, 60,400 poods.

Black Sea Amalgamated.—Week ended July 15: 22,017 poods.

European Oilfields.—Week ended July 16, 98,700 poods.

Maikop Combine.—Week ended July 15: 10,044 poods.

Maikop Pipeline and Transport.—Week ended July 10: 73,348 poods (correcting previous report in which the figures were incorrectly stated to be 7,398 poods).

Russian Petroleum.—Week ended July 15, 60,000 poods.

THE GREEK DEBT.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to May 31, 1916 (New Style: January 14 to June 13, 1916):—

—	Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Pirsæus Customs.
	Drachmæ.	Drachmæ.
Gross Receipts, May, 1916	2,830,302	2,475,000
Do. do. do 1915	2,895,328	2,330,000
Estimated Receipts for 5 months (Law of Control)	12,041,666	4,458,333
Actual do. do. 1916	14,647,925	12,025,000
Do. do. do. 1915	15,612,415	11,172,867
Difference between estimated and actual receipts for 5 months 1916	+ 2,606.258	+ 7,566,666
Difference between estimated and actual receipts for 5 months 1915	+ 3,570,748	+ 6,714,563

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Pirsæus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

SUEZ CANAL RECEIPTS.

The traffic receipts on the Suez Canal were as follows on the days named:—

	1915. Francs.	1916. Francs.
July 18	200,000	120,000
July 20	360,000	140,000
July 20 to 23 (incl.)	1,310,000	730,000
July 24	250,000	390,000
July 25	140,000	100,000

EGYPTIAN MARKETS.

NOTES OF THE WEEK.

The completion of the second year of the war finds the situation in the Near and Middle East, except in the case of one theatre, big with the promise of coming events rather than conspicuous for past achievements. Armenia supplies the exception. Here the task of the Russians, though not actually finished, has reached a stage which may well serve as a goal; Trebizond and Erzinjan are in their hands, and the conquest of Armenia is nearly complete. Whether the Russian ambition is to achieve yet more decisive results in this region we have no means of knowing. Their front, however, still requires to be straightened out, even if they have no intention of pressing on indefinitely towards the west. South of the Erzinjan-Erzeroum line the Turks are able to bar their progress. How long this state of affairs will last when once a suitable position has been gained by the Russians west of the former town remains to be seen. The advance on Baghdad—on the part of the Russians from the north-east and of the British from the south—has proved for the time being abortive; but there can be little doubt that, as soon as the latter are in a position to avenge the surrender at Kut, the Russians, who have been falling back in Persia, will be found ready to recover lost ground as quickly as their forces west of Erzeroum. It is, however, in the Balkans that the greatest expectations are now being centred. The moment for Roumania to strike a blow on behalf of her national aspirations may be regarded as quite near. Her action can hardly fail to bring about within a comparatively short time a considerable modification of the whole situation in the Near East; for it is difficult to believe that the Bulgarians can survive for long any serious thrust on two fronts—or even one.

Until her communications with Germany are cut, Turkey is able to set her successes in Gallipoli and Mesopotamia against her defeat at the hands of the Russians and the Arab revolt. In regard to Egypt, she may fairly regard the honours as easy; for though defeated on the Suez Canal, she has been able to overrun the Sinai Peninsula. But this rough-and-ready method of striking a balance does not take into account either exhaustion of material or moral weariness. There can be little enthusiasm in Constantinople or in any other part of Turkey for a third year of war. But the Turkish Government still wears a brave mask, and far more decisive reverses have to be inflicted upon its troops before it will acknowledge itself beaten.

To the reconstituted Serbian Army has been allotted the rôle of inaugurating what it may be hoped will prove the combined Allied advance in Macedonia. Fighting between the Bulgarians and Serbians began on July 24, and so far the advantages have been entirely with the latter. It is not difficult to imagine the feelings with which the Serbians find themselves at last on something like equal terms with their old adversaries. But to the spirit of hatred, which is likely to be reciprocated, they will add a confidence in the ultimate victory of their cause which the Bulgarians by this time must have entirely lost. There are doubtless good reasons why the Serbians on the extreme left of the Allied line should move first. It is not, however, to be supposed that they will be allowed to bear the whole brunt of the struggle. Events in the Near East have reached an interesting stage. The patience with which the public in Great Britain and France, and, still more, the Allied Army in Macedonia, has borne with months of comparative inaction would seem to be about to meet with its reward.

The scene of these preliminary engagements is on the Greek frontier north of Vodena. At this point and eastwards to Monastir the Bulgarian line dips to the south, and a combined advance on the part of the Allies might well be delayed, if the enemy had not been first pushed back on this wing. In spite of the fact that the Serbians were called upon to attack positions which the Bulgarians have had ample time to fortify, they were immediately successful. The Bulgarians lost no time in launching counter-attacks, but all these are reported to have been repulsed with heavy losses. The Serbians have been able to consolidate the ground won and will not have failed to regard their initial success as a good omen for the final issue of the campaign. In the withdrawal of the Eleventh Division of the Greek Army from Salonika at this moment we may perhaps see another of the shadows which coming events are in the habit of casting before them. With the Allies settling down to business in Macedonia a friendly Greek Government could have no possible object to serve in adding to the congestion that will sooner or later be inevitable in Salonika.

Further reports of the Turkish force which moved from El Arish in the direction of Katia places it at 12,000 strong. Their advance appears to have been skilfully executed, as, by marching at night and resting by day, "in palm groves or in shallow holes covered with palm leaves or pieces of scrub," they kept their

Digitized by Google

movements from the eyes of our airmen. On arriving near Oghratina they began to dig themselves in, but after the arrival of reinforcements moved a short distance farther on. British reconnoitring parties are in touch with the Turks, but no attempt has yet been made to deal with them on a large scale. The enemy's object in undertaking this advance with a small force must be political rather than military. It enables him to represent the expedition as a general movement against Egypt, while the official *communiqués* can be relied upon to attribute to it daily progress or some success, whatever may actually befall it. Egypt's rôle in this war is essentially a defensive one; but whether the military authorities will allow this small Turkish force to establish itself with impunity so near to our first line of defence may be doubted.

If the Turkish expedition in the Sinai Peninsula is meant to impress the Arabs who have not yet joined the revolt against Turkey it is likely to find a powerful rival influence in the methodical methods by which the Grand Shereef of Mecca is consolidating his position. A second coast town, Yambo, the seaport of Medina, has now been captured by his troops, while to the south the Idrissi has taken possession of Kunfidah, also on the Red Sea coast. The capture of Jeddah at the very beginning of the revolt placed the Grand Shereef in touch with the outside world and with foreign trade. In order to cope with the new situation an Arab Director of Customs has been nominated at this port, doctors have been appointed to study hygienic questions, and "an Arab of excellent character" has been given the post of instructor of police. Last, but by no means least, the new Government now boasts an Official Gazette. The Turkish public is probably not well informed in regard to the course of events in the Hejaz; if it were, it might be tempted to regret the dispatch of troops to Galicia at a time when their presence seems to be so urgently needed at a number of points in Turkish territory.

The British Government has done well to issue a further proclamation among Moslem communities in the British Empire on the subject of the Arab revolt. It was hardly a satisfactory course to adopt to assume an entirely detached attitude towards events in the Hejaz, while merely repeating the assurance that no effort would be spared to secure the Holy Places of Islam from all external aggression. The Grand Shereef of Mecca has acted of his own accord, and he is well aware himself of the extent to which he commands British sympathy; but it is preferable that our attitude should be made clear to the whole world. In this new announcement the Government points out that Great Britain has always viewed Arab aspirations with sympathy, but in the past her traditional friendship with Turkey compelled her to stand aloof. "Now, Turkey, by throwing in her lot with the Central Powers, has left Great Britain free to give practical evidence of her sympathy with those Arabs who have ranged themselves on the side of the Allies against the common enemy." This practical evidence, we may hope, will take a form which enables the forces of the Grand Shereef to be as well equipped as any Turkish army which may be sent against him. Such a policy adds to Great Britain's responsibilities; but we are approaching a moment when energetic action against the enemy at every possible point is certain to reap a quick and satisfactory return.

A further assurance is given to Moslems that "it is an unalterable point of British policy that these Holy Places should remain under independent Moslem rule and authority"—a plain statement which should place finally at rest any misgivings aroused by the false statements carefully circulated by the enemy. The message adds:—"The present state of war has placed many difficulties and dangers in the way of those wishing to perform the pilgrimage; but the action taken by the Shereef of Mecca gives rise to the hope that arrangements may be made whereby the pilgrims may in future visit the Holy Shrines in peace and security." The Mecca pilgrimage is understood to be occupying the attention of the Egyptian Ministry of the Interior. A regular service to Jeddah is being organized, but as there are only four steamers available the fares are high. The Government is anxious to facilitate matters as much as possible for the pilgrims. Thus a variety of circumstances lends colour to the supposition that the prospects of the Arab revolt are regarded as favourable in authoritative quarters.

An insight into the motives which are actuating the Mecca revolt is given by the report published in an Egyptian paper of an interview which was granted to the writer by the Grand Shereef some years ago. Even at that time the Emir could state that he was waiting for the day when Arabia would be able to throw off the Turkish yoke. Apart from the general dissatisfaction felt by all true Moslems with the Committee of Union and Progress, Shereef Hussein Pasha had special cause to dislike the Turkish Government. He had recently been engaged in hostilities with the Imam Yehya, and had learned from the latter that the Porte had provided him secretly with arms and munitions, had pushed him to fight, and had promised him the principality of Mecca and all the Arab country, if he would only destroy the authority of the Shereefs. In the light of such disclosures it is easy to understand how bitterly the Committee's claim to represent the Moslem world is resented among the Arabs.

A dispatch of General Sir John Nixon dealing with the fighting at Bushire between July and September, 1915, adds to our knowledge of what took place at that time on the Persian coast. With the main outline of the operations—the occupation of Bushire and the punitive raid against a coast tribe—the public was already familiar; but it may claim to have been kept an unnecessarily long time in the dark regarding the details of a small but stiff engagement on September 9. The Tangistanis had prepared an attack on the outposts of Bushire. General Brooking, in command of the garrison, decided to forestall the enemy, with the result that they were defeated and lost heavily before they had time to carry out their intention. The fighting, however, lasted several hours, and a squadron of the 16th Cavalry, in charging the tribesmen in the open, lost both its British officers and half of its Indian officers. In this action, adds General Nixon, the bravery and endurance of the troops in most trying heat, which claimed several victims, was most commendable.

The House of Commons added the name of Mr. W. Roch, M.P., to the Dardanelles Commission and that of Major J. Wedgwood, M.P., to the Mesopotamia Commission, while authorising the Government to include also in the membership of each body representatives of the Army and Navy. There is much to be said for the Australian contention that the proper time for an inquiry into the Dardanelles enterprise was the end of the war. The Mesopotamia campaign stands on a different footing, as the purpose of the investigation is to help future operations in that region. But the appointment of Lord Cromer as chairman of the Dardanelles Commission is an earnest of the work being well done, and it will doubtless be a matter of satisfaction to the Empire as a whole to have the two controversies disposed of by the time the war is over. The public spirit which Lord Cromer has shown in consenting to serve on the Commission receives a tribute on all sides. Together with Lord George Hamilton, the chairman of the Mesopotamia Commission, he brings to his task an ability and a detachment from all political bias which inspire general confidence.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 21.

Two Great Anniversaries.

The French National Fête, which is usually celebrated with great verve in Cairo, passed off very quietly this year. There was no entertainment in the Esbekia Gardens, and the only official function marking the day was the reception held at the French Agency by M. Defrance, which was, however, a very imposing affair, and was attended by Lieutenant-General Sir E. Altham, representing General Sir A. Murray, and by representatives of all the Entente communities, as well as by the heads of the various churches.

Two days previously Egypt celebrated an anniversary of her own, that of the death of the illustrious Mohammed Ali, the founder of the reigning dynasty and the great-grandfather of Sultan Hussein. Two ceremonies were held on this occasion, one at the Sidi Abu'l Abbas Mosque at Alexandria, which was attended by H.H. the Sultan and the Sultania Princes, and one at the Sayedna Hussein Mosque in Cairo. At both the procedure was similar, with the exception that in the capital an account of the life of the great Albanian, specially written by Mohammed Shukry Pasha, head of the Sultania Cabinet, was read. With his customary generosity, Sultan Hussein ordered that in honour of the event 8,000 poor families should be provided with a meal at his personal expense.

The Kitchener Memorial.

There is still considerable discussion in the local Press with regard to the form which the Kitchener Memorial should take; and in these circumstances particular interest attaches to an interview which the High Commissioner has granted to one of the editors of *Al Mokattam*. His Excellency declared that he deeply appreciated the spontaneous expression of sympathy at the loss sustained by England voiced by the Egyptian people; and added that he was gratified to find that all were united in their desire to commemorate the great Field Marshal. In deciding the manner in which that commemoration should be carried out, it would be well, said his Excellency, to bear in mind that Lord Kitchener's civil achievements in Egypt had lain largely in the direction of improvement of the national conditions of life, and that consequently the most fitting monument to him would be some large work of practical public utility. Sir Henry McMahon pointed out that the proposal initiated by H.H. the Sultan—the establishment in Cairo of a large women's hospital, to include a college complete with lecture-rooms and operating theatre for the training of women doctors, who would in time provide the necessary staff for provincial female hospitals—was a project quite worthy of the greatness of the occasion. During his administration Lord Kitchener had seriously concerned himself with, and had introduced measures and reforms to stop, the terrible rate of infant mortality, which, owing to the ignorance and helplessness of women in the provinces, had become an alarming feature of Egyptian everyday life; and this proposal, if carried into execution, would constitute a continuation and development of the principle laid down by him. His Excellency concluded by saying that no one is committed to this proposal, and that any better scheme that might be brought forward would be considered upon its own merits; whilst any town or community which considered that special reasons justified a memorial of a local character would find its proposal sympathetically examined and discussed. In the circumstances it would appear certain that the national memorial will eventually follow on the lines laid down by H.H. the Sultan, though centres like Alexandria may insist on erecting a statue. In any case, I understand that no public appeal for funds will be made until the autumn, when the fellaheen will have sold their cotton.

False Coinage Conspiracy.

I recently referred to the false coinage case, in which the cashier of the Native Court of Appeal was implicated, and opined that the adjournment of the hearing might quite possibly be followed by important revelations. My prediction bids fair to become realised. The police have been most active in their inquiries, and have succeeded in establishing an irrefutable connection between Shannami and the men implicated in counterfeit cases in various parts of the Delta. In fact, they have brought to light a most extensive organisation for the putting into circulation of spurious silver coins, and have laid their hands on the man who carried out the manufacture. He is a Caucasian, and has made a clean breast of the whole conspiracy. No less than twenty-five persons are now implicated, and these will all come up before the Assize Court in October.

Apropos of coinage, I understand that specimens of the new currency have been received from the mints, and that they have been approved of by the Sultan and the Government. Orders have been given for the work to be proceeded with, and the new coins will, it is expected, reach Egypt early in September. It is not known whether they will be issued at once; but this would appear to be highly probable, as they will become available just at the time when the expansion in circulation caused by the moving of the cotton crop will take place.

The Importation of Hashish.

A proclamation was issued this week enacting that anyone importing or attempting to import, or assisting in the importation, or found in the possession of hashish shall, on conviction by a military court, be liable to a fine not exceeding one thousand pounds Egyptian and/or to imprisonment with or without hard labour not exceeding five years. It is at the same time provided that the punishment inflicted by a military court may be in addition to any punishment inflicted by the civil courts in respect of the same offence. Hashish smoking and drinking has, as most people acquainted with Egypt know, for a long time been a popular form of vice out here, and indulgence in the drug has undoubtedly conduced to the increase in insanity which has been noticeable of late years. Stringent measures have been taken in the past to prevent its importation and use, but the penalties attaching to detection were by no means severe enough to act as a deterrent, seeing that the high price the drug fetched amongst habitués more than compensated for the risks of confiscation, fine, or imprisonment run by the smugglers and those who assisted them. The authorities have acted very wisely in availing themselves of the military régime in order to strengthen the existing law with regard to the traffic in hashish, and it is to be hoped that means will be found to continue this more drastic treatment of these offences after the war.

An interesting book has been published in Arabic on "Sinai" by Namé Shoucair Bey, Director of the Historical Section in the Egyptian Intelligence Department and author of the "History of the Sudan." The book contains (says the *Egyptian Gazette*) the most complete and authentic record available on the ancient and modern history of the Peninsula, its geography and people, and the important rôle it has played in the history of Egypt.

A Cairo message states that the Ministry of the Interior is studying the question of the Mecca pilgrimage. It is understood that pilgrims are asked to deposit caution money. A regular service to Jeddah is being organised, but apparently there are only four steamers available, and the fares are very high. The Government will do all in its power to facilitate matters.

The International Socialist Bureau at The Hague has received a telegram stating that two representatives of the Roumanian Socialist Party who were to have visited The Hague are unable to do so owing to the serious international political situation.

It is reported from Rome that great demonstrations have taken place in Bucharest, Constantza, Jassy, and Silistria in favour of Roumanian intervention. A parade of 100,000 people marched through the streets of Bucharest.

It is officially announced in Rome that Italy's Arab prisoners have been exchanged for the Italian prisoners at Tarhuna, consisting of twenty-three officers and 700 men.

A Vienna telegram to the *Berliner Tageblatt* states that General von Rhemen has been appointed Military Governor-General of Serbia.

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, July 16.

Welcome Rain.

Khartoum has at last been visited by rain. A series of stormy days and nights, in which the wind blew unceasingly, culminated in a *haboub* from the south, at the back of which came the grateful storm of rain. Oddly enough, the distribution of rain was very partial, being much heavier in the east than the west end of the town. Though the temperature has been below 100 deg. F. for several days, the weather was very trying, owing to the continuance of the strong wind. Not only does it fill air and house and person with sand, but it racks the nerves with its force, and is especially worrying at nights. The rain, however, brings great relief, and has a different set of drawbacks, such as dew and the breeding of every sort of creeping thing that bites.

A very considerable flight of locusts flew through Khartoum on July 14. So numerous were they that they gave the appearance of a snowstorm in which the flakes were driven horizontally, and the effect of watching them was to make one positively giddy. They did some damage to trees and ate many of the ripe dates, but the latter are still, for the most part, too hard for the locusts' palate.

The Nile is rising well, and appears likely to attain a high level this year.

Half the month of Ramadan is over. It is a weary period for the Moslem, and since at this season the native must work on his cultivation, he feels the strain of abstinence from food and drink all through the day, and keeps as quiet as he can. For this reason there is little news.

(From a Correspondent.)

Officials and Leave.

This is the time of the year that sees a thinning of the ranks of officialdom, as many members of the Government as possible being granted leave of absence in order to recuperate in more agreeable climates after a long and anxious period of service in the Sudan. The Governor-General alone—remarkable man that he is—seems to continue in harness without either needing or seeking temporary respite. The splendid health enjoyed and the energy displayed by Sir Reginald Wingate, now in his fifty-sixth year, during the past two years of anxiety in the Near East—Egypt and the Sudan—have astounded even those who thought that they knew him most intimately. Beyond retreating to the hill station of Erkowit during the hot and dusty months, Sir Reginald has allowed himself no relaxation of any kind for these two years. He is one of those very few men of whom it can be justly said that they are "indispensable." An Administration without the guiding hand, the calm judgment, and the sympathetic assistance of its kindly and capable Governor-General would be unthinkable.

His Excellency's Assistant Private Secretary, Mr. A. W. Keown Boyd, who has been on leave, returned to Erkowit in the early part of this month (July); the Private Secretary, Captain G. S. Symes, D.S.O., and the Military Secretary, Captain R. Rees-Mogg, have both had a short leave, but they are back in harness at Erkowit. The Sub-Department of Forests has only had one of its officers absent—Mr. A. A. Bisset, who rejoined his Department a few days ago. In the Civil Secretary's Office, Captain M. J. Wheatley, Assistant Civil Secretary, who has been away on short leave, has now got back to Khartoum. The Customs Department, which is becoming more and more busy as the season advances, has been fully staffed without exception; that of Education has remained unaffected except for the temporary absence of Mr. J. W. Crowfoot, the Director, who succeeded Mr. James Currie, C.M.G., and whose leave of absence expired on the 29th of this month.

Gordon College.

The Gordon College Higher School staff, on the other hand, has been deprived temporarily of the services of Mr. N. Field, tutor, and of Mr. T. P. W. Barty, lecturer, the first of whom returns next month and the second gets back to his post a few days later. Mr. S. C. Rhodes, manager of the instructional workshops in connection with the Gordon College, returned to his duties, after a short absence, on medical grounds, this month.

Mr. P. Drummond, the Inspector and Assistant-Conservator of Antiquities, stationed at Khartoum, has found his hands full with the duties of Chief Censor, and, as a consequence, there have been, up till now, no holidays for him. Mr. S. C. Dunn, the capable and energetic Government Geologist, has been away from his post for a short while, also on medical grounds, but he is due to return to Khartoum during the last days of July. The large staff continually at work in the Wellcome Tropical Research Laboratories in the capital, to whose devoted services the excellent condition of the peoples' health is so greatly due, have adhered manfully to their duties during the heat and dust of a Sudan summer, only two of their number having been absent for a brief period—namely, Mr. H. H. King, the entomologist, who rejoins on August 17, and Mr. G. A. Freak, the junior assistant chemist, who has already got back to his laboratory.

In the Department of Finance, the Secretary, Colonel E. E. Bernard, C.M.G., who will have completed eight years' service in September, is away in Cairo; while Mr. A. J. Foster, one of the inspectors, has been absent on leave until the middle of this month. The Legal Department, now that Summer Vacation is closed for ordinary business (from July 15 to October 14) has been able to grant leave to several of its more prominent officials. The Legal Secretary, Mr. E. Bonham Carter, C.M.G., will possibly be away from Khartoum until the middle of September. One of the judges, Mr. M. Fleming, is expected to return during the same month, while another, Mr. N. G. Davidson, is granted leave on medical grounds until the end of that month. Major S. K. Flint, District Judge stationed at Halfa, and Mr. R. K. Winter, District Judge at Wad Medani, are both for leave.

With the exception of Dr. E. S. Crispin, the Acting-Director of the Medical Department, who has been away on leave, due to medical grounds, and who returns to his duties in a few days' time, almost the whole of the staff has remained at work. Captain J. T. Simson, the medical officer employed upon the Sleeping Sickness Commission, has been on leave on medical grounds, and was due to return to work at the end of July. One member only of the permanent staff of the Department of Public Works, Mr. B. Burnett, Chief Engineer, has been away on account of personal health, and he returns to duty on August 1.

Travel Facilities.

Doubtless with the view of allowing the much-tried inhabitants of Khartoum at this period of the year, when *haboubs* blow and the mosquitoes rage, to get away to the seashore, the railway management has granted a sensible reduction in the ordinary fares between the capital and Port Sudan, the return rate now being one and a-quarter times the ordinary single fare. For the sum of £E6.275 one can now secure a first-class return ticket to Port Sudan, and for £E4.395, or £E2.195, a second or third-class return ticket. No reduction is permitted to Government officials or employees of the Railway Department, who already enjoy certain privileges in regard to allowances, including a reduction amounting to 20 per cent. on their bills for food and drinks on all of the Government catering services. Until July 1 this year this reduction amounted to as much as 25 per cent.; but the high prices which the Railway Department has now to pay for provisions of all kinds has rendered this alteration imperative. Even with this economy in operation, however, it is found exceedingly difficult to keep the catering from proving a heavy financial loss. The Government, perhaps, would have been better advised had it allowed the railway catering to remain in the hands of contractors entirely; although when this was the case there were continually being received from the public complaints which in many instances proved upon inquiry to be only too well founded. It is impossible to please all classes of travellers, and especially during the period through which the Sudan Railways, like those of Egypt, have been and still are passing.

KOSSOVO DAY IN GREAT BRITAIN.

The celebration of Kossovo Day in England, when such cordiality and sympathy were evinced by Great Britain towards greatly suffering Serbia, has been the object of bitter comment in the Austro-Hungarian Press. In alluding to the subject, the Austrian *Drau* writes as follows:—

"In Great Britain, where Serbs meet with about as much respect as do Zulus, and where no Serb, during the reign of King Edward, dared appear at the British Court, Pashitch and his colleagues have met to celebrate Tzar Lazar and Milosh Obilitch."

The Budapest *Pester Lloyd* of July 7 writes as follows:—"After the double murder at Serajevo, *John Bull*, the most poisonous of London gutter-papers, published an article entitled 'Serbia Must be Wiped Out'; and now we read in all the British papers, including *John Bull*, a moving appeal to the British nation for Serbia." This article refers to the proclamation by the Kossovo Day Committee.

In quoting the end of this appeal, the *Pester Lloyd* is angrily amused at the Serbian State being no longer in the British papers called "Servia" but "Serbia," and the article closes as follows:—"The contemptible, hateful, and blood-stained Servia has risen to glorious celebrity as Serbia. Shame!"

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, July 16.

Preparing for the Elections.

Although the Chamber has not yet been dissolved, the preliminary steps in connection with the electoral campaign have already been taken. The decision of the Anti-Venizelist parties to present a united front at the elections is, of course, due to their desire to defeat M. Venizelos, whose return to power would spell their ruin. In face of this common danger old enmities are forgotten, and the political leaders who were at sixes and sevens while in the same Cabinet have now joined hands to fight the dangerous opponent. M. Gounaris has left M. Rallis a clear field in Attica, and has gone to Patras to organize the campaign in the Peloponnesus. M. Skouloudis will take no part in the elections, in spite of the pressure brought to bear upon him by his friends. He attributes his abstention to reasons of health, but, in point of fact, he realizes that, even in the event of success, he would have no chance of returning to power after recent events.

Meantime the Anti-Venizelist leagues of reservists continue to be formed, and to send telegrams to the King, informing him that their members are ready, at a single sign from his Majesty, to "award the chastisement it deserves to the party which has associated itself with foreigners," and to "break the heads of these ignominious enemies of the fatherland." The King replies to these telegrams by thanking the reservists for their loyal sentiments. And the same unseemly demonstrations against M. Venizelos that I have already described are still indulged in in the trains by reservists. To-day the *Kyrix* again castigates those officers who, having become the tools of the Staff, preach anti-military and anti-patriotic theories to the soldiers about to be disbanded, seeking to inspire them with a supreme aversion against any fresh call to serve their country.

Commenting upon the replies sent by the King to the reservists' telegrams, the *Kyrix* remarks that the Government ought to intervene in order to put a stop to such injudicious conduct, since the reservists' telegrams nearly always contain the threat that they are ready to crush all enemies of H.M.—internal and external—meaning evidently the Entente Powers. It must not be forgotten, says the *Kyrix*, that similar threats against them led to their recent intervention. The *Kyrix* also recently revealed the fact that during the nine months of the mobilization the soldiers were forbidden to read Venizelist journals in their barracks, and allowed only to read the Ministerial papers!

The indignation of the Liberal party against these manœuvres is voiced also by the *Patris*, which remarks that if the oligarchy, though to-day far from power, endeavours to continue to defraud the Constitution by means of leagues and associations, and to force the conscience of the electors by methods of terrorisation and violence, the Liberals will not tolerate it. Submissiveness to the law has its limits, "and violence will force us to violence."

The Liberal party finds itself forced also to form reservists' leagues of Venizelist sympathisers, named "National," and having as their programme the betterment, physical and moral, of the reservists, with a view to achieving the national ideals.

The electoral programme of the Liberals will be largely concerned with the constitutional question—that is to say, whether the King has the right to form Cabinets of persons whose political views are agreeable to him, and to dissolve the Chamber without taking the verdict of the people into account. Then, too, there will be the question of the orientation of Greece—on the side of its protectors, or on the side of the allies of its enemies.

The Election Outlook.

In spite of all the anti-Liberal activities, M. Venizelos declares to-day in the *Kyrix* that he is quite convinced that his party will be victorious at the polls. Indeed, everything tends to show that he is right. As the Russian Minister remarked in his recent statement to the *Patris*, the anti-Venizelists might quite well endanger the Liberal party if they were led by another statesman—for example, M. Zaimis—or by any new man, no matter who he might be. But the fact that they are led by M. Gounaris, who is regarded by the Entente Powers as Germanophile, and their enemy, cannot fail to have much weight with the electors, who will find it difficult to vote for a party whose leader will have no chance of coming to power. For his return to power would inevitably lead the Western Powers to regard Greece as a hostile country, and to treat it without any further friendly consideration; and that would be sufficient to render the life of the Government impossible. The Greek people have, in fact, suffered enough for M. Gounaris to make them by no means anxious to give him a second trial.

It is for this reason, recognizing their own weakness, that M. Gounaris and his colleagues wish to exploit the name of the King, as they have done all along, representing themselves as his candidates. The Venizelist Press very justly qualifies as political cowardice the attempt to exploit the feelings of the people for their King by thus mixing the Sovereign up in electoral rivalries.

But these tricks and shifts are not likely to succeed. The people already begin to see the difference under the new Government, and to realise that it is thanks to the advance of twenty millions made by the Entente that the military authorities will be able to indemnify the agricultural population for the animals requisitioned and for other losses sustained. They realize, too, that they are no longer threatened by the heavy taxation that the late Government was going to impose in order to meet the liabilities it had incurred. The imposing manifestation before the French and British Legations last Friday (July 14) showed the inclinations of the people, which are also indicated by the fact that M. Gounaris and his friends seek to make out that they also are Ententists!

The Fire at Tatoi.

The terrible fire which has destroyed the beautiful forest of Tatoi, which caused the deaths of three officers and of several soldiers, and which even imperilled for a short time the life of King Constantine himself—even this disaster has been exploited by the anti-Venizelists to the detriment of the Liberal party. The *Embros*, which is regarded as the organ of Baron Schenck, did not hesitate to launch the infamous and monstrous suggestion that the forest had been fired at several points by persons who desired to burn his Majesty, who was at the time at the Château of Tatoi with his family. This scurrilous insinuation has led to the raking up of certain episodes in the past history of the director of the offending journal. These need not be repeated here, but they suffice to explain how such unworthy charges can be made by the *Embros*.

General Moschopoulos, Commander of the Greek forces at Salonika, declared on Sunday that his relations with the Allies' General Staff are again excellent, the recent misunderstandings, which were never of any importance, having been happily cleared up.

An Athens telegram states that a bomb recently exploded at the Kustendil railway, in Sofia, destroying an important section of the line and entailing an interruption of traffic. It is believed that it was an effort to hamper the movements of the Bulgarian troops to Serbia.

Under date of July 28, the Rome correspondent of the *Morning Post* reports:—M. Plamenatz, ex-Minister for Foreign Affairs in Montenegro, has been deputed to superintend the departure of the remainder of the Montenegrin refugees here, numbering about forty old and infirm people. The balance of those left in Naples, numbering about 120, will travel direct to France.

Should the Turks decide, as military critics expect, to make their next great stand at Sivas, they will be fighting literally around the throne of Sekherim, says a writer in the *Daily Chronicle*. For it is here that the Armenians still preserve, in what was once the capital of Armenia Minor, the proud relic of their famous king. Sivas is of much greater historical interest than the lost Erzinjan. Diocletian and Justinian took a fatherly interest in its architecture, but it is to the Seljuk Sultans of Rum that Sivas owes its distinction as the home of the finest specimens of Moslem art—the medressehs or colleges of the thirteenth century. Although the city has now only 40,000 inhabitants, it had when Timur took it in 1400 over 100,000. Four thousand Armenians were buried alive by the conqueror after a general massacre.

BULGARIAN NOTES.

(From Our Correspondent.)

Bucharest, July 13.

Starvation in the "New Territories."

It looks as though the miseries suffered by the population in the invaded territories will move even the stony hearts of the Bulgarian authorities, who up to now have remained untouched by the frightful sufferings of those whom Bulgaria pretends to have delivered from their oppressors, the "deliverance" consisting of forcing many to die of actual starvation, whilst the rest are put to untold suffering.

For some days past conferences have been convoked in all the departments of the occupied territories, at which the administrative and communal officials, prefects, under-prefects, mayors, etc., took part. The principal question discussed was that of providing for the population suffering so frightfully from famine, which is claiming hundreds of victims in every village.

A similar conference was held on June 25 at Monastir. The under-prefects described the desperate situation of the districts under their administration, declaring that unless prompt measures were taken the annexed regions would become uninhabited deserts. The prefect declared that the difficulties of communication rendered it nearly impossible for provisions to arrive from Old Bulgaria, especially as the railway is occupied with troop movements, and other sources of supply must therefore be sought. It was proposed to hurry on the gathering in of the harvest. The only result achieved was the advice that the peasantry should co-operate in their harvesting work!

Yet another such conference was held at Nish, under the presidency of M. Balaktchieff, prefect of the department. It lasted for three days, after which M. Balaktchieff left for Sofia in order to lay a report on the questions discussed before the Bulgarian Government.

Austro-German Rivalry.

The Austrian military governor of Serbia is occupied with the question of the introduction of the Magyar language as an obligatory subject in all the Serbian schools. This will be a new success for the Hungarians, who were indignant that the German language should be forced on the Serbian schools. By this means equilibrium will be established between the two influences.

On the other hand, the Hungarians have succeeded in securing the nomination as Director of Public Instruction in occupied Serbia of a former mayor of the Hungarian district of Bacshadrog, M. Janosh Faragosh.

Bad Bread for Civilians.

Loud complaints are again being raised on all sides on account of the disgraceful quality of the bread supplied to the civil population. The Committee of Public Supply has therefore approached the military authorities with a view to sufficient wheat being obtained to bring the bread up to the type decided on some time ago.

BULGARIA'S GERMAN GUESTS.

(From a Correspondent.)

It may not be without interest to give some particulars regarding the visit which members of the Reichstag recently paid to members of the Bulgarian Sobranje. The following notices are taken from Bulgarian, German, and Hungarian newspapers which publish lengthy accounts of the proceedings.

In the first place, it is interesting to observe the attitude which the members of the Bulgarian Opposition adopted with regard to the welcome extended to the visitors. It might have been thought that they would have dissociated themselves from that welcome; but such was not the case. If at first any hesitation was noticeable, this was simply due to the fact that on the occasion of the visit which the deputation from the Bulgarian Sobranje paid to the Reichstag and to the German nation, in the month of May, the Bulgarian Government selected only such members of the Sobranje as belonged to its own party. It was owing to this circumstance that the Bulgarian Opposition at first manifested a certain hesitation, as the *Mir*, Mr. Gueshoff's organ expressly states (June 25). Very soon the Opposition fell in with the Government policy and adopted the idea of welcoming the Reichstag members. The Central Committee of the National Party decided to "offer the warmest possible reception to the deputies of the Allied German nation" (*Utro*, June 20); and Dr. Heidenbrand, one of the leaders of the German mission, paid a personal visit to Mr. Gueshoff, leader of the party. As regards the Democratic Party, the *Preporetz* declared that "The Central Committee of the Democratic Party has chosen Messrs. Malinoff, Takeff, and Ljapceff" as its delegates, explaining that this was done because of "the respect which they feel for the German Parliament;" the Editor of the *Preporetz* was himself present at the banquets. The Radical-Democratic Party delegated Dr. Fadenhecht as its representative (*Utro*, June 23). The "broad" Socialists, whose leader is Sakazoff, likewise decided to "take advantage of the opportunity of meeting the German deputies" (*Utro*, June 20). The other parties of the Opposition took the same line. Only the small group of pacifist Socialists kept aloof, and that only for general reasons which obliged them to oppose "the Imperialistic policy which has been the cause of the present world-war" (*Rabotniceski Vestnik*, June 24).

The speeches and toasts delivered on that occasion are, of course, of more than minor interest. Dr. Momciloff, Vice-President of the Sobranje, welcomed the visitors with the following words: "Brothers of the heroes of Verdun and of those of Brest Litovsk and of Jutland, I bid you welcome!" (*Narodni Prava*, June 26). The President of the Chamber of Commerce (Mr. Madjaroff) described the Germans as "a nation which is the worthy leader of commerce and industry" (*Narodni Prava*, June 26). The German Deputies replied in a similar spirit.

In the following quotations we see how the Bulgarian Press saluted the Huns. The *Echo de Bulgarie* of June 24 wrote as follows:—"The Bulgarians are proud of the honour which the foremost personalities of the political world of the great Allied Empire have done to our national representation and to our country generally by coming here to offer us their sympathy." Again, on June 25, this paper says: "It is indeed a long time since so brilliant a reception and so warm a welcome have been witnessed as that accorded to the representatives of the German nation." The *Narodni Prava* of June 24, recording the day last year when the German army and the Bulgarian army joined hands on Serbian territory, exclaims: "The joy of Bulgaria was indescribable; it surpassed all that was wished or hoped for." And, again, on June 20, it says: "From the Lakes of Mazzura to Riga, from Warsaw to Pinsk, from Verdun to the Somme, from Tyrol to Vicenza, from Ochrida to Demir Hissar, and from Kut-el-Amarah to Trebizond, our enemy is broken down, and sees its end approaching. By Divine decree our enemy is receiving well-merited punishment for having endeavoured to kill innocent nations, and for having attempted, at Jutland, to starve innocent children." And, further, on June 28, the same paper says: "Our great German ally did not force us into the war; we took part in it of our own free will, and as a recompense she has sent us her sons to mingle their blood with that of our sons. . . . Where the German nation dies, there also will the Bulgarian people die." The *Dnevnik* of June 24 says: "On the battlefields of Vardar, of Morava and Kara-Su, we have laid the firm foundations of the edifice known as the Quadruple Alliance." On the following day it says: "We Bulgarians are fully aware of the importance of this visit, and it is with a thrill of emotion, but also with pride, that we proclaim our entire solidarity with the character and object of the struggle in which the Allied Central Powers are engaged." The *Utro* writes as follows: "We are pleased and delighted with the aid which your heroic, all-powerful nation has afforded us; be welcome to our Bulgaria, which stretches out its hands to embrace you!" (June 25). We may note in passing the terms "pleased and delighted" employed by the Bulgarian paper to express its sentiments, for they are quite characteristic. Any other nation would have said: "We are grateful for the aid, etc.," but the Bulgarian people does not thus express itself, because gratitude is far from its thoughts.

Now let us turn to some words and impressions of the Germans regarding their visit to Sofia and Bulgaria. The *Vossische Zeitung* of July 7 writes:—"The inhabitants of Sofia have shown such enthusiasm as was by no means expected from a nation known to be so reserved as the Bulgarians." The said paper goes on to say that what especially impressed the German visitors was to hear the students of the Military College of Sofia, while marching past sing the "Wacht am Rhein" and "Deutschland, Deutschland über alles." The *Frankfurter Zeitung* (July 10), expressing its satisfaction with the great progress made in Bulgaria by the German language and culture, says:—"The Bulgarians, and especially literary, artistic, and scientific circles, are quite convinced of the necessity of a political alliance with Germany." The *Kölnische Zeitung* (July 13) is simply charmed with the Bulgarians. "For the majority of Germans"—says this paper—"Bulgaria has been quite a revelation. We regarded this visit simply as a visit of politeness, but it has gone far beyond that." One of the German deputies, on his return from Bulgaria, writes in the same paper:—"It may, perhaps, look like an exaggeration when I say that never has an entire nation welcomed the representatives of another nation in such a manner as the Bulgarians welcomed us. But I venture to affirm this in all soberness. The welcome on the part of the Bulgarians was not addressed especially to us who were present; it was rather an apotheosis of the idea of an alliance between Germany and Bulgaria." One of the leaders of the Opposition said to him:—"What we Russophiles have vainly hoped for from Russia, Germany has given us." And the *Frankfurter Zeitung*, quoting the above, adds:—"This is perhaps the idea which best characterises the transformation of Bulgaria which we are witnessing."

Friedrich Naumann, the author of "Mittel Europa," which, according to the *Kölnische Zeitung* (July 7), "is the most popular book in Bulgaria," did not fail to visit Sofia in company with his compatriots. He was so enthusiastic over the Bulgarians that at their first meeting he exclaimed, in Bulgarian: "Long live Bulgaria!" (see the *Narodni Prava* of June 26); and so impatient was he to convey his impressions that he addressed the first correspondent he met and gave vent to his feelings: "The newspapers of the Entente"—said he to the correspondent of the *Az Est* (July 9) at Belgrade—"have several times stated that King Ferdinand and M. Radoslavoff have guided the State in a direction which does not correspond with the will of the nation. Nevertheless we have found among the people an extremely great cordiality, and an unconditional acceptance of the decisions of the Government. Nobody can say that the reception accorded us was of an official character, for the peasants themselves came to welcome us and offer us presents. . . . It is with joy and gratitude that we return home with the conviction that the undeniable fact is that an enlarged Bulgaria belongs to Central Europe."

NEWS OF THE ARAB REVOLT.

(From a Correspondent.)

Cairo, July 12.

A great military expert, in one of a series of remarkable articles, recently enumerated the political blunders of Germany in this war. He omitted, however, to mention the great blunder of the Jehad, which, like all the rest, was covered up by its initial military successes. It is, indeed, only among backward and ignorant Arabs, such as the followers of the Senussi and of Ali Dinar, that the preaching of the Jehad has met with some response; on the more enlightened Arabs of Syria and the shrewd and proud Arabs of the Peninsula it had the reverse effect. The proclamation of the Jehad, dictated by Germany, was an insult to the intelligence of the Moslems of the world. It was based on falsehood, and it failed. More than that, it determined the counterblast of a real Jehad on the part of the Arabs of the Peninsula. The problem of Islam is an exceedingly delicate one; yet the Young Turks could not have handled it in a more clumsy manner. Those endowed with the least perspicacity could not help foreseeing the inevitable bursting of this bubble. At the same time as they called upon the Moslems to rise against the infidels, they handed over the capital of Islam to the Germans—who had insulted Islam in their African colonies. More than that, at the same time, the Young Turks openly declared their intention of "Turkifying," which means destroying, the Arab race, to which the Prophet belonged, and of suppressing the Arabic language, the sacred language of Islam. Their negative success at the Dardanelles and their lucky stroke at Kut so carried them away that they did not scruple to put into effect their anti-Arab campaign, by the wholesale hanging of the Arab élite, and the expulsion of leading Arab families in Syria, including women and children.

The Arabs of the Peninsula, who from the start took the Jehad for what it was worth, bided their time, until the Turks' designs were unmasked in all their brutality; and, fortunately for them, the Shereef of Mecca took the initiative at the psychological moment. The Shereef's plan was conceived, and is being carried out, with much political wisdom, which explains the remarkable success that has attended the movement of revolt in Arabia. Knowing the traditional weakness of the Arab chiefs, he has taken care to emphasise the fact that, in taking the initiative in this great movement, he has no wish whatever to interfere with the authority of the leading chiefs in their respective provinces. Like the great son of Arabia that he is, he placed the interests of the Arab nation and of Islam far above his own.

According to the reports of trustworthy informants just returned from Mecca, all the Arab chiefs have lent their unstinted support to Shereef Hussein in declaring the independence of the Hejaz and Yemen. No sooner had the Idrissi received the Shereef's call than he declared to him his allegiance, placing the whole of the Province of Assyr at his disposal; for the Idrissi is a pious Ulema, who has never cherished ambitions of temporal power, but whose chief aim has ever been the maintenance of the *Sheriat* and of justice among his own people. In fact, he proposed that the Shereef should send someone to assume command on his behalf. But the Shereef very wisely replied that his wish is to see every Arab Emir maintained in his domain of authority. The Idrissi, thereupon, called up his men and laid siege to Kunfeida, whose garrison of about 2,700 men led by twenty German officers, soon surrendered; and the whole of Assyr is now purged of the Turk. Similarly, the Imam Yehya Hameed Ed-Din, of the famous Zaideh sect, volunteered his full support to the Shereef, and, while generously offering guns and rifles, announced that he had already ordered his men to invest Sana'a and to clear the Yemen of the Turks. The latter, who had been conducting a harassing campaign round Aden, had to return in haste to Sana'a. The garrison there numbers about 16,000 men; but, as part of this force consists of Arabs who would never fight against the Imam's men, the doom of Sana'a would appear to be sealed.

The most remarkable feature of the Shereef's movement is its almost bloodless character. He issued general orders to all the chieftains of the Hejaz enjoining upon them the avoidance, whenever possible, of violence, and the confining of their actions to besieging the enemy; and these orders have been scrupulously observed, so that at Jeddah the Shereef's men merely camped outside the walls, until the mayor, delegated by the Commandant and the Mutessarif, came out to parley with the Shereef and negotiate the terms of peace. The latter were very simple—viz., that the officers and men should quit the barracks, leaving behind their arms and ammunition intact, and that they should unconditionally surrender. Then the Shereef Zeid, the son of the Emir, took delivery of the keys of the town, of all the arms and ammunition, and of the Customs House, etc. The officers were allotted special quarters, and treated with due respect. Then the work of organizing the police and gendarmerie, and of the entire civil administration, was taken in hand. There was an outstanding amount of about £400 in the army coffers, which the Commandant pretended to have expended on six German officers, prior to their departure.

In Taif, the Vali, Ghaleb Pasha, and the Turkish garrison of about 700 men took refuge in the fort, which is now closely beseiged. A sortie was attempted, but was quickly repulsed, with a loss on the side of the Turks of two guns and 150 men killed.

As previously mentioned, Shereef Faisal is undertaking the siege of Medina, whose forts at the time of Enver's visit had received a large quantity of ammunition, and whose garrison, which was then reinforced, now numbers about 9,000 men, of whom half are Arabs. Serious dissensions have broken out among them, consequent on the arrival of copies of the Arabic paper, *Ash Sharq* ("The East"), published by Sheikh Shawish and Shakib Ar'lan, approving the policy of Jemal Pasha, who is mainly responsible for the hanging of so many Moslem notabilities. Again, as previously stated, the railway has been torn up on a stretch of about 150 kilometres up to Madayen Saleh, and the Arabs are utilising the rails and sleepers in their siege operations at Medina. All the Bedouin beyond Medina, and as far north as Damascus, including Emir Abdul Aziz Ibn Seoud, are supporting the Shereef.

As to the troops that took refuge in the forts of Mecca and refused to surrender, they number only forty. Some of their officers, misinterpreting the Shereef's pacific methods, rashly ordered their men to fire on the city, and one of the shells hit one of the curtains of Al Kaaba. This sacrilege so incensed the Arabs that they vowed the direst punishment on the men, who have since hidden themselves to escape vengeance.

Some of the Turkish officers are said to have offered their services to the Shereef. Of course, the Arab officers and men have volunteered to enlist in his army. The Shereef, however, persists in his pacific policy, and will maintain a defensive attitude till the last extremity, so as not to sully holy ground with Moslem blood.

SERBIAN MOSLEMS AND THE ARAB REVOLT.

We reproduce below the translation of an address published by the Serbian Moslem students from Bosnia and Herzegovina who are now in Switzerland. It appeared in the *Tribune de Genève* of July 8, and refers to the action taken by the Grand Shereef of Mecca against the Turks and in favour of the Islamic religion. It is as follows:—

"The Mussulman Bosnian and Herzegovinian students in Switzerland unanimously hail with satisfaction the action of the Grand Shereef of Mecca, the Head of Islam and Sovereign Master of the land of Mohammed.

"As faithful sons of Islam, we entirely approve the methods employed by the Grand Shereef of Mecca for the realization of our sacred duties, and we strongly reprehend the present régime in Turkey, which is a dishonour to our Holy Faith, inasmuch as it makes it subservient to the Austro-Germanic interests. . . .

"Turkey will never be able to justify herself for having proclaimed the *Jehad* to the advantage of the Austro-Germans, who are the secular enemies of Islam; and she will be held responsible for this to the Sherifiate. We Mohammedans of Bosnia and Herzegovina know well the methods peculiar to the State called Austria, and can tell better than others how Austria has used our religion.

"Therefore, the Mussulman youth of Bosnia-Herzegovina in Switzerland can do no less than hail with enthusiasm the action of the Arabs who have risen to defend our religion, and we rejoice at it. We cannot conceal the fact that our sympathy is ever upon the side of those who devote themselves to defending the principles and the freedom of religions and peoples."

NEAR EAST BOOKSHELF.

A SIDE LIGHT ON GALLIPOLI*.

For those who appreciate a chatty, lightly-written narrative of one of the most picturesque incidents of the great war, "With the Zionists at Gallipoli," by Lieut.-Col. J. H. Patterson, D.S.O., can be confidently recommended. While evidently a narrative of actual facts, it reads in places like a romance. The writer's never-failing sense of humour carries him through all the tragedy and disappointment with a buoyancy which is refreshing. The verdict of history will surely concern itself more with the magnificent heroism of our soldiers—which has never shone more conspicuously than here—rather than the miscalculations of our rulers. The writer of this book, however, evidently considers that the result of our Gallipoli adventure was by no means small. "We held up and almost destroyed a magnificent Turkish army, and by doing this we gave invaluable aid to our Russian ally"—just, too, when such help was most needed.

The central interest of this book is concerned with the writer's employment as organiser and commander of a "Zion Mule Corps" of sanctioned strength of 500 officers and men and 750 pack mules. The men and N.C. officers, and some of the lieutenants were chiefly recruited from Zionists driven out of the Jewish agricultural colonies in Palestine by the war. Included in the ranks were men of every conceivable trade and calling, students of law, medicine, and divinity, mechanics of all kinds, a rabbi, and a doctor. As they were all Hebrews from various lands, Hebrew seems to have been their common language, as it is among the Palestine colonists, but English words of command were used in drill. The writer fully realises the romance of finding himself, a Gentile, in command of such a force, and is enough of a mystic to enter into the somewhat visionary hopes of the Zionists. Indeed, so sympathetic is his attitude that one wishes he could occupy a somewhat similar position with regard to our Russian Jews at home, many of whom would gladly undertake any enterprise that would further their Zionist hopes, but object to ordinary military service.

At the opening phases of the campaign at Hellas, when transport was scarce, the Zion Mule Corps seems to have borne a most gallant and important share in the operations, in spite of enormous difficulty and much official discouragement. Once, indeed, the corps appears to have scored a victory of its own, as when, as the writer graphically describes, forty unloaded mules of the Zionists charged the Turkish trenches and, being mistaken for cavalry, led to the defeat of a massed attack by the Turks.

To those whose interest in the main features of the Gallipoli campaign is greater than in Zionism the book can also be commended, for there is much more of general military incident and criticism than the title of this work suggests. Indeed, this record has a value of its own as that of one who from the military aspect seems to have been something of a free lance, and who, while taking an active share in the incidents he describes, writes with the freedom and skill of a war correspondent who has observed warfare in many fields.

BOOKS RECEIVED.

The Story of a Red Cross Unit in Serbia. By James Berry, B.S., F.R.C.S.; F. May Dickinson Berry, M.D., B.S.; W. Lyon Blease, LL.M.; and other Members of the Unit. Illustrations and map. (J. and A. Churchill. 6s. net.)

TANGIER TO TEHERAN.

A lady has written to *The Times* stating that in the middle of July, when the temperature at Salonika was 106 degrees in the shade, our soldiers there were without sun helmets. If there be no mistake about this, it is indeed a strange and deplorable state of affairs. But it is somewhat consoling to know that troops recently sent to that theatre of war certainly are provided with sun-helmets. This I can state with confidence; and I hope that it indicates that the matter referred to has already been put right.

***

Apropos of the many complaints that have appeared in the Press regarding the long time taken in delivering letters to our troops in Mesopotamia, I was talking, a few days ago, to the mother of a young Englishman who was taken prisoner at Kut, when she told me of the case of a friend of hers who also had a son serving out there. This young man had written home stating that several of his letters had taken from six to seven months to reach him, though others had got through in quite a reasonable time. And, as far as his family could make out, he had received all letters and parcels they had sent him with the exception of two lots which were known to have been lost through an accident of war.

***

Summer weather has come our way at last, and the spell of heat, coming so suddenly and after such unseasonable cold, seems to have upset the nerves of a great many people. At any rate, I have observed signs of irritability in quite a number of my friends and acquaintances. It was, therefore, with real interest that I read a paragraph in one of the Egyptian papers received by the last mail, stating that a certain Egyptian "doctor" in Cairo, "boldy advertises on a board outside his house that he can cure bad temper." (He also undertakes to charm away evil spirits; but that is a mere detail!) If this heat spell lasts it might be worth the "doctor's" while to come to England and try his luck. He would, I think, have a wide field of usefulness, and if his "temper cure" were worth anything at all he ought to make a pretty little fortune in a very short time. There are signs that the warmth is affecting even the sages at Westminster.—No: I do not refer to Mr. Ginnell.

***

In these days one hardly associates King Constantine in one's mind with the thoughts of practical jokes; but in his younger days he was certainly not above such things, though he never enjoyed such a reputation for fun as his brother, Prince George. One day when he was only Crown Prince he was walking in Athens when he met the British Minister, whereupon he stopped and chatted for a few minutes in friendly fashion. He was just moving on again when the Minister, whose eccentricity of manner was exceeded only by his hospitality, remarked, casually, "You might come into dinner to-night." Allowances were always made for the Minister, who kept the best—perhaps the only—chef in Athens, and the Crown Prince, smiling, said that he would be delighted. He was rather taken aback, however, to have his acceptance followed by an equally casual "You might bring your wife—and your brother." This time H.R.H. replied drily that he would ask them whether they would care to come. Of course, they were not going to miss the dinner, and the evening passed very pleasantly. As they were taking their departure, the Crown Prince expressed the pleasure that they always felt in visiting the Legation, and asked to be invited again. A cordial invitation was at once given them, and they said that they would come to tea the following week.

***

Now, this was embarrassing, if not positively unkind. For, as the Princes knew very well, the Minister had his idiosyncrasies. Not to put too fine a point on it, he was inclined to be fussy on the subject of meals, and he especially loathed afternoon teas. Indeed, he objected to being disturbed at all in the afternoon, and the servants had standing orders that no callers were on any account to be admitted to the Legation at that time. However, on such an occasion fads must go to the winds. The unhappy diplomatist expressed the pleasure it would give him to receive their Royal Highnesses.

***

The appointed day came, and a select few assembled at the Legation and waited patiently for the arrival of the Royalties. The Royalties, however, failed to put in an appearance, and at last the unusual gathering broke up wondering. A few days later, when the Minister and the Crown Prince met, the latter said: "By the way, did you not ask us to take tea with you one Thursday? Was it last week or this?" The Minister was not pleased. "As a matter of fact, Sir," said he, "it was last Thursday." Before he could get further the Crown Prince remarked: "I thought so. As-

Digitized by Google

a matter of fact, we came to the Legation, and were told that you were not at home." And it was so. The absent-minded Minister had forgotten to countermand the standing order, and the Royal jokers had taken advantage of the fact.

***

The interior of Asia Minor must now be fairly full of refugees. The Armenians—or what are left of them—are hardly likely to make their way thither, but the Russian advance will inevitably have meant a great displacement of the native population; and since it is not likely that the Turkish Government will have done anything for these poor refugees, their condition can hardly be much better than that of the Armenian and Syrian victims of the war. Not all of them have fled westwards, but those who have remained are also in sorry plight. Some time ago Mr. Philips Price and M. E. Zolanievicz (the special correspondent of the *Retch*) called attention to this matter and appealed to the benevolent societies of Russia and England to lighten the hard lot of the Moslem sufferers, stating that the Caucasian Moslem benevolent societies had not the means to deal with the numbers—estimated at 100,000 in Tiflis alone—needing such help. Many of the peasants, abandoned to fate, have returned to their homes only to find themselves faced by disease and starvation. For though the Russians do not follow the methods of the Germans in regard to wanton destruction of property, war *is* war; and in a region fought over as that on the Caucasus front has been fought over, the prospect of anything in the way of food or comforts being left to await their absentee owners' return must certainly be a very poor one. The Turkish and Laz peasantry have lost all or most of their possessions, I fear. In the words of the gentlemen mentioned above, "the fate of the Turkish population on the Caucasus front, and in Armenia, is just the same as it was in the last Russo-Turkish War. . . To enlarge upon their condition is superfluous, for it is exactly the same as that of the Armenians, about whom it has already been written. But few know about the refugee Moslems, about the crowds of innocent orphans and children suffering for the political errors of others." In the name of humanity, who will help these poor people, now and after the war? I hope they will not be forgotten entirely because they have nobody to plead on their behalf in a world which is almost deafened by appeals for other sufferers and victims of this war.

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

JUDICIAL REFORMS IN EGYPT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I agree with Sir M. McIlwraith that a personal matter between two officials who are no longer in the service has little or no interest for the public. I will, therefore, make my reply to his letter of July 24 as short as possible.

If I had known that Sir M. McIlwraith's report was on sale in England I doubtless should have obtained a copy before writing. As it was, rather than wait six weeks, I accepted your correspondent's review as a fair résume of what the report contained, and I gather from Sir M. McIlwraith's letter that he has no particular fault to find with your correspondent's interpretation; perhaps, therefore, I need not have troubled the publisher for a copy.

In his letter Sir M. McIlwraith states that I undoubtedly took the initiative in several laws, but the more important ones (he does not say which!) mentioned by me were the work of the committee appointed to revise the case "with which he (myself) *had nothing whatever to do.*"

This is a very extraordinary statement to make, as, under instructions from Lord Cromer, I was specially invited to attend the meetings of the committee to support my own proposals, which had been the subject of much correspondence between Lord Cromer, the Ministry of Justice, and myself. In fact, it was at these meetings which I attended that I was up against the "strong opposition" referred to in my letter.

I am labouring under no delusion when I say that five out of the eight laws or provisions in the case mentioned by your correspondent as "important" *penal* reforms were my own proposals, for which I had to fight hard to get them on to the Statute Book.

Sir M. McIlwraith states further that he claimed no credit for anything, writing the review of his work "not assuredly in any boastful spirit," as your correspondent tells us. To whom did he give the credit? We all know what that means, and your correspondent could do no other than refer to the whole as an "achievement of which the Ministry of Justice may feel justly proud."

My original letter stands. I have nothing to withdraw or qualify, but I ask your Egyptian readers, amongst whom I hope I have still many friends, to forgive me for raking up ancient history which can be of no interest to anyone except myself and possibly the Department to which I gave the best years of my life,—I am, etc.,

C. E. COLES, Pasha.

Stonehouse, Bishop's Hull, Taunton, July 30, 1916.

THE STATE OF SYRIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Jemal Pasha has published lately an official report, wherein he seeks to justify the measures of repression that he has adopted against the leaders and adherents of the Arab cause. Only a Turkish official document could contain such gross contradictions, such cynical distortion of the truth. He accuses the persons hanged and condemned to death of political treason for having sought to detach their country from the body of the Empire and hand it over to foreigners. He admits that some have been condemned because those who had been convicted through documentary evidence had, in the course of their interrogation, borne testimony to their complicity. Even on this indirect evidence not more than 200 persons have been sentenced to death, and these (he says) wield no manner of influence and represent in no way the will of the people, who have always given proof of loyalty to the Turkish throne, and who, now that the country has been cleared of a few agitators and self-styled leaders, will enjoy peace and security.

If these persons wield no influence and are not representative of a real national movement, why was it thought necessary to do away with them in such fashion? Can 200 persons of no social or political consequence, and with no following, affect military security in any way? The mere imprisonment of such "agitators" would have sufficed to ensure immunity from trouble. Again, if these persons were of no consequence, and if the movement they headed was not a spontaneous national movement, why did the Turks resort to such terrorising methods, and push vengeance to the limit of ferocity and ignoble desecration, by digging up the mortal remains of the great Emir Abdul Kader, the Algerian, and scattering them to the four winds?

Deadened as their consciences are, the Turks must feel in their heart of hearts that their charge of treason is a false one. They know full well—and official documents are there to prove it—that the programme of the Decentralization Committee and Reform Committee contained nothing but legitimate demands, of which they at one time approved; and that it never aimed at detaching Syria from the Empire. Indeed, the leaders never ceased affirming their desire to see the Turkish Empire strong and great among the nations, and urging that it could only become so through liberal treatment, ensuring the loyal support of the component parts.

One cannot help wondering why Jemal Pasha ever tried to defend such an indefensible case; but the Young Turks' mentality is unique. Their perceptions are crude, and their actions bear a stamp of harshness and bluntness reminiscent of the old Tartar ways and characteristic of the Barbarians of the steppes. When, e.g., they tell lies, they do so in the most barefaced way. Telegraphic agencies have just apprised us that the leading Constantinople paper, *Sabah*, has been indulging in the following lies: That the French Government has moved to London; that the Turkish Army has crossed the Canal; and—most delightful of all—that the Germans have cleared the Mediterranean of Allied ships. And yet the Allies continue to treat the Young Turks as a sane Government! They still believe that, with such as these, comminatory notes will stop them in their mad career of atrocities. The French and Russian Governments have actually presented notes through the United States, threatening the Turkish Government with punishment if they continue their campaign of persecution and extermination; and, to cap it all, the United States Government has, so late in the day, protested against the breaking into the sealed premises, under its protection, wherein lay the French Consular archives, which contained the incriminating documents that led to the hanging of the many Syrian notables and the special persecution of the Lebanese. The United States Government has, moreover, threatened Turkey with the "straining of diplomatic relations" if it continued to refuse the admission of relief cargoes destined for the starving population. One can imagine the Young Turks chuckling over such naïve "diplomatic pressure." Nothing but brute force can bring such people to a stern realization of facts.

The Allies had it in their power to exercise such force and to prevent the extermination of the Syrians. If it was impossible for them to send an expeditionary force to Syria, nothing could have prevented them from having an aviation base at Ruad Island, whence aerial raids could have been made against military defences and stations in the Lebanon and beyond. If Jemal and his Court Martial had been blown up, his successor would have been only too careful not to repeat any of his cruel methods, and the military cordon drawn round the Lebanon would have been broken up for good.—I am, etc.,

AVIS.

Cairo, July 14, 1916.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. Aug.	1916. July.		1334. Shawwal	5676. Ab.
4	22	Friday	4	5
5	23	Saturday.....	5	6
6	24	Sunday	6	7
7	25	Monday	7	8
8	26	Tuesday	8	9
9	27	Wednesday	9	10
10	28	Thursday	10	11

Yesterday was the birthday of the King of the Hellenes.

Monday is the birthday of H.M. the Queen of Sweden.

Prince Emanuel Bibesco, brother of the First Secretary to the Roumanian Legation in London, has taken a house at Marlow, Bucks, for the summer.

Prince Andrew of Greece accompanied Queen Alexandra and the Grand Duchess George of Russia on a visit to the King and Queen at Buckingham Palace on Tuesday.

Prince Andrew left Marlborough House on Wednesday.

The Crown Prince Alexander of Serbia, who will command the Serbian Army, landed at Salonika on Monday afternoon, accompanied by the Serbian War Minister. The Prince arrived strictly incognito in a torpedo-boat from Corfu. He was greeted on landing by General Sarrail and General Milne, and by General Boyovitch and the Headquarters Staff of the Serbian Army. Prince Alexander landed in a French picket-boat, and drove out from the docks and through the town in General Sarrail's car. He has since been actively engaged in connection with military matters.

Lord and Lady Oranmore and Browne left Cavendish Place on Wednesday evening for Castle Macgarrett, County Mayo.

Lady Maxwell has made good progress, and is now able to go out for a short time daily.

Sir Henry and Lady Bax-Ironside have arrived at Harrogate on a visit.

Mr. Louis Einstein, American Minister Plenipotentiary in Bulgaria, in charge of British interests, has left London for Richmond, Yorks.

According to latest arrangements M. Boshkovitch, the retiring Serbian Minister, will leave London this month for France. M. Yovan Yovanovitch, the newly appointed Serbian Minister to the Court of St. James, will arrive in London during the next fortnight.

According to reports received in Holland from Constantinople, the daughter of the Turkish Heir-Apparent will be married on August 10 to Captain Ismail Hakki Bey, son of Ahmed Tewfik Pasha, a former Turkish Ambassador in Berlin.

The marriage of Herbert Chavasse Squires, M.B. (Oxon), Medical Department, Sudan Government, with Hilda Margaret, youngest daughter of Sir Henry Norbury, K.C.B., and Lady Norbury, of St. Margaret's, Eltham, will take place quietly at Eltham Parish Church on Wednesday, September 6, at 2.15 p.m.

Our Khartoum Correspondent writes (July 16):—

Departures for north on the mail train of July 17 include Mr. Wasey Stemy, the Chief Judge, who is proceeding to England for change of air.

Mr. N. R. Udal, of the Education Department, who has been recently acting as Assistant Private Secretary to H.E. the Governor-General, is also going north.

Mr. T. A. Leach, who has been acting Governor of Khartoum, also proceeds to England now that Mr. R. E. More, the Governor, has returned.

A correspondent informs us that Captain C. E. Binns, R.N., is now Assistant Military Attaché at Berne, and that Captain A. Warden Baker has been appointed to a similar post at Rome.

Mr. Glynne Williams has become vice-chairman of the Serbian Relief Fund.

The King has granted authority to Dr. Ll. C. P. Phillips, Professor at the Government School of Medicine, Cairo, and Physician to the Sultan of Egypt, to wear the Insignia of the Third Class of the Order of the Nile, conferred upon him by the Sultan.

The numerous friends of Mr. A. B. Taylor, formerly of Baghdad, will learn with pleasure that his elder daughter, Miss M. B. Taylor, an exhibitioner of Newnham College, Cambridge, took First-class Honours in Part II. of the Mathematical Tripos. Her younger sister, Miss Frances Taylor, has just gained a senior foundation scholarship at St. Paul's Girls' School, Brook Green.

Lieutenant-Colonel Sir Henry Blyth Hill, Manchester Regiment, whose name appeared amongst the wounded in the official list published on Wednesday, was formerly attached to the Egyptian Army. He saw service in the Nile Expedition of 1898, and holds the Order of the Mejidieh (4th Class) and the Order of the Osmanieh (3rd Class). He was for some time Governor of Berber, and later of the Bahr-el-Ghazal Province. He is the sixth baronet.

It is officially reported that Major A. Carton de Wiart, D.S.O., Dragoon Guards, attached Gloucestershire Regiment, has been wounded. At the time the present war broke out he was serving with the Somaliland Camel Constabulary, and he had previously seen service in the South African War, in which he was also wounded. For his services against the Dervishes he was made a Companion of the Distinguished Service Order. Major Carton de Wiart is a son of the late Maitre Carton de Wiart, the well known and popular Cairo lawyer, and a nephew of the Belgian Minister of Justice.

The Paris journal *Excelsior* quotes a neutral traveller as saying that King Ferdinand, on the appearance of Allied aircraft in Bulgaria recently, took refuge in a cell especially made for him below the palace cellars.

Mr. Charles Baehler has arrived at his summer residence, Chateau Neu Habsbourg, near Lucerne, from Cairo.

The late Mr. Gregory Zlatano, of 2, Lloyds House, Manchester, and of Athens, merchant, left property of the value of £47,515, the net personalty being £47,427.

M. Také Jonescu was received in special audience by King Ferdinand of Roumania on Monday.

Two members of the Turkish Imperial family, Prince Abbas Halim and Prince Osman Fuad, have arrived in Germany to study Prussian methods of administration.

Mr. P. Charnaud has been granted a commission as a temporary lieutenant in the Royal Naval Volunteer Reserve.

Rev. H. B. Rivington left Khartoum on July 10 for England on leave.

Captain A. Criezis, Naval Attaché to the Greek Legation, has arrived in London from Paris.

Dr. Elsie Inglis, who had such thrilling adventures in Serbia with her unit recently, is getting ready to go back again to the scenes of her former adventures. Within a few weeks she is to leave London with a fully-equipped medical unit comprised of women, even to the ambulance drivers.

The *Egyptian Gazette* understands on good authority that the unanimous decision of the members of the Alexandria Municipal Commission to erect a statue of Lord Kitchener in the city as a memorial of his great work in Egypt, will not be quashed by the Government, and that there is no intention of abandoning the scheme.

The Naval and Military members of the Special Commissions on the operations in the Dardanelles and Mesopotamia were nominated by the Prime Minister in Committee on the Special Commissions Bill on Tuesday as follows:—Dardanelles Commission: Admiral of the Fleet Sir W. H. May, and Field-Marshal Lord Nicholson. Mesopotamia Commission: Admiral Sir Cyprian A. G. Bridge, and General the Hon. Sir Neville G. Lyttelton. The Prime Minister's proposal was agreed to after some little discussion.

The concert party sent out to Malta last February by Miss Lena Ashwell in conjunction with the Ladies' Auxiliary Committee of the Y.M.C.A., to cheer the sick and wounded in the many hospitals there, have returned after an absence of nearly five months. For fourteen weeks the concert party gave two concerts a day at Malta, working with the Y.M.C.A. and Red Cross organisations, visiting all the naval and military hospitals and convalescent camps, the garrisons of the various forts, and the transports that called at the island. For five weeks the party entertained the Navy, giving concerts every day on each ship in turn and special concerts to the crews of the submarines. The audiences sometimes comprised 2,000 men, many of whom were heroes of the Dardanelles campaign. The concerts were so deeply appreciated by all the men and have done so much good that Lord Methuen, Military Governor of Malta, the hospital authorities, and the Admirals commanding the Fleet are very anxious that a second visit may be paid. Miss Lena Ashwell will gratefully acknowledge all donations to cover the necessary expenses. They should be sent to her at 36, Grosvenor Street, W.

SCHOOL OF ORIENTAL STUDIES
LONDON INSTITUTION.
The Governing Body invite APPLICATIONS for the POST of DIRECTOR. The salary will be £1,000 per annum. Applications should be received not later than September 16, 1916. Further particulars may be obtained on application to the undersigned.

APPOINTMENTS, PROMOTIONS, ETC.

Sir Ralph Paget has been appointed his Majesty's Envoy Extraordinary and Minister Plenipotentiary at Copenhagen. He was received in audience by the King at Buckingham Palace on Wednesday, and kissed hands upon his appointment. He afterwards had the honour of being received by the Queen.

Sir Ralph Paget was formerly British Minister at Belgrade, where he was appointed in July, 1910. Prior to that he had been Minister-Resident at Munich and Stuttgart for a year. He entered the Diplomatic Service in 1888, and he has served in many places —Cairo, Zanzibar, Washington, Tokio, Constantinople, Guatemala, and Bangkok. Lady Paget's work on behalf of the Serbians is well known to all our readers.

According to a telegram received by the *Vossische Zeitung* from Bucharest, General Zottu, Chief of the Roumanian General Staff, is to be replaced by General Iliescu, a friend of the Premier, M. Bratiano.

The conferment of a Viscounty of the United Kingdom on Sir Edward Grey and the heirs male of his body lawfully begotten, with the title of Viscount Grey of Fallodon, is gazetted under date July 27.

The *London Gazette* announces :—

The King has been graciously pleased to appoint William Beauchamp Heard, Esq., to be his Majesty's Consul at Serres.

The King has been graciously pleased to appoint Lieutenant-Colonel Thomas Wolseley Haig, C.M.G., to be his Majesty's Consul-General for the Governorships of Ispahan, Yezd, Gulpáigan, and Konsar, the Province of Irak, and the Districts of Chehkarmahal, Feridan, and Bakhtiari, to reside at Ispahan.

The King has been graciously pleased to appoint Evelyn Berkeley Howell, Esq., C.I.E., to be his Majesty's Consul at Muskat.

The *Gazette* also announces that the King has been pleased to approve of Mr. John Burke as Vice-Consul of Greece at Belfast; and Mr. F. Spashett as Vice-Consul of Greece at Lowestoft.

Bimbashi C. Graham, Equatorial Battalion, has been promoted to the rank of Kaimakam and has been appointed Officer Commanding, 11th Sudanese

Kaimakam J. R. Bassett Bey, Governor Upper Nile Province, has been promoted to the rank of Miralai.

Kaimakam H. Beaumont Bey, Senior Inspector Mongolla Province, has been struck off the strength of the Egyptian Army, with effect from the 6th inst.

Kaimakam W. Byam Bey, of the Egyptian Army Medical Corps, has been promoted to the rank of Miralai and granted the 3rd Class of the Order of the Nile on the occasion of his reversion to the British Army.

Captain E. G Lawton, the East Surrey Regiment, has been taken on the strength of the Egyptian Army with the rank of Bimbashi and has been posted to the 12th Sudanese.

Captain A. H. T. Chetwynd, Derbyshire Yeomanry, has been attached to the Egyptian Army as a Special Service Officer. He has been granted the temporary rank of Bimbashi and has been attached to the Equatorial Battalion for duty.

Bimbashi W. R. O'Farrell, Sudan Government, has been struck off the strength of the Egyptian Army.

Captains H. B. H. White, D.S.O., the Queen's Own (Royal West Kent Regiment), H. Ferguson, the Cameronians (Scottish Rifles), Alex. Grant, East Yorkshire Regiment, and J. W. D. Cook, Army Service Corps, having reported their arrival in Egypt, have been taken on the strength of the Egyptian Army with the rank of Bimbashi, as Special Service officers, and posted to the 1st Equatorial Battalion, 11th Sudanese and Department of Supplies, respectively.

OBITUARY.

ANGLO-EGYPTIAN'S DEATH.

Lieutenant Frederick Grainger Hall, Cheshire Regiment, who is reported killed on July 9, aged twenty-five, was the elder son of the Rev. and Mrs. F. J. Hall, of Shirburn Vicarage, Oxon. He was educated at Northaw Place, Eton, and Trinity College, Cambridge; and was an Eton Rambler and a member of the Free Foresters C.C. After taking his degree, he joined Messrs. Carver in Egypt, and on the outbreak of war came at once to England and in September, 1914, obtained his commission. He went to the front in September last, and was for some time in command of the Machine-gun Section, but recently was given command of his company. He fell, hit by a sniper, while "gallantly leading his men in a successful attack on a German trench."

Under date of July 2, the *Morning Post's* Athens correspondent reports :—Miss Sophia Tricoupis, sister of the leading statesman of Greece in the 'Eighties, died yesterday. Twenty years ago she was one of the most important personages in Greek political society. As her brother's faithful helper, her house was a centre not only of political life, but of literary movement. A meeting point, in fact, for foreign diplomatic visitors to the Greek capital. Like her father, the historian of the Greek Revolution, and her brother, Miss Tricoupis was a warm friend of England.

Captain George Gardner, Royal Bucks Hussars, who, previously reported missing, is now believed to have been killed in Gallipoli in August last year, was the son of Sir Robert Gardner, of Ashley House, Dublin, and was born in December, 1883. He was educated at Malvern and joined the 21st Empress of India's Lancers in 1902 when they were stationed in Dublin, being promoted lieutenant in 1909 and captain in October, 1912. He was made adjutant of the Royal Bucks Hussars (Yeomanry) in March, 1914, and came from India to take up this appointment, and was with the Yeomanry for a year before going with them on active service to Egypt and Gallipoli. In Egypt he will be remembered as a particularly keen polo player.

We learn that Lieutenant Frank Vincombe, Royal West Kent Regiment, whose death was announced in our issue of June 21, was killed while out with a working party. His age was twenty-nine, and he was educated at George Watson's College, Edinburgh, and King's College, London, and afterwards went to the National Gymnasium at Stockholm. He was granted a commission in the Devon Regiment in December, 1914, and went to the front and was transferred to the Royal West Kent Regiment in November, 1915.

The death is reported from Cairo of Colonel Gordon Frazer, Devonshire Regiment, after four days' illness.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

HUGH-JONES.—On July 31, at Elmthorpe, Cowley, Oxford, the wife of Llewelyn Arthur Hugh-Jones, Ministry of Finance, Cairo, of a daughter.

MARRIAGE.

HAMBLEN—ARCHIBALD.—On July 27, at Alexandria, at the British Consulate, and afterwards at St. Marf's Church, by the Rev. Fergus McNeile, C.M.S. Missionary at Cairo, Lieut. Leonard T. Hamblen, Adjutant of the Egyptian Labour Corps, to Ruth Mary, youngest daughter of W. F. A. Archibald, Master of the Supreme Court.

DEATHS.

AUSTIN.—On July 23, suddenly, at Alexandria, James Meredith Austin, manager of the British Engineering Company of Egypt.

SANDFORD.—On July 29, at Khartoum, after a short illness, Joseph Ruscombe Poole Sandford, Sudan Civil Service, third son of the late Archdeacon E. G. Sandford, of Exeter, and of Mrs. Sandford, Ivy Bank, Exmouth, aged thirty-five.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

The only English Hotels in Alexandria.

Proprietor: A. VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.).
Terms:
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
Glymenopoulo, Ramleh.
This Hotel is situated near the Beach.
Open all the Year. Bathing Cabins.
Terms from:
Pension, P.T.60; Lunch, P.T.20;
Dinner, P.T.25.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

ROUMANIA'S DECISION.

Readers of THE NEAR EAST have been left in no uncertainty with regard to the attitude of Roumania towards the war. Both officially and unofficially she has been at heart with the Grand Alliance; but a variety of circumstances has prevented her hitherto from abandoning neutrality. There has been little or no attempt to disguise the situation. The fundamental facts are that for a period of years the late King Carol, acting, as he believed, in the interests of his country, had an understanding with the Central Powers, which virtually made Roumania a vassal of the Triple Alliance. It was generally recognised that Roumania was not in a position to stand alone, and King Carol's instinct naturally caused him to look to Germany in order to obtain the necessary guarantees for Roumanian integrity and independence. In the years during which this policy of insurance held good, however, the relations of the inhabitants of the kingdom to their kinsfolk across the Carpathians underwent a notable change. The sense of a common nationality was quickened, and the grievances of the Roumanians in Transylvania provided a powerful stimulus to the movement for their restoration to the Roumanian kingdom. When the war broke out King Carol was in favour of throwing in his lot with the Central Powers; he was not a traitor to the national ideal; but he saw no chance of being able to realise it as a result of the war, because he did not believe that Russia (Great Britain at that time had not declared herself) could be victorious against Germany and Austria. He felt that Roumania as a small Power had only one course open to her, to side with the victors and to trust to the future to bring about the dismemberment of Austria-Hungary and with it the incorporation of Transylvania in the Roumanian kingdom. At the Crown Council held at Sinaia on August 3, 1914, King Carol failed to carry his advisers with him. The majority could not bring themselves to support the country which had systematically oppressed their kinsfolk, but they recognised the uselessness of exposing themselves to defeat at the hands of the Central Powers. Neutrality was accordingly decided upon—a clear indication that the country as a whole had no sympathy with the Germanic States. From this attitude the Roumanian Government has not yet budged. Its sympathies and the national ideal have remained the same. If at any time it had seen its way to giving free rein to the former in order to realise the latter, it would have taken its stand with the Allied Powers. What it was not prepared to do, and what the Allies did not wish it to do, was to sacrifice itself for a principle without bringing any definite advantage to the common cause.

Little more than a year ago, when the Russians advanced to the Carpathians, it seemed as if the moment had come when Roumania could strike a blow in her own interests and seal the victory of the Allied Powers. It was, as we know to-day, a short-sighted view, and if it had been acted upon, it would probably have led to the discomfiture of the Roumanians, and would have proved of no practical assistance to the Allies. The war was not to be won so easily. At the time, no doubt, many people were tempted to blame the diplomacy of the Roumanian and of the Allied Governments alike for failing to arrive at an agreement which would have enabled the former to settle its account with the Austrians. There seemed to them the possibility that only the extra push which the Roumanian Army could have given was required to drive home the Russian success. This, however, was not the case. For once in a way the failure of diplomacy has proved an asset to all concerned. The Allies learned that the war was not yet won; the Roumanian Government had its eyes open in regard to the strain that would be placed upon the country's resources before the national ideal could be realized. Both parties settled down to face an entirely new situation, which was dominated by one factor—the need for munitions. For Roumania, as she could only hope to receive of the Allies' surplus, the outlook was necessarily a difficult one. She could no longer disguise her sympathies with the Entente Powers; but with Germany and Austria-Hungary becoming more and more aggressive, she had to avoid providing them with a *casus belli*. She had all the while to live, and her national existence depended in large measure, if not entirely, on her ability to export her chief products, cereals and oil. At the same time she had to look to the Allied Governments for a supply of munitions, if she could ever hope to strike a blow on her own behalf. It would be difficult to imagine a more complicated situation; and when all the facts are known it will, we believe, be found that the Roumanian Government has been materially helped in weathering it by its honesty of aim. Fortunately for it, the Central Powers, although under no illusion regarding Roumanian sympathies, have not been in a position to risk a gratuitous break with Roumania, and have preferred to employ every artifice of bribery, threats, and cajolery in an attempt to put off the evil day. They have succeeded in adding a considerable quantity of Roumanian exports to their stock of supplies; but it may be doubted whether their machinations have materially delayed Roumania's entry into the war.

In the absence of a complete understanding between the Allied Governments and Roumania there must always be some misgivings in the minds of the former lest the Roumanian Government should be tempted, from a very natural desire, to prolong its non-participation beyond the period which would make its military efforts correspond with the prizes it hoped to derive from the victory of the Allies. When the Germans had convinced themselves of the impossibility of winning over the Roumanians and of the increasing unlikelihood of Roumanian neutrality being maintained, they seized upon this point with a view to creating bad blood between Roumania and the Allies. It was known that the negotiations between the two parties were of a prolonged character, and the wish that they would break down provoked the frequent assertion that they had broken down. Although these negotiations are not yet definitely at an end, there is reason to believe that the final stages offer perfectly clear sailing, and at no distant date we may expect to see Roumania take her place by the side of the Allies. Her participation is probably by now considered by the Central Powers as inevitable as a renewal of the Allied advance in the West and the East. Their one concern must be to decide whether the blow will fall upon them, intensifying the Russian thrust, or whether it will in the main be directed against their dupes south of the Danube. We make no attempt to probe into military secrets. If the Bulgarians should be attacked, there can be little doubt that an Allied wedge driven between the Central Powers on the one hand and Bulgaria and Turkey on the other will be felt as severely by the former as a Roumanian invasion of Transylvania. In Germany, indeed, the cutting off of the two vassal States from the Central European "block" is likely to have a more disheartening effect than any accumulation of the Austrian tradition of defeat. Moreover, as Germany plays for Bulgaria and Turkey the rôle that the earth did for Antæus, we may expect a comparatively speedy collapse on the part of these two States when once their lines of communication are permanently cut. It matters little, therefore, in which direction the Roumanian Army decides to move; both in Transylvania, where it would co-operate with the Russians, and south of the Danube, where its movements could be co-ordinated with a Franco-British-Serbian advance, it has it in its power to help in bringing about decisive results. The Allies await Roumania's decision with sympathy and confidence.

ON A GREEK LINER.

By ELBRIDGE COLBY.

We were going to Greece, and there was not a timid passenger on board who did not firmly believe that we were carrying contraband of war, in spite of the captain's assurances to the contrary. We were a relief expedition bound for Serbia, and to our minds there were two dangers: one was disease, the other was a hostile navy. So doth imagination make fools of us all.

Fancy, then, our excitement when, about 10 o'clock one night in the Mediterranean, two small dark shapes were discerned to starboard and to port. They came nearer. Submarines? They lay very close to the water. Interest was intense. Suddenly, as they drew abreast of our bridge three words came sharp out of the night:

"What's your name?"

"T——," replied the captain.

"Where bound?"

"Piræus!"

"Where from?"

"Malta!" And here the Greek commander showed his exceeding good sense, naming a British port so close, at which we had received "orders," but had not "called."

When this conversation—pleasant repartee!—was concluded, both destroyers switched on their white masthead lights and red and green side lights. Both boats were going in the opposite direction from us. Immediately the signal lamps on one of the small ships began to "talk," and we replied in flashes of dotted and dashed light. The signalling was ended, and instantly we were surveyed in the full glare of a searchlight. From stem to stern the inquisitive white beam looked us over. The torpedo boat had turned round and was running close alongside, as we could see by the port and starboard red and green. Switch! Off went the searchlight, and we watched the green lamp gradually swing around as the destroyer moved away.

What shall I say of the excited people who leaned over the rail? What of those who afterwards remained on deck all night? What of the dear ladies who fumblingly "tried on" their life preservers? Of these we had better say little. The destroyer moved away, and the rest is silence.

But the next day there was no silence. Many nervous conversationalists interviewed the captain, and brought more trouble on our heads. It was tea-time. We were in the dining saloon having tea and buttered bread and marmalade, after the pleasant English fashion, when we were roused by five short quick blasts of the whistle, then the same signal again, repeated. At first I thought we were meeting another ship and were merely blowing a salute, so I put my head out of a porthole. Not seeing anything, I went to the starboard side and looked out there. Then it entered my head that we were having a drill—and such a drill!

Up to the bridge deck we scurried, so as to be able to look down on the boat deck and keep an eye on operations. The dirty, greasy Greek sailors swarmed over the ropes and began to pull the canvas boat-covers loose. Soon all were free. The gentle captain swore some orders at his men—in Greek, so as not to annoy the ladies. Whereupon the dirty "hands" clambered over the boats from the port side and concentrated their attack on starboard lifeboat number three. Much pushing, much stumbling, much mumbling, much interference with one another; half the men got hold of one end of the boat and half of the other end. When some should have pushed and others pulled, both groups pushed, or each did the wrong thing. The captain swore, and all went every which way once more. The rope got tangled, a block was jammed, a cover blew in the way. But, finally, somehow, out of all this confusion, one lone lifeboat emerged and hung tentatively above the water. Thirteen minutes! The captain swore again. The whistle blew two short blasts, and everyone went back and continued the interrupted tea.

The next day we had a drill, and the next. Finally the superbly haphazard Greek way of doing things managed to get eight boats over the side in four minutes; but that was not much of an achievement, for they had been left uncovered and swinging in their places. All the crew had to do was to loosen the tackle and push the davits around.

This, if you please, is a Greek liner, and I am extremely thankful that we had nothing more exciting than drills.

How we did love the good ship "T——" and the Greeks, who are reputed such good sailors!

THE PRESS ON THE NEAR EAST

The Commissions of Inquiry.

The *Nation* (July 29), in an article headed "The Conditions of Victory," indulges in some very plain speaking regarding the conduct of the Gallipoli campaign. "Nothing," it says, "is to be gained by preventing the fullest possible investigation of these mistakes; indeed, the more firmly they are exposed, the better the prospect that there will be no repetition." And it goes on to say:—

This applies even more to the Mesopotamian expedition. The mystery of the advance towards Baghdad thickens rather than clears with the fragmentary news we gather of its inception and development. The lack of hospital accommodation, of transport, of suitable food, of military foresight, is still inexplicable. Townshend fell back from Ctesiphon for water. Is it not strange that, with such an episode before him, another General should give exactly the same excuse for interrupting his advance to the relief of Kut? In any business undertaking the repetition of identical mistakes is much too expensive a luxury. And we do not yet know the true reason why our force turned away from Kut at the end of the first week in March. The facts that some of the adverse conditions still obtain in Mesopotamia, and that soldiers are even now thoughtlessly exposed to sunstroke in India, make full investigation a matter of the greatest urgency. We lost one victory and failed to avert a great defeat by faults that were preventible. We are deeply concerned that the same or similar conditions shall never recur. We must give no quarter to this domestic enemy which can neutralise every element of our strength.

"The Subtle Dividing Line."

Discussing the appointment of the Mesopotamia Commission in its leading article last week, the *Indiaman* refers to the Mesopotamia campaign as "the most disastrous military operations that have ever been undertaken from India." It is of opinion that—

No fault will be found with the Government regarding the authority it has conferred upon the Commissioners, assuming, that is to say, that the absence of specific mention of the points will not preclude the Commissioners from inquiring into those questions which are concerned with the constitution of the force originally despatched under the command of Sir Arthur Barrett, the appointment of Sir John Nixon to supersede that officer, and the actual circumstances in which the control of the campaign was transferred from Simla to Whitehall.

The writer emphasises the fact that in its early stages the campaign in Mesopotamia was extraordinarily successful:—

Indeed, it has been admitted on all hands that for some time the campaign in Mesopotamia was conducted as brilliantly and as successfully as any in which British arms have ever been engaged, and we believe it will be found that the subtle dividing line between unbroken prosperity and the beginning of adversity will be the point at which the Commissioners will find their first really serious and difficult work.

And he is curious to learn whether General Sir Arthur Barrett believed it possible to fight and win his way to Baghdad; whether he was "invited to express an opinion regarding that particular phase of the campaign"; and whether his supersession by Sir John Nixon can be in any way attributed to his expression of such opinion. The article concludes:—

It is unfortunate, perhaps, that it has been found necessary to undertake the investigations during the war. If we are to win it is imperative that every scrap of our energy should be directed against the enemy. It is possible, moreover, that witnesses who appear now will fail to do themselves, or the truth, the same justice which might be done when the physical and mental stress of the war has ended. If the Government had not pursued an insane policy of reticence when the complaints regarding Mesopotamia were first made, if they had acknowledged then what they have had to acknowledge since, that there had been a lamentable lapse from efficiency, it is more than probable that the bitter outcries and scathing criticisms we have heard in Parliament would never have been uttered. In any case, the present inquiry could have been deferred without incurring any risk and, perhaps, with some advantage. As it is, it must proceed.

Roumania and France.

In *Correspondance d'Orient* (July 10), M. Léo Claretie writes in lively style on the likeness between the Roumanians and the French. He finds it very sur-

KING GEORGE. KING OF SPAIN
Digitized by Google

prising that Roumania has not ranged herself beside the Entente Powers to fight her worst enemies, the Turks and the Bulgarians, since there is no country in Eastern Europe more strongly Francophil. The following extracts are from his article, which is entitled "France et Roumanie":—

Quand on arrive chez les Roumains, de quelque côté qu'on entre chez eux, on a l'impression de venir de l'étranger et de rentrer en France. . . . En Bulgarie, en Hongrie, le Parisien est perdu, dépaysé. . . . Mais à peine arrivé à Bucarest, il a l'impression d'avoir remis les pieds sur les Grands Boulevards, et de retrouver derrière les Carpathes une image de Paris. Il entend parler français; aux devantures des librairies sont les livres de Paris les plus récemment parus. . . . Les modes sont celles de chez nous, et les plus récentes. . . . Dans les salons la dernière "première" des théâtres parisiens est discuté comme elle le serait chez nous, deux jours après son apparition. Nos actualité sont connues aussitôt et commentées, et dès qu-un Parisien arrive, on lui demande les dernières nouvelles des événements de la vie à Paris. Les Roumains connaissent notre littérature, et la plus contemporaine, mieux que bien des Français; il en est des plus cultivés qui ne savent pas le roumain.

M. Claretie, however, regrets that however much the Roumanians admire France, they still go to Germany for many things that they require. The German has flooded the country with his wares and his commercial travellers, while France has neglected the field. What he writes might be studied with advantage by English, as well as by French, readers. It is to be hoped that after the war the German will be less in evidence in the Balkans than he has been of late.

A Year Ago.

The writer of an article entitled "The War in the East and the Fall of Erzingan," which appeared in last Saturday's *New Statesman*, concludes by expressing the opinion that "the fall of Erzingan may prove the turning-point in the Asiatic war. The Russians have no obstacle left in front of them comparable to those which they have overcome. If their next moves are accompanied by a British move in Mesopotamia, better worked out than those which ended in the fall of Kut, they may well make such a contribution as we have suggested above to the final result." Earlier in his article he contrasts the situation a year ago, when "the larger half of our attention went to the Near East," and to-day, "when the 'Western' school is in the ascendant. He thinks that:—

The contrast results mainly from our having abandoned the direct attack on Constantinople. No objective in the Near East is comparable to the capture of the keys of the Black Sea. No other can in any similar degree be thought of as an alternative to the Western objectives. No other has so immediate an influence on the Russo-Austro-German front, which has hitherto been, and may in the end be, the scene of the chief offensive victories in the war. Indeed, in 1915 the Dardanelles Expedition, for all its misconceiving and mishandling, did more to help Russia out of disaster than anything undertaken in France. What arrested the victorious march of the German armies towards Kieff and Petrograd was not the Champagne-Loos-Souchez offensive. It was the necessity of saving Constantinople, a necessity which was the motive of the Serbian campaign.

And in the following paragraph he asks, and gives his own answer to, two important questions.

Turkey, or at least the Turkish control of the Straits, has always been among the main factors in the war. The original conception of the Dardanelles campaign was sound on one side; for at least the end which it sought was well worth paying a high price for. The popular arguments against it, based chiefly on the fact that Gallipoli is further from Berlin and London than the French front is, were crude and myopic. But in examining any strategical objective one has to ask not only "Is it worth attaining?" but "Is there any sufficient possibility of our attaining it with the forces available at the time?" The British Government were right in saying 'Yes" to the first question. Were they right in saying "Yes" to the second? The public had then no means of knowing; we had to take Ministers' word for it. Subsequent events, however, have clearly shown that under Mr. Churchill's sanguine impulsion the Government answered this second question wrongly; and that in that sense and for that reason the Dardanelles campaign was a colossal blunder. And when an enterprise of such magnitude has failed once, it is not likely to be tried again. A renewed attempt to strike at Turkey's heart before we have conquered her extremities is one of the least probable developments in the war.

