Forbear in your wisdom to occupy these regions that the treaty allows you. Let this be the earnest of your resolves in the direction of Balkan peace. If you fear the disbanded army of Bulgaria, you have your allies, Hellas and Roumania, at your back; if you have no confidence in them, seek others. Even if the friendship of Bulgaria mean nothing to you now, it cannot be denied that they *are* nearer to you in blood than your present allies, and blood *is* thicker than treaty ink. Did not Michael Obrenovitch in 1867 plan a Yugoslav Confederacy that should include the Bulgars also? With Bulgarian friendship you need have no fear of Arnaouts, of Magyars seeking for revenge, of Italian encroachments in Illyria. With Bulgaria further dismembered, her shrunken kingdom filled with exiles full of resentment, you will be well-nigh surrounded by foes.

What will be the consequences of the acquisition of Tsaribrod and Basilograd—your "pound of flesh"?

Like Uskub and other Macedonian towns, the inhabitants would probably vote Communist in protest. The number of refugees in Bulgaria from Thrace, Macedonia, the Dobruja, and "White" Russia would be augmented, and it is by no means certain that the moderate "Agrarian" Ministry of M. Stambolisky might not be overthrown and a Communistic system take its place.

An act of generosity on your part, on the other hand, would act incalculably to your advantage. It would be an expression of goodwill more potent than mere diplomatic phrases that would leave your Eastern frontier quite secure. With Bulgarian goodwill your legitimate national aspirations in Slovenia and Dalmatia are far more likely of accomplishment, and the poet bandit's ephemeral sway at Rieka would be sooner ended. Your internal difficulties, which in a new state are only natural, would be greatly relieved by this act of magnanimity, and would show the world that the prospects of a "League of Nations" are not merely visionary.

You have your friendships with Czecho-Slovakia, Hellas, Poland, and Roumania. The Little Entente alone is an insurance against Bulgarian malevolence. Besides, the clique that wrought your ruin in 1915 is proscribed by their own fellow-countrymen and in exile and prison. Brighter days are dawning for the Balkan Peninsula. Let the first proof of international comity come from Serbia, whose losses in the war exceeded those of any other state in proportion. If you should listen to this appeal from a sincere friend and admirer of your race, one cannot help feeling that the cause of peace will have been infinitely advanced.

## A TURKISH DISH.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—None of your correspondents appear to be correct in their versions as to the origin of the name of the dish known as "Imam Baildi," a delicacy which is very much appreciated by "gourmets" and all who have lived in Constantinople. You may take it that the following is the correct version:—

On the eve of the great festival of the Bairam a certain Imam brought into his house a supply of olive oil, which he intended to use that night in lighting the oil lamps in the mosque over which he presided. Meanwhile, his good wife, wishing to please her husband on this festive occasion, decided to prepare a special dish of "Patlijan" (not "badinjan"), which is prepared by the goodly use of garlic, onions, tomatoes, and a profuse quantity of oil. Finding that she had not got a sufficient quantity of oil in the house, she used up the supply her husband had brought in After partaking of a hearty meal, which the Imam pronounced to be delicious, he observed to his wife that he had better proceed with the lighting of the lamps in the mosque, but to his dismay he found that his wife had used up the supply of oil to prepare the dish of Patlijan. This so much upset him that he fainted away.

I think your correspondent, "M. N. B.," cannot cite his authority for stating that Mohammed ordered his followers not to eat garlic and onions. Whilst on this point, it may interest "M. N. B." as well as some of your readers to know that garlic is very much used in the Near East for medicinal purposes, and I can positively state that an English doctor (now deceased) often recommended the consumption of a clove or two of garlic on rising in the morning, preferably to taking a dose of salts.

Another Turkish dish which is prepared with the "Patlijan" is that known as 'Hunkiar Beyendi" or "Sovereign's Delight."

—I am, etc., ALFRED C. SILLEY.

### The Middle East.

Upon the important speech which Lord Curzon recently delivered before the Central Asian Society, *The Times*, of October 14, builds a leading article, in which it states that "the alarming policy advocated by the Foreign Secretary will bring not peace but a sword." It proceeds in the same critical vein:—

What sort of an "islet" has this policy made in Mesopotamia? Instead of keeping order, the very presence of a large army of occupation and of hundreds of unwanted British officials has provoked a rising. Lord Curzon says that he has sincerely advocated the setting up of "an Arab form of administration" in Mesopotamia, but three or four months ago he was telling the House of Lords that competent Arab administrators were unobtainable. The reason generally assigned for these experimental adventures in the Orient is that the security of India demands that we should poke a stick into every hornet's nest between the Bosphorus and the Hindu Kush. As a matter of fact, it is imperatively necessary, in the interests of the security of India, that the Army of India should once more be concentrated within her borders. We are imperilling the stability of British rule in India by the superfluous responsibilities we are assuming elsewhere in Asia. Does the policy advocated by Lord Curzon commend itself to a single sagacious soldier? Is it sound from the military point of view to dump down isolated garrisons over a great area, with instructions to make "peaceful spaces in the chaos," like the putting-greens on a rough golf course? We have seen one British force in Meshed, another in the Elburz mountains, another in the Bakhtiari wilds, and yet others in the Kurdistan hills. This is the "islet" policy in practice, and in the end it means either permanent expansion or disaster. There is no halfway house in these international police enterprises. They invariably reach a point at which a choice must be made between complete occupation or evacuation. We have now arrived at this point in Mesopotamia, and it is time to put into practice Lord Curzon's dictum, in which we entirely concur, that the British Empire "in Central Asia" cannot be further expanded.

### The Little Entente.

The main article of the *New Europe* of October 14 consists of a careful and complete survey of the "Little Entente." It is written by Dr. Seton-Watson, and bears all his enthusiasm for new nationalities. Speaking of Czecho-Slovakia, "her main need," he says, "is peace and internal consolidation, based upon intimate relations with the West and with any 'possible' Russia, upon scrupulously correct relations with her former enemies, and upon co-operation with her colleagues in the 'Austrian succession.'" But, he points out, "the success of such a policy depends upon acceptance of the new *status quo* by all the neighbouring States." And he proceeds to discuss the various intrigues which, he states, are being carried on against the Little Entente. He concludes with a suggestion of an extension of the Little Entente, noting, incidentally, the difficulties of the admission of Poland—desired by M. Jonescu—into terms of intimacy with Prague, Bucharest, and Belgrade.

The inclusion of Greece presents fewer difficulties, though her friends are haunted by the fear lest the great statesman who conducts her affairs may leave no successors equal to the strenuous task which he has set them. In Belgrade true statesmanship, while steadfastly friendly to the Greece of Mr. Venizelos, will realise that the cruel memories of an all-too-recent past must not be allowed to stand in the way of a new era of co-operation in the Balkan Peninsula. Bulgaria, after a period of sullen intrigue against the victors, has fallen into new and vigorous hands; and her peasant Premier, Mr. Stambuliski, is not afraid to repudiate the crimes of past régimes, to weed out the old elements in the army and the bureaucracy, and to proclaim openly his belief in Bulgaria as part of a Jugoslav confederation. The reconciliation of Bulgar and Serb is a task worthy of the highest statesmanship; and President Masaryk, whose efforts at mediation before the Great War were thwarted by the deliberate policy of Vienna, should not find it beyond his powers under the altered circumstances of to-day, and with so able a helper as Dr. Benes. Clearly it is an eminent interest of Czecho-Slovakia that her chief ally, Jugoslavia, should not be weakened by the presence of a hostile kinsman at her elbow. But though old animosities die hard, and there is much to forgive, it is reassuring to note that both in Belgrade and in Bucharest their idea of reconciliation is steadily gaining ground. It still remains to be seen whether Bulgaria will be ready to accept the essential preliminary to any arrangement and to pledge herself to respect the new Greek frontiers as laid down by the Paris treaties. This would, it is to be hoped, lead to concessions by Roumania in the Dobrodgea, and to Serbia's restoration of Tsaribrod, which at present serves no purpose save that of envenoming the old feud.

Even more desirable, in our opinion, is the inclusion of Austria, who, despite more than one cause of friction, has essentially the same interests as the three confederates in checking Hungary and preventing a monarchist reaction, and who has neither the desire nor the capacity for renewed aggression. It is open to argument whether any measures can arrest the process which urges the hapless Austrian torso towards union with Germany: but it is at least certain that the sole possible alternative is its prompt inclusion in the Little Entente, and the extension of commercial facilities by each of the other three States. But the position of Austria requires separate and more detailed treatment.

The whole preceding argument rests on the assumption that Hungary is the last State to be invited or included. This follows logically from the fact that Hungary is the main centre of reactionary intrigue in Europe to-day, and has allied herself with every element which desires the overthrow of the new order. Those who are at present in power at Budapest have learnt nothing from the war, and really cordial relations between them and the four neighbouring States are well-nigh impossible. All that can be hoped for is that close co-operation on the part of the four will at length convince the Magyar people of the hopelessness of restoring the old "Millenary" State of Hungary, and that new classes of the population will assert their control. Only then shall we see the final stage in that process of consolidation on the Middle and Lower Danube of which the Little Entente in its present form is the prelude.

The Little Entente is, necessarily, the enemy of adventure and aggression, because each of its members is (to use the vile but expressive phrase of Count Aehrenthal) nationally "saturated," and, above all, interested in maintaining the *status quo*. It has every interest in furthering the ideas of disarmament and of the League of Nations, just as its enemies are chiefly concerned to challenge the new order and perpetuate disorder. So far from resting upon a Balance of Power, it is a bold attempt to emancipate South-Eastern Europe from the tyranny of that idea, and to substitute a grouping which will be irresistible just because its basis is realism and its main aims accord fairly with the democratic ideals of the age. For these and many other reasons it represents a political development which can hardly fail to win the sympathy and active support of British statesmanship.

### Articles to Note.

"The Mandate for Armenia I.," by Major-General James G. Harbord in *World's Work* (September).

"Mesopotamia and Persia," by Robert Machray, in the *Fortnightly Review* (October).

"Great Britain, Palestine, and the Jews," by the Hon. W. Ormsby-Gore, M.P., in the *Nineteenth Century* (October).

## HOARDINGS IN PALESTINE.

The *Palestine Weekly* states that timely measures have been taken in Palestine to prevent the country from being disfigured by unsightly advertisements. The Government has issued an ordinance regulating the exhibition of advertisements and the use of hoardings. The ordinance allows a District Governor or municipality to set up special hoardings, on which all public and general notices and advertisements may be exhibited. Advertisements may be exhibited on trader's premises, but power is taken to regulate the form and size of such displays. The erection of private hoardings and the affixing of advertisements in any place except the actual premises in which the business, calling, or entertainment advertised is carried on, is prohibited.

The October *Quarterly Statement* of the Palestine Exploration Fund contains an article by Dr. E. W. G. Masterman on "The Water Supply of Damascus," and one on "The Red Sea (*Yam Suph*)," by the late Joseph Offord. Professor Garstang contributes a short but interesting note on "The Walls of Gaza," concluding with the statement that it seems to be established that "the town Gaza really occupies the site of the historical fenced city of antiquity." Mr. L. M. Angus has an article, illustrated with a plan and photographs, on "Roman Remains at Deir-el-Kala, Lebanon," and the Rev. Professor George Buchanan Gray writes on "Crocodiles in Palestine," reaching the conclusion—satisfactory or the reverse, according to one's point of view—that we may yet obtain evidence that crocodiles do still exist in the country.

# MUSICAL NOTES.

### Signor Giorgio Corrado.

The passport to popularity with the English public can probably be obtained more easily by an Italian singer than by an artist of any other nationality. He has only to have a voice, and the stock in trade of his race will do the rest. Now Signor Corrado, who sprang at a bound into popularity here last season, has a magnificent baritone voice, and, whatever he does with it, there are always many, merely on account of its volume, to applaud him. But at the Æolian Hall on October 11 he was a great disappointment to me. Two arie from Verdi's "Rigoletto" he sang with great fervour and intensity; and in a monologue from Ponchielli's "La Gioconda" his dramatic sense was fully proved. In the vivid and the passionate there is no doubt that he excels, but if any part of singing is less important than another it is the passionate. When Signor Corrado sang some songs in English, a language which he pronounces adequately but the subtleties of which he scarcely appreciates, his interpretative gifts were at a discount, for his three songs—a setting of Stevenson's "Requiem" (the wreck of countless song-writers) by Harold Craxton, a minor setting by John Ireland of some minor verse by T. L. Beddoes, and Coleridge-Taylor's sentimental "Life and Death"—were quite unworthy of his fine voice. Of his Danish songs only one —"Hvis du har varme Tanker" by Borresen—succeeded: the others, very Northern products, were treated in the warm, Southern way. He ended with Federigo Corrado's wearying "Serenata," and a rendering, in which clearness by no means dominated, of Rossini's "Largo al Factotum." Signor Corrado's reputation was not enhanced by this recital. That he can do better than this I do not doubt; but to preserve his fame he must improve in his choice of songs and in his interpretation, as distinct from his mere singing, of them.

### A Manchester Pianist.

London is often derided by the de-capitalised as being devoid of musical taste, and such scoffers, who yet maintain that England has a real love of music, always point to Manchester as the town in which all good things are done. But it is often true that when artists go from London to Manchester they overcome it, and that when they reverse the route they find the return journey a little tedious. Now Mr. Frank Merrick, who gave a pianoforte recital at the Wigmore Hall on October 12, is regarded as a prophet in his own town of Manchester; and one may say at once that this regard has not been ill-bestowed. He has been known for years as an exponent, or an incurable disciple (whichever you will), of Max Reger, and in a fury of enthusiasm he lashed out at the beginning of his recital into the "Introduction, Passacaglia and Fugue for Two Pianofortes" of the little Bach. He was assisted in this by Mrs. Hope Squire—a careful, happy, and quite merciful combination. I heard only part of the Passacaglia and the Fugue, and, though I was intensely interested, it was enough. It was well played, if rather academically; and, apart from its enormous length which necessitated very considerable and curious headwork from the audience, justified its interpreters in their obvious love for it. But Mr. Merrick takes only the long view of things, for, not sparing his listeners, he proceeded to play *five* extracts from "Goyescas" of Granados. Two of these would have been sufficient, and as a matter of fact only two were worth playing: the others, simply steeped in Spanish rhythm, were too seducing altogether. John Ireland's new Sonata, which was introduced by Lamond last season, was the last thing of the programme. It is not a highly appreciated work, but after Reger and Granados I liked it much. The first movement is particularly good. Mr. Merrick seemed to play the sonata too neatly: he lightened its heavy harmonic colouring, and smoothed over its rough edges. Ireland is like the later Sibelius in his strong, honest, uncouthness, and, whether you consider it a strength or a weakness, it cannot be removed from him without a weakening of his personality. Mr. Merrick, whose chief virtue is clarity, under-estimated the real obscurity of this sonata, and made Ireland appear as an apostle of light.

### British Song.

There have been two recitals of British song this week, both at the Æolian Hall, on October 14 and 15 respectively. At the first, Mr. John Buckley's, most of the songs were well known, and the majority well chosen. Out of twenty-four songs, seventeen good songs are as many as anyone can expect. Mr. Buckley is an intelligent singer, who would be much better than he is but for the fact that he often gives more importance to the words than to the music. This fault was most prominent in his folk-songs—songs in which the conservation of the rhythm is the first and last thing to remember—for by illustrating vocally the worth of each word and phase he outraged the unity of the whole design. But in more modern songs a sensitive use of word-painting was made with good effect: it was present in such good songs as "An Evening Confession," by H. Rhodes; "The Recruiting Sergeant," by Julius Harrison (a very fine song); and Peter Warlock's "My Gostly Fader." Mr. Buckley has possibilities, but his style is developing on popular lines, and if he, with such good enunciation and intelligence, becomes merely a successful ballad-singer, it will be a great pity.

Singers of English songs may be divided into two groups—those who sing them because of the difficulties of overcoming an English pronunciation of other languages, and those who whole-heartedly love them and believe in their future. To this second class belongs Miss Ursula Greville, who, with Signor Giorgio Corrado, gave a recital of songs published by Messrs. Curwen on October 15. Unfortunately for the aim of this concert—the popularisation of new British songs—there was between Miss Greville's singing and Signor Corrado's no comparison. Not only were Miss Greville's songs better in themselves, but they were infinitely better sung. Of her fourteen songs three were excellent, and perfectly sung: "Immanence" by Rutland Boughton, "An Inconsequent Ballad" by J. G. Williams, and "She comes not when Noon is on the Roses" by Julius Harrison. Others of less value but very delightful were Paul Edmonds' setting of Padraic Colum's "Mantle of Blue," W. G. Whittaker's "Dream Song," and songs by Martin Shaw and John Ireland. Miss Greville sang beautifully and very sensitively; she has a liking for light songs—I mean things about fairies, and children, and love—in fact, about all such credible nonsense, but her interpretations of songs of deeper and of more spiritual import are equally convincing and finished. She is one of those rare sopranos whose technical efficiency is the least of her claims to the regard of the musical; and at the present time there is no young singer in London who is as enterprising and as interesting as she.

Of Signor Corrado's part in the concert it is scarcely fair to say much. As I have noted above, his voice has not mastered the rhythmic beauties and properties of English verse. His singing was a compliment to British song, but it was not a conquest. He was unlucky, too, in his choice of songs; for it was not his deficiencies that made the immortality of such names as E. Roy Thompson and F. Bennicke Hart appear uncertain.

But this concert did achieve three things. It proved, first, the courageous enterprise of at least one English musical publishing firm, Messrs. Curwen, who are as determined that the English song-writer has a future and shall have his chance as they are convinced that he deserves it; it proved, secondly, that Miss Greville is a most worthy populariser of this new enterprise; and it proved, finally, what I should have mentioned before, the existence of a very skilful accompanist, Mr. Owen Mase. There was only one song—Boughton's "Immanence"—the atmosphere of which he did not quite suggest. He deserved much more praise than I have given him.

### The British Symphony Orchestra.

The best orchestra in England at the present time is probably the London Symphony Orchestra, but a new band, under Mr. Adrian Boult, the British Symphony Orchestra, which appeared at the Quinlan concert given at the Kingsway Hall on October 16, is going to rival it. This orchestra, composed wholly, I believe, of ex-Service men, is extraordinarily good in its strings, and under Mr. Boult, the ablest of our young conductors, and a stern disciplinarian, whose readings, nevertheless, are full of insight, will surely become an excellent body. Their playing of Bach's third Brandenburg concerto, apart from a certain brilliant hardness in the quality of the violins equalled that of any orchestra I have heard; and in accompanying M. Vladimir Rosing, the Russian tenor, in some extracts from Tchaikowsky and Rimsky-Korsakoff, they played with beautiful discretion. Their performance of Tchaikowsky's fifth Symphony was broad and finished; but it showed the weakness of their brass, and the absolute necessity for improving their horns, which really bubbled with errors.

M. Rosing, who sang mostly in Russian, was in his intensest mood. In Russian song I know of no one to equal him; with all his posing, his hysterical attitudes and sounds, his vain effects, there is no one to approach him in Russian music. To hear him in Lensky's Farewell (Tchaikowsky's "Eugene Oniegin") or in Leoko's Air from Rimsky-Korsakoff's "Night of May," is really to know something of the soul of the Slav. He is a great artist and often a great singer as well.

Mlle. René Chemet, the French violinist, who was the other "star" turn at this concert (this series of Quinlan concerts is to be a return to the "star" system of singers and instrumentalists), played only in Lalo's Concerto in F minor. It is not a great work, though the first movement in particular is ingeniously and often beautifully scored. Mlle. Chemet is, of course, an exceedingly fine player, full of resource and originality, but never sacrificing anything to the spirit of the whole. Her performance was practically perfect.

ANDANTE.

# NEAR EAST BOOKSHELF.

I.—"EX-KING CONSTANTINE AND THE WAR." By Major G.M. Melas. (London: Hutchinson and Co. 12s. 6d.)

II.—"THE DEATH OF CLEOPATRA." By James A. Mackereth. (London: Longmans Green and Co. 3s. 6d. net.)

## I.—EX-KING CONSTANTINE.

The world is a little tired of ex-King Constantine, and a reader might be forgiven for taking up somewhat wearily Major George Melas' book, quite apart from the doubtful taste of a private secretary's "revelations." But it is impossible to read it through without being convinced, if one has the least acquaintance of the position in Greece to-day, that the author has done some service to his country by making public the facts within his knowledge. Major Melas was for many years Private Secretary and a close personal friend of King Constantine, and those who know him or of him will confirm the impression given by the book itself that it has gone against the grain to unmask so completely the man whom he had served so faithfully. He had given orders that, in the event of his death during the war, nothing that he had written should be published until twenty-five years later. He has been moved to cancel his intention himself mainly as a result of the "recent odious plot" against M. Venizelos and the nation. A true friend of Greece cannot fail to regret the present cleavage in the country, and to many a foreigner it would seem at first sight, and without any profound knowledge of the facts, a simple solution to adopt a policy of letting bygones be bygones, and of recommending a reconciliation between the ex-King and M. Venizelos. Major Melas' book proves not only the impossibility of such a course, but also its undesirability. His portraiture of the ex-King is convincing in itself, and it is entirely borne out by the latter's actions in exile. So much has happened since King Constantine left Greece that a broader-minded man, and one with a genuine affection for or interest in Greece, would have found ample opportunity to put himself right with the country, and in particular with M. Venizelos. But hatred of "the Cretan" is so deep-seated, and the ex-King seems to be so devoid of any pretensions to nobility of character, that he must have disappointed many of those who so firmly believed in him. That he still has followers—and devoted followers—in Greece is true; the mediæval conception that a King can do no wrong dies hard, and it is not difficult for keen politicians in opposition to convince themselves that any state of affairs is better than the government of their opponents. Few, however, we believe, will be able to read Major Melas' volume without having their faith in the ex-King more than a little shaken. King Constantine, no doubt, was placed in an awkward position; Major Melas does not refrain from trouncing the Entente Powers for their gross mishandling of the Greek situation; but the King came to grief through his own foolish actions, which were the outcome of a weak character and sheer ineptitude.

By no means the least interesting chapter in the book is the one that gives brief sketches of the Entente representatives in Athens. King Constantine was at heart what is known in common parlance as "a good sort." He was essentially of a sociable nature, and his predilections were towards the British rather than towards the Germans. But at the most critical period, as Major Melas points out, he was practically cut off from intercourse with the British Legation by the diffidence of our representative. As Crown Prince, twenty years previously, he had often been given in the same building what he would probably have described as the time of his life—certainly the best dinners he ever had in Greece in those days. Often the invitation was a verbal one. At the time when similar relations between the Palace and the Legation would have been invaluable the British Minister, we learn from Major Melas, was "shy and a very silent man," and the Legation had to be pressed by a Court official to extend hospitality to a King who liked nothing better than being invited out. The French representative was even worse: "He detested Courts. He was at such small pains to hide his aversion for kings in general, that he rendered his relations with the Court, even though official, very difficult." Fortunately, Great Britain could not be better represented in Greece than she is to-day; but the lesson afforded by Athens and Sofia before the war suggests that something more than efficiency, according to Foreign Office text-books, is required of those who represent Great Britain in foreign capitals.

To those who want to understand in part the position in Greece to-day we may commend the private letters which the author wrote when at the front. In one occurs the following passage: "For my part, I shall not return to Athens until I am sure that the heads of traitors will fall and that their worthy furies will be horsewhipped in the market place." It is an evil day when a nation is divided into two factions nursing such sentiments towards one another. That this spirit still prevails is proved by the recent death of Jean Dragoumis, to whom Major Melas refers in terms that are altogether at variance with the tribute paid to his memory by M. Venizelos.

## II.—CLEOPATRA.

In an introduction to his small book of verse the author explains the nature of the Cleopatra of his imagination—"to her, a pagan queen, power was law to itself, it could dispense with all conventions and gratify every impulse with impunity, flattered the while by the smile of sycophants, and superficially approved by the humble acquiescence of slaves. . . . It was the persistent and complex femininity of the woman which attracted me." The poem itself describes convincingly enough the external might and outlook of Cleopatra, but it scarcely succeeds in its attempt to present the queen as an example of complex psychology. It consists of a dialogue between Cleopatra and her woman, Charmian, which shows the irrevocable and insatiable love of the queen for Antonius, who at the end is made to enter her room soon after she has poisoned herself. (The author attributes the putting of an adder to the breast to Charmian, who slavishly follows her queen to death.)

There is a certain impulse about the verse; it moves all the time, and preserves throughout an undeniable dignity. But much of the language (blank verse) in which Cleopatra speaks is derivative, and some of the songs which Charmian is bidden to sing are made on a rather effete pattern. Reading of Shakespeare surely created such lines as these:—

> If there be powers that in this secret world
> Move and remember and have need o. men,
> Oh, touch me from the dark if the dead live!
> And if the living languish speak to me!—
> Out of the eerie silence speak!

And would not Tennyson smile if he could read of "Fountain-voices feebly falling," or the "Liquid lisp of loitering waters"? We had thought that alliteration as a device was dead for this generation at any rate.

The second half of the book contains some poems written more or less in the style of Barham, Burns, and Wordsworth, and one feels that the author in choosing models which certainly are good enough has been prompted rather to imitation than inspiration. But his verse makes pleasant, if not moving, reading.

F. H. S.

Sir Logie Watson leaves England for India to-day.

Sir Valentine Chirol left London on October 15 for India.

Admiral Sir E. Troubridge is expected to arrive at Prague on October 23.

General Bridges and the British Military Mission have left Smyrna.

M. Gugushvili, First Secretary to the Georgian Legation, returned to London on October 15 from The Hague.

M. Alexander Broz, specially attached to the Czecho-Slovak Legation, has returned to London from Prague.

The latest bulletins available as we go to press state that the condition of King Alexander of Greece is very grave.

Mr. Bonar Law will unveil a memorial window given by India to the Highlanders' Memorial Church, Glasgow, to-day.

An Anglo-Czech service will be held in Christ Church, Westminster Bridge Road, S.E.1, at 3.30 p.m. on October 24.

Mrs. Blanche Tufnell, who is Secretary of the Anglo-Czech Society of Great Britain, is paying her first visit to Prague.

Lady Helen Brocklehurst left London on October 17 for Italy on her way to Egypt, where she will remain for four months.

The Crown Prince of the Kingdom of Serbs, Croats, and Slovenes has bestowed upon the Lord Mayor the Order of St. Sava (1st Class).

It is understood that Cambridge University is to confer the degree of LL.D. *honoris causa* upon Sir George Abraham Grierson, K.C.I.E

Dr. Dusan Resetar, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has returned to London.

The Rev. W. Plant, vicar of Potterspury, is resigning the benefice in November to take up the incumbency of the Old Mission Church, Calcutta.

M. G. Roussos, the Greek Ambassador at Washington, and recently appointed High Commissioner at Paris, passed through Paris on September 28, *en route* for Athens.

The King has given unrestricted permission to Temp. Capt. H. C. de J. du Vallon, W. Yorks R., to wear the decoration of the Order of the White Eagle (Serbia), 5th Class.

Prince Firouz, until lately Minister for Foreign Affairs in Persia, has arrived in London for a few days on private business. He will return to Persia on the Narkunda, sailing on October 29.

The *Progrès* of October 6 announces the nomination of M. Nicolas B. Cantacuzène as Roumanian Minister at Vienna, and of M. Constantin G. Nano as Roumanian Minister at Berlin.

Our Belgrade Correspondent writes (October 9):—The British Military Attaché and his wife, Brig.-General Hoare-Nairne and Mrs. Hoare-Nairne have arrived in Belgrade from Athens.

General Lyautey has made a solemn entry into Wazzan, where he was received enthusiastically by the population. It has since been announced that the Government has promoted him to be a Marshal of France.

The Portuguese Minister has been awarded by the Prince Regent of Serbia the Grand Cross, First Class, of St. Sava. The Serbian Minister personally handed the insignia to Senhor Texeira Gomes at the Portuguese Legation.

Lord Sinha, Governor-designate of Bihar and Orissa, has selected as his private secretary Mr. P. J. Patrick, of the India Office, who was recently serving him in the same capacity during his Under-Secretaryship for India.

Lord Inchcape consented to preside at the luncheon given to Sir William Meyer, India's first High Commissioner, by the Over-Seas Club and Patriotic League at the Connaught Rooms on October 20.

Dr. V. Mastny, the new Envoy Extraordinary and Minister Plenipotentiary of the Czecho-Slovak Republic to the Court of St. James, with Madame Mastny, arrived in London on October 15 from Prague.

Major Somerset, formerly chief assistant to Colonel Lawrence, has arrived, says the *Zionist Bulletin*, in Irbid Ajlun, to meet some of the chief Sheikhs. He will serve there as local adviser, receiving instructions from the central Government in Jerusalem.

One hundred and seventy members of the United Service Club gave a farewell banquet at Simla, on October 15, to the Viceroy, Lord Chelmsford. The Lieutenant-Governor of the Punjab, Sir E. D. Maclagan, and General Sir Charles Munro, the Commander-in-Chief, were among the guests.

An engagement is announced, and the marriage will take place early in the spring, between John Scott, M.B., Ch.B., Department of Public Health, Egyptian Civil Service, and Flores, youngest daughter of the late Howard Chatfeild Clarke, F.R.I.B.A. (P.P.), and Mrs. Howard Chatfeild Clarke (formerly of Inverness Terrace, W.), South Kensington Hotel, Queen's Gate Terrace, S.W.7.

Our Belgrade Correspondent writes:—
Mrs. MacGrath has returned with her children.
Mr. André Gasner has arrived for a few days.
Mr. Hwyfa Wyndham-Jones has left for London.
Dr. Momchilo Ninchitch, Minister of Commerce, and formerly of Finance, will replace M. Pashitch as Delegate with Dr. Trumbitch in the direct negotiations with Italy.

The first of a series of lectures arranged by the Egypt Exploration Society will be given by Professor Newberry on Thursday, October 28, at 8.30 p.m. The subject will be "Tell el-Amarna, the Predecessors of Akhenaten and the Influence of Thebes and Heliopolis on the Art and Religion of the Heretic City." Tickets can be obtained gratis (if stamps are enclosed for postage) on application to the Secretary, Egypt Exploration Society, 13, Tavistock Square, W.C.1.

Monsieur Take Jonescu was entertained to luncheon at the Thatched House Club by a number of friends on Tuesday, Oct. 19. The company included Monsieur Titulesco, Roumanian Minister of Finance; Monsieur Borescu, Minister Plenipotentiary and Chargé d'Affaires; Monsieur Stoicescu, Roumanian Minister in Paris; Sir Charles Stewart-Wilson, Sir Robert Waley Cohen, Sir Albert Stern, Sir Frederick Black, Mr. C. T. Allen, Mr. A. G. M. Dickson, Mr. E. W. H. Barry, and Mr. H. T. Montague Bell.

The King has given unrestricted permission to wear the following decorations and medals awarded to the British Forces for distinguished services rendered during the course of the campaign:—

Order of the White Eagle, with Swords (Serbia).—1st Class.—F.-M. Sir H. H. Wilson, Bt., G.C.B., D.S.O. 2nd Class: Lt.-Gen. Sir F. J. Davies, K.C.B., K.C.M.G., K.C.V.O.; Maj.-Gen. Sir G. P. T. Feilding, K.C.B., K.C.V.O., C.M.G., D.S.O.; Col. H. Gordon, C.B., C.M.G., D.S.O.; Maj.-Gen. Sir C. H. Harington, K.C.B., D.S.O.; Maj.-Gen. Sir A. L. Lynden-Bell, K.C.B., K.C.M.G.; Maj.-Gen. Sir P. P. de B. Radcliffe, K.C.M.G., C.B., D.S.O.; Maj.-Gen. Sir W. Thwaites, K.C.M.G., C.B.

In addition to the above names, there is a long list of those who have gained the 3rd, 4th, and 5th Classes of the Order of the White Eagle, with Swords (Serbia), the 3rd, 4th, and 5th Classes of the Order of the White Eagle (Serbia), and the 3rd, 4th, and 5th Classes of the Order of St. Sava (Serbia).

Eight Canadian nursing sisters, all of whom served in the Great War (says *Canada*) will sail from Montreal on November 5 for hospital and nursing school duty in Roumania. The Mission has been arranged by Madame Pantazzi (formerly Miss Ethel Greening), who is herself a Canadian. At its head is Miss Dorothy Cotton of Mon-

Digitized by Google

treal, a daughter of the late General Cotton and one of the Canadian nurses who served on the staff of Lady Paget's Anglo-Russian Hospital at Petrograd during the early years of the war. She will be accompanied by Miss Jean Graham, superintendent of the Davisville Hospital; Miss Margaret Killmaster, of Brantford; Miss Irene Savage, formerly masseuse at the Christie Street Hospital, Toronto; Miss C. Carter, Port Calborne; Miss Olive Fitzgibbon, of Montreal; Miss Garfield McKay, of Halifax, and Miss Helen Kendall, of Winnipeg.

## APPOINTMENTS, ETC.

M. Tusar, the Czecho-Slovak ex-Premier, has been appointed Czech Minister to Berlin.

The King has been pleased to approve the appointment of Mr. Philip Lindsay Buckland, barrister-at-law, to be a Puisne Judge of the Calcutta High Court in succession to Sir Ernest Fletcher, who is retiring from the Bench in November.

His Majesty has also approved the appointment of Diwan Bahadur Cheruvari Krishnan, barrister-at-law, and Mr. Vepa Ramesam Pantulu, to be Puisne Judges of the Madras High Court in succession to Mr. Justice Bakewell and Mr. Justice Seshagiri Ayyar respectively.

The King has approved the appointment of Sir Horace Rumbold, at present Minister at Warsaw, to be High Commissioner at Constantinople. On the resumption of diplomatic relations with Turkey, Sir Horace Rumbold will become Ambassador to the Sublime Porte.

## OBITUARY.

The Rev. Edward James Hubbard, senior chaplain, Bengal Ecclesiastical Establishment, died at Nice on October 13 in his ninety-fourth year. He took his degree from St. John's College, Cambridge, in 1851, and worked in India for twenty-five years.

The death at Cettigne of Mitrofan Ban, who was for many years the Metropolitan of Montenegro, is announced in a message from the *Morning Post* Rome correspondent. Since Prince Danilo in 1852 abolished the theocratic system by which the Prince of Montenegro was also its Bishop, Montenegrin rulers have carefully chosen their Metropolitans outside the leading local families. The main object of this was to avoid having two "Kings of Brentford" on the throne. Mitrofan Ban, however, was more of a personality than his predecessor. His age was seventy-six.

## NEWS IN BRIEF.

Two thousand eight hundred Russian soldiers have arrived at Odessa from France.

Nasib Bey el Bakri, a native of Damascus, has been proposed by his party as a candidate for the Syrian princehood.

Military, economic, financial, commercial, and railway agreements have been concluded between the Azerbaijan Republic and Soviet Russia.

Mr. "Pussyfoot" Johnson, when addressing a meeting at Edinburgh recently, announced that he would be leaving for India next month.

Cicurel's, the largest haberdashers' stores in Cairo, has been completely gutted by fire, the damage being estimated at from £250,000 to £500,000.

M. Clemenceau has arrived at Colombo, and has gone on a combined motoring and big game shooting expedition in the southern province of Ceylon.

Despatches received from General Gouraud, French High Commissioner in Syria, report that the situation in Syria is excellent, while the situation in Cilicia is improving.

Moscow reports that M. Tchitcherin, the Bolshevist Foreign Commissar, has received a wireless message from the Roumanian Premier, in which he states that Roumania is prepared to negotiate for peace.

Nationalist Turks are reported to have confined a large number of Greek refugees and prisoners upon an island in Lake Egerdir, and the American Red Cross has been asked to assist them.

Mr. Vijaraghava Charya, of Madras, an ex-member of the Indian Imperial Legislative Council and a Nationalist, who opposed non-co-operation at the Calcutta Congress, has been elected President of the National Congress to be held at Nagpur in December.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX. LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

## THE EVOLUTION OF THE MIDDLE EAST.

Within a few short years the war has changed Central Asia from a region of mystery and adventurous travel to a land of acute political problems. The experience of the two countries that deliberately adopted a hermit policy towards the world at large does not suggest that Great Britain would find the same attitude, if it could conceivably be adopted in regard to this region, any more successful. But when a British organ that once led public opinion solemnly declares that "we are imperilling the stability of British rule in India by the superfluous responsibilities we are assuming elsewhere in Asia," it may not be out of place to examine the implied policy of retiring within our Indian frontiers and leaving the inhabitants of Central Asia to settle unaided their political problems. In this matter the Bolshevists can at once supply all the information we need. An apt analysis of the present situation in Central Asia was given in the correspondence between Lord Curzon and the Soviet Government; it mentioned the despatch of Bolshevist troops to Persia, the support of a military conspiracy in Asia Minor, the invasion of Khorassan, the marshalling at Tashkent of forces intended for an attack upon British territory or British interests, the organisation of a revolution in Bokhara, and intrigues in Afghanistan aimed at inciting tribal risings on the Indian frontier. Great Britain, like Tibet and Korea, might affect to care for none of these things, and for a time, no doubt, she could remain indifferent, whether in India or at Busreh, which the new body of Little Englanders would still allow her, under protest, to hold. But could it be doubted for a moment that the last state of this vast territory would be infinitely worse than the first, even though the collapse of Bolshevism in Europe removed one active agent of unrest? Russia herself has offered an impressive object-lesson of the folly—whatever be the high-sounding principles that inspired the action—of refusing help to the moderate elements of a State in the initial stages of their conflict with the forces of disintegration. It suited the war-pressed Allies at the time to delegate their responsibilities to a handful of Czecho-Slovak troops; but will anyone question to-day that the effort required then to cope with Bolshevism could have imposed no strain comparable with that entailed in coping with the disasters which the Bolshevists have since inflicted upon the world?

The fatal delay in the settlement of the terms of the Turkish Treaty, for which the responsibility rests with the United States, has involved the British Army of Occupation in Mesopotamia in a brief guerilla campaign with the Arabs. For this reason, apparently, it is being urged in some quarters that a general policy of scuttle must at once be adopted, regardless of the harm, amounting in most cases to havoc, which such action must inevitably occasion. It would have been as logical and as justifiable to denounce the despatch of British troops during the war to Italy and to Salonika as designs upon the integrity of the countries in question as to impute imperialistic designs to Great Britain to-day because it has been found necessary to keep British posts at Kazvin and Meshed. There is no ground for challenging the accuracy of the policy attributed to the British Government by the Secretary of State for Foreign Affairs when he declared that the expansion of the British Empire in Central Asia was at an end, and rightly at an end. Our function in future, he added, was not to absorb territory, but to give security, and to arrange that the evolution to a different and a higher state of things should be easy. Fifty years ago, perhaps, no other method of giving security apart from military occupation would have occurred to anyone. In passing, let it be recalled that the military occupation of India with its three hundred millions entailed a white garrison of sixty-five thousand men, and let us wonder at the mentality of those who would horrify us to-day with the prospect of the financial burden imposed by the necessity of giving security, in the same proportion, to a population of less than twenty millions. But there is to be no question of holding these regions for the British Empire. We are concerned to encompass the defeat of Bolshevism, because it represents in a different guise and sphere as grave a menace as Prussianism; but thereafter the security to be given will be the product of British advice and of the efforts of the peoples themselves, and Great Britain's part will be determined solely by the factor that she alone is on the spot to advise and to help. It is surely a curious moment to select for Britons to be uncertain of themselves, to be doubtful of the teaching of their own consciences, and to shrink from obvious obligations when we are witnessing the consummation of our monumental work in India and in Egypt,

Bolshevism apart, there would seem to be little reason to be appalled even though Central Asia be "seething with agitation." By this time we have become familiar with the disease, and its treatment should not be beyond our capacities. If we have been welcomed as friends in Tibet, we have no need to despair of any other part of Asia. Our success there Lord Curzon attributes largely to the personality of one man; and if the same care in choosing other representatives and officials be exercised, similar results will be attained. But it is essential that British foreign policy in the Middle East should proceed on definite and consistent lines, and not be subjected to the ignorant opportunism that has characterised Great Britain's handling of the Near Eastern problem. Outside of circles where any weapon is used in the service of a vendetta against the present Government no exception will be taken to Lord Curzon's diagnosis of the position, and it will be hoped that nothing will prevent a wise choice of men to whom the task of giving effect to the Government's policy will be entrusted. Persia, in spite of the Anglo-Persian Agreement, continues to be *difficile*: but she has received abundant assurances of Great Britain's desire, now that the old Russian incubus has been removed, to devote herself to the promotion of Persian interests, and to help in the creation of a sovereign and independent State, capable of retaining its independent existence in the world and sustaining the traditions of its past. Afghanistan, having acquired something like independence, has presented a special attraction to Bolshevism; but the danger from that quarter promises to satisfy her that Afghan and British interests still remain identical. As for Mesopotamia, the more immediate object of Little England's attention, Lord Curzon points out that no one could really imagine that any British Government could have any particular interest in spending scores of millions of money, or of keeping a garrison, in that country. What is desired is to fill the gap which has been left by the destruction of the existing form of Government during the war, and which had to be filled by Great Britain because there was no one else to fill it. "It was not a question of painting Mesopotamia red, but of making a stable spot there and of redeeming the country from anarchy."

# SCIENCE AND ADVENTURE IN THE NEAR EAST.

The work of deciphering Egyptian papyri or Babylonian cuneiform tablets is full of interest to those who follow it, and although the popular idea of an Egyptologist or an Assyriologist appears to be that he is a mummified, spectacled old gentleman almost devoid of human emotion, he no doubt gets as many thrills of excitement from this work as does, say, the average "City man." And when to his work in the study the 'ologist adds work in the field as an excavator he is likely to get his full share of adventure; indeed, it is sometimes so very full of it that the "City man" aforesaid would probably be well content to be spared from experiencing it. Sir Wallis Budge, Keeper of the Egyptian and Assyrian Antiquities in the British Museum, is a scholar with an almost terrifying record of work accomplished to his credit, and with an experience of excavating and travel in the countries in which his interests lie that his brother 'ologists might—and do!—envy him. Since neither Egyptology nor Assyriology tends to weaken the power of the Green-eyed Monster over those who follow it, it is not surprising that other excavators and scholars sometimes say hard things of the official keeper of the great treasure house in Bloomsbury—or of that part of it which interests them; and their criticisms of his conclusions are not always favourable; but if they fail to enjoy these two volumes* they must be hard indeed to please. One reader at least who has seen something of excavating work both by Nile and by Tigris, and has been privileged to meet some of the leading "diggers" of several countries, and not a few of the other characters mentioned by Sir Wallis Budge, has found it extraordinarily interesting from start to finish. Here and there, it is true, there are passages that we should prefer to see omitted—pages 300-318 in Volume II., for instance—and the spelling of proper names is frequently exasperating, though it may be perfectly defensible. But the enjoyment afforded by the two volumes is very great, and we look forward to dipping into them again and again.

The book is chiefly concerned with a series of missions undertaken by its author, on behalf of the British Museum, to Egypt and Mesopotamia for the purpose of adding to the collections in the Museum. The first part, however, and by no means the least interesting, gives us some of his recollections of his early days, when he met many of the pioneers of Assyriology. There are, too, a number of excellent stories which will be enjoyed by readers without any taste for either of the 'ologies, such as that of Professor William Wright's parrot, which, in a company consisting of Professors of Divinity and other University bigwigs, used language quite unprofessorial, and finished up by "damning the Minor Prophets." The author adds:—

> This expression by the parrot of his opinion of the Minor Prophets was followed by shouts of laughter, in which the parrot joined. When these had subsided somewhat, Wright, who was one of the Committee of the Revisers of the Bible, who were then actually at work on the Minor Prophets, began hastily to explain that the parrot must have picked up this profane remark from the lad who worked in the garden. . . . But I could never find out that any of his guests on that memorable evening were prepared to accept that explanation unreservedly.

Incidentally, the author shows himself a lover of animals, especially of dogs, and the possessor of a well-developed sense of humour. He is, too, a pleasing writer, with a knack of hitting on a vivid phrase, as, for instance, when he describes (p. 134, vol. ii.) a storm in the Persian Gulf:—"... the storm broke upon us, and there seemed to be nothing in the world except the ship and lightning and thunder"; or, again (p. 248, vol. i.) in describing a night in a khan: "At rare intervals the shrill tones of women's voices sounded above the din, which ceased entirely when a mullah with a very fine voice ascended the end wall of the Khân, and proclaimed to the night and the desert and to us the Majesty of God. And the smells in the Khân were myriad, like the sounds."

By land, by river, and by sea the author has had his share of adventures; he has met many interesting people, civilised and the reverse; and in writing of them he contrives to make them all—or nearly all—interesting to us. In his early pages we read of Rawlinson and Layard, George Smith, Gardner, Wilkinson, Sayce, Oppert, Delitzsch—who here shows himself insufferably conceited—and many others whom the author met in his young days at the British Museum. Most interesting and most lovable of all, surely, is Dr. Birch, of whom we have a portrait for which we are truly grateful. Justice also is done to Hamdi Bey, of the Constantinople Museum; and several of the author's Oriental friends and travelling acquaintances win our liking. Among the men famous in other lines than his own whom the author writes of are: Lord Cromer, Lord Kitchener, General Sir John Maxwell, Sir John Gorst and Field Marshal Lord Grenfell. Regarding the first named he is not enthusiastic, for Sir Evelyn Baring (as Lord Cromer then was) seems to have been constantly fearful that British archæologists would be likely to "complicate political relationships"; and it was, apparently, only through General Grenfell's powerful help that our author was able to get permission to excavate. With Lord Kitchener, on the other hand, his relations were very happy, as they were with General Sir John Maxwell—"whose departure from Egypt was," in

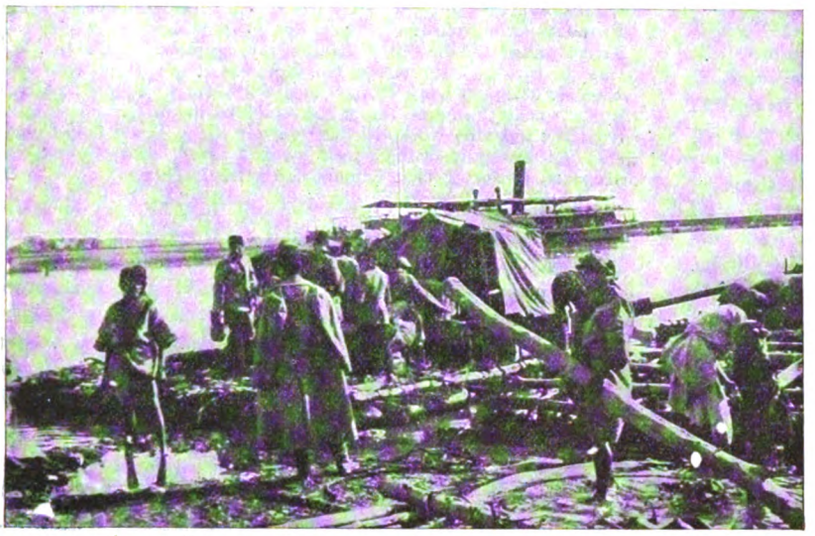
the author's opinion, "a calamity, the results of which cannot yet be told."

The author has at times a good deal to say on what we may call professional topics, but he makes it all so interesting that the veriest tyro in Assyriology or Egyptology will scorn to "skip," and, indeed, will have no inclination to do so. He differs entirely from Dr. Koldeway regarding the famous Birs Nimroud ruin, supporting the old theory of the stage tower of glazed bricks; and in view of all the evidence it seems impossible to reject the theory. He is very severe—and justly so, we feel—regarding the treatment of excavators and archæologists by the British Museum authorities in the eighties; and he is so frank about his own smuggling of antiquities, and so clearly makes out a good defence of it, that we cannot even pretend to feel shocked about it. The account of the securing of the Tel el Amarna tablets is positively exciting, and the stories of ingenuity displayed by the natives (both in Egypt and in Turkey) in outwitting the Government officials are among the best things in the book. Unfortunately they are all too long for reproduction. What ridiculous situations often arose owing to the prohibition of the export of antiquities is well illustrated in the account of the "First Mission," when our author had to ship "heads of mummies" out of the country as manure, because a Customs officer at Alexandria declined to believe that anybody could possibly want them for scientific purposes! The true story of the smuggling out from Mesopotamia of the antiquities acquired by the author on his first mission to that country is here told in detail, and any unprejudiced person reading it will surely agree that it redounds to the credit of Dr. Budge and all who assisted him; and that the foolish and malicious stories of the incident that were spread by his enemies serve only to show how far jealousy can drive some people. It must also be acknowledged that luck was certainly with the "smugglers" throughout the incident. The story will be found on pp. 236-238 of vol. i. Luck, indeed, often stood by Dr. Budge in a wonderful way, an instance of it being his discovery of a missing fragment of an Aristotle papyrus in Egypt (p. 154, vol ii.).



**A Kelek, or Raft of Skins, on the Tigris.**

Shipwreck, brought about by a tidal wave, at Gwadur, is among his adventures here chronicled by the author; and another water adventure was an attempt to wreck his raft on the Tigris, for the purpose of robbing him and his companions. One of his most annoying experiences in travelling on land must have been the robbing of his caravan by a band of Shammar Arabs, the story of which comes at the end of the first volume. Even to one who knows something of the ways of the Shammar it is rather startling to read of two of the robbers returning to the party after the main body had gone off and asking for *baksheesh* and scarcely less surprising to read of their being then engaged to escort the plundered party to its next halting-place. But that is what actually took place, and the two robbers honourably fulfilled their part of the contract and received the *baksheesh*, in the form of an Arab sheep skin apiece, on leaving their victim-employers. In connection with this subject we may note what is written elsewhere (p. 256, vol. ii.) about the Arab view on brigandage and brigands. It was in regard to the attempted robbery of the raft, alluded to above, and the raftsmen, we read:—

> . . . told me that they heard in Tekrit that an attempt would be made to steal the indigo, and when I asked them why they had not warned me, the elder man said, "We wanted the thieves to come so that you might kill them; the Arab people shoot for *fantasiyah* (*i.e.*, show, amusement), but the English shoot to kill. These thieves have robbed rafts for many years: may their souls be in Jahannum!"

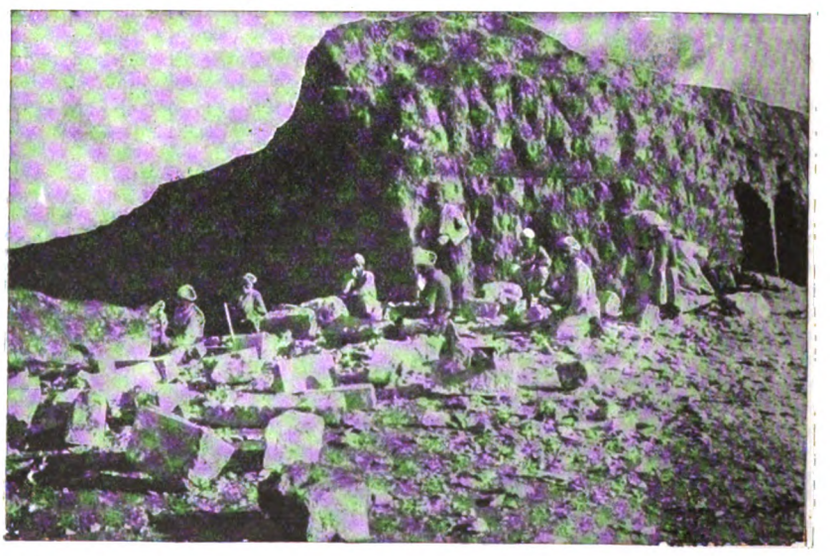
The thief who was swimming to the raft, carrying a knife to cut the skins which supported it, was "accounted for" by one of the passengers, while the author devoted his attention to the robbers waiting on the bank, two of whom "fell down"—but whether as far as Jahannum is not stated.

Once at least, however, when our author fell among thieves he found the experience not unpleasant, and the story of it is quite delightful. It was at Khâtûnîyah, a spot between the Khabur and the Tigris, that these robbers had established themselves on a peninsula in a swamp (reminding us of "Hereward the Wake," of course), and here they entertained the travellers in their troglodytic dwellings, which defied detection by the Turkish authorities. And when he left the author found—

> . . . not a man, old or young, would accept a gift from me; when I pressed them each said it would be a shame (*êb*), and the shekh refused even tobacco. Just as we were going to mount the shekh came up to me and said, "Knowest thou to write?" I said, "Yes." "Then," said he, "take thy pen and write in thy book this: 'I and my camels nighted (*i.e.*, passed the night) in the house of Sulêmân ibn Khidr, Shêkh of the thieves and bandits of Khâtûnîyah, and when I rose up and left him at daybreak of all my possessions I had lost nothing except the service of Sulêmân ibn Khidr, the bandit.'"

Of the generosity of the Arab of the better class, Sir Wallis Budge writes feelingly, and though he does not admire the Turk as an administrator he does not regard him as unfavourably as it is now fashionable to do. We suspect, however, that he much prefers the "Old" Turk to the "Young." At the relations existing between Turk and Arab (in the eighties) he gives us many an interesting glance, notably at pages 50 to 60 of vol. ii., when we read of the Shammar defying the Vali of Mosul and all his forces, and humiliating the troops sent out against them in a most surprising fashion.

We should like to reproduce many of the good stories in the book—of justice as practised in Egypt, not by the brutal English but by the gentle native (pp. 106, 107, vol. i.); of the "fine free fight" between Turkish soldiers and Russian sailors on a Russian steamer (pp. 364-366, *et seq.*, vol ii.); of the Polish doctor who gave evidence of a strange character (p. 49, vol. ii.); or even of the



**Excavation of stones from the foundations of Sennacherib's wall between Kuyûnjik and Nabi Yunus.**

Digitized by Google

"Christian" mule which behaved in such a way as "no Muslim mule would ever have behaved." But space forbids; and we can only recommend all who like tales of the kind to read these two fascinating volumes. The illustrations are excellent, the map (at the end of volume ii., but not indicated in the "Contents") quite good, and the Index very serviceable. The publisher has done his share of the work in the style which we expect from the house of John Murray—and that is to give it the highest of praise.

*(Our illustrations are reproduced from Sir Wallis Budge's book, by kind permission of Mr. John Murray, C.V.O.)*

## TWO TURKISH TALES.

The late Sir William Whittall, a descendant of a well-known English family long resident and doing an extended business in the Levant, gathered many an interesting tale of his journeyings in Asia Minor. He knew the people of Turkey, as his forebears had known them before him—knew their languages, their strength and their weaknesses, and was sympathetic in his attitude toward them. For this reason he was greatly trusted and respected by them, as are a number of his descendants there to-day, and was able to be of much help to them, and of use to his own country, at various critical moments in the history of that oft-disturbed land. Sir William's memory for Near Eastern anecdote was as unfailing as his interest in the history and in the events that took place in his day in all that region. The following tales, together with many others, were told by him in a Pera drawing-room, before a little Fortnightly Club that in more peaceful days than these used to hold gatherings and enjoy listening to those who not only knew the history, but the more intimate lore of the land.

In the old days of estrangement between Turkey and Russia, Sir William was once talking over the political situation with some Turkish gentlemen. One of them who was an Anglophile said: "If the English would only help us, we could carry all before us and do to Russia what the Mollahs did to the body of the villager."

"What was that?" said Sir William.

The Turk replied: "Two mollahs once entered a strange village where they were greeted with enthusiasm, for the leading man of the village had died the night before and there were no mollahs to watch by the body and to say the intercessory prayers. The inhabitants made haste to engage these two for this purpose. The mollahs seeing their necessity (for a man's soul cannot rest without such prayers), asked a large sum of money; which was promised them. Then they went into the mosque and watched by the body of the dead villager as it lay on the bier covered only by a cloth. In the night they were horribly frightened by a wailing voice that cried: 'Shall I arise? Shall I arise?' (*Kalkajami?*). The two cowards shivered and shook in the darkness, fearing all sorts of horrible things. In the morning they saw the corpse had come to life, and thinking himself at home, had sat up on his bier and was enquiring whether he should get up. 'No, you shall not!' cried the mollahs, infuriated at having received such a fright. 'You shall never arise!' and they beat him until this time he was really dead."

"So," added the narrator, "the Russians are always rising again after they have been crushed, but this time we ought to beat them until they are quite dead."

A second Turk, who was not an Anglophile, said:—

"Oh, you Western nations, you do us no good, you are like the *shaitan* (devil) in the story."

"Tell me the story," demanded Sir William.

"Once a group of people were wondering what shaitan was like, fancying him with horns and cloven hoofs and a tail, as has been wont for who knows how many past ages. As they talked he entered the room, and to their astonishment he was a handsome, smiling man dressed in the height of fashion. Immediately they all clustered about him.

"'O Shaitan, *effendi*,' 'how are you, *effendim?*' 'but how you surprise us; we thought you would be a monster!'

"'Oh, no, replied Shaitan airily, 'I am not bad at all, I never do anything worse than this,' and dipping his finger in a honey pot, he smeared the cage of a valuable bird in the room with the honey. Flies gathered to sip the honey, and the bird, attempting to reach the flies, got her head through the bars of the cage. A cat chanced to be below, and springing up snapped off the head of the bird. The owner of the bird in anger threw a billet of wood at the cat and killed it. Then the owner of the cat hurled a stone at him, but the stone flew through the window and struck a neighbour, who joined in the scrimmage. Soon the whole village was in an uproar and many lives were lost, while Shaitan leaned back in an elegant attitude and smiled.

"So it is with you Western Powers. You offer us the honey of 'reform' and 'civilisation,' and all the time you are setting our house about our ears and doing us no end of harm."

M. A. P.

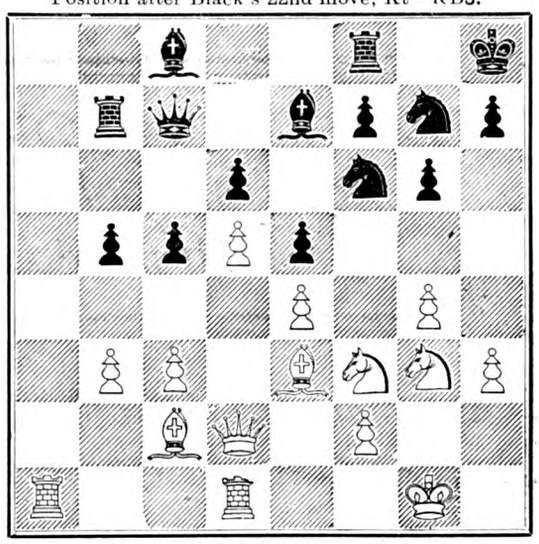
## CHESS.

This week saw the opening of the usual winter tournament of the City of London Chess Club. There has been a splendid entry for all the tournaments, especially the championship, in which Sir G. A. Thomas, Mr. R. H. V. Scott, Mr. R. P. Michell, Mr. R. C. J. Walker, and many other well-known experts are playing, and which would seem to promise an unusually keen and interesting contest.

The season of the City Club opened about two weeks ago with a series of consultation games, in which the veteran master, Mr. J. H. Blackburn, Mr. T. F. Lawrence, Sir G. A. Thomas, Mr. W. Ward, and others took part. Each of the leading players had one or more in consultation with him, and some very lively games resulted from the afternoon's play. Mr. J. H. Blackburn played his favourite Scotch opening against Mr. T. F. Lawrence, but the attack went wrong at a critical point, and eventually the latter player won in the end game. I hope to give this game in due course.

The following was the game between Sir G. A. Thomas and Mr. R. P. Michell in the British Championship, the only game lost by the former player:—

Position after Black's 22nd move, Kt—KB3.



RUY LOPEZ.

| | White. | Black. | | White. | Black. |
|---|---|---|---|---|---|
| 1 | P—K4 | P—K4 | 26 | B—Kt5 | K—Kt2 |
| 2 | Kt—KB3 | Kt—QB3 | 27 | Q—Q2 | Kt x B |
| 3 | B—Kt5 | P—QR3 | 28 | Q x Kt | P—R3 |
| 4 | B—R4 | Kt—B3 | 29 | Q—K3 | B—K3 |
| 5 | 0—0 | B—K2 | 30 | R—Q2 | R—Kt3 |
| 6 | R—K | P—QKt4 | 31 | P—B3 | R—Q3 |
| 7 | B—Kt3 | P—Q3 | 32 | R—Kt2 | R—KR |
| 8 | P—B3 | Kt—QR4 | 33 | K—R2 | P—R4 |
| 9 | B—B2 | P—B4 | 34 | Kt—B5 (ch) | B x Kt |
| 10 | P—Q4 | Q—B2 | 35 | KtP x Kt | Kt—Q2 |
| 11 | QKt—Q2 | Kt—B3 | 36 | QR—KKt | K—R2 |
| 12 | P—Q5 (1) | Kt—Kt | 37 | P x P (ch) | P x P |
| 13 | P—QR4 | R—R2 | 38 | Q—Kt5 | R—KB3 |
| 14 | Kt—B | 0—0 | 39 | P—KB4 | Q—Q3 (4) |
| 15 | P—R3 | Kt—K | 40 | P—B5 | Kt—B |
| 16 | P—KKt4 (2) | Kt—Q2 | 41 | B—Q | K—Kt2 |
| 17 | B—K3 | R—Kt2 | 42 | B x P | Q—Q6 |
| 18 | P x P | P x P | 43 | R—QR | Q—Q2 |
| 19 | P—Kt3 | K—R | 44 | R—Q | Q—KB2 |
| 20 | Kt—Kt3 | P—Kt3 | 45 | R—Q5 | Q—K2 |
| 21 | Q—Q2 | Kt—Kt2 | 46 | B x P | Kt x B |
| 22 | KR—Q | Kt—KB3 (3) | 47 | Q—Q2 | Q—K |
| 23 | Kt x P | P x Kt | 48 | R—Q7 (ch) | K—B |
| 24 | P—Q6 | B x P | 49 | P x Kt | Resigns |
| 25 | Q x B | Kt—K3 | | | |

(1) This game affords a most illuminating example of the efficacy of this move, if, as in the present case, promptly followed up by P—KKt4.

(2) Now White has a splendid game.

(3) A mistake. It is difficult, however, to find a really satisfactory continuation for Black in this position.

(4) If 39 . . . . P x P; 40 P—K5, Q x P; 41 B x P (ch), and the game is over.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The comprehensive Blue Book on the finances, administration, and condition of Egypt and the Sudan, covering the years 1914-19, which has just been issued, will be dealt with at length in these columns in due course, and I will, therefore, only make it the subject of a brief reference on the present occasion. The period saw the development, as the result of war conditions, of various factors calculated to cause considerable disquiet, but a general survey of the report suggests that, speaking broadly, the country has made good progress in reorganisation after the war, and financially the country is in a position of considerable strength owing to the accumulations of money during and since the war. But the value of this wealth, it is pointed out, will depend on the use that is made of it. "If," says the report, "it is employed in the repayment of debt and in productive expenditure, the economic well-being of the country will be enhanced, the country will be in a position to withstand the effects on its revenues of a future fall in the price of cotton, and it will be in a fair way of achieving financial independence."

***

The necessity for the grant of credits and a solution to the grave problem of the exchanges is emphasised by M. Titulescu, the Roumanian Finance Minister, who has come to England for the purpose of discussing with the British authorities the financial and economic reconstruction of Roumania, in an interview published in a contemporary this week. M. Titulescu points out that the reconstruction of Roumania ceases to be a purely Roumanian question when it is regarded from the point of view of world-production. He illustrates this by a most forcible comparison with Great Britain. While the United Kingdom produces only a portion of her wheat requirements, Roumania has been in the worst years in a position to export abundant supplies of corn. On the other hand, Roumania has suffered from the lack of manufactured articles. To enable the resumption of trade, obviously, as M. Titulescu says, an arrangement is required which will assure to the country lacking corn all or part of its requirements, and at the same time all or part of the credits for the manufactures pending the arrival of the grain.

***

A return has been issued by the Department of Overseas Trade of the credits granted under the Overseas Trade (Credits and Insurance Act) during the three months ended September. Applications were sanctioned during that period for £68,774, but the credits granted (*i.e.*, the actual payments made) only amounted to £27,395. These credits were granted in connection with exports to Roumania and Czecho-Slovakia. The figures make it clear that as yet the scheme is not fulfilling the hopes based upon it. As a matter of fact, out of the amount of £26,000,000 allocated to the scheme, only a comparatively small total has so far been utilised, and that despite the crying need for some such medium to enable the resumption of trade with countries which are at present suffering from adverse exchanges.

***

The scheme has been the subject of an important letter from the Federation of British Industries to the President of the Board of Trade in which various amendments are suggested with a view to making the scheme of greater use to the business community. In the first place, it is suggested that provision should be made for advances to approved firms of 100 per cent. of the cost value instead of 80 per cent. as at present, as it is pointed out that bankers are exceedingly reluctant to advance the balance of 20 per cent. when there are many outlets for their funds in much shorter dated securities at reasonable rates. It is further suggested that as regards the extension of the scheme to Governments of the countries to which it is applicable the provision of alternative forms of security might be allowed to these Governments instead of restricting them to the regulations applying to private dealings. Both suggestions seem eminently practical, and I hope it will be found possible to adopt them.

***

Recently arrangements were made for the payment of the overdue coupons on the Roumanian Four and a Half per Cent. Gold Loan of 1913, which have been in arrears since October, 1918. It is now announced that a remittance has been received from the Roumanian Government to meet the current and overdue coupons on British-owned bonds of the London issue. The coupons will be met provided that the coupons falling due in the years 1914-18 were duly presented and paid in London during that period.

***

M. Stambolisky, Bulgaria's Prime Minister, could scarcely have hoped for a more auspicious commencement to his tour in the United Kingdom than his reception at the London Chamber of Commerce last week. The hall was crowded, and the interest with which the speeches were listened to, and the animated discussion which followed, showed that there is not likely to be much ground for the complaint in the future of apathy in regard to the Balkan markets. In a spirited speech, M. Stambolisky outlined the policy of his Government for the reconstruction of Bulgaria. The economic plans include the improvement of the agricultural production, the development of railways and mines, and the encouragement of the young industries of the country. He emphasised the point that whatever measures are projected cannot achieve the desired results without the aid of foreign capital and enterprise. "My mission to England," he said, "is to promote the development of commerce between Great Britain and Bulgaria. I am appealing to British finance and British commerce to come to Bulgaria, where they will find a ready market for their goods and a wide field for enterprise." Judging by this meeting he is not likely to be dissatisfied with the answer to his appeal.

***

Our Yugoslav Correspondent, in a message which will be found on another page, states that henceforward the allocation of Yugoslav Government contracts is to be centralised in one authority. It may be hoped that one result of the change will be an extension of time limits to enable our manufacturers to compete, for in the last few weeks I have received two or three Yugoslav tenders, but was unable to give them publicity simply because only two or three days would have been left after this journal appeared.

***

After a sharp upward movement the rupee exchange has again declined to the neighbourhood of 1s. 7d., at which it was when I wrote on the subject last week. These fluctuations are naturally causing considerable anxiety to merchants in India. A Reuter message from Bombay states that, following the lead of the Bengal Chamber of Commerce, which telegraphed to the Government of India urging the resumption of the sales of reverse councils, similar representations have been made by the Karachi Chamber of Commerce. Resolutions have also been passed by other bodies urging the stabilisation of the rupee. That, as I have several times had occasion to point out, is absolutely essential if trade is to be developed. At the present time merchants in India are adopting an attitude of "wait and see" because they are afraid that if they give orders for goods fluctuations in the exchange will convert a potential profit into a loss.

# Commerce and Industry.

(Reports from Our Own Correspondents.)

## ROUMANIA.

Bucharest, October 7.

### Taxes and Imports.

The Minister of Finance has given instructions to all Customs Houses throughout the country that, beginning from October 1, the two per cent. import tax, together with the super-tax (which were reckoned on the invoice value at the official rate of 48.65 lei to the pound), will henceforth be calculated at the current rate of the day. This is at present about 180 lei to the pound. The result of this will be a proportionate increase in the price of imported goods.

### The Coal Problem.

M. Ilescu-Branceni, the General Secretary of the Ministry of Industry, has made the following statement on the coal position:—

1. Production.—The production of coal in the old kingdom is now about 60-70 wagons per day, whereas before the war it was 80-90. However, in Petrosanti, Transylvania, the yield is 300 wagons per day, and for other mines about 20 wagons per day. To this we may add some 10 wagons per day from the Banat, so that there is a total production throughout the whole country of 400 wagons.

2. Consumption.—The consumption of coal is at present greater than the production. The railways require 350 wagons per day, and private industries about 220. To this must be added 20 wagons daily for engines and 20 for heating purposes, which brings the internal consumption to the figure of 610 wagons. As the total production is only 400 wagons per day, there is thus a considerable deficit.

3. Reasons for Deficit.—Before the war the daily supply from the Petrosanti mine was from 700-750 wagons, and from the Banat 40 wagons. Adding the 80 wagons produced in the old kingdom to this amount, an output would be reached sufficient for the present needs of the country. The following are the reasons why we have not got the same production to-day: In the first place the lack of material, especially wire ropes, machinery, and safety-lamps. The question of material has less importance as regards coal than it has in the case of petroleum, as the cost of material only represents about 12 per cent. of the cost of the production of coal. A second reason is the haphazard and careless exploitation of the mines by the Hungarians during the war. Lavish quantities were used without thought for the needs of the future. The shortage of labour is another important factor in the small production of coal. The working hours in the mines in Petrosanti have been reduced from twelve to eight, and there are now three working shifts instead of two. Finally there is the transport question. This is so acute that the railways are hardly able to transport the coal necessary for their own consumption, and they have delayed in removing some 2,000 wagons of coal from Petrosanti, and are holding up the further exploitation in that area in consequence. The principal debtor to the coal mines is the State, which owes some 100 million lei to this industry. The payment of this debt is long delayed.

4. The Outlook.—The authorities are realising the great importance of getting the coal industry into running order again as soon as possible, and have begun to obtain large quantities of the materials necessary for exploitation. It is hoped that the State will soon settle its debts, and that the transport question will improve with the arrival of new locomotives. The labour question is difficult to solve, as with the shortening of working hours from twelve to eight the production is lessened by 30 per cent. Sixty thousand workmen would have to be trained in coal-mining before the production is again normal, and this is almost impossible at the present time, as there is no means of accommodating such a large number of people. To cover the deficit of coal the quantity lacking must be imported, but the Government finds itself in a difficult position from this point of view, as the price of American coal is 14,000 lei per wagon, c.i.f. Constanza, while the price of coal from Roumania is only 3-4,000 lei per wagon.

### Trading in Gold Prohibited.

The Roumanian Government has forbidden trading in gold throughout the country, owing to the danger of smuggling, etc., and as a result the gold companies have advised the Government that they will be compelled to close down. The companies suggested offering the gold to the National Bank of Roumania, which is the only bank having a right to issue bank notes; but the price offered was only 4,000 French francs per kilo, and is the standard rate for gold in Europe. The offer has been refused by the companies, as they could not afford to sell at this figure. The Government will have to come to the assistance of this industry, and are now deliberating on the question. An arrangement may be made for the National Bank, together with the State, to buy part of the gold existing to be used, instead of Treasury Bonds, for payment of foreign loans, etc. The remainder will be allowed to be exported.

### Locomotives from America.

Fifteen of the fifty locomotives ordered in America will shortly arrive at a Roumanian port. The locomotives have four coupled axles and one free axle, two cylinders, their fuel capacity being five tons, and they will carry 26 cubic metres of water. They will have a maximum speed of 90 kilometres per hour, and they are specially designed for heavy traction. Ten more are being loaded in America, and are expected to arrive with the twenty-five locomotives that are now being built at Lock Works, Montreal, by November 10. With the ten from America a consignment of tools for workshops will be included. The locomotives will cost 2,000,000 lei each, as against the pre-war price of 300,000 lei, and payment will be made by means of petroleum products. The acquisition of these engines is a very important matter for the Roumanian railways, as only 500 are running at the present time, and 3,000 are required to alleviate the situation. A further order for 300 locomotives has been placed with the Lock Works by the Roumanian Railway Commission now in America, subject to the approval of the Roumanian Government.

## YUGOSLAVIA.

Belgrade, October 9.

### Trade Restrictions.

Hitherto merchants and others paying for goods, etc., in foreign currency have been obliged to exchange such currency with the Government for dinars. This decision has

# SWEDISH ORIENT LINE.

just been revoked, and one-third of the money may now be allowed to be retained, the rest being exchanged for dinars.

Merchants are discontented with the sudden taxes imposed on them by the Government; having paid a tax on imports they sell to another merchant, who has to pay the same tax. and even the retailer has in turn to pay. Thus the same tax is paid over and over again.

**Commercial Treaty with Austria.**

A commercial treaty of great importance to Yugoslavia has just been signed between this country and Austria. In exchange for agricultural produce Yugoslavia is to receive textiles and manufactured goods of all kinds, etc.

**Foreign Capital Desired.**

The Minister of Agriculture, Dr. Velizar Jankovitch, one of the Yugoslav delegates to the Financial Congress at Brussels, has declared to a representative of the *Etoile Belge* that the country would welcome foreign, and especially Belgian, capital. Unfortunately this does not agree with the experience of foreign investors who have visited Belgrade. They find obstacles thrown in the way of foreign capital, and even discouragement. It is the declared policy of the Government that foreign capital may not participate to the extent of more than 50 per cent. in any proposition for the development of native resources, and this is scarcely encouraging to foreign capitalists. Perhaps Dr. Jankovitch's statement foreshadows a revision of this policy.

**Government Contracts.**

Foreign manufacturers and merchants desirous of tendering for Government supplies have been handicapped by the short notice usually given, which practically excludes non-residents, and by the decentralisation of some of the ministries. The War Office, for instance, advertises for tenders for oil, benzine, and paraffin four times a year, and then often by departments. It is now reported that Government buying will in future be centralised in a special committee, which will buy for all the ministries jointly. This will have advantages both to buyers and sellers, and is a welcome change. Native firms will always have prior consideration.

The placing of contracts for flour and clothing for the army, and for benzine, coal, and firewood for all the ministries combined, has also been discussed. It is anticipated that shortly tenders will be open for large quantities of these commodities.

**Miscellaneous.**

The dinar at to-day's exchange is 107 to the £, and it is rumoured that it will go lower, having fallen rapidly the last few days.

Negotiations are being pushed ahead for the re-establishment of a direct train service between Budapest and Trieste.

The director of railway construction has obtained a credit of 40,000,000 dinars for the repair of the Belgrade-Ljoubljana, Salonika line.

## BULGARIA.

SOFIA, October 5.

**The Budget.**

On Thursday M. Tourlakoff, the Minister of Finance, introduced the Budget of 1920-21 in the Chamber. He began his statement on the financial position of Bulgaria by saying that his efforts to balance revenue and expenditure had failed, and pointed out that during the last ten years Bulgaria had had a deficit on her Budgets. For 1910 the deficit was 42,404,223 levas, for 1911 9,898,697, for 1912 133,331,085, for 1913 181,178,648, for 1914 68,620,760, for 1915 141,396,433, for 1916 316,496,116, for 1917 779,825,206, for 1918 1,117,593,497, for 1919 2,197,598,916. The total deficit for these years amounted to 4,998,397,590 levas.

The foreign consolidated loans amount to 550,117,713.17 French francs, while the non-consolidated loans amount to 1,008,266,122.71 French francs. The State owes the Oriental Railways Company 24,967,047.27 gold francs. Finally the debt for reparation, according to the Treaty of Neuilly, amounts to 2,250,000,000 French francs, or 10,025,000,000 levas.

The internal debts are as follows:—Consolidated 81,612,800 levas, non-consolidated 3,082,914,783 levas, while the pensions for the disabled capitalised amount in round figures to 2,000,000,000 levas.

The total amount of the State's debts is 22,164,212,444 levas for a population of 4,337,515, or 5,120 levas per head, which is a crushing burden. The revenue for ten years amounted to 3,071,704,094 levas, while the expenditure was 8,070,101,684 levas.

**Excellent Harvest.**

The harvest has been very good. The statistics of production are as follows:—Wheat, 1,120,000 tons; maize, 1,007,000 tons; rye, 353,000 tons; barley, 272,000 tons; oats, 141,000 tons. Deducting from the total the amount required for internal consumption and sowing there will remain for export 936,950 tons.

## PALESTINE.

JERUSALEM, September 27.

**Restrictions on Trade Removed.**

The High Commissioner is continuing the wise policy of sweeping away various minor but harassing imposts and vexatious restrictions on trade which were so characteristic a feature of Turkish misrule. A tax of 20 per cent. on all sales of fish has hitherto annoyed the public, and increased the price of an article of food none too plentiful. This has been abolished from September 15, nominally for a period of five years. Municipal fees and octroi dues levied on sales of fish and the fishing industry remain in force; but it will be well when these and some other dues, now often evaded, are also abolished.

**The Harvest.**

Winnowing of the cereal harvest has been completed, and ploughing has begun in many places. The almond crop has been gathered. The output of oranges is disappointing. Petitions have been sent to the manager of the Railways protesting against an increase in transport rates. The olive crop is satisfactory, and exportation of the old crop is now permitted, provided that the district governors are satisfied on the subject. Amongst the coming agricultural reforms there should be a large increase of olive cultivation.

**General News.**

The re-afforestation of Mount Carmel is proceeding. A Pro-Carmel Society has been formed at the suggestion of Professor P. Geddes, similar to the Pro-Jerusalem Society. Haifa holds its own among the more progressive centres of agricultural development.

A branch office of commerce and industry has been established at Jerusalem, in the old city, and is for the present located in the St. John's Hotel.

# BRITISH TRADE WITH INDIA.

## JAPANESE AND AMERICAN COMPETITION.

Mr. T. M. Ainscough, O.B.E., H.M. Senior Trade Commissioner in India and Ceylon, in the course of a paper on "British Trade with India," read at a meeting of the Indian Section of the Royal Society of Arts on October 15, dealt with the growth of competition in India as the result of conditions arising since 1914.

India, he pointed out, turned in the first place to Japan as a source of supply of materials whose source was cut off owing to the exigencies of war. The history of Japanese trade with India during the past five years was a remarkable one, alike for the phenomenal progress made during the years of war, and for the equally striking, but nevertheless inevitable, collapse during the past eighteen months. Japan had now receded from second to third place in India's foreign trade, and had been overtaken in the race for position by the United States. Japanese manufacturers had had an opportunity for expansion during the war which was without parallel in industrial history. Although Japanese shipments during the war increased in value nearly eight-fold, and although Japanese goods were now to be found in every bazaar in the country, the experience of the past year or so went to show that Japan had not made the most of an unique opportunity. Although Japan was at present experiencing a severe check in the Indian market, and her overseas trade was, at the moment, dislocated owing to the inevitable domestic crisis following the inflation caused by the war, there was little doubt but that she would continue to be an important factor in Indian trade. Japanese goods, consisting in the main of cheap, showy articles for the bazaar trade, had replaced the German and Austrian articles of similar type, and it was likely that they would continue to hold the market, as the cost of production in the Central countries was bound to increase, and the articles in question were peculiarly suited to Japanese conditions of industry. As regards cotton piece goods and yarns, Lancashire exporters would be well advised not to lose sight of the possibilities of future competition on account of the present disorganised state of Japan's trade. It was true that there has been a very great falling off in Japanese shipments of cotton textiles during the past eighteen months, and it was probable that Japan would never again reach the position attained in the year 1918-19, when she supplied no less than 35½ per cent. of India's imports of grey goods. The entry of Japanese bleached, dyed, printed and coloured woven goods into the market on a fair scale was an earnest of the competition which might be felt in later years when the extensions to the machinery and plant in Japan, which were at present either planned or in execution, became operative. The whole question was one of relative costs of production.

### Japanese Activities.

More important, perhaps, than the question of the competition of Japanese manufactured goods was that of the competition of Japanese merchants, banks and shipping companies with corresponding British institutions in India. He doubted whether the British merchants in India realised the formidable nature of the competition which they might have to meet in the future. It was in the sphere of shipping that Japan had probably made the greatest and most permanent advance. Before the war, Japanese shipping activities were mainly restricted to the carriage of goods between India and Japan, together with such subsidiary services as could conveniently be worked in support of the main traffic. High freights and the shortage of tonnage, particularly during the last two years of war, gave Japanese shipowners a wonderful opportunity, and regular sailings were established from Indian and Ceylon ports to both the Atlantic and Pacific coasts of North and South America, to the Cape, to Java and elsewhere.

The growth of American competition presented a much more serious problem for the British manufacturer. As in the case of Japan, the position gained by the United States in Indian trade was almost entirely due to the disabilities experienced by British producers owing to the war. On the other hand, whereas Japanese trade had fallen away very considerably since it had been possible to secure the goods from this country, that of the United States had made its greatest strides since the Armistice, and now held the second place. There was no doubt whatever that American competition in India had come to stay. The main factors which were contributing to American success at present were two in number, viz., competitive prices and deliveries and improved service. The ability of American manufacturers to quote lower prices and earlier deliveries in certain important lines of iron and steel, machinery, tools and hardware was largely due to the favourable economic position in which the United States found herself at the close of the war. The question of delivery had also had an important bearing on American success in India since the Armistice. During the early part of 1919, quotations for very early shipment were made by American makers, and although much longer delivery dates were now required, a very material advantage had been secured and considerable orders had been placed for India. In contrast to this, British makers of steel and steel products had frequently been unable to quote firm prices and give hard-and-fast deliveries owing to the constant rise in price of the materials, and also owing to a succession of labour troubles. It was practically impossible at the present time to make any forecast as to whether they would be in a position to undersell American makers in the near future. Both countries were passing through a transitional period of acute dislocation in industry, and it would be some time before the post-war position of equilibrium was reached.

The provision of an efficient service was all important in a market like India. Before the war American manufactured goods were hardly known in the country. There were no American merchant importers of high standing and the facilities for trade between the United States and India were not particularly good. The war, however, had awakened American manufacturers and exporters to the fact that, owing to the value of their home market, they had neglected the possibilities of foreign trade in the past. Several firms of American merchants were now established in India and were doing a considerable business. Improved shipping facilities between both the Atlantic and Pacific coasts and India had materially contributed to the expansion of trade. Greater financial facilities were being given by American banks to the export traffic. It must be admitted that although, hitherto, American manufacturers and merchants had had little experience of overseas trade, and had the reputation of being most conservative in their terms and methods, they had recently adapted themselves to the requirements of the Indian market in a most remarkable way. For example, in the motor-car trade, the policy of standardisation of cars and spare parts, the personal attention given to importers by representatives and mechanics, and the allowances for advertising and general propaganda work had had a most favourable effect on sales. American makers were often more generous than British houses in the commission and facilities accorded to their agents, and as a result of this, they had built up in India among British merchant importers during the past few years a powerful vested interest in American goods, which our manufacturers were finding to be a powerful factor against them in their efforts to re-enter the market.

### British Shippers' Difficulties.

A further result of American activities in India of late years was the growing feeling among certain sections of the Indian public that the United States was the only country which could economically produce certain types of plant, machinery and tools. This was not to be wondered at, as British manufacturers in many cases had not been able to ship to India or even take orders for some years, during which time their American rivals had been most active, not only in promoting the sale of their goods, but in carrying out general propaganda. The fact that the British manufacturer had been engaged in supplying the sinews of war for five years and had had to sacrifice his normal business to more fortunate rivals received little recognition among Indian buyers, and it was only by a campaign of active representation and salesmanship in India that the position could be regained.

He considered that American competition, particularly in iron, steel, machinery, tools, hardware, electrical supplies and motor vehicles, would continue to be severe and might grow in intensity. It would be a fair, straightforward rivalry, and the result would entirely depend upon the ability of our manufacturers and distributors to provide as suitable goods at a lower price. Assuming that our industrialists were in a position to quote competitive qualities, prices and deliveries, the only way successfully to meet American competition was to be actively represented by a trained staff in India, whether by the maintenance of the exporters' own branches and distributing organisation, or by the employment of energetic agents aided by salesmen and experts from the home works.

# BULGARIA'S RECONSTRUCTION.

## OPENING FOR BRITISH CAPITAL AND ENTERPRISE.

M. Stambolisky, the Bulgarian Prime Minister, visited the London Chamber of Commerce on October 15, and addressed a large gathering of the members of the Chamber on the objects of his mission to England. His aim, he emphasised, was the development of commercial relations between Great Britain and Bulgaria, and he appealed for the support of British finance and commerce.

Sir James Martin, J.P., chairman of the Council of the Chamber, who presided, in welcoming M. Stambolisky, said that in M. Stambolisky they believed that Bulgaria possessed a Prime Minister whose courage, ability and honesty of purpose were above and beyond question. Under these circumstances it was natural that the London Chamber of Commerce, with the assent of the Government, desired to resume inter-commercial relations for the investment of British capital and the export of British goods to the Bulgarian market. Statistics showed that trade with Bulgaria was capable of great development. In 1912 British exports to Bulgaria amounted to £1,048,626, and imports from Bulgaria to £491,484. In 1913 British exports to Bulgaria fell to £502,029, and imports from that country to £40,782. He understood this was due to the second Balkan war, and for the same reason Bulgaria was compelled to reduce its purchase of our manufactured articles, which accounted for nine-tenths of our exports. If the figures were looked at in another way in the bigger of the two years (1913) Bulgaria only took from us by way of British goods less than 5s. per head of her population, and British exports represented only about 15 per cent. of Bulgaria's total imports. Trade, of course, must be mutual and not one-sided, and we on our part were capable of taking a much larger quantity of the produce of Bulgaria in exchange for our manufactures.

M. Stambolisky, in his reply which was read by M. Mamartcheff, said:—"After the late war and the signing of the Treaty of Neuilly, the aim of the Bulgarian Government has been and will be in the future to take all possible measures for the rapid consolidation of Bulgaria's position in all its branches. Following this policy the Bulgarian Government considers it necessary: First, to be on good terms with all neighbouring States, this being essential to assure to Bulgaria a peaceful period of time for intensive work; second, to create lasting friendly bonds with the great Entente Powers; third, to consolidate the internal situation of the country and to make Bulgaria safe from any internal troubles against the order of society; and fourth, to improve the economic and financial conditions of the country.

"With this purpose in view the Bulgarian Government realises the great necessity for the improvement of its agricultural production, the development of its railways and mines, and the increase of its attention to the young Bulgarian industries. The Law of Labour, recently voted by the Bulgarian Parliament, which makes it compulsory for all the Bulgarian males to render their services to the State during a period of one year, will enable the Government to develop and cultivate large areas of valuable land, which—for the want of labour—was never touched in the past; to build up roads between towns and villages; to help in undertaking large State enterprises, which the country was not able to do in the past with its limited resources; and in general to do all possible to help to cure the war wounds of the country.

"One of the very first needs of the country is the development of its railways. The railways being State property private enterprise was prohibited in the past. Recently a law was passed through Parliament giving the right to any county, community or private person to build broad or narrow-gauge railways for their own needs. Special privileges are given which are prescribed for in the law referred to.

"The existing law of encouragement of local industries gives privileges for the development of industry in general. This law is in force until 1925. The excellent results obtained up to the present by the application of this law are so enormous that, in my opinion, there will be no Bulgarian Government which would desire to suspend or amend it. Nature has gifted Bulgaria abundantly with mineral wealth, which already has been discovered, but not yet exploited, and utilised for the industry, this being due to the want of modern technical appliances and the necessary large amount of capital.

"Whatever measures may be taken on the part of the Bulgarian Government to develop the country's resources those will not be sufficient to bring about the desired results without the help of foreign capital and enterprise. Foreign capital will always remain an important factor in our organisation to achieve the various aims of reconstruction, so very necessary for the development of the country. The Bulgarian Government therefore has the intention of giving all the possible facilities to foreign capital and foreign industries in Bulgaria. It is with great pleasure that the Bulgarian Government recognises the generous sympathetic treatment received from the British Government by allotting a certain credit to Bulgaria, thus enabling the purchase of the most necessary materials which are indispensable for the reorganisation and development of the country."

Concluding, His Excellency said:—"I am extremely pleased to have the honour of meeting to-day so many distinguished representatives of British finance, commerce and industries at this great institution, the London Chamber of Commerce. We all know that it is commerce that has made England so great as she is to-day. It is my desire that commerce may make Bulgaria what she hopes to be in the future. My mission to England is to promote the development of commerce between Great Britain and Bulgaria. I am appealing to British finance and British commerce to come to Bulgaria where they will find a ready market for their goods and a wide field for enterprise. On behalf of the Bulgarian Government I wish to emphasise our great desire to enter into closer relations with your great nation, and to achieve a complete understanding in the future. For this it is necessary to increase the commercial bonds between the two countries."

## ROUMANIAN DEBT SERVICE.

Messrs. J. Henry Schroder and Co. announce that they have received a remittance from the Roumanian Government with instructions to pay the current and overdue coupons of British-owned bonds of the London issue of the Roumanian Four and a-Half per Cent. Gold Loan of 1913, provided that the relative coupons due in the years 1914-1918 were duly presented and paid in London during that period. Coupons may now be presented for payment at the counting-house of Messrs. J. Henry Schroder and Co., 145, Leadenhall Street, E.C.3.

# ENGINEERING.

## British Steel.

There are signs of a possibility of the British iron and steel trade participating to some extent in a slump which is so confidently—but, I feel, so mistakenly—prophesied in connection with British industry. The situation is at the moment largely in the hands of organised labour, and if the workmen in the industry can be brought to see that their prosperity depends on continued and increased output all will be well; if not, and the present ca' canny attitude is maintained, it will only be a matter of time before this particular branch of our industry drops to a very low place and unemployment will be rife. As an authority recently said, there can be no dispute as to facts, and these may be summarised as follows:—

The whole world is short of steel and iron, and the British industry is not at present threatened with any severe competition. The present output of Germany, which was our chief pre-war rival, is only about one-tenth of that of 1913, and French, Italian, and Spanish firms not only have not absorbed the balance, they are together only doing 25 per cent. of it, so that when everything is taken into consideration only 35 per cent. of Germany's pre-war steel and iron production is coming on the market to-day. The output in the United States is immense, but is little more than equal to the home consumption of that country; and, to put the matter in a nutshell, all the steel-producing countries of the world bulked together are barely turning out 10 million tons of export steel per annum in place of the 20 million tons they turned out before the war.

There is no country in the world which is so favourably situated as Great Britain in regard to possible steel production. We have iron and coal mines, blast furnaces, coke ovens, steel works, engineering shops, and shipping ports all clustered together in the North of the country, and, unlike our Continental competitors, any damage we have suffered in the industry through the war has been indirect and not direct; we have had no coal mines flooded or blown up, or iron or steel works gutted, as have so many of our Continental competitors. Our railways, though congested, are undamaged, and the shortage of shipping under which we suffered so severely during the latter stages of the war is not now apparent. Owing to the changed conditions of production brought about by the war, we can produce over 50 per cent. more iron and steel than we could in 1914, and actually, were we to work our resources to something like our full capacity, we could to-day turn out as much iron and steel as the whole of the world, including ourselves, is turning out at the present time for export. There is only one reason why we are not doing this trade. The raw materials are at our disposal, the plant is equipped and ready, the markets are waiting for British iron and steel.

The only obstacle in the way is organised labour, the rank and file of which, from an engineering point of view, are misled by those whom they have chosen to order their actions. The crass stupidity of those who have impressed on the iron and steel workers the advisability of restricting output has had a terrible effect on the industry, and it is to be hoped that engineers throughout the country will do their utmost to show the fallacies which underlie that doctrine to all with whom they come in contact. It should be made clear that by restriction of output not only is the iron and steel trade hampered by lack of supplies of ore and fuel; furnaces are not and cannot be worked to anything like their capacity, and the slow working of the transport services adds to the difficulties of the situation. The results are that not only are prices high for every commodity, but forward contracts have to be refused and customers turned away and driven to purchase from American ironmasters, and so directly benefit American workmen. Were our Labour situation settled in the iron, steel, and engineering trades, foreign competition, which is now comparatively serious, would be a negligible quantity by reason of our tremendous potentialities.

## General Purpose Lorries.

I have recently had an opportunity of examining what is termed a dairyman's general purpose lorry, which possesses several features of interest to engineers. It is fitted with a sliding hand crane, which not only enables the goods to be lifted on and off the vehicle, but by travelling along an overhead rail permits of their being placed in any desired position. This rail, of course, extends beyond the body of the vehicle when in use. It is fitted to the top of the driver's cab, and thus serves an additional purpose in strengthening the cover supports. An innovation is the provision of a full-length door on each side of the driver's cab, allowing easy and free admission or exit in any position, and the cab itself is so designed as to give adequate protection against all weathers. This Vulcan lorry, which is of the 30 cwt. size, has the sides and rear of its body work consisting of detachable gates, by which it is possible for the vehicle to be used for a variety of purposes, and I may add that it is fitted with an up-to-date electric lighting system.

Another Vulcan wagon I have seen recently is of the tipping type. The lorry body is of steel, measuring 8 ft. 4 in. by 5 ft., by 21 in., and it is specially designed for carrying coal, bricks, sand, and any other products that can be tipped. The tipping gear is driven by oil and is operated by a sliding handle. A feature of the body work is that it is of specially strong construction, supported at the sides by angle and U-shaped irons running the full length of the body underneath. The rear door is hinged and pinned at the top and bottom, so that it can be opened either upwards or downwards, as desired. Here, again, the cab is soundly and substantially built, with full-length doors and windows, so as to afford protection against even the worst weather. These windows can be lowered and a wind-screen raised if desired. In this model, also, electric lighting is provided, and the engine fitted is specially built to give heavy and lengthy service.

## Driving Chains.

One of the few disadvantages—perhaps the only real disadvantage—possessed by driving chains is that they cannot be crossed, and consequently can only be used for driving between parallel shafts which are required to rotate in the same direction. It is, however, possible, with drives of moderate speed and under conditions that are suitable for what is known as bush roller chain, to obtain a reverse of the direction of rotation by the use of three wheels. Another drawback is that right-angle drives are altogether out of the question, and, as Mr. Hildage pointed out some time ago, the limitation of the centre distance must for the present be regarded as precluding the use of chain-gearing for the driving of line shafts from engines in large works. It is quite possible to drive from a steam engine to one or two of the line shafts in a textile factory or machine shop or a general works, and from these to the remainder by chain gear. Further, it is easy and convenient in the case of electrically driven tools or machines to use a chain drive, which, it must be remembered, is not only positive and incapable of slipping, but is also quite sufficiently flexible. In many cases it is possible and advantageous to substitute a chain drive for many of the smaller belt drives at present in use, and the only alteration that need be made to the equipment in the event of such a change-over would be the substitution of a clutch for the present fast and loose pulley.

## Cooling Towers.

The chief development of the water-cooling tower has been in connection with power plant practice, especially in situations where available water for boiler supply is unobtainable except at great expense, or where its quality is unsuitable. Towers are of two types, open and closed, and whilst in both cases the cooling of water to allow of its re-use in condenser operation is the object of its installation the types are very different, as in the open the cooling is effected by air supplied by natural process, and in the latter by an artificial draught. The open type depends on atmospheric agencies to carry out its work, whilst the closed type has its supply of air regulated by means of fans, which can be speeded-up or slowed down as required to meet the conditions. In that way the performance of the plant can be kept constant, independent of the weather, and for that reason alone a number of engineers regard this type of tower as being the most suitable. It may be men-

tioned also that when a strong wind is blowing the open type tower may be a source of annoyance to others and a damage to surrounding property by reason of the spray blown away from it. On the other hand, the open tower is fairly efficient, cheap, and can be easily erected. It costs, however, rather more for maintenance than would a tower of the closed type.

**A Road Guide.**

A new edition of the Automobile Association's Handbook for the use of members, which contains a considerable amount of information useful to motorists, has just been issued. An important section is that in which the duties of the A.A. road patrols, the roads patrolled, the situations of the A.A. roadside telephones and fuel stations are indicated. The hotels' and agents' section covers the names and addresses and useful details concerning nearly 2,700 appointed hotels and garages, most of which are classified on a star basis, according to accommodation and facilities provided. In addition, touring information is given regarding market days, posting times, and distances from various places; whilst another useful feature is an A.B.C. guide to the motor laws. In this connection it may be mentioned that the membership of this organisation has now passed the 150,000 mark.

**Engineers and Aviation.**

At present there is little inducement for engineers to devote any of their time or attention to matters affecting aviation and airship and aeroplane construction. This country came out of the war with a magnificent fleet of both heavier- and lighter-than-air machines, and with a staff of the finest pilots the world has seen. Our works were equipped for the production of any number of aeroplanes, and we had a little army of engineers and designers who were keen on the development of aviation. The prospects for British aviation were remarkably bright, but since the Armistice cold water has been thrown on the matter by the authorities. Government assistance, encouragement, or even approval has been lacking. The result is known to every engineer, and indeed to everyone interested in flying. Now it would seem that the powers that be have suddenly awakened to the fact that the aircraft industry is in a somewhat parlous state, although, in view of the Government's declared attitude towards subsidies in industrial matters, it would seem to be idle to base any great hopes on a subsidy for commercial aviation. But cold water, however ably thrown, cannot stop the development of this latest branch of progress, and not only engineers, but the nation as a whole owe a great debt of gratitude to such firms as Handley Page, Ltd., which have kept steadily on with their plans, and—as one of the great financial papers recently pointed out—as an example of what can be done by unaided private enterprise in this matter a study of the last report issued by that company is well worth study. During their last completed financial year this company made a profit of £51,285, of which the preference dividend absorbed £22,084, leaving £29,201 to be carried forward.

**Wave Transmission.**

Engineers generally are greatly interested in the latest developments in connection with the transmission of power. The invention of such transmission by waves through liquids is fully covered by patents, and it is now in its commercial stage. Until recently the transmission of power has been confined to steam, electricity, water used directly, compressed air, and by various mechanical methods. In the new form use is made of wave motions or pulsations set up in an enclosed column of liquid, the energy being transmitted by periodic changes of pressure and volume in a longitudinal direction. To go over ground which may be familiar to some of my readers, it may be recalled that this invention was made use of during the latter stages of the war to some extent in applying wave transmission to the control gear for firing guns mounted on aeroplanes. By the use of this invention it was possible to fire over a thousand bullets per minute between the blades of a rapidly rotating propeller with such precision that no damage was done to the machine or any of its parts.

Hydraulic transmission as we have hitherto known it, and wave transmission must not be confused, although in both use is made of liquids. They differ widely in principle, for whilst in the former a continuous flow of the liquid takes place, in the latter there is no direct flow, as the particles of liquid merely pulsate backwards and forwards in a perfect rhythm. At present a certain amount of use is being made of wave transmission for rock drilling, and it would seem that its advantages are such that by its means an extended use of rock drills, coal cutters, and other underground machinery is rendered possible. Compressed air has hitherto been used to a considerable extent for this and similar work, but it is claimed that either by itself or in conjunction with electrical methods wave transmission is more efficient, economical, and convenient. There are engineers who go so far as to express the opinion that the new method will supersede the use of compressed air for almost all mining purposes, especially in connection with rock drills.

## SHIPPING INTELLIGENCE.

**Forthcoming Sailings.**

The Cunard Line s.s. Sea Glory, for Gibraltar, Corfu, Piræus, Salonika, Constantinople, Galatz and Braila, will close for cargo in London on October 30.

The Cunard Line s.s. Cypria, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina, will close for cargo in Liverpool on November 13.

The Johnston Line s.s. Wingate, for Piræus, Volo Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila, will close for cargo at Liverpool on November 8.

The Ellerman Lines s.s. Asturian, for Gibraltar, Malta, and Alexandria, will close for cargo at Liverpool on October 23.

The Ellerman Lines s.s. Austrian, for Patras, Piræus, Syra, Smyrna, Volo, Salonika and Constantinople, will close for cargo at Liverpool on October 23.

The Papayanni Line (Ellerman Lines, Ltd.) s.s. Dido, for Malta and Alexandria, will close for cargo at Liverpool on October 30.

The Byron Steamship Co.'s Meandros, for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila, will close for cargo at Swansea on October 29, and at Liverpool on November 12.

## TURKISH FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows under date October 4:—In our preceding report, issued on September 1, we dealt mainly with the prospects of the opening season as they presented themselves at the time. The past month has witnessed considerable activity, and the following figures recording the movement of supplies, shipments, etc., with the comparative figures of last year, will be of interest.

Sultanas.—Total arrivals to September 30, 56,200 bags, against 96,700 bags in 1919; sales to September 30 51,200 bags, against 89,700 bags; stock about 5,000 bags, against 7,000 bags.

SHIPMENTS.

| | Steamers. | Date of Sailing. | Bales. | |
|---|---|---|---|---|
| | | Sept. | | |
| To London | Southgate | 1 | 12,896 | |
| | Venetian | 9 | 69,665 | |
| | City of Smyrna | 18 | 49,877 | |
| | Sea Glory | 18 | 7,500 | |
| | | | | 139,938 |
| To Liverpool | Austrian | 1 | 29,100 | |
| | Assiout | 16 | 40,625 | |
| | | Oct. | | |
| | Cypria | 2 | 61,296 | |
| | | Sept. | | 131,031 |
| To Bristol | Venetian | 9 | 23,157 | |
| To Glasgow | Izmir | 18 | 18,906 | |
| | | | | 42,063 |
| | | | Total | 313,032 |
| Estimated shipment per s.s. Roumelian loading for London ... ... ... about | | | | 60,000 |
| Estimated total shipments to date | | | | 373,032 |

Equal to about 4,700 tons net weight.

Shipments to London, Liverpool and outports to same time last year amounted to 147,776 bales and 639,798 bags, or about 10,500 tons net weight.

The above do not include shipments from the port of Vourla. About 1,500 tons sultanas have been exported from that port exclusively to the Continent. To summarise the statistical movement:—Total supplies available to date Smyrna and Vourla, about 8,700 tons. Shipments effected to the U. K., 4,700 tons; shipments effected to the Continent and U.S.A., 3,200 tons—7,900 tons, thus leaving a stock of some 800 tons on dealers' hands at Smyrna and Vourla.

Arrivals from the interior continue on a small scale. An estimate of the yield is now generally accepted at about 15,000 tons. Leading native dealers assert that at Magnesia, the principal producing district, about 50 per cent. of the yield has already been disposed of. In all other districts the proportion of fruit remaining is under 50 per cent.

Farmers are now in funds, and are not disposed to sell with any freedom or to accept lower prices. Total shipments to the United Kingdom last season amounted to about 14,500 tons. It is doubtful whether half this quantity, during the twelvemonth ending July, 1921, will be available for the British market. Shipments henceforward will be on a small scale.

Business in prospect is mainly for Continental and American account. The market is steady. Inferior grades are quiet at a decline of 2s. to 3s. on the past fortnight, but choice qualities are becoming scarce, and prices are well maintained. News has just been received that the s.s. City of Smyrna has put into Algiers owing to a fire having broken out in the holds. Some of her cargo is reported damaged and being discharged.

Figs.—Total arrivals to September 30 amount to 42,000 loads, against 15,000 loads in 1919. Prices have ruled at a much lower level than last season. With steady and continuous supplies available during the month business has been active, and all supplies have been marketed without much difficulty. The tendency of market throughout the month has been towards a gradual decline. Shipments to the United Kingdom to date amount to 184,965 bags, 5,282 sk/tons c/s; estimated per s.s. Roumelian 70,000 bags 1,500 sk/tons c/s; 254,965 bags, 6,782 sk/tons c/s, equal to about 4,500 tons.

Total shipments last year during the whole season amounted to 344,864 bags, or about 4,500 tons. The fruit was under the control of the Food Ministry, and no packed figs in cases were imported into the U.K. It is estimated that some 35,000 loads are still available in the Meander Valley. Packing houses close down during the next fortnight, and it is more than probable that with lessening demand, supplies from the country will diminish. We have maintained all along that the supply of figs this season was likely to prove in excess of consumptive wants, and we are still of opinion that later on in the year prices will decline to a level sufficiently attractive to induce new business. Among all dried fruits, figs this season are the cheapest. Qualities are remarkably sound, and lower prices will doubtless stimulate demand after present shipments have gone into consumption.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business is still restricted in most varieties, but as more supplies are coming to hand, a revival may be looked for in the near future.

Sugar.—The free market has been quiet. West Indian crystallised has been done at 99s. to 101s. and American granulated at 111s. to 112s. There has been a good demand for home refined at the official prices.

Coffee.—Business has been fairly steady. Mocha has been done round about 165s., while Costa Rica is quoted at 135s. The futures market has been irregular. Quotations are: December 54s., March 51s. 6d., and May 53s.

Oilseeds.—The tone has been very dull. Indian linseed has been done at 36s., while La Plata has come to business at 31s. Rapeseed has declined, Toria being 34s., bold Ferozepore 33s., and brown Cawnpore 30s. Cottonseed is quiet. Indian has been done at 13s. and Egyptian at 17s. 10d.

Oilcakes.—Business is brisk. Linseed cake has been done at about 23s. 6d. to 24s. per cwt., cottonseed cake at 11s. 6d. to 14s., and arachis cake at 14s. to 14s. 6d. Coconut cake has been done at 16s. to 18s.

Seed Oils.—Oils are very dull. Linseed oil has been done at 68s., while refined rape oil has come to business at 84s. and the crude variety at 70s. Turpentine is quieter at 123s.

## LANCASHIRE COTTON

### Effect of the Coal Strike.

(From Our Own Correspondent.)

Manchester, Monday.

Cotton spinners and manufacturers in Lancashire have had to contend with numerous difficulties during the last few months, and on top of these many trials there is now the coal strike, which promises to disorganise the industry from one end of the county to the other. The immediate effects upon production can scarcely be estimated. Numerous firms have plenty of fuel, and can continue running for several weeks. On the other hand, there are producers who are unable to store coal in large quantities, and they will have to stop very soon. This important event may be described as a bearish factor in raw cotton circles, but in manufactured articles the effect may have bullish influences if the output of yarn and cloth is considerably reduced. Scarcely any new feature can be recorded with regard to Egyptian cotton. There is some talk of financial interests coming to the help of growers in order to keep up values, but action of this kind is not probable. Rates in Liverpool have continued to decline. No improvement can be recorded in the offtake in yarns made from Egyptian cotton. Complaints from spinners tend to increase. Cloth merchants with connections in the Near East report rather better advices from the other side, and in certain quarters clearances are on a freer scale. Isolated inquiries have been reported, but very little fresh business in Manchester has resulted. Dealers in India continue to ask for prices, but they are slow in making definite offers, and business still drags. There has not been any trade movement for China. Demand for South America has been generally quiet. Manufacturers as a body continue in a wretched position, and no definite relief is in sight. American yarns for home consumption have been decidedly weaker in price during the last few days. Business has been of retail dimensions and producers have steadily lost ground. Some special lines have been put through in extra hard yarns for the Levant, but the trade has not been of much weight.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, October 2.

There has been something of a revival in imports, especially as regards eatables and agricultural products. Prices in general show a tendency to fall.

The position as regards manufactures is unchanged. There is complete stagnation as regards the principal outlets, but some sales for Roumania, which are, however, diminishing, on account of the fall in the lei.

The new arrivals from Manchester mark a progressive fall in the prices of cotton; prices of manufactures are, in consequence, weak.

Sugar.—The fall continues in producing centres. Prices quoted at Constantinople are considerably above those in the countries of origin. Disposable is quoted £98 per ton, afloat £90, and in Customs £T51 per 100 kilos.

Coffee.—The rise in countries of production previously referred to has come to an end, and prices have given way in the principal markets, where great stocks are accumulated. Rio is quoted Ps. 42-45 per oke and Santos Ps.48-52 (in transit).

Rice.—The demand is weaker, and prices have rapidly fallen away.

The prices of all products are in general weak, with a tendency to fall. Some transactions have been carried out during the week in mohair and opium, holders having accepted reduced prices.

MERSINA, September 4.

The report for August states:—The general depression which was the dominant factor in the commercial position here in July reached its culminating point during the first week in August. Subsequently, there was a progressive improvement to the extent of giving towards the end of the month a fleeting impression of the desired trade recovery.

The principal cause of this small recovery is, without doubt, the opening of the port of Karadache, situated 40 kilometres south of Adana.

---

The India Office reports: Indian Treasury bills outstanding on March 31, 1920, Rs.52,96,60,000; issued from April 1 to October 9, 1920, Rs.84,89,70,000; total, Rs.1,37,86,30,000; discharged from April 1 to October 9, 1920, Rs.43,40,10,000; outstanding on October 9, 1920, Rs.94,46,20,000.

The directors of the Bank of Athens announce an interim dividend for the first half of the current year of 5 drachmæ per share on the Ordinary shares, payable, less tax, October 18.

## COMPANY NOTES AND REPORTS.

### Nizam's State Railways

The report of the H.E.H. The Nizam's Guaranteed State Railways Company for the year ended March 31 states that the net earnings, after deducting £32,221 payable to the Government of India on account of the Bezwada Extension, amounted to £372,915. The sum required to meet the charges for the year in respect of debentures and income tax adjustments, together with 5 per cent. on the capital stock, amounts to £222,443, leaving a surplus of £149.800 divisible between the Government of H.E.H. the Nizam and the company, the balance of £672 representing profit on exchange on remittance of the company's moiety. Final dividend on the capital stock for the year at the rate of 2½ per cent., plus a bonus of 2 per cent. less tax, making 7 per cent. for the year.

### Bengal Iron.

The report of the Bengal Iron Company for the six months ended March 31 states that the net profit is £260.345. Deducting transfer to taxation reserve, £86.000; general reserve, being proportion of profit from October 1, 1919, to date of incorporation, £54.272; depreciation and colliery sinking fund, £19,135; interest on debenture stock of the Bengal Iron and Steel Company to date of redemption, £2.412; and preference share dividend paid, £9,365, leaves a net balance of £89,159, which the directors recommend be applied in payment of an actual 5 per cent. dividend on the ordinary shares, carrying forward £10,458, subject to commission to the directors. The transfer of property and leases from the Bengal Iron and Steel Company is in progress, but has not yet been quite completed. As the Bengal Iron Company was not incorporated until December 5, 1919—although it acquired the business as from October 1, 1919—the proportion of the net profits for the half-year relating to this period up to December 5, 1919, is not available for distribution as dividend, and has therefore been transferred to reserve account as above; the preliminary expenses incurred to date have been written off against this amount. The directors propose to pay the dividend on October 27, the distribution being for a period of rather less than four months' actual working. Owing to developments in India, the directors have under consideration the transfer of this company to an Indian company, as the other companies in the iron and steel trade in India are Indian companies with Indian shareholders, and it is thought that the best interests of this company would be served by nationalising it as an Indian company, as the tendency in India is to give preference to Indian organisations.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

### Egypt.

Steamer.—The Director-General, Mechanical Department, Ministry of Public Works, Cairo, invites tenders for the supply of an inspection steamer for the Upper White Nile Division. Specification P.T. 25. December 1.

Construction Works.—The Director of Technical Services, Department of Municipalities and Local Committees, Ministry of the Interior, invites tenders for the construction of works necessary for the water supply of Fayoum-Sennourès. Specification L.E. 2. November 15.

### India.

Springs.—The Burma Railways Co. invites tenders for the supply of 700 helical springs.

### Turkey.

Railway Material.—The Anatolian Railway Administration, Constantinople, is urgently in need of glasses for point lanterns, paints for bridges, augers for bridge work, boiler-tube ferrules, lamp wicks, firebricks, fireclays for fire-boxes, etc. The schedule, etc., can be inspected at the Enquiry Room, Department of Overseas Trade. Quotations should be submitted direct to the Director of Railways, Constantinople.

## ON 'CHANGE.

### Continued Depression.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

It is not obvious why trade and political conditions in England should affect the price of Egyptian and other Near Eastern stocks, but the market has responded sympathetically to what is happening here, and, no doubt, this is one reason at any rate why the decline we have recorded for some weeks past still goes on.

In Government Stocks, Egyptian Unifieds have gone off half a point to 64½, Greek 1881 has lost 1½ points at 53, Rentes have lost a point at 53, the 1890 Loan has dropped half a point at 42, the Funding has lost 2 points at 52, the 1910 Loan has lost a point at 44, and the 1914 Loan has also a point at 57½.

Banks are in no better case. Agriculturals have gone off ⅛ at 4, and the 3½ and Guaranteed Bonds have each dropped 2 points at 59 and 61 respectively. Bank of Athens has eased ¼ at 3½, and Ionian Banks have lost ⅛ at 4⅝. Among Railways, Delta Lights have dropped ⅛ at 5.

In the Land shares, Béhéras shows an improvement of 1¾ points at 14, but everywhere else there is a decline Egyptian Consols have lost 3d. at 2s. 3d., Delta Lands have lost 6d. at 13s. 3d., Gharbieh Lands ¼ at 2⅞, Sidi Salems 1s. 6d. at 31s., and Union Foncières ¼ at 4 9-16.

Among the Miscellaneous Group, Abyssinian Corporation has declined from 5-16 to 9-32, and Salt and Sodas from 42s. 6d. to 42s. There is an improvement of 3d. in Markets at 21s.

Among Oils, Roumanian Consolidateds have fallen from 20s. 9d. to 18s.

## INDIAN INTELLIGENCE.

This week's Indian cable states:—During the week ending October 2 beneficial rain has fallen. Prospects of standing crops generally good, but more rain badly wanted in the Punjab, North-West Frontier Provinces, the Central Provinces, and the unirrigated areas of the United Provinces of Agra and Oudh, where crops are withering, and in parts of West Bengal, Bihar and Orissa, Central India, Gujrat, and Hyderabad. During week ending October 9 rainfall confined to Burma, North-Eastern India, and Southern India. Bombay cotton ready market quiet. Fine M.G. Oomra number three Rs.285 spot rate. Piece-goods market further depressed by declining prices, owing to exchange and scarcity of demand. Calcutta jute market quiet, with small business; Hessians dull, with declining prices; Heavy goods quiet, with easier prices. No change is expected in jute market generally till after Puja holidays. No change in Bank rates.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |

## GENERAL BANK OF GREECE.

*Paid-up Capital, Drs. 3,000,000.*

**Head Office - ATHENS.**

BANKING OPERATIONS:
Every description of Banking business transacted.

FINANCIAL OPERATIONS:
Investigations in connection with, and the promotion, organisation and financing of, Limited Joint Stock Companies, with a view to exploiting agricultural, industrial and mineral resources, executing technical works, etc.

COMMERCIAL AND SHIPPING DEPARTMENT:
Purchase and sale of goods on account of clients. Warehousing, Advertising and placing foreign products on the market. Agents for foreign companies and large commercial and industrial firms abroad. General Shipping Agents.

## POPULAR BANK OF GREECE.

**Head Office, ATHENS. Branch, PIRÆUS.**

Correspondents throughout Greece.

Established June, 1905, by the National Bank of Greece and a group of Capitalists.

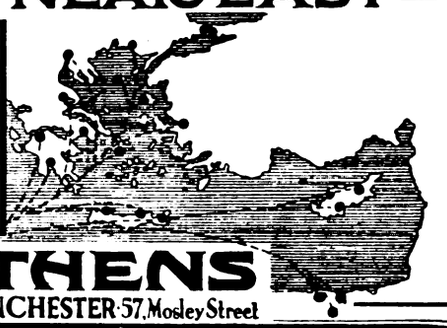
**CAPITAL - Drs. 1,500,000.**
**RESERVE FUND - Drs. 2,500,000.**
**Deposits and Credit Accounts, Drs. 100,000,000.**

The Bank specialises in the collection of Bills payable in Greece; it accepts goods on consignment, and undertakes their sale, and transacts every kind of Banking business.

