Sir Edward Carson was sombrely powerful; he is still opposed to Home Rule, but Ulster will do her best to make a Parliament she does not want a success; Mr. Devlin, one of the few Nationalists left in the House, was extraordinarily witty, and his description of Lord Robert Cecil as a man "with one foot in the Middle Ages and the other in the League of Nations" will long be remembered. The Prime Minister was buoyant, pernaps a shade too buoyant, for so serious a subject the approaching holidays and the certainty of a large majority for the second reading seemed a little to affect his manner.

The division was as paradoxical as anything Irish has ever been. The minority—less than a hundred all told—was made up of Labour and Independent Liberals; the majority of Coalition Liberals and—Unionists! The Ulstermen abstained. Not a single Irish vote was cast in favour of an Irish Home Rule Bill.

It is improbable that many alterations will be made in Committee. Some of the Independent Liberals, who can still never forgive Ulster for killing Mr. Asquith's 1914 Bill, are agitating for the inclusion of Ulster in a single Irish Parliament; but these people seem nowadays to have imitated the Bourbons in their refusal to learn from experience, and the suggestion is quite hopeless. Whether the Bill will work when passed is another matter. The prediction has already been made that Ulster, which does not want a Parliament, will make a success of her legislation; while Southern Ireland, which does want a Parliament, will refuse to work the system. If that were so, it would add another tragical paradox to the Irish question, but we need not assume that matters will be pushed so far as that until there is proof.

The Revenue.

When Parliament reassembles after Easter the first important business will be the Budget. The revenue has surpassed all expectations, and some items—particularly Stamp Duties, the results of business activity and transfer of property—have surpassed all expectation. But so also has expenditure, and we are likely to hear much criticism of the Government for not having made further reductions. Unfortunately for the consistency of the critics, those who are loudest in condemning the extravagance of the Treasury are precisely those who are foremost in pressing claims for increased expenditure.

Rising Rates.

Many years ago Mr. Sidney Webb predicted the day would come when rates would rise to the figure of twenty shillings in the pound. The prophecy was laughed at, but it has come true in one quarter of London. Poplar now levies a quarterly rate of five shillings in the pound. A tabulated statement published this week shows that in the fourteen London boroughs where Labour is in a majority the rates have risen on an average by eighteenpence in the pound, as compared with an average increase of a shilling in the pound in boroughs which prefer what is called the Municipal Reform party. At the same time, it must be remembered that in the boroughs where Labour rules the ratable value is usually lower than elsewhere, and therefore the rates are to that extent higher.

Higher Tram Fares.

There was some disquietude at the threat of a tram and omnibus strike at Easter; but the concession of a five-shilling a week increase restored peace, or at least the appearance of it. As both trams and omnibuse are already run at a loss, this additional increase necessarily means higher fares all round, which again means an increase in the cost of living, and a further demand for more wages—in other words, the Labour dog is again trying to catch his own tail, while the middle-class dog has lost his tail altogether. The process, however, is nowhere near the end, for the increase in the price of bread, which becomes due in a few days, will precipitate a fresh series of crises.

The Anti-Tobacco-nist.

An obscure organisation called the British Anti-Tobacco League, which has apparently nothing to do with the Smoke Abatement Society, has published some figures as to our consumption of what Mr. Weller called "the flagrant weed." It appears that in the United Kingdom we consume 172,256,000 lb. a year, at an expenditure of £3 17s. 6d. per head; and it is stated that out of an income of £4 15s. a week the average man spends 5s. 11d. on tobacco and 13s. 7d. on drink, or nearly 20 per cent. of his income.

But these kind of deductions are usually futile. One man smokes 4s. cigars, and runs up the average; another smokes two or three pipes a day, and even in these times a good pipeful of tobacco only costs about a penny. The cigarette-smoker should be ignored in these calculations. What he smokes is paper and hope—the hope deferred of finding some tobacco in his cigarette.

There is an American society which is agitating in the United States for the abolition of tobacco, and another for abolishing tea and coffee. I do not think this form of anti-liberty league is likely to make much progress in this country; the "Pussyfoot" people have made little headway in their campaign against alcohol, and evidence is accumulating that even in America, where they are more tolerant of intolerance than we are, prohibition has merely forced up the cost of drinking, and done little to reduce the amount. But if these prohibition societies continue to propagate, somebody will have to start a new "Life and Liberty" movement for the ordinary citizen.

The Criminal Insanity Problem.

The murderer Holt, a man who shot his mistress last Christmas, is to be executed in a few days. The case is of no particular public interest, apart from Sir Marshall Hall's gallant attempt on the prisoner's behalf to obtain in the Court of Criminal Appeal a revision of the law

relating to the responsibility of criminal insane persons. The murderer persuaded the woman to insure her life for a large sum, and to make a will in his favour; a few days later he took her life. The plan and its execution are to the ordinary man evidence of deliberate planning which, however immoral, are not necessarily insanity; but the prisoner's counsel raised the point that Holt had suffered from venereal disease, which frequently leads to insanity. In this particular case certain medical evidence was called, but it did not appear to be conclusive, and the plea was put forward that the insanity suddenly became active on the day of the murder. In that event it is, of course, difficult to bring the previous preparations within the category of insanity, and the Court dismissed the plea. There was no public sympathy with the criminal.

Government Changes.

The Cabinet changes have disappointed the party critics, who wanted wholesale reconstruction as a tacit admission that the Ministry found itself in difficulties, and a whole series of by-elections as an opportunity of snatching one or two seats. There will only be one by-election, caused by Sir Hamar Greenwood succeeding Mr. Ian Macpherson as Irish Secretary, and this seat is by general admission impregnable.

Sir Hamar Greenwood's promotion has been very rapid. He has not been in the House ten years, and has only been a minor member of the Ministry for a year, but now he is promoted to one of its most important posts. He is a Canadian with courage and confidence, and a good companion; he is generally popular except among those who envy his success. As he is a barrister by profession, the campaign against lawyer-politicians does not seem to have proved very successful.

Sir L. Worthington-Evans, who becomes Minister without portfolio—an innovation that appears likely to become permanent—is also a lawyer, but of the other branch of the profession. He is sound rather than brilliant, one of those men who never advertise, but whom everybody trusts and who slowly builds up a great reputation. He is still in the early fifties, and by the time he is sixty he will certainly be in the House of Lords. Even his political opponents find it difficult to say anything against him.

An Easter Disappointment.

Easter as a whole was a disappointment to the holiday-makers, and a typical example of the uncertainty of our climate. After a marvellously mild winter, March was as warm and sunny as the average June, and everybody arranged to go away to the seaside. The Monday, Tuesday, and Wednesday before Easter were gloriously hot, and the weather looked settled for months, but Thursday was cold and cloudy, on Good Friday it rained, and Saturday brought hail, snow, thunder and lightning. Those spiritualists who have recently revived the theory of demoniacal possession should turn their attention to the Clerk of the Weather as a possible example of their hypothesis.

County Cricket.

The arrangements for the county cricket season, which starts on the first of May, are now complete. Last summer was practically a "trial over," and it was not very satisfactory, the two-day matches in particular proving an unfortunate innovation. Those who desired to hustle cricket are now convinced they were wrong, and we are to return to the three-day system, and more or less to the old method of scoring. Matches will, however, begin on Saturdays and Wednesdays, instead of Mondays and Thursdays, on account of the gate-money—a very necessary consideration in these days of high expenses. Most of the county clubs are financed on a very small basis.

It is difficult to say anything about the prospects of the play. Surrey, as champions, have apparently much the same team, but there is some difficulty about their amateurs playing regularly—in fact, there are very few amateurs who can now afford to play right through a season. The same difficulty faces most of the clubs. Yorkshire, who have never quite recovered their old form in the great days of Lord Hawke, twenty years ago, are understood to have made great preparations to regain the championship, but they are not the irresistible side they were. Sussex are the most ambitious, being the only county which has arranged out-and-home matches with all the other first-class counties and the two Universities—a very full calendar which will keep them continuously occupied from May till September.

The latter team intend to spread their matches. In the old days Brighton was the scene of most of their home engagements; this year they will play at Hastings, Eastbourne, and elsewhere. This is a sound method, as it spreads an interest in the doings of a county; but the Hastings ground, which many remember on account of the September week, with its North v. South fixture, is not always popular; and the Saffrons at Eastbourne, one of the most beautiful playing fields in the country, is a little difficult. It is inalienably associated in my mind with a match in which I saw a hit for eight run out, and four successive sixes in an over, one of which smashed a pile of plates in the Pavilion with a resounding smash.

Books of the Week.

At Easter the publishers refrain from inflicting new books on a long-suffering world, the heavier shelves at the booksellers are deserted, and the novelist comes into his own. The holiday-maker cannot do much better than put "Tatterdemalion" (Heinemann), Mrs. Galsworthy's collection of short stories, into his portmanteau, but in case he wants an alternative, "The Banner," by Hugh F. Spender (Collins) will appeal to those who like a political tone in their literary diet.

Mr. Spender made his mark in 1916 with a first novel called "The Machine," in which the business of party politics was faithfully exposed; he has improved since then, and is now rapidly coming to the front. The brother of the editor of the *Westminster Gazette*, and also of Mr. Harold Spender, who has just produced an ecstatic life of the Prime Minister, Mr. Hugh Spender evidently has writing in the blood. He has long been overshadowed by his better-known brothers, but it looks as though he would soon overshadow them.

The next two months will be a busy season in the literary world. The "Life of Kitchener" will be published in a few days; Von Kluck's "March on Paris and the Battle of the Marne" is promised; General Dunsterville's account of the "Hush, Hush Army," which occupied Baku, is announced under the title of "The Adventures of Dunsterforce." The "Life of General Maude" will shortly be ready, as will also General Willcocks's story of "The Indians in France."

Of more distinctly literary interest will be "Letters of Travel," a new Kipling book; and Mr. Percy Lubbock's "Letters of Henry James," which, with a new and complete edition of his novels which is advertised for this spring, will appeal to the select circle of readers who admire that difficult author. Personally, I am in the unhappy position of the man who said about Meredith, "If I could read him I would read him, but as I can't read him I don't read him."

OCELLUS.

DEVELOPMENT OF PALESTINE.

The London Zionist Organisation has received the following cablegram from Jerusalem:—Mr. Herbert Samuel has concluded his mission here, and has left for England. He has issued a statement in which he says: "The financial position is satisfactory. The economic development of Palestine depends on the solution of the political status of the country and the co-operation of all sections of the population. There are great possibilities for development, as at present the country is largely uncultivated and underpopulated. Hostility to Zionism is not deep, and is based on false ideas. There is ample room for a larger population, and the immigrants will be of the industrious and progressive type found in the Jewish colonies which have enriched the country. Zionism must recognise that the Mohammedans and the Christians are an integral and permanent element of Palestine."

LOST CORRESPONDENCE.

A number of letters which reached THE NEAR EAST offices on April 3, 5 and 6 were subsequently stolen. Correspondents whose communications ought to have reached THE NEAR EAST on one or other of these dates are asked to be kind enough to write again.

EGYPT.

CAIRO, March 15.

Judicial Reforms.

In connection with the scheme recently published here for the re-organisation of the Mixed Courts, my attention has been drawn to a communication made to the *Manchester Guardian* by its special correspondent recently in Egypt. This statement is in reference to the new Penal Code prepared for the Natives' Courts, and it gives a wholly inaccurate and regrettably misleading account of the manner in which that Code was drafted and presented to the community. The article in describing the procedure followed gives the impression that the Code was drafted by two or three Englishmen without consultation with qualified Egyptians or Europeans, and that in its final form it was thrown as an accomplished fact at the community at an informal meeting of a literary society. As a matter of fact, the very greatest care was taken in connection with the elaboration of this Code to obtain the collaboration of the highest Egyptian and European jurists in this country. It was studied by a special committee which submitted its views to the Capitulations Commission on which the present Prime Minister, himself an eminent judge, Adly Yeghen Pasha, the Minister of Education, Abdel Khalek Sarwat Pasha, the late Minister of Justice, Mr. Laloe, the Vice-President of the Mixed Court of Appeal, a French lawyer of high repute, Mr. Piola Caselli, one of the Sultania Counsellors, an eminent Italian jurist, among others had a seat, and after the general principles had been laid down it was referred for drafting to a sub-committee composed of Sarwat Pasha, Sir William Brunyate, Mr. Laloe and Judge Percival, who reported to the Capitulations Commission. The printed draft was then circulated broadcast with a request for criticism, and in order to give it further publicity, and obtain the views of the community, arrangements were made with one of the leading intellectual societies, the "Société Sultanieh d'Economie Politique, de Statistique et de Legislation," to which all the local experts belong, for the holding of conferences at which Judge Percival and one of his colleagues gave a very full explanation of the proposed Code and called for the presentation of criticisms for discussion at subsequent public meetings. These discussions would have taken place but for the outbreak of the troubles last spring, which caused the postponement of all reconstruction work.

The true facts of this case therefore show that far from wishing to thrust down the throat of the community a Code elaborated by British lawyers, those responsible for the judicial reorganisation took care to draft it in consultation with Egyptian and European experts and to call for the observations and criticism of the community itself. I call attention to this question because it is but one instance of many, where in order to bolster up their cause and arouse sympathy outside their country the extremists have gone out of their way wilfully and intentionally to mis-state facts. It is only regrettable that the representative of a usually well-informed British journal should have lent himself to the publication of such a glaring inaccuracy, and it only shows how careful special correspondents visiting a new country should be in accepting statements from one side without first ascertaining the accuracy of those statements, and what the other side of the case may be.

Russian Refugees in Egypt.

Several thousands of Russian refugees have during the past few weeks been landed in Egypt from Odessa. These wretched people have arrived here without any possessions, and in a deplorable mental and physical condition, as a result of the hardships and terrible experiences they have had to undergo at the hands of the Bolshevists. An international committee has been formed, with the object of providing for these unfortunate people, under the presidency of the Russian Minister, Mr. Alexis Smyrnow, and at its first meeting it was announced that His Highness the Sultan had generously opened the subscription list with the donation of a sum of £E500, and that the British Red Cross had contributed a like amount.

TURKEY.

CONSTANTINOPLE, March 9.

The Ministerial Crisis.

The Ministerial crisis mentioned in my last letter was solved by the nomination of Salih Pasha, who had been Minister of Marine in the former administration. While it is true that the final result of the crisis was the maintenance of the Nationalists in power, that result may nevertheless be described as a decided check to Nationalist schemes. Ali Riza Pasha's Cabinet had always been regarded as a stop-gap until the time was ripe for the formation of a Cabinet which would be more "in harmony with national aspirations," as the Unionist Press put it, and it was an open secret that it was intended that such an administration would be under the Grand Vizierate of Izzet Pasha, whether the Sultan liked it or not. Not only was the Sultan able to maintain his attitude with regard to the obnoxious Marshall, but it has since transpired that the first list of Ministers submitted by Salih Pasha was not accepted by his Majesty, and the Nationalists can claim no greater satisfaction than that of having prevented the nomination of Damad Ferid Pasha. Even that satisfaction they seem to have owed to Damad Ferid Pasha himself, for he was indeed offered the Grand Vizierate, but refused except upon condition that he was invested with powers that amounted to a dictatorship with power to suppress the Chamber, and with permission to request the military aid of the Allied Powers for the purpose of dispersing the National Forces by force. For reasons which may not be difficult to guess, his Majesty preferred to follow the line of least resistance, and nominated Salih Pasha, whose Cabinet, as finally constituted, only differs from the former by the exclusion of Ali Riza Pasha, so far as the most important offices are concerned. Nevertheless, according to the latest information, the Nationalist majority in the Chamber has decided to refuse the new Cabinet a vote of confidence, and a further crisis is expected within a week or so. This is, however, by no means certain, for the Nationalists betrayed a consciousness of the weakness of their position last week, when the possibility of Damad Ferid Pasha's becoming Grand Vizier aroused such apprehension that a number of them promptly went into hiding.

It now appears that one of the principal reasons for the resignation of Ali Riza Pasha was an Allied Note to the effect that the Nationalists in the Bozdagh area were to be ordered to retire in order that the Hellenic forces might occupy the district in question, which, be it noted, lies within the area assigned to the Hellenes by General Milne's Mission, and which had never been evacuated by the National Forces. The National Forces refused point blank to obey any such order, and the Hellenes, therefore, occupied the district by force, which event made Ali Riza Pasha's position untenable.

The Censorship.

"C'est un pays de Cocaigne," remarked a French friend of mine with regard to Turkey, and certainly there is nothing more absurd and futile than the Press censorship that is maintained at present in Constantinople. Extracts from the Turkish Press are censored when they appear in the form of a translation in the non-Moslem papers; official announcements from the Press Bureau are sometimes entirely suppressed; paragraphs that appear one day are not allowed to be quoted the next day by another paper; and leading articles are mutilated in a manner that is utterly senseless. For all the time provincial papers published by the Nationalists and teeming with lies arrive in regular shoals from Anatolia, where Mustapha Kemal reigns supreme. European papers also arrive regularly, and may be read in any club, or purchased at any bookstall. Worst, and absurdest of all, Nationalist fly-sheets reproduced by

Digitized by Google

duplicator machines, and containing the wildest fictions, mostly of a violently anti-British nature, are being circulated in thousands in Stamboul. The censors themselves are unable to say exactly what reasons exist for their activity, but it is certain that the censorship, as it functions at present, is of material assistance to the Nationalist agitators, and is far more of a nuisance than it is worth. Further, it is being manipulated for the purposes of certain intriguing elements who are none too scrupulous as to the means by which they seek to obtain certain advantages.

Where matters of public security are concerned, or military necessity, censorship is necessary and inevitable, but in Constantinople to-day that institution has become the instrument of unjustifiable and capricious interference with the legitimate rights of reasonable expressions of opinion. Somebody once said that Gilbert and Sullivan missed a great opportunity when they neglected to include Turkey as a background for one of their operas, but they could never have conceived anything so ridiculous as the Inter-Allied Censorship.

The Peace Treaty.

The news of recent developments of English public opinion have caused something like consternation in official circles among the Turks who have not lost all sense of the realities of the situation, but among the Nationalists the result has been merely to intensify the bitter animosity that already existed towards the British. There is not the slightest doubt that popular fanaticism has been fanned up to a point when very little more would cause it to burst into flame, as has already occurred at Marash and elsewhere. It is also certain that even if the Turkish Government is forced to sign the Treaty, it will not be ratified by the Chamber, and that careful plans have been made to resist the execution of the conditions of peace. Unless the conditions coincide with those defined by the Nationalists, which I outlined in a previous letter, the Peace Treaty will not be imposed except by force. It is an utter illusion to suppose that the Young Turks differ in this respect from their Hun tutors.

Mandates.

At one time the subject of mandates was a favourite theme for speculation, but of late very little mention has been made of the matter. The opinion seems to be gaining ground, not without a certain amount of reason, that the mandates scheme suits nobody's book, for the mandatory power would be put to considerable trouble and expense, but would not have any special privileges. Hence it is believed that there is a tendency in certain quarters to relinquish the idea of a mandate in favour of obtaining special privileges of exploitation within a certain area. There may be something in the idea, and in any case it may afford a clue to certain developments of policy otherwise inexplicable.

CONSTANTINOPLE, March 15.

Salih Pasha's Cabinet.

It was not until the middle of last week that Salih Pasha succeeded in organising a Cabinet, which, however, is even now incomplete, for the new Grand Vizier himself continues to direct the Ministry of Marine. Although the new Ministry has not yet appeared before Parliament, it has been rumoured that Salih Pasha has tendered his resignation, but that the Sultan refused to accept it. These rumours were probably based upon the attitude of the Nationalist party, the Felah-i-Vatan, the Saviours of the Country, which was at first favourable to Salih Pasha, but afterwards changed its attitude on account of the exclusion of Nationalist deputies from the new Cabinet. It would seem that the Nationalists demanded that the Cabinet should include at least four of their number, one of whom was Jami Bey, member for Aidin, and founder of the Smyrna branch of the Nationalist Association. Salih Pasha was unable to agree to this demand, probably on account of objections raised by the Sultan, and the Nationalists raised the question of refusing a vote of confidence, but have been unable to come to any decision upon the subject. This hesitation is largely due to the strengthening of European public opinion against the Turks on account of the Marash massacres, one of the principal causes of which was undoubtedly the Nationalist policy of appealing to the religious sentiments of the Anatolian Moslems in order to obtain their support for the National Forces. Further, the arrival of the Atlantic Squadron, the advance of the Greeks, together with rumours of the approaching arrival of more Allied troops in Constantinople, have given rise to fears of drastic action on the part of the Allies, and the advent of Damad Ferid Pasha to power. It is common knowledge that in the latter eventuality there would be very severe measures taken to suppress the Nationalists. Hence, although a number of "die-hards" insist that a Nationalist Cabinet must be formed at all costs, in accordance with the original scheme, a small majority appear to be in favour of maintaining Salih Pasha as a screen for the continuance of the Nationalist activities. On the whole, if the Cabinet lasts long enough to appear before Parliament, it appears probable that it will receive a vote of confidence, but it is far too weak to last very long, at all events in its present form. While none of its members are seriously compromised with the Nationalists of Anatolia, none of them can be accused of any hostility towards the Nationalist movement. Hence, with the possible exception of the Sheikh-ul-Islam, whose silence on the subject of Bolshevism is not without significance, the new Cabinet consists of neutral politicians admirably adapted to the convenience of Mustapha Kemal and Co., but who must inevitably be crushed between the upper and nether mill-stones of Allied pressure and Nationalist resistance.

Parliament.

The deputies who are supposed to represent the Turkish nation seem to pass most of their time in holding secret meetings, and when there is an open sitting of the Chamber it is not always easy to obtain an accurate account of what takes place, because the Inter-Allied censorship seems to think that if the account were published in the Press, there would be a pan-Islamic riot, a Bolshevist rising in Pera, perhaps an epidemic of cholera, or something equally serious. Nevertheless, the deputies themselves are not unwilling to talk, and it is thus possible to obtain the information denied to the general public. At a recent sitting of Parliament, for instance, Raouf Bey, who is member for Sivas, made an interesting speech with regard to the districts of Kars, Ardahan, and Batum. Raouf Bey reminded the assembly that, in accordance with the Treaty of Brest-Litovsk, a plebiscite was held in the territory concerned which resulted in a 90 per cent. majority in favour of the re establishment of Turkish dominion. The member for Sivas went on to say that, although the Turks had been obliged, by the terms of the Armistice, to evacuate those regions, they had by no means renounced their claim to them, and hoped with all their hearts that the verdict of the population itself would be carried out.

The Peace Delegation.

For some months past a Government Commission has been busy preparing a statement of the Turkish case for submission to the Allies when the time should arrive for the conclusion of peace. Now that that moment appears to be drawing near, the formation of the Turkish delegation that will have to proceed to Europe is occupying the attention of the Sublime Porte. At present the names of three statesmen only have been mentioned as practically certain to form part of the peace delegation. Tewfik Pasha is well known in England as the Turkish Ambassador in London until 1914, and also as a capable statesman of the best school of Turkish diplomacy. Nebi Bey was Minister of Foreign Affairs for a short time in the Unionist Cabinet, while Rifaat Pasha has been Turkish Ambassador in both Paris and Berlin.

The Anglican Church and the Oecumenical Patriarchate.

The message of sympathy from the Archbishop of Canterbury to the Greek Patriarch arrived on Saturday during a sitting of the Holy Synod. The proceedings were interrupted, and the message was read, making a very deep impression. Prayers and hymns were sung, and it was decided to circulate the message among the Greek churches of the whole world. Yesterday the message was read in all the Greek churches in the city after morning service.

SYRIA.

BEYROUT, March 20.

The Damascus Government.

The new Government at Damascus can now claim to be organised on the lines of a modern constitutional Government with a Cabinet of Ministers, and a representative Chamber, although there has hardly been time for the proper election of the members. A decree has also been promulgated for the constitution of a senate, two-thirds of whose members the Emir will shortly be nominating. It is rumoured that the President of the Senate will be Abdul Rahman Pasha El Youssef, a very wealthy landowner of Kurdish origin. Orders are to be issued henceforth in the name of His Majesty King Faisal (the First).

The British Diplomatic Agent at Damascus, who had an audience of the Emir on Monday and informed him of his intention to proceed to Egypt, left on the following day.

Several rumours are afloat in connection with the Coronation. One has it that His Highness received a telegram from Paris, to the effect that the League of Nations alone has the right to appoint kings and declare the independence of new nations, and that it, therefore, hopes that His Highness will soon proceed to Paris to confer on this matter.

As to the Syrian Conference, it is said that it has required:—(1) the raising of a commemorative Independence Memorial, (2) the provisional recognition of Ottoman laws for Syria, (3) the declaration of a general amnesty on the occasion of the Proclamation of Independence. These demands have, however, been rejected on the ground that they fall within the sole province of the Government.

The Lebanese have been perturbed by the sudden turn of events in Damascus, and the political attitude of the new Government towards the Lebanon. The situation has been further complicated, though to no serious extent, by the fact that a Committee was formed in Damascus of some Lebanese political leaders, who called upon all Lebanese resident in the city to attend a general meeting for the discussion of the position of the Lebanon in relation to the new Syrian Government. Meantime, the Administrative Council of the Lebanon (the vice-president and all the members) called upon General Gouraud, and are said to have presented to him a protest against that part of the Syrian Conference's decision which seemed to affect the independence of the Lebanon. A mass meeting of Lebanese is expected to take place on Monday next at Baabda, the winter headquarters of the Lebanon Government, to define the attitude of the Lebanon towards the new development of political events in Damascus.

Administration Troubles.

Political preoccupations seem to have been diverting the attention of the Arab Government from matters of administrative detail, and public security and economic stability have thereby been suffering. The price of flour has suddenly reached unheard-of figures, and produced such an outcry among the inhabitants that the Minister of the Interior had to convene the President and members of the Municipality and of the Chamber of Commerce. One proposed the prohibition of the export of wheat, but this suggestion was fortunately rejected. Instead of prohibition, the more sensible method would be the improvement of the means of supply from the Hauran close by.

Cases of assault and robbery in the immediate neighbourhood of Damascus have been so frequent of late that the Police had at last to gird up its loins and track the gang of robbers, whose headquarters seem to have been in Damascus itself. In an engagement that lasted about four hours in Deir Kharb, Kaza of Duma, one of the police and three of the robbers were killed. Finally, one of the gang was caught on his return to their hiding-place in the city, and he is said to have confessed everything.

According to news received from Alexandretta, large numbers of people in the Arab zone near Antioch have lately been leaving their homes and fleeing to the hills or to Antioch itself owing to the renewed activity of the many rebel bands. Some passengers proceeding by carriage from Alexandretta to Antioch heard rifle shots outside, and gun shots from inside the town, and learned from the fugitives that robber bands have been committing repeated aggressions, and that the military authorities were inflicting severe punishment on them. The despatch of a further force to Antioch is expected to restore order soon.

Developments at Alexandretta.

It is interesting to learn that the authorities at Alexandretta are now extending the wooden jetty from the Custom House 300 metres further seaward, so that the steamers that are expected to bring heavy loads destined for the construction of the harbour may discharge without difficulty or undue delay.

It is also satisfactory to learn that the repair of the Akiesh Bridge, which was slightly damaged by the Turkish rebel bands, will not take very long. This bridge lies south-east of Alexandretta, between Tubruk Kelat and Aintab, and is the longest on the Angora-Aleppo line. It is 90 metres long and rests on twelve arches, and it took the Germans over a year to build, in spite of the many labour battalions they had at their disposal. During the war the Turks kept armed detachments to guard it, and installed anti-aircraft guns in anticipation of air attacks. The parts of the permanent way that the Turks had destroyed are now repaired, and it is expected that the trains will run between Aleppo and Adana before the end of this month.

Another interesting item of news from Alexandretta is that the first administrative Governor appointed for the Alexandretta district after the occupation, who during his tenure of office had opportunities for studying the economic possibilities of the place, and who had since left for France, has returned as the head of a development company with a capital of thirty million francs, in which some merchants and financiers of Beyrout are said to be interested. The director of the said company is said to be now in negotiation with the Government for certain concessions, among which are the filling up of the marshy land west of the town and the erection on it of up-to-date buildings, and the lighting of the town by electricity to be generated by the abundant waters that flow at the head of the town.

CYPRUS.

NICOSIA, March 13.

The Deputation.

According to a decision arrived at during a meeting of the members of Council and leaders of the community, the members of the delegation, with the Archbishop Kyrillos, are to return to Paris and London, leaving Cyprus on March 16. The Greek Press urges the great importance of the mission, which will resume its advocacy of the petition for union with Greece. The *Voice of Cyprus* strongly recommends that all the members should take part. The papers are jubilant over the prospect of Greek union for Thrace and "Ionia."

Fear of Floods.

The Pedias torrent has brought down rushing volumes of water, causing great alarm at Nicosia. There was panic in some quarters lest a worse flood than that of fifteen months ago should occur, many persons staying up all night. The Nicosia paper, the *Voice of Cyprus*, urges again strongly that the Government should lose no time in carrying out protective works, by the construction of retaining walls, or by whatever measures may be decided upon.

Officials' Movements.

Mr. A. L. Stuart, puisne judge, is proceeding to England on leave.

Mr. William Greenwood, acting local commandant of police at Limassol, is retiring after long and meritorious service in the police force in Cyprus.

MALTA.

VALETTA, March 20.

A Gloomy Outlook.

Economically and commercially things are very black. Demobilisation and dockyard discharges are proceeding at a great rate, and the prices of commodities are on the rise, with the result that all branches of the population are feeling the pinch. Many people are leaving the island to seek better conditions elsewhere, and American ships carry away some of the island's strongest and sturdiest sons. The United States appear to be welcoming heartily the Maltese as emigrants, treatment which stands out in striking contrast to the Canadian refusal. To the less enlightened of the island this contrast appears to be inexplicable, and tends to develop a high appreciation of the American flag. No doubt some who touch the land of the almighty dollar will do well, but there are likely to be many cases of sad failure. It is to be hoped that those emigrating will not tend to form themselves into isolated communities. This grouping has in the past done a great deal to render our emigrants undesirable as far as some countries are concerned.

Suggested Remedies.

Many are the projects brought forward to attempt to secure equilibrium in island conditions. Perhaps one of the most feasible is that of establishing a Maltese shipbuilding industry. This subject was brought before the Council of Government by the Hon. J. Zammit. The opinion of the Government is set out in the reply of the Lieutenant-Governor; whilst approving the general idea of granting concessions, it is pointed out that the matter requires very careful handling. The Government, in answering the charge that nothing had been done by them in the past, placed the onus on the Admiralty, who used Malta as a base for building and repairing naval ships only. Nevertheless, the fact remains that in the past ships have been built, and well built, in Malta; and, with a view to supplying the surplus population with employment, every encouragement ought to be given to any suggested project of this nature. It is to be hoped that this scheme will not end in words only, as matters in Malta generally do.

Price of Gas.

The price of gas in London is, we are told, 2*s.* 6d. per thousand cubic feet; in Malta it is 11*s.* 1d., and naturally the public are clamouring to know the reason of this vast difference. The local company is a private enterprise, but it is rightly argued that it is a company in which the community is strongly interested. The Press has taken the matter up, and hard things are being said about this monopoly. The company claims a loss of 33 per cent. of the gas consumed. This, however, it is urged, is not the fault of the public, but of bad installation, and why, it is asked, should the public pay?

A Language Drawback.

The Air Commodore commanding the Mediterranean, in a letter to the Governor, speaks very highly of the Maltese carpenters who have been enlisted in the Royal Air Force, and who have been drafted to Mesopotamia and Egypt. He comments upon their proficiency and zeal as workmen, but adds that, owing to a lack of a knowledge of English, a disability is met with which will prove a serious obstacle to permanent employment in the Royal Air Force.

Foreign Squadrons.

A portion of the Japanese Training Squadron is in the harbour, and the usual "at homes" are in progress. The Vice-Admiral and officers entertained society on H.I.J.M.S. Tewika. There is also alongside the Australian destroyer Anzac. The United States Navy is also represented by several craft, but it is significant that the Grand Harbour is singularly free from British fighting craft, all having gone eastwards.

CORRESPONDENCE.

THE BRITISH SPHERE IN MESOPOTAMIA.

TO THE EDITOR OF "THE NEAR EAST."

SIR,—As *The Times* of March 27 has, editorially, laid it down in the most dogmatic fashion that we should lose no time in reducing our prospective mandate for "Mesopotamia" to the shadowy dimensions of a farce, I shall be indebted to you if you will allow me to try to demonstrate, according to my lights, why the sweeping evacuation of that territory, which *The Times* advocates, is at the present moment unthinkable. To start with, *The Times* poses as being in agreement with Mr. Asquith's views. Now, the word "Mesopotamia," so far from having proved, as it fell from the lips of Mr. Asquith, a boon or a blessing, has been the very reverse. It was barely ten days before Sir Charles Townshend fought the most gallant, but Pyrrhic, battle of Ctesiphon, that Mr. Asquith told the House of Commons that in no theatre of the widespread war was success more assured than on the banks of the Tigris. There and then well-informed and capable ex-officials of our Eastern Empire rose up and told the House wherein our Army of the Tigris was defective, and, therefore, in peril; but neither Mr. Asquith, nor Mr. Chamberlain, nor, indeed, the House, would give heed to them. We all know what followed; and if we find to-day *The Times* patting Mr. Asquith on the back, and urging Mr. Chamberlain to denude Mesopotamia of British troops, and save the British taxpayer's pocket—well! we have very good reason for believing that *The Times* could not possibly give the nation worse advice.

Owing to the defection of the United States of America, the British Empire stands forth as the one champion of peace and order in the great Middle East. We will merely express a hope that France, Italy, and Greece will all give us their honest and ungrudging support in reducing the Turk, from the Sea of Marmora to the Taurus, to a becoming state of subordination. Let us rejoice that Mr. Lloyd George has sent away that Moslem Delegation from India with a flea in its ear. On that point at any rate *The Times* is at one with us; and for months we Anglo-Indians have been watching, with more amazement than amusement, Indian Moslems, who are neither Sunnis nor Shi'ahs, stoutly contending that the temporal power of the Sultan and the religious prestige of the Khalif are indissolubly blended, and that their only possible joint home in the eyes of Islam is Constantinople. That is a question which will in due time settle itself. Rumour hath it that President Wilson is about to interpose his volition in this matter. We will naturally ask ourselves what right the United States—who have thrown the Europe of the Allies over and have refused the mandate or mandates offered them—have to come interfering in affairs which are, consequently, now outside their sphere.

The British Empire then stands alone to accept and exercise the mandate for the great Middle East, under which term I include Afghanistan, Persia, and Armenia, along the northern front, with Mesopotamia, Arabia, Palestine, and Egypt to the south of it. I use the term "British Empire" advisedly, for I believe that our Overseas Dominions will help us in the future, should trouble arise, as in the past.

In the article on "Central Asia After the Peace," which you have been so good as to publish recently, I have urged that Britain and Afghanistan should renew friendly relations. You will remember that a month or two ago the Afghans were reported to have occupied Merv. More recently, Delhi, under date March 12, reports that the Bolshevists are attacking the Afghans at Kushk, formerly the most advanced Russian military post, sixty miles north of Herat, and connected by rail with Merv.

The withdrawal of British troops from Badghis a year or more ago has been deplored by many; but over that spilt milk let us shed no tears. We have General Malleson, a Consul-General, and some troops at Mashhad, a railway from Nushki to Duzdab (in Persia), or even beyond, and a motor-road from Duzdab through Birjand and Kain to Mashhad. We can place troops in the north-east angle of Persia, threatening the Trans-Caspian railway between Dushakh and Merv, and flanking a Russian advance on Herat, if we think fit.

However, I have taken up my pen now to show that Mesopotamia is at present needed by the British Empire as a base from which to fulfil the mandate which, as Mr. Lloyd George said, Britain will claim when the Treaty of Peace with Turkey has been finally decided. Friendly relations between Britain and Afghanistan will certainly simplify the fulfilment of this mandate, but for all purposes of co-operation against Bolshevism India and the Persian Gulf, and not Mesopotamia, are the bases from which Britain would act in alliance with Afghanistan. Mesopotamia is the base which gives us access to Persia, the Caspian, the Caucasus, Kurdistan, and Armenia, and whence we can support France in the obviously arduous task that awaits her in Syria and Cilicia. That Britain and France stand shoulder to shoulder in the settlement of Europe and Asia is a pact as yet unshaken, however other Powers may fall off.

It has very recently been well pointed out that now is the time for Persia to re-establish her rights of navigation and of maintenance of naval power on the Caspian, which Russia forced her to renounce after the treaty of Turcoman-Chai in 1828; and, as the Black Sea is at this moment dominated by the British and French fleets, the maintenance of communication across the Caucasus between the Black Sea and the Caspian is of vital importance. To ensure this an alliance between Persia, Armenia, Georgia, and the Tartar Republic of Azerbaijan is needed. The wisest of us cannot foresee the issue of events in the Caucasus, but it would seem to be quite certain that if the Asquithian abandonment of the province of Mosul, which *The Times* advocates, is carried out, the three Republics of the Caucasus, whose alliance with Persia we desire, will be forced to make terms with Bolshevist Russia. Supported as they can be by British troops operating from Quetta by the Nushki railway, and from Baghdad by the Khanikin-Hamadan route, and by naval power on the Caspian organised from the Black Sea, it rests with the Persians to mobilise their troops and guard their northern frontier from Sarakhs to Tabriz.

The British troops in the provinces of Mosul and of Baghdad strengthen that line of defence from Batoum across the Caucasus to Baku, which we aim at maintaining; they equally dominate the Kurd on the one side and the Turk on the other, and afford at least some protection to the Christian (Nestorian, Chaldean, or Armenian) communities which since 1914 have been so frequently the victims of Moslem intolerance. We have heard of battalions of these Christian peoples doing good service during the war, and, under our auspices at Mosul, the same good service may be repeated now.

When we turn our eyes westward and south-westward from the conveniently central position which we occupy at and around Mosul, the reflection can scarcely fail to generate in our minds that that position forms a good solid backing to the French in Syria and Cilicia. One of the most essential points which has to be provided for in the coming settlement of eastern Asia Minor is fair access for the various antagonistic races and communities to the ports of the Black Sea and the Mediterranean. That is a problem which presents as many thorny points as does that of the eastern coast of the Adriatic. That the naval and military power of Britain should be brought forcibly to bear on its settlement both from the sea and land side is most advisable, and our presence in the province of Mosul adds to that power.

We may well ask those who advocate an entire withdrawal from Mesopotamia and Arabia to look back upon the very remarkable events and achievements of the past six years, and then ask themselves why the fruits of those six years is to be abandoned. Our civil administration of Mesopotamia is as yet in its infancy, and yet we know that municipal reform, agriculture, transport, commerce, and engineering have made important strides in advance. If we abandon Baghdad, what becomes of the railway from Kasr-i-Shirin to Teheran and to Enzeli on the Caspian? Is an Arab Government competent to promote that? Ever since the Armistice the aeronauts of Europe have been showing of what value Egypt and Arabia are as central stations on the air routes from Europe to India, Australia, Japan, the Dutch Indies, and South Africa. Is the development of such stations to be abandoned to the as yet imperfectly tutored Arab?

This is but the imperfect effort of one who has never visited either Arabia or Mesopotamia to protest against the policy which *The Times* has attempted to justify. Two distinguished authorities on Arabia, Commander D. J. Hogarth and Mr. H. St. J. Philby, are at an early date to address the Royal Geographical Society on their experiences, and I can hardly conceive that they will endorse the views of *The Times*; and, further, having heard Captain Hon. W. Ormsby-Gore, M.P., address the Central Asian Society, in February last, on "The Proposed New Department for Dealing with British Interests and Responsibilities in the Near East," I am still less disposed to think that he will show any sympathy with the suggestion that the early abandonment of almost the whole of Mesopotamia will benefit the British Empire. The difficulties and dangers of the problem in the Middle and Near East which faces our Empire have month by month been growing more and more apparent; and it is bitter to reflect that the race which declines to stand by us at this juncture is the other great branch of the Anglo-Saxon race. The only "blood," the consistency of which seems to have survived the crossing of the Atlantic, is the Irish.

The Times endorses the assertion of Mr. Asquith that, if we maintain our hold on the vilayet of Mosul, "we shall sooner or later be driven to advance to the shores of the Black Sea, or even to the Caspian." *The Times* refrains from any attempt to depict the chaos and the appalling scenes of massacre and misery which may take place if we fail so to strengthen the governments of Afghanistan and Persia, and of the three new Republics of the Caucasus, that they may constitute a barrier from the Upper Oxus to the Black Sea against Bolshevist Russia. If it lies in our power, it is our duty to save Denikin from the fate of Koltchak. We trust that our naval forces in the Black Sea, acting in co-operation with the Caucasus Republics, may stem the Bolshevist advance at the great Caucasus range. To that end the Batoum-Baku railway route must be open, and Persia must, under our guidance, organise such naval forces on the Caspian as will sink or expel any Bolshevist fleet that may issue from the Volga. The telegrams, respectively from Baghdad and Teheran, which *The Times* of January 15 and February 16 publishes from its own correspondents, distinctly advocate the maintenance of this northern frontier line from the Black Sea across the Caucasus and the Caspian to the Perso-Afghan frontier. If the reported attack by Bolshevists on the Afghans at Kushk is true, there is an opening for such a co-operation of British, Persian, and Afghan forces as would render the Bolshevic tenure and use of the Trans-Caspian railway impossible, and thus once again place Krasnovodsk in Anti-Bolshevist hands. This would fairly well paralyse Trans-Caspian Bolshevism and possibly encourage the Turcoman and Khiva and Bokhara to throw off the Bolshevic yoke.

Finally, when our Prime Minister demurs to abandoning "some of the richest natural resources of any country in the world," *The Times* confronts its readers with the absurd gibe:—"The moon contains riches also, but the difficulty is to tap them." *The Times* must have studied to little effect the great history of British commercial and maritime adventure and enterprise, if it thinks to persuade its fellow-countrymen that the art of tapping riches is in the twentieth century lost to them. If we ever reap the just reward of all that we have done for the well-being of the Near and Middle East, we shall both tap those riches, place the Christian communities of Armenia and Kurdistan in a strong and safe position, throw open the ports of the Black Sea to the Persian and the Armenian, and those of the Mediterranean to those countries and peoples whose well-being and development depends on them, and thus in all respects do justice to that mandate which, as Mr. Lloyd George has said, we shall claim, when the Turk has been reduced to his proper level.—I am, etc.,

A. C. YATE.

Beckbury Hall, Shifnal,
March 28, 1920.

THE ROAR OF THE BRITISH LION.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—It was with great interest that I read Miss E. Blyth's "Moslem Tales," which appeared some time ago in your paper. It may interest your readers to know that the second tale—*i.e.*, the one about Haroun-al-Rashid and the pauper woman who fed her children with boiled stone water (*vide* your issue of January 9)—is not exactly a folk tale in the proper sense of the word, it being based on the record of Arab chroniclers. This pretty story has now passed into more than one Arabic school reader, and therefore really belongs to Arab literature and legend, and not folklore.

The last portion, referring to the English language as

being considered by that good Caliph as that "of lions," must be comparatively a modern idea, as Englishmen and their speech were practically unknown in these parts of the world before the Levant Company started its operations a couple of centuries ago or thereabouts. "*English as she is spoke*" certainly did not exist in the days of old Haroun (circa 786-809). At any rate, how gratifying it must sound to the patriotic soul of that Anglo-Saxon who wrote as follows:—

Greek is like a lyre, sweet and clear;
Latin sounds its trumpets without fear;
Italian rings her bridal bells;
Spanish like an organ swells;
France plays her sprightly fiddles;
But English is the tongue of man!

or something like that!

When the king of animals roars, we understand that "all the Asses and all the Wee Beasties" scatter in deadly terror; but in this case one assumes, of course, that the description was meant to be a complimentary one and not hinting at any frightfulness of language. That, one is given to understand, is more in the line of the Germanic tongue.

It would be interesting to know whether this opinion—to wit, the similarity of the tongue of the lion to that of the Briton, who, by the way, generally likes to picture himself as a hefty bull-pup—is common among the Arab-speaking races of Syria and Palestine, for in that case it would not improbably be associated with Richard the Lion-Hearted, who played such a proud part in the Crusades, and whom the Arabs under Saladin knew only too well. We are told also that brave old Richard was addicted to a—er—tempestuous temper; this would still enhance his leonine reputation!

Is it not more likely, though, that the real begetter of the idea is the deep impression left upon the native mind by the recent prowess of the British arms in Palestine?

Perhaps Miss Blyth can enlighten us? In any case, we look forward to seeing some more folk tales from her pen.

I am, etc.,
THEO. MOGHABGHAB.

Famagusta, Cyprus.
March 8, 1920.

TOPICS IN PARLIAMENT.

House of Commons.

The subjoined headings are those given in the official report —

PEACE TREATIES: Albania. ARMENIANS (SUPPLY OF MUNITIONS). INDIA: Homeward Passenger Traffic.—Provincial Legislative Councils.—Currency Policy.—Unemployed Officers (Pay).—Indian Army (Educational Facilities). (March 29.)

PALESTINE: Jewish Colonies. EGYPT (BRITISH PROTECTORATE). CILICIA (POSITION OF ARMENIANS). INDIA: Pensioners (Death Rate). (March 30.)

VISIONS OF GREECE.

An exhibition of paintings by M. Michel Economou was, under the above heading, recently held at the Twenty-One Gallery, Durham House Street, Adelphi. M. Economou, who is a Greek by birth, and is at present in Paris, was educated as a mining engineer, but very wisely, as these pictures prove, forsook science for art. Although in his work there are no bizarre modernism and no slavish devotion to one form or lack of form, his methods, especially his colour schemes, are quite original. In place of a classical beauty, such as one might expect from one of his nationality, there is a dignity which, though neither stark nor rugged, is elemental, and belongs directly to the seas, the cliffs, the columns, and the other things of Greece which he paints. M. Economou is a fine artist; his conceptions are always excellent, and the composition of his pictures nearly always worthy of them. For instance, in a picture which is called "Soir Athenien," in a small piece of ground on which lie broken boulders and from which grow tall trees, he has contrived perfectly to create the filmy haze of even. The old buildings of Greece, such as mills and ancient houses, he has drawn most faithfully, yet with a quite original mosaic of colour. The changing hues of the Ægean and Ionian Seas he has reproduced almost to life. But we have no space to enumerate his different merits. Suffice it to say that three pictures alone proclaim M. Economou as a new master—an "Old Church," which is beautiful in the grey detail of its cloistered gloom; the "Acropolis—Twilight," which is the most arresting picture of the exhibition; and "Mount Rodini at Delphos," where from violet masses of hills the painter has achieved a fine result. This exhibition was one of the most interesting we have seen for a long time, and its merits will we imagine, be universally recognised. For this is the supreme advantage which M. Economou enjoys: he talks in a language that all can understand, but which no one hitherto has expressed.

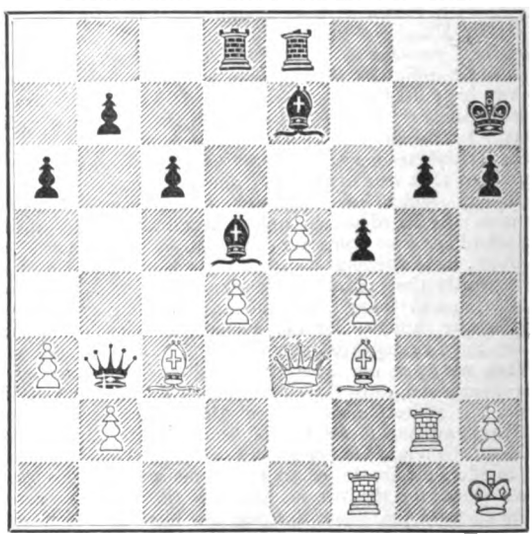
CHESS.

Mr. E. G. Sergeant won his unfinished game with Mr. R. C. J. Walker in the City of London Club championship, but the competition is not yet over, as both Sir G. A. Thomas and Mr. R. C. J. Walker have to play Mr. W. Winter. Sir G. A. Thomas's score is 8 out of 10, while Mr. Walker's score is 7, and I think we may assume that the former player will once again win this event. He has already, it may be noted, won the Hampstead Club championship, in which his opponents included Mr. R. C. Griffith, a former holder of the English championship.

In the championship tournament of the Metropolitan Chess Club Sir G. A. Thomas has brought his score up to 8½ out of 10, as against Mr. E. E. Colman's 9 out of 11, and it seems very probable that he will achieve the record of winning the three premier London competitions in one season. In his latest game in this tournament, which is given below, it will be noted that he adopted a variation of the Fianchetto Defence to the Ruy Lopez.

1. P—K4, P—K4; 2. Kt—KB3, Kt—QB3; 3. B—Kt5, P—QR3; 4. B—R4, P—Q3; 5. P—Q4, B—Q2; 6. P—B3, P—KKt3; 7. Kt—Q2, B—Kt 2; 8. Kt—B (1), Kt—K2; 9. Kt—K3, 0—0; 10. 0—0, P—R3; 11. P x P (2), P x P; 12. Kt—R4 (3), Kt—B; 13. P—KKt3 (4), Kt—Q3; 14. B—B2, Kt—K2; 15. P—KB4 (5), P x P; 16. P x P, Kt—B3; 17. Kt—B3 (6), B—R6; 18. R—B2, Q—B; 19. B—Q2, Q—K3; 20. P—K5 (7), Kt—B5; 21. Q—K2 (8), Kt x Kt; 22. Q x Kt, QR—Q; 23. K—R, B—B4; 24. B—Kt3, Q—K2; 25. Kt—Q4, Kt x Kt; 26. P x Kt, B—K3; 27. B—B2, Q—Q2; 28. B—B3, R—K; 29. P—QR3, K—R2; 30. QR—KB, B—B4 (9); 31. B—K4, B—B; 32. B—R3, P—QB3; 33. R—Q, Q—K3; 34. R(B²)—Q2. Q—B5; 35. B—K2, Q—Kt6; 36. B—B3, B—K3; 37. R—KB, B—K2; 38. B—K4, P—B4; 39. B—B3, B—Q4; 40. R—Kt2 (10).

Position after White's 40th move R—Kt2.



40. ...R—KKt; 41. R(KB)—KKt (10), B x B; 42. Q x B, R x P; 43. R x. P (11), R x R; 44. R x R, K x R; 45. Q—Kt2 (ch), K—B2; 46. B x R, Q—Q8 (ch); 47. B—Kt, B—B4; 48. P—K6 (ch), K—B; 49. P—K7 (ch), B x P and wins.

(1) A device which is coming into increasing favour, as it is now held to be better to keep the rook on the square to which it goes by castling on the ground that its real utility is to support the advance of the K.B.P. When castling precedes the Kt manœuvre the rook, of course, goes to K square.

(2) This exchange of pawns serves to hinder any attempt on Black's part to advance by P—KB4.

(3) As it turned out, this move achieved nothing except the weakening of White's position. Kt—K would, however, have been little better, and would, indeed, probably have been regarded by Black as an invitation to play P—B4.

(4) The alternative to withdraw the Knight to B3 would have been unthinkable.

(5) Probably it would have been better to play Kt—Kt2 first.

(6) Q—K followed by Q—Kt3 and P—K5 looks tempting. The text move is simply defensive, and enables Black to open his game somewhat.

(7) There was no alternative to this awkward move, which, however, proves stronger than it looks.

(8) If B—Kt3, Kt x Kt; 22. B x Kt (not B x Q, which loses the exchange), Q—B4 or K2; 23. Q—K2 with an open game.

(9) Forced, for Black could not permit P—B5.

(10) A fatal oversight. B x B should have been played when White would have had nothing the worse of the game.

(11) White wins the pawn back, but only temporarily.

CARO-KANN.

Several functions attended by women only have recently taken place at Baghdad in connection with medical and educational institutions. There was notable cordiality and willingness, says *The Times*, to co-operate actively with the administration in these and other directions, particularly amongst Mohammedan women of good family who were present.

Digitized by Google

PRESS ON THE NEAR EAST.

"Time and the Turk."

Some of the very thorny questions surrounding the Turkish problem of to-day are discussed by the *Morning Post* (March 31) in a leading article with the above heading. We quote from the latter portion of the article, in which the relations of the Arabs with their French and British allies are touched upon:—

Mr. Lloyd George has made it perfectly clear that Great Britain has no intention of withdrawing from Mosul, much less from Baghdad, and has refused to accept the suggestion entertained in some Arab circles and supported by Mr. Asquith that we should confine our direct obligation to the Basra zone. That is all to the good, and there should not be much difficulty in reconciling our interests in Mesopotamia with the legitimate ambitions and rights of the Arabs. But the problem of Syria is much more serious, as the information which we publish to-day concerning the Emir Feisul's proposals to the French makes evident. Claims which demand the withdrawal of France from Beyrout and the whole Syrian littoral will obviously involve anxious and prolonged negotiations between the Syrians and the Quai d'Orsay. For that reason we hope that the Allies will ask Turkey to disinterest herself at once of the whole future of Arabia and leave the constitution of these former portions of the Ottoman Empire to be settled among themselves. . . . And what applies to the German applies even more to the Turk. In the East a day's delay may mean the turmoil of a century. Warnings there soon lose their potency, and hesitation gives rebellion its chance. Therefore let us give the Sultan with all speed the Allied terms, and let us tell him at the same time that the settlement of Arabia and Armenia is not his business, and will be arranged among the Allies. Having done that, let us then do what we can to give the Turk a chance for developing his many sterling qualities to the good of himself and the world at large.

Therefore let us give the Sultan with all speed the Allied terms, and let us tell him at the same time that the settlement of Arabia and Armenia is not his business, and will be arranged among the Allies. Having done that, let us then do what we can to give the Turk a chance for developing his many sterling qualities to the good of himself and the world at large.

Constantinople and Anatolia.

Mr. H. Charles Woods, in reviewing generally the Turkish Treaty in the *Fortnightly Review* of April, puts forward what he deems an additional argument in favour of the maintenance of the Sultan at Constantinople. He says:—

I venture to think that the scene of primary importance has now been transferred from the Bosphorus to the interior of Anatolia, and that although Mustapha Kemal may be glad of support from the Central Government, his movements and actions can be no more controlled by that body than could those of the Salonica Section of the Committee of Union and Progress be regulated from Stamboul for several years after the re-establishment of the Constitution. If this be the case, it is safe to assume, whereas some months, or even weeks, ago a material influence might have been brought to bear upon the general situation by Allied pressure in the capital, and whereas such pressure may still prevent communications between that city and the Nationalist headquarters, that for to-day, and certainly for the future, the Ottoman Government is practically powerless to act against this new and dominating force—a force which at any moment may join hands, if it has not already joined hands, with those sections of the Arabs who are far from contented with the attitude of the Peace Conference, and particularly with the suggested French domination in Syria. However this may be, too, it would seem that Allied control, which should have been both real and practical at Constantinople for months, does not recently appear to have achieved any amelioration of the situation in the interior. This proves to my mind that in the interests of the local inhabitants, as well as of the Allies, it would have been better to decide, immediately after the Armistice, to maintain the Sultan at Constantinople and to support any authoritative and non-Committee form of Government which could be established there. The adoption of that course would probably have prevented the development of a situation in which the Supreme Council may be placed in the position of employing the Greek forces at Smyrna for the purpose of dealing with Mustapha Kemal—a course which would correspond to the writing of "Alice in Wonderland" in blood—of undertaking extensive and costly Allied operations in Asiatic Turkey, or of risking the tearing up of the Treaty and the obliteration of the Armenian and other non-Turkish peoples during a discussion of terms with Ottoman Ministers, who have no force behind them.

The Moslem Claims.

The *Outlook* of March 27, in dealing with the claims made by the Indian Caliphate Delegation, points out that the Moslem religion is in no wise hurt by the proposed partition of the Ottoman Empire. In addition, it states that we have duties to many peoples besides the Mohammedans of India.

We and our Allies have duties to perform to Europe as well as to Asia. For geographical reasons, the Turkish question is more a European, and even more a world, problem than it is an Asiatic problem. India is less affected by the Turkish hold on important lines of communications than is any European Power, or, for that matter, the United States of America. The Turk may stay at Constantinople, but he must not control the Straits, and, wherever his boundaries may be fixed, he must not be in a position to threaten the Suez Canal or to dominate the Red Sea. These important waterways have a special interest to the British Empire, but they are in a sense the property of the whole world, and for the sake of the world they must be adequately protected. The Turk is not judged as a Mohammedan, but as a bad and inefficient ruler, as a nuisance to his neighbours, and an oppressor of subject races. In the task of governing the territories which will be left to him his capacities will be taxed to the utmost. It would be doing him no favour to allow him to undertake again responsibilities in which he has calamitously failed, or to put in his path temptations to go astray once more with some adventurous Power.

Montenegro.

Special pleading is writ large over an article in the *New Europe*, by Mr. R. W. Seton-Watson, on the Montenegrin question. "For some time past," it begins, "there has been a systematic campaign in this country in favour of the ex-King Nicholas of Montenegro." Other observers might be inclined to challenge this statement on the ground that the movement to which Mr. Seton-Watson refers is in favour of fair play for the Montenegrin people as a whole, to whom should be left the decision whether Nicholas of Montenegro is King or ex-King. In the interest of strict accuracy the assertion that the Montenegrins are to the Yugoslavs what Cornishmen are to England cannot be passed unchallenged, for the reason that Cornishmen have not maintained five centuries of independence under their own rulers while the rest of England was under the heel of an invader. The crux of the problem is not the villainy or sainthness of this or that Montenegrin, but whether any non-Montenegrin, be he Scottish or Continental, has the right to dictate to our Montenegrin allies how they should arrange their internal affairs. In regard to the position in Montenegro to-day much turns on the legality of the Podgoritza Assembly, by which the King was "deposed." On this point Mr. Seton-Watson writes:—

"It would be absurd to suppose that no irregularities of any kind took place, but these elections are known to have compared favourably with any previous elections under the régime of King Nicholas."

Fortunately, Great Britain was not required to adjudicate upon the results accruing from the other elections to which reference is made, but she is within her rights in noting the irregularities of the Podgoritza Assembly and in refusing to recognise its decisions. Only in the penultimate paragraph does Mr. Seton-Watson touch upon the kernel of the Montenegrin question:—

"It has been an irony of history that while every other Balkan race has had to look for its king abroad, the Serbs have produced no less than three native dynasties—the Petrovitch, the Obrenovitch, and the Karageorgevitch. The jealousies of these three families have been one of the chief handicaps upon the development of the Yugoslavs during the past century. It took a hideous crime to rid them of the one, and they paid a just but heavy price in the disapproval and prejudices of a foreign public which knew nothing of the acute and prolonged provocation."

Precisely; and the recollection of the drawbacks arising from two rival dynasties has made some of the people determined not to run the risk of a repetition of that experience. That is where the Serb comes in. One result of an outsider espousing the cause of the end justifying the means is that what was a "hideous crime" in one case becomes a "kind fortune" in the other, because the "scandal" is not "similar." The fact is that once again "the stable is too narrow for the two horses." One has, therefore, to be sacrificed, and the means adopted will be whatever the occasion requires. But while the candid Ivan Petrovitch attributes the fate of the old horse to the defects of the stable, the *New Europe* devotes more than a third of one issue to convincing itself that the stable is perfect, and that it was solely the defects of the old horse which caused it to be spirited away by a "kind fortune" without any action on the part of the owner.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultán after Sultán with his Pomp
Abode his Hour or two, and went his way.

Commander D. G. Hogarth's lecture before the Royal Geographical Society on March 29 shed light on a point that had puzzled me, as it doubtless puzzled a good many other people, for some time. How, I wondered, did it come about that the Germans belonging to the notorious "Emden" were ever able to get into Arabia? Our blockade there was always reported to be a very strict one, and a party of Germans about fifty strong could hardly be smuggled in in disguise—at least, one would suppose it would be very difficult. But Commander Hogarth explained that the party had the luck of the brave—for brave they undoubtedly were—in that they got into the Red Sea at a time when our blockade was suspended "for political reasons." So what was to me a mystery is now solved in a simple, if not quite satisfactory, fashion. But I believe that the "political reasons" referred to in this case were very sound ones, and quite above suspicion, which can hardly be said of a similar excuse advanced for a certain blockade-that-should-have-been nearer home.

***

Another extremely interesting part of Commander Hogarth's lecture was that dealing with the surveying and charting of the very dangerous eastern shore of the Red Sea, which, said the lecturer, was hardly better known before the war than the shores of the Antarctic continent. This was due to the forbidding triple line of coral reefs which had kept the coast inviolate, although in sight of one of the most used waterways of the world. Our patrol officers, in spite of all the other hard work they had to do—and it *was* hard work, for the artless Arab *nókador* showed a pretty talent for blockade running at times—still found time to survey and chart these waters and this tricky bit of coast; and in future the Arab smuggler, whether of guns, hashish, or "black ivory," is likely to find his difficulties considerably increased. Personally, I can conceive of less exciting occupations than smuggling, or chasing smugglers on this coast; but the game has always had its followers; and I suppose it still will have them, even with the added difficulties.

***

I have from time to time devoted some space to the subject of the Egg, especially the Egyptian Egg and the Balkanic Egg, which—as you may remember—have incurred my displeasure by their exceeding smallness. No, I will *not* gibe at the quality of these unfortunate embryonic poultry; for the hens that laid them cannot be held responsible for the delays on the road, which too often result in chemical changes ere the egg reaches our breakfast tables. But in regard to size, or lack of size, I do feel entitled to abuse the Balkan and Levantiney fowl. It was therefore with a certain satisfaction that I read a few days ago that Egyptian eggs which had reached this country are being sold at 2d. apiece. That ought to teach the degenerate Pharaonic fowl her real insignificance. Even at this season, when eggs are—or ought to be!—cheap, the British hen's production fetches from 3d. to 3½d.

***

But I gather from a Belgrade correspondent that the Yugoslav hen's output fetches even less than the Egyptian's. To be accurate, in Belgrade you can just now buy six eggs for twopence, and apparently eat them without any particularly evil result. That seems to me truly humiliating, and if it were my hard lot to be transformed by some magician into a hen I should pray that I might not be compelled to live in Yugoslavia. For all that, the Gippy fowl need not get swelled head on the strength of her Yugoslav sister's misfortune. Let her mind her own business, which should be to produce *large* eggs!

***

I was intensely interested to read in the *Morning Post's* "Way of the World" column the other day that General Averescu, who lately formed a new Roumanian Cabinet, is credited by his soldiers with the possession of miraculous powers of healing. "During the war," says the writer, "scenes have been witnessed on the battlefield, when he met his soldiers, which recall the Middle Ages. Surely this is the first Prime Minister to be credited with powers hitherto assigned only to kings and saints." If Mr. Lloyd George reads the *Post*—and I shouldn't be surprised if he does, even now!—he will, I fear, be consumed by jealousy. But that is by the way. The interesting thing to me is to find the same spirit which in England is driving so many people to dabble with Spiritualism, making the Roumanian peasant turn to what we used to know as "faith healing." For I take it that it *is* the same spirit—the same craving for something "out of the common." And I for one should be at least as ready to believe in a "cure" by General Averescu as in any "spirit" called up by a professional (paid) medium.

CORSAIR.

MUSICAL NOTES.

Prior to the war the reputation of Miss Isolde Menges was wide, but it is yet higher now, for she has improved very considerably since last I heard her. It is claimed for her that her technique is quite flawless, and though this is not quite true, her finger work being sometimes a little too hard, there is no doubt at all that she is in every way one of the most accomplished violinists now in this country. In her recital at the Wigmore Hall on March 25 she included Bach's Chaconne (for violin alone). This chaconne, which is much more familiar than the sonata from which it is taken, is only for great players, and is for them a sign of triumph or a confession of failure. With Miss Menges it was a triumph all the way: nothing was missed and nothing was marred, whether in the themes or in the ornamental work. Her craftsmanship, in fact, was worthy of Bach, the most exquisite of joiners. All styles come easily to Miss Menges, for with equal facility and charm she played Brahms-Joachim, Chopin-Wilhelmj, and Debussy. She has not the richness and breadth of tone of Kreisler, Ysaye, or Sammons, but in other respects she falls little short of these masters.

The Modern Trio, who gave their third concert at the Wigmore Hall on March 24, are not yet a trio of authority. The leaping passion which burns in the violinist M. Melzak is different from the rich suavity of the 'cellist M. Mannucci, and still more different from the unruffled hardness of the pianist Mr. Krish. Individually they are all very capable players, but the admixture of them is unequal. This fact was very obvious in a Trio in G by Hurlstone, a composition in which a facile invention of melody scarcely compensated for the lack of harmonic colouring—the melodies were for the most part merely thrown from one instrument to the other, and were seldom played alike. The Trio's wisdom was at fault in playing John Ireland's Phantasie in A minor, for early Ireland is as dull as late Debussy. The thing which saved (and indeed advanced) the Trio's reputation was Dvorak's "Dumky" Trio; in this they played with a pulsing energy, and communicated their enthusiasm to the audience.

In the playing of Countess Helena Morsztyn, the Polish pianist, there is a gratifying absence of professionalism. At her recital at the Wigmore Hall on March 29 she showed a freshness which, though scarcely ever reaching individuality, never descended into rashness, and rather informed than deformed her efforts. It may be said that while her conception of orthodoxy is certainly her own "doxy," she is both near enough and far away from traditional interpretations always to hold one's interest. But I did not like her playing of Beethoven and Schumann (Les Adieux Sonata and Etudes Symphoniques); in the first it was ponderous where it should have been of a massive nature, and in the second it lacked the broad dignity that Schumann needs. It is wrong to interpret Beethoven's might by strength, and unless you give Schumann a sufficient number of pauses for breathing you have him broken-winded long before the end. Chopin Countess Morsztyn treated with great deference. It seems the fashion among modern pianists to play Chopin without that caressing warmth which such masters as Pachmann and Moiseiwitch employ, and to me it is a fashion as unholy as it is unhallowed. Countess Morsztyn's rendering of his "Berceuse" would have lulled no one to sleep, for the cradle simply didn't rock. However, in Bach, Scarlatti, and Debussy she did very well, and for such composers as these she would always be worth hearing. Her playing is never less than cultured, and her mistakes are those of judgment, not of taste

The solid food which Mr. Arthur Shattuck, an American pianist, served up at his recital at the Æolian Hall on March 31 was quite indigestible; but the trifles and the slightly more substantial food were delicious. Among the last were Glazounoff's "Prelude and Fugue," Debussy's "Reflets dans l'eau," D'Albert's "Scherzo," and Rebikoff's "Three Silhouettes," which, in spite of all their popularity, still retain their charm. These things Mr. Shattuck played with precise daintiness, and it is through such things, I presume, that he has made his reputation. In bigger things by Brahms and Tschaikowsky he was not nearly so good; and the famous Liszt-Busoni Polonaise sounded as if it had been written by Chopin—Saint-Saens. The Tschaikowsky Sonata which he played should never be inflicted upon an audience: it is a work of outrageous length, with hideously frequent repetitions. And its paucity of ideas is equalled only by the effrontery with which it prefers them. Generally speaking, Tschaikowsky's piano music should, in the interests both of a great composer and of public sanity, be kept as quiet as possible. It was Rebikoff's "Three Silhouettes" alone that gained Mr. Shattuck a partial forgiveness for having planted Tschaikowsky's Sonata upon us.

NEAR EAST BOOKSHELF.

PAN-ISLAM. By G. Wyman Bury. (Macmillan and Co. 6s. net.)

CROSS AND CRESCENT.

Mr. Bury's book appears at an opportune moment, when Europe and, to a less degree, America are keenly interested in certain developments in the Moslem world, and when a number of Moslems are quite clearly bent on presenting the "Pan-Islamic Peril" in the most terrifying light possible. Unfortunately, it must be added, it comes also at a time when fanaticism on both sides is inclined to run riot. It is a pity that the fanatics—on both sides again!—cannot be compelled to read and re-read it, and to weigh carefully the views put forward by the author, which are supported by sound reasoning and a solid array of hard facts. The book is fair and sane, and Mr. Bury has a remarkable knowledge of his subject, acquired by personal observation of Moslems in many lands and sympathetic study of their manners, customs, and beliefs. It will prove interesting not only to those who want to know what Pan-Islam is and what bearing its potential growth may have upon the political situation in the near future, but also to others who, though possibly caring little for politico-religious developments in the Orient, like to read of the every-day life of its peoples. We get, too, many curious sidelights on the War, in which the author played a useful and frequently exciting part as an intelligence officer; and though the connection of these things with the main theme is not always quite clear, he would be a captious critic indeed who resented their inclusion in the book.

What *is* Pan-Islam? We have heard various definitions of it, but for practical purposes we like best that given by Mr. Bury in his first chapter: "It is really the practical protest of Moslems against the exploitation of their spiritual and material resources by outsiders." And then:—

Pan-Islam, as its name implies, is a movement to weld together Moslems throughout the world regardless of nationality. The ethics and ideals of Islam are more attainable to ordinary human beings than those of Christianity. . . . Islam, with its easier moral standard and frequent physical discipline of attitudes and observances connected with obligatory prayer, enters far more into the daily life of its adherents than Christianity does with us. Hence Pan-Islam is more than a spiritual movement; it is a practical, working proposition which has to be reckoned with when dealing with Moslems, even in secular matters.

Pan-Islam is no new thing—it is as old as the Hejira, and then helped to knit together Moslem Arabs against their Pagan compatriots, who were persecuting them. In the palmy days of the Abbaside Caliphate it was quiescent enough, and men of all creeds were welcomed at Baghdad for their art, learning, or handicraft when we were massacring Jews in London as part of a coronation pageant.

Mediæval Moslems never fanned the movement into flame as long as they were let alone, and even now tribes living beyond the scope of missionaries and traders prefer the Christian traveller whom they know to the Moslem stranger from the coast, whom they usually distrust. . . .

But if Pan-Islam is as old as the Hejira, it was not until quite recent times that it showed any signs of becoming dangerous, and then only because the late Abdul Hamid sought to turn it to his own purposes. And, as Mr. Bury observes, "it remained for a Christian nation to put Pan-Islam on a business footing." Germany set about the work in a characteristically methodical, painstaking way; but, on the whole, she can hardly have been satisfied with what she achieved. Are the Bolshevists and their friends likely to do any better? They may, if the situation is mishandled in the West.

Mr. Bury is of opinion that pan-Islamic activities of the last decade or two teach us that "countries which are mainly Moslem should have Moslem rulers, and that Christian rule, however enlightened and benevolent, is only permissible where Islam is outnumbered by other creeds." Lack of space forbids our attempting even to outline what he has to say in regard to the future of Syria, Mesopotamia, and Arabia in this connection, but it will repay careful study in the original.

To many readers by far the most interesting chapter in the book will be that on "Moslem and Missionary," in which the scales are held very evenly. For instance:—

Missionaries would have us judge Islam by the open improprieties and abuses which occur at Mecca, Kerbela, and other great Moslem centres. How should we like Christianity to be judged by the public behaviour of certain classes in London or other big towns?

And again:—

Tact and expediency are just as necessary in religious as in secular affairs—at least, so St. Paul has taught us; but the modern missionary is too apt to regard these qualities in Christianity as insincerity and the lack of them in Islam as fanaticism. Missionaries and their supporters will doubtless find these sayings hard, but if they will read the chapter through dispassionately they will be unable to accuse the author of unfairness or prejudice. Moreover, he provides them with an argument for the restoration of Sta. Sophia to Christendom which should surely gladden their hearts. This is summed up in the sentence: "According to the orthodox tradition of Islam, once a church always a church"; and the argument is supported by historical examples. Admirers of the Armenians may be surprised to read that:—

The more enlightened individuals of that harassed and harassing little nation admit that the Armenian character could be considerably improved, and that, though their hideous persecution is indefensibly damnable, their covetous instincts and parasitic activities are an incentive to maltreatment.

And particulars given of the activities of the Jews and certain Syrian Christians in Palestine and Syria "which did much to accentuate the appalling distress" caused by the War serve to remind us that in Turkey, at any rate, there are black sheep outside the Islamic fold as well as within it. The details given of mission work in Moslem lands, and of results achieved, are intensely interesting, if not encouraging from the mission point of view. Mr. Bury is not unfriendly to the missionaries; he recognises the self-devotion and gallantry shown by so many of them; but he questions the wisdom of attempting to proselytise among Moslems. His attitude may be made clear by three extracts from his last chapter, "A Plea for Tolerance":—

Missionaries afield are usually justified by their works; it is the aggressive policy blazoned abroad from mission headquarters which does so much mischief. Islam was never intended to overthrow Christianity, but to bring back pagan Arabs to the true worship of God. Mission policy clamours for attack on it as if it were an invention of the devil, and then complains of Moslem fanaticism. . . .

It is time some protest was lodged against this policy if only on behalf of Christian Administrations in Moslem countries, which are always being attacked by it and urged to give more facilities of spiritual aggression. . . .

There was never a less desirable movement for unchecked religious exploitation than now, when the war-worn nations of Christendom are trying to reconstruct themselves, and the world is seething with unrest and overstocked with discarded weapons of precision.

If we have emphasised one side of the book, it is because the subject dealt with is of such extreme importance at the present time; but, as we have said above, the author writes of many things besides the differences between Islam and Christianity, and he is always interesting. His criticism of the Turk, whom he likens to "a bitter wolf who will turn and rend without ruth or warning," will find an echo in many hearts to-day. His remarks on the "extraordinary and fungus-like growth of 'Arabian experts'" produced by the war will be equally appreciated, though by a smaller audience. And his stories of spies and spying, of blockade work in Arabian waters, and of the extraordinary fascination exercised by the Turk over many Egyptians, all make excellent reading. "Pan-Islam" is a book not to be missed by anybody at all interested in the Nearer Orient, and to be enjoyed by all who love adventure and have any real knowledge of Moslems and Islam.

BOOKS RECEIVED.

"Robin Hood and His Merry Men." By F. Gudgin. 1s. 6d.

"Hereward's Last Flight." By Charles Kingsley. 2s. (Oxford Story Readers for Serbians. Nos. 2 and 3. Oxford: Clarendon Press.)

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK,

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. April.	1920. March.		1338. Rajab.	5680. Nisan.
8	26	Thursday	19	20
9	27	Friday	20	21
10	28	Saturday.....	21	22
11	29	Sunday	22	23
12	30	Monday	23	24
13	31	Tuesday	24	25
14	April. 1	Wednesday	25	26

Lord Sinha will leave India for England on April 17.

General Nourri Pasha, the Envoy of the Emir Faisal, has arrived in London.

Mr. Herbert Samuel has concluded his mission in Palestine, and has left for England.

Lord Chelmsford, the Viceroy, arrived at Bombay on March 27 on a three-day visit.

Prince Nicholas of Roumania, accompanied by M. Stefanesco, arrived on March 31 at Folkestone, where he spent Easter.

Ali-Mardan Bey Toptchibacheff, President of the Parliament of the Republic of Azerbaijan, left London on April 4 for Paris.

M. Gennadius, the honorary Greek Minister, and Mme. Gennadius, who have been spending Easter at Bournemouth, returned to London on April 6.

Sir Henry and Lady McMahon have entered into occupation of 5, Wilton Place, S.W.1, which is now their permanent London address. (Telephone, Victoria 5,662.)

The Crown Prince of Roumania was expected to arrive in Bombay on April 6. During his stay, which will probably be for a month, he will visit Jeypore, Agra, Delhi, Simla, and other places.

Lady Barrymore has made a good recovery after the recent severe operation on the eye, which was completely successful. She left London on March 30 with Lord Barrymore for a short stay at Brighton.

Admiral the Hon. Sir Somerset A. Gough-Calthorpe, who has just been appointed Commander-in-Chief at Portsmouth, was Commander-in-Chief of the Mediterranean, 1917, and High Commissioner of Constantinople, 1918.

M. Gavrilovitch, the Minister of the Kingdom of Serbs, Croats, and Slovenes, left London on April 6 for Paris. M. Gavrilovitch will be away for about two weeks, and during his absence M. Ilitch will act as Chargé d'Affaires.

The marriage arranged between Gordon Tyndall, youngest son of the late Mr. and Mrs. John Tyndall, of Glenloch, Ceylon, and Constance, younger daughter of Mr. and Mrs. Arthur C. Roper, of The Shrubbery, Exeter, will shortly take place.

Princess Marie of Roumania, attended by Mme. Catargi, Lady in Waiting, left Victoria on Thursday morning for Paris. Prince Antoine Bibesco, the Roumanian Chargé d'Affaires; Colonel Rosetti, head of the Roumanian Military Mission; and the personnel of the Legation were present at the station.

On April 13, at 4 p.m., Mr. H. St. John Bridger Philbey, C.I.E., I.C.S., will give a lecture before the Royal Asiatic Society, 74, Grosvenor Street, W.1. His paper is entitled "Notes on the History and Doctrines of the Wahabis of Central Arabia," and the lecture will be presided over by the Rt. Hon. the Lord Reay, K.T., P.C., G.C.S.I., LL.D.

Lord and Lady Byng of Vimy spent Easter with Lord and Lady Stamfordham at Windsor. They will leave London for good next Saturday and will return to Thorpe Hall. It is announced that rumours to the effect that Lord Byng intends to retire from the position of chairman of the United Services Fund are quite incorrect. He has no intention of relinquishing his connection with the fund.

Dr. Veverka, the Czecho-Slovak Chargé d'Affaires, and Mme. Veverka entertained at dinner at the Legation, 9, Grosvenor Place, on March 31, M. Venizelos, the Greek Premier, M. A. de Fleuriau, Minister Plenipotentiary and Counsellor of the French Embassy; M. Gavrilovitch, Minister of the Kingdom of Serbs, Croats, and Slovenes; M. Caclamanos, Greek Minister; Prince Antoine Bibesco, Roumanian Chargé d'Affaires; Sir Eyre Crowe, M. Markantonakis, M. Hodac, Mr. Leeper, Dr. Seton Watson, Mr. Wickham Steed, and M. Tillar.

OBITUARY.

Reuter's Belgrade correspondent, writing on April 3, states:—The semi-official Press Bureau announces that M. Pavlovitch, President of the Skupshtina, died at eleven o'clock this morning at his residence in Belgrade. The State funeral will take place to-morrow afternoon. The Regent has ordered that extraordinary military honours shall be paid to the deceased statesman, and the Prince himself will attend the funeral.

Mr. Eustace Kynaston Corbet, C.M.G., died on March 21 at Rock House, Boughton Monchelsea, near Maidstone, at the age of sixty-five. He became in 1885 English Secretary to the late Khedive of Egypt, a post he filled for six years, when he was appointed Judge in the Native Court of Appeal at Cairo. He was afterwards Procureur-General, and for five years Director of the Egyptian Educational Mission in England. Mr. Corbet was made a C.M.G. in 1905, and had the Grand Cordon of the Medjidieh and the Second Class Osmanieh.

The death has occurred of the Right Rev. Edgar Jacob, D.D., Bishop of St. Albans from 1903 till the end of 1919. About fifty years ago he went out to India as domestic chaplain to Dr. Milman, Bishop of Calcutta, and Metropolitan of India, but his career in that country ended in 1876, when his Bishop died at Rawal Pindi. His experiences in India left their mark on all his subsequent work.

The death is announced of Major-General Sir John George Ramsay, K.C.B. He joined the 24th Punjab Infantry in 1877, and with the corps he was present at the action of Kandahar in 1880, and took part in the Kabul-Kandahar march. He also took part in the Hazara Expedition, the North-West Frontier campaign, and the Malakand campaign. After service in China he took part in the Mohmand Expedition. He was placed on the retired list in 1912.

The death took place at his residence in North Wales on March 31, of Major-General Hugh Sutlej Gough, C.B., eldest son of the late General Sir John Gough. He served in the Navy from 1862 to 1865, and afterwards entered the Army as cornet in the 10th Royal Hussars, being promoted to field rank in 1881, Colonel in 1888, and Major-General in 1900. He was A.D.C. to the Commander-in-Chief, India, 1876-1881, and served in the Afghan War, 1878-79, the Egyptian campaign, 1884, and the Bechuanaland campaign, 1884-85, where he raised and commanded the 3rd Mounted Rifles. He was Assistant Adjutant for Cavalry at Headquarters, 1893-98, and afterwards held several important posts at home.

APPOINTMENTS, ETC.

President Wilson has nominated Mr. Morgenthau, ex-Ambassador to Turkey, to be Ambassador to Mexico.

M. Van Den Bosche, Belgian Judge on the Mixed Tribunals of Cairo, has been appointed Procureur-General.

Mr. Hampson Gary, the American Consul-General at Cairo, has been appointed United States Minister to Switzerland.

The King has appointed Lieut. the Hon. Alexander Henry Louis Hardinge, M.C., Grenadier Guards, to be an Equerry in Ordinary to his Majesty, and also to be Assistant Private Secretary to his Majesty, *vice* the Earl of Cromer, resigned.

THE SEASON IN EGYPT.

(From Our Social Correspondent.)

Cairo, March 8.

The Milner Mission.

The Semiramis Hotel assumed quite a pre-war appearance last Tuesday, when the Milner Mission gave a farewell reception to those whom they had met during their stay here. Lord Milner, who was looking wonderfully well in spite of the strenuous time which he has had, especially during the past three months, received his guests at the entrance of the beautiful ballroom, which, together with the large dining-room, was thrown open for the occasion. His colleagues were in close attendance, as also were the two indefatigable secretaries, Messrs. Loyd and Ingram. An excellent orchestra played during the afternoon. The High Commissioner and Lady Allenby arrived early and stayed late, as indeed did most of the guests, who found the afternoon a most enjoyable one His Royal Highness the Crown Prince of Roumania was also present, and the other guests included Sir Milne Cheetham, Sir Valentine Chirol, Sir William and Lady Brunyate, Air Commodore and Mrs. Groves, Monsieur and Madame Lefevre-Pontalis, Sir Gilbert and Lady Clayton, Sir Murdoch MacDonald, Sir Paul and Lady Harvey, Sir Frederick and Lady Rowlatt, Lady Stradbroke, Lady Palmer, Sir Reginald Oakes, Brigadier-General and Mrs. Herbert, Mr. and Mrs. Langley, Colonel Symes, Mr. Maudslay, Mr. and Mrs. Sydney Merton, Mr. and Miss Devonshire, Miss Peebles, Mr. Ross Taylor, Sir George Macauley, Watson Pasha, Mr. and Mrs. Hooker, Dr. and Mrs. Phillips, Dr. and Mrs. Madden, Sarwat Pasha, Ziwer Pasha, Shafik Pasha, Mr. and the Hon. Mrs. Home.

The members of the Mission have now scattered. Sir Owen Thomas and Mr. Hurst have already left for England; Sir John Maxwell has gone to Luxor with Lady Maxwell, who has recovered from her recent illness, but is still in somewhat indifferent health; Mr. Alfred Spender, who met with a most unfortunate accident whilst visiting the Sakkara Tombs, has also left for home; while Sir Rennell Rodd, with whom are Lady Rodd and Miss Rodd, is staying here a little longer.

Lord Milner is now in Jerusalem, where he is the guest of the Chief Administrator, Sir Louis Bols, at the German Hospice on Mount of Olives. He made the journey to Palestine on a Handley Page, and had as escort two D.H.'s and a Bristol Fighter. The voyage took just over four hours, the departure taking place at 11.30 a.m., and the planes arriving at a little before 4 p.m. at Ramleh, whence the journey to Jerusalem was continued by car. Lunch, it is interesting to note, was partaken of during the flight.

Charity Fete.

A very successful fête was held at the Kursaal last week in aid of that most deserving of charities, "Lady Cromer's Dispensaries for Sick Children." In the afternoon there was a monster bazaar and art exhibition, with some excellent side-shows consisting of waxworks, Spanish dances and children's frolics, and an admirable performance of a scene from "The School for Scandal." Lord and Lady Allenby were amongst the early attendants, and H.R.H. Prince Carol was an interested visitor and generous purchaser. The stallholders, headed by Lady Allenby and including Countess de Serionne, Mme. Lefevre Pontalis, Lady Harvey, Lady Oakes, Mrs. Jellicoe, Mrs. Phillips, Lady Rowlatt, Mrs. Devonshire, Hon. Mrs. Home, Mrs. Greg, Mrs. Walton, Mrs. Spong, Mrs. Gregory and Mrs. Molesworth, did a very brisk trade, and the art exhibition arranged by Mrs. Mackintosh, to which well-known Anglo-Egyptians contributed, produced an unsuspected display of talent.

In the evening a most enjoyable costume ball took place. The Dispensaries must have reaped a golden harvest, thanks to the energetic committee who, together with all who contributed to the organisation work, are to be heartily congratulated on the success which crowned their efforts.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

MINING ENGINEER, M.I.M.M., open to any proposal. Can interest capital. Knowledge interests in Near East. Box No. 156. NEAR EAST, 1, Devonshire Square, E.C.2.

GOVERNESS-COMPANION desires POST (abroad preferred). Usual English subjects; French (acq. abroad); Music; Art (Art Teacher's cert.); needlework. £80—£100.—M. MCG., The Ladies' League, 118, New Bond Street, W.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

BRISTOL
GRAND SPA HOTEL.

EXETER
ROYAL CLARENCE HOTEL
(facing beautiful Cathedral).

LONDON
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.
Self Contained Suites.

THURSDAY, APRIL 8, 1920.

THE FUTURE OF FOREIGN ADMINISTRATION.

The possibilities and prospects of foreign administration are of so much practical interest at the moment to large portions of the East that it may be well to direct attention to some striking object-lessons furnished to the subject by the experience of the past few months. That experience discloses two groups of phenomena which at first sight appear to be in direct conflict. On the one hand we have had exuberant, but perfectly sincere, expressions of gratitude to the foreign administrators who have rescued this country or that from anarchy or organised oppression; on the other, we have heard insistent demands for the curtailment or abolition of foreign administration in regions which have enjoyed it for a longer period. Why, it may be asked, is Egypt restive, while Mesopotamia is grateful? Is the explanation to be found solely in the varying efficiency of different administrations, or is some more general cause at work? We believe that a general cause exists, and that its nature and operation should be clearly understood by every Power which aspires to receive a mandate over any of the backward portions of the world. In other words, we believe that the conflict of which we have spoken is apparent only, and that a nation which administers another must expect a steadily diminishing return of gratitude, however efficient, and however disinterested, its work may be. The men who have to establish the elements of administration out of chaos have a comparatively easy task, and are reasonably certain of their reward; there are abundant examples to show that chaos can be cured by a handful of British subalterns, while the immediate benefit is so obvious to the subject race that, for the time being, subalterns and subjects remain on the best possible terms. Memories, however, are short, and when the elements of security have once been firmly established, these friendly relations are destined to become obscured. The administration develops rapidly, and its complexity soon becomes irksome; professional and scientific officers replace the amateurs who laid the foundations, and bring their theories with them; taxation tends to increase; and friction becomes manifest where at first everything went smoothly. The old anarchy is quickly forgotten, benefits are accepted as matters of course, restrictions, however desirable, give rise to resentment, and any failure to maintain the highest theoretical standard becomes a grievance to men whose fathers were at the mercy of casual robbers and organised oppressors. The change is accelerated by the spread of education, which in these days must be one of the first cares of every foreign administrator; eventually a point is reached where the subject-race, or at least that portion of it which has reaped the chief benefit of foreign intervention, becomes convinced that intervention is unnecessary, and that it can do for itself all that its foreign rulers are trying to do on its behalf; national self-consciousness appears upon the scene, and the governing power is confronted with a situation widely at variance with its earlier experience. What view should be taken of this change?

At first sight it may be regarded as a breakdown. Foreign administration has brought not peace but a sword, and, if its object be defined as the contentment of the subject-nation, we must agree that the object has not been secured. If, however, the object be defined as advancement rather than contentment, a different verdict will be brought; the appearance of a national self-consciousness must then be regarded as a concrete achievement, signifying that the ward is growing up, and it must be accepted as a clear indication that the time for a change of methods has arrived. The British Empire has pronounced definitely for the latter view; Mr. Montagu's visit to India, and the Milner Mission in Egypt, are precedents which no other Power can afford to disregard, and while the future of both these countries may be uncertain, and many perplexing questions may remain for disposal, the outstanding fact of the situation is the clear recognition of the principle that foreign administration is essentially a temporary expedient. With us the old ideal of economic exploitation has long been dead, the ideal of placid contentment which succeeded it has now gone the same road, and the accepted function of a ruling Power is to bring new nations into existence, and to train them for the management of their own affairs. It is not too much to hope that in this matter the dearly-bought experience of the Empire may in time be taken as decisive by the world at large. We cannot yet claim that the principle is universally established, for even now the dream of exploitation is not entirely absent among the aspirants to mandates for various portions of the East, but Britain still leads in the region of political ideas, and the new Indian constitution, whatever be its ultimate result, must stand for all time as a beacon which indicates the true course, though it may not suffice to ensure safety from all the reefs and shoals by which that course is beset. We are confident that, in the future as in the past, the best minds of other countries will follow closely the developments of British action, profiting by our inevitable mistakes, improving on our pioneer measures, but recognising that the thing we have tried to do is right.

What, then, are the mistakes which other nations will do well to bear in mind? We may admit that they are many, that some of our difficulties have been created by ourselves, and that, where trouble has arisen, all the original sin has not been on one side. It would serve no useful purpose to recapitulate the list of recent errors in Egypt, nor need we dilate upon the blots on our Indian administration; but it is important at the moment too lay stress on one omission in particular, which has contributed very materially to the bitterness of the present situation, not merely in Egypt but in some strata of progressive Indian thought. We have allowed the subject-peoples to forget the past, and to dream of a mythical golden age which can be restored by the simple expedient of thrusting out the foreign intruders. It will be many years yet before we have reaped the full harvest of this disastrous crop, but already we can estimate its volume from the widespread racial feeling which is undoubtedly the most disquieting feature of the present situation. It is not good that nations should forget the pit whence they were digged, and, in the light of our experience, every ruling Power should recognise a primary obligation to keep the true past plainly before the subject's eyes. There would be much less bitterness in India to-day if the people who talk and write had been taught to realise the miseries of their country in the centuries when they honestly believe that it was great and prosperous; the knowledge is there, but it is for the most part buried in costly folios or inaccessible records, and merely for the want of it, even leaders of Indian thought indulge in visions of which a schoolboy ought to be ashamed. But the past, though it is important, is not everything, and it is not less urgent to tell the subjects of the future which lies before them. Here again we have been at fault in India as in Egypt; we could have set before the peoples a true and worthy object of endeavour, but we left them too long without a guide, and we must not complain if some of them have been misled by false or phantom lights. The nations who have to follow in our footsteps will be well advised to learn by such mistakes as these, and to realise that the successful accomplishment of their task requires the political education of the subject-races, an education which shall look forward as well as back, which shall show them both what they were and what they may hope to be, and which shall train them up in the methods by which those hopes must find their realisation.

SOME WAR-TIME REMINISCENCES OF PERSIA.—I.

By BERNARD SOUTHAM.

I was in Teheran in August, 1914, when Reuter's telegrams arrived bringing the news of the outbreak of the European war. Persia was in its usual state of general insecurity, roads infested with brigands, a bankrupt and currupt Government, and the general situation of affairs offering no inducement whatever to private British concerns to stake their money on any pretentious enterprises.

The happenings in France in those early days of the war had a bad effect on British prestige in Persia, and when Turkey dared to declare war against Great Britain it fell to nothing. The Germans employed clever agents all over the country, who gradually turned the sympathy of the bulk of the people against us, and after the fall of Kut in the spring of 1915 the situation of the Allied subjects in Persia was anything but comfortable. By the autumn of that year public feeling had gone so much against us that in several places in the provinces outrages were committed against British firms. Violence and sabotage were freely indulged in, and were openly planned and organised by Persians at the instigation of German agents. The general situation became so bad in November that it became necessary to bring in Russian troops to protect the lives and interests of the Allies in Persia. Troops were landed at Resht and moved across to Koum by a line which passed about thirty-five miles south of Teheran—a march of some twenty days.

November 15, 1915, will never be forgotten by those who were in Teheran. Upon receipt of news of the Russian advance towards the capital the Germans, Austrians, and Turks were seized with panic. Led by their diplomatic representatives, they left Teheran in the morning and halted at Shah-Abdul-Azim, some five miles south of the town. They pleaded with his Majesty and his Ministers to leave with them, urging his Majesty to throw in his lot with them and transfer his capital to Ispahan. At Shah-Abdul-Azim the staffs of the German and Turkish Legations waited all day in full uniform for his Majesty to join them; they were supported by several hundred Persian gendarmes under Swedish officers. The bazaars closed and immense crowds thronged in front of the Palace, watching for the trend of events. Finally, towards sunset, and thanks entirely to the efforts of the British Minister, the Shah announced his intention to remain in his capital. The Germans and Turks, together with the gendarmerie, and many of their Persian friends, then marched to Koum.

Simultaneously with the advance of the Russians, the major portion of the Persian gendarmerie, led by some of their Swedish officers, ignoring the Persian Government's orders and declarations of neutrality, organised reinforcements of irregulars, and marched against the Russians. Fighting occurred in the first instance at a spot some forty miles south-west of Teheran, and subsequently at several places on the Russian line of march. The Russians drove the Persians (who were now styled rebels by the Persian Government at Teheran) before them, and entered Koum in December, 1915. It does not lie within my province to describe the diplomatic and political activities which were going on in Teheran at this time, but every day had its excitements.

During January, 1916, the Russians advanced on Sultanabad from Koum, Sultanabad being occupied by rebel troops supported by tribesmen from Luristan. There were, of course, numerous Germans and some Swiss and Swedes directing operations. Acts of sabotage had been indulged in, such as the looting of the British Bank and the British firm of Zeiglers'.

The Russians were opposed about half way along the road at a place some thirty miles from Koum, but the rebels fell back before them and evacuated Sultanabad, which the Russians duly occupied.

Simultaneously with the events which I have narrated disturbances occurred in other parts of Persia. Successful German intrigues and bribery caused the evacuation of Allied subjects from several towns in Eastern Persia. In January, 1916, the British colony at Yezd were obliged to flee, and their only loophole to safety was a march to Teheran. This journey of about 300 miles was accomplished on donkeys, no picnic considering the rigours of the Persian winter and the brigand-infested roads.

The winter of 1915-16 was remarkable for the lack of rain and snow. This caused a shortage of water all over the country, and economic conditions became bad and food scarce. The situation in Ispahan and in southern Central Persia was all against us. Ispahan was chosen by the Germans as their main base of operations. From here they schemed and plotted to turn the tribal countries such as the Kashghais, Kuhgalu, Bakhtiari, and Lurs against us. Englishmen were openly insulted in the streets, and an attempt was even made to assassinate the British Consul-General.

Meanwhile the Russians had advanced to Hamadan, and actually crossed the Persian frontier into Mesopotamia beyond Kermanshah, thus for the time being upholding the prestige of the Allies in those parts; but unfortunately it was only for the moment. The Russian troops were ill-equipped, and were not even supplied with sun helmets. Casualties from sunstroke occurred in thousands, and they were forced to return to the higher ground over the Persian frontier.

The Turks now advanced against the Russians, and quickly drove them right back to Hamadan, some 200 miles. With the Russians thus held up, some alarm was caused in the capital, but as long as they were able to hold Hamadan there was no cause for panic. But in July (1916) the Russians were driven out of Hamadan. Their main army fell back on a mountain pass on the Kasvin Road, and the army covering Sultanabad and Koum was driven back to Sultanabad. The situation in Teheran became dangerous for the Allies, for a party of enemy cavalry could have ridden across country to Teheran unopposed, and would have been welcomed with open arms by the Persians. It therefore became necessary to evacuate the women and children. This was done, all of them being despatched in motor lorries down to Enzeli, the Persian port on the Caspian Sea, which was, of course, in the hands of the Russians. Arrangements were also made for the rest of the Allied colonies to escape, should it become necessary, by riding through the Elburz Mountains to another port on the Caspian.

As soon as this serious situation became known amongst the Armenian community of Teheran (which is a very large one), what may be described as a panic ensued. The Armenians hastily sold all their belongings, such as furniture and household effects, and many wonderful bargains could have been made. All of them left Teheran and found their way down to Enzeli, and other Caspian ports, their means of transport being carriages, horses, donkeys, and "Shanks's pony." However the Turks, chiefly through transport difficulties, did not advance any further, nor attempt a *coup de main* on Teheran, and during August the Russians were able to send up sufficient reinforcements to the front to make a further Turkish advance extremely unlikely. Consequently, in September, everyone returned to Teheran, and a little later the Turks retired somewhat and the Russians were able to occupy Hamadan again.

The position remained unchanged throughout the winter of 1916-17, but in parts of Persia a famine ensued. It was particularly bad in the tribal countries, and during this winter I was sent on a journey through the Bakhtiari and parts of the Kuhgalu countries, down to Mohammerah on the Persian Gulf. I witnessed some truly pitiful spectacles on this journey; the roads and tracks were literally strewn with dead and dying mules, donkeys and camels. The condition of the natives was not very much better; they managed to find sufficient nutriment to keep them alive from bread made from acorns, which abound, and fat and milk from goats. This bread resembles a mixture of peat and mud, baked into a tough cake. Needless to say, I carried my own rations, and managed to shoot something every day to augment my tinned fare. It was a significant fact that whenever I was the guest of the various chiefs, their castles were the acme of luxury and comfort, and good food was plentiful.

In some of the villages the poverty was so great that clothing among the natives was scarce. Persia depends entirely on her foreign imports of cloth, etc., for clothing; imports had of course long since practically ceased, and the cost of cottons and cloths had risen to such a high price that they were beyond the reach of these tribesmen. I noticed, however, whenever we struck a particularly poor village that the men were always pretty well-dressed with patched-up clothing, and that the women seemed worse off, and, in some instances, almost naked. It was no uncommon occurrence to arrive in a village almost buried in snow, to be at once surrounded by almost naked women, imploring us to give them clothing, money, or food.

II.

A short description of the military operations which were taking place in Western Persia at this time may be of interest. From September, 1916, to March, 1917, military operations by the Russians were carried out in a most inefficient manner. No real attempt was made to smash the enemy, who used to attack the Russian position at Sultanabad about once a week. On the alarm being given the Russians would go out at their leisure, and after two or three hours of grotesque long-distance rifle firing, and now and again a few shots from guns on both sides, the combatants would retire for a week. This little game went on for months. On New Year's Day, 1917, the Russians did

Digitized by Google

advance, and occupied the large and important town of Doulatabad, on the borders of Luristan, but they were promptly driven out by the Turks on the same day, and came hurtling back to Sultanabad, some fifty miles, without stopping.

I think it was on Tuesday, February 20, 1917, that news was received by the Russian commander at Sultanabad of the recapture of Kut and the wild retreat of the Turks towards Baghdad. The Turks were now bound to clear out of Persia. The Russians did not move out of Sultanabad until Saturday, the 24th, and then took forty-eight hours to reach Doulatabad, some fifty miles, and, of course, found that the Turks had long since left. They remained there until Wednesday morning before continuing the "hot pursuit" of the enemy. The Turks were able to evacuate Persia in perfect comfort and at their leisure, instead of being very badly smashed up, as they should have been.

The Russians behaved very badly towards the Persian peasants, looting and ill-treating them disgracefully. Their discipline was worse than lax, looting being looked upon as a good joke; and their guns, rifles and accoutrements were so badly kept that they resembled old scrap iron.

The rains failed again this winter, and general famine became a certainty. No real attempt was made by the Persian Government to combat the inevitable famine; on the contrary, most of the rich Persians commenced speculating, by buying up and cornering wheat and barley. By December, 1917, starvation prevailed, and the Persians were dying in thousands. An epidemic of typhus broke out and spread all over the country. It is quite beyond my power to describe the horrors and miseries of the winter of 1917-18 in Persia; suffice it to say that the streets of Teheran, in spite of the efforts of the police, were never clear of dead people. Dead camels, mules, and donkeys were immediately seized and devoured raw as they lay, where they had fallen exhausted. I saw a dead camel lying some four miles away from the town, and the smell of its putrefying body had evidently reached the noses of the starved, for it was surrounded by some twenty or thirty people who were tearing away its putrified flesh with their hands and eating it ravenously. Cannibalism also took place, particularly in Western Persia; but I have said sufficient about the horrors of this famine.

In February, 1918, a soup kitchen was opened in Teheran, and food was purchased and cooked, chiefly with funds subscribed by the British in the city. It was under British management, and between its opening and May some 250,000 doles of food were made to the starving poor. Similar soup kitchens were opened in most of the big towns in other parts of the country.

During the winter of 1917-18 the safety of the Allied subjects in Teheran again became threatened. Owing to the Russian Revolution the Russian Army had long since disappeared from Persia. Germans and Austrians had again appeared in Teheran, and a Persian Cabinet openly hostile to the Allies reigned supreme.

In January, 1918, a spark of British prestige was kept alight by the arrival in Teheran of a British aeroplane from Baghdad. This was to all intents and purposes the first aeroplane seen in Persia, although some years previously a Russian did attempt to give an exhibition—he flew about a mile and then crashed. The British machine landed in Teheran and flew back to Baghdad again. Before coming to Teheran the pilot had left his machine-gun behind, for it was said that had an armed British plane landed in Teheran it would have been interned by the Persian Government. This event caused a good deal of excitement and interest among the Persians.

A very considerable force of Jungali tribesmen congregated at Resht; they were organised and equipped by Germans. The Turks again advanced into Persia, this time from the Caucasus, and occupied Tabriz, which town was promptly evacuated by the Allied subjects. In the early spring the British Consul at Resht, also a British officer travelling to Teheran, and the manager of the British bank, were made prisoners by the Jungali tribesmen. The tribesmen then advanced towards Teheran as far as Kasvin. Our position in Teheran now became desperate. The British force was already on the way from Baghdad, but it appeared very doubtful whether it would be able to arrive in time to save the situation. However, an advance column arrived at Kermanshah in April, and joined hands with some Russian volunteers. This force moved forward, and in May British military headquarters were established in Kasvin.

Abundant rains and snows fell during this winter throughout the country, but owing to the scarcity of grain for seed purposes, not nearly sufficient grain could be sown to meet normal requirements. The grain sown in 1917 for the rain crops (crops not artificially irrigated) failed owing to the lack of rain to germinate, and remained in the ground dormant for two years, and then actually germinated in 1918. This, I imagine, was a very extraordinary occurrence.

(To be continued.)

NEWS IN BRIEF.

M. Pashitch has arrived in Belgrade.

Serbia has decided to reopen diplomatic relations with Germany.

A law has been promulgated in Cairo declaring aerodromes a State monopoly.

Arrangements have been made at Delhi to celebrate the King's birthday on June 5.

Mgr. Cherubini, the Apostolic Nuncio to Serbia, arrived at Belgrade on March 27.

Thirty thousand Russian refugees from the Red terror have now arrived in Yugoslavia.

The Legislative Council at Delhi has passed a Bill creating a Red Cross Society in India.

Hungarian troops have begun an advance into the territory evacuated by the Roumanian Army.

Orders for the demobilisation of the Yugoslav Army were given on March 22 by the Belgrade Government.

The Commission of Inquiry into the Nile Projects sitting in Cairo has been authorised to take evidence on oath.

Arab tribes have made further raids on British convoys on the Upper Euphrates and have caused some casualties.

According to an official statement, out of eighty-six labour strikes in India, twenty-eight have occurred in Bombay.

Fifteen well-known Moslems have been prohibited from speaking at or attending public meetings in Rangoon for two months.

In view of the urgent need to restrict the consumption of coal, the Egyptian Government has decided to suppress Sunday railway traffic.

As a sequel to the demobilisation of the Roumanian Army, the Averescu Government has dissolved the Roumanian General Headquarters.

Legation Counsellor Kahn, formerly the German Controller of the Egyptian Public Debt, has been appointed German Chargé d'Affaires in Rome.

According to a telegram from Jamshedpur received in Bombay, the strike at the Tata Ironworks has been settled, all the men having resumed work.

Enormous quantities of arms and ammunition seized from the Turks in Constantinople were recently discharged at Malta by the British steamer Mercedes.

Our Malta Correspondent informs us that the Committee of Privileges of the Maltese nobility has been formed, with the Rt. Hon William Henry John Baron North as Hon. President.

In the elections for the Sobranje (Bulgaria) the representation of the Agrarian Party is reduced from 113 to 110, the Communist Party increased from 48 to 50, and the Progressives from 7 to 8.

Complaints have been received from British troops in Constantinople to the effect that the home mails posted in England on January 11, 13, 19, 21, 22, and 25, were not delivered until February 20.

A message from Rangoon states that four Buddhist monks, who were accused of a murderous assault on a European party at Weindawya Pagoda, Mandalay, have been sentenced by the Sessions Judge to terms of imprisonment varying from 10 years to transportation for life.

Seven large stone figures have just been placed in niches above the north porch of Exeter Cathedral. They are the gift of an anonymous donor in thanksgiving for the conclusion of the war. They represent saints of Allied countries, namely:—St. George of England, St. Denis of France, St. Joseph of Belgium, St. Vladimir of Russia, St. Ambrose of Italy, St. Cyril of Serbia, and St. Methodius of Roumania

There has just arrived in this country the first postage stamps issued by the Armenian authorities. The set, consisting of twenty-nine different stamps from the 2-kopecs to 10-roubles, are the ordinary Russian adhesives, over-printed with an Armenian device, said to represent H. and P., the initials of the Haygagan Post—i.e., Armenian Post—enclosed in a frame These provisionals were issued from Erivan, the capital, and it is understood that a permanent set is being prepared in Paris. Some of the values are imperforate, and many exist with the design inverted.

The Secretary of State for India has received the following communiqué, dated March 13, from Mesopotamia:—"Bin Rashid, who has recently secured a notable victory over the Ruwalla, and has captured the towns of Jauf and Sakaka, has sent an emissary to Baghdad in order to inform the Mesopotamian Administration of the new turn that events have taken and to discuss his future relations with His Majesty's Government. Arab officials in Deir-az-Zor have made a number of forced loans from merchants, and trade between Mesopotamia and Syria, which was until recently flourishing, has practicaly ceased."

Lady Sykes has received a letter from General Gouraud, High Commissioner of the French Republic in Syria and Cilicia and Commander-in-Chief of the Army of the Levant, expressing his pleasure at being associated in her work for the relief of the Chaldean people. The Chaldeans have, he says, special claims on the gratitude of the Allies, at whose side they fought with such courage during the war, and to succour them in their distress is to crown charity with justice. The General adds the hope that it will be possible for French charity to co-operate with English, and promises his own support so soon as means are found for transmitting the funds collected. He states, in conclusion, that he is already making inquiries as to suitable persons to carry out the distribution on the spot, and will communicate the results of his investigations as early as possible.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Very satisfactory results are shown in the report of the National Bank of India for the past year. The balance-sheet this time totals at £42,366,947, as against £32,707,668, substantial increases being recorded in respect of every item. Current and deposit accounts now figure at £35,164,356, as against £27,517,994, discounts and loans amount to £11,885,665, as against £10,259,738, while the strength of the bank's position is emphasised by the increase in cash on hand from £5,872,613 to £8,211,702. The net profit for the year amounted to £452,200, an increase of £48,400 on the figures for the previous twelve months, to which has to be added £123,400 brought in, making the available total £575,600, as against £543,500. It is proposed to maintain the dividend at 20 per cent. free of tax, to place £150,000 to the reserve fund, and to carry forward £135,600. The allocation to reserve is less by £50,000 this time, but during 1919 that fund was increased by £450,000, including the addition of share premiums, and the fund now amounts to £2,000,000, as compared with a paid-up capital of £1,500,000.

***

The financial position of Yugoslavia as shown by this year's Budget proposals adds further emphasis to what I have said in these columns regarding the paramount necessity for rapid progress in reconstruction. This year provision is being made for an expenditure of three times the amount of the receipts. Various measures are stated to be under contemplation to increase the revenue, such as the extension of the Serbian system of taxation to the whole of Yugoslavia, an increase of perhaps five times the number of the existing taxes, a substantial increase in the amount of various taxes, and an entertainments tax. But the position is not to be solved merely by the imposition of fresh taxation. That way lies even more serious difficulties than those with which the authorities are confronted. The real trouble is the lack of progress made in the reconstruction of the normal life of the various countries now constituted into Yugoslavia.

***

Egypt's present economic position is reviewed in the recently issued Note on the Budget for 1920-21, by the Financial Adviser to the Egyptian Government, Sir Paul Harvey. The predominant features of the situation, it is stated, are the enormous increase in the country's accumulated wealth and the greatly increased cost of certain commodities and housing accommodation. Egypt's foreign investments made since 1915 are estimated at £E152,000, while the growth of private deposits from £E6,500,000 before the war to £E35,500,000, and the reduction of mortgage loans from £E40,000,000 to £E28,000,000 are also instanced as showing the great increase in the country's wealth. The resultant prosperity, it is pointed out, has not, however, been evenly distributed, and the poorer classes here suffered severely from the high prices. "The situation," it is added, "cannot be viewed without considerable anxiety. The disturbing factors are mainly beyond Government remedy, but no effort will be spared to devise means for reducing the suffering entailed thereby and to hasten the adjustment of local conditions thereto."

***

It is explained that the high prices are probably mainly due to increased purchasing power applied to a restricted supply, and the difficulty has been accentuated by the tendency to extend the cotton area at the expense of cereals. The Government hoped to ease the position by obtaining a reasonably cheap supply of certain articles, chiefly wheat and flour, which are the staple food of the inhabitants, and it has secured wheat and maize sufficient to last until the harvest. The estimated loss of £E2,000,000 on the sale of wheat at a reasonable price will be met by the new cotton tax, which the Financial Adviser remarks, places the burden where it can best be borne—namely, on the cotton producer. While the Government's present policy is limited, it is stated, to the above measures, and while it is reluctant to use any arbitrary powers, nevertheless it will not hesitate, if it is necessary, suitably to act to protect the community against speculation. It is hoped that it will be possible to meet the country's cereal requirements by imports, but it might prove necessary to take steps to secure that an adequate area is sown under wheat, and this would depend on the world's next grain harvest.

***

The possibility of obtaining coal from Asia Minor to relieve the fuel problem in Italy has been much discussed in the Italian Press of late, particular attention being devoted to the Heraclea field, where some Italian interests exist. It was pointed out in a recent article in these columns that there are immense reserves of coal in that field. One estimate, indeed, puts the figure at not less than a billion tons. The coal is, however, of poor quality, and as its cost in Constantinople is only slightly less than that of Welsh coal it would seem poor economy to look for supplies in that direction, seeing that it would mean paying the price of good coal for an inferior product of very limited use. Still, in view of the coal problem, Italy might consider that worth doing as a temporary expedient.

***

The position with regard to the cable services seems much the same. There may be some improvement, but it is not very visible on the surface, and complaints are still far too numerous regarding delays in the service. One case cited recently is that of cables despatched from Bombay and Karachi respectively on March 11, both of them reaching their destination in London on March 24. For a cable between this country and India to take something like thirteen days is surely beyond a joke. The position is much the same both ways, and it is not surprising that business should be hampered, and that traders should have sustained serious losses in the process. I have no reason for thinking there has been any great improvement in the position with regard to the Near East as a whole, though cable communications with some of the countries concerned are apparently approaching the normal.

***

The question of the resumption of commercial relations with Russia is referred to in an article on "The Co-operative Movement in Russia," in the current issue of the *Journal* of the British Chamber of Commerce of Turkey and the Balkan States. Our contemporary expresses grave doubt whether the promises of the Bolshevists can be relied upon, and remarks that it is difficult to tell how we are to safeguard the interests of merchants who are brave enough to do business with the Soviets. "If trading in South Russia was a gamble," says the *Journal*, "what is it going to be in Bolshevist Russia?" and it advances the view that the British merchant will be well advised "not to attempt anything serious in that direction, at any rate, not until such a time as his own Government is prepared to furnish substantial guarantees securing his personal interests." Unquestionably, there can be little prospect of the resumption of trade except under conditions which impose no more than the normal commercial risks upon the trader, but given satisfactory assurances on this point it is to be hoped that traders in this country will not be lacking in enterprise, for unless trade is begun with the Bolshevists there would seem to be no prospect of the resumption of commercial relations with Russia.

(Reports from Our Own Correspondents.)

EGYPT.

Cairo, March 15.

The Economic Situation.

The Government appear to be taking very extensive measures to deal with the economic situation. The Supplies Control Board, which was created in the spring of 1918, has been dissolved, and replaced by a Department of the Control of Supplies, under the direction of Mr. R. E. Monteith-Smith, who was formerly a member of the Egyptian Government Supplies Commission. The new department will depend directly upon the present Minister of Agriculture, Mohamed Shafik Pasha, himself an expert on local economic questions, and will have an advisory board consisting this time not only of Government officials, but also of representatives of the non-official element, which after all probably knows more about supply matters, and is in closer touch with the people than the bureaucratic element.

Arrangements are being made to import considerable quantities of wheat and maize from now onwards until the end of the year, and flour, in which a certain quantity of maize will be mixed, will be issued at prices very much below the cost price, the loss being met by the proceeds of the recent tax on ginned cotton. Already the appearance of Government flour has had an influence on local prices, and there is every hope that the profiteers, both mercantile and fellaheen, will before long be forced to unload their hoards for fear of a further substantial drop.

A very laudable effort is being made to form co-operative societies all over the country. These societies are to work with capital supplied by rich Egyptians, and with the profits they make are to reduce the sale price of foodstuffs to the poor. Whilst this effort deserves every assistance and encouragement—for in a country like Egypt co-operation is the panacea for most of the economic troubles from which it has been suffering and will suffer—it will be necessary, for obvious reasons, on which there is no need to dwell at the present moment, for a very close control to be exercised over the development and activities of this movement.

Inland Transport Problem.

Owing to the difficulty of obtaining coal, the question of inland transport promises to be very critical. Already the Railway Administration has intimated its intention of considerably reducing the number of trains, as the quantity of coal available is not sufficient to meet the requirements of the present train service. It is to be hoped that arrangements will be made during the next two or three months to obtain an adequate supply of coal for Egypt, otherwise the ginning and moving of the coming cotton crop will be seriously interfered with. It is no use crying over spilt milk, it is true, but those who for years have advocated State encouragement for water transport and the conversion of railway engines from coal to liquid fuel consumption are now being fully justified.

CYPRUS.

Stocks of Carobs.

March 13.

Again there have been heavy rains. Large quantities of carobs (locust beans) of last year's crop remain unsold, the price asked not having been realised. There must be 40 to 50 thousand tons awaiting shipment. The price for the best beans is about 36s. 6d. the kantar. The price of kibbled beans, now largely used as food for cattle and horses, is about 7½ piastres (9 piastres equals 1s.). It is still too early to offer any forecast regarding the cereal harvests, but considerable damage has been done by the extreme cold to many fruit trees and crops.

MALTA.

Malta, March 20.

British Empire Exhibition.

The Government of Malta does not propose to participate officially in the above exhibition, which is to be held in 1921, or to afford any financial assistance or guarantee, but in the event of local manufacturers wishing to send exhibits the Government has intimated that it will give all reasonable facilities.

Farmers have been greatly relieved by a copious rainfall. With summer near and a rainfall much below the average matters were beginning to look serious.

AGRICULTURE IN CYPRUS.

The first part of an interesting article on the Agriculture of Cyprus, by Mr. W. Bevan, Director of Agriculture in the island, appears in the current issue of the *Bulletin* of the Imperial Institute. The subjects dealt with include live stock, dairy produce, cereals, fruits, nuts and vegetables.

The Messaoria Plain is the great corn-growing area, and in ancient times the island produced sufficient wheat to supply all the needs of its population, which then numbered over a million, the annual production amounting to about 10,000,000 bushels. At the present time, with a population of a little over a quarter of a million, only about 2,000,000 bushels of wheat are being produced, but the yield could be greatly increased by better methods of husbandry, by the use of improved implements for cultivating and reaping, and by the use of threshing machines. The methods practised have changed little for ages. The old wooden plough is still used, whilst the threshing-floors are practically identical with those of Biblical times, consisting merely of a levelled piece of ground, sometimes paved with flag-stones. A stout board, studded on the underside with sharp flint stones (the *tribulum* of Virgil), is drawn over the spread-out sheaves by mules, donkeys, or oxen. Large quantities of barley are grown, the production in 1918 amounting to over 3,000,000 bushels. Most of this is used locally for feeding cattle, but some is exported to England for malting purposes.

The Sudan Plantations Syndicate announces that 150,000 shares of £1 each are to be offered at £3 per share to the shareholders in the proportion of one new share for every share held on April 17. The right of renunciation will be given.

The Roumanian Press Bureau in Paris announces that the Government of Bucharest has taken steps to have the Roumanian coupons that have not been met for three years owing to the war paid in Paris.

It is announced that the name of the London County and Westminster Bank (Paris), Ltd., has been changed to the London County Westminster and Parr's Foreign Bank, Ltd. In all other respects the arrangements remain as before.

FIELD FOR BRITISH PIANOS.

Opportunities in the Near East.

An opening in the Near East markets of which little or no advantage was taken by British manufacturers before the war was that for musical instruments. There was no question of doubting the prospects in that region—as a matter of fact, the majority of firms probably did not even trouble to consider whether or no it was worth their while to enter the Egyptian, Turkish, or other Near Eastern markets—it was, indeed, merely the old story that firms were content with existing markets, where the demand was sufficient and stable enough readily to absorb their output. Enterprise would have dictated an attempt to enter new markets with a view to a larger turnover; but of this there was no sign, this trade, in common with so many other branches of industry, being content to adopt in the main a *laissez faire* policy until driven to another course under the stress of competition.

As in so many other cases, Germany profited at the expense of our manufacturers, and was gradually laying the foundations of a substantial trade in the Near East. In Egypt, for instance, out of imports of pianos, organs, etc., valued at £E13,955, Germany's share was £E10,112. Turkey's imports for the same period were valued at rather less than £T50,000, and of this total imports valued at just one half that amount came from Germany. In regard to other countries, much the same tale could be told, and the markets, it must be emphasised, were growing in importance; and, but for the war, Germany, the first in the field, would in due course have reaped the benefit from the increased trade. Now, of course, the position is quite different. Once again—to lapse into metaphor—the competitors are at scratch together, and British manufacturers of pianos, gramophones, etc., have an excellent chance of introducing their goods to the Near East in most favourable circumstances. By a little display of energy, they can, if they choose, take the place formerly occupied by Germany, and in making their decision it is to be hoped that they will keep carefully before them the fact that in the future this country will not be in a position to ignore promising markets. If they harbour illusions on that point they invite a rude awakening.

It is not unnatural to suppose that the Egyptian market should make a particularly strong appeal to these firms, conditions there being so greatly in favour of the British manufacturer. Undoubtedly that market presents one of the most promising openings for the industry, in view of the greatly increased purchasing power of the inhabitants as a result of the country's immense prosperity during the last few years. Turkey is another market which offers undeniable scope. The position in regard to this country is the subject of an interesting article in the *Journal* of the British Chamber of Commerce of Turkey and the Balkan States. Reference is made to the recent formation of the new piano-makers' association, one of the objects of which is to secure for the British pianoforte manufacturing industry a dominating position in the world's markets, and our contemporary continues:—

The Constantinople Market.

Now, what is the Association or its individual members prepared to do to capture this market? One of the associate firms exhibited a grand piano, which created quite a sensation at the recent Athens Exhibition. The writer was told on good authority that the instrument was of quite exceptional merit even for its well-known makers. The same firm has now appointed an agent for Constantinople, who, armed with a single copy of their catalogue displaying some six models, including a concert grand and one player-piano, may expect to set the Bosphorus on fire, but of this we have our doubts.

Excepting in the homes of a few members of the British community, who have brought their instrument from home with them, the British-made piano is practically unknown in this country. Articles *de luxe* find a ready sale at present amongst those who have made money during the war. Pianos are almost unobtainable on the market; nevertheless, to imagine that it is possible to meet any portion of the demand by sales from catalogue is absurd. A prospective buyer would be willing to pay more for an instrument that he can see and hear sooner than order from a catalogue. What is wanted is a showroom of British pianos, from the boudoir grand to the small upright, also player-pianos, which, we are certain, will find a sale. A few reed organs, but not of the mirrored dummy-stop type, would also find buyers. Our schools require practice pianos, and would undoubtedly favour the British-made instrument; furthermore, there is a decided preference for everything English amongst the purchasing public since the war. Will the association or its individual members consider this market seriously? The present is an opportunity of introducing the British article, but this cannot be done by catalogue.

As to the suitability of the British piano for this climate, we are tempted to quote from a letter received by another member of the combine from a gunner in the R.G.A., reading as follows:—"Dear Sirs,—I have great pleasure in sending these few remarks regarding your instruments, as to how they have stood the excessive climate and rough transport used by His Majesty's Forces in Mesopotamia. For twelve months I was appointed tuner and repairer out there, and I have also had twenty-three years' experience of the profession in England. I always found your make one of the best pianos for keeping in tune, no matter how far it had to travel. Your actions were perfectly made for that part of the world, being well screwed and riveted and preventing all risks of the excessive heat interfering with the different parts. I can recommend anyone who is going East to buy one of your pianos if they wish for an instrument which is reliable and which will give every satisfaction in tone and touch for years to come."

The dumping scare which loomed high a few months ago, when both in the London and provincial Press there appeared paragraphs to the effect that 40,000 German pianos were ready and waiting to be dumped into the United Kingdom, would appear to have had little foundation in fact. The latest advices state that conditions in the German labour market are very similar to those obtaining elsewhere, manufacturers in all trades being more short of raw materials and parts than our own manufacturers, and while the piano trade is waking up, owing to the increased prices of all commodities, the prices are very high.

There is also no reason why British player-pianos should be behind those produced in any other country, seeing that they have many sterling points which claim attention. One British manufacturer at least has for several years been making an entirely metal player. The action being built on a metal "cradle," which is fixed in the ends of the piano, so that when the instrument has to be tuned or any repairs done, the entire action is simply swung to the top of the piano, thus obviating the necessity of removal. The valve sytem and tubes are manufactured of non-corrosive metal not susceptible to climatic influences. The action is on the unit system, whereby to every note there is a separate metal unit. In case of any obstruction or repair, it is possible to remove the unit corresponding to the faulty note, again without dismantling the whole action. These are the outstanding features, the keynote of which is simplicity—a quality much sought after in players.

As regards this country's trade, before the war quite one-half of the pianos imported were of German make. Even in the cheapest models, which had the largest sale, attention was paid to the demand for a showy case, with highly decorated panels and elaborate sconce, generally four in number. In the cheaper grades particularly Germany held the market. The higher grades sold on their merits.

THROUGH TRAFFIC TO PERSIA.

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR AND MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

UNITED CIGARETTE MACHINE CO. Inc.,
80, Coleman Street,

NEAR EAST COAL RESOURCES.

VI.—THE MIDDLE EAST.*

By John Kirsopp, M.I.M.E., F.G.S.

Abyssinia.

Although practically an unknown country, coal deposits are known to exist in several places. Near Adis Abeba a deposit is worked for fuel by the inhabitants, but the quality, extent, and thickness of the seams are unknown. Coal deposits are also reported to occur at Gondar, north of Lake Tsana, and upon the island of Derke in that lake; also in the valley of the Didessa river, about 31¼ miles from its junction with the Blue Nile. In 1904 an expert reported on the occurrence of coal at Chelga, about 18¼ miles north of Lake Tsana, and west of Gongar, and about 68¼ miles from Gallabat, the district lying in the valley of the Goang river, near its source, the coal beds being exposed over an area about 8⅓ miles long and 1¼ to 1⅞ miles wide. The deposits lie in a trough basin surrounded by igneous rocks, are of Tertiary age, and in an exposed section of 256 ft., seven beds of good lignite varying in thickness from 6 ins. to 1 ft. 9½ ins., and four thinner seams occur. From analysis of the samples these deposits were regarded as worth working to supply the local need for fuel in the Sudan and Abyssinia.

Arabia (Oman).

There are no coal resources in the portion of Arabia under British influence except those of Oman. The coal occurring near Soor has been declared by expert opinion to be unworkable at a profit in present circumstances owing to its unfavourable situation at a distance from the coast, and for other reasons. Coal also occurs at Masweh and Fisao, twenty-one seams varying from 1 ft. 6 ins. to 4 ft. 6 ins. in thickness being proved as extending over an area of one-quarter of a square mile. The coal is bituminous in quality, the estimated reserve being 250,000 tons.

Persia.

Coal is mined at many places, but in a very primitive way and on a very small scale, shallow shafts being sunk, which are abandoned as soon as the crude hoisting apparatus (hand windlass and bucket) is unable to cope with the inflow of water.

The Teheran Coalfield.—The Teheran-Kazvin valley contains an area of about 1,000 square miles, covered with alluvium, and bordered on the north by the Elbury range, largely built up of coal-bearing rocks, which are considered to underlie the alluvium, and to contain at least an aggregate thickness of 2 ft. of coal, which it is estimated would contain a possible reserve of 1,858 million tons of coal. In the north-west coal district the annual output in 1890 was estimated at about 11,000 tons, the following coal occurrences being worthy of mention:—At Sapidaran and Kelinrul five seams are known. At Feshend, the thickest seam known is 19 in., with a shale parting, the coal analysing 7.08 per cent. of ash. At Abyek, two seams occur, 2 ft. 2 in. and 1 ft. 6 in. thick respectively, the coal of excellent quality analysing 1-2 per cent. of ash in the thicker and 1.9 per cent. in the thinner seam, all the known coal seams above water level having been mined. At Agachah and Chamburek, in the neighbourhood of Hiv, coal has also been worked, at the former locality a seam 2 ft. 6 in. thick having been worked down to water level and three lower seams occurring, the chief one 2 ft. 6 in. thick. At Chamburek six seams ranging from 4 ft. to less than 2 ft. in thickness occur. At Khur the coal is much crushed. In the north-east of this coalfield the annual output in 1900 was estimated to be about 4,000 tons. Since then it has been greatly increased. At Shamsek, situated about thirty-three miles north-east of Teheran, three seams are known, the main one 3 ft. thick with a parting, the coal analysing fixed carbon 72.21 per cent., volatile matter 16.65 per cent., ash 11.14 per cent. At Vergedar two seams 10 in. and 20 in. thick occur, the coal being very earthy and brittle. At Gil-i-Gach the output is 325 tons yearly, the coal being very similar to that at Safidab, where six seams are found ranging from 5 in. to 30 in., the coal, suitable for gas coke making and domestic purposes, burning with a clear flame, and the annual output amounting to about 490 tons. At Piazek the mine is situated at an altitude of 7,000 ft., the seam being 30 in. thick, the yearly output being 325 tons.

At Div-i-Siah a 20-inch seam of good coal is mined; as also at Bastan and Fil-i-Zamin, the annual output aggregating 350 tons. At Alasu Valasu 30 tons a year is produced, at Yunesar 325 tons; and the combined yearly output of the mines at Garmabdar, Lalun, and Rudek is about 1,300 tons. Coal also occurs at Khatun Bargah.

The Khorasan coalfield.—The coal in this district was mined on a very small scale from ten to fifteen years ago, and the mines are now all abandoned, the shafts having been flooded in most cases. The coal is of good quality, but the seams are thin, and the total output during the period it was worked amounted only to a few hundred tons.

Astrabad, Shahrud, Bastam, and Semnan Districts.—Coal has been reported from many places in these districts, but little is known as to the extent and thickness of the seams. In the Shaver district east of Tash, at Shahkuhbala, there are said to be seams of coal; and at Tash there was a mine which had been worked for some time, the coal being carried to Gez to supply the Russian steamers. At Pir-i-Khan a seam 12 ins. thick is known; the coal is bituminous, of good quality, light, and hard. At Tazerich four seams of good coal occur, 1 ft. 10 ins., 6 ins., 5 ft., and 2 ft. in thickness respectively.

Mazanderan District.—Coal is reported from several places in this district. At Gabugah three seams are known, 1 ft., 2 ft., and 3 ft. respectively; the coal here is of poor quality. Coal also occurs in the districts of Ispahan, Shiraz, Ahwaz, and Azerbaijan, but the area, thickness of seams, and quality of the coal are not stated. Anthracite of good quality, but in thin seams, is said to occur in the districts of Kerman and Yezd.

The Sudan.

Nubian sandstone covers the northern half of this country, but, so far as its geology is known with certainty, there is little chance of finding large deposits of coal. At the town of Dongola, in Dongola Province, a thin bed of lignite 9 centimetres thick, at a depth of 9 m., was found in 1903, while sinking a well near the river bank, but London mining experts searched the district in the following winter season and sank several diamond drill bore holes, but were unsuccessful in finding any beds worth working. It is rumoured among the Arabs that coal or lignite exists at Darfur, but nothing definite is known.

* The previous articles of this series appeared in "THE NEAR EAST" on October 10, November 7, November 28, January 9, and March 18.

ATHENS HOUSING EXHIBITION.

The Department of Overseas Trade are informed that the Greek Ministry of National Economy has organised at Athens an exhibition of houses whose parts can be assembled. The exhibition is open until the end of December, 1920, but could be prolonged, should important firms declare in time that they wish to take part. Firms taking part in the exhibition must send their model houses complete and ready for use. The types of houses required are destined principally for workmen in towns and the middle classes generally, but also for the mountain population and the country people. The houses must be offered at a reasonable price, and be provided with necessary conveniences. They may be composed of one or more storeys. It is necessary that the ceilings should be high and the roof not too steep in the types destined for the population of the plains. Firms may also send buildings for schools, barracks, hospitals, public meetings, baths, etc., as well as villas and other luxury buildings for the well-to-do classes.

The cost of transport of the buildings for exhibition must be borne by the exhibitors. However, the importation of models consigned to the Ministry of National Economy will be facilitated by the dispensation of import duties and the unrestricted sale of models to private purchasers will be allowed after the close of the exhibition. A special commission will be appointed to select suitable models for the Government, who will buy them for various public bodies. The shortage of houses all over Greece, above all in Athens, Pirræus, Salonika, etc., is so considerable that the buildings exhibited, which are not subjected to import duties, should sell easily amongst the large numbers of buyers. For detailed information application may be made to Le Ministre de l'Economie Nationale Section de la Prévoyance Sociale.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 295,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

IMPORTS (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

EXPORTS (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

COINAGE.—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36·50 Drachmæ to £1.

FREIGHT.—From England, 160/- + 10 % primage.

WEIGHTS AND MEASURES.—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ¾ of a yard, stremma = ·242 of an acre.

BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

ENGINEERING.

DOMESTIC APPLICATION OF ELECTRICITY*

II. Electric Cooking Appliances.

(From Our Own Correspondent.)

The electric cooking appliances in the kitchen were of the latest pattern and type, and a complete range is obtainable which will prepare a dinner for a family of average size at an extremely low cost. These cooking ranges will not only take a good-sized joint and pastry in the oven, but will also accommodate three or more saucepans and steamers on the top. Other means of providing hot water, as by a side or top boiler can be provided if required. It is hardly necessary to say that an electric cooking stove neither gives off fumes nor smells, and provided the oven door be shut it is impossible for anyone to tell by smell that the oven is at work. Smaller pieces of cooking apparatus such as grillers and toasters were also in use in this exhibit, and by means of these it is possible to prepare a meal in a few moments. With these there is no bother about laying a fire or waiting for the oven or stove to get warm; the heat is immediately available and the electric heating element is at work instantly.

A number of appliances in the nature of accessories were also on view, amongst these being the familiar hot plates, as they are termed, which are steel or cast-iron plates kept at a fairly high temperature by an electric heater, and on which cooked meats, pastry, vegetables, plates and dishes can be kept hot and ready for use at a minimum expenditure of electric energy. These, in the small sizes, are useful in a dining room, and instead of being at all out of place in such an apartment, most people who have bought electric cooking appliances, find a particular charm in using them in the living rooms, a procedure which is possible by reason of their perfect freedom from fumes and smell.

A dish-washer, driven by a small electric motor of pocket size, and in which the water was kept at a little below boiling point by means of an electric heater, attracted a good deal of attention, and an exceptional sale for it seems assured. Side by side with this was a boot-polishing machine and a small buffing wheel for cleaning plate. Each of these was electrically driven, and required no attention so far as the electric part is concerned. All that has to be done is to switch on when the machine is required and to switch off as soon as its task is done.

The wash-house contained an application of electricity which does all the work of a washing day in practically only a few minutes, after which it is ready to undertake the wringing and drying, ready for ironing. The machine looks after the washing and wringing, an electric fan dries the clothes, already wrung almost bone dry by the electric wringer, and it is possible to obtain a very large range of electric irons, from the ordinary domestic iron, as used in a bedroom for handkerchiefs, to the big iron for pressing tweeds and other heavy cloths. An electric iron takes only a few seconds to get sufficiently hot for its work, after which it remains at a steady temperature as long as it is required for use. There is no time lost in re-heating, and no fear of either under- or over-heating the ironing surface.

In the living room of the house was a small electric toaster which toasts bread or biscuits very quickly, and enables a meal to be prepared without trouble. There were also electric kettles of various sizes, the range being shown to give an idea of the sizes obtainable. These range from dainty little kettles holding half a pint or so to big concerns suitable for a family party. In the living room, and also in the hall, was an electric cigar lighter of the familiar type, in which the act of taking the lighter off a hook switches on the current and the act of replacing it switches the current off again. There was also an electrically-driven sewing machine of the self-contained type, by which is meant that the motor and the sewing machine were in one, and current was brought to the motor terminals by means of a suitable flexible cord which could be attached to any lamp-holder, after removing the lamp, as required. In other types the motor is fixed on a bracket on the wall or on the floor, and the sewing machine is driven by a small belt. The new method is far preferable and also far safer, as there is no risk of clothing being caught up in the moving belt. All these downstairs rooms were, of course, warmed by electric radiators and lighted by electricity.

Upstairs, a number of useful and novel appliances were to be found. Every room had its radiator and its lighting fitting or fittings, as the case may be, and it may be mentioned here that some particularly neat and handy switching effects were to be seen in the rooms and corridors of this electric house. In regard to the radiators shown upstairs, it may be mentioned that each of these was of a type which would permit of the lighter forms of cooking being done in case of illness. In the room which in the absence of a guest might be used as the nursery was an electric milk warmer and a small immersion heater for warming a child's bath water. In all the rooms electric curling tongs were on the dressing tables, and another useful but masculine device was the electrically heated shaving mug. This heater brings the water to the correct temperature in exactly 60 seconds.

The All-Electric House was provided with an electric vacuum cleaner, and in the bathroom was an electric towel dryer and airer. There was also a gown rail, electrically heated, for drying clothing or for airing large linen or woollen goods, and an electric "calorifier" provided a constant service of hot water. It may be mentioned that this is automatic, regulating its own heat. It is temperature-controlled, a switch being provided which closes the heating circuit as soon as the temperature of the water falls below a certain level, which can be decided upon by the user. A master-switch cuts the whole appliance out of action any time it should not be required.

Altogether, the exhibit was most comprehensive, and not only showed what immense strides British manufacturers of electric appliances have made in the past few years, but also demonstrated more than any showroom could do the many possible applications of electricity in the modern home.

* The first part of this article appeared in The Near East of April 1.

MISCELLANEOUS TOPICS.

A Submersible Motor Pump.

One of the most interesting, and at the same time one of the latest, developments of electricity is the construction of an electric motor-driven pump in which the whole apparatus can, if necessary, be submerged without any damage being done.

It is common knowledge that submersible motors have been made before, and have been used in diving work, in pumping, in graving-dock work, and for emptying pontoons; but in the great majority of instances these motors have been of the watertight type, constructed with totally enclosed cases and with the current-carrying connections carried into the motor through indiarubber or other watertight packed glands.

Now, however, we have a departure from the ordinary and a watertight motor is at work which is not watertight at all in the ordinary way. So far from depending on any metal enclosure, the water enters freely into the entire casing, and in no way does this interfere with or impair the efficiency of the action. Naturally this type presents many advantages, and in flooded mine work in particular it should prove most useful. The invention is a British one, and both pump and motor are made by a British engineering firm. A special feature of the combination is its robust construction, which at the same time is not such as to make the whole arrangement too heavy or bulky to allow of being moved freely. As a matter of fact, the pump and motor are quite light in comparison with their capacity. Experiments have recently been carried out with the combination, and a disused mine shaft, which had been allowed to fill with water, was pumped clear in a very short time.

The plant which carried out this work comprised two four-inch pumps, each of which had a rated output of 370 gallons of water per minute at an 89 feet head. The delivery side of one pump was coupled to the suction side of the other pump, thereby forming the equivalent of a two-stage centrifugal pump which was capable of lifting the water 160 feet. The power was supplied by a portable electric generating plant consisting of an engine and dynamo. The plant was given a most exhaustive test, and ran for 37 days, during 19 of which one set of pumps ran continuously for twenty-four hours a day. There is thus no doubt that not only are the pumps well made and strongly constructed, but that the motors also will do all that is claimed for them in connection with submersed working.

LANCASHIRE COTTON.

Business very Restricted.

(From Our Own Correspondent.)

Manchester, Thursday.

The market has continued to present a very quiet appearance. Business, of course, has been disorganised by the Easter holidays. Nothing has occurred to stimulate buyers to greater activity. Although demand has been slow for several weeks, prices in yarn and cloth have been well maintained, but there are indications of some spinners and manufacturers being more prepared to consider offers. Some very interesting statistics have been published by the International Cotton Federation. It is important to note that since 1914 the number of spindles in Lancashire engaged on Egyptian cotton has increased by 2,750,000. On February 1 last stocks of Egyptian cotton in the hands of Lancashire spinners amounted to 146,916 bales, against 126,850 bales on March 1, 1914. The figures may be considered satisfactory. Although there have been fluctuations in Egyptian cotton rates during the week, the tone has been fairly steady. Buying, however, has been very restricted. According to private advices from Alexandria there is a possibility of a record acreage for cotton in Egypt for next season, and recently there has been a slight improvement in the weather conditions. Yarns made from Egyptian cotton have moved off slowly. Most of the demand has run on coarse counts for tyre cloths. A slow demand has been met with in piece goods for the Near Eastern outlets. The situation on the other side is not very bright, and there is a disposition to stop shipments and resell goods in the Manchester market. Operations for India have been very limited, although a little more inquiry has been mentioned in light fabrics such as dhooties. China has bought bleaching descriptions to a moderate extent. American yarns for home consumption have been sluggish, and the commoner qualities are now being offered more freely. Export bundles have been quiet for all outlets.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Johnston Line s.s. Pensacola, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz and Braila, will close for cargo at Liverpool on April 9.

The Cunard Line s.s. Southgate, for Piræus, Constantinople, Galatz, and Batoum, will close for cargo at Swansea on April 10.

The Prince Line s.s. Norman Prince, for Tunis, Malta, Alexandria, Syrian coast ports and Cyprus, will close for cargo at Manchester on April 15.

The Moss Line s.s. Siptah, for Gibraltar, Algiers, Alexandria and Beyrout direct, will close for cargo at Liverpool on April 10.

The Ellerman Line s.s. Austrian, for Gibraltar, Malta and Alexandria, will close for cargo at Liverpool on April 17.

The Ellerman line s.s. Asturian, for Syra, Smyrna and Constantinople, will close for cargo at Liverpool on April 23.

The Bibby Line s.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on April 21.

The Anchor Brocklebank Line s.s. Makalla, for Port Said, Colombo, Madras and Calcutta, will leave London on April 13.

Shipping Notes.

The trial trip took place at Stockton-on-Tees on March 24 of the steel screw steamer Gazana, built by Messrs. Craig, Taylor and Co., Ltd., for the British India Steam Navigation Co., Ltd., and proved highly satisfactory. The dimensions of the vessel are: 412 ft. 6 ins. by 52 ft. 3 ins. by 31 ft. moulded to upper deck. She is built to the highest class in Lloyd's Register, and is equipped with patent steam windlass, with quick warping ends, steam steering gear, ten steam winches, electric light, wireless installation, and all the latest improvements.

The s.s. Narkunda, a passenger and mail steamer of the highest class, with a gross tonnage of 16,600, which has been built on account of the Peninsular and Oriental Steam Navigation Co., Ltd., by Messrs. Harland and Wolff, Ltd., underwent successful trials recently, and left Belfast for the Thames on March 30. The vessel is 605 ft. long by 69 ft. 3 ins. beam, and has accommodation for 426 first class and 247 second class passengers. The various public rooms and state rooms are furnished and decorated in a style well in keeping with the traditions of this famous line. The general design of the first class dining saloon is after the style of the Georgian period. A handsome and stately dome surmounts the saloon, and in the upper part of the well there are fine oil paintings illustrating the seasons of the year.

MOROCCAN MARKET FOR SHOE LACES.

The demand for shoe laces in Morocco is very limited, owing to the entire absence of shoe factories, says an American consular report. All boots and shoes sold in Morocco are imported ready-made and supplied with laces. The trade is therefore confined to the renewal of laces. No marked preference has been shown for any particular manufacture, and boot and shoe laces, of whatever origin, would find sale provided the cost price to the distributor were acceptable.

There are no statistics available regarding the small import trade of Morocco in boot and shoe laces. There are approximately 100,000 Europeans residing in the Shereefian Empire. Of these about 50,000 are of the poorest working classes, who either dispense with footwear entirely or are accustomed to wear, winter and summer, the rough canvas shoes (alpargatas) of Spanish manufacture, for which shoe laces are not required. On the supposition that each of the remaining 50,000 European inhabitants requires four pairs of boot or shoe laces per annum, we arrive at a sale of 200,000 pairs per year. The average cost price at the present time is two cents per pair, so that the annual sales of this article for the entire country would not exceed £800.

The colours preferred are black and light and dark brown. There is also a small demand for gray and white. Cotton shoe laces are sold in packets of 144 pairs, or in cardboard boxes of three to six dozen pairs each. Laces of mixed silk and cotton, or of mercerised cotton, come in pieces of 100 meters, and are made up locally into the required lengths. Coloured laces are quoted about 10 per cent. higher than black and white.

All cotton, glazed cotton, artificial or wood-fibre silk shoe and corset laces imported into Morocco are subject to an entrance duty of 12½ per cent. *ad valorem*. Pure silk laces are subject to only 7½ per cent *ad valorem* duty. Articles composed of combinations of silk and other materials are taxed proportionately.

SWEDISH ORIENT LINE.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Currants and Sultanas.—There is little to add to the previous report. Owing to the holidays, the market has been more than usually quiet. It is to be noted that stocks are gradually being reduced.

Sugar.—There has been a good demand for home refined at the official rates. A quiet tone has characterised the free market. White Mauritius is quoted 113s.-114s. spot, white Java the same, West Indian crystallised 103s. to 106s., while American granulated has been done at 114s.

Coffee.—There is little change to report. New Costa Rica realised high prices at last week's auction. The futures market has been exceptionally quiet. Brazilian has been done for June at 123s., for July at 122s., for September at 119s., and for October at 118s.

Messrs. Reynolds and Gibson, in their weekly report, state:—The spot market is steady, and although sellers occasionally evince a willingness to meet buyers, the latter show indifference. The adverse foreign exchanges have caused an entire cessation of all export demand. Brazil does not press offers, and appears at present to be suffering from troubles common to us all, and is wrestling with labour unrest. Information on the subject is very meagre, but we gather that some of the railroads have been affected by strikes, and the movement of coffee consequently restricted. The cheap Brazilian offers of new crop, July-September, are not without their influence on the general situation, these having been in evidence lately as low as 110s. f.o.b. So long as the absence of foreign demand continues we must look for dull and easier markets; but on the other hand it must not be forgotten that 110s. f.o.b. shows a big discount on recent prevailing rates—viz., 130s. f.o.b. for September. The price to-day is still quoted about 125s. to 127s. f.o.b. prompt shipment, so that at 110s. there would seem to be some inducement to buy, in view of the fact that the statistical position of the article remains as strong as ever.

Oilseeds.—Transactions have been very limited. Linseed: Calcutta April-June has been done at 44s. 9d. Rapeseed has been steady with Toria Hull March-May at 43s. 6d., and yellow Guzerat February-March at 45s. 6d. Cottonseed has been quiet with Egyptian-London f.a.q. at 23s.

Oilcakes, etc.—Linseed cake is in rather short supply, and prices tend to firmness. Egyptian cottonseed cake is also a firm spot. Oils have been fairly firm. Linseed has been done at 108s. spot, 106s. March-April, and 100s. May-August. Turpentine has been steady at 220s. spot and 168s. May-August. Rape oil and cotton oil have been quiet.

SUDAN PRODUCE.

The following are further extracts from the C.E.B. report for January:—

Sesame.

Sennar Province, December.—A good quantity of sesame is coming on the market. 1,097 tons of sesame were exported by rail during the month.

Kordofan Province, January.—Sales in El-Obeid market in ardebs of 330 rottles (148 kilos). 507 ardebs at an average price of £E5.500 per ardeb.

Nuba Mountains Province, January.—Good exports of sesame are reported from Talodi, Eliri, and Kadugli.

Ground Nuts.

Nuba Mountains Province, January.—Good exports of groundnuts are reported from Talodi, Eliri, and Kadugli.

Kordofan Province, January.—Sales in El Obeid market in ardebs of 210 rottles (94 kilos); 354 ardebs at an average price of £E3.100 per ardeb.

Sennar Province, December.—Fourteen tons were exported by rail during the month.

Dates.

Halfa Province.—A January report states the crop has now been completely sold by the producers. However, a great part is not yet moved, owing to transport difficulties. As a result of the increase of camel rates, many tons of dates are being consigned via the Dongola Reach to Kararia, and thence by rail to Halfa. The prices are in Halfa market per ardeb of 300 rottles (135 kilos):—Barakawi (from Mahas and Sukkot districts), P.T.420 to P.T. 430; Barakawi (from Dongola), P.T.395 to P.T.410; Gondeila, P.T. 555 to P.T. 560; Gorguda, P.T.340 to P.T.360.

Dongola Province.—The market price during January is reported as P.T.312 per ardeb of 300 rottles (135 kilos).

Berber Province, January.—At Shadabia dates are doing well.

Livestock, Hides and Skins.

Berber Province.—Animals sold in Damar market totalled 6,776 sheep and goats and 776 cattle. Prices were good, cattle averaging P.T.840 and sheep P.T.181.

Darfur Province, December.—657 cattle imported from the west passed through El Fasher. Average prices for the month:—Bull, £E5.400 mms. (tending to drop); sheep, £E0.600 mms.; goat, £E0.500 mms. A fair number of skins have been sold in the market during the month

Red Sea Province.—Twenty-nine cattle and forty sheep were expected viâ Port Sudan.

THE WORLD'S CROPS.

The Ministry of Agriculture and Fisheries have received from the International Agricultural Institute at Rome the following information on the yield of crops in certain countries in 1919-20:—The total yield of wheat in Argentina, Uruguay, and Australia was 141,364,000 cwt., which is 97 per cent. of the yield in 1918-19 and of the average of the five previous years. The oat crop in Argentina and Uruguay amounted to 16,812,000 cwt., or 30 per cent. above the 1918-19 figure, and just over the five years' average. The yield of linseed in Argentina and Uruguay was 21,387,000 cwt., or 50 per cent. above the previous year's production and the average. The yield of rough rice in British India is estimated at 1,100,062,000 cwt., or 145 per cent. of last year's figure and 112 per cent. of the average. The condition of winter cereals is reported to be good in Belgium, France, and India, and average in Italy, Japan, Algeria, Morocco, and Tunis.

ROUMANIAN MARKET FOR MACHINERY

H.M. Commercial Secretary at Bucharest, in a report on the Roumanian market for machinery, states:—In 1913 Roumania imported steam engines, agricultural machinery, hydraulic machines, gas engines, petrol engines, electric dynamos, electric motors, telegraph and telephone apparatus, electric cables, electric light apparatus and bells, etc., sewing machines, etc. The total of such machines imported was 59 million lei, divided in the following proportions: — Germany, 35,215,000 lei; United States, 10,226,000 lei; Austria-Hungary, 7,566,000 lei; Great Britain, 3,061,000 lei.

A large proportion of Roumanian implements have become worn out as a consequence of the war; either they have been destroyed during the enemy occupation or they have suffered from intensive usage. In any case, it is considered that at the present time they have no great value. The petroleum industry, the timber industry, milling industry, the railroads, telephones and telegraphs, port installations, and the factories of Old Roumania must be reorganised, renewed and reconstructed.

To these great requirements must be added those of the new Roumania. The industries of the new provinces are more developed than those in Old Roumania, outside of agriculture. There, in the same manner, new machines and materials of all kinds are required in order to reorganise production and to revivify the economic movement. The agrarian reforms which are now coming into operation will enable Roumania to develop her agriculture and the natural wealth of her soil.

COMPANY NOTES AND REPORTS.

National Bank of India.

The report of the National Bank of India for the year 1919 states that the net profits, after providing for all bad and doubtful debts, amount to £452,169, and adding £123,464 brought forward, the available total is £575,633. The directors recommend a further dividend at the rate of 20 per cent. per annum on the increased capital of £1,500,000, amounting to £150,000, and an addition to the reserve fund of £150,000, raising it to £2,000,000. They propose to write £20,000 off house property account and to add £20,000 to the officers' pension fund, leaving £135,633 to be carried forward. Meeting, Wesleyan Hall, Bishopsgate, E.C., April 12, noon.

Samnuggur Jute.

The report of the Samnuggur Jute Factory Company for 1919 states that the accounts have been prepared on the basis of 1s 4d. sterling per rupee. The working account, including exchange, for the year shows a gross profit of £665,734. The profit and loss account, including £58,268 brought forward, and after having been debited with income-tax, excess profits duty, interest, and all other charges, shows a free profit of £403,987. The directors have appropriated against depreciation on plant £30,000, reserve fund £50,000, reserve for income-tax obligations £28,000, and for new engine and boilers installation and machinery replacements £100,000, and an interim dividend has been paid on the ordinary shares at 20 per cent., less tax. A final dividend is now recommended on the ordinary shares, including new issue, at 30 per cent., less tax, carrying forward £41,009.

Victoria Jute.

The report of the Victoria Jute Company for 1919 states that the working account for the year shows a credit balance of £407,660. After payment of excess profits duty, Indian supertax, income-tax at head office and Calcutta, and adding interest and exchange balances and transfer fees and £44,230 brought forward, the balance at credit of profit and loss is £269,793. From this there falls to be deducted interim dividends paid on ordinary shares 20 per cent., less tax, transferred to depreciation account £20,000, reserve for income-tax obligations £15,000, replacement of machinery and electric installation £60,000, reserve fund £40,000, leaving a balance of £101,434. The directors now recommend a final dividend on the ordinary shares, including new issue, of 30 per cent., less tax, carrying forward £29,378.

Titaghur Jute.

The report of the Titaghur Jute Factory Company for 1919 states that the working account, including exchange, for the year shows a gross profit of £676,198. The profit and loss account, including £83,245 brought forward, and after having been debited with income-tax, excess profits duty, and all other charges applicable to the year, shows a free balance of £448,441. The directors have appropriated against depreciation on plant £30,000, reserve for income-tax obligations £30,000, replacement of machinery £50,000, and reserve fund £100,000. An interim dividend on the ordinary shares at 20 per cent., less income-tax, has been paid, and a final dividend is now recommended on the ordinary shares, including new issue, at 30 per cent., less tax, carrying forward £83,463.

Madras Electric Tramways.

The accounts of the Madras Electric Tramways for 1919 show a gross profit of £33,839. After debiting interest and London office expenses, making provision for the debenture stock sinking fund, and transferring £12,000 to depreciation and renewal accounts, there remains a balance of £14,705, and £4,820 was brought in, making £19,525. After providing for dividend on the preference shares, less tax, the directors recommend a further dividend of 4 per cent. on the ordinary shares, making 8 per cent. for the year, free of tax; contribute £1,000 to a gratuity fund for the benefit of employees in Madras, transfer £3,000 to general reserve, and carry forward, subject to excess profits duty (if any), £4,944. The running account was adversely affected by the strike in the early part of 1919, which was referred to at the last general meeting. Wages and the cost of materials having continued to advance, revisions in fares were made during the year, but these have only partially met the enhanced cost of running. The traffic receipts and the expenditure in Madras show increases of 9 per cent. and 19.6 per cent. respectively on 1918. The debenture stock sinking fund now amounts to £11,306.

The Fifth International Exhibition of Rubber, other Tropical Products, and Allied Industries will be held at the Royal Agricultural Hall, London, June 3-17, 1921.

The will has just been proved of Sir Ratan Tata, of York House, Twickenham, and of Bombay, a Parsi merchant, largely interested in the Tata Iron and Steel Mills, and various Indian cotton and power companies. He left estate in the United Kingdom of the gross value of £191,860 2s. 9d., with net personalty £131,661 3s. 9d. His Indian property was valued for the Indian grant at Rs.1,00,18,086.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to 31, 1920 (New Style January 14 to February 13, 1920).

		Monopolies, tobacco, stamps, stamped paper & Naxos Emery	Piræus Customs.
		Drachmae.	Drachmae.
Gross receipts, January, 1920		4,771,084	4,938,259
Do. do. 1919		4,438,859	2,675,952
Estimated receipts for 1 month (Law of Control)		2,408,333	891,666
Difference between estimated and actual receipts for 1 month	1920	+ 2,362,751	+ 4,046,593
	1919	+ 1,940,525	+ 1,784,285

Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper and Naxos Emery, 49 1/5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos Emery and the Piræus Customs are converted into drachmae at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

NATIONAL BANK OF EGYPT.—At the Ordinary General Meeting of the National Bank of Egypt held in Cairo on the 29th March, 1920, a final DIVIDEND of £1 per share was DECLARED PAYABLE on the 1st April, 1920, making 28s., equivalent to 14 per cent., for the year ended 31st December, 1919. Coupon No. 27 is therefore now payable.

Forms for listing Coupons may be obtained at the National Bank of Egypt, 6 & 7, King William Street, London, E.C.4.

NATIONAL BANK OF EGYPT.—The necessary number of shares not being represented at the Extra-ordinary General Meeting convened for the 29th March, 1920, shareholders are requested to attend the ADJOURNED Extra-ordinary General MEETING, which will be HELD at the offices of the Bank in CAIRO, on Thursday, 15th April, at 4 o'clock p.m.

Shareholders desiring to be represented at the Meeting should deposit their shares at the National Bank of Egypt, 6 & 7, King William Street, London, E.C.4, not later than 6th April, 1920.

THE AGRICULTURAL BANK OF EGYPT.—NOTICE IS HEREBY GIVEN that the SEVENTEENTH ORDINARY GENERAL MEETING of the Agricultural Bank of Egypt will be held at the Head Office of the Bank in Cairo, on Thursday, the 29th April, 1920, at 4 o'clock p.m., for the purpose, among other things, of:—

Receiving the Directors' Report;
Receiving the Auditors' Report;
Approving the Accounts for the period ended 31st January, 1920;
Declaration of Dividends;
Election of Directors;
Election of Auditors and fixing their remuneration;
And the transaction of the general business of the Ordinary General Meeting.

Every Shareholder holding a minimum of Five Shares has the right to attend the General Meeting, provided the Shares are deposited at least five days before the day of the Meeting (the last day for depositing the Shares in London is the 9th April, 1920), when cards of admission and proxy forms will be handed to them at one of the following places:—

In Egypt—At the National Bank of Egypt, Cairo.
At the National Bank of Egypt, Alexandria.
In London—At the National Bank of Egypt, 6 and 7, King William Street, E.C.4.

F. T. ROWLATT, President.

Cairo, 19th March, 1920.

SUPPLIES AND PRICES IN TURKEY.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, March 5.

Exports.

Cereals.—The market is firm. Prices: Wheat (tender), Anatolian Extra, Ps. 16 the oke; I., Ps. 15½ the oke; II., Ps. 14 the oke. Arrivals of the week from Anatolia, 175 wagons of wheat and 31 wagons of barley. Flour is also higher. Prices: Extra, £T13½ 72 kilos; I., £T12½ 72 kilos; II., £T10-£T10½ 72 kilos; III., £T6½-£T7½ 72 kilos; Canadian, £T13-£T13½ 63 kilos. Arrivals of the week from Anatolia, 11 wagons of flour.

Silk.—Market very quiet, and prices especially low. No demand for Lyons nor for Milan, the exchange not being favourable. Broussa, £T29-£T29½ the kilo. Probable stock, 25-30 bales. Syrian, £T22 the kilo (price nominal). The quality is poor and the demand nil.

BALIKESSAR, February 24.

Produce exported in January, prices quoted, and market tendency: Barley, 45,500 kilos, Ps. 6½ the kilo; beans, 119,300 kilos, Ps 5½ the kilo; millet, 15,500 kilos., Ps. 5 the kilo; sesame, 17,000 kilos, Ps. 42 the kilo (all the above prices with a tendency to rise); olive oil, 6.000 kilos, Ps. 65 this year's produce, Ps. 90 last year's crop.

The absorption of Turkish pounds and mejidiehs by the capital continued during the month with the same intensity as in December.

The prohibition by the authorities of the export to Smyrna of cereals and of all kinds of food products still continues; the commerce of our region is much restricted.

Crop Forecasts.

This month we have had rain and snow alternately. The rains which fell during the first ten days of January caused some damage to sowings in the plain. Despite that, the general condition of the crops is satisfactory up to the present. No new factors are to be noted in respect of our market.

SALONIKA, February 20.

Imports.

Sugar.—During February about 240,000 okes were imported. Price. 3.30-3.50 drachmæ per kilo.

Coffee.—1,200 sacks from France, 580 sacks from England. Price, 5.90-6.40 drachmæ per oke.

Rice.—10,500 sacks of American; 508 from Constantinople; 2,440 from the Piræus. Price, 2.70-3.30 drachmæ per oke.

Cereals.—320,000 okes from Serbia; 4,000 tons from America. Price: Wheat, 1-1.10 drachmæ; barley, 0.90 drachmæ; maize, 0.88 drachmæ.

Flour.—18,000 sacks of American; 11,700 okes from Serbia. Price, 1.90-2 drachmæ.

Dried Vegetables.—850 sacks. Price, 1.50-3.10 drachmæ.

Condensed Milk.—5,400 cases American; 3,800 Swiss. Price, 83-103 drachmæ per case.

Butter.—165 barrels. Price, 9.80-10 drachmæ per oke.

Sesame.—500 sacks. Price, 3.80-4.10 drachmæ.

Sesame Oil.—230 barrels imported from England and 180 barrels from Italy. Price about 9 drachmæ.

Potatoes.—1,962 sacks from France; 3,000 sacks from Italy; 2,000 sacks from Serbia. Price, 0.75-1.08 drachmæ.

Candles.—280 cases from Holland; 198 bundles from Egypt; 25 bundles from England; 195 cases from France. Price, 6.15-6.40 drachmæ per kilo.

ON CHANGE.

Prices again Lower.

(From Our Own Correspondent.)

Throgmorton Street, Thursday.

During the few days that our Stock Exchange has been open this week business has continued dull, and prices are again lower practically all along the line.

In Government Stocks Egyptian Unifieds have gone back half a point to 72⅜, and the 3½ per cent. Prefs. have dropped one point to 60¾.

In Bank shares Agriculturals are again 1-16th down at 5 9-32, and the Preference are 1-16 lower at 6⅜; but the bonds are unchanged at 66 x.d. and 68 x.d. respectively. Anglo-Egyptian Banks, after dropping a point to 18⅜, close ⅜ down at 19. Land Banks have shed 1-16 at 6, and National Bank of Egypt have continued rather a weak market closing at 21⅜ x.d.

In Land shares Aboukirs are almost ⅛ down at 2 1-16, Béhéras have fallen 1½ points to 19, and Union Foncières are ⅜ down at 5⅜. Delta Lands have receded 6d. to 17s., and Foreign Trusts are 6d. lower at 16s. 6d. New Egyptians have given way a further 1s. to 34s., but Sudan Plantations, after dropping to 7, close only 1-32 lower at 7 3-32.