Retribution.

In a leading article, "Pressing the Enemy," *The Times* refers to the capture of Erzinjan by the Russians and the importance of our Allies' complete control of the great military road which runs from Trebizond to Erzeroum and to Erzinjan. It adds:—

The moral side of their triumph is that they have conquered the heart of Armenia, and have exacted a partial retribution for the unprecedented horrors of last year's massacres. The more practical side is that the road into Anatolia now lies open before them, and they have still time this season to advance into the valleys of the Kizil Irmak and the Kilkit Irmak. The Turks will doubtless take up a fresh line of defence east of Sivas, but their successive reverses in Asia Minor cannot long be hidden from the bazaars of Stambul. Reports allege that the discomfited Austrians are turning to their defeated Turkish allies with appeals for aid in Galicia. If these stories are true, then both Austria and Hungary have indeed drained the cup of humiliation to the dregs by seeking succour at the hands of their hereditary foes.

"Where Germany is Weak."

The *Daily Mail* of August 1 published an article with the above title from the pen of Mr. Austin Harrison, who considers that

If the Germans were to walk out of France to-morrow and Belgium the day after, yet keep Serbia and maintain their Turco-Bulgarian military and economic partnership, in great part the Pan-German scheme would be realised, and Germany, an she could end the war on such terms, would incontestably have gained the chief part of her objective.

And this idea it is, which Germans designate as Austria's "ethnic landslide," without which all Pan-Germans agree there could be no chance of success. This is what the Germans are fighting for, what they hope to maintain, and as it is the Germanic central objective, so, militarily, it is the weak spot in their armour.

He concludes his article with the following paragraphs:—

A decisive blow struck upwards from Salonika, breaking through the Bulgarian resistance and liberating Serbia, and Pan-Germanism will receive a mortal wound, from which in this war there can be no recovery. The Young Turks joined Germany because of their belief in German arms, and Bulgaria joined Germany also for the same reason. But if the Bulgarians are defeated and driven into their own country, Turkey will find herself cut off, stranded, reeling into helplessness, and the hour of Austria's fate will have sounded.

That is why the offensive from Salonika is of such enormous importance. It is there that the German heel of Achilles lies. It is there, if we strike well and victoriously, above all if we strike now, when the Austro-German armies are fully engaged, that a decision may be reached of overwhelming military and political significance, which would not only frustrate all Germany's ambitions, but inevitably hasten the end of the war, if only by process of disintegration.

The Move at Salonika.

The *Daily Graphic* (July 29) welcomes the reappearance of the Serbian Army in the field, and the resumption of activities at Salonika, in a leader note. It is fitting, says the writer, that "it is the gallant Serbian Army which is leading the initial offensive against the soldiers of the pinchbeck Tsar Ferdinand."

The bare announcement of the event contains a moral. More than nine months have elapsed since an Allied force landed at Salonika on the invitation of the Government of Greece. How that force was thwarted by the Greek King's refusal to support his Premier need not be recalled in detail at this moment. That factor contributed largely to the inability of the Allies to give immediate relief to Serbia. Germany has gloated over the fact; the Allies have been derided by blatant Teutons for their failure to protect their friends. The Allies kept their counsel; no taunts were able to stir them to premature action. All the time, however, the Allied camp at Salonika has waxed ever larger and stronger, and in that safe haven the brave sons of Serbia have been rested, re-formed, and re-equipped for the appointed hour. With the Central Powers held in an iron grip on their far-flung eastern and western lines, and at a crisis of their fate when they are unable to give treacherous Bulgaria any help, if they wished, it appears that at last an Allied offensive from Salonika is under way. The van of that offensive belonged of right to Serbians. Deserted by Greece and betrayed by Bulgaria, their innate fighting spirit must be keyed to a resolute mood. Knowing they have the support of their French and British comrades, they may be depended upon to take toll of the Bulgarians to the utmost. Victory speed them!

Russia's Wonderful Effort.

The *Daily Chronicle*, in a leading article (July 27) extolling the Russian victory in Asia Minor, reminds its readers that they must not expect the impossible even of our wonderful Ally. It says:—

It must not be supposed that, because the Turkish resistance has ended in defeat and rout, therefore it has not been a bitter and desperate resistance, which it required very good generalship and hard fighting to overcome. We know the Turks better than that. And the scene of the Russian offensive in Armenia is a country with greater natural obstacles than any other in which the present war is waged—much greater even than Trentino, for the mountains are higher, and the routes are mostly bridle-paths. We need to realize these things in order to appreciate fairly the extraordinary achievement of our Russian Allies. Their latest move has been undertaken at a time when they were heavily engaged on their European front. . . . It is at this time that Russia has found men and munitions to resume her Asiatic offensive and sweep the Turks out of the Armenian mountains—a signal testimony to the great

Digitized by Google

scale and variety of her resources. We should beware, however, of indulging unreasonable hopes as to what she will do next. Some time must be taken in consolidating her new ground; and the Turks will gain some advantage as they get nearer to the railhead.

Bulgarian "Prudence."

M. Georgoff, Professor at the University of Sofia, published recently, under the title of "Bulgaria's Part in the World War," an article in the German review, *Europäische Staats und Wirtschaft Zeitung*, in which he explains Bulgaria's policy from the conclusion of the Balkan Entente up to her entry into the European war. The following extracts are translated from the *Echo de Bulgarie* (June 16), which reproduces the professor's views:—

Bulgaria alone of all the Balkan countries had no interests opposed to the Triple Alliance. . . . The best Bulgarian politicians, headed by King Ferdinand himself, were convinced that the Bulgar national interests compelled Bulgaria to place herself thenceforth by the side of the Central Powers. For thus only could Bulgaria prevent the excessive aggrandisement of Serbia. And when the European war broke out it was clear to these politicians which side Bulgaria would later have to take. . . . This was the cool and considered calculation upon the true interests of the country. . . .

This imprudent Bulgarian professor is in no wise ashamed of confessing explicitly how Bulgaria sought to deceive Entente diplomacy. As he says:—

But Bulgaria needed to be prudent. There was a moment at which, if the Entente States knew that Bulgaria was lost to their cause, they might loose against her the other Balkan States, as in 1913.

Then, after explaining Bulgaria's *coup*, he has the audacity to mock at the diplomacy of the Entente. "And Bulgaria," says he, "threw off the reserve that had so much puzzled these short-sighted diplomatists, and took her stand at the side of the Central Powers."

"A Cad from Salonika."

The *Daily Express* (July 2) has many hard things to say of the Turk, especially of the "Young Turk," in a leading article entitled "The Huns of the East." Thus we read of the Turk:—

He is still the blind destroyer. He has contributed nothing to the life of the spirit. Moslem civilisation, a real and a fine creation, owes him nothing. He can burn and massacre, but he cannot build or create. The Turk has no place in modern Europe, or, indeed, in the modern world.

As to the Young Turk, "Nero was a puling child" compared with him:—

The Young Turk is, indeed, a thousand times more detestable than the old Turk. He attracted the sympathies of Western Europe by his glib profession of democratic principles. He demonstrated his modernity by deriding his religion and blatantly disregarding its precepts. The Young Turk is, indeed, a cad from Salonika. Abdul Hamid was overthrown, a comic-opera Parliament was set up in Constantinople, and the simple souls who believe that national salvation necessarily lurks in a ballot-box sang pæans of delight. The Young Turk, however, soon showed himself as subtle an intriguer as the ex-Sultan, every bit as corrupt, and not half so clever. Germany discovered his price and bought him very cheap, and he was only too eager to sacrifice every genuine national consideration at his paymaster's command.

Very few people will be found in this country to quarrel with the latter passage, at least.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

British Prisoners in Turkey— July 27.

Mr. H. Forster informed Sir E. Cornwall that, so far as was known, the total number of British prisoners now in the hands of the Turks was approximately 600 officers and 8,370 other ranks. These figures included native Indians and Egyptians, in addition to British officers and soldiers and soldiers from the Dominions.

Lord R. Cecil, replying to Sir E. Cornwall, stated that the Foreign Office had just received a Note from the United States Ambassador, enclosing a despatch from the United States Embassy at Constantinople, in which it was stated that official lists of the Kut prisoners had not yet been furnished by the Ottoman Government; that the United States Consul at Baghdad telegraphed on June 26 that one thousand prisoners were still at that city too ill or weak to proceed; and that a British staff-sergeant had reported from Angora the arrival of sixty-two prisoners at that place. Outfits of clothing, toilet supplies, and money would be sent to the prisoners as soon as possible.

—And Persia.

Colonel Yate asked the Under-Secretary of State for Foreign Affairs what was the present condition of the British Consul at Shiraz and the other British subjects held prisoners by German emissaries in Persia; whether there was any prospect of their immediate release; and, if not, whether his Majesty's Government would now take effective retaliatory measures against the German officials on the British concession in China?

Lord R. Cecil: According to our latest information, all these British subjects, except two, are in good health, and the treatment being accorded to the prisoners had recently improved. In regard to the last part of the question, I would observe that, whatever may have been the initial responsibility of the German agents in the matter, these prisoners are at present in the hands of rebel Persian tribesmen, and that the arrest of Germans in China would leave these tribesmen totally unaffected. Everything possible is being done to secure the release of these unfortunate British subjects, but the difficulties are very great.

Colonel Yate: Considering that the seizure of British subjects originated with German emissaries, will his Majesty's Government take no retaliatory steps at all?

Lord R. Cecil: If we can catch the original Germans there would be very good reasons for retaliatory steps, but I am not quite sure that it is really sound policy to punish one German for what another German has done.

The Dardanelles Commission.

The House having gone into Committee on the Special Commissions (Dardanelles and Mesopotamia) Bill,

Mr. Asquith moved the insertion of the names of the Dardanelles Commission—viz., the Earl of Cromer, the Right Hon. Andrew Fisher, Sir Thomas Mackenzie, Sir F. Cawley, M.P., Mr. J. A. Clyde, M.P., and Captain S. L. Gwynn, M.P. After a protest on the part of an Irish member against the number of Peers who were appointed to such bodies, the motion was agreed to.

Sir H. Dalziel moved that Mr. Walter Roch, M.P. for Pembroke, should be added to the Commissioners.

Mr. Asquith feared that the addition of one name would lead to the addition of others, and he preferred to keep the Commission limited in number. If, however, the House did not accept that view he would not insist on it. After further discussion, he intimated that the Government would leave the matter entirely in the hands of the House, and on a division the addition of Mr. Roch was agreed to.

Admiral Sir H. Meux recalled the fact that thirty years ago a proposal to attempt to force the Dardanelles was made by the late Lord Salisbury, and on that occasion fortunately we were saved the losses which must have been incurred, by the absolute refusal of the then First Sea Lord, Admiral Sir Frederick Richards. What this Commission was to inquire into was the conduct of the Admiral and the General in command. In order that they might be tried by men who knew something about modern naval and military matters, he moved that the Commission should include at least one naval and one military officer chosen from the retired lists.

Commander Bellairs suggested as an alternative that the Commission might be assisted by naval and military advisers. Mr. Asquith was disposed to accept this suggestion, and hoped that Sir Hedworth Meux would be satisfied with that arrangement.

Sir H. Meux, however, was not satisfied with the suggestion, seeing that an assessor could only speak when he was asked. Thereupon Mr. Asquith assented to the amendment, and it was agreed to.

Mr. Churchill moved that the Commission should inquire into "The circumstances in which and the authority on which the naval and military expeditions to the Dardanelles and Gallipoli were undertaken." He explained that these words were preliminary to a complete reconstruction of the reference so as to make it cover all the points involved.

Mr. Asquith feared that the specification of particular questions would lead to the exclusion of others not specified. He was willing, however, that the Commission should be instructed to inquire into the origin and inception of the expedition as well as its conduct.

The offer made by the Prime Minister was agreed to, Mr. Churchill's amendment being withdrawn in its favour. It was further agreed, at the instance of Mr. Churchill, that the inquiry

Digitized by Google

should extend to drafts, reinforcements, and ammunition, and should cover the Fleet as well as the troops.

The Mesopotamia Commission.

Mr. ASQUITH formally moved that the Mesopotamia Commissioners should be Lord George Hamilton, the Earl of Donoughmore, Lord Hugh Cecil, M.P., Sir A. Williamson, M.P., and Mr. J. Hodge, M.P.—The proposal was agreed to.

Sir A. MOND moved to add to the Commission the name of Major Wedgwood, M.P., who had seen service in the Dardanelles.

Mr. ASQUITH accepting the amendment, it was agreed to.

An amendment in the name of Sir H. MEUX, that one naval and one military officer chosen from the retired lists should be appointed on the Commission, it was adopted on the motion of Mr. CHAMBERLAIN. Other amendments were inserted to bring the terms of reference into line with those agreed to for the Dardanelles Commission.

Persian Railways. July 31.

Colonel YATE asked the Under Secretary of State for Foreign Affairs whether, in view of the necessity for the speedy completion of the Mohammerah-Khorremabad railway in Southern Persia, he would expedite the repayment of the sum of £19,382 12s. 2d. mentioned in the directors' annual report as due to the Persian Railways Syndicate, Limited, by the Persian Government, in order that construction might be commenced and the railway completed as far as Ahwaz or Dizful, or some other point as far north as possible, with as little delay as possible.

Lord R. CECIL: His Majesty's Minister at Teheran has been instructed to support this claim against the Persian Government. The hon. and gallant member will, no doubt, recognise that present conditions in Persia impose certain limitations upon financial and other progress.

Colonel YATE: Will steps be taken to push on this very necessary railway?

Lord R. CECIL: I did not understand that this question was in reference to pushing on the railway, but to a claim against the Persian Government. That we will support.

Colonel YATE: That is the first preliminary to pushing it on.

Mesopotamia and the Dardanelles. August 1.

On the report of the Special Commissions (Dardanelles and Mesopotamia) Bill,

Mr. ASQUITH moved to delete from clause I., subsection 1, the statement that there should be as members of the Dardanelles Commission "at least one naval and one military officer chosen from the retired lists" in order to insert the names of Admiral of the Fleet Sir William Henry May and Field-Marshal Lord Nicholson.

Admiral Sir H. MEUX said that the name of Sir William May would be received with unbounded approval by the Navy, but with regard to Sir Cyprian Bridge, who was to be proposed for the Mesopotamia Commission, he did not think that a man should be entrusted with this duty at the age of seventy-seven. Apart from his age, Sir Cyprian Bridge had completely lost the confidence of the Navy by signing the unfortunate Declaration of London, and he was afraid that the nation would not regard his selection with satisfaction.

Mr. ASQUITH said it was a most invidious task to impugn or to defend the selection of a particular officer to serve on Commissions. No one could dispute that Sir Cyprian Bridge was a naval officer of the highest distinction. His naval record spoke for itself. The whole gravamen of Sir Hedworth Meux's objection was the age of Sir Cyprian Bridge. No more fallacious test of a man's fitness could be applied, because many distinguished men were in full possession of their mental and physical faculties at a very great age. The House ought not to reject a nomination, made after full consideration, solely on the ground that the nominee was seventy-seven years old.

Sir E. CARSON asked whether Sir C. Bridge would go to Mesopotamia

Mr. ASQUITH replied that, under the terms of the Bill, if it were necessary to hold local inquiries, the whole Commission might go; but under an amendment they had power to delegate such work to two or three of the Commissioners.

Mr. ASHLEY suggested that it was desirable to have on the Commission experts with knowledge of modern warfare.

Mr. CHURCHILL pointed out that the House had decided that the selection should be made from officers on the retired list. It would be unfair to an officer on active service to ask him to sit in judgment upon the highest authorities in the State and at the Admiralty and the War Office.

Sir J. REES said he did not know much about Admirals, but he did know something about Mesopotamia, and he was quite sure that a man of the age of Sir Cyprian Bridge would never be able to stand the climate if he had to go there in connection with the conduct of the inquiry.

The amendment was agreed to.

On an amendment providing that Admiral Sir Cyprian Bridge and General Sir Neville Lyttelton should be the naval and military members of the Mesopotamia Commission,

Colonel YATE asked whether Sir Neville Lyttelton had had any Indian experience?

Mr. ASQUITH said Sir Neville Lyttelton, who had been Chief of the General Staff here, and had a very distinguished career in South Africa, earlier in life commanded a battalion in India for some time.

The amendment was agreed to.

Mr. CHAMBERLAIN moved a further amendment giving the Commissioners power to authorise any person to be represented by counsel or otherwise, "if they consider that any injustice would ensue if that person were not so represented."

Sir E. CARSON asked whether counsel who were members of the House would be able to appear. He thought that would be improper.

Sir H. DALZIEL urged that the rule preventing members of Parliament from appearing as counsel before House of Commons Committees should also apply to this case.

Mr. CHAMBERLAIN stated that, though nothing he could say would have authority, he agreed with Sir E. Carson that members of the House of Commons ought not to appear as counsel before Commissions of that House.

The amendment was agreed to.

Mr. CHAMBERLAIN moved for the insertion of a provision with the object of enabling two or more of the Commissioners to take evidence abroad. This was agreed to. Other amendments moved by Mr. CHAMBERLAIN and Mr. HAZLETON were adopted, having the effect of securing that information should be given and documents should be produced at the request of the Commissioners to which the Official Secrets Act might apply. The SOLICITOR-GENERAL moved to substitute for subsections 2 and 3 of Clause 4 (Indemnity to Witnesses) a provision that any answer given by a person examined by the Commissioners "shall not be evidence against that person in any criminal proceeding (including a proceeding by Court-martial) at any time thereafter instituted against him, and any document so produced shall not be evidence against him in any such proceeding unless the production of that document could be enforced in those proceedings or evidence of that document could be otherwise obtained in any such proceedings." After some discussion the amendment was agreed to.

The Bill passed through Report Stage, and was reported to the House.

On the motion for third reading Commander BELLAIRS objected to the whole principle of inquiries during the war. These Commissions might have a bad effect upon the unity of the Services. Cliques and schools might be created. There were many advantages to be gained by postponing the inquiries until after the war.

Mr. S. ROBERTS thought the hon. member would stand almost alone in his view. Great mistakes had been made, and the country would not be satisfied until those mistakes had been remedied, and those responsible for them brought to book.

Sir E. CARSON hoped the Commission into the Mesopotamia operations would begin at the present state of affairs, and not at the inception of the expedition. Let them get at the existing conditions, and see how they could be remedied in the interests of our men and humanity.

Mr. CHAMBERLAIN, replying to the various points raised, said he had the assurance of the Chairman of the Mesopotamia Commission that it was his desire that the proceedings should be as expeditious as possible, and that he would be able to report as soon as possible not merely as to the treatment of the sick and wounded in the past, but as to our position in that respect at the present moment.

The Bill was read a third time.

Our Losses at Gallipoli.

Mr. FORSTER, in a printed reply to a question put by Mr. Malcolm, says:—As I stated on July 26, in answer to an oral question, the numbers of prisoners captured in the Dardanelles and now in the hands of the Turks are believed to be 19 officers and 359 other ranks. The net number missing, after allowance has been made for men since reported killed, etc., is about 290 officers and 9,700 other ranks. These figures include soldiers from the Dominions, native Indians, and men of the Royal Naval Division, but not officers and men of the Royal Navy. The Army Council, after the lists of prisoners had been referred to the United States Embassy at Constantinople for further check, were satisfied that there was no ground for hoping that there were prisoners who had not been reported, and it was consequently decided that the missing officers and men not accounted for must be officially accepted as dead. Effect is being given to this decision after due consideration of the circumstances of each individual case.

Prisoners in Bulgaria. August 2.

Lord ROBERT CECIL informed Sir E. Cornwall that the consent of the United States Government to the publication of the report of the United States Consul-General in charge at Sofia regarding the treatment of British prisoners of war in Bulgaria had not yet been received. The names of seven officers and 447 other ranks had so far been reported to the War Office as prisoners of war in Bulgaria.

THE DARDANELLES INQUIRY.

As we go to press, we learn that in the House of Lords on Thursday the Bill appointing Commissions of Inquiry into the operations in the Dardanelles and in Mesopotamia was read a second time. Lord Crewe said the appointment of an additional member to the Dardanelles Commission might be made later. Lord Cromer referred to the criticisms made in the House of Commons regarding his appointment as Chairman of the Dardanelles Commission, criticisms in which he was inclined to concur. He accepted the appointment from a sense of duty, but he would resign should the strain prove too great. He assured their lordships that there would be no whitewashing and advocated the appointment of a judicial member on the Commission.

Mr. Heinemann will publish shortly "Gallipoli," by Mr. John Masefield, who took part in the Dardanelles campaign. The book gives a detailed account of the battle for Koja Chemen Tepe, and of some of the landings, and a sketch of the whole operations. It is illustrated with photographs.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

I am glad to observe that the Egyptian Government propose to make compulsory the rooting-up and destruction of old cotton plants after the final picking of the crop. Cultivators who persist in neglecting this very necessary operation will be fined one pound (Egyptian) and also be liable to a week in prison. The authorities may be trusted not to make their new power an instrument of oppression, and we ought next season to derive great advantages which might have been gained long since if commonsense methods of cultivation had been insisted upon earlier. "The law also enacts" (says Reuter) "similar treatment in respect of the hemp and bamia plants. In this way it is hoped considerably to minimise damage by worms to the cotton plants. It has been proved by the investigations of the Ministry of Agriculture that the leaving of the plants in the ground after the crop has been raised has contributed, in a great degree, to the occurrence of the annual worm attack."

***

Things are being rushed along at Busreh with a vengeance. A correspondent tells me that already an insolvent has applied to the district court for protection, and his case has proceeded so far that his discharge will shortly be granted. Another indication of progress is an advertisement in the local newspaper for "a qualified and thoroughly competent man with teaching experience to give lessons in bookkeeping and accountancy as dictated for the junior and senior course of the London Chamber of Commerce." Progress, my masters.

***

Nobody will be surprised at the breakdown of the negotiations between Turkey and Roumania for the exchange of certain articles which both countries wanted pretty badly. Anything like a definite discussion of this matter would be ill-advised at the moment; but I may say this that Roumania is not likely to make a bad investment. She has had ample opportunities for judging what are the chances of business, and who are likely to prove to be unprofitable customers, and, what is more, she knows very well how to avoid booking bad debts. Roumania has her own little problems to tackle, and is wise enough to know that bad business is not going to help in the finding of a solution. Meanwhile, I am glad to learn that the fear of depleted crops has not altogether materialised. The harvest will not be of the bumper order, but it will be good, nevertheless, so I am given to understand. The country has not been badly hit by the war, and there would seem to be no good reason why an era of real prosperity should not be inaugurated.

***

I regret that I was unable to accept an invitation to be present at the excellent exhibition of Serbian handicrafts which was held at Bradford in aid of the Serbian Relief Fund on July 26. I am told, however, not only that it was very successful, but that it did good in the direction of enlightening a large number of English people regarding the possibilities of cottage industries in the distressed country when the enemy has been bundled out of it neck and crop. A short account of the function appears elsewhere in this issue.

The lament of a French writer in the *Correspondance d'Orient* that his commercial compatriots in Roumania have hitherto permitted the German trader to become, and remain, supreme will strike a sympathetic chord in British hearts, for our own people have done the same thing in other corners of the world with equally disastrous results. It is amazing that the German trader has been able to win such easy victories on the peaceful battlefields of commerce; but he has done so, and he has now to be fought. Too much emphasis cannot be laid on that fact. It must be kept in the foreground all the time if we are to win back what we have lost. I know that in Egypt we have simply thrown away trade for the Hun to pick up, and he has picked it up without losing any time. Fritz is not proud, he is not lazy, he is not obstinate or conservative; he is conciliatory and obliging, and as he is also as unscrupulous as a brigand, it follows that he has managed to secure more than we have thrown away.

***

In a word, he has ousted us in every market in which there was money to be made. We have been out-generalled and out-gunned, to borrow a simile from our military friends, and we have suffered these disasters because we have refused to use the fine weapons we possessed. Let us make no mistake about that. We blame the British Government for its defective system and lack of system, and I will not attempt to defend that mighty institution against the charge of ineptitude; but the British manufacturer and merchant are suffering also the penalty of their own indifference and obtuseness, and, unless they are prepared to reform their methods, "after the war" will find them as badly off as ever they were. The traveller who has British-made goods to sell, and who knows his business, has the finest asset it is possible to have. If any evidence of that fact is wanted, it is supplied by the Hun himself. Ask any British Oversea Customs official, and he will tell many weird stories of attempts made to smuggle goods with false trade descriptions—the false description being in the great majority of cases concerned with the country of manufacture. We need not be afraid of the goods; what we must pillory mercilessly is the fact that the German article is not what it seems—that inside it is inferior in all respects, and that outside its apparent superiority is veneer. That is the whole point. The Hun is the greatest veneer merchant in the world. His goods are as great a sham as his "kultur."

***

The view attributed to the late Lord Kitchener—namely, that for twenty years after the war the Germans should be excluded from the comity of nations—is interesting, and its interest has since been enhanced by the ferocious way in which they did poor Charles Fryatt—whom I knew, by the way—to death. I am no apostle of boycott, as I have said in these columns before; but to my mind it is unthinkable that these pariahs should be admitted to the same social and commercial amenities as our Dominion cousins and our Allies unless and until they have made the fullest reparation. If that is to be so, indeed, what is to be the reward of those who have suffered gladly for the sake of righteousness? Are we to grant the same trading and commercial facilities to the pirates who sank the Lusitania and the Portugal, and other vessels that were destroyed wantonly and without warning, with the loss of many hundreds of innocent and non-combatant people? Should the ravagers of Belgium and Serbia and France be allowed to come into our markets on the same terms as the people whom they outraged, and in whose behalf we are now fighting? Briefly, are we to smash the monster, and then pour oil and wine into his wounds? Commercial men in every country in the Empire must decide upon their attitude towards this question. It is going to be a very formidable business presently.

***

If the British Government intend to take any action in this matter they will not experience any great initial difficulty. Every enemy-alien firm in the Empire is known; the majority of them have been closed, more are in liquidation, and still more are marked down for similar treatment. I do not think it needs to be pointed out that all these concerns must remain closed until the prohibitory enactments have been repealed. I commend these simple facts to the British Chambers of Commerce who will be able, more than any other bodies, to inform the various Governments of the real trend of commercial opinion. The British people have been guileless in their trading methods in the past; in some respects they have been worse than that, and they must take a new line in the future. The line would appear to be chalked out for them, and they must "toe it."

***

With the Turks out of Armenia for the time being, it ought to be possible to do something for the unfortunate Armenian people—or rather for such of them as have survived the cruel campaign of extermination which has been waged for many years by the Turks and Kurds. There are roads to be made and railways to be built, but these considerable projects must wait for better and more peaceful times. Much could be done, nevertheless, in the direction of finding the peasants raw materials for their smaller industries. The Americans have been very good friends to this ancient Christian people in the past, and I dare say that they have not tired of their good work; but I would suggest that the attention of the many wealthy Armenians in India should be invited specially to the problems that will soon arise. I know, of course, that the Armenians in India have come mainly from the Julfa side, and are Persian rather than Turkish; but the fact that their lines have fallen in pleasant places should move their sympathies on behalf of their stricken friends. It is possible that already they are doing something in the matter; but I am a fairly close student of the Indian newspapers, and, so far, I have seen no mention of a mission of help. Some steps should be taken to induce them to assist their co-religionists to start work; that would be the best form charity could take, for not only would the suspended industries be set going again, but the work would help to divert the minds of the people from the sorrows of the past to the newly-born hope of the future. And if a people ever needed hope, and a reason for it, the Armenians are they.

After Two Years of War.

War was declared upon Germany by Great Britain two years ago to-day. At that time the only Near Eastern State to be involved in the struggle was Serbia. It was expected that Greece, her Ally by treaty, would give effect to the agreement that existed between them; but, unfortunately, the King was unable to make up his mind to throw in the lot of his people with the cause of righteousness, and Greece was left in a false position, a position which has remained ambiguous up to this day. Bulgaria did as most people who knew the character of her king believed she would do. She made friends with the mammon of unrighteousness. Russia was suffering adversity in the East, and in the West the cause of the Allies was making no progress. Serbia was already under the heel, and, acting in the closest union with the Central Powers, King Ferdinand struck a blow for the side which he thought was winning. He assisted in the final temporary overthrow of his stricken neighbour and, to look ahead for a moment, in a very few months from now the Bulgars will be in the melting-pot, and in very good company, with their Allies the Turks. Turkey had previously shown the cloven hoof. Enver Pasha and his satellites had for long been under German influence. Some day, perhaps, we shall know the price he demanded, and what he got, for his treachery. There were few obstacles in his way, and these he had little difficulty in removing. German money cleared the road in some cases, secret assassination did the rest, and before the end of 1914 Turkey had come into the fray.

Then—and Now.

The situation has changed in the meantime. Russia is advancing along the greater part of her long line from the Baltic to the Balkans. For two months she has been delivering a series of blows which have left our enemies staggering, unable to recover from the effects of one before the other is delivered. In the West, Great Britain and France have at last chosen the time in which to strike Germany, with the result that there is at this moment a movement in progress which we all hope and believe is the beginning of victory. Serbia is still in enemy occupation, but her gallant troops, which, in the early days of the conflict, humbled the Austrians in the dust, after rest and reorganisation are ready once more to take the field and a place of honour when the final fight for the liberation of their country is undertaken. Indeed, they have already given the Bulgars a taste of their quality.

Commerce in War-time.

It will be impossible during the war to state the extent to which any particular country has lost or gained commercially. It is unlikely that any State will escape actual loss because the effect of war is always to paralyse, and the Near East has been under the shadow for many years. "The snows melted" in September, 1912, and the thaw has not yet stopped. We know that Bulgaria and Turkey are in a condition of hopeless insolvency, and that they are carrying on now merely as the creatures of their Allies. Their trade and commerce have disappeared, their revenue, apart from such exactions as they are able to grind out of their own people, is negligible, and all the indications point to the fact that Germany and Austria will soon be in the position of "borrowers" themselves, rather than lenders. Indeed, they have already assumed the rôle, for we know that the unfortunate Turks have recently had to send a considerable force to co-operate with the Austrians in the latter's desperate attempt to stem the advance of the victorious Russians. It may be too early to speak definitely, but those who know the Near East do not hesitate to say that the doom of the Balkan allies of the Central Powers has been sealed so far as their trade and commerce are concerned.

Before the war Bulgaria's main trade followed three routes. The mainland railway and the Danube distributed her exports to her Continental customers, and a certain proportion of her foreign trade found an outlet in the Black Sea and through the Dardanelles. That is to say, such foreign trade as there was, and it was not much. It has fluctuated with a fine disregard of average, and when the account has to be made up there will be a very heavy balance on the wrong side. Bulgaria has not yet been engaged in the war for a year; but already her resources are practically exhausted. The Budget, which has just been presented, disclosed an alarming deficit of, approximately, 100,000,000 francs; which had risen from about 22,000,000 francs in 1914. What it will be by the time the country has felt the fullest strain of the war can only be conjectured, but this much is certain, that when the war has ended her position will be grave. She has made an implacable enemy of Russia, likewise of Serbia—and Serbia coming into her own will be a force to be reckoned with. Roumania, whatever part she plays, or does not play, in the struggle now, will have her own policy to pursue—and it is not likely to assist Bulgaria. Greece has already shown that she understands the value of a regard for Number One, while Turkey will count for less than ever she has done.

Fair Weather in Egypt.

The commercial barometer is set fair in Egypt. So recently as July 7, our correspondent in Cairo was able to tell us a wonderful story of progress. The results of the year ended on March 31 last exceeded all expectations. The year closed with a record surplus of more than £E3,000,000, which was 20 per cent. above the estimates, the revenue having returned to the figures for 1913, which was the last normal year before war broke out, and our correspondent was able to show that the result was attributable to the general improvement in the condition of the people, consequent on the excellent cotton position and on the continued presence of a large number of troops in the country. In a word, the war was a factor in the prosperity of the country and the people. In a further letter, which appears in to-day's issue of THE NEAR EAST, there is a later record of prosperity.

Perhaps the greatest guarantee that the normal financial life of the country had been resumed is the fact that the authorities have permitted the reopening of the Bourse at Alexandria. It must not be assumed, of course, that while the Bourse was closed no business was transacted. Indeed, it is improbable that any business was allowed to pass by; it was transacted "privately" outside the House. True, for the first six months of the war very few transactions were put through—that was inevitable in all the circumstances. But after that period had elapsed the recovery set in. People who had been affected by the panicky feeling that swept through Europe from one end to the other were not long in realising that, so far as Egypt was concerned, fear and excitement were uncalled for, and this was the only step that was necessary to the re-establishment of the normal. That has been attained long since, and it would be well within the mark to say that to-day there is greater confidence, and more money, in Egypt than there has been since the great crisis of 1907. Much depends upon crop conditions, of course, but it would seem that Egypt has before her a time of almost unparalleled prosperity. The confidence of the peasantry stands high, and there ought to be great activity in the sale of land. Agriculture stands out a fine picture, and the Egyptian Government are to be congratulated upon the strong and far-sighted policy which they have followed.

Recovery of Greece.

It would seem, too, that Greece is recovering stability. It would be futile to pretend that her attitude has not occasioned great disappointment among those who called her by the name of friend, and that a certain lapse from discretion in Athens did not at one time threaten serious consequences. At present, however, better counsels seem to prevail and a great deal has been done towards restoring the equilibrium. It is noteworthy that in London Greek securities enjoy a great deal of confidence, and our advices speak of the not unprosperous condition of industry and commerce in the country. Taxation is heavy because there are great war charges yet to be liquidated; but as was pointed out in this journal not long ago it only required the proper establishment of Greek *bonâ fides* to secure financial assistance from the Entente Powers. That assistance has now been extended. Greek shipping too, has prospered as, readers of THE NEAR EAST will recall, was stated in these columns last week.

In the Near East, therefore, the position of neutrals, and of our own friends, is secure. There have been losses, the general equilibrium has been threatened, and there has been a consequent feeling of insecurity; but disaster has been averted in all cases, while in Egypt, as we have pointed out, the prosperity of the country is greater than it has been for nearly a decade. That must be regarded as a tribute to the efficiency of the Egyptian Administration on the one hand, and to the unimpaired strength of British Empire commerce on the other.

Duped Turkey.

Turkey has been duped and is bankrupt, discredited and friendless, in the very sure hands of an inexorable fate. "So she has been before," it may be objected. She has been, but with a difference. Great Britain has stood by her almost to the point of straining her own honour. It is scarcely necessary to go into that matter now, since the Ottomans themselves withdrew voluntarily from our protection. But we all know the story of the fooling of Great Britain and are not proud of it.

The fall and decline of Turkey has been a long and grotesque process. The conclusion of the first Balkan war, in November, 1913, saw the Turks deprived of a great portion of their European territory. A big slice of Turkey was divided between Bulgaria, Serbia, Greece and Montenegro, and Albania was created an independent state. Greece and Italy became possessed of the Ægean Islands, and while the future of these has, nominally, not been provided for, there is very little chance of their coming again under the sway of the Crescent. Since the present war broke out there have been other important developments. Great Britain has definitely annexed Cyprus, and Egypt has been declared a British Protectorate. Russia, after more than one adventure, has expelled the Turks from Armenia, the scene of their most terrible crimes, and, at the moment, it would appear unwise to place a limit upon the Russians' possibilities in Asia Minor. Further East the Arabs, led by the Grand Sheriff of Mecca, have again revolted against Turkish misrule and oppression, and, while it is not possible at the moment to say exactly the measure of the disaster which Turkey has sustained in this quarter, we do know that affairs have so far progressed that the British authorities in Egypt have sanctioned the resumption of trade with certain ports in the Red Sea which, a few weeks ago, were within the Ottoman Empire.

The Asiatic Provinces.

Then there is the Persian Gulf. The campaign in Mesopotamia will always be a sad and bitter chapter in British history, but in our sorrow and indignation we must not fail to be practical. At the top of the Persian Gulf we are in complete possession of a great tract of fruitful country from which Turkey drew large revenues. In and around Busreh the British occupation is complete. The public services are all in working order—posts, telegraphs, police, roads, railways, have all been organised. All trade passes through British customs houses, and that trade is rapidly expanding so far as restrictions imposed by the war permit. Thus we are able to form an idea of the Turkish position at this period of the war, and it would require amazing optimism, even in a Turk, to believe that even a partial recovery is possible, under the régime which has broken down so completely.

There is a future for Turkey, of course, but it is a future which has no place for Enver Pasha, or any of the corrupt and dishonourable persons who go with him to make up the combination which now appears to hold country and people in trust for the Huns. It will be a Turkey without oppression too, and, for that matter, without the power further to make a fool of itself.

SIX MONTHS' TRADE IN EGYPT.

(From Our Own Correspondent.)

Cairo, June 22.

The Customs statistics for June published last night show a continuation of the improvement in general trade conditions in Egypt. During June imports amounted to £E2,673,820 and exports to £E1,498,230, as against £E1,530,153 and £E1,210,403 respectively in the same month last year. For the six months ending June 30 the total imports were £E14,411,493, or £E6,338,079 better than the figures for the same period of 1915, whilst exports came to £E16,321,729, or £E3,021,572 more than for the previous corresponding period.

During the half-year the principal imports were preserved meat and fish £E263,795, skins and tinned goods £E141,546, cereals £761,210, beer £E327,175, liqueurs £E246,681, petroleum £E402,290, mineral oils £E114,330, stationery £E292,896, construction wood £E216,552, furniture £E196,801, coal £E2,197,134, stone and glassware £E236,873, pharmaceutical wares £201,502, chemical manures £E199,573, cotton tissues £2,629,253, cotton threads £E354,375, sacks £E285,658, other textiles £E1,299,981, iron and steel goods £E446,575, machinery £E170,554.

The chief exports were eggs £E410,063, cotton seed and cake £E1,134,949, cereals £E1,272,762, onions £E299,408, refined sugar £E525,976, alcohol £E128,943, cotton £E11,777,848, wool £E174,754, gold and silver bar £E107,668, and cigarettes £E127,479.

All-Round Improvement.

Compared with 1915 there is a distinct improvement in practically every category, the only exception being, under imports, cereals and sugar—a result of the better agricultural conditions in the country—as well as preserved meat; and under exports, onions—owing to the shorter crop—skins and tanned goods, benzine, cotton seed and cake, and gold and silver bar.

The best means of gauging the real position is to compare the figures for the first six months of this year with those for the corresponding period of 1914, when trade conditions were normal. Imports at the end of June, 1914, amounted to £E13,968,445, and exports to £E15,352,530, so that this year's figures are respectively £E443,053 and £E969,199 better than during the first half-year previous to the outbreak of war. In other words, Egypt's external trade has recovered all the leeway it had lost.

It may be of interest if I show what the principal changes have been in the various categories. Thus under imports, salted fish increased by £E106,261 (£E55,139)—the figures in brackets are those for 1914, with which the comparison is made—groceries, including tea and coffee, by £E285,181 (£E469,163), wines, beer and liqueurs by £E520,597 (£E188,921), petroleum by £E114,117 (£E288,173), coal by £E1,124,257 (£E1,072,877)—it is noteworthy that, whereas in the first six months of 1914, 921,343 tons were imported, only 369,683 came in up to June 30 this year—textiles by £E1,031,839 (£E3,537,328), natural indigo by £E51,314 (£E13,036), furniture by £E77,560 (£E119,241), and stationery by £E72,062 (£E220,834); whilst skins fell off by £E106,704 (£E248,250), cereals by £E1,142,055 (£E1,903,265), construction wood by £E272,163 (£E488,715), chemical manures by £E108,532 (£E308,105), common soap by £E66,088 (£E132,270), worked iron and steel by £E401,735 (£E848,310), and machinery by £E578,315 (£E748,869).

Exports Analysed.

Under exports the following changes are noticeable:—Eggs increased by £222,507 (£E187,556), sugar by £E499,785 (£E26,191), cereals by £E1,101,504 (£E171,258), alcohol by £E128,943 (nil in 1914), wool by £E88,627 (£E86,127); on the other hand, onions fell off by £E47,922 (£E347,330), cotton seed by £E348,651 (£E1,276,664), and cotton by £E587,649 (£E12,365,497). The quantity of cotton and cotton seed exported was 868,837 cantars and 580,226 ardebs less than in the first six months of 1914, when the quantities were 3,570,555 cantars and 1,428,148 ardebs respectively. It is evident that, although the improvement in the cotton market somewhat counterbalanced the restriction in the 1915 cotton area, the situation was saved by the excellent returns obtained from the country's other products, which brought about a corresponding reduction in the imports of cereals. It is interesting to note that the increase in imports directly attributable to the presence of troops in the country amounted approximately to £E1,250,000, and whereas the balance in trade this year was £E1,910,231 in favour of exports, at the end of June, 1914, it was £E1,384,085.

Turning now to the share taken by the various countries in the trade of Egypt, we find that Great Britain and her dependencies have taken full advantage of the exclusion of the Central Empires. The British Empire has increased its sales to Egypt from £E5,280,873 to £E8,635,722, and its purchases from £E6,063,677 to £E7,881,918; in other words its proportional share of the total trade of the country has risen from 39 per cent. to 54 per cent. Great Britain supplied 66 per cent. of the textiles and 75 per cent. of the metal work as against 54 and 46 per cent. respectively in 1914. Of the other countries America has trebled its sales, mostly petroleum due to the shutting down of the Dardanelles and the stoppage of supplies from Roumania, Italy has increased hers from £E888,010 to £E1,228,987, Greece hers by 50 per cent. to £E488,377, Spain hers from £E47,882 to £E216,284, Japan hers by 200 per cent. to £E133,697, and Holland hers from £E75,243 to £E123,910. On the other hand, France has dropped 40 per cent. to £E731,073, Russia by 70 per cent. to £E116,948, and Roumania from £E516,584 to practically nil. Under exports America, Spain, Japan, Italy, France, Switzerland, and Greece all improved, but Russia fell off by 33 per cent. In view of the recent statements in the Home Press that there is danger of a shortage of raw material in Lancashire, it is instructive to note that, whereas Great Britain took about 250,000 cantars less cotton during the first six months of this year, America increased her purchase by a little under that quantity. All the wool, eggs, cotton seed and cake went to Great Britain, who took 75 per cent. of the onions and 40 per cent. of the cotton, whilst Italy and France have been Egypt's largest customers in regard to sugar, and took 30 per cent. of the cereal crop.

Egypt-Sudan Trade.

Trade between Egypt and the Sudan also shows distinct signs of improvement. During the six months imports into Egypt increased from £E230,963 to £E517,185, and exports thence into the Sudan from £E391,302 to £E559,780. Imports of camels into Egypt increased by £E35,727, maize by £E28,172, sesame by £E69,011, ground-nuts by £E8,340, gum by £E6,252, charcoal by £E12,612, and cotton by £E71,337. Under exports from Egypt, the most important items were tanned skins and leather, which increased by £E13,848, sugar by £E44,149, cotton tissues by £E20,317, coffee by £E16,297, and machinery and worked metal by £E12,731. The only item which showed any noticeable falling off was common soap, which decreased by £E5,640; this is a natural consequence of the diminution in the imports from abroad of this article into Egypt.

Amongst those who are to be removed from the Register of Joint Stock Companies at the expiration of three months from the giving of notice, failing cause being shown, is the North Africa Trading Co., Ltd., the British and Foreign Import Co., Ltd., and the British East African Trading Co., Ltd.

TRADE OPENINGS.

The Army Finance Department, Cairo, invite tenders for the supply of fourteen tons of candles to be delivered c.i.f., Alexandria or Port Said. Date, September 5, 1916.

The Board of Trade has received applications from firms in the United Kingdom for the names of manufacturers of brushes and brooms for Egypt.

The British Vice-Consul at Tangier reports that from 20 to 25 per cent. of the building cement and 30 per cent. of the common tumblers came from Germany, as did also cheap imitation jewellery. Tea glasses, he continues, are used in Morocco. The glass beads so extensively worn by Moorish women were of Austrian manufacture. It is important to note that Germany and Austria shipped these goods on f.o.b. quotations on from three to six months' credit. Credit trading has been an important factor in German success in Morocco.

TRADERS' BLACK LIST.

Mr. W. B. Delany, Standard Building, Cairo, has been appointed receiver of the business of H. Muhr, 5, Sharia Maghrabi, Cairo, with instructions to liquidate the same.

Mr. C. R. Beasley, of Cairo, has received a similar appointment and instructions in regard to the business of the Upper Egypt Irrigation Company.

Mr. F. H. Russell, of Cairo, is liquidating the businesses of the Continental Caoutchouc and Guttapercha Company, and of Messrs. Rudolf Kirchmayer and Co.

The affairs of M. Alexandre Wintefstein, of Alexandria, are being liquidated by Mr A. J. Lowe, Alexandria.

By proclamation the General Officer Commanding in Egypt has ordered that the names of the following persons shall be added to the list of persons and firms with whom trading is prohibited:—Assael, Peppo, Allatini Han, Salonika; Gottlich, Martjn, Candia; Jenny and Vock (Fridolin Jenny, Emil Vock), Rua Franque, Salonika; Lianos, Soulakas, and Goumas, Piræus; Lochner, Hermann, Patras; Hajji Muhammad Hussain Kazeruni, Ispahan; Shebarek, Georges, Teheran.

The following have been removed from the list of prohibited firms:—Amin-ut-Tujjar (alias Agha Isfahansi), Ispahan; Christodoroff, Zares, Resht; Keprielli, Meshed; Missirian, Kerman; Tabibian, M., Resht.

SERBIAN EXHIBITION IN ENGLAND.

On July 26, in aid of the Serbian Relief Fund, was held in Bradford, Yorkshire, a prominent centre of the British woollen textile industry, an exhibition of Serbian handicrafts. We take the following interesting and sympathetic account of the exhibition from the *Yorkshire Observer*:—

"The fabrics and articles shown have been manufactured by Serbian refugees in Corsica. There are some 5,000 refugees on the island—practically all who got away when their country was invaded. Workshops have been set up under the auspices of the Serbian Relief Fund, and in these the refugees carry on their national industries and keep alive their pride and interest in national art. In the workshops Serbian carpenters have made looms (Corsica supplying wood of all kinds), in which their fellow-countrywomen are now weaving carpets, linen, and fine cotton material. The carpets are of the kind made at Pirot. The fells of Corsican sheep are used, the Serbians carrying out all the processes of cleaning, carding, spinning, dyeing, and finally weaving. In some of the looms mats and carpet lengths of a kind much used in Serbia are made from old materials and remnants of almost any kind, which are cut into strips and sewn together. These are made into balls, the end is wound on to a kind of coarse shuttle and woven on to a warp of fine string. Many of the refugees actually took carpets and mats of this kind with them to Corsica. They are said to wear indefinitely.

"The samples of needlework, embroidery, and the like to be seen at the exhibition are a revelation to most folk. There are dainty fabrics made on native looms and embroidered with a taste and skill that evoke general admiration: rugs which, for their fine colours and designs, excite the envy.

PRODUCE REPORT.

Currants.

LONDON, August 3.

There has been more activity this week, with a general advance of all prices, especially of good sound fruit. Of the latter, however, the remaining available stock is very small. Provincial is quoted 42s. to 48s., against 26s. to 27s. the same period last year; Amalias, 52s. to 55s., against 27s. to 28s. last year; Patras, 53s. to 59s., against 30s. to 32s. last year; Gulf, 56s. to 58s., against 31s. to 32s. last year; Vostizza, 56s. to 60s., against 36s. to 40s. last year; smalls, 48s. to 60s., against 28s. to 35s. last year, and Islands, 53s. to 59s., against 29s. to 31s. last year. Quotations for new fruit are not yet obtainable, which may be taken as an indication of the undefined position of the market in Greece, and it is believed that high prices will be quoted.

Sultanas.

There is only a moderate demand, with prices more or less steady. The preference for Afghanistan fruit continues, and business is mostly done in that class of fruit.

Dates.

The market has been quiet, but prices are firm for Persians at 26s. to 32s. Prices for new crop are quoted, but no transactions have yet taken place.

Seeds.

Linseed has been firmer this past week. London-Calcutta, spot and afloat, is quoted at 73s. 9d.; July-August, 74s. 9d.; August-September, 75s. Bombay ordinary, August-September, is offered 76s. 6d., and small grain ditto, 75s. 6d. Rapeseed, new, is offering; buying, however, is not active, and prices are somewhat irregular. Cottonseed is inactive; London-Egyptian loading is quoted £13 15s., and September £13 per ton. Mustard-seed moves off slowly on more reasonable terms.

Oils.

Linseed oil has been quiet. Spot pipes landed are quoted at £36 5s.; barrels, ditto, £37 5s. Rape oil is firm. English refined barrels, £48 to £50. Cotton-oil is quiet. Crude spot, in pipes, £39 10s.; refined, pale pipes, £44, and barrels, £52 to £54, as to make.

Oilcakes.

Linseed cakes are extremely firm in spite of only a limited demand. Best London made are quoted £12 17s. 6d. to £13, and fine seedy Calcutta at £13 to £13 5s. per ton ex steamer to come along. Cotton-cakes.—There are no offers from shippers of Egyptian, and spot parcels, which are not very ample, command full prices at £9 17s. 6d. to £10, ex quay, with English makes at about the same figures.

EGYPT'S COTTON CROP.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, July 21.

It is announced that the area under cotton this year is 1,655,512 feddans, as against 1,186,004 feddans in 1915 and 1,755,270 feddans in 1914. It should be pointed out that this figure has been obtained (as is done every year) by the Ministry of Finance through its sarrafs, and that, although it is merely an estimate, it is one on which every reliance can be placed, seeing that experts have for years agreed that the margin of error in the sarraf's figures, taken as a whole, is almost negligible.

There are a good many who will be disappointed at this figure, as, for some reason, an area approaching 2,000,000 feddans was thought to be under cotton this year. The important point, however, is not so much the acreage as the yield, and we shall have to wait another six weeks until we get the official estimate of the size of the crop itself. So far the worm does not appear to have made very extensive ravages, and the prospects are quite good.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .

GERMANS IN ROUMANIA.

A French writer in the *Correspondance d'Orient* has a frank and trenchant note upon the exploitation of Roumania by the German trader, and deals critically with the neglect of the Frenchman of the possibilities of the country:—

"Things have changed in Roumania, especially since the petroleum fields have been exploited. They will change still more when the copper and oil mines in the Carpathians are worked," he says. "Roumania only had agriculturists. Now she has mechanics, factories, governors, limited companies, and so on.

"What part have we (France) taken in this evolution? Scarcely any. The financiers of the petroleum enterprises are almost exclusively Americans and Germans. We did not interest ourselves in Roumania. When I went there for the first time, fifteen years ago, there were hardly any French. However, the Boches profited by the advantage of their proximity. They monopolised the Roumanian market. How many times have I heard it said in Bucharest:—

"'We prefer the French articles—they are better finished and more suited to the instincts of our race. But you do not bring them to us. We have to go for them to Paris. Meanwhile, we are flooded with German goods, and we are obliged to take them because they are brought to us.'

"Indeed, I have seen Roumania furrowed, infested by the mocking Boches. They would go in trains on the most unimportant lines, the most remote. I have met them everywhere, at Rustchuk, Craiova, Jassy, Galatz, Braila, and Constanza. At Bucharest, there existed at the German Legation a commercial information service which dealt with the smallest details. They would telegraph to Berlin:—'There is a good place for a hairdresser's establishment in the Rue Rahovei.' A month later a Boche hairdresser installs himself there. And we—we do nothing.

"Some friends asked me for a Parisian printer, to whom would be already guaranteed the printing of a well-known big newspaper, which published 100,000 copies a day. Our Chamber of Typographers has found none. Whilst the Boches were everywhere down there, our Ambassador and Consuls had scarcely anything to do, and rarely saw any of their compatriots."

THE BAVARIAN DANUBE.

An American view of the traffic on the Bavarian Danube in 1915 is interesting, not only because as a neutral the U.S. Consul at Nuremberg has been able to secure more or less reliable figures, but because we are able to gather how the war affected Balkan trade with Central Europe in a year in which, excepting Serbia, the States were not involved in the struggle.

The figures given are taken from the published statistics of the Bavarian State Statistical Office, and they indicate the traffic on that portion of the Danube River which flows through the kingdom of Bavaria. The total traffic, both up and down stream, excluding that of the tributaries, was 259,583 metric tons, against 342,422 tons in 1914 and 433,636 tons in 1912. Accordingly the traffic in 1915 on the Bavarian portion of the Danube was about 25 per cent. less than in the preceding year. The decreases affected shipping in both directions. It was due to the lessened importation of grain and fodder from Austria-Hungary and the Balkan States and to the diminished exportation thereto, in consequence of the war, of iron and iron products from West Germany.

Grain and fodder imports from Austria-Hungary and the Balkan States are regularly unloaded at the port of the frontier city of Passau for railway shipment. The river commerce of this city was therefore particularly affected by the decreased traffic in 1915. The arrivals amounted to 32,203 tons as against 83,725 tons in 1914 and 124,873 tons in 1912. The departures were 28,572 tons, compared with 18,134 tons in 1914 and 14,371 tons in 1912. The marked decrease in the incoming traffic concerned exclusively maize, barley, wheat, oil cakes, and rice. The increase in the outgoing traffic was due to the shipment of 15,491 metric tons of wheat flour.

VINES OF CYPRUS.

(FROM OUR OWN CORRESPONDENT.)

NICOSIA, July 3.

The decision of the Government to cease importing sulphur for sale to villagers as a remedy against mildew (oïdium Tuckeri) has caused considerable uneasiness. A number of cultivators from different hill villages in the Limassol district have made strong representations to the Commissioner, Major Bolton, begging that Government will reconsider the decision, and will, even for the present season, import a supply from Italy, and from stores probably available in Egypt.

For many years the island Government has undertaken practically a monopoly, and has imported large quantities of sulphur, selling it to the peasants at little over cost price. It has issued full directions to villagers respecting the methods necessary for successful sulphuring. These have been followed by the more intelligent of the peasant cultivators; but far too little has been done in the vine areas as a whole. In Cyprus nothing can indeed be effected under present conditions, in the way of fighting pests, whether animal or vegetable, except by means of compulsory legislation.

Timber-felling.

The felling and working of timber in the State forests are being pushed forward, especially at the two localities in the Papho forests, in which the best steam saws are at work. Large numbers of villagers are employed. The increase and improvement of forest roads and paths are necessary accompaniments. The importation of timber from sources hitherto available being now cut off, the demands made on the island supplies for building and other purposes are unfortunately larger.

Cyprus timber is greatly preferred to that imported, being of superior quality. The only danger is lest the drain should be too large. The Forest Department may, however, be trusted to exercise a wise and provident discretion, having in view the extreme importance of the forests, of the annual growth, and of the steps taken towards reafforestation. It will be remembered that a gift of 2,000 tons of fuel was recently made to the troops in Egypt.

A new proclamation of the High Commissioner defines precisely the articles of which the exportation is prohibited. The fact that barley is included gives general satisfaction.

THE SUPPLY OF HEMP.

An interesting and useful résumé regarding the sources of hemp supply at present available has been prepared by Professor L. H. Dewey, fibre expert to the United States Department of Agriculture. Professor Dewey points out that the true hemp plant, Cannabis sativa, is cultivated commercially for fibre production in Turkey, Serbia, Roumania, Russia, Austria-Hungary, Italy, France, Belgium, Germany, Sweden and Chili, besides various States in America; and in the Far East. The principal countries producing hemp for export in recent years are Russia, Italy and Austria-Hungary. The supplies from these countries are now practically cut off, and the prices currently quoted for hemp fibre are abnormally high. It seems impossible to secure supplies from Serbia, Roumania, or from the Damascus region of Turkey.

THE WHISKY FOR CONNOISSEURS.

TUCKEY'S

Years 10 Old

Pure Malt Whisky

per 54/- doz.

Case Free and Carriage Paid.

Soft, Mellow, Old Pot Still Scotch Whisky. Sample Bottle, post free, 5/-. Write to-day.

THE LANCET says: "It is well adapted for dietetic purposes, owing to its Purity and Quality."

CHAS. TUCKEY & CO., Ltd., 3, Mincing Lane, E.C.

NEWS FROM ALL SOURCES.

The Ministerial Press of Roumania states that the damage inflicted on the crops by the recent excessive heat and hailstones was less serious than was at first supposed. The Central Commission for Exportation has consequently decided to allow the export of maize to continue.

According to *Les Nouvelles de Grece* the harvests in Greece are expected to be satisfactory, although the south wind which has prevailed lately has caused some damage. It is reported from Canea that the production of cereals is estimated to be 20 per cent. less than that of last year, and of vegetables 50 per cent. less. The production of oil, it is anticipated, will be about the same as last year, while the fruit crop will be four times as large.

On July 26 M. Georges Leygues, the President of the French Foreign Affairs Committee, made a statement regarding the situation in Roumania, where the position of the working and peasant population is becoming more and more painful owing to Germany's purchases of Roumania's cereals. He also gave a brief report of the events of the last fortnight in Salonika and Greece, and showed by what means German and Bulgarian agents are endeavouring to mislead public opinion. Greece, he declared, was in great danger, and it was the firmness of the Allies that guaranteed her independence and her future.

The Vienna paper *Neue Freie Presse* says the Austro-German "Balkan Aerial Express" scheme is nearing realisation. The line will be run from Berlin through Vienna and Ofenpest to Constantinople, but it is uncertain whether Zeppelins or aeroplanes will be used. The scheme is mainly under the auspices of the Austrian Lloyd, the Hungarian Banking and Trade Company, and the German Surveying Company. A meeting of representatives of interested parties will be held at Ofenpest this month to discuss the nature of the capital to be raised, the types of aircraft, and landing places, and the extent of the participation of the postal authorities of the three countries.

The Department of Public Health has sent a circular to all pharmacists in Egypt, prohibiting them from executing any prescription which contains a drug not included in the official pharmacopœia, or which is confused or written in abbreviated formulas, agreed upon between two parties only. Another circular has been sent prohibiting pharmacists from advertising in their shops any treatment for certain diseases or of carrying out treatment. The Department of Public Health has now prepared a supplement to the Egyptian Government's pharmacopœia of 1912, containing all additions and amendments introduced in the British Pharmacopœia of 1912.

THE WIRELESS YEAR BOOK.

The fourth "Yearbook of Wireless Telegraphy and Telephony" is an improvement on its very excellent predecessors, notwithstanding that the war adds progressively to the editor's difficulties. "Wireless telegraphy and telephony still continue on their progressive course, and seem quite unlikely to be cured of the habit," the editor tells us in an interesting preface.

There are many new features in this substantial volume. There is, for example, the report of the Committee on Standardisation, which is published by permission of the Institute of Radio Engineers. The definitions of terms included under this section will be found of the greatest utility not only to those who specialise in wireless, but to the large and increasing number of general readers who must every now and again be at a loss to understand the full connotation of terms which from time to time occur in miscellaneous articles and literature.

The "Reference" sections have been brought up to date as far as circumstances permitted. The lists of ship and land stations have been largely added to, and the matter revised and rearranged, so as to attain the maximum possible of accuracy and usefulness.

ENGINEERING NOTES.

Scientific Travelling.

Reference was made in THE NEAR EAST the other day to the need there was for developing the work of commercial travellers on scientific lines. We learn that a well-known firm of British engineers has recently adopted a scheme which is worth taking up by every concern that has aspirations in the direction of extended trade, and to no territory does this apply more than to Egypt, for the present, and to other Near Eastern countries when conditions have become more normal than they are now. The firm in question is Messrs. R. Martens and Sons, and they have sent a partner to Russia. He is accompanied by a staff of ten engineers, all specialists in their particular lines. The object of the tour is to visit the principal manufacturing towns and markets in order to ascertain what will be the nature and extent of the inquiries which will be received from Russia on the conclusion of peace. This is intelligent handling of a big trading proposition, and we commend it to the favourable consideration of firms who already are anticipating the end of the war. That may, or may not, be soon; but the more thorough the preparation the more thorough the success must be.

Railways in Asia Minor.

During the proceedings of the Armenian Congress, which was held in Petrograd in May, a report of which has just reached this country, an interesting reference was made to the projected network of railways in North Anatolia. A concession for the construction of these was given to a French syndicate some time ago, and the interesting suggestion was made that if Russia does not care to take over the work of construction as a State project, the concession might be revived in favour of the French concern. It was pointed out, also, that the construction of railways and other roads in the province is of great importance if the Armenian people are to be given a chance of rehabilitating themselves commercially and industrially. Many thousands of Armenian workers will be available for the purposes of labour, and soon there ought to be opportunities for enterprising contractors who have had some experience in that part of the world.

The "Pommern."

The Germans, habitually given to minimising their losses, when they were obliged to admit the loss of the Pommern in the battle of Jutland, described the ship as an old cruiser of 13,000 tons, built in 1895. That cruiser, however, was sunk more than a year ago in the Baltic by the Russians, and the fact is now established that the Pommern lost in the Jutland fight was the battleship Salamis, which was built at the Vulcan Works, in Germany, to the order of the Greek Government. This ship was nearing completion when the war broke out, and Germany appropriated her, and gave her the name of the old Pommern. It was thus possible for the German Admiralty still to deny the loss of the old ship; and when the new one also went down they thought to minimise their loss by the statement that it was the old ship. The new Pommern was a larger and more powerful warship. According to the contract with the Greek Government, the vessel's displacement was 19,500 tons, and she was to carry eight 14-in. guns in four centre-line turrets, together with twelve 6-in. and twelve 3-in. Three sets of turbine machinery, totalling 40,000 horse-power, were designed to give a speed of twenty-three knots, while protection was afforded by a belt having a maximum thickness of ten inches. It is very probable that alterations have taken place since the ship was appropriated by the German Government; but in any case this warship was very powerful, and the Germans have good reasons to conceal her loss.

A Reversible Riding Plough.

Now that agricultural labour is everywhere scarce, the bringing out of a machine or implement by which a certain amount of work can be done in the field, or elsewhere on the farm, with economy and a minimum of manual labour and skill, is a matter of considerable interest. Such interest was shown the other day in a field where the special features of a new plough were displayed. It was a reversible riding one-way plough, with which, according to the exhibitor, the young or old of either sex can do equally good work on hillside or level land. With two horses it will turn furrows to the right or left as the operator desires, for it possesses two bodies mounted on separate steel beams, the movements of each being controlled by a separate lever. When in use one plough body is raised while the other turns the furrow. On reaching the headlands the plough is raised by pressing down a foot trip or a hand latch on the lever, which transfers the labour incidental to raising the plough to the team, and leaves the driver both hands with which to manage the horses whilst turning. When ready for the next bout, and the other plough is lowered, the whippletrees slide automatically into place at the end of the long clevis, so that the implement follows the line of draft. As the beam, landside, wheels, and pole are in line, side draft is entirely eliminated, and a pole adjuster enables all side strain upon the team to be avoided. The implement is strongly made and suitable for all climates. An ordinary farm labourer was working it without any difficulty.

New Chaff-cutter Feeder.

The slats used in chaff-cutter feeding webs almost invariably consist of wood, and often have to be replaced through breakages or, in tropical or semi-tropical countries, through damage from high climatic temperature; but a new chaff-cutter feeder which has recently been brought out seems to avoid such troubles. It is a steel feed web, the slats of which are practically unbreakable, being made of rolled steel. These have turned-up edges, which grip the feed much more efficiently than plain wooden slats possibly could do. This feeder, fixed on a chaff-cutter, is worked by eccentrics, which force the material to be cut into the rollers of the machine, its action closely imitating the motion of a man when feeding "hand over hand." Its price, about £5 or £5 10s., is also very reasonable, for this apparatus when attached, as it can be to almost any modern chaff-cutter, reduces labour to a minimum. There is no doubt that if this feeder is properly introduced in the Near East it will find a good market.

Preparing for To-morrow.

Manufacturers will do well to realise that, although the prospects of the Near East are comparatively desolate at the moment, we are on the eve of a change. Agriculture looms large in Serbia and Roumania in normal times, and it must be obvious that after the war dilapidations in the former's industry, if we may borrow the word, will have to be repaired, and that the quickest and best methods of repair will be utilised. That is where the manufacturer will come in, and our British friends will find powerful rivals in the Americans. "Get ready for the market now" will be a good rule to follow.

Possibilities of Egypt.

We believe, too, that Egypt is worth great and unremitting attention. All the indications point to a great revival in the Land of the Nile; land was never better as an investment than just now, for the peasantry have been thoroughly awakened to the advantages of ownership, and we may look for some activity in the direction of buying. The land companies, at any rate, are more than optimistic, and manufacturers of agricultural machinery and plant, which must be simple in construction and design, ought to lose no time in setting their travellers to work. A word of warning, however—do not send out a man to attempt to sell an improved plough who knows more about paper and pink pills than about land

Rebuilding Serbia.

In view of the need there will be for extensive and rapid rebuilding operations in Serbia when peace comes, an article in the current number of *Cassier's Engineering Monthly* will be of interest. The writer, Mr. Charles Dangen, remarks that the erection of permanent works will be a slow and costly matter if the usual methods are followed—he is writing of Belgium and Northern France in particular. After the war there is almost certain to be a shortage of skilled workmen, and the making of the foundations for new works will become a difficult matter. Mr. Dangen shows us a way out of the difficulty. "Land available for building purposes," he writes, "is often composed of made-up elements, clay, and the like, frequently in conjunction with underground water, and consolidation is necessary before a load can be placed upon it. Any method, therefore, which permits of the obtaining of solid foundations at a low cost is of the utmost interest. One of the most simple consists in perforating the soil by means of special apparatus, in such a way as not to necessitate the removal of any material, borings being formed by mechanical earth compression, these being afterwards filled with various substances powerfully rammed in. In this way concrete or other piles are formed which constitute supporting points for the weight of the superstructure, the earth in the immediate neighbourhood of the piles being also strengthened. The apparatus used is simple, but strong, and the necessary labour easily obtained. It consists of powerful tackle by the aid of which the perforators or compressors weighing from 4,500 lbs. to 5,500 lbs. are raised, afterwards being allowed to fall freely. The soil to be dealt with is directly attacked by the perforators and compressors, without the aid of any intermediate machinery, the whole total of force being transformed into useful work at the most economical rate."

Proved in the Near East.

The system for which Mr. Dangen stands has already been tried extensively in Central Europe and in the Near East. "Large numbers of buildings have been erected upon mechanically compressed soil both in France and abroad," he writes, "the method giving especially good results when the buildings are situate near the riverside, or close to the sea. Amongst others may be cited the new offices for the Palais de Justice, Paris, for which special foundations were necessary owing to the infiltration of water from the Seine; the Delattre Ironworks at Ferriere la Grande (Nord)); the Cairo Railway Station; the Senate House, Bucharest, and the Czernowitz Goods Station. Ironworks containing heavy machinery are frequently established in close proximity to rivers and canals, and in order to avoid a settlement such as occurred at Cette Works, the soil for the foundations should invariably be compressed. This was done at Leffrinkoucke (Nord) and Trith-Saint-Leger, where new works of great strength have been constructed for the Société des Forges et Acieries de Firminy and the Forges et Acieres du Nord. Other buildings erected close to the water edge include the Casino at Marie-Christine, Havre; the Custom House, Salonika; and the extensive wharves at Saint Louis, Senegal. Mechanical soil compression received a further interesting application in the carrying of the Canal du Nord across the peat marsh of the Valley of the Somme. The treacherous nature of the underlying strata created a difficulty all the greater in virtue of their varying thickness. The canal, which is still unfinished, has been used as a trench by the Germans, who had carefully studied its disposition previous to the outbreak of war."

SHIPPING NOTES.

The sinking of the Greek steamer Mina after collision with the Italian steamer Attualita, near Gibraltar, involves the market in a substantial marine loss, for the cargo of maize from the Plate to Europe was insured in London for about £40,000. It is understood that the insurance was originally opened for about double that amount, but was closed at the smaller figure. The hull of the Mina, which was of 2,357 tons, built in 1908, and owned at Andros, was insured for £27,000. The Attualita is of 4,791 tons, built in 1900, and owned at Savona.

PRIZE COURTS.

A more complete list is now available of the proceedings pending in Prize Courts in the Mediterranean. The *London Gazette* of July 21 notified that proceedings are pending in the Prize Court of Malta in respect of the following vessels:—Cleopatra, Evangelistria (ship and cargo), Ayios Nicolaos, Maleas (part cargo ex).

The issue of the *Gazette* of July 25 notified that proceedings had been instituted in the Prize Court at Gibraltar in respect of certain cargoes ex the following vessels:—Eleni Stathatos, Georgios, Nea Ellas, Ophir, Re d'Italia, and Isiropinas. The date of appearance in the case of the Ophir was July 30, and in each of the other cases July 29.

The issue of the *Gazette* of July 21 notified that, as a result of proceedings before the Supreme Court of Gibraltar, the vessel Telde was condemned on July 14.

OUJDA RAILWAY EXTENSION.

The British Agent and Consul-General at Tangier (Mr. H. E. White, C.M.G.) reports that, according to the local Press, the Resident-General in Morocco, on the occasion of a recent visit to Oujda, made a speech, in which he stated that, in the development of the French Zone of Morocco, Algerian interests would be carefully guarded. It appears that, with a view to improving the position of Oran as an *entrepôt* for Moroccan trade, the construction of a normal gauge (1.055 metres) railway from Oujda to Taza and Fez has been included in the works to be paid for out of the loan recently obtained in France. The normal gauge line was completed to Oujda early this year, and from that point there is a military line to Taza, on which there has been regular traffic for some time past.

This military line is to be carried on to Fez, Mr. White continues, and it is expected that the whole line, converted to the normal gauge, will be completed within a few years. The ground has been surveyed, plans are being drawn up, and every effort will be made to hasten the work. On the other hand, remarks H.M. Agent, the Director-General of the Public Works Department of the French Zone has declared that the engagements entered into in regard to the Tangier-Fez line must be fulfilled (see p. 246 of the *Board of Trade Journal* of April 27 last).

The opening of a normal gauge line from Oran to Fez, adds Mr. White, will doubtless greatly facilitate French trade with Morocco, as the time and cost of transport of goods from Marseilles to Fez will be considerably reduced, whilst goods coming through Algeria will enter Morocco on more favourable terms as regards customs duties than those landed at the Moorish ports.

COMPANY NOTES.

Dividends, etc.

The Bank of Athens announces that the coupons for the 5 per cent. debentures of Nestor Gianaclis, Ltd., due on August 1, will be paid on and after that date at the London office, 222, Fenchurch Street.

Ionian Bank.—The Court of directors have declared an interim dividend at the rate of 5 per cent. per annum, free of tax, for half year to July 13, payable September 5.

Anglo-Persian Oil.

In the House of Commons last Friday Sir Edwin Cornwall asked the Chancellor of the Exchequer whether the details of the £1,001,000 paid by the British Government to the Anglo-Persian Oil Company would be submitted to the Comptroller and Auditor-General for examination and report.

Mr. McKenna: The accounts of the Anglo-Persian Oil Company are not audited by the Comptroller and Auditor-General, but by their own auditors. The Treasury has power under clause 7 of the agreement to appoint such person or persons as they may approve for the purpose of transacting the accounts and affairs of the company.

Oil Outputs.

Anglo-Egyptian.—Gemsah, last week 410 tons (previous week 450 tons); Hurgada, 362 tons, against 437 tons.

Baku Russian Petroleum Company (1909).—Week ended July 22, 84,100 poods.

Bibi Eibat Oil.—Week ended July 23, 60,600 poods, or 977 tons.

British Maikop Oil.—Last week, 2,333 poods (about thirty-eight tons) crude oil.

North Caucasian.—Week ended July 12-25, 586,541 poods (9,460 tons).

Roumanian Consolidated Oilfields.—Week ended July 22, 772 tons; week ended July 29, 722 tons.

Russian Petroleum.—Week ended July 22, 56,900 poods.

Results.

Suez Canal.—The receipts of the Suez Canal on July 31 and August 1 were 360,000 frs., as compared with 620,000 frs. on the same dates in 1915.

BULGARIAN LOAN COUPONS.

"Holders of Bulgarian Loan coupons are naturally becoming very restless owing to the prolonged retention of their funds by the British Government. When Bulgaria entered into the war our Government properly took possession of funds in this country belonging to the enemy, but this included a sum standing to 'Government of Bulgaria Four and a-Half per Cent. loan, coupon, and drawn-bond account.' This sum," writes the City Editor of *The Times*, "had been remitted by the Bulgarian Government to Messrs. J. H. Schröder and Co. to pay the coupon which fell due shortly before the declaration of war, and was specifically allocated to the payment of those coupons and drawn bonds bearing the English stamp. The Treasury seized the money under the plea that, as it was not deposited by an agreement under seal, it might have got back to the Bulgarian Government; the Treasury—in its proverbial ignorance of business methods—is apparently unaware that when money is handed to a banker for a specific purpose it is not usual to have a formal agreement on each occasion that a payment is made into the account. In any case, there can be no reason why the British Government should persist in depriving the rightful owners—the English bondholders—of their money for an indefinite period. We understand that even the Public Trustee has not been able to obtain payment out of the money of Bulgarian Loan coupons in his charge."

ROUMANIAN SHARE MARKET.

Although emanating from the correspondent of an enemy newspaper, the *Pester Lloyd*, the following account of dealings in oil shares on the Bucharest Bourse may be of some interest to some of our readers. It should be stated that the period dealt with is mid-June:—

Though dealings for future delivery in the reopened Bucharest Stock Exchange are not permitted, a satisfactory volume of business is to be noted, for there has been no lack of negotiable securities. Holders of petroleum shares, for the most part, have specially to congratulate themselves. These shares, moreover, give large returns in thumping dividends; and the shareholders of the Astra Romana have received, besides a distribution of 15 per cent., one new share free of cost for every eight held. At the beginning of the war and for a long time afterwards, the outlook for the petroleum industry was the reverse of rosy. In normal times the export of petroleum was very large; the sea, the Danube, and the railways competed against each other to market these inexhaustible riches of Roumania. This was all changed at the outbreak of war by one stroke, as it were, and that for two reasons. First, the calling up of much active talent (much of it from foreign countries) to military service. Second, the complete stoppage of exports, and the consequent lack of vacant storage capacity in the refineries. Better conditions have long since prevailed, though, as the Dardanelles are still closed, exports have not reached their former total. If, nevertheless, such large profits are obtained, it is on the export trade, for the home prices of petroleum and its products, before the recent advent of high prices, at no time permitted of specially large returns. In spite of the somewhat reduced production work, the oil companies as a body show very large stocks, which must be balanced against high prices, so that a loss from this cause, whatever happens, may be counted upon with certainty.

NOTES OF THE WEEK.

The third year of the war has opened favourably for the Allied Powers. In the West the Franco-British offensive is being slowly but steadily maintained. The enemy's line has not yet been broken, but he is being gradually thrust back from positions which he must have regarded as impregnable. Not the least satisfactory feature of the Allies' advance is that in nearly every case they are able to hold the new positions they win, in spite of the fiercest counter-attacks. This feature points not only to an unlimited supply of munitions, but also to carefully planned and successful co-ordination. In Eastern Europe our Allies go from strength to strength. The position in a small section of the Western front is being reproduced by the Russians on a greatly magnified scale. Thrusts, now in this direction, now in that, are measured not by hundreds of yards, but by miles. At the centre of the line, from the Pripet Marshes to the Carpathians, along which General Brusiloff is harrying the enemy, General Bothmer, defending Tarnopol, still holds his ground. North and south of him, however, the Russians press on, threatening his lines of communication, and it seems almost impossible that he should be able to maintain his present position for many days longer. Finally the Italians have suddenly delivered an attack on the Isonzo line which has placed them, after a few days' fighting, in possession of ground, including Gorizia, which had previously resisted their attacks over a period of fifteen months.

The opening day of the third year of the war was chosen by the Turks for their second attack on Egypt's defences east of the Suez Canal. It failed even more conspicuously than the earlier efforts eighteen months previously, for it found the British troops in a position to follow up their advantage, and the repulse was quickly turned to a rout. The presence of this Turkish force, which had escaped detection for the greater part of its march across the Sinai Desert, had been reported the previous week, and it was left to Australian mounted troops to keep in touch with the enemy and to bring him on to the main line of the Egyptian defence without allowing him to form a correct estimate of the strength of the latter. The strategy succeeded to a degree that must have surpassed the expectations of the British military command. For a whole day the Turks maintained a frontal attack on our entrenchments, enabling both machine gun and rifle fire to take heavy toll of their ranks. Their left wing had in the meantime been allowed to advance until it became involved in sand dunes, from which it could only extricate itself with difficulty, when the counter-attack was launched.

Although the attack was handsomely repulsed, with heavy losses to the Turks, the fact that a rearguard action was in progress three days later only six miles east of Katia, while enemy aeroplanes had dropped bombs on Port Said and Suez, shows that the enemy appreciates his ability to keep a British force immobilized in Egypt. Thanks to the desert, which has less terrors for the Turco-German higher command, if not for the Turkish rank and file, than it has for European armies, the enemy has been able to establish himself within Egyptian territory, and more or less within striking distance of the Canal. His presence at El Arish is likely to prove in the future more of a nuisance than an actual danger; but it constitutes an anomaly, and with the advent of cooler weather it should be possible to ensure that, if the Turks are content to remain in the Peninsula, their capacity for mischief will be considerably curtailed.

Among the features of the first week of the third year of the war may also be mentioned a certain liveliness in the Macedonian theatre. The task falling to the Serbians of driving the Bulgarians out of the positions they had occupied on the Karajova Mountains in Greek territory is still in progress. It is a sufficiently arduous one owing to the nature of the ground over which the troops are operating. Meanwhile there has been a skirmish between British and Bulgarian patrols south of Lake Doiran—a very small affair, it is true, but it will have served to relieve the *ennui* of "nothing doing" for so many months, and it is typical of the way in which two armies confronting one another are apt to indulge in preliminary sparring before getting at grips with one another.

German interest in the Near East is for the moment entirely absorbed by Roumania. The Press continues to discuss the situation in that country and the attitude of the Government with undisguised anxiety. In the face of the emphatic assurances of correspondents on the spot that the Roumanian people are at heart with the Allies and in favour of immediate intervention in the war, German writers are driven to pin their hopes

Digitized by Google

on the shrewdness and independence of spirit of the Bratiano Cabinet. By the end of July the *Frankfurter Zeitung* was forced to admit that the position in Roumania bore an unmistakable likeness to the situation in Italy just before the declaration of war against Austria-Hungary. Of course, the main factor was the feverish activity of the Entente Powers and their secret agents; but it was still an open question, it was thought, whether the similarity between the two sets of conditions extended to the characters of the leading statesmen, and whether M. Bratiano would prove a second Salandra. Keen disappointment is felt in Germany that King Ferdinand should prove to be so little of a Hohenzollern as to be willing to play the part of a constitutional monarch in the country of his adoption. It is left, however, to the *Deutsche Tageszeitung* to state that "if Roumania, whether with or without the King's consent, goes over to the Entente camp, Roumania's Hohenzollern King shall in any circumstances lose his throne." There can be little uncertainty in German official circles with regard to impending developments in the Near East, when such a threat is permitted in a heavily censored Press.

The unanimity with which the whole German Press affects to repose faith in M. Bratiano reflects official inspiration. The *Berliner Tageblatt* gives prominence to a telegram from Italy which records Roumania's intention to join the Entente Powers, and adds that the Roumanian army will be set in motion during September, "as soon as certain definite events have taken place." Commenting upon this report, the Berlin paper points out that the existence of an agreement between Russia and Roumania is accepted in well-informed circles. But there is the question, it continues, whether M. Bratiano will feel himself particularly bound by such agreements in the event of the general military position not offering him sufficient security for Roumania's participation in the war. "In such a case it is quite certain that M. Bratiano will find reasons for breaking all pledges, and the means for doing so. Very possibly he will wait for September and 'definite events.' The higher military command of the Central Powers, we may hope, will take care that these 'definite events' do not take place." As a matter of psychological interest, it may be mentioned that while the German Press finds it difficult to avoid the subject of Roumania, the British daily Press contains hardly any references to it.

In our issue of July 28 we drew attention to a proclamation issued by Field-Marshal von Weber, Military Governor-General of Montenegro, in which it was announced that if General Veshovitch, the Montenegrin ex-Minister of War, who had fled from the country, and his two brothers did not voluntarily report themselves to the Austro-Hungarian authorities within five days, his father and his third brother, who had been seized as hostages, would suffer death on the gallows. According to the *Bosnische Post*, a paper printed in German at Serajevo, of July 4, a further notification has now been issued by Field-Marshal von Weber to the effect that, as General Veshovitch had not reported himself to the authorities, his brother, Vladislav Veshovitch, had that day been handed over to the executioner. "The father of General Veshovitch," continues the proclamation, "who had been held as a hostage, deserved the same fate, but the Imperial Military Command is more merciful towards an old man of seventy-five years of age than his own son, and has granted him a reprieve by an exceptional act of mercy." As the official character of this document establishes the fact that this outrage was perpetrated by the command of Field-Marshal von Weber, it is to be hoped that the Allied Governments have taken cognisance of the crime, with a view to making the Austrian Governor-General of Montenegro pay in due course the penalty for his offence against humanity, as interpreted in civilised nations. A question in the House of Commons would ensure that the incident is not overlooked.

An agreement between the British, Russian, and Persian Governments dealing with the financial and military affairs of Persia has recently been concluded at Teheran. The situation created by the war, more especially the deliberate attempt made by Germany to challenge the position of Russia and Great Britain in Persia, rendered necessary a fresh understanding between the three Governments concerned. Persia's finances were in a hopeless condition, but it was evident that the two interested Powers could not come to her help until some security could be offered for the restoration and subsequent maintenance of law and order in the country. An agreement on this latter point had already been reached and put into execution by Russia and Great Britain. It has now presumably been regularised by the formal acceptance of its provisions by the Persian Government. Russia will, as heretofore, supervise the military organisation in the North, while in the South British officers will build up a new gendarmerie on the nucleus of the old one, which came so signally to grief in the hands of Swedish officers. General Sir Percy Sykes is now at work on the training of this gendarmerie. In the meantime he is supported by British contingents, who are engaged in restoring order between the Gulf and the eastern frontier.

A somewhat disquieting statement was made in the House of Commons by Lord Robert Cecil in reply to a question regarding the British prisoners taken at Kut. He announced that repeated attempts on the part of the United States representatives in Turkey to get into touch with the prisoners had failed. The Porte had refused to allow American Consuls to visit the prisoners or to make any effort to supply their needs, although money for the purpose had been telegraphed by the British Government to the Ottoman Red Crescent at Aleppo. The reasons given by the Porte were that the men were being moved and that they were being treated according to the established rules. Lord Robert Cecil declared that the failure of the Porte to reply to a further communication, asking for the names of the camps to which the prisoners were being sent, and for permission for a member of the United States Embassy to visit them on their arrival, was most unsatisfactory, and inspired considerable misgiving. Since this statement was made, however, letters from prisoners taken at Kut have been received stating that they are at Angora and elsewhere and are quite well and comfortable. It is to be hoped, therefore, that the Porte's attitude to the British and American representations was merely an exhibition of bad manners, and did not imply anxiety to cover up ill-treatment of the prisoners. Angora has been a prisoners' camp for a considerable period now, and the conditions there are probably known to the American Embassy in Constantinople. If the prisoners taken at Kut are to be incarcerated at that place, they may not be badly off: but it is to be feared that their journey to this town from Baghdad will have exposed them to great hardships.

The failure of the Russians to hold their own in the neighbourhood of Mush and Bitlis is unfortunate. Both these towns are now reported to be in Turkish hands, the Russian *communiqué* admitting a withdrawal in this region "under enemy pressure towards the north." At the same time the Turks would seem to be making headway towards Hamadan. Neither of these spheres is of particular importance, because the enemy's successes, so long as they do not include the capture of large bodies of Russian troops, cannot lead him to any definite goal. The experience of this war has brought into prominence the extreme mobility of the Russian line, and its tendency to yield ground in preference to exposing itself to capture, when reinforcements are not in sight. The swaying of the battle-front in these districts is at least an indication that Turkish resistance is still far from being exhausted, and the knowledge should be put to good purpose in regard to the Mesopotamian campaign.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 27.

Anglo-Egypt and the Egyptian Dispatches.

No little surprise is being expressed out here at the very meagre list of "civil" recommendations made by General Sir John Maxwell and published in the recent Egyptian dispatches. From the names mentioned the man in the street would conclude that but little assistance had been received by the military régime from the civil element—that, in fact, whatever assistance had been rendered had been limited to the work done by the few officials whose names figure in the list. The contrary is, however, very much the case, and one could go so far as to say that in many instances the military régime would have been hard put to it to cope with the peculiar features which the Egyptian situation presented had it not been for the presence and collaboration of the British personnel in all the administrations. Many of the Anglo-Egyptian officials have been prohibited from joining the colours and from seeking glory and distinction on the field of battle by reason of their indispensability in their civil capacity, and most of them have borne, and are still bearing, on their shoulders the burden of army work which is additional to their ordinary duties. In these circumstances it does seem ungrateful and ungracious that no mention of the assistance rendered should have been made by the military authorities, and that, in compiling the list in question, distinctions should have been made which, without detracting from the merits of those mentioned therein, are nothing short of invidious. I am, of course, aware that everyone who has done war work could not be mentioned; but there are notable instances, such as the Public Security Department, under Mr. George Morice, and the Customs, under Mr. King-Lewis, both of which have rendered signal services to the military régime, and the various Commissions which, under the presidency of distinguished public servants and civilians, have dealt with matters concerning more or less directly the military authorities where it should surely have been possible to include the heads in the small list published. There are, moreover, various individuals who deserved mention for the prominent part they played in the affairs of the country during the eighteen months in question. To those, who knew the late G.O.C.'s character it seems incredible that he should have purposely made such important omissions in compiling the list of civilians from whom he had received assistance, and it would look as if the Home authorities, for reasons best known to themselves, had "edited" the lists. The only alternative theory is that there is something wrong with the system whereby the work of Anglo-Egyptian officials is brought to the attention of the British Government.

The Coptic Community.

I recently referred in this correspondence to the grievances of the Coptic community in regard to the administration of its internal affairs, especially the Wakfs. Now we find that the Coptic Patriarch, who has been the chief opponent of reform, has given an interview to one of the Coptic papers, wherein he admits that the Wakfs are in a lamentable condition, and expresses his willingness that they should be placed under the control of the Government. This constitutes a complete *volte-face* on the part of the Patriarch, and his declaration will be welcomed by all the members of the community, who have been striving for some time to bring about the much-required reforms. It is to be noted that the Patriarch gave as an instance of the unsatisfactory condition of the Wakfs the fact that the revenues are to-day insufficient to meet his expenditure; but, although this may be a contributory reason, there must be something else at the back of this change of attitude, and it would be exceedingly interesting to know what exactly has prompted it. I, in common with many others, shall not be satisfied that this *volte-face* is sincere until I find that the rest of the opposition within the community—I mean the clergy and the old conservative laity—expresses its opinion in the same sense as its ecclesiastical head, and takes action accordingly. Past experience has taught us but too well not to put overmuch faith in the protestations of submission to the cry of reform made by the Patriarch, and so we require something more than this mere statement to a journalist to convince us that better days are dawning for the Coptic community.

An Egyptian Industrial Exhibition.

Early in August an Egyptian Industrial Exhibition is to be held in Alexandria. It has been organised by the Commission of Industry and Commerce, which has been sitting for some months under the presidency of H.E. Ismail Sidky Pasha, and all the details are being supervised by Mr. Sidney H. Wells. The object of this exhibition is to give some idea of the present position of Egyptian industry and of the possibilities that lie before the country, if only its industrial resources and energies are properly looked after, and to awaken public interest in a question which is already receiving the serious attention of the Government.

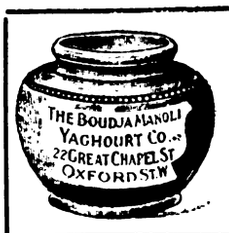
The Syrian Problem.

The leading article, entitled "The Syrian Problem," which appeared in The Near East of the 7th inst., has given intense satisfaction to the Syrian community in Egypt. Leading members thereof have told me that the views expressed exactly represent their feelings and those of their compatriots in Syria, and that they consider it to be one of the best articles that have appeared of late on the question in the Entente Press. The Syrian papers have reproduced the article, *Al Mokattam* giving it pride of place in its pages, and preceding it with an appreciation of The Near East.

The Egyptian Mixed Courts.

One of the most interesting sections of the Judicial Adviser's annual report is always the note on the Mixed Tribunals presented by the Procureur-General, and M. A. Eeman has this year not fallen short of the reputation which he has gained in this respect. He opens by pointing out that the increase in the work brought before these Courts during the year under review has really been considerable. No less than 36,877 new cases, or an increase of nearly 25 per cent., were set down for trial, and 30,153, or 30 per cent. more than in the preceding year, were disposed of. Considering that during part of the legal year there was a decrease in the number of judges available, the Procureur-General is of the opinion that the Mixed Bench deserves heartily to be congratulated on the manner in which it has acquitted itself of its task. As far as he knows, "there does not exist in any country possessing similar judicial organisation and procedure a magisterial corps having to shoulder such a heavy task." But the present situation must not be allowed to continue much longer. Although 13,282 judgments on appearance and 9,341 by default have been given, as against 9,371, and 7,599 the previous year, *i.e.*, an increase of about 35 per cent., the arrears are still abnormally high, those before the Court of Appeal alone representing more than a normal year's work.

M. Eeman is of the opinion that measures should be at once taken to remedy the serious congested state of business; at any rate, in the Appeal and Cairo First Instance Courts. In other words, he presses for an increase in the staff of judges. He admits that the present is not an opportune moment for obtaining additional judges; but asks whether a means of making the size of the Mixed Tribunal bench more proportional to the amount of work which it has to handle could not be found in a continuation of the policy of selecting judges from candidates in the country, which has recently been followed, and of which he cordially approves.



THE WORLD-FAMOUS

YAGHOURT

CYPRUS NOTES.

(From Our Own Correspondent.)

Cyprus, July 22.

Purchase of Mules.

Considerable numbers of mules have been bought in the different districts, and not less than 3,000 will probably be required. The prices range from £8 to £20. Many thousands of Cypriots from towns and villages, from 18 years of age, are being engaged and entering into agreements which define their duties. Cyprus mules maintain the reputation which they have so long possessed. As far back as the Abyssian Expedition, for which some thousands were purchased, their value and hardiness have been recognised, and they were then found to be the best of those employed by the force. The island has been frequently drawn upon since that date for supplies. The interpreters engaged for Salonika are leaving to take up their duties.

Fire at Famagusta.

A serious fire broke out on the night of July 13 in a large timber store near the entrance to the town. The church bells were rung, and the efforts of the police, the citizens of Famagusta, and others from Nicosia were most praiseworthy. Owing to the lack of water and appliances, the store and its contents, which included other merchandise besides timber, were for the most part destroyed. Fortunately the fire was prevented from spreading to neighbouring buildings, which include a Government timber store. Happily fires are of very rare occurrence in Cyprus; for there is a lamentable lack of fire engines and appliances, not to speak of difficulties in obtaining water. The purchase of fire engines and the drilling of inhabitants in towns is one of the needs which call for attention.

The Greek Archbishop.

The Greek Archbishop, Kyrillos, whose health has long been failing, is suffering from an illness which causes considerable anxiety to his friends and community. He is spending the summer in one of the villages in the heights of the Limassol forests, St. Dhimitri. A Greek doctor has been summoned to attend him.

A special number of the *Cyprus Gazette* publishes the telegram sent by Sir John Clauson expressing the sorrow felt throughout Cyprus on account of the death of Lord Kitchener, and the reply of Mr. Bonar Law to the High Commissioner.

THE NILE RISE.

(From Our Own Correspondent.)

Khartoum, July 21.

The thermometer has only passed the three-figure limit twice in the week, and there was some rain. The conditions are much improved now that the rainy season has definitely begun.

The Nile is rising rapidly, and soon the authorities of Khartoum will begin to watch the river banks for fear of flooding. The Blue Nile is over a metre higher than it was this time last year, and, as the same applies at Roseires, the rise is likely to continue strongly.

A KITCHENER SOUVENIR.