*General Manager:* D. LOVERDO.

## TRADE WITH THE NEAR EAST

WITH its offices in all the principal towns in **Greece**, in **Egypt, Cyprus, Crete, Constantinople**, and in **Smyrna**, **the Bank extends exceptional Facilities for Export and Import Trade between Great Britain and the Near East generally**, and invites enquiries and correspondence relating thereto.



## BANK OF ATHENS

HEAD OFFICE: ATHENS.

LONDON 22, Fenchurch Street E.C.3. MANCHESTER 57, Mosley Street

## COMMERCIAL BANK OF GREECE, LIMITED.

**CAPITAL PAID-UP - Drs. 15,000,000.**
**RESERVE FUNDS Drs. 5,250,205.45.**

**Head Office: ATHENS.**

*Branches:*—**Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

**AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.**

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

## GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,746,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 296,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

**The MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

**IMPORTS** (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

**EXPORTS** (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

**COINAGE.**—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36 Drachmæ to £1.

**FREIGHT.**—From England, 160/- + 10% primage.

**WEIGHTS AND MEASURES.**—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅓ of a yard, stremma = ·242 of an acre.

## BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

*Branches:*

PIRÆUS, SYRA. PATRAS.

**Capital Paid Up - Drs. 10,000,000.**

Fully represented in all parts of the world for all kinds of commercial, financial, and shipping business.

*President.* L. EMBIRICOS. *Manager.* D. MIAOULIS.

## THE HELLENIC COMPANY OF MARITIME ENTERPRISES

(PALIOS LINE.)

**Head Office - PIRÆUS.**

A. P. PALIOS, Founder. M. P. PALIOS, General Manager.

**REGULAR MAIL, PASSENGER, and FREIGHT SERVICES from PIRÆUS to MEDITERRANEAN PORTS, GREECE, SEA OF MARMORA, BLACK SEA, SEA OF AZOF, ASIA MINOR, SYRIA, and EGYPT.**

26 PASSENGER and CARGO STEAMERS.

85 AGENCIES in Greece, Sea of Marmora, Black Sea, Sea of Azof, Asia Minor, Egypt, Mediterranean and principal Ports of the World.

Coaling Yards and Repair Shops.

GENERAL AGENTS for the High Commission of Sea Transports; for all Passenger Steamers requisitioned by the Greek Government.

*Cable Address—Navigation Palios.*

*Codes used—Scott's (1906) 10th Edition; A.B.C. (1901) 5th Edition.*

## MARITIME BANK of GREECE

**AUTHORISED CAPITAL FULLY PAID DR.10,000,000.**

Founder—A. P. PALIOS.

**Head Office: PIRÆUS, GREECE.**

Cable Address: "Maritime Bank."

## NOTES OF THE WEEK.

It is with deep regret that we have to record the death of King Alexander of Greece. The tragedy of a young life cut short has been enhanced in his case by the peculiar circumstances attending his end. A lonely walk in the royal grounds at Tatoi reflected something of the loneliness of his position in Greece, cut off from all family ties, and with his relations with his subjects not yet fully readjusted after a secret morganatic marriage. King Alexander had a difficult part to play; but his attitude towards his royal office, at first one of good-humoured and tolerant accommodation, and then gradually one of growing interest in his duties and responsibilities, had been helpful to the Greek Government, and he had already begun to show promise of becoming a successful monarch. His death is at once a blow and an embarrassment to his country, as it adds another problem to the many that await solution at a time when Greece is in special need of a period of quiet development free from political complications. The British public and all their Allies in the late war will extend to the Greeks their sympathy at this moment, with complete confidence that the wisdom of the people, under the able direction of their Prime Minister, and the patriotism of the Hellenic race will rise superior to all their difficulties.

Monsieur Take Jonescu, the Roumanian Minister for Foreign Affairs, has concluded his visit to London, and has left for Prague and Warsaw. In the course of his conversations with Mr. Lloyd George and Lord Curzon he was able to satisfy himself that the British Government could only welcome any understanding between the States of South-Eastern Europe which had for its object the maintenance of peace. If in its extended form, with Greece and Poland included, the Little Entente admitted of no change in its original purpose, the stronger it became the better. On the other hand, M. Take Jonescu would be the first to recognise that up to the present the new Polish State has not impressed the chancelleries of Europe with either its sagacity or its stability. It would be unfortunate, therefore, if not disastrous, if the inclusion of Poland committed the Little Entente to any policy of adventure that might find favour with the Poles. In Warsaw, the Roumanian Foreign Minister will be better able to judge of the situation in Poland, and he may arrive at the conclusion that close association with other States will have the steadying effect on Polish policy that it seems to need so badly.

The Bulgarian Prime Minister has stated that his object in coming to England was to convince the British Government and public that a new Bulgaria had come into existence since the Armistice, and to bespeak for it British interest and goodwill. After his stay in London and his visits to Birmingham, Manchester, and Glasgow he can have little reason to be dissatisfied with the results of his mission. Simultaneously with his cordial reception in England he has had the gratification of finding that the attitude of all the Allied countries has been considerably modified in Bulgaria's favour. It was unfortunate that the programme of his tour in the provinces and Scotland did not enable him to meet M. Take Jonescu before the latter left London; but he has still to visit Bucharest and Belgrade, as well as other Allied capitals, before he returns to Sofia, and there can be no doubt that his own record as well as his personality will confirm the good impression that his Government has already made on the Allied Powers, including the immediate neighbours of Bulgaria.

The composition of the new Turkish Cabinet has now been made known, and for Turkey's sake it is to be hoped that the new Ministers have already settled down to work. The resignation of Damad Ferid Pasha will undoubtedly make possible negotiations with Mustapha Kemal and the other Nationalist leaders, if that is the policy to be followed; and with Turkey in the state to which it has been reduced, it almost looks as if that is in fact the only way open. Never in the worst days of the "Old" Turks were the fortunes of the country at such low ebb, or its finances in a more desperate condition. It is possible that even the Allies have realised by now that the maintenance in power of a Government which, however friendly towards them, however honest, had no support from the nation at large was a fatal mistake, since such a Government simply could not enforce the fulfilment of the Treaty of Sèvres, though it might honestly desire to do so.

Ferid Pasha deserved well of the Allies, but the Nationalists, it seems, were so hostile to him that they would never have consented to negotiate with him or his Cabinet. Whether they will do so with Tewfik Pasha we may hope to learn in the near future. Upon their decision hinges the possibility of Turkey carrying out the terms of the Treaty; and it would be well for both Constantinople and the Allies to recognise the fact frankly. If the new Cabinet is able to show that it has reasonable hopes of executing the Treaty terms, and that it really intends to do so, it should surely be helped to make the effort; if it cannot hold out any reasonable prospect of redeeming the pledges given on Turkey's behalf, then Turkey may have to pay the

Digitized by Google

penalty, in the form of losing Constantinople. It is not improbable that Angora realises this as clearly, or nearly as clearly, as does Constantinople; but it is by no means certain that Mustapha Kemal is his own master now. How far is he committed to the Bolshevists? If he has gone too far to draw back, it is indeed a black outlook for Turkey; if not, and if he would work with Constantinople, he might yet do his country good service. It would be interesting to know what view of the situation is taken by the Sultan, who has always been at least as strongly anti-Nationalist as Damad Ferid Pasha.

---

Greece is reported to have responded to the Armenian appeal for assistance by despatching a military mission and some war material, and, even if this help be small, the promptness with which it has been given will doubtless have a valuable effect in heartening the sorely tried Armenians. For the time being the latter appear to be holding their own against both the Turkish Nationalists and the Russian Bolshevists. That there is some kind of agreement between their enemies is tolerably certain; but, as already suggested in these columns, it is probably of a very loose kind; and it does not seem to have led to any very successful result so far. The opportunity of detaching the Turks from the Bolshevists is, therefore, still open; and since, with all their faults, they do not appear to be badly infected by the Red fever, the experiment is worth trying. Meanwhile the Armenians are reported to have received an ultimatum from Moscow, and to have rejected it.

---

The war interrupted the issue of the annual reports on Egypt and the Sudan by the British representatives in those countries. In the days of Lord Cromer, Sir Eldon Gorst, and Lord Kitchener, these reports usually told a tale uneventful, if satisfactory, of progress along a well-defined track, and in the days of the first and last-named Agents much of their interest depended on the personality of those who presented them. Lord Allenby's Reports for the period 1914-19 have now been issued; and though they make it very clear that Egypt, like the rest of the world, felt the effects of the great upheaval, and at first staggered under the shock, they tell upon the whole a story with which those responsible for the administration of the two countries may feel well satisfied. Egypt, as the Reports remind us, was when the war broke out still feeling the effects of the economic crisis of 1907, and the outbreak of trouble brought about a situation of considerable anxiety, "a situation which, had it continued, would have been fraught with very serious consequences for the economic future of the country"; very soon, too, British officials in nearly every department began to drift away to the war, so that the difficulties of the situation had to be coped with by a much reduced staff. It is probable that some of the unrest that has troubled Egypt in the last two years may be traced to these causes; but the men who stayed behind did wonders in the way of work, and Egypt and, even more so, the Sudan suffered far less than might have been expected.

---

A War Office *communiqué* issued last week announces that our casualties in Mesopotamia during the four months ending on September 30 amounted to 416 killed or dead, 1,119 wounded, 159 prisoners in Arab hands, and 473 missing. This is a large casualty list, but not a surprisingly large one for operations such as we have been carrying on in Mesopotamia, which are described as having brought about "the re-establishment of some form of order" in a wide area. It is interesting to learn that the casualties to the Kufa garrison during the siege amounted to nine killed or died, seventeen wounded, and three missing; and (from unofficial sources) that the relieving column had eleven casualties. Nejef, like Kerbellah, has formally submitted to our forces. It is unfortunate that these two cities, which are held in such veneration by all good Shiahs, should have vacillated shockingly since the beginning of the war, but nobody acquainted with them and their history is likely to be very surprised by their changes of attitude.

Evidently no time is to be lost in introducing the reforms proposed by the Esher Committee in the internal organisation of the army in India, and since a change in the commands was to come, it is well that it should be made at the beginning of the training season, so that General Birdwood and the other Commanders-in-Chief may be able to set to work with a definite knowledge of the task which lies before them. There can be no doubt that the congestion at headquarters will be lessened when it has to deal with four administrative units instead of a much larger number of divisions, and to that extent decentralisation will be real, but experience alone can show how the change will work in the lower branches of the organisation. It is conceivable that brigadiers and regimental officers might find themselves more closely trammelled under the new system than under the old, but the records of the Commanders-in-Chief afford some guarantee against unnecessary interference in matters of detail, and on the whole we anticipate an increase in genuine efficiency from the change.

---

India, however, is not at the moment thinking much about army reform. The political situation becomes more and more interesting as the elections draw near, and it is rather unfortunate that the "news" regarding it which reaches this country should consist so largely of the personal opinions of various correspondents. Among the few facts they tell us, the most striking incident just now seems to be the attack of the Extremists on the United Provinces, where the original propaganda in favour of non-co-operation fell absolutely flat. The leading agitators have scored what we suppose they regard as a success by bringing the students of the Aligarh College out on strike against its conversion into a great Moslem university, thus creating a situation which will require careful handling by the large body of trustees who control the institution. We hope they will not allow the scheme of a Moslem university to be wrecked, but it is their affair, and at the moment our strongest feeling is one of sympathy for Dr. Ziauddin Ahmad, the Principal of the College, and one of the most devoted and successful educationists to be found in India.

---

As regards the strictly political situation, the authors of the cables appear to take most interest in the supply of candidates for seats in the Legislatures, and we are told that there is no lack of aspirants, but that what is conveniently termed social pressure will be vigorously exerted to make them withdraw before the polling-day. If that forecast be verified, the political capacity of India will be put to a crucial test at the very outset, for "social pressure" implies threats of trouble in many worlds besides this, threats which would be punishable under the electoral law, but which are scarcely likely to be brought before the courts, and it is asking a great deal of men unfamiliar with public life to expect them to face a campaign of intimidation and abuse. Face it, however, they must, if India is to get forward on the road to responsible government; we shall not attempt to prophesy regarding the outcome, but the men who have worked hardest for the political advancement of the country will watch the cables during the next few weeks, to see whether their efforts are being rewarded by the development of political courage and capacity.

---

Meanwhile the items of fashionable intelligence in the papers warn us that distinguished visitors are setting out for India, in order, we suppose, to be present at the birth of a new democracy. As we recorded last week, Mr. "Pussyfoot" Johnson is to be among the number, and, though prohibition is not at the moment a live issue, he will find ample scope for his abilities if he will only lead a campaign against the peculiar form of intemperance from which India is suffering most, intemperance of mis-statement, innuendo and abuse. He might even aim higher and attack the more dangerous vice of intemperance of mental arrogance, and his time would be well spent if he could convince Mr. Gandhi, for instance, of the possibility that his judgment may on occasion be at fault. India has always welcomed apostles, but it is some centuries now since the gospel of reverent diffidence was preached on her coasts.

# THE WEEK AT HOME.

**Coal Conversations.**

The coal strike is not yet over, but the air is a good deal clearer than it was a week ago, and we know more precisely where we are. A debate in the House of Commons last Tuesday showed that both sides were firm, but that each appreciated the other's position; and it was quite evident that although neither party intended to run away, both are equally determined to go on living, if necessary to fight another day. In other words, the dispute is not to be fought out to the death if a reasonable arrangement can be reached.

Since that time informal conversations have been held, and are still being held, in Downing Street, with the object of finding a way out. The Government will not give the increased wage without an undertaking as as to increased output; the miners will not contemplate increased output without first getting the increased wage. The horse is there, and the cart is there, the question is how to get them together, when the horse refuses to back into the shafts, and the cart refuses to be pushed further towards the horse. That is the problem which faces Mr. Lloyd George and the miners. The Press and the public are hopeful that a settlement will be arrived at this week.

**Sympathetic Strikes.**

But there was a dangerous moment last week when the Transport Workers—who include omnibus, tram, and traction drivers—sent an ultimatum threatening to come out on Saturday; and the National Union of Railwaymen, after expressing sympathy with the miners, announced their decision to call a railway strike at Sunday midnight if negotiations were not reopened. As a matter of fact, informal negotiations were reopened on Sunday morning; but before that time the Transport Workers had postponed the execution of their ultimatum, and the Railwaymen had postponed their strike.

As to the latter, it became quite evident on Friday and Saturday that even if a strike were called it would only be partial. The engine-drivers, who belong to another union, openly said they would have none of it; "It was the miners' fight, so let them fight it," said the Assistant Secretary of the Locomotive Union. Other branches of the railway service were less definite, but it is known that many resolutions of protest and refusal to strike were received. Mr. Thomas had all along made it clear that he was opposed to a strike, but he was overborne by Mr. Cramp, the Joint Secretary, who is usually for extreme action; but the majority for the decision to strike was a very narrow one, and in the end Mr. Thomas had the last word, for he refused to sign the strike papers.

These would apparently not have been generally obeyed, even had he done so; but the public and the railwaymen owe him a deep debt of gratitude for his courageous stand. The decision to strike would have made, as it was intended to make, matters infinitely worse; it would have led to an industrial crisis of the first order, and an economic anarchy from which recovery would have been extremely difficult. The miners, or at least the miners' leaders, who were already seeking a solution of their own dispute, were embarrassed by the railwaymen's decision to strike, and were plainly glad when the threat was withdrawn. The whole business has clearly been a rebuff to the extremists, and a proof of the strength and usefulness of the constitutional elements in the Trade Union ranks. When the smoke and dust of the present conflict are over it will be found that Mr. Thomas, by risking his whole future in opposing a hasty decision, and thereby showing himself a leader instead of a mere delegate, has enormously strengthened his position with the country. Whatever nominal leaders Labour may elect in Parliament, Mr. Thomas will speak with an authoritative voice that will be heard with interest far beyond the ranks of his party. In the history of Mr. Thomas we are watching the gradual evolution of the statesman from the ordinary trade unionist who has taken to politics, and there are those who already suggest him as the next Prime Minister.

**Ireland.**

The Government had all the best of the debate on Ireland last week. Mr. Asquith was ineffective, and had that odd note which has been too frequent with him of late, as though he had not convinced himself of the justice of his own case; Sir Hamar Greenwood, Chief Secretary for Ireland, spoke above his own level. He made it clear that the Government intend to put down murder and terrorism in Ireland, and that they are, in fact, putting it down.

But the death of the Lord Mayor of Cork in Brixton Prison on Monday morning will more than undo the effect of these speeches. His prolonged hunger-strike of over seventy days had been received with incredulity, and however mistaken the man's motives or conduct, there is no doubt that death is the most effective form of political propaganda.

Calmly regarded, it was no more than suicide for an idea, and suicide, even for an idea, is still suicide. But nations are not always logical when their emotions are aroused, and Ireland is never logical. It is understood that the Roman Catholic Church are in some difficulty over the case, and their casuists are likely to argue it long; actually it is suicide, or self-murder, which is mortal sin, and some Catholics have spoken strongly on the subject of giving a suicide extreme unction and the last offices of the Church; but in practice it is unlikely that Rome will condemn his action altogether. In any event, it is said that a final decision on the subject will not be given for years, as it leads to difficult and disputed questions of ethics.

**Unemployment.**

The unemployment figures, which were growing, but not yet serious, a fortnight ago, are progressing daily with the prolongation of the coal strike; and a serious position will soon arise in London and other industrial towns. Last Monday in London there was rather an ugly riot in Whitehall, which was caused, not so much by the unemployed as by a hooligan element that hung on to the tail of an unemployed procession; they gave themselves out as ex-soldiers, but as an onlooker I am bound to say that those who had the unmistakable bearing of soldiers bore themselves with quiet dignity in the procession, while the actual rioters had a very unmilitary look.

Remedial efforts are to be put in hand to check unemployment at once; arterial roads in the East of London and elsewhere are to be constructed. These will be useful, but it is doubtful if they will really have much effect on the disease, which is of deeper origin.

The plain fact is that the public, after its madly extravagant fit of last year, now finds itself unable to spend so much at the present high prices, and it is convinced that if it waits long enough and refuses to buy anything beyond immediate necessaries, prices will come down. The public is probably right, but its enforced decision means that distributors and manufacturers are loaded up with stock, and are having to turn away superfluous hands.

At this moment one hears of a threatened strike among the employees of the large West End shops. I know nothing of the justice or otherwise of their demands; but as these great establishments at the moment contain more assistants than purchasers, one would imagine that the moment for a strike was unpropitious.

Digitized by Google

**The Church Congress.**

Southend, which has fully recovered from its war-time difficulties, housed, and entertained this year's Church Congress. The Bishop of Chelmsford, in whose diocese Southend lies, delivered a courageous and noteworthy presidential address; as a Low Churchman at the head of a county of Low Churchmen, he emphasised the need of tolerance and co-operation with the Anglo-Catholics or High Churchmen. From the published reports of his speech, he does not appear to have said anything about the Broad Churchmen or Modernists, who have been rather less conspicuous of late years than the Ritualists; but I understand that the Broadmen are a growing force; their recent conference at Oxford seems by all accounts to have been most successful, and to have been very well attended. It is claimed that they appeal more particularly to the younger and more thoughtful, as distinguished from the more active section of the priesthood, and that their members are such that in a few years they will wield considerable influence.

The remaining papers at the Church Congress dealt with the question of women in the Church—a subject which naturally agitates the clergy, who are probably more used to petticoat government at home than the rest of us, and who, naturally, do not want Mrs. Proudies in the pulpit, as well as in the drawing-room—and of spiritualism, on which the usual conflicting opinions were uttered as to the validity and worth of the evidence. The Archbishop of Canterbury, in discussing the vexed question of re-union, reiterated his plea for hastening slowly.

**The Newest Liberalism.**

A brave attempt is being made to revive the decaying fortunes of the British Liberal party, which has never recovered from the enfeebling of its constitution in the 1910 Parliament and the war operations, which still further reduced its vitality. Most of the political surgeons consider the patient to be *in extremis*, but Professor Ramsay Muir and other Manchester men, who were recently called in, seem to have discovered some slight indications of consciousness in the prostrate party; and they have now prescribed a cure in the shape of a book of new principles.

The new programme advocates a levy on capital as the only alternative to continued high taxation; it believes in the taxation of excessive industrial profits as an alternative to the Excess Profits Duty; it will advocate "a fairly adjusted co-operation or partnership of all the factors in industry—organising ability, labour, capital, consumer and community—no one factor to possess exclusive mastery, but all to receive a just share of product and control." The profits of capital are to be limited, except in the case of new undertakings, where the risk of total loss is very great and the rewards should consequently be greater; while "unemployment, the solution of which lies at the root of the whole problem of industrial reorganisation, would be one of the subjects of consideration by the trade boards." Broadly speaking, the principle to be maintained is that each industry is to maintain its own unemployed. On the question of nationalisation there has obviously been a compromise, but the new Liberalism commits itself to the principle of nationalisation in any industry which is (*a*) a monopoly, (*b*) the conduct of which directly and immediately affects all citizens, (*c*) which is necessarily in any case brought to a large extent under the control of Government, (*d*) in which unified control would demonstrably lead to definite improvements or economies, and (*e*) which is so well developed that its success does not primarily depend on the constant expenditure of individual ingenuity and inventiveness or upon the working out of new processes. The report therefore contemplates the nationalisation of railways and mines, and possibly other industries. It is evident that this is a great departure from the principles hitherto held by Mr. Asquith, whose position might become difficult if these reforms were insisted on.

But it is clear that if these principles are adopted, the Liberal Party will take its place between the Coalition and Labour, since it shares the moderate views of both. It will probably detach votes from both, if efficiently led; but middle parties seldom attract great leaders or attain prolonged power. There is something a little discouraging to the best intentioned in being kicked on both sides at once, which is the usual fate of middle parties.

**Current Literature.**

The leading book of the week should be "Reflections on the World-War" (Thornton Butterworth), by Count von Bethmann-Hollweg. But the ex-Chancellor is a little disappointing. His thesis is that Germany did not do it; the wicked Entente began the encirclement policy, from which came war into the world, and all their woe. Unfortunately for his argument, the encirclement policy was the consequence of Germany's policy of challenging France, Russia, and Britain in turn, and his account of the events of July-August, 1914, has already been proved inaccurate and incomplete by Herr Karl Kautsky, whose "Guilt of William Hohenzollern" quotes German official documents which Bethmann-Hollweg ignores. The defence therefore falls to the ground—or else the German Chancellor was himself deceived by his master.

A very curious series of portraits is given in "The Mirrors of Downing Street" (Mills and Boon) by a writer who calls himself A Gentleman with a Duster. His views are not flattering. Mr. Balfour is "the most egotistical of men, who would make almost any sacrifice to remain in office—he knows there's been one Ice Age and he thinks there's going to be another." The author's limitation of vision is shown by his emphasising "vulgarity of mind" as his outstanding characteristic, and by regarding the Prime Minister as "an illustration of the value and perils of emotionalism." Of Lord Kitchener it is said that "he lacked almost every grace of the spirit. Very few men liked him a great deal, and none, I should say, loved him. I do not think he was brutal by nature, although his nature was not refined; but he cultivated a brutal manner." Mr. Asquith, he thinks, was spoilt by his marriage. "If he had followed his star, if he had rigorously pursued the path marked out for him by tradition and his own earliest propensities, he might have been an unpleasant person for a young ladies' tea-party and an unsympathetic person to a gathering of decadent artists; he might indeed have become as heavy as Cromwell and as inhuman as Milton; but he would never have fallen from Olympus with the lightness of thistledown." These extracts sufficiently describe a book which is likely to make some noise; it should be added that, of all improbable people, the author chooses Lord Haldane for his hero.

The publishing season is upon us with a rush, and the booksellers bear testimony to the fact that books are not only published and reviewed, but even bought.

One work which is assured of popularity is "The Life of Mrs. Robert Louis Stevenson" (Chatto and Windus), by her sister, Mrs. Sanchez. It was news to me that the wife played so great a part in her husband's literary work; she appears to have been a severe critic, although she understood and appreciated his genius as much as anybody. The first draft of "Dr. Jekyll and Mr. Hyde" was committed to the flames on her advice.

"The Private Letters of Sir Robert Peel" (John Murray) are now given belated publication. Peel is little more than a name to the present day—*sic transit gloria mundi*—but the letters, which reveal a new side of Peel's character—cold and reserved in public, he was passionately devoted to his wife and children—and they do succeed in making a little more human that incredible world in which our grandfathers lived, and even appear to have enjoyed themselves.

The collected verse of Mr. Walter de la Mare, under the title of "Poems, 1901 to 1918" (Constable) marks a completed stage in the career of a writer who has influenced our younger poets probably more than anybody else of his time. It is not given to all to appreciate every kind of poetry, and unluckily, although I can admire Galsworthy and Masefield, the undoubted beauty of Mr. de la Mare eludes me. But his title to fame is already secure.

OCELLUS.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, October 4.
(Delayed in transmission).

**Departure of the Egyptian Delegation.**

The seven members of the Egyptian Delegation left Alexandria on Friday last by the Lotus, and had a very fine send-off. They proceeded on the Thursday by special train to Alexandria, where a magnificent reception had been prepared for them, among those at the station being a representative of Prince Omar Toussoun and a detachment of Boy Scouts, who are being run under the patronage of his Highness. That afternoon a great representative meeting of Alexandria notables was held, at which "the four" explained various points in the draft agreement which had been criticised, and at the conclusion of which a resolution was passed accepting the draft as basis of agreement, and expressing full confidence in the Delegation. This was followed in the evening by a large banquet at San Stefano, at which enthusiastic speeches were delivered. The departure of the Lotus the following afternoon was a very pretty sight, the huge steamer which had hoisted the Egyptian flag alongside the French tricolour being accompanied out of the harbour by a double line of steam launches and beflagged sailing boats thronged with excited Egyptians of all classes.

Before their departure the Delegation issued a statement in which they declared that their mission had been a great success, that they were gratified at the reassurance of the confidence placed in them, and that their visit had enabled them clearly to understand the views and desires of the nation, for which they will do their best to obtain satisfaction. As mentioned last week, the delegation will report that the country is in favour of, and that they are prepared to support, an agreement on the proposed basis.

**The Conspiracy Case.**

The Cairo conspiracy case came to an end yesterday, when the Judge Advocate concluded his summing up. After Mr. Mitchell Innes's final address for the defence, it was felt in Egyptian circles that the existence of the notorious Vengeance Society had been disproved, and that his client, Abdel Rahman Bey Fahmy would get off; but this opinion changed considerably in the course of the speech made by the prosecutor, Mr. Maxwell, who with great dexterity demolished Mr. Mitchell Innes's arguments one by one, and brought out and drove home points which visibly impressed the Court, and obviously took counsel for the defence by surprise. Judge Thorp's summing-up was a brilliant effort. He had a most difficult task to perform, in view of the mass of evidence produced and the contradiction of several of the witnesses, but he cleverly sifted the corn from the chaff, laid bare the real issues which the Court will have to decide, and dealt with the points in favour of either side with an impartiality that has tremendously impressed the public with the sense of justice which actuates an English Court of Justice.

**The Mecca Pilgrimage.**

The Holy Carpet returned safely to Cairo this week, and the ceremony attendant thereon was presided over by the Prime Minister, Mohammed Tewfik Nessim Pasha, on behalf of the Sultan. The pilgrimage this year has been quite successful, but owing to the prevalence of plague the pilgrims have been forced to do three weeks' quarantine at Tor.

**Cairo's Little Earthquake.**

On Friday morning, at a little after 4 a.m., we were all awakened out of our sleep by ominous rumblings, by very violent swaying and shaking of our beds, by the banging of shutters, and the shrill cries of birds. The disturbance lasted only a very short time, but was sufficient to disturb practically the whole city. From the report of the Helouan Observatory, it appears that this was an earthquake, which the seisemograph showed as having taken place at 4.11 a.m., and that it was the severest shock that the observatory has recorded since its foundation in 1903. The authorities are of opinion that it was a purely local earthquake, especially as the instrument gave no previous warning, and swung at once to maximum. Certainly, as far as Egypt was concerned, the earthquake, which lasted about half a minute, was confined to an area not farther north of Cairo than Tanta or farther south than Bedrashein; nevertheless, while it lasted, it was, to say the least, unpleasant. Strange to relate, considering the jerry-built nature of most of the buildings in Cairo, scarcely any damage was done, and yet in 1911, when an earthquake of much less severity took place, quite a number of houses fell down or showed ominous cracks.

---

CAIRO, October 11.

**Sultan's Accession Day.**

Saturday was the third anniversary of the accession of Sultan Fuad I., and a big reception was held at Ras El Tin Palace in the morning; while in the evening Mohammed Tewfik Nessim Pasha, the Prime Minister, gave a banquet at San Stefano Casino in honour of the occasion.

Field-Marshal Lord Allenby is expected back in Egypt towards the end of the month, by which time the Residency will have returned to Cairo. It is not expected, however, that the seat of the Government will be moved back until late in November, owing to the Sultan having to remain in Alexandria until the constructional work at Abdin Palace has been completed.

**The Conspiracy Trial.**

The Military Court reassembled last Tuesday, and at once released four of the accused, including Kyriakos Mikhail, the Coptic journalist. As regards the remaining twenty-three prisoners, who, of course, include Abdel Rahman Bey Fahmy, the Court asked whether they or their counsel had any statement to make in mitigation of punishment, and it is interesting to note that almost without exception they declared that they relied upon the feelings of mercy and the sense of justice which always actuate the British Courts of justice. The sentences of the Court will not be known until the Commander-in-Chief has approved of them, and it is not expected that their promulgation will take place for another week or so. In the meantime people are asking themselves what action Zaghloul Pasha and his colleagues of the Egyptian Delegation are going to take now that the Secretary of their Cairo Committee has been convicted of conspiracy. As Abdel Rahman Bey Fahmy's counsel pointed out in arguing that his client was innocent, he still holds the position of secretary, and without some statement to the contrary from the Egyptian Delegation he will undergo his punishment in that capacity.

**The Kantara Bridge.**

Negotiations have been proceeding for some little time between the Suez Canal Company and the Egyptian Government with regard to the facilities granted by the company to the military authorities during the war within the zone belonging to it under its concession. As various erroneous or misleading versions have appeared in the local Press, it may be as well to give the actual facts of the case. When war broke out, and it was obvious that the Eastern frontier would become one of the important war fronts, the Suez Canal Company readily granted the military authorities permission to make use of whatever sites on either bank of the canal might facilitate their work, and at the same time it gave permission for the erection at Kantara of a bridge of boats, which was subsequently replaced by an iron railway bridge. The company states that these facilities were granted on the strict understanding that when war was over, and the requirements of the military situation could no longer be considered as taking precedence over those of steam navigation, the sites occupied should be evacuated and the bridge pulled down. As far as can be ascertained, this was the understanding, but it appears that little or anything had

Digitized by Google

been done until recently to carry out the post-war part of the agreement.

The company has latterly made representations on the matter to the Egyptian Government, emphasising the fact that the existence of the bridge constitutes a great hindrance to navigation on the canal, and, in fact, in view of the large size of the steamers nowadays, traversing the canal, it is fast becoming a great menace to navigation. I understand that negotiations have latterly been going on between the British Government and the company through Paris, and that an understanding has been come to whereby the land occupied is to be evacuated as quickly as possible, the bridge removed by the end of the year and a scheme studied for some means of connecting the Egyptian and Palestine railway systems. In the latter connection I understand that the Egyptian State Railways have sent one of their engineers to the United States to study the question, and that he is expected back early next month, when a meeting will be held in Paris to go into the whole question. I would add, that at present there is an alternative proposal either to cut a tunnel under the canal, or to erect a bridge specially constructed, so that it will under no circumstances interfere with navigation.

**Gas Strike.**

The threatened strike of gas and electric light workers has taken place, and both Cairo and Alexandria have had the unpleasant experience of having to go for one day without any lights, and for three days on what one might call rations. In Alexandria, the strike has now come to an end, but not so in Cairo, where thanks to the assistance rendered by the Royal Engineers we have been able to have a restricted supply of electric light in the houses and shops. It has, however, been found impossible to light the streets, and the danger to public security while this condition of affairs lasts has become very serious. Meanwhile, there are rumours of trouble [illegible] the train workers.

---

PORT SAID, October 14.

**A Coal Muddle.**

With the menace of the coal strike still unremoved, I cannot help again reverting in these notes to the utter disorganisation of the world's coal supplies, of which we are constantly having examples in this place. A Norwegian ship recently brought seven thousand tons of coal from Norfolk, U.S.A., to Italy. From there she is proceeding in ballast through the Canal to Newcastle, N.S.W. On her way out, while not earning a single penny, she will consume in her furnaces 650 tons of oil and 1,100 tons of coal, to say nothing of paying £1,200 as Canal dues. At Newcastle she will load coal for Norway, and in getting there she will burn 700 tons of oil and 1,100 tons of coal. When will this sort of thing end?

**More Communications Troubles.**

Great complaints are made even yet as to the means of communication between Egypt and Palestine. Letters take anything from one to three days, and telegrams frequently take longer. The Custom House procedure at Kantara is execrable, and the truculence and incivility of the officials recall the bad old days of trans-Continental travel. One gentleman who was taking three pound packets of butter to Palestine had the interior of each packet thoroughly searched by the Customs official with the long iron spike with which they search for contraband in sacks of grain. Presumably he was doing his duty in looking for concealed rifles, but the butter was afterwards useless as human food. Another case known to your correspondent was of a lady in whose bag a Kantara Customs official found a tea-spoon tea-infuser, which he tried to confiscate, as he said it was an "antika." Altogether travellers are put to the maximum of trouble possible. No doubt this is meant to discourage would-be visitors to Palestine, but the net result is that only the desirable class of visitor is discouraged, and the undesirable class, who know the custom of the country, get through with a minimum of trouble, and no expense beyond the custom of the country.

**Postal Eccentricities.**

A book might be compiled about the humours of the Post Office here. A lady recently wished to send three heads of Indian corn to England as a curio. The postal officials refused to accept it without a Customs permit for the export of foodstuffs. So this little parcel had to be taken to the Customs House to get the sanction of the official there for this export! However, this is put in the shade by an experience of a man who wished to make a payment in Ceylon. The banks would not quote a price for a draft, as they did not know the rate of exchange, so the man bought Ceylon paper money here, intending to send it by post. He then purchased a special linen-lined registered envelope from the post office, put his money and letter inside, and took it to the post office. However, to his intense surprise and indignation, the officials would not accept it, as they said the envelope was constructed in such a way that it could not be sealed sufficiently to stop thefts by the employees. So he had to cut the envelope open and put the money into an ordinary commercial paper envelope, which the official then accepted. Thinking about it afterwards, one can see the humorous side, but to the busy business man the humour is apt to be attenuated.

**An Electricians' Strike.**

Messrs. Worms and Co.'s electricians are on strike, and consequently there is no one to attend the searchlights which they put on board the ships for night navigation in the Canal. As a result many ships are only able to transit in daylight, and are delayed considerably. I hear that the question is not one of wages, but of sending one or two men in charge of a searchlight when the ship supplies her own power, and from the men's point of view their request seems reasonable enough. It is feared that if the strike is not quickly settled it may spread, as there is considerable sympathy with the electricians amongst other classes of employees in the town.

---

## YUGOSLAVIA.

BELGRADE, October 19.

**The Klagenfurt Plebiscite.**

The results of the plebiscite at Celovac (Klagenfurt) are received with mingled disappointment and bitterness. The *Politika* has come out with a leading article upbraiding the Slovenes for allowing themselves to be thus Germanised, and preferring their stomachs to their freedom, concluding with the fervid hope that the day will yet come when they will be liberated in spite of themselves.

Immediately after the plebiscite information came in that the Austrians were venting their wrath on the Slovenes who had voted against them, burning their houses, flogging men, and actually killing the brother of a prominent schoolmaster. The Serbian commandant, General Maister, came at once to Belgrade to confer with the Government, and a Cabinet Council was urgently summoned. Dr. Brettz, President of the Provincial Government, requested Dr. Trumbitch to call at Liubliana on his way to Italy to satisfy himself that the Allied authorities had not maintained absolute fairplay, since the Italians, who are notoriously an interested party, were represented, and abused their position to favour the German element. Meanwhile, there were demonstrations at Liubliana, the excited crowds urging the military authorities to expel the Austrians and Italians from the district in question and protect the Slovenes who had voted for union with Yugoslavia. General Maister pressed for authority to occupy the district at least as far as the Drave, where most of the population had voted for S.H.S. and were now exposed to the retaliation of the victorious Austrians. The Government telegraphed a protest to Vienna. Finally is was decided to send a contingent of troops as an emergency measure to protect the minority and maintain order until things settle down. This is an unfortunate necessity, as Rome will certainly make capital out of it to blacken Yugoslavia in the eyes of the Powers; but it is the Powers' own fault for taking no steps to ensure order other than sending a small con-

Digitized by Google

mission of Allied officers, who, with the best intentions in the world, could not police the district without men, and who included at least one Italian in their body. If at the eleventh hour they decide to send Italian troops, the fat will be in the fire, for the Slavs could not tolerate that. Meanwhile, for the period of interregnum, no authorities were present to keep order, and the hooligans had it all their own way till this contingent of Serbs arrived to protect life and property.

**Politicians' Activities.**

It is again reported that the Narodny Club will vote in one block with the separatist Frankovist party and the Raditch group. Raditch has been in prison for high treason for a long time, and it was his group that organised the recent unfortunate disturbances in Croatia, with the definite object of provoking revolution. The Serbs, however, are not much perturbed by this threat, for the two main parties, Radicals and Democrats, are agreed upon the essential national policy of a single State, a single sovereign power, and that the provincial governments shall have no legislative powers and shall not be responsible to the provincial diets.

This attempt at forming a single party in Dalmatia has failed. Dr. Trumbitch and Dr. Smodlaka will lead the "non-party party," and the Democrats and Radicals conduct their own campaign. Dr. Liuba Jovanovitch, a prominent Radical, who was Minister of the Interior in the Salonika Government, himself a native of Cattaro, will lead the Radicals in Dalmatia.

All the politicians are busy. M. Jasha Prodanovitch, leader of the little Republican party, will stand for Vranja. The followers of Dr. Bogdan Medakovitch, who call themselves Dissident Democrats, being landowners, are opposed to the Democratic programme of Agrarian Reform, and will vote with the Radicals. M. Pashitch is busy electioneering at Novi Sad, and is then going to Bosnia and Dalmatia. M. Sv. Pubitchevitch is at work in the Lika district.

**The Adriatic Negotiations.**

The composition of the delegation to negotiate directly with Italy on the Adriatic Question is now announced. The Prime Minister will be accompanied by his secretary, M. N. Ilitch; Dr. Trumbitch by his *chef de cabinet*, M. St. Pavlovitch, and secretary, M. Tsintsar-Markovitch; M. Kosha Stojanovitch, Minister of Finance, by his *chef de cabinet*, M. Bratislav Stojanovitch.

**Serbian War Victims.**

During the three years' exile a large number of Serbs, not only sick and wounded soldiers, but civilians, died abroad, in Algeria, France, Switzerland, and Italy. The Government is now approaching the countries in question with the request that they will give facilities to relatives to transport the remains of their dead to Serbia, and to excuse them Customs and other frontier charges. Facilities will also be given to relatives to exchange money at the official rates, which privilege should relieve the financial burden.

## TURKEY.

CONSTANTINOPLE, October 17.

**The Cabinet.**

Although not a word indicative of a further crisis is allowed to appear in the local Press, there is no doubt that the political situation has become such that a radical change is inevitable. It is now two months since the Turkish plenipotentiaries signed the Treaty of Sèvres, and during that time not the slightest progress has been made with the all-important task of applying the Treaty conditions. The punitive expedition which the Government proposed to send to Anatolia has not got beyond the paper stage. This for two very good reasons: first, the Treasury is absolutely empty, and next the mass of the nation is with Mustapha Kemal, rather than with Damad Ferid Pasha. Every Turk, no matter what may be his political creed, resents the cession to Greece of Smyrna, and it is not surprising, therefore, that men will not volunteer to fight Mustapha Kemal, whose main object is said to be to drive the Greeks from Anatolia. The plans for the punitive expedition included the formation of four divisions, but not one-sixth of the necessary number of volunteers has been obtained for one division; and even these are not properly armed and equipped. At this rate it will take one year to get one division together; and as the conditions of the Treaty must be applied within six months, it is clear that there must be a radical alteration in the administration. Damad Ferid Pasha is pledged to extreme measures; he has outlawed the rebel leaders and condemned them to death. It is therefore impossible for him to climb down and attempt a reconciliation, even if he could bring himself to do it. There has been some talk of a "pacification" mission proceeding to Angora under the auspices of Lutfi Fikri Bey, formerly deputy for Dersim, and a politician with a most honourable reputation. The mission was to have an entirely unofficial character, and it appears that the matter has not been entirely dropped, but it is certain that it can accomplish nothing whatever under the present circumstances.

As matters stand, the Grand Vizier has no alternative to coercion other than resignation. It is also not at all improbable that the fall of Damad Ferid Pasha may involve something more than a mere change of Cabinet; for the Sultan himself is involved to the same degree as the Grand Vizier in the policy of extreme measures. It is difficult to see how the Sultan could possibly consent to treat with those whom his own decrees had outlawed and condemned to death. In view of the apparent impossibility of the Nationalist movement being suppressed by force, there remains the alternative of attempting to bring about a reconciliation, and this attempt could only be made if a Cabinet of moderate Nationalist tendencies were in power. This appears to be what will come about in the near future; and if one might hazard a guess, Tewfik Pasha may be Damad Ferid Pasha's successor, with Ahmed Izzet Pasha as Minister of War, and the real master of the situation.

**Anatolia.**

The situation in eastern Anatolia is of absorbing interest at the present moment, on account of the offensive launched by Kiazim Karabekir's army against the Armenians, at the same time as an attack from the other side by the Bolshevists. The Armenian papers are putting a brave face upon the matter, but there is reason to believe that things are going hard with the unfortunate Erivan Republic. So far as can be judged, the Turko-Bolshevist armies are aiming at the severance of the Tiflis-Erivan railway, which would make them masters of the whole of the country to the west of that line. The Turks are, of course, after the "three sanjaks" of Kars, Ardahan, and Batum, which were ceded to them by the Treaty of Brest-Litovsk, and to which they have never renounced their claims, in spite of the armistice of Mudros. If the scheme succeeds, it remains to be seen whether the Russians will fall in with the views of their "allies," as the Turks call themselves, although comrade Apfelbaum hinted to the contrary at the recent Baku Congress. It also remains to be seen whether, having re-established the old Russian frontiers in the Caucasus, the Russians will be content. There is every indication that they will not; for it is reported that there are considerable numbers of Russians in Anatolia already, and there is certainly a Russian mission at Angora. The Turks, with the gambling spirit that seems to have taken possession of them ever since the Committee of Union and Progress dethroned the cautious and wily Abdul Hamid, are probably relying upon the speedy downfall of Bolshevism to save them from the Muscovite embrace; but that downfall may not make the difference that they expect.

**Cilicia.**

Such are the conflicting reports with regard to the Cilician situation that it is impossible to obtain a clear view of matters. The only thing that seems tolerably clear is that the French have once again switched off at a tangent to their policy of assisting the Armenians, and have given that unfortunate people further reasons for complaint. The French authorities are said to be deporting all Armenians who have entered the country since the Armistice, and who cannot be regarded as natives of Cilicia. At the same time relief has been stopped for the thousands of refugees who have flocked to Adana and elsewhere during the last few months.

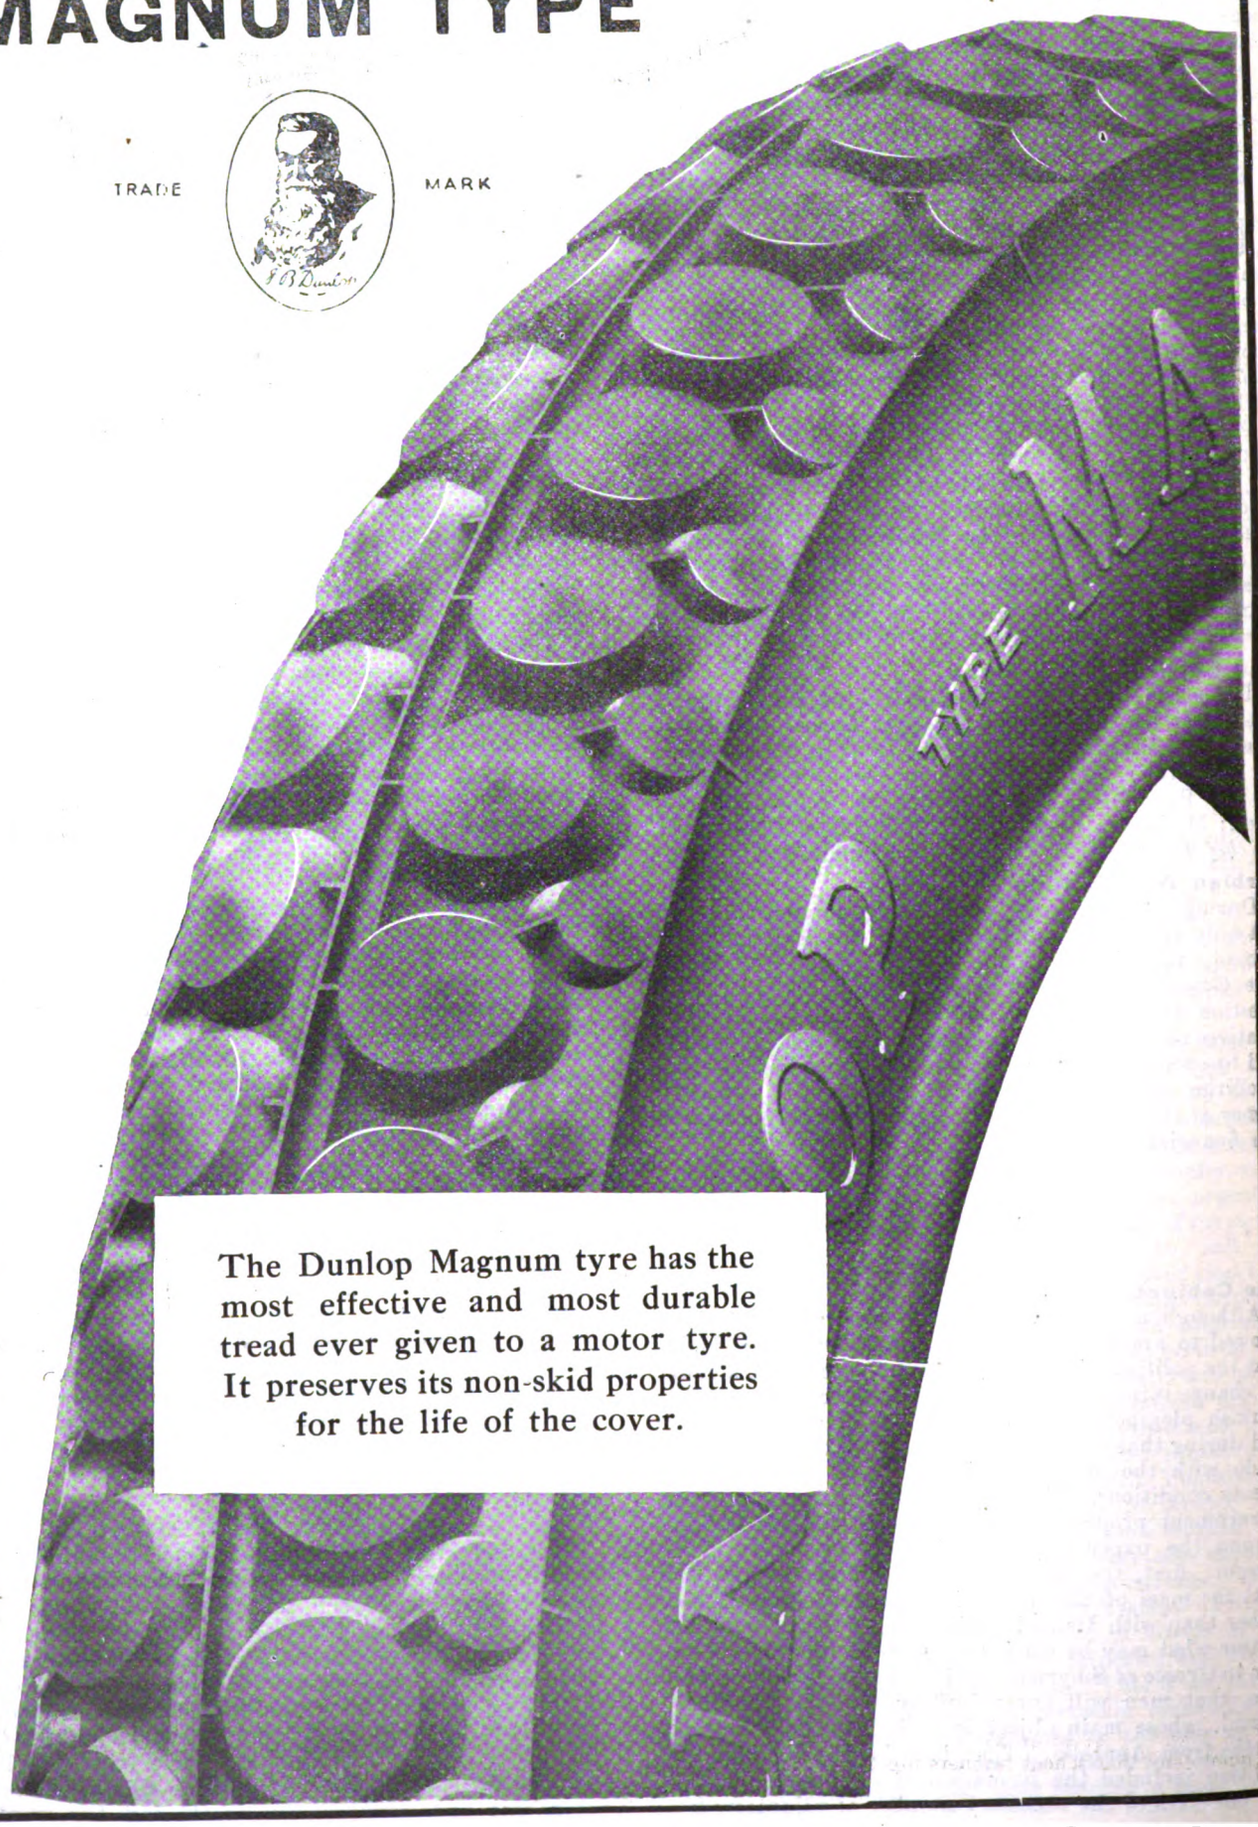
# DUNLOP

## THE NEW MAGNUM TYPE

TRADE  MARK



The Dunlop Magnum tyre has the most effective and most durable tread ever given to a motor tyre. It preserves its non-skid properties for the life of the cover.

Digitized by Google

Following the announcement of the French intention to restore Turkish rule in Adana, these circumstances render it hardly a matter for surprise that the Armenians should conclude that the French desire their complete extermination from Cilicia. More successful methods to such an end could hardly have been devised.

## BULGARIA.

Sofia, October 10.

### A Frontier Incident.

An unfortunate incident occurred on September 30 on the Greco-Bulgarian frontier, five miles north of Ortakeui. Early in the morning a Greek soldier was killed on Bulgarian territory in circumstances which have not yet been established. On the Bulgarian side an inquiry into the incident was at once ordered; while on the Greek side a request was made for the immediate handing over of the body, which was refused by the Bulgarians until the necessary judicial investigation had been made. According to information received here, at daybreak on October 2, Greek troops crossed the Bulgarian frontier, and captured and set on fire the Bulgarian post, No. 8, on the left bank of the Arda. A few hours later they opened fire on post No. 7, on the right bank of the river. Bulgarian troops shortly afterwards reoccupied post No. 8, finding that one of the occupants had been killed, but discovering no trace of the other three.

Representations made by the Bulgarian Government to the Greek Minister in Sofia have led to the evacuation of Bulgarian territory by the Greek troops, and a mixed commission has been appointed to inquire into the whole incident. The Bulgarian Government records its grateful recognition of the friendly attitude adopted in the matter by M. Panourias, the Greek Chargé d'Affaires.

## CYPRUS.

Undated.

### The Situation.

Letters from a London correspondent, extracts from which are published in a Greek paper, *Eleutheria* (Liberty), state that the latest news is not favourable to the "Unionist" cause, but that the Cypriot people should be told the truth. At a recent meeting of British Ministers it was, it states, decided that Cyprus should be retained: but as M. Venizelos is expected in England in November, matters may yet take another turn. Another extract states that Mr. T. P. O'Connor informed a member of the deputation that he had been told by Mr. Amery that nothing had been positively decided, which accords with the promise that the House of Commons would have a voice in the matter. There were matters of great importance regarding which it was desirable that the deputies should communicate with their compatriots verbally on their return to Cyprus.

Great interest continues to be taken in the course of Italo-Hellenic negotiations, the papers now stating that a definite agreement has been come to that Italy should keep Rhodes and Castellorizzo, and that should Britain cede Cyprus, the fate of Rhodes will be put to the vote of the Rhodians; but that Italy would in any case retain Rhodes for fifteen years.

### The Legislative Council.

The Draft Education Bill, upon which much time and care have been bestowed, came before the special meeting of the Council, but has been dropped as far as regards the Greek community, owing to the opposition of Greek members. The pretexts given have been that some members were absent (*i.e.*, on the deputation), that the time was not opportune, and that the new taxes were open to objection. They desire that there should be a special fund, similar to the Locust Fund. The real reasons were that they fear any extension of Government control, which is, of course, indispensable if Government is to pay the greatly enlarged cost of salaries out of increaed taxation. They dislike the proposed appointment of schoolmasters by the High Commissioner. They have, indeed, always been restive under the inspection of schools by a Government official, although there is also a Greek inspector. The truth is that the Greek authorities desire to employ the schoolmasters as political agents. M. Theodotou, who, by the way, is a member of the deputation still with the Archbishop in London, and is "one of the most prominent and certainly one of the ablest Greeks in Cyprus," stated candidly to Messrs. Cape and Talbot (who reported on education in Cyprus in 1913), "we cannot deny that school teachers are factors in the country, socially and politically. . . . They have helped to bring about the reduction of the tribute to Turkey. . . . They have educated the people in fighting for their political rights. They are in our hands a weapon difficult to fight against, and we do not want to hand them over to the Government." The Press approves their action and calls the bill a "gift that is no gift." The Government finally agreed that the law should apply to Moslem schools only. The Moslems are quite content that the appointment and dismissal of teachers should be in Government hands, and Irfan Bey, Turkish member, expressed the gratitude of the community for the benefits which the new law brings.

### Salaries of Officials.

The increase of salaries takes effect from April 1 last. There is an increase of 25 per cent. for those whose salaries are less than £400 a year and of 20 per cent. for those whose emoluments are higher. One paper, the *Herald* (Kiryx), has the courage to take up strongly what is called "the greatest injustice," viz., the case of retired officials in receipt of pensions, and whose allowances should in justice be increased even more than those of officials. There are some who bore the burden of the early years, when to say that they roughed it would be a mild expression. For many years these officials worked daily up to 7 and 8 p.m., Sundays included, often going many years without leave, in a roadless, feverish island. "Is this," the paper concludes, "the just reward of those who spent the whole of their active life in sincerely and conscientiously serving the Government?" It is high time that their case should be taken up. So far they have only been granted this year a paltry "temporary bonus."

### Crime.

Crime maintains its level. An atrocious murder has been committed in a village. A Turk named Hassan Emir Mustafa was betrothed to a girl, Aysheh Halil. The engagement was broken off. In the absence of the girl's father Hassan went to her house and asked the mother to allow her to go with him. On the mother refusing, he cut her throat, and on the daughter crying out he stabbed her to death and cut out her tongue.

An Armenian has been caught endeavouring to smuggle out of the island £616 sterling and £T181 in gold in hampers of grapes.

### General News.

The High Commissioner is proceeding to England on leave in October.

Two earthquake shocks were felt at Limassol about midnight on September 20, and also at other places. At Limassol there was considerable alarm.

Lieut.-Colonel Longhurst, R.A.M.C., who was in Cyprus some years ago as P.M.O., is in the island.

Among the flying rumours, probably traceable to some Zionist visitors, is one that Cyprus is to be placed under the Palestine administration.

## THE MESOPOTAMIAN PROBLEM.

On October 21, before the Central Asian Society, Captain Shepperd delivered a lecture on "Some Military Aspects of the Mesopotamian Problem." In 1915, said the lecturer, we sent a division to Mesopotamia to secure our interests in oil in the Persian Gulf, and to police the country. Up to the time of the Armistice our prestige was high, but subsequently we lost our hold, owing chiefly to anti-British propaganda and the sudden rise of the new-rich, a class not confined to European countries. Our policy in the East must now be to safeguard that heel of Achilles of the British Empire—India. We were menaced by the danger of an attack by Russia on India by way of the Persian Gulf. We could not leave Mesopotamia to become lawless, nor Persia to be overrun by Bolshevists. If we adopted a policy of conciliation and showed generosity and magnanimity, we should solve the very acute danger of the invasion of India by Bolshevist Russia.

## INDIA'S NEW CHARTER.

At the luncheon given at the Connaught Rooms by the Overseas Club and Patriotic League, Sir William Meyer, the first High Commissioner for India, said that the recent Act, which gave India a new charter, was only a temporary half-way house towards complete autonomy. In ten years hence the whole position had to be reviewed by a Royal Commission with a view to seeing how much more India could receive. One hoped that the feeling which now prevailed between the moderates and the extremists would subside, and he looked forward with great confidence to the visit of the Prince of Wales next year to pour oil on the troubled waters. The position was full of difficulty, but we had to go on as we had started. We had to trust that the people of India would gradually become more and more fitted for self-government, and that they would remain absolutely loyal to the Empire.

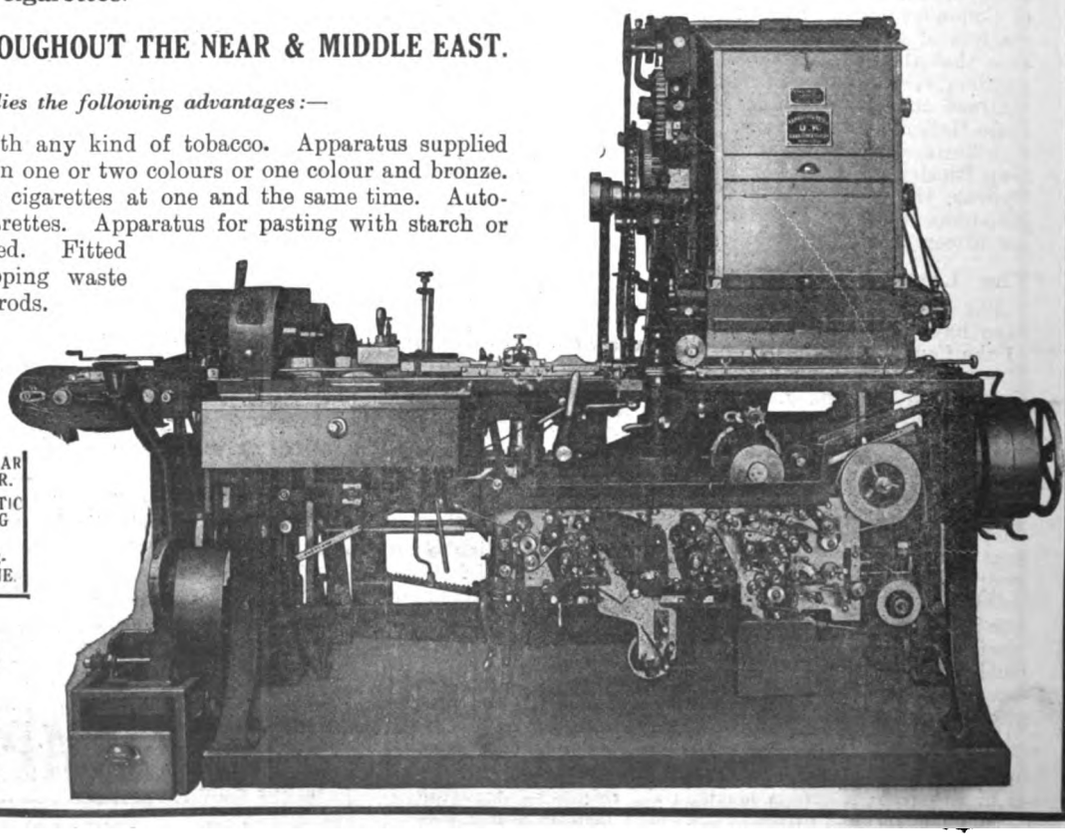
# The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

## IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

*Embodies the following advantages:—*

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.



*Also:—*

THE "UNIVERSAL" CIGARETTE MACHINE.

THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.

"S.M." DOUBLE AUTOMATIC CIRCULAR KNIFE GRINDING MACHINE.

AUTOMATIC CIGARETTE-WASTE STRIPPING MACHINE.

**United Cigarette Machine Co., Inc.**
**80, Coleman Street, LONDON, England.**

# CORRESPONDENCE.

## MESOPOTAMIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—You have just quoted in your issue of the 21st the criticism passed by *The Times* in its leader of October 14 on the very important speech which Lord Curzon made at the Central Asian Society's dinner of October 12, at which he presided. This subject was yesterday treated by one who has come fresh from Mesopotamia, and who gave us his views formed on the spot and biassed by no politics. He showed us precisely what Lord Curzon contended, viz., that the interest which we have in peace and security of tenure in those countries which have long been known as "Buffer States" centres finally in India. It is for the security of India from invasion from the North-west that we have for more than a century striven, and to-day still strive to maintain an impassable barrier from the Pamirs to the Persian Gulf. That means an Afghanistan and Persia allied and sharing mutual interests with us, a Trans-Caucasian—or rather, from the point of view of India, a cis-Caucasian—barrier against aggression from the Caucasus, and such a co-operation between British and French in Upper Mesopotamia, Cilicia, and Syria, backed by the independent Arab, as will at once thwart any Turkish designs and assist and aid the Trans-Caucasian Republics, Georgia, Armenia, and Azerbaijan, in maintaining their independence. This we cannot do if we evacuate Mesopotamia *instanter*. His Majesty's Government has now openly stated that the independence of the Arab is the keynote of its policy, and to carry out that policy Sir Percy Cox is at Baghdad. So far the policy of France in Syria has been conspicuous by its determination to counter Arab independence. France has most unquestionably trenched upon rights claimed by the Emir Faisal, and in order to conciliate the French has disappointed the Arab. In gratitude for this Pierre Loti pours out his woes on the decadence of France in the East in a volume which, as far as a brief perusal enabled me to judge, attributed the responsibility for this to the country which spent thousands of millions and hundreds of thousands of men to save France from Prussia. It is just about two years since Britain and France issued a joint proclamation stating in the clearest terms their policy in the land of the Arabs. In fulfilling the terms of that proclamation we are most distinctly entitled to the thorough support of the French, and that the more so, seeing that France claims 25 per cent. of the oil-wealth of Mesopotamia. It is not so long since an Englishman, the record of whose travels in Asia Minor has made him well known, wrote to me and gave it as his opinion that the aspirations of certain Continental Powers in the Near and Middle East would have but a short life. Time would prove to those Powers that they had bitten off more than they could chew.

I have been greatly interested by Sirdar Ikbal Ali Shah's proposal that a very influential member of the Sharifian family at Mecca, who for years has been a political prisoner at Constantinople, should be brought forth from his seclusion on the Bosphorus and sent to Baghdad to be trained to assume the government of Mesopotamia. We presume that Sir Percy Cox would be his mentor. It is to be noted that Professor Kay, of St. Andrew's, who knows what he is writing about, has strongly endorsed what Sirdar Ikbal Ali Shah recommends. Both the originator and endorser of this proposal are members of the Central Asian Society, and serve to emphasise the truth of Lord Curzon's statement, made at the dinner on the 12th, that not only had that society a great work before it, but also the power and prestige needed to carry out that work.

I must refrain here from even giving an outline of the great future of the Aegeo-Euxine Straits, the Black Sea, with the ports of Trebizond and Batoum, and of the railways of Persia and Central Asia as one of the great trade-routes between East and West. You will remember that the astute German, once he realised that the Baghdad Railway was lost to him, conceived the exploitation of this very route, which the Entente, if they are wise, will develop, and which the League of Nations should protect. This is a theme which Sirdar Ikbal Ali Shah, when he lectures to the C.A.S. on November 10 on "Central Asia," may well handle. His lecture should, in a measure, be a complement of that which Captain Sheppard gave us with such excellent results yesterday.—Your obedient servant,

A. C. YATE, Lieut.-Col.
(Hon. Sec., Central Asian Society.)

The Athenæum, October 22, 1920.

## A TURKISH DISH.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As regards the dish, "Imam bayildi," the explanation given by Corsair is, I have no doubt, the correct one—viz.: that the Imam fainted from excess of joy: as I believe most Turks would agree. Three other explanations have been offered by your correspondents, one being that the mythical Imam was so fatigued in dispensing the popular dish that he fainted from the exertion. Another is that he swooned on discovering that the dish contained garlic and onions, against which it is alleged (on what authority?) that the Prophet was prejudiced. Your correspondent, A. C. Silley, offers one which certainly cannot be accepted. He is, I think, introducing what is "another story." "Imam bayildi" is undoubtedly composed of "bedinjan" (egg-plant, or aubergine), which Mr. Silley would eliminate. The vegetable is cooked in a variety of ways by Near East cooks. I am acquainted with about ten recipes, and should be glad to give Mr. Silley that of the Imam connoisseur, as prepared by the best Turkish cooks, should he wish for it. Bedinjans, not particularly good, cost in London at present 10d. and 1s. apiece, and the dish cannot be recommended as an economical one!

R. L. N. MICHELL.

22, Lansdowne Crescent, W.11, October 25.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—May I, in my turn, give a slightly different version of the story concerning the origin of the above. Your readers will pardon me if, the incident being a purely Turkish one, some little explanation of a Turkish expression becomes necessary to render the narrative comprehensible.

The Imam had, as Silley Bey remarks, brought home some olive oil for the lamps of the mosque, but what followed differs from his version. The wife of the Imam, not having sufficient oil herself to prepare the dish of "patlijan," etc., asked her husband if she might take a little of his. The Imam suffered from stuttering, and, meaning to stop the pouring out of the oil after she had taken what he considered sufficient, tried to say "koyma"—The "ma" in Turkish turning the word "koy," meaning "put" or "pour," into "do *not* put" or "stop pouring." What he succeeded in saying was "koy-koy-koy-koy-koy-" and his wife, thinking he meant her to continue to pour out, went on gaily till the poor Imam at last, seeing his precious oil all gone before he had succeeded in getting out the "koyma," fainted away from despair.

That, I think I am correct in stating, is the true Turkish story of the origin of the dish "Imam baildi"—the Imam fainted—which is prepared with a very liberal amount of olive oil.

I am, etc.,
October 21, 1920. A. P. TULLY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In reply to the letter of Mr. A. C. Silley, I must point out that I wrote "Mohammed advised," and not "ordered." If your correspondent would care to find a copy of "Sahih-ul-Bahari"—which has been published in Cairo, with commentaries, in twelve volumes, and is considered to be the best authority upon the quotations of the Prophet—and look up "Ehadith," under the title of "El-Ma'kulet," there he will not fail to notice that on a certain occasion Mohammed said: "The angels of God cannot be near to those persons who eat garlic and onion."

"Imam Baildi" is neither a delicacy nor a much-appreciated dish. It is rarely cooked in the houses of the high-class people of the Near East, including Constantinople. His story is not so happy. An Imam occupies the highest position in the Mohammedan religious rites, and does not concern himself with the lamps of the mosque. This is the special business of the attendant of the mosque, who is called "Kayim." It is a proverbial fact that Imams do not eat garlic, especially on the eve of a great religious festival, and rarely taste onion.

It may be of interest for the people of the West to know that in the Near East garlic is used as the only effective medicine against snakes. Experience has taught that even adders avoid its smell, and do not approach places where a few bulbs of garlic are kept for some time.—I am, etc.,

October 23, 1920. M. N. BODAMIALISADE.

## PALESTINE FOR TOURISTS.

Active measures are now being taken by the Government of Palestine for an anticipated influx of tourists next spring. According to the *Palestine Daily Mail* (published in Jerusalem) the Government has appointed a Commission under the presidency of Mr. Wyndham Deedes to consider what steps should be taken to provide sufficient hotel accommodation for the tourists expected in 1921, the improvement of transit facilities and the development of general trade conditions. The first meeting of the Commission has already been held.

The British Government has given permission to the Germans who were expelled from Palestine and Egypt to return to those countries.

# LORD ALLENBY'S REPORT ON EGYPT.

The "Reports of H.M. High Commissioner on the Finances, Administration, and Condition of Egypt and the Soudan for the Period 1914-1919" [Cmd. 957] was issued recently. Owing to the long period covered and the conditions brought about by the war, it differs greatly from pre-war reports, but, as usual, it contains much valuable information.

In the section dealing with the Ministry of Finance, mention of the premature death of Lord Edward Cecil calls forth a tribute to his devotion and foresight, which were "especially valuable in the difficult circumstances attending the early years of the war." After reference to the good work of Sir William Brunyate and the country's fortune in obtaining the services of Sir Paul Harvey again, the report continues:—

Important changes have been made in the organisation of the Ministry of Finance. Hitherto several departments have been subordinated to the Ministry of Finance which are not directly concerned with the primary functions of such a Ministry. It has seemed desirable to detach these departments from the Ministry of Finance, and the recent creation of a Ministry of Communications has already permitted the transfer of the Postal Administration and the Ports and Lights Administration to that Ministry. The Central Administration of the Ministry of Finance has also been reorganised. The important group of services included under the State Accounts Department has been redistributed; and the general control of Government accounts, pensions, etc., has been entrusted to a Controller of Government Accounts, while a Controller of Budget and Establishment has been appointed to undertake the preparation of the annual Budget and to deal with modifications of budgetary grants and general questions relating to departmental establishments. A consulting office has been formed under the Financial Secretary, which is intended to carry out research and to provide information and advice on economic and financial subjects. New posts of Controller-General of Administration and Controller of Government Purchases have been created: the former official is charged with supervising the general administrative work of the Ministry and other important matters, while the latter will co-ordinate the purchase of Government supplies: all supplies of a similar nature will be bought through the department which is most competent, and it is hoped that considerable economies will thus be effected. The duties of the Controller of Printing have been extended to include control over all Government printing executed in Egypt, an arrangement which will economise labour and material.

Under the heading "Education," we read that the educational outlook at the time of the Armistice seemed most hopeful. "It is greatly to be regretted that these brightened prospects should have been suddenly obliterated, at least temporarily, by the schools throughout the country throwing themselves, or being thrown, into a turmoil of strikes and demonstrations." As a result of these strikes:—

The Ministry of Education had no alternative but to postpone indefinitely the annual examinations which are usually held in May and June, and the colleges and schools were closed for the summer vacation at an abnormally early date. In the primary schools, however, an extra session was held during the month of August to make up for lost time, and in order to give the pupils a chance of passing the entrance examination to secondary schools. The postponed secondary education certificate examination was held in September, but the number of candidates was small. In a spirit of conciliation, and so as to avoid the loss of a year to the students and pupils generally, the Council of Ministers decided on August 11, 1919, to hold the promotion and diploma examinations of the higher colleges and a second session for the secondary examination in January, 1920.

The injury done to education by these disturbances is emphasised, but the Egyptian Government will not be deterred from its educational programme, but will increase opportunities of elementary education, and will extend and improve facilities for the higher branch of study.

There is ample room for reform in the educational system of Egypt, which is in particular excessively dominated by examinations both as an end in themselves and as providing a qualification for posts in the Government service. It is to be hoped that in the future the function of education as a training for life and citizenship will be kept clearly in view, and every encouragement given to the desire for knowledge and the cultivation of general intelligence. There is a keen demand for education throughout the country. I trust that the coming years will see a sustained effort on the part of the Ministry of Education, backed by a more liberal allocation of funds than it has hitherto been usual to provide, not only to meet the amount of the demand, but to instil true educational ideals into the minds of the people and of those who are responsible under the central authority for educating them.

Among points noted in this section of the report are the following:—

During the first years of the war there was a falling off in the numbers in the boys' primary schools, but since 1918 the numbers have notably increased, and several of the Government schools are now full, and even overcrowded. The attendance is now 8,609 as compared with 6,407 in 1914 and 6,197 in 1915. Since 1914 the number of Government secondary schools has increased from six to seven; but the attendance has fallen from 2,637 to 2,525. The number of private secondary schools under the inspection of the Ministry of Education rose from six in 1914, with an attendance of 1,508 pupils, to thirty-three in 1919, with 4,588 pupils enrolled. Only ten of these schools, however, were eligible for a grant-in-aid, as the remainder provided only half of the recognised secondary course. In consequence of the increased cost of maintenance, the Ministry has found it necessary to double its usual grants.

Among the many changes which have taken place in Egypt during the last few years none is more striking than the awakening interest of a certain section of Egyptian women in affairs outside the immediate circle of the home. This, the report remarks, is largely the result of education, and will influence, in its turn, the progress of education in the future. A few years ago it was rare to find a mother taking a direct personal interest in the welfare of her daughter at school, but during the last few years these conditions have changed in the larger towns, where mothers now visit the schools to discuss their daughters' progress with the head mistress. The Ministry maintains five higher elementary schools for girls, which have an attendance of 464 pupils; while in the two elementary training colleges maintained by the Ministry there are now 447 students. The Sania Training College, which trains teachers for the primary schools and elementary training colleges, has now eighty-two students, as compared with forty-eight in 1914.

On the subject of a State University, the report says:—

Educational developments have now reached a stage which makes it possible, and very desirable, to consider as a practical question the establishment of a State University. . . . The existing colleges furnish no opportunity for students, after completing their secondary course, to secure a liberal education apart from a professional career; the complete separation of the courses makes the present organisation of higher education inelastic, leaving little opportunity for optional studies or for different combinations of courses, and insufficient provision and incentive exist for post-graduate studies or original research. In short, the present organisation insufficiently sets forth high ideals, has developed no academic traditions, and is too exclusively utilitarian. It tends to foster the belief that the obtaining of a diploma is the one and only purpose to be kept in view, and fails to evoke the true spirit of culture—the pursuit of learning for its own sake. . . .

While there is need for the expansion of the existing professional colleges, an effort should be made at the same time to meet the requirements of those . . . who wish to pursue a higher course of study for the sake of general culture, without reference to any particular profession or career. Further, the long and varied history of Egypt, as well as its geographical situation and its position in the Moslem world, clearly point to the appropriateness of Cairo as a seat for a college of Oriental studies. At present Egypt, in spite of incomparable advantages, provides no opportunities (such as exist in the most important European universities) for acquiring a literary knowledge of the languages that are cognate with Arabic and of the comparative philology of the Semitic languages, or of the languages of Ancient Egypt, or for the investigation of the many literary, archæological, historical, and philosophical questions on which these studies throw light. The time has come for the creation of higher courses of study of the true university type. . . .

A commission was appointed by Sir Adly Yeghen Pasha in 1917 to consider this question. In 1918 it presented a preliminary report, but no effective steps were taken thereupon. The question is now being pressed forward with a view to early effect being given to the proposals.

As was to be expected, "the effect of war conditions was particularly pronounced in the sphere of the Ministry of the Interior:—

Thus the Public Security Department became, for certain purposes, a local branch of the Intelligence Section of the General Staff; members of the Egyptian Police were regarded as the executive of the Commander-in-Chief for the enforcement of the provisions of proclamations and orders issued under martial law; and the provincial machinery of the Ministry of the Interior was for considerable periods very largely occupied by recruiting for the Egyptian Labour Corps and obtaining supplies for the army.

The reorganisation of the provincial police has been the subject of a special inquiry, a report on the question has been presented to the Ministry, and "it is hoped gradually to develop some of the suggestions made therein." The City Police have been sorely tried by the conditions brought about by the war, but they merit, and receive, praise for their efficiency, good discipline, and restraint.

At the end of 1919 there were 16,978 prisoners, compared with 13,310 at the close of 1918, the daily average (15,411) showing an increase of 1,026 on the 1914 figures.

The following paragraphs from the section dealing with the Health Department are interesting:—

The political excitement in the spring, culminating in demonstrations, disturbances, and strikes, resulted in a serious setback to public health work in 1919. Owing to the desertion of the non-technical staff, and to the difficulty of supply, isolation hospitals and camps and infectious disease treatment centres had of necessity to be closed down, so that isolated *foci* of in-

Digitized by Google

fection in out-districts and villages, usually easily dealt with, could not be taken in hand, and were perforce left to smoulder and to flare up subsequently in epidemic virulence. Not only the lower-grade personnel quitted their posts and work at out-stations, but even the clerical staffs at Mudiria towns and headquarters became so infected with the general excitement that it is to be feared statistical tables and figures suffered, and will fail to give reliable statements of the work of the different sections and departments of the administration.

Although the great majority of the Egyptian medical staff participated in the national movement and aspirations, to their credit be it said that their sense of public duty, respect for humanitarian principles, and for professional ethics, led them to report their assurance of the continuity of service at hospitals, dispensaries, laboratories, and public health offices at a moment when practically every other branch of the service had stopped work as a sign of public protest.

It is satisfactory to learn that steps have been taken to reopen the campaign against ankylostomiasis and bilharziasis, which cause so much suffering and loss of efficiency amongst the population of Egypt, especially the fellaheen. An Anglo-Egyptian committee has the matter in hand, and is drawing up a comprehensive scheme, including the organisation of an experimental district in the province of Qaliubia (Lower Egypt), which is considered to be a suitable field, in order to test the practicability of various proposals put forward.

The number of persons admitted into the lunatic asylums, says the report, averages somewhat over 1,000 a year. The death-rate in the asylums rose from 12.25 per cent. in 1913 to 21 per cent. in 1918, but fell rapidly during 1919. Pellagra remains the chief cause of insanity in Egypt.

## M. STAMBOLISKY'S TOUR.

The Bulgarian Prime Minister returned to London on October 24. In the course of the week's tour he had visited Birmingham, Manchester, Liverpool and Glasgow, as the guest of the British Government, accompanied by Messieurs D. Stancioff, Kissimoff, Karakacheff, and Milosheff; M. Madjaroff. Bulgarian Chargé d'Affaires, Mlle. N. Stancioff, Mlle. Popoff, and MM. Mamarcheff and Radkoff. Mr. L. N. Barker, of the Department of Overseas Trade, was attached to the party, and was mainly responsible for the smooth working of all the arrangements.

At each city the programme followed the same general lines; M. Stambolisky was met at the station by the Lord Mayor and the members of the Chamber of Commerce, a luncheon was given in his honour, and visits were paid to local factories and workshops.

Summing up his impressions, the Bulgarian Prime Minister said that he was an Anglophil before he came to Great Britain, but he had become still more so after becoming personally acquainted with the country and the people. He hoped that his visit would not only ensure Great Britain's goodwill for Bulgaria, but would also lead to closer commercial ties between the two countries.

Considerations of space prevent reference to all the speeches delivered on the tour, but the following is a summary of those made at the luncheon given by the Glasgow Chamber of Commerce.

Mr. F. C. Gardiner, President of the Chamber of Commerce, in proposing M. Stambolisky's health, referred to the courageous stand that he had made against King Ferdinand's war policy:—

M. Stambolisky, and those who had come with him, he added, had as the main object of their visit the promotion of commercial intercourse between their country and ours. It was plain there was great opportunity for commerce, because what we produced they required, and what they produced we required. In the past there had been little commercial intercourse between this country and Bulgaria, and the Central Powers of Europe had had the trade of Bulgaria very largely in their hands. That arose in part from the proximity of those Powers to the markets of Bulgaria, and also because it was the practice of the German merchants to give longer terms of credit than were usual in this country. From what he had been able to gather the people of Bulgaria were strongly predisposed to do business with this country. We must explore its markets, ascertain the possibilities of development—which in the matter of its mines was by no means small—we must put ourselves in direct communication with its people if we were to take our proper place in its trade. Unhappily, they had come at a time when our own country was rent with dissension. On that matter he would only say that if the blind leaders of the blind continued their present policy they would discover what was plain to anyone who had studied the facts—that at least half of our trade was dependent upon our foreign business, and if we failed to produce for export we should be face to face with such a crisis as this country had never seen before. He believed that this people would rally itself and be ready to play its part, and its part was a large one in the restoration of the devastated countries.

M. Stambolisky, in reply, thanked his hosts for their kind reception, and remarked that during his visit the climate of Great Britain had belied its sunless reputation. Bulgaria, he continued, was in need of British products, and was anxious to work with Great Britain. The Bulgarians would have been able in 1915 to oppose King Ferdinand's policy if the diplomacy of the Entente Powers had been a little more wise, but, unfortunately, the diplomacy of the Entente submitted itself to the control of Russian diplomacy, which was not of the best, and was well known in the world for its foolish faults. One day history would prove that the entire Bulgarian nation was against Bulgaria fighting on the side of the Central Powers. Tsar Ferdinand deceived the Bulgarian nation. His audience would perhaps be astonished to hear that the whole Bulgarian nation was very pleased with the victory of the Entente Powers, because that was the sole way to rid them for ever of their bad Sovereign and of the results of German plots and intrigues. The influence of a victorious Germany or of a victorious Russia would have been equally harmful. The conviction lay deep in the heart of every Bulgarian that the interests of Britain could never be against the interests of Bulgaria. During the war their great fault was to have been on the side of Great Britain's enemies, and for the faults of King Ferdinand the whole Bulgarian nation was punished. The cruel lesson they had learnt, the penalty they had suffered, had made them more clever. They got rid of their bad Sovereign, and they would only tolerate one who would conduct himself and act in the way the British Sovereign did. They were convinced that their friend of yesterday, to-day, and always was Great Britain. "We ask you who have brought culture and civilisation to the farthest parts of the world," he said, "to extend a friendly hand to Bulgaria." They had need of British capital to work their mines and mineral riches, to re-establish their small industries on a firmer basis and reconstruct their railways, to study the question of their rivers and irrigation, and cultivate their forests for better results. They had great need of all British productions, against which they could give wheat and other cereals, hides, wood, cotton, and other products. The Bulgarians had a proverb that a nation could die, but a debt could never die, and the Bulgarians did not know what it was not to pay. Concluding, he again expressed thanks for the welcome he had received, and said that, in spite of our internal difficulties, he was firmly convinced we would be able to extend a friendly hand to Bulgaria.

## DR. STANCIOFF'S APPOINTMENT.

The appointment is announced of Dr. Dimitri Stancioff as Bulgarian Minister Plenipotentiary to the Court of St. James.

M. Stancioff was born at Sistova in Bulgaria in 1865, and at an early age went to the Imperial Academy at Vienna. After graduating as Doctor of Law he returned to Sofia and entered the Foreign Office. He was for a time the head of King Ferdinand's political Cabinet, and occupied successively the post of Bulgarian Minister in Bucharest, Vienna and Petrograd. In 1905 he became Minister for Foreign Affairs in the Petkoff Cabinet, but subsequently took charge of the London and Paris Legations. A few months later the two posts were separated, and M. Stancioff became Minister in Paris. When Bulgaria entered the war M. Stancioff was sent to the Bulgarian Legation in Rome, but his well-known sympathies with the Entente made him suspect with King Ferdinand, and after a last appeal to the latter that Bulgaria should throw in her lot with the Entente Powers, he resigned his post and joined the army, in which he was a Reserve Officer. King Ferdinand had him sent to the Front, but he was subsequently given a post in Philippopolis, where, as Inspector of Hospitals, he was able to do something for the amelioration of the lot of the Allied prisoners of war.

Dr. Stancioff married the Comtesse de Grenaud, who was not allowed to reside in Sofia during the war on account of her French extraction. His eldest daughter, Mademoiselle Nadejda Stancioff, is accompanying M. Stambolisky on his tour to England as private secretary and interpreter.

## SERBIAN WOMEN.

A meeting of those interested in the welfare of Serbia was held at the Mansion House on October 21, in support of the Society for Training Serbian Women. In the course of speeches by the Lord Mayor and the Lady Mayoress, the formation of the Society in 1917 by English and Serbian women was recounted, and it was stated that the cost of educating each of the twelve girls under the care of the Society was only £50 per annum.

Miss Wylie said they wanted to get a system of education which the Serbian women desired, to act as an antidote to the influence which had been used by Germans, Austrians, and the Turks. The Serbians' own desire was that the education of their women should be carried on along British lines.

The Czecho-Slovak Legation announces that to-day (October 28) has been proclaimed as Official Czecho-Slovak Independence Day. All friends of Czecho-Slovakia will be welcome at the Czecho-Slovak Legation, 9, Grosvenor Place, S.W.1, this afternoon, between 4 and 6 p.m.

# MUSICAL NOTES.

### A Yugoslavian Violinist.

It is always disappointing when a foreign artist chooses an indifferent programme, for in this country a high standard is set, and often, possibly too often, the foreigner is judged by what he performs, not how he performs it. Now, M. Miro Shlik, the famous Yugoslav fiddler, who made his first appearance in London at the Wigmore Hall on October 22, played only Tartini's sonata in G Minor, Wieniawski's purely technical concerto in F sharp minor, and pieces by Dvorak, Suk, and Sarasate; it is difficult, therefore, accurately to appreciate his ability. The properties obvious in his playing were a very fluent though not infallible technique, a very warm and often beautiful wealth of feeling, and—uncertain intonation. This fault may or may not have been due to nervousness—I hope it was. M. Shlik's potential resources are vast; if he were always to play with such poetry and keen insight as he displayed, for instance, in Dvorak's Slavian Dance in E minor, he could be a great violinist. He has most abundant temperament, which serves him well in things that matter, but is rather wasted in merely technical pieces.

### A "Sackbut" Concert.

The *Sackbut* is a monthly musical journal. In the first few months of its existence it achieved notoriety, not so much through its views as through its expression of them. It has a very definite, or rather decided, standard of what is good and what is bad in music, and with the laudable purpose of publicly demonstrating that standard it has started a series of concerts at the Mortimer Hall. The first of these was given on October 18. The things performed at this concert were three fantasias by Henry Purcell for String Quartet, duets for two voices by Dowland and Robert Jones, canzonettas for two voices by Morley, and last and (I think) least, Bernard Van Dieren's String Quartet (1917). The three fantasias have not yet been published, but as soon as they are they will be extremely popular, and for bringing them forward the zealous organisers of this concert are greatly to be thanked; even the fact that the leader of the Pennington String Quartet was excessively directorial could not take away their charm. In Dowland's "Lachrymæ," the accompanist at the pianoforte evidently thought he was in the Albert Hall; and the tears which he caused did not mingle well with Dowland's. Of the two singers Mr. John Goss was excellent, and obviously knew what he was doing in this small hall, but with his voice Miss Ffrangcon Davies' did not blend at all, and hers, moreover, though sweet, is colourless. Van Dieren, who, the *Sackbut* says, is one of the finest minds in contemporary music, did not justify this ranking in his quartet. Its first movement was extremely difficult to understand; its second irritating in its almost exclusive use of *pizzicato;* its third very good, with a purpose achieved (it was excellently played); and the fourth like the first. It will, I hope, be played again. The promoters of this concert are cultural revolutionaries whose initial lonely failure should not deter them from a continuance of the series.

### The Flonzaley Quartet.

During the intervals between the movements of the Van Dieren work the thought fortunately descended on me that I might still be in time to hear the Flonzaley Quartet, who were playing at the Wigmore Hall on the same night. The gods were very kind, and I heard them play the whole of Schumann's glorious quartet in A major, Op. 41, No. 3. Everything good about the Flonzaleys has already been said in all parts of the world, and I can only say that no praise is extravagant. In beauty of tone they are matchless, and in the combination of sound they are unique. To hear them play the *adagio* of the Schumann was a transport; it stirred such emotions as only absolute (but traditional) masters can create. The fourth movement (*allegro molto vivace*) they took at a much slower pace than that to which most string quartets have accustomed us, but—it did not matter. . . . One imagines that in future generations musicians will awfully speak of the divine right of the Flonzaleys, for truly they can do no wrong.

### A Chamber Concert.

At the present time there appears to be a very wide passion among amateurs for chamber music, and it is good even for the hardened critic, who is inclined to think only in terms of orchestral concerts or "star" artists, occasionally to listen to evidence of this passion. Now, it was probably more zeal than judgment that prompted the actions of those performing in the concert given at the Mortimer Hall on October 20. If Miss Grace Burrows and Miss Gertrude Hopkins really think John Ireland's first Violin Sonata worth playing in public, there is no more to be said, except that (1) they played it with commendable zeal and skill, and (2) they are wrong in so thinking. But when these two ladies proceeded, with Mr. Frank Dyson, a flautist whose top and loud notes were rather unhappily situated, to play Beethoven's Serenade, Opus 25, they really did unto us what Beethoven and we did not deserve. It is a dull, dull work, and though it need not be allowed to perish while drawing-rooms still exist, those, and not concert platforms, are its proper place. At this concert Miss Gladys Newberry, a light soprano with a pure and pleasing voice, sang excellently chosen songs in German, French, and English, yet why her enunciation should have been best in German it is hard to understand. But really this was a quite enjoyable concert, for there was an atmosphere of intimate sincerity about it.

### M. Siloti.

M. Siloti gave another recital at the Wigmore Hall on October 23, but I do not think he enhanced his reputation. That, of course, is secure enough, for his past services and achievements in the cause of music appear to have been tremendous. But he is not a greatly moving player. There are not many good things that he cannot do on the pianoforte, but he does not often choose to do them. For instance, why should he make Balakireff's "Islamey" chiefly a matter of noise; clear noise, admittedly, and wonderfully made, but why not music? And why should a great man like this inflict on us, with never a vapidity missed, Liszt's execrable "Bénédiction de Dieu dans la Solitude"; and, again, the practically worthless puerilities of the variations upon Mozart's "Ah! vous dirais-je, maman"? Yet all could be forgiven him in Scriabin's beautiful second sonata; when he was playing its first movement we knew him for the master he must have been. We knew him again in the slow movement from Beethoven's "Hammerclavier"; and he must have convinced anybody in his own transcriptions of some Bach preludes. It is true that he had a poor instrument to play on, but the hard shock of his playing made it appear more vile than it really was. Of all great players, M. Siloti, from his pedalling to his left-hand octaves, is the most curiously unequal player I have ever heard.

### M. Jascha Heifetz.

Last season a great *furore* was caused by, and a great discussion arose over, the playing of the young Russian violinist, M. Jascha Heifetz. By some he was acclaimed as the greatest violinist in the world, and others found him to be only a supreme technician. He gave a recital at the Queen's Hall on October 20, and it was the second view of him that impressed itself as being nearer the truth. His technique is truly amazing; there is literally not a hint of an error, not a ghost of a chance of a mistake. But while we gaze in admiration at this wonderful mechanism, we do not see the engine move. It does, indeed, thrill you to hear such things as Fiocco's "Allegro," Sarasate's "Tarantelle," or Wieniawski's "Polonaise in D major" done perfectly; in all pure mastery of whatever instrument there is something to make one gasp; but this sort of stuff is not the highest form of music. It is rather by Handel's Sonata in E major, Bruch's Concerto in G minor, and the two movements from Bach's third sonata (unaccompanied), which he played, that M. Heifetz must be judged; and in these he did not penetrate deeply into the meaning of the music. He was best, probably, in the Handel, using a fine tone and superbly finished phrasing. But I hope to have further opportunities of commenting upon his playing.

### M. Josef Hofmann.

Probably the greatest artist who has come to us since the war from America is M. Josef Hofmann, the Polish pianist, who last played in England in 1903. He, like M. Heifetz, is a perfect master of technique, but he has unusual powers of interpretation as well. At his recital at the Queen's Hall on October 21 I heard some of the most wonderful playing I have listened to since Busoni's recitals. By the time this is in print I shall have heard him again, and will write more fully on him next week. But his performance of Beethoven's last sonata (Op. 111.) must be mentioned; it was exquisite. This is a strange method and word to use in connection with Beethoven, but M. Hofmann's was a strange interpretation. No clamour, no brusqueness such as Lamond indulges in, no ruthless analysis, such as that with which Busoni treats Beethoven, was in M. Hofmann's rendering, but reserve, colour, and polish were the dominant qualities. To me it was completely satisfying. He was again superb in the Beethoven-Rubinstein March from "The Ruins of Athens," in some Chopin waltzes, and in a transcription by Godowsky of Johannn Strauss' "The Bat." On what he did in some Chopin nocturnes and a polonaise, and on two of his own compositions I will write next week.

III.—"YARNS OF THE NEAR EAST." By Basil Mathews. (United Council for Missionary Education. 1s. net.)

## I.—TYPES OF INDIAN WOMANHOOD.

Goethe's "Eternal Feminine" applies in its fullest sense to India. There, as elsewhere, women play an overwhelming part in the drama of human society, and some knowledge of their characteristics, inherited or acquired, is essential for all who desire to follow the trend of evolution. But the *purdah*, or veil, which shrouds an Indian woman of the upper class from profane gaze, is an effectual barrier: a European may spend half his life in India without setting eyes on one. Mr. Otto Rothfeld, of the Indian Civil Service, has endeavoured, with a great measure of success, to lift a corner of the ubiquitous *purdah*. In a sumptuous volume, illustrated by portraits in colour, depicting every type of womanhood, he tells us how the fair sex in our great dependency live, think, and act. He discusses the sequestration of women at considerable length. The shastras, or sacred writings of the Hindus, offer abundant evidence that princesses, at least, once moved freely in society, and later history records that the *purdah*, in its strictest form, dates from the Mohammedan conquest. It has no warrant in the Quran. Mohammed enjoined women to cover their faces in the street, lest they should excite unholy desire in believers; he did not condemn them to lifelong imprisonment. A fierce controversy rages round the *purdah*. Enlightened Hindus and Moslems charge each other with having introduced a custom which they instinctively feel is a drag on the wheels of progress. It is probable that the Mohammedan invaders of the 10th century behaved as ruthlessly as the modern Huns a millennium later; and that the custom of secluding women began with the proud Rajputs and spread over India. Snobbery is quite as rife there as in Western Europe; and disabilities which flatter the self-esteem of wealthy women are felt as an intolerable burden by their sisters of lower degree. But facilities for travel and pilgrimage are proving fatal to the *purdah*. Nor does it prevent women from wielding immense, if occult, influence; the deftest political schemes are apt to "gang agley" by reason of zenana intrigues. In India, as elsewhere, women are the pillars of organised religion. Of the Indian wife Mr. Rothfeld writes:—

> Her every thought and act is moulded from childhood to the day of death by the present reality of religion. Her childhood is an adoration, marriage a sacrament, wifehood an oblation: in motherhood she finds at once sacrifice and worship; while life and death alike are a quest and a resignation.

Marriage is scarcely more than an episode in man's career; for his helpmeet it heralds the dawn of a new life. And she undertakes tremendous responsibilities which are not of her own seeking. "Marriages of convenience," as the French say, are universal throughout India, where a woman's connubial fate is settled for weal or woe in infancy. If a husband predeceases his wife the fact is ascribed to her evil *karma*. In times within living memory she atoned for it by sharing his funeral pyre; and Hindu widows are still condemned to lifelong penance for the sins of a previous existence. Here, again, signs are not wanting that India has entered on a higher stage of social evolution; the remarriage of child-widows often occurs without exciting adverse criticism. Moreover, girls of the upper class are no longer denied the education which inspires a sense of citizenship, albeit that much remains to be done in this respect. In Mr. Rothfeld's words:—

> Such an education as one foresees would teach a girl to know more clearly and with scientific truth how to be at once a pleasing and happy wife, and a good mother. She, and through her the children whom she trains, would learn the evils of premature or too constantly recurring childbirth, and how to avoid them easily. She would also know how to protect her family from uncleanly surroundings and unwholesome habits. She would not unlearn, but, rather, be better taught, the necessary arts of cooking and sewing, the latter nowadays in many cases almost unknown. But, in addition, she would learn to appreciate the beauties of language and craftsmanship, to hear and understand great poetry, and to feel her whole being thrill to a more glorious harmony in response to the call of the fine arts.

The value of this remarkable book is enhanced by Mr. Durandhar's gallery of portraits. The types which he displays have all the grace of Tanagra figurines, and European women may learn many a useful lesson from the costume of their Indian sisters.

F. H. S.

## II.—THE ANGLO-INDIAN TYPE.

In this novel we meet all the familiar types of the Anglo-Indian story. Certainly, these types might well be found in the Indian Military Station which Lady Elizabeth Stirling describes, but they are little more than types, and do not convince us of their real individual existence. Colonel and Mrs. Gascoigne, the two exceptions, who have really come to life, only make the rest seem more machine-made than ever.

Meg Meadows is a straightforward, unaffected girl, who has been brought up in India, and lives at Mangalore with her eccentric father. She is a splendid horsewoman, and the "pet of the station." "Nailer" Hatherop, a captain in the Cavalry regiment, stationed at Mangalore, really loves Meg, but thinks it would be wiser from a worldly point of view to marry Colonel Gascoigne's pretty daughter, just out from home. There is also a self-effacing, devoted subaltern, who wins Meg in the end after Hatherop has been shot by her father. All the misunderstandings and coincidences which make up the plot are commonplace and conventional in the extreme. What saves the book from being merely a pleasantly written little tale, which might help to pass an idle hour, is the real skill which is put into the delineation of Mrs. Gascoigne, whose beauty and hope have gradually been worn away by the unreasonable selfishness of her domineering husband, and the constant struggle against poverty. Both she and the Colonel are sketched in vividly, and the chapter in which she nearly decides to seek rest from the monotonous misery of her existence is really moving. There is grim irony shown in the opinion of the other residents in the station, who consider Colonel Gascoigne a thoroughly good fellow, much handicapped by a tiresome, dowdy wife.

## III.—OLD YARNS RESPUN.

This booklet is one of a series designed for use by workers among boys, and is likely to make a very strong appeal to that class of reader. The yarns concern characters so different as those of St. Paul and Mohammed; as Abdallah and Sabat, Sons of the Desert, and Martyn and Forder, missionaries. The author tells his stories vividly, and—though it is probable that a Turkish or Arab Moslem would find this hard to believe—with an obvious desire to be fair to those who do not share his views. Detailed criticism of the "yarns" would be out of place here, but we may be allowed to express a doubt whether the omission of one of them—the one referring to Miss Bushman's work—would not help the book in a boy's esteem. The appeal in it is less direct than in the other "yarns," and boys who think for themselves may be tempted to ask how, if the Turks are such fanatics as they are represented, they allowed the lady to continue her work.

# PERSONAL AND GENERAL.

**TO-DAY.**
October 28 (New Style).
October 15 (Old Style).
Safar 16, 1339 A.H. of the Moslem Calendar.
Markeshwan 16, 5681, of the Jewish Calendar.

Sir Basil Zaharoff has returned to London from Paris.

Bishop Gwynne sailed on October 20 in the Caledonia for Alexandria.

General Townshend, the hero of Kut, has resigned from the Army.

An Athens telegram announces that the Crown Prince of Sweden has arrived in Athens incognito.

M. Beza, Secretary to the Roumanian Legation, returned to London on October 21 from Bucharest.

R. V. Saville Pasha, Governor of Darfur Province, Sudan, is expected in England very shortly, on leave.

Earl Winterton, M.P., who returned to London on October 18 from South Africa, left last week for Horsham.

Colonel Rosetti, formerly Military Attaché to the Roumanian Legation, left London on October 21 for Bucharest.

The High Commissioner for India, Sir William S. Meyer, has been appointed a member of the Indian Committee of the Royal Society of Arts.

Mr. Peckitt, chief mechanical engineer of the Egyptian State Railways, was attacked and badly wounded by a native at Cairo Station on October 20.

At the Congregation of Cambridge University on the 29th inst. a Grace will be offered to confer the degree of Doctor of Law, honoris causa, upon Field-Marshal Viscount Allenby.

At a special audience on October 17, states a Sofia telegram, the newly-appointed British Minister Plenipotentiary in Sofia, Sir Arthur Peel, presented his credentials to King Boris III.

Signor Nogara, representing Italy, and Sir Adam Block, representing Great Britain, have been appointed members of the Financial Commission at Constantinople, says a telegram from that city.

Commander H. C. Luke, R.N.V.R., who has been serving since April last as British Chief Commissioner in Transcaucasia, has left Tiflis in order to take up his new appointment as Assistant-Governor of Jerusalem.

Sir Lee and Lady Stack were among the passengers on the P. and O. ss. Caledonia, which left Plymouth on October 20. Sir Paul and Lady Harvey will join the boat at Marseilles.

Lady (Herbert) Samuel and family left London on October 25 to join the High Commissioner for Palestine at Government House, Jerusalem. They expect to arrive about November 2.

Captain the Hon. D. E. F. O'Brien has been obliged, owing to ill-health, to relinquish the appointment of A.D.C. to H.E. the Viceroy of India, and returns home on sick leave at the end of October.

The engagement is announced between Alexander A. Pallis, son of General and Mrs. Pallis, of Athens, and Calliope (Poppie), elder daughter of Mr. and Mrs. S. Metaxa, of 98, Westbourne Terrace, London.

It is stated that M. Vesnitch, the Prime Minister of the Kingdom of Serbs, Croats, and Slovenes; M. Trumbitch, Minister for Foreign Affairs; and M. Costastojanovitch, Minister of Finance, have been appointed delegates to discuss with Signor Giolitti, the Italian Premier, and Count Sforza, the Minister for Foreign Affairs, the Adriatic question.

It is announced that Sir Thomas Royden, Bart., C.H., M.P., deputy-chairman of the Cunard Line, has been appointed by the French Government a Commander of the Legion of Honour. Sir Percy E. Bates, Bart., G.B.E., also a director of the Cunard Line, has been appointed an officer of the Legion of Honour. Both gentlemen rendered great services during the war.

A marriage has been arranged, and will shortly take place, between Major H. Goldie, late of the Arab Bureau, Cairo, and Clare Salvin, second daughter of the late Henry Thomas Thornton Salvin, of Croxdale Hall, Co. Durham.

The King has granted permission to Mr. J. H. Gorvin, C.B.E., to wear the decoration of the Order of St. Sava conferred on him for services as Chief of the British Transport Commission for the Relief of Devastated Countries.

An engagement is announced between Lieutenant Douglas Grant, R.N., elder son of Vice-Admiral Alfred Grant and Mrs. Grant, of Sydenham, and Juanita, younger daughter of Admiral Sir Richard Peirse, K.C.B., and Lady Peirse, of Fiesole, Bath.

General Sir William Birdwood, former General Officer Commanding the Australian Imperial Forces, has completed his inspection of the Australian War Memorials in France, and has left Marseilles for India, where he will take over the Northern Military Command.

On his arrival home from India, General Sir Charles Monro will be appointed colonel of his old regiment, the Queen's Royal West Surrey, vice Major-General E. O. F. Hamilton, who is resigning that appointment.

The Georgian Foreign Minister, Mr. Gueguechkori, who is on a visit to this country, was received at the Foreign Office on October 20 by Earl Curzon of Kedleston. Mr. Gueguechkori was accompanied by Mr. Cambashidze, representing the Georgian Government in this country. On October 25 he was entertained at luncheon at the House of Commons by members of Parliament.

The delegates from India to the forthcoming Assembly of the League of Nations at Geneva will be Lieutenant-Colonel his Highness the Maharaja Jam Sahib of Nawanagar, G.B.E., K.C.S.I.; Sir William Meyer, G.C.I.E., K.C.S.I., High Commissioner for India; and Sir Saiyid Ali Iman, K.C.S.I.

The betrothal of Prince George of Greece, the eldest son of ex-King Constantine, and Princess Elizabeth, daughter of the King and Queen of Roumania, and granddaughter of the late Duke of Edinburgh, is officially announced. The Roumanian Government announces that the pending marriage has nothing of a political character.

General Lord Rawlinson, who will leave this country to take up the Commandership-in-Chief in India on November 5, has appointed as A.D.C.'s Major Otto Lund, R.F.A. (who will travel with him), Major J. R. C. Gannon (Indian Army), and Major F. A. Macartney, M.C., 53rd Sikhs, who is now serving General Sir Charles Monro in that capacity.

The marriage is arranged, and will take place early in December, between Edward Casamayor Farquharson, younger son of the late Major James C. Farquharson, 2nd Bombay Light Cavalry, and Governor of H.M. Convict Prison, Portsmouth, and Hilda Frances Blyth, widow of Horace Vernon Blyth, of Hatch Hill House, Churt, Surrey.

M. Take Jonescu, the Roumanian Minister for Foreign Affairs, has concluded his mission to London, and, accompanied by Mme. Take Jonescu, M. Stoïcesco and Mme. Stoïcesco, left Victoria on October 24 for Paris on their way to Prague, where they were expected yesterday. M. Titulesco, the Minister for Finance, is remaining here a few days longer.

### FAREWELL TO SIMLA.

A Reuter's message sent off from Simla on October 20 says:—The Viceroy and Lady Chelmsford said farewell to Simla this morning. Their departure was public, and a large number of officials, both civil and military, attended in full dress. The 69th Punjabis and Boy Scouts formed guards of honour. The Viceroy will visit the Central Provinces and Assam before going on to Delhi.

## APPOINTMENTS, ETC.

The exequatur empowering Mr. Harold Baerlein to act as Consul for Serbia in Manchester has received the King's signature.

M. Nosek has been appointed First Secretary to the Czecho-Slovak Legation in Stockholm. M. Nosek acted for a time as Chargé d'Affaires in London.

Colonel C. R. M. Green, M.B., F.R.C.S., and Colonel J. Garvie, M.B., of the Indian Medical Service, have been appointed Honorary Surgeons to the King, states the *Gazette*.

## OBITUARY.

Mrs. B. M. Croker, the well-known Anglo-Indian novelist, died in London on October 20. She was the widow of Colonel John Croker, with whom she spent many years in the East.

The death has occurred of Sir Arthur Charles Trevor, K.C.S.I. He was, says *The Times*, the last remaining direct link of this generation with the first Afghan War of 1838-42.

Sir Ralph Sillery Benson, a former Judge of the High Court of Madras, died at Roebuck Grove, Donnybrook, Dublin, on October 19, aged 69. He entered the Indian Civil Service in 1873, and fourteen years later was called to the Bar, was appointed Under-Secretary to the Madras Government in 1837, and in the following year became Secretary to the Board of Revenue. From 1888 to 1895 he served as District and Sessions Judge, and in 1896 was appointed Puisne Judge of the High Court, Madras. A Knighthood was conferred on him in 1906.

## DOMESTIC ANNOUNCEMENT.

**BIRTH.**

SILLEY.—On October 20, at Bradley, Bilston, Staffordshire, the wife of Herbert H. Silley, M.R.C.S., L.R.C.P., of a daughter.

## ROUMANIANS AND EDITH CAVELL.

It is stated that some Roumanians who decided to render homage to the people of Great Britain, with whom they were allied in the war, have opened a subscription to raise a monument at Bucharest to Edith Cavell, who, in their opinion, symbolises so well the qualities of the race. The first day that the subscription list was opened a sum of 150,000 lei (about £750) was received in a few minutes. M. Titulesco, the Roumanian Finance Minister, was asked to become president of the committee which has been formed, and he has accepted the post.

## NEWS IN BRIEF.

The Alexandria Flower Show in 1921 will be held on April 22, 23, and 24.

It is announced that the Greek headquarters staff has left Athens for Smyrna.

Yugoslav troops evacuated the plébiscite region of Carinthia on October 23, says an Exchange message.

General Savoff, the new Bulgarian Minister to France, presented his credentials to President Millerand on October 22.

The *Nizam* learns that Adly Pasha Yeghen, who is at present staying in Paris, will return to Egypt on the s.s. Sphynx, which leaves Marseilles on November 4.

The Georgian Government has informed the leaders of the Turkish Nationalists that it will regard the violation of its territory by Turkish troops as a *casus belli*.

M. Ulrich Hauscher, the Social Democrat, and former Press Chief of the Berlin Foreign Office, has been appointed German Ambassador to the Republic of Georgia.

Sir Herbert Samuel, High Commissioner of Palestine, has held the first meeting of the Advisory Council, which is composed of ten officers and nine members locally elected.

The *Morning Post's* Malta correspondent states that orders have been given for the return to Malta of the 2nd Battalion Essex Regiment, at present at Constantinople.

Conversations between Italy and Yugoslavia with regard to the settlement of the Adriatic question will take place at Isola Bella, near Pallanza, on Lake Maggiore, in the villa of Prince Borromeo, says the *Tribuna*.

Sixty coolies have been arrested on suspicion of complicity in the removal of rails on the Madras-Bangalore Railway on October 7, when the mail train was wrecked near Arkonam, and thirteen passengers killed.

A library of 1,000 books was lately despatched by the Universities Committee of the Y.M.C.A. for the use of British troops on the North-West Frontier of India. The books have arrived safely, and are to form the nucleus of a permanent Garrison Library at Landi Kotal, where the 2nd Royal Fusiliers (City of London Regiment) are at present quartered. "Landi Kotal is at the head of the Khyber Pass," writes the Brigadier General, "four miles from the Afghan frontier, and I don't suppose there is a battalion in India with fewer social 'amenities.'"

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses. Nursery Governesses, Nurse Companions, Lady Nurses, etc.

ENGLISHMAN, age 33, at present in England, who has had 16 years' commercial experience in Egypt, and who can speak Arabic, Italian and French, desires appointment in the Near East. Reply E. A. D., c/o THE NEAR EAST, 1, Devonshire Square, London, E.C.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

## THE ADRIATIC TANGLE.

Further negotiations are about to be opened between the Italian and Yugoslav Governments with a view to arriving at a settlement of the Adriatic question. There is no reason to doubt the sincerity of both countries in wishing to discover a *modus vivendi*, but the least acquaintance with the subject, which has defied previous attempts at solution during the last two years, does not justify much hope in regard to the meeting due to take place on the Isola Bella, in Lake Maggiore. The claims of Italy and Yugoslavia are too directly in conflict, according to the interpretation placed by each on the national interests involved, to admit of a settlement apart from the intervention of some overriding factor. Whether such a factor can be evolved in the domestic affairs of one or other of the States concerned remains to be seen; it is far more probable that it is to be found only outside the two rival parties, in the form of the *force majeure* of foreign arbitration. Two years ago a compromise was possible, involving arrangements which were at least theoretically sound, and which could have been accepted with some chance of proving workable. To-day the passions that have been roused on either side hold out little hope that any agreement depending on the mutual goodwill of Italians and Yugoslavs will have any prospect of being carried into effect satisfactorily. Fiume remains the chief crux. In the Italian view it is the key to the future commercial prosperity of Trieste. With the two ports under one and the same jurisdiction, which has also control over the railway system connecting them with the interior, it is possible to promote the welfare of both; but with Fiume, the interior and the railway system Yugoslav, there can be little hope for Trieste in the future. The Yugoslavs, on the strength of their commanding position, might be content to see the town of Fiume in the hands of Italy, provided that they could rely upon correct treatment for their goods in transit and for their nationals under Italian jurisdiction, and if they had their unchallengeable claims in other directions recognised by Italy. The history of d'Annunzio's seizure of Fiume proves that the Italian Government has hitherto shrunk from acting in opposition to chauvinistic feeling and will hesitate to make any compromise of its own volition. A Yugoslav Cabinet may well be equally subservient to popular opinion at home. But the way to an agreement would be made much smoother for both if they could point to some compelling force which imposed a settlement that fell short of the extreme demands of each country alike.

In occupying Klagenfurt, in opposition to the verdict of the plebiscite, the Yugoslav Government has shown that its thoughts in connection with the Adriatic settlement are running on the probability of a bargain. There is an equally important matter in regard to which a bargain might be struck in the interests of both Italy and Yugoslavia; but here again, as in the case of Klagenfurt, it is obvious that the Governments of Great Britain and France could use the matter more effectively than could Italy alone. The policy adopted by Serbia (as distinct from Yugoslavia) towards Montenegro is on the point of breaking down; no Balkan country can be successfully dragooned for all time, and Montenegro least of all. The Serbian authorities have had time to realise that a mistake has been made in regard to Montenegro. It may have been made with the best of intentions, but it remains a mistake. The Serbians were anxious to avoid dynastic complications in the new State of the Serbs, Croats, and Slovenes, and they knew that not one of the sons of King Nicolas promised to be a worthy successor to his father. It was, perhaps, natural to jump at the opportunity offered by a small clique in Montenegro, which undertook for a consideration to eliminate the dynasty and to bring their country within the Serbian kingdom; but both the Montenegrin renegades and the Serbian authorities reckoned without the spirit of the Montenegrins, although it was precisely the spirit which Serbians and the rest of the Balkan peoples would have displayed in similar circumstances. Events in Montenegro have come to such a pass that they can no longer be ignored either by Croatians and Slovenes or by the Allied Powers. Moreover, Serbia in her own interest cannot afford to have a centre of permanent unrest so near home. A solution of the difficulty must be found, and the subject is one in which Italy is directly interested owing to the Montenegrin origin of her Queen. Only in the direction of Montenegro, and Albania, which also awaits a settlement, has the Yugoslav Government failed to disavow the aggressive policy associated with the name of M. Pashitch, and it should not be difficult to do so now, even at this late hour. When the Yugoslav National Council in Zagreb came into existence, it acknowledged a Montenegro distinct from Serbia, for it referred in its appeal for recognition to "our national States of Serbia and Montenegro" as having been "the most loyal Allies of the Entente." M. Pashitch was no less explicit in according recognition to that Council. "The Royal Serbian Government," he wrote in November, 1918, "with special satisfaction takes cognisance of the declaration whereby the National Council in Zagreb states it to be its aim to liberate the Serbs, Croats, and Slovenes of the late Austro-Hungarian monarchy from all foreign domination and to establish their union *with the brother kingdoms of Serbia and Montenegro* in one sole and independent State." A few weeks later the fatal mistake was made of attempting to force the pace in Montenegro; a so-called National Assembly was summoned to meet in Podgoritza in circumstances that could deceive no one of ordinary intelligence, and the Serbian Government was ill-advised enough to persuade the Prince Regent to receive a deputation from Montenegro which claimed authority to announce the incorporation of Montenegro in Serbia under the Karageorgevitch dynasty. As was to be expected, the legality of the Podgoritza Assembly has not been recognised by any Allied Power, and the Serbian Government has only been able to carry through the union of Montenegro by driving a considerable portion of the inhabitants into the mountains. No Allied Government, as far as is known, has taken up the attitude that King Nicolas is to be forced upon the Montenegrins regardless of their wishes; but all the Allied Powers are concerned to see that common justice and ordinary decency are observed in regulating the affairs of Montenegro.

The situation in regard to the Adriatic controversy, therefore, is that on the one hand Italy wants a guarantee that Trieste is not to become "a pale memory of past prosperity," and that the eastern coast of the Adriatic will not be utilised to menace the future security of Italy. Yugoslavia, on the other hand, wants at Fiume a port for the untrammelled transit of goods, as free in every respect as though it were wholly Yugoslav, and at the same time she is concerned in a settlement of the Montenegrin question which will avoid dynastic complications and seal the peaceful incorporation of Montenegro in the kingdom of the Serbs, Croats, and Slovenes. Italy can undoubtedly help Yugoslavia in regard to the latter point; but it is difficult to see how she can move of her own accord in the matter. At the request of the British and French Governments, however, she could easily obtain for Yugoslavia all the guarantees that the latter requires, and give the necessary pledges concerning the future administration of Fiume in return for the undertakings required from the Yugoslavs. Everything, therefore, points to a satisfactory solution of the Adriatic tangle, if Great Britain and France take a vigorous hand in the settlement; but if they stand aloof the impending negotiations may prove as barren as all those that have preceded them during the last four years.