Among miscellaneous descriptions there has again been a decline of 1s. in Salts and Sodas to 54s., but Morums are 3d. better at 19s. 3d.

Amongst Greek securities the 1881, 1884, and Monopoly Loans are all one point higher, the first two at 57 and the last-named at 47, whilst Larissas has dropped a point to 57. Rentes close about unchanged at 48 x.d., and Fundings finish at 57 x.d., with the 1910 Loan quoted at 39 x.d. Turkish 4's of 1891 are half a point up at 70, with a like advance in Unified Loan to 32½.

NEW COMPANIES.

Sudan Traders.

The Sudan Traders, Limited, was registered as a private company on March 26 with a capital of £125,000 in £1 shares. Objects: To carry on the business of traders, general merchants, importers and exporters of general merchandise, timber, raw and partly manufactured materials, food products, chemicals, and machinery, shipowners, carriers, wharfingers, etc. The subscribers (each with one share) are:—A. J. Milnes, Pinners' Hall, Austin Friars, E.C.2; E. W. Lowe, Pinners' Hall, Austin Friars, E.C.2. The subscribers are to appoint the first directors. Solicitor: G. A. J. Smallman, 1, Broad Street Place, E.C. Registered office: Pinners' Hall, Austin Friars, E.C.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated March 24:—

Rain nearly general in Assam, at Chota-Nagpur and Punjab Hills. Local in other parts in Northern India and Central India. Crop conditions generally good. Bombay cotton market easy, fully good Broach, April-May, Rs.484. Piece-goods market, improved demand, with prices unchanged. Calcutta jute market steady, with interest reviving. Hessians quiet, with prices weaker. Heavy goods slack, with prices steady. Manharpur Coalfield Chord Railway reconnaissance survey, 200 miles by Bengal-Nagpur Railway, sanctioned. No change in bank rates.

COMPANY NEWS IN BRIEF.

The transfer books of the Mercantile Bank of India, Ltd., are closed until April 16.

Société Hellénique de Vins et Spiriteux.—The ordinary general meeting will be held at Athens on April 10.

Nouvelle Société du Canal de Corinthe.—The ordinary general meeting takes place at Athens to-day.

Compagnie d'éclairage de Galatz.—The ordinary general meeting will be held at Brussels to-day.

Grandes Brasseries de Bucharest.—The ordinary general meeting will be held at Brussels on April 13.

Société Tramways d'Athènes, Pirée et extensions.—The ordinary general meeting will be held at Athens on April 13.

The directors of the New Dimbula Company have declared an interim dividend of 7½ per cent. for the half-year ended December 31, 1919.

The receipts of the Egyptian Delta Light Railways for the ten days ended February 10 amounted to £E13,187, making the total for the year £E336,991.

The directors of the Central Provinces Prospecting Syndicate recommend a final dividend of 8 per cent., together with a bonus of 8 per cent., making 24 per cent., less tax, for the year 1919.

Woodend (Kelani Valley, Ceylon) Rubber and Tea Company.—Transfer books closed on and after April 8 for the purpose of preparing a list of those to whom the shares in the new company are due.

Ottoman Four per Cent. Loan on the Egyptian Tribute.—Half-yearly coupons for interest due April 10 will be paid on and after that date at the banking house of Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, E.C.

The directors of the Barsi Light Railway Company have declared an interim dividend of 3 per cent., together with a bonus of 2 per cent. (10s. per share in all), in respect of the year ended March 31, 1920, payable April 23.

National Bank of Egypt.—Final dividend of £1 per share, payable on April 1, making 28s., equivalent to 14 per cent. for year ended December 31. Coupon No. 27 is therefore now payable. Forms for listing coupons may be obtained at the National Bank of Egypt, 6 and 7, King William Street, E.C.4.

The directors of the Ooregum Gold Mining Company recommend a balance dividend for the year 1919 of 1s. 6d. per share (less tax at 6s. in the £) on both preference and ordinary shares, payable April 24, to shareholders on the books March 30, making a total for the year of 32½ per cent. on the preference and 22½ per cent. on the ordinary shares.

Egyptian Delta Land and Investment.—The annual ordinary general meeting will be held at Cairo on April 19 for the purpose of receiving the directors' report and balance-sheet for the year ending December 31, 1919, fixing the dividend, electing directors in the place of those retiring by rotation, appointing auditors for the ensuing year, and fixing their remuneration, and transacting the ordinary general business.

A daily air service is about to be started between Rabat and Tangier, in Morocco.

NOTES OF THE WEEK.

What it is to be hoped will prove to have been a thoroughly satisfactory bout of plain talking has just taken place between the British and French Governments. The trouble arose over the occupation by French troops of certain German towns without the previous consent of the Allies having been obtained. We trust that, while France's action will have the effect of convincing the Allies that the time for rapid decision has not yet passed, the tenour of the British Government's Note to the French Government will cause the latter to bear in mind that there are limits to the policy of give-and-take between Allies. It will be well if the moral is taken to heart by the French in the Near East, where a good deal seems in danger of happening which would with difficulty fall within the four corners of the spirit of the Alliance. In Constantinople, for instance, unless great care is taken, the Turks will gain the impression that it is still possible to play off one against the other, even the two chief Powers among the Allies. It is a case, no doubt, of the old difficulty of controlling over-zealous representatives on the spot; but if the French Government realised that it might be exposing itself to some more plain-speaking on the part of Great Britain, it would take greater care to exercise effective control over French policy in the Orient.

Reports of massacres that have taken place and of others that are feared to be imminent continue to reach this country from many centres where there are Armenians. Against these gloomy reports may be set the news that Aintab, which had been more or less closely invested by Turkish bands for about two months, has now been relieved, after sharp fighting, by French colonial troops. The Turks are reported to have lost a thousand killed, and though we may make allowance for exaggeration, they would seem to have received a very sharp lesson indeed. Another set-back to Armenian-baiters is announced from Karabagh, whose former Governor, described in a Reuter message as "the notorious Sultanoff, the principal instigator of the attacks upon the Armenians," has fallen into the hands of his enemies. His fate is not announced, but it is likely to be of a kind to deter others from emulating his example.

The Bulgarian elections have returned the Agrarian Party, whose leader is M. Stambouliski, the Prime Minister, to power with 112 out of 229 seats. The remainder of the seats are divided between Communists 47, Democrats 25, Socialists 7, Liberals 5, Popular Party (Narodniaks) 14, Ghenadieffists 3, and 16 Independents. Although the Agrarians have not an absolute majority, they outnumber any other single party sufficiently to allow M. Stambouliski to be sure of a working majority for some time to come: the hopelessness of the position of some of the other parties will be an inducement to many deputies to throw in their lot with the Agrarians. His chief opponents, the Communists, have been well routed, although their poll in some of the chief towns would seem to have been relatively heavy.

The thoroughness with which Bulgaria is grappling with the task of reconstruction is worthy of notice. It is a charge levelled against the Bulgarians by themselves that, while on the land they are among the most industrious of people, they are apt to lose their zest for work when they become permanently town-dwellers. If this be a national failing, it is evident that M. Stambouliski has not yet succumbed to the influence of town life. The policy of his Government is characterised by the vigour with which the country is being encouraged, some may say made, to work. Something in the nature of labour conscription is to be attempted, which will compel all classes, high and low, rich and poor, to give up part of their time to work of national importance, and the term seems likely to be restricted to very narrow limits, such as road making, railway construction, and the like. It remains to be seen whether even in an undeveloped country the State can live by muscular work alone, or to an extent that enables it to conscript all its brain workers for manual enterprises. The experiment will have some interest for the Communists, although in Bulgaria, where there is little distinction between classes, they will have less opportunity than in any other country of using it to endorse their own particular doctrines.

Damad Ferid Pasha has completed his Cabinet, which is described as non-partisan in character, though it is most unlikely to give the Nationalists and Unionists any quarter in the struggle that seems now to be inevitable. Our Constantinople Correspondent's letter, which will be found on another page, fully bears out what we wrote last week regarding the difficulties that confront the new Grand Vizier and the need that the Allies should lend him support—practical support, and plenty of it—if he

Digitized by Google

is to win through. Unfortunately there is good reason to believe that at least one of the Allies was active in the endeavour to keep Salih Pasha in power, in the hope that he in turn would endeavour to persuade Mustapha Kemal to use his good offices in a quarter in which the Power concerned was experiencing much embarrassment. If national rather than Allied interests are to be followed in this fashion the result can hardly fail to be disastrous all round.

If a disaster is to be averted, the Allies must henceforth show a more united front than they have done lately in Turkey. Even so, their difficulties will be heavy enough. At the moment the Nationalists may look less formidable than they did a few weeks ago, and Ahmed Anzavur Bey has shown us that among the Turks themselves Mustapha Kemal has opponents as well as supporters. But it would be unwise to conclude that the breach between the pro- and anti-Kemalists is past mending. Even if all should go well in regard to other parts of what was the Turkish Empire, there would remain the thorny question of Smyrna. On that point Nationalists and "anti-Nationalists" are united, and unless Damad Ferid Pasha is able to obtain, and pass on, assurances that can be regarded as satisfactory from the Turkish point of view, he will have no chance at all of being able to "make good" without foreign assistance. In such circumstances, are the Allies prepared to help him? In view of certain tendencies they have displayed, it may be suggested that the task is not one to be delegated to either the Republic of Andorra or the Principality of Monaco.

Through the kindness of the London agency of the Imperial Ottoman Bank we have received a copy of the appeal for contributions towards the Christ Church, Constantinople, War Memorial. Particulars will be found on another page, and we are confident that many of our readers will welcome the opportunity of subscribing to an object which, as the executive committee of the fund indicate, should stir the sympathies of citizens of the British Empire throughout the world. The constitution of the committee is a guarantee that funds entrusted to it will be wisely employed.

There has been a further disturbance in Jerusalem. On April 4, during the Moslem celebrations of Meli Moussa, a Moslem procession came into conflict with Jews in the neighbourhood of the Jaffa Gate. The total casualties are put down at five Jews and four Moslems killed and 211 Jews and 22 Moslems wounded. Rioting appears to have gone on for two or three days, but after the first unexpected outburst it never seems to have become serious, and the situation is now reported to be perfectly calm. The whole affair is, of course, most regrettable; but in view of the bad feeling that has been growing up between Jew and Moslem in Palestine since the Armistice, it can hardly have come as a surprise to anyone.

A due sense of proportion seems to be so rare in India just now that it is refreshing to find that, even on the question of the Khalifate, some of the leaders have been able to keep their heads, and we can welcome unreservedly the remarks of the President of the All-India Shiah Conference, who, while very properly minimising sectarian differences, insisted on the obvious fact that the Sultan of Turkey is not the religious head of that particular sect, and altogether repudiated the dangerous doctrine of contingent rebellion preached by the extremist agitators. Englishmen are perhaps prone to under-estimate the distinction between Sunnis and Shiahs, just as Moslems sometimes fail to appreciate the significance of the internal cleavages of Christendom, but though the Shiahs are in a minority, they constitute an important and distinctive section of the diversified population of India, and it is well that they have found a leader able to give them wise counsel at the present juncture.

It is only fair to India to add that the cabled messages, taken by themselves, may give a rather one-sided view of the situation in this matter of the Khalifate. The cables inevitably give prominence to sensational items of intelligence, and consequently the most violent agitators receive most notice, but study of the Indian Press shows that many responsible politicians are seriously perturbed by these excesses. Their protests are not yet loud or incisive, for moderate men have the defects of their qualities in India as elsewhere, while the evil tradition that Indians must never contradict each other has by no means lost its influence; but the weight of reasonable opinion is there, and gradually it is learning to express itself. As we have said before, this is the most hopeful feature in a situation which is by no means free from anxiety; the new regime will never work while opinion can be stampeded by each clique or junta in its turn, and the habit of speaking out plainly is the necessary condition precedent for its success.

In this respect a good example seems to have been set by Lord Sinha in a speech delivered last week in Calcutta, when he urged the Moderate party to refuse co-operations with the extremists on the specific ground that the differences between them were fundamental. Coming as it does from the most eminent living Indian, this speech may prove to be a landmark in the history of the country. Hitherto it has been possible for men to sink their own views for the sake of unity of opposition, but the case is altered when politicians are called on to take up constructive work; there may be unanimity in Utopia, but we know of no other country where it has a permanent existence, and fundamental differences are the historical basis of every party system in the world. They are coming to light in India now, and they are likely to be realised more and more as time goes on; the rapidity of constitutional progress may be gauged by the fact that already politicians are beginning to speak the truth about each other.

Professor Armstrong's recent letter in *The Times* shows good grounds for thinking that there is still a hopeful future for the "natural" indigo industry, perhaps the oldest of India's highly speculative enterprises. Indigo was a "gamble" in Gujerat when English merchants first reached India, and the successive migrations of the crop, first to Barbadoes, then back to Bengal, and thence to Bihar, make one of the strangest chapters in the history of agricultural production. More recently the chemists came upon the scene, and for a time it looked as if the synthetic product, indigotin, was destined to drive the plant finally from the face of the earth, but as time went on dyers learned that indigotin is not just the same as indigo, the growers took heart and called science to their councils, and it now appears that improvements in agriculture, coupled with centralised and standardised manufacture, may enable India to retain her hold on the markets which she recaptured during the war.

The essence of the matter is that nature works with mixtures while chemists have hitherto dealt in pure substances. As Professor Armstrong points out, you can make alcohol from coal and a waterfall, but nobody has yet produced by such means a good vintage port, or even a tolerably palatable whisky. These products, of course, contain what the chemist knows as alcohol, but they also contain small quantities of other things, which the chemist perhaps calls impurities, but which make all the difference to the consumer; and in the same way indigo manufactured by the traditional methods contains, besides indigotin, certain other substances which the dyer finds necessary to ensure complete success. Later on the chemists will doubtless identify these accessories, and eventually they may produce the real thing, but for some time to come it seems probable that connoisseurs will give a substantial preference to the indigo of Bihar.

THE WEEK AT HOME.

The Anglo-French Difficulty.

The sudden difference of opinion between France and Britain over the despatch of French troops to the neutral zone of Germany has been universally regretted in England—except, perhaps, among the small but pertinacious coterie of pro-Germans and Pacifists. It has all along been doubtful whether the demand for the revision of the Peace Treaty, which Mr. Keynes brought into prominence in his book, "The Economic Consequences of the Peace," and which Mr. Asquith and some other politicians stood, and stand, for, was generally echoed by public opinion; certainly the quibbling and evasions of Germany in carrying out its terms have been generally condemned, and the determination of France to insist on no more equivocations has been frankly applauded as a common-sense action.

In these circumstances the British Government's open dissociation of itself from France has been strongly criticised. Nobody, of course, really believes the newspaper story that the Cabinet's action is due to German intrigue; that kind of slander carries no weight. But it is very generally felt that, even if the Government disapproved, it need not have taken such strong action, and that the results may be unfortunate. It may be that one cannot always agree with one's friends' every action. But there is no reason to proclaim one's disagreement to an eagerly listening world, and it is a sound theory, in politics as in private life, to stand by those with whom one has been long associated in dark and difficult days. That, I think, expresses the general public opinion on foreign affairs at the moment; nor can there be discerned any sign of a real desire to desert our friends for our late enemies.

Budget Gossip.

The gossips are busy with the forthcoming Budget, as usual, and the prophets predict that there will be a fresh tax on wines and spirits, and a further duty on motor-cars. As to a tax on profits, the pundits cannot make up their minds—and it is suggested that the Chancellor of the Exchequer is in the same difficulty. The new income-tax scale, recently recommended by a Committee of Inquiry, is expected to be adopted, and there is some idea that postal rates may be raised—letters to twopence, telegrams to a shilling. If the increased letter-rate does anything to check the flood of circulars and appeals which increasingly drowns one's ordinary correspondence the average man will be grateful, even if it costs him an extra halfpenny.

Two By-Elections.

Nobody is much better or much worse as the result of the two by-elections decided this week. The Coalition lost the Dartford seat, as had been generally anticipated, but the enormous Labour majority—a clear nine thousand over the next of four rival candidates—caused surprise. When the victor polls 13,610 votes and nobody else reaches five thousand, it is a safe deduction that personal popularity has a good deal to do with his success.

At Stockport, where two Coalition seats were contested by two Labour, two Independent, and a Sinn Fein candidate, the Coalition held both, by a six thousand majority. The Sinn Feiner received two thousand votes out of 86,000 polled—probably the full strength of the Irish vote. The Independents hardly counted. The most significant thing about the result was the failure of Sir Leo Chiozza Money to win one of the seats for Labour. Sir Leo is a clever man, and one of the ablest statisticians of the day; indeed, his diet seems to consist of boiled blue-books, the figures from which he reproduces on every possible occasion. He is an active journalist, who writes for many papers in the Labour interest, and he was a minor member of the Coalition Government during the war. But he certainly was not popular in the Government or the Commons, and he does not seem to have sufficient magnetism to appeal to the electors. Perhaps a diet of pure statistics is too like sawdust for the average man.

Labour and Soviets.

Whether Mr. Lloyd George has frightened Labour or not by accusing it of revolutionary aims, the Independent Labour Party, which houses most of the "intelligent extremists" of Labour, has been at pains this week to prove that it will have nothing to do with a political revolution. At a conference at Glasgow, which has the reputation of being the most revolutionary town in the United Kingdom, the I.L.P. discussed the question of Soviets, affiliation with the Bolshevists, and revolution generally. The whole weight of argument was rather surprisingly in favour of the established constitutional methods, and Mr. Ramsay Macdonald, who has recently published a book in which he argues strongly in favour of a Parliamentary as against a Soviet system, delivered a convincing speech on that theme from the platform; the advocates of revolution seem never to have rallied from his attack, and the vote proved the extremists to be in a minority.

The British Socialist Party, on the other hand, which is more extreme than the extremists, also held its conference in London, and a good deal of tall talk in favour of ending the existing order was heard. This body is frankly out for Communism; but its utterances are discounted by the fact that its membership is insignificant, and that nobody has ever heard of its speakers in public life. It is a sort of safety-valve; it makes a noise, and lets off steam, but nothing happens.

Political revolution may therefore be discounted, and the opinion which Lenin and Trotsky hold of our Labour leaders, already low, will consequently sink to utter contempt; but one may assume that Labour knows its own course best. The Constitution is safe in its hands, despite Mr. Churchill's taunts; it wants but little here below, but wants that little nationalised. And on that controversy it is evident that the next general election, and perhaps the election after that, will be fought.

The Irish Situation.

The anticipated Easter rising in Ireland did not come off, thanks to military precautions, but the number of outrages has not diminished, and it has become fully evident that these things are part of a concerted Sinn Fein plan. The Home Rule Bill will go ahead and become law notwithstanding, and there can be no doubt that Ulster, which has a genius for law and organisation, will make a success of her Parliament. If the Sinn Feiners in the rest of Ireland make a Southern Parliament impossible, they will have convicted themselves of being a purely destructive force.

I notice that the British Radical papers, which naturally do their best to attack the Government and to demonstrate the impossibility of the Home Rule Bill, as a legitimate part of the party game, are finding it increasingly difficult to defend Sinn Fein now that it has embarked on a campaign of organised murder and outrage. It is all very well to denounce the Government as the real author of all the trouble, but the apologetic tones of the leader-writers reveal clearly enough that they do not believe their own theme. As a fact, the criticism of the Home Rule Bill has been singularly ineffective, and has confined itself mainly to the impossible suggestion that there should be one Parliament for the whole of Ireland—a proposal which the pro-Asquithians themselves admitted in 1914 to be impossible. It has not become more feasible with the passage of time.

More Wage Demands.

Bread has gone up from ninepence to a shilling, the miners and tram-drivers have got an advance of wages, and now the railwaymen are demanding another pound a week, with the usual threat of a strike in the background. There will be the inevitable controversies and haggling, the usual repetition of the usual arguments on both sides, and no doubt a repetition of the usual result—a compromise on two-thirds of the amount claimed. By the time the railway dispute is settled, every other trade will want its advance, and this particular circle will probably spread through the summer.

As a matter of fact, nothing can stop it. It is a struggle for power, in which the devil (who nowadays lives near the Bankruptcy Court) takes the hindmost, and so long as supply does not overtake demand, the

Digitized by Google

actual producer and vendor of indispensable services control the situation. The head of a big engineering works whose business keeps him in touch with all parts of the world tells me he sees no end to the process. "I cannot stop orders coming in," he said, "and I make no contracts, because I never know at what price I can buy materials. I have more orders than I can execute, and although I only charge a percentage of profit on the actual working cost and give details to all my customers, my charges seem extortionate to me. No doubt they do to them, but they can see from the detailed statement that I am charging them actually a less percentage of sheer profit than before the war, and they offer more for speedy delivery. I would like their money, but I can't take it, because I can neither promise nor execute speedy delivery; the wages bill is so enormous that weekly finance, which used to be a small automatic affair, is now an anxiety that begins on Monday morning and only ends on Saturday afternoon; yet high as wages are, they are only just adequate when the price of food is taken into consideration. We have no strikes, and we settle everything by friendly personal agreement; but after working fifteen hours a day week in, week out, to keep the thing going, I sometimes think that the peace and idleness of a desert island would be preferable." I fancy that sums up fairly enough the attitude of a good many people in these days. The idea that the end of war would relax the strain is already seen to be an exploded fiction; it has intensified it.

Westminster Abbey for Sale?

It is a terrible thing to make a joke. Some weeks ago I suggested that if the present rage of wealthy Americans for buying up British antiques were to go much further, we might yet see Westminster Abbey put up for sale. I did not expect to be taken *au pied de la lettre*, but the grave and hitherto respectable *Statist*, the organ of the City merchant princes and the Bible of Lombard Street, has done so. It seriously commends the idea, and it even goes so far as to suggest that the whole of the Established Church should be put up for sale, lock, stock, and barrel, to the highest bidder to pay for the war debt. I confess that I find it difficult to echo the gravity of the *Statist*. The idea of St. Paul's Cathedral being bought by one of the great banks as its head office, or of York Minster being taken over by the North-Eastern Railway, is not yet practical politics, and the *Statist's* idea of paying for the burden of the war by confiscating property that has been dedicated to a sacred use will hardly appeal to the moral sense of the community. I am not quite sure what the cash value of a conscience may be worth, but there are some things that are not put up for sale even when one finds it difficult to meet one's bills.

Furniture and Comfort.

It is announced that the price of furniture has again advanced by 10 per cent., and it is likely to increase by 25 per cent. before the autumn. The extraordinary thing is that these successive advances do not appear to reduce the marriage rate; perhaps Edwin and Angelina are content with two rooms, for the stock of rich and generous uncles must be limited off the stage.

Mammon's Movements.

The tide of new issues has slackened a little for the moment, while promoters and underwriters compare notes as to the successes and failures of the past few weeks. The results have been very curious. Some of the issues, by companies which possessed household names, have been largely oversubscribed; others, with apparently just as good title to succeed, have left 80 per cent. of the stock in the underwriters' hands. There are, of course, many people who refuse on business grounds to apply for a stock at the time of issue, on the ground that they can usually pick it up at a discount in the open market a few weeks later. These are mostly old hands at the game, and in these days, when the underwriters are sometimes left with a trifle of a million or so of preference shares in hand, it is easy enough to get new issues at a discount. Not one in ten goes to a premium.

One or two rather big issues have been postponed for a few weeks, until things settle down after the recent flotations, but the period between Easter and Whitsun promises to be busy, and thereafter things may slacken down until the autumn, which again promises a big crop of appeals for capital. The continuance of this industrial boom is perhaps the most convincing answer to those pessimists who held that Britain was exhausted by the war, and had no faith in her own future.

The Week's Books.

The novels of Henry James may be unreadable for all but the elect, but his Letters, which have just been published in two volumes by Macmillans, are emphatically worth looking through. They contain pictures of Gladstone and other great men; Tennyson, whose conversation was "all about port wine and tobacco; he seems to know much about them, and can drink a whole bottle of port at a sitting with no incommodity. He is very swarthy and scraggy, and strikes one at first as much less handsome than his photos; but gradually you see that it's a face of genius. He had I know not what simplicity, speaks with a strange rustic accent, and seemed altogether like a creature of some primordial English stock."

His literary criticisms are quite astonishing. He finds the writings of Tolstoy and Dostoievsky "fluid puddings," and "when you ask me if I don't feel Dostoievsky's mad jumble, that flings things down in a heap, nearer truth and beauty than the picking up and composing in Stevenson, I reply with emphasis that I feel nothing of the sort." The same canon of criticism would exalt Corneille and Racine above Shakespeare, and Henry James above Dickens. But Ibsen is "ugly, common, hard, prosaic, bottomlessly bourgeois"; there was a lack of "æsthetic curiosity" in Meredith, and in Hardy "the abomination of the language is only equalled by the author's reputation for style." There is really nothing to be said about this, except that the rest of the world has made up its mind in a different direction.

Another war book has appeared—Hindenburg's "Out of My Life" (Cassell), which will rank as a pendant to Ludendorff's Memoirs. Hindenburg, on the whole, is disappointing, and his book will not dissipate the legend that Ludendorff was the brains of that combination. Hindenburg, it is to be noted, does not think that the British soldier was much good as a fighter, although he is good enough to pay tribute to our doggedness; the Frenchman is the better man, in his opinion, but when it comes to hand-to-hand fighting the German "proved himself the lord of the battlefield." In which case one can only say, with the author of Ecclesiastes, that the battle is not to the strong. Curiously enough, Hindenburg is proud of the German naval record, and thinks that "England will never forgive us the eclipse of the fame of Trafalgar."

Mrs. Humphry Ward's posthumous novel has been on the whole well received by the critics, and other novels by well-known authors are announced for immediate publication. But during the present intermediate slack season, an amusing controversy has broken out to solace the idle reviewers. When Mr. Charles Garvice died a few weeks ago, the critics all with one accord remarked that they had never read a word of his work, which was not worth reading; Mr. Garvice's one merit was that he produced sentimental tales which sold by the million. Mr. Arnold Bennett, who seems to have had a fondness for a man who, whatever his rank as a writer, was one of the kindliest men who ever lived, has rebuked the critics for their patronising tone, which was, in truth, a little priggish. He has declared that work which is just as bad as Mr. Garvice's has been highly praised by reputable reviews of the high-brow kind; the editor of the *Athenæum* has responded with vigour, and Mr. Massingham, free from the task of defending the Germans which occupied him so pleasantly in the *Nation* during the war, has chimed in. Mr. Massingham being a better literary critic than a political guide, the fun promises to wax fast and furious. But it will not really make any difference. The people who read Garvice do not read the *Nation*, and I doubt whether they ever hear of the *Athenæum*. On the other hand, they may have heard of Mr. Bennett as the writer of the best shilling shockers on the market, not as the author of "Hilda Lessways" and "The Old Wives' Tales."

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, March 22.

Extremist Activities.

During the past week, the anniversary of the disorders in the provinces last year, there has been some trouble at Kafr El Sheikh and Dessuk, in the province of Gharbia, where, as it happened, the examination of recruits for the Egyptian Army was taking place. The agitators took advantage of the occasion to organise a demonstration, consisting of schoolboys and riff-raff of the district. The crowd refused to disperse when ordered, and, overpowering the police, who fired into it, broke into the Markaz, liberated the prisoners and the recruits, and did considerable damage to the archives. Armoured cars and a British patrol were hurried to the scene and quiet was restored. The next day a somewhat similar incident took place at Dessuk, but the authorities were prepared, and the demonstrators were dispersed before they were able to do any damage. From all accounts there is not the slightest doubt that the whole affair was worked up by political agents, who had been sent out during the last ten days in large numbers from El Azhar and other centres to incite the people, and who undoubtedly took advantage of the Egyptian Army recruiting to cause this trouble, hoping that it would spread as it did in this very district just a year ago.

The Legislative Assembly.

Lord Allenby has issued a Proclamation declaring that no meeting of the Legislative Assembly, or any Provincial Council, or any other elected body, or of any members thereof in their capacity of members, is to be held otherwise than in accordance with the provision of the laws and regulations thereto; that every resolution passed or decision adopted by any elected body on any matter outside its competence shall be absolutely null and void; that every offence against this order shall be punishable under martial law, and that all members voting in favour of any resolution or decision on any matter outside their competence will be liable to prosecution before a military court. In this connection it should be pointed out that the Legislative Assembly has been suspended since the early days of the war. The reasons for the issue of this Proclamation have been that under the influence of the Extremists certain members of the Legislative Assembly have been meeting and have passed resolutions in connection with the political situation purporting to come from them as a body, and that some of the Provincial Councils, whose attributions are by law restricted to matters of local government, have similarly met and passed similar resolutions, even going to the length of intimating their intention of coming up to Cairo to protest. Since there is ample evidence that these resolutions are not spontaneous expressions of opinion on the part of the bodies in question, but have been passed as a result of the intimidation which has been brought to bear on the members, the British authorities are perfectly justified in stopping these meetings and preventing activities which could not fail in the long run to disturb the public peace.

The Mixed Court Judges.

When the all-round increases in pay and bonus were given by the Government last August, attention was drawn to the fact that the Judges and staff of the Mixed Courts had had no alteration made in their financial position. Since then the *cadre* of the Native Courts has been readjusted, and, in view of the proposed reorganisation of the Mixed Courts under the scheme drafted by the Milner Mission, it has been decided to amend the conditions under which Judges of the Mixed Courts are engaged. The pay of Counsellors at present in the service is to be fixed at £E2,000 if they are Europeans, and £E1,500 if they are Egyptians, whilst that of existing Judges is to be fixed at £E1,600 and £E1,000 respectively. As regards new appointments, Judges will be appointed at £E1,200 if foreigners and £E700 if Egyptians, rising by increments of £E100 every three years to a maximum of £E1,600 and £E1,000 respectively, while Counsellors will be appointed at £E,1,600 if foreigners and £E1,200 if Egyptians, rising by increments of £E100 every three years to £E2,000 and £E1,500 respectively. The Procureur-General is placed on the same footing as foreign Counsellors.

A further change is to be made in regard to superannuation. Hitherto foreign magistrates engaged in the Mixed Courts have served on contracts, the periods of which corresponded with that for which powers were from time to time granted to the Courts. In lieu of pension they were given a gratuity at the expiration of each contract, calculated at 20 per cent. of the annual pay per year of service under such contract. In view of the reorganisation it has now been decided to grant them pensions, on the basis of a 5 per cent. contribution. Judges already in the service and having five years' or less service will, however, be allowed to count this time towards pension without payment of any arrears of contribution; and those who have over five years' service will be given the option of counting two-thirds of their back service without contribution, or of counting five years' back service without contribution plus any period in respect of which they elect to contribute, provided the back service in respect of which the contribution is paid does not exceed ten years. The Judges and Counsellors in the service have been given an option of deciding during the next two months whether they will accept the new scheme or continue service under the new conditions.

YUGOSLAVIA.

BELGRADE, March 28.

The Political Manœuvres.

The Radicals have finally rejected Dr. Smodlaka's attempts to reconcile the opposing parties and form a coalition Cabinet. Dr. Smodlaka's party has accordingly made an arrangement with the Democrats by which, on the fall of the present Cabinet, which cannot secure a quorum in the House, they will make another attempt to form a coalition, and if that fails they will combine and proceed at once to carry out the general elections for the Constituent Assembly. Dr. Smodlaka's group consists of about a dozen members, who have so far maintained complete independence of action, awaiting the results of the Assembly before joining any definite party.

Magyar Intrigues.

It is well known that the Hungarians are carrying on extensive anti-Yugoslav propagandism in the new provinces, and that a White Guard has been formed ready to use force where necessary. One of the methods employed is for all Magyars in Yugoslavia to vote for "Communism" in the municipal elections in the hope of bringing about a *débâcle*. Their agents are busy in all centres, and unfortunately some bear Slavonic names. At Novi Sad there was recently arrested a Hungarian spy named Kosta Jankovich, a purely Serbian name, who was in the service of the Hungarian White Guard, and an energetic organiser of secret societies. Another arrest is that of a Lt.-Col. Rifla, who is accused of tying up thirty peasants from the Baranja to carts in Hungary, and of having handed them over to the White Guard for execution. It was shown at the time of his arrest that he had been sent by the Magyar authorities at Kaposhvar to spy and carry on propagandism.

Serbian Antiquities.

Most of the archives and records of Serbia's past are to be found outside the country. Of those that were in the limits of the old frontiers the Bulgarians have destroyed or removed a great part. The Peace Treaty provides for the return of archives removed at any time during the last ten years. A committee of archæolo-

Digitized by Google

gists have arranged by friendly discussion with Vienna for the return of a number of documents removed from Dubrovnik in 1833. These consist of about 200 old charters, mostly on parchment, dating from the Nemanitch kings of the twelfth, thirteenth, and fourteenth centuries. It is gratifying to think that these are now being returned to their native land. Many of these charters have been figured in Miklositch's "Monumenta Serbica," and the seals have been reproduced in Ivitch's "Old Serbian Seals and Arms."

A Band of Brigands.

Brigandage is not yet stamped out in the southern districts. For some months a gang of ruffians has been terrorising the inhabitants of what used to be familiar to English newspaper readers as the Sandjak of Novi-Bazar. All efforts on the part of the police to round them up in this wild and mountainous district were unavailing, till one of the robbers, Luko Bulatovitch, took it into his head to shoot four of his comrades and then give himself up to justice. It is hoped that, with the information he has given them, the authorities will be able to extirpate the remainder of the band.

Demobilisation.

On March 24 the Regent signed a decree demobilising the First and Second Ban as from April 20. The Third Ban and part of the Second were demobilised last summer.

Miscellaneous News.

The death is announced of Mme. Stoyan Protitch, wife of the President of Council of the Kingdom of Serbs, Croats and Slovenes.

The Yugoslav colony at Puntas Arenas has subscribed and remitted to the Ministry of Reconstruction the sum of £1,074 for the benefit of their comrades wounded in the recent wars.

It is announced from Cettigne that the Italians have begun to evacuate Montenegro. It is reported that their troops have been guarding a well-known oil spring, and two vessels a week have crossed from Antivari to Italy with cargoes of oil.

BELGRADE, March 31.

The Occupation of Mount Tarabosh.

This rounded hill, which sprang into fame owing to the dogged resistance of the Turks to the relentless Montenegrin invasion in 1912, is of considerable strategic importance, as it dominates the town of Skadar. It is now in the limelight again. As the French and British contingents have left Skadar, only the Italians remain, and their commandant has invited the Serbs to evacuate Tarabosh, which they have held since November 29 last year. As many incorrect statements about this occupation have appeared in the European Press, an official explanation has been issued. On December 29 a vessel, the Shkodra, flying the French and Allied flags, sailed up the Boyana with 100 tons of flour for Montenegro, with her tender Satir, bound for Plavnitsa, on the Montenegrin coast of the Lake of Skadar. Near the village of Samritch a gang of 150 men attacked the boat with rifle-fire and machine guns from both banks, and the two craft were obliged to return to Bar (Antivari). Italian launches and two Italian vessels, however, had passed by unmolested a few days previously. The French general commanding in Skadar, in the absence of effective forces of his own army, authorised Serbian detachments to occupy Tarabosh, in order to ensure the free navigation of the river. The Serbian commanding officer did so, and at once informed his Italian colleague that he had undertaken this purely precautionary measure, pending the decision of the Peace Conference. The French contingent evacuated Skadar on March 13, and it is not true that the Serbs only then occupied Tarabosh, and with a purely political object. The Belgrade Government has received no notification from the Peace Conference modifying the decision of the Supreme War Council of October, 1918, to the effect that Skadar and the surrounding district fall under the temporary control of the Inter-Allied command; and consequently as an Ally, and the particular one whose troops cleared Albania of the enemy from Tirana to Skadar, the Government regards it its duty to continue to provide police measures.

The Australian Canteen.

Familiar faces from the Salonika colony expedition are becoming rare and rarer among the small British colony in Belgrade. Now the Australian Canteen of Miss King is wound up. This energetic and competent young lady joined the Serbs with the Scottish Women's Hospital at the time of the disaster in 1915. When the remnants of the Serbian Army came to Salonika Miss King placed two motors at their disposal, and worked unceasingly for the Serbian soldiers, whose simple and devoted gallantry had won her admiration. Then, on her own initiative and by her own energy she raised funds and opened canteens for the Serbian troops, whose privileges in this respect could not compare with those of the British, French, or even Italian troops. Owing to slow communications, the stocks only reached Salonika on the eve of the offensive, and Belgrade only in January, 1919; but the goods once secured, by untiring energy, amid all the disorganisation that reigned supreme, especially on the railways, Miss King succeeded in opening canteens, not only in Belgrade, but at Nish, Baja, Kraguyevatz, Kralievo, Vinkovtse, Brod, Dubrovnik (Ragusa), Kotor (Cattaro), Zelenitsa, and Skoplie.

Political Negotiations.

The patient negotiations of Dr. Smodlaka for a coalition Cabinet have not met with the success which was generally anticipated. They apparently broke down against the intransigence of M. Protitch. Dr. Smodlaka has gone to Zagreb to confer with his friends there, but he will shortly return to Belgrade, for he has by no means abandoned hope. The latest development is the arrival of M. Pashitch, who is a more pliant and supple politician than M. Protitch, and in some quarters it is hoped that his influence may lead to a more reasonable attitude on the part of the stiff necks, to whichever party they may belong. This remains to be seen, as M. Pashitch has very many bitter enemies. It was anticipated that Dr. Trumbitch would accompany him, but the Foreign Minister has remained in Paris. Meanwhile, Dr. Ribarats has resigned from the Ministry of Trade, and his little group, the remnants of the old Liberal party, are no longer represented in the Cabinet. Dr. Ninchitch, the former Radical Minister of Finance, has taken M. Ribarats' portfolio, giving up his Ministry of Justice to Dr. Dushan Pelesh, a member of Dr. Bogdan Medakovitch's small group.

The Regent has been receiving many prominent politicians, and had long conferences with Dr. Pavlovitch, President of the Skupshtina, who has reported in detail on the situation, and the impossibility of carrying on under the present intolerable conditions. It is generally believed that M. Protitch will be obliged to resign in a few days.

Easter Hopes.

As this is Easter Week, and the Croat and Slovene members of the Government are Roman Catholics, and the Orthodox Easter follows a week later, there will be a lull in the proceedings. Only one Roman Catholic Minister is remaining in Belgrade over Easter. It is earnestly to be hoped that after the holidays a more sane spirit will reign, and that Dr. Smodlaka's efforts will not be in vain. This statesman has lived so long abroad that he has a more detached point of view, and can better judge than those blinded by party passion and personal interests how these long-drawn political squabbles have damaged the country in foreign eyes. All friends of Serbia and of Yugoslavia generally have watched with regret the bickerings of nearly a year, which have increased in venom as time went on.

But while politicians are wrangling, the people have been getting to work. The peasants have been busy in their fields since the day they were demobilised, or released on indefinite leave. Although there has been great shortage of seed corn, cattle, implements, and labour, the farmers have worked wonders, in spite of the unfavourable past season. Now that demobilisation has been announced, there will be more labour available in the fields, and anticipations for the coming year are very

Digitized by Google

hopeful. The spring so far has not been unfavourable; there has been plenty of sunny weather, and the two short cold snaps have not been severe enough to do material damage. The Timok district is about a month behind the Belgrade neighbourhood, where the fruit trees have been blossoming for weeks. At last labour is at work, repairing the sorely damaged roads, to the great content of their much-tried users; new quarries and lime-pits are being opened, afforestation is proceeding; vineyards are pruned, horses and cattle are less scarce, and things look more hopeful. The interference of the Government in exports and imports is causing the traders a great deal of trouble and anxiety, but the people will patiently put up with any inconvenience once they are persuaded that it is for the good of the country. There is plenty of grumbling at the constantly rising prices, but it is generally realised that the only cure is hard work. The country is, on the whole, extremely productive, in many places remarkably so, and the peasantry sturdy and industrious. When, therefore, the midsummer madness of the politicians is over prospects will be quite rosy.

ROUMANIA.

BUCHAREST, March 30.

The Dissolution of Parliament.

Parliament reassembled after a short adjournment on March 25, when General Averescu made a declaration of the new Cabinet's policy. After a reference to the anomalous financial position the Prime Minister pointed out that it would be necessary to reconstitute the country on new foundations, and that in order to build solidly they must first ensure order within the kingdom. The foreign policy of the Government would be in the main a continuation of the policy followed during the war. Roumania would maintain her excellent relations with all the States on whose side she had fought; relations with her former enemies would be resumed within the limits of the peace treaties, and every effort would be made to live on good terms with neighbouring countries, without recourse to doubtful compromises. The Government would do all in its power to improve the lot of the people; but its efforts in this direction would not transgress the limits of social equilibrium. Expenditure would be rigidly curtailed, and revenue would be increased by new taxation on lines indicated by the exigencies of the time. Finally, General Averescu announced the Government's intention of creating a number of new Ministries—a Treasury, a Ministry of Public Health, a Ministry of Reconstruction and a Ministry of Labour.

The Prime Minister's speech was on the whole favourably received, although the creation of new Ministries was naturally challenged on the score of expense. On the following day, however, the progress of the debate showed that the Government had little chance of arriving at a working arrangement with the majority, and the session was terminated by General Averescu reading the Decree dissolving Parliament.

Elections for the new Parliament will take place on May 25, 26, and 27 for the Chamber of Deputies and on May 30 and 31 for the Senate. The new Parliament will meet on June 10.

According to present indications there will be no radical alteration in the constitution of the Cabinet before the elections. Negotiations are understood to be in train between General Averescu and M. Take Jonescu, but so far no agreement as to the terms on which the latter's co-operation would be given and accepted has been recorded.

An Internal Loan.

May 25 was the day fixed for the opening of the new internal loan, bearing interest at 5 per cent., the price of issue being 87, if entirely paid up, or 88, if paid in two instalments. The loan is to be redeemed at par within 40 years from September 1, 1921. The Government undertakes not to call in the loan before May 1, 1931.

Every effort is being made to ensure success for this "Consolation" Loan. Autograph appeals by the King and Queen appear in the Press. The earliest returns of the progress of the loan are very satisfactory.

TURKEY.

CONSTANTINOPLE, March 29.

The Cabinet.

From the beginning it was evident that Salih Pasha's Cabinet was even more of a makeshift than its predecessor, and the military occupation of Constantinople by the Allies, followed as it was by the rupture of communications with Anatolia, placed it in a very critical position. Hence few people were surprised when on Thursday the afternoon papers announced the resignation of the Cabinet and the nomination of Damad Ferid Pasha to the Grand Vizierat. It had been clear for some days that Damad Ferid Pasha expected to be called upon to form a new Administration, for he had been in constant touch with the Sultan, on the one hand, and with the central committee of the Opposition party, Entente Libérale, on the other. On Friday morning, however, the news of the resignation was denied in the following words:—"The information published by the Turquie-Havas-Reuter agencies relative to the resignation of the Grand Vizier, Salih Pasha, is denied by the present *communiqué*." It will be noticed that nothing is said concerning the alleged nomination of Damad Ferid Pasha, and it was subsequently explained that since Salih Pasha had not resigned, another Grand Vizier could not have been nominated. The whole affair seemed inexplicable; but it has since appeared that the Sultan actually had proposed that Damad Ferid Pasha should supersede Salih Pasha, and the former agreed upon certain conditions, which are understood to have included the Sultan's assent to Damad Ferid Pasha's complete freedom of action with regard to the suppression of the Chamber, the arrest of numerous Unionists and Nationalists, and the military assistance of the Entente Powers for the dissolution of the National Forces. An important meeting of the Entente Libérale Party was held at Damad Ferid Pasha's house, when the composition of the new Cabinet was discussed. The post of Minister of the Interior was to have been given to Mehmed Ali Bey, who had already occupied that position in one of Damad Ferid Pasha's former Cabinets, and it was Mehmed Ali Bey who made the announcement to the Press that was contradicted the following morning for the sufficient reason that the Cabinet had refused to resign.

Salih Pasha's reasons for remaining in power as long as possible are sounder than is usual in such cases. He maintains that, just as he has been unable to bring about the disbandment of the National Forces, no other Cabinet would have any better success, and it was quite certain that if Damad Ferid Pasha were to succeed him there would be an immediate outbreak of disorder and bloodshed that would only make matters much worse. The Grand Vizier, therefore, wishes to wait until the return of a mission which has been sent to Mustapha Kemal in order that the Nationalists may realise the true situation, and modify their attitude.

There is something to be said for this attitude on the part of the Grand Vizier, for there is no doubt whatever that Damad Ferid Pasha will, if and when he comes into power, wage merciless war upon everything and everybody connected with the Nationalists, who will equally certainly reply in kind. Hence the advent of Damad Ferid Pasha to Constantinople and Angora—or wherever else Mustapha Kemal may fix his headquarters.

On the other hand, it is impossible for Salih Pasha to maintain his position for long, since the Nationalists have already cut off communications between the capital and the provinces, and have made serious attacks upon British forces which were being withdrawn from outlying districts.

The Nationalists have committed acts of war, and only the forbearance of the Allies prevents the reopening of hostilities. Therefore the farce of a central Govern-

hasn't yet materialised

but, from pole to pole, this

is recognised as the sign of

"THE TYRE INCOMPARABLE"

Digitized by Google

ment in Constantinople as camouflage for the actual Government in the provinces can no longer be maintained. Further, it is extremely unlikely that the Nationalists will change their attitude in the slightest as a result of one mission or fifty missions, no matter how seriously Turkey's destinies may be involved. The Nationalists belong to that thick-headed school which knows no logic save that of force; and unfortunately the Allies have shown nothing but what appears to such people as weakness, ever since the Armistice. Thus, Salih Pasha is only putting off the evil day; but even that is to his credit.

The Anti-Nationalist Movement.

Ahmed Anzavur, the Circassian chief who aroused a good deal of interest by his exploits against the Nationalists in the Panderma district during the latter part of last year, has renewed his activities and has met with no little success. A strong force of Nationalists, assisted by regular troops, which was recently sent against him, was thoroughly beaten at Bigha after several days' fighting, in which the Nationalists had heavy losses in killed and wounded, while Ahmed Anzavur entered Bigha and gave short shrift to all the Nationalists he could find. There is no doubt that he is heartily supported by the peasantry of the district, who are weary of Nationalist exactions and tyranny; but the movement itself is hardly strong enough yet to cause more than serious annoyance to Mustapha Kemal. With a certain amount of encouragement, however, it might be developed until it was strong enough to challenge the whole Nationalist organisation; for from other parts of Anatolia there are similar movements developing; but if they are to come to anything there must be considerable help from outside.

Adrianople.

The attitude of the Moslem population of Thrace is typical of the feelings of the mass of the population throughout the country. According to all reports, the efforts of the commander of Adrianople, Jafar Tayar Bey, to carry out the mobilisation which he had decreed when he received the news of the occupation of Constantinople, have proved to be a complete failure, and it is reported that communications between the central Government and Adrianople are about to be resumed. The population is ready to resist the Greeks, although thoroughly sick of fighting, but they will under no circumstances fight anyone else.

Anti-British Propaganda.

The military occupation of the capital provided the Nationalists with much material for their campaign against our good name, and it is unfortunate that they have found a certain amount of tacit encouragement at least, in certain quarters where the memory of the events of the last few years seems to be fading already. Stories are being circulated to the effect that Turkish women were assaulted by the British troops that carried out the occupation of the city, and various other examples of British "barbarism" are also passed from mouth to mouth.

It is also possible that there will shortly be a film exhibited—perhaps in the United States—illustrating British "brutality." Since the 16th everyone who wishes to proceed to Asia Minor has to obtain the *visa* of the Allied Passport Bureau. The British, as usual, had the bulk of the work, and the accommodation of the passport bureau was utterly inadequate for the enormous crowds that assembled every day. It would have been bad enough had it been an orderly English crowd, but with a Constantinople mob the result was chaotic. The bureau was on the third floor of a large block of offices, and the stairs and corridors were completely blocked by thousands of people, who fought and struggled to obtain entrance. A large proportion of them would have saved themselves a great deal of trouble had they read the regulations, or had they obeyed the orders that were issued verbally from the office itself. But a Constantinople crowd does not recognise any regulations, and obeys no orders unless they are enforced with a stick or with a bayonet. That sounds brutal, I suppose, and I can imagine anyone who has never been out here disbelieving the statement, but it is a fact nevertheless. In vain an officer who spoke various languages appealed to the mob in Greek, Turkish, and French. They would *not* line up in a queue, and they would *not* go away if their passports had not already been *visèed* by their own authorities first, and they would *not* go away if they were proceeding to a destination which did not come within British jurisdiction. They *would* fight, they *would* push, and they heeded neither orders nor polite requests. There was nothing left to do but what the police always have to do under such circumstances. No one was hurt, but one or two were removed without ceremony—just as they do in the States sometimes.

But the scene has been filmed as an illustration of our brutal methods!

We have new offices now, and as there is much more room the cinematograph man had better make the most of his opportunity. A skilful manipulator can accomplish marvels with the cinematograph.

SYRIA.

BEYROUT, March 26.

The Lebanon Protests.

As a counterblast to the Syrian Congress of Damascus a monster meeting was held on the 22nd instant in the Seraglio at Baabda, the winter quarters of the Lebanon Government. The crowd, which was estimated at over two thousand, consisted of the Sheikhs, Mukhtars (elders), and heads of municipal councils of villages from the different districts of the Lebanon, of Government officials, delegates of various associations, journalists, and a large number of Lebanese notables, among whom were many Druses. These deputations were convoked by the Administrative Council of the Lebanon Government, whose members did not wish, nor feel entitled, to assume the heavy responsibility of deciding so momentous a question as the determination of the future status of the country without the consultation and approval of the people.

The five fundamental points to be submitted to the General Assembly by the Council were: (1) To proclaim the independence of the Lebanon with the aid of France; (2) to protest against the Proclamation of His Highness Emir Faisal as King of all Syria; (3) to protest against the Lebanese now residing in Damascus; (4) to form a Committee for studying the constitution of Greater Lebanon; (5) to examine the question of the Lebanese flag and its design.

The general discussion turned principally on the fourth and fifth points, but no decision could be come to, owing to the large number of speakers who took part. Then, while the question of the convocation of the General Assembly was being discussed, some delegates of the Association of Christian Communities arrived, bearing the new Lebanese flag, which was to be hoisted over the Lebanese Seraglio, and which was the Tricolour (red, white, and blue) with a cedar tree in the middle of the white stripe. The other proposals made by some sections of the crowd for a flag with the cedar alone on a white background, or the cedar alongside the tricolour, were thus overruled.

In the afternoon, after the rest of the Beyrout and Lebanese delegates had arrived, the President of the Administrative Council, with all the members, came out to receive the delegates and declare the opening of the session. The President explained briefly the object of their invitation to the Lebanese to Baabda, and asked his hearers to elect the members of a Committee wherein all the districts should be represented, so as to examine, with the members of the Administrative Council, the points already referred to. He added that the large number of persons present made it practically impossible to discuss matters of such moment without any risk of confusion or commotion.

Message from M. Millerand.

The door of the Central Hall, however, being left wide open, the place was soon filled to overflowing by the public. Commandant Labrue, administrative adviser (*conseiller*) of the autonomous territory of the Lebanon, opened the meeting with a few words of thanks to the Lebanese for their sentiments towards France and

Digitized by Google

their confidence in her. He next read the text of a message received from M. Millerand, which allayed the fears of the Lebanese, and assured them that the movement in the interior will in no way affect the negotiations of the Lebanese Delegation at Paris; and wherein M. Millerand confirmed the promise that M. Clemenceau had made to the Lebanese through their patriarchal delegation.

The President of the Administrative Council then spoke, calling upon the people to discuss their future status, as outlined in the five points, to which the Administrative Council had given wide publicity. One of the leading members of the Administrative Council suggested the constitution of an Executive Committee of the Assembly with the President of the Council as chairman, and cited the names of a few well-known persons, well-known as devoted friends of France. A few other persons were suggested also as members, and were accepted. The five points were then read over for approval or objection. The first three points were carried unanimously, but there was a rather heated discussion over the last two points. Eventually, however, they were carried, and then the flag that had been brought by the delegates of the Association of Christian Communities was hoisted. Finally, a manifesto, containing certain clauses to be submitted to proper quarters, was presented for signature, and the deputations duly signed it.

The Paris Deputation's Views.

In the meantime, according to a telegram received from Paris, the Lebanese deputation there had presented to the Peace Conference a protest against the comedy that has been enacted by the Syrian Congress at Damascus, which presumes to bring the Lebanon within the zone of ambitions of the Emir Faisal, and expressing the hope that France "will take the necessary measures for the protection of the Lebanon's rights, which are intimately connected with French interests."

It is sincerely to be hoped that better feelings and more confidence will finally prevail between the two neighbouring states, which are so dependent on one another.

ASIA MINOR.

SMYRNA, March 24.

To-day the Greek Government have called out five more classes of recruits, including men of thirty years of age, and this has seriously jeopardised all industries in the city. The same authorities are commandeering all cart horses and vehicles.

It is reported that Mustapha Kemal has succeeded in securing sufficient coal and technical assistance to work the French railway between Alasheir and Afion-Kara-Hissar, and while he allows merchandise to be sent to Afion for transport to Constantinople he refuses to allow any goods to be sent from Alasheir to Smyrna. This is a considerable loss to Smyrna trade, because all the carpets from the Ushak district can now only reach Smyrna by way of Afion and Constantinople. Of course, Mustapha Kemal is anxious to show that if Smyrna is left to the Greeks no merchandise will be allowed to reach the city for shipment, and the Turks will arrange to send their goods to any port except Smyrna.

MALTA.

VALETTA, March 31.

Emigration.

Whilst Canada will not allow Maltese to enter as emigrants, the United States of America seem to be warmly welcoming the inhabitants of the island, and everybody is "off to America" to find dollars by the roadside and at every street corner, of course! Still, the exodus is good—and it is not an exodus of a small number—for with the demobilisation of the local militia and air force and the reductions in the dockyard things here seem to be going from bad to worse.

In Memoriam.

Field Marshal Lord Plumer, the Governor, has unveiled two memorial brass tablets in the Scottish Church, one to perpetuate the memory of the revered Dr. and Mrs. Wisely, and the other in remembrance of three promising young men who paid the last and greatest sacrifice for their country.

Personal.

Mr. N. Batistatos, the Consul-General for Greece, has been appointed to Rio Janeiro, and his departure from Malta is very much regretted.

Dr. Lewis F. Mizzi, well known in the Near East, and who recently presented the island of Malta with his unique and valuable specimens of minerals, is giving a series of lectures on the subject. These lectures are arousing the keenest interest. His Excellency Lord Plumer acts as President.

ALBANIA.

An Albanian correspondent writes:—

The situation in Albania is as follows:—The small French contingent which was at Skutari having withdrawn, the administration of the town and its district has been handed over to the Albanian Government. Ahmed Bey Mati, Minister of the Interior, has gone there to organise the administration. Thus Skutari is now an integral part of Albania, the union having been brought about by the desire of the inhabitants. There has been some talk of the entry of Italian troops into Skutari, but in point of fact there is only a small garrison, under a colonel, such as the Italians are maintaining in other Albanian towns, without, however, taking any part in the affairs of the country.

The town and district of Argyrokastro also placed itself under Albanian administration a month ago, when the Italians handed it over.

Of the Albania of the London Conference of 1913 there are only Valona and the province of Kortcha (Koritza) which have not yet submitted to the national administration; Valona and its immediate environs are still in Italian occupation, and Kortcha is under a mixed Franco-Albanian administration.

The Legislative Assembly still continues its labours at Tirana, where it held its first sitting on March 21. It is composed of thirty-seven members, of which number two are from Valona. The representatives of that town have protested against the length of the Italian occupation. It may be said that the new Government enjoys the confidence of all the country, and the fact that foreign Powers—such as France and Italy—have recognised it and have handed over to it the administration of Skutari and Argyrokastro increases its prestige still further.

It was wrong to accuse the new Government of Serbophilism; it is a spontaneous manifestation of the will of the people. An incident which occurred at Skutari shows that the new Albanian Government does not give way to Serbia when it is necessary to stand fast. The Consular Agent of Yugoslavia, who seemed to indulge in certain threats of a nature likely to upset law and order, was requested by Ahmed Bey Mati to leave the town, and he immediately departed to Montenegro.

A special importance appears to be attached to the reorganisation of the Albanian gendarmerie, and since this reorganisation necessitates considerable outlay and the Tirana Government lacks funds, a new law is about to be provided in order to make possible the launching of an internal loan without having recourse to foreign money.

The international situation of Albania causes some uneasiness, for the Peace Conference has not yet clearly and definitely made its views known. Two months ago we heard of the proposal put forward by Mr. Lloyd George, Monsieur Clemenceau, and Signor Nitti, providing for the division of Albania as "compensation" to Yugoslavia for concessions which she had to make to Italy. Fortunately, Yugoslavia did not agree to the arrangement, and Dr. Trumbitch declared that he was a supporter of an independent Albania within the frontiers laid down by the London Conference in 1913.

The thorniest question is still that in connection with Italy—that is to say, concerning Valona and the mandate demanded by Italy. The new Government, which is the successor to the National Assembly held in January, has mapped out as its programme opposition to the Italian pretensions, and the Albanian delegates at Paris are working for the complete independence and absolute sovereignty of Albania. Another anxiety of the Albanian Government lies in the Greek pretensions in regard to the southern provinces, Kortcha and Argyrokastro. For some time all danger regarding Kortcha seemed to have disappeared, for the Conference appeared to be better informed; but one cannot say as much regarding the province of Argyrokastro, where the Greeks seem to be creating difficulties for the Albanian Government.

CORRESPONDENCE.

BRITISH POLICY AND TURKEY

TO THE EDITOR OF "THE NEAR EAST."

Sir,—To anyone questioning my proposal for the regeneration of the Turkish Empire by making of it a federation of States under the dual control of France and England, I cannot do better than suggest a careful perusal of THE NEAR EAST of April 8. One learns, first of all (Notes of the Week), that offering the mandate for Armenia to the League of Nations is calculated to arouse misgivings, as the League has no armed force to ensure that its advice is obeyed. The trouble in Cicilia is largely owing to France undertaking responsibilities she was unable to fulfil, and such failure has already brought about a certain *rapprochement* between the Arabs and the Turks.

Next we find a long letter from Col. A. C. Yate strongly advocating our retention of Mesopotamia as a base against the attacks of Bolshevism. Col. Yate does not tell us where we are to find the men for this occupation, but expresses a hope that France, Italy, and Greece will give us "ungrudging support in reducing the Turk, from the Sea of Marmora to the Taurus, to a becoming state of subordination. We shall thus be fighting the Turks as well as Russian Bolshevists, and possibly others in the Caucasian republics. Smyrna has already experienced what this ungrudging support means. I wish that Col. Yate would be as sympathetic to the claims of the Turks as he is to his friends the Afghans; he would find them equally, if not more, deserving!

Finally, we come to the very interesting review of Mr. W. Bury's book, which teaches us what Pan-Islam signifies and what bearing its potential growth may have on the political situation in the future: "Hence Pan-Islam is more than a spiritual movement; it is a practical, working proposition which has to be reckoned with when dealing with Moslems even in secular matters."

Now, this is just what I venture to point out was provided for in the reconstruction of the Turkish Empire as a whole. If Germany, as Mr. Bury implies, failed to put the Turkish Empire "on a business footing," it does not follow that France and England together would also fail, especially as the conditions are entirely changed. Let us, therefore, return to Disraeli's policy of 1878, and with the association of France once more shoulder the burden discarded by Lord Salisbury when he gave out to the world that we had been "backing the wrong horse." You tell us, Sir, that subject races are never grateful to the protecting powers; but, no matter, we must look to the "concrete achievement" as our reward.—I am, etc.,

Ruishton, Taunton, April 11, 1920. COLES PASHA.

INDIAN MOHAMMEDANS AND TURKEY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—India has a Mohammedan population of 67,000,000, the bulk of whom inhabit Eastern Bengal. In normal times they are peaceable folk, but ignorance and fanaticism render them peculiarly susceptible of suggestion. The battle-cry "Religion in Danger" lashes them to unreasoning fury, and may be a signal for the worst excesses. Under such conditions extreme circumspection is called for on the part of prominent Europeans. The great Empress Maria Theresa rightly warned her children that an idle word from persons in their position might have graver consequences than the weightiest utterances of lesser people.

Now, I learn on unimpeachable authority that great mischief has resulted from a movement started by certain dignitaries of the Anglican Church, who wish to restore St. Sophia to its ancient cult. Indian Mohammedans are vehemently opposed to the "desecration" of a mosque which has been devoted to their religion for four and a-half centuries. Then we find the Rt. Hon. Viscount Bryce asserting that he had reliable information that no trouble need be expected in India whatever may be the Entente's decision regarding the fate of Turkey. This was a direct challenge to Indian extremists, and it has been accepted as such. They are determined to show what they can do, and a fierce campaign is on foot for that purpose, the outcome of which it is impossible to predict. At a meeting of prominent Mohammedans held a month ago in Calcutta violent anti-British speeches were delivered, and resolutions of a treasonable nature were carried unanimously. Nor is the mischief confined to the capital. A notorious agitator is touring Eastern Bengal in order to excite its fanatical population against the Christians. I venture to think that the heavy burden borne by Indian administrators should not be increased by ignorance and fanaticism at home.—I am, etc.,

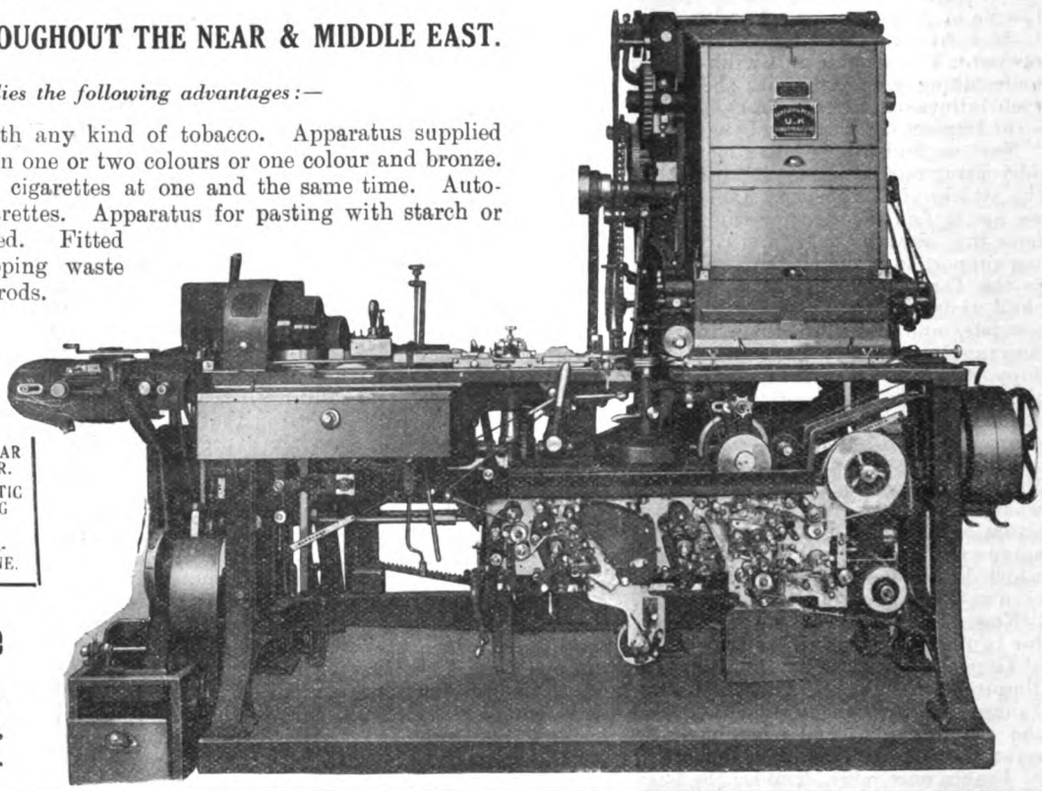
The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.



Also:—

THE "UNIVERSAL" CIGARETTE MACHINE.

THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.

"S.M." DOUBLE AUTOMATIC CIRCULAR KNIFE GRINDING MACHINE.

AUTOMATIC CIGARETTE-WASTE STRIPPING MACHINE.

PRESS ON THE NEAR EAST.

Outposts of Empire.

An interesting paper entitled "Reflections on the Government of Wild Tribes of the North-Eastern Frontier of India," read before the East India Association by Lieut.-Colonel John Shakespear, appears in the current issue of the *Asiatic Review*. In introducing his subject, the writer approaches the question of how it comes about that wild tribes have to be governed. Certainly not because the Government likes it.

The Wild Tribes round the borders of our settled districts are restless folk, with short memories. A raid on a peaceful village across the border is accompanied with very little danger, and is almost sure to result in considerable profit, while the honour and glory attached to the killing of human beings is great—in fact, among some tribes no girl will marry a youth till he has brought back a head, and among others the killing of an enemy is one of the qualifications necessary for the soul's passage to the happy hunting grounds.

Such raids recur with monotonous regularity, because the punishment inflicted by even the biggest of our expeditions is forgotten in less than a generation. But ultimately the patience of the Government is exhausted, and the order goes forth to occupy and administer the country the better for all concerned.

So there they are. The Wild Tribes shy and fidget like unbroken colts; Government anxious to do its duty, but burdened with many other cares; and the political officer zealous and eager, but with a great deal to learn, and much impressed with the importance and the difficulties of his post. "Just you touch me, and see what you'll get!" is the attitude of the tribes. The political officer is not anxious for a row. He knows Government wants to keep down expenses, and that if he can get along without asking for help from outside it will be counted unto him for righteousness; so if he is wise he will go cautiously.

* * * * *

Though things will probably remain fairly quiet for a bit, trouble is sure to come; go he never so warily, a time will come when our Political has to fight or lose his prestige; and once this is lost, the sooner he packs up his traps and quits the country the better for all concerned.

* * * * *

Naturally, in the personal equation lies the secret of successful administration. It is impossible to give any infallible rule for acquiring the necessary influence over these Wild Tribes. Colonel Lewin, the Pioneer in the Lushai Hills, gained such an influence over the people that forty years after his departure he was spoken of as the greatest of the sahibs; yet lesser men, who tried to imitate him in his free-and-easy fellowship with those he had to govern, failed miserably. Let a man be honest, straightforward and sympathetic, not easily excited, but patient and persevering and ready to learn, anxious really to know the folk he has to govern, and he will find that they will respond, and gradually learn to trust and love him.

Colonel Shakespear lays stress on the wisdom of acting upon the beliefs of the people for administrative purposes:

My friend the Hon. Mr. W. J. Reid, now Commissioner of the Assam Valley, when he was in charge of the Naga Hills, had a complaint laid before him by the Elders of a certain village that they suspected that men of a neighbouring village had stolen their cattle; they had no proof, but they asked him to call on the Elders of the suspected village to swear on the lives of the whole village that no one had stolen the cattle. These Elders, on being told of the accusation, returned home and took an oath of each householder on the lives of his household that none of them had stolen the cattle; and, having done this, they came back, and in the presence of their accusers, with all due solemnity, swore the necessary oath, whereupon their defamers paid up the customary fine and the case was apparently over; but after a very short time the victorious Elders returned with woebegone countenances and reported that three men having died in their village, they knew that someone had sworn falsely, and finally three men had confessed to the theft. They now tendered four animals for each of those stolen and demanded permission to expel the thieves from the village, not for being thieves, mind you, but for having sworn a false oath. The three men were taken to the village boundary and driven over with only a cloth apiece; wives, children, houses, land, and all they possessed were forfeited, and if they ever recrossed the boundary they were to be liable to imprisonment. In old days they would have been liable to death. In that particular only did Mr. Reid deviate from the tribal custom.

A curious scene comes to my memory. The sun has just risen, and it is bitterly cold; we are grouped round the sides of a deepish pool in a small river. Two men stark naked are standing shivering in the water. On a big stone, where the two shivering mortals can see him, stands a young British officer with his hat raised. The shivering ones are heroes in their own way: they are the head men of two villages who are about to uphold the claims of their rival villages to certain lands by the ordeal of diving. One is an expert swimmer; the other, as he plaintively explains, hates water. "Is your claim just?" asks the young officer. "Certainly," replies the poor unwilling diver. "Then fear nothing; God will protect you," is the cheering reply. As the sahib's hat goes down both head men duck under the water. The expert, vain in his own strength, swims about below the surface, while the other squats down and grasps a huge boulder. The water is so clear that every movement is apparent. In a very short time pride has a fall: a considerable portion of the swimmer's body emerges, and, with a yell, his opponents claim the verdict, and rush into the water, whence they drag their nearly exhausted champion. "I told you God would protect you," says the sahib, "and you see He did." Such methods of settling cases may not be in accordance with High Court rulings, and they certainly do not make the legal profession a paying one; on the other hand, they are approved of by the people, and they do not encourage or tempt people to lie.

Pan-Arabism.

The *Manchester Guardian* of April 8, in a leading article, makes a general review of the Near East and the prospects of its settlement. Of the Pan-Arab movement it says:—

The Pan-Arab movement is at once a little more Nationalist than the Turkish and a good deal more Imperialistic than the Egyptian. The Congress at Damascus, which has proclaimed the Emir Feisul King of Syria and his brother Abdulla King of Mesopotamia, has very little title to speak for Syria and none at all to speak for Mesopotamia. The term Arab is commonly used by Pan-Arab politicians to signify that all who speak the Arab tongue belong to the Arab nation. In this sense Egypt and North Africa belong to the Arab Empire. As a matter of fact, in the political sense the Arab nation has had the very briefest existence. The numerous Arab tribes, Arab in race as well as in speech, have never known how to hold together. They have been far more conscious always of their rivalries and antagonisms than of any community of interest and sentiment. To this day in the Arabian Peninsula the various princes are more often at war than at peace with one another. The Arabs of Mesopotamia, quite apart from the fact that most of them belong to the Shiah sect, have nothing in common with the Arabs of Syria, and Palestine has throughout history been distinct from Syria. What the Syrian Congress is seeking to do at Damascus is to assert not a Nationalist but an Imperialist claim. Were the Western Powers to admit that claim the political fabric sought to be set up by the Pan-Arabs could not endure because it has no foundation. It would be a great mistake to imagine that the acts of the Syrian Congress enjoy unanimous support even in Syria. The Lebanon has disavowed them, and so have some of the coast towns, while Damascus itself is divided between two parties. The most wealthy and responsible people in Damascus favour an accommodation with France, not because they love France, but because they know that war would mean ruin, and they do not see the possibility of an Arab State maintaining itself without European assistance and all that is implied in European assistance. The Emir Feisul himself shares these views. If he has suffered himself to be proclaimed King of Syria it is because he failed to convince the extremists, but none knows better than he that without an arrangement with the Western Powers there is neither hope nor future for an Arab State. On a general review, it may be said that it is perfectly practicable to concede what is just to each of the three Nationalist movements of the Near East—to Egypt recognition of what is essential coupled with a form respectful of the dignity of the Egyptian people; to the Arabs recognition of their national rights in the real Syria (which includes neither Palestine nor Mesopotamia) coupled with the indispensable European assistance; to Turkey recognition of the right of the Turks to be masters of their own destiny in the genuinely Turkish lands. If this be done there is no good reason to fear combination between them all, for they have fundamentally nothing political in common. The problem of India would remain to be solved, but the connection between India and what constituted the Turkish dominions is factitious and ephemeral. The real Indian problem arises in India, concerns India, and must be dealt with in India.

MUSICAL NOTES.

There are not many Serbian artists in this country at the present time, but it is to be hoped that when more settled conditions prevail in Yugoslavia and Great Britain cultural intercourse between the two countries will be undertaken on a larger scale. For the meantime we have in London a few Serbian artists who indicate the musical genius of their nation. Of these one of the most remarkable is M. Yovanovitch Bratza, who gave a violin recital at the Wigmore Hall on April 8. His tone is both broad and pure, the facility of his left-hand technique is quite amazing, and the energy and decision of his playing I have never heard equalled by a boy of his years. (I understand that his age is about fourteen.) On the interpretative side he is, of course, lacking, and neither the affectations which he borrows from famous masters nor his abundant mannerisms in any wise constitute a style. Before he becomes a great player, and a great player he certainly could become, he will have to rid himself of as much as he learns. What he needs now is discipline, and a very severe discipline, for the waywardness of his youth is more abundant than is natural. For instance, in the sprints for the climaxes he always beat his (happily unperturbed) accompanist, Mr. Krish, by a short note or so; and the liberties which he took in Grieg's Sonata in G minor and in Saint-Saens' "Havanaise" (and especially in the creation of some unspeakable *rallentando* passages in the Prelude of Pugnani-Kreisler) made one long for the time of his twentieth birthday, by which date I think he will have discarded artificialities and will have discovered and developed the art that obviously lies in him.

At the Æolian Hall, on April 8 and April 9 respectively, two notable singers, Mr. Douglas Marshall and M. Mischa-Leon, gave their last recitals for this season. On the unusual merits of both of them I have remarked before. Mr. Marshall gave what he called a "popular" programme; and to those who doubt the British people's power of musical appreciation it may be well to describe it. It consisted of a group of songs by Benedetto, Marcello, Bassani, and John Dowland (Elizabethan Airs), a group by Debussy, Graham Peel, and Tchaikowsky, a group of Somerset and Hebridean folk-songs, a group by Vaughan-Williams and Cyril Scott, and—most significant of all—a song in French by Gabriel Favré as an encore! And with the exception of the English verses ("Nay, tho' my heart should break" and "Fifinella") to Tchaikowsky, all the words were worthy of the music. Everything points to a fine future for Mr. Marshall; his judgment is very sound, his diction is as pure as that of anyone singing to-day, his enthusiasm and enterprise are evident, and—neither last nor least—he has an understanding accompanist, Mr. Aubyn-Raymar.

M. Mischa-Leon's programme consisted of what one imagines would be "popular" in his own country, for it was made up wholly of Scandinavian songs, among which he included, in addition to Danish, Norwegian, and Swedish songs, some compositions by Finnish composers, notably Rosenfeld and Sibelius. As a matter of fact, his recital, though given in a language unfamiliar to most of his audience, was extremely popular, for it comprised many songs which he himself has made favoured by the discerning. Scandinavian song has not so much of the freshness and clarity which one finds in the literature of these countries, and it seems more in its psychological than in its physical content that it is original; in common subjects where the ballad form is employed there is little mark of genius. In this recital all the blue-eyed innocence and the dreaming subtleties of the music were thoroughly exploited, and M. Mischa-Leon was master of a field in which he is incomparable.

At the Queen's Hall, on April 10, Mr. Frederic Lamond, the finest British pianist living, gave a recital which consisted chiefly of works by Beethoven, Chopin, and Liszt. Of his Beethoven (he played the Sonata in E major, Op. 109) it is sufficient to say that no one but Busoni can approach it for dignity, depth and general splendour. In Liszt his mastery over technique was so absolute that you forgot how he played in marvelling at what he played. But it was in Chopin that he was most interesting. Even in the Ballade in G minor and the Nocturne in C minor he allowed no trace of sentimentality, and his guarded tenderness never approached the effeminate. In the Polonaise in A flat he was superb, for the warmth necessary in it is of the fiery, not of the loving, nature. In the famous Sonata in B flat minor, and especially in the Funeral March from it, he was supreme, combining great originality with the inflexible purpose which his intellectuality always preserves. To those who like their Chopin as lovers do, full of sighs, caresses, and melting loveliness, he could not have appealed much; but the rigorous way in which he excluded sentimentality, even in the middle section of the Funeral March, was an emotion in itself. It may not have been Chopin, but it was magnificent.

ANDANTE.

CHRIST CHURCH, CONSTANTINOPLE, WAR MEMORIAL.

An influential Executive Committee has been formed in Constantinople, with Mr. A. T. Waugh, C.M.G., as chairman, to collect subscriptions to a fund to commemorate those of our race who fell during the war in the Near East. The appeal states:—

"The men who served in the Mediterranean, at the Dardanelles, in Mesopotamia, Macedonia, and other Eastern theatres of the war, are now back in their homes in the Old Country, in Australia, in New Zealand, in Canada, wherever, in fact, a British community exists. They will remember that Constantinople, the capital of the Turks, before which our fleet is now anchored, was their objective.

"In Constantinople there has long stood an English church, the name of which, the Crimean Memorial Church, shows that it was erected to enshrine the memory of our heroic fathers who fought and suffered and died in a previous war. It is now thought that no more seemly place could be chosen than this church in which to commemorate also those of our brothers who have died in the Great War. The church was built in 1865-68 by public subscriptions, but no endowment could be provided. The want of such a fund was always felt, but now more than ever.

"The money subscribed will be used by the trustees and the committee as a memorial endowment fund to ensure in perpetuity the upkeep of the church, within which as beautiful a memorial as can be devised will be set up. As to the nature of this memorial, whether chancel screen, reredos or tablets, the committee will be guided by the wishes of the subscribers.

"The patrons and grand committee include such names as Admiral Sir John de Robeck, H.M.'s High Commissioner and Commander-in-Chief, Mediterranean; the Lord Bishop of Gibraltar; Earl Curzon of Kedleston; Lieut.-General Sir H. F. M. Wilson; Rear-Admiral Sir Richard Webb; and General Sir William Birdwood.

"Subscriptions may be paid to the honorary treasurer, Christ Church War Memorial, at the British Embassy, Constantinople; or to the National Bank of Turkey, Galata, Constantinople, and also for local subscriptions, to the "Orient News," Kroeckers Hotel, Péra."

In this country the Imperial Ottoman Bank will be pleased to transmit any sums which subscribers may forward to it for the memorial.

THE ARAB HORSE SOCIETY.

A council meeting of the Arab Horse Society was recently held at the Grosvenor Hotel, S.W., when entries for the Stud Book, Vol. II., and for the Arab-bred Register were accepted. The council received the financial report on the London show, which was considered very satisfactory, and additional donations to the show and prize fund were acknowledged. The following are the new members of the Society:—

Miss Eve B. Balfour, New Bells Farm, Haughley, Suffolk; Miss Joan Dening, Ballywater Park, Ballywater, Co. Down; Mrs. K. S. Hylton Foster, Foxbury, near Dorking, Surrey; Lieutenant-Colonel Sidney Goldschmidt, Kenfield House, Ollerton; Mrs. R. Hoare, Bignell Park, Bicester; Miss T. Hudson, 75, Cheyne Walk, Chelsea, S.W.; Edward Hurtley, Crowborough Warren, Sussex; Charles S. Lyon, The Varegs, Malvern; Mrs. J. Oscar Muntz, Foxhams, Horrabridge, Devon; Sir Alfred E. Peace, Bt., Pinchinthorpe House, Guisbrough, Yorks; Major G. C. Roller, Tadley, Basingstoke;; Wilfred N. Snewin, Barford Cottage, Little London, Basingstoke; and Lady Wentworth, Crabbet Park, Crawley, Sussex.

NEAR EAST BOOKSHELF.

I.—(a) BALKAN PROBLEMS AND EUROPEAN PEACE. By Noel Buxton and C. Leonard Leese. (London: George Allen and Unwin, Ltd., 1919. Price 4s. 6d. net.)
(b) "REVUE DES BALKANS." Mars, 1920. Paris.

II.—"RUMANIAN GRAMMAR." By M. Beza. (Published by the Bank of Roumania, Ltd., London. Price 7s. 6d. net.)

I.—TOWARDS A LASTING SETTLEMENT.

"The relations of the several Balkan nations to one another," wrote President Wilson in his Fourteen Points, "should be determined by friendly counsel along historically established lines of allegiance and nationality. . . . Every territorial settlement must be made in the interest and for the benefit of the populations concerned. . . . All well-defined national aspirations must be accorded the utmost satisfaction without introducing new or perpetuating old elements of discord and antagonism."

The authors of "Balkan Problems and European Peace" have endeavoured to indicate the lines on which effect could be given to President Wilson's stipulations with some hope of permanency. They wrote before peace with Bulgaria was signed, and it is perhaps unnecessary to point out that the Treaty does violence to every one of their contentions. The book, however, loses none of its value for that reason. Sooner or later the Balkan Peninsula must be brought to some measure of co-operation based on a common understanding of the mutual interests of the component States, and it is well that the only feasible path by which this goal can be reached should be familiar to all. The settlement devised by the Supreme Council offers no permanent guarantee of peace, as everyone knows; and it surpasses the wit of man to comprehend why the British and French Governments lent themselves to a settlement which is the negation of all the principles that were declared to constitute their war aims and is opposed to the interests of Europe. Our authors have not had long to wait for the endorsement of one of their prognostications. On page 121 we read:—

For some time, if not for ever, the struggle between Russia and the Teutonic Powers for Balkan hegemony is at an end. But the immediate decision which the Balkan States themselves have to make is between the perpetuation of the same evil by assisting or opposing French and Italian Imperialism and the development of co-operation one with another.

The March issue of the *Revue des Balkans* seeks to make our hair stand on end by disclosing the overtures that are alleged to have been made by Bulgaria to Italy for an understanding between the two countries. If such overtures have been made, they are the natural outcome of the Bulgarian Treaty and of the policy pursued by organs such as the *Revue des Balkans*. The only satisfactory solution of the Near Eastern question is a Balkan Federation, but on the basis of the present settlement a Federation is impossible. With such a Federation the Balkan States would place themselves at once on an equality with the Great Powers, and with the promulgation of a Monroe doctrine for the Peninsula they would at last reach their goal—the Balkans for the Balkan peoples. Until then they must remain petty States exposed to all the disadvantages of intrigue from within and possible aggression from without. No doubt the Governments of Great Britain and France have been led to believe that the combined strength of Roumania, Yugoslavia and Greece is a sufficient guarantee that nothing untoward will result from injustice done to Bulgaria. In connection with this Messrs. Buxton and Leese write:—

History has shown that nationalism in the Balkans cannot be suppressed. A settlement which disposes of living peoples as "chattels," contrary to the wishes of the majority, is bound to be temporary. The configuration of the country in the most hotly disputed region, Macedonia, makes the complete suppression of armed bands a task beyond the physical capacity of any alien Government, however efficient. Political assassinations, sporadic revolts, and open war would follow in inevitable sequence.

The warning is not superfluous; but before it is justified by the event we may hope that saner counsels will have prevailed and a sounder settlement have been reached by mutual agreement. The small volume under review suggests the lines on which such a settlement might be arranged. Of the efficacy of the proposals the reader will judge for himself. The one detail in which the authors will have difficulty in carrying anyone with them is the suggestion that the Dobruja settlement should be allowed to interfere with Roumania's relations with Constanza.

II.—ROUMANIAN GRAMMAR.

A Roumanian Grammar for English students was badly needed, and the enterprise of the Bank of Roumania in publishing this volume by M. Beza is praiseworthy and opportune. The author has broken new ground by bearing in mind that his readers will be for the most part adults, who will want to "get busy" with the Roumanian equivalent of what they are likely to say or write, and not to waste time over "the pen of my aunt," etc. Elementary sentences are essential, but M. Beza enables the student to press on, and we have no hesitation in commending this grammar warmly to all those who wish to learn Roumanian. Considerable ground is covered in the 114 pages, and both the subject matter and the form of its presentation are admirable.

"THE ASIATIC REVIEW."

The April issue of *The Asiatic Review* covers a range of subjects co-extensive with its title. Inevitably the Turkish question figures prominently in its pages, and is discussed by Mr. Ameer Ali, who insists upon both Constantinople and Adrianople remaining under Turkish jurisdiction, by Boghos Nubar Pasha in its bearing on the future of Armenia, and by Mr. H. Charles Woods, who recapitulates the case for the retention of Ottoman administration in Constantinople. The proceedings of the East India Association are represented by two papers: Lt.-Col. John Shakespear makes an interesting contribution to the question of the government of the wild tribes of the North-Eastern Frontier of India, approaching his subject with the full weight of personal experience and with practical sympathy for these difficult folk; Miss F. R. Scatcherd entitles her lecture "The Friends of India, Wise and Otherwise," but confines the bulk of her remarks to the latter category. She has compiled with great pains a useful refutation of some of the chief fallacies propounded by Mr. H. M. Hyndman, Mr. Wadia, and Mrs. Besant. In dealing with Mrs. Besant she relies mainly on the late Dr. Nair, who had already shown the artificiality of a Home Rule movement engineered by a white woman. Sir Harvey Adamson is able to remind the Association that out of over a hundred papers on Indian subjects read before it, his was the third to deal with Burma, and in a short compass he provides an interesting analysis of the country and its people.

A Commercial Section makes its first appearance in this issue of the *Review*, preceded by a valuable article on the economic situation of the Armenian Republic, by which the reader is reminded afresh of the Herculean task entailed by post-war reconstruction the world over, and incidentally that a peacemaker, whether called a mandatory or by any other name, will be essential to the welfare of Transcaucasia. The customary features of the *Review* are well maintained.

BOOKS RECEIVED.

"High Prices and the Quantity Theory." By Sir John O. Miller (formerly of the Indian Civil Service). (London: Sifton, Praed and Co., Ltd. 2s. 6d. net.)

"A Book of Operas. A Second Book of Operas." By Henry Edward Krehbiel. Two Volumes in One. Illustrated. (New York: The Macmillan Co. $2.50.)

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK,

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. April.	1920. April		1338. Rajab.	5680. Nisan.
15	2	Thursday	26	27
16	3	Friday	27	28
17	4	Saturday.....	28	29
18	5	Sunday	29	30 Ayar.
19	6	Monday	30 Shaban.	1
20	7	Tuesday	1	2
21	8	Wednesday	2	3

Mr. Rudyard Kipling has arrived at Biarritz.

Lady Dorothy Mills has returned to 91A, Ebury Street from Tunis.

The Maharani of Baroda arrived in London on April 11 from the Continent.

Sir Charles Bedford has returned to London from a business mission in India.

Lady Roper Parkington is seriously ill, and is unable to see friends or to answer correspondence.

Rear-Admiral Doughty has arrived at Malta, in succession to Rear-Admiral Sinclair, and has hoisted his flag on board the Resolution.

Fathollah Khan Monazam-es-Saltaneh, Secretary to the Persian Legation, has recovered from his illness and has resumed his diplomatic duties.

Prince Firouz Nosrat ed Dowleh, the Persian Minister for Foreign Affairs, having concluded his special mission, left London on April 9 for Paris.

Sir Henry Belfield is leaving England this week on a business mission to Egypt and the Sudan, and expects to be away for three or four months.

Prince Carol of Roumania has been spending a week in Ceylon before proceeding to India. He was met on his arrival at Colombo by the Acting-Governor.

Sir Krishna Gupta has arrived from India with other members of the Indian Army Commission, and is staying at Kensington Palace Mansions, De Vere Gardens.

M. Snouck Hurgronje, Director of the Economic Department of the Dutch Ministry of Foreign Affairs, and author of many works upon Islam, is visiting Paris for a conference regarding the granting of a credit to Germany.

Dr. Trumbitch, the Yugoslav Foreign Minister, has been in a nursing home at Neuilly since April 1. An operation, which was quite successful, was performed on April 3, but he is being confined to his bedroom for a few days more.

A marriage has been arranged between Major Howard F. Murland, 64th Pioneers, Indian Army, youngest son of the late C. W. Murland, Annsborough, County Down, and Marion, second daughter of the late Alec. Thomson, Aberdeen.

On March 24, at Bareilly, India, the marriage took place of Colonel Sydney Boyce Combe, D.S.O., M.C., younger son of General Boyce Combe, C.B., to Grace, second daughter of Mr and Mrs George B. Behrens, Vron yw, Denbigh.

A marriage has been arranged between Captain George Hamilton Ogilvie, M.C., B.Sc., Indian Forest Service, and Margaret Macnee (Peggy), daughter of Mr. and Mrs. Arthur Pennington, Minehead. The wedding will take place on April 27.

The marriage of Sir Herbert G. Dering, K.C.M.G., K.C.I.E., his Majesty's High Commissioner in Bulgaria, and Mrs. Middleton Smith will take place on April 27 at Holy Trinity Church, Prince Consort Road, Queen's Gate. Sir Herbert Dering has arrived in town from the British Legation, Sofia.

Sunday, April 11, was Easter Day according to the Greek calendar, and was celebrated in the Greek and Russian churches in London. Large congregations attended. The Archbishop of Trebizond officiated at the service in the Greek Church in Moscow Road, Bayswater.

Mr. F. H. Lucas, C.B., Financial Secretary at the India Office, has been critically ill with typhoid fever, and it will be some months before he can resume his duties in Whitehall. They are being carried on by Mr. C. H. Kisch, C.B., lately secretary to the Indian Exchange and Currency Committee.

The marriage took place at St George's, Beckenham, on April 10 of Lieutenant Charles Humphrey de Meuron Woods, R.N., second son of Mr. and Mrs. Ernest Woods, of Warren Wood, Bexley Heath, and Miss Grace Marion Collier, elder daughter of Mr. G. H. Collier, C.I.E., of the India Office, and Mrs. Collier. The bride was given away by Major Arthur Collier, in the absence of her father in India.

OBITUARY.

Our Belgrade Correspondent writes (April 5):—

Those who have followed the course of Yugoslav politics for the past twelve months will regret to hear of the death of the President of the Skupshtina, Dr. Dragoliub Pavlovitch. On Saturday morning Dr. Pavlovitch was in his office as usual, but complained that he was not feeling well; at half-past ten he went home, and ordered a cup of tea; when his servant brought it he found the Speaker dead. Dr. Pavlovitch was a well-known historian, who had specialised in the history of Serbia in the eighteenth and nineteenth centuries, and especially in the Austrian occupation of Belgrade in the early part of the eighteenth century, when the capital was still the seat of a Turkish pashalik. He was born in the province of Timok in 1866, was Professor of History at the University, and a member of the Academy. As a politician he belonged to the Radical party, but, as became a historian, was singularly free from the ties of party passion. He had the reputation of a fair and unprejudiced President of the Chamber, and was much respected by the Democrats. He had recently been invited by the Regent to form a neutral Cabinet, but had declined the onerous and invidious task. During the past few weeks he had been almost daily in audience, advising the Crown upon the political situation, and his death is a heavy loss at this moment of political storm, and Crown, Parliament, and people will miss him.

Colonel Russell Richard Pulford, C.I.E., late R.E., has died at Ramsgate, aged seventy-five. He joined the India Public Works Department in 1870, and served through the Afghan War of 1879-80, for which he received the medal, and was promoted to be a superintending engineer in 1892. He held several responsible positions, and was chief engineer in the Public Works Department from 1899 till his retirement at the close of 1900.

APPOINTMENTS, ETC.

The Secretary of State for India has decided to appoint Sir Malcolm Hogg to be a member of the Council of India in succession to Sir Marshall Reid, C.I.E. Sir Malcolm Hogg will join the Council early in May.

Dr. Shafaat Ali Khan, D.Litt. (Dublin), has been appointed by the University of Madras Assistant Research Professor in Indian Economics at a salary equivalent to £900 a year. The professorship is held by Dr. Gilbert Slater, formerly Principal of Ruskin College, Oxford.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

MINING ENGINEER, M.I.M.M., open to any proposal. Can interest capital. Knowledge interests in Near East. Box No. 156, NEAR EAST, 1, Devonshire Square, E.C.2.

GOVERNESS-COMPANION desires POST (abroad preferred). Usual English subjects; French (acq. abroad); Music; Art (Art Teacher's cert.); needlework. £80—£100.—M. MCG., The Ladies' League, 118, New Bond Street, W.

TO AVIATION FIRMS.—Ex-R.A.F. Officer, pilot, wants job, preferably as pilot; willing to go abroad.—Box No. 159, THE NEAR EAST, 1, Devonshire Square, London, E.C.2.

NEWS IN BRIEF.

A daily aerial service between Toulouse (France) and Casablanca (Morocco), is now in operation.

It is stated that delegates of the Afghan Government have left for India to discuss certain questions with British officials.

A Royal Air Force Handley Page machine crashed at Abuhamad on April 2, says a Cairo message. The four occupants were killed.

According to a telegram received from Bucharest, the Roumanian troops completed the evacuation of Hungarian territory on March 24.

King Ferdinand of Roumania has signed a decree for the ratification of the Peace Treaty between Germany and the Allied and Associated Powers.

An official *communiqué* issued at Athens announces that the state of war between Greece and Germany ceased as from March 30, and the clauses of the Versailles Treaty have entered into force.

General Alexieff, former Commander-in-Chief of the Russian Armies, was buried on Wednesday with full military honours in the cemetery at Belgrade, the body having been brought by his family from Odessa.

A Simla *communiqué* dealing with the North-West Frontier situation states that General Climo's force is exacting fines of rifles. Certain sections of the tribes are truculent, but the general position has improved.

Roumania is about to establish a regular organisation of a military character for the purpose of reconstruction. Among other measures, military battalions will repair and maintain in good condition all roads and railway lines.

It is announced that Syrian currency will replace Egyptian money in Syria from May 1, and that any effort to depreciate the currency will render the offender liable to one month's imprisonment or to a fine of 1,000 Syrian pounds .

The Rome correspondent of the *Morning Post* states that Colonel Castaldi has been appointed High Commissioner for Albania, the Italian Government thus acknowledging the new provisional Government of Albania. Italian occupation is to be limited to the coasts.

A resolution has been passed by the British Committee of the Indian National Congress urging the Imperial Government to give instructions that, both as to legislation and administration, the principle of equal treatment, as between Indians and Europeans, should be maintained in East Africa.

The *Busreh Times* of March 2 contains an announcement that that journal will for some days have to be published in a very curtailed form, owing to the collapse of the roof of the Government Press. The accident was brought about by the fall of a wall, which seems to have been due to the abnormally heavy rainfall, 2.2 inches having fallen in one week. This is approximately one-third of Busreh's rainfall for the year.

The following *communiqué* has been received by the India Office from the Civil Commissioner at Baghdad:—The position on the Upper Euphrates is greatly improved. Leaders of Arab tribes who have until recently looted our convoys have come in, deposited the security demanded, and have paid most of the fines imposed upon them.. In spite of the recent heavy rains and floods the Busreh-Baghdad railway has run without interruption since it was opened in January by Sir George MacMunn.

COLONEL JACOB'S CAPTIVITY.

Reuter states:—

Colonel H. F. Jacob, C.S.I., the head of the British Mission to the Imam of the Yemen, who on the way from the coast to Sana was captured by Arab tribesmen and detained for four months, has reached London. The Kuhva Sheikhs, his captors, who were led to believe that the British envoy was going to conclude a treaty by which the whole of the Lowlands of the Yemen would be handed over to the Imam, treated Colonel Jacob and his five companions with much courtesy, and on their release all the property of the mission was returned intact, while the tribesmen declined to accept ransom money. The mission was detained at Bajil, a small town about 25 miles inland from the port of Hodeidah. The people of the plains were Sunnis, and of a puritanical turn, while the hillmen were Zeide, or Shiahs, and the failure of the mission to achieve its object was largely the result of tribal jealousy. The British party were allowed considerable freedom of movement, but were not permitted to leave Bajil. Sports were held; football was a daily pastime, the entire community turning out. The Sheikhs believed the luggage of the mission contained aeroplanes, and when at length an aeroplane appeared over the town the panic was intense, and for a time the mission-house was the target for tribal rifle practice. The Turkish Governor-General, Nahmud Nadim Bey, who appeared on behalf of the Imam to effect the release of the mission, was of great assistance to the party, as were many of the Saintly House of Murawaa hard by. The party got their mails and supplies from the coast by camel-caravan, and fruit and potatoes were received from the hills, the latter the gifts of Mahmud Nadim Bey, who in return received gifts of cigars from Colonel Jacob.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

BRISTOL
GRAND SPA HOTEL.

EXETER
ROYAL CLARENCE HOTEL
(facing beautiful Cathedral).

LONDON
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.

THURSDAY, APRIL 15, 1920.

THE FUTURE OF ALBANIA.

Although Albania necessarily figures a long way down on the list of problems with which the Supreme Council of the Allies has to deal, its settlement, if it is to be satisfactory and lasting, calls for the same expert knowledge and the same careful consideration as any other question arising out of the war. The tendency to group these questions in different categories according to a rough and ready estimate of their importance may be natural; but it should not be overlooked that, in so far as an unsatisfactory settlement in any direction must constitute a menace to the world's peace, there is little to choose between the degrees of importance attaching to the different problems. In South-Eastern Europe, indeed, all these problems react so closely upon one another that they ought to be regarded as a single whole, and only a solution which responds in every particular to some definite principle, uniformly applied, can hope to win acceptance from all the conflicting interests. The Supreme Council, it is evident, has wearied of its task long before it is completed. In desperation over the seemingly interminable struggle between Italians and Yugoslavs regarding Fiume and Dalmatia, it tried to find a *modus vivendi* by offering compensation elsewhere to both parties according as they might feel disappointed in respect of the special bone of contention. Italy and Yugoslavia were to be consoled by receiving portions of Albanian territory, while Greece was to be allowed to carry the partition still farther. Only a very wearied Council, which had travelled far from the Fourteen Points, could have conceived such a settlement; and it required a very cynical and forgetful one to embody it in a definite offer. Fortunately for the world's peace the suggestion was made public in time, and, whereas opinion regarding other decisions of the Supreme Council has been divided, the denunciation of this proposal was unanimous. The Yugoslav Government lost no time in refusing to be a party to such an outrageous proceeding as that suggested by the Council, and President Wilson administered the *coup de grâce* by stating that the United States would not agree to a settlement of the Fiume question at the expense of a third party. In regard to the Adriatic question, in contradistinction to the Turkish settlement, President Wilson can still claim to be consulted. American help in the period of reconstruction is as vital to Italy as it was to the Allies as a whole during the war; but the United States did not declare war on Turkey, they have refused to take any share in the rehabilitation of the Turks, and consequently they cannot expect that their views regarding the future of the Turkish Empire should carry the same weight as on other matters in the councils of the Allies.

The threatened partition of Albania had the effect of rousing the Albanians to united action. A National Assembly met at Lusnia on January 30 and recorded a unanimous protest against the attempt of the British, French, and Italian Governments to put into force the Pact of London of 1915, thus sacrificing Albania "to satisfy the imperialistic aspirations of the neighbour States." A further resolution announced the Assembly's decision "not to accept any foreign mandate or protectorate," and it was added that "the Albanians are ready to make all sacrifices, to the last drop of their blood, against any decision which may imperil their territorial integrity and their complete independence." No one with any knowledge of the Albanians will be inclined to challenge the Assembly's sincerity in placing this latter resolve on record, and it is to be hoped that the words will carry no less weight with the Supreme Council than President Wilson's pointed reminder and the refusal of the Yugoslav Government. An equally important step taken by the Lusnia gathering was to create an Albanian Administration which, with headquarters at Tirana, has since been responsible for the affairs of the country, or of the parts of it which have come under its jurisdiction. Elsewhere in this issue a correspondent explains the situation in Albania as it is to-day. At the head of the Tirana Administration is Ahmed Bey Mati, with the post of Minister of the Interior. Although Albania has officially declared its undying hostility to anything in the nature of a mandate or an encroachment upon its independence, the National Government seems to have maintained satisfactory relations with the Italian authorities, as we are told of Italian troops acting as local garrisons, but without interfering in any way in the administration. If this is the case, it reflects considerable credit on both parties. Within the last month or so the Tirana authorities have extended their jurisdiction over the town and district of Argyrocastro, in the south, and over Skutari in the north, so that their writ runs throughout Albania as mapped out by the Great Powers in 1913, with the exception of Valona, which is in Italian hands, and Koritza, which is under Franco-Albanian rule.

Peace and quietness in the Balkans will not prove satisfactory to everybody, and least of all if they should make their appearance in Albania. Consequently it may be expected that doubts will be thrown on the Albanian picture we have tried to reproduce. There can be no doubt, however, that it is the Allies' duty to welcome and to afford every possible support to any Albanian Government that promises to administer the affairs of the country with honest intentions and with some prospect of the goodwill of the people. The first necessity is a fixed frontier, and this must be provided by the Supreme Council according to the principle of nationality, to which it stands committed. The Yugoslavs have rightly decided that Skutari must belong to Albania; on the other hand, Koritza is claimed by the Greeks, who would also make Greek Epirus a very elastic term, and Valona will cause permanent heartburning if it should remain in Italian occupation. Albanian unity has probably still many serious gaps in it, and foreign propaganda may be able to show wonderful statistics; but the Supreme Council by now ought to be on its guard in these matters. Wherever any reasonable doubt exists, recourse ought to be had to a plébiscite conducted under neutral auspices. It will be by no means the least achievement of the war if it leaves Albania at peace with itself and with its neighbours. The unhappy past of the country is no criterion. If once the administrative machinery can be made to work smoothly, then the improvement of agriculture, the development of commerce, and the establishment of a national educational system will work wonders. In all this Albania needs outside help; but it must be given tactfully and disinterestedly. Italy would be the obvious friend and guide of the Albanians if she could divest herself of the ideas of a grandiose imperialism.

SOME WAR-TIME REMINISCENCES OF PERSIA.—III.

By BERNARD SOTHAM.

With the advent of some British troops the sceptical Persians began to think that there really was some truth in the stories that had been told about the doings of the British Army in Mesopotamia, though very few believed in the capture of Baghdad or even of Kut. However, the arrival in Kasvin of a British General with his staff gave some promise of fulfilment of the long-looked-for help to the very few Persians who remained friendly to Great Britain. It had long since become extremely dangerous for any Persians to be openly friendly to the Allies, and many had paid the penalty of such friendliness at the hands of the assassins employed by agents of our enemies.

The functions of the British troops in Northern Persia were those of a Military Mission, and most excellently they did their work. They were composed of a few officers with a sprinkling of specially chosen N.C.O.'s. This small force, with machine guns and a few armoured cars for self-protection, moved up over some 400 miles of almost unknown country in light motor-cars. The doings and hardships they suffered on the journey, chiefly on account of the excessive cold, but also of unfriendly natives, and complete ignorance of the country which lay ahead of them each day, would make a most interesting story, and it is to be hoped that it will one day be written. The absence of roads was only one of their many difficulties. Rivers had to be crossed, bogs and marshes negotiated, mountains nine thousand feet above the sea level crossed, snow-drifts of fifteen feet deep cleared, and endless other difficulties encountered.

This Military Mission lost no time in getting to work. They got into touch with the Persians and were able to give them direct and personal accounts of the doings of the British Army away in Mesopotamia. Thanks to their skill, convincing diplomacy and propaganda, several powerful Persian chiefs offered all their available armed support to the British cause. Even a regiment of Persian Levies was raised and used for policing the roads. An improvement was at once noticed in such large and important towns as Kermanshah, Kangavar, Hamadan, and Kasvin. These towns were nests of agitators and schemers against the British. Some of the leading undesirables were skilfully kidnapped and sent out of the country on Ford cars, while others cleared off of their own accord. In view of future military operations, much necessary and vital information regarding spies, etc., was gathered, also information regarding the numerous tribes bordering on Persian Kurdistan.

With the movement of the Turkish Army from Tabriz it became evident that military operations would inevitably take place. This meant that a long line of communication between Baghdad and Hamadan had to be established. A great deal of invaluable work was done in improving the track from the frontier up to Hamadan; bridges were repaired, and the Army moving up into Persia arrived to find all the pioneer work done and much invaluable time saved.

Following on the events which I have just narrated, British troops in considerable numbers moved up into Persia. Up to this point there had been no armed collision with any hostile elements other than small affairs with Persian and Kurdish brigands.

Meanwhile, the Russian volunteers moved forward from Kasvin towards Resht and the Persian port Enzeli, on the Caspian. The Jungalis, with some Austrian and German help, opposed them on the Mengil Bridge, on the Russian Road, a spot well known to travellers in Northern Persia for its terrific winds. After a short fight the Jungalis were beaten, and the Russians advanced and occupied Resht and the port of Enzeli. These Russians were shortly followed by British troops, who "took over" from them.

All these happenings had a very salutary effect on Teheran, and our enemies in the Persian capital began to feel very uneasy. By June, 1918, British troops had concentrated in considerable force, and they assumed a definite title, "Norperforce," with headquarters at Kasvin. A move was made in the direction of Tabriz, from where the Turks were advancing towards Central Persia, with the object of driving the British out of Persia. Permanent positions were established at Bijar and Sanjan, a line roughly parallel with the Hamadan-Kasvin Road and some eighty miles west of it. The Turks attacked Sanjan, and severe fighting ensued, whilst the Jungalis attacked our position near the Caspian, necessitating reinforcements beng rushed up to those parts. The other end of the line at Bijar was kept busy with Kurds and small bodies of Turks; at the same time alarming news was received of the evacuation of Urumia by the Jehlus and Armenians. They had been steadily fighting against the Turks for months past in defence of their country, but had at last been compelled to evacuate entirely, and their goal was Hamadan, which they thought was the safest place to make for. This, indeed, was bad news, for it meant our being saddled with something like 80,000 men, women, and children, and this in a famine-stricken country, where we were hard put to it to feed ourselves. It was a very clever move on the part of our enemies. Things looked so black about this time that the evacuation of Resht, Enzeli, and Teheran was freely spoken of, and preparations were made for these events. In fact, one heard whispers of the total evacuation of Northern Persia being possible.

I have spoken freely of military operations taking place in such places as Kermanshah, Hamadan, Bijar, Sanjan, Kasvin, Resht, etc., but it is necessary to bear in mind that all these places are from 80 to 100 miles distant from one another. The country covered is very wild, mountainous, barren, and bleak, and the nature of the operations needed a rapid movement of troops and their supplies from one point to another. This, of course, necessitated the construction of many hundreds of miles of roads in a famine-stricken country, where labour was very scarce. It was absolutely essential that these roads were capable of carrying heavy loads of motor transport and armoured cars. Personally, I think that the roads which sprang into being, like the proverbial spring onion, speak volumes for the efforts made by the Royal Engineers.

To return to the evacuation of Urumia, upon receipt of the news of the evacuation having started, ammunition and machine guns with British gunners were hastily sent off from Hamadan by motor convoy. British officers accompanied them, their intention being to meet the Armenians and endeavour to persuade them to turn round and return to their country and fight the Turk again. This convoy got as far as Bijar, where the head of the refugee column was met. There was no chance of arguing or trying to reason with this panic-stricken mob. They were arriving in their tens of thousands, and the utmost confusion and chaos reigned. The refugee column was attacked by Kurds all the way down to Bijar and harassed by the Turks in their rear. It took about twelve days for the whole of the column to pass Bijar, and all of them were supplied by us with sufficient rations to last them on their march on to Hamadan.

To describe the awful sufferings of these people on this march would be very difficult. It was truly a case of the survival of the fittest; they arrived at Bijar, where some medical facilities were available, with typhus and smallpox raging among them. We did all that we possibly could for them. Women as well as men had been obliged to fight their way along, and many arrived with gunshot wounds ten or twelve days old, without having received any medical attention.

I passed through this column by motor-car on my way down to Hamadan from Bijar. The road was strewn with dead and dying people and animals. Little children dead and partially devoured by wolves lay everywhere, while others dying would raise their heads and look pitiably at me on hearing the sound of a motor. I remember seeing a woman lying alongside the track, having just dropped out and died with exhaustion. A small child, still living, was in her arms, whilst another lay dead a few yards away. Anyone dropping out from exhaustion either died at once or was mutilated by the marauding Kurds in the most horrible manner. Some of the sights I saw were too terrible to describe. Picture a whole nation obliged to evacuate their towns, leaving all their worldly belongings behind them, through imminent fear of massacre, and compelled to travel on foot through hundreds of miles of wild country infested by savage Kurds! During this awful march, these people lost all sense of civilisation and chivalry. As an instance of this, here is an incident that I witnessed:—My driver had stopped my car beside a stream to pick up cold water for the radiator. A small motor convoy with British Tommies had also stopped at the same place for similar purposes. The refugees were passing by us, and seated on an exhausted and worn-out looking mule was a young woman, almost devoid of clothing. Close to her rode a young, strong-looking man clad in a fur overcoat.

One of the British Tommies remonstrated with him, and asked him why he did not give his coat to the woman. He replied, in English: "Well, sir, you never know, I might need it myself to-morrow."

On reaching the country below Bijar, where Kurds and Persian Kurds were not numerous, parties of Jehlu and Armenian horsemen two or three hundred strong took revenge by looting and killing the defenceless Persians. These parties rode off on their own filibustering expeditions, and for the last fifty miles of the road not a village within three or four miles of either side of the road escaped them, the villagers defending themselves as long as they were able, and then taking to their heels. Sounds of rifle-firing could be heard from these miniature battles in all directions; no living thing remained in these villages, and they were completely and thoroughly looted. On their arrival in the neighbourhood of Hamadan it was no easy task rounding up these filibustering bands and disarming them all.

At Hamadan the refugees were sorted out and placed in camps under proper military control, and subsequently marched down to near Baghdad where the survivors, numbering about 35,000 or 40,000, still remain in a large camp. Large numbers were also sent to the Armenian villages and settlements which lie between Sultanabad and Ispahan.

While this evacuation was taking place severe fighting with the Turks occurred near Sanjan, and with the Jungalis at Resht. The Turks were unable to dislodge us from Sanjan, and the Jungalis suffered severe punishment, and late in August made peace with us.

The result of the Armenian filibustering raids between Bijar and Hamadan was that the Persians appealed to us for compensation. The British Consul at Hamadan was besieged with Persians clamouring for compensation. Particulars of all the claims were noted, and I believe they have been, or are going to be, paid by us. It does not appear quite clear to me why we should be called upon to pay these claims. One would have thought this was a responsibility concerning the Persian Government.

Following shortly upon the events which I have just narrated came the collapse of Turkey and the armistice with that country. The Turks withdrew from Persia, and hostilities ceased. In Teheran a Cabinet with pro-Ally sympathies came into power. On the signing of the armistice with Germany many Persians still disbelieved the victorious progress of our armies in Europe. A firework display was arranged in Hamadan, and in most towns dinners, which the local dignitaries attended, took place.

CHESS.

Sir G. Thomas's Success at Bromley.

During the past week the interest of chess players has centred on the congress of the Kent Chess Association, which was held at the Central Hall, Bromley. The principal event was an open tournament, which attracted a strong entry, including Sir G. A. Thomas, Bart., M. Kostitch, the Serbian chess champion, and M. Marchand. The tournament was arranged in six sections of equal strength, the winners meeting in a final section, while the seconds and thirds, etc., in the original heats also met in final sections, each player thus having ten games in the week—a strenuous test, indeed, when it is borne in mind that a game between equal experts not infrequently lasts eight hours.

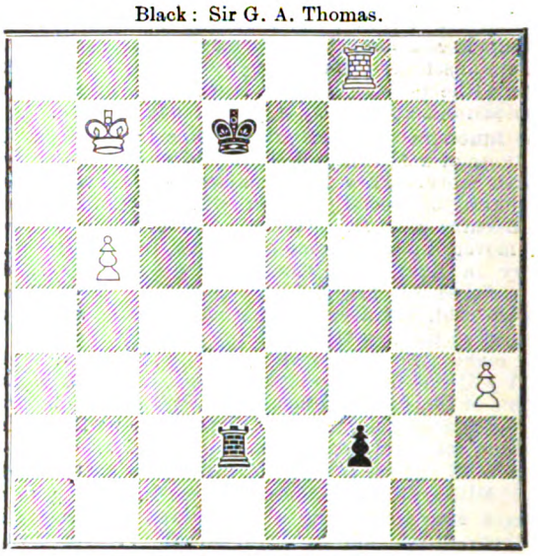
The heat winners were Sir G. A. Thomas, M. Kostitch, M. Marchand, Mr. R. H. V. Scott, Mr. F. Brown, and Mr. J. Macalister, and the result of the final section was to leave the three first-named players far ahead of their rivals, Sir George Thomas scoring a narrow and well-deserved victory with 4 points against the 3½ of M. Kostitch and M. Marchand. Thus the Hastings placings are reversed, and it is now evident that in Sir George Thomas British chess has a player who can be counted upon to hold his own against almost any competitor. Sir George Thomas, as my readers know, has been carrying all before him in London chess this season, and on Saturday a double success fell to him, for in addition to his triumph at Bromley he also regained the championship of the City of London Chess Club, as Mr. R. C. J. Walker lost to Mr. W. Winter that afternoon.

Some players had an extremely strenuous time of it at Bromley. One player, in the chief final section, had a game of about 130 moves, and another of 153 moves. The former took thirteen hours; what time was occupied with the latter I do not know—probably fifteen hours. The 153 moves must be somewhere near a record for a long game. On the other hand, the shortest mate possible was given at Bromley, a player winning in two moves.

Apart from the Bromley congress, there is little news of interest. At the City of London Club the preliminary heats for the Murton Cup Tournament are now well advanced, and it is possible in some cases, at least, to anticipate the probable finalists. I believe that the final, in which there will be eight players, will commence at the end of May or the beginning of June.

The meeting between Sir George Thomas and M. Kostitch at Bromley provided a most interesting game. M. Kostitch reached the end game with a pawn superiority, but Sir George Thomas had no difficulty in drawing. The finish was as follows:—

Black: Sir G. A. Thomas.

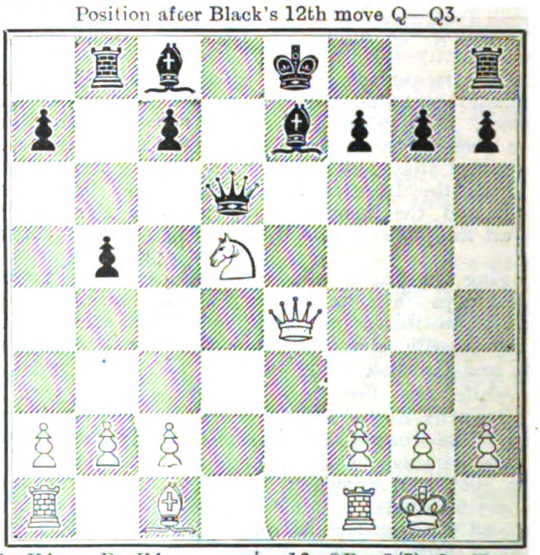


White: M. Kostitch.
Black to play.
Play continued:

1.		K—K2	4.	P—Kt6	R—KB3
2.	R—B5	R—Q2ch	5.	R x P	R x R
3.	K—R6	R—Q3ch	6.	P—Kt7, and the game was drawn.	

The following game, played at Bromley between Sir G. A. Thomas and M. Gaudin, is notable for the admirable way in which the former took advantage of indifferent opening strategy. Opening, Ruy Lopez: White, Sir G. A. Thomas; Black, M. Gaudin.

Position after Black's 12th move Q—Q3.



1.	P—K4	P—K4	16.	QR—Q(3)	Q—Kt5
2.	Kt—KB3	Kt—QB3	17.	B x P	Q x Q
3.	B—Kt5	Kt—B3	18.	R x Q	R—Kt2
4.	0—0	Kt x P	19.	B—Q6	R—Q2
5.	Q—K2	P—Q4 (1)	20.	Kt x B	R x Kt
6.	Kt x P	Q—B3	21.	R—K7	R(Q2)—Q
7.	Kt x Kt	P x Kt	22.	QR—K	P—KR3
8.	P—Q3	B—K2	23.	B—B7	R—Q7
9.	P x Kt	P x B	24.	R x P	R x QBP
10.	Kt—B3	P x P	25.	B—K5	R—B8
11.	Q x KP	R—QKt	26.	K—B	R x R (ch)
12.	Kt—Q5	Q—Q3	27.	K x R	R—K
13.	B—B4	Q—Q2	28.	P—B4	K—Kt
14.	KR—K(2)	0—0	29.	BxKtP(ch)	K—B
15.	Kt x B (ch)	K—R	30.	R x RP	Resigns

1. Weak. Kt—Q3 should have been played.
2. Winning a piece.
3. R—K3 is tempting. It compels Black to command KR6, as otherwise Q x RP ch and the R mates. Alternatively, it maintains the Kt at K7, and also provides a jumping-off ground for an attack via K Kt3. The line Sir George chose was, however, simple and effective.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The latest news regarding the agricultural outlook in Roumania is distinctly encouraging. It had been estimated that the area under wheat in old Roumania would amount to 534,395 hectares, but the estimate is now increased to 800,000 hectares. Thus the position as regards wheat sowings has considerably improved, and the prospects for the coming harvest are much brighter than could have been anticipated. Between the latest figures and the pre-war average for the years 1911-1915 of 1,922,333 hectares there is a wide gap, but the progress already made towards the normal may justifiably give rise to the hope that the rest of the leeway will rapidly be made up.

***

It is very satisfactory to learn that signs are now in evidence of some slight improvement as regards the Constantinople market. Reference is made in the report from Stamboul of the Imperial Ottoman Bank, which is given elsewhere in these columns, to a tendency for prices to harden in keeping with the trend in Manchester. Stocks at Constantinople are also being drawn on to some extent for Egypt.

***

The report of the Bank of Piræus for the year ended January 31 should make excellent reading for the shareholders. There is an all-round improvement in the balance-sheet, and the net profit amounts to 798,142 drachmæ. Eight per cent. of this amount is taken by the tax on net revenues—namely, 52,173 drachmæ—40.000 drachmæ are placed to the statutory reserve, and the balance is utilised to pay a dividend of 12 per cent., absorbing 600.000 drachmæ, which, after the allocation to the Council of Administration and the management, leaves 14,774 drachmæ to be carried forward.

***

Proposals are to be submitted at the forthcoming meeting of the Mercantile Bank of India for an increase of the authorised capital by the creation of 300,000 new shares of £5 each. The present capital of the bank is £1.500.000, of which half is paid up. Only a little over a year ago the bank made an issue of capital, 15.000 A shares being distributed among the shareholders, and in the interval there has been a further very marked expansion in the bank's business.

***

The increase in the total of the balance-sheet of the Mercantile Bank from £15.302.126 to £22,450.927 indicates the progress made during the past year. The gross profits for the period amounted to £489,425, as against £391,363, while the net profits were £215.636, as against £181,112. The allocations include £50,000 to the reserve fund, £15,000 to pension fund, £20.000 to writing off freehold premises, while the dividend is 14 per cent., with a bonus of 2 per cent., as against 14 per cent. and no bonus for the previous year. £85,794 was brought in, and the carry-forward is slightly larger at £96,430.

***

Sir Montagu Turner, presiding at the general meeting of the Chartered Bank, referred to the steady and consistent character of the progress of the bank, and said that he had no doubt that if the same cautious and circumspect lines were pursued in the years to come the business of the bank would extend and the reports would show equally gratifying results. Regarding the general outlook, he pointed out that there was, of course, the possibility of a set-back in trade after the demands for raw materials and manufactured goods had been met. Other factors he mentioned were the unsettled political situation all the world over, the discontent caused by high prices, and the menace to bankers and traders alike in the top-heavy prices of raw materials. "We may have troublous times ahead," he continued, "but, in spite of all, I look forward with confidence to the future, if all classes, especially in this country, unite to deal fairly and squarely with each other."

***

During the past year the exchange banks were confronted with special problems in regard to currency and exchange. "The unprecedented fluctuations in the price of silver and gold have been very remarkable," Sir Montagu pointed out, "and the volume of business which fell to the lot of this bank in connection with the financing of exports, raw material, foodstuffs, etc., required for national purposes, has been far above the average, and the demands on the resources of the bank have been at every point far in excess of the ordinary." He proceeded to give some examples of exchange fluctuations, and added that in addition they had had the uncertainty as to the ultimate standard value of the rupee measured in gold following on the report of the Babington Smith Currency Commission. He also touched on the serious cable delays, which had provided a further cause of trouble, and said that during the last few days there had been an improvement, and they were getting messages through more quickly.

***

The reports of the Samnuggur, Titaghur, and Victoria jute companies for the past twelve months show a marked decrease in turnover, due, of course, to the cessation of the demand for jute for war purposes. In other directions the demand was satisfactory, and a profitable level of prices was obtained. Despite the smaller turnover in each case much larger net profits were made. Thus, in the case of Samnuggur the gross profit fell from £1,021,100 to £665,700, but the net profit amounted to £345,700, as against £291,700. The Titaghur gross profits amounted to £676.200, as against £969.200, but the net profits rose from £297,300 to £365,200, while in the case of the Victoria Jute Company the gross profits were £407,700, as against £594,700, but the net profits were £225,600, as against £189,700.

***

The explanation of this is to be found in the fact that each of these companies had to pay a much smaller sum in excess profits duty for the past year. The Samnuggur Company, for instance, paid £167,400, a drop of £559.300; the Titaghur's quota was £491.200 lower at £171.800, while the remaining company paid £98.600, as against £403.400. The dividend of Samnuggur is maintained at 50 per cent., that of Titaghur is 50 per cent., as against 70 per cent., while that of Victoria is 50 per cent., as against 60 per cent. The capital of each of these companies has been increased by one-half, and the final dividend is paid on the full capital, so that, taking that into consideration, the dividend in the case of Samnuggur and Victoria is slightly larger than before. For the rest, it may be noted that the allocations to reserve show an increase of £70.000 as regards Samnuggur at £208.000, of £110.000 as regards Titaghur at £210.000, and of £73.000 as regards Victoria at £135.000.

***

The report of the Madras Electric Tramways (1904) for the past year shows rather better results than for the previous year despite the effect of the strike which took place early in 1919 and the increase in expenditure on account of higher wages and the increased cost of materials. The net profit, after placing £12.000 to depreciation and renewal account, as against £10,000 for 1918, is £14,700, an increase of £300. It is proposed to maintain the dividend on the ordinary shares at 8 per cent. free of tax, to place £3,000 to the general reserve, as before, to place £1,000 to a gratuity fund for employees, and to carry forward £4,900, an increase of £100 on the previous figures.

COMMENTATOR.

BANK OF ROUMANIA LIMITED

(FOUNDED 1866.)

Head Office: 27, THROGMORTON ST., LONDON, E.C. 2.

Branch: 11, CALEA VICTORIEI, BUCAREST.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

EGYPT.

CAIRO, March 22.

German Property in Egypt.

A Proclamation has been issued by Lord Allenby with regard to the liquidation of German property in Egypt and the settlement out of the proceeds thereof of claims by British and Egyptian nationals in regard to property in German territory or debts owing to them by German nationals. This Proclamation has been issued in consequence of the Order in Council made on January 22, 1920, which declared the provisions of the Versailles Treaty of Peace of June 28, 1919, to be applicable in respect of the property of German nationals under British control in Egypt, and charged such property with the payment of certain enemy liabilities.

ASIA MINOR.

SMYRNA, March 25.

The Exchanges and Trade.

The continual rise in the value of the £ sterling, which is now about Ps.450, coupled with the mobilisation of Hellenic subjects, has had a most disastrous effect upon business in the city. Many native merchants are delaying taking up bills of lading from the banks and withdrawing the goods from the Custom House, because they consider it better to pay demurrage at the Custom House until the rate of exchange is more favourable to Turkish paper money. This is, of course, a very risky proceeding, and will probably result in considerable cargo being abandoned altogether, and the loss will thus fall on the British shipper. In the meantime the Custom House is so congested that it is extremely difficult to find room for the daily arrivals of goods, and even the merchandise that is wanted quickly cannot be cleared because of the congested condition. Most of the goods for the Smyrna market are purchased in the United Kingdom and America, and it is because the £ sterling and the dollar are so high that importers are now losing heavily.

YUGOSLAVIA.

BELGRADE, March 28.

Depreciation of the Dinar.

Owing to the rapid and heavy drop of the dinar during the past month, merchants are faced with absolutely prohibitive prices on foreign goods, and many are having difficulty in meeting engagements made when the dinar was fairly stationary at about 90 to the £. A meeting of Belgrade merchants was held recently at which some pessimists went so far as to suggest closing their establishments till the position improved. A committee has been formed, and private initiative will support the Government. It is now announced that the Government has agreed to the following resolutions affecting the problem: one, that the import of all luxuries and unnecessary articles be prohibited; secondly, that dealing in foreign cheques be controlled; thirdly, that the Ministry of Finance intervene to stop gambling and artificial fluctuations in the exchange; and, fourthly, that very energetic steps be taken to effect a Government monopoly of foreign currency.

The Deficit.

The Radicals are complaining that the late Government left them a legacy of financial chaos, but express the hope of improving the undoubtedly very serious state of affairs. They have to face a heavy deficit and a rapidly depreciating currency. The difficulty is increased by the uncertainty still obtaining on the question of a war indemnity. The defeated Bulgars are better off in that their war debt to Germany has been remitted, while the Serbs are obliged to pay the interest on their heavy loans from England and France. As the revenue is inadequate, new taxation is foreshadowed, which, in view of the constant rise in the cost of living and the prohibitive prices of imported articles, will be a heavy burden on the people; stringent economy is also announced. The first task of the Serbian Treasury is to check the fall of the dinar, which has fallen almost to a tenth of its nominal value. What steps the Government will take other than encouraging exports is hard to say. They have a difficult task before them. Their strongest plank is the great productiveness and natural wealth of the country and the industry of the agricultural population. While the politicians are talking and quarrelling, the yeomen are busy farming, under great difficulties owing to the scarcity of plant.

Imports and Exports.

The Ministry of Commerce is preparing new regulations dealing with imports and exports. The restrictions on exports have caused a considerable amount of discontent, and while they have stopped or greatly reduced the influx of depreciated Austrian and Hungarian money and directed substantial sums into the Treasury in the form of export tax, they have equally prevented the exports to countries having good currency, which is, after all, the only real means of stopping the depreciation of the dinar.

The Ministry has taken the rather unusual step of appealing to public opinion through the commercial Press, and asks a series of questions, such as whether the time is ripe for the removal of all control, whether it is advisable to forbid or restrict the export or import of any specific articles, whether the export duty should be removed, should export for barter be approved, and a further series of questions of a purely administrative nature.

BELGRADE, March 31.

Dealings in Exchange.

The Government is creating a monopoly of transactions in foreign currencies, which may now be conducted only under licence; such permission has now been granted to the British Trade Corporation; Banque Franco-Serbe, and its branches at Skoplie, Zagreb and Bitolj (Monastir); Prva Hrvatska Shtedionitsa (First Croatian Savings Bank), Zemaljska Banka (Land Bank), Izvozna Banka (Export Bank), Nikola Boshkovich's Bank at Belgrade, the Serbian Commercial Company, the Belgrade branch of the Croatian Land Bank, and the Podunavska (Danubian) Trading Company.

BELGRADE, April 5.

End of Moratorium.

The moratorium will come to an end automatically on May 31, so a Bill is being introduced by the late Minister of Justice to deal with the situation. Interest runs from January 1 of the current year; capital debts will be paid off in annual instalments of 20 per cent; acceptors of bills will pay, but drawers whose acceptors are dead will be released from liability.

The harvest promises well, and the weatherwise foretell a good yield of corn, wine, and plums. It is needed badly enough, for the peasant farmers were hit hard by last year's bad season on the top of all their sufferings in the war.

EGYPT'S BUDGET FOR 1920-21.

RECORD ESTIMATES.

(From Our Own Correspondent.)

Cairo, March 26.

Yesterday the Council of Ministers approved the Budget for the new financial year. The estimates are expected to balance at £E40,271,000. This figure is £E12,971,000 more than the estimated revenue and £E11,421,000 more than the estimated expenditure of the previous financial year, the Budget for which was only balanced by the provision of a draft of £E1,550,000 on the general reserve.

The following table, giving the Budget figures and those actually realised during the last pre-war year and the five financial years preceding the one starting on April 1 next, may not be without interest:—

—	ESTIMATE.			RESULT.		
	Revenue. £.E.	Expenditure. £E.	Deficit. £E.	Revenue. £E.	Expenditure. £E.	Surplus. £E.
1913-1914	16,130,000	18,614,000	2,484,000	17,703,898	17,659,961	43,937
1916-1917	16,530,000	16,630,000	100,000	19,927,274	17,240,606	2,686,668
1917-1918	19,525,000	19,525,000	—	23,166,074	22,496,948*	669,126
1918-1919	22,900,000	23,250,000	350,000	27,661,289	23,384,326	4,276,963
1919-1920	27,300,000	28,850,000	1,550,000	20,108,586†	17,946,306	2,162,280
1920-1921	40,271,000	40,271,000	—	—	—	—

* Including a grant of £E2,967,956 to the British Government towards war expenditure.
† Eight months ending November.

These figures reveal the remarkable progress made during the past seven years. The revenue anticipated for the new financial year constitutes a record never before touched in the history of modern Egypt. It is, in fact, one and a-half times as much again as the pre-war Budget, and more than double the highest revenue ever recorded before the war. Compared with last year's revenue, it is double the amount collected up to the end of November, but since that period is the one of the least heavy collections there is every reason to expect that the final figure will be in the neighbourhood of £E32,000,000, with a possible surplus of £E3,000,000, as compared with the anticipated deficit of £E1,500,000.

The increase in revenue over the preceding year's estimate, which amounts to £E12,971,000, includes certain extraordinary, *i.e.*, non-recurring, items amounting altogether to £E6,596,000. There are £E2,000,000 resulting from the new tax on ginned cotton, £E1,826,000 representing the anticipated share of the Egyptian Government in the profits of the Cotton Control Commission, which were to be divided equally between the British and Egyptian Governments, and £E2,770,000 proceeds of sale of land, which are expected to realise £E2,356,000 more than the previous year.

As regards the balance of the increase which is recorded under permanent revenue, the main items are as follows: Customs dues, £E4,040,000, of which £E1,650,000 is expected to come from tobacco; judicial fees, £E203,000; railways, telegraphs, and telephones, £E802,000; post office, £E141,000; domains, £E480,000; ghaffir cess, £E326,000; interest on investments, £E1,232,000.

Reductions are budgetted under date palm tax, £E136,500, and Excise duty, £E407,000, both of which have been remitted, the former because of the difficulty in making an equitable assessment and of the criticisms to which the tax has given rise, and the latter in order to enable the sugar company to meet the requirements of the country by imports from abroad without increasing the retail price, which throughout the war has been much below the price on the outside market.

The increase in the Customs is based to a great extent on the statistics of the past year, and as to tobacco is due to the raising of the tariff last September, and that in judicial fees is due to the unprecedented number of land sales, from which the receipts of the Mixed Courts are expected to benefit by £E1,050,000, against £E810,300 for the current year. Of the increase under railways, telephones, and telegraphs, £E636,000 is from the railways, £E100,000 from the telegraphs, and the balance from the telephones, the tariff of which has been raised. The increase under post office is due partly to increased rates and partly to expansion, whilst that under ghaffir cess is due to increased collections.

As regards the proceeds from the investment of funds, which are expected to attain £E3,258,000 during the coming year, £E2,176,000 represents the Government's share in the profit on the bank note issue. The increase estimated under domains is due to the high price of cotton, the crop grown on the Government estates being expected to realise next year about £E600,000. As regards the sale of land, it should be pointed out that the proceeds are intended to meet the cost of new remunerative capital expenditure, for which no less than £E3,084,507 is provided in the Budget.

The expenditure includes £E8,704,582 non-recurrent expenditure, of which £E3,050,502 is extraordinary expenditure, and £E5,654,080 expenditure on new works. The extraordinary or non-recurrent expenditure consists of the following items:—Extraordinary war expenses, £E40,000, as against £E400,000 the previous year; distribution of articles of first necessity, £E2,000,000, which is the loss which it is expected the Government will incur, and which will be compensated by the proceeds of the cotton tax; and £E954,052, settlement of claims arising out of the 1919 troubles—this is really the balance carried forward of the £E1,000,000 provided in the previous Budget.

As regards new works, the items are as follows:—His Highness the Sultan's Household, £E180,287; State domains, £E102,390, for improvement of land; mines, £E165,650, for the development of the oilfields and the erection of a refinery; irrigation, £E1,580,467, for the improvement of the Delta drainage system; ports and lights, £E729,770, for work in Suez and Alexandria harbours; main roads, £E80,570; State buildings, £E351,582; Cairo municipal service, £E267,018; main drainage, £E175,060; river navigation, £E14,500, for purchase of vessels; and £E45,000 for improvement and creation of cereal markets. As pointed out above, the cost of these new works is being met to a great extent by the proceeds of the sale of land referred to above.

Under new works also appears an item of £E1,239,000 for railways, the ordinary budgetary expenditure for which amounts to £E6,594,175, in which is included £E1,315,000 for purchase of material and rolling stock, on which it is estimated that at least £E7,000,000 will have to be expended to make up the arrears of the war years; whilst under ordinary expenditure comes an item of £E4,250,000 for bonus to Government staff on account of high cost of living, representing an increase of £E2,745,000 over the amount accorded in the previous Budget.

Under ordinary expenditure practically every head shows an increase, the main items being His Highness' Civil List, £E85,799; Ministry of Finance, £E107,933; Public Instruction, £E315,013; Ministry of the Interior, £E123,909; Irrigation Service, £E107,551; Native courts, £E161,999; Cairo municipal service, £E131,502; railways, £E1,219,506; ports and lights, £E101,024; post office, £E118,723; police, £E246,596; ghaffirs, £E321,060; War Office, £E188,626.

The all-round increase in ordinary expenditure is due to the 20 per cent. increase in all salaries granted last August and the rise in the price of material, fuel, and labour. It is, however, interesting to note that, in spite of the expansion on both sides, the ordinary expenditure provided for the coming financial year is over £E2,000,000 less than the anticipated ordinary revenue, which on its side is, of course, based on the presumption that existing conditions will continue throughout the coming year.

EGYPT'S ECONOMIC POSITION.

THE FINANCIAL ADVISER'S NOTE.

The note on the 1920-1921 Budget published by the Financial Adviser, Sir Paul Harvey, deals mainly with the present economic situation of Egypt, which of late especially has given rise to some anxiety. As every one knows by this time, Egypt, by contrast with every country in Europe, has derived substantial benefits from the war, and some striking statistics are now given to illustrate the additional wealth that has accrued to the country since 1914. Thus, during the period 1915-1919 no less a sum than £E152,000,000 was invested abroad by the country—at least £E135,000,000 of this has been accurately ascertained—public deposits increased from £E3,348,189 to £E15,011,315 and private deposits from £E6,498,828 to £E35,479,673, while loans on mortgage had been reduced from £E30,328,914 to £E27,964,196.

Sir Paul points out that this great prosperity has not been evenly distributed, and that, although the increased wealth resulting from the rise in the price of cotton and the presence of the British Army in Egypt has dispersed itself over the industrial and mercantile population, the high prices have acted with extreme severity upon the poorer classes of the population. The rise in the index number of wholesale prices of certain staple commodities has been very great, and an estimate of the monthly expenditure of a small family of the poorest class in Cairo shows that the cost of food required by it has risen by 200 per cent. since 1914. Although wages have risen in certain respects, the general increase in the cost of living has tended to a reduction of the standard of living, and "there is reason to fear that the substitution of a larger proportion of durra for wheat in the food of the poorer part of the population, owing to the deficiency of protein in the former, may have a serious

effect on the health of that part of the community." He adds: "This situation is one which cannot be viewed without considerable anxiety. The disturbing factors are such as are in the main beyond any remedy which the Government can bring, but no effort will be spared to devise means of reducing the suffering entailed by them and to hasten the adjustment of local conditions thereto."

Exports during the past two years have greatly exceeded imports, with, for result, an accumulation of purchasing power in the hands of Egyptians represented in part by bank notes, which in their turn represent a corresponding amount of pounds sterling placed in British Treasury Bills maturing at short dates, and thus readily realisable. There has been a certain amount of criticism of this policy of providing cover for the bank note issue, which, from a circulation of about £E2,000,000 at the outbreak of the war, has steadily risen until it now stands at about £E60,000,000. The critics have held that it has involved loss to Egypt because it has depreciated the value of Egyptian currency; it has enabled Great Britain to buy cotton from Egypt at a reduced price, and it has caused an increase in the cost of living, and it is even suggested that if gold is not obtainable as a backing Egyptian Government security should have been purchased.

The Currency.

Sir Paul remarks "that it is probable that in the difficult circumstances attending the Great War no measure for the regulation of the currency of a country situated as is Egypt would have proved entirely satisfactory to all interests," and he proceeds to outline the facts governing the situation in August, 1914. In the first place, gold could not possibly be obtained so as to maintain the former statutory gold reserve of 50 per cent.; secondly, in order to maintain a healthy basis for the currency, cover in the form of securities redeemable at short dates had to be provided; and thirdly, it was extremely important for the trade of the country to secure a stable exchange with its principal customer, namely, Great Britain, who purchased more than half the cotton crop and supplied the largest part of the imports. As Sir Paul points out, any person familiar with mercantile and banking processes will appreciate the value of the system which permits trade to proceed on an assured basis of exchange, and, in his opinion, "in these circumstances the course clearly indicated as most advantageous to Egypt's interests was to purchase short-dated British Treasury Bills as cover for the note currency, and to issue the notes at a rate fixed in respect of sterling, thus supplying a stable basis of exchange for the bulk of Egypt's trade."

He believes that with the gradual restoration of the exchange value of the pound sterling the temporary phenomenon of the depreciation in the Egyptian pound will disappear, and considers that far from the price of Egyptian cotton having been reduced, the nominal price has probably been increased. That price is in the main determined by the competition of the market, and may be translated either into a smaller number of Egyptian pounds of a higher exchange value or into a larger number of Egyptian pounds of a lower exchange value. The purchasing power represented by the crop at the price so determined remains, however, the same by whichever form of currency it is represented. The course adopted has not, he thinks, been a very material factor in determining the local rise in prices, which it seems obvious is in the main due to the enormously increased purchasing power of the people applied to a limited and inadequate supply of foodstuffs, and it is fairly certain that the fall in prices would not be very great if the Egyptian pound were restored to its former exchange value. The suggestion that Egyptian Government securities should have been used as a backing for the notes he considers hardly worth serious discussion.

Investments in British Securities.

While, however, there is no ground for thinking that the Egyptian Government could have taken any other course with regard to the currency to the greater advantage of the State, there is an aspect of the position which calls for comment. The note issue being represented in the main by British Treasury Bills and the stability of the exchange with England which has led bankers to invest deposit there have produced a great concentration of Egyptian wealth in British investments, and the question has been raised whether this situation is a satisfactory one. Sir Paul points out that the greater part of the note issue is not in circulation but is hoarded. So long as this is the case the notes must continue to be represented by British Treasury Bills. Likewise, the banks being liable to repay these deposits on demand can only invest their funds where a stable exchange guarantees them from loss. As he says, the remedy, if remedy is needed, lies in the hands of the Egyptians themselves, for nothing prevents the holders of notes or investors from investing their money in any other manner they may think fit.

As regards the high cost of living, the attempt to regulate prices by fixing a maximum tariff was found to do rather more harm than good, since it tended to restrict the supply of tariffed commodities on the open market, and encouraged their surreptitious sale at prices in excess of the tariff. The formation of local committees to administer the tariff likewise disappointed expectations, and in the difficult circumstances, where public spirit and the sentiment of co-operation are a little developed as they are in Egypt, the Government has been reduced for the present to do what it can to secure the supply of certain articles at a reasonably cheap price. Wheat and flour, which are the staple food, have attracted its chief attention, and supplies of wheat and maize sufficient to keep the country going until the next cereal harvest have been secured through the intervention of the British Government, without which freight would have not been obtained. This wheat is being sold at a price which will constitute a substantial benefit to the consumer, but which will entail a heavy cost to the Government.

The Financial Adviser considers that this policy has been justified in so far as it has undoubtedly contributed to the recent marked fall in the previous excessive prices of locally produced cereals. In this connection he administers a warning to the speculative element, and says that although its present policy is limited to these measures the Government, while reluctant to use any arbitrary powers, will not hesitate, if circumstances warrant it, to take suitable measures for the protection of the community.

The Cotton Tax.

The loss on these wheat and flour sales, which will amount to about £E2,000,000, will be met by the proposed cotton tax, which places the burden where it can best be borne—*i.e.*, on the producer of cotton, whose prosperity has reacted so unfavourably on the element for whose direct benefit the Government scheme is intended, and which, he points out, represents about 2 per cent. on the price of a commodity which has increased in price by some 500 per cent. since 1913, and cannot in fairness be called a heavy tax. Sir Paul hopes that it may be possible to meet by imports the country's cereal requirements, but foreshadows the possibility of a regulation by means of legislation of the area to be sown under wheat.

As regards the figures of the new Budget, the Financial Adviser explains that the very largely increased expenditure is due to the greatly increased scale of remuneration which has had to be paid to all classes of Government officials and employees and to the enhanced cost of all material. New works which amount to £E5,654,080, as against £E3,042,019 in the preceding year, include provision for an attempt to make up some of the leeway of the years of the war; but the increased cost both in labour and materials has contributed to this increase. The credit for irrigation is devoted in the main to improvements in the Delta with a view to reclamation of large areas as soon as additional water is available; but he points out that, pending the report of the Nile Projects Commission, no provision is being made for the execution of the Upper Nile regulation schemes, and in this connection he adds: "The growth of population—a population almost exclusively agricultural—is pressing hard upon the supply of cultivable land, so that there is an urgent need for more irrigation water, and it is to be regretted that popular prejudice against measures of such vital importance to the prosperity of Egypt should have been aroused by misrepresentation of their true character."

The Outlook.

Reviewing the general budgetary position Sir Paul says that, broadly speaking, at any rate for the moment, it gives no serious ground for uneasiness. He points out that the situation will never be altogether free from difficulty so long as the present restrictions on Egypt's fiscal arrangements continue, for the impossibility of imposing taxation in proportion to wealth, and equally on foreign and local subjects, tends to render the present system both inelastic and inequitable. As he says, the land tax, which was designed to represent approximately 25 per cent. of the rental value of the land, no longer bears a proportion approaching that figure, and is quite inadaptable to present agricultural conditions, while the uniformity of the import duties, whether applied to luxuries or to necessaries of life, is equally open to objection. "The practically complete exemption of foreign subjects and foreign companies from taxation on the wealth which they may derive from this country is a serious blot on the existing system." The estimates assume the maintenance of public tranquillity and the difficulty of obtaining sufficient supplies of coal, which may react unfavourably on the railway, is perhaps the chief disturbing factor; but, subject to these qualifications, he regards the immediate budgetary position as reasonably satisfactory.

ENGINEERING.

TEMPORARY SCARCITY OF BRITISH MOTOR-CARS.

So great is the demand for British motor-cars the world over, and so conscious are British manufacturers of their inability temporarily to satisfy their clamorous buyers either at home or overseas, that the Society of Motor Manufacturers and Traders, Ltd., issued an invitation to luncheon at the Savoy Hotel on April 8 to obtain the opportunity of explaining to the Press and public the difficulties confronting the industry. Mr. Frank Lanchester, president of the Society, was the official host, and there were present many of the leaders of the British motor-car world.

Summarising the speeches at the luncheon, it may be said that the indignation of the home buyer, owing to delay in delivery, was the keynote of the gathering, but there was nowhere any fear of foreign competition—after the year 1920. The points insisted upon by Mr. Lanchester and other speakers were:—

1. The technical finish, reliability and durability of the British car.
2. The keen and open competition between British manufacturers, which tends to keep down the price.
3. The world-shortage of steel, coupled with the necessity of changing, in 1919, from war demands to peace; the not unnatural labour troubles, and the simultaneous earnest efforts of manufacturers to lay down mass-production plant.
4. Similar troubles in the United States, France and Italy.

Lieut.-Colonel Jarrott insisted upon the dangerous competition of the United States, but the consensus of opinion of the meeting was that such competition was purely temporary, and that—in the words of the last speaker—"England would give the best."

IMPORTANT DISCOVERY IN LUBRICATION.

Lubrication, as is known, is the medium used to reduce friction between two surfaces working relatively to each other. Up to two or three decades ago lubricants for all classes of machinery have always taken the form of grease or vegetable oils, which work in as a film between the surface. In recent years, however, lubricating oils derived from petroleum have largely displaced those obtained from animal and vegetable fats or oils on account of their greater cheapness. But as friction is less with organic than with mineral oils, most commercial lubricating oils contain a proportion of organic oils, though the latter include acid elements which have been viewed with distrust by engineers. A series of experiments which has recently been made by well-known experts, however, revealed the fact that these acids are responsible for the superior quality of the organic oils, and that by adding 2 per cent. of a free fatty acid to mineral oil practically as good results are obtained as by using pure organic oil. The importance of the discovery is considered twofold. In the first place, it cheapens lubricating oils; in the second, it releases for human consumption vast quantities of edible animal and vegetable oils. The discovery is undoubtedly very important, and, we imagine, will affect considerably the Levant olive-oil trade, for it will also cheapen the edible olive oil, since larger available supplies of it for human consumption will be in the market, and also certain lower grades of olive oil, which often commanded steady high prices owing to the competitive purchases by soap manufacturers and lubricating-oil manufacturers who are using these class of olive oils.

The annual production of the chrome-ore deposits of the Smyrna vilayet, which formerly reached 7,000 to 10,000 tons, but has fallen off, might be increased, it is estimated, to 50,000 tons or over.

GREEK MONETARY REGULATIONS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I beg to communicate to you the following statement, issued lately by the Ministry of Finances, Athens, for the information of all who may be interested:—

Any person who imports money into Greece, not as fulfilment of payment due by any kind of obligation, is allowed to re-export the equivalent amount of the money imported.

Also, any person who, since January 27, 1920, has deposited, or will deposit, in a bank, foreign bank notes, or generally foreign exchange, is entitled to be refunded his deposit in the same exchange as it has been deposited.

I am, etc.,

D. CACLAMANOS.

Greek Legation, 25, Knightsbridge, S.W.
April 6.

YUGOSLAV CURRENCY.

Exchange of the Krone.

It appears that difficulty has been caused in Yugoslavia by the continuance of reports to the effect that it is intended to modify the rate of exchange of one dinar for 4 kronen, established by the late Government. As the printing of the new notes has been delayed, and the exchange of all the Austro-Hungarian notes cannot be effected within the period estimated by the late Government, M. Yankovitch, the Minister of Finance in the new Ministry, has issued an order stipulating that:—

1. The relation between dinar and krone which is as 1 to 4, and which the present Government has inherited from its predecessor, cannot be modified for the reason that large amounts in Austro-Hungarian notes have already been exchanged on this basis.
2. The exchange of the 1,000 krone notes will be effected without delay within the period allotted by Article 7 of the Ordinance relating to the exchange of the notes of the Austro-Hungarian bank, and by Article 13 of the regulations relative to this exchange—that is to say, up to March 5 in Serbia, and up to March 15 in the other provinces of the kingdom.
3. The period for exchanging the 100 krone notes is extended to April 15.
4. The dinar notes of the National Serbian Bank will be withdrawn from circulation by virtue of Article 21 concerning the National Bank of the Kingdom of the Serbs, Croats, and Slovenes.
5. The period for the exchange of the 50 krone notes will be determined later.

The periods provided for the withdrawal from circulation of the notes of various denominations will not be extended in any case. On the expiration of these periods, the remainder of the Austro-Hungarian notes will lose all value as means of legal payment in the kingdom.

BULGARIAN GRAIN EXPORTS.

Any persons wishing to purchase grain should appoint a competent agent to arrange first of all with the Government the rate of exchange to be fixed for the conversion of sterling into leva, states H.M. Commercial Secretary at Sofia. The difference between the official and the open market rates being at present 150-180 leva and 220 leva approximately, it is evident that the profits would be greatly affected by the rate granted. Reliable agents would also have to be employed to take delivery of the grain which, being of a very mixed description, would have to be very carefully inspected and sorted at the ports of exit. If persons formerly employed as agents by foreign grain merchants could be employed, these would probably be the best.

A Department of Transport has been created for the French zone of Morocco to deal with all matters connected with military and civil transport by rail or sea.

SWEDISH ORIENT LINE.

Direct regular steamship service with about weekly sailings outwards and homewards between

GOTHENBURG and ALGIERS, PIRÆUS, SMYRNA and SALONICA.

DIRECTORS' REPORT.

(Presented at the Sixty-sixth Ordinary General Meeting, 9th April, 1920.)

The Directors have now to submit to the Shareholders the Balance-Sheet and Profit and Loss Account of the Bank for the year ended 31st December last.

These show a net profit, after providing for all bad and doubtful debts, of £615,830 6s. 10d., inclusive of £168,482 11s. 1d. brought forward from the previous year. The Interim Dividend at the rate of Fourteen per cent. per annum paid in September last absorbed £84,000. The amount now available is therefore £531,830 6s. 10d., and the Directors propose to pay a Final Dividend at the rate of Fourteen per cent. per annum, together with a Bonus of Twenty-five shillings per share, making Twenty and a-quarter per cent. per annum for the whole year, free of Income Tax; to add £100,000 to the Reserve Fund which will then stand at £3,000,000; to add £25,000 to the Officers' Superannuation Fund; to write off Premises Account £75,000, and to carry forward the balance of £172,830 6s. 10d. Interest on Instalments of New Capital (£800,000) and Premium (£800,000) from dates of payment to 31st December, 1919, at the rate of 5 per cent. per annum free of Income Tax has been paid. The New Shares will rank equally for dividend with the Old Shares as from the 1st January, 1920. It is proposed that Mr. J. M. G. Prophit, already a provisional Member of the Board, be formally elected a Director.

Sir Alfred Dent, K.C.M.G., and Mr. Thomas Cuthbertson, the Directors who now retire by rotation, present themselves for re-election.

The Auditors, Mr. David Charles Wilson, F.C.A., and Mr. Henry Crought Knight Stileman, F.C.A., again tender their services.

The Dividend and Bonus will be payable on and after Friday, the 16th April.

By Order of the Court, A. S. HEWETT, Secretary.

COMPANY MEETINGS.

CHARTERED BANK OF INDIA, AUSTRALIA AND CHINA.

Steady and Consistent Progress.

The sixty-sixth ordinary general meeting of the shareholders of the Chartered Bank of India, Australia, and China was held on April 9 on the bank's premises, 38, Bishopsgate, Sir Montagu Cornish Turner (the chairman) presiding.

Mr. T. H. Whitehead (one of the managers) having read the notice convening the meeting and the report of the auditors,

The Chairman said: I have to apologise for the absence of my co-director, Mr. W. H. N. Goschen, to-day. He is taking a well-deserved holiday, after some very arduous work during the past few months. I am sure we all congratulate Mr., or, as he is now, Sir William Henry Neville Goschen on the honour bestowed upon him by His Majesty the King in recognition of the extraordinarily good work he has done during the war, and also lately as chairman of the Bankers' Clearing House Committee. It is an honour which he has well earned.

Before moving the adoption of the report, I would draw your attention to the statement of accounts for the year 1919, which shows that there is now a paid-up capital of £2,000,000 in 100,000 shares of £20 each, and a reserve fund of £2,900,000, which, if the recommendations of the court of directors are approved of to-day, will amount to £3,000,000. This may be considered a highly satisfactory position, but, of course, it is always capable of betterment. You will also notice that in nearly every item of the balance-sheet there is a marked increase. The total entries on either side of the balance-sheet show an increase of £20,000,000 over the figures for 1918. Looking back over the period of the last sixty years, it is interesting to find that in 1860 the capital of this bank stood at £644,000, and the reserve fund at £5,000. In 1920 the capital stands at £2,000,000 and the reserve at practically £3,000,000. The progress has been steady and consistent, and if we carry on as hitherto on the same cautious and circumspect lines, always alive to the possibilities of fresh business and always desirous of meeting our customers' requirements and of treating old friends with all possible consideration, I have no doubt that in the years to come the business of this bank will extend and the reports will show equally gratifying results.

There is, of course, the possibility of a setback in trade after the urgent and immediate world-wide demands for raw material and manufactured goods have been met. The political situation all the world over, and especially in Central Europe, is unsettled. High prices of foodstuffs have caused general discontent, and the demands of the wage-earners are apparently still unsatisfied, so that the immediate horizon is somewhat gloomy, and the top-heavy prices of raw material, such as cotton and manufactured goods, are a menace to bankers and to traders alike. We may have troublous times ahead, but, in spite of all, I look forward with confidence to the future if all classes, especially in this country, unite to deal fairly and squarely with each other.

Touching the results shown for the past year, I am confident that shareholders will fully appreciate the excellent services rendered by the staff, both at home and abroad, whose loyal and devoted labours have contributed so appreciably to the success we have won. For the managers, especially those at head office, it has been a period of unusual anxiety and harassment. The unprecedented fluctuations in the price of silver and gold have been very remarkable, and the volume of business which fell to the lot of this bank in connection with the financing of exports, raw material, foodstuffs, etc., required for national purposes, has been far above the average, and the demands on the resources of the bank have been at every point far in excess of the ordinary.

Of course, in other parts of the world, not only in the East, the fluctuations in exchange have been extraordinary. The Hongkong dollar, the Chinese tael, and the Indian rupee have all been jumping about, so that you never know where to catch them. Look at the American exchange, which even to-day shows that the dollar is worth over 5s. compared with its ordinary value of about 4s. Look at France, where the franc is worth a little over 4d., Germany with a mark worth 1d.—not quite that—and Italy with the lira at 2½d. Of course, Austria is simply unquotable; her current coin is worth less than 1d. I mention these facts to show you the difficulties that exchange bankers have to contend with and the absurdity of people thinking that exchange banking means simply coining money: it is very often the reverse. In addition to this we have other difficulties There was the uncertainty as to the ultimate standard value of the rupee measured in gold following on the report of the Babington Smith Currency Commission. Further cause of trouble has been the very serious delay in the transmission and receipt of cable messages. I am glad to say that within the last few days there has been an improvement, and we are getting messages through more quickly.

The proposal for amalgamating the Presidency Banks in India under the title of the Imperial Bank of India is one that has attracted a considerable amount of attention. While regretting the partial disappearance of the individuality of the Presidency Banks, it seems to me that the movement for amalgamation is fully justified and is unlikely to be prejudicial to the interests of exchange banks in India, always provided that the present intention of not competing with the exchange banks in their ordinary business of exchange banking is fully and honestly adhered to.

Mr. J. M. G. Prophit has been elected by the Court of Directors as a member of the board. Mr. Prophit, for many years past, has not only been connected with one of the most important firms in Calcutta, but at one time he was president of the Bank of Bengal, and he has always taken a very keen interest in the development of banking facilities in India. I can confidently recommend his election for your approval.

I need not dwell at length on the recommendations of the directors contained in the report. There can be no doubt whatever that as long as circumstances permit we should add to our reserves. The superannuation fund must also be maintained, and the extra amount earmarked for premises account is fully justified when we bear in mind the necessity for providing increased accommodation and the opening out of new branches, which entails in many cases the purchase of sites, as well as the building of premises.

In conclusion, I desire to express the thanks of the directors to the staff, both home and foreign, for the splendid manner in which they have worked during the past year. Our appreciation has been marked by the granting of bonuses and of an improved scale of pay to meet the greatly increased cost of living. We know what the strain must have been. We know that the extra time and increased work have been cheerfully given, and especially we thank the managers at head office for the unwearied attention they have given to the general management of the bank. With those remarks I beg to move:—"That the report now presented, together with the balance-sheet and profit and loss account, be approved and adopted."

Sir Alfred Dent, K.C.M.G., seconded the resolution.

Mr. Frederick Tomkinson said he would like it to go forth that the dividend of 20¼ per cent. now being paid was earned not only on the capital of £2,000,000, but that it was earned also on the reserve. He calculated that the capital had earned something like 8 per cent., while the reserve had earned 12 per cent., and he thought it as well that publicity should be given to that fact, because not only here but in the Colonies they were reproached with paying enormous dividends. He had no doubt that it would be within the knowledge of most of the directors that a bank, equal in magnitude and success to their own, had lately thought it advisable to capitalise £500,000 of their reserves, and for his part he thought it was a very wise policy to adopt. The chairman did not, perhaps, agree with that policy, and no doubt it was necessary for a bank to have large reserves, but in view of the trend of opinion he thought that the suggestion could well be taken into the consideration of the board.

The Chairman, in reply, said he purposely had not referred to the fact that the dividend had not been earned entirely on the capital, but was also earned on the reserve, because he had clearly indicated that at the meeting of the bank held last year, and he thought it might be a little stale to refer to the same subject at the meeting this year. He admitted in these days that it was quite a fashion to capitalise reserves, and while the directors believed that such a course had its merits they also recognised that it had considerable demerits. Before such a policy was adopted in the case of their own bank it would require very careful consideration at the hands of the board. He could assure Mr. Tomkinson that such consideration would be given, but he would tell the shareholders that full consideration had been given to the matter in the past, and the proposal had been rejected.

The resolution was carried unanimously.

The Chairman then moved, "That a dividend at the rate of 14 per cent. per annum for the half-year ended December 31 last, together with a bonus of 25s. per share, both free of income-tax be now declared payable on and after the 16th inst."

Mr. Thomas Cuthbertson seconded the motion, which was unanimously approved.

The Chairman moved that Mr. J. M. G. Prophit be elected a director of the company.

The motion was seconded by Mr. W. F. Mitchell and approved.

The retiring directors and auditors were re-elected, and a vote of thanks to the directors and the staff for their successful management of the bank concluded the proceedings.

REPORT OF THE AUDITORS TO THE SHAREHOLDERS.

We have audited the above Balance Sheet with the Books in London and the certified Returns from the Branches. We have obtained all the information and explanations we have required. In our opinion such Balance Sheet is full and fair, containing the particulars required by the Regulations of the Company, and is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given to us and as shown by the books of the Company.

London, March 30, 1920.

NATIONAL BANK OF INDIA.

Expansion of Business.

The ordinary general meeting of the shareholders of the National Bank of India, Ltd., was held on April 12 at the Wesleyan Hall, Bishopsgate, E.C. Mr. Robert Campbell (the chairman) presided.

The General Manager (Mr. H. Chalmers) read the notice convening the meeting and the auditors' report.

The Chairman: Ladies and gentlemen, I presume that, as usual, the report may be taken as read. You will see that since our meeting a year ago we have carried through a very important operation—namely, the addition of £500,000 to our paid-up capital and a similar amount to our reserve fund. In then asking your sanction to this enlargement of our resources we alluded to the necessity of anticipating and preparing for the great increase in the volume of business which was confidently expected as soon as peace was finally assured. I think you will agree that the correctness of that forecast is abundantly established by the figures of the balance-sheet now in your hands. Every item shows a substantial increase over the corresponding figures of 1918, the rise in deposits of £7,600,000 being particularly gratifying.

The expansion of business, which I am glad to say appears to be general, is very gratifying from another point of view, inasmuch as it goes to show that we are recovering from the effects of the violent financial upheavals and disturbances occasioned by four years of the greatest war in the world's history. There has no doubt been a great expansion of business generally, and particularly a great increase in exports to the East, and if that is the case generally I trust it may mean that trade balances are turning in our favour, or, at least, that the adverse balance is being steadily reduced—a point as to the vital importance of which I need not enlarge.

The past year has been characterised by unprecedentedly violent fluctuations in Indian exchange, rates rising from the old rate of 1s. 4d. to 2s. 10d. in February last, with a reaction to about 2s. 4d. at the present time. This is not surprising when we consider the erratic course of the exchanges all the world over. These violent movements made business very difficult, and necessitated very careful handling, and I think it shows the inherent soundness of Indian trade that, in spite of these violent disturbances, there have been no failures of any consequence in Indian business circles. A very important event in this connection is the Report of the Committee on Indian Exchange and Currency, an exceedingly able and comprehensive document. Its conclusions are in favour of linking the rupee with gold in order to facilitate the stabilising of Indian exchange at about 2s. per rupee. Had the stereotyped price of gold remained as it did for years and years round about 77s. 10d. per ounce, this might have been a comparatively easy task, but lately gold, like everything else, has taken a very erratic course, advancing as high as 127s. 4d. an ounce, and again reacting to about 103s., so that the question of stability, for the moment at least, disappears.