Many of our readers, both at home and abroad, will doubtless be glad to possess a facsimile reproduction of Lord Kitchener's famous letter of appeal (written in May last year), which was instrumental in raising an army of five million men by voluntary enlistment. They will shortly be able to purchase such a facsimile, and at the same time to benefit the British Red Cross Society and the Lord Kitchener National Memorial Fund. Messrs. Raphael Tuck and Sons, who are publishing the interesting souvenir, have favoured us with advance copies, and we need hardly say that the work is as admirably done as everything that this famous firm turns out. The letter is enclosed in an artistic cover, designed by Mr. Frank Brangwyn, A.R.A., and is accompanied by eloquent tributes to the great soldier from Sir Arthur Conan Doyle and Sir George Arthur. As the publishers and everyone associated with the souvenir give their services free, there should accrue from its sale a handsome sum to both funds. The prices for copies range from 1s. to 2s. 6d. and 10s. 6d. each, according to the size and quality of paper and print, and besides these issues there will be a signed and stamped proof edition of the photogravure issued at £1 1s., and an artist's proof edition, with *remarque*, limited to 500, signed by Mr. Brangwyn, the cost of which will be £2 2s.

The Serbian Parliament is to meet on August 24 at Corfu.

Mohammerah has been declared free from plague and cholera.

Lord Bryce calls attention to the need which still exists for providing relief for the Armenians, especially to enable those who have been able to return to rebuild their ruined homes. The Nestorian Christians of North-West Persia are also in need of help. The address of the Armenian Relief Committee is 96, Victoria Street, S.W.

BULGARIAN NOTES.

(From Our Correspondent.)

Bucharest, July 20.

Reduction of Allowances.

The more that want and destitution make themselves felt in Bulgaria the further are the allowances granted to the families of the men who have been mobilized reduced. During the period immediately following the mobilization the Government, wishing to carry the people with it in its pro-German policy, spent millions of francs a month on these allowances, which were distributed lavishly among the peasantry. Nor was there a family of any importance in Old Bulgaria that did not receive consideration—of a substantial kind. The amounts thus distributed averaged six million francs a month. Now things are changed indeed, and the allowances exist only in name. Thus, during the month of June, less than forty thousand francs had to go round amongst nearly 16,000 families—a little over two francs a month for each family!

The Food Supply.

According to trustworthy persons coming from Bulgaria, the situation there is desperate. Bread is hardly to be had, and the country is on the verge of starvation. The "kile" of wheat, which in ordinary times costs between 50 and 100 levas, is now fetching from 400 to 500 levas, and even at these prices it is difficult to obtain, for the Germans have carried off everything they could. At Bitolia, for instance, a loaf of black bread—white is no longer procurable—weighing a kilogram, has to suffice several days for a family; and even in Sofia it is difficult to obtain bread in the best restaurants. Sugar is almost entirely lacking, and salt is becoming scarce.

Most of the prefects have visited Sofia in order to urge the impossibility of sending any of the new harvest's grain to Germany. It is, they report, not nearly so plentiful as was anticipated, and will only just suffice for the country's needs.

The Committee of Public Supply at Sofia has lately instituted a new type of bread, made of a mixture of wheat, flour, and maize meal; but there are still complaints on the score of quality. Thus, the *Mir* wants to know who superintends the mixing of the wheat and the maize, and who is responsible for the quality of the bread. Some time ago the same journal declared that the bread supplied in Sofia was of such quality that it could not be eaten, and asked why the citizens of the capital city should be obliged to eat "bread that animals would refuse," when the Government declared that there still remained in the country sufficient stocks of wheat of the best quality.

Cholera Ravages.

Cholera has now appeared in the country, first in the invaded territories and now in Old Bulgaria. The scourge is ravaging the population, whose enfeebled condition renders them easy victims. Infant mortality is also extraordinarily high; the sanitary service appears to have broken down, and there is a great dearth of doctors, while the communal hygienic committees are useless.

A State of Panic.

A Roumanian lately returned from Bulgaria declares that the Bulgarians now realize that they have joined the wrong side, and that they are filled with gloomy forebodings about the future. Not a single voice, however, is raised to declare the truth. For the members of the Opposition know quite well that the Government has ready a *dossier* of accusations—true or false matters not—against each one of them, to be used in case of need.

Travellers in Bulgaria are now put to every possible inconvenience by the police and the military authorities. So strong is the spy fever that every Bulgarian must possess a "good conduct" certificate from the municipal authorities of his place of residence, or from the prefect of police, and this document must be produced and *visé* whenever he moves about. The knowledge that the country is on the verge of defeat and dishonour seems, in fact, to have caused a perfect panic, signs of which are visible everywhere.

Of Archæological Interest.

A party of historians, archæologists, and ethnologists will shortly visit the newly acquired districts in order to make a study of the ancient monuments and churches. After what has already occurred, one cannot but feel anxious as to the fate of any works of art, etc., which may be found in these regions; for it is well known that the Bulgarians have followed closely the examples of their masters in regard to articles of art or value in invaded territory.

Frescoes representing the Bulgarian Tsar Samuel and his sons have been discovered in the Monastery of St. Naoum, near Ochrida, by some Bulgarian archæologists. But was the famous Tsar really Bulgarian or Serbian? It is difficult to decide; for in his time the district of Ochrida passed successively to the Serbs and Byzantines.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, July 24.

Life in Constantinople.

Although Greece is the nearest neutral State to Turkey, one is in complete ignorance here of what is really going on in that country. All communication between the two countries is broken off, and only occasionally, through some stray traveller, does one get a little information of the situation in Constantinople, as it appears to them. And such information is not always to be relied on.

Judging from the latest advices, the Turkish capital is at the present time more like its old self than it has ever been since the outbreak of war. Perfect order and tranquillity seem to prevail, and, though business is stagnant, there is the usual movement in the social life of the city, and no indication that the country is at war or its existence at stake.

The Cost of Living.

The increased arrivals of wheat and flour—wherever they have come from—have considerably alleviated the bread difficulty, and although only the limited allowance per diem at the fixed price of 65 paras is obtainable, yet your baker will give you almost as much as you require at a higher price! Meat has also come down in price, and can be obtained at about 12 piastres the oke; and poultry, vegetables, fruit, and fish are cheap, if not cheaper than normal times. All imported articles are, of course, expensive. Sugar, for instance, is 60 piastres the oke, and a pair of boots cannot be had under three or four pounds. Coal stocks appear sufficient for the city's requirements; the tramways, trains, and steamers are still able to keep up their services, and the electric lighting of the city has much extended during the past year, owing, no doubt, to the scarcity of petroleum.

The most noticeable feature in the outward appearance of things is the deserted and lifeless condition of the harbour and Bosphorus, deprived as they are of their commercial and shipping activity. Possibly that is the only striking evidence that something unusual has taken place.

Holiday Makers.

The Prince's Islands, it is said, are the favourite summer resort this year; and Pera society, no longer in fear of submarines, has flocked there.

With these conditions prevailing in the capital, it is not surprising that the Turks, ignorant as they are of the true state of affairs in general, are confident of the future, and believe in the fairy tales of Turkey's aggrandisement and of the eventual defeat of her enemies.

Gold and silver are scarce in Constantinople, and Government paper is mostly in use. Holders of this paper, anxious to get rid of it, invest in property, with the result that much higher prices are being asked for landed property as well as for good securities. The banks, it is said, charge a higher rate of exchange for remittances abroad if payment is made in paper currency.

At Smyrna.

The aerial attack on Smyrna some time ago appears to have been followed by some disturbances, and the Allied subjects were interned for a short time somewhere in the town. Rahmi Bey is still nominally the Vali, but he is said to be carefully watched by the Huns.

There is no further news of the Englishmen who were recently arrested in Constantinople.

News of British Residents.

An Englishman, formerly resident in Constantinople, kindly gives us leave to publish the following extracts from a letter received only last Saturday, though forwarded from Constantinople on May 26:—

In the city the following English people are all O.K. (I see them pretty often):—Mr. and Mrs. Sykes, Mrs. Douch and family, Mr. and Mrs. Guest, and Mr. and Mrs. Ramsay and family. Dr. Maclean and daughter and practically all of the English colony who were here six months ago are still here and O.K. The following men are interned at or near Konia, and we hear from them, indirectly, very often:—H. Hoare Farley (a chemist), Leete (Western Insurance Co.), Ashover, and a couple of others. All O.K. A report came of the escape of two British naval officers from the interior, and that the Konia prisoners are not now allowed as much freedom.

The staff of the British hospital are living in town, and are all O.K. Mrs. and Miss Crawford I saw also; they are all right.

Von der Goltz Pasha was shot by a Turk while he was writing at a table. Two shots were fired.

The Breslau is in the Golden Horn. She is all right now. The Goeben is at Stenia, more or less all right. They are now calling in soldiers who are supposed to be sixteen years old, but they look younger. Only very seldom are civilian passengers allowed on the Balkan train, and the Spanish Minister's wife has been waiting for over a fortnight to leave.

There have been several aeroplane raids. In one of them a fortnight ago at "Saffra," beyond San Stefano, a Turkish machine went up to fight a British aviator. The result was that the two men in the Turkish machine were killed, the Turk observer being killed outright, and the German was wounded and died a couple of days later.

NEWS OF SYRIA.

(From a Correspondent.)

Cairo, July 18.

News from Syria, now coming in with greater frequency and regularity, continues to depict the situation in that unhappy country in the blackest colours. In addition to famine and the reign of terror, cholera is said to be making ravages in Aleppo and other towns, except Beyrout, which is protected by its pure water supply. If some of the wealthiest people in Aleppo have succumbed to the epidemic, the condition of the helpless poor may be easily imagined. If the authorities were at all mindful of the welfare of the inhabitants they could have easily brought over from Germany the necessary quantity of medicines, which are said to be completely lacking.

The Commander-in-Chief of the Lebanon forces—a Lebanese himself—is said to have raised a volunteer force of about 10,000 strong. It need hardly be said that the system of enrolment was voluntary only in name. Of course, all these so-called volunteers are sent out of the Province.

Deserters in the vilayet are now hanged, instead of being tried and shot, and their bodies are left exposed, in order to inspire the public with terror. Further than that, N.C.O.'s and men of the gendarmerie are given power to fire on all persons in the villages attempting desertion and not obeying the order to stop.

The U.S. Government seems to have awakened at last to its responsibilities in regard to Syria, and the firm attitude that it has assumed promises to produce some relaxation of the criminal measures adopted by the Turkish Government against the helpless civil population. It is said that the Turks have just agreed to the distribution by the American Red Cross of relief to the suffering Syrians. It is also said that a suggestion has been made by the American Government to send warships to Syria for the transport of the destitute; but very faint hopes are entertained of its realisation.

July 19.

The latest clandestine arrivals from Syria are five men, who report that famine in the Lebanon has reached its acutest stage. One of these men declared that two of his children died of hunger, and that he preferred to fly, at the risk of being drowned, rather than live to see the remainder of his children and his wife die away before his eyes, and his country go through these terrible sufferings. This extreme aggravation of the situation, coupled no doubt with the vigorous protests of the United States, must at last have moved the Turkish Government, which, as was lately reported, ordered the distribution of 95,000 kilos of wheat in the Mountain.

These new informants further report that the Turkish Government is now enrolling the Lebanese, taking ten recruits from each small village, and larger numbers from larger villages in proportion. A noteworthy fact is the present paucity of Turkish troops in Beyrout and Junieh, the chief port of Northern Lebanon; which confirms the report, made some time ago, of the withdrawal of a good portion of the forces in Syria to the Hejaz, to quell the revolt of the Shereef of Mecca. If this be true, we shall not be surprised to hear soon of risings among the Bedouin and Druses of the Hauran.

The eyes of Syrians abroad are now anxiously fixed on General Sarrail's army, and the devout hope is entertained that it will successfully cut off Germany from Turkey: and, once the Bulgarian army defeated, detach a portion of the Armée d'Orient for an expeditionary force to Syria, before the rigours of winter set in. Otherwise the complete ruin of the Lebanon may be achieved.

TANGIER TO TEHERAN.

According to letters received recently from Persia, Herren Pugin and Kardoff, the ex-Chargé d'Affaires, remain at large, and doubtless still exercising their baleful influence upon such Persians as they can contrive to befool. Early last month they were reported to be in the neighbourhood of Khomain, a small place to the south of Sultanabad. What they were up to there was not quite clear; but it is safe to say that it was some dirty work. The sands are running out, however, and we may live in hopes of seeing both these "gentlemen" (German variety) laid by the heels very shortly—unless, of course, their dupes turn against them and take justice into their own hands. Which seems to be not unlikely.

***

The report about Turkey having sent troops to the assistance of her hard-pressed Austrian ally is received with much scepticism in many quarters. One writer points out that "of the 48 divisions constituting the Ottoman army 30 divisions are engaged by the Russians in the Caucasus and hardly suffice for the task set them. Eight other divisions are in Syria and Arabia, where the revolt of the Shereef of Mecca is more than serious enough to prevent the withdrawal of a single battalion. The ten remaining divisions are indispensable to protect the front at Baghdad and are spread from Smyrna to Thrace to guard the coast of Asia Minor and the Black Sea." And others suggest that the "Turkish" troops in question are really the Austrian and German detachments originally sent to Turkey, who are "still wearing their Turkish badges." But against these suggestions we may set the report forwarded by the very well-informed Budapest correspondent of the *Morning Post*, who reports, on July 29, that it is even stated there that a number of these Turkish troops "have already arrived at the south-eastern base in Maramaros-Sziget." He goes on to say that, according to "politicians who are supposed to know everything . . . the number of Turkish troops on the way to Hungary does not exceed two divisions of 12,000 each, consisting only of infantry," lacking artillery and even the usual Red Crescent detachments. Such "help" would be a mere drop in the ocean; and it is not surprising to learn that the Viennese and Budapest papers "are giving all kinds of explanations."

***

As a matter of fact, it would not be very difficult to provide "explanations" of Turks going—or being sent—to the defence of Hungary. Are not Magyars and Osmanlis both of Ugrian stock? And have not Hungarian rebels on several occasions been kindly received by Ottoman sultans? Now the Osmanli, having had a fair chance of estimating the value of German "assistance" and "disinterestedness" himself, and suspecting that the Teuton is preparing to desert the Hungarian, prepares to stand by his stricken kinsman. Chivalry, though unknown in Prussia, is not yet quite dead in Constantinople and Asia Minor. The move seems to me to be pregnant with great possibilities. Will Hungary, as a result of the war, escape from German tutelage and enter a Confederation of the Danube?

***

In any case, the employment of the Turks in this manner is a practical confession of weakness on the part of Berlin; and the Turks themselves will be able to judge how the land lies when the aid of two divisions is accepted with such effusive thanks. It may be a clever move designed to get some of them out of Turkey, as hostages for Ottoman obedience, but——! The system, borrowed from Napoleon, works well in case of victory, but goes half way towards making a defeat a disaster.

***

Some weeks ago *The New Armenia* published some jokes about the Armenian mouse rescuing the Russian bear and the British lion from the net in which the German eagle had caught them, about Armenian victories being described as "Russian victories," and about Great Britain winning *her* victories by "utilising printer's ink in the British Press." Its latest issue to hand, that of July 15, seems to indicate that it is now bent on winning victories of its own by utilising printer's ink; though it has not yet quite decided whether the foe to be vanquished is Great Britain or Russia. For in the issue referred to the place of honour is given to a truly remarkable effort entitled "Autonomy for Armenia," the authorship of which is attributed to "An American Diplomat."

***

If the writer of the article referred to is really in the United States Diplomatic Service it is to be hoped, for the sake of his country, that he will never be placed in any position of responsibility; for he appears to be utterly lacking in tact, a quality which is usually supposed to be essential to success in that service. He writes about "the cold course of diplomacy," but his article is as lacking in both coolness and diplomacy as the worst effort of any blatant mob orator. Armenia, he declares, has borne "political slavery far more galling than that of our Thirteen Original Colonies, or yet of Ireland." Nobody would dispute the fact for a moment; but is the comparison a happy one for a tactful "diplomat" to draw? And is he judicious in allowing himself to be "*forced* to remember that at least one Russian, Lobanoff, said, like the Turks, 'We want Armenia without the Armenians'"? Again, he writes of England having it "in her power to do much for the Armenians, and thereby expiate her former sins"; but he fails to explain what more England can do than she is doing at present. Will he enlighten us? As a "diplomat," he doubtless thinks out plans for the execution of any project he proposes. Will he not give the Allies the benefit of his plans in this connection? If not, I would respectfully suggest that he might profitably study geography rather than write at large on a subject in which he does not seem to be quite at home.

***

Better still, it seems to me, would it be if this strange "American Diplomat" were to take an active part in trying to help the Armenians. He points out that "justice and humanity demand that the Armenians be granted autonomy under the liberal ægis of Republican France and America." Feeling so strongly on that subject, why does he not *do* something? Is he, perchance, one of those people who are "too proud to fight"? Or does he simply prefer to stay at home and indulge in the old-fashioned sport of "twisting the lion's tail"? Surely not! For, on the authority of *The New Armenia* itself, the Armenian mouse is now the very useful and good friend of the poor old lion. With all respect, I submit that such stuff as the "American Diplomat" writes can be turned out much better by German "diplomatists" and Press agents, and I am surprised that the distinguished ladies and gentlemen under whose "honorary editorship" *The New Armenia* appears did not exercise a wise discretion and ruthlessly use their blue pencils. Cheap jibes at the Allies will hardly forward the Armenian cause.

***

In many quarters there is now much criticism of the failure to construct a railway from Busreh to the British front in Mesopotamia. That such a railway would have proved an inestimable blessing there can be no doubt; and as it was generally understood that there was in Busreh itself a considerable quantity of material lying in readiness for the construction of the so-called "Baghdad Railway," it was natural enough for the uninitiated at least to wonder why no attempt at constructing a line of some kind was made. I must confess that I, for one, could not understand the failure to make such an attempt. The country, I knew, was swampy and intersected by innumerable canals and water channels, but still I imagined that a railway good enough for emergency use, so to say, could have been constructed fairly quickly. Recently, however, I was told by a friend far better acquainted with local conditions than I am, and also qualified to speak on the ground of engineering knowledge, that the undertaking was very far from being so simple as I and many other people imagined. Indeed he went so far as to say that in the present circumstances it would be impossible to construct a line in time to be of any use. The "labour" would, he thought, be impossible to obtain; the work of construction would, of course, have to be guarded constantly and strongly against attack by the enemy; and the problems presented by the swamps and waterways would require much time and careful planning to solve. Doubtless all these difficulties *could* be surmounted if only sufficient money were provided. But even in these days of colossal expenditure it seems to be very doubtful whether the money would be forthcoming. The line will doubtless be constructed in time, but in the meanwhile the thing to do seems to be to press on with the work of improving the river transport and providing craft capable of coping with the peculiarities of the Tigris in both the "full" and the "dry" seasons.

CORSAIR.

A letter has been received at Sherborne by the parents of Air Mechanic S. J. Wells, of the Royal Flying Corps, one of the surrendered Kut garrison, stating that he was at Angora, and quite well and comfortable. The letter is interesting in relation to Lord Robert Cecil's statement in the House of Commons on Monday, which will be found elsewhere.

NEAR EAST BOOKSHELF.

A MESSAGE FROM THE WEST.*

Years ago, when men who had known each other in the Antipodes casually met in the City streets of London, most likely in the vicinity of an East Indian merchant prince's office, the saying, "How small the world is!" became fashionable, and has been handed down to us. Our mothers still use it frequently; men but rarely. For, to us, there seems to be nothing wonderful in meeting in London to-morrow people whom, two weeks ago, we dined with in Alexandria or British Columbia. Nevertheless, the truth of the old dictum is brought forcibly home to us when perusing the history of how the Canadian Pacific Railway threw its steel rails across the American continent. Men from all corners of the world hastened to help build the gigantic system; there were northern and southern labourers, hands from Scandinavia and Italy, emigrants from Transylvania and Croatia, Slavs and Slovenes and Jugoslavs. Truly, the world is small, and Near Eastern people, whatever their number, helped build the greatest Imperial link in the great all-red belt stretched across the globe.

The above is one of the first impressions to be gathered from Mr. Keith Morris's popular *exposé* of the building of the Canadian Pacific Railway. Incidentally, moreover, it is a graphic chronicle of one of the greatest lessons of Empire-building which Britons can record; how a group of energetic, purposeful men overcame all obstacles and opposition in their hour of deepest adversity and brought their grand undertaking to a happy and successful finish. It is a lesson applicable to other parts of the Empire, to other continents, and to the Britons residing therein. The example of the pioneers of the Canadian Pacific—the Lord Strathcona and Mount Royal, for instance—can be followed by South Africans bent on spiking rails northwards across the hills and rivers of Africa until they link up with the far-distant railhead in the Sudan. It can be followed by those experts in matters pertaining to cotton who continually urge the cultivation of that most useful plant on a big scale along the banks of the Nile and in the neighbourhood of Tokar. It can be followed by those who firmly believe in the practical exploitation of the immense *sudd* district, or in the presence of important oil strata in Egypt. On a smaller scale, moreover, the lesson taught us by the pioneers of the C.P.R. will have to be learnt by the new nations which will arise in the Near East after the war is over; by the Southern Slavs bent on working out their own salvation; and by the Roumanians, eager to acclaim their brethren in Transylvania. For the story of the struggle of the leaders of the All-British Trans-Continental Railway across America, linking up the Pacific with the Atlantic, is an old, old story—namely, of perseverance in a good cause crowned by success. The setting only has changed from East to West, and the description of that setting can be advantageously read in the pages of the book under review.

BOOK NOTES.

An interesting account of the pirates—Algerian and others—of the Mediterranean is included in Mr. Henry Gilbert's "The Book of Pirates," which is published by Messrs Harrap and Co. at 5s. net.

"Modern Greek in Asia Minor" is a book for the student, not the general reader. It is written by Mr. R. M. Dawkins, late Director of the British School at Athens, and is an expansion of a paper published in the *Journal of Hellenic Studies* on the dialects used in the interior of Anatolia. Professor W. R. Halliday contributes a chapter on the Subject-matter of the Folk-tales. The price of the volume, which is published by the Cambridge University Press, is 31s. 6d. net.

"Lancashire Territorials in Gallipoli," by George Bigwood, is issued from the offices of *Country Life*, at 1s. 3d. net.

The Cursitor Publishing Company announce for immediate publication a volume of "War Letters" by Mr. Oliver Bainbridge, whose name is familiar to our readers in connection with his travels in and lectures on the Balkans. Among the letters included are some to King Ferdinand of Bulgaria, King Constantine, M. Také Jonescu, Lord Cromer, Lord Curzon, and Madame Olga Novikoff.

"Greece and the War" is the title of the latest pamphlet (No. 26) issued by the Anglo-Hellenic League. It contains an interesting survey of M. Venizelos' policy, a letter from the Hon. Pember Reeves on "The Bulgarian Invasion of Greece," and extracts from a letter addressed to Lord Burnham by Prince Nicholas of Greece.

Messrs. Harrap have just issued "The Story of Lord Kitchener," by Harold F. B. Wheeler, at 3s. 6d. net.

"With the Zionists in Gallipoli," by Colonel Patterson, which was recently reviewed in these columns, is in such demand that Messrs. Hutchinson and Co. have gone to press with a second edition. This will be ready shortly.

In "La Syrie et la Guerre" (Paris, Chapelot, 2 francs), M. Henri Richard gives his reasons for holding that France must occupy Syria. He also sketches a scheme for the administration of the country.

Messrs. Pearson have published recently "In the Hands of the Senoussi." The narrative is compiled from the diary of Captain R. Gwatkin-Williams, R.N., by Mrs. Gwatkin-Williams. The price of the book is 2s. net.

With Gypsies in Bulgaria. By "Andreas" (Mui Shuko). (Liverpool: Henry Young and Sons. 2s. 6d.)

Les Persans à Monaco: Etude sur l'origine du nom de lieu Gaumatâ. By H. Villiers Barnett. (Imp. de Monaco.)

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

PROFESSOR POPOVIC'S PAMPHLET.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—THE NEAR EAST has always shown a marked impartiality in dealing with Balkan questions. May I ask if the ideas put forward in the pamphlet entitled "Serbian Macedonia," by Professor Popovic, and published by THE NEAR EAST, Limited, are officially accepted and endorsed by THE NEAR EAST?

It would not be opportune at this moment to discuss the debatable matter contained in the pamphlet, but it should at least be put on record that an entirely different point of view exists, and that some of Professor Popovic's arguments could be used to support a very different case.—I am, etc.,

Bingham's Melcombe, Dorchester, Dorset, August 4, 1916. ELLINOR F. B. GROGAN.

[The pamphlet entitled "Serbian Macedonia" contains a letter by Professor Pavle Popovic, which appeared in THE NEAR EAST. In publishing this letter, itself in the nature of a reply to the Bulgarian view of the Macedonian question—also set forth in our columns—THE NEAR EAST acted in accordance with its policy—to which Lady Grogan kindly bears witness—of affording hospitality to both sides in a controversy, and did not necessarily endorse the writer's opinions. The reprint of the letter in pamphlet form was undertaken at the wish of Professor Popovic as a business proposition by THE NEAR EAST, Limited. The proviso that its publication does not commit THE NEAR EAST to an endorsement of the views contained in its pages holds good; and we regret that this fact should not have been made clear in the pamphlet.—ED.]

Under date of August 2, the Bucharest correspondent of the *Daily Telegraph* reports:—The *Epoca*, the journal of M. Filipescu, publishes a sensational document, proving the existence of the closest relations between M. Marghiloman and Count Tisza. It consists of the facsimile of a letter addressed by the Austrian Deputy Hruscha to M. Marghiloman, stating that he had forwarded his letter to Count Tisza. The letter declared that M. Marghiloman was "more than the gods for his country," and that he was preparing "to fight together against the common enemy." The revelation has caused great public indignation.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

The Dardanelles Inquiry. August 3.

On the order for the second reading of the Special Commissions (Dardanelles and Mesopotamia) Bill,

The Marquess of CREWE said he understood that when the measure got into Committee amendments would be put forward to make further additions to the membership of the Commission which would investigate the circumstances of the Dardanelles Expedition.

The Earl of CROMER said that if he had consulted his personal inclination he would have declined the honour of acting as President of the Dardanelles Commission, but he had thought it his duty to accept. If he found, after a trial, that the work was too much for him he would resign. With regard to the composition of that Commission, he would suggest that a judicial member of the House should be added, because the subject was rather for a mind accustomed to weighing evidence than for experts. In spite of something said elsewhere, he understood that the Government intended the inquiry to be complete and not devoted to whitewashing purposes, otherwise he would not have consented to take part in it. With regard to what the Government might communicate to the Commissioners, he hoped there would be no reticences and that arrangements would be made to communicate to them anything relevant which had passed at Cabinet Councils. In connection with the report of the Commission, he would be in favour of a maximum amount of publicity and a minimum amount of secrecy, provided that nothing was made known to the enemy. He was convinced that his colleagues would, like himself, enter on their arduous task without any preconceived convictions as to either events or individuals.

On the motion to go into Committee on the Special Commissions (Dardanelles and Mesopotamia) Bill,

Viscount MIDLETON referred to Lord Cromer's intimation that he would suggest a further name from their lordships' House as an addition to the Committee, and his statement that it would be desirable to obtain some peer of high judicial attainments. Some negotiations had taken place, but there appeared to be some difficulty in regard to the judicial sittings. Perhaps, if it was desired to take the Committee stage now, there would be no objection to moving the addition of the name on the third reading.

The Earl of CROMER agreed with what the noble viscount had said. He would very much like to have someone of large judicial experience on the Committee.

The Marquess of CREWE said he would raise no objection to the course proposed. The House would understand that it was no easy matter to spare from the Judicial Committee of the Privy Council a noble and learned lord, but as the desire had been so strongly expressed it should receive every possible consideration. He confessed that if he were in Lord Cromer's place he would desire that the Committee should be as small as possible, and should look with suspicion on any attempt to add to its numbers, even if the individual added might be of the most acceptable kind. But if the noble earl took that view the Lord Chancellor, he was sure, would do his best to arrange the judicial business of the House so that some learned lord acceptable to Lord Cromer should be spared.

The Earl of CROMER: It need not necessarily be a peer, but may be some other person of judicial experience.

The Marquess of CREWE said that enlarged the field of choice, and no doubt the Lord Chancellor would consider how far it would be possible to suggest a name.

The LORD CHANCELLOR said it was, of course, a matter of the highest importance that the Judicial Committee of the Privy Council should be maintained at its highest standard of efficiency, but it might be possible to secure that, and at the same time meet Lord Cromer's not unreasonable desire that someone with experience in sifting evidence as a judge should assist him, and he would do what was possible.

The Bill was passed through Committee.

On the motion for the third reading of the Special Commissions (Dardanelles and Mesopotamia) Bill,

Viscount MIDLETON said that it had been intimated that the services of Lord Justice Pickford would be available on the Dardanelles Commission, and he understood that would be highly acceptable to his noble friend (the Earl of Cromer). He therefore moved to insert in the Bill the name of "The Right Hon. Sir William Pickford, Knight, one of the Lords Justices of Appeal."

The Earl of CROMER said the services of Lord Justice Pickford would be of the utmost use.

The amendment was agreed to, and the Bill was passed.

HOUSE OF COMMONS.

The Prisoners from Kut. August 7.

Lord R. CECIL, replying to a question put by Sir E. CORNWALL regarding the British prisoners captured at Kut, said: On June 9 the United States representative at Constantinople reported that notwithstanding repeated inquiries he had been unable to ascertain the whereabouts of the British prisoners of war taken at Kut excepting General Townshend. The United States Consul at Baghdad had not been allowed to get into touch with the prisoners. The only information which General Townshend had was that they were being brought northwards across the desert. The United States representative sent £T2,000 by telegraph to the Ottoman Red Crescent at Aleppo for the prisoners, and pressed the Porte to allow the Consul at Baghdad to visit them and supply their needs. The Porte refused on the ground that the men were being moved, and stated that they were being treated according to the established rules. On receiving this information we requested the United States representative on July 6 to protest strongly, and to press the Porte to state the names of the camps to which the prisoners were being sent, and to allow a member of the Embassy to visit them immediately on their arrival. The Embassy have so far received no reply to their representations made at our request. We have heard that twelve officers have arrived at Broussa well, forty-five officers and men at Afion Karahissar, six officers at Baghdad, seventy-five officers at Kastamuni, and an equal number at Yuzgat. On June 26, 1,000 prisoners were at Baghdad too weak or ill to travel, and forty British officers were at Adana ill with dysentery. Medicines and nourishing food were being sent them. On June 21 sixty-two prisoners arrived at Angora. On July 28 the United States representative telegraphed that fifty Indian officers and men were at Konia and twenty-three Indians at Eskishehir. He states that as soon as the arrival of prisoners at a camp is notified he sends them clothing, comforts, and money. The names of all officers and men mentioned in the reports received have been communicated to the War Office for the information of the relatives. The failure of the Porte to reply to our note of July 6 is most unsatisfactory, and inspires considerable misgiving, having regard to the fact that the prisoners are compelled to cross the desert in this season of the year, and are obviously in no condition to endure hardship.

An Egyptian "Incident." August 8.

General Sir IVOR HERBERT asked the Secretary for War whether any inquiry had been instituted into a regrettable incident that occurred to the east of the Suez Canal on Easter Sunday last; whether any report had been received fixing the responsibility for the disposition of the troops engaged on that occasion; and whether the officer responsible for the apparently faulty dispositions had been permitted to retain his command.

Mr. FORSTER said that such information as the War Office had received of the operations apparently referred to was published in the *communiqués* of April 24 and 25. There was nothing to add to this information at present, and, in the opinion of the military authorities, the reports did not disclose any ground for inquiry. From time to time changes had been made in the command of troops in Egypt, as in other theatres, on the recommendation of the General Officer Commanding-in-Chief. It was not in the public interest to give any information in regard to changes which might have taken place.

General Sir I. HERBERT: There are very distinct reports going about which give rise to a great deal of uneasiness, and could not more information be given than what is provided in these brief *communiqués*?

Mr. FORSTER: I think all these matters have been taken into consideration.

Regarding Mesopotamia. August 9.

Sir R. JARDINE asked when the report of the three Commissioners who had inquired respecting medical supplies and transport in the Mesopotamia campaign would be laid on the table.

Mr. C. ROBERTS replied that Mr. Chamberlain was doing all he could to expedite the report.

Sir E. CARSON: How long are we to go on waiting without any explanation of the delay?

Mr. C. ROBERTS pointed out that on a previous occasion the Secretary for India explained that he was giving the Government of India an opportunity of considering the report.

Sir E. CARSON: That is three weeks ago.

Sir R. JARDINE asked for assurances that the river craft used for conveying troops up and down the Tigris and Euphrates had proper appliances for securing that the drinking water should be uncontaminated and not dangerous to health, and that sufficient supplies of drugs, medicines, bandages, and other medical appliances had reached the troops at Busreh, and the stations on the lines of the Tigris and the Euphrates.

Mr. LLOYD GEORGE: My hon. friend asks me for two assurances, but he will, I am sure, have taken into account that since the War Office assumed the additional responsibilities with which I dealt in the speech I made on July 28 not sufficient time has elapsed for an appreciable change to have been effected in the situation as a direct result of the change of responsibility. Subject to its being understood that the Army Council do not claim that all has yet been done which should be done and will be done, I may inform him that on all new boats ordered in the United Kingdom arrangements for securing adequate proper drinking water have been made. Filtration barges are being sent and supply tanks on various points in the river will be provided. As regards the vessels already on the spot, I am informed that an installation for sterilizing water recommended by the Director of Medical Services and the late Sir Victor Horsley has already been provided on many ships and will be fitted to the remainder. Two tanks holding forty gallons for cooling purposes have also been added on each vessel. A large number of hospital river steamers and barges have also been ordered. As regards drugs, medicines, bandages, and other medical appliances, all demands have been supplied, and, as the General Officer Commanding has repeatedly been told to ask for all he wants, I am satisfied that sufficient supplies are now available on the spot.

Arab Prisoners Released.

Mr. BRIDGEMAN, replying on behalf of Lord R. CECIL to Mr. PETO, said the Foreign Office had just heard that the members of the crew of the s.s. Coquet, who had been in the hands of the Bedouin Arabs, had been handed over to us. They were expected to arrive in Bengazi on August 6.

Prince Andrew of Greece has left London for the Continent.

The King of Montenegro has visited the French front and the position held by the Russians.

King Constantine travelled from Athens to Paris to attend the funeral of General Manoussojanakis.

Prince Antoine Bibesco, Secretary to the Roumanian Legation in London, has presented to the National Council of the Young Men's Christian Association the hut erected in Sloane Square for the rest and recreation of men of his Majesty's forces. Prince Antoine Bibesco is now in Bucharest.

Lord Barrymore has left 20, Hill Street, Mayfair, for Marbury Hall, Northwich, Cheshire.

General Sir John Maxwell has returned to Dublin.

Lady Maxwell is now much improved in health, and has left her residence in Grosvenor Place for Lichfield, Staffordshire.

General Sir Ian and Lady Hamilton left town last Friday for Dunblane.

Letters received lately in London report that H.R.H. the Zil-es-Sultan arrived in Teheran on July 9, and that he was the guest of the Sippar Saleh.

From the same source we learn that Prince Firman Firma had left for the south, and would travel to Ispahan by way of Kum and Sultanabad.

Essad Pasha was, says the *Temps*, received by King Nicholas of Montenegro last week, and had a long and cordial audience of his Majesty.

The King has received the following answer to the telegram which he sent to the King of Serbia on the second anniversary of the declaration of war:—"Corfu, 4th August. —Partageant du fond du cœur les sentiments dont Votre Majesté a bien voulu me faire part à l'occasion du second anniversaire de la guerre, je m'empresse de lui dire avec quelle satisfaction je viens de recevoir ce nouveau témoignage de la volonté inébranlable de faire triompher la noble cause pour laquelle coule à flots le sang précieux de braves soldats alliés."

An engagement is announced between Harold Knox Shaw, of the Helouân Observatory, Egypt, eldest son of Mr. and Mrs. Knox Shaw, and Mary Elinor, younger daughter of Mr. A. G. Rickards, K.C., and Mrs. Rickards.

FRENCH, English, Spanish, Italian, German, Scandinavian Languages, Greek, etc., rapidly taught by natives.

Lyceum Institute, 85, New Oxford Street, and 64, Haymarket.

Our Cyprus Correspondent writes (July 22):—Captain Gallagher, D.S.O., Chief Commandant of Police, has recovered and is back at Salonika, whence he was invalided.

Many friends in Egypt will be glad to hear that Private Ralph van Millingen, brother of Mrs. Augustus van Millingen, who is serving in the machine-gun section of the London Scottish, has been commended by the G.O.C. of his division and the G.O.C. Brigade for bravery in the field on July 1, and has been awarded the Military Medal. He had a marvellous escape, he and his sergeant being the only two survivors to return from a captured trench.

Lieutenant-Colonel Hugh Marjoribanks Craigie-Halkett, Highland Light Infantry, who is reported wounded, has seen service in the Sudan and in Somaliland. He also served in the South African War.

Another officer formerly serving with the Egyptian Army who is reported wounded, is Major Alexander Phayre Churchill, Essex Regiment. His name appears in the list issued on Tuesday.

Brigadier-General the Hon. Charles Sackville-West, C.M.G., has been wounded at the front, and is now in a London hospital.

News has been received this week that Mr. J. L. Battey, who was taken prisoner at Kut, is now at Yuzgat, in Asia Minor. He was allowed by his captors to write to his family, and his letter, which was dated July 12, and came through the Agence Internationale de prisonniers de guerre, Geneva, stated that he was well at the time of writing.

Our Khartoum Correspondent writes (July 21):—Amongst others leaving northwards by to-day's train is Capt. F. R. Kennedy, C.M.G., Director of Public Works. He was employed at Gallipoli for some months, and returned thence to the Sudan. He has recently had very hard work in connection with roads and communications in the Darfur patrol, and has been especially interested in the development of mechanical transport. He has latterly suffered from the stress of work and is proceeding to England for a well-earned holiday.

Judge Peacock is travelling to Cairo on his way to England.

A notable departure from Khartoum is Mr. Frangoudis. He has long been one of the only two advocates in Khartoum, and since the outbreak of war the only one; his nephew, however, joined him recently, and is starting practice, and Mr. Frangoudis is leaving Khartoum for a more equable climate.

Another passenger for north is the well-known cricketer, "Sam" Woods, who is serving in the Warwickshire Battalion at Khartoum.

Our Special Correspondent in Athens reports, under date of July 24:—

News has been received here that Lady Woods and Lady Whittall have arrived safely in England from Athens.

Mr. and Mrs. Edwin Whittall have left Athens for London.

Mr. Vernon Whittall, second son of William Whittall, who recently joined the Artists' Rifles, has now obtained an interpretership, and has arrived at Salonika.

It is reported that Shefik Bey El Moyyad, at one time Imperial Commissary on the Administration of the Ottoman Public Debt, was one of the Syrians recently hanged in Syria. If this is true, many readers of THE NEAR EAST, who knew Shefik Bey, will deeply regret the fate of so distinguished and charming a man.

The English ladies who were removed from Baghdad and interned at Mosul were to have been transferred to Aleppo; but according to latest advices their departure had been delayed, and they were still at Mosul, but were all well.

A telegram from Toulon states that Miss Flora Sendes, an Irishwoman, who was in Serbia at the beginning of the war, served as a hospital nurse, and when the hospitals were closed enlisted as a private in a Serbian regiment. After a holiday in London she has arrived at Toulon on her way to rejoin her regiment at Salonika, with the rank of sergeant.

Mr. C. A. Wilkinson, formerly sub-editor of the *Egyptian Gazette*, who was recently wounded, is now at the London Hospital, and is recovering from his injuries.

A public meeting organised by the London Czech and Yugoslav (Serbian) Colony to commemorate the declaration of war on Austria-Hungary will be held this evening at a quarter to eight in the Y.M.C.A. (large hall), Tottenham Court Road. Members of Parliament and other prominent men will speak.

APPOINTMENTS, PROMOTIONS, ETC.

Under date of August 9, Reuter's Bucharest correspondent reports:—The King to-day received the new French Minister, M. de Saint Aulaire, who presented his credentials to his Majesty and then introduced the newly appointed members of the Legation staff. The King received the French visitors with great cordiality. The Minister was afterwards received in private audience by the Queen. The King has conferred the high distinction of the Grand Cordon of the Star of Roumania on M. Blondel, the retiring French Minister.

The War Office announced in the *London Gazette* of Monday night the temporary appointment of Lieutenant-General Sir J. G. Maxwell, K.C.B., K.C.M.G., C.V.O., D.S.O., as a General Officer Commanding-in-Chief, First Class. The appointment is dated April 27, 1916.

The Egyptian Gazette of July 26 announces:—Sir Murdoch MacDonald, Under Secretary of State for Public Works, arrived at Cairo from Alexandria on Monday morning. He intends going to England on leave this week.

Dr. D. Dunlop, Adviser to the Ministry of Education, is also proceeding to England on leave this week.

Under date of August 7, Reuter's Petrograd correspondent reports:—Vice-Admiral Koltchak has been appointed Commander-in-Chief of the Black Sea Fleet in place of Admiral Eberhard, who has been put on the retired list. Admiral Koltchak is 40 years of age, and is the youngest Russian admiral. In 1903 he led a reserve party in search of the members of the ill-fated Arctic expedition of Baron Tolle. He distinguished himself particularly in the defence of Port Arthur. He has also proved his capabilities in this war, and was promoted admiral in April, 1916.

It is rumoured that General Callaris, Greek War Minister, has tendered his resignation.

Lieutenant J. S. La Fontaine, R.N.V.R., has been seconded for special duty in the Mediterranean.

SCHOOLS for BOYS & GIRLS.
TUTORS for ARMY & ALL EXAMS.
REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

J. and J. PATON,
EDUCATIONAL AGENTS.
143, Cannon Street, London, E.C.

OBITUARY.

GENERAL E. C. INGOUVILLE-WILLIAMS, D.S.O.

It is reported that Major-General Edward Charles Ingouville-Williams, C.B., D.S.O., has been killed in action. The son of General Sir J. William Collman Williams, K.C.B., of Purbrook, Hampshire, he was born in December, 1861, and had his commission in the Buffs in July, 1881. He transferred to the Worcestershire Regiment in April, 1903, and reached the rank of colonel in 1908. From January, 1898, to April, 1899, he was specially employed with the Egyptian Army. In South Africa he filled various posts—Assistant Provost-Marshal, D.A.A.G., and C.O. of Mounted Infantry, and a mobile column. Afterwards he was commandant of the School of Mounted Infantry, Longmoor, and Brigade Commander, 16th Infantry Brigade, Irish Command. His subsequent promotion came in August, 1914 (brigadier-general), and June, 1915 (major-general).

For service with the Nile Expedition (1884-5) General Ingouville-Williams was awarded the Egyptian medal with clasp and the Bronze Star. The Nile Expedition of 1898, when he was employed as Special Service officer with the Egyptian Army, brought him more honours—mention in despatches, his brevet as major, and the Egyptian medal with two clasps and the Nile medal. He fought in the battles of Atbara and Omdurman. In the Nile Expedition of 1899 he was D.A.A G. to the Kordofan Field Force. In the South African War he took part in the Relief of Ladysmith, and was present at Spion Kop, Vaal Krans, the operations on Tugela Heights, Pieter's Hill, and Laing's Nek.

CAPTAIN T. A. FLATAU.

It is announced that Captain Theodore A. Flatau was killed in action on July 1. The news will be received with sincere regret in Egypt, where he was well known, having for a time edited *The Season*, as well as in this country, where he was regarded as a rising man in the literary world. An Australian by birth, he had travelled extensively, especially in the Middle East, and though not of robust physique he was of an adventurous and daring spirit. At the outbreak of the war he obtained a commission, and before long was promoted captain in his battalion of the East Surrey Regiment.

He was for some time editor of the *World*, and was a man of all-round talent—poet, prose writer and organiser—great success having attended the matinée he promoted for the sufferers by the wreck of the Titanic. That he was brave and full of the true spirit of courage his fellow officers and men testify. He returned to the Front (after a spell in hospital from a gas attack) against medical orders, because he wished to be with the men he had trained so efficiently when they went into the "Great Push." The officer commanding his regiment says:—"He was killed on the parapet of the German front line when he was standing up cheering his men on. One can only say of him that he was a very gallant gentleman. Those who were privileged to see him stroll out over the parapet into an inferno of shell, machine-gun, and rifle-fire will never be able to forget it." Let his epitaph be in his own words:—"For the ways of men are little ways And the ways of God are great."

LIEUT. R. W. GORDON LAWSON.

Second-Lieut. R. W. Gordon Lawson, Gordon Highlanders, was killed while charging the enemy trenches on July 18. Aged 26, he was the only son of Mr. and Mrs. J. R. Lawson, of 12, Polworth Road, Streatham, and formerly of Smyrna. He joined the London Scottish in November, 1914, and went through the Battle of Loos on September 25, 1915, where few of his comrades survived. In April last he obtained a commission in the Gordon Highlanders. His colonel writes: "He was a gallant officer, who will be much missed, and his death is a great loss to the battalion." His chaplain writes: "His loss is keenly felt by his brother officers and men, by whom he was held in high esteem, in spite of the comparatively short time he had been with the battalion. I saw a good deal of him during the time he was with us, and learnt to appreciate greatly his fine, manly qualities and his frank and kindly nature, so that I feel I have a real personal share in your sorrow." He was a keen oarsman and footballer.

TWO WELL-KNOWN ANGLO-EGYPTIANS.

Our Cairo Correspondent writes (July 27):—This week Anglo-Egypt lost two of its old residents in the persons of Mr. G. B. Kerr and Mr. J. Meredith Austin, who died within a few hours of one another.

Mr. Kerr, who came out to Egypt some thirty years ago, had made quite a name for himself as a reliable contractor, his speciality being road-making, and in connection with the defences of the Canal he had done some excellent work. He was an exceedingly cultured and popular man, ever ready to do a kindly act, and the essence of hospitality. "G. B.," as he was affectionately known to his intimates, will certainly be very much missed by a host of friends.

Mr. Meredith Austin was not quite such an old resident, having come to Egypt in 1906 as manager of the British Engineering Co., in which the world-famous firm, Babcock and Wilcox, are largely interested, but he was just as well-known. A genial, generous-hearted Irishman, and withal an exceedingly capable engineer, Mr. Austin was not only popular in all circles, but highly esteemed by all who had ever had any dealings with him, and especially by the engineering authorities in the country. The measure of the position, which he acquired out here in his profession, is the sincere regrets expressed at his death by his competitors and the handsome tribute paid by them to his character and work.

The many friends of Mr. W. R. Salisbury, manager of the American Tobacco Co. in Smyrna, will sincerely regret to hear of the death of his wife, Quintelia, in Mytilene, on July 2, at the early age of twenty-seven. Mrs. Salisbury had been in indifferent health recently, and had gone to Mytilene for a change of air. As a result of a chill she succumbed to bronchial pneumonia after an illness of but nine days. She was the daughter of Dr. Cav. Stanislas Pecchioli, for very many years Italian and British Vice-Consul at Kavalla. She leaves two sons, aged 5½ years and 20 months respectively.

The Imperial Ottoman Bank, London, regret to announce that two more members of the London staff have been killed in action in France. They are 2nd Lieut. Ernest W. Martin, Bedford Regiment, and 2nd Lieut. Gerald A. N. Sharpe, Yorkshire and Lancashire Regiment. This brings the total of those members of the staff killed in the recent advances to four—all officers. Eight men have been killed, one is missing (presumed dead), and four others wounded since the outbreak of the war, out of a total of forty-seven serving. The proportion of killed, as will be seen, is high.

It is announced that Second Lieutenant Harold Q. Carver, King's (Liverpool) Regiment, was killed in action on July 30. Lieutenant Carver, who was twenty-five years of age, was the son of Mr. and Mrs. Walter A. Carver, of Seeton, New South Wales, and a nephew of Mr. Charles Carver, of Liverpool, and of Mr. E. D. Carver, of St. Mary Axe, London. He had been in Egypt for several years working for the firm of Messrs. Carver Brothers and Co., Ltd.

The death of Mr. J. J. Bayford, Consul for Greece at Southampton, took place on Tuesday at Bursledon, near Southampton.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

HIGHAM.—On August 8, at 1, Victoria Square, Clifton, Bristol, the wife of Lieut. T. F. Higham, Greek Interpreter, Salonika, and Fellow of Trinity College, Oxford—a daughter.

PEEL.—On August 3, at San Stefano, Alexandria, Egypt, the wife of Captain Willoughby Peel, of a daughter.

DEATH.

OLPHERT.—On July 29, of enteric, at Cairo, Egypt, Wybrants Olphert, Inspector, Ministry of Interior.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

The only English Hotels in Alexandria.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), Alexandria.
Full Pension, P.T.50; Room, P.T.20; Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
Glymenopoulo, Ramleh.
This Hotel is situated near the Beach. Open all the Year. Bathing Cabins.
Terms from:
Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.
CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
G. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

NAJEM HOURY'S CYPRUS HOTELS CO., LTD.
Open all the Year Round—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
For Summer Season—
PLATRES—Platres Hotel: 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel: 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.

THE BATTLE OF KATIA.

Only an evil genius could have prompted the Turks to venture upon an attack on Egypt at the present time. Until the attempt was made Turkey could claim that in her struggle with Great Britain on a variety of fronts the honours were entirely in her favour. The evacuation of Gallipoli, however brilliantly and successfully carried out, was an admission that the enterprise had failed; in Mesopotamia the surrender of the Kut garrison was a notable achievement for Turkish arms; again in Egypt Ottoman troops were in possession of the greater part of the Sinai Peninsula, and, in spite of their defeat in a raid on the Suez Canal, had succeeded in immobilising a large British force. In courting disaster by an attack on the British lines at Katia the Turks have reversed the favourable verdict which the war with Great Britain has secured for them hitherto, for they have shown themselves bankrupt both of strategy and of fighting material. No military command still in possession of its senses could have imagined that Egypt could be conquered by a force of 14,000 men; and the Turks would not have made the attempt with so small a number, if they had been able to spare a larger force. In the despatch of these troops on a mission foredoomed to failure military considerations had clearly been overridden by political exigencies. Whether these had reference to German wishes or arose from the situation in the Hejaz cannot be known at present. It must have been in any case a forlorn hope that prompted this isolated mission across the Sinai desert, and the fact is eloquent of the straits to which Turkey is reduced. Of one thing we may be certain: whatever considerations prompted the expedition, it had the support of Turkey's German taskmasters. Among the prisoners taken were several Germans. They would not have been there, if Germany had not favoured the enterprise. For this reason we incline to the theory that Germany instigated the advance. It would serve the double purpose of keeping both the Turks in Constantinople and the British troops in Egypt occupied. The employment of a German force would only have been justified by there being some prospect of success. No such scruples would trouble the German military authorities in Constantinople, if the force employed were Turkish. The inclusion of a few German officers or gunners might be necessary to overcome Turkish reluctance; but the expedition as a whole would be regarded merely as a Turkish pawn in the game played by Germany.

While the strategy which prompted the attack on Egypt's eastern lines of defence will be universally condemned, it is difficult to refrain from admiring the Turco-German achievement in transporting a force of 14,000 men, well equipped with artillery, across the Peninsula. German scientific methods and powers of organisation were freely laid under contribution, and were backed up by the admirable qualities and staying power of the Turkish soldiery. Such a combination was worthy of a better cause. The expedition proved superior to the difficulties of the march; but was powerless to make any impression on the real defences of Egypt. Battle was joined over a front of from seven to eight miles in the neighbourhood of Romani and Katia, and the Turkish frontal attack lasted the whole day. The tactics of the British command appear to have been to allow the enemy to exhaust himself against our entrenchments, while encouraging his southern wing, engaged in a flanking movement, to penetrate into unfavourable ground. This manœuvre was entirely successful. Late in the evening of August 4 a counter-attack was made by all arms. The troops on the enemy's southern flank were the first to be involved in disaster, and here the earliest batches of prisoners were taken. By dawn on August 5 the retreat had become general, and the British forces were carrying out a vigorous pursuit, which was continued for eighteen miles. Over three thousand unwounded prisoners were taken, while the enemy's losses in killed and wounded are reported to be very heavy.

Eighteen months ago, when the Turks made their first attempt to reach the Suez Canal, the Egyptian scheme of defence was situated on the western bank. They were driven off—not before some of their number had actually reached the Canal, and a few had crossed it—and the raid collapsed; but no effort was made by the British command in Egypt to follow up the advantage. This time the British success has been won by pushing home the pursuit of the enemy as soon as his attack on the entrenchments had failed. For the alteration in its whole scheme of defence, which rendered the pursuit possible, Egypt is indebted to the late Lord Kitchener. On the occasion of his hurried visit to the Eastern Mediterranean in November, 1915, he found that no steps had been taken to improve upon the system which left the Suez Canal continually exposed to enemy raids. He insisted that the troops had been sent to Egypt to protect the Canal, and that the Canal was not there to protect the troops. The work of fortifying the eastern bank was at once begun, and was carried out, as the world knows, with stupendous energy. Under the capable command of General Sir Archibald Murray the network of defences was extended and elaborated. Strong entrenchments were constructed, advanced posts occupied, roads and railways were built, and pipe lines carried into the desert. The result has been that not only is Egypt more securely held, but it requires a smaller number of troops for the purpose. True, in the interval since February, 1915, the efficiency of the garrison has been enormously increased. What were comparatively untrained men in those days have now all the confidence of veterans, as the enemy has good reason to know. In last week's battle they fought well, and were well handled. No room has been left to the Turks to suppose that, with slight modifications or amplifications of their arrangements, any further attempt on Egypt will stand the least chance of success. Herein lies the chief significance of the Battle of Katia. A comparatively small Turkish force has been routed, and there can be no question of the British following up the victory in such a way as to compel the Turks to modify their main dispositions. But General Murray has not only carried out his task of defending Egypt; he has also shown the advantage of thorough and painstaking organisation—a lesson which has yet to be learned, it is to be feared, in Mesopotamia.

TO OUR READERS.

THE NEAR EAST is published on Friday, and copies are obtainable at any London bookstall early in the morning, and in the Provinces in the afternoon, of that day. To prevent disappointment, readers would assist us very much if they would place a standing order with their newsagent or railway bookstall for the supply of the paper every week. Any newsagent or railway bookstall clerk can, however, obtain copies at a few hours' notice if they have temporarily run out of stock; or we will post THE NEAR EAST for delivery on Friday morning, to any address, on the following terms, post free:—

12 MONTHS, £1; 6 MONTHS, 11s.; 3 MONTHS, 6s.

Abroad THE NEAR EAST is obtainable at any of the following agencies:—

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CAIRO. Cairo Express Agency, near Shepheard's Hotel; The British Library, Sharia Kasr-el-Nil; and at Railway Bookstalls.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha; Librairie Cauro, Rue Cherif Pasha; J. Eugenides and Co., 12, Rue Cherif Pasha; Main Station Bookstall.

PORT SAID. Charles Evans, and on board vessels in the harbour.

KHARTOUM. Sudan Stationery and Bookstore.

CYPRUS. Cababe and Wilson, Nicosia.

SALONIKA. Librairie Française, Rue Sabri Pasha, and Vafiade and Co.

ATHENS. Librairie Th. Vafiades.

BUCHAREST. No. 1, Strada Academiei, and Soseo and Company, Calea Victoria.

CALCUTTA. 1, Royal Exchange Place.

NEW YORK. Office of "The New Armenia," Flat Iron Building.

PROBLEMS OF THE SUDAN.

I.—DIVERSITY OF POPULATION.

(By Our Khartoum Correspondent.)

The rapid recovery of the Sudan from a state of chaos and utter poverty to a position small but distinct in the commercial world has been as striking as the changes in administration and security within its borders. To the stranger, however, or to one who has but travelled to Khartoum by the train, many of the chief difficulties that have stood in the way of development do not directly present themselves: from the map it appears that the Nile flows through the length of the land, just as it does in Egypt, whilst the presence of tributaries such as do not exist in Egypt, *prima facie*, merely repeats in the case of each tributary the conditions of the Nile itself. Actually, however, the whole Sudan presents a series of problems very different from those in Egypt, the reasons for which are due partly to climate, soil and latitude, partly to distribution and the customs of the population. The diversity of the Sudan is very great, and an examination of the provinces separately is instructive in showing this.

Starting at the north: half a province is inhabited almost entirely by Berberines, who are employed as servants in the Sudan and Egypt. The river has cut so deep into the land that the water for purposes of cultivation has to be lifted an inordinate distance, and the wealth of the population, if it can be called wealth, lies in the endless lines of palm trees that skirt the river bank. The male population absent on service supports the women and children and old men living at home by doles from wages, assisted by the profits obtained from the dates. The people, owing to their contact as servants with the outer world, are for the most part extremely sophisticated, but their ideals are those that they have acquired in Egypt, with a not wholly pleasing veneer of "flunkeyism," and they have just the touch of fanaticism that makes them tenacious of their own views, whether the subject in true fact concerns their faith or not.

In Dongola Province the northern part is inhabited largely by Berberines, but of a different kind. They speak one or more of the Berberine dialects besides Arabic—in fact, many of the women know no Arabic—but their life is spent not in service but on the soil. In good years, when the river is kind, when locusts and other pests are absent, and cattle are many, they obtain a winter crop of wheat or barley, a summer crop of millet or maize, and a flood crop of the same, with alternations of beans and other things. They may also get a basin crop from land flooded the previous high Nile, requiring but to be ploughed and sown to bring a magnificent return. Thus the Dongolawi is primarily a hard-working cultivator with constant employment on his land.

In the past, as is evidenced by the remains of many Christian churches, he was a Christian, but has lost all but a few vague traces of the faith, and is inclined to be bigoted and violent in word if not in deed on questions which he thinks pertain to Islam. The southern part of the province is held chiefly by Shaigia Arabs, good cultivators, sailors and steady workmen. The quasi-nomad Arabs who graze their animals in the country parallel to the river are largely dependent on the riverein population, for whom they tend their date trees or work for wage or share.

In Berber Province the same conditions of life that hold in Dongola apply, but the population is almost entirely Arab and Sudanese. The nomad Arab is more numerous and influential than in the northern provinces, and, having his own resources of food supply, is not dependent on the river population. The Atbara, too, that looks, and is, an imposing flood when at its height, dwindles to nothing and would leave the perennial cultivator idle; so that the nomad has its banks of rich grazing land for his animals undisturbed, whilst he gets enough rain in the southern part of the province to grow what he needs of millet to feed himself and his family.

Khartoum, a small province in itself, is complicated by the three towns, Khartoum, Khartoum North and Omdurman. The first is practically European and the official centre, the last is the native capital, with a large population dependent on business of markets and commerce for their living. From Omdurman go out numbers of small pedlars to wander throughout the Sudan with their wares and all the latest news; and there is an urban population quite distinct in its way from the cultivating class or the quasi-nomad, though all are inextricably confused in blood and relationship.

Roughly speaking, from Khartoum northwards the country depends upon the river, the population is practically limited to the river bank, and there is little or no rain. South of Khartoum the contrary holds: the villages are scattered far and wide, and the people rely on their rain crops, using the river if they happen to live upon it for special crops of fruit trees, or cotton, or vegetables.

In the Blue Nile Province, which occupies the greater part of the Gezira, rests one of the great hopes of the future in the Sudan—an endless flat plain, unbroken till the horizon is lost in mirage, in which it is hard to find a stone to throw at a dog; all good, rich soil, if the water is available. Till the schemes for the development of irrigation mature the land depends on rain, and enormous crops of millet of various sorts can be raised if the rains fall fortunately. The people who cultivate were mostly followers of the Mahdi, and in some parts are extremely fanatical. The land has all been "settled," i.e., mapped, demarcated and allotted to its owner, if such there be.

The northern part of Sennar Province is similar to the Blue Nile, but being further south its rain supply is more constant. The waters of the Dindes and the Rahad also make easy settling places for new villages. The population is widely mixed: Arabs of the riverein tribes, Baggara left over from Omdurman after the expedition, Fellata (Western people from the region of Chad and elsewhere), and blacks of various sorts, all have their settlements. The country is not merely agricultural, but supports considerable numbers of camels in the North and cattle to the South, which move North to avoid the tsetse fly in the rains and return to the rich grazing in winter, when the northern pools are dry.

The White Nile Province, east of the river, similar in many respects to the Blue Nile, on the west of the Nile, approximates rather to Kordofan.

It will be seen that in the provinces directly on the Nile and its tributaries considerable diversity exists. In the North complete dependence on the river, in the South relative independence. In the North a non-Arabic race much influenced by Egypt, in the South a mixed population largely Arab and Sudanese, many of them long under the influence of the Mahdi, and knowing no other religious rule.

Once away from the river a new set of conditions arises. The development of the land depends upon water supply, which is, except for a few fair-sized towns, limited in amount, though fairly widely scattered. Thus, except for great expanses of dry and apparently worthless desert, the whole country is dotted with villages, each with its cultivation and grazing ground, and, when the trees grow, its gum gardens. Here the natives vary from the purely sedentary to the purely nomad, the former clinging to their stores of water and grain and knowing no other home, till the wealth they acquire in animals compels them, both by long habit and by inclination, to spend at least part of the year travelling from grazing ground to grazing ground with the animals, until they develop into nomad or quasi-nomad people. This habit maintains a spirit of independence and conservatism, attractive in itself, yet bound up with much that is antagonistic to true development. The place of the small boy or girl is not at school but herding the goats; learning is the luxury of the few; the ancient custom is the true law, whatever may be the ruling of the Government, and above all is Allah—and the fatalism that refuses all help. Thus, in Kordofan and Kassala, parts of Sennar and Berber, and the greater part of the Red Sea Province there is a pronounced difference of ideal from the riverein people tied to their plots of land, whose life is bounded by the prospects of the harvest and the price of grain. In these provinces, more especially in Kordofan, grows the gum that is one of the chief staples of Sudan trade; and this adds more riches whilst it does not tie the inhabitants to the soil.

In the northern half of the Sudan the final contrast is in the towns of Port Sudan and Suakin and the settlement of Tokar. Port Sudan is the youngest, as Suakin is, perhaps, the oldest, of all the Red Sea ports. In both is a population dependent almost entirely upon business and commerce, but whilst the former deals with the modern trade and the modern markets, the latter still thrives under considerable disabilities in the business it has maintained for 2,000 years and more. The population is "sui generis," speaking a polyglot dialect of its own, and the ancient town on its picturesque island is a replica of its own spirit. At Tokar is the chief and most successful cotton-growing centre of the Sudan. Everything turns upon cotton, and the population is of every sort, having but one thing in common, a knowledge of some item in the production of cotton and its sale.

Thus, apart from a riverein population, itself divided, there is a most distinct population of the wider areas varying from true nomads to purely sedentary people, whilst a considerable people of variously special interests thrives along the Red Sea coast. Grain, cattle and camels, gum and hides claim the attention of some, pearl fishing and cotton, sesame and dom nuts of others. The population may be divided almost endlessly, and always brings a result of conflicting interests or sharply divided ways of life and thought.

South of latitude 12 deg., moreover, a new country is opened up. Here the Arab is a stranger, driven only by stress of drought or grazing needs, or seeking his profit as a trader. The real inhabitant is the black—and the black is subdivided into many different types. In the Nuba Mountains there are a number of dialects, but even

Digitized by Google

on the roughest subdivision there are the short sturdy black and the big-boned tall black. They live on the hills ready at a moment's notice to take refuge in their caves, yet for the most part are contented to grow large quantities of inferior red millet and tobacco, and breed their little cattle, merely maintaining a blood feud here and there for the interest and variety of life. The Shilluk of the Upper Nile is quite distinct, shy, too, but not so expansive as the Nuba is when encouraged. The Dinka, again, widely scattered, extends over different parts of the Upper Nile, Bahr el Ghazal and Mongalla provinces. He has his code of law and his religion, and seems in many ways to be above the standard of his neighbours. Still further south the tribes are numberless, some of them only recently in touch with Government, so remote are they from any administrative centre. The Azande, almost the only artistic people in the Sudan, the Beirs, the Bongo—the names could be added to indefinitely—all these have their customs, and to administer them requires special knowledge. Yet in amongst them the traders of the North bring new ideas or old ideas refurbished for their unsophisticated minds. Trade relations make an unending chain from the civilised centres to the remote villages of savages, and the code that binds the pedlar to his merchant chief must cover the same pedlar when he barters his wares for whatever he may find for profit amongst the naked negroes of Central Africa.

Such diversity involves a thousand difficulties, not only in the law, which must respect local custom and local faith, but in administration, in coinage, in language, in almost every circumstance of life. A system of land tenure that may seem equable in the North may lead to revolt in the South; too clear a definition of status in the South may be acutely resented in the North. The system of barter has to work side by side with the modern exigencies of exchange; whilst the question of labour is as difficult as in the most modern States.

Thus it may be seen that the chief difficulty of the Sudan is its immense diversity, its infinite variety. Historically its troubles have been due to religion, administratively to difficulties of finance, strategically to the ardours of its climate and its droughts, and, finally, all these are complicated by the difference within the Sudan of the people, the climate and the soil.

THE LEGEND OF GHIUL-BAHAR.

(From Our Bucharest Correspondent.)

The *Journal des Balkans* recounts a pretty legend associated with the history of the beautiful "Imaret" Mosque in the city of Trebizond.

A Sultan was once upon a time riding through the village of Liveras. Attracted by the pastoral tranquillity of the spot he decided to rest there a little while. Dismounting from his horse he seated himself beside a spring, and while taking count of the surroundings his gaze fell upon a maiden of great beauty. She was Marie, the daughter of the village priest, and tended her father's flock. Struck by her great beauty, the Sultan called her to him, and handing her his goblet of gold, requested her to fill it at the spring. She readily complied, and returned the cup with a graceful gesture, her thumb, however, dipping into its contents. The Sultan drew her attention to this, and pouring out the water bade her refill the goblet. This she did, and offered it once more, but this time there were blades of grass on the surface of the water. Whereupon the Sultan grew wroth, and would have scolded her. But Marie, bold and yet respectful, observed that the spring water was cold as ice, and that if he had drunk of it while he was hot he might have fallen ill. In order to gain time she had resorted to the little stratagems that had provoked his displeasure, but now that there was no more danger she would bring him the cup filled with pure water.

Captivated by such considerate forethought, by the modest and yet dignified ways of the maiden, and by her surpassing beauty, the Sultan caused her father to be summoned, and asked for her hand, a request to which the father eagerly consented.

The Sultan named her Ghiul-Bahar—Spring-flower—and wedded her in Constantinople. Later on she became the mother of the Sultan's heir, and acquired great power and influence, which she used in favour of the Christians. But after a time she fell into disgrace, and retired with her son to Trebizond, where she lived the rest of her days, educating her child and enjoying all the dignities of a queen-mother. On her death her body was laid to rest in the mosque at Imaret.

The authenticity of this tale has been contested, but among the Christians the tradition is said to receive wide credence.

PASSPORTS FOR SALONIKA.

The Secretary of the War Office announces that all persons wishing to proceed to Salonika must have on their passports the *visa* of the Anglo-French Bureau de Contrôle at Athens. Travellers who fail to do so will not be allowed to land at Salonika. Persons wishing to proceed to Salonika from Great Britain must also obtain a permit from the Military Permit Office, 19, Bedford Square, and should apply for the permit at least sixteen days before the date of their proposed departure from the United Kingdom.

EGYPT'S NEW COINAGE.

Below we give reproductions (the first to be published) of the designs for the new Egyptian coinage, which were described in The Near East of June 9 last. The illustrations are the actual size of the coins:—

THE PRESS ON THE NEAR EAST

The Balkans and the War.

The following paragraph is taken from a survey of the "Two Years of War" contributed by Professor A. F. Pollard to the *Daily Chronicle* (August 4):—

The Balkan campaign will probably appear to the future historian the climax of German success in the great war. It was rendered possible, not by the failure of our diplomacy, but by our military failure at the Dardanelles and the Russian retreat from the Vistula and the Bug. The work was not achieved, and probably could not have been achieved, by German and Austrian arms alone: the decisive factor was Bulgaria, whose desires fathered her conviction that the Central Empires were the winning horse. The Balkan dynasties (with the exception of the Serbian, the only native royal family in the peninsula) are very German in their realpolitik, and in their contempt for popular government; and Greece was nearly forced by the German field-marshal on its throne to follow the example of Bulgaria and join its secular enemies against its natural friends. The Allies' demands for the complete demobilisation of Greece indicates the seriousness of the situation. Greece was kept under arms throughout the winter and spring not, as events have shown, to defend Greek soil against Bulgarian invaders, but to take advantage of the Allies should they advance from Salonica. Rumania's foreign policy has, perhaps, been more skilful than that of any other country during this war. A greater Bulgaria at the disposal of the Central Empires would be fatal to Rumania's freedom; but, as things stood last autumn, she could not afford to intervene without courting the fate of Belgium. Intervention might have been magnificent, but it would have meant destruction rather than war.

Political Considerations.

In a second article (August 5) Professor Pollard emphasises the importance of the Russian campaign in Armenia from the political point of view, and touches on the Mesopotamia campaign also:—

Mr. Churchill has said that our expedition to Salonica was a political rather than a military demonstration; and the Russian campaign in Armenia may be of a similar character. Even Erzingan is five times farther from the Bosphorus than from the Russian frontier, and the conquest of Asia Minor is a lengthy and expensive method of achieving the purely military object of cancelling the Turkish contribution to the strength of our enemies' forces. The plan is the political one of settling the fate of Armenia and the southern coast of the Black Sea before Germany is defeated, instead of prolonging operations after the main issue is decided or leaving the question to the chances of argument at a Congress of Peace. The same may be said of the torrid zone of Mesopotamia, the fate of which should be determined by an autumn and winter campaign following on the Russian summer campaign in the cool highlands of Armenia. Politics and war cannot, however, be pursued in separate compartments, and these primarily political successes would have also a military value. The effect on the moral of the Central Empires and the Balkans would be considerable, and there would, further, be the military result that Turkey would be unable to render any assistance to her Bulgarian ally.

The Armenian campaign is thus improving the prospects in the Balkans by weakening the hostile forces which might be brought into the field, and by the impression it makes on Greek and Rumanian public opinion; and the offensive from Salonica is dependent upon these factors.

To Mislead Moslems.

Writing from Berne, Mr. Julian Grande gives in the *Daily Graphic* (August 2) some astonishing facts regarding Germany's propagandist activities in Moslem lands. After remarking that he is assured from a perfectly trustworthy source "that her budget for propaganda in Switzerland alone for the last two years has amounted to 2,000,000 marks, which does not surprise us," he proceeds:—

I have no means of knowing what she has expended upon propaganda in Mohammedan lands, but it must be also a considerable sum, for, according to one of our Egyptian fellow-subjects, Mr. Aly El-Ghaiaty, she has, to his certain knowledge, published and circulated in these countries seventy-two different pamphlets, and, of course, there may be others which he has not succeeded in discovering.

The pamphlets are published in a variety of languages, principally Turkish, Arabic, Persian, Tartar, Hindustani, Chinese, and modern Sanskrit. Some of these productions bear on their covers the statement that they were printed in Paris or London; but most ostensibly proceed from Zurich, Rio de Janeiro, or some neutral European capital. Some are illustrated, some actually printed on art paper, while in order the better to impress the Arabs and Persians in particular, the writers of pamphlets intended for them have blossomed forth into poetry.

As for the contents of these precious productions, they may be judged from some of their titles: "A Verdict on England," printed in Berlin; "British Atrocities," "Russian Cruelties," "French Lies," and "French Intrigues against Islam." The so-called Young Egyptians, or Egyptian Nationalists, who idle about the lake promenade in Geneva, and who are not, as a rule, true Egyptians at all, but Levantines and nondescripts generally, have, of course, been pressed into the service. If those for whom these pamphlets are destined could but see the individuals whom Germany has employed for their writing, they would scarcely be edified. Nowhere are these "Young Egyptians" looked upon with more contempt than in their headquarters, Geneva, where no serious newspaper will have anything to do either with them or with their silly resolutions.

The unfortunate thing is that those whom the pamphlets are designed to mislead cannot, as a rule, see their writers!

"Sufferings in Mesopotamia."

Under the above heading, *The Times* last Friday published "an impartial review of the question of the sick and wounded in Mesopotamia." The principal cause of avoidable suffering among the troops in Mesopotamia is, says the writer, the inadequacy of the transport service.

This could hardly have been worse, and although improvements are now being made, trustworthy information suggests that the difficulties can never be effectively overcome until railways have been constructed between Basra and the front. The Tigris is so tortuous, the current is so swift, and there is so great a difference in the level between flood tide and low water, that the river can never become a proper line of communication for large forces. Before a railway can be made it will be necessary to lay a causeway. It is understood that a scheme for such an undertaking has now been passed, but the decision comes late in the day and after an amount of suffering for which someone must be brought to account.

As to some of the complaints made, we read:—

It is quite true that too much importance should not be attached to some of the complaints which have come from Mesopotamia. Allowance must be made for the inevitable contrast between conditions in France—where the men are exceptionally well cared for—and conditions in a desert land. The standard of comfort achieved in France is impossible in Mesopotamia. Most of the men recognised this, and have borne hardships and suffering cheerfully. The loudest grumblers are generally those who have done the least and suffered the least. But the fact remains that if there had been sufficient ambulance transport by land and water the wounded could have been brought to Basra under decent conditions, and the troops would also have received their proper scale of rations.

Happily there is a change for the better in regard to the whole deplorable business:—

Recent reports show that with the help of the Joint Committee of the British Red Cross Society and the Order of St. John the tangle is being gradually straightened out. The Joint Committee offered to help twelve months ago, but beyond being asked to supply two motor-boats they were not allowed to do anything. The change for the better began in the spring, and arrangements for dealing with the wounded in the battles of March and April were much in advance of those of the winter. The Joint Committee are now sending out thirty motor-boats for the conveyance of wounded men for a short distance on the river and to move hospital stores about. A river hospital boat—one of eight which are required—is also being provided. These hospital boats have to be specially built to suit the river. Failing the railway, they are essential. There is now a road between Basra and Amara which could be used for motor traffic in dry weather, but it is not always dry in Mesopotamia. In bad weather travelling by road becomes impossible because of the mud, which is agglutinous in its first stage and knee-deep and soft when the rains are heavy.

A Lesson for the Senussi.

In a short note on "Anglo-Italian Interests in Africa," the *Field*, of August 5, referring to the conclusion of an Anglo-Italian agreement regarding their interests in North Africa, says:—

The complete defeat of the force which invaded Western Egypt (on February 26) has been followed by shrewd blows against the Senussi tribesmen delivered by the Italians in Cyrenaica. No wonder that Sidi Ahmed, the Grand Sheikh of the Senussi, has been convinced that his short-lived alliance with the Turco-Germans was a mistake. There is abundant evidence to show that the Sheikh was only induced to enter into that alliance by the advent in Cyrenaica of Gaafer Pasha with a considerable number of men and munitions and a large store of treasure. The complete re-establishment of British and Italian control of the coast has now put an end to any prospect of further help from the Turks, and Sidi Ahmed has recently been in negotiation with General Ameglio, Governor of Cyrenaica and Tripoli, with the result that fighting has been suspended and an exchange of prisoners effected. Another result of the new attitude of the Senussi has been that the tribes in revolt in Tripoli, who are without political cohesion, have made overtures for peace. But to effect a lasting settlement of the question closer co-operation between Great Britain and Italy was essential, and this has been provided by the new agreement.

"Coming Events—"

On Monday *The Times* published an interesting article, headed "Tyranny of the Young Turks," from its correspondent in the Balkan Peninsula. The writer

Digitized by Google

states that the movement against Enver and the C.U.P. is rapidly gaining strength in Constantinople. He goes on to say:—

The Old Turk Party has latterly been reinforced by the clandestine adhesion of many important persons, who, while openly professing loyalty to the policy of the Young Turks, secretly favour the cause of the Entente, and steadily aim at the overthrow of Enver and his partisans. Their resolve to put an end to the present *régime* has been quickened by the prospect of the approaching ruin of Turkey.

For the present Enver remains master of the situation, but his opponents are working as best they are able against him and his clique. It is especially interesting to learn that—

The Ulema, with the Sheik-ul-Islam, stand aloof from the Government. They are much excited at the Arab revolt, which they attribute to Enver's pro-German policy and anti-Islamic tendencies. They sympathise with the Grand Sherif, who, they hope, will proclaim himself Caliph and obtain the recognition of the Moslem world. Such action would probably lead to momentous events in Constantinople. The dissentions among Young Turk coteries have latterly become more pronounced.

Baron Schenk's Activities.

The *Pall Mall Gazette* of August 7 contained an article entitled "Baron Schenk," by Mr. Crawfurd Price. The writer gives a lively, but quite trustworthy, account of the notorious propagandist's activities in Athens, and shows how—to give the Devil his due—he has succeeded in influencing Greek opinion. That the Baron is clever none could deny; that he is engaged on the dirtiest of dirty work, and does not hesitate to employ the lowest means of carrying out his orders, is equally certain. Mr. Price concludes his article with some painful truths:—

Those who doubt the value of propaganda need only study what the Germans have accomplished in Greece by that agency. A positive "funk" of Teuton prowess, a dread of war, a blind confidence in the monarchy, a hatred of Venizelos, a revolt against the Entente Powers, a desire to live and suffer and be left alone—all these have been dinned into Hellenic ears day after day by 75 per cent. of the Press, until there has been wrought a gigantic, if superficial, transformation. The results are self-evident. Last summer the Central Theatre produced an Entento-Venizelist revue; this season it stages the same framework, filled in with Germanophile tableaux and patter. A year ago the Bulgarian occupation of Rupel would have set the Greek nation aflame, but yesterday it was received with nothing more than a dull exhibition of painful discontent.

It is beside the point to suggest that we cannot stoop to similar methods. We are fighting a determined and unscrupulous foe, and just as we had to follow the German lead in the use of poison gas (a much more repulsive weapon), so we need not hesitate to copy the Teuton in the handling of public opinion. But half-hearted mediocrity will avail nothing. We have need in Athens of a Baron Schenk: a cleaner Schenk, if you like, but nevertheless one capable of pitting his tact, initiative, and organising ability against this clever by-product of Prussian militarism.

Concerning Armenia.

M. Dikran Kouyoumdjian contributes to the *New Age* (August 3) an article entitled "An Appeal to Sense," which is well worth reading. He points out, very truly, that—

Most of the sentimentalising about Armenia has been done by friends, and not by Armenians. For much of it an Armenian is grateful; for much of it, if he counts himself a man like other men, as well as an Armenian, he is not grateful. Most of the articles, pamphlets, and books I read of my countrymen seem to encourage the casual person to think of the Armenian as something like a beggar, with torn and tattered clothing, his eyes red with weeping, his hands stretched out supplicating every passer-by, a weak, helpless creature, without nationality, without self-respect. A little of this is true: an Armenian in Armenia is a symbol and a warning to all nations of the curse of nationality. Much of it, if not untrue, is perverted truth. In the wash of thoughtless sentimentality the casual person is allowed no other idea of the Armenian than that of the supplicating beggar; he scarcely knows what the Armenian is, and certainly does not know what he was, and soon he will be so bored with what he has been told that he really will not care. Therefore, it would be well to try and dispel a little of his ignorance, and to blow away the chaff of sentimentality, which is hysteria, from the grain of pity, which is human.

Unfortunately, lack of space prevents our attempting to do justice to the writer's attempts to "dispel a little of the casual person's ignorance." Much that he writes cannot fail to be painful reading for anyone who sympathises with the Armenian, but it is all more to the point than much that is written on the subject. Mr. Kouyoumdjian concludes:—

Armenia has had to contribute her share to the world's civilisation in scattered bits, as each Armenian settled in a different country, giving as well as he could and can to the collective progress what he has learned from centuries spent in such a country as his, and what he has learned after his short stay in the country of his adoption. For, after many centuries of ministering at the feet of history, the Armenian's greatest curse at the past is the lack of common sense, and his greatest claim on the future is an abundance of common sense. And if, as I hope at some future date, a generous Power, which has got more than it wants, makes a gift of Armenia to the Armenians—and a gift so long delayed can be given in no other spirit than "There, take your beastly country; I don't want it"—the Armenians should, by their long experience of watching and learning from the ebb and tide of the fortunes of whatever countries they have settled in, make a very good thing out of their own.

Students of War.

The services which professors and archæologists are rendering to the Allied cause, especially in the Near East, have been referred to on several occasions in our columns. All that we have said on the subject is amply borne out in an article in *The Times* (August 2), contributed by a correspondent in the Ægean, and headed "En Peau de Loup: Professors as Cattle-Lifters." The writer gives some most amusing examples of the learned ones' achievements in walks of life that must be distinctly strange to them. Apparently many of them have taken to a life of adventure as readily as a spaniel takes to the water; and clearly they are all "doing their bit" in a truly admirable way. Says the writer, after sketching the style of life of the conventional professor up to the outbreak of the war:—

Then very curious things happened, and the mortality among preconceived opinions and generally accepted theories was almost as heavy as among the Germans at Verdun—so nobody was really surprised and the Navy and the Army were almost ready to be polite when Professors with a following of Masters of Arts began to appear—chiefly in the Eastern Mediterranean—as interpreters or intelligence officers. Of course they were only Professors or Masters and not quite human, but many of them had been there before and spoke the languages of the local Turks and Dagoes. Presently it became obvious that the Professors were not above cocktails and knew some funny stories. Mess committees are now known to have been grateful to strange temporary R.N.V.R officers, subject to seasickness, for the introduction of little-known but pleasant and inexpensive wines, and even admirals and generals began to realise that the bearded and bespectacled scholars, who, if not checked in time, would dilate upon incidents of local politics which had happened two or three thousand years before, were also capable of examining current reports from agents in enemy countries, and dealing with the minor emergencies of a polyglot War.

These suddenly uprooted scholars, we are told, do not lack episode and variety in their share of the strife:—

Think of the pleasure of the poor scholar—a mere child in the affairs of this world—who by patient argument in three languages obtained for £16 a receipt in full from an avaricious Greek who sought 16,000 drachmæ of compensation for damage done to him by a British ship. Picture the delight of that other archæologist—a blind-alley occupation tending to warp the intellect—who became famous for his consistent firmness in a very difficult administrative post when he infuriated a local Orthodox prelate (by the constant detection and frustration of archiepiscopal swindles) into threatening a British admiral with being reported as a persecutor of the Church to—the Archbishop of Canterbury.

After referring to "that other professor, who for months interpreted the oracles of the Athenian Press for the benefit of our forces in Salonika, and found that the pure fount of prophecy is defiled in the very shadow of the Parthenon by barbarian gold in a manner quite unknown to the Pythia of Delphi," and who, "later, wrestled with the innate Byzantinism of the modern Hellene," the writer presents us with one more picture from the life:—

Lastly we come to an absolute triumph of atavism in the shape of a professor of archæology who turns from the rapt contemplation of a Mycenæan pattern on a modern island water-jar to maintain the diplomatic equilibrium with an ally or perpetrate one of those cattle-lifting expeditions against the coast of Anatolia which have alike made his name famous as the Black Beard of the Ægean and provided H.M. ships with many a welcome head of stolen cow or sheep. This modern border scourge, who was once a model Proctor of Oxford University, has developed under the fierce heat of War into a trusted leader of Komitadjis, who by his atavistic prowess, inherited probably from Galloway or Northumbria moss-troopers, has stopped many thousand Turkish beasts from being sent to Berlin for German consumption by the simple process of capturing them for the benefit of our own people.

Articles to Note.

"Photographed from an Aeroplane: Soldiers' Gardens Round Salonica," in the *Field* (August 5).

"The Sultan and the Khalifate" (Letter to the Editor from Mr. W. B. Stevenson), in the *Nation* (August 5).

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

I hear from Bucharest that the Banca Romanesca has done exceedingly well recently. When it increased its capital to 60,000,000 lei the other day, the sum asked for was subscribed three times over. The bank has just bought the Austrian interest in Fernic's Chantier Navale, and has also acquired land near the river at Braila, where it is intended to erect works for lighter-building. It is even said that the Société Maritime Roumain Fleet will be taken over, as well as that of the Navigation Fluviale. Flour mills, a macaroni factory, and a tannery at Constantza are also spoken of. Capitalists have a great deal of money at their disposal just now, as a lot of money has entered the country and very little has left. The shares of the bank, by the way, reached the level of 790 francs during the boom in June. Recently there has been a deal of profit-taking, however, and the price a few weeks ago stood at about 650 francs. Another indication of the prosperity of the bank is that the new 500-franc shares were issued at 600 francs.

***

There is more to be said about the neglect of British interests in the Balkan States, particularly in Roumania, where the French are as guilty in this respect as we are. Reports that reach me go to show that we spend too much time in mere talk, while the Huns are busy in more practical ways. The Germans even now are flooding the country with their goods, and unless prompt steps are taken it will be too late to recover lost ground "after the war." The Germans have initiated a regular campaign to monopolise trade in many directions, and, I am told, are assisted very whole-heartedly by the Jews, whose sympathies are almost without exception entirely German. I am told that our friends in the Balkans are desperately grieved at our neglect, and it is time that the Board of Trade and the Foreign Office threw themselves into the fray. The commercial situation out there is dangerous, and the time to act is now.

***

The German trade campaign overseas, even now, is strenuous and unceasing. "Our merchants, principals and employees, unable to return home, have settled in American ports, *where they are making themselves as useful as possible*," a well-known German paper wrote a few days ago. "China, the United States, and South America are the principal fields of their new commercial activities. They have succeeded with remarkable skill in adapting themselves to their new conditions. German firms in South America, after the cessation of the arrival of German goods, are working for native firms or for account of neutral firms. England's attempts to prevent this have been mostly ineffective. The organisation of German trade overseas stands as firmly as ever, and the German business world abroad looks with all confidence to the period after the war." Ask honest men in Greece and Roumania, and they will tell the same story.

***

I should like to invite attention to a special article that appears in this issue of THE NEAR EAST, in which British trade in Mesopotamia is reviewed. The writer has spent the best part of a long life in Baghdad, and knows his subject as thoroughly as a man could. His reference to the great services rendered to the British cause by the merchants of Baghdad opens up the question as to what has become of the businesses they developed with much strenuous effort and unflagging energy, often in the teeth of obstruction and corrupt practices on the part of the Turkish officials. I am afraid that our friends, a number of whom are interned in various Turkish towns, have suffered much loss, and I think the point ought to be represented to the Government concerned in the matter—the British, I presume. Mr. Bonar Law is the man to deal with this very deserving question, and there ought to be sufficient influence somewhere to induce him to take it into consideration.

***

In connection with my recent comments on the report of the North-German Lloyd, which was issued some weeks ago in Hamburg, it is interesting to note that the Austrian Lloyd and its daughter company, the Austro-Americana, held their annual meetings of shareholders at Trieste towards the end of July, and show a combined loss for the year 1915 of 16 million kronen (about £650,000). It is doubtful if the companies will ever recover from the shock—nor is it necessary that they should, considering that both are controlled by the German shipping combine (N.D.L. and Hamburg-Amerika), and are subservient in the matter of policy. The inner history of how the Ballin—*i.e.*, Prussian shipping—group obtained control of the Austrian steamship lines is one of the most flagrant instances on record of Hunnish bribery, corruption, and illegal financial and political manipulation. The national interests of Austria, both as regards shipping and emigration, were openly flouted by the Prussians and their paid tools in Vienna; besides, in all "pool" questions the Austrian Lloyd was compelled to play Ballin's shady games, as proof of which the C.P.R. persecution three years ago can be taken as a striking example. This reminds me of a subject that has not yet been seriously discussed in shipping circles—namely, the future of that ignoble German "pool" to which we had in many cases to submit.

***

The "pool," as it existed in pre-war days, must not be permitted to be resumed after the war. If there is to be any dictation at all, it must emanate from the Grand Alliance, and the share allotted to Germany must be as a crumb falling from the rich man's table. Let us not forget this—as for the Austrian Lloyd, let it work out its own salvation as a tool in Ballin's wasted hand, or as an independent company dependent on our good-will. Certainly it should never be allowed to re-acquire in the Eastern Mediterranean that privileged position which enabled it to convey to and from Egypt yearly, viâ Trieste, many of our most prominent Anglo-Egyptian officials, including Lord Kitchener and, I believe, Sir Reginald Wingate. This honour must in future be reserved for British (or Allied) ships, and if the shortest route home from Alexandria continues viâ Trieste (it may be diverted to the Piræus), I hope some British company will command it, even at a temporary financial sacrifice.

***

I do not think that sufficient notice has been taken of the fact that at least one-third of the Egyptian cotton crop has in previous years been handled by enemy firms, backed by German financial concerns. These firms, such as Lindemann, for instance, have been, or are being, wound up under official supervision, thus creating a void which will have to be filled up somehow or other. It is true that a number of Greek firms have sprung up to replace the late unlamented, but neither are they in a financial position to handle the crop satisfactorily, nor is it to our advantage that the greatest of all Egypt's trade assets should continue in foreign hands. Not that any serious objection can be taken to Greek participation in moving the crop, except that it is easier for Germany and Austria to be supplied through a neutral Greece with the cotton they may require—to British, particularly Lancashire, loss — than through a British firm. If we are to maintain and consolidate our cotton industry, we must command the handling of the entire Egyptian crop and be in a position to dispose of it according to our liking. Any other procedure on our part would be contrary to the spirit of the Paris Trade Conference. And it can only be done by the promotion of British companies, with sufficient financial backing, to move that part of the crop hitherto in enemy handling.

***

Moreover, the crop is not a stationary one. It increases, if not steadily at least progressively, decade after decade, and as it does, so must its handling by British firms increase. After the war, and when the industrial situation becomes normal again, the world's demand for cotton goods will augment considerably. This will be to our advantage if we take the necessary steps now to prevent the Huns from importing Egyptian cotton *ad libitum*. The long staple of the Egyptian boll is vital to many branches of the cotton industry, and if we wish to control the latter we must control the handling of the raw material. This will entail, let me assure my readers, no sacrifice on our part. The investment is a sound one, otherwise, surely, the astute Greek merchant would not jump at the opportunity thrown at him by the wise liquidation of enemy cotton brokers.

***

While on the subject of Egyptian cotton, I cannot refrain from referring to a message sent to his paper by the Cairo correspondent of *The Times*, to the effect that the Egyptian Ministry of Public Works is studying a project destined to give a free flow of water to certain districts in Lower Egypt where at present lifting engines are indispensable. The idea is to fit movable gates to existing dams, and the result will be not only a saving of expense in coal to landowners of £1,500,000 per annum, but an enhancement in the value of their land. If, as is to be presumed, the enhancement in value is based on productiveness of the soil and not merely on speculation, it means an increase in the output, or, in other words, a larger crop. I hope that it will be so.

COMMENTATOR.

Romance of British Trade in Mesopotamia.

All eyes have turned recently to the vast territories at the head of the Persian Gulf beyond the waterway of the Shatt-el-Arab, which for some all-British reason we have dubbed Mesopotamia. The area between Busreh and Baghdad is not Mesopotamia as a matter of fact; but the name may serve for the present.

The British commercial exploitation began with a concession granted by the Ottoman Government to the British Government—strictly speaking, the result of the Euphrates expedition. Under it the old Indian Navy maintained two gunboats on the Euphrates rivers, which term embraced the Euphrates and Tigris, although mention of the Tigris was for some reason omitted, and navigation was permitted to these British vessels as far up as Baghdad. Between 1840 and 1850 Lieutenant Henry Blosse Lynch, an officer in the Indian Navy, who had taken part in Chesney's Euphrates expedition (in 1836-37), induced his two younger brothers to proceed to Baghdad, and there to open up trade. Mr. (afterwards Sir William) Mackinnon, the founder of the British India Steam Navigation Company, inaugurated an occasional steamer service between Bombay and Bushire, which was later extended to Busreh; but there were no direct sailings to or from Europe, and when Mr. Thomas Kerr Lynch first went to Baghdad the little trade that was done directly with India was carried on by means of native sailing craft.

First British Steamers.

When Messrs. Lynch began work at Baghdad they imported their merchandise from England by the old "windjammer" route viâ the Cape. There were two arrivals a year on the average, and each vessel was met at Busreh, where all her cargo was transhipped into country craft, and, when all was ready, a long winding procession set out on the journey up-stream to the City of the Khalifs. Changes were made in course of time; as trade improved, efforts had to be made to cope with its growing volume, and so it came about that the concession which had been enjoyed for so many years by the British Government was transferred to Messrs. Lynch Brothers, and this was the beginning of the Euphrates and Tigris Steam Navigation Company, a shipping concern only less well-known than their more powerful friends, the British India S.N. Co. Since the war with Turkey began the vessels of this company have rendered great service to the Military Transport Department in the carrying of troops and munitions of war and other stores.