## THE FALL OF BOKHARA.

**By Sirdar Ikbal Ali Shah, M.R.A.S., F.R.G.S.**

The recent invasion of the Khanate of Bokhara by the Bolshevist armies provides a remarkable illustration of the lack of sincerity which characterises the diplomacy of "Red" Russia. In order to indicate clearly the treacherous nature of the act by which Bolshevism has robbed the Bokharan people of their freedom, and the callous disregard it has displayed for the principles of self-determination, we must consider for a moment the status of Bokhara in the days before the war.

Three Central Asian States, Bokhara, Khiva, and Khokand, were dependent upon Tsarist Russia. On the downfall of the Tsarist régime these States were given all rights of freedom by the Bolshevist Government, and were informed that in return for this they would be expected to further Bolshevist propaganda in the East. The Reds installed their headquarters at Tashkent about the beginning of 1917, and from this centre they began to disseminate literature of a propagandist nature. Taking advantage of the railway systems, they actually instituted propagandist trains, which carried glib-tongued lecturers, trained for their work at the Eastern Institute in Moscow, and armed with thousands of pamphlets, the contents of which can only be described as a travesty of the principles of freedom. This propaganda soon began to justify its existence. By means of it the people of Persia became disaffected, Afghanistan was penetrated, and even Indian opinion was tainted. But the Ameer of Bokhara, a ruler of great natural shrewdness, quickly realised the mischievous nature of the doctrines which had their origin in Moscow, and took steps to put a period to the Bolshevist propaganda. The Reds replied by threats, and gave him to understand that his status depended entirely on the goodwill of the Soviets. Over-awed, he countermanded the orders he had given for the suppression of Bolshevist ideas, and maintained a superficial friendliness with the Soviets. His worst fears regarding the independence of his country were soon realised; for the Reds seized upon his province of Ferghana, and the Valley of Zar-afshan, one of the most fertile in Central Asia, and rich in oil wells and cotton, was regarded as an emporium out of which the wants of the Soviet armies might be supplied. A hypocritical assurance was given to the Ameer that the supplies seized would be paid for; but needless to say this promise was not carried out.

But the demands of the Bolshevists did not stop here. They insisted that the Usbeks should provide so many men from each village to be enrolled in the ranks of the Soviet Army. They then proceeded to mobilise the labour of the whole Khanate for their own purposes. The disillusioned Usbeks protested violently, but without effect. Usbek priests were bribed to advocate the doctrines of Communism from the pulpit and to justify them as a modernised form of Islam. The nobility were also heavily bribed into hostility against the Ameer. Disturbance of every kind was fomented, and nothing was left undone to render the Ameer as unpopular as possible.

When disaffection had been smouldering for some months matters elsewhere in Central Asia had become scarcely less ominous. In Georgia, Persia, and Azerbaijan a party calling itself the "Refined Usbek Party" was organised by the Bolshevists, and this society established branches in Bokhara, where in the public squares of the city the rule of the Ameer was denounced. Meanwhile, the Soviets expressed a desire to lease a region in the south-eastern portion of the Khanate, which is rich in mines, and the limits of which they fixed from Karshi in the west to Hissar in the east and Shari-ziabs in the north to Derbent in the south. This area lies to the south of Samarkand, and is the most fertile in the whole of the Khanate. Within its boundaries, indeed, the soil has been found to yield as much as a hundred-fold more cotton than in India or America; and lead and coal mines have also been located there. The Ameer was, naturally, most unwilling to give up this region to Bolshevist exploitation; for he had already had occasion to test Bolshevist promises as regards financial obligations. But a meeting of the Ameer with the Soviet representatives was arranged. When the Ameer entered the Russian camp, however, it was significant that he was received by the firing of a less number of guns in his honour than is customary in the case of an independent king. He resented this warmly, but when he protested he was informed that the Soviets had not found his behaviour satisfactory, and therefore could not place him on the same level with other independent monarchs. Later, an attempt was made on his life, and he had to flee the capital. The "Refined Usbek Party" was dispersed amid the sneers of the Reds, as it had exhibited certain patriotic tendencies, and the government of Bokhara is now being conducted by Soviet officials. The Ameer is now at Kabul, and is in close touch with the Ameer of Afghanistan, with the object of forming a Central Asian alliance against further Bolshevist aggression. Such an alliance was once outlined by the late Ameer of Afghanistan, who saw clearly that the necessity for it would arise.

The behaviour of the Bolshevists in Turcomania—a territory which they have also occupied—has been of the most brutal kind, and the Turcomans live in dread of the callous officials whom the Soviets have placed over them. In a word, the peoples of Central Asia now recognise the true nature of the doctrines which they at first embraced with such fervour and of the brutal and ignorant fanatics who advocate them. It is much to be desired that the British Government should intervene on behalf of the Ameer of Bokhara, and should restore him to his natural right. By so doing they would greatly strengthen the barrier between Bolshevism and India, which is at present represented by Afghanistan alone.

## THE LATE KING ALEXANDER OF GREECE.

After an illness lasting a little over three weeks, Alexander, King of the Hellenes, died on October 25 from the results of a monkey bite. On October 2 he was walking in the grounds of the Royal Palace at Tatoi, near Athens, accompanied by a dog. The animal started to worry a chained monkey, and while the King was trying to separate them he was bitten on the legs and body by a second monkey. Five days later King Alexander's health became seriously affected, in addition to blood-poisoning, jaundice, pneumonia and dysentery ensued, and towards the end the royal patient became delirious.

King Alexander, the second son of ex-King Constantine and Queen Sophie, was born in 1893. His choice as successor to the throne in June, 1917, when his father was deposed, was facilitated by the fact that he had played no prominent part in the public life of Greece, had not particularly identified himself with the ex-King's policy, and was, in fact, more independent of Court influences than either of his brothers. The early days of his reign could hardly have proved happy, but he played his part with a somewhat cynical ability, realising that he could do nothing more than accommodate himself to the rôle mapped out for him by M. Venizelos. In a short time, however, he began to take a more active interest in the country's affairs, and showed promise of inheriting some of his grandfather's talent for successful occupation of the Greek throne. His secret marriage with Mlle. Aspasia Manos in November, 1919, resuscitated some of the early difficulties of his position, but the official recognition of the marriage as a morganatic one was accepted by all parties as the natural solution. In his brief reign of three years King Alexander had had no real opportunity of proving himself, nor Greece of proving him; but he had contrived to win the sympathy and esteem of his people.

According to the Constitution the throne passes to Prince Paul, the third son of ex-King Constantine. M. Venizelos has made it clear that the Greek Government will impose conditions upon the new King entailing recognition of the present settlement of the Crown in Greece by ex-King Constantine and the ex-Crown Prince.

In course of an illustrated pamphlet which Major David Davies, M.P., is distributing to every President and Prime Minister whose country is a member of the League of Nations, he considers the advantages of Constantinople as the headquarters of the League. Major Davies gives eight reasons in favour of Constantinople

## Socialism and Greece.

In the *Socialist Review* for December there is a useful article upon "The Socialist Movement in Greece." After giving particulars of the Socialist Labour Party (Communist), it concludes with two comments upon the attitude of the Government and the future of the movement:—

Since 1910, with the exception of a short time between 1915 and 1917, Mr. Venizelos has been in power. His attitude towards the Labour movement has been much the same as that of Mr. Lloyd George. At the outset of his career he was a revolutionary radical. He was born in the working class, and owed his position to the revolution of 1910. He was even dubbed Socialist by many of the opposition, while among his Ministers are several who have dabbled in Socialism of a respectable kind. Pre-war Labour legislation was certainly progressive in intention, and included provisions for an eight-hour day, factory inspection, prohibition of child labour, etc. Unfortunately most of these laws are a dead letter, as Mr. Venizelos's absorption in foreign politics has left their administration to less sympathetic colleagues and officials. Since the revolution of 1918 Mr. Venizelos has gravitated towards the right. He declares himself, in Georgian terms, "a true friend of the worker, but an enemy of that insidious exploiter of the worker, the Socialist agitator." He wishes to save Greece from the horrible fate which has overtaken Russia. The Labour Law of 1919 is certainly an attack on trade union liberties which would be impossible in England. In other directions, too, he has taken a leaf out of the book of his Western friends. The general strike of July, 1919, though supported by the S.L.P., was a purely economic movement begun by a strike of bank clerks, but its leader, Benarova, was arrested under martial law, accused of receiving large sums of money from Italy (not Russia!), and exiled. Again, in Eastern Macedonia, some fifty members of the S.L.P., including the president of the Tobacco Workers' Union, were arrested as agents of the Turkish Nationalists! Such persecution is undoubtedly due to over-zealous officials, for Mr. Venizelos himself has been absent at Paris for nearly two years, and is far too clever a politician to give such an opportunity to his opponents. But, nevertheless, there is no alternative for him as for Mr. Lloyd George or Mr. Nitti—a swing to the right is inevitable, but it is to be hoped that he will avoid Terrorist tactics.

Considering its extreme youth, the Socialist movement in Greece has made astonishing progress. All the essential elements for a rapid advance are present—a strong industrial movement and a militant Socialist nucleus, industrial development and centralisation of capital, rising prices, and the satisfaction of the more legitimate national aspirations. The nearness of Russia has already influenced the course of events in Greece, while the militant attitude and growing power of the Socialists of Bulgaria, Serbia, and Roumania are a constant incentive to revolutionary progress. Greece has a great revolutionary tradition behind her—four times since 1827 has she risen against an attempt to impose a tyranny upon her dawning liberties. The Greek people are intelligent and unusually quick to assimilate new ideas. If they can overcome their own internal difficulties, especially the problem of permeating the agricultural population with Socialist ideals, if they can throw aside personal jealousies and unite on a broad but definitely Socialist programme, the Socialists of Greece have a great work before them. For on them and the Socialists of the Near Eastern countries depends the future of the Balkans. Capitalism and Nationalism can never hope to keep peace in the Balkans; in a federation of Socialist Republics from the Danube to the Ægean lies the real hope of peace in the Near East.

## The Armenian Question.

The *Moslem World* for October contains a sound historical sketch of the Armenian Question by Dr. Johannes Lepsius. He states that this "question" was created through the Russian-Turkish war and the Treaty of San Stefano, 1878, and proceeds to recount its history down to the European War. How far the Young Turks led their country astray is shown by the following extract:—

During the first few months of the war it was impossible for outsiders to know that the Young Turks were after the destruction of the Armenian nation. Any other government would have made it its duty to embrace all elements of its population in a united defence of the Fatherland had it been entangled in a war such as Turkey was, with all its fronts exposed to assaults by land and sea. In their national drunkenness the Young Turks put themselves against the most elementary conditions of possible victory. Simultaneously with the fight for the Dardanelles against the fleets of the Western Powers and with the defence of the Caucasus front against the Russian Armies, the Young Turks took up the fight for nationality in their own country. The Arabian part of the Empire was driven under the most brutal measures by Djemal Pasha into the arms of the Entente. Armenians, Greeks, and Syrians, in spite of their willingness to serve the Fatherland, were robbed of the honour of military duty. The Christian population was pillaged without any consideration, the proclamation of the "Holy War" was a failure, for the rest of the Mohammedan world hardly paid any attention to it. But upon the Proclaimer it exercised a fatal influence. Instead of counting on the strength of the Ottoman Empire and calling together all nationalities for the defence of the joint Fatherland, they leered at the Tartarian population of the Caucasus and the Russian and Indian Mohammedans. They expected a magic power from the old idea of the "Jihad," which would create in this fight with British and Slavic world powers a Mohammedan "Imperium" reaching from China to the Atlantic Ocean and from Adrianople to Calcutta. Enver told tales about forty millions of Turks, even though the Ottoman Empire counts hardly more than six millions. Only an unchecked nationalistic imagination could dictate measures which had as an aim the extermination of all Christians and the making of all Osmanic races a Turkish nation. This same political method of the Young Turks brought the loss of the African and European parts of the Empire. That a continuation of these policies would mean the entire collapse of Asiatic Turkey they did not seem to see, but further pursued the Utopian idea of an Islamic, Pan-Turkish world power. Only the conclusion of this adventure could teach them that the Young Turks only had one historical mission, viz., the liquidation of Turkey.

Dr. Lepsius proceeds to exempt the Germans from all responsibility in the Armenian massacres, and concludes his article thus:—

This forcing of Armenians to become Mohammedans was by no means the outcome of religious fanaticism. Such feelings surely were strange to the Young Turk. But to be a good patriot of the Ottoman Empire meant to become converted to Islam. The history of the Ottoman Empire proves from the beginning to the end that the confession of faith and nationality are identical. The reciprocal official and non-official assurances, with quotations from the Koran, belong to the conventional phrases which have been used ever since the era of reform movements to confute the European idea regarding the toleration of Islam and the Osmanlis. The opinions of the German Ministers regarding the reports of the religious persecutions coincide with the belief that the leading motive is not religious fanaticism but the desire to amalgamate the Armenians with the Mohammedan population of the Empire. This opinion is just. But one must not forget that religious persecution of pure culture never existed. The religious persecutions of the Roman Empire were dictated by "Staatsraison" (State reason); the persecution of the Jews in the Middle Ages and now in Russia through covetousness. Even the programmes which Mohammed prepared had entirely to do with covetousness. The religious persecutions of the Young Turks, the greatest of all time, follows the same motives: "Staatsraison" and covetousness.

## THE CARAVANSERAI.

An Egyptian, a resident of Giza, and his son were lately tried on a charge of coining 2-piastre and 5-piastre pieces. They admitted the offence, but urged that they only manufactured the money that they actually required. I suppose they felt that by abstaining from supplying their friends and neighbours they were practising commendable virtue. But their ingenuity was coldly regarded by the authorities, and they are now in a position to reflect on the unprogressive spirit of the Law.

***

I am delighted to learn that there is a chance—and apparently a pretty good one—of the *Yashmak* making its appearance in London this winter. For how often have I lost my heart to a fair wearer of the fascinating gauzy strip which is so much more "fetching" than the ordinary British veil? If it really does appear in London, I shall inevitably get run over while looking at some dear daughter of Eve; and that would make a change in a life that is singularly free from incident and romance in these days. Indeed, who would resent being run over, in a small way—say, by a runaway doll's pram—for the sake of a Yashmaked houri, whether of the Occident or the Orient? Seriously, if the London ladies fail to adopt the fashion, I shall be disappointed and surprised. Anything more coquettish, I, for one, cannot imagine. A Yashmak will make a very ordinary young woman look charming; so what *would* it do for our London girls?

***

I am more than a little tired of the subject of strikes, for, rightly or wrongly, I have come to the conclusion that, in spite of all the fine talk—by both sides—there is just one thing behind all the skirmishing and manœuvring, and that is selfishness, pure and simple. But even this sordid subject has its humorous side, as a strike of tramway employees serves to show. For I read in the message of a Bombay correspondent to *The Times* that "four hundred men demanded further pay and leave and *immunity for cheating* (my italics), and struck when their demands were refused." For sheer effrontery that would take a good deal of beating, I fancy. No: it seems to me that Eastern soil is not favourable to strikes, and I suspect that when our own strike organisers read of this amazing candour on the part of the Bombay strikers they will share my view.

***

The story about Muley Hafid, ex-Sultan of Morocco, sending his great egg-shaped diamond to New York for sale, because now that he is no longer a sultan with a throne it is not necessary for him to wear such a gorgeous stone, should at least serve as a first-class advertisement for the stone. I suspect a good many of America's multi-millionaires are feeling a bit anxious about things just now, and telling their wives that they never *did* care to see a woman wearing much jewellery; while, on the other hand, a few extra choice brand profiteers may be looking up ties well calculated to show off a really handsome scarfpin. But all that is by the way. What I set out to remark was that the story may yet give rise to a new profession. For it is reported that when the former Sultan was asked by the American lady why he had entrusted her husband and herself with this wonderful stone he replied: "You had good faces." It seems to me that if "good faces" can inspire such confidence as *that*, there should be an opening for a school—correspondence or otherwise—that would teach would-be jewel-thieves and others how to acquire the "good" look. At present it is mostly merely good-looking people who get the jewels—or so I understand.

## CHESS.

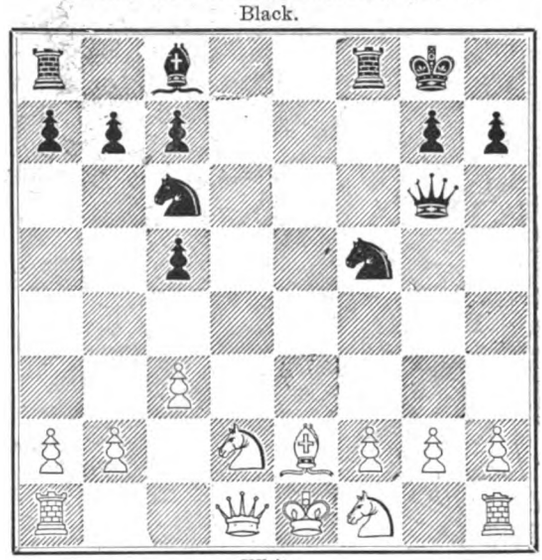
The Hastings Chess Club, which has long enjoyed a reputation for enterprise second to no other organisation, has arranged a notable Christmas programme from December 30 to January 5. There are to be two tournaments, the principal event being a double round champions' competition, in which Mr. H. E. Atkins, Mr. R. C. Griffith, Mr. F. D. Yates, and Mr. R. H. V. Scott will participate. The second tournament is limited to members of the Hastings Club, and the players will include Mr. H. G. Cole and Mr. H. S. Stephenson.

The Metropolitan Chess Club opens its season on November 4 with its first league match. Its tournaments are to begin on November 13, and I understand that the indications are that a record entry will be received.

I said last week that I proposed to give the consultation game played at the City of London Chess Club between Mr. J. H. Blackburne and Mr. T. F. Lawrence. It ran as follows:—

Position after White's 13th move, QKt—B.

Black.



White.

SCOTCH GAMBIT.

| J. H. Blackburne, etc. White. | T. F. Lawrence, etc. Black. | J. H. Blackburne, etc. White. | T. F. Lawrence, etc. Black. |
|---|---|---|---|
| 1 P—K4 | P—K4 | 20 P—R4 | Kt—B5 |
| 2 Kt—KB3 | Kt—QB3 | 21 P—B4 | R—K |
| 3 P—Q4 | P x P | 22 B—B | R—Q |
| 4 Kt x P | B—B4 | 23 P—R5 | Kt—Q6 (ch) |
| 5 B—K3 | Q—B3 | 24 B x Kt | R x B |
| 6 P—QB3 | KKt—K2 | 25 R—R4 | R—Q5 |
| 7 Kt—B2 (1) | P—Q3 | 26 R x R | P x R |
| 8 Kt—Q2 | 0—0 | 27 Kt—B2 | B x P |
| 9 B—K2 | Q—Kt3 | 28 Kt x P | K—B2 |
| 10 B x B (2) | P x B | 29 K—Q2 | K—B3 |
| 11 Kt—K3 | P—B4 | 30 K—K3 | P—B4 |
| 12 P x P | Kt x P | 31 Kt—B3 | B—Q4 |
| 13 QKt—B (3) | B—K3 | 32 Kt—K | K—Kt4 |
| 14 Q—B2 | QR—Q | 33 P—B3 | K x P |
| 15 R—Q | K—K4 | 34 Kt—Q3 | K—R5 |
| 16 R x R | R x R | 35 Kt x P | K—Kt6 |
| 17 Q—K4 | Kt x Kt | 36 Kt—Q3 | P—K Kt4 |
| 18 Q x Q | Kt x Q | 37 Kt—K | B—B3 |
| 19 Kt x Kt | B x P | 38 Resigns. | |

(1) Mr. Blackburne has frequently adopted this move with success.

(2) This was not a good move, for the open file was bound to have a hampering effect on White's game.

(3) White never recovered from the effects of this move, which ultimately led to the loss of a pawn and the game.

CARO-KANN.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The representations made by the Federation of British Industries with reference to the export credits scheme have quickly had tangible results. The main proposal made by the Federation was that the percentage of the cost of goods to be advanced to the exporter should be increased, and in the House of Commons on October 25 it was announced that the Board of Trade had been in communication with the Treasury in respect of this proposal, and that sanction had been given for an increase in the advances from 80 to 100 per cent., subject to recourse remaining as before against the exporter in respect of 20 per cent. This decision removes one of the main drawbacks to the scheme, for it has been increasingly difficult to persuade bankers to furnish the requisite accommodation when they have ready to hand such a variety of remunerative and short-dated investments.

***

That the scheme had to be amended was obvious. During the last month or so there has been a slightly greater tendency for exporters to take advantage of it, but at the rate at which the advances have been increasing, the scheme could not possibly have realised expectations. It is stated that altogether the advances sanctioned down to the end of last month amounted to under half a million; and that not much more than £50,000 had been actually advanced! The scheme is not intended as a means of financing hazardous transactions, and this fact does not improve the appearance of these figures.

***

At the general meeting of Harrisons and Crosfield, Ltd., the chairman, Mr. C. H. Clark, gave an extremely interesting review of the position in the rubber and tea industries. Until a few months ago the outlook for rubber companies appeared most promising, but a decline set in, and to-day the price in London is lower than at any previous period, while most of the shares have fallen below the level obtaining a year ago. The cause of the present situation, Mr. Clark points out, is not that the consumption of rubber has declined—the available evidence pointing, on the contrary, to an increase—but that the increase in the production of rubber is at present greater than the increase in consumption. As soon as the various European countries are able to enter the market as before the war the position will be transformed, and that again depends on the internal economic conditions of the countries concerned. Mr. Clark fears that no great expansion in the demand for rubber is to be looked for immediately. "Meanwhile," he remarks, "the price of rubber has fallen to a figure at which many estates can only produce at a loss, and which is probably little, if at all, above the average cost to the whole plantation industry. If this situation is allowed to develop further without interference, it will be likely seriously to impair the productive efficiency of the industry for the future. This is being increasingly recognised by those connected with the plantation industry, and a favourable response to the proposals of the Rubber Growers' Association for the necessary restriction of output of both British and Dutch plantations, whether controlled in Europe or in the East, now appears to be assured."

***

The tea industry is perhaps faced with an even more critical situation. A year ago common Indian tea realised 1s. 6½d. at the London sales. Since then there have been heavy imports of tea owing to the improvement in shipping facilities, and while at the end of September, 1919, stocks in bond in the United Kingdom amounted to 143 million lb., the total for the corresponding date this year was 220¾ million lb. The result of the increasing stocks has been the continual fall in prices, common Indian tea, for instance, declining to something like 4½d., while the average price of all Indian tea declined from 1s. 9¾d. in November, 1919, to 10½d. last month. On the other hand, the average cost of Indian and Ceylon teas in London is about 1s. 2d. "Again," says Mr. Clark, "we are faced with a position in which, if the future producing capacity of the tea industry is to be preserved, some united action on the part of those interested has become absolutely essential. It appears likely that proposals may be agreed to generally, by which Indian and Ceylon producers will join together in reducing the output to the extent of approximately 20 per cent., and it is to be hoped that this will prove successful and cause prices to be maintained on a level which will at any rate cover the cost of production."

***

While the tea industry is now faced with an unenviable situation, it is very certain that its future is assured as soon as the world's markets are normal again. Russia's absence from the ranks of consuming countries is one of the most important factors in the rubber outlook, but it may be said practically to dominate the tea position. Russia in 1913 imported 191 million lb. of tea, and it is obvious that once that country resumes buying on the pre-war scale, the problem of surplus stocks will largely cease to exist. Meanwhile, it is interesting to note the gradual growth of tea consumption in India, which has risen from 20 million lb. in 1913 to 50 million lb. If this tendency continues, as it may be assumed will be the case, we can look forward with certainty to a time when demand will have largely exceeded supply, and when the United Kingdom will have to pay considerably enhanced prices if it insists on having the supplies which it now utilises.

***

In an article on "Ocean Salvage" in last week's issue of *Fairplay*, dealing with work in the Levant, I came across the surprising statement that the Turkish steamer Baghdad was "raised from the bottom of the Bosphorus at Haidar Pasha." Now strictly speaking, Haidar Pasha, the starting point of the Baghdad Railway, is not on the Bosphorus at all, but on the Asiatic shore of the Sea of Marmora, two to two and a-half miles from Constantinople. Admittedly that is a minor point, but what I do take exception to in the statement is that it may mislead people as to the possibilities for salvage work in the Bosphorus. The depth there is from 80 to 150 fathoms, and there are very strong currents which would practically preclude salvage operations. The raising of the Baghdad, it may be pointed out, was very simple. The steamer lay a few yards off the quay wall in about four fathoms, and the captain's bridge was well out of the water!

***

Messages from Egypt make it clear that the country would be seriously affected by the continuance of the coal strike. Coal for the railways has for some time been ordered outside the United Kingdom, but the position is otherwise with regard to irrigation pumps and cotton ginning factories which have to be kept going. It is stated that a reduction of communications is impossible, as they were reduced to the absolute minimum early in the year, so that there is no hope in that direction. As it would appear that the strike is not going to last long—I should not be surprised if it were nominally over before these notes appear—Egypt is not likely, however, to suffer anything more than a temporary inconvenience. The experience will serve the useful purpose of illustrating the hopeless position in present labour conditions of countries dependent on others for articles of the first necessity, and will no doubt give an impetus to the use of engines which will burn the only fuel which Egypt herself can supply.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## GREECE.

ATHENS, October 5.

### Estimated Consumption of Cereals.

It is anticipated that the consumption of cereals in Greece (excluding Thrace and Ionia) from August 1, 1920, to July 31, 1921, will amount to 592,000 tons of wheat, 26,000 tons of rye, 121,000 tons of barley, 46,000 tons of oats, and 200,000 tons of maize. The estimated production of wheat not being sufficient for the needs of the country, it will be necessary to import about 300,000 tons from abroad. None of the other cereals need be imported, as the local production is considered sufficient for the demands of consumption.

The official forecasts of the production of cereals in Greece during the current year are as follows:—Wheat, 211,935,238 okes; barley, 98,898.638 okes; oats, 37,629.145 okes; rye, 16,634,257 okes; and maize, 152,497,875 okes. These figures do not include the anticipated production for the provinces of Argolis, Corinth Attica, Bœotia, Salonika, and Chios, which are not yet to hand.

### Production of Salt.

According to the Ministry of National Economy, the production of salt in the Government salt pits will amount to 62,400 tons during 1920. It is estimated that this quantity will be sufficient for the needs of the country, and that it will not therefore be necessary to import any salt from abroad as hitherto.

## EGYPT.

CAIRO, October 4.

### The Economic and Industrial Situation.

There are indications of serious industrial trouble again in this country. This time it is the gas and electric light workers in Alexandria and Cairo who are responsible for the unrest. They claim further increases in pay and an improvement in general working conditions. The company have already conceded some points, but, despite the efforts of the Conciliation Committee, the workers will not abate their demands, and it looks very much as if the threatened strike in Cairo and Alexandria will take place.

Meanwhile, the Government has again intervened in the matter of rents. Action had already been taken last spring in this matter in regard to house rent, and the Government had issued a decree forbidding increases in these rents of more than 50 per cent. beyond the rents charged in July, 1914; but apparently this did not adequately meet the situation, and as this measure only applied to dwelling-houses there has ever since been considerable agitation among the tenants of shop and business premises for the extension of this decree to their case. The Government has at last appointed a strong committee to investigate the question of the rents of shop and business premises, as also the need for any amendment in the first decree, and the committee has been instructed to report without delay. As a protest against the arbitrary action of their landlords, the tenants of shops, cafés, etc., had arranged to close their premises for the day on the 6th instant, but in view of the appointment of this committee this closure has now been postponed.

October 11.

### No Restrictions on Cotton Cultivation.

At one of its last meetings the Council of Ministers issued a decision to the effect that there will be no restrictions on cotton cultivation during the coming year. As a matter of fact, there have been no such restrictions. Owing, however, to the threatened shortage of foodstuffs, the question of either limiting the cotton area or compelling cultivators to grow a minimum quantity of cereals had been under consideration, but as it had meanwhile been found possible to provide for the cereal needs of the country the question had been dropped. Cultivators were, however, somewhat uncertain as to what was going to be done, and so it was considered advisable to issue a notice definitely settling the question.

I understand that the Supplies Department has made contracts for more than sufficient flour and cereals to meet the requirements of the country during the next year, and that a large portion of these shipments has already arrived. These supplies are being put on the market at considerably below cost price to the Government, the loss being met out of the proceeds of the cotton tax recently imposed, but it is feared that the latter may in the end not prove sufficient to meet the deficit.

## YUGOSLAVIA.

BELGRADE, October 19.

### Orient Express Delays.

Representatives of the International Sleeping Car Company have arrived in Belgrade to inquire into the cause of the constant lateness of the Simplon-Orient Express.

### Communications with Salonika.

The Greek railway authorities have issued orders that the Guevgueli-Salonika train shall no longer wait for the Belgrade-Skoplie-Guevgueli train if the latter is late, but shall start at the scheduled time. This is a grave inconvenience for travellers from Belgrade to Salonika, for owing to inferior coal and other traffic difficulties long-distance trains have the greatest difficulty in keeping to their time-tables. Besides, this interruption involves spending a night in Guevgueli, where there is very limited and inferior accommodation.

### Purchases of Cotton.

At a recent meeting the Reconstruction Committee resolved to buy large quantities of cotton in England. A provisional sum of 15 million dinars has been allotted for this purpose, with which it is hoped to secure from 18 to 20 truckloads. Three-quarters of this amount will be cotton yarns for the peasants and the remaining quarter raw cotton for the mills at Dugaresa and Karlovats. These works will deliver their products to the mills at Uzhitsa for spinning. Cotton waste will be consigned to the mattress makers. There will be double as much yellow or unbleached as bleached cotton. A special commission will proceed to Manchester, consisting of the Presidents of the Chamber

**General News.**

Yugoslavia is a large consumer of blue vitriol for spraying its numerous vineyards. The domestic output is far too small for its needs, and there has been difficulty in obtaining supplies from Italy and other countries during the past two summers. Arrangements are now being made for the manufacture of sulphate of copper at the Bor mines, and it is hoped that next year the country may be independent of imported vitriol.

Indignation has been caused by the report that the Inter-Allied Reparation Commission in Vienna is demanding the return to Austria of a substantial portion of the booty taken from them, that is to say, locomotives and rolling-stock. The injustice of this is keenly resented, for it is estimated that it would involve the expenditure of some 400 million dinars to replace the material, and that at a time when the communications in Yugoslavia are far from restored to the normal. Besides, it was the Serbian Army that took the booty, and once more they repeat the bitter complaint that what they lose is Serbian, but what they get belongs to the Allies.

## EGYPT'S ECONOMIC POSITION.

The long period which has elapsed since the appearance of the last report on Egypt and the Sudan has now been ended by the issue of the "Reports of H.M. High Commissioner on the Finances, Administration and Condition of Egypt and the Sudan for the period 1914-19." In the circumstances it is only natural that there should be a difference between the present Blue Book and its predecessors of pre-war days, and it is to some extent more of a summary than a survey, but there the contrast ends. These annual Blue Books have invariably proved a mine of invaluable information, and the present one is no exception, and in its record of the trend of events in Egypt during what, from the economic point of view, has been one of the most important periods of Egyptian history, it provides a fund of data on which to estimate probable developments in that country.

It would be difficult to imagine a deeper contrast than exists between the Egypt of 1914 and of to-day. The effects of the severe economic crisis of 1907 were still being felt to a considerable degree in 1914. Since that period the country has enjoyed an unequalled wave of prosperity, and it now has greater resources at its disposal than ever before. When the war began such a prospect seemed extremely remote; it appeared, in fact, much more probable that the previous crisis would be repeated to an even more disastrous degree. But while as elsewhere the war disturbed the established order of things, other factors speedily came into play which far more than restored the balance. What has happened can best be illustrated by pointing out that while the immediate consequence of the outbreak of war was a fall of at least one-third in the price of cotton, the 1918 crop was purchased by the British and Egyptian Governments at more than double the pre-war rate. Since then cotton has soared to previously unheard-of figures, and by April of the present year was in the neighbourhood of ten times the normal figure. This condition has been more or less maintained until within the last couple of months, since when there has been an exceedingly sharp fall in the price of cotton, and much of the previous rise has disappeared.

The effect of this development on Egypt's revenues will be obvious, and this lends a special interest to a consideration of the country's financial position. While this is undoubtedly good, it is not so satisfactory as it appears on paper. The country's foreign investments are estimated at not less than £E150,000,000. It is pointed out, however, that the large balance thus accumulated cannot be considered as consisting entirely of profits. It is due to some extent to the reduction of purchases of goods from abroad, to the use of paper currency, and to the postponement of the maintenance and renewal of works, and, finally, also to the inroads made on the country's resources for material for military purposes. "Heavy liabilities," it is stated, "have been accumulated in respect of many of these items which will have to be met in the near future. A further large portion of the accumulated surplus will no doubt be devoted to the purchase of more or less necessary commodities . . . of which the importation was restricted during the war, while, if free gold exports are again permitted from the United Kingdom, gold will be demanded to replace a great part of the notes in circulation." Emphasis is laid on the point that though Egypt is a creditor in respect of this large total, it does not balance the still larger amount for which she is a debtor to foreign countries. But while Egypt is still, in this sense, a debtor country, the debts, consisting chiefly of loans on mortgages and capital invested in industrial, transport and other companies, will not be repayable for many years, while, on the other hand, she is a creditor for an amount the bulk of which is repayable practically on demand.

Turning to public finances, the public debt of Egypt has been reduced by £902,900 since 1913, through the automatic amortisation of the Guaranteed Loan, and on December 31, 1919, stood at £93,299,640. Of this total the amount in the hands of the public represented £88,017,380. Of recent years no amortisation of the Privileged or Unified Debt has been effected. In so far, however, as the Budget surpluses are accumulated in the reserve fund and invested in securities, this process operates as a reduction of the Debt charge for the time being. One of the most hopeful features of the position is the continued development of the country's revenues. For 1914-15 the revenue was £E15,389,124, and there was a deficit for that year of about a million and a-half. The following year, with a rise in the revenue to £E17,759,418, the series of surpluses began with one of over a million, while for 1918-19, when the revenue had risen to £E27,661,289, there was a surplus of £E4,276,963. For the current year the revenue is estimated at £E40,271,000, the expenditure being placed at the same figure. Allowing for extra expenditure on construction and renewals, and for the loss on the sale of imported wheat and other items, it should not be too much to anticipate that once again the Government should find themselves in possession of a considerable surplus when the year ends to add to the already substantial reserve. *Prima facie*, it would certainly appear that Egypt has at its disposal resources sufficient to carry it through a number of lean years. "From the Egyptian point of view the position is of course, a satisfactory one," it is pointed out, "though the extent to which the accumulation of funds during the war will ultimately benefit the country will depend on the manner in which it is employed. . . If . . . it is employed in the repayment of debt and in productive expenditure, the economic well-being of the country will be enhanced, the country will be in a position to withstand the effects on its revenues of a future fall in the price of cotton, and it will be in a fair way of achieving financial independence."

## OPENING FOR TOBACCO MACHINERY IN TURKEY.

The tobacco-growing region of Anatolia tributary to the Samsoun market covers the districts of Samsoun, Baffra, and Alatcham, and Tashova, in all about 37,000 acres. From this region (says an American consular report) approximately 80 per cent. of the higher grades of filler leaf tobacco is shipped to the United States. The Samsoun district is subdivided into five districts, namely, Dere, Maden, Djanik, Evgaf, and Karagöl. The Baffra district, lying west of the town of Samsoun and situated on the Kizil Irakm River (the largest river in Anatolia), produces tobacco similar in quality to that of the Samsoun district, but a much larger leaf. The Alatcham district, lying west of Baffra, produces tobacco inferior in grade to that of the other two districts. Cultivation is carried on by old, primitive methods.

The Regie Co-Interesse des Tabacs de l'Empire Ottomane (now in French hands) has a monopoly of all tobaccos grown in the Ottoman Empire. No foreign leaf tobacco may be imported into the Empire, but export of the Turkish product is permitted. The purchase, transportation, storage, and shipment of leaf tobacco for export are subject to the control of conditions imposed by the above-named company.

This company, whose main office is in Constantinople, manufactures in its branch located at Samsoun some 200,000,000 cigarettes annually for local consumption, making use of six cigarette-making machines. Four of these are of German and two of Russian manufacture. The German machines have a capacity per hour of about 12,000 cigarettes and the Russian of about 5,000. A market is said to exist for up-to-date machines.

It is reported from Belgrade that the Yugoslav Government has decided to make oil and its by-products a monopoly.

Machinery and apparatus destined for the "Motoculture" exhibition, to be held at Tunis next March, may be imported duty free, and must be re-exported within two months of the closing of the exhibition.

# BRITISH CONSULAR REPORTS.

## V.—MOROCCO.

The Consular Report on the Trade, Industry, and Finance of Morocco, which has just been issued, covers the three sections into which Morocco is divided administratively—the French Protectorate, the zone of Tangier, and the Spanish Protectorate. Below we give some extracts from the report of Mr. Gerald H. Selous, Acting British Consul at Casablanca, on the position in the French zone:—

### The French Protectorate.

*Trade and Commerce.*—Trade was fairly brisk in 1919, thanks partly to increasing capacity in Europe to execute orders, and partly to the gradual removal of Moroccan export restrictions. At the same time considerable speculation was, and still is, rife, much merchandise passing from store to store instead of to the interior as the result of genuine sales. The purchasing power of the native population has been considerably reduced during the last five years owing to the fact that, though four of these years produced good crops, the bulk of the produce could, as a result of war regulations, find only one buyer—the Military Supplies Service—who bought far below the world price. Consequently, in face of the enormously enhanced price of imported commodities and cost of living, the Moor's purchasing power has diminished appreciably.

Between December, 1918, and March, 1919, liberty of export was restored in the case of vegetable fibre, hides, goatskins, wool, sheepskins, linseed, pigs, forage, hay and straw, field peas, canary seed, carob beans, and castor oil seed, whilst the export prohibition on beans, lentils, and bran was lifted towards the end of the year. Brisk trade was done with the United Kingdom and Spain in linseed, canary seed, beans, and chick peas, unexpectedly good profits being made owing to the steady drop in the franc exchange between the date of local purchase in francs and the date of payment for the goods in sterling or pesetas. For this reason the United Kingdom and Spanish markets were preferred.

Imports consisted chiefly of building materials, cottons, sugar, tea, candles, and soap. Business in cotton goods was very satisfactory. This was not the case as regards tea owing to the depreciation of the franc and a heavy sumptuary tax of 1.50 francs per kilogramme. This has meant either reduced consumption by the native population or sale at a loss, and severe losses have, in fact, been suffered over tea.

Sugar business has been brisk, the French Government having reserved for Morocco a quantity sufficient to give a ration per head of population considerably superior to that allowed in France or the United Kingdom. This is due to the particular partiality of Moors for the commodity in question and the desire to obviate the discontent which its scarcity would cause. Trade in building materials has likewise been keen, the Protectorate Government being engaged on a very extensive programme of public buildings and port works, such as a new Residency-General and Ministries, and port works at Rabat, law courts, hospitals, secondary schools, and port works at Casablanca, and port works at Saffi. Private building enterprise is also proceeding at full pressure.

*Openings for British Goods.*—The steady depreciation of the franc has inevitably reduced the demand for goods produced in the United Kingdom, and has diverted many orders to Belgium and Germany, imports from the latter country having been experimentally sanctioned at the beginning of 1920 for a period of six months, subject to a Customs supertax of 10 per cent. on direct, and 15 per cent. on indirect, imports. Cottons remain in demand, as is the case also with Bradford goods. Further, motor cars, bicycles with and without side-cars, lorries, tractors, and motor tyres, would find an immediate market, owing to the limited supply of these arriving from other countries whose depreciated currency places them in a better position than the United Kingdom to secure orders. Other goods greatly in demand are iron rods for ferro-concrete structures, rolled iron beams or I joists, cement (very large quantities of this are wanted), galvanised iron buckets and kettles, corrugated iron sheets, hardware, mattress covering, candles, soap, glassware, boots and shoes, petrol, kerosene and coal.

*Foreign Competition.*—The countries chiefly competing at present in the supply of most of the above-mentioned goods are Belgium, France, Italy, Spain, and the United States. Belgium is doing considerable business in iron rods and glassware, and importers were hoping to obtain these also from Germany. The present state of affairs in that country, however, will probably retard her return to the Moroccan market. Belgian cement likewise always held, and still holds, an important place. France, Italy, and the United States have supplied the great majority of motor vehicles, the makes most frequently seen being Rochet-Schneider, Berliet, Ford, Panhard, Overland, and Fiat, as well as Fordson tractors. The American Vacuum Oil Company, Limited, has a virtual monopoly of kerosene, petrol, and lubricating oils and greases, whilst Spain has been a large importer of mattress covering, ticks, hollow bricks, and tiles.

*Industrial Development.*—The industrial development of Morocco is as yet in its infancy, but a rapid advance has to be noted during the last six years. The first industry naturally to be developed in view of the fact that Morocco is a wheat-producing country was flour milling, and large mills have now been erected at centres such as Casablanca, Rabat, and Fez, and smaller ones in other towns. These mills, which are taking the place of the small native horse or water-driven mills, supply all the needs of the army of occupation and a large and rapidly increasing European population. Concurrently with the flour mills, factories for the production of alimentary pastes, such as semolina, vermicelli, macaroni, etc., have come into existence, whilst a biscuit factory has now made its appearance in Casablanca. Cement, lime, and stone-breaking factories, and power stations for the supply of electric light and current have been erected, as also have various mineral water plants. More recent industrial developments consist of factories producing fibre from the leaf of the dwarf palmetto palm, meat, and fish-salting and bacon-curing factories, and flax-spinning and olive-oil mills. In addition to these, a large slaughterhouse and bye-products factory is being erected at Casablanca on the most modern lines. At present the only manufactured products exported by Morocco are hand-made native slippers, worked leather and carpets; the latter is a cottage industry which is being vigorously encouraged by the Government. Raw materials, the export of which has only recently been undertaken, consist of vegetable fibre and spun flax and hemp. The cultivation of textile flax was begun for the first time, and the first flax-mill erected in 1919. Great hopes are entertained as regards the production of spun flax and hemp, inasmuch as both these plants grow very well in Morocco, the hemp especially being of excellent quality, and comparing favourably with Italian Bologna hemp. Experiments in the cultivation of jute are likewise about to be made.

### Zone of Tangier.

From the report of Mr. A. K. Clark-Kerr, H.M. *Chargé d'Affaires* for Morocco, we give the following extracts:—

*Trade of United Kingdom.*—In spite of the difficulty of transport and the delay and uncertainty of deliveries, the United Kingdom has in most cases maintained the lead in the articles of import of which before the war she was the principal importer. In tea, candles, soap, coal, and cotton goods she is still well at the head of the list, and she has now taken the first place in paints and coffee, hitherto held by France. In some cases, however, the United Kingdom has been outstripped by Spain, as, for instance, in confectionery and biscuits, groceries and provisions, and, indeed, as regards vegetable oil, nearly half of which in 1913 was imported from the United Kingdom, practically the whole trade has now gone to Spain. Spain has, moreover, taken France's place at the head of the list in wines and spirits and linen; while in hardware and woollen goods, in respect of which articles her trade in 1913 was negligible, she is again first. The remarkable position of Spanish trade may be explained by her policy of neutrality during the war, her geographical position, and the fact that the majority of the European population of Tangier is Spanish.

It would seem that at the beginning of 1919 the market at Tangier was overstocked with British goods, for which there had been a diminished demand. Indeed, in some cases difficulties were experienced in inducing consignees to take delivery of goods despatched to them; gradually, however, conditions appear to have improved, and the demand for British goods increased as the year went on. This was especially marked in the case of British cloths (tweeds and cheviots), and the heavy broadcloths used by the natives for clothing. Spanish manufacturers have, however, been successfully competing in the market for broad cloths. It is of interest to note that Belgian goods have reappeared in the Tangier market, and it is believed that considerable orders have been given for sickles and for glasses used by the Moors for tea, but deliveries seem to be much delayed.

*Possible Openings.*—In view of the lines upon which the development is proceeding, the following are the kinds of goods in respect of which British trade might be developed in addition to those articles in which the United Kingdom is already predominant:—Machinery and agricultural implements, building materials and window-glass, cement, cheap boots and shoes, cheap wire fencing, cutlery, drapery, electrical plant and accessories, furniture, fertilisers, glass, china, etc., hardware, ironmongery, provisions of all kinds, sanitary appliances and fittings, stationery of all kinds, timber, and woollen goods. There should also be an opening at Tangier for a general stores, where British goods of all kinds would be procurable at reasonable prices.

## ENGINEERING.

### A New Petrol Saver.

Now that motor fuel has reached so high a price, every motorist is on the look-out for some method of economising, and I should say that the new device which has just been brought to my notice will be rather popular both at home and in our overseas markets.

A high degree of efficiency is, of course, obtained by the automatic carburettor, but in many cars a greater degree of latitude in the composition of the mixture is desirable. When properly adjusted to give maximum power at low speeds the mixture is sometimes too rich for ordinary driving, with a consequent waste of petrol. If, on the other hand, the carburettor is adjusted to give a weak mixture with a high mileage per gallon, it is sometimes a far from easy matter to get the engine to pull well at slow speeds and up difficult gradients. Further, some difficulty in starting is generally experienced.

The manufacturers of the petrol-saver referred to claim that their device entirely corrects this, as it allows the carburettor to be set for easy starting and ample power at low speeds, but when more speed and power are required on the level this result can be obtained by opening the valve of the petrol-saver, instead of by opening the throttle, thus economising petrol. The device, which is screwed into the inlet pipe, consists of a conical valve, the seating of which also acts as the valve cage of the casing. Air enters through four holes which are provided in this, but the flow of air beyond that point to the engine is regulated by a phosphor-bronze wire working in the flexible tubing and moving the conical valve inwards and upwards as required.

### Air Cooled Electric Motors.

For a considerable time the limitations of output on the part of electric motors, due to the necessity for keeping the current carrying parts cool, was accepted as inevitable. It was known that could the field magnet and armature windings be kept at a moderate temperature when a heavy current was passing, improved efficiency would result, yet very few electrical engineers went into the question thoroughly with a view to seeing what, if any, improvement could be made.

The latest development in the design of totally enclosed motors was the introduction of a system of air cooling which increased considerably the output and general efficiency of that particular type of motor. There are many purposes for which totally enclosed motors are suitable, and which could not be fulfilled with motors of any other type. Consequently, any improvement which will add to their efficiency has a special industrial value. Hitherto the demand for motors of this class, which admittedly have many advantages, has been restricted by the difficulty in constructing them, particularly in the case of machines of some size, and as a result, this class of motors, as compared with those of the ventilated and open type, has been extremely costly.

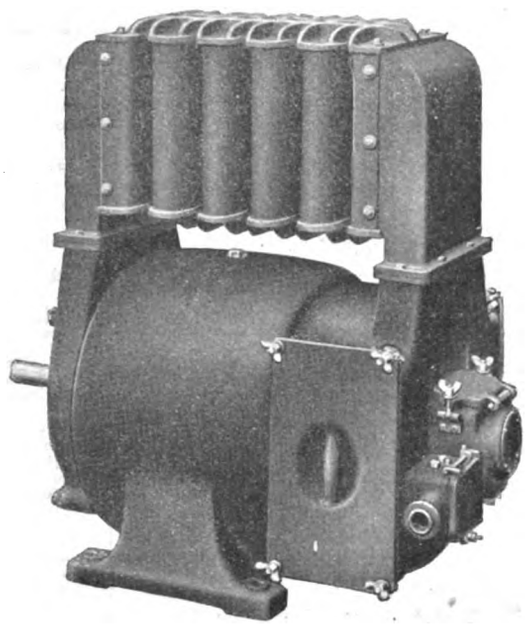
### Engineering Difficulties.

As every engineer is aware, the chief if not the only reason for this is that all heat generated in an enclosed motor must of necessity be radiated through the outside case of the machine, and as the rate of such dissipation is limited, it follows that the design and windings of the machine must be such that little heat is generated. From a practical engineering point of view, this means that the power output from such a motor must be within somewhat narrow limits, which means that to obtain a big output a correspondingly big machine is necessary. Furthermore, as has been pointed out, high speeds for such motors have been impracticable, for the reason that a large proportion of the heat is generated by the armature iron losses alone, and as these increase with the speed it follows that a point is soon reached when these losses alone balance the radiating capacity of the frame of the motor.

In the attempt to overcome these difficulties, a number of expedients have been tried, such as ventilating by means of pipes, ventilating by fans, and other means, but there have been disadvantages connected with all these. Other devices have been tried, such as pipes through the machine itself, and the use of fins and ribs on the carcase, but without complete success. One method tried was the use of a hollow bedplate, upon which the motor was mounted, and through which air was circulated from the motor. This hollow bedplate was embedded in concrete to absorb the heat, or, alternatively, was cooled by a series of water pipes.

### The Problem Solved.

The Le-Thermo motor now on the market has large radiating or air-cooling surfaces constructed in such a manner that the system can be applied to standard machines of the well-known chimney or pipe-ventilated type, the construction being such that the surface can be easily adjusted by the manufacturer to suit any requirement. The cooling surfaces are constructed in various forms, in one of which the radiator proper consists of a box with end pieces designed to fit on vertical trunk openings in the motor end covers, and through this box pass, in a vertical direction, a number of thin metal tubes. Inside the back bearing of the motor a fan is fitted on the armature shaft, which causes a circulation of air through the machine and through the



**A Totally-enclosed Motor, suitable for Normal Speeds, but giving an Open-type Output.**

radiating arrangement, and the arrangement of the tubes is such that the air impinges on the thin vertical tubes which carry away the heat. The advantages claimed for this system are that not only is increased radiating surface provided, but that as the tubes are thin compared with the motor carcase, the radiation is much greater. Hence it is possible to approach within reasonable limits of the capacity of a ventilated motor of given frame size without the use of an excessively large radiator.

In another form of the invention the tube radiator is replaced by one having thin, sinuous metal sides, with top and bottom covers, and also having mounted, inside the radiator, baffle-plates, which cause the air to impinge in a thin stream against the outside surfaces, so that this type performs the same functions as the tube radiator.

The design, the makers point out, lends itself admirably to an entirely water or dust-tight construction, which widens its field of use enormously. At the same time the bulk of the machine can be of quite moderate dimensions; in fact, less than for an ordinary totally enclosed motor when dealing with larger powers. They claim, also, that this type of machine is specially suitable for use in chemical works, collieries, foundries, flour mills, bleaching works, woodworking shops, breweries, or other places where the motors used have to work in a dusty, damp, or fume-laden atmosphere. It also is particularly suited for use in connection with centrifugal pumps, as a fairly high speed is available. This not only means cheaper motors, but enables smaller pumps to be used for dealing with a given output. It seems that it only needs these many advantages to be

**Head Office: ATHENS.**

*Branches:*—**Pirmus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

**AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.**

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

## GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,745,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 296,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

**IMPORTS** (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

**EXPORTS** (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

**COINAGE.**—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 36 Drachmæ to £1.

**FREIGHT.**—From England, 160/- + 10% primage.

**WEIGHTS AND MEASURES.**—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

generally recognised in order to bring about a considerable increase in the use of motors of this type in industrial work.

**The Crossley 19.6 h.p. Model.**

The great success attained by the 28-30 h.p. R.F.C. Model Crossley has decided the company to continue its manufacture during 1921, and this car will be a standard production from the Crossley factory next year. In view of the demand on the part of a large body of motorists requiring a lighter car, the Crossley Company have decided to manufacture a 19.6 model in addition to this eminently successful model, and this will be among the company's exhibits at the coming motor show at Olympia. This new model embodies the accumulated experience of many years of automobile construction, and in accordance with the consistent policy of the company every care has been taken to ensure that it reaches the high standard of efficiency which characterises Crossley cars. Tests of the severest nature have been successfully carried out, and nothing has been spared to make the car the best of its kind. The 19.6 Model Crossley will be shown to the public for the first time at Olympia in chassis form, and its appearance will certainly be welcomed with lively interest. In the design of the 19.6 model due prominence has been given to the accessibility of all parts—a point which will be greatly appreciated by owner-drivers. All unnecessary weight has been eliminated with the object of obtaining lightness with strength; the consequent economy in upkeep is obvious.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Sugar.—The free market has been quiet. West Indian crystallised has been done at 97s. to 100s., and American granulated has been done at 111s. White Mauritius is quoted at 110s. There has been a good demand for home refined at the official prices.

Coffee.—There has been a slight improvement in business. Mocha has been done at 170s. The futures markets has been more animated. Quotations are: December, 57s.; March, 52s. 6d.; May, 52s. 6d.

Oilseeds.—The tone has been exceedingly dull. Indian linseed has been done at 35s. 10d., while La Plata has come to business at 32s. Rapeseed is steady. Toria has come to business at 33s., bold Ferozepore at 32s., and brown Cawnpore at 29s. Cottonseed is practically unchanged. Indian has been done at 13s., and Egyptian at 19s. 10d.

Seed Oils.—Prices have improved generally speaking. Linseed oil has risen 4s. to 72s. Refined rape oil at 92s. is 8s. up, while the crude variety has improved 5s. to 75s. Turpentine is 2s. lower at 121s.

Oilcakes.—Business has been fairly steady. Linseed cake has declined 6d. to 23s. per cwt. Cottonseed cake is considerably harder at 13s. 10d., but arachis cake remains unchanged at 14s. Other transactions comprise ground nut cake at 14s., and coconut cake of very good quality at 16s.

## EGYPTIAN CROPS.

The Bulletin of the Egyptian Ministry of Agriculture reports as follows on the state and prospects of crops:—

*Cotton.*—The weather was changeable during the month under review, except in Middle and Upper Egypt, where it is reported to have been on the whole favourable. The water supply was plentiful, leading to overwatering in many cases and causing damage to the crop. The first picking has been taken in most parts of the country, and the second has been completed in some places. In the majority of the provinces of Upper and Middle Egypt the cotton sticks are now being removed. The yield is hardly expected to be up to average, owing to overwatering, attacks of insect and fungoid pests, and unfavourable climatic conditions.

*Millet (Sêfi).*—Harvesting was general. The yield is nearly average.

*Millet (Nili).*—The weather has not been favourable in Qena and Aswân. The water supply was sufficient. Slight attacks of stem-borer are reported.

*Maize (Nili).*—The weather has been on the whole favourable towards maturity.

*Maize (Nili).*—The weather has been on the whole favourable and water supply sufficient. Watering, thinning, hoeing, and manuring are in progress. Flowering is general and cobs are formed in early sown fields. Slight attacks of stem-borer and stalk-borer have been reported from a few provinces.

*Bersim.*—The weather has been favourable and the water supply sufficient. Preparation of the land, watering, and sowing are in progress.

*Rice (Sêfi).*—The weather has been favourable and the water supply sufficient. The crop is healthy and the yield is expected to be above average. Harvesting the early sown crop will begin early in October.

*Rice (Nili).*—The hot weather during the month has slightly affected the growth of the crop. The crop is late this year.

*Sugar-cane.*—The condition of the crop, which is advancing towards maturity, is on the whole satisfactory. The yield is expected to be nearly average.

## LANCASHIRE COTTON

### Improved Outlook.

(From Our Own Correspondent.)

Manchester, Monday.

After several months of depression in our market, it is possible to record a rather better feeling. So far there has not been any decided increase in the turnover, but inquiry is improving, and spinners and manufacturers seem to be within measurable distance of a large turnover. A good deal hinges on the developments in connection with the coal strike, but if a settlement is reached there are many people who believe that a revival of buying in yarn and cloth will show itself. Undoubtedly after the recent slump the level of values is considered attractive. A rather stiffer tone is now showing itself in raw cotton circles. The American crop is doing fairly well, but there is less pressure to sell on the part of Southern growers. Some telegrams during the last day or two relating to the Egyptian growth have not been very favourable, and there is a disposition in some quarters to reduce again estimates of the yield. Inquiry in yarns made from Egyptian cotton has broadened somewhat, but users do not seem to be in any hurry to purchase, and there has only been a very slight improvement in the turnover. Shippers of piece goods to the Near Eastern outlets have displayed more interest in prices, and although not many orders to make have been given out to manufacturers, stock lots have been purchased more freely both for Egypt and Turkey. A larger business has been done in light fabrics, especially dhooties for India, the bulk of the buying being for Calcutta. Operations for China have been very patchy, and staples have attracted no attention whatever. Now and again useful lines have been booked in printing and finishing styles for South America. The business offering in home trade fabrics has been rather better. Manufacturers continue to accept wretched prices, but there are indications of some relief being obtained. American yarns, especially in ring beams, have been in increased request, and quotations are firmer than a week ago. More business has been reported in coarse numbers and extra hard yarns for the Levant, and inquiry has been more prominent in cops for the countries of Northern Europe.

## GOOD BULGARIAN HARVEST.

The Central Meteorological Bulletin of Sofia in a report on crop conditions in Bulgaria, states that the harvest was almost complete by the end of August, even in the higher districts. The millet crop was good; wheat showed about 25 per cent. less in the northern districts, but was in the same proportion more in the south. The harvest, as a whole, showed: Barley, 111 kilogrammes per decare; wheat, 106 kilogrammes per decare; rye, 101 kilogrammes per decare; oats, 92 kilogrammes per decare. Maize had suffered somewhat from lack of water, but the crop on the whole was good, the plants having recovered under the August rain, in spite of its lateness. The bean crop ranged from good to excellent, and rice from abundant to excellent. Beets were promising only poorly, though recent rain should improve matters. The sunflower harvest had commenced and was satisfactory. The tobacco crop was nearly all in: the harvest was good as regards quantity and very good as regards quality.

The production of crude oil of the British Burma Petroleum and Rangoon Oil Companies amounted to 56,228 barrels for September

It is reported that an oil-bearing district has been discovered at Basilicata, and the fields are said to extend from Tuscan to the Ionian coast.

A large oil reservoir is being erected at Biserta to hold 10,000 tons of masut as part of a scheme to supply ships with oil passing through the Mediterranean to India and the East.

# COMPANY MEETINGS.

## HARRISONS AND CROSFIELD.

### Outlook for Tea and Rubber Industries.

The twelfth ordinary general meeting of Harrisons and Crosfield, Ltd., was held on October 21 in the Council Room of the Rubber Growers' Association, 38, Eastcheap, E.C., Mr. Charles Heath Clark presiding.

The secretary (Mr. E. C. Cleveland-Stevens) having read the notice convening the meeting and the report of the auditors,

The chairman said: Gentlemen.—At the request of my colleagues I am occupying my old position in the chair to-day, owing to the enforced absence through illness of Mr. Croll, who became our chairman shortly after the conclusion of the Armistice. The great and incessant strain of the past half-dozen years has necessitated his taking a somewhat prolonged rest; but you will be glad to know that he is making satisfactory progress towards recovery. We are hoping before long to welcome him back to business, and enjoy once more the advantage of his great ability and industry in connection with the affairs of the company.

It is a great pleasure to me to be in the position to congratulate you to-day upon what I feel sure you will regard as the very satisfactory result of the year's working, for, notwithstanding many difficulties arising out of the disturbed conditions prevailing, our total net earnings amount to £249,203 15s. 4d., as against £200,571, 8s. 8d. a year ago.

A year ago the general reserve fund was brought up to a total of £315,000. We have now added to it £111,073, being the net amount of the premium on the last issue of Preferred Ordinary shares, and we propose adding £13,922 out of the year's profits, thus bringing the reserve up to £440,000, equivalent to about 24 per cent. of the share capital. Freehold and leasehold property stands in the balance-sheet at nearly £400,000 more than it did last year.

In our stocks there is an increase of about £50,000, which is not surprising considering the general advance in values and the rise in the exchange value of the rupee as compared with that of a few years ago. The investments stand at about £220,000 more than in June, 1919. Our investments are valued at cost price or under, and it is very satisfactory that, notwithstanding the present "slump" in the prices of tea and rubber the total market value of our investments to-day is largely in excess of the figure appearing in the balance-sheet.

**Profit and Loss Account.**

Turning to the profit and loss account, our net earnings for the year under review amount, as I have already stated, to £249,203 15s. 4d., to which there has been added the balance of £36,147 11s. 4d. brought forward from last year, making the total amount of distributable profit £285,351 6s. 8d. Out of this amount we have already paid the entire dividends for the year on the Cumulative Preference and Preferred Ordinary shares, amounting respectively to £37,230 and £80,000. We have also paid the fixed dividend on the Deferred Ordinary and Management shares, amounting to £19,637 12s. 8d., and have divided a further sum of £51,412 18s. between the holders of those two classes of shares. The balance of profit now remaining is £97,070 16s. Out of this we propose to transfer £13,922 to the general reserve, as already mentioned, and to allocate £11,000 to the payment of the annual bonus to the staff, and from the balance then remaining we propose to distribute £34,275 5s. 4d. among the holders of Deferred Ordinary and Management shares, leaving to be carried forward the sum of £37,873 10s. 8d.

During the year the Board of Directors has been further strengthened by the addition of Mr. H. O. Peake, who entered the service of the company in 1908, and for some years acted as our secretary. During the past year three members of the Board, Mr. Welch, Mr. Macfadyen, and Mr. MacColl, have paid visits to our Eastern branches, and we are very much indebted to them for the services they have rendered the business in this connection. I also wish to mention again this year the loyal support which we have received from the members of our staff, both here and abroad.

Since our last meeting the position of rubber has undergone a great change. The cause of the present situation is not that consumption has declined, but that the increase in the production of rubber is at present greater than the increase in consumption, with the result that, at the end of this year, there is likely to be an accumulation of from 35,000 to 40,000 tons over the stock necessary for the working of the industry, with the possible tendency for this surplus to increase rather than diminish during 1921.

The position is aggravated and rendered more critical by financial stringency, both here and in America, making it very difficult for those who might wish to do so to carry more stock than is absolutely necessary for the actual requirements of their business. Such a position was certainly not anticipated at the beginning of the year. The financial conditions in the United States should become easier as the transport situation improves, and the strain which accompanies the financing of the harvest relaxes. The adverse European exchanges, being the result of inflated currency and adverse trade balances, will probably take a longer period before reaching anything approaching normal conditions.

**The Rubber Outlook.**

Under present conditions the French manufacturer buying rubber on the London market to-day has to pay more than twice as many francs per pound, the Italian has to pay from three to four times as many lire, and the German more than twelve times as many marks as he would do if his exchange were normal. Neither France nor Italy will take as much as last year, while Russia, which the year before the war took from 10,000 to 15,000 tons, and Austria, which took 3,000 tons, are still entirely out of the market. Germany before the war took over 15,000 tons, but this year it is estimated she may take about half of that amount.

Little real improvement in the economic conditions of most of these countries can be looked for until their expenditure is reduced to correspond with their revenue, and the continuous inflation of currency stopped. Their political and social conditions must be stabilised, and their production largely increased, for which purpose credits must be provided as a necessary condition to the restoration of their export trade.

I fear that no great expansion in the demand for rubber is to be looked for immediately. Meanwhile the price of rubber has fallen to a figure at which many estates can only produce at a loss, and which is probably little if at all above the average cost to the whole plantation industry. If this situation is allowed to develop further without interference it will be likely seriously to impair the productive efficiency of the industry for the future. This is being increasingly recognised by those connected with the plantation industry, and a favourable response to the proposals of the Rubber Growers' Association for the necessary restriction of output of both British and Dutch plantations, whether controlled in Europe or in the East, now appears to be assured.

The position in regard to tea is of a character somewhat similar to that of rubber, with the possible exception that the need for some drastic action appears to be even more necessary.

The marked rise in prices in the late summer of 1919 continued until the early part of November, by which time common Indian tea was selling in London public sale at 1s. 6¼d., but a reaction then set in as a result of abnormally heavy quantities coming from the East owing to the provision of increased shipping facilities.

At the end of September, 1920, the stock shown by the Board of Trade returns to have been in bond in the United Kingdom was 220¾ million pounds, against 99¾ million pounds at the corresponding date in 1913, and 143 million pounds in 1919. The decline in prices in London public sale has been extremely marked, the average price of all Indian tea having declined from 1s. 9¾d. early in November, 1919, to 10½d. at the close of September, 1920, while over the same period the price of common Indian tea declined from 1s. 6½d. to 4½d. As against these selling prices the probable average cost of Ceylon and Indian tea delivered in London is to-day not less than 1s. 2d. per pound. The prices at which lower grades are selling to-day are insufficient to cover even the out-of-pocket expenses incurred in shipping, landing, and selling.

**The Tea Industry.**

Again, we are faced with a position in which, if the future producing capacity of the tea industry is to be preserved, some united action on the part of those interested has become absolutely essential. It appears likely that proposals may be agreed to generally by which Indian and Ceylon producers will join together in reducing the output to the extent of approximately 20 per cent., and it is to be hoped that this will prove successful and cause prices to be maintained on a level which will at any rate, cover the cost of production.

I have now very much pleasure in proposing: "That the balance-sheet made up as at June 30, 1920, and the reports of the directors and auditors be adopted," and I will ask Mr. Miller if he will be kind enough to second that. If there are any questions which I can answer I shall be very pleased to do so.

Mr. H. Eric Miller: Ladies and Gentlemen,—It gives me much pleasure to second the resolution just moved by Mr. Clark. There is only one point to which I would refer, and that is that this business possesses an asset—I consider it to be its greatest asset—which does not figure in the balance-sheet, and that is the spirit of loyal co-operation which permeates the whole business in the head office and throughout the branches and the affiliated companies. We are living in very difficult times, and you can imagine what a relief it is to the directors to know that the difficulties which have to be faced will be faced in that spirit by everybody who is helping this business on.

Mr. Mark Johnson said he would like to ask the directors to reconsider the disbursement of the available balance. He noticed that the staff were to receive £50,000 in bonuses for the year. On the other hand, the original Preference shareholders were receiving not more than about 6 per cent. on their money.

He hoped the directors would see their way clear to do something to enhance the value of these shares on the market.

The Chairman, in reply, said that Mr. Johnson had put to the meeting something which was not peculiar to the position of the stock of this company, but what might be said to be pretty universal at the present time; that was to say, if they were forced to realise their investments to-day they would be faced with a large capital loss. The question as to the position of the Preference shareholders might have to come before the Board of Directors at some future time—in fact, it had been considered before—but nothing could be done in that respect without the consent of the other classes of shareholders in the company, because it would affect their interests. The position of the Preference shareholders had been somewhat improved a year or two ago, but they must realise that they were only in the same position as people who held Government stock or Trustee securities of any kind. It was obvious that those investments would not be again worth par until the price of money was easier.

The motion for the adoption of the report and accounts was carried unanimously.

The Chairman next moved: "That the following dividends be declared and paid forthwith—namely, a final dividend on 177,646 Deferred Ordinary shares, amounting to £17,137 12s. 3d., and a final dividend on 500,000 Management shares, amounting to the same amount.

Mr. G. S. Townend seconded the motion, which was unanimously agreed to.

Mr. H. J. Welch then proposed the re-election of the retiring directors, Messrs. Charles Heath Clark, G. S. Townend, and H. O. Peake. Mr. H. P. Church seconded the resolution, and it was carried unanimously.

The Chairman said that he wished to thank the shareholders for their confidence in him, and to assure them that he could say the same of both his colleagues. Had things been other than they were he had intended retiring from the Board altogether at that meeting, but owing to the fact that matters were not easy at the moment, and especially the fact that their chairman, Mr. Croll, was away, and would be away a little longer yet, he felt that he did not wish to do other than comply with the desire of his colleagues that he should continue to serve the company to the best of his ability, at all events until Mr. Croll was able to take his place again.

On the proposition of Mr. Woodhams, seconded by Mr. Johnson, the auditors, Messrs. Price Waterhouse and Co., were reappointed.

Mr. J. B. Crosfield proposed a vote of thanks to the chairman. This was seconded by Mr. H. M. Knight, and carried unanimously.

## Assam Railways and Trading.

The fortieth ordinary general meeting of the Assam Railways and Trading Co., Ltd., was held on October 20, at Winchester House, Old Broad Street, E.C., the Lord Ribblesdale, Chairman of the company, presiding.

The Secretary (Mr. S. Maclean Jack) having read the notice convening the meeting and the report of the auditors,

The chairman, in moving the adoption of the report and accounts, said that the result of the year was on the whole satisfactory. The general earnings of the railway showed a satisfactory increase, and the coal earnings, following on the greater output, were higher than in the previous year. The total earnings were the highest they had ever had, but so also, unfortunately, was the total expenditure, and the actual profit earned was rather less. In the collieries the outturn had shown an improvement on the level of 1918-19, but had not reached what they regarded as the proper standard. However, the current year showed a further improvement, and he hoped they were now returning to normal figures. The quantity sold and the income from sales showed slight decreases on the previous year, and the balance carried to revenue account was smaller. However, the whole of those fallings off had been more than compensated for by the increase in the profit on exchange. As the shareholders knew, Mr. Harris, Mr. Jack (their secretary), and he himself had visited Assam last cold weather, and he would like to refer to the report which Mr. Harris had made on the company's collieries. He had told the board that the whole of the company's mines were in good condition and capable of turning out their full output. The difficulty, as he, the chairman, had explained before, was labour.

While referring to his visit he might say that he had been struck with the great importance of adopting a progressive scheme of electrification and electrifying not only the mines, but the sawmills and workshops, bungalows, coolie lines, hospitals, and wharves. He was impressed with the view that considerable economies would result. The question of the company's finances was having the board's most earnest consideration, and they hoped in due course to decide on a policy which would be in the best interests of the shareholders. For long they had lived in Assam without any labour troubles, but this year there had been a strike both on the railway and in the mines. A very good compromise had been arranged, but expenditure for the current year on wages was bound to be very considerably increased, but prices and railway rates took some time to adjust, and there could be no doubt that the result of the year 1920-21 would not be a good one for them. It was, however, purely a temporary matter, and on the whole they should be able to face the future with serene confidence.

Mr. George Turner, M.E., seconded the motion, and the chairman having replied to questions, it was carried unanimously.

The retiring directors and the auditors having been re-elected, a vote of thanks to the chairman, directors and staff terminated the proceedings.

## SHIPPING INTELLIGENCE.

### Forthcoming Sailings.

Anchor Line s.s. Kingsmere, for Bombay, will close for cargo at Liverpool on November 8.

Bibby Line s.s. Gloucestershire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on November 3.

Byron s.s. Company's steamer Meandros, for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila, will close for cargo at Swansea on October 29 and at Liverpool on November 12.

Clan Line s.s. Clan Mactaggart, for Colombo, Madras, and Calcutta, will close for cargo at Birkenhead on November 4.

Cunard Line s.s. Sea Glory, for Gibraltar, Corfu, Piræus, Salonika, Constantinople, Galatz, and Braila, will close for cargo in London on October 30.

Cunard Line s.s. Cypria, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina, will close for cargo at Liverpool on November 13.

Harrison Line s.s. Author, for Calcutta, will close for cargo at Liverpool on November 1.

Henderson Line s.s. Henzada, for Port Said and Rangoon, will close for cargo at Glasgow on November 1 and at Birkenhead on November 10.

Johnston Line s.s. Cranmore, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila, will close for cargo at Liverpool on October 30.

Johnston Line s.s. Wingate, for Galatz and Braila (last sailing of the season for the Danube), will close for cargo at Liverpool on November 6.

Moss Line s.s. Assiout, for Gibraltar, Malta, Syra, Smyrna, and Constantinople, will close for cargo at Liverpool on October 30.

Papayanni Line (Ellerman Lines, Ltd.) s.s. Dido, for Malta and Alexandria (taking cargo for Beyrout, Alexandretta, Mersyne, Jaffa, Haifa, Cyprus, etc.) will close for cargo at Liverpool on October 30.

Papayanni Line (Ellerman Lines, Ltd.) s.s. Andalusian, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople, will close for cargo at Liverpool on November 6.

Power Line s.s. Pangbourne, for Rabat, Larache, Tangier, Casablanca, Mazagan, Saffi, and Mogador, will close for cargo in London about the middle of November.

Prince Line s.s. Syrian Prince, for Tunis, Malta and Alexandria, direct (taking cargo for Jaffa, Haifa, Beyrout, Tripoli (Syria), Lattakia, Alexandretta, Mersyne and Cyprus ports (with option of transhipment at Alexandria) will close for cargo at Manchester on October 30.

---

It is reported that there is a wool accumulation in the Balkan regions amounting to 1,000,000 lb.

The eighth general meeting of the Oriental Carpet Manufacturers, Ltd., will be held at Smyrna on November 10.

The directors of the Madras and Southern Mahratta Railway Company recommend a distribution of 25s. per cent., in addition to the guaranteed interest at the rate of 3½ per cent. per annum. The board also recommend a bonus of £3 per cent.

It is reported that large stocks of goods are still stored at Piræus and Athens for which the owners are unable to find a market.

Salt can now be exported from Turkey.

There is a market for dyestuffs among manufacturers of knitted goods in Western Greece.

It is reported that considerable deposits of rock salt have been discovered in the region lying north of Monastir.

## NEWS FROM ALL SOURCES.

Reuter's Bucharest correspondent, in a message dated October 23, states:—The Roumanian trade unions have proclaimed a general strike, and as a counter measure the Government has proclaimed martial law and closed the offices of the various unions. The general strike is a failure, but partial stoppages have occurred.

Eastern Bank.—Sir Edward Sassoon, Bart., has resigned his seat on the board on account of ill-health, and his brother, Mr. Meyer Sassoon, has been elected a director.

A large bamboo pulp factory has been recently established in Calcutta, and another in Burma.

Marine insurance companies operating in Syria are exclusively French or British.

The total quantity of raw unwashed wool in the Aleppo district amounts to 2,721,000 kilos, of which 80 per cent. is high grade and 20 per cent. low grade.

It is reported that the production of silk cocoons in Yugoslavia for the current year will amount to about 500,000 kilos.

The traffic receipts of the Suez Canal from September 1 to 12 amounted to 4,520,000 francs as against 5,870,000 francs.

The rise in the cost of living at Constantinople is about 1,420 per cent.

M. R. Tuffly has been appointed Roumanian Commercial Attaché at Prague.

It is reported that considerable deposits of rock salt have been discovered in the region lying north of Monastir.

Since 1915 the annual consumption of sugar in Greece has averaged 17,769 tons.

It is stated that there is a great demand in Turkey for glasses, bottles, lamp chimneys, metal bedsteads, men's clothing, and enamelled goods.

In a report published by a special committee of the Imperial Institute, which has investigated the possibility of increasing the trade of the United Kingdom and other parts of the Empire with India in food grains, the conclusion regarding British and India shipping is as under:—The committee are of opinion that in order to encourage the shipments of rice in British or Indian vessels, and as part of a general scheme for the development of British and Indian shipping, there should be discrimination in favour of such shipping at all ports in the Empire according to the following rules: (1) That a lower scale of tonnage dues and port charges should apply in all ports of the Empire to ships owned within the Empire; (2) That privileges in the ports of the Empire should be accorded to shipping owned in Allied or neutral countries equivalent only to the corresponding privileges accorded to shipping owned within the Empire in the ports of Allied or neutral countries; (3) That shipping owned in enemy countries should pay, in ports in the Empire, dues at least twice as large as those paid by any other shipping.

## MOTORING IN YUGOSLAVIA.

The roads in Serbia are in poor condition owing to heavy traffic and non-repair during the war. These roads formerly were hard surfaced and furnished the chief means of communication throughout the country, says an American Consular Report. The topography of Serbia is mountainous and heavy grades are frequent. Such conditions militate in favour of light, high-powered cars. In the former Hungarian Provinces of the Banat, the Backa, and Baranja, and in Croatia and Slavonia, the country is level and the roads are inclined to be heavy during the winter rainy season; otherwise the roads are good. In Bosnia, Herzegovina, and in Montenegro the roads are hard surfaced and in comparatively good repair. The country, however, is mountainous and sharp inclines prevail. In Slovenia the roads are in good condition and the country is hilly.

It is estimated that 100 cars have been imported during the past year. A conservative estimate places the number of passenger automobiles to be absorbed by this country in the next twelve months at 400. This is exclusive of cars for Government purposes.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

**Egypt.**

*(The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.)*

Steamer.—The Director-General, Mechanical Department, Ministry of Public Works, Cairo, invites tenders for the supply of an inspection steamer for the Upper White Nile Division. Specification P.T. 25. December 1.

Glass Panes.—The General Manager, Egyptian State Railways, Telegraphs, and Telephones, Cairo Station, invites tenders for the supply of glass panes during one or two years. November 15. (L.)

Construction Works.—The Director of Technical Services, Department of Municipalities and Local Committees, Ministry of the Interior, invites tenders for the construction of works necessary for the water supply of Mehalla el Kobra. Specification L.E. 2. November 15.

**India.**

Springs.—The Burma Railways Co. invites tenders for the supply of 700 helical springs.

Bridgework.—The Jamnagar-Dwarka Railway Co., Ltd., invites tenders for the supply of about thirty-five tons of bridgework, comprising sixty spans of 6 ft. in the clear. (Specification 10s. 6d. Messrs. Rendel, Palmer, and Tritton, 12-14, Dartmouth Street, Westminster, S.W.) November 2.

## NEW COMPANIES.

### London and Eastern Trade Bank.

The London and Eastern Trade Bank has been registered as a private company with a capital of £600,000 in £10 shares. Object: To carry on the business of bankers in all its branches. The subscribers (each with one share) are W. E. Whineray, Exchange Buildings, Liverpool, merchant, and G. D. Zamanski, 38, Lime Street, E.C.3, banker. The first directors (to number not less than six) are to be appointed by the subscribers.

The directors of the Calcutta Tramways have declared an interim dividend of 3½ per cent., free of tax, on the Ordinary shares.

Of the 1,008 solid rubber tyres fitted to motor vehicles at the Olympia show, 511 are Dunlops, giving a percentage of 50.69. The balance is divided amongst eighteen other makes, and the highest total of any other make of tyre is 110.

## ON 'CHANGE.

### Prices Still Falling.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

There are a few cases where prices have advanced this week, but, generally speaking, a further decline has everywhere to be recorded. Among those Near Eastern securities which we class with British funds, Egyptian Guaranteed 3 per Cent. has lost half a point at 59½, and the Turkish Guaranteed 4 per Cent., 1855, has dropped a point at 67, while Greek Guaranteed 2½ per Cent., 1898, has fallen heavily from 65 to 60. Among other Government stocks, Turkish 3½ per Cent. Egyptian Tribute Bonds have eased off a quarter at 52¾, and in Greeks there is an almost general depreciation. The 5 per Cent., 1881, and 1884 Loans have fallen from 53 to 51½, Monopoly and Rentes from 42 to 40½, the 1890 Loan from 52 to 51½, and Funding from 52 to 50. The 1902 Loan has declined from 44 to 43½, the 1910 from 38 to 37, and the 1914 from 51½ to 50½.

Among the Banks, Agricultural 3½ per Cent. Bonds and 3½ per Cent. Guaranteed Bonds have each lost a point at 58 and 60 respectively. Imperial Ottoman Bank has improved 1¼ points at 9¾, and Land Bank has gained 3-16 at 4 11-16, but National Bank of Egypt has lost ⅛ at 18.

Taking the Land shares, we find Anglo-Egyptian Land Allotment has eased 1-32 at 3½, and Béhera has lost half a point at 14, while the pref. shares have fallen from 68s. to 65. Egyptian Consols have gone off 2d. at 2s. 1d., Delta Lands 3d. at 13s., and Egyptian and Foreign Trust a like amount at 12s. 9d. Gharbieh Land at 2 11-16 has suffered a decline of 3-16, New Egyptians have dropped 6d. at 30s. 6d., Sidi Salem have lost ⅛ at 1⅞, and Union Foncière has eased 1-16 at 4 3-16; but, on the other hand, Sudan Plantations have advanced from 4 9-16 to 4⅞.

In the Miscellaneous group Abyssinian Corporation has eased off 1-32 at ¼, Alexandria Water has lost ½ at 7, Associated Cotton Spinners has dropped from 23s. 9d. to 22s. 6d., and Morum's Stores from 17s. 6d. to 17s.; but Egyptian Markets and Egyptian Salt and Soda have each gained 3d. at 21s. 3d. and 42s. 3d. respectively.

Oils show the expected improvement. Anglo-Egyptian has gained ½ at 3⅝, and Roumanian Consolidated has advanced from 18s. to 19s.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |
|---|---|---|---|
| Alexandria | Piastres to £ | 97½ | 97 7/16 |
| Athens | Drachmae to £ | 25·22½ | 35·25-35·75 |
| Belgrade | Dinars to £ | 25·22½ | 110-112 |

The production of olive oil in Tunis last year is estimated at 21,433,000 litres.

The receipts of the Smyrna-Aidin Railway for the week ended October 9 amounted to £19,129.

It is reported that all building material for rebuilding purposes in the vicinity of Salonika may be imported into Greece duty free up to March 31, 1921.

## NOTES OF THE WEEK.

It was difficult to believe that the question of the succession to the Greek Throne would be settled as easily as M. Venizelos affected to imagine. Prince Paul was known to be wholly under his father's authority, and ex-King Constantine had shown no disposition to subordinate his own personal interests to those of Greece as a whole. Accordingly, the reply given by Prince Paul to the verbal communication of the Greek Government is a subtle move to compel M. Venizelos to adopt a course that he has repeatedly refused to take—that is, to re-open the question of ex-King Constantine's position. It has throughout been a plank in the Opposition's platform that King Constantine's removal was effected at the instance of foreign Powers without reference to the wishes of the Greek people: they claimed, therefore, that the *status quo* had no validity until it had been endorsed by the nation. M. Venizelos, on the other hand, has contended that the King's removal was the inevitable outcome of his own misdeeds at the time, that the re-opening of the question would be an affront to the Protecting Powers, and that it would be almost impossible to submit to the electorate as a whole all the considerations which weighed with those Powers in arriving at their decision.

There can be little doubt that M. Venizelos' contention is entirely right. If ex-King Constantine had proved himself to be of a different temperament, if his subsequent actions had shown that, as he alleged, he was the victim of a misunderstanding, and that he was actuated solely by a desire to promote the welfare of the Hellenic people, there is every reason to suppose that the Protecting Powers would have welcomed a settlement of the Greek question which promised to weld the country once more into a united whole. But no one could be persuaded now that ex-King Constantine and his immediate entourage, after being permitted to return to Greece, would allow bygones to be bygones. The events of December, 1916, are still too fresh in everyone's minds, and, it must unfortunately be admitted, the subsequent course of things has not helped to heal the breach between the two sections of the people. In the circumstances, therefore, the Greek Government may find itself compelled to regard Prince Paul's refusal as absolute, and to seek a King for Greece elsewhere.

The British Government would seem to have satisfied the Greek inhabitants of Cyprus that it has at last definitely made up its mind not to cede the island to Greece, and naturally a great pother is being made by the annexationists. We can sympathise with the heads of the movement in the dilemma in which they are placed. At one time they felt that they could conscientiously encourage their followers to hope for the best, and accordingly an expensive deputation was maintained for a long period in England. But as time passed, and, with it, all the conditions that might have justified Great Britain in her act of renunciation, they must, as sensible men, have realised that the prospects of union with Greece were becoming fainter and fainter. To-day, if they value their reputation for statesmanship, with which is bound up their own capacity for administering the island, if it should be surrendered by Great Britain, they have to admit that the British Government's decision is the only one in keeping with the realities of the present time, and, consequently, with common sense. It remains to be seen, therefore, what these leaders will do. Will they subordinate their better judgment to the irresponsible extremists among their own followers and lead the shouting against Great Britain, or will they be strong-minded enough to still the clamour and bid their people wait until circumstances have changed? It is to be hoped that they will adopt the wiser course.

The Millennium has not yet begun in the Balkans; but a great step in advance has been made when a frontier incident such as that described by our Sofia Correspondent last week is capable of adjustment after a minimum of fighting. For some time to come we must expect rifles along the frontiers to have a habit of "going off" on their own accord; the most that can be hoped for at first is that the responsible people on each side will see to it that the trouble is not allowed to spread. M. Stambolisky's absence for more than two months is in some measure a test of the extent to which the new spirit in Bulgaria is genuinely national and not merely his individual policy. It is, therefore, satisfactory to find that the first frontier incident has been rapidly adjusted. In the old Bulgaria the manufacture of frontier incidents with a view to embarrassing the Government of the day would have been regarded as a perfectly fair move in the political game, but such tactics need not be looked for to-day. The Bulgarian Opposition is giving its mind to a coalition of parties, in order the better to counter the great strength of the Agrarians. Its cue would seem to be not to challenge M. Stambolisky's foreign policy, but possibly to try to belittle the results of his tour abroad by attributing to him intentions which he could not have entertained. As already stated in these pages, it was stipulated that the Entente Governments could not

Digitized by Google

listen to any proposals for modifications of the Treaty of Neuilly. This stipulation would not prevent the Allies from offering to modify some of the terms, and it is significant that the Greek Government has informed Bulgaria that it renounces the right of trying Bulgarians charged with crimes against the rules of civilised warfare, and will leave them to be tried by Bulgarian Courts. The extent to which these and other concessions are due to the good opinion held of M. Stambolisky's regime will not be lost on his fellow-countrymen.

---

A great deal of fuss has been made in the French Press—and is being faithfully echoed in the section of the English Press that is in search of sticks with which to beat the British Government—over the renunciation by Great Britain of her rights under the Peace Treaty to seize post-war property of Germans in England in case of German default. We are not here concerned with the wisdom or unwisdom of the step; but it may be pointed out to our French Allies that they have themselves recently taken precisely the same step in precisely the same way with regard to the Bulgarian Treaty. They have exercised a right of renunciation without reference to Great Britain. But whereas the British Government's action is relatively unimportant, as it leaves all pre-war enemy funds available, France's action in liberating all the pre-war Bulgarian funds in her hands by dispensing with a clearing-house for the payment of debts is a crucial modification of the Neuilly Treaty. Moreover, it was done with the obvious intention of "scoring off" Great Britain, who had decided to establish a clearing-house under the terms of the Treaty. We do not contend that France's action was wrong; on the contrary, we have strongly urged that the British Government should follow her example. But the fuss made in the French Press and in some English newspapers is entirely disingenuous, if not dishonest.

---

Zaghloul Pasha and other members of the Egyptian Nationalist Delegation returned to England last week, for the purpose, it is understood, of reporting to Lord Milner and his Mission on the results of the negotiations, or explanations, in Egypt regarding the proposed Agreement. Their reports will no doubt, have been quite as favourable as was expected, and the next step of importance will be the presentation to the British Government of the report of the Milner Mission. Meanwhile from Egypt come reports of a difference having arisen between Zaghloul Pasha and some of his co-delegates. According to the native Press the trouble arose through Zaghloul Pasha's insisting that certain reservations suggested in Egypt must be regarded as the nation's commands, and obeyed accordingly, while the delegates who opposed him maintained that the reservations were unessential. Happily, the difference has now been arranged.

---

In Egypt those opposed to settlement on the lines proposed are manifesting great activity in one way and another just at present. Among other things, they charge the present Cabinet with conspiring against the Delegation, and accuse the Ministry of extravagance. It is to be noted, also, that opposition of a different kind is beginning to be observable. The prospect of Egypt receiving such a full measure of independence as contemplated by the suggested Agreement is causing lively anxiety to a good many people who not very long ago were professing to be eager for just such independence; and if only they dared to give open expression to their views, it is not improbable that the world would be greatly surprised. The fellaheen, and many of the landowners, are said to be uneasy; and it would be interesting to know whether responsible Copts — not those who make their living by agitation—feel entirely happy when they contemplate the withdrawal of British control and British troops. Egypt has once more justified its association with the idea of paradox.

---

The fall of Damad Ferid Pasha's Cabinet has been followed, as was anticipated, by the opening up of negotiations with the Nationalists. At the time of writing, however, the only satisfactory thing about this move is that it is reported to have been made by Mustapha Kemal, and not by Tewfik Pasha. If the terms brought from Angora have been correctly transmitted from Constantinople, they show an entire failure on the part of the Nationalists to realise the position. Mustapha Kemal is represented as asking that the Grand Vizier shall obtain a written promise from the Entente to accept five points, as follows:—

> 1. The restoration of Smyrna and the hinterland to the Straits zone under Turkish sovereignty. 2. The concession of autonomy under Turkish sovereignty to Thrace. 3. The admission of three delegates, representing Smyrna, Thrace, and Anatolia, to the Commission entrusted with the administration of the neutral zone. 4. The modification, favourable to Turkey, of certain articles of the Treaty of Sèvres, particularly those relating to financial and economic questions. 5. The separation of the Khalifate from the Sultanate, the latter to be passed down to the eldest son of the Osman family, and the former to such descendant of the Prophet as enjoys the confidence and reverence of the whole Islamic world.

The fifth of these points might be accepted, even welcomed, by the Entente; for though it would probably set the Islamic world by the ears if granted, that is not the concern of the Entente, as such. The fourth point, too, might be conceded, if it did not involve any extensive "modifications" of the Treaty; but the first and, even more so, the second, would obviously never be seriously considered to-day.

---

Regarding the fourth point, that the Treaty of Sèvres shall be modified, it is interesting to find an Italian newspaper, the *Tempo*, suggesting that something of the kind may be advisable, or even necessary. This is in connection with a report that the mandate for Armenia has been offered to Italy, who is disposed to accept it; and the *Tempo* observes that Italy would have to play the part of mediator between the Turks and the Armenians; and that it would be impossible for her to accept that difficult rôle unless the Treaty were revised. If there is any foundation for the rumour, and if Italy is in fact thinking of undertaking such a difficult task, it would be folly indeed to place any barrier in her way; and if she expressed a desire for some modifications of the Treaty, her Allies should, and doubtless would, be quite ready to consider the matter in the most accommodating spirit. Until some more definite announcement is forthcoming it would be foolish to give rein to our hopes; but the fact that the rumour should find its way into the Press at this time is perhaps not without significance.

---

News received from Persia lately has not been of the best. A fortnight ago the Bolshevists, recovering from the disorder into which they had apparently been thrown, inflicted a defeat on the Persian Cossacks in the neighbourhood of Enzeli and reoccupied Resht. The Cossacks seem to have gone to bits rather badly, and it looks as if they were retreating on Teheran in something like panic, for they are reported by *The Times* Teheran correspondent to "have passed through the British lines between Kudum and Rustamabad," though "they have had practically no casualties" and there is no "evidence that the enemy is pursuing them." The collapse of the force, or of its *moral*—for that is what it amounts to—has led to the British Minister's informing the Persian Government that further help from us to the Cossack Division must be withheld in view of the proved incompetence of the Russian staff, and this in turn has led to the resignation of the Prime Minister, who declined to dismiss General Starosselsky. It is anticipated that the Sipahdar will form a Cabinet to carry on the business of the country, at any rate until the Mejliss assembles, and that the Shah himself will insist on an immediate reorganisation of the Cossack force. Meanwhile British troops are barring the advance of the Bolshevists in the north, and the British Government is doing its best to lighten the difficulties of Persia. But until the Anglo-Persian Agreement is ratified by the Mejliss the situation must remain unsatisfactory.

---

India continues to send us little news except of strikes, industrial or political as the case may be, for the whole non-co-operation movement is in essence

Digitized by Google

merely a strike against the authority of Parliament. Leaving it for the moment out of account, the only conclusion to be drawn from the events of the last year or two is that the wage-system in India has broken down, and that employers, as well as the Board of Industries to whom the employers must look for a lead, are faced with the necessity of developing a new one. System is perhaps scarcely the right word, for what exists at present is a hybrid growth, springing in part from the Indian institution of slavery, and in part from the ideas which prevailed in this country during the last century. Its most obvious fault is that it offers no incentive to increased efficiency; from one end of India to the other, the worker thinks only of how "to fill his stomach," as he says himself; if his stomach is not filled, he goes on strike; if it is reasonably comfortable, he knocks off work; and in either case the country suffers because the things it wants are not produced.

---

What is wanted now is a new inspiration. The Indian worker is no longer a slave, to be kept employed "only by sheer necessity or blows from a cudgel," as Bernier wrote of him in the seventeenth century, neither is he a keenly competitive individual, as the pure Cobdenite theory assumed: he is just a human being, with a closely limited vision, and his social tastes are a good deal more important than employers are apt to recognise. It is pertinent, then, to suggest that some light on the problem may be obtained from the experience through which we are now passing in England, where we are grappling, rather clumsily perhaps, with a new idea, the first of those great formative influences which a couple of years ago everyone said the war would yield. The idea is so new that it has not yet acquired a recognised label, but we may describe it in general terms as the provision of a collective incentive to individual efficiency, for its essence is that the earnings of individual workers should be determined, not by the individual's effort but by the efficiency of the industry as a whole; in short, it is team-work on a large scale.

No sensible person would suggest that Indian employers should copy the particular arrangements now devised for regulating wages in English coal-mines. The miners may refuse to try them, or if tried they may fail to work; and in any case the conditions are so different that the direct transfer of methods could scarcely be expected to succeed. But the idea of team-work remains. Is it possible to give the whole body of workers in an Indian factory or tea-garden a collective interest in the success of the enterprise? That question should, we think, be faced by every employer in India, and it should be faced by way of experiment rather than *a priori* argument. It has been the fashion to say that education would cure labour difficulties, but things have moved too fast for that; employers cannot afford to wait for the next generation but one, and there is at least a chance that an appeal to social instincts may prove more successful than the attempt to rely on a non-existent individualism.

---

Our experiences of last week have a lesson for the Indian politician as well as for the Indian employer. As *The Times* has pointed out, "the settlement in its present stage justifies the faith of those who have held that counsels of moderation must prevail if they were maintained stoutly, in despite of provocation on either side." The Indian Moderates or Liberals are in similar case; they can prevail against the Extremists if they show a bold front, but they must maintain their position stoutly if their object is to be attained. A glance at the columns of the Indian Press will suffice to show that the Extremists are out to crush the Liberals once for all, but it cannot be said that, up to the beginning of last month, the Liberals, except in Bengal, were exerting the strength which they undoubtedly possess throughout the country. They have possibly been trusting to the reaction which is certainly in progress against the excesses of their opponents, but they have not done enough to help that reaction on; and for the sake of India we can only hope that October has seen a more vigorous effort in this direction.

# THE WEEK AT HOME.

**The Coal Peace.**

The coal strike is over, or at least it will be as soon as the miners accept by ballot vote the terms agreed on by their leaders—a matter which is, perhaps, not quite such a foregone conclusion as in some quarters is anticipated; and industrial peace seems assured for the present. How long it will last nobody would care to prophesy.

The terms are long and rather complex. The miners get an advance immediately on resumption of work, 2s. a shift for men, 1s. for youths, and 9d. for boys; there is to be an adjustment of wages from January 3, and *thereafter every four weeks*, on the basis of export coal values. Joint district and national committees are to be set up on output, and a joint scheme is to be submitted to the Government by coal-owners and miners for the future regulation of wages. The September quarter's output is to be regarded as the standard output, and every increase above a certain value in the proceeds of export coal—the only coal in which there is a free market—will mean additional wages.

A practical public is now asking who won the triangular duel between coalowner, coalminer and Government—the aforesaid practical public having recognised from the first that it was not itself in any circumstances to rank as the winner, being placed in the interesting position of the spectator who has to pay a high price to watch the proceedings. The public, then, being relegated to its proper insignificance, realises that a compromise has been agreed upon. The miners get their extra money; which means that everybody else will ask for more money (including the Chancellor of the Exchequer when it comes to meet the year's Budget). But the principle that the amount of wages depends on the amount of work has had to be conceded by the miners; and also the datum line—only, to save everybody's feelings, it is not called a datum line but a standard output.

So far, so good. The Government has secured its principle, and the miners have secured the money; which, by the charming operations of economics, instantly raised the price of wood logs. Both sides can, therefore, claim to have won, as well as the watchful woodman, who has secured his advance without any fighting at all. But if I were asked the best way to make trouble in any trade in the future, I should suggest a revision of wages every four weeks. If miners and owners were respectively cherubim and seraphim, which nobody has yet suggested, such a system would lead to difficulties sooner or later. Perhaps the Joint Board may evolve something better in due course.

One thing that seems pretty definitely to have emerged from the discussions is the conclusion that the miners were not the only parties responsible for shortage of output. Their complaint that the coalowners were partly to blame seems to have had some basis of fact. It is to be hoped that the promised committees on output will settle this matter, and if they should also chance to turn their attention incidentally to including a rather larger percentage of coal in the dirt and stone that has recently been sold for three pounds a ton, the public will be grateful to its masters.

**Political Apathy.**

With the settlement of the strike the talk of a general election has again died down. One ambitious young politician, who wants an election for the simple reason that he is a candidate and not a member, was deploring to me the other day that the public is utterly apathetic; they will not contribute to the party funds, or attend his meetings, and even the most marrow-freezing denunciations of Bolshevism leave them cold. I heard the same story from a member on the other side, who devoted his most opprobrious adjectives to the sins of the Coalition, without a single sign of enthusiasm from the audience; he made the curious remark that people were more interested in religion than politics at the moment, and seemed to think that the country was going to the dogs in consequence.

A clergyman to whom I happened to repeat this opinion added the still more curious remark that, while he agreed that people were interested in religion, they steadily refused to go to church. He told me of a case in which a fellow-priest simply could not induce his flock to enter the building, but one of them suggested he should give them an informal talk at the public-house. Like a wise man, he did so; they listened respectfully, and then asked him questions, which he answered frankly, whereupon the chairman of the meeting called for a vote of confidence, and invited him to come again. It is his experience that men who will not tolerate a ten-minutes' sermon will listen to an hour's lecture on Christianity, so long as they can heckle him at the end. It is the right of reply that they value; as my friend put it, "they will not swallow religion like our fathers, they want to digest it over a pipe."

**Masters and Men.**

A Labour Co-Partnership Congress was held last week, at which Lord Robert Cecil and other speakers have urged that the old theory of masters and men in industry is out of date, and that there should be a human partnership between capital and labour. Lord Robert remarked that what is amiss with our present industrial organisation is "the fundamental misconception that the business of a great undertaking belongs to the owner of the capital, instead of to the whole undertaking, labour as well as capital." This idea is obviously spreading in Labour circles, but the attitude of the mine-owners and other employers in the last month shows that it is not generally accepted by capital.

A curious commentary on the idea is given by a Mr. John Hoyle, a Bradford wool merchant, who has attained a little brief notoriety these last few days by offering to hand over his business, "lock, stock, and barrel," to the local Labour Party for two years; he stipulates that they shall find the capital and manage the business, on condition that if they do not make it pay and ruin the business they must compensate him for the loss. The fact that Bradford business is rather in a depressed condition at the moment possibly accounts for this calculated generosity.

**Houses and Builders.**

The building trade appears to thrive in an atmosphere of altercation and recrimination. The builders are accused of holding up supplies for higher prices, and the builders' labourers of refusing the admission of ex-Service men to make the work last as long as possible, and each assures a patient public that it is the other's fault. But in the intervals of quarrelling it is an undubitable, albeit astonishing, fact that they do find a little leisure in which to build a few houses. In going through one of our larger home counties the other day I noticed that in almost every village two or three pairs of new houses were either building or built. These are of the workmen's cottage type, and the price (inclusive of rates) in London is about a pound a week and in the country fifteen shillings, which compares roughly with ten and five shillings in pre-war days. Even at this rent, however, there will be a loss, which will eventually come on to the National Debt. The foundations, like some current philosophy, are all right until you set out to discover how deep they are laid, but the houses are quite comfortable and fairly roomy.

**Episcopal Palaces.**

It is announced that the Bishop of Lichfield intends to leave the Palace and to live in a small house in the

CROWE & STEVENS,
*Steamship Agents and . . .*
*Commercial Representatives.*
PATRAS, PIRÆUS, ATHENS,
SALONICA.

Digitized by Google

Cathedral Close. Although the yearly income of the see is £4,200, charges and taxes only leave £1,200 for the upkeep of the Palace, which cannot be maintained on less than £2,000.

The example is likely to be followed by the Bishop of Worcester, who is considering giving up Hartlebury Castle, which is far too large. Dr. Gore years ago, when head of that diocese, refused to occupy the place, and lived in Birmingham. The Bishop of Durham is understood to be thinking of leaving Alnwick, and it has been rumoured that the Bishop of Winchester, who has Farnham Castle to maintain—an enormous wilderness of a house—is also contemplating the possibility of a move. It is some years since the Bishop of London let London House in St. James's Square, and lived simply in a small corner of Fulham Palace, and he would not object to selling that too.

Evidently the old order, which required a bishop to be a prince of the Church, is going. High taxation and increased charges are making these things inevitable, but I doubt whether they will do the Church any harm. These great episcopal palaces, which have long been a white elephant to most prelates, have often been attacked by enemies of the Establishment, and their defence has not always been very effective.

**Oxford and Reconciliation.**

Some pother has been caused by a letter which was sent a few days ago from Oxford inviting a resumption of intellectual intercourse with Germany. It was drawn up by Dr. Bridges, the Poet Laureate, who seems two years ago to have condemned the Germans to eternal ostracism in one of his published poems, but has evidently since revised his views; submitted to the leaders of the University, the majority refused to sign it, but a fair number attached their signature, whereupon *The Times* attacked them rather blusterously, and the Poet Laureate returned the proverbial soft answer.

These things are after all a matter of disposition and taste, and the real question seems to be whether the time has yet come. Apparently Dr. Bridges felt that himself, for the letter was drafted some time ago, since it is signed by two or three men who have since died, and evidently held back from publication. But the reception of the letter seems to show that it is too early yet to talk of reconciliation. John Bull does not hate the German, but he would rather not have anything to do with him for some time, and any talk of general reconciliation would be insincere.

**The Week's Books.**

"Mrs. Asquith's Autobiography" (Thornton Butterworth) would have been the book of the week had it not been serialised and discussed so much in advance that its actual publication may fall a little flat. It is full of faults of taste and tact, and it shows a lack of reticence and a sharpness of the pen which are rather disconcerting; and her accounts of such people as the late Lord Salisbury, Professor Huxley, and Robert Louis Stevenson have all been accused of inaccuracy. As regards the last-named, Mrs. Asquith has replied that the offending passage was struck out in manuscript, and only got into the book by inadvertence; but if it was struck out in manuscript, one is curious to know how it got even as far as the proof. A second volume of these reminiscences is hinted at as a possible infliction next year.

I am slowly reading, with the interest and the tempered admiration suitable to rather heavy going, "A Study in Realism," by Mr. John Laird (Cambridge University Press). Its appeal is likely to be small, but those who follow the logical analysis of psychology would be well advised to get it.

Mention should be made of the "Life of Admiral Mahan" (John Murray), by Mr. Carlisle Taylor, which is likely to be an authoritative work.

Mention should be made of "Suggestion and Autosuggestion," by Dr. Charles Bandoun (George Allen)—an important psychological book dealing with the work of the celebrated Nancy school of mental medicine. It is, of course, authoritative as a statement of their views and discoveries.

One of the most delightful works of natural history I have read for a long time is "A Naturalist on Lake Victoria," by Dr. G. D. Hale Carpenter (Fisher Unwin). Its earlier pages deal with sleeping sickness, and are naturally more calculated for specialists in tropical diseases; but the author subsequently recounts his discoveries and observations of snakes, birds, and reptiles. The chapter on the protective coloration of insects—one of the most difficult and controversial subjects in the whole field of biology—is peculiarly valuable, and shows a wide grasp of theory as well as close observation. The book, in my opinion, is worthy to rank as a successor to Bates on the Amazons and Belt on Nicaragua. Higher praise cannot be given, but strict justice demands no less. (It is a curious fact, by the way, that most doctors, when they take to writing, write exceedingly well—Mr. Carpenter is the latest example. The badness of lawyer's English is proverbial, and the English of the pulpit sometimes even worse—almost as bad as that of the chemist or physicist. But the medico always seems to me to compound his English better than his abominable drugs.)

Mr. John Buchan, who must surely be one of the most prolific authors of the day, has published a biography of "Francis and Riversdale Grenfell" (Nelson), the two famous brothers who both lost their lives in the war. It is a fitting memorial of two noble lives.

The thesis of "England and the New Era" (Fisher Unwin), by Mr. Brougham Villiers, is briefly that Mr. Lloyd George is "an utterly incapable Prime Minister," and that Mr. Chamberlain's finance is "a scandalous degradation of sound British finance," while "the political ideas of some of the ablest men are enough to make angels weep." His remedy is the nationalisation of the land, "and the owners compensated by Government five per cent. stock to the amount of the valuation." After that, no doubt the angels will dry their tears with five per cent. stock, which would be cheaper than pocket-handkerchiefs at the present price.

An economic work of more value is Mr. Hugh Dalton's "Some Aspects of the Inequality of Incomes in Modern Communities" (Routledge), a very able book, which incidentally discusses very carefully the effects of laws of inheritance on social conditions.

The Education Department in pre-Fisher days has always been the Cinderella of Whitehall; and Sir George Kekewich, in "The Education Department and After" (Constable) discusses not only the office but his political chiefs with candid pen. I like the story of the Duke of Devonshire, who could not get on with Sir John Gorst, his Under-Secretary—nobody could get very far with Gorst—and the Duke therefore asked Kekewich how he was to be got rid of. Sir George suggested one of the better-paid and not too heavy Colonial Governorships. "I cannot imagine," replied the Duke grimly, "that the Government would offer Sir John Gorst the Governorship of any colony that they desired to retain."

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, October 18.

**The Political Situation.**

There is little change in the political situation. The Opposition are very active, and in a measure are being successful in gaining adherents; but this success is really due to the fact that most of the Delegation are now in Europe, and that consequently little counter-propaganda is being done. Personally, I am convinced that the Opposition will stand no chance of ultimate success, and that the Treaty, if it follows on the fundamental lines already proposed and makes allowance for certain of the reservations submitted, will go through. Meanwhile, of course, all eyes are directed towards Paris and London, and every scrap of information that is available with regard to the movements of Zaghloul Pasha and his colleagues and the intentions of the British Government is eagerly scanned and debated.

**The Conspiracy Trial.**

The sentences in the conspiracy trial have not yet been promulgated. It is understood that the papers, which are very voluminous, have been submitted to the Judicial Adviser, but it is hoped that promulgation will take place this week. With regard to the actual trial, one of the remarkable features was the fluency with which the Egyptian Advocates pleaded in English and the readiness with which they adapted themselves to the procedure of an English Criminal Court, with which many of them had up to then been quite unfamiliar. In view of the outcry which has taken place in connection with the proposal to adopt English procedure in criminal cases before the Mixed Courts, the relative ease with which at such short notice the advocates mentioned assimilated the new conditions is exceedingly interesting, and should go some way towards strengthening the position of those who are in favour of the proposed innovation.

**The Question of the Mails.**

For some little time now there has been great dissatisfaction with the way in which the mails are arriving here. The letter mails are coming to hand in a most erratic manner, while parcels are taking anything up to two months from England. It is said that there is considerable delay at the Egyptian ports, but it would certainly appear as if the main blame is at the other end, and the sooner the question is looked into and remedied the better.

**The Coal Strike.**

Not unnaturally, the coal strike is an important topic of conversation in view of its possible effect locally, and especially in regard to the cotton situation, which is far from promising. In the matter of fuel itself there would appear to be little to fear, as the railways have an enormous stock—said to be the largest recorded since the British occupation—and consignments of foreign coal, as well as of oil-fuel, are steadily coming in. Nevertheless, in spite of the fact that stocks at present are ample, it is somewhat surprising that no sooner was news received that the coal strike would in all probability come off than the Government should have taken off the lighting restrictions, which had been in force for the past year, and which, without any further inconvenience to the public, might well have been maintained until matters at home had assumed a more satisfactory aspect.

Talking of lighting reminds me that the gas strike in Cairo is still not satisfactorily settled. Lighting in the streets has been resumed by the native lamplighters, but the main installation is still being worked with the help of men from the Cairo garrison. While the strike may in a measure be due to political agitators, I am informed that the workers have a certain amount of grievance against the company.

**Disastrous Fire in Cairo.**

Last Friday morning a fire broke out at "Cicurels," one of the leading haberdashers and ladies' outfitters in Egypt. It was discovered shortly after 5 a.m., and the fire-brigade were promptly on the spot. They worked doggedly until late in the afternoon: but the fire had already obtained a mastery before the alarm had been given, and they were quite unable to save the premises. The whole building was gutted out, and nothing now remains but an empty blackened shell of one of the finest buildings in the commercial quarter. It is not known exactly what the damage amounts to, but, taking into account the fact that the interior of the building will have to be entirely rebuilt, and that the firm had only just got in its winter stock from Paris, the estimate of about £3,400,000 does not seem exaggerated. It is understood that the building, as well as the best part of the stock, was covered by insurance.

An inquiry has, of course, been opened by the authorities into the origin of the outbreak, and I understand that the experts are of opinion that the fire was caused by an electric flat-iron having been left accidentally in circuit. This is the first great fire that we have had in Cairo for many years, and it is entirely due to the energetic and skilful efforts of the local fire-brigade that it did not spread to the neighbouring buildings, which were separated from it by but narrow streets, and that a general conflagration did not take place in the Sharia Boulac.

## YUGOSLAVIA.

BELGRADE, October 26.

**The Klagenfurt Area.**

The evacuation by the Serbian troops of "Zone A," which voted for Austria in the recent plebiscite in the Klagenfurt area, is now complete. It is reported that the Government will request the Inter-Allied Commission to sub-divide "Zone A" and allot to Yugoslavia that district as far as the River Drave, where the main mass of the people are Slovenes who voted for union with the Slavs. The Italians have naturally made capital out of the action of the Belgrade Government in sending troops into the district after the voting; but the authorities could scarcely refuse to give protection to its nationals, who implored help against the Austrians, who, in the absence of any authorities, were venting their vengeance upon all those who had voted against them. The Yugoslavs were also obliged to hand over the administration to the Inter-Allied Commission, and to assist and protect their nationals who decided to migrate; and these are said to be numerous. The Press comments upon the results of the plebiscite are to the effect that it is unfortunate in that it is proof that their old accounts with their ancient enemy, Austria, are not closed after all, and that the plebiscite, instead of finally clearing the ground and removing all questions, has opened another; for, they maintain, the Slavonic population of the Klagenfurt area must inevitably one day come within the boundaries of the united kingdom.

**Election Activities.**

As the general election approaches politics are occupying the attention of the public and of politicians more and more; most of the Ministers are busy stumping the country, and Parliament has virtually ceased to act for want of a quorum. News from the provinces shows that the people are sick of their present representatives, and it is thought that not more than a third of them will be returned again. After all, the present Skupshtina is far from representative; it was elected before the Turkish war of 1912, and much water has flowed under the Save Bridge and much blood flowed in Serbia since those remote days, and the people have been through a fierce school and look very differently upon life to-day.

It is considered probable that the Cabinet will not propose a centralised form of administration under the new constitution. The Democrats ask for this, but the Radicals, and, above all, the Narodny Club, strongly oppose it and ask for a decentralised system, which to the foreign sympathiser seems the most suit-

Digitized by Google

able for the young kingdom, at all events, for another generation.

M. Poljak, a former Minister, has withdrawn from the Democratic Party and joined the Croatian Peasants' Party, whose programme is to struggle against the elements of conservatism and reaction in any form, regardless of race or religion. They are joining hands with the Agricultural Alliance of Belgrade and all similar organisations in Yugoslavia.

**A Ministerial Difference.**

The Minister of Finance, M. Kosta Stojanovitch, has sent in his resignation on the grounds that the Minister of Communications, Dr. Koroshets, declines to sign the Supplementary Budget and Amendments to the Financial Law for 1920 and 1921. The Council of Ministers had already approved this proposal, in which the Minister of Finance showed that they would have to budget for 4,600 million dinars and to raise taxes and customs duties, since last year the imports into the country were valued at 4 milliards, but the Customs brought in only 250 million of revenue, which is about 6 per cent. only. Dr. Koroshets is endeavouring to exclude Slovenia from the scope of the new law, but it is hoped that M. Vesnitch will persuade him to accept it and sign, and the possibility of another Cabinet crisis at this juncture is to be avoided at any cost.

**A Danube Trouble.**

A Committee of Ministers consisting of M. Vesnitch, Dr. Trumbitch, Dr. Koroshets, Admiral Pritsa, representing the Yugoslav Navy, and the President of the Danube Steamboat Syndicate, has been considering the finding of the International Danube Commission dealing with the distribution of the monitors of the late Austrian fleet. They resolved that they cannot accept the finding of the Commission on the grounds that Yugoslavia has a longer riverine frontage than any of the other Danubian countries, and requires all these monitors for police duty; and will request the Commission not to waste time by sending a committee to Belgrade to take the craft over.

**An Albanian Raid.**

The Albanians are up to their old tricks again. News comes from Skoplje that a large band of armed Arnauts raided Galichnik, killing and wounding a few gendarmes and civilians who resisted them, and driving off over a hundred head of cattle. These frontier raids recall the conditions on our own border a couple of centuries ago, but it is extremely probable that interested parties are helping and encouraging the wild hillsmen, in order to ensure unsecurity along the frontier districts of Serbia. The *Politika* recently made a definite accusation that Major Winkels, who, in spite of his name, is an Italian officer, and was well-known at Salonika, and is now Italian representative on the Allied Military Commission at Sofia, is intriguing with the organiser of Bulgarian bands for operation in Macedonia.

**Miscellaneous News.**

The ill-fated and premature, but very gallant, rising of the Serbs against the occupying forces in Southern Serbia in 1917 was not unnaturally repressed very fiercely. Particulars are now available of what this unfortunate affair cost the people in the three departments of Vranje, Nish and Toplitsa. The figures are startling. There were killed or died in internment camps 8,757 people, and 8,855 houses and 34,684 other buildings burnt down; in the Toplitsa department alone 3,907 were killed.

Voivoda Sir Zhivojin Mishitch, of whom more optimistic reports have been in circulation, is now very ill indeed, and his condition has taken a turn for the worse. The gallant Field-Marshal has, unfortunately, recently contracted inflammation of the lungs, and little hope can be entertained of his eventual recovery.

Dr. McPhail has found her quarters too cramped for her hospital for Serbian children, and has acquired new and more spacious premises in Vishegradska Ulica, No. 29, which she has bought from the late Mayor of Belgrade, M. K. Yovanovitch. It is stated that this great benefactor of Serbia will establish a thoroughly modern and up-to-date hospital, which, when she returns home, she will present to the Government or to the municipality.

Captain Fewald, formerly commanding the 78th Regiment of the Austro-Hungarian Army, has been arrested at Osijek and sent to Loznica to be court-martialled for the offence of shooting five old men without trial at Loznica in the early days of the war

## ROUMANIA.

BUCHAREST, October 15.

**Political Outlook.**

As the opening of Parliament draws near, the attitude of the Opposition towards the Government becomes more militant. The Federal Party are inveighing against the inefficiency of the Government, while the Socialists are threatening a general strike. The Government, however, do not seem greatly perturbed by these threats and attacks, feeling confident, apparently, that they can frustrate them; and barring unforeseen events, Parliament will open as usual on November 15.