Coming to our profit and loss account, the figures are very significant. Compared with the previous year our gross profits show an increase of £201,000, while our general charges are higher by £153,000, the net profit being up £48,000. Our experience in regard to the increase in our charges it not singular, every other kindred institution having the same tale to tell, and with the increased cost of living and prices all round on a higher level higher charges are inevitable. Fortunately, our gross profits have risen in even greater proportion, the net profit of £452,169 showing, as I have said, a substantial increase, after writing down our securities to their present market value. To summarise the result of the year's operations, we are paying a dividend of 20 per cent., free of income-tax, on the increased capital, we are putting £150,000 to the reserve fund, bringing it up to £2,000,000, writing £20,000 off property account, adding £20,000 to the officers' pension fund, and carrying forward a balance of £135,633, as against £123,464 brought in, a result which I am sure you will consider as quite satisfactory.

I have now to allude to a very painful incident which occurred at our Amritsar branch a year ago. You have all heard of the violent disturbances and riots in that city in April of last year, of how a seditious mob got the upper hand for a time, and, among other atrocities, broke into the bank, brutally murdered Mr. Stewart, the manager, and Mr. Scott, his assistant, and looted and burned the office and godowns. It was a terrible fate to overtake these poor young men while endeavouring to protect the bank's property, and our sincerest sympathy is due to their relatives and friends. We have made a claim for loss and compensation, including a claim on behalf of Mr. Stewart's widow. After some negotiation our claim has been admitted by the Government of India, and we are now awaiting payment of the amount.

I shall now move the adoption of the report, which I shall ask Mr. Williamson to second, and before it is put to the meeting there will be an opportunity for any questions or remarks. The resolution which I move is:—"That the report of the directors and statement of accounts for the year ended December 31, 1919, be received and adopted, and that a dividend for the six months to December 31, 1919, at the rate of 20 per cent. per annum, be paid on the shares of the company registered at this date, the same to be payable, free of income-tax, on and after April 13, 1920."

The Deputy-Chairman (Mr. Robert Williamson) seconded the resolution, which was unanimously carried without discussion.

In moving the re-election to the board of Mr. Robert Campbell, the Deputy-Chairman said he was sure no words were wanted from him to recommend the motion to the favourable notice of the shareholders.

Mr. Robert Miller having seconded the proposition, it was unanimously agreed to.

The Chairman thanked the meeting for his re-election, and then proposed the re-election as a director of Sir Charles C. McLeod, and this was seconded by Mr. Alfred Simson and approved.

On the motion of the Chairman, seconded by Sir Charles C. McLeod, the other retiring director, Mr. J. A. Toomey, was also re-elected.

The auditors, Messrs. Cooper Brothers and Co., and Messrs. W. A. Browne and Co., were reappointed.

Mr. Osman Halliday proposed:—"That a vote of thanks be given to the chairman and directors for the care and prudence exercised in conducting the affairs of the bank during the past year."

Sir J. A. Boyson having seconded the vote, it was unanimously accorded.

Mr. H. H. Nelson said that he had once again the pleasure of proposing a resolution which for a great number of years had been entrusted to him. He did not think that they had ever had more reason to be grateful to the staff of the bank than on that occasion. The chairman had given them a brief *résumé* of some of the difficulties which had arisen in conducting the business during the past year, and he was sure that those difficulties had never before been on such a scale as during the period under review. The various fluctuations in exchange, and the terrible difficulties in regard to communication—especially the telegraphic delays—had undoubtedly thrown a burden of anxiety on those who had had to administer the bank's affairs. He felt sure that in bringing these matters to the notice of the meeting he was voicing the shareholders' feeling of gratitude to the staff on whose efforts so much depended, and to whom they were so much indebted for the great prosperity of the bank in the past, at the present time, and, as he was confident would be the case, in the future. He then moved:—"That the thanks of the meeting be given to the general manager and the staff for their valuable services during the past year."

Mr. P. W. Robertson said that he had much pleasure in seconding the vote of thanks to the general manager and staff, so ably proposed by Mr. Nelson, and he was sure every shareholder present would pass it most heartily.

The Chairman: I have the greatest pleasure, gentlemen, in putting this resolution to the meeting, because I feel that a hearty vote of thanks to our excellent staff was never better deserved than on the present occasion. I have already alluded to the difficulties we have had to contend with in the shape of violent exchange fluctuations. These difficulties, formidable enough in themselves, were greatly aggravated by the defective working of the telegraph service. In pre-war times we could send off a message to Calcutta at five o'clock in the afternoon and rely on having the reply on our desks at ten o'clock next morning, while up to quite recently the average time taken by a message was about seven days, which meant having to wait a fortnight before getting a reply—a severe tax on one's patience, in addition to other and more serious drawbacks. There has been some improvement lately, but the service still leaves much to be desired. Then our furlough arrangements were all upset by the war, and furlough leave had to be suspended for a time. The result was that many of our men cheerfully remained at their posts at the risk of impaired health with their leave long overdue. All these difficulties and trials have been met with the utmost loyalty and devotion to duty, and our warm thanks are due to the whole staff, both at home and abroad, for the admirable results achieved in the face of difficulties, and for unremitting devotion to duty. But mere thanks alone are not enough. By a revised scale of salaries and by liberal bonuses we have enabled our staff to meet with comfort the increased cost of living which now prevails.

The motion was unanimously carried.

The Chairman having announced that this concluded the business of the meeting, the proceedings terminated.

BENGAL—NAGPUR RAILWAY.

Holders of debentures, bonds to bearer, of the Bengal-Nagpur Railway Co., Ltd., amounting to £400,000, and falling due on April 21, are informed that the directors, with the sanction of the Secretary of State in Council of India, are prepared to renew such debentures at £98 2s. 6d. (1⅞ per cent. discount) for a further period of two years, with interest at the rate of 6 per cent. per annum, provided the holders intimate their acceptance of this offer and send their bonds to the office of the company, 132, Gresham House, E.C.2, for endorsement before noon on Monday, April 19.

The Department of Overseas Trade is informed that the National Bank of the Kingdom of the Serbs, Croats and Slovenes will shortly issue 40,000 new shares at 500 gold dinars per share. In view of this issue, they have made out their balance-sheet, and declare that their stock has increased by 4½ million gold dinars. As the new shareholders must contribute equally to the charges and duties, it will be necessary for them to pay an additional 240 to 250 gold dinars per share, in proportion to the value of the stock. In other words, the shares will stand at about 750 gold dinars. Although the payment may be made in instalments, large capitalists only can participate in the subscription in view of the present value of the gold Napoleon, which is 110 dinars.

SUPPLIES AND PRICES IN TURKEY.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, March 13.

Manufactures.

The high prices at Manchester have at length had an effect on the market here. Though the slack season is not yet finished and the situation in Anatolia is not at all favourable for the immediate resumption of transactions, one notices all the same a certain demand, and prices indicate a rapid improvement as regards such articles as white goods, prints, and woollen goods.

As was to be expected the arrivals from England have considerably decreased, merchants finding it more advantageous to realise goods there. Some purchases of manufactured goods have been made for Egypt.

Produce.

Sugar. Despite the arrival of 1,500 tons of sugar the market is firmer than the previous week as the result of the strong demand for Batoum, which has absorbed three-quarters of that consignment. There is to be noted also a certain demand for Roumania, but the depreciation of the lei hinders all business for that country. Prices have again risen £2 to £120 the ton in transit, while sugar in Customs is quoted £T60-£T61 per 100 kilos.

Coffee. The high prices in Europe and in producing countries have not yet affected the market, which remains quiet, the demand being limited both for local consumption and for the interior. The prices are the same as last week:—Rio, 62-70 the oke in transit; Santos, 70-80 the oke in transit.

Rice. There is a certain demand for Baku rice alone for the ports of Greece and Roumania. Other qualities are neglected.

LANCASHIRE COTTON.

(From Our Own Correspondent.)

Manchester, Monday.

The market during the past week has not displayed increased activity, and in all sections a very limited business has been done. There is increased anxiety with regard to the outcome of the wages demands of the operatives. In the spinning section the employers have offered to submit the matter to arbitration, but the proposal has been refused by the workpeople. Further negotiations are taking place, but there are distinct fears of trouble at the end of the month, with a possibility of a strike. Until the labour situation is clearer, there is no probability of a larger turnover in yarn and cloth. Prices in Egyptian cotton have been firm. The reports relating to the new crop are not encouraging. Egyptian yarns have been purchased sparingly. Engagements and prices show rather more irregularity than a few weeks ago. Very little has been done in piece goods for Egypt. Exporters are waiting for goods now going through being digested before purchasing afresh. The political situation in the Near East generally causes a little anxiety. Operations in cloth for India have been restricted. According to mail advices, it is quite impossible, with the rupee at its present value, for free buying to take place in Lancashire goods. China has bought small lots in bleaching descriptions and fancies. Some makers of printing materials have met with a little more demand for South America. The home trade continues healthy. American yarns have been dull of sale, but late rates are fairly well maintained. Export numbers have not attracted much attention, but producers of staple counts remain deeply sold.

COMPANY NOTES AND REPORTS.

Egyptian and Foreign Trust.

The report of the Egyptian and Foreign Trust, Ltd., for the year ended December 31, states that the year's working resulted in a net profit of £5,303 10s. 9d.; this has been placed to the credit of profit and loss account, bringing the credit balance (after making sundry adjustments amounting to £40 4s. 4d.) to £17,302 12s. 11d., which it is proposed to carry forward. Investments have been taken in at cost; a valuation at current market prices at December 31, 1918, shows a shortage of £9,075 12s. on cost price.

Mercantile Bank of India.

The report of the Mercantile Bank of India, Ltd., for 1919, states that the net profits, after providing for bad and doubtful debts, and including £85,794 brought forward, amount to £301,430. The directors have added £50,000 to reserve (raising it to £750,000), £15,000 to officers' pension fund, written £20,000 off freehold banking premises, and recommend a final dividend on "A" and "B" shares of 7 per cent., less tax (making 14 per cent. for year), and a bonus of 2 per cent., less tax, carrying forward £96,430. Meeting, Winchester House, E.C., April 20, noon.

The final figures relating to the trade of British India for 1919 show imports, £123,563,000, an increase of £15,259,000 on the figures for 1918; exports, £191,688,000, increase £29,927,000; re-exports, £12,615,000, increase £4,044,000.

The traffic receipts of the Egyptian Delta Light Railways for the ten days ended March 10 amounted to £E12,490, making the total for the year £E372,213. The figures for the corresponding period of 1919 were £E10,298 and £E350,919.

The directors of Venesta, Ltd., announce a dividend of 15 per cent., less tax at 6s. in the £, on the ordinary shares, payable April 30.

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

We have had again this week a generally dull market, with most changes in the downward direction. The further depreciation in the Continental exchanges has again been a contributing factor to the general depression. In Egyptian Government stocks the market has been comparatively firm but rather inactive.

Amongst Bank shares, Nationals, after rising to 22⅛, close ¼ lower at 21½. Agriculturals are fractionally easier at 5¼, but Land Banks finish ⅛ firmer at 6⅛.

In Railways, Delta Light close ⅛ down at 6¼ and the debentures are a nominal market at 70.

Amongst Land shares, Aboukir are 1-32 firmer at 2 3-32; Béhéras have been done under 19 and are closing ½ down at 18½. Some demand in a market bare of shares for Béhéra preference caused a smart advance to 4½, but they close only ¼ up at 4. Consolidated Lands have dropped about 3d. to 2s. 4d. Delta Lands are 6d. easier at 16s. 6d., and Gharbiehs have declined ⅜ to 3⅜. New Egyptians changed hands last at 33s., a drop of 1s.; Sidi Salems are ⅛ down at 2¾, and Sudan Plantations have given way 3-32 to 7. In Union Foncière some business was done as low as 5⅛, but the shares are closing unchanged at 5⅜.

Amongst the Miscellaneous descriptions a fair amount of business has been passing in Alexandria Water at 10¾, and Morums have dropped 3d. to 19s.

In Oil shares, Anglo-Egyptians have receded 3-16 to 3 13-16, and Roumanians are 6d. lower at 23s. 3d.; but Traians have, exceptionally, improved about 1s. to 9s.

As regards Greek securities, there has been an all-round decline in prices. The 1881 and 1884 Loans close 2½ down at 54½. Monopoly has dropped 3 points to 44, Rentes are 6 points lower at 42, Funding are nominally 54, a drop of three points, the 1902 Loan has gone back 4 points to 46, and the 1914 London Issue 3 points to 52. The 4 per Cent. 1910 Loan has been a firm spot and closes without change. Turkish 4 per Cents. of 1891 are easier at 67½ x.d., the 3½ per Cent. 1894 have lost a point at 58½, and Turkish Unified have dropped 1½ points to 31.

ANTI-PROFITEERING ORGANISATION IN TURKEY.

The British High Commissioner at Constantinople reports that the Turkish Government, at the instigation of the Allied Food Control Commission, have entered into a contract with a French company, Corre Gourgaud et Cie., for the purpose of combating profiteering and the high prices of living. This contract grants to the company the right of sale at cheap prices of certain essential foodstuffs and other articles of first necessity, reserving for themselves a commission of 7 per cent., and the arrangements are to be supervised by the Allied Food Control and the Turkish Government. The Turkish Government agree by this contract to provide, free of rent and taxes for a period of one year, sites for the erection of booths for the purposes of such sale. If after nine months from the date of the opening of these booths, and if this scheme has succeeded in reducing prices 20 per cent. below those extant in retail shops, the Government will grant a further lease for one year on the same terms. Several British firms were unofficially offered this contract, but none was found willing to take the matter up.

A duty has been imposed on the export of horses, mules, and asses from Algeria.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Currants and Sultanas.—The market has not yet recovered from the effects of the holidays, and business has been extremely restricted.

Sugar.—There has been a fair demand for home refined at the controlled rates. The market for free manufacturing qualities has been quiet. As a result of the smaller crop estimates there has been an advance in the price of Cuban.

Coffee.—There has been a fairly active tone since the resumption of business. Transactions have taken place in Costa Rica at from 170s to 185s., in Indian from 158s. to 174s., and in Mocha at from 168s. to 190s. The futures market has been somewhat weak. In their weekly report Messrs. Reynolds and Gibson state:—With only two days on which the futures market has been open since we last wrote, there has been nothing to test actual values, which are quoted 1s. up to 4s. down from last week. Business on the spot has been very quiet, and the holiday feeling has prevailed over all else. The further depreciation in the French exchange has been the cause of that country re-offering some of the Government coffee recently purchased on a very low basis. No doubt this coffee will be quickly absorbed, but the adverse effect on the market generally is none the less marked. Public sales have been suspended during the holidays, and the home trade has been spasmodic. Brazil remains firm, but holidays, combined with cable delays, have cut information to a minimum. New York futures have been a very steady market, with the undertone said to be firm, and on balance since the close of Tuesday, 30th ult., an advance is registered of 22 to 26 points. The improvement is attributed to hedge covering by importing houses and a good country demand for coffee. Deliveries for March are given 967,225 bags, against 676,000 bags in February, and compares with 729,423 bags for March, 1919. This continually increasing quantity of coffee going into consumption in U.S. is certainly a favourable feature, and is of importance in future calculations and dispositions of crops. It may not be without its influence as we get nearer to the end of this season. The clearances from Rio for eight months averaged 230,000 bags per month. If this average be maintained it would practically wipe up all the stocks in Rio suitable or available for export. . . . As we get nearer to the actual facts of the outturn of the present crop, with later information as to prospects and expectations of the 1920-21 crop, and we hope something nearer to settlement and contentment in Europe generally, developments will come quickly. A return to activity and the lively movements associated with coffee will then replace the late lethargy. Those who have purchased during these quiet times will, we think, reap reward for their pertinacity and patience.

Oilseeds.—An irregular tone has characterised the market. Linseed, Calcutta to London April-June, has been done at 43s. 3d., while La Plata to Hull April-May is quoted 39s. Rapeseed has been weak, with Toria to Hull March-May at 42s. 6d., and yellow Guzerat February-March at 44s. 6d. There has been an active demand for Egyptian cottonseed at 23s. 6d., and for Indian at 17s.

Oilcakes, etc.—Linseed cake has been in fair demand at 24s. 6d., while soya bean cake has been active at 24s. Rapeseed cake is quoted 13s. to 13s. 6d., and cottonseed cake at 11s. 9d. to 13s. Oils have been somewhat quiet.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended March 20:—We have to report a very active market, with sales amounting to fifty-nine cases of all descriptions. Extra Karahissar has been sold at 940 piastres per oke, Tchall at 945 to 950, and Current talequale qualities from 885 to 935 as to quality. The above figures are equivalent to 15s. to 19s. 6d. per lb. c.i.f. The exchange is to-day 415 piastres per pound sterling for cheque on London, and 0.88 dollars for one Turkish paper pound. The arrivals to date are 1,506 cases, against 215 at same date last year.

For the week ended March 27 Messrs. Barker Brothers state:—We have had a very active and exciting week on our opium market, with sales amounting to 69 cases of all descriptions, at prices ranging from piastres 900 to 940 per oke for usual manufacturing qualities, and piastres 945 to 975 for Yerlis, which prices advanced yesterday piastres 50 for the manufacturing, and piastres 75 for the Yerlis. The reason of this advance is owing to engagements undertaken by shippers, which obliged them to accept sellers' terms each time they came forward to buy. Another factor which has caused this firmness and advance to set in is owing to the non-arrival of goods in general from the interior, of which opium also is now on the list of prohibited goods. In sterling values at present exchange, we quote 19s. to 25s. per lb. c.i.f., London or New York, without engagement. Our exchange to-day is piastres 445 per pound sterling for cheque, and 0.88 dollars for one Turkish paper pound. The arrivals are 1,506 cases (same as last week), against 216 at same date last year.

BULGARIAN ROSE INDUSTRY.

Owing to the three wars in which Bulgaria has taken part since 1912, the industry of rose culture for the production of attar of roses has experienced a decided setback, says an American Consular report. It is estimated that the present acreage planted to roses is not more than 15,000. The average annual production of attar of roses during the period from 1900 to 1912 was about 126,800 oz. The production fell to 85,000 oz. in 1917. 85,000 oz. in 1918, and 52,000 oz. in 1919, and it is predicted that the present year's yield will show a further decrease.

During the war, owing to the fact that Bulgaria was cut off from the principal markets—New York, London, and Paris—the stocks of attar of roses remaining unsold increased until they reached a total of about 275,000 oz., about 40 per cent. of which is said to have been of inferior quality. About one-third of this total available stock was sent to the United States early in 1919 in part payment for flour imported from the United States; also some 17,000 oz. were shipped to the United States during the last quarter of the year. It is estimated that the present available stock in Bulgaria hardly exceeds 50,000 oz., worth about 500,000 dollars.

It is stated by one of the best-known producers that under existing conditions the production of attar of roses is not a paying industry. Owing to the high prices for other farm products, at least 5,000 acres of rose gardens have been abandoned and the land planted to more remunerative crops especially tobacco. Centralisation, by the formation of a syndicate for the purpose of eliminating unnecessary expenses, is spoken of as the only course that will save the industry.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Cunard s.s. Cypria, for Gibraltar, Malta, Patras, Piræus, Syra, Smyrna, and Constantinople, will close for cargo at Manchester on April 17, and at Liverpool on April 21

The Ellerman Line s.s. Austrian, for Gibraltar, Malta, and Alexandria, will leave Liverpool on April 17.

The Ellerman Line s.s. Asturian, for Syra, Smyrna, Constantinople, and Batoum, will leave Liverpool on April 23.

The Papayanni Line (Ellerman Lines, Ltd.) s.s. Bosnian, for Algiers, Smyrna, and Constantinople, will leave Liverpool on May 1.

The Bibby Line s.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on April 21.

The Clan Line s.s. Mesopotamia, for Bombay and Persian Gulf, will close for cargo at Birkenhead on April 16.

The Power Line s.s. Pangbourne, for Rabat, Larache, Tangier, Casablanca, Mazagan, Saffi, and Mogador, will leave London on April 20.

Shipping at Malta.

(From Our Own Correspondent.)

Malta, March 31.

During the last few days we have had in port the Himalaya, H.M.S. Benbow, Czaritza, Varola, and Teutonia. Amongst other arrivals have been an American six-masted schooner (2,359 tons) from Spalato; the Nitokris from Cardiff, the Palermo from London, the Norwegian Rutenfgell from Cardiff, and the Memfi from Bergasi. The Oweenee for Port Said, the Las Palmas for Tunis, the Pinnan for Constantinople, and H.M.S. Sportive have all left the harbour within the last day or so.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following weekly cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated March 31:—

Rainfall nearly general in North-Eastern India and hills, United Province of Agra and Oudh. Local in Burma, Bihar, Central India, North-West Frontier, and Madras. Crop conditions generally good. Bombay cotton market steady. Fully good broach April-May Rs.460, July-August Rs.477. Piece-goods market more active with prices steady. Calcutta jute market very quiet. Quotations nominal with prices weakening. Hessians improved tone with slight rise in prices. Heavy goods steady to firm with considerable business. No change in Bank rates.

STOCK AND SHARE LISTS.

Owing to pressure of space we are obliged to hold over the Stock and Share Lists this week.

NOTES OF THE WEEK.

With the opening of the Conference at San Remo this week the work of deciding upon the terms of the Turkish Treaty will, it is to be hoped, have entered upon its last stage. Although some of the main points of the Turkish settlement are already known—such as the removal from Ottoman jurisdiction of Mesopotamia, Syria, and Palestine, and the fate of Constantinople—at least half a dozen nations are still directly interested in the details of the peace that is to be imposed on Turkey. Most of the ground has already been covered in these pages; but it is permissible, perhaps, to reiterate the hope that where uncertainty regarding a just decision still prevails, provision will be made for postponing a hard-and-fast settlement until a more favourable moment, but always in such a way that a workable arrangement is left in operation for the time being, and that no opportunity is afforded to any party to intrigue in its own interests.

A message, published elsewhere in this issue, that reaches us from Thrace serves as a reminder that among the question which has yet to be determined by the Turkish Treaty is the final disposal of the territory taken from Bulgaria by the Treaty of Neuilly and placed under the jurisdiction of the Allies. According to this report, from Bulgarian sources, something in the nature of a governing body has been established for Thrace and held its opening ceremony on April 5. The deputation which afterwards waited upon General Charpy, the Allied Commander, was composed of Bulgarian and Turkish members only; but it goes without saying that the Administrative Council, or whatever its official title may be, includes Greek representatives as well. As the deputation urged that the régime now established by the Allies should not be modified, but should ultimately be developed in the direction of autonomy, it is natural that the Greeks, who look to absorption of the province in Greece, should not have associated themselves with their colleagues. The San Remo Conference will presumably take note of this deputation, and will be at pains to discover what proportion of the total population of Thrace the delegates could claim to represent. If there is any ground for supposing that public opinion in the territory is more or less equally divided, and that Greek rule would find at least half the people antagonistic, a clear case would seem to be established for continuing the form of government already introduced—under Allied supervision—until such time as feeling between the different sections of the population has become less bitter or suspicious. In the meantime care must be taken that the scales are not weighted unfairly against one section or another.

Against a temporary solution of this nature no objections could be raised in any quarter. The territory has already been taken from Bulgaria, whether as a penalty for defeat in war or on the principle of nationality has not been stated by the Allies. It is claimed by Greece, and is generally supposed to have been ear-marked for her, on traditional or national grounds. If the Greek claims are justified, the period of probation will enable them to be substantiated beyond all cavil; Thrace itself, being made arbiter of its own destiny—under Allied tutelage—will recognise its Greek character. Its absorption in the Greek kingdom in such circumstances would be made without the risk of the dissatisfaction and inevitable intrigue that must follow incorporation against the wishes of half the people at a time when racial passions are still high. The paramount interest of all the Allies at this juncture is peace, and everything possible should be done to avoid the creation of storm centres, small or big, in the Balkans or elsewhere.

It is unfortunate that both in Roumania and Yugoslavia political strife should be so much in evidence at a time when the interests of each country require a united effort on the part of the whole nation in the task of reconstruction. In Roumania, however, controversy seems to centre upon methods rather than upon principles. General Averescu and the Transylvanians, it would be thought, must have more in common than the vigour of the latter's denunciation of the Government would lead one to suppose. But on the top of the elimination of the Vaida-Voevod Cabinet has come the dissolution by edict of the provincial governments, which is resented in Transylvania as *ultra vires*. It is argued that only the Parliament of Greater Roumania had the authority to dissolve these governments. On the other hand, the supporters of the Government point out that the local administrations were only intended to remain in power until the Parliament of Greater Roumania had met, and that, therefore, they ought to have come to an end automatically under the late Cabinet. There has been a secession of a small group of Transylvanians under M. Goga to General Averescu's side; but in the approaching elections Dr. Maniu's followers will find themselves ranged against the Government and on the side of the Socialists and a Bukovina-Bessarabia Coalition.

Digitized by Google

The Turkish Chamber has been dissolved, but probably very few people even in Turkey will have spared a tear for its disappearance. All attention is now fixed upon the fight between Damad Ferid Pasha and Mustapha Kemal Pasha, which has opened with considerable liveliness. The first step in the campaign was the issuing of an Imperial Decree and a Government Proclamation frankly condemning the "Nationalist" movement and declaring that those who acted contrary to the laws (secular and sacred) would be punished. This Proclamation was supported by a *Fetva*, signed by the Sheikh-ul-Islam, and at the same time the Nationalist forces in the Bigha region were severely handled by Ahmed Anzavour Pasha. Mustapha Kemal retorted by blocking the distribution of the, to him, unwelcome documents as far as lay in his power, and made preparations to persuade the Turkish peasantry that both the Sultan and the Sheikh-ul-Islam are under duress as a result of the Allied occupation of the capital, and that therefore their orders and advice are to be ignored. It is thought that he will endeavour to set up a rival Government, with a *Na'ib* (representative of the Sultan) and Sheikh-ul-Islam of his own choice; and, according to one report, he had actually selected representatives to fill those posts in the person of Jemal ed Din Pasha and the head of the Mevlevi Dervishes respectively.

The Constantinople Government, finding the distribution of its Proclamation seriously impeded by the rebel leader's tactics, has called the aeroplane in to its aid, and copies of the Imperial Decree, the Proclamation, and the *Fetva* will be distributed broadcast by this means among the Anatolian peasants and the supporters of Mustapha Kemal generally. The step is a good one, and is all the more welcome as showing that Damad Ferid Pasha and his associates are in real earnest, and ready to employ up-to-date methods to achieve their purpose. A Reuter's message reports that the people of Angora, as soon as they were acquainted with the contents of the documents referred to, declared their willingness to fight for the Sultan; and as a result Mustapha Kemal hastily withdrew his troops from that city to Sivas. He has since issued a kind of manifesto stating that he and his followers are in arms to save the Khalif from foreign dominance, and that he has summoned a council of notables to concert action for the liberation of the Sultan and his capital. He refers also to the Nationalists' successes against the Greeks in Western Anatolia and against the French in Cilicia. The situation is extremely interesting, but also extremely delicate, and developments will be awaited with anxious interest.

The world's nerves have not yet recovered their pre-war tone, and one of the results is that many rumours which would formerly have been killed by ridicule at their birth contrive to-day to find acceptance in some quarters. Such, we take it, is the case with regard to a report that has found credence in the United States concerning a change of policy on the part of Great Britain towards the settlement of Palestine. From a source as yet untraced, the tale has been set about that we desire to substitute for the arrangement which formerly had our support a fresh one, giving the Arab Government at Damascus a mandate for Palestine. The chances of such an arrangement working satisfactorily would be remote indeed; and though proposals for something of the kind may actually have been advanced, we cannot believe that the British Government has lent, or would lend them any support. It is a pity, however, that the report was not categorically denied as soon as it found its way to these shores. In the House of Commons, when Colonel Wedgwood asked for information on the point, all that Mr. Bonar Law could say was that he "did not think" there had been any change in our policy! In the circumstances, it is, perhaps, only natural to find the Jewish Board of Deputies, while declaring its confidence in Great Britain's honesty in this matter, showing a certain underlying uneasiness, with a very natural desire to get the whole question settled once and for all.

Meanwhile it is not astonishing to learn that although no acts of violence have occurred in Jerusalem during the past fortnight, racial feeling continues to run high in the City of Peace. That is not to say, however, that all the Arabs approve of violent measures against the Jews any more than all the Jews would approve of violent measures against the Arabs. The Zionist Organisation reports that protests supporting this view have been sent to the Chief Administrator of Palestine from many villages. On the other hand, the same organisation reports that it has learnt "from a reliable source in Palestine" that demands for various anti-Jewish measures have been put forward by "a group of Arabs." Among these demands was one for the suppression of the Zionist Commission and the expulsion of its leaders, while another called for the disbandment of the Jewish Battalion. These demands were rejected by Lord Allenby when they were placed before him, and an inquiry into all the circumstances of the disturbances is to be held.

The announcement that a discussion has been arranged in India with representatives deputed by the Ameer brings the Afghan problem a step, but only a step, nearer a solution. The treaty signed last year left the initiative to Afghanistan, and that initiative has now been taken with characteristic limitations, the Ameer having asked to begin discussions which he hoped would end in a permanent treaty of friendship, and the Government of India having agreed to the proposal with further limitations of its own. We need not look for an immediate and complete restoration of the friendship so rudely broken, but the fact that action has been taken is in itself a favourable symptom, and the atmosphere of Mussoorie, where the discussions take place, should be conducive to the growth of friendly relations between the delegates.

The question of a northern frontier for Mesopotamia is discussed in an article contributed to *The Times* by its special correspondent in the Middle East, who, rightly, suggests that "the subject needs consideration in the light of the whole situation in the Middle East and our new relationship with Persia." He would have us leave the scenes of last autumn's operations alone, and draw the frontier from Jezireh-ibn-Omar to the confluence of the Greater Zab and along that river and the Rowanduz River to the Persian frontier. The salient between the Tigris and the Greater Zab will, he says, be of military advantage to Mesopotamia, and the soldiers will be satisfied with the frontier. This line would certainly find strong support at home, as well as amongst the soldiers and others on the spot. But Englishmen now in Mesopotamia are asking many other questions besides "Where is the frontier to be?" They are asking insistently when the question of expense will be faced and settled, and whether Great Britain is prepared to help Irak el Arabi financially until it can stand on its own feet. Is the development of agriculture, irrigation, communications, and so forth to be the concern of Government or of private enterprise? Has any decision been reached as to the number and character of the troops to be kept in the country? And what policy is to be pursued towards the Arab inhabitants, the Kurds, and the other peoples of the land? These are all questions of the first importance, and it is to be hoped that it is not only by our countrymen on the spot that they are being anxiously considered.

In this connection it is strange to find an Italian politician advancing in an English newspaper a proposal for "a 'double' occupation of Mesopotamia" by Great Britain and Italy. The latter country, he tells us, "does not want to make a political conquest. Her only demand . . . . is that a country rich in economic resources and near to her coasts in the Mediterranean may be put at her disposal where she may send her emigrants and whence she may draw what she needs to complete the resources in raw material of her own land, naturally so

Digitized by Google

poor." This, the most recent and by no means the least startling of the claims for "compensation" to which a cynical world is becoming accustomed, has called forth a reply from General Haddad. The latter suggests that if the boot were on the other foot, and a proposal were made for the establishment of Syrian and Arab colonies in Calabria or Sicily, it would be met with the smile of contempt it would deserve; and he points out that "there is, too, an Arab people who have fought . . . against the common enemy," and have been repeatedly promised their independence and unity. He does not point out that the Italian politician's proposal is unlikely to appeal to anybody outside Italy—or, indeed, we may hope in that country itself; but he might well have done so, for a more barefaced attempt of the something-for-nothing kind it would be hard to imagine.

In many parts of the world the subsidence of the tide of war has left behind it some highly unpleasant human scum. Persia is a case in point. During the war that unfortunate country was overrun by German and Turkish agents of a most undesirable character, whom it was impossible to deal with adequately owing to the neutrality of the country, which they so shamelessly abused. A good many of these gentry still trouble Persia, it seems, and they have lately succeeded in stirring up the "Democrats" of Tabriz to an anti-Government demonstration. The chief sufferers appear to have been the Swedish officers of police, who have been driven out of the town. From this distance the demonstration, regarded as a manifestation of democratic principles, looks distinctly puzzling. In Teheran itself the "undesirables" seem to be Russians, with whom, again, the Democrats are hob-nobbing. As these Russians are referred to as "a Cossack division under Russian officers," and as they do not appear to be professed Bolshevist troops, it would be interesting to know whence they obtain their pay.

THE WEEK AT HOME.

Government and Country.

The by-elections of the week have been pleasant reading for the Government, and a bitter comment on their opponents' hopes. At Basingstoke, vacant by Sir Auckland Geddes' appointment to Washington, neither Liberal nor Labour really expected to win; but both Camberwell and Northampton were admitted to be test or index constituencies.

In the former the Liberals of the Independent variety put up a strenuous fight against Dr. Macnamara, a Coalition Liberal. They have never forgiven him for speaking against Sir John Simon in the Spen Valley contest; and now they hate him worse than ever, because he ignored their opposition in his own constituency and concentrated his efforts on the Labour candidate—wisely, as the event proved. Labour was represented by Miss Susan Lawrence, a lady of private means who has done social work in the East End of London for some years; her friends call her an idealist and her enemies a Bolshevist, but neither are satisfied that she polled all the votes she could have done.

At Northampton the Government candidate was also opposed by a lady—Miss Margaret Bondfield, one of the Labour intellectuals. Northampton is proverbially a "difficult" constituency, which means that it is independent. In the old days it elected Bradlaugh the atheist, and Labouchere, who used, in consequence, to refer to himself as "the religious member"; its partiality for Radicalism and Free Thought has been attributed by the flippant to its chief industry being the manufacture of boots—the cobbler is notoriously a heterodox person. But on the present occasion the town was faithful to the Coalition.

Various reasons are given for the result. The Independent Liberals ascribe it to the folly of Labour trespassing on Liberal preserves, which results in a split vote; Labour retorts that there are no Liberal preserves worth preserving any longer, and spends its money cheerfully on hopeless contests; the Government modestly admits that its victories are due less to its own virtues than to the defects of its opponents, the Independent Liberals having no programme and Labour too much programme The last explanation appears to be the true one; the Labour extremists who want to nationalise everything, and whose continual demand for higher wages and lower prices convicts them of an economic contradiction, have alienated the ordinary unattached voter whose support is essential to them.

Privately, however, Labour is perturbed by another consideration. They have put up several women candidates, and these have been unanimously rejected. It is suggested that the brutal male, whether he is one of the horny-handed or a crusted Tory of the old school, is no more enthusiastic over petticoat government in the House of Commons than in his own home; but, worse even than this, it is now thought that in addition to this handicap, women will not vote for women. If that is so, then the case is hopeless. A charming Suffragette who has done a great deal of canvassing for women candidates told me in a moment of confidence recently that this was her experience; she was much distressed at the blindness of her sex, which she ascribed to incomplete sex-consciousness, or some other abstruse cause; she was bitterly disappointed that, having got the vote, women should put it to so improper a use as to support a man. I suspect that every party manager is watching rather carefully the fortunes of women candidates at elections, to whatever party they belong. If they once began to win seats, the current objections to them would quickly vanish.

Meanwhile, with the Government safe for some time, Mr. Lloyd George has thoroughly earned his short holiday and sea voyage. People are apt to forget that he has been continuously in office since the end of 1905—by far the longest stretch of any living statesman, and one that is only surpassed by Pitt and Walpole, the latter of whom was in office for twenty years continuously. But Downing Street in the early eighteenth century, in a period of unbroken peace, was a very different responsibility from Downing Street to-day.

The Prime Minister has perceptibly aged during the war, but he appears to have marvellous vitality and perfect physical health, which is no doubt the secret of his extraordinary recuperative powers. It was rumoured some weeks ago that he was near a breakdown, and one of the club wits perpetrated the epigram that "Lord Northcliffe had privately received Mr. Lloyd George's resignation and had sent for the King"; but a few days afterwards the Prime Minister was chaffing old friends and opponents with his usual verve. It seems to be the fact, as more lethargic politicians admit with some envy, that he thrives on controversy, and the only effect of a crisis is to give him fresh vigour.

Bank Rate and Budget.

The City has been very nervous this last week, partly because the Bank Rate has been raised, and partly on account of the Budget and Labour troubles. The Stock Exchange has been dull; grave bankers have worn a hang-dog look as though they had been jilted—if a banker ever is jilted—and insurance brokers have been talking as though the end of the world was at hand. Only the estate market has been cheerful, thanks to the prevalent industry of buying and selling property. But as Lord Leverhulme once remarked, financiers are the most nervous people in the world. If they are not making money they see visions of a ruined England and a pauper's funeral; if they are making money they draw the thought that another turn of the wheel may cause them to lose it.

The facts are that exports are still going ahead; that at the moment, we are suffering from an excess of prosperity, and that new issues have been overdone. The investor is in a shy mood at present after his surfeit of opportunities in the spring, and the new prospectuses of municipal bonds, issued by the great provincial cities and by London itself, are by no means exciting. They belong to the safe 6 per cent. variety, but nobody wants safety in these days except curates and maiden aunts, neither of whom has any money left, and 6 per cent. is ridiculous with the income-tax at 6s. in

Digitized by Google

the £, and first-class 7 and 8 per cent. industrial preference shares going begging everywhere below par. In one case recently 80 per cent. of one of these municipal bond issues was left to the underwriters, whose safes must be overfull with unsubscribed stocks of all kinds; the prospect is not hopeful for future issues of this kind, and the promised Government Housing Bonds would seem likely to receive an even worse welcome.

Ireland.

It would have seemed impossible for the difficulties of the Irish problem to increase, but the Government and the Irish between them have succeeded in increasing them. The political prisoners went on hunger-strike, and the Cabinet and Lord French stood firm. There does not appear to have been any popular sympathy with the hunger-strikers in England: for, after all, if a man chooses to commit suicide it is his own business, but in Ireland the spectacle precipitated a general strike. Whether the Government capitulated to the general strike or to the hunger-strikers, or to a combination of both, it is impossible to say. The fact is that they did capitulate on the very evening of the day on which Mr. Bonar Law announced in the House of Commons that they would never capitulate. It was a deplorable exhibition of ineptitude. It appears, by the way, to have entailed the proffer of Lord French's resignation. He has already stated tersely that "he is sick of the job."

On the other hand, the Irish have contrived to introduce an element of comedy into the tragedy of the murder of the Lord Mayor of Cork: for at the inquest they brought in a verdict of wilful murder against the police and Mr. Lloyd George himself. It was shown that the police had nothing to do with it, and the inclusion of the Prime Minister in the verdict adds a touch of unworthy political farce.

Amid these unhappy presages and portents, the Home Rule Bill will resume its passage through the Commons next month. Mr. Thomas, the railwaymen's member, has in the interval propounded a rival scheme for settling Ireland—that the garrison should be removed, and Ireland left to work out its own salvation under Sir Horace Plunkett. But that in fact involves the abandonment of Ireland and of Ulster, and no British Government could consent to such a course.

Two Centenaries.

The calendar makes strange bedfellows. Two quaintly contrasted centenaries are to be celebrated this week—the one of Salisbury Cathedral, of which the first stone was laid in April, 1220; the other of Herbert Spencer, who was born at Derby in April, 1820.

Salisbury owes its foundation to the abandonment of Old Sarum, an old garrison on the commanding height above Salisbury whence derived the "Sarum use" or English ritual of the old Catholic Church. The military and the ecclesiastics at Old Sarum quarrelled, and in the end the Church abandoned the height for the plain, and the priests had considerably the best of the bargain, for Old Sarum has long been a ruin; it will be remembered that its two members, who represented no electors, were a notorious argument for the 1832 Reform Bill. The place was being excavated before the war; when I went over it a few years back part of the site of the old church and several stone coffins were easily identified.

The new cathedral of Salisbury, now seven centuries old, is unique in having been built by one architect in one style, and never "restored" or added to since. The very flower of Gothic art at its most perfect period in this country, the cold completeness of its design, is in superb contrast to the unfinished splendour of Winchester and the mixture of styles at Exeter. But Salisbury as a city has other claims to fame. I have always understood it to be the Barchester of the Trollope novels, and it is undoubtedly the Melchester of "Jude the Obscure," while no less certainly it was the scene of Pecksniff's labours, and of the meeting of Tom Pinch and Martin Chuzzlewit.

The town of Derby, where Herbert Spencer was born, is a very different place from Salisbury, and Spencer himself was very different from the average inhabitant of a cathedral city. Perhaps not many people read the Synthetic Philosophy in these times, but Derby is preparing to celebrate the centenary of the birth of its most notable citizen with an enthusiasm that would probably have surprised Spencer himself. Psychology has made great strides since his day, but a great deal of the synthetic system is still worth studying. A deep thinker, but not an attractive writer, Spencer is probably held in higher esteem on the Continent than in England. Even Mr. Hugh Elliot, his recent biographer, found it difficult to treat his subject with the usual reverence; and, it must be admitted, the interminable "Autobiography" alienates most admirers of the philosophy. Perhaps if Spencer had married George Eliot, as at one time seemed not unlikely, he would have been more like a human being; but the married life of his parents at Derby was so unhappy that this alone may have kept him a bachelor. It is evident from Huxley's Letters that he had little sympathy with, or knowledge of, women.

The Power of the Press.

An amusing discussion has sprung up *à propos* a recent book by Mr. Kennedy Jones, once Lord Northcliffe's henchman, as to the power of the Press. Mr. Jones defends the "new journalism"; Mr. A.A. Baumann, the editor of the *Saturday Review*, has replied with vigour that the modern newspaper is degraded and trivial. He ascribes its degradation partly to its sensationalism and love of "stunts," and in an outspoken article in the *Fortnightly Review*, in which he attacks Mr. Jones and his journalistic children, he puts down its triviality to its catering for women, and to the fact that it relies for an appreciable part of its revenue on the drapers' advertisements, which decorate so many of its pages with intimate and possibly alluring pictures. Therefore he remarks that it is the drapers who keep the journalists, and leaves one with the general impression that the grave leader-writer who discusses politics and war is really like the lace on a lady's petticoat, a mere superfluity that looks well, but is not meant to be investigated too closely.

The May Meetings.

The annual conferences of the religious and philanthropic societies, which are commonly called the May Meetings, are now in full swing. There are, I believe, about five hundred of these organisations, or, at any rate, about five hundred meetings, ranging from great societies like the Church Missionary Society and the Society for the Propagation of the Gospel to those very small bodies which are said to exist mainly for the charitable purpose of supporting a secretary. To the casual Londoner their chief purpose sometimes seems to be that they give the country cousin an excuse for a week's holiday in London; but they do in fact keep a large number of people in touch with an aspect of life that cannot be regarded as utilitarian.

The Week's Book.

The "Life of Lord Kitchener" is, of course, the outstanding book of the week, but comment on so important a work must be left to another portion of this journal. The reviewers in the daily Press, while giving it a warm welcome, seem rather to have missed its real personal interest. They have commented almost exclusively on Kitchener's activities during the last two years of his life; but while this is history on the great scale, the character of Kitchener was formed in the early years in Cyprus, Palestine, and Egypt, and it was on the character thus formed that the "Kitchener legend" was based. The first volume, which has been almost ignored by the critics so far, has therefore the greater biographical interest.

Incidentally, it is to be hoped that in a year or two Sir George Arthur will arrange to issue a smaller edition in one volume at about half a guinea: three volumes at two and a-half guineas is a large order in every sense of the word, but in smaller compass the book would be as popular with present-day youth as Southey's "Life of Nelson"—and I know no book which conveys more quietly and yet with equal force the lessons of character and duty to one's country than the "Life of Kitchener." The professional moralists are an unmitigated bore, but here we have the whole sphere of character in action.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, March 30.

His Highness the Sultan.

Sultan Fuad I. celebrated his 52nd birthday on Friday last, when he held a reception at Abdin Palace, afterwards performing his midday prayer at the "El Fath" Mosque. The latter, which dates from the 11th century, has been restored at the Sultan's expense, and his birthday visit was the official inauguration of the building. In the present political situation one cannot expect Court functions of this description to attract the same large gatherings as before, especially in view of the campaign against their Sovereign which is being carried out by the Extremists, who went so far as to issue the evening before a circular calling upon the people to refrain from congratulating him, and threatening those who visited him with vengeance dire. Nevertheless, the reception last Friday was quite well attended.

Monsieur Clemenceau has returned from his trip to the Sudan very pleased with what he has seen. He proceeded to-day on a short visit to Palestine, whence Lord and Lady Allenby returned yesterday. Lord Allenby's visit to Palestine has been quite a short one, the object being, it is understood, to discuss on the spot certain local questions, and confer with the Chief Administrator, Sir Louis Bols, on the situation created by the Arab *coup d'etat*.

The Political Situation.

The political situation remains relatively calm. Nowhere has there been any repetition of the disturbances at Kafr El Sheikh and Dessuk, the ringleaders in which are being brought before a Military Court. Attempts have been made at demonstrations in Cairo, but these have been mainly carried out by schoolboys and roughs, never in large numbers, and beyond damage done to tramcars, which nowadays seem to be the favourite object on which demonstrators direct their energies, no mischief has been done. These "demonstrations" are ineffective and childish in their conception. The demonstrators invariably disappear on the first rumour of the approach of troops; indeed, the sound of a lorry in the distance is sufficient to cause such a crowd to take to its heels, leaving slippers, tarboushes and other impedimenta behind in its eagerness to get out of reach of the Tommies and their trenching tool handles!

The New Budget.

The striking part about the budget for the new financial year (details of which are published in another part of this issue) is that without any increase in direct taxation it has been possible to provide for an addition to the revenue of over 40 per cent. on the figure fixed in the previous budget. This is an eloquent demonstration of the wealth of the country as a whole, but it is to be noted that the extraordinary increase results from the expansion in Customs returns due to high market values, profit on the banknote issue, which, owing to the hoarding propensities of the Egyptians, continues at a phenomenally high level, sale of land, and the share in the profits derived from the cotton control, none of which items can, unfortunately, be regarded as permanent.

In the case of the Customs the state of the world's markets may keep values at about their present high level for a year or two, but it is pretty evident that something will have to be done in the near future to provide new sources of revenue. On the one hand, a large part of the increased expenditure has come to stay, and even where reductions may become possible the cause enabling such reductions will before that have reacted on the revenue; and on the other hand there is an enormous amount of maintenance work to be done which has been neglected during the war, and delay in connection with which will only make the final bill all the heavier, while development work is waiting to be carried out in every direction naturally entailing further capital expense. It is true that the reserve on April 1 will be almost three times what it was on the outbreak of the war, but the latter figure was at the time admitted to be too low; so that the margin on which a draft could be made is in the circumstances scarcely large enough to meet all the capital requirements as well as the maintenance arrears of the country in the complete manner which one would like to see.

Sir Paul Harvey, in whose able hands every one is fully prepared to leave the direction of the financial destinies of the country, has hit the right nail on the head; and all those who understand the situation will readily endorse his remarks as to the unsatisfactory nature of the existing fiscal system whereby the foreign element is exempt from all taxation and contributes not one pennypiece towards the maintenance of public security, thanks to which it is able to carry on its affairs so free of care and so profitably. As regards the immediate future there is no doubt little to fear. It is indeed highly probable that a certain proportion of the money required for the more urgent maintenance and capital expenditure will be obtained from the sale of land which is being carried out by the Government, and which at the present rates should bring in a very handsome return. The sale of the country's patrimony, even though the proceeds are earmarked for development works, is not, however, the most satisfactory way of providing money, though in the present circumstances it is fully justified, and the time is fast approaching when in order to meet the economic and social requirements of a steadily growing population the Government will be forced to take powers to ensure that every inhabitant in the country contributes his or her direct quota towards the cost of administration.

The Coal Crisis.

The coal crisis threatens to have far-reaching effects on the economic life of the country. Sunday trains have been cut down to a negligible number, the week-day train service has been curtailed, and only the most important goods traffic is to be carried. The quantity of coal for essential industries hitherto sold by the Ministry of Public Works is being considerably reduced, and unless landowners take their precautions thus early they will have difficulty in working their water-lifting machines, which are likely to be in great request next summer, owing to an anticipated low water supply in the river. The tram companies are likewise curtailing their services, and street-lighting is being very much reduced, so as to economise coal. As a result public

administrations and private establishments are being forced to adjust their arrangements to meet the new conditions, which are bound to have a very serious influence on the life of the country in general.

Very strenuous efforts are being made by the Government to obtain coal, and, as previously mentioned, unless some satisfactory result attends the present negotiations the situation, which is at present serious, will become even more so, on account of its effect on the cotton and other crops. As in the case of the cereal supplies which are coming from abroad, whatever coal or fuel is obtainable will be due solely to the intervention of Great Britain; and those who so fiercely repudiate the British Protectorate and stand for complete independence may well ask themselves whether attachment to a country which, like Great Britain, can give to the word "protection" an interpretation which is so directly beneficial to the "protégée," is not, after all, something worth having.

YUGOSLAVIA.

BELGRADE, April 5.

Death of Dr. Polit.

A link with the past has been broken by the death, at an advanced age, of Dr. Mihailo Polit, a well-known defender of Serbian liberties in the Voivodina. Dr. Polit, who was born in 1832, first came into prominence at the time of the rising in Hungary in 1848, and became really famous through his bold speeches in the Hungarian Chamber, more particularly in his defence of another Serbian patriot, Svetozar Miletitch, accused of high treason. Turning to the Magyar Court, he exclaimed, "The Slavs are calling to you; we will meet at Philippi." This let loose a storm of political and national passion, and Dr. Polit was persecuted by the Hungarian authorities. He lived, however, to see the realisation of his life's dream, and welcomed the victorious Serbian troops at Temeshvar, once the capital of the Serbian Voivodina, to-day allotted to Roumania.

It is stated that the Military Censorship will be abolished on May 5.

The *Povernik* or Governor of Cettigne, M. Ivo Pavichevitch, is relieved; in his place there are appointed two "inspectors" of police, MM. Viktor Krstitch and Branko Milanovitch. The appointment of the latter has aroused comments on the ground that he was an official in Montenegro during the Austrian occupation of the country.

A committee has been formed at Ushitellia to erect a memorial to Miss Haverfield.

BELGRADE, April 10.

Easter and the British Colony.

The Orthodox Easter falls a week after ours this year, which is fortunate, for most people take advantage of the two holidays, and when there is a longer interval between there is more dislocation of business. The British colony, of course, celebrates its own Easter, and employees had the advantage of a Bank Holiday in Belgrade; but as there is no business going on during the Serbian Easter, which is kept up till the Wednesday, everybody gets a double holiday whether they want it or not; and the holiday is the more complete as the postal authorities "shut up shop" till the Wednesday after Easter. The British colony is not a large one, but it is growing steadily, and several of its members have taken houses and even bought them, intending to make a prolonged stay. It is hardly big enough yet to divide into well-marked cliques, and everybody gets on very well with everybody else, making a very happy family. Several dances have been given, and have been attended by almost the entire colony. They are very pleasant and informal functions which everybody enjoys.

Political Matters.

Politics are being given a rest over the recess, but some interest has been aroused by the reply of the Crown Prince to the students of Zagreb University, who telegraphed to H.R.S. to inquire whether it were true that the Government were proposing to make sacrifices on the Fiume question in return for concessions in Northern Albania, and at Skadar in particular. The Regent replied that there was not the slightest intention of showing any weakness whatever on either point, but that the Government would exert itself to the utmost to obtain complete satisfaction for the national aspirations in both vital questions.

Since the lamented death of Dr. Pavlovitch, the Vice-president of the Skupshtina, Dr. Ivan Ribar, has been acting as Speaker. To M. Protitch's proposal that the Government should itself vote one hundred members as sufficient to form a quorum, Dr. Ribar has replied that he cannot consent. The Government is in an *impasse*, and its resignation is anticipated after the holidays.

Hope for Historians.

Historians of Serbia have always contended with a lack of scarcity of records; for owing to the frequent invasions, very many of the old documents have been either destroyed or removed. As already mentioned, very many are certainly to be found in Vienna, where a commission has proceeded with a view to securing their recovery. The Peace Conference is now taking steps to ask for the recovery of Serbian records from the Turks; for without doubt a very large quantity are reposing at Constantinople and Brussa, which will be of the greatest interest, and some will doubtless throw new light on many obscure passages in Serbian history. In 1890 a Hungarian Mission, headed by Professor Vambery, found in the Sultan's archives the famous old Miroslavl Evangel, and the Evangel of the Bosnian Duke Hrvoya Vukchitch-Hrvatinitch, the former of the XIIth, the latter of the XIVth, century. The impatient interest of historians can well be imagined, for during the period (five centuries) of Turkish dominion, there is much that is obscure.

The Late General Alexeieff.

English readers will remember the name of General Alexeieff, Chief of Staff of the Russian armies when the Tsar assumed the Chief Command upon dismissing the Grand Duke Nikolai Nikolaievitch in the summer of 1915. General Alexeieff bore an extremely high reputation, and was, of course, the virtual head of the entire Russian forces. He was afterwards murdered by the Bolshevists, like so many other of the Russian military chiefs; but his family saved the body, which was buried in the Crimea. On the break up of General Denikin's army they disinterred the body and brought it to Belgrade, where it was re-interred with military honours on April 7.

Fire on Orient Express.

A fire recently occurred on the Orient Express, which narrowly escaped having serious consequences. Between the stations of Vinkovtse and Belgrade a fire was noticed in the French mail coach, about eight o'clock in the evening. The postal staff were at that moment in the dining-car, but the Serbian gendarmes who were guarding the baggage noticed the fire, stopped the train, and the fire was extinguished before it could spread. Fortunately no one was hurt, nor was any baggage damaged, but the French mail was almost entirely destroyed.

BULGARIA.

SOFIA, March 31.

The Elections.

Thanks to the measures of precaution taken by the civil and military authorities, the Parliamentary elections passed off last Sunday without incident throughout the kingdom. They were conducted on the proportional system, and the final, corrected results give the following results:—Agrarians, 110 seats; Communists, 50 seats; Democrats, 24 seats; Narodniaks, 16 seats; Moderate (or Broad) Socialists, 9 seats; Progressists (old Russophils), 8 seats; Radical Democrats, 7 seats; Ghenadieffists, 4 seats; and Petrovists (old Stambolovists), 1 seat, out of the total 229 seats.

The most remarkable thing about the new Chamber is the fact that it contains nine deputies fewer than the former Chamber, owing to the territory of which Bulgaria has been deprived. Comparing losses and gains in the present Chamber, the Agrarians have a gain of 25 seats, the Communists of 2 seats, the Democrats 15

Digitized by Google

seats, the Progressists 7 seats, the Radicals 4 seats; while the Liberal Coalition or Germanophil party, which was not represented at all in the last Chamber, now has one deputy—Dr. I. Gateff, who is a great Anglophil. The Moderate, or Broad, Socialists, who had 39 representatives in the last Chamber, have now only 9.

From the above figures we may conclude that the new Cabinet will be also a coalition Cabinet. The present one will continue to act until the convocation of the Chamber, which is fixed for April 15.

Resignation of Dr. Daneff.

Dr. St. Daneff, the present Minister of Finance, has tendered his resignation, but will carry on the duties of the post until the convocation of the new Chamber, to which he will probably be elected as president.

Sentence on General Tantiloff.

A fortnight ago the Sofia Field Court-Martial began the trial of Major-General P. Tantiloff, who was Bulgaria's military representative at Bucharest during the world war. He has been found guilty of exceeding his authority and of speculating, and has been sentenced to six years' imprisonment and deprivation of civic and political rights, and to pay to the State a fine of 1,700,000 levas. The sentence is subject to appeal to the Supreme Military Tribunal of Cassation.

Sir Herbert Dering's Leave.

Sir Herbert Dering, the British High Commissioner in Bulgaria, has left for England on two months' leave.

A Consular Appointment.

M. George Madjaroff, son of the present Bulgarian Minister for Foreign Affairs, has left for London, where, after the ratification of the Bulgarian Peace Treaty by the British Parliament, he will be accredited as Bulgarian Consul-General.

SYRIA.

BEYROUT, April 3.

General Gouraud, High Commissioner of the French Republic in Syria and Cilicia, has just concluded his tour in the Lebanon. Both in the south and the north it was a prolonged popular demonstration.

The mistakes inevitable during a period of transition and the difficulties attendant on every beginning, coupled with the severest economic crisis that the Lebanon has ever experienced, had combined to place the French—who succeeded to authority under very trying conditions—in the most unfavourable light. With time, however, mistakes have become fewer, unfit elements have been gradually eliminated, and a better and more intelligent understanding is beginning to succeed suspicion and discouragement. But nothing served better to hasten and strengthen the union between the Lebanese and the French than that unfortunate reference to the Lebanon made by the Syrian Congress at Damascus, in its recent manifesto, which roused the old spirit of independence among the proud mountaineers, both Christians and Druses, and made them turn to France for the eventual defence of what they regard as their most precious heritage.

The High Commissioner, who, like most great generals, possesses the spirit of leadership in the field of diplomacy as well as of battle, knew how to take full advantage of this psychological state of the Lebanese, as may be seen from the speeches that he delivered at Deir El Qamar and Beit Eddine as well as at Tripoli.

At Deir El Qamar, the scene of the bloodiest massacre of 1860, which afforded France the opportunity of playing the fine rôle of liberator and peacemaker, one of the members of the Administrative Council, a native of Deir El Qamar, made an eloquent speech suitable to the place and circumstance. In his reply the General said:

You have evoked the great souvenirs which bind France to Deir el Qamar more than to any other part of the Lebanon. It is here that the Lebanese had occasion to know the soldiers of my country, their courage and their kindliness. It gratifies me to hear you say that the efforts that are being made each day by the Administration I have the honour of directing for the good and prosperity of the country, are not vain; that the methods of government are becoming more rational; that the choice of officials is more judicious; that security is firmer, and that honesty is at last more appreciated. Are not these the necessary conditions of the development of a country, and the earnest of its fine future? You have recalled the glorious memory of the great Fakhr Eddine, and you call attention, at the same time, to the prejudice that is being caused to the Lebanon by the emigration of her sons. Do you not think, gentlemen, that if this small country of the Lebanon has held a big place in the past during the days of the Fakhr Eddines and the Shechirs, this was due not only to the valour of these great Emirs, but also to the fact that the Lebanese of those times emigrated doubtless less than now, and perhaps also to the fact that they worked more. In roaming over your beautiful hills, covered with terraces so carefully cultivated, one realises the amount of colossal labour your ancestors must have expended. It may be safely asserted that what constituted in the past the force of the Lebanon, and what alone can yet make it in the future is work as well as courage to maintain its independence, and truthfulness to its faith. This independence no one has the right to dispose of without your consent, no one wishes to prevent you from realising it as your forefathers did, in union with France. You have in this connection the promise of Monsieur Clemenceau to the Patriarch of the Lebanon, and I may add that I received today from Monsignor Abdallah Kouri, who is still fulfilling his mission in Paris, the best tidings as to the welcome which the present Government has accorded to the wishes of the Lebanon. You can, therefore, rest assured that the French Government will uphold these wishes with all its power at the Peace Conference, that alone has the right to settle the fate of the countries which have been conquered by the Allied Armies, and saved from the Turks. You know also that France is there with her soldiers, the victors of the Great War, behind her, to watch, if need be, over your independence and your liberties.

The last words were received with frantic applause, and when the High Commissioner expressed the wish to have his speech translated, he was told that this was unnecessary, since 90 per cent. of his hearers understood French. His Excellency then remarked: "Then I have but one advice to give to the 10 per cent. who do not know it, and this is to hasten to learn it."

SMYRNA.

March 31.

On Sunday, March 28, Captain Theodoropoulos, the Squadron Commander of the Greek Flying Corps in Smyrna, while flying at a height of 2,000 ft. over the city in honour of the swearing-in of the Smyrna recruits mobilised for the Greek Army, fell into the bay and was drowned. The machine has been salvaged, but the Captain's body cannot be found. His comrades flew over the spot and dropped wreaths in memory of their popular commander.

The Rt. Rev. T. R. Knight, Bishop of Gibraltar, has visited Smyrna during the past month and confirmed about fifty young members of the British colony. During his stay he has twice attended High Mass in the Greek Cathedral, and is much more optimistic about finding a *rapprochement* between the Orthodox and Anglican Churches than any of his predecessors. The Bishop has announced his intention of collaborating with the Greek Patriarch in Constantinople to attain the desired union.

MALTA.

VALETTA, March 31.

Preferential Import Duties Ordinance.

With a view of placing something in the depleted coffers of the island, the above Ordinance has been introduced by the Council of Government. Broadly, the revision of the Customs tariff has proceeded on the old lines—tax luxuries only. This has brought up the price of spirits, wines, and tobacco. With a view of furthering help to the poor and the encouraging of local industries, there are certain goods free from duty, such as rice, seeds, bulbs and plants, engines, machinery, and all kinds of plant.

A Monopoly.

There is a great amount of feeling expressed by the commercial community against the Naval and Army Canteen Board. This is to be expected, and is natural. Malta in the past has done much business in catering for the Army and Navy, and in most cases the firms have given complete satisfaction. Now the Government comes along and establishes a monopoly, and one backed up by the Government itself both directly and indirectly. The merchants complain that they do not import or sell, as there is no one to buy. Feeling is so strong on the subject that a mass meeting of merchants is being called in connection with it by the Chamber of Commerce. What makes the situation more ironical is that the cost of the goods is considerably higher than would be the case if the merchants were allowed to compete with one another.

THRACE.

We have received from the *Agence Télégraphique Bulgare* the following communication, dated April 5, from Gumuljina (Western Thrace):—

Yesterday the first Supreme Administrative Council of Thrace (Provincial Assembly) was formally opened, and the Bulgar and Turk population organised a huge manifestation in which all classes, including the youths from the schools, took part. A large crowd made its way inside the Konak and gave a warm welcome to General Charpy, Governor of Inter-Allied Thrace and commander of the Allied troops, practically covering him with flowers. After the Council's opening ceremony a deputation, composed of thirty Bulgarian and Turkish notables, presented to General Charpy the following petition:—

"On this memorable day we, the inhabitants of Gumuljina, assembled here to celebrate the opening of the first Supreme Administrative Council of Thrace, consider it our duty to make the following declaration:—We beg to express to you the best thanks of the population of Thrace for your indefatigable efforts to give our country a just government. We are very grateful for the impartiality shown by all your representatives towards the various nationalities inhabiting Thrace, and also for the part you have played in convoking and establishing this Supreme Council, by means of which you invite the population to take part in the management of public affairs and in the government of the country. We hope that in the near future this Council will, under your benevolent protection, develop into a completely representative body. Anxious for the future of our country and inspired by the noble principles of which the Entente is a disinterested champion, we take advantage of this occasion to beg you to bring to the knowledge of the authorities the sincere wishes of the Thracian peoples. These wishes, conceived in the full interests of the country, can be stated thus:—That the present régime is the only one which can ensure the internal order and peace of the country; that it should not be modified; and that it should in the future be developed into an autonomous régime, placed under French protection, or at least under that of the Great Powers of the Entente."

On the same occasion General Charpy received telegrams from numerous Turkish and Bulgarian towns and villages in Thrace, congratulating him and expressing wishes similar to those stated above.

ALBANIAN INDEPENDENCE.

The following is a translation of the Proclamation read at the inauguration of the Albanian National Assembly, March 27, 1920, at Tirana:—

At the National Congress held at Lushnia, in January, it was decided that the National Assembly should meet again on the 15th of the present month. We gladly inaugurate to-day the first Albanian Parliament.

When the Independence of Albania was proclaimed at Valona on November 28, 1912, it was announced that a Senate would be formed. Unfortunately this was not then accomplished. On December 25, 1918, at the Assembly at Durazzo, the formation of a Senate was also in view, but was not realised. It is consequently to-day that the Parliamentary life of Albania begins, and the nation thus shows that it is more mature than had been believed by those not well acquainted with Albania.

The Congress of Lushnia proclaimed that the national ideal is Union, and not party struggles. The Government of Durazzo was superseded, and a new Government formed. Our national aim is complete independence and the defence of our Fatherland. We wish to live in harmony with our neighbours, the Greeks and Yugoslavs. We firmly hope that our neighbours will recognise our ethnical and indefeasible rights. We hope that Italy, taking into consideration the unanimous wish of the Albanian nation, will change the policy which she has hitherto followed with regard to Albania, and will support the absolute independence and territorial integrity of Albania, and that in accord with England and France—who have ever been the protectors of small nationalities—she will be favourable to our national cause.

At this historic moment we think we are fulfilling a debt of honour when we recall with gratitude the humane and just intervention of Mr. Wilson, President of the United States. We feel convinced that the great American nation, which has proclaimed the principles of humanity and justice, will support our just national claims.

Albania presents herself before the civilised world with the prayer for—Justice! We ask for Justice, and it will be accorded to us.

Gentlemen,—On March 11 the town of Scutari and its environs came under national administration. We hope that soon all districts assigned to Albania by the Conference of London (1913) will again be joined to their Motherland. At this Session you will be called upon to deliberate upon the laws and budget which will be presented to you by the Government, and which are not without difficulties. May God fulfil the prayers of the Nation, and may our country safeguard her independence and regain her territorial integrity during the Session of the present Assembly.

CORRESPONDENCE.

THE FUTURE OF ARMENIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As a resident of many years' standing in the Near East, and acquainted through my professional position with all races and all classes in the Armenian regions, I beg leave to offer a few remarks on the state of affairs which has recently more than ever engaged the kindly attention of the British public. There seems to have been a tendency to regard the Armenian question as almost insoluble. Most of the difficulties, however, are, if not illusory, somewhat exaggerated. One of them is already in the way of being removed by the action of the Allies at Constantinople, for it is from Constantinople that all the intrigues, claims, and secret instructions, recognised as the real source of trouble, have emanated. It cannot be too clearly understood that Turkish statements concerning the relative interests of Moslems and Christians in Cilicia and neighbouring countries are not trustworthy. The present falling-off of the Armenians in numbers, wealth, and character is not due to poverty of soil nor to any want of energy or resourcefulness on their part. It is owing to the policy of the Porte, consistently followed for the last fifty years, of which I have personal knowledge; a policy of repression, of persecution, and of extermination. Village after village has been emptied of its Armenian inhabitants, who have been replaced by Kurds or Circassians. Vilayets have been formed in such a way as to give a majority to Mohammedans. The policy is seen in the attitude of the Turkish Government, in its methods of police and taxation, in a steady antagonism to any prosperous Armenian, and in massacre, both acute and chronic—chronic, for hardly a week passes without the murder of some Armenian peasant on one pretext or another; and acute, as in these great outbreaks of which only a few faint echoes reach England from time to time. But, still, the depletion has been overstated. It has been estimated on the Turkish side that in Cilicia there are no more than 130,000 Armenians. Up to the time of the recent massacres at Marash this figure was distinctly too low. There are at present over 70,000 Armenians in Adana, about 17,000 in Aintab, 15,000 in Hajin, about 5,000 in Sis, and as many in Killis. Until recently there were 22,000 in Marash, besides many in the smaller towns and villages. Even this number does not include refugees and emigrants awaiting in many countries, near and far, the opportunity of return. On the other hand, the numbers attributed to the Turks are raised by adding Kurds, Circassians, and peoples of various races, many of whom possess no trace of Turkish blood, and in some cases are antagonistic to Turkish religion and policy. The Dersim Kurds, for example, differ from the Kurds of the South in their religion, which is not Islamic but a primitive cult, more in sympathy with Eastern Christianity than with Islam. Their relations with the Armenians have been and still are friendly; thousands of Armenians have taken refuge among them from the Turks. Other tribes are proud of the independence they have always maintained. But all these are reckoned as anti-Armenian. Figures so obtained are far from giving a true representation of the facts. And even if Armenians are momentarily in a minority, how many Greeks were left in Athens when the Powers granted them independence? What was the condition of the Bulgarians when a free Bulgaria was created? After centuries of repression the Armenians still preserve their religion, their language, their national character, and their aspirations. Once let their territory be assured to them and there is every reason to believe that they will collect their scattered population into that territory, organise themselves as a nation, and prepare to defend their homes.

Their defences on the side of Turkish Anatolia will be easy if a natural boundary is granted them. The Taurus chain, extending from Cilicia to Erivan and Erzeroum, affords only a few passes, and these can be held by comparatively small numbers against any invading forces. It was the proposal of the late Sir Mark Sykes and M. Georges Picot that the Armenian boundary should be extended as far as to the north of Sivas, so as to include Erzinjan and Trebizond. To exclude Sivas would be regrettable, for almost 90 per cent. of the Armenian population there are agriculturists of the finest type that can be found anywhere. And to the south, if the Powers are prepared to grant Bitlis, Mush, and Erzeroum, it must be remembered that the inclusion of Kharput, bringing with it the line to the Euphrates and Malatia, will give Armenia the Dersim Kurds, who, as I have said, are its old allies and friends. Kharput itself is an Armenian centre. No town has sent so many of its sons abroad—to America and elsewhere—to engage themselves in preparation, industrial and intellectual, for the time when they may be repatriated.

The Prime Minister recently voiced a wise policy on the part of the British Government when he said that, in the case of the Arabs, there would be no undue interference with their ancient traditions, no attempt by new laws and restrictions to control their ancestral customs and desert

Digitized by Google

liberties. We ask for treatment such as that which is proposed for the Arabs. Both in the Erivan Government and in Cilicia there are plenty of men competent to serve in any army of occupation and defence. They need training, and, above all, the opportunity of self-realisation in a land freed from Turkish rule. To get that opportunity they need a moderate loan for Cilicia and Armenia, a loan which can be amply guaranteed from the mineral and agricultural resources of the country. Perhaps it is not generally known how rich those resources are naturally. Cilicia has always been regarded as one of the most productive lands on the face of the earth. Upper Armenia is also potentially wealthy. Both have been the sources, even under Turkish rule, of considerable revenue, produced mainly by Armenians. Travellers who know little more of the region than its towns have met with Armenians chiefly as money-changers, bankers, and traders; but outside the towns, and in the great majority of the race, they are industrial and agricultural. They are the workers in copper and iron, the carpenters and builders, the craftsmen of the towns; and in the country they are the peasantry who cultivate the cotton, wheat, and garden produce of Cilicia; and in the uplands, beet and cereals, with cattle and sheep. It is from their industry that the Turkish Government has derived its revenues and the wealth that feeds the *effendis* and *beys* of the capital. At no time has the central Government supported or subsidised the provinces; and if these results have been obtained under a spendthrift and uneconomical administration there can be no doubt that under a stable and honest Government any capital and labour invested in the country will be amply rewarded.

But at the present juncture a nation so decimated and deprived of everything it possessed cannot start life afresh without material help in the way of a loan. Much that has been taken from the Armenians has not gone to the Turkish Treasury, but to individuals. Many Turks are known who a little while ago were of the lowest class, and now are rich from the proceeds of this robbery. The wealth of the Armenians cannot be recovered from the Turkish Government, but it is in the hands of the Turkish people. They have profited by the transaction, and it is a significant fact that during the last few years no voice has been raised in the Parliament at Constantinople to protest against the atrocities and robberies which were well known to have been in progress. The Turks as a nation have not opposed the course of events directed by their Government; they have shared the booty. In justice, they may well bear such taxation or requistions as would provide part at least of the loan, considered in the light of an indemnity to the nation they have misgoverned.

Besides a loan, the Armenians need a sufficient supply of arms and munitions, and they need teachers—military officers and civil administrators—in a number which will diminish as the process continues. I am confident that this is the solution, and no costly one, of the question; and this solution will do more than merely settling the Armenian problem: it will secure the stability of the East. That stability is threatened by the intriguing of the Turks among the naturally peaceful and loyal races, eastwards to India and southwards to Arabia and Egypt; and this will continue until steps are taken to confine the activities of the Turk to the region allotted him. Unrest such as that which has produced the "National Movement" of Mustapha Kemal is fomented by Turkish emissaries, who now have free access everywhere. The creation of a barrier such as would be formed by a continuous non-Turkish territory—not necessarily under one administration, but united in character and sentiment—from the Mediterranean to the Black Sea would do much to safeguard the whole area by blocking the way from the storm-centre. To effect this, no more is needed than that the province of Cilicia should be coterminous with Armenia, leaving no Turkish corridor between the two States.

No one, sir, knows better than myself all that can be urged on behalf of the virtues of the Turk as an individual. Nevertheless, as a governing power, with unchecked authority over races alien in creed and character, Turkish rule has surely been proved disastrous.—I am, etc.,

ADOM TARVERYAN.

TALES OF THE BULGARIANS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In the issue of March 11 of your excellent publication, I read a letter by a Bulgarian gentleman in Sofia, in which he tries to give character sketches of his own race and of other races hateful to the Bulgarians, by appealing to Bulgarian tales. May I claim your indulgence to tell your readers two brief popular tales of the Macedonian folk, which will perhaps show us another side of Bulgarian character?

According to the first, God said to a Bulgarian one day: "Ask of me whatever you wish, and I will do it for you; but I shall do twice as much for your neighbour." The Bulgarian, without hesitation, asked God to put out one of his own eyes. This anecdote was told in 1895 by a Bulgarian Cabinet Minister to Alfred Berl, the well-known French sociologist, who recently stated that Bulgaria preferred to side with Germany, in order to destroy Serbia and Greece, rather than with the Allies, whose victory would have brought much profit to Bulgaria, but even more to Serbia and to Greece.

The second tale runs as follows: "Once a Bulgarian and a Greek entered into partnership. They acquired three lambs. When the time came to divide up, the Bulgarian said: "The first lamb belongs to me by right; the second you will give me because I am your partner and you love me; and the third I take away from you because I am stronger." Those who remember the inordinate appetite of Bulgaria after 1912 will understand the application of this anecdote.—I am, etc.,

N. J. CASSAVETES.

Vice-President, League of Friends of Greece in America.

Boston, U.S., March 27, 1920.

BULGARIA AND GREAT BRITAIN.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As the representative of three Bulgarian syndicates engaged in mining, banking, and industry, I have visited England twice since Peace was signed, and have received financial assistance which I did not expect.

By reason of the exchange, the most satisfactory manner of trading for both countries is to obtain sterling in England by exporting from Bulgaria wool, raw hides, ore, minerals, eggs, wheat, carpets, attar of roses, tobacco, etc., to be sold without drawing against their value; and with the sterling so provided Bulgaria will be able to purchase any goods it requires in this country.

Unfortunately, Bulgaria is without an outlet to the open sea, and if Thrace and Dedeagatch are not handed over to her, I suggest that they should be controlled by the Great Powers, or that a mandate should be given to one of them. If this is done Bulgaria will be near a friendly Power whom she can trust, and with whom she desires to be on the most amicable terms. If it is not done, Bulgaria will be forced to carry on her commercial intercourse with the West in the old way, viz., through the Central Powers; which would not be satisfactory either to Bulgaria or to England, France, or America.

If Thrace is ceded to Greece an outlet to the sea will be denied to Bulgaria; and, having regard to the past relations between Greece and Bulgaria, it is not likely that my country will be able to acquire commercial passage through Greek territory, and so Bulgaria will not be able to take advantage of the Ægean port in the same way as would be secured for her by an international régime in Thrace.—I am, etc.,

S. MISHAIKOFF.

London.

A Moscow wireless message states that 300 Russian refugees in Constantinople, suspected of Bolshevism, have been arrested. The remainder are under close supervision.

It is announced by the French postal authorities that correspondence sent on March 31 by the Simplon-Orient express destined for Serbia, Bulgaria, Turkey in Europe, and Smyrna, was destroyed by a fire in the mail van, the only correspondence saved being that destined for Croatia and Slovenia.

PRESS ON THE NEAR EAST.

Mesopotamia: A Risk.

The *Yorkshire Post* recently published an article "The Problem of Mesopotamia," which puts the case against our continued occupation of the country in concise form. In order that our readers may have these arguments before them we reproduce the passage here, but without endorsing the view put forward:—

The tract of country we occupy is a long, narrow strip containing two of the historic rivers of the world and very little else. Its land frontage is at least 1,500 miles of country very difficult of defence, inasmuch as there are no strongly marked features to form a defensible frontier. We are told that much of this frontier is desert, and that Napoleon has said that a desert is the most effective barrier in the world; but times have changed since the great Corsican said this, and our own experience in the late war does not bear out his dictum. The Turks twice crossed the Sinai desert to attack the Suez Canal, and we invaded Palestine with a very large army operating the reverse way across the same waterless desert. Modern inventions have rendered even the most obstinate deserts comparativly easy of subjugation, and were we to garrison Mesopotamia with a few thousand men only, on the strength of Napoleon's saying, it is to be feared that we should speedily repent our temerity. It is impossible to run an Empire in the East, or, indeed, anywhere else, on the cheap.

At the present moment our garrisons in Mesopotamia amount to 10,000 British and 67,000 native troops, and are estimated to cost us about nineteen million sterling annually. Should Bolshevism spread across Asia, and the Russians and the Turks make common cause, which is by no means improbable, we should have to reinforce Mesopotamia strongly at once, and might easily find ourselves with a serious and expensive war upon a large scale on our hands, upon the issue of which the fate of our Eastern Empire might depend. In India we possess the finest natural frontier in the world, and as long as we stand concentrated behind it, and on friendly terms with the warlike races that live just beyond it, we can defy the attacks of the most powerful enemies, but if we wander beyond that natural glacis, and attempt to hold a long, weak, disconnected stretch of territory open to attack from every side, we must either assemble vast forces to hold it or must be led on in search of a scientific frontier to the shores of the Black Sea and the Caspian and the line of the Caucasus.

Is the country prepared for this? It is well known that the safer view, although it may not commend itself to a certain group of statesmen, is the one held by all the clearest thinkers on the General Staff, and it is a happy sign when military opinion, in place of advocating further conquests on a large scale, advocates a consolidation of our strength within safe limits. On the other hand, we cannot, of course, afford to allow any other Power supremacy in the Euphrates Valley or in Persia, in both of which regions we must maintain a foremost and predominating influence, upheld by a Resident securely guarded. But this is a very different thing from permanent military occupation or annexation, or even from mandatory power.

The article concludes:—"From a purely military point of view we shall commit a most serious mistake if we assume responsibility for the defence of this very vulnerable region, a responsibility which, in the event of even temporary failure, may shake our whole Eastern Empire."

On the other hand the Special Correspondent in the Middle East of *The Times*, writing from Teheran on April 10, takes a very different view. He says:—

Concerning the northern frontiers of Mesopotamia, if we leave the scenes of last autumn's operations—Zakho, Amadia, and Akra—alone and have a frontier on the Tigris from Jezireh-ibn-Omar to the confluence of the Greater Zab, then along the Greater Zab and the Rowandaz River to the Persian frontier, soldiers will be satisfied and the military problem will be much simplified. This frontier will be served by a lateral railway running through Nisibin, Mosul, Kirkuk, and Kifrai, and the triangular Kurdish salient into the frontier between the Tigris and the Greater Zab will be of military advantage to Mesopotamia. A mandate in Northern Kurdistan is beyond our strength, and commerce must take its chance for the development of the Zakho oilfields. The rest of Mesopotamia cannot have security unless the outposts of civilisation are pushed to Mosul. Southern Kurdistan, including Suleimanie, must belong to Mesopotamia. It is idle to pacify Persia if a No-man's-land is continued between Persia and Mesopotamia.

But the real key to the Middle Eastern situation is Persia, not Mesopotamia. Mesopotamia will swim; Persia and the Agreement may sink together. A Cossack division under Russian officers is still the strongest military force in Teheran. A mixture of Tsarism, well leavened with Bolshevism, it is determined to keep Russian influence alive against the day when Russia shall find herself again. Every kind of Persian malcontent or extremist, whether reactionary or demagogic, is swept into its net, and Britain is represented as a greedy capitalistic and Imperialistic Power. The days when Russia was a foil to liberal Britain are forgotten, and the spectacle of "Democrats" intriguing with the Cossack against the present Persian Government is unedifying.

The Bolshevists have now swept the boards in Russia, and can probably procure Soviet Governments in Baku and Tiflis. I understand that they are insisting that these Republics should conduct their foreign relations through Moscow. A great Soviet Russia with a single foreign policy directing Central Asia cannot fail to make herself felt in Persia and Afghanistan. Bolshevism in Central Asia, however, cannot be fought by bayonets. The military danger in the Middle East is acute, but the menace can be removed by peace. If Bolshevism proves impracticable in peace conditions, its propaganda will quickly lose force. If the Allies intend making peace, as apparently they do, it is high time they said so without equivocation or beating about the bush with talk of dealing through co-operative societies.

Turkey and Bolshevism.

In the *Daily Telegraph* of April 7 Mr. Perceval Landon has some interesting comments upon the possible fusion of Islam and Bolshevism. He writes:—

No two creeds could be more opposed than those of Islam and Bolshevism, except in two significant particulars—the aptness to shed blood, and the infinite obedience to orders which alike characterise the faith of Mohammed and the propaganda of the North. They are two qualities that make for trouble in such a time as this, when the obedient nature of the Turk has degenerated in political life into mere terrorised submission, and his blood-callousness has permitted him to watch without emotion the continual slaughter of defenceless people in Armenia.

Upon such material Bolshevism can work; she asks for no better. There will be no drawing back for Turkey if once the meshes of the new anarchy are thrown over her. In other settlements the fabric of modern life, law and trade, upon which the prosperity of the Central Empires rested, and must always rest, has helped in an enormous degree in the tasks both of drafting the settlement and of compelling its acceptance. No other life than that of membership of the European comity of nations is possible to Germany, Austria, Hungary, or Bulgaria. But the case is different with the semi-civilisation of the Ottoman territories. We have to look warily at the chances that are offered to them of slipping back into a purely Eastern life—of Eastern standards, Eastern morals, Eastern aims. It may be that this is the best thing that can happen to the Turks. But if this is the case they cannot at the same time retain their footing in Constantinople. Here the kernel of the problem lies. If the Turk is to remain in Constantinople he must accept in a measure which so far has been quite unfamiliar to him the burdens, responsibilities and restrictions which are as much a part of our Western civilisation as its privileges and its material prosperity. Turkey must be ready to take her share in the protection of human life and progress against Bolshevism. If she will not do this, she must be content to retire to her old territory across the Bosphorus, and be reckoned again as a purely Oriental Power. If, in short, she will, for her own sake and for that of the European connection which she values so highly, co-operate with the Allies in stemming the Bolshevik flood, she will have justified those who plead for her retention as one among Western peoples. If she refuses to do so, she will have pronounced her own exclusion from the society her membership of which she has been proud to boast.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultán after Sultán with his Pomp
Abode his Hour or two, and went his way.

I do not wish to prove myself one of those people who "rush in where angels fear to tread," so I carefully refrain from commenting on recent developments in regard to Home Rule—for Ireland, I mean! But I simply cannot refrain from referring to a statement reported by *The Times'* New York correspondent to have been made by De Valera; for it concerns Mesopotamia, and I think I may safely claim to have a better acquaintance with that country than De Valera has. According to the correspondent quoted, De Valera, in the course of one of his speeches, declared that "the English ordered the Irish divisions to Gallipoli and Mesopotamia for the fell purpose of having them exterminated," and went on to say that:—

> "In Mesopotamia, for instance, an official order forbade soldiers to leave their barracks between 8 a.m. and 5 p.m., because it was death to move in the heat. In the face of this order, 1,100 Irishmen were marched at noon to a point forty miles distant. There were no Turks there; 400 Irish died on the march. The next morning they were ordered back. Of the 1,100 not one lived to see the post they had left. Yet not a shot had been fired."

It would be interesting to know who supplied Mr. De Valera with these interesting "facts." It would be even more interesting to know how he can have the face to pass such rubbish on to an American—or any other—audience.

***

Now, when I was in Mesopotamia I was not confined to my quarters between 8 a.m. and 5 p.m. at any time of the year. I used to move about, and pretty actively too, at all hours, except from about noon to two hours later at the hottest part of the season; and so did a good many other Englishmen. Moreover, the American expedition at Niffer, which is in the centre of the plain, carried on work throughout the hot season, and, unless I am mistaken, so did the Germans at Hillah. And all that hardly looks like it being "death to move in the heat." Would Mr. De Valera wish us to believe that Irish soldiers are especially delicate? The Turks and Arabs did not find them so; and I never heard of their wanting their mothers with them to tuck 'em up at night; so, I conclude, they could probably stand what English, Scottish, and Welsh troops could—and did. Again, it seems to me that if any body of troops started a forty-mile march at noon, the worst of the heat must have passed away by the time they had done, say, twenty or twenty-five miles. And—— But why proceed? The next time Mr. De Valera's bile gets the better of him he had better pitch a more plausible story. As it is, it looks as if he was a dead cert for the Ananias Stakes.

***

A cynical chemist, who had been talking about the merits and demerits—chiefly the demerits—of patent medicines, once said to me: "For sheer credulity there is no public to touch the American. I lived in the States some years, and I know what I'm talking about." Be that as it may, it certainly looks as if the American public, or a section of it, was fairly easy to mislead regarding Near Eastern affairs—probably because most Americans take but litte interest in them. Otherwise why should Mr. De Valera go out of his way to tell such silly stories about the Mesopotamian climate? And how came the New York *American* to be spoofed so badly about the non-existent Anglo-Turkish Treaty? It is the more remarkable that it should have allowed its leg to be pulled so badly with regard to a story that was floated, and contradicted, of course, a couple of months ago. But Mr. Hearst's paper does not appear to be very particular what sort of mud it slings at Great Britain!

CORSAIR.

TOPICS IN PARLIAMENT.

House of Commons.

The subjoined headings are those given in the official report:—

PEACE TREATIES: Turkey. INDIA: North-West Frontier Operations (Casualties). BRITISH ARMY: 1914 Star (Nurses in Malta). (April 12.)

INDIA: Civil Veterinary Service.—Punjab Legislative Council.—Privilege Leave.—Government Treasuries (Rouble Notes).—Deobund Arabic School.—Border Districts. CEYLON (REFORM OF CONSTITUTION). PALESTINE (DISTURBANCES). TREATIES OF PEACE (AUSTRIA AND BULGARIA) BILL (April 14).

JERUSALEM (DISTURBANCES). CONSTANTINOPLE (OCCUPATION). EGYPT (MILNER REPORT). INDIA: Khalifate Delegation (Sjed Hassan).—Government of Burma Bill.—Temporary Army Nurses (Gratuity). (April 15.)

MUSICAL NOTES.

It would be interesting to know the opinion of Near Eastern readers upon contemporary English music, for, though it would almost certainly be low, it is doubtful whether it would be lower than that of the British people themselves. The English composer is in a most unhappy position, for he is a prophet honoured in no country. To this it may, and by some surely will, be said that he deserves to be unhappy, simply because he is no prophet, and that he is merely an overseer who perhaps knows his business but obviously does not know his art. For such people the correct answer, if they are foreigners, is to show them, and to keep on showing them, the works of such men as Elgar, Bantock, or Delius; and if they then still refuse to believe they must be regarded as as hopeless as the British public. For even in these days one would risk one's last-but-one pair of boots in defending, say, Elgar's first and second Symphonies, Bantock's Hebridean Symphony, and "The Village Romeo and Juliet" of Delius.

These remarks of disillusioned indignation are prompted by the appallingly bad attendance at the Elgar concert at the Queen's Hall on April 12, when the Royal Albert Hall Orchestra, under Mr. Landon Ronald, played the Symphonic Prelude "Polonia," the second Symphony, and the Enigma Variations. Let it be admitted at once that "Polonia" is poor stuff. It was written in aid of the Polish Victims' Relief Fund in 1915, and, like all the occasional stuff that was thought of during, rather than inspired by, the war, it should be consigned to a decent oblivion. But the Second Symphony and the Enigma Variations are as far removed from "Polonia" as Beethoven's Ninth Symphony is from his first. They were well performed under Mr. Ronald, the work of the strings especially being excellent. Mr. Gervase Elwes sang two Arias from the "Dream of Gerontius" and a couple of Elgar's songs, including the noble "The River" (the words of which are taken from an Eastern European folk-song), as he alone can, or, more accurately, as he alone does. From the point of view of the pessimist, who looks inward to guess the future and concentrates on individual happiness, this concert was most enjoyable; but for the optimist it was most disappointing in its failure to attract the multitudes.

During the interval which we now suffer before the return of the Opera to Covent Garden and of the Russian ballet, we have as a partial consolation the return of Pavlova. At Drury Lane Theatre, on April 13, she and her company indulged in some dances that had a definitely Near Eastern interest, for, apart from the fact that her conductor, M. Stier, is a Yugoslav, there were as *divertissements* some Greek dances by Brahms, and the Syrian dance from Saint-Saëns' "Samson and Delilah." The orchestra under M. Stier was never better than fair, and sometimes a good deal worse, but Pavlova's dancing, more especially when she had the stage to herself, was a great joy. In Saint-Saëns' "Le Cygne" she is still, as she was before the war, incomparable, and her spirit and speed in the same composer's Syrian dance were admirable. Her miming in "Amarilla," a ballet in one act, by Glazounov and Drigo, in which an excellent old French tune, "J'ai du bon tabac," has been put to little use, did not grip one at all, and it is doubtful whether she is more than a very great dancer. The most appealing thing of the evening was the simple and utter grace of Brahms' Greek dance, in which nine ladies took part, for both its internal and external forms were unforgettable. The audience were enraptured by their repossession of Pavlova.

Foreign artists are coming in fairly plentiful numbers to this country now, and on April 14, at the Wigmore Hall, we had the "celebrated Spanish violinist," M. Manuel Quiroga, making his first appearance in England. Without question he is a most gifted player, and although he chose the unusual method of leaving us in the dark when he played, he certainly did not leave us in the dark in regard to his genius. The first thing he played—Tartini's "Devil's Trill"—can be treated in more or less any way you like: there can be no orthodox way of treating it. Unlimited scope was therefore afforded to his individuality, and a performance with more mastery over technique and a richer tone I do not remember having heard. His playing of Bazzini's "La Ronde des Lutins," and the "Danza Española" of Granados was equally exhilarating. But his wanton methods, however free and masterly, made one feel very uncomfortable in Mozart's "Concerto in D," for he bent the rhythms beyond recognition, and the fragility of eighteenth century forms was taken advantage of in unwarrantable fashion. M. Quiroga is a most interesting player, but there are rules in the playing, if not in the composition, of music, that cannot be broken. However, in spite of all his transgressions, his playing of Tartini put him incontestably in the list of forgiven geniuses.

The violin recital of Miss Margaret Fairless, at the Wigmore Hall, on April 15, was particularly interesting for its introduction of J. R. Heath's "Three Macedonian Sketches, for Violin and Pianoforte." These sketches consist of three pictures, "Salonika in the Sun," "An Old Shepherd at Sundown," and "Vodena Market," and they are all very pleasing indeed, being infused, but not overwhelmed, with local colour. The chattering bustle of "Vodena Market" is especially invigorating, but the three pieces alike were played with admirable spirit and verve by Miss Fairless. The same splendid sense of rhythm was shown in Bach's Adagio and Fugue in C Major (unaccompanied), and in Chausson's "Poeme," and compensated for a slight incompleteness of technique. Miss Fairless has not yet finished learning, but she is already a quite accomplished and sincere artist.

Mrs. Ursula Greville's last song recital for this season took place at the Æolian Hall on April 15. I have already commented in these columns upon her achievements and possibilities, and about her last recital, in which she was a good deal below her best form, there is little to be said. I still adhere to the opinion that her future does not lie in operatic singing (although unfortunately I was unable to be present at her first appearance at Covent Garden recently in "The Magic Flute"). She sings lyrics and songs of the folk-song nature extremely well, with truth and colour and naturalness. Her musical understanding is vast, but the pursuit of operatic technique would be a barren one for her. If she remains on the concert platform, her future is as certain as it is deserved.

I am obliged to hold over until next week an account of the Bach Festival, which was carried on from April 16 to April 20.

ANDANTE.

A HINDOO FOLK-STORY.

(FROM A CORRESPONDENT.)

It is not often that my instincts direct my steps to a meeting of the Royal Institute of British Architects, and when they do I do not expect to listen to a Hindoo folk-story; I rather anticipate coming away with my head aching with all the learned talk about architraves, pylons, *voussoirs*, and other mysteries, strange-sounding to the inexpert layman. It was all the more delightful accordingly when on the occasion of his distributing the prizes to students recently, the President (Mr. John W. Simpson) told the following story. Some readers may be familiar with it; I hope they will pardon its appearance for the sake of those to whom it is strange:—

"In the beginning, when Twashtri came to the creation of woman, he found that he had exhausted his materials in the making of man, and that no solid elements were left. In this dilemma, after profound meditation, he did as follows: he took the rotundity of the moon, and the curves of creepers, and the clinging of tendrils, and the trembling of grass, and the slenderness of the reed, and the bloom of flowers, and the lightness of leaves, and the tapering of the elephant's trunk, and the glances of deer, and the clustering of rows of bees, and the joyous gaiety of sunbeams, and the weeping of clouds, and the fickleness of the winds, and the timidity of the hare, and the vanity of the peacock, and the softness of the parrot's bosom, and the hardness of adamant, and the sweetness of honey, and the cruelty of the tiger, and the warm glow of fire, and the coldness of snow, and the chattering of jays, and the cooing of doves; and compounding all these together he made woman, and gave her to man."

That was as much as the President told in his first address, and he made it seem apposite to the occasion by making comparison between the art of architecture and woman; but afterwards, when a vote of thanks had emboldened him, he referred to the subject again. The audience, he said, might have noticed in the above short catalogue of qualities a rather remarkable omission In the list of elements that went to the compounding of woman there was no reference to intelligent inquiry, or, as it was vulgarly called, curiosity. He did not think the Hindoo poet had left this out by inadvertence, but designedly, because the quality was common to both sexes. He went on to complete the story somewhat as follows:—Twashtri completed his work and handed it over to Man, who took it away, but in a week came back and said, "Lord, this creature that you have given me makes my life miserable. She chatters incessantly and teases me beyond endurance, never leaving me alone. She requires incessant attention and takes up all my time. She cries about nothing, and is always idle. I have come to give her back to you again." Twashtri said: "Very well," and took her back. But after another week Man came again to him and said: "Lord, I find life very lonely since I gave you back that creature. I remember now she used to dance and sing with me, look at me out of the corner of her eye, and play with me. Her laughter was music, she was beautiful to look upon and soft to the touch; pray give her back to me again." Twashtri gave Woman again to Man, but after only three days this time back came Man saying: "Lord, I know not how it is, but after all I have come to the conclusion that she is more of a trouble than a blessing; so please take her back." But Twashtri replied: "Out on you. Be off. I will have no more of this. You must manage how you can." Then Man said: "I cannot live with her." Twashtri replied: "Neither can you live without her;" and he turned his back on Man and went on with his work, while Man lamented: "What is to be done, for I can live neither with her nor without her?"

NEAR EAST BOOKSHELF.

I.—"THE QUESTION OF THRACE, GREEKS, BULGARS AND TURKS." By J. Saxon Mills, M.A. and Matthew G. Chrussachi, B.A. (London: Edward Stanford, Ltd. 2s. 6d.)

II.—"MRS. WARREN'S DAUGHTER." By Sir Harry Johnston. (London: Chatto and Windus. 7s. 6d. net.)

I.—SETTLEMENT BY MAP.

"Oh . . . that mine adversary had written a book." But if Job had belonged to the Balkans he would have been still more pleased if his enemy had published a map or a series of maps. This is what Dr. Rizoff, Bulgarian Minister at Berlin during the war, did in 1917, and he cannot, and probably does not, grumble at the Greeks seizing upon the publication to substantiate their claims to Thrace. Dr. Rizoff, it so happens, propounded a good many other theories with his maps; he was concerned to assert Bulgarian claims against Serbia in the Morava and Timok Valleys, and against Roumania in the Dobruja; and he was careful not to hurt Greek susceptibilities in regard to Thrace; for Greece at the time of the compilation of the book had not declared war, although she took this step before the volume saw the light of day. At the time Dr. Rizoff was roundly denounced by a German savant for his inaccuracy and *parti pris*, and the wordy duel between the two provided the only comic element in German-Bulgarian relations. But *littera scripta* and the drawn maps remain, and a number of the latter have been reproduced in pamphlet form by Mr. J. Saxon Mills and Mr. M. G. Chrussachi, with annotations and an ethnological summary to prove "the preponderantly Hellenic character of Thrace."

The authors have done their work very well. Everyone with the most superficial knowledge of the Balkans recognises the value of hearing the other side, and he will be glad of the opportunity of comparing the Greek and the Bulgarian case. The latter was presented to the Paris Conference in a series of memoranda. Those most germane to the question of Thrace were entitled "Note on Western Thrace" and "The Ethnic Character of Western Thrace according to Greek Official Testimonies." From the latter it would appear that the other adversary had also written a book. In this particular memorandum we read:—

From these official testimonies which we offer, it appears that until a few years ago the Greeks themselves admitted the Greek population in Western Thrace to be an insignificant minority, surrounded by Bulgarians. They acknowledge in these documents that the greater part of their schools had been opened in purely Bulgarian villages with the object of Hellenising their inhabitants.

And the memorandum ends on this triumphant note:—

In other words, the Greek statistics themselves establish that the Bulgarian population in Western Thrace is appreciably more numerous than the Greek population.

For the benefit of the uninitiated it may be pointed out that national statistics in the Balkans is a game of chess with all the pieces of one colour and of the same shape, whose individual identity as queens, pawns, etc., depends on the physical capacity of the player at the moment to establish his particular contention regarding them.

In these circumstances the average Westerner is tempted to leave the dead past to bury its dead. He wants peace in the Balkans. If the Greeks are given Thrace their claim will be substantiated or invalidated by what happens in the future and not by ancient maps. But it does not detract from the admiration in which Greece is rightly held to urge that a narrow strip of sea coast is of little use without the hinterland, while permanent peace, goodwill, and economic co-operation between the different States of the Balkan Peninsula are worth more than the acquisition of many square miles of territory.

II.—RECOMMENCING FROM THE END.

A year or so ago Sir Harry Johnston, whom until then we all had regarded as a traveller and geographer, especially as an authority on Africa, rather startled us by producing a novel called "The Gay Dombeys." That novel was a continuation of one of Dickens' novels, and the experiment was looked upon as a joke. But it is more than that when he founds a novel upon one of Mr. Bernard Shaw's "Unpleasant" plays—"Mrs. Warren's Profession." As all readers of the most popular of living British dramatists will remember, the story of Mrs. Warren and of her daughter Vivie was left with them both living, but it was for all interesting purposes finished. Sir Harry, however, does not think so, and he takes up the tale where (though not as) Mr. Shaw left it.

We are shown Vivie Warren at the beginning of this novel in partnership with another girl; these two are engaged in a business which is designed to prove that women are just as capable in affairs as men. In order to prove this fact more clearly Vivie lives for a time as a man and enters the Bar. Owing to a passionate hatred of most men, derived from the unfortunate circumstances of her birth, she becomes one of the leaders of the Votes for Women crusade, and the recent history of the Suffragette campaign is recounted by the author with a knowledge and feeling that for all purposes but that of literature are admirably effective. Vivie continues her strange existence until the European war, which she passes through at Brussels. After the Armistice she again meets the man, whom when a husband, she had always loved and whom as a widower (his wife being conveniently killed by a German bomb in Portland Place) she now marries. More or less at this point (about the 400th page) Sir Harry leaves the story, but, as he says, there is no earthly reason why the story should stop here: and he generously adds that he would not mind in the least were some other author to take up the story where he has left it.

For ourselves, we fervently hope that no one will add to the history of Vivie Warren and her circle. Sir Harry's task must have caused him an immense amount of fun, for it is full of cleverness, which, though rather condemnable than commendable, never flags; but when we close his book on Vivie's career it is with a sense of weariness that no more cleverness could assuage. We admit that there is no argument against the continuation of one man's story by another; all that can be said is that the results are not satisfactory.

In this puzzled age of frankness we have no doubt that the "outspoken" comments in "Mrs. Warren's Daughter" upon such "burning" questions as Femininism, Militarism, Social Morality, and so on, will be read by everybody; the book will, in fact, become a fashion. To be literature, however it has no right to claim; and we suspect that its life will be as long as the memories of those who read it from any motive other than duty.

BOOKS RECEIVED.

"The Kassayid of Said Ibn Armili." (London: Kegan Paul, Trench, Trubner and Co. 4s. 6d. net.)

"The Fringe of the Desert." By R. S. Macnamara. (London: Herbert Jenkins, Ltd. 2s. net.)

"Life of Lord Kitchener." By Sir George Arthur. (London: Macmillan and Co. £2 12s. 6d. net. 3 vols.)

"By Nile and Tigris." By Sir E. A. Wallis Budge, Kt., M.A., Litt.D. 2 volumes. With illustrations. (London: John Murray, £3 3s. net.)

"Stevenson's Germany." By C. Brunsdon Fletcher. (London: Heinemann. 12s. net.)

"The Initiate: Some Impressions of a Great Soul." By His Pupil. (London: G. Routledge and Sons. 7s. net.)

We have received from His Majesty's Stationery Office a copy (price 4s. net) of the agreement between the United Kingdom and Belgium respecting boundaries in East Africa (Mount Sabinio to the Congo-Nile Watershed). The maps illustrating this treaty are excellent.

NEAR EAST BOOKSHELF.

New publications not having a special Near Eastern interest are referred to in "The Week at Home."

A PRISONER IN TURKEY

By JOHN STILL,
Author of "Poems in Captivity."

The author of this remarkable book was largely instrumental in conveying to the British Government, by messages, in an ingenious code of his own invention, sent at considerable personal risk, very valuable information regarding the treatment of British prisoners in Turkey. In this book, which is an account of over three years' imprisonment in Turkish hands, at Constantinople and at Afion Kara Hissar, Mr. Still gives a very forceful and vivid account of the trials, sufferings and dangers through which he and his fellow prisoners passed.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. April.	1920. April		1338. Shaban.	5680. Iyar.
22	9	Thursday	3	4
23	10	Friday	4	5
24	11	Saturday.....	5	6
25	12	Sunday	6	7
26	13	Monday	7	8
27	14	Tuesday	8	9
28	15	Wednesday	9	10

M. Clemenceau left Alexandria for Marseilles on April 16.

Lord Inchcape arrived at 4, Seamore Place, on April 18 from the Continent.

The Maharaja of Alwar will arrive in London early next month from India.

Lotfallah Bey, the Syrian representative in Europe, arrived in London on April 18 from Paris.

Lord Oranmore and Browne has arrived at 12, Cavendish Place from Castle Macgarrett, Co. Mayo.

Mgr. Cherubini, the new Papal Nuncio to Belgrade, was received on April 6 by the Prince Regent.

The Minister for the Kingdom of Serbs, Croats, and Slovenes arrived in London on April 13 from Paris.

The British Government has officially recognised the Sultan's infant son, Faruk, as heir to the Sultanate of Egypt.

The Indian Caliphate Delegation has left London for Paris and Rome to place its case before the Ministers and peoples of the French and Italian nations.

The Earl of Lytton, accompanied by Mr. Savile, Mr. Grahame, and Viscount Knebworth, has left London for Malta, and will be away about three weeks.

Sir George Grierson and Professor W. M. Lindsay have been appointed Fellows in the historical and philosophical class of the Royal Danish Society of Science.

The marriage will take place on April 29 at St. Margaret's Church, Westminster, at 2.15, of Sir Edward Boyle to Miss Beatrice Greig, sister of the Archdeacon of Worcester.

The Crown Prince of Roumania was due to arrive in Bombay from Ceylon on April 20. He is expected to visit Agra on the 24th inst., and Delhi on the 26th. Simla he should reach on the 30th.

A second deputation, consisting of Hindu and Moslem leaders, representative members of councils, is shortly sailing for England to discuss the Khalifate question.

General Booth arrived on April 16 at Colombo, and was accorded an official welcome on the quay by the Governor's A.D.C. and the Mayor of Colombo. He left for Australia and New Zealand on April 19.

Among the appointments sanctioned by the King to the Order of the Hospital of St. John in Jerusalem in England appears, as a Knight of Grace, Lieut.-General Sir G. F. Milne, G.C.M.G., K.C.B., D.S.O.

Lady Leconfield and Miss Dorothy Rawson have returned to England from Algeria. Lord and Lady Leconfield and Miss Rawson will shortly be in residence at 9, Chesterfield Gardens, which was lent during the war as the American Officers' Club.

Sir Lancelot Sanderson, Chief Justice of the Calcutta High Court, has come to England on leave, and Sir Ashutosh Mukerjee has been appointed to officiate for him. He is the third Indian to fill the acting position, and there have been similar cases of acting appointment in the Madras and Bombay High Courts.

The following Indian representatives have been appointed to the Advisory Committee to discuss arrangements for the tour of the Prince of Wales to India: The Maharaja of Gwalior (Hindu), the Maharaja of Bikanir (Hindu), the Maharaja of Patiala (Sikh), Mr. Banerji (Brahmin), Sir Unar Hyat (Moslem), Sir Densha Waeha (Parsee).

The King's Indian Orderly Officers for this year, Risaldar-Major Sukhdyal Singh, 12th Cavalry; Risaldar-Major Balwant Singh, 27th Light Cavalry; Subadar-Major Padan Singh Rewat, 4/39th Garhwal Rifles; and Subadar Tilok Singh Sauntiyal, 2/39th Garhwal Rifles, are due to arrive at 49, St. George's Road, Pimlico, S.W.1, on April 20. The British officer in charge will be Lieutenant-Colonel J. G. McConaghy, D.S.O., 25th Cavalry.

The following form the executive committee of the Christ Church, Constantinople, War Memorial:—Mr. A. T. Waugh, C.M.G. (chairman), Lieut.-Commander F. H. Ruxton, R.N.V.R. (hon. secretary), Major J. C. Thomson, R.M. (hon. treasurer), Rev. R. F. Borough. Rev. J. L. Findlay, D.S.O., S.C.F., Lieut.-Colonel R. W. Graves, C.M.G., Mr. H. P. Kerney, Rev. R. J. P. Peyton-Burberry, R.N., Mr. A. Silley, Lieut. C. Tucker, R.N.V.R., Lieut. G. M. Vernon, R.N.V.R. (assist. secretary), Vinicombe Pasha, Mr. F. Douglas Watson (assist. treasurer), and the Rev. Canon F. C. Whitehouse. Particulars of this fund were given in THE NEAR EAST of April 15.

APPOINTMENTS, ETC.

Captain Panas has been appointed Naval Attaché to the Greek Legation.

M. Bogoljub D. Jevtitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has been appointed Secretary to the Foreign Office at Belgrade.

The King has been pleased to approve the appointment of Mr. Charles Gordon Hill Fawcett, I.C.S., to be a Puisne Judge of the Bombay High Court in succession to Sir John Heaton, I.C.S., who is retiring from the Bench this month.

The King has approved the appointment of Mr. Shadi Lal, barrister-at-law, Puisne Judge of the High Court at Lahore, to be Chief Justice of the Court, in succession to the late Sir Henry Rattigan.

OBITUARY.

The death occurred at Cape Town on April 13 of Major Sir Hamilton Goold-Adams, who was High Commissioner for Cyprus from 1911 to 1914.

Mr. Francis Herman Lucas, C.B., C.V.O., Financial Secretary at the India Office, died on April 13 from typhoid fever, at his house in Oakley Street, Chelsea. Mr. Lucas was appointed a junior clerk in the Financial Department of the India Office in 1901. He had served as assistant private secretary to several Secretaries of State for India, and as principal private secretary to Viscount Morley, the Marquess of Crewe, and Mr. Austen Chamberlain during their tenure at the India Office. Mr. Lucas, who was appointed Secretary in the Financial Department in 1917, was given the C.B. in 1911 and the C.V.O. in 1917.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

MINING ENGINEER, M.I.M.M., open to any proposal. Can interest capital. Knowledge interests in Near East. Box No. 156, NEAR EAST, 1, Devonshire Square, E.C.2.

EX-OFFICER, 22, Public School, University, service Egypt, Palestine, desires suitable Employment Near East.—Apply, Box No 162, "The Near East," 1, Devonshire Square, E.C 2.

DEMOBILISED Officer, 4½ years' overseas service, Major Administrative Staff, educated public school and university, age 35, possessing tact, administrative and organising abilities, urgently desires Appointment in any capacity; willing to go abroad, preferably Near East.—Box No. 161, THE NEAR EAST, 1, Devonshire Square, E.C.2.

WIDOW of Professional Man, with boy (5), would like Charge another Child; or other Position of Trust. Would go abroad. No salary.—Box No. 160, THE NEAR EAST, 1, Devonshire Square, E.C 2.

THE SEASON IN EGYPT.

(From Our Social Correspondent.)

Cairo, March 26.

An Investiture.

A very interesting ceremony took place at the Residency on Saturday afternoon, when the High Commissioner held an investiture. The ceremony took place in the gardens on the Nile bank, and, in addition to the recipients, there was quite a little gathering of relatives and friends. Lord Allenby addressed the assembly, and after reading out the letters patent, proceeded to hand the insignia to the recipients in the last Honours List. A picturesque touch was given to the proceedings by the presence of several Egyptians amongst those receiving the insignia. Lord and Lady Allenby, after the purely formal part of the ceremony, moved about among their guests, whom they afterwards entertained to tea. Lord and Lady Furness, Lady Drogheda, and Lady Sarah Wilson, who are making a yachting trip, have been the guests of Lord and Lady Allenby, whom they accompanied to the Gezira Races.

Prince Carol of Roumania.

The Crown Prince of Roumania had a busy time on his return from Upper Egypt. Among other enjoyments, he had an audience with the Sultan, reviewed the Egyptian Army at Abbassia, paid a long visit to the Muski, where he attracted large crowds of natives, and went several times to the opera. He then made a trip to Ismailia, where he was the guest of the Count de Serionne, and where he spent two days. After that he proceeded by canal to Port Said, where he embarked on the P. and O. for India and the Far East.

Two Pleasing Functions.

Another successful fancy dress ball was given at Mena House, which was very artistically decorated for the occasion. A large number of people motored out from Cairo—in fact, there was an endless stream of cars along the Pyramid Avenue both before and after the dance—and the resources of the dining-room were taxed to their utmost. The costumes were really very beautiful, and many of them strikingly original. Among those who have been staying at this hotel have been the Hon. John Collier and Mrs. Collier, Sir Valentine Chirol, Judge Marshall, General and Mrs. Morris, and Colonel Arkwright.

Judge and Mrs. Crabites gave a most enjoyable "at home" the other day at the Continental, where one of the reception rooms was reserved for the occasion, and everything was done in excellent style. Amongst the many friends who looked in during the afternoon were Lady Harvey, Lady Congreve, Sir Murdoch and Lady MacDonald, Mr. and Mrs. Farnall, Lady Palmer, Sir William and Lady Brunyate, Lady Stradbroke, and most of the Mixed Bench, of which Judge Crabites is a distinguished member.

Agricultural Show.

An excellent agricultural show was held in the Ezbekia Gardens on Friday, and attracted a large number of visitors, including the High Commissioner and Lady Allenby. The exhibits were very numerous and really good; the vegetables and fruits were specially fine, some of them being of enormous size, whilst the flower exhibit was exceedingly beautiful. An interesting side-show was the exhibit of insect pests common in this country and harmful to agriculture in general, whilst a hive of bees showing the various cells for the drones, the workers, and the queens attracted much attention.

A manifesto has been issued by anti-Venizelists and supporters of ex-King Constantine, asserting that the present Parliament is not constitutional, and asking for fresh elections.

The new Bulgarian Chamber opened on April 16. M. Stambuliski, the Premier, takes the portfolio of Foreign Affairs, M. Daskaloff that of Finance, and M. Athanasoff those of Commerce and Labour, in place of the three Agrarian members who have resigned.

PROPERTY FOR SALE.

IN COUNTY OF KENT.—FREEHOLD, £12,000.—A gentleman's well-planned MODERN RESIDENCE, containing 6 bedrooms, with excellent offices and outbuildings, including garage, stabling, and three cottages, all in good repair; tennis lawn, rock garden, etc., and 22 acres of young fruit plantations, highly cultivated and in profitable bearing condition. The house is so arranged as to admit of its being added to at comparatively small expense. Situation—300 feet above sea level, on a slope facing due South. Perfect natural drainage, the soil being of a loamy character overlying the ragstone formation; 2½-3 miles from two railway stations, 3 from golf links, and 30 from London. Close to Church, Post Office, and Auto-Car Service. The district is particularly favourable for fruit growing, and opportunities but seldom occur for acquiring a property of such exceptional character.—Write Box "Z," THE NEAR EAST, 1, Devonshire Square, London, E.C.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added),"

which would indicate that two rooms were required at Matlock on the 20th of the month.

THE STATES OF INDIA.

The public have been told so much during the last few years of the momentous changes in the constitution of British India that even careful students may be led to think that these changes apply immediately and directly to the India which they see in maps, and to overlook the extensive areas which in such matters depend neither on Delhi nor on Westminster, but take their orders from rulers of their own. Yet these States make up in the aggregate no small portion of India: they cover two-fifths of the map, and comprise nearly a quarter of the population. Scattered as they are over the whole country, they include representatives of all the various sections of the Indian people; and while their thoughts and feelings commonly receive but scanty notice in the Press, they can never be left out of account by anyone who wishes seriously to know what India means. Let us see then what these States stand for in the world to-day. At first sight they suggest only infinite variety. Far to the south there is Mysore, representing in some sort the old Hindu polity, but now claiming to lead the way in many forms of modern culture. Near to it lies the premier State of Hyderabad, a relic of the northern Moslem power, at one time ranking with Delhi and Lucknow as a centre of all wickedness and intrigue, but to-day characterised more appropriately by sound and sagacious statesmanship. Further north we come to the Maratha powers, the fruit of almost the last great political upheaval which India has experienced—Baroda, known for eager experiments in education and in social betterment; Gwalior, marked by far-reaching schemes of economic development, pushed with a vigour which might put British councillors to shame; and Indore, less conspicuous at the moment, but enjoying a well-deserved reputation as a pioneer of administrative efficiency. Flanking these newcomers, as they may almost be called, we have in Rajputana some of the oldest political entities in India. It is a stark land, hard to win and harder to keep, poor in this world's goods but rich in men, and character rather than intellect is its contribution to the common stock. Northward again we have the Sikh States, outstanding representatives of military valour, and beyond them we reach at last the limits of the Empire in the mountain territory of Kashmir. Such are the leading States, and there are many others of less individual importance, but full of interest and variety to the observer who is fortunate enough to see them at close range. Could diversity, it may be asked, be carried further?

At the same time there is a fundamental unity which brings together Hindus and Moslems, Sikhs and Marathas, and justifies us in speaking of the States of India as a whole. They still stand for that idea of personal rule which is the very essence of the ancient Indian polity. The inspiration may derive from ruler or from Minister, but in any case it comes wholly from above. The tie subsisting between rulers and subjects may even now be compared with the tie which was familiar in the days of Akbar, and whatever the ruler's responsibility may be, responsibility to his subjects cannot yet be said to exist. A broad distinction has thus grown up between the States and the provinces under British administration. The middle classes, the outstanding products of our rule, have indeed come into being in States and provinces alike, but in the States they are at once less vocal and less influential: the voice of criticism is as yet little heard in public; the Press has developed less rapidly, and, where it has found a footing, is more sedate and less self-confident; the power of executive authority is greater, and it is probably the case that in these latter days the wheels of the administration run more smoothly. It is no part of our present purpose to determine whether in these matters the subjects of the States are at an advantage or a disadvantage; the question is one on which opinions differ widely, and we are content to insist on the distinction without attempting to evaluate it in terms of human happiness. As regards its origin, however, there is something which should be clearly realised at the present time: the States are more Indian than the provinces for the sufficient reason that the change in India is due to ideas which Britain has brought into the country, and it is inevitable that the effect of these should be most marked in the areas directly under British rule.

Two ideas in particular are worthy of attention from this standpoint. One of them is that which is known familiarly as the Rule of Law, the establishment of which has been Britain's most conspicuous achievement. There was nothing like it in India before the English came. An order was given, and it was carried out; if it was revoked the next day, there was room for neither objection nor surprise, for neither rulers nor subjects had taken the momentous step which transforms orders into laws. That step has been taken in the British provinces. The transformation is not indeed altogether complete, but it may now be taken as assured, and many of the more progressive States are following the lead which has been given, and gradually eliminating individual caprice from the forces directing the administration. The second formative idea is the subjection of rulers to their subjects, an idea which on the moral plane has for long governed the activities of administrators in the British provinces, and which has now received definite recognition in the constitutional sphere. It is unthinkable that India, left to herself, would have evolved a principle so diametrically opposed to the whole current of her history during a dozen centuries or more, and if Indians now welcome the prospect of responsible government, it is because for generations past British officers have been responsible in the forum of conscience, though not of law, to the masses of the people among whom they have held sway. How far this idea has penetrated the States is a question on which dogmatism would be out of place; the example we have set has not been without result, and its influence can be easily recognised, but at the same time the persistence of the older theory should not be underestimated, and the only conclusion which can safely be drawn is that, while substantial progress has been made, the responsibility of rulers is not yet a universally accepted principle in the States as it is in British India. We do not suggest that the States, or their rulers, are to be blamed for tardiness in accepting an idea so foreign to their past. Such changes require time, and at the present juncture their obvious part is not to pioneer, but to test, and weigh, and criticise. Nor would it be easy to overrate the importance of these functions. In the British provinces the educated classes are excited, we had almost said intoxicated, by the formal promulgation of the principle which we introduced, but which they have made their own. The States are not excited, though they are moved; they can take up an independent standpoint, and can weigh the new against the old; they can imitate, and they can improve our original designs; and we do not doubt that, as time goes on, they will contribute much of permanent value to the edifice we have in hand—a new India where the people rule by law. The administrator's dream of uniformity is not likely to be realised throughout the country; institutions and methods are bound to vary, but there are good grounds for expecting the gradual acceptance of the principles we have set up, and the establishment of a new unity not less widespread, and far more beneficial, than that which has passed away.

THE DRIFTING OF CENTRAL ASIA

By Ikbal Ali Shah.

Ameer Shair Ali having lost the battle against his nephew at Kelat-i-Ghilzai was biding the time in the citadel of Herat. "God being on my side," wrote Abdur Rahman, "Shair Ali was again defeated, and my forces occupied Kandahar in the autumn of 1867." His uncle had a feeling that Abdur Rahman had invoked more than the Divine assistance, and that the British Government also had helped him in his military achievements. Shair Ali did not disguise his feelings, and bitterly complained that a foreign Power should interfere in Afghan matters. While smarting under the defeat at Herat he is known to have said that "these affairs of Kabul and Bokhara, *Inshaullah*, will yet be the cause of breaking the Feringhi's back." His assumption was not correct, for such assistance was neither requested nor given, but the statement showed which way the wind was blowing on the troublous sea of Afghan politics of that time. The idea embodied in Shair Ali's words was generally entertained by the majority of the Afghans, excepting those immediately under the shadow of Kabul.

Over fifty years have elapsed since then, and Central Asia has passed through many political ups and downs, but all the changes have not altered the nature of what Shair Ali had said. The Middle East, always a region of surprises, might well upset the British political equilibrium if this country, in face of the present grave Asiatic menace, should elect to follow a policy of masterly inactivity. Events of the last three years have proved—if proof were needed—that to let Central Asia severely alone, or, worse still, to make half-hearted attempts to solve Mid-Eastern problems, must reflect disadvantageously on the whole Bokhariot and Afghan questions. To treat of the Afghans' love of their free existence would be to emphasise the obvious, and with the Bolshevist shadows already beginning to extend beyond the Safaid Koh, the Afghans and the British cannot maintain an attitude of indifference.

Whatever the causes which led to the friction, the results of the last Afghan war are the imposition of a great strain on British diplomacy in the East. Habib Ullah Khan, the late Ameer, was a very staunch ally of the British Government and no less a friend to his countrymen; Bolshevist propagandists could make no headway in his dominions; but his fall opened up an avenue for Russian enterprise. Had domestic jealousies and Court rivalries alone been responsible for Habib Ullah's murder we should have had a tale, old in the Orient, of promiscuous fratricide; but Kabul passed to the third claimant to the throne without much difficulty. Deeper policy underlay the assassination of the late Ameer and the motive power, in all probability, came from across the Oxus.

Old Russia was falling back everywhere; the Khanates had been liberated; "Red" forces had triumphantly entered Tashkent; at Yalatan the first Trans-Caspian Railway Battalion and the First Caucasian Rifle Battalion had been driven out; and at Kashkinski Post, where only twenty years before, Kuropatkin had hoisted the Imperial standard, the Soviet flag was now fluttering. Nor was this all, for the invaders had brought up, and held in reserve, a large stock of spare rails and railway plant to lay 70 versts of light military railway. At the time, this avalanche impressed the Afghans, and caused not a little stir in official circles in Kabul. But it was not in the Russians' programme to force Afghanistan on their way to India: they preferred more peaceful means just then. Peace between Afghanistan and Britain had been signed at Rawalpindi on August 8, and the third clause, which spoke of the subsidy, had been particularly significant, for it abolished all British control over the Afghan foreign dealings.

Whatever view be taken of British policy in continuing the subsidy to the Afghans before the war, it is certain that the money sent by the Indian Government to Kabul, although received with many thanks, was always regarded by thinking Afghans as undesirable wealth. "The British," Ameer Abdur Ramhan once observed, "do not give this money for nothing," and therein he said much. The Afghans did not like to accept the money, for they thought that a check had been imposed on their affairs and a price placed upon their freedom.

The acceptance of the subsidy was, therefore, unpopular, and when the Afghans learned that by the third article of the Anglo-Afghan Treaty "the arrears of the late Ameer's subsidy are furthermore confiscated, and also no such subsidy is to be granted to the present Ameer," they did not regard this as a penalty. They did not like the idea that the British Government paid these subsidies to the Ameer personally, not to the nation; and this feeling of self-assertion, though it be of only recent growth amongst the Afghans, has none the less influenced the issue very considerably. From the Afghan's point of view, he was subjected to an involuntary humiliation, and he welcomed the stopping of the subsidy. The British Government, for its part, should have no cause to be dissatisfied with the new arrangement, for a nation which would remain friendly only as long as it is bribed is unworthy of friendship. As it is with individuals, so also with the State: friendship to have any prospect of durability must be disinterested, or at least based on common interests.

As soon as the Afghan delegates had reached Kabul, the representatives of the Soviet Government in Tashkent sought the opportunity of opening negotiations with Afghanistan. Very soon M. Bravin arrived at Kabul with an escort of 70 men. This M. Bravin will be remembered as Nicholas Sakharovitch Bravin, who had been an official in the Russian Ministry for Foreign Affairs since 1904, and had at one time acted as Vice-Consul in Seistan. A *rapprochement* with the Soviet Republic seemed to the Afghans very desirable, and in due course an Afghan mission reached Moscow, and was received by the Bolshevists with considerable pomp. What was actually the theme of discussion in Russia at the time is as yet unknown; but the Afghan advance to Merv and the capture of that place is certainly a point over which Bolshevist permission and aid were sought. Barriers were now removed from the path, and Bolshevist friendship in time became an established fact.

It was beginning to dawn upon the Afghans, that unless they took steps to meet the danger it would not be long before they might experience results of a blockade on the Indian side. It appears that the various steps which they have taken since signing the last Peace Treaty with this country, to improve the people and establish foreign relations, are the only means of maintaining their national solidarity. The best explanation of the Afghan response to the Bravin mission, lies in their need of economic expansion. For, however small the Central Asian import and export trade, it must be carried on, and with the Indian door closed to them, they have evidently created an outlet in the region of the Caspian Sea. Human demands must be satisfied.

Before discussing why the Bolshevists won the sympathy and armed assistance of the Khanates and Afghanistan, let us first notice what was the condition of affairs in those countries. It is that situation which alone is responsible for the success of Bolshevism in the Middle-East. Tsarist Russia was detested throughout Central Asia, and as soon as the strong grip of the military occupation was relaxed, the Khans of Kiva and Bokhara declared themselves independent. The Kerghiz and the Turkomans did not know who was their ruler; Turkestan and Transcaspian provinces were left at the mercy of whosoever was the stronger party. But, although the Central Asian States had shaken off the old Russian yoke, they were not fit to offer any strong opposition to a regular invading army, their military strength having sunk considerably: and they could not by any stretch of imagination be called an active fighting race.

In Afghanistan matters on the borderland had produced strained relations with India, and it was made clear that from the British side, they should expect very little now; they were, to all intents and purposes blockaded on their Eastern borders. Cries for help against the British were raised on the North-West Frontier Province of India by the Borderland tribes; and last of all, the fall of Turkey had convulsed the Moslem

Digitized by Google

world. Constantinople, however distant, was the Turanian centre; also the Khalifa resided there, making it the seat of Islam; and the Pan-Turanian and Pan-Islamic movements having fused together, began to reflect on the destinies of the Moslems all over the world. This was more actutely felt in Central Asia than elsewhere, for local conditions conspired to throw remote incidents into great prominence.

(To be continued.)

VICTORIA AND ALBERT MUSEUM.

The above Museum has recently made some important acquisitions to its collection. Among those of special interest to readers of THE NEAR EAST are the following:—A terracotta head of a man, given by Sir Charles Marling, K.C.M.G. This is of Persian origin, and dates, perhaps, from the 12th century. A Persian (Feroghan) rug in woollen pile, of 18th or 19th century date, part of the bequest made by the late Mr. B. H. Webb; a number of tapestry-weavings (medallions, squares, and bands from tunics) found in burying-grounds in Egypt, and presented by Sir Charles and Lady Walston; they range in date from the 3rd to the 8th century; and two embroidered valances from the Greek Islands, selected from a large collection given by Mr. A. J. B. Wace, "as thank-offering for the victorious peace": the rest of Mr. Wace's gift is exhibited in Room 119 on the first floor. A specially important gift from the Near East is the deep hanging richly embroidered with coloured silks on linen, presented by Mrs. Lister; it is Cretan work, probably of the 18th century.

NEWS IN BRIEF.

A meeting of the Balkan Committee was held on April 13. Mr. Noel Buxton was in the chair, and among those present were—Sir Edward Boyle, Sir George Greenwood, Lady Boyle, Mr. C. R. Buxton, and Miss Edith Durham. The question of Thrace was discussed, and the following resolution carried:—"The Committee reaffirms its opinion that the best solution of the question of Thrace, in the interests alike of the Great Powers and of the Balkan peoples themselves, would be the establishment of International control under the League of Nations."

The *Morning Post* Cairo Correspondent states that Shem-en-Nessim, the Egyptian spring feast, of April 12, passed off quietly. Egyptians crowded the public gardens as usual.

Ten Afghan delegates to the conference at Mussoorie, near Simla, on April 17, under the leadership of Sardar Mahomed Beg Tarzi, arrived at the Indian frontier on April 13.

In connection with the recent earthquake in Georgia, the *Graphic* of April 10 publishes some excellent photographs received from Mr. Scotland Liddell, the correspondent of the British Press in the Caucasus.

Reuter's Malta Correspondent, writing on April 12, states:—No. 2 Siege Battery, Royal Garrison Artillery, which has been posted to Malta from Egypt, will arrive here shortly on board the transport Steigenwald. This is the first time that a siege battery has been ordered to Malta. The artillery here has now practically been brought up to pre-war strength. Several forts which were utilised as hospitals during the war have also been restored to their former position. It is stated that the combatant strength of the Malta garrison, as at present arranged, does not exceed 3,500, against over 7,000 before the war.

CHESS.

The championship of the Metropolitan Chess Club is still undecided. The issue depends on Sir G. A. Thomas's outstanding game with Mr. W. P. McBean. I understand that it will be played at the end of this week.

Sir G. A. Thomas's victory in the City of London Chess Club championship this year brings his successes in this competition to three.

Last week the Metropolitan and Brixton Clubs met in the London League, the match being specially important because a win by Brixton would enable that club to tie for first place with North London. The score was 7½ to 5½ in favour of the Metropolitan, three games being left for adjudication.

It is announced that this year's congress of the British Chess Federation will be held at Edinburgh from August 9 to 23.

A match of six games is now taking place at Hastings between Mr. R. H. V. Scott and M. Marchand, who tied for second place with M. Kostitch at Bromley. Three games have so far been played, two of which have been won by Mr. Scott.

The following game was played between Sir G. A. Thomas and Mr. F. Brown at Bromley:—

RUY LOPEZ.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Opinion on the Budget has not yet crystallised, as it will take some little time to appreciate what the effect of the new taxes will be on commerce and industry, and the attitude of City circles in general is so far one of reserve. It had been suggested that this year's Budget would be unpretentious, but it is anything but that, for the Chancellor has made a serious—almost an heroic—attempt to tackle the problem of reducing the national debt. Undoubtedly the most unpleasant surprise is the increase in the excess profits duty. It was generally thought that this duty would be abolished on the present occasion, but instead it has been raised from 40 to 60 per cent.

***

The mission to Japan with which Prince Carol of Roumania has been entrusted is an interesting commentary upon the state of affairs in Europe to-day. Roumania wants more help than, shall I say, Great Britain and France can spare her, and on easier terms. She could, no doubt, obtain the amount of money that she requires from the United States, and it is known that an American combine made an offer to Dr. Vaida-Voevod when he was in London. But there is the possibility that Japan, who has also been a gainer financially by the war, will be prepared to offer more favourable terms, and in any case the inquiries in this direction that Prince Carol will make lend a definite purpose to his voyage. Japan, it goes without saying, will want a *quid pro quo* for any assistance that she gives to Roumania. Last year Japanese goods reached Constantinople and Sofia in some numbers; but they were for the most part of a character that did not compete seriously with British products. How long Japan will remain content to be associated in the world's markets with only cheap manufactures remains to be seen; but this Roumanian bid for Japanese help can hardly fail to suggest to our Far Eastern Allies important possibilities for them in the coming reconstruction of Europe.

***

The proposal to establish the cash on delivery parcel post between England and India has been advocated, and opposed, for so many years that the definite introduction of the system comes as something of a surprise. Speaking broadly, the C.O.D., or to use the current Indian abbreviation, the V.P.P., was demanded by consumers anxious to deal direct with retailers in England, while it was opposed partly in the interests of Indian tradesmen, and partly on the wider ground that the convenience of the few might be injurious to the many, because the shops in Calcutta and Bombay might cease to stock goods in limited demand. Nothing but experience can show whether such apprehensions are justified, but, speaking for ourselves, we do not anticipate that any immediately important results will follow. Some of the big department stores, and perhaps a few "specialists," may set out to cultivate the Indian market, but illustrated catalogues are costly articles just now, and we have sufficient faith in the abilities of Indian and Anglo-Indian tradesmen to predict that the great majority of them will meet the new competition on effective business lines.

***

An excellent report is again forthcoming from the National Bank of Egypt. The net profit of the bank for the past year amounted to £714,680, as against £693,851 for 1918, and the dividend is now 14 per cent., as against 10 per cent. £196,825 is allocated for depreciation of Government securities, and £62,559 for depreciation of securities in guarantee for the note issue, and the carry-forward is £141,932, as against £106,636.

***

I read with some amusement the statement in a contemporary recently that French financial circles are beginning to view the Levant with distrust as a commercial field. The opinion lost nothing in piquancy from the fact that it happened almost to coincide with an outburst of buying of Near Eastern securities on the Paris Bourse. As a matter of fact, since the Armistice our friends across the water have been if anything over-eager to establish a footing in the Levant and other Near Eastern markets; but while their experiences, notably in Syria, have been not altogether satisfactory, there is no reason whatever for imagining that France is now inclined to leave the Near East to other countries. Quite the contrary. French business men have not earned the reputation for astuteness for nothing, and they are by no means ignorant—to put it mildly—of the potentialities of that region.

***

I am informed that the contract for the repair of the Borcea span of the Cernavoda Bridge has been given by the Roumanian Government to the Reshitsa Steel and Iron Company, of Transylvania. This company is represented in Old Roumania by the Credit Technique, the chief of which institution is M. Tiberiu Eremil, who has carried out in the past a number of railroad construction works and large public contracts to the satisfaction of the Roumanian Government.

***

Internal difficulties in Germany have apparently not prevented the wily Teuton from continuing his commercial activities in the Near East with a view to regaining at some future date some vestige of his former supremacy in that region. Thus I learn that of late importing houses in Greece have been the frequent recipients of communications from German firms anxious to re-establish trade relations, and I understand that, judging by these letters, it would be difficult to imagine that Germany had been left by the war in a worse plight than the Allies. Such is Teuton bluff! Needless to say, the terms offered are exceedingly favourable in the matters of credit, early delivery, etc.: in other words, it is the old story of German penetration—sacrifice at first, and afterwards, when the market has been secured, the profits. But a game like that cannot be worked twice; not at any rate, after an eye-opener like the late war.

***

Mr. T. M. Ainscough, O.B.E., H.M. Senior Trade Commissioner in India, whose notable report on Indian trade was recently reviewed in these columns, is to undertake a tour of certain industrial areas during his stay in this country, commencing with London on May 3, in order that manufacturers and merchants may have an opportunity of consulting him regarding the possibilities of extending their overseas trade. Among the matters in regard to which he will be prepared to give information and advice are the general state of trade in India, the appointment of agents, methods of marketing and distribution of goods, terms of payment, rates of Customs duties, and general information as to the openings existing for British goods.

***

In a Consular report on trade conditions in Tripoli it is stated that on the whole there has not been enough British commercial activity in that region, and that more could have been done in sending combined travellers and quoting through freights. Exchange is a problem, as it is in the case of trade with most countries, and it appears that there are quantities of goods in the Customs which merchants will not clear, owing to the high rates of exchange. It is suggested that there should be an opening for electrical pumping machinery in the near future, as the Government intend assisting the cultivators of the oases of Tripoli and Tajura in installing this type of plant for irrigation purposes by a system of subsidies. There might also be scope for light agricultural machinery, it is thought, the European ploughs offered by the Italian Government on easy terms to the natives not having been appreciated or used.

COMMENTATOR.

BANK OF ROUMANIA LIMITED

(FOUNDED 1866.)

Head Office: 27, THROGMORTON ST., LONDON, E.C. 2.

Branch: 11, CALEA VICTORIEI, BUCAREST.

Directors

THE EARL OF BESSBOROUGH, K.P., C.V.O., C.B.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

YUGOSLAVIA.

BELGRADE, April 10.

Revival of Bee-keeping.

Bee-keeping has always been a favourite industry among Serbs, but, like everything else, it has suffered severely during the war. The Ministry of Food and Reconstruction has sent a committee to Slovenia to secure an adequate quantity of hives, both full and empty, and other necessary appliances, so it is hoped that this year this useful industry will be once more set upon its legs in the ravaged country.

BULGARIA.

SOFIA, March 31.

Grain Purchases by Poland.

The Polish Government has contracted with the Bulgarian Consortium for the purchase of 15,000 tons of barley and 7,500 tons of millet, which will be paid for in Swiss francs. The consortium is negotiating for the sale of several thousand tons of maize also in foreign valuta with the object of improving the value of the leva.

Tobacco Stocks.

Great stocks of tobacco are stored at Burgas, and will be gradually shipped to Italy, America, and England in exchange for supplies from these countries of articles of the first necessity.

MALTA.

MALTA, March 31.

Economic Position.

The Government, acting in conjunction with the local millers, have placed a contract for 5,500 tons of wheat and maize, to be delivered here by the end of May. The present stocks of wheat in the Island amount to 6,500 tons, while 5,100 tons are en route. Thus a 5½ months' supply is assured, and the knowledge of this fact has greatly relieved the anxiety that has existed, as the Maltese are amongst the largest bread consumers in the world.

There is a sugar shortage in the Island, and it is commonly believed that considerable hoarding has been taking place. The Government have fixed the price of sugar at 1s. 5½d. per rotolo (28 ozs.).

The export of cotton from the Island is prohibited. Onions may be exported until August 31.

Introduction of Preference

The publication of the list of articles which will be subject to a preferential duty has led to widespread discussion, if not dissatisfaction. Taxation in the Island has been greatly increased, and new taxes have been introduced in such rapid succession that the public is growing restive. The chief argument advanced against the introduction of the new duty is that Malta is not a manufacturing country, is therefore entirely dependent on imports for most commodities, and should be allowed to purchase in whatever markets can best supply the Island's needs. Owing to the cheapness of German manufactures a great trade was done with that country before the war, and so fleeting are the recollections of commerce that there are not a few who would welcome the return of old conditions.

Asiatic Petroleum Company's Tanks.

The new tanks of the Asiatic Petroleum Company are now completed, and should prove a great boon to the Island, as there will now be two distinct sources of distribution.

SYRIA.

BEYROUT, March 30.

Commercial Crisis.

The unexpected political development in Damascus, which led to an almost complete cessation of commercial intercourse between the Arab and French zones, has aggravated the economic crisis from which the country, especially the coastal region, has been suffering, and has intensified the paralysis of trade in Beyrout, with the result that some failures are to be feared.

The depletion of stocks caused by four years of war and blockade led to a wild demand for almost every kind of goods on the cessation of hostilities. This demand, coupled with the meagre means of transport available during the first period of the occupation, resulted in progressive leaps in prices. Encouraged by the banks, the merchants went in for heavy buying, and goods have been pouring in by thousands of tons. It was no uncommon thing lately to see over a thousand tons of goods arriving by one steamer. Beyrout, however, is only a transit port. The requirements of its own market and that of the Lebanon are limited. By far the greater part of the goods entering it is destined for the interior (Damascus, Homs, Hama, and Aleppo), so that when intercourse with these towns was stopped the merchants suddenly found themselves overburdened with stocks. The banks stopped credit, and the merchants were thus suddenly faced not only with the danger of inability to meet their engagements and to release their documents, but also of not finding store room for their goods, and of having to bear the accumulated warehouse dues. The Custom House, with its limited accommodation, was soon congested, and the surplus goods had to lie by hundreds of tons, piled up in lighters.

In the face of such an impossible situation the merchants looked for relief to the authorities, whom local opinion regarded as being to a certain extent responsible for this crisis, since the prime cause was political. Accordingly a deputation of leading merchants waited upon General Gouraud and appealed to him for assistance. It is understood that they were told that the authorities could not be expected to ask the banks to come to the rescue of merchants involved in speculative ventures, and that all that could be done in the circumstances was to provide extra accommodation, and to forego or to reduce temporarily the dues. As the warehouses near the Customs House are mostly taken up with military stores, the only alternative was to allow the goods to be landed on the open quays, and to provide tarpaulins and military guards at the expense of the authorities.

CYPRUS.

CYPRUS, April 3.

There is a brisk recovery of trade. Steamers of the Messageries Maritimes now call at the ports, including Limassol. Those of the Lloyd Triestino are also taking good cargoes of wine and carobs. These commodities are now being shipped in good quantities, and at satisfactory prices.

Reported Discovery of Gold and Silver.

According to a report from a correspondent of the *Phonè tes Kyprou* (Voice of Cyprus), both gold and silver have been found in a locality (Phoukási) in the Solea sub-district of Nicosia, in the north-west of the island. The director of the American company which has for years been operating in the copper mines of Skouriotissa, Mr. G. Gunther, is taking active steps to follow up the discovery. He proposes to erect buildings for the personnel and machinery which will be necessary for further work in this direction, and to obtain the necessary authority from the Government. It is expected that within six months samples of the ores will be exported to England, and perhaps to the United States. Further information will be of no little interest. Meanwhile, one is reminded of the rumours of gold in Cyprus which have excited the hopes of both people and rulers at various times, from classic periods up to 1878.

BULGARIAN RAILWAYS.

DEVELOPMENTS IN VIEW.

(From Our Sofia Correspondent.)

One of the most important extensions of the Bulgarian railway system in recent years was the completion of the trans-Balkan line Stara Zagora-Tirnovo, which provided an alternative route across the Balkans to the Sofia-Plevna line, and opened up country until then without railway communications. The Stara Zagora-Tirnovo line runs through extremely difficult terrain, and its construction was no light task; indeed, it would not be too much to say that the obstacles with which the engineers were confronted were not less than those that were encountered in laying the Swiss Alpine line. Both the survey of the route and the execution of the work were carried out by Bulgarian engineers. The line, which was hastily completed during the Balkan war, proved of great use during that campaign for the transport of military supplies from Northern to Southern Bulgaria, especially in regard to the siege of Adrianople and the Tchataldja lines.

The linking up of Tirnovo with Stara Zagora marked the completion of a further stage in the project of providing through communications from Roumania to the Ægean Sea by way of Rustchuk-Tirnovo-Stara Zagora-Nova Zagora-Seimen-Kuleli Burgas-Dedeagatch, the objects being to give every facility to Roumania's trade and to provide an alternative route to the Dardanelles in view of the possible contingency that in war time this passage would be closed by the Turks. The line proved of the utmost utility during the first half of 1915 when Bulgaria and Roumania were neutral, all passenger and goods traffic between Roumania and the Entente countries and Greece going by way of the Dedeagatch-Rustchuk railway.

Another important development carried out about the same period was the Mezdra-Vratza-Lom-Palanka line, the object of which was to provide through communication to Varna for the fertile districts of Vidin and Lom. The last stage of this line—Alexandrovo-Vidin—a distance of 35 kilometres, still remains to be constructed before Vidin is connected with Sofia. When completed, this line will provide a further direct route between Roumania and Macedonia. The incidence of the Balkan War and of the Great War has so far prevented this project from being carried out in its entirety.

Another important line which was authorised and under survey before the war was the Shumla-Karnobat line. The earthworks of this extension were completed for about 30 kilometres from the Karnobat end. The object of this line was to link up the Roumanian railway system of the Dobruja with Southern Bulgaria.

Pre-War Projects.

Simultaneously with extensions in the north, the Bulgarian Government was also concerned with projects for additional links with the Ægean. Preparations to this end were being made in 1914, and tenders were to have been invited for the following lines:—

(1) Stara Zagora-Gumurjina-Portolagos. This would have provided a through route between Rustchuk and the Ægean, and would have given Bulgaria a new outlet for the export of her tobacco and other produce to the Entente Powers, besides providing Roumania with a new trade route in the event of the Dardanelles and the Kuleli Burgas-Dedeagatch line being temporarily unavailable.

(2) The extension of the Plevna-Sofia line from Radomir to Kavalla (with a branch line up the Struma Valley to Strumnitza), a distance of 300 kilometres. The purpose of this railway was to provide a channel for the export of the tobacco and grains of Gorna Djumaja and Radomir to the Ægean and for trade generally with the United Kingdom, France, and Italy.

(3) Another extension of the Plevna-Sofia line beyond Kustendil to Bitolia (Monastir) via Cerna, Skala, Bregalnitza, and Gradsko, the distance between Kustendil and Gradsko being 161 kilometres. This line was to serve the trade of the Bregalnitza district and also to provide communication with Salonika.

(4) A further branch at Kustendil to Kumanovo and Skoplië (Uskub), the length of the section from the Bulgarian frontier to Kumanovo being 85 kilometres. It was intended to serve as a means of communication between Sofia and Salonika and Athens. This project dated from the time when Turkey gave Baron Hirsch a concession for railway construction in Turkey, and the plans for its construction were ready at the time of the outbreak of the Balkan War. Surveys were made on both sides of the frontier, and a mixed commission had met to decide technical questions and the matter of cost in relation to the construction of the necessary tunnelling.

Developments Now Projected.

The territorial changes introduced by the Paris Treaty have rendered these plans null and void. But, in any case, Bulgaria, after a war which has exhausted her economically, is not in a position to undertake any vast schemes of railway extensions, and must perforce confine her energies to the improvement of the existing system. In view of the altered circumstances, the Government is now planning to improve the main trunk line—the Tsaribrod-Sofia-Mustafa Pasha line. This route, which has already been relaid with heavier rails for a distance of 50 kilometres, will be relaid throughout its whole length, and it has now been decided to make the necessary survey for the construction of a double line between Tsaribrod and Mustafa Pasha. When the financial position has improved the Government proposes to proceed with the completion of the Shumla-Karnobat line.

Other projects for the time being will be restricted to local extensions, and a decree will shortly be issued authorising districts to construct local lines (*Chemins-de-fer d'intérêt locale*), instructions being given in regard to the works that should first be begun. The construction of these lines will be carried out locally under a compulsory labour system, under the supervision of the general management of the Bulgarian State Railways and Ports. By this means it is hoped that all hitherto isolated centres of importance will be brought into connection with the main railway arteries. It is estimated that the total length of these secondary lines will be 1,000 kilometres.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated April 7:—Rain nearly general in Assam, Bengal, and Chota-Nagpur, local in Burma, Bihar, and Orissa, Southern India and North-Western India. Crop conditions generally good. Supplementary memorandum wheat up to March 31, 28,921,000 acres, as against 28,553,000 acres in the second wheat forecast published on March 16. Bombay cotton market irregular. Fully Good Broach, April-May, Rs. 475, July-August, Rs. 484. Calcutta jute market very quiet and without inquiries. Hessians steady, with considerable inquiry. Heavy goods steady. No change in bank rates

Dated April 14. Rain nearly general in Assam. Local in Burma, Bengal, Chota-Nagpur, Orissa, Madras, Central Provinces and North-Western India. Crop conditions generally good. Garhmukhtesar-Kasganj (Meerut-Etah districts) Canal Bank railway survey by Gillanders Arbuthnot and Co., Calcutta, eighty miles sanctioned. Bombay cotton market weak. Fully good Broach, April-May, Rs. 499; July-August, Rs.511. Piece-goods market firmer, with demand strengthening. Calcutta jute market steady but inactive, with prices tending to rise. Hessians firm, with prices higher and jumpy. Heavy goods quiet and steady. Bank rate is—Bengal, 7 per cent.; Madras, Bombay, 8 per cent.

NEW STAMPS FROM TURKEY.

A paragraph in *The Times* reads:—The privilege of maintaining their own post offices in Turkey, enjoyed by several European Powers prior to the Great War, was originally conceded to Russia by the Sublime Porte in 1720. Later it was extended to Austria, France, Italy, Great Britain, and Germany under the "most favoured nation" clause of their commercial treaties. In course of time Constantinople became a cosmopolis of the post, nine foreign nations having their head postal agencies in the Galata quarter. On the abrogation of the European "capitulations" in October, 1914, the seven remaining foreign postal agencies were suppressed. Within the past eighteen months, however, the post offices of Great Britain, France, and Italy have been re-opened under international control, while to them have been added Consular posts established by Roumania and Poland. Czecho-Slovakia has now followed suit by opening, at the end of last month, a postal agency in the Consulate at Constantinople for the convenience of Czech residents in the Turkish capital. Special stamps are provided, as in the case of Poland and Roumania, in the form of the contemporary home series of the Czecho-Slovak Republic overprinted with the word "Levant" in large black Roman capitals, and surcharged with local values in paras and piastres. This latter precaution, formerly in vogue at all foreign post offices in the Near East, is intended to guard against possible loss to the revenue through the fluctuations of exchange. A similar policy has been adopted in respect of the stamps supplied to the Polish Consular Post Office.

The directors of the Royal Exchange Assurance have decided to recommend the general court, to be held on April 28 next, to declare a further dividend of 9 per cent., less income-tax, making 16 per cent., less income-tax, for the year 1919. They also recommend that on the occasion of the bicentenary of the Corporation on June 22 next a bonus dividend of 5 per cent., less income-tax, be paid to the proprietors whose names were registered in the books of the Corporation at the closing of the transfer books on April 16.

COTTON-GROWING IN MESOPOTAMIA.

FAVOURABLE PROSPECTS FOR DEVELOPMENT.

Mr. B. Crapper, vice-president of the Oldham Chamber of Commerce, who recently visited Mesopotamia with Mr. F. Hodgkinson on behalf of the British Cotton-Growing Association, has now made his official report. His verdict is extremely favourable as regards the prospects for the development of cotton cultivation in that region. He states that he is "satisfied that Mesopotamia possesses both a soil and a climate to grow excellent cotton in large weights per acre, and that we may hope for a large production during the next few years. The limiting factors at the moment are: 1. Comparatively small population—3,000,000 people 2. Irrigation and drainage requirements. 3. Cheaper and more direct transport facilities required. 4. Instruction and scientific methods and machinery to be employed."

At Amara the delegates inspected a small experimental plot of cotton grown by the Agricultural Department. There had not been any great success there, the chief reason being the salted nature of the soil caused by the annual floods of the Tigris in this area. Good cotton could be grown at Kut at once, but the cost of pumping would be great.

At Baghdad the experimental farm of the Government Cotton Expert (Captain Thomas) of 30 acres showed surprising and delightful results. The quality of both Egyptian and long stapled American was extremely good, and the yields were very large. The site of 200 acres which was being placed under cotton at Tel Deir, 14 miles south-west from Baghdad, was also visited. The site seemed excellent, being only one mile from the Baghdad Hilla Railway on one of the newly cut canals, taking off from the Euphrates above the Hindia Barrage. There was a gradual fall on the land, which would make drainage easy, and the area could be extended to many thousand acres. The neighbouring Sheikh had undertaken to cultivate the land with men of his tribe on the co-operative basis, the cultivators receiving 45 per cent. of the value of the gross crop—these were slightly better terms than usually allowed, and ought to repay the cultivator extremely well. The Agricultural Department provided water, seed, machinery, and instruction as their portion of the bargain. Trained Egyptian and Indian cultivators were being employed as instructors. Much would depend on the results of this practical demonstration to the Arab cultivator, who was a most conservative person to move, and one who would be easily deterred from persevering to attain success if the initial trial was a failure. The delegates also inspected another site chosen by the Agricultural Department between the Diala and the Tigris about 10 miles from Baghdad, where it is proposed to build a Research School and Training School of Agriculture, and then visited the Mosul area 300 miles further north. The land there was rather hilly and rolling, impossible to irrigate, and the crops were all rain grown, with the exception of small areas watered by springs, but further north again over the Kurdistan foothills there were many large plains watered by rivers from the neighbouring hills which at some future time might grow a great amount of cotton when transport and population were more available and the political situation more settled. The conclusion arrived at was that they would not be able to get an appreciable amount of cotton suitable for Lancashire from the Mosul vilayet for many years to come.

The Euphrates Valley.

The Euphrates Valley area, which for a great part was irrigated by flow from canals taking off above the Hindia barrage, was next visited. This area, with Hilla as a centre, was in extent about one million acres, which was being increased year by year by the making of subsidiary canals, and was the area where they might expect great developments in cotton growing to take place in the near future. Of course the capacity of the dam at Hindia was limited, but they hoped that the Government would proceed with the further schemes of irrigation and drainage required for the development of Mesopotamia. In the area the towns of Kerbela, Tenarij, Nejef, Kufa, Kifl and Abu Suchair were visited. There was a large agricultural population, and this was the area where they must push cotton-growing to its utmost capacity in the near future.

Dealing with the Diala Valley, it was pointed out that there were many canals taking off from the river in the higher reaches capable of irrigating about 200,000 acres of land, but the supply of water for the canals depended entirely on a temporary earthern bund which was made across the river by the resident cultivators each year, and which was washed away by the late floods about on an average once in every three years, and on this account the land put under crop was very small. In Sir W. Willcocks's 1911 report to the Turkish Government the estimated cost of making the necessary permanent Diala dam amounted to £40,000; multiplying this sum by five times making £200,000, for which the work could be carried out to-day, and then they had an area of at least 200,000 acres capable of being brought under immediate summer cultivation at £1 per acre for the making of the dam. It seemed quite surprising to a casual visitor that the British military authorities had not already commandeered the labour of 40,000 Armenian refugees who were encamped at Bakuba, where they had been for the last two years doing nothing and living as the guests of the British taxpayer.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Cairo Main Drainage Department, Public Works Ministry.—Supply and Sinking of ejector stations, Nos. 1 and 2, Suez Main Drainage Contract No. III. (Particulars may be seen at Department of Overseas Trade, 35, Old Queen Street, S.W.1.) April 28.

Great Indian Peninsula Railway.—Supply of steel work for bridges. (Spec., £1, Secretary, 48, Copthall Avenue, London, E.C.2.) May 11.

Athens Ministry of Communications.—Supply of telegraphic materials. (Particulars may be seen at Department of Overseas Trade, 35, Old Queen Street, S.W.1.) June 20.

Chemin de Fer de l'Est-Algérien.—The annual ordinary general meeting will be held at Paris on April 29.

Tramways de Galatz.—The annual ordinary general meeting will be held at Brussels on April 28.

Bombay Gas.—The directors recommend a final dividend of 4 per cent., less tax, making 8 per cent. for the year 1919, the same as for 1918, payable May 20.

The directors of the Agricultural Bank of Egypt recommend a dividend of 8s. per share on Ordinary and £40 per share on Deferred. The annual general meeting will be held at Cairo on April 29.

SWEDISH ORIENT LINE.

Direct regular steamship service with about weekly sailings outwards and homewards between

GOTHENBURG and ALGIERS, PIRÆUS, SMYRNA and SALONICA.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Cunard Line s.s. Southgate, to Piræus, Salonika, Smyrna, Constantinople, Galatz, and Batoum, will close for cargo at Antwerp on April 27.

The Anchor Line s.s. Circassia, for Bombay, will close for cargo at Liverpool on April 24.

The Papayanni (Ellerman Lines, Ltd.) s.s. Bosnian, for Algiers and Alexandria, will close for cargo at Liverpool on April 24.

The Papayanni (Ellerman Lines, Ltd.) s.s. Trentino, for Algiers, Smyrna, and Constantinople, will close for cargo at Liverpool on May 1.

The Prince Line s.s. Scottish Prince, for Tunis, Malta, Alexandria, Syrian coast ports, and Cyprus, will close for cargo at Manchester on May 4.

The Moss Line s.s. Assiout, for Gibraltar, Algiers, Malta, and Alexandria, will close for cargo at Liverpool on May 1.

The Harrison Line s.s. Gladiator, for Calcutta, will close for cargo at Liverpool on May 4.

The R.M.S.P. Co.'s Treneglos, for Gibraltar and Morocco, will leave London on May 1.

PORT CONGESTION AT CONSTANTINOPLE.

The Department of Overseas Trade is informed that the congestion in the port has been to a certain extent relieved during the last few days. A Canadian concern—the Mount Royal Steamship Co.—have erected large warehouses on the Bosphorus at Kuru Ichesme. They have received the concession from the Quay Co. to use these as transit warehouses, and the Levant Stevedoring Co. have already unloaded there very many lighters which had been lying loaded afloat for a considerable period. These premises are stated to be capable of holding about 12,000 tons, and it is hoped by the use of these warehouses to lessen considerably the congestion in due course.

The Department are in receipt of information from Constantinople to the effect that the congestion in the Customs and warehouses at that port would be greatly mitigated if exporters of cotton and woollen bales would limit them to a weight of 10 cwt. Foreign competitors are said to benefit by the fact that their bales are much more easily moved than those originating in the United Kingdom, and can be shipped up country without breaking bulk.

NEW P. & O. STEAMERS.

The Naldera and Narkunda.

The new P. and O. mail and passenger steamers, Naldera and Narkunda, the former of which left for Australian ports, viâ Bombay, on April 10, and the latter of which is due to sail for Bombay, viâ Egypt and Aden, on April 24, are believed to be the most luxurious and attractive vessels yet designed for the Indian and Australian trades.

The Naldera, which was launched from the yard of Messrs. Caird and Co., Greenock (since amalgamated with the firm of Harland and Wolff, Ltd.) on December 29, 1917, and was fitted out, owing to the exigencies of the war, as a cargo steamer, and was later converted for use, first as an aeroplane carrier, and then as an armed merchant cruiser, has now been entirely reconditioned for the service for which she was originally projected. She is of 15,800 gross tons, length 605 ft., breadth 67 ft. 2 in., moulded depth (main deck to keel) 47 ft. 4 in., and is driven by two sets of quadruple expansion reciprocating engines, developing 18,000-horse power and a sea-speed of 18½ knots.

The first and second dining saloons are respectively at the forward and after ends of the midship portion of the main deck, with elaborately equipped kitchens and culinary offices between. On the main deck, aft, are second saloon cabins and bathrooms. The upper deck is entirely occupied by first and second-class cabins, liberally interspersed with bathrooms, and there are, besides, on this deck, six bedrooms-de-luxe, with bathrooms, etc., en suite. First-class bedstead cabins for two persons fill the middle portion of the hurricane deck, on the after part of which are the second saloon smoking and music-rooms, and at the forward end a double range of single or two-bed cabins. Where the cabins are double-banked, they are arranged on the Inchcape principle, so that every cabin has its own porthole or portholes opening to the outside air.

The promenade decks strike one as being wider and longer than are commonly seen, and that this is not merely an impression is proved by the structure of the upper part of the vessel, which shows the promenade deck, supported on brackets which splay outwards beyond the limits of the bulwarks, suggesting, constructively, what is known in architecture as an oversailing upper storey. All the public rooms of the Naldera are panelled in dull finished brown oak, with the exception of the first-class dining saloon, the walls of which have been painted to imitate the exact appearance and slight variation of old ivory.

Round the oval wall which rises from the centre of the saloon is a riotously-painted deep frieze, by Professor Gerald Moira, in gay and animated tints. The treatment of this painting is broad and effective, and when it is illuminated by the scores of electric lights placed beneath it and hidden from below by a cornice moulding, the whole of the frieze is a blaze of gorgeous colouring. The music-room, which surrounds this central well on the promenade deck, two decks above the dining saloon, also receives its main effect from Professor Moira's work, which, indeed, dominates the decorative scheme of this part of the ship.

The music saloon is divided from the divan by a light wooden bulkhead, with plate-glass doors. At the after end of the promenade deck is the first saloon smoking room, the furniture of which is in the style of William III. and Mary. Here are deep, roomy lounges and big arm-chairs, upholstered in green morocco leather. The second-class dining and smoking saloons are beautifully panelled, and mahogany chairs in the style of Queen Anne, with tall backs and centre splats, inlaid with the monogram of the company, are part of the furnishing equipment.

One of the most fascinating apartments of the vessel is the chart-room, where none but those concerned with the navigation of the ship may penetrate. Here are up-to-date devices for the working of the vessel at sea. A tell-tale board, from which current is turned on from a series of switches to the mast-head lights and the stern light (white), the port and starboard lights (red and green respectively), at the same time illuminates corresponding miniature lights on the switch-board; if by any mischance any one of the main lights should cease to gleam its tell-tale correspondent also becomes extinguished, and an alarm bell is sounded in the chart-room. Above the telemotor steering gear is a periscopic prism which projects the compass card as a vertical face at the level of the helmsman's eyes, so that he may at the same time view the card, the course, and the waters through which the vessel is advancing. In another bridge-indicator miniature vertical pistons, red and green, actuated from the port and starboard engines themselves, reflect the action of the engines, and ensure accord with the directions transmitted from the bridge.

Outside the chart-room the expanse of the bridge itself excites mild surprise. Turning one's eyes aft over the expanse of the boat deck one sees ranges of roomy, substantial, and shapely lifeboats.

Two handsome sets of reciprocating engines mainly fill the space in the engine-room. One turns from the enormity of the main engines to a minor area, where there is grouped auxiliary machinery which generates electric current for light and power, or produces arctic temperatures for the preservation in transit of the successive consignments of perishable cargo which the Naldera will bring from "down under" to the insufficiently producing mother country. Forward of the engine-room is a street of boilers served by fifty furnaces. A steward's pantry on every deck, fully equipped for immediate service, is a great convenience, and means much for the early morning comfort of passengers *en voyage*. There are specially arranged rooms, whose optional combination offers convenient facilities for family parties. The Naldera has accommodation in the first saloon for 426 passengers, and for 248 passengers in the second saloon, for all of whom the dining saloons provide simultaneous seating accommodation.

The Narkunda, whose constructional history is similar to that of the Naldera, was built at Messrs. Harland and Wolff's Belfast yard. She is of approximately the same dimensions and general character as the Naldera, and, like her, has three funnels and a stern of the cruiser type, these ships being the earliest of P. and O. steamers to be so designed.

MESOPOTAMIAN RIVER FLEET.

Mr. Hope, Financial Secretary, Ministry of Munitions, in a written reply to Major-General Sir J. Davidson, says:—A portion of the Mesopotamian river fleet, which is surplus to the present requirements of the civil and military authorities, was sold last month. The number of boats sold was 362 of various types, and the number of purchasers 35. The sales were by sealed tenders in India and Mesopotamia, and the approximate amount realised is 1¾ millions sterling. No monopoly has been created.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Currants.—There has been a development of interest in this commodity, and transactions have increased in number.