The first British steamer to run on the Tigris was the City of London, a little vessel capable of carrying about 120 tons of cargo. She was followed by the Dijleh, a slightly larger vessel, and for some years these steamers were able to cope with all the trade that offered, which, by the way, was shared by Turkish Government vessels on the rivers. The Dijleh was mysteriously wrecked near Bagdadieh, a small river village not far from Azizieh, which town, it will be remembered, British troops occupied early in the Mesopotamia campaign. The Blosse Lynch and the Khalifah, the former capable of carrying from 200 to 250 tons and the latter a little more, followed each other in quick succession, and shortly afterwards the City of London, which had, in the meantime, been chartered by the Indian Government as a consular despatch boat, was lost while under the command of an officer of the Royal Indian Marine. The next vessel to make her appearance was the Mejidieh, the largest steamer yet placed on the river, with a cargo capacity of about 350 tons.

In about 1884 the relations between the British and Ottoman Governments underwent a change, and one of the results of this was the pretended discovery by the wily Turks that something was wrong with the concession under which British river trade had been permitted to develop. They declared that it was not of the character of a *firman*, and it did not mention specifically that the river Tigris was made free to British navigation. At the same time the document allowed for the sailing of the vessels up to Baghdad, and, since it was obviously impossible for them to proceed to that city across country, the free passage of the Tigris was fairly and reasonably assumed, and for a large number of years had been permitted without protest. The local authorities professed not to take this view, however, and caused the sailings of the vessels to be suspended for some weeks. Eventually, the authorities at Constantinople allowed themselves to be persuaded that the British reading of the concession was right, and that the provincial authorities in Baghdad were wrong. There is no reason to doubt that this temporary trouble was engineered in Baghdad without reference to the supreme Government at Constantinople. And it can be explained easily. While the better class of natives, including the merchants, recognised the advantages which the population of the entire country were deriving from a well-regulated steamer service, the rabble clamoured vehemently and incessantly for its discontinuance. They were incited to this by the Moolah class, always influential, who in their turn were "influenced" by the local representatives of other foreign countries intensely jealous of the exclusive British privilege of trade and navigation on the river.

Old-time Prestige.

Before this occurrence there had been very little trouble with the Turkish Government in Mesopotamia. So far back as the year 1800 the word of the British Consul-General had been supreme. His wishes were consulted, his counsel was sought, and if the British Government of that and succeeding times had utilised all the opportunities that were presented the British name and position would have been placed on a level of unassailable security. We complain of official apathy in these days, and with very good reason; but apathy would appear to be a chronic British malady. Very many of the opportunities which our forbears in trade-making had worked so strenuously to develop were regarded by the official mind as being of little account, and it was left largely to chance, and to the enterprise of private individuals, to make good in their own way. We may be thankful that their way was sound.

It was not so with our rivals, however. No opportunity was allowed to pass. Not only did they realise what the vast possibilities for profitable trade were, but they adopted the same pushful methods which we know so well to-day—methods which we abuse with one breath and yearn for with the next. Consulates were established in Baghdad, propaganda work was begun—not only to push their own interests, but also to undermine the British position. Intrigue was initiated, and gained strength as the years went on; and there is reason to believe that the troubles of 1884 really began in this movement. It is certain that the predominance enjoyed by the Germans in more recent times had its beginning then, the early apostles of "kultur" in the East being loyally and ably supported by their friends and brethren in Europe. Which is a reason why, when the war is over, and we have cleared away all the international debris which now hampers our path, we must not allow the same thing to happen again. Since 1884 there has been steady deterioration in Anglo-Turkish relations, which has shown itself progressively in the imposition of petty restrictions and annoying regulations, obviously framed for the purpose of causing trouble and creating difficulties. The influence of our consular officers has declined steadily, and this unhappy loss of prestige has culminated in the German, temporarily at any rate, coming out on top with the Turk.

When the river steamers were again permitted to run trade increased rapidly. The Baghdad route had by this time become the principal one for trade into Persia. Direct lines of steamers from Europe had been established, the first vessel to make the round passage being the Mesopotamia, a steamer of about 1,500 tons, owned by Messrs. Lynch Brothers. She made the first trip in about 1870, and continued to trade regularly between London and Busreh until she was wrecked off the coast of Portugal in 1878. The British India Company, which had a fortnightly, afterwards turned into a weekly, service between Bombay and Busreh, had also started a monthly service between London and the Gulf; and the Persian Gulf Steamship Company, controlled by Messrs. Jones, Price and Co., was running regular boats to the United Kingdom. Then came the Anglo-Arabian Steamship Company, which was controlled by Messrs. F. C. Strick and Co.

The trade with Baghdad increased by leaps and bounds with the more frequent arrivals at Busreh of ships from Europe, and it soon became impossible for the two Lynch boats on the river to deal with all the cargo. Large accumulations of merchandise were held up at Busreh for want of carrying capacity, and the situation became so serious for British shippers that at length our Foreign Office actually moved, and obtained for the Euphrates and Tigris Steam Navigation Company further concessions, which permitted them, first, to run a third steamer in case of need, and, second, to tow barges laden with cargo. Meanwhile, other ocean steamer lines had entered the Busreh trade. Steamers of the Bombay and Persian Line from Bombay ran in opposition to the British India Company. The Clan Line came, but did not stay long. The Persian Gulf Steamship Company disappeared, and was succeeded by the well-known Bucknall Line. Then the Russians put on a service from Odessa, and they were followed by the German Hamburg-Amerika Line from European Continental ports—a line inaugurated under German auspices with the evident object of creating a trade between the Persian Gulf and Germany.

Sixty Years of Trade.

Here we have the rise and development of British maritime trade with Busreh and Baghdad. In the year 1850 it amounted practically to nothing. A few native sailing craft occasionally found their way from India to Busreh laden with country produce, returning with cargoes of dates in baskets. In the year 1913 the exports, as set out in a British Consular report, were:—

> 2,161,339 packages of dates, 44,392 bales of wool, 36,521 bundles of liquorice, 725,380 cwt. of barley, 1,358 bales of carpets, 63,740 cwt. of paddy, 75,980 cwt. of seeds. The wheat crop in 1913 was a failure, and it would be misleading to give the export figures, but in 1912 the exports of wheat amounted to 373,928 cwt. The total value of exports in 1913 was £1,939,259, and of the imports £3,899,273.

A fair tale of success in sixty years, achieved, let it be remembered, not by means of the great British official system, but despite the neglect and indifference of the British authorities, who should have fostered it. It might have been expected that, seeing the enterprise of the pioneers of British trade, our own Government would have extended a helping hand; but that appeared to be beneath their notice, and as the Turks continued to place obstacles in the way of our people, the full measure of success which might have been ours was not achieved. In spite of these severe handicaps, however, our trade expanded very considerably, the difference being that we got the lion's share instead of the whole of it.

Throughout this little history mention has been made only of the shipping companies interested, but it must not be forgotten that many other British merchants have spent years in Mesopotamia pushing British trade, and without their assistance these results could not have been achieved. Here are the names of some of them:—Messrs. Gray, Mackenzie and Co., Messrs. Blockey, Cree and Co., Messrs. Darby, Andrews and Co.

We must leave the country at this point. Let us hope that very soon another *régime* will be established—a *régime* which has never failed to bring peace, plenty, and prosperity to the peoples that have been brought under its influence. The British flag flies over Busreh now; the entire district is being administered by the civil departments of the Government of India; whatever trade there is passes through the British Customs House; oppression and evil have disappeared. What to-morrow holds for us we know not; only let us pray that it will not see the making of another huge mistake, which the abandonment of Mesopotamia, the land of the blessed name, would certainly be.

LEGAL AFFAIRS IN EGYPT.

(By Our Cairo Correspondent.)

In the Note by the Procureur-General on the Mixed Courts in Egypt for 1915-16, as in previous years, attention is paid to the memorandum drawn up by the Import Trade Association on the question of bankruptcies and compositions. Once again the association lays stress on the advisability of giving publicity to the noting of accepted bills, and the Procureur-General endorses its view. But while the association thinks that this publicity could be obtained by a daily posting up of the protests in the Courts and the publication of details in the newspaper in which legal notices are officially inserted, M. Eeman considers that the object would be attained by the establishment in the office of the Commercial Court of a register which would be accessible for reference by all and sundry and by the publication of a periodical "List of Protests" which would be officially issued to subscribers.

With regard to the question of the deposit of £E12 required by the Courts for the issue of a bankruptcy summons which the association formerly wanted abolished and which it now asks shall be reduced, the Procureur adheres to his opinion that the amount is reasonable. He points out that this sum was fixed because it represents the average of the fees that have to be incurred in the preliminaries for bankruptcy proceedings, and that it is merely a deposit intended to guarantee the payment of those fees.

This deposit is destined to prevent useless proceedings in bankruptcy, as, for instance, in cases where it is evident that there are no assets. There is no object in starting such proceedings if the estate cannot find the amount required by the Courts to be deposited; and as for the small debtors who, it is alleged, would be saved from the threat of bankruptcy proceedings unless the amount of the deposit were reduced, M. Eeman remarks that the remedy is in the hands of the trade. Let the merchants stop supplying goods to this category of buyer and the latter will disappear of its own accord.

As regards the question of extending the system of bankruptcy to civil as well as commercial debtors, the Procureur gives it as his personal opinion that there is no reason to differentiate between these two classes of debtors. "It is, however, for the Legislature of the future to deal with this question," but he gives no hint as to whether the Commission at present sitting will consider this suggestion.

Very interesting is the point raised by the Association with regard to compositions. It appears that very often the majority of creditors which approves of a composition is artificial. In many instances these majorities are obtained through the intervention of relatives of the debtor, who have agreed to accept any proposals that are made, or even of third parties or friends of the debtor, who have bought the rights of certain of the creditors on terms no doubt far more favourable to the latter than those offered to the mass, and who take the place of those creditors, when it comes to voting for a composition, and are able to get proposals passed which would not be accepted without their intervention.

Surprise is expressed by the Procureur that this proceeding goes on to such a great extent as is stated by the Association, but the writer of this review can affirm that such, or very similar procedure, is followed as a matter of course by some of the reputedly most respectable houses in the country. It seems that in other countries the same devices are resorted to, for in Italy a law was introduced in 1903 excluding from voting on a composition all creditors related to the debtor up to the fourth degree, all persons who, during the year in which the composition is proposed, acquire claims to the estate, and all assignees of claims who have acquired their rights since the summoning of the creditors.

The Procureur agrees that these devices, besides being fraudulent, are calculated to render nugatory all the precautions taken by the law for ensuring the *bona fides* of all compositions, and he considers that the enacting of a law similar to that of Italy is necessary. The Adviser, in his comments on this, says that it would be advisable to deal with these devices "whenever general legislation in such matters becomes practicable, as in a new law of bankruptcy."

TRADERS' BLACK LIST.

Restrictions Removed.

The following firms have been granted licences to trade without special restrictions in place of the restricted licences granted to them:—The Egyptian Delta Land and Investment Co., Ltd., 8, Sharia Bank el Watani Cairo; Fred O. H. and Co., 3, Rue Pirona, Alexandria.

Upper Egypt Irrigation.

The Receiver of the Upper Egypt Irrigation Co. (in liquidation), in the *Journal Officiel* of Egypt, calls for the presentation of all claims and demands against the concern.

FAILURES IN EGYPT.

The failures of the following firms were notified between May 26, 1916, and June 28, 1916:—

P. Plunkett, dealer in Manchester goods, Ataba-el-Khadra, Cairo; Tohani Hassanein Adaoui, dealer in Manchester goods, Assiout; Aron Frangi, tobacco merchant, Beni-Souef; Mahmoud Farakat, coal merchant, Cairo; Raphael de Picciotto and Co., dealers in Manchester goods, Jardin Rosette, Cairo; Mohamed Hassan Yaktin, dealer in Manchester goods, Behera, Chibrikhit; Mahmoud el Tawil, dealer in Manchester goods, Mehalla-el-Kobra, Gharbieh; Mohamed el Hawari, dealer in Manchester goods, Kafr-el-Chaikh, Gharbieh; Moghazi-el-Haddad, ex cotton merchant, Saidioun (district of Fouah); Mourai Youssef Zeid, dealer in Manchester goods, Dekerness.

NO HASHISH FOR EGYPT.

As the punishments provided under the Egyptian Customs Code for contravention of the law prohibiting the importation into Egypt and the possession of hashish do not appear to be a sufficient deterrent, a proclamation under martial law has been published over the signature of the General Officer Commanding-in-Chief notifying that enhanced penalties may be inflicted, on conviction, as follows:—Fine £E1,000 or five years' imprisonment, with or without hard labour, or both.

Persons convicted of inducing soldiers or sailors to import hashish, or of assisting in the importation, or of being in possession, will be liable to the same penalties.

Fifteen days from July 7 were allowed for the handing over of whatever quantities of the drug "in the possession of any person."

THE SUDAN AND ERYTHRÆA.

It is announced by the Foreign Office that the Italian Government denounced on July 2 last the Customs Convention of November 26, 1901, between the Anglo-Egyptian Sudan and Erythræa. The Convention will, accordingly, lapse on January 2 next.

Besides providing for reciprocal most-favoured-nation treatment in respect of imports into the one from the other country, the Convention stipulated that natural products of either country shall be imported into the other at a rate of duty not exceeding 5 per cent. *ad valorem*. Such goods, however, when in transit from Erythræa through the Sudan to Egypt, are required, on entering Egypt, to pay the difference between 5 per cent. and the duty leviable under the Egyptian tariff.

BOLL WORM PEST.

Mr. Gerald C. Dudgeon has had his paper on the boll worm in Egypt reprinted from the Transactions of the Third International Congress of Tropical Agriculture, in pamphlet form. Previous to 1911 the name boll worm was used in Egypt exclusively in application to one species (Earias insulana, Boisd.), but in the year named a new pest appeared which resembled the other in its depredations upon cotton bolls, and to which the name "pink boll worm" has been applied to distinguish it. Owing to the points of difference between the two species being somewhat marked it is necessary to refer to each separately, and Mr. Dudgeon's essay deals only with the common boll worm (E. insulana, Boisd.). He proposes to give an account of the pink boll worm (Gelechia gossypiella, Saund.) later on.

The Army Finance Department, Cairo, invite tenders for the supply of fourteen tons of candles to be delivered c.i.f., Alexandria or Port Said. Date, September 5, 1916.

CYPRUS NOTES.

(From Our Own Correspondent.)

Nicosia, July 22.

The parching heat wave has seriously damaged grapes in the vine areas, as well as other fruits. The locust bean crop has also been adversely affected in many parts. The pods are gathered in August.

The course of instruction in elementary agriculture for village schoolmasters will be given here and at Limassol between August 6-27. Teachers who present themselves will have an opportunity of attending courses in various other subjects.

Somewhat gloomy forebodings appear in the Native Press in respect of the supplies which this year's cereal harvest will yield, and Government is again being urged to provide relief work for the unemployed and for those more or less in distress owing to the continued effects of the war on local industries. Work on roads and harbours is specially advocated.

Mr. Cecil Hay, who has for so many years been agent of the Eastern and Colonial Association in Cyprus, is looking after the interests of the Perapedhi Wine Association during the absence of Mr. Chaplin.

BULGAR EXPLOITATION OF SERBIA.

The Bulgars lost little time in beginning their exploitation of Serbia's mineral and forest resources. Such information as we possess is gathered from Bulgarian papers, from which we are able to quote as follows:

Dnevnik:—

Gold washings from the river Veresnica, in the county of Pasharevatz, are yielding good results. Our State will draw a good profit from them. (June 19, 1916.)

Utro:—

In the Morava valley there are good mines which were not properly exploited under the Serbian Government. At the present moment copper, gold, and coal mines are being worked with good results. The mines in Majdanpek, Bor, Leskovatz, Radovishte, etc., have been reorganised. (June 20, 1916.)

The Ministry for Agriculture has ordered the inspectors of woods and forests in Chupria and Zanj to supervise the exploitation of the forests in the Bukovik Mountain.

HOW GERMANY LIVES.

We take the following points from a report submitted to the Washington Government by the United States Consul-General in Berlin:

The problem of obtaining lubricating oil has been partially solved by supplies becoming available in Galicia and the Balkans.

Express trains running through Breslau kept open an avenue of trade with the Near East. Roumanian grain and petroleum were imported through Austria-Hungary with little difficulty.

Small supplies of copper are being imported from Turkey and the Balkans.

Among the buyers who attended the Leipzig Fair in 1915 were fifty from the Balkan States.

The *Erzgebirgischer Volksfreund*, published in Schneeberg, Saxony, says:—"According to a report from Braunau, in Bohemia, the cotton-spinning mill of Benedit Schrolls Sohn, located in Halbstadt, has discovered a method of using the fibres of nettles and hops as a substitute for American or Egyptian cotton, and the firm A. Schlesinger has used these fibres with marked success in the production of textile yarns."

THE WHISKY FOR CONNOISSEURS.
TUCKEY'S
Years 10 Old
Pure Malt Whisky
per 54/- doz.
Case Free and Carriage Paid.
Soft, Mellow, Old Pot Still Scotch Whisky.
Sample Bottle, post free, 5/-. Write to-day.
THE LANCET says: "It is well adapted for dietetic purposes, owing to its Purity and Quality."
CHAS. TUCKEY & CO., Ltd.,
3, Mincing Lane, E.C.

PRODUCE REPORT.

London, August 10.

Currants.

The market has been quiet this week, with very little business done at late rates. Quotations for new crop are very high, and, so far, no business has been reported. The stocks of currants in London on July 31 were 3,701 tons, against 4,239 tons the same period last year. There is, apparently, a poor selection which does not encourage buyers, and trade, thus, is restricted.

Sultanas.

The demand continues on a small scale, good quality Afghanistan fruit being in preference. The stocks of sultanas of all kinds in London on July 31 were 2,949 tons, against 2,396 tons the same period last year.

Figs and Dates.

Both these kinds are quiet, but prices are well maintained.

Seeds.

Linseed has been rather slow of sale, but is steadily held. London-Calcutta, spot, afloat, and July-August, 76s.; August-September, 76s. 6d., and September-October, 77s. Bombay to London, small grain, August-September, 76s. 3d., and September-December, 77s. sellers. Bombay to Hull firm, spot, 77s. 6d. Rapeseed is quiet and unchanged. Cottonseed is quiet but steady; Egyptian to London, September, £12 12s. 6d., and October, £12 5s.; Egyptian to Hull inactive, spot and prompt quoted £12 10s. Bombay to Hull, spot, and July-August offered at £12.

Oils.

Linseed oil is dull and easier. Spot pipes are quoted £36 15s.; spot, barrels, £37 5s.; August, £37 7s. 6d.; September-December, £38 10s., and January-April, £39 10s. Rape-oil is steady, ordinary brown naked, spot, remaining nominal. English refined, in barrels, £48 to £50. Cotton-oil is quiet. Crude, pipes, spot, £38 15s.; refined, pale, pipes, £44, and sweet, barrels, £52 to £54 as to make. Soya oil, Japan, is quoted August-September, £37 10s. Olive oil has been very firm recently, and spot is quoted at £59 to £60 per ton for good Spanish and Levant.

Miscellaneous.

Sulphate of copper has been quiet recently, quotations for spot being £50, f.o.b. Greek cream of tartar scarce. Quotations for firsts, £198 6s. Beeswax in good demand, but scarce; East Indian yellow, £6 to £6 10s., and white £8 12s. 6d. to £8 15s.

An agreement is reported between the Roumanian Export Committee and representatives of the Central Powers in regard to the purchase of brewing barley and peas from this year's harvest. About 2,000 railway wagons of peas and 6,000 wagons of barley are at the disposal of the committee.

THE PROBLEM OF RAW MATERIALS.

Mr. R. B. Stoker, president of the Manchester Chamber of Commerce, made some interesting observations in his recent presidential address, regarding the attitude of Germans towards us after the war. Last week, it will be recalled, we discussed the relations that ought, in our view, to exist between manufacturers in this country and British producers of raw material in our Oversea Dominions. This is what Mr. Stoker says:—

So far as was possible—and with considerable success—German cunning has been devoted to "having it both ways"; to obtaining on the most favourable terms such foreign raw materials as were indispensable; to procuring access on favoured terms to the foreign markets in which German goods have been sold; and to excluding from the German market competing manufactures, and in particular such as have been manufactured most fully. The war gives no evidence that the German disposition has changed, and so far as may be divined the attitude towards British goods after the war will simply be one of an increased virulence.

A Reuter telegram from The Hague, dated August 10, states:—"The Turkish Legation here contradicts the reports of the alleged negotiations with the former American Ambassador in Constantinople, Mr. Morganthau, regarding the sale of Palestine to the Zionists."

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.
CONTRACTORS TO GOVERNMENT.

OUR TRADE PROBLEMS.

British Contempt for Trade Opportunities in Near East.

Attention has frequently been drawn in this journal to the defective consular system employed by Great Britain as compared with other foreign Governments. It is not suggested for a moment that all the fault is to be laid at the charge of the Consuls who, probably, are as devoted to the success of British commerce and the safeguarding of British interests as anybody—except the traders and manufacturers who are not kept posted systematically regarding opportunities for trade that arise, and which, in the absence of the Briton, pass to foreign rivals. But if the Consuls are not to be blamed for the loss of trade, obviously somebody should be, and we suggest that one or more of the Committees which are "sitting" to devise a new "after-the-war" campaign should lose no time in hatching a scheme for the remedying of this grave defect in our commercial system.

American Methods.

Probably the series of daily consular and trade reports which are issued by the Bureau of Foreign and Domestic Commerce at the Department of Commerce of the Government of the United States are too well-known to require lengthy description, but we should like to draw attention to the thoroughgoing character of these useful documents. Apart from the mass of world-wide information contained in the reports, all of value and interest to the manufacturer, there is a section, printed unostentatiously at the back, which keeps the American manufacturer completely informed regarding new trade openings in every country in which there is an American consular representative—and where is there not one? As a matter of interest, we reprint some items from the list of "Foreign Trade Opportunities" to be found in recent issues of the reports. Here they are :—

OSIER, RATTAN, SEEDS, ETC.—A flower merchant and manufacturer of wicker goods in Greece requests an American Consular officer to furnish him with the names and addresses of American exporters of osier, rattan, seeds and bulbs for flowers, and flower vases. Illustrated catalogues and price lists should be sent.

MACHINERY.—An American Consular officer in an insular possession of a foreign country reports that a man contemplates the construction of a starch factory, and wishes to receive proposals for the requisite machinery and equipment.

IMITATION LEATHER.—A manufacturer of travelling bags and leather goods in a foreign colonial possession informs an American Consular officer of his desire to be placed in direct communication with manufacturers of imitation leather for travelling bags. Samples of the imitation leather may be inspected at the Bureau or its district offices. (Refer to file No. 77741.)

SHEEP AND GOAT SKINS.—An American Consular officer in Greece writes that a firm in his district wishes to enter into commercial relations with American importers of sheep and goat skins. Correspondence may be in English.

OIL STOVES.—An American Consular officer in Greece reports that a man wishes to represent American manufacturers of oil cookstoves. The two and three-hole burners, blue-flame type, are desired. Correspondence may be in English.

LEATHER LEGGINGS.—An American Consular officer in North Africa reports that a merchant is in the market for leather leggings. Requirements, about 1,000 pairs a year. Further information may be obtained from the Bureau or its district offices.

British Inquiries.

These are only a few selected from a great many contained in a week's reports. They hail from every land, and it reflects little credit upon British traders that many of them are inquiries by British houses, both in the United Kingdom and in the Overseas Dominions. The following instances are eloquent testimony to the Imperial ideal as it is held by *some* British traders :—

HARDWARE, NOVELTIES, ETC.—An American Consular officer in *South Africa* writes that a firm is anxious to secure exclusive agencies for American products suitable for the South African market, with a preference for tools, small hardware, and novelties.

CREAM SEPARATORS, ETC.—An American Consular officer in the *United Kingdom* reports that a firm is desirous of being placed in communication with American manufacturers of cream separators and other dairy apparatus. Reference is given.

CROCKERY.—An American Consular officer in *Canada* reports that a firm wishes to receive catalogues and price lists, etc., of crockery ware.

BUTTONS AND BUTTON MACHINES.—A man in *Australia* informs an American Consular officer that he desires to communicate with manufacturers of buttons of all kinds; also with manufacturers of machines for making buttons.

A Charge

British Consuls are not always blameless, however. A correspondent, writing to THE NEAR EAST from Chios, on July 10, says :—

"The various English industrial products could find a ready market in this town and the neighbouring islands if the British Consuls in the Orient worked energetically to accomplish their introduction without leaving the field free for German producers, who, owing to the efforts of their agents, are now sellers of the majority of the principal articles formerly imported from England. These are iron, hardware, cutlery, cotton goods, millinery, etc.

"Germans offer these wares at low prices, with which English goods cannot compete. Thus, the Turkish and Greek markets have been flooded with Hun productions, to the great detriment of English export trade, which has fallen considerably. Nevertheless, it would have been easy to contend advantageously against German competition if the English goods were more favoured by the British Consuls.

"Instead of engaging themselves in protecting their native trade, they are occupied, exclusively, in politics, whilst their *confrères*, the Austro-Germans, devote themselves body and soul to the development of their commerce, and do not fail to furnish their respective Chambers of Commerce, and their manufacturers, all necessary information concerning English-made articles, and submit specimens to be used as patterns."

The German Way.

At the beginning of the war a French officer was ordered to examine the records of a German consulate in Morocco. He was astonished by the evidence he found of the most complete organization. Every notable, every merchant and manufacturer, every farmer, however small, and of whatever nationality, was allotted a pigeon-hole in which were recorded his requirements, his means, his morality, the names of his customers and of his suppliers. In other compartments products were classified with the names of those who used them; other lists contained the names of, and information concerning, German exporters. Whole rows of book-shelves contained annotated catalogues, kept up to date, besides numerous show-cases; a marvellous exhibition of German products! Everything was so well arranged and organized that any German commercial traveller could learn from his Consul at which places to call, what were his chances of success, and the financial precautions that he must take.

On the other hand, if a trader or manufacturer wanted such and such an article or machine, the Consul could immediately furnish him with the list of German producers. In acting thus, the Consul in no way restricted the initiative of the merchant, with whom rested the choice of contractor, the option of going elsewhere, the terms of the contract, and all the integral points of trade; but he pushed German trade and laboured for its expansion.

We have said before, and it cannot be repeated too frequently, that Germany is preparing formidable reprisals against our trade and commerce, and when peace has been reached she will lose no time in putting them into operation. There may be differences of opinion as to whether she has ready stocks of manufactured goods accumulated in her factories for "dumping," but it is accepted that she hopes, not only to recover the markets from which she has been ousted, but also to open up new avenues of trade. The German has a certain genius, and power of push and hustle which, combined with his mastery of intrigue and double-dealing, will make him a formidable rival, even if we set our house in order. If we are not prepared to meet his campaign with energy and thoroughness, once will see us confronted with as great a commercial peril as we have had to face.

NEWS FROM ALL SOURCES.

It is notified that telegrams in code can no longer be accepted for Abyssinia.

It is reported that a heavy slump in Roumanian securities has occurred on the Berlin Bourse.

By a proclamation issued in Cairo General Sir Archibald Murray calls for the declaration, within thirty days, of all property, real or personal, belonging to enemy persons of every description in Egypt.

According to a Vienna telegram, the Roumanian Minister of Commerce has sent a delegation to Vienna to complete an agreement for the exchange of goods between Roumania and Austria-Hungary.

The Sultan has inaugurated at Alexandria an exhibition of Egyptian industries, organized to demonstrate what the country can do towards replacing articles formerly obtained from enemy countries.

In Hungary oil is being extracted from maize on a large scale. The product is said to be excellent both for illumination and cooking. In Austria the Government is offering subsidies to the millers to produce this oil.

The ginning factory belonging to the Ginning, Pressing, and Warehouse Company of Egypt at Damanhour has been sold to a syndicate of native merchants of Damanhour. The property covers 13,000 square yards, and has been disposed of for £E13,000.

The Chilian Nitrate Committee announce the nitrate of soda statistics for July as follows :—Europe (including Egypt).—Exported from Chili to Europe (including Egypt), July, 130,033 tons; arrivals in Europe (including Egypt), July, 144,800 tons. Owing to the war we are unable to compile the usual figures of deliveries and visible supply (stocks and afloat).

The Indian Police authorities have instructed Bombay merchants not to accept or receive for collections bills of exchange drawn by firms or individuals doing business or residing in Kerman, Yezd, Shiraz, and the adjoining districts of Persia, which are, for the time being, under enemy influence. The merchants affected by the order are petitioning the Government of India to devise some means to enable them to carry on their business.

The Board of Trade announces that applications for licences to carry oranges to ports in the United Kingdom should be made by persons and firms interested in ships not later than August 25. Applicants should state the name and nationality of each ship for which a licence is desired, the port of entry, and the deadweight and cubic space. The application should be addressed to the Controller, Import Restrictions Department, 22, Carlisle Place, London, S.W.

What is an almost unprecedented situation has arisen in Alexandria, where the cotton stock has now been reduced to 8,000 bales, says a Cairo correspondent of *The Times*. This is the result of heavy exports to meet outside demand and the smallness of the 1915 crop due to the legally restricted area. The stock of the old crop in the interior is exhausted, whilst the new crop will not arrive in any quantity before the end of September. Meanwhile, exports will cease and there will be no business in the cotton market.

The War Trade Department at Cairo, Egypt, has drawn the attention of the Association of Chambers of Commerce of the United Kingdom to an opportunity which occurs in the Egyptian cotton trade. As a result of the war, a number of enemy firms which used to handle a third of Egypt's cotton crop, valued at about £10,000,000, are being liquidated under official supervision. A gap is thus created in the distributing machinery, which in recent years has not increased so rapidly as the size and value of the goods handled by it, and an opportunity presents itself for a British or Allied firm to fill this gap.

ENGINEERING NOTES.

Platinum Production.

The production of platinum has been a source of much anxiety, and prospects in the Ural mines do not appear to be promising. According to the report of Mr. T. H. Preston, British Vice-Consul at Ekaterinburg (dated June 22), the production is likely to be smaller this year than it was in 1915. He writes:—Recent mobilizations in the platinum mining districts, which have hitherto not been called upon, have greatly curtailed the output from hand washings. Austrian prison labour and Chinese labour, although largely utilised in other industries, have not been adopted in the platinum industry. The production from the larger companies by means of dredging is likely to be similarly affected by this scarcity of labour. As regards prices, the abnormal scarcity of the mineral habitually brought in and sold by the small holders at Ekaterinburg has tended to make these people (remembering last year's rapid fluctuations) very cautious, and most of them now prefer to pledge their mineral with the banks, with the idea of waiting for higher prices, than to take prices ruling at present, viz., 67,500 roubles per pood (for quantities up to 10 lbs.). Larger quantities—one pood and over—are unobtainable under 68,000 to 68,500 roubles per pood. The future as regards prices is largely dependent on the quantities the Government allow to be exported, as the Russian internal consumption is not sufficient to influence prices either one way or the other.

Asbestos and Pyrites.

Similar conditions are threatened as regards asbestos and sulphuric pyrites. The same Consular officer reports that the production of asbestos in the Urals in 1915 amounted to 481,227 poods, or about half the output of 1914. The output of sulphuric pyrites mined in the Urals in 1915 amounted to 2,180,000 poods, the district of Ekaterinburg being responsible for the whole amount.

Electric Lighting Problems.

A reason for the slow progress made in the use of electricity in rural districts and country establishments is the fact that electric supplies are, generally, controlled by large companies or corporations, which confine their operations to towns and places more or less thickly populated. Thus, rural communities, country houses, farms, and factories, which happen to be situated beyond the reach of large electric centres, are compelled to adhere to old-fashioned methods of lighting, such as oil lamps, candles, or, if available, locally manufactured impure coal gas. This apparent state of backwardness can easily be altered by the employment of a small electric lighting plant. It appears, however, that many people believe that the installation of a small independent plant to generate electricity is a very expensive undertaking, or a complicated and unreliable mechanical arrangement; but that is an error. Since the introduction of the internal combustion engine the means for producing electricity conveniently, and at a comparatively small cost, have much developed, and the advantages of electric light can now be secured by private residents in rural districts, farmers, or manufacturers at a small capital outlay, and power may be produced more cheaply than if the current were taken from a public electric supply.

Utility of Small Plant.

What is wanted is a small lighting plant of modern design which can be fixed in a spare room, coach-house, barn, or shed; and the electric power which, in addition to providing light, can be utilised for cooking, heating, charging accumulators for motor cars, or for light power work, such as pumping water, driving a churn, a chaff-cutter, or ventilating fans in the house. There are several plants in the market, all of which claim one or other special feature and points of efficiency, and each proclaimed to be the best. In the choice of a plant, buyers at home have the advantage of investigating the merits and demerits of each system on the spot; but those abroad should obtain experts' advice, and, in the latter case, as such experts would probably be also abroad, it is advisable that British manufacturers and shippers should advertise, as explicitly as possible, the merits of their plant, giving thus an opportunity to foreign buyers to communicate with them. The Near East (and even further eastward) is virgin soil so far as small electric lighting plants are concerned, and with the Germans out of that market at present there is a great opportunity open to British manufacturers to secure business if they act promptly.

A Self-contained Plant.

We are able to refer to a compact little plant which we have seen at work recently. It is novel, self-contained, and petrol-driven, and has many points of interest. The leading feature is that it consists merely of a small petrol engine and generator, with water and petrol tanks, and needs no battery, instruments, or accessories of any kind. It has been found possible to dispense with these, and yet to run lamps direct from the generator without the least "flicker." The demand may vary from nothing to an overload up to 50 per cent. as suddenly as you please, yet there is only a momentary drop in the pressure, the speed of the machine adjusting itself automatically to the load. The variation in pressure between "no load" and an overload of 50 per cent. does not exceed three volts, a remarkable result for a single-cylinder petrol engine coupled direct to a generator. The bore of the cylinder is 2¼ in., with a 3 in. stroke, the speed when dealing with the rated output of 500 watts being about 1,950 d.p.m. As the engine is of the four-stroke type, this means 975 explosions per minute, or something over 16 per second, the slight difference in torque on the crank-shaft being entirely absorbed by the inertia of the flywheel and generator.

No Flicker.

Makers of small lighting sets in many instances have attempted to avoid "flicker," when no battery is used, by combining a very large fly-wheel with a slow-speed engine; but by the use of a high-speed four-stroke engine and comparatively small flywheel in the plant now under reference, absolute steadiness in running, with absence of "flicker," is secured Changes in the engine speed are effected by a potential governor acting directly on the throttle of the engine, so that when only one or two lamps are in circuit the throttle is practically closed; but as more lamps are switched on the throttle opens automatically and permits of greater speed, closing again as the load falls off. This plant is intended mainly for the lighting of country houses, and it is claimed that it is of sufficient capacity not only for lighting, but also for such domestic accessories as flat-irons, table cookers, and the like.

The tonnage passing through the Suez Canal last year decreased to 4,143,340 tons, as compared with 4,767,729 tons in 1914. The revenue collected declined from £5,026,037 in 1913 to £4,889,954 in 1914 and £3,740,905 in 1915. The number of ships which passed through the canal last year was 3,708, or 904 less than in 1914. The number of British vessels which used the Canal in 1914 was 3,078, of an aggregate of 12,910,278 tons; in 1913, 2,736 vessels, aggregating 11,656,038 tons, passed through the waterway. The German tonnage using the Canal declined from 3,352,287 tons in 1913 to 2,118,946 tons in 1914; while in 1915 there was, of course, a complete cessation of German traffic.

FUTURE OF LIBYA.

The claims and prospects of Libya as a trade route between Europe and the Sudan are the subject of an enthusiastic article by the Abbé C. Rubico, in the July number of *La Vita Italiana*. The limits of Italy's African colony are not yet definitely ascertained, but there is an agreement with England whereby, to the east, the Egyptian boundary is fixed at the 25th meridian of longitude, and extends northward to the middle of Solum Bay. How far it reaches southwards is a matter subject to negotiations which are still pending. The Oasis of Siwah appears to be regarded as Egyptian. Italy's claim to the Oasis of Kufra will not be contested, says the Abbé, nor will England be disposed to object as regards the Oasis of Jarabub.

Then there is an understanding between Italy and France regarding the western and southern limits of Libya. The boundary starts at Ras Agir, on the Mediterranean, about mid-way between Gabes and Tripoli, while the inland frontier follows the Ghadames-Chat line. But if it is now certain that these two oases are to belong to Italy, diplomatic mystery still prevails concerning the Oases of Janet and Bilma, which France was to occupy in due time for purely military reasons—the safety of the caravan routes, and as a precaution against possible agitation amongst the Arabs. This is really to Italy's advantage, and the present situation will subsist until the end of the war.

At the same time, regard must be had to geographical laws as well as to other considerations. The author of the article points out that, in addition to the actual colony to be administered by Italy, the African territory affected by the ultimate settlement is of enormous extent—a geographical and, as it were, an autonomous entity. Its limits would be described by a line drawn from a point between Gabes and the Gulf of Sidra, and passing between the Jarabub and Anjila oases to touch the 25th meridian and following it southwards so as to include Kufra and Ennedi, thence approximately identical with the watershed separating the Chad and Nile basins traversing the Marra Mountains, and practically dividing the two regions of Wadai and Dar-Fur. Reaching the Manga Mountains at the point where the Chad-Nile-Congo basins intersect, the boundary turns south towards the Belo Mountains and continues to the sea, touching the Equator on the Gulf of Guinea, where the coastline completes the southern boundary of the entire Libya-Chad-Cameroon region.

Westward, the line begins near Gabes, proceeds in the direction of Shot-el-Jerid, passes from east to west at Shot-el-Melghir to the north of Tuggurt, touches the 4th meridian of east longitude, where it intersects the 30th parallel of north latitude, and includes Wargla, continuing due south along the meridian line to the Atlantic.

Libya's future will be essentially commercial. The seacoast will become the *carrefour* of a most prosperous trade between Europe and Central Africa, and necessarily so, for it is the natural gateway of the Sudan, and the terminus not only of the routes from the Chad region, but of all those which extend to the Atlantic and to points still further south—to the Congo and Cape Colony. Therefore Italy must at all costs seek to ensure easy communications with the interior. And, while the existing caravan routes are valuable, they are not sufficient: a railway, some 8,000 kilometres in length, must be built southward to the Chad, to the Gulf of Guinea, and on to Cape Town. Of course, it would have branches reaching to the Wady and the Upper Congo, and elsewhere.

To those who have asserted that the Niger, Senegal, and Benué are the natural and sufficient highways of commerce, the Abbé replies that navigation on these rivers is very difficult and costly. According to M. Leroy-Beaulieu, the task of making the Niger completely navigable would mean an expenditure of £20,000,000. Hence, the hope is expressed that at the end of the present war enlightened statesmen will put their heads together in order to facilitate, as above, the exploitation of the African regions concerned, which have a total area of some 4,000,000 square kilometres.

SHIPPING NOTES.

The Norwegian steamer Sama has been detained at Gibraltar.

The vessel reported sunk on August 4, which was described as the steamer Eugenia, is now stated to have been an Italian sailing ship.

The British steamer Mount Coniston has been sunk. She was of 3,018 tons, built in 1892 as the Vortigern, and owned by H. E. Moss and Co.

The Greek steamer Tricoupis, the Italian steamer Siena, and the British steamers Tottenham and Favonian, have been sunk, the two latter while going to the rescue of the Siena.

The Italian liner Re d'Italia, which has arrived at New York from Genoa, reports having been attacked by three submarines in the Mediterranean. It is believed that one submarine was sunk.

The Egyptian Government ask for offers for the purchase of the steamer Nicolaos, 893 tons register, built at Wallsend-on-Tyne, engined by Black, Hawthorn and Co., now in Alexandria Harbour. Offers were to be made to the Marshal at Alexandria on or before July 31, 1916.

The liner Mascara, belonging to the Compagnie de Navigation Mixte, of Marseilles, arrived at Marseilles from Algiers on Tuesday after a narrow escape from a German submarine. The submarine fired thirty shells at the steamer without hitting her, and then made off quickly on the appearance of a French auxiliary cruiser.

Messrs. Petersen and Co., Limited, announce that the London American Maritime Trading Co., Limited, which is managed by them, has absorbed the Leander Steamship Co., Limited, recently controlled by Messrs. Scaramanga Brothers. The fleet of the London American Maritime Co. consists of nine cargo steamers of about 4,000 tons gross each, and the Leander Co. of four steamers of between 2,600 tons and 3,100 tons each.

The first communication received by the Imperial Merchant Service Guild (London) from interned merchantmen in Turkey arrived on Wednesday, a postcard being received from Mr. T. S. Mason, late third officer of the steamer Assiout. He said:—"We are all well here." Mr. Mason is the only surviving executive officer of the vessel, the other two—Mr. Marshall, chief officer, and Mr. Sykes, second officer—having died since they were captured.

The sinking of an enemy submarine off Algiers by the steamer Strathness is thus described by the captain, David Thomson, in the ship's log, under date of July 15: "At our sixth shot submarine was hit, and also with our seventh, when a big explosion with fire was caused on the submarine. Then firing ceased and submarine disappeared, which I have no doubt was sunk by our fire. Altogether the submarine fired about fifteen shots, but none took effect. We fired seven shots, and two hits were made. Great credit is due to the gunners for the way in which they worked, especially the remarkable marksmanship they made at the submarine."

COMPANY REPORT.

Baku Russian Petroleum.

The report of the Baku Russian Petroleum Company for the year ended January 13 was issued on August 7, and records a gross profit from trading of £72,949, an increase of £45,698. The directors state that the capital expenditure for the year (exclusive of advances to the Romany Zabrat Company) amounted to £24,840, in comparison with £52,542 for 1914 and £84,943 for 1913. The decrease was principally at Bibi Eibat, where conditions do not warrant a heavy outlay at a time when materials are abnormally costly and experienced labour is very scarce. The cash and other liquid assets have been increased by £51,695, against an increase of only £8,833 in the current liabilities. Since the accounts were made up the outstanding balance of the Government loan, amounting to £9,065, has been paid off, and a further reduction has been effected in other local liabilities. The gross profit from trading was £72,949, an increase of £45,698. The gross income from all sources was £87,985, and, after deducting administration charges, debenture interest and exchange loss on remittances, there is a balance of £73,047, which has been appropriated as follows:—Depreciation, £40,000; provision for taxes, London and Russia, £10,000; discounts, £6,092; amount written off investments, £3,060; and reserve against exchange fluctuations, £13,895. The accounts are, for convenience of calculation and comparison, rendered at the conventional rate of 9.41 roubles per £1 sterling. The rate prevailing on January 13, 1916, was 16.20 roubles per £1, and, applied to the trading profit and royalties in Baku (£82,951), the difference between the normal rate and the prevailing rate amounts to £34,758. Pending the remittance of further moneys from Baku to London, this difference remains in abeyance, except for £3,217 charged to profit and loss and £13,895 placed to special reserve. For reasons incidental to the income-tax assessments in Russia, it has been deemed expedient to revert to the practice of setting aside a round sum for depreciation in lieu of writing down specific assets on a percentage basis, and the £40,000 now set aside for depreciation, other than on lands, approximates to the sum so allocated on the two previous occasions.

The sum of £18,724 set aside a year ago as a contingency reserve for depreciation in 1914 of plant and machinery and materials and stores was found to be more than sufficient for the object in view. An arrangement has been made with the holders of the company's debentures under which, in consideration of the rate of interest being temporarily increased from 5½ to 6½ per cent., the sinking fund payments due January, 1916 and 1917, are postponed until January, 1918, by which time it is hoped the necessary remittances may be effected at an improved rate of exchange. The following table summarises the operations in the last two years:—

	1915 (o/s) Poods.	1914 (o/s) Poods.
Gross Production—		
Balakhany Plots	3,762,955	3,319,665
Bibi-Eibat Plots	1,430,215	1,820,773
Total from Plots worked by Co.	5,193,170	5,140,438
Production from Plots leased off	1,100,000	1,265,800
Total gross production on all Plots	6,293,170	6,406,238
Average per week	121,023	123,197
Royalty oil payable to Government in kind	198,578	280,852
Oil used as fuel	673,169	1,320,804
Allowances, leakages, etc.	138,875	113,429
Net production available for sale	4,182,548	3,416,353
Total as above	5,193,170	5,140,438
Average net production per week from Plots worked by Co.	80,434	65,699
	Kops.	Kops.
Average price per pood realised by Co.	42.60	35.47
Average Bourse price (per pood)	42.30	36.59
Wells baled during year	81	80
Wells baled at end of year	71	65
Wells temporarily stopped for repairs, etc.	11	9
New wells being bored	4	5
Wells being deepened	1	—
Amount of new boring done during year	568 sag. 3,977 ft.)	590 sag. (4,132 ft.)

The reduced production from the Bibi-Eibat plots is largely the result of the two-months' strike in 1914, when the influx of water consequent upon the sudden stoppage of work caused serious damage to many of the wells. The average daily production from the Bibi-Eibat plots, which before the strike was 6,000 poods, is now only 3,800 poods.

The company is selling its entire production under a contract for one year from April 1 (old style), 1916, at 1 kopeck per pood above average monthly market price, with a minimum of 42 kopecks per pood. On the properties of the Romany-Zabrat Co., Limited, a paying oil source has been struck in No. 2 well at a depth of 323 sagenes (2,261 ft.), and a production obtained ranging up to 1,800 poods (29 tons) per day. Water difficulties have arisen, however, and steps have been taken to deal with them. No. 3 well (which is being drilled by the rotary process) has been carried to a depth of 243 sagenes (1,701 ft.).

COMPANY NOTES.

Oil Outputs.

Anglo-Egyptian Oilfields.—Gemsah production for the week, 117 tons (last week 762 tons); Hurgada production for the week, 503 tons (last week, 410 tons).

Baku Russian Petroleum Co. (1909).—For week ended July 29, 84,500 poods.

Bibi Eibat Oil.—For week ended July 30, 60,733 poods.

Black Sea Amalgamated.—For week ended July 29, 21,974 poods.

Cheleken.—Fortnight to July 29, 505 tons.

Lobitos Oilfields.—For July, 7,337 tons.

Maikop Combine.—For week ended July 29, 6,991 poods.

Russian Petroleum.—For week ended July 29, 57,000. For week ended August 5, 55,700.

Meeting.

Baku Russian Petroleum.—August 15, noon, at River Plate House, London, E.C.

Redemption of Bonds.

The numbers are published of Greek 5 per Cent. National Loan Bonds of 1907 which have been drawn for redemption. 1,370 Obligations of £4 each, repayable July 15, 1916. The above-mentioned Obligations, with Coupon No. 20 attached, should be presented for payment in London by Messrs. C. J. Hambro and Son or the Ionian Bank, Ltd.

ON 'CHANGE.

(By Our City Correspondent.)

Throgmorton Street, E.C.,
August 10.

As last Saturday was kept as a holiday on the Stock Exchange, the interest of the week begins with Monday's (August 7) transactions. So far as Near Eastern stocks and securities are concerned, we are handicapped by the absence of sellers; of potential buyers there are plenty.

Perhaps the most notable event of the week has been the advance in shares of the Agricultural Bank of Egypt. On August 4 the price of these stood at 4 9-16; by August 8 it had moved forward to 4¾, and to-day they stand at 4 25-32. They have been in steady demand all the week, and have been difficult to buy, the difficulty arising out of the fact that the several thousand shares which were carried over in London just before the war broke out at 4½ have now all found happy homes with strong holders.

Cotton Position.

In the Egyptian agricultural world the outlook is of the brightest. The cotton reports from the United States regarding the growing crop are less favourable, and point to the belief that the crop will be considerably less than was estimated originally. This has led to higher prices being demanded in America, and, of course, better prices will be realised for the Egyptian staple, which is already at a very remunerative level for the growers. It is early in the season to make a definite forecast regarding the Egyptian crop. September, with its dread of the pink bollworm, has to be negotiated yet; but I think it may be regarded as pretty certain that Egypt will be able to market its produce at high prices.

The splendid military news from Egypt of the past few days has had a heartening effect on Egyptian values here.

A further improvement is also to be noted in the shares of that sound institution the National Bank of Egypt, prices having advanced during the week from the neighbourhood of 12 7-16 to 12 9-16.

Khedivial Mail shares have become quieter, in full sympathy with the reaction that has occurred in other shipping shares. Shipping has not yet done with the limelight and continues to be firm in its very strong position.

There is, then, in regard to Egyptian securities, a comfortable undercurrent of strength, and, to repeat myself, only the lack of sellers prevents great activity. Buyers are waiting for offers to reach them; but their attitude must not be held to mean lack of keenness.

Greek Prosperity.

The persistent and continuous demand from Athens for all descriptions of Greek securities has continued to throw a somewhat lurid light upon the various statements that have been made regarding the financial conditions prevailing in the country. In this market, too, there would be great activity if sellers could be found; but they are not at hand. Much money has been, and is being, made through the war, and accounts privately to hand speak of much prosperity among the people.

NOTES OF THE WEEK.

The battle of Katia was followed by a pursuit of the Turks. Though decisively repulsed, the enemy was able to withdraw his force in some order, as the stubbornness of the rearguard actions proved. It was impossible for the British infantry to advance an indefinite distance from their original positions; but mounted troops took up the work with great effect, and pressed the Turks for a considerable time. It was due to their efforts, particularly those of the Anzac Mounted Division, that the enemy finally evacuated his advanced base at Bir-el-Abd. At a point fifty miles east of the Suez Canal, about halfway to El Arish, the pursuit ceased. The number of prisoners taken was over 3,500, of whom 300 were wounded, and it is estimated that the total losses of the Turks amounted to nearly double that number. During the retreat they are reported to have been reinforced by several battalions of fresh troops. The presence of these reserves is not likely to portend any further efforts against the Canal on the part of the enemy, but it points to El Arish being held in sufficient force to enable small raids to be carried out, unless some steps can be taken to make that place untenable.

In Armenia the Turks have met with better success. Little information of the operations in the neighbourhood of Erzinjan has been published from either side, but it is evident that the Russian advance has been stayed by the course of events to the south-east. Here at a point only fifty or sixty miles south of Erzeroum the Russians have been compelled to fall back before the Turks, who have retaken both Mush and Bitlis. So far the enemy's advance has been in a northerly direction, and if it were capable of serious development, the Grand Duke Nicholas would have to divert his attention entirely from Erzinjan to deal with this southern menace. The configuration of the country, however, at this point does not lend itself to rapid movements in a northerly direction.

From Persia, where the Turks have also been pushing back the Russians from the frontier, comes the first news for several weeks of a Russian success. The Russian advance in the region of the town of Sakiz, it is stated, has ended in the occupation of a very strong Turkish position in the vicinity of that town, and the enemy is retiring precipitately southward. The district mentioned is at a considerable distance from Hamadan, some 170 miles to the north-west. It was known that the Turkish advance into Persia was proceeding on two lines, along the Kermanshah-Hamadan road and sixty or seventy miles to the north of that route. An engagement at Sakiz is more likely to have some reference to the Russian force which at one time had reached Rowanduz. There has been no recent news of this column, which at one time promised to threaten Mosul. The Turks claimed to have driven it back from Rowanduz; but it would hardly choose the Sakiz route. This latter town, however, might be on the route taken by reinforcements for the relief of the pressure in the Hamadan district.

The statement, to which reference was made in these columns last week, that an agreement had been reached between the British, Russian, and Persian Governments dealing with the financial and military affairs of Persia appears to have been premature. In answer to a question in the House of Commons on the day that our last issue went to press, the Under-Secretary of State for Foreign Affairs stated that no agreement had yet actually been concluded, but he trusted that one would very shortly be arrived at with the Persian Government. The general condition of affairs in Persia, he added, has recently shown a decided improvement, and the arrest or dispersal of the German parties or agents in that country gives good reason to hope that this improvement may be maintained.

There is still little more than artillery duels to report from the Macedonian front. The preliminary bombardment enabled the French to occupy Doiran railway station, lying two miles south-east of the town, and Hill 227, but did not bring our Allies into contact with the enemy's permanent defensive works. Operations in this region must of necessity be slow at the outset. The country is mountainous and broken, and there is no open ground for the deployment of large forces. It must also be remembered that the Bulgarians have had ample time to strengthen their defences under German supervision. The task of demolishing these must be performed gradually. Moreover, the quickest way of dealing with the Bulgarians will be by means of a simultaneous attack from north and south. Roumania has not yet taken the step which is to bring her within the Grand Alliance, but the Central Powers, and Bulgaria in particular, are anxiously awaiting the "appointed day."

The German Press announces that Turkish troops—the figures are placed at 150,000 and 200,000—are about to take part in the fighting in Galicia side by side with the Austrians, and hails the event as evidence of the close co-operation which is the birthright of the Central Alliance, and is only now being laboriously aimed at by the Entente Powers. It may be true that Turkey has been called upon to come to the assistance of Austria-Hungary, or it may not be. There can be no doubt that the Austrians need the help, and that the Turkish authorities, knowing what is at stake for them behind the defeat of the Central Powers, would wish to be in a position to send army corps in the place of the divisions asked for. But until the Turkish troops are met with on the field of battle in Galicia we may receive the report with reserve. Their German Allies insist emphatically upon the point that neither the Germans nor the Turks hasten to help one another "from motives of altruistic generosity or tender friendship," but because each country renders itself the best service when it helps the other. The Turks will subscribe to this theory within certain limits. It remains, however, to be seen whether they consider it to be consonant with their own interests to despatch a force to a distant theatre where, apart from its fate at the hands of the Russians, it runs the risk of being cut off from any possibility of returning. It would be strange if the Turks did not try to place some of their troops at the disposal of their Allies, but we cannot help thinking that they are more likely to be encountered in Bulgaria than in Galicia.

Parliament continues to be very properly exercised over the condition of things in Mesopotamia. The Secretary of State for India was obliged to admit that everything was not yet absolutely satisfactory. There can, however, be little doubt that Government is thoroughly alive to the serious state of affairs, and is no longer being put off with misleading assurances. The sufferings of the troops are held to have been due mainly to transport difficulties, and unfortunately these can only be remedied gradually. Transport has been improved, but still leaves much to be desired. The new Director of Medical Services in India went to Mesopotamia on his way out to take up his post, and was able to deal with the defects he found. Everything possible, it is held, is now being done to set things straight.

Considerable dissatisfaction now fastens on the failure of the Government to produce the report of the Commission, consisting of Sir William Vincent, General Bingley, and Mr. Ridsdale, with regard to the medical arrangements and transport in Mesopotamia. The Government contends that as a Statutory Commission has been appointed, since the Vincent Commission reported, to conduct an inquiry into the whole Mesopotamian campaign, the matter is now *sub judice*, and the report cannot be made public. It will be submitted to the Statutory Commission. Mr. Chamberlain gave some indication of the tenour of its contents. "In addition to criticisms of Indian military organization—a matter which is now engaging the serious attention of his Majesty's Government—it mentions certain officers by name as having a grave responsibility in connexion with the state of affairs disclosed by the investigation." He added that for various reasons the Commission was unable to examine any of these officers in person. They would no doubt be examined by the Statutory Commission, by whom their case and the measure of their responsibility would be considered. In the meantime the officers so named have vacated their positions, and new appointments have been made to the posts formerly held by them.

Mr. Chamberlain's reference to criticisms of the Indian military organization may be read in connexion with a previous statement which mentioned the anxiety of the Commander-in-Chief in India to record his own observations on the report of the Vincent Commission. The decision to submit the report to the Statutory Commission may or may not be justified; but the Government would seem to have been somewhat remiss in not limiting very strictly the time allowed to the India authorities to write minutes of the Commission's findings. If sufficient confidence was not felt in Sir William Vincent and his colleagues to admit of their decisions being accepted, they ought not to have been appointed. The somewhat strange course of events points to the Government having had difficulty in making up its mind to bring the India authorities to book. Only the determined attitude of Parliament saved the situation, and now from the tenour of Mr. Chamberlain's remarks the public will be prepared for very high changes in the Indian military command. There is much to be said for the view that men who have been intimately associated with a system that has proved a terrible failure can hardly be expected to carry out with any conviction or enthusiasm the methods adopted to supersede it.

We are glad to see that Mr. Bliss, M.P., has taken up in Parliament the Veshovitch case, to which attention has been called in these columns. On the flight of General Veshovitch from Montenegro, the Austrian Military Governor seized his aged father and one of his brothers, and announced his intention of hanging them unless General Veshovitch surrendered himself to the authorities within five days. A subsequent proclamation stated that the brother had been executed, while the father had been reprieved. The Under-Secretary of State for Foreign Affairs stated that the Government had taken cognisance of this matter, and implied that it would be dealt with in accordance with the decision of the Allied Governments to bring home responsibility to the perpetrators in the enemy nations of individual crimes against civilised law. The British Government's intention was stated with remarkable clearness by the Prime Minister. He said, "The Government are determined that this country will not tolerate a resumption of diplomatic intercourse with Germany after the war until reparation has been made for the murder of Captain Fryatt. Some of our Allies have suffered by brutalities even more gross and on a more extended scale than ourselves from the action of the German authorities. We are in consultation with them as to the best and most effective steps to be taken, and as to what conditions shall be exacted in the terms of peace to secure reparation that will satisfy justice."

An interesting sidelight on the relations between the Arabs and Turks is thrown by the translation of an article in *El Mokattam*, which appears on another page. The Mecca revolt is based on something more than personal antagonism between the Grand Shereef and the Turkish Government. It is the reply of an important section of the Arab world to the persecution of their nationals at the hands of the Turkish authorities; but it has also a religious basis, and represents the growing hostility towards what is regarded as the irreligious attitude of the leaders of Young Turkey. The writer in *El Mokattam* holds the view that the ill-treatment of Arabs is part of the policy of Turkification to which the Committee of Union and Progress is committed, and also attributes to the latter the still more sinister intention of Turkifying Islam to serve their own ends.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, August 2.

The End of Ramadan.

The Ramadan month has come to an end, much to the relief of the Followers of the Prophet, who have suffered unusually severely this year, owing to the abnormally hot and damp weather we have had during July. Bairam passed off very quietly. H.H. the Sultan received the Ulema and the Ministers at Ras-el-Tin on the first day, but beyond that there was no ceremonial, and a book for signature was merely left for the public.

Under normal conditions the close of the Ramadan Fast is a sign for the making of preparations for the annual pilgrimage to Mecca. During the past two years the war, of course, interfered with the performance of this duty, but in view of the events that have recently taken place in the Hejaz it is thought that the pilgrimage might become possible this year. A declaration of the Egyptian Government as to the attitude it will take up towards intending pilgrims is momentarily expected.

Egypt and the Arab Revolt.

Locally, the progress of the Arabian movement is being watched with interest. The publication of the British recognition of the movement was received quite calmly in Egypt, where the inclination amongst the Moslems is to wait on events and eventually side with the victor—a trait that is a peculiar characteristic of the Egyptian race. It is considered that the immediate success or otherwise of the movement which the Shereef is directing depends entirely on the fate of Medina, which the Turks are straining every effort to relieve. The Shereef is now in direct telegraphic communication with the outside world from Mecca, and will, it is believed, issue his own *communiqués* as to the progress of events. For this purpose, and in order to inform the Moslem world of his intentions and projects, his Highness has decided to publish at Mecca a weekly paper to be called *El Kibla*, which will be edited by Fuad Effendi Khatib, late lecturer in Arabic literature at Gordon College.

Coal in Egypt.

The question of the existence of coal in Upper Egypt has at length been definitely decided. It is understood that Mr. Wells, who was specially engaged by the Egyptian Government to investigate the matter, has reported that all hope of finding coal in the region in question must be abandoned. Previous reports written by experts came to the same conclusion, but as the bores never were made on any extensive scale or to any adequate depth a doubt has always existed. Now, however, the point has been settled for all time. Nevertheless, the Egyptian Government has not given up all hope of finding coal; and as soon as the military situation permits, Mr. Wells will carry out researches in the Sinai, where the geological conditions in certain parts are similar to those in the coal area in Syria. It is not expected that the coal, if found in the Sinai, will be of first-class quality; but it will, it is hoped, be sufficiently good for agricultural purposes, which is, after all, the main consideration.

DEATH OF THE SULTAN'S MOTHER.

A Reuter's message from Cairo announces that the mother of the Sultan of Egypt died at Alexandria on Tuesday morning. She had been in ill-health for some time. The annual ceremony of the cutting of the Khalig has been postponed until the 20th inst. The Sultan has requested that there shall be no external manifestations of mourning.

A later telegram (August 16) says:—The Sultan's mother was buried this afternoon. Rarely have larger crowds been seen in the streets of Cairo, and the tarbushes formed a crimson sea. Enormous throngs lined the route, and every housetop and balcony was crammed. The coffin was borne by the Sultan's Marines, preceded by Egyptian infantry and thurifers. A group of Ulema followed the very long cortège, which included everybody of note in Cairo.

THE ARAB REVOLT.

(From a Correspondent.)

Cairo, August 2.

While pressing on with military operations, the Shereef of Mecca is working also on administrative reform. Ridding Arabia of the Turk is for him not the sole aim, but rather a means to an end, which is the establishment of order and security and the leading of the people along the higher path of moral and material progress. Here, as in other parts of the Empire, the presence of the Turk has so far been a stumbling-block in the way of such progress. Arabia is in need of a great leader and reformer, and the Shereef seems to have realised that military success alone may not entitle him to this high position, and that collateral achievements in the domain of administrative and social reform are calculated to secure the support of hesitating admirers. He has just founded in Mecca a paper bearing the appropriate name of *Al Kibla*—the Polar star, so to speak, of Moslems. This may serve not only as a public record of the Shereef's doings for the welfare of the Arabs and Arabia, but also as an organ for the dissemination of his political, religious, and social views.

In Jeddah the task of administrative reorganisation has already been started. Enlightened doctors and Custom House officials, some of them Christians, have been appointed. In Mecca itself, whose soil is sacrosanct, and where only Moslems may be admitted, the recruiting of the *personnel* destined to carry on the work of reorganisation will take more time. Egypt and Syria, however, can supply a sufficient number of enlightened Moslems of modern education to fill the posts; and now that the pacification of the country is likely to proceed apace, thanks to the fall of the last important port on the Hejaz coast—viz., Yambo, the port of Medina—we may expect this serious problem to be tackled and solved ere very long. An official *communiqué* has just been published here, declaring that postal communications between Egypt and the Hejaz have been re-established.

Meantime, the military campaign is being vigorously pushed forward. It is not hoped to reduce Medina by famine, although it is completely invested, thanks to the destruction of the railway for a distance of more than a hundred miles north of the town. The Turkish garrison there is estimated at about a division—a Turkish division is reckoned at about 10,000 only; and with their constant additions of strength the greatly superior forces of the Shereef will not find much difficulty in breaking the resistance of the Turks. The rumoured sending of reinforcements to the extent of about eight divisions to Syria and Arabia may be taken as bluff, if, as seems to be true, the Turks have had to despatch one-third of their effectives to the Caucasus. According to an authority, the whole Turkish forces now under arms and fighting do not exceed 350,000. If two-thirds of these are engaged on the Caucasian front, and 80,000 in Mesopotamia, one fails to understand how eight divisions can be spared for Arabia and Syria, unless other vital parts of the Empire, such as Gallipoli, Thrace and Asia Minor, are depleted.

Meanwhile, although the Imam Yehya maintains an expectant attitude, the Turkish forces in the Yemen, which are estimated by the same authority at not less than 16,000, may be considered as locked up and inevitably doomed to eventual capture. The Imam's feelings towards the Turks are well known, and it is equally well known that he entertains the friendliest relations with the Shereef. The latter, however, has wished to leave it to the Imam to join spontaneously in the great movement at the moment he shall judge most opportune. As is well known, the Imam is not a Sunnite, but a Zeidi; and in spite of the friendliness that exists between him and the Shereef, the latter, wise and sagacious, is exercising the utmost tact and delicacy in his relations with the great chieftain of the Yemen.

Thanks to the efforts of the Rome Committee of the Montenegrin Red Cross and Relief Fund of London, the Italian Government has consented to the removal of the 161 Montenegrin refugees in the Lipari Islands to France, where it is hoped to nurse them to health and then provide employment for them.

SUDAN LEGAL DEPARTMENT.

(From a Correspondent.)

Among other distinguished visitors from the Sudan who may be expected in England shortly is Mr. Edgar Bonham-Carter, C.M.G., who has been Legal Secretary to the Sudan Government since 1899—that is to say, from the commencement of the British Occupation. Mr. Bonham-Carter, who is only now in his forty-seventh year, has had a very successful career. A former pupil of Clifton College, he made a distinct reputation at Oxford, and at twenty-five he was called to the Bar at Lincoln's Inn. Under his control the Legal Department of the Sudan Administration has made remarkable headway. It was under his auspices that the work of introducing into the Sudan a judicial system particularly suitable to the requirements of the country was carried out. Mr. Bonham-Carter speedily found that one of the many serious defects in the system of administering justice in the country was the insufficiency of judges. There are still too few of these officials, but in all probability their number will be added to when the financial conditions of the country allow. The reformation of the judicial system, so far as the establishment of a Court of Appeal is in question, has already been fully dealt with in these columns. That innovation was also due to the perseverance and the aptitude for grasping difficulties shown by Mr. Bonham-Carter. In his own department he has always kept in mind the very desirable avoidance of "the law's delays."

Remarkable, indeed, is the contrast between the expedition of to-day and the tedious, harmful protractedness of all legal proceedings when Mr. Bonham-Carter first took the reins of control into his hands. In the administration of justice throughout the Sudan, expedition and no undue stress laid on the technicalities of procedure are now the main considerations. The Courts endeavour to keep in mind the remark made upon one occasion by a former Master of the Rolls (the late Sir George Jessel)—"the use of a technicality is to defeat justice." The great defect encountered in the Egyptian Courts has always been the slowness of their operation, and Mr. Bonham-Carter early determined that the same reproach should not be earned in connection with those of the Sudan. Even to-day, however, perfection in dealing with the numerous cases which are heard has not been attained, though it is the constant care of the Legal Secretary to attain it. But the difficulties encountered are enormous. The conditions of society and the general state of advance of Egypt and the Sudan are so different as to make it impossible to institute any valid comparisons between the judicial systems in force. The most competent critics are of opinion, however, that the time will come—indeed, they declare that it has already arrived—when the superiority of the system adopted by the Sudan must be acknowledged. At the same time, it is not suggested that the Egyptian system should be altered. There are reasons which point to the fact that any such change in Egypt is undesirable. But the demands of the Sudan are different.

The Legal Department of the Sudan calls for an annual outlay of an amount approximating £E53.000, while the revenue only reaches about one-fifth of this sum. In 1913, for instance, it did not exceed £E9,800, while in the following year (1914) it was £E10,500. The heaviest charges against the Department are the salaries of the Secretary and the Advocate-General, which amount to £E1.800 and £E1,100 respectively. The establishment calls for the employment of a chief judge and five other judges, the first drawing the very modest salary of £E1,500—the pay of the appointment being on the scale of £E1,200, £E1,350, £E1,500.

The Legal Secretary's office employs one Second Inspector, two senior clerks, and nine junior clerks of different classes. The Advocate-General, the Department of Lands, the Land Settlement, the Land Registry Office, and the Police Magistracy find work for a small host of officials. The whole establishment is thoroughly well organized, and there is a complete absence of overlapping in the discharge of the various duties.

In regard to the judges' salaries there is very little relation between the actual payments made and the work upon which they are engaged, which also varies from time to time. The Chief Judge is Mr. W. Sterry, who has been in the service of the Government since May, 1901, and who is considered a sound lawyer with a specially valuable knowledge of land registration. His colleagues on the Bench are Messrs. H. St. George Peacock, M. Fleming, and N. G. Davidson, while Mr. R. H. Dun is Advocate-General. Mr. G. W. Williamson has acted as Judge and Registrar of Lands since early in 1906. The new Court of Appeal was called into being by an ordinance bearing date March 30, 1915, and it has already proved a useful and acceptable institution.

NEWS FROM TURKEY.

(From a Correspondent.)

The American Missionaries—

The extensive missionary work of the American Congregational Board and its affiliated colleges in Asiatic Turkey is practically ruined. Out of three hundred missionaries, some have died and most have been forced into exile. Only a handful of Americans remain in Aleppo, Aintab, Marash, Tarsus, Adana, Konia, Cæsarea, Smyrna, and Brusa. The work of the colleges, except in Smyrna, has ceased. Recently the Government summarily ejected the Americans from their splendid college and hospital at Marsovan, and confiscated the buildings. The missionaries were compelled to leave for Constantinople without even having time to put seals upon their private homes.

Word has come (in July) direct from Sivas that there is little hope of the few missionaries left in the interior being allowed to do anything for the Armenian exiles in Mesopotamia. Until May, Sivas was a centre for communication with the exiles and for the distribution of relief. Now that even the German missionaries are no longer in communication with the deported Armenians, there is no news from Mesopotamia. The very worst is now feared and expected from the Deir-el-Zor region.

—And the Armenians.

The Hon. Henry Morgenthau, former American Ambassador to Turkey, believes that the Ottoman Government will no longer oppose the efforts of the American and German Red Cross Societies to work among the Armenians deported into Mesopotamia. He declares that there are encouraging signs recently, pointing to the possibility of effective relief work among the Armenians and Syrians. The Rockefeller Foundation has now a representative in Constantinople, who is trying to arrange for organised relief work. The American, German, Austrian and Spanish Embassies and the Dutch Legation, together with Mr. W. W. Peet, treasurer of the American Missions, are co-operating with the Ottoman Red Crescent Society to this end.

The Question of Supplies.

Constantinople is out of neither bread nor coal, and there are indications that the petroleum crisis has been avoided for at least another year. Although prices are still soaring, and the poor are consequently in a state of terrible deprivation, stores of necessities do exist in the city. Grain is coming in from Bulgaria and petroleum from Roumania. It is believed by competent authorities that if the Government (German!) takes over the distribution of flour and coal and oil from October to March, there will be neither famine nor discontent in the city next winter. This holds true also of Smyrna and all cities along the railway lines. But the conditions in districts which cannot be reached by railway are very serious indeed. Even during this summer the suffering is terrible. Not more than one-fourth of the normal crop of cereals will be harvested this year. The people can realise nothing on their figs and licorice. The rug industry is dead. Perhaps it is not too much to say that if the blockade and the war continue another year, the Turks and other Moslems of the interior will be in hardly better condition than the Armenians. German organisation and German methods of aid have been able to reach only districts accessible to the few railways.

CYPRUS AND THE WAR.

Under date of July 24 our Cyprus Correspondent writes:—The purchasing of mules for the British Army has been continued, but some of the villagers engaged for service have applied to have their agreements cancelled.

Considerable numbers of youths from different villages have left Cyprus by the last mail steamer for France and America, and many others are said to be preparing to leave.

According to the *Berliner Tageblatt*, the transport of Turkish troops to the European front has now begun on a great scale, and is proceeding without a hitch.

It is notified that all letters for prisoners of war captured at Kut must be written in French. Failure to attend to this notification will probably result in the letters not being delivered.

Referring to Parsi appreciation of the fact that at the battle of Ctesiphon General Townshend gave special orders to protect the venerable Arch of Chosroes, the *World* says:—The text of their address to the General is now to hand, and the following passage is interesting:—"A great and inestimable blessing you have earned by your preservation of the royal dome. As King Darius says on his inscription: 'When thou seest this and dost not destroy it, but preserve it for me, may Auramazda be thy friend; may thy family be abundant and thy life long; and what thou doest may Auramazda prosper for thee.'"

BULGARIAN NOTES.

(From Our Correspondent.)

Bucharest, July 29.

Shortage of Milk and Cheese.

At the last meeting of the Municipal Council at Sofia several councillors complained of the shortage of milk in the capital, amounting practically to an entire lack of this very necessary article. The mayor could only promise vaguely that he would do his best to remedy matters.

Another article which is hardly anywhere to be seen in the markets is cheese, which speculators have been and are, buying up and holding. The military authorities are requisitioning all the output, but the speculators hope to sell their stocks at high prices; for, though the sales will have to be made secretly, they will be protected by the fact that the military regard the buyer as equally guilty with the seller.

The *Official Gazette* publishes a notice to the effect that the production of butter and cheese is to be placed under official control. The entire production of these articles is to be requisitioned for the Army; all dairies will be under the control of the military authorities, and only when the needs of the Army have been satisfied may the surplus be disposed of to the public.

The Beauties of Salonika.

The Bulgarian military authorities must be very hard put to it to keep up the spirits of the Army. They have had written a song which describes the beauties and marvels of that much-coveted city, Salonika. The women of Salonika, says this song, are the most beautiful and the most obliging in the world, and so forth and so on. The newspapers, too, evidently inspired from some Governmental source, are beginning to picture Salonika as a kind of magic city, a place of marvels not unworthy of comparison with some of those wonderful cities raised by the *Jann* in the "Arabian Nights." According to these industrious and docile scribes, gold and silver seem to flow in streams in this fairy-like region; and one paper actually writes of the waves of the Vardar bearing gold in profusion! Another expatiates upon the profusion of wealth waiting the conquerors in the region of Kossovo, where there are gold and silver mines, to say nothing of such base metals as iron and copper, and where diamond mines have now been discovered!

But will all these fine fables have much effect upon the dispirited Bulgarian soldiery? The steady flow of reports of ever-spreading dissatisfaction and the spirit of revolt hardly lead one to think so.

Persecuted Serbians.

The situation of the Serbs under the Bulgarian *régime* appears to be deplorable indeed. According to the *Pravda* of Salonika, the invaders occupy themselves in pillaging, assassinating, and ravishing in a very systematic fashion. The prisoners of war are employed in the factories or on the construction of roads, and latterly many of them have been sent for this purpose to the Italian and French fronts. The male portion of the population of New Serbia has been forcibly enrolled in the Bulgarian Army, and these luckless soldiers are now on the Balkan front. All males between the ages of eighteen and forty-five have been thus impressed. Then, too, all the Serbian priests have been replaced by Bulgarians, and as a result the churches are deserted! All foodstuffs have been requisitioned, shops are pillaged during the night, and entire villages are burnt to the ground under the pretext that they afford aid to the "insurgents." Even children cannot pass along the roads without having "Serb" shouted at them by the Bulgarian and German soldiery, and one seldom or never sees the national headdress, which is sure to provoke insult if not assault.

Under date of August 10, Reuter's Bucharest correspondent reports:—About 20 persons were killed and 150 injured, most of them seriously, in an explosion at a military powder factory at Dudeshti, near here. The explosion was accidentally caused in the ether reservoir, and apart from the loss of life only unimportant damage was done. Among the killed are Colonel Albou and two other officers. Work will be resumed to-morrow, as the workshops are undamaged. The King and Queen have been on the scene of the explosion, and visited the injured in the hospitals.

A POTENTIAL BATHING RESORT.

A Hint for Alexandria.

(From a Correspondent.)

Contrary to the tendency exhibited by most large cities, Alexandria has developed eastwards, and continues so to do, although, to a resident of some years' standing, with considerable knowledge of the surrounding country, the reason has never been apparent. Had its development been normal in this respect, the thoroughfare known as the Sharia Prince Abdel Moneim might very well have been a fashionable shopping centre, and Mex, Dekhela, and onwards a no less fashionable and prosperous suburb. A residential quarter thus situated would have had much to recommend it.

For many people a glamour of interest and romance attaches to the coming and going of ships in a harbour such as that of Alexandria. The Ramleh coastline is uninteresting, for only occasionally is a ship to be seen on the horizon, and those who are fond of yachting often bewail the distance they must traverse before they can weigh anchor and indulge in their favourite recreation. Here coasting is impossible, nor is there safe anchorage for a yacht along the rock-bound shore from the "Hole in the Wall" to Montaza and onwards until Abukir is reached.

And despite all the precautions of a vigilant municipality, the Ramleh bathing season still claims its victims. Even in places such as Stanley Bay and Glymenopoulo it is inadvisable for bathers to venture far from the shore, save in the calmest of weather. Some five or six years ago a preliminary survey of the neck of land stretching from Mex, through the village of Dekhela to Fort Agami, was undertaken by a local civil engineer. As explained to the writer, the idea was to open up the neighbourhood by means of a branch line of the Alexandria Tramways Co., starting from a central point in the town and ignoring entirely the present Sister Street route. Actually the plans were submitted to the municipality; but the scheme was not proceeded with. According to my informant, it would have been possible with a rapid service of trams to have accomplished the journey from town through Dekhela to Agami by the route suggested within an hour. The repeated visits of the engineer excited some local interest, which had its manifestation in a mushroom-like growth of boundary stones all over the sand-dunes of the peninsula which terminates at Agami, whilst one or two building sites on the sea front at Dekhela actually changed hands.

Few Alexandrians are aware, one ventures to think, that on the Mediterranean side of the neck of land running in a westerly direction from the fort, there is a magnificent potential bathing resort, where the beach shelves so gradually that it is possible to wade out for two or three hundred yards along a wide front without being out of one's depth. There are no pebbles to cut one's feet, only firm white sand, and in the sunshine the deeper water is clearly defined by its colour as it changes from brilliant aquamarine to sapphire. Here, save in the stormier weather, the long waves roll languidly in; there are no rocks to break their even progress, and, as a consequence, no treacherous currents to disconcert the swimmer.

The coastline stretching away towards Abusir, parallel with the Mariout lake, curves but slightly for as far as the eye can reach, and ever and always there is the white sand, strewn here and there with patches of sun-dried seaweed. This is no landlocked bay of the like of Abukir where, of a still day, the water is almost stagnant. Here the air comes pure and fresh across hundreds of miles of open sea. The land lying back from the beach is broken up by innumerable sand-dunes, in the hollows of which the Bedouin of the Aoulad Aly tribe cultivate tomatoes in desultory fashion during the spring of the year. There are also uneven patches of barley, burnt and shrivelled by the sun, with small prospect of any harvest. The quail season may bring two or three natives, or an itinerant Greek for a few days, with his tent and nets, but, apart from these and the coastguard patrols, the region remains unvisited.

A well-known Italian contractor has built himself a *pied-á-terre* overlooking the beach, and the legend runs that he is occasionally in residence during the summer months. There is also a much more substantial structure lying farther back from the shore beneath a clump of palm-trees; never inhabited, never, indeed, completed, it bears material witness to a passing fancy.

Sooner or later some enterprising capitalist will realise the possibilities of this wonderful beach, and that which M. le Baron Empain and his associates accomplished at Heliopolis may very well find its counterpart between Dekhela and Agami. Unless he be horseman or yachtsman, however, our capitalist will find his potential subject difficult of access, especially when he leaves the harbour side of the shore to try conclusions with the sand-dunes.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Mesopotamia: Transport Difficulties. Aug. 15.

Viscount MIDLETON had given notice that he would ask that the report of the Vincent Committee should be laid upon the table. He said, however, that he would refrain from doing so after the Secretary for India's statement in the House of Commons on the previous day. But he wished to ask whether the awful state of the hospitals had now been ameliorated. He had information that as late as June 21 an officer found some of his men in a hospital where the temperature was from 115 to 117 degs. They were in their hot and dirty clothes, and the ration was four Army biscuits per day and Tigris water. That was irreconcilable with the telegram which Lord Curzon received from India and read during the last debate on the subject.

Lord SYDENHAM stated that he had met a senior officer who left the front in Mesopotamia a month ago. That officer said things had improved a little bit; the rations were better, and what the men suffered mainly from was want of shelter from the sun. There were no mats. The medical provision was still insufficient, but it had improved.

Lord ISLINGTON said that he could not, in the circumstances, give a carefully-considered answer. The position in Mesopotamia was still not as satisfactory as they could desire. That was largely due to the immense difficulties attaching to transport in the country; but these difficulties were being overcome as fast as possible. He would point out to the House that, instead of decreasing, these difficulties seemed to increase with the prolongation of the campaign. The amount of transport which this country and India had now provided was considerable. Some of it had arrived and some was on its way. Alterations had been made in the responsible positions in Mesopotamia, and they hoped the difficulties would be overcome. The Secretary for India had asked him to say that in the report by the Vincent Committee special recognition was given to the very valuable services rendered by the officers and men of the Royal Army Medical Corps and the Indian Medical Corps, who, under unspeakable difficulties and with very inadequate staff and equipment, did what they could to mitigate the suffering of their fellow-countrymen.

The Marquess of SALISBURY recognised that too much importance should not be attached to the private reports which came from Mesopotamia. Those who made them might have seen but a limited portion of the field, or might have been misled. But after making all allowances, it would appear that the state of things continued not to be good. He thought it would reassure the country if the Government would say that the Vincent report confirmed the statement made to the House some months ago that "everything possible was now being done."

Lord ISLINGTON said that only a few weeks ago he was able to give the House information that medical supplies, boats, and other necessaries were being rapidly supplied from this country and India. The difficulty now was not the provision of things that were required, but their transport up country.

HOUSE OF COMMONS.

Number of Turkish Prisoners. August 10.

Mr. FORSTER informed Sir E. Cornwall that, according to the latest returns his Majesty's Forces had taken prisoners 425 Turkish officers and 9,598 of other ranks, exclusive of the prisoners recently captured in Egypt.

Our Troops in Irak.

Mr. FORSTER, answering Sir E. Cornwall, said he could not say that the general health of the troops in Mesopotamia was good, but every effort was being made to combat the causes of disease. The Mediterranean Sanitary Committee had been sent to Mesopotamia to assist the local military authorities.

Anglo-Persian Relations.

Sir E. CORNWALL asked whether the Under-Secretary for Foreign Affairs could give the House any information as to the present general condition of affairs in Persia; whether any recent arrangements had been concluded between Persia and his Majesty's Government relating to the financial and military reorganisation of that country; and whether Anglo-Indian officers would be employed in Southern Persia in officering the gendarmerie.

Lord R. CECIL: The general condition of affairs in Persia has recently shown a decided improvement, and the arrest or dispersal of most of the German parties and agents in that country gives good reason to hope that this improvement may be maintained. In regard to the second part of the question, while no agreement has yet actually been concluded, I hope that an arrangement on financial and other questions may very shortly be arrived at with the Persian Government, who have shown a sincere desire to work with the Allied Governments. The answer to the last part of the question is in the affirmative.

British Prisoners in Turkey.

Sir E. CORNWALL asked the Prime Minister whether, in view of the failure of the Turkish Government to reply to the British Note of July 6 regarding the treatment and condition of British prisoners, the Government proposed to warn the leaders of the Young Turkish Party that they will be held personally responsible for any untoward results which may happen to the British officers and men in their hands.

Lord R. CECIL: The Porte was warned in July, 1915, that all Turkish Ministers and officials would be held personally responsible for damage and loss of whatever kind suffered by individual British subjects detained in Turkey. We are renewing this warning with special reference to our combatant prisoners. I must, however, point out that in time of war it is futile to expect words to be effective, and that the defeats which the Turks are now suffering are much more likely to be effective than any threats used by the Foreign Office.

Condition of Kut Captives. August 14.

Replying to Colonel YATE, who asked for information regarding the prisoners taken at Kut, Lord R. CECIL stated that no further information had been received regarding the treatment and condition of the prisoners. The United States Embassy at Constantinople sent clothing, comforts, and money to the prisoners as soon as their arrival at an internment camp was known. He had no doubt they would send further information shortly. The main cause of uneasiness as to the treatment of our prisoners of war by the Turks was their refusal to allow them to be visited by American officials. This appeared to be due to the perversity or worse of the Turkish Government. Individual Turkish officers had, by all accounts, generally behaved with humanity and consideration to British prisoners.

Montenegro and Albania.

Lord R. CECIL informed Sir E. Cornwall that he had received, and read in the Press, reports as to disturbances in Montenegro and Albania, but had received no reliable information or confirmation regarding these incidents. He feared, from reports that have reached the Foreign Office, that very great suffering prevails in those two countries.

The Vincent Report.

Mr. CHAMBERLAIN, answering a question by Sir H. Craik, said that copies of the report of Sir W. Vincent, General Purling, and Mr. Ridsdale with regard to the medical arrangements and transport in Mesopotamia were despatched from India last month, and the appendices, including the evidence, were sent early this month. He was informed by the Viceroy that a general view of the report and its appendices would follow as soon as they had been carefully examined. Since the Vincent Commission reported Parliament had appointed a Statutory Commission to inquire into the conduct of the operations in Mesopotamia, including *inter alia* "the provision for the sick and wounded," and this Commission was specifically directed "to proceed with all possible expedition to inquire with regard to the provision for the sick and wounded," and to "report the result of their inquiries on this matter as soon as they are completed." All the documents emanating from the Vincent Commission would be laid before the Statutory Commission as soon as received, and would, he thought, greatly facilitate their task. Meanwhile, the matters treated by the Vincent Commission must be considered as *sub judice*, and their report could not be published. The House had the assurance of the Secretary of State for War that everything possible was being done to remedy the defects disclosed, which were largely, though not entirely, due to difficulties of transport. He had seen an advance copy of the report. In addition to criticisms of Indian military organisation—a matter now engaging the serious attention of his Majesty's Government—it mentioned certain officers by name as having a grave responsibility in connection with the state of affairs disclosed by the investigation. For various reasons the Commission was, he believed, unable to examine any of these officers in person. They would, no doubt, be so examined by the Statutory Commission, by whom their case and the measure of their responsibility would be considered. Meanwhile he might say that the officers so named had vacated their positions, and new appointments had been made to the posts formerly held by them.

Sir E. CARSON asked whether the right hon. gentleman was aware that there were still very unsatisfactory reports coming from Mesopotamia, and whether he could assure the House that any suggestions made by the Vincent Commission would be at once carried out.

Mr. CHAMBERLAIN: I am aware that everything is not yet absolutely satisfactory. That was stated by the Secretary for War the other day. Although the difficulties of transport have not yet been wholly overcome, and cannot be for some little time, I believe matters have much improved. The new Director of Medical Services in India went to Mesopotamia, on his way to India, and dealt with the defects he found; and I think everything possible is being done to set things straight. The appointment of the Statutory Commission shall not be used as any reason or excuse for not taking any immediate steps where these are shown to be necessary.

Mr. R. M'NEIL: Will the report of the Vincent Commission be published eventually, whether it is in agreement or in conflict with the report of the Statutory Commission?

Mr. CHAMBERLAIN: On my suggestion his Majesty's Government promised to the House some time ago that they would lay papers in regard to the Mesopotamian operations. When these papers were collected and submitted to our military advisers, they reported that it was contrary to the public interest to publish them, because they would give information of military value to the enemy. I cannot therefore promise to present any further papers with regard to military affairs or operations until these papers have been seen and examined by the General Staff.

Germans Captured in Egypt.

Mr. FORSTER informed Sir E. Cornwall that 25 Germans, rank and file, were captured in Egypt during the fighting between August 3 and August 11.

Rations at Salonika.

Mr. FORSTER, in reply to Mr. Grant, said he was informed by the General Officer Commanding that there was no foundation for any complaint about the shortage of rations at Salonika.

Digitized by Google

Postal Service to Mesopotamia.

Mr. FORSTER, replying to Mr. R. M'Neill, said that a report, dated June 30, had recently been received from the Government of India on the subject of the military postal service in Mesopotamia. It stated that shortage of river transport caused serious delays in carriage of mails, especially parcels, during the early months of the year; but at the time of the report the inward mails were being cleared from Busreh within a week of arrival at the rate of 90 bags a day, and it was hoped by August 1 to send on the whole of the English mail on the day of arrival. They had not traced any cases of pilfering. Inadequate addresses and movements of addressees, and, in the case of parcels, insecure packing, must account for a good many miscarriages. He would communicate further with the Government of India on the subject.

Mr. PEASE informed Mr. Grant that money might be remitted by the troops in Mesopotamia either by postal order or by money order. He found that about 6,000 money orders were advised from the field in Mesopotamia during the last six months. All these had been delivered except about 40, where the addresses were incorrect or insufficient, and in those cases the senders had been notified. If particulars were furnished to him of any case in which a remittance sent home by a soldier in Mesopotamia had not been delivered he would be glad to make inquiry.

Sun Helmets at Salonika.

August 15.

Mr. G. FABER asked the Secretary of State for War whether there was an insufficiency of sun helmets for our troops at Salonika, and an insufficiency of punkahs for the sick and wounded there.

Mr. FORSTER said that there was no insufficiency of sun helmets. A sufficient supply to cover issues to the whole force was sent forward from Egypt last month. No representations had been received as to any insufficiency of punkahs for the sick and wounded.

Mr. G. FABER: Is it a fact that quite recently numbers of troops were wearing soft hats; and are not punkahs required as a matter of course in a hot climate?

Mr. FORSTER: I cannot say anything further with regard to the question of punkahs. I understand that no representation has been received as to any insufficiency. It is a fact that until recently the troops were wearing sun hats and pugarees. It became evident that these were insufficient protection. They asked for sun helmets and these are being sent.

Letters for Mesopotamian Force.

Mr. HERBERT SAMUEL, replying for the Postmaster-General to Sir G. Toulmin, said that letters were despatched each week to the Mesopotamian Expeditionary Force, and, as far as the Postmaster-General knew, the Indian postal authorities, to whom they were handed at Bombay, ensured delivery to the addresses wherever possible. Some delay seemed to be inevitable. So far again as he knew, there was no reason why telegrams addressed to members of the Mesopotamian Expeditionary Force should not be delivered, but in any specific case of the failure of a telegram to reach its destination he would be happy to make inquiries.

An Austrian Outrage.

August 16.

Mr. BLISS asked whether the Foreign Under-Secretary was aware that a few weeks ago Field-Marshal von Weber, military governor of Montenegro, issued a proclamation to the effect that if General Veshovitch, the Montenegrin ex-Minister of War, and his two brothers, who had fled from the country, did not surrender themselves within a few days, his father, aged seventy-five, and another brother, who were held as hostages, would be hung; whether he had any official information showing that this threat had been carried out; and, if so, whether he would take cognisance of the fact and hold Field-Marshal von Weber personally responsible for the outrage at the end of the war.

Lord R. CECIL replied that information in the sense of the first part of the question had reached the Government, and in a subsequent admission in the *Vossiche Zeitung*, an official newspaper published at Serajevo, it was stated that the brother of the General was executed, and his father, by an exceptional act of mercy, had been reprieved.

FEEDING STUFFS
SUCH AS BRAN, POLLARDS, COCKLES,
TARES, FENUGREEK, HUSKMEALS, &c.
KUYPERS, OSTLER & SCOTT,
LOWGATE, HULL.
Established over 50 Years. Cablegrams: KUYPERS, HULL.

Egypt's West Frontier.

Lord R. CECIL, replying to Sir E. Cornwall, said: The situation on the western frontier of Egypt may now be regarded as far more satisfactory. It is, however, not opportune at the present moment to inform the enemy of action which the British and Italian Governments, who are working in complete accord, may find it desirable to adopt at some future time.

Hospital Ships in the Mediterranean.

Mr. FORSTER, replying to Captain Ormsby-Gore, said that it was impossible to provide for hospital ships in Egypt to meet the Indian hospital ships, and patients from India had to be transferred to hospitals in Egypt until they could come on. There had been a shortage of hospital ships in the Mediterranean lately owing to the heavy requirements arising from the operations in France, but this had now been remedied.

LETTERS TO THE EDITOR.

"SERBIAN MACEDONIA."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In addition to what you wrote with respect to Lady Grogan's letter on my pamphlet, "Serbian Macedonia," I should like—by your leave and that of Lady Grogan, to whom we Serbians are very much indebted for the great services she has rendered to our country—to state the following:—

I think the moment is most opportune to discuss the matter contained in my pamphlet. I wrote it in order to refute the entirely different and entirely erroneous point of view which is said to exist on the question. I am perfectly prepared to support a polemic on it. My pamphlet is an historical study with a strict scientific character. It represents to a large extent the results of my own investigations in connection with the subject, which are original. These investigations are based on a literature written in English, Russian, Serbian, German, and Bulgarian, which is all to be found in the British Museum. This literature is at the disposal of everyone, and I shall be very glad to have a competent criticism of my opinions. Then perhaps I shall also be informed in what way my arguments could be used to support a very different case, of which I am now completely ignorant.—I am, etc.,

PAVLE POPOVIC.

Lyncroft, Holmesdale Road,
Kew Gardens, S.W.

CZECH AND JUGOSLAV COMMEMORATION OF THE DECLARATION OF WAR.