Despite the numerous rumours about the insecurity of the Government's position, there is every sign that it will remain in power, though, perhaps, with some changes of *personnel*. The fact is that the only parties that could take up the reins if they were dropped just now are not yet sufficiently organised for such an emergency.

The two parties I refer to are: the Federalists and the Liberals. The former are an amalgamation of the Peasants' Party, Transylvanian National Party, M. Jorga's National Party, Dr. Lupu's group, and a number of Bessarabian and Bukovinian leaders. It will be some time before the organisation of this party is at all near perfection; at present there are many squabbles as to its leadership, and its component parts are far from sharing a united programme. Nevertheless, they are important, because in Parliament they are the second party in point of numbers. The Liberals are numerically poorly represented in Parliament; but they still have the best party organisation throughout the country, with experienced leaders, and a firm hold upon national finance. Despite their unpopularity, there is a good chance of their coming into power should the present Government and the Federals fail.

The Hungarian political leaders in Transylvania, at a meeting held at Targul-Maresului, have decided to take a part in the political struggle, and to abandon the passive attitude they have maintained ever since Transylvania was awarded to Roumania at the Peace Conference.

**Roumanian Prisoners in Siberia.**

According to the information received by the Roumanian Government, there are still in Siberia 6,000 Roumanians, formerly belonging to the Austro-Hungarian Army, and captured by the Russians during the war.

**Prince Carol.**

After a few days' stay in Sinaia, Prince Carol arrived in Bucharest on October 9. He was received in state at the station, and driving along the beflagged streets, was heartily cheered and welcomed by the people.

The same evening a banquet was given in his honour at the Royal Palace. Besides the King and Queen and Princess Marie, the guests included the British Chargé d'Affaires, members of the Government, and ex-Premiers and other high officials of State. Speeches of welcome were made by the Prime Minister, General Averescu, and the Minister for War, General Rascanu, in which the Prince was thanked on behalf of the Roumanian people for the successful way in which he had carried out his mission of furthering Roumanian interests, and making the country better known in other parts of the world, and especially the part she took in the great struggle for liberty.

In his reply the Prince said that his tour had given him valuable experience and knowledge, which he would

not fail to use in the future, as far as he was able, to ensure the prosperity of the country. On this occasion, all those who accompanied him on his tour were decorated by the King. Immediately after the banquet the Royal family returned to Sinaia to join their guest the Duke of Sparta and his two sisters.

**Coming Engagement of Princess Elisabeth.**

In Court circles it is affirmed that all questions in connection with the betrothal of Princess Elisabeth to the Duke of Sparta have been arranged, and the announcement of the official engagement is expected very soon. After the marriage, it is further rumoured, the Duke of Sparta will remain in Roumania, where he will be given a certain rank in the Army by the King. In connection with this, the ex-Crown Prince of Greece may decide to settle down definitely in this country, if his position with regard to ascending the throne of Greece remains unchanged.

**Railways.**

At the recent conference which took place at Budapest between Hungarian and Roumanian technical committees, relating to the reopening of the railway lines between the two capitals, it was decided that the following routes should be used:—(1) Viâ Oradea-Mare, (2) viâ Arad Chisighaza, and (3) viâ Temesvar-Szegedin. Time-tables for future trains have already been prepared.

**Contract for British Firm.**

The Ministry of Communications has authorised the Department of Harbours and Inland Water Transport to enter into a contract with a local English firm, Messrs. Watson and Youell, to rebuild and improve the docks and quays at Braila and Galatz, for which this firm has granted the Government a credit of £100,000 sterling, payable within 3-5 years. The Ministry of Communications has opened a further credit of 1½ million lei for the purpose of building warehouses on the above docks.

## BULGARIA.

Sofia, October 10.

**The New British Minister.**

Last Friday the new British Minister, Sir Arthur Robert Peel, arrived here, and has taken up his post at the British Legation. Sir Herbert Dering, the British ex-High Commissioner, is, with his wife, who has now quite recovered from her illness, leaving for Bucharest on October 12.

**Adjournment of the Chamber.**

The Chamber adjourned yesterday until the 20th inst. to give the various Budgetary Commissions time to study, and to report upon the modifications suggested by different deputies in the general debates.

**A National Protest.**

At 11 'oclock this morning a mass meeting was summoned in the square of St. Alexander Nevsky to protest against the delivery to Serbia, Greece, and Roumania of 500 Bulgarian war criminals. The Capital is placarded with appeals, which read as follows:—

Bulgaria is threatened with another severe blow; a fresh insult to her sovereignty is being prepared. The right to distribute justice is being denied to her! According to the Peace Treaty we ought to deliver to Serbia, Greece, and Roumania more than 500 Bulgarians, charged with crime during the war. Germany also, according to the Peace terms, ought to deliver her criminals, but she has succeeded in proving to the Entente how onerous and, in fact, impossible, is this clause of the Treaty, and they have yielded on the point. We should do likewise. There is nothing more humiliating to the dignity of a nation than that foreign tribunals should try its culprits.

In 1914 a similar demand by the Austrians upon the Serbians caused the world war. Serbia would have accepted all the other terms, and the war would have been avoided, but she refused this base demand, and war broke out.

Why is this humiliation now demanded from us?

We will suffer our dignity to be insulted no more. This is too much! Present yourself at the meeting, and utter a loud protest against this attempt on the honour of a whole nation; and let your appeal be to the world's conscience that no more criminals should be demanded from us. If there are further criminals who should be punished, we have tribunals that can deal with them.

Sofia, October 21.

**The New British Minister.**

Last Saturday afternoon King Boris received, with the customary ceremony, Sir Arthur Robert Peel, H.B.M. Minister Plenipotentiary. In presenting his credentials the new Minister offered his assurances that he would not neglect any favourable opportunity to co-operate in restoring harmonious relations between England and Bulgaria. In replying, the King said that he was happy to count upon his Excellency's co-operation in this noble work, and felt sure that Sir Arthur Peel's care would always meet with approval and support on the part of the Bulgarian Government. The new Minister is stated to have been very favourably impressed by the conference he had with the King. He says that he has come to this country with the most intense desire to be useful to Bulgaria in her efforts to recover from the effects of the war and to return to a normal life. He is a strong supporter of a sincere understanding between the Balkan nations, and is willing to co-operate in the work of preparing the way towards a *rapprochement*. It is noteworthy that Sir Arthur will be able to follow the Bulgarian Press, because he knows Russian and already reads Bulgarian.

**Voluntary Service.**

In conformity with the stipulations of the Treaty of Neuilly that future military service in Bulgaria must be voluntary for twelve years after the ratification and entering into force of the Treaty, the Ministry of War announces the terms of the new system, publishing them in all Bulgarian newspapers. Up to the present, however, no volunteers have appeared. If, therefore, the terms of the Treaty are not relaxed, it looks as if the country will be left without even the defensive militia allowed to it.

**Frontier Questions.**

According to trustworthy information received, the claims of some Greek members of the Greco-Bulgarian Frontier Commission to the inclusion in Greek territory of the towns of Ortakeui, Kirdjiali, and Egri-Dere have been refused by the Commission.

Yesterday Colonel Gill, of the British Army, arrived here from Constantinople. He will act as arbiter on the Serbo-Bulgarian Frontier Commission. The occupation of Tsaribrod and the other Bulgarian territory ceded to Serbia by the Treaty of Neuilly will take place gradually as each point is decided by the Frontier Delimitation Commission.

**Food Control Scandal.**

Last Monday the police made a sudden raid on the offices of the Food Control. They found in the writing-table of the Director (M. Kvatchcoff) written permits for the export of cheese (*kashkaval*) and other articles, the export of which is forbidden, signed by him and the Secretary-General of the Ministry of Finance (M. Georgieff), and both these officials were arrested, together with fourteen other persons, mostly cheese factors. An inquiry was at once opened up by the legal authorities, who were on the track of the speculators. The Chamber yesterday resolved to institute a Parlia-

mentary inquiry into the affairs of the Food Control. Owing to the illegal export thus carried out, the prices of milk, cheese, and butter are exorbitant, and the cost of living is almost insupportable. The Customs authorities have been ordered to confiscate all such articles found at the railway stations and the frontier Customs House. The rigorous measures adopted for the punishment of the criminals and the putting a stop to this contraband have been unanimously approved by the Chamber and by the people. The Minister of the Interior (M. Dimitroff) has declared that offenders, whoever they may be, will receive exemplary punishment.

**Jubilee of a National Poet.**

Next Sunday, the 24th inst., will be the 70th anniversary of the birthday of the Bulgarian national poet, Ivan Vazoff. Great festivities have been organised throughout the kingdom. The National Assembly has voted a sum of 100,000 levas to be awarded to him as a national recognition of his patriotic literary work during the last half-century.

## GREECE.

ATHENS, October 17.

**The King's Illness.**

"How is the King? What is the latest news?" These are the questions asked everywhere and by everybody since the beginning of last week, when King Alexander's condition, instead of showing the hoped-for improvement, had, on the contrary, become so critical that even the doctors, who had hitherto been more or less optimistic, began to feel anxious and openly expressed their doubts as to whether the sick monarch would ever recover. During the night of Friday last his condition became so serious that for a moment all hope was lost. The temperature had reached 41 degrees Centigrade (105.8 degrees Fahrenheit), and the King had an attack of "coherent delirium," which, according to the doctors, is a very bad sign. Happily this crisis, which was undoubtedly the worst his Majesty had so far experienced, did not last for more than an hour, and his temperature subsequently dropped to about 101 degrees. The doctors attribute this really miraculous escape to the exceptionally robust constitution of the sick King. The Government, sparing no efforts to save the young King, summoned to Athens the famous French pathologist, Professor Widal, and he, like the Greek doctors, does not hide the fact that the King's condition is a very grave one.

During the last two or three days the Athens Press has been dealing with the dynastic crisis that would necessarily arise in the country in case the King died. Of course, such a preoccupation is premature, seeing that his Majesty is still alive, and that all hope for his recovery is not completely lost. In case, however, of a fatal issue, the natural heir to the throne would be, in accordance with the law, Prince Paul, King Alexander's younger brother, now in Roumania. The return to the throne of ex-King Constantine, or even of his son, Prince George, the ex-Crown Prince, is altogether out of the question. Moreover these would be required to renounce definitely and irrevocably all further claims to any right to the Hellenic throne. There is, of course, the possibility of Prince Paul refusing to accept the Crown, in which case the Government would be obliged, in accordance with the provisions of the Constitution, to convoke the recently dissolved Chamber to choose a Regent. This would immediately be followed by the convocation of a National Assembly, which would decide as to who would fill the vacant throne.

**Venizelists and "Antis."**

The following amusing incident, which occurred last week, is published by certain of the Athens papers:—Two anti-Venizelist candidates for Parliament for Chios crossed from that island to the opposite side for the purpose of delivering speeches to the electors of Chios residing at Tsesme. The population, however, whose sentiments are purely Venizelist, after jeering and threaten-

ing the two candidates, compelled them publicly to kiss M. Venizelos' photograph and then cheer three times for the Greek Premier. Only when that was done were these two unfortunate persons permitted to return to Chios.

**Miscellaneous News.**

The lists of the Parliamentary candidates for Attica and Boeotia are now ready. According to these the total number of candidates who will fight for the twenty-two seats in these two provinces amounts to 107!

The leader of the Opposition, M. D. Gounaris, who has been staying in Italy since 1918, has at last decided to return to this country to take an active part in the coming elections. The Government has suspended the warrant for this politician's arrest, which was issued some time ago.

General Headquarters of the Hellenic Army, which had moved from Smyrna to Athens a fortnight ago, have again returned to the former town.

The murderers of Jean Dragoumis, who after their crime succeeded in making good their escape to Crete, have been arrested in that island. They number seven, and they are being conveyed to Athens for trial.

## TURKEY.

CONSTANTINOPLE, October 24.

**The New Cabinet.**

The resignation of Damad Ferid Pasha was officially announced on October 18, thus terminating the existence of an administration that had endured for nearly seven months, which is quite a long life for a Turkish Cabinet in these days. The official reason for the resignation of the Grand Vizier was the unsatisfactory state of his health, but the real causes were those which were outlined in last week's letter.

Damad Ferid Pasha's successor, Tewfik Pasha, who was Turkish Ambassador in London until the outbreak of war, was by no meas anxious to assume the burden of the Grand Vizierate, but finally accepted the charge. The nomination of Marshal Ahmet Izzet Pasha to the Ministry of the Interior is some indication of the important part which that distinguished soldier is expected to play in the immediate future. The Cabinet was not constituted until October 21, and was composed of politicians who had almost all occupied ministerial positions in one or more of the numerous cabinets that have succeeded each other since the Armistice. Salih Pasha, the new Minister of Marine—surely a superfluous ministry in Turkey to-day—occupied the same post in Ali Riza Pasha's Cabinet, and negotiated the agreement of Amassia with Mustapha Kemal, which was largely responsible for the fall of the Cabinet. He succeeded Ali Riza Pasha as Grand Vizier, but only remained in power for a month, when he was succeeded by Damad Ferid Pasha. Both Ali Riza Pasha's Cabinet and that of Salih Pasha were frankly in favour of a policy of reconciliation with Angora, but in spite of every sacrifice neither succeeded in modifying the attitude of the Nationalists.

Damad Ferid Pasha's policy was to disperse the Nationalist forces by military measures, but he was unable to find enough money for the everyday needs of the administration, and the Allies were unwilling to help him. In these circumstances one more effort is to be made to reason with the Nationalists, and persuade them to swallow the Treaty of Sèvres.

As usual, the first act of the new Ministry has been to commence a general reshuffle of Government servants, and to release those who had been arrested by the previous administration for political offences. Thus all who have been incarcerated for correspondence with the Nationalists have been released, and the entire personnel of the court-martial has been dismissed to make way for men of a different political colour. The fall of Damad Ferid Pasha was greeted in Angora with the wildest enthusiasm, and a general holiday was proclaimed. Nevertheless, the Nationalists have made it quite clear that any reconciliation with the Central Government must be based upon a resolve to obtain a revision of the Treaty of Sèvres. As the Nationalists are determined to continue fighting in order to achieve this purpose, presumably the Central Government will, if it agrees to their demands, have to pledge itself to renew hostilities. As this is out of the question, it would appear hopeless to anticipate a successful issue to the new Cabinet's policy. The Grand Vizier and Marshal Izzet Pasha are said to be confident that they possess enough influence to be able to bring the hotheads to reason; but one may be permitted to doubt it. If Mustapha Kemal refuses to listen to reason,—and it is practically certain that only the revision of the Treaty will cause him to incline his ear—what then? For one thing, the question of Constantinople will again be open to discussion, but that will not settle matters. However, sufficient for the day is the evil thereof. Let us see how Marshal Izzet Pasha's overtures are received. In two months' time, perhaps, the Allies will reconsider the matter of giving Damad Ferid Pasha the money he needed for the despatch of a punitive expedition to Anatolia; but his estimate of the cost will then be considerably greater in all probability.

**The Turkish Offensive in the Caucasus.**

Next to the change of the Turkish Cabinet, the most interesting event of the past week has been the development of affairs in the eastern part of Anatolia, and the southern Caucasus. Much has been made of the Turkish attack upon Armenia, but there is good reason to believe that Batoum is the real object of the Turkish offensive. The Nationalists have never relinquished Turkish claims to the "three sanjaks" of Kars, Ardahan, and Batoum, and for some time past Turkish agents have been very active in the Batoum district. The incursion of Turkish troops into the Artvin district, which is contiguous to Batoum and in Georgian territory, is an indication of the true state of affairs. The Georgian Government has summoned the Turks to withdraw and has threatened war, but it is pretty certain that the Turks will not leave of their own accord. It remains to be seen how their scheme for a local rising of the Moslem population in the Batoum district will work. The Turkish advance in the Etchmiadzin district may be regarded in the light of a diversion to prevent the Armenians from developing an offensive further west. With regard to Bolshevist action, however, it would appear that nothing of importance has yet been undertaken by the Red Army of Azerbaijan. An advance is said to have been broken up by the Armenians in the Kazakh district, to the north-east of Erivan, but it is doubtful whether anything more than a reconnaissance was really intended.

Meanwhile, the Erivan Government has rejected a Bolshevist ultimatum demanding what practically amounted to the unconditional submission of Armenia to the Bolshevist and Turkish forces. The Bolshevist army in Azerbaijan is said to be in a lamentable state, and if this is the case, the ultimatum was merely bluff. If they really intend to do anything, however, the Bolshevists must move quickly, for, according to the latest reports, the Turkish army is being more than held by the Armenians, and the Georgians will certainly not stand by while the Turks advance upon Batoum. It is not impossible, of course, that a Turkish *débâcle* would harmonise quite satisfactorily with Bolshevist plans.

# CORRESPONDENCE.

## THE GREEK ARMY IN TURKEY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As far as I can judge from my own observation and from that of journalistic colleagues, not to mention the numerous British officers attached as observers to the Greek Army, nothing is occurring in the "silent hills of Anatolia" to warrant protests being raised against the conduct of the Greek Army. I have thus far seen Greek troops in enemy country at Constantinople, Smyrna (April, 1920), between Panderma and Balikessir in July this year, and at Brusa and Kestel in September. I have lost no chance of talking to Turkish peasants, whose tongue I speak, and I may here remark that the Greek military made no attempt whatever to shadow me when wandering about, as Turks have done in pre-war days.

My conviction is that the conduct of the Hellenic regulars has been excellent. Neither at Brusa nor Panderma did I hear of any offences save a few petty thefts of melons and chickens—inevitable when hungry, tired, and thirsty soldiers of any nationality are camped near fowl-runs and melon patches. As for the use of irregulars, I *saw* no traces thereof, but heard of some Circassians (*not* Greeks) having been enrolled to round up Kemalist deserters. While at Brusa I heard of the arrest of eighteen Armenians, who, having suffered from the attacks of Kemalist brigands, raided a Turkish village and murdered several non-combatants. I learnt from a native source that these people were working in a chain-gang pending trial.

I learnt that an irregular corps of Greeks and Armenians had been employed for a few days near Aidin, but, having misbehaved, was immediately disbanded and disarmed. Would that the Kemalists would disband the unpleasant savages who form the bulk of their "chetés," or armed bands! That the Greeks should have in some cases armed exposed Greek villages is natural. Can they be expected to desire men and women of the same race to be subjected to the treatment meted out to the unhappy inhabitants of Isnik? And if these peasants, when raided, counter-raid, are the Greeks to be blamed for allowing them to carry arms? They cannot be expected to see them massacred, and they cannot send a column to every village that is or thinks itself in danger of a visit from the "Blue Flag" battalion or some other cut-throat gang.

After service during the war and the armistice, during which I saw a good deal of British, Colonial, Indian, French, and French Colonial methods in occupied enemy territory, I will record my conviction—namely, that the Greek soldier this year has behaved as well as most and much better than some of the troops above mentioned. The little occurrences in the neighbourhood of one of the Jewish colonies in Palestine—at Surafend to be precise—and our subventioning and employment of an Arab army, which did not treat enemy wounded and prisoners with conspicuous humanity when it had entered Damascus, should prevent us from adopting too critical an attitude towards the Greeks.—I am, etc.,

October 22, 1920. EX-OFFICER.

## DISTRESS IN TURKEY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Will you allow us to draw public attention, in your columns, to the widespread suffering and distress prevailing at this moment among the Moslems of Turkey? The reports we have received speak of appalling mortality, especially among children, from starvation, lack of clothing, and every necessary of life.

The representative of the British Red Crescent Society, who has been doing relief work among the Moslems, gives a harrowing picture of the distress and destitution among the Turkish population in Asia Minor, and the refugees in Constantinople from Thrace. The Turkish employees of every grade, who have been expelled by the Hellenic authorities from the occupied territories, are trooping into Constantinople with their families in the greatest distress. The families of the Turks deported to Greece are in an equally deplorable condition, whilst the vast numbers of broken sufferers who have lost all their possessions in this war, or have been evicted from their lands to make room for Greeks imported from abroad, are crowding into the capital.

The Turkish Government has absolutely no means of helping in the alleviation of this vast mass of misery and suffering. We are informed that it recently applied for permission to raise an internal loan; but that it was refused, as the Financial Commission to whom the destinies of Turkey have been entrusted had not yet been appointed. In these circumstances, the only hope of saving the suffering Moslems of Constantinople and Western Asia from perishing lies in outside help.

The British Red Crescent Society has done its best with the limited funds at its disposal. It has received, however, no help from any of the charitable organisations in the United Kingdom; not a penny has been given to save the lives of the dying children in Turkey.

The contributions received from India and elsewhere have been transmitted by wire by kind permission through the Foreign Office to the British High Commissioner in Constantinople for payment to the Rev. Dr. Frew, who has scrupulously administered the British Red Crescent charity.—Yours faithfully,

LAMINGTON.

## AN ALBANIAN COMPLAINT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—At a committee meeting of the Anglo-Albanian Society I was asked to send you the enclosed translation of a letter lately received from Albania, and to hope that you will find space for it.

We have received other letters to the same effect. The condition of the refugees is described as very bad indeed by the American missionary, Mr. Erickson, who appeals for help.—I am, etc.,

M. EDITH DURHAM, Hon. Sec.

[Translation of letter recently received from Dr. Tourtoulis, member of the Albanian Government.]

SCUTARI, ALBANIA, September 26.

I have been a month in Albania. I have been on a mission in Scutari for the past four days. The Serbs have been occupying a portion of our land since 1918. In 1920 they occupied Tarabosh (a mountain on the frontier), and have there planted guns trained on the town of Scutari. Their intention was to invade the rest of Albania easily from these new positions. They, nevertheless, declared that they would recognise the integrity of Albania so soon as the Italians should evacuate Valona. They did not believe this would be done. But Valona has been evacuated by the Italians.

Nevertheless, the Serbs are not only not evacuating our lands, thus arbitrarily invaded, but are invading other parts of our territory under the most futile pretexts. We repel them when we can, but they arrive unexpectedly at other points. Thus, latterly, they pushed to within four hours' distance of Tirana, from which point we repulsed them.

You will easily understand the excited state of our population and the difficult position of the Government which has to keep a large force on a war footing and make crushing expenses for its upkeep. In addition to this our Government has to nourish thirty thousand refugees whose houses have been burnt by the Serbs. The British Military Attaché from Belgrade has seen them. The towns and villages of Central Albania are full of these unfortunate people who have lost even this year's harvest and their flocks.

Our hope is based on your action. All the Albanian people make a supreme appeal to the British people to save them from catastrophe.

## TELL EL-AMARNA.

Tell el-Amarna was the subject of a lecture given by Professor Newbury, in the Lecture Room of the Royal Society, at Burlington House, on October 28. This lecture was the first of a series arranged by the Egypt Exploration Society, which is sending out an expedition to excavate this site. The chair was taken by the Earl of Carnarvon, and there was a large audience.

Tell el-Amarna marks the site of an ancient city that was founded by King Akhenaton in Middle Egypt in the fourteenth century B.C. It was known to Champollion, Sir Gardner Wilkinson, and others, who were exploring in Egypt in the early twenties of last century, and since then every Egyptologist has had something to say about the remarkable monuments that have been found in the vicinity. The King Akhenaton—generally known as the "heretic" King—has come in for more than his fair share of comment, and no one in the long series of Pharaohs has been so badly treated by scholars, and about him they have allowed full rein to their imagination.

He was the son of the great Amenhotep III. by his wife, Tiy, who was not of Royal birth but the daughter of a Priest of Min of Panopolis, in Upper Egypt. This Queen, in the opinion of the lecturer, was one of the most interesting personalities of Egyptian history, and it was mainly her influence that brought about the religious and political revolution that led to the courts abandoning Thebes and founding the city of Akhetaten at Tell el-Amarna. Professor Newberry laid stress upon the fact that the religious ideas set forth by Akhenaton were not entirely new, but were Heliopolitan in origin. A brother of Queen Tiy was a priest at Heliopolis, and the last Vizier of Amenhotep III. came from the northern city. The peculiar art which has been thought to be characteristic of the reign of Akhenaton can also be traced back for one or two generations before his time, and the monuments found in the ruins of the palace of Amenhotep III. at Thebes throw much light on this rather obscure subject.

The revolution and reforms started by Akhenaton were short-lived, and soon after the death of the King the work of the revolutionist was overthrown and the fair city of El-Amarna left a ruin—a warning to idealists of all later times.

The next lecture of the series will be by Professor Elliott Smith, F.R.S., on "The Royal Mummies," on November 25.

# NEAR EAST BOOKSHELF.

I.—"ALLENBY'S FINAL TRIUMPH." By W. T. Massey. (London: Constable. 21s. net.)

II.—"THE GOLDEN TREASURY OF THE GREEKS." Rendered in English by Alexander Lothian. (Oxford: Basil Blackwell. 5s. net.)

III.—"FOLK-TALES OF THE KHASIS." By Mrs. Rafi. (London: Macmillan and Co. 3s. 6d. net.)

## I.—ALLENBY'S FINAL TRIUMPH.

It is the best compliment to this present volume to say it comes up to the two previous volumes of this series, "The Desert Campaign" and "How Jerusalem Was Won." It completes a record of successful military operations which has no equal for romance, picturesqueness, and decisiveness. The author is probably correct when he refers to an "impression which prevails among a not inconsiderable section of the British public that the Army commanded and handled with such consummate skill by Lord Allenby in Palestine had a comparatively simple task." Such opinions have been expressed, but those who do so forget the enormous difficulties of climate and disease, of communication and of transport—especially as regards water—and above all the check placed upon the already planned advance by the withdrawal to the Somme of a very large number of the very pick of the troops when the whole machine was, as it were, ready wound up. It is evident that the astonishing completeness of the victory was due, as is shown here, first, to the most consummate organisation and attention to the minutest details, and, secondly, to the fact that, while this was the only field where cavalry was the all important arm, Allenby was emphatically *the* great cavalry leader of the war. Lastly, even though so many were withdrawn, those that were left were just the men whose magnificent and reckless dash was suited to this kind of warfare—the Anzacs, the Yeomanry, and Indian horsemen.

In the previous volume Mr. Massey closed his narrative where Allenby had consolidated his position in Jerusalem by the extension of his line northward of Ramallah and Bireh, and eastward through Jericho to the edge of the Jordan. No section of the book before us is more vivid and thrilling than the description of the three expeditions from Jericho across the Jordan to Amman, the ancient Rabbath Ammon. At the end of March the Jordan is usually in full flood, and its approaches almost impassable. The rains have not ceased, are even at times very heavy, and the hills all around are slippery with slimy clay. On the night of March 21-22 "the water roared along, overflowing the banks, tearing up scrub by the roots, and making the surface black with driftwood." At the site of the old bridge, then destroyed, at Ghoraniyeh all attempts to cross were in vain. At El Hajleh, however, an officer and six men of the Londons successfully swam across, so that by midnight of the 23rd five military bridges spanned the swollen river, and by the next dawn the flat ground east of the Jordan was covered with advancing troops. A truly wonderful piece of work in the face of hostile snipers in good cover on the eastern side.

The two raids on Amman were extraordinarily venturesome—the second I have heard described by one who took part in it as "mad, quite mad!"—but the results in the long run fully justified the risks. The immediate results manifestly did not come up to expectations, as Amman was not captured, nor was the Hejaz railway seriously destroyed; but as a consequence of these raids great numbers of Turks and Germans were concentrated about Amman, and, more important still, the enemy leaders were convinced that this was the route planned for the British next advance. This misreading of Allenby's plans contributed greatly to the success in September.

The chapter entitled "Camouflaging of an Army" is one of exceptional interest. In the Jordan Valley, for example, "where cavalry had been encamped, one saw dummy horse-lines and camps looking, doubtless, from the air precisely as they had appeared for months. Four sticks with an Army blanket slung between them must have resembled a horse when an observer looked down from an aeroplane skimming above the valley at a height of 10,000 ft., and tents and shelters were left untouched after men had ceased to occupy them. The dummy horse-lines answered so well that an enemy air reconnaissance report, dated September 17, found among Liman von Sanders' papers at Nazareth, said: 'Far from there being any diminution in the cavalry in the Jordan Valley, there are evidences of twenty-three more squadrons'!" During the day, along the front all was quiet; if horse or transport was visible it was always going East. "A brigade of the 7th Indian Division left the coast early in September, and marched for three days up the Jerusalem road as far as Enab. They marched eastwards by day and returned at night." It seems almost unfortunate that our mastery of the air did not give our enemies' aircraft more opportunities of studying the impish tricks prepared for them. Every night guns, horse, and infantry were steadily pouring towards the western end of the defences. "For a fortnight preceding the offensive no new tents were pitched, and all tents then standing were left up, whether occupied or not." "To complete the camouflage there was an elaborate scheme for turning Fast's Hotel in Jerusalem into a sort of battle headquarters for General Allenby," and British officers were sent to hunt out lodgings for the coming winter in Jaffa. Roads which were being constructed for the advance at night were covered by grass and stable refuse by day. No detail which could deceive the enemy was neglected.

Through it all "General Allenby was the greatest optimist in his army. He predicted what would happen, and he told his staff that he would beat, crush, and capture the Turkish armies opposed to him." The result, however, seems to have exceeded even his calculations.

It is marvellous that the whole elaborate plan, known, as it must have been, to hundreds and surmised by thousands, was kept a secret from the enemy to the last moment. There is only one exception to this known. One Indian soldier, a religious fanatic, deserted to the Turks a few hours before the break-through, but too late to be any use. Later he was captured and shot.

The great battle of September 19 may be said to have begun at 1.30 a.m., when a Handley-Page aeroplane left to bomb the central signalling station at Afuleh—the connecting link between the trenches and the General Headquarters of the Turks. This was done so successfully that, as was found afterwards, all telephonic and telegraphic communication was destroyed.

The actual "zero hour" was 4.30 a.m., when hundreds of guns, the existence of which was undreamed of by the enemy, belched forth shot and shell upon the Turkish trenches in the maritime plain, while at the same moment the infantry in great strength advanced and overwhelmed line after line of astounded and bewildered Turks. A little after 7 o'clock, when the sun had conquered the fog and the dust of conflict had subsided over the Turkish trench system, which the German engineers had thought impregnable, our army had overrun all the defences. While the infantry wheeled eastwards, the cavalry burst through the gap between them and the sea. This was the determining feature in the overwhelming success which followed. "The Turks were in absolute ignorance of the fact that two nights before the attack there was one of the biggest bodies of cavalry ever assembled in war within easy shelling distance of their long-range guns," and hidden in the orange and olive groves. One large body of mounted men moved direct on Nazareth, which they reached at dawn the next day, capturing there some members of Liman von Sanders' staff in their pyjamas, and only just missing the German general himself; and this body made for Afuleh, Jenin, and then to Beisan and the Jordan, actually reaching the Jisr-el-Majamie, six miles south of the Sea of Galilee, by dawn of the 21st. And yet a third body made for the openings of the passes for the mountains of Samaria.

Meanwhile "stern hill fighting"—which is here described with considerable detail—was going on in the hills. Progress, though slow as compared with that in the plain, was steady, and soon the whole Turkish army was surrounded. But one exit remained, and that was the Nablus-es Salt road down the Wady Farah. It was left to the airmen, who had already done great deeds about Tulkeram, to deal with this. Here the column of retreating Turks—guns, transport, etc.—extending for five to eight miles, was steadily bombed for four hours, with results so terrible that our author states that "some of the airmen got so sick of the awful havoc they had created that they asked to be relieved of the duty, and it was left to the gunners to smash up the rear of the column."

More wonderful even than the great bombardment which began the battle, or the magnificent spectacle of the mighty mass of cavalry, or the sight of the thousands of disarmed prisoners streaming to our rear, were the long lorry columns of supplies moving forward behind the army "over a country which but a few brief hours before had been roadless, its shallow wadis vertitable trap for all wheeled vehicles."

Meanwhile, Amman had fallen, with thousands of prisoners for us. The Hejaz forces, which had already destroyed the Turkish railway communications on all the East Jordan lands, was advancing on the edge of the Syrian desert. The bulk of our cavalry now swept north-eastwards across the Jordan, and in their veritable race for Damascus lapped up thousands of prisoners and much military booty. Damascus was reached on the last day of September, and after a "night of fireworks," caused by the explosion of countless tons of army ammunition by the re-

Digitized by Google

treating Turks, the 3rd Australian Light Horse, at 5 a.m. on October 1, crossed through the city in pursuit of the flying Turks. Some hours later the vanguard of the Arab forces, under Colonel Lawrence, made a triumphant entry into the city.

Meanwhile from captured Haifa and Acre a force was assembled for an advance along the coast to Beyrout. With the assistance of construction parties blasting out a road at an incredible rate along the face of the steep cliffs at the Ladder of Tyre, a force of cavalry, infantry, and artillery advanced through Tyre and Sidon, and entered Beyrout by October 8. They found this city already in the occupation of Shukri Pasha Ayubi, the Hejaz representative No little diplomacy and national self-effacement were needed successfully to transfer the authority from this self-constituted government to the French, who arrived shortly afterwards. General Bulfin proved happily equal to the emergency, though it would appear that the rank and file of our army were not so content.

The final stage—one apparently hardly dreamed of when the advance began—was to Aleppo. This was divided into three parts—(1) Damascus to Rayak, the railway junction, 40 miles; (2) Rayak to Homs, 89 miles; (3) Homs to Aleppo, 115 miles. The last part was almost exclusively the work of cavalry and armoured cars. The plans were considerably embarrassed by a very severe outbreak of influenza, on the top of much malaria and dysentery, which now occurred. Nevertheless, that whole 244 miles was covered during the month of October; the last day of that month witnessed the Armistice with the Turks, the first beginning of the rapid disintegration of the enemy power and the end of the war.

The airmen, supplies, and signals are the subjects of the last chapters which fitly close a book of which it may truly be said there is not a dull page. There is nothing of the military critic about Mr. Massey. His admiration for General Allenby is so great that he does not seem to allow there were any weaknesses or failures by him or his subordinates in the whole glorious six weeks. The book is the work of an enthusiast who would have us appreciate as he does the immensity of the genius and labour which attained such results. He writes with the full knowledge of one who has seen much and has, too, been behind the scenes. He appraises credit to all units in turn, mentioning to what troops and to what leaders each success was due, not, too, forgetting those who were doing the vital but less showy work behind the lines. One may venture to hope that some day a popular and condensed account of this wonderful campaign from its beginning at the Canal to its ending in Aleppo may be presented by Mr. Massey in one compact volume, that great numbers who have not the opportunity, or the knowledge, or perhaps the patience to follow the whole of this military history as given in these volumes may also thrill with pride as they read of Allenby's great triumph.

E. W. G.M.

## II.—THE GREEK ANTHOLOGY.

There seems since the war to have been a revival of enthusiasm for the Greek Anthology. Translators have been turning with renewed zest from the anarchy of modern verse to these fascinating poems, at once the most perfect of all in thought and in expression. Their charm and secrets are alike inexhaustible; and it is the sense of their vitality that has produced this little book.

Mr. Lothian has here put into English verse 250 pieces of the Anthology, and we may say at once that it is the choicest and freshest selection we have yet read. He has his own theories of translation, but he wisely carries these "at the back of his mind," where they become of a piece with, and do not inform, his practice. "A translation," says the author, "is either a poem or a failure (when it is not, as so often, both); therefore it must fuse and crystallise out like the real thing." And he can fairly claim to have produced the real thing. Listen to this, for instance, and compare it with Cory's "Heracleitus": mark how this translator, though destroying nothing, constructs a poem:—

> One said it—you were dead: my tears
> Broke sudden, friend, for you.
> And the quick thought came of the years
> When, talking, often we two
>
> Had sunk the sun down. Yes, I know
> That somewhere without end,
> Charred ash in Caria long ago,
> You sleep who were my friend.
>
> Yet there, your nightingales as clear
> Sing as they sang of old.
> The clutch of Death is wide: but here
> Is what he cannot hold.

These lines of Callimachus have inspired many versions which have since become English literature, and this, the latest effort, surely has claims so to become.

Mr. Lothian is equally happy whether he is dealing with Death, with the Gods, or with the lusty jokes of the Satyrs. It is not only that his technical knowledge of the Anthology is intimate, that he also has most admirably captured its spirit, but that his acquaintance with and following of the forms of English verse are fresh and unhackneyed which makes his book stand apart from similar efforts.

There is a very pleasing little introduction to these translations, and the book also contains some useful notes and a chronological table of the poets of the Anthology. It is daintily produced, and is altogether a most readable volume.

## III.—SOME INDIAN FAIRY TALES.

The origin of popular myths has long been a standing puzzle for philologists. Their similarity in countries far apart seemed to indicate prehistoric migrations which were physically impossible. It is now generally admitted that the primitive brain reacts in equal measure to the stimulus of its environment; that the forces of Nature and the apparent miracle of growth gave birth to similar legends in every land. The Khasis are an Indo-Chinese race inhabiting a mountainous tract in Western Assam. Although their social and intellectual development is at a low ebb, they possess a wealth of poetic legends. The stories of Orpheus and Tubal Cain find their counterpart in this isolated region; fairies, goblins, and giants are equally dear to British children and Khasi grown-ups. Mrs. Rafi has done well to publish a selection of Indian folk-tales, of which the following is a fair specimen:—

On a certain summer day the animals met under a rubber-grove, and their conversation turned on the relative speed of each. It was generally admitted that the stag excelled in this respect—"now that the dog has run away to man"—but his supremacy was challenged by a tiny snail; and amid the derision of all a race was arranged between them to the top of the Iei Mountain. Ka Mattah—for so the snail was called—discarded his cumbrous shell and dived into the undergrowth, while the stag started on a leisurely canter towards the goal. After going a little distance, he stopped, and called out, "Heigh, Ka Mattah, art thou coming?" receiving the unexpected reply, "I am here; I am here!" Then he put on a violent spurt, stopping at intervals to ask the same question, with the same result. At length he grew faint with the exertion, and on struggling to the summit of the Iei Mountain, he sank exhausted, only to hear Ka Mattah shout, "I have won. I have won!" It is needless to explain that the wily snail had attached himself to the stag's hind leg. The illustrations in Mrs. Rafi's book give one a good idea of this primitive people's surroundings. It is curious to find at pp. 63 and 67 that the Khasi habitat has several rings of huge monoliths resembling Stonehenge.

# MUSICAL NOTES.

### The Templars' Quartet.

In nearly all male voice quartets there is a tendency to go out for "effects" and particularly for imitation of sounds other than musical. And when this tendency has become a habit the quartet is damned. Now it is to the surprising credit of the Templars' Quartet, who gave a recital at the Æolian Hall on October 25, that their realisation of the fact that a part-song is always music is almost complete. It is true that their use of realism in things like Gustav Holst's "The Homecoming," and the Scottish "The Piper o' Dundee" fell only just short of being inartistic; but these two were but lapses in a concert at which a very high level of singing was kept. They were quite excellent in traditional French and British airs, adapted by themselves; and in the Hebridean "Island Shieling Song" and the sixteenth-century "Ce Moi de Mai" they attained an unusual delicacy of interpretation. Their first tenor, Mr. Norman Stone, is uncommonly good, but the whole four are obviously musical. Their *ensemble* can be improved, but their future, which is certainly a bright one, lies rather in avoiding than attaining. The degradation of quartet singing is easy: *audie* the Gresham Singers. At this concert Mr. Gervase Elwes, the most perfect of our tenors, gave the first performance of Dr. Walford Davies' "Four Songs of London." The words are from Alice Meynell, Mary Coleridge, Shane Leslie, and Francis Thompson, and the settings are full of beauties; but in getting the spirit of the poems all right, the composer seems to have got some of the details wrong.

### Dr. Augustus Milner.

It is seldom that one finds nothing to cavil at in the choice of a new concert singer's programme, but that of Dr. Milner, a young baritone, who gave a recital at the Wigmore Hall, on October 26, was very sound. A French group of Berlioz, a German one (musically, at any rate) of Busoni, an English one of Quilter, and a Russian one of Moussorgsky and of Rimsky-Korsakoff here was a selection which indicated at once sense and sensitiveness. This singer shows great promise; although at present his control is imperfect—a deficiency which makes him get all sorts of wrong emphasis on words—and his intonation a little doubtful, he has naturally a very fine voice and a keen sense of artistry. He sang Busoni's two Goethe songs excellently; he held firmly to the gist of Berlioz diffuse "L'Ile Inconnue"; and the tremendous air from Boris Godounov he sang with splendid dramatic reserve.

### M. Jascha Heifetz.

It seems plain now that M. Heifetz is not a great interpreter, though his wonderful technique is still an audible miracle. At his second recital, given at the Queen's Hall on October 26, he played, as if one might finally judge him, César Franck's Sonata in A. All his purity, his precision, his white faultlessness were in it, and yet it did not move. Be it granted that the sonata as a piece of chamber music was spoiled by the deficiencies of the pianist, M. Samuel Chotzinoff, who, though a most obedient and really priceless accompanist, knows not how to command; still, the passion of M. Heifetz was chill, the whole reading classically rigid. But what he can do was proved in a most amazing rendering of Paganini's Concerto in D major; its incredible difficulties were overcome with brilliant ease, and out of a maze of intricacies he really achieved a simple triumph. To him all things but those pertaining to the soul are possible; his double-thirds, for instance, alone are evidence that as a violinist he is unsurpassable.

### Mr. Norman Wilks.

When I heard Mr. Wilks, who by some Belgian and Dutch critics is hailed as a great British pianist, play last year, I could hold out no hopes for him, and after hearing him once more at the Wigmore Hall on October 29 I could not find it in my mind to praise him. His Beethoven (the "Appassionata," unmercifully) was pseudo-profound, and with all its noise, its wrong emphasis, and its confusion, it did not bear the mark of conviction. With Ravel's "Sonatine" it was no better; a lack of lightness and neatness generally was not made less obvious by an ill-kept balance between left and right hand. Cyril Scott's "Water Wagtail" was quite and surprisingly harmless, though there was much more wagtail than water about it; but two commonplace pieces of José Sevenants made it seem wisdom not to wait for the Liszt. At present this pianist puts more on to the pianoforte than he takes out of it; he superimposes (especially with his left hand!) where he should extract; and he draws where he should suggest. With more reserve and clarity he could improve his playing a hundredfold.

### Mr. Steuart Wilson.

It was an extreme disappointment not to be able to hear the whole of Mr. Steuart Wilson's recital at the Æolian Hall, but as it clashed with that of M. Heifetz I could listen only to the end of it. This young tenor has an unusually intriguing and attractive voice, though his artistry is best where it is delicate. In *forte* music there is a sense, though not the actual sound, of forcing; and in the dramatic and impassioned side of his singing he has yet some way to go. But in soft *legato* passages where the words and the music float lazily on, as they do in Clive Carey's "Melmillo," in Denis Browne's "Epitaph on Salathiel Pavy," and in some Fauré songs with which he ended, he was perfectly satisfying. He is, I think, one of the most musical young tenors we have, for he knows and finds what is good to sing.

### A Promising Violinist.

It is to the credit of Miss Katie Goldsmith, who gave a violin recital at Wigmore Hall on October 22, that she went for some big things. Bach's Concerto in F major, four of the Brahms-Joachim Hungarian dances, and a very solid sonata by J. B. MacEwen are not the sort of composition one attempts unless one really likes playing them. Her technique is perhaps not far above the average—it is very lacking in delicacy—but she certainly infuses more feeling into her playing than most of her contemporaries. In the MacEwen she made a brave effort to extract eloquence from the music, and it was not her fault that she failed. The Hungarian dances were played with an abandon that was a little too eager, and instead of finding the rhythmic effects inevitable one just expected them. And the Bach was really beyond Miss Goldsmith; her technique, though resourceful, obscured the exquisite joinery of the concerto, and her temperament did not appear to take kindly to this class of music. Interest consequently flagged, but was revived again when she played the "Rosalind" of Dorothy Howell, whose orchestral piece "Lamia" made a stir at the Promenade Concerts last season. This was an unpretentious but quite charming dance, done with lightness and ingenuity, if scarcely original. The last thing I listened to the violinist playing was "The North Wind," by Rowsby Woof; it made me choose the (apparently) less evil of the fog outside the hall. But Miss Goldsmith really shows much promise; already she has fine tone and quite uncommon spirit.

### A Great 'Cellist.

It seems pretty generally agreed that the greatest 'cellist in the world is Pablo Casals, whom I have not heard; and it seems equally generally agreed that the greatest 'cellist in this country is Mme. Guilhermina Suggia, who gave the first of a series of three recitals at the Wigmore Hall on October 27. She is really a magnificent player; her intellectuality, her technique, and the continuous impulse of her interpretations put her into a class apart. Her breadth of tone is glorious, and this as much on her metal as on her other strings. She played Brahms's Sonata in F major and Frank Bridge's Sonata with intense conviction; and her lightness of touch in Fauré's "Papillon" was a revelation. In purity of tone she was perfect; but what happened to her intonation, particularly in Moór's "Prelude" and again in Sinigaglia's "Humoreske" had best not be related.

### M. Josef Hofmann.

Further hearing of M. Hofmann confirms the impression that he is one of the world's pianists and artists. Again at his second recital at the Queen's Hall on October 27, he showed the beauty and general charm of the master. He is neither the intellectual nor the romantic; he is neither classical nor extravagant; he is merely himself, a reserved but complete personality. In Beethoven he preserves an unfashionable amount of good tone; the "Appassionata," for instance, was played as if it were the smooth, unruffled outpourings of a soul, and, except in the first few variations of the middle movement, his reading was entirely convincing. To Chopin's Sonata in B flat minor, again, he gave a most distinguished and natural explanation; its scherzo, a sheer delight, I have never heard played better, and the Funeral March, apart from a too characterless silkiness of tone in the second movement, was made most moving. The tolling of the bell was pitiless; to its inexorability everything was rightly sacrificed. It is absurd to deny that M. Hofmann has big conceptions of great works: no brain, indeed, could equal the nimbleness of his hands, but his mind is always working. It is, in fact, in things like Chopin's Nocturnes and Polonaises that his intellectuality triumphs at the expense of his tone; a hardness in melodic outline and a stabbing in the filling-in of the bass can only be accounted for by a purpose deliberately to sacrifice beauty of tone for effect. For into things which need but little interpretation M. Hofmann allows no trace of bad tone; he plays Mendelssohn's "Caprice" or Chopin's waltzes, for example, quite unsurpassably. As a pianist there is none better in the world.

But to judge from the two examples, published under the name of Dvorsky, of his own compositions—"East and West" and "The Sanctuary"—it is not as a composer that M. Hofmann will go down to fame. There was in these pieces no depth, no feeling, and little originality; in a word, they were unworthy. However, as an interpretative and executive artist he is very great: certainly there is no one greater playing in England at the present time.

**TO-DAY.**

November 4 (New Style).
October 22 (Old Style).
Safar 23, 1339 A.H. of the Moslem Calendar.
Marheshwan 23, 5681, of the Jewish Calendar.

Sir Basil Zaharoff has returned from London to Paris, and will shortly leave for the South of France.

Mr. and Mrs. Mann, of Trulls Hatch, sailed for Colombo, by the s.s. Leicestershire, on October 22.

Sir Charles and Lady Marling have returned to the British Legation at Copenhagen after leave of absence.

Lord and Lady Templemore have left London for Paris on their way to Algeciras, where they will spend the winter.

M. Kauhtchishviti, Georgian Delegate, arrived in London last week from Berlin in connection with economic matters.

Major-General Sir Charles Townshend is standing as an Independent Parliamentary candidate for the Wrekin Division of Shropshire.

M. Hadji Misheff, who has been appointed Bulgarian Minister at Rome, was, before the war, the representative of Bulgaria in this country.

Sir Henry Stewart Cunninghame, K.C.I.E., of Eaton Place, S.W., late a Judge of the High Court of Calcutta, left property valued at £35,871.

Hamad Basil Pasha has arrived at the Savoy Hotel, where the other members of the Egyptian Delegation to the Milner Commission are staying.

Mr. John Quinn, J.P., of Kenley, Barnes Close, Winchester, late of the Covenanted Bengal Civil Service, left property of the gross value of £13,266.

The name of Mr. Bertram Christian, the first chairman of the Serbian Relief Fund, has been added by the Lord Chancellor to the Commission of the Peace for Kent.

General Sir John and Lady Maxwell have left 103, Lancaster Gate for Egypt, where they expect to spend the winter. Letters sent to Lancaster Gate will be forwarded.

Prince Nicholas of Roumania was visited this week at Eton by M. Titulesco, Roumanian Minister of Finance, and M. Boeresco, Minister Plenipotentiary and Roumanian Chargé d'Affaires.

On October 28, which has been proclaimed as the official Czecho-Slovak Independence Day, a reception was given to friends of the new Republic at the Czecho-Slovak Legation at 9, Grosvenor Place, S.W.1.

Mr. Sydney Armitage-Smith, Financial Adviser to the Persian Government, has returned to London to conduct certain financial negotiations on behalf of that Government, and will remain here for some weeks.

Mr. Bhupendra Nath Basu, who has been confined to a nursing home for some weeks past, is recovering from his illness, and hopes to resume his duties as a member of the Council of the Secretary of State for India in a few days.

Mrs. Eckstein and Miss Eckstein left England last week for Colombo, where they will be the guests of Sir William Manning, Governor of Ceylon. Captain Bernard Eckstein leaves in December for the Sudan for big game shooting. Mrs. and Miss Eckstein will afterwards go to Khartoum to await his return there from the interior.

A marriage has been arranged, and will shortly take place in India, between Captain Geoffrey Sydney Brewis, D.S.O., 1st Batt. the Welsh Regiment, youngest son of the late S. R. Brewis, J.P., of Ibstone House, Bucks, and the late Mrs. Brewis, of 86, Cromwell Road, S.W., and Gwendolyn, elder daughter of Lieut.-Col. C. Powney-Thompson, C.B.E., Indian Army, and Mrs. Powney-Thompson, M.B.E.

A marriage has been arranged between Philip Gordon, eldest son of Major L. M. Boileau, retired, Indian Army, and Mrs. Boileau, of St. Croix, Englishcombe Lane, Bath, and Cecilia Margaret, younger daughter of the late Walter C. L. Floyd, M.Inst.C.E., formerly Deputy Consulting Engineer for Railways to the Government of India, Calcutta, and Mrs. W. C. L. Floyd, of Kelston Knoll, near Bath.

The Secretary of State for War gave a dinner last week at the United Service Club, in honour of General Lord Rawlinson, Commander-in-Chief in India designate. Invitations were issued to:—

Field-Marshal Earl Haig, Field-Marshal Viscount Allenby, Field-Marshal Sir Henry Wilson, Field-Marshal Sir William Robertson, General Sir O'Moore Creagh, General Lord Byng, General Lord Horne, General Sir H. V. Cox, Lieut.-General the Earl of Cavan, Lieut.-General Sir T. H. J. C. Goodwin, Lieut.-General Sir A. Godley, Lieut.-General Sir J. P. Du Cane, Lieut.-General Sir P. W. Chetwode, Lieut.-General Sir G. M. W. Macdonogh, Lieut.-General Sir Travers Clarke, Major-General Sir G. Ellison, Major-General Sir A. Lyndon Bell, Major-General Sir Charles Harington, Major-General G. D. Jeffreys, Major-General Sir W. Childs, Mr. E. S. Montagu, the Earl of Lytton, Viscount Peel, Sir A. Williamson, Sir J. Stevenson, Sir W. Meyer, Sir W. Duke, Sir Herbert Creedy, Sir Charles Harris, Sir Bertram Cubitt, and Mr. E. Marsh and Major Sir A. Sinclair, private secretaries.

General Lord Rawlinson left on November 1 for India. He will attend a ceremony to present a flag to Amiens Cathedral on his way.

## APPOINTMENTS, ETC.

M. Alexander Cretziano has been appointed Secretary to the Roumanian Legation in London.

M. Gregoire Michaesco, Secretary to the Roumanian Legation, arrived in London this week from Bucharest.

Ebraham Khan Gharagozlow, Secretary to the Persian Legation, arrived in London this week from Berne.

M. Dahalsky, the newly-appointed Second Secretary to the Czecho-Slovak Legation, arrived in London on October 28 from Prague.

M. Max Labkovitch, the newly appointed First Secretary to the Czecho-Slovak Legation, arrived in London on October 27 from Prague.

It is officially announced that the following appointments have been made to commands in India:—

Northern Command.—General Sir W. R. Birdwood, G.C.M.G., K.C.B., K.C.S.I., C.I.E., D.S.O.

Eastern Command.—Lieut.-General Sir H. Hudson, K.C.B., K.C.I.E.

Southern Command.—Lieut.-General Sir W. R. Marshall, G.C.M.G., K.C.B., K.C.S.I.

Western Command.—Lieut.-General Sir W. P. Braithwaite, K.C.B.

## THE LATE KING ALEXANDER.

The body of the late King Alexander of the Hellenes was conveyed from Tatoi to Athens on October 27, and the funeral service in Athens was held in the Cathedral on October 29 at 1 p.m. Among those present were Queen Olga, Mme. Manos (the late King's morganatic wife), the Regent, Admiral Condouriotis, the Serbian Prince Regent and his sister, Princess John Constantinovitch, the Swedish Crown Prince, Prince Eugene, Duke of Nerica, members of the Cabinet, the Special Envoys, Read-Admiral Sir George Hope (British), Rear-Admiral Dumesnil (French), and Captain Mariglia (Italian), and members of the Diplomatic Corps representing other foreign Sovereigns and States.

The service was short, but most impressive. At its conclusion, the coffin was placed on a gun carriage and drawn by bluejackets to the Museum, where it was transferred to a motor-car and conveyed to Tatoi. There King Alexander was buried by the side of his grandfather, King George. In Athens and throughout Greece mourning is general for the young monarch.

A requiem service was held on October 31 at the Greek Church, Moscow Road, Bayswater, in memory of King Alexander of the Hellenes. King George was represented by the Prince of Wales, who wore khaki uniform, and Queen Alexandra by Earl Howe. The Archbishop of Canterbury was represented by his chaplain, and the Lord Mayor attended in state.

A Supplement to the *London Gazette* issued on October 27 contained the following notice from the Lord Chamberlain's Office, dated October 25:—

"The King commands that the Court shall wear mourning for two weeks from this day for his late Majesty the King of the Hellenes, first cousin once removed of His Majesty the King.

"The Court to change to half-mourning on Monday, November 1 next.

"And on Monday, November 8 next, the Court to go out of mourning."

## OBITUARY.

Sir Gabriel Stokes, K.C.S.I., has died in Dublin at the age of seventy-one. He entered the Indian Civil Service in 1871. After holding posts in Bombay and Madras, he was appointed superintendent of the provincial census in 1881, and afterwards served as Revenue Secretary to the Government, then as Chief Secretary, and from 1903 to 1908 as a member of the Madras Government. He acted as Governor of the Presidency in February and March, 1906, between the departure of Lord Ampthill and the arrival of his successor, and was created a K.C.S.I. on retirement.

## NEWS IN BRIEF.

General Charpy has been appointed Commandant of the French troops of occupation in Constantinople.

New Zealand women are proposing to send a nurse to Palestine to assist in the child welfare movement there.

The *Morning Post* Cairo Correspondent states that British troops are now being steadily replaced by Egyptians in the provinces and the Fayoum.

M. Chicherin is reported to have informed Roumania that the Soviet Government is ready to return the £24,000,000 in gold removed from Bucharest to Russia during the war.

Tramway strikers at Bombay have resorted to indiscriminate stone-throwing and, whenever possible, holding up tramcars. There have been several casualties, and one man was stoned to death.

Consequent upon the non-co-operation movement among the students of the Punjab, Aligarh College is closing *sine die*. The parents of the students at the college are unanimous against non-co-operation.

The Pope has given £4,000 to the fund to provide a Roman Catholic Cathedral in Belgrade. The hon. secretary of the fund, to whom subscriptions should be addressed, is Mr. E. Christitch, 33, Brooke Street, E.C.

The Secretary of State for India announces that revised rates of leave pay, pay whilst on duty outside India, and unemployed pay for officers of the Indian Army have been approved, and are being communicated to the officers concerned.

Mass meetings were held in all parts of Yugoslavia on October 31 and on November 1 to call upon the Government at Belgrade not to recognise the recent plebiscite in Carinthia, and to suspend diplomatic and commercial relations and the sending of food until its revision is granted.

An Admiralty Order has been issued directing the battleship Emperor of India, flying the flag of Rear-Admiral Sir Richard Webb, Rear-Admiral Second-in-Command of the Mediterranean Fleet, to be re-commissioned at Sheerness on November 20 with a new crew from Chatham for a further term of service in the Fourth Battle Squadron, Mediterranean Fleet.

*The Palestine Daily Mail* (published in Jerusalem) suggests that owing to the increasing use of the telegraph service by Jewish and Arabic merchants in the Holy Land, telegrams should be permitted in Hebrew and Arabic. At present telegrams in these languages have to be transliterated into Latin characters. This journal shows that the Morse code can be readily adapted for Hebrew and Arabic.

The *Morning Post's* Cairo correspondent states that the Princess Shafika, the divorced wife of the Sultan of Egypt, and sister of Prince Seif Ed-Din, has instituted an action against the ex-Premier Mohammed Said Pasha, praying that he be relieved of the custody of her brother's estates. Said was appointed after Seif's exile, which followed his attempt on the life of the present Sultan at the time of his divorce proceedings.

The battleship Ramillies, Capt, Aubrey Smith, M.V.O., which was detached from the Atlantic Fleet last January for service in the Mediterranean, returned to Devonport on October 27 after work in the Black Sea and Asia Minor, which included the bombardment of Ismid and operations at Constantinople. The Ramillies brought home Capt. Fitzmaurice, late commodore at Smyrna, and his staff.

It is announced, says the Rome Correspondent of the *Morning Post*, that the Italian and Yugoslav delegates at the forthcoming conference, which is expected to begin on November 7, will be accompanied by five civilian and two military assessors for either side. General Badoglio and Admiral Acton will be the Italian military experts.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses. Nursery Governesses, Nurse Companions, Lady Nurses, etc.

QUALIFIED NURSE and MASSEUSE, Cheerful Temperament, seeks post as companion to go abroad, preferably Constantinople.—A.G., Care of 12, Ramshill Road, Scarborough.

DEMOBILIZED SISTER, fully trained, unable continue nursing, seeks post as secretary—companion to elderly lady; willing to travel, highest testimonials,—Write Box 174, THE NEAR EAST, 1, Devonshire Square, E.C. 2.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX. LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

**EXETER**
**ROYAL CLARENCE HOTEL**
*(facing beautiful Cathedral).*

**LONDON**
**HOTEL CRANBOURN**
**67a, Shaftesbury Avenue, W.C.2.**
**Self Contained Suites.**

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
**SMEDLEY'S HYDRO.**

**TORQUAY**
**VICTORIA & ALBERT HOTEL.**

*Cairo's Hotels de Luxe.*

**SHEPHEARD'S HOTEL.**
Open all the year round.

**SEMIRAMIS HOTEL.**
Splendid position on the East Bank of the Nile.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

**WINDSOR HOTEL**
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
American Bar and Restaurant,
Billiards, and Lift.

**SUMMER PALACE HOTEL,**
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Every Modern Comfort. American Bar, Restaurant.
Bathing Cabins on the Beach. Billiards.
Daily Concerts on the Verandah.

**NAJEM HOURY'S CYPRUS HOTELS COMPANY.**
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
LARNACA—Majestic Hotel.
FOR SUMMER SEASON—
TROODOS—Olympus Hotel.
6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
**NAJEM HOURY & SONS, Limassol, Cyprus.**
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, and Larnaca.
Head Offices and General Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

## ALBANIAN FRONTIERS.

Last week it was urged in THE NEAR EAST that there was little chance of a satisfactory solution of the Adriatic tangle being found, unless Great Britain and France took a vigorous hand in the settlement. If it is unlikely that Italy and Yugoslavia can of themselves arrive at an understanding in regard to the future of Fiume and the frontier line between their two countries, there must be still less hope that the Albanian question will be settled by a policy of *laissez faire* on the part of the Council of Ambassadors. Yet it would seem to require but a small amount of Allied initiative at this stage to secure an adjustment of outstanding points in regard to Albania, and thus to establish at least one State in the Balkans on a permanent basis. The Albanians may not be entirely free from differences of opinion among themselves—they would hardly be human, certainly not Balkan, if they were—but, whereas they may yet prove to be peacefully disposed when once they have obtained their independence, there can be no doubt that the Peninsula will know no rest until that independence, without any irredentist grievances attaching to it, has been won. References elsewhere in this issue indicate that an unsettled Albania only serves to fan the present bitterness between Italians and Yugoslavs, apart from the fact that the frontier incidents now occurring may give rise to vendettas which may embroil Albanians and Serbians for many years to come. Italy has recently experienced a wonderful evolution in her attitude towards Albania. After a period of attempted Italianisation, the country was evacuated, the Tirana Government was provisionally recognised, and an arrangement was entered into between Italy and Albania which did no violence to the nationalist aspirations of the latter, while satisfying the natural anxiety of the former for a *point d'appui* on the Albanian side of the Adriatic. The next development was an appeal from Albania to the Italian Government for support against Serbian inroads. There is no evidence that this request was officially granted: but the Serbians can hardly fail to see Italian encouragement, if not material assistance, in the struggle which the Albanians are now maintaining along the frontier.

Albania has suffered more than any other Balkan State from the ignorance of the Supreme Council regarding Near Eastern affairs. In December, 1919, an agreement was concluded, to which President Wilson, Mr. Lloyd George and M. Clemenceau adhered, giving the mandate over Albania, with certain reservations and safeguards, to Italy. Within two months, however, the existence of this arrangement had been forgotten, and the irresponsible opportunism which characterised so many of the Allies' decisions led to a proposal on the part of the British and French Prime Ministers that Albania should be partitioned, Scutari and the north going to the Serbs, Valona and the centre to the Italians, and the south to Greece. Fortunately, President Wilson valued his reputation for consistency, and refused to agree to a scheme in such glaring contradiction to the arrangement made the previous December. The protests of his former colleagues on the Supreme Council against his squeamishness on this point fell somewhat flat in the face of the attitude of the Yugoslav Government, which also refused to be a party to the dismemberment of Albania, and insisted that Albanian nationality and rights should be respected. The San Remo Conference failed to discuss the Albanian question, which, therefore, remains in this indeterminate position as far as the Allies are concerned. In the meantime, however, as we have seen, Italy has been better than her word, by abandoning the idea of a protectorate, while the Serbians promise to belie the expectations they had previously raised. The conflicting claims of the Serbians and Albanians can only be settled by arbitration. There are two frontiers in existence, that of 1913 and the one provisionally fixed by the Allies for the Serbians. With regard to the latter, the Serbians can claim that it has never been abrogated, and that they are, therefore, within their rights in occupying the territory assigned to them. The Albanians, on the other hand, point out that the only frontier with any real validity is that given them in 1913; but they claim, with some justification, it must be admitted, that this frontier was not fair to them even in those days, and has become still more unjust in the light of the principle of nationality and the right to economic development for which the Allies declared that they were fighting. Their patriotism may centre in their mountains, but they resent being cut off from some of their chief market towns.

It will be a matter for surprise if the demarcation of 1913, arrived at as a result of a compromise between the hostile interests of the Great Powers of that day, cannot be improved upon by the Allies acting alone in 1920. Conflicting claims will still have to be adjudicated upon, but they can be narrowed down to the issue—difficult enough to decide, but unimportant outside the sphere immediately concerned—of the nationality of this or that town or village. The significant improvement in the relations between Italy and Albania justifies the hope that Greece will also find it to her interest to establish a friendly understanding with the Albanians. There can be a little doubt that in the past international intrigue has contributed largely to the enmity manifested along the Greco-Albanian frontier. Strong ties exist between the two countries. The leaders of the Greek War of Independence were in a large number of cases of Albanian descent, and Albanian blood runs in the veins of many Greek families to-day, including, unless we are mistaken, that of Admiral Condouriotis, the present Regent of Greece. Both he and M. Venizelos would welcome an agreement that would put an end to the misunderstanding between the neighbouring peoples. But here again mutual suspicion may keep the two Governments apart, unless some outside influence acceptable to both undertakes the task of mediation. It would be right for Great Britain and France to act together in this matter; but, rather than that there should be any further delay, the British Government should act alone. Its disinterestedness enabled it to be the peacemaker in 1913; and although the agreement then reached had little to commend it, at least it served to postpone for a year the European War. In arbitrating now between Albania and Serbia in the north and between Greece and Albania in the south, Great Britain will have an easier problem to solve, and there is abundant evidence to show that, with however much grumbling her verdict might be received on one side or the other at the moment, all the three countries would at heart be grateful for a solution that made for peace along their frontiers.

# TURKO-ARABIAN RELATIONS.

(By Our Constantinople Correspondent.)

The appointment of Sir Percy Cox as High Commissioner in Mesopotamia has aroused considerable interest in both Arab and Turkish circles in Constantinople, where the development of events in the land that is said to be flowing with oil, if not with milk and honey, is being followed with the closest attention. The persistent unrest in Mesopotamia must be a source of considerable perplexity to the average Briton, who was persuaded that we had been welcomed as saviours by the population of that country, which for so long had groaned beneath the intolerable burden of Turkish despotism and tyranny. The truth of the matter is that Turkish despotism was by no means intolerable in Mesopotamia, for the very good reason that the turbulent Arab tribes of that country are not the sort of people who will submit to any kind of tyranny unless it be that of their own tribal chiefs. The Turks, in reality, had to keep a very light hand on the bridle, but, even then, they failed to eradicate the hereditary antipathy of the Arabs for their race, and it was this antipathy that caused the latter to welcome the British—at first. Why this welcome has cooled has already been discussed at length in the pages of The Near East, and there is no need to dilate here on the matter; but it may be said that the Turkish Nationalists have from the outset spared no effort to intensify the unrest that has now spread over practically the whole of Irak-el-Arabi. One not unimportant Sheikh, at least, Ajemi Sa'adun Pasha, has never hidden his sympathies, and from the beginning has co-operated as closely as possible with Mustapha Kemal.

Nevertheless, there can be no question of the Arabs' desiring the re-establishment of Turkish dominion. What they certainly do want is the establishment of a form of administration in conformity with their customs and traditions, and one which, at the same time, will harmonise with their national and religious sentiments. Arab ideas on this subject are very different from Western ideas—so different, indeed, that it would be almost impossible for any ordinary mind steeped in traditions of parliamentarianism to devise an administration that would work successfully among the Arabs. Parliamentary government in Turkey, a country much closer to Occidental culture than Mesopotamia, has been a travesty and a failure from its inception. Sir Percy Cox is doubtless a specialist in matters Oriental, but his task is none the less arduous.

Undoubtedly one of the most thorny points to be settled will be that of selecting an overlord or ruler for the country, who would be acceptable to the majority of the tribal chiefs. The name of the Emir Abdullah, brother of the recently dethroned King of Syria, has been mentioned in this connection, but upon what grounds it is not easy to understand, except that King Hussein and his brilliant sons have been so much advertised that there has been no room for any other prince either in the illustrated papers or in the public eye. Yet there is an alternative choice to one of the members of King Hussein's family, and the distinction of being first in emphasising the fact belongs to The Near East, which published in its issue of September 2 an interesting article on the claims of H.H. Shereef Ali Haidar, the representative of the senior branch of the Shereefian family which traces its descent from Fatma, the daughter of the Prophet.

It was with a view to obtaining the Shereef's own opinions with regard to the article in question, and also the letter from Professor Kay, of St. Andrew's University, that I paid him a visit. There was no need for an introduction, as I have known both the Shereef himself and his sons for some years, and was also in touch with them during the difficult period of the war, when, had they ever been imbued with anti-British sentiments, they would surely have given some evidence of them. In spite, however, of every inducement, the Shereef, Ali Haidar, never became an Anglophobe. He was quite ready, it is true, to fight the Shereef Hussein for the throne of Mecca, but that is a different matter, for King Hussein's own brother, Shereef Nassir Pasha, who is a senator in the Ottoman Parliament, publicly cursed the Shereef Hussein for his rebellion.

Shereef Ali Haidar informed me that the article to which I called his attention was historically accurate, but assured me that he was completely ignorant of the identity of the writer, or that such an article was to appear in the English Press. He seemed to be exceedingly pleased that it should have been written by a complete stranger. In reply to my remark that the article said little about his activities during the war, the Shereef replied: "Even my worst enemies can say no more than that I was a member of the Committee of Union and Progress, and that, having been appointed Emir of Mecca (which, after all, I consider to be my right), in place of Shereef Hussein, who had rebelled against the Khalif, I proceeded to Medina to fight for my rights; but no one can say that I ever did the slightest harm to the British. As for my being a member of the Committee, who at that time in Turkey was not a member? Was it not the Committee that confirmed the Shereef Hussein himself in the Emirate of Mecca? Why, if I was a favourite of the Committee, was that done? The reason was that I was a marked man on account of my pro-British sympathies, like my grandfather before me."

H.H. SHEREEF ALI HAIDAR.

With regard to his claims, the Shereef said that he asked for nothing but moral support; not for financial or military assistance. He supposed that to a certain extent the Arabs of Mesopotamia would be free to choose their own ruler, and all he asked was that he should be given a chance to put his claims before his own countrymen in a free and unrestricted manner.

If those claims were rejected, he would have nothing to do but to accept a fair verdict with the best grace he could; but he was confident that the justice of those claims would be fully recognised. When he was at Medina during the war, he had numerous offers of help from the most influential chiefs of Arabia, but it was no part of his plan to come into conflict with the British, and for that reason his party afterwards retired to Damascus. He felt confident that if he were allowed to place his claims before his countrymen the result would be in his favour. "Surely," he continued, "it would also be in the interests of the British to have a ruler in Mesopotamia upon whom they could rely, not only with regard to his loyalty, but also with regard to his fitness for the post. You have seen Professor Kay's letter, and even if you did not know me, there would be no need for me to boast."

Our conversation had been in Turkish; but the Shereef speaks French quite fluently, and his sons, who have had a thorough English education, speak English perfectly. After the Shereef's eldest son, Abdul Mejid, had shown me many papers, including letters from British statesmen and cuttings from *The Times* in corroboration of the article in THE NEAR EAST already referred to, I took my leave, with the feeling that Shereef Ali Haidar has a very strong case.

## M. STAMBOLISKY.

The Bulgarian Prime Minister terminated his visit to England on Sunday, October 31, when he left in the early morning for Paris. During the last week of his stay he was brought into touch with the members of His Majesty's Government and a number of prominent politicians. He lunched at 10, Downing Street with Mr. and Mrs. Lloyd George; and he had conversations with, among others, Mr. Bonar Law, Lord Curzon, Mr. Balfour, Mr. Winston Churchill, and Mr. Austen Chamberlain. In spite of a very full "business" programme, he found time to indulge his unofficial bent in three typical ways: he attended a children's tea party, he went shopping (when neither King Boris nor the members of the Cabinet were forgotten), and he spent a number of hours—in prison. After three and a half years in gaol for his sympathies with the Entente, M. Stambolisky retains a lively interest in prisons, and he makes a point of examining them whenever he has an opportunity. In Rome the authorities were horrified at the idea, and found many excuses for not acceding to his request. He was, therefore, correspondingly delighted when in London he was not only told that he could visit any he liked, but was also invited to take lunch in one. Accordingly M. Stambolisky had lunch in Wandsworth Gaol, and inspected the prisoners' quarters, and was then taken to Holloway Gaol, where women prisoners are detained. Other engagements during the week included a dinner given on Tuesday by the Prime Minister at the Hyde Park Hotel to the members of his suite and a large number of friends. On Friday he was entertained at dinner by Sir Clifford Cory, Bart., M.P., and others, among those present being Sir Hugh Barnes, K.C.S.I., Sir Ernest Roney, Mr. H. J. White Jervis, Mr. H. J. Kearney, Mr. A. H. Jackson, and Mr. J. A. Muirhead.

In the course of conversation on the last day of his stay, M. Stambolisky stated that his visit had surpassed all his expectations. He was particularly gratified by the cordial reception that had been given him, and by the way in which the members of the Cabinet had made it possible for him to meet them. Nothing could have exceeded the thoughtfulness of the arrangements made for his tour. He left feeling that Bulgaria could always count upon a genuine friend in England, and he hoped that his visit had laid the foundations for closer commercial relations between the two countries.

It may be stated that there was never any question of the revision of the Neuilly Treaty being raised during M. Stambolisky's visit; but we understand that Mr. Lloyd George had previously had his attention called to the Bulgarian Government's difficulty in raising a voluntary army, and he took the opportunity of hearing what the Prime Minister had to say on the subject. The introduction of the voluntary system in the enemy States was a special point with the Peace Conference, and it is realised that there may be strong feeling against allowing an exception to be made for one country.

In Paris M. Stambolisky, with the members of his suite, will remain twelve days. He then proceeds to Brussels, Berne, Prague, Warsaw, Bucharest and Belgrade. His return to Sofia is fixed for the middle of December. As it is not possible to include Greece in this tour, M. Stambolisky hopes to visit Athens in the spring.

## PRESS ON THE NEAR EAST.

### "A Farewell Survey."

In its issue of last week, the *New Europe* announces its own untimely demise. After a vigorous existence of four years it finds itself strangled by printers' wages, the price of paper, and the fantastic state of foreign exchange. No one who has studied its pages regularly can have failed to derive both interest and knowledge from them, and it would be a serious loss to instructed opinion in Great Britain if all those who have contributed to it were to write no more. Fortunately there is no reason to suppose that such will be the case. Of the joint editors, one, Mr. A. F. Whyte, may find that his labours in a new sphere as President of the Indian Legislative Assembly will interfere with his work as a publicist, but there are other media by which Dr. R. W. Seton-Watson can still place his unrivalled knowledge of Central and South-Eastern Europe at the disposal of his fellow-countrymen. In his farewell article he has once more lived up to his wish "to play the mosquito to a deadened public opinion," and most people will be ready to accept his verdict on his own able publication, that "its influence has reached far beyond the most sanguine expectations of its founders."

Particularly masterly is his analysis of the general situation to-day:—

Look where he will, there is cause for anxiety, though not for despair. France stands halting between a desire to hoodwink herself with the last shreds of a belief in a great German indemnity and a courageous resolve to work out her own salvation, as she eventually must. America, on whose goodwill Europe banked too largely, is distrustful of the Old World, and very loth to commit herself politically or financially in its interest. The economic paralysis to which Italy is a prey does not fall far short of temporary political disintegration, though her peculiar genius may be expected to provide new and unexpected solutions to old problems. Germany still stunned by the blow of defeat, seems for the moment to be sick to death of politics, and reveals a more marked intention to work harder than almost any other nation. Russia is no longer the Russia we once knew; and whether the collapse of the Bolshevik régime lies in the near or the distant future, a prolonged period of agony and anarchy lies before her. Where Austria-Hungary once was there is now a group of vigorous but immature States: Poland, the most perilously ambitious; Czecho-Slovakia, the most realist; Jugo-slavia, beset by difficulties by no means all of her own creation; Roumania, still in transition from a patrician to a peasant State; and within this ring the reduced body of Hungary, whose substantial future a clique of magnates are willing to gamble away in exchange for a worthless dynasty.

Dr. Seton-Watson admits that the story has to be told in terms which hold out little promise; but beneath, changes have been wrought which are good for the health of Europe. Those who talk of the Balkanisation of Central Europe, he declares, have failed to see the wood for the trees, and have mistaken the passing effects of war for permanent features in the landscape. The doctrine of "The Balkans for the Balkan peoples" is for the first time coming into its own, and is being steadily extended to include all the Danubian countries.

In a further article on "the Psychology of the Succession States," the same writer comes a little nearer than he has allowed himself to come before to constructive criticism of his *protégés* nations, the absence of which in the past on the part of their most influential friends has been in no small measure responsible for any failure there may have been in the attainment of the goal in view.

### Egypt.

The *Saturday Review* of October 16 does not like the new Egyptian proposals. Referring to "this latest adventure—the transfer of the reins of Government from the hands of Great Britain to those of Egypt, about a year after the Allied and Associated Powers had conferred upon England the title and responsibilities of the Protector of Egypt," and particularly to the negotiations between Lord Milner and Zaghloul Pasha, it says:—

We confess to a certain amount of surprise not unmixed with dismay that, in these latter days when so much lip-service is paid to the *vox populi*, these negotiations should have been thus far conducted *in camera*, so far as Great Britain is concerned. It is quite conceivable that Parliament may take a different view to Lord Milner and Zaghloul Pasha's as to the extent to which we should abandon our protectorate over Egypt in exchange for an alliance; if it does, then many hopes will have been raised in vain, and more harm than good will result. It is also certain that the proposed abolition of the Capitulations will be the occasion of much anxiety among foreign Governments which are responsible for the safety of their own nationals, both as regards life and property. We have not yet been told what the substitute is to be, but we can be sure that all the chief Chanceries of Europe will have a good deal to say before the Capitulations are finally disposed of.

The truth is that Egypt cannot be dealt with as though it were Teschen, or the Hedjaz. No, not even to please President Wilson. At a time when relations between France and England had long passed breaking point, Napoleon said, "If once Egypt were in

Digitized by Google

possession of the French, farewell India to the British," which points to a very real danger, if ever the Suez Canal should pass beyond the political control of the great Company over which France and England have the directing voice. So Bismarck, in later days: "Egypt is as necessary to England as her daily bread," laying stress not upon the commercial value, but upon the strategic necessity of securing our communication with the East. Read Lord Cromer's "Modern Egypt," or Sir Valentine Chirol's latest volume, and mark how, with varying degrees of emphasis, the same is proclaimed. That truth is not cancelled by the appearance of the new Convention. Therefore, we insist that, until the Parliaments of the Great Powers and the Chambers of Commerce and of Shipping have been convinced that the hour has come when Great Britain, the recognised Protector of Egypt, may safely abdicate the authority entrusted to her by her Allies, it is our bounden duty to go steadily forward upon the path that has brought to Egypt peace, justice, and great prosperity, for which we are the trustees.

### Articles to Note.

"The New Adriatic State," by John Leyland; and "The Report of the Army in India Committee of 1919-1920," by General Sir O'Moore Creagh, V.C., G.C.B., G.C.S.I. (late Commander-in-Chief in India), in the *Nineteenth Century* (November).

"The Little Entente and Central Europe," by Sisley Huddleston in the *Contemporary Review* (November).

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:—*

PERSIA.—INDIA: Vizagapatam and Cochin Harbours.—Railways, Management. ARMENIA.—MESOPOTAMIA: Administration. —Expenditure (Supplementary Estimate). HILLAH FIGHTING (MANCHESTER REGIMENT). AFGHAN WAR (HONOURS LIST.) (October 19.)

BRITISH ARMY: Officers (Mesopotamia).—Passages (India). (October 29.)

## THE Y.M.C.A. IN THE SUDAN.

The opportunities for Y.M.C.A. work in the Sudan are described in a report by Mr. F. W. Coffey, who has lately returned from a visit to that country. At Khartoum the Y.M.C.A. is already at work in the barracks among the 500 British soldiers quartered there, and has also a town centre in the gardens. For the troops at Atbara the association has a delightful bungalow in the gardens, placed at its disposal by the Sudan Government Railways, and staffed by a committee of six or seven Englishmen who render voluntary service. At Gebeit, the hill station for the troops in the Red Sea provinces, 1,600 feet above sea-level, the only permanent building in the camp is occupied by the Y.M.C.A. While at Port Sudan, where Y.M.C.A. work has ceased, the British residents are prepared to form a committee and carry on work for British soldiers and sailors, as well as for civilians, if the association will back them up. There is, however, urgent need for work of a special kind to be undertaken by the Y.M.C.A. in the Sudan on behalf of scattered groups of Englishmen in lonely oases, engaged on administrative work or in industrial enterprises. If the Y.M.C.A. can provide a secretary to visit these centres regularly, with a portable cinema, books, papers, etc., the Sudan Government will gladly give him a free pass on all its railways; and a Y.M.C.A. hostel in Khartoum, where these men from the oases could come for an occasional rest, would also be a great boon to the whole of the Sudan.

## CHESS.

The winter season will not be in full swing until the middle of this month. The City tournaments are, however, well advanced, and there have already been the usual surprises in the championship, but so far all the chief favourites are to the fore. Sir George Thomas, who is playing very well, has so far won all his games, and he is expected to keep the title, though he will no doubt encounter strong opposition in the final from Mr. R. H. V. Scott and others.

I understand that about a dozen entries have been received for the Metropolitan championship, including Sir George Thomas, the holder, and Mr. R. H. V. Scott. It is, however, uncertain at the moment whether Sir George will be able to take part in this competition.

I give this week another of the series of consultation games played recently at the City of London Chess Club.

Position after White's 15th move, Kt—K5.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The lack of transport facilities, as is well known, has constituted one of the main obstacles to rapid reconstruction in the Near East. The acquisition by a British syndicate of shipping interests marked an important contribution to the solution of these difficulties, but it has long been recognised that this step, while extremely helpful, did not go far enough, and for some time negotiations have been in progress for the concession for a term of years of the control of railways in certain countries touching the Danube. Such a development would have an enormous influence in promoting the rapid recovery of the states in question, but the matter is not one that lends itself so readily to arrangement as the Danube shipping deal, and, while unbounded optimism would appear to obtain in certain circles regarding the imminence of interesting developments, I find it somewhat difficult to share it, much as one would like it to be true.

***

Elsewhere in these columns will be found an important interview with Mr. Attfield, head of the Export Credit Department of the Board of Trade, in which he explains the advantages that may be expected to accrue from the adequate utilisation of this scheme. Everyone recognises that only by the arrangement of credits can trade be developed with certain of the Near Eastern countries in present conditions. Traders have, however, shown, until recently, extreme shyness in making use of the Government scheme. Two things would appear to have brought about their changed attitude which has led to what Mr. Attfield describes as a "rush of applications" during the last few days. In the first place, there has been the modification in the scheme whereby advances are now increased to 100 per cent. But in Mr. Attfield's view the most powerful reason has been the development of general trade depression. He points out that, while there was the enormous home demand, traders preferred meeting it to entering overseas markets, where conditions were less favourable. Now they are forced to find markets by the stress of circumstances.

***

The advantages of this scheme from the point of view of the British trader are obvious. It enables them to export freely to markets that would otherwise be closed to them. But, as Mr. Attfield shows, the scheme is of enormous importance to the importing countries. Besides assisting them to obtain goods which they could otherwise only purchase by buying foreign exchange at a heavy loss, it is bound to exercise a favourable influence on the course of their exchanges, since by the postponement of payments the influence of exports in bringing about a rise in the exchanges will be permitted to go on unchecked, since there will be no immediate necessity to purchase foreign currency. In this connection Mr. Attfield rightly lays great stress on the great potential resources of the Near Eastern countries. "These countries, especially Roumania and Bulgaria," he points out, "are normally able to export great quantities of grain and other products. Once the stream of exports begins to flow in its accustomed volume the financial position will be revolutionised." That is the all-important fact, and one which I have constantly emphasised in these columns. But it has been uphill work to persuade the British trader with his eye on the exchanges that it is not always the case that figures talk.

***

One aspect of the scheme touched on by Mr. Attfield is the question of the early liquidation of transactions. As my readers are aware, security has to be deposited in a bank in the importing country, and has to be kept on an equality with the advance made in sterling at this end. Now Mr. Attfield, taking the case of Roumania, argues that if the exchange improves to 150 lei the tendency will be to close the transaction at once, seeing that the sterling required for payment can then be obtained at so much lower a rate. But it seems to me that it is much more probable—or shall we say that it is at least possible since the nature of the human race is towards optimism in these matters?—that rather than close the transaction the natural impulse will be to wait in the hope that, as there has already been such a rise in the lei, only a little more patience is required for the arrival of a really favourable moment for closing the transaction. I have discussed this aspect with one or two authorities, and their views more or less coincide with mine. Of course, there is another factor to be borne in mind, and that is the fear that an adverse movement may succeed a rise in the exchange, and I imagine that if things turn out as Mr. Attfield suggests, it will be solely on this account.

***

The question of the construction of a new railway in the Sudan to serve the Kassala district was discussed last week by Lancashire members of the House of Commons. The district in question offers exceptional opportunities for the extension of cotton cultivation; but developments in that direction depend on the provision of communications, and the cotton-growing region is some distance from the Port Sudan—Atbara line. Two projects are in view—the one a line from Kassala to Thamian, a length of 250 miles; the other a line from Kassala to Atbara, a distance of about 230 miles. A glance at the map will show that the former scheme is to be preferred, as it affords more direct communication with Port Sudan. The terrain offers no undue obstacles to the construction of this line, the estimated cost of which is between one and two million pounds.

***

It is understood that if a sub-committee of the Lancashire members appointed to consider the project presents a favourable report, efforts will be made to enlist the support of the Government in regard to raising a loan on favourable terms. It may be noted that the advantages of this development are dwelt on in the recently issued Blue Book on Egypt, in which it is stated that "if the railway to Kassala could be built, there is every reason to believe that some 200,000 acres of land suitable for cotton cultivation in the Gash Delta could be cheaply developed in a comparatively short space of time. This railway would have to be extended southwards, so as to tap the areas suitable for the cultivation of rain-grown cotton."

***

The interesting announcement was made last week of a further extension of the activities of the Anglo-Persian Oil Company, which is associated with a French group headed by Sir Basil Zaharoff in the formation of a French oil company with a capital of 100 million francs to assure to our Ally adequate oil supplies. An extensive organisation has already been established, and suitable sites have been acquired in the principal French ports for the erection of large storage tanks. Besides this main company several other companies are to be formed to work a fleet of tankers. The Anglo-Persian Oil Company is to subscribe for 45 per cent. of the capital of the various companies, the balance being reserved for purely French interests. The board of the importing company will include Sir Charles Greenway, Sir Basil Zaharoff, and Admiral Ronarch. The arrangement which arises out of the Anglo-French Agreement arrived at last March at San Remo marks a further stage in the association of French and British economic interests. From the point of view of the Anglo-Persian Oil Company the enterprise is of special importance because the company will thereby be provided with a new outlet for its output of oil.

(Reports from Our Own Correspondents.)

## ROUMANIA.

Bucharest, October 15.

### Merchants and Trade Restrictions.

A meeting of merchants and business men has recently been held at Bucharest for the purpose of discussing the various restrictions on the development of trade and commerce which the Government is imposing by unnecessary and heavy taxation, permits, and regulations. A resolution was passed calling on the Government to put a stop to this, and to allow the free intercourse of legitimate trade between individuals and other countries, and in this way to create healthy competition for the ultimate good and prosperity of the country.

### Bessarabian Roubles.

The Government have decided to revise the rate of exchange of the Bessarabian rouble, but only in cases where the owners are living in Bessarabia, and provided that not more than 60,000 roubles are in the possession of one individual. The revised rates for the Lvoff rouble are graded as follows according to the possession of the following amounts:—1-5,000 roubles one lei, 5-15,000 roubles 0.80 lei, 15-30,000 roubles 0.60 lei, 30-60,000 roubles 0.40 lei. For the possession of more than 60,000 roubles the exchange will be as previously established: that is, 30 bani for the Lvoff rouble and one lei for the Romanoff rouble. The rates of exchange for the Romanoff rouble are as follows:—1-5,000 roubles 1.35 lei, 5-1,500 roubles 1.30 lei, 15-30,000 roubles 1.20 lei, 30-60,000 roubles 1.10 lei. The rate of exchange for all institutions under State control, and churches, co-operative societies, etc., will be one lei for the Lvoff rouble and 1.35 lei for the Romanoff rouble. This only applies to institutions situated in Bessarabia.

### Petrosani Coal Company.

The well-known coal mine of Petrosani, formerly the property of the Hungarian Bank of Commerce of Budapest, and of the Salgo-Torjan Company, Budapest, has been formed into a Roumanian joint stock company, with a capital of 100,000,000 lei. The name of the company is the "Petrosani," and its object will be the further exploitation of the coal from that district. Fifty per cent. of the capital will be held by the old proprietors, while the remainder will be divided amongst the following Roumanian banks:—Banca Romaneasca, Banca Agricola, Banca Natiunei, Banca de Scont, Banca Taraneasca, Creditul Extern, Banca de Credit, Banca Generala à Tarei Romanesti, Banca Commerciala Romana, Banca Chrissoveloni, Banca Comertului, Banca Viticola, Banca Bercovici, Banca Creditul Minier, Banca Creditul Technic, Banca Centrala din Cluj, Industria Ardealului, and Creditul Technic Transylvanian. The board of directors will consist of twenty-one persons, of whom eleven will be Roumanian.

### Miscellaneous.

The lei has again depreciated, and the pound has gone up to 190-195, which has resulted in a general rise in prices. These are now about double what they were last autumn.

The Government is preparing a new list of duty and import taxes, which will shortly come into force.

## YUGOSLAVIA.

Belgrade, October 26.

### Revenue Increasing.

The General Directorate of Indirect Taxation announces that the revenue from stamp duties and taxes and fees for the month of September amounted to 9,325,840 dinars, which is a million more than the previous month. From the beginning of the financial year, that is, since July 1, to the end of September, the total receipts from these sources are 31,873,410 dinars, or three times as much as for the corresponding period of 1919, and twice as great as the estimate.

### Withdrawal of Tax on Turnover.

The ill-fated tax on turnover, which caused so much perturbation in commercial circles, has so quickly proved to be unworkable that the Minister of Finance has withdrawn it. It was pointed out to him that it was unfair and would produce little results in proportion to the immense disadvantages. The Minister was surprised by the storm of protests on all sides, and invited a deputation of merchants, manufacturers and tradesmen to consult with him. They had little difficulty in persuading him that it was an unsatisfactory measure, which would harm all branches of the community, and he agreed to substitute a different proposition. The tax was to be 3 per cent. on the sale of luxuries and 1 per cent. on all other articles; it was to come into force immediately, and many traders found themselves suddenly called upon to find substantial sums of cash to pay down on their stock-in-trade.

### New Taxes.

The deputation suggested to the Minister a different means of raising funds, namely, a 10 per cent. *ad valorem* additional customs duty, and on goods for export and home sale an excise duty of 2 per cent. on the turnover. The Minister accepted this, and it is now put forward in the following form: 1. The prohibition on the importation of luxuries is removed and an additional 10 per cent. *ad valorem* customs duty imposed. 2. An additional ½ per cent. is added to the export duties. 3. The former duty is re-imposed on goods which have recently been free of import duty. 4. The former export duty is re-imposed on goods which have recently been exempt, but only to the extent of one-half the former duty. 5. On goods already imported into the country a turnover tax is imposed of 2 per cent. *ad valorem*, raised to 10 per cent. in the case of luxuries. 6. A tax of 1 per cent. is to be levied on the sale of cattle and horses. 7. Contractors will pay 1 per cent. on the amount of their contracts. 8. Dealers in local produce and manufactures, mixed shops and workshops will pay the same amount as the direct tax upon such institutions. 9. Financial institutions will pay 2 per cent. on their gross revenue. 10. Manufacturers will pay 1 per cent. *ad valorem* on their products.

The comment of the *Politika* is that this is a good sample of how the finances of a country should not be managed, by ill-considered, hasty enactments, and that now, when the Government is endeavouring to allay the crushing cost of

living, it has taken a step which will inevitably and immediately involve a heavy increase in the price of all goods.

**General News.**

The Minister of Finance has authorised a credit of one million dinars for the purchase of motor-cars and lorries for Montenegro.

It was announced some time ago that an Anglo-French company had made an offer to the Yugoslav Government to erect all new Government buildings in Belgrade within five years, on favourable conditions of payment. The Minister of Public Works has rejected this offer on the ground that the Municipality has not yet published its international competition for the plans for the proposed new lay-out and modernisation of the town.

## BULGARIA.

SOFIA, October 4.

**Reducing Expenditure.**

Yesterday the Budget Committee considered the question of curtailing the expenditure for which provision is made in the new Budget for the police administration, the gendarmerie, and the Labour Board. It was decided that a reduction of 70 per cent. could be achieved.

**Compulsory Internal Loan.**

In order to meet the extraordinary expenditure provided for in the Budget, the Finance Minister has introduced a Bill for a compulsory internal loan for the large sum of two and a half million levas. It is proposed that the loan shall bear 5 per cent. interest, payable half-yearly.

SOFIA, October 21.

**Exports of Cereals to Turkey.**

The Consortium has granted permission for the export of 1,620 tons of flour, wheat and other cereals through Varna and Bourgas to Turkey.

Of last year's crops 1,710 tons of rye, 2,800 tons of barley, 390 tons of oats, and 2,080 tons of millet remain for sale in the stores of the agencies of the Consortium in the Danubian ports.

**Arrival of French Railway Commission.**

Yesterday a commission representing the Paris-Lyons Mediterranean railway arrived here by the Orient Express to study the condition and organisation of the Bulgarian railways.

## CYPRUS.

**Phylloxera Scare.**

NICOSIA, September 30.

From Papho comes an alarming report that phylloxera has appeared in some vineyards of that district. It is to be hoped that the rumour will not be confirmed. Cyprus possesses no expert in vine diseases, and the entomologist of the Agricultural Department, Mr. Solomides, is now in England in connection with his discovery of a locust spray. The Cyprus Government has always taken the strictest measures to ward off the danger of this dreaded vine pest. It has, in fact, carried its measures so far (e.g., by needlessly prohibiting the importation of various seeds) as to evoke protests from the Director of Agriculture against what has been a bar to progress in his Department. There has only once before been a scare of this disease, which proved to be unfounded.

**Good Olive Yield.**

The olive crop, which is abundant, is being gathered. Preparations for winter sowing are being actively pushed forward.

## INDIA'S RICE TRADE.

### Imperial Institute Report.

In dealing with the problem of food supplies in the United Kingdom during the war, much attention was paid to the question of increasing the supplies of rice from British countries. In this connection the reports on the rice trade of India in relation to the rice resources of the world, recently published by Mr. John Murray (6s. net.) as the third volume of the reports of the Imperial Institute Indian Trade Enquiry, are a mine of valuable information. The Indian Trade Enquiry was conducted by special committees appointed by the Committee for India of the Imperial Institute, at the instance of the Secretary of State for India, to investigate the possibility of increasing the trade of the United Kingdom and other parts of the Empire in Indian raw materials. In the present volume the results of the enquiries made by the special committee on food-grains with regard to the Indian rice industry are embodied in a report on the trade in Indian rice, to which are appended two further reports on the production and uses of rice and the utilisation of Burmese rice and its by-products, respectively. These latter reports comprise summaries of information prepared at the Imperial Institute for the committee.

In the main report reference is made to the two branches of the world's rice trade, viz., the far Eastern branch, requiring a cheap rice for feeding the native population; and the Western branch, requiring large quantities of a medium quality rice and smaller quantities of a high quality product. The sources of supply of these markets are referred to, and sections are devoted to the following subjects: the world's trade in rice; the rice trade of India with the British Empire and with the Continent; imports, exports and home consumption of rice in European countries and the United States; the comparative cost of handling, milling and transporting rice in the United Kingdom and on the Continent. The industrial uses of rice are also dealt with, and a series of statistical tables form an appendix to the report.

In 1913 India (chiefly Burma), Siam, and Indo-China together contributed 94 per cent. of the world's exported surplus of rice (including paddy, i.e., unhusked rice), the amount of the Indian exports roughly equalling those from Indo-China and Siam combined. The total Indian export (2,450,000 tons) is approximately equivalent to the total requirements of the British Empire from the three chief exporting countries. From the point of view of a self-supporting Empire, therefore, it would appear possible for India to become the sole source of supply of rice to the Empire.

Among the recommendations made are suggestions for modifications in the headings of rice exports in the official Indian trade returns, with a view to tracing the development of the important rice milling industry of India. Since the report was made alterations on the lines suggested have been made in the Indian trade returns. Certain changes in the headings of the rice exports in the trade returns of the United Kingdom are also suggested. The Committee also make recommendations for the regulation of foreign interests on the Indian rice trade, and the reconsideration of port charges and railway rates which at present constitute a severe handicap on the British rice trade in competition with the Continent.

Mr. H. A. Reed, chief engineer of the Manchester Ship Canal Company, has been appointed a member of the International Consultative Works Commission of the Suez Canal.

Patrons
Their MAJESTIES THE KING AND QUEEN
and HER MAJESTY QUEEN ALEXANDRA.
Chairman: LT.-COL. A. GRUBB, J.P.
Vice-Chairman—SURGEON-GEN. SIR WILLIAM TAYLOR, K.C.B.

Daughters of Officers of the Army are admitted to the above Schools according to the circumstances of their parents, at rates of £20, £45, £65, and £80 a year. Granddaughters of Officers are admitted at £45, £65, and £80 a year according to circumstances, and a limited number of daughters of civilians are admitted at £120 a year when there are vacancies. There are 15 Scholarships, open to competition, in the School, of amounts varying from £10 to £20 up to one of £50.

As half of the School consists of pupils on the £15 foundation, which includes both board and education, a deficiency of about £2,500 a year has to be met by contributions, which are earnestly solicited. Donations of £5 5s., giving one vote for life, or subscriptions of 10s 6d., giving one vote for the year, may be sent to

F. W. T. ATTREE, COLONEL (late R.E.), Secretary.
Office: Panton House, 25, Haymarket, S.W.1.

# TRADE IN PALESTINE.

## FIELD FOR BRITISH ENTERPRISE.

**By Estelle Blyth.**

The Government of Palestine have issued an important statement, giving in detail the trade statistics of the Department of Customs for the financial year ending March 31, 1920. It is the first complete return yet issued showing the position of Palestine in the world's trade, and is important as it reveals the vast possibilities now open to British manufacturers in a country which is being stabilised by the formation of an orderly and responsible Government.

British traders do not yet fully realise the tremendous importance of Palestine in the world of trade, both on account of its natural resources and capabilities, and its position on the map. Palestine must be regarded as an emporium for the large import trade for Trans-Jordania and the Hauran, where extensive fields of grain (chiefly wheat and barley) form the wealth of a region as large as France. British manufacturers are fortunate in having the Haifa-Damacus Railway at their disposal for the opening up of trade with this region, and their utilisation of this line should give them a great advantage over their French competitors, who use the Beyrout-Riyak-Damascus line, and labour under the serious disadvantage that there is a narrow gauge as far as Riyak, but there a change is made to a different gauge, more suitable for heavy traffic, increasing the freight charges and involving the possibility of damage to consignments. The Haifa-Damascus line is really one of the main trade arteries of Palestine, whose importance will be immeasurably increased by the completion of the new harbour at Haifa; and it is the duty of British firms to keep a steady trade flowing through it.

The imports for the year amounted to £E4,191.060, and the exports to £E773,443. These figures include the transit trade to Damascus, but exclude the imports from, and exports to, Beyrout from Jaffa and Haifa. The imports from Beyrout amounted to £E282.000, and the exports to £E493,694. It will thus be seen that the total imports are valued at £E4,473,060, and the exports at £E1,267,137. It may be observed that under military occupation there was free intercourse overland between the French, Arab, and British zones, hence there are no figures available which give any indication of the large and growing traffic from Palestine into the interior, which is mainly carried on by road. The disparity between the figures of exports and imports is due to the total prohibition imposed by the British Army upon the export of cereals, for which Palestine, in pre-war days, was famous; wheat, barley, and durra, which form the country's main agricultural products, were formerly exported in large quantities to England, Egypt, and Italy. The world shortage of cereals and the bad harvests of 1919 compelled the military administration to conserve for Palestine the whole of its available supplies. The past year has also seen disturbances in Syria and Damascus which affected the transit trade and caused a serious drop in credit. These adverse conditions, however, may be considered as temporary, and the excellent harvest of this year (which shows an average increase of, approximately, 65 per cent.), combined with the great improvement in communications, should go far to restore the trade balance. The commencement of harbour works at Haifa, the near revision of the *ad valorem* custom tariff to meet the immediate needs of the country, and the establishment of agricultural credit banks, are further indications of commercial and industrial progress and stability which should not be underestimated.

The principal importing countries are Great Britain, Egypt and France, while Great Britain and Egypt absorb the majority of the exports. The following table shows the amount of trade to and from these countries:—

| Country. | Imports. | Exports. |
|---|---|---|
| Great Britain ..... | £E1,204.682 ..... | £E92.059 |
| Egypt ..... | £E997,433 ..... | £E546.759 |
| France ..... | £E115.257 ..... | £E20,483 |

Cotton fabrics stand first on the list of imports, valued at £E1,006,281, followed by sugar, £E419,728; rice, £E171.721; and petroleum, £E170,658. The exports are chiefly confined to oranges, soap, and wine, the first (valued at £E161.104) being exported to Great Britain and Egypt.

It is a difficult matter to make any comparison between present and pre-war trade figures as the Turkish statistics were very inaccurate and misleading. The import figures for Jaffa for 1913 were £E1,312,695, as compared with £E1,408,238, to which must be added the figures for Jerusalem and Ludd, at which customs houses did not exist in 1913, the railway now necessitating this advance. The total import trade, therefore, for the Jaffa-Jerusalem area was £E2,365,617. In 1913, the exports from Jaffa amounted to £E745,413, while during the year under review the total exports from the Jaffa-Jerusalem area amounted to £E359,000. It will thus be seen that there is a considerable leeway to make up as regards exports.

Jaffa has maintained its position as the leading port in Palestine, the total tonnage for 1919-1920 being 283,137 tons, as compared with Haifa's 190,892 tons. Haifa is a transit port. It is the junction for Kantarah-Damascus Railway, and will be a port of very considerable importance when the projected harbour works are completed. It stands in the same relation to Jaffa as Amsterdam does to Rotterdam.

### Goods in Demand.

British manufacturers have now an immense opportunity of extending their trade in Palestine. The country is showing unexampled prosperity, and the Trans-Jordania area is known to be plentifully supplied with gold as a result of the liberal employment of our Arab allies under the military direction of Great Britain during the war. There is a great shortage of building material, on which the import dues have been lowered from 11 per cent. *ad valorem* to 3 per cent. Agricultural machinery and implements, and chemical manures are required in large quantities, and may be imported free of customs duties; also iron bedsteads, crockery, hardware, clothing, timber, furniture, and fuel of all descriptions. There are, also, good markets for salted fish, tinned foodstuffs, and potatoes. In pre-war days Cornish fish, salted, was exported to Italy for the great fasts, and (though reliable figures are not available) it is not improbable that the surplus found its belated and unsavoury way into Palestine for the Russian pilgrims' use in Lent. The suggestion is, perhaps, worth while that this small item of British trade could be doubled in quantity and sent direct to Palestine. Again, is there no stimulus to Canadian and Australian enterprise in the fact that Palestine can absorb as much timber, jam, and wool as it can get?

The shipping returns for the period under review reveal the fact that Italian shipping companies are making a great bid for freightage. While Great Britain is credited with 109 vessels of a tonnage of 123,288, Italy has 100 vessels with a tonnage of 176,662. France is a poor third with 77 ships of 72,230 tons.

It is a cause of frequent complaint among merchants that they are unable to obtain British ships to take consignments to and from British ports, and it would appear that there is some justice in this contention in view of the fact that this country provides 56 per cent. of the seaborne import trade. British traders are using Alexandria as a port of transhipment, when direct shipment to Palestine, even at long intervals, would be an incalculable boon to our trading and political interests.

It is not possible to close this review without congratulating the Palestine authorities on the very detailed statistics they have provided, which should go far towards demonstrating the possibilities of Palestine as a fertile field for British enterprise. Nor should it ever be forgotten that the amazing recovery of Palestine is due, first and last, to that splendid, self-effacing band of Englishmen—soldiers all—who, even before the country was wholly free, addressed themselves to the tremendous task of restoration and reconstruction. On the solid foundations of order, law, and confidence laid by the military occupation, the Civil Administration in Palestine can build in security and hopefulness.

# THE EXPORT CREDITS SCHEME.

## GROWING DEMAND FOR ADVANCES.

It is a highly anomalous position, and one that in less serious circumstances would be amusing, that while some British business men have been explaining that one of the main reasons why they cannot undertake trade with the Near East is because of the difficulty in obtaining payment owing to the adverse exchanges, the export credits scheme devised to cope with this problem has been until recently almost neglected. The scheme as drawn up may not have been perfect, but at least it provides a thoroughly sound and workmanlike method of assisting the exporter, and it is generally recognised that it offers a more practical solution than that recommended by the Brussels Financial Conference many months after the British scheme had been inaugurated. Now that the main defect in the scheme has been overcome by an increase in advances to the exporter from 80 to 100 per cent., with recourse to the exporter in respect of the additional 20 per cent., the scheme has suddenly come into universal favour, and in the last few days it is stated that applications have been received for very large advances.

In an interview with a representative of THE NEAR EAST, Mr. Attfield, head of the Export Credits Department, outlined the advantages of the scheme as regards trade with Bulgaria, Roumania, Yugoslavia, Czecho-Slovakia, and other countries which is at present hampered by the adverse exchanges. "Broadly speaking," he pointed out, "it will counteract the exchanges by postponing payments. Without the assistance afforded by this scheme, the exporter, more often than not, would find it impossible to obtain the necessary financial assistance, however sound the character of the business he proposes to undertake. At present the high rates of exchange entail long credit, and banks are extremely averse to transactions of this kind when ready at hand they have a wealth of profitable investments from which to choose. Of course, in some cases the buyers must have the goods at any cost, and to obtain them they purchase sterling at a great price. Every time this is done the exchange falls. Now the adequate utilisation of the export credits scheme means not merely the development of commerce, but also indirect assistance to the countries with which the trade is being carried on by the removal of one factor adversely affecting the exchanges."

Mr. Attfield went on to describe the working of the scheme. "The position is that, if we make an advance to an exporter, we require from him some guarantee from a bank in the importing country that the required security will be deposited, and that its value will be maintained on an equality with the amount of sterling which we pay over here. If the exchange improves we are obviously so much the better off. I am personally in favour of taking a banker's guarantee absolute; that is to say, that the banker will guarantee due payment of the bill in sterling. I consider that by that means we are ensuring earlier liquidation. Assume that in a transaction with Roumania security to the value of 200.000 lei was provided at the present rate, and that the exchange by reason of something or other rises to 150 lei. My idea is that the bank will then insist on the transaction being closed. Moreover, it is to the importer's advantage that he should close it, because he can obtain the sterling required for far less than the amount of his deposit of security. That is why I think that this scheme will generally work out satisfactorily. I might add that in order to afford every facility to exporters we give what is known as provisional sanction before any man signs a contract. The effect of that is that he is insured beforehand that his business will be financed. He has thus in effect an irrevocable confirmed credit."

Insistence was laid by Mr. Attfield that all that the countries with which the scheme deals required was time to develop their great potential resources. "That we may hope the scheme will provide, if only British traders make adequate use of it. And of that there would seem little doubt judging by the great development of interest in it during the last few days. These countries—especially Roumania and Bulgaria—are normally able to export great quantities of grain and other products. Once the stream of exports begins to flow in its accustomed volume the financial position will be revolutionised. A fact which must be emphasised is that the United Kingdom needs the resources of these countries. It is because we are unable to obtain them now that we have high prices. It seems to me that the scheme is going to assist trade in every way. We shall alleviate the extent of the unemployment here, and we shall assist in bringing over those things we must have for our manufactures."

In conclusion, Mr. Attfield dealt with the attitude of British traders to the scheme up to its sudden rise to popularity. "One of the principal reasons why the response was disappointing was probably," he said, "simply because merchants had too much to do in other directions. Traders as a whole are very human in their preference for the easier way, and at home they were faced with an enormous and apparently insatiable demand. And so they contented themselves with meeting it, and ignored for the most part the overseas markets. But the period when orders could be booked for many months in advance has passed, and its place has been taken by a very general trade depression. And now traders have to solve the problem of finding markets, hence, in my view, the rush of applications for advances."

## INCOME-TAX RELIEF TO RESIDENTS ABROAD.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The very great change made in the income-tax liability of many residents abroad does not seem to be as widely known as it should be. Prior to April last all but a small number of privileged non-residents (such as Crown servants, missionaries, etc.) had to pay full tax on all British income with no allowance whatever.

This is now changed, so far, at least as *British subjects* are concerned. Any British subject is entitled to precisely the same reliefs, family and other allowances, etc., whether he resides in the United Kingdom or anywhere abroad, subject only to the very reasonable condition that he should not be better off in that respect through his foreign residence. Accordingly he has to aggregate all his income, British and foreign, and to calculate what the average British tax would be on such an income, after deducting his appropriate allowances. This average rate he must bear on that portion of his income which is subject to British tax, but anything paid beyond that he has the right to reclaim.

Apparently, too, all non-residents, whether British subjects or not, are entitled to Dominion tax relief, as well as exemption on foreign and colonial securities and most war loan, but otherwise *foreign* non-residents (except those above referred to) have to pay the full rate of British tax with no allowances.—Yours faithfully,

CHAS. H. TOLLEY.

107, Tierney Road, Streatham Hill, S.W.,
October 27.

A report from the Geological Survey of India has been received by the Imperial Mineral Resources Bureau stating that 40,049.1 ozs. of gold, valued at Rs.2,078,458, were extracted from the mines in India during the month of July, 1920.

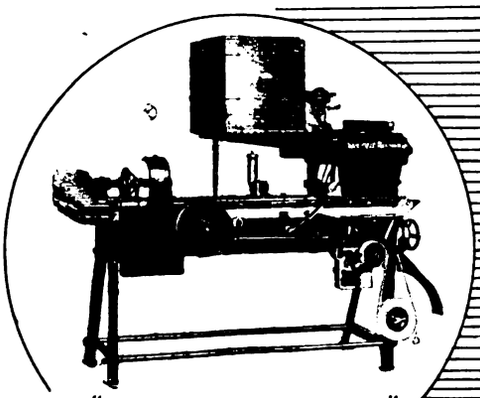
# "STANDARD" TOBACCO MACHINERY

**Every Description of Automatic Mechanical Equipment for the TOBACCO INDUSTRY.**

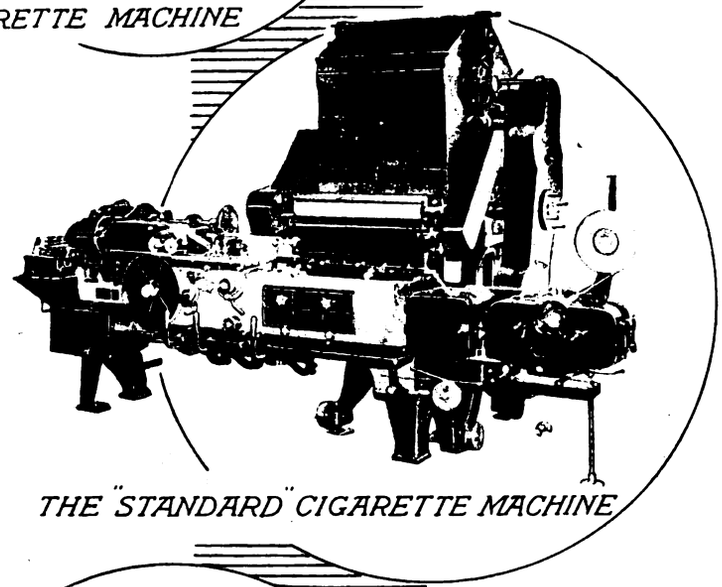


*THE "STANDARD-JUNIOR" CIGARETTE MACHINE*

## THE "STANDARD-JUNIOR" CIGARETTE MACHINE

Is the ideal model for small manufacturers. Although low in price, it is a highly developed apparatus capable of the utmost perfection of output up to 7,500 Cigarettes per hour and requires only two attendants of ordinary intelligence to operate.

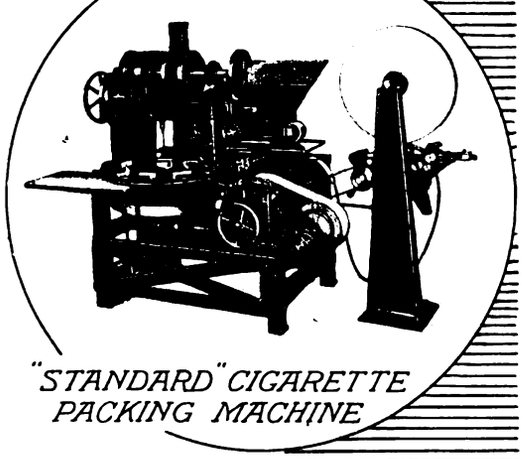
Compare this with the cost of producing Cigarettes by hand or with obsolete inefficient machines.



*THE "STANDARD" CIGARETTE MACHINE*

## THE "STANDARD" CIGARETTE MACHINE

embodies every conceivable practical refinement for the production of Cigarettes upon a commercial basis, i.e., on a large scale with manufacturing costs brought to the irreducible minimum. It is capable of a higher consistent output of faultlessly made Cigarettes than any other machine existing, and is exclusively adopted in the largest factories throughout the World.



*"STANDARD" CIGARETTE PACKING MACHINE*

## "STANDARD" CIGARETTE PACKING MACHINES.

No Cigarette Factory is up-to-date without the most modern and efficient Packing Machinery, viz., the "STANDARD." These machines can be adapted for packing Cigarettes of any predetermined size and quantity in either paper "cups" or cardboard "shell and slide" packets, after wrapping them automatically in paper or tin foil or both.

## ENGINEERING.

### The Motor Show.

Opening on Friday, November 5, the fourteenth annual Motor Exhibition will be held, but this time, owing to the great increase in the number of firms wishing to exhibit and the exceptionally large number of models that will be shown, it has been necessary to sub-divide it into two concurrent shows, the one at Olympia and the other at the White City, Shepherd's Bush. This year the show will be, consequently, on an unexampled scale, and will be of unusual interest to the general public, to engineers as a class, and to the motor industry as a whole. In order to avoid any misapprehension it must be stated here that the two shows are treated as one, the same ticket admitting to both sections. The ticket, further, includes the provision of facilities by special motor transport of getting from one show to the other.

As a foreword to this gigantic show, which will be dealt with fairly fully in succeeding issues, it may be said that approximately one hundred different makes of car will be on show at Olympia, with a further seventy odd at the White City. In addition to all these, there will be the usual stands devoted to components, accessories, clothing, and motor sundries. There are also some fifty carriage-building firms, and as each car exhibit will average a chassis and two or three complete cars, it may be taken that several hundreds of different types, models, and sizes of cars will be on view. The executive have acted wisely in dividing the show, as otherwise it would have been impossible for the firms interested to have exhibited or for the public to have inspected the various cars. Even as it is, I have no hesitation in prophesying a crush at Olympia, although I am not at all certain that the attendance at the White City will be up to the mark

I have been asked to make a further point clear in connection with the show. It will be almost if not quite impossible for anyone to inspect both sections of the exhibition thoroughly on the same day. In order to meet this side of the business the committee have arranged that the second half of the double ticket may be used at whichever section had not been visited first on any other day of the week when the entrance fee is not greater. No single price of admission to either show separately has been arranged. Tickets are to be five shillings each, with the exception of the two Saturdays, on which they will be half-a-crown, and on Thursday, November 11, when the price of admission will be ten shillings.

### Electrolytic Zinc.

During the past few years much more attention has been given to the subject of electrolytic zinc by British chemists and metallurgists than is usually imagined, and, as a result of the experiments made and the investigations carried out, it may be stated with confidence that British electrolytic zinc is now an economic proposition. For over four years exhaustive research work has been carried out in Swansea, and in the later stages, in a plant capable of dealing with one and a-half tons of material per day, over 120 tons of metal have been produced. This was sold for much higher prices than were commanded by ordinary spelter by reason of the extreme purity of the product. It has now been demonstrated beyond doubt that electrolytic zinc can be obtained commercially from even the complex zinc ores obtainable in this country, and that the process can be carried out far more quickly, efficiently, and cheaply than can the distillation process.