Sultanas.—The demand has been steady during the week, without bringing about any change in rates.

Sugar.—A steady tone has characterised the home refined market.

Coffee.—The tone has on the whole been steady, but lower qualities have been in little demand. Stocks are returned at 93,871 bags of Brazilian, 91,318 packages of Central American, and 86,780 packages of other kinds. Brazilian has been done at 122s. to 124s., Costa Rica at from 158s. to 185s., Indian at from 165s. to 190s., and Mocha at from 175s. to 190s.

Messrs. Reynolds and Gibson state:—Our futures market has shown a declining tendency during the week, and on balance quotations are 2s. 6d. to 3s. 6d. lower. May changed hands at 124s., and again at 123s. 6d. There is nothing encouraging on the spot, as conditions in respect to the foreign exchanges show no amelioration. . . . . Coffee in fair quantities is now on the way to London from India, East Africa, and Central America, and the home trade, in view of supplies that seem abundant, are buying very cautiously. The Rio market has taken advantage of variations in exchanges to conclude sales at rather lower prices in milreis, the Government selling 20,000 bags out of their remaining stocks to Italy, and is said to be negotiating for the sale of a further 400,000 bags. This may have some connection with the projected loan to Italy by Brazil for the obtaining of certain commodities from the Republic. The New York market at the close . . . . shows a decline on balance for the week of 15 to 20 points. The lower prices from Rio mentioned above affected the futures market, which, however, was more upset by the sudden spreading of the strike of railway hands at Chicago to the Eastern seaboard. This at once harasses the spot market, and shuts down shipments from local stocks to the interior, leading to the usual condition of complications and congestion of traffic. It is a purely domestic affair, and has nothing to do with the position of the commodity, which statistically remains very sound, the sale made to Italy being a very encouraging feature, especially when it is remembered how greatly the lira has depreciated. If Italy, why not some of the other Continental countries obtaining supplies from Brazil?

Oilseeds.—Linseed has been firmer, though transactions have been restricted. Calcutta April-June has been done at 41s. 6d., and Bombay April-May at 43s. La Plata afloat has come to business at 36s. 6d., 36s. 9d. for March-April, and 37s. for April-May and June-July. Rapeseed and cottonseed have been steady.

Oilcakes, etc.—Business in oilcakes has been small. Oils have been fairly firm. Linseed has been done at 101s. spot, and at 97s. April. Rape oil has been quiet at 125s. refined and 110s. crude. Cotton oil has been steady, Egyptian deodorised coming to business at 115s., and crude at 85s. Turpentine is firm at 205s. spot, and 189s. May-June.

EGYPTIAN CROPS.

The bulletin of the Egyptian Ministry of Agriculture gives the following particulars of crop conditions in March:—

Wheat.—The weather has been favourable in spite of the cold, and water supply sufficient. The crop continues to make excellent progress; the Hindi variety, which is widely sown, looks particularly healthy. In Lower Egypt the early crop is turning colour, and in Middle and Upper Egypt it is on the verge of maturity, and harvesting will shortly commence in the basins. The attack of rust this year seems severer on the Baladi wheat, especially the late-sown fields, but is not extensive, nor is the damage hitherto caused heavy. Smut has also been noticed to a small extent in most provinces, and slight attacks of eel-worm have been reported from Damanhûr and Shibîn el Qanâtir districts. The crop, notwithstanding, will be an early one, and presents very good prospects. It must be noted, however, that this merely refers to the yield per feddân, the total area for wheat as well as other cereals having been reported as considerably less than usual.

Barley.—The weather has been favourable and the water supply sufficient. The crop is well advanced; in Lower Egypt it has turned colour and in Middle and Upper Egypt harvesting has actually begun. Its prospects appear exceptionally good in spite of attacks of rust, which, though generally slight, have been somewhat pronounced in Minya and Maryût. In the latter district the crop is considered the best for the last twelve years, the heavy continuous rains having done much good.

Beans.—The crop has suffered to some extent—though not in all provinces—from cold winds and rains. The attack of broom-rape, rust, and blight has continued to be slight except in Giza and Asyût provinces, where the former disease was somewhat severe. In Lower Egypt the greater part of the crop is maturing, and in Middle and Upper Egypt harvesting has begun. Beans are cut green more extensively than usual, and hence a reduction is expected on the dry crop. Cultivators everywhere seem to be anxious to proceed with the harvest in order to prepare the land for cotton.

Bersîm.—The cold weather during the early part of March continued to affect the crop, which, however, has since recovered almost completely. The area under temporary bersîm has now been practically all ploughed up for cotton. The area of permanent bersîm ploughed up for cotton still appears to be small. The third cutting is being taken everywhere. Reports from Lower Egypt point to a tendency to dries-making on a large scale.

The crop is practically free from disease with the exception of slight attacks of dodder, which do not appear to have caused any damage worth mentioning.

Cotton.—The unusually cold weather and heavy rains which prevailed throughout the month of February very seriously interfered with the preparation of land for cotton and resulted in an extensive resowing where sowing had been early. Towards the end of February, however, sowing became general and is estimated to be practically over at the end of March, except in the northern zones of the Delta and particularly in the Mudiriya of Beheira, where, even in its southern part, about half the cotton area still remains unsown. There is also a good deal of delay reported from the Mudiriya of Faiyûm. Shortage of water has been reported from certain parts of Beheira, Daqahliya, Minûfiya, and Faiyûm. Where sowing took place from February 25 onwards, germination has been generally very good, and the extent of resowing relatively small. It is reported from Minya that the tendency to grow cotton after beans, helba, barley, and onions is rather common.

Sugar Cane.—The delivery of last year's crop to sugar factories is nearly over, and the planting of the new crop is taking place under favourable conditions.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended April 2:—The week opened strong, with an upward tendency, and early on Monday morning two buyers came forward on our market showing signs of anxiety to close their uncompleted engagements of last week. As a result, prices jumped up 50 piastres per oke, with an exchange of only ten cases at 1,010 piastres per oke for current qualities, and 1,050 piastres for extra selected manufacturing druggist.

Since Monday four other buyers came forward running up prices to 1,040 and 1,100 as to quality, and all the quantity that could be procured amounts to only 53 cases. The above piastre prices are equivalent to 19s. to 22s. per lb., c.i.f. Our principal railway communications are still held up by the "Tchetes," or revolutionary nationalists, who will not allow anything to come down on this market; therefore, as a result we must expect higher and higher figures to be established so long as our depleting opium stock is not replenished by fresh arrivals. The exchange to-day is piastres 454 per £ sterling for cheque, and $0.87 for one Turkish paper £ of 100 piastres. The arrivals to date are 1,506 cases, against 265 at same date last year.

The P. and O. Company's managing agents in Australia, Messrs. Macdonald Hamilton and Co., have removed their Sydney offices to Union House, George Street.

The Department of Overseas Trade is informed that, consequent upon a preliminary conference between the Italian and Czecho-Slovak Governments, held recently at Trieste, on the question of transit, it has been decided to continue and extend these negotiations and to invite the participation of other States which formed part of the Austro-Hungarian Empire, notably Yugoslavia and Austria. These discussions will take place at Graz, and will be concerned with the question of the transit of Czecho-Slovak merchandise through Yugoslav and Austrian territory. It is understood that the competent Ministers of the countries concerned are preparing schemes for discussion at the next conference.

ENGINEERING.

THE SHORTAGE OF MOTOR CARS.

For nearly five years the manufacture in Great Britain of automobiles for the use of the general public was arrested by the European War, and when the Armistice came motor-car manufacturers for the most part were faced with the problem of completely reorganising their works on a peace basis. As is well known, most of the works which devoted the whole of their attention to the manufacture of pleasure cars before the war were engaged during the war on the production of Army and Navy requirements—shells, guns, fuses, tractors, tanks, aeroplane engines, etc.—and it followed, therefore, that a considerable time had to elapse before the new models could be put on the market. When they came, and, indeed, long before, manufacturers were so overwhelmed with orders that in most cases it was impossible to pay any attention to the overseas trade.

A few firms, however, were in a more fortunate position, and these have lost no time in getting into touch with foreign markets. One firm, Crossley Motors, Ltd., had carried on the manufacture of their cars during the entire war period. On the strength of the behaviour of six Crossley cars supplied in 1913 an order for fifty had been given to the firm early in 1914 by the British Government, and these were delivered before August. On the outbreak of hostilities the entire available supply of Crossley cars, as well as of others, was taken over, and during the war thousands of others were turned out from the same works. With the return to peace conditions the firm had the advantage of this war experience of multiple production, and only required to add certain refinements and improvements in the engine and chassis to make the 25-30 h.p. R.F.C. model suited to the requirements of the modern motorist. The huge factory at Gorton is now almost within reach of its utmost production, and offers an object-lesson in industrial efficiency.

Crossley Motors, Ltd., are fully alive to the importance of developing the export and overseas side of their business, for they realise that the sturdiness of construction and the high ground clearance of their car—the Crossley has a clearance of $10\frac{3}{4}$ ins.—together with the remarkable efficiency of the engine, fits it for the severe tasks imposed upon an automobile when used abroad. The growing demand for the 25-30 h.p. R.F.C. model Crossley in all parts of the world is conclusive evidence of public appreciation of a really high-grade car.

MARKET FOR TRACTORS IN MACEDONIA.

The opening for tractors in Macedonia is the subject of a recent report by the American Consul at Salonika, Mr. Leland B. Morris, who states that there are perhaps forty tractors in operation throughout the whole of Macedonia. The Greek Government purchased some 200 American tractors during the war, and distributed them to purchasers and to agricultural schools. However, due to the scarcity of skilled labour, many of these machines are idle. Some of them, in fact, have never been unloaded from the freight cars. Several mowers and threshers are in use in the district. One of the largest dealers in agricultural machinery estimates that under peace conditions he can sell forty threshing machines annually. It is impossible as yet to say which size and style of tractor is preferred, as few are in operation, and these for so short a time that no comparison can be made. Dealers interested in the tractor experiments believe that the crawler type will be most successful under ploughing conditions in Macedonia. The country is hilly, and the lower wheels have a tendency to sink into the ground. Probably 25—30 horse-power tractors will be the best for the region. Operators are inclined to overload. Implement men say that 12—14-inch ploughs are used in ploughing. The disc has been used here with great success with tractors, but it will be very hard to introduce it. The few tractors operating have been used to operate threshers. Farm labour can be obtained for the equivalent of $1 per day and board. Mechanics capable of running tractors are very hard to find. In fact, if a tractor company wishes to be successful in marketing its products in this field, skilled mechanics must be sent to instruct users, and repair men to follow up the machines and keep them operating. No import duties are assessed on tractors during 1920. The normal duty assessed according to the weights of the various metals used in the manufacture of the machinery averages 13 per cent. of the invoice value of the tractor.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 3 amounted to £6.852.

An information bureau has been established at Teheran with the object of dealing with inquiries relating to Persian commerce. Full information on all branches of commerce can be obtained by addressing inquiries to Le Ministre de Commerce et Travaux Publique, Bureau d'Informations Commerciales, Teheran, Persia.

COMPANY MEETINGS.

NATIONAL BANK OF EGYPT.

Increased Net Profits.

The twentieth annual general meeting of the shareholders in the National Bank of Egypt was held on March 29 at the head office of the bank in Cairo, Mr. F. T. Rowlatt (the Governor) presiding.

The Governor said: Gentlemen,—We have the pleasure of submitting to you the balance-sheet and profit and loss account for 1919. The net profits, before depreciation of securities, amount to £714,680, and we propose to dispose of them in the following manner. For depreciation of securities we have to provide £259,383, and after payment of a 14 per cent. dividend, which absorbs £420,000 (including the 4 per cent. distribution already made), there will remain £35,297. This, with £106,635 brought forward from last year, makes a total of £141,932 to be carried forward to the profit and loss account for 1920. We think, gentlemen, that these figures can be considered quite satisfactory. We have decided to recommend the payment of a dividend 4 per cent. higher than the one paid last year, and we feel little doubt that you will approve of this measure.

The depreciation of Government securities has been very heavy during the year, but of the large amount that we have had to set aside for this purpose to bring them to a valuation not higher than the market rate on December 31, 1919, I am glad to say the greater part refers to short dated securities such as British Exchequer Bonds and National War Bonds; so in the course of the next three or four years the amount set aside for depreciation of these securities will be encashed. The general expenses of the Bank have again increased, but with the development of our work, higher salaries, and the increased cost of everything, this had naturally to be expected.

The prosperity of Egypt has tended to swell the volume of our work. The total of the balance-sheet on December 31, 1919, amounts to £E41,895,000, compared with £E34,856,000 on December 31, 1918. The Government securities, amounting to £E16,145,000, are represented as to £E15,500,000 by British Treasury Bills, Exchequer Bonds, National War Bonds, and War Loans. In regard to other important items in the balance-sheet, I would remark that the advances on merchandise are almost entirely against cotton, and made to the leading commercial houses. The total of these advances had been considerably reduced at the present time. Bills of exchange, £E7,500,000, are first-class bills, mostly London acceptances, and the money at call and short notice, £E2,400,000, is on the London market. On the other side of the balance-sheet, the current and deposit accounts of the general public have increased during the year by £E4,000,000, that is to say, to £E18,000,000.

The Bank's note circulation, including about £E5,000,000, held as cash in the banking department, amounted, on December 31, 1919, to £E67,300,000, as compared with £E46,000,000 on December 31, 1918. The maximum circulation during the year under review was that reached on December 11, namely, £E68,200,000. The maximum circulation touched in 1918 was £E46,100,000 on December 30.

After December 30, 1918, the circulation steadily declined during the liquidation of the cotton business, till the lowest circulation for the year was touched—namely, £E39,900,000. The note circulation then expanded by £E28,300,000 during the last months of the year, reaching the above-mentioned maximum of £E68,200,000. This expansion can be attributed solely to the financing of a cotton crop computed to realise the large figure of about £E100,000,000. The trade balance in favour of Egypt for 1919 was £E33,000,000.

The yearly increase in the amount of bank notes in the hands of the public has been due to the country's growing wealth realised from the export of produce, and the large sums of British money spent in Egypt during the war. There is, however, a considerable movement, which it is hoped will develop further, in buying back Egyptian securities from Europe. This, while in the right direction for improving the rates of exchange with France, is also good from the Egyptian economic point of view and tends to reduce the circulation. Large amounts of cash must also be held in this country, awaiting investment in the form of imports from Europe. The note circulation has now fallen to £E57,900,000, that is, by £E9,400,000, since December last.

Our Bank note issue, as you are aware, is backed by British and Egyptian Government securities and a certain amount of gold. I may say it is almost entirely guaranteed by British Treasury bills at short usance, which, with the stabilisation of the exchange, makes our currency practically equivalent to British currency.

I think it is always interesting to look at the yearly import and export figures made up to August 31, as the commercial year is generally recognised as beginning in Egypt on September 1, with about the commencement of the moving of the cotton crop, and when the results of the last crop have shown their effect on the general commerce of the country. The following are the yearly statistics from August 31, 1913:—

	Imports.		Exports.
	£E.		£E.
1913-14	28,325,693	....	32,646,805
1914-15	15,327,835	....	22,642,780
1915-16	27,545,340	....	29,882,393
1916-17	30,095,371	....	44,587,950
1917-18	47,285,226	....	48,019,952
1918-19	44,331,720	....	48,829,951

Exports for the year ended August 31 last, you will see, are approximately the same as for the previous year. In 1918 the cotton crop was 4,800,000 kantars. The Government restricted the area under cotton cultivation, but this was compensated for by the high price. The falling-off in imports, as compared with 1917-18, is no doubt due to the reduction of the military forces in Egypt and Palestine and their consequently diminishing requirements.

But it is during the last six months, on account of the limited supply of cotton (especially of the Egyptian quality) to meet the world's demand, that the price of cotton, assisted by the American exchange rates, rose to over four and five times its recent value; with the result that although only about one-half of the 1919 crop had been exported by the end of the year, the total exports from Egypt for 1919 were worth £E 80,000,000, as compared with £E.46,000,000 in 1918, and the balance of trade in favour of Egypt reached the record figure of £E.33,000,000, to which we alluded above. It is to be noted that the rise of the price of cotton, in so far as it is due to the American exchange, corresponds with the premium on gold.

Needless to say, there has been a rush by cultivators to increase their holding of land, and transactions have been done at very high figures. Banks and mortgage companies have wisely taken the opportunity to part with any land they had on their hands, and, remembering the crisis of thirteen years ago, they have been very careful in making new advances. Unlike what occurred formerly, there is little borrowed money involved, so although we must all be careful, the effect of a reaction is not much to be feared. This prosperous state of affairs has again put up the cost of living. This falls heavily on the urban population, but the Government, pending the adjustment of things in the usual course of trade when international commerce will be easier, are very wisely importing grain and flour and selling it to the public at less than cost price. Co-operative societies are also making a real start, and the new law limiting the increase of rents will be most useful.

The cotton crop of 1919 is estimated to be about 6,000,000 kantars, but would have been more, it is said, if the area restrictions had been taken off at an earlier date. If climatic conditions are satisfactory, the crop of 1920 should easily exceed this quantity, and again add considerably to the wealth of Egypt.

According to the returns of the Sudan Customs, the total value of the external trade of the Sudan in 1919 (exclusive of specie) amounted to £E.7,835,314, as against £E.8,234,966 in 1913. The export trade showed a falling off of about £E1,200,000, as compared with the preceding year, but the value of imports, on the other hand, has increased by about £E.800,000. In making the comparison between the two years, it should be borne in mind that the year 1913 was one of exceptional prosperity. The decline in the value of the export trade cannot, therefore, be considered as a real setback in the development of trade.

The decline in the export trade was due to the low Nile, which affected the riverain cultivation, to the short rainfall of the previous autumn, and also to the dislocation of communications with Egypt during the spring. The export of dura, cattle, sheep, dukhn, beans, etc., was considerably less, as the following figures will show:—

—	1918.	1919.	Decrease.
	£E.	£E.	£E.
Gum	638,765	548,241	90,521
Dura	597,134	22,608	569,526
Cattle	516,920	357,936	158,984
Sheep and Goats	615,257	352,703	298,554
Dukhn	177,733	52,439	124,734
Beans, dried	122,326	47,990	74,336

The internal trade of the country, however, has, on the whole, been brisk.

The Sudan Government have now obtained the guarantee of the British Government to a loan of £E.6,000,000, and I am glad to say that in the flotation of a first instalment of the loan our bank was able to be of considerable assistance. We had in the past, in anticipation of this measure, advanced considerable sums to the Sudan Government to begin the development of their resources. It is proposed to construct dams on both the White and the Blue Nile for the extension of cultivation in Egypt and the Sudan.

In conclusion, gentlemen, I have to inform you that Sir Carl Meyer, one of your London directors, goes out of office by rotation this year, and I submit his name for the honour of re-election. Finally, I wish to tender to the sub-governors, managers and staff the expression of our sincere satisfaction with the result of their labours during 1919.

TO GREEK SUBJECTS.—Notice is hereby given that Greek subjects having interests to defend on the ground of dealings with German subjects or claims for contracts in Germany, should present themselves up to the 30th April, 1920, to the Greek Consulates in order to receive information as to the means of defending their interests according to the Treaty of Versailles.—The Greek Legation, 25, Knightsbridge, S.W.1.

SUPPLIES AND PRICES IN TURKEY.

The following extracts are taken from reports recently received by the Imperial Ottoman Bank:—

Stamboul, March 13.

Exports.

Opium.—The market is quiet, and the prices are weak at £T9.25-£T9.50 Druggist. Purchases of the week are insignificant, and transactions are practically nil. The restrictive measures which are being imposed in America are influencing business.

Mohair.—Purchases for America decrease. Some transactions have been effected for England. Sales of the week amount to 500 bales. Quotations per oke:—Extra Ps. 120, I. Ps. 110, II. Ps. 100. Konia Ps. 100. Stocks here are estimated at about 3,000 bales.

Wool.—The tendency of the market is weak. Some arrivals from Roumelia for export are to be noted. Prices are Ps. 62-63 I., Ps. 55-60 II.

Silk.—Market quiet, with a weak tendency. Prices have fallen by £T1 per kilo to £T28-£T28½ Broussa.

Cereals.—Prices, after having fallen at the beginning of the week by Ps. 2 the oke, have recovered, owing to the lack of arrivals, the present quotations being Ps. 15½-Ps. 16 tender wheat, and Ps. 14 hard wheat.

Stamboul, March 20.

Manufactures.

The improvement in prices noticed last week has continued, and for certain articles prices have risen by 10 per cent., this fact being principally caused by purchases made both as a speculation and as a means to satisfy internal consumption. The events that have just happened at Constantinople, however, have restricted business. Demand has suddenly ceased and prices are low. On the other hand, the formalities with which the merchants of the interior (mostly Mohammedans) are forced to comply have an equally adverse effect on trade. It may be stated, therefore, that there is a certain monetary depreciation, which, however, it is believed is only temporary.

Trade prospects in general remain good, in view of the firmness of the exchange in manufacturing countries.

Produce.

Sugar.—After a period of continued high prices, which have caused the rate to rise from £62 to £120, the sugar market this week has been subjected to a reaction from £5 to £6, following important arrivals. Events of the week have equally had their effect upon demand. On the other hand, tenders from Java, made at reduced prices, and a tender of from 4,000 to 6,000 tons of sugar from Holland had a depressing effect upon the market. The actual cost is £114 the ton in transit, and £T58 the hundred kilograms for sugar in customs.

Coffee.—The market is slightly stronger, the article being demanded as much for local consumption as for neighbouring ports. Prices are from 65 to 70 piastres the oke, for transit, and from 80 to 90 piastres the oke in customs, according to the quality.

Rice.—Several arrivals from Batoum have caused the price of Caucasian rice to fall to 28 piastres the oke. Although holders of American rice are disposed to make concessions, the scale of prices is so great compared with that of Baku rice that all transactions in American rice are rendered impossible.

A Department of Transport has been created for the French zone of Morocco to deal with all matters connected with military and civil transport by rail and sea.

LANCASHIRE COTTON.

Market Remains Inactive.

(From Our Own Correspondent.)

Manchester, Monday.

The tone of the market continues decidedly quiet. During the past week all interest has been centred on the developments relating to the wages question, and, owing to the employers having offered Government arbitration and this suggestion being refused by the leaders of the operatives, a complete deadlock has come about in the negotiations. The workers are now making arrangements to hand in strike notices, which will expire on April 30. The outlook is gloomy, and many people have made up their minds that a strike will take place. In the circumstances the Manchester market has been rather depressed. The reports being received with regard to the Egyptian crop are not very favourable, and it is said that the plants are 10 to 15 days late. Egyptian cotton has been purchased sparingly by Lancashire spinners. In Egyptian yarns sales of weight have been isolated. Something can still be done in numbers suitable for tyre cloths, but ordinary trade has been poor. No revival of demand can be recorded in cloth for Egypt. Supplies, however, are being well taken, and the prospects are fairly encouraging. Business has been comparatively slow for the Levant, and orders for Turkey are still being held back. Only scattered sales have been put through for India. Less satisfactory advices have been received from China, and the recent fall in the price of silver is an unfavourable development. South American markets have given very little support. Some manufacturers are now refusing to quote, as a result of the uncertain prospects with regard to the wages question. American yarns for home consumption have been purchased sparingly at irregular rates. Comparatively little has been done in export numbers.

NEW COMPANIES.

Alexandria Banking and Trading.

The Alexandria Banking and Trading Co., Limited, has been registered with a nominal capital of £20,000 in 500 founders' and 4,500 ordinary shares of £4 each. Objects: To carry on in England, Egypt, and elsewhere the business of bankers, merchants, commission agents, brokers, insurance agents, carriers, etc. The first directors are: S. K. Constantinides, 27, Boulevard Ramleh, Alexandria, banker; P. B. Hadjipanos, 20, Lancaster Gate, W., advocate. Registered office, 32, Great St. Helens, E.C.

Algerian and Morocco Trading.

The Algerian and Morocco Trading and Development Co., Limited, was registered as a private company on April 7 with a capital of £3,000 in 2,500 £1 ordinary and 10,000 1s. deferred shares. Registered office, Metropolitan Chambers, 10, New Broad Street, E.C.

OIL OUTPUTS.

The Roumanian Consolidated Oilfields, Ltd., announce: Production for month of March, 2,594 tons. Work was suspended four days, March 14 to 17.

The Anglo-Egyptian Oilfields, Ltd., report: Gemsah production, week ended April 11, nil (last week nil); Hurgada, same period, 2,176 tons (last week 2,258 tons).

The receipts of the Egyptian Markets, Ltd., for the week ended March 31 were:—Cattle markets, £997; general markets, £675; total, £1,672; total for year, £28,030. There were no receipts for the corresponding week in 1919 owing to local disturbances.

GREEK TRADE REGULATIONS.

Certificates of Origin for Imports.

A circular issued by the Greek Ministry of Finance to the Greek Customs authorities concerning the verification of the origin of merchandise and the application thereto of the "general" or "Conventional" rates of the Greek Customs tariff, provides that the "Conventional" rates of duty are to be applied whenever a certificate is produced from the Greek Consular authority of the place of origin of the goods, to the effect that such goods come from the market of a country with which Greece is bound by Convention. Special attention is directed to the necessity of verifying the actual origin of goods coming from "transit warehouses" in countries having Conventions with Greece. Instead of Consular certificate, a certificate from the Chamber of Commerce of the town from which the goods come, attested by the competent Greek Consular authority, may be accepted.

By way of exception, certificates of origin are not required for the application of the "Conventional" tariff rates, for goods coming direct from countries situated out of Europe and beyond the Suez Canal and Straits of Gibraltar, when the original bills of lading, showing the origin of the goods, and that they are destined for Greece, are produced. In the case of goods which are a speciality of the country of origin or which come from a country which has a monopoly of the production (e.g., wines of a certain class, such as Bordeaux, Port, etc., English herrings, Spanish conserves, etc.), the Greek Customs are authorised to apply the "Conventional" tariff, even if no certificate of origin is produced, if they are convinced by the nature of the goods that they come from a country with which Greece is bound by Convention. In case of doubt, the Customs authorities may demand the original bills of lading.

YUGOSLAV FINANCE.

The Department of Overseas Trade is informed that the Government of the Serbs, Croats, and Slovenes have been considering the Bill on the Budget votes for the months of September, October, November, and December, 1919, and for January, February, and March, 1920, as well as urgent fiscal measures.

The Skupechtina will be asked to vote the following amounts for the expenditure for the four latter months of 1919, estimated at:—Dinars, 646,593,217; kronen, 530,076,309; and for the first three months of 1920:—Dinars, 323,296,606; kronen, 365,027,697.

Provision is being made for (1) the grant to the Government of additional and extraordinary credits, to be determined by the Council of Ministers, and the credits included in the Finance Bill for the Budget year 1919-20, viz.:—Dinars, 301,890,254; kronen, 521,519,467. (2) The grant to the Government of additional and extraordinary credits for the months of January, February, and March, 1920, of: Dinars, 200,000,000. (3) The grant to the Ministry of War for the gross expenses for the maintenance of the army up to May 31 of a further credit of: Dinars, 250,000,000.

The Ministry of Finance proposes to increase the State revenues by new schemes of taxation, as follows:—(1) To extend the imposition of the taxes provided for in the law for the old Kingdom of Serbia to all the territories of the S.H.S. Kingdom. (2) To increase certain taxes in Croatia 100 per cent. (3) To raise the taxes throughout the whole country either to triple or to four and five times their present amount. (4) After the necessary preliminary increase according to the preceding article, to double once again certain of the taxes in question; to increase the other taxes in Dalmatia and Slovenchka 400 per cent., and finally certain legal taxes in Croatia and in the Voivodina 800 per cent.. (5) To impose a tax on the entrance tickets for theatres, cinemas, and other public performances and amusements, racecourse, etc., which, according to the prices of admission will vary between 20 paras and 10 dinars.

The Imperial Merchant Service Guild learns that two leading steamship companies have decided to calculate the pay of their employees in Indian waters at the fixed rate of 12 rupees to the £.

For BUILDING UP your HEALTH take

WILKINSON'S (Estd. since 1829)

ESSENCE OR FLUID EXTRACT OF RED JAMAICA

"We cannot speak too highly of it."—LANCET. **SARSAPARILLA**

(The best "Pick-Me-Up")

Pronounced by the HIGHEST MEDICAL AUTHORITIES the Safest and Most Reliable Remedy for

Torpid Liver, Debility, Eruptions, and the most WONDERFUL PURIFIER of the HUMAN BLOOD.

IMPORTANT EVIDENCE.—"We recommend your Jamaica Sarsaparilla."—MEDICAL REVIEW.

"The only preparation for removing what may be called the sequelæ of a mercurial course."—SIR R. MARTIN.

The late LORD CLYDE said :—"I am never without it, for when feeling depressed or out of sorts from anxiety or fatigue, a dose or two animates me."

"It cured me of Torpid Liver after all other remedies failed."—EARL OF ALDBOROUGH.

N.B.—Indispensable to all who value Health.

World-wide Reputation for over Three-Quarters of a Century.

NOTES OF THE WEEK.

In the first half of last week reports from San Remo were pessimistic in tone, and the political atmosphere was admittedly sultry, though not, perhaps, so sultry as a section of the Press would have had the world believe. Later, things improved rapidly, and at the time of writing the sky is comparatively clear again, and we may reasonably hope for a spell of fine weather. In spite of the conditions not being entirely favourable, much progress has been made towards reducing the Near Eastern muddle to something like order. Official and semi-official *communiqués* have informed us that the future of Smyrna has been settled, as has that of Kurdistan, that the mandates for Mesopotamia, Palestine, and Syria have been conferred—the first two on Great Britain and the third on France—and that "the question of the new Armenian State" has been "settled." Moreover, many minor questions of financial detail in connection with the Peace Terms for Turkey have been under discussion, and the Supreme Council has devoted a good deal of time to preparing its reply to President Wilson's Note on the Turkish question. According to one report, the Council also found time to "discuss" the Sudan; but it is hard to believe that it can have wasted its energies on such a distinctly superogatory work. Cyprus, it appears, is not to be discussed—just yet, at any rate.

Thus far the official *communiqués* have told us nothing about the future of Adalia and that very considerable portion of Asia Minor which was generally understood to be regarded by Italy as her own particular "sphere of influence." According to reports from usually well-informed sources, Italy has actually renounced her hopes in this direction, at least to the extent of desiring only economic rights and privileges in the area referred to. This would undoubtedly appear to be sound policy on her part, whether it be dictated by a realisation of the difficulties that would attend any attempt to impose her sovereignty over the region referred to, by a desire to strengthen the good opinions she has won in Turkey recently by the policy she has been pursuing, or by the hope—or certainty—of securing "compensations" elsewhere. Possibly a combination of such considerations as these may account for her decision, if she has actually taken it. In any case, if she has so decided she is to be congratulated on her sense and courage.

The announcement that Great Britain is to be the Mandatory Power for Palestine disposes of those foolish rumours which a few weeks ago gained credence in America, and thence found their way to this country, accompanied by notifications of the various dreadful things that might be expected to befall Great Britain if she failed to act honourably. Zionists and Jews throughout the world have received the news of the Council's decision with an unfeigned enthusiasm distinctly flattering to us as a nation. The task that now devolves upon Great Britain is, however, no light one; she must redeem her pledge not only by facilitating the establishment in the Holy Land of a national home for the Jewish people, but also by seeing that other peoples living in the land are fairly treated; and recent events go to prove that her position as Mandatory will be no sinecure. There will be plenty of other difficulties, apart from those caused by racial differences. Outside the Jewish colonies the country is in a backward state, and at the present time it is producing only enough wheat to supply three ounces a day for each inhabitant. As supplies from the Hauran have been cut off by the Arabs, and the French are preventing exports from Syria, it is obvious that Palestine would be in a bad way were it not for the supplies of Australian corn which are being imported by Great Britain. This state of affairs will almost certainly be altered very soon: Jewish energy and Jewish finance will see to that. And Great Britain, with her wide experience of similar work in other parts of the world, will surely prove equal to her new task, which is an honourable one and will prove, we hope, a not ungrateful one.

When it was announced three weeks ago that the Supreme Council had offered the mandate for Armenia to the League of Nations the view was expressed in these columns that the League could not accept the position without stultifying its whole existence. The Council of the League has endorsed the opinion by pointing out the functions of the League of Nations, as contemplated by the Covenant, are rather to confer mandates upon individual States under its general supervision than to undertake mandates itself. This is so obvious that it remains a matter for surprise that the Supreme Council could have ignored the point, and it is no less amazing that a body in this country which exists to mould public opinion in favour of the idea of the League of Nations should have placed on record the hope that the Council of the League would not lightly reject the offer. The cynic will be tempted to say that, if the Supreme Council has not grasped the idea underlying its own creation, there is little wonder that it has failed to master the intricacies of the Near Eastern problem and to evolve a satisfactory or lasting settlement.

Digitized by Google

The Council of the League of Nations, realizing that the Prime Ministers forming the Supreme Council have strayed quite out of their depth, has profited by the opportunity to come to their rescue. It points out that it disposes of no funds or forces of its own for the performance of a task so weighty as that of the control of Armenia, and then gently suggests what ought to have been the proper course of action of the Supreme Council. It offers to ascertain whether any member of the League would be prepared to assume a mandate for Armenia, but before doing so it must know what the material conditions attaching to such a mandate would be. This is precisely the information that the Supreme Council ought to have provided when it made the offer of the mandate, and the fact that it offered the mandate before it had indicated the source of the funds necessary for the administration of Armenia, or had even fixed the boundaries of the country, is a measure of its muddle-headedness. The Council of the League is to be congratulated on seeing things more clearly. Indeed the incident must confirm the opinion already widely held that the sooner the Supreme Council makes way for the League of Nations the better. What is required is the opportunity of revising some of the decisions of the Supreme Council, free from the play of rival passions and in the light of expert knowledge.

Another San Remo decision regarding Turkey which has been made known—semi-officially—in the past week concerns the Straits. These will be internationalized, and, it is understood, will be administered by a committee working much on the lines of the Suez Canal administration: while a second committee, of a military character, will be charged with the defence of the Straits against attack, having (for the present) Allied detachments at is service. The port of Batoum also is to be internationalized and made a common outlet for Armenia, Azerbaijan and Georgia. If these arrangements are to be worked successfully their details will require very careful planning out.

Smyrna is to be placed under Greek administration, but is to remain under Turkish suzerainty. It appears that it is to be a free port, and will have a Parliament of its own: but the whole arrangement is merely temporary, for five years hence a plebiscite is to be taken for (or against) complete union with Greece and the abolition (or retention) of Turkish sovereignty. It would be easy to pick holes in this arrangement, but it certainly constitutes a great personal triumph for M. Venizelos, who has known how to obtain the prize in spite of the unwisdom of some of his countrymen and the very unsatisfactory attitude of Greece under Constantine in the early days of the war. If it be true, as is reported, that Greece is also to receive the whole of Thrace up to the Chatalja lines, M. Venizelos's success is all the more remarkable, though it would be open to doubt whether such a success would be entirely a matter for congratulations to Greece, in view of the feeling it would create in Bulgaria.

In spite of the great anxieties that must press on him as the time draws near for making the Allies' Peace terms known to Turkey, Damad Ferid Pasha continues his courageous efforts to import some sort of order into Turkish affairs and to bring the Nationalists to book. Conscious that the army has been so thoroughly impregnated with Committee views that it is not a trustworthy instrument to employ against the Nationalists, he is calling for more volunteers, and it is to be hoped that his appeal will meet with an adequate response. The Nationalists recently inflicted a check on Ahmed Anzavour Pasha's forces, owing to the latter running short of munitions and supplies; but reinforcements have been dispatched, and it is anticipated that the Brusa vilayet will very shortly be swept clear of Nationalists. No better evidence of the Grand Vizier's sincerity about putting the Turkish house in order could be forthcoming than his decision to remain at home, rather than go to Paris at the head of the Turkish Peace Delegation. The delegation will now be headed by Tewfik Pasha, formerly Turkish Ambassador at the Court of St. James's. The Allies, having made preparations for all eventualities in regard to the signing of the Treaty, or a Turkish refusal to sign, have allowed an outline of their plans and estimates to be published. The wisdom, to say nothing of the taste, thus displayed does not appear to be above criticism.

The opening of the informal discussions regarding relations with Afghanistan appears to have set India thinking once again over that even more difficult problem, the pacification of the independent tribes that occupy the intervening territory. The question is by no means new, for the Mogul administration was perplexed by it more than three centuries ago, and its essential features have persisted practically unchanged. The tribes regard India as their natural prey, and have not the slightest desire to be pacified. India stands them as long as possible, and then inflicts more or less severe punishment; and so *da capo*. Obviously some permanent amelioration of the position is to be desired, but in this country at least the critics seem to have no very definite constructive policy, and perhaps the general opinion is fairly represented by the comment in *The Times* that the question is so difficult that it is best left to the judgment of the Government of India—a handsome tribute, by the way, to the capacity of a body which has of late had a very indifferent Press.

The position of the Government is in many ways analagous to that of an industrial concern, using an imperfect process which involves heavy recurring expenditure. Theory indicates that the defective plant should be scrapped, and capital invested in some more economical machinery, but the difficult calculations regarding cost and profit cannot be worked out on theoretical grounds, and in regard to them the last word rests with the technical experts. In the same way the Indian public, chafing under the heavy recurring toll of life and property, urges that the offending tribes must be subjugated once for all, and their territory brought permanently under some form of civilised administration, but the methods to be adopted and the financial questions involved call for expert decision, and so the weary Titan at Simla must use his own judgment in the last resort. So much at least seems certain, that Lord Curzon's policy of relying on the tribal forces has definitely broken down, and the problem is to some extent simplified by the elimination of one alternative; but permanent amelioration requires force of some kind, and the practical question is whether the Government sees its way to providing the force on which any form of civilised administration must be based.

There seems to be some tendency in this country to attach importance to the report of the self-appointed Congress committee on the Punjab disturbances of last year, though, so far, we have only found one journal accepting it as an official pronouncement. To our mind, this attitude is a mistake; the circumstances in which this unofficial enquiry was instituted and conducted deprive the report of any independent evidential value, except, perhaps, as regards the tactical skill of the extremist party, and we advise our readers to preserve an open mind pending the issue of Lord Hunter's report, in which they may be reasonably confident of finding the essential facts stated with judicial fairness and precision. What actually happened is, of course, well enough known, and had been fully described in India months before the English papers took the matter up; but the interpretation of these happennings depends on other facts, to which the unofficial committee had no access, and which have not yet been published in detail; the importance of Lord Hunter's report consists in the statement of these underlying facts and the examination of their bearing on the events which have become notorious.

To our mind, Lord Meston's award on the question of the representation of non-Brahmins in the Madras

Digitized by Google

legislature is a thoroughly statesmanlike document, and one which should give southern politics the reality they have hitherto lacked. The non-Brahmins have a great preponderance of votes, justified by their preponderance in numbers, but they fear that the influence and organisation of the Brahmin minority may be used to nullify this preponderance and return a Brahmin legislature; they asked, therefore, that an actual majority of elective seats should be reserved for them, and Lord Meston had to pronounce upon this claim. He decided against it, mainly on the ground that the guarantee of an absolute majority would tend to confirm the community in the present condition of stagnation, and he assigned to them instead a substantial minority of seats, sufficient in any case to give them an effective voice in Council, and at the same time offering a much-needed stimulus to organised effort. That seems to us the work of a skilled handicapper; the man on the limit should not be given a certainty, but only such a start that he will have a reasonable chance of winning by his own exertions.

Naturally, the non-Brahmins are not satisfied with this decision, for hardly anyone likes to be called on to exert himself, and numerous protests have appeared in the Indian Press, while the representative non-Brahmin organisation in this country has favoured us with a detailed statement of their objections. The medicine is, however, beginning to work, for we notice that a large meeting in Madras was not content with protest, but passed a resolution calling on the community to organise and carry on an active political propaganda with the object of securing as many seats as possible. That is the spirit which we hope to see manifested, and not in Madras only, but throughout the length and breadth of India. The new conditions call for effort and organisation; seats in Council must be regarded as goals, and not as doles; and, while backward communities may fairly seek a handicap in the early stages, they will do no real good until they learn the lesson that success in the race depends on their own exertions more than anything else.

THE WEEK AT HOME.

The Budget.

To all appearances the public have paid regrettably little attention to the San Remo discussions, and unless somebody discovers the remains of the ark on Ararat—which would help to reduce the shortage of houses—I am afraid the ordinary voter will be content to let the Armenian problem remain the Armenian problem. The Budget is so much nearer home.

On the whole, Mr. Austen Chamberlain's proposals have been well received. It is true that Mr. Harold Cox has condemned it as unheroic, but Mr. Cox is a veritable financial Parsifal. Mr. Asquith praised with faint damn, the Labour Party had little criticism, and although the Coalition and the City dislike the excess profits tax, they are not quite sure whether they would not object to a levy on war wealth still more. The attitude of the Chancellor of the Exchequer has been criticised by the interests, and his plain speaking resented, but the public have admired his pluck. He was told, he says, that if he reduced the excess profits tax prices would fall; very well, he reduced the tax by half in 1919, and prices rose. The plain fact is that when the demand for goods is greater than the supply of those goods the man who deals in them cannot help making money; the risk is eliminated, and once the risk of loss is eliminated there is a strong case for a special tax on the accruing profits. I am afraid the City will not get much sympathy. The real objection against the excess profits tax is that it is a handicap on new enterprise; but the great firms of old standing naturally preserve a discreet silence in that aspect, since they have no dislike on general grounds of the handicapping of youthful competition. The new corporation tax, which operates more fairly altogether, is destined to take its place after a year or two.

It will be interesting to see whether the new tax on wines and cigars leads to a diminution in the amount consumed. I believe most men economise on cigars more readily than on drinks; the consumption of cigars has certainly gone down now they are anything from one to five shillings apiece, but in clubs and restaurants one sees no sign of any reduction in wine. Indeed, a club secretary told me the other day that as a certain brand of champagne in their cellars was running short and could not be replaced they put up the price five shillings a bottle, in order to check its consumption; but the increase made no difference whatever. It is perfectly amazing to see how many people drink champagne, or what passes for it, in these days; it looks as though we intended to repeat the process of drinking ourselves out of debt which our heroic three-bottle fathers accomplished at the cost of hereditary gout.

The Budget as a whole is undoubtedly having the result of raising British credit abroad, and that in itself will do much to offset any small effect it may have in raising the cost of living at home. Prices seem determined to rise whatever happens, so that the Budget can hardly make much additional difference.

New Labour Demands.

The cycle of Labour unrest is in full swing again. Cotton operatives in Manchester are demanding another 60 per cent.—a modest claim which probably rises from the speculation and high profits of the cotton mills. The railwaymen are threatening unutterable things if they do not receive another pound a week—this because the dockers have got more, and a railwayman is superior to a docker. The miners are satisfied for the moment, having apparently succeeded in putting up coal another ten shillings or so a ton next winter; but tailors, sempstresses, waiters, and even undertakers' assistants are all putting forward fresh demands. In consequence, the Food Controller foretells higher prices than ever in 1921.

How far the movement has gone is shown by the fact that even the House of Commons last week discussed the question of higher wages—for itself. It appears that £400 a year is not enough; one member said he could make more money in a coal mine, but I suppose he would have to work in a coal mine. The Government turned a deaf ear to the appeal, and the public have not shown themselves to be enthusiastic over paying their legislators more. After all, members of Parliament cannot very well go on strike, and if they did it would not matter very much.

Two By-Elections.

The electoral tide still flows in favour of the Government. They have won two more by-elections this week, and those both in Edinburgh, the very pride and centre of Scottish intellect. Even Mr. Runciman's eloquence did not move the Liberals of the Northern capital to vote for him, and they do not seem to have taken very seriously that fabulous Celtic ancestry which he discovered for the occasion. It must be admitted that the rejection of Mr. Runciman is a bad blow for the Independent Liberals; for the last ten years he has been one of their shining lights, and the touch of piety in his speeches was always considered a personal asset of some value by the hero-worshippers, who predicted a great future for him. The few Asquithians who are left are now convinced that Mr. Lloyd George has sold himself to the devil, and is invulnerable for a term of years.

English Tobacco.

In discussing the prospects of British agriculture last week, Sir Arthur Boscawen gave some details of the new home-grown sugar enterprise, which was commented on in this column a few weeks ago, but he also surprised most of the public by the further announcement that the Government had started or encouraged tobacco-growing in Norfolk.

Of course, there is no real reason why tobacco should not be grown in England; the crop was tried in the reign

Digitized by Google

of James I. But the Customs have always frowned on the idea, and although a little was produced in Hampshire a year or so before the war, a few chance fields of nicotine plants could hardly be called an industry. Now things are different, and apparently we are going into the business seriously. It is an easy enough crop to grow; the curing is the difficulty. It may be assumed that the Government have secured good expert advice on the matter.

The Coming Drought.

Mr. "Pussyfoot" Johnson has landed in New York, and has prophesied to the reporters that England will be dry in ten years. Naturally he professes faith in victory—it would be a poor crusader who did not. But the reason he gives is interesting. "Surface indications do not bear out my prediction, but underlying developments do. I've talked with captains of industry and men in all walks of life—not total abstainers—and they told me England would have to be dry in order to compete with dry America." In other words, the survival of the fittest. But in America Prohibition is accused of being the cause of Labour unrest, which hardly promotes keenness of competition, and in England the working classes have certainly resented the idea of restrictions being imposed.

The Birth Rate.

Some curious evidence as to the birth-rate was given by Dr. Stevenson, Superintendent of Statistics, at a lecture during the week. It appears that the professional classes are with one exception the least fertile in the kingdom—the one exception being that of people who describe themselves as of private means. In the latter case freedom from anxiety appears to result in lack of enterprise, thus confirming Galton's view that inherited wealth is a sure steriliser. The birth-rate of Nonconformist ministers is a little above that of the low minimum of the professional classes as a whole; that of the Church of England, in spite of the proverbial jeer at the penniless curate with a dozen children, is slightly below the average; but the survival rate is high—which speaks volumes for the excellence of the parson's wife.

House Rent.

The housing question appears in process of being solved, the solution being that rents shall be raised 40 per cent. during the next three years, so that landlords will be able to afford repairs, and capital will be encouraged to enter the building trade. Whether, after the discovery of this happy means of building fresh houses, anybody will be able to afford the rent to live in them is a debateable problem, but as a matter of fact the 40 per cent. will cover repairs to existing houses, but the cost of building new houses is up 100 per cent. above that of 1914, so that unless the Government subsidy is increased the new houses will hardly keep pace with the demand. One thing is certain—higher rents mean smaller houses for everybody.

The rush to buy on the part of unhappy householders who, for one reason or another, have to find a new home is worse than ever, largely through the extortionate profiteering of the people who let furnished houses. I heard a strange story of a man who died one Sunday morning; in the afternoon the house agent was on the widow's doorstep offering to buy her house for immediate possession. I forget whether he insisted on immediate burial of the deceased owner.

Theatre Prices and Wages.

The prices of the London theatres have been raised a shilling or two a seat; and *post hoc* but perhaps not *propter hoc*, the London builders are demanding another couple of pounds a week. No guarantee is given that higher prices for seats mean better plays—most of them could not well be worse—but probably little will be done to improve the quality of the drama until a real slump in theatre-going sets in. Already there are signs that attendances are less than during the war, but one still sees people waiting outside the gallery and the pit three or four hours before the doors are open, so the managers will not be seriously alarmed at the prospect of bankruptcy for the present. Furthermore, while the demand for houses continues, it will be difficult to put up fresh theatres, and therefore competition is restricted.

The Cup Final.

Judged by the crowd that attended the Football Association Cup Final last Saturday in London—a mere fifty thousand—football, although still popular as a league game, does not attract as a cup spectacle to such an extent as before the war. Aston Villa won the Cup after a rather tedious match with Huddersfield, in which no goal was scored until extra time had been played. The play followed the tradition of Cup finals in being careful rather than brilliant, but there were some regrets that Huddersfield, a new club which has fought its way up very pluckily, came so near to triumph and lost at the post.

The Week's Books.

Nobody has yet succeeded in explaining why the Government should have violated all precedent by appointing a scholar and a teacher to the Education Office, but the experiment of putting Mr. H. A. L. Fisher in charge of that dreary department appears to have justified itself. But it has justified itself at the cost of literature, for most of the "Studies in History and Politics" (Oxford University Press) which Mr. Fisher has just issued were written before he became one of our rulers. The studies are quite admirable, ranging from discussions of such different historians as Ammianus Marcellinus and Lord Acton to a survey of the position of the small state—a problem which the present political geography of Europe has made acute.

The late Canon Scott Holland had many admirers, and he was both an eloquent preacher and a voluble writer—indeed, two voluble, for an excess of words often covered and sometimes drowned a rather thin thought. Most of what he wrote was little more than daily or weekly journalism of the socio-religious kind, but some of his work has been thought worth preserving, and I see that Mr. Murray has announced a book on "The Philosophy of Faith," as an attempt to give Dr. Holland's teaching as a coherent whole; it is also to contain an essay on the study of the Gospel of St. John. It will no doubt appeal to those who recognised in him one of the great orators of the Church.

Two very different books happen to have come my way on the same day; I can cordially recommend them both, the first to physiologists, the second to sportsmen. "The Engines of the Human Body" (Williams and Norgate), by Arthur Keith, is a really brilliant account of our personal machinery; and "Cricket Reminiscences" (Grant Richards), by P. F. Warner, the old West Indian and Middlesex captain, recites the memories of one who has put some at least of those engines to excellent use. It would not be true to say that Mr. Warner writes as well as he bats, but his memories are extremely interesting.

Mr. Maurice Hewlett has issued a volume of poems with Constable, under the title of "Flowers in the Grass." Mr. Hewlett is another instance of a novelist who has made some mark as a poet; but I am not altogether convinced that this volume will increase his fame. It contains fine things; but it also contains other things.

I have been reading with interest Professor Bury's "The Idea of Progress" (Macmillan). The author is the most learned historian of the day, and his work is always interesting. Here he points out that the Greeks and Romans knew nothing of the general idea of progress; the mediæval world, based on the theory that this mundane life was relatively unimportant, was equally static; only after the Renaissance did the idea of human progress become generally embodied in philosophic thought. He traces its real origin to Bacon and Descartes, follows it through the writings of the French Encyclopædists, and brings it down to Darwin and Spencer—the latter of whom assumed, with the cocksure optimism of his age, that progress was inevitable. Professor Bury remarks that a very important extension of the logical idea of progress has appeared in the last few years, with the increasing thought of the care due to posterity.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, April 5.

I understand that the High Commissioner will issue a report on Egyptian affairs during the next two or three months. The last "Agency" report was published in 1914 and dealt with the progress and development of the country during 1913. Since then, apart from spasmodic publications issued by individual administrations and the answers to questions in the House of Commons, no official report has been published. In the circumstances, the report, I understand, will concern itself with the war period and events since the Armistice; though whether it will deal with the political situation from any but the historical point of view is doubtful, in view of the task entrusted to the Milner Mission.

Sir Valentine Chirol, who is still contributing articles to *The Times* on the local situation, left this week for England. He has just completed his book on the Egyptian question, which will be published shortly, and will, I understand, deal very frankly and exhaustively with each of the factors dominating the Egyptian situation.

The Damascus Coup D'Etat.

The Damascus *coup d'etat* created a certain amount of excitement among the students and the rest of the *intelligenzia*, which, perhaps, was to be expected. The Allied occupation of Constantinople seems, however, to have stabilised the situation somewhat, showing once again what an important influence the display of determination (or the reverse) on the part of the Allies in Near Eastern matters has on the people in this country.

As regards the question of Constantinople, it is exceedingly difficult to arrive at the real trend of public feeling. As a weapon against Christians in general, and Great Britain in particular, the proposal to turn the Turks out of Europe is a very useful one in the hands of the Extremists, but so far the only attempt to create a movement in this connection has been made by the Vice-President of the Nationalist Party, Ali Bey Kamel, the brother of Mustapha Pasha Kamel, who has been trying to collect signatures to a protest in this connection.

The difficulty in which the Extremists find themselves in this respect is that they have nobody to whom they can address their protest. The Sultan they affect to disown; the Allies are "interested" parties; whilst the channel open to the Indian Moslems, viz., Great Britain, has been closed to them by their own obstinate refusal to recognise the Protectorate. Indeed, the attempt that has been made by one of the leading Nationalist organs to explain why Egyptians appear to take less interest in the question than their Indian co-religionists, has been very lame, and has merely served to accentuate the absurdity of their attitude on the local political issue.

The Rush to Berlin.

The Extremist press is making much ado over the accident which has befallen the Egyptian students in the Vienna express. Every one sympathises with these young men and their families; but even allowing for Oriental extravagance it must be admitted that the vernacular press is losing all sense of proportion when it holds up the victims of this railway accident as martyrs for the national cause, and makes such suggestions as that they should be exhumed, embalmed, and brought back to Egypt at the State expense, and that a monument should be erected to their memory. A good many students have gone to Europe during the last two or three months, practically all to Berlin, and the 150 odd who were on the Helouan with Lord Milner were but one of many such parties. The fact is that there has been considerable propaganda of late in the direction of inducing young Egyptians to go to Berlin to study, and it appears certain that this propaganda is part of a wider project for recruiting potential pro-German and Bolshevist agents. The young men, who have been induced to go to Berlin do not come of the better element, and, consequently, may turn out to be all the better agents for the purpose for which they are being attracted to that city. It is much to be regretted that at a juncture like the present it should not have been found possible, owing to overcrowding due to the war, to accommodate Egyptian students as usual in England; but it is extremely unlikely that this factor has had anything to do with the present development, since, on the one hand, many of the students have left Egypt for Berlin before the completion of their secondary course, and, on the other hand, quite a number have interrupted their studies in England in order to go there. There can be no doubt that the presence of so many young Egyptians in the German capital at the present juncture constitutes a very serious danger in the near future, and that extensive precautions will have to be taken to prevent them from becoming in Egypt and the Middle East agents for pan-Germanism—and now Bolshevism—as Enver and the Young Turks of his generation became in Turkey and the Near East after the ex-Kaiser's visit to Constantinople.

CAIRO, April 12.

It is understood that the seat of Government will not be transferred to Alexandria until late in the summer this year. The Ramadan Fast falls in the middle of May, and the Palace intends to wait until after the Feast of Beiram, which comes at the latter end of June, before moving to Alexandria.

The Political Situation.

Beyond one or two minor demonstrations, which were quickly dealt with, Shem El Nessim has passed off quite peacefully. The political situation continues unchanged, but I understand that Adly Yeghen Pasha will leave at the end of this week for Paris, where he will meet Zaghlul Pasha, and will discuss the situation with him with a view to proceeding with him to London in order to negotiate with the British Government. It is possible that Hussein Rushdi Pasha and Sarwat Pasha may follow later on.

"Summer-Time" in Egypt.

The lighting restrictions and the necessity for economising coal have caused the question to be raised whether daylight saving as it is practised in Europe might not be introduced, and there is a campaign in favour of this innovation. Those who support this reform fail, however, to take into consideration three very important factors. The first is that lighting facilities do not affect the majority; indeed, the very large majority of the population—*i.e.*, the fellaheen, who invariably rise with the sun and go to bed with it, and for whom clocks have little value in the regulation of their lives. The second is that the remainder of the population, those in the towns, already resort to what may perhaps be called a summer-time device of their own, in that as soon as the summer comes in everyone adopts a different working time-table. Thus from May to October Government offices, banks, and commercial houses open their offices earlier in the morning, and since in neither of the first two categories, and in very few of the third category, is work done after lunch during the summer, the putting back of the clock by one hour—seeing that it would not mean that any more work would be done during daylight—would serve no useful purpose. The third factor is the most important of all—*viz.*, the climate. No amount of juggling with the clock will cause the sun to shine less strongly at 5 p.m. under the proposed new time-table than it does at 4 p.m. under the old time-table. It is the habit of the indigenous and of most of the European section of the population to rest—in many cases to sleep—from lunch-time until the sun has dropped to a certain point on the horizon, when they emerge from their houses for the daily promenade. It

Digitized by Google

is obvious that these people will not get up from their siesta one hour earlier, but that, on the contrary, summer-time will make them devote one hour more to it. Again, the fact that the clock has been put back one hour will not get people to bed any earlier. Their retiring-time at night, like their siesta-time in the afternoon, is dependent upon the temperature, and not upon the clock. During the hot part of the summer practically everyone remains up until after midnight in order to take advantage of the cooler breezes, which always set in at that time, and under "summer-time" they will merely sit up until 1 a.m.

ROUMANIA.

BUCHAREST, April 15.

Political.

The Easter holidays have interrupted all Government work, the Ministries having been closed for a week. It is, however, announced that another formerly dissentient party has decided to throw in its lot with the Averescu Government. This is the National Union of Banat, under the leadership of M. Avram Imbroano, who, it may be remembered, spoke strongly in the Chamber against the signing of the Treaty with Austria.

Ecclesiastical Affairs.

The Bishop of Gibraltar arrived in Bucharest at the end of last week, and attended service on Sunday in the new English Church. The building of this church was begun just before the war, and, after many troubles and delays, has at last been finished, but owing to difficulties of transport it has been found impossible to get the pews, which were made in England, into their place. The altar, too, a gift from the Bishop, is still in England, and although services are now being held weekly in the church, it has not yet been consecrated. A generous subscription towards the building fund was given by the Queen, and many members of the British colony of Bucharest have supported it well.

On April 13 a reception was held at the British Legation to give British residents an opportunity of meeting the Bishop, and afterwards a church meeting was held at which the Rev. J. H. Adeney, acting British Chaplain, asked to be relieved of this duty, so that he might devote his whole time to his Mission work under the London Jews Society. This Mission has existed in Bucharest since the year 1840.

CYPRUS.

NICOSIA, April 3.

Municipal Elections.

There has been a good deal of excitement in some of the towns over the elections of Municipal Councils and Mayors, specially in Limassol. Here one of the leading members of the deputation to London, who is a member of the Legislative Council, and who was a candidate for the Presidency, has not even obtained a seat in the Municipal Council. As regards the Mission, the Press strives to keep alive the interest of the Greek community, which has somewhat flagged. The principal fact which encourages their hopes is that a new High Commissioner has not yet been appointed.

The "Festival of the Trees."

The arrangements for the "Festival of the Trees" were not carried out, owing to extremely bad weather; and unfortunately a good many of the village school gardens were almost destroyed by the storms. It is, however, hoped that the anniversary will be kept up in future years, and will help to impress upon rising generations the need of tree planting, and the great advantage to be derived from orchards and fruit culture, for which so much remains to be done. A number of private land owners have recently placed their plantations under the protection of the Forest Department, which they are able to do under a law passed in 1889. The Bishop of Kition has thus placed considerable properties under Government control and management. These are then subject to all the regulations affecting State forests.

The Deputation Again.

In accordance with the decisions lately arrived at, the Greek Mission to London is once more on the move. The Archbishop Kyrillos left on March 17, *via* Limassol, for Port Said, and sailed from Egypt by the Khedivial steamer "Helwan" for Trieste, which he was to reach on April 5. He will first visit Paris. The other members follow on March 25 or soon after, and include M. E. Zeno, the only Greek member of the Legislative Council who remained in Cyprus when the deputation paid its last long visit to England. They have issued an address to the people of the island, stating that they are carrying out the sacred duty which is imposed upon them by the Greek community in again seeking to obtain a favourable reply to their petition for union with Greece

Russian Refugees.

A number of these have already arrived. A Russian steamer brought 614 (chiefly women and children) to Famagusta on March 29. These have been placed in the internment camp at Famagusta, in a part vacated by some of the Turkish prisoners. Unfortunately, cases of typhus have appeared among them, notwithstanding the precautions taken by the Port and medical authorities; and it will be very necessary that the strictest measures should be adopted to prevent a spread of the danger. The Government has been obliged to prohibit the holding of a large fair (of Elias), which is of some importance. This necessarily causes considerable inconvenience to farmers and traders of the district and all who were preparing for it. Many more refugees are expected.

Motor Accidents.

There have been several accidents, including collisions, due in some cases to inexperience on the part of chauffeurs. The papers call for inquiries, and advocate a revision of the lists of those to whom licences have been granted, and the application of stricter tests. The narrowness of the streets of Nicosia and other towns renders great care and very reduced speed limits necessary.

Annual Sports.

The annual athletic contests between the English School at Nicosia and the American School at Larnaca took place on March 27 at Nicosia. A large attendance included the Acting High Commissioner, Mr. Stevenson, and leading persons of the British, Greek, and Turkish communities. The Larnaca athletes were the more successful.

General.

Crime keeps its level. The police have offered two rewards, of £100 in each case, for information that will lead to the arrest of two convicts undergoing sentences of seven and twelve years imprisonment respectively, who have escaped from gaol; and £50 for similar information in the case of a man charged with murder.

Mehmet Effendi Dervish has been appointed to act as Turkish Judge at Famagusta during the absence of Mehmet Effendi Halih, now studying for the Bar in London.

Personal.

Lieut.-Col. Gallagher, D.S.O., Chief Commandant of Police, will act as Commissioner of Nicosia, and also as British Delegate of Evkaf during the absence on leave of Major Bayly.

Major Bolton, O.B.E., Commissioner of Limassol, will act as Commissioner of Larnaca.

Mr. Edwin Edginton is appointed Island Postmaster, and Mr. Francis resumes his duties as Government Analyst.

Mr. Noble, Assistant Principal Forest Officer, has returned from leave in England.

Mr. Sims, Director of Public Works, has been appointed to act as an official member of the Legislative Council during the absence of Major Bayly.

SYRIA.

BEYROUT, April 10.

A Military Spectacle.

On April 6 a review was held here, probably the finest Syria has ever seen. It took place on the Place des Canons, where a huge crowd had assembled and filled every corner from which the spectacle could be witnessed. General Gouraud, who was accompanied by his Moroccan bodyguard, looking eminently picturesque in their flowing burnooses and turbans, took up his position at the southern end of the garden for the march past, which was a most picturesque and impressive sight. Moroccans were there, and Algerians, Tunisian and French infantry, Syrian volunteers and French cavalry. Druse mounted volunteers were there also, and light and heavy artillery, Red Cross detachments, armoured cars, and a score of tanks of the light French pattern; and throughout the review a dozen aeroplanes hovered over the square, glittering in the sun

Digitized by Google

as they performed various feats and evolutions. The citizens watched the review with keen interest and admiration

On the same day a social event of importance took place, in the marriage of Mlle. Jacqueline, daughter of Admiral Mornet, to Lieut. Lucien, son of Vice-Admiral Sourrieu. The ceremony was honoured by the presence of General Gouraud, and was attended by all the high officers of the French Army and Navy now in Beyrout, with a crowd of notables from the town and the Lebanon. The bride has the good wishes of everyone in the town, for Admiral Mornet is certainly the most popular Frenchman here.

THE SITUATION IN ALBANIA.

Our Albanian Correspondent writes:—

The people in Albania are optimistic, for the Government enjoys general confidence, and unity and peace have never been more perfect than at present. The chief concern is the maintenance of order. Since the Budget will not allow of the creation of a regular army, it is hoped to make good the deficiency by means of volunteers. The Malinia of Skutari, who never did any military service in the time of the Turk, have provided a battalion made up of young men of good family. One hundred and fifty of these mountaineers are already at Tirana under the orders of the Government.

Three hundred Albanians have arrived from America to place themselves at the disposal of the authorities as volunteers. Their arrival has produced a very good impression, for they are for the greater part Orthodox Christians of Kortcha (Koritza) and Argyrokastro. The Albanians in America—and they number 80,000—are extremely active in the interests of Albania. The head of their organisation is the great Pan-Albanian Society "Vatra," and it is due to the efforts of this society that the Department of Foreign Affairs at Washington has just recognised the official status of the delegate Constantin Gekrezi, who is now acting as Albanian Minister to the United States, and is thus the first diplomatic representative of Albania accredited abroad. This recognition has increased the liking for and prestige of the United States in Albania.

Financial Questions.

I have alluded before to the financial difficulties with which the Government finds itself compelled to wrestle. Expenses are very great, for Albania finds itself for the first time reunited under a single administration and government. The revenue is derived only from tithes, Customs duties, land taxes, and a tax on sheep and goats. Of all these revenues the Customs receipts are the most important, excepting the tithes. The mountaineers of Northern Albania, who paid nothing in the way of taxes under the Turkish régime, will pay henceforth, and the Legislative Assembly is elaborating laws in connection with this subject. It is also proposed to introduce a law increasing the *ad valorem* Customs duties on imports to 20 per cent. In spite of this, the receipts will be insufficient to meet the expenses, and the question of an internal loan is constantly discussed.

The Albanian Government will make representations to the Italian, French, and Austrian Governments regarding the sums of money which are due to it. The Treasury of the Kortcha district (French administration) has a balance of 5,000,000 francs; the Valona Customs has a balance of 4,500,000 francs; the Argyrokastro and Saranda Treasuries 4,000,000 francs; and the Austrians, on their retreat from Albania in 1918, deposited 34,000,000 crowns with the Wiener Bank Verein. These sums, if they could be recovered by the Albanian Government, would be extremely useful.

One of the chief cares of the Government lies in the South. The two districts of Argyrokastro and of Kortcha were laid waste by Greek bands in 1914, 300 villages having been destroyed; and Austrians, Bulgarians, Serbs, Italians, and French have contributed to the destruction of the country by making it a battlefield. But it was the Austrians who did the most damage when on their retreat. Albania has suffered very badly during the great war and the Balkan wars. The number of sheep which the Albanians have lost since 1912 is estimated at 15,000,000, and the Austrians requisitioned in the Plain of Muzekie alone 25,000.

Foreign Representatives Wanted.

The absence of foreign representatives is much to be regretted in Albania, where Consuls of the Powers would be welcomed. Great Britain, for example, used to have a Consul in Albania (Mr. Morton F. Eden), but he has just been recalled, and General Philipps, who has been in Skutari on and off since 1913, is also just leaving the country on the handing over of the town to the Albanian authorities. France has at least some officers at Kortcha, but England has no one to inform her regarding developments in Albania.

The Albanian Delegation.

It will be remembered that the new Government elected at Lushnia is composed of ten members, of whom four form the Supreme Council. Two members of the Council, Monseigneur Bumci and Dr. Tourtoulis, were appointed to act as the Albanian delegates to the Peace Conference, with Mehmed Konitza Bey, Minister for Foreign Affairs, as their colleague. But these two gentlemen have resigned, owing to ill-health. Their places have been filled by M. Pandeli Evangheli and Fuad Zembrak. The former was the representative of the Albanian colonies in Roumania, and the latter of the Albanian colonies in Turkey, and both are strong supporters of an independent Albania.

THE JERUSALEM RIOTING.

We are indebted to a correspondent for the following account, by an eye-witness, of the disturbance at Jerusalem on Easter Day. It was received on April 22 by post from Jerusalem:—

"The trouble began with one of the soldiers from a Jewish battalion insulting the Nebi Moussa flag which the men of Hebron were bringing in to the mosque at Jerusalem. (There are two Jewish battalions out here, stationed in the districts, and some of them are up on leave for the Passover.) You know how wild the Hebronites are in any case, and they were all inflamed by speeches proclaiming Emir Faisal king and 'down with Zionism.' And this particular moment this foolish fellow chose for insulting the Hebron flag. He was killed straight away, and then the business began. There were about 200 men from Hebron, and with sticks and stones they made for every Jew they saw.

"The Yorkshires were brought out of church, and in about ten minutes they and the police had cleared the streets; but about seventeen Jews were killed, and many hurt. . . . It was quite a business driving back, perfectly safe except for the danger of running over people, for the streets were swarming, and the police were keeping the people on the move. Mounted machine-guns and units of armed soldiers were everywhere, and very soon all the streets were guarded, and no one was allowed to go or come through the city. . . . It is so dreadful when lives are lost. And it has quite spoiled Easter. But if it helps people at home to understand what is really the temper of the people just now over Zionist policy, it may be a good thing after all. . . . Everything is quiet this morning, Monday, but the city is under martial law, and no one may go in or out after 6 p.m. All the roads are guarded."

ASIA AND DEMOCRACY.

In the course of a discussion on April 21 before the Central Asian Society, Grosvenor Street, London, the question of Asiatic peoples and democracy was raised. Sir William Ramsey said we were apt to think of Asia as a land of autocracy; far too much so, for Asia had never succeeded in creating a bureaucracy, as Europe had done, through which the autocrat could govern. There remained a very great amount of local management; much was left to the village or tribe. Less was left to the town, because the town was more easily got hold of by the autocrat; but even in the town an amount of self-government was left to the people that we did not realise. Above all, Asia had never fallen into the great blunder of instituting a system of universal voting. Much more than in Europe opinions were weighed—not counted. The tribe met and there was much talk. Gradually there emerged the opinion of the whole body, finally expressed through one of the leading and most respected members of the community. The opinion of elderly men who had seen a great deal, men of affairs, might not be right; but it was more likely to be right than that of young men or women of little experience; and, in the system of open discussion among a small community, that was the opinion that led.

Dr. Gaster said government by constitution was entirely alien to the East. The people there only desired to live quiet, peaceful, happy lives, not fearing the extortions of the Vali. The nations of the West could conduce to their happiness by taking to them peace, order, justice, and righteousness. Above all, Great Britain should do this for the nations that had now been rescued to some extent from the power of the Turk.

Two Lords of the Admiralty have arrived at Malta from London to investigate the organisation of the dockyard.

The English Y.M.C.A. in Serbia has started a small fortnightly newspaper. The organisation is getting a firm footing in the country, and is playing a large part in inculcating a love of sport among the young Serbians.

A dispatch from Damascus states that the authorities of the Hejaz Railway, backed by the Arab Government, are asking that they should be given control of the branch from Haifa to Deraa, which they contend is an integral part of the Hejaz line. This branch is at present being worked by the British.

TWO YEARS.*

By Estelle Blyth.

It is a little over two years since Jerusalem was liberated, and a little more than one since Turkey rendered up her sword to England and sued for peace. Two years is not a long time, even in the span of a man's life, and in the life of a country it is barely a breath; but it often seems long to us because we are so apt to measure time by our emotions. And it is this measuring by the emotions which invariably causes a reaction in human minds after any strain. Thus, in one way, reaction is natural and, therefore, healthy; carried to an extreme it becomes dangerous.

There are signs that the inevitable reaction is beginning to set in in Palestine; and because the situation there, and of the world at large, the restlessness, the hungering after the unknown, the clamour about vague aims which are too often words rather than matter, are stones that may trip up a country still walking on unsteady feet, it is well to point out to Syrians certain facts which are plainer possibly to the outsider than to themselves.

Turkey held Palestine enslaved for over 400 years. No Power which has misused the trust has ever held the Holy Land. The Jews lost her the Christian Kingdom also, through this faithlessness. The two great non-Christian religions, Judaism and Islam, held Palestine longer than Christendom, the longer probation only exposing the more clearly this failure under trust; though for Christians to show themselves unworthy to hold Christ's own Land was, alas, the deepest shame of all. "To whom much is given, of him shall much be required."

It is two years since Germany and Turkey were expelled from Jerusalem, and the land cleansed of their intolerable presence. In their gratitude for this deliverance, their relief and happiness that it had come to them through the only Western Power that the East really trusts, the Syrians thought that all their troubles were ended. England would give them all they wanted! England could do no wrong! Now, after two years, comes the inevitable reaction—in itself, no doubt, a transient emotion like the exaltation that preceded it. England has not given them quite all they wanted. *Is* England wrong? There is a vast difference often between our wants and our needs, and most of us, I daresay, would barter the last for the first; but no one can deny that England has given Palestine the things that she most sorely needed—water, justice, religious freedom, open and unbiassed law courts, protection and encouragement of native industry and effort, defence of agriculture and forestry, the opening of trade, and systematic education. Are these little things? Or are good government and justice so common in Palestine that they cease to be accounted blessings? Syrians are in some danger of being called ungrateful because they have suddenly assumed a critical attitude towards the Power who has suffered for them, who has given the lives of her sons freely for them, who is to them both shield and sword. I do not think that the Syrians are ungrateful; but that, rather, they are disappointed, and that in this over-sensitive condition they are inclined to play Aaron to the prompting of some Moses who is not necessarily of kin to them—a Moses with his own cause to serve.

Why are the Syrians disappointed? Some of the truth must always be lost when one generalises, but, broadly speaking, they are disappointed because England has not put them in the position of her only child in Palestine. "Why is this?" they ask. "We have for England a deeper and more genuine affection than any other people in the Near East. We are full of loyalty towards the country that has freed us, full of eagerness and enthusiasm for our own, and it is *we* who have suffered most in days past under Turkish rule and during the four years' terror. Surely we have a right to a special place in England's heart, a special share of England's favour!"

There is only one answer to such pleading, and it is an answer whose truth must be worked out in time and in deeds rather than in words. It is the answer that English justice gives throughout the world and throughout the ages to those who misunderstand, and therefore chafe and question. English justice gives no special place to one, because it gives an equal chance to all. It helps one and it helps all. It keeps the ring, and interferes only when the rules of the game are transgressed. That is why, in the end, all gain and all benefit under English rule. We English believe that that is why England has been given such great trusts—India, Africa, Palestine. It is this cold, clear-cut attribute of England that foreigners find most hard to understand—as it is the one that first wins their trust. England is not going to kindle strife in Palestine; she is not going to set Christian against Moslem, Gentile against Jew, Syrian against Zionist, by favouring any *one* of them. Jealousy and rivalry were essentials of Turkish rule; in England's eyes they are simply noxious weeds.

To the outsider looking on it seems that the Syrians are inclined to criticise England's conduct in Palestine just because it is so absolutely impartial. The possessive attitude adopted by Zionists at home and in Palestine makes them uneasy, and they think that England is asleep; so they allow themselves to fall into an agitated frame of mind, and start at the merest shadow that crosses their path.

Well, England's shoulders are very broad, and she is generally saddled with the lion's share of the blame as well as the responsibility; still, the delay in the settlement of Turkey is directly due to the attitude of America with regard to the Peace Treaty, which she will neither bless nor curse. But—English ships are at Constantinople, and English troops in Asia Minor. Who helped Russia—real Russia—first and latest? Who put Poland on her feet, and was the first to recognise the independence of Finland? Who is fighting the battle of the starving children of Austria, the country that Germany sucked dry and threw aside? Which land sleeps quietest o' nights, Palestine or Syria?

Perhaps these few suggestions for thought, offered by an outsider who is in entire sympathy with Syrian feeling, may recommend themselves to Syrian minds. England has many burdens to bear, and she never *sought* the charge of Palestine, but she has done her best and given her best for the Holy Land during two difficult and anxious years, many months of which were spent in actual warfare in it. If the trust be left in her hands, succeeding generations in Palestine will learn, each one a little better, the breadth and freedom and vision of England's rule. For England is very patient with those she shelters, even when they misunderstand her way.

* This article was written before the question of the Mandate for Palestine was settled.—Ed.

PRESS ON THE NEAR EAST.

Armenia.

In the *Muslim Outlook* of April 22 there is a leading article devoted to "The Problem of Armenia." We give extracts from it, because the Turkish view is seldom stated so forcibly in this country. Setting aside the questions of atrocities and of Turkish maladministration, it says:—

Freed from these considerations, the Armenian claim comprises the right to free autonomous development on national lines. It would be comparatively an easy matter if this represented the full measure of Armenian aspirations. None denies that right to them, not even the much-maligned and misrepresented Turk. The Indian Khilafat Delegation, too, has supported it. But the Armenians cannot be satisfied with mere free autonomous development. They want the possession of the territory stretching from the Caucasus to the Taurus, with seaboards on the Black Sea and the Mediterranean. This they call Armenia, and claim it as theirs by right. Should they have it or should they not? that is the question. It would be futile to look to European and American statesmen for any help in answering that question. Their treatment of the question of self-determination has been thoroughly scandalous and disgraceful. In their own territories they are not prepared to grant this right to great living nations with centuries of proud traditions behind them, and in indisputable majority in their homelands from times immemorial. Ireland, India, Egypt, Algeria, and Tripoli are the most glaring examples of this. The treatment of the coloured citizens of the United States, and the frequent "lynching bees" held in that part of the civilised world, too, are hard to reconcile with the high-sounding principles proclaimed by the President of these States from Mount Vernon. In other countries the smell of oil and the prospect of cotton open the flood-gates of the philanthropy of Allied and Associated statesmen, and they are deliberately of the opinion that every hamlet in a district and every quarter of a town with even a temporary, artificial, or illusory majority of a favoured nation can claim the right of self-determination. In Smyrna the unit of self-determination is the village; in Constantinople it is the quarter of the town! A sad wreckage of world's hopes and expectations which fills with bitterness every honest soul that looked forward to the establishment of a happier order of things as the sole redeeming feature of the ghastly war.

Briefly recounting the history of Armenia, it states that "from 190 B.C. up to the present day the territory known as Armenia has been under non-Armenian rule." Its concluding suggestion is:—

At the close of this detailed survey it is to be admitted that, judged from the point of view of population or from that of tradition of rule, the Armenian claim to "Armenia" is untenable. We cannot deprive the millions of Mussulmans who have been living there for centuries past, and have been in undisputable majority, of their legitimate rights. Yet we do not wish to deprive the Armenians of their right to free, autonomous development. How can this difficulty be solved? Perhaps the most feasible solution is to be found in the proposal purporting to emanate from Turkey. There is an Armenian Republic at Erivan, created by the Turks themselves. There is a considerable number of Mussulmans in that republic, which the "meek" Armenians have already started to reduce to "simplify the Muslim problem," as a good Christian once euphemistically put it. The Turks propose an exchange of the Muslim population in Erivan and the Armenian population in Turkey. It is not impractical to carry this into execution. The Mussulmans have already expressed their readiness to migrate, and the Armenians should be persuaded to do so in the interests of world peace. The lands of the two could also be exchanged, and no party need suffer any loss at all. The Turks are even reported to be willing to make further reasonable territorial adjustments to meet further legitimate demands. These are terms as fair as could be expected, and if the Allies and the Armenians want a really peaceful and permanent settlement they should welcome them.

The Arab Empire.

A writer in the *New Statesman* recently dealt with "The Question of an Arab Empire." After insisting upon both the probable and the actual factors making for disunion, he says:—

Even a federation of Arabia proper, still more an Arab Empire embracing Syria and Mesopotamia in addition, is, on the face of it, a dream which bears little relation to concrete realities. Positive evidence to the same effect is not wanting. The military occupation of Syria has offered an opportunity for a limited experiment in Arab self-government. An Arab administration under the general control of the Emir Feisul has been established with the seat of government at Damascus. The results have not been encouraging. The Arab authorities have proved neither firm nor efficient. There have been anti-Armenian outbreaks at Aleppo; the Deir-es-Zor district on the dividing-line between Eastern Syria and Mesopotamia has got completely out of hand; and immediately after the evacuation of this area by British troops last November even Damascus itself relapsed into a condition not far removed from anarchy.

On the one hand, therefore, all the evidence goes to show that the Arab provinces are unripe for union and even taken singly, hardly more ripe for self-government; on the other hand, we are confronted by an awakening of the Arab spirit which not only demands sympathy and respect on its merits but has been fostered and encouraged by our own acts and declarations. So far as the Hedjaz itself is concerned, no question arises. Its status is prejudged by its recognition as an original member of the League of Nations. The remainder of the Arab provinces cannot, however, be so readily disposed of. Neither honour nor interest commits us to the artificial construction of an unwieldy Arab State containing within itself the seeds of speedy disintegration; nor is there any reason why we should, outside the area in which we are immediately interested, assume the thankless task of enticing the warring elements of the Arab world into an unreal and unstable federation. On the other hand, neither honour nor interest allows us to ignore the stirring of the Arab spirit or to suppress the legitimate aspirations of a gifted race.

We have, therefore, to pursue a middle course. What is required of us is to discountenance fantastic claims; to refuse to become the instrument of dynastic ambitions; to refrain from gratuitous intervention outside the area of our immediate interests; and to make it clear that within that area we intend to give every facility for the orderly development of autonomous institutions. If we attempt to force the pace, we shall not only involve ourselves in unprofitable entanglements, but shall expose the Arab world to inevitable disillusionment and reaction.

The Dardanelles.

The *Glasgow Herald* of April 22, in an article called "The Dardanelles Decision," has some hopeful comments upon the probable results of that decision. It says:—

Some deeply interesting possibilities are opened up by the changes which the new arrangements will make in regard to communications between Europe and Asia. In the actual present it goes without saying that free passage for Allied warships and transports into the Black Sea is a tremendous weapon in the hands of the Supreme Allied Council for the better enforcement if need arises, of its wishes in respect to Northern and Central Anatolia. It would immensely increase the future prosperity of Armenia even if, as reported, the new frontiers of that country do not include Trebizond. If Batum goes with reservations to Georgia, the latter should soon be something much more than a little mushroom Republic, assuming, of course, that with Allied encouragement and assistance it and Azerbaijan are enabled to bar the Bolshevik advance and loyally co-operate to that end. But the potential results of freeing the Black Sea do not end here by any means. In due course the completion under the right auspices of the Bagdad railway will open up both Southern Asia Minor and the route through Aleppo and Mosul into the heart of Mesopotamia, doubtless to our great commercial advantage. But with Trebizond and Batum linked up with the Mediterranean, a new era may begin for Persia, and even Kurdistan, with its tumble of hills and its more or less intractable and very untrustworthy inhabitants, may in time be agreeably and permanently affected by being brought into closer touch with European enterprise and civilisation.

NEWS IN BRIEF.

Yugoslav railwaymen, who have been on strike, have now resumed work.

A Constantinople telegram indicates the probability that the Bolshevists will now endeavour to conclude peace with the Republic of Azerbaijan.

A special conference of the Executive Council of the Zionist Organization is to be held in London on May 9 to consider the situation in Palestine.

Printers at Constantinople who were on strike have returned to work, on the understanding that they are to receive a gratuity, and the newspapers were to resume publication on April 21.

It is announced from Athens that four deputies from Cyprus have arrived there on their way to London to represent to the British Government the unanimous desire of the islanders for union with Greece.

A court of inquiry into the Jerusalem riots opened on April 21, the proceedings being public. Evidence was heard from the Mayor of Jerusalem and several officers.

A PERSIAN ARMY.

The Anglo-Persian Military Commission has already presented its report, which, *The Times* Teheran correspondent states, recommends a scheme for a uniform Persian Army, to replace the present mixed forces. It advises that the changes be effected gradually, and that the Army should eventually consist of 198 companies of infantry, 61 squadrons of cavalry, 18 batteries of artillery, eight machine-gun companies, and six air flights—a total strength of 60,000.

THE THRACE ADMINISTRATION.

Mr. Theodore D. Moscopas writes:—"You have stated correctly that Greek notables are included in the Council of the Administrative Corps of Thrace. . . . I have just read in the *Messager d'Athenes* of April 9 that the Council is composed of nine members—*i.e.*, four Greeks (Messrs. Soulas, Phourmouzis, Lamnidis, and Stalios), three Moslems (Messrs. Hafiz Selim, Nejim Bey and Karamouz Ali Osman), one Bulgarian (M. Georgieff), and one Jew (M. Carasso). M. Soulas (Greek) has been elected as President of this West Thracian Council."

PORT SAID.

"And all the Caliphs of the West
Are ready to obey my Lord's behest."

Egypt is the Nile, and the Nile, Egypt. A Nile expedition in the early eighties took Britain to the aphorism; a world-war concentrated about the Suez Canal in 1914 leaves us with an archaism. Port Said, the chief Canal town, is now not only the African gate 'twixt Europe and Asia, but the sole portal by which the Vizier of a Western Khalif can approach the Egyptians.

This singular port at first acquaintance, indeed, after close fellowship, gives profound impression of East and West adjacent, but cleft. Arab town is broadly separate from the European quarter. From it the native scurries out to work in the morning, and back in the evening. Then on him and his habitat drops a veil. Squalid, filthy, and perceptibly insanitary by day, at night it is bizarre and barbarous. A native brass band pours forth wild music from exotic instruments. In small dim-lit cafes, Hassan and Mahmoud sip coffee, gossip, and play dominoes. Deeper recesses of the place conceal numerous houses of ill-fame; gaudy women sit in shadows and lure men. Much is hidden; what is seen gives our Protectorate no great panegyric. The native, true, is not the fellah, nor a student; some perforce are comparatively affluent and educated; but generally hideous poverty ramps wide.

And what of the other town? Eastern-Occidental, cosmopolitan; French, Italians, and Greeks throng, with the British element lightly yet firmly ascendant. Situation lends it not a little charm; Eastern Sea and Western Canal make romantic bounds. Its days are of the Orient, afternoon siesta, evening promenade, and the musk-scented night air from the sea dispel the West. Money-changers' tables at the kerbstone are a curious feature of its streets; the Levant still barters keenly for the aureate currency of the Western Isles, or, in truth, that of the South Seas. The Briton has carried there, as everywhere, his sport, tennis, cricket, yachting, and golf, but Hassan is no sportsman yet. He smiles broadly when you play your ball to Khartoum viâ the Pullman car on the adjoining railway, but he has no desire for such agile pleasures, neither the longing to slay. For a few piastres, indeed, he will offer you next morning the exhausted migratory quail fallen on his roof overnight, or, from the placid canal you may be startled to see a brown head suddenly pop up, like to any of the Genii, and the rock oysters he has been down for will appear at your lunch table. First, however, he will get his piastres from the cook. He still casts for fishes the net his forefathers used 1,900 years ago, when probably, too, his forbears chastised the attendant child for ill-preparing the net. Perhaps then, also, the Efreet in the young bosom cried with a strange noise at punishment. Hassan believes the Efreet comes to his children at birth. Whether then or later it is there. It is not Western. Centuries of coffee-drinking and religious abstention from wine have given the Efreets access to Hassan and his family.

There is a picturesque little church where the British community worship, significantly, for it is a miniature of the Church of St. Sophia, in Constantinople. At the gate an occasional Mohammedan beggar woman, with outstretched palm, eyes the Roumi appreciatively. Hassan in the street at daybreak prostrates himself devoutly towards the East, nor heeds the galloping subaltern.

The Port shops are admirable. Here abuts the renascent East. Duplicates rivalling Western wares embellish Japanese establishments. Levantines may badger, an Eastern European filch the jewel movements of your watch, but the Jap has decorum and probity. Probably not elsewhere in such small area are exhibited so great an assortment of wares, wines, and wonders; gorgeous jewellery of the Indies, priceless carpets from Persia, Sudanese knives and spears, fine leather goods of the Levant, scarabs and beads from the Tombs, rich Syrian tapestries, fine Patras wines, inlaid cabinets from Palestine, lace of Malta, Chinese silk goods and silver work, Japanese lacquerie, and wines of rare boquet from the Lebanon. Indeed, these shops are the most engaging feature of the town, their import is apparent. The streak of water cut by de Lesseps is the vital circumstance, and in connection with it alone have the European population a purpose of domicile and activity.

Shops and ships—the Western world of trade and travel—in primary degree. But the Canal is more than Port Said, more indeed than numberless ports. Moreover, for whosoever will, the East is there to see.

CORRESPONDENCE.

THE PRESS OF THE BALKANS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I understand that the Balkan States are now at peace; but in reality no perfect peace reigns so far in the Aemos Peninsula. The fire-eaters of the Balkan Press are on the alert. Abusive articles are published daily, and everybody interested in the Balkan conundrum feels anxious for the future.

As a matter of fact, I have already pointed out to the Balkan pressmen, through the columns of your esteemed journal, that the Balkan Prime Ministers are much in need of their precious collaboration for the post-war reconstruction in their respective countries. It is not a question of winning the war now, but of winning people's hearts through the medium of the Press. The object of the Press is not to set one country against another by sowing between them racial hatred and mediæval feuds.

I daresay that a visit to England, a plain talk with a member of the British Press, the absence of animosity in the British Press, and a thorough understanding how a paper is worded and printed in this country would be for every firebrand in the Balkans a good and salutary lesson.

I am, etc.,

THEODORE D. MOSCONAS.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultán after Sultán with his Pomp
Abode his Hour or two, and went his way.
—OMAR KHAYYAM.

On a suburban railway platform the other day a name on a music-hall poster caught my eye—"George Ali." Who or what the gentleman is, or what his particular "line" may be I know not; for I have never had the pleasure of seeing his "show." But I was, and am, interested to know what made him adopt the name Ali—for, I take it, it really is an adopted, or stage, name. Is it because the gentleman in question has some knowledge of Arabic, and is perhaps at the same time tall, that he has fixed on this name? Or does he, I wonder, pronounce it "Alley," and connect it in some way with a certain bulbous-nosed humorist who used to be associated with a "Half-Holiday" comic paper? Or, again, did he fix upon it in consequence of a friendship with some Oriental, the result of travel in Egypt or some other part of the Near East? I am afraid I shall never know. But one thing is certain: the name is a good one for stage purposes. It is short, easy to spell, and if the average M.H. frequenter *is* pretty sure to mispronounce it, what matter so long as he knows the bright particular star to whom it refers?

***

A reader draws my attention to a letter to the Press written by Mme. Olga Novikoff, in which there occurs the following passage:—

> "The small handful of Russians still remaining alive, and therefore faithful to the traditions of the Greek Orthodox Church, read with horror and indignation the announcement that the Turk should not be molested and that he deserves, on the contrary, to be described as the rightful and original owner of the greatest treasure Russia can conceive—Constantinople."

The "horror" and "indignation" are, of course, shared by some other nations—Greece, for instance, and possibly Bulgaria—to say nothing of Mr. Wilson and a very great many Americans. But may I, with all due respect, put some simple questions in connection with Mme. Novikoff's letter? Was not Russian covetousness with regard to Constantinople one of the chief reasons why Turkey threw herself into the arms of Germany? Did not Russia, for her own purposes, deliberately prevent Turkey from trying to mend her ways, especially when the Turks, after the revolution, asked for Advisers, whom Great Britain was willing to supply? And, finally, if there is such a "small handful" of Russians remaining, how could they expect to exercise successfully that "protectorate to which the Russian aspired since the days of Sviatoslav, who died a glorious death in 972," as Mme. Novikoff tells us in her letter? Personally, I do not much mind whether the Turk is left in Constantinople or not; but I dislike intensely the attempt to make his expulsion or retention hinge on the question of his religion.

***

I have heard many tales of profiteers in this country—and I am inclined to believe every one of them; but nothing of this class quite touches what I was told, a few days ago, of a princely profiteer in a certain country in the Near East, which must not be more closely specified. His Royal Highness was Governor of a nice fat town and province, and was accustomed, thank you, to doing very well out of the job. But tales he heard and read of the ways of the West in the up-to-date profession of Profiteering whetted his appetite and stimulated his imagination. So he took counsel with himself, and evolved a plan to keep himself out of the Oriental-equivalent-for-the-Workhouse. First he wrote to the Central Government, announcing that there was sore distress in his city and district, and stating that it would be necessary to arrange for the supply of grain and other foodstuffs at low rates to the population. He added casually that as the need was urgent he was taking the necessary measures immediately. But he omitted to add that he had already taken steps to corner the supply of grain and foodstuffs by the simple process of forcing the merchants to sell to him at rock-bottom prices. Next he resold the said grain and food to the merchants, at prices fixed by himself, of course; and, finally, he issued orders for its sale again, at fixed prices, "to the poor," and took the usual precautions to secure a percentage from both the sellers and buyers. The East, it seems, still has possibilities that should appeal to the "international capitalist."

CORSAIR.

The Governing Body of the London School of Oriental Studies, Finsbury Circus, has purchased the South Place Institute, the headquarters of the Ethical Society, for additional classroom accommodation.

MUSICAL NOTES.

THE BACH FESTIVAL.

Easily the most important musical event in London since the war was the Bach Festival, which took place at the Central Hall, Westminster, and lasted for four days, April 16 to April 20. Those responsible for the revival of the activities of the Bach Choir did their work (with the exception of the hall they secured, which is bad in every way) thoroughly well. It was impossible fully to represent the genius of Bach, but a very fine selection, including cantatas both secular and sacred, instrumental music for orchestra, pianoforte, and organ, three of the six motets, and the Mass in B minor, was made. In addition to the general excellence of the various performances a souvenir of the festival was prepared in the shape of a beautiful programme, which, besides the book of words, contained essays on Bach by Mr. Ernest Newman and Mr. E. J. Dent, and also some reproductions of Bach's original manuscripts. Thus the whole business of the festival was very creditably done.

It would be a thesis easy to maintain that Bach is the greatest composer of all ages. Most people indeed prefer to go outside music to find his parallel. His greatness and originality literally stagger the mind. In whatever he did he was prolific (he even went to the extent of having nineteen children), but he never lost his fertility. The work of some composers it is possible to explore fairly completely, but Bach always has surprises even for those best versed in him, and to the learning of him there is no end. It is difficult even to agree upon the relative greatness of his works. Merely that some may disagree with me, therefore, I will add that the things I enjoyed most at the Festival were the chorale "Jesu, Joy of Man's Desiring," the Concerto for three pianofortes in C major, the choral prelude "Allein Gott," and the motet "Jesu, Priceless Treasure." One could say that all these four things were inferior to some others, and yet perhaps be right—a fact which proves but the indeterminable equality of Bach's greatness.

The singing of the choir under the intense conducting of Dr. Hugh P. Allen was amazingly good for a southern choir: their performances in the motets in particular were beautiful. In meditative passages they attained a height of sheer loveliness beyond which I have never heard any choir go. It was in moments or minutes of fiery declamation and of dramatic warmth that the outer sopranos sounded shrill and the inner sopranos weak, and that the basses lacked resonance. This last defect was a great pity seeing that so many of Bach's effects depend upon the glorious roll of his basses. However, considering the material that he had (not many members of the choir appeared to be under thirty-five), Dr. Allen achieved a very fine success. For the most part he conducted from memory, and it was in no way his fault that the demands, which in Bach cannot be excessive, made by him upon the choir were not supplied. The small London Symphony Orchestra, as capable a body of musicians as there is in England, did not always fit in well with the choir, but when they had the field to themselves they were superb. The soloists, with the exception of Mr. Gervase Elwes (tenor) and Mr. Murray Davey (bass), were scarcely worthy of the occasion, for they did not sufficiently realise the passion inherent in all Bach's work.

There are unmistakable signs in this country that recognition of Bach is, through the action of an "energetic minority," becoming both fuller and more widespread. This does not mean that he will become popular in the accepted sense, but popular in the acceptable sense. Modern popularity has a disastrous habit of sentimentalising over a great composer—the thing is manifest, for instance, in certain presentations of Beethoven and of Wagner. In the coming love of Bach, however, the favour, if developed on the lines of Dr. Allen, who is always very passionate, yet never sentimental, will remain pure. To such a consummation the recent Bach Festival has already contributed much, for it has surely set in motion forces which will perform very necessary pioneer, and not merely imitative, work in this country. There is, despite what the pessimists say and despite certain definite facts, a great musical renaissance in England now, and the Bach Festival will be found to have taken for itself a central place in it. Other things, like the Beethoven Festival and the concerts of the British Music Society, about which I shall write in the next week or two, have prominent places in this movement; but the worship of Bach, which comes, as is not the case with many composers, only through knowledge of him, will probably be said to have been the most notable achievement of all.

The London Chamber Concert Society, which has been responsible for some very fine concerts this season, notably the Elgar one and that in which Schubert's Octet was given, held its tenth and last at the Wigmore Hall on April 20 The London String Quartet introduced a new Quartet (which is still in manuscript) by Mr. Arnold Bax. Except for the meditative middle movement, it is of quite light construction, and this being the case, it might have been played with a little less seriousness. On first hearing it did not appear to be so original as the majority of the works of Mr. Bax, who is one of those British composers who have never had a fair chance. It is obvious, even from this quartet alone, that he thoroughly deserves a chance; and in all probability this quartet and his new quintet (also still in manuscript) will give it to him. This praise can scarcely be bestowed upon the other British composer in the programme of this concert—Mr. Albert Coates. Two new pianoforte works by him—"Angelus" and "Lacrymosa"—were played for the first time by Miss Myra Hess, and they seemed hardly to make an effort to avoid the commonplace. Mr. Coates' fame as a conductor is secure, but the prospects of his increasing it as a composer are small. In conclusion, the excellent work of the London Chamber Concert Society in organising their series of concerts should be remarked and remembered; and it is very satisfactory to note that already arrangements have been made for the holding of a similar series next November.

It was not the fact that Miss Flora Woodman was giving a recital of arias and songs, but that she was assisted by the Royal Albert Hall Orchestra under Mr. Landon Ronald, and in particular that he was playing Debussy's "L'Après-midi d'un Faune" and Butterworth's "A Shropshire Lad," which attracted me to the Queen's Hall on April 21. These two works are respectively as typically French and English as you may wish, and in them Mr. Ronald drew from his orchestra, especially from his reed instruments, some beautifully delicate playing. (The loss of Butterworth in the war was perhaps the cruellest possible blow to English music, for his inspiration was so fresh and so natural that he might have accomplished anything.) Of Miss Woodman's singing, which is greatly favoured by the ballad-loving public, much could be said. Her technical ability is very considerable, and her tone is pure and unforced. Difficult arias from Grétry's "Zemire et Azor" and by Mozart she performed with the greatest ease and clarity, and at these things the delight of the largest possible audience knew no bounds. But her capabilities never moved one; her expressions never convinced; and one came away saying that here was a very fine singer who as unfortunately as inexplicably had omitted to become an artist.

A song recital, much smaller, but more important, was given at the Steinway Hall on April 22 by Miss Olga Haley, whose reputation also is already made. Miss Haley, whose recital was devoted to modern English song, has not the technique of Miss Woodman, but artistry stamps nearly all her work. She has atmosphere, colour, and the hundred other indefinable things that go to make the artist, and she is accounted the best of female English *lieder* singers. However, I was disappointed at her recital, for her inclusion of some songs, both the music and words of which were worthless, made it obvious that at present her achievements in singing are far greater than her judgment of a song. She introduced two songs by Ethel Zillhart and Helen Fothergill, the words of which were written by women: whether this was done to placate her sex I do not know, but it is pretty certain that these songs will be remembered only by the fact that she sang them. She also showed a strange partiality to the compositions of Easthope Martin. Against these things, however, are to be set "Far in a Western Brookland," by Eric Grant, and "Sudden Light," by Julius Harrison, both of which are extremely good, in the latter case, of course, expectedly so. There were also sung for the first time a few humorous songs by Lord Berners, songs which, even if performed half as well as Miss Haley did them, it will be pleasant to hear again.

A quite pleasing evening was provided at the Æolian Hall on April 23 by Miss Megan Foster (song), Miss Keighley Snowden (pianoforte), and Miss Perceval Clark (recitations). Miss Foster's achievements I have commented upon before in these columns; it is sufficient, therefore, to say that she is developing her charm while losing none of her freshness. She introduced two new songs by Frederick Keel, "John Mouldy" and "Bunches of Grapes," the settings of which suit well the whimsical quaintness of de la Mare, the incomparable author of these songs. Miss Snowden played five concert studies by Poldini and five Spanish dances by Granados; she showed a polished style, but the impetuosity of her youth frequently bubbled over. However, she shows quite definite promise, and more will be heard of her.

NEAR EAST BOOKSHELF.

I. "THE WORLD AFTER THE WAR." By Charles Roden and Dorothy Frances Buxton. (London: George Allen and Unwin, Ltd.)

II.—"NIGHT WINDS OF ARABY." By A. J. Eardley Dawson. (London Grant Richards. 3s. 6d. net.)

III.—"HIGH PRICES AND THE QUANTITY THEORY." By Sir John O. Miller. (London: Sifton Praed and Co., Ltd. 2s. 6d. net.)

I.—PACIFICIST PROSPECTS.

Although during the war pacificists were the least important people, they certainly were not the least energetic. The amount of print in which they indulged, and in which they are still indulging, is amazing. Among the most persistent and the most skilled of these are the authors of this book. While England was at war they saw fit, week by week, to review the Foreign Press in a notorious university magazine, but since that time they have transferred that feature to the most influential of English provincial papers. It is as a result of opinions gained from this experience of studying the foreign Press that "The World After the War" has come to be written.

The book is divided into seven chapters. The first, "The Picture," in which the view is put forward that "We are witnessing the terrible legacy of a war protracted too long; the old framework of Europe breaking down under the impact; the imposition of one colossal struggle upon another, of a war of classes upon a war of nations"; the second, "The Balkanisation of Europe," in which it is stated that owing to the war and the follies of the Allied statesmen consequent to it, Central and Eastern Europe has been split up into a number of units similar to those of South-Eastern Europe; the third, "The New Balance of Power," which is interpreted to mean "the greatest possible tilting of the balance in one direction . . . . an overwhelming preponderance of power"; the fourth, "The Economic Collapse," which is said to have been "in large measure the result of a definite policy on the part of the Allied Governments"; the fifth, "The Meaning of Bolshevism," which is the one excellent chapter in the book; the sixth, "Whom the Gods would Destroy," in which it is stated and illumined with examples that "the right of peoples to decide their own destiny, first raised as an inspiring war-cry, has sunk to the position of a rather stale joke," and the final chapter, "Below the Tide of War," in which are touched upon the hopes of the future.

Mr. and Mrs. Buxton always write with knowledge, but seldom with wisdom. Many of the unpleasant facts which they prefer in this book are indisputable, but we do not imagine that even the Allies' late enemies, who ought chiefly to benefit by this book, would care to take up the beliefs indicated in it. To those born in the Near East, the dictum that to refrain from fighting is always better than to fight will seem a cheerful distance from realisation. The authors of this book have seen most of their ideals overthrown in the late war (or, as they might put it, in the present war), and are naturally become pessimists. It is rather pathetic, therefore, to see them at the end of their book slip in that worst of all pessimists' hopes, a New Religion—a religion which, moreover, is to be the incorporation of the spirit which prompted conscientious objectors to act as they did, and of the spirit which deforms "anti-militarists" generally! Finally, while not doubting in the least the purely humanitarian feeling that has urged the writing of this book, we dislike it intensely. The authors contrive generally to get a reverse spin on the facts which they serve at us, and it must be admitted that, unless used to this method of attack, one is uncomfortable during the first few sets or chapters; but getting accustomed to a reverse service is only a question of time, and the tricks of these players will never win them a game.

II.—VERSE IN MESOPOTAMIA.

The number of Englishmen who have written verse that is also poetry on Mesopotamia can be counted on one hand, and the publication of "Night Winds of Araby" does not cause us to recount that number. Like many men, the author, Mr. Eardley Dawson, has felt strongly the attraction of "Araby" generally, but, also like many men, he is nearly impotent before its attraction. There is scarcely anything in this book that could not have been written, in fact that has not been written, of any country in the world: of the atmosphere of the East there is nothing. No necessity exists for quarrelling with the form of Mr. Dawson's verse, for the truth is that he has nothing to say. Here is an example which certainly is not worse than any other in the volume: it is called "Araby":—

Dear little Desert flower!
Can I forget
The fragrance of a perfect hour?
Ah! no. For yet,
Though wanderer in a far-off wild,
I sip once more
The joys that pour
Like honey from thy petals, Child.

The book is tastefully produced, and is worthy of more original contents.

III.—CURRENCY THEORY FOR THE MAN IN THE STREET.

This is a remarkably clear exposition of currency matters; it can be grasped by any man of ordinary intelligence, and we wish its perusal could be imposed as a task on everyone who chooses to write or talk about the subject. The author is a convinced adherent of the quantity theory, as, indeed, are most Anglo-Indians, from Sir David Barbour downwards, and the reason for this general agreement is not far to seek; India relies so largely on coined money that the effects of changes in the volume of the currency can be easily followed through the centuries, and are even now scarcely masked by the complications resulting from developments in the system of credit. The theory stands, but its application in the modern West becomes more and more difficult; as our author shows, even prominent statesmen may be misled by these complications; and there is ample justification for the issue of this pamphlet, a careful study of which should enable the public to appreciate at its true value the nonsense which is being talked so widely at the present time.

BOOKS RECEIVED.

Handbooks prepared under the direction of the Historical Section of the Foreign Office. No. 3 "Slovakia," 1s.; No. 5, "Bukovina," 1s.; No. 6, "Transylvania and the Banat," 2s.; No. 8, "Croatia-Slavonia and Fiume," 2s.; No. 12, "Bosnia and Herzegovina," 2s.; No. 13, "The Slovenes," 6d.; No. 14, "The Jugo-Slav Movement," 1s. (London: H.M. Stationery Office.)

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. April.	1920. April.		1338. Shaban.	5680. Iyar.
29	16	Thursday	10	11
30	17	Friday	11	12
May 1	18	Saturday.....	12	13
2	19	Sunday	13	14
3	20	Monday	14	15
4	21	Tuesday	15	16
5	22	Wednesday	16	17

The Roumanian Minister has returned to London from Bucharest.

M. Clemenceau arrived at Marseilles on April 13 on his return from Egypt.

Mr. Hilton Young, M.P., has returned to Queen Anne's Mansions from Delhi.

Colonel Sir Roper Parkington has removed to 29, Elsworthy Road, Hampstead, N.W.3.

Mahejit Fangh, Prince of Kapurthala, and Sir Francis Webster have arrived at the Savoy Hotel.

On April 27 an address on Egypt was delivered to the members of the 1900 Club by Lord Milner.

Bishop Gwynne, Suffragan Bishop of Khartoum, has now had Cairo and Egypt added to his jurisdiction.

Sirdar Charanjit Singh of Kapurthala has arrived from India, and will be in this country until the autumn.

Gholam Hossein Khan Farid-es-Saltaneh, Attaché to the Persian Legation in London, left on April 26 for Paris.

Captain Sir H. Acton Blake, the Deputy Master of Trinity House, and Lady Blake have returned to London from Ceylon.

Ebrahim Khan Gharagozlou, Secretary to the Persian Legation, left London on April 20 for Lausanne to recuperate after his recent illness.

Lord Lytton has completed his inspection of the dockyards and naval establishments at Gibraltar, and has reached Malta on a similar mission.

Sir Trevor and Lady Wheler, who have lately arrived in England from India, where Sir Trevor Wheler was serving with his regiment, are staying at Brighton.

M. Matila Costiesco-Ghyka, Second Secretary to the Roumanian Legation, accompanied by Mme. Ghyka, returned to London on April 26 from Bucharest.

Bishop Azariah of Domakal, the first Indian to be raised to the Anglican Episcopate, is to preach the annual C.M.S. sermon in St. Bride's Church, Fleet Street, on May 3.

Mirza Hussein Kahn Ali, ex-Persian Minister of Commerce and Public Works, who has recently been nominated Minister at Madrid, has arrived in London from the Continent.

The Emir Abdullah (a son of King Hussein) left Jeddah on April 22 on a visit to Cairo at the invitation of his Majesty's Government. Colonel Vickery, British Agent at Jeddah, accompanies the Emir.

Major-General Herbert Campbell Holman, C.B., C.M.G., D.S.O., Indian Army, has been made a K.C.B. for valuable services as Chief of the British Mission in South Russia, to date November 11, 1919.

A memorial tablet to the late Major Alec Gardiner, R.E., for many years Deputy Agent, Oudh and Rohilkhund Railway, who fell at Givenchy, was unveiled in Christ Church, Lucknow, on March 25, by the Bishop of Lucknow.

A dance in aid of Serbian scholarships (war memorial to medical women) will be held at the Holborn Hall on May 14. Tickets (double £1 1s.) can be obtained from Dr. Dickenson Berry, Royal Free Hospital, Gray's Inn Road, W.C.

Sir Arthur Evans was the guest on April 24 of the Swedish Anthropological and Geographical Society at their annual meeting in Stockholm; he gave a lecture on his excavations in Crete, and was awarded the Society's gold medal for scientific merit.

The memorial tablet to the late Earl of Cromer, for which subscriptions were raised in Egypt and England, will be unveiled in Henry VII.'s Chapel in Westminster Abbey on May 12, when a short service will be held at half-past twelve and an address delivered by Earl Curzon.

A committee, including the Maharani of Cooch Behar, the Princess of Monaco, Lady Carmichael, Lady J. C. Bose, and Lady Muir Mackenzie, has been formed to produce two Indian plays, "Chitra" and "Sacrifice," by Rabindranath Tagore, on Tuesday, May 4, at the Prince of Wales Theatre.

Prince Nicolas of Roumania, who lost the latter part of the term at Eton owing to illness, has completed a three weeks' holiday course at Wye Agricultural College under the personal supervision of the Principal. His Royal Highness will resume his studies at Eton at the beginning of the summer term.

The Crown Prince of Roumania arrived at Bombay on April 20, and was received with a Royal Salute of twenty-one guns.

In memory of the Hon. Mrs. Haverfield, who died in Serbia on March 21, a service will be held in Southwark Cathedral at three o'clock on May 1. An address will be given by Canon Haldane, and the collection will be in aid of the Evelyn Haverfield Orphanage in Baina-Basta. The Legation of the Kingdom of Serbs, Croats and Slovenes, as well as various Serbian societies, will be represented.

The King's Investitures, which have been in abeyance during the residence of the Court at Windsor, were resumed at Buckingham Palace on April 22. Sir Rennell Rodd, the well-known diplomat, who was his Majesty's representative in Italy for some years, was invested with the insignia of a Knight Grand Cross of the Order of the Bath (Civil Division); Sir Herbert Dering was given the K.C.I.E. Captain Martin Nasmith, V.C., the gallant commander of submarine E 11, which destroyed eleven Turkish vessels in the Sea of Marmora in the early part of the war, was a recipient of the Military C.B.

The following decorations have been conferred by the Allied Powers on officers and men of the British Naval Forces for distinguished services during the war. The King has given unrestricted permission to the officers and men concerned to wear the decorations in question:—Conferred by the King of Roumania: Order of the Crown of Roumania—Commander Sir Harry S. Mainwaring, Bt., R.N.V.R. Conferred by the King of Serbia: Order of the White Eagle (4th Class), Lt.-Cdr. William J. Donohue, O.B.E., R.N.R. Conferred by the King of the Hejaz: Order of El Nahda (1st Class)—Adm. of the Flt. Baron Wester Wemyss of Wemyss, G.C.B., C.M.G., M.V.O., D.C.L.; Rear.-Adm. Henry B. Pelly, C.B., M.V.O. 2nd Class: Capt. William H. D. Boyle, C.B., R.N.; Capt. Raymond Fitzmaurice, D.S.O., R.N. 3rd Class: Cdr. Charles A. Poignand, R.N.; Lt.-Cdr. Thomas H. Linberry, R.N.; Lt. Evan G. C. Cavendish, R.N.

APPOINTMENTS, ETC.

Mr. Shadi Lal, barrister-at-law, is to be Chief Justice of the High Court of Judicature at Lahore, in the place of the late Sir Henry Rattigan.

M. Titulusco, former Roumanian Minister of Finance, has been appointed Roumanian Delegate to the Peace Conference in succession to M. Vaida-Voevod, states a telegram from Bucharest.

General Lukhomsky has been appointed by General Wrangel Military Representative charged with directing the work of all the Russian departments in Constantinople, Serbia, Bulgaria, Greece, and Roumania, with the exception of the Department of Foreign Affairs.

THE SEASON IN EGYPT.

(From Our Social Correspondent.)

Cairo, April 5.

Easter and the Hot Season.

Easter has come in with a burst of heat which has taken us all by surprise, and which we sincerely hope is not an earnest of what this summer holds in store for us. Old residents will tell you that Easter usually marks the beginning of summer, but as the feast this year has come at an early date this is not very consoling to those whose lot it is to spend the next "hot weather" out here.

All those who are due for leave this year, be it early or late, are already making their arrangements; for it is stated that there will be even less accommodation available on steamers coming from the East than last year, and it will therefore be more than ever a case of "first come, first served." No doubt, in the end everybody who wants to will get away, but as regards the return journey it is to be hoped that somewhat better arrangements will be made than was the case last year, when the organisation through which residents were supposed to get their passages failed ignominiously.

Successful Racing.

A very successful racing season has been brought to a conclusion by an extra meeting on Easter Saturday at Heliopolis and another one to-day (Easter Monday) at Gezireh. The racing this year has been first class, though the stewards might perhaps be a little more watchful and stricter than they are, and the introduction of English thoroughbreds two years ago seems to have had a very good effect. Both Clubs have made a considerable amount of money—one of them took just under £E5.000 as commission on the *pari mutuel* in two days recently—and these profits should enable them materially to improve the accommodation and substantially to increase the stakes, the effect of the raising of which has already made itself felt in regard to the entries and the production of fresh blood. Racing will start almost immediately in Alexandria, for which reason it is to be regretted that extra meetings have been held in Easter week, as it leaves the horses little time to recover from their journey.

Two Dances.

Two well-attended dances have marked the closing of the season. The first was that given by the North Staffordshire Regiment in Kasr El Nil Barracks. The mess-rooms had been beautifully decorated for the occasion, the regimental colours having been adopted for the colour scheme, and the handsome plate which the Battalion possesses made a very fine show. Mrs. Tweedie, the wife of the second-in-command, together with the C.O., Lieut.-Col. Fox, did the honours most graciously, and the guests, who were mostly the younger members of the community, had a real good time.

The other dance was that given by Lieut.-General Sir Walter and Lady Congreve at Gezireh, which was attended by all Cairo Society. The General's house was, indeed, scarcely large enough for the distinguished crowd, and for a time dancing was somewhat difficult. However, from the second number onwards dancing went with a decided swing in the ballroom and the extra room which was requisitioned for the occasion. The large conservatory was transformed into a supper-room, and this proved a happy idea, for it provided in addition an excellent sitting-out place.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

ENGINEER (28), thoroughly qualified, married, desires POSITION as Engineer or other capacity in Colonies or East; highest references, good organiser, willing, energetic, readily adaptable.—Box No. 163, THE NEAR EAST, 1, Devonshire Square, E.C.2.

STUDENT of Commerce at University desires APPOINTMENT with manufacturing firm with view to qualifying as a representative either at home or abroad; ex-officer, age 21, finishing July-August.—Box No. 164, THE NEAR EAST, 1, Devonshire Square, E.C.2.

EX-GUNNER Captain desires APPOINTMENT. Journalistic and secretarial experience, shorthand typist, single, age 27, and well educated; take any post with prospects, but one East preferred; excellent references.—Box 165, THE NEAR EAST, 1, Devonshire Square, E.C.2.

PLANTERS, Etc.—Ex-Service Man, 25, single, grammar school education, sound commercial experience, seeks APPOINTMENT ABROAD (any capacity); preferably with Tea or Rubber Plantation, East.—Further particulars, write Box M.948, Lee and Nightingale, Advert. Offices, Liverpool.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

BRISTOL
GRAND SPA HOTEL.

EXETER
ROYAL CLARENCE HOTEL
(*facing beautiful Cathedral*).

LONDON
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.
Self Contained Suites.

MANCHESTER
The Victoria House, 254, Oxford Road.

MATLOCK
SMEDLEY'S HYDRO.

TORQUAY
VICTORIA & ALBERT HOTEL.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
American Bar and Restaurant,
Billiards, and Lift.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Every Modern Comfort. American Bar, Restaurant,
Bathing Cabins on the Beach. Billiards.
Daily Concerts on the Verandah.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.

THURSDAY, APRIL 29, 1920.

MESOPOTAMIA.

The decision that the mandate for Mesopotamia shall be conferred upon Great Britain seems at last to have been formally taken. In the face of the British occupation and of the steps already taken for the proper government of the country, it might be thought that any delay in the regularisation of Great Britain's position in Mesopotamia would have had little or no effect. But probably no part of what was formerly the Ottoman Empire has been prejudiced more in regard to its future by the indeterminate state of affairs that has lasted from the time of the Armistice until now. The inhabitants have not been exposed to the massacres perpetrated in Cilicia, to the depredations of Mustapha Kemal, or to the political intrigues of Constantinople; but they have been the prey of an uncertainty which they could not underderstand and have been worked up into a condition of mind that may add seriously to the difficulties of the Mandatory Power. The natives were shrewd enough to have discovered that the British authorities remained in the dark as to the fate of the country. This fact was not reckoned to the occupying Power for grace, but suggested a weakness that some endeavoured to exploit, while to others it proved disheartening and made them lukewarm in their support of a régime of which they were quite ready to acknowledge the value. There are many elements at hand eager to work soil so fruitful of unrest. Some of the tribes have prided themselves in the past on their ability to keep the Turks at arm's length, and were encouraged to believe that they could do the same, if they felt so inclined, in the case of the British. The sacred cities of Nejef and Kerbela afforded sanctuary to a number of bad characters, who regarded the newcomers in the country their natural enemies as much as they did the Turks. An attempt was made to agree upon a frontier line between Syria and Mesopotamia; but events at Deir-ez-Zor proved how useless such an agreement was, and they have been followed by a steady penetration of Mesopotamia from the west with which the British troops do not feel able to cope in existing circumstances owing to the length of the lines of communication involved.

This accumulation of unsatisfactory conditions inevitably reacts on the Arab mind, even when it has been in the first instance well disposed to British supervision. Very little news reaches Great Britain from Mesopotamia, but it is not difficult to understand that, in spite of the efforts of individual officials to discharge their duties as though conditions were normal, the general effect is an administration unbacked by conviction, and consequently failing to carry conviction with the governed. Such a state of affairs is unsettling to the Arabs and unfair to the British authorities on the spot. It is to be hoped that this state of things will now be terminated. Unlike Syria or any other portion of the old Ottoman Empire, Mesopotamia, except in the case of certain frontier districts the final disposal of which remains in doubt, at present enjoys peace and something approaching settled conditions. It is most important that this fortunate situation should not be disturbed, as the Allies can ill brook a further extension of the unrest in Hither Asia.

The failure to regularise at an earlier date Great Britain's status in Mesopotamia, and to determine the boundaries within which the mandate will run imposes an additional financial burden on the British taxpayer. We have no sympathy with the suggestion that the latter should repudiate his responsibility in regard to Mesopotamia on the score of finance; but there is no reason why unremunerative expenditure should be tolerated a day longer than is necessary. The change to the discharge of functions formally entrusted to Great Britain as Mandatory Power may entail a heavier charge at first on the Exchequer. It will, however, we may hope, be money spent in accordance with a definite policy, with a view to ultimate recovery through the enhanced productiveness of the country. A hand-to-mouth existence is inevitably wasteful. As an instance we may cite the cost of motor transport, where, owing to type of motor used and the necessity of keeping the roads in a state of repair by means of the Indian Labour Corps, as much money will have been spent in two years as would have sufficed to build a railway for the whole distance. The reluctance of the British Government to expose itself to the charge of having anticipated the verdict of the Supreme Council can be understood; but it ought to have been possible to avoid a condition of things which tends to the paralysis of the administration owing to uncertainty regarding the Government's intentions and the encouragement given to the formation among the officials of rival schools of thought as to the policy that should be adopted. We have had, it is true, Mr. Lloyd George's *exposé* in the House of Commons of the reasons for including Mosul within the sphere of the British mandate; but it came late in the day, and there is no guarantee that the views then expressed will have been conveyed to the Mesopotamia Administration as embodying the settled policy of His Majesty's Government. From the outset certain axioms ought to have been accepted in regard to Mesopotamia by the Supreme Council, and in this way Great Britain's supervision of the country facilitated. Among the axioms may be mentioned these: That an impoverished country cannot be efficiently administered either with or without a Mandatory Power; that Mesopotamia must rely mainly upon oil and grain to save her from impoverishment, the latter becoming an asset only when irrigation has been sufficiently developed by loans for which the oil must supply the necessary security. With the ground thus cleared it would have been easier for the administration of the country to have responded to local exigencies without offending the susceptibilities of the Supreme Council.

The utmost goodwill on the part of the Supreme Council, however, would not have provided the British Government with a substitute for a carefully considered policy in regard to Mesopotamia, and it is this, we fear, that has been lacking. With war requirements to meet, the military authorities had no difficulty in elaborating a rough-and-ready programme for their own purposes. When the Armistice was signed no time should have been lost in replacing this programme with a settled policy framed on the certainty of a British mandate. If this had been done, our relations with the border tribes on the north and west might have been regulated without the loss of life and expenditure of money actually entailed; a definite decision as to whether the development of irrigation, agriculture, communications, and minerals was to be left wholly to private enterprise or to be shared by the Government would have been taken to the great advantage of the particular undertakings and in the general interests of the people, and some measures could have been initiated for the defence of the country and the maintenance of order by the employment of Arabs under British officers. The long period of marking time has been prejudicial to the material and political future of Mesopotamia, as well as to the relations between the native population and ourselves. Now that the decision to entrust the mandate to Great Britain has been taken, there should be no further delay in giving to the administration of the country the sense of security of tenure and confidence in the permanency of the policy to which it is called upon to give effect. Mesopotamia is too big and too important in its relations to the British Empire, forming as it does the keystone of the arch whose pillars are formed by British Africa and India, to be regarded as a side-show. A second Cromer is required as its first High Commissioner, if the country itself and the Empire are to derive the maximum benefit from the mandate.

THE DRIFTING OF CENTRAL ASIA.—II.

By Ikbal Ali Shah, M.R.A.S., F.R.G.S.

Bolshevism was awaiting an opportunity, and the ground now lay ready for any propaganda. It was pointed out that the British had been instrumental in bringing about the downfall of Turkey, that it was they who conquered Moslem Mesopotamia, that it was they who fought against Afghanistan and the Borderland people, that it was they who had declared their Protectorate over Egypt, and, finally, that it was they who had contracted a Treaty with Persia, by which they secured an economic ascendancy in that country; and it was urged that the passing of that country into a British Protectorate was but a matter of time. To an average Eastern, the facts appeal directly, making him think, for instance, that the cause of the downfall of Islam was being brought about by the British.

I need not here set out the defence of Great Britain in regard to all the above enumerated points, for the facts are well known to the average reader of THE NEAR EAST; but to an Uzbek the information is not easily accessible, as, indeed, is the case with many Afghans. The object in mentioning these points is to show how Great Britain is represented in the bazaars of Central Asia, where these things have become matter of ordinary conversation among the Moslem masses—and it is the winning over of the masses which is, primarily, in view by Bolshevist propagandists. At the start, therefore, the Soviets skilfully placed in the forefront of their argument not mere unintelligible theories of class warfare and Socialism, but a cry "War against European Capitalism," and "War against England."

The masses are the chief objects of Bolshevist propagandism, and Lenin is a profound believer in propagandism. "The masses," he said, "cannot be won without a highly developed, carefully carried out, and well organised system of flattery, lying, chicanery, and political jugglery." But two other factors have also played equally important parts, namely, bribery and display of military strength.

As to the money employed on the propagandism, it has been estimated that, roughly, over five million roubles have been spent, while free farms and lands were granted, and a wide area stretching up to Merv, was allowed to Afghanistan. In this offer of the Merv region a very clever policy was kept in view. At the time the Trans-Caspian province still resisted Bolshevist penetration a certain degree of strain was imposed on the Soviet forces; so, in order to relieve that tension, the Afghans were invited to occupy Merv, and thus reduce the pressure on Bolshevist forces which could be employed elsewhere. The Afghans were quite willing to fall in with this scheme, for the reason that they were, after all, taking their country back from the Russians; for the territory bounded by Khoja Salar in the North-West of Afghanistan to Merv, and then to Old Sarakhs, and thence to Puli-Kushti to Zalfikar Pass is legitimately claimed by the Afghans. Nor can we forget that numerous encroachments were made by the old Imperialist Russia upon the territorial rights of Afghanistan in this region, and the Panjdeh incident had for years humiliated the Afghans. Thus Merv is, in fact, no new acquisition for the Afghans; yet it came to them as such. The potentates of Bokhara and Khiva were recognised as independent, and some trade facilities were given them.

Another factor in the case was a mild display of military power. It was made plain that the soldiers of the Soviet Government had smashed Imperialist Russia, which had formerly oppressed the Uzbeks and menaced the Afghans. From a practical point of view, then, the Red Army could not be opposed by Bokhara or Kabul. Although in normal times the Ameer would have set all these awe-inspiring pretensions at naught, now, since his relations with India were not over friendly, he was inclined to give the matter a thought. There was at once a threat of invasion and an obligation to liberate the oppressed.

Matters were, however, not allowed to rest there, for although the Ameer and the Khans were brought into line, and although a certain amount of religious susceptibility had been created among the masses, all was not complete; propagandism was to be pushed yet farther. A very enterprising scheme was devised to disseminate the aims and objects of New Russia, by a system of railway trains which made circular tours and distributed books, newspapers, and pamphlets to the value of over half a million roubles; distributed free more than 150,000 proclamations, and provided 556 organisations with various publications. The trains contained cinematographs, bookshops, and branch telegraphic offices, which at every station placarded the latest "news" and sent out bulletins with the latest telegrams.

As regards religious sentiments, the Moslem section of the "Eastern Department" of the Commissariat for Foreign Affairs founded a "League for the Liberation of Islam," which was handsomely subsidised by the Soviet Government. It declares itself to be working for the protection of the Islamic world, and help in the way of propaganda, oral and printed, is given to similar organisations throughout the world. Egyptian Nationalists, Afghan Patriots, the Union of Caucasian Mussulmans, Persian Nationalists, the Congress of Russian Mussulmans, Turkish Nationalists, and others, have already joined the League. The mode of procedure of these various units of the League differs with the requirements and conditions of their respective countries.

Most people are of opinion that Bolshevism will collapse in the end, but at present we see the movement vigorous enough and progressing in some directions. Those who rise every day expecting to read in their morning paper that the Russian "Reds" have collapsed on account of economic exhaustion, appear to be misinformed regarding the agricultural and mineral potentialities of Russia under the Bolshevists. In the 1917 State Budget it will be seen that (excluding the war expenses) the revenue was higher than the expenditure, in spite of the fact that the sale of vodka was abolished, which had alone brought 800 millions of roubles to the Russian Government. Whatever may be the situation from the point of view of international credit, Soviet Russia has sustained her losses with little apparent setback in the way of its military achievements, or by the success of its propaganda in the East. We must remember that the cotton growing and allied industries in Central Asia, which were stifled by the old Russian monopoly system, have been, under the Bolshevists, supplying the whole of the Eastern and Middle Asia with cotton goods. Coalfields have been worked at Ferghana, and oil as good as that of Baku is produced; copper has been refined from the beds of the Burt and Kutchuk Sari rivers; deposits of coal are found near Mator Khabad, Teress Butak, and Kargach; and iron has been located by the Burt. Since the defeat of General Denikin large stocks of wheat and other cereals in South Russia have been imported. It is stated on good authority that in three southern provinces alone, 400 million poods were available in October last. There is naphtha at Baku and Grosny to the amount of several million poods, and the available stock of benzine in Grosny is estimated to be not less than 12 million poods.

And what of the gold mines of Siberia, to say nothing of its agriculture and pastoral resources?

What is the best possible way out of this Central Asian tangle? We have seen how Afghanistan and Bokhara are situated. Is Great Britain adopting an attitude of indifference again? What interest have the Afghans in making overtures towards friendly dealings with the British Government? Possibly they fear that restraint will again be placed over the conduct of their foreign relations; and they may not be willing to forego their claims on Merv, as it is now in their hands. Stoppage of the importation of arms does not trouble them; for in Kabul factories are making these articles. Industrial establishments are also in full working order. The desire of Abdur Rahman that Kabul should supply all that an Afghan needs has now been fulfilled. Bokhara and Khiva would be very reluctant to reciprocate any friendly overtures, for all the liberties of newly gained freedom would not suffice to strengthen their minds in making friendship with the British when they are actually under the shadow of the Bolshevist sword.

The first step has then, it seems, to be taken by the British Government, otherwise the Middle East will drift further from India than it is to-day; and that we, surely, do not wish. The sea surges towards India, and how are we to stem the tide? Not long ago Trotsky declared that only through India could England be struck down. What, then, are the guardians of India doing? The problem is grave, as are the interests surrounding it. The finding of a way out of the labyrinth must, of course, be left to responsible statesmen. But it may be suggested to them that the Bolshevist propaganda can only be checkmated by propaganda.

MONTENEGRINS IN ITALY.

On behalf of thousands of Montenegrins who have taken refuge in Italy and Albany, and in the name of the Montenegrin people, an assembly of some two thousand and five hundred Montenegrins, held in Gaeta (Italy) on the 12th instant, passed a resolution, a copy of which we have received. It runs as follows:—

"The Montenegrins, fleeing before the sanguinary Serbian terror into Italy, have ascertained with the greatest of pain:

"That the Peace Conference has trampled upon all the elementary principles of international right and morality, so far as it regards the question of Montenegro, not taking into consideration that Montenegro threw in her fate with the Allies as early as 1914, losing 50 per cent. of her Army and one-third of her population.

"That the Peace Conference has remained indifferent to all the appeals and protests against the bloodthirsty tyranny carried on in Montenegro by the Serbian Army, which burns our homes, destroys villages, disturbs our property, and interns, imprisons, and shoots our most prominent citizens, etc., etc.

"That the Great Powers have not fulfilled their solemn pledges, some of which were made by their most prominent representatives, for the restoration of Montenegro and to respect her sovereignty.

"That the Peace Conference, as it appears, is not averse to sanction the greatest crime of this war—that is, the violent annexation of Montenegro by Serbia without even formally consulting the Montenegrin people.

"Therefore, this gathering of Montenegrins most energetically protests against the present attitude of the Peace Conference towards Montenegro; and they appeal to the sentiments of justice and humanity of the Governments of the Great Powers, their Parliaments, and their public opinion, begging of them to intervene:

"That the Peace Conference should not sanction the incorporation of Montenegro with Serbia before the people of Montenegro have had an opportunity of expressing their will as to their fate, and expressing such without let or hindrance and with out the presence of the Serbian troops of occupation and their civil authorities.

"That the Peace Conference should order the Serbian Government to liberate at once the hundreds of prominent Montenegrin patriots who have been imprisoned without trial or charge, for over 17 months, because they would not sanction the violent annexation of Montenegro. Amongst these men are those ex-Ministers and members of Parliament, who, in 1914, voluntarily declared war against the Central Powers, when the Serbians cried for help, and generals who, towards the end of 1915, at the head of the Montenegrin Army, saved the retreating and disorganised Serbian Army from complete capture."

On behalf of the Assembly,

(Signed): L. Miouchekovitch (late Prime Minister of Montenegro), General A. Raitchevitch, General G. Yovovitch, Member of Parliament V. Martinovitch, Member of Parliament L. Petrovitch, Member of Parliament B. Vukotitch, Member of Parliament G. Voutchlinitch, Member of Parliament V. Kriookapitch, Eugene Popovitch (late Prime Minister of Montenegro).

CHESS.

The match between Mr. R. H. V. Scott and M. Marchand has resulted in a draw, each player winning three games.

Efforts are being made to raise a team of past members of the Oxford and Cambridge teams to play matches against the University teams in the autumn term.

The time limit for the London League matches for the past season was thirty moves in the first hour and six moves in every subsequent quarter. Personally, I regard such a time limit as absurd. It simply encourages "skittling," and I am of the opinion that players are tending to take these matches much less seriously than they did solely on account of the rapid play. This is borne out by the experience of a player who normally takes his full time in tournaments at twenty moves an hour, but who in the league matches this season only twice exceeded thirty minutes, though every game lasted over thirty and one was over fifty moves. Despite the rapid play, the number of games for adjudication this season has been more than usually large, and I see that it is now suggested that there should be either longer hours for play (which, I fear, is almost impracticable) or that a time limit should be fixed, which will reduce the number of adjudications necessary.

The following game was played between Mr. W. Winter and Mr. R. C. J. Walker in the City of London Chess Club Championship:—

QUEEN'S PAWN.

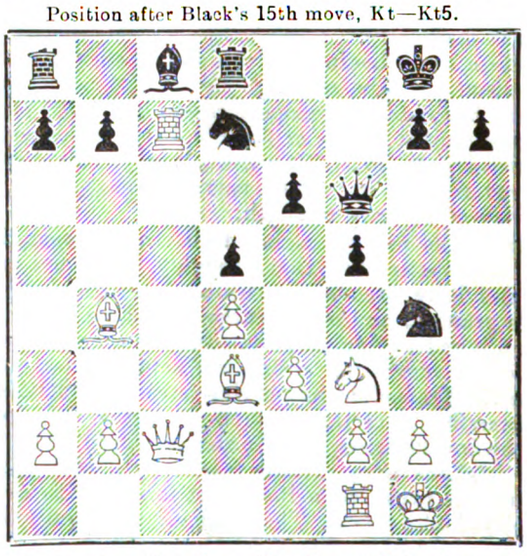
13. R x B	R—Q	26. Q x KP ch	Resigns

Position after Black's 15th move, Kt—Kt5.



(1) Not a good continuation. The Stonewall is all very well if played by White, but it creates grave weaknesses if tried by the second player.

(2) Preparing to take advantage of the weakness created on Black's Queen's side.

(3) This Kt would have been better employed at B3, where he could have rendered useful service in defence of the centre.

(4) Taking advantage of the weak move of the B.

(5) A vain attempt to relieve the position by a King's side attack.

CARO-KANN.

Arrangements have been made by the trustees of the late Cecil Rhodes to award a Rhodes Scholarship to Malta as a self-governing colony.

June 5, 1920, will be a public holiday throughout India in celebration of His Majesty the King-Emperor's birthday. As the Peace Treaty has now been signed it has been decided that the occasion should be marked by the celebrations customary before the war.

The Civil Service Commissioners announce that examinations for candidates who have served in his Majesty's Forces will be held on August 10 for appointments in the Consular Service of the Levant. Candidates must not be less than 22 on the date of the examination, nor more than 26 on August 2, 1920. Full regulations and forms of application (which must be returned on or before June 10), may be obtained on application by letter addressed to the Secretary, Civil Service Commission, Burlington Gardens, London, W.1

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The business community has not been slow in expressing its opinion of the Budget. The initial attitude of reserve could have but one meaning, and from all sides have come criticisms of the Chancellor's proposal. The feature of the Budget to which exception is taken is the Excess Profits Duty, but for which blame would have been lost in praise. It had been expected that this tax, which was reduced last year from 80 per cent. to 40 per cent., would this time have been abandoned, and its increase to 60 per cent. has caused unmitigated surprise. Of the utility of the duty as a means of raising revenue there is no question, but it is realised in commercial circles that its disadvantages far outweigh its convenience as a medium of taxation, and it is emphasised that if something of the kind be really necessary—and of that there is unfortunately no doubt—the position could be met by a flat-rate tax on all business profits.

***

The increase in the Excess Profits Duty will cause a revision of outlook in many directions, in none more so than in regard to the immediate future of rubber and tea companies. Shares in both these industries have in recent months been on the up grade, in the expectation—especially in the case of rubber companies—of increased earnings. That prospect is gone for the time being, and, in keeping with the trend of other markets, rubber and tea shares have declined in price. In both cases, however, the future is scarcely open to doubt. The demand for rubber is bound to increase, and, provided that it is not possible to manufacture synthetic rubber at a price which will affect the plantation industry, large profits are bound to be realised in due course, while as regards tea, the prospect is that as soon as world conditions become normal consumption will develop at a rate which may outstrip supply.

***

In undertaking the mandate for Palestine and Mesopotamia, it cannot be too strongly emphasised that Great Britain is accepting more than responsibilities, and that our commitments in those regions, arduous though they may prove, are not without very positive compensations. Both Palestine and Mesopotamia offer exceptional prospects for British trade enterprise in innumerable directions. In engineering—the building of railways, roads, and bridges—in general construction work, in commerce, these districts should provide admirable openings for British firms, provided the requisite energy is displayed. The possibilities of these markets are well known, and it is now "up to" the leaders of British trade to show the way here in the same way that they have shown it in so many other fields in the face of severe competition such as they are not likely to encounter in either Palestine or Mesopotamia—in the near future, at any rate—that is, unless a tendency is shown to neglect these markets.

***

I must say at once that I do not think there is any reason to anticipate that this will now be the case. A few months ago I should not have been so confident, but of late there have been unmistakable signs that British traders, as a whole, have been waking up to the potentialities of the Near Eastern markets. An instance of this trend is to be found in the fact that British firms have been prominent in competing for recent tenders in Turkey and Roumania and other countries, and, be it added, with some success. Thus the contract for the electric installation of the Haidar Pasha terminus station and other buildings went to one of the three British firms tendering, in the face of keen competition, while another Constantinople contract for motor fire-pumps and a floating engine, for which twenty firms of different nationality competed—a French firm being successful—would have been awarded to the British tenderer, says the *Journal* of the British Chamber of Commerce of Turkey and the Balkan States, had the rate of exchange between the franc and the pound sterling been even 30 francs to the £. These facts speak for themselves. But I cannot refrain from impressing the moral that, given enterprise, British goods are first every time.

***

The evidence of the condition of States in Europe which have suffered through the war provided by the White Paper published this week, containing a series of reports dealing with the economic position in Central Europe, shows how urgent is the need for the granting of assistance to the countries in question in their efforts to restore normal conditions. Through the war industrial machinery and buildings have been destroyed or damaged, agricultural machinery has been destroyed or taken away, and communications generally have been seriously damaged or impaired. Where the States have produced for export, the restoration of foreign trade—a *sine quâ non* on the road to rapid reconstruction—is handicapped by the chaotic exchanges. To wait until they adjusted themselves would be to delay too long. Elsewhere in this issue will be found details of an important scheme for coping with the present situation as regards the "Austrian Succession States." Under the most influential auspices an association known as the Anglo-Danubian Association has been formed for the promotion of the resumption of trade with the countries in question. Its success must depend largely on the attitude of exporting firms, who may be confidently looked to to give their full support to the scheme on which much depends.

***

An entertaining article appeared recently in a French contemporary belittling the results achieved by the Athens Exhibition. According to the writer, there was scarcely anything to praise in connection with the undertaking. The goods, it appears, were quite—I almost feel tempted to underline the word, but will content myself with mere repetition—quite unsuitable, the "white goods, linen, and muslin," being unfit for Greek buyers, while as regards the machinery there was "little that would find purchasers in Greece." Really, I am surprised that the writer did not go on to explain that the real reason why practically nothing was returned to England after the exhibition was that the Greek buyers, furious at being invited to inspect such an unsatisfactory undertaking, smashed up the exhibits.

***

Perhaps the most astonishing passage in this curious article is the statement that "there appeared to be no actual intention of doing business." Then, if so, why should our French friends concern themselves so unnecessarily about it? The fact is, of course, our competitors would have held an exhibition at Athens themselves—if they had thought of it. They realised that as soon as they learnt of the great success of the enterprise of the Federation of British Industries. It was too late then, and now that they are beginning to appreciate the gain to British commerce through the exhibition—beginning, mark it! for the results of the exhibition are going to be very far-reaching in regard to British trade endeavour in the Near East—they cannot restrain their pique at the thought of their lost opportunity. And so we have attempts to disparage the exhibition.

Commerce and Industry.

(Reports from Our Own Correspondents.)

EGYPT.

Cairo, April 5.

The Economic Situation.

The economic situation, despite the slight drop in cereal prices, has not improved much. A certain amount of relief has been afforded by the import of flour, but very much more extensive action will be necessary before any decided improvement manifests itself. The consultative committee of the new Supplies Board held its first meeting on Saturday to consider the question, and amongst other things nominated a sub-committee to study the possibility of limiting the cotton area next year so as to relieve the food crisis. crisis.

Cairo, April 12.

The Coal Shortage.

The coal shortage threatens to have far-reaching effects on the economic situation in Egypt. The train services have all had to be curtailed, and the Council of Ministers has this week approved of regulations restricting the hours up to which hotels, restaurants, and places of entertainment may remain open, and forbidding shops to have illuminated advertisements or to remain open after 7 p.m.

Efforts are being made to obtain supplies, and the assistance of the various coal-producing parts of the Empire, as well as the British shipping community, is being enlisted, but with an inconsistency which would be refreshingly humorous if one did not know that it was being used for disloyal political purposes, certain of the extremist press are complaining that if Great Britain can allocate coal to France she ought to do likewise for Egypt, especially in consideration of the fact that she takes the preponderant portion of her cotton crop.

The critics appear, however, to be quite oblivious of the incompatibility of repudiation of British protection, which they have actively voiced, and are still voicing, with their present claim for special consideration by Great Britain in regard to internal economic conditions of this country, as well as of the fact that no pressure to grow cotton is brought to bear on local cultivators, who are quite free to grow cereals, and who for their cotton receive from Great Britain the price fixed by the world's market. The Financial Adviser has done well to remind the people of this country that the flour supplies which are coming in, and without which this country will be faced with famine, are available solely thanks to the intervention of Great Britain. If, as is hoped, coal supplies are forthcoming, this will be solely due to assistance from the same quarter, and herein will be another demonstration of the practical value of British protection.

The Pink Boll Worm.

At the end of 1915 the very serious diminution in the yield of cotton due to the pink boll worm impelled the Egyptian Government to seek some outside independent opinion as to the measures which were being or might have to be taken to combat the pest, and, in accordance with a request made through the Foreign Office, the services of Mr. H. A. Ballou, entomologist on the staff of the Imperial Department of Agriculture for the West Indies, were secured. Mr. Ballou spent eighteen months during 1916-1917 in Egypt, and thoroughly investigated the problem. His report has just been published, and, summed up, it is a commendation of the policy followed by the Government in its handling of this very serious question. The report is a long one, and, besides making various recommendations, Mr. Ballou deals very exhaustively with the pink boll worm and the influence of its ravages on the cotton crop. Space forbids my making any longer reference in this place, but all those interested in agricultural pests in general and cotton pests in particular should read this very valuable report, which can be obtained from the Government Publication Office, Cairo.

ROUMANIA.

Bucharest, April 15.

Petroleum Export.

The export of petroleum and petroleum products during 1919 was very low indeed, being only about 38,900 tons, as compared with 1,036,000 tons in 1913. Most of it was exported to Tchecho-Slovakia and some to Bulgaria, Turkey, Yugoslavia, and Austria. It has all been transported by way of the Danube; none has been shipped from Constantza. Enormous quantities are now lying in store awaiting transport facilities.

CYPRUS.

Nicosia, April 3.

Railway Construction.

According to an indenture entered into with the Cyprus Mining Corporation, the time allowed for carrying out the construction of certain extensions of the Government Railway, in the north of the island, is further prolonged for another year—viz., to May 19, 1921.

ROUMANIAN INTERNAL LOAN.

Particulars are given in a report from H.M. Commercial Secretary at Bucharest of the new Roumanian internal loan, which is being offered for subscription for such period as the Government may determine from April 25.

The price of the emission is fixed at 87 per cent. if the stock be taken at once, and 88 per cent. if the payments be made by instalments in accordance with the prospectus. The loan bears interest at the rate of 5 per cent., and the amortization at the nominal capital value will be made by drawings, of which the first is to take place on September 1, 1921, and others on March 1 and September 1 following during a period of forty years.

The Government hope to realise two thousand millions of lei by this loan, and have already made arrangements with various banks to take up firm over 600 millions. It is stated that there is every reason to expect that the amount of two thousand millions of lei will be subscribed as conditions appear to be favourable, especially in view of the very large amount of floating currency in the country.

Among other inducements offered by the Government are:—(1) The exemption of sums invested in the loan from taxes imposed on war profits and all fortunes generally, whilst in the case of any forced loan which may be found necessary, the amount of money invested in this issue is to be deducted from the total of the owners' investments. (2) The bonds are exempted from all taxes present or future. (3) The bonds will be taken at their nominal value as guarantee by State institutions, and the coupons will be accepted as money by them. (4) Subscribers may pay for agricultural land under the expropriation with the bonds at their nominal value. (5) The Government undertakes not to denounce the loan before May 1, 1931.

ANGLO-DANUBIAN ASSOCIATION.

IMPORTANT BRITISH TRADE SCHEME.

Under influential auspices an association has been formed for promoting the resumption of trade with the Austro-Hungarian Succession States. Particulars of this important development are given in a preliminary announcement made by the Anglo-Danubian Association. The directors of the Association are:—The Right Hon. Fredk. Huth Jackson (chairman), H. A. Andreae (Kleinwort, Sons and Co.), A. G. M. Dickson (British Trade Corporation), C. V. Sale (Hudson's Bay Company), Sir Edmund Wildbore Smith (Metropolitan Carriage Wagon and Finance Company), L. E. Meinertzhagen (Fredk. Huth and Co.). The shareholders include:—C. C. Barrie, Esq., C.B.E., M.P., the British Trade Corporation, F. Dudley Docker, Esq., C.B., Goschens and Cunliffe, Hudson's Bay Company, Fredk. Huth and Co., Interallied Trade and Banking Corporation, Kleinwort, Sons and Co., Lazard Brothers and Co., Ltd., Lloyd's Bank, London County Westminster and Parr's Bank, London Joint City and Midland Bank, Morgan, Grenfell and Co., N. M. Rothschild and Sons, J. Henry Schröder and Co.

The difficulties which are at present preventing the resumption of business relations and the lines upon which it is suggested they may be overcome are outlined as follows:—The States into which the late Austro-Hungarian Empire has been broken up are suffering from (1) the want of raw materials from the world outside and (2) the breakdown of the normal distribution and exchange of products of these different States as between themselves. The situation is further complicated by currency inflation and an immense burden of war debts—difficulties which, though serious and apparently insoluble, can to a large extent be left out of account. The main problem to be faced is the inability of these countries to produce the goods with which to pay for the necessary imports of raw materials. In normal times these raw materials would be obtainable on credit, but in present circumstances bankers and traders are unwilling to furnish such credits, owing to the absence of any security that payment in good currency will be forthcoming in the near future.

The resumption of normal production in the Succession States is rendered even more difficult than is inevitable as the natural consequence of the war by the setting up of economic barriers by the Governments of these States as between themselves. A further deterrent to business is the fear of political disturbance and interference with the due completion of any transactions that might be entered into. There is also a very natural apprehension that the condition of these countries is such as to lead to revolution and anarchy. Under the proposed scheme it is suggested that these obstacles may be overcome and that the normal trade may be induced to flow into these areas by a plan which will ignore the depreciated currency, provide guarantees against political interference, and be the surest preventive of social upheaval. Raw materials will be supplied to these countries in trust, remaining throughout the process of manufacture the absolute property of those that send them. The finished goods will not be sold for crowns or other depreciated currency, but will be re-exported to those markets which can give real value in money or goods in exchange. The countries in distress will receive a share of the products for their services, and this, it is to be hoped, in the course of a few years will re-establish their economic life to something like the pre-war standard of prosperity and independence. At the same time the production of food in countries themselves will be stimulated by supplies of manufactured goods, since it is the absence of any such supplies to-day which has reduced the larger industrial cities, like Vienna, to the point of starvation.

Indispensable Guarantees.

The indispensable guarantees required for the new business are:—(1) That the property in the goods shall be safeguarded; (2) that complete freedom of re-export shall be guaranteed by the Governments concerned. It has been ascertained that the Governments of German Austria and Czecho-Slovakia, the two principal manufacturing areas of the late Empire, are in principle prepared to give the two guarantees required, and further, that the manufacturers themselves are willing and eager to lend their factories in consideration of their receiving a share of the finished article produced under the scheme. Apart from the urgent necessity of saving these countries from the social and economic collapse into which they are drifting, the present world shortage of manufactured goods can only be remedied by bringing again into use their excellent workshops, the skilled labour and management, which are being left idle for want of raw materials. The Association will approach traders and manufacturers in this country who are likely to be interested, and ask them to give their views in detail on the practicability of the scheme in so far as it would concern their particular trade or industry, and having secured this preliminary information, a mission of investigation will proceed to Austria and Czecho-Slovakia to examine thoroughly the economic and political situation in these and adjacent countries. If the report of the mission of investigation is encouraging, and provided the political and social conditions remain stable, it is proposed to form a larger company to carry out the business in the following manner:—Just as formerly a local agent or banker acted on behalf of traders, holding their security, advising them and acting as intermediary in the widest sense, so this company would act for those who wished to make use of its services, but in the new conditions, and with the new obstacles in the way of normal business such a trustee would, obviously, be far more indispensable than formerly. The company would have branches in Vienna, Prague, and the other capitals of the Austro-Hungarian Succession States. Traders might either take the initiative themselves or leave it to the company to make proposals and recommendations. They would make their own financial arrangements in connection with the new business, but the proposed company would assist in securing the necessary credits by furnishing such guarantees as will satisfy bankers.

The main purpose, however, of such an agency, under present circumstances, would be to combine the various interests in a way which would secure the required authority in negotiating with the various Governments and business groups in Austria and the Succession States. The Association has obtained the approval of His Majesty's Government, and the Board of Trade have been fully informed concerning the formation of the company, and have expressed their satisfaction at the steps which have been taken. It is not, however, intended that the Association should confine its activities to British customers, as it is clear that the co-operation particularly of French, Italian, and American interests will add immensely to the power of the proposed organisation, and the bankers and traders in these countries, as well as neutrals, will be invited to take full advantage of the services of the Association on equal terms with British firms.

ROUMANIAN FINANCIAL REFORMS.

The Department of Overseas Trade is informed in regard to the financial state of Roumania that it is proposed shortly to lay before Parliament Bills for the carrying into effect of the following financial reforms:—(1) A capital tax on fortunes which will be payable by everybody. It is proposed to admit free of taxation all fortunes up to ten thousand lei, and from fortunes of greater amount the sum of ten thousand lei will be deducted before the imposition of any tax. Upon the remainder there will be imposed a progressive tax (as to the details of which no information is available) which will probably run from 2 per cent. on small fortunes to 10 or even 12 per cent. on large. (2) A special tax on war fortunes which, it is stated, will follow the same general lines as the above, save that the percentage of tax will be much larger, probably from 20 to 50 or 60 per cent. (3) A tax on luxuries which is not yet elaborated. (4) A graduated income-tax.

There seems every prospect that the above measures will become law, although possibly certain amendments may be made in the first two, whilst in the case of the income-tax the actual collection of the money will necessitate a certain reorganisation of the financial administration of the country, which may take some little time.

BANQUE D'EXPORTATION PRIV. DU ROYAUME DE SERBIE.

(Royal priv. Serbian Bank for Exportation.)

BELGRADE, SERBIA.

Capital, Paid-up, 5,000,000 Dinars

Reserve - - 1,200,000 Dinars

The Bank transacts all Banking Operations, undertakes all manner of financial, commercial and industrial enterprises and effects Money-Transfers to and from Foreign Countries.
The Commercial Department of the Bank deals mainly in the Export of Native Products on its own account and on commission basis.

General Manager: D. LOVERDO.

TRADE WITH THE NEAR EAST.

The Bank of Athens extends special facilities for business with the Near **East** to manufacturers, exporters and importers.

The Bank has offices in all the principal towns in **Greece,** also in **Egypt,** Cairo and Alexandria, in **Cyprus,** Limassol and Nicosia, in **Constantinople,** and in **Smyrna.**

Inquiries from interested parties are invited.

BANK OF ATHENS.

PAID-UP CAPITAL : £1,920,000. **HEAD OFFICE IN ATHENS.**

London Office: 22, Fenchurch Street, E.C. 3.

COMMERCIAL BANK OF GREECE, LIMITED.

CAPITAL PAID-UP - Drs. 15,000,000.
RESERVE FUNDS - Drs. 2,845,010.45.

Head Office: ATHENS.

Branches:—**Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 295,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

IMPORTS (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

EXPORTS (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

COINAGE.—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36·50 Drachmæ to £1.

FREIGHT.—From England, 160/- + 10 % primage.

WEIGHTS AND MEASURES.—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

Branches:

PIRÆUS, SYRA. PATRAS.

Capital Paid Up - Drs. 10,000,000.

Fully represented in all parts of the world for all kinds of commercial, financial, and shipping business.

President. L. EMBIRICOS. *Manager.* D. MIAOULIS.

BANK OF PIRÆUS.

For COMMERCE, INDUSTRY and SHIPPING.

Capital Paid-up - Drs. 5,000,000. Reserve Fund - Drs. 3,095,000.

OFFICES at PIRÆUS and ATHENS.

Every kind of Banking business transacted.
The Bank's connections throughout Greece enable it to offer foreign clients special facilities for the collection of Bills, etc.
Correspondence invited.

BANK OF INDUSTRY OF GREECE.

Head Office: 14, Stadium Street, Athens.

Capital Fully Paid-up - Drs. 15,000,000

The Bank has been established for the encouragement and development of Industry and Commerce, and undertakes every description of banking business.

BANK OF ORIENT.

Capital Paid up - Drs. 25,000,000

Head Office: ATHENS.

Branches: SALONIKA, SMYRNA, ALEXANDRIA, CAIRO, MITYLENE, SERRES, ZAGAZIG, MAGNESIA, PERGAMA, SOMA.

Every kind of Banking Business transacted.

BULGARIA'S ECONOMIC NEEDS.

I.—THE POSITION OF AGRICULTURE.

(From a Bulgarian Correspondent.)

Bulgaria is mainly an agricultural country, and even granted industrial development, its future must depend on the land. Before the late wars agriculture was in a flourishing condition, and promised to develop to an unhoped-for extent, thanks to the introduction slowly but surely of agricultural machinery. It was unhappily neglected from 1912, when the Balkan War broke out, up to the past year.

The total area of Bulgaria is about 9,000,000 hectares, 31 per cent. of which is cultivated and 22 per cent. uncultivated, the remainder consisting of forests, meadow lands, gardens, pasturage, and marshy land. The area of cultivable land is about half the total area of the country, and could be increased by the greater use of modern machinery. The agriculturists are small proprietors, and cultivation is carried on for the most part on primitive lines. They use a plough of the old type, but in recent years there has been a tendency to adopt modern agricultural implements. The following particulars of agricultural machines and their type existing in Bulgaria in 1910 may be of interest: Ploughs, old type, 420,000; new type, 114,000; sowing machines, 1,000; reapers, 7,000; threshers, 1,000; winnowers and sorters, 65,500; other machines, 12,000.

The Ministry of Commerce and Agriculture is encouraging the introduction of the most up-to-date machines, and its efforts in this direction are furthered by the State banks. The agricultural machines most in use at present are those obtained from Germany and Austria-Hungary. Thus the ploughs of the Sark and Eckert types and others of German origin have not been displaced so far by ploughs from other countries, even those coming from Great Britain and America. That is explained by the fact that the land requires special kinds of machines, which have so far been manufactured by the said countries.

Opening for Agricultural Machinery.

The stock of agricultural implements is now reduced to the minimum, a very large number having deteriorated owing to the long duration of the war. Hence the need for these implements is very great, and British manufacturers would find Bulgaria an excellent market for agricultural machinery.

The Bulgarian peasant, whose cultivation has been on very circumscribed lines prior to the introduction of new implements, is disposed to welcome the latest machines, recognising that they greatly facilitate his work. He is the more inclined to do so to-day, since after the war cattle and labour have both been lacking.

Three quarters of the productive land in Bulgaria is devoted to the cultivation of cereals. The total production of cereals in 1912 amounted to about 2,700,000 tons, of which 1,200,000 were wheat, 700,000 maize, and the remainder barley, oats, rye, millet, etc. The crop of the past year was very good, and has not yet been disposed of abroad.

Apart from cereals the principal crops cultivated in Bulgaria are tobacco, roses, and beet. Tobacco is grown principally in the south and in the district of Dubnitza. The area planted is estimated at about 3,000 hectares. The district of Haskovo produces most tobacco, then come Philippopolis, Kustendil, etc. In point of quality Bulgarian tobacco can be compared to that of Macedonia. Certain kinds, for example, those of Haskovo and Dubnitza, are like the tobaccos of Xanti and Kavalla for quality, aroma, etc. Stocks include several crops of tobacco, some even of the crop of 1916. After the Armistice the sale of these tobaccos to Italy, America, and Great Britain proceeded slowly despite regular communications, but demands from abroad are constantly being received, and it is certain that a market will be found very easily as soon as the difficulties of transport and exchange are overcome. The price of tobacco fluctuates to-day between 15 and 60 levas per kilo f.o.b. Black Sea port.

Rose cultivation is second in importance to that of tobacco. The roses are exclusively utilised for distilling the famous attar of roses. The area devoted to roses amounts to about 5,000 hectares, the best gardens being those of Karlovo and Kasaulik. Of late attar of roses has been exported on a considerable scale to America, France, and England.

It is unnecessary to refer to the other crops such as beet, rice and beans, which, though extensively cultivated, are insufficient to satisfy local consumption. As a matter of fact, large quantities of sugar and rice have to be imported.

Future of Industry.

The question whether industry, speaking generally, can have a future in Bulgaria has been the subject of constant investigation by economists, but so far no definite solution has been reached. Many of them hold the opinion that the desired conditions do not exist for industrial development, and that the country must long remain an agricultural community. If, however, Bulgaria is to follow the path of evolution, it will be compelled to develop its industries and to progress on the lines of France and Italy. At present conditions are entirely unfavorable for industrial progress, in view of the lack of coal, iron, steel and other raw materials.

Weaving is the oldest industry in Bulgaria. The principal centres for weaving are Sliven, Gabrovo and Panaguriste. Owing to the success achieved in the sale of Bulgarian cloth in Greece, Turkey, and Bosnia-Herzegovina, several enterprising Bulgarian business men established factories with entirely modern machinery and organisation at Gabrovo and Sliven. Manufacturers obtain the wool in the country itself, and the cotton and woollen threads for the manufacture of the best cloth similar to the western product from Italy, Great Britain and other countries. After the Armistice large quantities of cotton thread were imported from Great Britain and Italy; for all that, the needs of the factories and workshops are not satisfied, and the importation of this commodity increases from day to day. At the present time there are factories for knitted goods at Gabrovo and elsewhere which are unable to carry on for lack of woollen and cotton threads.

(To be concluded.)

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Great Indian Peninsula Railway.—Supply of steel work for bridges. (Spec., £1, Secretary, 48, Copthall Avenue, London, E.C.2.) May 11.

Egyptian State Railways, Telegraphs and Telephone Administration.—Supply of timber. Tenders will be received up to 10 a.m. on May 12. (Particulars may be seen at the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)

Athens. Ministry of Communications.—Supply of telegraphic materials. (Particulars may be seen at Department of Overseas Trade, 35, Old Queen Street, S.W.1.) June 20.

ENGINEERING.

HUGE SURPLUS AIRCRAFT SALES.

Inspection and Luncheon.

In conjunction with the Aircraft Disposal Company, invitations were issued for Friday, April 23, by Messrs. Handley Page, Limited, to an inspection of the Waddon Aerodrome effects, bought from the British Government, and a subsequent luncheon at the Savoy Hotel, presided over by the Marquess of Londonderry, Under-Secretary of State for Air. Air attachés of foreign Powers, a number of representatives of aircraft firms from abroad and at home, and many other guests attended both functions.

The Waddon Aerodrome houses only a small portion of the great purchases which the Government have surrendered for one million pounds sterling and 50 per cent. of the purchasing company's profits. The remainder is housed in five other 'dromes, and 130 more stations will see their contents turned over to the Disposal Company. The whole transaction covers 10,000 machines, 30,000 engines, and immense quantities of materials and accessories—such as 500 or 1,000 tons of ball-bearings, 350,000 sparking plugs, 100,000 magnetos, bolts, nuts, and small accessories.

At the luncheon Mr. Handley Page, in a humorous speech, gave a rough catalogue of the Disposal Company's huge stores, suggesting that manufacturers other than aircraft would find therein material for all sorts of uses—even to bedsteads, hat stands, clock cases, etc.

Proceeding, he said every Government that wished to economise in organisations for defence must necessarily take lessons from the Great War and effect savings, by preparedness in the air, in naval and military expenditure. Aeroplanes could now be purchased at a cost which was only a small proportion of the original cost to the British Government. A country, therefore, inaugurating a national programme in the air could get through the development period at a very low cost, owing to the large stocks available. Behind these stocks of complete machines were all the necessary adjuncts of spare parts available both for engines and machines, so that there was no fear of the organisation being hampered by lack of requisite subsidiary supplies. After these stocks were exhausted it would be impossible to replenish them or obtain material except at three or four times the cost.