Last Friday the Czech and Jugoslav colony in London held a public meeting at the Y.M.C.A., Tottenham Court Road, to commemorate Great Britain's declaration of war on Austria-Hungary. Viscount Templetown was in the chair, and among the speakers were Mr. J. A. Seddon (late president of the British Trade Union Congress), Professor Masaryk (of King's College, London, and late Czech deputy), Dr. Hinko Hinkovitch (late Croatian deputy), and Dr. R. W. Seton-Watson. The proceedings throughout were most enthusiastic.

Professor Masaryk said that a common interest united Great Britain with the Slavs of Austria-Hungary, for that Power was the pan-Germanic bridge to Egypt and Africa—the goal of Germany's colonial ambitions.

Dr. Hinkovitch said that so soon as Germany was no longer able to use the fifty-one millions of Austrian subjects she would be secluded from the Balkans and from Asia, and Great Britain would be freed from the menace of Prussian militarism.

Dr. Seton-Watson said that if people in high places had realised two years ago the importance to this country and to the Entente of the Austrian and Balkan problems, we should now be further on with the war than we are. Germany's ultimate aim was the destruction of the British Empire, but her immediate aim was the creation of a mid-European state with 150 million inhabitants, controlled directly or indirectly from Berlin. To prevent that we had to detach the fifty million inhabitants of Austria-Hungary from the clutches of Germany. Serbia had been attacked for the same reason as Belgium had—because she stood in the way of German aggression. Some Americans now were talking seriously of a peace based on the *status quo* and a league to prevent war. A league to prevent war would be admirable, but we did not want the *status quo*. The old Europe was gone, a new Europe was wanted; and that must be based on the liberation of the Slavonic democracies of the centre and south of Europe.

A resolution was passed with acclamation drawing the attention of the British Government to the necessity for the disruption of Austria-Hungary so as to secure the future peace of Europe.

The Athens correspondent of the *Times* states that rumours current that the Greek elections will be postponed beyond October 8 are contradicted by a member of the Ministry, who states that the dissolution decree will be issued at the beginning of September.

TANGIER TO TEHERAN.

That "blessed word 'Mesopotamia,'" which proved so comforting to a certain old lady, must, I think, have changed its character of late. At any rate, the region to which it has come to be applied—quite erroneously, as has been pointed out again and again in THE NEAR EAST—is like to be regarded with feelings of anything but affection by many of our countrymen—and their relatives—for many a long day. There appears to be only too good reason for concluding that our troops out there are still suffering much from sickness, and possibly more from the climate; though it is satisfactory to know that everything possible is being done to remedy this state of affairs. What strikes me as the strangest part of the business is that nobody who really knew anything about "Mesopotamia" and its climate seems to have been consulted by the powers that be before the Expedition was despatched. At any rate, that is the impression one receives from a perusal of Parliamentary debates on the subject, of what appears in the Press, and of what is written home by men who have been through the fiery furnace of a summer on the Lower Tigris and Euphrates.

***

This is all the more strange because, though even to-day there are comparatively few people here who have any correct idea of what the climate of that region is like, there were, and are, at least a score who could have given just the information that would have been most useful. Apart from officials and former members of the British communities in Baghdad and Busreh, there was, for instance, Sir William Willcocks. If he was not available at the precise moment he was wanted, there were surely some members of his staff, to say nothing of other travellers who knew the region intimately. Had any of these been consulted there might be a different tale to tell to-day. As it is, I understand that a very talented lady who knew northern Turkey in Asia and the *real* Mesopotamia (north of Baghdad) is now on the spot. After this who shall say that our wiseacres are not ready to take advice?

***

There, for the present, we may leave the subject. It is to be threshed out, without fear or favour, let us hope; and little good can be done by demanding any particular person's scalp at present. Nor, I think, can clamouring for the recall of the men who are doing their best to undo the harm that has, admittedly, been done, be productive of anything but further harm. There is so little trustworthy information available to-day that none of us can judge the case fairly. But I do not mind hazarding the guess that when at last the whole truth is known and published it will be found that the Government of India—which is just now coming in for a great deal of ill-informed criticism—has been able to give a very good account of itself in regard to this business.

***

I am indebted to two correspondents for sending me particulars of one of the latest steps in Bulgaria's efforts to provide the blessings of *Kultur* for the "occupied territories." The starving population of these territories is, as we know, crying for bread: the munificent Government at Sofia gives them—not stones, it is true, but books! In other words, libraries are to be established in the more important centres of these territories; and presumably the starving people will be invited to forget their hunger in enjoyment of the rich literary feast provided for them by the beneficent Bulgar. Here is a prospect to gladden the heart of Mr. A—— C——.

***

One of my correspondents, however, is somewhat sceptical about the quality of the literary fare to be set before the "conquered" people. He is unkind enough to suggest that the undertaking "will provide yet one other 'little affair' for the agents of M. Radoslavoff, who are charged with the duty of obtaining the necessary books and arranging the libraries." And he adds that: "Some time ago all the bad writers of Bulgaria, finding a ready market for their 'talent,' attached themselves to the Bulgarian Prime Minister, who commissioned countless books, pamphlets, etc., in the service of German propaganda." Strange to say, this choice literature "hung fire" sadly, and the public did not rush to buy it, as its authors—and their patron—doubtless expected. Now, my correspondent suggests, "a new use for the stuff is to be provided, in the form of these libraries," of which a hundred are to be organised. Truly, M. Radoslavoff is an ingenious person, with a fine taste for turning to account material which would otherwise be absolutely wasted. And, one supposes, he will have his reward. The Bulgarian peasants of to-day and to-morrow may curse him, as the traitor who sold their country—at a price satisfactory to himself. But all "the bad writers of Bulgaria" will undoubtedly call his name blessed!

It is not often that one catches the *World* tripping, but in one of the "What the World Says" paragraphs this week I detect a couple of errors. The writer is referring to the appointment of Lieutenant-Colonel Sir Percy Molesworth Sykes as organiser of the new police force in Southern Persia, and he remarks that "Colonel Sykes, who is no relation to Sir Mark Sykes, another Persian expert, is an admirable choice." I quite agree as to Sir Percy Sykes, than whom no better or more suitable man could have been found for the work he has taken in hand, as, I think, I observed at the time of his appointment. But has the *World* already forgotten that "Lieutenant-Colonel Percy Sykes" is a K.C.I.E.? And to refer to Sir Mark Sykes as "another Persian expert" is incorrect. Sir Mark has a remarkable knowledge of Turkey, especially of Asiatic Turkey—a knowledge gained in the course of many years and at the cost of many long journeys. But he would, I am sure, be the first to disclaim any profound knowledge of Persia.

***

Generally speaking, the peoples of the Levant and the Near East do not, I think, set so much store by a good dog as does the average Englishman. The shepherd may value the animal—often a fierce one—that helps him guard his flock, but he seldom makes a friend of it; similarly, the half-settled Arab encourages to a certain extent the watch dogs that make approach to his tents a matter of some anxiety to the traveller unacquainted with their peculiarities; while the true Bedawi and the Persian sportsman often shows something like affection for his swift greyhounds. Occasionally, too, you will find a Syrian, an Egyptian, or a Greek shooting man who owns a decent sporting dog of sorts; and, of course, wealthy pashas and princes often give a very high price for a showy big dog—Great Danes or boarhounds being the favourites, by reason, I suppose, of their short coats and their fine colours. But you seldom come across any native of the region referred to making a "chum" of a dog as an Englishman will do. This may be a result of the Moslem idea that the dog is an "unclean" animal; or it may be merely due to certain drawbacks attendant on dog-keeping in a hot climate. Be that as it may, the fact remains that "Man's best friend" is but little understood in the Near East, where a pure-bred dog is a rarity.

***

These thoughts have been suggested to me by a little tale that a Greek gentleman told me a short time ago about the late King George of Greece. The gentleman referred to was living in Athens at the time, and he owned a fine dog, which, as far as I can make out from his description, seems to have been a Landseer Newfoundland. One day, accompanied by this animal, he was taking a walk when he met King George, also walking. The King glanced at the dog, then stopped. "Your dog wants water," said he, speaking in the easy way he knew so well how to adopt with his subjects. "But, sir," stammered the Greek, somewhat taken aback by the royal condescension, "I gave him a good drink just before I left home." The King smiled. "I mean that he wants to go into the water; he wants a swim," he said. "Do you not know he is a water-dog? Look at his paws." And stooping over quickly, he lifted one of the dog's feet and showed its webbed toes. "And I was dreadfully frightened," said the Greek, in telling me of the incident; "for, as a rule, the dog would never let strangers go anywhere near him, let alone touch him. But he did not mind the King doing so in the least. He just sat there, with his tongue lolling out of his mouth, quite gentle." Which seems to show that the animal knew a gentleman and a dog-lover when he saw one.

***

A friend home from the front was talking to me a few days ago about the Battle of Jutland, when he mentioned, apropos of the loss of the gallant little Tipperary, that the name is an "unlucky" one. I find on inquiry that many of our fighting men share this view, and even dislike to hear the tune whistled or hummed at any "ticklish" time. And I suspect that there is in Egypt just now at least one native who is quite ready to believe that bad luck attaches to the famous song. It seems that some little time ago a certain native paper offered a prize for the best Arabic rendering of the ditty. The task of translating it can hardly have been an easy one; indeed it is one that any but the boldest man might well be pardoned for "funking." But some bold spirits essayed it, and, in due time, a certain Sheikh Ahmed Ashour was duly adjudged the winner. Then the trouble began. The journal which organised the competition was ready, so to say, to crown the successful poet's work—but not to hand over the monetary prize promised. As a result the Sheikh, wroth, no doubt, at the thought of burning the midnight oil in vain, has instituted an action against the proprietor of the journal. At the time of writing I do not know the result of his action, and, of course, I must refrain from comment upon a matter still *sub judice*. But I fancy that the translation of "Tipperary" is worth a good many piastres.

CORSAIR.

NEAR EAST BOOKSHELF.

AN ADMIRAL IN THE MAKING.*

The number of "war books" is already large, and it is obvious that eventually the sum total will be an enormous one, but "From Dartmouth to the Dardanelles" is unique, and likely to remain so. The person who cannot enjoy it, who can read it without a thrill of pride in his race and in that great Service to which we all owe so much, is to be pitied indeed. The mother of the anonymous author need have no qualms of conscience about having given it to the world; she has done her country a fresh service thereby, and we shall all feel very grateful to her.

The story, so we are told in the "Foreword," has been compiled from a narrative written by a midshipman during a spell of sick leave last December; and we agree with the young officer's mother that "considering that all his diaries were lost when his ship was sunk, it may at least be considered a not inconsiderable feat of memory." It is that, and it is more—much more. It is a fascinating record of some fourteen months of crowded, glorious life, the last ten of which were spent in "the thick of things"; and to Englishmen the world over it should be, and surely will be, an inspiration. The author is a mere boy in years—fifteen apparently when he wrote this narrative—and a very human and real boy at that, with a taste for getting into an occasional scrape and having an occasional grumble; but he has already had experiences which have been denied to many an octogenarian; and if his method of telling them very often betrays the unconscious plagiarism (in the matter of phraseology) of the boyish writer, that fact in no wise detracts from the charm of his work, which is, upon the whole, singularly free from affectation and self-consciousness. From the day he takes us to Dartmouth with him, fresh from his two years at Osborne, to the day we bid good-bye to him in S—— Place, home on leave after a wonderful escape at the Dardanelles, where his ship was torpedoed by a Turkish boat—"a jolly smart piece of work," as our midshipman calls it—and sunk in three and a-half minutes, we find his company excellent. To the uninitiated the first chapters, dealing with pre-war days, are almost as interesting as those which describe the stirring events in which the writer took part "on active service."

In the early stages of the war his ship was engaged on various duties in the English Channel and the Irish Sea, and was fortunate enough to account for at least one hostile craft, a torpedo-boat masquerading as a fishing smack. Several prizes were also captured—and, one hopes, condemned in due course by the Prize Courts. Then, in a grand hurry—she was actually chasing a German barque when the wireless message arrived—the good ship was ordered off "abroad." Down the Mediterranean, through the Red Sea, and on to Bombay we accompany the author, who has a good many shrewd remarks to make about various places familiar to many readers of THE NEAR EAST, who will find them often amusing. Do we not, for instance, know the ways of the traders at Mediterranean ports when dealing with travellers or sailormen who have no time to spare and urgently require some article of necessity? Shall we not, with the author's mother, admire the wisdom of the commander who refused leave to a party of youthful midshipmen who wished to go ashore at Port Said, and who made them "draw a section of the ship instead, which seemed adding insult to injury!" And can we not sympathise with the youngsters when they had their "first experience of that most objectionable thing called 'prickly heat,' and did not like it at all"? At Jeddah it was hoped to find the Koenigsberg, but the Consul—"a rather sly Arab"—denied that the ship had ever been there, and the hopes were destined to disappointment.

At Bombay the good ship became part of the escort to a large convoy bound for Tanga; but, owing to engine trouble, had to fall out and make her way to Mombasa. Here the author, with others, had a brief spell on shore as one of a party charged with keeping a look-out for enemy craft; and though no enemy craft was obliging enough to walk into the trap that had been prepared, the look-out party had quite a good time. Then follows a capital description of the bombardment of Dar-es-Salaam, brought about by a typical bit of German treachery, of the white flag description, which, most readers will agree, fully justifies the midshipman's outburst: "The treacherous, dishonourable devils!" To read this account is enough to make any self-respecting man firmly resolve never again to have any dealings with a Hun.

What we are told of the Dardanelles operations, and of the author's share in them, is extremely interesting. But we are not told much. As his editor says in a graphic note:—

> . . . I think he felt it too big a thing to tackle.
> The epic of the Gallipoli landings will, let us hope, one day be written by a pen worthy to depict that immortal tale of heroism, but I doubt if the whole truth can ever be spoken or written. . . . A word, a sentence here and there, may lift for a moment a corner of the veil, but only those who went through that inferno will ever fully realise its horror.

The description of the loss of his ship is, however, particularly vivid, because he tells us only just what he himself saw, felt, and thought at the time. Of his rescue—in the nick of time, after a very long swim—we read with a catch of our breath. And then he proceeds to tell us how he manœuvred to get appointed to a T.B., and how, having succeeded, to his "intense delight," he enjoyed the three weeks he spent in this exacting service. Mercifully it occurred to someone that a boy of his age might possibly be all the better for leave after such an experience as he had gone through, and "with some surprise and much regret" he found himself ordered home. So, in England once more, we take leave of him as reluctantly as he took his own leave, and wishing him the best of health and luck in the future.

* "From Dartmouth to the Dardanelles: A Midshipman's Log." Edited by His Mother. (Heinemann. 1s. net.)

BOOK NOTES.

Part XII. of "The Great World War," edited by F. A. Mumby (Gresham Publishing Co., 2s. 6d. net), deals with, *inter alia*, the Mesopotamian Campaign, the invasion of Serbia, and the Armenian massacres.

Mr. Heinemann will publish in the autumn "The German Road to the East," by Mr. Charles Lewin, author of "The Germans in Africa."

Mr. Arthur Ruhl, an American war correspondent, has written "Antwerp to Gallipoli," which Messrs. Allen and Unwin publish.

Miss Flora Sendes, an Irishwoman who went to Serbia as a nurse, who later joined the Serbian Army as a private, and who is now serving as a sergeant, has written an account of her experiences, which Messrs. Hodder and Stoughton will publish under the title, "An English Woman Sergeant in the Serbian Army."

At the request of the trustees of the late Earl Kitchener, Sir George Arthur, who was his private secretary, has undertaken to write the Life of Lord Kitchener. All Lord Kitchener's private papers and correspondence have been placed in Sir George Arthur's hands for the purpose of the work, and he will have the benefit of the co-operation and assistance of the Earl of Derby. The book will be published by Messrs. Macmillan and Co.

Messrs. Harrap and Co. have just published "Song of the Dardanelles and Other Verses," by Henry Lawson. The price is 2s. 6d. net.

Messrs. Macmillan have published recently "Early Forms of the Cross from Egyptian Tombs," which is reprinted from "Ancient Egypt," Part III. The price is 1s. 6d.

BOOKS RECEIVED.

The Russians and Their Language. By Madame N. Jarintzov. With an Introduction and Preface by Nevill Forbes. (Oxford: Blackwell. 6s. net.)

The Book of Pirates. By Henry Gilbert. Illustrated by J. Finnemore. (Harrap and Co. 5s. net.)

Le Declin de l'Hellénisme. By L. P. Alaux and R. Puaux. (Paris: Payot et Cie. 2 fr. 50 c.)

War Letters. By Oliver Bainbridge. (Cursitor Publishing Co. 3s. 6d.)

In the Hands of the Senoussi. Compiled by Mrs. Gwatkin-Williams from the Diary of Captain Gwatkin-Williams, R.N., H.M.S. Tara. (Pearson. 1s. net.)

ARMENIAN REFUGEES FUND.

The Committee of the Armenian Refugees (Lord Mayor's) Fund make a fresh appeal for help. Between October 15 and June 30 they received in donations £55,458, of which £52,550 was remitted for the relief and repatriation of the refugees and £1,165 contributed towards the expenses of the Russian Expedition. All the cost of administering the fund was defrayed from gifts specially made for that purpose. The Hon. Secretary (the Rev. Harold Buxton), who is on his way home, telegraphs that the need for money to rebuild the refugees' houses is almost unlimited. The Committee recently sent out £6,000 for this purpose, and very little money is now coming in. The offices of the Fund are at 96, Victoria Street.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1916. Aug.	1916. Aug.		1334. Shawwal	5676. Ab.
18	5	Friday	18	19
19	6	Saturday.....	19	20
20	7	Sunday	20	21
21	8	Monday	21	22
22	9	Tuesday	22	23
23	10	Wednesday	23	24
24	11	Thursday	24	25

To-day is the birthday of H.R.H. Prince Nicholas of Roumania, the second son and fourth child of King Ferdinand and Queen Marie, who was born at Castle Pelesh in 1903.

To-day is also the birthday of H.I.M. the Emperor of Austria, who was born in 1830.

Next Tuesday is the birthday of Queen Eleonore of Bulgaria.

Thursday will be the birthday of the King of Roumania, who was born in 1865.

The Queen and Princess Mary, accompanied by Lady Mary Trefusis, visited the Galleries of the Fine Art Society, New Bond Street, on Tuesday afternoon, and inspected the water-colours of Egypt by Mr. Talbot Kelly.

Princess Soutzo, the wife of the Military Attaché to the Roumanian Legation in Paris, who has been visiting London, left town on Tuesday for the French capital.

Sir Ralph and Lady Paget were received by Queen Alexandra at Marlborough House last Friday morning.

Tuesday's *London Gazette* contained the announcement that the King has appointed Sir Ralph Spencer Paget, K.C.M.G., C.V.O., to be his Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Denmark. Sir Ralph arrived in Copenhagen on Tuesday night.

It is reported that Mrs. Townshend has arrived in Constantinople, having been granted permission by the Turkish Government to visit her husband.

Lady Maxwell, who is slightly better in health, is leaving Stafford to join Sir John Maxwell in Dublin.

M. Djuvara, Secretary to the Roumanian Foreign Office, who has been on a short visit to London, left for Paris on Tuesday.

Sir Henry Woods Pasha is at present on a visit to Bexhill.

Madame Misu, the wife of the Roumanian Minister, and Mlle. Margaret Misu, who have been paying a short visit in the country, have returned to the Legation.

The marriage arranged between Captain John F. King, the Suffolk Regiment, only son of Mr. and Mrs. John King, of Wandsworth Common, London, and Helen Muriel, eldest daughter of Sir Armand Ruffer, C.M.G., and Lady Ruffer, of Bulkeley, Ramleh, Egypt, will take place at Alexandria early in September.

A correspondent writes:—Professor George H. Huntington, of Robert College, Constantinople, was married to Miss Elizabeth Dodge, daughter of Mr. Cleveland H. Dodge, the New York capitalist and philanthropist, at New York on July 27. Mr. and Mrs. Huntington will sail for Constantinople on August 17. At the wedding were gathered all the Constantinopolitans, American and English and Canadian who happen to be in America this summer. A notable figure was Mrs. George Washburn, daughter of Dr. Cyrus Hamlin, founder of Robert College, and widow of the former president, Dr. Washburn.

Our Cyprus Correspondent writes (July 24):—The engagement of Mr. Russell, King's Advocate, to Miss Gordon, who has been paying a visit of some length to Cyprus, is announced.

General Terzitch, the Serbian Minister of War, has arrived at Salonika from Corfu.

Corporal Robert C. Murray, of the Canadian Division, son of the Rev. James Murray, Scottish Mission, Smyrna, has been awarded the Military Medal. Mr. Murray's eldest son, Sandford, a very brilliant young student, was killed at the Front a year ago.

Sister K. H. Wheatley's excellent work on behalf of sick and wounded Turks, during the Balkan wars, and in France amongst our own men during the present war, will be remembered by many of our readers. They will be interested to know that Sister Wheatley has now been appointed Matron of No. 17 Stationary Hospital, Bombay, an institution of 1,000 beds. She was, we understand, on her way to Mesopotamia when she was detained for this service.

Captain Ormsby-Gore, who has been serving for six months in Egypt, some two hundred miles south of Cairo during most of the time, is home on a fortnight's leave. In spite of the great heat, he has kept in the best of health.

It was announced at the Admiralty on Saturday that Admiral Sir A. W. Moore, G.C.B., has been awarded a Good Service Pension of £300 a year in the vacancy created by the death of Admiral Sir John Hopkins. Admiral Moore, who was born in 1847, entered the Navy in 1860, and served in the Egyptian War of 1882.

The King has been pleased to grant authority to Commander Hubert Searle Cardale, R.N., to wear the Insignia of the Fourth Class of the Order of Kara George, conferred upon him by the King of Serbia, in recognition of valuable services rendered by him.

The King has been pleased to grant authority to Acting Vice-Admiral Sir John Michael de Robeck, K.C.B., to wear the Insignia of Grand Officier of the Legion of Honour, conferred upon him by the President of the French Republic in recognition of valuable services rendered by him.

A telegram has been received from Bushire by the Imperial Bank of Persia, dated August 11, stating, Reuter's Agency is informed, that the staff of the Shiraz branch of the bank, who have been held prisoners for some months, have been released, and have arrived at Bushire.

General Sir Douglas Haig has sent a telegram to General Sir Archibald Murray, saying:—"The British Army in France join me in heartiest congratulations on your brilliant success." General Sir Archibald Murray replied as follows:—"I am anxious to do all I can in this theatre to help towards a decisive action in the Western theatre. I watch with intense interest and admiration the sure and certain progress, which nothing can stop, of the force under your command."

An artillery officer who served throughout the Dardanelles Expedition, has made and sent to the Lord Mayor a copper salver from part of the dome of the lighthouse which used to stand at Helles Point, Gallipoli.

A Reuter's message from Salonika, dated August 10, reports:—General Cordonnier has arrived here. He is taking over the command of the French forces in the Balkans, in succession to General Sarrail, who becomes Commander-in-Chief of all the Allied forces in the Balkans.

The Countess of Carnarvon writes to the *Morning Post:* "Our troops in Egypt are suffering from very great heat and the torment of flies, and many of them, stationed out in the desert, have no means of distraction or recreation. The United Services Welfare Committee, Egypt, is in constant receipt of requests for games, especially cricket sets (or odd bats, balls, and wickets), and footballs. Tennis balls, skittles, and quoits are welcomed, and used packs of playing cards, dominoes, draughts, chess, and cribbage boards are also in great demand. In England, where means of recreation are not lacking, it is difficult to realise that their absence in Egypt constitutes a real hardship, and I cannot appeal too strongly to all those who are able to do so to contribute, whether by gifts of games or by money, to lessen the dull hours of our troops in Egypt. The United Services Welfare Offices at Alexandria and Cairo, distribute to the troops all over Egypt, and any gifts may be sent to the Secretary, United Services Welfare, Banco di Roma, Rue Toussoum Pasha, Alexandria, Egypt, via Forwarding Officer, Devonport, or to the Hon. Mrs. Lloyd, 48, Wilton Crescent, London, S.W."

The Serbian Relief Fund still urgently needs funds. Donations should be sent to the Earl of Plymouth, hon. treasurer, 5, Cromwell Road, S.W. There is still a demand for shirts, socks, and underclothing for prisoners of war; for household linen, dressings, and clothing for the hospitals; and for boys' and men's cast-off suits of clothes, boots, and shoes for the better-class refugees. Parcels should be sent to Mrs. Carrington Wilde, Serbian Relief Fund, 5, Cromwell Road, S.W.

Mrs. Cayley, 13, Oaklands Road, Bedford, makes an appeal to the parents, relatives, and friends of officers now serving in Mesopotamia. "I shall," she writes, "be very grateful to any of them for a subscription, however small, forwarded to me at the above address in aid of a fund which I am starting for the purchase of comforts and medical requisites to be sent out regularly for the use of all ranks."

The Hon. Abraham I. Elkus, the new American Ambassador to Turkey, left New York for his post, viâ Copenhagen and Berlin, on August 12. He is accompanied by Mrs. Elkus and his three young children. Mr. Elkus is head of one of the oldest firms of solicitors in New York, a graduate of Columbia University, and a regent of the University of the State of New York. Several years ago he received the honorary D.C.L. from Columbia. Mr. Elkus, although a comparatively young man, could have had an embassy three years ago. He has yielded now only to the insistence of President Wilson and his predecessor, the Hon. Henry Morgenthau.

FRENCH, English, Spanish, Italian, German, Scandinavian Languages, Greek, etc., rapidly taught by natives.
Σχολὴ Γλωσσῶν. Διδασκαλία συστηματική.
Διερμηνεῖς κ.λ.π. Δίδακτρα μέτρια.

OBITUARY.

THE ARCHBISHOP OF CYPRUS.

(From a Cyprus Correspondent.)

The Greek community was not unprepared for the news of the death of the Archbishop Kyrillos (Cyril), which took place on July 19, at the village of Ayios Dhimitrios, to which he had gone to take the waters. By his death the Orthodox Greek community loses one who has been a very prominent figure for more than a generation, and the foremost champion of the "Hellenic idea" in Cyprus.

Born in 1845, the son of a priest at the village of Prodromos, on Mount Troödos, he was, as a boy, destined for the Church. After some early village teaching he was sent to study at Nicosia, and afterwards to Jerusalem. Returning to Nicosia, he received an appointment in the Greek school, and enjoyed the friendship and confidence of the Archbishop Sophronios. He soon took a vigorous part in local affairs. From the time of the British occupation and the introduction of freedom undreamed of in Turkish times, Kyrillos became one of the leading spirits in the development of Cypriot Hellenism, and later in the agitation for "union with Greece." In 1889 he was elected Bishop of Kyrenia, and in 1892 Bishop of Kition.

On the death of the Archbishop Sophronios, the Greeks became split up into two hostile parties, the one supporting the Bishop of Kition as candidate for the succession, the other his namesake, the Bishop of Kyrenia. This division was maintained with much bitterness for the best part of ten years, led to various lamentable results, and in many ways retarded progress. Finally, in 1908, after Government aid had been invoked, an arrangement was made by which the Bishop of Kition was recognised as Archbishop; though it was not until 1910 that the whole Greek community was brought into line, and accepted the settlement.

During the last six years the Archbishop, while taking in hand various Church reforms, continued to give his support to local Greek "politics." While Bishop, Kyrillos sat for many years in the Legislative Council, from 1889, representing different electoral divisions. A vigorous rhetorician, he enjoyed a large measure of popularity amongst the Greeks of his party, who formed the majority.

The Archbishop was buried at his native village of Prodromos, it being decided, in accordance with medical advice, that his body should not be conveyed to Nicosia, as was desired by Greeks at the capital.

LIEUT.-COL. J. P. V. HAWKSLEY.

It is announced that Lieutenant-Colonel John Plunkett Verney Hawksley, D.S.O., Royal Field Artillery, was killed in action on August 8. The youngest son of the late James Taylor Hawksley, of Caldy Island, Pembrokeshire, and the late Mrs. Hawksley, he was thirty-eight years of age, and passed out of Woolwich into the Royal Artillery in September, 1897. Promotion came to him in September, 1900, and he was captain in July, 1904, and major in October, 1914. For a period of seven years from May, 1905, he was employed with the Egyptian Army. The present war had brought him both honours and promotion. He received the rank of temporary lieutenant-colonel in March of this year, and in addition to the Companionship of the Distinguished Service Order he held the Osmanieh Order (4th Class).

Colonel Hawksley fought right through the South African War, and took part in many operations in the various Colonies. For his services he was mentioned in despatches, and had the Queen's and the King's medals with seven clasps. During his employment with the Egyptian Army Colonel Hawksley took part in the operations in Southern Kordofan, and was decorated with the Sudan medal with clasp.

MR. LANCE THACKERAY, R.B.A.

We regret to announce that Mr. Lance Thackeray, R.B.A., died last Friday at Brighton, the cause of death being anæmia. He first came into public notice as a black-and-white artist with a keen sense of humour, and his sketches were to be found in most of our better-class illustrated journals. Of late however, he turned his attention to more serious work, and found in Egypt a happy hunting ground, whence he returned with a full "bag" of sketches and finished water-colours which gave an excellent idea of both the people and the scenery of the Nile Valley. Egypt evidently appealed to him strongly, for he spent several winters there; and each visit produced its crop of sketches and studies. Some years ago a number of his Egyptian pictures were exhibited at the Fine Art Society's Rooms, New Bond Street, and at Walker's Galleries, and they won high appreciation from critic and collector. His volumes, "The Light Side of Egypt" and "The People of Egypt," published in 1908 and 1910 respectively, were also very favourably received.

Shortly after the outbreak of the war Mr. Thackeray enlisted as a private in the Artists' Rifles, but the strenuous duties of a soldier soon affected his health, which suffered further from an accident, and a few weeks ago he was admitted to the Canadian Military Hospital and was ultimately removed to Brighton, where he died. He will be much missed in art circles in London, particularly at the Sketch Club and the Savage, where he was very popular; and in Cairo, where he was a member of the Turf Club.

We regret to learn from a correspondent that Lieutenant Douglas Stanley Baker, R.E., died in France on July 23, of wounds received the same day while in charge of a party of infantry engaged in constructing trenches in "No Man's Land." Aged 26, he was the son of Mr. G. P. Baker and Mrs. Baker, and was a most promising young officer.

Lieutenant-Colonel Frederick William O'Malley, late of the 71st Highland Light Infantry, who has died at Chester, was born in June, 1836, and served in the Crimean campaign, taking part in the siege of Sebastopol and the expedition to Kertch, receiving the Crimean medal with clasp and the Turkish medal. He also served through the Indian Mutiny.

Major Ernest Hastings Lewis, Hampshire Regiment, who was reported "Missing, believed killed," is now officially presumed killed on August 12, 1915. The only son of Mr. William Jarrett Lewis, of Corstorphine, Ryde, he obtained his commission in the 21st Lancers in 1892, became lieutenant in 1896, and captain in 1899. He served with the 21st Lancers in the Sudan Campaign of 1898, and was present at the battle of Omdurman. He was seconded for service with the West African Frontier Force in 1898, and served in the Ashanti Campaign of 1900, and in Northern Nigeria in 1901 during the operations against the forces of Kontagora, being on the last occasion mentioned in despatches. In 1903 he saw further service in Northern Nigeria, being present at the capture of Kano. He joined the Hampshire Regiment in October, 1913, and went with it, as second in command, to Gallipoli in August of last year. He leaves a widow and three children.

BRITISH REFUGEES FROM TURKEY FUND.

The latest list of subscriptions to the above fund will be found on page 383.

LEGAL.

I DICRAN STEPHEN heretofore known as Dicran Stephen (or Stepan) Iplicjian of 3, Chepstow Street in the City of Manchester, and of "Redlands," Hesketh Road, Southport, in the County of Lancaster, Merchant, being and for many years past a naturalised British subject, hereby give notice that I have on behalf of myself and my Wife, Rose, and my heirs and issue, renounced and abandoned the use of my second surname of Iplicjian, and intend henceforth upon all occasions and at all times to sign and use and be called and known by my first surname of STEPHEN only in lieu of the said surname of Stephen (or Stepan) Iplicjian, and that such intended change of name is formally declared and evidenced by a Deed Poll under my hand and seal dated the 18th day of July, 1916, and enrolled in the Central Office of the Supreme Court of Judicature on the 28th day of July, 1916.

IN TESTIMONY whereof I hereby sign and subscribe myself by such my intended future name.

Dated this 10th day of August, 1916.

DICRAN STEPHEN.

Signed in the presence of
William Raby, Solicitor,
46, Brown Street, Manchester.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

Simpson.—On the 14th inst., at Hoselaw, Roxburghshire, the wife of M. F. Simpson, Sudan Civil Service, of a son.

MARRIAGE.

Mullins—Etherington.—On August 5, by Rev. F. J. Howard, at St. Luke's Church, Reading, Hugh Thomas Mullins, Sudan Civil Service, to Marjory, eldest daughter of Mrs. A. H. Etherington, of Brooklyn, Reading.

DEATH.

Ralli.—On August 12, at New York, Anthony P. Ralli, third son of the late Mr. Pandia J. Ralli, of London, in his sixty-third year.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

The only English Hotels in Alexandria.

Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.),
Alexandria.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

FRIDAY, AUGUST 18, 1916.

THE WAR ON THE EASTERN FRONTS.

With the news from every part of Europe so satisfactory there would seem to be good reason for not taking too seriously the Russian set-back in Southern Armenia. But the tragedies connected with this part of the world are too fresh in the public memory to prevent the abandonment of whole districts to the mercy of a Turkish advance from being viewed with considerable uneasiness. The province of Van was one of the chief centres of the Armenian population. It was from here that in December, 1914, the Ottoman forces started the invasion of Persia, and gave an earnest of what was to follow in the massacre of the Nestorian communities met with on the way. In January the tide turned; the Russians recaptured Tabriz, and Jevdet Bey, Governor of Van, was compelled to fall back on to Turkish territory. Before evacuating Salmas on the frontier between Lake Van and Lake Urmia he ordered the massacre of all the Armenian and Nestorian male inhabitants. This crime was of sinister augury for the people of Van itself. Murders and massacres on a small scale followed in outlying districts, and Jevdet Bey let it be seen that he intended to wreak his vengeance on the Armenians of Van for the military successes of the Russians. A local affray on April 20, 1915, was the signal for the bombardment of their residential quarter; but the Armenians had taken warning of what was in store for them and hurriedly devised measures of defence. As the Turks contented themselves for the most part with artillery fire, the work of reducing the Armenians to submission proceeded slowly. Before it could be accomplished, a Russian column reached the town, and Jevdet Bey was forced to withdraw his troops. The Turkish reply to this successful resistance in Van was the systematic extermination of the Armenians. In the districts immediately bordering upon the province the Christian population was at once massacred; in other parts of the country deportation was practised as a preliminary step. At Bitlis the Armenians were massacred on June 25. Mush was captured early in July; the male inhabitants were put to the sword, and the women and children, after being removed to concentration camps, were disposed of in different ways. Reinforcements enabled the Turks to resume the offensive, and by the beginning of August they were again in Van. The bulk of the population withdrew with the Russian troops; the remainder were massacred when the Turks entered the town. Within less than a month Van was once more in Russian hands, and when the great advance of the Grand Duke Nicholas's army, which began last winter, carried the Russians into Erzeroum and Mush and Bitlis, it seemed as if the final liberation of Armenia was secured.

But again the Russian tide has ebbed. Starting south of Mush and Bitlis, the Turks have gradually thrust back the Russian forces a distance of between thirty and forty miles. Both these towns are now in their possession, and there is no clear indication that our Allies are yet in a position to hold their own in this district. The first effect of their withdrawal is to stay the pursuit of the Turks west of Erzinjan. Encounters west of Trebizond continue, but it may be that the Russians do not intend to advance their line beyond a point which leaves them in control of the road between Erzinjan and the Black Sea. The other effect of the enemy's success is to expose any of the luckless inhabitants who may be unable to escape to the horrors that await them at the hands of the Turks. Many of the refugees who fled to Russian Armenia will have been tempted by the Grand Duke's successful campaign to return to their former homes. Their fate will be a foregone conclusion, if they are found in any of the towns or villages now changing hands for the fourth time during the war. It is to be hoped, however, that the Russian withdrawal has been of a sufficiently deliberate character to enable any such refugees to return to safety. Were it not for the possible fate of the local population, the swaying of the fortunes of war on this front would matter little. Twice a Turkish advance in this region has proved short-lived. The present one may well share the same fate. It breaks the continuity of the Russian advance, but can hardly affect the operations as a whole. Taken in conjunction with the Turkish thrust in Persia it shows that the staying power of the Ottoman Army is still considerable. On the other hand, as it is not likely that the Turks would choose the province of Van for decisive operations while leaving the Erzinjan front exposed, we may conclude that they owe their present successes at Mush and Bitlis to the proximity of these places to railhead of the Baghdad Railway. It has been easier to despatch the troops collected in Syria to this front than to bring them into action where they are most needed. In the same way relief from British pressure in Mesopotamia has released troops from the Baghdad command for service in Persia—another comparatively unimportant theatre of war. In each case the enemy has been able to establish a numerical superiority over the Russians. But such danger as there is has probably been foreseen long enough ago to enable our Allies to correct the balance of strength in Armenia before the Turkish advance becomes an actual menace to the Grand Duke's position at Erzinjan.

If we wish to form a correct estimate of how Turkey stands at the present moment in regard to the war, it is evident that we must look away from the Middle East, where her local recovery has brought her within fifty miles of Erzeroum and halfway to Teheran from the Persian frontier. In official circles in Constantinople it is probable that the situation in Arabia and the Sinai Peninsula is regarded with greater concern than the Russian thrust in Armenia. Any hopes that may have been formed of the ability of the Egyptian expedition to restore Turkish prestige in the Arab world will have been rudely shattered by the débâcle that has attended the enterprise. With casualties amounting to 50 per cent. of the effective force it has been difficult to concoct a plausible tale about the expedition's doings. It remains to be seen what headway can be made against the Arab revolt. In the semi-official German Press it is maintained, on the strength of Turkish assurances, that peace and security have been restored in Medina and the neighbourhood, and that the railway to that town is now intact. But as these statements are accompanied by others which are demonstrably inaccurate, too much reliance need not be placed upon them. The Porte's attention, however, must at this moment be directed mainly towards the Balkans and Galicia, and even if it be not true that several divisions of Turkish troops have been sent to the assistance of the Austrians, we may well believe that the powers that be in Constantinople would wish to be able to spare more in order to check the Russian advance. This has now reached a stage which has completely falsified Austro-German claims to invincibility, and the future of Turkey becomes an uncomfortable subject for contemplation. Until Roumania strikes the effect of General Brusiloff's progress towards the Carpathians will not be felt on the Bosphorus. But the first serious threat to the Turkish lines of communication with Germany will cause, as far as the Porte is concerned, events on every other front to fade into comparative insignificance. This fact must be patent to the Allied Governments, and it may, therefore, be taken for granted, however tantalizing the delay, that the moment of the combined offensive in the Balkans will not be postponed one day longer than the special necessities of the case render inevitable.

THE TURKISH "COMMITTEE" AND ISLAM.

(From Our Own Correspondent.)

Cairo, July 26.

The following is a translation of an important article which has just appeared in *Al Mokattam*. It is headed: "A letter addressed to the Mohammedan world, and a demand for the opinion of the Ulema (Theologians)":—

I have mentioned in a series of articles, which were published in *Al Mokattam* some months ago, bearing the signature of "Ghanani," something about the pan-Turkish propaganda in Turkey, stating that the Turks in general and the officers in particular are the strongest factor in the formation of the policy of the Ottoman Government, and that the energy of this party, which is all in all there, was directed to Turkifying the nationalities of which the Empire is composed by any means available. I now add that because they realise that the Mohammedan religion is based on the Arab nationality, the present Turkish Government also intend to modify that faith in such a way as to harmonise with their own national traditions.

A young Turkish graduate of a Constantinople high school once told me (not knowing that I was an Arab) that the mention of the name of Mohammed within the mosque and on their minarets is the most important advertisement for the Arab races in the Moslem communities and throughout the world. "It has therefore become," said he, "very difficult for us (the Turks) to enlarge the sphere of our influence or establish our national ideals until we have modified the Moslem religion. This should be done by degrees, ending with its absolute abandonment." He further said that the traditions of the Ottoman Government are purely Islamic or Arabic, and that in order to trace and understand these traditions it is necessary to trace them in the Arabic language and Arabic literature, which is one of the factors that tend to give the Turkish nationality an Arabic tinge; and "so long as we are brought up as Mohammedans, the Arabs will continue to be our moral masters, which mastership we are all convinced is the only deterrent to our progress. We have therefore decided to be Turks before every other thing, and to attain this end we must begin with the modification of the Mohammedan religion." This statement is typical of what we have been hearing of late years in Constantinople and the provinces.

As a matter of fact, the committee had begun to put this policy into force. They sent their envoys to Asia Minor and delegated the preachers to initiate the public into their new mode of thought by means of sermons in the mosques of Constantinople. The foremost exponent of this movement was the notorious Obeid Alla, who launched the first of his sermons in Ramadan, 1331, in the Mosque of Aya, Sophia, poisoning the public mind, instead of directing it in the right way according to the dictates of his religion.

This campaign against Islam was further enhanced by publications and pamphlets, which were freely distributed in Constantinople and Asia Minor. The work entitled "Kum Gedid," which was published by the Shems Printing Press in Constantinople in 1331, in 94 pages, and of which I possess a copy, is typical of these publications. This, if circumstances permit, I propose to photograph and publish for the information of the Mohammedan world, but I now quote some passages. In this connection I ask for God's mercy for the souls of Emir Aref El Shihabi and Abdel Ghani El Areisi, who were lately hanged by Jemal Pasha because of their zeal—the outcome of deep-rooted faith and piety—in their attacks against this book and the infidel teachings contained therein. In publishing these facts I feel I am doing my duty, otherwise I should be sinning against truth and religion, as in keeping these dark lies the possibility of danger to Islam, and I should be guilty before God in the hereafter.

I desire to put before my Moslem brethren the cause which made me take this view of the Committee, so that they may be in a position to understand the various points at issue; because I believe that the difference of opinion between those who have despaired of them and those who still hope to reform them is due to their being thoroughly understood by the former and not by the latter.

The energetic and wily Germans have been parading for some years the idea of "Berlin to Baghdad," and convincing Anwar [Enver] and his clique that they intend to introduce Turkey into the Germanic Union. But, realising that Moslems would find this idea highly repugnant, as it means the placing of Islam under the power of a non-Mohammedan Government with absolute control over the resources of the Empire, they prevailed upon the Committee leaders (whose religion was benumbed by German education) to get rid of Islam, which they believed to be a hindrance. They thought of attacking the tenets of Islam, beginning with the abolishing of mosques and the seizure of the revenue of their Wakfs, utilising it in their novel enterprises such as "Dar Badaai" (Hall of Fine Arts), which was built in Constantinople to be a dancing and music school, and such as "Turan Bera Khana si" (Turan's Brasserie) and "Ashiai Askaria Tigaretkhana si" (Army and Navy Stores).

The reader may think I am exaggerating when I state that the Committee have actually abolished the mosques utilising their Wakfs to the benefit of dancing halls, coffee houses, etc. To such a reader I say that the idea of abolishing the mosques was made public. I quote hereunder some passages of the sermon delivered by Sheikh Obeid Alla in Ramadan, 1331, and which was inserted by the Government in the book entitled "Kum Gedid":—

The prophet used to prevent the people building mosques in proximity to each other. He used to think that one mosque would be enough for several villages, with the idea of preserving unity amongst the Moslem community. It would be better therefore to abolish all the "takias" and all mosques not built by the Sultans, and to utilise their funds for military expenditure.

The theory of abolishing mosques and takias was translated into action by Government, who demolished the takia at "Baghdji Kabusi" and built in its place a hotel called "Bir Nomrolo Awkaf Khani" (Wakfs Hotel No. 1).

I now wish to explain to the reader why the book in question was entitled "Kum Gedid."

The Committee call the libraries which contain Islamic books, and which are requested, the books of "Kum Ateik," because they contain the tenets of Islam and Arabic literature, etc. These, in their opinion, are old and unworthy conceptions which should be substituted by the new thoughts and conceptions of the "Kum Gedid"; and if we inquire what are their beliefs and new conceptions, and in what they differ from our beliefs and conceptions, which are stigmatised as "old," we shall find the reply in a passage in "Kum Gedid," pages 51 and 52, quoting Sheikh Obeid Alla's sermon in the Aya Sophia Mosque.

The "Kum Gedid" do not repudiate the rites of fasting, prayer, pilgrimage, almsgiving and the confession of faith, they adhere to them, but they do not consider them to be essential. The essential points, according to "Kum Gedid," are:—I. Reason; II. The confession of faith; III. Good character; IV. Jehad and waging of war, by giving life and substance; V. Unity and concord under the banner of the great Turkish Sultanate to obtain the necessities of war.

The Committee's hatred of the Arabs made them hate Islam, which they designate as Arabic. It made them further hate the four pious Khalifs—Abu Bekr, Omar, Osman, Ali (who are the glory of Islam), because they were Arabs.

In page 89 of "Kum Gedid" we find the following passage quoted from Sheikh Obeid Alla's sermon in Aya Sophia Mosque:—

What folly! What stupidity! You write the names of the Arab Khalifs in your mosques, and do not mention with due respect a name of one of your Turkish Khalifs who were made sacred in the Hadiths of the Prophet. When the name of the Turkish Khalif is mentioned the preacher descends a step down the pulpit in order to minimise his importance and degrade him; you say your midday prayer; all these formalities were introduced by the Arabs with a view to humiliate you. You did not stop at that; you went further to neglect your sacred people, to sanctify foreign Sheikhs such as Abdel Gader El Gilani and El Sayed El Badawi, etc. You maintain that Arabic is the language of the inhabitants of Heaven (Paradise), that it is the tongue of Munkir and Nakir (the angels of death) and other angels, and that it is the language of God the Almighty Himself. You also say that Syria is the land of Resurrection. These sayings were invented by the Arabs for your deception. They made you believe that a man will rise from their midst called El Mahdi and such other tales.

On page 88:—

I am astounded because of the dulness of your minds and the falsity of your beliefs. Where was El Khudr[1] before he visited this city (Constantinople)? This mosque is the heritage of the Turkish conqueror.[2] Why did El Khudr not come here before

the Turkish conquest and turn its front towards El Kaaba[8]? He apparently waited until the conquering Sultan came, to follow in his wake. You fail to sanctify the Turkish conqueror (Peace be upon him) and venerate an imaginary person you call El Khudr.

Sheikh Obeid Alla was not content with applying the phrase "God bless him and preserve him" to the conqueror, but he equally applies it (page 71) to members of the Union and Progress party, such as "Rida, Asad, Gaweid, Shukri, Anwar."

Sheikh Obeid Alla dared to deliver his sermon in the Mosque of Aya Sophia because he was under the protection of an armed Turkish police force. A Sheikh of the mosque expressed a desire once to repudiate some infidel statements made by him, but he found himself in the hands of a policeman. The Sheikh tried to explain to the policeman that he had no desire to ask Sheikh Obeid Alla to a duel, and that he simply meant to discuss a religious point with him; but the policeman informed him that he had orders to silence by force anyone attempting to object to any of Sheikh Obeid Alla's statements.

The above is only an insignificant part of what I know of the Unionists. This I put before the Moslems that I may not be guilty of silence. It is, then, for everyone to form his own ideas about them. It is for each one to be either for or against the truth as his conscience and faith dictate to him.

In the meantime I wish to have the Fetva of the Grand Mufti, the Sheikh of El-Azhar, and all those who are entrusted with Mohammedan learning, about a Government that defends with its police a wicked Sheikh who declares in the biggest of mosques that prayer, fasting, almsgiving, pilgrimage, and the Confession of Faith are not essential in religion. What do they think of a Government that demolishes the mosques of God in order to erect in their place hotels to spend their resources on, and "Dar El Badaai" for teaching of dancing and music? What do they think of a nation in whose mosques it is proclaimed that it is a folly and ignorance to mention the names of Abu Bekr, Omar, Osman and Ali, whom they classify, together with the other Moslem Ulema and Moslem Saints, among the foreigners? And what do they think of the use of the formula "God bless him and preserve him" for persons like Gaweid and others, who are known, beyond all doubt, to have decided to alter and modify the Koran and to lead the people by degrees into infidelity and paganism because such are Turkish and because Islam is Arabic?

Please give me your Fetva.

THE DARDANELLES COMMISSION.

An informal meeting of the members of the Dardanelles Commission was held on Tuesday. As the Special Commissions (Dardanelles and Mesopotamia) Act has not yet received the Royal assent, no decisions were taken as to the procedure or selection of witnesses. It is probable that the earliest date upon which the first public meeting of the Commission can be held will be Tuesday, September 12.

Communications on matters relating to the Commission should be addressed to the Secretary, Mr. Grimwood Mears, at 2, Hare Court, Temple, E.C., and not to individual members of the Commission.

Lecturing on "Balkan Politics" at the Cambridge Summer meeting on August 7, M. P. Miliukoff, of the Russian Duma, said that what Professor Freeman, the English historian, wrote in 1878 was true to-day: Complete separation of Turkey, and the transfer of the power of the Turks to other hands, was the only solution of the difficulty in the Balkans. Who was to profit by the separation of Turkey? Mr. Gladstone said the Balkans were to be given to the Balkan nations. Russia claimed a strip of land along the Straits, but this upset Austrian influence and completely destroyed the German Berlin-Baghdad scheme. The Balkan nations wanted two kinds of help from the Entente Powers. The first, which succeeded, was to let them alone and keep out Austria while they were fighting to overpower Turkey. The second failed in the attempt to reconstruct the Balkan nations on ethnological equalisations. The Turco-Italian War of 1911 made it certain that Turkish influence in Europe was on the wane, and the Albanian revolt in 1912 further showed how weak Turkey really was. The lecturer emphasised his opinion that there would have been no war in July, 1914, on the pretext that Serbian influence in the Balkans was a menace to peace, had the previous difficulties been successfully overcome.

[8] There is apparently a belief that El Khudr had turned the front of Aya Sophia towards Mecca.

"THE NEAR EAST."

PIRÆUS THE PORT OF ATHENS.

AN AMERICAN'S IMPRESSIONS.

As we came into the port of Piræus we were immediately surrounded by large numbers of small rowboats. There are no wharves in this harbour, and passengers, and goods as well, have to be transported from the ships by boat. The Transatlantic and local steamers back up towards a single long quay on either side of the bay. Long hawsers are put out from the stern of each ship, and anchors are dropped in deep water. Thus the ships lie, with their bows pointing out from shore, very much as they would if there were docks, and the rows of steamers stand here and lift their masts against the bare hills of the surrounding country.

The principal street of the town runs along the quay, and the huge paving stones—flat and 2 ft. square—mingle with the masonry of the sea wall. The quay and the waters form one side of this strange street; the other side is much more substantial, much more interesting, and even much more dirty. Conceive a street, a sidewalk, if you please, where every building has a roof over the footway, where every roof has a canvas awning stretched to the curb to protect pedestrians from the sun. Walk, then, along this enclosed footway. It will be difficult to get along very fast, for there is not much space left for walking. On the one side there are so many tables cluttering up the walk, tables at which sit coffee-drinkers and stronger-than-coffee drinkers of every Levantine nationality, and on the other side the goods of retail merchants crowd out of the windowless, open shop-fronts to obstruct the passage and perhaps to subject delayed passers-by to the solicitations of salesmen.

Then there is one other even more interesting hindrance to rapid progress—the crowds of people. Even at the hottest hours of the day, when all Athens is at *siesta* behind closed shutters, the inhabitants of Piræus still busily labour on, conducting the affairs of maritime Greece. They seem to be always swarming in the streets, even under the awful glare of a noonday sun and in incredible temperatures. Turks with turbans, Greek priests with strange tall, black hats, importunate vendors, insistent beggars, rascally money-changers, many ragged poor, whose bare feet seem quite inured to the intense heat of the blistering pavement—all these people pass in review and continue to hurry hither and thither all day. For Piræus is a seaport; the world's work must be done; commerce must go on; ships and shipments must move. It is a seaport town, and that definition has a similar meaning in every country in the world.

Piræus is a dirty city, but a busy one. Into it there come peoples of many nations, with strange costumes, who are all of the lowest classes. Yet he who finds the touch of *hoi polloi* unattractive may escape very easily. He may board a curious little awkward tramcar bearing the huge number "20." This eccentric, bobbing affair will carry him around two small headlands, revealing an ancient harbour for battle galleys and a wonderful view of blue Ægean, azure sky, yellow hills, and pleasant villas. It will carry him around these small headlands, give a sight of the Greek warships clustered in the harbour, and lead on to Phaleron and so to Athens—which is another story.

ELBRIDGE COLBY.

PASSPORTS FOR PERSIANS.

The Consul-General of Persia has been requested by the Persian Legation to remind Persian subjects resident in this country that under Persian law it is necessary for them to be provided with a Persian *passeport de séjour* during their residence abroad, renewable annually, and any subjects of Persia who are without such a document at present, or whose *passeport de séjour* is out of date, should apply to the Persian Consulate-General, 82, Victoria Street, Westminster, between ten o'clock and noon or between two o'clock and four o'clock (Saturdays excepted).

A Hague telegram states that the Turkish Legation there contradicts reports of alleged negotiations with the former American Ambassador in Constantinople, Mr. Morgenthau, regarding the sale of Palestine to the Zionists.

A large number of Bulgarian prisoners captured in the recent engagements on the Salonika front have passed through Toulon on their way to a concentration camp in the South of France.

THE PRESS ON THE NEAR EAST.

In the "Balkanzug."

On Friday *The Times* published an impression of a traveller who recently made the journey from Berlin to Constantinople by the *Balkanzug*, the express of which we have heard and read so much. From this article, which is entitled "In the Balkan Express," we take the following passages:—

Running through Serbia the most impressive signs of the German occupation were the encampments of the troops alongside the permanent way. There are huge notices up at all the stations warning the inhabitants to keep away from the railway. No one is allowed on the platforms because the whole country is still infected with typhus, and there has to be the most rigorous supervision for this reason. All along the line may be seen the trenches and the rusty barbed wire entanglements that tell of the fighting months ago. At each little fortified encampment German soldiers have planted vegetable gardens over which may be read the legend, "Kriegsacker" ("War Garden"). There were no signs of their having planted any wheat or grain.

Through Serbia nearly all the bridges of any size had been destroyed, at least partially. Often whole spans had been blown out. In many cases the Germans had replaced these, moving them bodily with great pains to their old positions. In some of the other bridges, where the girders and way were so badly damaged as to defy repair, temporary bridges on wooden trestles had been built. These structures may serve during the summer season, but they could not stand even a moderate flood. The work, therefore, still goes on, and in time the old bridges will be reconstructed.

Germany's Dark Outlook.

In an article entitled "The Military Unity of the Allies," the *Spectator* (August 12) welcomes the reappearance in the field of the Serbian Army, "reequipped and in great spirits."

We know what old scores those untiring and skilful soldiers have to work off, and we may be sure that they intend that the reckoning shall be paid. The "Middle-Europe" scheme which German philosophers support with much grandiose talk about the "geo-political" destiny of their country seems likely to shrivel back into the brains from which it emerged. On the whole, we are inclined to think that the break will come in the collapse or declension of Austria, or of Turkey, or of Bulgaria. . . . If one of Germany's allies were to fall away from sheer inability to continue the struggle, if not of her own volition, others would probably soon follow. The desire to desert a ship in grave peril is very infectious.

The writer admits that there is no visible sign of failing in the Germans. "Their defence is as stubborn and as courageous as ever."

We must prepare ourselves for many further tremendous struggles against the Germans, and for winning ground by painful inches. They will fight at the last with the desperation proverbial in those who defend their homes. Their rulers will not dare to yield. Morally, politically, militarily, they have burnt their boats. Whether in that desperate crisis the heart of the people will be found still beating in sympathy with that of the Hohenzollern dynasty is one of the most intensely interesting secrets which the course of the future has ever kept from an expectant world. There may be a psychological reaction, not military in form or origin, but gradually communicable to the army. Docility among the people, too long practised, may flare out in a surprising revulsion. Whatever happens, the end is certain. If British and French soldiers could take the labyrinthine system of fortified villages on the Somme, they can eventually take anything. Our strength grows and German strength dwindles. Only unity was needed in the combined effort of the Allies, and that is being daily displayed to admiration.

The Turkish Failure in Syria.

In his notes on "Foreign Affairs" in the *New Age*, Mr. S. Verdad puts forward the following theory regarding the latest Turkish attack on Egypt:—

For several weeks there have been vague indications in the Austrian and even in the Bulgarian Press that another grand Turkish attack on Egypt was being prepared. This announcement seemed incredible; for it ought to have been well known to the German General Staff—the supreme arbiters in these matters—that no attack on the British lines could possibly succeed, especially when carried out with so small a force as 14,000 men. The advance was ordered, nevertheless, and its object was fairly clear. It was hoped, by a surprise descent, to keep the British forces occupied for at least a few weeks, and to secure the removal of troops from Salonika as reinforcements for the Egyptian garrison. Then a Bulgarian attack on Roumania, possibly in conjunction with an Austro-Hungarian attack from the opposite direction, could have been undertaken without fear of interference from the Anglo-French troops at Salonika. It was an ingenious enough scheme; for it is just possible that this manœuvre, if it could have been carried out, would have left Roumania helpless. The recent Bulgarian incursions on the Roumanian border seem to have been "feelers," successful in their immediate aims. But this plan depended entirely upon the initial success of the Turkish advance; and the Turks, instead of keeping the British occupied for a few weeks, have had to fall back, with heavy losses in men and equipment, at the end of two or three days. The Balkan situation becomes correspondingly intensified; for no local campaign can now be thought of which is likely to result in the removal of British soldiers from Salonika.

The increasing strength of the Allies and the waning power of Germany, Mr. Verdad adds, makes it impossible for the Germans, planning for themselves as well as their Allies, any longer to draw up vast schemes of invasion. They can, in fact, barely try to hold their present lines.

The result is that we have had moves designed with a view to political effect, such as the Austrian offensive in May, or purely gambling moves, such as the Turkish advance on Egypt. No commander would, if he could avoid it, risk his army on a mere toss-up. It was a toss-up whether the Turkish offensive succeeded in its immediate object or not—there was certainly no ultimate object to be gained by it. But it did not succeed; and in consequence the gambler has not merely lost several Turkish battalions, but probably Roumania as well.

The Value of Salonika.

The *Evening Standard* (August 12) pays a tribute to France's foresight and determination in regard to action at Salonika. It says:—

The more closely we contemplate the position in the Near East, the more appreciative we must be of the piercing vision and moral courage of France last autumn. Hard pushed as she was, she met the Balkan menace with unhesitating firmness. It was really our business more than France's, but the British Cabinet was either unnerved by the failure of its diplomacy in the Balkans, or did not fully realise what was at stake. Only the prompt and resolute action of the French Government saved the Allies from great calamities.

The Salonika expedition prevented the Greek Court party from carrying out their full programme; embarrassed, if it could not frustrate, the German designs; and gave us a base for operations which, it may be confidently hoped, will ruin for ever those plans for a Near Eastern hegemony which have been pursued at great cost by Germany ever since the famous visit of the Kaiser to Abdul Hamid.

The offensive in the Balkans is not the least important sign of the turning of the tide against the Central Empires and their dupes and accomplices.

The "Spinal Cord."

In an article, entitled "Salonika," in the *Outlook* (of August 5) M. Réne Pinon, the Foreign Editor of *La Revue des Deux Mondes*, expresses the opinion that German hopes of dominating the world will meet their death blow in the Balkans. He concludes his article as follows:—

The Germans hope to realise their ambition of universal domination by hegemony in the Balkans and by a protectorate over Turkey. The spinal cord from Hamburg to Baghdad will be the axis of their power. From that line they will threaten Egypt and India, close the Straits to Russia, and establish themselves as masters in the Eastern Mediterranean. To ward off this peril, which threatens all the Powers, it is necessary and sufficient to cut at any point the spinal cord. No operation will be possible against Egypt or India or Persia, once we shall have obtained this result. It is, then, a necessity to put the Anglo-French-Serbian Army at Salonika in a position to take the offensive as soon as the commander shall judge the moment opportune. The more numerous and the more solid this army, the more it will wield attractive power on the neutrals. Movement and success—not words—will decide the Rumanians to realise by force of arms their national ideal in alliance with us. And who knows whether the Greeks themselves, when we are engaged in a decisive struggle against their Bulgar enemies, will not decide to refuse to let us labour for them without them? It is somewhere in the fields of Macedonia or in Thrace that the Serbs will find revenge for their defeat in 1915, and that the German hopes of domination in the Balkans and over the world will crumble away.

Mesopotamia: "The Prime Necessity."

In the August number of *United Empire* considerable attention is given in the Editorial Notes and Comments to the operations in Mesopotamia and the work that lies before the Commission of Inquiry. The following extracts will be read with interest:—

The statement once hazarded by Mr. Asquith, in regard to the Mesopotamian Expedition, that he did not think there had been in the whole course of the war a series of operations more carefully contrived, more brilliantly conducted, and having a better prospect of success, has proved an unfortunate boast. To-day no campaign, no episode in the war has given rise to such profound dissatisfaction and to such grave misgivings for the future. . . . The main point at issue in regard to the Mesopotamian campaign between the British public and the Government is the question of getting things done. When the inadequacy of the equipment of the Mesopotamian force was revealed, common prudence would have suggested supervision of any attempts made by the authorities responsible for the original equipment to improve upon their first effort. The British Government, however, appears to have accepted official assurances from India, without subjecting them to severe

Digitized by Google

scrutiny, and to have passed them on to Parliament with such additions as their own optimism prompted. Consequently there has been a repetition of the conditions existing a year ago, when, in the face of a demonstrable lack of shells at the front, the Prime Minister assured the nation that it was not true that the Army was in the least handicapped by a shortage of munitions. The public tolerated such a state of affairs a year ago, but under the stress of two years' war has now left the Government behind it.

The hope is expressed that by the time the Commission of Inquiry begins its labours the mistakes in Mesopotamia will be as much a thing of the past as they are in the case of the Gallipoli enterprise. The writer adds:—

Responsibility for the military operations now rests with Sir William Robertson, Chief of the Imperial General Staff, and the new Secretary of State for War has been able to announce that already a very considerable improvement in conditions in Mesopotamia has taken place. No less reassuring, he was able to report that a large number of river craft was being constructed. Such a step would hardly be taken unless the Government intended to proceed with the campaign, in order to reverse the verdict of failure which so far can only be passed upon it. That is the prime necessity of the present time, for British prestige has been seriously impaired in the Middle East by the course of events. It is to be hoped that the Commission of Inquiry will not lose sight of the fact that its findings are intended to further this aim, as well as to allocate responsibility for past mistakes.

Dr. Dillon on Greece.

The article on "Greece," which takes first place in the August *Contemporary Review*, and is contributed by Dr. E. J. Dillon, is one which should on no account be missed. The writer opens with the statement:—

The Balkan States are living monuments of the solicitude of the Entente Powers for the rights of nationalities. And of all the Balkan States Greece, which is the most anarchic, is also the one that owes most to France, Britain, and Russia. Created by the emotional fervour of the early nineteenth century, which was nourished by classical studies, it became a sort of spoiled child, whose antics were not taken seriously by western statesmen. The resurrection of Greece was the product of Europe's enthusiasm of humanity, quickened by intellectual ideas. But neither the ideas nor the enthusiasm, which took their rise in the art and literature of the ancient Greeks, have been sustained by the words or deeds of their latter-day descendants.

And a little later, after pointing out that the protecting Powers, whose influence kept the Greek kingdom alive "saw themselves obliged at whiles to defend it, not merely against its enemies, but sometimes against its own self," he remarks that the modern Greeks, "with a passion for politics . . . evince a constitutional antipathy to statesmanship and a marked leaning to reckless adventure." The Teutonic Powers, he proceeds to show, have ever been hostile to Greece. They—

have done what lay in them to strangle the nation at its birth, to enslave it during the first years of its existence, to crush it in war, to whittle down its territory, and humiliate it at the conclusion of peace.

And the evidence on which this summing-up is based is given in some detail. Yet, says Dr. Dillon:—

It is to these empires that Cabinets usurping the claim to speak and act in the name of the Greek people have been perfidiously endeavouring to betray the protecting Powers. And the present King, who is not a born Teuton, openly honours them with his confidence and approves their crooked policy.

The relations between King Constantine and M. Venizelos are closely examined, and the former's conduct and policy are subjected to a searching examination, which reveals them in anything but a favourable light. Unfortunately, this portion of the article does not lend itself to quotation, which would not do it justice; but we strongly advise our readers to consult the original. Dr. Dillon also brings out very clearly the fact that France, Britain, and Russia have an absolute right, secured by treaty, not only "to land troops in Greece for the protection of its integrity against Turkey or Turkey's allies," but also to see that the Constitution is respected, and that the people are "not subjected to the whims of an eccentric or autocratic monarch, as they were under the misrule of the German Otho." In the circumstances, indignant talk about France and Britain having violated Greek territory in the same way as Germany violated the neutrality of Belgium and Luxemburg is, indeed, the "merest cant." Finally, Dr. Dillon gives some very interesting particulars, which he received from a trustworthy source in Macedonia on July 13, regarding the treacherous surrender of Fort Rupel to the Bulgars. He concludes by asking:—"Can Greece be other than a south-eastern forepost of the Teutons, a confederate of the Bulgars, and a menace to the Allied forces at Salonika, so long as the Germanising agencies and their chief are allowed free scope?" Anyone who has any doubt about the answer would do well to study the article carefully.

Austria's Great Mistake.

The *World* of August 15 contains an article ("Austria Must be Dismembered") written by M. Josef Forman, president of the Czech Information Society. The author writes:—

It is obvious to a careful observer of Austro-German politics that the greatest mistake Austria ever made was that, in spite of the majority of her population being Slav, she has chosen to be German in her politics and government. Probably, true to her catholic mediæval traditions, she hoped to centralise all her different subject nationalities under one Government, with one language, for she realised that unity is strength. Hence her device, "Viribus Unitis." But adopting the German language as the instrument of this centralisation, she forgot that she would be obliged, sooner or later, to adopt Germany's policy and become, more or less, her vassal, should her attempt at centralisation fail. Her attempt did fail. She has not been able to get rid of her internal troubles owing to her cruel policy of Germanisation, and she has become almost a colony of the united, strong Germany.

The defeat of Austria, he believes, would put an end to Germany's resistance, but it "would not be of great value to the future peace of Europe should the Allies not insist on Austria's dismemberment and the freeing of the Slav, Italian, and Roumanian population, who are still suffering under her yoke. It would be a fatal mistake to think that this war is going to be settled—and settled satisfactorily—anywhere else than in the very heart of Europe."

It would be no difficult task, he goes on, to break up Austria.

Out of the 50,000,000 of Austro-Hungarian population, 11,000,000 are Germans, 9,000,000 are Magyars. The rest are Slavs—Czechs, Poles, Yougoslavs (Serbs), Roumanians—and Italians, who are tired to death of the Austrian rule and are kept silent only through cruelty and oppression. . . They desire nothing better than to break from Austria at the first opportunity given to them and form independent kingdoms of Bohemia, Poland, and Yougoslavia (with Serbia). These small States could easily exist, from the economical point of view—like Switzerland—and, besides, could be of great political importance to the Allies in keeping the balance in Central Europe between the East and West. Hungary would share the fate of these small States, and she would be compelled to abandon her intrigue with Germany, who uses her as a railroad towards the East.

As to the fear that the liberation of the Slav States would strengthen the position of Russia, the writer regards it as "quite an idle nightmare, for neither Czechs nor Poles nor Yougoslavs, though great friends of the Russian nation, have any wish to be under the rule of the Russian Government," and in his opinion "it is certainly not the intention of Russia to do anything else but help the friendly population of Austria-Hungary to a political and economic freedom and future." He concludes his article by re-stating an argument now very familiar to our readers:—

The kingdoms of Bohemia, Poland, and Yougoslavia forming buffer-States could render invaluable services to the Allied interests, not only in Central Europe, but also in the East, by checking Germany's path towards the Balkans.

These buffer-States would mean the end of the Pan-Germanic dream, Berlin-Bagdad, and the collapse of Germany's attempt to dominate the world.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS

Devonshire Square,
London, E.C.

Elsewhere in this issue is published a report of the speech delivered by the president at the opening of the Alexandria Bourse, and in the last few days, I see, from a special cable to *The Times*, that decrees that came into force on August 16 have been promulgated approving the provisional introduction of new regulations governing the future conduct of business on the Bourse. These were not unexpected, for in the past serious disputes have been not unknown; indeed, in the speech to which I refer, the president deemed it necessary to make an appeal to members "to avoid conflicts, to respect the rules and regulations of the Bourse, and to preserve a loyal and fraternal solidarity." It has also been enacted that "all transactions in futures in cotton must be subject to a tax of one millième per cantar (about ¼d. per 100 lb.), and similar transactions in cottonseed to a tax of ¼ of a millième per ardeb."

***

I am glad to see that the Egyptian Delta Light Railways have been able to wind up their year satisfactorily, and, although the management has decided to withhold a dividend, and to carry forward the whole of the available surplus of £65,200, this is capable of reasonable explanation. The decision was reached because of the financial uncertainty of the future and the abnormal cost of coal and stores, adverse factors which may still further be increased, and which must therefore be guarded against. I observe that the gross receipts are only some £2,000 odd less than those of the preceding year, and that, in spite of the added charges for fuel, the operating expense ratio has risen from 72.21 to 73.70 per cent. only. As the very high price of coal caused locomotive running to jump from £47,500 to £55,900, this is, on the whole, an excellent working result.

***

As our City Correspondent points out in his letter, the absence of a dividend may cause some disappointment in certain quarters, and hold back uninformed investors; but I think it should be emphasised that the Egyptian Delta Railways are in a sound position, that the management has risen above the circumstances of war very admirably; and that the general prosperity of the country is such as to inspire the greatest confidence in the concern. More than that cannot be said.

***

It will have been observed that included in the list of securities which the Treasury are prepared to accept upon deposit, under the arrangements designed to regulate foreign exchanges, are the following Egyptian stocks:—Government 3 per cent. Guaranteed Loan, Government 3½ per cent. Preference Bonds, Government 4 per cent. Unified Bonds. As will be seen from the following paragraph, the terms which are offered by the Chancellor of the Exchequer are not open to the criticism that they are unreasonable. The great point to remember is that their temporary transfer will assist the Government to find the sinews of war or, I should say, to strengthen the sinews. The appeal is, I understand, being responded to in respect of most of the securities on the general list.

***

I quote the following from the printed conditions upon which the securities will be accepted:—"The interest and dividends on all deposited securities, together with additional payment at the rate of one-half of one per cent. per annum, will be paid to the holder for the time being on the Treasury Register, by warrant, as soon as they have been received by the Treasury. Non-sterling dividends will be paid in sterling at the exchange of the day on which the Treasury books are closed for the purpose of preparing the warrants. For convenience of payment, in cases where interest or dividends are payable half-yearly, a full half-year's additional payment (viz., ¼ per cent.) will be added to the first dividend payment, and on the termination of the loan the amount due from the actual date of deposit to the date of return will be calculated, and any overpayment or underpayment will be adjusted when the return is effected. A similar procedure, *mutatis mutandis*, will be applied in cases of quarterly or other periodical payments of interest or dividends."

***

One of the most deserving of the charities produced by the war is the fund raised to assist British refugees from Turkey. The honorary treasurers tell me that the need of additional monetary help is great and that the smallest amounts will be welcomed. In the list published in THE NEAR EAST last week I notice a number of names well known in commercial circles and among them many friends of the Near East. It is satisfactory to know that victims of the war are not allowed to fend for themselves, altogether. Those who have been turned out by the enemy have been very badly hit. Their businesses have been shut up, their homes broken, and, in a few cases, I am told, they are without means almost to the point of distress. No sounder cause could be commended to the kindly natures of those who are better placed.

***

A correspondent writes to ask what has become of the official investigation which was begun some time ago into the question, Coal or no Coal in Egypt? He will find his answer in the letter from our Cairo Correspondent. Mr. Wells's report will be a big disappointment to some people, but probably the majority have all along anticipated this result of the investigations. For though previous borings had not been sufficient to prove conclusively that coal did not exist, the results achieved by them all pointed in that direction. There is still hope, however, that (after the war) the Sinai district may prove to be capable of providing lignite, and, failing better quality fuel, that will be welcome enough in Egypt. So let us go on hoping.

***

When the news reached India that another attempt was to be made to settle the question a good deal of mild excitement was caused in colliery circles in that country; but the geological folk out there—and they are a fairly able lot—did not treat the matter very seriously. Indian colliery owners hope to find a market in the Eastern Mediterranean after the war has terminated, and, naturally enough, a discovery of coal, of real commercial utility, would not have been pleasing news to them at all. Such an event would be a godsend to Egypt, it goes without saying, for the present dependence of the country on external sources of supply would disappear. The present prices are high enough to be prohibitive to the small consumer, despite the helpful measures designed recently by the Government in the interests of agriculturists and others. If coal were available in the country, not only would agricultural and irrigation interests benefit, but present industries could be extended and new industries established. But the war has left Egypt very badly off indeed for fuel generally. The Roumanian supply of oil has been stopped by the closing of the Dardanelles, the Egyptian oil-wells have not developed as favourably as was anticipated, and reliance has now to be placed on the United States and the Far East. And there is such a thing as a freight problem!

***

The Bulgarians have begun to boast of the extent to which they have exploited Serbian industries, which will make it all the easier to exact reparation when the day of reckoning comes, and for that we shall not have long to wait. The Bulgarian brigands realise this as thoroughly as anybody, and if a condemned felon has any pleasure in contemplating his crime in his last days of life, then the lot of the Bulgars may be as happy as they deserve it to be. We have the evidence of the robbery practised in the Bulgarian Press, extracts from which we print elsewhere in this issue. The jubilation of which there are indications will be very short-lived, and the account to be paid will be formidable. Bulgaria's balance-sheet will be a pretty sight when it is made up, and the country will be in very similar place to the man who had to sell his cart to buy food for his horse.

***

The officials of the Sudan Government are to be congratulated on the satisfactory state of the country's finances. This is mainly due to careful administrative economy, with the result that, although revenue in 1915 was a shade below the estimate, there was, nevertheless, an unexpected surplus of £E31.293. This is excellent, and however much we may be opposed in normal times to a too stringent policy of economy in a new country of immense possibilities, we must all agree that, considering the war, those responsible for the administration of the Sudan have done remarkably well. A further satisfactory feature of the situation is that in the estimates for the current year Bernard Pasha has been able to budget for an increase in revenue, which brings it to within £E11.000 of the last pre-war budget. I do not think that, when all circumstances are considered, better results could have been obtained. To mark time, pending the resumption of public works on a big scale, must be and is the watchword of the Sudan Government, and it is doing so admirably. Incidentally it may be pointed out that owing to the conquest of Darfur, a new political and economic factor in the life of the Sudan has to be envisaged, and though it is too early yet to speculate on its value we can rest assured that the Anglo-Sudanese officials on the spot will take full advantage of the possibilities of the new territory.

The British Consular System.

Need of an Imperial Establishment to Assist in the Trade Development of the Empire.

It is a matter for regret that more attention is not paid to the defects in the British Consular system which, as all the facts that have transpired since the war have indicated, is lamentably deficient in scope and efficiency. The subject was lightly touched upon last week in THE NEAR EAST, when some instances were given of American and German methods as contrasted with our own. It may be as well to say at once that we cannot afford to employ, generally, German methods of trade. They are too indescribably shady to be adopted by British firms, or by the British Government; but that is no reason why we should not imitate the thoroughness and unflagging energy which have helped to build up German trade.

It may be paradoxical to say so, but it is well for us that the German has been so unscrupulous in his dealings. If he had been able after the war to approach the commercial world with clean hands, with only the shadow of military defeat hanging over him, he would, from the point of view of trade, have had nothing to live down. In neutral countries, as a trader, he would have had a case of undiminished strength to present. "I served you well before the war," he might have said; "give me a chance now." And he would have got his chance.

German Industries.

And the German will get his chance again if Great Britain and her merchants do not stand in the way. There is a class in this country that steadfastly refuses to believe that German factories and German exporters are busily preparing for a great commercial struggle after the clash of arms has ceased. As a matter of fact, all the indications point the other way. True, the German industrial system is reeling under the blow which the war has dealt its masters: certain industries have become non-productive: German workers have been more than decimated, and other things have occurred which must, inevitably, have interfered with her efficiency; but German industries have not been crushed, all her factories have not been closed, and all her trans-frontier traffic has not ceased. Wherever it was possible to do so factories have continued to work, and, goods that cannot be sold are stocked carefully until such time as the markets of the world are once more available. Reports issued recently by the Bureau of Foreign and Domestic Commerce of the United States Government disclose the fact that in various parts of the German Empire industry is not so inactive as some of us would like to believe.

This brings us once more to the old question of our trade organization at home and abroad. At the moment, we are more interested in the latter. Practically speaking, the Consular service is supposed to serve us in this respect; but at the present time, British consular affairs, so far as they concern trade and commerce, are run as a sort of side line of the Board of Trade. If there is to be an improvement in our oversea trade propaganda that has got to be changed. Great Britain must establish an Imperial Consular Service which should be controlled from a Central Bureau in London. When this has been done the appointment of consuls must be proceeded with. Consuls must be British subjects; there is no room for the foreigner, whether he be a friendly, or a neutral, or an alien enemy. Again, the British consul must be a whole-time man. We have already lost too much because the British consul has had too many jobs on hand. He must be trained, too, for a definite career in the Consular Service.

An Expert Staff.

In London, the Consular Bureau should be staffed by experts. The service abroad should be divided into groups: thus the Balkans group would comprise all the Balkan States, with its headquarters, say, at Bucharest, where the Consul-General for the Balkans would reign. Each country would have its Consul, who would be responsible for the proper staffing and equipment of his territory. It ought to be possible for a British commercial traveller to walk into the British Consul's office at, let us say, Chios, and within a reasonable time be able to secure the most minute information about the smallest trader on the island. Nothing short of that will satisfy our trade requirements, and British merchants at home and abroad ought to insist that this standard should be attained. The relations that exist between some Consuls and traders would suggest that the former are powers to be conciliated; actually the reverse is the fact. The Consul is a public servant, and the measure of his real worth is the extent of the service he renders to his country's trade and the men who are out to push it. This point of view cannot be emphasised too strongly, and, needless to say, if the Consul is not a British subject, and a pretty enthusiastic one, we shall fall short of the possible.

People who have become accustomed to the bad old British way of doing things will object that no man could possibly do all we claim he should do. The answer to that is simple: "The German does so, and more." Discussing this subject last week, we described the activities of a German Consul in Morocco, and our readers will recall the completeness of the records of his office. How heavily a German commercial traveller would have scored over a British rival if ready-to-hand information, or the absence of it, made all the difference between booking an order and missing it!

Recruiting.

In London the Central Consular Bureau would discharge many functions. It would appoint the officers abroad. That is a very slipshod business at present. How often does it happen that an official who has gained priceless experience in one country is transferred to another? That should be impossible except in the most unusual circumstances. The objection that will be raised, of course, is that an officer must be promoted sometimes. As a matter of fact that is no reason at all. Promotion should be graded after a certain position has been reached, and before that happens salaries would be progressive year by year. That system works in ordinary commercial life, and there is no reason why it should not be adopted in an Imperial service. One-half of the salary grievances would not exist if it were adopted. Another function of the Bureau would be to recruit men for the service. In that matter some difficulty might be expected. But the difficulty would not be insurmountable, if a service which offers to young men with brains and ambitions definite careers were to be established. It ought to be possible to recruit among two classes, first among young fellows of about seventeen or eighteen years of age who are about to leave school, and second among an older class who have already gained some training in commercial affairs, in the service of firms of repute and standing.

Private Examples.

In this important matter it would be possible to profit from the experience of some of our great merchant houses. We have in mind many honoured names and the methods they adopt in the staffing of their overseas offices. One firm in particular has branch offices in many of the largest trade centres in India. Their staff in that country numbers many hundreds, and is recruited almost with automatic regularity. They draw upon their staff in London as they want new assistants "out East," and the result is that when the new youngster arrives in the country he is not new to the ways of his firm, and when he has gained experience and knowledge of the country he is able to assume really important responsibilities. It is worth incidental mention that as a result of this excellent system the number of really young Europeans in positions of responsibility, discharging their duties with credit to themselves and with profit to their principals, is one of the most remarkable features of commercial life in India. Much the same is to be said of Egypt, which is another country in which British firms recruit their staffs from among promising members of London establishments. Here, then, is a ready-made system for the recruitment of an Imperial Consular service. As vacancies occurred abroad they would be filled from headquarters. At headquarters there would be a section that would deal with consular affairs of the Balkans, and if the Consul-General at Bucharest wanted a new man that section would supply him. He would already know a good deal about the Balkans, and all else being equal it would not be long before he would be capable of controlling a small Consular station. That, roughly, would be the system of staffing the headquarters office and the Consular offices abroad.

Value of "Esprit de Corps."

There is another advantage that must not be lost sight of in this connection. Given such a service as that outlined, it would soon have its *esprit de corps*, which is always a healthy and vigorous stimulant to fine work and high *moral* in any service in which it exists. The British Empire, more than any other in the world, furnishes proof of this fact, and in no country under the British flag is the proof not to be found.

What is, perhaps, the most important question of all is that of the *personnel* of the Bureau. It must be an official institution untrammelled by musty prejudices. It must be directed by a mind that is capable of taking a perfect perspective, of supreme initiative, and of creating sound traditions. More than that, it must be able to arouse enthusiasm and to command loyalty. It must possess the implicit confidence of British commerce and the respect of all the foreign elements with which it is likely to come in contact. To secure men of this mental and business calibre it would be necessary to search outside the pale of Government offices. When found, he would be permitted to select his own lieutenants, to fill in the details of his own scheme, and to be given as free a hand as the circumstances permit. The development of the service could not be completed in a year, perhaps not in a decade; but that it must be established—if we are to make a respectable bid for a worthy place in the sun—is as obvious as was our regrettable position as a commercial back number when the war came to disclose to us the naked truth.

"AFTER THE WAR."

After the termination of the war, and when shipping facilities have become more normal than they are at the present time, we may reasonably hope that a largely increased trade will be developed among the Allied nations and their dependencies throughout the world, says the Sudan Chamber of Commerce *Journal*. One country which suggests possibilities for reciprocal trade with the Sudan is Russia, owing mainly to its close proximity, and to cheap freights which should in normal times be available between Sudan and Black Sea ports. We understand it is proposed to develop the Russian industries with Government grants, and in connection with the investment of British capital it is anticipated that a large demand will be created for raw products such as cotton, gum, senna, beeswax, etc.

As regards exports from Russia to the Sudan of manufactured articles, we are not well informed as to exactly what form such articles would take, but we are led to believe that the Russian handicraft goods manufactured in the villages and remote parts of Siberia would find a ready market in the Sudan, being remarkably cheap to purchase, and, in view of possible low freights, should be easily marketable at a reasonable profit by the Sudan trader.

BLACK LIST.

United Kingdom.

By an Order-in-Council, dated August 8, 1916, the text of which is published in the Board of Trade *Journal* of August 10, 1916, the following additions to and removals from have been made in the statutory list of firms in foreign countries with whom trading is prohibited:—

ADDITIONS: Callimasiotis, Dimitrios, Piræus; Damalas, Pavlos (Paul), Piræus; Hamparzum, Aram (Aram Hampartohoumian), Athens; Kloebe, Karl and Co., Athens; Kloebe, Friedrich (Karl Kloebe and Co.), Athens; Kloebe, Karl (Karl Kloebe and Co.), Athens; Moretti, Louis, Zante; Müller, Carl Ferdinand, Rue Apollo 37, Athens; Palaiologos, George, Patras; Procopiou, Patras; Schachtel and Jacobson, Salonika, and Schenker and Co., Salonika.

REMOVAL: Spiliotopoulos, C., Patras.

To be Wound Up.

In a recent *London Gazette* it was announced that orders have been made by the Board of Trade requiring the undermentioned business to be wound up:—

Pfisterer and Schafer, 10, New Street, Bishopsgate, London, importers (Oriental carpets, etc.).

BULGARIAN NOTES.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, July 29.

From May 25 to June 30 the following exports were recorded at the Sofia railway Custom-house:—Tobacco, 1,875,000 fr.; wool, 320,000 fr.; skins, 940,000 fr.; eggs, 240,000 fr.; meat (pork), 350,000 fr.; lard, 150,000 fr.

During the same period there were exported viâ the port of Rustchuk, tobacco, 537,000 fr.; miscellaneous goods, 435,000 fr.

The Industrial Union has proposed to the Ministry of War that the labour employed upon the production of various articles should be regulated in view of the continued mobilization. The Ministry has admitted the principle, but has requested a report regarding the method which the Union proposes should be adopted with a view to carrying out its suggestion.

The Government has made the necessary financial arrangements for the construction of a new bridge across the River Danube. It will span the river near Baziosh, and is designed to relieve the railway of some of the abnormal traffic. Materials needed for the construction of the bridge pontoons have arrived at Rahova.

MAIKOP PREMIER OIL SYNDICATE.

Meetings of holders of debenture stock, royalty holders, creditors, and shareholders of the Maikop Premier Oil Syndicate have been called for August 18 (to-day) to consider the scheme of arrangement, which provides for the formation of a new company, with a capital of £150,000 in 10s. shares. Shareholders in the old company will receive one 10s. share, credited 8s. paid, for each share now held. As regards debenture stock, principal and interest accrued from date of last payment, June 22, 1914, are to be paid 50 per cent. in fully-paid debenture stock and 50 per cent. in fully-paid shares. Creditors are to be settled with on the same basis as debenture-holders.

The Anglo-Maikop Corporation and the 5 per cent. royalty holders will receive full satisfaction of their rights in 85,000 shares; to the Anglo-Maikop Corporation 6,800 shares credited as fully-paid and 61,200 shares credited as 8s. paid; and to royalty holders 1,700 shares credited as fully-paid and 15,300 shares credited as 8s. paid. The company will create new non-convertible debenture stock for £30,000 carrying 6 per cent. from July 1, 1917, repayable at par fifteen years from date of issue, or by annual drawings or purchase at the rate of 10 per cent. per annum after the expiration of five years. The Anglo-Maikop Corporation will transfer to the new company Auction plot No. 13 against refund of expenses in connection therewith, and will provide London office and Russian organisation at half the ordinary charges until 5 per cent. is paid on the shares of the new company.—*Financial News.*

EGYPT'S COTTON AREA.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, August 2.

The estimate of the area under cotton this year recently made by the Department of Direct Taxes of the Ministry of Finance seems to have created somewhat of a stir in Alexandria, where, instead of 1,655,000 feddans, nigh on 2,000,000 feddans was the figure expected. Seeing that last year the area was 1,100,000 feddans, and the highest figure before the war was 1,755,000 feddans, it is difficult to understand how the commercial community could have placed its expectations so high.

It is possible that those who query the figures in question, whilst devoting themselves to the attraction offered by the improved cotton market, omitted to take account, firstly, of the high prices now commanded by cereals and other agricultural products, which require less expenditure than cotton; secondly, of the greater water requirements of the latter and the high cost of coal for the water lifting installations; and thirdly, of the difficulty which the smaller fellaheen experienced in the autumn of 1914 to dispose of their holdings and of the low prices obtained then—this latter experience will undoubtedly remain uppermost in the mind of the small cultivator until the end of the war, be the cotton market ever so stable and high. At any rate the Finance figures have in the past unvariably proved correct to within a negligible percentage, and there is no reason to doubt their accuracy this year.

TRADE OPENINGS.

The British Consul at Laraiche, Morocco, (Mr. E. H. Mulock), reports that a Spanish firm there, stated to have considerable experience of British trade, wishes to communicate with United Kingdom manufacturers of cement and ships' tackle, with a view to obtaining agencies therefor. Manufacturers of the goods mentioned, and exporters of U.K. goods, desirous of being represented at Laraiche, may obtain the name and address of the firm referred to on application to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C., quoting the reference number 255.

PROHIBITED EXPORTS.

A supplement to the *Board of Trade Journal*, of August 17, contains complete lists of those articles which, according to the latest information received by the Board of Trade, are prohibited to be exported respectively from the United Kingdom, Denmark, France (and Algeria), Greece, Italy, Japan, Netherlands, Norway, Portugal, Roumania, Russia, Spain, Sweden, and Switzerland. The supplement may be obtained from the usual sale agents for Government publications, price 4d., post free.

Tobacco Restrictions.

Speaking at the annual meeting of Godfrey Phillips, Limited, on August 16, Mr. Joseph Phillips, the chairman, said, regarding the prohibition of the exportation of tobacco, that the wisdom and advisability of prohibiting the raw leaf was undeniable, but in preventing British merchants from sending manufactured tobacco into Holland the Government would seem to be making a present to the Germans of a trade which England was well able to do, bearing in mind that the chief article imported into Holland was the cigarette, made of Macedonian tobacco, generally termed "Turkish," which our enemies, in view of their present hold on the Balkans, were easily able to import, manufacture, and send into Holland.

GREEK TOBACCO CROP.

According to special reports received from Greece, the Greek tobacco crop is poor this year, and may be 20 or 30 per cent. less than last year, says the *Egyptian Gazette*. This is believed to be mainly due to the recent troubles and mobilisation in that country, and to the fact that the tobacco fields in Greek Macedonia could not be planted this year owing to the war.

The tobacco stock in the Customs Stores at Alexandria now amounts to about 125,000 packages. This time last year, the stock amounted to about 140,000 packages.

BRITISH REFUGEES FROM TURKEY FUND.

The following is a further list of subscriptions to the above Fund received up to August 12. The previous list was published in our issue of August 11. We remind our readers that the Committee appeals for further support, and that the cause is an eminently deserving one. Subscriptions may be forwarded to the Hon. Treasurers (Mr. A. Baker and Mr. G. Middleton Edwards) at 5, Giltspur Street, London, E.C.:—

PRODUCE REPORT.

LONDON, August 17.

Currants.

The market has been fairly active this week, with business done at steady prices. Transactions also have taken place in new crop at very high prices, supported by advices from Greece that the market there is very strong. It is, therefore, certain that prices may still advance.

Sultanas.

There is only a moderate demand, with small business passing in Afghan fruit, while other kinds are more or less neglected.

Dates.

With a better demand, a fair amount of business has been done this week in spot parcels, as well as in new crop to arrive, at steady rates.

Figs.

The market has been quiet, but prices are well maintained.

Seeds.

Linseed is very firm and dearer, with a good demand, but scarce sellers. London-Calcutta, spot and afloat, is quoted at 77s.; July-Aug. was sold at 77s., and Aug.-Sept. at 77s. 6d.; Sept.-Oct., 78s. 3d. Bombay to London, small grain, Aug.-Sept., 77s. 9d., and ordinary ditto, 79s. La Plata to Hull, spot, 79s. 6d. Rapeseed is firm, and more or less against buyers: Toria, Aug.-Sept., 65s. Cotton-seed is steady: London-Egyptian, Sept., £12 15s., and Oct., £12 10s. Hull, spot, £12 10s.; prompt, £12 15s.; and Oct., £12 10s. Rangoon beans are firm, with a good business done, including Sept.-Oct. at £20 15s., and Oct.-Nov. and Nov.-Dec. at £21 c.i.f.

Oils.

Linseed oil is firm, with large business done: Spot, pipes, £38; spot, barrels, £38 15s.; Aug., £39; Sept.-Dec., £39 15s.; and Jan.-April, £40 5s. Rape oil is firm: Refined English, in barrels, spot, £46 to £48. Cotton oil is rather dull: Crude, pipes, spot, £38 15s.; refined, pale, pipes, £43 5s., and sweet, barrels, £52 to £53 10s. Olive oil is very firm on spot, good Spanish or Levant quoted at £59 per ton ex store.

Oilcakes.

Cotton cakes: Egyptians, in store, are in a very limited quantity, and no offers are made for forward positions. Available, in store, are offered at £9 15s. to £9 17s. 6d., whilst English makes are without change at £10 5s. Linseed cakes are unaltered in value, and prices are well maintained in spite of the comparatively small demand. Best London made are quoted at £13 to £13 5s. per ton, and fine seedy Calcutta at £13 5s. to £13 10s.

NEWS FROM ALL SOURCES.

The *Soudan Times* has had to reduce its size to four pages, two printed in English and two in Arabic, owing to shortage of paper.

A notice issued by the Government of Malta on August 4 states that the island of Corfu is no longer regarded as infected with cholera.