It may be pointed out, briefly, that the outstanding advantages of the electrolytic method are, first, the high purity of the product, which ranges up to 99.95 per cent. zinc; and, secondly, the high recovery. Another point in which this method scores heavily is that the ore throughout all stages can be handled almost entirely by mechanical means, from ore to ingot. This cuts out the excessive labour cost, which has now reached such heights. A further point is that it is possible to deal electrolytically with a large quantity of British ore, which, by reason of its composition, could not be dealt with properly by distillation. The electrolytic method, in short, now ensures an established home production of a metal which is so largely used in the galvanising industry, and which may take the place of brass or copper, as it has already done in Germany, in the manufacture of a number of articles in fairly general use.

### Iron and Steel Production.

The position in the iron and steel trades is being keenly watched by British producers, and the working arrangement which seems to exist between American and German steel works and between French, Italian, and Spanish iron founders seems not without interest. For some time there has been something closely approaching an understanding between the German and American steel firms, and now French capitalists have secured a large interest in some of the bigger German undertakings, and so complicated the position. These French firms had already a connection with other Continental producers, and the latest development is that an agreement has been made with Scandinavian interests for ore supplies. Huge supplies of iron and steel plates, girders, sections, and angles are being made in America and sent to Germany for use in building up the German mercantile marine; a big New York bank is said to be financing the scheme, and the American petroleum interests have more than a little connection with the combine, if such it can be called. There seems to be a complete chain now running through the new and old worlds, built up of links consisting of American ventures, Continental iron and coal mines, ore transporters, iron works and blast furnaces, steel works, and rolling mills, right through engineering and shipbuilding work, up to actual ship owning. Germany is supplying the brains, whilst America and France are finding the capital, but in all this there appears one factor the importance of which cannot be over-estimated. Although the French have secured the Lorraine, have vast iron reserves, and possess a keen desire to build up a vast and wide-reaching steel industry, they are short of ordinary labour, have little skilled labour, have poor transport facilities, and are wretchedly equipped so far as modern steel making plant is concerned. To-day they are straining their resources to the utmost, and are employing a large body of Lorraine workmen who before the war were in German employ, and yet are only able to turn out half the quantity that they did in 1913. In this connection also it must be remembered that no cheap Polish or Italian labour is now available.

### The Austin "Twenty."

The Austin "Twenty," one of the most popular models of the year in the motor world, will, I understand, remain practically unaltered in design, although a number of valuable improvements have been made in certain details. From a user's point of view one of the most important announcements is that there will be no increase of price, a fact due to the mass production policy of the Austin Motor Co. The car has been on the road for about a year and a-half, and has shown its value under every possible condition. The excellent reports received by the company from Australia, New Zealand, South Africa, and India bear out the expressed opinion of every user in Great Britain, and the design may therefore be considered to have proved its value in every way. Anyone who has driven an Austin "Twenty" will readily admit that nothing better can be desired so far as engine efficiency, ease of control, and general poise of the car are concerned. Incidentally, it may be mentioned that the activities of this huge and admirably managed and organised firm are not confined to motor-cars, as the production of the Austin farm tractor, the output of which is about 100 per week, is now becoming an important side of the business.

The output of the "Austin Twenty" motor-car, incidentally, has now grown to such dimensions that the company are seeking to make contracts for the supply of 100 limousine bodies at a time. This makes the fourth type of body for fitting to chassis of this size and design. At present touring, coupé, and landaulette bodies only are fitted, and the chassis is also supplied alone, so that bodies can be fitted to suit the tastes and requirements of individual owners. For use chiefly in connection with Austin service, the makers of the car have published a list of their car agents in the United Kingdom, who now number about 400. The list is intended to be placed in a pocket at the end of the Austin "Twenty" owners' spare-part list, so that the owner can see at a glance the nearest depot where he can obtain Austin service, which, as every road user knows, has now reached a highly organised stage of development. It may be mentioned that the fleet of Austin "Twenty" cars which were originally selected for the Prince of Wales's tour in India, and which consisted of eight touring cars, four coupés, and two landaulettes, will be used by the Duke of Connaught, who is going to open the Imperial Legislative Council in Delhi on December 1.

### The Michelin Wheel.

An interesting competition, for which a first prize of £25 and a number of other prizes down to £5 for the fifth, has been arranged by the Michelin Tyre Co., Limited, in order to give the motoring public an opportunity of testing the merits of the Michelin wheel. The prizes are for the quickest and smartest handling in fitting and detaching this wheel, and I believe there are to be about fifty prizes of £1 and several consolation prizes. This should be an extremely interesting competition, and full particulars, which may be obtained from the Michelin people at 81, Fulham Road, should be written for at once. In case any of my readers decide to "try their luck," I would offer the following hints: Use both hands, as well as your head. Don't try any ladylike methods. Don't forget that seconds can be split into fifths, and finally, if a thing is worth going in for, it's worth while trying to win.

### A Plug Tester.

I have recently had an opportunity of examining and trying a new form of plug tester which is an extremely simple device intended for permanent attachment to each of the sparking plugs of a motor-car or motor-cycle engine. By its aid it is an easy matter to locate any faulty plug that may be giving trouble.

A slight pressure on the insulated knob will bring about an electrical short circuit, thus cutting that particular cylinder out of action. If two or more plugs are cut out at the same time the faulty one can easily be identified and a new one fitted. In that case the plug tester is removed from the old and defective plug and screwed on to the new one at the same time and together with the high-tension cable. One good point about the tester is that it is always in position ready for instant use, and it not only obviates the need for exploring tool-boxes, but takes the place of the good, old-fashioned screwdriver test which has been so frequent a cause of unpleasant sensations. The device is known as the "Duco" plug tester, and I believe it will shortly be obtainable, if it is not obtainable already, from all dealers in motor accessories.

### The Apprenticeship Question.

One of the most hopeful signs in the British engineering industry is the increased recognition of the value of apprenticeship by employers as a class. They recognise fully that the present-day slap-dash and intolerably careless and generally inefficient methods of the average young man who deigns to earn a few pounds a week in a motor-car factory or an engineering shop turning out high-speed engines or lace machines are not to the good of the industry. They are, in fact, bringing or tending to bring British engineering into bad repute abroad, as, no matter how careful or exact supervision may be, it is always possible for one of these imitation mechanics to do something incredibly stupid, or to neglect to take due care, and so create some hidden fault which will only become manifest after the machine or whatever it may be has passed out of the factory. There never was a time in the history of British industry when the average workman did his work so carelessly, so slovenly, so inefficiently as he does to-day, and it would seem that the apprenticeship system, in which the apprentices are drawn from a class which, as a whole, recognises more fully its responsibilities, will prove a great safeguard to British engineering.

It was pointed out recently by a writer under the pseudonym of "Philos" that the American manufacturers were the first to realise that if a sufficient supply of skilled labour was to be available means must be established and a training school formed whereby a constant flow of highly-trained men could be provided. A few British firms rapidly took up the scheme, and to them is due the thanks of the whole industry, for to their zeal and enlightened outlook the movement owes a great deal. In fact, it is due to their example that apprenticeship training has been revived to such an extent in modern works management.

Too much stress cannot be laid on the fact that it is not only a problem of education alone, but that it combines education with sound business principles, and it may be said, without fear of contradiction, that where the apprenticeship system is not proving satisfactory, the fault is not with the system, but is either in the selection of the class of youth to be apprenticed, or in the way in which the training is being carried out.

### Australian Diesels.

It is interesting to note that the Commonwealth Government is seeking to encourage the manufacture of Diesel engines in Australia. In pursuance of this object, a Customs by-law has been approved permitting the free entry into Australia of one Diesel engine to each firm of engineers which agrees to send a specially selected and technically trained engineer to Switzerland to assist in the construction of the engine at the works of the makers, who will train the man in regard to all the special points involved. It is proposed that subsequently these engineers should supervise the building of the Diesels in Australia.

## SHIPPING INTELLIGENCE.

### Forthcoming Sailings.

Anchor Line s.s. Kingsmere, for Bombay, will close for cargo at Birkenhead on November 8.

Anchor Line s.s. Elysia, for Bombay, will close for cargo at Glasgow on November 23 and at Birkenhead on December 1.

Anchor-Brocklebank Line s.s. Mangalore, for Calcutta, will close for cargo at Birkenhead on November 13.

Anchor-Brocklebank Line s.s. Anchoria, for Calcutta, will close for cargo at Birkenhead on November 20.

Bibby Line s.s. Oxfordshire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Liverpool on November 17.

Clan Line s.s. Clan Macmaster, for Bombay and the Persian Gulf, will close for cargo at Manchester on November 12.

Cunard Line s.s. Cypria, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina, will close for cargo at Liverpool on November 13.

Ellerman Line s.s. Student for Port Said, Port Sudan, Aden, and Mombasa, will close for cargo at Glasgow on November 11 and at Birkenhead on November 18.

Ellerman's City Line s.s. Branksome Hall, for Calcutta, will close for cargo at Glasgow on November 8, and at Birkenhead on November 20.

Ellerman's City Line s.s. City of Lahore, for Bombay and Karachi, will close for cargo at Glasgow on November 13 and at Birkenhead on November 26.

Harrison Line s.s. Author, for Calcutta, will close for cargo at Liverpool on November 22.

Henderson Line s.s. Henzada, for Port Said and Rangoon, will close for cargo at Birkenhead on November 10.

Johnston Line s.s. Wingate, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila, will close for cargo at Liverpool on November 6. (Last sailing of the season to the Danube.)

Maindy Line s.s. Maindy Transport, for Moroccan Ports, will close for cargo in London the latter half of November.

Holt and Co.'s s.s. Oanfa, calling at Port Said and Singapore, will close for cargo at Birkenhead on November 6.

P. and O. s.s. China and s.s. Lahore, for Bombay, will close for cargo in London on November 19 and 20 respectively.

P. and O. s.s. Sardinia, for Colombo, Madras, and Calcutta, also taking cargo for Malta, Port Said, and Aden, will close for cargo in London on November 20.

Power Line s.s. Panglourne, for Rabat, Larache, Tangier, Casablanca, Mazagan, Saffi, and Mogador, will close for cargo in London about the middle of November.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has shown signs of improving in the last few days. Poor quality fruit is cheap, but prices are advancing for the better grades, and it may be anticipated that this tendency will continue as the demand expands for the Christmas trade. Fair supplies of sultanas are available, and prices are not unreasonable. Figs have met with a fair demand, and prices have hardened. Why this should be so is not clear, as whatever may be the case with other classes of dried fruit, there is no likelihood of any shortage of supply of figs.

Sugar.—The free market has been quiet. West Indian Crystallised has been done at 85s. to 97s., while American granulated has dropped 2s. to 109s. White Mauritius is quoted at 108s. There has been a good demand for home refined at the official prices.

Coffee.—The position remains much the same. The futures market is easier. Quotations are: December, 56s.; March, 55s.; and May, 54s.

Oilseeds.—Business has improved. Indian linseed has been done at 36s. 10d., while La Plata has come to business at 32s. 3d. Rapeseed is firm, with Toria at 34s., and bold Ferozepore at 33s. Cottonseed is harder. Indian has been done at 13s. 5d., while Egyptian stands at 20s. 3d.

Seed Oils.—With a few exceptions prices have remained practically unchanged. Linseed oil has dropped 1s. to 71s. Refined rape oil is firm at 92s., the crude variety being quoted at 75s. Turpentine is unchanged at 121s.

Oilcakes.—Linseed cake has declined 6d. to 22s. 6d. Cottonseed cake is lower at 13s., but arachis cake remains unchanged at 14s. Other transactions comprise coconut cake at 16s. 9d., and palm kernel meal at 11s. 6d.

### Current Prices.

*General Produce.*—Bacon, 232s. 9d. cwt.; butter, 336s. cwt.; cheese, 172s. 6d. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 7d. lb.; cocoa (Ceylon, good to fine), 125s. cwt.; coffee, Costa Rica 120s. cwt., East India bold 117s. 6d. cwt., Mocha 147s. 6d. cwt., Santos, 68s. 6d. cwt.; currants (Vostizza), 103s. 6d. cwt.; eggs, 40s. per 120; ginger (washed cochin), 63s. 6d. cwt.; hams, 217s. cwt.; lard, 164s. 3d. cwt.; nutmegs, 1s. 1d. per 110's to 180's; pepper (Singapore, black) 6d. lb., and Muntok white 1s. 3¼d. lb.; raisins (Valencia), 139s. 6d. cwt.; rice (Rangoon No. 2), 44s. cwt.; sago (small pearl), 33s. cwt.; sugar (granulated) 112s. cwt., No. 1 cubes 116s. cwt., White Java 110s. 6d. cwt., Mauritius 108s. per cwt.; Sultanas (Smyrna), 142s. cwt.; tapioca (Singapore), 2d. lb.; tea (Indian) 6½d. lb., Ceylon 7d. lb., and Java 4¾d. per lb.; Wheat (Australian) 121s. 6d. qr., English white 94s. qr.

*Metals.*—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard) £91 12s. 6d. ton, electro, wire bars, £103 ton; gold bars, 119s. 6½d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed), 260s. ton; nickel, £230 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £16 15s.. bottle; silver bars, 4s. 4½d. oz.; spelter, £39 1s. 3d. ton; tin, £245 ton; wolfram, 24s. 6d. unit; zinc sheets, £59 10s. ton.

*Chemicals.*—Acids:—Boric 75s. cwt., oxalic 2s. 2½d. lb., citric 3s. 7d. lb., tartaric 2s. 8½d. lb; ammonia (sulphate), £31 1s. 9d. ton; benzole (standard), 3s. 7½d. gallon; bleaching powder (35 per cent.), £27 10s. ton; borax crystals, 41s. cwt.; cream of tartar, 240s. 6d. cwt.; glycerine (crude, 80 per cent.) £105 ton, industrial (1,250 per cent.) £155 ton; lead (red) £56 10s. ton, white dry £63 10s. ton; potassium:—bi-chromate, 1s. 11d. lb., chlorate 10d. lb., caustic £105 ton, nitrate £70 10s. ton, permanganate 3s. 6d. lb., prussiate yellow 1s. 11½d. lb., sulphate 90 per cent.) £34 ton; quinine, 4s. 2d. oz.; sodium:—crystals 190s. ton, bi-carbonate £14 ton, alkali (58 per cent.) £14 ton, chlorate 5¼d. lb., bi-chromate 1s. 3d. lb., caustic (70 per cent.) £33 10s. ton, hypo-commercial £36 ton, prussite 1s. 2¼d. lb., and nitrate £24 5s. ton; sulph. copper £41 ton, and sulph. iron 160s. ton.

*Miscellaneous.*—Cotton (American good midd.) 17 2¾d. lb., Egyptian F.G.F. Sakel 43d. lb.; linseed (La Plata) £30 15s. ton, Indian £36 10s. ton; oils:—linseed £71 ton, soya £69 ton, cotton £52 ton, olive 21s. 6d. gallon, ground nut £79 ton, palm £54 15s. ton, and rape £73 ton; palm kernels £35 5s. ton; petroleum 2s. 3d. gallon; rape (Toria), £32 10s. ton; rubber: plantation No. 1 crepe 1s. 5½d. lb., smoked sheet 1s. 3½d. lb., and fine hard Para 1s. 6d. lb.; turpentine, 121s. cwt.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned:—**

### Egypt.

*(The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.)*

Steamer.—The Director-General, Mechanical Department, Ministry of Public Works, Cairo, invites tenders for the supply of an inspection steamer for the Upper White Nile Division. Specification P.T. 25. December 1.

### Greece

Paper.—The Greek Minister of Finance, Athens, invites tenders for the supply of paper. Specifications, etc., may be seen at the offices of THE NEAR EAST, 1, Devonshire Square, E.C.2. November 16.

## SUDAN PRODUCE.

### Gum.

The C.E.B. report for August states that the exports during the month were 9,802 kilos of bleached of the value of £E564, 386,530 kilos of hashab of the value of £E18,557, and 55,679 kilos of talh of the value of £E1,832, via Port Sudan, and 20,775 kilos of hashab of the value of £E997, and 25,058 kilos of talh of the value of £E801, via Halfa.

Kordofan Province.—1,235 kantars of gum were sold in El Obeid market during August as against 3,336 during the same month last year at an average price of £E1.386 per kantar of 100 rottles. Arrivals from Nahud were 1,286 kantars, as against 2,085 kantars during August last year. No gum was sold at Um Ruaba or Rahad during August, as against 2 kantars sold at the former place during August, 1919.

### Dura.

Blue Nile Province.—Sufficient quantities of dura have been coming into the markets during the month. The price is dropping slightly, but should soon drop considerably further as the 1920 crop becomes assured.

Dongola Province.—The dura crop is now being harvested, and is reported to be good and undamaged by pests. The price of dura has fallen 50 per cent., and is now about PT.9 or 10 per kirat.

Halfa Province.—The price of dura fell from PT.345 to PT.318 per ardeb of 360 rottles (162 kilos).

Kassala Province.—The market prices for dura during the month were as follows: Kassala PT.369 per ardeb of 300 rottles (135 kilos), and Gedaref PT.140 per ardeb of 300 rottles.

Kordofan Province.—173 ardebs of dura and 317 ardebs of dukn were sold in El Obeid market during the month at PT.255 per ardeb of 420 rottles (189 kilos).

### Wheat.

Berber Province.—The average price of wheat during the month was PT.612 per ardeb of 400 rottles (180 kilos).

Dongola Province.—The price of wheat is steady at about PT.19 the kirat.

### Sesame.

Kassala Province.—It is reported that the average price of Sesame at Gedaref was PT.400 per ardeb of 300 rottles (135 kilos).

### Dates.

Dongola Province.—The date crop is just beginning to be harvested, and should be good. Little or no damage has been done by rain. Sufficient quantities of the new crop to affect the price are not yet on the market, the price is now about PT.18 per kirat.

### Livestock, Hides and Skins.

Berber Province.—Only 16 cattle and 726 sheep and goats were sold in Damer market. Prices were abnormally high, cattle averaging £E14 and sheep £E3.400. Meat was correspondingly dear.

Halfa Province.—Three camels, 2,180 cattle, 49 goats, 8,463 sheep, 181 skins and 61 hides were exported via Halfa during the month.

Kassala Province.—109 cattle, 529 sheep and seven goats were exported from Kassala to the interior of the Sudan.

Red Sea Province.—23 sheep and 17 head of cattle were exported via Port Sudan.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable received from the Director-General of Commercial Intelligence, Calcutta, dated October 25:—During the week ended October 16 light to moderate rain fell in places. Prospects of standing crops generally fair, but more rain urgently required everywhere, except in North-Eastern and South-Eastern India. During the week ended October 23 local rain fell in Burma, Assam, Southern India, United Provinces of Agra and Oudh, and Kashmir.

All India first indigo forecast (1920-21) 181,400 acres, 24,600 cwts. (*cf.* last year's forecast of 208,100 acres, 27,300 cwts.) First rice forecast up to October 1, 72,823,000 acres, which is 2 per cent. below revised estimate for corresponding period of previous year.

Bombay cotton market deadlock unchanged. Ready cotton quiet. Fine M.G. Oomra Number 3 Rs.285 spot rate. Piece goods market continues depressed. Calcutta jute market steady with little doing. Hessians steady but quiet, with prices unchanged. Heavy goods steady with little business. No change in bank rates.

Egyptian Markets.—Interim dividend of 5 per cent., less tax., on the ordinary shares on account of the year to December 31, payable November 25.

**CENTRAL BANK OF GREECE**

**Head Office: 12, Aristeides Street, ATHENS.**

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, October 16.

The situation is unchanged. The sales effected for Roumania have relieved the monetary stringency to a certain extent. There is a marked demand for winter goods, such as flannels and woollen fabrics.

Exports.—The exports for the week represent a value of about £T30,000, of which £T15,000 was for carpets and £T10,000 for opium. There were no transactions in wool, silk, or gum tragacanth. All these products are neglected.

Opium.—Twenty-two cases were sold during the week—ten Malatia at £T10 per oke, eight Druggist at £T10.30 per oke, and four fine quality at £T11½.

Mohair.—The arrivals have been 250 bales; sales have been nil. Prices have still further declined, quotations being Ps.95-110 Extra, Ps.80-85 I., Ps. 75 II.

Wool.—130 bales arrived, but there have been no sales. The market is weak, but prices are unchanged.

ALEXANDRETTA.

The report for September states:—The Governor of Aleppo having guaranteed the route from Aleppo to Hamam, some consignments of liquorice have been despatched from Aleppo to Alexandretta. We hope that shortly trade between the two towns will improve. All the same, business can only develop on a considerable scale when Aleppo is in a position to communicate freely with the interior; that is, with Urfa, Diarbekir, Mosul, and Deir-El-Zer. The re-establishment of these communicatons will be still delayed owing to the activities of rebels who infest the country. The local government has issued a proclamation giving the rebels until October 1 to make their submission. After that date French troops will deal rigorously with the bands.

Some consignments of silkworms despatched from Alexandretta and Antioch has given rise to some commercial activity between France and this town. There have also been some transactions in liquorice, which have led to purchases of sterling.

ALEPPO.

The report for August states:—The adverse exchange position continues to exercise a depressing influence on our market. In addition, the interruption of communications with the interior and the present position of this country contribute to the general dullness.

There are large stocks of British manufactures here in excess of local requirements.

---

The annual import of cinematograph films into Greece amounts to 300,000 metres. Hitherto these have been supplied from France, but this source of supply is now largely curtailed, and an opening exists for films from the United Kingdom.

Forty-one British vessels entered the port of Galatz during the first nine months of this year, as against 39 for the whole of 1919.

The exports from Algeria in 1919 amounted in value 1,137,180,000 francs to France, 33,385,000 francs to the United Kingdom, 10,193,000 francs to the United States, and 17,457,000 francs to Holland.

One thousand cases of eggs, each containing 1,414, have arrived in London from Roumania. It is understood that similar quantities will arrive every fortnight.

(Over 80 Branches in the Near East.)

The Bank has been established for over 55 years, and has its own Branches or Agents in every important commercial town in the Near East.

The Offices of the Bank at 26, Throgmorton Street, London, and 25, Pall Mall, Manchester, can now enter into transactions with all the above-mentioned places, subject to British Government regulations and local restrictions where in force.

Manufacturers, Traders and others are invited to correspond with the Bank, where all possible facilities will be afforded for the re-opening of business.

The Bank makes advances upon Bills of Lading and other export documents.

Drafts and telegraphic transfers issued.

Letters of credit granted.

## OIL NOTES AND NEWS.

### Roumanian Oil Wells' Position.

(From Our Own Correspondent.)

Bucharest, October 15.

I am able to give the following particulars regarding the activity of oil wells now being bored in the Roumanian oilfields together with statistics of production as recorded on September 25.

*Moreni District.*—(1) Astro Romana Company: Well 54 at a depth of 170 metres has reached sandy gravel. Well 55 at a depth of 721 metres has reached hard sand. Well 76 at a depth of 542 metres has reached clay. Well 79 at a depth of 593 metres has reached stone. Well 80 at a depth of 128 metres has reached hard clay. The daily production of 17 wells of this company now amounts to 453,000 kilos. (2) Romana Americana Company: Well 76 has reached a depth of 714 metres. Well 79 at a depth of 445 metres has reached plastic clay. Work on Well 114 has been temporarily suspended at a depth of 504 metres. Well 115 at a depth of 768 metres has reached sandstone. The daily production of eight wells now amounts to 449,000 kilos. (3) Concordia Company: Well 6 having been blocked up is now under process of being cleared. (4) Columbia Company: Well 40 at a depth of 640 metres is being prepared for ladling. (5) Steaua Romana Company: One well produces 62,000 kilos per day.

*Bana Moreni District.*—(1) Roumanian Consolidated Oilfields: Well 288 has reached a depth of 26 metres. Well 78, at a depth of 36 metres, had a pipe burst, which is now being repaired. The daily production of four wells is 99,000 kilos. (2) Orion Company: Well 505 produces 1,000 kilos per day. (3) Franco Romana Company: Well 102 produces 7,000 kilos per day. (4) Stavropoleos Moreni Company: Well 2 produces 15,000 kilos per day. (5) Astro Romana Company: Well 58 produces 16,000 kilos per day. (6) Concordia Company: Well 12 produces 8,000 kilos per day. (7) Jean Goldfield: Well 2 produces 200 kilos per day. (8) Steaua Romana: Well 11 produces 9,000 kilos per day. Well 13 while being ladled had to be stopped, owing to the lack of electric motive power.

## NEW COMPANIES.

### Egyptian Oil Industries.

The Egyptian Oil Industries, Limited, has been registered with a capital of £400,000 in £1 shares. The objects are to cultivate all kinds of seed for the production of oil; to manufacture and deal in all kinds of seeds, oils, and fats in Egypt and elsewhere; to acquire and work oil wells and oil-bearing deposits of all kinds; and to adopt an agreement with Ilia Paenson. First directors:—B. Barki, 63, Avenue Victor Hugo, Paris; A. Arcache, Ramleh, Bacos, Alexandria, Egypt; C. E. Chelioti, Palace Hotel, Birkdale, Southport; A. Lamorani, 85, Rue d'Hauteville, Paris; V. Sidi, 34, Avenue de Wagram, Paris; I. Paenson, 71, Jermyn Street, W.; M. Wilbushewich (technical manager), 71, Jermyn Street, W. A. Arcache and I. Paenson are managing directors. The business of the company shall be managed by the company in Egypt, except that they may from time to time manage any part elsewhere, and all general and board meetings shall be held, as far as practicable, abroad, and the directors shall, as far as possible, retain in Egypt or elsewhere, as may be determined by them, the capital and profits of the company, and shall only remit to the United Kingdom such sums as shall enable them to pay dividends to persons in the United Kingdom and expenses.

## ON 'CHANGE.

### Better Tone Prevails.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

Generally speaking, a rather brighter tone prevailed in the markets during the week, though some further declines were experienced. Government securities were firm, and in a number of cases rises have to be recorded. Egyptian Guaranteed 3 per cent. has regained the loss of the previous week at 60, the Turkish Guaranteed 4 per cent. 1855 has risen a point to 68, while Greek Guaranteed 2½ per cent. 1898 is unchanged at 60. Among other Government securities Turkish 3½ per cent. Egyptian Tribute Bonds are ¾ up at 53½.

Greek securities are about the same. The 5 per cent. 1881 and 1884 Loans have gained half a point at 52, the 1890 Loan is a like amount up at 52. Fundings and the 1902, 1910, and 1914 Loans are unchanged at 50, 43½, 37, and 50½, but Monopolies and Rents are both half a point down at 40.

Among the Banks, Agricultural 3½ per cent. Bonds and 3½ per cent. Guaranteed Bonds are both unchanged at 58 and 60. Imperial Ottoman Bonds are unchanged at 9¾, also the National Bank of Egypt at 18. Land Banks, however, are 2-16 down at 4 9-16.

In Land shares Anglo-Egyptian Land Allotments are 3½ as last week; Béhéras have eased off half a point at 13¼, but the preference shares are unchanged at 65s. Egyptian Consols are ½d. up at 2s. 1½d., Delta Lands are 3d. up at 13s. 3d., and Egyptian and Foreign Trusts have registered a like advance at 13s. Gharbieh Lands are a further 1-16 down at 2⅜, New Egyptians have shed 6d. at 30s., while Union Foncières have dropped 3-16 at 4. Sudan Plantations are unchanged at 4⅞.

Among Miscellaneous securities Abyssinian Corporations remain at ¼, while Alexandria Waters are unchanged at 7. Morums are again 6d. down at 16s. 6d., while Egyptian Salts and Sodas are 1s. 3d. down at 41s.

Oils are firm. Anglo-Egyptians are 1-16 up at 3 11-16, while Roumanian Consols have made a smart advance from 19s. to 21s. 6d.

## COMPANY NOTES AND REPORTS.

### Morums Oriental Stores.

The report of Morums Oriental Stores states that the profit on trading for fifteen months to June 30, 1920, amounted to £79,378. Commissions payable to managers, interest, discount charges, etc., and depreciation took £12,012; proportion of profit allocated to the period prior to the incorporation of the company transferred to general reserve, £7,008; provision for taxation, directors' remuneration and London office expenses (less transfer fees), £14,340, leaving a balance of net profit of £46,018. The directors have decided to place £9,593 to general reserve, which with the profit allocated to the period prior to incorporation, less interest on purchase consideration, amounts to £11,000. This leaves £36,424 available for distribution. The directors recommend a dividend of 6 per cent. on the ordinary shares, less tax. Notwithstanding the unsettled conditions which have prevailed in Egypt during the greater part of the period covered by the accounts, the business of the company has expanded and the turnover shows a satisfactory increase, but in view of the downward trend of wholesale prices and market conditions, the directors have deemed it wise to pursue a prudent policy as regards the distribution of profits.

An extraordinary general meeting of the Madras and Southern Mahratta Railway Co., Ltd., will be held at 25, Buckingham Palace Road, Westminster, S.W.1, on November 10, at 12 noon.

# LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for September :—

Among the new schemes before the Ministry of Commerce and Agriculture is one for the protection of the forests. In the future all felling must be done in accordance with the system clearly defined in the instructions to be issued by the Ministry. The re-afforestation of certain regions, badly denuded during the war, is also foreshadowed. New laws are to be promulgated dealing with the cultivation of lands, and in cases where land is fit for cultivation and is left uncultivated by the owners it will be confiscated by the Government.

A concession for the construction and exploitation of a railway starting from the port of Ilidjé, on the Gulf of Edremid, and running to Palamoudlouk through Ak-Tchaï, Edremid, and Hauran, has been granted to Mr. Georges Ralli, director of the Balia-Karaïdine Mines. According to certain information obtainable, the line will be about 28 kilometres long and will be joined to the Decauville at present used by the Balia-Karaïdine Mines; it is to be a 75 c.m. gauge line.

### Flour, Barley, &c.

Towards the end of the month arrivals of flour were less frequent than at the commencement. However, with large orders recently placed with the U.S. for delivery end October and end November, there should be ample supplies in the near future and sufficient to last a long time. Some 3,000 sacks were sent to Batoum.

Barley arrived in large quantities during the month from South Russia and the Crimea, and after local needs were supplied some went to Smyrna for the Greek Intendance, but the bulk of it was sold here and transhipped to England. About 10,000 tons arrived from Galatz, also destined for England. The authorities in the Crimea are trying to negotiate the sale of barley there with direct shipment, in place of the present arrangement for transhipment at Constantinople, and it is reported that they have despatched a cargo of 5,000 tons direct to Marseilles for the French Government, which has already arrived, and that further cargoes are expected to be shipped to France in the near future. It is not thought, however, that much direct business from the Crimea to foreign ports will be feasible until proper facilities are given to commercial houses to trade and especially to enable telegrams to pass, without delay, to and fro by wireless.

Nothing much in maize. Only small arrivals from Roumania and about 400-500 from Ada-Bazar, most of which is ground here and largely used to mix with flour in the making of the cheaper class of bread.

### Large Stocks of Coal.

Market is well stocked with Turkish coal, and large stocks accumulating at the mines are causing considerable inconvenience to the mine owners. The market is also well stocked with American coal. Several cargoes of this description were shipped to the Mediterranean, but could not be sold there and have come on this market; the result is that "New River Standard Navy" can now be obtained at 210s. per ton f.o.b. bunkers.

With regard to British coal, should the anticipated settlement of the threatened strike materialise, it is to be hoped that it will be followed by an increased output, and that a wider permission to export will be granted, as it can always successfully compete with others.

Considerable quantities of coal have been purchased by the Crimean Government, for its mercantile fleet, railways, and for domestic use.

As much as 41 dollars per ton was paid for American Pocahontas Standard, although it has since been reported that a cargo of American was bought as low as 33 dollars c.i.f. Sevastopol. Welsh is naturally much preferred to American, and further cargoes are asked for: the demand is chiefly for "floating" cargoes, and this has consequently brought into the market several speculators, mostly Greeks.

As far as Sevastopol is concerned, the conditions of discharging are no worse there than they are here, perhaps even better, and between 500/600 tons per day can be safely reckoned upon. Taking into consideration the adverse exchange of the rouble, expenses in the Crimea may be considered cheap.

---

It is estimated that the amount of energy from hydraulic sources which is being supplied to Greek industries totals over 6,000 horse-power.

It is understood that a leading bank in Holland is to open a branch in Constantinople.

Anglo-Egyptian Oilfields :—Hurgada production for week ended October 24, 3,362 tons (last week 3,177 tons).

The directors of the Calcutta Electric Supply Corporation have declared an interim dividend of 8 per cent. per annum (4s. per share), less tax, on the ordinary shares for the half-year, payable November 15.

# LANCASHIRE COTTON.

### Increased Demand for Near East.

(From Our Own Correspondent.)

Manchester, Monday.

Although the amount of inquiry in the market continues fairly extensive there has been some falling off in the turnover since a week ago. Many buyers are not convinced that it is safe to operate freely at current rates, and there is hesitation in arranging heavy commitments. Although at the time of writing the result of the miners' ballot is not known, the dispute may be considered over, and work will be resumed in the pits immediately. The general industrial situation throughout the country is undoubtedly healthier. In local trade circles there has been some disappointment at the further weakness in American cotton rates, and at the moment it seems impossible to prevent selling pressure on the part of growers in the States at each advance. With regard to the Egyptian crop the reports have again been of a rather indifferent character, and a big yield seems quite out of the question. Estimates vary from 6¼ to 6½ million kantars. In yarns made from Egyptian cotton there has recently been a better turnover, but many spinners have met with scarcely any relief, and prices continue very irregular. In cloth for Egypt there has been an increased demand. Useful orders have been booked for Turkey and the Levant. Most of the buying has been in sized, printing, and finishing styles. India has given considerable support in bleaching descriptions, especially dhooties, but very little has been done in grey shirtings. Operations for China have been very limited, and only isolated lots have changed hands for the minor outlets of the Far East. Scattered sales have been put through for South America. Some manufacturers are now in a slightly better position than a fortnight ago, but it is still possible to purchase goods at comparatively low figures. American yarns for home use are now quieter, but spinners have improved their position during the last week or two. Ring beams are decidedly better situated. Export numbers have not attracted much attention, the offers reported being generally unworkable.

# ENQUIRY BUREAU.

*Readers abroad desirous of getting in'o touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

### Agents Wanted Abroad.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

102. A stamp collector wishes to purchase used Austrian stamps prior to the 1882 issue. Stamp dealers in the liberated provinces of Austria are asked to send bulk packages of such stamps to the care of the Editor of The Near East, with the price in kronen of each stamp or price per dozen, per 100, etc., of each kind. All stamps required will be paid for at the price indicated and the rest returned. Newspaper stamps are not required, but rare postmarks should be included.

103. An Athens firm invites publishers of periodicals dealing with yarns (reports on local markets and world output) and cottons to send specimen copies with a view to its becoming a permanent subscriber.

104. A Greek firm is establishing an electric light station in Macedonia, and wishes to get into touch with firms dealing in the necessary machinery.

105. Engineering and general contractor in Mosul, Mesopotamia, wishes to get into touch with manufacturers in Great Britain.

106. Old-established English trading company with branches in Mesopotamia and Persia is willing to accept agencies there for manufacturers, etc.

107. Old established Turkish firm handling general stores situated in Smyrna and having branches in the interior invites exporters to quote prices for groceries. The firm also acts as agents for articles of general consumption in Asia Minor.

108. Hemp manufacturer in Croatia wishes to get into touch with rope manufacturers who would purchase hemp.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

## NOTES OF THE WEEK.

In the House of Lords last Thursday there was a debate on Egyptian affairs, which was noteworthy chiefly by reason of a particularly frank speech by Lord Milner, who, while recognising the difficulties of coming to an agreement that shall satisfy both Egypt and Great Britain, was nevertheless hopeful that they would all be overcome. He had not the slightest doubt, he said, that we could maintain our position in Egypt by our own strength, but he believed that we might secure all that we needed in Egypt without involving ourselves in permanent hostility with the Egyptian nation. There was an element of Egyptian Nationalism that was anti-British, but the best and strongest elements were not so, but simply pro-Egyptian; and since there was no permanent conflict of interest, a good and permanent alliance was possible. He made it clear, however, that it was not yet certain whether his Mission would recommend the British Government to enter into some arrangement that might be called a treaty, and that he could not foretell how its recommendations would be received. The facts that he took the opportunity to state that he would in the Cabinet put up the best fight he could for them, and that he also spoke of the possibility that "his piece might be hissed off the stage," lend strong support to rumours, or what are rather more than rumours, that two, if not three, leading members of the Government do not see eye to eye with him in the matter. We may feel sure, however, that neither Parliament nor Public will wish to hiss until they have heard the piece on which Lord Milner and his collaborators have worked so hard and so patiently.

---

In a long and interesting article in *The Times* the Aga Khan has challenged what he conceives to be British policy in the Middle East. Elsewhere in this issue it is suggested that His Highness has been misled into attributing as a settled policy to the British Government certain temporary measures imposed upon it as a result of the long war, which is still far from having been liquidated in territories that formed part of the Ottoman Empire, and we have indicated an alternative policy to the proposal that we should incontinently withdraw at this inopportune moment from Persia. With regard to Mesopotamia, just as, in our view, His Highness has misjudged the action of Great Britain, so, it would seem, he has read more into the Arab rising than the facts warrant. The contention that the Arabs "have shown that they now wish to be left alone, and are fighting for what they believe to be their freedom" is at variance with all that is known of the outbreak, which at no time revealed concerted action and was indeed repudiated by one of the chief tribes. Further, the view is specifically contradicted by the Busreh Correspondent of *The Times* in its issue of November 9. Certainly, none of the recent announcements of the Government justify the suggestion that it is Great Britain's claim that "if the Mesopotamian Arabs are to learn the arts of self-government, they must be placed under an elaborate service of British military and civil officials, backed by a powerful army of occupation." The description may apply to the temporary measures introduced since the Armistice, but does not apply to the policy which Sir Percy Cox has been sent out to inaugurate.

---

Still less are we able to follow the Aga Khan's line of reasoning when he cites it as an example of confused and contradictory political thought that this hypothetical *régime* should be recommended for Mesopotamia when "the people of India are told that the only way to learn self-government is to be released from official control and British leading-strings." There can be nothing contradictory in withholding from the Arab people a constitutional system that is only now being adopted in India and Egypt. We are confident that it is officially recognised that the British "hold" on Mesopotamia is to be of the lightest, and we have little doubt that in practice it will prove to be precisely what the Aga Khan desires. The only point on which instructed opinion will differ from His Highness is in regard to the wisdom of leaving unrest rampant in the country without attempting to point out to the Arab population the better way.

---

Reports from Warsaw state that Poland has refused to join the Little Entente, partly, it is alleged, owing to distrust of the Czechs. In matters of this nature it is always well to hear the other side, for in view of what was known of M. Take Jonescu's mission, it may well be that what has actually happened in Warsaw is that the Polish Government and the Roumanian Minister, after comparing notes, have decided to come to no definite arrangement for the time being. M. Take Jonescu had no mandate to offer Poland participation in the Little Entente without reservation or *quid pro quo*. It had been particularly impressed upon him in London and Paris that, unless Polish policy could be entirely divorced from adventures, the inclusion of Poland in the Little Entente might be a source of weakness instead of strength. The fact that further discussions are to take place between the two countries in Bucharest suggests that the whole matter is still left open.

If domestic affairs in the different countries permit, all eyes in Europe will be turned towards the Greek elections next Sunday; for, if the popular vote were to be cast in favour of ex-King Constantine, a situation would be created that might well flutter a considerable number of European Chancelleries. M. Venizelos, with characteristic courage, has offered the nation a clear-cut issue. "If the elections go against him he will definitely retire from the political arena; if, on the other hand, the Greek people manifests its confidence in the Liberal Party, the vote will be a formal verdict condemning the claims of the dethroned King." The crux lies in the Peloponnese, which is claimed by the Opposition to be wholly in sympathy with it. But among the anti-Venizelists are some who, while joining issue with the Liberal Government on constitutional and other questions, realise that the recall of ex-King Constantine must necessarily plunge the country into violent internal struggles, if not actual civil war, and might well prejudice Greece in the eyes of foreign Powers. It is not without significance that M. Venizelos should begin his electoral campaign at Patras, the Opposition stronghold.

---

Comments in the French Press on the appointment of General Harrington to succeed General Milne at Constantinople have elicited a statement regarding the situation. According to this statement, Great Britain and France, with Italy's approval, have arranged that the Allied command shall be held for two years, or thereabouts, by a British general, and afterwards by a French general; while the first President of the Financial Commission is to be a Frenchman. Paris welcomes the arrangement, not unnaturally, perhaps. The Inter-Allied Military Mission, of which General Harrington is thus made the head, is charged with the organisation and control of the new Ottoman armed forces, but it has also to supervise the disarmament of Turkey; and, balancing one thing against the other, it seems probable that Great Britain will once more find herself the most unpopular of the Allies, because she has—or will be regarding as having—done one of the most unpleasant tasks that had to be performed.

---

According to reports which reached this country a few days ago from Transcaucasia, the Turks had failed to capture Artvin, and it was doubtful whether they had reached Ardahan. Against this we must, unfortunately, set the facts that Kars was captured by Kiazim Karabekir's forces on November 2, and that the victorious Turkish Nationalists are reported to be advancing on Alexandropol. Indeed, according to latest reports available at the time of writing, they claim to have captured that city. Other Turkish columns are said to be approaching Erivan from the south; while Russian Bolshevists are harassing the unhappy Armenians in another direction, and have captured Kara Kalissa. Kiazim Karabekir's success at Kars is attributed chiefly to his receiving strong reinforcements. If the Armenians are also suffering from a shortage of munitions of war, it is to be feared the Allies must be held responsible for that to a certain extent. The Armenian Government has appealed to Azerbaijan for a cessation of hostilities on that front, but there would appear to be little chance of the appeal meeting with any success.

---

Just when the London hospitals are finding it almost impossible to make both ends meet, when one of them, in fact, announces that it cannot keep open after the end of this year, it is announced that the Egyptian Government intends to build in Cairo "the finest and most complete Medical School and Hospital in the world." In view of the remark in Lord Allenby's lately issued Report (p. 67), that "The time has almost arrived when the provision of further hospital accommodation by the Central Government cannot reasonably be expected," the announcement is in the nature of a surprise. It is a not unpleasant surprise, however, for though a good deal has been done of late years in the way of providing better hospital accommodation for the country, Egypt is still not well off in this respect. We would welcome especially any steps that will help towards stamping out ankylostomiasis and bilharziasis, two diseases which—to quote Lord Allenby again—"cause so much suffering and loss of efficiency amongst the population of Egypt, especially the fellaheen." The Committee in charge of the project is to be congratulated on having secured expert advice before fixing on a site or deciding on building plans. Mr. John Simpson, P.R.I.B.A., who has been engaged as their adviser, has selected a good site on Roda Island; and with the co-operation of the Committee he has arranged a competition, open to architects of all nations, for the design of the buildings. The terms are unusually well thought-out and generous, and it is to be hoped that the competition will provide Cairo with a building of which its citizens will have reason to be proud. At present such buildings are few and far between.

---

It may be taken as a sign of the times that Reuter should think it worth while to send us news of the Trades Union Congress in Bombay, for, though India has suffered for many years from a superfluity of congresses, gatherings of organised workers have been hitherto practically unknown. The reason, of course, is that the workers have not been organised, and that is still very nearly true, but it will not remain so for long, and the new body will, in the course of time, come to count for much in the Indian industrial world. Perhaps a favourable augury of its future may be drawn from the fact that while its president of the moment, a well-known politician of extremist views, insisted on the doctrine of non-cooperation with the Government, the Congress itself passed a resolution condemning the local employers, and, apparently as a last resort, calling on the Governor to intervene. It is an eminently sensible resolution, for Sir George Lloyd understands these matters as well as anybody in Bombay, and if one thing is more certain than another, it is that Government will have to play an active part in dealing with the whole complex question. It is not, however, non-cooperative.

---

Sir George Lloyd has meanwhile scored a definite success in the result of the provincial loan issued in order to finance his great schemes for the development of the city of Bombay. The loan has realised over nine crores, or something between seven and eight millions sterling, more than double the amount which the whole of India used to be expected to subscribe, and that notwithstanding the large sums contributed to the usual loan during the summer. It is particularly satisfactory to know that Bombay is not only willing but able to back its future on this scale, for the local Press has been so pessimistic of late over financial and commercial topics that observers at a distance have been led to conclude that the great city must be nearly bankrupt. The truth is, we take it, that the pessimism has been inspired by the losers during a period of exceptionally active speculation, while the winners have been content to wait till they could show by their actions that, though much money has changed hands, it is still there, or thereabouts.

---

We hope the composition of the committee appointed to inquire into the management of Indian railways will prove satisfactory to the politicians who have pressed the subject so eagerly. For ourselves, we should have preferred a small and impartial body, but since the representation of "interests" has once more prevailed, we do not think a much better selection could have been made, and Indians, at least, have no grounds for complaint when their manufacturers are represented by Sir Rajendra Nath Mukherjee, their merchants by Mr. Thakurdas, and their passengers by Mr. Sastri, three names which should certainly command general confidence in that country. An interesting feature of the list is the inclusion of a former manager of the New Zealand Government railways; the descriptions of that system which we have heard from sundry colonists are unfortunately unprintable, but their general tenor suggests that the disadvantages incidental to State management in democratic countries will not be altogether excluded from the committee's observation.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**The Greenwood Case.**

The whole country this week seems to have but one interest—the trial of Harold Greenwood for the alleged murder of his wife. For once in a way Mr. Lloyd George is not the most-discussed Welsh solicitor in the world, but this obscure practitioner of a place called Kidwelly. The case has all the elements of mystery, but the trial being still unfinished, no comment is possible. Sir Marshall Hall is defending the prisoner with quite extraordinary power, and every respectable journalist has left Fleet Street for the Welsh Assizes to describe the trial.

**Colonel Malone.**

Parliament has quite properly taken a back seat while the more sensational drama of crime progresses, but at least one member of Parliament has increased his notoriety during the week. In a case dealing with a mysterious Finn who had apparently been connected with Miss Sylvia Pankhurst in revolutionary propaganda, Colonel Malone was asked to give evidence, as the prisoner had been seen at his house. This particular member has recently adopted revolutionary views, which is entirely his own affair, since he has no particular following; but he made an absurd exhibition of himself when he protested in the witness-box against members of Parliament being called on to give evidence in a police-court.

For the House of Commons in its collective capacity the public has a proper respect; but of the individual member its opinion is by no means so high, and it would not tolerate any suggestion that they should be privileged to withhold their evidence when required in a court of justice. It is a curious fact that the revolutionary should appeal to what he imagines is constitutional privilege when he is called on to do what he dislikes.

**Sinn Fein and Reprisals.**

The newspapers have again been full of the Irish tragedy. Those that are against the Government have made a great point of the existence of reprisals, but I have not observed that they have given any prominence to the continuance of murder on a wholesale scale by the terrorists; some of the more excitable writers seem to reproach the British public with apathy on the reprisals question. I am convinced that they misjudge England—they generally do, for those who are most loud against the Government on this matter were pacifists in the war. England is not apathetic; it long ago made up its mind that Ireland should have any form of Home Rule it desired if it would make up its mind on the matter and present its scheme to Westminster. Four British Governments in forty years have drawn up four several Home Rule schemes for Ireland which for one reason or another have failed, and it is recognised that one reason for the failures is the fact that they were British and not Irish schemes. Mr. Lloyd George tried to avoid that mistake—which Lord Morley pointed out to Gladstone in the 1892 Parliament—by calling an Irish Convention, but no agreed measure seemed possible.

If such a measure were produced, there would be criticism, and possibly amendment in detail in Parliament, but as a whole I think it would be accepted. It is the fact that no such measure has been produced, and that Sinn Fein has no intention of doing so, which makes the present position seem so hopeless; and the argument that a change of Government from a specified to an unspecified form can be either accomplished or justified by the murder of policemen and soldiers is one that never has and never will appeal to the mind of England. After all, politics is more than a mere pursuit of power; it cannot wholly disregard ethics and morality.

It is difficult to find a detached spectator of this tragedy, but one such remarked to me recently that while England had harmed Ireland by not understanding her, and treating a sister as an outcast, Sinn Fein has ruined Ireland by misunderstanding both her own country and the world in which we live. Sinn Fein desires not only independence, but isolation, and isolation is utterly impossible for any country to-day unless it commits economic and spiritual suicide. "Ireland," he said, "has always had its heart in the past and its feet in the future—not a bad thing if it would keep its head in the present. It is its misfortune that at the very moment when it could have almost any form of government it wants it refuses to have any form of government at all; this opportunity will pass, as others have passed, and the campaign of murder will merely provoke reaction and repression. And it would be easy even for a progressive Government to carry such a policy through, for the present campaign of crime would forfeit the sympathy of any civilised community. This is the real culmination of the Irish tragedy, that it now misunderstands England even more than England ever misunderstood Ireland."

**The Mining Strike.**

The coal trouble is over—for the present. But it has led to the retirement of both Mr. Brace and Mr. Hartshorn, and the latter has spoken out strongly as to the attitude of the miners. He declares that strike after strike is organised with a continual attempt to cut down production and to get more money, which is landing both the industry and the country in an impossible position. Nothing more severe has ever been said by the critics of the miners than by this old and tried leader, but it is clear that he and Mr. Brace, now that the fight is finished, or at least a truce is called, will fight no more. Their resignation is a bad blow to the miners' cause, and the fact that Mr. Hartshorn, who was not considered "a moderate man" by the public, was not extreme enough for the miners, is not of good augury for the future peace of the South Wales coal trade.

**Mrs. Asquith's Memoirs.**

Rarely has any book received such general condemnation as Mrs. Asquith's memoirs. *The Times* began its review with a sentence twenty-five lines long, after which it remarked, rather breathlessly, that the book was a scandal. Even the faithful *Westminster* and the *Daily News* seemed more anxious to bury Cæsar's wife than to praise her; the other papers were frankly hostile. Mrs. Asquith professes not to care; she said to an interviewer: "I have given no one away in my book, and have said only a third of what I know and an eighth of what I feel." Probably if her husband said an eighth of what he felt about it . . . .

**Pussyfoot's Defeat.**

Glasgow has refused to be charmed by the voice of Pussyfoot, and has voted against prohibition under the local option scheme, or "wet," as the American slang has it. I am not surprised. It may be brave, but it is hardly wise strategy to attack your enemy in his very stronghold, and the last place where men will "give up the drink" is probably Glasgow, which is said to consume more liquor per head than any other place in the United Kingdom. There is certainly some excuse: Glasgow is the most depressing city in the British Isles, and a tram-ride round the place on a wet Sunday afternoon is dreary enough to make a saint call out for whisky. I have always understood that it would be

Digitized by Google

preferable to take any reasonable kind of slow poison in preference to some of the liquor sold in Glasgow and Greenock bars, but the local population seems inured to it, and is reputed to drink spirits with its beer. With such a sturdy race against him, one would suppose that "Pussyfoot" expected the adverse result.

The English brewers, who were alarmed at this American propaganda, are frankly relieved at the result. I never thought they need have been so frightened, neither the English nor the Scots public being so open to waves of emotion as the American, where prohibition was carried through as a win-the-war measure. Temperance is certainly progressing in this country—one has only to read "Pickwick" where everybody indulged in brandy all day long, to see how things have changed in the last two generations—but temperance propaganda has had little to do with it.

**The Wrekin.**

The premature and sudden death of Mr. Charles Palmer, who was only elected as M.P. for the Wrekin division in February—and who had already intervened effectively in debate on several occasions in the Commons—has caused a by-election. Its main interest lies in the fact that Mr. Horatio Bottomley, who is the one leader and sole follower of the Independent Party at Westminster at present, has announced that General Townshend will stand in his interest. The gallant but unfortunate soldier's friends have already hinted at the existence of a camarilla against him at the War Office, and we shall probably hear a good deal about it during the contest. Few people had any idea that General Townshend cherished political ambitions. The *Saturday Review*, which is one of the wittiest papers in London in these days, has christened him "Kut and come again."

**The Epidemic Season.**

Autumn is the season not only of "mists and mellow fruitfulness," but of pests and epidemics—a fact which Keats omitted to mention. Two years ago influenza took its toll; this year it is scarlet fever and diphtheria. There have been thousands of cases in the London fever hospitals, and the number in still growing; it is not expected to diminish until the end of November. The cases are mostly of a mild type, and in any event the mortality is much lower in these days than thirty years ago, owing to anti-toxin and better treatment. But the doctors dislike scarlet fever because it is apt to leave heart weakness and other constitutional symptoms behind, and diphtheria is proverbially an unpleasant companion. The outbreak is naturally the worst in those districts which are most overcrowded.

**Ignoring the Prime Minister.**

One of the reviewers has discovered that Mrs. Asquith contrived to write a whole book without once mentioning Mr. Lloyd George—a feat that appears to require some dexterity. But it is not original. Lord Morley's "Recollections" had a similar omission, although he was a colleague of the Prime Minister for some eight years. It seems hardly credible that the omission is accidental; for, after all, Mr. Lloyd George was quite a considerable person even before 1914. But probably he will not mind very much; perhaps he will take it as a compliment to be ignored by Mrs. Asquith.

**The Week's Books.**

The fashion for writing the lives of people before they are dead, which has at least the advantage that the book is read before the subject is forgotten, is responsible for "Mr. Balfour" (Collins), by Mr. E. T. Raymond. The statesman does not appear to have collaborated with the author in any way, and the peculiar subtlety and elusiveness of Mr. Balfour's character makes him an exceptionally difficult study, I should imagine, for the biographer. Mr. Raymond, who is remembered as the author of "Uncensored Celebrities"—a book which showed him to be no respecter of persons—has succeeded in conveying a vivid likeness of Mr. Balfour, and has critically explored as much of his character as is at present explorable. It would not be a bad idea if he were to proceed to dissect Mr. Asquith; Mr. Lloyd George has already been annexed by Mr. Harold Spender.

A good many detailed histories of London are in existence, but few of these have anything to say of London government, that strange tangle of conflicting authorities and boundaries, rates and powers. Mr. Claud Mullins in "London's Story" (Bell) has produced an excellent little book which for a modest half-crown tells the story of the development of the administration of the metropolis and unravels many of the puzzles of its government. It is the forerunner of a larger book on the subject which will be awaited with interest.

Mr. J. H. Thomas, M.P., has published a forecast of "When Labour Rules" (Collins), which will command a good deal of attention. He makes the point, which is obviously sound, that "in many respects the workers are even more conservative than the Conservatives, and in none are their views more steadfastly established than on the question of the head of the State; and notwithstanding heated controversies on almost every subject under the sun, no question of Republicanism as a serious proposition ever finds a place in Labour discussions." Also, "there will be no Bolshevism; the British working-man is too sane a fellow for that, and, let me add, as the war proved, too patriotic and too proud of his own country." As regards defence, "we should not be lavish in our expenditure for a fighting machine. But there would have to be an Army, and especially a Navy";—the turn of the phrase shows that Labour echoes the traditional view of the two services.

There will be a capital levy, probably realising £1,000,000,000, and "we shall increase the death-duties enormously." A suggestion that intrigues me is the following: "It is rather interesting to speculate on the chances of one day establishing a world-wide currency. It is a possibility that, perhaps, is not so far off as some people suspect—to cut out the exchanges—and one of the subtlest of his jokes is that he writes for international business relationships." As for taxation, there will, when Labour comes into power, be only one tax—income-tax. "We stand absolutely for the entire abolition of all indirect taxation." There will be national ownership of railways, mines, canals, harbours, roads, possibly steamships; and there will be "no profiteers, no unemployment, no slums, no hungry children." The public-house will be nationalised, there will be a National Theatre and Opera, and a great army of university extension lecturers; the House of Lords will be cut down to 300, and will be elected. The book, as this rather bald summary shows, is well worth reading, and I think it is the most effective bid for power the Labour Party have yet made. But the price—10s.—is rather against it; a cheap edition ought to come out at a shilling. At the present price of print and paper it would probably ruin the publishers, but what matter? Mr. Thomas could nationalise them.

A lighter book is "Supers and Supermen" (T. Fisher Unwin), by Mr. Philip Guedalla. It calls itself a series of studies in politics, history, and letters; but most people will regard it as a study in Guedallacisms. The author is a barrister with so pretty a wit that one would almost rather lose one's case with him than win it with a duller advocate—I hope this is not technically a libel—and one of the subtlest of his jokes is that he writes for the *Daily News*, where they probably think the paradoxes are ordinary legal opinions. The present volume of studies are among the most brilliant essays I have read for a long time.

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, October 25.

**The Mixed Courts.**

On October 31 the mandate of the Mixed Courts will come to an end. I understand that a decree will be issued on that date extending the powers of those Courts, and consequently renewing the contracts of the judges, for a further six months, the consent of the Powers interested having been obtained to this extension. In this connection it is interesting to note that originally introduced in 1879 for five years, these Courts, until the war, have, with but one or two exceptions, had their powers regularly renewed for quinquennial periods. The last quinquennial period expired on January 31, 1915, and owing to the uncertainty of the situation the renewals have since then been made for annual periods only, with the exception of 1919, when the renewal was for six months, from February 1 to October 31.

The period has now again been extended for only six months owing, of course, to the imminence of an agreement on the political status of the country between Great Britain and Egypt. That agreement will provide, amongst other things, for the abolition of the Capitulations, the closure of the Consular Courts, and the transference to the Mixed Courts of the jurisdiction *vis-à-vis* their Nationalists enjoyed by the former in criminal, civil, and commercial matters. Ever since the visit of Lord Milner and his colleagues last winter the authorities have had hopes of being able to introduce these legal reforms on the opening of the judicial year, which starts on the 1st prox. To the ordinary layman such expectation has throughout appeared ultra optimistic. Apart from the fact that it was quite conceivable that it would take more than six months to obtain the consent of even the majority of the Powers interested in the important reforms which the reorganisation of the Mixed Courts connotes, and that any hasty action to introduce reforms might in the long run be prejudicial to the community, the absence of the necessary codes, the question of the appointment of the necessary staff, and, finally, the lack of buildings to house the extra Courts which would have to be provided for, were, to our minds very serious drawbacks to such an early introduction of the reforms. The layman has proved right, and there is every reason to believe that the present extension of six months will likewise prove inadequate, and that it will eventually turn out that the opening of the 1921-22 judicial year will be the earliest date at which it will be possible to introduce the new judicial régime.

**The Residency Report.**

Considerable comment has been aroused by the fact that although a report by Lord Allenby on Egypt between 1914 and 1919—the publication of which was foreshadowed in this correspondence last April—has appeared in London, not only is no copy obtainable in any bookstore in the country, but not a single copy is available in official quarters. Usually copies of such reports are distributed officially to the leading local papers in advance, and are purchasable here at the same time as publication takes place in London, but on this occasion something seems to have gone wrong with the publicity organisation. Indeed, had it not been for the enterprise of the London agent of your contemporary, the *Egyptian Gazette*, we should still be ignorant of the contents of the report. Fortunately, that paper received a copy from London, and is publishing extracts, which are being reproduced by the rest of the Press.

While there is, of course, no justification for such a deduction, and there can indeed be no connection between the two matters, local opinion inclines to see in this mystery surrounding the publication of the report an indication that all is not going well with the Delegation! The original postponement of Zaghloul Pasha's departure from Paris was, as might be expected, regarded with suspicion, and there is at present a persistent rumour in the country that the rest of the Cabinet does not regard with a favourable eye the proposals made by Lord Milner. It is stated, in fact, that it is because of this hitch that Zaghloul Pasha has been accompanied by three instead of the whole Delegation in his present visit to London. Such is at present the trend of rumour, which in this country ever leads a particularly active life; and meanwhile the opposition is gaining strength.

**The Opposition to the Agreement.**

One of the interesting features in this respect is the *volte-face* which certain elements now show an inclination to make. Reliable information from the districts indicates that the fellaheen and many of the landed proprietors are somewhat disturbed in their minds as to the ultimate effect on the country in general and on them in particular of the withdrawal of British control. They, together with certain classes of officials who joined in the tally-ho when the pro-Delegation fever was at its height, are beginning, now that the excitement has cooled off, to realise, as so many of us do, the possible effects of the complete withdrawal of British control; and while they do not repudiate the Delegation or abandon their ideas of independence for Egypt, nevertheless they are beginning to think that the pace which is being set is too fast and that Lord Cromer was perfectly correct when in his valedictory speech at the Opera House in May, 1907, he said: "I consider that a steady jog trot is the pace best suited to advance the interests of this country. It is a pace which has done us good service in the past. I say it should be continued, never relaxing into a walk or breaking into a gallop; and my strong conviction is that if the pace be greatly mended, a serious risk will be incurred that the horse will come down and break its knees."

**Attack on Railway Official.**

On Wednesday last a murderous attack was made on Mr. R. G. Peckitt, C.B.E., Chief Mechanical Engineer of the Egyptian State Railways, resulting in his receiving serious injuries. While Mr. Peckitt was waiting on the platform preparatory to taking a trolley down to the workshops, an Egyptian suddenly came up from behind and attacked him with a large native knife. Before the man could be seized he had inflicted two bad wounds on Mr. Peckitt's face and neck, and it was only by the merest luck that he missed the jugular vein. Mr. Peckitt was at once attended to and removed to hospital, where he is making satisfactory progress. It appears that the assailant was an Egyptian railway engineer who had been sentenced by the Assize Court at Zagazig for threatening an Englishman, and who, as a result of his conviction, had been dismissed from the service. It is assumed that he attacked Mr. Peckitt because the latter, in his official capacity, signed the dismissal order. This is the second time that Mr. Peckitt has been attacked within the last year, for on December 22 last he was fired at by a man while he was visiting the workshops.

## BULGARIA.

SOFIA, October 31.

**Honouring a Poet.**

The celebration of the seventieth birthday of the national poet, Vazoff, last Sunday was remarkable. Although the day was wet and chilly, the citizens flocked to the residence of the venerable poet from the early hours of morning. At a quarter-past nine King Boris, who was accompanied by the Minister of Public Instruction, M. Omartchevsky, honoured him with a personal visit, conferred on him the highest class of the Order of St. Cyril and Methodius, and expressed to him the nation's gratitude for his half-century's literary work. At ten o'clock there was a public meeting, attended by his Majesty, his Ministers, and the leading citizens, at which the poet received addresses and greetings from: the Minister of Public Instruction (who handed him 100,000 levas), the President of the National Assembly,

M. Alex. Moleff, and the Minister of Railways, M. L. Athanasoff, who presented him with a collection of pictures and photographs on behalf of the Directorate of Railways, and with a free pass on the railways. Dr. Tzankoff also greeted the poet in the name of the Holy Synod and the Bulgarian Church, and presented him with an ikon with the image of St. John of Rilo. Prof. L. Meletitch read an address from the Bulgarian Academy of Sciences; and many others were read, or presented, on behalf of his native town, of the Bulgarian University, the Army, the League of Bulgarian Savants, the Chamber of Commerce, etc., etc. Afterwards the poet replied to all these greetings in a touching speech, which was received with great enthusiasm by his hearers. The celebrations lasted throughout the day, and throughout the kingdom as well as in the capital; and showed how Bulgaria, at any rate, honours poetry. The Communists tried to create a disturbance, but it was promptly suppressed by the police and military, and the would-be disturbers were roughly handled by the crowd.

**The Death of King Alexander.**

The news of the premature death of King Alexander of the Hellenes was received here with regret. M. Dimitroff, the Minister of the Interior and Acting Minister of Foreign Affairs, accompanied by the Secretary-General of the latter Ministry, called at the Greek Legation and expressed the condolences of the Government to the Hellenic Chargé d'Affaires, M. Panourias. The Marshal of the Court also called to express condolences on behalf of King Boris.

On Saturday a requiem service for the dead King was held at the chapel of the Greek Legation, and was attended by King Boris, the Minister of the Interior and Acting Minister for Foreign Affairs, the Diplomatic Corps, and M. Panourias and the staff of the Legation.

**The Commission of Reparations.**

M. I. Ilieff, formerly Chief of the Protocol at the Ministry for Foreign Affairs, has been appointed Secretary of the Bulgarian representative on the Reparations Commission.

## TURKEY.

CONSTANTINOPLE, October 30.

**The Cabinet and the Nationalists.**

In the early part of the week the official programme of the new Cabinet was published. As is usual with such announcements, it consisted mostly of embroidery; one paragraph alone is worthy of comment:—

"The first task of the Government will be to eliminate, in a manner compatible with the dignity of the State and the nation, the dualism which has arisen in the organism of the body politic, and by which the existence of the State is being impelled towards doubtful issues."

In order to induce a favourable frame of mind at Angora, it has been thought advisable to abolish the censorship, and to "reform" the court-martial, but it would appear that these measures have not been appreciated at Angora, as was anticipated. As a result of the first, and unofficial, exchange of views between the Cabinet and the Nationalists it seems that the latter will only agree to a reconciliation with the Central Government if plebiscites are immediately taken in Thrace and Smyrna and the Hellenic troops are withdrawn! Thus, as was pointed out in last week's letter, the real point at issue is with the Allies rather than with the Central Government; and it looks almost as if even Marshal Izzet Pasha will be unable to find a common ground for commencing negotiations. As a matter of fact, there is hardly any necessity for the Government to send a mission to Anatolia, since the Nationalists have always had their representatives in Constantinople, who have always been in close touch with Angora, and who could reply to any inquiries immediately.

The commencement of the offensive against the Greeks immediately after the reception of the news of King Alexander's death, and at this particular moment, is a sufficient indication of Nationalist mentality if any such indication were needed. The fall of Damad Ferid Pasha was hailed with joy at Angora, because that veteran statesman was regarded as the tool of the British. What will be thought of the present Cabinet when it is realised that it also must refuse to discuss the Treaty of Sèvres? It would also appear that the Allies are now pressing for the ratification of the Treaty, and have left the Sublime Porte no loophole for procrastination, by offering to accept the Sultan's signature as sufficient. The Angora Chamber has been declared illegal, and would certainly refuse to ratify the Treaty, even if it had not already declared all engagements entered into by the Central Government since the Armistice null and void. The convocation of a Chamber in Constantinople is manifestly impossible, unless the Nationalists yield, and as this is highly improbable, the Treaty can only be ratified by a special body, or by the Sultan himself. It will be interesting to see what attitude the present Cabinet will observe if the Allies press the point. If one may hazard a guess, it would be to say that there will be another change in the Cabinet before long.

Another interesting question is, whether the Allies will carry out the threat embodied in the Treaty, and deprive the Turks of Constantinople; for it is certain that the conditions will not be fulfilled within the specified period. The loss of Constantinople will almost certainly raise the dynastic question; for it is probable that in such an eventuality the Sultan will abdicate, and it is highly doubtful whether the Heir Apparent would consent to succeed him upon the crumbling throne of Osman. These considerations, however, are at present merely interesting speculations, and some little time must elapse before they can become anything more.

**Anatolia.**

The *Bosphore* has published an interesting account of conditions in Anatolia given by a traveller who has recently returned from Angora. It would appear that the Nationalist régime is not very different from that of the Unionists during the war, and that considerable hardships are being suffered by the people, although there is no scarcity of food. The world-wide housing problem also exists in Anatolia, although one would think that after so many people had been killed there would be plenty of accommodation for the survivors. The province or *vilayet* has been abolished as an administrative unit, and the country is now divided into cantons or *sanjaks*, governed by divisional commanders possessing extensive powers. The system is said to be giving much better results than the old system. The Angora Government is proceeding with the construction of roads, railways, and light railways, with "feverish activity," and light railways are said to have been already constructed between Samsun and Angora, and Angora and Erzeroum. The same account confirmed the statements made in previous letters concerning the divisions among the Nationalists with regard to Bolshevism, and the struggle between the extremists and the moderates. All the Nationalist leaders, however, are said to be confident of success, and in addition to the offensives against the Armenians and the Greeks, there is a renewal of activity in the Adana area.

**Armenia.**

The Nationalist forces operating against the Armenians are estimated at 15,000 men, but this is probably a very conservative estimate. In any case, the gallantry of the defence maintained by that sorely tried people is worthy of as much admiration as that of the Belgians against the German hordes. General Seboh, the commander of the Armenian forces at Kars, which is

SCHOOL OF ORIENTAL STUDIES.

Digitized by Google

being attacked by the Turks, has issued an appeal to all men between the ages of 18 and 50 to hasten to the front with their weapons, spades, scythes, or axes, adding that if Kars was lost, Armenia itself would be in great danger. So far as is known at present the Armenians are holding their own against the Turks, but the Bolshevist menace seems to be taking more definite form in the east. Khalil, the uncle of Enver, is active in the Zangezur district, where the Bolshevists are enrolling the male population by force. It is also said that the Reds are forcing the Armenians of that district to sign papers indicating their desire to be governed by the Azerbaijan Soviet. One cannot but hope that the tardy help given by the Allies will be increased, and that the gallant little people will not have to yield for want of the necessary supplies.

### The Death of King Alexander.

A funeral service was held at the Œcumenical Patriarchate on Friday, and was attended by the Allied High Commissioners and a large number of official and notable personages in Constantinople. Never has there been a better illustration of the old proverb that all the world loves a lover, for many people who had hitherto hardly ever thought of the dead King eagerly followed the record of his terrible struggle for life, and were genuinely moved by the news of his death. Among other marks of the general sentiment of regret may be noted the action of the Greek pupils of the American College for Girls at Arnautkeuy, who sent a telegram of sympathy to Mme. Manos.

## CYPRUS.

Nicosia, October 15.

### The Outlook.

Coinciding with the end of an unusually hot summer, there is a general quieting down of political activity in the towns, and a recognition at last of the fact that no declaration of policy regarding Cyprus is likely to be made at present, but that any political question which may concern the island will be duly considered by the British Parliament and Government in connection with other important and wider issues that may be involved in any settlement or reconstruction of Near East regions as a whole. The Greek papers now merely urge that it is necessary that an immediate meeting should be held of members of the London Mission, and of the local "Aid Committee": first, in order that the former may give an account of their stewardship, and, second, to deliberate on the course to be pursued henceforth. Also, it is to be decided whether the two members still in London should be advised to remain or return.

### Another Grievance.

In connection with the raising of salaries, discontent now prevails among temporary officials, who do not share in the benefits secured for permanent public servants; and the grievance is supported by the Press. In many cases, it is argued, these persons, whose employment is precarious, are just as much entitled to help as others, in view of the high cost of living, especially as in some cases—e.g., the Public Works Department—they have to live away from home, and sometimes to keep a horse or mule, with forage at exorbitant rates

### The Cypriot Volunteers.

The movement for enlistment of Greek volunteers for service in the new Hellenic provinces proceeded so far that about 10,000 Cypriots were enrolled. But as all Cypriots (except those who were of non-Ottoman nationality) became British subjects when the island was annexed by Britain, such enrolment could not be countenanced, and permission to join an alien army was refused by the Government—a decision which caused disappointment to some, though by no means all, of the would-be patriots. Hellenic subjects could be invited, or called upon, to serve, but these are in Cyprus a negligible quantity.

### General News.

A message from Athens informs the Mayor of Nicosia that twenty-seven Cypriot schoolmasters have been chosen for appointments in Greece, and that their travelling expenses will be paid by the Hellenic Government.

The return of British troops to Limassol, it is believed, will be shortly carried out. They will probably be quartered in the depot outside the town, while the camp of Polemidia remains as a refugee camp.

The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Digitized by Google

Whatever may be the result of the Greek rejection of the new Education Bill, which would have marked a great step forward, there is, nevertheless, much activity throughout the island in connection with school life, as it is felt that a new era is about to begin, whatever the source of the funds may be. Some advocate raising the amount needed by voluntary effort. The whole status and prospects of the masters must be at once raised in all schools. The call for Cypriot teachers from Athens adds an additional stimulus to the profession. The summer holidays have ended. Many new schools are being built in well-to-do villages, in some cases through the generosity of Cypriots who have made money abroad; in others, by village efforts aided by advances from the Loan Commissioners.

The Armenian Archbishop has been visiting the refugees at their camp, baptising and organising work. They are showing commendable zeal in the matter of education, church services, and industrial work of various kinds.

Winter hours have begun in all Government offices. The regulation working hours now cease at 3 p.m., which gives officials an opportunity of a little fresh air and exercise.

## THE GREEK SOCIALISTS' PROGRAMME.

(From Our Athens Correspondent.)

The Greek Socialist-Communist party has published its political programme, consisting of the following ten articles:—

1. To oppose by all possible means the outbreak of any new wars, and any attempt to draw Greece into the alliances or enterprises of the European Imperialists.

2. Immediate general demobilisation, and conclusion of peace with everybody; close collaboration with the people of the Balkans and the Danube, with a view to throwing off the yoke of the Great Powers of Europe, and the creation of a Soviet Republic in the Balkans.

3. Complete recognition of the Russian Labour Republic, and the re-establishment of economical and political relations with that country.

4. Confiscation and setting apart for the public benefit of all surplus gains realised as a result of the war. Suppression of all taxes affecting the workmen and the peasants, and the imposition of heavy taxes on the big capitalists pending the nationalisation of all means of production and exchange.

5. Immediate and radical regulation of all questions of hygiene, and instruction of both sexes in accordance with the spirit and principles of Communism. Radical fight against speculation, enforcing of immediate measures against those trafficking and control of the "ravitaillement" by the public.

6. To oppose any attempt on the part of the State to violate the rights of the people by definitely abolishing martial law; suppression of all "Corps de Sureté" and spying organisations, also of all methods adverse to the liberty and political action of the working people.

7. Appointment of a control on all railway and navigation enterprises, also on all industrial concerns, including the banks.

8. Immediate requisition of all large buildings in order to ensure cheap lodgings for the workmen, closing down of all unhealthy habitations, and reconstruction of all destroyed towns and villages.

9. Re-institution of the peasants on the lands on which they are at present employed, without paying any indemnity to the landowners, and confiscation of all surplus profits realised by the latter during the war with a view to providing agricultural machinery for the peasants and cultivators; carrying out of irrigation works, and abolition of all debts contracted by the peasants and cultivators with usurers, monasteries, or the State.

10. General amnesty to all persons condemned for political or military offences.

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:—*

Mesopotamia: Sir Percy Cox (Report). India: Civil Disturbances (Military Areas).—Mrs. Besant.—Burma Rice Crop.—Indian Troops (Attempted Seduction).—Shipping Accommodation (Residents in India).—Indian Railway Committee. Mesopotamia: Oilfields.—Government Expenditure (Parliamentary Discussion). Batoum. Thrace (Greek Forces). (November 1.)

Albania. Montenegro. Foreign Governments (Recognition). India: Government Service (Pensions).—Afghan Agency, Peshawar (November 2.)

India: Native Troops (Mesopotamia and Persia).—Legislative Councils Elections.—Disturbances (Pardons).—Officers' Pay (Deductions). Mesopotamia: Colonel Sir Arnold Wilson. Peace Treaties: Turkey (Rahmy Pasha). Palestine (Boundaries). Persia.—India: Uncovenanted Services (Pensions).—Burma (Constitutional Reforms). Ceylon (Constitutional Reforms). (November 3).

Roumanian Government Bonds. British Army: Troops in Persia. India: Army Pensions.—Civil and Military Pensions. (November 4.)

## THE MILNER-ZAGHLOUL NEGOTIATIONS.

The following is the text of a Memorandum prepared on the basis of Conversations held in London in June to August last between the Milner Mission and Zaghloul Pasha and the Egyptian Delegation:—

1.—In order to establish the independence of Egypt on a secure and lasting basis, it is necessary that the relations between Great Britain and Egypt should be precisely defined, and the privileges and immunities now enjoyed in Egypt by the capitulatory Powers should be modified and rendered less injurious to the interests of the country.

2.—These ends cannot be achieved without further negotiations between accredited representatives of the British and Egyptian Governments respectively in the one case, and between the British Government and the Governments of the capitulatory Powers in the other case. Such negotiations will be directed to arriving at definte agreement on the following lines:—

3.—(I.) As between Egypt and Great Britain a Treaty will be entered into, under which Great Britain will recognise the independence of Egypt as a constitutional monarchy, with representative institutions, and Egypt will confer upon Great Britain such rights as are necessary to safeguard her special interests, and to enable her to furnish the guarantees which must be given to foreign Powers to secure the relinquishment of their capitulatory rights.

(II.) By the same Treaty, an Alliance will be concluded between Great Britain and Egypt, by which Great Britain will undertake to support Egypt in defending the integrity of her territory, and Egypt will undertake, in case of war, even when the integrity of Egypt is not affected, to render to Great Britain all the assistance in her power within her own borders, including the use of her harbours, aerodromes, and means of communication for military purposes.

4.—This Treaty will embody stipulations to the following effect:—

(I.) Egypt will enjoy the right to representation in foreign countries. In the absence of any duly accredited Egyptian representative, the Egyptian Government will confide its interests to the care of the British representative. Egypt will undertake not to adopt in foreign countries an attitude which is inconsistent with the Alliance, or will create difficulties for Great Britain, and will also undertake not to enter into any agreement with a foreign Power which is prejudicial to British interests.

(II.) Egypt will confer on Great Britain the right to maintain a military force on Egyptian soil for the protection of her Imperial communications. The Treaty will fix the place where the force shall be quartered, and will regulate any subsidiary matters which require to be arranged. The presence of this force shall not constitute in any manner a military occupation of the country, or prejudice the rights of the Government of Egypt.

(III.) Egypt will appoint, in concurrence with his Majesty's Government, a Financial Adviser, to whom shall be entrusted in due course the powers at present exercised by the Commissioners of the Debt, and who will be at the disposal of the Egyptian Government for all other matters on which they may desire to consult him.

(IV.) Egypt will appoint, in concurrence with his Majesty's Government, an official in the Ministry of Justice, who shall enjoy the right of access to the Minister. He shall be kept fully informed on all matters connected with the administration of the law as affecting foreigners, and will also be at the disposal of the Egyptian Government for consultation on any matter connected with the efficient maintenance of law and order.

(V.) In view of the contemplated transfer to his Majesty's Government of the rights hitherto exercised under the *régime* of the Capitulations by the various foreign Governments, Egypt recognises the right of Great Britain to intervene, through her representative in Egypt, to prevent the application to foreigners of any Egyptian law now requiring foreign consent, and Great Britain on her side undertakes not to exercise this right except in the case of laws operating inequitably against foreigners.

In view of the contemplated transfer to his Majesty's Government of the right hitherto exercised under the *régime* of the Capitulations by the various foreign Governments, Egypt recognises the right of Great Britain to intervene through her representative in Egypt, to prevent the application to foreigners of any Egyptian law now requiring foreign consent, and Great Britain on her side undertakes not to exercise this right except in the case of laws inequitably discriminating against foreigners in the matter of taxation, or inconsistent with the principles of legislation common to all the capitulatory Powers.

(VI.) On account of the special relations between Great Britain and Egypt created by the Alliance, the British representative will be accorded an exceptional position in Egypt, and will be entitled to precedence over all other representatives.

(VII.) The engagements of British and other foreign officers and administrative officials who entered into the service of the Egyptian Government before the coming into force of the Treaty may be terminated, at the instance of either the officials themselves or the Egyptian Government, at any time within two years after the coming into force of the Treaty. The pension or compensation to be accorded to officials retiring under this provision, in addition to that provided by the existing law, shall be determined by the Treaty. In cases where

Digitized by Google

no advantage is taken of this arrangement, existing terms of service will remain unaffected.

5.—This Treaty will be submitted to the approval of a Constituent Assembly, but it will not come into force until after the agreements with foreign Powers for the closing of their Consular Courts and the decree for the reorganisation of the Mixed Tribunals have come into operation.

6.—This Constituent Assembly will also be charged with the duty of framing a new Organic Statute, in accordance with the provisions of which the Government of India will in future be conducted. This Statute will embody provisions for the Ministers being responsible to the Legislature. It will also provide for religious toleration for all persons and for the due protection of the rights of foreigners.

7.—The necessary modifications in the *régime* of the Capitulations will be secured by agreements to be concluded by Great Britain with the various capitulatory Powers. These agreements will provide for the closing of the foreign Consular Courts, so as to render possible the reorganisation and extension of the jurisdiction of the Mixed Tribunals and the application to all foreigners in Egypt of the legislation (including legislation imposing taxation) enacted by the Egyptian Legislature.

8.—These agreements will provide for the transfer to his Majesty's Government of the rights previously exercised under the *régime* of the Capitulations by the various foreign Governments. They will also contain stipulations to the following effect:—

(*a*) No attempt will be made to discriminate against the nationals of a Power which agrees to close its Consular Courts, and such nationals shall enjoy in Egypt the same treatment as British subjects.

(*b*) The Egyptian Nationality Law will be founded on the *jus sanguinis*, so that the children born in Egypt of a foreigner will enjoy the nationality of their father, and will not be claimed as Egyptian subjects.

(*c*) Consular officers of the foreign Powers shall be accorded by Egypt the same status as foreign Consuls enjoy in England.

(*d*) Existing Treaties and Conventions to which Egypt is a party on matters of commerce and navigation, including postal and telegraphic Conventions, will remain in force. Pending the conclusion of special agreements to which she is a party, Egypt will apply the Treaties in force between Great Britain and the foreign Powers concerned on questions affected by the closing of the Consular Courts, such as extradition Treaties, Treaties for the surrender of seamen deserters, etc., as also Treaties of a political nature, whether multilateral or bilateral—*e.g.*, arbitration Conventions and the various Conventions relating to the conduct of hostilities.

(*e*) The liberty to maintain schools and to teach the language of the foreign country concerned will be guaranteed, provided that such schools are subject in all respects to the laws applicable generally to European schools in Egypt.

(*f*) The liberty to maintain or organise religious and charitable foundations, such as hospitals, etc., will also be guaranteed.

The Treaties will also provide for the necessary changes in the Commission of the Debt and the elimination of the international element in the Alexandria Board of Health.

9.—The legislation rendered necessary by the aforesaid agreements between Great Britain and the foreign Powers will be effected by decrees to be issued by the Egyptian Government.

A decree shall be enacted at the same time, validating all measures, legislative, administrative, or judicial, taken under Martial Law.

10.—The decrees for the reorganisation of the Mixed Tribunals will provide for conferring upon these Tribunals all jurisdiction hitherto exercised by the foreign Consular Courts, while leaving the jurisdiction of the Native Courts untouched.

11.—After the coming into force of the Treaty referred to in Article 3, Great Britain will communicate its terms to foreign Powers and will support an application by Egypt for admission as a member of the League of Nations.

# CORRESPONDENCE.

## A TURKISH DISH.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In confirmation that the dish of egg-plants—*aubergine* is the French word—called "Imam Baildi" is not a delicacy, may I quote the following well-known and very interesting Turkish proverb: "Adji Badinjani Kiragi yagmaz," which I translate into English: "The frost does not blight the *bitter* egg-plant." This means that common misfortunes and contagious diseases, which attack and destroy the worthy and tender, rarely harm those who are bad and unworthy.

The stories put forward by your different correspondents upon this subject are in circulation in the Near East, but in fact they originated in the inventive minds of some ignorant nurses to satisfy the curiosity of children, who usually ask with innocent amazement why the priest should faint. I think the name originally was the compound adjective "Imam-Baildir"—"the priest-fainter," referring to the excess of garlic in the dish, but by careless pronunciation, the final "r" being omitted, became the preterite "Imam-Baildi"—"The priest fainted." Hence so many curious stories.

The name of the work to which I referred in my previous letter would be spelled "Sahih-ul-Boukhari," Boukhara being the birthplace of the famous editor.—I am, etc.,

M. NEJMI BODAMIALISADE.

TO THE EDITOR OF "THE NEAR EAST."

SIR,—Before writing my letter of 16th ult. I had the opportunity of meeting a well-known Turkish personage who happens to be in London, and he gave me the same version as to the origin of the name "Imam Baildi" as the one which I gave, and which I have known for years. The version, which comes from Anatolia, is the following:—An Imam had been invited to "Iftar," which is the meal taken at sunset during the month of "Ramadan," or month of fasting, and one of the courses served up was this preparation of "Patlijan," which the Imam ate with great relish, exclaiming after each mouthful, "Ugh Bailiyorum," which signifies "I am fainting," or, in other words, it was so delicious that he was quite overcome. When at length he had finished, he asked the guest sitting next to him if he knew what the dish was called; the guest replied, "Imam Baildi." Now, I ask, which is the correct tale?

Replying to your correspondent M. N. Bodamialisade, as I am not competent on the question as to what Mohammed advised, I will accept your correspondent's statement. In regard, however, to the question of Imams' lighting the lamps in mosques, I know that they have persons whose duty it is to do this work; at the same time, I would remind your correspondent that, as a matter of fact, there are many mosques in the provinces as well as in many poorer quarters of the city where the Imam lights the lamps, because I have seen it done; besides, carrying out a religious duty cannot be considered at all derogatory, no matter what the function is.

As to whether the dish "Imam Baildi" is appreciated or not is a matter of taste, and the statement that it is rarely cooked in the "houses of high-class people" makes it none the less a very much-sought-after dish by all "gourmets."—I am, etc.,

November 6. ALFRED C. SILLEY.

## THE GREEK SUCCESSION.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—According to a French paper, M. Vénizélos will probably address himself to the Royal House of Belgium for a successor to the Greek Throne, in case Prince Paul continues to refuse to recognise that he alone is the constitutional heir to his late brother.

This curious news, unless it has been published as a semi-official view of the Quai d'Orsay, is more interesting from a historical point of view.

Through a protocol signed at the Foreign Office on February 3, 1830, by Lord Aberdeen (Great Britain), Count de Montmorency-Laval (France), and Prince Lieven (Russia), the Government of Greece was offered to H.R.H. Prince George-Christian-Frederick Leopold of Saxe-Coburg, Duke of Kendal (son-in-law of King George IV.), who accepted the title of "Prince Sovereign of Greece," which, however, he renounced on May 21 of the same year, because of the strait frontiers of Greece. He also emphasised in his carefully worded Act of Abdication that "he never gave the President [i.e., Capodistrias] reason to believe that he was likely to adopt the Greek religion." A year afterwards Prince Leopold was elected as the first King of the Belgians, and during his thirty-four years' reign he acquired the fame of being Europe's "Justice of the Peace."

Although the memory of King George I. is still revered in Greece, where the change of dynasty will find the Greeks not so apathetic, as is supposed, and given that the Greek people are not yet mature for a Republican régime, we have reason to believe that the members of the Greek branch of the House of Holstein-Glucksbourg will renounce their claims of divine rights only in case M. Vénizélos wins in the forthcoming general elections. In such case King Constantine will abdicate *de jure et de facto* in favour of Prince Paul. It will be too late, though, as M. Vénizélos will probably reconsider his old threat about the question of the reigning

Digitized by Google

dynasty, thorny as it is; and certainly no Greek will criticise him if, acting as the mandatory of the General Assembly, he offers the Crown of a Greece much greater than that of 1830 to Prince Charles-Theodore, a descendant of the democratic prince who for nearly four months was known as the Sovereign Elect of Greece, and whose abdication was painfully resented by Capodistrias and the Senate of Greece.

—I am, etc., THEODORE D. MOSCONA.

32, Oxford Street, Manchester, November 3, 1920.

## THE MASSACRE OF HADJIN.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In the excitement caused by the Greenwood trial and the American Presidential election it seems almost impossible to expect that the massacre of 10,000 Armenians would make any impression except among those who have been closely following the gallant stand made by those Armenians against the enormous number of Turkish regulars and irregulars. It is futile to attempt to trace the responsibilities in this new tragedy which has fallen upon the remnant of these sturdy mountaineers. Soon after the Armistice the British and French military authorities encouraged the Armenians deported by the Turks to Syria and Mesopotamia to concentrate in Cilicia. For the Armenian people in those circumstances and every other circumstance this encouragement given by the Allied Powers was naturally regarded as a safeguard of the development and security of the Armenian people in Cilicia. More than 150,000 Armenians gathered within the borders of Cilicia in a few months after the Armistice. Under British military occupation the Armenians of Cilicia practically recovered their former economic position in the course of a few months. Then in November, 1919, British troops were replaced by the French, in accordance with a military convention signed between the two Powers. In February of this year about 20,000 Armenians were massacred at Marash.

As far as it is possible to judge on the merits of the case, the policy followed by France in Cilicia for the last year has been a sublime masterpiece of muddling and inconsistency. The French authorities on the spot, with an eye on Damascus, have alternately pursued a policy of conciliation and a policy of pin-pricks towards the Turkish Nationalists, who apparently do not bother their heads to understand the motives of the French, for they have massacred the French as brutally as they would massacre anybody else.

The City of Hadjin, about 80 miles due North of Adana, had been isolated since last March owing to this muddled policy of the French. These hardy mountaineers of Armenian Cilicia have been accustomed to long sieges and stout self-defence ever since the appearance of the Turks in the West of Asia. In July last the women of Hadjin, despairing of the masterly inactivity of the Allied Powers, appealed to the women of the civilised world, asking their intervention on their behalf. In the meantime, however, the French authorities allowed the Armenians to supply the garrison of Hadjin with flour and munitions by aeroplane. At the beginning of September last, General Gouraud visited Cilicia, and as a result there was a volte-face in the French policy towards the Armenians. The Armenian local authorities were suppressed; the 500 Armenian volunteers who were on their way to rescue Hadjin were disarmed and disbanded and the supply of provisions to Hadjin was stopped.

In the House of Commons last week Mr. Harmsworth stated that Italy had supplied arms to Turkish Nationalist forces. Italy would supply these arms from her zone of influence at Konia, and the Turkish Nationalists seem to have made use of the arms supplied by Italy against the beleaguered garrison of Hadjin.

It is in this way that some of the Allied Powers have begun to exercise their rights according to the Tripartite Agreement signed at Sèvres on August 10 in their respective zones of influence. It is to be hoped that those Powers will put a better interpretation on the terms of the Turkish Treaty respecting the rights of minorities and thus prevent further outrages similar to that which has been inflicted on the brave people of Hadjin.—

I am, etc., ARSHAK SAFRASTIAN.

The Armenian Bureau, 153, Regent St., London, W.1.

November 4, 1920.

## THE FIRST BRITISH FLAG IN BAGHDAD.

At a short service in Canterbury Cathedral on November 3 the Union Jack which was the first British flag to be raised in Baghdad was handed over to the custody of the Dean and Chapter by Lieutenant-Colonel J. Body, D.S.O., O.B.E., T.D., commanding the 5th (Weald of Kent) Battalion, "The Buffs." The flag was hoisted in the early hours of March 11, 1917, by C.Q.M.S. French, of this Territorial battalion, which served in the East from 1914 to 1919, including four years in Mesopotamia. It was the first British battalion in action at Sheikh Saad and the first British battalion to enter Baghdad.

**Mr. Harry Lyne**, who is in charge of Y.M.C.A. work among the troops in Mesopotamia, reports that the hardships of the last few months have been as trying as any experienced in France. The Y.M.C.A. centre at Diwanieh has been closed down, as all the troops have left there, but useful work is being carried on at Hillah, where the waiting-room on the station platform is occupied as a Y.M.C.A. canteen.

# PRESS ON THE NEAR EAST.

### "Lion and Monkeys."

The *Morning Post* on October 27 published an article, "Britain in Egypt," from its Special Correspondent in Cairo. The writer gives some of the opinions on Home Rule for Egypt that he has heard lately. The first quoted is that of an Arab who—

told of the coming of the English to Egypt as of the coming of a lion among chattering monkeys. It was of Divine purpose, he had thought, some thirty years ago, as he noted orderliness and silent industry take the place of the rabble talk of the Egyptian rulers of that time—not Egyptians chiefly, he explained, but Turks, Circassians, foreigners of many kinds; but all muddlers and vain talkers. Under his eyes the rubbish they had made was cleared away, and a new Egypt arose. The monkeys continued to chatter, but they were kept outside the Temple, and might not interfere with the work.

But what, he asked, had come over the English now? Were they, too, learning to talk and to think of what the crowd talked, and to decide by that, instead of by what was justice and right? That which was right surely was right, and not to be changed because the bazaars clamoured. And what was this new religion of Mr. Wilson that they seemed to have accepted? Had they come to forget that there was but the one religion of government, to do justice and to fulfil the work which fell to your hand?

Poor Arab! It is to be feared that his views are hopelessly out of date in this brand-new democratic world. Two Copts, one a merchant, the other a professional man, were concerned with the question of public order:—

"You have seen," they said, "the wild disorder at the railway station the other day when the four delegates arrived. It was because there was no British police officer there in charge. We fear that if the British go away it will be the same in all things. Many Egyptians who paid money to help the Delegation to go to England are now troubled. It was well to join in the cry for Independence; it was popular. But it was all theory and not practical. They did not think there would be any practical result. They did not think England would be convinced."

They wanted to know whether England wished to go out of Egypt because she feared the trouble and expense of staying; and urged that a very small army could keep the country quiet, because the class which is disorderly is very small and very cowardly. They emphasised the latter point by reminding their hearer that "since the man who committed the bomb outrage was executed there has not been any more outrage." An English official of wide experience thought that we had not been doing our job by Egypt as well during the last ten years as we used to in earlier days; that a rather lower class of British official had helped to lower our prestige; and that it is a mistake to crowd the minor posts with British officials. Finally, we have a typical Nationalist who wants "our country free from the source to the mouth of the Nile because it is our country," and an Egypt free from foreigners. On this the writer remarks:—

It is a fair comment on this to quote the estimate of a Cairo journalist that there is certainly less than 30 per cent. of Egyptian blood in the leaders of the Nationalist Party, taking them in the aggregate; and that the Egyptian in asking for the Sudan is hardly following up the principle of "national self-determination"; and if he got it would find it an awkward possession.

The Nationalists undoubtedly will not consider their ideals fully realised unless they secure the Sudan as well as Egypt; and—unless with British military help—they could not hold the Sudan a month, nor indeed hold Egypt against Sudanese raiders.

### Egypt.

On the following day the *Morning Post* dealt with the military aspect of the new Egypt. It made a very plain statement of this point of view:—

Holding the Canal zone presumably means from Port Said to Suez. Now if Egypt is to be independent, with full rights in foreign affairs, from a military point of view the soldier is bound to think of it as a possibly hostile country, with a possible ally in some future war. What are the chances of holding the Canal zone with Egypt hostile and having an ally of real fighting value? It would be for our troops another Gallipoli, with the necessity of carrying every ounce of water needed for the Army by sea. From a strategic point of view, to hold the Canal zone with any security there must be garrisons at Cairo and at Alexandria, particularly at Cairo. The "sweet water canal" must be held as well as the salt water canal. No soldier who knew his business would report otherwise, no matter what force was to be stationed in the Canal zone

If we are to hold the Sudan without having Egypt as a base the military position in the Sudan will have to be reconsidered, and reconsidered in terms of greatly increased garrisons and greatly improved transport arrangements from the Red Sea. To keep the Sudan as a kind of province of Egypt is a fairly simple matter. If Egypt becomes a foreign country, with the possibility of being a hostile country, the garrisoning of the Sudan and the organisation of supply and transport for its garrison will become a great military commitment.

There is an idea with some people in England that Home Rule for Egypt will represent a great economy; that we shall be able to withdraw practically all our troops if we give the Egyptian

Digitized by Google

Home Rulers what they want. The soldier's mouth is silenced in matters of politics. But he should be allowed on this point to declare the truth: that if we give Egypt practical independence, and resolve at the same time to hold the Suez Canal and the Sudan, we shall be committed to a military policy of which the vast expense will be certain, and of which the complete security will never be certain.

**Armenia.**

The leading article of the *Manchester Guardian* of November 8 deals with the urgent question of Armenia. It begins by stating the problem:—

The situation of the Armenian people since the Armistice has been an "acid test" of Allied policy in the Middle East. When this test is applied the official complacency with which the unpalatable facts have been compounded for public consumption is effectively dissolved, and nothing is left to hide the selfishness and the imprudence of the course to which the Allied nations have been committed in the East by their Governments for the past two years. But the Armenian situation has now reached its crisis. At the forthcoming Assembly of the League of Nations the question of a mandatory for Armenia is to be raised on a report from the Council of its negotiations with the Supreme Council of the Allies last spring. And at the moment this discussion is taking place, and while it is still in the academic stage, the Armenians will be struggling for life and death to defend the last two cities of refuge left to them after the crowning disasters of the war—the Republic of Erivan (in the former Transcaucasian territories of Russia) and the district of Cilicia (on the Mediterranean seaboard of the former Ottoman Empire). The Republic of Erivan is the victim of an alliance between the Soviet Government at Moscow and the Turkish Nationalist organisation at Angora, and is now being invaded by a Turkish force. And in Cilicia the Armenian population is being attacked by the same Turkish organisation, with as yet no effective opposition by France.

It proceeds to indulge in what it calls a "humiliating retrospect," and concludes:—

In this critical situation there are three main things to be done. First, the Supreme Council of the Allies, having appealed to the League (of Nations) to undertake a responsibility for Armenia which in other cases, when it suits them, they have vindicated for themselves, must loyally back the Council of the League in its endeavour. The frontiers of Armenia must be settled and adequate financial guarantees provided for a presumptive mandatory. Otherwise the League, with the best will in the world, will hardly have a chance of inducing one of its members to undertake the Armenian mandate. Secondly, the French Government, which happily has recently abandoned its complacent policy towards Mustapha Kemal since he joined forces with the Bolsheviks, must take effective steps to assert its authority against his forces in Cilicia. By the Treaty of Sèvres the greater part of Cilicia reverts to Turkey, but by the tripartite treaty, signed simultaneously by France, Italy, and Great Britain, Cilicia is recognised as a French sphere of economic influence, on condition that France protects minorities there against Turkish persecution. At present France is neither effectively protecting the Cilician Armenians nor helping them to protect themselves. The third thing needed is to induce a similar change of policy on the part of the Moscow Government. The best contribution which the Allies could make towards relieving the situation at Erivan would be to make a genuine peace with Moscow without further delay.

## MUSICAL NOTES.

**M. Siloti's Last Recital.**

I have already said that M. Siloti's playing grows on one, and in his last recital this season, given at the Wigmore Hall on October 30, I knew it had grown on me. For he has a sanity which, while demanding in these unusual days time for its appreciation, finally conquers; and he has a sincerity which, however frank in its excesses, is really compelling. To hear him play (with M. Ilmari Hannikainen, a very worthy partner) Mozart's Sonata in D major for two pianofortes, was a very rare joy, for, except in those heavy moments when he could not forget how like Beethoven it might be made, his pure, unaffected fingerwork was utterly delightful. It was, through M. Siloti, the appeal of Mozart himself, and naturally it succeeded. As a specialist in Bach M. Siloti improves with hearing; much as I liked his first rendering of the Sicilienne and the Chromatic Fantasia and Fugue, he was still more attractive at this recital. Before he could break the spell with some Preludes (as I knew he would) I had gone, so that my memories of him were wholly pleasant.

**Some Violinists.**

There has been some distinguished violin playing recently. At the last Quinlan concert M. Thibaud gave fresh evidence of the fact that he is in the class of Kreisler and Ysaye. And M. Michael Doré, who used to be violinist to the Tsar of Russia, showed in a recital the other day at the Wigmore Hall that for volume of tone, at any rate, he stands apart. Twice during the past week M. Manuel de Sicard, soloist to Her Majesty the Queen of Roumania, has given concerts; and M. Heifetz has again appeared at the Queen's Hall.

M. Heifetz, whose recital was on November 3, is a unique wonder, for never was such extraordinary skill exhibited with so little result. There can be no question about it now: this violinist's playing is for admiration, not for enthusiasm. His fiddling is a thing of beauty, but its loveliness does not increase. Technically, M. Heifetz is poles apart from most, but he has not yet found the truth. In the "Devil's Trill" he could not let us forget, but merely reminded us, what Quiroga did with Tartini last season; for one cannot contrast, one generally compares unfavourably, his reading with any other master's. No matter what he does—whether it be unaccompanied Bach, or Ernst's jejune concerto in F sharp minor, or a Chopin nocturne, or a Hungarian waltz of Brahms—it is always the same; he is the versifier, never the poet. Exquisitely polished verse his is, it is true; no false quantities, no false rhymes, and but rarely a false subject (the Ernst concerto and Glazounov's "Meditation" were examples of this rarity); but his stanzas do not move, they have but charm and no conviction. Whether he will eventually add to his present vast powers the art of interpretation I do not know, but such addition would surely make of him one of the finest fiddlers the world has ever seen.

Far humbler, less famous, and much less accomplished than the violinists named above is Miss Katharine Kendall, who, assisted by Mr. Leonard Borwick, gave a recital at the Æolian Hall on November 1. But it was both because of her faults and because of her refinement that this concert was a rare enjoyment. The deficiencies of the amateur she has in abundance; uncertain intonation, lack of finish, and the absence of confidence which inhibits a complete *abandon*: but she has just as fully the amateur's virtues, sincerity, impeccable taste, and unaffectedness. These are the qualities which brought conviction to her playing; these are what made it an unalloyed pleasure to listen to even so big a work in her hands as Cesar Franck's Sonata. As I predicted some time ago, when Miss Margaret Fairless brought them out, J. R. Heath's three Macedonian pieces have become popular among the discerning, and it was not surprising therefore to find that Miss Kendall included two of them—"An Old Shepherd at Sundown" and "Vodena Market"—in her programme. She missed a little of the atmosphere of the first, but the rhythmic chatter of the second she splendidly secured.

To have the assistance of Mr. Leonard Borwick is both a distinction and a help, for he is one of the old school of British pianists who, partly through their contrast with the modern school, but chiefly through their own inner grace, never fail to charm. His Schumann was a thing of natural but exquisite beauty: the music flowed unrufflledly its own course, and its satisfying power was complete.

Further evidence of Miss Kendall's taste was in her choice of Miss Anne Mukle as accompanist, and in her selection of Brahms' Trio for Pianoforte, Violin and Horn.

**A Chamber Concert.**

The London Chamber Concert Society began its series at the Wigmore Hall on November 2. This excellent society is giving concerts on every Tuesday in November—concerts not to be missed by any lover of chamber music. At the first the Philharmonic String Quartet played Dr. Ethel Smyth's Quartet in E minor and Eugène Goosens' "By the Tarn" and "Jack o' Lantern." The first, to me, was disappointing, its first two movements particularly so. It would be gratifying to think that our one considerable woman composer had written chamber music not unworthy to rank on the same programme as Mozart, but this is impossible. Her ideas, both sound and surprisingly orthodox, were too freely, even exhaustively, discussed; and it was only in the third movement (*andante*) that some writing which was at once clever, original, and beautiful was found. Goosens' two pieces have been praised here before; it is necessary only to add that the first was badly played (extremely badly in consideration of what a fine body they are) by the Philharmonic String Quartet. Miss Fanny Davies, who belongs to the same school as Mr. Borwick, played well five movements from Schumann's "Kreisleriana," but to find justification for her inclusion in a concert of this standard of Sgambati's Minuetto Vecchio and Toccata in A flat was difficult. It was an excellent notion to end this concert with Mozart's rarely heard Trio for Pianoforte, Clarinet, and Viola in E flat major, but an obvious lack of rehearsal denied the possibility of any excellence in performance. Over so unusual and so beautiful a work as this it was a great pity to have such remediable differences as those of *tempo*. Mr. Raymond Jeremy (viola) was almost indiscreetly modest, but the leading of Mr. Charles Draper (clarinet) was at times fierce, and scarcely lessened the independence of Miss Fanny Davies at the pianoforte. However, there is a certain atmosphere of music at the concerts of this society, and even if dutiful critics do find faults here and there, well—it does not matter overmuch.

ANDANTE.

# NEAR EAST BOOKSHELF.

I.—"UNDER THE TURK IN CONSTANTINOPLE." A Record of Sir John Finch's Embassy, 1674–1681." By G. F. Abbott. (London: Macmillan and Co., Ltd. 18s. net.)

II.—"WHEN THE BLOOD BURNS." By E. W. Savi. (London: G. P. Putnam's Sons.)

## I.—AUTRES TEMPS, AUTRES MŒURS.

We are beginning to realise more and more how exceedingly difficult it is to get any really valuable inside information on the true history of the people in our own or any other country in past ages. The sources which we can draw upon refer us almost entirely to the great movements of State, and we are thankful when they go just a little further and allow of a peep into the inner workings of the State machinery, specially when they give us some liftle glimpse into the inner workings of the minds of those who used that machinery.

This is what Mr. Abbott's book sets out to do, and, with the intimate historical and local knowledge of the author behind it, it is what it succeeds in doing. The result is a work of the greatest interest and value for the state of affairs in the Turkish capital at the end of the 17th century, and for the relations of the foreign trader in Turkish towns with the powers that were. Every now and then the searchlight throws its beam into odd corners of even greater interest, and we must be grateful that this is so, and not allow ourselves to grumble that the author has not achieved the impossible by letting us see even more.

A queer picture it is. The Grand Signor was still successful in placing himself on a pinnacle to which even the greatest of foreign potentates had no means of attaining. He was not altogether inaccessible to their ambassadors, when it suited him to be polite to them or when they had sufficiently purchased his graciousness. But these ambassadors were looked on more in the light of hostages for the good behaviour of their nationals than as representatives of equal monarchs. They were received only as an act of grace, and it was very easy for them to fall from grace at any time, a disaster which demanded much exercise of humility and much money to retrieve. The Grand Signor acted entirely through his Grand Vizir in such matters, and access to the Grand Vizir was to be had only by proper propitiation of his Kehayah or steward. These officials were seldom apt to value their services at a low figure, and were eager to take advantage of the most trumpery incidents to impress on the unbeliever the necessity for gratifications. Nor were our representatives finished when they had been to this, for there was always an army of minor officials who had to be kept in good humour. All these officials, from Grand Vizir downwards, had but a precarious hold on their appointments, which were apt to be ended by the sudden death of the holders. So, not only were they eager to make hay while the sun shone, but our representatives were constantly being placed in the position of having to begin all over again owing to new men coming into power. When one reads of the constant humiliations to which foreign ambassadors were subject, their constant anxiety to keep on good terms with the rascals who ruled the land, their fear that their monarchs might be deprived of the smallest portion of the dignity to which they aspired, and the constant jealousy and bickerings between themselves, one can well understand that such a post was not a bed of roses, and that the big pay attached to it was hardly earned.

It is difficult to praise sufficiently the skill with which Mr. Abbott has treated the material on which he has worked or to give any idea of the extraordinarily lifelike and vivid picture which he presents to us. The following extract, giving an account of poor Sir John Finch's reception by the Grand Signor, will give some idea of Mr. Abbott's style. The reference to "Padesha" is explained by the frantic efforts of Sir John to get even with the French ambassador in getting his master termed *Padishah* (Emperor) at the Sublime Porte instead of *Kral*, or King. His efforts, we may add, were quite vain.

"The proceedings appear to have been marked by rather more than the ceremonial violence customary on such occasions; so much so that those who took part in them could afterwards give only the vaguest and most confused account of what had happened. . . . At the entrance they were each seized by two capijis, one holding them under one arm, the other under the other, and were dragged in. As soon as ever they crossed the Sublime Threshold, their conductors, laying their hands on their necks, forced them to bow down till their foreheads touched the floor: once—twice—thrice; and immediately afterwards all, except the Ambassador, his secretary, and chief dragoman, were hustled out again in such a manner that the Treasurer, who came out first, swore that he saw practically nothing—only in a general sort of way he had an impression of a very large, dimly lighted room, with in it something that looked like a thing they call the Grand Signor. The poor Cancelier, being a little man, was crushed quite down at the door, and the oldest merchant nearly tumbled over him as he lay sprawling over the Sublime Threshold: so they saw even less than the Treasurer.

"The Ambassador stayed in about four minutes altogether. . . . After the three compulsory prostrations, Sir John's Dragoman was ordered to read His Excellency's address—just twelve and a-half lines given to him beforehand in Italian: 'wherein was all His Majesty's titles that I could thinke of and the word Padesha in, where there was occasion to putt it, at which my Druggerman being a little startled when I gave Him the Paper the day before I went in, I bad Him fear nothing for I was to be by Him.' But in spite of the brevity of the speech, in spite of his rehearsal of it, in spite of the Ambassador's protecting vicinity, poor old Signor Giorgio, what with the violent exercise he had just undergone, what with the Grand Signor's scowl, was so flurried that he very nearly lost the thread. That done, the Secretary handed the King's Letter to the Dragoman, who passed it to the Vizir, who laid it on the bolster at the Grand Signor's right hand, who cast a kind of scornful eye towards it and said—nothing. The Vizir spoke instead, saying, 'All right,' and, without more ado, Ambassador, Secretary, and Dragoman were dragged out again."

It is interesting to find that Sir John Finch preached in vain to the Levant Company how their trade with Turkey could be increased, if only they would follow the example of their rivals by giving credit. These arguments sound quite modern to a reader of THE NEAR EAST, and "Commentator's" sermons seem to produce almost as little effect as Sir John's did.

It is quite impossible to do justice to this fascinating and scholarly book in the space available to us. We can only urge our readers to buy it and enjoy it themselves at leisure. The pictures add to the interest of the text, and the index is welcome. The only fault that we can find is in the unnecessarily heavy paper which the publishers have used, making the book rather uncomfortable to hold.

C. S.-W.

## II.—DREARY SENSATIONALISM.

E. W. Savi takes her title from the lines:

". . . . I do know,
When the blood burns how prodigal the soul
Lends the tongue vows."

Marcelle Raeburn listens to the vows of David Stallard when he persuades her that his elderly wife—whom he was forced to marry for the sake of his firm's finances—means nothing to him, and that a life of true happiness is to be found for Marcelle and himself near a small station in Bengal. Here she meets Stallard's magnanimous and idealistic friend, Roddie Carr, and him she eventually marries—after she has become thoroughly disillusioned about David and has suffered many tribulations.

The characters have their qualities clearly labelled, in case we should miss their significance in the story, and the author propels them through as many sensational scenes as possible, mostly—until the very sugary ending—of a painful character. Probably these are meant to thrill the reader; but they produce, as does the rest of the novel, only a feeling of rather disgusted boredom.

# PERSONAL AND GENERAL.

**TO-DAY.**

November 11 (new style).
October 29 (old style).
Safar 30, 1339, A.H., of the Moslem calendar.
Marheshwan 30, 5681, of the Jewish calendar.

Princess Cantacuzène has arrived in Paris from Bucharest.

Lord and Lady Oranmore and Browne have returned to London.

M. Titulesco, the Roumanian Minister of Finance, left for Paris on November 7.

M. Gueguetchkori, the Georgian Minister for Foreign Affairs, has left London for Paris.

Sir C. Sankaran Nair is on leave in India, and does not return to London until March.

Prince Habib Lotfallah, the Envoy of the King of the Hejaz, visited the Foreign Office on Friday.

M. Nicolas Vladesco, Secretary to the Roumanian Legation, left London last week for Paris, on leave.

M. Matila Costiesco-Ghyka, Secretary to the Roumanian Legation, left London on November 6 for Bucharest.

The Greek Minister, M. Demetrius Caclamanos, was received at St. James's Palace on November 3 by the Prince of Wales.

The Queen of Roumania has arrived at Zurich from Bucharest, to visit the grave of her mother, the Duchess of Edinburgh.

Dr. and Mrs. A. C. Inman have returned to London from India after a six months' visit to his Highness the Maharaja of Nepal.

Sir Davoud Khan Meftahos Saltaneh, the newly appointed Persian Minister to the Court of St. James, has arrived in London.

M. Madjaroff, the Bulgarian Chargé d'Affaires, is leaving London shortly for Warsaw, in connection with the forthcoming visit to that city of M. Stambolisky.

The Sultan of Egypt, according to a Cairo message, has conferred the Grand Cordon of the Nile on Sir Paul Harvey in recognition of his eminent services to Egypt as Financial Adviser.

Lieutenant-General Sir C. H. Harrington left London on November 2 to take up his appointment as General Officer, Commanding-in-Chief, the Army of the Black Sea. He is expected to arrive at Constantinople to-morrow.

Captain R. F. Briscoe, who died recently at Shamley Green, Guildford, served in the Naval Brigade in the Crimea, and was twice mentioned in despatches for services rendered in connection with the bombardment of Alexandria.

Dr. Stancioff, the newly appointed Bulgarian Minister to London, is accompanying M. Stambolisky on his visit to Paris and other European capitals, and is not expected to take up his duties in London before the New Year.

His Excellency Doctor Vojtech Mastny was received in audience by the King on November 6, and presented his Letter of Credence as Envoy Extraordinary and Minister Plenipotentiary from the Republic of Czecho-Slovakia.

A course of four public lectures, on "The Bhagavadgita," will be given at the University of London, University College, by Miss D. J. Stephen, of Newnham College, Cambridge, on November 18 and 25, and December 2 and 9, at 5.30 p.m.

Accompanied by the Premier, the Sultan of Egypt last week visited Damanhour, the capital of the Behera Province. The Sultan will probably visit Mansura during this month and make an extended tour in Upper Egypt in December.

A marriage has been arranged between Captain N. G. Hind, M.C., 2nd King Edward's Own Gurkhas (Simoor Rifles), and Marguerite, eldest daughter of the late Captain A. Hall, Royal Irish Rifles, and Mrs. Hall, of Gloucester House, Jersey.

A marriage has been arranged, and will take place in December, at Patna, India, between Captain Marsh, M.C., R.A.M.C., and Stephanie Maud, only child of Sir Edward Gait, K.C.S.I., C.I.E., Lieutenant-Governor of Bihar and Orissa, and of Lady Gait, C.B.E.

Mr. Thomas Russell, J.P., of Haremere, Etchingham, Sussex, who died on July 6, leaving estate of the value of £77,470, bequeathed £200 each to the United Free Church of Scotland for the "Charles Russell" Mission, Palestine, and to the Russell Homes for Soldiers, Cairo.

Sir Arthur Yapp left London last week on a three months' visit to India, on the invitation of the National Council of Y.M.C.A.'s, to attend the tenth national convention of the Young Men's Christian Associations in India and Ceylon, which meets in Calcutta this month.

Sir Charles James Lyall, K.C.S.I., C.I.E., late Indian Civil Service, of Cornwall Gardens, S.W., who died on September 1, aged 75, left estate of the value of £44,214 gross and £43,613 net. He gives to his wife £500 and such furniture as she may select, and her income is to be made up to £1,200 a year, free of income-tax. The ultimate residue goes to his children.

## APPOINTMENTS, ETC.

Mr. H. E. Bowman, C.B.E., of the Egyptian Ministry of Education, who recently returned to Cairo from Mesopotamia, has been seconded by the Egyptian Government as Director of Education under the Palestine Government, and is proceeding to Jerusalem immediately to take up his duties.

Lieutenant-General Sir H. Vaughan Cox, on reaching the age of sixty, has retired from the Secretaryship of the Military Department of the India Office, and with Lady Cox has left for the Continent. Lieutenant-General Sir Alexander S. Cobbe, V.C., who acted for Sir Vaughan Cox during his deputation as a member of the Esher Committee, has now been appointed his successor.

The Secretary of State for India has made the following appointments in the Indian Educational Service:—

Mr. H. Dippie, D.S.O., M.A.Cantab., to an Inspectorship of Schools in Bihar and Orissa.

Mr. C. A. Phillips, M.C., B.A.Cantab., to a Headmastership in the Central Provinces.

Mr. R. Wolfenden, M.B.E., M.Sc., A.M.I.M.E., as Professor of Mechanical Engineering at the Civil Engineering College, Sibpur.