To-day air transport was slowly but surely taking its place in carrying out quick commercial transactions. To-day the name and prestige of British aircraft stood higher than any other in the world, and even those nations who had foreign aircraft; pushed by expeditions sent to their shores and foreign demonstrations conducted regardless of expense, had realised that the machines so offered were not as good as those from this country, and were turning round and equipping themselves with aircraft made here. It was early as yet to give the results of the sale of aircraft by the new company, but in the short period of its existence many more machines had been sold than the Aircraft Disposal Board sold during the whole period of its existence.

THE PORTS OF INDIA.

Extensive Developments Required.

The rapid expansion of India's trade, and the probability that in the immediate future, as a result of the programme of industrial development, this progress will be greatly accelerated, has brought to the front the question of the adequacy of the country's port facilities. Schemes of extension that would have proved ample in view of the general outlook in 1913, for instance, will no longer suffice, in view of the altered conditions.

The general position with regard to India's ports and their development was dealt with by Sir George Buchanan, K.C.I.E., in an interesting paper which he read before the Indian section of the Royal Society of Arts on April 15. It seemed hardly credible, he said, that India, with a coast line of over 4,500 miles, an area of over 1,800,000 square miles, a population of 350,000,000, and a trade the total value of which before the war exceeded £300,000,000 sterling, possessed only six ports with any pretensions to the name. The entire west coast of India was served by Karachi and Bombay, the east coast by Madras, Calcutta and Chittagong, and Burma by Rangoon. There were a certain number of minor ports—all, however, undeveloped, and principally used for the coasting trade.

Wharf or Dock?

Dealing with Bombay, he pointed out that further dock extensions, either in front of the Alexandra Dock or up to the harbour in the direction of Bombay, were now being discussed. To add to the present traffic congestion by building another dock in the vicinity of the present docks would, he considered, be a great mistake, and obviously the port would have to expand in the Bombay direction; but whether it was necessary or even desirable to build a dock was a matter for consideration. The site appeared to be particularly favourable to the construction of a large deep-water wharf. Modern dredgers could without difficulty cut a deep channel right up the harbour, and by using the material dredged for reclamation purposes a magnificent export yard with a deep-water wharf, capable of great expansion, could be constructed at a considerably less cost than would be necessary for a dock. It was also of the first importance to deepen the water in the main entrance channel to Bombay Port, and at the anchorage, and all the material dredged should be used for reclamation purposes, either for the port or the extension and improvement of the town.

Karachi's Future.

The port of Karachi depended for its prosperity entirely on the grain trade, and a failure in the monsoon or other disturbing factor at once caused a serious fall in the revenue. The financial position was not particularly strong. New schemes were under consideration, estimated to cost 250 lakhs, which at 8 per cent. for interest and sinking fund would add another 20 lakhs to the revenue expenditure—an amount it would be obviously difficult to meet, unless rates and dues were greatly increased, or there was a very material increase in trade.

At present there were neither storage sheds for grain nor grain elevators, and during the busy season some six thousand wagons of the North-Western Railway were confined to the railway district, owing to the difficulty in disposing promptly of their contents. One solution of the problem was the installation of grain elevators at the port and in the grain-producing districts, in which case any heroic scheme of wharf extension might safely be postponed for the time being.

The whole future of Karachi required the deepest consideration from the Imperial point of view, as it must some day be a very large port, and in addition to the yearly increasing export trade from Sind and the Punjab, Karachi was marked out as the chief Indian port for the trade with Mesopotamia and Persia.

Position at Calcutta.

Turning to Calcutta, Sir George said that the correct policy in port development was always to have facilities a little in advance of necessities, and between 1895 and 1900 Calcutta was fairly up-to-date. "In 1900-1," he continued, "a committee was appointed by Government to consider how the management of the port could be improved, especially with reference to economy and efficiency. The report therefore dealt largely with administrative details; the committee did, however, propose various additional facilities for the import trade at the jetties, but expressed the opinion that no large capital expenditure was necessary in the near future at the docks, as their capacity was sufficient for all probable requirements, and were capable of gradual extension. The Commissioners were thus lulled into a feeling of security, and whilst the other large ports of India were busy with extensions and improvements, Calcutta remained with folded hands, and was only awakened from its sleep by the clamour on the part of the public for facilities for meeting the rapidly increasing demands of trade, with the result that in 1913 another committee was appointed by Government to deal comprehensively with the whole question of the development of the port of Calcutta. The committee issued its report on March 19, 1914, and recommended approval to a very large dock extension scheme and to a number of minor improvements. Unfortunately, the great war broke out in August, 1914, causing a postponement of all development schemes, and Calcutta is only now picking up the threads and making a fresh start. The Port Commissioners will have, however, to pay dearly for their lack of foresight, as the docks will cost twice the pre-war price, and at the same time the Commissioners will have to pay 50 per cent. more in interest on loans."

Apart from the provision of dock accommodation, Calcutta could not in the future maintain its position as a

great port unless measures were taken to improve the river.

Like other river ports, Rangoon had had its troubles with its line of communication to the sea, the chief of which necessitated the building of a training wall two miles long at a cost of a million pounds in order to prevent the river changing its course and leaving Rangoon high and dry. This work was successfully accomplished, and a problem now in course of solution was the cutting of a channel through a shoal at the junction of three rivers a mile or so below the port, which prevented steamers of heavy draught having access at all times to the wharves and moorings.

The Port Commissioners were aiming at a 30-ft. channel from the sea to Rangoon at ordinary tides, and although the work would involve a large expenditure, and was, to a certain extent, experimental, they were prepared to take the risk.

In his opinion, Rangoon as a port was still in its infancy, and the Port Commissioners needed to be very far-seeing and courageous, or they would fail to keep pace with the times. Burma was a country with vast potentialities which were only beginning to be recognised; its mineral wealth and forests were almost untapped, and the agricultural possibilities, particularly in sugar, were enormous. The port could not expect to continue to conduct all its export trade in the steam, as in the near future goods for export by the thousands of tons would come down from Upper Burma by rail. A large, well-equipped export wharf was required, a site for which had already been selected, and additions and extensions to the import wharves and river-steamer wharves, more warehouses, and a dry dock, were other works which were indicated.

(To be concluded.)

MISCELLANEOUS TOPICS.

Aeroplanes in Hot Climates.

Some very interesting questions were dealt with by Col. Ivan Davson, O.B.E., in a lecture which he delivered recently before a joint session of the Georgetown Chamber of Commerce, on "Aviation and Its Possibilities in British Guiana." He emphasised the necessity of extending wireless telegraphy in connection with aircraft. Touching on the question of deterioration of aeroplanes in hot climates, he said a weak point lies in the propellers. These are very skilfully made to a required "pitch," and consist of many layers of mahogany or walnut glued and pinned together, planed to the required shape, and polished. He was told, however, that it has been found that propellers made in warm climates seem to have a greater endurance than those made at home and shipped out to them. This has been most noticeable in the case of propellers specially made for the R.A.F. at Malta, which stood the East African climate far better than home propellers, although they would not have given as high an efficiency in France. All this, however, has to be established by experience.

Flame-Cutter Underwater.

It is calculated that about fourteen million tons of shipping were sunk by enemy action during the war. It is, therefore, natural that the salvage operations which are being contemplated in various parts of the world should create much interest, especially in the Mediterranean, where shipping is badly needed, and where a good many fine modern ships have been sunk not far from the eastern coast and in the northern Ægean Sea. Several companies have already been formed, and others are being formed abroad, for the purpose of salvage operations. One of the first in the field, however, is a British salvage company, which is exceptionally well equipped, and has acquired from the Admiralty special advantages in its operations. One of the most noteworthy features of this company's equipment is a wonderful flame-cutter, by means of which holes are cut in the sides of sunken vessels for cargo and machinery salvage. This flame-cutter is so devised that an oxy-acetylene flame can be used under water. The flame issues from two jets, and is protected by a stream of compressed air coming from two other jets in the same cable. This device has quite lately been perfected, and, it is said, gives most satisfactory results. The company possesses two excellent salvage vessels, which are completely fitted up with the latest searchlights, line throwing guns, hoisting machinery for cargo, arc welding plants, rock drills, and numerous other devices necessary for modern salvage work. The crews have, for the most part, been enlisted from men who served under the Admiralty in salvage work during the war; and there is not a man among them over forty, as salvage is essentially a game for young men. This company has already salved large liners from various depths, and cleared fairways, etc. In cases where the actual vessels cannot be raised there are valuable cargoes and machine parts which will more than repay the money spent on their recovery. It has recently been reported that certain American salvage vessels were being prepared for salvage work in the Eastern Mediterranean, but it is to be hoped that since the British have led the way to what should prove a valuable and remunerative reconstruction industry, they will also carry out the same work in that region where British shipping suffered most of all during the war.

Great Engineering Combine.

A commencement has been made with the construction of a magnificent ten-storeyed building, the Aldwych House, which is to form the London headquarters of the new engineering combination known as Agricultural and General Engineers, Ltd., the capital of which is £3,300,000. This 'skyscraper," as it is already called, will occupy the site opposite Australia House, with a frontage facing south of 213 ft. on Aldwych, and will cover an area of 30,000 ft., having ten floors of offices with express and ordinary lifts, and every modern convenience. On the ground floor will be a showroom, in which will be displayed the products of the eleven firms of which the company consists. These products will include such articles as steam and motor rollers, road transport wagons, agricultural oil-engines, crank shafts, forgings, steam-engines, threshing machines, motor ploughs, and milling machinery. The names of the firms in the combine were mentioned in previous engineering notes. All of them have been well known for years past to every agriculturist and landowner in the East, especially in Roumania, Southern Russia, Serbia, Bulgaria, Greece, Egypt, and Turkey It is expected that a mass production programme will be in full swing by the early part of next year. Each separate factory will increase its pre-war production by at least threefold, and some factories by as much as thirty-fold. All the factories will be controlled from Aldwych House when finished. The chairman of the board will be Mr. A. W. Maconochie, and the general manager Lieut.-Colonel C. Hitchins, D.S.O. The immense benefit which this combine and organisation will bring to the British export engineering trade is obvious. Apart from the facilities for prompt execution and quick delivery of orders, it will be a great boon to the foreign buyer to come to London and find in this colossal building the makers of the particular machines he wants, and to get promptly all the particulars he requires, without running from town to town, accompanied by interpreters or friends to help him in negotiations, etc., which means considerable expense and delay. The knowledge of this combination and its scope should be made known now to the Eastern buyers who are about to give their orders for next year's delivery.

Tube Railway in Calcutta.

The description of a scheme for building a net of tube railways in Calcutta, which appeared quite recently in the Indian newspapers, has created considerable interest in engineering circles here, while according to reports the scheme is being closely studied in America. The Chairman of the Calcutta Corporation, in outlining the scheme to the Communications Committee, wrote that there should be no serious obstacle to the construction of a tube under the Hoogly, and in this way the suburb of Howrah could be linked up with Calcutta. The poorer classes were being crowded out of Calcutta by the increase of rents and land values, and would readily migrate to the suburbs if cheap and rapid transit were available. An estimate of the cost given was £650,000 per mile. While the scheme is not yet formally adopted, the committee approved the views expressed in the chairman's letter.

Messrs. Bradbury, Wilkinson, and Co., Ltd., have procured the contract for a new issue of Turkish stamps.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 10 amounted to £7,836.

The ordinary general meeting of the Ionian Bank, Limited, will be held at Basildon House, Moorgate Street, E.C., on May 11, at eleven. Transfer books will be closed until May 12.

The traffic receipts of the Egyptian Delta Light Railways for the ten days ended March 31 amounted to £E12,883, making the total for the year £E396,374.

The receipts of the Egyptian Markets, Ltd., for the week ended April 14 were:—Cattle markets, £869; general markets, £573; total, £1,442. Total for year, £31,061. There were no receipts for the corresponding week of 1919 owing to local disturbances.

NEAR EAST MARKETS.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London office of the Imperial Ottoman Bank from its correspondents in the Near East:—

STAMBOUL, April 3.

Manufactures.

There is no improvement to report in the market for manufactured goods. Demand is lacking, and business with Anatolia remains completely paralysed. The question of the exchange is still far from easy; merchants experience great difficulty in procuring necessary funds and in keeping arrivals of goods at the high prices of the London exchange.

It is reported that deliveries of goods manufactured in Italy in execution of back orders by merchants of this neighbourhood have been diverted to England with a view to realisation on more favourable terms.

Produce.

Sugar.—The sudden rise in the exchange has thrown the market into confusion, and, in spite of demands for export, business has been insignificant. In consequence of this rise, importers have applied to Trieste and to Holland in the hope of doing business under more favourable conditions. Current prices are:—£109-£110 per ton for American; £112-£113 per ton for Java; £T60 per 100 kilos for sugar in Customs. Stocks in hand are greatly reduced.

Coffee.—In spite of good offers from Brazil, merchants dare not do business owing to the fluctuations in the rate of exchange, the settlement of the week's arrivals having caused the price to fall to £T5.80 the cask of two cans, —*i.e.*, 65 to 70 piastres the oke for transit, 61 to 85 piastres the oke for coffee in Customs.

Rice.—Consignments from Batoum arrive regularly, and the demand for local consumption and equally for the ports of the Archipelago is always active. The price varies between 29 and 30 piastres the oke.

Petrol.—Large arrivals during the last few days have caused the price to fall to £T5.80 the cask of two cans, and to 14 piastres the oke for petrol in barrels. This decrease would have been still greater if transport from the centres of Pasha-Bagtché had been easier, but there is a dearth in transport facilities, the Government permitting the transport of petrol only in iron vessels constructed for the purpose.

Exports.

The rising of the English rate of exchange has had a hardening effect upon articles of export, but stocks are still reduced.

Opium.—Thirty casks have been sold at the same price as that of the previous week—namely, £T9.50 the oke for druggist, and £T11 for fine quality. The recent restrictions imposed in the United States upon the traffic in opium have checked the demand for this article.

Mohairs.—Prices have been maintained at 130 to 140 piastres for extras, 110 to 120 piastres for firsts, and 100 piastres for seconds. The demand is chiefly for mohair of good quality, of which the present stock is practically nil. Seconds are in less demand. Sales of the week amount to three hundred bales.

Silks.—Prices are weak. Four to five bales of Brussels silk have been sold this week at between £T27 and £T28 the kilo.

Cereals.—The stocks of corn have completely disappeared. There are several lots of barley, which have risen 12 to 13 piastres the oke. There are no fresh arrivals to report. Maximum prices previously fixed for flour have been increased by £T1 the sack, and now are: £T14.75 the sack for extra indigenous, £T12.75 the sack for secondaries, £T15 for American flour.

Stocks of flour are decreasing sensibly, but arrivals are expected at an early date.

LONDON PRODUCE REPORT.

Currants.—A brisker tone has characterised the market, and the indications are that the stagnation which has obtained for some considerable period is now passing. Retailers are disposing of their stocks with facility, owing to the development of consumption.

Figs.—This commodity is in strong demand, but supplies are not available in adequate quantities. Smyrna Naturals were sold during the week at from 38s. to 45s., according to quality.

Sultanas.—Rather more transactions have taken place, but business is, of course, restricted by insufficient stocks.

Sugar.—The new schedule of official prices has been automatically followed by an increase in the price of free sugar. Prices in American continue to move upward, and it cannot be said that the outlook is such as to inspire any confidence in the prospect of lower prices for some months to come.

Coffee.—The demand for home consumption has been rather brisker, and its development will unquestionably have a marked effect on prices in view of the general position with regard to this commodity. At present, however, prices are a shade easier. The futures market has been quiet, quotations being: May, 110s.; July, 108s. 6d.; September, 106s.; December, 104s.; and March, 103s. 6d.

Messrs. Reynolds and Gibson state in their weekly report:—"New York has given us better markets on the whole during the past week, and the net balance in the interval is an advance of 15 to 37 points. Interest has been centred in the May position, and continued absorption of contracts by leading importing firms has been a feature. Coffee that can be advantageously delivered is in moderate compass, and if the longs decide to take delivery, prices for May might conceivably advance. At the same time, a good deal of transferring to the later months of the crop year has been taking place, and the rapid narrowing of the discount these had been standing at compared to May, until in cases these have been reversed into premiums, shows possibly the trend of operators' inclinations. The previous trouble with the railway strikers in America is happily in course of settlement, and this, no doubt, has been a cause of the better tendency on the New York Exchange. Congestion of traffic is unfortunately one of those evils easily contracted, where a few days' mischief means weeks of weary worry to smooth out again. It represents a serious problem with the vast distribution over her great continent that takes place in coffee from New York and adjacent ports. Importing houses and traders have been the main supporters of the market during the week, which apparently brings the position down to one of actual supply and demand. On this basis the situation warrants higher prices. We have not heard of any further sales to Italy direct from Brazil. A shipment to France is notified in March clearances from Brazil, no doubt under an old contract. Given some improvement in Continental exchanges, trade in coffee should actively expand, and as production of the raw article has not reached pre-war standards, prices would quickly respond in face of an improved demand to satisfy current requirements and efforts to build up depleted stocks in consuming countries. We still favour the 'Bull' side of coffee for the long view."

Oilcakes, etc.—The market has in general been in favour of buyers. Linseed cake has been done at 480s., rapeseed cake at from 310s. to 360s., soya bean cake at 480s., and decorticated cottonseed cake at 420s. Oils have been featureless. Linseed oil has come to business at 105s. spot, 102s. 6d. April, and 92s. 6d. May-August. Rape oil has been easy with refined at 115s. Turpentine has been a shade easier at 210s. spot, 200s. May-June, and 171s. 6d. May-August.

Oilseeds.—Transactions have been up to the average, but supplies are in excess of demand, and on the whole the level of prices is easier. Linseed has declined to 44s. 3d. Calcutta to London, and is quoted 43s. 5d. April-June. Bombay is 3d. cheaper, while La Plata Hull afloat has come to business at 37s. 10d. Rapeseed has been fairly steady, but inactive with Toria and Ferozepore at 41s., and Brown Cawnpore at 39s. 6d. Cottonseed is firm with Bombay at 17s. and Egyptian at 24s. 6d.

ANGLO-EGYPTIAN BANK.

It is announced that forms of assent covering the necessary percentage of shares having been received, the provisional agreement entered into between Barclays Bank, Ltd., and the Anglo-Egyptian Bank, Ltd., has become definitive. It will be remembered that in terms of the above agreement Barclays Bank offered to acquire at least 50 per cent. of the shares of the Anglo-Egyptian Bank, giving nine fully-paid "B" shares of £1 each in exchange for each £15 share (£5 paid) in the Anglo-Egyptian Bank, Ltd.

TRADE OPPORTUNITIES.

BRITISH and Foreign Manufacturers, Importers, and Exporters should consult the Commercial and Intelligence Department of the Anglo-Latin-American Press Co., Ltd., 4/5, Copthall Court, London, E.C.2, if they desire to develop their business in foreign countries. Full particulars will be given free of charge.

CLEMENT D. SETI, 5, Rue Serafieh, P.O. Box 1099 Cairo, desires to represent Manufacturers or Exporters of Tinplate, Blue for washing, Soap, Textiles, Oils, Paper, Silk, Drapery, etc. Accepts all propositions "delcredere"; advances on consignment goods; accepts all usual commercial arrangements; good references.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Johnston Line s.s. Pensacola, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila, will close for cargo at Liverpool on April 30.

The Prince Line s.s. Scottish Prince, for Tunis, Malta, Alexandria, Syrian Coast Ports, and Cyprus, will close for cargo at Manchester on May 4.

The Ellerman Line s.s. City of Oxford, for Malta and Alexandria, will close for cargo at Liverpool on May 8.

The Moss Line s.s. Limoges, for Morocco ports and Gibraltar, will close for cargo at Liverpool on May 10.

The Papayanni Line s.s. Trentino, for Algiers, Smyrna, and Constantinople, will close for cargo at Liverpool on May 1.

The Bibby Line s.s. Derbyshire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on May 5.

The Henderson Line s.s. Sittang, for Port Said and Rangoon, will close for cargo at Glasgow on May 3, and at Birkenhead on May 12.

The Harrison Line s.s. Gladiator, for Calcutta, will close for cargo at Liverpool on May 4.

The R.M.S.P. Co.'s Treneglos, for Gibraltar and Morocco, will close for cargo in London on May 4

Notes.

The new steamer Garbeta, built by Messrs. William Gray and Co. (1918), Ltd., at their Weir Shipyard, Sunderland, for the British India Steam Navigation Co., Ltd., left the builder's yard on April 13. The main dimensions of the vessel are: length, 400 ft.; breadth, 52 ft 3 in.; depth moulded, 31 ft., with a deadweight carrying capacity of 8,200 tons. The propelling machinery, built at the Central Marine Engine Works of the builders, consists of triple expansion engines with cylinders 27 in. 44 in., 73 in. diameter by 48 in. stroke; and three boilers 15 ft. 6 in. diameter by 11 ft. 6 in. long, adapted for a working pressure of 180 lb. per square inch, and fitted with Howden's system of forced draught.

Messrs. Harland and Wolff, Ltd., launched at Belfast, on April 22, the large twin-screw motor ship Dorsetshire, built to the order of the Bibby Line, of Liverpool. The new vessel is 450 ft. long by 57 ft. beam, and 7,500 tons gross tonnage. She has a straight stem, cruiser stern, and will have two steel masts. The Dorsetshire is the first motor vessel built for Messrs. Bibby Bros. and Co. She will be propelled by two sets of Diesel engines of the four-stroke cycle type, each set having six cylinders. The vessel has seven watertight bulkheads extending to the upper deck, and the upper and middle decks are continuous fore and aft, the lower deck being forward and abaft the motor room. The Dorsetshire will be equipped with powerful windlass and winches, patent steering gear, etc., all electrically operated.

Dock Congestion at Constantinople.

The Department of Overseas Trade is informed that to relieve the congestion which exists at the port of Constantinople a compulsory sale will take place very shortly of all goods which have been lying in the Custom House for more than one year and one day. A list of such goods has been prepared, and it is stated that the British Chamber of Commerce of Turkey and the Balkan States (Inc.) 34/35, Buyuk Tunnel, Han, Galata, Constantinople, is in possession of full information. United Kingdom firms who are interested in this matter are advised to communicate with that body without delay.

LANCASHIRE COTTON.

Business Still Restricted.

(From Our Own Correspondent.)

Manchester, Monday.

The market during the past week has been overshadowed by the crisis on the wages question, and this matter has been very thoroughly discussed. The deadlock in the negotiations between the employers and the trade union officials has been relieved by the intervention of the Ministry of Labour, and at the time of writing discussions are taking place in London. It is hoped a way out of the difficulty will be found, but it must be remembered that the employers and the operatives are far apart in their ideas as to what the settlement shall be, and, failing arbitration, it will not be easy to bridge the differences which exist. Trade cannot move freely until this menace to the industry is removed. Sentiment in raw cotton circles has been rather bearish, and the downward movement in American qualities has had some effect upon Egyptian cotton prices. No news of any importance has come through relating to the Egyptian crop Yarns made from Egyptian cotton have not attracted much attention. Some spinners are not in so strong a position as a few weeks ago, and order lists are running down rather rapidly. Price concessions have been possible in numbers about 60's. In cloth for the Near East there has only been a dragging demand. The currency question has caused a little uneasiness. All kinds of fabrics have been slow of sale for Egypt and the Levant. Leading shippers to India have looked on. Comparatively few wires have been received from the other side, and Manchester merchants are in no mood to anticipate future wants. Only odd lots have been sold for China. No activity worth mentioning has occurred for South America. Although manufacturers are not so deeply sold as a couple of months ago sellers have held firmly to quotations. Prices in American yarns have favoured buyers, and the offtake has been very poor. Comparatively little has been done in shipping bundles.

NICKEL COINAGE IN INDIA.

In the House of Commons on April 21, Sir J. D. Rees asked the Secretary of State for India whether he could give the House any information regarding the issue of nickel coinage; and whether the issue of such coins of values higher than eight annas was contemplated.

Mr. Montagu: In September, 1919, legislation was passed in India authorising the issue, in addition to the existing two-anna and one-anna nickel coins, of eight-anna and four-anna nickel pieces. These coins are legal tender for payments up to one rupee. The object of the measure was to conserve the available supplies of silver for the coinage of rupees, and consequently to reduce the demands of the Government of India on the silver market. Up to the end of February the absorption of nickel coins exceeded in value five crores of rupees. The coins, with the exception of the eight-anna piece, the mintage of which has been temporarily discontinued were well received by the Indian public. The recent Indian Currency Committee pronounced against the issue of a nickel rupee, and I am not at present contemplating the coinage of nickel pieces of any new denomination

The British Armenian Chamber of Commerce held its inaugural meeting at Grocers' Hall on April 27.

The latest Indian trade returns show a large increase in imports from America and a decline in imports from Japan.

BULGARIAN CREDIT REGULATIONS.

The Commercial Commissioner to H.M. Legation at Sofia reports that a protocol dealing with commercial credits was published in the *State Gazette* of March 17. According to this, the following decision has been made:—(1) It is generally permitted, without need to mention cases separately, by the Centrale des Devises to contract obligations in foreign moneys against credit abroad. The credit thus obtained can be disposed of without hindrance by the holders, that is, they may sell the change on the open market at the market rate of exchange and cover their obligations abroad, etc., by bank transactions. For each operation of opening foreign credit the acquirers must notify at once, at the time of opening such credit only, the Bulgarian National Bank, the Centrale des Devises, for information only, of the sources of their credit, the quantity and nature of same. The holders of credit in foreign exchange abroad and means of payment in foreign moneys in the country, which, according to Article 5 of the Law for the Centrale des Devises, has not been declared before the same, and who have not been obliged to declare such credit, may freely dispose of it, by selling on the open market at the current rate of exchange, again notifying the Centrale des Devises, for information only, of each operation. Deposits abroad against withdrawals abroad, against Bulgaria in foreign exchange, will be ceded in full to the Centrale des Devises at the rate of exchange on the day of sale or purchase in the Centrale des Devises. (2) The accumulated sums, the value of imported goods at the Bulgarian National Bank and private banks, may be freed before the term fixed expires, if the importer of the goods arranges, through other permissible means, to withdraw the sums accredited to him, by having it paid to him at the free rate of exchange or to have sent to him a permit for the export of foreign exchange and other means.

MACEDONIAN OPIUM.

Greek Macedonia yielded, in 1919, approximately 4,500 lb. of opium, whereas the previous year's crop amounted to 5,600 lb., according to figures compiled from reports made by the larger opium dealers of Salonika, says an American consular report.

Available stocks in Greek Macedonia do not exceed 2,840 lb. grown within its limits. However, there are approximately 42,000 lb. stored in Salonika remaining from the Serbian crops of 1917-18 and 1918-19. According to conservative estimates, the available stocks on hand at the end of January, 1920, amount to 2,150 cases (320,500 lb.), as follows: In Salonika, 300 cases or 45,000 lb.; in Serbia, 1,400 cases or 210,000 lb.; in Bulgaria, 450 cases or 67,500 lb.

Precise information regarding the stock of opium in Bulgaria is not available here, but it is understood that there existed in that country at the time of the armistice 112,000 lb. It is reported that the Bulgarian Government has sent a large part of this stock to the United States. Opium dealers here estimate the present stock in Turkey at approximately 8,000 cases, or 1,200,000 lb.

Prices prevailing in the Anatolian, Smyrna, and Constantinople opium markets have an important influence on the opium market in Salonika. The existence at Constantinople, Smyrna, and in Anatolia of considerable quantities which were held up during the war greatly influenced the Salonika market at the time of the armistice, causing a considerable drop in prices.

Barring adverse weather conditions, prospects for a much larger acreage during the coming season are bright. Many fields devastated by the war have been cleaned and put into condition to receive the next crop. The principal exports of Greek Macedonian opium during the last year have been to America and England, opium dealers estimating that more than 75 per cent. of the total quantity exported was sent to these countries. The remainder was exported to France, Holland, Scandinavian countries, Cuba, Mexico, and Germany.

ON CHANGE.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

The market this week has been very irregular, the Budget and the San Remo negotiations being unsettling factors. Business has been on a rather restricted scale, and prices are generally lower, but there are evidences to-day of an improved feeling and of a rather free inquiry.

In Government stocks Egyptian Unifieds are 1¾ down on balance at 72¾, but the 3½ per Cent. Prefs. have improved one point to 59. Some business has been done in City of Alexandria Bonds round 66¼. Turkish Fours of 1891 are 3½ points down at 66, the 3½ per Cent. Loan of 1894 has lost 5½ points at 52½, and the 4 per Cent. Unified Loan is 2½ points down at 33.

In Bank shares Nationals have dropped to 20⅞, and Agriculturals are 3/32nds lower at 5 3 32. Anglo-Egyptian Banks are ¼ lower at 18½.

Among Railways Delta Lights have declined ¼ to 6.

In Land shares Aboukirs are 1s. 6d. lower at 39s. Béhéras are ⅜ down at 19½. Consolidated Lands, on realisation in view of the coming calls, are 3½d. down at 2s. Delta Lands have lost 1s. 3d. at 16s. 6d. Egypt and Foreign Trust are fractionally lower at 16s. 1½d. Gharbieh Lands have been a firm spot, with business doing round 3¾. New Egyptians have changed hands to a fair extent, but on balance are closing 7½d. down at 34s. 6d. Sudan Plantations are ⅛ firmer at 7 3-16, and Union Foncières have been a good and improving market, closing ¼ up at 5¾.

In Miscellaneous descriptions Abyssinian Corporations (now fully paid) are quoted at 13s. 9d. Alexandria Waters are ¼ down at 10½, round which price some business was done. Salts and Sodas have been a firm spot, and are closing 2s. 6d. higher at 57s. 6d. Khedivial Mail Prefs. are dull and ⅛ lower at 3¼, and Morums Stores are fractionally lower at 18s. 9d.

Among Greek securities the 1881 and 1884 Loans are unchanged round 54, while Rentes have improved 2 points to 42. The other loans have remained more or less the same, but there has been some large demand for the 1914 5 per Cent. Loan (French). Sellers, however, have been rather scarce.

Among Oil shares Anglo-Egyptians B have jumped about 8s. to 78s. 9d., Roumanians are 6d. down at 21s. 6d., and Traians have lost a similar fraction at 8s. 9d.

COMPANY NOTES AND REPORTS.

Doolgalla (Ceylon) Rubber.

The report of the Doolgalla (Ceylon) Rubber Estates for 1919 states that the balance at credit of profit and loss account, after writing off depreciation from machinery and buildings, and the payment of the small amount of preference dividend, is £14,208. The directors carry to reserve £2,000, and recommend a dividend of 12½ per cent., carrying forward £1,992. A resolution for revising the amount of the remuneration payable to the directors is to be submitted.

Barsi Light Railway.

The interim report of the Barsi Light Railway Co., Ltd., states that the approximate results for the year to March 31, as advised by cable, are:—Gross earnings, Rs. 13,90,000, with working expenses Rs. 6,16,000, compared with Rs. 10,10,400 and Rs. 4,87,400 respectively in the previous year. Owing to the favourable rates of exchange at which it has been possible to get the profits remitted home during the past year, it is estimated that the net revenue for the year (after providing for probable taxation thereon in India) will amount to some £87,000, as against £37,768 last year. From this has to be met the interest on the 4 per cent. debenture stock, and the interest and sinking fund instalment on the 4 per cent. "Latur Extension" debentures, totalling £11,249. The directors have now declared an interim dividend of 3 per cent., together with a bonus of 2 per cent., or 10s. per share in all (i.e., at the rate of 10 per cent. per annum), which will absorb £13,000. The past season has been a good one in the district served by the company's line, and the pilgrim fairs at Pandharpur have been well attended, but the continued restrictions on the through booking, of both pilgrims and goods, with the Great Indian Peninsula Railway *via* Kurduvadi Junction have seriously curtailed the traffic which might have been carried.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following weekly cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated April 22:—Rain nearly general in Kashmir, Assam, and Southern India. Local in North-West Frontier Province, Bengal, South Burma, Central Provinces, Malabar, and Bombay Deccan. Crop conditions generally good. Bombay cotton market steady. Fully good broach, April May, Rs.484; July-August, Rs.488. Piece-goods market steady and improving. Calcutta jute market quiet, with prices unchanged, but nominal. Hessians fairly steady, with prices tending upwards. Heavy goods very quiet. No change in bank rates.

NOTES OF THE WEEK.

The Turkish peace delegates left Constantinople on Saturday, and by the time these notes appear they will have arrived in Paris. Before their departure they were received in audience by the Sultan. Turkey has doubtless a very good idea of the terms to be offered her, and the Allies are probably almost as well informed regarding the attitude likely to be assumed by Turkey towards those terms; but until the delegation has returned to Constantinople and the Treaty has been examined by the Sultan and the Sublime Porte, it would be little more than an idle amusement to speculate on the subject. Meanwhile the Nationalists are clearly making all possible preparations for a big fight, if the Treaty should be considered (by them) unsatisfactory; and though they have met with a reverse at the hands of Government Volunteers at Kastamouni, they have elsewhere achieved several successes. At Urfa they have inflicted serious loss on the French troops, and they have cut the Baghdad railway in two or three places. No matter how the Constantinople Government may act, it seems certain that the Allies will sooner or later have to employ force to secure the practical application of the Treaty. It would be comforting to be able to believe that they were prepared for all emergencies.

The Emir Abdullah, second son of the King of the Hejaz, is now in Cairo, returning the visit which Lord Allenby lately paid to King Hussein. The visit may be regarded as another sign of the recognition by Great Britain of the increasing importance of the Arab factor in the problems that confront her to-day, especially in the Near and Middle East; and a further frank exchange of views between the Emir and Lord Allenby should lead to valuable results. It would be idle to pretend that all is well in the Arab lands just now. In Syria there is much dissatisfaction over the recent award of mandates, and if the feeling is less pronounced in Irak, where the Arabs have already had opportunities of seeing some of the advantages of Western guidance, it would be too much to hope that that somewhat fickle region will at once put aside its restlessness and forget its taste for intrigue. Moreover, the old tribal jealousies and the lack of cohesion among the Arabs of the towns and cities are again coming to the fore, and though opposition to foreign control, or anything resembling foreign control, may unite all classes and opinions for a while, the centrifugal tendency will inevitably impose a severe strain on Arab leadership—and, possibly, on Western patience—in the near future.

Fortunately the Arabs are not without leaders of their own race, who, if to some extent they lack experience of world politics, have given proof of possessing other qualities that justify our placing high hopes upon them. Among these leaders we would place the King of the Hejaz and his two brilliant sons, whilst Eastern Arabia can claim to possess in Ibn Saud a ruler of rare force of character. There are others, such as the Sheikhs of Koweit and Mohammerah, who have made their mark, and the Idrissi, who enjoys a high reputation that appears to be well deserved. If it were possible to assemble these and other leading Arabs in a Pan-Arab Conference, put before them the advantages of a closely federated Arabia, and, appealing to their racial pride, induce them to unite in working for it, the result should show whether it will ever be possible to revive the days of Arabian greatness. If France and Great Britain would make an experiment along such lines—and make it whole-heartedly—they would deserve well not only of the Arabs but of the world at large. In the House of Commons last Thursday Mr. Lloyd George showed that he was aware of the responsibilities attaching to us and our French Allies in this matter: it is to be hoped that the two Governments will see that they are not shirked.

Both politically and economically the situation in Syria is thoroughly unsatisfactory. Trade has taken alarm as much at the political outlook as by reason of the French fiscal policy. Formerly the coinage of the country was Turkish; since the Armistice Egyptian money has held the field, and now come the French authorities with an attempt, supported by the penalties of the law, to impose French paper money on the inhabitants. Little wonder that Manchester can point to orders amounting to three millions sterling cancelled at the last moment. So little do our French Allies grasp the realities of the position, that some people are being driven to adopt the despairing attitude that things cannot be better until they have become much worse. Unfortunately, Great Britain stands to suffer for France's vagaries. We have already seen the anomaly of the British Government, after having been required to withdraw its troops from Syria, being associated with the French demand to the Emir Faisal to report himself at Paris. Now that the mandate has been officially given to France, it would be well if it were made clear that, while Great Britain will gladly bear her share of responsibility in the Near and Middle East, it can only be on the understanding that the policy with which she is asked to associate herself has her complete approval. British and French co-opera-

Digitized by Google

tion might do much good in the East, if it were to conform to a definite policy that could be discussed, approved, and enforced uniformly.

Yugoslavia has been suffering for some time from strikes, the most serious being that of the railway workers, and it is reported that at Liubliana, Belgrade, and Agram there have been riots, leading to serious conflicts between the strikers and the military. In view of the very widespread unrest, it is doubtless only natural that Yugoslavia should be afflicted by the fever; but it is none the less deplorable, for the country needs above everything a period of peace in which to adjust itself to its sudden, if long-desired, expansion. Unfortunately, political circles are no more peaceful than commercial; and, failing to secure the necessary quorum, the Government has declined to take any further part in Parliamentary debates until the Opposition ceases its obstructionist tactics. The most cheerful news from Belgrade is that M. Pashitch has recovered from his illness, and has left Belgrade for Paris, to resume his leadership of the Yugoslav Peace Delegation.

The Shah of Persia left Marseilles on April 28 on his return journey to Persia, and intends to travel by way of Baghdad. Possibly his Imperial Majesty may take the opportunity of visiting the sacred shrines at Kerbellah and Nejef, and it would be strange indeed if he did not visit the neighbouring mosque of Kazimaim. Before leaving Paris he performed a graceful and statesmanlike act by calling upon the British Ambassador and informing him of his intention to adhere loyally to the Anglo-Persian Agreement. At the same time he expressed his confidence in the Vossuk-ed-Dowleh Cabinet, which, he was pleased to remark, had worked ably during the past two years for the restoration of order and the prosperity of Persia. These gracious words will be echoed by Englishmen who follow events in Persia, and the Shah's action in regard to the Agreement will be highly appreciated in this country. It should dispose finally of the rumours that the Russo-Persian understanding would prejudice the Anglo-Persian Agreement.

The bodies of the Egyptian students who lost their lives in the accident to the Trieste-Vienna express a month ago were landed in Egypt on April 27, and were accorded a public funeral, which was made the occasion of a remarkable demonstration. The Sultan was represented, as was Lord Allenby—who had interested himself personally in the arrangements and had previously sent a letter of sympathy to the committee which organised the funeral—and the procession included Princes of the Sultania family and delegates from most of the schools in Egypt. Thanks to the excellent handling of the situation by the authorities, everything passed off satisfactorily, though some anxiety had been felt lest the Extremists might succeed in stirring up trouble. As a matter of fact, a few days earlier one fanatical sheikh in Alexandria had declared, in the course of a speech delivered in the Abu Abbas Mosque, that the British had caused the accident to the express in order to prevent the students going to Germany; and had recommended that at the funeral there should be a great demonstration by armed men, who should "attack anyone who opposed them." This was presuming rather too far on the authorities' patience and the sheikh's arrest was ordered; but on the day of the funeral there appears to have been no serious attempt to create disturbance.

Such comments as we have seen on the suspension of the informal conversations between India and Afghanistan suggest more than anything else the incompatibility of modern methods of publicity with the traditions of Asiatic diplomacy, which is one of the oldest institutions in the world. In Asia, treaties have commonly been the work of years, and more or less desultory fighting has gone on all the time. We need not, therefore, share our contemporaries' surprise at the fact that while Afghan representatives were enjoying our hospitality at Mussoorie, parties of Afghan troops were stirring up trouble at various points on the frontier; and if the representatives profess entire ignorance of such affairs it is only in accordance with the recognised rules of the game. Similarly, if the Afghans are arguing, as they are said to have argued, that they have the Bolshevists at their back, they are only playing a card which fortune has placed in their hands; the statement is, at any rate, geographically true, and that cannot be said of every diplomatic contention. It is really useless for the public to attempt to follow step by step the production of a work of art, such as the Treaty—when it comes—is bound to be; they must wait till it is finished, and then judge it as a whole.

It was inevitable that the wild Khalifate agitators should pretend to exploit the Afghan representatives in their own interests, and we have no doubt that this also is part of the game which is being played. At the same time there is something to be said for the idea now being put forward, apparently as a threat, that those Indian Moslems who feel very strongly on the subject of the Khalifate should migrate to some other region of the world. There are plenty of precedents for such action, which indeed follows logically from the resolutions which have been passed, and the public declarations which have been made. No doubt Mr. Shaukat Ali and his associates feel that India would suffer a terrible blow by their departure: India as a whole probably thinks otherwise, but despite this conflict of opinion we imagine that it would conduce to the happiness of both parties if the agitators carried out their threat.

Quite another aspect of the many-sided question of Indian emigration is given prominence in Mr. T. J. Bennett's recent letter to *The Times* regarding the attitude of certain colonies and protectorates to the Indians living in their midst. The gist of the letter is that the Imperial ideal of equality, which has long been adopted by the Government of India, should now be frankly incorporated in the accepted principles of the Colonial Office, and that Whitehall and Downing Street should be co-ordinated effectively to secure this object. We certainly think that co-ordination is desirable. To put the matter on no higher ground, it is bad administration that the Colonial Office should sanction a particular measure, and then have to alter it in deference to objections raised by the Secretary of State for India. Things would go much more smoothly, and opportunities for inflammatory agitation would be much rarer, if the two Departments were to put their heads together in the first instance; but Downing Street has the reputation of being the most self-contained unit in the administrative machine, and possibly it may not be prepared even now to admit the advantages of systematic consultation with its neighbours.

Among the real or fancied grievances of Indians against other portions of the Empire has been the refusal of facilities to students, and from time to time we have heard bitter complaints of the exclusiveness of universities and technical schools even in the United Kingdom, while the fashion has grown up of urging young Indians to turn rather to such free countries as Japan and the United States. A fair test of the value of this advice is furnished by a pamphlet drawn up by Mr. R. K. Sorabji, which has been sent to us by the Indian Bureau of Education; the writer sets out without bias or attempt at controversy the facilities for Indian students in the countries we have named, and the result of his work is to show that the facilities are really very small. Speaking broadly, over-crowded institutions in England do their best to favour Indians by accepting their educational qualifications and in other ways, while in foreign institutions Indian students have to fight for their own hands, and, in the case of Japan, to master the language before they can begin their studies. We do not believe in making things too easy for young men of any nation, but the inference to be drawn from this pamphlet is that England is still the best place for Indians who wish to study abroad.

Digitized by Google

Unfortunately the fact of overcrowding remains, and it is very much in evidence at the present time: the great English institutions are not in theory Imperial, and there are obvious limits to their capacity to provide for an indefinite number of students from other countries. The true lesson to be drawn from the present inconvenience is that India must increase the provision for her own students; the rank and file should be able to pursue their studies at home, and the limited facilities available in this country should gradually be reserved for young men of outstanding abilities, in order that they may fit themselves to take the lead. It is satisfactory to be able to record that the "pious founder" is giving more and more attention to educational institutions, but the need for money is practically unlimited, if adequate provision for the rank and file is to be made, and there is an opportunity in India just now for millionaires to do real good such as has rarely been offered by any country in the world.

THE WEEK AT HOME.

After San Remo.

Mr. Lloyd George has returned from San Remo, and he found no serious difficulty in defending his European policy in Parliament, largely because his opponents omitted to criticise the sudden despatch of those rather sharp notes to France a month ago which caused a serious feeling of disquiet in this country as well as on the other side of the Channel. All's well that ends well, and the lover's quarrel has now been smoothed over, but the Government will be wise to recollect that even lovers should not quarrel too often, particularly by letter. France is naturally more concerned than we are over the full performance of the Versailles Treaty, and a great deal of the language used by Mr. Asquith and his followers in favour of the revision of the details caused a feeling of nervousness in Paris, mainly perhaps because the Prime Minister has not always dissociated himself from such loose talk quite so emphatically as was desirable.

Recent debates in foreign policy have left a general feeling that the House of Commons could easily be strengthened in its discussions of these matters. Apart from official Government apologists, little of any importance is said. Mr. Asquith contents himself with vague generalities and vaguer doubts, Sir Donald Maclean gives one the impression of performing a painful duty when he speaks on foreign affairs, and Lord Robert Cecil, despite his fervent advocacy of the League of Nations, does not seem to carry the weight he should. The young Tories have some able men in their ranks, and foreign affairs are, or used to be, a favourite study of theirs, but they have contributed little of importance during the past year. The Labour Party has been absolutely ineffective in this matter, either enunciating mere aspirations after a better world without showing how it is to be attained, or sitting "silent upon a peak in Westminster." It would be a good idea, both from the standpoint of the party and of the country at large, if the Labour Party could depute one of their members to make a special study of foreign affairs, so that the Opposition should not lack an authoritative voice in the counsels of Europe.

Mr. Chamberlain Stands Firm.

The threatened revolt of business interests against the excess profits duty in the Budget collapsed after a couple of hours' discussion in the Commons. One rather expected it; these advertised rebellions usually fail. "Big business," like Labour, is still new to politics, and both teams are under the impression that numbers count for everything and argument for nothing. Numbers, of course, do count for a good deal, but when the units of the army are only paraded to show how formidable they would be if they fought, and the Government has a shrewd impression that they do not mean to fight in the end, then numbers count for nothing at all. One man who will really die in the last ditch is more formidable than a whole regiment which lays down its arms after a formal demonstration.

At a matter of fact, the business interests are faced with a dilemna. They do not like the excess profits duty, and consequently they do not like the Government which imposes it; but they cannot turn the Government out, and if they could, the alternative of a Labour Government, which is committed to nationalisation, and is an avowed enemy of trusts, combinations, and capital generally, would be still more unwelcome. But the remedy obviously is for business men in politics to show the Government a better way of raising the money, and this they seem unable to do. A little constructive thinking would be worth reams of negative criticism.

Home Rule.

The real battle over the Home Rule Bill begins on Thursday, which is the first of the twenty-one days allotted to the Committee stage of the measure. As it contains sixty clauses, three sections a day will see the thing through. But the discussion will differ from all previous Irish discussions, since there will be practically no Irish members present, Independent Liberals are sullenly opposed but not quite sure of their ground, and Unionists are rather dubiously in favour—and also a little uncertain where they stand. But the Bill will probably be discussed more adequately than its predecessor in 1912-14, which was forced through the House by the "guillotine," and that obedient mechanical majority, which did so much to discredit the Asquith Government.

Coalition and Independent.

The Independent Liberals are continuing their efforts to thrust the Coalition Liberals out of their ranks, and at a party congress in Scotland this week the official Liberals of the North, who heard the Coalition apologists impatiently, showed a large majority against participation in the Government, and the mention of Mr. Lloyd George's name was greeted with cries of "Tory." It is always difficult to decide how far these party congresses count for public opinion. Liberalism in Scotland is now officially pledged to oppose the Coalition on every possible occasion, but it has shown itself unable to win seats even in Edinburgh, which rather discounts its valour.

Meanwhile, Lord Haldane, who has been indulging in a desperate flirtation with Labour, while assuring Liberalism that his heart is still true to his old love, and that he is not going to set up house in the rival establishment, seems to be urging a rival coalition of Liberalism and Labour. But those who protest against the immorality of coalitions holding office can hardly form another coalition for the avowed purpose of obtaining office, and in any event Labour, like the unspoiled debutante at a ball, is ready to accept all the compliments showered upon her by elderly admirers like Lord Haldane, but purposes to reserve her dance programme exclusively for partners of her own age. She takes the worship as her rightful due, but is fully determined not

to allow an ardent courtship to develop into matrimony. After all, Labour remembers that she was formally betrothed to Liberalism in the 1906-14 Parliaments, and treated rather like a girl just out of the schoolroom; now she has broken off the engagement and come into her own money with the prospect of more, she is more circumspect.

Labour Day.

May Day has long been the festival of organised Labour on the Continent, and this year was no exception to the rule. It has generally been more or less ignored in England, where ardent politicians prefer meetings to demonstrations through the streets; the average Englishman dislikes public ceremonies, and cannot get over the idea that he looks rather a fool walking in a public procession and carrying a banner. However, this year something more ambitious was attempted, and great marches through London and platform speeches by Labour leaders were arranged. The speeches were mostly of the frothy type, and a good deal of wild language was indulged in, which nobody took very seriously, least of all the audience; the recognised leaders of Labour in Parliament left the work to their lieutenants, apparently without much regret. The crowds were good-humoured, and although thousands of men took a day's holiday, the enjoyment of a "day off" does not necessarily mean very much.

To judge from the banners exhibited, everything was to be "nationalised," but now that Mr. Lansbury after his recent visit to Soviet Russia has explained that nationalisation means strict discipline for the working-man and apparently the conscription of Labour, the enthusiasm for nationalisation may subside a little. The working-man has at least as good an idea of the liberty of the subject as his teachers, and although he may not mind conscripting capital, he has not the least intention of conscripting himself.

A Policy that Failed.

An attempt to adopt the "stay-in" strike on the railways, in order to extort the additional pound a week that is demanded, seems definitely to have failed. The "stay-in" strike implies that the men remain at work, but that they adhere with meticulous accuracy to every rule and regulation of the companies, many of which are disregarded as superfluous in ordinary working. A strike of this character some years ago brought the old Austrian Government to its knees, and another seriously embarrassed the Italian State Railways. If carried out thoroughly it delays traffic so hopelessly that it causes absolute disorganisation and chaos.

In the present instance in England it was discountenanced by the railway leaders, who knew that any form of strike was premature, and who have always held that this particular form is ridiculous and rather childish. A few men may have attempted to carry it out, but the great mass refused, and trains ran punctually as usual.

One or two advances of wages have been registered in other trades during the week, and at Bristol there have been riots against the continued employment of women by the tramways when demobilised soldiers are unemployed. The men have gained their point after emphasising the fact that every woman who was dismissed could at once get employment in domestic service at good wages. But in spite of wholesale dismissals of this character, the domestic servant, rare before the war, now appears to be almost extinct. To judge from the advertisement columns of the papers and the frantic appeals and complaints of housewives, one would think that the only people who were killed in the war were female servants. Nobody knows what has become of them.

Chilly Cricket.

The cricket season opened on Saturday with the Cambridge Freshmen's match and Surrey v. Northants at Kennington Oval. The first matches in May are usually rather heroic affairs, and these were no exception, for the day was distinctly chilly. This particular spring, with its torrid March, arctic April, and the promise of a sullen May, has once again proved that our climate, like Habakkuk, is "capable de tout," and some of our cricketers will probably admit privately that they prefer the pavilion to the field during the next fortnight or so, if these conditions continue.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

YUGOSLAVIA.

BELGRADE, April 17.

Politics.

The Government has not yet resigned, but the end is expected almost any day now that the Orthodox Easter is over, and Ministers are returning from their short rest. As the Government could not secure a quorum, it is reported to have proposed to pass a special law resolving itself into a quorum, a rather high-handed proceeding which the acting Speaker objected to. It is stated that he suggested a novel method of preventing the Government forming a quorum of one hundred members, suggesting that in that case he would convene a separate Parliament of the Opposition, who could also form a quorum, and so two Parliaments would be sitting in opposition to each other, and of equal strength. This *reductio ad absurdum* was the end of the suggestion. Besides, it is extremely unlikely that the Regent would have countenanced such a proceeding.

The negotiations for a Coalition Cabinet conducted so patiently by Dr. Smodlaka have failed; but there must soon be an end of some kind to the present intolerable situation. In Radical circles it is rumoured that M. Stoyan Protitch, who is a strong man and the backbone of the Radical Party, will shortly retire from politics. The veteran statesman quite recently lost his wife, and probably has little taste nowadays for public life. The other veteran Radical leader, M. Pashitch, recently took a severe chill while inspecting some property of his in the country, and so is prevented from attending the conference at San Remo; and it is believed that he will not return to the Delegation, but will also retire into private life. In the absence of these two experienced politicians, the Radicals will probably be unable to maintain their present position, and probably either a coalition or a neutral Cabinet will be formed to carry out the general elections and summon the Constituent Assembly which the country is crying for. The late Democratic Prime Minister, Dr. Davidovitch, it is stated, will take no further part in politics, so the leadership of the Democrats falls upon M. Milorad Drashkovitch, who won high opinions among the foreign colony in Belgrade during his recent brief tenure of the portfolio of communications.

Fiume and Skutari.

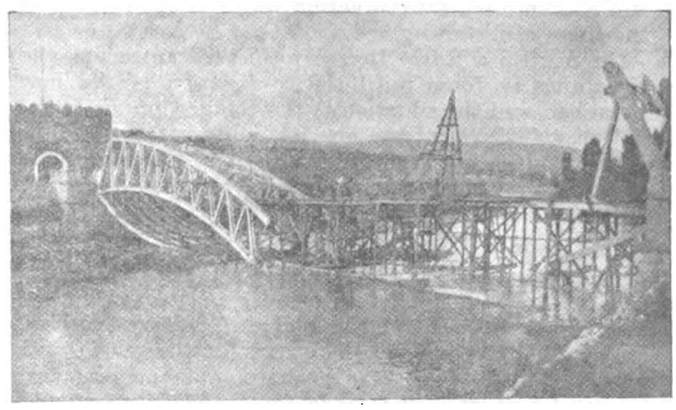
Rumour about Fiume has been busy lately. Energetic and vigorous meetings have been held all over the new provinces, especially in Croatia and Dalmatia, protesting against the throttling of Yugoslavia and the sacrifice of vital national interests at Fiume and Skadar (Skutari in Albania). The British public have overlooked the importance of the latter town in the pre-occupation about Fiume. The Serbs would not unnaturally like to have it, on the grounds that it is a former capital of the old Serbian State, that Montenegrins took it by siege, after desperate fighting on Tarabosh in 1913, but was compelled by England, to oblige Austria, to give it up to the infant State of Albania. The Serbs very naturally say that if they are not to have it themselves it should go to the Albanians, to whom it most naturally belongs, provided that Serbian interests in the navigation of the Boyana are safeguarded; for this commands the approach to and feeding of Montenegro. But the Serbs very rightly have the strongest possible objection to Italy's holding it, and on this point they vigorously support the claims of the Albanians themselves. Italy cannot justify any claim to it.

The question of Skadar is a vital one to Serbia, as vital as Fiume, and if ignorance or interest on the part of the Powers overrides the national claims of the Yugoslavs the seeds of much future trouble will be sown, and the ground prepared for another war. At the present moment, Yugoslav feelings have been irritated to the extreme; an imposing public meeting was recently held at Zagreb, where twenty-five thousand people paraded the streets, and passionate speeches were made outside the Army H.Q. and the Ban's Palace. Similar, smaller but equally sincere, meetings are reported from Dubrovnik, Serajevo, and other towns. A monster meeting has been convened for Belgrade on the 18th, which has been organised by the combined associations, bodies, and institutions in Yugoslavia. Meanwhile, the attitude of the Government has been, as always, extremely correct, but it may not be strong enough to restrain a wave of public indignation.

A Rumour and a Story.

A sensational rumour is repeated from Budapest to the effect that the Magyars propose to offer the Crown of St. Stephen to the Crown Prince Regent of the Serbs, Croats and Slovenes.

An interesting story is told of the late M. Stoyan Novakovitch, who, as one of the Serbian delegates at the Conference of London to arrange the Balkan



Bridge at Nish, over River Morava, blown up during the war, under repair.

settlement after the war of 1912, had occasion to speak to the Russian Ambassador in London, the late Count Benckendorf. M. Novakovitch opened the conversation in Russian, but the Ambassador replied in German, and as M. Novakovitch knew no English he was obliged, to his great disgust, to continue the conversation with the great protector of the Slavs in the language of their hated enemy.

Russian Refugees.

Not only Belgrade, but the provincial towns are beginning to be largely Russianised; refugees from Denikin's army are especially numerous at Panchevo, but are to be met with almost anywhere. A Russian engineer has obtained the post of Municipal Engineer in Belgrade. Apart from officers, some of high rank, many interesting representatives of the Russian *intelligenzia*, are here. M. Suvorin, of the *Novoe Vremya;* Chaliapin, the singer; Pomerantseff, of the Moscow Opera; and several other well-known musicians are either here or expected shortly.

A new bronze medal is to be struck to commemorate the appalling retreat through Albania in 1915. It will be given to all soldiers and to all members of foreign missions who went through that terrible experience. On one side will be the two-headed white eagle of the Nyemanitch dynasty, with laurel wreath; the inscription on one side will be "To his war comrades—Alexander," and on the other "For devotion to the Fatherland, 1915."

The Railway Strikes.

The late Minister of Communications, M. Drashkovitch, made an arrangement with the railway employees by which they received extra pay on account of the increased cost of living. A loaf of bread has risen since last summer from one to three dinars. Now the new Minister, M. Koroshets, has cancelled this arrangement. Consequently there is a strike of all railways

Digitized by Google

and river steamers on the Danube and Save. Public opinion sympathises with the strikers, who, it is generally anticipated, will get their reasonable demands in a few days.

BULGARIA.

SOFIA, April 10.

Political Situation.

As indicated in my previous letter, the Agrarian League at the elections did not secure the 120 to 140 seats that it expected, but only 110. By comparison with the previous Chamber this means a gain to them of twenty-seven seats; but since it does not give them, in a Chamber of 229 members, the majority necessary for a homogeneous Cabinet, it is most probable that there will be another Coalition Cabinet. Immediately the results were known, the three non-Agrarian Ministers—namely, the Progressist Minister of Finance, Dr. Daneff, and the Narodniaks, MM. Madjaroff (Foreign Affairs), and Athanas Buroff (Commerce and Labour), tendered their resignations to the Prime Minister. M. Stambolisky requested them to continue to carry on their duties until the opening of the Chamber, on the 15th, when he will tender the resignation of the entire Cabinet, and a new one will be formed in accordance with the public will as expressed by the nation on March 28. To this the three Ministers agreed.

On April 3 a Royal Decree was issued approving the remaining in force until the convocation of the new Chamber, and the adoption of the Budget for the financial year 1920-21, of the law for appropriating 6-12ths of the Budget for 1918 for the second half-year of the financial year 1919-20, ratified by decree of October 30, 1919.

War Prisoners from Serbia.

An agreement has been reached between M. Stambolisky, Prime Minister and Minister for War, on one hand, and the head of the Serbian Military Mission, Major Dimitrievitch, on the other, for the release and return of the Bulgarian prisoners of war and hostages. Preparations are being made for their transport and reception, and trains have been sent to Nish for their conveyance. M. Stambolisky, who will be accompanied by Major Dimitrievitch, will go to the frontier to welcome the prisoners.

A Bolshevist Leader.

The *Zemledetchesko Zname*, the organ of the Agrarian League, published lately (April 7) some interesting information on the views of Dr. Rakovsky on Bolshevism in Bulgaria. Dr. Rakovsky, who was born at Kustendje, and is a relative of the great Bulgarian patriot and revolutionary leader, Sava Rakovsky, a native of Kotel, is, with Lenin and Trotsky, one of the leaders of the Bolshevist revolution. Under the name of Christian Gregorievitch, he enjoys extraordinary authority and wide popularity in Bolshevist circles, and he is described as "the first orator of the Russian revolution and the best organiser of its political forces in Southern Russia." Speaking of Bolshevism in Bulgaria he said: "Regarding land reform in Russia, the Bolshevist revolution aimed at attaining such an organisation as Bulgaria has possessed for decades. Bulgaria in this respect stands better than Russia. Political organisation also is superior in Bulgaria. The Bulgarian State possesses a democracy trained in politics, which makes for the unfettered progress of the labouring and less wealthy classes." Questioned as to the chances of Bolshevism in Bulgaria, Dr. Rakovsky declared that the Bulgarian Communists could not blindly imitate the methods of Russian Bolshevism, which is developing amidst quite different economic, political, and social conditions. Furthermore, he declared that while Bolshevism outside Bulgaria might help the Bulgarian cause, Bolshevism inside Bulgaria might be fatal to the Bulgarian lands.

Communist Successes.

The great success of the Communists in the towns is due to the votes they got from the striking officials and teachers, who during the period of the strike were financed with funds lately brought from Russia by Zaborovsky, a Russian Jew and the emissary of Lenin and Trotsky, who is now actually in Sofia, in hiding in the houses of the Communists. The Bulgarian police authorities are actively searching for him, and hope to effect his arrest. With this object in view, during the elections, surprise searches in private houses were undertaken at night, with the result that many citizens were so alarmed and so exasperated that instead of voting for the Agrarians they voted for the Communists.

At Rustchuk, Slivno, Yamboli, Gabrova, Varna, and other provincial towns where the municipal councils are communistic, the strikers received grants of bread and coal from the municipalities. In such circumstances it is not surprising that the Communists were not only able to hold their own at the elections, but even to secure another seat. There are, however, protests in regard to some of the elections, and it is quite possible that the Communists will yet lose a few seats to the Agrarians or other *bourgeois* parties.

MALTA.

VALETTA, April 15.

Gloom.

Malta pursues its weary way, approaching its normal state, but still under abnormal conditions. There is the same old laxity in the interest of local affairs, and although the year is getting on and Self-Government is to come with the New Year, there is no sign of anything being done to adopt a policy or to find a national leader. All ends in clamour and club and coffee-house chatter. What is foremost in the public mind just now is that everyone is discussing emigration to America, and many have gone. As these represent in the majority of cases skilled artisans, and fine healthy specimens of humanity, it is thought, not unreasonably, that this exodus will in time have a great effect on the island. Yet, after all, there is little for the emigrants to regret leaving behind. Poor pay, increased taxation, and rising prices of foodstuffs are the conditions staring the island in the face. Large increases of salary have been granted to all branches of the public service, with depleted coffers to supply these increases; and what with the demobilisation of troops and the approach of summer with its empty houses and hotels, the outlook is gloomy indeed!

"Small Talk."

With the absence of news proper, we are largely driven to make our own. A few of the topics of discussion in our local Press may prove of interest to outside Malta! Are Scotchmen more alcoholic than patriotic? Why raise the price of tobacco made from leaf which has been long imported? Was St. Patrick a Scotchman? England is the cheapest country to live in. The Maltese is the only man in the world who cannot work without talking. In connection with this a wag suggests that many Maltese talk without working! The latest echo is as to where St. Patrick was *really* born.

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultán after Sultán with his Pomp
Abode his Hour or two, and went his way.

—Omar Khayyam.

A friend of mine is collecting "Agony Column" advertisements, and has asked me to keep my eye open for specimens. I have been doing so for a few weeks, and have been struck by the entire lack of shame that characterises many of the folk who make use of this medium. They cannot say "to beg I am ashamed," for they beg with a brazen effrontery that must turn the stomach of anyone with a grain of self-respect. Quite a number of young gentlemen—and a few middle-aged ones, too—appear to be under the impression that, having "done their bit" (to use an expression to which they seem to be extremely partial), they are entitled to expect that some "kind lady" or "kind friend" will "adopt" them. Others, less slack-wristed, merely desire the kind lady or friend to put down a few hundreds or thousands to enable them to make a start in business; and sometimes these weird creatures offer "references" and promise to "repay."

***

Now, I feel tolerably sure that any really "deserving case" would scorn thus to beg. Even if a man *has* fought for his country (and I, for one, wonder what percentage of these "agonising" advertisers have done *that*), I fail to see that that entitles him to expect any individual man or woman, with whom he has not the slightest acquaintance, as his advertising proves, to adopt (!) him or give him a large sum. His claim, if he has one, lies against the State, not the individual; and, by forgetting that fact and whining, he puts himself on the level of the veriest street cadger. Of course, a man who asks for work, or for other people to help him to get work if they know of any opening, is on quite another footing; and if he is "down on his luck" he has my sincerest sympathy. But the cadger—ugh!

***

Please pardon the foregoing outburst, which really is not so utterly divorced from the East as it may look at first sight. For, in looking through *The Times* advertisements a few days ago, I came across this:—

> "BORED WITH LEAVE. Funds low.—INDIAN CIVIL (ex-Army) OFFICER on long leave desires TRAVEL with some SPORTSMAN who will pay all expenses.—Box ——, *The Times*."

I do not reproduce the Box number in case the rush of replies might embarrass this very haughty Indian Civil Pooh-Bah. It would have been interesting if he had inserted in his advertisement a few particulars regarding the return he proposes making for the probably large outlay that the acceptance of his invitation (!) would involve. Is he prepared to valet the "sportsman," to toady him, or merely to give him the pleasure (or the reverse) of the company of a bored and impecunious ex-Army officer? To me, the offer does not look attractive, and I fancy that the I.C.S. will not feel very proud of this advertiser.

***

It would be interesting to know whether the Vatican and the Greek Patriarchate would unite in petitioning for the removal of the Turk from Constantinople. I observe that the Patriarchate sent to San Remo a telegraphic protest "against the Pope's action in urging the claim of Rome to the see of St. Sophia," to which, of course, it claimed that the Greek Church had the right. Again, the Vatican has announced that it considers that, while the Catholics should be left in undisturbed possession of the sanctuaries held by them in Palestine, "the question of those in possession of the Orthodox Church should be settled by Commissions." There may be something beautifully unselfish behind these claims, but to the ordinary man they will inevitably suggest that both the great Churches concerned are "out for all they can get," and indulging in the game of grab which is so fashionable in our "new" world. Such an exhibition can hardly be regarded as a good example for Moslems—or anybody else, for that matter; and it certainly looks as if the spirit prevalent in the days when the rival Christian factions had to be kept by Turkish soldiery from butchering one another in the sacred places of the Holy Land had by no means passed.

***

With all due respect to that august person, I respectfully suggest that when the Editor published the article on Port Said last week he missed an opportunity; for, I observe, an evening paper headed a paragraph on that salubrious seaside resort (see Cairo Correspondent of The Near East for testimonial to said salubrity), "The Wickedest City." Now, that is a much more "catchy" title. For do we not all love to hear, or read, of "wicked" people and places? By the way, I wonder how one estimates the iniquity of any city. By the number of "saloons"—of various kinds—that it contains in proportion to its size? The paragraph in the evening paper referred to above does not enlighten me on this point. It only tells me that a certain Wesleyan C.F., who "knows Calcutta, Bombay, and Madras," and has lived in the East for a quarter of a century, has "seen more sin and appearances of sin in one hour in Port Said" than in all the rest of his experience. Well, well! I am inclined to think that the gentleman in question must have been wearing dark glasses during his hour's walk through poor Port Said. It may be a not entirely innocent little village, but——! Personally, I should have thought Suez—Old Suez—was "wickeder" to the square inch, so to say. But I should like you, my dear readers, clearly to understand that I lay no claim to expert knowledge on such subjects, never having investigated them personally.

Corsair.

RECREATION IN ANCIENT EGYPT.

A lecture was given on behalf of the Egypt Exploration Society on Friday, April 23, in the rooms of the Royal Society at Burlington House by Professor T. E. Peet, an official of the society. The subject chosen was "Recreation in Ancient Egypt." The lecturer called attention to the singular fact that most of our knowledge of Egyptian sport and games is gathered from the painted scenes with which their tombs are adorned. The reason of this is that the Egyptians were never able completely to reject the belief that life after death bore the closest resemblance to that on earth, and therefore scenes of play and recreation were painted on the walls of their tombs in order that, through the workings of magic, they might ensure the continuance of amusements in the next world.

The outdoor sports of the Egyptians were probably mainly survivals of the day when they were a hunting people, before they settled down to a life of agriculture and pasture in the Nile Valley. Thus the wealthy or noble Egyptian loved to hunt the wild animals which abounded in the deserts which surround Egypt, accompanied by his favourite retainers and his swift greyhounds; or he would sail over the marshes and lagoons of the Delta in a frail canoe of papyrus reeds, bringing down with the boomerang the wild geese which swarmed there, or in the same canoe go spearing fish with his two-pronged harpoon.

Of indoor amusements there was no lack. The tombs contain frequent scenes of wrestling matches, in which the progress of the rounds is shown in a series of pictures which produce a kind of cinematograph effect, and enable us to follow every movement of the struggle. Dancing, too, was a favourite diversion, and often formed a part of the funerary ceremonies. A somewhat rare scene in a tomb of the Middle Kingdom at Beni Hasan seems to represent an attempt at *tableaux vivants*. In one group three figures imitate by their attitudes the bending of the reeds in a storm, and the scene is entitled "The Wind"; in a second, entitled "Beneath the Feet," a defeated enemy is seen crouching at the feet of his conqueror Games played with pieces on a board are occasionally found in good preservation in the tombs. The lecturer illustrated one of the finest of these by means of slides, and described the attempts which have been made to reconstruct the moves of the game. He also showed some examples of the game of *sent*, perhaps the prototype of our modern chess, and explained its connection with the funerary ritual, the moves of the game constituting a symbolic replica of the journey of the dead man from this world to the next, the defeat of his opponent representing his victory over the various malevolent creatures, often in the form of serpents, who, according to the Egyptian beliefs, were likely to oppose his passage to the life beyond.

Egyptian music was briefly referred to, the various types of harp, lyre, and flute being illustrated and described, and their connection with the singing discussed. The lecturer closed with a short description of the nature and procedure of an Egyptian banquet.

The *locum tenens* of the Œcumenical Patriarchate of the Greek Orthodox Church has accepted the invitation of the Archbishop of Canterbury to send representatives from the Holy Synod of the Church of Constantinople to the forthcoming Lambeth Conference.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

PRESS ON THE NEAR EAST.

The Peace.

In an article in the *English Review* (April), Mr. Austin Harrison, who terms his comments "The Africanisation of Europe," indulges in spirited and characteristic condemnation of the Peace. In discussing Europe he goes a little off the track, but what he says is quite germane to his theme. Here is an example:—

"Suffer the little children," said the Saviour; so Turkey, too, is to be evangelically carved up. Greece sails into Smyrna; we occupy Constantinople, and the Arabs, who were promised independence as their reward for military assistance, now find themselves equally duped over Syria, which is to go to France, and Mesopotamia, which is to be our portion of the "spoils," plus an absurd Jewish creation as unreal as the "Kingdom come" of Sancho Panza. To this war-created Europe we must add Egypt, who has proclaimed independence; Ireland, who has proclaimed a Republic; India, who herself is "proclaimed"; and America, who also proclaims independence by refusing to be bound by either Treaty or Covenant. There never was anything quite so "bedevilled" as the Europe of the three men who could not agree about anything except their own opinions. There never was anything to compare with the economic crisis now threatening to convulse their handiwork. Most certainly nothing in history will equal the stupendous crash of this utterly artificial structure unless very speedily a re-beginning is made on foundations of political and economic security.

What he says upon Russia will be of interest to Near Eastern readers:—

And so, just when we are preparing to pay higher rents, rates, taxes, and a shilling for the loaf, we are threatened with a war (1) against revolutionary Germany, (2) against an Arabian-Islamic-Turkish irredentism, (3) in support of Poland versus Russia and Roumania versus Russia, (4) against Hungary versus Roumania, (5) against Italy or against Jugo-Slavdom, besides the numerous other little military operations in Persia, India, Egypt, Syria, Ireland, Baku, Georgia etc., etc. If the Polish war starts, chaos will be immediate. The prospects are prodigious. Our debt is only £8,000,000,000. Why not add another £1,000,000,000 and have a 2s. loaf? Only one man can be really smiling to-day in Europe, and his name is not Lloyd George. It is Lenin. For we have re-nationalised the Russias. No Russian will ever consent to our mandate over Georgia or Baku, to Bessarabia going to Roumania, to Poland standing on Russian soil, to the excision of the Northern Provinces, thus bottling Russia up in the Baltic as our possession of Constantinople bottles her up in the south. Lenin and Denikin will "shake" on the issue of nationalist Russia. We have made of Russia a life enemy. We have capitalised Lenin for a bankrupt Poland. Small wonder if a sacred picture somewhere in France has started to "bleed."

Smyrna and Armenia.

The *Morning Post* of April 29 has a spirited leading article called "Remnants from San Remo." After paying a very full tribute to the diplomacy and success of M. Venizelos, it proceeds:—

M. Venizelos, as we should have expected, has shown his statesmanship in not pressing for the acquisition of Smyrna outright. The summary transfer of that port would have created lasting bitterness in the minds of the Turks, and there is still ample Turkish national sentiment afloat in the East to have concentrated against such a decision as a common object for revenge. The work of the Peace Conference is not to dispose of the immediate difficulties of to-day or to-morrow, but to discover settlements that are likely to hold good for the next quarter of a century. The compromise by which Turkey is apparently to retain the sovereignty of Smyrna while Greece takes over the administration, and the future destiny of the place is deferred to a plebiscite of the inhabitants, to be taken five years hence, is, of course, not free from objections. It is, in fact, obviously full of possibilities of friction. But the plan is preferable to presenting the Turkish Nationalists with a challenge and a rallying cry. Much may happen, after all, in five years; and although it cannot be said that appearances in Asia Minor wear a promising face, the situation of the insurgent National Party, now that it has been disowned by the Sultan and is cut off from Constantinople, does not look to be any too secure. The Turk at bottom is very much what his leaders make him, and if the Conference, which must eventually find some means of supplying the vacuum which will be created on the suppression of Mustapha Kemal, can manage to introduce the right guidance, the peasantry of Anatolia may be led back into the useful and tranquil existence for which Nature has intended them.

There remains, of course, the eternal difficulty of Armenia, which appears to have been offered in turn to every country that could conceivably have been imagined to have a hankering for a Protectorate, but has been declined by all. The definition of the future of Armenia rests for the time being with President Wilson, who has already expressed his opinion that "its boundaries should be drawn in such a way as to recognise the legitimate claims of the Armenians, and particularly to give them an easy and unencumbered access to the sea." The only difficulty, unfortunately, is to arrange for the execution of this desirable arrangement and to see that neighbours do not transgress the boundaries after they have been laid down. Their sanctity will not be impressed all of an instant on the surrounding populations. At the moment the remnant of the Cilician Armenians are threatened with being driven into the sea to which Mr. Wilson is so anxious that they should have access; and the prospects of the new Republic of Armenia with its capital at Erzeroum are certainly not roseate. The neighbour Republics of Georgia and Azerbaijan appear to be rapidly coming under influences which are a compound of Bolshevism and Pan-Islamism, the resultant of which comes to Cut-throatism. At the head of the movement is Enver Bey, who from his eyrie in Daghestan manages to exercise an influence over the Kurdish clans which bodes no good to Armenia. To help a country so isolated, whose people lack the capacity for standing up for themselves, and yet will not accept the alternative of effacement and subjection, is a tolerably hopeless problem, while the work implies more altruistic effort than any statesmen in the world think that they are justified in demanding of their own countries. It only remains for the League of Nations to devise a combination that will undertake the thankless work.

Constantinople.

In the April issue of the *Nineteenth Century* Canon Barry expresses the disappointment of Christendom at the decision by which the Turks are to retain power in Constantinople. He is consoled, however, by the prospect that the present settlement is but temporary. On this point he says:—

We are servants and subjects of the Divine oracles; in less antiquated speech, of truth and fact. I wish to look realities in the face. Notwithstanding the gibes of mere politicians, that vast creation of the Gospel known as Christendom is not yet an obsolete power. Again, both East and West recognised in our civilisation, which in thought is Greek, in ideals Christian, an energy of science destined to subdue the most recondite forces of Nature. And these two "mighty streams of tendency" may, so long as they will, run the same course together. On the other hand, while granting that Mohammedanism displays a remarkable power of resistance to Western ideas, I can perceive it to be slowly yielding, not only by the loss of temporal dominion, which is the genuine motive of an agitation in many respects factitious, but (what is far more grave) by the felt want of a philosophy, a scientific insight, and a political genius, which would enable it to hold its own. Men like the Syed Ameer Ali and the Aga Khan, let me say it with every consideration, scarcely realise how far they have travelled on Western paths. As for the Ottoman Turks, a totally different sort of Moslem believers, we must allow with Cardinal Newman that they are "pledged by the very principle of their existence to barbarism." None of the attempts made to bring them into our system, to assimilate them in anything except vice and frivolity with European manners, has hitherto succeeded, or is likely to succeed. Somewhere in Central Asia their home abides, on the high mountain plains, whence, to the world's misfortune, they rushed down upon the Eastern Roman Empire and made of it the desolation which all who behold it except themselves deplore. They must go. Sooner or later the classic lands of Asia Minor, claimed by history as lying within the great circle of civilisation, will be given back to it and to us. No financial jobberies, no new Disraeli, no manufactured unrest of peoples afar off, as ignorant of Turkish Caliphates as of Old English Chronicles, will in the long run hinder this consummation. It is in the oracles of Nature, science, law, of human progress and the Christian good tidings.

MOSLEM TALES FROM JERUSALEM.*

III.—THE STORY OF THE "MUGRABEH" AND THE TWO BAGS OF GOLD.

The short twilight of a winter's afternoon was deepening into night when a tall stranger entered a small Moslem village situated some two and a-half hours' distance from Jerusalem. He was a *Mugrabeh* lately come from Egypt. He did not know the place, nor was he known to any amongst the villagers, so he made his way to the khan, called for coffee, and sat down to rest for a while. Presently he began to talk to the men of the village as they drifted in for coffee and conversation after their day's work.

"To whom does yonder field belong?" presently asked the *Mugrabeh*.

"To me and to my brother, and to the eight sons of my father's brother—to ten men," answered a sturdy-looking fellah who was seated opposite him.

"Oh, favoured of Heaven," said the *Mugrabeh*, "know that I have read in my book that in your field, and in the field of no other, is buried much money. You have but to dig and be rich."

"Is that the truth?" cried several of the men at once; and they cast envious looks upon him who owned a tenth part of the golden field.

"On the word of an Englishman, it is true!" answered the *Mugrabeh*, with dignity. "Come with me, and you shall see for yourselves and be convinced."

He led them to the field, and began to dig in one corner where the stones were loose. In a very short time he came upon a bag which, when he had opened it, was found to be full of money, but only copper money of low values—*kubaks, asheras, bishliks*, and the like. The simple villagers asked for no further proof than this. Joyfully they hailed him as a great man indeed, and feasted him on the fattest sheep the owner of the field possessed. How should they know that the *Mugrabeh* himself had buried that bag secretly overnight?

When they had eaten, the *Mugrabeh* said that there was gold in the field, but it could only be found by placing in the ground a bag of gold, when the attraction of the precious metal would draw out what was hidden in the earth. In answer to the eager questioning of the villagers, he said, with obvious compassion for their poverty: "Oh, my brothers, not less than fifty napoleons will suffice, and the more is put in, so much the more by fiftyfold will be drawn forth from the earth. On my head be it."

There was not enough gold in the village, so the people borrowed from the villages around; and meanwhile the *Mugrabeh* lived like a prince in the house of the sheikh. When at last all the gold had been got together, it was put into a bag, which was tied up and sealed with the sheikh's seal in the presence of them all. The *Mugrabeh* had also provided himself with another bag, exactly like the one which he had first hidden, but holding only copper coins of no value, as before. This bag he hid carefully under his cloak.

The whole village followed him to the field; the men and women left their work, and the children their games, to come and see gold brought out of the earth. The *Mugrabeh* made a large circle and burnt spices and powders to make a thick smoke, while he recited aloud from the Koran and prayed. Then he told the men to dig a hole in the middle of the circle, and into this hole they dropped the bag of gold, which the *Mugrabeh* covered over with the cloaks of the ten men to whom the field belonged. After this, he ordered them all to separate one from the other and to keep careful watch at the four corners of the field, lest any stranger or any evil *jinnee* should draw near to destroy their hopes. He stayed a moment longer to make up the fire to a great size, and under cover of the thick smoke and the gathering darkness he drew out the bag of gold and laid the bag of coppers in its place. Then he called the sheikh and said: "I must now go to pray, but I will soon return to rejoice with you when the earth yields up its gold. Do you keep watch here just without the circle, and if it chance that my prayers delay me long, you may uncover the hole without waiting for me; but wait until the fire has quite died out."

So he went away. The people waited long and patiently for him. At first they loudly praised the piety which kept him so long at prayer, but as the cold night drew on they began to fear that he had struck them from behind. The fire had now died out.

"I will uncover the hole," said the sheikh; "at least we shall have our own gold that we saw him put in."

So they uncovered the hole, and drew out the bag of—coppers.

Apparently the *Mugrabeh* escaped with the gold to Egypt, for the poor villagers never saw either the one or the other again. It was left to them to repay the gold they had borrowed at his bidding; and they had also to pay the fees of the various zaptiehs who had kindly made inquiries for them in Jerusalem. ESTELLE BLYTH.

* This story is perfectly true. It was told to us at the time it happened which was at the end of the year 1899. A *Mugrabeh* is a native of Morocco.—E.B.

THE ROYAL ACADEMY.

To those who hoped that the Academy would incorporate some of that new spirit in art which the European War has generated or developed, this year's exhibition has come as a disappointment. There is little evidence that the attitude of Academy painters towards things in general is any different in 1920 from what it was in 1914; that is to say, the pictures this year are on the same dull, correct, and lifeless level of previous years. There are the usual landscapes, the usual (though fewer) portraits, the inevitable khaki-clad immaculates, and the (seemingly) permanent lack of imaginative works. The works that have a peculiarly Near Eastern interest are, fortunately, no worse than the remaining pictures, which have for the most part English subjects; but there is in these nothing of the highest importance

The Scriptural paintings are fairly numerous and rather above the average in both craftsmanship and insight. "The Three Wise Kings," by G. Spencer Watson, is a quite vivid piece of work; and "The Flight Into Egypt: Rest by the Way," by Ernest Board, creates a certain amount of atmosphere with its mixture of pale white and blue. "Lazarus," by Agnes C. Tatham, is an intense study of the shock of resuscitation; and there is a painting of "Jairus' Daughter," by William Strang. But the best of the pictures in this category is "Gethsemane," by R. J. Enraght Moony, in which persons and trees alike are impregnated with rich coloured gloom.

A portrait of Major-General Sir Charles Townshend, K.C.B., D.S.O., by R. Grenville Eves, should be mentioned, if only to record the fact.

There are two pictures dealing with Tangier: the first, "A Room in Sunlight, Tangier," by Sir John Lavery, in which there is a boldly effective contrast of many colours; and "August Evening, Tangier," by Edward Walker, in which the composition of a very neat and finished picture is excellent. "In a Tunisian Café," by Edgar Bundy, is not particularly distinguished; and the same remark applies to "A Reminiscence of Algiers," by Sir Ernest George. "An Egyptian Waterwheel," by G. A. Boden, is a clever effort, the roughness of the subject being presented very accurately; similarly, "A Corner in Cairo," by Ernest Longmate, a picture of quiet space, is a faithful representation. "The Burning of Salonika, 1917," by William A. Arrowsmith, is a subject full of possibilities, and the painter has done his work very effectively, contrasting the glare of the fire with the blue sky by the side of it. (The fire, incidentally, he has painted as something between a glow and a riot of uncontrolled flame.) "Turkish Sunset," by Tristram Ellis, is a harbour scene, in which the purple rays of the sun shine on the ships in the foreground. "A Street in Jerusalem," by Percy R. Craft, is a straightforward picture, full of light and with little subtlety; but "Entrance to the Old Mosque at Damascus," by M. Murray Cookesley, is a more beautiful thing, for the high grandeur and the rigid loftiness of the pillars make a most impressive picture. "Nocturne in Silver and Blue, Baghdad," by Donald Maxwell, whose work is good if never moving, completes the list of the more important pictures dealing with the Near East.

It remains but to express wonder whether the Academy will ever prefer works of imagination to those of decoration, and whether it will always place correct sight before (possibly incorrect) vision. If it adheres to its present course, there is small prospect of a renaissance of art in England. The standard of dull uniformity was inexplicable before the war; but the discovery that the war has made no difference is a matter for pained surprise.

THE PRINCE OF WALES' INDIAN TOUR.

Mr. Montagu, Secretary of State for India, in a written answer to Captain R. Terrell, who asked what Indian representatives have been appointed to the advisory committee to discuss the arrangements for the Prince of Wales's tour in India, says:—The Indian representatives are as follows:—H.H. the Maharaja of Gwalior (Hindu); H.H. the Maharaja of Bikanir (Hindu); H.H. the Maharaja of Patiala (Sikh); Mr. Banerji (Brahman); Sir Umar Hyat (Moslem); Sir Dinsha Wacha (Parsee).

The S.P.G. hear from India that their work is being carried on under great difficulty there. The race spirit is opposed to Christianity, which some of the people identify with what is English and anti-Indian.

CORRESPONDENCE.

THE NILE CONTROL WORKS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Your issue of April 1, 1920, "Nile Control Works, 3."

I have just received my copy of your esteemed weekly of the above-mentioned date, and have read with blank astonishment the very misleading statements made therein.

The future of the Sudan is so greatly a matter of "Imperial" interests that I would beg you to publish the following comment on your Cairo Correspondent's article.

As a first principle, it is not the waters of the Lakes Albert and Victoria Nyanza that are responsible for the formation of the equatorial swamps of the Southern Sudan (commonly known as the Sudd region), and although the wastage of the waters that pass Gondokoro is admittedly great, yet the total that is annually spilled therefrom is small in comparison with the gigantic input from the rivers of the Southern, Eastern, and Western rims of the great depression known as the Sudd region.

The rainfall of the rims of the depression are swept by rapid rivers into the swamps almost as fast as the rain falls, and as yet few people realise the vastness of the waters thus annually running into the swamps, or the fact that owing to the growths of reeds and sedges in the mouths of the rivers but a very small tithe runs out into the Nile. From these two sources alone the annual wastage of water in the swamps would water both Egypt and the Sudan several times over, without recourse to any water from the Albert Nile.

The following statement is made at the close of the second paragraph of the article in question:—

"Consequently, proposals that contemplate a continuance of the waste in the Sudd region in all years in order that a fraction of it may be recovered by gravitation or pumping need not be considered."

The above may be coupled with the last paragraph but one, thus:—

"The Sudd region is of enormous extent, and consists of land which, owing to its position, its climate, and its rainfall, is too valuable to consecrate in perpetuity as a malarial swamp; in the future a large portion of it may be drained by making the Lake Albert reservoir large enough to hold the excess water even in the highest flood."

Either your Correspondent cannot have visited the swamps or he has been greatly misled as to the true circumstances of this region.

I may say that there is no mystery in the swamps; the Sudd region is a perfectly natural depression into which a portion of the waters of the Lake Albert Nile do fall annually, but by far the greatest waters that go to maintain the swamps is the natural rainfall that is led into the swamps by a host of tributary rivers having their origin in the rim of the depression.

For thousands of square miles this depression is almost level, with hardly any fall towards its outlet, and in the great flood of 1917 the vastness of the expanse of the waters was a sight which was truly awe-inspiring; however, it was invaluable to an engineer, and a rapid survey of the swamps indicated the lack of slope—even a few inches rise in the waters meant additional thousands of acres under water. Nature herself presented a picture with the LEVELS writ large upon the picture. The great saucer was full to the uttermost limit, and the lands submerged till so far as the eye could see there was no change in the aspect of the great lake thus formed.

The exit from the swamps is through a bottle neck into a river which has the gentlest of slopes for several hundreds of miles.

Thus it is obvious that the recovery of these swamps for purposes of agriculture cannot be accomplished by any system of canalisation of the Albert Nile. It will help undoubtedly, but the final solution must be drainage, and drainage means pumps and power. Every drop of water that is lifted in the draining of the swamps will naturally be pumped to the Nile, and will assist in the watering of both Egypt and the Sudan; no doubt drainage by gravitation will assist, but in view of the picture of the year 1917, there is no doubt that the final recovery of the waste lands will be by pumps. Both the Sudan and Egypt will benefit.

With the "aftermath" of war still upon us we talk in millions, we scheme big schemes—the control of the Nile and the Lakes. It sounds fine, no doubt. We talk glibly of finishing in 1955 (?), but there is a lot of time for water to pass down the Nile between then and now, and in the meantime the decade 1920 to 1930 is still with us. It is in these years that the water will be wanted, and these schemes for 1955, though of great interest, will not help us through the immediate future.

The Sudd region holds the solution of the immediate difficulties—not these wild schemes that finish in 1955; their time will doubtless come; but to canalise the Albert Nile will require from 25 to 35 millions of pounds sterling and a great many years to attain.

At the best, the total increase in water requirements for Egypt during the next ten years is but a small affair as compared with the water available, and can be had at a very small cost. On the other hand, what of the Southern Sudan? For every acre that there is in Egypt suitable for cultivation there are twenty in the Sudan—millions of acres with a fair average rainfall, millions of acres that can be brought under cultivation for £4 to £5 per acre; land that to-day has no value, not land at £150 to £500 per acre, as in Egypt. At the moment, and with all this colossal waste of water, the Southern Sudan may not draw a drop even of the waste waters.

I have said that it is an *Imperial* matter; it is. To-day, as a result of the policy foreshadowed in your Correspondent's article, the Sudan is well-nigh starved for food supplies. Dhurra, the staple food of the Sudan and to a large extent the staple food of Egypt, has been forced by shortness of supplies to the unprecedented price of 400 piastres and over in the markets of the Sudan (£28 to £30 per ton, as against £2.50 to £3 50 in good seasons in pre-war days). The Sudan should be the granary of Egypt, yet at the moment it cannot supply itself; thousands of Shadoufs on the Nile in the Sudan are barely supporting workers thereof; and Egypt, with a plethora of cotton and no foodstuffs, is robbing other parts of the world that can ill afford to part with their supplies.

It must not be lost sight of that, whatever we may do for Egypt, the fact remains that in a few years Egypt can no longer support her ever-growing population; there is not sufficient land. On the other hand, there is no limit to the available land in the Sudan—not the narrow fringe of the Northern Sudan alongside the Nile, but the huge areas of land away to the south, in addition to the forty odd millions of acres known as the Sudd region.

With a reasonable policy, the Sudan can feed Egypt and herself, and still have to spare, but it is the immediate future to which we have to look and with which we are mostly concerned. The swamps offer all the water that either Egypt or the Sudan can want in the immediate future.

I have found the statements in your article to be misleading, and the times are serious enough to warrant those who are studying the case and watching the future of the Empire to draw attention to errors that have crept in.—I am, etc.,

35, Sharia Falaki, Cairo, April 19, 1920. JOHN WELLS.

THE THRACIAN COUNCIL.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In your issue of April 22 you published a communication from the *Agence Télégraphique Bulgare*, despatched from Giumuldjina, and pretending that the Supreme Administrative Council (Provincial Assembly) of Western Thrace, now occupied by Allied troops, has submitted to General Charpy, commander of these troops, a resolution asking for an autonomous *régime* for this province.

This communication contains an actually inaccurate ver-

sion of what has happened in Giumuldgina, and I beg to communicate to you the following:—

The Supreme Administrative Council (Provincial Assembly) of Western Thrace is composed of five members—two Greeks (the Greek members were not even mentioned in the communication of the *Agence Télégraphique Bulgare*), one Turk, and one Bulgarian. The President is a Greek. An attempt by the Young Turk to vote a resolution in favour of the autonomy of Western Thrace has completely failed, owing to the opposition of Greeks and Turks opposed to the Young Turks. The Provincial Assembly did not vote the resolution, which, in consequence, was not presented to General Charpy.

On the other hand, General Charpy, closing the session of the Provincial Assembly, addressed the members as follows:—"I don't know if the powers of the Governor of the Province will be renewed. His place here is but temporary. We have the duty to conform ourselves to the just decisions of the Peace Conference."

I am, etc.,
D. CACLAMANOS.

The Greek Legation, 25, Knightsbridge,
April 27, 1920.

[The letter from His Excellency the Greek Minister supplements, rather than contradicts, the message of the *Agence Télégraphique Bulgare*, which, as was pointed out in the "Notes of the Week" of our issue of April 22, omitted to make any reference to the Greek members of the Supreme Administrative Council. In fairness to the Agency's telegram, however, it must be pointed out that it was not stated that the Supreme Administrative Council took any official step; but that after the opening ceremony a deputation of thirty Bulgarian and Turkish notables presented a petition to General Charpy. Reports as to the constitution of the Council vary. In our last issue we published a statement of a Greek paper that the Council consists of nine members—four Greek, one Bulgarian, three Turkish, and one Jewish. The Greek Minister speaks of five.—ED.]

POLICING MESOPOTAMIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—While in the main I agree with you in your leading article of April 29 on the subject of Mesopotamia, I must point out that there has been no neglect in the matter of initiating measures for the defence of the country and the maintenance of order by the employment of Arabs under British officers. As far back as 1918 local militia was formed in the Hillah grain-producing district, and since then local forces have been reorganised and considerably extended. There now exist the Mosul Gendarmerie, the Kurdish Levies, and the various units of Militia in the Baghdad and Basrah vilayets, to a total of not less than 6,000, of a fine type of man, all armed with modern H.V. rifles and led by British officers and W.O.'s, and having a fair standard of discipline. The main difficulty in their employment is local intrigue, which will, I think, cease to a large extent now that the mandate for the country has been settled.

Their efficiency in procuring order in many of the districts has been very marked, and they are usually the only force the Political Officer can call on for fifty or even a hundred miles. In the Kurna district one Shabana, Dhari ibn Finjaan, has already been awarded the M.C.

I am, etc.,

MUSICAL NOTES.

THE BEETHOVEN FESTIVAL.

The Beethoven Festival Week was held at the Æolian Hall, and lasted from April 26 to May 1. All the seventeen quartets were played in chronological order by the London String Quartet, and every performance was well attended. That these things should be is a matter for great congratulation, for it is doubtful whether in any country other than Germany an audience would tolerate Beethoven on six successive days. The fact that a London public not only tolerated but enjoyed the experiment demonstrates two things: the eternal and ever-appealing qualities of Beethoven, and the excellence of the London String Quartet.

It is difficult to praise too highly the London String Quartet. Its present composition is Mr. James Levey (first violin), Mr. Thomas Petre (second violin), Mr. Waldo Warner (viola), and Mr. Warwick-Evans ('cello). There was a time when it was thought that the absence of Mr. Albert Sammons and Mr. W. H. Reed (the old first and second violins) could not be compensated for, but the lack of individuality which was at first noticeable in the playing of Messrs. Levey and Petre becomes less and less every day. Again, it was a common complaint that this Quartet was led by its 'cello, but, although Mr. Warwick-Evans is very occasionally too prominent, the reproach is no longer a just one. Of the viola playing it can scarcely be necessary to speak: Mr. Warner has a genius for, and is a genius in, chamber music. The absolute perfection and utter finish of which this Quartet can boast come not through the absence of individuality but through a trained yet natural unanimity of conception. Other Quartets (for example, the Bohemian String Quartet, on a series of performances by whom I hope soon to comment) certainly have more individuality, but none has such exquisite finish and such refinement of tone. In these things it is, I should think, without its compeer in the world.

If there is one word to fit Beethoven, it is "colossal." Even in his earlier quartets, the six Lobkowitzs and the three Rasoumowskys, he is unique; you find him writing in Op 18 (No. 3), for instance, an *Andante* which in the simplicity of its tune attains a greatness never reached by any other composer of chamber music. As early as Op. 95, written in 1810, you find him as modern as you may like or dislike; while in Op. 133, the "Grosse Fuge," written in 1825, you find him most startlingly modern. The last work, indeed, if it had been written to-day (and such a thing, of course, is inconceivable), would certainly have been hailed or damned as radical. (It is a most amazing admixture of melancholy sweetness and of exuberance, and, though originally intended as a Finale to Op. 130 [the thirteenth quartet], seemed to merit its position as a separate quartet.) Thus, to say that Beethoven is always new is, when speaking of his main works, literally the truth. It may surprise some people to know that few Quartets are capable of playing the whole of Beethoven, for, though he is nearly a century dead, the import of his later works is still far from clear. That the London String Quartet were never in doubt as to their interpretation of him signifies much for their musical, as distinct from their technical, knowledge.

Beethoven's career is commonly divided into three periods:—(1) Imitation—until 1801; (2) Transition—1801-1815; (3) Reflection—1815-1827. This division has, like all arbitrary divisions, many disadvantages; but for the quartets it certainly is of certain use. The first six quartets, written in 1800, are sometimes as much Haydn as Beethoven; the form and the conceptions, with a few new ideas, are set and not created. In the second period, during which he wrote the seventh, eighth, ninth, tenth, and eleventh quartets, he was occupied chiefly with his mighty orchestral works, the outcome of the recognition of his individual lot as part of a universal experience. And in the last period, the period of his remaining six quartets, when blindness had overcome him, and when he was meeting his fate with noble serenity, he is reflecting upon life in general. It is these later quartets which stamp Beethoven as the most dominant personality in all music. Without the "Solemn Mass," without the ninth Symphony, even with the great last sonatas (all of which were written during his last few years), these quartets would preserve Beethoven's fame as the most colossal and most dignified mind in music. The only names that can approach his are those of Bach and Wagner, and the energies of these were not directed towards chamber music. To undertake, therefore, for six days to unravel Beethoven's mind is an achievement of which the London String Quartet may well be proud, and one for which the London public should be eternally grateful. I hope that this is the initiation of a series of such performances on the part of this Quartet, for it is an example which should mark (for other nations to behold, and for us to enjoy) the British as really, if not consistently, one of the most musical races in modern times.

An Arabian Jewish Folk-song was included in the violin recital which Mr. Dushkin gave at the Wigmore Hall on April 22. How far Jewish music is essentially Jewish is a matter on which few people know much; but this song of the Yemenite Jews certainly seemed to be quite original, and derived unmistakably from a minor and unhappy land. It was played with a feeling that was all the more deep for not being excessive; but everything that Mr. Dushkin does is performed with fastidious sense and refined judgment.

On the following day, at the same hall, another Russian violinist, Miss Lena Kontorovitch, gave a recital, and raised a good deal of enthusiasm. She commenced with Elgar's now well-known Sonata and into it she certainly infused much beauty. Her tone and phrasing were especially good, and though there was scarcely the stamp of individuality in her performance, there was never any falsity of taste. She was even better in Bach's unaccompanied Suite in E major, playing with a clarity and finish which, seeing the incompleteness of her technique, were unexpectedly pleasing. It was not good, after this, to hear her descend (relatively) to trifles by Saint-Saëns and d'Erlanger; but she had already proved herself an artist who is not far below the first rank.

A very different reading of Elgar's Sonata was made by Mr. Alexander Cohen at his recital (with Mr. Anderson Tyrer at the pianoforte) on April 24 at the Æolian Hall. Mr. Cohen's playing was limited only by his technique; he always knew, and obviously felt deeply, what ought to be expressed, but he did not always express it. The spirituality of the violin playing and the loveliness of the pianist's playing would have been overwhelming but for the hitches on the strings; there were consequently a series of spells rather than a continuous one. Franck's Sonata in A, Medtner's Three Night Pieces, and Catoire's Poem Sonata (Op. 20) were all performed with the same depth and fineness.

Upon April 23, St. George's Day, there was a concert at the Queen's Hall organised by "Brother" Ernest Newland-smith. In celebration of this day—a celebration which is only partially, but should be rigidly, observed—musical services were held in the cathedrals and processions were organised by the League of Arts (an account of whose work I hope to give soon), but the Queen's Hall was the only performance at which I was able to be present. This, moreover, consisted of "an appeal to Church and State," and had an object other than a purely musical one; it therefore lay outside my province. The moral mission of art, which "Brother" Newlandsmith maintained was its only purpose, is a question into which I cannot enter here; I can only add that the achievements, vocal and instrumental, made at this concert fell humanly short of the angelic ideal.

At the Æolian Hall on April 27 a group of young musicians, who are also artists (including Mr. Arthur Bliss as conductor, Mr. Gerald Cooper as singer, and the Philharmonic String Quartet), conspired to give a programme that was at once notable and notorious. For they produced for the first time in England Stravinsky's 'Ragtime." Having enjoyed their mirth, and having escaped with nothing more than a polite sort of applause, these young men should refrain from any more public tricks. For in the music was nothing but offence, and the only really funny thing in the whole show was the painfully serious back of the conductor. Even if Stravinsky is to go the way of Erik Satie, whose ineffable compositions at the Empire a few months ago are unfortunately not yet forgotten, there is surely no need to proclaim the fact. Cannot such demonstrations be left to those countries which believe in progress?

Mlle. Yvonne Arnaud will certainly be known to the English readers of this journal as an accomplished musical comedy actress, but at the Wigmore Hall on April 30 she showed her versatility by playing at the pianoforte in a concert of French chamber music. In some pieces for 'cello and pianoforte by Caix d'Herveloix and Chausson she played with discretion and unobtrusiveness; but in César Franck's Quintet, in which M. Mangeot and Miss Sylvia Sparrow were the violins, Mr. Jeremy the viola, and M. Pitsch the 'cello, her zeal outran her. In a bad performance of this Quintet, however, she was by no means the only sinner; in the matter of wrong notes alone the second violin transgressed beyond all hope of forgiveness. Mlle. Arnaud fully realised the charm of French chamber music, but she did not succeed in inducing (with the partial exception of M. Pitsch) the others to infuse much body or dignity into it.

ANDANTE.

NEAR EAST BOOKSHELF.

I.—"ALBANIA, The Master Key to the Near East." By Christo A. Dako. (Boston, U.S.A., E. L. Grimes Company. Price $3.50. Post free.)

II.—"THE HANDBOOK OF CYPRUS." By H. C. Luke and D. J. Jardine, O.B.E. (London: Macmillan and Co. 12s. net.)

I.—THE CASE FOR ALBANIA.

The Supreme Council has travelled so far from the principle of nationality in its settlement of the Near Eastern question that it will seem to many like beating the air to invoke the doctrine at this stage. But there is still one country that fondly nurses to itself the hope that the Great Powers will, at least in its case, remember their pledges and see that justice is done to its people in the final settlement. The prospect for Albania, it is to be feared, is not very bright. Practically the first time the Supreme Council deigned to notice its existence was to propose the allocation of substantial portions of Albanian territory to Yugoslavia and Greece by way of compensation for disappointments elsewhere. Already at the outbreak of the war Italy had proclaimed a protectorate over Albania, and it seems to occur to no one of the Allied Governments that, whatever claim to Valona may be made out on Italy's behalf from a military or Imperialist point of view, there can be none on the basis of nationality or self-determination.

In this book on Albania an Albanian states the case for his own country. As might be expected, M. Christo Dako is outspoken; he reflects the spirit of the Albanian mountaineer, and is not concerned with the veiled phraseology of diplomacy. An Albanian, at any rate, will not be accused of Imperialist designs. The Ishmael of the Balkans has so little in common with any other nationality that he could not bring himself to desire even jurisdiction over aliens. Certainly he desires still less that aliens should have jurisdiction over him, and his "case" is that he should be left to himself. So strong, indeed, is his national consciousness that he is prepared, backward in civilisation as he admits himself to be, to dispense with any protection or administrative advice.

But we may let M. Dako speak for himself, and from the following extracts the tenour and purpose of the book can be gauged. As the author writes in a foreign language, he is to be congratulated on his achievement; but it is a matter for regret that he has not been better served by the writer of the preface or some other friend, who might have touched up his English here and there, and by his publisher, who might have printed the chapter headings at the top of each page, instead of repeating the badly divided title of the book.

After sketching the recent history of Albania, M. Dako sums up the position thus:—

> Not only the inhabitants of Albania itself could not be persuaded either by political oppression or by religious intrigue, or by foreign propaganda of civilisation and culture to abandon their national characteristics and national consciousness, but even those who emigrated into foreign countries did not do so, as may be seen by the survival for centuries of the Albanian colonies in Calabria (Italy) and Attica (Greece).

And he adds:—

> What do all these historical facts mean? Do they mean that the Albanians are incapable of civilisation and progress? No. They simply tell us that the Albanian nation held itself *always* distinct from its neighbours, neither sharing their sympathies nor their aversions. They tell us that the Albanians have rejected, with an equal impartiality, the civilisation of Greece, Rome, and Byzantium. . . . They demonstrate that the Albanian nation is of a stock with *strong national consciousness*, that of being Albanian by race, language, customs, and feeling and therefore impossible to be assimilated.

From these premises, supported by strong denunciation of Italian, Greek, and Serbian action against the Albanians, the author passes to what he claims can be the only solution:—

> The restoration of Albania cannot possibly have another political status, except that of a sovereign independent state, politically and economically, for only under such a status will she be free from all foreign intrigues, able to develop and progress, and become an element of good order and peace in the Balkans.

It is only fair to the author to add that, although he writes in America, he has had personal experience of the troubles through which Albania has been passing, and he is ready with both a political and an educational programme for the reconstruction of Albania as an independent State.

II.—CYPRUS.

This useful guide appeared originally in 1901, the editors being the late C. D. Cobham, C.M.G. (so well known to all interested in Cyprus) and Sir Joseph Hutchinson. Several issues followed up to 1909. The first editors considered that "in point of bulk" the small volume of about 120 pages had "probably reached its limit." In 1913, however, two officials, Mr. H. C. Luke (author of "The Fringe of the East," etc.) and Mr. D. J. Jardine, took over the task and greatly improved the scope of the work by the addition of much useful information. And now, after an interval of six years, a fresh edition, which has grown to 300 pages, gives further proof that the work has fallen into able hands. It has become, in fact, a valuable and up-to-date handbook, and presents vivid sketches of the island under most of its aspects.

The historical portion has been judiciously expanded, and furnishes a concise but very interesting record, from the legendary period of mythology, through classic and mediæval ages, up to the present time. The island has known prosperous times, and many long centuries of adversity. The most brilliant epoch was that of the Lusignan kings, which followed the conquest of the island by our crusading King, Richard Cœur de Lion (1191 A.D.). They ruled for three centuries (to 1489), and left as memorials the splendid remains of French Gothic architecture, which date from the thirteenth and fourteenth centuries, and are among the principal attractions of the island. It was a period of feudal pomp, of sport, and luxury, to be followed by ages of poverty and desolation, which, happily for the people, ended with the British occupation.

Honesty compels the admission that during our tenure and trusteeship all has not been done that should have been done. The reader will gather, none the less, what a transformation has been effected in the life and fortunes of the Cypriots since 1878, when there was not a post office or a printing press in the island, and not a road except an indifferent stretch of 26 miles from the "port" of Larnaka to Nicosia. A company now runs motor-cars between the six principal towns. The population has increased from 180,000 to 307,000, including about 60,000 Moslems and 147,000 non-Moslems. Under normal pre-war conditions Cyprus could be reached in five and a-half days from England and eighteen hours from Port Said.

The island is far less visited than it deserves to be, for its fascinations are great, and call for even more space perhaps than is bestowed upon them. The reasons why it has not been brought into the itinerary of travellers is simple. Neither hotel accommodation nor steam communication is what it should be, for the tourist of to-day expects to travel in comfort and to find good quarters on arrival. Moreover, nothing has been done locally to develop a tourist trade. When peace restores the world to more normal conditions facilities should be increased, and visitors may be confidently advised to spend a few weeks in the island during the winter season (November to May). In the heat of summer it should become more and more a holiday resort and sanatorium. Travellers will always visit Egypt and Palestine, and many will again prolong their tour to Smyrna, Constantinople, and Greece. No one would regret a passing sojourn in Cyprus, and for those who contemplate one this handbook is precisely what is required. A map, reduced from Lord Kitchener's survey, shows the administrative districts, the roads and railway, and forest land is now coloured green.

The war, during which Cyprus proved useful in various ways, has inevitably affected the cost of living, for "prices have risen immoderately, and still continue to rise." There would be nothing to mar the picture of steady, if slow, progress, were it not that an agitation, fostered by the Greek-speaking town communities, for union with Greece has tended to place a drag on the wheel. The reports of successive High Commissioners show clearly how needful is the co-operation of the Cypriots themselves towards the restoration of prosperity, which has been lost, but can yet be regained.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish Dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. May	1920. April		1338. Shaban.	5680. Iyar.
6	23	Thursday	17	18
7	24	Friday	18	19
8	25	Saturday	19	20
9	26	Sunday	20	21
10	27	Monday	21	22
11	28	Tuesday	22	23
12	29	Wednesday	23	24

The Maharani of Baroda returned to London on April 29 from Paris.

Lieut.-Colonel the Hon. George Akers-Douglas returned to London on April 29 from the Continent.

Brigadier-General the Hon. Charles and Mrs. Fortescue have arrived in London from Dalmatia.

M. Frederic Nano, Secretary to the Roumanian Legation, is back in London from Bucharest.

Sir Lancelot Sanderson, Chief Justice of Bengal, arrived at Plymouth on April 27 from India.

M. Alexandre Cretziano, Secretary to the Roumanian Legation, returned to London on April 30 from Paris.

M. Pashitch, head of the Yugoslav Peace Delegation, has left Belgrade for Paris, having now recovered from his illness.

Mr. Alex. Devine, who has been visiting Trieste on behalf of the British Relief Mission to Montenegro, has left Rome for Paris and London.

On April 28 Lord Allenby personally invested the Emir Abdulla, second son of the King of the Hejaz, with the Grand Cross of the British Empire.

Viscount Allenby was officially represented at the funeral of the Egyptian students who were killed in the recent railway disaster in Austria.

Mrs. Arthur F. Walter, accompanied by her daughter, Mrs. A. E. Gill, left on April 29 in the steamship Lancashire on a visit to Egypt and Palestine.

Sir Arthur Evans delivered a lecture on the excavations of King Minos's Palace at Cnossos, in Crete, at a meeting of the Anglo-Swedish Society at Stockholm on April 26.

The Shah of Persia, who left Paris for home on April 28, paid a visit on the previous day to the President of the Republic and bestowed upon him the Collar of the Order of the Crown of Persia.

Dr. Howard S. Bliss, the President of the Syrian Protestant College, Beyrout, having given evidence on behalf of Syria before the Peace Conference, sailed on May 2 for New York.

The Earl of Lytton, Civil Lord of the Admiralty, has completed his inquiry into the pay and conditions of the native workmen employed in the dockyard at Malta, and left on April 28 for Syracuse *en route* for England.

Donations for the establishment of medical scholarships for Serbian girls should be addressed to the Hon. Treasurer, Mrs. H. Flinders Petrie, care of Dr. Dickinson Berry, 21, Wimpole Street, W.1 (London Provincial and Union Bank of England).

The members of the Royal Navy Club 1765-85 will dine at the Hotel Victoria, Northumberland Avenue on May 18 to celebrate the Battle of the Nile (August 1, 1798) and the bombardment of Algiers (August 27, 1816). Admiral Sir R. Nelson Ommanney will preside, and the guest will be Air Commodore E. M. Maitland.

The annual Indian Cavalry Dinner will be held at the Savoy Hotel (Embankment entrance) on June 8, at 8 p.m. Early application for tickets should be made to the Hon. Secretary, Austin Low, Esq., C.I.E., Messrs. Grindlay and Co., 54, Parliament Street, S.W.1.

The members of the Indian Khalifat Delegation were entertained at dinner by the Cambridge Moslem Association on May 1. The President (Mr. S. J. Imam) took the chair, and was supported by Professor E. G. Browne, Mr. J. C. Lawson, Dr. H. Rackham, and other members of the University.

Sir Herbert G. Dering, his Majesty's High Commissioner in Bulgaria, was married on April 27 at Holy Trinity Church, Prince Consort Road, to Edith A. Mountjoy, widow of J. R. Middleton Smith. Among those present were Sir Henry and Lady Dering, the Hon. Lady Bromley and the Hon. Audrey Pauncefote, the Hon. A. and Mrs. Akers-Douglas, Sir Algernon and the Hon. Lady Law, Lady Joyce, Sir Rennell Rodd, Lady Addis, Sir Ernest and Lady Birch, General and Mrs. Dundonald Cochrane, and Colonel and Mrs. R. McCalmont.

The Royal Geographical Society has arranged for the following lectures to be delivered in the Æolian Hall (135, New Bond Street) at 8.30 p.m. on the dates stated:—"The Valleys of Kham," by Capt. F. Kingdon Ward, on May 17; "Ocean Research in the Dutch East Indies," by Prof. Dr. G. A. F. Molengraaf, on June 7; and "Through South-West Abyssinia to the Nile," by Major L. F. I. Athill.

The marriage of Sir Edward Boyle, Bart., of Ockham, Hurst Green, Sussex, and 63, Queen's Gate, and Miss Beatrice Greig, elder daughter of the late Mr. and Mrs. Henry A. Greig, of Ridge House, St. George's Hill, Weybridge, and half-sister of the Archdeacon of Worcester, was celebrated on April 29 at St. Margaret's Church, Westminster. The officiating clergy were the Dean of St. Paul's Cathedral, the Rev. A. G. Rogers, rector of Catton, Surrey, and the Rev. C. Bicknell. The reception was held at Claridge's, and was attended by over four hundred guests, these including Constance Lady Boyle, Miss J. Greig, Mrs. Buckley, Mrs. Guy Gold, Major and Lady Dorothy Henley, the Serbian Minister, the Hon. Greek Minister and Mme. Gennadius, the Bulgarian Chargé d'Affaires, the Earl and Countess of Haddo, Lord Channing and the Hon. Julia Channing, Sir Mancherjee Bhownaggree, Lady Grogan, Sir John Cockburn, Sir Charles des Graz, Sir Krishna Gupta, Sir John Stavridi, Sir Cecil Hertslet, Sir John and Lady Jordan, Sir Roper Parkington, Lady Acland, Lady Cowen, Mrs. John Mavrogordato, and Major Boyd-Carpenter, M.P.

APPOINTMENTS, ETC.

M. George Cretziano has been appointed Roumanian Minister to Brussels. He was formerly Minister in Madrid.

Sir Herbert Dering was received on May 1 in audience by the King, and kissed hands upon his appointment as his Majesty's Envoy Extraordinary and Minister Plenipotentiary Designate to the King of the Bulgarians.

OBITUARY.

The death has occurred in Athens of M. Vlassios Gabrielidis, editor of the *Acropolis*. He occupied a very prominent position in Greek journalism.

Mr. T. H. S. Biddulph, who died in London on April 24, had a distinguished career in the Financial Department of the Government of India, which he joined in 1869. His first appointments were in the Accounts branch of the Public Works and Railway Department. After holding the important posts of Accountant-General, Bengal (1896) and Madras (1900) he was selected in 1901 to re-organise the finances of Patiala State, a most difficult task. Mr. Biddulph was engaged in this till his retirement in 1909. The Government of India marked its appreciation of Mr. Biddulph's labours by recommending his appointment as a Companion of the Indian Empire, in June, 1907.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

SPELLS OF RUSSIA.

To go from the Royal Academy to the Grafton Gallery, where nearly 200 paintings by Nicolas Roerich are exhibited, is to experience the joy of emerging from the stifling air of narrow officialdom and of entering into the invigorating atmosphere of broad independence. For the pictures of this Russian master, whose work is derivative only in the sense that all great work must of necessity have some points of comparison with other great works, come as a refreshing surprise, even to those who knew his earlier paintings. It would be superfluous to enumerate the merits of Roerich: of form and of conception alike he is such a master that his work must be seen to be believed.

To readers of THE NEAR EAST, Nos. 12, 14, and 173—"Burgustan, Caucasus," "The Blue Range, Caucasus," and a sketch called "A Persian Theatre" will be of peculiar interest; but it is difficult to imagine that the other paintings, which consist chiefly of the historical or present landscape, life and spirit of Northern Russia, could possibly fail to fascinate anyone. The wealth of colour at Roerich's command, colour which both indicates and inspires an intensity of feeling; the uncanny wanderings, together with the deliberate purpose of his genius; the magnetic mysticism which informs his legendary or spiritual compositions—these are things of which dreams are made, but of which the reality is seldom seen. It may be that a full comprehension of his art is not possible; it may be that as yet so strong and so strange a personality is too much for Western minds to appreciate. Whether that be so or not, it is certain that the startling vagueness of impression which his work creates will, of its nature, be the less easy to forget.

The most sure and the most sudden thing in the exhibition is the responsiveness which Roerich's pictures evoke; this appeal they make is always certain, though not often precise. Ignorant or understanding, you must enter into the secret of these pictures; it is impossible coldly and from a distance to admire them. Take, for instance, No. 15—"Confession" (but which I understood from Mme. Jarintzov, the author of an illuminating brochure upon Roerich, should more accurately be "Repentance"); it is the picture of a solitary figure wending her way through the snow to an old Russian church—here is a perfect and most moving presentation of an emotion and of an act known to all mankind. Or take No. 98, "The Call of the Sun"; it is the very apotheosis of the old pagan spirit which informed the lives of the early Russians. But there is nothing that Roerich draws which has not a meaning; in places, indeed, he touches the very fundamentals of life. It is this very greatness, this originality, this universality of his conceptions that makes his work so indefinable. Suffice it to say that in this exhibition of his work there is matter for days' study and for weeks' pondering, and that, in more utilitarian terms, the work of Roerich is worth the whole of the Academy put together.

NEWS IN BRIEF.

The Serbian military censorship was to be abolished as from May 5.

According to latest estimates, 85 people were killed and 83 injured in the recent railway disaster at Moradabad, India.

Daylight saving measures have been introduced into Yugoslavia, clocks having been put forward one hour on the night of April 9-10.

Anzavour Pasha, leader of the anti-Nationalist movement in Anatolia, has arrived in Constantinople, and has been received by the Sultan.

Committees are being appointed for welcoming the Prince of Wales at Madras, Bombay, Calcutta, and other important centres throughout India.

Mgr. Barlassina, Patriarch of Jerusalem, was received by the Pope on April 25. His Holiness showed a deep interest in the present situation in Palestine.

L'Echo de Bulgarie, which is published at Sofia, has been forced, owing to the increased cost of paper and of labour, to raise its price from 30 to 50 stotinki per copy.

Intending visitors to Zagreb should note that the difficulty of obtaining accommodation there is very great. The housing question has assumed such serious proportions that the authorities have taken over everything and "billet" everybody. People with large houses have to give up rooms which are not necessary for their own use, and the situation is extremely difficult. No visitors are given more than a two-days' permit by the Bureau des Etrangers, and every visitor must accept the hotel accommodation allotted to him or her by that office.

PROPERTY FOR SALE.

IN COUNTY OF KENT.—FREEHOLD, £12,000.—A gentleman's well-planned MODERN RESIDENCE, containing 6 bedrooms, with excellent offices and outbuildings, including garage, stabling, and three cottages, all in good repair; tennis lawn, rock garden, etc., and 22 acres of young fruit plantations, highly cultivated and in profitable bearing condition. The house is so arranged as to admit of its being added to at comparatively small expense. Situation—300 feet above sea level, on a slope facing due South. Perfect natural drainage, the soil being of a loamy character overlying the ragstone formation; 2½-3 miles from two railway stations, 3 from golf links, and 30 from London. Close to Church, Post Office, and Auto-Car Service. The district is particularly favourable for fruit growing, and opportunities but seldom occur for acquiring a property of such exceptional character.—Write Box "Z," THE NEAR EAST, 1, Devonshire Square, London, E.C.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX. LONDON. TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

BRISTOL
GRAND SPA HOTEL.

EXETER
ROYAL CLARENCE HOTEL
(facing beautiful Cathedral).

LONDON
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.

LESSONS FROM THE PACT OF LONDON.

The official text of the Treaty of London, the agreement between Italy, France, Great Britain, and Russia, signed in London on April 26, 1915, on the eve of Italy's entering into the war, has now been published. In spite of the threat recently conveyed to the Yugoslav Government that the Supreme Council in certain circumstances might allow its provisions to be put into force, the Pact is as dead as it deserves to be. Apart from the historical interest attaching to it, however, its publication at this stage may well serve a useful purpose, as the document affords a valuable object-lesson to Governments and peoples. The treaty was concluded at a time when the Entente Powers were in special need of Italy's help against the Central Powers, and to secure this help they showed themselves ready to sacrifice principles and common sense. In so far as the British and French Governments undertook to reward Italy at the expense of their own countries, they were entirely within their rights; Italy had the advantage in the bargaining, and was virtually able to dictate her own terms. When, however, she claimed territory belonging to third parties, the Allies were in such a strong position to resist the demands, or to refuse to commit themselves until the views of those concerned could be ascertained, that a firm stand on the point must have facilitated the negotiations by convincing Italy that there were limits beyond which she could not hope to push the Entente. Deprived of their sheet-anchor of moral considerations, the latter were no match for Italy in the game of bargaining. The terms agreed upon with regard to the eastern coast of the Adriatic showed a lamentable ignorance of the Near Eastern question as a whole; the disposal of Albania and of the islands of the Dodecanese was a cynical endorsement of the very policy which was declared to be the head and front of Germany's offending. Unless all the signs are at fault, there is a danger that history may repeat itself, and that principles and common sense may once more be sacrificed, this time to enable the Allies to follow the smoothest road to an early settlement. The goal to be reached in 1915 was Italy's co-operation, and to gain it scant attention was paid to details. To-day it is desired to wind up the tedious Peace Conference, in order, apparently, that what is at present most unmistakably the Allies' business may become nobody's. The Pact of London has been directly responsible for the delay in the arrival at an understanding between the Italians and the Yugoslavs, and may yet bring the two peoples to war. The misgivings aroused five years ago among the Serbians have never been wholly allayed, and these have in turn served to stiffen Italy's insistence upon her pound of flesh. Among the Allies there has appeared no statesman capable of mastering the complicated question and strong in the confidence of a righteous cause, who might have compelled the contending parties into reasonableness. Consequently the quarrel over the Adriatic continues, and, directly or indirectly, helps to swell the volume of unrest and strife in Europe and Asia.

That the Allies have travelled a very little distance on the road to knowledge since 1915 is apparent from some of the decisions that have already been taken. They have, however, the experience of the mistake made with Italy. It would be invidious now to attempt to strike a balance between Italy's war contribution and the part that she has subsequently played both as a handicap to an early settlement and a clog on reconstruction in South-Eastern Europe. But there can be little doubt that, if the Entente politicians who signed the Pact of London could have foreseen the course of events, with its Caporetto and Fiume, they would have been less eager to prejudice their own cause by acquiescing in Italy's imperialist demands. Their necessity at the time was their excuse. The plea no longer holds good. The need for an early settlement is admitted, but the signing of the Turkish treaty does not promise to settle anything in connexion with the chief danger spots in Asia Minor, Transcaucasia, and Syria. For the settlement of these problems two things are essential to the Allies, candour as between themselves and strict adherence to all that they have so repeatedly declared to be their war aims. It is to be hoped that the San Remo Conference has done something to establish the advantage of the former. Until the exchange of plain speaking between Great Britain and France there had been a tendency on the part of the Allied Great Powers to imagine that difficult questions might be settled by studiously affecting to ignore them. President Wilson has tried to break down this diplomatic fallacy, but circumstances have combined to weaken the stand that he made for straight dealing. The trouble in Turkey at the present moment is largely due to a lack of candour among the Allies in regard to the Turkish settlement. To counteract the supposed weakness for the Turks on the part of one Power, two others have adopted a policy which has encouraged a certain section of the Turks in their *intransigeance*. A candid exchange of views and insistence upon officials on the spot carrying out in the spirit and to the letter the intentions of their respective Governments would have robbed the Turkish question of many of its thorny points. Again, it is of little use for one Power to model its policy on the principle of nationality and to pay deference to national susceptibilities, if it allows an ally to offend in this respect at every turn. Great Britain experienced the embarrassment and danger of this subservience during the many years that a mistaken sense of loyalty to the Anglo-Russian agreement caused her to countenance her ally's aggression against the Persians. There is no reason to perpetuate that weakness, particularly as the resultant evil will be far more serious in the case of Syria and Mesopotamia than in that of Persia.

At the back of the minds of the signatories of the Treaty of London there was probably the idea that, provided that the present was secured, the future could be left to look after itself. The incentive to follow the same line of least resistance is as strong now as at any time during the war, but such a policy can only prove fatal to the world's hope for peace. There has been a manifest desire to apply it to Transcaucasia and Central Asia, with the result that the situation in those territories has gone from bad to worse. With the passing of Baku into Bolshevist hands it is impossible to disguise the seriousness of the position. Less is to be feared, perhaps, from "Red" armies than from "Red" doctrines. It is the spread of the latter rather than the advance of the former which is responsible for the Baku success, although the Russian Bolshevists had made the oilfields an objective from the first, and will know how to take advantage of the new developments at the Tartar capital. The mistake made by the Allies is to suppose that there is no alternative to a military expedition for the help of the countries threatened by Bolshevism. In the last two issues of THE NEAR EAST Mr. Ikbal Ali Shah has called attention to the policy of drift in Central Asia that has allowed the Bolshevists and the Afghans to come together. Red armies may have been in the background, but the Bolshevist success was based on a thorough knowledge of the situation in Afghanistan, and was achieved by exploiting Afghan misgivings in India. It is not to be supposed that Kabul was an objective in itself; through Afghanistan the Bolshevists hope to reach India, and through India to aim at Great Britain. Some expenditure of money was necessary; but the most effective weapon would seem to have been skilful propagandism, which in turn has been helped by British *laissez faire*. With the accession of Aman Ullah it was to be expected that Afghanistan would try to gravitate towards the north. There was no reason, however, why the Bolshevists should have everything their own way, and the reopening of negotia-

Digitized by Google

tions between Afghanistan and India six months after the treaty had been signed suggested that circumstances were proving too strong for Kabul. The discussion has been interrupted, apparently on no adequate ground. It will be unfortunate if the British Government lets slip the opportunity of regaining the confidence of Afghanistan. If the pernicious effect of Bolshevist intrigue across the Border had been appreciated, there would have been considerable reluctance to allow the meeting to be rendered nugatory. Propaganda must be met by propaganda, and both in Transcaucasia and Central Asia it must be on a large scale and well informed if it is to be successful.

AMONG THE RED SEA CORAL REEFS.

(FROM A CORRESPONDENT.)

The well-known Parsee firm of Cowasjee Dinshaw and Brothers runs a number of small steamers between Aden and South Arabian and Red Sea ports, and it was one of these that we boarded after dinner at Hodeidah, in the Tehama, for a trip to Jeizan, in Asir, some 130 miles to the north. The ship lay a mile and a half from the shore, and we found her surrounded by dhows into which were being discharged Busreh dates packed in palm matting, Bombay flour in sacks, and bales of piece goods, also from Bombay; while roped to her stern were six small dhows laden with hides and coffee berries, both packed in the ever-useful palm matting, for shipment to Aden *en route* to European markets. The captain had had our beds made up on the roomy bridge; but with the incessant noise of the winches on either side of us and the Bedlam of shouting from the Arabs and Somalis in the dhows, sleep was wooed in vain. It was late next morning when the hatches were closed and the ship weighed anchor.

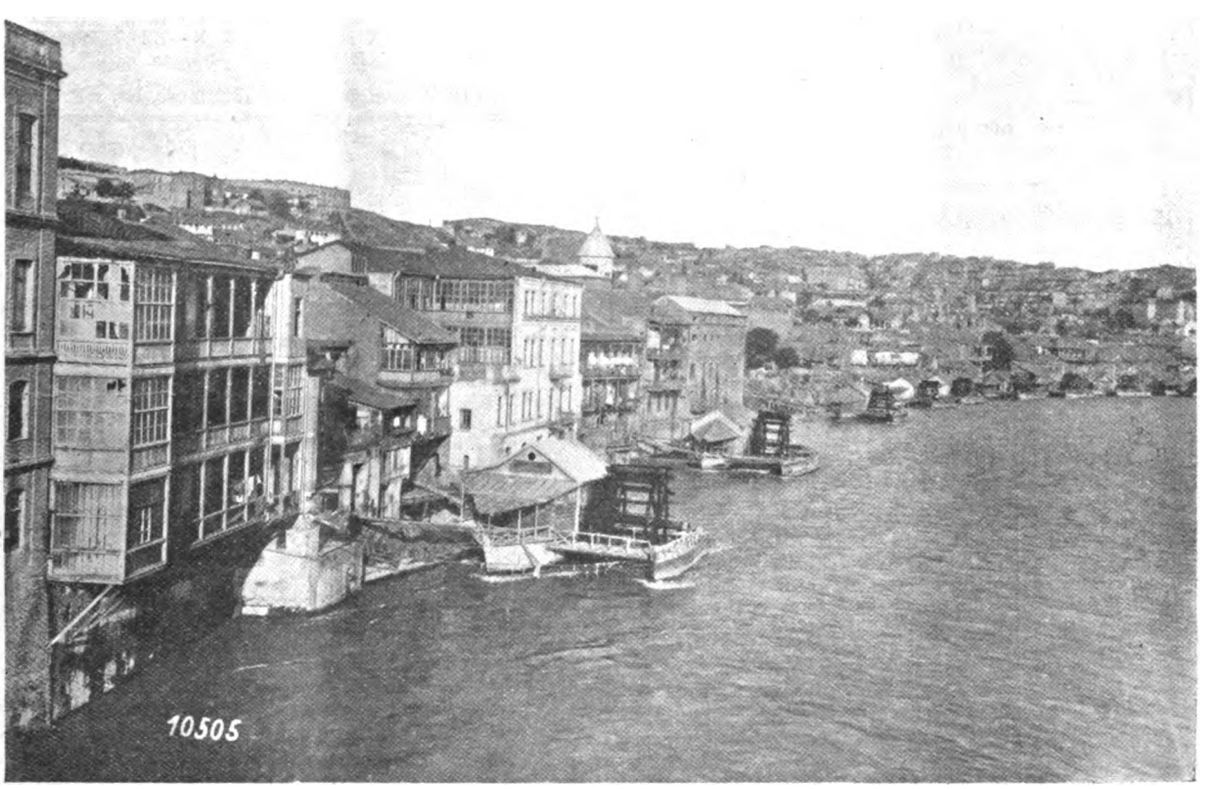
A call was made at the island of Kamaran, on which is the Turkish quarantine station for pilgrims to Mecca, at present in charge of the British military authorities. There is a neat and clean village on this sandy island, situated in a pleasing little bay and close to the lazarette; the water, too, is beautifully clean and clear; and cleanliness seems the great feature of the place, as it rightly should be. At the Military Administrator's house small trees are being assiduously encouraged to continue their difficult existence. These, with a few palms, are the only evidence of plant life, but officers declare that they have been happier at Kamaran than in other of these seemingly unnatural geographical phenomena on which the imperial Englishman is called upon to spend a portion of his life in Arabia and other ill-provided countries.

Opposite to Kamaran on the mainland is Salif, where there are valuable salt mines, which are not at present being worked.

Leaving Kamaran at tea-time, we steam northwards among the coral reefs, in view always of the low-lying sandy coast, monotonous and uninteresting save for an occasional hill or headland, village, or short stretch of palm trees. At a distance from the sea, varying from forty to fifteen miles, runs a mountain chain; it is, however, seldom visible, owing to a haze which enshrouds it during the greater part of the year, and which robs us of the interest and beauty of scene that a clear atmosphere would lend to the traveller. High peaks, rising to ten thousand feet, are to be found in the highlands of the Yemen and Asir, barriers of a mysterious land.

The ship follows a tortuous track inside the main line of reefs, anchoring for the night off the town of Loheiya, whose white coral-lime houses stand out conspicuously in the evening light. Loheiya is built on a prominent headland, and is the chief port of Asir. It is now struggling to re-establish its trade, which was seriously interrupted during the war.

It would be foolhardy to navigate a ship among these reefs in the dark, and a good many sailors would not care for the job even in daylight. Some of the obstructions stand out by day as low but well-defined sandy islands and islets, sometimes with some scrub or a palm tree to add to their visibility; some are just awash, their presence betrayed by breakers when there is wind, while in calm water they remind one of an alligator lying in wait for his prey; and some are just below the surface of the sea, giving to the water a beautiful light-green colour, as warning of their presence. The mariner cannot steer a course by chart only, for the chart is inaccurate; and, were it accurate, he would still have to see exactly where he was going, for there are no lights in these waters and no buoyed channels. Even by day, in good light, it is extremely difficult to pick out one's way when the course steered is straight into the sun. Shoals abound, also, which show no sign to the eye and make the pilot's vigil the more anxious. Our captain, however, knows every reef and every shoal; and he refers to them in terms of affection



TIFLIS.

Digitized by Google

or dislike, as though they were alive and possessed of personality and purpose.

As might be expected, these shoal waters are full of fish. The sea, in fact, seems literally alive with them, for wherever you look, at all times of day, you see their splash on the surface, you see them leap from the water, and you see them in flight over it. The porpoise, black-fish, shark and whale are all present, the black-fish and whale only in deeper waters and the last-named seldom seen. Mother-of-pearl shells are found, and there are pearl oyster fisheries conducted in primitive fashion by the Arabs, and no doubt capable of scientific cultivation and extension.

At Jeizan the cargo discharged and shipped was of the same character as that at Hodeidah. The Jeizan boatmen are Arabs, Negroes, Somalis, and men of an admixture of any two or all three of these races. They occupy a low place in the scale of civilisation, and are as abrupt in their behaviour as are the whole people of the Arab coast; but we heard less of their voice that night at Jeizan than we had expected, and were fortunate enough to sleep a little. Jeizan is a village built at the base of a brown rock headland which stands sentinel on a barren shore, a village of some two hundred conical huts, built of brushwood on wooden frame, mud plastered inside, and some thirty or forty small stone houses. There is a round stone fort on the hill-top, and a large stone house for guests is in course of construction. Water is brought on camels from a distance, and is of poor quality and brackish. There is a considerable trade with Aden, but the bazaar is small and mean in appearance, not apparently much affected by the movement of goods to and from the interior.

This small port shares with the larger hut-town of Sabiya, a few miles inland, the honour of being the home of Sayyid Mohammed el Idris, the ruler of Asir, one of the five important chiefs of Arabia. The house of Idris has ruled in Asir for a few generations only, and cannot compare in lineage with other rulers of the land, who trace a far descent; but as the leader of the Ahmadi teaching in Islam, promulgated by his ancestor, the Idrissi is held in greater reverence than some of his compeers who guide their rival factions of the Faith. For chiefs in Arabia find it convenient to control both religious and temporal affairs, and make much use of spiritual aids to worldly advancement, which are sometimes moral, sometimes not. He is said to expend his State revenues entirely on purposes of State, and to meet all his personal expenditure from his private income, consequently enjoying repute which adds to his fame as a man of generous, tolerant and kindly disposition. Sayyid Mohammed accounts himself and is accounted by the people of the country as the firm friend and ally of Great Britain, and he played an honourable part in the Great War against the common enemy, the Turk, who formerly held precarious sway in this part of Arabia.

We had proposed to spend the night ashore with the kindly Sayyid who was our host, an elderly man of the ruling family who is so assiduous in the continual telling of beads that he seems to grudge the few words he occasionally permits to escape between his almost silent, mumbled prayers; but sandflies and mosquitoes drove us to the ship, and after another noisy night at anchor we sailed at dawn and retraced our track among the reefs.

EARLY MESOPOTAMIAN PEOPLES.

The "Origin of the Dwellers in Mesopotamia" was the title of a lecture by Mr. R. Campbell Thomson given at the Royal Institution on April 29. He said there were three primitive peoples who had contributed to the earliest inhabitants of that country. One of these, the Semites, were an offshoot of the race which, in neolithic times, inhabited the Mediterranean basin. This Mediterranean race had split into two divisions, the Nordic and the Hamitic. The pre-dynastic Egyptians were of the Hamitic race. They had long narrow heads, pointed chins and small beards; their hair was black or brown, and never woolly, like the negro's. From this Hamitic race an offshoot had pushed over into Arabia, and to this day the Arabs of Southern Arabia bore a marked resemblance to the pre-dynastic Egyptians. This branch of the Hamitic people became the Semites, and, striking northwards, had divided into Hebrews, Arameans, and Syro-Babylonians, the last of whom had occupied the middle and lower regions of Mesopotamia, but not the mountainous northern country. In Mesopotamia the Semites had met two other prehistoric peoples; one of these were the Sumerians, a Huranian race, who had come from the Pamirs about 3000 or 4000 B.C. They were a branch of the Armenoids, a broad headed race, with bushy beards, and these bushy beards they had given to the mixed race which had sprung from the union of the Semites and Sumerians. The third people were of Mongol type. They had come from Anan, 300 miles east of the Caspian, where it was claimed their civilisation could be traced back to 8000 B.C. In their original home they had been a people who hunted the horse and afterwards domesticated it. About 3000 B.C. they had a knowledge of copper; they had no gold or silver. From about 4300 B.C. they developed pottery, although they did not use the potter's wheel. Their pottery could be identified by a simple geometrical pattern with which it was decorated, and was found as far west as Anatolia and Southern Palestine.

Besides anthropological resemblances, the lecturer traced links between the Egyptian and Semitic languages and between Turkish and Sumerian. The lecture was illustrated with a number of interesting lantern slides.

CHESS.

I understand that an international tournament will be held at Veldes, Yugoslavia, commencing on June 15. It is proposed to have a double round contest, and the entries will apparently be limited to ten.

M. Kostitch has just completed a brief tour in Scotland and Ireland, in the course of which he gave four simultaneous exhibitions, in which he lost only four games out of 97.

The match in the London League between the Metropolitan and Brixton Chess Clubs has resulted on adjudication in a victory for the former by 3½ to 7½. The result leaves North London head of the league.

A short Whitsuntide tour has been arranged by the Hastings Chess Club, in the course of which matches will be played with Oxford University, Oxford City, and the Leicester, Sheffield, and Birmingham Chess Clubs.

The decision to hold this year's congress of the British Chess Federation at Edinburgh is to be regretted from some points of view. Congresses in Scotland have always been most successful and normally no better venue could be found than Edinburgh; but this year sees the resuscitation of the British championship, after an interval of five years, and in the circumstances it would, I think, have been better to have chosen some more central place—London, for preference.

The following game was played at Bromley:—

RUY LOPEZ.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

In a memorandum that has recently been circulated in Roumania the large landowners, who have had a considerable part of their holdings taken from them, for the benefit of the peasants have laid their finger on the weak spot of expropriation. The extensive agriculture that made Roumania a big exporter of cereals was one of the outcomes of large holdings, and it was inevitable that when these were split up among numbers of peasants the absence of organisation and individualistic tendencies would materially affect Roumania's production of grain. The signatories of the memorandum contend that the grant of land to peasants will delay the economic transformation of Roumania into an industrial state, by retarding the supply of labour to urban industries, will injure Roumanian credit abroad, and will endanger the existence of the non-agricultural portion of the nation by reducing the volume of exports required for the normal activities of the country.

***

All these dangers, I am confident, had been foreseen in Roumania, and as far as under-production was concerned some attempt had been made to obviate it by the spread of co-operative enterprise. A variety of circumstances has helped to lend support to the forebodings of the large landowners, not least among them being the general economic position of the whole world. There must needs be a falling off in the Roumanian production of cereals, and under present conditions this factor may make some people sceptical, if not of the wisdom of expropriation, at least of the moment chosen for enforcing it. But in regard to this, it is necessary to bear in mind the situation in which Roumania found herself and the attitude of the peasants. The delay in demobilisation interfered with the autumn sowings, the reports of the spring sowings are more favourable, and demobilisation is being pressed on. The country, it is true, has a difficult task before it, but the confidence gained of having done a just thing must tell in the long run.

***

It may, I think, be taken for granted that there is something—a very substantial something—in the various reports and rumours of negotiations with the Shell Transport and Trading Company. A denial has been given to the suggestion of proposed Government control, and it seems probable that the aim of the negotiations is merely to make the company a purely British concern. The "Shell" group is connected closely with the Royal Dutch group, and this connection with foreign interests has, of course, to be taken into account in regard to any question of the development by the Shell organisation of the oil resources of Mesopotamia and elsewhere within the Empire.

***

The root factor which governs the oil position at the present time is the growing danger of a world scarcity, and, in the face of this possibility it is essential that British supplies of oil fuel should be safeguarded. Great Britain is very badly placed as regards oil, but America, the largest consumer in the world, may soon be no better off, as it is reported that at the present rate of consumption it has only 18 years' supply of oil. Herein lies an additional reason why steps should be taken to safeguard British control of the powerful Shell organisation, for it is not America's habit to be backward in securing her interests in emergencies.

***

Rarely a week passes without some fresh instance of the inadequacy of postal communications between this country and the Near East coming to my notice. The latest complaint reaches me from the Levant. The writer explains that he has not yet received a paper sent to him three weeks before the date on which he writes. "The posts," he adds, "are bewilderingly irregular. It will turn up sooner or later, I expect, but the delays are not good for business." That is precisely the point which I have been trying to impress upon the authorities for months past.

***

The news published in these columns last week that it had been decided to sell by auction goods that had been warehoused at Constantinople more than twelve months suggested very plainly the approach of the commercial crisis forecasted some weeks ago by our Constantinople correspondent. Private advices received this week confirm this view. It appears that large consignments of goods are being reshipped to England, while it is understood that goods ordered in Italy have been deflected to this country. There is no doubt, unfortunately, that some losses are likely to be sustained as a result of the unfavourable developments at Constantinople, and I can only hope that our Correspondent's frequent warnings have led our readers to reduce their commitments in that region for the time being. I use the qualification advisedly, for whatever may be happening now, in due course the market will be, as it has been in the past, one of the greatest outlets for trade in the Near East, and I only trust that present developments will not discourage the activities of British traders in the future.

***

While the Bolshevist successes in South Russia have, of course, been the main factor in bringing about a commercial crisis at Constantinople, conditions in the interior of Turkey have also played their part, and, as the importance of the Constantinople market in normal times depends on its position as a distributing centre, it follows that it is the latter factor which really counts in the long run. So far, unfortunately, progress in reconstruction in some districts of Turkey has been very slow. I have received a letter this week from a correspondent who has just visited Brusa district, and the picture he draws of conditions there is anything but encouraging. "The sowing," he writes, "is about 25 per cent. of the usual quantity, because the cultivators are afraid of 'requisitions' by the National Forces and theft. Railway communication with the interior is interrupted by the blowing up of bridges, and the roads are so insecure that farmers do not care to risk their produce. Even if security is restored by May or June the materials available for export will, in my opinion, fall far short of the amount necessary to restore the situation."

***

A further expansion of business is shown in the report of the Ionian Bank, the gross profits, after making provision for bad and doubtful debts, amounting to £424,866, an increase of £37,529 on the figures for the previous year. There was, however, a marked decline in the net profits, which were £40,575 lower at £39,290, the decrease being due to losses incurred through the exceptional fluctuations of the Greek exchange and depreciation in securities. The dividend and bonus is maintained at 7s. per share free of tax, but the allocation to reserve is only £5,000 as against £35,000, and the carry forward is much the same at £11,307.

***

The announcement in the report of the retirement, owing to ill-health, of Mr. Falconer Larkworthy, C.O.R., who has been chairman and director of the Ionian Bank for more than twenty years, will be received with great regret by his many friends within and without the banking world. By his able grasp of financial questions Mr. Larkworthy had gained for himself a great reputation in business circles, and he had come to be regarded as one of the leading authorities on finance.

***

The changes in the higher posts of the Chartered Bank of India, Australia and China, which have been pending for some time, have now taken place. Mr. T. H. Whitehead, who has been associated with the bank for a considerable number of years, retires; Mr. W. E. Preston becomes general manager: Mr. George Miller and Mr. J. S. Bruce are the London managers.

COMMENTATOR.

BANK OF ROUMANIA LIMITED

(FOUNDED 1866.)

Head Office: 27, THROGMORTON ST., LONDON, E.C. 2.

Branch: 11, CALEA VICTORIEI, BUCAREST.

BRITISH-ARMENIAN CHAMBER OF COMMERCE.

INAUGURAL MEETING.

The inaugural meeting of the British-Armenian Chamber of Commerce was held on April 27 at Grocer's Hall, London, E.C., Mr. E. A. Brayley-Hodgetts presiding.

The Chairman said that the association was promoted to help commercial relations with Armenia. It would assist trade and financial relations between the United Kingdom and Armenia, promote the industries and the exploitation of the natural resources of Armenia, keep members and others in the United Kingdom or Armenia informed of trade openings, Government or other contracts, and trade disputes, study markets, prepare and furnish reports, collect statistics, publish a journal, promote exhibitions, etc.

The Earl of Denbigh explained the geographical and strategical importance of Armenia, which country, as now delimited, he said, would consist of a plateau at an altitude of about 1,500 to 1,800 metres and an area of about 450,000 square kilometres.

The Chairman followed with an address on the commercial and economic importance of Armenia. Quoting from a lecture delivered by Dr. Gregory Artzrun in 1879, he said that the whole of Armenia abounded in mineral springs and deposits. Thirty or forty kilometres from Erzerum, in the environs of Hassan-Kaleh, there was naphtha in great quantities; the oil was procured by wrapping long poles in rags and dipping them in the wells. Under Turkish methods, modern capital could not be attracted, as at Baku. Close to Hassan-Kaleh there were sulphur mines and extensive coal deposits. Numerous sulphur and iron springs occurred in the vicinity of Erzerum. In the Kars district, near Kaghizman, there existed large deposits of salt, and in the same neighbourhood there was found in enormous quantities a peculiar kind of vari-coloured stone resembling marble. This stone was so soft on winning that it could be cut with a knife; but it hardened with exposure. The environs of Olti were rich in black amber, which resembled anthracite in appearance, but possessed in all other respects the qualities of amber. There were abundant naphtha springs in the Van district. In Kamakh, in the Erzerum district, there were salt deposits and coal seams, also mineral springs having a high temperature in winter, but very cold in summer. There were further salt deposits at Derjan, about 70 kilometres from Erzerum; but the richest of these deposits were to be found in the district of Mush—Armenia was so rich in salt that it was believed it could supply all Europe and Asia. In the vicinity of Bitlis there was an antimony mine, from which the inhabitants obtained a yellow pigment and dyes. Between Bitlis and Diarbekir copper was mined; and, generally speaking, copper and iron were found in great abundance throughout the country. At Isbir and Kiskim there were also traces of ancient gold mines; Solomon was believed to have obtained the gold for his temple from this region. On the borders of Erzerum was a very rich silver mine, worked by the inhabitants in the most primitive manner. It was called Kumush-Khaneh—*i.e.*, silver house. Cilicia was quite as rich in minerals as the other parts of Armenia; iron was mined near Zeytoun, and silver existed in the same region, also mineral and sulphur springs.

Armenia had well-watered pastures with rich and succulent grass; it was famous for its sheep, horses and cattle, the sheep being of the fat-tailed variety, and for its long-haired goats. The soil was fertile, the population thrifty and industrious. Fruit, including a peculiarly large kind of apple, flax, tobacco, cotton, rice and silk, were among the products; also a particular kind of wine, known as kharbort, which had a pleasant taste and fine aroma. It was a strong wine, half-way between madeira and sherry. Mush was regarded as the original home of honey. The wool work of the women was remarkable, and the men were splendid metal workers; the country would flourish if it could be left undisturbed by Turks and Kurds. It was in the interests of the British Empire to foster and safeguard Armenia.

Mr. E. R. Bartley Dennis, M.P., who proposed a vote of thanks to the Chairman and Lord Denbigh, said that wherever in the world we could encourage the production of food and raw materials, it would be so much the better for the people of these islands. In the newspapers it was announced that there would be a mandatory power for Armenia; it was hoped that power would be America; but, failing America, it might be England.

The vote of thanks was unanimously accorded, and the first Council of the British-Armenian Chamber of Commerce elected.

TRANSPORT IN SOUTH-WEST PERSIA.—I.

Great Opening for British Motor-Cars.

(From a Correspondent.)

About a year ago a business man of considerable experience in many countries decided to investigate the prospects in Persia. He telegraphed to a well-known Persian firm in Bushire to reserve him rooms in the best available hotel. In due course he arrived at Bushire, where he was met by the interpreter of the firm, who showed him to a house where he had been allotted a room. After a day or two he found sundry causes for complaint, but was then informed to his amazement that he was not in an hotel, that there was no hotel in Bushire, and that he was a guest in a private house belonging to his agents. As in Bushire, so in other parts of Persia. Outside Teheran there are no hotels in Persia.

However, Bushire, although the principal port of the Persian Gulf, and the starting point of the main trade route in Persia, is not one of the main markets, but rather a clearing-house and forwarding agency. For purposes of business it is necessary to proceed to the interior. On the Bushire-Caspian route the first important town met with is Shiraz, 185 miles away. The writer undertook this journey in April last year. The journey necessitated the use of seven mules, and cost about £75. The time actually taken on the road was nine days, but it was only after many promises of backsheesh that the muleteers could be induced to go so fast, for it was then the grazing season, and the muleteers thought that an allowance of twenty to twenty-one days for the journey would be more reasonable. No supplies were procurable on the road, and we had to carry everything with us. The only accommodation available at nights was in caravanserais, most of which were filthy.

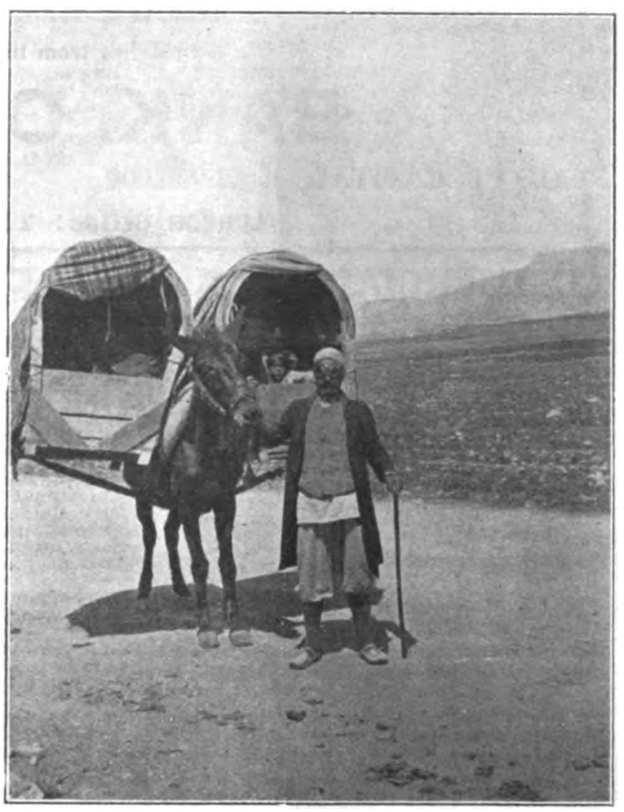
It is true that the Bushire to Shiraz road is supposed to be one of the worst roads in Persia, but conditions everywhere are very much the same. For instance, from Shiraz to Ispahan the distance is about 390 miles, and the journey is covered by mule in about twenty-one days. Travellers can sometimes obtain carriages on this road, but as there are nowadays no relays of horses, and as halts have to be made at the regular posts, the journey, even in a carriage, cannot be accomplished in less than ten or eleven days. Further, the cost of hiring a carriage for two persons with little or no luggage would be £50 or more. From the above it can readily be seen that travelling in Persia under present conditions is uncomfortable, slow, and costly—in fact, an ordeal not lightly to be faced. As for passengers, so also for goods. The average speed of caravans does not exceed ten to fifteen miles a day, and the present methods of transport, especially when taking into account damage and loss on the road, make the price of goods exorbitant beyond all dreams.

Good Motor Road.

It is obvious that motor transport, if practicable, would be the means of improvement. Let us, therefore, examine how far motor transport could be utilised in Persia. The two main trade routes in Persia are the route Baghdad to Teheran and the Caspian Sea viâ Kermanshah and Hamadan and the route from the Persian Gulf to the Caspian, that is the route Bushire-Shiraz-Ispahan-Teheran to Resht. When the British forces advanced from Baghdad to the Caspian in 1918 one of the chief difficulties they encountered was transport. There was then a sort of a road which had in point of fact been covered by motor-cars even before the war, but it could hardly be considered fit for military motor convoys. Now, under stress of war conditions, a metalled road has been built the whole way, and the motor convoys of military lorries go over it at regular intervals. In fact, this road is now in such excellent working order that the quickest and cheapest route from the Persian Gulf or even from India to Teheran is viâ Busreh and Baghdad, and yet this route is hundreds of miles longer than the more direct route viâ Bushire and Shiraz. As military lorries do this journey without difficulty, there is no reason why commercial cars cannot do likewise. There are no great difficulties. The road surface is good, and petrol is easily obtainable from the Gulf, and can be stored with other necessary supplies in such places as Baghdad, Kermanshah, Hamadan, and Teheran.

The other route, Bushire to the Caspian, is not so easy, especially the first stretch, Bushire to Shiraz. Motor-cars have been many times the whole way between Bushire and Shiraz, but as a rule man and mule power have been required on two of the mountain passes. The difficulties are, in fact, such that military convoys went as follows:—Bushire to Borasjun (39 miles) by rail, Borasjun to Radek (41 miles) by motor lorries, Radek to Rahdar (14 miles) by mules and camels, Rahdar to Poli Abgineh (23 miles) by motor lorries, Poli Abgineh to the foot of Kotal-i-Pirizan (22 miles) by mules and camels, Pirizan to Shiraz (45 miles) by motor lorries. A new road fit for motor-cars was projected some months ago from Radek to Rahdar and also from Rahdar to Shiraz viâ the Shahpur valley, avoiding the worst mountain-passes. When this road is completed motoring will present no great difficulties.

From Shiraz to Ispahan and Teheran there is no real road in the European sense, but the track is not bad, and carriages have covered the distance regularly for many years, as also many motors in recent times. A friend motored from Shiraz to Teheran last autumn, the chief difficulties encountered being in connection with tyres which burst with astonishing frequency. As regards petrol, he had taken all necessary precautions by sending supplies ahead. It is an extraordinary thing that with petrol refineries so near at hand petrol is almost unprocurable in the interior of Persia. This led my friend to express the opinion that the most suitable car for Persia would be a steamer, as paraffin can always be obtained at a price, but not petrol. However, the difficulty of petrol can easily be overcome with a little foresight. Supplies of petrol could, in the first place, be sent up from the coast even on mules, if necessary, and then depots could be arranged at different centres.



The Rival of the Motor. [*Photo by E. Betts.*

As regards other routes in Persia, motor-cars have been over the road from Teheran to Meshed and thence to Askabad on the Trans-Caspian railway, also from Meshed to Baluchistan and India. The road Teheran to Yezd and Kerman and thence to either Bunder Abbas or India does not present any great difficulties. In fact, the majority of the army lorries in Shiraz came to Persia by that route.

Pioneer Work Done.

There is no question that motoring in Persia is quite practicable; it remains to examine how far a service of motor-cars would be commercially profitable; in other words, how far the Persian would be willing to adopt such modern methods. Two thousand years ago Persia enjoyed a high degree of civilisation, but for many reasons there has been but little progress since that period, and Persia is to-day one of the most undeveloped countries in the world. And yet the present day Persian is not nearly so averse to progress as many other Orientals. That there was no development in the years immediately preceding the war must be attributed to circumstances arising out of the international position. To-day the Persian is enthusiastic for progress, but does not know the way. However, as regards the introduction of motor transport, the pioneer work has already been done. The Persian has seen military motor convoys at work, and realises how far superior they are to his antiquated methods of transport. He understands that motor transport will save him money, time, and hardships on his journeys, and he realises that it will reduce the cost of conveyance of goods. He requires no further convincing, and the offer of a motor transport service would be welcomed with open arms.

GENERAL BANK OF GREECE.

Paid-up Capital, Drs. 3,000,000.

Head Office - ATHENS.

BANKING OPERATIONS:
Every description of Banking business transacted.

FINANCIAL OPERATIONS:
Investigations in connection with, and the promotion, organisation and financing of, Limited Joint Stock Companies, with a view to exploiting agricultural, industrial and mineral resources, executing technical works, etc.

COMMERCIAL AND SHIPPING DEPARTMENT:
Purchase and sale of goods on account of clients. Warehousing, Advertising and placing foreign products on the market. Agents for foreign companies and large commercial and industrial firms abroad. General Shipping Agents.

POPULAR BANK OF GREECE.

Head Office, ATHENS. Branch, PIRÆUS.

Correspondents throughout Greece.

Established June, 1905, by the National Bank of Greece and a group of Capitalists.

CAPITAL - Drs. 1,500,000.
RESERVE FUND - Drs. 2,500,000.
Deposits and Credit Accounts, Drs. 100,000,000.

The Bank specialises in the collection of Bills payable in Greece; it accepts goods on consignment, and undertakes their sale, and transacts every kind of Banking business.

General Manager: D. LOVERDO.

TRADE WITH THE NEAR EAST.

The Bank of Athens extends special facilities for business with the Near **East** to manufacturers, exporters and importers.

The Bank has offices in all the principal towns in **Greece,** also in **Egypt,** Cairo and Alexandria, in **Cyprus,** Limassol and Nicosia, in **Constantinople,** and in **Smyrna.**

Inquiries from interested parties are invited.

BANK OF ATHENS.

PAID-UP CAPITAL : £1,920,000. **HEAD OFFICE IN ATHENS.**

London Office: 22, Fenchurch Street, E.C. 3.

COMMERCIAL BANK OF GREECE, LIMITED.

CAPITAL PAID-UP - Drs. 15,000,000.
RESERVE FUNDS - Drs. 2,845,010.45.

Head Office: ATHENS.

Branches:—**Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 295,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

IMPORTS (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

EXPORTS (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

COINAGE.—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36·50 Drachmæ to £1.

FREIGHT.—From England, 160/- + 10 % primage.

WEIGHTS AND MEASURES.—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

Branches:

PIRÆUS, SYRA. PATRAS.

Capital Paid Up - Drs. 10,000,000.

Fully represented in all parts of the world for all kinds of commercial, financial, and shipping business.

President. L. EMBIRICOS. *Manager.* D. MIAOULIS.

BANK OF PIRÆUS.

For COMMERCE, INDUSTRY and SHIPPING.

Capital Paid-up - Drs. 5,000,000. Reserve Fund - Drs. 3,095,000.

OFFICES at PIRÆUS and ATHENS.

Every kind of Banking business transacted.
The Bank's connections throughout Greece enable it to offer foreign clients special facilities for the collection of Bills, etc.
Correspondence invited.

BANK OF INDUSTRY OF GREECE.

Head Office: 14, Stadium Street, Athens.

Capital Fully Paid-up - Drs. 15,000,000

The Bank has been established for the encouragement and development of Industry and Commerce, and undertakes every description of banking business.

BANK OF ORIENT.

Capital Paid up - Drs. 25,000,000

Head Office: ATHENS.

Branches: SALONIKA, SMYRNA, ALEXANDRIA, CAIRO, MITYLENE, SERRES, ZAGAZIG, MAGNESIA, PERGAMA, SOMA.

ENGINEERING.

A Swing Bridge Repair.

Some little time ago, inspection showed that a swing bridge which carried a highway and a single electric street railway track was in need of repair. The bottom chords of the swing span were in what could only be described as a dangerous condition, as the steel work was badly corroded. This was due to the effect of street drainage, which had been allowed to drip down on to the members since the bridge was first erected. The most immediately required repair was the renewal of these chords, but as the bridge carried a large amount of fairly heavy traffic, and there was no alternative route, a certain problem was encountered at the very commencement of the work.

The first and most obvious suggestion was to build a temporary bridge close beside the main structure, and to divert the traffic during the repair, but the expense of this was found to be too high for consideration. Various other plans were suggested, and ultimately a system of temporary adjustable substitute members of sound timber of ample cross-sectional area was adopted. These members were used to carry the bottom chord stresses whilst the permanent members were being renewed, and it was found that with ordinary care the work could be carried out quickly and expeditiously and without bringing any undue strain on any other parts of the bridge. The temporary members were first fixed in place, after which the corroded steel work was cut out. After the new steel booms were fixed and tightened, the wooden substitutes were removed. The method adopted did not interfere in any way with the free use of the bridge, and, further, there was no interference with the river traffic, as the bridge was free to swing when desired and allow of the passage of vessels. The bridge was of fair size, having a span of 203 feet, with a fixed span of 232 feet at each end of this swinging portion. The feat, which ranks high amongst engineering performances, was carried through without a single mishap, and the work actually occupied less time than was at first considered possible.

Zephyr Pistons.