The Nile flood is reported to be above the normal, and the provincial irrigation officials have been instructed to take every precaution to prevent the bursting of the dykes.

According to an Amsterdam telegram a sum amounting to 5,100,000 lei (£204,000) has been embezzled by a Bourse accountant at the cost of the Roumanian Post Office.

It is semi-officially stated in Austria that bread will be composed partly of maize-meal and other substitutes after the new crops of wheat and rye are available.

A telegram has been received from Bushire by the Imperial Bank of Persia, dated August 11, stating that the staff of the Shiraz branch of the bank, who have been held prisoners for some months, have been released and have arrived at Bushire.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c.. &c.
CONTRACTORS TO GOVERNMENT.

SHIPPING NOTES.

The American steamer Northlands, with her cargo, has been detained at Malta.

The Danish steamer Ivar was sunk by a submarine on August 13 off Genoa. The crew were saved. The Ivar was of 2,139 tons.

The French sailing vessel St. Gaetan, the Italian sailing vessel Dina, and the Italian steamer Nereus are reported to have been sunk. The Nereus was of 3,980 tons, built in 1901, and owned at Genoa.

The British steamer Antiope (2973 tons), built in 1906, and owned by the Egypt and Levant Steamship Company (Limited), was sunk on August 9. The chief officer and twelve men were landed at Barcelona by a Greek steamer.

Negotiations are now proceeding, *The Times* understands, for the acquisition of the Prince Line (Limited) by the Furness Withy Company, and that, while the business of the Prince Line is regarded in shipping circles as a somewhat complicated one, there is good reason to believe the negotiations will be satisfactorily concluded.

A recent message from Marseilles states that the crew of the Japanese steamer Tenmei Maru (3360 tons), which was sunk in the Mediterranean by a submarine flying no national flag, has been landed. The submarine fired on the steamer without warning, and on the boats to which the crew of 46 had taken. The Tenmei Maru was built in 1889 as the Nadir, and owned at Ushioye.

The Greek liner Eleutherea, while on a voyage from Salonika to Volo, with 1,200 passengers on board, chiefly demobilised men of the Greek Army, caught fire on August 11, near Platan, opposite the island of Skiathos. Owing to the vessel having a cargo of petroleum (American) the flames spread with extreme rapidity, and eventually the boilers blew up, killing forty persons and injuring a considerable number. The captain succeeded in running the ship aground.

The arrival at Malta recently, on board an Italian steamer from Tripoli, of seven Englishmen (including the second mate, the second and fourth engineers), one Swede, and one Greek, belonging to the British steamer Coquette, has occasioned great satisfaction. The Coquette was sunk by a submarine seven months ago. Seventeen of the crew, after being adrift six days, reached the Libyan coast, where they were attacked on January 2 by Bedouins, who, after killing four of the crew, captured the rest. The men relate that after being taken prisoners they were sent to Jedabea. They walked a small part of the journey, doing the remainder on camels. During their seven months' captivity under Sayed Idris, chief of the Senussi, they were treated as well as could be expectd. Rations chiefly consisted of rice and oil, but their captors had the same. For some four weeks rice ran short, and they were given dates and occasionally some goat's meat. Nuri Bey often visited the Englishmen, and occasionally gave them money, tobacco, and tea as a present from the Turkish Government. The Englishmen believe they owe their release mainly to the efforts and influence of Nuri Bey. One of the crew died immediately after reaching Jedabea from wounds which he had received.

TRADE WITH PERSIA.

As indicated in previous issues of THE NEAR EAST, the Americans are paying particular attention to the trade possibilities of Persia, and are being rendered very valuable services by their Consuls. Recently, it appears, the Commercial Attaché of the United States Embassy at Petrograd paid a brief visit to Persia, and was greatly impressed by "the extremely important influence of the parcel post as a means to trade with Persia."

In his report to Washington the Attaché (Mr. Henry D. Baker) writes:—

"Since the war started, the parcel post has afforded almost the only means by which a large variety of articles enter this country. The British Consul at Tabriz estimates that at least half of the imports into the northern part of Persia from Great Britain now enter this country by parcel post in transit through Russia. Most of the cotton-piece goods coming from Manchester are sent to this part of Persia by parcel post. It appears to be the practice to ship such goods in bulk to Norway, whence they are reshipped in smaller packages to Persia.

"As England, like the United States, had no treaty arrangements whereby parcels could be shipped to Persia in transit through Russia, it was a growing practice of British firms previous to the war to send their goods in bulk to Germany, where they were broken up and forwarded by parcel post to Persia. Now, however, Norway is used for this purpose. For many years the parcel post had been growing in favour with British merchants as a means of sending goods to Persia. All other means of communication between Europe and Northern and Central Persia *viâ* Russia are handicapped by the fact that no through bill of lading can be obtained for goods passing through Russia; moreover, everything is subject to the ordinary import duty for goods entering Russia, and, in addition, the Persian customs duties have to be paid. The parcel post, however, enjoys special treatment, packages in transit being exempt from the usual customs duty in Russia. The Imperial Bank of Persia collects payment for goods sent by parcel post.

"The only means besides the parcel post of sending goods to the northern and most populous district of Persia has been the long caravan route from Trebizond, in Turkey, where duties were not collected on goods in transit to Persia. The cost of shipping piece-goods was lower *viâ* Trebizond than by parcel post; nevertheless, as there has been an enormous saving of time in the parcel-post route over the slow caravan route from Trebizond, the former method is now considered the more economical, since it allows a far more rapid turnover of the goods sold.

"American firms have not sent goods to Persia by parcel post. While the United States has no treaty arrangements for a direct parcel-post service with Persia, goods might be sent directly, as they are by British firms. The United States might greatly extend its trade with Persia by arranging with Persia and with Russia for parcel-post service, allowing goods to go through Russia without paying customs duties except on arrival in Persia."

British traders with Persia will do well to take into account this further indication of increased activity of American merchants.

The Russian steamer Kovda and the Italian sailing vessels Lorenzo Donato and Sant' Antonio have been sunk.

M. Paul Bignon, member of the French Chamber of Deputies, has proceeded to Rome to examine jointly with representatives of the Italian Government the questions of freights in the Mediterranean basin.

THE ALEXANDRIA BOURSE.

The reopening of the Alexandria Bourse has already been referred to in THE NEAR EAST. From the *Egyptian Mail* we take the following report of the speech delivered on the occasion by the President, Mr. Salines:—

"To-day for us is an historical date, and as such will remain in the annals of our Bourse. Thanks to the liberty which we enjoy in this blessed country, in which Sultan Hussein I. is prodigal in his magnanimity, I am permitted to announce the reopening of our Bourse, and to ask you to join with me in cheers for the Sultan.

"This opening, without any restrictions, is unique in the history of the Bourses and is of good augury for the future. In our joy let us not forget that a great part of our happiness is due to England, who protects and defends us under the mantle of her civilisation. Long live England! Let us not forget also our beloved colleagues, now absent. Our thoughts and our hearts turn towards those who, far away, are at war for the defence of their country and for those who are oppressed. Our colleagues, happy to be able to take part in so noble a war, will certainly contribute to the consummation of victory. Another cheer for all our colleagues among the Allies who have sons at the war.

"At the outbreak of war your wise decision, which was taken unanimously, on July 30, 1914, to close this Bourse and to suspend official quotations *sine die* gained the approbation and applause of general opinion. Everyone, however, was left at liberty to use his own judgment in concluding a transaction pending the opportune moment for the reopening of the Bourse. This wise measure saved our country from a grave financial disaster. I say 'our country,' because we are nearly all natives of Egypt and consider it as our second country. Our sole efforts are directed towards improving the credit and upraising the moral and financial position of Egypt. To this factor are added the good management of the Government and the wise decisions taken by the eminent magistrates of the Mixed Courts in order to avoid financial litigation at such a disastrous moment and during the suspension of the Bourse.

"Since the war is not yet over, and there may still be difficult moments ahead, we hope in the general interests of Egypt and for the sake of its own credit, that all financial conflicts will be avoided, otherwise we shall experience a depreciation in values and disaster. Now that the Bourse is officially open, I appeal to all of you to respect its rules and regulations and to preserve a loyal and fraternal solidarity. At the same time I wish you all happiness and prosperity."

SITUATION IN SYRIA.

A Syrian in the United States has written to the *Miraat el Gharb*—a Syrian newspaper of New York—as follows:—"I have just received an English letter from home (the Lebanon) which I send herewith. The envelope in which it came appeared to be comparatively thick, and on examining it I discovered a small piece of paper gummed to it with the following words written in Arabic: "Half of the inhabitants of Souk el Gharb (a small town in the Lebanon situated at a short distance from the Beyrout-Damascus railway line, near Aleih) have succumbed to famine. We may die before this letter reaches you. Starving to death. Martial law.'"—*Mokattam*.

According to a Bucharest telegram received in Amsterdam via Berlin an agreement has been concluded between the Roumanian State Railway Administration and the German Steel Union for the supply of from 25,000 to 30,000 tons of rails for the construction of a more direct railway between Crajova and Bucharest.

GRANT & CHINN,
The British Sanitary Engineers
of Egypt and the Sudan.

ENGINEERING NOTES.

German Industries.

Some interesting facts are included in a report recently submitted to the Commercial Bureau of the United States Government by the American Consul-General at Frankfort-on-the-Main. Mr. Harris describes the conditions in the machinery industry, and says enough to arouse interest among British manufacturers. He shows that, while suffering heavily, German industry is not at a standstill. He writes :—

In the machinery industry, large orders from the military and naval authorities made up for the orders which failed to come from foreign countries, and under the changed conditions the employees were kept busy. The purchase of raw materials was attended with difficulties which delayed deliveries of manufactured goods. The considerable rise in the original cost of raw materials and in wages increased the price of manufactured articles. The punctual payment of war orders made money easy. Besides articles for war purposes, during the year a number of grain mills, oil mills, storehouses, transport and pneumatic plants, pneumatic elevators, cement mills, hydraulic presses, and machinery of different kinds were supplied. Potash-nitrogen plants were erected especially for military purposes. The taking over by the Government of the most important metals used in the manufacture of optical instruments had an unfavourable effect for a time on this industry. It was also difficult to obtain skilled workmen for new technical instruments for which a demand arose. The readiness of the hands to work overtime, however, enabled the industry to meet large military orders for instruments. The business has increased so that a new factory will be erected in a suburb of Brunswick. The bicycle industry was unfavourably affected during the first months of the war, but afterwards improved under military orders for goods. Early losses were thus in a great measure made good. The steady rise in raw material and the want of skilled hands caused an advance in the price of manufactured products.

Minerals.

The report continues :—According to the reports of the German Iron and Steel Association, the production of raw iron in Germany, including Luxemburg, in 1914 was 14,384,000 metric tons, and in 1915 only 11,783,000 metric tons. Of this amount, about 30 per cent. was produced in Lorraine. The total production in 1912 was 17,868,909 metric tons. The output of coal in this district during 1915 appears to have been between 50 and 70 per cent. of the normal production. Industrial demands for coal were less than normal. Both the exportation and private household use of coal were restricted. The potash mines of this district (Kehl) have remained closed since the beginning of the war. The petroleum mines of Alsace, although of relatively little importance in times of peace, have acquired an enhanced value now and have been worked with as much activity as possible.

New Use of Sprayers.

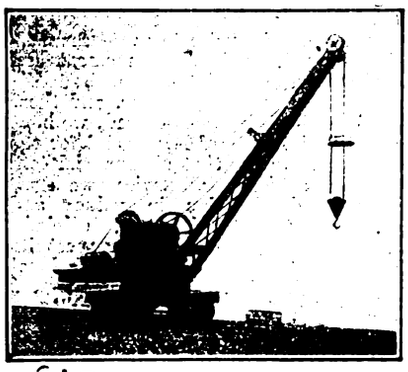
Sprayers of all kinds are used in the Near East for vines, fruit trees, etc., but for some months in the year, when spraying is not needed, they remain idle, which is unprofitable to the fruit grower. It will interest them, therefore, to learn that a new use has been found for sprayers, which may be adopted in the East with quite satisfactory results. They are used for spraying pigs, sheep, cattle, etc., with insecticides and to keep off flies. The spraying is generally done with a hand sprayer, such as is used by gardeners on plants. The animals have to be shut close in a pen for the operation, though, as a rule, they like it, and, it is said, give very little trouble under it. Spraying animals in summer-time will not only prevent disease, but will also improve the condition and quality of their skin, wool, etc.

A Petrol Economiser.

In view of the restrictions placed on the supply of petrol, an economiser which has recently been introduced will attract the attention of owners and users of motor vehicles. This economiser is simple and cheap, and, it is claimed, will save petrol to the extent of 20 to 30 per cent., aiding vaporisation and starting, giving increased power, and improving the slow-running of an engine. It consists of a cup fitted round the top of the jet. Depending from the cup is a roll of gauze encircling the jet. The cup is termed the vacuum cone, and the fine gauze, it is claimed, will retain and vaporise surplus petrol, and will check the waste caused by "blowing back." The device can be used only with carburetters having a vertical choke tube.

Orchard Ploughs.

In most of the fruit-growing districts in the East the clean-weeding system has been adopted, the ground being frequently ploughed between the rows of trees. American and Austrian or German orchard ploughs are generally used, probably for the simple reason that British cannot be procured. With the present scarcity of labour, and the increasing cultivation of orchards by the new system, there is a large demand for small and medium-size ploughs, especially in the Near East, on the Eastern Mediterranean coast, the Ægean Islands, etc. At present the implements come only from America, but if British manufacturers are able to come into the market at once orders may be secured for the coming season. As we have pointed out in previous notes in this column, owing to the war *bonâ-fide* buyers do not expect to obtain goods on credit, although they may ask for it. Agricultural implement manufacturers have an opportunity of getting a footing in the areas mentioned.



5 Ton Electric Jib Crane.

COMPANY MEETING.

Baku Russian Petroleum.

Mr. Herbert Allen, presiding at the annual general meeting, on August 15, of the Baku Russian Petroleum Co., Limited, said those who had read the directors' report or taken the trouble to analyse the accounts would be struck by the remarkable transformation which was effected in the financial position of the company between the beginning and the end of last year. They started with about £5,000 cash in hand, and finished up with £65,000—a fact which he hoped would effectually allay the misgivings of a few shareholders who took such a despondent view of the situation a year ago, forgetting, apparently, that the company's troubles at that time were due entirely to well-defined causes of a temporary nature.

Concurrently with increasing their cash balances to the extent just stated, they had met the entire capital expenditure of £24,840 out of current income, besides which they made an appreciable impression on the Baku liabilities, not the least of which was a reduction of £12,049 in the £50,000 Government loan. Altogether during the year their liquid assets were increased by £51,695, and their current liabilities by only £8,833, which meant that there was a net reduction in the liabilities of £42,862. Since the date of the accounts a further inroad had been made in the local liabilities, and the remaining £9,000 of the Government loan had been paid off. The profit and loss account was interesting for the illustration it afforded of the recuperative powers of the company, the trading profit having recovered from £27,000 in 1914 to £72,000 in 1915, and the total gross profit from £5,621 to £87,985. They had charged against profit and loss everything in the way of loss and depreciation on the investments, and the current year's accounts were started with a practically clean sheet. On their financial operations in London, as distinguished from their oil business in Baku, they had made a clear net profit from start to finish, after allowing for the losses and depreciation already mentioned, of £53,633.

In preparing the accounts they had taken the Baku profits at the conventional rate of 2s. 1½d. per rouble, and debited profit and loss account with loss on all moneys actually remitted. He did not think it would be correct to show a loss on moneys which stil remained in Russia, which might so remain until they could be remitted without loss, or which might never be remitted at all. That was where he thought those companies might be wrong who converted their entire profits, whether remitted or not, at the current exchange of 1s. 3d. per rouble.

They had recently effected an arrangement with the debenture holders suspending further sinking fund payments until January, 1918, by which time it was hoped there might be some recovery in the sterling value of the rouble. In the meantime the moneys would be deposited in Russian banks, earmarked for the debenture holders, and when released would reduce the debenture debt to about £65,000. It had already been reduced from £131,000 to £93,700 by the operation of the sinking fund. It was hoped the arrangement with the debenture holders would result in a large saving to the company.

The company was doing very little work on the Bibi-Eibat plots which were leased from the Government. For years a prospect of reduced royalties had been held out to them, and they had spent a lot of money on those plots in consequence, but the royalty question had recently been shelved, and they were not going to lay out more money merely to benefit the national exchequer. For years Baku producers had struggled with unremunerative prices, and when at last they began to see a little margin over expenses, and consequently might be disposed to extend their operations, their enterprise was stopped with a snap.

Another blow to the development of the industry was the decree of the Government fixing a maximum price of 45 copecks per pood for crude oil, of which the Government itself was one of the largest buyers. There were many properties that could not be worked at 45 copecks, and to this extent a valuable commodity would be lost to the country. On other properties, where at one time 10 to 15 copecks would have been considered a reasonable working cost, it was now 20 to 30 copecks.

It was scarcely surprising under all the circumstances, and with the knowledge that the hand of the Russian Government was so frequently against the industry, that new boring for oil in the Baku district was lower than it had been for twenty years. The high selling price of crude was the sole favourable condition under which their business was conducted last year. On most of their plots the company had substituted electrical energy for steam power with very satisfactory results financially.

With regard to the future it was extremely difficult to offer any reliable forecast; much depended on the labour situation, the supply of materials and stores, and on the question of exchange; not so much the rate of exchange as whether they would be allowed to remit money from Russia at all. The Petrograd exchange on London was nominally no worse now than it was a year ago, but in practice it was much more difficult to effect remittances now than at any previous period since the war commenced, and the quoted rate, if not actually illusory, was quite one-sided. For the first seven months of the current year their trading at Baku had been better than for the corresponding period last year, and if present appearances went for anything they might perhaps at the end of the year have the best balance-sheet yet presented to the shareholders.

The report and accounts were unanimously adopted.

COMPANY REPORT.

Egyptian Delta Light Railways.

The report of the Egyptian Delta Light Railways Company for the year ended March 31 states that the Helouan Railway with its dependencies was handed over to the Government of Egypt on December 1, 1915, and the deed in connection therewith was signed on March 5, 1916. The remainder of the Cairo Quarry lines was lifted during the year and the whole of the loss thereon adjusted against construction reserve as provided for in the modified concession from the Government. No construction work on proposed extensions has been carried out, and all work, except that of an absolutely necessary nature, has been suspended during the year. Considerable assistance has been rendered by the company to the military authorities by supplying engines, rolling stock and permanent way materials and also in constructing strategic light railways. The gross receipts amounted to £192,801, as compared with £195,032 for the previous year. The number of passengers carried during the year was 5,183,915, as compared with 5,604,766 in the previous year. The gross receipts under this head were £116,413, a decrease of £5,023. The gross receipts from goods traffic were £70,510, an increase of £2,749, the tonnage lifted being 551,756 tons, a decrease of 47,480 tons. The working expenses amounted to £142,109, as compared with £141,068. The balance carried to net revenue account is £69,408, which, with interest and dividends earned, amounting to £3,561, with the net profits from working the Helouan line, £2,070, and with the balance brought forward of £32,295, gives a total of £107,335. After providing for interest on Debentures and all fixed charges, a balance of £65,228 remains, but in view of the unprecedented conditions prevailing in Egypt and which are bound to continue for some considerable time, the abnormal price of coal, stores, and materials, and the financial uncertainty of the future, the directors have decided that they are unable to recommend the payment of a dividend for the year under review.

COMPANY NOTES.

New Company.

The Persian Mining Syndicate, Limited.—Registered August 9, by Ashurst, Morris, Crisp and Co., 17, Throgmorton Avenue, E.C. Capital, £50,000, in £1 shares. Objects: To acquire any concessions, grants, decrees, options, rights, powers, privileges, or interests in Persia or elsewhere; to carry on the business of miners, refiners, treaters, smelters and transporters of minerals of all kinds, etc., and to adopt an agreement with C. Greenway. The signatories are:—R. M. Harris, Winchester House, Old Broad Street, E.C., incorporated accountant; A. Jay, Winchester House, Old Broad Street, E.C., chartered secretary. Private company. The first directors (to number not less than three nor more than five) are to be appointed by the signatories.

Astra Romana Company.

Replying to a member in the House of Commons on August 14, Mr. Harcourt (for Mr. Runciman, President of the Board of Trade) said he did not at present propose to have further inquiries made into the business of the Astra Romano Company, which was incorporated in Roumania, and was not under the control of any British company.

Meeting.

Egyptian Delta Light Railways.—August 29, at noon: Winchester House, London, E.C.

Oil Outputs.

Anglo-Egyptian Oilfields.—Gemsah production for the week, 21 tons (last week 117 tons); Hurgada production for the week, 552 tons (last week 503 tons).

Bibi Eibat Oil.—Week ended 6th inst., 51,067 poods, or 985 tons.

Black Sea Amalgamated.—Week ended August 5, 20,652 poods (333 tons); August 12, 20,986 poods.

British Maikop Oil.—Week ended July 29, 2,335 poods (about 38 tons); week ended August 5, 2,946 poods (about 48 tons); week ended August 12, 2,770 poods (about 45 tons).

European Oilfields.—Week ended August 13, 90,400 poods.

Maikop Combine.—Week ended August 5, 6,816 poods (110 tons); August 12, 6,633 poods.

North Caucasian.—Week ended August 8, 10,347 tons.

Russian Petroleum.—Week ended August 5, 65,700 poods.

Ural Caspian Oil.—Week ended August 10, 172,003 poods (or 2,774 tons).

Oilfield News.

Maikop Orient.—Cable, dated 7th instant:—Plot 435a—Well 3, drilled 98 ft., depth 960 ft. Well 1, production for week 235 poods.

Caucasian (Tchermoeff).—Cable:—Well No. 1, depth 1,764 ft. 16 in. casing. Well No. 2, depth 2,156 ft., 12 in. casing.

A newly verified Russian oilfield, with an area of about 70,000 square miles, according to *Russia*, has been located in the Ural Province. It begins at the Caspian Sea, taking a fan-like shape to the north as far as the town of Alexandrovsky Gai, runs nearly due east to the town of Temir, and from there in a southerly and south-westerly direction, following the Emba River to the Caspian Sea again.

Dividends, etc.

Egyptian 3 per cent. Loan.—Interest on the Egyptian guaranteed 3 per cent. loan, due 1st prox., will be paid by Messrs. N. M. Rothschild and Sons on and after that date, Saturdays excepted.

One effect of the war that threatened to be very serious for New Zealand farmers was the curtailment of fertilizer shipments to the Dominion, and the consequent marked advance in prices for these essential stimulants to agricultural production. Other sources of supply have, however, been opened up, says *United Empire*, the journal of the Royal Colonial Institute, and New Zealand has now received its first consignment of basic phosphate from Egypt. The Government is assisting generously in the matter of freights and in fixing values, and farmers will receive a really high-class fertilizer at prices considerably below those ruling for similar materials.

ON 'CHANGE.

(By Our City Correspondent.)
Throgmorton Street, London, E.C.

Once more we begin with a short week, nothing doing on Saturday, which was again a holiday. Business continues to be restricted owing to the absence of sellers, who prefer to hold on to the goods. Generally the tone has continued to be good, and there would be abundant business to record if buyers could find sellers.

A few Aboukir shares have been done at the improved price of 15s. 7½d., Agricultural Banks have remained firm. Alexandria Waters are wanted at 11½. There are several buyers of Beheras at 6; but only a small seller at 6½. Delta Light preferences, as anticipated, owing to the high price of coal and other causes, are husbanding their resources, and no dividend is to be paid in respect of the year ended on March 31 last. The shares, all the same, are buyers at 5, and although they may temporarily, owing to the dividend disappointment in uninformed quarters, go somewhat lower, they will undoubtedly prove a remunerative lock-up at present prices for after the war.

Delta Lands are a firm spot at 9s. 3d. Egyptian and Foreign Trusts are in good demand at 4s. The break-up price of these shares at day's values for its investments is very considerably higher.

Markets are wanted at 24s. 6d. with possible sellers at 25s. 3d. Salts are quiet at 18s. 3d. Khedivial Mail shares have been dealt in to a certain extent round 26s. Land Banks are wanted at 5, but there are no sellers. National Banks have been done at 12½, with further probable buyers, but sellers are scarce.

New Egyptians are bid for at 9s., with sellers from 9s. 3d. to 9s. 6d.

Union Fonciere d'Egypte ordinary are wanted at ¾, but no shares are offering.

Greek Stocks.

Greek securities continue in good demand, but business is almost non-existent, as sellers are few and far between. Currant Bonds have been done at 88¼.

Monopolies are higher at 50½ and Larissa at 53.

AUSTRIAN TRADE REPRISALS.

According to a Vienna telegram received by Reuter, via Amsterdam, the Austro-Hungarian Government has issued a regulation regarding retaliatory measures for the protection of trade against French, British, and Russian subjects, and regarding patents and trade marks against Italian subjects. The regulation provides that patents and trade marks of subjects of France and Great Britain can, on request, be restricted or abolished in the public interest by the Minister of Public Works or charged with royalties.

The same regulations can be applied to patents of Russian subjects without regard to the public interest. Applications for patents and trade marks by subjects of enemy States will be accepted but not granted.

SCOPE FOR NATIVE CAPITAL.

The *Mokattam* (commenting on a circular published in the native Press by Abdul Khalik Madkour Pasha, chairman of the Egyptian Chamber of Commerce at Cairo, suggesting that a limited liability company should be organised in Egypt with native capital divided into shares of £E4 each for the purpose of purchasing some of the German and Austrian establishments under liquidation in this country) says:—"Abdul Khalik Pasha deserves every praise for this valuable suggestion, which tends to enlarge the scope of commercial co-operation in Egypt at a moment of rare opportunity. But we wish his Excellency could give a detailed explanation of his scheme, pointing out the advantage which the country would derive from this enterprise and estimating the amount of money which he thinks would suffice to carry out the business suggested. The public would also be glad to know how the enemy establishments could be purchased, and what system would be adopted for conducting them."

The Roumanian Minister of Industry and Commerce has fixed a reserve of petrol for home consumption for three months. Only the surplus over and above this quantity may be exported.

NOTES OF THE WEEK.

During the past week events in the Balkans have developed with a rapidity and in a manner sufficiently dramatic to satisfy the most ardent seeker after sensations. Striking proof of the solidarity of the Allies and of the unity in action which they have now achieved is provided by the presence in Salonika of Russian and Italian troops, to which it is now permissible to refer, and, incidentally, it may be noted that the fact of their arrival demonstrates the Allies' command of the seas in a manner which even the Germans will have some difficulty in explaining away. The Russian contingents have been arriving steadily for more than three weeks, and the Italians since August 11. Thus, counting the Montenegrins, the Allied force in the Balkans is composed of representatives of six nations. To this must be added a detachment of Albanians, commanded by Colonel Riza Bey. Apart from their military value to General Sarrail, the presence of the Russians is likely to have an extraordinary moral effect upon the Bulgarians at least, while the arrival of the Italian contingent, even if it be but a small one—as to which we are told nothing—will afford convincing testimony to the world that the Allies are absolutely united on certain points which their enemies were pleased to imagine caused some difference of opinion between them.

It was probably a knowledge of the arrival of these forces which drove the Bulgarians to take action. Be that as it may, on August 18 they began an offensive movement against the Serbian front, and have since been pressing forward wherever they found it possible to do so, the Greek troops, acting under orders from Athens, withdrawing before them and handing over forts, guns, and ammunition to them in the most polite and obliging manner possible. Here and there, it is true, some ignorant and ill-mannered Greek commandant, unversed in the higher strategy of the German-trained staff, and perhaps unable to forget that the Bulgar is the "hereditary foe," failed to carry out his instructions, and even went so far as forcibly to oppose the Bulgarians' advance. Thus, the officer in command at Fort Pheapetra actually bombarded the callers, and something very like a pitched battle—in which the whole of the Greek Sixth Division is reported to have taken part—ensued. At Lissa and Starchista also and along the Albanian border there were similar incidents, which are doubtless regarded as "regrettable" by the Staff in Athens. But on the whole the Bulgars can have very little reason to reproach the Greeks for a lack of understanding of their motives.

To follow these operations in detail would be to pay them a compliment they do not deserve. The Bulgarian advance, in fact, amounts to little more than a series of raids, undertaken doubtless at German instigation, and designed to avert, if possible, action by Roumania. That it will achieve that purpose is unlikely. It is, indeed, hard to see any purpose that it can achieve; for the theory that it is designed to secure a food supply from Greece is a very far-fetched one in view of Greece's own difficulties in regard to victualling. It is much more probable that it is the desperate throw of a gambler, made for the reason suggested above.

Another theory that has been advanced to account for the Bulgarian invasion of Greek territory is that it is hoped by means of it to influence the approaching Greek General Election. This is at least possible. It is beyond the power of the ordinary Englishman to fathom the workings of the Teuton mind, but the idea seems to be one that would appeal to German diplomacy. It is, however, a fact that the Greek election has to some extent lost interest, if not for the Allied Governments, at least for the subjects of the Allied States, who find Greek politics too "involved" to understand. And recent events have inevitably served to dishearten some of the warmest friends of Greece. They recognize that the little country is in much the same undignified and unpleasant position of "doormat" that China occupied in the Russo-Turkish War; but they cannot help feeling that to a large extent she has only herself to blame. Had M. Venizelos's far-sighted policy been followed, had King Constantine acted as a constitutional monarch, there would be a different tale to tell to-day. As it is, the Allies are naturally more concerned about, and more interested in, their own offensive than in the election.

General Sarrail began his offensive last Sunday, but so far there has been very little fighting of great importance. At the time of writing the French have occupied several villages in the Belashitza range, along the Greco-Bulgarian frontier; the Serbs are reported to be more than holding their own on the west front, in the Moglena sector; and a check has been administered to the enemy's advance on Ostrovo. As to the British share in the fighting, the General Officer Commanding reports that on Wednesday two battalions of the enemy were sighted in the neighbourhood of Dautli, and that "their advanced troops were driven in by us." On the Struma front, says the same report, the enemy are entrenching on a front about two miles from the river, in the district between Lakes Tachinos and Butkova. An attack made on the French troops holding Komarian

Digitized by Google

bridge was repulsed. It is pleasing to add that General Sarrail speaks in high terms of the "brilliant piece of work" performed by our troops in capturing Horseshoe Hill, overlooking Doldjeli village; and that he also praises highly the conduct of our Yeomanry in helping to check the enemy advance on the Struma.

The German Press continues to exhibit many signs of uneasiness regarding the attitude of Roumania, while the Allied Press for the greater part preserves a discreet silence on the subject. The German and Austro-Hungarian Ministers at Bucharest had a very long audience with King Ferdinand on Tuesday; and the Bulgarian Prime Minister has been assuring the correspondent of a Budapest paper that "our relations with Roumania are not only cordial, loyal, and good, but also calm and decided." These things seem to denote a degree of anxiety which may make us and our Allies well content, for once, to "wait and see."

The Mesopotamia Special Commission Bill received the Royal Assent on Thursday last week, and the Mesopotamia Commission of Inquiry being thus legally constituted, held its first sitting on Monday, Lord George Hamilton presiding. At the close of the sitting it was announced that "in view of the extremely private nature of the documents, and of the oral evidence which will be taken," the Commissioners had decided that their meetings should be held in private. With the wisdom of this decision few people will be disposed to quarrel. So long as our Mesopotamia Expeditionary Force is in the field with its object unaccomplished publicity regarding past operations is to be deprecated for many reasons. It is satisfactory, however, to be informed that if any points arise which, in the opinion of the Commissioners, it is desirable to publish, they will be communicated to the Press direct. The first witness called on Monday was Sir Edmund Barrow, Military Secretary, India Office, who on that and the succeeding day gave a general survey of the history of the expedition. The Commission then adjourned for a fortnight to study the documentary evidence. It is announced that General Sir Beauchamp Duff, Commander-in-Chief in India, is returning to England to give evidence before the Commission; and a Reuter's message from Simla reports that the announcement has given general satisfaction in India, where it is believed that by this means "many baseless rumours will now be disposed of."

As to military operations in Mesopotamia, they appear to be almost at a standstill, partly, no doubt, because the extreme heat still renders both sides unwilling to embark upon any important move; but partly, it is to be hoped, because our military authorities are determined that our preparations for an advance shall, this time, be on an adequate scale. What we have done in the West we must do in Mesopotamia—prepare systematically, and then advance steadily, avoiding brilliant dashes unless we are sure that we shall be able to "make good." Baghdad ought certainly to be in the occupation of our forces when the time comes for the discussion of peace terms, if our prestige in the Near and Middle East is not to suffer irretrievably. Meantime we may note that the small skirmishes which continue to take place between our own forces and those of the enemy are of a character more satisfactory to ourselves than to the Turks. An announcement made by the War Office on Monday, for instance, reports that, on the 15th inst., our forces and a contingent of friendly tribesmen inflicted punishment on some Turkish irregulars who had early in the month attempted to interfere with our reconnoitring steamers on the Euphrates, in the vicinity of Ain and Khidr. The latter place is some forty miles north of our post at Nasiriyeh and not far from Samawa, which is the seat of a Kaimakam and a "town" of some importance, as such places go on the Euphrates.

A statement issued by the War Office last Friday added some interesting facts to those previously made known regarding the Turkish defeat at Katia. This statement reports that General Sir Archibald Murray estimates that "the enemy's force amounted in all probability to some 18,000. Of these we took prisoners, wounded and unwounded, 49 officers and 3,871 other ranks. The known killed amounted to 1,251, and wounded are estimated at 4,000, thus making the total casualties about 9,000." The war material captured included a mountain battery of four guns complete, with 4,000 rounds of ammunition; 2,300 rifles and a million rounds of ammunition; nine German machine guns; large quantities of equipment of various kinds, and 500 camels and 100 horses and mules. At Bir-el-Abd the Turks abandoned two field hospitals complete, with most of their equipment; but found time to burn a large quantity of stores. If any further evidence of the completeness of the Turco-German defeat were required after the earlier reports, it is here provided. It would be rash to say that no fresh attempt at "invading Egypt" is likely to be undertaken; for if it suits the German purpose to indulge in another venture of the kind, the obedient Enver will doubtless be willing, if not anxious, to oblige. But whether Turkish troops, despite their docility, will be ready to respond to the call remains to be seen. On this latest advance, it appears, the relations between Germans and Turks were, to say the least, not cordial. The former, well equipped and well provided with stores, held aloof from their "allies," who were less fortunate in this respect; and the latter are not likely to forget the fact.

Meanwhile Egypt awaits fresh developments with the same calmness that it has shown throughout the war. The country, like Canada and India, continues to be as prosperous as ever it has been, and the Fellah, accordingly, goes his way contentedly enough, as he has done through the ages when left to tend his fields and gather in his crops undisturbed. In one respect the war has undoubtedly proved a positive blessing to Egypt. As our Cairo Correspondent has repeatedly pointed out, the martial law *régime* has made it possible for the authorities to grapple with several problems that were constant sources of trouble in pre-war days; and though undesirables who formerly benefited by the extraordinary conditions resulting from the existence of the Capitulations may regret the change, very few other people will do so. It is to be hoped that after the war, with the co-operation of Italy, France, and our other Allies, the judicial system of the country will be put on a satisfactory footing, and that the anomalies of the past will be swept away entirely.

The Turkish success against the Russians has been but short-lived. In the Trebizond sector the Grand Duke's troops have driven the enemy out of Eleu, the Black Sea Fleet lending useful assistance in the operation. West of Lake Van the Russian offensive is developing most successfully. Forced to retreat, the Turks suffered severely from the hornet-like attentions of the Cossacks; and the latest information to hand at the time of writing is to the effect that in the direction of Mosul the Russians defeated four Turkish divisions and surrounded and took prisoners two entire regiments. This is likely to put an end to any further Turkish operations in this region, and to have an excellent effect elsewhere. We may hope shortly to hear that Persian territory is quite cleared of Turkish troops, when doubtless the German agents will also make themselves scarce.

Private advices from Athens indicate that, like everything else, the recent "mission" of Prince Andrew and Prince Nicholas is being widely exploited by the anti-Venizelist party. According to the reports set about by the supporters of M. Gounaris, the two Princes succeeded in persuading the Entente Powers that they had been grievously misled by their Ministers in Athens, and both M. Guillemin and Sir Francis Elliot are shortly to be recalled! Such foolish tales may, or may not, be acceptable to a section of the Athens public, but their real value—if they can be said to have any value at all

Digitized by Google

—is merely to show openly what we have known for a long time—that the French and British Ministers in Athens are the victims of an intrigue set on foot by the pro-German party. The wish that was father to the thought in this case is likely to remain long unfulfilled.

While both the Central Powers are obviously uneasy regarding Roumania's future action, Hungary may well be pardoned for feeling not a little uneasiness on her own proper account. She has been called upon by her German partners to make great sacrifices, and she has made them more or less willingly. But she appears to have reached a stage where some at least of her statesmen are asking whether the game is worth the candle, and it has been hinted that she might not be averse to cutting herself adrift from her allies, if only she were sure of being allowed to keep Transylvania. In certain quarters in this country there is a slight tendency to coquette with this idea, and it has even been pointed out that so long as Roumania declines to make up her mind to range herself on our side, it would be permissible to offer Hungary some guarantee of the kind indicated. There are, however, in our opinion very sound reasons for deprecating any proposals of this character. Englishmen as a race have no quarrel at all with the Hungarians. On the contrary, there has long existed a feeling of real friendship between the two peoples, and the considerate treatment meted out to those of our countrymen who are now held prisoners in Hungary is warmly appreciated here. But we must not forget that the enemies of our friends must in honour be our enemies also while this war lasts; and our Serbian allies are inspired by feelings very different from our own towards the Hungarians—feelings aroused by reports that appear to be only too well founded in some cases. Again, if the principle of nationalities is not to be ignored, Transylvania ought certainly to go to Roumania. The best advice that could be offered to Hungary by her well-wishers would be that she should make terms with the Allies now, lest worse befall her, leaving the question of Transylvania for settlement when the time comes for a general discussion of the terms of peace.

On Saturday there was a recrudescence of "liveliness" in the North Sea. As usual, the Germans were early in the field with their official account, and as usual it has since been shown to have been utterly misleading. It stated that German submarines had sunk "in the waters of the English east coast" a small cruiser and a destroyer, and had "badly damaged by torpedoes" another small cruiser and a battleship. The statement issued by our Admiralty early on Monday flatly denied that a destroyer had been sunk and that a battleship had been damaged, and the denial has since been emphatically repeated. What actually occurred was that the German High Seas Fleet, or a portion of it, ventured a short distance from its harbour of refuge, but, warned by its scouts that a considerable British force was awaiting it, avoided an engagement, and returned to port in some haste. The first British report stated that one enemy submarine had certainly been destroyed and another had been rammed and possibly sunk; and the tone of late German reports leaves little doubt that the second of these craft will never return to its base. On Tuesday H.M. Submarine E23, returning from the North Sea, reported that she torpedoed a German battleship of the Nassau class, and "believed that she was sunk." This vessel proves to have been the Westfalen, and the Germans officially admit that she was damaged, though slightly. Against these successes we must unfortunately set the loss of two of our light cruisers, the Nottingham and the Falmouth, which, apparently in the ardour of pursuit, fell victims to the enemy's submarines. Happily the loss of life, though serious, was comparatively small, thirty-six of the Nottingham's crew being reported missing, while the Falmouth's losses are put down at eleven. The whole affair shows once more how tightly our Fleet is keeping the enemy's bottled up, and how vain are his boasts of having wrested the mastery of the seas from Britannia.

M. MATHIAS BOSHKOVITCH.

As already announced in THE NEAR EAST, *H. E. the Serbian Minister, M. Mathias Boshkovitch, is shortly leaving London in order to take up other duties.*

M. Boshkovitch is the son of the eminent Serbian historian, M. Stoyan Boshkovitch. After studying in Paris, he was, in 1890, attached to the Ministry of Foreign Affairs in Belgrade. His progress was rapid, and in 1896 he was appointed Secretary, and shortly afterwards Chargé d'Affaires, of the Serbian Legation in Sofia. Whilst employed there he was charged by the Serbian Government with the duty of negotiating the first Serbo-Bulgarian Treaty of Commerce. At the same time he negotiated an agreement by which Serbia and Bulgaria should continue their work amongst their nationals in Macedonia by pacific means. His efforts in this direction met with some success in theory: Bulgaria signed the agreement; but, in practice, she continued her propaganda in Macedonia by means of armed bands, and moreover hastened to inform the Turks of the arrangement that had been come to.

After having been attached to the Serbian Legation at Constantinople for some time as Secretary, M. Boshkovitch was recalled to Belgrade and appointed an Under-Secretary of State in the Ministry of Foreign Affairs. He held this position with distinction for five years, after which he tendered his resignation, which was accepted. In 1907 he was appointed Serbian Minister in Athens, where he remained six years, up to the end of the Balkan Wars. During this time he took a leading part in the negotiations for the Serbo-Greek Treaty, and the success of those negotiations was largely due to him. From Athens he was transferred to London as Minister, and entered upon his duties in February, 1914.

It is of interest to remember that shortly before the Austrian ultimatum to Serbia, in 1914, when all outward indications seemed to point in a contrary direction, M. Boshkovitch warned his Government that the danger of Austrian aggression was not over, but was indeed imminent. At the time Austria had given assurances to Europe that she was not meditating any aggressive action against Serbia, and that she would settle the Serajevo incident peacefully, by diplomatic means; the Emperor was rusticating at Ischl, and Count Berchtold and the Chief of the Staff, General Hötzendorff, were both holiday-making. It was at this moment that M. Boshkovitch telegraphed to his Government: "The campaign against Serbia which Austria-Hungary is now organising is believed to be very dangerous. The following weeks will be very critical, and Serbia ought to be prepared for everything, and not allow itself to be surprised. The calculated pacific declarations of the Austro-Hungarian circles are in no way to be believed, for preparations for putting strong pressure on Serbia are now made, and may be transformed into an attack in force."

His sympathy with Great Britain, his high regard for the splendid and solid characteristics of the English people, and his intense desire to continue and strengthen the good relations between Great Britain and Serbia, are all almost too well-known to require mention. He has frequently expressed his great pleasure that the rapprochement between the two countries took place during his residence here. Amongst the many happy memories which he will carry away with him it is this one that will give him the greatest pleasure and satisfaction.

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, July 30.

The Sirdar's Return.

The Governor-General returned from Erkowit on July 28 with the Private Secretary (Major Symes, D.S.O.), the Assistant Private Secretary (Mr. A. Keown Boyd), the Military Secretary (Major Rees Mogg), and the A.D.C. (Major Edwards). Owing to rain the special train was somewhat delayed. The arrival was quite private.

Monday, the 31st, being the first day of the new Arabic month after Ramadan, is a festival, and there is a public holiday from the 30th to August 2. A levée is held on the 31st.

A violent habboub struck Khartoum from the North shortly after mid-day on July 30. After a short period of yellow fog, induced by sand and dust, there followed a tremendous storm of rain, which continued till half-past four. Fortunately, all the roads have been embellished with channels into which the surplus water may drain and be carried away. For the moment considerable pools lie in the roads, but the water is drawn off before mosquitoes can breed.

The temperature for the last week has been remarkably low as compared with last year. On one day it went down to 91 degrees F. maximum.

Official Movements.

Colonel W. E. May Pasha, the Assistant Financial Secretary, leaves Khartoum on July 31, and is giving up his post in the Government. He has held this position for very many years, and has won the respect of all Government officials for the skill and tact with which he managed the difficulties of Sudan finance.

Captain Maydon, who was wounded in the foot at El Fasher, proceeded north on leave on July 28. Although unable still to wear a boot, he shows no other ill-effects of his wound, and expects to get a complete recovery after a change of air.

Major Thwaites, Assistant Financial Secretary of the Egyptian Army and Assistant Director of Stores, who has been in Kordofan supervising the despatch of supplies, etc., to the forces in Darfur, proceeds north on the mail train of July 30, on a medical certificate for leave.

Mr. Dun, advocate-General of the Sudan Government, started for Cairo on leave on the 28th.

Major Spinks, who was with the forces in Darfur, in command of the Artillery, has been to Alexandria, where he joined Mrs. Spinks, and they returned after a short time to Erkowit, whence Major Spinks will return to take up his duties at Khartoum.

SUFFERING ARMENIANS.

The Rev. H. Buxton, hon. secretary of the Lord Mayor's Armenian Refugees' Fund, who has just returned to England after devoting three months to relief work in the vilayets of Armenia, devastated by war and massacre, stated in the course of an interview on Saturday that, roughly speaking, 500,000 Turkish Armenians were massacred and 1,000,000 deported last summer.

"Help for the survivors," Mr. Buxton added, "must be forthcoming during the coming winter, and also next year, when a large number will be returning to their homes. About £80,000 for relief has been collected in this country, of which £57,000 was raised by the Lord Mayor's Fund, and we now need at least an equal sum. The refugees have been kept alive, and food is perhaps not the main necessity at the moment. Rather it is a matter of repatriating them on their own lands."

Asked whether he had any proof that the deportations were due to German instigation, Mr. Buxton said: "All I can say is that the German Government did nothing to stop the massacres. During the whole business German influence was supreme at Constantinople, and German Consuls were at their posts in all the chief centres through Asia Minor."

THE SIMOON.

(By Our Khartoum Correspondent.)

Few people realise the extremity to which natural heat may go until they have experienced a simoon. In the Northern Sudan, on the great expanses of empty desert, a hot wind arises and, gathering heat as it goes from the sun-baked sand, sweeps across like the red-hot breath from an opened furnace. It is accompanied by a quantity of sand, or, when the desert is rougher, of small stones, and the native who is overtaken by it has to get off his camel, cover his face, and lie down to leeward of his camel, covering with what he may his precious water-skin, which, being porous, loses its contents swiftly by evaporation in the blistering heat. With a shade temperature over 120 deg. F., where there is no shade for hundreds of miles, the actual temperature may be imagined. Sometimes the wind may continue for hours, and the traveller has to dig his camel out of the sand, which has blown over the animal's extremities.

Recently a typical case of the hardships of desert travel in a simoon occurred. A party of five Arabs, including one well-known guide, were proceeding to a well some two to three days' journey from their starting-point. The simoon came on and deprived them of all guidance, since they could see neither the sun by day nor stars at night. At the same time most of the water in their skins dried up. When they continued their route and had completed three days, and had no sight of their well, they consulted; but the guide was still confident of his road, and they continued two days more, and arrived at a place close to which he said the well was. By this time their water was almost spent, so they divided what remained; one man stayed in his place, two went north and two south to search for the well. The latter pair returned shortly, and all three followed the tracks of the first pair, whom, however, they had to give up, as they had clearly lost their way and discarded their arms and property. The three men killed a camel, drank of its blood, and squeezed a little moisture—perhaps a pint and a-half—from its belly into their water-skin, and then started due east for the Nile. On their way they killed one of the two remaining camels, but even so one of the three men died, and only two contrived to reach the river in four days from the time they had lost their companions. Their endurance is barely credible did one not know what extremes of thirst the Arab can support.

ARCHIEPISCOPAL ELECTION IN CYPRUS.

(From Our Own Correspondent.)

Cyprus, July 30.

Apart from the war, the coming election of an Archbishop is of almost all-absorbing interest for the Orthodox Greek community, which forms the large majority of the Cypriots. The Press, which has published long biographical notices of the late Primate Kyrillos, is unanimous in urging that there should be an amicable agreement as to a successor. There is a fairly general consensus of feeling in the island, which deprecates any divisions that might lead to a repetition of the grave scandal to the Church and the community which arose over the question of a successor to the throne in 1900, and which wrought much mischief.

The election is provided for by the canons of the independent island Church. Qualified electors of over twenty-one years in the four episcopal dioceses elect about 1,092 representatives, who are over twenty-five years. These elect sixty-six representatives (twenty-two clerical and forty-four lay) of over thirty years. Finally, these latter, with the Holy Synod, elect the Archbishop. The Holy Synod consists of the Archbishop, the three Metropolitans of Papho, Kition, and Kyrenia, the Abbots of Kykkou and Machaira, and the Archimandrite of the archiepiscopal diocese of Nicosia. At present, during the vacancy, the Bishop of Papho acts in the place of the Archbishop. Encyclicals are issued for the elections of representatives, which are to take place on August 21 and September 18 respectively, and nine days are allowed in each case for appeals and objections. A strong party is in favour of the Bishop of Kition, who is an able and distinguished member of the Church and has already done much for reforms, especially as regards the better education of the clergy. Others urge the election of the Archimandrite Chrysostomos Papadopoulou, a professor in the University of Athens. A preliminary meeting of Greek members of the Legislative Council and mayors of the chief towns has been held at Platres, Mt. Troödos, to discuss matters.

The distribution of 1,000 oxen to 2,000 Armenian families in forty-six villages in the Caucasus is announced by the American committee for Armenian and Syrian relief. These families are returning to their homes, following the advance of the Russian armies into Turkey.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, August 9.

The Election Outlook.

From the Venizelists' point of view, the situation has sensibly improved. As the truth spreads and the slanderous statements regarding the Liberal party and its leader are exposed, its adversaries are clearly losing confidence. The most treacherous of the falsehoods they had spread about regarding M. Venizelos was the imputation that he had been responsible for the mobilization and its long duration; and it was by this means that his opponents stirred up the dismissed reservists against him. Now this false accusation has been shown up, as the result of an announcement made by the *Hestia*, and confirmed by M. Venizelos. According to this statement, when Bulgaria mobilized in September of last year, M. Venizelos submitted to the King the Decree for a general mobilization, declaring that it was for war against Bulgaria; but as soon as he saw that the King was not prepared to go so far as that, he withdrew the Decree; and he only signed it on the urgent insistence of his Majesty, who appealed to his patriotism, saying that, according to the belief of the Staff, even a delay of a few hours might have disastrous consequences for the country. Thus the anti-Venizelists have been deprived of their best election cry, and at the same time the turn in favour of the Allies that the war seems to have taken is exercising considerable effect upon national feeling.

The First Election Address.

In spite of this, the other side is not much discouraged, and their Press attacks on M. Venizelos continue to be as violent and as coarse as ever. In a speech just delivered at Patras, M. Gounaris again harped on the old theme—if Greece had followed the Venizelist policy and taken part in the Dardanelles operations, she would have been lost; the Powers had never promised her territorial compensations; and by not taking part in the war on Serbia's behalf she has been saved, and so forth. Next he tried to justify himself with reference to the suspicions of the Entente Powers that he had incurred, which he attributed to insinuations of the Liberals; and declared that he was very grieved to find his policy so misunderstood. He was thus not ashamed—as M. Venizelos remarks in the *Kyrix*—to admit that during the nine months he and the other "saviours" (the title they have arrogated to themselves) were in power, with daily opportunities to dispel these misunderstandings, he was unable to convince the Entente Powers of his sincerity.

The outstanding feature of his address, the rallying cry of his electoral campaign, was the demand that his constituents should "proclaim Greece independent in the face of the world by voting against M. Venizelos, who has recognized and approved of the intervention of the Powers in the country's internal affairs and the occupation of Macedonia by their troops." To this the *Kyrix* replies that, if M. Gounaris considered that the independence of Greece was threatened by the Entente, such danger would not have existed had Greece fulfilled her obligations as Serbia's ally and co-operated with the Franco-British, or if his own Cabinet and the other one in which he served had preserved the benevolent neutrality promised.

The Staff and Politics.

The *Kyrix* openly denounces the Minister of War and the Minister of the Interior, who, accustomed as superior officers to obey the behests of the Staff, continue to suffer its influence in the exercise of their Ministerial functions. Thus they fulfil these functions in a manner absolutely opposed to the mandate that the Government has received, to secure the free expression of the people's will at the forthcoming elections. While fully recognising the straightforwardness of purpose with which M. Zaimis desires to carry out this difficult task, M. Venizelos considers that he has chosen these two Ministers unwisely. M. Venizelos is of opinion that M. Zaimis would have been well advised had he, before accepting power, demanded the dismissal of the Chief of Staff from the confidential position he occupies, where, by upsetting all constitutional order, he has succeeded in getting all political power into his own hands. Having failed to do so, M. Zaimis has now to put up with the consequences. It was natural that the Minister of War should be called on by the Staff to act the leading part in the political struggle, a rôle which he has played well by allowing the reservists about to be dismissed—but while they were still actually soldiers—to indulge, at the instigation of their officers, in outrageous demonstrations against the leader of the Liberal party. Again, the Minister of the Interior, Colonel Charalambis, under the same influence, has left numerous Gournarist prefects and officials in undisturbed possession of their posts, where they will be political agents of their patron at the election; while he has not appointed a single Venizelist, adopting the dishonest attitude that one cannot be a Liberal without being an anti-Royalist.

Sensational "Revelations."

The *Athenai* publishes a sensational statement, which has at least not been officially denied. This is to the effect that on June 21, when the Powers delivered their ultimatum to the Greek Government, M. Skouloudis gave orders to Admiral Condouriotis that as soon as the Allied Fleet appeared off Phaleron it should be attacked by the Greek Fleet; and, adds the report, it was the King who—as soon as he learned of this foolhardy order—hastened to countermand it. The whole thing is so grotesque that it would be useless to comment upon it.

The *Nea Hellas* also has a sensational story, according to which, in November of 1915 the Staff sent orders to Salonika to attack the Allies; but General Moschopoulos declined to obey the order, asking for explanations and to be informed whether war had been declared, and, if so, whether it was the Government that had given the order to begin hostilities!

Back-Alley Intrigue.

Certain indications lead one to believe that the military and political opponents of M. Venizelos, knowing very well that if, as they like to hope, M. Gounaris is successful at the elections, he will not be acceptable to the Entente, are preparing fresh plans to meet this difficulty. It seems that they propose in such case to make use of M. Dimitracopoulos, a former Minister of Justice under M. Venizelos, and now leader of a small group of the Opposition; and that they would place him in power, with the Parliamentary support of M. Gounaris. It is stated that M. Dimitracopoulos has already been received twice by the King.

DEPORTATION OF MONTENEGRINS.

Montenegro, apparently abandoned to a fate ill-deserved, is undergoing the most appalling suffering, writes Mr. Alex. Devine. In spite of all the Austrian efforts to prevent news leaving the occupied country, a correspondent in a neutral country writes to-day that 30,000 Montenegrin men and boys from fifteen to seventy-five years have been sent to a distant part of Hungary where the Magyar element is dominant. Most of these are in a most destitute condition.

Those remaining behind have to subsist upon potatoes, which cost no less than 5s. per lb. The terrible drought this year has added to their sum of suffering, and totally destroyed all the crops. Even the vines have not been left to them, for, when the Serbian retreat was on, and Montenegro was overrun by the Serbs, sufficient wood for cooking the food could not be obtained, hence all the vines were uprooted and utilised. Truly Montenegro is the Land of the Black Mountain.

The Anglo-Montenegrin Relief Committees in Rome, Geneva, and Marseilles are doing splendid work.

A telegram received in London on Monday states:—A great fire has broken out in the forest of Pikermi outside Athens, and threatens the forest of Pentelikon. A thousand soldiers have been sent to endeavour to prevent the fire from spreading.

In a note issued by the Serbian Press Bureau in Corfu a denial is given to a report in the Germanophil Bulgarian newspaper *Kambana* recently from the Macedonian front alleging that the troops of the Allied armies in Macedonia had been guilty of terrible cruelties towards the civil population of the occupied districts.

In answer to Major Wedgwood's inquiry whether steps have been taken to get black troops raised in Africa for garrison purposes in Egypt or Aden, or for active service in Mesopotamia, Mr. Lloyd George says that the War Office has been in communication with the military authorities in Africa, and he will have pleasure in conveying the results privately to the hon. member.

PROGRESS OF THE ARAB MOVEMENT.

(From a Correspondent.)

Cairo, August 4.

A brilliant success for the Arab movement for independence appears to be close at hand. It is semi-officially announced that diplomatic agents of the Shereef will shortly be appointed in those countries in which Arabia has special interests. Indeed, the Shereef's agent at Cairo, Omar Bey El Farouky, is already practically recognised as such; and it is said that very shortly the Shereef's flag will fly over his residence, which was taken only a few weeks ago. Omar Bey belongs to one of the noblest families of El Irak. He is young, energetic, and enlightened, and achieved distinction as an officer of the Turkish Army before he left to realise the dream of his life. He belongs to the secret Reform Committee of Arab Officers, and has played a leading part in the present great movement in Arabia.

The following facts, simple in themselves, serve to throw into relief, and lend practical significance to, the momentous announcement made lately by the British Government in regard to Arabia.

The Egyptian Postal Administration has notified the public that correspondence from the Hejaz, even though not bearing any stamps, may be delivered to the addressees, if it simply bears the mark denoting that it has been sent through the Hejaz Post Office. As a matter of fact, the Shereef's Government has decided temporarily to stamp all correspondence emanating from the Hejaz with the letters "T. SH." to indicate that it has passed through the Hejaz Post Office—this pending the new issue of Hejaz stamps, which have been ordered in Europe. It will interest philatelists to know that the issue consists of two series, one of 1 piastre, sky-blue in colour, and the other of half a piastre, red in colour. In the middle of the stamp are inscribed the words "Mecca the Honoured," and at the top "Hejaz Post"; while on the two sides figure the date of the current Arab year. Thus, the incredulous pro-Turks—and they are still legion over here—will soon have a concrete proof of the existence of an independent Arab State.

As has been foreshadowed in previous notes, the Shereef has, by his sagacity and his intelligent and rigorous conduct of the movement, won over the leading Arab chiefs. It has already been announced that the Idrissi has joined in the movement, and that, after occupying Kunfeida, he marched with his army on Ubha; and it is satisfactory to be able to announce that the Zaraneek tribe, which had not so far submitted to the authority of the Idrissi, has, through its chiefs, offered him its allegiance, and their forces are now incorporated in his army. Those who are at all acquainted with the affairs of the Tehama region and its vicinity may recollect the continual revolts of this tribe against the Turks. The Zaraneek inhabit the country lying between Assir and Hodeida, and are within a night's march of Beit el-Fakeeh, the seat of Sâdât Beit el-Bahr, the flower of the Yemen nobility. Their adhesion to the Idrissi has, therefore, a particular value. The tribe numbers about 50,000 souls.

A further item of welcome news, derived from an equally trustworthy source, is that the Shereef's Kaimakam, Emir Harb, was delegated by his Highness to visit Ibn Saoud, who had hastened to send deputies to the Shereef as soon as he heard of his momentous action. It is common knowledge that Ibn Saoud has always resisted Turkish authority. Indeed, in 1909 he drove the Turks out of El Hissa, and occupied it. As to Ibn er-Rasheed, a former supporter of the Turks, it has been ascertained that he retired to Jebel Shemru; then, seeing the collapse of his authority, he is said to have proceeded to Mecca, and to be now in the suite of the Shereef. If this be the case, he will have done a very wise thing, for his men—who abandoned him when he went over to the Turks once for support against his neighbour, Ibn Saoud—will probably rally round him again. In other quarters of less importance the feeling of enthusiasm for the Shereef has risen to such a degree that blind allegiance has been sworn to him, and implicit confidence is placed in his fitness for the supreme leadership.

As to the Imam of the Yemen, although he has not yet taken any active part in the movement, his present passive attitude, especially in connection with the Idrissi's action, may be taken as a sign of tacit approval. Indeed, the Imam's zone of influence—the Zeidi country, which comprises seven kazas (districts)—is entirely independent and under his exclusive authority. The levying of taxes and all internal administration are entirely in his hands, and his name is mentioned in the mosques as the Emir of the Faithful. The Turks' authority there is more of a shadow than a reality. When, after his successful revolt, he insisted on the Turks addressing him as such, the latter found a compromise in the title of "His Highness the Emir of the Muslemeen." Judging by the past, it is legitimate to predict that the Imam will, at no distant date, take San'a as his seat of government, as it used to be for his ancestors for centuries past, and then both Mahmoud Nedim Bey, the Vali, and Taher Rejab Effendi, the Assistant Governor, would probably be among his high officials. The chief aim of the Imam in all his past actions was the abolition of effective Turkish authority; and it would be illogical to suppose that he would not avail himself of the present occasion to realise his wish fully, more especially as he has in his suite a worthy and capable man, well known to some of the Egyptians—Es Sayed Ahmed El Kabsy, the Deputy for San'a, who has all along harboured a secret grudge against the Turks and an ardent wish for complete independence under the sacred Moslem law.

On the occasion of the forthcoming visit to the Holy Places of pious Moslems from all parts of the Peninsula, including men from the Yemen, a true indication of the policy the Imam intends to pursue will be given. Meantime, the Shereef's prestige is growing daily with his growing success on the field of battle, and when he shall have cleared Arabia of the Turks and rallied round him most of its great leaders, his title to supreme spiritual and temporal authority could no more be contested.

PRISONERS IN TURKEY AND BULGARIA.

The International Agency for Prisoners of War at Geneva, which is connected with the International Committee of the Red Cross, publishes news which has reached it of the British prisoners in Asia Minor.

At Dorak, on the southern slope of the Taurus Mountains, the men are employed in building the railway which goes from Tarsus to Konia, across the Taurus. Numerous letters from English taken prisoner in Mesopotamia and despatched to the north and east of Asia Minor have passed through the Agency. The prisoners appear to have been humanely treated *en route*. They easily obtained eggs, milk, iced drinks, lemonade, and melons. The officers were able to take their meals in the cafés of Mosul and to visit the town. Almost all these prisoners ask for clothes.

A detachment of Indian troops is employed at Ras el-Ain in building the railway from Aleppo to Mosul. An English doctor of the R.A.M.C. attends them. The internment camps are stated to be at Brusa, Yuzgat, Kastamuni, Eski-Shehir, and Afioun-Kara. Hissar, and the hospital is at Angora.

With regard to the British prisoners in Bulgaria, the Agency states that for the first time a full bag of about 200 letters and cards has passed through its hands to be forwarded to England. The correspondence came from Philippopolis, Drevnovitz, and Sofia. It appears that there are 261 non-commissioned officers and men interned at Philoppopolis, and that efforts are being made under the auspices of the Queen of Bulgaria to collect all the British prisoners in this camp.

The general conditions at Philippopolis are said to have been much improved; the food is better, and the camp commandant does all he can in favour of the prisoners. The men go to church every Sunday afternoon. The chapel is outside the city, and the service is conducted by an American clergyman. There is a circulating library of about 1,000 volumes for the prisoners. Postal packages arrive more regularly than formerly. The article most in demand is sugar, which cannot be obtained in the city. Clothing has been distributed at the expense of the Queen and of a Roumanian lady. The prisoners are allowed to write twice a month, on the 14th and on the 26th.

TO OUR READERS.

THE NEAR EAST is published on Friday, and copies are obtainable at any London bookstall early in the morning, and in the Provinces in the afternoon, of that day. To prevent disappointment, readers would assist us very much if they would place a standing order with their newsagent or railway bookstall for the supply of the paper every week. Any newsagent or railway bookstall clerk can, however, obtain copies at a few hours' notice if they have temporarily run out of stock; or we will post THE NEAR EAST for delivery on Friday morning, to any address, on the following terms, post free:—

12 MONTHS, £1; 6 MONTHS, 11s.; 3 MONTHS, 6s.

Abroad THE NEAR EAST is obtainable at any of the following agencies:—

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

IN SERBIAN MACEDONIA.

A LETTER FROM PRILEP.

(From a Correspondent.)

Private letters from Serbia—and especially from that part of Serbia which is occupied by the Bulgars—are indeed a rarity. No Serb dares, of course, to send news of himself to a friend abroad, or to describe the conditions under which he is living. Nevertheless, one such letter has come through. It was written last March by a Serb from Prilep, and it was published first in the Salonika Serbian paper, *Srpski Glasnik*, and afterwards in the Serbian paper *Srpski Dnevnik*, which is being edited in New York.

The letter describes the first days of the entrance of the Bulgarian army into Prilep, the conditions prevailing thereafter, the arrival of the Bulgarian Crown Prince Boris in the town, etc. Even then, in the month of March, the writer expressed the hope that the enemy would soon be driven out of the country.

What sort of reception did we give (the letter begins) to the Bulgars? A very cold one. It is true that the houses were decorated with flags; the population came out into the streets; many of the people were dressed in their best attire—but all were cold and calm.

Everywhere a solemn silence ruled when the first cavalry patrols appeared and entered the town. Not a single "Hooray" could be heard, except from the throats of a few paid cowards.

After this patrol, the first to enter the town were the komitajis, who were led by the ill-famed komitaji leader, Churluk. After their entry, terror and fright reigned through the town. The komitajis immediately began to pursue the Serbs. Everywhere the persecution of men, women, and children took place. The heart of the whole population was well-nigh breaking with anguish when they realised in those first few days what life under the rule of our "liberators" would be like.

While all this was taking place in the town, we did not know what had been done in the villages; but when the peasants began to come into the town, all the shops and the taverns were filled with their terrible and gruesome tales. Arson, looting, murder, violation: those are the first things brought by the Bulgars to our nation. There is not a house, not a family, in the whole of the neighbourhood which has not suffered from the savagery of the Bulgars. Like a furious gale these beasts swept from village to village, from house to house, leaving everywhere a bloody trail behind them. The terror-stricken faces of the peasants were evidence of all of the terrible cruelties they had suffered.

Afterwards the police arrived. They simply continued the work that Churluk, the komitaji leader, had begun. Every day new lists were made out of Serbs summoned to appear before the police, where they were murdered, outraged, or banished to Bulgaria. To such proportions did this barbarity attain that one of their colonels was at length compelled to make the remark: "You have the names of so many Serbs on your lists here that in this town there are no Bulgars, with the exception of those who came with us from Bulgaria."

Not a single Serbian priest, not a single teacher, not a single peasant able to write has been left.

Describing the condition of starvation, sickness, and death which a short time later the town was in through lack of everything, the letter continues as follows:—

By requisitioning everything, the Bulgars have left us nothing; and starvation, with its consequent diseases, is rife among the population. We have no supplies whatsoever. In the first place, we have no bread.

Then it was that starvation, with its consequent diseases, began to mow down the population. Prilep, which had hitherto been a healthy place, now became a den of disease. We have graves, graves, graves—nothing but graves—and the police, komitajis, and famine are causing the number to be added to daily.

We already know that the Bulgarian Crown Prince Boris went to Prilep, but till now we did not know what sort of reception he met with there. This letter gives a full and detailed account of it.

While his motor-car was going from Veles to Prilep some of the Prilep colonists were running from one house to another trying to find a suitable residence for the Imperial guest, but this proved a matter of great difficulty. Every landlord made the excuse that it was impossible for him to receive Prince Boris, because he was such a "big man." In vain the municipal councillors tried to persuade them that the Crown Prince was very unassuming: the landlords got out of it by repeating one word only—he was so "big" they could not receive him. The motor-car was almost in Prilep, but the situation as regards the residents was the same. Finally, one councillor with some municipal servants went to the house of Jordan Bombolovic, whose house they took by force for the Crown Prince. So the Prince came to that house, but, simultaneously—the landlady fled therefrom! Boris noticed the coldness with which he was received, and immediately he is said to have become very nervous. The next night he slept in Bitolj.

We can imagine the feelings of the Bulgarian army to-day in Prilep, and how they must fear the offensive move towards Macedonia which the Allies have now commenced. Meanwhile it is interesting to know—and we obtain this information also from the letter referred to—that the Bulgarian and German soldiers who were in Prilep during last March were even then dreading the Allies' offensive:—

The German and Bulgarian soldiers (continues the letter) were earlier saying that they would throw the Allies into the sea, but to-day they confine themselves to saying that the defences of Prilep are so strong that the Allies will have no easy task to take them. "But even should the Allies take Prilep," they say, "we shall offer a stubborn resistance at the Babuna Pass."

The German and Bulgarian soldiers are saying, in their usual boastful manner, how they will bring their 42-centimetre guns up. But those guns have not arrived yet, and there is no prospect of their arrival.

The letter ends with the following simple words:—"We only fear future events, because we have been informed that in case of an evacuation they will again clear us." "To clear" is a familiar term, which, as well as the word "evacuation," sounds quite harmless. Really their meaning is dreadful, and signifies this: "When the time comes for the Bulgars to retreat before the Allied and Serbian armies the Bulgars will undoubtedly murder all the Serbs in Prilep."

THE LAST OF ALI DINAR.

In a proclamation issued from Erkowit, bearing date July 8, the Governor-General of the Sudan (General Sir F. Reginald Wingate) says: "I hereby proclaim that in view of the action of Ali Dinar, late Sultan of Darfur, in rebelling against the Sudan Government, he has been deposed from the sultanship, and that Darfur will henceforth come under the direct administration and government of the Sudan Government."

MESOPOTAMIA MEDICAL SCANDAL.

The *British Medical Journal* publishes extracts from a letter received on August 15 and written by Sir Victor Horsley from the front, Mesopotamia, on July 5, about ten days before his death. The information contained in the letter was placed at the disposal of the editor, who states that the three main points are: "First, that it was written in order that the case of the responsible medical officers in Mesopotamia should not be prejudiced, as he feared it might be, through the report of the Vincent Commission; secondly, that the appalling failures in the medical arrangements in Mesopotamia were due to the utterly defective transport; and, thirdly, that the failure was bound up with the question of the present extremely unsatisfactory relation between the financial department of the Indian Government and the medical services."

The Serbian Government has asked the Mayor of Corfu for permission to use the Municipal Theatre of that town for the sittings of the Serbian Parliament.

The American Zionist Provisional Committee reports that some progress has been made toward the sending of a medical unit composed of ten doctors and two trained nurses to Palestine, says the *Jewish Chronicle* (August 18). Mr. de Haas, Secretary, and Mr. Julius I. Peyser, of the Washington Bureau, recently waited on the Acting-Secretary of State and discussed the details of the sending of the unit and were assured that the Federal Government would use its utmost endeavours in order to obtain the necessary permits from the various belligerent Governments so that the expedition might proceed as speedily as possible. The chief difficulty ahead, it is believed, will be in obtaining permission to import drugs and medical necessities with the personnel of the unit. In the meantime the Hadassah Central Committee, under whose auspices the unit is being organised, is perfecting the necessary organisation details incidental to such an important undertaking.

ARMENIAN RED CROSS & REFUGEE FUND

FOUNDED DECEMBER, 1914.

President, VISCOUNTESS BRYCE.

Donations are earnestly entreated for the relief of sickness and distress among 250,000 destitute Armenian refugees in the Caucasus, whose condition is "pitiable in the extreme." Relief pay is less than 4d. per head a day. Food and all necessaries of life are very dear. A copy of the Report for last year will be sent to inquirers. All work in connection with this Fund is voluntary. Contributions will be thankfully received and acknowledged by the Hon. Secretary and Treasurer, Miss Emily J. Robinson, 35a, Elsham Road, Kensington, London, W. Cheques may be made payable to the Armenian Red Cross and Refugee Fund; they should be crossed "London and South Western Bank, Holland Park Branch."

TANGIER TO TEHERAN.

El Khudr, or Khidr, the little village on the Euphrates, which is mentioned in the War Office communique issued on Monday, has always interested me; but, though I have been in its neighbourhood twice, I have never been able to visit it. There is near it a grove which is—or was—regarded as a sacred spot by the local Arabs, and which serves as a place of asylum for birds and beasts of all sorts. As long as they are in this grove the furred and feathered ones may not be killed by anybody; nor may the trees of the "sacred grove" be cut or damaged. If you have read Ainsworth's "Euphrates Expedition," you may remember that he and his companions, ignorant of these facts, set their men to cut wood for fuel in the grove itself; and, to make matters worse, Ainsworth actually went shooting in the sacred precincts, where he was surprised by the number and variety of the game of various kinds. The natural result followed: the party was driven off, their steamer was fired upon, and it was only thanks to the use of their "nine-pounder carronade" that they extricated themselves from a rather ticklish position.

***

Since writing my note upon the difficulties of constructing a railway (in the present circumstances) from Busreh towards Baghdad I have had another conversation with my engineering friend on the subject. I put it to him that there are in the neighbourhood of Busreh a good many *sudds*, or embankments, of a fairly solid character; and that in view of this fact it should surely be possible to construct a railway embankment in the same material. But he informed me that these sudds are constructed of a particular kind of clay, which is obtainable only in comparatively small quantities; and that to make a really good embankment, even with this clay, men accustomed to the work are necessary. And as he speaks from personal experience, his opinion is not lightly to be brushed aside. Then I mentioned a point which had been raised by other critics of his remarks: "Why not take your line back in the desert?" He replied that, in order to make the line safe against floods, it would have to be carried on an embankment, even if it were constructed some way out in the desert. And, obviously, the further back into the desert you go the greater will be the risk of "trouble" with Arabs ill-disposed towards us, and, consequently, the larger the force required to safeguard the line against raids.

***

My story about the late King George of Greece and the Newfoundland dog has brought me another, which shows what an excellent memory for faces the late King possessed. A Greek gentleman was presented to his Majesty in Athens, and, in reply to questions put, informed the King that he was an engineer by profession, and that he had received part of his instruction in England. Some years later this gentleman returned to this country, where he became connected with a technical paper. Then King George came here on a visit, and one day held an informal reception of leading members of the Greek community in London. The ex-engineer attended and was duly presented to his Majesty as Mr. X—, of the ———," the name of his paper being mentioned. "What!" said King George, at once, "you are now a journalist? When I last saw you, you were an engineer and told me you had learned your work at Messrs. ———'s."

***

The *Sudan Times* to hand by last week's mail gives the speeches made at the entertainment held at the Egyptian Officers' Club, Khartoum, on the occasion of Drake Pasha's departure. I have read them with real interest and pleasure, for there is a genuine ring about them that shows how an officer of the right stamp, like Lieut.-Colonel Drake, can win the esteem and admiration of the better class of Egyptian officer. That, however, was not my reason for referring to the pleasant gathering. It was to put on record a sentence in the speech made by Lewa Mahmoud Pasha Helmy, who was entrusted with the task of expressing his brother officers', and his own, good wishes for Drake Pasha. In apologising for his shortcomings as an orator, he remarked: "My dear Lord Kitchener of Khartoum used to drill into me many years ago, 'No officer should be an orator or speaker.'" If anything could have made me hold a higher opinion of K. of K. than I already held, the reading of that excellent advice would have done it.

CORSAIR.

A meeting of the Dardanelles Commission was held at the House of Lords on Wednesday, in order to examine General Sir Charles Monro.

Foreseeing the Russian advance, the Turkish authorities have evacuated Greek villages near the Black Sea and sent the inhabitants to concentration camps in the interior. The Greek Government has protested to the Sublime Porte.

NEAR EAST BOOKSHELF.

BEHOLD THE WOMAN.*

The author describes this book as a story of redemption—the redemption of a woman who "suffered every degradation, endured shame and ignominy as great as had been her glory, despised, condemned, and persecuted—strong, superb, and noble in the integrity of her womanhood." From which will be gathered the strenuous character of the struggle to profess Christianity in Alexandria in the days when the faith was less in keeping with the world, the flesh, and the devil than it is now—to judge, that is, by the attitude of some who still preach and pray. The author is something of an iconoclast—she destroys some of our most cherished traditions. "The early Christians were not all saints; they were human, as we who live to-day are human. They were weak, the victims of ignorance, and guilty of bigotry, injustices, and wrongs, even as we are prone to be."

The heroine is Mary, a powerful Alexandrian courtesan, "whose beauty in its day was truly the glory of Egypt." She is frankly painted—so frankly, indeed, that we may be forgiven if we plead that the worst woman (or man) who ever lived was not as bad as she (or he) is painted; but the utter wickedness of the woman—in the days before she heard the mysterious voice that called her to salvation, of course—merely serves to emphasise the strength of the redeeming power, so, for once, we may confess that the evil of exaggeration may be regarded as a virtue. A more pronounced cynic would claim, however, that the author has made a superlatively wicked woman triumph over her sin in order to show that women to-day are "clear-visioned and valiant enough" to "demand their right to equal place with men in the affairs of the nations."

There is much that is fascinating in the book—indeed, it is almost as fascinating as it is repulsive—and those who are prepared to admit the wisdom of digging deep into the miry and unsavoury depths of ancient wickedness for a moral which could be found with less difficulty nearer to the surface will, no doubt, welcome it. For ourselves, the question of appreciation is entirely one of the point of view. If the book is to be regarded as a record of Christian endeavour, we have not grasped its utility; if it is a piece of propaganda work on behalf of woman suffrage, it leaves us quite cold. If, on the other hand, it is merely a novel, then our appreciation outweighs our desire to criticise, for it is a very powerful story, and, judged from that standpoint, worth reading.

BOOK NOTES.

Messrs. Hodder and Stoughton will publish a new fairy story by the Queen of Roumania, which will be entitled "The Stealers of Light." Mr. Edmund Dulac, who illustrated the Queen's previous book, "Lily of Life," will provide the illustrations for the new volume also.

"The Collected Poems of James Elroy Flecker" will be published by Mr. Martin Secker.

Mr. Eveleigh Nash will publish in the autumn "The War in Eastern Europe," by Mr. John Reed.

Mr. E. Chivers Davies has written, and Messrs. Methuen will shortly publish, "A Farmer in Serbia."

Mr. Martin Secker is to publish "Mahomet: Founder of Islam," by G. M. Draycott.

Part I. "The Holy Qur-an," an English translation of the Koran, has been published recently by Mr. Q. Abdullah, 41, Great Russell Street. It is hoped to issue two or

* "Behold the Woman." By T. Everett Harré. (Philadelphia and London J. B. Lippincott Company. 3rd edition.)

three parts each year, and to complete the work in thirty parts.

Mr. Melrose published last week "Trooper Bluegum at the Dardanelles," by Oliver Hogue. The Hon. J. A. Hogue writes a preface to the book.

Mr. Sydney A. Moseley's book "The Truth About the Dardanelles," which has just been published by Messrs. Cassell, is likely to cause some stir. The author had excellent opportunities for following the campaign closely, and those who know him will feel sure that he has made the most of these chances. He contends that the evacuation of the Peninsula, not the expedition itself, was our greatest blunder, and suggests as a fitting epitaph for those who fell at the Dardanelles: "Died in faith and courage, failed for want of faith and courage in our politicians."

LETTERS TO THE EDITOR.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

TO THE EDITOR OF "THE NEAR EAST."

AN APPEAL FOR THE LEBANON.

Sir,—Reuter has just published the text of the official warning that Great Britain—no doubt with the full approval and adhesion of her Allies—has served on the Central Powers in connection with the treatment of the population of the territories occupied by them. In this minatory note the firm intention is expressed of exacting full reparation, by the exercise of Allied force or of public opinion in neutral countries, should the enemy refuse the introduction of foodstuffs and the unhampered distribution thereof through commissions appointed by a neutral Government.

The wording of the telegram is such as to imply the non-inclusion of the Lebanon in the provinces for which the proposed relief is intended. If such be the case, it would seem opportune for the Lebanese to make, through representative bodies, urgent representations to the Allied Governments, and recall to them the fact that, as the practical independence of the Lebanon forms the subject of conventions and protocols between the Allied Governments and the Porte, and is guaranteed by the former, the Lebanese have every right to expect the inclusion of their mountain in the territories referred to in this Note. Whatever means are resorted to for compelling the free and unhampered distribution of relief foodstuffs to the population of the occupied provinces should, in all justice, be extended to the poor Lebanese, whose extermination is the direct consequence of the political conventions which have brought their country under foreign (Allied) control, which has ever been so galling to the Young Turks' foolish pride. The occupation of the Lebanon is practically as much an act of aggression as that of Serbia or Poland.

If the following report, published by an Arabic paper in New York, be true—as there is every reason for believing—the state of the Lebanon justifies the gravest anxiety. A man from a village close to Aley, the headquarters of the Turkish military authorities, where sits the Court Martial presided over by Jemal Pasha, in sending a letter to a relative of his in the United States, has contrived to elude the Censor's hawkish eyes by writing on the inner side of the envelope the following:—"We are dying of hunger, and by the time this reaches you we may be no more of this world." At one time it was hoped that, thanks to the protection of Emir Shekeeb Arslan, the Young Turks' evil counsellor, the villages in which (or in whose neighbourhood) Druses are found would escape the full rigour of the measures adopted for starving out the Lebanese; but this hope does not now seem to be justified, since inhabitants of the village in question are running the risk of complete extermination, in spite of the presence of the Druse element in its immediate neighbourhood.—I am, etc.,

"A FRIEND OF THE SYRIANS."

"YENI TURAN."

TRAITORS TO ISLAM.

A special correspondent of the Central News supplies the following interesting particulars regarding the Neo-Turanian—or Pan-Turanian—movement. They show how deep-laid are the schemes of the so-called "Young Turks" and their German friends for the undoing of Islam:—

For some years a new movement has been noticeable in Turkey, known as "Yeni Turan"—New Turan. Its object is to revive Turkish nationality at the expense of the Moslem religion, and on this basis to unite in a general federation all the Turco-Tartar and kindred races, Bulgarians included. Its promoters are hostile to Islam, on the ground that (so they say) Islam tends to destroy the feeling of nationality, and has prevented the formation of a "Turkish" civilization; they want to "make the Turkish national soul independent of Islam." Islam, in fact, has no place in their programme, unless some fragments of it, much modified, are to survive in the new Turkish "national" religion.

The movement has both a literary and a political side. The former seeks, among other things, to glorify the history of the Turanian races; Ghengiz Khan is made a hero and a statesman by those who dream of restoring his empire. The political side concerns the Arab race. Bitter hostility is shown to them. They are a "misfortune" for Turkey; they must be Turkish; their lands must become Turkish colonies, their history and customs must be forgotten; above all, their language must be forbidden and replaced by Turkish. All this has been constantly advocated by Turkish nationalist writers, and a Turk preaching in Syria has declared that the existence of the Prophet was a fiction invented by the Arabs.

Yeni Turan is worked by a society, subventioned by the State, known as "The Turkish Hearth"; and behind it are the Committee of Union and Progress, whose leading men are not Moslems in any sense, and who, as a Government, have been denounced by Moslems for many acts contrary to the Sheriat.

The movement is, of course, warmly encouraged by Turkey's German task-masters. Since Germany discovered that it was impossible to seduce from their allegiance the great Moslem populations embraced in the Empires of France and Britain, her enthusiasm for Islam has cooled remarkably; while the world now knows (thanks to the capture by General Smuts at Moshi of the famous circular addressed by the German Government to its colonial agents) that all the time Germany was seeking to destroy the Moslem religion in her late African colonies. Germany, in fact, is to Islam the most dangerous of all enemies, the enemy who poses as a friend.

Islam has done much for the world; but the Turanian races, as their history shows, have done nothing but destroy. They have never created anything; but where they have passed they have not only, time after time, destroyed civilization and its works, but have debased and degraded their subject races by the most abominable methods. The Neo-Turanian idea that Islam has prevented the formation of a Turkish civilization is not true. Ottoman civilization is certainly only a patchwork borrowed from Arabia, Persia, Byzantium; but, then, those Turanian peoples who are not Moslems have created no civilization either, but have borrowed from China. Islam is the one thing that has held the Ottoman patchwork together. The Turk can still only destroy; he has massacred the Armenians because, in his view, they stood in the way of his joining hands with the Turcomans of Azerbaijan and the Caucasus; and in "Yeni Turan" he has a deliberate programme for the destruction of Arab nationality. But that is a subject on which both the Arabs and the Allies will have a good deal to say.

AMERICA AND ARMENIAN MASSACRES.

Under date of August 23, Reuter's agent in Washington cables:—The State Department has instructed the Armenian Embassy in Constantinople to make representations to the Porte in the name of humanity that it shall not permit a massacre of Armenians in Persia such as has occurred in Asia Minor.

A Constantinople *communiqué* dated Monday states that a Turkish airman successfully attacked two Russian torpedo-boats in the Black Sea, dropping bombs, as a result of which smoke clouds were seen on the decks of the Russian vessels.

In the next issue of *Das Neue Europa*, a monthly review published in Zurich, will appear (says a Berne message) an article proposing as a basis of peace between Austria-Hungary and Italy that the Trentino shall form a new Papal State under the independent sovereignty of the Pope. What makes this article especially significant is the fact that the review is really the organ of the Austro-Hungarian Foreign Office.

Next Thursday is the birthday of H.M. the Queen of the Netherlands, who was born in 1880.

The Serbian Legation states that reports which have appeared in the foreign Press, regarding the Crown Prince of Serbia being ill, are absolutely untrue.

Lady McMahon has arrived in London from Egypt, and is staying at 7, Walton Place.

Sir Murdoch and Lady Macdonald have arrived at Inverness from Egypt, and intend spending some time in the Highlands.

Madame Misu, the wife of the Roumanian Minister, and Mlle. Margaret Misu, her daughter, left town on Tuesday for Eastbourne for the autumn.

M. Yovan Yovanovitch, the newly-appointed Serbian Minister to the Court of St. James, who is at present in Corfu, is not expected to arrive in London before the second or third week of next month. His Excellency will attend the opening of the Skupshtina on the 28th inst.

H.E. the Roumanian Minister visited the Foreign Office on Monday afternoon.

Mme. Lahovary, the wife of the Roumanian Minister, and her daughters have arrived in London from Paris.

Last Friday's Court Circular contained the following announcement: — Major-General George Gorringe had the honour of being received by the King, when his Majesty conferred upon him the honour of Knighthood and invested him with the Insignia of a Knight Commander of the Most Honourable Order of the Bath (Military Division).

Prince Bibescu, Secretary to the Roumanian Legation, is expected in London shortly.

Captain Arion, Special Delegate of the Roumanian War Office, left London on Saturday for Ascot.

M. Levitch, the Serbian Secretary-General of the Ministry of Finance, has left London for Brighton.

The Rev. F. Hoskins, D.D., of Beyrout, has lately arrived in this country, having travelled from Constantinople by way of Austria and Germany. He is staying at the Thackeray Hotel.

A telegram from Constantinople received in Amsterdam on Tuesday states that M. Mano, the Roumanian Minister there, has left for Bucharest in consequence of the death of his mother.

The *London Gazette* announces that the King has been pleased to grant authority to Vice-Admiral Sir Arthur Henry Limpus, K.C.M.G., C.B., Admiral Superintendent of Malta Dockyard, to wear the Insignia of Grand Officer of the Legion of Honour, conferred upon him by the President of the French Republic in recognition of valuable services rendered by him.

Mr. Henry Robert Conway Dobbs, C.I.E., Revenue Commissioner, Occupied Territories, Busreh, has been appointed an Additional Companion of the Most Excellent Order of the Star of India.

In reference to the belief expressed by a correspondent in our last issue that we were about to receive a visit on this side from Mr. E. Bonham Carter, the Legal Secretary to the Sudan Government, we now learn that this will not take place for the present, Mr. Bonham Carter having returned to Khartoum.

M. Filipescu, leader of the Roumanian Conservative party and of the Unionist Federation, was received on Wednesday of last week by King Ferdinand.

Captain F. MacKinnon, R.A.M.C., is returning to Malta this week.

The marriage of the Rev. Percy Dearmer, D.D., and Miss Nancy Knowles took place quietly on Saturday at St. James's Church, Piccadilly.

The *Sudan Times* of July 29 announces :— The marriage of Mr. G. A. Clark, Public Works Department, Khartoum, and Miss E. F. Wood took place at the Cathedral on Thursday morning last. The bride was given away by Mr. A. E. Biggs. Mr. Longman acted as best man. Mr. and Mrs. Biggs were "at home" to the friends of bride and bridegroom.

Mr. and Mrs. Favarger are on a visit to Portsonachan, N.B.

We regret that in the list of subscriptions to the British Refugees from Turkey Fund, published in our issue of last week, the subscription from Mrs. H. M. Cardew was wrongly described as being from Messrs. H. M. Cardew.

Mr. Gerald C. Dudgeon, Consulting Agriculturist to the Ministry of Agriculture, recently proceeded to Upper Egypt on a tour of inspection.

The Count de Salis, who succeeds Sir Henry Howard as British Minister at the Vatican, is a Count of the Holy Roman Empire. He was born in 1864, entered the Diplomatic Service in 1886, and was appointed Envoy Extraordinary and Minister Plenipotentiary to the King of Montenegro in 1911. Amongst other appointments he has held was that of 2nd Secretary at Cairo (1894-1897), when he was granted an allowance for a knowledge of Arabic, and where he was twice Acting Agent for that period. In 1901 he was transferred to Athens (from Brussels), and in 1905, after a period of employment at the Foreign Office, he was appointed a British Delegate for the negotiation of a new commercial convention with Roumania. From 1906 to 1911 he was in Berlin, as Councillor of Embassy, and on many occasions acted as Chargé d'Affaires. He was made a C.V.O. in February, 1909, and a C.M.G. in June of the same year.

A pathetic interest attaches to a letter written by the late Colonel Percy Machell to an old Anglo-Egyptian friend, to whom he sent condolences on the death of his son. The letter was written only a few days before Colonel Machell was himself killed, and in it he said :—" When the war began I raised a battalion round my home in Westmoreland, and have commanded it ever since. So far I have come through all right, but no one can go on for ever in a war like this, and if before long you hear that I have gone too, please remeber that I have not forgotten your kindness twenty years ago."

Mrs. Dalzell Wilkinson and Miss Hermione Flatau wish to thank their friends most gratefully for their letters of sympathy concerning Captain Flatau. They feel unable to answer these letters just at present, but will do so later.

Dr. H. N. Keeling writes to *The Times* :— "I have received a card (dated July 19) from my brother, Lieutenant E. H. Keeling, a prisoner of war from Kut. He is at Kastamuni and is 'quite fit.' The only communication he has received from home since last November is a letter (not limited to four lines) which my eight-year-old son sent to him from school in May. Possibly my boy's letter softened the official heart."

Admiral Sir John Ommanney Hopkins, G.C.B., aged 82, of Chewton Lodge, Highcliffe, Hants, Commander-in-Chief on the Mediterranean Station 1896-1899, a Crimean veteran, left unsettled estate of the gross value of £2,968.

Havre Municipal Council last week decided to name one of the streets in that town after Lord Kitchener.

Major Henry Ernest Walton, 4th Dragoon Guards, of Sussex Square, Brighton, who died on May 22, leaving £102,225, gave £500 to the British Ophthalmic Hospital at Jerusalem. He desired that no gloves, hatbands, scarves, and cloaks, "or other disgusting paraphernalia of the undertakers" should be worn at his funeral, the horses to be used thereat to be bay, brown, grey, or chestnut, and not "the usual slab-sided Belgian horses, behind which no gentleman would care to be seen dead or alive."

APPOINTMENTS, PROMOTIONS, ETC.

It is now announced that M. Mathias Boshkovitch, the retiring Serbian Minister, will leave London towards the end of the month for Paris.

Sir Charles Monro, who so successfully organised the defences at Salonika, and later directed the withdrawal from Gallipoli, has been appointed Commander-in-Chief in India, in succession to General Sir Beauchamp Duff, who is coming to England to give evidence before the Mesopotamia Commission.

A Sudan correspondent writes :—

After serving some seven years in the Government, Captain H. Beaumont has been re-transferred to the Army, and the post of Senior Inspector in the Mongalla Province has been filled by the promotion of Captain H. C. Smith.

Captain R. C. Greenwood, Senior Inspector of the Bahr-el-Ghazal Province, who has been on leave until lately, will not return to the Sudan, having now been re-transferred to the Army. He has been connected with the Government of the country in various capacities since the end of 1906. His many acquaintances will be glad to know that his state of health, which had not been very good of late, has improved, and he is pleased to be again in harness.

Captain Lord Hawarden has been appointed to take Captain Greenwood's place in the senior inspectorship of the Bahr-el-Ghazal Province. His promotion from the post of Second Inspector to that of First Inspector in the same Province has been especially rapid, the advancements taking place within a few days of one another. He has been connected with the Sudan Government only since the early days of 1912, and hitherto he has been stationed at Wau, one of the three districts of the Bahr-el-Ghazal Province, of which he has also been Acting Governor. Lord Hawarden, who is in his thirty-ninth year, is unmarried. He has seen some service in Egypt, having been employed with the Army since 1910. He succeeded his cousin, the sixth viscount, in 1914, and his heir is another cousin, Mr. Thomas Raymond Maude, who is just eighteen years of age.

Captain H. C. Smith, who has succeeded Captain Beaumont as Senior Inspector in the Mongalla Province, was formerly a Second and subsequently a First Inspector, being stationed at Rejaf. He has had some four-and-a-half years' experience in the government of the Sudan, his promotion being, as in the case of Lord Hawarden, unusually rapid. His appointments as First and Second Inspector were gazetted on the same day.