He has also appointed Mr. C. R. Copeland as Instructor of Mechanical Drawing at the Civil Engineering College, Sibpur.

## WAR HONOURS.

The following list of Decorations and Medals awarded by the Allied Powers at various dates to the British Forces for services rendered during the course of the campaign:—

**BY THE KING OF THE SERBS, CROATS, AND SLOVENES.**

ORDER OF THE WHITE EAGLE (WITH SWORDS).

*4th Class.*

Temp. Lt. W. Hine, O.B.E., S. Wales Bords.

ORDER OF THE WHITE EAGLE.

*5th Class.*

Hon. Maj. R. N. G. Bingley, Spec. List.

**BY THE GOVERNMENT OF THE CZECHO-SLOVAK REPUBLIC.**

CROIX DE GUERRE.

Temp. Col. H. C. Bickford, C.M.G.; Temp. Maj.-Gen. J. H. Elmsley, C.B., C.M.G., D.S.O.; Br. Lt.-Col. A. H. H. Powell, Canadian Forces.

**BY THE MAHARAJADHIRAJA OF NEPAL.**

ORDER OF THE STAR OF NEPAL.

*2nd Class.*

Tempt. Brig.-Gen. W. D. Villiers-Stuart, C.B.E., 5th Gurkha Rifles; Maj. Gen. N. G. Woodyatt, C.B., C.I.E., Ind. Army.

*3rd Class.*

Maj. W. B. Baker, O.B.E., 10th Gurkha Rifles; Temp. Maj. W. D. G. Batten, 3rd Gurkha Rifles; Actg. Maj. T. H. Battye, 10th Gurkha Rifles; Capt. W. St. J. Carpendale, 1st Gurkha Rifles; Actg. Col. T. H. Foulkes, C.I.E., F.R.C.S.; Lt.-Col. J. W. Grant, M.B., I.M.S.; Capt. J. L. Johanson, 7th Gurkha Rifles; Lt.-Col. W. C. Little, 6th Gurkha Rifles; Actg. Maj. A. S. Mackay, M.C., 7th Gurkha Rifles; Majs. A. L. M. Molesworth, 8th Gurkha Rifles, W. B. Northey, M.C., 1st Gurkha Rifles; Lt.-Col. C. McL. Porteous, ret. pay, Ind. Army; Capt. G. G. Rogers, 1st Gurkha Rifles; Maj. H. M. D. Shaw, D.S.O., 1st Gurkha Rifles, Ind. Army

The King has given the following authority to wear decorations of the Order of the Nile, conferred by the Sultan of Egypt in recognition of valuable services rendered under the Egyptian Ministry of the Interior:—

Insignia of Fourth Class.—A Pringle, Director, Police Stores, Cairo; W. S. Roberts, Inspr. Ministry of the Interior; Bimbashi H. Vernon Jarvis, Inspr. Cairo City Police; W. D. Blake, Supt., Cairo City Fire Brigade.

Insignia of Fifth Class.—Bimbashi T. W. Weller, Sub-Director, Police Stores, Cairo.

## AT GENERAL JACOB'S TOMB.

Recent letters from missionaries on the frontier speak of the state of uncertainty and unrest among the frontier tribes, which necessarily affects the work of the hospitals. Dr. R. J. H. Cox, a C.M.S. missionary at Peshawar, on the N.-W. Frontier of India, writes as follows:—

"In February I went down to help in the work at the mission hospital at Shikarpur. This was a record year, and in six weeks 1,241 operations for cataract were performed, with 1,033 other operations. Shikarpur is near the old frontier station of Jacobabad. I made a pilgrimage there, this time to the tomb of General Jacob, after whom the place is named, and was interested to notice that the tribesmen of the frontier still go and light lamps on his grave when they are in trouble. Such is the lasting influence of a godly man among these fine people."

## NEWS IN BRIEF.

General Gouraud, French High Commissioner in Syria, is expected in Paris in about a week's time.

For the first time in the history of Roumania, says the *Jewish Guardian*, a training college for Jewish teachers is about to be opened in Braila.

Mr. Israel Cohen has collected altogether £78,800 during his tour in New Zealand on behalf of the Palestine Fund. He is now proceeding to Hong Kong.

The trustees of the National College at Amritsar have unanimously rejected non-co-operation, thus acting on the same lines as the trustees of the Aligarh College.

The Secretary of the Admiralty announces that the torpedo-destroyer Stonehenge is ashore at the entrance to the Gulf of Smyrna. All officers and men are safe.

Italy has closed the coast of the Gulf of Syrtis (Libya) to commerce pending the release of the Italian garrison of Syrtis, which has been captured by the natives.

Mr. Abram I. Elkus, formerly United States Ambassador to Turkey, has been selected as the American member of the Aaland Islands Commission of Investigation.

In conformity with the Bulgarian Peace Treaty, the Yugoslav Foreign Minister has given orders that Bulgarian prisoners remaining in Serbia shall immediately be repatriated.

At the conclusion of the All-India Trade Union Congress on November 2 a resolution was passed condemning the attitude of the employers towards the strikers in Bombay and urging the Governor to intervene.

His Majesty's ship Centaur left Constantinople on November 4 for Odessa, carrying 43 Bolshevik prisoners to be exchanged for British prisoners from Baku. The latest news received states that the British prisoners have reached Tiflis.

The High Commissioner of Palestine has announced that the Administration is prepared to recognise the elected Assembly as representative of the Jewish population, provided that the Assembl recognise the mandate of the League of Nations and retain its representative character.

Two important bequests have recently been received by the British Museum in the collections made by the late Mr. H. B. Earle Fox and Mr. F. W. Hasluck. Mr. Earle Fox was a well-known student of Greek and English coins, and the gift of the Greek portion of his collection has greatly strengthened the Museum series. Mr. Hasluck, who was Assistant Director of the British School at Athens, was a keen collector, especially of European coins struck in or exported to the Levant. By the terms of his will, the first selection from his collection has been given to the British Museum, which has thus acquired over 1,200 pieces, many of them rare and curious illustrations of the history of the Italian colonies in the Levant, as well as of the Levantine trade in general during the sixteenth and seventeenth centuries.

Messrs. Raphael Tuck and Sons set themselves a very high standard in the matter of Christmas and New Year cards, but each season they come up to that standard, and this year is no exception to the rule. We have received from them samples of greeting cards of many kinds, including the Royal cards, and we congratulate the firm on the beauty of design and excellence of production that all of them show. Whether they take the form of private greeting cards, of calendars, or of the popular postcard, they are the best of their kind and sure to give pleasure to sender and recipient alike. Our readers who send cards, whether now to friends abroad or later on to friends at home, cannot do better than go to the dealer who stocks Messrs. Tuck's productions; and any one looking out for a gift book for a child should bear in mind the "Legends" series, which would be hard to beat.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses. Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—

"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO
(The visitor's name and place of residence abroad to be added)."

which would indicate that two rooms were required at Matlock on the 20th of the month.

**BRISTOL**
GRAND SPA HOTEL.

**EXETER**
ROYAL CLARENCE HOTEL
*(facing beautiful Cathedral).*

**LONDON**
HOTEL CRANBOURN
67a, Shaftesbury Avenue, W.C.2.
Self Contained Suites.

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
SMEDLEY'S HYDRO.

**TORQUAY**
VICTORIA & ALBERT HOTEL.

*Cairo's Hotels de Luxe.*
SHEPHEARD'S HOTEL.
Open all the year round.
SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

## BRITISH POLICY IN PERSIA.

With most of the criticism levelled against the British Government's policy in regard to the Middle East we confess to being entirely out of sympathy, and we see no reason to modify this point of view even when the attacks of *The Times* are reinforced by the measured arguments of the Aga Khan. It might be difficult not to share some of the misgivings of the latter, if there were any ground for supposing that the condition of affairs which His Highness condemns was other than a passing phase for which Great Britain is by no means wholly responsible. Instead of "the wild and reckless adventures" against which he inveighs we seem to have witnessed a total absence of any clear design, much less of any definite policy. Adventures imply driving power or at least direction, and the Aga Khan admits in the same breath that British policy has been "without coherence and without clear direction." Is it not more probable that Great Britain's difficulties in the Middle East are due to her attitude of *laissez faire*, which encouraged the Arabs to indulge in their traditional recreation of fighting and looting, and allowed the Bolshevists to advance into Persia, and to make a bid for authority in Afghanistan? We are not concerned to defend the administration of Mesopotamia, but in common fairness it has to be admitted that its mistakes were of local origin, the result of the authorities being left without instructions rather than being charged with any policy of aggression or adventure. When once the Arab rising had broken out, only a personal vendetta or a hopelessly unmilitary and unpractical mind would prompt the suggestion that the British should withdraw from Mesopotamia before the rising had been quelled. If Indian opinion is exercised over the retention of Indian troops in Mesopotamia, it is ungenerous on its part to insinuate that their presence there is necessarily connected with any policy of adventure. The facts are well known to all. Mesopotamia was conquered by force of arms, and until the future status of the country had been arranged there could be no question of withdrawing the army of occupation. The delay in the settlement of the Turkish peace terms was in no way the fault of Great Britain. A mistake made by the British Government was to reduce the strength of the Army in Mesopotamia below the safety limit. It can be claimed that, apart from the errors of judgment of administrators on the spot, Great Britain has done nothing at variance with the correct policy of a Mandatory State to train the people in the science of self-government. The Aga Khan's misgivings in regard to Mesopotamia, we venture to think, are mainly the product of his dislike of the recommendations of the Esher Committee. As for the latter, it is altogether ignored that they are the suggestions of an advisory body, and have not received the *imprimatur* of Government approval. It is, therefore, wide of the mark to invest them with the authority of Government policy, and for this reason much of the Aga Khan's criticism falls to the ground. His indictment, none the less, merits careful attention; for if a responsible Indian of his sagacity and statesmanship can labour under erroneous impressions, it is evident that scores of lesser intellects will be still more at fault, and the British Government should take care that the misunderstandings are removed.

But while the Government can make out a good case in regard to Mesopotamia, it does not follow that it has equal justification for its policy or absence of one in Persia and Central Asia. Here, again, the determining factor would seem to have been military necessity. To safeguard the integrity of Persia it was natural that an attempt should be made to shut up the Red armies in their own territory and to prevent them from overrunning Persia. The presence of British or Indian troops at Enzeli or Meshed, therefore, is not necessarily a symptom of "wild and reckless adventure," but would be strictly in accordance with sound defensive strategy. That this particular military enterprise has remained more or less "in the air," without leading to any definite result, is due to a set of circumstances entirely ignored by the critics who are obsessed with the bogey of Asiatic adventure. In the light of subsequent events it was, no doubt, unfortunate that Great Britain negotiated an agreement with Persia without notifying the French Government of her intentions. (Our very captious Allies, it may be remarked in passing, would probably base a grievance on a similar omission in regard to any understanding with Canada or India.) But no one can dispute that the Anglo-Persian Agreement was a genuine attempt to solve the Persian problem in the manner most satisfactory to Persian *amour propre*, and the most calculated to preserve the integrity and independence of Persia. That Agreement has not yet been ratified, for two reasons. In the first place the Shah would seem to have derived from his visit to Paris this year direct encouragement to thwart the ratification of the Agreement; secondly, his own interests and the interests of the clique surrounding him are linked up with the maintenance of a corrupt system, which would be in danger of coming to an end, if the Anglo-Persian Agreement were to be carried into effect. Unfortunately, the British Government in its short-sightedness and in the absence of a practical policy, is merely playing into the hands of an effete administration by providing it with money, without insisting upon the performance of Persia's share of the bargain.

The mistake made by the British Government, in perfect good faith, is that it has attempted to bolster up a system which is inherently unsound. It is the presence of British troops in North Persia that has given rise to charges of reckless adventures, and the troops have been sent so far north only because of the fetish that the fortunes of a country are invariably linked up with its capital. In the case of Persia it would be more correct to say that all its misfortunes are derived from that particular source. But for the restraining presence of Great Britain the good sense of Persia would probably have rid the land long since of the incubus of a corrupt bureaucracy. By depriving the Persians of their crude remedy for the ills that beset them, we are encouraging a revolutionary element of a different type, which will be actuated by more advanced doctrines than the mere desire to wipe out the incompetent and to make way for better men. Recent events should have provided us with an object-lesson of the hopelessness of any attempt to assist the Persians to make good in Teheran. We might accomplish something with British troops in residence in the capital, but such a course would now not be sanctioned by public opinion in England; and when the time came to withdraw there would be the certainty that city and Government would at once revert under whatever influence might be exerted from the direction of Russia. The solution that we recommend for the Persian problem is to build up the country's salvation from the south. It is the sphere where Great Britain is best known, and where her influence will not have to contend against the corrupt and demoralising atmosphere of Teheran. With the withdrawal of our troops from North Persia, the Shah, Court and the Government would have to choose between fighting their own battles by themselves and removing to Ispahan. If they adopted the latter course, there would be no obstacle to the ratification of the Anglo-Persian Agreement, and no difficulty in giving effect to its provisions. A reliable army and gendarmerie could then be trained, which in time would restore peace and order throughout Persia. The chaos that might result at first in the North would in all probability be localised; for with the lure of Teheran largely eliminated as a result of the removal of the Court and Government the incentive to intrigue would disappear. Persia,

Digitized by Google

however, would still need help and advice, for the whole success of the agreement depends upon the manner in which the necessary assistance is given to the Persians in the creation of an honest and efficient administration. Unless we are very much mistaken, we believe that the right man is already on the spot, in the person of General Ironside commanding the British troops in North Persia, who should be entrusted with the task of setting Persia on her feet. The decision to withdraw to the south would cut the Gordian knot: it would meet Indian misgivings, reconcile the British taxpayer and save Persia from herself.

## MOSLEM TALES FROM JERUSALEM.*

**By Estelle Blyth.**

### THE STORY OF THE SULTAN'S DAUGHTER AND THE THREE RIDDLES.

Long, long ago, when the governor of a city was as a sultan for power and riches, there reigned in Jerusalem a Pasha who was very clever and also very wicked. He made friends with a young man named Hassan, who was the only son of rich parents, and the Pasha loved him as his own soul—until the young Hassan lost his money. After that sad day (whose dawn it is possible the Pasha had hastened), Hassan could do nothing that pleased his friend; and at last it came to a real quarrel between them. Then the Pasha sent for Hassan's father and told him of the quarrel. "It has made my heart bleed for ever," said the Pasha, "for the same city can no longer hold me and your ungrateful son."

What could the poor father do? He begged the Pasha to forgive Hassan, if only because he was young.

"No," said the Pasha, "that I cannot do, for it would lessen my honour in the sight of the people, and am I not, unworthy as I am, the representative of our august master, the Sultan? But listen, I will give your son a letter to a brother of mine who lives in Constantinople, and he will be a friend to Hassan for my sake."

Greatly troubled, Hassan's old father left the Pasha's house. It was possible that Hassan might do well in Stamboul, the city of the Sultans, for he was clever and resourceful; but how was he to raise the money to send him there? As there was no other way of getting the money, he caused himself to be sold, and insisted on Hassan using the money to buy clothes. The means of travelling were another difficulty, and this was only overcome at last by the mother being sold as well, and her price provided Hassan with a horse. Hassan wept much that these things should be, and he swore that he would never rest until he had repaid his parents for their sacrifice. When all was ready, the Pasha gave him a sealed letter to his brother in Stamboul, together with many kind words and two bishliks; and Hassan set forth sadly enough on his long and lonely journey.

After many weeks of wandering and hardship, he found himself one evening at the foot of some bare mountains; and presently he fell in with a tribe of Bedouin, who quickly robbed him of his clothes and also of his horse. Searching his garments for money or valuables, they found the Pasha's letter, which they took at once to their sheikh. Now, the sheikh was a very learned man, and he could read, so he opened the letter. With amazement he read the Pasha's order to his brother: "So soon as he who brings this letter shall appear before you, let his head be lifted up with those of the unlucky men in the city of the Sultans."

The Bedouin thought it would be as well to slay Hassan themselves, to make sure; but the sheikh would not allow it. "Why," he said, "should we stain our hands with the blood of one who is already far down the road of death? Let him proceed to Stamboul; they will surely slay him there."

So the letter was carefully resealed and given back to Hassan, and he was allowed to proceed on his way; he had to walk, however, for his horse was a good one and the Bedouin thought it waste for one whose days were so nearly numbered to keep such a valuable steed.

Weary and ragged, he reached Stamboul at last. Great was his horror, as he approached the city, to see its beautiful walls adorned with rows and rows of human heads. He stopped a man and asked him what this meant, and the man replied: "The Sultan's daughter has sworn to marry no man save him who can answer her three riddles. Those are the heads of the men who have tried."

On hearing this, Hassan, who was full of courage and energy, took his way at once to the Sultan's palace, and demanded an audience of the Sultan's daughter. He was taken to the great hall, where she sat with her father the Sultan; and at the sight of her the heart of Hassan became as water within him, for she was more beautiful than the moon at its full.

The Sultan's daughter put to him the first riddle.

"How can a man wear his father?"

"Even as I did," answered Hassan. "I sold my father and bought me a robe with the money."

The beauty of the Sultan's daughter was darkened by a frown.

"Tell me, bold stranger, how can a man ride his mother?"

Hassan replied: "I sold my mother, and got me a horse with her price."

Then the Sultan's daughter beat with her hands upon the arm of her golden chair.

"Answer me this! I caught a goose for my dinner, I plucked it, and yet it flew away."

Hassan could find no answer to this riddle, but he begged for twelve hours in which to think it over, and this the old Sultan insisted should be given to him. So Hassan made his way to the nearest khan, and sat him down to think. Now, although he knew it not, the Sultan's daughter disguised herself and followed him at a distance, and when she had seen where he went, she returned secretly to the palace.

The khan was kept by an old woman. When she heard that Hassan was a stranger in Stamboul, she said that he might sleep that night on the floor on condition that he would open the door to her daughter, when she came early in the morning to light the fire and make ready for the day's work. To this Hassan willingly agreed; and when night came he wrapped himself in his cloak and lay down, not to sleep but to think. For death seemed to him very near.

At midnight there was a soft tap at the door, and he opened it. A girl stood outside, wrapped in a thick cloak and a veil. She paid no heed to the untidy room nor to the dying fire, but sat down on a little stool, and gazed earnestly at Hassan. Seeing his sorrowful face, she tried him with clever questions and with soft words, until at last she drew from him his trouble: the twelve hours the Sultan had granted him would soon be over, and he had still no glimmering of an answer to the third riddle. Presently the girl went away; and after she had gone Hassan found a handkerchief which she had dropped lying just outside the door.

With early dawn came the old woman who grumbled loudly because her daughter was ill and could not do her work, and so she herself must rise early to do it.

"But your daughter was here not long since," said Hassan, as he set about helping her. "I let her in as we agreed. It is true she did no work, but see, here is the handkerchief she dropped."

"Oh, son of a hundred donkeys!" cried the old woman angrily. "Do such as we trouble ourselves to use handkerchiefs? This is the toy of some great one, which of a truth you have stolen!"

"The third answer!" cried Hassan, filled with joy and understanding. He rushed from the khan, while the old woman screamed after him that he was mad.

The Sultan's daughter received him as before, sitting on a high golden chair beside her father's throne.

"Listen," said Hassan, standing at the steps of the throne. "I caught a goose for my dinner, and it flew away after I had plucked it. Yet it left one feather in my hand—*this!*" And he laid the handkerchief at her feet.

Thus were the three riddles answered, and Hassan and the Sultan's daughter were married amid great rejoicings. Hassan at once freed his father and mother from slavery, and sent for them to come and live with him in Stamboul. And the old Sultan sent men in haste to Jerusalem to behead the unfriendly Pasha, whose head was lifted up on the city walls, as he had thought to do with the head of Hassan.

## THE "'TIS-AS-IF-I-HAD-EATEN-IT" MOSQUE.

The Turkish name of this mosque is shorter and prettier than its English equivalent; but as its full meaning might not be understood at a glance if given in the language of the worshippers, I have ventured a literal translation. One does not know that any guide-book gives its name in Turkish or any other language, or if any casual traveller to Constantinople has ever seen this mosque or heard of the story of its building. It is a mosque, not in ruins but still in good and regular standing, or, perhaps I should say, still a place of worship and used by the Faithful of Scutari on Fridays and what are the "week days" to them. Scutari, just across the Bosphorus from Stamboul, has its great cemetery, its *tekkeh* of Howling Dervishes, its goodly great mosque (Buyuk Djami), and its Chinili mosque; but aside from these outstanding attractions there are many out-in-the-open and also hidden-away places of interest that go uninspected because unadvertised and unknown.

Only a few years ago, before the American College for Girls was moved from Scutari to another and perhaps more commodious hilltop at Arnaoutkeuy, across the Bosphorus, Professor D——, a lady with all the lore, and a great liking for the people and places of the land, pointed this mosque out to a little party of interested friends, the writer among the number. Professor D—— has a kind heart, bright, ingratiating ways, and the speech of the people at her command. This gives her the "open sesame" to the people—the so-called common people who are most susceptible, as are common people the world over, to kindness, and the Moslem man or woman likes to give as well as receive. Whether it was the *caiqueji* who used to row her boat, or the *hamal* who carried her boxes up from the scala, in return for a smile and a few words to them in their own language Miss D—— would be repaid (if she had time to stop and listen) by a proverb, a bit of local news, or a story—for they are intuitive, if not educated, the simple folk, and discovered quickly the little lady's bent for the history and tales of their land. I suspect, then, it was one of these humble friends of hers (though she did not tell me so) who told her the story of the Yeyeissem—as I remember the name—mosque.

It seems that many years ago there was a man in Scutari who had a great liking for rich and expensive food, rare viands, fruit that was out of season—who, in short, was very much of a gourmet. Combined with these very material tastes he had a pious heart, and an ambition to be helpful. But, though a well-to-do man, he could do little in the way of alms-giving, or erecting monuments, because of his selfish indulgence in the most costly food that could be procured.

The two natures in him—the desire to be generous and his delight in the good things of the table—were antagonistic, and did not give him the peace of spirit he desired. The thought was constantly in his mind: how could he do some great thing to acquire merit and to benefit his fellow-men, and at the same time pander to his own exacting appetite? There was not money to do both.

One day, he was seized with a sudden inspiration (we will not lay it to an attack of severe indigestion), and he said to himself: "Why can I not look at every good thing I should like to eat, and say: ''Tis as if I had eaten it,' and take the money these dainties would have cost me and build a mosque to the glory of Allah with it?" This inspiration no sooner came to him than he began to act upon it! He began to live on the simplest fare. He would be seen to gaze at the costly food offered on the streets, or at the bazaars, and would be heard to say: "'Tis as if I had eaten it," and would then pass on. The money thus saved soon enabled him to begin his pious undertaking, and the Yeyeissem, the "'Tis-as-if-I-had-eaten-it" mosque in Scutari, is a monument to his piety and his self-denial to this day.

M. A. P.

## MODERN EGYPT.

Lecturing at the London School of Oriental Studies on November 1, Mr. D. A. Cameron said that although Egypt occupied a unique position on one of the great trade routes of the world her people had never been traders. Since a long time prior to Alexander, her trade had always been in the hands of Greeks or other foreigners. After the founding of Alexandria there was a period of about three hundred years, ending with the death of Cleopatra and Egypt's submission to Rome, another three hundred years until the Roman Empire divided and Egypt fell under Byzantium, and then another three hundred years, making nine hundred years in all, of trading. Then the Arabs took possession of the land, after which little trading was done. After six hundred years Saladin conquered the country and established the military caste of the Mamelukes to rule over it, and, when Venice arose, she offered to become the agent of the Mamelukes for trading to Europe. Thus immense wealth was brought both to Venice and Egypt. This period was ended partly by the opening up of the route to India round the Cape of Good Hope, and partly by the conquest of Egypt by Sultan Selim of Turkey: who not only destroyed every title-deed, making the country his own, but diverted trade northwards through Smyrna and Constantinople. The Turks remained in power, thoroughly mismanaging the country, until about 1800, when Mehemet Ali rose to eminence during the turmoil caused by the Napoleonic invasion. He was the Turkish Pasha, but he established his own army and, following the example of Selim, gradually acquired all the cultivated land of the country. It was during his time that Thomas Waghorn reopened the route to India. Steamers were brought to Suez and other steamers to Alexandria, and letters and passengers were conveyed from one port to the other. A railway was built about 1856. About that time Ferdinand de Lesseps, then French Consul in Cairo, revived the project for a ship canal through the isthmus, and this was eventually opened in 1869.

Mr. Cameron described the beginning of the cotton industry in Egypt; he said it was this that enabled Mehemet Ali to maintain an army to fight the Sultan. When Mehemet Ali died he left Egypt a semi-independent principality to his grandson Ismail; who carried out great schemes to develop the country, but brought it to bankruptcy, partly because of the rapacity of European contractors and partly by his own criminal extravagance. The revolt of Arabi led to the British occupation, which brought the régime of Lord Cromer with a new policy—one of sound finance, patience, hostility to grandiose schemes, and a determination to spend every penny available on irrigation. Lord Cromer reduced the taxation on the fellaheen, and protected them from the native landowner on the one hand and from the foreign money lender on the other. This policy had been continued by his successors. The Egyptian question was not really a political question; it arose from the lack of initiative of the Egyptian people. The country had always been in the hands of foreigners.

## MR. BOURCHIER ON THE BALKANS.

On October 27 Mr. J. D. Bourchier delivered a lecture at Cambridge, to the Cambridge branch of the British Institute for International Affairs, on the prospects of peace in the Balkans. After describing the various unsuccessful efforts which had been made in the past to bring the Balkan peoples together, he explained the circumstances which led to the formation of the Balkan League of 1912. One of the principal obstacles to co-operation between the Balkan States had been the insistence of Bulgaria on the application of the principles of autonomy and self-determination to Macedonia, while Greece and Serbia demanded partition and annexation. At the root of this difference was the circumstance that the Bulgarians possessed the majority in the country and could therefore count on the popular vote. The Balkan League could not have been formed had not Bulgaria partially yielded on this question by conceding Uskub and part of Northern Macedonia to Serbia. The League effected the overthrow of Ottoman domination in the Balkan Peninsula, but the lustre of this great achievement was dimmed by disputes among the Allies over the partition of the spoil and the demand of Serbia for a revision of her treaty with Bulgaria which would enable her to annex a larger portion of Macedonia, led to the second Balkan War, which resulted unfavourably for Bulgaria, owing to the unexpected intervention of Rumania and the invasion of her territory by that power. The Treaty of Bucharest which followed mutilated the Bulgarian nation and sowed the seeds of all the calamities which subsequently befell the Balkans and Europe. The third and still greater mutilation of the Bulgarian race accomplished by the Treaty of Neuilly may therefore inspire us with the most serious misgivings. The temple of Peace has been erected on insecure foundations, for no stable settlement can be hoped for in the Balkans so long as the principle of nationalities is ignored. Already we see the "happy and victorious nations," as M. Take Jonescu describes them, combining with a view to the retention of the spoil—a circumstance which demonstrates the sense of insecurity which prevails amongst them.

## THE ARAB HORSE SOCIETY.

A Council meeting of the Arab Horse Society was held at the Grosvenor Hotel, London, on November 3, Mr. S. G. Hough (Vice-President) being in the chair. A large number of entries were accepted for the Arab Horse Stud Book, Vol. II., and the Arab-bred Register. Preliminary arrangements were made with regard to the Arab and Arab-bred classes for the next Show at the Agricultural Hall, London. The following new members were elected:—Bromwich, Mrs. M. A., Kenfield Hall, Petham, near Canterbury; Cadbury-Brown, Major H. W., Rotchfords, Wormingford, Essex; Clark, Mrs. H. V. Musgrave, White Hart Hotel, Lewes; Denne, Mrs. L. G. L., Waverley, Harold Road, Deal; Lewis, Capt. C. C., Political Officer, Gurneh, Mesopotamia; Lewis, Mrs. C. C., c.o. Capt. C. C. Lewis, Gurneh, Mesopotamia; Lytton, the Hon. Anne, Crabbet Park, Crawley, Sussex; Lytton, the Hon. W., Crabbet Park, Crawley, Sussex; Munck, Capt. Edward, 8, Redcliffe Gardens, S.W.; Owen, A. M., Woodhouse, Oswestry, Salop; Stack, Lieut.-Colonel Charles A., c.o. Messrs. Grinlay and Co., 54, Parliament Street, S.W.; Strickland, Mrs. M. H., Clermiston House, Corstorphine, Midlothian; Summerhayes, R. S., The Lodge, Silverdale Road, Eastbourne; Wilmot, A. M., 3, Trewartha Park, Weston-super-Mare.

## DISTRESS IN TURKEY.

We published last week a letter from Lord Lamington and others drawing attention to the widespread suffering and distress prevailing at this time among the Moslems of Turkey. The following are extracts from a report by the Rev. Dr. Frew on the conditions prevalent among the people among whom the British Red Crescent Society's agents have been working. The address of the B.R.C.S. is, 18, Sloane Street, S.W.1.

I very much regret that my statement of the condition of things among the Turkish refugees is not one of improvement, but the reverse. Besides the thousands in the direst misery in the South of Asia Minor, we have added distress in the North, owing to the Greek occupation of Thrace.

The conditions in the South are still very terrible. Many thousands are yet in the districts to which they fled after the Greek occupation. There they remain without houses, packed like animals in old, disused, tumbling-down barracks and ruinous buildings, with no fuel but the green wood they gather, and which they must burn in holes they dig in the centre of their hovels. . . .

In the North we have the additional care of the thousands who are arriving in Constantinople fleeing from their fear of the Greeks in the newly-occupied territories. They come in the direst misery, leaving everything behind. They arrive, in most cases, with their shoes dropping off their feet, and no clothing but what they are wearing. Among the most pathetic things I have ever seen is the calm patience with which the Turks bear their sufferings. Recently, whilst visiting one of the refugee camps, I found in a broken-down, disused building near the old Seraglio Palace in Constantinople, in a corner between two walls, a dear old Turkish woman—a widow with no one of her own left in the world, yet sitting there in the open air with no mattress under her and no cover over her head. She pleasantly smiled, and was so grateful for our visit and what we were able to do for her. But the Turks are nearly all like that—given any kind of shelter and food they seldom complain. We at once got for the old woman a mattress and blanket and some other comforts, and tried to make her a little more comfortable. Unfortunately she is only one of thousands. The Turks are unusually attached to their children, and it is heartrending to see Turkish mothers—the father often killed or lost, they don't know where—with their babies at their breasts seeking nourishment they cannot give. Tears are in their eyes sometimes as they show you the poor little wan and sickly faces of the little ones they fear they must very soon lose. There is something almost painful in the gratitude of the mothers for the milk and the little nourishment we are able to give. Very many have died, and many more must die if we cannot continue the help begun. We have distributed cases of milk for the babies and many other absolute necessities—but they are so many, and our funds are limited. . . .

What makes the position so much worse is that there are so many thousands of destitute women and orphans from the war, and very many are still in a nearly destitute condition who were refugees just after the settlement of the Balkan War. Stamboul has been so burned down by the devastating fires of recent years that these houseless people have occupied all available places after the fires, and have to remain there, as almost nothing has been done to rebuild on the old sites.

We found some hundreds of people in a great old ruinous building that was long years ago a bakehouse. Windows gone, doors broken, flooring rotten, cold as the grave. Yet here you would find a family of six in one corner, almost always with one or two sick of some sickness due to the hardness of the way they must exist. Frequently they have no mattresses at all; they must sleep on the old boards; frequently they have not even covering, and they try to keep a little warmth by lying close together. . . . Often a new grief is added to the already stricken family, when death takes their beloved. Yet they are so resigned with it all. "It is God's will," they say. But surely it is not meant that they should suffer so.

One of the worst features, and growing every day, is the misery caused by the dismissal of the Government officials in the Greek occupied territories. Before leaving Constantinople I recently visited a large number of these in an old ruinous mosque and medresseh (college). Here were Turkish men, with their wives and children, who had occupied positions in the Government service, suddenly turned out of their work and forced to return to Constantinople to add to the already too-large number of people in distress. . . . So here you find these educated people herded together, with their bundles of clothing and other effects round them, in the most unhealthy conditions, and driven to be dependent on the help that may be given by such a society as the British Red Crescent.

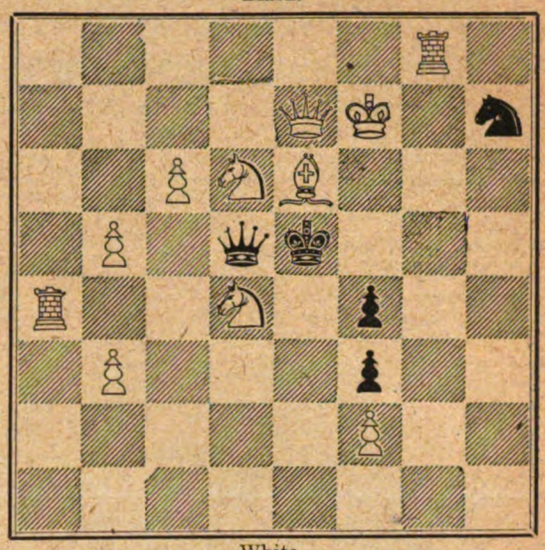
Besides these, there are some fifteen thousand refugees from the Adrianople district who fled to Bulgaria. The Turkish Government have asked for some help for these, and we gave Lt.5,000 out of the money lately sent. . . . The Committee give the most painstaking attention to insure that only the needy are assisted and that everything is put to the very best use. I visited all the various places where the refugees are located and have aranged that the work shall be carried on during my absence. Much has been done, and a great deal of distress relieved, but a great increase of help must be received if those we have been helping are to survive this winter. . . .

And so, in God's name, I appeal for His children's need. May the blessing of the Almighty fall on all who have come to the help of the needy. (Signed) R. FREW.

## CHESS.

PROBLEM No. 25.

Black.



White.

White to mate in two.

The above problem by C. E. Lindmark took the second prize in one of the recent competitions of the G.C.C.P. Club.

Our Belgrade Correspondent writes under date October 26:—M. Kostitch, the famous chess-player, has been visiting Belgrade, where he played eight simultaneous games with the best local players without looking at the boards. Of these, he won seven, the eighth, against M. Pavlovski, a Russian, being undecided.

On October 26 Sir George Thomas gave a simultaneous display at the Imperial Chess Club. Out of the twenty-one games played, he won ten games, drew seven, and lost four.

It is worthy of note that even now, with the wealth of text-books available, it is by no means a unique occurrence for a first-class player to be "caught out" in the opening. A week or so ago there was an instance of this in the City of London Chess Club's championship, when a player opening with the Ruy Lopez, which had always previously served him in good stead, allowed himself unwittingly to be lured into the Riga Variation, which ought to lose for Black, but of which he knew absolutely nothing except its name—knowledge which was, unfortunately, of little service, and down he went in nineteen moves, for the first time for many years.

CARO-KANN.

It was semi-officially announced in Belgrade on November 5, that on the following day Yugoslav troops would take possession of the territories accorded to the Yugoslavs under the Bulgarian Peace Treaty

On the night of October 21-22 the Kamar Bridge camp, on the Tank-Jandola road, was raided by a party of 150 Wazir tribesmen, who escaped with stores and other loot, leaving one of their number dead.

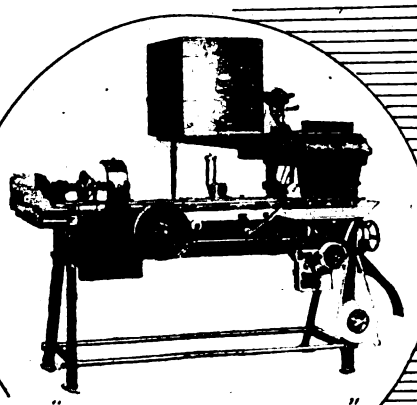
# "STANDARD" TOBACCO MACHINERY

**Every Description of Automatic Mechanical Equipment for the TOBACCO INDUSTRY.**

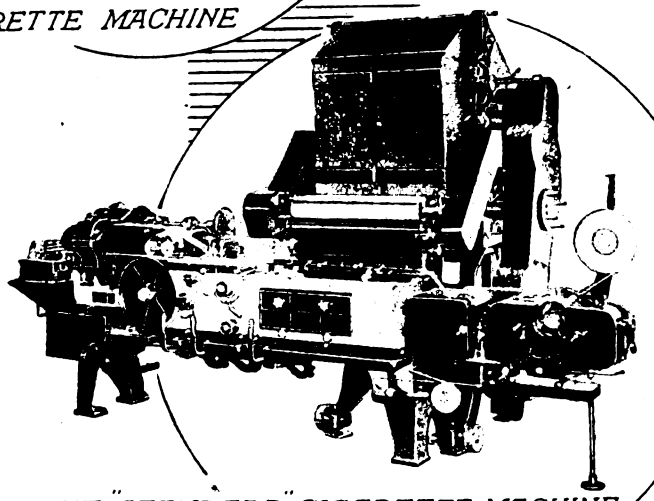


THE "STANDARD-JUNIOR" CIGARETTE MACHINE

## THE "STANDARD-JUNIOR" CIGARETTE MACHINE

Is the ideal model for small manufacturers. Although low in price, it is a highly developed apparatus capable of the utmost perfection of output up to 7,500 Cigarettes per hour and requires only two attendants of ordinary intelligence to operate.

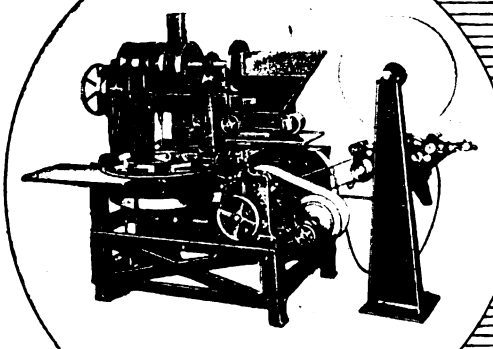
Compare this with the cost of producing Cigarettes by hand or with obsolete inefficient machines.



THE "STANDARD" CIGARETTE MACHINE

## THE "STANDARD" CIGARETTE MACHINE

embodies every conceivable practical refinement for the production of Cigarettes upon a commercial basis, i.e., on a large scale with manufacturing costs brought to the irreducible minimum. It is capable of a higher consistent output of faultlessly made Cigarettes than any other machine existing, and is exclusively adopted in the largest factories throughout the World.



"STANDARD" CIGARETTE PACKING MACHINE

## "STANDARD" CIGARETTE PACKING MACHINES.

No Cigarette Factory is up-to-date without the most modern and efficient Packing Machinery, viz., the "STANDARD." These machines can be adapted for packing Cigarettes of any predetermined size and quantity in either paper "cups" or cardboard "shell and slide" packets, after wrapping them automatically in paper or tin foil or both.

***Illustrated Lists on Application.***

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

After all the criticisms and the representations that have been made it might have been thought that there would have been a general improvement in the postal services to the Near East. On the contrary, serious ground for complaint is still to be found in many directions. Between some Near Eastern centres and the United Kingdom the service admittedly is fairly satisfactory, but in some cases it is as unsatisfactory as ever. Smyrna is a case in point. It appears that papers from London take anything over twelve days to reach Smyrna at the present time as against seven to ten days for French papers. As I have pointed out before, this state of things is not the fault of the British authorities, but of our friends over the Channel, but where the British postal organisation is to blame is in not making effective representations. It is really Gilbertian that while these irregularities continue in the mails the International Postal Congress should have been discussing an increase in the rates. For what?

***

The view held in some quarters that the outlook for the shipping industry is unfavourable will evidently have to be revised in the light of last week's announcement by the P. and O. This time it is proposed to pay on the company's Deferred stock a dividend of 6 per cent., with a bonus of 3 per cent., making 15 per cent. for the year, free of tax. In addition, it is proposed to make a similar distribution to that of last year in Deferred stock, making the total distribution for the year 21 per cent., as against 18 per cent. for the previous year. Truly a result on which the shareholders are entitled to be congratulated.

***

There is, however, another aspect to this return, and one which cannot be ignored. The cost of passages between this country and India has risen enormously since 1914, and the effect of this has been to inflict grave hardship on all British subjects in India who, for health's sake alone, must come home at specified periods. As matters stand at present, it needs no prevision to foresee that many men will simply have to forego their leave in the United Kingdom for lack of means to pay the fares. The grievance is one which rankles in every club in India, and has found expression in columns of letters in the Indian Press. The position will not be ameliorated by the news of the company's proposed distribution. No doubt the P. and O. is fully able to justify its action, and it may be assumed that an explanation will be forthcoming at the general meeting. A statement is certainly needed.

***

I am indebted to a correspondent for an extract from a letter recently received from Zagreb drawing attention to an excellent opening for British trade in that region. "We would mention," the letter runs, "that the markets for skins and leather are two of the most interesting in this province, and the merchants engaged in this trade have made large profits both during and since the war, and we would strongly recommend you to write your friends in England to take advantage of the excellent business in this branch of industry now existing in the country.

***

British traders are so accustomed to criticism that the whole-hearted tribute to our business methods in the Near East in a pamphlet issued by the Guaranty Trust Company may well come as something of a shock. It is certainly a new experience for them to be told that they are regarded by a friendly rival as the chief competitor in the Near East markets, and if they told the truth many of our merchants and manufacturers would have to admit that the praise is rather higher than they deserve. There is no question that with few exceptions they are now taking a much keener interest in the Near East, but it is only after the openings in that region have been literally forced to their notice time after time over a long series of years.

***

The most important matter discussed with the British authorities by M. Titulescu, the Roumanian Finance Minister, has been the question of financial assistance. M. Titulescu is now on his way back to Roumania to lay before his Government various proposals that have been made by the British Government. It is understood that as the result of the negotiations that have taken place, the plans for a loan are well advanced, and it may be hoped that there will be no unnecessary delay in arriving at an agreement on the subject, since it is obvious that assistance of this character will indirectly be of the utmost assistance to British manufacturers.

***

The forthcoming resumption of Messrs. Thomas Cook and Son's Nile Steamboat Services is an event of outstanding importance for Egypt, and one on which all concerned are entitled to congratulations. Before the war the tourist was one of Egypt's two main sources of wealth. Armageddon naturally put an end to all sight-seeing activities, and this and other factors led many people to take a very depressed view of the outlook for the country. But the place of the tourist was taken by the soldier, and under wartime conditions Egypt's prosperity went up by leaps and bounds. Now Egypt is no longer one of the great centres of military activity, and the country is once again in need of the throngs of fashionable folk who flocked to Cairo in the pre-war seasons and went on gay excursions up the Nile. That the stream of tourists will soon be flowing in its normal vigour cannot be doubted, and it will be good for Egypt in more ways than one to be diverted by the influx of wealthy visitors.

***

That eleven out of twelve European countries should this year be presenting Budgets which show considerable deficits —Czecho-Slovakia is the one exception—is a portent of no small significance. It needs no emphasis that the first step to financial reconstruction is that Budgets must be made to balance, and, concurrently, there must be an end to inflation. At present the States in question are continuing to increase their indebtedness, and the printing presses are still in operation. That process, if continued, can have but one end, which is too obvious to need particularisation. The Brussels Financial Conference served one extremely useful purpose in emphasising the only lines on which the countries affected by the war can possibly hope to recover their position. It was held too late to have much influence on the finances of the States in question for the current year, but in the next six months or so we shall have evidence before us as to the extent to which the advice offered is being followed. Clearly, in the circumstances, it would be too much to expect that next year the eleven deficits will have been adjusted, but unless definite signs of progress are to be seen it will be impossible to take other than a very serious view of the outlook.

***

Complaints are again forthcoming of attempts to cancel orders for cotton goods on a large scale. The difficulty has arisen owing to the marked fall in values, which amounts in some cases to as much as 50 per cent., and with the market outlook extremely unsettled, importers desire to hold their hands until the outcome of events is clearer. The cancellation is naturally a serious matter for Lancashire, and it is understood that steps are being taken with a view to combined action on the question.

# COMMERCE AND INDUSTRY.

## BULGARIA.

SOFIA, October 31

**Agrarian Co-operative Congress**

Yesterday the congress of the Agrarian Co-operative Societies was opened in the Slavianska Beseda Hall by Professor Danieloff, president of the Administrative Council. Subsequently the members were welcomed by M. Athanasoff, Minister of Railways, and M. Tourlakoff, the Finance Minister, who have promised their support to these useful societies which are supplying articles of the first necessity to their members at low prices.

**New Import Regulations.**

The Direction de Prevoyance Social announces that the Cabinet Council has decided to allow the unrestricted importation of certain necessary goods not ranking as articles of the first necessity.

**Cheap Bread**

The commission appointed by the municipality of Sofia to determine the composition of the cheap bread for State officials and the poor have decided that the proportions of the flour shall be 84 per cent. wheat and 16 per cent. of rye and maize. The bread will be sold at two levas instead of 3.60 levas per kilogramme. Bread made entirely from wheat is sold at five levas per kilogramme.

**Bulgarian Cereals on the Antwerp Market.**

Bulgarian cereals are now being sold on the Antwerp market as Bulgarian produce, instead of figuring, as hitherto, among the Danubian cereals. This has resulted in their realising better prices than cereals from neighbouring countries. Bulgarian maize, incidentally, has been found to be better than the Argentine product.

**An Early Winter.**

Within the last day or two the temperature has fallen to seven degrees under zero, and a deep snow covers the ground. The cold is intense, and many of the rivers are already frozen. It is twenty-eight years since the temperature fell to such a low point in October.

**General News.**

The telegraph and telephone material purchased in Germany during the war is expected here shortly.

The congress of the Agrarian League, which was to be held on November 21, has been adjourned to December 19 to enable the Prime Minister, M. Stambolisky, to be present.

The Cabinet Council has decided that henceforward supplies for the Government are only to be obtained by public tender.

## USE OF TRACTORS IN MOROCCO.

With a view to encouraging the use of mechanical aids in agriculture, the Grand Vizier of Morocco has decreed that the bonus granted for the cultivation of land by motor traction should be increased from 50 francs to 60 francs per hectare.

## JAPANESE COMPETITION IN EGYPT.

The value of Japanese imports into Egypt for the seven months ending July 31 was £E809,831 in excess of that for the corresponding period of 1919.

The principal increases were in cotton hosiery, £E286,237; silk cloths, £E272,311; chinaware, £E54,524; lamp chimneys, £E13,157; glass beads and bracelets, £E15,061; metals, £E23,864; miscellaneous (principally toys and combs), £E37,071. The principal decrease was in paper, £E19,528.

It is stated that the Egyptian Government have opened a credit of two millions for the extension of cereal cultivation.

The Greek currant crop is estimated at 95,000 tons, or 32 per cent. less than the normal.

## INDIAN RAILWAYS.

### Committee on Administration.

The Secretary of State for India has appointed a committee to consider various questions in connection with the administration of the Indian railways. The Committee will be composed of:—

Mr. W. M. Acworth, Barrister-at-Law, Member of the Royal Commission on Canadian Railways, 1916, and of other bodies of enquiry concerned with railways (chairman); Sir Henry Burt, K.C.I.E., C.B.E., President of the Indian Railway Board, 1914-15, Government Director of Indian Railway Companies, India Office, 1915-19, Chairman of the Bengal and North-Western and other Indian Railway Companies; Sir Rajendranath Mukherji, K.C.I.E., of Calcutta; Sir Arthur Anderson, C.I.E., C.B.E., President of the Indian Railway Board, 1919-20; Sir George Godfrey, Agent of the Bengal Nagpur Railway Company; Mr. Srinivasa Sastri, Elected Member of the Viceroy's Legislative Council; Mr. E. H. Hiley, C.B.E., formerly of the North-Eastern and Great Northern Railways, and later General Manager, New Zealand Government Railways; Mr. C. F. Beadel, of Calcutta (as representing European commercial interests in India); Mr. Purshotamdas Thakurdas (as representing Indian commercial interests); and one additional member. The secretary will be Mr. T. Ryan, C.I.E., Indian Finance Department and Member of the Indian Munitions Board.

The terms of reference are as follows:—1. To consider, as regards railways owned by State, the relative advantages, financial and administrative, in the special circumstances of India, of the following methods of management:—(a) Direct State management; (b) management through a company domiciled in England and with a board sitting in London; (c) management through a company domiciled in India and with a board sitting in India; (d) management through a combination of (b) and (c); and advice as to the policy to be adopted as and when the existing contracts with the several railway companies can be determined.

In considering the question of the East Indian Railway, the Committee will take note of the decision to remove the management of that railway to India, which was arrived at when the contract with the present company was extended on the amended terms in 1919. 2. To examine the functions and status and constitution of the Railway Board, and the system of control exercised by the Government of India over the railway administration, and recommend such modifications, if any, as are necessary for the adequate disposal of the railway business of Government. 3. To consider the arrangements for the financing of railways in India and in particular the feasibility of the greater utilisation of private enterprise and capital for the construction of new lines. 4. To report whether the present system of control by Government of rates and fares and the machinery for deciding disputes between railways and traders are satisfactory, and, if not, advise what modifications are desirable. 5. To make recommendations that may seem germane to the enquiry.

## MACHINERY REQUIREMENTS IN ROUMANIA.

The following particulars of the machinery and tool requirements of the flour and milling industry of Roumania are given in a recent article in a Bucharest contemporary:—

The urgent requirements of the small mills of Old Roumania are as follows:—487 different engines, 211 portable steam engines, 2,100 millstones, 4 wagons of driving belts, 251 drilling machines, 7 wagons of hammers, files, and miscellaneous tools, 120 roller grinders for maize and wheat, 120 "Eureka" dressing machines for wheat, 120 dressing machines for semoline, 120 weighing machines, 120 elevators, 2,850 zinc casks, 4 wagons of sheets (4 to 6 millimetres thick) for cisterns.

In Bessarabia, Bukovina, and Transylvania the same requirements exist. The urgent requirements of the large mills of the whole country consist of boilers and steam engines. Diesel engines, silk cloth for sifters, implements for repair shops, driving belts, spare parts of machines, rivets, screws, driving wheels, etc. Milling machinery needed includes elevators, fanning and winnowing machines, roller grinders, millstones, and sacks.

# BRITISH TRADE WITH EGYPT.

## A Promising Market.

(From a Correspondent.)

Egypt presents the only market in the Near East at the present time which can be entered by United Kingdom merchants and manufacturers without a thought of adverse exchanges, which of itself should be enough to guarantee enterprise on the part of the most laggard of British exporters. But important as this factor is, the market has other and more substantial claims to attention. As part of the Empire, in Egypt if anywhere in the Near East, British goods ought to be pre-eminent, but there is no prospect of this being so unless British traders pursue very different methods to those adopted in pre-war days. It cannot be sufficiently emphasised that no efforts will be too great to obtain a strong and permanent hold on the market, which is bound to increase in importance in a very marked degree in the future. Before the war the market was not only considerable but extremely comprehensive, and as its requirements are bound to expand with the increased wealth of the country, it follows that its development is certain. Admittedly the immediate outlook is none too promising, for Egypt has not been able to escape the world-wide depression, and like so many other centres has been visited by a commercial crisis arising from an undue congestion of goods. But that is merely a passing phase, and it may be taken for granted that Egypt's wonderful recuperative capacity, combined with favourable developments in neighbouring centres, will soon impart to the market its normal vivacity, and the fact that the present is not the most favourable time for entering the market should not deter British traders who may be thinking of entering this field. For if one thing is certain, it is that they cannot establish themselves there too soon.

The enormous expansion that has taken place in Egypt's trade since 1914 is well brought out in the statistics given in the recent Blue Book on Egypt and the Sudan. The figures, of course, have been greatly inflated by the rise in prices, but, allowing for that factor, it is only possible to draw the conclusion that, on the whole, Egypt's trade is in a very healthy position. Taking the imports, the returns show a decline until 1916, when there was a sharp rise from £E18,474,098 to £E30,072,213, and while the figures for the next year were much the same, 1918 saw a very large increase, the figures being £E48,054,377. There was a decline the following year, but for the first seven months of 1920 the figures were £E58,303,252, as against £E23,104,633 for the corresponding period of 1919. Given that that average is maintained, it is obvious that the figures for the whole year will not fall far short of £E100,000, a total which, read in the light of increased values, will still give figures very substantially above those of the last few pre-war years.

The rise in exports has been no less marked, and from 1914 onwards there was a steady expansion from £E24,091,796 in that year to £E75,888,321 in 1919. For the current year the figures up to the end of July are £E67,398,233, as against £E26,727,043 for the corresponding period of the previous year, so that here, too, it is evident that a high level will be reached. The phenomenal rise in the price of cotton has, of course, been the dominant factor in the increased value of the export trade, and in view of the slump in cotton in the last two months, it is impossible to suggest the probable total that will be attained by the exports for the year on the basis of the increase in the first seven months. Here, too, however, it is evident that the position is anything but unsatisfactory, and that once again there will be a trade balance in favour of Egypt. That has, as a matter of fact, been the case, with the exception of 1918, ever since the commencement of the war, which of itself plainly indicates Egypt's potential purchasing capacity. It is impossible in these times to look far into the future with any confidence, but knowing the cotton position, is there any valid reason to suppose that a prolonged slump in the price of cotton is possible until there has been a vast extension of the cotton-growing area? In other words, Egypt should be assured of favourable trade balances for several years to come.

Before concluding this article there is one matter which must be touched upon, and that is the possible effect of any changes that may be introduced in the political status of Egypt. British traders are apt to take fright at obstacles that do not exist, and it may well be that the negotiations that have taken place have led them to some extent to discount the prospects in Egypt. It may be said at once that, so far as can be seen, there are no grounds for supposing that, if the proposals that have been made are carried into effect, British trade interests will suffer to any great extent. The contrary is much more likely to be the case, for in the better atmosphere resulting from agreement it is probable that much greater opportunities will be open to British enterprise.

# RESUMPTION OF EGYPT'S TOURIST SEASON.

## Dawn After the Darkness.

It is with the greatest pleasure we announce to our readers in Europe, America, and Egypt the decision of the British Government to permit Messrs. Thos. Cook and Son to resume their world-famous Nile Steamboat Services from January, 1921. We have to think back to the winter season of 1913-14 to recall the unique social, political, and financial connection of Messrs. Thos. Cook and Son with the land of the Nile. All who knew Egypt in pre-war days know how much international goodwill, gaiety, and hard cash were poured into her sunny lap through the enterprise of this greatest of tourist agencies, and the approaching resumption of its Nile services may be regarded as a fact of political significance. Two immediate considerations, apart from the cessation of the Great War, have doubtless influenced the Government in authorising the essential purchase by the firm of the necessary coal—namely, the favourable prospect of the Milner-Zaghloul Conferences, and the temporary—we will hope, permanent—coal peace in Great Britain. It would, of course, be ridiculous to pretend that Egypt has not benefited much more by British military and political effort in the Great War than she would have by six years continuation of the Cook Nile Services; at the same time we are confident that the most ardent Egyptian Nationalist never desired his country to be deprived of the golden showers annually conferred by the Cairo Tourist Season, which in pre-war days had a fame not second even to that of Nice and Monte Carlo. These past happy winters are now to be restored; our dragoman friends, Abdullah and Ali, with their ivory smiles, will again salute on the steps of Shepheard's Hotel such Grand Dukes and Grand Duchesses as may have tired of Europe; and the merchants of the Khan Khalil will begin to think more of purchasers than of politicians. Egypt, Messrs. Thos. Cook and Son, and the British Government are to be congratulated on so significant an approach to "normalcy."

## ENGINEERING.

### A Drum Tilter.

Particulars are to hand of a new form of can, barrel, or drum tilter, which has a number of good points, chief amongst which are its lightness and the ease with which it can be manipulated. It entirely obviates all the usual disadvantages attending the pouring of liquids from one container to another, and it prevents any waste through splashing. It consists of a cradle or carriage made of light sheet metal, which is fixed to the can by means of a couple of ordinary clips. There is no trouble involved in the fixing, and the tilter can be removed, when necessary, in a few seconds. The cradle has two curved runners, somewhat resembling those of the old-fashioned rocking chair, and by means of these the can may be tilted forward far enough to enable the liquid to flow. By this device there is no labour in lifting or balancing a heavy drum, as all the weight is borne on the runners. At present, two sizes are supplied, to fit five-gallon and ten-gallon drums.

### Electric Fires.

I understand from the representatives of a number of electricity supply stations with whom I have been in correspondence that there is just now a great rush to purchase and instal electric fires and radiators, and I have been asked to mention that, in addition to other well-known advantages, the electric fire generally has this peculiarity: The heater is made in sections, with one, two, or three switches to it, and heat is regulated by switching on or off the required number of sections. Each or all of these when switched on gives its full heat at maximum efficiency. The gas fire, on the other hand, is regulated by turning the whole of the heating element up or down. At first sight, writes a correspondent, "it appears as if the gas fire gave a finer regulation than its electric competitor," but that fine degree of regulation is achieved at the cost of efficiency, because the gas fire only gives the most heat for the least gas at a particular degree or rate of gas consumption, so that when the stove is working at other rates, less efficient results are obtained. Turning down a gas stove to reduce heat does take something from the efficiency with which the gas used is converted into heat.

### Motor Ships.

It is not surprising to learn, in view of the present fuel situation, that many shipowners are considering the conversion of their steamers to motor vessels, as this course would not only result in a number of incidental economies, but would also render them independent of coal supplies and labour troubles. In the current issue of our always interesting contemporary, the *Motor Ship*, a complete description is given of a tramp steamer, which has just been converted to motor power by the installation of a powerful Diesel engine of the type recently described in THE NEAR EAST. This vessel is of the ordinary tramp type, a cargo carrier pure and simple, and before the change-over she had a deadweight carrying capacity of 5,000 tons, which was increased to 5,300 tons by the change. This increase, of course, was brought about by the saving in space effected, and also by the reduction in weight through the removal of the heavy boilers and other parts of the steam-drive equipment. The difference in fuel consumption is little short of remarkable, as four tons per day of oil fuel has taken the place of from 18 to 20 tons of coal per day. As a further instance of the economy effected, it may be pointed out that it has been possible to reduce the engine-room staff from thirteen to eight men. In the same issue of the journal mentioned is a full description of the first of six motor ships built for the Pacific Steam Navigation Co. The machinery of this vessel has considerable technical interest, in view of the fact that the reversing gear of the Diesel engines is electrically operated instead of being worked by compressed air in the usual manner. The object of this is to economise the compressed air supply.

### Humber Progress.

I hear that about 150 of the principal motor dealers throughout the United Kingdom accepted the recent invitation of Humber, Ltd., to their works at Coventry, to inspect the models of cars and motor cycles which are on exhibition at the Olympia show.

They were welcomed to lunch by Lord Russell, chairman of the company, who presided, and an opportunity was given for a general review of the Humber policy. In the discussion which followed many useful and instructive points were raised, and replied to, by Col. Cole, O.B.E., managing director. At the subsequent dinner at the Masonic Hall, over which Col. Cole presided, expressions of goodwill and loyalty were voiced by the guests, who were very enthusiastic in their praise of the 1921 models.

In these times of reported motor trade depression, Humber, Limited, have reason to congratulate themselves on the fact that their products are more popular now than ever, and so far they have been unable to meet with the demand.

### A Big Mining Dredger.

An electrically-operated ladder dredger, with buckets of 20 cubic feet capacity, has recently been completed and put into operation in California. This machine, which is capable of dredging to a depth of 45 ft., possesses many interesting features, not the least of which is the stiffening of the hull by two steel and timber trusses. The hull, it may be mentioned, is of wood, and measures 152 ft. in length by 68 ft. in width, the depth of the hull being 13 ft. The inclined head frame or gantry at the bow is 58 ft. in vertical height, built of timbers 24 ins. in width by 30 ins. in thickness, seated in castings bedded on oak beams which transmit the load to the bottom booms of the trusses. The end of the ladder frame is suspended from this gantry, and the stern gantry is 76 ft. high, built up of 20 by 22 in. timbers. From this gantry is guyed the head of the 140-ft. inclined conveyor discharging the tailings.

The dredger is intended for gold mining use, and from a detailed description which recently appeared in an engineering journal, it appears that the vertical spuds or beams which rest on the bottom and anchor the dredger in position, are 70 ft. long and 64 in. by 40 in. in section. These are built up of 30-in. rolled joists and four one-inch cover plates. The buckets are eighty-three in number, and are of manganese steel secured to the chain by 7½-in. steel pins. The ladder drive is through a double chain of cut gears, the first set being of the herring-bone type, with main gear wheels 16 ft. in diameter. It is understood that the gold-saving tables have an area of 4,400 sq. ft., and the buckets discharge into a hopper feeding a rotary screen 9 ft. in diameter and 54 in. in length. One of the chief reasons for the massive construction adopted is that the dredgings consist of heavy gravel, in which are very large numbers of heavy boulders.

The electrical equipment consists of a 500 horse-power electric motor for the ladder drive, and fourteen other motors ranging from 15 to 300 horse-power, whilst there are three small tool motors of about 5 horse-power each. Current at an e.m.f. of 2,300 volts is delivered by a cable connected to a transmission line, and suitably stepped down by means of transformers.

## LANCASHIRE COTTON.

### Business Again Restricted.

(From Our Own Correspondent.)

Manchester, Monday.

Since a week ago the tone of the market has tended to become quieter. A good deal of the falling off in business has been due to the easier tendency in American cotton rates. This movement has upset traders, and at the time of writing values in futures in Liverpool are getting very near the low point touched about three weeks ago. Free operations have also been checked by financial stringency at home, and delays in remittances from abroad. The official estimate of the Egyptian cotton crop by the Alexandria Produce Association of 6,000,000 kantars is rather less than expected, and certainly looks poor when it is remembered that a few months ago a yield of 7½ millions was anticipated. Prices continue steadier, and some Lancashire spinners have recently bought rather more freely. Raw cotton in the United States is in plentiful supply, and the weakness in values is largely due to growers wanting to sell. In Egyptian yarns rather more inquiry continues to be met with, but users are slow to place orders of any importance. Some very fair lines have again been booked in piece goods for Egypt, Turkey, and the Levant. Sized materials have attracted attention, and some useful lots have been sold in printed and dyed goods. India shippers have continued to confine their attention to light fabrics such as dhooties, mulls, and jaconets. Only sorting up orders have been mentioned for China. Comparatively little has been done for South America. Home trade buyers remain cautious. In American yarns for home use the demand has been distinctly slower. Ring beams have been well held, but lower figures are now being taken for crops. Moderate orders have been reported in extra hard descriptions for the Levant, and some producers are now more favourably situated.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

**Egypt.**

(*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked* (*L*) *are to be obtained.*)

Twill, Calico, etc.—The Egyptian War Department invites tenders as follows :—(1) Twill.—100,000 yards of khaki twill and 90,000 yards of grey twill, for cavalry shirts. (2) Calico.—30,000 yards of grey cotton calico. Tenders are due on November 18, and are to remain open for seven days. (3) Canvas.—5,000 yards of canvas W.P., chocolate colour. (4) Canvas.—25,000 yards of canvas W.P., chocolate colour. (5) Canvas Dowlas.—3,000 yards of canvas dowlas, 27 ins. Tenders are due on November 19, and are to remain open for seven days. (6) Tarlatan.—70,000 yards of tarlatan, white. Tenders are due on November 22, and are to remain open seven days. (L.)

Harbour Works.—The Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the construction of the superstructure of wall of Quays Nos. 14 and 15. November 15. (L.)

**Greece.**

Paper.—The Greek Minister of Finance, Athens, invites tenders for the supply of paper. Specifications, etc., may be seen at the offices of The Near East, 1, Devonshire Square, E.C.2. November 16.

Argentiferous barytes concessions in the island of Melos.—The Direction of Mines of the Ministry of National Economy at Athens invites tenders for the above concessions, which belong to the Greek State, and are estimated to contain 10 million tons of argentiferous barytes, with a maximum quantity of silver per ton of ore estimated at 2,140 grams and an average quantity of 164 grams. There are experienced miners on the spot, and there is a very good harbour; but there is a scarcity of fuel and spring water in the island. The terms of tender may be seen on application at the Department of Overseas Trade, 35, Old Queen Street, S.W.1.

---

The Banks of Bengal and Bombay have increased their minimum rate of discount to 6 per cent.

The traffic receipts of the Smyrna-Aidin Railway for the week ended October 16 amounted to £18,012.

The directors of the Bank of Roumania announce an interim dividend for the current year of 6s. per share, payable December 1.

The Egyptian Coastguards and Fisheries Service will sell by auction, at or about the end of November, sponges valued at an approximate sum of £E15,000, which have been fished from the sponge beds on the Mediterranean Coast between Alexandria and Salloom.

Land and Mortgage Company of Egypt.—The debenture-interest coupons and also the debenture bonds (drawn for redemption) due November 11 will be paid on or after that date by the bankers of the company, Barclays Bank, Limited, Lombard Street, E.C.

## SHIPPING INTELLIGENCE.

### Forthcoming Sailings.

Anchor-Brocklebank Line s.s. Malancha, for Calcutta, will close for cargo at Birkenhead on November 27.

Anchor-Brocklebank Line s.s. Maidan, for Port Said, Colombo, Madras, and Calcutta (also loading at Hamburg and Antwerp), will leave London on November 24.

Anchor-Brocklebank Line s.s. Mahanada, for Port Said, Colombo, Madras, and Calcutta (also loading at Hamburg, Rotterdam, and Antwerp), will close for cargo at Middlesbrough on November 27, and London on December 9.

Cunard Line s.s. Tyria, for Gibraltar, will close for cargo at Liverpool on December 2.

Cunard Line s.s. Pavia, for Gibraltar, Malta, Corfu, Piræus, Salonika, Constantinople, and Constantza, will close for cargo in London on November 16.

Ellerman Line s.s. Trentino, for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople, will close for cargo at Liverpool on November 27.

Ellerman's City Line s.s. City of Cairo, for Colombo and Calcutta, will close for cargo at Liverpool on December 7.

Ellerman's City Line s.s. City of Karachi, for Bombay and Karachi, will close for cargo at Liverpool on December 21.

Ellerman's City Line s.s. City of Manchester, for Calcutta, will close for cargo at Liverpool on December 22.

Henderson Line s.s. Amarapoora, for Port Said and Rangoon, will close for cargo at Glasgow on November 15 and at Birkenhead on November 24.

Bibby Line s.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on December 1.

Harrison Line s.s. Student for Port Said, Port Sudan, Aden, and Mombasa, will close for cargo at Birkenhead on November 25.

Johnston Line s.s. Grantley for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna and Constantza, will close for cargo at Liverpool on November 20.

Johnston Line s.s. Dromore for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila, will close for cargo at Liverpool on November 20.

Clan Line s.s. Ethelwynne for Bombay and the Persian Gulf, will close for cargo at Manchester on November 22.

Clan Line s.s. Clan Macbeth for Colombo, Madras and Calcutta, will close for cargo at Birkenhead on November 18.

Holt and Co.'s s.s. Lycaon for Port Said and Singapore will close for cargo at Glasgow on November 18.

Holt and Co.'s s.s. Bellerophon for Port Said and Singapore, will close for cargo at Birkenhead on November 16.

Moss Line s.s. Amasis for Gibraltar, Algiers, Malta, and Alexandria, accepting cargo for transhipment to Moroccan, Algerian, Cyprus, and Syrian coast ports, will close for cargo at Liverpool on November 27.

Moss Line s.s. Karnak for Piræus, Syra, Smyrna, Volo, Salonika, and Constantinople, will close for cargo at Liverpool on December 3.

Papayanni Line s.s. Serbino for Malta and Alexandria, will close for cargo at Liverpool on November 20.

Papayanni Line s.s. Maronian for Algiers, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople, will close for cargo at Liverpool on December 11.

P. and O. s.s. Alipore for Bombay, taking cargo for Persian Gulf ports, will close for cargo in London on December 4.

# YUGOSLAVIA'S COAL AND LIGNITE RESOURCES.

## Modern Equipment Required.

An interesting survey of the coal and lignite resources of Yugoslavia appears in the American Consular reports from the United States Minister at Belgrade, based on a report of an engineer who visited the mines enumerated during the first half of the present year. We give the following extracts:—

The Maslavara lignite mine, owned and operated by the State, is located about 42 kilometres east and south of Banja Luka, on a privately owned railroad. The deposit comprises an area of some 60 square kilometres. The northern outcrops are near Dobridje and the deposit extends south-east to Vares Slatina. The maximum thickness at Rahulja is 7 metres, which includes 1 metre of rock. The product is jet black, and when mined a large portion of good lump coal is produced. Production for the first four months of 1920 was 6,638 tons. The total present daily production is about 150 tons, but this force and the equipment could produce 300 tons if there was sufficient transportation.

The Kreka coal mine, also owned and operated by the State, is connected by a railroad to the Sarajevo-Brod railroad at Dovi. The chief markets for the coal are the railroad, the municipality of Tuzla, and various local industries along the Sava River and in the Voivodine. For lack of adequate transportation large stocks have accumulated at the mine. The coal-bed extends for 6 to 7 kilometres north-east, and is from 10 to 15 kilometres long. There are three beds of coal at Kreka and four beds at Bukinje, a new mine about 3 kilometres from Kreka. At Poslovina, the top bed is about 18 metres thick, and the two lower beds about 16 metres. At Bukinje, the top bed is about 16 metres thick, the two centre beds about 20 metres, and the bottom bed about 14, this last being of coal of a quality inferior to that of the other beds. Production in 1920, up to May 27, was 94,079 tons. It is stated that with adequate transportation 1,300 tons would be produced. The Bukinje mine, when developed, will replace the Kreka mine, in which underground transportation has become an expensive item.

The Bela Crkva lignite coal deposit can be reached by automobile in about five hours from Belgrade. The coal is lignite, which is claimed to contain from 2,800 to 4,000 calories as mined, 5,600 calories air dried, and to contain 24 per cent. of moisture and no sulphur. The deposit, as tested, varies in thickness up to 10 metres. A second bed of coal has been found in some places 10 metres below the bed examined, but its thickness has not been determined. This mine has not been developed as yet, but it is stated that a market could readily be found for its output in north-west Serbia. If a railroad were constructed across the Drina River to connect with the railroad system in Bosnia, it might also find a ready market in the factory district north of Sarajevo.

The Aliksar mine, owned and operated by the Serbian Navigation Co., is reached by automobile by going 4 kilometres north of Brza Palanka on the public road, and thence by following the narrow-gauge railroad 5 kilometres west to the mine. The coal beds lie in lenses of various sizes connected by coal of varying thickness, sometimes only a few centimetres thick. Few data are available, but it is stated that the first lense is from 15 to 20 metres thick. The mine is about 6 kilometres from the river, where there are adequate docks for loading coal in river boats. The car is run alongside the lighter and the coal shovelled by hands from the car into the chute leading to the hold. Three men unload about fifteen 5-ton cars per day. The mine needs extensive repairs to existing equipment as well as new equipment, including shovels and picks of a design suitable for coal mining, and a drilling machine to prospect in advance of the mining. Two tons of explosives, it is estimated, will suffice for one year's operations.

The coal deposit of the Ugljovic mine, a strip pit, is estimated to be 20 metres thick, to contain very little sulphur, and only 5 to 6 per cent. of ash. The output averages about 700 tons per month, but is expected to increase to 500 tons daily as soon as the railroad is completed to Raca. Ninety men are now employed in this mine.

The Rtanj mine is situated at an elevation of about 800 metres on Mount Rtanj, where there are nine consecutive outcrops of coal beds. The coal is transported as mined to Nirovo, and stored in bins along the Zajecar Paracin Railroad. Better equipment is needed at the mine.

The Laush mine is located on the western edge of Banja Luka, and is served by a spur from the standard-gauge railroad from Banja Luka, connecting with the Sudbahn and other standard-gauge lines. This is the largest producing coal mine situated on a normal-gauge railroad in Serbia, Macedonia, or Bosnia, and would be an excellent mine for producing coal for export. The coal bed covers an area of about 80 square kilometres, and varies in thickness from 1 metre to 8 metres. The coal is very splintery, jet black, and tarry, and when mined produces a good percentage of lumps. The output for the first four months of 1920 was 8,180 tons, produced in 97 working days by an average of 235 men. This coal is used largely by brick and flour mills in Croatia, Ossek, Zagreb, and Sissek, as well as to supply local needs.

The coal of the Petrovac region is classed as anthracite in accordance with Serbian classification, but it has the appearance of a very soft bituminous coal, which weathers rapidly into very small pieces. The region is evidently capable of development.

The Tressababa mine is located about 8 kilometres south of Najecar at the end of the standard-gauge railroad, which terminates at Prahovo, on the Danube River. This mine is owned and controlled by the Serbian National Bank and by private individuals.

The present workings are on the bank of the Timok River, but outcroppings have been found 11 kilometres away. There are apparently six beds of coal, only four of which have thus far been found to contain lenses large enough to exploit. Two beds are being exploited. The average thickness of the lenses is about 4 metres, and one lens has been tested to a depth of 125 metres. The beds vary from a few centimetres to 20 metres wide. The coal contains from 6,000 to 6,500 calories, and is good for blacksmithing and mine-railroad use. There were in April approximately 3,000 tons of coal in stock awaiting for transportation to Prahovo. As mined, the coal is in very small pieces, and the officials claim that it would have a much wider use if it were briquetted. It finds a ready use in local manufacturing plants equipped with mechanical stokers. The employees number about 250 men, who produce between 50 and 60 tons per day. It is estimated that the Germans mined 10,000 tons of coal from this mine during their period of occupation.

The Bogovina mine, of which the concession is owned by M. Savach, its operator, is located about 3½ kilometres from the Paracjo-Zajecar narrow-gauge railway and 6 kilometres from Bogovina. The coal is of the ternary formation, and contains from 6,000 to 7,000 calories. For the period of December 16 to December 31, 1919, the output was 3,700 tons. Of the 500 men employed, only about 375 reported for work each day. Black powder is preferred as an explosive, although some dynamite is also used, both being obtained in small quantites from the war department. Most of the coal is taken out, however, by heavy, clumsy picks. Light picks have been ordered through a British company in Belgrade. Other equipment is needed.

The Zenitza mine, owned and operated by the Yugoslav Government, is managed by Dr. Kurtz, at Sarajevo. The mine is located at Zenitza, on the Sarajevo-Brod 76-centimetre-gauge railroad. It is equipped throughout with large power units and high-power machinery. Production for the first four months of 1920 was 90,400 tons. The coal is uniformly thick, but contains a large percentage of a whitish rock which adds materially to the expense of mining. The mine is well organised for the method of working employed. Much of the coal is used by the steel mill at Zenitza.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—The tone of the market has generally been very firm. All varieties of currants have been in good and increasing demand. Sultanas are also in strong request, but prices here are a shade easier. Large supplies of figs are available, and prices are very reasonable. The outlook generally seems favourable for buyers, and it would appear that stocks of most varieties of dried fruit will be adequate for the Christmas trade.

Coffee.—The demand has improved. Transactions include Costa Rica (bold greyish) 105s. 6d. to 115s. and East Indian 108s. 6d. to 111s. 6d. The futures market has ruled quiet and easier. Quotations are: December, 58s. 6d.; March, 57s. 6d.; and May, 57s. 6d.

Oilcakes.—Linseed cake has risen 6d. to 23s., but cotton-seed cake remains unaltered at 13s. Other transactions include Indian cottonseed cake at 11s. to 12s., Egyptian cottonseed cake at 12s. 9d. to 13s. 6d., while coconut cake has been done at 16s.

Sugar.—The free market has been steady. West Indian crystallised has declined to 81s. to 83s., while American granulated has dropped 14s. to 95s. White Mauritius is quoted at 94s. There has been a good demand for home refined at the official prices.

Oilseeds.—Business has declined. Indian linseed has been done at 36s., while La Plata has come to business at 31s. 6d. Rapeseed is firm, with Toria at 36s., and bold Ferozepore at 35s. Cottonseed is quieter. Indian has been done at 13s. 5d., while Egyptian stands at 19s.

Seed Oils.—With the exception of linseed, which has declined 5s. to 66s., prices are practically unchanged. Refined rape oil is firm at 92s., the crude variety being quoted at 75s. Turpentine is higher at 123s.

### Current Prices.

*General Produce.*—Bacon, 231s. 9d. cwt.; butter, 400s. cwt.; cheese, 172s. 6d. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 6½d. lb.; cocoa (Ceylon, good to fine), 122s. 6d. cwt.; coffee, (Costa Rica), 115s. cwt., East India bold, 111s. 6d. cwt., Mocha, 147s. 6d. cwt., Santos, 75s. cwt.; currants (Vostizza), 104s. 6d. cwt.; eggs, 40s. per 120; ginger (washed cochin), 63s. 6d. cwt.; hams, 217s. cwt.; lard, 164s. 3d. cwt.; nutmegs, 1s. 1d. per 110's to 180's; pepper (Singapore, black), 6d. lb., and Muntok white, 1s. 3d. lb.; raisins (Valencia), 136s. 6d. cwt.; rice (Rangoon No. 2), 44s. 6d. cwt.; sago (small pearl), 33s. cwt.; sugar (granulated), 112s. cwt., No. 1 cubes, 116s. cwt., white Java, 110s. 6d. cwt., Mauritius, 94s. cwt.; sultanas (Smyrna), 142s. cwt.; tapioca (Singapore), 2d. lb.; tea (Indian), 6½d. lb., Ceylon 6½d. lb., and Java, 4d. lb.; wheat (Australian), 121s. 6d. qr., English white, 94s. qr.

*Metals.*—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard), £89 17s. 6d. ton., electro wire bars, £100 10s. ton; gold bars, 117s. 11½d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed), 260s. ton; nickel, £230 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £15 10s. bott.; silver bars, 52½d. oz.; spelter, £39 5s. ton; tin, £159 10s.; wolfram, 24s. 6d. unit.; zinc sheets, £57 10s. ton.

*Chemicals.*—Acids:—Boric, 75s. cwt.; oxalic, 2s. 1½d. lb.; citric, 3s. 5½d. lb.; tartaric, 2s. 7½d. lb.; ammonia (sulphate), £31 1s. 9d. ton; benzole (standard), 3s. 5d. gallon; bleaching powder (35 per cent.), £27 10s. ton; borax crystals, 41s. cwt.; cream of tartar, 240s. 6d. cwt.; glycerine (crude, 80 per cent.), £105 ton; industrial (1.250 per cent.), £155 ton; lead (red), £56 10s. ton; white dry, £63 10s. ton; potassium—bichromate, 1s. 11½d. lb.; chlorate, 10d. lb.; caustic, £105 ton; nitrate, £70 ton; permanganate, 3s. 6d. lb.; prussiate yellow, 1s. 10½d. lb.; sulphate (90 per cent.), £34 ton; quinine, 4s. 1½d. oz.; sodium:—crystals, 190s. ton; bicarbonate, £14 ton; bichromate, 1s. 2½d. lb.; alkali (58 per cent.), £16 5s. ton; chlorate, 5½d. lb.; caustic (70 per cent.), £32 10s. ton; hyposulphite, £36 10s. ton; prussiate, 1s. 2½d. lb., and nitrate, £24 5s. ton; sulph. copper, £41 ton; sulph. iron, 160s. ton.

*Miscellaneous.*—Cotton (American good midd.), 18.52d. lb.; Egyptian, F.G.F. Sakel, 43d. lb.; linseed (La Plata), £31 10s. ton; Indian, £36 ton; oils:—linseed, £71 3s. ton; soya, £67 5s. ton; cotton, £52 ton; olive, £21 10s. gallon; ground nut, £78 ton; palm, £56 5s. ton, and rape, £75 ton; palm kernels, £37 ton; petroleum, 2s. 3d. gallon; rape (Toria), £33 15s. ton; rubber—plantation, No. 1 crêpe, 1s. 4¾d. lb.; smoked sheet, 1s. 3¼d. lb.; fine hard Para, 1s. 6d. lb.; turpentine, 123s. cwt.

## DECLINE IN RAW FUR PRICES.

The report of the London Fur Trade Association on the October raw fur skin sales states:—The cost of dressing, dyeing, manufacturing, and materials is higher than ever, and, therefore, the fall in prices of manufactured goods will be very much less than in the price of the raw skins. Business has been far from active since the May sale, partly due to seasonable quietness, but chiefly due to financial conditions and industrial unrest. A certain amount of pressure was brought to bear from the United States, but unsuccessfully, with the object of securing the postponement of these sales, as has been done in America. The range of values established will form a basis for future operations for the fur trade in all countries.

Prices as a whole again show a decline. The collections, however, consisted mostly of stale goods. The high values of last January, brought about solely by reckless American speculation, could not possibly last. A safer and sounder basis of prices had to be found, and the sooner this was done the better. The quotations given show the course of prices of the articles which are most interesting to the home trade, and the fluctuations are based on the last May sales.

Australian opossum, declined 25 per cent.; Wallaby, best grades 10 per cent., lower grades 50 per cent.; silver fox, full May prices; cross fox, little lower than May; blue fox, declined 25 per cent.; red fox, best grades 20 per cent., lower grades 30 per cent.; white fox, 20 to 25 per cent.; beaver, 40 per cent.; otter, 25 to 30 per cent.; lynx, 30 per cent.; marten, 50 per cent.; Russian sable, best grades full May prices, lower grades 20 per cent. decline; ermine, declined 20 per cent. on average; chinchilla, not sold; stone marten, declined 25 per cent.; baum marten, 15 to 20 per cent.; skunk, better grades 35 per cent. decline, lower grades 40 per cent. decline, collection almost entirely stale skins and off colour; civet cat, declined 30 per cent. to 40 per cent.; American opossum, best grades 40 per cent., lower grades 50 per cent.; brown musquash, 40 to 45 per cent.; southern musquash, 40 per cent.; black musquash, 40 per cent.; raccoon, 40 per cent.; mink, best grades 10 per cent. to 15 per cent., lower grades 40 per cent.; squirrel, 30 per cent.; kolinsky, too few for comparison; fitch, declined 40 per cent.; white hare, 35 per cent.; wolf, best grades 10 per cent., lower grades, 30 per cent.; black bear, 25 per cent.; brown bear, 35 per cent.; grizzly bear, unaltered; South American fox, best grades 30 per cent. decline, lower grades 40 per cent. decline; mole, declined 50 per cent.; nutria, poor collection, lower grades 30 per cent. decline.

The statutory meeting of the Phœnix Oil and Transport Company will be held on Monday, November 15.

The Sultan of Egypt has conferred the Grand Cordon of the Nile on Sir Paul Harvey in recognition of his eminent services to Egypt as Financial Adviser.

Sir Edmund Wyldbore-Smith (formerly Assistant Secretary to the Board of Trade) has been elected a member of the board of B. S. T., Limited, in place of Sir Philip Lloyd-Graeme, M.P., who has resigned owing to his appointment as Parliamentary Secretary to the Board of Trade. Sir Edmund Wyldbore-Smith is a director of the Suez Canal Company and the Metropolitan Carriage Wagon and Finance Company.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

DAMAS, September 30.

There have been important arrivals of cereals, principally wheat, from the interior during the month. The amounts received have, however, not been sufficient to affect the active demand from the Lebanon and the coast.

As we forecasted in our previous report, quiet is re-established in the Hauran, and business is taking its normal course. However, transactions in manufactures are still restricted, as the demand for the interior is still lacking, and buyers are holding aloof because of the fall of prices in Europe.

STAMBOUL, October 30.

There has been no improvement in the market. Some transactions for the Crimea and Roumania have had very little effect on the commercial position.

The fall in prices increases in manufacturing countries and has now reached from 35 to 40 per cent. for certain commodities compared with the quotations six months ago.

Our merchants who possess considerable stocks are endeavouring to get rid of them. Conditions are not favouring business with Roumania. The railway strike, followed by the general strike, has put an end to business, and the fall in the lei has removed all prospect of profit.

Colonial Produce.—Sugar.—It is becoming more and more evident that the crops will be very abundant in producing countries. Prices have fluctuated on the New York market, but the tendency is to fall. Java sugar in transit is quoted 20 to 21 dollars per 100 kilos, as against 24 for the last two weeks, while produce in Customs is quoted £T47-48 per 100 kilos.

Coffee.—A higher level has been reached during the last few days on the principal markets. It is due to large purchases by speculators. However, prices have remained stationary. Rio is quoted Ps. 40-48 per oke, and Santos Ps. 48-55 (both in transit).

Rice.—The market continues weak, and the price is low. Saigon, which costs 190 francs per 100 kilos, c.i.f. Constantinople, has fallen to 170. American rice has also declined from 22 dollars to 17 per 100 kilos.

Exports.—The market has been very weak. The fall in prices continues and is accentuated.

Opium.—The sales of the week amount to thirty cases at Ps. 11.20-11.50 fine and Ps. 9.80-8.85 druggist.

Mohair.—275 bales have arrived this week. There have been no sales. Prices have undergone a fresh decline to Ps. 85-90 extra, Ps. 75-80 I., Ps. 65-70 II.

Wool.—One hundred and sixty bales have arrived this week. There have been no sales. Prices are stationary.

---

The imports of coal into Alexandria from January 1 to October 22 amounted to 412,818 tons. The corresponding figures for last year were 37,828 tons.

Of the total tonnage of 16,013,000 tons which passed through the Suez Canal in 1919 Great Britain's share amounted to 11,355,000 tons.

The traffic receipts of the Smyrna-Aidin Railway for the week ended October 23 amounted to £16,081.

It is announced that the general strike at Bucharest which was declared by the trade unions last month has come to an end, largely owing to the prompt measures taken by General Averescu, the Prime Minister.

## COMPANY NOTES AND REPORTS.

### P. and O.

The directors of the Peninsular and Oriental Steam Navigation Company recommend a dividend on the deferred stock of 6 per cent. for the six months, together with a bonus at the rate of 3 per cent., both free of tax, making, with the interim dividend of 6 per cent. paid in May, a total distribution on the deferred stock of 15 per cent. for the year. They also propose to make a distribution in the neighbourhood of £205,000 of deferred stock to the deferred stockholders registered November 23, 1920. Dividend warrants will be posted on December 14.

### Algerian Oilfields.

The report of the Algerian Oilfields for the year ended September 30, 1920, states that the issued capital at September 30 stood at £106,731, divided into 1,067,314 shares of 2s. each, 307,612 shares having been issued for cash during the year. The total production from the leased area in Algeria was 672,028 kilos. The new mining laws adopted by the French Chamber have now been made applicable to Algeria, and it is confidently expected that the Société Algerienne des Petroles de Tliouanet, in which the Algerian Oilfields is largely interested, will shortly obtain the concession applied for, as the application is now before the Conseil d'Etat. The position in regard to the company's property remains as at the date of the last report. The additional capital subscribed has enabled the directors to take up a substantial interest in Trinidad Esmeralda Estate, Limited, who own the well-known Esmeralda property in the Tabaquite district, in the island of Trinidad. The estate consists of 262 acres, and is freehold, no royalties being payable. The necessary drilling plant has been purchased and delivered. Drilling on No. 1 well started on October 7 last. A cable has since been received by the Trinidad Esmeralda Estate Company reporting that the first oilsands have been encountered at 60 ft., and drilling is being continued. The technical advisers of the company, in view of this result and from the further geological work that has been carried out, express themselves as extremely confident that the company will meet with every success.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable received from the Director-General of Commercial Intelligence, Calcutta, dated November 2:—During the week ending October 23 light showers fell in places. More rain badly wanted everywhere in the Punjab, North-West Frontier Province, Mysore, Central Provinces, United Provinces of Agra and Oudh, and in parts of Central India, especially in Gwalior, and Bundelkhand and in Madras. In the Central Provinces drought for four weeks has caused serious failure of autumn crops, and in several districts of the United Provinces of Agra and Oudh rice is considerably damaged. Elsewhere prospects of standing crops fair. During the week ending October 30 rainfall general in Mysore and South-Eastern Madras with heavy falls on Coromandel Coast and local in the rest of Madras and Assam and Bengal. Exportable surplus of rice raised by 50,000 tons, half of which available for sale to foreign countries. Recent rains have greatly improved paddy prospects in Lower Burma.

All India crop forecasts (1920-21), 1,448,000 acres; ground nuts (first forecast) (1919-20), 1,274,000 acres; (1920-21), 18,228,000 acres; cotton (second forecast) (1919-20), 18,892,000 acres; (1920-21), 2,221,000 acres sesamum (second forecast) (1919-20), 2,170,000 acres; (1920-21), 2,669,000 acres; sugarcane (second forecast) and 1919-20, 2,729,000 acres.

Bombay cotton market deadlock unchanged, but brokers and shippers have resolved at a meeting that business in new cotton would be commenced only when so decided upon by a general trade meeting. This is generally regarded as a hopeful sign. Ready cotton quiet. Fine M G Oomra number three spot rate 280. Calcutta jute market inactive but prices steady. Hessians very dull with declining prices, demand being generally small and non-existent for export. Heavy goods dull with no business. No change in bank rates.

## ON 'CHANGE.

### Markets Depressed.

(From Our Own Correspondent.)

Throgmorton Street, Monday.

The improvement recorded last week has not been maintained, and again prices have given way a little in a number of directions. Government securities, as a whole, have been fairly steady. Egyptian Guaranteed 3 per cent., Turkish Guaranteed 4 per cent. 1855, and Greek Guaranteed 2½ per cent. 1898, are unchanged at 60, 68, and 60 respectively; Turkish 3½ per cent. Egyptian Tribute Bonds have, however, declined sharply 2¼ points to 51¼.

Where changes have taken place in Greek securities, they have been in the downward direction. The 5 per cent. 1881 and 1884 have both dropped 2 points to 50. The 1890 Loan is unchanged at 52, and Fundings and the 1910 and 1914 Loans are also unaltered at 50, 37, and 50½ respectively. The 1902 Loan is, however, 1½ points up at 45.

Banks have been rather weak, with the exception of Agricultural 3½ per cent. Bonds and 3½ per cent. Guaranteed Bonds, which are firm at 58 and 60 respectively. Imperial Ottoman Banks have eased off ¼ at 9¾, and the National Bank of Egypt are a like amount down at 17¾. Land Banks are again lower at 4⅜, a drop of 3-16.

Declines have to be recorded almost all along the line in land shares. Anglo-Egyptian Land Allotments are unchanged at 3½, Beheras are ½ lower at 12¾, but the preference shares are unchanged at 65s. Egyptian Consolidated Lands have been a specially weak spot, touching 1s. 9d., a drop of 4½d., while Delta Lands are 1s. 3d. down at 12s., and Egyptian and Foreign Trust have shed 3d. at 12s. 9d. Gharbieh Lands are a further ⅛ down at 2½, New Egyptians have fallen 4s. to 26s., while Union Foncières are ¼ down at 3½. A significant exception to the general tendency is provided by Sudan Plantations, which have firmed up ⅛ to 5.

Among Miscellaneous securities Abyssinian Corporations are unchanged at ¼, as are Alexandria Waters at 7. Morums are again 6d. down at 16s., while Egyptian Salts and Sodas have shed a further 1s. 3d. at 39s. 9d.

Oils have weakened in sympathy with other markets. Anglo-Egyptians have eased off ⅜ to 3 5-16, while Roumanian Consols are 6d. down at 21s.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |
|---|---|---|---|
| Alexandria | Piastres to £ | 97½ | 97 7/16 |
| Athens | Drachmae to £ | 25·22½ | 36·00-37·00 |
| Belgrade | Dinars to £ | 25·22½ | 117-119 |
| Bombay | Sterling to Rupee | 24d. | 1·8⅛-1·8⅜ |
| Bucharest | Lei to £ | 25·22½ | 222-224 |
| Calcutta | Sterling to Rupee | 24d. | 1·8⅛-1·8⅜ |
| Constantinople | Piastres to £ | 110 | 460-475 |
| New York | Dollars to £ | 4·86⅜ | 3·34-3·38 |
| Paris | Francs to £ | 25·22½ | 57·00-58·55 |
| Sofia | Levas to £ | 25·22½ | 247½ |
| Teheran | Krans to £ | 50 | 30 |

The Credit Foncier d'Algerie et de Tunisie has opened branches at Fedalah (Morocco) and at Bou Arrada, Gaffour, and Madhia (Tunis).

The Romano-Americana Oil Company, at Bucharest, is increasing its share capital from 37,500,000 lei to 150,000,000 lei.

The receipts of the Egyptian Delta Light Railways, Limited, for the week ended October 10 amounted to £E16.890, making the total for the year £E248.227.

# LEVANT MARKET REVIEW.

We give below some further extracts from the market review of the National Bank of Turkey for September:—

**British Trade in Motors.**

Since the commencement of the year there has been a large influx of American cars, and a goodly number of Italian manufacture have also been sold; rather more than 650 cars have been registered in Pera. With scarcely an exception, the foreign car is not giving the satisfaction expected. This is partly due to the shocking roads in, and for miles around, the town, the condition of which has to be seen to be believed.

There is . . . a demand for good light cars of the popular "Tin-Lizzie" persuasion, and it is quite frankly stated that the preference leans towards those of British manufacture, which are, unfortunately, conspicuous by their absence.

**Tobacco Crop Reports.**

At the commencement of the harvest, various predictions were current concerning the size and quality of the 1920 tobacco crop.

To accept any of these prognostications would have been premature, since various factors, i.e., weather, shortage of labour, and insecurity in certain regions, were of great importance as affecting the success of the crop.

Now that the picking has been completed in almost all the centres of production, and the local buying has commenced, it is possible to give a considered opinion on the quantity and quality in the following important centres.

*Kavalla-Drama-Serres-Xanthi.*—The crop, as far as quantity is concerned, which was expected to be very considerable in view of the area sown, is now valued at 8 million kilogrammes; the bad weather and hail seriously affected the plantations. As regards quality, it has been also affected by the weather, and the higher grade tobaccos are much inferior to those of last year. The lower grades and refuse are abundant.

*Smyrna.*—The crop is now estimated at 12 million kilos., of which about eight to nine million kilos. is in the territory forming the autonomous state. The quality is not very good, and, with several buyers about, the higher grades are fetching a big price.

*Samsoun.*—Insecurity, shortage of labour and bad weather have had a very unfavourable effect on the crop. In quantity it barely reaches a quarter of the pre-war yield, and its quality has been much affected by the rains which fell just at the moment when the picking and drying was going on. A large part of the leaves are thus left scarcely ripe and dark green in colour.

*Broussa-Balikesser.*—The crop here is about three million kilos., is of medium grade and goes to the factories which consume large quantities of this quality.

**Demand for Boots.**

There is a great demand for a strong, rough boot, resembling the Army pattern, for use among the poorer and peasant classes. For a town boot there is also a demand, and principally it must look good and smart, and be cheap; the American at present holds the market. British-made goods would sell well, but a representative should first be sent out here to study the needs and style, and it would be necessary for him to pay particular attention to the shape of the foot in this part of the world.

**Improved Outlook in Roumania.**

There are distinct signs of improvement in almost every branch of trade, and a great demand for goods in general. In the retail shops the ruling prices for almost every commodity are very high in view of the shortage of stocks.

With regard to British goods, they have to contend with considerable competition from Italy, Switzerland, and Spain, each of which, and especially the first two, seem to be able to put a very much cheaper class of goods on the market, and while they are admittedly inferior in quality, they nevertheless suit the present means of the population, for the difference in quality is more than balanced by the difference in price.

There are three very important points for the British merchant and manufacturer to remember if they wish to trade with Roumania:—1. It is absolutely essential to quote c.i.f. Roumanian ports. Local merchants will not look at f.o.b. quotations, as the majority will not go to the trouble of calculating freight, expenses, etc. 2. It is little or no use trying to sell goods from samples, patterns, etc., while the goods are lying at Constantinople or elsewhere. At the present time of transport difficulty, buyers distrust both railways and shipping. 3. To import goods into Roumania, all foreign firms must have a Government licence, whereas a Roumanian firm does not require this.

Business generally is hampered also by the prohibition of export of money of all sorts, though there is reason to believe that this prohibition will be cancelled in the near future as far as foreign values are concerned. There is every hope that the exchange may improve slightly in the near future, which will be one of the strongest factors in the development of external trade.

# COMPANY MEETINGS.

## MORUMS ORIENTAL STORES.

The first ordinary general meeting of Morums Oriental Stores, Limited, was held on November 4 at Winchester House, Old Broad Street, Mr. D. Stoner Crowther presiding.

Mr. P. Nichols (one of the joint secretaries) read the notice convening the meeting and the auditors' report.

The Chairman, in moving the adoption of the report and accounts, said that the profit on trading for the fifteen months ended June 30 amounted to £79,378 6s., from which had to be deducted commissions to managers, interest, discount charges and depreciation on fixtures and fittings, amounting in all to £12,012 7s. 10d., leaving a net profit in Egypt of £67,365 18s. 2d. Of this sum a certain portion—namely, £7,008 0s. 10d.—being the profit allocated to the period prior to the incorporation of the company, which was effected on June 6, had been carried to general reserve, after charging there against the interest incurred by the company on the purchase consideration payable to the vendors. After taking into account a small item for transfer fees, which they would see appearing on the credit side of the profit and loss account, there had also been deducted £14,340 1s. 5d. in respect of directors' fees, London office expenses, and estimated provision for taxation, the latter item absorbing approximately £9,000 and including a small amount which it was thought they might be called upon to pay for excess profits duty. This left them accordingly with an available balance of net profit of £46,017 15s. 11d., which they proposed should be appropriated in accordance with the recommendations set out in the report. Turning to the debit side of the balance-sheet they would notice their authorised and issued capital was £500,000, of which £300,000 was represented by preference shares and £200,000 by ordinary shares, the former having been issued to and subscribed by the public, while the latter were taken by the vendors in part payment of the purchase price. As regards the creditors and credit balances, they represented mainly liabilities in respect of stock purchased and included in the item of stock on the credit side of the account. Shareholders might be interested to know that they had branches situated in the following towns:—Cairo (two), Alexandria, Mansourah, Tantah, Jaffa, and Jerusalem, while they contemplated opening a small shop in the immediate future at Port Said. They would, he was sure, agree that they might consider the results of their first year's trading as satisfactory. The turnover had increased appreciably during the year under review. If, on the one hand, Egypt had had her full share of the abnormal prosperity enjoyed by the world's trade since the Armistice, she had, on the other hand, experienced a full measure of the social and political unrest equally prevalent. They had not altogether escaped the labour unrest that has been rife throughout Egypt, but they had always kept in mind the interests of their staff, and were ably seconded in that by their general manager; notwithstanding their already heavy expenses, they had increased salaries and wages in order that their employees might be fully able to cope with the increased cost of living, and they believed that the relations between their management and staff were now on an excellent footing.

They would appreciate that their branches being situate at a great distance from their sources of supply—which, he might add, were principally in this country—their programme of buying had to be prepared and orders placed many months before the goods would actually be required for sale in their stores. In addition to that, until quite recently, they had had to cope with great difficulties as regards obtaining delivery and very grave delays in obtaining shipping accommodation. In the last few weeks conditions had undergone a great change. Goods in considerable quantities had come on the market, and wholesale prices had in many articles fallen appreciably, but he did not think that to-day anyone could safely forecast how long such conditions would last, or what changes might take place in the near or distant future; anyhow, he did not pretend to be able to do so. The greater part of their stocks were of recent delivery, and were, they believed, well bought through their buying agents, Morums Export, Ltd., under the personal direction of their general manager and his buyers, with full experience as to local requirements. Consequently, they anticipated that in the next five months, which were generally the best in the year, they would dispose of the greater part of these goods at satisfactory prices.

Mr. W. Cyril Tomlinson seconded the motion, which was unanimously adopted.

## NOTES OF THE WEEK.

### *An Annual Balkan Conference?*

From its inception, ten years ago, one of the aims of THE NEAR EAST has been to promote harmony and co-operation between the States of South-Eastern Europe. As the decade has had an almost continuous record of war, with the inevitable intensification of animosities, it has called for a strong faith to believe that the goal could and would be reached. Within the last few weeks this goal has come into sight with a suddenness and, it may be said, with a clearness that could not have been anticipated six months back. The alliance between Czecho-Slovakia and Yugoslavia; the Entente that links Roumania with both, while Greece is ready to be a party to the same understanding; the Treaty between Italy and Yugoslavia; and the tacit acknowledgment of all these countries that Bulgaria, under the post-war régime, having purged her war-crime, has qualified to be reinstated in the fellowship of Balkan nations—clearly we have here a set of conditions that need merely to be co-ordinated to ensure not only the lasting peace of South-Eastern Europe, but also the systematised co-operation of forty-five millions of people in the work of reconstruction. One or two political questions, no doubt, still await adjustment, but it is in the economic sphere that closeness of touch between the various States is most required. A conference of representatives of all the Governments—to be attended, let us say, by the Prime Minister and two other Ministers of each country—would be invaluable for attaining the end in view. If the experiment were tried, we feel confident that there would be a desire to hold such a conference annually. The gathering would, in all probability, effect more than formal treaties of alliance; it would certainly tend to clear the air of mutual suspicion that is so hard to dissipate without full and frank discussion.

### *The Greek Elections.*

At the moment of writing, reports from Athens are preparing us for the possible defeat of M. Venizelos's party at the General Election. If this forecast should prove correct, it is to be hoped that people both in Greece and outside will keep their heads. M. Venizelos will have been defeated because, owing to his long absence from Greece in connection with the Peace Conference, he has not been able to keep in touch with public feeling in his own country, and has not realised how his position was being undermined by the mistakes of his sub-ordinates. Eighteen months ago it was pointed out in these columns that the strength of the so-called Royalist party in Greece was not fully appreciated. A year later it was suggested that the Royalist character of the Opposition had been largely merged in a more constitutional programme, based on the shortcomings of the Government charged with the task of carrying on in the absence of the Prime Minister. Further encouragement was given to this constitutional opposition by the regrettable policy of arrest and imprisonment indulged in so freely until it led to the murder of M. Jean Dragoumis by soldiers in the chief residential street of Athens. It is necessary that the lesson of past mistakes should be emphasised now in case the Opposition, if it comes to power, should fail to profit by the experience of the Venizelists.

### *Greece's Political Future.*

Greece must bear in mind that the Allied Powers cannot be expected at once to take kindly to the possible political eclipse of the man who for two years or more has dominated, if not the councils of Europe, at least the men who have been responsible for the official policy of the Allies. It is a matter for regret that M. Venizelos should have narrowed the issue of the Greek elections to purely personal limits, as probably the best development for the country would have been that the Opposition should be returned to Parliament in such strength that M. Venizelos would have been compelled to purge his Government of its elements of weakness, and to put an end to the breach that has divided Greece into two bitterly hostile camps. If, however, the Opposition come into power, we can but hope that the able moderate men of the different parties will maintain control, will seek a dignified solution of the dynastic question, will avoid the extremist policy which will have brought about the undoing of the Liberals, and will prove that their concern for the welfare of the Hellenic world was genuinely based on conviction and patriotism, not on political opportunism. For they can assure themselves of a very brief spell of power if they try to perpetuate the political vendetta and pay more attention to personal interests and the spoils of office than to a sound constructive policy in home and foreign affairs. A Coalition Ministry would probably be the most statesmanlike course.

### *British Policy in Persia.*

The Secretary of State for Foreign Affairs is expected to speak in the House of Lords on British policy in Persia, while these pages are being printed. It is hoped that Lord Curzon will leave the past to take care of itself and will devote himself to enunciating the future policy of the Government. Opinions, as we

Digitized by Google

have seen, will differ as to whether what has happened in the Middle East was an inevitable corollary of the war and the delay in the settlement of Peace terms, or whether it might have been avoided. In an interesting letter published in this issue Major Ormesby-Gore again urges that responsibility can be established and continuity of policy secured only by making a Middle Eastern Minister and a separate Department responsible for the direction of policy and control of British expenditure and administration for the whole expanse of territory stretching from Egypt and the Sudan to Persia. With regard to Persia itself, we suggested last week an early withdrawal to Ispahan with a view to enabling Persia to right herself by a gradual consolidation of strength and the establishment of settled government in the south. Experience and common-sense alike are against the possibility of any Persian Government making good in Teheran, and we hope that the British Government will abandon the attempt to retain troops so far north.

### *The Egyptian Delegation.*

In the middle of last week it was announced that Zaghloul Pasha and the other members of the Egyptian Delegation had decided to return to Paris, and that something like a breakdown in their negotiations with Lord Milner had taken place. That Zaghloul Pasha, and possibly some of his companions, wished to discuss immediately certain "reservations" suggested during the delegates' recent visit to Egypt is admitted, and that Lord Milner considered that such discussion should be postponed until formal negotiations were opened between the two Governments, British and Egyptian, appears to be a fact. But for the very reason that such negotiations have not yet been opened up, and cannot be opened up, until Lord Milner's report is presented to our Government and considered by them, it is at least premature to take the view, as has been done by many people, that the fate of the negotiations as a whole is imperilled. The Zaghloulite Delegation has served a good purpose, and in some ways has served both its own country and Great Britain well; but it holds at best a semi-official position, and if it should take up the attitude that it would have nothing more to do with the matter until the reservations were taken into consideration, Lord Milner's report could—and doubtless would—still be presented to the Cabinet, and by them considered. That done, it would be for the Egyptians as a nation to say whether they wished matters to proceed, and if they so decided, the subject of the "reservations" could then, but not before then, be brought up.

### *"Independence" Demonstrations.*

If we wished to discover the true explanation of the latest manœuvre of Zaghloul Pasha and his companions, we should probably have to seek it elsewhere than in London; but for the time being, at least, we have no such wish. Speaking at a luncheon given in Cairo on the anniversary of the first more or less official demand for Egyptian independence, Rushdi Pasha advised his audience not to be perturbed by the suspension of negotiations, and his advice was excellent. Unfortunately the day was not allowed to pass without anything worse than a public luncheon and speechifying. The students went on strike, and organised demonstrations which resulted in the usual damage to property; the crowd is reported to have shown great hostility to the Sultan and the English; and the street urchins added to their usual imprecations a new one: "Down with Salisbury!" In the evening a British officer was fired at and dangerously wounded. Such occurrences can hardly be regarded, outside Egypt, as demonstrating the fitness of the Egyptians for self-government.

### *Turco-Armenian Armistice.*

Shortly after we went to press last week news reached London that hostilities between the Turkish Nationalists and the Armenians ceased on November 7, when an armistice was concluded. In view of the great pressure to which they were subjected on both sides, the Armenians cannot be blamed for coming to terms; and, indeed, as reported, the terms themselves are sufficient to prove that no other course was open. The Armenians are to withdraw to the western bank of the Arpa Chai, giving up the Karabagh and Zangezour district to the enemy. A study of the map will show what this means to the Turko-Bolshevist combination, and unless Georgia receives strong support from the Entente, there may soon be no barrier at all between the enemy forces. The Turks, it is announced, are to occupy Alexandropol and the surrounding district pending peace negotiations, and "will be responsible for the maintenance of order and the security of the inhabitants." What those unhappy people's feelings must be on finding themselves faced by such a prospect it is not difficult to imagine. It is reported that an ultimatum has been addressed to Georgia, and that Georgia has pluckily replied by ordering a general mobilisation.

### *Armenian Frontiers.*

It is somewhat ironical that at the very time when Armenia's boundaries are, temporarily, at any rate, contracted, we should be told that "the final report of the Special Commission appointed by the American State Department to study the Armenian demarcation question will shortly be presented to the President." There seems to be some danger that the work of demarcation may be rendered unnecessary by the elimination of the Armenians. The best hope that we can see is that the gloomy reports are greatly exaggerated, as those regarding the massacres at Hajjin are now known to have been. At the latter place, according to official news, no massacres at all occurred; only non-combatants surrendered; a column numbering about 300 Armenians broke through the Turkish forces and reached Sis; while other bodies fled to the mountains, where they continued their resistance. Thus, while the situation of the Armenians both in Armenia proper and in Cilicia is extremely bad, it looks as if their friends were, for quite comprehensible reasons, making it out to be even worse than the reality. The wisdom of this policy is open to question; but it is clear that on this occasion there is a wolf in sight—or, rather, actually within the fold; and unless the shepherd's friends go to his help, the flock must inevitably suffer very heavily.

### *India and the Agitators.*

The Government of India has, in our opinion, done well to publish the explanation of its policy towards the agitators which appeared last week. It is true that its motives could be inferred from its actions by any careful student, but then the public is sometimes careless, and the growing volume of criticism has been marked by occasional failures to appreciate the obvious. The Government had, in fact, a difficult choice to make: it could have entered on a campaign of drastic repression against the virulent body of agitators who have tried to wreck the policy accepted by Parliament, or it could trust the new-found political sense of India to endure this agitation without serious injury. The latter alternative was chosen, and the claim is now made that India has in great measure justified the confidence reposed in her. The agitators have, in fact, failed in the attempt to stampede the educated class, and have turned to the nurses and the schoolboys, so that the possibility of serious disorder remains, and the enlightened members of the public are now called upon to go further, and, having resisted agitation directed against themselves, check the more immediately dangerous movement among the general population. It is too early to pass final judgment on such a policy, but it is well that the public should be placed in a position to realise its nature and object. The Government had to choose between risks. Drastic repression might easily have united the educated classes in uncompromising opposition, and thereby enabled the agitators to realise their designs. Forbearance might have led to an outburst of public disorder, and unhappily the possibility still exists, but the outburst has not yet occurred, and that fact is by itself significant of much. There are some grounds for anticipating that the culminating point of the agitation will be marked by the elections to be held next month, and no one at this distance is in a position to predict the results of such a novel experience for the people.

# THE WEEK AT HOME.

London, Monday evening.

**The Unknown Warrior.**

When first the idea was suggested of burying an unknown soldier from the Western Front in Westminster Abbey, there was a quite perceptible undercurrent of objection on the ground that it was sentimental, theatrical, and even morbid. I am bound to say that all those objections were silenced by the magnificent ceremonial of last Thursday. The unknown warrior was symbolic, but the symbol was worthy of the reality, and the homage paid by the great on Armistice Day, and by the public on the day following, showed that the whole people entered into the meaning of the occasion with reverence and thankfulness.

The day itself was one of those perfect autumn mornings in which London looks like the city of a dream; the next morning was foggy, and the new Cenotaph, which replaces the temporary structure of last November, was almost lost in mist. The simple yet massive dignity of the monument is extremely impressive, and goes some way to redeem English sculpture from the degradation which its statues have brought upon it. The spot, which a bare year ago was nothing save a street refuge in Whitehall, is now sacred soil, and will ever remain so. It may be fifty years before the last widow lays the last wreath of personal memory of a lost comrade there.

**The Guildhall Banquet.**

The Lord Mayor's Show this year was the poorest thing in pageants ever seen, but the Guildhall banquet which followed was by common consent admirably done, and the Prime Minister's optimistic speech silenced even his most jaundiced critics—who, to tell the truth, are not in the City. Mr. Lloyd George was perfectly right in striking a bright note. There are indications that the worst part of the reconstruction period is over, and the industrial temper is a good deal less ragged than a few weeks ago. Unemployment is a serious problem, but it is not increasing; and although Mr. H. G. Wells has been trying to make our flesh creep by predicting that Bolshevism will undermine Western civilisation, his reputation as a prophet is not what it was, and the general tone of foreign affairs is fairly cheerful.

One would not, however, be very surprised to see an outbreak of the old Tariff Reform controversy at home again in the near future, owing to the increased import of German dyestuffs and toys; the Free Traders are doing their best to kill—and if that fails, to delay—the Anti-Dumping Bill, and the advocates of key industries in this country are becoming rather restive.

**A Labour Defeat.**

Some part of Mr. Lloyd George's good spirits may have been due to the defeat of Labour at the November municipal elections. It was only to be expected, for Labour has got itself identified with increasing rates, and the glorious simplicity of the old cry of "Down with the rates" is usually good enough for these elections. There have been several meetings of protest recently against extravagant municipal expenditure, and it is, roughly speaking, true that the expenditure has been greatest and the rates highest where Labour rules. According to their spokesmen, that is partly because Labour, knowing something about conditions of employment, pays its municipal employees properly, and partly because Labour happens to rule in the poorer localities, where the rates are always heavier in any event.

There is probably something in this, but the real fact is that Labour is under the weather at the moment. The miners' strike, the *Daily Herald* exposure, and similar happenings have not only divided the Labour right and left wings, but have alienated other support which the party, both municipally and in the Commons, hoped to obtain. It is rather amusing to see the emergence of a Whig and Radical aspect in the Labour party as in the old Liberal party—human nature is very much the same whatever its label—but the general impression is that political Labour is rather less strong than it was a year ago, and its interest is to avoid a general election for the next year or two, until it has got more and better candidates. No party will ever be able to rule England that accepts the disgruntled and disappointed members of other parties, and Labour's confession that it put up that absurd person, Mr. Joseph King, in the recent by-election at Ilford because it had nobody else was a frank admission of its real weakness.

**Ireland.**

The only Parliamentary event of the week was the fact that the Home Rule Bill was read a third time in the Commons. The speeches, especially that of Sir Edward Carson, were more hopeful, and the whole situation is at least momentarily brighter. The hunger-strike of the Cork prisoners is to cease, and there are those who profess to hope that the era of murder and reprisals is nearly over. We shall see.

**The City.**

With the conclusion of the coal strike, the City seems to have revived, and stockbrokers' clerks no longer think it necessary to perambulate Throgmorton Street with the gloomy air of a professional hangman. Several new issues have been floated, but some new Water Board stock was left high and dry, about three-quarters of it not being applied for. The City still predicts national bankruptcy if Mr. Chamberlain stays at the Exchequer, but that is "pretty Fanny's way"; to judge by the number of palatial new offices they are putting up in and around Moorgate Street, one would say that money breeds as well as ever.

**What is a Bank?**

Most people know a bank when they see one—"the place where they won't lend you money when you want it," as an impecunious acquaintance once described it—but, according to Mr. Walter Leaf, who is the head of one of the great banks (or one of the heads, for their boards of directors are like hydras in these days), it is a very difficult thing to define a bank. There is a demand both from the Government and the public for legislation in order to stop the bucket-shop and the mushroom type of institution that preys on the credulous and ignorant, but no definition as yet suggested appears to be satisfactory. One of the difficulties is that, even if the word "bank" is copyrighted, anybody could still open an office and call it the London Bankers' Trust, or some such high-sounding name, and still be within the law—and the profits, too, no doubt.

A similar difficulty cropped up years ago with the dentists. The qualified men demanded protection from the quacks, and were given the sole right to call themselves "dental surgeons." Forthwith every quack put

on his plate "dental surgery," and the public could hardly be blamed for not telling the sheep from the goats.

**The Female Cigarette.**

The idea of controversy and heated recriminations in so discreet and modest an organisation as the Young Women's Christian Association strikes one as almost incredible; and when it is added that the trouble is that some of the young women want to dance, play cards, and even smoke, and that the—well, the not-so-young women in the Association will not let them, it seems time to draw a discreet veil over the remainder of the proceedings. But a split there has been, and the Y.W.C.A. is now divided, like a railway train, into smokers and non-smokers. And as in the average modern train, most of the women seem to be in the smokers.

**The Acquittal.**

The Greenwood trial, which kept England on tenter-hooks for ten days, has ended with the acquittal of the prisoner, and Mr. Greenwood, following the example of Mrs. Asquith, is writing an account of his life for one of the Sunday papers. The Crown has been criticised for prosecuting when the evidence was so weak, but the Crown probably did not reckon on the fact that so many witnesses would be proved inaccurate in the box, and certainly was unprepared for the admission of the doctor who attended Mrs. Greenwood that he had confused opium with morphia. On the evidence the jury could come to no other conclusion.