A specially interesting form of piston for use in internal combustion engines is being made which has a short skirt at the top, carrying two rings and a bottom skirt, bored for lightness, the gudgeon pin fixing being between the two. These pistons, which are made by Messrs. James, Talbot and Davison (1916), Ltd., at the Zephyr Works, Lowestoft, have been subjected to tests by the leading car manufacturing firms, and it has been found that they tend towards higher speeds, increased power, reduced vibration, longer life and lower fuel costs. It is said that they gave exceptionally satisfactory results on the Atlantic and Australian flights, and set up world's records on the fastest motor boat in existence. Numerous car records have also been achieved by cars with engines fitted with these pistons. Some few weeks ago I had an opportunity of examining the Zephyr car, 11.9 h.p., made by the firm at their Lowestoft works, and I regard it as a very fine example of massed production. It was not only extremely well constructed from a mechanical point of view, but it was very well finished, a feature which is not always noticeable in mass production work, especially in the case of cars of trans-Atlantic origin.

A Big Wireless Undertaking.

The Government of India has decided to re-organise entirely the existing wireless telegraph system, and also to extend it considerably, with a view to improving its efficiency in every possible way. An Indian Wireless Telegraphy Board has been formed, and the new Civil Wireless Department will be placed under the Director-General of Posts and Telegraphs, and it is hoped that the new arrangements will not only improve the means of communication with ocean-going vessels but will also be of great service in the development of commercial aviation. A special advisory board is to be set up with the following functions, viz.:—

(1) To co-ordinate the commercial, strategic, and naval requirements of the Indian Empire in connection with wireless telegraphy.

(2) To advise on any questions that may be referred to them by the Director-General of Posts and Telegraphs.

(3) To make any such recommendations as they may consider necessary on questions of general policy where the interests of more than one department are concerned.

It is hoped that further particulars as to the special functions and powers of this board will be forthcoming shortly, and that the example thus set will be followed in both South Africa and Australia.

A New Electric Welder.

A special type of electric welding machine has recently been placed on the market, designed for the purpose of welding seams in cylinders from, say, 2½ to 4 inches in diameter and from 4 to 8 inches in length. Either sheet iron or steel, or lead-coated metal can be dealt with, and a completely gas and water-tight joint made at a single operation. It is not, however, sufficient for a number of purposes that such a joint should be mechanically sound, and the machine has consequently been designed with a view to making an absolutely smooth joint which can be plated or enamelled without any further finishing being necessary. As a matter of fact, this machine can be used for finishing off articles that have been drawn or spun to shape before the welding operation is carried out. It is consequently likely to prove of great service in the hardware trade for finishing off hollow-ware of various kinds. The machine can be driven by a half-horse power motor, and it only occupies a floor space of 16 by 70 inches. It is 50 inches in over-all height, and whilst the maximum diameter of the die that can be used is 5 inches, the upper die has a travel of from 5 to 9 inches.

An Electrical Vaporiser.

A new form of electrical vaporiser has recently been placed on the market by a leading British firm of electrical manufacturers. Simple in construction, it consists of a well-made asbestos cushion, which contains a highly efficient electric heating element. This cushion is mounted on a base which can be fixed in any desired position. For medical and fumigating use the base can, of course, be just placed in position, but where the vaporiser is to be used for industrial purposes it can be fixed with screws or bolted down.

It is likely to come largely into use in connection with internal-combustion engines, not only for land and similar work, but also for motor-cars and motor-boats, inasmuch as it permits a low grade of fuel to be used. The vaporiser can be mounted, for example, between the induction and carburettor pipe flanges, so as actually to enter the induction pipe. The suction stroke of the engine draws in petroleum or other low-grade fuel, which impinges in the form of a spray on to the asbestos cushion, where it is at once converted into vapour by the heat. The device is cheap, neatly made, easily fitted, and is certain to be of use for a variety of purposes.

Dr J. Collis Browne's Chlorodyne

Of all Chemists, 1/3 and 3/-.

Cuts short attacks of HYSTERIA, SPASMS, PALPITATION.

A true palliative in NEURALGIA, GOUT, TOOTHACHE, RHEUMATISM.

Checks and arrests FEVER, CROUP, AGUE.

The Best Remedy known for COUGHS, COLDS, ASTHMA, BRONCHITIS.

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR AND MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

A Current Limiting Device.

An extremely interesting and remarkably simple device has just been placed on the market, by which the consumption of electrical energy in excess of that amount for which the circuit or apparatus used is intended is prevented. If an electric iron or an electric furnace, to give two widely-differing examples, is installed on an electric circuit, and one of these new current-limiting devices installed in connection with it, then the current-limiter can be set at a safe figure in amperes, and it will be impossible under any circumstances short of tampering with the apparatus either to overload the appliances, to drive more current through it than it is intended to work with, or to damage the limit device.

To all intents and purposes this new invention will give the same security to small power or domestic applications of electricity with regard to accidental overloads as does the big and expensive device known as a circuit-breaker to larger installations of power, as in traction or in long-distance transmission. A further point in connection with it which is worthy of consideration is that in places where electric light is supplied to tenants as a part of the convenience hired in the rent, and where light is supplied at a flat rate of payment, the device can be placed in a main circuit and locked at a certain current value. This will prevent the tenants or lessees, as the case may be, from adding other and more powerful lamps to their installation and so obtaining a greater amount of electrical energy than they are allowed by agreement.

The controller consists of a neat case containing a trigger and a small electric magnet in series with the circuit. When the current taken exceeds the allowed amount the trigger is drawn forward and releases a hammer-action bolt, which throws off the switch governing the main circuit. To restore the supply an internal switch handle is turned to reset the trigger, and the act of doing this moves the main switch to an "on" position. This resetting handle is, of course, protected by a key when used to govern the sale of current. If, on the other hand, the device is in use merely to prevent an overload of current from damaging some piece of apparatus, there is no need for the apparatus to be locked. It will be seen that the device described acts not only as a circuit-breaker and current-limiter, but also as a safety fuse. The device is sufficiently sensitive to come into action at so low an excess of current as 30 watts.

The Cost of Cooking.

The subject of electric cooking is likely to come into prominence during the next few weeks. Undoubtedly, considerable advances have been made in the design and construction of electric ovens, grillers, toasters and water heaters, and the simplicity of all these, the ease with which they can be installed, and the comfort of being able to switch off the heat when required, with the entire absence from fumes and waste products of combustion, are such that even were they more expensive to use as regards fuel costs than coal or gas ovens, they would yet be cheap and desirable domestic appliances.

In connection with the use of electric cookers, to speak generically of all these forms of apparatus, a somewhat wordy and bitter warfare has arisen which has had the effect of clouding the issue, so far as the general public are concerned. When first introduced the electric cooker, although crude and expensive, was nevertheless efficient. The gas suppliers of the kingdom, and all those who were interested in the manufacture and sale of gas-using devices, immediately saw that a strong competition was likely to arise, and very astutely they at once began to attack the newcomer on the grounds of expensive operation. They presumably argued that the electrical people were scientists and engineers rather than business men, and that their lack of commercial knowledge, coupled with a pugnacity which seems second nature to an electrical expert, would lead them to rush off on to any side issue along which a red rag of contention was waved. The gas people therefore said that the electric cooker was expensive, and the electrical people ever since have seemed to me to be spending valuable time and money in advertising the fact that their productions are really very cheap indeed.

As a matter of fact, the whole question of cost is entirely a side issue. Whether it be first cost or running cost there is nothing in it! Personally speaking, I have tested all kinds of electric cooking and heating appliances, know exactly what they cost to operate, and between any kind of electric device and any kind of gas-heated apparatus designed for similar work, and of similar capacity, there is little or no difference in any of the things we regard as going to make up the cost. And why should there be? In each case we are using a certain amount of energy, derived from coal, to do a certain amount of work, and from an engineering point of view it would be a serious reflection on the makers of either class of apparatus were it found to be markedly more expensive in operation, so far as energy consumption is concerned.

The question of operating costs is a side-issue, not worthy of time being spent in its consideration or debate. What does matter is the saving of loss, the reduction of waste, the retention in the pocket of good money that would otherwise go out into the street as the smell of baked meats. With the electric cooker it is a matter of "Look what you save." Some little time ago a certain school of cookery arose who baked and boiled, and, I believe, even fried, their foods in paper bags. In this idea they were taking a leaf from the electric cooker. The whole point was that the bag retained all the moisture, etc., that would otherwise be driven off in the form of steam and fumes, and that the resultant food was not dried up nor had it lost weight. Here in a nutshell is the case for the electric oven. The gas oven burns a flame inside the cooking compartment which uses up oxygen and forms by-products of combustion which are actually poisonous. To get rid of these, ample ventilation has to be provided, and during the use of the oven these escape into the air, accompanied by large quantities of steam, vaporised fats, and other valuable and useful foodstuffs. The result is that, given two joints of equal weight, the one to be cooked in an electric oven will be served to the table weighing approximately just what it weighed in the butcher's shop; the other, to be cooked in the gas cooker, will "shrivel up," as the cook calls it, and come to the table a mere shadow of its former self. That is where the electric cooker scores, with meat at anything from 1s. 6d. to 2s. per lb. If a cook can save three or four shillings on a single meal by using an electric oven instead of a gas cooker, it surely is that fact that should be advertised, be made public, be blazoned abroad. Yes, our gas friends were fairly astute when they persuaded the electrical fraternity that the public would judge the respective merits of gas and electric cookers by a question as to which cost a farthing or so an hour.

Tractors for Madras.

Three tractors have been purchased by the Agricultural Department of Madras, and ploughing demonstrations have been given at various places under the supervision of the Government's agricultural engineers. Further tests are being widely advertised with a view to interesting Indian agriculturists in the use of tractors. It is confidently predicted that India will ultimately prove a very good market for motor-ploughs and tractors.

THE PORTS OF INDIA.

II.—Influence of Suez Canal.

We give below some further extracts from Sir George Buchanan's paper on "The Ports of India," which was read before the Royal Society of Arts on April 15.

The immense amount of work that must be done in the future in India in port development was not generally realised, said Sir George, and as first and foremost there must be a sufficient depth of water in the river and harbour entrances, it would be well to consider what would possibly be required in the years to come.

East of Suez, port development had been largely guided by the size of vessels which could pass through the Suez Canal, and although the war awakened the Indian ports to the fact that there was an alternative route round the Cape, and a number of vessels visited India which could not have passed through the Canal, the depth in the Canal was the key to the situation. Before 1873 the maximum draught of vessels permitted was 24 ft. 6 in.; in 1901, 25 ft. 7 in.; in 1907, 27 ft., and at the present time, 30 ft., whilst the scheme of improvements now being carried out aimed at permitting the transport of mercantile vessels of 33 ft. draught. Supposing they added 2 ft. to the proposed draught of 33 ft., and made 35 ft. the maximum to work to in the near future, then, according to a recent ruling, there should be 40 ft. of water in entrance channels through sea bars, 37 ft. in ordinary entrance channels, and 36 ft. in wet docks and alongside quays and wharves. That was to say, there was not a single port in India which could take a vessel of such a size. Not only did they require existing ports improved and extended and their spheres of influence and transport facilities behind the ports extended, but the development of new ports, wherever demanded by trade, such ports competing fairly with others in the neighbourhood, and being controlled by local committees.

There were several ports in Southern India worthy of development, and for the last thirty years report after report by engineers has been received, considered, and put aside. In his judgment this was not the way to approach the subject, as what was required in the first instance was a careful examination and report on the prospective trade of the port, the area of country to be tapped, the possibilities of increasing that area, and giving better transport facilities to the port, also the prospective revenue and maximum capital expenditure permissible to begin with. Armed with this information, the engineer could and must cut his coat according to his cloth, and say what could be done for the money. A grandiose scheme prepared with at this information was a mere waste of time.

It must also be remembered that the success of a port depended on its management as much as its engineering, and that the two branches must work hand in hand, constantly devising schemes for the giving of better facilities for trade, as a port could never be said to be completed, and there were very few ports which could not have their expenditure reduced and their revenues increased by improved methods of administration.

The new port of Busreh was not an Indian port, but it was being developed on the lines of Indian ports and he was therefore tempted to use it as an illustration and warning, because he was afraid nearly all the defects he had pointed out in this paper on port development and administration could be seen there, either active or in embryo. In the arrangements for the conversion of the port from war to civil requirements, there had been no competent counsel, and there had been no properly thought-out scheme for the administration of a civil port, by people versed in port affairs. A Port Trust was to be established, but, as he had already pointed out and illustrated by examples, the creation of a Port Trust did not make a port.

Schedules of rates and rules and regulations had been copied from other ports, regardless of the fact that a new port in a new country required individual treatment, and the rates had been fixed on a scale which would make Busreh one of the expensive ports of the East. This was a matter for regret, because the immediate future of Mesopotamia and Persia lay as much in correct port administration and development as in anything else.

TRADE OPPORTUNITIES.

BRITISH and Foreign Manufacturers, Importers, and Exporters should consult the Commercial and Intelligence Department of the Anglo-Latin-American Press Co., Ltd., 4/5, Copthall Court, London, E.C.2. if they desire to develop their business in foreign countries. Full particulars will be given free of charge.

CLEMENT D. SETI, 5, Rue Serafieh, P.O. Box 1099 Cairo, desires to represent Manufacturers or Exporters of Tinplate, Blue for washing, Soap, Textiles, Oils, Paper, Silk, Drapery, etc. Accepts all propositions "delcredere"; advances on consignment goods; accepts all usual commercial arrangements; good references.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Cunard S.S. Co. will despatch a steamer from Liverpool to Volo, Salonika, Constantinople, and Batoum during the current month, but the date has not yet been announced.

The Ellerman Lines s.s. Andalusian, for Patras, Venice, and Trieste, will close for cargo at Liverpool on May 14.

The Ellerman Lines s.s. City of Oxford, for Malta and Alexandria, will close for cargo at Liverpool on May 8.

The Moss Line s.s. Karnak, for Syra, Smyrna and Constantinople, will leave Liverpool on May 15.

The Papayanni (Ellerman Lines, Ltd.) s.s. Trentino, for Algiers, Malta, Syra, Smyrna, and Constantinople, will leave Liverpool on May 12.

The Anchor Line s.s. Baron Ardrossan, for Bombay, will close for cargo at Glasgow on May 12, and at Liverpool on May 18.

The Bibby Line s.s. Warwickshire, for Marseilles, Port Said and Rangoon, will leave London on May 11.

The Bibby Line s.s. Herefordshire, for Marseilles, Port Said, Colombo and Rangoon, will close for cargo at Birkenhead on May 19.

The Clan Line s.s. Clan Macintyre, for Bombay and Persian Gulf (cargo for Persian Gulf transhipped at Bombay), will close for cargo at Birkenhead on May 8.

The Henderson Line s.s. Sittang, for Port Said and Rangoon, will close for cargo at Birkenhead on May 12.

The Houston Line s.s. Defender, for Calcutta, will close for cargo at Liverpool on May 18.

The R.M.S.P. Co.'s s.s. Tremeglos, for Gibraltar and Marseilles, will leave London on May 8.

The Powell Line s.s. Petworth, for Rabat, Larache, Tangier Casablanca, Mazagan, Saffi, and Mogador, will close for cargo in London on May 20.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Great Indian Peninsula Railway.—Supply of steel work for bridges. (Specn., £1, Secretary, 43, Cannon Street Avenue, London, E.C.2.) May 11.

Egyptian State Railways: Telegraphs and Telephone Administration. Supply of Cables. Tenders will be received up to 10 a.m. on May 12. (Particulars may be seen at the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)

Tenders are invited by the Spanish Government in Morocco for the supply of material and rolling stock for the railway from Tzuditza to Tetuan. Among the items required are the following: 37,423 sleepers, 1.75 to 1.95 metres long, 0.19 m. maximum width and thickness 0.12 m. 1,545 metric tons, 330 kilos. of rails, 12 m. long, 30 to 31 kilos. weight per lineal metre, Decauville type. 37 metric tons 152 kilos. of clamps, 11 metric tons 783 kilos. of screws. 72 metric tons 749 kilos of seating plates. 12 junctions, 1 metre gauge. 2 locomotives, 350 h.p. 12 closed wagons. Specifications are on view at the Moroccan Section of the Ministry of State, Madrid, and the Government Offices (Delegacion de Fomento), Tetuan. Tenders will be examined on May 24 at the Government Offices in Tetuan, and delivery of the goods, it is stated, must be made within six months of the date of the placing of the contracts.

Athens: Ministry of Communications.—Supply of telegraphic materials. (Particulars may be seen at Department of Overseas Trade, 35, Old Queen Street, S.W.1.) June 20.

It is reported that the Ceylon Government have authorised a survey for a light railway between Maho Junction, Batticoloa, and Trincomalee

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.

Market conditions are now much more promising as regards currants. The demand continues on the up grade, and supplies are being taken up much more rapidly.

Sultanas continue in steady request, and consumption would no doubt increase given adequate supplies.

Sugar.

The refined market has been fairly brisk, controlled sugar being in fair request. A quiet tone has characterised the free market, white Mauritius being 148s. spot, white Java 146s., and West Indian crystallised 130s.

Coffee.

The tone of the market has been dull, with transactions restricted. Brazilian has been done at 118s. to 122s., Costa Rica at from 180s. to 190s., Indian at 158s. to 190s., and Mocha at 180s. to 190s. The futures market has been fairly steady. Quotations are: May 110s., July 107s., September 104s., December 101s. 3d., and March 98s. 6d.

In their report for the week ended April 29, Messrs. Reynolds and Gibson state:—New York Futures show a decline of 42 to 50 points on balance since the previous Wednesday's close. Attention has been centred on the May liquidations, a good many contracts of which position have been absorbed by trade interests against sales of late deliveries. A fair amount of transferring to later months by those long of May has taken place, which shows the confidence of operators in future prospects. The decline in the dollar exchange has, in a market devoid of any stimulating counter factor, contributed largely to a softening of values, although on Friday last the decline was attributed to lower Rio offers. Despite the easier Rio market to the accompaniment of large receipts the undertone of Futures is steady, and the market in New York is looking for a substantial improvement in prices when the May liquidation is finished and tenders finally disposed of. The remainder of this season's Brazilian crop is shaping itself into very moderate compass, and the question of how the balance of the Government holding is going to be handled might have a very important bearing upon prices. Should this coffee be definitely held off the market, prices would undoubtedly considerably benefit. If the new season's is an early crop, action of this sort would assist the Brazilian shipper in making a good start at remunerative prices for his early sale. Sales of new crop at a good discount from present prices have been effected, a fair quantity being speculative transactions. These should come to be a help to the market when they have to be covered in. Shipments of coffee from Brazil to Europe have been in better quantity the last month, and, we think, should steadily improve as time goes on. Germany, after prolonged negotiations, has arranged supplies of food commodities from America on a credit basis to a total amount of $40,000,000. She has also had ratified a credit agreement with Holland for 25,000,000 gulden for food supplies. These are highly important transactions, and bespeak the initial steps to progress in other directions. It is possible with any further decline in the New York sterling exchange there may be occasions of lower prices ruling for Futures there. These would be favourable opportunities for purchases, as we still incline to the long side of coffee for the eventual advantage of operators.

Oilseeds.

A quiet tone has characterised the market. Indian linseed has been done at 43s., and La Plata has come to business at 37s. Rapeseed has been firm with Brown Cawnpore at 38s. 6d. Cottonseed has been very weak.

Oilcakes and Seedoils.

The trend of the market is all in favour of buyers of oilcakes, large stocks coupled with a moderate demand having a weakening effect on prices. Linseed cake has come to business at 23s. 6d. per cwt., cottonseed cake has been done round about 13s., ground nut cake at 15s., and rapeseed cake at from 12s. to 16s.

Oils have been variable, linseed being easy at 101s. Rapeseed oil is quoted 110s. for crude and 115s. for refined. Indian cottonseed has been done round about 93s., and Egyptian at about 5s. dearer. Turpentine is fairly firm at 210s. spot, 200s. May-June, 170s. May-August, and 137s. July-December.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended April 9:—The sales this week on our market amount to 41 cases at 1,050 piastres per oke for current qualities, equalling 20s. per lb. c.i.f., and piastres 1,130 for extra manufacturing druggists = 25s. The market closed firm, with buyers having still engagements to fulfil. The exchange is to-day at piastres 460 per pound sterling, and 0.87 dollars for one Turkish paper pound. The arrivals are 1,520 cases against 285 at same date last year.

Messrs. Barker Brothers report as follows for the week ended April 17:—We have to report a fairly active market again this week, with sales amounting to 37 cases from piastres 950 to 1,250 per oke as to quality. The oke is equal to 400 drams, and the lb. 141 drams, therefore the equivalent in sterling per lb. of above prices at present exchange will be equal to 17s. to 22s. per lb. c.i.f.; charges from 6 per cent. to 7 per cent. Our exchange to-day is piastres 475 per pound sterling for cheque, and 0.85 dollars for one Turkish paper pound. The arrivals are 1,535 cases against 334 at same date last year.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London office of the Imperial Ottoman Bank from its correspondents in the Near East:—

Jaffa's Trade in March.

As in previous months, nothing was exported from Jaffa except oranges, the exports of which amounted to 60,000 cases. The export of food products remains prohibited.

Rice.—The local authorities, with a view to putting an end to the exploitation of consumers by speculators who have been making an unlawful profit on the sale of this commodity of from 50 to 75 per cent. on account of its scarcity, are importing on their own account 150 tons, to be sold on the basis of PT620 per sack.

Flour.—In view of the extraordinary price of this commodity here (PT6½ per kilo), and with the object of aiding the poorer class of consumer, the Military Government of Palestine has provisionally freed flour from the Customs duty of 11 per cent. and from the octroi of 1 per cent. These new regulations, coupled with the arrival of important supplies, have made the market somewhat uncertain, and prices have fallen by about 10 per cent.

The forecasts of the new crops are very satisfactory. It is estimated that the yield of wheat and barley will be 50 to 60 per cent. greater than for the past year.

Balikessar, March 16.

Agricultural Position.

The preparations of the winter season have come to an end in good conditions, and now the fields present an appearance of much promise.

GREEK LOANS.—The Greek Legation informs that it has addressed a circular to the Banks and Paying Agents in the United Kingdom warning them not to pay Greek Coupons or Drawn Bonds forwarded to the United Kingdom for encashment from Germany or by German nationals, unless accompanied by a declaration stating that they have not belonged to Germans from the 30th June, 1917, to the 28th June, 1919. The Greek Legation has, at the same time, informed them that any purchase in the United Kingdom of Greek Coupons or Forwarded Bonds having belonged for the aforesaid period to Germans, is not considered legal. London, the 26th April, 1920.

COMPANY MEETING.

AGRICULTURAL BANK OF EGYPT.

The report of the directors on the working of the bank for 1919-20, submitted to the shareholders at the seventeenth ordinary general meeting held at the offices of the bank in Cairo on April 29, states :—

The directors have to report that the net profits of the bank for the financial year 1919-20, in accordance with Article 40 of the statutes, amount to £E580,846,550. From this amount there has to be deducted : the service of the debentures, £E235,625,250; the provision for the reserve fund, £E20,532,450; the provision for the special reserve fund as per Article 40 of the statutes, £E15,561,409 - £E271,719,109, leaving £E309,127,441; and there has to be further deducted : dividend on £1,250,000 preferred shares, £E48,750; commission to the National Bank of Egypt, £E11,384,436—£E60,134,436; leaving £E248,993,005, which is available for distribution as dividend on ordinary and deferred shares. The ordinary shares have to receive, in the first instance, dividend at the rate of 5 per cent. per annum, £E120,900; the balance of £E128,093,005 is available to the extent of one-half, or £E64,046,503, for the ordinary shares, and to the extent of one-half, or £E64,046,502, for the deferred shares. The amounts therefore available for dividend on these shares are as follows :—Balance from the year ending January 31, 1919, £E369,793,621; interest for the year, accrued on the above balance, £E18,489,931—£E388,283,552; for dividend at the rate of 5 per cent. per annum, £E120,900; further amount available, £E64,046,503; total, £E573,235,055. The directors propose to pay a dividend at the rate of 8 per cent. per annum for the financial year 1919-20 amounting to £E193,440, and to carry forward the balance of £E379,795,055. The amounts available for dividend on these shares are as follows : balance from the year ending January 31, 1919, £E315,274,211; interest for the year, accrued on the above balance, £E15,763,710 -£E331,037,921; further amount available, £E64,046,502; total, £E395,084,423. The directors propose to pay a dividend of £40 per share, amounting to £E78,000; and to carry forward the balance of £E317,084,423.

In proposing to maintain the dividends at the same rates as those declared during the previous year we have been guided by a careful consideration of the profits of the year and of the prospects of future years. We would call attention to the fact that the total amount of arrears collected during the past year, an amount of £E102,581, has gone entirely to the profit of the year, whereas the total of arrears outstanding for encashment in future years is £E83,724. We must therefore expect in ensuing years a marked decrease in this source of revenue. On the other hand, there are signs of a slightly increased demand for new mortgage loans as compared with those made during the past year. The fund formed in past years for depreciation on investments stood at the beginning of the year at £E191,000, and, as the result of certain realisations of investments, was increased during the year to £E197,532. We have decided to set aside from the profits of the year a further amount, so as to bring the total up to £E245,000. This provision would allow us to value all our Government securities in the general investment account at the market price on January 31, 1920. Although a large proportion of our investments are in War Bonds, which will mature at a premium in the next few years, we consider it prudent to allow for full depreciation on these in view of the possibility of our having at any time to realise some of our investments for employment in new business. As regards the ordinary shares of the Mortgage Company of Egypt held by the Agricultural Bank, we are of opinion, in view of the present position of that company, that these shares may be considered as worth the cost price at which they stand in our balance-sheet. The position of this company has greatly improved during the year under review; instalments in arrear show a further reduction, and, owing to the present demand for land, due to the prosperous condition of the country, all the holdings which the company had to acquire through foreclosure have been sold on favourable terms. The company made an offer in 1919 to purchase a certain amount of its own debentures at a price considerably below their face value, which operation, we expect, will have resulted in considerably benefiting the bank as ordinary shareholders in the company. The dividend paid for the year ending on March 31, 1919, was at the rate of 8 per cent., the same as in the previous year.

Arrears.

On January 31, 1920, the total arrears outstanding were £E83,724, against £E151,326 on January 31, 1919. Of the sum of £E83,724 in arrear shown above, £E32,167 represent interest. No credit has been taken in the profit and loss account for any part of this sum, since, in accordance with the statutes, only interest actually encashed can be included in the profits. The whole of the remainder—viz., £E51,557, representing capital overdue, has, as required by the statutes, been deducted from the profit and loss account before arriving at the balance available for distribution. Consequently any encashments made on account of the sum of £E83,724 will go entirely to the profit of the year in which they are effected. Up to March 15 the encashments since February 1, 1920, on account of the arrears of £E33,724, amount to £E11,600.

The sums collected during the past year from the annual instalment due and from the arrears of past years are, we consider, satisfactory. £E552,175 were collected out of the annual instalment of £E590,920, and £E102,581 from the arrears, making a total collection as regards these two items of £E654,756. Our encashments therefore exceed the annual instalment by £E53,836, and the total of outstanding arrears is decreased by this amount. The prosperity of landowners in Egypt has still further increased during 1919. All kinds of agricultural produce have been sold at very high prices, and although in many cases the cultivators had sold their cotton before it reached the record prices at which it stood towards the end of the year, yet in all cases they realised a very large profit on their crops, and were able to meet their annual engagements with ease and to repay a considerable amount of outstanding arrears. The arrears now due to the bank stand at £E83,724, as compared with £E1,394,546, at which they stood on January 31, 1915.

The total of loans exceeding £E1,000 each was £E134,277 on January 31, 1920. Our arrears on these loans were £E2,828.

Land Acquired.

The reduction in the area of land acquired by the bank during the year and in the total land still held by the bank is a further proof of the general agricultural prosperity referred to previously. The area of land which the bank found it necessary to acquire during 1919-20 was 207 feddans, as compared to 455 feddans in 1918-19, and we have sold 531 feddans, as compared to 1,588 the previous year; our land holding has thus decreased by some 324 feddans.

We hope to be able to sell gradually the 748 feddans remaining on our hands at satisfactory prices. The number of expropriations made by the bank during the year are as follows :—Number of cases in hand on February 1, 1919, 1,049; number of new cases begun during 1919-20, 1,135; total, 2,184; cases settled, 1,314; balance, 870; cases brought to expropriation, 90; balance pending on January 31, 1920, 780. In 15 of these cases of expropriation 87 feddans were bought in by the bank, and in 75 remaining cases 503 feddans were bought in by third parties.

In accordance with the statutes, the board has temporarily elected as a director Mr. T. S. Richmond in the place of Sir John Rogers, K.C.M.G., D.S.O., whose resignation was announced last year. This nomination is submitted to the shareholders for confirmation at this general meeting.

The directors beg to thank the staff in the head office and in the agencies for their satisfactory work during the year; they would take this opportunity of expressing their high appreciation of the services rendered by many of the Egyptian members of the agencies staff during the disturbed period when they protected the bank buildings and property at considerable personal risk.

GUARANTY TRUST COMPANY OF NEW YORK.

The Guaranty Trust Company of New York has just issued through its London office a booklet entitled "Bank and Public Holidays Throughout the World," which, as its name indicates, gives a complete list of the world's holidays, and the dates on which they fall. A calendar shows the countries where business is suspended on each date, and an alphabetical list of countries enumerates chronologically the holidays observed in each. This book is one of the series of informative publications issued by the company, and distributed to its customers and others.

The receipts of the Egyptian Markets, Ltd., for the week ended April 7 were :—Cattle markets £961, general markets £628, total £1,589; total for year £29,619.

THE AGRICULTURAL BANK OF EGYPT.

NOTICE IS HEREBY GIVEN that at a General Meeting of the above-named Company, held in Cairo on the 29th April, 1920, it was decided that a Dividend of 8s. per Share on the ORDINARY Shares of £5 each, and £40 per Share on the DEFERRED Shares of £5 each, shou'd be paid on and after the 3rd May, 1920, at THE NATIONAL BANK OF EGYPT in Cairo, Alexandria, and London (6 and 7, King William Street, E.C.4.).

Payment will be made in London, less Income Tax.

The said Dividends will be paid to the holders of Ordinary and Deferred Share Warrants to Bearer on presentation of the respective Dividend Coupons (ORDINARY No. 17, DEFERRED No. 16) at the above Banks.

Forms for listing the above-mentioned Coupons will be supplied on application by the Bankers above mentioned.

Coupons must be left with the Bankers for previous examination.

By order,

F. T. ROWLATT,
President.

Cairo, 29th April, 1920.

ALEXANDRIA WATER COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN that the Forty-second Ordinary General Meeting of the Shareholders will be held at the Company's Offices, Alexandria, on Tuesday, the 1st June, 1920, at four o'clock in the afternoon, for the transaction of the ordinary business of the Company, pursuant to Act of Parliament and also to pass the two following resolutions: INCREASE OF THE CAPITAL OF THE COMPANY: Resolution 1.—To increase the Capital of the Company by the creation of 20,000 Shares of £5 each nominal, to be offered to the Shareholders at par. Resolution 2.—To authorise the Board of Directors to issue these Shares, either in part or all, at such period as it may consider favourable in the interests of the Company.

Holders of Share Warrants to Bearer desiring to attend or to be represented at the Meeting must deposit their Share Warrants in London before the 20th May, 1920, or in Alexandria before the 28th May, 1920, until after the Meeting, at Messrs. Barclays Bank, Ltd., 1, Pall Mall East, London, S.W., or at the Anglo-Egyptian Bank, Ltd., Alexandria, or at some other approved bank in London or Alexandria.

By order of the Board,

J. E. CORNISH,
Secretary-General

Alexandria, 29th April, 1920.

INADEQUATE PRODUCTION OF ROUMANIAN COAL MINES.

According to an article recently published in the Roumanian newspaper *Bursa*, the general management of the Roumanian Railways have recently been considering the means to be taken for effecting an immediate increase in the present output of coal, which is totally inadequate to meet growing requirements. The representatives of the coal mines explained that the decreasing output was principally due to the lack both of workmen and working implements, and also to the destruction caused by the Germans having mined the coal without consolidating the mine-shafts. To remedy this it has been suggested that approval be obtained for the employment of a number of experienced miners from Germany, as the local workmen, who are not professional miners, are unable to undertake the work. The management of the Roumanian Railways have been asked to place such wagons at the disposal of the mines as are required for the transport of coal dust, and thus remove the present congestion at the pit-head. The urgent necessity for procuring rolling stock was also raised at the meetings held between the Railway authorities and the representatives of the mines. The railway management pledged itself to help the mines in every possible way, and it is hoped, now that the situation has been made clear, that the present monthly output of 14,000 tons will be raised to 23,000 tons.

ASIA MINOR'S DECREASED POPULATION.

The decrease in population forms one of the most serious questions in connection with Asia Minor, says the United States Trade Commissioner at Constantinople in a recent report. During the last five years many Greeks and Armenians have been deported or killed. As these elements were always conspicuous in the industrial life of Asia Minor, it will be necessary to receive a considerable influx of population of some sort before the industries of that region can in any way be restored. Also, the Turks themselves have suffered a marked decrease in population among their own numbers. Residents in Turkey are hopeful that when the political future of Asia Minor is settled and conditions in the interior become reasonably safe the rich, natural resources will attract desirable immigrants.

The finest tobacco-growing districts of the Turkish Empire were those of Samsun, Bafra, and Tcharchambe, on the Black Sea. These three districts in 1910 produced 2,576,675 kilos of tobacco, valued at £T1,871,865. In 1917 the production fell to 922,379 kilos, valued at £T650,363. Due to deportations, the number of tobacco growers decreased from 9,303 in 1915 to 3,145 in 1917.

In the district of Erythraea (Tchesmé), near Smyrna, whence the whole population, composed exclusively of Greeks, was expelled in 1914, the cultivation of the olive and the vine, which used to yield a goodly revenue, has since given place to the production of charcoal, manufactured by Turks from the trunks of the olive trees.

Sparse population means slow business recovery, less possibility for immediate profits for new investments of capital, and diminished purchasing power for the country as a whole. Four wars succeeding each other with scarcely a break have left their mark on Asiatic Turkey. The present situation concerns not only the immediate residents of Turkey, but also all foreign business initiative and extension.

Nundydroog.—The ordinary general meeting will be held at the Cannon Street Hotel, E.C., May 12, 12.30 p.m.

It is announced that coupons of the Imperial Government of Persia 5 per cent. Sterling Loan, 1911, due May 15, will be paid at the Imperial Bank of Persia 25, Abchurch Lane, E.C., or at their bankers, Messrs. Glyn, Mills, Currie and Company, 67, Lombard Street, E.C.

LANCASHIRE COTTON.

MANCHESTER, Monday.

The market has been decidedly slow throughout the past week. Considerable attention has been paid to the wages dispute, and as a result of the intervention of the Ministry of Labour the employers and the operatives in the spinning section have narrowed their differences. The Masters' Federation has offered an advance of 25 per cent. on current wages, but up to the present the trade union officials have refused to accept less than 35 per cent. It is anticipated that the differences will be bridged before the end of this week, and a strike avoided. There is not likely to be much difficulty in settling matters in the weaving branch of the industry. Fluctuations have taken place in Egyptian cotton, and the outlook remains uncertain. On the whole, rather more favourable news has been received relating to the new crop. Egyptian yarns have been purchased sparingly. Engagements of producers are getting more irregular. In cloth for Egypt business has been restricted. According to some exporters clearances on the other side are quite satisfactory, but some manufacturers are being asked to delay deliveries. The turnover in piece goods for India has been quite unimportant. Makers of dhooties in Blackburn and district are in need of orders. The further fall in silver has checked trade for China. There has not been very much activity for South America. Cloth prices have been fairly steady, but the tendency of values has been in favour of buyers. American yarns have dragged in demand, and spinners during the week have not nearly sold the output of the machinery. Export bundles continue comparatively quiet.

COMPANY NOTES AND REPORTS.

The report of the Ionian Bank for 1919 states that the profits provision having been made for expenses of management, losses, all bad and doubtful debts, depreciation of securities, bonus for staff, rates, taxes, income-tax and excess profit duty, both in Greece and England, amount to £39,289, and £11,008 was brought in, making £50,297. An interim dividend at 3s. per share free of tax was paid in September, £14,567, leaving available for distribution £35,730. The directors propose a final dividend for the year at 3s. per share free of tax, £14,567, and a bonus for the year at 1s. per share, free of tax, £4,856, payable May 12; transfer to reserve fund (making it £125,000), £5,000; carried forward, £11,307. The business of the bank continues to show satisfactory expansion, but the profits of the year have been adversely affected by depreciation of securities and by losses incurred through the exceptional fluctuations in the Greek exchange. The directors announce with sincerest regret the retirement, owing to failing health, of their colleague Mr. Falconer Larkworthy, C.O.R., who had been chairman and director for over 20 years. Meeting, Basildon House, Moorgate Street, E.C., May 11, at 11.

Bombay Gas.

The report for 1919 states that the profit as shown by net revenue account, after allowing for interest and exchange, amounts to £31,661, making, with £23,533 brought forward from preceding year, £55,194 available for dividend. Deducting interim dividend paid in November last (£11,200), and placing £1,374 to reserve fund, £5,614 renewal fund, and £153 to insurance fund, there remains £36,852, out of which directors recommend a dividend of 4 per cent. (less tax), making 8 per cent. for year, which will leave £25,652 to be carried forward. Meeting: Moorgate Station Chambers, E.C., May 13, at 11.30.

Anglo-Egyptian Oilfields.—Gemsah production for week to April 18, nil (last week, nil); Hurgada production for week to April 18, 2,534 tons (last week, 2,176 tons).

ON CHANGE.

General Depression.

(FROM OUR OWN CORRESPONDENT.)

THROGMORTON STREET, Wednesday.

There has been a fair amount of business doing this week, but prices have again been on the down grade. There has been good buying, however, going on as the decline has proceeded. In Government stocks City of Alexandria have come back 1¼ to 65, at which price some business has been done. Egyptian Unified are about one point down at 69⅝ x.d., and the 3½ per cent. Pref. are one point down at 58. Turkish 1891's have dropped a point to 65, and Turkish 3½ per cent. 1894's are half down at 53.

In Bank shares Nationals have gone back ⅝ to 20¼; but Agriculturals, after dipping to 4⅞, close unchanged at 5 3-32. On the other hand, Agricultural Pref. have dropped ⅜ to 5¾. There has been a decline of 5s. in Bank of Abyssinia's to 30s., and Land Banks have had a smart fall, closing ⅝ down at 5½.

In Railways Delta Lights are ⅛ lower at 5⅞.

Amongst Land shares, Aboukirs have gone back 3s. to 36s., Béhéras are a point down at 18½, and Building Lands are 2s. lower at 30s. Consolidated Lands, on the other hand, have been a firm spot, and are closing 3s. for the fully-paid share. Delta Lands have lost 1s. at 15s. 6d., Egyptian and Foreign Trusts are 4½d. easier at 15s. 9d., and Gharbieh Land have dropped ¼ to 3½. New Egyptians have been an exceptionally good feature, and, after rising 3s. to 36s. 3d., are closing 1s. 3d. higher at 35s. 9d. Sidi Salem have dropped ¼ to 2½, Union Foncière are ⅛ lower at 5⅝, and Sudan Plantations are almost £1 down to-night at 4⅛ x.d.

Among miscellaneous descriptions, Alexandria Water are ⅛ lower at 10⅜, and Salt and Sodas have dropped 2s. 6d. to 55s. Morum's Stores are fractionally easier at 18s. 6d.

In Oil shares Anglo-Egyptian B are 5-16ths down at 3⅝, Roumanians are 2s. 6d. lower at 19s., and Traians have dropped 1s. 3d. to 7s. 6d.

Greek securities have been a very firm spot generally. The 1881 and 1884 Loans are both one point higher at 55, the 1910 Loan has risen half a point to 39½, and the 5 per cent. 1914 Loan one point to 50. The 4 per cent. Rente is exceptionally one point lower at 41.

ROUMANIAN MINISTRY OF LABOUR.

The Department of Overseas Trade is informed by the Commercial Secretary to His Majesty's Legation at Bucharest that the Council of Ministers, under the presidency of General Averescu, has published a Decree Law, establishing a Department of Labour and Social Protection (Welfare). This is a new departure in Roumanian administration. The Department of Labour and Social Protection will be under the control of a Minister of State, and M. Trancu-Jasi has been appointed to this office.

The new Minister is reported to have great sympathy with the workers, and under his auspices the recent labour troubles with the hairdressers' assistants and the men employed in the machine shops in Bucharest have been settled. It is understood that he is now visiting the Petrosani coalmines in Transylvania with the object of arriving at a working agreement between the miners and their employers.

NOTES OF THE WEEK.

Before these notes are in print the Peace Terms will have been presented to the Ottoman Delegates. Officially they can hardly be made known before the Constantinople Government has had time to examine them, but the Paris *Journal* on Monday published a summary of them which is probably neither very incomplete nor very inaccurate. We prefer, however, still to refrain from comment upon them until the official version is forthcoming. There is little new or startling about the summary, the most interesting new points being: (1) The definition of the new Armenian territory as the provinces of Van and Bitlis, as well as part of that of Erzeroum; (2) the entrusting of the Holy Places to a British Commission, under the League of Nations; (3) the handing over to the League of Nations of the protection of minorities, and the abolition of the Catholic protectorate; and (4) the announcement that the Turkish Army is to consist of 50,000 long-service men, while the Turkish Navy is to be abolished.

The abolition of the Turkish Navy will almost certainly grieve nobody but those very few Turkish sailors who took their profession seriously and those others—far more numerous—who, frankly disliking the sea and failing to understand ships, regarded it merely as an excuse for drawing unearned pay and commissions. It is possible that in course of time the reduction of the Army would prove not altogether unacceptable to many perfectly patriotic Turks; and, indeed, most of the conditions laid down would have at least a good chance of acceptance, even though some of them must admittedly prove terribly humiliating to a people with pride and a martial spirit, like the Turks. The loss of Thrace will certainly be a bitter pill to swallow; but in view of the fact that the Turks have more than once contemplated the possibility of being driven out of Constantinople, the relief of being left there, upon conditions, may enable them to get the pill down. But the decision regarding Smyrna is likely to cause far worse trouble, and it remains to be seen what action the Turks may decide to take in this matter. It is practically certain that they will make counter-proposals regarding the taking of the plebiscite, probably asking that it shall be taken at once, and under international auspices.

According to the *Morning Post's* Constantinople correspondent, the Sultan of Turkey, the Crown Prince, the Grand Vizier, and the Ministers stand pledged to resign their functions and offices collectively "if the Allies present a Treaty which deprives Turkey of Smyrna and Thrace." It is to be hoped that the threat will not be carried out; for the Sultan and his present Ministers are probably better than others who would take their place, and they appear to be in earnest in their endeavours to act aright in very trying circumstances. The trouble is that the opponents of the Government are at least as powerful as the Government; that they are uncompromisingly hostile to the Allies; and that the presentation of the Peace Terms is likely to strengthen their power for evil enormously. They have shown quite lately what they can do in the way of mischief, at Baku, where they have evidently played an important part in putting a Bolshevist Government into power; and they are reported to have concluded a military convention with the Russian Bolshevists—who promise to give them "moral and material aid" if Turkey is obliged to defend herself against the Allies. In view of other developments, the outlook is far from satisfactory in regard to the Turkish settlement, and we can only repeat the hope already expressed in these columns, that the Allies are fully prepared for all emergencies. If strong action is called for all the Allies should take their share in it.

On his arrival in Athens, on May 2, M. Venizelos was accorded an enthusiastic welcome by his countrymen. He has signalised his return in characteristic fashion; for there can be little doubt that the decision of the Greek Cabinet to grant an amnesty to two hundred political offenders was due to his inspiration. The move is undoubtedly a wise one, and it will meet with even more approval outside Greece than among the Greeks themselves. Greater Greece, which, as M. Venizelos said when thanking the citizens of Athens for their welcome, seems destined to become the centre of future progress in the Near East, can afford to be generous, both at home and abroad. She needs the services of all her able men, without distinctions of party, and she easily can find scope for their talent within her enlarged borders. She can also afford to forget many things that have happened since 1914, and it looks as if she is bent upon taking a wider view than has been possible to her in the past.

Political rivalries in Yugoslavia appear to have reacted unfavourably on Yugoslav interests in the negotiations with Italy regarding Fiume. The Belgrade *Samouprava* is reported to have announced that

Digitized by Google

"at last the Crown Council has decided to leave to Italy the sovereignty over Fiume," and though the report may be incorrect it serves to show which way the wind is blowing. The Yugoslavs themselves are now represented as being divided in their desires on the matter, some wishing to agree to Italian sovereignty over the port, some wishing for a buffer State, and some desiring that the League of Nations shall control the port permanently. As Signor Nitti and M. Trumbitch are understood to favour the second course, it seems to have the best chance of being adopted.

In the course of the statement he made in the House of Commons (on April 29) concerning the San Remo Conference, Mr. Lloyd George, after paying some handsome compliments to the Emir Faisal, said: "One of the decisions come to at San Remo was to invite him to Paris in the next few weeks. I have no reason to think he will not accept the invitation. I am sure it is vital to his interests, as well as to the two countries who have undertaken these responsibilities [*i.e.*, the mandates for Syria and Palestine] that we should discuss matters with him and come to an understanding, as I hope will be possible in the course of our meeting." It is now announced that the Emir has declined the invitation. It would seem either that he does not share Mr. Lloyd George's optimism regarding the chances of reaching an understanding, or that he holds that he can best serve the vital interests of his country by remaining in it to check the hotheads. For it cannot be denied that there are plenty of hotheads in Syria who would push matters to extremes in their desire to see their country free from foreign soldiery and foreign officials, and it is doubtful whether they could be held in by anybody except the Emir himself. It would be foolish, therefore, to attribute to him any other motives in rejecting the invitation: but in any case it would seem to be a matter for France rather than the Peace Conference to concern itself with. Meanwhile Arabs are raiding villages in the French zone south of Tyre, and refugees are flocking into the British area.

After a period of comparative quiet, the Egyptian extremists have suddenly resorted to methods of violence again. Shots have been fired at British soldiers, and an officer of the Royal Munster Fusiliers has been shot and killed by four *effendis*, while walking in what is described in one of the telegrams as "a brilliantly lighted portion of the Sharia Bulaq." In another case two orderlies were wounded, and it is rather disconcerting to learn that up to the time of writing no arrest has been made in connection with either outrage. Another case of a similar character reported is an attack upon Hussein Darwish Bey, the Minister of Wakfs, at whom a bomb was thrown, fortunately without injuring him. This renewal of the campaign of violence is disappointing, because it was hoped that the agitators were beginning to realise that they would achieve nothing by such methods. That they will have to learn the lesson sooner or later is not to be doubted, but meanwhile Egypt suffers, and, it is to be feared, the criminals positively enjoy the notoriety which is theirs.

Having completed their inquiries in the Sudan, the members of the Nile Irrigation Commission returned to Cairo, and Judge Booth, of the Egyptian Mixed Courts, has been added to their number, as legal member for the purpose of taking evidence on oath. In connection with this inquiry it is not uninteresting to observe how frequently the Egyptians refer to "our" water. Nor is it unnatural to wonder what the result would be if the Sudan took steps to deprive its northern neighbour of any considerable portion of the supply. The Nile is, of course, the life of Egypt, and it is painful to contemplate what such a deprivation would mean to the Egyptians. Yet, though it may seem extremely improbable, it is not utterly impossible that something of the kind might be brought about, or at least attempted, in the future, if Egypt and the Sudan were both left to their own devices. And in view of the past it would seem that in such case the Egyptians might have cause to regret the loss of the British protection of which to-day they profess so much anxiety to be rid.

The Report of the Foreign Office Committee on British Communities Abroad has been published as a White Paper [Cmd. 672], and makes interesting reading. We cannot here examine it in detail, but it is pleasing to note that the Committee have done their work expeditiously and well, and that many of their recommendations show a very clear determination to move with the times. Perhaps the most important thing in the report is the advice "that His Majesty's Government should make it known without delay that they take a sympathetic interest in the activities of British communities in foreign countries, and are prepared in certain cases to afford them practical support." The recommendations as to establishing and supporting British schools—primary and secondary—chambers of commerce, libraries, and schools of archæology are, upon the whole, admirable. The Committee recognises the prestige which is acquired by the existence of an English church in a non-Christian country, and advises that Government assistance should be given to such churches in suitable cases and when necessary; and it urges strongly the formation of "a Society or League on the lines of the Alliance française for the encouragement of the study of English literature and arts." The report is a good one, and we should like to see effect given to the majority of its recommendations with all possible despatch.

Two Parliamentary replies made last week by the Secretary of State for India appear to furnish some support for the view occasionally put forward that Mr. Montagu is gifted with a double personality, a courageous statesman jostling a stubborn bureaucrat. In one case he was pressed to interfere with the discretion of the Governor of Bombay regarding the return of an individual who had been deported, and his reply was quite uncompromising: the matter was one for the Governor's decision, and that decision, whatever it might be, would be accepted by him. In that answer we seem to hear the voice of the courageous statesman who in the Joint Report insisted on the need for strengthening the hands of the authorities in India, and curtailing the practice of interference at this end of the cable. A Secretary of State may, indeed, secure the recall of a Governor whom he is unable to trust, but so long as a Governor retains his confidence, he is not to be tempted into usurping that Governor's functions.

In the other case, Mr. Montagu admitted that he had help up the Government of India's proposals for the European Defence Force because, as he said, he is opposed to the institution of compulsory military service in peace time. Surely that is the voice of impenitent bureaucracy. The authorities in India consider the maintenance of the force to be necessary, and they have worked out a scheme which has been accepted by the great bulk of representatives of the community immediately affected; but considered Indian opinion must give way to the principles or prejudices of the individual who happens to be in authority in Whitehall. We are not, of course, arguing that the decisions taken at Delhi or Bombay are necessarily infallible, but only that Mr. Montagu is able to speak with two different voices in the space of half-an-hour, a fact which may be read as throwing light on some of the less comprehensible happenings in India during the last few years.

It is satisfactory to see from an advertisement published last week that the authorities are at last taking steps to fill the depleted ranks of the Indian Agricultural Service, that small body of experts who have to lead the way in the economic development of the country. It is not going too far to say that no branch of the Indian Administration has suffered more grievously from the war. The Agricultural Depart-

Digitized by Google

ment was constituted in 1905 as a skeleton force, and the terms offered were even then barely sufficient to secure the absurdly small staff sanctioned at the outset. Ten years of silent solid work followed, and by 1914 it had become plain that, given men and money, the problems of development would be solved. Then came the war: chemists, botanists, and agriculturists were quick to answer the call, and since 1915 the Department has barely been in a position to cope with its daily work. India is, in consequence, already six years behind, and the arrear is increasing month by month. The immediate need is for men, and we trust that the terms now offered, approximately the same as those recommended by the Public Services Commission, will prove sufficient to attract suitable recruits.

Whether the forty-eight appointments now offered will meet even immediate needs is a question to which we cannot give a confident answer. At the moment a good many posts are, we understand, actually vacant; almost every province is asking for a larger staff; the Cotton Committee recently urged the appointment of thirty men to deal with that crop alone; and it can hardly be doubted that the Sugar Committee, which is still sitting, will press for a large further addition. The work to be done in India involves a certain period of preliminary training, and we confess we should have preferred to see a hundred experts instead of forty-eight sent out this year, provided that so many could be found. The supply is, however, doubtful, and perhaps Mr. Montagu's advisers have limited the number to what they can reasonably hope to obtain. In that case the public can acquiesce in their proposals as an instalment, but speaking for ourselves, we shall not be satisfied until we know that the Department has accumulated an adequate reserve.

THE WEEK AT HOME.

The Liberal Split.

The Liberal congress at Leamington completed the work begun at the Scottish Liberal Federation at Glasgow the week before. The Independent Liberals have long talked of the need of "purifying" their ranks, which in practice meant the elimination of the Coalition Liberals from the party, and they have now carried out their aim with much professed satisfaction. But both the method and the time of what the world is bidden to look upon as a triumph of political principle leave one very doubtful as to the wisdom of the step. At the very moment when the Coalitionists were being excommunicated at Glasgow they were winning an election at Edinburgh; on the day on which they were laid under an interdict at Leamington the Coalition Liberal, Sir Hamar Greenwood, won his seat at Sunderland by over ten thousand votes, while the Independent Liberal candidate forfeited his deposit owing to the smallness of his poll.

In these circumstances, nobody among the Coalition Liberals will be a penny the worse; they will have to work rather more closely with the Unionists than before in the constituencies, and that is all. But the old Liberalism is irretrievably split, for it is not so much the going of the Coalition Liberals as the order of their going that has made for bad feeling. The Independent Liberals at Leamington were obviously determined to eject them; they refused a hearing to the Coalition speakers, howled them down and insulted them, and finally the latter lost patience and left the Congress-room disgusted, as well they might be, at the manners of those who had once been their colleagues.

Independent Liberalism, the dregs and ullage of a once glorious party, has become soured, intolerant, and reckless of consequences. It cannot win a by-election; its leaders are becoming forgotten, and its small rank-and-file are unknown. Mr. Asquith is as ineffective in the House as Mr. Runciman out of it, and Sir John Simon is immersed in the law; their thin vituperations of their former associates move no emotions and rouse no passions. Of constructive policy they show no sign; their tactics are purely destructive. Liberalism outside the Coalition is dead as a fighting force for the next ten years at least, as the result of this week's work, and it will not revive in its present mood. Nobody ever yet won the public suffrage on the ground of bad temper, and it is bad temper pure and simple that has accounted for recent tactics, however it may be cloaked under the semblance of virtue and political purity.

The Autumn Session.

The Government are now hopeful of avoiding an autumn session, and few voices have been raised in favour of one, outside the political journalists who are lost when Parliament is closed. All the Ministers want a rest, and Mr. Lloyd George is particularly in need of relaxation. In office continuously since the end of 1905, he has not had more than a few days at a time since the opening of the war, and the strain has been almost greater since the Armistice than before. If Parliament rises in the middle of August, he will probably go for a sea trip for a month or six weeks for a thorough rest—if he can find a quiet part of the world to go to. The cynic who suggested a holiday trip to the Levant for the Prime Minister is not likely to find his suggestion adopted.

Home Rule.

The Home Rule Bill was postponed a few days on account of the illness of Mr. Walter Long, but little time will in fact be lost. There will be practically no opposition. The half-dozen Irish Nationalists in the House have washed their hands of the Bill. The Independent Liberals, pursuing their usual policy of hiding their heads in the sand, have decided to take no part in the debate after the first day or so; and Labour seems likely to follow the lead of its late master.

It is curious how politicians of all schools seem to be bitten from time to time with the idea that this kind of "masterly inactivity" impresses the country. I have seen leaders of all parties solemnly refuse to touch a measure, and after a rhetorical denunciation of the Government of the day, walk out of the House with all the dignity at their command, followed by the rest of their political party. (Mr. Bonar Law was, I think, the last who did this, in the early weeks of the war.) One is always told that the scene is extraordinarily impressive—personally, I have never found it so—and that it will echo through the land as no mere argument could do. But it never does. Nobody ever takes the least notice of politicians on strike except politicians not on strike, and these know the trick too well to attach the least importance to it.

The Budget and Profits.

Mr. Austen Chamberlain has not only had his way—that was anticipated—but very much the best of the argument with the business men over the excess profits; and that, to put it quite frankly, was not anticipated. The Chancellor of the Exchequer is one of our most interesting studies in political evolution, and I wonder that our contemporary character-sketchers like Mr. E. T. Raymond do not devote more attention to him. Twenty years ago he was the mediocre son of a brilliant father, and as a loyal Unionist remarked: "We all say nice things about Austen because we all love Joe." Then came the days of the father's eclipse, his long illness, patiently borne, at Birmingham, and his death just before the war. By all the rules the son ought to have been at least partially eclipsed, if he were but the pale shadow of his father, but he has gone ahead amazingly since then. He is not a good speaker—he always impresses me as dull—but he has character; and if one may parody Tennyson's remark that Browning had poetry in him but couldn't get it out, Mr. Austen Chamberlain appears to have politics in him but he cannot get it out. But he is beginning to leave on one—and particularly on those who disagree with him—the image of a heavy full-back at football, the sort of person who doesn't seem to count for very much until you try to score a goal at his expense, when you suddenly find yourself on your back and the ball in his possession.

Digitized by Google

The City Churches.

The Church of England made a special appeal last Sunday for funds to assist its hard-pressed priests, and the Diocese of London has this week taken a practical step towards improving the financial position. It has recommended the demolition of nineteen of the City churches, the sale of the enormously valuable sites on which they stand, and the reduction of the number of livings so that the stipends can be applied elsewhere. The report seems entirely reasonable, but it has roused a big outcry from all the people who talk about "vandalism" and the protection of ancient buildings. One of the ancient buildings is St. Dunstan's, in Fleet Street, which was built in 1832, the very worst period of English Church architecture; other of the condemned churches are little more than barns, whose demolition would be as little loss to architecture as to religion. Hardly anybody ever uses these churches, and a reduction in the number would still leave a large amount of vacant pew-space to be divided among the caretakers and charwomen who are the resident population of the City, and the proceeds would help very considerably in the building of new churches in the suburbs, where they are much needed.

The Lambeth Conference.

The sixth Lambeth Conference assembles in July. At the first meeting in 1867 there were seventy-six bishops present, but for the present Conference there have already been 279 acceptances. Nothing could show more clearly the way in which the Church of England is going ahead overseas than this enlargement of its episcopate. Many of the bishops who arrive for these conferences are very different from the ordinary type of English bishop, who has to administer a relatively small and thinly populated area; some of the Australian bishops, for example, spend more time on horseback than in the pulpit, and cover thousands of miles in a year. It is a strenuous life, and I should imagine that in the evening of their years many of these good men must long for the peace and quiet of some of the English cathedral cities, "where it seems always afternoon"—and Sunday afternoon at that.

British Tobacco.

Inadvertently I did English tobacco an injustice the other day in commenting on the position of the industry in this country. The directors of the Home-Grown Tobacco Company have forwarded me a very interesting pamphlet describing the past efforts to establish the industry in the years immediately before the war and the present position. The company has resumed operations, which were necessarily suspended during the war, this year on a small estate in Norfolk, but it is their intention considerably to extend the present venture as soon as success justifies an enlargement. The object is to grow a light tobacco suitable for blending with the heavier pipe and cigarette tobaccos imported from abroad; and experience has shown that tobacco in this country should be grown as far as possible in the Eastern Counties, where the soil is light and sandy, but from the very informative booklet which I have read with interest there seems no reason why the industry should not eventually be placed on a firm footing. I have smoked most of the tobaccos produced on this planet, and I hope the day will come when the Home-Grown Tobacco Company will inform me that I can buy a pound of the best Norfolk at the stores.

The Eastern Counties generally seem to be flourishing. I read in the papers that a meeting of farmers and landowners was held at Colchester last week, at which it was decided to raise several thousands of pounds to develop the flax industry in Essex. One gathers that at present prices this should prove profitable to the producers. It will certainly be a source of further strength to the country, and help to increase the rural population.

Prices and Production.

There has been even more discussion than usual on the question of prices on account of an enterprising daily paper having reported the opinion which was expressed at a certain business conference to the effect that prices had begun to fall. Whether the fall is anything more than the usual annual reduction which occurs about May as a result of supplies coming forward, and is cancelled in the late autumn by the automatic process of supplies shrinking, remains to be seen.

It is suggested that some, at least, of the public are beginning to revolt against high prices in the only effectual way—by refraining from purchasing, and some of the produce merchants in Mincing Lane and Mark Lane are understood to have expressed the view that a general shake-out of prices and values could not be delayed much longer. But the good effect of a reduced price of tea and coffee and tinned fish will be more than offset by the further increase which is forehold in bread and sugar, and the additional 14s. 2d. on domestic coal. This last increase, which is directly due to the miners' insistence on a still further advance of wages, will certainly provoke bitter criticism from the consumer, who, in this matter, at least, cannot very well reduce his consumption.

The Week's Books.

The growing demand for serious books since the war, on which I have commented before, seems to be reflected in two which have reached me this week. One on "Divine Personality and Human Life" (George Allen), by Mr. Clement Webb, forms the Gifford Lectures for 1918 and 1919, and it constitutes a notable contribution to modern philosophical thought, which is less concerned to define than to inquire. Mr. Webb's book is the latest volume in the celebrated "Library of Philosophy" which contains Mr. Bertrand Russell's well-known "Introduction to Mathematics"—his mathematics are more trustworthy than his politics—and Mr. Bradley's classic "Appearance and Reality," of which it has been said that the more you read it the less are you sure what is real and what is only apparent.

The second work of this character which has been issued is "Science and Theology" (Blackie), by Mr. F. W. Westaway. The author's summary of the present position of science appears to be excellent, so far as I have examined it; his theology strikes me as a little amateurish and inadequate, but he promises another book on that part of the subject in due course. As it stands, however, these chapters should furnish a convenient introduction to those who want to know the position at the moment in physics, chemistry, and other scientific matters.

By contrast, the week's novels include "Passion," by Shaw Desmond, a tale in which the characters live and move. Mr. Desmond has created real people in a real world, and the story should be popular. "Hands Off," by Beulah Marie Dix (Nash) is an American novel of adventure which is full of excitement; and "An Adopted Husband" (Hutchinson) is a translation of the Japanese classic by Futabatei. Japanese literature is hardly known in this country, and it will be interesting to see whether its descriptions of very different forms of social life will find many readers.

A biographical work of some interest has just been published in "Mary Russell Mitford and Her Surroundings" (John Lane), by Miss Constance Hill, who has already written similar lives of Jane Austen and Fanny Burney. I am afraid that Miss Mitford is less remembered than Jane Austen, who still has her admirers—although few would agree with Macaulay's estimate that she was worth all Dickens and Pliny put together—but there is a great deal to be said for these inclusive biographies, which revive interest in authors whom a hasty public and a succession of new books tend rather to crowd out of their proper place.

EMIR OF HAIL MURDERED.

News has reached London, says a Reuter's message, of the murder of Ibn Rashid, Emir of Hail, one of the two principal rulers of Central Arabia. He was in alliance with the Turks during the war, and Ibn Saud, the Wahabi Emir, was engaged in hostilities with him on behalf of the Allies. The family of Ibn Rashid has been decimated by murder for several generations, and the line is now probably extinct except possibly for an infant son. It is stated that the murder was the outcome of a tribal affair, and has no political significance. Ibn Rashid and Ibn Saud were on good terms at the time of the murder.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, April 19.

The Succession to the Sultanate.

On Friday last Field-Marshal Lord Allenby had a special interview at Abdin Palace with the Sultan, to whom he announced that H.B.M.'s Government had decided to recognise Prince Farouk, the son who was born to his Highness on February 11 last, as the lawful heir to the Sultanate of Egypt. The letter by which ths important announcement was communicated to his Highness ran as follows:—

The recent happy occasion of the birth of a son to Your Highness has caused His Majesty's Government to consider the order of succession to the Sultanate of Egypt.

I have accordingly been commanded by His Majesty to inform Your Highness of the recognition of Your Highness's son Prince Farouk and his male descendants in the male line in order of primogeniture, or in default thereof such other sons as may be born to Your Highness and their male descendants in the male line in order of primogeniture as Your Highness's heirs by whom the dignities of the Sultanate of Egypt shall lawfully be held.

In congratulating Your Highnesss on this auspicious occasion I avail myself of the opportunity of expressing my sincere conviction that the maintenance of the cordial relations essential to the interests of Great Britain and Egypt will ever be the aim of Your Highness's successors.

This document, which is of more than passing interest, goes to complete the series of historic documents concerning this country which the war has produced, starting with the letter to Prince Hussein Kamil, dated December 19, 1914, announcing the deposition of the Khedive and the appointment of his Highness as Sultan of Egypt, and ending with that of October 9, 1917, addressed to Sultan Fuad, informing him that he had been nominated in succession to his brother, Hussein, who had just died. The first-named document provided that the succession should remain in the family of Mohammed Ali in an order to be determined later on; the second laid down that it should vest in the heirs of Sultan Fuad in an order to be determined; and the document now executed definitely fixes the order in which that succession shall follow. Thus the descendants of the ex-Khedive Tewfik, the eldest son of Ismail Pasha, the father of the late and present Sultans, are definitely excluded from the succession so long as Prince Farouk lives and any other son is born to Sultan Fuad.

This decision of the British Government has had a threefold effect. It has given the death knell to the hopes of the Khedivialist party, which is very strong in Egypt, and had been working hard for the nomination of Prince Abdel Monem, the eldest and only surviving son of the ex-Khedive. It has materially strengthened the position of Sultan Fuad, against whom there has been a persistent campaign in this country, since it has shown that the British Government supports him, and in that it may be regarded as a snub to the other Princes of his family, who recently made a dramatic entry into the arena, ostensibly as the champions of the Egyptian independence cause, but really in order to gratify their enmity of the present Sultan and give an impetus to the movement against him. Finally, it has given an effective hint to the political agitators that Great Britain does not intend to abdicate one iota of her political position in Egypt.

The Political Situation.

As stated in last week's letter, H.E. Adly Yeghen Pasha left Egypt for France last Saturday by the same boat as M. Clemenceau. The ex-Minister for Education had a tremendous send-off from Cairo, where several of the Ministers, ex-Ministers, and members of the Zaghlul Delegation were amongst those who bade him farewell at the station; he was enthusiastically cheered when his train passed through Tantah; and there was another great demonstration on the Quay before the Sphinx left Alexandria. Officially, Adly Pasha is proceeding to Europe in order to take the waters as he used to do in pre-war days, but it is no secret that he received a telegram from Zaghlul Pasha asking him if possible to hasten his departure, and that in conference with the latter in Paris he will endeavour to find a formula which will enable the Egyptian political leaders to enter upon a discussion with the British Government before the Milner Mission presents its report.

It is indeed a tribute to the high esteem in which Adly Yeghen Pasha is held by all parties in this country that, although the hope underlying his visit is generally known, even those who have set their faces dead against any *rapprochement* with the British Government before the "national" claims of the country have been granted have in this case refrained from their usual practice of calumniating those who do not endorse in every respect the extremist doctrines which they propound. At the same time this may be regarded as a straw showing which way the wind is inclining, and indicating that a gradual change is coming over the general attitude on the political question.

CAIRO, April 26.

The Sultan's Heir.

A warm exchange of telegrams has taken place between the King and Sultan Fuad on the occasion of the recognition of Prince Farouk as the heir to the Sultanate of Egypt, which was reported in my last letter. Sultan Fuad, in his telegram of thanks, said: "I avail myself of this opportunity to assure your Majesty that the maintenance of cordial relations required by the interests of Great Britain and Egypt will always be the object of my interest, and I believe that I can always rely on your Majesty's valuable support and kind friendship." The King replied: "I have read with much pleasure your Highness's wire, and I can assure you of my interest in and support of all that concerns the prosperity of Egypt, as well as of my personal wishes for the comfort and happiness of your Highness and your dynasty." Several delegations have this week come up to Cairo from Alexandria and the Provinces in order to congratulate his Highness.

The Emir Abdullah.

This afternoon the Emir Abdullah, the eldest son of the King of the Hejaz, arrived in Cairo, accompanied by Colonel Charles Vickery, C.M.G., the British Agent at Jeddah. A guard of honour provided by the Middlesex Regiment was drawn up at the station, where the Emir was received by the Hon. T. Scott, Councillor to the Residency, representing the High Commissioner, and Said Zulfikar Pasha, Grand Chamberlain, representing the Sultan. The Emir, who has come to Cairo in order to return the visit which Lord Allenby recently paid to his father at Jeddah, is the guest of the British Government, and is staying with his suite at Shepheard's Hotel. Lord Allenby paid him an official visit a short time after his arrival.

Cotton Research in Egypt.

The First Progress Report of the Cotton Research Board, which has just been published, is welcome as an indication that the serious problems in connection with cotton growing in Egypt are at last receiving close attention. Not that one would wish to infer from this that they have not received attention in the past; far from that, much money and time have been expended by the Egyptian Government in the appointment of Commissions and the engagement of staff to study and deal with particular aspects of the question. Hitherto the research work has, however, been conducted more or less in water-tight compartments, and, as the Report points out, "past experience has shown the disadvantages attaching to the investigation of cotton problems from the point of view of any one branch of science, however eminent the investigator and whatever the range of his experience in his own particular subject."

The Board, which was formed in May, 1919, has been constituted to bring together experienced workers in those branches of science which are intimately connected with agriculture (botany, entomology, chemistry, and physics), and so form a body whose duty would be to

Digitized by Google

initiate and direct scientific research into all matters connected with the cultivation of the cotton plant. In other words, after having proved by experience the disadvantages of conducting research by means of independent scientists each of whom ploughs his lonely furrow, intent on his own branch, and paying little or no attention to what fellow scientists in other branches are doing side by side with him, the Egyptian Government has decided to initiate what one might by contrast call a "Team" system, under which the experts in each branch will work in close co-operation so as to complement wherever possible the particular line of research which each of their colleagues is conducting.

We all know how for example the success of a football fifteen depends not only on the individual progress of the players but also on their "combination" and on the ability of the captain to make this combination as perfect as possible. The same thing would apply to a body such as the Cotton Research Board, the success of which will depend on the "team" work of the members and on the manner in which the chairman co-ordinates their activities and gets the best out of them individually and collectively.

The report, after outlining the experiments which are being carried out and the programme which it has laid down, says that "the advantage of having experiments inaugurated and controlled by the board and carried out by experts in close co-operation is already evident." If, therefore, the members, who are all experts in their own particular line, show that *esprit de corps* which characterises Englishmen working as a body, be it for their school, their college, their battalion or their side, there is every reason to anticipate that success will speedily crown their united efforts. Certainly everyone who is interested in the future of cotton cultivation in Egypt will subscribe to the board's remark that "lost opportunities cannot be retrieved at once," and will be prepared to accord to it the time "thoroughly to study the situation and to initiate and carry through new work," and the confidence for which it asks.

YUGOSLAVIA.

BELGRADE, April 24.

Belgrade and the Fiume Question.

Citizens of Belgrade have had plenty of subjects for conversation during the past week. The first item of interest was the public meeting, convened by the Mayor, last Sunday, to protest against the anticipated injustice in connection with the Fiume question. Large meetings had already been reported from the provinces, the most enthusiastic and impressive being at Zagreb, where, according to accounts, a crowd some 25,000 strong, marched through the streets, paraded in front of Army H.Q. and the Ban's Palace, and made patriotic speeches. The meeting at Belgrade was very largely attended by an orderly crowd, chiefly of better-class people, and a number of good speeches were made, and received with enthusiasm. Finally, six resolutions were passed, as follow:—First, the gathering insisted on the right of self-determination for all nations, great and small alike; secondly, it protested against the secret Treaty of London, which places over 400,000 Slavs under the sovereignty of Italy against their will: it protested against the rumoured separation of Rijeka (Fiume) from Yugoslavia, to which the Yugoslavs could never consent; fourthly, it expected the Government of the S.H.S. to exert all its energy to prevent this separation; fifthly, it appealed to the democracy of Italy to stop the Imperialistic policy of their rulers, which clashes with her own splendid traditions, and to put a stop to the present threatening position, which may well be fatal to that Yugoslav-Italian friendship which is so essential to the peoples of the Adriatic; and, sixthly, it expressed the hope that both States would take all possible steps to develop friendly relations—such as, for instance, the freedom of the Adriatic Sea and both coasts, the mutual protection of minorities unavoidably included within the other's territories, and the drawing of a reasonable frontier line between Italy and Yugoslavia, so that it would be possible for the two neighbouring races to live on friendly terms.

The meeting was impressive, the speeches were patriotic and determined, without being chauvinistic or aggressive; there was no sign of hostility to Italy, but every desire to maintain friendly and neighbourly relations. At the same time there was a spirit of absolute determination to insist upon their just claims. One speaker said that if compelled by force of circumstances to accept an unjust decision now, they would know how to wait patiently for justice, which they would attain sooner or later, just as they won their freedom from the Turks and from the Hapsburgs.

Government Matters.

Early in the week it was announced that the Government had resigned, but this was afterwards corrected. It appears that what actually happened was that M. Protitch submitted a memorandum to the Crown, to the effect that he could no longer carry on the government of the country without a quorum in the Skupshtina, suggesting a coalition, rather than a neutral Cabinet, which would have to deal with the vitally pressing problems of the Rijeka (Fiume) settlement, the Peace Treaty, the moratorium, and the elections for the Constitutent Assembly. Conversations are proceeding, and it is generally anticipated that before long the Radical-cum-Narodny Club *bloc* will yield more or less gracefully to a coalition Cabinet.

The Belgrade Press.

Belgrade has been without newspapers for the best part of the week as the result of a dispute between masters and men. The latter suddenly made certain demands to which the masters retorted by a lock-out. They then created a precedent for the country, in following the example of Paris, and bringing out the *Belgrade Press*—that is, a single sheet, where each paper has a certain space allotted to it; consequently we have the amusing circumstance of finding a heading like this:—*Pravda*.—"62nd Day of the Usurping and Bloody Rule of M. Protitch" (how they love each other!), and immediately beneath it, in the same column, the leader of the *Samouprava*, which is the Radical organ. But the Labour organ had the time of its life, when for some days it was the only paper appearing, and for the sake of its few telegrams was eagerly bought up by the public of all parties.

The Subotitsa Incident.

A quite sensational affair occurred at Subotitsa, marked on our old maps as Szabadka, near the Hungarian demarcation line. In this prosperous little market town there is a very mixed population, where Magyars, Germans, and Jews combined easily outnumber the Serbs. Magyar national propaganda is active all along the northern parts of Yugoslavia, and a few days ago the fires that have been smouldering some time burst into flame at Subotitsa. A crowd, chiefly of Hungarians, armed with moderns weapons—bombs and machine guns, it is reported—attacked the Serbian police authorities and murdered three police commissaries and a gendarme. It is now believed that more perished. A battalion of Serbian infantry came to the rescue and very quickly restored order. Apparently there were numerous casualties, including over twenty gendarmes, one officer, and several N.C.O.'s, and some regular troops. The ringleaders were arrested and court-martialled at once. The leader of the Belgrade Labour Party, Zhivko Topalovitch, was arrested among them, but was released by the authorities on his satisfying them that the object of his presence there was to calm the strikers, and prevent any Serbian hotheads from playing the Magyar game; for the Labour Party here are Serbs first and Socialists afterwards. The Magyars had proclaimed a Soviet Republic, in order to mask their national movement under the guise of Bolshevism.

All this is disquieting, as it shows that the Magyar majority will be an indigestible morsel for the Serbs. They have full political liberties; for the Serbs are very easy-going and tolerant; indeed, too much so. The vast majority of railway officials in the Banat, Rachka, and elsewhere across the river are the original men con-

Digitized by Google

firmed in the posts, and great numbers of them are pure Magyars, speaking neither Serb nor German, which often makes travelling inconvenient. Magyar officials are quite numerous, and the use of their own language is not interfered with. But they resent their inclusion in Serbia, and many who refuse to take the oath are leaving the country. This is the best solution, for Serbia wants no unwilling subjects. The Magyars have many engaging qualities, but have been the enemies of the Serbs for many centuries, and their association is practically impossible, unless the Magyar will accept the situation, stop political intrigue, and carry on his business in peace. But he resents his lost supremacy.

Perhaps the most disquieting part about the whole business was revealed by the Press Bureau, which called attention to an article in *Il Messagero*, published in Italy, describing the "Revolution in Yugoslavia," and the proclamation of a Soviet Republic on the morning before the incident took place. This is proof enough that the whole business was carefully planned, and was known in Italy in advance, and the irresistible conclusion is that Italy was not only cognisant of the plot, but assisted in it. And this at the moment when Belgrade publicists were making speeches inviting the friendship of the Italian people!

The Railway Strike.

Then we have had the railway strike. This began as a purely economic question, on the grounds that the Radical Government suddenly cancelled the arrangement made with the men by the Democrats; but it quickly assumed a political aspect, as the discontented parties across the river made capital of it. There were a few cases of sabotage reported in Bosnia and Croatia. The Government restored order by calling up for two months' training two classes of railwaymen liable for military service. As one-third of those in Serbia declined to strike and supported the authorities, the strike quickly languished. For a few days we were almost without a train, then a partial service was effected. Now the strike has collapsed and almost all the men have voluntarily returned to duty. It is expected that the full normal service will be resumed in two or three days. Foreign visitors were hit by the stopping of the Orient Express, for a party of British travellers were detained several days at Vinkovtse, the junction for the Bucharest branch. Two coaches left on the 22nd and the 23rd, on a military train, but there are now none left, so that no one can leave till the next Orient Express comes in.

For two days there was a general strike in Belgrade to show solidarity with the railwaymen, but the boat, waterworks, postal and telephone services were not affected. In other branches many men refused to stop work.

BULGARIA.

SOFIA, April 17.

Opening of the Chamber.

The first extraordinary session of the Nineteenth Ordinary National Assembly was opened on Thursday (April 15) by M. Stamboliski, the Prime Minister, who was authorised by the King to read his Royal Message to the new Parliament. This Message, or Speech from the Throne, made reference to the grave situation in which the country finds itself to-day, and urged the national representatives to continue with even greater energy and boldness the vitally necessary work of reconstruction and pacification of the country, which, supported by the sobriety and commonsense of the hard-working Bulgarian people, is following the path leading to its salvation. Anarchy and disorganisation are rapidly disappearing; the danger threatening so many of the smaller States has been removed; and the country has started on the road of peaceful cultural and economic development that will lead it to a brighter future. The message concluded with the statement that the nation had entrusted its fate to its chosen sons, and the hope that they will justify its confidence; and no reference was made in it to the legislation that will occupy the attention of the Chamber.

The sitting began with a religious service conducted by the Bishop of Sofia and his assistant clergy, after which the deputies took the oath. Before the reading of the Royal Message the Communists demonstratively left the hall amidst marks of disapproval on the part of the Agrarians, who advised them that their proper place was a lunatic asylum.

Election of Officials.

The Prime Minister proposed that the Chamber should proceed to the election of a president and two vice-presidents, and requested the senior deputy to take the chair and preside over the election. M. Ivan E. Gueshoff, leader of the Narodniaks, being the senior member, accepted the invitation, and appealing warmly to the deputies for union and co-operation asked them to give their votes in writing. In the result it was announced that M. Alex. Boteff was elected President and MM. Constantin Thomoff and Christo Manoloff Vice-Presidents. All three of these gentlemen belong to the Agrarian group. The new President, after taking the chair, thanked the Assembly on behalf of himself and his colleagues for the confidence bestowed on them, and promised that the sittings should be conducted with absolute impartiality. The Chamber afterwards adjourned to the 19th inst.

Reconstruction of Cabinet.

A Royal Decree was published to-day, accepting the resignation of Dr. Daneff, Minister of Finance, and of MM. Michael Madjaroff, Minister for Foreign Affairs, and M. Athanase Bouroff, Minister of Commerce and Labour. The Decree charged M. Stamboliski with the conduct of the Ministry of Foreign Affairs, Dr. Raiko Dascaloff (Minister of Agriculture), with the Ministry of Finance, and M. Nedelko Athanasoff, Minister of Public Works, with that of Commerce and Labour, until the appointment of special Ministers. A special committee has been appointed by the Agrarian League to negotiate with the Parliamentary groups of the Democrats, Narodniaks, Progressists, and Radicals regarding their participation in the government of the country.

Agrarians and Communists.

At the opening of the Chamber, the Communist deputies did not take the oath before their respective clergy, as all the other deputies did; but only signed their names under the formal declaration of the oath. This proceeding is regarded by the Agrarian Parliamentary group as insufficient; and the Agrarians will formally demand in the Chamber that they shall take the religious oath, in accordance with the provisions of the Constitution. Should the Communists refuse to do this, they will be regarded as "unbelievers" and will be debarred from attending the sittings of the Chamber, and will forfeit their mandates as deputies.

ASIA MINOR.

SMYRNA, March 19.

This week the Greek Government has mobilised the Hellenic subjects in the Aidin Vilayet between the ages of twenty and twenty-six, and already some 12,000 men have been shipped off to Mitylene and Chios for training. For the present only those Hellenic subjects of the Orthodox and Catholic religion are recruited; Hellenic subjects of other religions as well as Ottoman Greeks (*rayahs*) are not yet recruited. The withdrawal of so many workers makes the labour question in Smyrna still more acute, and is undoubtedly another nail in the coffin which some people prophesy is slowly but surely being prepared for Smyrna trade and industries.

Since the beginning of the year the mail service to Smyrna is worse than it has ever been. This week letters posted in London on February 5 have been delivered in Smyrna. Some of the mail bags for Smyrna have been sent to Athens, and bags for those towns sent to Smyrna. The bags sent to Athens are eventually delivered to the Smyrna Greek authorities, who take a week or two to make up their minds to deliver them to the British Post Office.

SYRIA.

BEYROUT, April 17.

The High Commissioner.

Before leaving Deir El Qamar the High Commissioner visited the small French graveyard to perform the pious act of laying a wreath on the tomb of the glorious dead of 1860. The Maronite Bishop held a short commemorative service to which the tricolours lent a very impressive character. The distinguished Commander-in-Chief was touched by the reverent thought which prompted the municipality of Deir El Qamar, the Curate of Beit Eddine, and the French School of the latter village, as well as the Druses of Baaqleen—a fact of singular significance—to send each a large wreath.

At Beit Eddine a Druse orator, after referring to the traditional friendship between England and the Druses, expressed regret that it should have been so interpreted as to imply an anti-French feeling. He paid the Haut Commissaire the compliment of having won, by his wise administration and justice, his goodness and clemency, the hearts of the Druses, and he ended by paying a tribute to France, and urging his compatriots to let themselves be guided by this tender foster-mother.

After the reading of another address by another Druse notable the Commander-in-Chief made a suitable reply.

At the conclusion of his speech he announced the pardon of some Druses who had recently been condemned, and stated that Baaqleen was to become henceforth the seat of the Kaimakam of the Chouf—news that caused great joy among the crowd of listeners.

MALTA.

VALETTA, April 27.

Rhodes Scholarship.

Malta, speaking generally, has always been a loyal colony, but nevertheless has been denied many privileges attendant on her Empire membership. There has been no little indignant discussion of late locally anent the refusal of Maltese as emigrants to her sister colonies. Hence the visit of Mr. Dawson, a distinguished member of the Victorian League, in connection with the establishing of a Rhodes Scholarship for Malta comes opportunely and is doubly refreshing. A number of visits to the various educational institutions by the distinguished representative cannot but do good, and it is hoped that the matter of the scholarship will work out for the good of the island. Let us hope that there will not be the usual "buts" raised, as is so common an occurrence in countries suffering from insularity.

Lord Lytton's Visit.

Lord Lytton, First Civil Lord of the Admiralty, has paid a visit to Malta to inquire into the organisation of His Majesty's Dockyard. His visit is timely, as many of the most highly skilled dockyard labourers are emigrating, being dissatisfied with the general local conditions, and there are ominous signs of unrest and discontent. Prices are going up and the quality of the staple food—bread—is going down.

Russian Refugees.

There are still a fairly large number of Russian refugees with us, and although they cannot be classed as poor refugees their protracted and enforced presence here has taxed their resources greatly. There have been many local charitable efforts made on their behalf, and the latest has been a grand Russian fête, café chantant, exhibition, and sale of Russian works of art—the work resulting from their enforced confinement here. The exhibition appears to have proved a great success, despite the many calls on the purse of Malta, and it was held under very distinguished patronage, being opened by Lady Plumer.

Scarcity.

Useful and necessary commodities have since the beginning of the war come into the island in an erratic manner. At present matches are a great rarity, but on the information of the Control Board we are to receive 300 cases by the 10th.

Gas Charges.

The Gas Company (an outside company) has just notified the public that gas is to be 13s. 8d. per thousand cubic feet! We should think this is almost a record. Increased cost of production is put down as the cause. The public are finding a remedy in the installation of electric light, which is a Government concern.

Navy and Army Canteen Board.

There can be no doubt that local traders have been hit very hard by the establishment of the Navy and Army Canteen Board in the island. Grumblings have been very rife in the past, and they have just culminated in an interview between the Governor and a representative body of those aggrieved. The Chamber of Commerce was represented, and 500 merchants also. Dr. Bartolo acted as spokesman for the signatories, and he did his work well, making out a strong case, backed by correct defence. That the Navy and Canteen Board has been constituted a monopoly was proved up to the hilt, and its detrimental effect on local dealings was clearly established. The Governor, being placed in a dual position, had a difficult brief, for he had to be both a soldier and a governor. Specific instances on both sides were advanced. His Excellency was not in a position to give a definite reply until the Naval and Military authorities had been consulted; but later it was stated that a copy of the memorial had been sent to the Secretary of State for the Colonies. Contractors and merchants can only wait in patience, but there is no doubt that what will be done locally will depend upon the attitude taken by the Home authorities.

CYPRUS.

NICOSIA, April 10.

The Question of Salaries.

A considerable number of officials are anxious to take leave, while others are retiring; but the difficulty of obtaining passages is as great as ever, and to this are added the risk and expense of delays in Egypt. The question of an increase of salary for all officials, and for pensioners, presses for consideration, and, it is hoped, will be speedily settled. The papers point out that £100 in Cyprus is now only worth £30 in pre-war value. Municipal employees throughout the island, and many others, for whom no provision exists, are naturally now calling for the attention which their circumstances demand. The position of village schoolmasters again is engaging attention. They cannot be expected to live on their present miserably poor pay, and unless their condition is improved this year many of them will have to seek other work: and many schools will be either without masters or carried on under incompetent teachers.

The Greek Deputation.

The Greek members of the Legislative Council, who are again leaving to join the London deputation, are Mr. N. Paschalis, Ph. Zannétos, and N. Lanitis. They hope to proceed via Athens, Brindisi, Venice, Trieste, and Paris. The Archbishop, while spending some days at Alexandria, exchanged visits with the clergy and the leading members of the Greek community, including those of the "Cypriot Brotherhood."

Easter Celebrations.

The Easter season is always the principal time of festivity and rejoicing for the Greek community, which would be glad this year if dates fixed for national celebrations could coincide with those observed in Greece in honour of Hellenic territorial acquisitions and the political triumphs of M. Venizelos. Greeks are also reminded by the Press that next year will bring the hundredth anniversary of the Greek Revolution, which brought constitutional freedom to Hellas. It began in April, 1821, though it was not till 1830 that it was arranged that Greece should become an independent State. In 1833 the first King, Otho (second son of the King of Bavaria), began his reign.

Emigrants to America.

Misfortune and disappointment haye attended a number of Cypriots who, in spite of warnings, went to the United States in hope of making a good living there. About eighty have just found their way back, after considerable difficulty and some very disagreeable experiences. They were refused a landing, some on account of health, others owing to being penniless, or illiterate. They have in most cases only themselves to blame, as they have had repeated warnings both by friends and by the local press. The *Phoné tes Kypron* ("Voice of Cyprus"), in particular, has not ceased to caution would-be emigrants to America not to run any risks without positive assurance from relations or from a reliable source that they will find suitable employment on arrival. Young Cypriots who are physically fit can find work in the island, or should try countries nearer home. The glamour of the dollar, and visions based on the good fortune of some who have really done well in the States, are still a powerful incentive; but their last example should be a sufficient warning to all who are not fully qualified as acceptable citizens for the Republic. One cannot, however, but feel sorry for these unfortunate islanders who have brought such troubles upon themselves.

MOROCCO.

TANGIER, April 24.

Visitors.

Visitors continue to arrive in Tangier in considerable numbers. Since my last letter, the following have arrived: The Marquès de Najera, the Dowager-Marchioness de la Pasture and the Marquesa del Castillo, General Creenly, Lt.-Col.

Digitized by Google

Curtis, Captain Schreiber, Commander Good, R.N., Lady Evelyn Cobbold, Col. and Mrs. M. P. Adams, Messrs. Charles Tower, Dickinson, Robotham, Brig.-Gen. Rudkin, C.M.G., D.S.O., Mr. F. F. Scott, Major I. S. and Mrs. Woolcombe and Mr. Roy Wilson, Mr. John St. Loe Strachey (editor of the *Spectator*), and Mrs. Strachey, Mr., Mrs., and the Misses Travers, Dr. H. C. and Mrs. and Miss Loevenstein, of New York; Mr. R. D. Setine, of Bombay; Mr. and Mrs. Corcos, Col. the Hon. Arthur G. Brodrick and Lady Brodrick, Col. the Hon. E. S. d'E. Coke, Lady Tweedmouth, Lady Farrar, Major and Mrs. Thompson, Miss Corners, Lady and Miss Prendergast.

Departures.

Lady and Miss White left for France. Sir John and Lady Lavery have returned from the coast, and leave shortly for England. The Rev. Waldo Burnett left on the 20th for England viâ Spain and France. Mr. Burnett is greatly liked here, and not only the congregation of St. Andrew's Church, but all the members of the British colony hold him in high esteem, and hope that he will find it possible to undertake the chaplain's duty for the fourth time next season.

We have lost another well-known British resident in the person of Miss Ellen Winslow, who came here in 1887. Miss Winslow represented for many years the R.S.P.C.A. here, and was very active in the service; she also took a great interest in the welfare of freed slaves, by whom she will be sorely missed.

General.

An Allied Committee has been formed to raise a fund for a memorial to be erected in Tangier to those citizens of the Allied nations in this city who lost their lives in the great war. Dr. Verdon was elected to represent the British community on this committee.

One of those sad accidents, which we have to deplore almost every winter, occurred in the bay one night recently, when seven members, including the captain, mate, chief and second engineers of the French steamer, "Navette" lost their lives when returning by boat to their ship. It is remarkable how very rarely the native boatmen meet with accidents, which generally happen to strangers unaccompanied by someone accustomed to the bay.

CORRESPONDENCE.

THE THRACIAN COUNCIL.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In your last week's issue you published a letter from the Greek Minister in London, Kirios D. Caclamanos, in which he tries to persuade your readers that the telegram of the *Agence Télégrafique Bulgare*—published by you on April 22, and relating to the Western Thracian Supreme Administrative Council—"contains an actually inaccurate version of what has happened in Gumuldgina." His Excellency makes a point of the fact that the Greek members' names have not been mentioned in the telegram, and further endeavours to prove that all that has really happened was nothing more than "an attempt by the Young Turk to vote a resolution in favour of the autonomy of Western Thrace," which "has completely failed, owing to the opposition of Greeks and Turks opposed to the Young Turks."

Your readers will be best able to judge for themselves "what has happened" and what is the desire of the majority of the population in that province if they know the following facts:—

1. The Supreme Administrative Council was not elected by the inhabitants, but was simply appointed by the French authorities. Thus a Greek by origin, but one who was for many years the official French Consul in the same province, was appointed as President of the Council. Therefore this is not a representative body from which one could judge of the proportion and the wishes of the different races represented there.

2. Quite recently the French occupation authorities took a census of the population of this region. The result is: Turks, 74,000; Greeks, 56,000; Moslem Bulgars, 12,000; Christian Bulgars, 54,000; Jews, Gipsies, etc., 8,000; total population, 204,000 souls.

3. On the eve of the San Remo Conference, 84 out of 90 communes in Western Thrace sent through the Entente representatives a formal petition to the Entente Prime Ministers, signed by the legal representatives of these communes. There is a covering letter accompanying the petition, which expresses the firm desire of the whole Turko-Bulgarian population for a *plébiscite* and against annexation by Greece.

As from his Excellency's letter it seems that he knows all the details of what happens in Western Thrace, is he aware that not long ago the Greek Bishop at Gumuldgina issued an order by which all the corpses of deceased Christians of non-Greek nationality buried during the previous years in the Greek cemetery of that city were to be disinterred, and that the French authorities, on learning of this order, which was directed chiefly against Bulgarian dead, compelled the Bishop to withdraw it?—I am, etc.,

May 10. A BULGARIAN IN ENGLAND.

CHRISTIAN CROSSES AT JERUSALEM.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Well authenticated reports are arriving from Palestine that Zionist Jews in Jerusalem are objecting to the crosses on our soldiers' graves, and that there is a danger of these being removed. The main cause seems to be that the cemetery in which our soldiers have been buried is visible as you go towards the site for the new Zionist College.

It would be a great scandal if this kind of spirit were allowed to prevail, and it would endanger the peace which some people have hoped for as a result of the restoration of the Jews to their ancient land.

Will not Jewish leaders try to influence their people? The only possible result of such conduct will be a repetition of the past misfortunes of the Jewish race. One had hoped for a spirit of brotherhood between Moslem, Christian, and Jew in the land of Palestine, to all of whom it is sacred. But an anti-Christian, materialistic Zionism will not aid the Jewish cause, any more than an anti-Jewish prejudice will fit in with the true spirit of Christianity. Cannot Jewish leaders combine with us in a joint effort to further the Messianic hopes common to both religions—that "nation shall not lift up sword against nation, neither shall they learn war any more"; but rather "beat their swords into ploughshares and their spears into pruning-hooks"?—I am, etc.,

BERESFORD POTTER.

THE AZERBAIJAN REPUBLIC.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In perusing the columns of THE NEAR EAST of April 1, 1920, I came across a letter by Dr. Alexander Schepolief (who has a record of professorship behind him) on the question of the right of the new Caucasian Republic to the name of Azerbaijan.

As one well acquainted with the ancient and modern history of the Middle East, I venture to say a few words on the point which has become the bone of contention between Messrs. R. Mareau and A. Schepolief, and hope that you will not deny me the hospitality of your columns.

Dr. A. Schepolief, in the first phase of his letter, dismisses in typically Moscovic fashion, with the single word "stupid," all the historical facts that Mr. Mareau has cited in his letter of January 2 in support of his point of view, evidently unmindful of the fact that a vehement gesture or a passionate utterance can neither prove nor disprove a question, nor can it convince the readers and hearers in one way or the other. In the second part of his letter he gives a long list of places where "Azerbaijan Turks" can be found, and winds up his letter with the following remarks:—

"The Turks called their country Azerbaijan when one part of them received independence and formed a Republic. It was quite natural that this Republic should be called after the name of the country where it was formed." Such arguments breathe an ignorance and confusion of mind that even an ordinary man without a claim to the prefix of doctor or professor would not allow himself to betray. All his contentions amount to this: that there are people called Azerbaijan Turks, and wherever they have settled down they called the land after their name. First of all, Azerbaijan is the name of a certain province, not that of a race, and the point of contention is, Where is Azerbaijan, the classical Atrapaten? Secondly, there is no trace in history of a people or race called Azerbaijan! On what grounds, then, does he make such an assertion? Besides, the very name belies the assertion, because Azerbaijan is a Persian word, not a Turkish! Moreover, it is sheer ignorance to say that the name of a country or province changes with the change in the nationality of the major part of its inhabitants.

Again, what evidence has he in support of his statement that for more than eight centuries Persian Azerbaijan has been a Turkish region, and not in the least an Iranian home? Then, what was the name of the Persian Azerbaijan before it was called by Azerbaijan Turks after their name? And by what race was it inhabited before the Turk settled there?

Dr. Alexander Schepolief's assertion will remain a mere assertion unless he, in the interests of enlightening readers of THE NEAR EAST, deals with the points raised above and answers those questions one by one, provided that his arguments and answers be based not on assertion, but on strictly historical data.—I am, etc.,

CHARLES WATNEY.

TURKEY, GREAT BRITAIN, AND THE SETTLEMENT.

By COLES PASHA.

"What feud has Turkey with us?"

By the time this article is published the Turkish delegates will have received the terms of peace at the hands of the Allies, and the punishment awarded, no matter how severe, will doubtless be acclaimed by the Press as an "act of justice." This being so, it may be considered a work of supererogation on my part to discuss further to what extent Turkey should be held responsible for her share in the war. Nevertheless, with the editor's permission, I will endeavour to show that the Turks have a much stronger case than the public has been led to believe, and justice demands that their claims should be considered if only in mitigation of their sentence, for without doubt the terms will be "dictated" even if accepted by the Porte.

When Mr. Lloyd George interviewed the Indian Moslem Deputation he asked them the question which appears at the head of this article. Failing to get a satisfactory answer the Prime Minister lectured the delegates on Turkey's crimes, stating how not only had the Straits been barred against us without cause, but by declaring war Turkey had "tried to stab us when we were engaged in a life and death struggle for the liberty of the world."

Being Mohammedans, perhaps it was only natural that the delegates should lay more stress on the religious rather than the secular side of the question. This was, I think, a mistake, as it opened the door to accusations of fanaticism, whereas if they had studied Turkey's political history for the past fifty years it might easily have been shown that it was the Turks who were engaged in a "life and death struggle," not for the "liberty" of the world but for their own existence. In fact, the Porte had every reason to have "a feud" not only with England but with all the Christian Powers, not excluding Germany, who, posing as a friend, had not hesitated to make secret treaties and aid and abet in the dismemberment of the Turkish Empire. Let us now see what evidence can be produced in support of this accusation, and to persuade the House of Commons (with whom the final ratification of the Turkish Treaty will rest) that Turkey has never had fair play at the hands of Europe. It is to the House of Commons, therefore, that I am making this final appeal. In the first place I would ask the members not to ignore entirely the Khalifate question. I know that many of our legislators look on the whole agitation as fictitious, and only requiring a little firmness on our part to cause it to simmer out. Undoubtedly agitation has largely assisted in the matter, as is apparent from the Hindu extremists throwing in their lot with the Mohammedans. But religious fanaticism once started is, as we know, very difficult to control even amongst our more civilised Christian communities; much more so is it amongst semi-barbarians, of whom there are many among the followers of the Prophet. Pan-Islamism is, therefore, a dangerous combination which had better be made use of than ignored or trifled with. But it is Turkey's political rather than religious rights that I am concerned about, and in support of my contention that Turkey has never had fair play at the hands of Europe I cannot do better than refer the Members to:—(a) The Cyprus Convention and the correspondence which led to it; (b) Dr. Alfred Francis Pribram's exposition of the secret treaties which followed immediately on the signing of the Treaty of Berlin.

As regards the Cyprus Convention we learn from Lord Salisbury's letter to Mr. Layard, H.B.M.'s Ambassador at Constantinople, dated May 30, 1878, that: "Asiatic Turkey contains populations of many different races and creeds possessing no capacity for self-government. . . ." and, after Turkey's defeat by Russia and occupation of Batum and Kars: "Emissaries of intrigue will issue forth to be in due time followed by invading armies," and Russia "will exercise a powerful influence in disintegrating the Asiatic dominion of the Porte." After pointing out how this will stimulate the Armenians and others to desert "the Power which is thought to be falling into decay," Lord Salisbury goes on to say that H.B.M.'s Government cannot allow this to take place, as it "deeply concerns the Oriental interests of Great Britain." Lord Salisbury then proposes that the best way of assisting Turkey is an engagement by some Power "strong enough to fulfil it" "to stop these encroachments by force of arms." He then suggests that the Porte shall hand over Cyprus to Great Britain, not to annex but to administer, so that "the proximity of British officers and, if necessary, British troops will be the best security that *all* the objects of the Agreement shall be attained."

Lord Salisbury only stipulates that the Porte shall on her side undertake to introduce the necessary reforms in the government of the Christian subjects. But "it is not desirable to require more than an engagement on "general terms," the measures to be taken to be settled after "careful inquiry." The Porte at once accepted, and Cyprus was occupied.

What conditions were subsequently agreed on I am unable to say, but from Lord Salisbury's later declaration that "we have been backing the wrong horse" it is to be presumed that in the opinion of the Foreign Office the Porte did not introduce the necessary reforms. This change of policy on the part of Lord Salisbury was very naturally noted by the subject races, who, as predicted, took every opportunity of bringing about the dismemberment of the Empire which was at one time thought deeply to concern our Indian interests. The Porte having once accepted our intervention and occupation of Cyprus, it seems extraordinary that Lord Salisbury was unable to bring the necessary pressure to bear; but I suppose that it was the old story—fear of Russian complications if we insisted on sending officers to take a more active or direct part in the government of Armenia. Thus little or nothing was done, but we continued to occupy Cyprus.

By this time, too, our continued occupation of Egypt and loss of Crete were making the Porte very anxious as to our promise to stand by Turkey or our ability to fulfil our engagement by "force of arms if necessary." The German Emperor, being no fool, seized on the psychological moment, and we know the rest. The last straw was undoubtedly our refusing to allow Egypt to assist, and our failure to protest in any way against Italy's action, in Tripoli. I was in Egypt at the time, and can testify to the ill-feeling created by what the Turks and Egyptians looked on as a pure act of brigandage on the part of Italy—and indeed it is hard to call it by any other name.

Now let us turn to Turkey in Europe and see what happened there. *The Times* review (see *The Times* of March 17, 1920) of Dr. Pribram's book mentioned above has greatly facilitated our doing so. We learn that the ink of the Berlin Treaty was hardly dry before "three of the signatories of the treaty were ready to overthrow two of its main provisions. Thus the union of Bulgaria and Eastern Roumelia had been foreseen and approved by Germany, Austria, and Russia in 1881. The same Powers in defiance of the same treaty had at the same time foreseen and approved of the annexation of Bosnia, which was postponed till 1908. The annexation of Tripoli by Italy had been approved by England in 1887 (probably on account of our occupation of Egypt), by Germany in 1891, and Austria in 1902. Although the annexation did not actually take place till 1912. The extension of Serbia into the Valley of the Vardar, the partition of Turkey in Europe, and the formation of an Albanian State, which came to pass in 1913, had ben approved, the first in 1881, and the two others in 1877 and 1900."

With this record before us dare we any longer ask what feud has Turkey with Europe? Can our statesmen ever again question the political morality of the Porte? Mr. Lloyd George may become eloquent over the devastating influence of the Turkish Government, but with no money, frequent wars and continuous intrigue on the part of her Christian subjects and the European Powers, what possible chance has Turkey ever had, even if her statesmen had been the ablest men in the world?

After the Treaty of Berlin the British Government could have taken Turkey seriously in hand or left her severely alone and chanced the result in Central Asia and India. We did neither. To occupy Cyprus and tinker with a few travelling consuls was worse than useless, as it opened the door to all sorts of questionable transactions by the other Powers.

The whirligig of time and the chances of war find us in the same position we occupied in 1878, but for the moment Russia is much less dangerous, though potentially perhaps more so. We had only to shoulder our burden as the greatest Mohammedan Power, and we should have very soon become the leader in a very powerful combination of modern States, more or less independent, but together quite capable of tackling the Bolshevists. Again we hesitated, hoping that America would come to our assistance. The result it is impossible to foretell; but one thing is quite certain: if we desert Turkey, the Moslems will no longer look on us as their guide, philosopher, or friend.

I hope that I have said my last word on the Turkish problem, and I can only trust that the House of Commons will see to it that in the Near and Far East the British Government's reputation for justice will not be in any way tarnished by the terms which the Porte may be forced to accept.

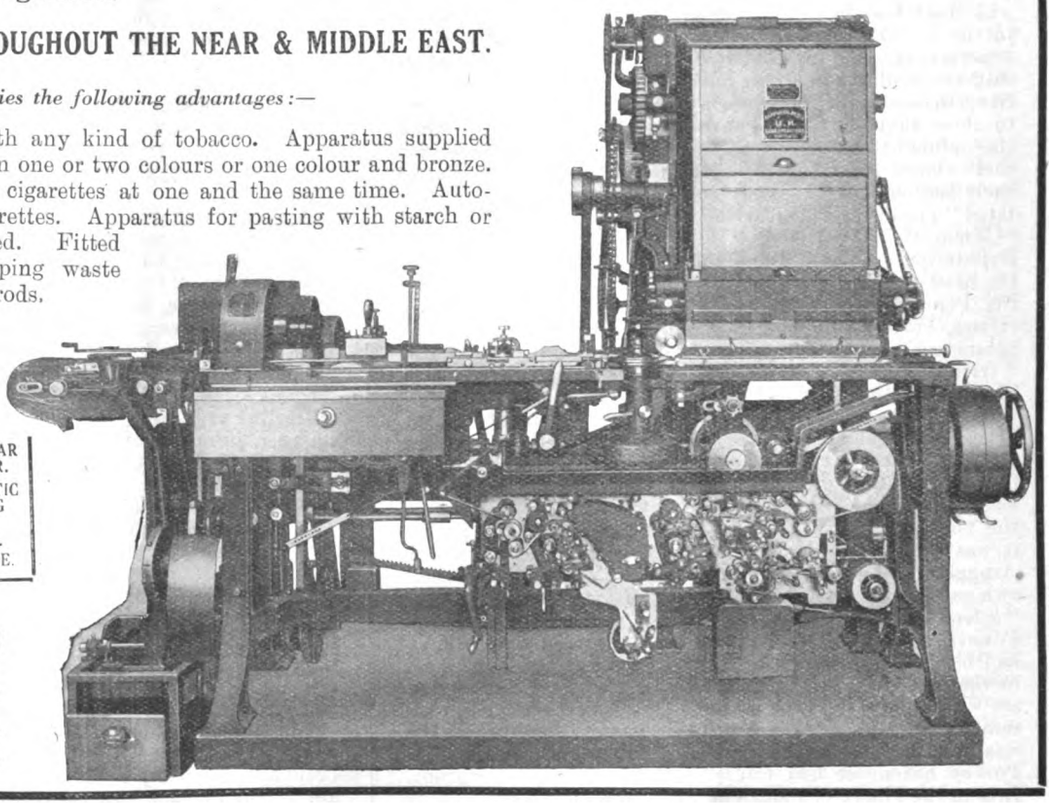
The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.



Also:—
THE "UNIVERSAL" CIGARETTE MACHINE.
THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.
"S.M." DOUBLE AUTOMATIC CIRCULAR KNIFE GRINDING MACHINE.
AUTOMATIC CIGARETTE-WASTE STRIPPING MACHINE.

United Cigarette Machine Co., Inc.
80, Coleman Street,

PRESS ON THE NEAR EAST.

The Turkish Empire.

The *Outlook* of April 24, in an article entitled "The Near East," is gravely impressed with the difficulties existing in the Turkish problem. Its conclusions are the essence of caution:—

The Turk, though beaten, is not easily rendered impotent for harm. Economic pressure, which would bring to heel a people more advanced in civilisation, will scarcely trouble him. Disbandment of his regular forces has proved ineffective. There is a strong case for those who hold that the nearer he is to naval guns, the better he will behave, but, whatever the terms laid before him, we should assure ourselves in advance that they can be enforced. That is the crux of the matter. Asia Minor is not an easy country with which to deal. If, a few years hence, the Turks, dissatisfied with the Treaty, refuse to conform to it, the other signatories will, presumably, have to take action. Military expeditions in such a land cannot be lightly contemplated. On a small scale, they would be useless; on a large scale, very costly. Prospect of them conflicts with all our hopes of disarmament and economy, and should the eventual British contribution in men and money be on the small side, we cannot expect that France and Italy will care to shoulder much heavier burdens. Clearly, it would be better to leave the Turk acknowledged master over various Christian populations than to dethrone him on parchment and to let him resume his rule whilst the ink was drying. In dealing with him, we must threaten nothing we cannot perform, undertake no task we cannot fulfil.

There are grave reasons against unnecessarily irritating Moslem opinion. The first of them is, perhaps, the safety of those Christians who will remain either under Turkish rule or as near neighbours to the Turk. The worst possible peace would be one which seemed to degrade the Khalif but actually left Turkey defiant and with a measure of strength. All existing religious feuds would be intensified. Certain peoples, thinking themselves at last free, would not unnaturally assume a provocative attitude. Their old masters might for a moment stay their hands, but vengeance, when it came, would be terrible, and it would come at the slightest sign of European weakness or disunion. Massacres and misrule cannot be ended merely by painting the map in new colours, and the San Remo Conference will be best employed if it devotes itself chiefly to discussion of ways and means. No commitments should be undertaken without a clear idea of what they may cost in men and money, and the comparative worth of game and candle will have to be exactly weighed. For us, the question is whether the not impossible sacrifices of the future will be adequately compensated by the benefits to the British Empire, to British citizens, and to humanity. This test can and ought to be applied by our representatives to every problem before the Conference.

Persia.

In *Land and Water* of May 6, Mr. Robert Machray writes on "The Bright Promise of Persia." His subject will be of interest to readers of this journal, more especially in view of certain articles we have recently published on the same topic. The concluding paragraphs of Mr. Machray's article are as follow:—

By the Agreement Great Britain undertakes to respect the absolute independence of Persia, to provide experts for Persian administration, to supply officers and equipment for a Persian force to act as police, to make a loan for these purposes of two millions sterling at 7 per cent. repayable in twenty years, to co-operate with the Persian Government in constructing roads and railways, and to appoint a joint commission to revise the Persian tariff. Administrative experts and a Military Mission were sent out to Persia, and have been at work for some time. The necessary funds have been supplied. The joint commission has revised the tariff, and brought it more in consonance with the needs of Persia without antagonising other interests. An Anglo-Persian Military Commission is regularising the armed forces of Persia, part becoming the nucleus of a standing army and part being used simply as police.

Under the influence of the British Persia is tranquil, as she has not been for many years, and her economic recovery is assured, with corresponding benefit to British trade, for which she furnishes fresh opportunities. Formerly Russia had most of the trade of Persia, but Russia is not a competitor now, and this should react favourably for the British merchant. But the most hopeful thing for Persia is that the British are applying themselves energetically to carry out that part of the Agreement which binds the British Government, in co-operation with that of Persia, to open up the country by the building of roads and the construction of railways. In the latter stages of the war, British troops greatly improved some of the existing roads, as, for example, the road, 600 miles long, in Eastern Persia, from Mirjawa, in Baluchistan, to Meshed, which was made fit for motor traffic. Other roads were and are being turned into good roads.

At the moment Persia is an almost railwayless land; there is a bit of a line, six miles long, near Tehran, which is of little use, and there is an extension of the Tiflis-Erivan line from Julfa to Tabriz, a distance of about ninety miles, but it was partly destroyed during the war, and efforts are now being made to get it into running order again—some day a branch will connect it with the railway centre, which will be Tehran. In the meantime a powerful syndicate, consisting of the Anglo-Persian Oil Company, in which the British Government has the controlling financial interest, and of the Armstrong-Whitworth, Vickers, and Weetman Pearson groups, is undertaking the survey of a railway to link up with the line east from Baghdad, the railhead of which is now at Kuretu, on the Persian frontier. The survey is to proceed along the great Kermanshah-Hamadan-Kasvin road to Tehran, and when the railway is built it will have a branch from Kasvin to Enzeli.

It is probable, according to a recent statement of an authoritative kind, that this trunk railway will be running within the next five years from Baghdad to Tehran, and this will mean the opening up of the Middle East in a truly wonderful way. For railway-building will not stop west or east. The Baghdad Railway will be completed via Mosul. The railway from Tehran will go on to Meshed, and then turn south to join the Quetta Railway at Mirjawa, thus getting into close connection with the railways of India, or a line may strike from Tehran across to Mirjawa by the more direct route via Kum, Ispahan, and Kerman. Doubtless many of the readers of this article will live to see the Overland to India Railway an accomplished fact—"Calais-Calcutta" will perhaps be the phrase in vogue.

The annual dinner of the Gurkha Brigade will take place at the Trocadero on Thursday, June 10, at 7.45 p.m. Officers intending to be present should communicate with the honorary secretary, Mr. W. C. F. Leggatt, 9, Pall Mall, S.W.1.

The King has been pleased to approve of:—Mr. Eishiro Nuita as Consul of Japan at Bombay; Mr. E. Hambro Danchell as Consul of Denmark at Bombay; Cavaliere Arturo Maffei as Consul of Italy at Aden. (Dated April 28, 1920.)

MUSICAL NOTES.

THE BRITISH MUSIC SOCIETY.

In Britain during the last two hundred years the cause of music, and particularly of British music, has been in a most miserable state of decline. This fact has resulted from two quite remediable traits in the national character, namely, modesty and ignorance. There has been a feeling amongst the mass of people that Englishmen (by which term I mean any one of the four races in the British Isles) do not excel in the performance or in the composition of music, and that this art should therefore be left to the other nations; and there has constantly been made by people who should know better the assumption that England has not been, is not, and probably never will be, a musical nation. This, roughly, was the situation as it existed before the late war.

But the war changed much, and among the many unsuspected capabilities of the English was found to be one of music making. This discovery, however, and the impulse that led to it, would probably soon have been forgotten but for the action of the British Music Society, which, founding itself two years ago, has consistently sought to demonstrate the national faith in musical achievement, and to justify that faith by its works. Yet it is not merely a national society with narrow ideals, for it is international in the best sense of the word, and is striving to uphold in Britain the cause of music generally.

Already it has done much. Tremendous enthusiasm and an enormous amount of voluntary work have been responsible for the organisation of hundreds of provincial centres. An "Annual" has been published which, containing a very complete list of the works of British composers, should be extremely useful to foreign musicians. (The list, in fact, is too complete; for merely successful writers are mixed with real composers in a way that is disconcerting to us, and will be rather disillusioning to foreign readers.) And its latest act was to hold a Congress, intended to serve both as a temporary climax to its efforts and as a guide to its aims.

There were three main concerts held under the auspices of this Congress: on May 4 at the Queen's Hall, on May 5 at the Æolian Hall, and on May 6 at the Æolian Hall.

The first was an orchestral concert, where our best orchestra, the London Symphony Orchestra, under one of our best conductors, Mr. Albert Coates, played Elgar's Overture "In the South," Vaughan Williams' "A London Symphony," Ravel's Ma mère l'Oye," and Scriabin's "Poem of Ecstasy." (With Miss Agnes Nicholls, who, unhappily, was not in good voice, it performed an extract from Berlioz's "Damnation of Faust," and an Air from Bantock's "Christ in the Wilderness.") The chief interest of this concert lay naturally in Vaughan Williams' Symphony, of which a revised and final form was given. It is a most noble work, full of majestic ruggedness. Though intensely individutl it does not provide shocks that you can at once like or dislike; it goes straight on its determined way, without lingering on passing beauties or uglinesses. I should not like to say from this, my first, hearing of it that a place in the repertory of the world's orchestras is assured to it, but that desirable event seems to me most probable.

The second concert was devoted to chamber music, when a programme consisting wholly of British composers (Bridge, Speaight, Goossens, Waldo, Warner, and McEwen) was played by the London String Quartet. Frank Bridge, whose "Bologna Quartet" was given, is a facile and uneven writer: in this Quartet, for instance, he drops, after writing two beautiful movements, into most disappointing commonplace in the third *scherzo* movement. Speaight's "The Lonely Shepherd" and Goossens' "By the Tarn" are two sketches on which I think I have commented before in these columns; suffice it to remark, therefore, they are very fine examples of the purely English style. J. B. McEwen's "Threnody Quartet" is glorious music, which by its utter simplicity and beauty makes an instant appeal. With the London String Quartet, whose playing at this concert seemed to me a little lacking in freshness and in atmosphere, Mr. Gervase Elwes sang Vaughan Williams' "On Wenlock Edge" cycle, and some other songs by Roger Quilter, W. G. Aikin, and H. G. Ley.

The third concert consisted of a violin (Mr. Albert Sammons), pianoforte (Mr. William Murdoch), and a choral recital (the Holme Valley Male Voice Choir). Of Messrs. Sammons and Murdoch, who played Beethoven's Sonata in C Minor (Op. 30) and Elgar's Sonata (Op. 82), there is no space to write; it is enough to say that this combination is the best existing in England at the present time. To the Holme Valley Choir, which I, in common with most of the audience, heard for the first time, much praise could be given, together with a certain amount of hostile criticism. That robustness and joyousness which nearly all Northern choirs possess are their best qualities, and their tone is very good, even though their baritones and basses lack a certain amount of resonance. But they certainly display their skill on too many occasions; they overindulge their delight in tone-colour, and their realistic renderings of such things as Elgar's "Réveillé" and Walford Davies' "Storm Joy" may have been good sport, but they were not good art.

For the sake both of foreign readers and of space, I have thought it best rather to catalogue the events than to criticise the achievements of the British Music Society Congress; and for the same reason I must conclude this account by saying that the Society can and will, if it is financially supported, and if it avoids the common error of falling into cliques, be the means of giving rise to a musical renaissance in this country. It deserves all possible encouragement, and that encouragement can come just as conveniently from abroad as from home. To all classes of readers, then, I commend the British Music Society most heartily.

To the English critic there are only two pianists who play Beethoven—Busoni and Lamond. Except in the hands of the two masters, the earlier sonatas of Beethoven can as easily bore as produce any other emotion—one knows them so well; and the later sonatas few artists dare to approach. At the Queen's Hall on May 8 Mr. Lamond's recital consisted wholly, except for the sonata called "L'Adieu" (Op. 81a), of Beethoven's last sonatas—that is, of Op. 101, 106, 110 and 111. These works, all written in Beethoven's maturity, make the greatest possible demands, both technical and interpretative, on the pianist; and the fact that Mr. Lamond's performance was a consistent and supreme triumph stamped him (although it was known before) as the possessor of the greatest mind among contemporary British pianists. His style of playing seems to me most eminently suited to Beethoven; his keen intellectuality, his rugged tenderness, his massive strength, his faithful brusqueness, and, above all, his glorious breadth of playing, are qualities which the composer himself loved and which he would surely have had inform all presentations of his works. It was literally impossible to note any special excellencies in this recital: Mr. Lamond was superb throughout. Without any doubt at all he is the greatest pianist, and one of the greatest artists, in this country at the moment.

The Bohemian Czech String Quartet, which is giving a series of performances at the Wigmore Hall, is well known in this country, and probably to all my readers. Last week it gave on May 3 a Czech programme, consisting of Novak's Quartet in D major (Op. 35), Suk's Pianoforte Quintet, and Dvorak's Quartet in A flat (Op. 105), and on May 5 a "Romantic" programme, consisting of Schumann's Quartet in A minor (Op. 41), Brahms' Quartet in B flat major (Op. 67), and Schubert's "Trout" Quintet. The Bohemian Quartet is rather an extraordinary one. Its methods are very curious, for it employs an ugly roughness of manner without producing any roughness of result. In the noisy second movement of the Novak, for instance, one felt that the angular methods of the first violin in particular ought to produce disaster; but nothing of the kind was ever within a hundred miles of possibility. And in the *Vivace* of the Brahms their passion might easily have become vapour, but it remained pure all the time. This quartet certainly has not the finish or the artistry of some of our own quartets, but it undoubtedly has more personality than most of them. Every one of its members is a thorough musician, and in the matter of time, touch and rhythm it has a fixed and very high standard. In music by Czech composers no one will ever equal the playing of this quartet, for for intensity of interpretation it is most probably without its equal in the world.

Mme. Pavlova's programme at the Drury Lane Theatre on May 6 was not much changed from the time when I saw her a few weeks ago. The orchestra under M. Theodore Stier has improved, but it still leaves too much to the imagination, or rather (since most of the things are hackneyed) to one's knowledge. The ballet called "Amarilla" is still given as an opportunity of showing Mme. Pavlova at her weakest point, that is, in miming; but a ballet called "The Walpurgis Night," taken from Gounod's "Faust," while nothing very notable musically, provides a conclusive demonstration that Mme. Vera Karalli is a most marvellous dancer. For pure dancing, indeed, she is in this company a genius second only to Mme. Pavlova. Saint-Saëns' "Le Cygne," for which Mme. Pavlova will always be accounted incomparable, and the Syrian dance from "Samson and Delilah" are still kept in the programme; for in these two things Mme. Pavlova is so differently yet so utterly perfect that repetitions do not stale, but merely make deeper and more lovely one's impressions. The universal fame of Mme. Pavlova and of her company goes on increasing, yet must one day die; but she herself will surely become a tradition.

NEAR EAST BOOKSHELF.

I.—"MY CAMPAIGN IN MESOPOTAMIA." By Major-General Sir Charles V. F. Townshend, K.C.B., D.S.O. (London: Thornton Butterworth, Ltd.)

II.—"SAADA, LA MAROCAINE." By Elissa Rhais. (Paris: Plon Nourrit et Cie. 5fr.)

I—GENERAL TOWNSHEND AND MESOPOTAMIA.

A glamour of romance clings to the name Mesopotamia; it calls up visions of splendour and of splendid human activity where history vies with fiction. Here Belisarius revived for a while the glory that was Rome, and shed a last fierce ray of glamour on a dying empire. Here Haroun-al-Rashid, resplendent and humane, made history, while Sinbad the sailor, born at Busreh, and many others gave rise to immortal legends. And here, again, within the last few years, history has been in the making, adding yet greater glory to records of the past, for the sons of an Empire mightier than ancient Rome have delivered Mesopotamia from the oppressor and restored it to the descendants of those whose history lay in the golden past.

We are fortunate in having before us a faithful record of one phase of the most recent history of Mesopotamia—the account of General Townshend's campaign in that country. This book, intensely human in its revelation of a strong and ardent character, fulfils throughout the conditions laid down by the author in the preface. "In order that military history should produce all the advantages that one has a right to expect from it, it should be accurate and true, not only in its recital of the facts it has to trace, but in its *exposé* of the causes which had more or less influence on the events with which it deals." The book does more—it shows us the working of the mind of a highly trained leader, of a profound student of history who is entitled to rank among such master-minds as Marshal Foch and General Mordacq, to whom the author refers. Above all, this work adds glowing pages to the history of our race in giving the story of indomitable purpose, of hardships bravely borne and of fortitude in adversity; in short, of the British fighting man as the world knows and respects him.

The book is divided into five parts, and each part has its own appendix, giving memoranda, operation-orders, and other official correspondence. There is also a preface—in itself an interesting introduction of the author to the reader, in which the former suggests that those that are not interested in military tactics will begin reading at Chapter II., as Chapter I. is devoted to the six great Fundamental Principles of War as established by Napoleon. The author hopes that at least military students, many civilians, especially diplomats and Members of Parliament, will read it (Chapter I.), "for these principles form the so-called German doctrine, which was applied both to the Army and the diploma of that highly efficient people." Let us echo General Townshend's hope. What with Supreme Councils and Leagues of Nations, one never knows when the application of these principles may not again become insistent.

Part I. takes the reader from India to Busreh, thence to Kurna and up the Tigris to Amara in pursuit of the beaten Turk. The reader will note the examples of our national tradition in the direction of overseas expeditions. There were an apparent absence of definite plan and an evident parsimony in fitting out the expedition; land transport there was none, according to General Townshend; and, owing to a shortage of gun ammunition, artillery could hardly be used in the first action. Of peculiar interest is General Townshend's *exposé* of his views on secondary theatres of war, such as Mesopotamia obviously was; but the decision was with the Simla authorities, so an advance on Kurna was ordered, and General Townshend was put in command of the force told off to capture that place. It meant stiff fighting, of course, and the narration of the event, together with the account of the necessary preparations, make most interesting and instructive reading. Surmounting many great difficulties, the British force drove the defeated Turks to Amara. The advance from Amara on Kut-al-Amara is described in Part II. Before this phase of the advance up the Tigris began, General Townshend was obliged to take sick-leave to India, and was by no means fully restored to health when he returned to Mesopotamia to carry on the operations which seemed to have the capture of Baghdad as the final objective. There was to those at home much of glamour and romance in the idea of a march on Baghdad; to those who undertook the operation there was stern reality in carrying out such a venture, and this the author makes very plain to those who read his book. His force was numerically inadequate and short of many necessaries; but, above all, the advance was in defiance of the "Fundamental Principles" the observance of which was the foundation of his victories at Kurna and Kut-al-Amara. Hence the inevitable check at Ctesiphon described in Part III., and the withdrawal to Kut-al-Amara. Chapters 8 and 9 deserve most careful study; they foreshadow coming events, dealt with in Part IV.—the tragedy of the siege of Kut! And then Part V., with its complete change of scene, of atmosphere. It depicts General Townshend as a prisoner on one of the little islands of the Sea of Marmora, eating his heart out, striving to get better conditions for the men who supported him so well and whom he loved, attempting one plan of escape after another, and finally obtaining another chance of serving his country by diplomacy, and bringing the Turks to sue for peace.

Indeed, this is a book that holds you by its "vivid narrative of events and its revelation of the inner history of a momentous phase of the Great War"; it should be in the hands of everyone who by vote holds the power to insist on efficiency which would make impossible such unnecessary sufferings as those endured by General Townshend and his gallant force.

B. Granville Baker (Lieut.-Col.)

II.—MOROCCAN GLOOM.

The story of a poor Moroccan family who leave their beloved home in Fez during the war to seek their fortunes in the unfriendly, already overcrowded town of Blidah. It is a relentlessly gloomy narrative. The impression of tragedy which is given by the sombre description of the arrival in the strange town of the little party—the beautiful Saâda, carrying her infant; her husband, her aged mother, and her little brother—all in the last stages of exhaustion, is unrelieved to the end. It is the obstinate determination of the crippled husband which has brought them to Blidah, and his steadfastly devoted love to Saâda through her passionate resentment and the hatred to which it turns is the one gleam of light that shines through the gloom of the story. The style is quiet and colourless and well suited to the subject; and the pictures of life in the Algerian town and of the types to be found there are clear and interesting.

BOOK NOTES.

A report on the alleged existence of a "White Terror" in Hungary has been issued as a White Paper [Cmd. 673.] through H.M. Stationery Office. The price is 2d. net.

The current *Quarterly Statement* of the Palestine Exploration Fund contains many items of interest. The "Notes and News" section gives some useful information regarding the Arabs who have been making trouble in Northern Syria and Mesopotamia, the boundaries of Palestine, and other topical subjects. The Rev. O. H. Knight contributes short "Notes on Cæsarea and Neighbourhood"; Mr. Stanley A. Cook writes on "The 'Holy Place' of 'Ain Dûk"; and the last of the "Archæological Notes on Jewish Antiquities," by the late Mr. Joseph Offord, are also included. A paper on "The Greek Easter at Jerusalem," which Miss Estelle Blyth contributed to the *Nineteenth Century* in 1915, is being reprinted in the *Q. S.*, and the first instalment appears in this number.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish Dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. May 13	1920. April 30	Thursday	1338. Shaban. 24	5680. Iyar. 25
14	May. 1	Friday	25	26
15	2	Saturday.....	26	27
16	3	**Sunday**	27	28
17	4	Monday	28	29 Siwan.
18	5	Tuesday	29 Ramadan.	1
19	6	Wednesday	1	2

The Raja of Pudukota arrived in London from Paris on May 7.

The Raja of Kapurthala arrived in London from Paris on May 7.

Commander H. C. Luke, R.N.V.R., is temporarily acting as H.M. Chief Commissioner for Transcaucasia.

Mrs. Eckstein and Miss Eckstein have returned to 18, Park Lane from Algeria and Paris.

Lord Erskine has left Spratton Hall, Northamptonshire, for India. He expects to return at the end of June.

M. Yovanovitch, who was Serbian Minister in London during the war, has retired from the diplomatic service.

The Maharaja of Kashmir has foregone his claim against the Government of seventeen lakhs of rupees for the services of his troops overseas.

Prince Carol of Roumania has left Simla for Kashmir. After his tour in Kashmir he will proceed to Calcutta, whence he will sail for Japan.

Sir John and Lady Lavery, whose departure from Morocco is reported by our Tangier Correspondent, have returned to 5, Cromwell Place.

Mr. Henry V. Cobb, upon relinquishing his appointment as Resident in Mysore and Chief Commissioner of Coorg, had the honour of being received by the King on May 6 at Buckingham Palace.

The Indian Khalifate Delegation and the Hon. Abul Kasim, who has been a member of the Bengal Legislative Council for the last six years, left London on Saturday for Paris on a special mission.

Lord Sinha, Under-Secretary of State for India, and Mr. Bhupendranath Basu, member of the India Council, have arrived at Marseilles from India, and their further journey to this country has been delayed by the railway strike.

At the request of Vice-Admiral Sir John de Robeck, who has just returned to Malta from Constantinople, Lord and Lady Plumer have formed a committee to provide for the urgent requirements of 6,000 Russian refugees at Mudros.

A marriage has been arranged, and will take place early in June, between Lieut. E. H. O'Conor, Royal Navy, son of Captain and Mrs. O'Conor, of Charleville, Dunleer, Co. Louth, Ireland, and Miss Violet Marie Elliot, daughter of Sir Francis Elliot and Lady Elliot.

Lieutenant-Colonel Sir John Ramsay, upon relinquishing his appointment as Agent to the Governor-General and Chief Commissioner in Baluchistan, and Mr. Frederick C. Goodenough, Member of the Council of the Secretary of State for India, had the honour of being received by the King at Buckingham Palace on May 7.

Sir Ponnambalam and Lady Arunachalam have arrived in London from Ceylon. They have sustained the loss of their eldest son, Mr. A. Padmanabha, who died in London a week before their arrival. He was a speaker and writer on Indian philosophy, literature, and ideals, and was also an active worker for Ceylon constitutional reform, in connection with which the Ceylon National Congress has sent a large deputation, headed by Sir P. Arunachalam, to submit the island's claims to the Secretary of State for the Colonies.

Mr. Frank O. Salisbury, whose picture of the National Peace Thanksgiving is now on view at the Royal Academy, has been commissioned to paint twelve large panels of historic incidents commemorative of the life and reign of Queen Victoria for the Queen Victoria Memorial, Calcutta. The idea for this building was originated by Earl Curzon, and the design is the work of Sir William Emerson, while Mr. Vincent I. Esch has been responsible for its construction. The King, when Prince of Wales, laid the foundation-stone, and it will be ready for opening early next year. Mr. Salisbury has already worked out his studies and ideas for the complete scheme, and these were viewed by the King and Queen when they recently visited his studio.

Mrs. Woods and Mr. H. Charles Woods, who were assisted in receiving their guests by Miss Christitch, gave an informal tea-party at 171, Victoria Street, on May 5, in honour of M. Gavrilovitch, the newly arrived Minister, at the Court of St. James of the Kingdom of the Serbs, Croats, and Slovenes. In addition to His Excellency and the members of the Legation Staff, among about one hundred guests present were:—Mrs. Allen and Mr. W. E. D. Allen, Mr. Ameer Ali, Mr. and Mrs. Noel Buxton, Mrs. Colin Ballard, Mr. and Mrs. Leland Buxton, Lady Marjorie Dalrymple, the Rev. Harold Buxton, Lady Grogan, Professor Hagopian, Sir Wroth and Lady Lethbridge, Sir Arthur Lever, Lady Henry, Mr. John Mavrogordato, Dame Maud McCarthy, the Hon. Lady Norman, Mr. Marmaduke Pickthall, Mr. Safrastian (Director of the Armenian Information Bureau), Brigadier-General Surtees, M.P., Mr. and Mrs. Sergei de Vesselitsky, Mrs. Gwynne Vaughan-Morgan, Mr. H. M. Wallis, Mrs. Carrington Wylde, Sir Charles Stewart-Wilson, and Count Michel de Zogheb.

APPOINTMENTS, ETC.

M. Mihaili has been appointed Roumanian Minister for Transylvania.

Mr. Harold Patterson has been appointed British Consul at Bengasi.

Baron Starcea has been appointed Roumanian Minister for Bukovina, and M. Nistor for Bessarabia.

Mr. Charles Gordon Hill Fawcett, Indian Civil Service, has been appointed Judge of the High Court of Judicature at Bombay, in place of Sir Joseph John Heaton, who has retired.

M. Nicolas Misu was received in audience by the King on Thursday, and presented his Letter of Recall as Envoy Extraordinary and Minister Plenipotentiary from the Kingdom of Roumania.

Lord Meston has been appointed to the office of Rede Lecturer at Cambridge University. The lecture will be delivered on June 10 in the Senate House, the subject being "India at the Crossways."

Our Sofia correspondent writes:—Mr. R. Leslie Craigie has arrived here, accompanied by his wife, and has taken up residence in the British Legation, where he will be in charge of British interests. He has had an interview with the Foreign Minister, and will very shortly see the Prime Minister, M. Stambolisky.

The appointments are gazetted of:—Mr. M. Francis Crow, C.M.G., as H.M. Consul-General for the Governorships of Ispahan, Yezd, Gulpaigan and Konsar, the Province of Irak, and the districts of Chehkarmahal, Feridan and Bakhtiari, with residence at Ispahan (dated November 6, 1919); and of Mr. Harold Allan Dilke Hoyland, as H.M. Vice-Consul for the Morea and the Province of Acarnania and Ætolia, with residence at Patras (dated December 30, 1919).

OBITUARY.

DR. HOWARD BLISS.

In last week's NEAR EAST a paragraph appeared stating that the Rev. Howard S. Bliss, D.D., President of the Syrian Protestant College, Beyrout, had sailed for New York on May 2. This report reached us over the telephone shortly before the paper went to press; and, owing to some fault in the connection, the message was very imperfectly heard, and consequently was wrongly reproduced. Unfortunately, the fact is that Dr. Bliss died in America. We offer our apologies to his relatives and friends for any pain that may have been caused to them by the error, and our sincere sympathy in their loss. Dr. Bliss was born on Mount Lebanon in 1860; and his loss will be severely felt in Syria.

NEWS IN BRIEF.

Martial law is to be raised at Athens.

Eight of the 100 aeroplanes given to India are expected to arrive there shortly.

The King has given to the Zoological Gardens two Barbary sheep from Morocco.

General Beppino Garibaldi has been delivering a propaganda address at Zara, in Dalmatia.

A violent cyclone has passed over Manikganj, in Bengal. Ninety-three persons are reported killed.

The King of Roumania, Reuter's Agency learns, has decreed a general amnesty for all offences against military law, with the exception of certain categories.

A new cinema corporation, the Indian Empire Players' Lasky Company, with a capital of £600,000, has been formed in New York for the production of pictures in India.

In consequence of a strike of railwaymen, states a Bucharest telegram, orders have been given by the Roumanian Government for the mobilisation of the strikers.

A delegation of Palestinian Jews has arrived in London to put the case of the Jerusalem Jews with reference to the riots in Jerusalem before the British public.

Most of the 5,000 employees in the locomotive workshops of the Northern-Western Railway of India have joined the railway power house employees who are on strike.

The Pathan tribesmen, who, in spite of their being British subjects, were recently abducted and carried over the border by Afghans, have now been returned to Chaman under an Afghan escort.

A resolution has been introduced in the Senate at Washington declaring that Northern Epirus and the twelve islands in the Ægean Sea on the western coast of Asia Minor should be awarded to Greece.

Liberals of Western India, representing the Moderates of the Bombay Presidency, have submitted a representation to Mr. Montagu against the retention of the residential qualification for candidates for election to the Bombay Legislature under the reform rules.

In a statement sent out by the British Armenia Committee in regard to the condition of Armenia, it is urged that permission should be given for superior British officers to accept posts under the Armenian Government, to assist in the equipment of the Armenian Army.

The Simla correspondent of *The Times* states that the Chemical Services Committee, presided over by Professor Jocelyn Thorpe, recommend the constitution of an Indian Chemical Service and the establishment of an Imperial Research Institute at Dehra Dun (United Provinces) and a provincial institute in each province; also the creation of a Ministry of Science as soon as possible.

An exhibition of recent accessions, by gift and purchase, to the Department of Engraving, Illustration, and Design, has been arranged in Room 132 of the Victoria and Albert Museum. The exhibits include a collection of drawings by the late Sir E. J. Poynter, P.R.A. These drawings range from sketches for details of the Museum Grill Room, the Ashanti War Medal, and other decorative work, to figure studies for well-known paintings, such as "Israel in Egypt" and "The Catapult."

TOPICS IN PARLIAMENT.

House of Commons.

The subjoined headings are those given in the official report:—

League of Nations: Armenia. Egypt. Mesopotamia and Palestine (Mandates). Persia. India: Re-employed officers. Serb-Croat-Slovene Kingdom. (May 3.)

Egypt: Milner Commission.—Declaration of Independence.—Zagloul Pasha (Delegation). Roumania. Jerusalem Disturbances (Mr. Jabotinsky). Persia (Russian Loan). (May 4.)

Russia: Soviet Troops in Caucasus.

Syria, Palestine, and Mesopotamia, Palestine: Anti-Jewish Riots, Jerusalem.—Emir Faisal.—Restoration of Jews.

Cilicia, India: British Soldiers (Pay).—Opium Traffic.—Retired Army Officers' Pensions (War Service).

Malta (Religious Freedom). (April 29.)

India: Indian Defence Force Act.—Pensions (Army Officers).—Travancore Durbar (Labour Advances).—Mr. E. G. Horniman.—Indian Reforms (Lord Meston's Award).—Post Office Superintendents (Pay).—Leave Pay (Army Officers).—Medical Service (European Doctors).—Civil Service.—Plumage Trade.—Re-employed Retired Army Officers (Pensions). Egypt. Persia (New Army). Sudan (Irrigation Works). India: Country Spirits (Consumption and Excise Revenue).—Public Works Department (Revised Scales of Pay). British Army: British Troops at Batoum. Government of India Act. (May 5.)

Montenegro. Persia. Egypt (Sultan Fouad). Zeki Bey Kharsa. India: General Dyer. India: Army Officers (Pensions).—Officers, Civil and Military (Improvements). East Africa (Indian Subjects). Ceylon (Constitutional Reform). (May 6.)

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

BRISTOL
GRAND SPA HOTEL.

EXETER
ROYAL CLARENCE HOTEL
(*facing beautiful Cathedral*).

LONDON
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.

BULGARIA'S PENANCE.

Although the Government cannot be accused of ever having shown any disposition to treat Bulgaria leniently, it is just as well that we should recognise that there is to-day a tendency in this country to regard her more in the light of an unfortunate speculator than of a convicted criminal. Indeed, one may say that the British public is, on the whole, well disposed towards Bulgaria, desiring her friendship, and hoping for her recovery in the near future. That such should be the case does not strike the average Englishman as in the least remarkable. He is so accustomed to discovering virtues in his former enemies and so ready to make friends with them after a fight, that he is now even suspected of harbouring friendly sentiments towards Germany. In the circumstances, it is quite in accordance with the fitness of things, from his point of view, that he should be benevolently disposed towards Bulgaria. His Allies, however, unfortunately view such things from an entirely different standpoint, and in this particular case it is difficult to persuade some of them that British goodwill towards Bulgaria is quite consistent with loyalty to the Allied cause. With a view to removing all possible grounds for misunderstanding on this score it has been suggested that a British official pronouncement on the subject is desirable, but even admitting the necessity for taking the greatest care that the settlement in the Near East is kept clear of the San Remo atmosphere, we doubt whether official action is called for in this case. Even in the quarters where criticism of the Prime Minister is the order of the day pure and simple, it has so far never been suggested that his sinister influence is in any way responsible for the pro-Bulgarian leanings of a section of the public, and there is no evidence forthcoming that the Government has at any time attempted to mitigate in the slightest degree the severity of the peace terms imposed on Bulgaria. Such pro-Bulgarian feeling as exists in this country is quite spontaneous in its origin, and really stands for nothing more than an expression of friendly feeling on our part towards a people little known to the majority of Englishmen before the war, but with whom in the past three or four years we have become much better acquainted. The friends and well-wishers of Bulgaria in this country would, however, do well to remember that it is quite impossible for our Allies in the Near East to share their benevolent feelings towards a State which from the day of its deliverance from the Turkish yoke has been a constant thorn in the flesh to all her neighbours, never a good ally, and always a dangerous enemy. Bulgaria's entrance into the war was fraught with such disastrous consequences to Serbia, her old rival and antagonist, that it is to expect altogether too much of human nature to hope for a genuine *rapprochement* between Yugoslavia and Bulgaria for some time to come. Greece, and possibly Roumania, can perhaps afford to be more magnanimous, but to expect any of these nations to adopt the policy of the clean state where Bulgaria is concerned is, on the face of it, ridiculous.

It is only when we have grasped the fact that Bulgaria is quite a recent British discovery that the nascent pro-Bulgarian movement in this country becomes intelligible to us. In 1915, when our soldiers first met the Bulgar in the field and he gave them a taste of his quality as a fighting man, they had a practical lesson in the recent history of the Near East such as years of patient study could never have afforded them. They were not slow to grasp that the people of this peasant State who fought and won a war within a few years of their emergence from servitude, and later smashed the military power of Turkey, possessed virile qualities that no one could afford to ignore in the future. As the years of fighting on the Salonika front went on this impression was deepened, and while it would be absurd to say that our soldiers ever found any excess of chivalrous qualities in the Bulgar, they soon came to recognise him as a sportsman, and the discovery that he remained one in his hour of defeat earned for him their genuine respect. We cannot help liking an enemy who accepts defeat like a gentleman, and who pays the price of it without whining—that really suffices to explain British goodwill towards Bulgaria at the present time.

It is much to be regretted that some of Bulgaria's indiscreet friends in this country should show a disposition to make political capital out of these indications of popular goodwill towards her, but it was only to be expected that the opportunity would be seized upon for trotting out once more the discredited theory of the irresponsibility of the people in States under the monarchical form of government; and so we are now asked to believe that the innocent Bulgarians were led like sheep by the wicked King Ferdinand, that Bulgaria was pushed into the war without the knowledge and consent of her inhabitants, and similar nonsense. Although King Ferdinand was undoubtedly the person chiefly responsible, the ingenious theory that on his shoulders should be laid the whole burden of responsibility for Bulgaria's entrance into the war will not bear strict examination, and it is a great pity that it has ever been advanced. Anyone who knows the Bulgarians must be fully aware that they are not the kind of people who would ever allow their country to be led into a dangerous enterprise unless they were firmly persuaded that it would succeed. Bulgaria's war adventure was just a case of a nation putting its money on the wrong horse, to use the late Lord Salisbury's time-worn metaphor; and to carry it further, it is plain to the world that even if it was King Ferdinand who gave the tip the Bulgarian nation was not slow in taking it. The Kaiser and his friends brought Bulgaria into the war as a means for establishing an unbroken line of communication between Berlin and the Asiatic fronts, and if their criminal enterprise had succeeded, incorporation in the pan-German Empire would probably have been the fate reserved for her. Bulgaria had, however, very different aims in view when she threw in her lot with what she then believed to be the winning side in the great war. She succumbed to the lure of a great Bulgaria to be fashioned out of the territories of her neighbours. The scheme miscarried, and now she has to pay the penalty for her error of judgment, to put it at the mildest. That she must pay it to the uttermost farthing is the considered verdict of all the Allied Powers, not excepting this country, incidentally the one most embarrassed by her entrance into the war. We may therefore dismiss from our minds any question of the possible modification of the peace terms imposed on her. The Bulgarians, an eminently practical people, are, however, we may be quite sure, fully alive to the fact that there is little in the Peace Treaty calculated to retard the progress of their country in the future. It is true she has lost a certain amount of territory, including her southern coast line, but she is really in no worse position than she occupied before the Balkan wars, and the solid qualities of her people, their industry, and their innate genius for democracy cannot fail to tell heavily in her favour in the future. At present Bulgaria under a strong Government is concentrating her energies on the only thing that matters. She is getting back to work quietly and steadily, thus setting an excellent example to her neighbours, which they might copy with advantage to themselves and the rest of the world.

ZOBEIR AND ITS SHEIKH.

(From a Correspondent.)

Zobeir, "The Gate of the Desert," lies about ten miles west of Busreh, and is a trading town of some importance, with a population of, perhaps, 10,000. Under the Turks it enjoyed several special privileges, and since our occupation of the country it has, for practical purposes, been left under the rule of a sheikh, instead of being administered directly by officers of the Civil Administration; and though there is an A.P.O. to act as guide, philosopher, and friend to this sheikh, it is to be feared that the guidance has been ignored, and the friendship lightly valued; while if the Sheikh has any philosophy at all it must be of a peculiarly cynical kind. The A.P.O.'s who have been stationed at Zobeir have found him a tough proposition, and their reports upon him are understood to have been far from favourable, while the inhabitants of the town would almost certainly welcome any change, holding, with the lady in *Punch*, that "it must be for the better." There is a saying among them: "Before the war Zobeir was free and Busreh a prison; now Busreh is free and Zobeir is in chains."

The individual who has wrought this unhappy change is Sheikh Ibrahim, and it is significant that when he was first installed in Zobeir by the Turks as *Kaimakam* they had to employ force. He was nominated by Talib Bey Nakib, but the town refused to accept him, and it was not until artillery was brought to bear upon it that it yielded, and received the obnoxious *Kaimakam*. He was the first sheikh to combine sheikhly duties with those of a *mudir*, and possibly the conservative Arabs resented the innovation.

He had been in office only a few months when the occupation of Busreh took place, and he was retained in authority by us. In the early days of our Occupation he undoubtedly rendered good service as an intermediary in dealing with the tribes outside Zobeir; but for that work he was handsomely paid: and there is no reason why he should be allowed to enrich himself at the expense of the people of Zobeir and of the Bedouin. Both, it is to be feared, have only too good reason to regret his exercise of authority.

It must be borne in mind that the population of Zobeir is of almost pure Bedouin stock, and that the town has always had the closest relations with the desert dwellers. In the days of Turkish rule the relations of the townsmen and the Bedouin were those of equals, or if the balance tilted either way it was in favour of the Desert Arab. The Turks imposed a small tax on cattle and sheep, collecting it—when they could collect it at all—at Zobeir, and there was no further tax on them at Busreh. Land was free to all who wished to build or go in for cultivation, and no ground rents were paid. The sheikhs of Zobeir used to collect a small tax on goods coming in from Koweit or from the desert; but they were never allowed, so all the townsfolk agree, to impose any taxes on the town other than a small sum collected from shopkeepers and householders to pay for the town watchmen.

Sheikh Ibrahim has altered all this. The desert Arabs are so shepherded and headed off from Busreh by a special police force that they *must* make Zobeir the gate of the desert, and must pay for the privilege accordingly; and to make matters worse they are sometimes fined by the Sheikh if they go to Busreh to make purchases rather than do their business in Zobeir. This is made all the more galling because most goods have to pay a tax on entering Zobeir; which, of course, means an increase in the selling price. Practically every article of necessity is taxed, and this hits not only the Bedawi but the town-dwellers as well. Thus, on camels and horses one must pay a tax of 2 rupees 8 annas per head on entering the town, on sheep and goats 4 annas, on cows 8 annas. On sugar and coffee the tax is one rupee per maund sack; and wheat, rice, flour, dates and several other articles pay 4 annas. Add to this the taxation of shops, deeds of sale, and so forth, and it is not difficult to accept the estimate given that Sheikh Ibrahim collects about 200,000 rupees a year in taxes. He has bluffed both Bedouin and tribesmen into the belief that he is vested with far greater power than is actually the case, and he is turning the deception to excellent account in the old Arab way. What becomes of the taxes it is hard to say: the policing of the town is not of a kind to cost much; the only "sanitation" undertaken seems to be the (very inadequate) sweeping of the roads; and the Sheikh's hospitality is not of a lavish character.

The lot of the townspeople is hard indeed. The Sheikh rules them with a rod of iron, and they hardly dare call their souls their own. They tell you that before the war taxation was comparatively light, and that the Turks allowed them considerable freedom; and this fits in with what was the case in regard to other places of similar character. They tell you, too, that they have petitioned for the removal of Sheikh Ibrahim from power, but that their petitions have been ignored. And they indicate pretty clearly what would be his fate if it were not for the power of the British Government behind him. For Zobeir has had rulers before who made themselves unpopular; but their rule did not last long—the townsmen saw to that! Sheikh Ibrahim, however, seems to stand so well—so mysteriously well—at Baghdad that to-day the townsmen fear to strike. British rule in the land has secured that much already; but whether it is a good thing for British rule that any town should harbour so much dissatisfaction as does Zobeir is not quite certain. It is a poor enough place, no doubt, but it *is* "the gate of the desert," and it can, and does, influence desert opinion by the tales it tells.

The tales it tells about Sheikh Ibrahim are not edifying. There is one about a man who was fined fifty rupees for no worse offence than paying the correct tax to our Government in Busreh; another of a man clapped into prison for bringing a bottle of whisky into the town; a third of people afraid to go to the British cinema lest by so doing they should incur the Sheikh's displeasure. As to the whisky, and even the cinema, a Puritan might conceivably argue that Ibrahim was exercising a good moral influence, but the regulation of your morals by other folk is no more popular in Zobeir than elsewhere.

Again, there is the story of a certain important citizen who dared to criticise, as unjust, the dealings of the Sheikh with a poor neighbour. A few nights later some of the Sheikh's soldiery arrived at this man's house, and said: "We have heard that so-and-so has been stolen from the Sheikh's house, and that it is hidden here. We have come to look for it." The householder's indignant protests were ignored; resistance was useless; the soldiers carried out their 'search' with peculiar thoroughness and, of course, took the opportunity to secure perquisites.

One more of these tales may be told, to show what life is like in Zobeir under Sheikh Ibrahim's rule. The town is one of the few places in southern Mesopotamia, if not the only one, where arms may be bought and sold more or less openly; though such traffic is nominally prohibited. A poor gunsmith of the town was asked by one of the Sheikh's bodyguard to buy a rifle from him; but, suspecting that it was the Sheikh's property, at first declined to do so. The would-be vendor swore by Allah that the rifle was his own, and when the gunsmith still hesitated, added cynically that he would make things hot for him if he did not purchase it. So, greatly against his will, the gunsmith at last bought the

WHITE HORSE WHISKY.
GREAT AGE AND BOUQUET.

KING GEORGE

KING OF SPAIN

Digitized by Google

weapon for fifty rupees. Soon afterwards he sold it to a Bedawi tribesman, who on passing through the city gate was arrested by the guard for being in possession of the weapon. Naturally, he explained where he had got it, and was thereupon permitted to go free. The gunsmith, however, was charged before the Sheikh with stealing the rifle. The guard swore that it had been taken from his house, and, in spite of the evidence of some shopkeepers who had witnessed the sale of it to the unfortunate prisoner, the latter was condemned and cast into prison till he should pay a fine of fifty rupees. So strongly was public feeling stirred by the injustice that the townspeople subscribed the amount necessary to free the prisoner.

Such incidents as these were common enough in the old days, when they were regarded as natural and inevitable, however painful. But with the appearance of the British in the country a new spirit is springing up, and the sense of justice has been sharpened; and that such things should be tolerated to-day is felt by the sufferers to be inexplicable. Certainly they are not calculated to enhance our prestige. The authority of sheikhs in the position of Ibrahim, it is understood, must be exercised subject to the observance of a reasonable measure of justice and equity; and it is inconceivable that any British Government would insist on the retention of such a sheikh in his place against the wishes of an overwhelming majority of his tribe or town. Yet Zobe'r is heartily sick of Sheikh Ibrahim, and there would seem to be very good reason for the feeling of dissatisfaction amongst its citizens.

Apart from his personal unpopularity, many of the leading citizens feel that Sheikh Ibrahim is hindering the development of the town. They wish for, and are willing to contribute to the cost of providing, a water supply, improved communications with Busreh (which is their metropolis), and improved sanitation. They have seen how Busreh has changed for the better since our occupation of it, and they are keen for Zobeir to follow along the same lines. Moreover, they resent strongly the humiliations to which they are subjected, and not a few who could afford it have left the place in sheer disgust.

Naturally such a state of affairs cannot and will not be tolerated indefinitely. There were doubtless very good reasons why Sheikh Ibrahim should be retained in his position, and given a certain latitude in his rule for a while. With the definite granting of the Mandate, however, things in Mesopotamia will have to be put on a new footing, and doubtless it will be a case either of Sheikh Ibrahim reforming his ways radically or—of his removal from office. Indeed, since Zobeir is, after all, an insignificant place in some ways, it would be by no means surprising if he had already reached the end of his tether, and been superseded, without news of the change having found its way to this country—or at any rate to the writer.

It has now been established that Mrs. Colebrook Taylor, the wife of the Resident Magistrate at Hazaribagh, Bihar, India, who on April 30 was reported as having been murdered, committed suicide.

Among the memorials which are to be on view at the Imperial War Museum in the Crystal Palace next month is a mortar, dating from the seventeenth century, which was taken from the Turks on the Tigris.

CHESS.

The game between Sir G. A. Thomas and Mr. W. P. McBean, on the result of which the championship of the Metropolitan Chess Club depended, has now been played, Sir G .A. Thomas winning in something like thirty moves. By winning this event Sir George has set up a record, for no one has ever before won the championship of the City of London, Hampstead, and the Metropolitan chess clubs in the same season. As he was also triumphant at Bromley, he may be said to have literally swept the boards for the 1919-20 season. Only one more event remains to complete the triumph, and for that we must wait till the Edinburgh Congress in August.

It is very satisfactory to learn that the cable matches between England and America are to be resuscitated. The last of the series was played in 1911, when England, by winning for the third time in succession, obtained permanent possession of the trophy presented by the late Sir George Newnes. A gold cup has now been offered to the British Chess Federation by Mr. Ferdinand Ruffer, the banker, for competition between the two countries by cable under the same conditions. It is understood that the American authorities are willing to renew the contest, though with reservations which will give them a larger choice of players, but the matches cannot be begun until next year at the earliest as the cable companies will not be in a position until 1921 to give the required facilities.

The above news makes me hope that in a not too far distant future the international matches between Oxford and Cambridge and the American universities will also be revived. The last of the series took place in 1910, when the American side won.

The entries for the international tournament to be held at Veles (Uskub) in the latter part of June will, it is reported, include Capablanca, Lasker and Rubinstein. I scarcely think, however, that Capablanca is likely to be seen at Uskub. It is not long since he left for Cuba after an arduous season in this country, and in view of his coming match with Dr. Lasker it is scarcely probable that he would care to make another visit to Europe in the meantime.

The following ending occurred in a game in the Paris Tournament of 1867.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Although the various summaries of the Peace Terms to Turkey are probably not very wide of the mark, I prefer to withhold detailed comment until the Treaty is officially given to the world. I note, however, that the present service of the Ottoman Debt is to be maintained until 1923, and that a financial commission is to be established. Turkey, with her territories so radically cut down, will, it seems, find great difficulty in supporting the burden of the two-thirds of the War Debt for which she is to be responsible; but then she has always been in financial difficulties, and has yet always managed to "carry on" with the help she has received from outside. That help will, of course, be still afforded her, for the Powers will look after her finances, if only for their own sake, in the future as they have in the past. Thus, while I feel a certain sneaking sympathy for the humble and heavily-taxed Turkish peasant, who will, I suppose, have to pay the piper in the long run, I am not at all uneasy regarding European financial interests in Turkey—if only the Bolshevist wave does not sweep away all landmarks.

***

The eagerly awaited prospectus of the P. and O. Banking Corporation was issued last week. The capital of the company is £5,000,000 in £10 shares, of which 250.000 shares were offered at a premium of 2s. 6d.; 80,000 of these shares had, however, been applied for by the London County Westminster and Parrs Bank, Lloyd's Bank, the National Provincial and Union Bank of England, and the P. and O. Company, so that the actual number offered for public subscription was 170,000. Very rarely has the investor an opportunity of obtaining an interest in a company launched under the auspices of a great shipping line and a group of powerful banks, and it is not surprising in the circumstances that the issue was over-subscribed on the day the prospectus appeared.

***

The new corporation has a very influential board of directors, which includes Lord Inchcape, chairman of the P. and O.; Sir Richard Vassar Smith, chairman of Lloyd's Bank; Sir Montagu Turner, chairman of the Chartered Bank of India; Sir Duncan Carmichael, a director of the P. and O. and of the Chartered Bank of India; and Mr. E. H. Cunard, a director of the Cunard Steamship Company and of the London County Westminster and Parrs Bank. In addition to banking, its objects, as shown by the articles of association, include financing trading, underwriting, company promotion, etc. The corporation starts its career with the great advantage of important connections here and in the East, and it does not need any great breadth of vision to prophesy for it a most important future. With its establishment one more is added to the list of notable enterprises which have as their aim the support of British trade endeavour in the new era which is just opening.

***

In the Near East, as in nearly every region, since the outbreak of the war travel has been surrounded with difficulties. It is sometimes necessary, for instance, to have passports for going and returning, while there are many special vises which have to be obtained. All this takes time, for vises are not to be procured at a moment's notice, and the traveller who has been under the impression that they can be readily obtained is likely to find himself with a good deal of time on his hands in which to consider the workings of an unkind providence and of the local bureaucracy in particular. In some parts of the Near East, I am told that British travellers have been greatly handicapped by not being adequately informed of the various regulations. How this should be it is difficult to understand, for British subjects ought surely to be able to depend implicitly on the consular officials for information of this nature.

***

I have just received a most illuminating illustration of the inefficiency of the cable services between this country and the Near East. My correspondent cabled from Bucharest to England on March 30, and the cable was delivered at his home in Kensington on April 26, two weeks after he had returned there! It is a pity that he did not send a letter at the same time. A most interesting and close contest should have ensued, with slight odds, I fancy, on the letter.

***

I learn that Bulgaria's representative at the Conference about to be held in Paris to arrange for the resumption of the Orient Express service on normal lines will be M. Morpoff, an ex-Minister and an engineer. It is hoped, I understand, that trains will be running right through to Constantinople within a month, which should be good hearing to those who have been anticipating further experiences of the many irritating changes and delays that have been entailed in travel to the Near East since communications were restored.

***

I have read with very considerable interest a memorandum by H.M. Consuls at Alexandria and Cairo on the appointment of agents in Egypt by British firms. The question of agents is one over which, particularly in regard to the Near East markets, British firms frequently trip up. The importance of the agent in regard to the Egyptian market may be gathered from the fact that something like half the import trade of the country is done through this medium. The number of large businesses able and willing to deal direct with houses abroad is very small, while there are very many small traders enjoying little or no credit who are too ignorant to venture on direct dealing with manufacturers. Thus it has happened that so great a proportion of the country's trade passes through persons on the spot whom the small trader will approach and who know how much credit may be permitted him.

***

The result of this condition has been the development of an extremely numerous class of agents, many of whom have a few hundred pounds capital, and are merely actuated by the wish to make money as quickly as possible. They have no idea of making a permanent market for some articles, and naturally those whom they represent will merely suffer as the result of their activities. Even among the satisfactory agents there is no specialisation, the fact being that, except for Manchester goods, the demand for any special class of commodity needs to be stimulated.

***

As regards retail commercial establishments in Egypt it is pointed out that there are comparatively few British firms and a ridiculously small number of British general commission agents, the result being that the foreign middleman has reaped a profitable harvest which might have accrued to British manufacturers and dealers had they been directly represented in the Egyptian market. Of course, the trouble is that British firms hesitate to increase the expenditure involved in the appointment of a direct representative. Some have done so with the most satisfactory results, but for the most part business has been done through the foreign and Levantine agents. In the future it is to be hoped that a more enterprising policy will be adopted, and that firms, if they are unwilling to appoint sole representatives, will at least combine for the purpose of direct representation. It is essential if their interests are to be adequately safeguarded.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

EGYPT.

CAIRO, April 19.

A New Egyptian Bank.

A decree has been published constituting a new bank under the title of "Bank Misr." This new establishment, which must not be confounded with the "Bank El Masri" (Bank of Egypt) which failed in 1911, and the rights in the name of which have been purchased by a small British group, is an entirely Egyptian concern. The statutes lay down that the shareholders must all be of Egyptian nationality, and that transfers must be accompanied by a nationality certificate of the transferees. The capital is fixed at £E80,000 divided into 20,000 shares of £E4 each. It can be increased by an extraordinary general meeting of the shareholders, but such increase cannot be issued at below par; and the extraordinary general meeting has also the power to issue debentures, provided that at the time of issue the total does not exceed the amount of the capital paid up.

It is to be noted that this is the first financial enterprise of this nature to be undertaken by Egyptians. During the Nationalist wave of 1907-1911 the project of an Egyptian bank was very strongly mooted, but nothing came of it, and it is only to-day as a result of the further impetus given to "nationalist" ideas that the project has materialised in the form of the "Bank Misr." It is understood that the new concern has taken the offices of the old Deutsch Orient bank, and it is expected to start operations very shortly.