FRENCH, English, Spanish, Italian, German, Scandinavian Languages, Greek, etc., rapidly taught by natives.
Σχολή Γλωσσῶν. Διδασκαλία συστηματική. Διερμηνεῖς κ.λ.π. Δίδακτρα μέτρια.
Lyceum Institute, 85, New Oxford Street, and 64, Haymarket.

Digitized by Google

The vacant Second Inspectorship in the Bahr-el-Ghazal Province has been filled by the transfer of Captain R. S. Hart, who has hitherto been filling a similar post in the Kassala Province, where he had been stationed at Gallabat.

The *London Gazette* announces that the King has been graciously pleased to make the following appointments in recognition of the meritorious services of the undermentioned gentlemen during the war:—To be additional Companions of the Most Eminent Order of the Indian Empire: Lieutenant-Colonel d'Arcy Charles Brownlow, Indian Army, Principal Military Governor of the Occupied Territories, Busreh; Major Gerard Evelyn Leachman, Royal Sussex Regiment, Assistant Political Officer, Busreh; Reader William Bullard, Esq., Levant Consular Service, Civil Adviser to the Principal Military Governor, Busreh; Major (Brevet Lieutenant-Colonel) Frederick Walter Radcliffe, Dorsetshire Regiment, Deputy Military Governor, Busreh; Edward Leonard Bagshawe, Esq., Telegraph Department, Busreh; Charles John Emile Clerici, Esq., Postal Department, Busreh.

Sayed Omar el Farouki, an Arab gentleman of Baghdad, who is one of the leaders of the Arab movement in Turkey, has been selected to act as representative of the Shereef of Mecca in Egypt.

Major C. M. Jickling, Norfolk Regiment, and Captain A. G. Spears, Argyll and Sutherland Highlanders, having reported their arrivals in Egypt, have been taken on the strength of the Egyptian Army as special service officers and posted, the first to the 1st Battalion, and the second to the 13th Sudanese.

Mr. George Jamieson, C.M.G., late Consul-General at Shanghai, has been appointed a member of the governing body of the School of Oriental Studies, on the nomination of the China Association.

Lieutenant C. G. Martyn, V.C., D.S.O., Royal Engineers, has been attached to the Egyptian Army with the temporary rank of Bimbashi, and attached to the Military Works Department for duty.

OBITUARY.

LIEUT.-COL. C. E. RADCLYFFE, D.S.O.

Lieutenant-Colonel Charles Edward Radclyffe, D.S.O., Rifle Brigade, commanding a battalion of the Essex Regiment, who was reported wounded and missing on September 26, 1915, and is now presumed killed, was the only son of Charles Edward Radclyffe, J.P., of Little Park, Wickham, Hants, and Constance, daughter of Colonel and Lady Maria Saunderson. Born in 1864, he was educated at Eton, and entered the Rifle Brigade in 1885. He was captain in 1894, major in 1903, and lieutenant-colonel in 1909, when he took command of the 4th Battalion Rifle Brigade in Egypt, Khartoum, and India. He served with the Burmah Expedition in 1886-7 and 1887-9, and was severely wounded (medal with two clasps). He went through the South African Campaign with the 1st Battalion Rifle Brigade, being present at the relief of Ladysmith, and was wounded and won the D.S.O. in 1900. He afterwards became Assistant Provost Marshal. He was mentioned in despatches three times, and received the Queen's medal with six clasps, and the King's medal with two clasps. Colonel Radclyffe, who had been placed on half-pay in December, 1913, was given the command of a battalion of the Essex Regiment when the present war broke out, and went to France in September, 1915. He was twice wounded at the battle of Loos, the second time very severely. Colonel Radclyffe married, in 1898, Theresa Caroline, only child of John Stanley Mott, of Barningham Hall, Norfolk, and leaves one son, born in 1911.

MR. J. R. P. SANDFORD.

Our Khartoum correspondent writes (July 30):—We deeply regret to record the death of Mr. J. R. P. Sandford very suddenly in Khartoum Hospital on July 29. He was popularly reported to have swallowed a fish-bone. He was in hospital and was said to be improving when he had a sudden and violent hæmorrhage. Mr. Sandford was an Oxford man, and came to the Sudan in 1906, and was an extremely able and hardworking administrator, and was likely to be promoted shortly to the rank of senior inspector. Whilst in Omdurman, where he had been for some years, he took a keen part in polo and racing. His loss is very keenly felt by all who knew him. His funeral took place on July 30, and was attended by H.E. the Governor-General and staff, and a large number of officials and officers, besides numerous sheikhs and notables of Omdurman and Khartoum.

The *Egyptian Gazette* announces that the death of Lieut.-Colonel Gordon Frazer, commanding at Kasr el Nil Barracks, took place on Wednesday morning, August 2. The funeral took place in Old Cairo the same afternoon with full military honours.

Second-Lieutenant Cyril James Moss, Suffolk Regiment, youngest son of Mr. and Mrs. J. Moss, of Tonbridge, died of wounds on August 19, aged 24. When the war broke out he came home from Turkey, where he had been on the staff of the Imperial Ottoman Bank. He was a good athlete and all-round sportsman, and was a prominent member of the South London Harriers. After a special course at Sandhurst, he was gazetted to the Suffolk Regiment, and he took part in the battle of Hooge. Mr. Moss was educated at Tonbridge School, where he was in the Football XV., the Cricket 2nd XI., the School Gymnasium Eight, and a sergeant in the O.T.C.

The Rev. Lewis Joseph Matthews, one of the Roman Catholic chaplains to the Forces, who served with the Nile Expedition of 1898, has died on service. Sixty years of age, he had been in the Army Chaplains' Department since 1884, and reached the First Class in 1905. Besides serving in Egypt, he went through the South African War, and he held the Egyptian medal and both the Queen's and King's South African medals.

News has been received that Captain Jersey de Knoop, of Calveley Hall, Nantwich, who was with the Imperial Camel Corps in Egypt, has been killed in action. Captain de Knoop, who had previously served on the Headquarters Staff in France as an interpreter, was the son of Baron de Knoop, of Manchester. Last year, when home on leave, he made a speech referring to the shortage of ammunition at the Front, which caused a strong sensation.

As we go to press we regret to learn that news has been received, through the American Minister at Copenhagen, of the death at Beyrout of the Rev. Daniel Bliss, D.D., President Emeritus of the Syrian Protestant College at Beyrout, at the age of ninety-two years.

The death is also announced of Mr. Edwin Glockler, of Beyrout, who died at Everek Develau, in Asia Minor. He was one of the civilian British prisoners interned in Turkey at the beginning of the war.

DOMESTIC ANNOUNCEMENTS

BIRTH.

MOSER.—On Sunday, July 30, at Cairo, the wife of R. C. Moser, P.W.M., Egypt, of a daughter.

DEATHS.

RITCHIE.—On the 13th inst., in hospital, Salonika, Nursing Sister Jessie Ritchie, of The Queen Alexandra Imperial Military Reserve, daughter of the late Mr. Alexander Ritchie, Whitefield, and Mrs. Ritchie, Abbeyville, Coupar Angus, Scotland.

RODGER.—Killed in a charge, on July 7, 1916, Norman Guild Rodger, Corporal, Cheshires, only son of Mr. and Mrs. J. Guild Rodger, of Port Said, Egypt. *Pro patria mori.*

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

The only English Hotels in Alexandria.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.),
Alexandria.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
Glymenopoulo, Ramleh.
This Hotel is situated near the Beach.
Open all the Year. Bathing Cabins.
Terms from:
Pension, P.T.60; Lunch, P.T.20;
Dinner, P.T.25.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

FRIDAY, AUGUST 25, 1916.

TURKEY AND THE ARABS.

After passing through a period of comparative quiescence, the Near East has during the past week become the scene of stirring events once more. The audacious advance of the Bulgars, and—to a greater extent—the publication of the news that Russian and Italian troops have landed at Salonika, have served to draw all eyes to that sector of the Allied front. But these are, after all, only the opening moves of the drama that must be played out to its inevitable end in the Balkans. There is another theatre of the war in which events are probably much nearer a climax. Arabia is still a land of mystery to most Englishmen; but, unless indications are entirely misleading, it is about to become the scene of developments that cannot fail to be of considerable importance to the British Empire. To all students of the East, and of the Moslem East especially, the movement for freedom which the Shereef of Mecca has headed must be of enthralling interest and appear pregnant with many possibilities. Arab resentment of Turkish rule is no new thing, nor were events such as are now occurring unknown in the past; and if the motives that have brought about this uprising and the scene of its action are examined, the reasons for it are not far to seek. The Arabs, like the Albanians, are a freedom-loving race, and are bound to resent being governed by a people whom they consider their inferior both in intellect and artistic feeling. The Arab is quicker-witted and more alert mentally than the rather sluggish, heavy Turk of the purer type, though he may not possess some of the qualities that go with the calmer temperament of the latter. The Arab has a fine tradition and history behind him, and has attained a height in artistic production, literature, and learning generally to which the Turk has never even aspired. The Arabs lost their independence to the Turks in 1517, when Selim I., "The Grim," added Mesopotamia, Syria, Arabia, and Egypt to the Turkish Empire. Since then revolts in the conquered provinces have been frequent, and in the early part of last century Ibrahim Pasha of Egypt led his victorious troops as far as Konia and Angora and to within a few marches of the capital itself. The tragic events in the Lebanon show that both Christian and Moslem Arabs have suffered at the hands of their rulers, and rebellion in the Yemen has been a running sore for many years past. Since the Turkish Revolution of 1908, with all its initial promises of equality and goodwill for all subject races, some of the men who have been at the head of affairs have been everything that is most repugnant to the more high-minded and deeply religious Arab. They were Freemasons, converted Jews, and men who had lost their faith and had not replaced it with anything else. The army, in which the Arabs are now largely incorporated, was, at least during the Balkan wars, told to fight for its "memleket" (country) and not for its "din" (faith), as of old. With the exception of greater freedom of movement at the start, the change of *régime* did not bring in its train any appreciable benefits in the way of increased prosperity or reduced taxation, which to the simple-minded people is the only *raison d'être* of any desire for a change. The failure of the attack on Egypt and the full manner in which the Turkish troops are occupied in the other parts of the Empire, combined with the impossibility of sending reinforcements or supplies to the garrisons of the Hejaz or Yemen by way of the sea, led to a situation highly favourable to a successful revolt. The Shereef of Mecca, an able and enlightened man, saw that the moment was opportune, and struck, with the chances of success greatly in his favour.

It will be well now to examine the possibilities arising out of the present situation, more especially as they affect Great Britain. The primary interest centres round the question of the Khalifate, which was won for the house of Osman when Selim I. forced the representatives of the old Abbassid family to make over to him and his heirs the rights and privileges of the successors of the Prophet. Since that date the Sultan of Turkey has been both Sultan and Khalif owing to his possession of the Holy Places of Mecca and Medina. With the passing of Mecca, and the probable loss of Medina, into the hands of the Shereef the right to the Khalifate, which is based on the possession of these towns, passes by right of conquest. The blow to the Sultan of Turkey is a serious one—more serious than would be the loss of Rome to the Pope; for the right to the title of Khalif is based on the actual possession of the Holy Places of pilgrimage, which are, so to say, the central pivot of orthodox Islam, whereas the power of the Pope is spiritual and independent of the possession of certain localities. By placing themselves in open revolt against their Turkish rulers and oppressors, the Arabs of the Hejaz have, *nolens volens*, joined the cause of England and her Allies against the common enemy. This places them in a position entirely different from those brought about by former risings. In any previous revolt Great Britain, being in friendly relationship with the Ottoman Empire, was bound to observe a strict neutrality, but the case is altered now, as was made clear in an official statement recently issued. The situation remains, however, a difficult one, and calls for most careful handling. There can be no question that our attitude towards the Shereef of Mecca and those who have thrown in their lot with him should be sympathetic; but we must be tactful in our way of showing our sympathy. The Arab is quick to recognize a friend and quick to appreciate a friendly act; but he is no less quick to resent anything savouring of interference.

Happily, our Government appears to be fully alive to the difficulties of the situation. It has announced its policy in the clearest possible manner, and with that policy it would be difficult for anybody who was not bent upon picking a quarrel, or making mischief, to find any serious fault. Great Britain has millions of Moslem subjects, many of whom have lately been prevented from making the pilgrimage to Mecca and Medina; and in Irak Indian Moslem pilgrims to Kerbellah and Nejef have been subjected to brutal treatment, which has proved to them that the present self-appointed rulers of Turkey "are no Moslems, and do not act according to the precepts of Islam." Such things cannot and will not be suffered. Britain's policy has always been one of religious tolerance; but she will not brook manifestations of religious intolerance directed against those who have a right to look to her for protection. She has no desire to interfere in questions that concern Moslems alone, and she will not do so. But her Moslem subjects are entitled to have free access to the Holy Places, and she is determined to do what lies in her power to secure that right to them. In so far as the movement headed by the Shereef of Mecca tends to help forward this policy it will be welcomed, and its continued success is to be hoped for. We are entitled, therefore, to hope that if the Shereef desires our help in any form it will be given him freely. By so doing Great Britain would be helping forward the cause of freedom and of justice, and would assuredly not be guilty of any unfriendly action towards Islam. In certain quarters there has long been some confusion between "Turkey" and "Islam"—a confusion which has been deliberately fostered by Turco-German emissaries for their own purposes. The plain fact is that Turkey is to-day in the hands of a camarilla that has done its best to bring the country to ruin and the Khalifate and Islam into contempt. The Shereef of Mecca is an incomparably more worthy representative of Moslem thought and Moslem ideals, and the Arab movement—unlike that neo-Turanian movement to which *The Times* recently referred for the first time—is deserving of our warm sympathy and best support.

PROBLEMS OF THE SUDAN.

II.—THE CONSERVATISM OF THE SUDANESE.

(By Our Khartoum Correspondent.)

Some years ago, when an agricultural pest appeared, the local sheikhs were gathered together and the proper means of getting rid of the pest explained to them with care. In the middle of the explanation a voice in the background was heard to say in the local dialect, "Who is this who teaches us agriculture? Have we not tilled for a thousand years? What do they know?"

This is very typical, and exemplifies in almost every detail the attitude of the native.. First of all, he believes he knows best—that is his amazing conceit; secondly, he is thoroughly sceptical of the efficiency of the methods put before him, and this is either ignorance or "a little knowledge"; thirdly, he clings to the old way for its own sake, because it *is* the old way—and this is really due to his religion. It may be profitable to consider each of these points in turn.

The conceit of the native does not, as a rule, become immediately recognized, as he practically invariably secretes it beneath an obedient, even subservient, manner. But a very short experience of the country teaches the oft-repeated phrase, "I thought it was a better plan so," produced as an explanation of a direct disobedience of orders and complete ruin of carefully designed plans. Indeed many an official would say that the words "Ahsan Tartib" (a better plan) will be found engraved upon his heart. The other favourite motto of the country is "Yimkin bukra" (perhaps to-morrow), and is not unnatural to a people who are for the most part physically weak and mentally little developed; but with that "better plan" already mentioned it combines to reduce the energetic apostle of progress to gibbering rage. Show a native a motor-car for ten minutes, and he will say he knows all about it, and, if left unwatched, will not hesitate to drive it. Whatever be the art or science, he will undertake to do anything on sight, and sometimes without that—notably the art of cooking, as travellers can tell.

All this assumes the will of the native to be on the side of action, for if it be not, he knows nothing, understands nothing, and is incapable of anything. Take, for example, the native who is offered largess to show the way to another village—to which, for some reason, he does not want the traveller to go. He will defer replies with a long-drawn-out "E—e—e—r?" of interrogation to the simplest question, and will claim that neither he nor anyone else knows the existence of any such road, and that it never did exist. Yet once convinced, a few minutes later he may be in furious argument with his relations as to which of the many roads is really the best.

In effect, the native considers he knows best for himself and for everyone else, and he can perform any function if necessary; and any accident is due not to his own folly, but the inherent badness of the subject matter dealt with.

The scepticism of the native towards modern methods is at times not entirely unreasonable. He has no means of distinguishing between the various regulations, so as to detect which contains the really essential point; and, secondly, he has not infrequently discovered himself some similar means of prophylactic of which he knows only too much. To a man to whom the miscroscope has not yielded the secrets of Nature the idea that mosquitoes breed fever in the blood is extremely difficult to grasp. He makes no distinctions between one kind of biting fly and another, let alone between individual mosquitoes; and he cannot see the microbe—but he is certain that anti-mosquito regulations are tiresome, and is inclined to believe the whole thing a fetish. On the other hand, in the case of vaccination, he knows too much. The Sudanese discovered that by infecting a healthy man with smallpox he got over the disease, and they have adapted this principle with certain cattle diseases. But it is a heroic measure, for the fatalities are many. To explain to him that vaccination does not give him smallpox is to ask for the retort, "Then why give me something else?" and the explanation, one feels, is too long and difficult to be credible.

Again, native methods have a most unfortunate knack of succeeding when they have no business to succeed. For instance, a camel which had a severe cough was treated for some months unavailingly on scientific methods. At last the owner was told he had better take his camel away, as the cough did not improve. He did, and returned with it in a fortnight, cured to all outward seeming. His treatment had been a touch of a red-hot iron at the tip of the tail, the near hind foot, and the top of the head. A result of this sort is most damaging to science—and is on the face of it a justification of scepticism. Or, again, the treatment of clarified butter poured through the nostril as a cure for sore feet (by this means it goes straight to the part affected!) is not on the face of it scientific, but it is a well-established treatment amongst Arabs, and has its votaries even amongst Europeans.

It would be easy to multiply such instances. They are not peculiar to the Sudan. Only where all things are more or less incomprehensible the influence of magic or some mystic rite is easily credible, and makes the way of the scientist hard.

It is a commonplace to refer to the inability to progress in Islam. It is indeed a static faith with a moral system dependent on the conditions of life in Arabia 1,334 years ago. And since the essential doctrine of the religion is simpler perhaps than any in the world, so the religion is exemplified by a (nominally) stricter adherence to a moral law laid down long since, overlaid by thousands of examples and precepts, but developed not at all. With such a system as the basis of his life, the Sudanese, like any other Moslem, looks upon change askance, and he is never quite sure that the new idea may not lead him to some dilemma, some divergence between his long-established custom and the new order of things, which will worry him and make trouble in the household. For if the man is conservative and fond of his old customs, the woman is a fanatic about them. Any divergence, she maintains, will bring ill-luck, if not worse; and the real weight of opposition to progress lies in the women far more than the men.

It might be supposed from these lines that the Sudanese are a surly, obstructive, and unprogressive people. This is far from being the case. The conceit that prompts the native of the Sudan to assume that he knows all things urges him likewise to know more, and he is as inquisitive as a monkey. He has, moreover, a very touching personal belief in the individual British administrator, and will carry out his recommendations, however sceptical he may be of their success; and when in the fulness of time success crowns his efforts he will find fresh reason for self-satisfaction therein—no doubt, copying his more Western examples.

Consistency is not to be expected in a primitive people, if in any, certainly not in the Sudan, and progress will occur and has occurred already to a striking degree; but it requires special characteristics in the administrator, infinite patience, a sense of humour, and much determination and a great sympathy. Certainly the results are there to be seen, but much remains. What especially remains is to bring the mental development up to their standard of outward civilization; and it is this conservatism of the mind, a lack of receptivity, and a desire to refuse new ideas—or at most to do no more than make use of them, only to drop them at the first opportunity—that provides one of the chief problems before the Sudan.

A Cairo telegram states that in addition to Jeddah and Mecca, telegraphic communication has now been established with Taif, via Wadi Halfa and Suakin.

In the Prize Court on Tuesday, the President, Sir Samuel Evans, granted the officers and crews of his Majesty's ships Kennet, Jed, and Wear, bounty to the amount of £175 in respect to the sinking of the Turkish torpedo-boat Demir Hissar on April 16, 1915, in Khios Strait. The enemy, after attempting to torpedo a transport, was chased for ninety miles by the Kennet and Jed, and fled to the Straits. She was trapped by the Wear entering by the other channel, ran herself ashore, and attempted to blow herself up.

The 'BEATALL' FILE *A perfect triumph in Box Files. Wonderful Value.*

The 'BEATALL' File keeps Letters, Orders, Invoices, Memos, &c., in perfect alphabetical order and free from any dust whatever. The File is strengthened at the top and bottom with wood, and is bound in Maroon Coloured Silk Leatherette. It is a most handsome production.

No perforating required. Very powerfully made with good Stop-action Clip and movable index. The lid is provided with dust-proof flange.

QUARTO 11¼ × 9⅞ × 2⅜ inside. **21/-** PER DOZEN NETT.

Obtainable only from **H. HOWES & CO., LTD.,**
Manufacturing Stationers and Printers,
2, Gresham Buildings, Basinghall Street, London, E.C.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Special Commissions Bill. Aug. 17.

A Royal Commission, consisting of the Lord Chancellor, the Duke of Devonshire, and Viscount Allendale, announced that the Royal Assent had been given to the Special Commissions (Dardanelles and Mesopotamia) Bill.

Commands in Aden and Mesopotamia. Aug. 22.

Viscount PEEL asked whether Major-General Shaw, recently removed from his command at Karachi, was deprived of his command at Aden in 1915 on military grounds; whether another general officer recently recalled from Mesopotamia had been given an important command in India; and whether his Majesty's Government thought it desirable that officers removed from their commands on military grounds should receive new appointments during the war.

Lord ISLINGTON said that it was a fact that General Shaw, who was G.O.C. at Aden in 1915, was transferred because the Government of India were dissatisfied with his discharge of the responsible duties. He was subsequently appointed G.O.C. at Karachi, a station of less importance, and he had now been removed from that appointment in consequence of his share in the responsibility for the lamentable disaster to the drafts removing from Karachi, and had now received permission to return to England. The second part of the question would seem to indicate that General Aylmer was removed from Mesopotamia on military grounds. He was an officer of high record and gallantry, and held the V.C., but he was no longer a young man, and the climatic rigours of Mesopotamia and the peculiarly arduous conditions of the campaign made the post one of special difficulty for him. On his transfer from his battalion he was posted to a divisional command in India, but he had been selected for such an appointment before he went to Mesopotamia, and on his return merely reverted to it, though, for the convenience of the Service, he was given command of a different division. The India Office was not consulted. With regard to the last part of the question, it must be remembered that there was a great shortage of officers, and that an officer who was unfit for a command of one kind could be used in an appointment for which he was suitable.

Conditions in Mesopotamia.

The Marquess of SALISBURY asked whether the Vincent report on the Mesopotamian Expeditionary Force had been communicated to the Government, and whether the Government were satisfied that everything stated by that report as requiring prompt attention had been supplied.

The Earl of DERBY replied that the Vincent report was communicated to the War Office last week, the apparent reason why it had not arrived sooner being that the Secretary for India was informed by the Viceroy that there was nothing in the report requiring immediate action. The War Office were, however, carefully examining the report. All demands for stores had been met, and any further demands for medical stores, however large, would be supplied. But the real difficulty was getting the stores up river. Orders had been given which would place the proper craft at the disposal of the expedition. He had, however, to add a word of warning. It would not be possible to have the whole of the defects regarding transport made good until, at all events, the end of October.

HOUSE OF COMMONS.

The Kut Prisoners. Aug. 17.

Sir E. CORNWALL inquired how many of the prisoners who fell into Turkish hands at Kut-el-Amarah had been traced.

Mr. H. W. FORSTER gave the figures as:—British Army officers, 80; British Army N.C.O.'s and men, 178; Native Army officers, 139. The number of Indian N.C.O.'s and men was not available.

The Greek Demobilisation.

Lord ROBERT CECIL informed Sir E. Cornwall that the demobilisation of the Greek Army was proceeding satisfactorily. He had no information as to when it would be completed.

British Prisoners in Persia.

Colonel YATE asked whether the Under-Secretary of State for Foreign Affairs had any official information showing the release of the staff of the Shiraz branch of the Imperial Bank of Persia who had been held prisoners for the last nine months by German emissaries in Persia, and if he could give any information regarding the British Consul and other British Government officials at Shiraz who had been held prisoners with them.

Lord R. CECIL: I am happy to say that not only the gentlemen of the Imperial Bank of Persia but all the British subjects detained at Abram—with the unfortunate exception of Colonel O'Connor—have been released and arrived at Bushire on the 10th inst. It is hoped that as soon as the Persian tribesman who is to be released simultaneously with Colonel O'Connor arrives from Bombay, this officer may be set free.

Our Forces in Irak and Aden. Aug. 21.

Colonel YATE asked the Secretary of State for India whether officers invalided from Mesopotamia had been detained for considerable periods at Bombay before being sent home, owing to sanction having to be obtained from Simla to the decision of the medical board invaliding them home.

Mr. CHAMBERLAIN: It has been the general practice to obtain the permission of the Commander-in-Chief in India before sending the officers home, but it has always been open to the local authorities to act in anticipation on their own responsibility when circumstances demanded it. The permission when sought was given by telegram. Discretionary powers are now being definitely given to local authorities to act without reference in all urgent cases.

Colonel AUBREY HERBERT asked how the vegetables for the troops at Aden were sent there.

Mr. CHAMBERLAIN: They are sent from Bombay, but the Government of India informed me some weeks ago that they were arranging to restart the old commissariat garden at Sheikh Othman.

Sir H. CRAIK asked the Secretary for War whether steps could be taken to relieve the men of the Mesopotamian Force by new drafts, as the climate and other conditions, as well as the insufficiency of supplies, made a prolonged stay in Mesopotamia dangerous to life.

Mr. LLOYD GEORGE: Such measures as are practicable have been and are being taken to relieve the units which have suffered most from climatic and other causes in Mesopotamia.

Consuls in Enemy Countries.

Lord ROBERT CECIL, replying to Sir Edwin Cornwall, said the number of salaried Consular officers who were employed in enemy countries before the war was as follows:—In Austria-Hungary, 5; Germany, 9; Turkey, 23; Bulgaria, 3; total, 40. With the exception of three who had retired, one whose services had been lent to the military authorities, and one who was a prisoner of war, all were employed in various capacities, and continued to receive their salaries or the salaries of other posts to which they had been appointed. Though it was certainly part of the duties of these officials to promote British trade interests after the war, he did not know that it would be true to say that in every case their duties were in every respect specially calculated with that object. The most important matter at the moment was that duties should be calculated to promote success in carrying on the war, and this must be the paramount consideration at present.

Parcels for Kut Prisoners.

Mr. J. F. HOPE, replying on behalf of Lord R. Cecil to Mr. MacCallum Scott, said: A considerable number of postcards and letters from prisoners of war from the Kut Force, interned at Angora and other places in Asia Minor, requesting especially that money and clothing may be sent to them, have been communicated to us. The United States Embassy at Constantinople are sending clothing, money, and comforts to the prisoners as soon as their arrival at a camp is known. To supplement the supplies available at Constantinople, we have asked the Porte to allow a neutral vessel with all kinds of supplies required to put into a port on the coast of Asia Minor, the unloading of the ship and distribution of the supplies to be in the hands of neutrals. We have not yet had a reply to our communication, and are pressing for one. Parcels under 11 lbs. in weight should be sent care of Ottoman Red Crescent Society, Constantinople, and General Post Office, London. Parcels over that weight can be sent through the International Committee of the Red Cross, Geneva, or the American Express Company. It is important that the rank and regiment of the prisoner and the place of internment should be clearly stated. When the place of internment is doubtful, parcels may be sent through the General Post Office or American Express Company (according to their weight), and the United States Embassy at Constantinople. It is inadvisable to send parcels to prisoners of war of whom no news has been received.

Rations in Mesopotamia. Aug. 22.

Mr. LLOYD GEORGE informed Mr. RUPERT GWYNNE that there were certain things which the troops in Mesopotamia were rather short of, but there was no shortage of important rations.

The Armenian Atrocities. Aug. 23,

Answering Mr. BIRD, Lord R. CECIL said: A valuable report on the Turkish atrocities in Armenia, consisting chiefly of a collection of documentary evidence, has been prepared at the suggestion of Lord Bryce by Mr. Arnold Toynbee, and will be laid before Parliament in due course.

The Position in the Balkans.

Replying to Sir H. DALZIEL, who asked for information about the position in the Balkans, Lord R. CECIL said that which was most interesting about it at present were the military operations which were taking place at Salonika, and obviously it would be improper for him to say anything about them. As to our attitude towards the Greek Government, the House were aware that a little time ago it became necessary and proper for the British Government, in concert with our Allies, to put certain demands before the Greek Government. Those demands were accepted, and our relations with the new Greek Government presided over by M. Zaimis were, as far as he knew, thoroughly satisfactory.

THE WORLD-FAMOUS
YAGHOURT
may be obtained, in 6d. and 1s. jars, of
MANOLI-CORBETTI,

THE PRESS ON THE NEAR EAST.

Greece's Fall—and Opportunity.

In a leading article, "For Greece, a Tear," the *Morning Post* (August 23), referring to the over-running of Greek territory by the Bulgarians, says:—

The Hellenic spirit must be strangely dulled if it fails to perceive in the indignities now inflicted on Greece the direct consequences of the fatal policy of abdication both of duties and ambitions which was entered upon when M. Venizelos was dismissed from office. Since then Greece has endured ignominy after ignominy, reaching a climax when Greek territory and Greek fortresses were surrendered to the Bulgarians, not only without a blow but by active connivance. The Greeks are a proud people—the inheritors of imperishable traditions. What must be felt by the descendants of the men who held the pass at Thermopylæ when they see Fort Rupel tamely evacuated and whole provinces invaded by an inveterate and hated foe without even a protest? Yet to such a pitch have faction and partisan fury risen in modern Hellas that the men who contrived this abasement for Greece are openly glorying in it, because, while it humiliates Greece as a Sovereign State, it offers the hope of discrediting a political opponent.

As to the coming elections, the writer puts the issue clearly before his readers. It is to be hoped that it will be put as clearly before the Greek electors.

German machinations and partisan fury are capable of distorting the issue at the coming elections in many subtle ways. But there is only one true issue—that between friendship for France and England and friendship for Germany and Bulgaria. And there is only one way of deciding that issue unmistakably—by returning M. Venizelos to power as the First Minister of the King of the Hellenes. It does not greatly matter to the Allies in which way the Greek people decide, but it matters very much to Greece, and, therefore, a word of counsel betimes may not be amiss.

M. Venizelos and His Opponents.

Mr. Crawfurd Price writes from Athens (July 25), and the *Pall Mall Gazette* publishes (August 17), an article, "The Greek Elections," from which we quote the following passages:—

The elements which have coalesced to oppose the Liberal party in what promises to be the final combat between the forces of progress and reaction will resort to such subterfuge, and will so exploit the individual weaknesses of the electorate and flood the land with misrepresentation, that our friends will be obliged to put forth a supreme effort if the people are to vote for civil liberty, national prosperity, and the aggrandisement of Greece.

Contrasting M. Venizelos with his opponents, those "discredited politicians of pre-Venizelist days," Mr. Price writes:—

There is little need to laud the personality of Eleutherios Venizelos. The fashion in which his genius purified Greek politics, relegated the army to its proper sphere as a national, non-party instrument, and contributed to the doubling of the kingdom, is deeply graven in the minds of all students of contemporary history. He is pro-Entente because of his unlimited faith in the ultimate triumph of the Allies, because he admires the principles for which they are battling, and because he believes that the friendship of Britain and France is the manna upon which Greece will grow and wax strong.

An able administrator, a silver-tongued orator, and endowed with the gift of personal magnetism in a remarkable degree, he stands for most of the ideals which are dear to the heart of the Entente peoples.

But the anti-Venizelists have worked hard, and have achieved a certain amount of success. The soldiers, for instance,

have been inspired with an unwholesome dread of war, which, combined with nearly a year of pernicious inactivity with the colours, has served to demoralise them and rob them of that fine and aggressive spirit which led them to victory against Turks and Bulgars. Indeed, when M. Venizelos returns to power one of the greatest difficulties confronting him will be the necessity of restoring the broken morale of the Hellenic army.

And Mr. Price himself has witnessed some of these deplorable demonstrations by reservists which our own Athens correspondent has described:—

The writer travelled with a trainload of home-going reservists on June 29. The departure from Athens was the signal for loud cries of "Blackball Venizelos!" and not only were these demonstrations repeated at every station and whenever a group of wayfarers was passed, but a like inscription was chalked on the carriages themselves. Between now and September sounder judgment may manifest itself as the influence of the barracks wears off, but the effect of the political education of the past nine months will undoubtedly remain in more or less degree.

Armenia: Germany's Guilt—

In a leading article, "Armenia and the War," the *Daily Chronicle* (August 21) pleads eloquently for help for the war-stricken Armenians. "They had," says the writer, "no part or lot in the causes that precipitated this world-war; but innocence did not save them, and they have suffered proportionately from the gigantic conflagration more than any other nation. It was not war that the Turks waged in Armenia; it was wholesale massacre of an unoffending and unarmed people." And he adds his voice to the rising chorus of indignation at Germany's share in the crime:—

A sinister feature of this appalling massacre of Armenians was the quiescence if not the acquiescence of Germany. Had she so minded, Germany could have prevented the massacres or stopped them after they had begun. Her influence in Constantinople was supreme. Yet while Armenian men, women, and children were being done to death by the hundred thousand, Germany did not raise a finger to save them, or utter one word of protest. If not participant in she was accessory to this unparalleled massacre. She acted according to her manner and her traditions. The ruthless soldiers and Machiavellian statesmen who built up modern Germany never disguised their contempt for humane and merciful considerations. Bismarck's famous dictum that the Balkan question was not worth the bones of a single Pomeranian grenadier, was simply an expression of Prussian callousness on the subject of Turkish atrocities. (By the way, how strangely that dictum reads in the light of the world-war which Germany deliberately planned on a Balkan issue.) The present Kaiser has proved himself an apt disciple of Bismarck in callousness to the spectacle of human suffering and condonation of crime. . . . Modern Germany, whose crimes in this war have staggered humanity, will have much to answer for before the tribunal of history. Not the least formidable count in the indictment will be her connivance in the wholesale slaughter of an unarmed people.

—And a German Protest.

In this connection the following paragraph taken from an article ("Germany's Boundless Brutality") contributed to the *Daily Graphic* (August 21) by Mr. Julian Grande is of much interest. He has been referring to protests in the *Basler Nachrichtung* against German brutality, and he adds:—

It is now the turn of the British reader to rub his eyes in amazement, for the second protest in the *Basler Nachrichten* against German brutality is from German missionary teachers in the German school at Aleppo. It is to the German Foreign Office that these missionary teachers protest against the atrocious cruelties perpetrated upon the women and children of murdered Armenians, expelled from their homes and brought to Aleppo. It is impossible, they say, to carry on their work of teaching children moral precepts and German Kultur while under the very walls of their mission school, within sight of their pupils, such heartrending scenes of distress are taking place, by authority of Germany's Ally. The German Foreign Office, to their knowledge, has already been informed in detail of the conditions in Aleppo, and of the treatment of Armenian women and children—treatment which is too horrible to describe. Yet nothing is done. Germany's good name in the East runs the utmost risk of being hopelessly tarnished for all time. "How can we teachers," says the protest, "read about Little Snow White and the Seven Dwarfs with our Armenian children? How are we to decline and conjugate if in the courtyards opposite and near our school buildings death is reaping his harvest among their starving fellow-Armenians; girls, boys, and women, almost naked, lying on the ground, some of them breathing their last between those who have already succumbed and the coffins laid ready for the dying. Out of 2,000 to 3,000 healthy peasant women dragged down here from Upper Armenia only forty or fifty remain, and they are reduced to skeletons. More than a hundred corpses of those who have died of starvation are daily carried out of Aleppo."

What will the German Foreign Office have to say on the subject?

Freebooters in Persia.

The *Times* last Saturday devoted a leading article to the subject "Turkish Raids in Persia." After analysing the operations in Armenia—which he describes as "somewhat odd"—and on its borders, the writer goes on to say that "the Turks planned and actually began a fresh and audacious invasion of Persia." And having described these operations, he concludes by reminding his readers of an important fact:—

It should be understood that these singular proceedings, by which the Turk elects to invade Persia while his own territories are being overrun, are rendered possible only by the swarms of tribal freebooters now pervading Persian soil. The operations of the Turks are not aimless, but are partly the outcome of the little-known Pan-Turanian movement.

The Reward of Treachery.

The following extract from a leading article in Wednesday's *Times* puts well thoughts that must be present in the minds of many Bulgarians to-day. Their reflections can, indeed, hardly be enviable, but it is too late to pity them. They have made their choice, and they must abide by it.

With what thoughts King Ferdinand himself and King Ferdinand's subjects may look forward to the situation which is

Digitized by Google

now beginning to develop we can only surmise. Stringent precautions are taken to prevent information as to Bulgarian opinion from reaching the outside world. But the Bulgarians know that they owe their liberation, their early aggrandisement, and, indeed, their national existence, to Russia. Now they find themselves arrayed against her. The dynastic policy of their German ruler has brought them into conflict with the historic champion of their race and of their creed. That is a false position, and it is not surprising to hear already of desertions from their ranks. It is one thing to wage war against the hated Greeks. It is another to face the soldiers of the "Great White Tsar." He has sent them to redress the wrongs of Serbia and to exact reparation from the false brethren of Slav blood, who struck them in the back as they were fighting for life against the hereditary enemies of Slavdom.

The Allies and Bulgaria.

We give below a couple of comments, taken from evening papers of Tuesday's date, upon Bulgaria's action in Macedonia. They are typical of many expressions of opinion, and show that the move was taken perfectly calmly in this country even before the news of the arrival of Russian and Italian troops was published.

The manner in which the Bulgarians are overrunning Grecian Macedonia will not affect the plans of the Allies, but it is not surprising that it should cause great perturbation in Greece. If the Allies win the war, well and good, the Bulgarians must surrender the occupied territory with much else, but if the Greeks are not yet convinced of the victory of the Allies they may also have very strong doubts whether they will get back territory which would be so valuable to their neighbour. In the actual fighting affairs are not going well for the Bulgarians. Their fresh encounters with the Serbians, French, and English have resulted in defeats, heavy considering the forces engaged, while their one success in advancing to Florina merely gives them a position in a plain dominated by heights in possession of the Allies.—*Westminster Gazette.*

It all looks to us as though the Bulgarians were becoming exceedingly nervous on the progress of the war from their own particular point of view, and wanted to have something to bargain with when they are compelled to sue for a separate peace. It is just the kind of policy which would commend itself to Ferdinand, but we do not think it will be found to pay. The Allies have very sternly made up their minds about Bulgaria and Bulgarian treachery, and are not at all likely to change them.—*Globe.*

Hungary's Defenders.

The *Morning Post* of August 18 contained a most interesting article, entitled "Defence of Hungary," from its Budapest correspondent. How such a dispatch ever passed the Hungarian censor it is hard to imagine, for the writer does not mince his words. Amongst other things, he writes:—

The chief command in the lower sector of the front—that is, from the Eastern Galician front to the Roumanian frontier—is held by the heir to the throne, the Archduke Karl Franz Josef, the "hero who is defending the Hungarian plains from invasion," a description which has been applied, no doubt, with a deeper purpose than would readily occur to one. It sounds well to state that "the future King of Hungary is defending the wooded Carpathians against the Slav invasion," and the *communiqués* never omit a reference to this historic rôle of the Archduke, who, however, failed to conduct with success the offensive against the Italians in the Trentino. Despite the fact that he has proved to be one of the greatest misfortunes of the Austrian army, and the greatest imbecile among the Austrian generals, the defence of the Hungarian frontiers has been entrusted to him, a task which, considering the fury and determination of the Russian attacks, calls for a general at least of the type of Koevess or Hindenburg. The Crown Prince had a special desire to show his love for Hungary, and he therefore secured for himself the chief command on her frontiers. In this position he is ruining Hungary, but as his appointment was due to a Royal wish Hungary will have to put up with invasion rather than to express dissatisfaction with the Royal desire. The Archduke is opposed in this most difficult terrain to General Letchitsky, one of the ablest generals the Russians ever had; yet the Crown Prince is a very young man with little or no experience, one of whose convictions is that "one must attack, even with inferior forces, in order to gain victories," and that an offensive is the only move when in a tight corner. This may be regarded as sound strategy or policy if it succeeds, and as he adopted it when, on July 26, he took over the command of the forces in this sector, and actually gained some ground at three different points, the official and semi-official reports and bulletins praise him without stint. Anxiety, however, is felt with reference to the ultimate issue.

The anxiety is certainly comprehensible. As to the Turkish troops who have been summoned to help in the defence of Hungary, the correspondent reports:—

It is said that so far only five divisions have arrived from Turkey, most of them units who fought at Gallipoli. The Turkish soldiers in their conversations with journalists always talk of the Peninsula and of the fine fighting and fairness of the English and Colonial troops to whom they were opposed there. At least twenty articles containing accounts of interviews with Turkish officers have appeared in the Hungarian Press, and in every case the story was the same—that the English were fine and noble enemies. At all these interviews English was spoken, for the Turkish officers, at least the majority of them, prefer to speak English rather than German, a language very few of them understand.

"A Prussianised Eastern Question."

The current *English Review* contains the first instalment of an article by "Custos," in which the writer proposes to give a précis of ideas formulated by M. André Chéradame in an important series of articles in *La Victoire*. From this instalment ("The Pan-German Scheme") we give the following extracts:—

The Eastern Question is to-day no longer the old classic Eastern Question, but it is a question of a Prussianised Eastern Question; the Austrian Question is no longer the question of the Austria of bygone days, when it merely meant the old-time struggle of the Habsburgs with the several nationalities under their rule. What the Allies have to consider nowadays is the Berlin attempt to Prussianise Austria-Hungary. In a word, William II., after having, by means of the Pan-Germanic propaganda, developed in the minds of his people an appetite for conquest and plunder, declared war, obsessed with the idea that it would have as a result the foundation of the hegemony of 77 million Germans over 127 million non-Germans in Europe, and in Turkey. The Prussophil *camarilla* of Vienna, powerful, but small in numbers, a group of Magyar aristocrats led by the noxious Count Tisza and a dozen pseudo-Young Turks bought with Berlin gold, have been the Kaiser's accomplices. It is but a handful of men which has dragged into the war the 50 million Austro-Hungarians, and the 20 million Ottomans, the great majority of whom did not thirst for this bloody conflict, which the Germans are waging under conditions which assimilate them with "burglar-murderers," in other terms, with the criminal classes. They have placed themselves beyond the pale of humanity, while those who, outside of Germany, help them to enslave Europe, are purely and simply accomplices, and should be treated as such.

An important fact to be taken into consideration is that of all the countries now swallowed up by Germany, the most important in point of fact is Austria-Hungary, which is completely under the German thumb, and Germany's absolute control over the Dual Monarchy is of greater value to her than that she exercises on the Western and Eastern fronts. Hence it is part of the Pan-German plan, in so far as it affects Austria-Hungary, not to overlook the Balkans, and Turkey constitutes to an overwhelming extent the principal side of the Pan-Germanic plan. The Allies should give this indisputable fact their most earnest consideration.

The article will repay careful reading.

The Balkans and the Public.

The following passage is taken from a review of "The Balkans" which appears in *History* (the journal of the Historical Association), and is written by Professor Pollard:—

In spite of the Balkan Wars of 1912-13 there are few areas of the world war of to-day in which the average citizen is more hopelessly at sea than the south-eastern peninsula of Europe, which was once Turkey in Europe, and is now so divided that its States have sought a common denominator in a range of mountains; and the popular and vulgar weekly, which in the last week of July, 1914, filled its placards with the imprecation "to hell with Servia," appealed to a public that was all the more sympathetic because it had but a hazy idea where or what Serbia was, and had no intention of going there. Even intelligent students of history might easily go adrift in the turbulent cross-currents of Balkan politics, and the most fervent advocate of democratic control over foreign policy might shudder on the brink of a referendum on Balkan issues and Great Britain's duty therein.

Professor Pollard adds that "fortunately, or unfortunately, we shall be spared that folly." Very few people, one thinks, will question the kindness of the Fates in this respect.

Articles to Note.

"The Truth About the Turk" (a letter from Mr. Marmaduke Pickthall); and "A Poem by Firdausi's Nephew," by H. Beveridge, in the *Asiatic Review* (August).

"La vigilia della Romania," by Francesco Evoli, in *La Vita Italiana* (August 15).

According to a Turkish *communiqué*, a cruiser and three monitors for three hours unsuccessfully bombarded Phokia, in the Gulf of Smyrna, on Monday.

Turkish reports state that on the Tigris front five British aeroplanes flew over their positions on the night of August 15 and dropped bombs without success. Next morning a Turkish aeroplane successfully bombed the British camp, bridges, and quay on the Tigris.

M. Diamantopoulos, the new Attaché to the Greek Legation at Berlin, is reported to have been arrested by the Italian authorities, and a diplomatic portfolio which was in his charge is said to have been seized. The Greek Government has instructed the Greek Minister at Rome to take up the matter with the Italian Government

NOTES AND NEWS.

Devonshire Square,
London, E.C.

I understand there is little doubt but that the deposit receipts issued under the scheme for the loan to the Treasury, for the purpose of regulating exchange, of Egyptian 3 per cent. guaranteed loan bonds will be in bearer form. There should, therefore, be no fear that "holders will be unable to make a corresponding use of them."

***

Since the war began there has been a marked tendency to hurl charges indiscriminately against those in power; and I have always held the view that we should win the war before we begin to hunt for scapegoats. Generally, Government has been the victim, but we have had a variant this week. An official committee appointed to check the extravagancies of the great spending departments saw fit to make some serious reflections against the good faith of a great firm of contractors in respect of hut-building. When it became known, through the frankness of Sir John Jackson, that his was the firm involved in the charges, there was much astonishment. The inevitable has happened, of course, for Sir John, whose probity and patriotism are above suspicion, has been able to vindicate his colleagues, and himself, with the greatest ease. His case was a crushing reply to his detractors, and I am glad of the opportunity to say so.

***

A reader who has been interested by the special articles and notes in THE NEAR EAST, in which reference has been made to the facts of the German past and to German hopes for the future, invites my attention to an article by Mr. Austin Harrison, editor of the *English Review*, in a London daily paper. In this article Mr. Harrison preaches a very sound gospel. The pan-Germanic scheme is economic rather than material, Mr. Harrison believes. It aims at what the Germans call the "economic hegemony" of the East. They are aiming at this economic power, not land, in Turkey, and so long as they hold the railway through Serbia to Constantinople "not only is the goal of the pan-Germanism attained, but the military conditions are established which ensure the faithful attachment to Berlin of the Austrian-Balkan belligerent group." I quote this view now because since it was published the long-expected development has occured in the Balkans, and events which seem to indicate that an offensive movement by the Allies is imminent have transpired.

***

It is desirable to emphasise none the less that it is imperative to expel the Hun and all his friends from this quarter, and that the sooner the expulsion is effected the better. I do not suggest that we should undertake ill-considered or unduly hasty movements, but I do suggest that the liberation of Serbia should not be subordinated to other, and less important, interests. As Mr. Harrison points out, "Turkey to Germany is a 'healthy selfish' interest. Cotton, wool, naphtha—these are the things that Germany wants, and the fertility of Mesopotamia." It ought not to be necessary to point out that the upsetting of the German designs can never be achieved until Serbia is relieved of the intolerable presence of her enemies. Let there be no mistake about that. If a sectional peace were to be declared next week, and Turkey, or Bulgaria, or Austria capitulated, the need to keep them out of Serbia would be as important as ever.

***

Peace or no peace, these three peoples will always be the mental and physical vassals and friends of Germany. They will always be a menace to Serbia, and that means menace to British interests in the East. We may as well be frank about it all. Besides honour and glory we want to get substantial benefits out of the victory we are wresting from the Huns and their friends, and we should be a foolish and quixotic people if the reverse were the case. I have little sympathy with those who believe that German military power could ever reach India; but I know what the German emissaries of commerce have done in that and adjoining countries well enough to realise that if they are permitted to continue their domination in the Balkans they will lose no time in attempting to re-assert it southwards and eastwards. We must prevent that at all costs, and we can do so only by making it impossible for them to maintain their influence in the Balkans. This is one of the reasons why Serbia must be liberated quickly and completely, and, when the liberation is accomplished, placed upon her feet, politically and economically.

***

An Amsterdam message dated August 22 states that the Bulgarian Government has met the demand that debts due by Bulgarian subjects to various credit houses in Great Britain, and incurred before the intervention of Bulgaria in the war, must be settled by August 31, by the simple method of repudiating its obligations. It was stated that, in default of a settlement on or before the date mentioned, Bulgarian shares and securities held in England would be sold by public auction. We are now informed that "the Bulgarian Government will not recognise such shares and will not meet the obligations on such shares or coupons. Bulgaria has instructed credit houses in Germany, Austria-Hungary, and Turkey to communicate the numbers and series of Bulgarian shares and coupons held in England."

***

So far as we are concerned in England, it does not matter much if Bulgaria is honest or otherwise. Comparatively speaking, the stocks and securities held in this country do not represent a large sum. There is a certain amount likely, in the circumstances, to become temporarily involved, but the bulk of the loss would fall upon our French friends if the filibusters of Sofia were to apply their repudiation to obligations held across the Channel. For the rest, I dare say that, later, we can find a way of making even Bulgarian traitors pay their debts.

***

I have read with much interest the preliminary reports of the Industrial Exhibition organised by the Ministry of Education and opened at Alexandria on August 5. It is early as yet to speak of the result, but judging from the excellent collection of exhibits, which appear to be representative of all the arts and industries of the country, that should not cause very much anxiety. Such affairs, however, cannot always fairly be judged by immediate financial results. Exhibitions should always have an educative rather than purely monetary ideals, and if the Minister of Education is able to show that he has awakened interest in industries, old and new, he will be able to claim that the enterprise has been successful.

***

The correspondent of THE NEAR EAST in Cyprus writes that the date fixed for the picking of locust beans in the districts of Nicosia and Kyrenia was August 14. "Days are fixed by the Courts of Administration in every district, before which it is unlawful to gather any. A law to this effect was passed after the British occupation was accomplished, in order to protect the owners of trees, which are widely scattered over large areas. The depredations of thieves at night, as the crops ripened, used to be so serious that this protection was found necessary, and was urgently pressed for by cultivators. The pods have been badly affected this year in some parts by the waves of hot winds." Regarding this latter point, it is interesting to learn that cultivators are now required to destroy affected pods and ends. A brief outline of the regulation will be found elsewhere in this issue.

***

It is a matter for regret, I think, that young Egyptians should look for a future almost exclusively in Government offices, apparently neglecting the land and industry, and all that these mean in a land in which pioneers have opportunities for profit and advancement. Recently, I am informed, the Ministry of Finance advertised a vacancy at the moderate salary of £E6 a month. "The applicants had to be well educated, for they had to have obtained the Egyptian Baccalaureat. They had also to pay P.T. 50 for examination fees, which sum would not be reimbursed to the successful candidate. All candidates had to be over eighteen years of age. On July 27 no fewer than 170 candidates presented themselves for the examination, which consisted of Arabic, French, and mathematics."

***

It is not for me to suggest that a higher salary ought to have been offered to men possessing such qualifications—the Ministry of Finance must know the value, or otherwise, of cheap clerical labour. What I should like to emphasise is that there is no indignity in manual labour, on the land or in the workshop, and the sooner this truth is instilled into the minds and hearts of young Egypt the better it will be for country and people.

***

The papers devoted to the interests of the drapery and outfitting trades in this country are urging their readers to utilise the opportunities presented for trade in Egypt through the closing down of enemy firms. "Who wants an Egyptian branch?" asks one of the journals, and it then proceeds to describe in pretty glowing terms the business opportunities which await the enterprising tradesman out yonder. It is curious that Egypt should not have attracted new British firms, because to my knowledge so long ago as May, 1915, a European firm from Bombay opened out at Busreh. This was Messrs. Leach and Weborny, and from all I hear they do not regret their enterprise.

ROLL OF HONOUR.

British Subjects from Turkey in H.M.'s Forces.

The Editor of THE NEAR EAST *would be obliged if relatives of former British residents in the Near East who have joined H.M.'s forces would communicate additional names or other particulars for insertion in our Roll of Honour. Biographical details concerning those who have fallen in their country's service would also be appreciated.*

ASHE, Lance-Corp. R., R.E.

ATKINSON, Bombardier G. M., 266th Battery, 85th Brigade, R.F.A., Colchester.

ATKINSON, Gunner T., "A" Co., Royal Field Artillery.

BAKER, Captain A. Warden, Assistant Military Attaché, Rome, Italy.

BARKER, Lieut. Eric, Interpreter, Shropshire Light Infantry, British Central European Expeditionary Force.

BARKER, 2nd Lieut. C., Interpreter, British Central European Expeditionary Force.

BARRON, Captain J. B., Worcester Regiment, France.

BATH, Nurse, Sister, Army Hospital, Malta.

BELL, Sister M. J., Edinburgh War Hospital, Bangour, West Lothian.

BINNING, Sergt. G. A., South Wales Borderers B.E.F., France.

BINNS, Captain C. E., R.N., Assistant Military Attaché, Berne, Switzerland.

BINNS, Lieut. Harold H., Royal Naval Division Headquarters, British Mediterranean Expeditionary Force.

BINNS, Miss Hilda B., V.A.D., Q.A.I.M.N.S.R., H.M.H.S "Aquitania"

BINNS, Lieut. W. Hylton, care of The British Consul, Brindisi.

BLUNT, Pte. R. E. (5495), A. Coy., No. 2 Platoon, 2/4th Batt., Northamptonshire Regt., Newmarket.

BLYTH, Captain R. C. P., 1st Gloucestershire Regiment, attd. Egyptian Army. (*Killed in Action.*)

BOLTON, Alfred, Naval Brigade.

BOND, Private H. C., 7th (Reserve) City of London Regt.

BOND, Lieut. Gladwyn J. T., 1/8 West Riding Brigade, R.F.A., Ripon.

BOND, 2nd Lieut. Sidney, Royal Horse Guards, Interpreter, Salonica.

BOND, Corporal R. (41,857), Headquarters Staff, "D" Battery, 79th Brigade, R.F.A., 17th Division, B.E.F., France.

BORRELL, Rifleman Alfred, 7th Service Batt. Rifle Brigade.

BOWMAN, Corporal Henry J. (2424), R.A.M.C., British Mediterranean Expeditionary Force.

BROOKS, Corporal George, 41356, D. Batt., 78th Brig., R.F.A., 17th Div., B.E.F. France (in hospital with fever).

BURN, E. R., 7th Service Batt. Rifle Brigade.

BURNS, Rifleman Edward, 7th Service Batt. Rifle Brigade. (*Accidentally Killed.*)

CASTELL, Rifleman Henry, 7th Service Batt. Rifle Brigade.

CAUCHI, Act. Corporal Henry (6113), 19th Service Battalion, C. Company, Royal Fusiliers, Epsom, Surrey.

CHARNAUD, Lieut. A., R.N.V.R., Acting Interpreter.

CHARNAUD, 2nd Lieut. Fred, Intelligence and Interpreter.

CHARNAUD, Temporary Lieut. Percy, R.N.V.R.

CLEMOW, F. G., M.D., C.M.G., British Red Cross Mission.

CLIFTON, Capt. H., Interpreter, 11th Batt. Durham Light Infantry, 54th Division, Mediterranean Expeditionary Force.

COLES, Dr. D. A., R.A.M.C. (formerly of the English Hospital, Haifa).

COLLEY, Trooper Isaac E., Royal Horse Guards.

CORBETT, Lieut. H. C., M.D., R.A.M.C.

CRAWFORD, Private James, 7th (Reserve) City of London Regiment.

CROWE, Louis B., Red Cross Motor Ambulance, B.E.F., France.

CUMBERBATCH, Lieut A. Noël, 9th East Yorkshire Regiment, Liason Officer, 29th Division, Headquarters, Salonica.

CUMBERBATCH, Captain R. C., 7th Bn., Rifle Brigade, 14th Division, B.E.F., France.

CUMBERBATCH, Lieut. H. D., 6th Bn., The Buffs, 12th Division, B.E.F., France. (*Wounded.*)

CUMING, Sergt. A. C., No. 38,983, Intelligence Corps, 3rd Army Headquarters, B.E.F.

CURSI, Pte. F., 8th Bn., King's Liverpool Regt., B.E.F., France.

DAVIDSON, Bombardier C. T., 266th Battery, 85th Brigade, R.F.A., Colchester.

ELLIOTT, Eric C., 2nd Lieut., Essex Regiment, 11th Battalion.

ELLIOTT, Flight Sub-Lieut. Clifford W., R.N.A.S.

EPPSTEIN, Lieut. W. R., Durham Light Infantry.

FAULKNER, Lieut. M., Admiralty House, Malta.

FREWEN, Rifleman Walter K., London Rifle Brigade.

FROMANT, Private F., Grenadier Guards.

GALLIA, Rifleman M., 7th (S) Batt. Rifle Brigade.

GATER, Private E. A., 3/1st E.A. (Res.) Div., Cyclist Coy., Halton Camp East, Bucks.

GATER, Private A. G., 3/1st E.A. Reserve Divisional Cyclist Corps.

GOODACRE, Miss C., Red Cross, Shoreham.

GORDON, 2nd Lieut. Stephen, Intelligence and Interpreter, B.C.E.E.F.

GOUT, Captain Charles L. Gout, 2/4th K.O.Y.L.I., Lark Hill Camp, Camp No. 10, Salisbury Plain.

GOUT, 2nd Lieut. Evelyn, 7th Service Batt. Rifle Brigade, Intelligence and Interpreter, B.C.E.E.F.

GOUT, Rifleman Richard, 7th Service Batt. Rifle Brigade.

GRAVES, Captain Philip, Intelligence Department, Mediterranean Expeditionary Force.

HADKINSON, Rifleman Vivian H., "A" Co., 7th Batt. Rifle Brigade, Queen's El Ward, Bed 40, Graylingwell War Hospital, Chichester. (*Wounded.*)

HARRIS, Trooper H. L., 1st King Edward's Horse, 48th South Midland Division, B.E.F., France.

HIGGS, Private J., 6th Dragoon Guards.

HOLMES, 2nd Lieut. Gerald H., 2/5th Batt. Leicestershire Regiment.

HOLTON, Corporal Alfred, Royal Naval Division, Divisional Engineers.

HOLTON, Trooper John, B. Squadron, Essex Yeomanry.

IRELAND, 2nd Lieut. D. J., 15th County of London Regiment, Intelligence and Interpreter, B.C.E.E.T.

JACKSON, Cadet E. V., 28th Batt. Royal Fusiliers, King's Park Schools, Edinburgh, N.B.

KERR, Miss E., Q.A.I.M.N.S.R., H.M. Hospital Ship Brighton, British Expeditionary Force, France.

KEYSER, Captain A. G., 8th Batt. King's Own Yorkshire Light Infantry.

KEYSER, Lieut. R. N., 10th Batt. East Lancashire Regiment.

KEYSER, 2nd Lieut. Henry, 2/10th Batt. Middlesex Regiment.

KEYSER, Lieut. J. C., 2/9th Batt. (D.C.O.) Middlesex Regiment, Intelligence and Interpreter, B.C.E.E.T.

LA FONTAINE, 2nd Lieut. Fred, 7th Service Batt. Rifle Brigade, Interpreter, British Central European Expeditionary Force.

LA FONTAINE, Captain S. Hubert, Intelligence Department, British East Africa Protectorate.

LA FONTAINE, 2nd Lieut. Hugh, 2/7th City of London Regiment, Acting Interpreter, British Central European Expeditionary Force.

LA FONTAINE, Lieut. J. S., R.N.V.R., Hawke Battalion. (*Wounded*), Intelligence and Interpreter, B.C.E.E.T.

LA FONTAINE, 2nd Lieut. E. L., Intelligence and Interpreter, B.C.E.E.T.

LANDER, 2nd Lieut. Arthur.

LE BAILLY, Lieutenant R. F., R.N.V.R., Recruiting Officer for Royal Naval Air Service, Brook Green Road, Hammersmith.

LORIMER, Private D., Army Service Corps, Aldershot.

LYSTER, Lieut. Henry Newbolt, Brigade Intelligence Officer, 81st Infantry Brigade, British Mediterranean Expeditionary Force, Salonika.

LYSTER, Pte. Frederick John, 6129, 5th Co., Inns of Court O.T.C., Berkhamsted, Herts.

MACKENZIE, 1st Lieut. W., Egyptian Labour Corps.

MACKINNON, Dr. John M., Captain, R.A.M.C., 3rd King's African Rifles, Mombasa, British East Africa.

MACKINNON, Dr. Frank I., Captain, R.A.M.C., c/o Dr. Thomson, 14, Coates Crescent, Edinburgh, N.B.

MACKINNON, Lieut. Patrick, 12th Field Co., Royal Engineers, 6th Division, B.E.F.

MACKINNON, Lieut. Eric, 13th Argyll and Sutherland Highlanders.

MACKRAY, E. D., Dardanelles Expeditionary Force

MCLOCHLAN, 2nd Lieut. B., 1st Canadian L.I., Intelligence and Interpreter, Egypt.

MCLOCHLAN, 2nd Lieut. G., 1st Canadian L.I., Intelligence and Interpreter, B.C.E.E.T.

METCALFE, Sister E. J., Queen Alexandra's Imperial Military Nursing Service Reserve.

MICHEU, Bombardier C. G., Royal Field Artillery.

MOORE, Miss K. M., Royal Red Cross, Serbia.

MORRISON, Lieut. J., 4th Seaforth Highlanders, B.E.F., France.

MORTON, Private Stanley, 2nd Sportsman's Battalion.

MOSS, 2nd Lieut., Public Schools Battalion.

MOUNTAIN, 2nd Lieut. Harold G., Royal Engineers.

MUMFORD, P. F., Army Service Corps, R.E., Baldock.

MUNRO, 2nd Lieut. J. G., 4th Scottish Rifles, Fort Matilda, Greenock.

NEWELL, Pte. W. A., Royal Marines, Chatham. (*Wounded at Dardanelles.*)

NOWILL, 2nd Lieut. Sidney, 2/17th City of London Regiment, Acting Interpreter, British Central European Expeditionary Force.

PARKER, Trooper G., Royal Horse Guards.

PATERSON, Captain Alexander, R.A.M.C., 1st Scottish General Hospital, Aberdeen, N.B.

PEACOCK, 2nd Lieut. Frank, 4/4th Batt. London Regiment, Royal Fusiliers.

PEARS, Major G. B., Military Cross, R.E. (*wounded*), now temporarily Chief Instructor (G.S.O.), Royal Military Academy, Woolwich.

PENGELLEY, Sapper Walter, R.E.

PODMORE, Lieut. Arthur, Military Cross, R.E.

POTTER, Very Rev. Archdeacon, Hon. Chaplain Volunteer Training Corps, Godalming Company. (Archdeacon in Cyprus and Syria.)

POYNTER, Lieut. Hugh E., No. 2 Base Supply Depot, Portishead, Somerset.

RAMSAY, Corporal F. R. F., 14th Service Batt. Argyll and Sutherland Highlanders, B.E.F., France.

REES, Sub-Lieutenant J. Langdon, R.N.V.R.

REES, Trooper R. (1709), Squadron D (in Egypt), Herts Yeomanry, c.o. G.P.O., Southampton.

REES, Sub-Lieutenant T. B. F., R.N.V.R.

RICHARDS, Miss, Dispenser, Edinburgh War Hospital, Bangour.

RICH, Rifleman Cecil, 7th Service Batt. Rifle Brigade. (*Died from Wounds.*)

ROBINSON, Sergeant J. E., Duke of Wellington's (West Riding) Regiment (formerly of the C.M.S. College, Jerusalem. (*Killed in action.*)

ROBSON, Driver F. B., 2/1st E.A. (Essex), R.G.A., Heavy Battery.

ROUTH, 2nd Lieut. C., 3rd/8th (D.C.O.) Middlesex Regiment.

ROUTH, 2nd Lieut. R. A. C., Royal Engineers, P.S., Army Base Post Office, Salonica.

SACKVILLE-WEST, 2nd Lieut. Hon. B., R.N.V.R.

SAMSON, Seaman George McKenzie, V.C., R.N.R. (*Seriously Wounded.*)

SEAGER, Driver B. W. (7739), H.A.C.'s H.Q., Armoury House, Finsbury, E.C.

SEAGER, Lieut. J. A., 16th Middlesex Regiment, France.

SEAGER, Lieut. John Owen, B. Co., Public Schools Batt., 16th Middlesex Regt. (*Wounded.*)

SELLAR, Lieut. Fred. B., Interpreter, Central European Expeditionary Force.

SEMPLE, Rev. S. H., C.F., 7th Royal Scots, 156th Brigade, 52nd Division, Mediterranean Expeditionary Force.

SHAW, 2nd Lieut. T., R.E.

SILLEY, 2nd Lieut. Edward C., Interpreter, Headquarters Staff, British Central European Expeditionary Force.

SILLEY, Rifleman Bernard (4361), 3/12th London Regt. (The Rangers), East Sheen.

SIMMONS, Gunner H. C., 123rd Heavy Battery, R.G.A. (*Died from Wounds.*)

STEPLING, Rev. Canon, R.A.M.C.

STOCK, Capt. H. W., Royal Marines. (Serving abroad.)

STOTT, Sergt. F., 3/5th Sherwood Foresters, Grantham, Derby.

SUMMERS, Lieut. H. C., R.N.V.R., H.M.S. "Europa."

SUNDERLAND, Interpreter (at the front).

THOMPSON, Lieut. Harold H., R.N.V.R.

THOMPSON, John, Interpreter, Mediterranean Expeditionary Force, Alexandria.

THOMPSON, Commander W. A., R.N.V.R., H.M.S. "Egmont."

THWAITES, Captain H., R.A.M.C., France.

TORRANCE, Dr. D., R.A.M.C.

TRENTER, Trooper T., Household Cavalry.

VAN LENNEP, Private E., 2nd Sportsman's Battalion.

VAN MILLINGEN, 2nd Lieut. Charles A. M., 14th Rifle Brigade. (*Wounded.*)

VAN MILLINGEN, 2nd Lieut. R.A.M.C.

VAN MILLINGEN, Aldridge, Intelligence and Interpreter, Mediterranean Expeditionary Force.

VAN MILLINGEN, Private R. G. C., 3rd Batt. London Brigade. (*Wounded.*)

VEDOVA, Rifleman Egbert, 7th Service Batt. Rifle Brigade.

VEDOVA, Rifleman Lionel, 7th Service Batt. Rifle Brigade. (*Killed in Action.*)

VERE, Lieut.-Commander Harry, R.N.

VINICOMBE, 2nd Lieut. Leo, Royal West Kent (*Killed*).

WARREN, Act.-Corporal R. M., 7th (S) Batt. Rifle Brigade. (*Killed in Action.*)

WEALE, 2nd Lieut. W. W. C., 11th Batt., Devonshire Regiment, Interpreter, Salonika. (*Wounded.*)

WELLS, Nurse, Sister, Army Hospital, Malta.

WHEATLEY, Miss K. H., Matron of No. 17, Stationary Hospital, Bombay, India.

WHEELER, Captain P. F. C. d'Erf, 3rd Dorset Regiment, Medit. Exp. Force. (*Wounded.*)

WHEELER, 2nd Lieut. Geoffrey Nowell Popham d'Erf, 7th Dorset Regiment, Portsmouth.

WHITEHOUSE, Canon F. C., 3/6 City of London Rifles, Fovant Camp, Salisbury.

WHITEHOUSE, Mid. L. Edwin, H.M.S. "Triad," Mediterranean.

WHITTALL, Captain G., 1st Oxford and Bucks Light Infantry.

WHITTALL, 2nd Lieut. Arthur, 7th (Res.) City of London Regiment.

WHITTALL, Commander F. E., R.N.

WHITTALL, Lieut.-Commander H. E. C., R.N.

WHITTALL, Lieut. Hugh, Royal Marines. (Serving abroad.)

WHITTALL, Lieut. F. J. G., 17th Batt., Manchester Regiment, British Expeditionary Force.

WHITTALL, 2nd Lieut. H. V., Interpreter, British Central European Expeditionary Force.

WHITTALL, 2nd Lieut. Kenneth, Interpreter, Mediterranean Expeditionary Force.

WHITTALL, 2nd Lieut Roland, Interpreter, Mediterranean Expeditionary Force. (*Died from Wounds.*)

WHITTALL, 2nd Lieut. Vernon, Intelligence and Interpreter, British Central European Exp. Force.

WHITTALL, 2nd Lieut. Walter, 7th Service Batt. Rifle Brigade, Interpreter, British Central European Expeditionary Force. (*Wounded.*)

WHITTALL, 2nd Lieut., 6th Batt. King's Own Royal Lancaster Regiment, India Expeditionary Force. (*Seriously wounded.*)

WHITTALL, Miss E. M., Q.A.I.M.N.S., No. 10, Stationary Hospital, British Expeditionary Force.

WILSON, Dr. Marian E., Scottish Women's Hospital, Abbaye Royaumont, France.

WOODS, Harold, Interpreter, Mediterranean Expeditionary Force, Alexandria.

WRATISLAW, Captain J. C., 8th Leicestershire Regiment, 110 Brigade, 37th Division, B.E.F., France.

BRITISH CONSULS.

We make no apology for returning to the subject of the British Consular Service, because the answers to questions submitted to the representative of the Foreign Office in the House of Commons on Tuesday last make it abundantly clear that the British official mind is beginning to think. It will be recalled that interest was attached to the question by the appointment to an unpaid Consular post at Rotterdam of a gentleman "whose father and uncle left this country shortly after the outbreak of war and have not since returned." Mr. Holzapfel's connections were so well known at Newcastle-on-Tyne that his appointment was viewed not only with apprehension, but with unmeasured indignation. We need not go farther into that particular matter, however, for, in view of the outcry raised, the gentleman has resigned, and, so far as that is concerned, we shall hear no more of him. But, as matters have turned out, the original arrangement was fortunate. When he stated on Tuesday that Mr. Holzapfel's appointment might be considered at an end, the Under-Secretary of State for Foreign Affairs made a notable announcement. He said he had given directions that for the future no person who was of foreign nationality, or who was a naturalised British subject, or whose father was a naturalised British subject, should be appointed to any post, even of an honorary nature, in the Foreign Office, the Diplomatic or Consular Services, until such appointment had been approved by the Foreign Secretary or Under-Secretary.

It would be ungracious not to admit that this is a considerable concession to popular British commercial opinion. It will effect a great improvement in existing conditions, and, provided that in the future no importunate job-seeker is permitted to get the better of the discretion of an official anxious to please somebody else, the rule may work satisfactorily. We confess, however, that we do not like the reservation, not only because it is unnecessary, but also because no Minister of the Crown ought to be willing to sanction the introduction of an alien, or the son of an alien, into either of the confidential services mentioned. For this reason we hope that those Members of the House of Commons who have taken so great an interest in this question will not hesitate to take it a step further, and to press for legislation exacting not only that aliens and their sons shall not be appointed except with the approval of the Foreign Office, but that they shall not be appointed at all. The Government of India have found it necessary, and, with the co-operation of the Imperial Government, possible, to follow that line in regard to the Indian Civil Service, and we know of no reason why the British Consular Service cannot be safeguarded similarly. In the past, when it has been suggested that restrictions should be imposed upon aliens, the effect likely to be produced upon the neutral mind has been taken into consideration. Here, fortunately, that question does not arise, for if neutrals are to be affronted the decision already reached would be sufficient to furnish the cause. And the same argument applies to our friends.

The importance of the question cannot be emphasised too strongly or too frequently. As we pointed out last week, we have already taken more risks than we could afford, and the results have been disastrous. Most of us claim that after the war is over we propose to set out to capture German trade, and to re-capture what Germany has taken from us. If we are to be successful in our mission we shall want all the assistance we can get, and the chances of being obstructed by a "British" Consul with alien sympathies would be a handicap which might well prove fatal to our chances of success. We impugn nobody's good faith when we say that so long as it remains legally possible to appoint an alien the risk of such an appointment exists. It would be better, therefore, to make it impossible, and Parliament would not stand in the way of the necessary legislation being passed. We should like to see a beginning made in the Near East and throughout the Mediterranean, where, if all we hear is true, we have not invariably been well served; and we should like to hear that the all-British principle has been extended to provide for the substitution of British for alien officers.

GERMANY IN ROUMANIA.

Exploitation of Trade and Industry.

Whatever the future contains for Roumania, whatever the ultimate attitude of that country may be towards the Entente Powers, there is nothing in our commercial relations with her in the past of which we may be proud. A correspondent wrote recently:—

> The peaceful penetration by Germany of Roumania, and the work and organisation accomplished, before as well as after the commencement of the war, by the Germans in this country, invites the wonder and even the respect of an impartial observer, if there was not a discrimination in the ways and means adopted by them to achieve their ends. To study Roumanian commerce, industry, and finance is to know the story of German enterprise. German work and German initiative gaining the mastery everywhere and in every walk of life.

We do not forget that the contention is made that the position was made easy for German traders by the introduction in 1860 of a German prince as King; we give full weight to that contention, but we cannot forget that, in countries in which the Huns did not possess that advantage, they have been almost as successful as they have been in this Balkan State. Indeed, it is a matter for national shame that, under the British flag, the Germans have scored some of their most notable triumphs. Until a month or two ago—it may be the same to-day—there were 20,000 Germans in Bucharest alone. Outside the capital there were another 50,000, and if to this considerable army of propagandists is added a quarter of a million of German Jews, there is in the total a formidable host indeed.

Peaceful Penetration.

The study in peaceful penetration is very complete. The Germans have left unutilised no opportunity of pushing German trade interests. They have formed German clubs, Chambers of Commerce have been established, the Consular service has been made as perfect as human agency could make it, and, generally, the greatest use has been made of the initial advantage which the choice of a King by the Roumanian people gave them. Great Britain and France between them have ten Consular representatives in the country; Germany and Austria have twenty-five. But that is not all. Working in close touch with the Consulates are numbers of attachés and agents whose functions are similar to those of the members of an Intelligence Service. As usual, in this respect, the Germans and Austrians are infinitely better served than the British and French, with the inevitable result that enemy interests have scored heavily all along the line. This is what the correspondent to whom we referred just now has to say on that point:—

> The country's commercial, financial, economic, social, educational, hygienic, and many other phrases are thoroughly studied and reported on from time to time. Anyone interested in Roumanian affairs is obliged to refer to the German reports.

It is not surprising to learn that German and Austrian trade advanced by leaps and bounds. The excellence of their intelligence system enabled them to discover whom they might trust and, what is equally important, whom they might not. They studied their markets, and did not make the mistake, which British traders make so frequently, of taking to one market goods more suitable for another. Low-priced goods, specially made for the Oriental trade, were introduced into those quarters in which high-priced stuffs were outside the range of buyers; the pernicious credit system was also introduced, and studied and adapted until it became a fine art; and while French and British traders were wondering where all the business was going, their rivals were quietly sending the orders to their respective fatherlands.

Five-Ninths of the Imports.

The import figures in Roumania for the year 1913 are interesting reading. Out of a total of £9,520,000, the Germans accounted for, approximately, £5,600,000 and the Austrians appropriated a fairly good slice of what was left. To secure this great volume of business, and to be certain that outside hands should not annex any of it, the Germans established their own banks, branches of their great industrial and commercial houses, and built factories; and it is testimony to their indomitable perseverance and capacity that a considerably quantity of the raw material that helps to swell the import returns is manufactured in all-German factories.

It will be said, of course, that the Germans have had facilities; so they have had, but the facilities were worked for, and—let us be frank to ourselves—were thoroughly deserved when they were obtained. As in other parts of the world, so in Roumania the Hun has always worked hard; he does not spend part of his time in watching the hands of the clock accomplish the circle. The stool and the workshop have no terrors for him; the clerk and the artisan put in more hours of work than the Briton would regard as healthy. The apparently ardent desire of the British Labour party to have this question included in the peace settlement, when the time comes, is some evidence on the point.

In paying this tribute to German energy it must not be assumed that the corrupt and, generally, dishonest methods employed by German traders are forgotten. These have been practised in Roumania as assiduously as in other parts of the world, and it would not require a particularly shrewd guess to judge Roumanian opinion on the point. In this respect the French have, perhaps, been the greatest sufferers; but, since, with our own people, they have to share the responsibility for neglecting opportunities in the country in the past, like us they must pay the penalty and, cutting their losses, hope to recover lost ground when the war has ended.

Industrial Exploitation.

We referred just now to the fact that the Germans have established factories in which to work up raw materials which they imported from their own land. They have done more than that, as a matter of fact. The awkward questions put the other day to a Minister in the House of Commons regarding the ownership of certain oilfields in Roumania will be remembered. In that direction the Germans found a very fruitful field for their energy and capital. The history of the German exploitation of the oilfields goes back, approximately, to 1895. The capitalists were supported then in the campaign by the diplomats and, despite many rebuffs, the combination persevered, stooping to the employment of the shadiest devices until they got a considerable footing in the fields. The rest was easy, and in a comparatively short time they had acquired the predominating influence, assisted by their allies and confederates, the Jews.

The shadow of war was in the political sky in those days, about 1900, and it is no secret that Germany had induced Roumania to join her in an alliance. For her petroleum supply Germany was embarrassed. Russia was no friend of hers, the United States were unlikely to assist if Great Britain did become involved, and only Roumania was left. It is difficult to understand what inducement the Kaiser held out to his kinsman; they may have been similar to those offered to his present dupes, Turkey and Bulgaria; in any case, they appeared to have succeeded, and the alliance became a fact. The Americans made a luke-warm attempt to obtain the concessions, but they were no match for German intrigue, and were left standing, as they themselves would say. The war did not take place; but to-day the Germans hold a controlling interest in nearly every considerable well in the country.

The Krupp Hand.

As with oil, so with other important industries. Electrical works, iron foundries, and shipbuilding concerns are, for the most part, controlled by, or in, the Krupp interest. Manufactures of cloth, cement, paper, and nearly every other industry of importance are in German hands.

That is not all, however. When Roumania wanted money she was encouraged to borrow from Germany, with the result that to-day the Huns are creditors to the extent of about one-third of the national debt. It is said that Bucharest pays annually to Berlin in interest on loans something like £2,000,000. It is a curious reflection just now that the bulk of the borrowed money went back to German hands in payment for munitions of war, and, as a Roumanian described the situation to the correspondent, "The payment of these £2,000,000 is an annual tribute paid to Germany."

Roumania's decision regarding the war will mean a good deal to some people.

PRODUCE REPORT.

LONDON, August 24.

Currants.

There has been more activity in the market this past week, the demand being mostly for spot, although the remaining available supplies present a remarkable scarcity of choice fruit. From advices regarding the new crop, shipments will be started early next month, and, if war conditions permit, first arrivals may be expected about the end of the month. The prices asked for new crop fruit, provincial, are 54s. to 55s., duty paid, but so far very little is done on that base.

Sultanas.

The market is comparatively quiet, only small business passing at late rates. There is a noticeable demand for cheap fruit, which, however, is not easily obtainable owing to scarcity.

Figs and Dates.

The former are quiet, with very little doing, while the latter have met with a fair demand for old as well as new crop at late rates.

Seeds.

Linseed is dearer, but with little doing. London-Calcutta, spot, was sold to-day at 77s.; afloat also 77s.; July-Aug., 77s. 6d.; Aug.-Sept., 78s.; and Sept.-Oct., 78s. 6d. Bombay to London: Small grain has been offered, Aug.-Sept., at 78s., and ordinary ditto 79s. Rapeseed has been firm at full prices: Toria to Hull, Aug.-Sept., 68s. to 69s. Cottonseed is quiet, and favouring buyers: Egyptian to London, Sept., £12 15s., and Oct., £12 10s.; Hull, spot, £12; Sept., £12 10s. and £12 7s. 6d., asked; Bombay to Hull, spot, £12; Sept., £12 10s.; and Oct., £12 7s. 6d.

Oils.

Linseed oil is quiet, and easier for forward positions. Spot pipes is quoted £37 5s.; spot barrels, £37 9s.; Aug., £37 10s.; Sept.-Dec., £38 5s.; and Jan.-April, £39 17s. 6d. Rape oil is firm. Refined English, in barrels, spot, is quoted £46 to £48. Cotton oil is rather dull: Crude pipes, spot, £38 15s.; refined pale, pipes, and sweet, barrels, £51 to £52 10s. Olive oil is very scarce and firm: Spot Spanish and Levant, £59 to £60 per ton, ex store.

Oilcakes.

Cotton cakes: Egyptians are all cleared. A steamer parcel now loading is offered at £9 15s., ex-ship, while English makes are offered at £9 17s. 6d. to £10 per ton. Linseed cakes are very quiet, buyers being unwilling to deal at present high prices. Best London and East Indian prices are unaltered.

APPEAL TO OVERSEAS BRITONS.

An appeal, which has been issued to oversea Britons, by the United Workers, London, and endorsed, among others, by Mr. Bonar Law and Lord Cromer, deserves attention.

The appeal declares that upon the issue of the war depends the liberty of our Empire, and proceeds: "The whole German nation is supporting its armies. The utmost frugality is in force, and the nation's resources are being conserved in a remarkable way. To the recent War Loan, which realised 535 millions, there were 5,279,645 subscribers. Germany is not exhausted. Britain, who must buy her food and raw material abroad, and lend her allies more than a million pounds a day, has realised that every single citizen must be called upon for his or her maximum effort.

"We address all of British blood, and we tell them this:—(1) Time is on our side if our Empire can outlast Germany in money and resources; and it is beyond dispute that we can outlast her if we choose; (2) Our power so to do depends entirely upon the individual conserving his resources, and making them available for the war; (3) This he can only do by producing more, consuming less, and lending every penny he can either to his own Government's War Loans or to those of the British Government."

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.
CONTRACTORS TO GOVERNMENT.

ALEXANDRIA'S EXHIBITION.

A Comprehensive Industrial Display.

The Alexandria Industrial Exhibition was opened formally on August 5, and among those who were invited to be present at the ceremony were the Princes, the Ministers and past-Ministers, the Advisers, Under-Secretaries of State, heads of Administrations in Alexandria, Chief Officials of the Sultanieh Household, Members of the Municipal Council, Members of the Commission of Commerce and Industry, the Mudirs and Governors, the President and Vice-President of the Legislative Assembly, representatives of the Caisse de la Dette and of the Courts of Justice, etc.

The Exhibits.

We are indebted to the *Egyptian Gazette* for the following description of some of the exhibits:—

One of the largest sections of the exhibition is that devoted to the textile industries, divided into numerous important groups.

Altogether there were about sixty exhibitors of woven articles, including carpets, and these are fully representative of all the craftsmen in the country. There were attractive bed-covers, striped curtain cloths and towels of characteristic design from Akhmin, one of the biggest weaving centres in Egypt; striped galabieh and cotton cloths from Assiut, tapestry and curtain cloths, furniture coverings, shirtings, shot silks for dresses, and much else of similar description from Mahalla el Kebir, in designs for which that district is justly famous. From the Bulac Technical School there were shown some fine examples of figured silks and tapestry cloths, while in the same group were many other figured silks representative of the finest Cairo silk weaving.

Weaving.

In addition to this admirable collection of exhibits, there was shown the process of weaving from the simple native wool weaving to the improved Mansourah type of hand loom, and the application of the hand loom to the Jacquard for figure weaving. The visitor was able to see at work kelim carpet weavers from Beni Souef and pile carpet weavers from Assiut, as well as mat weavers from Zagazig. A Scotch spinning-wheel was also at work to demonstrate the simple and rapid method of spinning wool for carpet weaving.

In the wool weaving section there were some examples of native blankets, Zarbut cloths of characteristic natural coloured wool, fine wool arbieh cloths from Upper Egypt, and serge and home-spun mixtures and tapestry cloths from the Bulac School.

Examples of native clothing was another attractive feature in this section, especially the dressed stands (life-size), showing the various types of native costumes as worn by the fellahin and other classes of the people.

Damietta Products.

From Damietta came examples of thin silk-crêpe cloths, and an interesting section of the same group was comprised of crinkled striped crêpe recently made in Egypt to replace goods previously imported from Syria.

A rich display of carpets included work from Assiut, Beni Souef, Nag Hamadi, and Beni Ardi, together with Bedouin kelims made by the western Arab women. These were specially fine in design and structure.

One of the most striking features in the central hall was the Kiosk, covered inside and out by embroideries by Ismail Omar, of Cairo. The work may be said to represent the high-water mark of Arabic applique embroidery. Many of the designs are of historic Arabic patterns, and included a fine geometrical design copied from the Mosque of Kait Bey at Cairo. Over one door of the Kiosk, in the inside, there is a panel with Arabic writing in white on a red satin ground, bordered by delicate arabesque. Translated, the inscription reads: "May he live who has restored the glory of Egypt."

The principal exhibits in the art metal work section came from the Khan of Khalil, Cairo, consisting of engraved and inlaid brass-work, and including reproductions of an exceedingly beautiful Koran box and of two fine candlesticks in the Cairo Museum.

EGYPTIAN COTTON CROP.

Read with the letter from our Cairo Correspondent of August 2, published last week, the Monthly *Bulletin* of the Ministry of Agriculture will not be uninteresting.

The *Bulletin*, which is dated August 3, 1916, gives the present condition of the cotton crop in Lower Egypt as 2 per cent. above the average, while that of Upper Egypt is 1 per cent. below the average. The *Bulletin* adds that the weather has been favourable. The water supply was sufficient everywhere except some districts in Daqahlia, Gharbia, and Beheira, and chiefly on tails of canals. The effects of over-watering have been reported from Menufia and Beni Suef, showing that it has been indulged in to a certain extent, especially by small cultivators, with the usual boll-shedding as a result.

The cotton-worm attack, which, as pointed out in last month's *Bulletin*, has been heavier and more general than last year, has been overcome with no damage to the crop, except to an unimportant extent in parts of Qaliubia and Saff Markaz (Giza). Aphis has been comparatively rare, being noticed in particular in Fayúm, Minia, and Qena. The ordinary boll worm (Earias insulana) has been conspicuous by its almost complete absence, while the pink seed worm (Gelechia gossypiella) has infested the bolls in a varying degree in every province up to Assiut. The crop has continued to make good progress, and bolls in the early-sown fields in Lower Egypt have begun to open. The Upper Egypt bolls are also ripening in early cultivation. The condition of the crop in all parts of the country fully bears out last month's forecast of an early picking, which has already begun in the basin lands of Assiut.

DIRTY COTTON.

Complaints have been somewhat frequent of late regarding the presence of foreign matter in bales of Egyptian cotton. In the *Manchester Guardian* (August 21) Mr. H. Robinson, secretary of the Manchester Cotton Association, writes:—"I would state that the directors of the Manchester Cotton Association some months ago had their attention drawn to foreign matter, such as jute, fibre, string, and pieces of canvas contained in Egyptian bales. The association at that time addressed a communication on this subject to the Alexandria General Produce Association. The president of the Alexandria Association replied, stating that the matter had been brought before a meeting of his committee, who strongly recommended that every effort should be made in order to avoid such foreign matter being present in the cotton. It was, however, pointed out that they have to depend entirely on the natives in the villages, and that it is an extremely difficult matter to convince them of the seriousness of this practice. The Alexandria Association, however, promised to take every means to bring about an improvement."

COTTON FAILURE.

Considerable surprise was caused on the Liverpool Cotton Exchange yesterday (August 24) by the posting of a letter from Messrs. Forgan and Co., cotton merchants, announcing that they would be unable to meet their liabilities at this week's Settlement. The news led to an immediate advance in prices, but as the morning tendency was downwards and much liquidation was in progress the advance was not maintained. The stoppage is not expected to have a serious effect on the market.—*Financial Times.*

THE GERMAN WAY.

The commission delegated to carry out the liquidation of the Deutsche Orientbank is about to complete its work, says *Ahaly*. The liquidation is expected to be finished two months hence, and the German establishment will then cease to have any existence in the commercial and financial circles of Egypt. It is worth noting that the German bank, which was established ten years ago in Egypt, had, with gradual progress, secured a high position in the country. According to a well-informed authority, the Deutsche Orientbank, in the first year, purchased 50,000 bales of Egyptian cotton, in the second year it purchased 100,000 bales, in the third year 250,000 bales, and it continued to develop its cotton purchases until it became able to dispose of about a third of the whole crop.

TRADE NOTES.

Openings.

The British Vice-Consul at Tetuan (Morocco) reports that a local merchant desires to secure the agencies of United Kingdom insurance companies (fire, life, accident and marine); also of U.K. steamship companies. Apply for particulars to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

RESTRICTIONS.

Malta Prohibitions.

The following articles have been added to the list of merchandise, the exportation of which from Malta is prohibited (except to the United Kingdom, British possessions and Protectorates):—

Cape garnets or rubies; copper stamps used for stamping woven piece goods; firebricks and fireclay; rennet powder, rennet extract, and other preparations of rennet; vinegar containing not more than 6 per cent. of acetic acid; vinegar essence, and similar preparations containing more than 6 per cent. of acetic acid; wire, barbed, and galvanised wire; woods, viz., beefwood, birch, boxwood, dogwood, greenheart, hickory, lancewood, padouk, sibacu, teak, whitewood; bags, wrappers or sacks made of jute, other than any such bags, wrappers or sacks as constitute the coverings of goods to be shipped for exportation and are allowed by the Collector of Customs to be shipped as such coverings (in lieu of the items:—"Bags and sacks made of jute," and "jute wrappers (Surrat tares)").

Export to all foreign ports in Europe and the Mediterranean and Black Sea, without the permission of the Collector of Customs, is now prohibited of the following:—

Bamboo; bristles; feathers and down; felspar; insulating materials, the following:—Leatheroid, oiled cloth and tape, vulcanised fibre; rattan, woven; tea; tobacco; varnishes, spirit, containing gum.

SEA ROUTES TO EGYPT.

"Britisher" writes:—

I was recently looking through Macmillan's "Guide to Egypt and the Sudan" (latest edition), published this year, and very much regret to have to make the following remarks:—

On page 1—"Miscellaneous Information"—under the heading "Long Sea Routes from England to Egypt," I find that the North German Lloyd are set down as leaving Southampton twice a week.

On page 2, under "Overland Routes," the Austrian Lloyd and North German Lloyd are widely advertised, the former as sailing from Venice, Trieste, and Brindisi, and the latter from Marseilles, Genoa, and Naples.

Now, I take it that a guide-book is published for the information of the public, but the book above quoted is very misleading, as at the present moment both the lines mentioned have, of course, been suspended owing to the war; and as regards conditions after the war, I imagine that the compilers of Macmillan's Guide are not in a position to state whether these two enemy lines will be permitted to resume their calls at any of the Allied ports, or to be specially utilized as a connecting link between England and Egypt.

Before concluding I wish to point out, as a contrast to the above-mentioned advertisement of enemy lines, the complete absence in the guide-book in question of any mention of the Overland Route by the Orient Express to Constantinople, thence to Egypt by the Khedivial Mail Line Steamers—the only British Mail Service running in the Levant. Is this due to an oversight of the compilers of Macmillan's Guide, or to the lethargy of the management of the Khedivial Mail Company?

CAROB DISEASE IN CYPRUS.

The authorities in Cyprus have taken steps to check the serious disease which has for some years attacked locust beans in several areas in the island. A recent proclamation provides that all affected pods and buds must be gathered by owners of trees within forty days of the date fixed for the picking, and burnt or buried in lime to the satisfaction of the Director of Agriculture or his agents. The storing of, or dealing in, diseased pods is prohibited under penalty.

ENGINEERING NOTES.

Remarkable Oil Eruption.

It has already been stated that the well No. 26 of the Romano-Americana in Roumania struck oil at a depth of 424 metres, toward the middle of last April. The well is situated at a distance of forty metres from the wells No. 27 and 28 of the Steaua-Romana at Baicoi-Ferbatore, both on the south-western slope of the anticlinal, and both having made famous eruptions. The company has, of course, expected violent eruptions, and therefore took all precautionary measures for a most efficacious capping of the crude oil and gas, says *The Petroleum Review*. An ingenious installation has therefore been erected. Above the last 10-in. column has been fixed by means of very powerful joints a usual safety valve, and above the latter there has been placed a valve of the system Tacit-Puscariu. Above the two valves there has been installed an eruption cross of very solid construction, above which there was fixed another Tacit-Puscariu valve, and finally the usual safety valve. All the valves were fixed by means of powerful joints. The usual safety valves are worked from outside the tower by iron rods, while the Tacit-Puscariu valves are operated by steam supplied through 2-inch pipes at a distance of 150 metres from the well. From the side parts of the eruption cross lead two 10-inch pipes, each provided on the outside of the tower with a valve, and each having fixed inside a steel cork 30 cms. in diameter, and with a hole 1½-inch wide. The two pipes terminate in an hermetically closed wooden hut by 3 by 3 by 2½ metres, into the main part of which are introduced two 6-inch pipes, through which the gases are absorbed by means of two powerful aspirators placed at a sufficient distance so as to avoid any danger of fire. The hut has on top a wooden chimney 3 metres high, through which can escape the last traces of gas, and which is provided inside with a steam pipe.