**A War Office Story.**

Many of the stories of the War Office are merely *ben trovato*, but the latest one seems to be true. A discharged soldier, who applied for his pension, was informed that he was officially dead. When he disputed it, he was referred to his grave in France, with his name and number on it. From this there appeared to be no appeal, but it is said that when the income-tax people present their little bill to the soldier he will make the obvious retort. Unfortunately, that particular class of official is lacking in a sense of humour.

**The Week's Books.**

I have been reading with interest "A Naturalist in Himalaya" (Witherby), by Mr. R. W. G. Hingston, in which the author has embodied some very curious observations on the habits of ants and spiders, and particularly on the geometrical instinct which the latter show in building their snares.

Rarely does one come across a more melancholy book than "The People of the Ruins" (Collins), by Edward Shanks. It gives us a picture of England two hundred years hence, and at first I was disposed to envy posterity because, according to the author, the population of London had shrunk, and one had a momentary vision of being able to get about more comfortably, even if one had to wait a couple of centuries to do so. Unfortunately posterity appears to have overdone it, for only one train comes into London a week, and civilisation is practically extinct. The ruler of England is a man of Jewish extraction called the Speaker, and he has two enemies, the Chairman of Bradford and the Chairman of Wales, who refuse to pay taxes. Eventually the Speaker is defeated, and perishes miserably on Bignor Hill. This is not a book to read when you are in the dumps, but it leaves me with the impression that Mr. Shanks, who is a dramatic critic in his idler moments, will be heard of again. I can quite understand that a prolonged bout of first-nights would produce the profound pessimism that this book shows.

In "The Practice and Theory of Bolshevism" (Allen and Unwin) Mr. Bertrand Russell, the mathematical pacifist, gives a not altogether favourable account of his visit to Russia, which will rather disconcert those admirers of the Soviets who had expected him to return more enthusiastic than he went.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, November 1.

**Sultan's Visit to the Provinces.**

His Highness the Sultan paid a State visit this week to Damanhour. He proceeded from Alexandria by motor-car, and was given a very good reception all along the road and in that ancient town, where he visited the schools and hospitals and laid the foundation stone of a new Mosque. This is the first occasion on which his Highness has visited a provincial town since his accession to the throne, three years ago, and coming at the present juncture it is not unnatural that a certain political significance should be attached to his visit to Damanhour, which it is understood is intended to be the prelude to other, more extended visits in the provinces in the near future. Although his Highness will not return to Cairo until the end of the month, the Residency and the senior British officials are moving up to Cairo this week, and Lord Allenby, when he arrives about the middle of the month from Constantinople, will only stay sufficiently long in Alexandria to call on the Sultan.

**The Mixed Courts Incident.**

As foreshadowed in my letter last week, a Decree was signed yesterday by the Sultan extending the powers of the Mixed Tribunals for another six months from to-day. The Decree, however, contains a mention to the effect that Dutch subjects are excepted from the jurisdiction of the Mixed Courts until such time as the Dutch Government has signified its adhesion to the proposal to extend the powers, and a supplementary Decree to this effect has been published. The last occasion on which a similar exception was made was in February, 1916, when Italy refused her assent unless an additional judge were granted her. On this occasion the exception is due to a misunderstanding on what is purely a technical point, and it therefore has no political significance.

The misunderstanding, it appears, is due to the fact that the Egyptian Government insists on having the final say with regard to the selection of foreign judges. These may be nominees of the foreign Government concerned, but in principle they must be *personæ gratæ* with the Egyptian Government, who must have the right, if it sees fit, to withhold its acceptance of the nominees. In this case it is understood that the Egyptian Government has not objected to the person of the judges proposed, but that the Dutch Government maintains that its selection should not be subject to the veto of the Egyptian Government.

There is little doubt that the point of view of the Egyptian Government is the correct one; for although the foreign judges are chosen in the proportion laid down for the foreign countries signatory to the Capitulations, they are not really representatives of their country, but are officials of the Egyptian Government; and such being the case, it is only right that the latter should have the final decision in the matter of their selection. It is not thought that any long time will elapse before a satisfactory settlement is arrived at and the necessary decree can be issued.

**Al Azhar and its Inmates.**

Ever since the political troubles started at the end of 1918 a very prominent part has been taken in the spreading of propaganda, etc., by the students and officials of Al Azhar. A law has now been published forbidding the Ulema from making speeches or drawing up or distributing circulars calculated to distract the students from their studies or interfere with public order; while religious students are, in addition to similar prohibitions as regards speeches and circulars, forbidden to join political parties or associations, under penalties, varying from a warning to expulsion, laid down in the law.

This law has given rise to a certain amount of adverse comment, on the score that it interferes with the liberty of individuals; but there is no doubt, in view of past events and of what transpired in the course of the conspiracy trial, that matters have reached a point where it has become necessary for some such action to be taken in the case of the officials and students of Al Azhar. For, after all, in adopting religion as their career, they profess to have done with politics, and, because of the religious nature of their duties and their studies, they are exempted from certain obligations to the State which fall to the lot of their secular comrades.

By the way, four weeks have now elapsed since the termination of the conspiracy trial, and as yet there is no news of the sentences on the twenty-four men convicted. It appears that the promulgation has been postponed owing to its having been deemed necessary to submit the papers to London. The reason of the necessity is not stated, although it is believed to have something to do with the legislation regulating Military Courts at the present moment.

**The Political Situation.**

The controversy with regard to the proposed agreement and the attitude of the Egyptian Delegation continues. The telegraphic report from London published by an Alexandria vernacular paper to the effect that there was a serious disagreement between the members of the Delegation and imputing certain remarks to Zaghloul Pasha has been contradicted by a telegram from the latter. In fact, people ought at the very outset to have regarded the telegraphic report as suspect in view of its publication in a paper which is known to maintain the closest relations with the man who is popularly considered to be at the back of the present opposition to the Milner-Zaghloul Draft Agreement. While the opposition attacks Zaghloul and his colleagues for lack of patriotism and for treachery in accepting an agreement which is "but a confirmation of the Protectorate," the Zaghloulite press bitterly attacks Said Pasha, who is understood to be directing the opposition, and accuses the present Cabinet of all manner of wickedness; and so the merry round of personalities, insinuations, lies, and rumours continues its healthy career.

**The Racing Season.**

On Saturday last the winter racing season opened with an excellent meeting at Heliopolis, and from now onwards until April we shall have no fewer than six race meetings every month, one Saturday meeting alternatively at Ghezireh and Heliopolis, and a fortnightly Sunday meeting at the latter. The most noteworthy feature of last Saturday's races was the extraordinary number of new horses, many of them of great promise. There is, indeed, no doubt that the continuation of racing throughout the war, which has materially improved the final position of the clubs, and so enabled them substantially to increase stakes, has given a tremendous impetus to horse-breeding, which is most welcome, particularly as just prior to 1911 interest in this direction appeared to be waning.

## YUGOSLAVIA.

BELGRADE, October 31.

**An Echo of Klagenfurt.**

Although the Croats are Roman Catholics, they are very strong Nationals, and the Croatian language may be, and is already, used to a certain extent in church services. They look with some suspicion upon the Slovene Clericals, and as both these groups are regarded by the Orthodox Serbs as separatists the satisfaction of the latter may be imagined when they see the *Hrvat*, the organ of the Narodny Club, attacking Dr. Koroshets.

Digitized by Google

The ground of complaint is the disaster of the voting in the plebiscite at Klagenfurt, for which they hold Dr. Koroshets responsible. He used to boast that the Slovenes were so well organised there that they were perfectly confident about the issue. The disastrous result shows that an unexpectedly large proportion of Slovenes there are partly or entirely Germanised. Dr. Koroshets would have been better employed in looking after the national interests in his own country and organising the people for the plebiscite than in gadding about Croatia, Bosnia, Herzegovina and Dalmatia. In fact, the *Hrvat* gives him a very nice snub, which is interesting as showing that the Slovene Clericals will play a lone game at the coming elections.

It is to be hoped, however, that they will not be too self-centred, for there are signs of alarm at the fact that all the anti-Slav elements in the country are endeavouring to organise themselves and form one *bloc*, sinking their own differences in their common object of hatred and malice. Such are the Magyars, with their programme of irredentism. They are the most energetic, the most determined, and the most bitter. Other hostile elements are the Germans, many of the Jews in the newly liberated provinces, and, in the south, the pro-Bulgar element in Macedonia, and the hostile Albanians, and, last, the Communists. It is anticipated that the latter will secure a heavy poll.

**Another Strike.**

There is another students' strike, not of the University this time, but of the Commercial Academy. The youths sent in an ultimatum to the authorities to the effect that they would strike unless a mess were provided for them or else an allowance of 300 dinars a month, which is not unreasonable, considering the fearful cost of living, which is every day getting worse. The director, M. Lukitch, met a deputation of them very sympathetically, telling them that the teaching staff were fully aware of the students' difficulties, but could not promise more than 125 dinars a month. He added, however, that they would arrange to give some lectures and concerts to raise some funds for them. The students were not satisfied with this answer, and declared their strike, and marched off to the Ministry of Commerce, where they were told that they would not be received without their director. They accordingly returned to the school and reported to the director, who advised them to return to work. But they went out and held a meeting, where, after some debate, it was resolved to return to duty. So the strike fizzled out, and in a few days the director will take them to the Ministry, where, let us hope, they will get their reasonable demands satisfied.

**Serbia and Greece.**

Affairs in Greece are watched with sympathy in Belgrade, where the sad and premature death of the young King made a painful impression. The Crown Prince has gone to Athens, whence he is shortly expected back. More than anybody else, Serbia has good cause to dread the possibility of the return of ex-King Constantine.

**The Minister of Finance.**

The Minister of Finance, M. Kosta Stoyanovitch, who, it will be remembered, tendered his resignation the other day because the Minister of Communications, Dr. Koroshets, refused to sign a decree on the grounds that he wishes his district of Slovenia exempted from its operation, has now retracted, as M. Vesnitch has succeeded in persuading the Clerical leader to sign. Thus what might have led to the break up of the Coalition on the eve of the elections has been averted, but it is instructive as showing the difficulties encountered by M. Vesnitch in handling his composite team.

## GREECE.

ATHENS, October 30.

**The King's Death.**

The slight improvement observed in King Alexander's condition during the early part of last week was not, unfortunately of a long duration. On Friday, his Majesty had another attack of extreme violence, and Madame Manos, who was always in attendance by her husband's bedside, immediately summoned the doctors,

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR AND MIDDLE EAST.

*Embodies the following advantages:—*

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

who thought, for a moment that the end had arrived. This new crisis lasted about three hours, after which the King, completely exhausted, was able to get a little sleep. On Monday morning he was in a state approaching absolute insensibility, and although all hope was now lost, science still fought stubbornly to prolong his life. At 2 o'clock, while in a semi-conscious condition, the King was given Holy Communion. Shortly before four he regained consciousness, and noticing his wife kneeling by his bedside, tried to put his arms round her; but the effort proved too much for him, and falling back on his pillows he became delirious, shouting: "Where is my wife, I want my Bic." These were his last words. At 4.10 p.m. on Monday, he died.

The Dowager Queen Olga, who was expected in Athens on Monday morning, did not arrive till Tuesday, only to be told that her unfortunate grandson was no longer amongst the living.

**His Life.**

The late King was born at Tatoi, on July 20, 1893, and was the second son of ex-King Constantine and ex-Queen Sophie. He was proclaimed King of the Hellenes on June 14, 1917, after his father had been deposed. During his short but happy reign, one of the most glorious pages was added to the history of his kingdom by the signature of the Treaties of Neuilly and Sèvres, which transformed Greece into a great and powerful nation.

King Alexander's romantic love affair with Madame Aspasie Manos commenced long ago, at a time when he, a young careless prince, had no aspirations to the Throne, and never dreamt that he would one day be called upon to fill the highest position in the country. But even then the late monarch remained true to his old sweetheart, and although both his "entourage" and public opinion were opposed to such a match, and urged him to marry one of his own exalted station, Alexander declared most emphatically that it was his intention to make Mlle. Manos his wife. No priest, however, would undertake to perform the ceremony without the license of the metropolitan and without the special license of the Minister of Justice demanded by the law in the case of Royal weddings. The young pair finally succeeded in getting married on November 3 last year at the house of Miss Manos's sister, the ceremony being performed by a Serbian priest.

The deceased King was a very keen sportsman, and was considered one of the most capable motorists in Greece.

**The Election of the Regent.**

The Chamber had originally been convoked for Thursday morning (October 28), but as the majority of the deputies had already commenced their electoral tour, and were unable to return to Athens in time, the sitting was postponed until the same afternoon. When it was opened, at 4 o'clock, 140 out of 336 deputies were present.

M. Venizelos, announcing the death of King Alexander, declared that, in accordance with the Constitution, the successor to the Hellenic throne was the late King's young brother, Prince Paul, but in the absence of the new King, and in accordance with the Constitution, the election of a Regent would be necessary. The Greek Government had instructed its representative in Switzerland to convey its condolences to the Prince on the death of his brother, and to inform him of his succession to the throne, at the same time intimating that his coming to Greece would not take place before the General Elections have proved whether the Government still enjoys the full confidence of the Greek people.

M. Pope, an Independent, expressed his astonishment at this decision, and maintained that nobody had a right to prevent, even temporarily, a legitimate king from performing his functions, thus leaving an open door by which the Government could, if thought necessary, come to new decisions with regard to the vacant throne. He was immediately followed by M. Chrysostalis, an Opposition member, who declared that although he greatly admired Admiral Coundouriotis (the proposed Regent), he would refuse to vote in his favour, as he considered that the dynastic question ought to be settled in a more radical way, *i.e.*, in conformity with the wishes of the Greek people, and without taking any notice of the "irreconcilables."

M. Venizelos, replying to M. Pope, explained that the election of a Regent was a constitutional proceeding, and that ex-King Constantine's pretensions to the Throne, which existed even before King Alexander's death, would, if continued, create grave difficulties. It is essential that in becoming King, Prince Paul should have his father's consent and be recognised by him as the legitimate King of the Hellenes. The nation, added M. Venizelos, is not disposed to tolerate the abnormal situation which would be created by having two kings, one on the throne and another outside, the latter always plotting and scheming against interior order and the security of the country. M. Chrysostalis, continued the Premier, has indeed been quite clear in his declarations. He asks us point-blank to recall the ex-King. M. Venizelos went on to explain that it was not his (the Premier's) "irreconcilable" friends who prevented him from accepting such a solution. Even should these agree to the ex-King's return, he himself would never consent to a solution which would result in nothing less than an internal war in the country. At the end of his speech M. Venizelos declared that he hoped to be able to set out at some length the Government's point of view on the dynastic question during his electoral tour.

The Chamber then proceeded with the election of the Regent. Out of 140 deputies present, 137 voted in favour of Admiral Coundouriotis. As soon as the result was made known a delegation consisting of five deputies, all descendants and bearing the names of famous generals who fought in the Greek revolution in 1821, proceeded to the Admiral's house to announce the tidings and accompany him to the Chamber. The Regent, attired in his admiral's uniform, and wearing the Grand Cordon of the Order of the Saviour, took the oath of allegiance to the Hellenic Constitution, in the presence of the Metropolitan and the Holy Synod.

## ROUMANIA.

BUCHAREST, October 31.

**Parliament.**

It has now been definitely decided that Parliament will open on November 28.

The resignation of the Minister of Industry and Commerce, M. Taslauanu, has been accepted. General Averescu has taken over the portfolio himself, and to satisfy public opinion has made drastic alterations in the conduct of this Ministry, the principal being:—(1) No import or export permits will be issued without his signature. (2) All permits, as soon as they are granted, will be published in the *Monitorul Oficial*. (3) There will be a special information department to deal with callers, thereby preventing loitering in the different offices and vestibules. (4) He will personally receive the general public only on Fridays between eleven and twelve noon.

**General Strike.**

The great general strike threatened by the Socialist and Labour Party, as mentioned last week, has not succeeded as they expected it would. This was partly due to the measures taken by the Government, reintroducing Martial Law and the Censorship, and enforcing the Regulation of Labour Bill in arresting all leaders and instigators. The motive of the strike being more political than economic, the strike itself was not generally understood by the labouring classes. An important reason for the partial failure was that the strike was inaugurated at the wrong time, in that the majority of the working classes did not feel inclined to sacrifice their funds in this way, as the winter was coming on and they would have to provide themselves with the necessities of life.

The only stoppages were on the railways and in a few factories, and then only for a matter of forty-eight hours or so, during which time a few special trains were run, and the Simplon Express missed only one day. The chief towns did not suffer from lack of bread, light, or water, which was feared by the general public; and ordinary municipal life was uninterrupted.

## THE NEW MAGNUM TYPE

TRADE MARK

Digitized by Google

At the time of writing, although the situation is improving, the various questions have not been settled.

**Opening of Czernowitz University.**

Last Sunday, October 24, the opening of the University at Czernowitz took place in the presence of the Royal Family, State officials, and representatives from foreign countries. The King delivered a suitable speech, and on this occasion gave 100,000 lei to be used as a fund for the support of poor students attending this University.

**Personal.**

The King has returned to Bucharest from Sinaia for the purpose of receiving the credentials of the British Minister, Sir Herbert Dering, who arrived from Sofia a short while ago, and also of the new Greek Minister, M. Nanu.

The Court has gone into mourning for three months, owing to the deaths of the Queen's mother and of the King of Greece.

**Fire at Constantza.**

A violent fire broke out the other day at Constanza, destroying a whole quarter, and leaving 100 families homeless. The damage is estimated at two million lei.

## BULGARIA.

SOFIA, November 7.

**The Vazoff Jubilee.**

The national celebrations of the fiftieth anniversary of the activities of the national poet, Ivan Vazoff, concluded last Tuesday with a dinner and reception given in his honour by King Boris. This was the first reception held by his Majesty since his accession, and a very brilliant company attended it. At the conclusion of the dinner the King proposed the toast of the Poet's health, and took advantage of the opportunity to appeal to all present to unite in working for the welfare of the Bulgarian nation. M. Vazoff replied in a moving speech.

**The Occupation of Tsaribrod.**

On November 2 the Yugoslav Minister for Foreign Affairs telegraphed to the Bulgarian Foreign Ministry that, in virtue of the Peace Treaty, the Yugoslav Government had determined to take possession of the territories ceded to it, and that orders had been given to the troops and officials of Yugoslavia to enter them on the 6th inst., although the delimitation has not yet been completed on the spot by the commission appointed for the purpose. The Bulgarian Government immediately made representations both at Belgrade and at Paris, expressing its surprise at this unexpected decision, which will create unnecessary suffering for the inhabitants of the districts concerned, and will be an obstacle to that restoration of friendly relations which Bulgaria so earnestly desires. The reply also drew attention to the fact that the communication from Belgrade contradicts the latest communication of the Yugoslav Legation at Sofia, by which the Yugoslav Government announced that the occupation would be accomplished side by side with the establishment of the frontiers by the Commission. As this delimitation has not been effected yet, and as members of the Commission have themselves raised questions which ought to be settled conformably with the Treaty, the Bulgarian Government requested that action should be postponed, considering that the occupation should take place, not according to a decision of the Yugoslav Government, but on the lines of the Treaty and in conformity with the decision of the International Commission charged with the work of delimitation.

On the 4th inst. Dr. Trumbitch replied that the decision of his Government to occupy the territories in question was quite in accord with the Treaty of Neuilly, and that it could not be modified, because it had already come into force. The Bulgarian Ministry for Foreign Affairs, in reply to this message, stated that it had no intention of opposing the decision taken, but considered it its duty to protest against it, for the reasons already stated. The Bulgarian Government has informed the Entente representatives here that, in order to avoid any incident, it has ordered the frontier authorities to withdraw without offering any opposition.

The occupation of Tsaribrod began yesterday morning. Early in the morning three cavalry soldiers entered the town, and a little while later two companies of infantry from the garrison at Pirot. At the time the town was as if dead, and not a single citizen was to be seen in the streets. According to the latest semi-official reports several Bulgarian families, chief among them that of M. Emanuel Natcheff, a Deputy of the Chamber, and president of the permanent commission of the Sofia County Council, wished to take the train for Sofia, but were stopped by the Serbian authorities, who arrested them.

At yesterday's sitting the Chamber adjourned as a sign of mourning for the loss of Tsaribrod, and the news of the occupation was announced here by the tolling of bells. All theatres and other places of amusement have also been closed for three days.

**Roumania and War Criminals.**

The High Commissioner here of the Roumanian Government announces officially that his Government has informed the Bulgarian Minister Plenipotentiary, M. Nedkoff, that it will not press for the extradition of Bulgarian war criminals, according to the Peace Treaty, on condition that they shall be strictly tried in Bulgaria. The Roumanian Government hopes that the Bulgarian Government will take measures to punish these criminals, and will communicate the names of the persons to be tried.

## CYPRUS.

NICOSIA, October 16.

**The Cyprus "Question."**

A breakdown in telegraphic communication again deprives Cyprus of daily news at a time which the "Union" party still regard as critical. Opinion and feelings in the Unionist camp are much divided. The advanced leaders and the pro-Unionist papers lament that weeks go by and that no meeting of returned delegates and the local Committee has been held to decide whether the three members still in London (the Archbishop, M. Theodotou, and M. Constantinides) should remain or return. Consequently no directions have been sent, and the delegates may probably return. They repeat that the members should never have made the deplorable mistake of returning to Cyprus at all. That they did so was due, they say, to the island Aid Committee. They still pin their faith on the Mission's influence, and hope that the error of returning before a final settlement will not be repeated. The Bishops of Papho and Kition support this view. When the Archbishop returned in the summer with other members, one speaker at a meeting went so far as to propose that the gates of the Archbishop's palace should be closed to him, so that he should be compelled to return by the same ship that brought him to the place "to which the voice of the people calls him." The reverend prelate, acting on what he concluded was the popular will, made hurried preparations for a return, and did not even take the eight days in Cyprus which the other members desired to take, but started for London alone. The papers referred to and their supporters entirely ignore or conceal the fact that the members of the deputation who recently returned had very good reasons for doing so after the plain hint given them by M. Venizelos. The members of the Mission, which includes the ablest of the Cyprus leaders, certainly did all they could in London, and they know far better than those at home how matters stand. It would, of course, be quite inexcusable that more money should be wasted over a deputation that has carried out its duties; and this is understood by the party which holds—as most sensible Cypriots now do—that nothing more can be accomplished in London.

The Turkish community, while naturally anxious as to the outcome of the wearying Cyprus agitation, has continued to regard the situation quite calmly, and has been persuaded that the British Government is not likely to commit a second time the error of offering Cyprus to Greece, especially having regard to the present unfortunate circumstances of the kingdom, its political factions, and ominous unrest. It has trusted with complete confidence to the pledges given by Mr. Churchill, when in Cyprus, and to the subsequent promises of the British Government that its interests would be fully respected. On learning the statement of Colonel Amery in the House of Commons that "no change is contemplated in the State of Cyprus," the Moslem community wrote in August to the Secretary of State for the Colonies, expressing their gratitude. The Chief Secretary has, by direction of the Secretary of State, under date September 20, communicated the receipt of their letter. Irfan Bey, M.L.C., has just made this known to the Ottoman community, and great satisfaction has been caused.

## BRITISH POLICY IN PERSIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Your admirable leading article on British Policy in Persia, in your issue of November 11, raises the question as to whether the continued maintenance, at great expense to the British taxpayer, of British troops in Persia is justified. Why are these troops there? Are they the outposts of a military scheme for the defence of India and Mesopotamia against Russian or Tartar invasion, or are they merely a local garrison for the purpose of maintaining in power in Teheran a Government which you describe, probably correctly, as a corrupt and effete bureaucracy? If the former is the reason, the responsibility for the present policy rests with Mr. Churchill and Mr. Churchill alone. But Mr. Churchill has several times made it clear that it is not he, but his colleagues in the Cabinet, who have dictated our policy in the Middle East, and that his function is merely to arrange for the necessary distribution of troops to give effect to that policy. After reading Mr. H. G. Wells's descriptions of the present state of Russia, the plain civilian will find it hard to believe that the Russian Government have the material or military resources which would enable them to send a formidable expedition into Persia, much less across it into Mesopotamia or Baluchistan. One is forced to the conclusion that the British troops are being retained in North-West Persia for the purpose of "bolstering up a clique which it is not in the interests of either Great Britain or India to support," to use the Aga Khan's trenchant phrase.

There is a good deal of misgiving in this country regarding the necessity or desirability of the Anglo-Persian Agreement at all; but if that agreement is to be construed as involving obligations on our part to maintain a particular party in power in Teheran, such misgivings will be greatly increased. We have got to cut down our national expenditure everywhere, and especially in the Middle East, so the decision on this question is urgent.

The trouble lies mainly in the difficulty of fixing responsibility for British policy and expenditure in the Middle East. I am inclined to agree with the Aga Khan when he says that it has been "without coherence and without clear direction." The India Office has had its own Arab and Middle Eastern policy, and the Foreign Office another policy, and ever since the Armistice we seem to have been drifting. You say in your article that the mistakes of the Mesopotamian administration were of "local origin, the result of the authorities being left without instructions." This is true of Egypt in 1918 and during the first months of 1919, but I do not think it can be fairly said of Mesopotamia. Sir Arnold Wilson's system of administration was built up with the assent and encouragement of Whitehall. Everything—appointments, salaries, etc.—were all carefully supervised and controlled by the Mesopotamia Department of the India Office and by the Middle Eastern Committee of the Cabinet, under the chairmanship of Lord Curzon. Sir Arnold Wilson merely carried out the policy which was directed and regulated in detail by Whitehall. But all the time the Middle Eastern Committee of the Cabinet seem to have been pursuing two policies. We were constantly proclaiming our intention to set up an Arab Government and an Arab Administration, while in fact we were covering the country with an extremely efficient and energetic British bureaucracy, which in a remarkably short time had already achieved great material results.

It is no reflection on Sir Arnold Wilson's work to say that, carried out as it was under the direction and responsibility of Whitehall, it tended to become more and more inconsistent with the other policy of setting up at as early a moment as possible a native administration. It cannot be maintained that the policy now being pursued by Sir Percy Cox and Mr. Philby is a continuation of the policy of the Government between November, 1918, and June, 1920. It is a complete revolution. The point is not so much which policy is right, but how it came about that Whitehall spoke, or rather telegraphed and wrote, with two different voices. Does it not lie in the fact that there has been no real Ministerial responsibility, no coherence, and no comprehensive unity in British policy and British administration in the Middle East since the Armistice? Of this I am certain: that there never will be clear responsibility, coherence or continuity until there is a Middle Eastern Minister and a Middle Eastern Department, which will take over from the Middle Eastern Committee of the Cabinet the direction of policy and control of British expenditure and administration in Egypt, Sudan, Palestine, all Arabia, Aden, Mesopotamia and Persia. At present Ministerial responsibility for policy and administration in the Middle East is divided between Lord Curzon, Lord Milner, Mr. Montagu, and Mr. Churchill. This means that no one man is responsible, and we are drifting and twisting while departmental rivalries and departmental vested interests are growing. The only road to peace, retrenchment and reform in the Middle East is unity of command. We must have a Middle Eastern Department under a separate Minister without further delay.

I am, etc.,
W. ORMESBY GORE.

House of Commons,
Armistice Day, 1920.

## BALKAN RUMOURS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—A statement in one of your recent numbers (September 30) moves me to appeal again in your columns for fair play.

Your Athens Correspondent, under date September 11, says: "According to information received from Kirk-Kilissè, the leading Bulgarian citizens of that town, accompanied by a Bulgarian priest, visited the Greek Governor of the region and declared that all the Bulgarian families of Kirk-Kilissè were desirous of reverting to the Greek Orthodox Church."

Kirk-Kilissè is the remotest corner of Eastern Thrace, where the inquisitive eye of the foreigner rarely penetrates. Such a statement for the majority of your readers will undoubtedly portray, as is expected and intended, the pleasant and easy condition of things ruling throughout the territories lately annexed to Greece. Eastern Thrace has been evacuated only lately by the French, and many foreigners have rightly appreciated the conditions ruling there between Greeks and Bulgarians; besides, the country is crossed in all its length by a railway and possesses very large commercial wealth, and is, therefore, frequently under the possibly critical foreigner's eye. The same may be said of Macedonia.

Against the above-cited statement of your Athens Correspondent I will boldly set another one, dated September 28 last:—

"A part of the Bulgarian population, on the advance of the Greeks, escaped into Bulgaria. The greater part, unwilling to sacrifice its possessions and hoping against hope, remained in the country. In Gumurdjina and Dedeagatch districts there are sixty unmixed Bulgarian villages with only one priest. This poor, devoted man performed his duties by travelling secretly by night from village to village. After repeated imprisonments and beatings, he was one day found murdered. The prominent men are repeatedly subjected to imprisonment and beatings, and complaints only bring further punishments; rare is the Bulgarian who has not undergone ill-treatment at the hands of the Greek police. ——, of Xanthi, was beaten so cruelly that the police authorities had to envelop the body in raw sheep skins until he recovered to return home." (The list of the cruelly ill-treated is too long for your columns, and the giving of it will only do further harm to those I would aid.) "Many young men have simply disappeared, leaving no trace behind them. Bands are formed under selected leaders, which travel from village to village to 'baptise,' as the saying goes, Bulgarians into the Greek Patriarchate Church. The ceremonial of the 'baptism' is cruel beating until the extortion of a declaration or signature renouncing the National Church for the Greek. On August 30 last one leader of a band, Anghel Kostov, a renegade sold to the Greeks, called upon all the Bulgarians in Xanthi to present themselves and receive baptism. Only a very few presented themselves. The authorities are careful to avoid extremes in towns where unsympathetic foreigners may be met."

A comparison of the two statements will, I think, give your readers an idea of the real condition of things brought about by the Peace Treaty.

Your readers may not be aware that the numerical strength of the Greeks, as proclaimed from the housetops, is not based upon the number of Greeks proper. The number of such is insignificant. They systematically claim as Greeks all who recognise the Greek Patriarchate Church within the old territories of the Turkish Empire, in which the Greek Patriarch enjoyed great and special privileges—the Caucasian, the Laz of Trebizond, the Caraman of Central Asia Minor. The language of the two last is Turkish; they do not know a word of Greek, but, belonging to no particular nationality capable of organising a

Digitized by Google

State of its own, they are considered by the Greeks as Greeks, because they are subjected to the spiritual rule of the Greek Patriarch of Constantinople. Not so many years ago the Arabs of the Antioch Patriarchate were considered as Greeks. Not many years ago the entire Bulgarian nation was known to the world as Greek, as long as it was subjected to the spiritual jurisdiction of the Greek Patriarch.

Thus, the Bulgarians in the territories lately annexed to Greece are terrorised into receiving baptism into the Greek Patriarchate Church. After such baptism they are proclaimed as "Bulgarophon" Greeks, who have forgotten their original language for the "crude, uncultivated" Bulgarian.

The methods of the Greeks and Serbians as regards the Bulgarians in their new territories are the same; the object to attain for both is the same—denationalisation by terror. An impartial inquiry can only confirm my statement.

Inquiries have been instituted as regards the conduct of the Bulgarians; inquiries have been instituted as regards the conduct of the Greeks and the Serbians; but while the inquiry as regards the Bulgarians was made in the absence of the accused and made capital of against them, those made as regards the Greeks and Serbians were not taken notice of, because of the damaging effect against the interests of allies. Have not the inquiries into the conduct of the Greek troops in their Smyrna campaign and that of the Serbians in Montenegro been suppressed? I have read in your columns of two relief missions being refused admission into Montenegro by the Serbian authorities. What does it mean? Bulgaria, on the other hand, has always demanded, begged for, an impartial inquiry as to all accusations advanced against her.

Principles have been declared; upon principles have the recent Peace Treaties been concluded; all desire a settlement with durable peace, and yet nothing is done to remove the most glaring injustice, to mitigate, at least, the cruel condition of existence to which the Bulgarians are every day subjected under Greek, Serbian, or Roumanian rule. And the Peace Treaties provide for the protection of minorities!—I am, etc.,

P. M. MATTHEEFF.

Sofia, November 2.

[We publish M. Mattheeff's letter because it is obviously written in all good faith, and gives a point of view which is, no doubt, widely held in Bulgaria to-day, as in the past. If the countries of the Balkans are ever to reach a good understanding, they (and their friends) must first make themselves well acquainted with each other's views. If there is any truth in the statements quoted by M. Mattheeff, it is certain that the acts complained of will have been the work of local officials or their irresponsible agents, and in no way represent the policy of the Greek Government. In view of the satisfactory relations existing between the Greek and Bulgarian Governments, due in part to the personality of the Greek representative at Sofia, M. Panourias, we must suppose that the state of affairs described by M. Mattheeff will already have been brought to the notice of the Hellenic Government.—ED.]

## THE GREEKS IN ANATOLIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—With reference to Mr. Mosconas's criticism of that part of my article published in THE NEAR EAST of September 30, and referring to certain results of the Greek occupation of Anatolia, it is a matter for regret that the remarks in question should have been construed to signify an opinion that *any* massacres whatever are a "bagatelle." The statement that I was imbued with neither pro-Turk nor anti-Greek sentiments was neither a condescension nor a confession, but was made simply because in the Near East the possibility of maintaining a non-partisan point of view is seldom taken into consideration.

With regard to massacres, the history of this unhappy corner of the world—from time immemorial to the present day—is largely an awful record of outrage and reprisal, often upon a wholesale scale, the perpetration of which is a stigma peculiar to no one nation in the Balkan Peninsula. It was therefore unwise to believe that any one of these rejuvenated nations was fitted to assume a task which would offer numerous and irresistible temptations; which none of the Great Powers, for various complex reasons, was willing to assume, and which would have taxed the moral and material resources of any one of them. It yet remains to be seen whether Anatolia will prove a source of weakness or of strength to Greece; but it is not too much to say that certain incontestable advantages which have hitherto accrued from the Anatolian adventure have not been reaped by Greece or by Great Britain. To repeat what apparently escaped the notice of my critics: "Every Englishman is convinced that Greece has a great future," but that conviction does not necessarily preclude criticism, both as to the wisdom of involving Greece unnecessarily in what may prove to be a ruinous adventure, and as to the employment of methods which are reprehensible, whether in regard to Armenians, Greeks, Bulgarians, or Turks, and more especially when the British are held to be responsible by a not inconsiderable or unimportant section of the population of the British Empire itself.

Mr. Mosconas is deceiving himself, if he really thinks that the Smyrna affair was merely a matter of "regrettable incidents"—a synonym, by the way, for "bagatelle"—and that it is finally settled. The sequel is even now in process of unfolding, and few dare prophesy how long the bloodshed will continue—the blood shed being that of the unhappy peasantry, Moslem and Christian alike, whose misfortunes are exploited for political purposes. The occupation of certain parts of Anatolia by Hellenic troops is followed by what is known as "clearing up" operations. It is in the course of these operations, as a rule, that the trouble occurs. The proofs for which Mr. Mosconas asks rest in the archives of more than one High Commission in Constantinople, and are no better and no worse than the proofs advanced by the other side in support of the case against the Turks. Practically nothing is heard of the Turkish side, partly because the Greeks have not repeated their mistake at Smyrna, when there were numerous independent witnesses present, and partly because the Turks, deservedly, have a "bad Press." Personally, I have not the slightest intention of lending even my feeble assistance to one side or the other in the political game of exploiting "massacres." For that reason I decline to give details of events that have come to my personal knowledge from first-hand sources. I will confine myself to citing the most recent case of which I am aware, and the facts of which are well authenticated—namely, the events that occurred at Zindan, near Yalova, on August 25, 1920. The result of what then occurred was counter-outrage, followed by reprisals, and the spread of violence throughout the whole district, which before the advent of the Greeks had been as quiet as an English countryside, in spite of the proximity of the Nationalists, who, however, never actually set up their misrule in that particular district.

I am indebted to Mr. Lykiardopoulos for his naïve confirmation of my forecast of the nature of the Greek defence; but it is unfortunate that he is apparently unaware of the fact that, in controversies, personal insults prove nothing but the inconsequence of the person who offers them.—I am, etc.,

YOUR CONSTANTINOPLE CORRESPONDENT.

Constantinople, October 31, 1920.

[This correspondence is now closed.—ED.]

## ALBANIA: A PLEA FOR SETTLEMENT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As friends of both Italy and Albania, we have already expressed our sincere satisfaction at the amicable settlement arrived at between the two countries. The first step towards Balkan peace was made when Italy renounced her claim to Albanian territory. We hope that a similar understanding may now be come to with Yugoslavia and Greece.

On the grounds that Italy was to acquire territory in Albania, Yugoslavia and Greece asked for territorial compensation.

Dr. Trumbitch, Foreign Minister for Yugoslavia, however, declared magnanimously, when Yugoslavia was offered part of neutral Albania by the Supreme Council, that his Government did not wish to profit at Albania's expense; that his Government's attitude had been determined by the fact that Italy had taken Valona; and that his Government would be willing to renounce claims for territorial compensation on Italy's evacuation of that port.

Italy has evacuated Valona and renounced her claim. Nevertheless, Yugoslav forces still occupy a large tract of Albanian land within the frontiers delimited in 1913. We trust that Yugoslavia will now display the same spirit of moderation shown by Italy and withdraw her forces from these regions, and so enable the thousands of destitute refugees from the villages of the occupied districts who are now starving in Scutari, Tirana and Elbasan to return to their homes.

M. Venizelos also has stated in the past, upon more than one occasion, that the situation would be changed if Italy surrendered her claims to Albanian territory. Greek claims were largely a result of Italian claims. With the disappearance of the latter, the former should now vanish, and the Greek forces at present massed on the Albanian frontier should be withdrawn.

The Assembly of the League of Nations is to take place on November 15. We trust that the League of Nations will grant the requst of the Albanian Government for the admission of Albania to full membership of the League.

The secret diplomacy of to-day does not deal mercifully with small nations. It is only by full publicity and the

Digitized by Google

recognition of international justice that a small country like Albania can hope to live, and we earnestly hope that the self-interest of stronger Powers will not be permitted to prevent Albania's admission to the League.

We are, etc.,

## MUSICAL NOTES.

### Hofmann.

Of all things during the present season, the recitals of M. Josef Hofmann will probably be the most unforgettable. For pianoforte playing pure and unalloyed, I have never heard anybody's so lovely as his; but his interpretations also are most wondrously beautiful. There is but one fault one can find, and that is that he does not play enough "big" music; he is too content with trifles, delicious though they be, of Chopin and Liszt; and in his programmes so far there has been too little Beethoven and no Bach at all. But, this omission apart, there is nothing but to acknowledge him as a supreme master. In no comparable way has the exquisite poetry of Schumann's "Carnaval" ever been shown, at any rate recently; before the dreamy loveliness of such playing criticism is in abeyance. Chopin's Scherzo in B minor, again, was both perfect and utterly beautiful. These things he played in his recital at the Queen's Hall on November 8. With Chopin's C sharp minor waltz I was a little disappointed, for he did not bring out its inner melodies as he had done in a previous recital. Scriabin's "Poème" (Op. 32) was played with unusual clarity: the shadows which play across the half-light of this Slav genius were scarcely noticed. After Hofmann had finished his programme, he most generously gave a series of encores, chiefly Chopin and Liszt, and these were even more wonderful than the first items. His finger staccato in some Liszt was literally amazing; I shall never hear anything of its kind so glorious again. Hofmann is an extraordinarily great player. His consummate artistry is never exhibited at the expense of his abilities as a pianist; and in spite of (for it is not often because of) the facility of his technique he is never less than a poet. No more satisfying genius is imaginable, for his playing and its colours are indeed of the stuff from which dreams are made.

Before he returns to America Hofmann is giving another recital at the Queen's Hall on November 23.

### Another Pianist.

Mr. Arthur Rubinstein, who gave a pianoforte recital at the Wigmore Hall on November 11, has a great reputation, but I do not understand quite how it has been made. His name may go for something with one class of people, or race, and his ability and delight in the playing of very modern composers may go for more with another kind of people; but, all the same, he is not a master. As an artist he cannot be ranked high—this was obvious from his very practical, even Protestant, interpretation of César Franck's "Prelude, Chorale, and Fugue"—and at most he can claim to be but a pianist. And even there in Chopin, where such claim should most easily be justified, he showed a technique that was by no means infallible, a lack of variety in tone, and an absence of colour. The "Berceuse" was very unpoetical. With Mlle. Germaine Taillefer, a composer of talent, he played Chabrier's "Trois Valses Romantiques," but they were exceedingly commonplace. Unfortunately I was unable to hear him in pieces of Poulenc, the much-boomed Frenchman; of Prokofieff, the young Russian from whom it seems that popularity is at some distance; and of de Falla, the noisy but cheerful Spaniard. I believe that Mr. Rubinstein does these things very well; he is certainly the kind of player who can more easily adore the new than worship the old.

### Langham Choral Society.

In leaping straight from Coleridge-Taylor's "Hiawatha" to the "Faust" of Berlioz, the Langham Choral Society, which is in but the second year of its existence, invited at once praise and blame. Praise, because by their enterprise they have removed from Southern choirs the dusty halo of safe mediocrity, and because of their excellent choice of "Faust"; and blame, because of the practical certainty that they would not be technically equal to so exacting a work. In their performance of it at the Queen's Hall both these things were merited. The combination of romance, satire, and general *diablerie*, which are the dominant properties of "Faust," was not fully appreciated by the choir (and it was certainly above the heads of the audience); but, the youth of the choir taken into consideration, it was a very satisfactory rendering that Mr. Hugh Marleyn, the conductor, secured.

The orchestral parts were done extremely well. The "Hungarian March," for instance, which, of course, is not proper to the "Faust" legend itself, was played with dazzling, if perhaps illegitimate, effects; and the "Ride to the Abyss" was gloriously spirited in its Dæmonic exaltation. Mr. Marleyn is an extraordinarily alert and enthusiastic conductor, but not even his fine efforts could at all times infuse into the choir the spirit of the thing. The drinking students' song, for example, sounded as if from throats "gone dry"; and the grotesqueness of the "Amen" fugue was entirely missed. Of the soloists Miss Bessie Jones, as Margaret was never less than satisfying; Mr. Tom Kinniburgh as Brander need not have been quite so indistinct; Mr. Ellisdon has an excellent Mephistophelian voice, but his training is as yet incomplete—the hard impact of his consonants in juxtaposition and the falsity of his vowels are evidence of this; and Mr. Arthur Jordon as Faust failed to realise the pyschological stages of the character he was portraying. Though his diction is a rare joy, his lack of variety in tone-colour makes of him a sadly monotonous singer. But it is far easier to point out deficiencies than to dwell on the excellences of this performance. If this society has the enthusiasm and patience necessary for the tackling of Berlioz it has also a future. Already it has helped to remove the reproach of sterility which is the possession of most Southern choirs; already it has shown anew that in choral singing, perhaps more than in anything else, freshness and determination are the main factors in achievement. It deserves, therefore, to be very heartily congratulated.

Andante.

## PALESTINE WAR MEMORIAL.

On Mount Scopus, outside Jerusalem, a war memorial, the model of which was recently exhibited in the Royal Academy, is now being erected. It is being built of granite obtained on the spot, and the total cost will be £20.000. There is to be a rest hall inside the memorial, and it will be lined with brass tablets inscribed with the names of the fallen and missing. The memorial is not symbolic of any creed, in view of the fact that Christians, Jews, Mohammedans, Sikhs, and most other religious denominations were represented in the Palestine campaign. Field-Marshal Viscount Allenby is anxious that the whole amount necessary to pay for the memorial should be subscribed before the end of the year. The members of the Egyptian Expeditionary Force raised £12.000 towards the cost, and the Nizam of Hyderabad has sent a donation of £3.000 "as a token of the esteem in which he holds the prestige of the British arms in the field."

Lord Allenby concludes a letter in which he sets out the facts given above as follows:—"Owing to the increased cost of labour and material during the past two years, it is necessary to increase the fund to £20.000. I appeal to the British public generally; to all those who served under me during the Palestine Campaign, and to the relatives of the fallen, to do their utmost to obtain that amount in order that the monument, when completed, may be worthy of those, irrespective of creed and nationality, who made the supreme sacrifice. Donations will be gratefully acknowledged on my behalf by Messrs. Coates and Co., 21a, Old Change, London, E.C.4."

# NEAR EAST BOOKSHELF.

I.—"THE REBUKE OF ISLAM." By W. H. T. Gairdner. (London: United Council for Missionary Education. 3s. net.)

II.—"THE GOLDEN APPLE." By Kathlyn Rhodes. (London: Hutchinson and Co. 8s. 6d. net.)

## I.—THE REBUKE OF ISLAM.

Some ten years ago the author wrote a first edition of this book entitled "The Reproach of Islam," but he found when too late "that an undesigned double entendre lurked in the original title." What he meant was that "Islam was a perpetual reminder to Christendom of the latter's failure truly to represent her Lord," and so now in the fifth edition he has chosen this new title, which avoids all ambiguity.

Mr. Gairdner has spent many years as a missionary in Cairo, and has a thorough knowledge, from both study and practical experience, of the subject he discusses. Even those who most disagree with him cannot accuse him of ignorance, and most will acknowledge that he endeavours to be just. Again and again he points out those weak points in Christianity—past and present—to which Islam is a standing "rebuke." In the first two-thirds of the book the author describes the marvellous spread of Islam and its elements of strength; whence it came; how it came and how it works. The whole subject is very clearly treated, with moderation and restraint. Very specially does he emphasise that it was the failure of Christianity in the seventh century which was largely responsible for the success of Islam. "The pages of the Koran itself bear silent testimony to the shameful fact that the only way by which the 'Christianity' of that time and place reached the Arabian prophet was through the false 'gospels' and other literature of some heretical sects, which denied the divine Sonship and the redeeming death of Christ, and through the religious romances of the Church which ignored both." Different circumstances might have made Mahommed a fiery reformer *inside* the Christian Church.

The success of the first leaders of Islam was marvellous, and must have been a convincing argument to many who hesitated at first to recognise its divine origin. "In only eleven years after the prophet's death the Moslems had utterly vanquished the two great Empires of the seventh-century world." Thence they rolled Westward, absorbed all North Africa and overflowed almost all Spain. Eastward they overthrew the great Christian cities of Balkh, Bokhara and Samarkand, and within the century reached the outskirts of China itself. "Arabia was converted into one huge depôt for breeding and training soldiers: for the unlimited supply of female slaves (captured in war) swelling the enormous harems of these Moslem lords led to such increments of population that the prodigious wastage of life in the campaigns was easily met, and more than met. And so an apparently unending flood of soldier-Arabs rolled, wave after wave, from the breeding ground and training camp of the peninsula to share in the treasures of the conquered countries and find new homes in lands unimaginably richer than their own."

When the first ebullition of energy of the Arabs had expended itself, the Turks, in the eleventh century, and the Mongols in the fourteenth, successively carried it on. The former brought Islam to India, the latter, after almost overwhelming Islam at the time of Jenghiz Khan, became in time its most fanatical supporters and greatly extended its Empire. During the last hundred years, Islam has rapidly spread itself all over Africa, partly by war, but as much at least by slave traders, merchants and trained propagandists. "Every Moslem is proud of Islam, loves Islam in his own fashion and therefore *stands for* Islam wherever he goes." Far otherwise is it with every Christian!

The literature of Islam is enormous, as is necessary to a system which should cover the whole of life. The mystical side of the religion is here treated more fully than in previous editions. In the chapter on "How it Works," Mr. Gairdner lays stress upon the weakest point of Islam—its unadaptability to changing and progressive thought, and this very specially with respect to women. The Moslem treatment of women, which in the days of their aggression may have been a source of strength, is now in a world of higher ethical ideals a distinct weakness. The history of missions to Moslems, with the exception of some sporadic efforts in the Middle Ages, is a comparatively recent one. It is the "impossible-possible problem," and how it is to be tackled is the problem which is treated with glowing enthusiasm and faith in the latter part of the book.

## II.—EIGHT AND SIXPENCE COLOURED.

Stevenson, in his famous essay, "Penny Plain and Twopence Coloured," tells us that he could never understand the child who would deliberately forego the pleasure of illuminating his own pasteboard figures and scenery and "stoop to twopence coloured." All the world, however, is not gifted with that power of imagination that can of itself give wonderful colours to the plainest things. Nor has it the insight to realise, with regard to that great branch of literature which we call fiction, that there is more actual pleasure and amusement to be had out of a quiet, faithful rendering of human life and its emotions—which, like real life, the reader must in a measure translate to himself by the light of his own outlook and experiences—than out of an imitation clothed in the gaudy trappings of sensationalism. A great many will decide at once for the cheerful attraction of the garish colours, and so we are told on the cover of "The Golden Apple" that over a million copies of Miss Kathlyn Rhodes's novels have been sold.

To begin with, we seem to have received our money's worth in good bright splashes of paint. There are two women who play an important part in the story. One is Lady Lucia Holland, a widow who has only just escaped being divorced by her husband's sudden death. She wears ermine wraps and looks like Helen of Troy. (In the end, when she is murdered in the desert for her pearls, her last thought is "Now I shall never be old.") The other is Valerie Rivers, a young girl who is, we are told, exactly like a modern version of Atalanta. It will be seen how neatly the golden apple can be introduced in both cases. Lady Lucia is in love with the young Englishman, who is "good-looking in a bold, masculine kind of way—good features, well built." He is in love with Valerie, who is very nearly trapped into marrying an Italian count who has debts, smokes thin black cigars, and glides about in a car driven by "a slim, reckless-looking Neapolitan." All these gaily painted puppets are presented to us against the background of Cairo and its surroundings, and there are plenty of descriptions, such as "The sky was one vast jewelled dome, and amid the splendour of the heavens the moon hung like a magnificent silver lamp suspended from a chain of stars."

If we are to take the term "novel" at its very lowest valuation—that is, something which, together with a cigarette or a box of chocolates, is considered as an adjunct to a garden chair in the shade or an armchair by the fireside—we might think that in this kind of material could be found justification for the sale of the million copies, as readers might here find something to carry them away for a time from the often uneventful life of every day. But, having read the story, we are forced to the conclusion that there must be greater talent, knowledge, and true understanding than this author possesses to make even a tale of such admittedly unreal people worth while. There is no sense in repeating that Lady Lucia was the most beautiful and fascinating woman of her generation if, even with the greatest desire to do so, we cannot believe it for a moment, and a dark Italian villain to be really amusing must be a little more vital than real life. It is also difficult to think of Count Paolo as anything but a figure cut out of stiff paper. As for the stupidity of the hero and heroine, and the way in which they deliver themselves respectively into the clutches of the villainess and villain, we defy the most good-natured reader to bear with them patiently. We are not in a position to tell whether this is really a fair example of Miss Rhodes's work, and cannot judge whether it is likely to add many more thousands to her total "sale."

## BOOKS RECEIVED.

"A Consulting Surgeon in the Near East." By A. H. Tubby, C.B., C.M.G., M.S., etc. (London: Christophers. 15s. net.)

# PERSONAL AND GENERAL

**TO-DAY.**

November 18 (New Style).
November 5 (Old Style).
Rabia I., 7, 1339 A.H. of the Moslem calendar.
Kislev 7, 5681, of the Jewish calendar.

General Gouraud has arrived in France.

Prince Nicolas of Roumania arrived in London last week from Eton.

Viscount Chetwynd left last week for India in the steamship Mashobra.

Viscountess Ridley, with her son, Viscount Ridley, is leaving shortly for India.

Sir Charles and Lady Bedford have left for India, and intend to return to London in March or April.

Mrs. Alec Tweedie, the authoress and painter, is expected in Cairo in the middle of November.

During the absence in England on sick leave of Mr. Ronald Storrs, Captain Law is acting for him in Jerusalem.

Lieut.-Colonel Capitaneano, Roumanian Military Attaché to the Legation, has arrived in town and taken up his duties.

The Jam Sahib of Nawanagar and Sir William Meyer left last week for the Assembly of the League of Nations at Geneva.

The Raja and Ranee of Pudukota have arrived in London, and are staying at 7, Park Lane, for several weeks. (Telephone, Mayfair 2758.)

Sir Horace Rumbold arrived at Trieste last week on his way to Constantinople, where he will take up his duties as British High Commissioner.

Sir John, Lady, and Miss Norton-Griffiths have come up to No. 3, Buckingham Gate, for the winter. (Telephone number: Victoria 5861. Flat O.)

At the School of Oriental Studies Professor T. W. Arnold is delivering on Tuesdays a series of lectures upon "The Fundamental Principles of Islam."

Lieutenant-Colonel Claude Rome, 2nd Dragoon Guards ("Queen's Bays"), and the Hon. Mrs. Claude Rome have left for Egypt on their way to India.

Captain the Hon. J. M. Balfour will act as Deputy Financial Adviser to the Persian Government during the absence of Mr. Sydney Armitage-Smith in London.

Sir Murdoch Macdonald, Adviser in the Ministry of Public Works, and Brig.-Gen. Sir Gilbert Clayton, Adviser to the Ministry of Interior, have arrived in Egypt.

The marriage of Miss Zervudachi, daughter of M. Emmanuel Zervudachi, and of Major Sophocles Venizelos, son of the Greek Premier, will take place in a few months' time.

General Sir Charles Harington, the new President of the Inter-Allied Committee of Control of the Turkish Army and Commander-in-Chief of the Allied Forces, arrived in Constantinople on November 8.

To-day, at 4.30 p.m., Major F. M. Bailey, C.I.E., will, under the auspices of the Central Asian Society, give a lecture on "Turkestan Under the Bolsheviks." The meeting-place is at 74, Grosvenor Street, W.1.

The Greek Minister, M. Caclamanos, left London last week for Geneva, where, as a member of the Greek Delegation, he will attend the general assembly of the League of Nations. He will be absent from London for some weeks.

The annual sale of Serbian rugs and embroideries and other articles, suitable for Christmas presents, organised by the staff of the Serbian Relief Fund, was opened by the Duchess of Somerset at 5, Cromwell Road, on November 16.

Mr. P. J. Hartog, late Academic Registrar of the University of London, left for India last week to take up his appointment as the first Vice-Chancellor of Dacca University. Mrs. Hartog and their two young children follow in a week's time.

Temporary Major A. J. Hughes, Royal Engineers, has been appointed an Additional Companion of the Indian Empire Order in recognition of meritorious service in Mesopotamia under the command of the late Lieutenant-General Sir Stanley Maude.

Mr. and Mrs. Dhunjibhoy Bomanji, of Bombay and Windsor, who are returning to India shortly, were presented to the Queen on November 12, and her Majesty thanked them for their generosity and interest in the ex-Service men of Windsor.

The marriage of Edwin Herbert Samuel, eldest son of the Right Hon. Sir Herbert Samuel, G.B.E., High Commissioner for Palestine, and Lady Samuel, with Hadassa, elder daughter of Mr. and Mrs. J. Grasovsky, of Jaffa, will take place at Jerusalem on December 6.

The marriage of Kenneth J. Nicolson, M.C., son of Mr. and Mrs. W. P. Nicolson, Kilmacolm, Renfrewshire, N.B., with Mignon, daughter of the late Allen Shuttleworth, A.M., Indian Navy and Imperial Forest Service, Bombay, and of Mrs. Shuttleworth, Church Crookham, Hants, is arranged to take place in Bombay on November 24.

A marriage has been arranged, and will shortly take place, between Major George Cave Slacke, I.A., Burma Commission, only remaining son of Mr. F. A. Slacke, C.S.I., and Mrs. Slacke, of 25, Boyne Park, Tunbridge Wells, and nephew of Viscount Cave, and Margaret Lilian, eldest daughter of the late Rev. Sydney S. Scott, Government Chaplain, India.

Among the passengers by the Peninsular and Oriental Company's steamship Morea, which left London last week for Egypt, India, and Australia, are the Bishop of North-West Australia, Sir Robert and Miss Highet, and Lady Schuster. Sir F. and Lady Young and Brigadier-General G. R. Cassel are joining the ship at Marseilles, and Lord Loughborough will embark at Bombay for Sydney.

## APPOINTMENTS, ETC.

Mr. Ernest John Heinz has been appointed Persian Consul at Cardiff.

The *Temps* understands that M. De France has been promoted to the dignity of Ambassador, while keeping his position as High Commissioner in Constantinople.

## OBITUARY.

Prince Choua es Saltaneh, uncle of the Shah of Persia, died last week in Teheran.

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:—*

BATOUM. PERSIA. EGYPT. ANGLO-PERSIAN OIL COMPANY. INDIA: Government Contracts (Fair Wages Clause).—Pre-War Army Pensions.—Arms Act (Rules).—Auxiliary Force Bill (Voluntary Enrolments).—Royal Artillery Officers (Ordnance Department Pay).—Bengal Civil Fund Annuitants. ITALY AND ALBANIA. LEAGUE OF NATIONS: Albania. S.S. "ANCONA." (November 8).

PERSIA: British Advisers.—Anglo-Persian Agreement. MESOPOTAMIA: Rolls Royce Chassis.—Operations. (Cost). INDIA: Machine Gun Corps.—Troops (Repatriation). BRITISH PRISONERS, BAKU. BATOUM. (November 9).

INDIA: Dyer Fund.—Officers' Pensions.—Sedition Sentences (Remission).—Civil Service.—Army Chaplains (Pay).—Army Reorganisation.—Tea.—Extra Territorial Army Service. MESOPOTAMIA: Local Levies. EGYPT: Milner Mission.—Sudan.—Foreign Rights. ALBANIA. MONTENEGRO. PALESTINE AND SYRIA. INDIA: Civil Service (Leave). MESOPOTAMIA (Executions). (November 10).

NICÆA (MASSACRE). LEAGUE OF NATIONS: China and Hedjaz. PERSIA (BRITISH FORCES). MESOPOTAMIA: Supplementary Estimate. SERBIA. INDIA: Army Pensions (Lieutenant-Colonels).—Officer Prisoners, Kut (Field Allowance). CILICIA. (November 11).

Professor G. Elliot Smith, F.R.S., will delivery a lecture on "The Royal Mummies," on behalf of the Egypt Exploration Society, in the lecture room of the Royal Society, Burlington House, on Thursday, November 25, at 8.30 p.m. Tickets will be sent gratis (if a stamp is enclosed to cover postage) on application to the Secretary, Egypt Exploration Society, 13, Tavistock Square, W.C.1.

## NEWS IN BRIEF.

Twenty yearly scholarships have been established for Dalmatian students in Padua University.

H.M.S. Centurion has arrived at Constantinople from Batoum with the Baku prisoners.

By eighty-three votes to two the Archbishop of Belgrade was elected Patriarch of Serbia at Belgrade Cathedral on Friday.

A Press campaign has been started in Jerusalem against the proposed removal of the railway bridge across the Suez Canal.

Latest newspapers received from Busreh state that the biggest fire in the history of the neighbourhood occurred on October 7 at Ashar.

Tourists are now allowed to travel overland from Algeria to Morocco. General Lyautey officially welcomed the first party to reach Marrakesh from Algeria.

Sir Herbert Samuel formally opened the new post office at Jaffa on October 21, and despatched the first telegram from there at 11.47, it being received at Government House at 11.50.

The Egyptian Supplies Department has given permission for the exportation of 20 tons of beans and 20 tons of lentils to the Hejaz per month, in return for which sheep and butter to an equal value will be exported from that country.

Sir Auckland Geddes has bestowed the Grand Cross of the Order of the British Empire (G.B.E.) upon Mr. Morgenthau, the former American Ambassador to Turkey, in recognition of his services to British civilian and military prisoners during the war.

In accordance with the Allied request to President Wilson to fix the Armenian boundaries, the final report of the Special Commission appointed by the American State Department to study the Armenian demarcation question will shortly be presented to the President.

Dr. Harold Stiven, the Principal Medical Officer of the Egyptian Government Hospital, Port Said, who has been on leave in Great Britain, is sailing with Mrs. and Miss Stiven on the s.s. Caledonia from Marseilles on November 21 to resume his duties.

"It is stated," says the *Egyptian Gazette* of October 25, "that four Egyptians of the party opposed to the Anglo-Egyptian Agreement have left for Europe this week, with a view to starting propaganda there against the Egyptian Delegation's policy. They will proceed to London."

On November 26, at 5 p.m., the annual general meeting of the Anglo-Hellenic League will be held at King's College, Strand. The chair will be taken by the Hon. W. Pember Reeves, and an address will be delivered by his Excellency Monsieur J. Gennadius, G.C.V.O., the President of the League.

The Palestine Advisory Council has passed a resolution urging that the northern frontiers of Palestine should comprise the lower portion of the River Litany and all territories in the Jordan and Yarmuk valleys and all their rivers, and requesting the High Commissioner to take the necessary steps.

An official telegram from India says that at a Wana Waziri *jirga* held on October 20 efforts were made to arrange mutual support between recalcitrant Mahsuds and Wana Waziris to resist the British advance on Wana and the road contract scheme. On October 25 a gang of 150 Waziris left Wana for Derajat.

The battleship Conqueror is ordered to leave Portland on or about November 30 for a voyage to the Mediterranean with relief crews. Captain C. M. Staveley, C.M.G., late of the High Commissioner's Staff at Constantinople, will join the ship on November 23 to command her on this trooping voyage, and also to act as Senior Officer of the Portland Reserve while at that port.

Bulgaria has, through her Prime Minister, M. Stambolisky, applied for admission to the League of Nations. The application points out that the Bulgarian people were not responsible for King Ferdinand's actions, and that they broke with him as soon as possible: and it adds that Bulgaria has now a Government which has given proofs of its desire to work for world-peace.

In accordance with the Note sent to the German Government by the Reparations Commission demanding that the Government should state the extent to which Germany can fulfil the claims of France, Belgium, Italy, and Serbia in the matter of cattle, horses, and sheep, the German Government instructed an expert committee to attend the sitting of the Commission in Paris on November 15.

Having considered the suggestion that the Malta Dockyard and naval establishments should be used by a private firm for building and repairing merchantmen, and also the proposal that the Admiralty should extend its operations to Malta so as to include the construction and repair of merchant vessels, the Admiralty has come to the conclusion that it is impossible to contemplate either of these undertakings.

Dr. Comanos Pasha, president of the League of the Holy Sepulchre in Cairo, has cabled to the High Commissioner in Palestine protesting against the usurpation of the Shrine "Our Father" by the Latins, and relying on the assurance of the Commissioner for the maintenance of Greek rights and privileges. He has expressed his confidence in the impartial intervention of Sir H. Samuel to avert any unlawful act. The High Commissioner replied assuring him that the question was having his careful consideration.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON, TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

## THE TREATY OF RAPALLO.

Italy and Yugoslavia have composed their differences by formal agreement, and the world is freed from one more anxiety. By the Treaty of Rapallo, signed at Santa Margherita de Ligure on November 12, the two countries record their mutual desire to establish between themselves a *régime* of sincere friendship and of cordial relationship for the good of the two peoples. The long-drawn controversy over Fiume and the Adriatic question is thus laid to rest, provided always that d'Annunzio can be brought into line with the official policy of the Italian Government. His latest exploits imply that this point cannot yet be taken for granted. Certainly the Italians have no reason to find fault with the compromise. They obtain, with few modifications, the Istrian frontier line accorded to them by the Treaty of London, and have had to abandon little more than their shadowy claims to Dalmatia. Fiume, the chief bone of contention, is recognised by both parties as an independent State; but in the abbreviated texts of the Treaty that have reached this country it is not specified whether any understanding has been reached as to the form of the administration, or whether the independence of Fiume State is to be guaranteed by other Powers than Italy and Yugoslavia. As Fiume territory will march with Yugoslavia, it is to be extended by a narrow strip of the coast as far as Mattuglie, six miles to the north-west, to enable the independent State to be contiguous with Italy. Of the Quarnero islands Cherso, Lussin, Lagosta and Pelagosa go to Italy, as does also Zara, the one Italian town in Dalmatia, with the suburbs of Eritto and Boccagnasso. Within two months after the Treaty comes into force a conference composed of experts belonging to both countries is to be convened for the purpose of submitting as early as possible definite proposals for the establishment of cordial relations between the two peoples, especially in regard to financial and economic affairs. A further convention will be summoned with the object of developing intellectual relations between the two countries.

It is in the clauses referring to their future relations that Yugoslavia and Italy will find the advantage of an agreement reached by friendly negotiation over any award by arbitration. The latter, indeed, would have led to an earlier settlement and might have avoided the d'Annunzio complication, but it would almost inevitably have left the two Governments estranged. One result of the protracted controversy has been that both nations have had occasion to realise that they stand to gain more by a settlement of their disputes and the establishment of good relations than by insistence upon the strict letter of their original claims. As the Yugoslav Government has had to make the greater sacrifice, it is entitled to the greater credit for the satisfactory issue, and both from his own countrymen and from the Italian side we shall hope to find that the signal services rendered to the cause of peace by Dr. Trumbitch, the Yugoslav Minister for Foreign Affairs, have gained the recognition they deserve. In spite of Ministerial crises and Cabinet changes, Dr. Trumbitch has been left undisturbed as Yugoslavia's plenipotentiary for the negotiations with Italy; and his sound good sense, his breadth of view, and his conciliatory methods have at last won the day, with the support accorded him by his Prime Minister, M. Vesnitch. In view of the extent to which passions have been roused on either side, it has required courage on the part of the Yugoslav Government to affix their signatures to the Treaty of Rapallo, but in this action we find a most hopeful augury for the future both of Yugoslavia and of the whole of the Balkans. As the agreement falls short of Yugoslav expectations, it will have to be justified by the assurance that the advantages to be gained from it outweigh the sacrifices that it has entailed. In other words, the Yugoslav Government must boldly proclaim the doctrine that friendly relations with neighbouring States and opportunities for economic development are of far greater value to Yugoslavia, as well as to most countries at this juncture, than hard-and-fast ethnical frontiers. Both Italy and the Kingdom of the Serbs, Croats, and Slovenes have good reason to emphasise this fact to-day. In the case of the latter we may hope that the removal of the war menace which has kept the Army so long mobilised on a footing out of all proportion to peace requirements will be followed by a marked increase of production and a general transference of national thought and activity from home and foreign politics to the more urgent problem of domestic reconstruction.

The statesmanship shown by the Belgrade Government in coming to an agreement with Italy will give rise in many quarters to the hope that other outstanding questions in which Yugoslavia is interested will be settled in an equally broad-minded spirit. There was no occasion for any mention of Montenegro and Albania in the Treaty of Rapallo, as Italy, although personally interested in both countries, could not arrogate to herself the functions of the Entente Powers or of the League of Nations. But it will be strange if the Italian Government on the strength of the ties of kinship between its own Royal House and the Montenegrin Court does not take advantage of the close relations now subsisting between Rome and Belgrade to recommend a satisfactory solution of a difficult and delicate problem. The anomalous position in Montenegro is recognised both by the Yugoslav Cabinet and by the Entente Powers. Even the British Government have announced that they are "taking steps to secure that they are placed in possession of independent and reliable evidence as to the conduct of the (pending) elections," and they add: "The future attitude of His Majesty's Government towards the question will depend upon the result of the elections, and on whether they are satisfied that those results duly represent the wishes of the majority of the Montenegrin people." In face of such a statement it would be impossible for the Yugoslav Government to take up the attitude that the affairs of Montenegro are solely the concern of the Kingdom of the Serbs, Croats and Slovenes. There is no desire to suggest any settlement that would tend to weaken the Triune Kingdom: indeed, the sole object of many of those who are pressing for an equitable solution is to safeguard the Kingdom against internal disruptive forces in the future. If three days' negotiations could settle the Italo-Yugoslav controversy, a three-hours' conference would surely evolve a settlement of the Montenegrin question. It is equally desirable that there should be no further delay in deciding upon the frontiers of Albania, which are at present a matter of dispute between the Albanians and the Serbians in the north and with the Greeks in the south. So long as Italy and Yugoslavia were at loggerheads there was some excuse for paying little attention to minor points of controversy; now that the two countries are reconciled and have come to an agreement with one another, the liquidation of all outstanding questions becomes a matter of urgency in the interests of each individual State and of the Balkans as a whole.

# THE BRITISH IN MESOPOTAMIA

## AN ARAB VIEW.

"What you are doing in Mesopotamia shows the bankruptcy of British policy in Asia. No one regrets it more than I do. You English have little idea how the Arabs to-day regard you."

The speaker was an old acquaintance, a native of Baghdad, whom I had originally met in the Victoria Hotel at Damascus in 1912. We had had many talks then about Turkish misrule and the future of the Arab peoples, for besides being a Manchester goods merchant, Abbas, as I will call him (that is not his real name) was an ardent patriot. During the war I had run up against him both in Palestine and Mesopotamia. He was engaged in important liaison work between us and the Arabs. A philo-Arab myself, as were nearly all the British officers who came into contact with that fascinating people, I was glad to see him again like this in London, and at once haled him off to my club, where it was over the luncheon table that he made the remark quoted.

"Don't you think," I said, "that the Arabs are suffering from the general world unrest rather than from any specific grievances?"

He shook his head. "Look at me," he replied. "You know how I was heart and soul with you during the war. You know how enthusiastically I supported the Arab Government at Damascus. For my connection with that government I am to-day under sentence of death from a French court-martial. If I returned to Syria the French could put me up against the nearest wall. You smile. I don't mean to give them the opportunity. But you cannot deny I have a specific grievance. And there are many hundreds in the same case as I am."

"After all," I urged, "you should not make us responsible for what has happened in Syria."

"The Arabs do, however," said Abbas. "And, besides, you have behaved in much the same way in Mesopotamia. It was enough for any Baghdadi to be a supporter of the Ameer Abdullah, the son of the man with whom you negotiated about Mesopotamia in 1915, for him to be regarded as a suspect by your officials. You know what that means: you are a marked man; at any moment you may be arrested and deported to Bombay. There was quite a colony of us there. And your friends are frightened to associate with you lest they share the same fate."

"Don't you think things will settle down now that Sir Percy Cox is in Baghdad?"

"It is possible the country will become quiet for a time. But that will be due, not to Sir Percy Cox, but to the 100,000 men you have there."

"Mind you," he added, "I believe Sir Percy Cox is sincere in his desire to set up an Arab Government; but I do not believe that he or any other Englishman can do it—especially now that the Arabs no longer trust you. I do not believe that he or any other Englishman realises the intensity of Arab feelings on the matter."

No one could have mistaken the strength of Abbas's sentiments as he puffed at his Egyptian cigarette.

"You have followed our case. You know how we were working for our independence before the war, how our ablest men were risking their lives and fortunes in the cause. You know how, in 1915, the British Government promised to the Shereef of Mecca, the natural leader of the Arab peoples, that our independence would be the reward of successful co-operation. We came in and played our part in the common victory. And what is the result? Instead of our being free and united, some are under British rule in Palestine (there was no talk of a home for the Jews in 1915 when you were hard pressed and wanted our co-operation), others are under the French in Syria, and the rest under British rule in Mesopotamia. We are actually worse off as a race to-day than when we were under the Turks. Then we were at least united; we returned Arab members to the Ottoman Chamber; even the Turkish garrisons were mainly Arab troops and were under Arab officers. The Turks in all had perhaps 30,000 men in all the Arab countries. You and the French to-day have the best part of a quarter of a million. It sounds grotesque, and we laugh at it here, over this table. But what does it mean? Simply that you can only make good, and keep your hold over us, by force. If we object, you, or the French, condemn us to death. If we go on objecting, you call us rebels and bomb our villages. The French use 80,000 men to eject Faisal, whom we elected as the head of our government, from Damascus. You refuse to take any notice of the only demand we Mesopotamians have made for a member of the Shereefian family in Mesopotamia.

"How can you expect us to have confidence in your professions about setting up an Arab State in Mesopotamia? We understand that you would like a stucco building, with an Arab Council of State, which would make us believe we had a native government, and so keep us quiet while your officials ran the country. But when you were serious with us, when you wanted our help in war, you asked King Hussein. Why don't you ask him to-day? Supposing there is a question of a new Russian Government. Do you ask an Englishman or a Frenchman to go to Russia and set it up? If a Russian cannot do it, it cannot be done at all. The case is exactly the same in Mesopotamia. If King Hussein cannot establish an Arab State, certainly no Englishman can.

"I am talking to you as an English friend. I try to explain your policy to my compatriots, because I have all my life worked for an understanding between the Arabs and the British. You could have helped us enormously. And you must not forget that we form the central *bloc* of Islam, and the Shereefian family themselves are the hereditary rulers of Mecca, where every good Mohammedan goes once in his life. As friends we should have been the guardians of the peace of Asia. As enemies there is no limit to the harm we may not do each other."

MID-EAST.

## THE ROYAL VISIT TO INDIA.

The Duke of Connaught on the occasion of his forthcoming visit to India, in place of the Prince of Wales, will embark at Marseilles on December 18 in H.M.S. Malava (Captain H. T. Buller, R.N.). The following is the programme, in outline, of the visit:—Port Said, December 23; Aden, January 1; Madras, January 10 to 15; Nagpur and Central Provinces, January 18 to 27; Calcutta, January 28 to February 3; Agra, February 5 to 7; Delhi, February 7 to 15; Rawal Pindi, February 16 to 18; Bombay, February 21 to 28. The inauguration of the Chamber of Princes, and of the Council of State and Imperial Legislative Assembly, will take place respectively at Delhi on February 8 and 9. The Duke of Connaught will re-embark at Bombay on February 28, and, returning by the same route, will disembark at Marseilles on March 16. The following staff appointments have been made by his Royal Highness on the occasion of the visit:—Chief of the Staff, the Earl of Cromer; Chief Secretary, J. L. Maffey, Esq. (Indian Civil Service); Military Secretary, Brigadier-General R. B. Worgan; Comptroller of the Household to His Royal Highness, Lieut.-Colonel Sir Malcolm Murray; Physician to His Royal Highness, Colonel Sir E. Worthington; extra Equerries-in-Waiting, Captain Dudley North, R.N., and Captain the Hon. F. Needham (Grenadier Guards); A.D.C.'s, Major C. O. Harvey (38th King George's Own Central India Horse) and Captain F. S. Poynder (9th Gurkhas); Police Officer, Mr. D. Petrie (Indian Police).

## A CENTRAL ASIAN FEDERATION.

An interesting discussion took place at the meeting of the Central Asian Society at 74, Grosvenor Street, W., on November 10, the occasion being a lecture by Sirdar Ikbal Ali Shah. The lecturer proposed a union of the khanates of Central Asia with Afghanistan; this, he said, would make a barrier preventing the passing of Bolshevism into India. He objected strongly to a recent remark of Lord Curzon that Afghanistan had something like independence. Afghanistan, he said, had complete independence. The present attitude of the Afghans was friendly towards this country, and nothing should be done to estrange them. Another matter to which he alluded was the Khyber Pass; it was a pity, he said, this was open only two days a week.

Sir Edmond Barrow (who presided) said the reason the Khyber Pass was not open throughout the week was because there were only a certain number of people to guard it; these would soon be worn out if they were on duty every day.

Colonel C. E. Yate, M.P., said that if an alliance could be formed between Afghanistan, Persia and Bokhara, it would result in stability throughout Central Asia, but his experience of those three races was that it was very difficult to make them combine. There was no love lost between them. We all wished to see an independent Afghanistan, but that independence rested largely on what the British Government had done in guaranteeing the country against foreign interference.

Colonel Pemberton said he was in Central Asia thirty-eight years ago, and no one then could have dreamed that the present state of affairs in that part of the world would arise. It would depend on the people and ruler of Afghanistan as to how far we could co-operate in the good government of that country. The Khyber Pass would be opened at once if the Afghan Government could curb the violence of the local tribes, and railways could span Afghanistan from end to end if that Government would give assistance and encouragement instead of exercising a veto.

Col. A. C. Yate, the hon. secretary of the C.S.A., writes:—

"On Thursday last the Central Asian Society bade farewell and God-speed to a subject of the Afghan Monarchy, who, during the last three years, had certainly left his mark both on periodical and journalistic literature in this country and also on the minds of those experts in Middle Eastern affairs with whom he has been brought into contact. We see leaving us now to return to Kabul a young Afghan student who has spent four or five years at the University of Edinburgh, and whose knowledge of the English language has attained a standard unprecedented, as far as I know, for a man of his nationality, and coupled with this linguistic achievement we note that he has acquired a very enlightened and broad-minded view of the part that his native land is to play in the sphere of Middle Eastern politics of the future.

"It is not without a smile that we see the first Afghan who ever lectured in English, or perhaps any other language, to a British audience, challenge a statement made a bare month ago by the British statesman who is at once the Secretary of State for Foreign Affairs and the Hon. President of the Society before which the remark was made. It is on record (in *The Times*, it seems, but I have not time to verify it) that on the occasion of the Central Asian Society's dinner on October 12 last, the chairman, in the great speech of the evening, referred to Afghanistan as having or claiming 'something of independence.' It was to that 'something' that Sirdar Ikbal Ali Shah took exception, asserting that Afghanistan had been independent, at any rate, ever since the great Ameer Abdurrahman Khan came in 1880 to the throne of Kabul.

"When some three years ago I took up the *Edinburgh Review*, and read in it a very well-written article by an Afghan named Ikbal Ali Shah, setting clearly before the British public the firm attitude adopted by the Amir Habibullah Khan at the time when Turkey entered the war on the side of the Central Powers—an attitude which kept Afghanistan quiet, as long as Habibullah lived—I wrote to Mr. Harold Cox and asked to be placed in communication with the writer. The result has been that Sirdar Ikbal Ali Shah has twice, as a member of the Central Asian Society, expounded to that Society his views on the political position of his native land, and now, in leaving England, leaves behind him with the C.A.S., and in a measure with the British public, a memory which will be recalled with appreciation and pleasure. In the discussion which followed his lecture on the 11th—a discussion in which Sir Edmund Barrow, Sir Mortimer Durand, Colonel C. E. Yate, Colonel E. St. C. Pemberton and others took part, and a notable discussion it was—I, for my part, confined myself to a few remarks on the position which Sirdar Ikbal Ali Shah had even for himself in the last two or three years as the pioneer and champion of Afghan nationality and independence in this country. I should have added then what I will add now, that, when the arrival of an Afghan Legation in London proves indisputably the independence of that Monarchy, I shall expect to see it accompanied by Sirdar Ikbal Ali Shah as one of its secretaries; and, if then the present Government is still in power, as seems by no means improbable, it will fall to the lot of the statesman who recently was inspired to extend to Afghanistan only a qualified independence to receive the Envoy of Afghanistan as the representative of a genuinely independent Power.

"I may add, in conclusion, that the ideal which has been for some time looming before Sirdar Ikbal Ali Shah's mind is a federation of Afghanistan, Persia and the Turkistan Khanates and Turkomans, a federation which if solid can stand up to a Russia, be it Bolshevist, Republican or Monarchical."

## PRESS ON THE NEAR EAST.

### The Adriatic.

The *Manchester Guardian* of November 12 blesses, if a little reservedly, the terms of the Adriatic settlement:—

It is as good a compromise as could have been hoped for, and it has the inestimable advantage of having been reached by the two parties themselves in friendly discussion. That is clearly the most desirable way with litigants who are neighbours and who have every interest in being good neighbours. What matters most for future peace is not so much the political control as the economic use of the port of Fiume. On this essential point no details of the agreement are yet available. Fiume is to be independent. With certain variations as to frontiers, this solution had already been urged by President Wilson, and also, in a common scheme, by France and Great Britain. Both suggestions had this in common: that they proposed to entrust the League of Nations with the control of a free port to be created at Fiume. It is a solution which we wish may yet be adopted, for the outlet at Fiume is as necessary to the Hungarians and to others as it is to the Jugo-Slavs. It would clearly be to the ultimate advantage of the various users of the port, no less than to that of the townspeople themselves, that the freedom of a gate so essential to their well-being should be under international guarantee.

On the same subject the *Daily News* of November 11 says:—

The importance of the news that Italy and Jugo-Slavia have finally settled their difference over Fiume and the adjacent territory is much greater than will be readily appreciated by a world that has long since turned from the dragging quarrel in weariness. So long as the Fiume controversy persisted a centre of potential disturbance was maintained in one of the notorious danger zones of Europe, and even apart from the threat of war that such conditions inevitably constituted the interruption of transit and the diversion of the normal channels of communication are and have been for two years a serious aggravation of the economic difficulties of south-east Europe. The precise details of the settlement are a secondary affair. There have been half a dozen solutions put forward, any one of which would have served well enough if the two Powers concerned would have agreed to accept it. In the final event Italy gains her strategic safeguards in the Adriatic, and Jugoslavia, it must be assumed, sufficient guarantees of access to the sea. Congratulations are due particularly to Count Sforza and Dr. Trumbitch for the part they have played in the successful negotiations.

The *Daily Telegraph* of November 12 describes the terms of the agreement as "fair and honourable," and congratulates the statesmen both of Rome and of Belgrade.

Dr. Trumbitch and his colleagues have acted wisely in concluding an agreement which is in many ways favourable to their country, even if it does not give quite all that the more ardent asserters of Illyrian aspirations desired. The alternative was a permanent quarrel with the great nation with which Jugo-Slavia cannot afford to live at enmity. The vexed question of Fiume is settled; at least, we hope it is settled, though we have still to learn what D'Annunzio has to say upon the point. We trust that this pugnacious literary gentleman and his truculent armed levies will be placated by the announcement that Fiume will be constituted a small independent Republic. Italy will be able to keep a watchful eye on the miniature State, for her frontier will be conterminous with that of the Fiume territory, and she receives the commanding position of Monte Nevoso, which dominates this tract. She receives the Istrian Islands, as well as the whole of that wedge of land which includes, of course, Trieste and Pola. Hungary, it may be observed, is thus

cut off from the sea, and her commerce will have to make its way to open waters either through the port of Fiume or through Italian or Jugo-Slav territory. An economic convention between the two southern kingdoms and the Governments which have superseded the Austro-Hungarian monarchy should be one of the next stages in the reconstruction of Central Europe. Italy and Serbia hold the keys of the Adriatic, and they must use their power with moderation if the peace and prosperity of the Danubian and Carpathian regions are to be maintained. Save for the northern corner and the recognition of the autonomy of the ancient little Venetian town of Zara, the Jugo-Slavs obtain the greater part of Continental Dalmatia. This is a really important, and even an unexpected, concession. The population of the Dalmatian uplands is mainly Slavonic, but the towns of the seaboard were originally colonies of Venice, and are still largely Italian in sentiment and language. So are the larger islands, as is known to every tourist who has taken the coasting trips among these southern fjords and sauntered about the quaint little cities where the relics of Imperial Rome lie alongside of the campaniles and the winged lions which recall the memories of the Queen of the Adriatic. It is no slight sacrifice for Italy to abandon all hope of reclaiming this ancient and storied strip of island-fringed shore Serbia ought to be satisfied, for she comes very well out of the transaction. She has now quite as much territory as her people can comfortably occupy, a fine coast-line with several excellent harbours and a useful maritime population. She should devote herself to living in amity and concord with all her neighbours, repairing the ravages of war and developing the resources of a diversified and fruitful country. She has got rid of her ancient oppressors, Turk and Austrian; she is large and strong enough to be immune from further aggression; and she can, if she pleases, become a prosperous, modern State, more intent on industrial and commercial progress than on the perplexed politics and incessant warfare with which she has been preoccupied for too many centuries.

**Turkey.**

In some comments upon the present plight of Armenia, the *Glasgow Herald* of November 9 makes the following remarks concerning the internal situation of Turkey:—

Nowhere is there any sign of a strong and active desire to put Turkey in the position that a self-respecting nation ought in such circumstances at least to make some effort to occupy. The last Grand Vizier, Damad Ferid Pasha, may have been honest in his intentions, but even he could not see his way to taking any practical steps towards crushing the Nationalists unless the Allies lent Turkey between four or five millions sterling and otherwise substantially assisted her to do what she ought to have done herself months ago. Things have now come to a pass, both in Constantinople and Asia Minor, when it may become necessary sharply to remind the Porte that a rider to the Treaty of Sevres provides for the eviction of the Turks from their European capital in the event of continued recalcitrance. If neglect to ratify the Treaty forthwith and failure to compel or induce Kemal to desist from attacking Armenia were met by the intimation that after a certain date Constantinople would no longer be Turkish, it is probable that the Porte and Nationalists would quickly modify the impotence and the arrogance which they are respectively displaying.

**The Middle East.**

The *Glasgow Herald* of November 3 is pessimistic about our Eastern prospects. "The news from Mesopotamia," it says, "forms the sole ground for optimism on the Middle Eastern situation." It quotes the recent hopeful remarks of Sir Percy Cox on the subject, and applauds his invitation of the Naqib to co-operate with him. It proceeds:—

This is a wise step, and one which will do more to render Mesopotamia peaceful and friendly than all the admittedly excellent work of our flying columns. To many the step may seem premature, but in point of fact it comes not a moment too soon. Arab opinion from el-Arish to Basra was in a state of dangerous ferment, thanks mainly to the annexationist colonial policy of General Gouraud, and was on the eve of welcoming an alliance with Mustafa Kemal, whom recent successes in Cilicia and in Armenia proper have in a measure reinstated as a popular saviour. It comes at a time when even the Italian missions at Adana must recognise that agreement with the Kemalists is impossible. To the recent feelers inspired by the French and Italians but sent out from the Government at Constantinople, Mustafa Kemal has replied by demands which are entirely out of keeping with the Treaty of Sèvres. He will not consent to negotiate unless before negotiations begin Smyrna and the Straits Zone are replaced under Ottoman suzerainty, Thrace is made autonomous, and radical alterations made in the financial and economic clauses of the Treaty. To such demands there can only be one answer, and whether our Allies like it or not there can be no peace in the Middle East until the Nationalist menace is removed and an end put to Bolshevik aggression, aggression in Azerbaijan, Georgia, Armenia and Persia on which Mr. Krassin's querulous notes are remarkably and significantly silent. The first step to that end is to conciliate the Arabs, whom Allied diplomacy has consistently played with and abused, and Sir Percy Cox's bold action in Mesopotamia is an excellent beginning. One can only hope that General Gouraud will read the lesson that it contains for his administration.

**Articles to Note.**

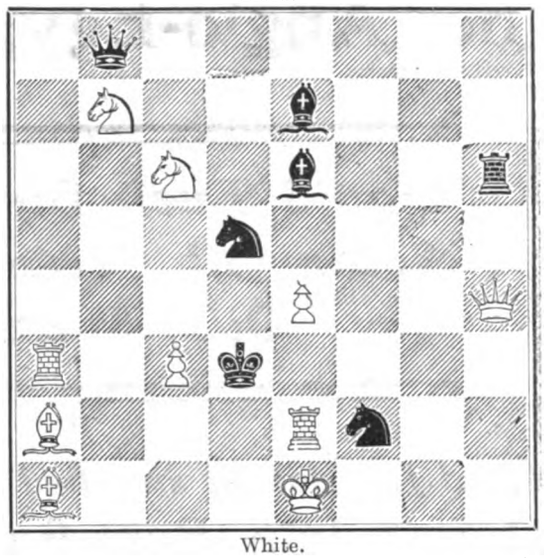
"Palestine To-Day" in the *Morning Post* (November 1 and following days).

"India and Empire Defence," by Major-General Sir George Aston, K.C.B.; and "Palestine," by Mrs. Rosita Forbes, in the *Fortnightly Review* (November).

"Veiled Kafiristan," by Ikbal Ali Shah, in *Chamber's Journal* (November).

## CHESS.

PROBLEM No. 26.
Black.



White.

White to mate in two.

The above problem by H. Weenink was awarded a prize in a recent competition of the G.C.C.P. Club.

Samuel Reschewiski, the youthful Polish player, recently gave a simultaneous exhibition at West Point Military Academy, when he encountered eighteen opponents, seventeen of whom he defeated, drawing the remaining game.

The preliminary heats of the City of London Chess Club Championship are now well advanced. Mr. H. Jacobs leads in Section A with 3½, Sir G. A. Thomas is first in Section B with 4, while in the remaining section Mr. Ross leads with 3½. The scores given are in all cases out of four games. Mr. R. H. V. Scott, who is in Section C, lost to Mr. Barlow, but has won his remaining games.

The Metropolitan Chess Club Championship began on Saturday, but a number of games due for that day were not played, and the results of the rest are not yet to hand.

This season the London League matches are twenty boards a side, and, from what I have seen of them so far, are being played with all the pre-war enthusiasm. It is too early to forecast the probable winners, but it may be said now that the Metropolitan Chess Club, which invariably takes a leading place in this competition, appears to have a more than useful side.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The very satisfactory news is forthcoming from our Bucharest Correspondent that a further substantial contract for locomotives has been placed by the Roumanian Government with a famous Glasgow firm. This follows on various other contracts that have been obtained by British interests, and it is evident that in Roumania, at any rate, our merchants and manufacturers are succeeding in making considerable headway. Special importance attaches to the latest contract, since it was obtained in the face of serious competition from America. It will be noted that Canada has again succeeded in obtaining a very substantial order for locomotives, a fact which will give rise to nothing but satisfaction, since the order is kept within the Empire. Canada thoroughly deserves the success she is now obtaining in this region, for after the war she was among the first to realise the great scope that existed for the development of trade with the Near East, and, realising, acted upon it. It is to be hoped that our business firms will not be above taking a lesson from our great Dependency in this respect.

***

Unfortunately, what is happening in regard to Roumania is far from being general, and from several quarters reports are forthcoming of contracts that have been lost for one of two reasons: either because delivery in good time could not be guaranteed, or because the quotations were considerably higher than those of our foreign competitors. The second factor, I gather, has had less weight than the former, since whatever other countries can do they cannot equal the quality of British goods, a fact of which our customers are perfectly aware. But however great may be the desire to give British productions the preference, where time is the all-important object obviously the question of delivery must outweigh all other considerations. Our manufacturers are, of course, powerless in the matter, which is entirely due to the present industrial position. The remedy is in the hands of the workmen, and it is to be trusted that no efforts will be spared to bring home to them the necessity of increasing output if our pre-war markets are to be regained.

***

I referred recently to the ambitious projects that the French have in view for the development of Morocco, and for which a new loan is being raised for an amount of 744,140,000 francs. A recent issue of the *Bulletin Officiel* of Morocco gives detailed particulars of the works on which this money is to be expended. 44,690,000 francs are allocated to the construction of Government buildings; 376,000,000 francs are to be devoted to public works, 280,000,000 of which is for the development of ports, the remainder being for roads and the exploitation of the extensive phosphate deposits; and 159,000,000 francs are assigned to the development of the natural resources of the country, the principal item under this heading being 90,000,000 francs for the development of agricultural and industrial water power. The balance of the loan is for education, public health, the postal, telephone, and telegraphic services, and art and historical monuments. The period required to carry out the works in question is estimated to be ten years, and provision is made for the realisation of the money as required.

***

The same issue of the *Bulletin Officiel* gives details of the terms of the new concession for a broad-gauge railway system in Morocco. The concessionaires are La Compagnie Generale du Maroc, the Paris-Lyons and Mediterranean and the Paris-Orleans railway companies, and La Compagnie Morocaine. Six lines are to be constructed, namely, from Petitjean on the Tangier-Fez line to Kenitra, from Kenitra to Casablanca, viâ Rabat; from Kenitra to Souk el Arba and Arboua, from Casablanca to Marrakesh, from Settat, or some neighbouring point of the Casablanca-Marrakesh line, to Oud Zem, or some place near there; and from Fez to the Algerian frontier. The concession is to remain in operation until 1999.

***

Needless to say, the effect on the economic welfare of Morocco of these projected developments will be immense. In the short period in which France guided the destinies of Morocco before the war great progress was made, and a point had been reached when a really comprehensive programme of constructional development was required. During the war anything of the kind was, of course, out of the question. It was then a question merely of keeping things going, and restricting constructive undertakings to the most necessary works. It is a proof of the vitality of our Ally that so soon after the conflict she should find herself able to proceed on such extensive lines with her work of civilisation.

***

The passing of the last Budget meant the realisation of the objects for which the Association to protest against the duplication of income-tax within the Empire was formed, and last week the culmination of its efforts was marked by a complimentary luncheon given to the Chairman of the Association, Sir F. W. Young, Mr. Frederick Dutton, the late Chairman, and Mr. Henry Bull, the late Treasurer. These three gentlemen have been the leaders in a strenuous struggle to remove an injustice which weighed heavily on the most enterprising class in the community, and, as Lieut.-Col. L. S. Amery, Under-Secretary of State for the Colonies, pointed out at the meeting, was one of the greatest obstacles to free movement and settlement in the Empire and to trade.

***

Considerable importance attaches to the Egyptian cotton law which has just been promulgated prohibiting the mixture of established with other varieties of cotton between the picking and the final ginning, and the mixture of an established variety of cottonseed with seed of another variety. Hitherto the question of seed production has left much to be desired, as there has been a tendency in some cases to give a preference to the more prolific varieties at the expense of quality. The new law is designed to further the use of sound seed, and is to be cordially welcomed as an initial step towards a much-needed reform.

***

In another column will be found particulars of the remarkable outburst of commercial activity in Roumania since the Armistice. Almost every country can show striking figures with regard to the formation of new companies in the past two years, but Roumania's record in this respect is specially noteworthy. In 1916 there were 430 companies in existence, with an aggregate capital of 722,750,000 lei. By August 31 of the present year the number of companies had almost doubled, while the total capital had risen to 4,482,272,000 lei, an increase of about 3½ milliard lei! The promise which this development holds out for the future of Roumania needs no comment.

***

After touching 1s. 5½d. a few weeks ago, there has been a marked improvement in the rupee exchange, which at the time of writing stands at 1s. 7⅝d. The improvement is due to a slight improvement in the general position; but, without wishing to earn a reputation for pessimism, I must say that it seems doubtful whether this improvement is likely to be maintained, for there are too many adverse features to be taken into consideration to inspire any confidence on that score. When India is in a position to export freely once more the exchange will be automatically supported; but at present that is out of the question.

# Commerce and Industry.

(Reports from Our Own Correspondents.)

## EGYPT.

Cairo, November 1.

### Increased Imports in August.

According to the Customs statistics just received, foreign trade with Egypt was fairly brisk during August. Imports amounted to £E8,707,460, and exports to £E2,195,411, as compared with £E3,737,811 and £E5,293,116 respectively a year ago. Imports for the eight months are £E40,000,000 and exports £E37,000,000 above what they were at the same date in 1919.

The principal imports during the month have been:—Boots and shoes, £E73,863 (one-third each from United Kingdom and Switzerland); wheat, £E302,523 (two-thirds from Argentine); flour, £E760,522 (equally from Australia and United States); raw sugar, £E32,719 (from Cuba); kerosene, £E215,713 (half from Roumania); oil-fuel, £E200,800 (half from American sources); timber for construction, £E275,037 (half from Sweden); railway sleepers, £E66,399 (from United Kingdom); coal, £E887,354 (75 per cent. from United States and 25 per cent. from British Possessions); nitrate of soda, £E35,093 (from Belgium); household soap, £E59,858 (50 per cent. each from Palestine and United Kingdom); medicinal preparations, £E49,141 (45 per cent. from France and 33 per cent. from United Kingdom); cotton textiles, £E1,334,859 (80 per cent. from United Kingdom and 10 per cent. from Italy); cotton hosiery, £E80,712 (35 per cent. from Japan); woollen and worsted cloths, £E159,581 (80 per cent. from United Kingdom); silk cloths, £E143,851 (60 per cent. from France and 25 per cent. from Japan); jute sacks, £E103,115 (from British India); iron and steel rails and fittings, £E156,295 (90 per cent. from United Kingdom); iron or steel parts, bars, angles, girders, sheets and hoops, £E165,636 (50 per cent from United Kingdom and 45 per cent. from Belgium); tobacco, £E276,177 (40 per cent. from Greece and 25 per cent. from China).

The principal exports were:—Hides, skins, and leather goods, £E34,602; cotton seed, £E182,647 (to United Kingdom); cotton seed cake, £E23,410 (to United Kingdom); sugar, £E145,412 (50 per cent. to India); cotton seed oil, £E24,472 (to Turkey); raw cotton, £E1,602,711 (60 per cent. to United Kingdom, 15 per cent. to United States, 10 per cent. to France, and 5 per cent. to Italy); cigarettes, £E70,464.

Trade between Egypt and the Sudan fell off slightly, imports amounting to £E110,574 and exports to £E303,811, against £E151,504 and £E318,814 respectively. The chief items in imports were:—Bullocks, £E39,530; and sheep, £E23,820; while exports to Egypt were mainly:—Sugar, £E145,753; cotton textiles, £E57,726; and tobacco, £E16,682.

Port Said, November 5.

### Electricians' Strike Settled.

The strike of Messrs. Worms and Co.'s electricians, which has lasted some days, has at last been settled, and, it is believed, to the satisfaction of both parties. While it lasted considerable delay and inconvenience were caused to many ships, as without the electric light they could only transit the canal in daylight, and when night came had to tie up to the bank, which was reminiscent of the old days when ships took three days to get from Port Said to Suez.

### Arrival of Largest Bucket Dredger.

The largest bucket-dredger in the world, the Silurus, under the command of Captain W. Rodrick, has just come through here on her way to Bombay, where she will be employed by the Bombay Port Trust. She has had considerable bad weather coming out here, but has come through it without serious damage. Built in Renfrew in the early days of the war, when the Silurus was finished she was placed in the Gareloch, as it was not deemed safe to attempt to send her to India on account of the submarine menace. During some bad weather she capsized, and for over three years was lying bottom-up in fairly deep water. Eventually she was put into the hands of a large salvage firm, who were successful in raising her, and she is now on her way out—let us hope to have a long life of usefulness in India. It is understood that she can lift 2,500 tons of mud per hour, and can carry an hour's work in her hold, supposing that no hoppers are available.

### Failing British--German.

Considerable quantities of German goods, mostly hardware, have made their appearance in the town. One retailer complained to your correspondent that he could not get English goods, though he had had them on order for over six months, and to supply his customers with something he had had to purchase German goods. He showed the writer two aluminium saucepans—one German and one English made: the former was as tissue paper compared to thick strawboard, and in the obvious wearing qualities there was no comparison. But, as he plaintively said, "If I have not something to give my customers, they will go elsewhere and still be supplied with German goods; but I want to stock English goods *when* I can get them."

### Miscellaneous.

We are now beginning to feel the effect of the coal strike, as there appear to be considerably fewer ships making their appearance in the port, and those that do come are proceeding at the most economical speed so as to save coal.

Although it was said some months ago that passages to Egypt in the autumn would be impossible to obtain, yet residents here are finding their way back, and have exciting tales to tell of their perils by sea and land, mostly the latter, in getting here.

## ROUMANIA.

Bucharest, October 31.

### Orders for British Locomotives.

The Ministry of Communications has been authorised to sign a contract with the International Corporation of Canada, Ltd., Montreal, for the purchase of 300 locomotives of the consolidation type. A further contract has been made with Messrs. Wm. Beardmore, Ltd., of Glasgow, for sixty locomotives.

### Aerial Services Inaugurated.

Aerial services have been started between the following towns: Bucharest — Craiova, Sibiu — Constantza, and Galatz—Jassy. The services will be conducted with military aeroplanes, which will carry urgent official correspondence from different Ministries. Services are also being inaugurated between Sibiu—Cluj, Jassy—Chisinau, and Jassy—Czernowits.

### Withdrawal of Banca Generala Notes.

The Ministry of Finance has issued instructions for the withdrawal of the one thousand lei stamped notes issued by the Banca Generala existing throughout the country. These will be changed into Banca Nationala notes of the same value. The exchange will take place at the Banca Nationala, Bucharest, and its branches, and the last date on which this can happen is November 5, after which all 1,000 lei Banca Generala notes will be null and void. As soon as the thousand lei notes are so changed a start will be made on the Banca Generala notes of less value.

### Commercial Activity Since the Armistice.

Immediately after the termination of hostilities commercial activity in Roumania developed considerably, and showed itself by the formation of companies of all descriptions. Thus in 1919 128 companies were established, with a total capital of 499,105,300 lei. During the period January 1 to August 31, 1920, 168 further companies were started, with a total capital of 1,640,206,900 lei. These figures do not include the increased capital of the old companies, which represents a very high figure. It may be

noted in this connection that up to August, 1916, before Roumania entered the war, 430 companies were in existence, with a total capital of 722,750,000 lei; while on August 31, 1920, 843 companies were in being, with a total capital of 4,482,272,000 lei—that is to say, from 1914 to 1920 the total capital has increased by 3½ milliard lei.

The scheme for electrifying the railways in Transylvania is on the point of being applied. At present the authorities are studying the building of the electric line from Brasov to Sibiu, which will be facilitated by employing the Olt and Jiu rivers for motive power. Next autumn work will be started on the electrification of the Ditro-Piatra-Nemtz line. The preliminary work will be begun next spring.

**Export of Gold.**

For the time being it has been decided that the Minister of Finance should have the sole right to sell the gold produced by the State mines. Therefore arrangements have been made that all the gold in ingots now in possession of the Ministry of Industry, and that which is stored at the General Secretariat at Cluj, will be deposited at the Central Public Treasury Warehouse.

The gold will be exported and sold abroad, as the negotiations for the purchase of this gold by the National Bank were fruitless. The National Bank maintained that the State was obliged, as per agreement, to hand over all the gold which it possesses, while the Government contended that the bank only had a right to demand the gold found in the old kingdom. They therefore could not allow the handing over of the gold found in the new territories on the ground that the question could only be settled by fresh concessions and agreements on both sides.

**Small Surplus of Cereals.**

According to the approximate calculations made by the Minister of Agriculture, owing to reduced production and smaller areas under cultivation this year, Roumania will only have available for export about 12,000 wagons of barley and 58,000 wagons of oats from the whole country, the remainder of the stock being needed for internal consumption, and as seed for this autumn's and next spring's sowings.

## YUGOSLAVIA.

BELGRADE, October 31.

**Business as Usual.**

An amusing incident occurred the other day, which throws light upon at least some of the causes of the high prices which are oppressing everybody. On the Terazije there is a little shop dealing in "products of Uzhitsa"—that is to say, chiefly hams and smoked meat. The price of ham there is 50 dinars a kilo. One morning the proprietor was horrified to learn that a rival in the same line of business had bought a big parcel of hams on the market, and was disposing of them at 40 dinars, to the great benefit of the public and good and fair profit to himself. The man on the Terazije at once bought the whole lot at 40, and started to retail it at 50.

**Plebiscite and Plenty.**

Before the plebiscite in the Celovatz (Klagenfurt) area there was a great scarcity of flour, meat, and other necessary foods. But now that Zona A has voted for incorporation in Austria a huge quantity has suddenly appeared on the scene, for it appears that the would-be profiteers do not hanker after kronen. Consequently, it is reported that something like forty wagon loads of flour, lard, sugar, and other necessities will be returned to Liubliana, to the great contentment of the population of that pretty and pleasant district.

## CYPRUS.

NICOSIA, October 16.

**General News.**

The Government is offering corn for sale at the various tithe stores, eleven in number, exclusively for use as seed, at the following rates: Wheat, 15s. the bushel; barley, 5s. 6½d.; and oats, 4s.

Winter hours have been started on the one railway that Cyprus possesses. The service is limited to one train a day each way between Nicosia and Famagusta, and between the former and the West terminus at Evtykhou. The train from Famagusta leaves at 7.30 a.m., reaching Nicosia at 10.30.

The weather has been generally favourable. There have been some heavy rains, causing damage to gardens in the hills; but they have brought up a welcome growth of pasture, of which flocks were in much need.

## EGYPT'S IMPORTS OF PIANOS.

**Good Opening for British Manufacturers.**

From the statistics supplied by the Customs Administration it appears that 260 pianos were imported into Egypt between January 1 and July 31, as against 33 in the corresponding period of 1919. Of these 260 pianos, Germany supplied 86, United States of America 40, Italy 28, United Kingdom 11, France 9, and other countries 86.

Although Germany heads the list, it is considered by the piano trade in Egypt that the United States of America will in future be England's most formidable competitor, the German pianos being of inferior make (says H.M. Commercial Agent at Cairo). Payment for pianos from all countries, at present, is cash against documents; the granting of credit would certainly lead to enhanced business. British prices are 20 per cent. higher than prices of other countries.

Owing to the general slump, the demand for pianos is only fair, but there is every reason to suppose that an annual average of 300 pianos can be maintained. Grands, upright grands, and baby grands are in demand; selling prices are from £150 to £300. There is a fair demand for upright pianos; selling prices from £50 to £130. There is no sale whatever for upright or cottage pianos, tropical model.

The prospect of extending the trade in British pianos is good, but it cannot be too strongly impressed on British manufacturers that they must advertise on a large scale in order in the first instance to bring their wares before the public. Local agents should be given a definite sum yearly for the purpose, and not be left to advertise out of their own pockets.

The geographical position of Egypt, midway between East and West, might be taken advantage of by manufacturers, as orders from clients in India and Australia might be met from the stocks in Egypt when it was not possible to supply immediately from England, thus pleasing the customer and giving the firm a good advertisement for quick delivery.

## AMERICAN COMPETITION IN EGYPT.

The imports into Egypt from America during the period January 1 to July 31 show an approximate increase of £E3,000,000 over the corresponding period of 1919. The principal increases were in flour and wheat, £E1,594,842; coal, £E1,167,212; metals, £E495,705; yarns and textiles, £E111,928; nails and screws, £E18,808; industrial tools, £E7,477; steel work, £E14,742; tinplates, £E30,127; typewriters, £E19,657; agricultural machinery, £E33,957; other machines, £E62,576; motor cars, £E258,599; motor cycles, £E11,665; spare parts for motors, £E10,880; iron bars, £E9,099; cotton hosiery, £E87,011; silk hosiery, £E4,811; cotton clothing and ready-mades, £E8,218; and woollen ditto, £E2,200. The principal decreases were in kerosene (£E717,479) and tinned goods (£E58,986).

The directors of the India General Navigation and Railway Company have declared an interim dividend of 4 per cent. on the ordinary shares and 2½ per cent. on the preference shares, payable November 26.

# PROPOSED SUDAN RAILWAY.

## A COTTON-GROWING AREA.

**By Sir John Randles, M.P.***

The question of a railway to tap the Kassala region of the Sudan has been taken up energetically by the Lancashire members of the House of Commons, because of the importance of increasing the supply of cotton. It is not, of course, a new project. In the schedule of the pre-war Sudan Loan Bill provision was made for the expenditure of £1,600,000 on the extension of railways, the intention being to continue the El Obeid railway through Kassala to Thamiam almost midway on the Port Sudan line between Port Sudan and Atbara, and but for the war it may be presumed that the line would now be in operation.

Now, as readers of THE NEAR EAST are aware, the cotton problem has become much more accentuated in the intervening years owing to the increasing demand in America for cotton, coupled with a decrease in the area under cotton. If, therefore, the project was deemed desirable in 1914 it goes without saying that the need for it is now very much greater.

The area which would be served by the railway is suitable for the best varieties of Egyptian cotton. Mr. B. Crapper, who visited the Sudan last year, reported to the British Cotton Growing Association on the Gash Delta at Kassala that "the river irrigates each year about a quarter of a million acres of excellent cotton land, which grows Sakel cotton of good quality. The population there is relatively large, and the only drawback to the immediate development of this area is the absence of means of transport." Besides cotton, the district is reported to be a good one for the cultivation of cereals. Developments on these lines hinge on the provision of communications, a need which the present project, which I believe I am right in saying has been reported favourably on by General Allenby, is intended to fill.

The Sudan Government is willing to build the railway, but without the guarantee of the British Government it would not be easy to finance the scheme. The question Lancashire members have had to consider was whether the project was one for which we could urge the assistance of the Treasury, and we have come to the conclusion that if it is suitable it is one which ought to receive our fullest support. The Empire Resources Development Committee are interesting themselves in the question, and it may be that we shall be able to co-operate with them in putting the case before the Government. At the moment we are waiting for the decision of the sub-committee of the Empire Resources Development Committee, and when we know what their view is we shall be in a position to decide on our course of action.

Before the war the cost of the railway was estimated at about £1,500,000. But, of course, conditions are now entirely changed, and it is believed that to-day the work would require the expenditure of at least three or four millions. There are two schemes for the railway—the one a line from Kassala to Atbara, the other a line from Kassala to Thamiam. The latter, which provides direct communication with Port Sudan, is the favoured project. The terrain, it may be pointed out, presents no engineering difficulties of any consequence. It is a level, easy route, with few bridges, and it is not thought that the line will take any great time to construct. The railway would, of course, be worked by the Sudan Government.

Those who may cavil at the expenditure involved may be reminded that time and again it has been proved that railways such as the line proposed invariably pay. In the densest cities you have lines run at a loss, but in a promising area which is being opened up the case is altogether different. "There is no doubt," Mr. Crapper stated in the report to which I have referred, "a railway would pay immediately on completion. The distance from any existing connection is 250 miles, and it is the united opinion of all in authority in the Sudan that the railway ought to be put in hand immediately." The Government, it may be added, has already made itself responsible for a loan of £6,000,000, and so long as it is responsible for the Sudan it cannot allow necessary works of development to be held up through lack of financial assistance. In the present case the needs of Lancashire provide a double reason for support. All that is required is that the loan should be guaranteed, for then the money can be raised at a very much lower rate than would otherwise be the case.

* In an interview.

## TRADE IN INDIAN OILSEEDS.

The report of the Indian Committee of the Imperial Institute on the trade of India in oilseeds, has been published by Mr. John Murray, price 6s. net. The volume emphasises in a striking way the vast importance of the Indian oilseed industry. The total annual production of oilseeds of all kinds in India is probably well over 5,000,000 tons in quantity and £50,000,000 in value; in normal times approximately one-third of the output is exported.

No other country produces in commercial quantities so great a variety of oilseeds. Of the ten chief of these, viz., linseed, ground nuts, cotton seed, rape seed, castor seed, sesame seed, copra, mowra seed, poppy seed, and niger seed, India supplies no less than 30 per cent. of the total amount entering commerce. Before the war about one-third of the total quantity of oilseeds exported from India came to the United Kingdom, the chief kinds being cotton seed, linseed and castor seed. Certain other oilseeds, such as ground nuts, sesame, copra, and mowra, were shipped mainly to France, Germany, and Belgium.

Various suggestions are made by the committee with a view to extending the trade in Indian oilseeds with the United Kingdom and developing the British oilseed crushing industry. It is considered that a free choice of the raw material produced within the Empire should be secured for this industry, if necessary by a system of rationing and licensing in the producing country. If further assistance is required an import duty should be imposed on oils and fats of all kinds imported to the United Kingdom from foreign countries. The Committee consider that the latter method would be more satisfactory than a preferential export duty on Indian oilseeds.

A memorandum on the effect of import tariffs on the oilseed crushing industry, by Mr. J. W. Pearson, Chairman of the Seed-Crushers' Association of the United Kingdom, is appended to the report. The volume also contains a detailed account of the Indian trade in oilseeds, prepared at the Imperial Institute for the committee.

Mr. A. Baerlocher, hitherto commercial director of the Egyptian Salt and Soda Co., Ltd., has been appointed director-general of the company.

The India Office announces that those members of the Committee of Railway Inquiry appointed by the Secretary of State for India who are at present in England will leave for India on November 24.

Mr. J. G. Vella has been appointed manager for Egypt, the Sudan, Palestine, Syria, and Cyprus of the Royal Exchange Assurance Corporation of London in succession to Mr. M. G. Harris, who has been appointed general manager of the Levant branch.

## THE 1920 MOTOR SHOW.

### I.—General Impressions.

(From Our Own Correspondent.)

Probably the strongly-worded criticisms which appeared in the Press last year regarding the crowded state of Olympia had much more to do with the decision to hold this year's show in two portions than most people imagine. The authorities decided that the exhibits should this year be divided between Olympia and the White City; they made arrangements for dual tickets and for charabanc rides, and, although one says so more in sorrow than in anger, gave painful but unmistakable evidence that the motor industry of this country has developed far more rapidly than has the Society of Motor Manufacturers and Traders. It has been freely rumoured that, so far as attendance is concerned, this year's show has been more or less of a failure, and some colour is lent to this view by the altogether absurd decision of the society not to publish the attendances. By the time these lines appear it is possible that figures may have been given out to the Press; if so, I anticipate that they will prove, roughly, to be one-half of those of last year.

I would like it to be clearly understood that I do not consider the show was a failure. I would like it to be equally well understood that, in my opinion, the Society of Motor Manufacturers and Traders unwittingly did their utmost to make it a failure. The criticisms of last year were directed against the inadequacy of the accommodation. I fancy the criticisms of this year, if anyone is so unkind as to make any, will be directed against the whole arrangements.

It has been said that the division of the show and the transport provided was the best possible compromise that could have been made. Looking back, one wonders whether this was so. It is, of course, easy to criticise; but then, in this case, no one wants to criticise. Every motoring writer naturally wishes to do all he can to help the industry, but every motoring writer has also a duty to his public, and I for one should consider I was not doing that duty did I not urge on the Society of Motor Manufacturers and Traders the necessity for studying the comfort of the public in every possible way. To my mind, the public is paramount; the whole well-being of the British motor industry depends on the British public, and I sincerely hope that the arrangements for next year's show will be very different and conceived in a far more up-to-date and business-like spirit.

#### The Personal Element.

There was another point which struck me, and this I would commend to the notice of individual exhibitors. Up to the last year there was a very strong personal element noticeable in the show—a friendliness, a *bonhomie* which this year was noticeable by its absence in the case of far too many of the smaller firms, as well as in several of those whose names have been household words. The conducting of the stands was too often left to salesmen who were unknown to old clients. I think this was a mistake. The personal element in business is always of value—perhaps more so in the motor industry than in any other—and I am certain that those firms whose principals, men whose names are household words in the trade, were present in person on their stands reaped an immense advantage over their less far-sighted competitors.

There is no need here to go into any details as to the show itself, or the attendances, or the thousand and one points which provided "copy" for the newspapers during its run. They have all been dealt with, and to my mind all that has to be done now is to deal with the principal exhibits, and to point out wherein they were superior to those of last year or where they fell short, if any did, of the standard set a year ago.

#### The Wonderful Napier.

To my mind, by far the most interesting and representative exhibit in the whole of the show was that of Messrs. D. Napier and Sons, Acton Vale, London. Last year I expressed practically the same view. Since then I have been able to inspect and test a number of Napier chassis and engines, and in my opinion the Napier car is one of the finest productions of the motor industry of this country, and is superior in every respect to the best car turned out by makers in any other part of the world. Beyond doubt the Napier is in a class of its own.

It is common knowledge now that the firm had some difficulties to overcome through a strike of coach-builders, which interfered with the completion of the show bodies. They consequently showed a 40-50 six-cylinder Napier chassis, a similar chassis fitted with a Cunard torpedo body, and one with Cunard four-seater saloon body. These cars would, in the ordinary course of events, have been delivered and running on the road, but by the courtesy of the buyers delivery was postponed in order that the cars might be shown at Olympia. My friend Mr. H. T. Vane, told me before the show that he felt that these models would be amongst the finest exhibits, and in this he was certainly correct.

The four-seater saloon body shown was of the owner-driver type, in which there was no division between the front seats. The lines of the body harmonised perfectly with the clean lines of the chassis, and that the car was a "quality" production was evident at the first glance. The body was constructed of wood framework with aluminium panels. Dome-shaped wings were fitted, and the appearance of the car was enhanced considerably by the V-shaped wind screen, the top half of which is divided so that the occupant of the seat beside the driver can be effectively screened even when the driver's window is open.