It must be admitted that the founders of this bank have started in a very unpretentious manner, seeing that they propose to open with a capital of only £E80,000. It is, however, a foregone conclusion that if they are going to do banking business on any scale this capital will speedily prove quite insufficient, and that they will have to increase it considerably. There should indeed be no difficulty in this respect, for the country abounds in wealth, and it is to be presumed that in order to assist an enterprise which has for its object their gradual emancipation from the financial control of non-Egyptians, Egyptians will come forward not only with subscriptions towards its capital, but also with the very substantial sums which they are either hoarding or have deposited with existing foreign banks. No one can fail to sympathise with an enterprise of this description, and those of us who have in the past reproached Egyptians for not having commercial enterprise will be the first to congratulate the promoters of this venture, and to extend to them their sincere good wishes for the success of their efforts to promote the well-being and economic development of their country.

CAIRO, April 26.

The Cotton Tax.

The regulations for the collection of the cotton tax imposed by the decree of April 18 last have now been issued. Special tax-collecting offices have been set up in all the chief ginning centres of Upper and Lower Egypt, where before cotton is withdrawn from a factory full particulars of each consignment must be registered and the tax of P.T. 35 per kantar must be paid in cash, except where special arrangements have been made by the Ministry of Finance. No cotton can be transported by rail or by water unless a permit has been obtained. The tax will be payable on all cotton ginned after August 1 next, and in the case of cotton ginned before August 1, 1920, and still in Egypt, unless it is in Alexandria, a full declaration of each lot must be made before August 15 to the Ministry of Finance together with a remittance of the amount of tax due. Provision is, however, made for the exemption of ginned cotton which may be in Alexandria stored in bond after August 1, but which had reached that city before that date. All ginned cotton found outside factories without a permit will be confiscated, and will be sold administratively, provision being made for the reward of one quarter of the proceeds of the sale to those who denounced the cotton and the agents who carried out its confiscation, the remaining three-quarters of the proceeds going to the Treasury.

YUGOSLAVIA.

BELGRADE, May 5.

A Russian Enterprise.

It is reported that a Russian bank is to be founded here by refugees from South Russia. General Denikin's former Minister of Commerce is said to have deposited five million French francs to give it a start; and fourteen Black Sea ships are being brought from Constantinople, and will open a service on the South Dalmatian coast. They are bringing a vast quantity of material and agricultural implements from South Russia, saved from the Bolshevists, and the concern should be a godsend to the country.

PALESTINE.

JERUSALEM, April 25.

Crop Returns.

Figures have just been published showing the returns of summer crops and fruits for 1919. They include durra and maize, sesame, olives (and olive oil), oranges, lemons, citrons, grapes, figs, melons, bananas and dates, the total of these being nearly 100 million kilos. The total for oranges is over 66,000,000 kilos, for maize 15,000,000, for grapes 5,600,000, and for figs 4,500,000. For all these products, as in the whole field of agriculture, there is a vast opening for expansion as soon as settled and progressive government holds the reins. Meanwhile, many vital projects, including better water supplies, are of necessity hung up.

Opening for Agricultural Machinery.

The general agricultural outlook is very promising. The severe cold and storms of February were succeeded by genial weather, which promoted a remarkable recovery, and has brought prospects of a cereal harvest above the average and hopes of a consequent fall in prices. Warm weather has brought out the splendid wealth of wild flowers for which the country is celebrated, and those who could indulge in country trips have been charmed by the profusion and variety that deck both hills and valleys in all directions. In many places peasants are preparing for summer sowing and breaking up new land—a healthy sign. Extended cultivation on a large scale will come when more cattle are available. Live stock has suffered terribly in recent years. Among the proofs of progress may be noted the promised introduction of threshing appliances, which are bound in the near future to supersede the patriarchal methods of the present threshing floors prevailing in this part of the world. At Haifa a Fordson Tractor has been on trial, and the demonstrations have been welcomed. There should be good scope for enterprise in the matter of agricultural machinery and appliances, and during the coming harvest experiments will be

witnessed which will open the eyes of the more progressive and intelligent cultivators, and should lead to labour-saving improvements which will liberate animals and many hands for other profitable work. Loans on easy terms would be a godsend for the poor but honest and thrifty farmers.

Irrigation questions will be serious for Palestine, and will require much consideration, since the Jordan and Litani rivers both take their rise in territory that goes to the French mandate. It could little be imagined a year or two ago that Palestine would be separated from the "Syrian" portion by the artificial boundary that is being traced. Anglo-French friendship must find happy solutions for the important problems that will forthwith present themselves in working out the regeneration of the great and backward territories which lie on either side of the new scientific frontiers.

Combating the Locust.

The Government is taking timely steps to combat locusts. Directions are given in the official *Gazette* with a view to marking localities where eggs are deposited, and Mukhtars are called upon to report all swarms, and to take active steps to protect their respective villages. The instructions given are mainly based on those which were in force in Egypt during a serious invasion of the pest. At present the price to be paid for eggs is five piastres' tariff the oke. Invading swarms have not been serious of late years in O.E.T. (South); but the danger is fitful and ever-menacing, and will no doubt be efficiently dealt with under British guidance.

Miscellaneous.

All the arrangements for the tithe assessments and field work of the current year have been made and published.

The number of companies and partnerships registered at Jerusalem and Jaffa continues to grow.

Owing to the high cost of living, the collection of octroi dutis on wheat and flour has ceased, by order of the Chief Administrator.

CYPRUS.

CYPRUS, April 17.

Crop Prospects.

For all interested in agriculture the present is the critical time, the matter of rainfall being all-important. There have been welcome rains in the central and eastern districts—*i.e.*, the principal corn-growing areas. But in the west farmers must have more than has yet come their way. Cereal harvest prospects are much less favourable than they should be in all the western districts. The carob crop will be disappointing, owing to the serious damage caused by the abnormal cold and frosts which were recorded this year. The beans of last year are fetching very good prices, the village growers getting 36s. the kantar, or £8 a ton—merchants paying all weighing expenses, tithe, etc. Villagers continue also to get excellent prices for their wines; so that peasants who are thrifty are in a position to pay off a good deal of their debts to moneylenders, or should be able to do so if the present favourable conditions are maintained.

MOROCCO.

TANGIER, April 25.

The Currency.

Hassani money ceased to be current in the French Protectorate on April 20. The French papers state that much more silver was brought in than had been expected, so it would seem that the official statements of a year or so ago that the shortage was due to the large quantities of this silver that were being exported were not well founded.

It appears that the surrender of silver has been mostly in the towns, very little having been exchanged for French notes in country districts. The country people are very shy of these notes, and in some of the less completely pacified parts of the country it is probable that a very considerable amount of silver will remain in native hands.

Of course, the Dahir withdrawing Hassani does not apply to either the Spanish or Tangier zones—the action of the Banque d'Etat in the latter appears to be not yet decided. Hassani is still to be had from money-changers in the street at prices which vary considerably—last week the exchange was from 204 to 217 francs for 100 pesetas Hassani. Naturally, living is becoming more expensive, and is likely to become still more so as Hassani gets scarcer and, approaches the value of Spanish silver, which in Tangier will probably replace it.

Strike of Stevedores.

Tangier is suffering from a strike of stevedores, and Bland's boat from Gibraltar had to leave to-day without discharging her cargo. The lightermen, who are employed by the "Service de la Dette," struck some ten days ago, and have had their wages increased to 15 francs a day. The stevedore men, whose claim is being supported by two officials of the Gibraltar Union, demand 10 Hassani pesetas a day, equal to from 22 to 25 francs. They refuse to have anything to do with French money.

MALTA.

MALTA, April 22.

The Exchanges.

For all practical purposes Malta is only an importing country, and the unique position of the island in this respect has enabled all concerned to realise very fully the problem of the foreign exchanges. The Customs authorities have recently come in for considerable criticism in connection with the fluctuation in the exchanges of countries trading with the island. They have continued to charge duty at the rate of 25 lire in the case of imports from Italy in spite of the fact that within the last few days sterling has been exchanged at the rate of 100 lire. This means that where the duty is 10 per cent. the consumers are being charged at the rate of 44 per cent. Efforts are now being made to have this matter adjusted.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned :—

Egypt.—The Egyptian War Department are calling for tenders for Portland cement. Tenders are returnable on May 21, and are to remain open seven days. All particulars may be obtained from Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, S.W.1.

Tetuan.—Tenders are invited by the Spanish Government in Morocco for the supply of material and rolling stock for the railway from Tiztutin to Tafersit. Among the items required are the following :—35,423 sleepers, 1.75 to 1.95 metres long, 0.18 m. minimum width, and thickness 0.12 m. 1,545 metric tons, 300 kilos. of rails, 12 m. long, 30 to 31 kilos. weight per lineal metre, 1 metre gauge. 47 metric tons 152 kilos. of clamps. 11 metric tons 783 kilos. of screws. 72 metric tons 749 kilos. of seating plates. 12 junctions, 1 metre gauge. 2 locomotives, 350 h.p. 12 closed wagons. Specifications are on view at the Moroccan Section of the Ministry of State, Madrid, and the Government Offices (Delegacion de Fomento), Tetuan. Tenders will be examined on May 24 at the Government Offices in Tetuan, and delivery of the goods, it is stated, must be made within six months of the date of the placing of the contracts.

Greece: Ministry of Communications.—Supply of telegraphic materials. (Particulars may be seen at Department of Overseas Trade, 35, Old Queen Street, S.W.1.) June 20.

Roumania.—The Frontier Guards of Roumania desire offers, preferably in the French language, from British houses for the following medical supplies, instruments, etc. :—Boric acid, pure carbolic acid, antipirene, aspirin, quinine sulphate, dermatol, iodine, iodide of potash, permanganate of potash, protargol, sulphate of soda, bismuth salts, and vaseline; graduated syringes and needles, platinum needles, surgeons' knives with straight metal handles, probes, and general surgical instruments; cotton wool, gauze, rubber sheeting and bandages. As the amount of money at the disposal of the medical staff is limited, the quantities to be purchased are not mentioned, as these will depend upon the prices quoted. Offers should be addressed to : Monsieur le Commandant I Cerna, Corpul Greniceri, Boulevard Bratiann (Colt cu Batiste), Bucharest.

Greece.—The President of the Rice Cultivation Association of Messinia invites inclusive offers from British firms for the supply of rice-threshing, peeling, and polishing machinery, and motor-lorries for the conveyance of the rice. Tenders made out to the President of the Rice Cultivation Association of Messinia should be made on the basis of delivery c.i.f. Piraeus or Kalamata (Morea), and accompanied by designs, terms of payment, and any other relevant information, should be addressed to The Commercial Secretary, H.B.M. Legation, Athens, Greece.

BANQUE D'EXPORTATION PRIV. DU ROYAUME DE SERBIE.

(Royal priv. Serbian Bank for Exportation.)

BELGRADE, SERBIA.

Capital, Paid-up, 5,000,000 Dinars

Reserve - - 1,200,000 Dinars

The Bank transacts all Banking Operations, undertakes all manner of financial, commercial and industrial enterprises and effects Money-Transfers to and from Foreign Countries.
The Commercial Department of the Bank deals mainly in the Export of Native Products on its own account and on commission basis.

Cable Address: Exportbank, Belgrade.

Purchase and sale of goods on account of clients. Warehousing, Advertising and placing foreign products on the market. Agents for foreign companies and large commercial and industrial firms abroad. General Shipping Agents.

POPULAR BANK OF GREECE.

Head Office, ATHENS. Branch, PIRÆUS.

Correspondents throughout Greece.

Established June, 1905, by the National Bank of Greece and a group of Capitalists.

CAPITAL - Drs. 1,500,000.
RESERVE FUND - Drs. 2,500,000.
Deposits and Credit Accounts, Drs. 100,000,000.

The Bank specialises in the collection of Bills payable in Greece; it accepts goods on consignment, and undertakes their sale, and transacts every kind of Banking business.

General Manager: D. LOVERDO.

TRADE WITH THE NEAR EAST.

The Bank of Athens extends special facilities for business with the Near **East** to manufacturers, exporters and importers.

The Bank has offices in all the principal towns in **Greece,** also in **Egypt,** Cairo and Alexandria, in **Cyprus,** Limassol and Nicosia, in **Constantinople,** and in **Smyrna.**

Inquiries from interested parties are invited.

BANK OF ATHENS.

PAID-UP CAPITAL : £1,920,000. **HEAD OFFICE IN ATHENS.**

London Office: 22, Fenchurch Street, E.C. 3.

COMMERCIAL BANK OF GREECE, LIMITED.

CAPITAL PAID-UP - Drs. 15,000,000.
RESERVE FUNDS Drs. 2,845,010.45.

Head Office: ATHENS.

Branches:—**Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 295,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

IMPORTS (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

EXPORTS (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

COINAGE.—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36·50 Drachmæ to £1.

FREIGHT.—From England, 160/- + 10 % primage.

WEIGHTS AND MEASURES.—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

TRANSPORT IN SOUTH-WEST PERSIA.—II.*

TYPES OF MOTOR VEHICLES REQUIRED.

(From a Correspondent.)

A motor-car service could be used for the conveyance of mails, passengers, and goods. As regards mails, some arrangement would have to be made with the Persian Government, but apart from the prestige gained this would hardly by itself prove sufficiently remunerative. Much more important items would be passengers and goods.

I have given a summary of my journey from Bushire to Shiraz. The cost of hiring mules was 30 tomans each, equivalent at the exchange then in force to about £11 10s. each. This was certainly a high rate of hire, but the normal hire price is between 20 and 25 tomans each mule. The hire of a carriage from Shiraz to Ispahan costs anything over £50, and the rate is the same from Ispahan to Teheran. Now very much less could be charged for a motor-car service, and still enormous profits could be made. But even if the charges were the same as for other methods of transport, no Persian would ever travel except by motor. In point of fact, the Persian, like other people, would willingly pay more for the motor-car so as to avoid some of the hardships of the journey.

The Position of Bushire.

But it is in the conveyance of goods that there is the greatest scope for motors. Recently there were all sorts of rumours afloat in Persia that when the railways were built Bushire would lose all its importance as the natural line of railways would leave out Bushire. Apart from the fact that railways will take years to build, there is no doubt that Bushire, in spite of all its disadvantages, must remain the most important Persian port in the Gulf, as it is the point in the Gulf nearest to the chief trade centres. Engineering difficulties would probably make the construction of a railway from Bushire to the interior commercially unprofitable, but these difficulties do not apply to road transport. Under present conditions it is necessary to allow anything over three months for the transport of merchandise from Bushire to Teheran, via Shiraz and Ipahan, but by motor-car it is not impossible to accomplish the journey in a little over a week. And in spite of all the delays, in spite of the enormous cost of transport, there is an immense volume of traffic coming through the port of Bushire from this trade route. The whole of this traffic would go to any concern running an efficient motor service. As regards types of cars suitable for this service, the chief point to bear in mind is that the roads are not fit for heavy traffic. A London motor-bus would be useless. I should think the most suitable type would be some light lorry.

Quite apart from the openings for a motor transport service, there is at present in Persia a demand for all types of motor vehicles. In fact, Persia as a market for motor-cars is almost virgin soil. In Southern Persia last November there was a large number of military motor-cars, but the total number of privately-owned cars could be counted on one's fingers. The Persian Government may require external loans, the North of Persia may have lost trade in recent years owing to speculation in Russian roubles and the closing of Russia's frontiers, but South Persia is flourishing. The merchants have large trade balances in their favour; they have enormous sums of money in hand which they are only too willing to spend. The exchanges also are very much in their favour; the kran, normally worth about 4d., is now worth nearly a shilling. All these wealthy Persians are anxious to purchase motor-cars. At present their means of progression is the old-fashioned carriage and pair, or the still more antiquated donkey. This is not from choice, but because up to the present they have not been able to obtain the motors on which many of them have set their hearts. Every Persian who now owns a carriage would willingly buy a car instead.

British Goods Preferred.

Certain popular makes of American cars are already known to the Persians, who have also heard that there are better English makes, but few, very few, Persians have ever seen an English car at all. The writer was constantly being asked about English makes of motor-cars, and how to obtain them. Any English manufacturer who chooses to tackle the Persian market will start with a great initial advantage over his competitors. Nowhere in the world does the reputation of British manufactures stand higher than in Persia. The Persian will always buy British goods in preference to any other, partly because British goods have long been in his market, partly because of the political prestige of this country, and partly because of his unfortunate recent experience of other manufactures. During the war many articles which Persia had been accustomed to receive from England could no longer be supplied from here: matches, for instance, and cotton piece goods. The Persian had to content himself with Japanese substitutes. At first he was inclined to be pleased with the change, as the prices were substantially lower. Later he began to repent. Now he is clamouring for the original British articles, and will have no other. He has learnt that low prices do not necessarily mean cheapness. The result is that the reputation of British manufactures is higher than ever before.

It will be asked what types of motor-cars would be suitable for the Persian market. At the present day the wealthy Persian uses his carriage chiefly to go from his town house or his office to his country residence—say five to ten miles each way. Very seldom does he travel further afield. If he does he would travel on horseback or on a donkey. Presumably if he owned a motor-car his reluctance to travel might diminish. The hardships of a journey under present conditions are not alluring. Primarily, then, a Persian would want a motor-car for the same sort of reason as a business man in London. When, however, the country develops, as it must soon, and main roads are constructed, a use will be found for the motor-car in travelling from town to town. For this purpose a touring body appears the most suitable. On the other hand, the wealthy Persian would probably require a closed car for the use of the ladies of his household. The Persian of more moderate means needs a light touring car. Any light car at a moderate price would command a ready sale in such towns as Bushire, Shiraz, and Ispahan.

Opening for Light Cars and Motor Bicycles.

Where there appears to be even more scope would be in the sale of light commercial cars. At present all local transport work is done by donkeys, mules and coolies. A merchant in any of the principal towns is obliged to employ a large number of coolies and donkeys for his every-day work, for which he has to pay a high price. The same work could be performed very much more efficiently and at far less cost by a single motor-lorry, the scope for which in Persia is undoubted.

And now a word must be said as regards the opening for motor-bicycles. When in Persia last year I should have been prepared to pay almost any price in reason for the use of a motor-bicycle. No Europeans and few better-class Persians live in the towns. The residential quarter of Bushire is five or six miles away from the town. The main houses and gardens in Shiraz are between five and ten miles out. The

cost of hiring a carriage was exorbitant, being two or three tomans on each occasion, while the time for a carriage journey was excessive. A motor-bicycle would solve all these difficulties.

For such journeys as Bushire to Shiraz under present road conditions the ideal conveyance is the motor-bicycle, perhaps with side-car. Last year, when I had to work out problems of travelling between these towns, I came to the following conclusions:—Travelling under the old conditions of mules and donkeys, the time required would be nine days, and travelling by motor-car two days (a halt at Kazerun), but a motor-bicycle could accomplish the journey in one day. All with whom I discussed this agreed with my estimate, whether Europeans or Persians, and any number of Persians would willingly buy any motor-bicycle available. Last November there was not a single privately-owned motor-bicycle in Shiraz. In Bushire there were two or three only. There is undoubtedly a good market for any reliable motor-bicycle.

Methods of Sale.

The motor manufacturer who decides to tackle the Persian market should speedily gain a rich reward. Various manufacturers have already sent agents to investigate Mesopotamia, but up to the present no one seems to have realised the possibilities of Southern Persia. Yet this market should prove even more attractive. There are various points which should be borne in mind. First, the business methods of Persia are not those of Europe. A representative sent to Persia should be well acquainted with the character and mentality of the Persians. No Persian will ever accept a proposition merely on trust. Advertising and the use of illustrated catalogues are essential; but the representative must also be well provided with cars for his own use, and, if necessary, for immediate sale and delivery. It would be an advantage for the representative to know the Persian language, but this is not absolutely essential, as interpreters are nearly always available, and in any case enough Persian for working purposes can be picked up in a very short time. Secondly, the distances between the various centres are great. From Bushire to Shiraz is 185 miles, from Shiraz to Ispahan about 300 miles, and it is about the same from Ispahan to Teheran. In the first place, it would certainly be necessary to establish a depot at Bushire, but the representative must be prepared to travel frequently between the main centres. Supply and repair depots must therefore be established at various points on the route.

On the whole the difficulties of opening up the Persian market are not very great, and what obstacles there are are inherent in all pioneer work.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated April 28:—"Rain nearly general in Assam, Kashmir, and Malabar. Local in North-Eastern India, Southern India, Rajputana, Central Punjab, and North-West Frontier Province. Crop conditions generally good. All India special wheat forecast:—29,537,000 acres, 9,774,000 tons. (Corresponding forecast for last year, 23,425,000 acres, 7,447,000 tons.) Bombay cotton market weak. Fully good Broach April-May Rs.474, July-August Rs.466. Piece-goods market: Moderate demand, with prices steady. Calcutta gunny market quiet, with poor demand. Hessians nominally steady, but prices tending downwards. Bank rate in Bengal, 7 per cent.; Bombay and Madras, 9 per cent.

The traffic receipts of the Egyptian Delta Light Railways, Limited, for the week ended April 10 amounted to £E11,880.

The traffic receipts of the Suez Canal from April 12 to April 30 amounted to 6,870,000 francs, against 7,230,000 francs for the corresponding period of last year.

The directors of the Anglo-Egyptian Bank, Limited, have declared an interim dividend of 5s. per share, free of income tax, for the half-year ended February 28, payable on June 1.

The receipts of the Egyptian Markets, Limited, for the week ended April 21 were:—Cattle markets, £888; general markets, £608; total, £1,496; total for the year, £32,557. There were no receipts for the corresponding week of 1919, owing to local disturbances.

Egyptian Delta Land and Investment.—Dividend of 6d. per share will be paid on and after May 17.

BRITISH CHAMBER OF COMMERCE FOR MOROCCO.

Annual Meeting.

The fifth annual general meeting of the British Chamber of Commerce for Morocco was held in the Chamber's rooms at Tangier on April 7, Mr. G. F. Moore, president of the Chamber, being in the chair.

The chairman, in his address, spoke hopefully of the future of British commerce, notwithstanding the labour troubles, and said that the much greater interest taken by British manufacturers and merchants in Morocco, as evidenced not only by the large numbers of inquiries received by the Chamber, but by the increasing number of representatives of British firms visiting the country, and by the new branches of British houses being opened there was most encouraging. The critical period through which British commerce had passed after the Armistice had fortunately been safely weathered without injury to the country's credit.

Many of the subjects which the committee had had before them during the past year were then discussed in detail, such as the proposal for a British Consular post at Oujda, the sale of tribal lands, the export of produce to England (especially of eggs, chick peas, beans, and canary seed), Customs values, Hassani currency, British postal services, Bourses de Commerce, and mining rights.

Reference was made to the general dissatisfaction with the work of the company, which has the monopoly of discharging and loading at Casablanca—due very largely to want of foresight in providing sufficient means of handling cargoes and also, it had been alleged, to the favourable treatment of some ships in the supply of lighters. The hope was expressed that the existing restrictions on the export of grain would be entirely removed, this being especially desirable in view of the increase in the shipping facilities between Morocco and England which was confidently expected.

Referring to the institution of Bourses de Commerce, the president drew attention to the detrimental effect these would probably have on British interests if they were made applicable to British subjects, particularly in marine insurance and chartering business.

The continued delay in completing the roads between Tangier and Rabat had been a great disappointment. It could only be hoped that they would be finished this summer, though, after so many unfulfilled promises it did not seem safe to rely on any official statements about those roads, which were of such importance to the commerce of these zones.

Weather conditions had been most favourable, and, from all reports, a most prosperous year might, he thought, be fairly expected. The depreciation of the franc militated against British imports, but the demand for British goods was increasing notwithstanding this difficulty. The question of British schools had made progress, and he was very hopeful of their eventual establishment. A Dahir regarding schools had been published during the year; no doubt the Home Government would take care to safeguard British interests in this respect. The interruption in the publication of the Chamber's *Journal*, due to circumstances that were unavoidable, was most regrettable, but the committee and editor were doing their best to bring it up to date and to continue it with greater regularity.

The president then spoke of the great loss the Chamber had suffered by the death of Kaid Sir Harry Maclean, their first president, who had done so much to encourage the committee, and was so devoted to the objects of the Chamber. Sir Harry Maclean had taken a very special interest in the proposed British schools in Morocco, and had spared neither time nor energy in helping to bring the movement to a successful issue.

The report was duly adopted, as was that of the treasurer.

A proposal to reduce the numbers forming a quorum at the general meeting from 50 per cent. of resident members to one-third was passed. The retiring members of the committee were all re-elected, and Sir Basil Scott was elected to fill a vacancy. After the usual votes of thanks to the officers had been passed a very interesting discussion took place on the demonetisation of Hassani, and other matters, in which Sir Basil Scott, Mr. Weir Brown, Mr. Penry Cooper, the president, and others took part.

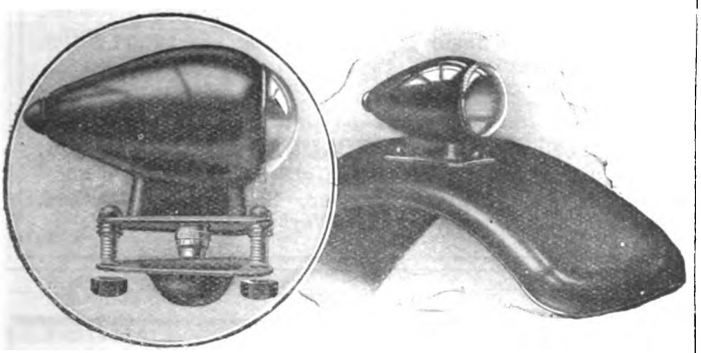
ENGINEERING.

Marine Oil Engines.

There is undoubtedly a future for the marine oil engine, and the next few years should show a great increase in their use. In the United States a great number of vessels, of from 2,500 to 3,000 tons deadweight capacity, have been fitted with engines of this type, the chief advantages being the great saving in bunker space, which permits of larger cargo room, and the facility and speed with which fresh supplies of fuel oil can be put on board. Usually twin-screw equipment is installed, consisting of semi-Diesel or hot bulb engines up to 500 horse-power. Swedish oil engines have been increasingly popular, and one of the big American concerns is now building engines of this type under licence. That country has also become noted for Diesel engines for marine work, but there is no doubt as to the ability of British firms to turn out an equal, if not a superior, product from their shops. The two-stroke Diesel engine is being made by several firms for marine work, and one of the largest vessels fitted with this type of engine had two power units, each of 3,200 indicated horse-power. Certain changes in design were necessary, as compared with the ordinary type of engine, and so far it appears that the equipment has given perfect satisfaction.

A New Side Lamp.

I have just had an opportunity of seeing a new type of electric side-lamp for fixing on the mudguards of a car, and, as the illustration shows, this is a smartly designed article which should command a ready sale. From an engineering point of view the construction leaves nothing to be desired;



NEW ELECTRIC SIDE LAMP FOR MUDGUARDS.

the body is spun in one piece so that there are no joints to give way, and the front lens is of the well-tried bull's-eye pattern. A feature of interest is the provision of a ruby lens at the back. The plate for fixing the lamp to the underside of the mudguard is cupped out so that it completely covers the lamp adaptor, thus making it practically watertight and mud-proof. The fixing bolts are of ample size, and if properly screwed up in place, with a spring washer between the plate and each nut there is no possibility of it working loose. Messrs. Brown Bros., Limited, of Great Eastern Street, inform me that the lamps can be supplied at a very reasonable price in either brass or nickel finish, or, if desired, in the all-black finish which is now so popular.

Packing for Export.

A number of complaints have reached this country recently from buyers in the Near Eastern and other markets as to the methods by which machine tools, small engineering appliances, and pieces of more or less delicate machinery are packed for export. It appears that in many cases these are not sufficiently protected against rust, and are not firmly fastened in place to the packing to prevent damage by vibration. In some instances the packing-cases themselves in which the goods are sent are of too light a character, and come to pieces during transit. In other cases, again, they are not strong enough to bear slinging during transhipment.

BUYING AGENTS OR AGENCIES FOR TIMBER, IRON, ENGINES, MOTOR CARS, MOTOR CAR ACCESSORIES & HARDWARE.

Telegraphic Address: "CARIBOU," CAIRO.

The net result of all this is that the condition in which such machinery is received is such as to give rise to a good deal of dissatisfaction on the part of both the merchants who import such goods into their countries and the buyers. It is said that before the war the German products were always packed with exceptional care, and it seems a pity that our exporters should run the risk of obtaining a "bad character" in Near Eastern markets for the sake of a little extra care and attention to detail in such matters as packing and protecting machinery from rust and accidental damage.

It seems that one of the chief causes of trouble is the packing-case in which the goods are sent. It should be constructed of stout pine, and for this purpose the most resinous boards obtainable should be used, as they are more damp-proof than the dry, white variety, which readily absorb moisture. These cases should be well strengthened inside by means of battens, and these should be continued round the bottom and sides and across the top. It must be remembered that to the average dockyard hand all sides of a case are alike, and any package is liable to be stowed or slung up and craned with that side uppermost which first comes to hand.

A further point to remember is that the type of labour employed always prefers to put the crane claws on to a case rather than go to the trouble of fixing the slings in position. Claws bring an undue strain on certain parts, and so may cause the whole case to collapse. To prevent clawing it is just as well to make the outside of the case perfectly smooth, so that no projections actually invite this kind of treatment. It is, however, advisable to fix runners across the bottom of the case, as these are likely to be of assistance in many ways, in addition to being an extra source of strength.

MISCELLANEOUS TOPICS.

Steam Cultivating Tackles for India.

The Conservator of Forests of the United Provinces, India, has recently asked the Department of Overseas Trade to be placed in communication with British firms manufacturing agricultural steam engines for cable ploughing and cultivation, together with the necessary implements. It is intended to break up considerable areas of heavy grass land in the United Provinces preparatory to afforestation. At present, it appears, only one set of tackle is required, but if the experiment prove successful the work will be greatly extended and more plant purchased. Manufacturers who are interested are asked to avail themselves of this opportunity. The fact that it should be necessary to apply to the authorities here for the names of firms suggests the inadequate system of advertising British goods, especially machinery, in the East. Obviously, if an official cannot find the manufacturers he requires, how can private buyers be expected to do so? It is admitted that American and Japanese manufacturers, whose recent efforts to gain the markets in the East are well known, owe their success to a great extent to their system of publicity and to the mediums they use in advertising, which enable all buyers in the East to find them.

Commercial Aviation.

Much has been heard of the wide scope open to the aeroplane in business activities. But until now little beyond the practicability of certain prescribed air routes has been demonstrated by actual flight. Such tours as have been made were on a comparatively small scale and were not undertaken to cope with special commercial conditions. The Government having offered no practical support or encouragement, it is left to private enterprise to prove the industrial value of the aeroplane by actual use under pressing circumstances.

On May 10 Mr. W. J. McCormack, head of the sales organisation for Dunlop solid tyres, started on a return business tour

from Birmingham to Dublin in an Airco 9 machine, piloted by Mr. Harry Shaw. This will be the first of a series of similar flights which have been made necessary by the enormously increasing sales organisation of the Dunlop Rubber Company. It is anticipated that considerable interest will be aroused in all localities along the route.

Trials of Tractors in India.

Mention was made recently of the trials of agricultural tractors which were organised by the Indian Government at Nagpur. These trials were carried out under exceptionally difficult conditions, the ground being hard-baked after five rainless months, and it was considered doubtful even whether the tractors would be able to perform their allotted tasks. Five machines competed—the Austin, Cletrac, Fiat, Fordson and Lauson—the last-named being a particularly powerful American machine. The Cletrac machine was withdrawn. In the four hours' test the Austin and the Fiat ran each other rather close, the British tractor having the advantage of paraffin consumption, the quantity consumed being 37½ pints for ploughing 1¾ acres to a depth of 7.07 inches. On the final results a gold medal and Rs.500 was awarded to the Fiat tractor, and a silver medal and Rs.500 to the Lauson, while a special reward and Rs.1,000 was made to the Austin, which was adjudicated the best in the light tractor class.

Agricultural Machinery for Adrianople.

It is believed that there will be great industrial and agricultural enterprises in Thrace in the near future. That region is naturally rich, and has important outlets in the Black Sea, the Sea of Marmora, and the Ægean Sea. This happened after the Russo-Turkish war in 1878, and after the recent Balkan war, when enterprising business men hurried to Macedonia, Bulgaria, Thessaly, and other districts, buying large estates and unexplored lands and mines at extremely low prices, and establishing industries which are now flourishing concerns. The manufacturing engineer should have a great opening for business there, and it is to be hoped that British manufacturers will be on the alert, as it is reported that Continental and American competitors are already making their preparations. The district of Adrianople is one of the most important in Thrace for industrial and agricultural enterprises, and a few remarks regarding pre-war conditions as regards the use of agricultural machinery should be of interest to manufacturers. In recent years there has been a marked movement amongst the Adrianople agriculturists in favour of up-to-date implements and machinery. The richer landowners started first, but later even smallholders began to adopt modern implements, especially ploughs, which were imported for the most part from Germany. Seed classifiers and cleaners were supplied principally by French manufacturers, sawing machines and harvesters mostly by America; whilst a number of sets of steam-threshing machines that were in great use were supplied by British engineering firms. For these threshing sets there will be a great demand.

Portable Threshers for India.

The trade with India in agricultural machinery is reported to be developing greatly. Ploughs for bullock haulage are in big demand, as are mowing machines of a light pattern, but the most improved line is said to be that for small-size portable threshers. It is said that a substantial trade has been done in this direction, because it has been found that the small machines are far more easily transported than the heavier and bulkier types—an important point to consider when the state of the Indian roads and bridges is borne in mind. Machines for India have to be made of special wood to withstand the onslaughts of insects, and it is asserted that certain developments which have taken place in this respect quite recently have made British threshing machines very much in favour with Eastern users.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 24 amounted to £8,509.

A Ministerial order has been issued fixing the maximum prices for sugar throughout Egypt. Loaf sugar will work out at 7½d. per lb.

LANCASHIRE COTTON.

Trade and the Exchanges.

(From Our Own Correspondent.)

Manchester, May 10.

The feature of interest in the market during the past week has been the amicable settlement of the wages dispute. Although the negotiations have been protracted the advance secured by the operatives is about equal to what was expected. It is satisfactory to know that wage rates are now stabilised for twelve months. Business in the market has continued very quiet. There have been no signs of increased enterprise on the part of our customers. Trade is being held back by the unfavourable state of Eastern exchanges, the recent fall in the price of silver and the value of the rupee being pronounced. The Egyptian cotton crop is reported to be making rather better progress, but prices keep fairly steady. Egyptian yarns have again been purchased sparingly and rates have tended to favour buyers, especially in the ordinary qualities of carded descriptions Demand in piece goods for the Near Eastern outlets has been poor. For Egypt and the Levant only odd lots have been sold. Fresh buying is not likely to be undertaken until improved reports are received from the other side. Operations for India in cloth have been within a small compass, well-known grey staples being neglected. Very little has been done for China. Printed and dyed cloths have attracted some attention for South America. Manufacturers are still not selling the output of the machinery, and there is a tendency for ground to be lost. American yarns for home use have been dull of sale, and, compared with a week ago, wefts are easier. Some offers have been mentioned in bundles for India, but yarns bought for China have been offered for re-sale. There is nothing doing at the moment in descriptions suitable for the Levant.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to February 29, 1920 (New Style January 14 to March 13, 1920).

	Monopolies, tobacco, stamps, stamped paper & Naxos Emery	Piræus Customs.
	Drachmae.	Drachmae.
Gross receipts, February, 1920	4,416,250	4,890,161
Do. do. 1919.....	2,935,626	2,675,058
Estimated receipts for 2 months (Law of Control)	4,816,666	1,783,333
Actual do. do. 1920	9,187,335	9,828,421
Do. do. do. 1919	7,284,485	5,351,010
Difference between estimated and actual receipts for 2 months 1920	+ 4,370,669	+ 4,938,259
1919	+ 2,467,818	+ 3,567,677

Of the surplus over the estimated receipts from monopolies, tobacco, stamped paper, stamps and Naxos Emery, 49 1/5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos Emery and the Piræus Customs are converted into drachmae at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

ALEXANDRIA WATER COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN that the Forty-second Ordinary General Meeting of the Shareholders will be held at the Company's Offices, Alexandria, on Tuesday, the 1st June, 1920, at four o'clock in the afternoon, for the transaction of the ordinary business of the Company, pursuant to Act of Parliament and also to pass the two following resolutions: INCREASE OF THE CAPITAL OF THE COMPANY: Resolution 1.—To increase the Capital of the Company by the creation of 20,000 Shares of £5 each nominal, to be offered to the Shareholders at par. Resolution 2.—To authorise the Board of Directors to issue these Shares, either in part or all, at such period as it may consider favourable in the interests of the Company.

Holders of Share Warrants to Bearer desiring to attend or to be represented at the Meeting must deposit their Share Warrants in London before the 20th May, 1920, or in Alexandria before the 28th May, 1920, until after the Meeting, at Messrs. Barclays Bank, Ltd., 1, Pall Mall East, London, S.W., or at the Anglo-Egyptian Bank, Ltd., Alexandria, or at some other approved bank in London or Alexandria.

By order of the Board,
J. E. CORNISH,

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.

Some quantities of currants and figs were offered at auction last week. The quality of the fruit was generally poor, and the prices realised were consequently moderate. The currants were disposed of at from 18s. to 32s. per cwt., and the figs at from 30s. to 43s. per cwt. Apparently, the stocks of currants on hand are for the most part of moderate type, and the lower prices resulting have had the effect of bringing about an increased demand. There is little fresh to report with regard to sultanas.

Sugar.

The market for free sugar has been steady but quiet, manufacturers showing a tendency at the moment to hold their hands. There has been a steady demand for home refined at the official rates.

Coffee.

A quiet tone has characterised the market, Indian and Uganda qualities being in chief request. Indian has been done at from 145s. to 170s., Mocha at 175s. to 190s., and Uganda at 145s. Stocks in London amount to 90,226 bags of Brazilian, 97,600 packages of Central American, and 100,600 packages of other kinds. The futures market has been firm with an inactive tendency.

Messrs. Reynolds and Gibson report as follows for the week ended May 6:—A slight improvement in the more distant positions of futures in our market is noticed this week. September has changed hands at 106s., and the nett balance in the interval is an advance of 6d. to 3s. On the spot, conditions continue depressed, and the moderate supplies brought forward during the week failed to excite much interest. Home trade buyers have been able to pick and choose parcels which particularly appealed to them at what they considered satisfactory prices, whilst the remainder of the offerings had to be withdrawn. Cost and freight offers continue more or less nominal, but a further re-offer from France of Government coffee on a very low basis has been reported. Brazil has been firmer, and prices on the spot have shown an improving tendency, although receipts at Rio have continued on the large side.

New York futures have presented a very steady front with a slight advance registered each day, the net gain on balance for the week being 55 to 62 points. In the early part of the week under review there was a noticeable liquidation of May with replacing lines in September and December. Nothwithstanding the large account that must for some time have been in process of adjustment in May, there has at no time been any marked decline of price in this month, which we think confirms the strong undertone of the market and the support given to these deliveries by the trade. Anything unwieldy would quickly have manifested itself in a sharp break in prices with correspondingly sympathetic declines in all other positions. During the week an inclination by Brazil to accept bids for July/September shipment had a chilling effect upon New York futures and rather kept in check the little advancing tendency. Since then sentiment has improved with firmer Brazilian advices, more inquiry in New York from interior points for the article, and forecasts from the trade of an increased demand. Deliveries from warehouse in America for the first 19 days of April gave evidence of the serious effect of the strike, as these were 426,297 bags, compared with 659,160 bags last year. Although the strike is over, great delays must result for some time, harrassing and hampering the coffee trade and making business very difficult to conclude. The demand exists for increasing quantities of the commodity, helped, they say, by the Prohibition Law, and with an unimpeded receipt and delivery of the goods, greater quantities could, doubtless, be absorbed in U.S. than is practicable at the moment through traffic disorganisation. In regard to the immediate future, we have no further estimates than those already given, of the coming Brazilian crop, nor whether it is an early or late one. If an early one, with this congestion in New York and no free disposition in quantity at present feasible to European countries, heavy receipts in Brazil might temporarily keep prices fairly stationary at about to-day's level with fluctuations within a cent. either way. But sooner or later we think the strength of the position will assert itself in supply and demand, so that we still favour the "Bull" side and incline to purchase upon any decline.

Oilseeds.

Seeds close rather flat. Indian linseed has been done at 41s. 3d., and La Plata afloat at 36s. 6d. Rapeseed has been in fair demand during the week round about 42s. for Toria, and 39s. for Cawnpore. Indian cottonseed has come to business at 15s. 3d.

Oilcakes and Seedoils.

Linseed cake has been done at 22s., while there has been a fair demand for coconut cake at 11s., rapeseed cake at 12s., and soya bean cake at 22s.

Oils have been quiet. Linseed oil is quoted 97s. spot. Rape oil is 110s. refined and 100s. crude. Turpentine is considerably lower at 190s. spot, and 165s. May-August.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended April 24:—The sales this week on our market amount to 19 cases; 16 cases extra Carahissar at piastres 1,200 per oke = 19s. per lb. c.i.f.; 2 cases lower grades at piastres 1,160 to 1,125 per oke = 17s. 3d. to 17s. 8d. per lb. c.i.f.; 1 case Islamkeuy (soft) at piastres 1,300 per oke = 21s. 9d. per lb. c.i.f. The exchange for cheque on London to-day is piastres 470 per £ sterling and 0.83 dols. per one Turkish paper £. The arrivals are 1,565 cases, against 375 at same date last year. Our market closed with buyers at 6d. per lb. lower than above prices, but this price has not tempted any sellers.

SHIPPING INTELLIGENCE.

It is announced by the Ministry of Munitions that the sale of surplus warcraft in Mesopotamia has now produced over a million and a-half sterling. The disposal of the craft was entrusted to Lord Inchcape, who gave his services free, and stipulated that no company in which he was interested should receive preferential treatment. He offered 1,194 vessels for sale by sealed tender. Offers for 362 vessels were accepted at a total price of £1,540,612, and in every case the highest offer was accepted. Other vessels, offered to the provincial Governments and railway companies of India, are expected to realise £250,000. The remaining vessels will be sold as opportunity offers.

A buoy has been placed alongside the large jetty at Casablanca for the use of mail boats from Marseilles and Bordeaux. Another buoy is in course of being installed. Twelve other posts will be set up in the roads when the equipment, which is on requisition, has reached its destination.

Shipping at Malta.

(From Our Own Correspondent.)

Malta, April 15.

The latest arrivals at this port have been the s.s. Marental from Liverpool and the s.s. Kokoma. H.M.S. Espiegle, from Gibraltar, and the s.s. Antagone, from Constantinople, have touched here, en route to Port Said and Valenza respectively. The s.s. Benbow has left for sea, the Kursk for England, and the s.s. Alexandra Woermann for Gibraltar.

H.M.S. Kildonan Castle is held up here owing to severe engine trouble.

TRADE OPPORTUNITIES.

BRITISH and Foreign Manufacturers, Importers, and Exporters should consult the Commercial and Intelligence Department of the Anglo-Latin-American Press Co., Ltd., 4/5, Copthall Court, London, E.C.2, if they desire to develop their business in foreign countries. Full particulars will be given free of charge.

CLEMENT D. SETI, 5, Rue Serafieh, P.O. Box 1099 Cairo, desires to represent Manufacturers or Exporters of Tinplate, Blue for washing, Soap, Textiles, Oils, Paper, Silk, Drapery, etc. Accepts all propositions "delcredere"; advances on consignment goods; accepts all usual commercial arrangements; good references.

COAL PRODUCTION IN YUGOSLAVIA.

According to a recent report, the total production of coal in Yugoslavia during 1919 was 2,494,058 tons, as against 3,587,432 tons in 1913. It is stated that the prospects for the production in 1920 are very favourable. The production during the month of January was 259,025 tons, as compared with 210,232 tons in January, 1919. The principal difficulty now encountered in the production of coal is that of transport. Several mines in Serbia have large depots of coal, which, owing to the lack of trucks, cannot be transported, and they have been obliged to stop working.

OPENINGS FOR BRITISH TRADE IN CRETE.

With the exception of certain foodstuffs it may be said that every kind of goods produced in the United Kingdom are required in Crete, especially textiles, ironmongery, tin-plate, galvanised sheets, sodas (carbonate and caustic), empty bags, nickel-plated goods, earthenware, china (ironstone) for dinner and tea sets, oil engines, and stationery, says H.M. Consul at Canea in a recent report. Certain United States interests have a strong hold upon the trade in cotton goods, though Barcelona firms now compete in textiles in general ,and Milan firms in drills, twills, and other cotton goods, while Japan supplies whites and greys (cabots), transhipped at Port Said or Suez. France sends silks and velvets, and also pharmaceutical drugs and medicines.

The representation of British firms is often affected by the appointment of an agent at Athens for the whole of Greece, including Crete. These agents appoint sub-agents in the provinces from whom they usually levy commission. It would be far better for British firms, desirous of doing business with Crete, to appoint a separate agent for Crete, or, better still, an agent in each of the three important towns of Canea, Candia, and Rethymo, which might still further promote their interests. A competent commercial traveller, conversant with the language and acquainted with Greek customs and business methods, would reap an immediate harvest for any British firm if commissioned to travel through Crete with appropriate samples and price lists, and to grant such terms of credit or payment as he judged, on mature enquiry and consideration, to be both expedient and safe for his employers.

Some of the Greek steamships engaged in the coasting trade, and plying between Piræus and Cretan ports, after touching at Cretan ports, proceed to Alexandria and Port Said, and return to Cretan waters. Apart from Greek steamers, there is a fortnightly service of former Austrian-Lloyd steamers now belonging to the Lloyd Triestino Company, and flying the inter-Allied flag, from Trieste to Constantinople, touching at Venice, Corfu, Canea, Alexandria, Smyrna, etc., and also a fortnightly service of the same company's steamers sailing from Trieste and Venice for Patras, Piræus, Salonika, Constantinople, Smyrna, Syrian ports, Port Said, Alexandria, and Canea. These vessels vary in size from 1,500 to 1,800 tons.

A British steamer of a well-known line called at Candia during November, 1919, taking considerable cargo there, but goods from the United Kingdom destined for Crete almost invariably undergo transhipment at the Piræus, which, however, entails considerable disadvantage and delay.

Local shipbuilding is confined to the construction of lighters and small sailing vessels.

(Over 80 Branches in the Near East.)

The Bank has been established for over 55 years, and has its own Branches or Agents in every important commercial town in the Near East.

The Offices of the Bank at 26, Throgmorton Street, London, and 25, Pall Mall, Manchester, can now enter into transactions with all the above-mentioned places, subject to British Government regulations and local restrictions where in force.

Manufacturers, Traders and others are invited to correspond with the Bank, where all possible facilities will be afforded for the re-opening of business.

The Bank makes advances upon Bills of Lading and other export documents.

Drafts and telegraphic transfers issued.

Letters of credit granted.

SPECIAL MARKET REPORTS.

The following information is compiled from the weekly bulletins received at the London office of the Imperial Ottoman Bank from its correspondents in the Near East:—

ALEXANDRETTA, April 6.

The political situation continued to grow worse during March. There were no transactions between Aleppo and Alexandretta, and goods from Europe for the interior have been diverted viâ Beyrout.

The railway line between Topra-Kalé and Aleppo is continually destroyed by bands of pillagers, and even the military communications are cut.

The trade of this port is at a standstill, and the situation does not appear likely to improve very soon

PANDERMA.

The following particulars are taken from the report for March:—

The abundant rains that fell during the month have damaged such crops as wheat, barley, and oats, on which in particular great hopes were based.

Except for some exports of merchandise, business has been almost nil. The commercial community waits impatiently for the signing of the peace, and for the end of a position which is becoming unbearable.

STAMBOUL, April 17.

The stagnation of business continues. Prices are a little firmer owing to the high level of prices for manufactures in centres of production and the strength of the English exchange, but the lack of demand still prevails. Financial embarrassment dominates our market, and the sharp fluctuations in the exchange only make the position worse. Some merchants have re-exported their goods to England. New arrivals are decreasing.

According to indirect news from Anatolia, there is going to be a very brisk demand for manufactured goods in the interior, so the outlook for the future is encouraging; but the resumption of business depends on the restoration of communications and the re-establishment of order.

NEW COMPANIES.

Black Sea Shipping.

The British Black Sea Shipping and Oil Company has been registered with a capital of £30,000 in £1 shares. Objects: To carry on business as indicated in the title.

Yugo-Slavia Syndicate.

The Yugo-Slavia Syndicate, Limited, has been registered as a private company with a nominal capital of £10,000 in 9,800 ordinary shares of £1 each and 4,000 deferred shares of 1s. each. Objects: To carry on promotion, financial, commercial, industrial, mining, exploration, manufacturing and other businesses. Solicitor: C. H. Gurney, 1, Fredericks Place, Old Jewry, E.C. Registered office: 65, London Wall, E.C.

Asiatic Fisheries.

The Asiatic Fisheries, Limited, was registered as a private company on April 17 with a capital of £300 in £1 shares. Objects: To search and explore all seas, rivers, etc., adjacent to the Persian Gulf or elsewhere supposed to contain pearls and other precious stones, shells, sponges, tortoise shell, and other products of the sea.

Burmese Minerals.

The Burmese Minerals Exploration, Limited, was registered on April 16 with a capital of £25,000 in £1 shares. Objects: To carry on business as indicated in the title. Registered office: 4, London Wall Buildings, E.C.

ON CHANGE.

(FROM OUR OWN CORRESPONDENT.)

THROGMORTON STREET, Monday.

We have had a very irregular market this week for Egyptian securities, but there has been a much-improved tone to-day, and a pretty large business has been done in Government stocks. Egyptian Unified, after being down to 68¾, close about 70¼, a rise of ⅝ since last week; but Egypt 3½ per cent. Pref. are closing ½ down at 57½, after having been lower. City of Alexandria Bonds have dropped half a point to 64½. Turkish 4 per cent. 1891 are 3½ points down at 61½, but Turkish 4 per cent. Unified have improved a point to 34, and there are only buyers round the current level.

In Bank shares Nationals, after dipping to 19¾, close only 1-16th off at 20 3-16. Agriculturals are about unchanged at 4¾ x.d. Bank of Abyssinia are 2s. 6d. higher at 32s. 6d., and Land Bank of Egypt have advanced ⅛ to 5⅝.

In Land shares Aboukirs are fractionally firmer at 36s. 3d., Egyptian Consolidated Lands, after rising to 3s. 6d., close 4½d. up at 3s. 4½d Delta Lands, on the other hand, are 6d. down at 15s., and Egyptian and Foreign Trusts have shed a like fraction at 15s. 3d. Gharbieh Land have put on ⅛ at 3⅝, and Sudan Plantations, after having dropped to 4, finish ⅜ up at 4½. A feature has been the sustained demand for New Egyptian shares, which, on persistent buying, advanced at one time to 38s. 9d., finishing 2s. 3d. up at 38s.

In Miscellaneous descriptions Alexandria Water have dropped ⅜ to 10, while Salt and Sodas are 1-32 firmer at 2 25-32.

Amongst Oil shares Anglo-Egyptian B are 5-16 higher at 3 15-16, and Roumanians have advanced 6d. to 19s. 6d.

In Greek securities the Government stocks are all unchanged with the exception of the 1902 Loan, which is half a point down at 43½, the 1910 Loan, which is also half a point down at 39, and Currant Bonds, which have dropped one point to 91. Bank of Athens shares are ⅛ higher at 3⅜.

MACMANUS BROTHERS, LTD.

A reconstruction has been made of this company. The board of directors consists of Mr. W. B. Fletcher, managing director of the Fletcher Hardware Company, Birmingham (chairman); Captain E. B. MacManus, director and secretary; M. Michel Agelasto, foreign director; and Mr. Stanley Morton, managing director. The capital of the company has been increased by £25,000. The shares are all held by the directors.

The Yugoslav Minister of Finance has taken steps to prohibit the export of the new "crown-dinar" notes.

A Reuter's message states that the Roumanian Cabinet has approved the denunciation of the commercial treaties with foreign countries. These conventions having been concluded in 1907 for a period of ten years expired in 1917. The Government will draw up a new series of commercial treaties.

According to the Indian Press, the proposed India Exhibition at Calcutta, which was to take place during the visit of H.R.H. the Prince of Wales, has been abandoned as a consequence of housing and transportation difficulties. H.M. Trade Commissioner at Calcutta states that it is difficult to estimate to what extent, if any, these difficulties are likely to interfere with the exhibition of British manufactures which it is proposed to hold in November-December, 1921.

An order for the early delivery of fifty heavy locomotives for Roumania has been placed (states *Modern Transport*) with the Baldwin Locomotive Works, of Philadelphia, U.S.A., whilst Messrs. William Beardmore and Sons, Limited, of Dalmuir, Glasgow, are negotiating for the delivery of no fewer than 500 locomotives, also for Roumania. It is understood that Messrs. Vickers, Limited, are associated with Messrs. Beardmore in this contract, and that arrangements are being made for the locomotives to be paid for, either in part or in entirety, by deliveries of grain and oil from Roumania.

NOTES OF THE WEEK.

The peace terms put forward by the Allies for Turkey's acceptance or rejection were duly handed to the Turkish Delegates on May 11, and the following day an official summary of them was issued. The principal conditions, as set out in this summary, are given on another page, and the territorial adjustments are dealt with in our leading article. The ceremony of handing the terms to Tewfik Pasha and his colleagues was very short, and the Turkish Delegates are described as visibly depressed. The arrival in Constantinople of the terms is reported to have caused great despondency at the Porte and the Palace, while the Turkish Press is unanimous in condemning them as unjust and in describing them as unacceptable.

These things were, of course, inevitable. Inevitable, too, was the defiance of the Nationalists, who, having been allowed so long to attitudinise and represent themselves as the only genuine patriots left in Turkey, appear now to have developed strength enough to make them a serious problem for the Allies to tackle. Unfortunately, moreover, some of the Allies have since the Armistice by no means "played the game" in regard to Mustapha Kemal and his followers. In this connection the letter which we publish this week from our Constantinople Correspondent may be studied with profit, and will be found to emphasize most strongly the point on which we have already insisted, that the Allies must work loyally together, and that if strong action be called for in regard to any dealings with Turkey, all of them must take their share in it.

It is officially announced that Mustapha Kemal and some other Nationalist leaders—including the notorious "Ahmed Rustem," formerly Alfred Rustem Bilianski, ex-Ambassador at Washington—have been condemned to death by default for high treason and rebellion; but the arm of Turkish justice is just now neither long nor strong, and it is to be feared that the majority of the condemned, being out of reach of the Porte, will take their sentence very calmly. Meanwhile the operations against the Nationalists by the Volunteers appear to be losing most of the driving power that they had behind them a short time ago, because, it is suggested in some quarters, the two sides are wondering whether they will not shortly be joining hands to resist the application of the peace terms. Finally, it has to be placed on record that the Grand Vizier has been the object of an attempted assassination by a policeman, who fortunately did not achieve his purpose, and was arrested. Right-minded people will be glad that the cowardly attempt failed, and will regret that Damad Ferid Pasha should have had to pass through such an experience at a time when he has so many troubles to contend with.

On May 13 M. Venizelos announced in the Greek Chamber the terms of the Turkish Peace Treaty, and with the aid of a large-scale map, showed his audience what territorial gains Greece is to receive as a result of entering the war on the side of the Allies. He was also able to inform them that, with the exception of Rhodes, the islands of the Dodecanese surrendered by Turkey to Italy will be transferred by the latter to Greece when the Treaty is signed. The demonstration and the announcement naturally called forth intense enthusiasm. M. Venizelos took the opportunity to declare that Greece is not at all jealous either of Yugoslavia or of Roumania, though both those countries have become larger than Greece; and that once the question of Northern Epirus is settled, as it will be in the near future, Greece will have no further aspirations in the north. This is as it should be. Greece will have quite enough to occupy her in organising her new territories and putting the administration in old and new territory alike upon a thoroughly sound basis; and if she does that, she need envy none of her neighbours, for she may surely look forward to a most brilliant future.

M. Vesnitch, formerly Yugoslav Minister in Paris, recently returned to Belgrade to make yet another attempt to form a Coalition Cabinet; and a telegram dated May 16 makes the welcome announcement that his efforts have been successful, and that he submitted his list of Ministers to the Prince Regent on that date. The happy result is doubtless partly due to M. Vesnitch's tact and his experience acquired in diplomacy, but it is probably due in part to the growing fear of the Communist danger which has made itself felt among men belonging to all the moderate parties in Yugoslavia of late. M. Vesnitch's new Cabinet contains nine members of the former Union group of parties and eight of the Democratic group. M. Davidovitch, leader of the Democrats, is Minister of the Interior; M. Protitch, the Old Radical leader, is also in the Cabinet, apparently without portfolio, and Dr. Trumbitch remains Minister for Foreign Affairs. Upon the whole the combination appears to be a strong one, and the Constituent Assembly looks nearer to realisation than it has for many months past.

Last week, in Westminster Abbey, a tablet to the memory of the late Earl of Cromer was unveiled by Earl

Digitized by Google

Curzon of Kedleston. In the course of an eloquent address which he delivered subsequently Earl Curzon said very truly that Lord Cromer had built his pyramid on the base of a happy people, and that he was Egypt's regenerator and saviour. It is sad to be forced to realise that the happiness of the fellaheen, who form the bulk of Egypt's people, is in danger of being destroyed by that comparatively small and really far less important class known as the effendis, who, if they had their way, would certainly undo much of the work that Lord Cromer did. Happily, there are signs that moderate Egyptian opinion is becoming more than a little tired of the extremists and their tactics, and intelligent Egyptians are beginning to recognise that violent methods, far from serving any good purpose, will only discredit their country in the eyes of the world. In this connection it is satisfactory to note that the rector of Al Azhar has forbidden political speeches in the mosque.

A depressing picture of Persia to-day, is drawn by a special correspondent of *The Times* in a message despatched from Teheran on May 11. A small Bolshevist force, he says, is at Astara, just across the frontier; and it is clear from his message that Bolshevist propagandists have been busy on both sides of the border, and have found ready listeners in Persia. Bolshevist Russia, these gentlemen explain, objects to the presence of British troops in Persia; so Persia must either get rid of them or take the consequences. In view of the present undeveloped state of Persia's own forces, this sounds rather like the wolf urging the flock to get rid of the sheep-dog; but the appeal—or command—has not, apparently, fallen upon deaf ears. A semi-official journal has been so impressed that it argues that "the doctrines of Bolshevism closely resemble the pure gospel of Islam," and that "the Bolshevists are the spiritual friends of Persia." Whatever the doctrines of Bolshevism may be, its practices are not such that any friend of Persia would wish to see it gaining ground in that country; and it is deplorable to find that the attempt to turn the present dissatisfaction in the Moslem world to its own account is meeting with some success.

The remedy for this kind of thing, so far as Persia is concerned, would seem to be active and intelligent counter-propaganda, combined with greater expedition in the introduction of reforms. The Persian Cabinet has not yet reached any decision in regard to the report of the Anglo-Persian Military Commission; its failure to summon the Mejliss to its assistance is resented by the majority of politically-minded Persians; and its attitude towards Bolshevist Russia is, to say the least, disappointing. As to the last point, it is easy to find excuses for Teheran and to give explanations of its conduct; and as to the second, *The Times* correspondent declares that "the Persian public perseveres in the belief that Great Britain prefers to see Persia without a Parliament." That belief is a mistaken one, of course; but it is to be hoped that Persia's Parliaments in future will work more and talk less than those of the past. The latest news available at the time of writing is that the Bolshevists have crossed the frontier near Astara, and formally demand the withdrawal of all the British forces from Persia.

We have so often had occasion to complain of inordinate delays in the receipt of news from India that it would be ungraceful not to recognise the improvement manifested in the last few weeks, during which the Press cables have come through with almost "pre-war" regularity. The next change to be desired is in the substance of the news, which continues rather depressing: strikes and political agitation, Amritsar and Mr. Gandhi, these topics recur with wearisome iteration, and we seem to discern that exacerbation of comment which Anglo-Indians associate with the seasonal rise of temperature. At the same time, it must be admitted that the Khalifate affair and the Hunter Report involve really serious menaces, and until these obstacles have been negotiated we can scarcely expect to hear that the country has settled down to the serious business of making the new constitution a practical success. Mr. Gandhi will go on for some time yet, and we fear that the Labour question is likely to be worse before it is better, but Amritsar at least ought to be got out of the way as soon as possible.

We do not, of course, anticipate that the publication of the Hunter Report will be the end of the Amritsar question. There is, unfortunately, abundant evidence that the minds of partisans are made up in advance; the abscess has festered, and the immediate results of lancing it are bound to be unpleasant, but the operation is necessary, and the sooner it is performed the better. We regret the tendency to make heroes, just as we condemn the attempt to make criminals, of the officials whose conduct has been the subject of the investigation, but we are bound to recognise that it is the inevitable result of delay. We do not doubt that adequate explanations for the delay which has occurred can be brought forward, but explanations will certainly do no good; the mischief increases day by day, and there is no remedy except publication of the report, and announcement of the decisions reached on it by Government.

The anniversary meeting of the Royal Asiatic Society, the first held in its new house in Grosvenor Street, was marked by the presentation of the prizes offered to the public schools for essays on some subject chosen from the history of India. We sometimes wonder how far such competitions serve their purpose of disseminating sound knowledge among the coming generation. A school library is rarely up to date, schoolboys have not usually independent access to the most recent literature, and knowledge of Indian history grows so quickly that a study based on Mill and Macaulay, or Elphinstone and Hunter, may result merely in the impression of obsolete errors on young and plastic minds. Perhaps this view is shared by the present authorities, for the subject announced for next year is the part taken by India in the war, a topic on which the competitors will have no chances of reproducing the mistakes of their predecessors.

We are indebted to the Head of the Moslem foundation at Woking for a copy of a pamphlet published at Lahore, which sets out the religious argument on the question of the Khalifate, and draws the conclusion that the maintenance of a strong Turkish Empire with complete supremacy over Arabia is essential to the integrity of that institution. The arguments are of a kind tolerably familiar to all who have studied the subject, and we confess that this type of theological special pleading leaves us cold; you start with an ambiguous text, gradually transformed into a doctrine by a succession of more or less intelligent commentators, you slip unconsciously from one meaning to another of each important word, you take narrow but deep ditches in your stride, and at last find yourself at the destination for which you started. We have always recognised the strength of the sentiment prevailing among Indian Moslems on this particular subject, but we cannot honestly say that our views regarding the basis of that sentiment have been materially influenced by the arguments contained in this pamphlet.

It is, however, worth noting that the school represented by the writer does not regard the location of the Khalifate as being immutable. In the first place, we are told that Moslems can change it by a vote of the majority, and the proposition is in itself reasonable, though we can recall no direct authority for it in the Koran. In the second place, two Moslem nations can fight the question out, and the prize goes to the victors, provided they have not enjoyed infidel support. As matters stand just now we fancy an election would count for little without an army on the spot; but we are glad to be able to agree with our author in the contention that the title of Khalif is one to be conferred by Moslems and Moslems alone, and we are not less glad to observe that this view is gaining ground even among Hindu politicians, whose support of the Sultan of Turkey must have given great offence to the orthodox.

THE WEEK AT HOME.

Lympne and Westminster.

The week has been a dull one politically. The meeting of the French Prime Minister with Mr. Lloyd George at Lympne, a quiet spot near Folkestone, has been welcomed as of good augury for the postponed Spa Conference, but little has been published as to the matters discussed, and the publicists have been reduced to making bricks without straw in their speculations. The Turkish treaty has been quietly left to specialists; and more domestic interest has been taken in the report of the Parliamentary Committee which was appointed to inquire whether a levy on war fortunes was possible.

They report that it is possible, but carefully refrain from saying that it is advisable—an omission that is being made the most of in the City, which remains utterly hostile to any such levy. Indeed, business men seem almost unanimous that they would prefer the excess profits duty to any conceivable capital levy. The general public, on the whole, remains sceptical as to the prospects of such a levy; and they cannot understand the difficulty, which both the Treasury and the Parliamentary Committee seem to find insuperable, of distinguishing between war profiteering and the ordinary increment of fortune through thrift. They believe that "where there's a will there's a way," and they blame the Treasury for discovering neither the will nor the way.

In purely House of Commons matters, the only noticeable episode has been an all-night sitting forced upon the House over an unimportant or at least generally agreed medical Bill. The Coalition wanted the Bill, Labour had nothing against it, and confined its criticism to constructive improvements and matters of detail; but the Independent Liberals were determined to assert themselves, and kept the House up all night with pure obstruction. Dr. Addison, the Minister in charge, bore with his opponents with exemplary courtesy and good temper, and got his measure through at the cost of a night's rest; the Coalition smiled, and Labour the next day made an angry protest, as it was fully entitled to, against these tactics.

The Pope and Peace.

An interesting and apparently authentic account is published in one of the French papers of the activities of the Vatican at the outbreak of the war. It appears that the late Pope, whom nobody ever accused of being a politician, had the plain man's faculty of seeing the real point, and he drafted a letter in August, 1914, utterly condemning those who were responsible for the war. The letter, which was in such terms that it could only be interpreted as a condemnation of Germany, was quietly suppressed when he died a few days later, and it has never seen the light, owing to strong German influence at the Vatican. It will be remembered that the late Pope's last words, when asked for a blessing, were said to be: "I bless peace." No manifesto of protest came from his successor.

Bishop Moule.

The mortality on the episcopal bench since Mr. Lloyd George came into power has been perfectly extraordinary; if the present Government remains in office a year or two longer, as it shows every likelihood of doing, the present Prime Minister will have appointed most of the heads of the Church. Dr. Handley Moule, the Bishop of Durham, has quickly followed the Bishops of Carlisle and St. Albans to the tomb; his picturesque figure will be much missed by the Evangelicals, of which party he was an ornament. (Incidentally he was the original of Cuthbert St. Clair, the learned young cleric, in "Tess of the Durbervilles.")

The see of Durham, which is now vacant, is one of the few great prizes of the Church; and its Bishop, with Durham and Winchester and the two Primates, are the five prelates who sit *ex officio* among the Lords Spiritual in the House of Lords; the remainder go by right of seniority. It is anticipated that Durham will again be given to an Evangelical, according to the tradition of the diocese; but the High Churchmen are grumbling that they have less than their fair share of patronage in these days. I have not followed ecclesiastical politics of late sufficiently closely to discover how far their complaint is justified, but from the choler of the clerics of that persuasion I imagine there may be some foundation for their wrath.

Depressed Issues.

Apparently those industries which appealed for new capital early in the year were wise in their generation, for the appetite of the public, and of the underwriters, too, has evidently been sated for the present. New companies certainly come out, but one does not find a dozen prospectuses on one's breakfast table as of yore—it is true that their absence seems to be made good by the seductive bucket-shop keeper, who assures me by every post that a fortune awaits me if I will only "speculate on margin." The pace of the new issues was too hot to last, and the general fall of stocks this last few weeks has had a sobering effect. Meanwhile, the Government's Housing Bond campaign does not seem to be going very well. If houses were automatically attached to the Housing Bond it would make a difference, but unhappily that is beyond the power of Dr. Addison.

Prices and Wages.

Prices of food and other commodities have been very jumpy recently, with the natural result that the nerves of the public have become rather jumpy, too. The optimist emphasises the fact that mutton is down, the pessimist retorts that sugar is going up; but this week, as usual, the pessimists have emphatically had the best of it. The increase of 14s. 2d. per ton on domestic coal, necessitated by the further increase of wages demanded by the miners, has made the public very angry, since it again raises the cost of living all round; and already most of the trade unions, to protect their members, have put in a further demand for additional wages. The only consolation in our lot is that things appear to be still worse in America and on the Continent. On the lines of Antonio's definition of content—"happy, in that I am not unhappy"—we may therefore profess ourselves contented, because others are more discontented. But it is not a very satisfactory consolation.

Marriage Statistics.

A curious fact emerges from the rather arid columns of statistics issued annually by the Registrar-General of Births, Marriages, and Deaths. That excellent official, in the course of his duties, remarks that when a man postpones marriage until he is forty he usually marries a girl in the twenties, whereas a woman who only marries when she is forty generally takes a man of her own age. The compiler of statistics suggests, not very gallantly, that the distinction has probably something to do with the respective fields of choice open to the two sexes; *The Times* more rudely hints that men marry on sentimental, and women on practical grounds. Both

mentors have, curiously enough, forgotten their Aristotle, who advises men not to marry until they are thirty-eight, and then to choose a woman of twenty-two. Probably not one bridegroom of the hundreds who have unconsciously followed the advice has ever heard of Aristotle, but one might have expected the Registrar-General to have a nodding acquaintance with the classics. But perhaps he confined his Greek to Aristophanes.

Whose Husband?

Truth, as some ancient sage remarked who foresaw the modern stunt newspaper, is stranger than fiction. A case is now being tried in the West of England which no novelist would dare to put before a sceptical public. Two brothers were so exactly alike that their own mother, it is declared, could not tell them apart. So far the story is familiar, but it diverges from the beaten track when Brother A got engaged to a young lady, and Brother B married her, the lady being ignorant and apparently remaining ignorant of the substitution. The lady appears to have been happy.

The Week's Books.

The Einstein theory will probably never rank as light literature, but it is explained in as simple language as possible in a small book published by the Cambridge University Press, called "The Foundations of Einstein's Theory of Gravitation," by Mr. Edwin Freundlich. It contains a preface by Professor Einstein himself, and with the exception of a few rather staggering mathematical formulæ, it should present no real difficulty to any reader with some elementary knowledge of physics.

An interesting *exposé* of the way in which the American Prohibitionists worked their campaign is given in "Fetters on Freedom" (Mills and Boon), by Mr. Cecil Shirley, with a preface by the veteran Lord Halsbury. It is a very curious and sinister story of well-paid propagandists working in the interests of soft drinks and candy manufacturers; and these agitators, casting about for a new means of making a living now that alcohol is illegal, are embarking on a campaign against tobacco, tea, and coffee. The net result of their work appears to have been to put up the price of living in the United States and to encourage hypocrisy. Since anybody can purchase alcohol so long as the pretence is maintained that whisky-and-soda is ginger-ale, their activities do not appear to have been of much benefit to the cause of temperance.

I have been reading "Beauty and Bands" (Constable), by that practised novelist, Mrs. Ellen Thorneycroft Fowler. The dialogues are witty and the characters are alive; but the plot of the novel strikes me as a little more than improbable. It assumes that after a railway accident, in which the heroine is badly injured, her husband does not recognise her, and she does not recognise him. A good many husbands and wives might be glad of an excuse not to recognise each other, but that is not Mrs. Fowler's meaning. Eventually the wife's memory comes back, and they live happily ever after. But I wish she had not strained my belief quite so far; even alienists, who are used to strange lapses, will shrug their shoulders over the theme.

Another work, which needs little description, apart from its contents, is "Food Supplies in Peace and War" (Longmans), by Sir R. Henry Reid. The author gives an engrossing account of our home agricultural front during the war, and it is of interest to note that he does not echo the dolorous predictions of famine in Europe, in which too many newspapers have indulged of late; the recovery is largely due to the rapidity with which agriculture has been begun again in France and Belgium. It is regrettable that things should have gone backward in England since the Armistice, and incidentally it is curious that the withdrawal of women from the land and their replacement by men should have coincided with a falling-off in production. Reduction of the hours of labour is expected to show a further diminution; but—I speak as one of the ignorant—one would have thought that a great deal could have been done to offset this by the increased use of machinery.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, May 3.

The Egyptian Victims of Pontebba.

The event of the week has undoubtedly been the funeral of the twelve unfortunate students who met their death in the railway accident at Pontebba. The High Commissioner has interested himself very much in the matter, and it was through his intervention that early information was obtained by the relatives and that facilities were afforded by the Italian authorities for the return of the bodies to Egypt. The boat carrying the twelve coffins, which was the one by which the students had originally gone to Trieste, arrived at Alexandria last Tuesday, and a funeral procession took place through the city. All the flags were at half-mast, and the shops and principal business houses shut for the day. The cortège was an exceedingly long one, and took over two hours to pass a given point, so great was the concourse of mourners, at whose head walked Prince Omar Toussoun and a representative of the High Commissioner. The next day four of the bodies—the remainder having been directed to burial places in Alexandria and the provinces, where the young men belonged—were brought up to Cairo, where a similar procession was organised. Here, again, all flags were at half-mast, and the shops along the route were closed; while, as during the Alexandria procession, the flag at the Residency was lowered as a mark of sympathy. The funeral cortège was a very long one, being headed by Egyptian Boy Scouts, and included the members of the Egyptian Delegation in Cairo, and delegates from all the schools, Government Departments, and the various syndicates. The principal mourners, in addition to the relatives, included Prince Omar Toussoun and representatives of the Sultan, Lord Allenby, and of the Emir Abdullah.

The Emir Abdullah.

The Emir Abdullah, whose arrival I reported last week, was the guest at dinner on Wednesday of the High Commissioner and Lady Allenby, and during the evening was invested by His Excellency with the insignia of Knight Grand Cross of the Order of the British Empire. His Highness has had several conferences with the High Commissioner during the week, and expects to leave again for Jeddah early next week.

The Nile Projects.

The Nile Projects Commission have now returned to Cairo, after a very successful and interesting visit to the upper reaches of the Nile, in which, accompanied by Lieut.-Col. J. K. Watson, Military Attaché at the Residency, they journeyed as far south as Rejaf.. The Commission intends to commence public sittings on the 16th instant, for the purpose of taking the evidence of those who have any criticism or remarks to make on the subject of the Nile projects and of the apportionment of water between Egypt and the Sudan, and for this purpose Mr. G. A. W. Booth, Judge of the Mixed Courts, has been appointed as legal member.

This week the Ministry of Public Works has issued a very interesting publication, entitled "Nile Control," which constitutes a statement of the necessity for further control of the Nile to complete the development of Egypt and develop a certain area in the Sudan, with particulars of the physical conditions to be considered, and a programme of the engineering work involved. This publication, which is by Sir Murdoch MacDonald, the Adviser to the Ministry, recapitulates all the data available on the subject of the Nile control, and constitutes a technical complement to the note which was recently published, and a review of which appeared a few weeks ago in your columns.

Judicial Reforms.

I gather that considerable progress has been made with the study and elaboration of the draft juridicature laws in connection with the reorganisation of the Mixed Courts. Conversations have continued between Mr. Sheldon Amos, who in this matter is acting for the Foreign Office, and certain members of the Mixed Bar and Bench; and it is highly probable that within a very short time the scheme will have reached a point where it will be possible for the various Powers interested in the subject to be approached.

The Civil Service Cadre.

For some time now there has been considerable dissatisfaction with the classification of permanent posts in the Government—the "Cadre" as it is called—owing to the great diversity in the treatment and pay allotted to analogous posts in different departments and the limitation of the scope for promotion in the various grades fixed by the present cadre. As a result of this "special cases" have continually to be put up, and a good deal of the time of the Ministry of Finance, which has to deal with all such matters, has been taken up in deciding hundreds of questions of promotion, etc., which should by right automatically decide themselves, and thus it has been prevented from giving as much attention as it would have liked to the consideration of the infinitely more important financial and economic problems which from time to time—and especially at present—confront the country. The existing "Cadre" was drawn up quite twenty years ago, and this state of affairs has arisen purely as a result of the enormous development of the divers administrations and, more recently, of the increased cost of living and the difficulty of obtaining qualified candidates for many of the technical posts at the rates of pay provided.

The all-round increase of 20 per cent. granted last August by the Council of Ministers brought matters to a head, and it was decided to set up a special commission under the presidency of his Excellency Mohammed Shefik Pasha, Minister of Agriculture, for the purpose of exhaustively examining the whole question of classes throughout the Government. The Commission has been sitting for some little time, and is making steady progress. It is understood that it will endeavour to assimilate as far as possible the various posts in different departments, and that for these as well as for the lower grades of employees it will establish adequate starting pays and scales of increase, which will permit of every employee and every official receiving regular increases of pay until he reaches the maximum of his post, which will be fixed at such a figure as to offer him reasonable prospects of advancement and pension.

The collection of vexatious regulations which at present unduly penalise some and favour others through no fault of the holders of the posts, of their chief, or of the Ministry of Finance, will thus disappear, and each official and employee will have ample scope for advancement in his own particular post, questions of promotion or of alteration in grade being reduced to cases only where entirely new work has been taken over or where the duties have developed beyond those for which the existing classification has been set up. The work, as can be seen, is very important, and will entail examining an enormous amount of data; but the members of the Commission will have the satisfaction of knowing that if they are being called upon to increase the already heavy load of work which rests upon their shoulders, they are carrying out a task which will conduce not only to the contentment of their comrades and subordinates, but also to the general efficiency of the Egyptian Government service as a whole.

YUGOSLAVIA.

BELGRADE, May 5.

End of the Strikes.

The railway strike is over, to the great content of the public; mails are coming in again, but old mails have not yet arrived; the Orient Express came in three days running with no mail-van, which looks as though the authorities in Paris are ill-advised on affairs

Digitized by Google

in this part of the world, and thought the strike still on.

The strike began as a purely economic one, and it seems to have arisen from a misunderstanding, for the men were convinced that their grants were to be reduced, which the Government denied; indeed, the Ministry of Communications stated at the outset that it was prepared to satisfy the men's economic demands. Some difficulties arose on the question of overtime, as extra pay for this was a definite inducement to the men to be late and to delay services. The workers on the river steamers struck at the same time, but their demands were promptly settled by the Syndicate, with the Government's approval, and the service was resumed after a delay of a couple of days.

The railway strike, however, began to assume a political aspect. The so-called Communists across the rivers tried to make capital out of it; cases of sabotage were reported from Bosnia and from Croatia, and finally, as I have already reported, the Hungarians at Subotitsa seized the opportunity to provoke a rising. This was quickly quelled by the arrival of a battalion of Serbian infantry, but not before three police officials had been murdered; there were over a hundred casualties, and an enquiry found that the Hungarians had concealed arms, including machine-guns, rifles, and an 18-pounder. It was, in fact, a Hungarian national rising under the guise of Bolshevism. To mask the national character, the Magyars proclaimed a Soviet Republic. There has not been the slightest suggestion of disorder in Belgrade. The strike collapsed, the men returned to work, and May 1 passed off peacefully, without so much as a procession through the streets.

Political Matters.

The political world is occupied with the reconstruction of the Cabinet and formation of the much-talked-of Coalition Government. M. Pashitch has returned to France, but owing to ill-health has stopped at Erivan-les-Bains, and Dr. Trumbitch has come back to Belgrade, so Yugoslavia is without its official mouthpiece at the Congress. Even M. Vesnitch, Minister at Paris, has come to Belgrade, and it is stated that he is to be the President of the new Government; presumably his suave diplomatic manner will smooth over the rugged character of M. Protitch and M. Pribitchevitch. Everybody sincerely hopes that the Coalition Cabinet will soon be formed, and a Provisional Government that will summon the Constituent Assembly, which will give us some form of stable Government. It does not much matter which party is returned, provided that it comes to stay, as these changes every few months are disconcerting to everybody concerned and shake confidence in the country.

Serbia and Great Britain.

A firm Government will perhaps succeed in dissipating some of the distrust of Serbia which obtains unfortunately in Great Britain, where the disgraceful propaganda of Austria did its work only too well before the war. It is a fact that an Englishman at present stopping here was obliged to pay an extra heavy premium on his life policy because he was travelling in Serbia, though no such doubtful compliment was paid to South Russia, Turkey in Asia, and the Caucasus. Such troubles as we have in Yogoslavia to-day arise not in Serbia, which was reputed to be a country of brigands, but in the so-called "cultured" districts that were formerly Austria. We read in the papers of cases of highway robbery, train robberies, and so on, in Croatia and Slovenia, but all is quiet in Serbia (where the chief danger comes from the village dogs), except in the still unsettled districts in the south and south-east, where the wild Albanian tribesmen have not ceased from troubling.

Prospects of Communism.

There is a good deal of talk of "Communists" in the local press, and anti-Communist associations are being formed all over the country. The Labour newspaper calls itself the "organ of the Socialist Party" (Communists); it is to be noted that in this sub-title there are one Serbian word and five foreign words, which very few except educated Serbs can understand; the simple labourers of Belgrade are told by their leaders that they are to be Communists, and do not distinguish between Communists and Socialists; but they are Serbs first, and resent the anti-Serbian action of the Hungarians across the river under the name of Communism and Bolshevism. The spirit of proprietorship is so profoundly ingrained in the Serbian peasant, who forms about nine-tenths of the population, that any idea of real Bolshevism in Serbia itself is unthinkable.

BULGARIA.

SOFIA, April 25.

Communists and the Oath.

Last Monday the Chamber was a great source of attraction to the public, and all the galleries and accommodation for sightseers were full to overflowing. The sitting was opened at four o'clock by the President (M. Boteff), who invited all deputies who had not taken the oath at the last sitting, as prescribed, to do so forthwith. Thereon the deputies in question, including thirty-two Communists, rose, and a priest, carrying the Gospels and a cross, entered. The Communists shouted that they would prefer a bishop, but the President sternly called them to order. The priest pronounced the oath in a loud, clear voice, and it was repeated after him by all the deputies affected. The Communists were then compelled to repeat it aloud, even to the passage referring to loyalty to the King, and afterwards they signed their names to the text of the complete oath as prescribed by the Constitution.

The Chamber then proceeded to the election of the various Parliamentary committees, which included members of all the party groups represented in the Assembly, the nominations by the President being accepted; and then the adjournment until Wednesday afternoon took place.

King and Prime Minister.

As mentioned in an earlier letter, on the resignation of M. Madjaroff from the Foreign Ministry, M. Stambolisky took over the duties of that Ministry, in addition to those of Prime Minister and Minister for War. King Boris has visited him very frequently of late, and has conferred with him constantly on the policy to be followed. Fortunately for the country, the most harmonious relations exist between King and Minister, who have perfect confidence in one another.

Improved Bulgaro-Roumanian Relations.

With the taking over of the Foreign Ministry by M. Stambolisky the relations between Bulgaria and Roumania have entered upon a new phase; points of contact and direct connections have been established which will serve, it is to be hoped, for the inauguration of a political, economic and cultural understanding. The Bulgarian Government, with the approval of the Roumanian Government, will very shortly send Dr. Nedkoff, formerly its Consul-General there, to Bucharest as its representative. Roumania has consented to all the Bulgarian refugees from the Dobruja returning to their homes, and in many "Bulgarian" towns and villages in the Dobruja Bulgarians have been appointed as mayors. Postal, telegraphic, and telephonic communications between the two countries have been resumed via Rustchuk-Giurgevo, and the question about the dual authorities' estates along the Bulgaro-Roumanian frontier has been settled to the satisfaction of both countries. It is to be hoped that these things may serve as a stimulus to the growth or re-creation of neighbourly relations with Serbia and Greece.

Bulgarians in Ægean Thrace.

According to the latest reports from the portion of Bulgaria that has been cut off in Ægean Thrace, the conditions of the Bulgarians remaining under French administration at Gumuldjina, Soflou, Ortakeui, etc., are quite satisfactory, for they are allowed to maintain their churches and schools, and all necessary protection is afforded them by the French authorities. With regard to Xanthi and other towns and villages placed entirely under Greek rule the reports are of a diametrically opposite character. There, it is stated, the Bulgarian element

Digitized by Google

is most severely persecuted, and recently many Bulgarians have been expelled by the Greeks. Those unfortunate folk are, naturally, coming here, and, deprived of everything they possessed, are becoming a burden on exhausted Bulgaria.

The Aim of the Government.

The spirit that animates the Government and most Bulgarians to-day is expressed in an article in the *Zemledeltchesko Znamе*, the official organ of the Prime Minister and the mouthpiece of the Agrarian League. It says:—"As the largest parliamentary group, we are called on to govern and to safeguard the national interests. We sincerely desire to alleviate the country's sufferings and to pass through the Chamber the necessary reforms which the new conditions of life impose. We wish to raise Bulgaria up again, to set her on her feet. Shall we obtain the support of other parliamentary groups in this matter?"

The "First of May."

The Ministry of the Interior promises to allow the Socialists and Communists to celebrate the "Day of Labour" freely, and to have demonstrations in the streets, provided that their leaders will guarantee the preservation of order. The participation of State and municipal officials in these demonstrations will not, however, be permitted.

Gipsies and the Vote.

The gipsies of Bulgaria have sent a delegation here to present a petition at the Ministry of Justice asking for the restoration of their constitutional electoral rights. These rights were taken from them many years ago by the Chamber, on the proposal of the Democrat leader, Petcho Karaveloff, in consequence of abuses of their privileges.

TURKEY.

CONSTANTINOPLE, April 22.

The Campaign Against the Nationalists.

Once again the opponents of the Unionists are losing the battle through their want of energy and decision. Anzavur Pasha, confident in the promises of support which he had received from the Government, launched an offensive in three directions from Panderma, westward towards Bigha, southward towards Balikesr, and eastward towards Brusa. The promised munitions did not arrive, and the Nationalists, reinforced by regular troops and other forces from the Smyrna front, made a heavy counter-attack from Brusa, with the result that Panderma itself was taken, and the army which had advanced against Balikesr, finding its communications threatened, was obliged to retreat to Manias after three days' heavy and not unsuccessful fighting. The blame rests entirely with the central Government, for it is common knowledge that the entire administration, especially that of the War Ministry, is saturated with Nationalist sympathisers. Yet the Grand Vizier left the despatch of the all-important supplies to the very officials who have sworn allegiance to Mustapha Kemal. The result was to be foreseen. The first cargo, after having been held up for several days, sailed from Constantinople, but never reached its destination, or at least it never reached Ahmed Anzavur, and there is probably some truth in the Nationalists' statement that the supplies are in their hands. After waiting in vain, Ahmed Anzavur Pasha came himself to Constantinople in order to make sure of getting what he wanted. During his absence things seem to have gone from bad to worse, for he is reported to have returned here to-day after having sailed with a large cargo of munitions on Saturday night. There can hardly be any other reason for this than that the anti-Nationalists have lost command of the coastal region to the west of Panderma; and if this surmise be correct it is difficult to see how help can be sent to Anzavur's gallant Circassians.

Lack of Allied Unity.

This unfortunate turn of events is all the more disheartening since the opening of the campaign against the Nationalists had given rise to several quite healthy anti-Nationalist movements in other parts of Asia Minor, notably in the Ada Pazar district. The failure of the Government to support Ahmed Anzavur will inevitably increase Nationalist prestige to such an extent that these movements will be very short-lived. Further, the defeat of Anzavur will also be regarded by the population of Anatolia as a defeat for the British, who are believed to be supporting the Central Government in the campaign against the Nationalists. I say, "British," advisedly, for it is useless to disguise the fact that our Allies, for reasons best known to themselves, have practically dissociated themselves from recent action in regard to Turkey. Thus, the occupation of the capital was carried out almost entirely by British troops; the arrest of persons guilty of offences against the Armistice Convention were effected without exception by the British authorities; British statesmen alone have made clear and pointed speeches with regard to the coming settlement with Turkey. On more than one occasion our Allies have coquetted with Mustapha Kemal, and there is very little doubt that the Italians have proceeded to dangerous lengths in this direction. This is exceedingly regrettable, for unless the Allies are united there is very little chance of the Peace Treaty ever being carried out in its entirety.

So far as the campaign against the Nationalists is concerned, it is doubtful now whether the Central Government will make much progress. A strong hand was needed, together with decisive energy, but there is no room for doubt that practically all the youth and energy in the Empire is in the opposite camp to Damad Ferid Pasha. The veteran statesman is probably animated by the best of intentions, but it is too unequal a fight. Anzavur has been beaten in Stambul, and it looks as if nothing but the intervention of the British—French intervention is most improbable, and Italian action is more likely to be on the other side—can prevent the complete triumph of the Nationalists.

The Nationalists.

Although very little news is available with regard to the proceedings of the Central Nationalist Council at Angora, the capital of revolutionary Anatolia, it has been possible to piece together the events which followed the nomination of Damad Ferid Pasha as Grand Vizier. It is now clear that in prevision of this event, careful arrangements had been made by Mustapha Kemal, with the assistance of Nationalist agents both in the capital itself and in the villages along the roads between the capital and Ada Pazar, for a regular service of couriers, and for the escape of Nationalist partisans from Constantinople. A so-called "Constituent Assembly" composed of delegates from all parts of Anatolia has been convoked at Angora, and the gauntlet which had been thrown down by Damad Ferid Pasha was taken up with the greatest energy and decision. In reply to the *fetvas* promulgated by the Sheikh ul Islam, counter *fetvas* were published, of which the following is a summary taken from the text published on April 20 by the Nationalist newspaper *Millet Yolu* ("The Way of the Nation") published at Brusa:

1. Is it not the duty of all Moslems to take up arms in defence of the Khalif when the seat of the Khalifat is occupied by the enemy, when all means of defence are taken from the Sultan so that he can no longer defend the true interests of the nation, and when courts-martial are established in the capital under British laws?—Reply: Yes.

2. Can those who thus take part in the fight against the enemy be stigmatised as enemies of their country and their religion?—Reply: No.

3. Are not those who die in such fighting "martyrs" (Shehid), and are not those who survive "victors" (Ghazi)?—Reply: Yes.

4. Are not all Moslems bound by the Holy Law under such circumstances to assist in the struggle against the enemy?—Reply: Yes.

5. Are *fetvas* issued by a Government which is under the influence of the enemy binding under the Holy Law upon Moslems?—Reply: No.

The announcement itself is much longer, and is interspersed with quotations from the Koran in support of the replies given to the questions, but the above conveys the general sense of the "Holy Fetva," as it is entitled. It was published on the authority of Mehmed Rifaat Effendi, the chief Kadi of Angora, and a separate announcement stated that it was endorsed by the principal Ulema of all Anatolia.

While there is no doubt that the Nationalist victory against the Government forces will make a much deeper

Digitized by Google

WHEN the interests of the Empire and the individual are identical it is not difficult to adopt the imperialistic point of view.

The purchaser of Dunlop tyres *knows* that he is not only furthering British trade but is ensuring satisfaction to himself: hence their universal popularity.

DUNLOP RUBBER CO., LTD.,
Founders of the Pneumatic Tyre Industry,
BIRMINGHAM.

Digitized by Google

impression than the counter *fetvas*, it must be admitted that the decree has been very skilfully composed, and it is worthy of note that the British have again been singled out for condemnation. This is typical of the whole Nationalist Press, which is bitterly and almost exclusively anti-British. It is also noteworthy that Angora seems to have an excellently organised news bureau. Not only is there a service of telegraphic news from the capital, but European papers are quoted only ten days after the date of their appearance. Yet the Constantinople telegraph service is in the hands of the Allies!

The Peace Delegation.

By the time this is in print the Turkish Peace Delegation will be on its way to Paris. Damad Ferid Pasha himself is remaining in Constantinople on this occasion, and the principal members of the delegation will be Reshid Bey, Minister of the Interior; Mahmud Mukhtar Pasha, and Fahreddin Bey, Under Secretary for Foreign Affairs, under the presidency of Tewfik Pasha, formerly Ottoman Ambassador in London. Unless there is complete change in the present state of affairs, the Turkish representatives will certainly not be able to claim any other mandate than that of a Government of which the authority is confined to the capital, itself under Allied occupation. It is rumoured that the Nationalists intend to send delegates to Paris, who will be charged with the mission of placing before the Peace Conference the "National" point of view. Although the details of the forthcoming treaty are unknown, its broad lines are no longer a secret, and it is quite certain that it will be utterly irreconcilable with Nationalist demands. It is equally certain that the Nationalists are fully determined to maintain their present attitude. The official Turkish delegation may sign the Treaty, which may be subsequently ratified by the Sultan and a specially convened assembly of notabilities, but how is the Treaty going to be fulfilled? The central Government, unless a miracle occurs, will be helpless. Moreover, when certain questions, such as the cession of territory to Armenia and perhaps Greece, are settled to the detriment of the Ottoman Empire, what will be the attitude of those who to-day are the opponents of the Nationalists? A Turkish friend of mine, who *during the war* was fervently pro-British, remarked to me recently: "We are all Nationalists to-day." So far as the influential classes are concerned, this is generally true, but it would not have mattered any more than it mattered that the Germans were all secretly devoted to the Kaiser *if the Allies were united*. Is it too late yet to hope for strong and united action?

Cilicia.

Fighting continues in Cilicia, and it is apparent that the Nationalists are resolved that there shall be no question of a non-Moslem element in that part of the country. The French forces there are utterly inadequate, and have perhaps made matters worse, for their presence has given the Armenians confidence enough to declare their sentiments, with the result that they have been massacred. Had there been no French forces there at all, the Armenians would not have roused the ire of the Turks by welcoming the invaders, and the result might have been different.

Thrace.

It has not been easy to understand exactly what has been happening in Thrace. After the Adrianople branch of the National Organisation had published a proclamation on April 13, on much the same lines as the counter *fetvas* mentioned above, Jafar Tayar Bey, the military commander of Adrianople, who first proclaimed the independence of Thrace when Constantinople was occupied, suddenly reversed his attitude and submitted to Ferid Pasha's Government. It now appears that Jafar Tayar Bey had relied upon Bulgarian assistance, upon what grounds it is unknown; but when this was not forthcoming, and when his attempt to mobilise the population of Thrace failed, he realised that he had made a grave mistake. In order to avoid a court martial, he accepted the kindly assistance of the French authorities, who brought him to Constantinople under their protection. Whether this assistance went any further or not may be deduced from the fact that although Jafar Tayar has undoubtedly been guilty of mutiny and treason, he has been received by the Grand Vizier, and has never even been placed under arrest. It may be added that when he visited the Grand Vizier he was accompanied by French officers.

ALBANIA.

ALBANIA, May 7.

Essad Pasha.

Two days ago a Mission departed for Paris, consisting of four members—Monseigneur Koleci, a Catholic bishop and a member of the Legislative Assembly; Baïram Fevzi, Prefect of Scutari; Fuat Toptani, Prefect of Tirana; and Omer Shiaku, member of the Legislative Assembly. The object of this Mission is to discover the intentions of the well-known Essad Pasha Toptani, who has been living at Paris for the last eighteen months. All the four members are taking a holiday, and are not representing their Government in any official capacity. The reasons for this Mission are as follow:—

It is notorious that Essad Pasha has, since 1914, claimed to be head of the Albanian Government, and he has been recognised as such by the Serbs and by certain of the Allied Powers. But for two years England and France refused to acknowledge his official claims, and Italy has recently begun to see in him an enemy to her policy, seeing that he has become a partisan of the Serbs. During the war he lived for the most part at Salonika, where he held his so-called Government; but for the past year and a-half he has been living alone in Paris, and the Albanians do not now recognise the existence of his official status.

In spite of all this, however, he has partisans in the region of Dibra, and his supporters are paid by the Serbian authorities (for almost all are in the villages occupied by the Serbs) as gendarmes. Chief among these is a certain Halit Lleshi. Moreover, it must be admitted that he has some faithful acolytes in the neighbourhood of Tirana—followers who obey the secret orders of Osman Bali.

Up to the present these people have been kept quiet, but the overthrow of the Government of Durazzo by the Congress of Lushnia (January, 1920) and the formation of the new Government gave some hope to the followers of Essad Pasha. The Italians, who see in the new Government a factor of opposition to their imperialistic policy, have not failed (with the sole intention of undermining the Albanian Government) to encourage these hopes; it is even rumoured that pourparlers have been put forward for a *rapprochement* between Essad Pasha and the Italians.

Thus it is that towards the middle of April the pro-Essadists attempted to spread their influence in the neighbourhood of Tirana, taking advantage of the absence of Ahmed Bey Mati, who had departed for the Serbian frontier with all the available forces against the people of Halit Lleshi. The Government immediately took steps to smoke out the nest of the Essadists, and it would have succeeded had not the National Assembly intervened and proposed, in order to prevent the shedding of blood, to send a deputation to Essad Pasha to learn his intentions and to make him render an account of his actions. There was therefore neither a conflict nor an overthrow of the Government, which for the moment retains its power, and for the time being at least does not seem to be threatened. (The messages sent out by the various telegraphic agencies were consequently full of serious mistakes.)

The Italian Commissioner.

Lieutenant-Colonel Castoldi, who was attached as military adviser to the Italian delegation at the Peace Conference, has just arrived in Albania as "Commissioner." This designation is not pleasing to the Albanian Government, which would have preferred that of "Minister"—which would signify a recognition by Italy of the Albanian Government.

Foreigners.

Followers of King Nicholas of Montenegro are trying to find refuge in Albanian territory, and are seeking to organise their bands there. Passage across the frontier has been forbidden them on the land side, but about 300 Montenegrins have found refuge at San Giovanni di Medua (Shin Ghin), near the Italian garrison. A month ago these Montenegrins attacked a French boat which was ascending the Boyana. The authorities are taking steps to prevent a re-occurrence of such acts.

The commandant of the Italian garrison at Scutari has endeavoured to substitute his own administration for the international one by which the town has been governed since 1913, but which came to an end after the departure of the French contingent and of General Phillips last March. The Albanian authorities, who have taken possession of Scutari, refuse to recognise any of the com-

mandant's claims. The arrival of the Italian garrison at Scutari and the attitude of its commandant are not liked by the Yugoslavs, and as a counter-measure a small Yugoslav garrison has been posted at Shiroka, which is west of the Boyana, in Albanian territory.

The Albanian Question at San Remo.

The Albanian delegation could not be present at San Remo, but it sent a message urging the Conference to respect the independence and integrity of Albania.

A thing that has produced a good impression is the patriotic activity displayed by those Albanians who have lived for five centuries in Italy, and who are strongly against the imperialist Italian policy.

Following is the text of the despatch sent from Naples by the Italo-Albanian Committee to M. Nitti, President of the Conference of San Remo:—

"The Italo-Albanian Committee, in the name of 250,000 Italo-Albanians residing in Italy, expressing the sentiments of their unfortunate Albanian brothers, hereby protest once more against the compromise whose object is the further dismemberment of Albanian territory, and again confirm the sure wish for the independence of the country of their origin, in conformity with the decisions of the London Conference of 1913."

PALESTINE.

JERUSALEM, April 25.

In Jerusalem quiet has reigned since the Nebi Mousa trouble. Holy Week has brought its usual scenes; and American sailors from a vessel at Jaffa have been amongst the motley crowds of visitors. Sir Louis Bols is held in high esteem as Chief Administrator, being eminently fitted for the post. He is ably supported by his military governors of districts, especially those who have had experience of the peoples and languages of these and neighbouring regions.

Colonel C. H. F. Cox, D.S.O., R.F.A., has taken over Samaria, and is at Nablus. Colonel Bentwich, Senior Judicial Officer, is returning from leave in England. The work of the Courts shows that crimes and offences maintain their level, but are certainly not on the increase.

MALTA.

VALETTA, May 5.

An Early Summer.

The title of "military hothouse" is being justified here earlier than usual this year, and the past few days have been August-like, giving the winter visitors, who are on the point of leaving, a taste of what the usual Maltese summer is like. Social events are on the wane; the last race meeting on the Marsa has taken place to-day, and the Grand Opera is closing down. Those who are compelled to stay behind and face the torrid months are busy preparing for good times in boating and swimming. The ladies' bathing club, with its headquarters off Fort Tigne, is a scene of much sociability and entertainment during the summer season.

Suggested Legislative Reform.

There is a wide gulf fixed between English and Maltese law, as everyone who has dabbled in this subject in Malta will readily admit. For years past there have been attempts to amplify and bring up to date the commercial law of the Island, but practically nothing has been done. The latest suggestion is that classes dealing with the differences between English and Italian law be established at the University. The idea sounds very reasonable, and is practicable. It should help the British litigants.

Dockyard Inquiry.

Lord Lytton, First Civil Lord of the Admiralty, is making a thorough inquiry into dockyard matters all round, and it is to be hoped that good will ensue from this; for it has been patent for a long time past that things in "the Yard" are not what they ought to be. The question of emigration is intimately bound up with this matter of dockyard reform, as a great many of the most highly skilled workmen are leaving the Island. Many of these emigrants have learnt to become proficient at the expense of the British Government, and now America chiefly is to have the benefit of their training.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

"Shortage" Grumblings.

Last week it was no matches, now it is a scarcity of sugar, but the Government has 550 tons *en route*, and delivery is expected in about a fortnight. The price of sugar at the present moment is 1s. 11d. per *rotolo* (28 ozs.). Further discontent is expressed also against the inferior quality of the bread which is being supplied, but, despite the drought, the potato crop is turning out well, although even in this case dissatisfaction is being expressed as regards restriction of export. Malta is not without its profiteers.

Personal.

Death has claimed two distinguished victims during the past few days. Mr. G. Caruana (late of the Eastern Telegraph Company and well-known in the Near East) passed away on the 30th ult., as did George Borda, Esq., of the widely-known firm of G. Borda and Co., shipping merchants. Both will be greatly missed, and the Island could ill spare them.

Judge S. Micallef, of the Superior Courts, has had to take sick leave, and the Governor has appointed Judge Parnis to act officially in his stead.

General.

The anniversary of the Accession of His Majesty King George V. will be celebrated to-morrow. The large union jacks are to be flown at all flag stations, and a salute of twenty-one guns is to be fired by the Royal Artillery from the Saluting Battery. This is to be followed immediately by the salute of the Royal Navy.

It comes as good news that the *Daily Malta Chronicle* is to re-appear soon. It will be remembered that the office was gutted and the plant destroyed in June of last year.

INAUGURATION MEETING OF CZECH SOCIETY.

The inaugural meeting of the Czech Society of Great Britain was held on May 11 at the Society of Arts, John Street, W.C., among the speakers being Lieut.-Col. Sir Samuel Hoare, Bt., who presided, the Right Hon. H. A. L. Fisher, M.P., President of the Board of Education, and Professor Sir C. W. C. Oman, M.P. In the course of a brief address opening the proceedings, the Chairman said that one of the finest things that had emerged from the war was the liberation of ancient nationalities that had been for centuries under foreign domination. Of all foolish attempts at the present time, the most foolish appeared to be that being made by some people to set up again the Dual Monarchy. This society had been founded by people who had been associated with Czecho-Slovakia during the war and who wished to continue that association. It was not associated with any political party either here or in Czecho-Slovakia. Its object was to maintain a close intercourse of trade and culture between the two races. He believed it would be found they had much in common.

Mr. Fisher followed with an interesting speech dealing with the history of Bohemia, which State, he said, had played a great, noble and enlightened part in the history of the Middle Ages. From the Hussite movement in Bohemia had flowed many of the spiritual streams of the Reformation, and this progressive spirit had survived until the Thirty Years War. But after the battle of the White Mountain in 1620 the Czech civilisation had been submerged and its language and literature proscribed as the vehicles of heretical thought. A revival had begun in the last decades of the Eighteenth Century. The present Bohemian State contained within its borders a powerful German minority and the less highly developed Slovak population that had for so long lain under the iron despotism of the Magyars. The two problems presented were entirely distinct in character, but each was capable of taxing to the utmost the powers of those who would have to deal with it. These were approaching the problems in a spirit of moderation and tolerance, and with a true desire to effect a statesmanlike solution.

Sir Charles Oman, who also spoke on the historical side of the question, said that of all the States that had been created as the result of the going to pieces of the three great despotic empires, Czecho-Slovakia showed the most promise for the future. Her spirit of nationality was strong but sane and intensely practical. It was not too proud a boast for Englishmen to say that Huss had been the spiritual child of Wycliffe; there had even been preserved in Bohemia translations of treatises by Wycliffe of which the original had been lost. President Masaryk was far too big a man for anybody here to claim him as a spiritual child; yet we might hope to be the spiritual advisers of Bohemia once again in the way of constitutional teaching.

Other speakers followed.

Reuter's Berlin correspondent states:—According to reports from Warsaw to the newspapers here, the Polish Foreign Minister, M. Patek, has been recalled by telegraph from Rome, as M. Take Jonescu, the Roumanian statesman, has arrived in Warsaw on behalf of the Roumanian Government to open negotiations with regard to an alliance. It is reported in Polish quarters that the Roumanians will form an army of 160,000 men in support of the Polish offensive against Soviet Russia.

CORRESPONDENCE.

THE ALBANIAN QUESTION.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—We, the undersigned, desire to present the case of Albania especially to the League of Nations, as it differs essentially from that of any other nation whose status has been changed by the recent war. Other peoples, among them some who fought against the Allies, have had their claims to nationhood recognised. But Albania, who fought for freedom and had won her acknowledged place among the nations before the war, has now been threatened with political extinction.

We would point out: (1) That it is expressly laid down in the Covenant of the League of Nations that: "The wishes of the communities must be the principal consideration in the selection of the mandatory." Not only have the Albanians not been consulted, but they have now been so placed that they cannot communicate with the outer world save through the medium of Italy, Greece, or Yugoslavia, all of which countries in the past have been interested in the partition of Albania and may be so to-day. The Albanians have asked that they may not be put under the mandate of any interested party. They ask only for the recognition of their independence by the League of Nations and permission to manage their own internal affairs under a guarantee of the League of Nations.

(2) We would point out that a very large number of Albanians (a million, at least) have been handed over to the Yugoslavs and Greeks. We would strongly urge the claim of these people to the right to have their own churches, where their creed may be freely preached; and their own schools, where their children may be educated in a knowledge of their own language. We believe that at present no Albanian schools have been permitted in the Albanian districts assigned to Greece and Serbia. We are encouraged to hope, by the resolution of the Foreign Committee of the House of Commons, under the presidency of Lord Robert Cecil, and reported on May 4, that justice will not be refused to Albania. That resolution was as follows:—"That the Committee would deeply regret any departure from the policy laid down with regard to Albania by the Ambassadors' Conference in London, 1913, and urges the Prime Minister to press for its unity and independence under such mandate or guarantee as might be approved by the Council of the League of Nations."

(Signed)

"SOME WAR-TIME REMINISCENCES OF PERSIA."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In his interesting article, entitled "Some War-time Reminiscences of Persia," and published in your issue of April 8, Mr. Bernard Sotham mentions that a soup-kitchen, under British management, was opened in Teheran in February, 1918. It is not, I think, generally known that Lady Marling, the wife of the British Minister, took the initiative in this matter, and for upwards of three months devoted nearly her whole time personally to superintending the management, thereby saving the lives of many hundreds of the poorest of the poor of Teheran. The number of those who daily received relief reached a total of some 1,800-2,000. I feel sure that all those who were in Teheran at the time and cognisant of the facts will agree with me in saying that almost the entire credit for the salvation of the lives of those people rests with Lady Marling.

I enclose my card and trust you will kindly find space for this letter.—I am, etc.,

Cairo, April 26, 1920. Traveller.

PRO DODECANESUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The last Egyptian mail brought me full particulars with reference to the present situation in Rhodes and the other Ægean Islands occupied by Italy. These particulars are now laid before the Dodecanesian Delegation in Paris, and may be of interest to your readers.

In May last year, soon after the Red Easter riots, an epidemic of small-pox ravaged Rhodes, and the Greek schools had to be closed, by order of the Italian authorities. The first schools to be closed were those of Afanto, Archangelos, and Malone. A whole year has passed since, and the epidemic exists no more; but the schools are still closed, and the Italians refuse to allow their re-opening. The Greeks support in Rhodes the Venetocleon Grammar School, founded by Minos Venetoclés, the late Rhodian patriot, and forty-five schools, with 3,297 pupils of each sex. The funds required for maintaining these national educational institutions amount to 80,000 francs per annum.

I understand that great consternation reigns in Rhodes, owing to the systematic closing of the schools. The Metropolitan wrote twice (January 14 and 15 last) to the Governor, asking for the re-opening, but the Italians remained inexorable to the supplications of the Metropolitan, who is the official superintendent of the schools of his diocese. The celebration of the school feast in January (the Holy Hierarchs) was not allowed by the Italians.

The headmaster of the Venetocleon, a venerable old man, was brought to the police-station under escort after the closing of his school. The teaching staff of the Amaranteon school were expelled by force, and zealous Carabinieri gave chase to small school children, who were frightened to death.

In the Island of Symi the same tactics have been adopted against the Greek educational system, and the Grammar School is closed. This school has been now transformed into a hospital for V.D.

This news has astonished my countrymen who live in this country. We are sure that the Italian Government, which recalled last year General Delia and General Brinzi after the Easter riots, will now see their way to bring to their senses these excited officials who try by their acts to sever the good relations established with such great difficulty by M. Venizelos between Greece and Italy.—I am, etc., Theodore D. Mosconas.

Dodecanesian Delegation, 32, Oxford Street,
Manchester, May 12, 1920.

CHRISTIAN CROSSES AT JERUSALEM.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I deeply regret that Archdeacon Potter, on the authority of certain unnamed persons, should declare that "the Zionists in Jerusalem are objecting to the crosses on our soldiers' graves . . . because they are seen as you approach the site fixed for the new Zionist College." Since the British occupation of Jerusalem I have paid repeated and lengthy visits to Palestine, and in my capacity as President of the Zionist Commission, a Zionist leader, and a founder of the Hebrew University at Jerusalem, I am fully and directly informed as to Zionist thought and sentiment and action in and outside Palestine. There is no word of truth in the charge to which Archdeacon Potter has given currency. In the Military Cemetery on the Mount of Olives Jewish soldiers lie with their Christian comrades, and the Mogen David rises above their graves as the Cross above Christian graves. This association is a source of pride to all Jews, for whom the whole is holy ground. Zionists are second to none in honouring the British dead whose lives were given for the freeing of Palestine, and they repudiate with indignation any suggestion of ingratitude or sectarian intolerance in respect of them. I cannot but express my astonishment that Archdeacon Potter should, without personal investigation, have lent the weight of his office to so dishonouring a calumny.—I am, etc., Ch. Weizman.

Zionist Organisation, Central Office,
77, Great Russell Street,
May 13, 1920.

CHESS.

The Edinburgh Congress of the British Chess Federation will open on August 9, and will continue until August 23. It will be notable for the revival of the British Amateur Championship, dormant since 1914, for which Sir G. A. Thomas will be a strong favourite if he decides to enter.

M. Kostitch is giving two simultaneous exhibitions this week in London, and will then, I understand, leave for Yugoslavia to take part in the international tournament which is to be held at Veles (Uskub) next month. I have no further news yet regarding the entries, but I shall be surprised if they are as strong as seems to be anticipated.

The heats for the Murton Cup at the City of London Chess Club are now all but concluded. As expected, Mr. Saunders won the first heat, Mr. Acton the second and Mr. Gilchrist the fourth. Some half-dozen games are outstanding in the third heat, which seems to be rather open, at least four players having a chance of being first. As I mentioned before, the first two in each heat go into the final.

The end game given last week should be drawn as follows:—1. . . . P—Kt4 (ch); 2. P x P, P x P (ch); 3. K x P, K—K4; 4. K—R6, K x P; 5. K—Kt5, K—K4; 6. K—R6, K—B5; 7. K—R5, etc.

Caro-Kann.

PRESS ON THE NEAR EAST.

The Peace with Turkey.

The *Morning Post* of May 12, in dealing with the Turkish Peace Terms, thinks on the whole that it is a just Treaty. It is glad, however, that the Sultan is to remain in Constantinople. It sees, moreover, that until a Russian settlement is made, no permanent settlement can be made in regard to Turkey. And it has its doubts concerning some of the details.

Though we regard the Treaty as a just settlement, yet many of its clauses are bound to raise misgivings. We have now had a brief experience of the settlements laid down in the Treaties of Versailles and Saint-Germain, and are daily becoming better acquainted with their defects. We confess we do not like divided sovereignty, the tutelage of the League of Nations, the creation of new States, fathered by sentimentalists and innocent of proper economic and geographical safeguards, indeterminate boundaries, provisional guarantees, and so on. In a word, having witnessed the Balkanisation of Central Europe, we do not wish to see that disintegrating process extended to Asia. Are the new States which were raised out of the dead ashes of the Hapsburg Monarchy solidly fixed? Has the League of Nations been a success at Dantzig? Will other States have to follow Poland's example and have recourse to war in order to fix their boundaries? We ask these questions when we read the clauses of the Turkish Treaty and notice its provisional indeterminate character. For example, there is nothing satisfactory about the allocation of Smyrna; it will remain a source of bitter trouble between Turkey and Greece. The Turks will never consent to the relinquishing of the port through which all their trade must pass, and it is doubtful, in view of the fact that, unhappily, M. Venizelos is not immortal, whether Greece will be able to administer and hold the tremendous accession of power and territory which the Treaty has brought her. Syria and Mesopotamia are provisionally recognised as independent States, and will be assisted each by a mandatory. Will the Emir Feisul and his Arab subjects accept this solution? Minorities are to be protected, and military control is to be instituted. Will Mustapha Kemal Pasha signal his cordial acquiescence? Palestine is to be established as a National Home for the Jewish people. Will even Mr. Herbert Samuel succeed in making such a Home a pleasant place to live in? Armenia is to be independent, and Turkey agrees to accept the arbitration of the President of the United States upon the question of the frontier between Turkey and Armenia in the vilayets of Erzerum, Trebizond, Van, and Bitlis, and upon Armenia's access to the sea. But even if Turkey accepts, will Armenia? That disillusioned community is now looking not towards Mr. Lloyd George's Supreme Council, nor towards Lord Robert Cecil's League of Nations, but towards Lenin and the Bolshevist hordes who have their eyes fixed on the Caucasus.

We sincerely hope that the Allies will be able to surmount these difficulties, but it is no good ignoring them. It is useless to talk about mandates if the writ of the mandatory does not run in the country concerned. The plain fact is that there can be no settlement with Turkey until there has first of all been a settlement with Russia. It is the failure to recognise that fact which explains the indeterminate character of the new Treaty. As long as the Bolsheviks remain in Moscow, there will be wars in the Caucasus, and feuds in Anatolia, where the British Fleet will be powerless for influence. For a durable peace in the East, Britain requires the co-operation of a sane and restored Russia.

The *Westminster Gazette* of May 13 has the following comment upon the Turkish Treaty:—

The question which troubles us is not so much whether the penalty inflicted on the Turks is a just one as whether we are making the right and proper use of this opportunity. We look at the Turkish Treaty and wonder how much of it accords with reality and can be enforced, and how much a mere writing of formulas to cover problems which the Allies have failed to solve. In the first category we hope it is possible to put the control of the Straits and the European part of the settlement, which gives to Greece all that was hitherto Turkish up to the Chataldja Lines, excepting only the Derkos area, which supplies Constantinople with water. That city remains the seat of the Sultanate and the Khalifate, but for all secular purposes under the supervision of the Powers, who take guarantees that it shall not again become the centre of political or financial intrigues We congratulate M. Venizelos on the brilliant victory he has won for the Greek people, and we have every confidence that he will use it moderately. He knows from long experience that no peace or lasting settlement is to be had in this region, except by mutual forbearance and give-and-take between the Balkan peoples, and, as holder of the coast territory, Greece now assumes a special obligation to see that the interests and convenience of her neighbours are consulted. Outlets to the sea will, we hope, freely be given to the Bulgarians at Salonika and other Greek ports, as well as Dedeagatch, where they have special rights.

The *Daily Telegraph* of May 13, while congratulating M. Venizelos upon his triumphant diplomacy, shows clearly that Greece's salvation now rests upon her own efforts. It says:—

Bulgarian and Turkish resentment will not be easily appeased, and the comments of the Italian Press upon the Turkish Treaty show how wrathful is Italian opinion at the poor success of Italy as compared with Greece in securing valuable prizes. The fall of Signor Nitti emphasises this feeling. The course of events, therefore, may possibly show that Greece has been rather too successful in securing the favours of the Supreme Council. We sincerely hope not. Her renewal of youth, her true and vigorous renascence, her rise to the position of a considerable Power in the East of Europe, would be heartily welcome to most Englishmen. But while the Western Powers have deliberately created by this Treaty a Greater Hellas, it is the Greek nation itself which will have to maintain Greater Hellas, and we hope that it will rise above its besetting national faults to a true appreciation of the privileges with which it has been loaded and of the corresponding duties which are also included in the provisions of this Treaty. It is by showing magnanimity and fair play, especially to her secular enemies, the Bulgarians and the Turks, that Greece can best justify her aggrandisement by the Powers.

M. Venizelos and Greece.

In the *New Statesman* of May 1 appears an article upon "The Triumph of M. Venizelos." It does not underrate the difficulties that lie ahead of Greece. It says:—

But, after all, which, if any, of these brilliant ideas influenced the mind of the Supreme Council is now of little consequence. The Greeks have got their Empire, and the important question is what they will make of it. We do not find it possible to be optimistic. We are not prejudiced against the Greeks. In the Peace, if not in the war, they have been out for all they could get; but unhappily neither we, nor any European people, have any right to preach to them on that account. Their past record of persecution and "propaganda" in the Balkans is not a very nice one; but neither are those of their neighbours. But the Greeks to-day are universally unpopular in the Near East. In all that region, where national hatreds and suspicions grow to a rankness unknown in Northern Europe, the most hated and the most suspected nation is Greece. Her new Empire will be ringed round with enemies—Bulgarians, Jugo-Slavs, Albanians, Turks. She may, if she walks warily, escape serious conflicts. She may, if she evolves a new spirit and a new policy of conciliation, even turn old enemies into friends. M. Venizelos has declared that Greece is to become the "great, stable, peaceful element" in the Balkans, and that what he hopes to establish, in the areas where population is mixed, is a tradition not of toleration—"that," he said, "is too weak a word"—but of absolute equality between race and race. That is a fine ideal, which, realised in the Balkans, might be of incalculable benefit to the peace of the world; and if M. Venizelos can translate it into practice the concessions which he has won from the Supreme Council will have been justified.

But M. Venizelos is taking a heavy risk. Against M. Venizelos himself we have nothing to say; on the contrary, we believe him to be not only a great statesman, but a man of high principle. But it is there that the danger lies. M. Venizelos is not Greece. He is better than Greece. He stands far above the normal level of the Greek people—even, we venture to say, as far above the best in Greece, as Mr. Lloyd George or M. Millerand stand below the best in England or France. M. Venizelos will have to carry the burden of his empire with very little assistance. If he were endowed with immortality and a perpetual dictatorship, we should have high hopes. But he is a man, and an old man, and democracies (and not least the Greek democracy) are fickle. While his leadership lasts, there should be peace. If, however, the Greeks are to be encouraged by us to regard themselves as the gaolers of an "incapable Bulgaria," if their chauvinism is to be worked up against the Turks (they are boasting already of the 100,000 men whom they will contribute to Foch's 27 divisions for enforcing the Turkish Treaty), then their new Greece will come down like a house of cards.

THE CARAVANSERAI.

A Cairo message states that "workmen engaged in excavating at Jerusalem" have "struck a gold reef," and adds with a reckless blow-the-expense air as to length of the message: "Great excitement reigns in the city." Knowing from personal experience how easy it is for excavating experiences to be wildly magnified I am not surprised by the latter item. But I understand that many people wonder whether the whole thing may not be a dodge to attract the *Yahudis* back to their own land.

***

When I was in Constantinople I made friends with several of the pariah dogs that roved the streets; and, though they had their drawbacks, it always seemed to me that they were likable beasts, and not so great a nuisance as one would suppose they must be. I was, therefore, genuinely sorry when I learned that the Remorseless March of Progress had led to the determination to get rid of them; and the way in which effect was given to the determination filled me with indignation. You will remember that the poor dogs were shipped off to various islands and there left to die, because the Turk would not transgress against his religion by killing them outright. That was five or six years ago, and apparently the unhappy dogs all met their inevitable fate, after sufferings that one does not care to think about. Their bones littered the islands; and now those very bones are to be made of service to Man—who surely might feel shame at turning his victims to account in such fashion! For to-day numbers of Russian refugees are housed on the islands which were formerly the dogs' prison; and the American Red Cross authorities, who are caring for these particular refugees, have set their *protégées* to work at making buttons from the dogs' bones. I am not altogether surprised to learn that the Turks will not buy the buttons.

***

The Arabs of the Red Sea and the Persian Gulf coasts have always had something of a reputation as wreckers. Indeed, they could apparently have given our own Cornish folk "points and a licking" in this field, even when Cornishmen were famous by reason of their—skill at salvage work, let us say. Recently, I am told, an incident occurred which showed that the Arabs of the Jaffa region also would gladly do what they could in this line, if only they were given a free hand. A vessel went ashore near Jaffa, and the coast for a distance of about five miles on either side of the wreck was soon thickly strewn with what had been her cargo. Needless to say, the local Arabs gave thanks to Allah, and lost no time in gathering in the harvest thus sent their way. Unfortunately for them, however, an energetic British official happened to take views on the subject which did not coincide with those of the harvesters. In an unsympathetic way he ordered that all the treasure-trove should be given up; and so capably did he and his assistants act that practically all of it actually was recovered. But not quite all. Like the solitary rat and the lame boy in "The Pied Piper," one case was left behind. And in due course the British official received a notification from the shipping agent that whereas 293 pairs of socks had gone astray, only 292 pairs had been recovered; and what steps did he (the official) propose to take in the matter—or words to that effect.

MUSICAL NOTES.

It is always instructive to hear our own music played by foreign artists, especially when those artists belong to nationalities not spiritually akin to ours. For, quite apart from little habits of expression or methods of interpretation, it is possible for them to give British compositions an aspect utterly different from that presented by native artists. An example of this difference was very fully shown by the Bohemian Czech String Quartet in Elgar's Quartet, which they included with Arnold Bax's Pianoforte Quintet and Smetana's Quartet in their Anglo-Czech programme at the Wigmore Hall on May 12. Elgar's Quartet is a most beautiful piece of work, and every string quartet has at some time or other played it. But I have never heard it given as it was on Wednesday afternoon. The lovely "reflective" mood of the first two movements was not reflected, and the exquisite counter melodies were not insisted upon. Instead we had, as indeed we might have expected, a very fine presentation of the rhythms and of the architectural firmness of the quartet; and in the last movement (Allegro Molto), the Bohemians' vivid idiosyncrasies compelled a superb performance. Bax's Pianoforte Quintet (with Miss Fanny Davies her usual reliable self at the pianoforte) was given its first performance by the Quartet. It is extraordinarily original and imaginative, though too long in its present form. The subtle rhythms of the Celtic mind (and this Quintet abounds in them) seemed peculiarly fascinating in the hands of the Bohemians, and there is no doubt that Mr. Bax is a composer of definite, if rather undefinable, genius. The Smetana, which was left to the last, was a thing of pure joy; for in it the Bohemian Czech string quartet played as if inspired. No other Quartet can go half as far as they in Czech music.

In all old music there are a hundred fascinations, but, more, probably, in old English music than in any other. If the present passion for Elizabethan culture be examined, much cast would no doubt be discovered, but, both in the literature and in the music of this period, there are an eternal freshness, joyousness, and imaginativeness that make and always will make a fundamental appeal. At the Æolian Hall on May 12, where Mr. Gerald Cooper, together with Mrs. Woodhouse at the harpsichord, and the English Singers gave a programme that was devoted wholly to Elizabethan music, there was no affectation in the delight and surprised joy of the audience. In order of merit the English Singers, who sang madrigals of three or of six parts, came first: their diction, phrasing, and *ensemble* were very nearly perfect. A better performance of these madrigals, which were written by such composers as King Henry VIII., Cornyshe, Morley, and Weelkes, is difficult to imagine; I, at any rate, have not heard anything half so charming. The fame of Mrs. Woodhouse in harpsichord playing is well-known, and deservedly so, for it comes to this, that she is such an authority in this style of music that one can say that whatever she chooses to do is right. She played all sorts of things by Bull, Byrd, Tisdall, and some wholly delightful corrantos and muscadins by a very prolific composer, whom those who have not been able to identify him have called "Anon." (It is, by the way, an index of the general excellence of music in Elizabethan times, that such anonymous compositions should not have brought immediate fame to their author.) Of Mr. Cooper's singing not very much is to be said; his taste and judgment are equally refined, but he is not yet a singer. However, his art is so unaffected that one can but hope that the lesser attribute of vocal means will be granted to him.

On Miss Olga Haley's surpassing excellence as a *lieder* singer I have commented before, but a further demonstration of it in her recital of foreign songs at the Steinway Hall on May 13 cannot go unnoticed. In her selection of songs she relied chiefly on Modern French and Romantic German composers, but she also included four beautiful songs of Russian origin, and some freakish efforts—"Three Songs in the German Manner" and "Three Songs in the French Manner"—by Lord Berners, in which this wayward composer makes the first notable attempt at concentrated parody in music. (They proved to be very difficult to sing, but on the whole were a waste of a good singer's time.) Where Miss Haley showed best the consummate art that is in her was in songs like Schubert's "Whither" or in Brahms' "There 'Mong the Willows." These she sang with most perfect grace. But it is not only in pure *lieder* that she is supreme; her versatility was delightfully proved in the pastoral simplicity of Da Parma's "I Pastori," in the shifting colours of Ropartz's "Si tu disais," and in the exquisite word-painting of Arensky's "Autumn." In music like this, where colour and atmosphere are nearly everything, she was, but for reproachable diction, as good as is humanly possible. If Miss Haley's diction were as faultless as her phrasing and her tone, she would be one of the singers of the world.

NEAR EAST BOOKSHELF.

I.—"WEST AND EAST." By Edward Caldwell Moore, Professor of Christian Morals, Harvard University. (London: Duckworth. 12s. 6d. net.)
II.—"NATIONAL EDUCATION IN INDIA." By Lajpat Rai. (London: George Allen and Unwin, Ltd. 6s. net.)
III.—"THE FRINGE OF THE DESERT." By R. S. Macnamara. (London: Herbert Jenkins. 2s. net.)

I.—THE EXPANSION OF EUROPE.

In the autumn of 1913 Professor E. Caldwell Moore, of Harvard University, was invited to deliver a course of lectures at Oxford on the "Expansion of Christendom and the Naturalisation of Christianity in the Orient." The entire series has now appeared in book form, and although the world war has disappointed his hopes for the future, it has not impaired the value of the research upon which they were built. His aim it was to trace the influence of Western ideals on the life of Asia. The process of interaction began with an era of conquest, followed by one of commerce, and it culminates in a world-wide assimilation. This movement had two characteristic features—the spread of material civilisation and the propagation of Christianity. Generally speaking, it was the impact of secular forces that paved the way for religious endeavour, but the converse was often seen to a surprising degree. The human agents at work are described with sympathy and knowledge. They fall under two categories; on the one side a long succession of soldiers, administrators, teachers and traders; on the other, emissaries of the Faith, whose province was things of the Spirit.

As one would expect in the president of the American Board for Foreign Missions, Professor Moore is eager to defend the propaganda of Christian doctrine from its enemies' attacks. He triumphantly refutes the time-worn objection to missionary effort, that people who wish to convert the heathen should begin at home. It had some force a century ago, when, owing to imperfect means of communication, the inhabited world was divided into water-tight compartments. In our day steam-power, electricity, and the internal-combustion engine have welded it into a highly sensitive organism. Political moves in Washington are promptly imitated by China, and labour troubles in the Manchester districts affect the welfare of Bombay and Osaka. So the existence of dense masses of barbarism is a source of danger for advanced communities. Moreover, the twentieth century missionary has broader views and a deeper knowledge of alien religions than any of his predecessors. The Careys, Marshmans, and Wards of old time were filled with reprobation by the rites of Hinduism and Islam; their eyes were turned to a life beyond the grave, and they did not realise the possibility of giving people a foretaste of heavenly joys by improving their environment. Their successors' policy has undergone a radical change, its trend is towards education and social betterment; it endeavours to trace the evolution of religions from their common source; and no longer lays undue stress on the shibboleth of dogma.

In the socio-political sphere Professor Moore remarks that:

The East has produced many enlightened individuals. It has never at any time or in any place shown the widespread enlightenment of a whole people. There is nothing in its past to indicate that, without the stimulus and help of the West, the East would ever have made such an achievement.

That stimulus is not invariably wholesome or inspiring. Of its latest manifestation the Professor writes:—

No one can witness the triumph of democracy in the West without seeing how much has been sacrificed to that triumph. He must be blind indeed who does not perceive that democracy has exercised, as fully as tyranny, a blighting influence on the individual. It levels men; it tends to level them downwards. No one can fail to realise that certain virtues which aristocracy produced have disappeared; that we of the West are at this point victims of the theory that democracy is a panacea. Men imagine that civil rights and economic equalities will bring in a golden age; in reality, they often usher in an era of triumphant brazenness. Yet neither in East nor West do men imagine that the true course is retreat. China has become nominally Republican, and Turkey supposedly constitutionalist. Japan has indefinitely more of agitation in the interest of larger liberty for its masses than in the old days, when for the vast majority of its population there was no liberty at all. India, under a generous and enlightened rule, is seething with unrest. It has agitatory and revolutionary movements without number, whereas the ancestors of these troubled British subjects of Indian race suffered the tyranny of Marathi conquerors and Mughal Emperors without protest and without hope.

It is refreshing to find an American thinker who admits that democracy is not an ideal régime, and Britons owe a debt of gratitude to Professor Moore for his appreciation of our fellow-countrymen's achievement in India.

F. H. S.

II.—"LABOUR AND LIVE."

When Sir Alfred Lyall wished to point the contrast between East and West as it presented itself to him, he made the West proclaim its mission in the words we have quoted above: "The Faith we bring you is Labour and Live." Here we have substantially the same gospel preached by Mr. Lajpat Rai, an experienced educationist who is known more widely as an advanced politician, and the collocation of the two names may give some measure of the changes wrought in India during the last few decades. Mr. Lajpat Rai takes as his text the view, so often heard nowadays in India, that the national system of education must be founded on Indian ideals and methods; in opposition to this view he contends that the ideals are outworn and the methods fundamentally bad, and he puts forward instead the pure theory of Western education as expounded by the American writers whose names bulk so largely in his bibliography. He would have his people think less about the next world, and concentrate on this; life is the thing that matters; desire is to be trained, not killed; the world has moved since the *shashtras* were composed, and it would be folly not to profit by the experience of the nations which have led the way. Having demonstrated this theory to his own satisfaction, he goes into some details regarding the kind of education to be provided in India. The dominant note must be Progress (with the largest possible P). Destiny can be controlled if you tackle it in the right way. Pessimism must be banished; and if you want to know how little race counts for, you need only look at Washington (D.C.). India is, however, linked to England, and for India Mr. Fisher is a safe guide. The amount of money to be spent will be large, but education pays, a proposition easily proved out of the mouths of eminent bankers and other American citizens, while the immediate problem of ways and means is not handled in detail.

The book is rather crude, loosely put together, and marred by superfluity of quotations; the writer's knowledge of history is in some respects defective, and he tends to give too little weight to prejudices which he has outgrown or does not share. Notwithstanding these defects, it is a vigorous and timely piece of work. The tendency in recent years has been to base the new India on a gospel of exclusiveness and hate: Mr. Lajpat Rai quite justifiably puts India first, but his scheme rests on love of India, not on hatred of other nations, and in that respect at least it marks a definite step forward. How it will be received by that elusive entity, the real India, is a question on which we are not disposed to prophesy. Will she decide to "live by knowledge, and peace, and love"? Or does the old answer still hold good—"Let me rest nor be troubled, if all is dream"?

III.—IN ENGLAND AND EGYPT.

This is a new cheap edition of an interesting and charming novel. The parents of Hildred Ivors have been separated since she was a baby, and she has been brought up by some elderly cousins. She does not remember her mother, and has had only fleeting glimpses of her father, a famous painter. At the age of twenty she is suddenly told that she is to spend six months with her mother in the country in England, and six months with her father in Egypt, and is then to decide with which of them she will live, or whether she will prefer to take up a profession and make a home for herself. It is an excellent opening, and the authoress makes very good use of her opportunities, both in the subtle portrayal of character and in the description of scenery. Her feeling for beauty is very deep, and expressed with a certain restraint which is most effective. She writes with the same sensitiveness of a May morning in England, of the colouring of the temples on the Nile, and of the loveliness of Hesper Marlowe, the woman by whose deep love the last days of Hildred's erratic, selfish father are made happy.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish Dates.

Gregorian (New Style).	Julian (Old Style).	—	Arabic.	Jewish.
1920. May 20	1920. May. 7	Thursday	1338. Ramadan. 2	5680. Sivan. 3
21	8	Friday	3	4
22	9	Saturday.....	4	5
23	10	Sunday	5	6
24	11	Monday	6	7
25	12	Tuesday	7	8
26	13	Wednesday	8	9

Lord Allenby left Cairo for Palestine on May 14.

Lord Oranmore and Browne has returned to 12, Cavendish Place from Ireland.

Lord and Lady Willingdon have left Madras on a tour to Bangalore, Mysore and Mercara.

Sir Aurel Stein has arrived home from India, and expects to be in England until October.

M. Pashitch and Dr. Trumbitch, the Yugoslav delegates, left Pallanza for Paris on May 14.

The Maharajah of Cooch Behar landed at Plymouth on May 11 from Bombay and proceeded to London.

Sir Daniel Twomey, Chief Judge, Rangoon, has been granted leave till the end of the vacation in November.

Sir Francis and Lady Elliot have arrived from the South of France at the Stanhope Hotel, Stanhope Gardens, South Kensington.

Viscount and Viscountess Goschen and the Hon. Phyllis and Cicely Goschen have returned to England from India and Mesopotamia.

The Archbishop of Cyprus, Mgr. Kyrillos, President of the Cyprus Mission, has arrived in London. M. Theodoton, another member of the Mission, is also here.

Under the auspices of the Central Asian Society, at 74, Grosvenor Street, W.1., Mr. E. H. Freshfield yesterday gave a lecture on "Old Fortifications of Constantinople."

The Calcutta Victory dinner will be held at the Criterion on Tuesday, June 1. Applications for tickets, price £1 each, exclusive of wines, should reach the hon. treasurer, Mr. Walter Davies, Downhurst, Ealing, W.5, by to-day, after which date seats cannot be reserved.

Representatives of the Eastern Church are expected to visit England in July, at the time of the Lambeth Conference, on the invitation of the Eastern Church Relations Committee, of which the Archbishop of Canterbury is chairman, in order to familiarise themselves with the life and leading personalities of the Anglican Churches.

M. Theodore D. Mosconas, of the Dodecanesian Delegation in Manchester (late Secretary at the Greek Consulate), has been elected as member of the Greek Sub-Committee, League of Nations Union. H.E. M. I. Gennadius, G.C.V.O., G.C.O.G., D.D., L.L.D., is the chairman of this sub-committee and Mr. J. Mavrogordato, the hon. secretary.

The Royal Society formally admitted to its Fellowship on May 12 Sir Jagadis C. Bose, the first Indian to attain this distinction for scientific, as distinct from mathematical, work. The previous Indian admission was made in 1917, when the Fellowship was conferred on Mr. Srinivasa Ramanujam, the holder of the Cambridge mathematical research degree.

The fortieth annual Burma dinner will be held at Prince's Galleries, Piccadilly, on June 17, at 7 for 7.30 p.m. Mr. Arthur W. Bibby will preside. Those proposing to attend are requested to send their names and addresses immediately to the hon. secretary, Mr. George O. Stiven, 6, Fenchurch Avenue, E.C.3, from whom tickets (price £1 each, exclusive of wines) can be obtained.

APPOINTMENTS, ETC.

Mr. Beza, of the Roumanian Legation, has been appointed Consul for Roumania.

M. Hadji Mischeff, Bulgarian Minister at The Hague (formerly Minister in London), has been appointed Bulgarian delegate to the Peace Conference in Paris.

Mr. H. F. Howard, C.S.I., C.I.E. (lately Financial Secretary to the Government of India), has been appointed to act temporarily as Controller of Finance at the India Office.

M. Barendrecht, Dutch Consul at Calcutta, has been appointed temporarily as Dutch Envoy Extraordinary and Minister Plenipotentiary at Buenos Aires.

OBITUARY.

The death occurred on May 14 of Dr. Ronald Montagu Burrows, Principal of King's College, London. Dr. Burrows from early youth was a firm Philhellene, and both as a scholar and as an archæologist in classical Greek he did some brilliant work. His book on "Recent Discoveries in Crete," which he published in 1907, is the authority upon the subject. In 1913 he was appointed Principal of King's College, and he greatly increased the interest taken there in Greek and in Slavonic culture. As a Hellenist he was strongly on the side of M. Venizelos during the war, and did much both in this country and in France to secure popular appreciation of the cause of Greece. He was one of the founders of the Anglo-Hellenic League in 1913, and by his absolutely genuine sympathy with the Hellenic cause he gained the confidence of Greeks generally.

MEMORIAL TO THE LATE LORD CROMER.

A memorial tablet to the late Lord Cromer on the west wall of St. Margaret's Chapel, in Westminster Abbey, was unveiled last week by Lord Curzon of Kedleston. The tablet, which is the work of Sir W. Goscombe John, R.A., is of marble, and bears the inscription:—"To the glory of God and in memory of Evelyn Baring, First Earl of Cromer, G.C.B., O.M., G.C.M.G., K.C.S.I., 1841-1916. Regenerator of Egypt." The lower part of the tablet contains a medallion portrait of Lord Cromer.

Among those present at the service were Lord and Lady Cromer, the Dowager Lady Cromer, the Hon. Evelyn Baring, General and Mrs. Baring, Lord Bessborough, the Dowager Lady Hillingdon, Lady Curzon of Kedleston, Lord Lansdowne, Lord Crawford, Lord Sanderson, Field-Marshal Lord Grenfell, Lord Revelstoke, Lord Bath, Lord Donoughmore, Lord Lincolnshire, Lord Coventry, the Archbishop of Canterbury, Lord Hardinge of Penshurst, Lord Milner, Lord Emmott, Lord Midleton, Sir G. Murray, Sir W. Garstin, Mr. H. T. Anstruther (representing the Council of the Suez Canal Company), Sir R. Wingate, and Sir W. Goscombe John, R.A.

NEWS IN BRIEF.

It has been decided to enforce the regulations against plague on all arrivals from Piræus in Egypt.

Great demonstrations were held in Sofia on May 6 last to protest against the transfer of Thrace to Greece.

An organisation for transporting starving Austrian children, especially from Vienna, has been formed in Roumania.

There is reason to believe that two or three delegates representing Mustapha Kemal Pasha's Government, and including Ahmed Rustem, have managed to reach Western Europe.

According to the *Orient*, Smyrna station has sent a cordial invitation to the World's Student Christian Federation to hold its next conference there in the spring of 1921.

An Indian Army Order allows officers in possession of blue jumpers and overalls to wear them at mess, pending the issue of orders regarding mess dress, says the *Times of India*.

Sir George Barnes, member of the Viceroy's Council for Railways, met representatives of the Bombay railway strikers on May 13, and urged the immediate resumption of work.

Both battalions of the King's Own Malta Regiment, which were disembodied on January 1 after being mobilised for the full period of the war, are to be maintained after complete reorganisation, involving better pay.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

INDIA.—Two Gentlewomen, five years' nursing experience, desire Post as Children's Nurses or Companions.—Box 167, THE NEAR EAST, 1, Devonshire Square, London, E.C.2.

DEATH OF THE ASSYRIAN PATRIARCH.

Paulus Mar Shimun, patriarch of the Assyrian Church, died in the refugee camp of his nation at Bakubah on May 10.

The late Patriarch was consecrated in succession to his brother, Benyamin Mar Shimun (according to the strange semi-hereditary custom of this Church and nation), when that brother was murdered by the Kurdish Agha Simko in the latter stages of the great war.

By ancient custom, the office of Patriarch descends in one family, which is supposed locally to be descended from Simon Peter, the Apostle of Christ. This accounts for the official title by which the patriarch is always known (Mar Shimun, Lord Simon).

A hereditary episcopate is, of course, a strange thing to English minds, but when we remember that there was an instance of the same thing in Europe till the nineteenth century was more than half over (the Vladikas of Montenegro), it is at least comprehensible that the custom should have lingered a little longer in an even more remote and wild land. The late Patriarch died of tuberculosis; he was discovered to be suffering from this disease while in the camp, as a result of hardships incurred during the war. By the advice of his doctor, he was removed from the camp and lodged in the mountain monastery of Sheikh Mattai, near Mosul, in the hope that the purer air might arrest the progress of the disease. This, however, proved fruitless, and the patriarch returned to his own people to die.

He was about thirty years of age, which, of course, seems young for a prelate. His late brother, however, was consecrated patriarch when hardly more than fifteen years old, and there is at least one Bishop now in the camp at Baqubah (Mar Sergius), who received consecration when less than ten! There are, however, good mediæval precedents for such a practice, even in Europe. There is, for instance, a record of a certain Jean de Lorraine, of the great house of Guise, who became Bishop of Metz at the age of seven, and Cardinal at the age of twenty. This was in the year 1518. There has also been at least one pope (John XII.) who received that office when less than nineteen years old.

TOPICS IN PARLIAMENT.

House of Commons.

The subjoined headings are those given in the official report:—

PEACE TREATIES: Montenegro. ALBANIA (CONSULAR REPRESENTATIVES). MESOPOTAMIA. INDIA: Re-employed Army Officers (Pensions). EGYPT: Budget. ANGLO-PERSIAN MILITARY COMMISSION. MESOPOTAMIA (TRANSPORTATION DEVELOPMENT).—(May 10).

INDIA: Auxiliary Forces Bill.—British Officer's Wife (Peshawar).—Medical Service. EGYPT (LORD MILNER'S REPORT). RUSSIA (BAKU OILFIELDS). INDIA: Public Works Department, India (Rates of Pay). CROWN COLONIES AND PROTECTORATES (INDIAN COMMUNITIES). (May 12).

EGYPT: Government Ex-Employees, Pensions. PALESTINE: Anti-Jewish Riots (Jerusalem). RUSSIA: Caucasus (British Troops). MESOPOTAMIA. MONTENEGRO. INDIA (DEPARTMENTAL WARRANT OFFICERS).

PALESTINE: British Mandate. CONSULAR REPRESENTATIVES (MONTENEGRO AND ALBANIA). RUSSIA: British Mission (Caspian and Caucasus). EGYPT (LORD MILNER'S REPORT). CEYLON (STRIKES). BRITISH ARMY: Troops in Egypt. (Hospital Transport). DARDANELLES. INDIA: Defence of India Act (Punjab).—Punjab (Newspapers).—Martial Law. (May 13).

ARMY CHAPLAINS, INDIA (ALLOWANCES). (May 14).

The Cairo correspondent of the *Morning Post* states that Lieutenant Jabotinsky, who was recently sentenced in Jerusalem by a British Military Court, is being regarded as a hero. A sum of £300 has already been collected for him in Jerusalem, and his name, together with the names of fifteen others recently sentenced, are to be recorded by the National Jewish Fund.

PROPERTY FOR SALE.

IN COUNTY OF KENT.—FREEHOLD, £12,000.—A gentleman's well-planned MODERN RESIDENCE, containing 6 bedrooms, with excellent offices and outbuildings, including garage, stabling, and three cottages, all in good repair; tennis lawn, rock garden, etc., and 22 acres of young fruit plantations, highly cultivated and in profitable bearing condition. The house is so arranged as to admit of its being added to at comparatively small expense. Situation—300 feet above sea level, on a slope facing due South. Perfect natural drainage, the soil being of a loamy character overlying the ragstone formation; 2½-3 miles from two railway stations, 3 from golf links, and 30 from London. Close to Church, Post Office, and Auto-Car Service. The district is particularly favourable for fruit growing, and opportunities but seldom occur for acquiring a property of such exceptional character.—Write Box "Z," THE NEAR EAST, 1, Devonshire Square, London, E.C.

WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO

(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

THE TURKISH TREATY.

Save that the Sultan is allowed to remain—*magni nominis umbra*—in Constantinople, the Peace terms presented last week by the Allied Powers to Turkey could hardly have been more stern. Like the Dual Monarchy, of which she reproduced in an immeasurably worse form all the vices and anomalies, she ceases to exist as a Great Power. Ten years ago her frontiers in Europe still stretched to the Danube. Now they are confined within the small strip behind the lines of Chatalja. What remained to her of Thrace after the Balkan wars goes to Greece, and even the sovereignty still to be exercised by the Sultan at Constantinople will be more nominal than real. In Asia only the "homelands" of the Turkish race in Asia Minor are left under direct Turkish rule—and even then subject to manifold restrictions. The exact frontiers of the new and independent Armenian State and of a new, and autonomous, and, in the future, possibly even also independent Kurdish State to the south of it, have still to be settled, as to the former, by the President of the United States as arbitrator, and as to the latter by an Allied Commission; but in both cases Turkey must bind herself beforehand to accept them. Smyrna and an important territory with a sea-frontage of over 100 miles, and in some places stretching almost as far into the interior, are committed to Greek administration, though Turkish sovereignty will be formally preserved until such time as the local Parliament may, not less than five years hence, demand through the League of Nations, and subject possibly to a plebiscite, definite incorporation with the Hellenic Kingdom. Starting from the Gulf of Edremid on the Ægean Sea to the north of the above territory, another long strip of territory, extending in Asia to the Black Sea, and including in Europe the Gallipoli peninsula and the southern shores of the Sea of Marmora, so as to cover the Straits and their approaches, is reserved for special administration under an international "Commission of the Straits" to which the Turkish and Greek Governments shall delegate, as far as each of them is concerned—the former in Asia Minor, the latter in Thrace—all the powers necessary to ensure perpetual freedom of navigation for the Dardanelles, the Sea of Marmora, and the Bosphorus in peace and in war. Turkey is to surrender the whole of her Arab-speaking provinces, of which the northern boundary is to be drawn from the mouth of the Sihun River on the Mediterranean, eastward between Marash and Aintab and along, but some thirty miles to the north of, the Baghdad Railway. Turkey is to recognise specifically the independence of the Hejaz, the British Protectorate over Egypt, the French Protectorate in Tunis and Morocco, and Italian sovereignty in Libya, and to renounce all rights and titles she may hitherto have possessed or claimed in those regions. She is to surrender also all her insular possessions in the Mediterranean, the Dodecanese and Castellorizzo to Italy, who now occupies them, Cyprus to Great Britain, who annexed the island in 1914, and the rest to Greece. She is to have in future no Navy and no Air Force, and her Army—which is not to exceed 50,000 men—is to be reduced to the status and functions of a gendarmerie. With the conditions that place her under a drastic financial and economic tutelage we shall deal on another occasion.

The Turkish Government has been given a month to consider these terms, and in the meantime we must give the Allies credit for having carefully contemplated the measures by which they intend to enforce them, should the Turkish Nationalists continue their career of violence and seek to terrorise Constantinople into resistance. We cannot believe that the Sultan and his present advisers will be so ill-advised as to reject them, though they will doubtless try to bargain for mitigation. Severe as the terms undoubtedly are, few will deem them too severe. Turkey's wanton entry into the war at Germany's bidding added enormously to its duration and to its appalling cost, especially to ourselves, in blood and treasure. They are not, however, vindictive terms. They are not inspired by any spirit of religious differentiation. They are terms which the rulers of Turkey have themselves demonstrated *ad nauseam* before the war and during the war, and even since the war, to be absolutely necessary if an end is to be put at last to the invariable misrule, accentuated by periodical massacres, which has reduced some of the fairest regions of the old world to anarchy and misery. Our sympathies have naturally gone out to the Christian populations, which have suffered so unspeakably at the hands of their Turkish rulers, but the Mohammedan populations have often suffered only in a lesser degree than their Christian fellow-subjects. To borrow the language of the Prime Minister's admirable reply to an Indian-Mohammedan deputation, "it is not a question of race; it is not a question of Christian; it is not a question of Moslem." Turkey has not been treated on different principles from those which the Allies sought to apply in dealing with their Christian foes. We have imposed very stern and severe terms upon Germany, but she is a Christian country. So is Austria-Hungary, but she has none the less been dismembered, even more completely than Turkey. For to Turkey there remains in Asia Minor a compact territory with a fairly homogeneous Turkish Mohammedan population and great natural resources, which under a reformed Turkish Government and reasonable supervision may still develop into a respectable and useful State.

That the Sultan's flag will still fly over Constantinople is undoubtedly a signal proof of the anxiety of the Allies to meet the wishes of large numbers of Mohammedans who, though not his subjects, revere his authority as Khalif. So long as Mohammedans choose to recognise his spiritual authority and are content to recognise it as something apart from his temporal authority, Great Britain will certainly be the last Power to treat it disrespectfully. It is difficult to understand how the question of the Khalifate has come to be mixed up in Mohammedan minds with the possession of Constantinople. But it is a question that concerns Mohammedans alone. For our own part we would only submit this one point, and with all due deference, to the consideration of thoughtful Mohammedans. It was under Selim I., the conqueror of Egypt, who first assumed the title of Khalif, surrendered to him by a weakly descendant of the Abbaside Khalifs in Cairo, that the Ottoman Empire reached its apogee some four centuries ago. Even during the brilliant reign of his successor, Soliman the Magnificent, it began to know defeat under the walls of Vienna and at Malta. Since then twenty degenerescent Sultans who have borne the title of Khalif have brought down to final ruin the mighty fabric reared by their predecessors before they claimed to be Khalifs. Can it be seriously maintained that the Khalifate has been a source of material strength to the Sultanate, or that the Sultanate has enhanced the spiritual authority of the Khalifate? A terrible Nemesis has overtaken Turkey, but it has been of her own seeking. Let us hope that she will bow to it with the fine resignation which is one of the loftiest teachings of her own faith. Then, when she has mended her ways will be the time for her to apply through the League of Nations, of which she will have become a member, for a remission of many restraints no longer necessary.

PEACE TERMS FOR TURKEY.

Principal Conditions.

The Draft Treaty of Peace was handed to the Turkish Delegates in Paris on May 11. We give below some of the principal clauses, bearing chiefly on territorial readjustments; while other clauses, dealing with financial and economic arrangements, will be found on another page. The Covenant of the League of Nations is included in the Treaty, of which it forms Part I., as is the Labour Convention, which is contained in Part XII. The following particulars are based upon the official summary of the Treaty:—

PART II.

The Boundaries of Turkey.

The boundaries of Turkey are described in two articles, one dealing with Turkey in Europe and the other with Turkey in Asia. The frontier of Turkey in Europe is approximately that of the Chatalja lines, the northern half of these lines being, however, advanced in a north-westerly direction so as to include within the boundaries of Turkey the whole area of Lake Derkos, which is a reservoir for the supply of water to Constantinople.

The boundaries of Turkey in Asia remain much the same, but the southern frontier is altered; south of the Sea of Marmora a strip of land is taken into the "Zone of the Straits" (see below), and around Smyrna a Greek administrative zone is created (see section dealing with Smyrna). The boundaries are described in detail in the Treaty in so far as they are not left to be settled by Boundary Commissions on the spot. Provision is also made in the Treaty for a possible modification of the present frontier between Turkey and the independent State of Armenia—viz., the former Russo-Turkish frontier in this region, by reference to the arbitration of the President of the United States regarding a new boundary for Armenia in the vilayets of Trebizond, Erzerum, Van, and Bitlis.

PART III.—POLITICAL CLAUSES.

Constantinople.

Subject to the provisions of the Treaty, the parties agree to the maintenance of Turkish sovereignty over Constantinople, but a reservation is made that, if Turkey fails to observe the provisions of the Treaty or of supplementary Treaties or Conventions, particularly as regards the protection of minorities, the Allied Powers may modify the above provisions, and Turkey agrees to accept any dispositions which may be made in this connection.

The Straits.

The navigation of the Straits, including the Dardanelles, the Sea of Marmora, and the Bosphorus, is to be open in future both in peace and war to every vessel of commerce or of war, and to military and commercial aircraft, without distinction of flag. These waters are not to be subject to blockade, and no belligerent right is to be exercised, nor any act of hostility committed within them unless in pursuance of a decision of the Council of the League of Nations.

A "Commission of the Straits" is established with control over these waters, to which both the Turkish and Greek Governments delegate the necessary powers. The Commission is composed of representatives appointed respectively by the United States of America (if and when that Government is willing to participate), the British Empire, France, Italy, Japan, Russia (if and when Russia becomes a member of the League of Nations), Greece, Roumania, and Bulgaria (if and when Bulgaria becomes a member of the League of Nations). Each Power is to appoint one representative, but the representative of the United States, the British Empire, France, Italy, Japan, and Russia have two votes each, and the representatives of the other three Powers one vote each.

The Commission exercises its authority in complete independence of the local authority, with its own flag, budget, and separate organisation. The Commission is charged with the execution of any works necessary for the improvement of the channels or the approaches to harbours, lighting and buoying, the control of pilotage and towage, the control of anchorages, the control necessary to assure the execution in the ports of Constantinople and Haidar Pasha of the régime laid down in that part of the Treaty relating to ports, waterways, and railways, and the control of all matters relating to wrecks and salvage and lighterage.

In the case of threats to the freedom of passage of the Straits, special provision is made for appeal by the Commission to the representatives at Constantinople of Great Britain, France, and Italy, which Powers, under the military provisions of the Treaty, provide forces for the occupation of the zone of the Straits. These representatives will concert with the naval and military commanders of the Allied forces the necessary measures, whether the threat comes from within or without the zone of the Straits.

Provision is also made for the acquisition of property or permanent works by the Commission, the raising of loans, the levying of dues on shipping in the Straits, the transfer to the Commission of the functions exercised within the waters of the Straits by the Constantinople Superior Council of Health, the Turkish Sanitary Administration, and the National Life Boat Service of the Bosphorus, and the relations of the Commission with persons or companies now holding concessions relating to lighthouses, docks, quays, or similar matters are laid down.

The Commission is empowered to raise a special police force, and provision is made for dealing with infringements of the regulations and by-laws of the Commission by the appropriate local Courts, whether Consular, Turkish, or Greek.

A special article lays down that all dues and charges imposed by the Commission shall be levied without any discrimination and on a footing of absolute equality between all vessels, whatever their port of origin or destination or departure, their flag or ownership, or the nationality or the ownership of their cargoes.

Articles analogous to the relevant provisions of the Suez Canal Convention of 1888 deal with the transit of warships, prizes, the passage of belligerent warships, and their stay within the waters under the control of the Commission as well as their repair or replenishment with supplies or the completion of their crews, but the freedom of action of belligerents acting in pursuance of a decision of the Council of the League of Nations is specially reserved. Further regulations are to be laid down by the League of Nations regarding the passage of war material and contraband destined for the enemies of Turkey and other kindred matters.

Kurdistan.

Turkey accepts in advance a scheme of local autonomy for the predominantly Kurdish areas, east of the Euphrates, south of the southern frontier of Armenia, as eventually fixed, and north of the southern frontier of Turkey, to be drafted by a Commission composed of British, French, and Italian representatives sitting at Constantinople. This scheme is to protect the rights of Assyro-Chaldeans and other racial or religious minorities within the above area, and with this object provision is also made for a possible rectification of the Turkish frontier, where that frontier coincides with that of Persia.

Secondly, the Treaty provides for an appeal for complete independence, within a stated time to the Council of the League of Nations by the Kurdish peoples within the above area, and for the grant of such independence by Turkey, if recommended by the Council. In that event the Kurds inhabiting that part of Kurdistan which has hitherto been included in the Mosul vilayet are to be allowed, if they so desire, to adhere to the independent Kurdish State.

Smyrna.

The Turkish Government agrees to transfer to the Greek Government the exercise of her rights of sovereignty over a special area round the city of Smyrna. In witness of Turkish sovereignty the Turkish flag is to be flown on one of the forts outside Smyrna. The Greek Government is to be responsible for the administration of the area, may keep troops there to maintain order, may include the area in the Greek Customs system, and is to establish a local Parliament on the basis of a scheme of proportional representation of minorities which is to be submitted to the Council of the League of Nations, and only to come into force after approval by a majority of the Council. The elections may be postponed for a limited period to allow the return of inhabitants banished or deported by the Turkish authorities.

Special provisions are included regarding the protection of minorities, the nationality of the inhabitants in the area and their protection abroad, the suspension of compulsory military service, freedom of commerce and transit, the use of the port of Smyrna by Turkey, the currency of the area, financial obligations, and the salt mines of Phocoea.

Finally, after five years, the local Parliament may ask the Council of the League of Nations for the incorporation of the area in the kingdom of Greece, and the Council may impose a plebiscite, but, if such incorporation is granted, Turkey agrees in advance to renounce all her rights to the territory in favour of Greece.

Greece.

Turkey renounces in favour of Greece her rights and titles over Turkish territory in Europe outside the frontier shown on the attached map, as well as over Imbros, Tenedos, Lemnos, Samothrace, Mytilene, Samos, Nikaria, and Chios, and certain other islands in the Ægean. In the zone of the Straits the Greek Government accepts practically the same obligations as are imposed on Turkey. Provision is made for a separate Treaty to be signed by Greece, protecting racial, linguistic and religious minorities in her new territories, particularly at Adrianople, and safeguarding freedom of transit and equitable treatment of the commerce of other nations. Greece also assumes certain financial obligations.

Armenia.

Turkey recognises Armenia as a free and independent State, and agrees to accept the arbitration of the President of the United States of America upon the question of the frontier between Turkey and Armenia in the vilayets of Erzerum, Trebizond, Van, and Bitlis, and upon Armenia's access to the sea.

Provision is made for the obligations and rights, which may pass to Armenia as the result of the award of the President giving former Turkish territory to her, for the eventual delimitation of the Armenian frontiers in Turkey as a result of the arbitration and of the Armenian frontiers with Georgia and Azerbaijan, failing direct agreement on the subject by the three States, and for a separate Treaty to be signed by Armenia protecting racial, linguistic, and religious minorities, and safeguarding freedom of transit and equitable treatment for the commerce of other nations.

Digitized by Google

Syria and Mesopotamia.

Syria and Mesopotamia are provisionally recognised by the High Contracting Parties as independent States in accordance with Article 22 of the Covenant of the League of Nations, subject to the tendering of administrative advice and assistance by a mandatory until they are able to stand alone. The boundaries of the States and the selection of mandatories will be fixed by the principal Allied Powers.

Palestine.

By the application of the provisions of Article 22 of the Covenant, the administration of Palestine is also entrusted to a mandatory. The selection of the mandatory and the determination of the frontiers of Palestine will be made by the Principal Allied Powers. The declaration originally made on November 2, 1917, by the British Government, and adopted by the other Allied Governments, in favour of a national home for the Jewish people in Palestine is reaffirmed, and its terms cited in the Treaty. Provision is also made for a special Commission, with a chairman appointed by the League of Nations, to study and regulate all questions and claims relating to the different religious communities in Palestine.

The terms of the mandates will be drafted by the Principal Allied Powers and submitted to the Council of the League of Nations for approval.

The Hejaz.

Turkey, in accordance with the action already taken by the Allied Powers, recognises the Hejaz as a free and independent State, and transfers to the Hejaz her sovereign rights over territory outside the boundaries of the former Turkish Empire and within the boundaries of the Hejaz as shall ultimately be fixed.

In view of the sacred character of the cities and Holy Places of Mecca and Medina in the eyes of all Moslems, the King of the Hejaz undertakes to ensure free and easy access thereto of Moslems of every country, desiring to go there on pilgrimages and for other religious objects, and respect for pious foundations. Provision is also made for complete commercial equality in the territory of the Hejaz as regards the new States in Turkey and all States, members of the League of Nations.

Egypt, Sudan and Cyprus.

Turkey renounces all rights and titles over Egypt as from November 5, 1914, and recognises the Protectorate proclaimed by Great Britain over Egypt on December 18, 1914. Special clauses provide for the acquisition of Egyptian nationality by Turkish subjects, and their right to opt for Turkish nationality, for the treatment of Egypt and Egyptian nationals, their goods and vessels, on the same footing as the Allied Powers and their nationals, for the protection of Egyptian nationals abroad by Great Britain, for the renunciation in favour of Great Britain of the powers conferred upon the Sultan of Turkey by the Convention signed at Constantinople on October 29, 1888, regarding the Suez Canal, for the treatment of property belonging to the Turkish Government and Turkish nationals in Egypt, for the renunciation by Turkey of all claim to the tribute formerly paid by Egypt, and for the acceptance by Great Britain of Turkey's liability for Turkish loans secured on the Egyptian tribute.

The High Contracting Parties take note of the convention between the British and Egyptian Governments of January 19, 1899, and the supplementary convention of July 10, 1899, regarding the status and administration of the Sudan.