The Crude Oil.

From the hut the crude oil runs into a number of iron reservoirs, where it is separated from sand, and is then pumped away into tanks by means of four pumps of a capacity of 400 tons an hour, each pump working independently of the others. Capacious reservoirs moreover surround the well for any emergency. The expectations of the company were fully realised, and after cleaning with a baler, the well, on April 20, began eruptions which, with small intervals, continued until June 2, when the well was blocked with sand. At the start of the eruptions the valves of the pipes leading to the hut were opened, while the Tacit-Puscariu valve above the eruption cross was closed, and this has been done rapidly and easily, notwithstanding the extreme violence of the eruption. When on April 23 the pipe-lines were found to be blocked with sand, the valves were opened, the pipe-lines were cleaned, and the eruption soon commenced again, when the upper valve outside the tower was at once closed, and the oil allowed to run through the pipes. Between May 28 and June 2 the well yielded a total of 30,950 tons of oil, and on June 2, when the well was working but eighteen hours, the yield amounted to 3,480 tons. After the cessation of the eruption, the whole installation was re-examined, when it was found to be in perfect order, notwithstanding that tremendous quantities of sand have passed through it and have caused but an enlargement of the holes in the steel corks from 1½ in. to 4 in.

New Eruptions.

In order to prevent new eruptions between the columns, the surrounding ground has been dug on an area of 3 m. by 3 m. to a depth of 8 m. or 2 m. under the upper end of the column of 12½ in., and after cleaning out the sand, the space between the columns has been filled in with cement. On June 12, after ten hours cleaning, the well recommenced extremely violent eruptions. The upper Tacit-Puscariu valve has been at once closed and the oil let run through the pipes. The eruption was so violent that the whole of the installation was shaking for fifteen minutes, when, unfortunately, owing to a breakdown of the 10-inch pipe, the installation capsized under the tremendous force of the eruption, the violence of which was such that, notwithstanding the fact that already 30,000 tons of pure oil have been spouted out from the well, large quantities of dry sand, stones, and gas were ejected from it to a height of 100 m. to distances at a radius of one kilometre from the well. Naturally, most strict measures of precaution were taken to prevent an outbreak of fire, but it was only after three days that the well could be approached for purposes of closer observation, when it was found that in the interior of the tower a deep crater was formed, and that the end of the column could not be seen. In order to weaken the violence of the eruption, quantities of old iron cable and other weighty articles were thrown into it, after which the eruptive column diminished to a half of the height of the tower.

Restricted Petrol.

The high price and restricted supply of petrol has caused great consternation among motorists and motor-car owners. The announcement from time to time of the discovery of one or another substitute for the now precious liquid fuel raises, naturally, their hopes, but so far nothing has yet appeared in the market, and the discoveries are apparently of an experimental nature. It is well known that, in spite of the reported "abundance" of petrol in Germany, a very strict economy is also studied there, and it has been thought advisable that the Government should take over the production and control the supply. In the meantime, German scientists were busy, and their efforts were in more than one case rewarded. A preparation, for instance, of a motor fuel which, according to recent information, has been extensively used there for over a year now with success, is the discovery of a German scientist or chemist. It consists of 80 per cent. alcohol and 20 per cent. benzole, with the addition of 200 grammes per gallon of naphthalene. The mixture, it is said, gives almost the same power as petrol, as the calorific value is brought up to the requisite figure by the naphthalene and benzole, although alcohol has a very low calorific value, being only 6 per cent. of that of petrol.

Petrol from Crude Oil.

Scientists in America have been just as busy as the Germans over the petrol problem. By a new process, which was invented by a United States Government official, gasoline, which is the American word for petrol, can be obtained from synthetic crude oil. By this process it is possible to reconvert paraffin, vaseline, rod wax, and other natural hydrocarbons into a synthetic crude oil, and to obtain from 50 to 70 per cent. of gasoline or petrol as white as water in colour. Nothing is said about the cost of production, but the results obtained are said to indicate that this oil fuel will meet the requirements of the market. There is also another American process, devised by a chemical engineer, which is considered of great value in the way of enlarging the production of motor fuel. This process is the result of the application of mathematics, physics, and chemistry to the process of petroleum cracking, and it is stated that this cracking system not only secures petrol to an amount varying from 50 to 75 per cent., but also enables benzole and tolecol to be obtained at will. However, until these petrols and substitutes for petrol are put on the market and can be obtained at reasonable prices the consternation of motorists and joy-riders will be continued.

Paraffin Mixtures.

Motorists who are making trials of paraffin mixtures are advised to keep in mind the fact that it is inherent for paraffin to separate from the mixture and enter the cylinder in the "wet" state, instead of the gaseous condition. This is difficult to avoid, owing to the absence of a proper vaporization method for the paraffin. The risk of trying paraffin mixtures is one that is not easily detected; it arises from the unconsumed paraffin draining past the piston rings into the crank-case and diluting the oil, and which may eventually lead to a seizure of melting out of one or other of the big ends. It is best to keep to small proportions of paraffin, otherwise the "economy" may turn out to be dearly purchased.

SHIPPING NOTES.

Of 25,500,000 tons of merchant shipping cleared from United Kingdom ports in the year ended June 30, 1916, 23,000,000 tons belonged to foreign flags. Clearances to Greek ports increased threefold.

The Russian decree prohibiting the transfer of merchant ships to a foreign, other than an Allied, flag, it is ordered, will remain in force "until two years as from the date of the ratification of the Peace Convention."

The Board of Trade have received through the Foreign Office gold, silver, and bronze medals, which have been awarded by the President of the French Republic to the masters and members of the crews of the British steamships City of Nagpur and Collegian, of Liverpool, in recognition of their services to the crew and passengers of the French steamship Euphrate, of Marseilles, which stranded at Socotra on September 11, 1915.

Advices continue to reach this country from the Mediterranean of the torpedoing of vessels by enemy submarines. It was reported as follows, on August 17, from Genoa:—The following vessels have been torpedoed and sunk in this neighbourhood within the last few days:—Italian sailing vessels Balmoral, Eurasia, Regina, Pacis, Pausania, and Ida, besides some others the names of which have not yet been ascertained. Advices are now received that the sailing vessel Louis B., of Viareggio, was sunk by an enemy submarine off Capraja Island on August 14. The Italian steamer Erix and the Italian sailing vessel Dea have been sunk.

As was forecasted last week, Messrs. Furness, Withy and Company, Limited, have acquired the preponderating share interest in the Prince Line, Limited, together with the life interest of Mr. James Knott, the founder and managing director of the line. It is now stated that another fusion is to take place. The managing directors of the Taylor and Sanderson Steam Shipping Company, Limited, Sunderland, are asking the shareholders for their opinion of a proposal to realise the company's assets by selling the seven steamers belonging to the company, with a gross total tonnage of nearly 17,000 tons. They point to the present high prices of ships, and suggest that from profits the managing directors should receive £50,000, representing five years' remuneration as directors, out of which compensation would be paid to the company's staff. The realisation of assets and the winding-up of the company would probably take two years.

COMPANY REPORT.

Bibi Eibat Oil.

The report of the Bibi Eibat Oil Company for the year ended March 31 last states that it has been found practicable to embody in the accounts the operations of the Russian company for the two years ended December 31, 1914, and 1915 (old style), and it is hoped that in future the English accounts may be issued only three months later than the Russian accounts, instead of 15 months later, as hitherto. The gross income amounted to £16,111, the greater part of which represents interest accrued on sums advanced to the Russian company (La Société de Naphte de Bibi Eibat), the balance being the return upon investments, interest on loans, etc. General expenses absorbed £3,826 and other payments £252, leaving £12,032. From this has to be deducted £7,000 for interest and redemption of debentures, while to the remaining £5,032 must be added £15,002 brought forward leaving £20,035, of which £503 will be applied to the redemption of Income notes, the balance of £19,532 being carried forward. The decrease in revenue is attributable to the Russian company being unable to declare any dividend for the period included in these accounts. This result was due primarily to the stoppage of work for two months in 1914, during the strike of workmen which was general throughout the Baku fields. On the resumption of work many of the wells were found to be damaged by water, and in spite of the efforts to overcome this trouble, the production showed a decline of 25 per cent., as compared with the output immediately before the strike. In consequence of the royalty of 40 per cent. still exacted by the Russian Government—amounting in 1914 to Rs. 345,049—the operations of the Russian company involved a loss on working for that year of Rs. 116,825. Although the production for 1915 was slightly in excess of that for the previous year and the average price obtained more favourable, the increase in receipts was more than counteracted by higher working costs, with the consequence that the year's expenses (including royalties equal to Rs. 372,329) exceeded the receipts by Rs. 136,139. Information furnished by the Russian company includes the following particulars of working during the two years ending December 31 (o.s.) :—

	1915.	1914.
Crude oil produced (poods)	3,447,600	3,384,300
Used for fuel (poods).....	1,106,300	942,100
Government royalty (poods) ...	936,520	976,880
Quantity belonging to co. (poods)	1,404,780	1,465,320
Average price realised (per pood)	42.44 kops	35.73 kops
No. of wells baled during year..	26	29
Wells producing at end of year	21	18
Wells under repair at end of year	7	6
Amount of boring during year..	88 sagenes	105 sagenes

The deep well (No. 11) did not maintain the large output which it at first yielded, and is now undergoing repair. The local management hopes, however, to bring this well again into production in about two months, and much depends upon the ultimate result, as many of the older wells appear to have suffered permanent deterioration as a result of stoppage during the protracted strike of 1914. The company has not felt justified in proceeding with the two new wells, Nos. 39a and 40, pending a settlement of the question of royalties, a reduction in which was recommended by a Government Commission more than six years ago. The prospecting license acquired over 99 acres of land on the Novo Aldi field to the south-east of Grozny expired in May last, but has since been extended. An extension has also been granted in respect of the prospecting licenses at Adji-Kabul, on the Shirvan Steppe. A contract has been made for the sale of the net disposable production for one year from December 1, 1915 (o.s.) at one-half kopeck above average market price, with a minimum of 35 kopecks per pood.

I am glad (says a correspondent of the *Egyptian Mail*) I have not to sit at an examination for the French commercial diploma, one of which has just been held in Alexandria. In the geography paper the candidates were asked to report upon the prospects of a trunk railway from Oran in Algeria to Alexandria via the north coast of Africa. They had further to discuss the advantages which would accrue to the railway from an extension to Tigris and Batum. The examiners had some sense of humour, however, for they asked the candidates to state what help Alexandria should provide

COMPANY NOTES.

Oil Outputs.

Anglo-Egyptian.—Gemsah, the week 12 tons (previous week 21 tons). Hurgada, 551 tons, against 562 tons.

Baku Russian Petroleum.—Week ended August 12, 79,200 poods.

Bibi Eibat.—Week to August 13, 61,000 poods.

European.—Week ended August 20, 88,200 poods.

International Russian Oilfields.—Production from well on plot No. 107 during four weeks ended August 19, 8,411 poods.

Maikop Pipeline and Transport.—Received for pumping week ended August 12, 70,308 poods. (Note.—Owing to mutilation in cable figures for week ending August 5 are not yet available.)

New Schibaieff.—Month of July, gross, 512,920 poods; net, 303,852 poods.

Roumanian Consolidated Oilfields.—Week ended August 12, 797 tons.

Russian Petroleum.—Week ended August 12, 56,300 poods.

Ural Caspian.—Week ended August 17, 159,859 poods.

Oilfield News.

Maikop Orient.—By cable: "Plot 435a, well 3, drilled 63 ft.; depth, 1,023 ft. Well 1: Production for week, 200 poods."

Dividends, etc.

Nile Cold Storage Co.—An interim dividend of £1 sterling per share, payable in cash, has been declared on the shares of this company. Coupon No. 11 is payable on and after August 10, 1916, at the National Bank of Egypt in Cairo, Alexandria, Port Said, or London.

Meeting.

Bibi Eibat Oil Company.—August 30, 1916, noon, River Plate House, E.C.

Sir M. Samuel's Correction.

Sir Marcus Samuel, chairman of the Shell Transport and Trading Company, having stated at the general meeting of that company that they had "succeeded in bringing about the solvency of the Schibaieff Company, in contrast to other efforts at reconstructing Russian oil companies in London," was asked by Mr. Herbert Allen for an assurance that his remarks did not apply to any of the four following companies:—Baku Russian Petroleum Company, Bibi-Eibat Oil Company, European Oilfields Corporation, Russian Petroleum Company—all of which came within the category of Russian oil companies reconstructed in London. Sir Marcus Samuel has now stated that he regrets that any words he may have used in his recent speech should have been thought to refer to the insolvency of the four companies mentioned above. The remarks were not intended to bear this interpretation, and consequently were not intended and do not cast such a reflection upon those companies.

Maikop Premier Oil Syndicate.

Mr. G. R. Bonnard presided at a series of meetings of holders of securities in the Maikop Premier Oil Syndicate, held on August 18, to consider a scheme of arrangement proposed to be made between the company and the various holders.

At the meeting of the debenture stockholders he explained that in respect of the debentures amounting in the aggregate to £406,989, issued or to be issued, in the capital of the company, the debenture-holders should in satisfaction of those debentures receive exactly half of the nominal amount in debentures, which would be created in the suggested new company, and a number of shares, aggregating 40,989, of 10s. each, fully paid, out of the total capital of £150,000 divided into 300,000 shares of 10s. each. In regard to interest accrued on the debentures amounting to £4,864, it was stipulated that the claims of the debenture-holders for that interest should be satisfied by receiving £2,432 in debentures in the new company and 4,864 shares of 10s. each in the new company, credited fully paid.

Mr. Cutliffe considered the terms far too drastic so far as related to the debenture-holders. Did they choose, the debenture-holders could take the whole of the property. Why, therefore, should their interest be cut down to the extent of 50 per cent? Moreover, the new debentures were not convertible into shares—such conversion would be a valuable right if the new company proved a success.

The Chairman said their critic claimed that the debenture-holders could themselves carry along the business, but if they elected to do so a considerable amount of new money would have to be found by them for working capital. Further, they would have in front of them gross royalties of 20 per cent. in one case and 5 per cent. in the other. If the concern was successful half their interest would be in debentures and half in shares of the new company. The shares, if the company turned out well, would produce an income greater than the debentures. Under the scheme, the total 20 per cent. royalties was to be placed behind the new debentures, whilst the people who were taking up shares in the company in the place of their royalties were also putting up a considerable amount in cash to enable the properties to be developed. He believed that the provision of capital under the scheme would give the company an excellent opportunity to achieve success. The resolutions carrying the scheme were adopted.

At meetings of the holders of the 5 per cent. and 20 per cent. royalties, and of the creditors and holders of shares in the company the arrangement was agreed to.

NEWS FROM ALL SOURCES.

The Roumanian Government has prohibited the export of oats and barley of the new harvest.

The Kom Ombo Hotel, which was destroyed by fire in May, 1915, is being rebuilt and will be completed this year.

Authorities in South Africa estimate that in five years it will be possible to export a million boxes of oranges each season.

A Post Office for ordinary and registered correspondence, ordinary and cash-on-delivery parcels not exceeding three kilos in weight and ordinary money orders has been opened at El Fasher, Sudan.

The Hungarian military authorities have requisitioned the whole of the grain and grain products in the country remaining from last harvest. The Decree even covers supplies in private households if these are in excess of their needs.

"If you go to any of the establishments under liquidation in Alexandria you will find that all good and useful stuffs have been sold, and that what remains consists mostly of articles of luxury and a variety of unnecessary things."—The *Bassir*.

In addition to Jeddah and Mecca, says a Cairo message, telegraphic communication has now been established with Taif, via Wadi Halfa and Suakin. Taif, one of the most ancient cities of Arabia, is in the Hedjaz, about sixty-five miles south-east of Mecca.

According to information from Bucharest, a contract has been placed with the German Stahlwerksverband by the Roumanian Railways for the delivery of 25,000 to 30,000 tons of railway rails, intended for the construction of a new line from Crajova to Bucharest.

The British Imperial Council of Commerce, which convened the business conference held in June last of representatives of British Chambers of Commerce throughout the Empire, has now issued a full report of the proceedings, containing the speeches and the resolutions adopted.

It has been notified that on account of the restrictions placed upon the import of unmanufactured cotton into Egypt, no cotton from the Sudan can be transported by the Nile route via Halfa. Import of Sudan cotton into Egypt will still be allowed under the conditions laid down previously.

ON 'CHANGE.

(By Our City Correspondent.)
Throgmorton Street,
London, E.C.

During the past week business has practically been at a standstill, a period of general inactivity apparently having set in. This is to be attributed to the holiday spirit; habits are so hard to kill, and mere Orders-in-Council will not make jaded men work.

Some business has been done, however. As to Egypt, at the moment the country is between the seasons, and all interest is concentrated upon cotton and upon the rise of the Nile. Up to the time of writing, all the news regarding the Nile flood and the cotton crop may be regarded as satisfactory. Still, cultivators are not yet out of the wood, for a full month has yet to run before it can be said for certain that all fear of the pink boll worm has passed away. At the same time, the indications are pretty satisfactory, and confidence in the future is as strong as ever it was.

As to shares, a small business has been done in National Bank of Egypts, and the shares are still in demand at 12½. There is very little to report in Agriculturals, which have had a pretty lifeless market. A few trifling transactions have been negotiated in the neighbourhood of 4¾. A fairly steady demand has been maintained for Delta Light Railway preference shares, offers ranging at about 5⅛; but holders show absolutely no inclination to part with their scrip, and, as a result, no business in these lines has been put through, notwithstanding the keenness of buyers.

Khedivial Mail shares have not moved, and continue a hard market at 26s. There has been some activity in regard to Delta Lands, some few shares in which have changed hands in the neighbourhood of 7s. 3d.

There has been a continuing demand for Greek securities. Some Rentes have been done at 44. Current bonds are also in good demand, but sellers are scarce, and only a few numbers have been obtainable at the higher price of 90.

Oil Shares.

The market for oil shares has been inactive most of the week, but on Wednesday Lobitos came on very strongly, rising by 1s. 6d. to 37s. 9d. For the rest, Shell Transports were quiet, but there was no falling off in value, and there has been very little to do in Russian lines. Spies touched 13s. 6d. and North Caucasians 25s. 6d., while Ural Caspians were sold at 33s. 6d. and 33s. 9d.

BULGARIA'S NATIONAL DEBT.

The *Narod* (Sofia) wrote on July 21:—"The most noteworthy fact in the discussion of the Budget is the general conviction that our national debt will reach the total of 3,000,000,000 frs. (£120,000,000) by the end of this year. That is a sum not to be thought of lightly by anybody."

MESSRS. RALLI BROS.

Indignation is growing in business circles here at the action of the Home Government in empowering Messrs. Ralli Brothers to purchase all the jute for the war orders placed in Dundee (cabled the special correspondent of the *Daily Telegraph* in Calcutta on August 22).

The papers point out that Messrs Ralli Brothers are a Greek firm, and their appointment might act detrimentally to British firms here. A meeting of jute shippers held to-day strongly protested against the appointment, and demanded the cancellation of the agreement.

LARAICHE HARBOUR.

A recent issue of the *Boletin Oficial* of the Spanish zone of Morocco contains a *dahir*, countersigned by the Spanish High Commissioner, approving and ordering effect to be given to an agreement regarding the harbour works at Laraiche, arrived at with the German company that had the work in hand. The effect of this agreement is to cancel the contract entered into with the company in 1910, and to take over on behalf of the Spanish Government the works already executed.

In this connection the British Vice-Consul at Laraiche (Mr. E. H. Mulock) reports that the Spanish Government hoped to be in possession of these works, including all the plant and material, by August 1, when the completion of the works would be entrusted to the Public Works Department. Amongst the works will be the dredging of the bar and river, which is an urgent necessity in view of the fact that the dredger has lain idle since December last. Later, it is proposed to construct an embankment carrying a road from the Customs quays to the rocks on the south side of the river mouth, and from the latter point to build a breakwater.

NOTES OF THE WEEK.

This week there are again stirring events to record—events which, though not unforeseen, are none the less welcome to the Allies, and which cannot fail to exert a marked influence on developments, especially in the Near East. That influence has indeed already made itself felt throughout the Balkans, in which direction the eyes of the world are once more turned. Italy, compelled by the logic of facts and by the force of Italian public opinion, outraged by countless provocations, has, through the Swiss Government, declared that she "considers herself to be in a state of war with Germany as from August 28;" and Roumania has definitely ranged herself upon the side of the Allies, thus justifying the gloomiest forebodings of Germany and Austria-Hungary. Both in Italy and in Roumania the taking of the momentous step has given rise to demonstrations of popular enthusiasm, while in the Allied countries the news has been received with very natural satisfaction.

Englishmen have not forgotten, and are not likely to forget, that Italy threw in her lot with theirs at a time when all was not going well with the Allies, and they recognise that she has now struck another blow on behalf of right and freedom, thereby acting up to her best traditions. But they have long felt that the step she has taken was inevitable. In regard to Roumania the case was different, so far at least as the general public was concerned. Roumania's attitude has for some time been a puzzle to most Englishmen, and her co-operation has therefore been all the more warmly welcomed. Now that it has become possible to indicate the considerations that have forced her to follow a policy of seeming inactivity for the past twelve months, it is realised that she has had an exceptionally difficult part to play; and past doubts and misunderstandings lend added enthusiasm to the welcome accorded to her as a new partner in the Grand Alliance.

It was at a Crown Council held at Bucharest on Sunday that Roumania's final decision was reached, and early in the evening the Roumanian Minister in Vienna informed the Austrian Government that his country would consider herself in a state of war with Austria-Hungary from nine o'clock. Fighting actually began the same night, the Roumanian forces on the frontier surprising the Austro-Hungarians in some of the passes of the Transylvanian Alps and gaining initial successes. On Monday Germany declared war on Roumania. The junior partners of the Quadruple Alliance displayed less alacrity to go to the assistance of Austria against her fresh and vigorous opponent. Turkey, however, took the plunge on Wednesday, presumably at Germany's bidding; and it is momentarily expected that Bulgaria will follow suit.

M. Bratiano and his colleagues must indeed have had an anxious time during the past year, and their task of steering the Roumanian ship of State through the shoals cannot have been rendered any the more easy or pleasant by the ill-instructed criticism to which they were almost incessantly subjected from one quarter or another. The greater part of that criticism might certainly have been spared; for many months past there has been practically no room for doubt regarding the course that Roumania would follow. In the earlier stages of the war it was not unnatural that all the smaller States should deem the policy of "wait and see" the wisest one to pursue. Serbia and Montenegro were, of course, unable to follow it; Bulgaria did not follow it long enough; Greece followed it too long; Roumania, in fact, ceased to follow it some time ago, but was forced to seem to follow it still. In the first months of the war, it must be remembered, the waiting little countries were frankly influenced by fear of the Germans, a fear which was enhanced by a very liberal display of "frightfulness." They believed that the Central Powers would probably win; and in any case they desired to keep outside the maelstrom as long as possible.

In the case of Roumania, there were further reasons against taking action, especially against Austria-Hungary. Apart from King Carol's personal influence, there was the fact that—as a result of his policy—she was ill equipped with mountain artillery suitable for use in the Carpathians, and that her military preparations had all been designed to protect her against attack from other directions, leaving her western frontier much exposed. Moreover, it is now an open secret that her supplies of ammunition were utterly inadequate to meet the demands of a war waged on such a scale as that of to-day. Thus, while she had an army of which she was entitled to be proud, she laboured under serious disabilities in these and certain other respects. Those disabilities have now been removed, as the result of steady, patient work; she is free to strike for the realisation of her national ideal at last; and she has already made a highly satisfactory beginning.

Digitized by Google

Thus far there has been no fighting on a large scale, but the Roumanians have driven in the enemy outposts over a wide front, and have obtained a footing on Hungarian soil, having penetrated at some points to a distance of twenty miles. The first official *communiqué* issued in Bucharest is extremely modest, but from Austrian reports it is safe to infer that our new Ally is in occupation of Petrosheni and Kronstadt, and possibly of Kezdi Vasarhely. Their advance is apparently proceeding all along the Carpathians, and the enemy is, to quote his own words, withdrawing "step by step, and in accordance with our plans, as had been provided for since a long time ago in case war broke out." On the Danube there have been several exchanges of shots, but no results of importance have been achieved. The enemy lost no time in giving Bucharest an illustration of "frightfulness." On Monday night a Zeppelin and an aeroplane dropped several bombs on the city, and Baltchik and one or two other places received similar attentions. Fortunately, no damage was caused by any of these attacks, and at Bucharest the raiders were driven off by artillery fire.

General Lechitsky's troops have scored another success in the Carpathians, in the capture of Mount Pantyr, a peak north-west of the Jablonitza Pass, the entrance to which on the Galician side is also held by them. The Russians are now astride the Carpathians for a distance of nearly thirty miles, and have a comparatively short distance to go before they dominate the ridge east to Roumania. In the meantime, they are reported to be moving troops into Roumania, obviously for the purpose of an attack upon Bulgaria; but for the present it is better not to attempt any forecast of the steps they are likely to take in this direction.

In regard to the operations of the Bulgarians and of General Sarrail's force little can be said. The Bulgars continue to make desperate assaults on the Serbians in the neighbourhood of Ostrovo, but without success. At Kavalla the situation is somewhat obscure. The Greeks appear to have handed over all the forts save one to the Bulgars, who promptly occupied them, in spite of the German promises given to Greece that no such step should be taken. The one fort left unoccupied owes its immunity to the intervention of the senior naval officer of the Allied patrol, who notified the Greek Commandant that if it were handed over to the enemy he would have to hold up the coast traffic. As a result of the seizure of the forts, Kavalla was last Friday exposed to a brief bombardment by a small British squadron, which is reported to have made excellent practice. The Bulgarians did not reply, contenting themselves with an aerial attack upon the ships in the harbour.

The situation in Greece is still very unsatisfactory. As might have been expected, the action of Roumania has caused a great commotion amongst the Greek people, who are showing symptoms of an anxiety to range themselves upon the side of the Allies and of a dawning understanding that Greece may have missed her opportunity already. That the national spirit is not quite dead, in spite of all the German and pro-German efforts, is shown by the resistance offered to the Bulgarian advance at certain points, referred to last week; and by the assembly on Sunday of a crowd, estimated to number upwards of 50,000, outside M. Venizelos' house, to protest against the Bulgarian invasion. This assembly—described as "the most imposing political meeting held in Greece since the Greek kingdom came into existence"—was addressed at some length, and with his customary eloquence and frankness, by M. Venizelos, who was accorded a most enthusiastic reception. He advised that a deputation should present itself to King Constantine and submit to him a resolution which would enlighten him on the true facts of the situation. His Majesty, said M. Venizelos, had become the victim of military counsellors with but a meagre knowledge of the situation and with tendencies towards despotism; he was also the victim of his own admiration for Germany and of his ambition to concentrate power in his own hands.

The state of affairs existing in Greece to-day, the handing over of Greek fortresses to the Bulgarians, and the danger threatening Northern Epirus, were all ascribed by M. Venizelos to the causes just enumerated; and the people should demand that the King be removed from the influence of vile flatterers. It should recommend the King, with its aid, to arouse the national feeling and to call into being an army capable of defending the vital interests of the country. As to the elections, M. Venizelos declared that it was necessary to hold them in order to create an Assembly truly representative of the nation. Co-operation between political parties had been rendered most difficult; but the Zaimis Cabinet had become a national necessity, and the Liberal Party was ready to extend its confidence to that Ministry so that it could be considered a political Cabinet on which the Entente could rely for very benevolent neutrality.

M. Venizelos' speech was received with boundless enthusiasm, and a representative committee was afterwards appointed to present to King Constantine a resolution of the character suggested. Unfortunately, his Majesty, who has lately been troubled by inflammation of the wound left as the result of his last operation, found himself unable to receive this deputation, though he promised to do so at an early date. It is possible, however, that he will have been acquainted with what M. Venizelos said and the way in which his suggestions were received; and in that case he will hardly have failed to take note of M. Venizelos' remark to the effect that, if the people's voice were not heard, they "must consider what could be done to mitigate the threatening catastrophe." In the meantime, Greece is to be congratulated on the fact that General Dousmanis, Chief of the General Staff, and Colonel Metaxas, his chief assistant, have been relieved of their posts. Both these officers are notoriously pro-German in their sympathies, and both have been active in opposing the interests of the Entente and forwarding those of the enemy. General Mosdhopoulos, who replaces General Dousmanis, and who was formerly in command of the Greek forces at Salonika, is well-disposed towards the Entente. But it is to be feared that his appointment was made only in the hope of forestalling demands for wider reforms of the General Staff on the part of the Entente, and that he will be unable to effect any radical change until he has the full support of a truly constitutional Government.

Such a situation lends itself readily to the spread of sensational reports, and these have been forthcoming in abundance. Yesterday, for instance, a rumour reached London from Athens to the effect that King Constantine had fled from his capital and taken refuge with a guard of Uhlans who had been waiting for him at Larissa. It is, however, contradicted by an Athens message stating that his Majesty conferred with his Minister of War and members of the General Staff at Tatoi, after he was supposed to have fled; and it would be wise to attach little credence to any reports of this character at the present time. On the other hand, there is evidence that the crisis has become more acute. M. Zaimis is reported to have tendered his resignation, and it has been decided that the elections will take place on October 8.

A statement issued by the War Office announces that the General Officer Commanding-in-Chief in Egypt reports that on Tuesday an enemy reconnoitring party, mounted on camels and numbering about one hundred, attempted to approach Bir-el-Bayud, a small oasis some fifty miles east of the Suez Canal, and not far from the northern caravan route. The skirmishers were driven off by our patrols and pursued for a distance of six miles. Apart from this incident, there is nothing of importance to chronicle regarding Egypt; and it would seem that the opinion expressed recently by General Sir Archibald Murray, "that the Turkish attacks on the Canal are at an end, or at any rate have been checked for a considerable time," is likely to be borne out by events. The War Committee has, through the Chief of the Imperial General Staff, telegraphed to General Murray an expression of their

Digitized by Google

satisfaction at the complete success of the recent operations against the Turks, and their high appreciation of his efforts and those of his troops "in particularly trying climatic conditions."

In the Caucasus and on the Turco-Persian frontier the tide has set steadily and strongly in favour of our Allies. Having been driven out of Mush, the Turks are reported to have abandoned Bitlis also, and the Russians are now so close to that city that in all probability it will be in their possession by the time these lines appear in print. Be that as it may, the Turks are falling back constantly before General Yudenitch's forces, and all their attempts to stem the tide of defeat have so far failed. At Oghnat, some forty miles north-west of Mush, an attack which they made on Tuesday was repulsed with heavy loss, and similar attacks at other points have likewise broken down, with, in nearly all cases, the loss of numerous officers and men. The report which reached us as we went to press last week is now shown to have been inaccurate in one particular: it was the 4th Turkish Division, not "four Turkish divisions," over which the Russians gained their brilliant victory. But it is confirmed that 2,300 Turks were captured, the 11th Regiment surrendering with all its officers, and the remnant of the 10th Regiment, with two staff officers, following suit.

This surrender took place at Rayat, a point near the Turco-Persian frontier, almost due east of Mosul, and by their victory our Allies seriously threatened communications between the Turkish forces still operating in Persia and those in Armenia. They have since pursued the Turks to Neri, pressing them so close and so hard that they have been throwing away their arms and munitions; while further north the enemy has been forced to withdraw to a position on the heights near the Bitlis Pass. Thus, a situation which, it may now be admitted, at one time looked distinctly unpleasant has developed satisfactorily, and the danger threatening Erzeroum has been removed. Confronted by the new enemy in the Balkans, Turkey will be unable to send further reinforcements to her eastern front, and her resistance there may, therefore, be expected to collapse entirely in the near future.

The Grand Shereef of Mecca has addressed to Moslems throughout the world a dignified proclamation stating his reasons for repudiating Turkish rule and taking steps to free Islam and its Holy Places from the fatal influence of the gang of adventurers who have usurped all authority in Constantinople. He sets forth how "ruin has overtaken the State," how "its possessions have been torn from it, and its place in the world has been lost" since the Committee of Union and Progress seized the reins of government; how he hesitated to take action until "it was open to all men to see that the rulers of Turkey were Enver Pasha, Jemal Pasha, and Talaat Bey, who were doing whatsoever they pleased;" and how these men and their assistants have affronted Islam, hanged Moslems, desecrated tombs held in peculiar veneration by all good Moslems, and actually bombarded the *Beit Allah* itself. The document is not only a damning indictment of these self-appointed leaders of the Moslem world; it unmasks also the attempt to Turkicize the Arabs, to which reference is made elsewhere in these pages; and shows that if only the Arabs will be for once united and true to themselves they have it in their power to throw off the yoke of their "Turanian" conquerors. "We have," says the Grand Shereef, "attained independence from the rest of the Ottoman Empire. . . . Our independence is complete and absolute, and will not be affected by any foreign influence or aggression. We fortify ourselves on our noble religion, which is our only guide." For their own sake, it is to be hoped that Moslems the world over will recognise the ring of truth in these declarations, and refuse hereafter to be misled by the specious talk of paid emissaries of "Young Turks," who are themselves nothing but bought tools of the Potsdam Mountebank, "Hajji" Willhelm.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, August 10.

War Anniversary Patriotic Meetings.

On Friday last, the second anniversary of the declaration of war, patriotic meetings of the British community were held in Cairo, Alexandria, and Port Said, whilst special services were conducted in the churches. The meeting in Cairo was held at the Anzac Hostel, which was crowded with members of the colony and with a good sprinkling of khaki. The chair was taken by Mr. W. E. Kingsford, the president of the Cairo Committee of the British Chamber of Commerce, who made an introductory speech explaining the purpose of the meeting. He was followed by Lord Edward Cecil, who proposed the resolution in an eloquent speech, and by Mr. A. H. Hooker, to whom, as the oldest British resident present in Cairo, fell the honour of seconding it. A concert followed the passing of the resolution.

In Alexandria the meeting was held at the Savoy Palace Hotel, where Mr. and Mrs. Harry Barker entertained the colony to tea. Mr. D. A. Cameron, the Consul-General, was in the chair, and he and Sir Ronald Graham and Sir Alexander Baird, who followed him, made most eloquent and stirring speeches in support of the resolution. The latter was proposed by Mr. Harry Barker and seconded by Mr. Percy Carver, and the meeting was brought to a close by a vote of thanks to the chairman moved by Mr. Harry Farnall in one of his usual elegant speeches. At Port Said, the meeting took place at the Casino, where Mr. A. Tweedie took the chair and Lord Radstock and the Rev. Thom were amongst those who spoke in support.

The resolution, which was identical at all three meetings, was worded as follows:—"That, on this second anniversary of a righteous war, this meeting of the British community records its inflexible determination to continue to a victorious end the struggle in maintenance of those ideals of liberty and justice which are the common and sacred cause of the Allies."

French Tribute to British Heroes.

The same afternoon there took place out at the British Military Cemetery at Alexandria a touching and significant little ceremony, when, on behalf of the French community, a deputation of French residents, headed by M. Bonzon, the Consul-General, placed wreaths on the graves of British soldiers buried there. With M. Bonzon were the Deputés de la Nation and prominent residents, some of whom had taken part in the 1870 campaign. The deputation was received by the G.O.C. Alexandria district and his staff, Lieut.-Colonel Watson (representing H.E. the High Commissioner) and Judge Halton. Stirring speeches in English were delivered by M. Bonzon and the General, and the simple ceremony then came to an end. The British colony has been deeply touched by this delicate and spontaneous tribute, which was typically Gallic; and this expression of sympathy and admiration will serve further to cement the bond that now unites the two nations through their colonies in Egypt.

The Exhibition of Egyptian Industries.

On Saturday the Exhibition of Egyptian Industries was opened to the public at the Jardin Rosette, Alexandria. The inaugural ceremony was performed by H.H. the Sultan, who was accompanied by the Sultania Princes, the Advisers, and the various Governors and Provincial Mudirs. He was received by H.E. Ismail Sidky Pasha, President of the Commission of Industry and Commerce, under the auspices of which the exhibition is being held; Mr. Sidney Wells, the Vice-President and organiser of the show; and the other members of the Commission. His Highness made a complete tour of the exhibits, and expressed himself as highly delighted with what he saw, especially with the native Mandara (saloon), which was furnished entirely with articles of Egyptian manufacture and production, and which was got together at the suggestion of Mr. Ronald Storrs, the Oriental Secretary to the Residency, who has persistently encouraged the idea of the develop-

Digitized by Google

ment of purely Egyptian industries, and who, next to the Sultan, is perhaps the greatest believer in the country in the future lying ahead of them if they are developed along the right lines. The Sultan made several purchases, amongst the articles being thirty pieces of Arabesque furniture for the Palace, some wicker baskets, and a carpet. After his departure the High Commissioner and Lady McMahon visited the exhibition, which since its opening to the public has attracted a steady stream of visitors, Egyptian as well as European. It is generally agreed that the enterprise of the Commission of Industry and Commerce is meeting with the success which it fully deserves, and that it should attain its object, which is to show local buyers what Egyptian industry is producing and in what direction developments could usefully be made. Considerations of space prevent any details of the exhibits being given in this letter.

Enemy Property in Egypt.

On Monday a very important proclamation was issued by General Sir Archibald Murray, extending and completing the measures already provided for dealing with enemy property in Egypt. The proclamation calls for a declaration of all property, real or personal, belonging to enemy persons, and creates the post of Public Custodian, who will deal with all enemy assets and property under instructions from the licensing officer. Fuller powers are conferred on the liquidators and controllers appointed to manage enemy property, and the licensing officer has power on the completion of any liquidation to order all remaining assets to be paid to or vested in the Public Custodian, and may even instruct the latter to take over from a liquidator and continue the liquidation himself. It is to be noted that the term "enemy persons," who are to make the above-mentioned declaration, is defined by the proclamation as including:—(*a*) Persons of Austro-Hungarian, Bulgarian or German nationality who at the outbreak of war resided or were carrying on business in Egypt, with the exception of persons continuing to reside freely in the country, persons carrying on business under licence, and persons whose business is being liquidated by order of the G.O.C. in C.—these exceptions not extending to cover the private property of individual partners or shareholders in such businesses who are not residing freely in Egypt; (*b*) persons resident or carrying on business in enemy territory; (*c*) persons with whom trading is, or may be, prohibited by proclamation. Two notices published with this proclamation decree, first, the appointment of Mr. B. Hornsby, Accountant-General of the National Bank of Egypt, as Public Custodian of Enemy Property in Egypt; and, secondly, that the declarations called for must be sent in to him within thirty days.

Everyone will welcome the promulgation of this proclamation, for it meets in every way the demand that adequate steps should be taken to obtain complete control of all enemy property of every description in the country, and, in addition, makes provision, as far as it is possible to do, for dealing with those people who, under one guise or another, have endeavoured to circumvent the restrictions imposed by the Allies, and to favour the interests of their enemies. This measure should have been introduced much earlier in the war, it is true, but conditions in Egypt are very different from those existing in other countries, and the authorities have only just succeeded in overcoming some of the obstacles which stood in the way of this complete control.

The Katia Victory.

The victory in the Sinai has come as a very welcome relief to all of us, for we have felt that the time had long come when steps should be taken seriously to stop the activities of the Turks in the Peninsula and their air-raids on the Canal stations. We had been led to conjecture that something out of the way was in the wind by the request made by the military authorities to the vernacular Press to send permanent representatives to the Canal zone, and by the sudden succession of *communiqués*, which, after a silence of about three months, made their appearance from the middle of July onwards, and informed us that the position in the Katia district was unchanged, but that we were keeping in contact with the enemy.

Everything points to the whole affair having been managed from start to finish in an admirable manner, and the Turks evidently walked blindly into the elaborate trap that had been prepared for them. Why they should have attacked at this particular point, and have left really strong positions for the purpose, is somewhat of a mystery. It seems highly probable that they and their German taskmasters were under the impression that the Katia district was still our weak point, and that there was a very fair chance of their being able to repeat their effort of Easter Monday last. One has a shrewd suspicion that, if it liked, our excellent Intelligence could tell its own tale of the reason the Turks were tempted to attack at what proved to be our strongest position. Be that as it may, however, all credit is due to those who carried out and participated in the affair, which in many respects is a greater victory than the battle of Serapeum and Kantara in February, 1915, and which is bound to have an excellent moral effect throughout the East, especially in Arabistan. In this respect the victory has indeed come most opportunely.

The Turkish Prisoners in Cairo.

The Turkish prisoners have all been brought up to Cairo, and during the past three days they have marched through the city to Kasr-el-Nil Barracks en route for the war prisoners' camp at Maadi. They are a heterogeneous lot, consisting in the main of Anatolians, with a sprinkling of Albanians, Greeks, Armenians, and Syrian Arabs, the latter chiefly Moslem, from Damascus, Aleppo, Palestine, Latakia, etc. For the most part they appear quite contented with their lot, many of them declaring that they all along expected to be well treated if captured by the British. Crowds of Egyptians watched their progress through the streets, and the sight of them seemed to deepen the impression which the news of the victory had had on the masses. It is rather a pity that the twenty-two Germans captured were not made to join in the procession with their machine guns. That would have constituted the final touch, and would have carried conviction to—against their wills, no doubt—and at any rate have discredited those who maintain that our report of a victory is all bluff, and that the men who have been convoyed through the streets of Cairo during the past few days are really not prisoners made as a result of the defeat of the Turks, but are either refugees or men brought up by us from the desert or from the western frontier to complete the deception which we desire to practise on the Egyptians and the Orient in general!

August 18.

The Death of the Sultana-Mother.

It is my sad duty to record the death of the Sultana-Mother, which occurred at Mamura Palace on Tuesday morning. The body was brought up to Cairo by special train, in which the Sultania Princes and the Prime Minister also travelled, and a State funeral was held here on Wednesday. The cortège started from the station and passed through the city along densely crowded streets to the Sultania burial-ground behind the citadel, where the final ceremony was quietly performed. The chief mourners were Prince Kamel-ed-Dine, the Sultan's son, Princes Ahmed Fuad and Mahmud Hamdi, his brothers, and Prince Daoud, his son-in-law, and behind the bier walked Sir Milne Cheetham, representing the High Commissioner, the Prime Minister, the Ministers, Lord Edward Cecil, the Grand Mufti, and a throng of Egyptian and foreign notables. The funeral was a most imposing spectacle, and the formalities were remarkable throughout for their simplicity. On the day of the funeral the Government offices were closed, but the Sultan has ordered that the Court is not to go into mourning. The Sultana-Mother, who was a very aged lady, and was the second wife and last surviving widow of the late Khedive Ismail, had been ailing in health for some months, and universal sympathy is felt for his Highness, whose deep affection for his mother was well known to everyone, and who never let a day pass without paying her at least one visit.

ROUMANIAN LETTER.

(From Our Own Correspondent.)
Bucharest, July 15
(Delayed in transmission).

From Roumania's Frontiers.

The Bulgarians manifestly entertain increasing apprehension with regard to any changes which might supervene in Roumanian foreign policy. The direction which a military action on the part of this country might take remains perhaps a matter of uncertainty to the Bulgars; but beyond Roumania they see Bessarabia, where a large Russian army has been marking time for many months, and this force's *raison d'être* is no longer a matter of conjecture to anyone. The Bulgarian leaders must be full of grave foreboding at the prospect of having to face a simultaneous attack from north and south, in which the initial contact at least would probably be with Russian troops. We need not wonder at their panic-stricken cry for help; for it would be of paramount importance to the Bulgars that the attacking forces should, in the first instance, at any rate, be met by German troops. To the request that at least four divisions should be sent to their support, the Huns are said to have replied by sending two brigades, one to the Macedonian front, the other to the Dobruja. But according to another version 30,000 German troops arrived at Rustchuk.

The Bulgarian frontier has long been closed to Roumanian travellers. The Roumanian Government has been obliged to retaliate; so that access to Roumanian territory is no longer open to Bulgarian subjects. These reprisals must be a source of considerable inconvenience to the Bulgarian Legation, members of which were wont to cross the frontier almost daily. Orders have since been telegraphed to the frontier points to suspend immediately all traffic with Bulgaria. Precautions have at the same time been taken to move all the Roumanian barges on the Danube down-river beyond Oltenitza and Turtucaia, where both banks are Roumanian.

Bulgarian Provocation.

Bulgarian troops have recently attempted on two occasions to make incursions into Roumanian territory. At the point known as Flamânda, near Giurgiu, there is stationed a picket of frontier guards, and Bulgarian troops occupy a corresponding point on the opposite bank. Between the two is a small island, standing in Roumanian waters, which conceals a portion of the bank from the prying gaze of the Bulgarian military. On two consecutive nights boats carrying Bulgarian soldiers, no doubt bent on espionage, have approached the island of Korea, but being discovered by the Roumanian guards were beaten off by their rifle fire. There are no casualties on the Roumanian side. It is difficult to reconcile these acts of provocation with M. Radoslavoff's assurances to the effect that the Bulgarian people are imbued with a desire to live on terms of perfect harmony with their northern neighbour.

Enormous numbers of trains are reported to be travelling from Russia towards the Bukovina, where the Russians are displaying great activity in alleviating the distress of the local populations. With this end in view the Russian Government is said to have purchased a large amount of wheat from the British Bureau.

Tsar Reviews Serbian Troops.

We hear from Galatz that the localities of Bolgrad and Kantal are occupied by two brigades of Serbian troops recently arrived from Odessa. Before their departure from the latter city they were reviewed by the Tsar, who presented them with their colours. In the course of an address he promised them that they would be the first troops to pass into Bulgaria.

A fire broke out a short while ago in the Austrian town of Itzkaru, situated on the Moldavian frontier, destroying the station as well as a number of warehouses stocked with cereals. This must prove a heavy loss to the Austrians, who, if not on the verge of starvation, yet have to submit to serious restrictions with respect to diet. The price of meat has now reached eleven crowns the kilogramme, and it is significant that the Ministry for Agriculture has issued instructions to schoolmasters recommending them to encourage the slaughter of sparrows among their pupils, "this game constituting a highly recommendable article of diet."

Hopeful Signs.

There is no doubt that up to quite recently the Roumanian Government was regarded with a measure of distrust by the Entente Powers. The fact that the great bulk of the people have been steadfastly favourable to the Allies could only be expected to modify this attitude partly. The view, however, that a change for the better has taken place in Roumania's relations with the Allied Governments has been steadily gaining ground since the first train arrived from Archangel on July 16 laden with munitions, aeroplanes, and machine guns. (The arrival of two further trains has since been announced by the papers.) This view is further supported by the evident preoccupation of the German, Austrian, Hungarian, and Bulgarian Press with regard to Roumania's attitude and their unveiled threats, the coarseness of which has created a feeling of hostile resentment in this country.

Politics at Jassy.

The fusion of the Conservative and Conservative-Democrat parties at Jassy has been accomplished—a fact which is not without weight in view of the political importance of the centre. The members of the Conservative-Democrat Club united under the presidency of M. Canano, and then called *in corpore* at the headquarters of the Conservative Club, where they were received by M. Dem. Greceano, who was proclaimed president of the united clubs.

The Weather.

For several years past I have heard Roumanians complain that the winters of bygone years are no more—winters of clear, crisp cold, with plenty of snow, and the thermometer registering anything between 20 deg. and 30 deg. Centigrade below zero. Hunters will tell you that the wine served between drives, poured, boiling, into a mug, would be cold before it reached the lips, and that the crows, killed by the cold, would fall with dismal thuds from the branches. Whatever may be the matter with modern winters, there are few complaints that the present summer does not represent the genuine article, for we are having hot weather such as few people can remember here. One day in June the mercury rose to 41 deg. C. in the shade, which is 106 deg. Fahr. A number of well-known people created an innovation by entering Capsha's in shirt-sleeves, their appearance being greeted with applause. No blame to them for disregarding the conventional, for during nearly forty years—indeed, ever since there has been a meteorological institute in the country—there has been no such heat. Fortunately, the temperature has since become reasonable and pleasant.

On Tuesday the Roumanian flag was hung from the balcony of the Liverpool Exchange news-room alongside the flags of the other Allied nations. Cheers were given for Roumania.

It was stated at the Roumanian Consulate on Tuesday that no instructions have yet been received to call up Roumanian reservists in this country. Their number is not large, and can probably be reckoned in hundreds.

THE STATE OF SYRIA.

(From a Correspondent.)

Cairo, August 8.

Cholera in N. Syria.

The capture of many Turkish prisoners in the Battle of Katia has afforded an excellent opportunity to test the accuracy of some of the reports already received about Syria, and also of getting further information of interest, partly through personal interviews and partly through diaries found on some of the prisoners. For instance, the diary of a Turkish officer, begun at the time he left Aleppo and kept up to the Katia engagement, confirms the report of the outbreak of cholera in Northern Syria, but adds the interesting fact that it was promptly stamped out in the ranks. In this diary mention is made of the large number of Armenian dead, victims of the massacre, seen on the way from Aleppo; also of the large number of desertions, to put a stop to which the military authorities are said to have resorted to the mild measure of distributing generously money (paper money, of course) among the troops. The large number of these new notes found on the prisoners confirms this officer's jotting. Another interesting fact recorded in the same diary is that Jemal Pasha reviewed the invading force at Beersheba prior to its crossing the frontier.

Many of the illiterate prisoners, questioned on the subject, declared that the total strength of the invading army was about three army corps; that the two divisions engaged in the Battle of Katia formed only the advance guard, and that a further attack was to follow; but a prisoner of the educated class, an intelligent Jew of Adrianople, who acted as chemist, and who saw fighting at the Dardanelles, states that the attacking force is not more than three divisions, and that no further action was contemplated.

The "Invasion" of Egypt.

The statements of the Arab prisoners have a special significance in that they all agree on the point that the Turks look upon all the Arabs as traitors, and treat them as such. Of the 3,000 and odd unwounded prisoners, only about 100 are Arabs, and these declare that they have been employed only on auxiliary work. They unanimously state that all the Arab troops have been disarmed and employed on trench-digging, road-making, transport, etc., and that the Arab officers have been sent away to the non-Arab provinces to do administrative work. This is the reason, these prisoners state, why it became impossible for the Arab troops to attempt a rebellion. The uprising of the Shereef made the Turks more watchful than ever, and led to stricter precautions being taken, in order to forestall any insurrectionary movement on the part of the Arabs, more especially as news of the revolt in Arabia circulated in Syria soon after its outbreak. It has, indeed, been stated that not only the news of the Shereef's rising, but also of the Allies' victories, was received in Syria, thanks to the dropping of newspapers by Allied aeroplanes.

Wholesale Hangings.

From statements made by the prisoners it would seem that the cases of hanging are much more serious than had been previously reported. A man who left Damascus only a couple of months ago states that in one place outside the city no fewer than 150 bodies were left exposed on the gibbet. Such wholesale hangings are said to have been carried out also in two other places in the neighbourhood of Damascus, which Turkish vengeance seems to have singled out from among Syrian towns. The famous tomb of the Emir Abdul Kader, the great Algerian, is said to have been destroyed; and the leading families who have any following, as well as the educated classes, seem to have been special objects of persecution, those who were not hanged being sent away to the interior—with what consequences may be guessed from the Armenian precedent. Even before the war there were evident indications of the Unionists' policy, which aimed at attracting and giving power to the rabble.

As regards the reports of famine, they are, to a great extent, confirmed. In Damascus, for example, the two okes of bread (about 5 lbs.) were being sold a month and a half ago at one Turkish dollar (a little over 3s.). There is no scarcity of grain, but the Government has taken over all the available stock. What is very alarming is that famine and cases of actual death from starvation are no longer confined to the Lebanon and neighbourhood, but now embrace the whole of Syria, including even such towns as Homs, Hama, and Damascus, which have always been regarded as the granaries of Syria. On the other hand, there is the report that the Turkish Government have lately been enrolling Lebanese, but of the southern districts only; and that they have not yet attempted conscription in the northern districts, inhabited solely by Maronites, for fear of an insurrection. But if the people there have been dying off so rapidly as repeatedly reported, how could they be expected to offer any effective resistance to organised military force?

CYPRUS NOTES.

(From Our Own Correspondent.)

Cyprus, August 7.

Passports for Egypt.

Any person who desires to proceed to Egypt must now apply for a form, which is issued by the Commissioners of districts in which the applicant resides, in order to obtain a passport or *visé*. Application must be made at least fourteen days before the date on which the person desires to leave, in order that the case may be submitted to the authorities in Egypt. New regulations with regard to passports in general are in contemplation. A very considerable number of Greek Cypriots, chiefly villagers, are waiting for their passports, and, in spite of recent warnings in the Greek papers, intend to proceed to America, as well as to other countries.

The Greek Church.

According to present information there is likely to be a division over the election of a new Archbishop. There seems, however, to be every desire on the part of leading Greeks, both clerics and laymen, that the will of the majority should prevail, and that there should be an avoidance of all risk of any such scandalous dissensions as arose out of the abortive election in 1900. A letter has been addressed "to the Orthodox Greek people of Cyprus," signed by some of the leading members of the Legislative Council and the mayors of towns, exhorting electors "in these critical times" to carry out the election in such wise that any aggravation of differences may be avoided, unity being now, if ever, essential for the progress of Hellenic ideals. The Bishop of Papho continues to administer affairs relating to the archiepiscopic office, and has had an exceedingly busy time. He hopes to be able before the election to spend a few days for relaxation at the Troöditissa Monastery, in one of the picturesque heights of the Troödos forest.

FLYING FROM SERBIA.

The following graphic incident is recounted by Professor Voyslav Yovanovitch, of the University of Belgrade, in the pamphlet "Kossovo Day (1389-1916)," issued by the Kossovo Day Committee :—

Six months ago I found myself on the Adriatic coast, after having made, like others, the painful retreat through Montenegro and Albania. For sixteen days we awaited the boat that would take us from the little port of Durazzo. Thousands of soldiers, Serbian civilians, and invalids were encamped in that region offering so little hospitality. The Austrian Fleet at the port of Cattaro now and again came out suddenly and bombarded the ports, sinking merchant vessels which were bringing us supplies and which were to convey us to Brindisi. Enemy aeroplanes visited us every day, throwing out bombs; submarines were picking their way among the minefields, and torpedoed the maritime convoys. It was imperative to leave that infernal region and escape from famine and epidemics. Finally, on January 19, we boarded a little Italian ship, without light, like thieves. It was cold and it was raining. At midnight we left in the darkness, accompanied only by the wind and the rain; we left for the unknown, saying good-bye with regret to those who remained behind asleep in their glorious eternal rest in that wild country. Three hundred refugees, officers and wounded soldiers, women and children, were packed on that open boat, creaking and tossing like a nutshell on a raging sea. All night, pressed one against the other, we trembled with the cold and anguish. Would the invisible enemy find us? We did not know. Had we some unseen friend near at hand to protect us against the Austrian pirates? That, also, we did not know. Sleep would not come, and we could see nothing in front of us, only the sparks from the funnel leaving a trail behind us. Tired and exhausted, we awaited the dawn.

And when the dawn broke through the morning mist we saw the eye which had been watching us, the invisible friend who had protected us. She was following from afar, reached us and overtook us. It was a British torpedo-boat joyously flying the Union Jack. The men of the crew greeted us with their coarse, many-coloured sailors' handkerchiefs. She ran past us twice, as if she would say, "Do not fear; Britain is here."

And those haggard faces and strained eyes which followed her, and those feeble hands which returned the greeting, were not afraid. They knew now that the British Fleet was protecting us, and they knew also that there is One who is more powerful than the British Fleet, who was also protecting us.

THE ROUMANIAN ARMY.

The following particulars are reproduced from an article, by our Bucharest Correspondent, which appeared in our issue of March 17. At the time our Correspondent rightly referred to the Roumanian Army as "the most important in South-Eastern Europe." He also explained that the facts given might be of particular value, "because most of the statements concerning the effectives of this army have been advanced without control, and some of them are very far from representing the truth."

In competent circles the value of the Roumanian troops is highly appreciated. Their endurance, courage, instruction, and spirit of discipline have been fully recognised. One need but recall the campaign of 1877 and the circumstances in which the little army of that day brought about the victory of the Russians.

ARMY CORPS.

The Roumanian army comprises five army corps, which are doubled in case of mobilisation. These are:—First at Craiova, second at Bucharest, third at Galatz, fourth at Jassy, fifth at Constantza (to which must be added the two fortified regions of Bucharest and Fokshani-Galatz).

Each army corps is composed of two divisions (two brigades of infantry, each composed of two regiments, one battalion of chasseurs, one brigade of artillery, comprising two regiments), one regiment of cavalry, one battalion engineers. In addition, special troops and auxiliaries. Divisions of reserve are also ten in number. Independent divisions of cavalry, two (a third is said to be in process of formation).

With regard to troops of the first line, the Roumanian army is organised as follows:—

INFANTRY.

Eighty regiments infantry of the line, three battalions to a regiment, four companies to a battalion, 250 men to a company.

Ten battalions of chasseurs, four companies to the battalion.

Two regiments of Graniceri (frontier guards), three battalions to the regiment.

Armament.—Roumanian Mannlicher, model 1893, calibre 6.5 mm. Machine guns, Maxims.

ARTILLERY.

Twenty-five regiments field artillery, each of six batteries (with four guns), Krupp guns of 75 mm. (1908).

One regiment horse artillery.

Five regiments light howitzers.

Three regiments heavy howitzers (150 mm., three batteries).

One regiment mountain artillery.

One regiment siege artillery, nine batteries to the regiment.

One fortress regiment at Bucharest (twelve batteries), two battalions at Fokshani (eight batteries).

CAVALRY.

Eleven regiments of lancers (Roshiori), four squadrons to the regiment.

Ten regiments of hussars (Calarashi), of five and six squadrons.

One regiment Royal Escort (three squadrons).

Each regiment has attached to it a section of Maxims.

ENGINEERS.

Five battalions pioneers.

One battalion fortress engineers.

One battalion railway engineers.

One battalion "pontonniers."

One battalion "specials" (telegraphy, aerostation, signalling, etc., etc.).

In addition, the aviation service of the army.

GENDARMERIE.

Thirty-five companies.

ARMY SERVICE CORPS.

Five groups, each of two squadrons.

All the auxiliary and transport services.

The effective force in peace time numbers 132,000 men (including 5,750 officers and auxiliaries).

With the reserves of the first line, and adding the militia, the army in time of war numbers over 650,000 men.

There are about 15,000 officers, of which number the 11,500 combatants (active and reserve) are distributed as follows:—

Infantry, 7,200; artillery, 1,900; cavalry, 1,350; engineers, 560; navy, 150; generals, 105. Non-combatants.—Surgeons and other sanitary services, 1,700; commissariat, 1,400.

THE HIGH COMMAND.

There is still a word to be said concerning the high command, which includes many officers of value and tacticians of no mean merit.

King Ferdinand is the supreme head of the army and assumes the chief command in case of war. His sound knowledge of military matters has had a favourable influence on the actual organisation of the army.

In all probability the high commands would be given, in case of war, to Generals Culcer and Yarka (at present army inspectors) and to Lieutenant-General Averescu, formerly Minister of War and Chief of the General Staff, at present commanding the First Army Corps. He is a soldier of great value, to whom important reforms are due. At the time of the Bulgarian campaign of 1913 he was Chief of the General Staff, which had its headquarters at Plevna. He has the further advantage of being one of the few ranker-generals of the Roumanian army.

Generals Coanda, Inspector of Cavalry; Georgescu, commanding the Fifth Corps (a great friend of the English); Aslan, commanding the Third Corps; Presan, commanding the Fourth Corps; and Cottescu, commanding the Second Corps, are all officers upon whose ability the nation can rely when the time comes for her to measure her strength with that of her neighbours. Among the cavalry chiefs must be mentioned Major-Generals Popovici, Bodgan, Bassarabescu, etc.

The Chief of the General Staff is Lieutenant-General Zottu, actively seconded by his subordinate, Major-General Cristescu, who enjoys a high military reputation.

To the Minister of War, M. Jean Bratiano, who is at the same time Prime Minister, aided by his general secretary, Major-General Iliescu, is due in large part the credit for having rapidly brought up the army to its present extremely efficient state.

No account of the Roumanian army would be complete without mention of M. Nico Filipescu, who, as Minister of War in the last Conservative Government, devoted remarkable skill and untiring energy to the needs of the army.

ROUMANIA'S INTERVENTION.

We reproduce below some extracts from the Press which will serve to show how hearty is the welcome accorded to our new Ally, Roumania, in this country:—

The highly important news that Roumania has at last definitely thrown in her lot with the Allies will be hailed with genuine satisfaction by every member of the League of Nations now confronting the Germanic Powers. . . . Through all these anxious two years there has been little doubt of where the sympathies of the Roumanian people lay. They are of Latin race, and they feel their affinity with the French and the Italians, while their constitutional system of Government makes them the natural Allies of Powers who are fighting for freedom, as well as for the right of the smaller nations, to a place in the sun. . . . Roumania to-day is accepting the risks and sacrifices of war on the side of the Allies to achieve natural and legitimate ambitions. She . . . has drawn her sword on the side of Great Britain, France, Russia, and Italy, and henceforth they can make no composition to which she is not a party. —*Morning Post.*

The decision of Roumania has long been expected by the Allies, and the indications that it would be made soon have been unmistakable and cumulative within the last fortnight. It is none the less welcome. All the world must recognise that in many respects it is of high importance. It adds a large force of well-trained and well-equipped soldiers, with a proud tradition to uphold, to the military strength of the Alliance, and it adds this force at a time and at a strategical point in the vast "single line" of the struggle at which the entry of this new factor into the operations promises to be particularly helpful to us, and particularly disconcerting to our enemies.—*The Times.*

We assume that the territorial questions involved have been satisfactorily regulated in advance between her and the Allies, including Russia, and that a treaty exists which will prevent any ambiguities or disappointments in the event of Allied victory. We can therefore unreservedly rejoice at the prospect of seeing this industrious and progressive Latin nation, which has given so many proofs of political capacity, entering upon a *rôle* of greatly increased power and prominence in South-Eastern Europe, and bringing under its banner the bulk of the twelve million people who speak the language inherited from Trajan's colonists.—*Daily Chronicle.*

M. Bratiano, like a wise and patriotic statesman, refused to plunge his country hurriedly into the war until his course was clear. There was never any real doubt which side he would adopt if he adopted any, but he cautiously reserved his fire until it was capable of the most decisive and instant execution. The fact that in his judgment, and in the judgment of the leaders of all parties, the moment has come to strike is not merely a military event, but a verdict on the war.—*Daily News.*

Apart from the military aid which she brings to the Entente Powers, the circumstances of her intervention will have a tremendous moral effect. It will do more than anything that has yet happened to shake the confidence of the Germans themselves, and it will probably have an even more marked influence upon at least two of Germany's allies. Bulgaria now finds herself between two fires; Turkey foresees the possible interruption of her communications with Berlin. The relatively loose connection of these two States with the Central Powers is in obvious danger of breaking, and Germany must from to-day begin to reckon upon the possibility of having to face, alone with Austria, a complete circle of foes.—*Daily Graphic.*

NEAR EAST BOOKSHELF.

ROUMANIA IRREDENTA.*

At a time when the normal ebb and flow of the Great War makes us turn our eyes eastwards again to the source of the great tidal wave of 1914, it is of more than passing interest to come across an historic work of such sterling qualities as that published by Professor Iorga, of the University of Bucharest, on the Roumanians of Transylvania and Hungary, at least four millions in number. So much has been written and discussed in recent years anent the just grievances of the Slavs and Southern Slavs within the Austro-Hungarian Empire that little attention has been paid to the equally unfortunate victims of German-Magyar oppression in the extreme east of the Hapsburg domains bounded by the Danube, the Theiss, and the Carpathians. Here, in the almost forgotten nook of a crumbling empire, lies Roumania Irredenta, just as, in that other corner of the self-same empire, the Trentino, lies Italia Irredenta. In the case of both countries, the hour has now struck for the deliverance of their oppressed brothers. Kronstadt and Hermanstadt will soon welcome the advance of the Roumanian infantry pouring through the defiles of the Carpathians, the Maras and Theiss rivers will watch the débâcle of the oppressors, and historic Segesvar and Fehervar will join in the Te Deum sung to celebrate "Roumania Liberata."

The Roumanian question within the Austro-Hungarian Empire is as old as the hills—older and, perhaps, even more intricate than the Slav question. As compared with Slavs and Hungarians, relatively speaking, new-comers along the banks of the Danube and its tributaries, the Roumanians are a far older people, descendants of the Dacians who caused such trouble to the Roman Empire and of Italian peasants and settlers who wandered from overcrowded Italy to the fertile lands of Transylvania. The Slavs, in the migratory movement of the early centuries of the Christian era, passed into and across the same territory; they were followed by the Magyars of Finnish extraction, essentially men of war and adepts in the useful art of exploiting the peaceful tillers of the soil. From now on, and with but minor exceptions, the fate of Transylvania, unhappily separated from Moldavia and Wallachia by the natural barrier of the Carpathians, is linked up with that of the Magyars, who were always quick to beseech her aid in times of distress and to bully and persecute her in their hour of prosperity.

But the picture of the country's griefs does not end here. As a result of the Crusades, a colony of Saxons migrated from the Rhine across Germany towards the East and settled in Transylvania. Precursors of the German principle of German Kultur, and backed by powerful influences in Vienna and Bavaria, these Saxon churls created a social caste in Siebenbürgen which did its utmost to keep the Roumanians in a position of social inferiority, in literal bondage, denying them not only political, but even religious rights and the right to speak their own native tongue. They (the Saxons) were to be the landowners of these usurped lands and the Roumanians the bondsmen.

Yet another movement, this time essentially religious, was to wear and tear away the vitality of the Roumanians in Austria-Hungary and thus keep them from progressing as a people. We refer to the struggle between the Church of Rome, the Greek Church, and, later, Calvinism. It was in Transylvania, a boundary district between East and West, and between the north and south of Europe, that the great waves of Catholicism and Orthodoxy sought to drown each other and forcibly to convert all who, in their estimation, were godless unbelievers. The Roumanian inhabitants of the country remained true to the old Church, and they erred in good company—namely, in that of the Slavs and of the Roumanians to the east of the Carpathians. As a matter of fact, this historic range of mountains was the natural wall against which the Catholic wave, in its easterly course, spent itself; it was driven back and foamed and whirled in the vales of Transylvania, where the serfs of the soil were oppressed and tortured by an alien Church hierarchy, whilst, to complicate matters, Calvinism sought, at first with some measure of success, to impose its sway.

Those were the darkest days of the despairing history of the native inhabitants of Transylvania, the origin of whose misfortunes is to be found in the situation of the Carpathians, cutting the land of the Roumanians into isolated halves, Moldavia and Wallachia to the east and Transylvania to the west. The first two, from their very position, were able, with varying success, to oppose the Hapsburg advance across their territory; they organised their own Church, with its Roumanian head, around whom the people gathered; and eventually they were able to acquire and assert their independence as a nation. Not so the Transylvanians. They were buffeted by their oppressors, now Hungarian, now Austrian; they were denied religious and political freedom, and it was not until the middle of the nineteenth century that they acquired an appreciable measure of each. They were pawns in the game of chess played by Vienna against Pest; they were denied a history and a past. Vague promises were showered on them when it suited the purpose of the Imperial Chancellor; a turn of the wheel of fortune, and the promises were as chaff blown before the wind. Finally, and by the compromise between Austria and Hungary, they were embodied in the Hungarian Kingdom and the period of active, unscrupulous Magyarisation of the Roumanians began, and continues down to the present day.

Through it all, and in spite of it all, that sub-conscious feeling of a people which entitles it to claim recognition as a separate entity waxed and grew. Persecution and oppression could not kill it; on the contrary, they only tended to strengthen it, contrary to the hopes entertained at Vienna and Pest, whose Imperial spokesman, Kaiser Franz-Joseph, is reported to have complained that they were "des adhérants zélés de leur religion et de leur nationalité," but not "des citoyens fidèles de l'Etat hongrois." Thus, whilst blaming them for errors which, in our eyes, constitute a virtue, he admitted that in Transylvania there existed a nationality which could, and can, have no community of interests with the heterogeneous masses of the Austro-Hungarian peoples—which is true. The inhabitants of Transylvania (with the exception of a small minority of Hungarians, Saxons, and Slavs) and a great number of those residing in the Banat turn their eyes away from the West towards the East, whence they hope that shortly an army will advance to deliver them from their oppressors. *Que Dieu le veuille!*

TANGIER TO TEHERAN.

Letters written by officers who took part in the fighting at Katia show how satisfactory the operations were from our own point of view, and at the same time give a vivid impression of the difficulties with which both sides—but especially the enemy—had to contend. One of these writers says: "Fighting is hard work here, as the heat is very great and thirst immense. The scenery consists of miles of baking desert, dotted with little isolated palm groves. . . . I walked over the battlefield yesterday. The Turks seem to have been badly caught by our artillery and retired in great haste. They seem to have suffered greatly from lack of water, as in every likely spot small holes have been dug in the ground in the vain attempt to get water. In a few cases they succeeded in getting a little brackish stuff, but most of the holes were as dry as a bone." That is a vivid little picture, which helps us to realise the conditions of the fighting fairly well. One can see the harassed, thirsty Turk or Arab scratching desperately in one of these "likely spots," possibly under fire, and then—drawing a blank. And remembering that they were pushed on to the mad venture by their German taskmasters, one can almost pity the poor wretches!

***

As a matter of fact, it is pretty clear that the writers of the letters from which I am quoting find no difficulty at all in pitying the Turks or in recognising their good qualities. For the one already quoted says: "The Turks are still fighting as fairly as ever, and some time ago, before they made a bombing raid on us, one of their 'planes dropped a message warning us to move our Red Cross Station out of the way, as they intended to bomb us." And here is a reference to the Germans' treatment of their "allies":—"The prisoners we have taken are mostly very badly clothed in nondescript uniforms, with a touch of German about them, many without any boots at all, and all very spiritless, hungry, and thirsty, armed mostly with German ammunition. From what they say their German officers treat them very badly, and in this scrap many of their officers apparently cleared off on horseback, leaving their men to manage for themselves as soon as they saw the game was up."

***

The writer of another letter mentions the interesting fact that "one of the Arab prisoners was the coachman of the German officer in command, who hurriedly retreated when he saw his men surrendering." Another item of interest in connection with the great "invasion" is that, according to

Digitized by Google

prisoners' reports, the light railway built by the Turks in Sinai was not made use of in the transport of the guns and other heavy material, carts drawn by oxen being employed for the purpose. It would be interesting to know how far this apparently somewhat ineffective light railway has been constructed, but none of the letters I have seen make any mention of the point.

***

A writer in the *Birmingham Post* remarks that "one of the minor mysteries of the war is the disappearance from sight of Abbas, late and last Khedive of Egypt," and, after paying that discredited tool of the Central Powers the compliment of a paragraph, concludes by stating that he "can scarcely have found his stay in Constantinople a pleasant one." As a matter of fact, there is no real mystery about the ex-Khedive's present whereabouts. He did not find the "climate" of Constantinople to his liking, and he is now in residence in a villa not very far from Lausanne. There, I am told, he is in regular intercourse with the so-called Nationalists (Egyptian brand), especially their leaders. Whether he still dreams dreams it is impossible to say. But if he is not being kept under careful observation I should be much surprised.

***

The report given to the *Echo de Paris* by "a high Spanish personage, just returned from Vienna," to the effect that King Ferdinand of Bulgaria recently sent his son and heir to the Austrian capital, and that Prince Boris there adopted the policy of "facing both ways," is interesting and suggestive. The Crown Prince, we are told, "adopted a very Germanophile attitude, except with a high personage of the Bourbon family, the members of which preserve their French sympathies" To this personage Prince Boris expressed himself in very Francophile terms. Of course, there is more than one explanation of this weathercock business: Prince Boris may, for instance, be heartily sick of the Germans, as a result of their conduct in Sofia, and may have been honestly glad of a chance of airing his real views. But that does not seem likely. It looks much more as if Ferdinand of Coburg, who has a keen scent for danger, was preparing for the end which is now inevitable, and, realizing that he will have to go, is endeavouring to pave the way for Prince Boris to succeed him. But the Allies are likely to have a good deal to say on that subject.

***

A correspondent sends me a cutting from the *Globe* of August 19, referring to the present activities of Lord d'Abernon as Chairman of the Central Control Board, which, as I understand, regulates the liquor traffic for the duration of the war. For a moment, I must admit, I was puzzled to know why this cutting was forwarded without any comment. Then I remembered that in former days Lord d'Abernon was known as Sir Edgar Vincent, whose work in Turkey as President of the Council of the Ottoman Public Debt, and later as Governor of the I.O.B., and in Egypt as Financial Adviser to the Egyptian Government, must be familiar to most of my readers. His lordship has always enjoyed the reputation of doing well any work he took up, and, though I cannot pretend to know just what duties he is called on to carry out in his present capacity, I feel sure he is making a success of them, and that he will perform them with tact and firmness. His experiences in Moslem lands, which are, of course, practically free from the curse of drunkenness that makes one so often blush for one's own country, should stand him in good stead, and if only he and the Control Board could make London and Glasgow (say) as sober as Constantinople and Cairo, they would deserve the thanks of all of us. But I, for one, hardly dare hope for anything of the kind.

***

Lest the foregoing paragraph may create a mistaken impression, I hasten to add that I am not a teetotaler, and that I dislike the teetotal fanatic as much as I dislike the fanatic of any other variety. But I recognize that the state of this country in regard to "the drink question" is not calculated to enhance our prestige amongst the Moslem nations. And never did I feel this more forcibly than when, one Sunday evening, I passed through London with an Arab newly arrived in the country. His surprise at the number of "drunks" he saw, and his disgust, which he was unable to conceal, at the sight of a very drunken woman being led off to the police station, left a lasting impression on my memory. My Arab, with desert-bred politeness, suggested that the "lady" was "very ill." But the experience was not calculated to make one feel proud of the civilisation of the West.

CORSAIR.

Excavation in Alexandria for the purpose of the new drainage scheme has brought to light a large and excellently constructed conduit, obviously of Roman origin, through which flows a stream of clear water. Another discovery is that of a splendidly built road, 13 ft. below the surface, paved entirely with blocks of rough marble

LETTERS TO THE EDITOR.

GORDON STREET, ALEXANDRIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In your issue of July 28 your own correspondent, writing from Cairo about the proposed memorial to Lord Kitchener, page 295, states:—

> We have no wish for a repetition of what has happened in Alexandria, where the street named after Gordon Pasha has become one of the most disreputable in the city.

I wish to draw your attention to the fact that the name of the street originally called after Gordon Pasha was changed some time ago, and the name of that eminent soldier was given to another street.—I am, etc.,

ALEXANDER GRANVILLE,
Director-General, Alexandria Municipality.

"SUPERSTITIONS" IN SYRIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In your issue of July 21 an article appeared under the title "Superstitions in Syria." The authority of your journal lends an importance to this article which otherwise it could not claim, and which, therefore, warrants the present rejoinder.

If the author had confined himself to a mere record of the various forms of superstition observable in Syria, no comment would have been called for; but when he seizes this occasion to indulge in unwarrantable generalizations and conclusions, he lays himself open to the charge of inaccuracy—to put it mildly—and, indeed, gratuitously invites ridicule.

The Syrians are known to be an eminently adaptable race, and the wholesale emigration that has been going on for the last few decades, by bringing hundreds of thousands of them into contact with the Western world, and then with their own people at home, has wrought such a revolution in their habits of thought and life as to determine, indeed, a swing of the pendulum in the opposite direction. As a matter of fact, even to a superficial observer, the reaction is apparent in the general prevalence of freethinking, with a collateral relaxation of the priestly authority, even in such districts where the priesthood, with its medieval preachings, held powerful sway. The same may be said of other adherents of the different sects, including the Druses. That a certain section—and a very small one—still entertains superstitious ideas is undoubted; but one might as well qualify the whole British nation as superstitious and ignorant because some—one may say many—still consider Friday as an unlucky day, and the number 13 as an unlucky number, or because some officers, even of the highly educated class, happen to be seen wearing talismans.

But the writer of the article does not only commit the absurdity of passing sweeping judgments on the ground of isolated individual cases, but betrays also a poor knowledge of his subject from the folklore standpoint. He says: "When muleteers are obliged to travel by night they tie bells on their animals, the noise being supposed to frighten away the evil spirits." He seems to ignore the fact that the real reason is of a more practical nature and reveals more intelligence than the "generous" writer seems disposed to credit the people with. Bells are used to serve as a warning in case of attack by brigands, who infest the wild regions sparsely inhabited, and also as a stimulant to the animals in their long and weary marches.

But even if all that the writer of the article states were true, he has surely ill-chosen the moment for giving it publicity. It is indelicate, and singularly lacking in chivalry, to pass ill-considered and offensive reflections on a people's intelligence and degree of instruction at a time with such people are traversing the most tragic crisis in their history.

Cairo, August 16, 1916. VERITAS.

A new pro-Ally Cabinet has been formed in Persia.

Under date of August 28, Reuter's Bucharest Correspondent reports:—King Ferdinand has addressed to the army the following order of the day: "Soldiers, I have summoned you to carry your standards beyond the frontier where our brothers are waiting for you impatiently and with hearts filled with hope. The memory of the Great Voivodes Michael the Brave and Stephen the Great, whose remains lie in the earth which you are going to set free, call you to victory as men worthy of the victors of Razboeni, Capugareeni, and Paehna. I have summoned you to fight side by side with the men of the great nations to which we are allied. A desperate struggle awaits you. We shall bear these hardships manfully, and with God's help victory will be ours. Show yourselves worthy of the glory of your ancestors. In the centuries to come the whole race will bless you and sing your praises."

Next Monday is the birthday of the Queen Dowager of Greece.

By command of the King, the Hon. Sir Arthur Walsh, Master of the Ceremonies, called on the Roumanian Minister to offer his Majesty's congratulations on the occasion of the King of Roumania's birthday.

Under date of August 28, Reuter's Athens correspondent reports:—King Constantine is indisposed, suffering from inflammation of his wound as the result of the last operation. A later report states that his Majesty is better and hopes to receive a deputation of the Liberal Party shortly.

The Court Circular announced on Monday that Prince Andrew of Greece had arrived at Windsor Castle, attended by Major M. Metaxas.

Prince Antoine Bibescu, of the Roumanian Legation, who arrived in London last Friday from Russia, left town for the country on Sunday.

The Hellenic Minister visited the Foreign Office on Wednesday.

M. Pashitch, the Serbian Premier, arrived in Athens from Corfu on Saturday. He will visit King Peter at Chalcis.

Lord Cromer left London for Ardgowan, Greenock, last week.

Mlle. Tatiana Lahovary has returned to Paris.

Among recent visitors to Harrogate are Major-General Sir Edmund and Lady Leach.

The Marquise de Pallavicini, who is the wife of the Austro-Hungarian Ambassador at Constantinople, is an Englishwoman by birth, says the *World*. Her four sons are all fighting in the Austrian Army, and up to the present only one, the youngest, has been even wounded. The Marquise is now back in the Turkish capital, where she used to be very popular with the British colony.

M. Michel Boerescu, of the Roumanian Legation, left London for the country last Friday.

Mirza Abdul Ghaffar Khan, Counsellor to the Persian Legation, arrived in London on Wednesday from Scotland, where he had been paying a series of visits.

M. Levitch has returned to London.

Mahomed Ali Khan Ehtesham Homayoun, First Secretary to the Persian Legation, has returned to London from Eastbourne.

M. Slavko Grouitch, the Serbian Permanent Under-Secretary for Foreign Affairs, returned to London on Monday from a brief visit to Eastbourne.

Brigadier-General Hubert Cecil Potter, who is reported wounded, saw service in the Sudan in 1908. He has risen from the rank of captain during the present war.

Mr. Evelyn Grant Duff, C.M.G., British Minister at Berne, is returning to England on September 15 for reasons of health, and will be succeeded by Sir Horace Rumbold, Bart., M.V.O.

Mr. Duff served from 1892 to 1895 at Teheran, first as third Secretary, and subsequently as second Secretary. He was in attendance on the Shah during H.M.'s visit to this country in 1902, and was Secretary to Viscount Downe's Special Garter Mission to the Shah in 1903. The same year he was promoted Secretary of Legation at Teheran, and he acted as Chargé d'Affaires there in 1904, and for over a year in 1905-1906.

Sir Horace Rumbold, also, has served in Teheran (1895-1897). He served as Attaché in Cairo, and was appointed to Athens, but did not take up the post. In 1900 he was sent to Cairo again, and in 1904 was promoted to be first Secretary. Since 1906 he has not served in the Near East.

Hunter Pasha, Director-General of the Egyptian Coastguards Administration, has arrived in England on leave.

Captain R. C. Cumberbatch, of the Rifle Brigade, B.E.F., was slightly wounded in the arm on or about August 18, and is now in hospital at Boulogne. His brother, Lieut. H. D. Cumberbatch, The Buffs, B.E.F., who was wounded and invalided home, has now recovered and has left to rejoin his battalion at the Front.

A Reuter's message from Salonika, dated August 27, reports the arrival there of Essad Pasha, the Albanian leader.

Captain H. W. Stock, who took over the post of Government Secretary, Lemnos, a short time ago, is returning to the island after a brief visit to England.

On August 19, at Territet, Switzerland, a daughter was born to Mr. G. E. Iles, of the Sudan Civil Service, and Mrs. Iles.

Yesterday, at the ancient Chapel Royal, Savoy, Captain Hugh Massie Blomfield, 1/5th Battalion The Buffs, attached Political Service, Mesopotamia, married Ida Marie, the only daughter of Mr. and Mrs. Sydney Chancellor, of Overstrand, Bognor. The bridegroom is the only surviving son of Rear Admiral Sir R. Massie, late Controller-General of Egyptian Ports and Lighthouses, and Lady Blomfield, their two other sons having been killed in the war. The bride entered the church leaning on the arm of her father, who afterwards gave her away. The bridegroom was in khaki.

The best man was Mr. Harold Holding. The ceremony was performed by the Rev. Hugh B. Chapman (Chaplain of the Chapel Royal), assisted by the Rev. Miller Haggerty. The service was a choral one, with Mr. Colin Campbell at the organ, Dr. Bromley Derry being on war service. The hymns "Lead Us, Heavenly Father," "O Perfect Love," the 67th Psalm, and Handel's "Angels Ever Bright and Fair" were all excellently rendered by the choir.

The wedding was a very quiet one. Among those present were Mr. Charles L. Graves, Mr. Gerald Graves, Mrs. Johnson, Mrs. Alexander, Mrs. Noel Smith, Miss Germains, Miss Fothergill, and Mr. F. G. Chancellor and a group of wounded soldiers from the bridegroom's regiment. The Corps of Girl Guides (of which Lady Massie Blomfield is one of the London Commissioners) furnished a guard of honour, and strewed red, white, and blue flowers in the path of the happy couple as they left the church. After the ceremony there was a reception at the Hotel Russell.

The marriage between Mr. William S. Edmonds, Levant Consular Service, son of Mr. and Mrs. Charles Edmonds, Lymington, Hants, and Miss A. Lindo Johnson, daughter of Mr. and Mrs. E. Johnson, of "The Mount," Seaton, Devon, will take place in October at Alexandria.

Dr. Walter Leaf, who is one of the members of the committee appointed to inquire into the position of modern languages in the system of education in Great Britain, is a former president of the Hellenic Society and a well-known writer on Hellenic subjects. He has also translated "A Modern Priestess of Isis" from the Russian, and is the author of "Versions from Hafiz, an Essay in Persian Metre."

At the last American Zionist Congress, held at Philadelphia in the first week of last month, one of the resolutions passed was as follows:—"The Congress expresses its profound thanks to Mr. William C. Hornblower, of the Egyptian Ministry of the Interior, and Administrator of the Refugees Department, for the eminent services rendered by him to the unfortunate victims of the war, residents in Syria and Palestine, who fled for refuge to Egyptian soil."

Although all the decorations and medals belonging to Lord Kitchener were lost when he perished in H.M.S. "Hampshire," on June 5, off the Orkneys, the Field-Marshal's baton presented to him by King Edward VII. remains as a relic. It has recently been deposited with the Royal United Service Institution for exhibition in the museum at Whitehall.

The estate of the late Mr. Stanley Dorling, of Henrietta House, Henrietta Street, Cavendish Square, W., formerly of Croydon and Alexandria, engineer and contractor, has been proved at £12,575.

APPOINTMENTS, PROMOTIONS, ETC.

M. Ventila Bratiano, the brother of the Roumanian Premier, has been appointed Minister of War, the Premier himself remaining at the head of the Government without portfolio.

It is understood (says the *Egyptian Gazette*) that Judge Halton, of the Mixed Court of Appeal, will be appointed Vice President of the Native Appeal Court, instead of Judge Bond, who retired recently from the Egyptian Government service.

The Ministry of Public Works in Egypt has announced the following promotions and transfers consequent upon the retirement of Mr. Williams, Inspector-General of Irrigation:—Mr. A. P. Tottenham, Inspector-General of Irrigation, Lower Egypt, succeeds Mr. Williams and is in turn succeeded by Mr. Adamson, Inspector, 1st Circle of Irrigation; Mr. Boxwell, Inspector, 4th Circle of Irrigation, transferred to the 1st Circle; Mr. O'Sullivan, Inspector, Zifta Circle, to the 4th Circle; Mr. de Smith, Director, Delta Barrage, to the Zifta Circle; and Mr. Parker, Inspector, Dongola Irrigation Works, to the 3rd Circle. Mr. Roberts, Director of Works, Assiut Barrage, to be Director, Delta Barrage.

The Sultan of Egypt has conferred the 3rd class of the Order of the Nile on Miralai R. G. Anderson Bey, Assistant Adjutant-General, Recruiting. The 4th class of the same Order has been conferred on the following:—Kaimakams P. B. Stafford Bey, officer commanding 2nd Battalion; P.C. Joyce Bey, officer commanding 3rd Battalion; F.W.L. Edwards Bey, Assistant Adjutant-General and Aide-de-Camp to the Sirdar; H.S. Wilson Bey, Assistant Director of Stores; and E. Gibbon Bey, M.B., Senior Medical Officer, Cairo District; Bimbashis A.C. Hewitt, 12th Sudanese; the Hon. B. A. Forbes, Deputy Assistant Quartermaster-General; C.C. Godwin, General Staff Officer (III.); F. Ferguson, Director of Music; G.F. Mishalany Bey, Department of Stores; and Mr. C. Wiseman Bey, Department of Ordnance.

Our Cyprus Correspondent writes (August 7):—

Fuad Bey, Turkish Judge at Limassol, has been appointed to fill the vacancy caused by the death of the judge at Nicosia. Fuad Bey, who, before his appointment to the bench, was for some time in the police, is an excellent English scholar, speaking our language like an Englishman.

Khalid Bey, Turkish Judge at Papho, has been appointed to Limassol.

OBITUARY.

THE LATE DR. BLISS.

As briefly announced last week, the death has taken place, at the age of 92, of the Rev. Daniel Bliss, D.D., the venerable ex-president of the famous American College of Beyrout.

Dr. Bliss was the last surviving member of the American Mission which arrived in Syria in the middle of the last century and which played a leading part in the moral and intellectual development of the Syrians. He landed at Beyrout with his wife by sailing vessel in 1855. A few years afterwards he returned to the United States with the object of raising funds for the establishment of a college in Beyrout, as he found from his few years' experience in Syria that the country was in more need of such an institution than anything else. His efforts in this direction were crowned with success, and he was greatly assisted by some members of the wealthy Dodge family of New York, who played a leading part later in the advancement of the college. Subscriptions were collected and invested in securities of the Northern States while the Civil War was in progress. The final success of the Northern States increased the value of these securities, and Dr. Bliss found at his disposal a fairly large sum with which to start his institution. In 1866 he bought a large plot of land at Ras Beyrout, facing the sea, and subsequently added to it other plots in the vicinity. He established a Preparatory School, a Collegiate Department, and a School of Medicine and Pharmacy, and in 1900 a School of Commerce was added. A few years ago a branch of dentistry was also established. Dr. Daniel Bliss continued to preside over the faculty of the College until 1902, when he retired on account of old age, and was succeeded by his son, Dr. Howard Bliss.

The students of the American College numbered about 1,000 before the war. It was the intention, had the war not broken out, to add branches of law and engineering, and to call the institution a University.

"C. N. T." writes from Cairo:—One of the few pioneers in the missionary field in Syria, Dr. Daniel Bliss left his country on August 13, 1855, on board a sailing ship, and arrived in Syria in the following year to lay in Beyrout the modest foundations of the S.P.C. In less than three decades the small school became the leading educational institution on the eastern shores of the Mediterranean. Not only has the college been the medium for the wide diffusion of modern culture and the raising of the educational standard in Syria, but its rapid and signal success has contributed to the creation of such a healthy rivalry among the French missionaries working in the educational field there as to make of Beyrout an Eastern Athens. The S.P.C. is now represented by an imposing group of buildings on a high hill overlooking the sea, veritable monuments of moral might, above which will ever loom the venerable and powerful figure of Bliss. He was one of the privileged specimens of humanity, combining nobility of looks with nobility of character. His movements were majestic and measured, and his words were brief and always to the point. His eldest son, the well-known writer, Dr. Frederick Jones Bliss, once made the remark, "The governor is like Nature; his work is silent, but mighty." Few men have seen their work blessed in such full measure. When the burden of time weighted his hand he passed the heritage of a lifetime of labour in its full fruition to his son, Dr. Howard Bliss, than whom no fitter successor could be found. A brilliant orator, armed with the new weapons of modern culture and the boundless energy of that vigorous race of the New World, he was eminently fitted to carry on the work left by the father under the new and singularly exacting conditions of modern educational endeavour. The pang of sorrow that every child of this great and cherished alma mater must feel at the passing away of the beloved patriarchal figure is tempered by the consciousness that his great and loving spirit endures through the son. May his life be as long and as full of rich fruits for the great good of Syria and the glory of the Christian ideal!

The death from typhoid of Mr. C. W. Olphert, which occurred in the Anglo-American Hospital, Cairo, recently, robs the Ministry of the Interior of one of its most promising and efficient inspectors, says the *Egyptian Mail*. First at Kena and Assuan, and more recently in the Behera, Mr. Olphert proved himself a capable official; he always made it his business to know his province and its officials well, and his death has been the cause of deep sorrow to Europeans and natives alike. His Highness the Sultan showed his appreciation of Mr. Olphert's services by sending one of his chamberlains from Alexandria to represent him at the funeral.

We regret to announce the death, which occurred suddenly on Saturday last, of Mrs. Marshall, widow of the late Mr. George Bishop Marshall, formerly of Constantinople. Deceased was in her 69th year.

Lieutenant-Colonel James Atkinson Longridge, who is reported killed in action, took part in the operations in Somaliland in 1903-1904, acting as transport officer to the First Brigade. He was present at the action at Jidballi, and was mentioned in despatches in September, 1904, receiving the medal with two clasps. He was promoted brevet lieutenant-colonel on the Staff in July of last year, and was made a Companion of the Order of St. Michael and St. George on the occasion of the King's Birthday in June of this year.

Captain William Jardine Maxwell, Cameron Highlanders, attached Egyptian Army, who died on August 26, was the eldest son of Mr. and Mrs. Herries Maxwell, of Munches, Dalbeattie. He was born in June, 1882, and entered the Cameron Highlanders in August, 1904. Promoted in March, 1910, he was appointed for employment with the Egyptian Army in August, 1914, and received his captaincy in the following October.

It is announced that Brigadier-General A. Stewart Buckle, R.A., died on August 18 from cerebral meningitis. Born in 1868, he joined the R.A. in 1888, and ten years later took part in the Nile Expedition, being present at the battle of Omdurman. He also served in the South African War, when he was twice mentioned in despatches, and received the Queen's Medal, with three clasps, and the King's Medal, with two clasps. For his services in the Sudan he received the Queen's and the Khedive's medals.

The death has occurred at Lichfield of Colonel R. B. Riland Bedford, at the age of eighty-six. He was the son of the late Rev. W. R. Bedford, of the Rectory, Sutton Coldfield, Warwickshire. He was invalided home from the Crimea.

M. Michel Theotokis, President of the Greek Chamber, has died at Corfu.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

SMITH.—On August 11, in Cairo, the wife of Major Leonard Kirke Smith, D.S.O., The Royal Scots—of a son.