The High Contracting Parties also recognise the annexation of Cyprus proclaimed by the British Government on November 5, 1914. Turkey renounces all rights over the island, including the right to tribute formerly paid by that island to the Sultan, and provision is made for the acquisition of British nationality by Turkish nationals born or habitually resident in Cyprus.

Morocco: Tunis.

Turkey recognises the French Protectorate in Morocco as from March 30, 1912, and the French Protectorate over Tunis as from May 12, 1881. Moroccan and Tunisian goods entering Turkey shall be subject to the same treatment as French goods.

Libya, Ægean Islands.

Turkey renounces all rights and privileges left to the Sultan in Libya under the Treaty of Lausanne of October 12, 1912. Turkey also renounces in favour of Italy all rights and titles over the Dodecanese, now in the occupation of Italy, and also over the island of Castellorizzo.

Nationality.

Detailed provisions are inserted in the Treaty for regulating the status of Turkish subjects habitually resident in territory detached by the Treaty from Turkey. These follow generally the lines of analogous provisions inserted in the Treaty with Austria.

General Provision.

Under this heading Turkey recognises and accepts all other Treaties and supplementary Conventions with other enemy States, and with States now existing or coming into existence in future in the whole or part of the former Russian Empire, as well as the abrogation of the Brest-Litovsk Treaties, and of all Treaties, Conventions, and Agreements made by Turkey with the Bolshevist Government in Russia. Special provision is made for Turkey's acceptance of a scheme of judicial reform (on the lines either of a mixed or unified system) to be drafted by the Principal Allied Powers with the assistance of technical experts of the other capitulatory Powers, Allied or neutral. This scheme shall replace the present capitulatory system in judicial matters in Turkey. Clauses also provide for an amnesty by Turkey to Turkish subjects assisting the Allies during the war, and for the renunciation by Turkey of all rights of suzerainty or jurisdiction over Moslems who are subject to the sovereignty or protectorate of any other State.

PART IV.—PROTECTION OF MINORITIES.

Turkey is to assure full and complete protection of life and liberty to all inhabitants of Turkey without distinction of birth, nationality, language, race, or religion. Special provision is made for the annulment of forcible conversions to Islam during the war and for the search and delivery, under the ægis of Mixed Commissions appointed by the League of Nations, of all persons in Turkey of whatever race or religion, carried off, interned, or placed in captivity during the war, and for future agreements with Turkey and other States regarding reciprocal or voluntary emigration of persons belonging to racial minorities.

The law of abandoned properties, 1915, is to be repealed, and Turkey agrees to certain measures of restitution and reparation, controlled by Mixed Arbitral Commissions appointed by the League of Nations, in favour of subjects of non-Turkish race who have suffered during the war. These Commissions will have power generally to arrange for carrying out works of reconstruction, the removal of undesirable persons from different localities, the disposal of property belonging to members of a community who have died or disappeared during the war without leaving heirs, and for the cancellation of forced sales of property during the war.

This chapter further safeguards by special provisions the civil and political rights of minorities, the free use of their language, their right to establish without interference by the Turkish authorities, educational, religious, and charitable institutions, and their ecclesiastical and scholastic autonomy. The measures necessary to guarantee the execution of this chapter of the Treaty are to be decided upon by the principal Allied Powers in consultation with the Council of the League of Nations, and Turkey accepts in advance any decisions that may be taken on the subject.

PARTS V., VI. and VII.

The fifth part contains the military, naval, and air clauses of the Treaty. The Turkish armies are to be demobilised within three months of the signing of the Treaty and her armed forces are to be limited to: (1) A force of gendarmerie of 35,000 men to be distributed over Turkish territory; (2) special elements intended for the reinforcement of the gendarmerie in case of serious trouble, 15,000 men; and (3) the Sultan's Bodyguard, 700 men. Compulsory recruiting is to be abolished, and very strict limitations are imposed as to armament, munitions, and material of war, their manufacture and importation.

For the purpose of guaranteeing the freedom of the Straits all works, fortifications, and batteries are to be demolished within a zone extending 20 kilometres inland from the coasts of the Sea of Marmora and of the Straits, and comprising the islands of the Sea of Marmora, also the islands of Lemnos, Imbros, Samothrace, Tenedos, and Mitlyene.

The construction of similar works or of roads or railways suitable for the rapid transport of mobile batteries is forbidden; France, Great Britain, and Italy have the right to prepare for demolition any existing roads and railways which might be utilised to this end, and to maintain such military forces within the zone as they may consider necessary; otherwise the zone is not to be used for military purposes. This provision does not exclude the employment of forces of Greek and Turkish gendarmerie, which will be under the Inter-Allied command of the forces of occupation, nor the presence of the Sultan's Bodyguard.

The Turkish navy is to be abolished, except for certain vessels retained for peace and fishery duties. The *personnel* for these services is to be recruited on a voluntary and long service basis.

The Turkish air force is to be suppressed.

Part VI. regulates the return of prisoners of war, and imposes obligations on the signatory Powers for the maintenance of the graves of soldiers and sailors buried in their territory. There is to be reciprocal exchange of information as to dead prisoners and their graves.

Part VII. deals with penalties for those who have committed acts in violation of the laws and customs of war and those who were responsible for the massacres in Turkey during the war. The Turkish Government undertakes to surrender such persons to the Allies for trial by a tribunal of the League of Nations, if such tribunal has been created by the League in time.

[Part XIII., containing miscellaneous provisions, is unavoidably held over until next week.]

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The most important provision in the financial clauses of the Turkish Treaty is that which arranges for the establishment of a Financial Commission composed of representatives of France, Great Britain, and Italy, with the addition of a Turkish representative in a consultative capacity, with a view to the introduction of such measures as the Commission may judge most suitable for restoring Turkish finances. Whether this was the best way of meeting what was admittedly a most difficult position, must be a matter of opinion. The functions of the Commission as proposed are very comprehensive, and will include the preliminary examination of Turkish Budgets, which may not be applied without its approval, the supervision of the execution of the budgets and financial laws and regulations of Turkey, and the termination of the measures to be taken with a view to improving the Turkish currency. In addition, it is provided that the Turkish Government may not establish any new form of taxation, modify its customs system, or contract any internal or external loan without the Commission's consent, which will be equally required for the grant of new concessions in Turkey.

***

Apart from the establishment of the Financial Commission, special interest attaches to the economic clauses, and to those dealing with railway questions. As was to be expected, provision is made for enabling the Allies to eliminate German economic penetration in Turkey, and special provisions are included to enable the acquisition of the property of railway companies under German control. As regards railway administration, when a new railway convention has replaced the Berne Convention, it will be binding on Turkey, and in the meantime the latter regulations remain in force. Turkey is to co-operate in the establishment of passenger and luggage services with direct booking between Allied States over her territory under favourable conditions, as well as emigrant train services. Provision is also made for the handing over of the installations of lines in transferred territory, and of an equitable proportion of rolling stock for use on these lines.

***

In the course of a notable speech at the meeting of the Ionian Bank, Sir John Stavridi, the chairman, said that the business of the bank during the past year had reflected the general commercial and financial conditions prevailing in Greece and Egypt. He pointed out that the expansion in the volume of the transactions had continued, but particularly in the case of the bank's operations in Greece this expansion had been accompanied by an element of risk which had been absent from these transactions in the preceding three or four years. It is satisfactory to note his excellent report with regard to the bank's progress in Egypt. Conditions there during the period were somewhat difficult, while the bank had to meet keener competition there than ever before. Despite this, the bank's operations increased in volume, and were uniformly successful; and during the year three new sub-agencies were opened, one of which was subsequently converted into a full agency.

***

The incidence of double income-tax was one of the important questions raised by Sir John Stavridi. The Ionian Bank is a British institution, but it naturally has large numbers of Greek shareholders. In Greece, where the bulk of its business is done, it is treated as a national undertaking by the Government, and is subject to the usual taxes, so that Greek shareholders are in the unfortunate position of having to pay twice on what they receive. This double income-tax is a very old problem here, though Sir John has raised it in a new form. Clearly when anything is done in regard to relieving those on whom this practice presses, this is one of the cases that should receive attention.

***

I am glad to see that special emphasis was laid by Sir John on the great opening for the development of British trade with Greece. It is a point on which too much stress cannot be laid, for British manufacturers are unhappily only too conservative in their outlook, and having left the Near Eastern markets more or less alone before the war it is literally necessary to din into their ears the reasons why it is essential that they should enter them now. As Sir John aptly pointed out, the outstanding success of the Athens Exhibition showed what could be done, and it is now "up to" British traders in general to see that the Greek market is not neglected. Given proper steps to cater for its requirements, it is Sir John's view that most of the trade will fall to this country. Will British manufacturers please note?

***

Among the measures suggested for the promotion of British trade with Greece, Sir John suggests the provision of improved shipping facilities. It would be advisable, he thinks, to establish a line between Greece and England. This should not be a difficult matter to arrange, for whatever may be said of some of our manufacturers our shipping companies have never been lacking in enterprise, and the lines already serving the Near East afford ample proof that it will be no fault of theirs if British traders are not as successful as they might be in that region.

***

Improved results were achieved by the Egyptian Markets, Ltd., during the past year, despite the effect of the disturbances in the spring. There was an increase of £7,823 in the gross receipts from the cattle market, while the gross receipts from the general markets amounted to £24,172, as against £23,188. There was also a slight increase in the net receipts from the slaughter houses, but the net profit from the trading showed a decrease of £4,736, which was largely due to the termination of war contracts for the supply of fodder. The total net revenue amounted to £34,911, an increase of £3,202. From this total £7,621 is deducted to meet payment of the Government share of profits, leaving £27,290, to which has to be added £10,483 brought forward, making the disposable balance £37,774. After deducting the fixed charges for amortisation and the debenture interest, and allocating £1,000 to the reserve, there remains £30,145, which it is proposed to utilise to pay a final dividend of 6 per cent., making 10 per cent. for the year, and to carry forward £10,780.

***

If the efforts now being made to develop agriculture in Egypt are to be successful, it follows that a much greater use will have to be made in the future of chemical manures. Egypt has hitherto been dependent on foreign countries for artificial manures, her imports amounting to something like 70,000 tons a year. Before the war a project was on foot for utilising the water of the Assuan Dam for the production of nitrates. It is understood that this scheme is again receiving attention in view of the increased need for manures in the future, and it is regarded as probable that steps will be taken to carry it out.

***

The development of agriculture in Cyprus has been retarded by the contentment of the rural population with established conditions. From information which reaches me, it would appear that that phase is passing in the Island, and that agriculturists are opening their eyes to the need for improvements in their industry.

COMMENTATOR.

BANK OF ROUMANIA LIMITED

(FOUNDED 1866.)

Head Office: 27, THROGMORTON ST., LONDON, E.C. 2.

THE TURKISH PEACE TERMS.

Financial and Economic Clauses.

According to the official summary, the following are the principal financial and economic provisions of the draft Treaty of Peace handed to the Turkish delegates:—

Financial Clauses.

This part of the Treaty begins by a declaration reproduced from the Treaties already signed by Germany, Austria, and Bulgaria. Turkey thereby recognises that in associating in the war of aggression waged against the Allied Powers she has caused them losses for which she ought to make complete reparation; nevertheless, in view of her loss of territory the Powers will be satisfied with obtaining payment of the claims enumerated later in the chapter. All the resources of Turkey, except revenues ceded or hypothecated to the service of the Ottoman Public Debt, are to be employed as need arises for effecting the following payments set forth in order of priority.

1. Ordinary expenses of the Allied Forces of Occupation after the entry into force of the Treaty.

2. Expenses of the Allied Forces of Occupation since October 30 in the territories remaining Turkish, and expenses of occupation in the territories detached from Turkey to the advantage of a Power other than that which has supported such expenses of occupation.

The expenses covered by the preceding paragraph will be discharged by annuities calculated in a manner to enable Turkey to meet any deficiency that may arise in the sums required to pay that part of the interest on the Ottoman Public Debt for which Turkey remains responsible.

3. Indemnities due on account of claims of the Allied Powers for reparation for damages suffered by their nationals.

The Turkish Government agrees to the financial indemnification of all the losses or damages suffered by the civilian nationals of the Allied Powers during the war and up to the entry into force of the Treaty.

The Powers, in favour of whom territories are detached from Turkey, acquire without payment all properties and possessions situated therein and registered in the name of the Turkish Empire or the Sultan's civil list. The Powers in favour of whom territories are detached from the Turkish Empire shall participate in the annual charge for the service of the Ottoman Public Debt.

The Governments of the States of the Balkan Peninsula and the newly created States in Asia shall give adequate guarantees for the payment of the share which falls to them. The distribution of these annual charges is to be made in proportion to the average revenue of the transferred territory in relation to the total revenues of Turkey during the three years preceding the Balkan war. The same methods are to be applied for the calculation of the charges affected to the service of the Ottoman Public Debt, allotted to the Powers who have acquired Turkish territory as a result of the Balkan wars.

Financial Control.

A Financial Commission composed of a representative of each of the interested Allied Powers, France, Great Britain, and Italy, to whom is added a Turkish representative in a consultative capacity, is created in Turkey with a view to take such measures as the Commission may judge most suitable for restoring Turkish finances Its principal functions are the following:—

Preliminary examination of Turkish budgets, which may not be applied without its approval; supervision over the execution of the budgets and financial laws and regulations of Turkey; the termination of the measures to be taken with a view to improving the Turkish currency.

Further, the Turkish Government may not establish any new form of taxation, modify its customs system, or contract any internal or external loan without the consent of the Financial Commission. The consent of the Commission is equally required for the grant of new concessions in Turkey by the Turkish Government.

A clause provides that ultimately the Financial Commission may be substituted for the Council of the Debt as regards the administration of the conceded revenues. This substitution shall be decided by the Governments of France, Great Britain, and Italy, by a majority and after consulting the bond-holders, and this decision shall be taken at least six months before expiration of the powers of the Council of the Ottoman Public Debt.

In particular, as regards the execution of the present Treaty, it shall be the duty of the Financial Commission to fix the annuities to be paid by the Turkish Government for the reimbursement of the expenses of occupation and the settlement of the claims for reparation due to the nationals of the Allied Powers, to determine the amount of the annuities for the service of the Ottoman Public Debt to be placed to the charge of those Powers in whose favour territories are detached from Turkey, and to arrange for the disposal of the sums in gold transferred by Germany and Austria in execution of Article 259 (1), (2), (4), (7) of the Treaty of Peace with Germany and of Article 210 (1) of the Treaty of Peace with Austria.

Economic Clauses.

Commercial relations between the Allies and Turkey will be regulated, generally speaking, by the Capitulatory Régime, which is re-established in favour of the Allies who enjoyed it before the war and extended to the other Allies. The rate of Customs duty is to be that fixed in 1907, i.e., 11 per cent. ad valorem. Wide powers are, however, given to the Financial Commission set up under the Treaty to authorise modifications of import duties, the imposition of consumption duties, the application to Allied subjects and their property of taxes imposed on Turkish subjects and their property, and the imposition of prohibitions on importation and exportation. Such action can only be taken after six months' notice in each case to all the Allies.

The provisions with regard to the recognition of shipping documents and of the flags of new States, with regard to unfair trade competition, and with regard to pre-war multilateral and bilateral treaties, and with regard to the protection of industrial, literary, and artistic property follow the general lines of the corresponding articles in former Treaties of Peace.

As in the case of previous Treaties of Peace, the Allies reserve the right to liquidate Turkish property in their territories and to hold the proceeds as a pledge for the payment by Turkey of compensation for damage to Allied property in Turkey during the war and the settlement of pre-war private debts. So far as the claims against the Turkish Government are not satisfied from this source they are to be met in accordance with the financial clauses from any surplus available of Turkish revenues from time to time. It should be mentioned that in the case of territory detached from Turkey by the Treaty the right to liquidate is limited to the property of Turkish companies, and does not extend to the property of Turkish individuals.

The Treaty contains provisions for enabling the Allies, if they think fit, to eliminate German, Austrian, Hungarian, or Bulgarian economic penetration in Turkey, by requiring the Turkish Government to liquidate the property of the nationals of those countries in Turkish territory and by themselves liquidating it in territory detached from Turkey. In both cases the general principle is that the proceeds of the liquidation shall be paid to the owners, except where the property was Government property, in which case they will be paid to the Reparation Commissions set up under former Treaties of Peace.

Special provisions are included in order to enable the acquisition of the property of railway companies under German control. In detached territories the disposal of such property will rest with the Government controlling such territories. In Turkey itself the Financial Commission will have the disposal of it, the price being fixed by arbitration. In both cases the proceeds of sale will be distributed by the Financial Commission to such neutrals as are entitled to a share thereof, the share of Germans, Austrians, etc., being paid over to the respective Reparation Commissions.

The complicated provisions of former Treaties for the settlement of pre-war debts through clearing houses have not been repeated, the only provision with regard to the settlement of such debts being one which fixes the pre-war rate of exchange for the purpose of the settlement of all debts between Turkish subjects in Turkey and Allies not resident or carrying on business in Turkey.

As regards pre-war contracts between Allies and Turks the general principle is to maintain or dissolve them and to decide any question relative thereto according to the law of the particular Allied country concerned in each case. The detailed provisions relative to particular descriptions of contracts follow those in the preceding treaties.

Provisions are included in the Treaty for safeguarding the interests in Turkey of Allies who hold pre-war concessions from the Turkish Government. Concessions granted by the Turkish Government during the war need not be recognised by the Allies in detached territories, whilst other provisions enable new States placed under a mandate to put an end to pre-war concessions if thought desirable in the public interest on payment of equitable compensation to be fixed by arbitration. For this purpose, and for the purpose of all other economic clauses, Turkish companies which were actually under Allied control before the war are treated as Allied nationals.

Aerial Navigation.

Turkey agrees to accord the aircraft of the Allied Powers full liberty of passage and landing over and in the territory and territorial waters of Turkey, freedom of transit, the use of all aerodromes in Turkey open to national public traffic, and equal treatment generally in these matters with Turkish aircraft and most favoured nation treatment as regards internal commercial air traffic. Turkey also undertakes to establish aerodromes in localities designated by the Allied Powers, and the Allies reserve the right in certain eventualities to take measures to ensure international aerial navigation over the territory and territorial waters of Turkey.

States who fought on Turkey's side in the late war are debarred from these privileges and from the grant, without Allied consent, of concessions for civil aerial navigation, unless and until they become members of the League of Nations or are permitted to adhere to the Convention of October 13, 1919, regarding aerial navigation. Turkey agrees to enforce the compliance by Turkish aircraft with the rules and regulations resulting from the latter Convention. The obligations imposed by this chapter remain in force until Turkey is admitted to the League of Nations or permitted to adhere to the above-mentioned Convention.

Ports, Waterways, and Railways.

Turkey is required to grant freedom of transit and national treatment to persons, goods, vessels, rolling stock, etc., coming from or going to any Allied State and passing in transit through Turkish territories. Goods in transit are to be free of all Customs or other similar duties. Rates of transport are to be reasonable, and no charges or facilities are to depend directly

Digitized by Google

or indirectly on the ownership or nationality of the vessel or other means of transport. Provision is made against discrimination by control of transmigrant traffic and indirect discrimination of any kind is prohibited.

International transport is to be expedited, particularly for perishable traffic. Discrimination in transport charges or facilities against Allied ports is prohibited. The following Eastern ports are declared to be of international interest, but, subject to any provisions to the contrary, the régime laid down does not prejudice the territorial sovereignty:—Constantinople, from St. Stefano to Dolma Bagtchi, Haida-Pasha, Smyrna, Alexandretta, Haifa, Basreh, Trebizond, and Batum. The nationals, goods, and flags of all States members of the League of Nations are to enjoy complete freedom in the use of these ports, and they are to be accorded absolute equality of treatment, particularly as regards all charges and facilities.

Provision is made for "free" zones in the above-mentioned ports, and adequate facilities are to be provided for trade requirements without distinction of nationality. With the exception of a small statistical duty, no Customs duties or analogous charges are to be levied in the "free" zones.

In order to ensure to Turkey free access to the Mediterranean and Ægean Seas, she is accorded freedom of transit over the territories and in the ports severed from the former Ottoman Empire. Turkey is also granted a lease in perpetuity subject to determination by the League of Nations, of an area in the port of Smyrna, which is to be placed under the general régime of "free" zones.

Free access to the Black Sea by the port of Batum is accorded to Georgia, Azerbaijan, Persia, and Armenia; and Armenia is granted similar facilities in respect of the port of Trebizond, in which port she obtains a lease of an area on similar conditions to those which apply to Turkey in the case of Smyrna.

Railways.

The railway clauses provide that, subject to the rights of concessionaire companies, goods consigned from or to Allied States to or from Turkey, or in transit through Turkey, are entitled generally to the most favourable conditions available. Certain railway tariff questions are dealt with. When a new Railway Convention has replaced the Berne Convention, it will be binding on Turkey; in the meantime, she is to follow the Berne Convention. Turkey is to co-operate in the establishment of passenger and luggage services, with direct booking between Allied States over her territory, under favourable conditions, as well as emigrant train services. Turkey is required to fit her rolling stock with apparatus allowing of its being incorporated in Allied goods trains, and vice versâ, without interfering with the brake system. Provision is made for the handing over of the installations of lines in transferred territory, and of an equitable proportion of rolling stock for use therein. As regards lines, the administration of which will, in virtue of the present Treaty, be divided, allocation of the rolling stock is to be made by agreement between the administrations taking over the several parts thereof. Failing agreement, the points in dispute are to be settled by an arbitrator designated by the League of Nations.

A standing conference of technical representatives nominated by the Governments concerned is to be constituted to agree upon the necessary joint arrangements for through traffic working, wagon exchange, through rates and tariffs, and other similar matters affecting railways situated on territory forming part of the Turkish Empire on August 1, 1914. As a temporary arrangement, Turkey is to execute instructions given in the name of the Allies as to transport of troops, material, munitions, etc., transport for revictualling of certain regions, and re-establishment of normal transport. Turkey is required to subscribe to any General Convention regarding the international régime of transit, waterways, ports, or railways, which may be concluded with the approval of the League of Nations within five years.

Telegraph and Telephone Lines.

Turkey is to grant facilities for the erection and maintenance of trunk telegraph and telephone lines across her territories, and is to accord freedom of transit for telegraphic correspondence and telephonic communications coming from or going to any one of the Allied Powers. This correspondence and these communications are to enjoy national treatment in every respect. Turkey is to transfer the landing rights at Constantinople for the Constantinople-Constanza cable to any administration or company designed by the Allies, and renounces in favour of the Principal Allied Powers all her rights over the Jeddah-Suakin and Cyprus-Latakia cables.

General.

Differences are to be settled by the League of Nations. Certain specified articles—*e.g.*, those providing for equal treatment in matters of transit and transport—are subject to revision by the League of Nations after three years. Failing revision, they will only continue in force in relation to any Allied State which grants reciprocal treatment. It is provided that, unless otherwise expressly laid down in the Treaty, nothing shall prejudice more extensive rights conferred on the nationals of the Allied States by the Capitulations, or by any arrangements which may be substituted therefor.

Egypt's exports for the week ended May 7 included 2,295 bales of cotton, 46,049 ardebs of cotton seed, 47,106 packages of oilcake, 37 bales of wool, 285 bags of gum, and 60,239 bags of onions.

NATIONAL BANK OF TURKEY

(Affiliated to The British Trade Corporation).

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - - £1,000,000 STERLING

BOARD OF DIRECTORS:

CONSTANTINOPLE.

S. de Bilinski, C.B.E. (Chairman).
Sir Adam Block, K.C.M.G.
F. Edwin Whittall.
H.E. Ahmed Djemal Bey.
H.E. Nail Bey.
H.E. Ismail Djenani Bey.

LONDON.

A. G. M. Dickson (Chairman of London Committee)
Hon. Hugo Baring.
Sir Henry Birchenough, K.C.M.G.
C. S. Gulbenkian.
R. H. Macaulay.
E. N. Meyer.

HEAD OFFICE:

CONSTANTINOPLE (Union Han, Galata).

Branches: STAMBOUL (KENADJIAN HAN). SMYRNA.

London Agency: 50, CORNHILL, E.C.

Every description of Banking business undertaken.

Digitized by Google

GENERAL BANK OF GREECE.

Paid-up Capital, Drs. 3,000,000.

Head Office - ATHENS.

BANKING OPERATIONS:
Every description of Banking business transacted.

FINANCIAL OPERATIONS:
Investigations in connection with, and the promotion, organisation and financing of, Limited Joint Stock Companies, with a view to exploiting agricultural, industrial and mineral resources, executing technical works, etc.

COMMERCIAL AND SHIPPING DEPARTMENT:
Purchase and sale of goods on account of clients. Warehousing, Advertising and placing foreign products on the market. Agents for foreign companies and large commercial and industrial firms abroad. General Shipping Agents.

POPULAR BANK OF GREECE.

Head Office, ATHENS. Branch, PIRÆUS.

Correspondents throughout Greece.

Established June, 1905, by the National Bank of Greece and a group of Capitalists.

CAPITAL - Drs. 1,500,000.
RESERVE FUND - Drs. 2,500,000.
Deposits and Credit Accounts, Drs. 100,000,000.

The Bank specialises in the collection of Bills payable in Greece; it accepts goods on consignment, and undertakes their sale, and transacts every kind of Banking business.

General Manager: D. LOVERDO.

TRADE WITH THE NEAR EAST.

The Bank of Athens extends special facilities for business with the Near **East** to manufacturers, exporters and importers.

The Bank has offices in all the principal towns in **Greece,** also in **Egypt,** Cairo and Alexandria, in **Cyprus,** Limassol and Nicosia, in **Constantinople,** and in **Smyrna.**

Inquiries from interested parties are invited.

BANK OF ATHENS.

PAID-UP CAPITAL : £1,920,000. **HEAD OFFICE IN ATHENS.**

London Office: 22, Fenchurch Street, E.C. 3.

COMMERCIAL BANK OF GREECE, LIMITED.

CAPITAL PAID-UP - Drs. 15,000,000.
RESERVE FUNDS Drs. 2,845,010.45.

Head Office: ATHENS.

Branches:—Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia, Larissa.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 296,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

IMPORTS (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

EXPORTS (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

COINAGE.—The unit is the Drachma, equivalent to a Franc (10d.). The current rate of exchange is about 33·85 Drachmæ to £1.

FREIGHT.—From England, 160/- + 10 % primage.

WEIGHTS AND MEASURES.—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·62 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

Branches:

PIRÆUS, SYRA. PATRAS.

Capital Paid Up - Drs. 10,000,000.

Fully represented in all parts of the world for all kinds of commercial, financial, and shipping business.

President. L. EMBIRICOS. *Manager.* D. MIAOULIS.

BANK OF PIRÆUS.

For COMMERCE, INDUSTRY and SHIPPING.

Capital Paid-up - Drs. 5,000,000. Reserve Fund - Drs. 3,095,000.

OFFICES at PIRÆUS and ATHENS.

Every kind of Banking business transacted.
The Bank's connections throughout Greece enable it to offer foreign clients special facilities for the collection of Bills, etc.
Correspondence invited.

BANK OF INDUSTRY OF GREECE.

Head Office: 14, Stadium Street, Athens.

Capital Fully Paid-up - Drs. 15,000,000

The Bank has been established for the encouragement and development of Industry and Commerce, and undertakes every description of banking business.

BANK OF ORIENT.

Capital Paid up - Drs. 25,000,000

Head Office: ATHENS.

Branches: SALONIKA, SMYRNA, ALEXANDRIA, CAIRO, MITYLENE, SERRES, ZAGAZIG, MAGNESIA, PERGAMA, SOMA.

BULGARIA.

SOFIA, April 25.

The Centrale de Devises.

The Cabinet Council has decided that henceforward the Centrale de Devises may only retain one-third of foreign exchange remitted against exports.

All the agencies of the Bulgarian State Agricultural Bank have been raised into branches.

SYRIA.

BEYROUT, April 27.

Development of Tripoli.

Speaking at Tripoli in the course of his recent tour in Lebanon, General Gouraud dealt with the development of the town, and said that foremost among the questions of the day was that of the harbour. He had received protests against the project of a small harbour, on the ground that it would prejudicially affect the prospects of the larger harbour scheme which was hoped for. "I would point out," he added, "that the project of a large harbour, which involves the expenditure of several millions, cannot be considered except in a more or less remote future. On the other hand, the small harbour, which does not preclude the eventual construction of the larger harbour, can be realised immediately, and will serve to shelter the small craft, and to facilitate and expedite loading and discharging operations through the installation of suitable and well-equipped quays. Besides the stimulus which the trade of Tripoli will derive from the small harbour, there is little reason to doubt that it would prove the first step towards the creation at a later date of the larger harbour."

Turning to the question of roads, General Gouraud said:—"You know that we have devoted important sums for the development of the road system in this country. Your town is already linked to Beyrout. It will shortly be connected with Latakia, and later on with Alexandretta. From Tripoli to Homs we have in view not only the carriage road, but also the restoring of the railway, not to speak of the project of a coastal railway between Tripoli and Beyrout.

In conclusion, he referred to the development of the rich plain of Tripoli by means of irrigation works, and said that agricultural machinery of high efficiency, which would contribute so richly to the development of that fertile plain, was already ordered.

CYPRUS.

CYPRUS (undated).

The Mail Service.

The return to a weekly mail service is not yet contemplated. At present it is only thrice monthly, and in winter this is liable to interruption, just as telegraphic communication sometimes is. Tenders are now invited for this tri-monthly service by steamers of not less than 2,000 tons, which will carry 30 first and 20 second-class passengers, the speed not to be less than 12 knots.

Flour Shortage.

The peasantry still suffer considerably from lack of flour. The Government has recently sold to the needy classes at 52s. per sack; but has raised the price to 72s. Merchants sell their diminishing stocks at 75s. and upwards. At Nicosia large numbers of villagers have presented themselves, clamouring for relief. Some hundreds proceeded to Government House, which is situated a short distance from Nicosia, accompanied by the Hon. L. C. Sevéris, M.C.L. In the absence of the Governor, they laid their complaints before the Chief Secretary. Large numbers betook themselves to the office of the Commissioner, who was not in a position to give supplies. Mr. Sevéris, who urged the pressing need of the applicants, succeeded in obtaining for them an issue of 600 sacks. It is hoped that fresh Australian importations may be made by the Government.

Experimental Plantings.

The good to be derived from the development of village gardens is already being recognised. As an example, reference may be made to an open letter addressed to the Director of Agriculture, which is published by the *Phone tes Kypron* ("Voice of Cyprus"). The writer, Mr. Socrates Michailides, who is President of the School Committee of Evrykhou, the western terminus of the Central Railway, states that the director of the Government garden at Morphou has been directed to plant a number of vines, including sultanas, in the Evrykhou school garden. He points out that this locality (and the whole Solea district) has from early times been found a suitable field for cotton growing, and is not suited for vines. The price of cotton, like that of vine products, has—fortunately for the people—risen, and the commodity is more needed. Would it not therefore be better that the vines (some 1,500) referred to should be planted in the higher villages, where the people devote their energies to wine and raisin manufacture, and that experiments in cotton growing should be tried in the region of Solea? This is only one of many indications of the awakening in villages to more intelligent husbandry in Cyprus, and of the immense good that can be done by the Agricultural Department, if properly backed up, in the expansion of the industry in almost all directions. Several other good letters have lately appeared from villagers.

A FRUIT PEST IN GREECE.

During the last few years the Mediterranean fly (Karatitit Capitata) has caused enormous damage to almost all kinds of fruit and vegetables in Greece. Those most affected are oranges, apples, pears, peaches, apricots, plums and tomatoes. In the early autumn the female fly punctures the fruit at the time of its attaining maturity and lays the eggs in the pulp. The eggs develop, causing the fruit to rot and drop. No remedy against this pest has as yet been discovered, states H.M. Consul at Patras. The destruction of the fallen fruit to prevent the spread of the fly, or the more drastic measure of trying to eradicate it by sacrificing one year's yield for the good of coming years, does not appeal to the thrifty class of peasant and land owner.

SWEDISH ORIENT LINE.

Direct regular steamship service with about weekly sailings outwards and homewards between

GOTHENBURG and ALGIERS, PIRÆUS, SMYRNA and SALONICA.
„ „ ALEXANDRIA, JAFFA and BEYROUTH.

ENGINEERING.

The New Steel.

A good deal has appeared in the Press recently in connection with the reported discovery of a new steel which was claimed to be not only highly efficient, but to present a number of advantages over steel of the ordinary kinds. It appears that a business arrangement has now been entered into for the purpose of placing the new product on the market. The steel is of the well-known high-speed type, from which the heavy duty cutting tools used in big lathes, milling machines, shapers, and planers are made, and it is known that molybdenum enters into its composition in place of the more generally used tungsten. It is said that an indirect result of the discovery is that the United States has promptly made an attempt to secure control of the known supplies of molybdenite, the ore from which molybdenum is obtained. This may or may not be the case, but the fact that American steel makers are keenly interested in the new process has been clearly demonstrated. It may be mentioned that there are ample supplies of both molybdenum and vanadium ores in the Empire to render this country entirely independent of American sources, provided they are immediately and efficiently worked.

Aluminium Pistons.

An increasingly large number of engineers are now advocating the use of aluminium for pistons in internal combustion engine construction. Aluminium cylinders, with steel liners, have also been suggested, and, as a matter of fact, both aluminium pistons and aluminium cylinders have been used with a large amount of success. It has been found, however, with the larger sizes of cylinders, that the steel liners used are likely to work loose, owing to the different co-efficients of expansion of the steel and the aluminium. As regards the use of the latter metal for piston work, few objections have been raised, and in answer to a point recently raised I may say that the following has been given me as being an alloy particularly suitable for the manufacture of aluminium pistons: Aluminium, 88.50 per cent.; copper, 11.50 per cent. To produce the alloy a hardening alloy of 50 per cent. copper and 50 per cent. aluminium should be made, after which 22.50 per cent. of this should be melted with 77.50 per cent. of pure ingot aluminium.

Light Castings.

I understand that a Light Castings Sectional Committee has been appointed under the Profiteering Act to ascertain to what extent supplies, prices, and costs of light castings in this country are affected by trade combinations. A further object is to ascertain to what extent any trade combinations which may exist affect the manufacturer of light castings. This is a matter which, having a direct bearing on the export engineering trade, is of considerable importance to the well-being of the country, and should any person or firm be in a position to throw any light on matters which have hitherto been somewhat obscure, I am sure the Sectional Committee will be pleased to hear their evidence. Offers of evidence should be sent to the Secretary of the Committee, at 54, Victoria Street, S.W.1.

Reinforced Concrete Chimneys.

One of the chief points in connection with reinforced concrete chimneys is their inherent strength. They are monolithic in effect, and there are therefore no joints, which are always a source of trouble unless they are made a special case. From an engineering point of view this strength is their chief recommendation; from a commercial standpoint they possess the advantage of economy, as they cost about 25 per cent. less to build. An interesting and informative paper on the subject was recently read by Professor Matthews, in the course of which he outlined modern practice, and stated that the shell of a reinforced concrete chimney is usually made in two or more thicknesses, the maximum being about 12 or 14 and the minimum about 5 ins. in the cross-section of the walls. It is the general custom to make the base square, but some engineers prefer an octagonal base, which is believed to give greater rigidity. A shaft constructed of this material should be protected against the heat and chemical action of the flue gases by being lined for about one-third or more of the height with fire-brick, the thickness of the lining being about 9 ins. A cavity of at least 4 ins. should be left between this lining and the actual stack itself. As the shaft has comparatively little weight, the vertical reinforcing bars should be carried well down through the concrete foundation and be hooked on to horizontal bars at the base. Temperature cracks should be guarded against by adding at least 50 per cent. more reinforcement than is actually required to ensure stability. In the majority of chimneys the temperature at the base does not exceed 1,000 degrees Fahr., falling to below 600 degrees Fahr. at the top. It is interesting to note that exhaustive tests have shown that the higher the percentage of steel used in construction the lower is the unit stress in the steel and the higher that in the concrete, whilst increasing the thickness of the shell decreases to a comparatively small extent—about 10 per cent. or thereabouts—the unit stresses in both the concrete and the steel.

Tar Paving.

The surface in the yards of many engineering concerns could be greatly improved at a low cost by laying down a tar flooring. Sheds and outhouses could also have their floors improved in this way at comparatively little expense, and when the materials necessary are of good quality, are well mixed and well beaten or rolled in place, the flooring will last far longer than ordinary macadam, beaten earth, or even boards. The basic material is stone, broken so that it will pass through a 2-in. mesh. It may be mentioned here that when stone is specified, a material at least as hard and durable as the average stone is meant. Broken earthenware or tiling may be added to the stone; broken slate is also quite good, but it is fatal to success to mix in any material such as ashes, clinker, soft brick or refuse which is soft and likely to crumble. None of the aggregate used should be small enough to pass through a ¾ inch sieve, and in order to ensure that it is thoroughly dry it should be spread out in the sun and turned several times before it is used.

When absolutely dry it should be warmed if possible, although, unless industrial conditions are suitable, as in some places where heat is generated cheaply in large quantities, this can seldom be done. The tar, however, must be boiling, and in order to secure the best results, at least one pound of pitch should be added to each gallon of tar in the boiler. The tar should then be poured in small quantities on to the mass of stone, and the whole well mixed by turning with shovels as in concrete mixing. The tar should be added slowly, and no more should be used than is sufficient to cover each fragment of stone. The flooring should then be laid in a hollow already prepared, or on top of an existing earth floor, to a depth of from six to eight inches, or less if but little wear is likely to occur. It should be spread as evenly as possible, and after being left for a few hours or a day or so, should be rolled or beaten

until it is as compact as possible. Over this a layer of tarred gravel should be spread, the mixture being made in the same manner as the tar macadam, and the whole rolled or beaten down with "dollies" until a hard, smooth surface is obtained.

MISCELLANEOUS TOPICS.

The Reconstruction Committee in its interim report on electric power supply in Great Britain estimated that no fewer than 55,000,000 tons of coal could be saved annually by thorough and extended use of electricity in this country.

The total production of malleable iron in America in 1918 was 1,117,914 tons. By the end of 1919 it had decreased to 1,009,049 tons, and the returns so far published for 1920 show a proportionate decrease. In regard to this, it is worthy of note that in the United States the production of malleable iron has always been closely parallel with the growth or decrease of the total iron output of the country.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 5:—Rain nearly general in Burma and Assam. Local in Bengal, Orissa, Southern India, Bombay Deccan, Central Provinces, Rajputana, and North-West Frontier. All India final (supplementary) estimate sesamum crop, 4,465,000, acres 494,000 tons. (Corresponding supplementary forecast for last year, 3,501,000 acres, 258,000 tons.) General crop conditions good. Bombay cotton market steady. Fully good Broach, May, Rs.463; July-August, Rs.443. Piece-goods market lifeless, with very weak demand. Jute market quiet but steady. Hessians quiet, with prices tending upwards. Heavy goods quiet, with easier rates. No change in Bank rates.

LANCASHIRE COTTON.

Inactivity Continues.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

The market during the past week has not shown increased activity. Many producers have met with a quieter demand than for a very long time back. Numerous buyers have not been prepared to operate on any terms whatever. The feeling is growing that we are about to experience a lower level of values, and in the circumstances orders are being held back. Sentiment with regard to Egyptian cotton has been rather bearish. More telegrams have been received reporting an improved outlook for the crop, and there is a possibility of an increase in the acreage of 10 per cent. Lancashire spinners have again purchased very sparingly. In yarns made from Egyptian cotton the turnover has been poor, and producers are steadily losing ground. Now and again low offers have been taken. In piece goods for Egypt demand remains disappointing, but local merchants have been advised that the position is gradually improving in Cairo. Better reports have also come to hand from Constantinople, and goods which have been held back are now being shipped. In cloth for India the demand has been very disappointing. Comparatively few offers have been received by cable. Buying for China has been almost at a standstill, and, owing to the possibility of contracts being cancelled, makers are very anxious to keep up to time with deliveries. The South American outlets have not given very much support. Cloth prices have tended to weaken. Some Blackburn manufacturers have decided to extend the usual Whitsuntide holidays, as profitable orders cannot be obtained. Fancies have been in fair request for the home trade. American yarns have been dull of sale, and prices have favoured buyers. Very little business has been about in yarns suitable for the Levant.

SHIPPING INTELLIGENCE.

Forthcoming Sailings.

The Cunard Line s.s. Brescia, for Malta, Piræus, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila, will close for cargo at Manchester on May 25 and at Liverpool on June 5.

COMPANY MEETINGS.

IONIAN BANK.

The ordinary general meeting of the Ionian Bank, Limited, was held on May 11 at the offices, Basildon House, Moorgate Street, Sir John Stavridi presiding.

The Acting-Secretary (Mr. Reginald H. Fry) having read the notice convening the meeting and the report of the auditors,

The Chairman said that Mr. Falconer Larkworthy had found it necessary, owing to failing health, to tender his resignation as chairman of the company, and this had been accepted by his colleagues with deep regret. They were, however, glad that Mr. Larkworthy's services were not lost to the bank, as he had accepted the appointment of adviser to the Board. The business of the bank during the past twelve months had been a reflex of the general commercial and financial conditions prevailing in Greece and Egypt. The really important factor for Greek commerce and finance during the past year had been the necessity of restocking and re-victualling the country, and in Greece this operation had resulted in the same disproportionate excess of imports over exports and the same straining of the exchanges which had been witnessed in every belligerent country of Europe. Only, in the case of Greece, as in the case of Great Britain, this result had been accentuated and intensified by the amount of entrepôt trade which had centred in Greece as a distributer for the Balkan States As a result the drachma had had to bear the strain of the depreciation of the Balkan and Turkish currencies and exchanges just as sterling had had to bear the strain of the depreciation of the franc and the lira exchanges.

It spoke volumes for the inherent soundness of the country that, notwithstanding such a crippling necessity, the National Debt of Greece to-day was only double what it was before the war, and, further, that the ordinary revenue was proving elastic and productive beyond all expectation, to such an extent that the Internal Financial Control was this year able to make payment in full of last year's coupons of the old loans. It was, however, not surprising that the drachma had been no more able to bear the strain of such a double set of adverse conditions than sterling had been able to bear the strain of the adverse conditions of British financial and commercial indebtedness to the United States. Indeed, of the two, during the greater part of 1919 the drachma was to all appearances holding out longer and making the better fight. By means of the Exchange Control mechanism the Greek Government strove to restrict the entrepôt trade, and to maintain intact the G.X.M.B. system, and the consequent exchange parity. And on the face of it, for the greater part of the year the Government might claim to have succeeded. But it was only on the face of it. In spite of all the efforts of the Government, there were two bad breaks in the Greek exchange, one in July-August, the other in October-November, and these breaks were largely accountable for the reduction in the bank's profits for the year. Furthermore, these two breaks synchronised with a sharp stringency in the Money Market conditions at Athens, and with a widespread strike movement among the staffs of the various banks throughout Greece, and in its turn this strike movement made it extremely difficult to transfer the bank's surplus funds from the branches to Athens, in order to relieve the stringency there. It was primarily to these two causes that the greatly diminished net profits of the bank were due. Moreover a substantial sum had been applied in writing down all investments of the bank to market values. The other causes which appeared to be in the nature of permanencies, and to which every other institution was liable, were the increases in salaries due to the greatly increased cost of living, and the increase of taxation.

Notwithstanding, however, this conjunction of adverse circumstances, the shareholders were to be congratulated on the expansion of the bank's business throughout the year and on the perfectly sound and healthy condition of the institution at the close of a distinctly trying twelve months.

A question that had much exercised the directors during the past year was that of double taxes. Although by its constitution the bank was a purely British institution, in reality it was an Anglo-Greek bank by the fact that a large portion of the capital was held by Greeks, that they were authorised to carry on business in Greece by various Acts of the Greek Parliament, and that in actual fact the greater part of their business was carried on in Greece. In the eyes of the Greek Government they were considered a national institution, and subjected to all the taxes of the country. They had hoped that in the Budget they would have found some relief for a company such as theirs, whose profits were earned abroad, mainly with foreign money, and which were distributed abroad. Such relief would have helped them to satisfy their Greek shareholders, who, though proud of the British constitution of the bank, considered that every effort should be made to avoid double taxation.

The Chairman went on to deal with the position in Egypt, and said that there had been once more an unprecedentedly prosperous year for the bank. New sub-agencies had been opened during the year at Zagazig, Kafr-el-Zayat, and Kafr-el-Sheikh, all of which had proved successful, especially the first-named, which had now been converted into a full agency. He concluded by moving the adoption of the report, which was seconded by Mr. C. S. S. Guthrie, and was carried unanimously.

Mr. Larkworthy then gave an address on various financial questions affecting the bank.

On the motion of the Chairman, seconded by Lord Ritchie, a vote of thanks was accorded to the advisory committee at Athens, the members of the local board at Corfu, and the staff at home and abroad.

The proceedings terminated with a vote of thanks to the chairman.

EGYPTIAN ENTERPRISE AND DEVELOPMENT.

The following is a translation of the report of the directors submitted to the annual general meeting held in Cairo on March 31 last :—

Gentlemen,—We beg to submit to you the balance-sheet for our fifteenth year ended December 31, 1919.

Agricultural Lands.

This year we have had again several offers to purchase areas of from 10 to 100 feddans, but, as in 1918, we have declined them, preferring not to enter into partial realisations without knowing definitely what is going to happen to that region from the point of view of irrigation. We have reason to believe that the conversion of that part of the Guizeh Basin is only postponed, and that its realisation will not be very long delayed.

Even in their present condition our properties of Bercache and Mansurieh have benefited to an appreciable extent by the general increase in values, resulting to a great extent from the high prices of cotton and other agricultural products, which in 1919 reached levels absolutely unknown hitherto.

Building Lands.

There have been numerous transactions in building lands in 1919, and it may be hoped that the movement will be accentuated as the means of import improve, and as it becomes possible to procure more easily and at less heavy cost the materials for construction which are at present lacking, notably iron and wood.

Business in Syria and Turkey.

We have been able to resume touch with our business in Syria, and our information permits us to base considerable hopes on this part of the company's assets. It is not possible yet to arrange definitely the programme for the future, but it is not to be doubted that the properties that the company possesses in Syria represent a value considerably higher than that at which they appear in the balance-sheet.

We have not yet been able to investigate for ourselves the condition of our lands in Constantinople. We have every reason to believe that those lands will greatly benefit from the prospective change in régime, and we shall appoint one of us, as soon as circumstances permit, to examine on the spot the means of meeting the situation in the best possible way.

Portfolio.

Egyptian shares, and more especially land shares, have been very firm in 1919. The shares of the Gharbieh Land Company have benefited by the notable increase in values, and the actual price of the shares are, in our opinion, well below their real value. The shares of the Société Agricole de Kafr-el-Dawar and the other shares of our Portfolio, have all benefited to a certain extent from the general improvement. But as they are not quoted on the Bourse, and as we do not possess sufficiently precise information to determine their worth, we have maintained them in our books at the same figure as in 1918.

Land Purchased.

This account decreased by £E7,725.513, of which £E760.560 is from the recovery of annuities in arrears.

Various Debtors.

In this account are included rent in arrears, advances to cultivators, interest not collected, and various other debts of which a part is guaranteed by shares.

Gharbieh Land Company.

One can gain some idea of the prosperous state of this company by the importance of the repayments which were made in 1919. Its debt, which at the end of 1913 amounted to £E54,920.993, was no more than £E14.017.271 at December 31 last; it has diminished still more since that date, and it is to be foreseen that it will not reappear in our next balance-sheet.

Bank Credits.

This account, which figured at £E28,078.682 in the 1918 balance-sheet, has totally disappeared from our books. The account "divers creditors" has decreased by £E864.669

Profit and Loss Account.

The net profit of the year amounted to £E30,581.613, of which £E24,964.750 represents the increased value acquired by a portion of the portfolio of the company. After the deduction of these profits, the profit and loss account shows a debit balance of £E89,611.867 to carry forward to the next account. This decrease of the debit balance of the profit and loss account is in itself satisfactory; but an incomplete idea of the improvement in the condition of our company would be obtained if the survey were limited to the above reduction, and some additional observations seem to us necessary.

At the end of the year 1915 the profit and loss account showed a debit balance of £E156.584, arising almost entirely from a depreciation of our portfolio, notably on the Koubbeh Garden shares (about £E91,000), the Gharbieh shares (about £E27,000), and the Kafr-Dawar shares (about £E17,000).

From 1917 the rise which took place in the Gharbieh shares enabled us to mark off on our balance-sheet a notable increase. As we have said above, the other shares in our portfolio not being quoted on the Bourse, we have not been able to do the same in their case, but their real value has not been less markedly increased.

In addition, the greater part of the other items of our assets have actually a real value much above that at which they figure in the balance sheet, and if an official estimate by an expert were made, it would certainly establish that the loss of £E89,611.867, shown in the balance sheet, is not a real loss, and that our capital is intact. We trust that the early realisations will confirm this view. If these realisations are not effected in the near future, it will be necessary to have recourse either to an outside valuation, as above mentioned, or to the step which was mentioned in earlier reports—that is to say, a reduction of our capital.

In reducing the capital to £E320,000, which would establish at £E8 the nominal value of our shares, which have varied on the Bourse latterly, from £E5 to £E7, the debit balance of the profit and loss account would be amortised except for £12,000 already discounted by the increased value of the Gharbieh land shares since December 31, and we should be able to undertake the distribution of profits in proportion to realisations. We shall probably call a meeting in the course of the year to consult you on these matters.

M. Léon Rolin's term of office will expire and he is eligible for re-election in accordance with the terms of the statutes.

Mr. F. H. Russell's term of office as auditor will expire, and he is eligible for re-election under the terms of the statutes.

We propose to re-elect M. Guido Levi as deputy auditor for the year 1920.

Report of the Auditors.

Gentlemen,—We have the honour to inform you that we have compared the balance-sheet with the books and documents, and certify that we have found them in order. We have not yet seen a certificate showing that the properties at Constantinople and Beyrout were free from all charges at the date of the balance-sheet. In the absence of our colleague, M. Jules Rolin, M. Levi, deputy auditor, has taken his place as auditor and signed the present report. With the above reservation, we certify that the balance-sheet is in accordance with the accounts and statutes of the company.

(Signed)
F. H. Russell,
G. Levi.

Resolutions.

The meeting unanimously passed the following resolutions:—1. Approves the balance-sheet and the accounts for the fifteenth year ended December 31, 1919, and gives discharge to the directors.

2. Resolved to carry forward the debit balance of the profit and loss account, £E89,611.867, to the current year's account.

3. Re-elects M. Rolin, director.

4. Re-elects Mr. F. H. Russell as auditor.

5. Re-elects M. Guido Levi as deputy auditor for 1920.

6. Fixed the fees of the auditors at £E175.

THE GHARBIEH LAND COMPANY, CAIRO.

THE ORDINARY GENERAL MEETING of the above Company will be held in CAIRO on the 10th June next. Shareholders wishing to be represented at the meeting should lodge their Share Warrants with the Anglo-Egyptian Bank, Limited, 27, Clements Lane, E.C., not later than the 25th May.

COMPANY NOTES AND REPORTS.

Egyptian Markets.

The report of the Egyptian Markets, Ltd., for the year ended December 31, states that the gross receipts from the cattle markets, exclusive of slaughter houses, show an increase of £7,823 as compared with the year 1918, the total being £38,881 against £31,058. This improvement, it is satisfactory to note, has been made notwithstanding the compulsory closing of markets in consequence of the disturbances above referred to. The gross receipts from the general markets for the year under review were £24,172, as compared with £23,188 for the year 1918, an increase of £984. This is considered satisfactory. The net receipts from the slaughter-houses worked during the year were £1,334 against £1,256 during 1918, an increase of £78. The number of slaughter-houses worked during the year was 45. The expenses in the trading account show an increase of £5,527, which is attributable to increased cost of maintenance and repairs and payment of higher salaries and wages necessitated by a further advance in cost of living in Egypt and of travelling. The net profit derived from this source is £5,861, as compared with £10,597 for the previous year, a decrease of £4,736. This decrease is largely due to the termination of the war contracts with the Egyptian Government for the supply of fodder (Dreiss and Tibbin). The net revenue from all sources for the year 1919 amounted to £34,911 18s. 3d., as compared with £31,709 13s. 6d. during the previous year, an increase of £3,202 4s. 9d. After deduction of the amount of £7,621 10s. 1d., which it is estimated will be required to meet payment of the Government share of profits for 1919, a balance of £27,290 8s. 2d. remains, which, with the amount of £10,483 16s. 9d. brought forward from 1918, makes a total of £37,774 4s. 11d. to be dealt with. After meeting the fixed charges of the annual premia for the amortisation of the share capital and debentures, amounting to £3,789 1s. 6d., debenture interest £2,840, and carrying the sum of £1,000 to reserve, a balance of £30,145 3s. 5d. remains available for distribution. The directors recommend the payment of a final dividend (No. 31) on the ordinary shares for the year ended December 31, 1919, of 6 per cent., making, with the interim dividend of 4 per cent. paid in December, 1919, a total of 10 per cent. for the year, absorbing in all £17,470, and in accordance with the terms of the memorandum of association of the company, and subject to the settlement of the proportion of profits due to the Government and to such excess profits duty, if any, as may be payable, the payment of a dividend (No. 10) on the deferred shares at the rate of £6 6s. 4d. 9/100 per share for the year 1919, which will absorb £1,895 2s. 3d. and leave a balance of £10,780 1s. 2d. to be carried forward, which balance is also subject to the settlement above referred to. In conformity with the company's articles of association, Lt.-Col. A. St. John Cooke, D.S.O., and W. Home, Esq., C.I.E., will retire by rotation, and, being eligible, offer themselves for re-election. To meet the depreciation in currency value occasioned by the war, a resolution will be submitted to the proprietors, at the meeting, to pay the directors' remuneration, free of income tax. The proprietors will be asked to elect auditors for the ensuing year. Messrs. Price, Waterhouse, and Co. offer themselves for re-election. The directors desire to record their appreciation of the valuable services rendered by Mr. C. E. Duffield, the general manager, and by other members of the company's staff in Egypt. Meeting, Winchester House, Old Broad Street, E.C., May 26, 12 noon.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended April 30:—The sales this week on our market amount to 30 cases at piastres 1,150 per oke for extra druggists' manufacturing, piastres 1,250 for selected soft yerli, and from piastres 700 to 1,100 for current talequale qualities; these prices are equivalent to 15s. to 22s. per lb. c.i.f. The exchange to-day is piastres 475 per £ sterling for cheque, and 0.85 dols. for 1 Turkish paper pound. The arrivals are 1,575 cases, against 375 at same date last year.

MACEDONIA'S TOBACCO CROP

The 1919 crop in the Salonika district is estimated at 3,360,000 lb., or 50 per cent. of that of the previous year, while the 1919 crop in Eastern Macedonia, comprising the Kavalla, Serres, and Drama districts, is estimated at approximately 16,800,000 lbs., as compared with 7,000,000 lbs. produced in 1918, says the American Vice-Consul, Mr. N. E. Anderson, in a recent report. The 1919 yield for Macedonia is placed at 20,000,000 lbs., which is about 50 per cent. under normal pre-war years. At the same time, the 1918 crop, it will be remembered, was produced under great difficulties and with a depleted population. Despite the fact, however, that a number of the planters who were interned by the Bulgarians have returned to their farms, there is still a marked shortage of labour and farm animals.

Favourable weather throughout the summer months is responsible for the exceptionally good quality of the 1919 crop, according to prominent buyers for American firms. Heavy spring rains caused a certain amount of destruction to the seedlings, but subsequently favourable growing weather for the plants resulted in a superiority of quality which has made the crop just harvested the best in many years.

The greater part of the 1918 crop has been disposed of by the planters at an average of 10 drachmæ per oke (2.82 lbs.) for the better qualities. So far only 20 per cent. of the 1919 crop has been purchased from the planters at 12 to 13 drachmæ per oke. The best qualities brought 15 drachmæ per oke in the first transactions on the Macedonian market last November, which is about 33⅓ per cent. less than was paid for tobacco of a rather inferior quality in the Salonika district in the last year of the war. This price, however, is from three to four times higher than was paid in the same district for the 1915 crop, which was purchased before the Bulgarian occupation.

Considerable activity has developed in the last month, due in a large measure to increased buying by new tobacco companies, and prices have been quoted as high as 25 drachmæ per oke.

Very little of the best qualities remains in the hands of the planters, but there are probably 2,820,000 lbs. of the Bashibaghli variety still unsold. The general estimate of 16,800,000 lbs. for Eastern Macedonia included approximately 7,000,000 lbs. of this variety of tobacco. It is estimated that perhaps 7,000,000 lbs. of the 1918 crop and previous crops are now in the hands of merchants, although more than 50 per cent. of this old tobacco is of an inferior quality.

The demand for petrol in Egypt is reported to have largely increased owing to the growing popularity of motor-cars.

The receipts of the Egyptian Markets, Ltd., for the week ended May 5, were:—Cattle markets, £829; general markets, £595; total, £1,425; total for year, £35,464. For the corresponding period of 1919 there were no receipts owing to local disturbances.

It is reported that a Czecho-Slovak Chamber of Commerce is to be established shortly in Alexandria and Cairo for the promotion of trade relations between Czecho-Slovakia and Egypt.

Roumania's imports for the first half of 1919 amounted to 231,259 tons of the value of 1,114,549,722 lei, while the exports amounted to 6,756 tons, of the value of 5,983,371 lei.

It is reported that insurgents under Mustapha Kemal have called upon the branches of the Ottoman Bank at Balak-Hissar and Panderma to hand over all the cash in their possession.

According to *L'Economista d'Italia*, it is stated on good authority that deposits of coal have been found in the vicinity of Adis-Abeba.

NEW COMPANIES.

Mid-Eastern Transport.

The British Mid-Eastern Transport Co., Ltd., was registered on May 4 as a private company with a capital of £150,000 in £1 shares. Objects: To carry on business of shipowners, carriers of mails, passengers, goods and cattle, either by its own vessels, railways or conveyances, or otherwise, to construct or acquire railways, tramways, wharves, piers, docks and warehouses, etc. Subscribers (each with one share): B. F. Race, 72, Stratford Road, Thornton Heath, Surrey, law stationer's manager; F. Renton, 6, Great Winchester Street, E.C., law stationer; and five solicitors' clerks. The subscribers are to appoint the first directors.

Egyptian and Eastern Land.

The Egyptian and Eastern Land Co., Ltd., has been registered as a private company with a capital of £30,000 in 116,000 5s. preferred ordinary and 20,000 1s. deferred ordinary shares. Objects: To take over estates in Egypt, the Sudan and other parts of Africa, the Middle East, and elsewhere on which wheat and other cereals, cotton, tobacco, maize, coffee, sugar, dates, oranges, and other fruits and products are grown. Agreement between R. E. W. Conant, of the one part, and R. R. Hornby, C. H. Potter and A. F. Howe, general partners in Hornby, Potter, Mills and Co., of the other part.

Inter-European Trading.

The Inter-European Trading Co., Ltd., has been registered as a private company with a capital of £5,000 in £1 shares. Objects: To carry on the business of purchasers, importers, and sellers of machinery, tools, goods, particularly those obtainable in the various European countries, exporters of British and other goods to such countries and elsewhere, etc. First directors: W. B. H. Corser, Mill Meads, Horsham (director Ryner Wilson, Ltd.); J. F. Fielding, Chylton House, Langley Road, Surbiton (director of said company and F. J. Allen and Co., Ltd.). Registered office: Parliament Mansions, Victoria Street, S.W.

Anglo-Egyptian Breweries.

The Anglo-Egyptian Breweries, Ltd., was registered on May 8 as a private company with a capital of £120,000, in £1 shares (119,000 preferred and 1,000 deferred). Objects: To carry on the business of brewers, maltsters, hop merchants, and growers, malt factors, wine and spirit merchants, importers, and distillers, etc., and to adopt an agreement with the Vlei Syndicate, Ltd. The first directors are:—H. E. M. Bourke, Feltimores, Harlow, Essex; G. R. Blake, North Lea, Shaw, Melksham, Wilts; Rene de la Porte, 28, Conduit Street, W.; and G. C. Dudgeon, 1, Zetland House, Cheniston Gardens, W.8. Registered office: 21, Great Winchester Street, E.C.

North Persian Oils.

The North Persian Oils, Ltd., was registered on May 8, with a capital of £3,000,000, in £1 shares. Objects: To enter into an agreement with the Anglo-Persian Oil Company, to acquire and work any oil shale, natural gas, petroleum, bitumen, naphtha, asphalte, ozokerite, or other properties, to import, export, distil, refine and distribute the products thereof, to own ships, wharves, and barges, etc.

The subscribers (each with one share) are: R. V. Grimaldi, 61, Fairbridge Road, N.19; J. A. Fuller, 65, Hewitt Avenue, N.22; and five other clerks. Minimum cash subscription, seven shares. The Treasury may have two representatives on the board, and the Anglo-Persian Oil Company may be represented on the board by directors, not being less than two nor more than one-fourth of the number of directors for the time being. The ordinary directors are to be appointed by the subscribers. The number of directors is not to be less than eight nor more than twelve. Qualification (except Treasury directors), £1,000. Remuneration of chairman as fixed by the board; of other directors as fixed by the company.

If the company shall, pursuant to the agreement with the Anglo-Persian Oil Company, decide not to continue exploration or development work on the concessions therein mentioned, and in consequence thereof shall re-transfer the said concessions in accordance with such agreement, and resolve to go into liquidation, the shares numbered 1,500,001 to 3,000,000, inclusive, to be issued by the company credited as fully paid, pursuant to the said agreement, shall not in such liquidation confer on the holders thereof the right to participate in any distribution of surplus assets. The liquidator (on any liquidation, whether voluntary, compulsory, or under supervision) may, with the authority of a special resolution, divide among the contributories in kind the whole or any part of the company's assets (whether or not the assets shall consist of property of one kind or different kinds), and for such purpose may set such value as he deems fair upon any class or classes of property and may determine how such division shall be carried out as between members or classes of members. The power of the liquidator shall include a power to sell, wholly or partly, for the debentures, debenture stock or other obligations of another company, either then existing or about to be formed for the purpose of carrying out the sale. Solicitors: Ashurst, Morris, Crisp and Co., 17, Throgmorton Avenue, E.C.

ON CHANGE.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

A very fair amount of business has again been done this week, but the tendency of prices continues downwards.

In Government stocks, Egyptian Unified close about 4 points down at 66¼, and the 3½ per cent. pref. have lost 2¼ points at 55¼. City of Alexandria are a further half a point down at 64. Turkish Four per Cents of 1891 have dropped a point to 60½, but the Three and a-half per Cents of 1894 have been an exceptionally firm spot, and are closing a point up at 53½. Turkish Unified are also wanted, closing 1 point higher at 35, with sellers very scarce.

In bank shares National of Egypt at one time dropped nearly £1 to 19¼, but had a sharp recovery late to-night, closing only half a point down at 19 11-16. Agriculturals have been down to 4 9-16, and finish ⅛ lower at 4⅜. Anglo-Egyptian Banks are no longer quoted, having been absorbed by Barclay's. Land Bank of Egypt are ¼ easier at 5½.

In Land shares, Aboukir are slightly easier at 36s., Anglo-Belgians have dropped about 4s. to 12s. 6d., and Béhéras are 1½ down at 17. Consolidated Lands are about 3d. lower at 3s. 1½d., and Delta Lands have dropped about 9d. to 13s. 9d. x.d. Foreign Trusts have shared in the general weakness, and are quoted 6d. lower at 14s. 9d. There has been a decline of ¼ in Gharbieh Land to 3⅜; a similar fraction has been lost by Sidi Salem at 2¼, and Union Foncière at 5⅛. Sudan Plantations are only 1-16th down at 4 7-16, whilst New Egyptians, which have been very firm recently, have receded 1s. to 37s. The annual report of the latter company is expected shortly, and is likely to prove a very satisfactory document.

Amongst Miscellaneous descriptions, Salt and Sodas have dropped 3s. 9d. to 52s. 6d.

In Oil shares, Anglo-Egyptian B are 10s. down at 3½, Roumanians have dropped 3s. 3d. to 16s. 6d., and Traians are fractionally lower at 8s.

In Greek securities the 1881 and 1884 loans are 1 point down at 54, the 1889 and Funding Loans are 2 points lower at 39 and 51 respectively, the 1902 Loan has dropped 1½ points to 42, and the 1910 Loan is 1 point down at 38. The 1914 Loan has been a firm spot all the week at 50, at which price there are unsatisfied buyers. Bank of Athens shares are ⅛ lower at 3¼.

The South Indian Railway Co., Limited, have removed to 91, York Street, Westminster, S.W.1.

South Indian Railway.—With the desire to distribute the dividends more evenly between the two half-years, the directors have decided to pay on July 1 an interim dividend from surplus profits of 2 per cent., less income-tax (compared with 1¼ per cent. paid on July 1, 1919), making with the interest guaranteed for the half-year ending June 30—namely, 1¾ per cent., less income-tax—a total distribution for the half-year of 3¾ per cent., or at the rate of 7½ per cent. per annum, as against 7¾ per cent. paid for 1919.

NOTES OF THE WEEK.

The Turks find the Peace Terms no more acceptable now than they were a week ago. The Nationalists are obtaining many more recruits, and opinion in Constantinople is distinctly less favourable towards signing. The two great stumbling blocks remain, as they were, Smyrna and Thrace, and the Government is reported to have allowed it to become known that it will not consent to sign them away. When the full terms are received, a Crown Council is to be summoned to discuss them; but with feeling throughout the country what it is, it looks as if there can be only one end to such a discussion. It is unfortunate that time is so strongly on the side of the opposition; but clearly Turkey must have a period allowed her to weigh the terms carefully, and equally clearly it would be expecting too much of her to ask her to take any very active steps against the Nationalists in that period.

The announcement regarding the handing over by Italy to Greece of the islands of the Dodacanese has created a good impression on all sides, but the exclusion of Rhodes from the operation is much regretted. Maintaining, as we always have done, that the Italian occupation of Rhodes and our own occupation of Cyprus are very far from being on the same footing, we find it difficult to understand why the question of the latter island's future should be introduced into the matter at all; and it would be interesting to have the true inwardness of this singular provision made clear. But whatever the explanation may be, Italy's retention of the island is quite obviously likely to give rise to serious trouble in the long run, and it is a great pity that, having brought herself—or allowed herself to be brought—to give up the eleven islands, she could not be induced to give up the twelfth also, and at the same time. In any case, it is to be hoped that neither her refusal to do so nor her pretext for that refusal will be allowed to influence Great Britain's final decision regarding Cyprus. The latest pronouncement on the subject was by Mr. Bonar Law in the House of Commons on May 20, when, in answer to a question by Mr. Ormsby-Gore, he stated that nothing whatever had been done in this matter by the British Government.

Rumours that had been current in Cairo for a few days proved to be at least founded on fact when Wahba Pasha, who had been Prime Minister of Egypt since last November, resigned on May 19. His resignation has been received with real regret in official circles; and his courage in taking office at a time of great difficulty, when there was certainly no competition for the post, and in holding it in face of much violent opposition, and in spite of an attempt upon his life, is very widely recognized. Unfortunately, the actual resignation is reported to have been brought about by a breakdown in health. His successor is Tewfik Nessim Pasha, who has formed a Cabinet consisting mostly of members who served in the outgoing Cabinet. There are, however, three new members: Mahmoud Fakhri Pasha, Minister of Finance; Tewfik Rifaat Pasha, Education; and Yussuf Suleiman Bey, Agriculture. The new Prime Minister is a young man, and in that respect better suited to stand the strain that the holder of office in Egypt must inevitably experience under present conditions; he is a lawyer, with a brilliant record, and his service as Cabinet Minister, though short, has been very successful; and, finally, he is described as *persona grata* with the Sultan, who seems likely to play a rather more active part in the future than he has in the past.

Apart from the change of Cabinet, the most important thing that has happened in Egypt during the past week is the trial of the two men accused of attempting to assassinate Mohammed Shafik Pasha in February. They were both found guilty of throwing a bomb or bombs at the Minister, but sentence was deferred. It is to be hoped that there will be no erring on the side of leniency in this instance. The story of the cowardly attempt, as told at the time by our Cairo Correspondent, showed what contemptible stuff the would-be assassins were made of; and it seems to be clear that the only way to put an end to these frequent attempts on the lives of Egyptian Ministers by their own countrymen—usually "students," be it noted—is to mete out condign punishment to the offenders in every case in which it is possible to trace the crime home.

Sir Lee Stack, Governor-General of the Sudan, has been able to report to Lord Allenby the successful termination of punitive operations against the tribes responsible for the deaths, last December, of Major Stigand, Governor of Mongalla Province, and Major White. Those two officers, it may be recalled, were killed in the course of a reconnaissance in Dinka territory, undertaken in consequence of an attack by the Dinkas on an outlying police post. It was not practicable to take the necessary steps to avenge them at once, owing to the denseness of the jungle and the quantity of water in the wadis; but about two months ago a punitive force—led, it is interesting to note, by an officer of the ubiquitous Royal Marines, Colonel Darwell—took the field, and on May 4 it completely surprised the main body of the enemy. The latter offered no resistance, and the chief offender surrendered unconditionally two days later. The country is said to have

Digitized by Google

been thoroughly patrolled, and large captures were made; while, save for a night attack and a few skirmishes, there was no serious opposition. The early reverse, which, as we observed at the time, was practically unavoidable, has thus been wiped out; and the Sudan Government and those to whom it entrusted the operations have well upheld British prestige.

A semi-official statement issued last Friday announces that arrangements for a provisional boundary between the British and Arab areas of jurisdiction on the Euphrates were completed on May 5. These arrangements resulted from a meeting of British representatives and an emissary from the Arab Governor of Deir ez-Zor, and in accordance with them Salahiyah and Abu Kemal were handed over to the Arabs, and our troops retired to Anah, leaving a rearguard at El Kaim (or El Ghayyim). In view of the scantiness of the information that is given to the world regarding the situation in this region of the Euphrates, it is impossible to decide whether the announcement made should be regarded as satisfactory or the reverse. We might hope that the provisional arrangement would save further bloodshed; but from the same source come reports of fighting with Arab raiding parties—presumably in the neighbourhood referred to—and British casualties to the number of 47. Whether this fighting took place before or after the arrangement of the boundary, and where, is not stated.

Public interest in this country has been turned anew to Mesopotamia and Persia in connection with what look uncommonly like very determined attempts by two great foreign oil "combines" to obtain virtual control of the Mesopotamian and Persian oilfields. The subject is too intricate to go into in any detail, and as far as the various financial interests are concerned they are probably able to look after themselves. We believe, however, that the British Government will do well in this matter to put the interests of the British Empire before all others, and to see to it that the heavy loss of British lives in Mesopotamia was not incurred for the benefit either of an Ally who took no part in those operations or of a neutral nation that stood discreetly aside throughout the war. If they fail to do that, the public is likely to insist upon an explanation. A very active propaganda has been carried on on behalf of foreign interests, and a persistent attempt is being made to represent that Great Britain has gone to Mesopotamia on behalf of a British company. That is, of course, an utterly false view; but even if it were correct, it would surely be natural that Britons should prefer to support a British company rather than a foreign one.

A situation full of unpleasant possibilities has been created in Persia by the seizure of Enzeli, the most important port on the Caspian Sea, by Bolshevists. On May 18 a Bolshevist fleet of thirteen warships appeared off the town, and presently bombarded it; while simultaneously forces advanced from Astara on Enzeli and Ardebil. When communications were opened up with the shore the Bolshevist Admiral announced that his object was to secure the vessels of General Denikin's force, interned at Enzeli, and that he intended temporarily to occupy the town. The British troops on the spot being utterly inadequate to prevent the carrying out of this programme, and no other force being for the purpose, the occupation took place. The British evacuated the town that night, and have apparently withdrawn safely to Resht. The Russian commander is reported to have guaranteed the safety of British troops and civilians, and to have declared that he had "at present" no designs against either Persia or the British in Persia. The value of his assurances can hardly be known just yet.

It would be idle to pretend that the effect of these events upon British prestige in Persia, and indeed throughout the East, can be otherwise than disastrous; but it is hard to see what action can be taken immediately to counter the effect. Our garrison in Mesopotamia is understood to be too small to allow of the detachment of any considerable force for service across the border; and it is not yet entirely certain that it would be wise to send such a force even if it were available. That we are not at present under any obligation to protect Persia is quite sure: Mr. Bonar Law said so in the House of Commons a few days ago; and though the Persian Foreign Minister is understood to have asked Great Britain for support, he bases his request on the ground that such support should be given in our own interests. Nevertheless, in view of our friendly and extraordinary relations with Persia, we cannot sit idly by and watch her becoming a prey to the Bolshevists, as she would almost certainly do if she were left without help, in the not unlikely event of the Bolshevists breaking their word once more.

In his interesting lecture on roads and motor transport in India, Lord Montagu of Beaulieu had little difficulty in showing that, judged by western standards, India is lamentably short of metalled roads, but the mischief of it is that roads are not the only defect in the equipment of the country. More railways are also wanted, and more sea ports; more irrigation canals; more universities and technical schools; more hospitals and institutes of medical research; more centres for the study of animal and vegetable pathology; in a word, more of everything, except, perhaps, law courts, with which Western progress has endowed the East. It is all to the good that every expert should voice the claims with which he is specially concerned, but it will be well for the public to remember that a larger question than the efficiency of a particular department is involved. India is getting richer, but she is still poor; the national credit is rising, but it is still relatively low; no set of experts could be satisfied all at once without incurring the risk of bankruptcy; and the allocation of limited funds between competing claims must be the business of the Government as a whole.

Lord Montagu is a statesman, and we gather that he recognises the financial difficulties much better than experts in some other departments are wont to do, but it is, perhaps, worth while to point out that the cumulative effect of expert clamour may be to produce an entirely false impression of the value of the British administration. British India did not start on the level of the West, and the true test of the administration is a comparison with countries like Persia or Arabia, which 200 years ago were as well, or as badly, equipped with the material needs of civilisation. In the interval India has gone so far ahead that the comparison has become ludicrous; she has not yet caught up the West, and there should be no relaxation of effort until that goal is reached, but at the same time it is only fair to bear in mind that the very existence of these unsatisfied demands is the measure of British achievement, as well as one more testimony to the incurable idealism of our race.

If we have said nothing recently in these columns on the burning question of homeward passages, our silence has not been due to any want of sympathy with the difficulties experienced by the English community in India, but rather to the impossibility of obtaining authoritative information regarding the position on this side. The facts which Colonel Yate has now succeeded in extracting from the Secretary of State show that the clamour in India has, on the whole, been justified. The Ministry of Shipping did much, but it did not do enough, and, when the season of pressure came, it was found that the supply of passages was short by roughly two large ships, which Whitehall asked for, but the late dweller of St James's Park refused. Lord Inchcape is indeed coming to the rescue with an extra liner, but berths at the end of July are a poor consolation for invalids ordered home in April, and the view taken by Anglo-Indian circles in this country is probably represented with substantial accuracy by the remark we heard last week, that if autocracy is inevitable, the autocracy of the P. and O. would be a less grievous yoke than that under which Anglo-India now groans.

Digitized by Google

At the same time there is a certain amount of force in the demand for fuller information regarding the principles on which passages have been allotted during the present season. Last year there was State control, and consequently an attempt, even though it may not have been entirely successful, to take needs into consideration. This year, if we may believe indignant correspondents in India, premiums have been widely offered, "stags" have been making money, and titled globe-trotters have got home at short notice, while invalid officers have been left behind. We have searched the columns of our Indian contemporaries for any definite contradiction of the more specific charges, but apparently the shipping agencies are willing that judgment should go against them by default, for we have found nothing in the way of a reply beyond attempts to blame the Ministry of Shipping, which has nothing to do with the allocation of passages to individuals, though it is doubtless responsible for the shortage in the aggregate. However that may be, there are obviously much heartburning and suspicion abroad in India, the only cure for which is a liberal antiseptic dressing of publicity.

THE WEEK AT HOME.

Poland and Parliament.

The House of Commons is only indulging in a short Whitsun recess, the Government still hoping to avoid an autumn session by crowding the legislative work through between June and August. Already, in fact, the first hint of the inevitable "massacre of the innocents" has been given, Mr. Bonar Law having regretted that he could not give facilities for the Plumage Bill, an admirable measure designed to protect rare birds, which are rapidly being exterminated by the drapery trade. Unfortunately birds have no votes and drapers have, with the result that the Bill is introduced session after session, blocked, and finally murdered.

The Home Rule debates of the week have been of academic interest and no more, in the absence of real opposition and effective criticism. The only discussion which possessed actuality was that on the Polish situation, raised by the Independent Liberals on the motion for the adjournment. Their criticism was not particularly effective, but Mr. Bonar Law's answer, though incomplete, added a good deal to the rather scanty information hitherto available.

It is very curious that the Liberals, who used to lament the lost nationality of Poland, do nothing but criticise Poland now that she is restored to her old independence; indeed, in some recent speeches Mr. Asquith has almost suggested a feeling of personal regret at the passing of that hoary imposture, the Austro-Hungarian Empire. The Poles are putting up a gallant fight against the Bolshevists, much to the distress of the noisy sympathisers with the Soviet Republic in this country, who wish the League of Nations to intervene. But intervention would be useless unless it were effectual, and as the League has no force available the idea is absurd. It is very doubtful whether Poland would recognise its moral authority, even when enforced by the menaces of Lord Robert Cecil; Soviet Russia has openly refused to have anything to do with the League.

There seems, however, to be justice in the complaint that the British Government's policy in the Baltic and in this matter of Poland and Russia has been unduly secretive. The cynical suggest that it is merely a consequence of the Government not having a policy at all, but that is not true. The real explanation is the lamentable weakness of criticism of foreign affairs in the House of Commons. Mr. Bonar Law had really very little to answer after his opponents had stated their case; and since Governments, like everything else in this world, work on the lines of least resistance, it is not likely that the Foreign Office will divulge more than it is compelled to.

The New Speaker.

It is understood that Mr. Speaker Lowther will retire from the Chair at the end of this session. He has for some time been anxious to do so, but first the war and then the necessity of setting a House mainly composed of new members firmly on its feet, persuaded him to stay on. The time has now come when he will no longer delay his well-earned rest. Mr. Lowther has well maintained the traditions of dignity and courtesy of the Chair; he has ruled by persuasion rather than force, and has preferred to dissolve anger by a jest—he has a happy vein of humour—rather than by a rebuke. He could be stern when occasion demanded, but it must be confessed that he has seldom been faced with the stormy scenes of the eighties, when Irish obstruction was at its height.

The question of his successor is an open one. Sir A. Pollock, one of the legal officers of the Government, has his supporters among the Unionists; Mr. Whitley, who has long been Chairman of Committee, is rather preferred by the Liberals—his merits are the only matter on which Coalition and Independent Liberals are understood to agree; and it is suggested that a third claimant may be found in Sir Robert Horne.

This gentleman's career is one of the most astounding things in modern politics. Nobody had ever heard of him—at least, at Westminster, where nobody has ever heard of anybody except politicians—two years ago; but he has a way with him which has quite captured the House. His speeches are lucidity itself; he is both frank and tactful, and one feels when listening to him that he is the very embodiment of "the whole truth and nothing but the truth"—an emotion which does not always overcome one when the Front Benches are talking. No doubt he would make an admirable Speaker, or Archbishop of Canterbury, or even Astronomer-Royal, if he wanted to; but a man who has attained high Cabinet rank in two years, and has the prospect of rising still higher in the Government is hardly the tppe that one looks upon as a Speaker *in posse*.

On the whole, Mr Whitley would probably be the best choice. He is generally respected, studiously fair, and he has trained for the part by officiating as Deputy-Speaker. Mr. Pollock's merits and abilities are undoubtedly great, but they jump less readily to the eye, and he has had no previous experience of the part like Mr. Whitley—not that that is necessarily a disqualification, for excellent Speakers have jumped straight from the obscurity of the back-benchers into the authority of the Chair.

Devonshire House.

Sic transit gloria mundi! Devonshire House is sold, and the mansion which has entertained Kings and Emperors may be turned into a cinema, according to an announcement in the newspapers this week. One may still hope a better fate for one of the finest sites in London. A club, or an hotel, or even a block of flats

would be in keeping with the frontage to Piccadilly and the immediate neighbour of Devonshire House, Lord Lansdowne's great establishment; but a cinema!

The day of the great London houses seems over. The future historian will perhaps date the fall of the great town house from the demolition, forty years ago, of Northumberland House to make way for the Constitutional Club and the caravanserai of Northumberland Avenue, but the remainder of the great ducal houses seemed likely to survive. But there have been hints that more than one peer is thinking of giving up his town mansion now that the Duke of Devonshire has set the fashion, and the closing of Devonshire House will certainly make a difference to the Berkeley Square district. It may be that the nobility will follow the Bishops, who have long given up the custom, which flourished in the eighteenth century, of residing mainly in London and putting in only an occasional appearance in their dioceses; the Bishops are now rather inclined to grumble at the necessity of putting in an occasional appearance at the House of Lords, and hardly any of them keep up a town house. The Bishop of London has even suggested that the day will come when Fulham Palace may have to be closed.

The Birth-Rate.

The report, with documents and appendices, of the National Birth Rate Commission is a bulky tome which it is quite impossible to summarise, and which, frankly, seems no longer necessary. The population is increasing at a prodigious rate, and if anybody still talks about national suicide, I can only advise him to motor through the suburbs and villages of England in holiday time, as I did not long ago, and he will be astounded at the number of children and their evident lustiness and vigour. Mr. Harold Cox, who gave evidence before the Commission, thinks that England is already over-populated, and although I disagree with him, I am bound to say that whenever I go into one of the London Tubes I am inclined to think he is right. Although congestion is not so bad as it was, it is still impossible to travel in comfort at any of the rush hours.

There is no really conclusive evidence of degeneration of physique. Some very interesting tables are given, but the fact is that in some places the population is less healthy owing to occupation than it was, and in other places it is more healthy. On the other hand, the evidence that the race is getting taller is conclusive, and there is some indication that it is getting lighter in pounds avoirdupois. A doctor tells me that the average English baby is a good inch longer at birth than it was fifty or a hundred years ago, and that the increased height is generally maintained through life. It is due, in his opinion, to the more active habits and sports of women increasing the size and height of the female sex; my own suggestion that it came partly from strap-hanging becoming a permanent biological trait he rejected with contumely.

Welwyn Garden City.

The plans for a considerable garden city have now been formed, and the prospectus is before the public. It is to be at Welwyn, a pretty spot on the Great Northern line between Hatfield and Hitchin, not a vast way from the original garden city at Letchworth, a mile or so the Cambridge side of Hitchin. It used to be said that none but cranks and faddists lived at Letchworth, and much the same slander was floated about Golder's Green; but when I went to that delectable suburb the only extraordinary thing I saw was the quantity of perambulators, which said much for the energy and faith of the inhabitants.

Welwyn is to be developed into a town of the size of Bedford, and to have its own local industries, so that it will not add another to the long list of "dormitory" suburbs, most of which are losing whatever distinction of identity they ever had under the new post office scheme of numbering. Even Wimbledon, which used to think itself distinctly better than its neighbour Wandsworth, now hides its diminished head under "S.W.19." It is rumoured that bureaucratic sticklers for uniformity would like the system extended to the whole country—so that Southend-on-Sea, for instance, would be S.X.25, and so on—but such a scheme would materially increase the population of the asylums.

Another New Suburb.

The London County Council have published details of another new housing scheme which is to be put in hand immediately. At Dagenham, in Essex, accommodation is to be provided for 120,000 people, with fire stations, free libraries, schools, cinemas; the cost is estimated at thirty millions sterling. Dagenham at present is a small place in the unattractive South Essex flats, but it will soon be a suburban extension of the East End, like Ilford. Other schemes for garden cities or less pretentious suburbs are pending along what used to be known as the Tilbury line, but is now part of the Midland system; within another decade there will probably be a continuous line of houses practically all the way from London to Southend.

The Week's Books.

"Bygone Beliefs" (Rider), by Mr. H. Stanley Redgrove, discusses many quaint old superstitions and by-ways of thought, the faith in magic and talismans and the old cabalistic medicine. It leaves one with a curious sense of the follies of the wise, for those who originated these blunders were in many ways the leaders of their time.

I opened "A Lord Mayor's Diary" (Murray), by Sir William Treloar, with the feeling that the mysterious civic secrets of the Mansion House were at last to be disclosed; I closed it with a feeling of profound thankfulness that no possible combination of circumstances could ever make me Lord Mayor. The chief magistrate of the City of London has to lunch or dine, or be lunched or dined (by a Worshipful Company or a Potentate or an August Personage) every day of his official life; probably the reason that the tenure of office is limited to a year is that no human being could survive the gastronomic ordeal longer. Sir William confesses that he only got through by always refusing meat and confining himself to one kind of wine; but even with that austere temperance, there is a tell-tale entry in his diary that he was "not well" after about six months in office, and soon afterwards he went to Harrogate, where the doctors prescribed massage of the stomach. After these and other details, only the heroic can aspire to the Mansion House, and it is with a sense of shock that I discover that only about two Lord Mayors have died in office; perhaps only the physically robust proffer themselves for election. Incidentally, among these records of pomp and circumstance, Sir William tells the story of his cripples' fund, a work which will recall his name to thousands when the details of his mayoralty are forgotten.

A very interesting biography is that of Mr. Jesse Collings, whose "Life" (Longmans) was begun by himself and completed by Sir John Green, of the Rural League. Mr. Collings, who is happily still with us, will always live in political history as the father of "three acres and a cow"; he is a self-made man, who rose from service in an ironmonger's shop to be Mayor of Birmingham, and eventually one of Mr. Chamberlain's most trusted lieutenants.

The week's novels include new books by Lucas Malet and Compton Mackenzie, representatives of the old and new school of English fiction. The critics have fallen foul of both with extraordinary unanimity. As I have not yet found time to read either of them, I cannot judge how far the reviewers are justified; but I mention this as an apparent indication of a more drastic method of criticism. A hundred, or even fifty, years ago, the mental standpoint of the reviewer was that an author was an exceptionally foolish person, who practically asked to be sacrificed; then the fashion went to the other extreme, and immediately before the war every new book was automatically proclaimed a masterpiece. How strange it is now to look over the critical reviews of ten years back, and to see the number of immortal authors whom the world has contentedly forgotten. Perhaps the war made us all more brutal in our judgments; anyway, I notice that the critics now often condemn a book as utterly trivial or meaningless which, to my untutored judgment, seems powerful and well-written.

THE NEAR AND MIDDLE EAST.

(From Our Own Correspondents.)

EGYPT.

CAIRO, May 10.

Another Attempt on a Minister

On Saturday last an attempt was made on the life of his Excellency Hussein Darwish Pasha, Minister of Wakfs. As the Minister was returning from the funeral of one of the native Court counsellers a bomb was thrown at his car, slightly wounding the chauffeur and damaging the carriage, but without doing any injury to the intended victim. A little boy and a carpenter who were standing on the opposite side of the road were, however, hit, the former somewhat badly. No one suspicious was found on the spot, but later in the evening the police received a report that a young student was lying injured at his house. They immediately went there, and found that he was suffering from wounds at the back of his head, down the right side of his face, and on his right forearm. His explanation was that he had happened to be passing when the bomb was thrown. Unfortunately, before any further information could be obtained from him, he died.

An inquiry was at once opened, and the evidence so far available seems clearly to indicate that the dead student actually threw the bomb. The latter is practically identical with those used in the previous attempts on Ministers, and is slightly larger than that thrown at Mohammed Shafik Pasha. There seems little doubt that those implicated in this outrage belonged to the same organisation as that responsible for the four attempts which have been made on the lives of Ministers, starting with the bomb thrown at the car of Mohammed Said Pasha on September 2 last year.

The more instructed Egyptians are exceedingly perturbed at this outrage. Leaving aside the question whether acts of violence really advance the national cause, they realise that any attempt to put Ministers out of the way and intimidate others from succeeding them cannot in the circumstances serve any useful purpose, since the government of the country would be carried on just the same. Moreover, during the past week there have been attempts on the lives of members of the British Army, and one officer has died as the result of wounds inflicted on him whilst walking through the Bulaq district after dusk; and instructed Egyptians recognise that these cowardly attacks followed by another attempt on the life of a Minister cannot commend the Egyptian cause to the British public, especially at the present juncture, when they hope that their leaders will be able to find an opening for discussing with the British Government the future of Egypt and coming to some arrangement satisfactory to both parties before the Milner Mission delivers its report. Indeed, as they admit, no more inopportune moment than the present could have been chosen for a resumption of the series of acts of violence that have unfortunately marked the past year.

The Shah of Persia.

The Shah passed through Port Said on Thursday last on his way back to Persia. The High Commissioner, accompanied by Mr. Scott, Councillor to the Residency, and other members of his staff, went down to Port Said by special train to greet his Majesty, who was also welcomed there by his Excellency Said Zulfikar Pasha, representing his Highness the Sultan, and the Persian Agent. The Shah did not land, and continued his way into the Canal early next morning.

The Emir Abdullah.

The Emir Abdullah, who is still with us, has had a very busy and interesting week. Amongst the lighter events has been a review of the British garrison in his honour, at Abbassia on Tuesday. The parade was a very fine one, the troops marching past in great form, but unfortunately the cavalry did not come up to the scratch, and although the Artillery galloped past in dashing style, the 11th Hussars left much to be desired; in fact, their display, which was so keenly looked forward to, was very disappointing.

On Saturday the Emir attended an aerial display given by the Mid-East Air Force on the Heliopolis aerodrome. His Highness was very much impressed by the excellent and daring manner in which the planes carried out their programme, especially when the machines at the conclusion of their "stunts" came to earth, all in a straight line, a few yards in front of him. Two of his suite, as well as Colonel Vickery, the British Agent at Jeddah, who has accompanied him throughout his trip, subsequently went up for a flight, much to the delight of the Emir and the other members of his retinue.

Emir Abdullah was the guest of honour at a State luncheon given by the Sultan at Abdin Palace, and the same afternoon he took tea with Lord and Lady Allenby at the Residency. His Highness leaves again to-morrow for Jeddah, having spent just under three weeks in Cairo. During his visit he has had several conferences with Lord Allenby and the other authorities, and there is every reason to believe that a satisfactory agreement has been arrived at in connection with the various matters discussed. Cairo is not new to the Emir, who visited it during the latter years of the ex-Khedive's reign, and who passed through this country whenever he went to Constantinople, where he sat in the Ottoman Parliament as a Deputy for Mecca; but to most of his suite Egypt was unknown, and from remarks which they have let drop they are returning to the Hejaz with very changed ideas of the outside world and a very great impression of British prestige.

YUGOSLAVIA.

BELGRADE, May 8.

The Cabinet Problem.

M. Vesnitch, till recently Minister in Paris, has returned to Belgrade to make a second attempt to form a Coalition Cabinet; and he has greater chance of success this time, as the Democrats have signified their willingness to give assistance, and the Prime Minister has submitted a memorandum to the Crown, in which he stated that he could no longer carry on the Government owing to the obstructionist tactics of the Opposition. Consequently, now that both parties have had a few months' experience of attempting to govern, both with and without Parliament, they may be willing to give a coalition a trial. M. Vesnitch, as a trained diplomatist, has more qualifications that M. Protitch or M. Pribichevitch, neither of whom overdoes the *suaviter in modo*. Everybody hopes that M. Vesnitch will succeed, and that quickly, for everybody is sick and tired of the uncertainty and constant changes. The duties of the new Government will be to remain adamant upon the vital national interests in the Adriatic question, and to carry through the general elections for the Constituent Assembly, which, it is hoped, will give the country a Government that will stay in power for a good term of years.

Strike Ended.

The railway strike has ended in a collapse, which is generally interpreted as a great win for the Government. Ordinary traffic is resumed, but the postal services have hardly recovered from the shock yet. Mails are coming in regularly now, but there is reason to believe that a number have been lost, or at least, not delivered.

May 1 was celebrated as Labour Day, and great preparations were made by the authorities to prevent any unruliness. The police directed the Labour Party where they might demonstrate, but the leaders replied that they would demonstrate only in their own homes. They were either sulky or cowed, for the railway strike came to an end only two days previously. The day passed perfectly peacefully, the only signs of anything unusual being the slightly stronger patrols of gendarmes that were on duty.

Good News for Smokers.

It is hoped that the tobacco shortage of last year is over for good; no longer shall we see queues of hungry

Digitized by Google

smokers waiting for their morning dole outside the little window of the *Monopol* for the "English" and American cigarettes which the authorities had secured. The *Monopol* is reported to have bought up the entire crop, amounting to eight million kilogrammes, of which five millions are from the old kingdom of Serbia.

Before the war, Serbian cigarettes had a deservedly high reputation, as not only was the actual tobacco of the finest quality, but it was very skilfully seasoned and cured. It is stated that the Kaiser preferred them to any other, which, if it is true, is a rare instance of good taste on his part. Very high wages indeed are paid to smoke-dried old peasants of proved and delicate palate as tasters. But still, it will take a year or two for the Serbian tobacco industry to recover its prestige, if only for the time necessary for seasoning, and for replacing plant looted by the enemy.

The British Colony.

The British colony in Belgrade has been gay of late. Dances are frequent; the British hospital units, the Serbian Relief Fund, and other institutions have frequently given more or less informal dances; recently the bachelors of the colony gave a pleasant ball at the Oficirski Dom, which has the best floor in Belgrade, and shortly after that a private ball was given in the same building. It was attended by representatives of the British, American, French, and Russian colonies, as well as by many Serbs, whose younger generation, largely educated in England during the war, have taken very kindly to the mysteries of the fox-trot and the one-step. And the very excellent Guards' Band was able to provide music for the most fastidious.

A Slump in Communism.

One does not hear much more of Communism since the collapse of the railway strike, which interested parties tried to convert into a political move. So-called "Communist" leaders have been arrested at Osijok, and the so-called Soviet Republic, which had less than an ephemeral existence at Subotitsa, has been abundantly proved to have been a plot on the part of the Hungarian Nationalists. A searching investigation has revealed the ramifications of a widespread plot, which seems to have extended across the Roumanian frontier in the Banat; at Subotitsa, whole arsenals of concealed arms have been discovered. The wire-pullers are sitting in safety across the demarcation line, but a large number of arrests have been made, and sensational revelations are expected. One of the arrested succeeded in committing suicide.

Demobilisation Completed.

Demobilisation became complete on May 5; the military censorship of letters and telegrams was abolished, and the functions of the Serbian G.H.Q. terminated at five o'clock that evening. Voivoda Mishitch remains head of the army, as Chief of General Staff, but as that gallant soldier is unfortunately still resting in France in very poor health, after the terrible strain and responsibility of the past seven years, the duties of the Chief will be carried out by his assistant, General Peshitch.

ROUMANIA.

BUCHAREST, May 14.

The Political Situation.

There is no new development to report in the political situation. The Ministers and candidates for the parliamentary elections are busy addressing meetings in their respective constituencies, and in Bucharest itself a lively propaganda is being carried on. The streets are plastered with placards setting forth the aims and virtues of the various parties, and leaflets are being distributed broadcast. An excellent opportunity was afforded for such distribution on Monday, May 10, which is a national holiday in commemoration of the entry of Charles of Hohenzollern into Bucharest as sovereign Prince of Roumania, when he took the following oath:

"Je jure d'être fidèle aux lois du pays, de maintenir la religion de la Roumanie ainsi que l'intégrité de son territoire et de gouverner en Prince constitutionel."

A Review.

A commemoration service was held at the Cathedral at 11 o'clock, to which the King and Queen drove in state, accompanied by the Princesses Elizabeth and Ileana, and escorted by the Royal Regiment in their white-plumed helmets. The high dignitaries of State, foreign diplomatists, and some distinguished guests were present at the ceremony. The route was lined with soldiers, and great crowds watched the procession and gave their Majesties a most hearty welcome. There is no doubt that they are extremely popular.

After the service the King held a review of the troops in the Boulevard Academiei, which the Queen and Princesses also watched, from a kiosk erected for the purpose. A grand stand was prepared for State officials and the Diplomatic Corps, but for reasons of economy no provision was made for the general public. Every window and available point of vantage was, however, filled by the enthusiastic populace. The troops looked fine, strong men, and marched in splendid form, especially the mountaineers, one company of whom carried their *ski* and attracted a good deal of attention as well as sympathy, for the day was hot. But the greatest excitement was roused by a company of small tanks, which many people saw for the first time in this country. The King took the salute of the troops on horseback, and after their march past the various detachments returned to their barracks or lined the home route to the Palace. About 1 p.m. the Royal party returned home.

Roumania's Recent History.

On this historic occasion it may be interesting to review shortly the recent history of Roumania. It will be remembered that for over a hundred years (1711-1821) Roumania was ruled by the Phanariote Princes, of Greek origin, appointed by the Sultan of Turkey. As the result of a revolution in 1821 the government was restored to Roumanian Princes, one in Moldavia and one in Wallachia still under the suzerainty of Turkey. By the Congress of Paris, signed on March 30, 1857, the signatory powers, including France, England, Russia, and Austria, guaranteed to the Principalities of the Danube an independent national administration and freedom of religion and commerce. The chief aims of all Roumanian patriots at this time were to secure freedom from the Turkish yoke and the union of the two principalities. The latter object was achieved and confirmed by the Treaty of Paris in 1859, when Alexander Jean Couza was elected Prince of the United Principalities, but it was not until 1861 that the sanction of the Porte to the union of the two Governments of Jassy (Moldavia) and Bucharest (Wallachia) was obtained, largely through the instrumentality of France. In a very short time, however, jealousies among the Moldavian and Wallachian nobles led to an agitation for the nomination of a foreign ruler. A society was formed with the object of deposing Couza. Among its members were Lascar Catargi, Prince Dem. Ghika, C. A. Rosetti, Jean Ghika, Dem. Sturdza, P. Mavrogheni, G. Ghika, J. Cantacuzeno, and Jean Bratiano, all of whom played a conspicuous part in the later history of their country. In February Couza was arrested and obliged to abdicate. In the same year Prince Charles of Hohenzollern Sigmaringen accepted the throne as Prince of the Roumanians. In 1877, when Russia declared war upon Turkey, Prince Charles threw in his lot with the Russians, and as a result of their joint victory in 1878 Roumania was able to free herself finally from the Turkish yoke. By the Treaty of St. Stephen (March 3, 1878) Turkey recognised her independence and granted to Roumanian subjects in Turkey the same rights as were enjoyed by the subjects of other European countries. By the same Treaty, in spite of the valuable support she had lent to Russia against their common enemy, Roumania was obliged to cede to her ally a large part of the rich Province of Bessarabia, which bears the name of the Roumanian family of Bassarab, who reigned both in Moldavia and Wallachia from the beginning of the thirteenth till the

Digitized by Google

middle of the seventeteenth century. The Roumanians have never been able to forgive Russia for the loss of their cherished province, and its recovery since the recent war has given rise to great popular rejoicing.

In 1881, with the sanction of the Great Powers, Roumania was constituted an independent kingdom, and in that year Prince Carol was crowned King of Roumania. Under his wise and energetic rule the country rapidly developed in all directions, till at the beginning of the twentieth century she was a rich and flourishing state, had an excellent railway system, one of the most comfortable in Europe, and a first-class service of passenger steamers running from the port of Constantza to Constantinople, the Piræus, and Alexandria. It is sad to see how the depredations of the war have set her fortunes back again at least fifty years, but the natural wealth of her soil gives her every chance of recovery under a good administration.

The King and Queen leave Bucharest on May 15 for a tour of the Bukovina and Bessarabia. They will attend a mass for the soul of St. Stephen (Stephen the Great), at the monastery of Putna, where he is buried and will proceed thence to Czernovitz, Kisheneff, and the south of Bessarabia, returning in about twelve days.

Roumanian Derby Day.

The racing season began a few weeks ago, and the Roumanian Derby was run last Sunday (May 9). Although this is a very popular event, it is significant of the strange indifference of the general public to current topics that not one of the chief hotel porters could say on Saturday evening whether the Derby race was to be on Sunday or on Monday, the national holiday!

The racecourse lies at the far end of a long chaussée which, for the first mile, is lined with villas in pleasant gardens, and, further on, with woods. This is a modest imitation of the Champs Elysées, and is the fashionable promenade after five o'clock every afternoon. On Derby Day four continuous streams of traffic passed up and down it, the carriages keeping to the middle of the road, while the outside courses were left for the motors. It appeared to be a point of honour for no carriage to try to pass in front of another, as this would inevitably have led to confusion, but the Chaussée is certainly the only place in Bucharest where the rule of the road is observed so conscientiously. On the return journey, after the races, the crowd of carriages was so great that for a distance of about two kilometres it would have been impossible to cross the road between them, and policemen were stationed all along the route to take the number of any carriage that ventured out of its line; very few drivers seemed disposed to risk incurring the heavy fine imposed for such an infringement of the rule.

The races themselves were not very noteworthy, as only three to five horses were entered for most of them, and the betting was not on the horse but on the stable. Thus, for the Derby race, five horses were entered, of which three belonged to M. Marghiloman. The chances were, therefore, at least three to two that he would win, which, indeed, he did, two of his horses coming in neck and neck. However, the weather was fine, and the crowd very gay. The King and Queen and Princess Elizabeth were present. The Queen and the Princess wore mourning for the Crown Princess of Sweden. The King was in Admiral's uniform, and during the intervals between the events he walked up and down the promenade with a friend.

Bujor.

Sentence of penal servitude for life has been passed on the Bolshevik Bujor, a Roumanian who joined the Russian Bolshevists, and was a member of the committee at Odessa who were responsible for the detention of the important Roumanian prisoners who were later liberated through the intervention of Colonel Boyle. He unwisely returned to Roumania, thinking, perhaps, that the Socialists would be strong enough to protect him but was arrested about two months ago. He had been responsible for raising Roumanian Bolshevist battalions to fight against the Roumanian army when it entered Bessarabia.

PALESTINE.

JERUSALEM, May 1.

A visitor to Jerusalem now may or may not expect great changes, according to his temperament or previous knowledge of the place and country. It was the writer's privilege to be in the Holy City when the long-expected news of the Mandate was made known. The first intimation to the general public of the fact was the publication of special editions of the Hebrew papers, and groups of Jews in the streets discussing in animated groups the great announcement. There seemed to be no public official intimation, and even two days later Englishmen employed in Government offices said they had heard nothing official. There had been a tense feeling in the place ever since the unfortunate troubles a month or two ago—everyone on the *qui vive*, and apprehensive looks even if a door banged, as no one knew whether it might be the first shot of another riot. However, everything was quiet and remained so, much to the relief of all. The recent rising has left a nasty feeling behind it, but people are beginning to realise that it was probably through the influence of certain foreign Jews of Anarcho-Bolshevist tendencies, and the best Jewish opinion in the country deplored the breach of the peace as much as anyone. The Jews living in the country have lived for generations with their Moslem neighbours, if not on terms of cordiality, at least with mutual tolerance. The stern warning given by the Military Governor of Palestine, which, put into unofficial language, was to the effect that he was going to stand no nonsense, and that anyone who broke the peace, whether he were Jew, Moslem, Christian, or infidel, would be severely dealt with, seems to have had a good effect. There is a Commission sitting now to sift the claims of the various people who say they lost goods or money in the recent riots. A curious fact disclosed is the amount of money which seems to be habitually carried on the person, some claiming as much as two hundred pounds, which they allege had been taken from them. In some cases this is no doubt exaggerated, but there is enough evidence to show that it was by no means unusual. Possibly with confidence restored, the inhabitants will begin to make more use of banking facilities than apparently they have done in the past.

The railways and posts in Palestine seem in a very parlous state. If anyone complained, it was stated that nothing could be done till the Mandate arrived, which word seemed to bring as much comfort to bureaucratic inertia as the blessed word Mesopotamia did to the old lady. This had a shadow of plausibility with regard to the railways, which need large sums spent on repairs and upkeep to rolling-stock, as well as extensive renewals, but the posts and telegraphs are in a different category. Telegrams take anything up to two days to get from Egypt to Palestine, and letters may not be delivered there for four or five days after posting in Egypt. Business people in Palestine seem to accept the inevitable with stoical indifference, having complained in vain; but it is obvious that if the country is to become prosperous this state of things must be altered.

Road repairing outside the city of Jerusalem is proceeding, and various steam and motor rollers are doing good work. Also main drains are being laid, and the deep trenches cut to receive the pipes form an interesting object-lesson as to the débris on which Jerusalem is built. Fortunately, the British School of Archæology has now secured quarters in the place, and will be able to watch should any important remains be found. There has also been appointed a Government Inspector of Antiquities, who may be able to do something towards preserving the historic remains in the country. Professor Garstang, who is in Jerusalem in connection with the work of the British School, has been appointed Honorary Adviser to the Antiquities Department.

A curious result of the extraordinary fall of snow last winter is the fact that there is hardly a single evergreen tree in the neighbourhood of Jerusalem that has not been maimed. The cypresses especially seem to have suffered, practically every one having the top or one of the main branches broken off, and some fir-trees in the Municipal Garden have been beaten down almost to the ground. Olive-trees also have suffered a good deal, though not enough materially to affect the olive crop, which bids fair to be a heavy one this year.

(FROM A CORRESPONDENT.)

JERUSALEM (Undated).

The Jewish Problem.

Anti-Zionist feeling is in no way diminished, as is easy to understand on the spot. That a better time is coming is the hope and expectation of all. Relief from indebtedness—the curse of ages—the establishment of agricultural banks, security and justice, and many other practical benefits are inseparably connected with the idea of British influence;

Digitized by Google

WHEN the interests of the Empire and the individual are identical it is not difficult to adopt the imperialistic point of view.

The purchaser of Dunlop tyres *knows* that he is not only furthering British trade but is ensuring satisfaction to himself: hence their universal popularity.

and hence the mandate is hailed by almost all. But the newly awakened glimmerings of "self-determination" and of a patriotic sentiment repel the suggestion of a foreign invasion. Has not the Jew already looked with unfriendly eye upon Government loans to agriculturists, and even protested against them? The "Arab" element is still encouraged to fear that his race will be swamped by the threatened hordes, and the active propaganda of a "Moslem-Christian Committee" is thrown into the scale. Moslem and Christian have got on well together in the past, but when the thin edge of the Jewish wedge is inserted the "Zionist peril" will develop and become a worse than Ottoman tyranny. Why should an unpopular minority, not experienced in the arts of government, be foisted upon the people and disturb the prospect of an otherwise promising situation? The Jew desires to obtain a footing in every Government office, and that Hebrew should become the official language. "Palestine for the Jews" alone is the thinly veiled aim. The optimistic Zionist replies that there is no ground for hostility or clashing of interests. There is ample room for a union of races and for a million of newcomers. Jews will only form a part of the immigrant stream. There must be a large expansion of land cultivation, which means increased prosperity for all. An influx of Jews wisely controlled will help to bring this about. Wide areas of uncultivated, but cultivable, land should be placed under the plough and tree plantation. Much outlay will, of course, be necessary for this and for improved communications by road, rail, and harbour development, none of which had the slightest chance under Turkish rule. There will be no difficulty in raising funds. The Jews will see to that. The idea that the Jews are not good agriculturists is a fallacy. The Jewish element, again it is said, will be a "strength for Britain," whose mandate Jews so ardently desire. This Jewish wave of immigration will presumably not be from Western Europe, but from Russia and those countries which have not provided so enviable a home for the race.

CYPRUS.

NICOSIA, April 17.

The Legislative Council.

The session, adjourned from February 12, is to be resumed on April 19, and is not likely to be a long one.

New Laws.

The course of legislation is likely to run smoothly, and the absence of most of the elected Greek members should tend to facilitate discussion. Several of the draft laws, which are to occupy the attention of the Legislative Council, have now been published. The first is an Appropriation Law to provide a sum of £383,812 for the service of the current financial year. The sum to be spent on personal emoluments is not to exceed £187,483. The schedule allocating the sums proposed for the different departments includes the following: Police, £61,000; Forest, £40,000; Land Registry and Survey, £33,000; Public Works (annually recurrent), £31,000; Public Works (extraordinary), £32,000; Treasury, £21,000; Medical, £18,000; Customs, £16,000; Pensions, £15,000. A Surplus Balance Law provides £51,000 for certain expenses, not already provided for, including Public Works, £28,000; Forest, £8,000; Railway, £5,000; Malarial Campaign, £3,500; Agriculture, £3,000.

Another law aims at checking, by more severe penalties, a crime still far too prevalent—that of stabbing. Ten years after the Occupation a law was passed to prohibit the wearing or carrying of dagger knives; and this was amended in 1911, so as to increase the punishment of offences. It is now proposed to prohibit the import and sale, as well as the wearing or carrying, of dagger knives longer than 3 inches in the blade, excepting those designed for purely business or domestic purposes. Any person wearing such a knife at a marriage or a fair, or in a brothel, is liable to a fine of from £2 to £10, or to three months' imprisonment, or both, always with confiscation of the knife. Marriage festivities in Cyprus, during which a good deal of wine is drunk, are a frequent cause of quarrels, often leading to fatal results.

Bad News for the Dogs.

There is also a law for the prevention of corruption; and one to limit the number of ownerless dogs. These have been the cause of considerable trouble, not to say danger, not only in towns, but to some extent in villages. From next January any dog of over six months must wear a badge, obtainable at a charge not exceeding 6 piastres (8d.). Any dog not wearing such badge may be destroyed by such persons as the High Commissioner may by order direct, the owner having no claim to compensation.

Immigration.

Too many undesirables are endeavouring to seek a home in Cyprus, which has no need of any settlers but useful capitalists, when such can be found, and workers physically fit. A proclamation has been published which very wisely prohibits the landing of destitute persons. A District Commissioner may, by special permission, sanction a landing, should provision be made, to his satisfaction, which would guarantee the immigrant's support for five years, and the expenses necessary for deportation, should the High Commissioner consider this desirable. As early as 1882 it was found necessary to pass a "Vagrants Exclusion Law," which empowered the High Commissioner to prohibit the landing of criminal or vicious immigrants; and in 1884 Sir R. Biddulph prohibited absolutely that of destitute Jews from England, foreign countries, or other parts of the Ottoman Empire.

MALTA.

VALETTA, May 12.

Russian Refugees.

At the request of Admiral Sir John de Robeck, the Governor and Lady Plumer have formed a committee to attempt to obtain help for the 6,000 Russian refugees at Mudros. Articles of all kinds are asked for; and although every sympathy is expressed for the poor stranded people, there have been so many local calls on the island, and we have so much poverty in our midst, that we fear that the response to this call of charity cannot but be small.

PEACE TERMS FOR TURKEY.

PART XIII.

The following Part XIII. of the Turkish Treaty, taken from the official summary, was unavoidably held over last week:—

Miscellaneous Provisions

Turkey recognises Conventions made or to be made by the Allies as to the traffic in arms and in spirituous liquors, and as to other subjects dealt with in the General Acts of Berlin of February 26, 1885, and of Brussels of July 2, 1890, and the Conventions completing or modifying these.

The High Contracting Parties take note of the Treaty of July, 1918, between France and the Principality of Monaco.

In a barrier clause Turkey undertakes not to put forward any pecuniary claim against any Allied Power signing the present Treaty, based on events previous to the coming into force of the Treaty.

Turkey accepts all decrees, etc., as to Turkish ships by any Allied Prize Court, and the Allies reserve the right to examine all decisions of Turkish Prize Courts. Turkey agrees to supply the Allies with all necessary information regarding vessels sunk or damaged by Turkish forces during the war and to restore trophies, archives, historical souvenirs, and works of art taken from the Allied Governments and their nationals, including companies.

Special provisions are also inserted regarding a reform of the Turkish law of antiquities and the future treatment of archæological research in Turkey, the restoration of all objects of religious, archæological, historical or artistic interest removed by Turkey during the war from territories detached from her, the surrender by Turkey of all archives, plans, land registers, etc., belonging to the civil, military, financial, judicial, or other forms of administration in transferred territories, the grant of access by Turkey, subject to reciprocity, to documents, etc., relating to the administration of Wakfs in which the Governments of transferred territories are interested, the recognition by Turkey of Allied judicial decisions since the date of the Armistice, the acceptance of Turkey of special measures to be formulated later by the Allied Powers, acting, if necessary, with third Powers, regarding the sanitary régime in Turkey and in the territories detached from Turkey and the sanitary control of the Hejaz Pilgrimage, the enactment of the necessary legislation by Turkey to execute the Treaty, the obligation of Turkey to facilitate any investigation which the Council of the League of Nations may consider necessary in any matters relating directly or indirectly to the application of the Treaty and the accession of Russia to the Treaty on certain conditions after she has become a member of the League of Nations.

The Treaty, of which the French text is authentic except as regards Parts I. and XII., when the English and French texts are of equal force, shall be ratified and the deposit of ratifications made at Paris as soon as possible. Various diplomatic provisions as to ratification follow. The Treaty is to enter into force as soon as it has been ratfied by Turkey on the one hand and by three of the Principal Allied Powers on the other, so far as concerns these Powers who have then ratified it.

The opening of the new Indian Legislative Assembly at Delhi is expected to take place in February of next year.

Simla is making preliminary arrangements for the proper representation of Indian Labour and agricultural interests at the next International Labour Conference at Geneva.

A combined force of Turks and Kurds has passed through Naku, presumably with a view to concentrating on Nakhitchevan, and thus preparing an attack on Armenia.

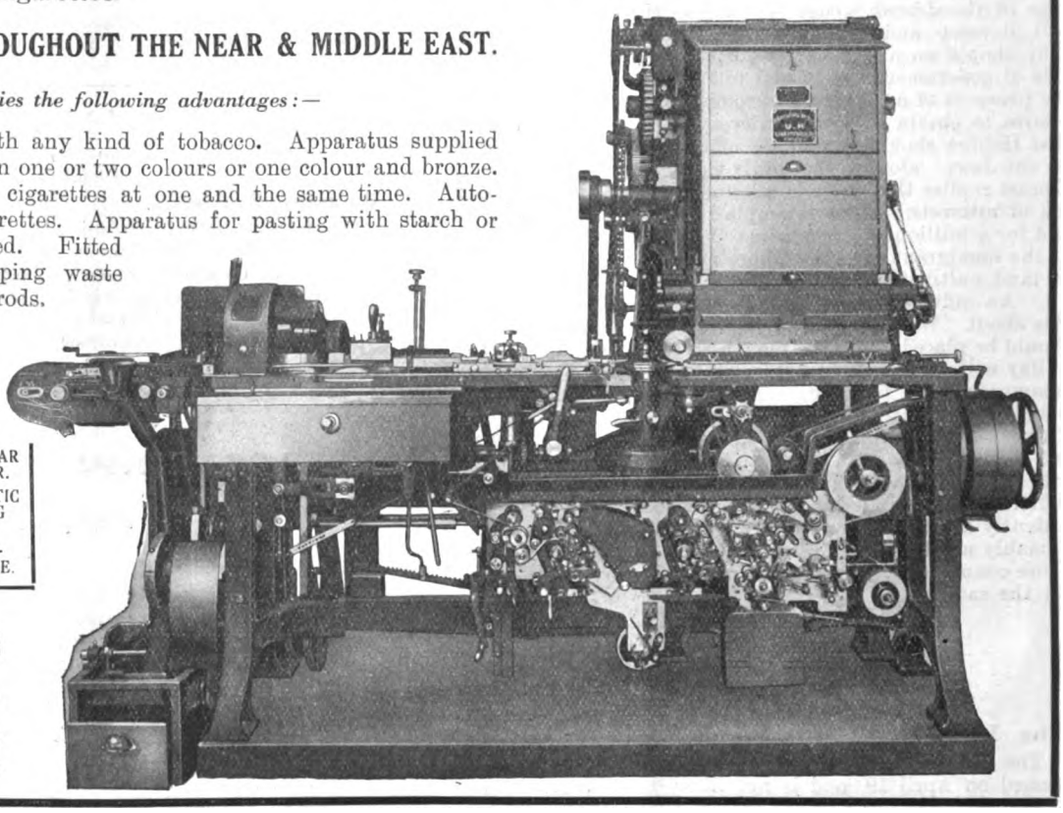
The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.



Also:—
THE "UNIVERSAL" CIGARETTE MACHINE.
THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.

CORRESPONDENCE.

ALBANIA: FALSE REPORTS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Certain telegrams have recently emanated from Athens and Florina, and have appeared in the daily Press, stating that a revolution has been led in Albania by Essad Pasha, and that the Albanian gendarmerie has been trained by Serbians.

This statement is completely erroneous, as Essad Pasha was amusing himself in Paris at the time of his alleged revolutionary exploits. The Greek Press would appear to be ill-informed.

The Albanian gendarmerie has been trained by the Albanians themselves.—I am, etc.,

M. E. DURHAM (Anglo-Albanian Society).

NATIVE AGRICULTURAL ENTERPRISE IN PALESTINE.

TO THE EDITOR OF "THE NEAR EAST."

An editorial paragraph in your last issue seems to me, Sir, a little unfair to some of my friends in Palestine. "Outside the Jewish colonies the country is in a backward state," and, later: "Jewish energy can be trusted to alter all that." I have not the advantage of knowing the Jewish colonies, nor am I an agricultural expert, but I have been greatly impressed by the energy and enterprise shown by the natives of the country in repairing the ravages of the war and in responding to the Government under which they know that they shall reap where they have sown by extending and perfecting their fruit and olive plantations. Hilltops of the most hopeless appearance are being planted, terraces are being built and repaired, and young trees planted by the thousand. Many gardens will compare well with any others in any part of the world. The ordinary fellah would be scandalised at the neglect quite common in English orchards.

The Jews get all the limelight upon what they accomplish in Palestine, and especially upon what they *are going to do there*, while one sees little appreciation of what the owners of the country are actually doing on their own account, as those who know—the British Administrators—are, of course, unable to give their knowledge to the public. One hears great schemes propounded for the improvement of agriculture, but my own impression, shared by others, more competent in such matters, is that a long series of experiments will be necessary before it can be proved that the long experience of the owners of the land can be much improved upon. The Jews have the enormous advantage that capital subscribed by the charitable is at their disposal. Should the natives by any means be given equal opportunities, I am confident that the results of their industry and intelligence would be all that could be expected from any alien race.—I am, etc.,

Cairo, May 8. C. C.

THE TOMB OF ST. DEMETRIUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—A copy of THE NEAR EAST of January 22, 1920, has been forwarded to me from Greece. Your correspondent A. R. G. writes therein regarding the statement in my book, "A Woman in the Balkans," that the body of St. Demetrius "lies in the cathedral at Bucharest in a glass case enshrined in silver"—

"In time of calamity or famine the sacred body is carried through the city, followed by a great procession headed by the Archimandrite, the priests and the people."

Your correspondent mentions that during his stay in Salonika he had been shown what he believed to be the actual tomb of St. Demetrius in the church of that name in the city, and asks for further information regarding this tomb and the body of the saint.

The American Consul at Salonika has kindly interested himself in the matter, and writes: "I have a written communication from the Archbishop of Salonika, in which he says the body of Dimitrius was originally preserved in the church of the same name at Salonika. This sacred relic disappeared, along with other valuables of the Byzantine Church, when the Turks converted the church of Saint Dimitri into a mosque, and no definite information is possessed by the Greek Church—according to the friendly Archbishop—as to the subsequent whereabouts of Dimitrius." Bucharest claims to possess this valuable relic in her cathedral.—I am, etc.,

CHRISTIAN CROSSES AT JERUSALEM.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Dr. Weizman's vehement disclaimer of any desire on the part of the Zionists at Jerusalem to dishonour English soldiers' graves by the removal of the crosses that mark them is only what one would expect from a man of his known probity. To any right-minded Zionist having also a sense of gratitude to Christian soldiers for their sacrifice in liberating the Holy Land, the very idea of tampering with their graves must be obnoxious. But it must be remembered that all Zionists are not British. What is the percentage in Palestine of foreign Jews over British? The broad-minded Zionists must be aware of the religious fanaticism and intolerance of the lower order of foreign Jews, who have to be considered as a force and placated. To these the Cross is still "a stumbling-block."

The "objection" to the soldiers' crosses by Zionists at Jerusalem is, unhappily, no fiction. Travellers returned from Palestine *since* Archdeacon Potter's letter was written, and with no knowledge of it, report the matter independently in almost the same words. In fact, THE NEAR EAST seems to be the last to comment on the subject, which has already appeared in several other papers.

Dr. Weizman's disclaimer will be welcomed by Christians in Jerusalem and at home as an indication of right-minded Zionist feeling on a matter so vital; but it does not, alas! *dispose* of the danger. It is to be hoped that the rank and file of Zionists, whether British or foreign, will take their cue from him and let go of their "objection" to the symbol of the faith under which the mandate for Palestine is held over the graves of the men who won it.—I am, etc.,

RETURNED FROM JERUSALEM.

THE ARMENIANS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As communication between England and Mesopotamia takes so long, it is too late to comment on recent events; but I propose to offer, by way of consolation to those who constantly read of sporadic massacres of Armenians by cruel Eastern races, a few frank words upon the subject.

As one of your correspondents says: "With the Georgians, the Azerbaijan Tatars, and the Turks all around them, the Armenians stand a poor chance of a free and peaceful existence." But allow me to suggest that the Armenians who have survived the horrible massacres organised by the heads of the German Staff and perpetrated by the bloodthirsty yataghan of the Turk will probably contrive also to pass through the present crisis. The 70,000 Armenians reported at first by Reuter to have been massacred by the Turks in Cilicia proved later to have been 7,000. This mistake will re-enlighten the hearts of all the Armenophils who thought that the end of the Armenian nation was at hand. The Armenian State has been proclaimed and recognised *de facto* by the Supreme Council. This materialisation of the hopes of thousands of Armenians will enkindle the traditional sentiments which are at the bottom of every Armenian's heart.

Much, both for and against, has been said in the Press regarding the Armenians. But the most interesting fact concerns the aspirations of the Administrators of the Armenian Republic at Erivan. These, fortunately, possess sufficient energy to govern and to satisfy the numerous needs of their country, and will by future historians be classed as the creators of Armenian independence.

"To serve Armenia is to serve Civilisation." Gladstone's dictum will never be forgotten by the wise men of the world. The Armenian nation is on the eve of putting into effect the prophecy of her English father.—I am, etc.,

PRESS ON THE NEAR EAST.

Intrigue in Persia.

Under the heading "Persian Discord," *The Times* publishes (May 19) an important despatch from its special correspondent in the Middle East, written under date of May 16. The writer begins by remarking that the rapid deterioration of the situation following on the fall of Baku and the dangerous possibilities involved for the Anglo-Persian Agreement and for British interests generally, call urgently for plain speaking. He continues:—

Although it is an open secret that the conclusion of that instrument was never favoured by the Government of India, who feared the heavy commitments it might portend for them and were doubtful of its reception by the Persian public, yet it undoubtedly was conceived on broad and honest lines, which, apart from any unfavourable development of the general political situation, promised it a prosperous career. It arose in a spontaneous impulse on the part of the Persian Government, due to the confidence inspired by the British Minister, which made them realise that Persia, otherwise friendless and alone, had in Britain a powerful potential friend whose interest it was to sustain her. It was essentially an arrangement which could be claimed as an attempt at something new in the Middle East, for the spirit of which the best parallel is the old Anglo-Portuguese alliance, which no monarchical, Republican, Clerical, anti-Clerical politician has reversed because its aim was known to be the preservation of Portuguese independence.

But in Persia, unfortunately, the national confidence in Britain which exists in Portugal has not yet been established. Therefore to treat the agreement as a mechanical arrangement which, once concluded, will flourish untended is surely to destroy it or leave it no basis but our own material force.

With the advance of the flag of Bolshevism into the Middle East, which we are now witnessing, Russian influence, which had temporarily waned, is rapidly reviving under new auspices and with fresh force, because it now appeals to a considerable section of the community. Every true Russian element, whether Bolshevist or not, is naturally frankly opposed to the Anglo-Persian Agreement, is rejoiced to see Russia again in Baku, and is confident that this portends a resumption of Russian sway in Northern Persia.

A little later, after referring to the difficulties of the Persian Government, which, though willing, has not the strength to handle the situation as it should be handled, the correspondent goes on to say:—

The Tabriz Democrats once more have had their way and the opponents of British policy and the Anglo-Persian Agreement here are quick to take advantage of the situation. The Cabinet is the object of continual attack and its unpopularity reacts on the British Legation, which, after a temporary leap into the position of the palladium of Persia, seems likely to fall back into an abyss of unpopularity only comparable to that of Russia before the war.

This is partly due to difficulties not of its own making. The Legation is still saddled with a futile list of proscribed persons, whose Persian patriotism and hatred of Russia had put them in the opposite camp during the war, but without whose assistance and with whose hostility there can be no political peace in which to develop reforms in Persia.

Both in Persia and Europe there are Persians under the ban of Downing Street, who were formerly our best friends and could now do much to bring good fruit out of the Agreement.

It is, he says, "unfortunate that such a time should be chosen or happen for a change of British Ministers. It should be recognised that the new Minister now on his way, who is universally described as an able and sympathetic man, assumes charge at a difficult time. . . . Unfortunately, he cannot count on any enthusiastic well-wishing from his principal Allied colleagues in the prosecution of his task."

The Turkish Treaty.

The *Outlook* of May 15 deals refreshingly with the terms of the Turkish Treaty. Of the pact it says:—

The instrument, as it stands and as it will probably be executed, is manifestly a compromise between self-interest and general expediency. Those who hoped to see the Turk "bundled out of Europe bag and baggage," see the Turk gone but some of the baggage left behind; and the Sultan may now condole with the Pope on the curious coincidence that the rival potentates have each lost their temporal power while their spiritual authority survives. Conceivably the solution was the best in the extraordinarily difficult circumstances; but the addition of Constantinople to the *olla podrida* of Danzig, Fiume, and other unquiet spots which are devised to the League of Nations is frankly more a tacit confession of international bankruptcy than a profession of faith in the new Public Trustee of Europe. The League was originally devised as a kind of gateway to a better world, and a symbolic portal to a Palace of Peace. It is gradually being transformed into a dustbin.

Turkish Nationalism.

In a leading article entitled "Turkish Treaty Sequels," the *Glasgow Herald* of May 18 says:—

But a genuine Nationalist rising in Asia Minor headed by Enver and supported by Bolshevik gold is a somewhat disturbing contingency. Troublesome as this new development may prove to be, there is no need to regard it as in any way alarming, provided that advantage is duly taken of the facts which tell in favour of the Allies, and provided, too, that the Powers most closely concerned in the observance of the Treaty terms act with circumspection as well as with firmness. That there are plenty of actual or potential "Nationalists" among the Turks may be freely admitted, but, except in Asia Minor, and to a considerable extent even there, they are scattered, and combination is rendered difficult by the intervention of belts of territory inhabited or militarily occupied by anti-Nationalist elements. The Nationalists in Thrace are rendered practically of no account by the Allied occupation of Constantinople, the anti-Nationalist operations in Asia Minor must result before long in splitting up Mustapha Kemal's forces, and the Allied command of the Port of Batoum enables flanking pressure to be brought to bear upon Enver's projected incursion through Georgia. These factors will doubtless be turned to good use, but it is not equally certain that the attitude of all the Allied Powers towards non-Nationalist Turkey will be just what it ought to be, in order to secure not only the signing of the Treaty but also loyal acceptance of all its provisions. We ourselves are not likely to err in this respect. France is not very deeply interested in Turkey's future, and Italy has already shown great tact in dealing with the sphere of influence she has acquired in Adalia. But Greece will be well advised to modify the tone of triumphant self-assertiveness which she is already beginning to use in respect of her great territorial gains at the expense of Turkey, and to remember that, while it may be easy for her to maintain those gains in Thrace, her foothold in Asia Minor is not assured, and is dependent on her exhibition of qualities the possession of which she has yet to demonstrate.

Mulai Hafid.

In the May number of the *Strand Magazine*, Mr. W. B. Harris gives some more of his inimitable stories of Sultan Mulai Hafid. Here is an example of the Sultan's unorthodox manners at table:—

The Sultan dined in the great dining-room of the Hotel Majestic. His table, a very large one, for there were constant guests, was raised on a dais at one end of the room, which gave him an excellent view of all the diners—and the diners at the Hotel Majestic at Vichy in the height of the season are worth seeing. One night the Sultan appeared distraint at dinner, and his eye roved over the crowded room with an anxious and sympathetic expression. He spoke little, and it was difficult to get him to talk. At last he asked to see the manager, and that most amiable and deservedly popular gentleman, the proprietor of the hotel, appeared at once. "These people," said the Sultan, waving his hand towards the crowd at dinner, "are badly distributed. Many are not happy. Let us rearrange them. The old gentleman with the long grey beard has no right to be dining with the beautiful young lady in the big black hat, wearing a pearl necklace. There is a terrible disparity in their ages. She should be dining with the charming young officer over there"—he pointed to another table—"and the elderly lady no doubt, his mother, should be dining with old greybeard. You should have," and addressed the proprietor, "some thought for the happiness of your guests. Now, that lady there," and again he pointed in another direction, "is terribly bored. She has been tapping the edge of her plate with her fork for half an hour. She evidently dislikes extremely the gentleman with whom she is dining—probably her husband—but I have watched her, and she keeps looking at the young man, dining alone, with the waxed moustaches. Go and introduce them. Her husband hasn't spoken to her once this evening. He won't miss her—and you will make two people happy, and if the husband is dull, invite that strange lady with the red hair who is just coming in to sit down beside him. She will keep him occupied, I expect, to judge by her appearance."

THE CARAVANSERAI.

Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultán after Sultán with his Pomp
Abode his Hour or two, and went his way.
—OMAR KHAYYAM.

Friendly feeling towards the Turk is to-day unfashionable, and the Press seems to be undecided whether the Terrible Turk or the Bolshevist is the greater evil. In these circumstances I should like to point out, on the authority of a letter published by *The Times*, that "profiteering, which was rampant during the Bolshevist occupation [of Baku], practically ceased during the two and a-half months of the Turkish occupation." That surely shows that Turkish administration, with its occasionally drastic measures, is not *always* an unmixed evil. Indeed, in view of the statement put forward, some of us must feel tempted to wish that we could import a few Terrible Turks to deal with our own Pernicious Profiteers.

***

The idea of a Turkish administration here—with a view to the suppression of the profiteer, of course—opens up a quaint prospect. Mustapha Kemal as Governor would hardly be a popular appointment, but he would "get a move on," I fancy. And how would London like Bedry Bey, formerly of Constantinople, as its Commissioner of Police? Try to picture, too, Salih Pasha as Premier; Javid Bey supplanting Mr. Austen Chamberlain; Talaat at the Home Office; and Enver in office instead of our one and only Winston! But it would be in the outer circles, so to say, that the change would be most noticeable and most amusing. The sight of an ordinary provincial or suburban solicitor trying to persuade an imported Turkish magistrate (formerly a *mudir* or perhaps a *kaimakam*) that his client was merely overcome by grief when he was picked up in the gutter by X 31 would afford one, personally, great joy. But I expect that unless one has seen the original in Turkey the humour would hardly be understood. The solicitor at least would in all probability fail to find the experience an amusing one.

***

A little while ago a short paragraph appeared in the papers about "An Egyptian Bluebeard." It referred to some happenings at Tanta, a Delta town with an unsavoury reputation, where women had been "enticed into a certain house . . . . on the protext of meeting a wealthy admirer, and . . . . despoiled of their jewels and murdered." The remains of twenty victims were reported to have been discovered. Now I do not as a rule read accounts of such horrors—our evening newspapers have, therefore, little attraction for me!—but the word "Bluebeard" in the heading caught my eye in this case; and, of course, the likeness between the crime and a similar "mystery" in France was at once obvious. What I should like to know is whether the Tanta criminal is consciously copying Landru, or whether it is a case of pure coincidence. Having regard to the Egyptian character, I am inclined to favour the former view. It will be interesting to see whether future developments will shed light on this point.

***

The *Pioneer Mail* of April 2 contained a paragraph which has intrigued me not a little. Here it is:—

> Hajee, a wealthy Mussulman, alleged to be a lunatic, has been remanded to custody on a charge of grievously stabbing three magicians performing incantations to drive away the devil which the man was supposed to possess.

There is a puzzle for you! Having regard to the methods pursued by "magicians" in driving away devils, I was inclined, at first, to think that Hajee had given fairly good proof that he neither possessed a devil nor was possessed by one. But then came the thought that no sane man would care to kill three Eastern magicians, unless he felt pretty sure that he would not be found out. If he felt sure of that, of course, there is no knowing what he would do. I can only say that what I have heard of those gentry would lead me to sympathise with Hajee in any case. Yet, if the man really was *majnun*, the magicians were, obviously, engaged on a good work when they were stabbed. So I am left trying to decide whether I ought to feel sorry for them or for Hajee, and for the life of me I can't make up my mind on the point.

***

I referred recently to a class of advertisement inserted in the "agony columns" of the Press by persons who might be described in one word as "cadgers"—men, young and midde-aged, who desired to be "adopted" or otherwise enabled to live without honestly working. My attention is drawn by a friend to an advertisement in *The Times* a short time ago which, being a genuine wail from the heart, may be regarded as a legitimate case of "agony." It begins: "An Indian Servant (with consummate genius) has packed up a 4.50 D.B. Express Rifle . . . . for me to shoot snipe with in England and sent my gun to an auction!" It would take a decent shot to bring down snipe with an express rifle, I suppose—unless one potted them sitting. This advertiser has my sincere sympathy.

***

That an Indian carpet is a good thing of its kind will hardly be denied by anybody who knows what he is talking about. It may not have the beauty and charm of an old Persian carpet, and its design and colouring can seldom if ever be compared with either Turkish or Persian. But it is usually a wonder for wear and a fine draught-stopper. I bought one second-hand for a mere song in 1908, and though it has had extremely hard wear ever since, it is still quite presentable, and looks good for another ten years yet. And I am glad of it, for, as is the case with most other things in this world—except THE NEAR EAST!—the price of Indian floor-coverings "is riz." An Englishman in Bombay recently received a notification from the Yerroda Jail that a carpet, ordered in 1912, was now ready for delivery. Its size was 10 ft. by 8 ft., and he was informed that if he would pay the present price, Rs. 347, it should be forwarded to him. As the communication was actually intended for another Englishman of the same name, he simply sent the notification on to the right person. But he can hardly have been very strongly tempted to take advantage of the accident in delivery of the letter to secure the treasure for himself—at that price.

CORSAIR.

A JOURNEY ACROSS ARABIA.

On May 3, lecturing before the Royal Geographical Society at the Æolian Hall, New Bond Street, Mr. H. St. J. Philby described a journey made last winter by himself, two European companions, and a party of Bedouin across Arabia from the Persian Gulf to the Red Sea. On November 14, he said, he left the island of Bahrein for the port on the Arabian coast opposite, whence he set out on his journey, passing through this small port and entering on the deep, rolling sea of sand which lay behind it. In this part of Arabia water can be found by digging in the sand, and, later, he passed through an extensive oasis and one or two small towns On November 27 the party struck off into the interior, taking with them all the water they wanted, and marching across a waterless and treeless desert. There was little to see. The eastern part of the desert was diversified by occasional hummocks or ridges; beyond that the country was undulating, but with the Wady Farch running through it. At one point they came across two acacia trees, perhaps twenty feet high, but giants among the desert scrub, and the Moslems in the expedition gladly availed themselves of the shade cast by these trees as a cool place in which to say their prayers. After marching for three days and a-half they passed through a low barrier of hills on to the eastern flank of the Dahana, the sand desert that holds the interior of Arabia in its desolating grip. That night they camped amongst the sand billows, but the Dahana proved not to be by any means so bad as Palgrave had represented it, and Mr. Philby said that although he subsequently crossed it twice he never succeeded in regaining his original respect for its terrors. On December 9 the party came to the Tuweik Plateau, which bisects Arabia for five hundred miles. This they crossed and, afterwards, another tract of mountainous country before reaching Taif, in the neighbourhood of Mecca. During the latter part of the journey the march was much disturbed by heavy falls of rain, which soaked everybody through and chilled them all to the bone; but the Arabs rejoiced, because it meant better pasture for the sheep and camels in the coming spring, and Mr. Philby made them envious when he told them that in his country it rained every other day. One or two adventurous incidents marked the journey. On one occasion riding ahead with a few companions, while the rest of the caravan struggled far behind, Mr. Philby found himself and his companions covered by the rifles of some people who had ambushed them. He was at a hopeless disadvantage. He and his companions held up their hands in token of surrender, and were immediately surrounded by a mob of howling Bedouin. An indescribable hubbub of argument followed, until it transpired, to everybody's relief, that there was no occasion for bloodspilling. The ambushers were a party of merchants bound on a peaceable enterprise from the Hejaz, and the two parties spent the night side by side peaceably encamped on the site of the encounter.

PERSIAN MSS.

M. Claude Anet, of Paris, the well-known traveller and bibliophil, is offering at Messrs. Sotheby's on June 4, a choice collection of Persian and Indo-Persian miniatures and manuscripts, seventy in all. The miniatures date back to the 15th century, and a number of them are from three different MSS. of "The Marvels of the World," by Kasvini. One of the most important of the MSS. is a finely decorated volume bound in chiselled leather, worked with gold, and is believed to be the only signed Persian binding known. The signature reads, "made by Mohammed Salih, of Tabriz." Another fine MS. is the Divan, by Hafiz, with 73 quatrains of the "Rubáyát" of Omar Khâyyám, and dates from about A.D. 1524.

MUSICAL NOTES.

In Roumania musical culture reaches, I believe, a high standard, but this fact is little known by, and seldom demonstrated to, the English people. Roumanian artists visit this country but rarely, and the ordinary music critic here makes small distinction between artists of the various South-Eastern countries. Something was done to dispel this enforced ignorance by the appearance at the Steinway Hall on May 19 of Mme. Cella Delavrancea, a Roumanian pianist who is said to have been extraordinarily successful on the Continent. Her programme was made up of familiar pieces by Schumann, Chopin, and Liszt, so that by treading this well-known road she at once claimed to be judged by the highest standards. Unfortunately, it cannot be said that she is a great artist, though she certainly is a good pianist. Her unaffected, unemotional style of playing I liked immensely; but in music of such warmth, tenderness, and sentiment as is to be found in Schumann, Chopin, and Liszt it failed to express the charm and the depth which these works bear. In Schumann, however, she came very near the real thing; in the brusqueness, vigour, and incisiveness of "Carnaval" she was excellent, but the warm beauty of the slower movements she missed. The sluggish dreaminess of these movements she made into clear, unhurried contemplation. In the Chopin it was chiefly the lack of sufficient gradations in her *piano* tone that showed her rather as a pianist than as a poet; though in the first Ballade, where these qualities are not so necessary, her eloquence reached a fine height. Best of all I liked her playing of Liszt's "Funérailles," for to the very depths of its intense religious feeling she plumbed. But as she is to give a more varied and representative programme at the same hall on May 27, I will defer further remarks.

At the Queen's Hall on May 20 the Royal Philharmonic Society gave its seventh concert of its hundred-and-eighth season. This society has a very notable past (readers will remember that it was for it that Beethoven wrote his Ninth Symphony), and it has a great reputation up to which it has to live and by which it must be judged. At this concert there was nothing wrong with the music selected, which consisted mainly of Schubert's glorious Symphony in C, Scriabin's Pianoforte Concerto in F sharp minor, and Debussy's "Fêtes" (No. 2 of "Three Nocturnes"); but the performance, generally speaking, was lamentable. The Scriabin was spoiled by an excess of enterprise on the part of the pianist, Mr. William Murdoch (who played brilliantly otherwise), and a lack of it on the part of the orchestra, conducted by Mr. Landon Ronald. Mr. Ronald consoled us later with an exquisite version of Debussy's "Fêtes"—in this one could breathe freely without any dread of what was going to happen next; but no sooner was this done than he plunged us into an irritable consternation by an unwarrantable presentation of Schubert's Symphony. Not only was this symphony cut—it was bruised and nearly mangled. Much was rejected, and the rest, without being quite despised, lacked a proper reverence. Two other facts in connection with this concert should be mentioned: first, that Elgar's Funeral March (from "Grania and Diarmid") was played in memory of H.R.H. the Crown Princess of Sweden, and that it does not add to the few occasional pieces that really move one; and, secondly, that the novelty of the evening was a scena by Miss Katharine Eggar for voice, string quartet and pianoforte, written for some lines from Shelley's "Prometheus Unbound." It was sung pleasantly enough by Miss Carmen Hill, and seemed to achieve its sincere, if unpretentious, purpose.

The problem of how far poets' verse can, in recitation, be explained by a musical setting is not perhaps a very interesting one. Yet it is well to note that there is now a fashion for doing this sort of thing. At the Æolian Hall on May 4 Miss Esmé Church recited some poems by Browning, Newbolt, Kipling, de la Mare, and others not so good as these, the while Miss Kate Coates played explanatory music at the pianoforte. The experiment has never convinced me, and on this occasion it struck me as particularly artificial, probably owing to the forced and unnatural pitch of voice of the reciter. For this combination obvious music is necessary, but Miss Coates can certainly be congratulated that her music was no worse than that. A very pleasing diversion from this was the violin playing of Miss Marjorie Gunn, who played unaffectedly and very appreciatively. She did very creditably in Franck's Sonata in A minor, and her playing of Ravel's beautiful "Pavane" I thoroughly enjoyed. Miss Gunn has possibilities.

It was a similar entertainment, consisting of a recital of Modern Poetry and Song, that Miss Kathleen Rind, Miss Adelaide Rind, and Mr. Steuart Wilson, gave at the Wigmore Hall on May 21. Miss Kathleen Rind recited a good deal of so-called patriotic verse by such men as Newbolt, Noyes, Vernède, and Herbert Asquith, but she also included some excellent verse (which is fine when read but poor when declaimed), by Rupert Brooke, Edward Shanks, John Drinkwater, and W. B. Yeats. I daresay that Miss Rind does this kind of thing very well, but for me the beauty of verse is not enhanced by a set recital of it. To the ordinary patriotic verse, of which men like Newbolt and Noyes have turned out hundreds of lines, such recital may give point, but to such things as Brooke's "Grantchester" or Yeats's "The Fiddler of Dooney"—no. Miss Adelaide Rind sang some beautiful and well-known songs—the fact that they were well known being rather against her. Some folk-songs of the Zunis, however, which she sang with breadth, were interesting. Mr. Steuart Wilson's voice is going to be an extremely good one. Already he can sing with consummate ease and the necessary artlessness such difficult airs as those by Purcell. The things he seems to require now are those that generally come first to the singer—volume, breadth, and dramatic force. But these are only a question of time, and I have no kind of doubt that he will soon be one of the best tenors in this country.

Those who attended Mr. T. P. Fielden's pianoforte recital at the Wigmore Hall on May 21 had a rather trying experience at the beginning, when four Rhapsodies by Dohnanyi were inflicted upon them. These rhapsodies belong wholly to that class of immoral music which is written purely for technical display; and one of them should be sufficient for any concert programme. In a barcarolle, the Berceuse, a nocturne and a ballade by Chopin, Mr. Fielden showed some, but not very much, poetic sense; and he was rather heavy-handed for the frail beauties of Debussy's music. He was at his best in some preludes and studies of Scriabin—late works of this composer in which he has gone in form far beyond Chopin and Debussy. Mr. Fielden is a moderate player who does not often fail in what he sets himself to do.

THE NEW TURKISH STAMPS.

A recent issue of *The Times* contained the following interesting story of the new Turkish issues:—

The first values of the much-heralded new Turkish postage stamps are to hand, and prove to be merely re-impressions in altered colours of the beautiful pictorial designs of 1914. These stamps have already had a somewhat romantic history. Originally prepared to the order of the Ottoman Government by Messrs. Bradbury, Wilkinson, and Co., of London, they were brought into use early in 1914, and were current in Turkey at the time when the Sublime Porte decided to throw in its lot with the Central Powers. Certain values had been overprinted with a Turkish inscription commemorating the abrogation of the European Capitulations in October, 1914, which preceded Turkey's entry into the war. No further supplies being obtainable from London, the Turkish Post Office had recourse to Vienna, whence emergency issues of lithographed postage stamps were supplied during 1916-18. In 1918, when stamps were required for use by the military administration of Mesopotamia, the British Government ascertained that the original dies and plates for the Turkish postage stamps of 1914 were still in the possession of the printers. It was decided to make use of these for the purpose of providing provisional stamps for the occupied area. A special printing was accordingly made by Messrs. Bradbury, Wilkinson, and Co., and the stamps over-printed, "Iraq in British Occupation," the values also being converted into Indian currency by means of a surcharge. Some of the original 1914 stamps had previously been seized on the capture of Bagdad and overprinted by the military authorities there. Now, the same types, illustrating scenes in and around Constantinople and the Bosporus, have again been brought into use by the Ottoman postal service, adding further varieties for the delectation of stamp collectors. The colours and values of the re-issue are:—5 paras, orange (Leander's Tower); 20 paras, rose (Mosque of Selim); 5 piastres, grey-green (the Candili), 10 piastres, slate (Sweet Waters of Europe); 25 piastres, mauve (Suliemani Mosque).

Brigadier-General Sir Charles Bruce, lecturing on Nepal before the Victoria League recently, paid a high tribute to the Gurkhas for their military spirit and their loyalty to British rule. Some tribes, he said, had sent upwards of 45 per cent. of their men to the war. He doubted very much whether any other part of the Empire had shown better results.

NEAR EAST BOOKSHELF.

I.—"THE POEMS OF 'AMR. SON OF QAMI'AH." Edited and Translated by Sir Charles Lyall, D.Litt., F.B.A. (Cambridge University Press. 21s. net.)

II.—"THE MEMOIRS OF NAIM BEY." Compiled by Aram Andonian. (London: Hodder and Stoughton. 2s. net.)

III.—"SUNSHINE ON THE NILE." By May Crommelin. (London: Jarrolds. 7s. 6d. net.)

I.—AN OLD ARAB POET.

Amr b. Qami'ah was an Arab poet of the clan of Qais, son of Tha'labah, a branch of the renowned tribe of Bakr, son of Wā'il. As far as can be gathered, he flourished in the fifth century of this era, the tribe being settled in the mountainous tract of al-Yamāmah, looking towards the Persian Gulf along the shore of al-Bahrain. Little is known of his life, although he is said to have died in Asia Minor after his ninetieth year while on a journey to Constantinople. He enjoyed some reputation as a poet, and various poems and fragments of his continued to be quoted by later writers. He himself belonged to a family of poets, and he is often found using phrases identical with, or resembling, the verses of his kinsmen. A fuller collection of his poems was known to be contained in a manuscript at Constantinople, and Oriental students are now indebted to Sir Charles Lyall for an excellent volume, with text, Arabic comments, translation, exegetical and other notes. Especially valuable is the full introduction on the poet and the poetry which our great veteran Arabist has prefixed to the edition.

In the nature of the case the work will naturally appeal first to Orientalists. But the old Arab poetry has a wider appeal, and Sir Charles Lyall's knowledge of it is unrivalled. Many readers who are not professed Orientalists will have learnt from Dr. Nicholson's admirable chapter on "Pre-Islamic Poetry," in his "Literary History of the Arabs," the many interesting features which this poetry has to offer. They illuminate a haunting phase of Arab life, and reveal a passion—and also a pose!—which is singularly instructive for any deeper survey of pre-Mohammedan thought, of Oriental psychology, and of the fruits of human reflection. The poems of 'Amr certainly do not add very considerably to our knowledge of his age, but there is much in them that is well worth preserving, and we are indebted to the editor for what he has made accessible and luminous.

Among the special features of interest to which Sir Charles Lyall directs attention is the first piece in the series. Here, 'Amr, a handsome young poet, brought up by his uncle, Marthad, is beloved by the latter's beautiful young wife. An incident of the "Potiphar's wife" type forced him to flee from the vengeance of his uncle, and in this poem he magnanimously praises his deceived kinsman and exculpates himself. But about a century later a poem, more than similar, and associated with quite another incident altogether, is ascribed to one al-Husain. Evidently, as Sir Charles observes, we appear to have a case of "barefaced thieving." It is an interesting example of literary methods, and the numerous cases of "pseudepigraphical" writings in the East indicate the different literary habits of different ages. In the Old Testament itself critics have frequently suspected that poetical and prophetical writings have been taken and adapted to conditions and circumstances quite alien from their original purpose, and the evidence now published by Sir Charles Lyall once more shows that Eastern writings must not be judged by Western standards.

As illustrations of 'Amr's thought may be cited the following fragments (p. 63):—

"A man's life among mankind is like nothing so much as a kindled brand which thou holdest up to flame in a wind:

"At one time it blazes forth with a fair shining light, brilliant in colour—then it falls away into dust."

Another in the same strain complains:

"I have grown old, and all my near kin have left me and gone, and my soul has learnt truly the lesson that there is no abiding;

"Those I loved have departed and vanished from sight, and Time has left me not one of them from whom to seek support.

"O Time, enough hast thou done! be gentle with us; we are not rocks, we are not iron!"

A very characteristic poem, No. xii. (p. 47, *seq.*), on wine, is noteworthy for the concluding lines. After praising the wine-skin, "a kingdom to him who possesses it," whose morning draught makes him a lion, he concludes:—

"At the beginning of the night a glorious warrior, at the end of the night a male hyaena, unable to keep his legs.

"God curse thee for a drink! Would that the resolute man could keep himself away from thee!"

Sir Charles Lyall observes that the sentiment of the last verse seems to be unique. The curse ("God fight against thee") may be used for admiration as well as execration, although here it appears to be the latter sense.

In general, the poems of 'Amr exhibit the metrical and other usages of the age, and like all the old Arab poems are no new phase, but come at the end of a development the beginnings of which are lost.

S. A. C.

II.—ARMENIAN MASSACRES.

This is a small book made up of the war memoirs of one Naim Bey, who was the chief Turkish secretary of the Deportations Committee of Aleppo. Naim Bey has collected telegrams sent by high officials in the Turkish Government to the Government of Aleppo, and has added to them his own comments. Some of the telegrams, purporting to have been sent by Talaat Pasha, go to prove that the intention of the Turkish Government was the extermination of the Armenians. These official documents are introduced by Viscount Gladstone, and the book concludes with an open letter to President Wilson, written by Armin T. Wegner, a German eye-witness of the massacres of the Armenians to which the telegrams reproduced refer.

III.—AN UNEQUAL NOVEL.

We have sometimes imagined a shadowy country, floating somewhere in space, populated by those story-book people whose authors have not been able to win for them immortality or fame, and who have yet attained to some semblance of life and conveyed the idea of a definite personality to the minds of even a few readers. In such a community we can picture the characters of "Sunshine on the Nile" wandering to and fro with an air of puzzled grievance, wondering why, having created them, Miss Crommelin had been content to give so little consistency to their words and deeds.

The hero is rather charmingly introduced, in quite straightforward English, and it seems hard on him that, as soon as he has overcome some of his difficulties and won his lady, Miss Crommelin's style suddenly becomes so affected that the reader's only feeling is one of exasperation. And it simply struck us as an act of arbitrary cruelty on her part to bring both her hero and heroine so near to death in an utterly inconsequent chapter towards the end of the book. The most consistent person is Lord Ludworth, with his rather melodramatic villainies and his curious habit of having his old schoolfellows as servants and bullying them, but his creator gives the impression of casting him aside with cheerful unconcern, and we learn his fate only from a casual remark in the last chapter.

The most readable part of the book is that which gives it its title, when the chief characters are sight-seeing in Egypt—but it is a carelessly written novel, almost without construction and relying for movement entirely on coincidence.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish Dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1920. May	1920. May.		1338. Ramadan.	5680. Sivan.
27	14	Thursday	9	10
28	15	Friday	10	11
29	16	Saturday	11	12
30	17	Sunday	12	13
31	18	Monday	13	14
June.				
1	19	Tuesday	14	15
2	20	Wednesday	15	16

The Shah arrived at Baghdad on May 23.

The Madras Dinner will be held on June 15.

The Indian Police Dinner will be held to-morrow.

Mrs. Gore has returned to 27, Lowndes Street, Knightsbridge, from Egypt.

The Persian Minister for Foreign Affairs arrived in London on Tuesday.

Sir Edward and Lady Boyle have returned from Paris to 63, Queen's Gate, S.W.

Lady Miller, wife of Sir John Miller, K.C.S.I., will arrive in London from Bombay on June 2.

The annual Indian Cavalry Dinner will be held at the Savoy Hotel (Embankment entrance) on June 8.

The Indian Political Service Dinner will be held on June 16.

The annual dinner of the Punjab Frontier Force will be held at the Trocadero Restaurant on June 9.

M. Venizelos was entertained at luncheon by the Anglo-Hellenic League at Athens on May 16.

M. Pideresco, the Roumanian delegate to the Peace Conference, arrived in London on May 19.

Colonel R. Rosetti, Military Attaché to the Roumanian Legation, has returned to London from the Continent.

The Count de Serionne has been appointed a member of the Institute of Egypt.

Prince Carol of Roumania left Calcutta for Japan on May 22.

Prince Alexander of Serbia has arrived at Brindisi on his way to Zurich.

Captain Panas, the newly-appointed Naval Attaché to the Greek Legation, has arrived in London and entered upon his duties.

The Maharaja and Maharanee of Kapurthala and suite are coming to London next month, and will stay at the Savoy Hotel for the season.

The annual dinner of the Indian Civil Service will be held at the Trocadero Restaurant on June 10. The garden party will be at the Botanical Gardens on June 9.

King Alexander of Greece is in Paris on a visit to his wife. It is now announced that he was married last November to Mlle. Manos, a member of one of the oldest families in Greece.

Sir William Meyer, formerly Finance Member of the Government of India, was present at the opening session of the Institute of Colonial and International Law at Brussels on May 24.

The engagement is announced of Mr. Leslie Stephenson, agent of Messrs. Maple and Company, Smyrna, to Miss Kathleen Jessie Pengelley, eldest daughter of Mr. and Mrs. R. A. Pengelley, of Boudjah, Smyrna.

The British High Commissioner at Constantinople on May 22 conferred the C.B.E. on Mgr. Dolci, the Apostolic delegate representing the Holy See in Turkey. Mgr. Dolci did much good work on behalf of British prisoners of war in Turkey.

Under the auspices of the Egypt Exploration Society, Professor B. P. Grenfell, D.Litt., F.B.A., will deliver a lecture to-morrow evening at 8.30 p.m. in the Lecture Room of the Royal Society, Burlington House, on "The Present Position of Papyrology."

Sahibzada Aftab Ahmad Khan, the Moslem Member of the Secretary of State's Council, who went to India on sick leave in the autumn, has returned to his work in Whitehall completely restored to health. Mr. Basu has also returned, and the Indian membership is now complete.

Lieut.-Colonel Arnold Talbot Wilson, C.S.I., C.M.G., C.I.E., D.S.O., Indian Army, Acting Civil Commissioner of Mesopotamia, has been promoted to a Knight Commandership of the Order of the Indian Empire for valuable services rendered in Mesopotamia in connection with the war.

On April 24, at All Saints' Church, Boudjah, Smyrna, the marriage took place of Mr. Henry Abbott Walker, of Newcastle-on-Tyne, to Annie Winifred, second daughter of Mr. and Mrs. Rowland A. Pengelley, of Boudjah, Smyrna.

Bishop MacInnes, whose diocese includes Egypt as well as Palestine and Syria, is to speak at the annual meeting of the Jerusalem and the East Mission on June 15 at Church House. He does not think that the Egyptians will be capable for generations to come of governing their own country without British advice.

A marriage has been arranged between Lieut.-Colonel Francis Campbell Balfour, C.I.E., M.C., Military Governor of Baghdad, eldest son of the late Colonel Eustace Balfour and of Lady Frances Balfour, and the Hon. Phyllis Goschen, elder daughter of Viscount and Viscountess Goschen.

Mr. Israel Cohen has been entrusted by the Executive of the Zionist Organisation with a mission to the Jewish communities in Australasia, India, and the Far East, and left England on May 16 for a few weeks' visit to Palestine, in order to obtain first-hand information of the country's developments and needs.

A marriage has been arranged, to take place at Gulmarg, Kashmir in September, between Major R. D. Alexander (late A.D.C. to the Viceroy in India, and now head of the Imperial Service Troops in Kashmir) and Hilda, daughter of the late John Frederic Wright and Mrs. Wright, of Frimley Hall, Surrey.

A Thé Musicale will be held in aid of the National Memorial to Dr. Elsie Inglis, by permission of Lady (Ian) Hamilton, at 1, Hyde Park Gardens, W., on June 8, at 3.30 p.m., under the patronage of the Duchess of Atholl, Lady Arrol, Lord Balfour of Burleigh, Lady Bertha Dawkins, M. Dimitrievitch, Lady (Almeric) FitzRoy, Mrs. Gerald Moxon, and Miss Beatrice Osmond.

A Supplement to the *Gazette* of May 18 contains the names of officers and men who have been brought to the notice of the Secretary of State for War for services rendered in connection with the military operations on the North-West Frontier of India and in East and South Persia. The list includes the names of His Highness Beglar Begi Mir Sir Mahmud Khan, Wali of Kalat, and Lieutenant-General R. Wapshare (formerly Indian Army).

APPOINTMENTS, ETC.

Major C. Stefanescu-Draganesti has been appointed Aide-de-Camp to Prince Nicolas of Roumania and Assistant Military Attaché to the Roumanian Legation.

APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

NEWS IN BRIEF.

A Roumanian Commission will be sent to Budapest, under the leadership of M. Th. Mihalyi, with the task of settling the pending questions between Roumania and Hungary.

The report of the occupation of Tiflis by the Bolshevists is denied in Constantinople.

Ordinances have been issued by the Rector of the El Azhar University, Cairo, to the students, to refrain from political demonstrations during the fast of Ramadan.

A chair for Albanian has been established at Paris, and Professor Mario Roques is its first occupant.

A delegation of 70 well-known Montenegrins, representing the population of Montenegro, had an audience with the Prince Regent in the presence of M. Protitch, the Prime Minister, and obtained assurances that as far as possible no vital interest of the patriotic populations shall be neglected.

Lord Plumer has summoned all elected members (including the President) of the National Assembly and other influential citizens, warned them against a repetition of the disturbances of June last, and asked them to use their influence to calm the people on the occasion of the anniversary of the event.

Delegates to the International Commission of the Y.W.C.A., to be held at Champery, Switzerland, from June 3 to 10, are expected from every land where Y.W.C.A. organisations exist. For the first time Czecho-Slovakia, Poland, and Roumania will have delegates present.

President Wilson has asked Congress for authority for the United States to accept a mandate for Armenia.

The Egyptian delegation has decided, consequent upon the invitation made by the Milner Mission for them to go to London, to send Mohamud Pasha, Aziz Fahmi Bey, and Aly Maher Bey to ascertain the intentions of Great Britain in regard to Egyptian aspirations relative to complete independence.

French troops are reported to have captured a strong position to the South of Taza, in Morocco, after a violent fight with a force of the Beni Warain tribe.

It has been announced in Parliament that vacancies will occur this year in the Executive Council of the Viceroy, and that the number of Indian members of the Council will be raised to three, under the Act of last year.

The Nile Commission was to have opened its public sittings in Cairo on May 25.

Thirteen robbers who formed part of the band which carried out the *coup de main* on the French liner Souirah in the Black Sea on May 12, have been arrested by the Turkish authorities. They will be sent to Constantinople for trial.

The Greek Minister of Religion is laying before the Chamber a Bill officially recognising the Jewish community of Salonika as the chief Jewish authority in Greece.

Jerusalem messages report that the British authorities in Palestine have banned the convocation of the Jewish Executive Assembly arranged for May 26, and that the Arab Congress has been forbidden for military reasons.

The Bulgarians by whom the Sofia Government replaced the Greeks whom they deported from the regions of Sufli and Dedeagatch during the war, are now returning to their homes in Bulgaria.