The interior of this saloon was arranged on luxurious, although eminently serviceable, lines. The seating was arranged to accommodate two persons on the front and two on the rear seat, the front seats being of semi-bucket shape constructed on an entirely new principle. Both seats can be moved backwards or forwards, being independently adjustable, and they can be tilted so that the angle of the seat cushion and back rest can be altered to suit the convenience of each passenger. They can also be arranged to hinge, by which means easy access is afforded to the rear of the saloon. Further consideration for the comfort of the passengers is shown by the provision of arm slings and pulls for those in the rear seats, electric lighting, and even electric cigar-lighters and ash trays. The rear of the saloon is provided with two windows which can be screened by silk curtains which match the upholstery.

The car is painted a handsome blue, whilst the wings, wheels, and upper portion are in black. The carriage is beautifully upholstered in dark-blue leather, with deep springy cushions and thickly padded backs. The seats are wide and low and very comfortable. The waist-line of this handsome car is panelled in polished mahogany, whilst the bottom half inside the doors is padded and upholstered in leather, having deep pockets for carrying maps, etc. A luggage grid is fitted to the rear of the car, which slides completely out of sight when not in use. The wheels are Rudge Whitworth detachable, and the electrical equipment is C.A.V. lighting system and engine-starter. I may mention that this car was built specially for Mr. H. T. Vane, C.B.E., managing director of Messrs. D. Napier and Son, Ltd., for his own personal use.

#### Another Notable Exhibit.

The second Napier exhibit was a similar chassis with a torpedo body, designed to give a stream-line appearance, with the style and originality of design which gives the Napier so distinguished an appearance. In this there was accommodation for six persons, and the seats are built low, with an absolutely correct slope. The body has aluminium panels, and a Cape hood, covered with waterproof material, is fitted. Detachable side curtains are provided, which extend right forward to the wind-screen, with celluloid windows where necessary, and these can be readily adjusted at the first sign of rain. An envelope cover is provided for the hood when down, whilst the wind-screen is of the flat type with both halves arranged to hinge outwards.

This car is painted white, with wings and wheels in black, and upholstered in black leather. It has deep springy cushions and thickly padded backs, giving the greatest comfort. It is realised that with a touring-car it is often desired to drive long distances without a stop, and with this type of body on a 40-50 h.p. Napier chassis, with its special springing and patent anti-rolling device, the greatest comfort is provided, so that long runs may be accomplished without passengers feeling the slightest fatigue.

I noticed that the electrical equipment on this car provides a lighting system with electric starters, two electric horns, two head and two side lamps, a dash lamp, and the usual tail light, and the road wheels are of the detachable type made by Messrs. Rudge Whitworth.

I regret that exigencies of space prevent me from dealing with the Rolls-Royce, Vauxhall, Lanchester, Daimler, and other exhibits this week, but I hope to describe them fully in succeeding issues of The Near East.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has continued to be animated. Currants have been in special demand, notably fine Vostizzas, which have been done at increased rates. Sultanas have been in greater request, and as supplies are inadequate prices have shown a tendency to rise. Arrivals of Smyrna natural figs have been of excellent quality, and they are being taken up freely.

Coffee.—The demand has been restricted, and only small sales were concluded. Transactions include Costa Rica (bold greyish) at 99s. 6d. to 114s. 6d., and East Indian at 85s. to 130s. The futures market has been irregular. Quotations are: December, 56s.; March, 54s.; and May, 54s. The main factor in the prevailing dullness is, of course, the fact that to all intents and purposes Central Europe is still out of the market.

Oilcakes.—Linseed cake has risen 13s. to 36s., while cottonseed cake remains unaltered at 13s. Other transactions include Indian cottonseed cake at 11s. 9d. and Egyptian cottonseed cake at 17s. 6d.

Sugar.—The free market remains steady. West Indian crystallised is unaltered at 83s., while American granulated is unchanged at 95s. White Mauritius has been done at 94s. There has been a good demand for home refined at the official prices.

Oilseeds.—Business has declined. Indian linseed has been done at 36s., while La Plata has come to business at 28s. 3d. Rapeseed is lower, with Toria at 34s. 6d. and bold Ferozepore at 32s. 6d. Cottonseed is quieter. Indian has been done at 11s. 9d., while Egyptian stands at 17s. 6d.

Seed Oils.—Prices have declined considerably. Linseed has been done at 60s. Refined rape oil is firm at 92s., and the crude variety is unchanged at 75s. Turpentine is 13s. lower at 110s.

## CURRENT PRICES.

*General Produce.*—Bacon, 216s. 9d. cwt.; butter, 336s. cwt.; cheese, 170s. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 5½d. lb.; cocoa (Ceylon, good to fine), 140s. cwt.; coffee (Costa Rica) 110s. 6d. cwt., East India bold 117s. 6d. cwt., Mocha 147s. 6d. cwt., Santos 77s. 6d.; currants (Vostizza), 103s. 6d. cwt.; eggs, 42s. per 120; ginger (washed cochin), 63s. 6d. cwt.; hams, 218s. cwt.; lard, 164s. 3d. cwt.; nutmegs, 1s. 1d., 110's to 180's; pepper (Singapore, black) 5½d. lb., and Muntok white 1s. 2¾d. lb.; raisins (Valencia), 136s. cwt.; sugar (granulated) 96s. cwt., No. 1 cubes 100s. cwt., white Java 94s. 6d. cwt., Mauritius 94s. cwt.; sultanas (Smyrna), 142s. cwt.; tapioca (Singapore), 2d. lb.; tea (Indian) 6¾d. lb., Ceylon 6½d. lb., and Java 4½d. lb.; wheat (Australian) 121s. 6d. qr., English white 94s. qr.

*Metals.*—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard) £91 7s. 6d. ton, electro (wire bars) £99 ton; gold bars, 119s. 7d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed), 260s. ton; nickel, £230 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £15 15s. bottle; silver bars, 53⅝d. oz.; spelter (G.O.B.) £37 17s. 6d. ton; tin (standard), £262 12s. 6d. ton; wolfram, 24s. 6d. unit; zinc sheets, £47 ton.

*Chemicals.*—Acids: boric 75s. cwt., oxalic 2s. 0½d. lb., citric 3s. 5½d. lb., tartaric 2s. 7d. lb.; ammonia (sulphate), £31 6s. 9d. ton; benzole (standard), 3s. 5d. gallon; bleaching powder (35 per cent.), £27 10s. ton; borax crystals, 41s. cwt.; cream of tartar, 235s. cwt.; glycerine (crude, 80 per cent.) £105 ton, industrial (1,250 per cent.) £155 ton; lead (red) £56 10s. ton, white dry £63 10s. ton; potassium: bichromate 1s. 9½d. lb., chlorate 9½d. lb., caustic £105 ton, nitrate £70 ton, permanganate 3s. 4½d. lb., prussiate yellow 1s. 10½d. lb., sulphate (90 per cent.) £34 ton; quinine, 4s. 1d. oz.; sodium: crystals 190s. ton, bi-carbonate £13 15s. ton, bi-chromate 1s. 1½d. lb., alkali (58 per cent.) £16 5s. ton, chlorate 5d. lb., caustic (70 per cent.) £31 10s. ton, hyposulphite £36 ton, prussiate 1s. 2½d. lb., and nitrate £24 2s. 6d. ton; sulph. copper, £41 ton; sulph. iron, 160s. ton.

*Miscellaneous.*—Cotton (American, good midd.), 18.03d. lb.; linseed (La Plata), £26 5s. ton; oils: linseed £60 ton, soya £67 5s. ton, cotton (crude) £51 10s. ton, olive 21s. 6d. gallon, ground nut £90 10s. ton, palm £56 15s. ton, rape (crude) £75 ton, palm kernels £37 6s. 3d. ton, petroleum 2s. 3d. gallon, rape Toria £34 7s. 6d. ton; rubber: plantation (No. 1 crêpe) 1s. 2¾d. lb., smoked sheet 1s. 0¾d. lb., fine hard Para 1s. 5½d. lb.; turpentine (American), 110s. cwt.

---

The Egyptian Ministry of Public Works is to send a mission of Egyptian engineers to the United States to obtain experience in building with iron and concrete.

The directors of the Indian Electric Supply and Traction Company have declared an interim dividend of 3 per cent. on the ordinary shares, payable November 26.

During 1919-20 the cotton exported from Egypt amounted to 737,857 bales, compared with 718,309 bales in 1918-19; 345,461 bales were exported to the United Kingdom, a decrease of 114,313 bales. On the other hand, exports to the United States amounted to 257,265 bales, an increase of 162,003 bales.

## LANCASHIRE COTTON.

(From Our Own Correspondent.)

Manchester, Monday.

The better feeling in the market has not been maintained. Since a week ago the amount of business passing has tended to fall off. The attitude of buyers has been affected by the continued easier movement in raw cotton rates, and owing to the probability of lower values orders have been held back. There is a good deal of anxiety with regard to the future state of business, and trade on international lines is very seriously upset by the financial stringency and the marked irregularity in exchange rates. It is said that some growers of Egyptian cotton are holding supplies back for better prices. Shipments from Alexandria are decidedly smaller than last year. There is no particular change in the crop outlook. Lancashire spinners have again purchased sparingly. Some special orders have been booked in Egyptian yarns for thread-manufacturing purposes, but ordinary qualities remain quiet. There has not been any general activity for Near Eastern markets. Fabrics have attracted some attention for Constantinople, and dyed goods have been in request for certain outlets of the Levant, but no real change for the better can be recorded in the demand. Operations for India have been on much the same lines as during the last week or two. Calcutta has continued to purchase dhooties and other light fabrics, but demand has not broadened in grey staples. More looms are being started in Great Harwood and Blackburn. The demand for China has been flat. Rather poor news has been received from South America. Burnley manufacturers of printing cloths cannot obtain relief. Prices in American yarns have favoured buyers, and owing to the restricted turnover spinners have lost ground. There has been less demand in extra-hard descriptions for the Levant, but a few more offers have been mentioned in bundles for India.

## "CONCERNING COTTON."

We have received from Messrs. A. J. Wilson, Ltd., of Clerkenwell Road, London, the well-known advertising agents, a beautiful publication, profusely illustrated in colour and black and white, descriptive of the world-wide textile activities of the Amalgamated Cotton Mills Trust, Ltd., London. This great concern, formed in October, 1918, is an amalgamation of the following important Lancashire and Yorkshire firms:—Horrockses, Crewdson and Co., Ltd.; Eckersley, Ltd.; Robert Hyde Buckley and Sons, Ltd.; Acme Spinning Co., Ltd.; John Ashworth (1902), Ltd.; Mill Hill Spinning Co., Ltd.; Thomas Moss and Son, Ltd.; Redmayne and Isherwood, Ltd.; Haslams, Ltd.; Riversdale Mill Co., Ltd.; John Kershaw and Co., Ltd.; Bolton Heald Co., Ltd.; Cellular Clothing Co., Ltd.; and the Haslam Weaving Co., Ltd. The trust owns nearly sixty spinning mills and weaving sheds, and in magnitude far exceeds any similar venture. These mills are equipped with nearly two and a-quarter million mule equivalent spindles, with nearly 18,000 looms daily turning out cloth, employing some 18,000 men and women. The large, artistic brochure before us, with its delicate designs from fairyland, the courts of honour, and the playgrounds of Cupid, providing a setting for photographs of the huge textile works and mills of the Amalgamated Industries, makes a fascinating and informative art-work for which Messrs. Hudson and Kearns, Ltd., the London art colour printers, are to be congratulated. We understand that H.M. the King has accepted a presentation copy.

---

A Government loan of £10,000 has been secured by the colonists of Rishon-le-Zion, Beer Jacob, Gederah, and Mazkeret Batia.

A coalfield concession at Colomb, Ain-Sefra, Algeria, has been applied for by the Chemins de Fer Algériens de l'Etat.

## RECORD SOWING OF EGYPTIAN COTTON.

The Ministry of Agriculture states that 1,827,868 acres are under cotton (says a Reuter message from Cairo) as compared with 1,573,662 acres in the year 1918-19, which is a record. Of this total 69.5 per cent. is sakellaridis. It is provisionally estimated that the crop will reach 6,187,000 kantars. The Ministry's statement refers to the difficulty of getting reliable returns, as many growers are under-estimating their crop, in the hope of inducing an increase in price, which is at present relatively low.

## ANGLO-PERSIAN OIL.

In the House of Commons, Mr. Ormsby-Gore asked the Prime Minister on November 15 whether the concession for the further development of the Mosul and South Kurdistan oilfields had been granted to the Anglo-Persian Oil Company, and, if so, on what terms?

Mr. Lloyd George: The answer is in the negative.

## CATALOGUES REQUIRED FOR EGYPT.

A new Department has recently been formed by the Egyptian Government for the purpose of promoting Egyptian trade and industry. One of the main objects of this Department is to keep a complete set of catalogues of trades and manufactures of all kinds for the benefit of the Egyptian traders and public. The Department of Overseas Trade has received a request from this Department, through His Majesty's Commercial Agent at Cairo, to invite British firms to send copies of their catalogues for this purpose. Any United Kingdom firms interested in the proposal should address communications to The Controller, Egyptian Bureau of Commerce and Industry, Ministry of Finance, 12, Sharia el Fahmy, Babel Luq, Cairo.

Copies of the fares and freight rates on the Palestine Railway may be consulted at the Shipping and Transport Section of the Department of Overseas Trade, 73, Basinghall Street, London, E.C.2.

Indian Treasury bills outstanding on March 31, were: Rs52,96,60,000; issued from April 1 to November 6, Rs.91,15,60,000; total, Rs1,44,12,20,000. Discharged from April 1 to November 6, Rs45,29,60,000; outstanding on November 6. Rs98,82,60,000.

British Overseas Bank.—Transfer books of "A" Ordinary shares will be closed from November 22 to December 4.

## TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned :—

**Egypt.**

Iron or Mild Steel Bars.—The Egyptian War Department invite tenders for iron or mild steel bars. November 24.

Pump Foundations and Power House.—The Inspector of Projects, Western Delta Division, Alexandria, invites tenders for the supply of pump foundations and power house for new Aboukir pumping station. November 30.

**Greece.**

Argentiferous barytes concessions in the island of Melos.—The Direction of Mines of the Ministry of National Economy at Athens invites tenders for the above concessions, which belong to the Greek State, and are estimated to contain 10 million tons of argentiferous barytes, with a maximum quantity of silver per ton of ore estimated at 2,140 grams and an average quantity of 164 grams. There are experienced miners on the spot, and there is a very good harbour; but there is a scarcity of fuel and spring water in the island. The terms of tender may be seen on application at the Department of Overseas Trade, 35, Old Queen Street, S.W.1.

**Bulgaria.**

Driving Belts. Length of Railway Track.—In connection with the projected erection of large flour mills at Bourgas, Bulgaria, certain supplementary material, such as driving belts for power transmission, and a length of railway track with necessary sleepers, will probably be required. Offers in this connection should be made to the Credit Central, 6, Rue Francois Ier Paris, which company is stated to be dealing with the requirements of this scheme.

## NEW COMPANIES.

**Holmwoods and Back and Manson.**

Holmwoods and Back and Manson, Ltd., has been registered as a private company with a capital of £25,000 in £1 shares. Objects : To adopt agreement between Holmwood and Holmwood of the first part, H. C. Back, N. B. Manson, and J. F. Curningham (carrying on business as Back and Manson) of the second part, E. S. Holmwood and P. C. Y. Holmwood of the third part, and this company of the fourth part, insurance brokers, etc. Registered office : 37-41, Gracechurch Street, E.C.

**N. Jureidini.**

N. Jureidini, Ltd., has been registered as a private company with a capital of £100,000 in £1 shares. Objects : To take over the business of N. Jureidini, at 59, George Street, Manchester, traders between England, Syria, Egypt, or elsewhere, shipping merchants, dealers in cloth, silks, precious stones, soap, cutlery, and merchandise of all kinds. Subscribers (each with one share) : B. S. Brown, Wigan, cotton spinner; N. Jureidini, Didsbury, shipping merchant. Solicitor : T. Ellis, 18, King Street, Wigan.

**British Danubian Trading Corporation.**

The British Danubian Trading Corporation, Limited, has been registered with a nominal capital of £100,000 in £1 shares. Objects : To enter into an agreement with the British and Hungarian Bank, Limited, to open up and promote commercial relationship between the United Kingdom and Hungary, Austria, Russia, Roumania, Czecho-Slovakia, Jugoslavia, Turkey, Bulgaria, Poland, or other countries, to carry on business as bankers, financiers, concessionaires, merchants, prospectors, etc. The first directors are :—Godfrey C. Isaacs, Marconi House, W.C. ; Lieut.-Colonel Adrian Simpson, C.M.G., 77, Ashley Gardens, S.W. ; Major Stephen Alley, M.C., 26, Hans Crescent, S.W. ; Simon de Krauz, Vice-President British and Hungarian Bank, Budapest ; Alexander Fleissig, general manager of same bank. So long as Marconi's Wireless Telegraph Co., Ltd., hold at least 25,000 shares, they may have three nominees on the board, and one of such nominees shall be chairman. So long as the British and Hungarian Bank, Limited, hold at least 25,000 shares they may have two nominees on the board. Solicitors : Steadman, Van Praagh and Gaylor, 4, Old Burlington Street, W. Registered office, Marconi House, Strand, W.C.

## ON 'CHANGE.

### Markets Subdued.

(From Our Own Correspondent.)

Throgmorton Street, Monday Night.

The present position may be characterised by the one word uncertainty, and until the outlook in general is more settled it would seem hopeless to look for any great improvement. During the past week the foreign exchanges have been one of the chief factors in depressing the markets ; another is the knowledge that the Government will shortly have to find £50,000,000 by way of interest on loans, and that will presumably entail a further recourse to the Bank. That brings within view the prospect that, dear as money is now, it may be dearer still in a few months' time.

The markets have closed to-night on a very dull note, particularly foreign bonds, which weakened considerably on the news from the Crimea. The report of the result of the Greek elections has also provided a disturbing influence. Government stocks, however, remained fairly steady with the exception of National War Bonds.

There are few fresh developments in other markets. Industrials as a whole continue to droop on the adverse trade position ; and there are several shares in this section that look cheap at present levels. Oils have weakened on realisations, in which the Continent appeared to take a leading part. Rubber shares continue their downward course, but, despite the fall that has already taken place, many of the shares look overvalued on the present outlook. Of course, the buyer who is prepared to wait for three or more years would probably find them cheap at the present levels. But those who care to do that are naturally few and far between.

Turning to Near Eastern securities, Turkish Guaranteed 4 per Cent. are half a point up at 68½, while Turkish 3½ per Cent. Egyptian Tribute Bonds have risen to 53, at which they are 1⅝ up. Greek securities have been depressed. The 5 per Cent. 1881 Loan has dropped two points to 50, while the 5 per Cent. 1890 Loan is slightly lower at 49¾.

Banks have eased off a little in some cases. Agricultural 3½ per Cent. Bonds are ⅜ lower at 57⅝, but the 3½ per Cent. Guaranteed Bonds are unchanged at 60. National Bank of Egypt close at 17⅛, a decline of 1/16.

Lands are rather firmer. Delta Lands are 6d. up at 12s. 6d., while Egyptian and Foreign Trusts have firmed up 1s. to 13s. 9d. New Egyptians are unchanged at 25, as are Sudan Plantations at 5.

Among Miscellaneous descriptions Abyssinian Corporations have shed 6d. at 4s. 6d., and Morums are 3d. down at 15s. 9d.

Oils are rather better, Anglo-Egyptians being ⅛ up at 68s. 9d. Roumanian Consolidated are unchanged at 21s.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |

## COMPANY NOTES AND REPORTS.

### Bengal-Nagpur Railway.

The report of the Bengal-Nagpur Railway Company for the year ended March 31 shows gross earnings of Rs.6,57,56,972, an increase of Rs.36,70,194, while working expenses were Rs.3,84,96,350, an increase of Rs.77,26,852, leaving net earnings Rs.2,72,60,622, a decrease of Rs.40,56,658, or nearly 13 per cent. Passenger traffic increased by 2,489,162, and the amount received was more by Rs.27,85,362. Goods traffic shows an increase of 337,033 tons, and the freight received for it shows an increase of Rs.11,38,930. The proportion of working expenses to gross receipts was 58.54 per cent., compared with 47.95 per cent. in the previous year. The company's share of the surplus profits amounted to Rs.13,03,953, which produced £136,149. The directors recommend a further dividend of ¾ per cent. and a bonus of 1½ per cent. for the year, both less tax at 4s. 9d. in the £. With these payments the whole return for the year on each £100 stock will be 8 per cent., less tax. After providing for income-tax, for adding a further sum of £8,000 to depreciation of investment account, making the total of that account £25,000, and for the annual contribution to the compassionate grant fund, the balance at credit of the surplus profits account at the end of 1920 will be about £226,000, as against £222,527 for the previous year. Meeting, Gresham House, E.C., to-day, noon.

### Oriental Gas.

The report of the Oriental Gas Company for the year ended June 30 states that the gas rental is higher by £10,360 than that of the preceding year, while expenditure on coals, purification, and wages shows an increase of only half that amount. The amount yielded by the sale of residual products is higher by £3,517. During the year the exchange value of the rupee yielded a profit of £26,428. In result the balance of revenue account carried to the credit of profit and loss, after allocating £10,000 to the renewals suspense account, is £29,090. Expenditure on capital account has been reduced by £20,886. The directors recommend a dividend at the rate of 4½ per cent., less tax, making 8 per cent., less tax, for the year.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated November 8:—During the week ending October 30 light rain fell in parts of North-Eastern India and moderate to good in South-Eastern India. More rain needed in the Punjab, North-West Frontier Province, Rajputana, the Central Provinces, and in parts of Central India, Bombay, United Provinces of Agra and Oudh, and Bihar and Orissa. During the week ending November 6 widespread rain has fallen south of Peninsula, and local rain in Lower Burma. Hesla-Manharpur (*i.e.*, extension to coalfields) detailed broad gauge railway survey (170 miles) by Bengal-Nagpur Railway Company sanctioned. Bombay cotton market deadlock unchanged; bazaar determined not to do business under control of cotton contracts board. Fine M G Oomra number 3, spot rate Rs. 290. Calcutta jute market very steady, though business limited. Hessians dull, with no demand, and prices falling. Bank rate is 6 per cent. in Bengal, Bombay, and Madras.

Land Bank of Egypt.—The annual general meeting will be held at Alexandria on December 7.

Banque Franco-Serbe.—The London address has been removed to more commodious premises at 30, Coleman Street, E.C.2.

The directors of the Bank of British West Africa announce an interim dividend to September 30, 1920, of 4 per cent., less tax, payable December 1.

Assam-Bengal Railway.—The accounts for the year ended March 31 show that the gross receipts amounted to Rs.1,12,60,772 and the working expenses to Rs.88,71,377, the ratio of working expenses to receipts being 78.78, as compared with a ratio of 76.24 in the previous year. The usual half-yearly dividends of 3 per cent. have been paid.

## SHIPPING INTELLIGENCE.

### Forthcoming Sailings.

Anchor Line s.s. Circassia, for Bombay, will close for cargo at Glasgow on December 4, and at Liverpool on December 11.

Anchor Line s.s. Elysia, for Bombay, will close for cargo at Glasgow on November 23, and at Liverpool on December 1.

Cunard Line.—A steamer for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina, will close for cargo at Liverpool on December 18.

Ellerman Line s.s. Serbino, for Gibraltar, Malta and Alexandria, will close for cargo at Liverpool on November 20.

Ellerman's City Line s.s. City of Lahore, for Bombay and Karachi, will close for cargo at Birkenhead on November 26.

Byron Steamship Co.'s s.s. Lord Harrington, for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna and Constantza, will close for cargo at Liverpool on November 27.

Byron Steamship Co.'s s.s. Maid of Athens, for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna and Constantza, will close for cargo at Liverpool on December 7.

Moss Line s.s. Limoges, for Casablanca, Gibraltar, Algiers, Cyprus, and Beyrout, will close for cargo at Liverpool on November 25.

Papayanni Line s.s. Malatian, for Malta and Alexandria (also taking cargo for Beyrout, Alexandretta, Jaffa, Haifa, Cyprus), will close for cargo at Liverpool on December 4.

Power Line s.s. Pangbourne, for Morocco (taking cargo for Tangier, Larache, Rabat, Casablanca, and Mogador), will close for cargo in London about the end of this month.

Anchor-Brocklebank Line s.s. Malancha, for Calcutta, will close for cargo at Birkenhead on November 27.

Anchor-Brocklebank Line s.s. Mahanada, for Port Said, Colombo, Madras, and Calcutta (also loading at Hamburg, Rotterdam, and Antwerp), will close for cargo at Middlesborough on November 27, and London on December 9.

Cunard Line s.s. Tyria, for Gibraltar, will close for cargo at Liverpool on December 2.

Ellerman Line s.s. Trentino, for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople, will close for cargo at Liverpool on November 27.

Ellerman's City Line s.s. City of Cairo, for Colombo and Calcutta, will close for cargo at Liverpool on December 6.

Ellerman's City Line s.s. City of Karachi, for Bombay and Karachi, will close for cargo at Liverpool on December 21.

Ellerman's City Line s.s. City of Manchester, for Calcutta, will close for cargo at Liverpool on December 22.

Bibby Line s.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon, will close for cargo at Birkenhead on December 1.

The s.s. Mobile (formerly the Hamburg-American intermediate liner Cleveland) has been acquired by the Byron Steamship Co. from the Government. It is intended to run her in conjunction with the National Line Service between Greece and the United States. The vessel has a gross tonnage of nearly 17,000 tons, and a speed of 15 knots per hour.

Moss Line s.s. Amasis, for Gibraltar, Algiers, Malta, and Alexandria, accepting cargo for transhipment to Moroccan, Algerian, Cyprus, and Syrian coast ports, will close for cargo at Liverpool on November 27.

Moss Line s.s. Karnak, for Piræus, Syra, Smyrna, Volo, Salonika, and Constantinople, will close for cargo at Liverpool on December 23.

Papayanni Line s.s. Maronian, for Algiers, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople, will close for cargo at Liverpool on December 11.

## NOTES OF THE WEEK.

### *The Changes in Greece.*

The situation in Greece in its international aspect is discussed elsewhere in this issue. Here it is only necessary to refer briefly to the course of events in Athens. On November 17 M. Venizelos formally resigned and left the country for France. M. Rallis undertook to form a Cabinet, and shortly afterwards Admiral Condouriotis resigned the Regency, and the Queen Mother Olga became Regent. In view of the efforts that are being made to commit Great Britain to an extreme policy towards Greece, it is of interest to note that M. Venizelos, in the message that he issued before his departure, warned his own followers against an intransigent attitude. He counselled them to subordinate the interests of party to the interests of the State, and added that he was convinced that they would submit without bitterness to the popular decision. The British and French Governments have been so badly informed regarding the real position in Greece, that they may well pause to find out whether their reading of events four years ago was accurate in every respect. Practically every one of the Allied actors in the Greek drama of those days—soldiers, sailors, and diplomatists—has passed into the wilderness of official displeasure, and it would be illogical on the part of the two Governments to hold now that their judgment, on which they had perforce to act then, was of necessity infallible.

### *Great Britain and Cyprus.*

The Cyprus Deputation will not have enhanced its reputation by the message that it has sent to the British public as "a parting shot" from Marseilles. The delegates state that they are "exceedingly disappointed at this grossly unjust decision of the British Government" not to contemplate any change in the political status of Cyprus, and announce their intention to continue their struggle for union with Greece. Great Britain has not had much cause in the past to find fault with the methods of the Cypriot "Unionists," and it is to be hoped in the interests of the island that this threat does not presage different measures. Possibly when the delegates reach Cyprus and learn what has happened in Greece, and find time to reflect upon the attitude of the Moslem world towards the concessions already made to Greece at the expense of Turkey, they will decide in their own minds (for they are all highly intelligent men), even if they do not admit it, that the British Government could adopt no other course. It is evident that the surrender of Cyprus at this juncture would gravely prejudice British interests in the Near and Middle East. The Cypriot "Unionists" will be well advised if, instead of an unintelligent reiteration of their request for union, they study the international situation with a view to discovering, or possibly helping to create, a set of circumstances that would justify the gift of the island to Greece without affecting the British position in the Eastern Mediterranean or exciting Moslem misgivings.

### *Fresh Fighting in Armenia.*

The truce between the Armenians and the Turkish Nationalists was of very brief duration. On November 11—according to a message sent off on that date by the Armenian Minister for Foreign Affairs, but only received in London on November 19—the Turks suddenly put forward fresh conditions. In addition to asking that the entire Treaty of Batoum should be put into force, they demanded that quantities of war material and numbers of locomotives and wagons should be handed over to them. This was too much for the Armenian Government, who renewed the struggle, with a determination to continue it to the end. As far as it is possible to make out from the confused and somewhat contradictory reports available at present, they concentrated their forces between Alexandropol and Erivan, and, striking swiftly, reoccupied the former city, compelling the Turkish army to retreat towards Kars. On the other hand, a telegram received in Geneva states that Erivan, the capital, has been lost to the Kemalists. Taking all things into account, the former report is more likely to be correct than the latter; though, of course, both may be true.

### *Armenia in the Commons.*

In the House of Commons last week the Under-Secretary for Foreign Affairs announced that direct territorial communication appeared to have been established between Bolshevist Azerbaijan and Anatolia, but (he added) the railway passes via Tiflis, and does not in any case extend into Anatolia. Since then we have been informed that the Turkish Nationalists have demanded the free use of the Georgian railways, and that Georgia is prepared to grant it, if the Turks do not insist on the cession of territory for which they had asked at the same time. It is particularly unfortunate that at this critical time the Georgian Cabinet should be in danger of breaking up, as a result of charges of corrupt practice being brought against one of its members. These things minimise any feeling of confidence that may have been inspired by Mr. Cecil Harmsworth's statement quoted above; and though he assured the House at the same

Digitized by Google

time that "any ultimate menace to British interests in the East from co-operation between Nationalist Turks and Russian Bolshevists will be met if and when it arrives," we are not put entirely at ease by that confident statement. The co-operation between the Nationalist Turks and the Russian Bolshevists has already brought about results not at all pleasing to the Entente, and we must confess that so far we have seen very little evidence of preparations for meeting the menace, near or distant.

### *Russians at Constantinople.*

The defeat of General Wrangel and the evacuation of the Crimea have resulted in the influx into Constantinople of close upon 100,000 refugees. The plight of these poor people must be pitiable indeed. British, French, and Americans are doing their best, officially and unofficially, to help them; but the problem of providing for them is a huge one; and the crowded state of Constantinople, and the unsettled conditions in that city, will intensify its difficulties. Unpleasant stories are current of earlier refugees from Russia accepting charity which subsequent events showed that they might well have refused; but in this case the chances are that most of the refugees will have had to depart so hurriedly that they will, in fact, need all the help that can be given them. A conference, held in Paris on November 19, decided that it would be advisable to distribute the refugees as far as possible among various centres in Serbia, Bulgaria, and Greece. The measure would probably be a wise one, for many reasons. Meanwhile, it is understood that part of General Wrangel's gallant force will be stationed at Gallipoli and at Lemnos, and that they hope shortly to renew the struggle against the Bolshevists.

### *Lord Curzon on Persia.*

As was expected, the House of Lords, on Wednesday of last week, discussed the situation in Persia—or, rather, a few peers asked for information and expressed opinions on certain points of Persian policy, and Lord Curzon then made a statement of some length. Unfortunately he held out little hope of any withdrawal of the limited kind that we should like to see. According to the view advanced by him in a very able speech, the present situation has been brought about entirely by conditions that arose in the war, and we are retaining our small force in North-Western Persia as a protection against the further spread of Bolshevism. But he also made it clear that the retention of General Ironside's force was rendered necessary very largely by the collapse of the Persian Cossacks and the lack of trustworthiness —to put it mildly—of their Russian officers. Indeed, Lord Curzon said bluntly that the Russian commanding officer had been "engaged in a violently anti-British propaganda in Persia, and was more than suspected of extensive peculations at the cost of the Persian Government." These things will come as no surprise to many people; and they undoubtedly go far to explain the policy hitherto pursued by our own Government in this region; but whether they will satisfy its critics is not so certain.

### *The Agreement and the Megliss.*

In any case it is obvious that such a policy cannot be continued indefinitely; for, friendly though the British people feel towards Persia, they cannot be expected to go on much longer paying the piper unless they may have some voice in calling the tune. In other words, if the Anglo-Persian Agreement is formally approved by the Persian nation and ratified by the Megliss, Persia may reasonably expect help from us; but if the Persians will not have the Agreement—as we are told in many quarters is the case—they cannot expect us to help them further. As Lord Curzon put it, there must be a two-sided and not a one-sided obligation, and if Persia is unwilling or unable to play her part, we cannot out of mere altruism indefinitely continue ourselves, and she must be left to take her own course. Lord Curzon regards the Agreement as the sole possible guarantee for the continued stability of Persia; and upon the whole we are inclined to share his view; but we find it less difficult than he professed to be to "imagine any Persian Government or Parliament or group of men acquiescing in any other solution." The matter is apparently to be put to the test ere long. The British Government has informed the Government of the Shah that it is tired of delays, and that it expects the Megliss to be summoned and the Agreement submitted to it before the commencement of the New Year. It is for Persia, he concluded, to decide on her own destiny. For her own sake, we sincerely hope she will not allow any irritation over details to influence her decision.

### *Indian Politics.*

The past week has yielded fairly definite indications that India as a whole is reacting against the excesses of the Extremist campaign to wreck the new constitution at the outset. From one centre we hear of stalwarts weakening, and proposing that the plan of campaign should be reconsidered. From others come reports that men whose attitude has hitherto been doubtful are coming off the fence on the constitutional side. Large bodies of parents have been forced to think seriously by the aberrations of their undergraduate sons, and have condemned in unmistakable terms the agitators who are responsible; and some of the leading agitators themselves are courting a mild martyrdom at the hands of the administration they have attacked. It is still doubtful whether they will succeed in this latest attempt; for, as we indicated last week, the authorities have good grounds for their policy of restraint, and the most substantial argument we have heard against that policy is that it is unfair to the new popular Ministers to start them on their career under the threat of unconstitutional opposition. There is some force in the contention that the old bureaucracy should take the responsibility of clearing the course, and they would probably be right to do so if they had at their disposal the time-honoured Indian methods, which, barbarous as they were, had at least the merit of putting opponents permanently out of action. Seeing, however, that such methods are barred by English humanitarian sentiment, and that the modern substitutes of internment or imprisonment in comfortable conditions have been shown by experience to be ineffective, it will certainly be better if recourse to them can be avoided, or at the least delayed, until the discredit of the agitators is complete.

### *The Labour Question.*

No signs of improvement are yet visible in the other outstanding Indian problem of the moment, the attainment of a reasonable degree of tranquillity in the industrial world. Strike follows strike almost all over the country, and the very ease with which settlements have been reached in some cases shows that the dislocation of industry was absolutely unjustifiable. Probably there are some grounds for the allegation that the workers are being exploited by political agitators, and we notice that at the meeting of the Indian Railway Conference held last month the chairman declared definitely that the railway strikes were generally the work of outsiders who had something to gain by fomenting strife; but such outside interference will not suffice to account for the whole trouble, the facts being that general dissatisfaction prevails, and that agitators are quick to take advantage of it. For ourselves, we do not think employers are justified in refusing to negotiate with disinterested advocates of the workers' interests; there are a few such men, and their efforts have often made for peace, but in the heat of conflict it is sometimes not easy to distinguish well-meaning but excitable philanthropists from plausible fomenters of discord, and the true solution lies in bringing masters and men so closely together that no room may be left for interference from outside. We are glad to see that this policy has now been adopted formally by the Board of Industries, whose chairman, Sir Thomas Holland, insisted before the Railway Conference on the need for establishing closer personal relations, and urged the institution of committees on the lines of the now familiar Whitley Councils. Public opinion in India appears to be crystallising in favour of such a policy, and in this respect the last year or so has marked a definite advance; what is wanted now is vigorous activity on the part of the railway managers and other large employers.

# THE WEEK AT HOME.

LONDON, Monday evening.

**Food and Health.**

The House of Commons concerned itself last week with agriculture and health. The Government has laid down the principle that we must grow more food at home—which meets with the approval of everybody except those few fanatics who see in this the preparation for another war—and, consequently, it intends to see that landowners cultivate their land properly. It has always been perfectly obvious that the country could produce a great deal more than it does, and the war woke us up in that respect. Lord Lee, who runs the Board of Agriculture, and is a very forcible person, intends that we shall not go to sleep again, and the farmer and landowner are being prodded into increased industry for their own and the common good. They are both suspicious and obstinate, and the House of Commons is always rather difficult when agriculture is forced on its attention; but the country as a whole approves, and the Bill is having an easier passage than was expected.

The House, however, revenged itself for its complaisance as regards food by mutilating the Health Bill. It is prepared reluctantly to admit that corn may be produced from the soil, but it utterly refuses to believe that the Ministry of Health can produce health, or anything but bureaucrats, whom it regards as parasites. (The growing jealousy between the paid politician and the paid official is an interesting sign of the times.) The House distrusts Dr. Addison, who is Minister for Health, both because he is an expert and because he is apologetic; the doctors distrust him because he wants a State medical service; and the public distrust him because he hints that they are a C3 lot, who can be vastly improved if only they will let him feel their pulse. So the bulk of his omnibus Bill was eviscerated, and we breathe again.

Meanwhile there is a move on foot for increasing the salaries of Cabinet Ministers. A few people have sneered, but at the depreciated value of money a heavily taxed £5,000 a year is not enough for a first-class man in a dangerous trade like politics, when business offers higher salaries and better security. It is rather a delicate matter for the Government to raise its own wages, but it will have to be done sooner or later.

**The Dublin Murders.**

A feeling of horror and detestation has passed over the whole country at the news that a band of armed assassins broke into hotels and private houses in Dublin on Sunday morning, and there murdered fourteen officers and ex-officers in cold blood and wounded many more. Assassination is the weapon not of policy but of revenge, and wholesale assassination can hardly be other than a confession of despair.

The world has so recently seen the doom of a political theory which ignores morality that it will not for one moment be deceived by the plea that the policy of Sinn Fein can be independent of the common ethics of civilisation; nor is it possible to condone an act so planned. A single murder may smirch the best of causes, but it will hardly ruin the worst, for fanatics cling to the skirts of every movement. But wholesale murder such as this gives evidence of settled plan and forethought; and unfortunately it comes at the very moment when there seemed some reason to believe that the Irish situation was improving. It would be difficult even for the optimist to retain that hope after the work of this dreadful Sunday.

But it is the peculiar tragedy of Ireland that it comes at such a moment; for it will tend to complete the alienation of her long-tried friends, and to convert the political isolation which Sinn Fein desires into a moral isolation, like that which surrounds a city of the plague. It seems almost as though there were some perverse and malicious fate brooding over this unhappy country, which mocks every intention of goodwill and turns desire to bitterness.

Not a week ago Nationalists and Ulstermen were both speaking of a truce of God; it may well prove too late for that. Those who appeal to terrorism in the name of freedom may not pay the price of crime themselves; but the people which suffers these things in its name pays a double penalty, for it both loses its hope and forfeits its self-respect.

**Mr. McKenna on Finance.**

Mr. McKenna, who is now chairman of the London Joint City and Midland Bank, in an address before Manchester University, challenged what is known as the quantity of money theory, on the ground that during the year ended last June prices rose about 27 per cent., while purchasing power has not risen in proportion. This unorthodoxy has led to a technical discussion among statisticians, in which the ordinary person soon gets lost; the average man is more interested in Mr. McKenna's point that there is a close connection between prices and taxation, and his dictum that the world is now called to choose between solvency and disarmament. The huge expenditure on armaments, he declared, which is 20 per cent. of the world's total expenditure, is not merely exhausting the world, but actually destroying it. The margin between surplus and deficit is in nearly every case smaller than the defence bill. The speech appears to have made considerable impression.

**The Drapers on Bankers.**

What the bankers think about business is challenged, however, by what business thinks about the bankers, which is quite another story. The noticeable undercurrent of dissatisfaction at the policy of the banks in restricting credit came to the fore a few days ago, when a trade association of drapers put their case before the bankers. The drapers, like a good many other wholesalers and retailers, are loaded up with goods which the public will not buy at present prices, and naturally, as they do not want to sell at a loss, this means holding on to the goods, which means accommodation by the banks to meet overhead expenses. This the banks are altogether disinclined to do, as they are already committed to more loans than they care about, and although they have done their best to reduce existing overdrafts, the amount out at loan has increased rather than diminished in 1920, in spite of the 8 per cent. interest.

But their policy is slowly but surely operating to bring down prices, although the real fall is not likely to occur till next year, when some hopeful souls believe we shall get back to Armistice level. There is, of course, no prospect whatever of a return to pre-war rates; indeed, one writer on economics has recently attempted to show that the depreciation of money is continuous and permanent after every great war. That is not to say, however, that the present inflated levels can last; and a newspaper was arguing two or three days ago that the day of deliverance for the consumer is already at hand, founding its contention on the fact that the price of a steak-and-kidney pie in a London teashop has been reduced from 11d. to 10d. I confess that a penny off a meat pudding strikes me as not very substantial ground for a general conclusion about prices; a point of more importance in reducing the cost of living is the knowledge that the foreign exchanges are gradually moving nearer to parity, while the British debt to the United States is steadily being paid off.

When that transaction is completed the Treasury will be a good deal easier in its mind; and it redounds much to Mr. Chamberlain's honour that, in spite of the natural clamour on the part of those whom the shoe has pinched rather tightly, he has adhered to his determination to pay off this very considerable sum. It has greatly increased British prestige abroad, and in years to come it will entitle Mr. Chamberlain to rank among the really great Chancellors of the Exchequer, among the Peels and the Gladstones. We may be poor, but we are almost offensively honest in these days.

**Dean Inge on Disaster.**

The Dean of St. Paul's has again been making our flesh creep. He declared at a meeting of the Eugenics Education Society that "nineteenth-century England was a going concern—twentieth-century England is a

Digitized by Google

gone concern"; he "does not see a crumb of comfort for his own class, and many of our best families will inevitably disappear from the earth; we are breeding from our worst stocks, and our best are being squeezed out of existence." The old definition of a pessimist is that of a man who lives with an optimist, and one remembers that the Bishop of London, who has close official relations with the Dean, is a pronounced optimist.

But worse remains behind. Dr. A. T. Schofield, an authority on mental diseases, has been addressing the Royal United Service Institution, and he declares that as a result of spiritualism he has come across cases of "the most terrible fate that could befall a human being—absolute possession by an unclean spirit"; he instanced "a patient on whom hardened asylum nurses declined to remain in attendance because of utterances which they regarded as coming straight from the pit of hell." Dean Inge, not to be outdone, at once delivered another lecture, in which he characterised the State as "an unintelligent demon" which some stupid people worshipped, but I gather that his demon is not Dr. Schofield's demon.

Almost on the same day that he proclaimed there was not a crumb of comfort for his own class, however, it was announced that Lady Diana Manners, who comes of a ducal house, was to become a cinema star. "The greatest of all film producers" declared that Lady Diana was "the greatest film artist in the world; she is so sensitive in the nostrils—that's where film genius shows." Whether the Dean will consider this a crumb of comfort is not yet known.

**The Jutland Controversy.**

For the past three years there has been a controversy among naval men and others as to the policy of the Battle of Jutland. Mr. Arthur Pollen, who has led the critics of Lord Jellicoe, has practically accused him of pusillanimity, and declared that "a knock-out blow" could have been achieved which would have shortened the war by two years; the best defence that I have seen was contributed lately by Admiral Bacon to *The Times*, where he declares that had it not been for Jellicoe's strategy the result might have been a defeat and not a victory for the British fleet, with disastrous consequences.

There is, of course, no question even among the critics that Jutland was a British victory; their contention is that it might have been decisive, like Trafalgar. The parallel seems unfortunate, since the Napoleonic War continued ten years after Trafalgar, and its darkest moments were precisely during those ten years. However that may be, the Government has now decided to publish papers, but it is suggested that these will not be of much use to the controversialists, since they will not include the secret instructions of the Admiralty. The fact is, that there is a fundamental difference between the two schools of critics, the one holding that everything should have been risked in order to obtain absolute victory, the other that the Grand Fleet, as the basis of the whole Alliance which won the war, should have been used cautiously and not unnecessarily risked for a problematical or even probable gain. It is not, of course, possible to argue the whole subject here—nor am I sufficiently acquainted with naval strategy to do so—but it seems clear that Lord Jellicoe and the Admiralty belonged to the conservative school, while those who criticise him would seem to stake all upon the hazard of the throw. It is a difficult question of politics and war, on which the disputants are capable of writing endless volumes, to the profit of the publishers and, one hopes rather than believes, the edification of the public.

**Current Literature.**

The most important book of the month is clearly General Ludendorff's "The General Staff and Its Problems" (Hutchinson). His account, which is heavily documented, makes it clear that the General Staff anticipated as early as 1910 a war in which Germany would be in conflict with England, France, and Russia; the decision to invade Belgium was already made by December, 1912. Ludendorff did not believe that the submarine war had any effect on American intervention; he seems to have drawn the rather dubious conclusion that America would have come in anyhow, and that it made little difference. The Americans in action, he said, "are certainly smart, but we have beaten them hitherto, even when we were very inferior in numbers. Our men are not anxious about the Americans. They are about the English." A more imaginative race would have realised that the Americans would soon have learnt from experience of European war.

"The Experiences of a Dug-Out" (Constable), by General Sir Charles Callwell, is notable for its frank criticisms, particularly of the "business men" in Government departments. "He makes himself master of some gigantic building or some sets of buildings. He then sets to work to people the premises with creatures of his own. He then, with the assistance of superior grades amongst the creatures, becomes wrapped up in devising employment for the multitudinous personnel. He talks in moments of relaxation of introducing business methods in Whitehall. But that is absurd. You could not introduce business methods into Whitehall, because there is not room enough; you would have to commandeer the whole of the West End, and then you would be cramped."

OCELLUS.

## EX-KING CONSTANTINE'S POLICY.

We have received from M. Streit, formerly Foreign Minister of Greece, and at present one of the most active members of ex-King Constantine's entourage, a cable, copies of which, we understand, have been sent to several papers. It is dated November 12, was despatched from Lucerne, and reads as follows:—

"I contest in every point all the assertions concerning King Constantine's policy contained in M. Venizelos' recent electoral speeches, by which he completely distorted the [facts regarding] Greek neutrality. Specially, having been Minister for Foreign Affairs in Greece till the first months of the War, I am able to deny formally the fact alleged now in these speeches that King Constantine before the War had undertaken any engagement which could prevent the freedom of foreign policy of our country. The Governments concerned know, from an official communication made to them after the Armistice, that at no moment during the War was any obligation assumed by King Constantine to fight by the side of the Central Powers, or imposing upon Greece a neutral attitude. No negotiations at all ever took place on such kind of [? regarding any such] obligation. As to internal policy, it is equally false that King Constantine has ever claimed divine right. The truth is that during the discussion concerning Greek participation in the Dardanelles expedition, when M. Venizelos told the King that he (Venizelos) would bear the juridical responsibility of this act, the King replied that he knew that according to the Constitution he was not responsible. But the King, as every other person, feels himself morally responsible towards God and his conscience. After the large publicity given to M. Venizelos' speeches, I expect that newspapers anxious to keep impartiality imposed upon them towards public opinion will not refuse to publish present declaration. Best thanks.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, November 8.

**The Political Situation.**

The news that a hitch had occurred in the negotiations between the Milner Mission and the Delegation came as a very great surprise to everyone in this country, and at the same time it appears to have created great disappointment among all elements, with the exception, of course, of the Opposition, who are by no means as numerous as those in favour of the agreement, and who are beside themselves with joy at the prospect of the Delegation failing. The causes of the hitch particularly have surprised most people, because as far as one can gather, except in certain isolated cases, there had been no intention of making reservations *quâ* reservations to the acceptance of the draft proposals.

At every meeting held by the four delegates who recently visited Egypt certain "desires" were expressed; and in signifying on each occasion their acceptance of the project those present at these meetings intimated that they wished the Delegation to put forward those desires and make every effort to get the British Government to accept them. There was no question of "reservations" at the time, and even if they had intended those desires to become reservations there was certainly no intention that the putting forward of those reservations should bring into question the acceptance of the project as a whole. There is no little indignation out here that Zaghloul Pasha should have made acceptance of the basis of agreement conditional on the British Government's agreeing to those reservations, and that he should have taken such a stand on the matter as to make a rupture imminent.

The question of the abolition of the Protectorate is, of course, a very important one, and the statement in Zaghloul Pasha's cable to the Cairo Committee that Lord Milner had categorically refused to entertain any idea of this has had a somewhat bad effect, for it is not understood how the existence of an alliance between Great Britain and Egypt can be compatible with the existence of a Protectorate over the country. The report of Lord Milner's attitude on the question has simply served to confirm in the minds of the Egyptians the main criticism made by the Opposition, that the proposed agreement is merely a confirmation of the Protectorate. All of us out here, of course, labour under the difficulty of having only telegraphic summaries or reports from interested quarters on which to base our comments; and, in fact, Egyptian opinion, such as it is, is similarly handicapped. We must, therefore, wait until the mail arrives with the full and authentic details, but in the meantime there is no doubt whatever that the prospect of a rupture, with the consequent possibility of a prolongation of negotiations, and the evidence, from the discussions in the House of Lords, that there is a strong opposition in England, have had a depressing effect on the people: for it is generally agreed that the present state of affairs has lasted only too long for the good of the country, and it has been a great relief to all to feel that the time was approaching when a term would be set to the inertia which has come into existence, and when everyone would be able to devote their energies to more remunerative objects than politics.

**Belated Arrivals.**

The long-expected s.s. Caledonia arrived last week at Alexandria with over 400 passengers, among them many Government officials who, owing to the delay in the departure of that steamer from England, had been forced to overstay their leave. Among the arrivals were Major-General Sir Lee and Lady Stack, Sir Paul and Lady Harvey, Sir Gilbert Clayton, and General Blakeney. Sir Paul Harvey, as previously announced, will not resume his duties as Financial Adviser, in which post Mr. Ernest Dowson, Under-Secretary of State for Finance, will continue to act: but he will take over the duties of Vice-Chairman of the Cadre Commission, the Chairman of which, Mohammed Shafik Pasha, has just resigned.

**The Cadre Commission.**

This Commission was appointed over a year ago for the purpose of elaborating a reclassification of the various grades of Government officials, in order to bring these grades and the salaries attaching to them more into line with present-day conditions and afford officials a clearer and more reasonable prospect of promotion. Pressure of work has, however, prevented the members from giving the proper amount of time to this question; and it was clear that if the great task confronting it was to be completed within the near future, the only course would be for at least a certain proportion of its members to devote whole-time to it. It was therefore decided to offer the Vice-Chairmanship to Sir Paul Harvey and to second one or two other officials from the Government service specially for work in connection with the Commission.

During the last month or so various articles have appeared in the local Press giving details of the decisions come to by the Cadre Commission, but these statements are entirely inaccurate. The fact is that various sub-committees have reported on the particular work entrusted to them, and it is these reports that have found their way into the local Press. The Commission has, however, by no means adopted, nor is it bound to adopt, the proposals contained in these reports. Indeed, it is understood that these reports will only now be studied for the first time by Sir Paul Harvey, and it is quite possible that material changes may be made in the recommendations referred to, especially as some of the Departments have not yet submitted their proposals for the reclassification of their own staff.

**Horticultural Show.**

The Horticultural Society of Egypt held its first show of the season in the Ezbekia Gardens on Friday last. On this occasion it was a chrysanthemum show, and considering the unusually high temperature and the fact that so many residents are not yet back, there can be no doubt of its success. Noteworthy among the new varieties was the "Princess of Wales," which was brought this year from England, and promises to do very well in this country. There was also a very satisfactory display of foreign fruits grown in the country by private effort and of fruits and vegetables preserved by a special process of the Horticultural Section of the Ministry of Agriculture. The society appears to be making considerable progress, judging by the increase in the number of subscribers, and the success of last Friday's venture augurs well for the fate awaiting the other shows to be held during the coming winter.

**Races at Ghezireh.**

The first race meeting at Ghezireh on Saturday last was as great a success as the meeting held the previous week at Heliopolis. There is a special fascination about the Island Club, the surroundings of which are reminiscent of English racecourses. Being on grass, it introduces an element of variety which adds to the interest of the racing, and, as was the case on Saturday, the races at Ghezireh are always one of the most popular fashionable fixtures. Considerable improvements have been made since last year: the members' enclosure has been enlarged, the paddock has been made much more comfortable, and in general the facilities are better. The day's racing was excellent, and went a long way to confirm the impression already made that there is an abundant amount of new blood which should henceforward provide excellent sport.

## YUGOSLAVIA.

BELGRADE, November 11.

**Winter Hardships.**

After a fortnight of cruel and bitter winds, worse than any in the memory of the oldest inhabitant, we are now having a spell of fine, dry sunny weather, with hard frosts at night. The trees are stripped, and an early and hard winter is anticipated, to make up, doubtless, for the

Digitized by Google

exceptional beneficence of last season. Meanwhile, to cheer us all up, prices are climbing, and rapidly, too. All commodities have risen within the past few weeks, owing chiefly to the energies of the Minister of Finance. Wood for fuel, which cost 80 dinars a metre last winter, is already 110, not delivered, so the outlook is not so very cheery in view of the hard winter anticipated.

**The Occupation of Tsaribrod.**

The formal occupation of Tsaribrod is now complete. At dawn on the 6th Serbian troops marched across the old frontier into the town; one contingent marched on to the new frontier, while the other remained in the town. At nine o'clock the first civilians arrived, including the Nachelnik, or Governor of the Province, to whom his Bulgarian colleague handed over the town. According to reports in the Serbian Press, the inhabitants were all out in the streets in their Sunday best, and the Nachelnik received the prominent natives. The whole affair passed off without incident. For some time previously the irreconcilable element had been migrating into Bulgaria. A newspaper states that the Serbian authorities received a telegram from the Acting Prime Minister of Bulgaria, M. Dimitrieff, protesting against the occupation of the territory on the grounds that it will perpetuate bad blood between Bulgaria and Serbia and prevent future friendship, and maintaining that the whole thing is in violation of Clause 29 of the Treaty of Neuilly.

Whatever the future of this district may be, although it has been Bulgarian since the Berlin Treaty, the population is more Bulgar than Serb only in that it has been so politically educated for these forty years. The boundary line between the two peoples is very ill-defined in this region, indeed as far east as Vidin, and very many of the inhabitants, especially the older men, preserve the memory of the *slava*, which is the pride and specific feature of the Serb, but anathema to the Bulgar.

**The Austrian Monitors.**

It is reported that the British, French, and Italian Ministers have presented a joint Note to M. Ninchitch, Acting Minister of Foreign Affairs, repeating the decision of the Allies to divide the Austrian monitors among the other Danubian States—that is, to cede three to Roumania and two to the International Danube Commission. M. Ninchitch is said to have answered that this Note can only be replied to by the Government when the Prime Minister and Dr. Trumbitch, the Minister of Foreign Affairs, return from Italy. But feeling is strong on the subject. The Serbs maintain that these monitors are war booty, taken by Serbian troops, and that there can be no question about their distribution. It is asserted, too, that they have the support of a binding resolution of General Franchet d'Esperey, who was Commander-in-Chief of the Allied Armies in the Balkans. Although it is realised that Italy is considered one of the Great Powers, there is a very natural resentment at her participation in such matters in view of her openly hostile attitude towards the Kingdom of the Serbs, Croats and Slovenes.

**The Policy of Dr. Koroshets.**

Dr. Koroshets, leader of the Slovene Clericals, has made a speech in which he has declared his policy. This is for a highly decentralised system, each province to have its own legislature as well as its own executive, with a central Parliament for what we might call Imperial affairs. He concludes that the wide autonomy will best meet the wishes of the people, while a federative system would weaken both the provinces and the entire State itself.

**Personal.**

H.R.H. the Crown Prince Regent has left his villa on the Topchider Hill and returned to Belgrade for the winter. As the new palace is not yet ready for occupation, King Peter is remaining in his villa at Topchider, and Princess Helena, with her children, is returning to Belgrade.

M. Cheradame, the well-known French publicist, has been visiting Belgrade, and has now proceeded to Zagreb.

The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

*Embodies the following advantages:—*

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

## ROUMANIA.

BUCHAREST, November 7.

**Franchise Bill.**

The Parliamentary Committee which is studying measures of electoral reform have now finished the preliminary work in connection with the Franchise Bill, which will be brought before Parliament at the next session. One of the chief points of this measure is that voters will be grouped according to special constituencies, which will consist of areas representing 250,000 votes, and will be quite independent of county boundaries. Hitherto members of Parliament have only been elected from whole county areas, which in the case of larger counties has, since the adoption of universal suffrage, resulted in giving the rural population a too great preponderance over the more educated townspeople in returning members. Under this new Bill every constituency will contain an equal number of votes—*i.e.*, 250,000, as above mentioned—who will return five members—that is, one for every 50,000 voters.

There is still a divergence of opinion as to how the franchise is to be exercised; whether the old system of each party having a list of candidates should be adopted, or whether candidates should be chosen individually. It has been left to Parliament to decide. In connection with the Franchise Bill it is further intended to give the Roumanian Senate more scope in governing than it has enjoyed hitherto, and also a more predominant character as compared with the Chamber. Senators will be elected by two categories of voters:—1. The ordinary electorate of the people, based on universal suffrage. 2. A special class, which will embrace the chief institutions of the State. The former class will be able to elect one senator for each constituency, making a total of seventy senators; while the second category will consist of Universities, Churches of all denominations, the High Courts of Justice, chambers of commerce, agricultural syndicates, banks with more than five millions capital, former Ministers and Under-Secretaries of State, etc.

**Bessarabian Treaty.**

When the agreement between the Great Powers definitely assigning Bessarabia to Roumania was signed great rejoicings took place throughout the country, especially in Chisinau, the capital of Bessarabia. The Prime Minister, General Averescu, was present, and the event was celebrated by a service in the cathedral at Chisinau, followed by a banquet. The local Press praised M. Také Jonescu and M. Vaida-Voevod as being the two principal figures in bringing about the Treaty. The part taken by M. Vaida-Voevod was the beginning of negotiations with the Powers, while the work was completed by M. Také Jonescu.

**M. Take Jonescu.**

After an absence of two months, during which time he visited most of the Entente capitals, M Také Jonescu, the Foreign Minister, has returned to Bucharest, accompanied by Mme. Jonescu. He was welcomed and loudly cheered at the station by an enthusiastic crowd. M. C. Argetianu, the Minister of the Interior; M. Gracianu, the Minister of Public Works; the Under-Secretaries for Foreign Affairs and Finance and other State officials, as well as members of the Democratic party, were present at the reception. M. Také Jonescu, after acknowledging his welcome, went to his house in Strada Atenei, which has been completely restored after being destroyed by the Germans during the occupation.

**Queen Marie's Journey.**

Last Sunday the Queen, accompanied by Prince Carol and Princess Marie, left by the Simplon for Switzerland to visit the grave of her mother.

**Discovery of Radium.**

From Transylvania it is reported that in the district of Arad radium has been discovered similar to that found in Czecho-Slovakia.

**A Railway Accident.**

On the night of November 2 an accident happened to the Simplon express. The line some thirteen kilometres from Bucharest was mined, and when the Simplon passed the spot an explosion took place, which destroyed the line for forty metres. Fortunately the train managed to cross in time, and only the last wagon suffered any damage. This was the Ministerial wagon, and was carrying the Minister of the Interior, M. Argetoianu. Nobody was seriously hurt, but one person sustained bruises owing to the sudden stop of the train. The incident is thought to be a deliberate attempt on the life of the Minister of the Interior, who was the chief opponent of the strikers during the recent general strike.

## BULGARIA.

SOFIA, November 14.

**The Outlook: Official View.**

On November 9 the Minister of Commerce, Dr. Raico Daskaloff, on behalf of the Cabinet, made a statement to the representatives of the Press. It was known, he said, that in accordance with the Treaty of Peace the army and the cadre of officers must be reduced. The Government has given many proofs to the victorious Powers that it is making every effort to fulfil loyally all the engagements of the Treaty; and faithful to this principle, in voting the clauses of the present Budget, it decided to exercise the clauses of the Treaty relating to the military forces. By a vote of the Chamber at the second reading the allotment for the Army was made the minimum prescribed by the Treaty. As a result an appreciable portion of the cadre of officers must be detached from the Army. To give employment to the officers dismissed, the Minister went on to say, the Cabinet had authorised the Ministry of Public Instruction to establish in Sofia a special eight months' course of instruction for teachers. Thus the officers will be equipped as teachers for the elementary (or progymnasial) schools.

The taxation imposed on general revenues is not well understood, but it is most equitable, and will eventually be appreciated. It does not touch the small farmers, but those of the middle class will have to pay from 250 to 300 levas annually. The Government's policy on taxation is the gradual exchange of the unjust indirect taxation with progressive revenue tax (income tax).

The obligatory labour has been applied successfully in mending the roads, the construction of fountains, the building of schools, and so forth. At many places the people have asked for an extension of the compulsory labour service.

For the amelioration of the hard lot of the State official the Government has decided to ask the Chamber to grant a credit of 50,000 levas, which will be utilised for the increase of salaries during the current six months of he financial year.

**The Entente and Tsaribrod.**

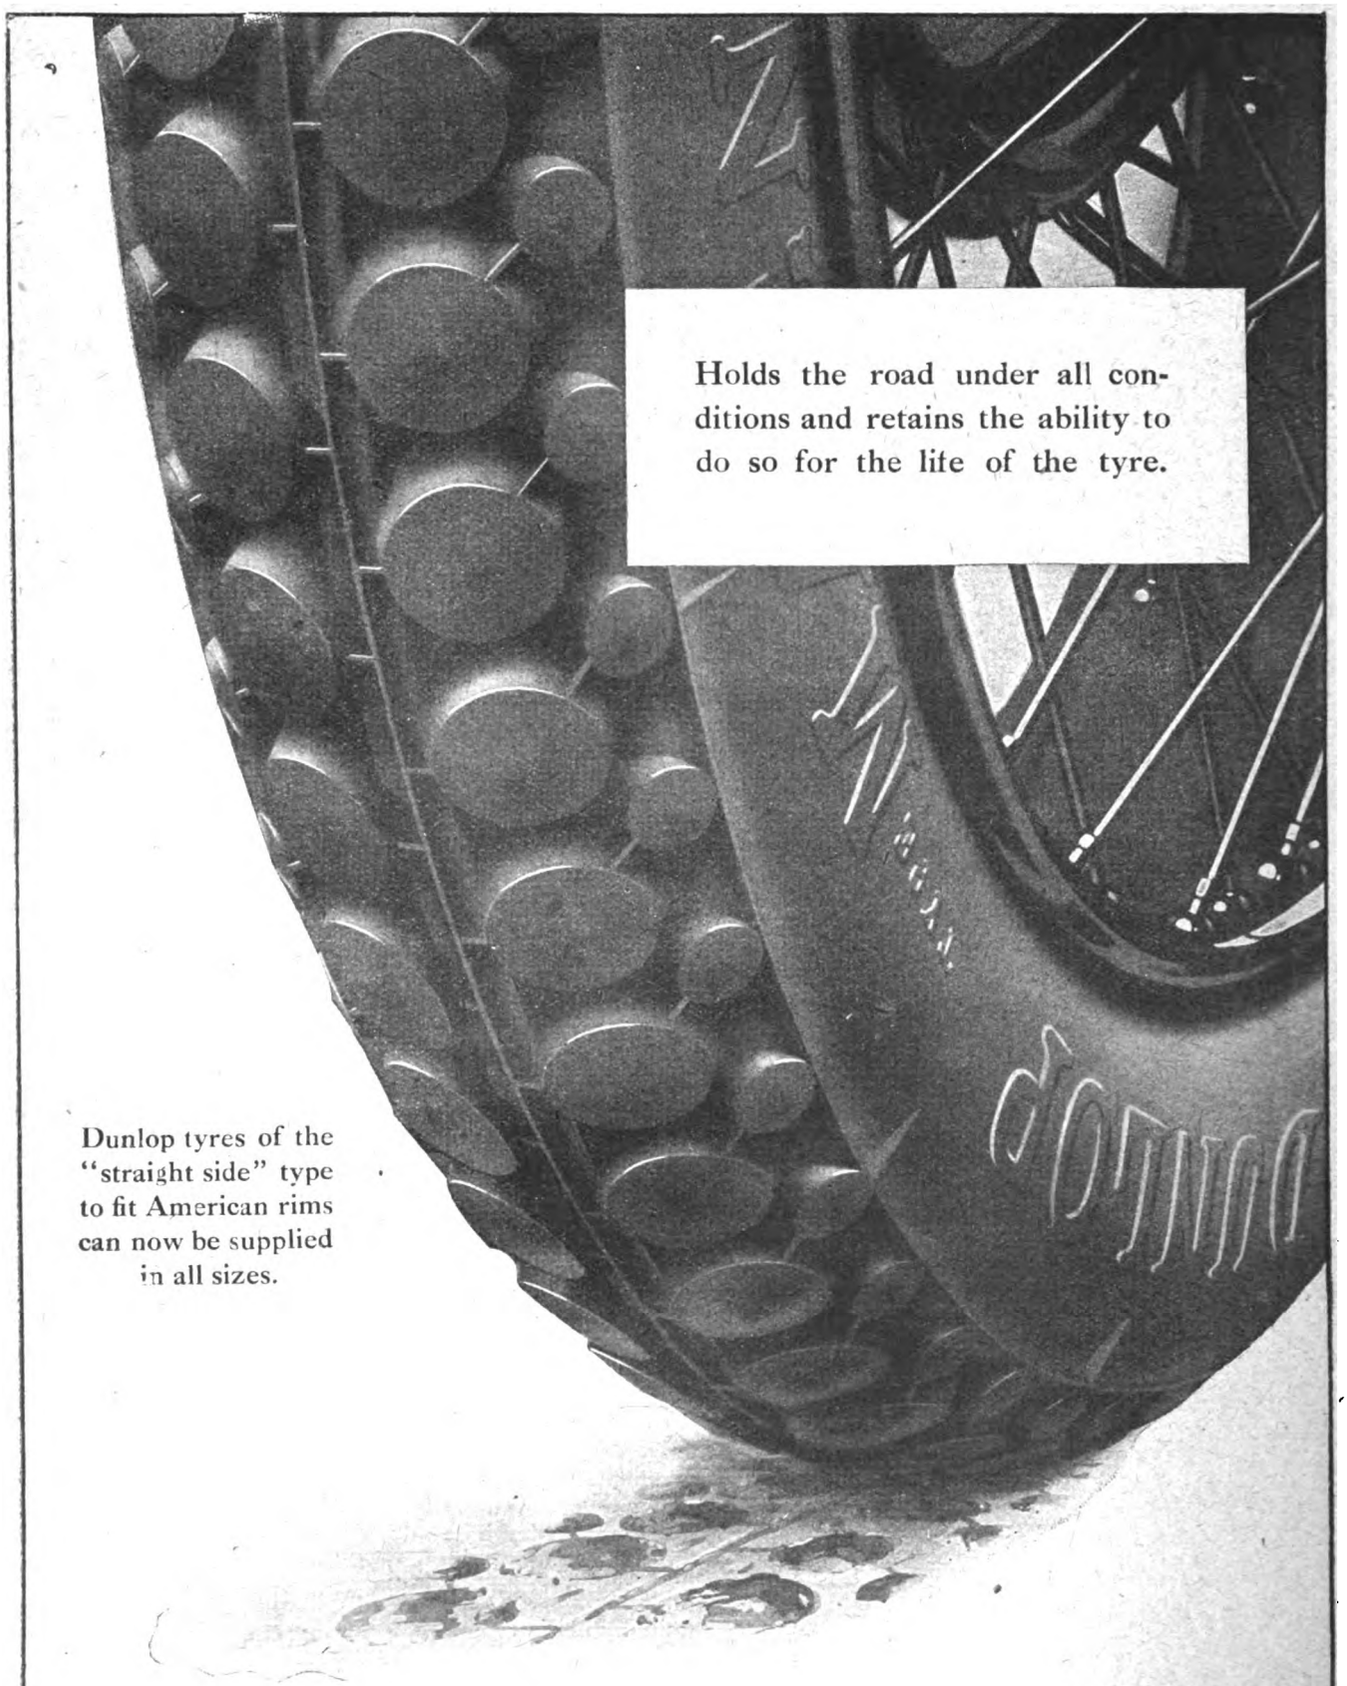
On November 9 the diplomatic representatives of Great Britain, France, and Italy called at the Ministry for Foreign Affairs and announced, on behalf of their respective Governments, the decisions reached by the Conference of Ambassadors regarding the occupation of territories to be ceded under the Peace Treaty. The Ambassadors have decided that the Delimitation Commission may allow the interested parties to take possession of the territories allotted to them under the Treaty *pari passu* with the demarcation by the Commission; and that without the written authorisation of the Commission no occupation can take place. This decision has been communicated also to the Belgrade Government, which, in spite of the communication of the Delimitation Commission and of the protest of the Bulgarian Government, and without waiting for the decision of the Ambassadors' Conference, wished to create a *fait accompli* by sending troops to occupy territory around Tsaribrod and Basilograd, which though added to Yugoslavia by the Treaty has not yet been demarcated.

The British delegate to the Delimitation Commission, Colonel Gill, arrived here yesterday. The work of the Commission has been suspended owing to the premature occupation of disputed points by the Yugoslavs. The Commission has drafted a report to the Ambassadors' Conference at Paris, and will await their decision before continuing its work.

**Postal Matters.**

The Budget Commission has decided to increase postal and telegraphic charges as follows:— Postcards. 30 stotinki; letters, 50 stotinki; and telegrams with

Digitized by Google



Holds the road under all conditions and retains the ability to do so for the life of the tyre.

the kingdom, 30 stotinki per word. In paying for telegrams abroad the rate is calculated at 1,320 levas, equivalent to 100 frs.

The Direction of Posts and Telegraphs announces that postal parcels and correspondence for Tsaribrod, Basilograd, and other places occupied by Yugoslav troops can no longer be accepted.

**A New Census.**

The Government has decided that a new census of the whole kingdom shall be taken at the end of this year. Officials are to be sent out by the Direction General of Statistics to each prefecture to supervise the work.

**Collision on the Danube.**

In the early morning of November 10 the s.s. Boris, of the Bulgarian Navigation Company of the Danube, while crossing from Vidin to Lom, carrying passengers and goods, came into collision with the Roumanian s.s. Bratiano. The force of the collision was very great, and the Bulgarian boat sank. Fifteen women and children among the passengers were drowned.

## GREECE.

ATHENS, November 6.

**King Alexander's Funeral.**

King Alexander's body was embalmed shortly after his death, and two days later it was brought to Athens and placed in the Cathedral. As the funeral was not taking place until Friday afternoon thousands of people were able to see their young Sovereign for the last time. During Thursday and Friday morning the best florists in Athens were busily engaged in decorating the interior of the Cathedral with the flowers which had been sent in memory of the dead king. It is estimated that over 500 wreaths of roses, chrysanthemums, and violets had been received up to Friday morning. A huge anchor, made of chrysanthemums and other flowers, with a small Union Jack attached to it, was placed near the coffin by Vice-Admiral Sir George Hope on behalf of the Commander-in-Chief, the Admirals, the officers, and the men of the British Navy. Another anchor was placed by Rear-Admiral Chetwode on behalf of the British Naval Mission to Greece.

At 12.30 on Friday the State officials and other important personages commenced arriving at the Cathedral. The Dowager Queen Olga, accompanied by her Chamberlain, arrived shortly before one o'clock, followed almost immediately by the late King's widow, Madame Aspasia Manos, and the burial service then commenced. The Archbishop of Athens officiated, assisted by several Bishops who had journeyed to the capital from various parts of the kingdom in order to attend the ceremony. At the conclusion of the service the coffin was carried by officers and evzones of the Royal Guard to a gun carriage and covered with the Greek colours, on which was placed the Royal Crown. The cortége then started from the Cathedral in the following order. In front were the wreaths of flowers sent by Royalties, by distinguished foreign personages, and by the Greek Government; then followed the Naval Cadets, the military bands, the Holy banners, the Archbishop of Athens with the Bishops, and five officers carrying on cushions the late King's decorations. Then came the King's remains, surrounded by his A.D.C.'s and drawn by fifty bluejackets, and immediately behind his horse: followed the Regent, Admiral Coundouriotis, the Regent Crown Prince Alexander of Yugoslavia, the Crown Prince of Sweden, the latter's uncle, Prince Eugene, and the Diplomatic Corps. Behind came two Royal carriages, with the Dowager Queen Olga in the first and Madame Aspasia Manos in the second. These were followed by the Council of Ministers, the ex-Prime Ministers, the deputies, the superior officers of the Army and Navy, and so forth. The cortége passing through Metropolitan Street, Amelia Boulevard, and University Avenue, turned into Patissia Street. When the Polytechnic College was reached the coffin was placed in a motor-car and conveyed to Tatoi, where King Alexander was buried by the side of his grandfather's grave.

**The Political Situation.**

The gloom cast over the country by the King's illness had almost made one forget that we were on the eve of the General Elections. All demonstrations, speeches, and meetings which are usually so much in evidence during the last two or three weeks preceding the elections had been cancelled. The elections themselves had to be postponed until November 14 owing to the King's death, which necessitated the return to Athens of the majority of the candidates for Parliament, then on tour in their respective constituencies. Now, however, with the great day approaching fast, the electoral campaign is in full swing again. Demonstrations of the Venizelists and Royalists are announced for next week, speeches are delivered and meetings held almost every day. M. Venizelos has already commenced touring the principal towns of Greece in order to explain to the people the importance of the elections. During the week he visited Patras, Syra, and Corinth, in which towns, according to the Venizelist Press, the reception met with exceeded all expectations. The Premier has returned to Athens to-day, and will leave again to-morrow for Volo and Salonika, only to be back on Wednesday in order to attend the big demonstration of the Liberals which will take place on that day.

The reproduction of the ex-King Constantine's photograph in one of the anti-Venizelist papers last Tuesday evening was largely responsible for a "scrap" between followers of the two rival parties outside the Ministry of the Interior. Several revolver shots were fired, causing a momentary panic in Stadium Street, which was at the time crowded with people. On arrival, however, of strong armed forces order was re-established, and the crowds were dispersed by a fire-engine which turned its hose pipe on the demonstrators. It was a bitterly cold night, and this sudden shower bath proved very effective. During the fight an ex-army captain was dangerously wounded by a revolver shot and died in hospital on the following day.

## CYPRUS.

CYPRUS (Undated).

**Advance of Education.**

While so much attention is being bestowed on scholastic matters in the island, the outlook for young men who have been students or taken degrees in law, medicine, etc., abroad, is not very promising. Advocates and medical men are now here in abundance, and there is fairly good practice for most of them; besides which, as already reported, there is now a call from Greece. Also, well-educated Cypriots hold positions in banks and mercantile houses, both in and outside the island. But the supply may become far more than the demand. Egypt is not so accessible as it was to Cypriot emigrants, and America still kindles visions as a happy hunting ground, in spite of all the warnings given. The last *Phone tés Kypron* publishes two typical letters from two well-educated young Cypriots who desire to pursue scientific studies in America. One, from Marseilles, narrates his deplorable delays and difficulties. He was directed that he must proceed to Cairo to have his passport *vise* by the American Consul there, but on arriving at Port Said the Harbour Master informed him that this was not necessary: he could get it done at Marseilles or in Greece. This was confirmed by the U.S. Consul at Port Said. Arriving at Marseilles, he was informed that the passport should have been dealt with in Egypt. In vain he protested and explained. He was told he must either go back to Egypt or telegraph at a cost of 300 francs (for four persons). Ten or twelve days were required for these formalities, and only after twelve days in Egypt and more than twenty in Marseilles could he proceed. About fifty Cypriots were in this plight. He urges his countrymen not to leave the island until they are perfectly sure as to the requirements, and not to trust to any local agents. The other correspondent writes from South Bethlehem, U.S.A. He had endless troubles and hardships before reaching America. Arriving at New York, he admires the towering houses, the rails and trams, directed as if by invisible hands. He leaves after three days for South Bethlehem, a small town about two hours from New York. He admires the beauty of the country, the green and fertile expanses, the woods and streams. The climate reminds him of Cyprus. Living is terribly dear, and one must not be fastidious in taking up work. He has found employment in a steel company, working 10½ hours a day.

The censorship over the Press has been raised, but warnings have been given to the directors of newspapers that they must refrain from publishing news that is likely to create unrest or arouse racial feelings.

## BRITISH POLICY IN PERSIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Major Ormesby-Gore writes in your issue of the 18th inst. with considerable force upon the desirability of a Middle Eastern Department. Permit me to remind your readers that, so far as I have information, no responsible person has any objection to the scheme. Indeed, it is not too much to add that in Lord Curzon, Lord Milner, Mr. Montagu, and Mr. Churchill the proposers will find active supporters. Nor is it true that Lord Curzon is running the "Eastern Show," although, of course, his opinion carries weight for the reason that he knows the East. To know the West is one thing, and to fathom the East is quite another.

All these remarks about the British Foreign Minister are in a measure due to his great declaration of policy in the Upper House the other day. Let me at once add that for more than one reason it was a memorable speech. It has explained many obscurities. But one notices that to some it still remains a mystery why British forces are kept in Persia "*at the expense of the British taxpayer.*" Your correspondent is correct when he says that they are kept there as outposts to check Bolshevist aggression. Have the repeated landings at Enzeli and Astara been already forgotten?

Not only are the British forces there to act on behalf of the British, but also to protect Persia against Bolshevists. These forces, as Col. C. E. Yate, M.P., pointed out at the Central Asian Society, have performed great deeds. The Russian menace is no bogey or journalistic figment, and I dread the day when Wrangel's troops are no more and the Red wave sweeps eastwards. I cannot agree with your correspondent when he asserts that Mr. Wells tells us that no harm may be expected from the demoralised Bolshevists. The great writer would have had to tell a different tale if he had journeyed down to Tashkend. The Red menace is very real.

The whole question of Middle Eastern policy rests not upon what one has read, but entirely upon what one has seen and gone through. Colonel A. C. Yate, Sir Mortimer Durand, and others would tell you something which can assist morally and materially in arriving at a sound judgment. And in this connection I might add that for Britain it is the Empire or nothing; hence you have to consider chiefly how a certain line of policy will suit Imperially. It is, therefore, very important that we should safeguard ourselves against dangers likely to destroy the Empire. Some may ask whether the independent existence of smaller nations should be sacrificed at the altar of British Imperial interests. But let us remember always that no Empire was built—and certainly no Empire was retained—through megalomania. The Russian Empire is a case in point. Before the Revolution of 1917 the Russian Empire was even greater in extent and strength than the British Empire, and where is that Holy Empire to-day?

We should, therefore, do well to act in the interests of Persia, assist that country, protect it, and educate the subjects of the Shah to stand on their feet. The Persians are people of considerable natural talents, and would one day, very soon, be a great people. But that day will only come when Persia has a disinterested helper; and that friend they will doubtless find in the British.—I am, etc.,

SIRDAR IKBAL ALI SHAH.

University Union, Edinburgh, November 19.

## THE JOURNEY TO MARSEILLES.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Some friends of mine booked passages to Bombay three months ago by the P. and O. mail steamer Narkunda, timed to leave Marseilles on November 6. They were then told that every seat in the special train was engaged, and had to make their own arrangements for the transit through France. So they left London by the Paris express at 7.30 a.m. on November 4, allowing 48 hours for the land journey. Subsequent happenings are told in the following extracts from a letter posted at Port Said:—

Our train was packed with passengers bound for the Narkunda; and on its arrival at Paris not a single porter, hand-cart, or taxi was visible! We were most fortunate in being met by two French friends, who extricated us from the bewildered mob, raised a hand-cart—Heaven knows whence—piled our luggage thereon, enlisted the service of a smart *douanier* to clear it, and intercepted a taxi which had deposited passengers at the station. In ten minutes or so we were speeding towards the P.L.M. station, while our fellow-passengers were still struggling unaided with mountains of luggage. Many of these unfortunates must have missed the steamer. On reaching Marseilles we spent hours in searching for quarters, but found every hotel full. At last we secured a small bedroom, in which we played "Box and Cox" till nightfall, when we were able to board the Narkunda.

It is high time that suitable arrangements were made to provide a reasonable degree of comfort for passengers who join their steamers at Marseilles.—I am, etc., yours obediently,

November 16. F. H. S.

## RUSSIAN TURKESTAN UNDER THE BOLSHEVISTS.

On November 18, before the Central Asian Society, at 74, Grosvenor Street, Major F. M. Bailey told the story of his experiences in Russian Turkestan in connection with a mission sent there by the British Government in 1918. He said that at the outbreak of the revolution the Austrian prisoners of war there had been reduced by typhus, starvation, or other causes from 110,000 to about 30,000. These were set free and invited to join the Red Army. The Magyars joined in great numbers, but other nationalities, notably the Germans, generally refused. He himself pretended to be an Austrian prisoner. These were of so many nationalities—Roumanians, Czechs, Poles, etc.—that if he met an Austrian prisoner of any one nationality, he could always pretend to belong to one of the others. At first the position of the Bolshevist Government in Turkestan was extremely serious, and, had its enemies acted in concert, it could have been brought to an end. In the January following the Armistice, an attempt was made at an anti-Bolshevist revolution. The leader, a man named Ossipoff, had been a Bolshevist Commisar. He was an adventurer and opportunist. He telephoned to the Government headquarters that trouble had broken out, and asking the Commisars to come immediately and confer. Eight came, and he shot them at once. The rebellion was suppressed, and the Bolshevists exacted a fearful revenge. Whole streets of the better class inhabitants had every man executed. Major Bailey said he was not in Tashkent when the affair broke out; he was driving into the town, but was turned back by the news, and hid in a village for a time.

The economic situation of the country he described as desperate. There was no machinery for collecting taxes, and the Government financed itself by printing paper money and levying contributions on people known to be wealthy. All houses were nationalised. A member of the Quartering Commission would appear and inform a resident that his house was required. The resident had to leave next morning, or at best within a few days, and had to find new quarters, perhaps with very unpleasant associates. To obviate this, several upper-class families would sometimes vacate their houses and live together, when if there were so many people packed into the house that it could hold no more, they were not likely to be disturbed. The Government did its best to force everyone to work. One night by raiding the square in the centre of the town, and all places of amusement, several hundred people were caught who could not prove that they were working. These were all sent some hundreds of miles up the railway line to cut fuel.

Of the attempt to force Bolshevist institutions on the Moslem population, the lecturer said that these desired none of it. Each village had nominally an executive committee, and in the Russian villages such a committee was actually elected, but among the natives this election was fictional. The *aksakal*, or village headman, was called "Comrade the President of the Executive Committee," and a house in the village bore a notice "Headquarters of the Executive Committee"; but there was really no such committee, and life was carried on much as previously. The chief effect of Bolshevist rule on the natives was that they were liable to be robbed by the Red Guards, or to have their property confiscated; they paid no taxes, as the Government had no means of collecting any.

# MUSICAL NOTES.

### Two Women Pianists.

During the past week two pianists, Miss Myra Hess and Mme. Kanevskaya, both of whom are well known to the British public, have given recitals at the Wigmore Hall—on November 18 and November 20 respectively. Miss Hess has a mind and temperament for big things, and her programme consisted of three of Bach's Choral Preludes, arranged for the pianoforte by Busoni; a Beethoven Sonata (Op. 110), Brahms' Waltzes (Op. 39), and Franck's Prelude, Aria and Finale. No concession to popular taste here; nothing but exacting work both for pianist and audience! On the whole, Miss Hess carried through her scheme well; she began splendidly with the very beautiful "Wachet Auf" prelude—in which Busoni has for once written what others than himself can play—and she ended magnificently with the Franck. These, the first and last things, were surely her best: the dignity and sincerity of her interpretations of them were quite satisfying. Her reading of Beethoven was consistent, but it was too "nice," too superficially clear. Perhaps it is that the last sonatas of Beethoven are beyond a woman's complete comprehension. (I know of no explanation to these things, but there is little doubt that men, like Busoni, or Lamond, or even Hofmann, reach depths that women can never plumb.) The Brahms Waltzes were played very correctly, but missed that breathless charm which is their property and distinction. Miss Hess is what one calls a thoroughly well-equipped player; so thorough is she, indeed, that her readings do sometimes move.

Mme. Kanevskaya is a different type of player. She has not the correctitude, the endurance, or quite the dignity of Miss Hess; but she has, on the other hand, a warmth, a grace, and an exhilaration that are her own. From her Bach one expected much; for, apart from the absence of good, hard tone, her "Chromatic Fantasia" was excellent: in the Fugue she secured the grand climax, but a little muddledly. Again, in Schumann's Sonata in F sharp minor, Op. 11, she played very beautifully; her reading of the second and third movements was unusually lovely. There is surely something in her temperament which finds itself akin to Schumann, for her playing of him had sincerity, intimacy, and consequently conviction. It was through a perfect torrent of wrong notes, however, that she reached the end of Rachmaninoff's Prelude in G minor; yet it was undeterred that she proceeded to play two rather jejune pieces of Boris Levenson. I think she was tired when the time came (inevitably) to play Chopin, though her display in the Scherzo in B minor was very gallant. However, Mme. Kanevskaya is a true artist, and on anyone present at the first half of any recital she may care to give this fact will certainly impress itself.

### Elgar's Second Symphony.

The Quinlan concert at the Kingsway Hall on November 20 was noteworthy for the playing of Elgar's Symphony in E flat. It was with this symphony, without any question at all one of the greatest works of modern times, that Mr. Adrian Boult, the conductor of the British Symphony Orchestra, made good his name, and his performance of it on Saturday was remarkably fine. That it did not make quite so deep an impression as when given last year at the Queen's Hall was probably due to the fact that the British Symphony Orchestra are not yet so good as the London Symphony Orchestra, but of Mr. Boult's ability and unique understanding of it there was never at any time any doubt. The quite extraordinary beauty and strength of the first two movements were most vividly realised, and the colours obtained from the string and reed instruments were utterly gorgeous. There is, I think, a falling off in the third and fourth movements, particularly in the "Rondo," though in the last movement there are the great sonority which is one of Elgar's dominant properties and the unforgettable ending.

It was very pleasing to note that the brass of Mr. Boult's band is improving, for in the Prelude to Act III. of "The Mastersingers" the prominence which is allotted to it was a matter for joy, and not anxiety. The horn playing in this was really good, and justifies the hope that this orchestra may one day equal the best. Of the solo artists who took part in this concert, Miss Rosina Buckman and Mr. Peter Dawson, it is not necessary to say much. Miss Buckman is always reliable; but, owing to some misadventure, Mr. Dawson was compelled to sing as encores "Drink to Me Only with Thine Eyes" and "When the Swallows Homeward Fly." At orchestral concerts we can do without these things, and if there is one thing in England that should be prevented it is that the British Symphony Orchestra should collect at its concerts the ordinary ballad-loving audience. One knows that if Mr. Boult has his own way the thing is safe enough; but it is obvious that the practice of engaging "star" artists has its dangers as well as its virtues.

### One Singer and Two Vocalists.

Three song recitals I have attended this week—Mr. Gervase Elwes at the Æolian Hall on November 15, Mme. Luia Juta at the Wigmore Hall on the 18th, and Mr. Gale Gardner at the Æolian Hall on the 19th—but only one, the first, with much pleasure. Mr. Elwes, whose recital consisted wholly of English songs, is a very beautiful singer, but the silvern tone of his voice can in an evening become monotonous. In certain types of song—in those, for instance, laden with sorrow or steeped in religious joy—he is glorious; the rich mellowness of his voice is exactly apt to the considered wisdom of the philosophy in such songs. It is in the passions between these extremes, in the lighter emotions, that shortcomings are noticeable; for there is a sameness in his interpretations which palls, a uniformity of method which inhibits the complete seizing of the peculiar spirit of each song. He did not make enough of P. Whitlock's "In the Forest," of Ivor Gurney's "All Night Under the Moon," of St. John Brougham's "What are Lips but to be Kissed?" and there was something missing in Rebecca Clarke's "Infant Joy" and in Felix White's "Sing Care Away"; but, on the other hand, he succeeded magnificently in such fine songs as Ireland's "The Three Ravens," M. Davidson's "Christmas Carol," Walford Davies' "Four Songs of London," and Peter Warlock's "As ever I saw." The Walford Davies songs did not impress one as much as they had done a few weeks before at their first performance; there is some exquisite writing in them, but they are fuller of intricate inconsistencies than the words of the poems either demand or allow. However, a recital by Mr. Elwes is a joy not readily forgotten; during his coming absence in America we shall probably remember him only too well, for we have no one who can quite fill his place.

There is not much to say of Mme. Juta. She has much volume, of the rather hollow kind, and less voice. Her word-painting is a fearsome affair, her choice of English songs most weird, and her justification of including Wagner and Brahms non-existent. But it must be said that her accompanist, Miss Daisy Bucktrout, did not help her overmuch; her playing of "Der Schmied," for example, was execrable. Very strange, because Miss Bucktrout generally plays very well.

Mr. Gale Gardner's programme was conceived on popular lines, and was sung as worthily. His enunciation is excellent, but his other possessions are not of the right kind. He has travelled down the wrong road, and, though he is certain of the non-musical public, cannot be seriously considered as an artist.

### A Publishers' Concert.

There is at the present time a very perceptible movement in favour of the publication and of the performance of modern British music, and it was very satisfying evidence of this that Messrs. Elkin and Curwen gave in the concert which they organised at the Æolian Hall on November 19. Much, no doubt, was due to the excellence of the two artists at the concert—Miss Ursula Greville and Mr. Percival Garratt—but in both the songs and the pianoforte music there was, apart from the interpretation given them, an obvious quality of fresh, sincere, and worthy thought. Of the two there seemed to be less essence in the pianoforte music: not even the reticent beauty of Mr. Garratt's playing could make a Prelude of Ethel Barnes and an Idyll of Albert Coates, for instance, sound important. But there was, on the other hand, very much that mattered in a tiny Prelude of William Barnes and in the vagrant loveliness of some Cyril Scott. However, it is the songs, where our young composers have had poetry to work on—and this is their distinction, that it is real poetry, and not the cheap verse that inspired their forbears, that has prompted their writing (in this programme there were but two songs out of about twenty which were not poems)—that most success has been achieved. There are inevitability and aptness in Martin Shaw's "Song of the Palanquin Bearers," in Christabel Marillier's "A Farewell," and (particularly) in Gerrard Williams's "The Dilemma"; there is the very breath of the poem in Francis Toye's "In Dorset," in Shaw's "Summer," and in Bantock's "A Feast of Lanterns"; and in Bainton's "Nightingale Near Wood," and in Percival Garratt's "A Last Invocation" there is, very definitely, genius. All the songs were sung by Miss Greville with that very rare intelligence which demarks her from her contemporaries; in some of her interpretations, indeed, and notably in Shaw's "Palanquin Bearers," in Gerrard Williams's "The Dilemma," and in Stanford's "Windy Nights," she reached a perfection that I know no other young artist capable of approaching. At the end of this concert the stars which shall direct the fortunes of British modern music appeared to be shining very brightly.

V.—"THE RITCHIES IN INDIA." Compiled and Edited by Gerald Ritchie. (London: John Murray. 21s. net.)

## I.—A CONSULTING SURGEON IN THE NEAR EAST.

In the Army medical administration during the last war no more important step was taken than the appointment of distinguished hospital physicians and surgeons to the various armies as consultants, with the honorary rank of colonel. Free from the administrative duties which absorbed so much of the time and energy of the senior officers in the R.A.M.C., and with a wide experience as consultants and teachers in their special subjects, these officials filled a most important rôle and undoubtedly made for greater efficiency all round. Mr. Tubby very fully describes here the gradual evolution of the previously undefined duties which fell to their lot. Everything depended upon the personality of the consultant selected, and it is evident that the author of this book gradually created for himself and his office a most important position. It was not his duty to replace the medical staff on the spot, but to advise, select, inspect, and—in some cases, by means of conferences and lectures—to instruct. It was his duty to keep in touch with the very rapid progress which was taking place during the war in our ideas of military medical and surgical science, and to see that the newest teaching was available for even the busiest of army medical officers. With the assistance of his consultant colleague on the medical side, the late Colonel Sandwith, an up-to-date medical library was provided in Alexandria for the medical staff. To the consultant it fell to suggest and plan out lines of research. Mr. Tubby considers that in his sphere of work more use might have been made of his experience and advice in the selection of suitable men for special posts, as he states was done at home and in France That the consultant is an official in relation to war who has come to stay, anyone reading these most interesting pages will surely feel. Although a description of the duties of the consultant and the organisation of the special departments which arose in Egypt during the war forms the most important part of this book, there are many incidents of enthralling interest. Soon after his arrival in Egypt Mr. Tubby was ordered to Gallipoli, where he witnessed some of the severest fighting both at the "Beaches" and at Suvla Bay. Side-lights on the horrors of war are frequent. After speaking of the north-west wind, which blew from 9 a.m. to sundown, the author writes: "In these heavy dust-storms our men lived, worked, and fought day by day; scorched by the burning sun; parched by incessant thirst; tormented by swarms of filthy and disease-carrying flies; stricken with diarrhœa, dysentery, and typhoid fever, and nearly deprived of sleep. Nevertheless they carried on cheerily." Many explanations have been offered of our failure to break through at Gallipoli; this is what this surgeon says:—

"If I may venture on opinions as to the cause of our failure at Gallipoli, I should place, primarily, the prevalence of diarrhœa and dysentery; secondarily, the enervating effects of the climate on men fresh from home. Nothing else would have held in check the determination of our troops to break through the Turkish defences."

After the author's return to Egypt his regular, organised work began, and this he describes with a wealth of detail that will appeal to the members of his profession, both in and out of the Army, and perhaps especially to British residents in Egypt, many of whom are mentioned by name. He pays a warm tribute of admiration and respect to the late Colonel Sandwith, whose untiring zeal and sense of duty cost him his life. He is anxious that his readers should realise the great variety of enterprises—dental, orthopædic, pathological, splint-making, etc., which went on in Egypt—some scarcely recognised—under the Army Medical Department. A hurried visit to Khartoum and a short, but very privileged, visit to Palestine furnish material for a couple of interesting chapters.

To a friend who asked the author whether, if he had a similar offer of foreign service, would he do the same again, he replied "Many times." "To have been selected for so honourable a position; to have had such high ideals placed before one; to have striven to fulfil them; to have been given such great and extended opportunities of service, are prizes which fall to the lot of few professional men; for all of them my gratitude is profound. The fevered Dardanelles campaign, with its heroism in spite of all reverses; the long months of preparation in Egypt for the Palestine campaign, the successive triumphs, are and will be vivid memories. The glamour of the East, the contact with strange races and peoples, the making of new friends and the pleasure of working with younger men, have given a fresh zest to life."

E. W. G. M.

## II.—"I SPY," AS PLAYED BY A STRATAEGEAN.

"Thus it fell to my lot, too, to play a conscious part in the fashioning of Greek history, and to instigate and control in some measure the first march of events which had as their logical sequel the evacuation of a throne, the victory of Doiran, and the deliverance of Asiatic Greece from the dominion of the Turk."

Under the title "Commercial Candour," *Punch* from time to time pillories trade notices which convey a meaning altogether different from what the innocent writer intended. Many readers of this book will be reminded of *Punch's* heading when they follow our author, a distinguished classical scholar turned Naval Intelligence Officer, in his narrative of the way in which, for three or four years, he was continually hoodwinked, overdid his part, and it is to be feared, helped in the prodigious waste of the British taxpayers' money. Like the good man who wrote to the local paper to point out that his name was not Chammidge but Shammalovidoritch, he has only himself to blame for the fact being known. As the "Tales," however, covered a comparatively brief portion of Commander Lawson's war service, we are confident that his profound knowledge of modern Greek, his energy, and his resourcefulness achieved many more useful things for his country than some of the wild-goose chases that he describes or the altogether unpardonable arrest of two worthy men, on unsubstantiated and the flimsiest evidence, subsequently proved to be forged. Let us hope that he did help M. Venizelos to establish his authority in Crete, and that he was instrumental in saving Canea from the bloodshed for which the premature fostering of a "revolution" might have been responsible; but the reader is apt to be left with the impression that others than the Russian Consul had a taste, differently manifested, for red herrings. The Government Departments which Mr. Lawson trounces so unmercifully are certainly to be blamed for leaving Intelligence Officers without more definite instructions, the first of which should have been, check your information and do not believe everything that is told you. It is not difficult to reconstruct the position in Greece when a number of confiding Allied officers, tyros at the Intelligence game, were being "run" by a syndicate of their own secret service agents, who were for the most part in the pay of the Greek (Constantinist) Government. Things, however, have a happy knack of happening for the best. If the Greek Government had not known all about our Intelligence Officers' activities and if the Allied authorities had not known at the time that the Government did know, the publication of Mr. Lawson's book might have favoured the cause of ex-King Constantine, have prejudiced that of M. Venizelos, and been embarrassing for Great Britain. As things are, it is just a brightly written account of "What Daddy did in the Great War," and if those to whom the stories are addressed are not interested in and proud of what he did, and the games he played, they have either been badly brought up or are hopelessly precocious.

## III.—AN EASTERN GATE TO FAIRYLAND.

Fairy Tales all the world over have a foundation of similarity—a lover of fairy tales will feel at home in the reading of them from whatever distant land they have been

QUATRAINS OF OMAR KHAYYAM

gathered. The reason doubtless—apart from the fact that certain stock legends seem to have found a version in all parts of the world—being that there is after all only one Fairyland, wherever the gate that is unlocked for our entrance may be situated. It is always delightful to find a new gate and to be shown the particular beauties and curiosities on to which it directly opens, and we all know that some of the most wonderful sights and sounds of Fairyland are to be found on its Eastern borders.

This charming collection of fairy tales from Bengal is divided into three parts. The tales of Part I., "told by Babaghuray, the Traveller," are not concerned with fantasy and magic, but belong to that type of fairy story which deals with ingenious riddles, even more ingeniously solved, with the absurd doings of a simpleton, in this case generally a weaver, with unexpected pieces of good luck and with practical jokes. A very satisfactory example is the story of "The Four Swindlers," and the various daring robberies which they carried out in a neighbouring country, that they might judge whether its king was as clever as he was reported to be. They confessed their motive and returned the goods in the end, so very little harm was done. We were also pleased with the idea of the Brahmin's foolish son, who, having bought some live fish in the market and not wishing to carry them home himself nor to incur the expense of hiring a coolie, threw them into the canal with whispered injunctions to stop at the Ghat close to his father's house.

Part II. contains five stories concerned with the magical adventures of lovers seeking each other across the world, or overcoming other terrible difficulties. Twice they meet first in dreams.

In Part III. there are fairy tales of all kinds. We recognise "The Sleeping Beauty" in "The Petrified Mansion," and "Tom Thumb" in "The Man who was only a Finger and a-half in Stature," and find several familiar devices and adventures. The longer stories show an extravagance of imagination, and the fearsome adventures, through which the characters have to pass before the happy ending, are most bewildering to follow. Animals—tigers, monkeys, and so on—play an important and usually very benevolent part. The straightforward telling of the tales, without comment, is just as it should be.

Coloured pictures by a great Indian painter—most beautifully reproduced—are, of course, perfect illustrations for such a collection as this, and very wonderfully do they express the spirit of fairy romance from the point of view of the East. The frontispiece, showing the old Brahmin writing his couplet, as he walks along the road, and is seized by sudden inspiration, and the picture of Kala Paree and Nidra Paree, floating between heaven and earth, are exquisite. All this from a grown-up reader's point of view is, as we said, perfect, but we doubt whether the Western child who is given the volume will appreciate these illustrations. A child likes his fairy tale pictures to be quite definite, like those wonderful drawings by Henry Ford in Andrew Lang's Coloured Fairy Books, or if they are fanciful, to show the humorous fancy of Arthur Rackham. We feel that many children will condemn these illustrations, as we know that one little boy has done, as being "too misty."

## IV.—MRS. BESANT ON WAR AND PEACE.

In the four lectures printed in this booklet Mrs. Besant expounds her philosophy of the War, which is over, and of the Peace, which still lies so far ahead. It is needless to say that the lectures are marked by sincerity and by eloquence. They have weaknesses, too, especially in the regions of history and economics, which we fancy the writer has never had time to explore thoroughly, while the basis of theosophic doctrine may puzzle readers to whom it is unfamiliar; but, after all deductions have been made, there remains a powerful plea for the kind of reconstruction which the world most needs, not for startling changes in human institutions, but for a gradual uplifting of human nature itself. On this platform the creeds can meet, and none of them need be ashamed of this particular utterance.

## V.—THE GREAT THACKERAY CLAN.

This book carries on the tradition enshrined by Sir William Hunter in "The Thackerays in India," for it consists of the letters of William Ritchie, whose mother was a Thackeray, and the reminiscences of his son. Ritchies and Thackerays and Shakespeares jostle one another through the pages; the index shows twenty-four of the first, twenty-seven of the second, and twelve of the third; so that a reader who does not belong to the clan is tempted to wish for a chart of the pedigree, but recants when he realises that such a chart would be unmanageable, and is content to welcome the actors as they come before him. The first part of the book is perhaps the better, for William Ritchie—a Calcutta barrister from 1843 to 1862, and Legal Member of Council at the time of his death—was not only an able and attractive man but a good letter-writer, and he gives a definite picture of the social life of Calcutta before the Mutiny, with all its half-forgotten drawbacks and advantages. The earliest letters make the best reading. Then we have the brilliant young man, not yet overwhelmed with work, grasping the new life with both hands and eager to make his relatives at home understand it and enjoy it. Later on, the busy and successful barrister, with wife and children at his side, has less incentive to similar exertions, and it is the picture of Calcutta in the 'forties which gives the book its chief historical value.

Criticism of the son's reminiscences is almost disarmed by the writer's plea that they were intended primarily for domestic consumption. They sketch the life of a civilian in Bengal from 1875 to 1896, and have a definite interest of their own; but readers not belonging to the clan will feel that they are expected to know rather too much. They will meet hosts of attractive people, but they are in many cases told too little to enable them to enjoy the pleasures of the society, and they must be content to know that it was enjoyable. But the reminiscences are much more than a catalogue of names and dates, and every now and then we get a few details which will stay in the memory. There is, for instance, the present Lord MacDonnell, as a collector in Bihar in the early 'eighties, taking no exercise, "perpetually working at writing masterly reports," but always intelligent and sympathetic in discussing subjects which interested him, with "a fire in the sharp little eyes." Or there is Charles Davies, the recluse of Rhotas, "the end and aim of whose being was books and self-culture," courteous and distinguished in his nankin frock-coat, and pouring forth "a never-failing stream of beautifully turned sentences in modulated accents, accompanied by speaking gestures." Or—a very different figure—there is Sir John Hewett on the Simla cricket ground, with the pavilion half-full of his office "files," to which he would return after a good innings like a giant refreshed. Mr. Ritchie says he was excused fielding in those days; but, lest anyone should read a slur on his sportsmanship into this phrase, let it be added that in the present century Sir John was still holding catches on the "Flats" at Naini Tal, a place where other Lieutenant-Governors have been known to miss their chances. Such glimpses—and there are more of them—make the reminiscences interesting to readers outside the charmed circle, and, taken as a whole, the book is well worth reading.

## BOOKS RECEIVED.

"Smith and the Pharaohs" and Other Tales. By H. Rider Haggard. (Bristol: J. W. Arrowsmith, Ltd. 7s. 6d. net.)

"Arachne: A Play." By Adelaide Eden Phillpotts. (London: Cecil Palmer. 3s. net.)

"The New Jerusalem." By G. K. Chesterton. (London: Hodder and Stoughton. 12s. 6d. net.)

"Local Government in Ancient India." By Radhakumund Mookerji, M.A., Ph.D. Second edition. Revised and enlarged. (Oxford: Clarendon Press. 12s. 6d. net.)

Mr. H. C. Luke, the author of some papers on "Cypriote Shrines," which were originally published in this journal, has now brought out these articles, with photographs, in book form. The Faith Press are the publishers, and the price of the work is 2s. 6d.

# PERSONAL AND GENERAL.

**TO-DAY.**

November 25 (New Style).
November 12 (Old Style).
Rabia I., 14, 1339, A.H., of the Moslem Calendar.
Kislev 14, 5681, of the Jewish Calendar.

Lady Edward Hay has left London for Government House, Jerusalem.

Sir Lee Stack, Governor-General and Sirdar, arrived at Khartoum on November 21.

Signor Garroni, the Italian Ambassador to Turkey, has left Rome for Constantinople.

Lady (Ratan) Tata has left York House for India, and will be absent for some months.

M. Beza, Secretary to the Roumanian Legation, left London last week for Paris, on leave.

The Prince Regent of Serbia is stated to have expressed a desire to visit the King of Italy in Rome.

Dr. Mastny, the Czecho-Slovak Minister, is leaving London to-day for Prague on a special mission.

General Sir Charles Monro, the retiring Commander-in-Chief in India, and Lady Monro left Bombay last week.

The engagement is announced of Princess Helen, daughter of ex-King Constantine, to the Crown Prince Charles of Roumania.

Major-General and Mrs. Louis Vaughan have arrived from India on short leave, and are staying at Brown's Hotel, Dover Street, W.

M. Mirza Agha Hariri, accompanied by his secretary, Mr. Harold Schofield, sailed on the 19th inst. by the s.s. Manora to India, on his way to Persia.

The Emir Zeid, youngest son of the King of the Hejaz, who is on his way back to Mecca, was entertained at luncheon by Lord Allenby in Cairo on November 21.

M. Frederic B. Vrany, who has been appointed Czecho-Slovak Consul in London, accompanied by Mme. Vrany, arrived last week from Prague to take up his duties.

Prince Mirza Mehdi Khan Ala-es-Saltaneh, G.C.V.O., has resigned his post as Persian Minister in London in order to be able to take the complete rest which he has been ordered after his recent illness.

Sir Horace Rumbold, until recently British Minister in Warsaw, has arrived at Constantinople, where he is to assume the duties of British High Commissioner in succession to Admiral de Robeck.

In view of the political situation in Greece, the Executive Committee of the Anglo-Hellenic League has decided to postpone to a later date the annual general meeting which had been arranged for the 26th inst.

Dr. M. Gaster will deliver a public lecture on "Greek Influence on Roumanian Literature" to-day at King's College, Strand, W.C.2, at 5.30 p.m. M. Boerescu, Minister Plenipotentiary of Roumania, will preside.

Colonel Sir J. Roper Parkington has purchased Broadwater Lodge, Wimbledon, which is now his permanent address, and that of Lady Roper Parkington, the Hon. Treasurer of the Montenegrin Red Cross and Relief Fund.

An engagement is announced between Bertram Elliott, Egyptian Civil Service, eldest son of the late H. W. Elliott and of Mrs. Elliott, of Great Abington, Cambridgeshire, and Edith Philippa, youngest daughter of the late Thomas Charlton, Clapham Park, S.W.

His Highness Vossough-ed-Dowleh, formerly Prime Minister of Persia, and Mirza Abdol Ghaffar Khan Emad-ol-Molk, Persian Minister Resident, and Madame Ghaffar Khan were entertained at luncheon last week by Sir John Bland-Sutton at his house in Brook Street.

Mr. S. de Bilinski, chairman of the Constantinople Board of the National Bank of Turkey, who recently came to London to undergo an operation for appendicitis, is making satisfactory progress. It is hoped that he will be well enough to leave the nursing home where he now is towards the end of the month.

The British Red Crescent Society acknowledges with thanks the following contributions in response to their appeal published in our issue of October 30:—Messrs. Zossenheim and Co., £10 10s.; Aneurin Williams, Esq., £10; J. A. Malcolm, Esq., £5 5s.; Mrs. C. N. Hughes, £5; Lady Gray Hill, £5; Miss Ford, £1 1s.; Lord Lamington, £1; Mrs. Wills, £1; Mrs. C. C. M. Sanders, £1; Anon., £1; B. Sheldrake, Esq., 10s. 6d.; Anon., 10s.; Mrs. Monkhouse, 2s. 6d.; D. Macintosh, Esq., 2s.

At the first ordinary meeting of the 167th session of the Royal Society of Arts, held on November 17, the candidates proposed for election as Fellows included the following:—Mr. Thomas M. Ainscough, H.M. Senior Trade Commissioner in Inwia and Ceylon; Hon. Nawab Altaf Ali of Bogra, Mr. Alexander Cameron, Hon. Rao Sahib M. C. Chetty, Mr. J. R. Colabawala, H.H. the Maharaja of Darbhangai, Capt. P. B. Hebbert, I.A.; Mr. J. S. Hogg; S. Haider Imam, of Moradpur; Mr. Soorajmull Jallan, of Calcutta; Rao Bahadur Sardam M. V. Kibe, Minister of Commerce and Industry, Indore; Major-General Sir Wyndham Knight, K.C.I.E.; Mr. O. M. Nagersheth, of Bombay; Sir Robert Nathan, K.C.S.I.; H.H. the Maharaja Jam Saheb of Nawanagar; Mr. W. F. Perree, C.I.E, President Forest Research Institute, Dehra Dun; Mr. S. M. Ryan, late India Forest Department; Mr. T. Ryan, C.I.E., Indian Railway Board; Mr. Pratap Singh, of Morar; Mr. H. W. D. C. Taylor, of Calcutta; Mr. P. L. Tewary, of Sarila State; Professor S. P. Varma, of Jubbolpore; Lieut.-Colonel Sir Arnold T. Wilson, K.C.I.E.; and Mr. S. C. Williams, M.A., Vice-Chairman Calcutta Port Trust. The total number of candidates was 112.

## APPOINTMENTS, ETC.

M. G. R. Radkoff has been appointed Secretary to the Bulgarian Legation in London.

General Papoulos is to succeed General Paraskevopoulos as Commander-in-Chief of the Greek Forces on the Anatolian front.

Mr. Vepa Ramesam Pantulu Vakil will succeed Mr. Justice Seshagiri Ayyar as Judge of the High Court of Judicature at Madras.

M. Radu Djuvara, formerly Director of the Consular Department at the Foreign Office in Bucharest, has been appointed First Secretary to the Roumanian Legation in London.

## OBITUARY.

Princess Fatima, sister of the Sultan of Egypt, died on November 18.

News has been received from India of the death from diphtheria, on October 16, while on an expedition to the regions between Northern Burma and Tibet, of Mr. Reginald J. Farrer, the novelist and writer of books on horticulture and travel.

**OUTFITS FOR EGYPT, INDIA AND THE FAR EAST.**

Gentlemen visiting the East this Winter can be supplied with suitable clothing and the necessary equipment for travel, camp, or bungalow, at short notice.

*List "H" giving full particulars and prices by return on application.*

Kit renewals required by officials returning from leave, and complete outfits for those newly appointed, at moderate cost.

**THRESHER & GLENNY,**
*INDIAN & TROPICAL OUTFITTERS,*
**152 & 153, STRAND, LONDON, W.C.**

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:—*

MESOPOTAMIA: Oil Fields. ARMENIA. CYPRUS. PERSIA. ITALY AND KEMALIST TURKS MESOPOTAMIA: Military Families (Evacuation).—Military Expenditure. INDIA: Army Officers (Pay).—British Army Officers (Land Grants).—Army Education Costs. (November 15.)

MESOPOTAMIA: Barbed Wire.—Native Casualties.—Rolls-Royce Chassis.—Expenditure. EGYPT. INDIA: Vice-Royalty.—Army Officers (Retired Pay).—Legislative Councils (Election Rules). TRADE AND COMMERCE: Anglo-Persian Oil Company. (November 16.)

INDIA: Inquiry Bureau (London).—Provincial Loan, Bombay.—Officers' Pensions.—Mr. Lajpat Rai.—Government Stores (Couchman Committee's Report).—Troops, North-West Persia.—Army Reorganisation.—Sedition.—Punjab Disturbances.—Deportation.—Indians, British Colonies and Protectorates.—Constitutional Reforms, Burma.—Rice (Control).—Shive Dagon Pagoda Hill. MESOPOTAMIA: Revenue and Expenditure. EGYPT: Milner Commission. GREECE, INDIA: Medical Service (Mesopotamia and Persia).—Constitutional Reform, Burma.—Powers of Search.—Printing and Publishing Regulations.—Imprisonment without Trial. MONTENEGRO. LEAGUE OF NATIONS: ALBANIA. MALTA. (November 17).

LEAGUE OF NATIONS: Hejaz.—Greece. PERSIA (COSSACK DIVISION). EGYPT: Martial Law.—Constitution. GREECE. INDIA: Army Reorganisation.—Departmental and Warrant Officers (Pensions).—Army Pay.—Royal Indian Marine. PERSIA. BAKU. EGYPT. PALESTINE. ALGECIRAS AGREEMENT. (November 18.)

## NEWS IN BRIEF.

French and Arabic have been recognised by the Governor of Lebanon as the official languages of the Lebanon.

The 5th Dragoon Guards left Colchester last week for Egypt. It is understood the regiment will relieve other troops in Palestine.

The Italian warship Libia will sail next February for Central America, Vancouver, Japan, and China, returning home via India and the Red Sea.

A rupture of the Turco-Armenian armistice of November 7 is reported owing to the action of the Nationalist Turks in presenting fresh and unacceptable demands.

A Beersheba telegram states that Abraham's wells are now equipped with modern pumping machinery, and are supplying water to the town of Beersheba. Early rains, adds the message, give promise of a good barley crop.

The Oriental section of the exhibition gallery of prints and drawings at the British Museum was closed to the public from yesterday. It will be reopened on Friday, December 3, with an exhibition of Japanese colour-prints.

It is reported that a rising of tribesmen and ex-soldiers of the Azerbaijan Army has taken place against the Reds in the vicinity of Lenkuran (123 miles S.S.W. of Baku). Some 3,000 to 5,000 men are involved, and are led by Selim Pasha, a Turk.

Syrian Arab delegates in Buenos Aires have appealed to the League of Nations against the "inhuman abuses" committed by Great Britain and France in Arabic territory, and demand the immediate evacuation of such territory and the abolition of mandates in the former Ottoman dominions.

It is expected that 3,000 students and professors will attend a Conference on International and Missionary Questions in Glasgow early in January, and make it not only the largest student conference ever brought together in Europe, but the largest to discuss these particular questions. Delegates will be present from various parts of Europe, including France, Holland, Bulgaria, Roumania, and Czecho-Slovakia.

It is stated by the Indo-British Association, London, that a cablegram has been received by that Association from the European Association, Calcutta, as follows:—"Following cable has been sent to the Prime Minister to-day: 'The European Association of India hears that it is possible that Montagu will succeed Chelmsford as Viceroy. Such appointment would seriously jeopardise co-operation between European and other Indian political parties. Trust rumour unfounded.—President, European Association.'"

The oil-producing interests of Great Britain have contributed £122,850 towards the £500,000 for which the University of Birmingham is issuing an appeal. The Anglo-Persian Oil Company, the Anglo-Saxon Petroleum Company, Viscount Cowdray, and Sir Marcus Samuel have given £25,000 each, Mr. D. Elliott Alves £12,500, the Anglo-American Oil Company £10,000, the Central Mining and Investments Corporation £250, and the Trinidad Leaseholds, Limited, £100. Under the direction of Sir John Cadman, the School of Mining at Birmingham has established a high position, and from its department of petroleum technology, equipped with plant similar to that found at oil wells, students competent to deal with modern drilling machinery proceed to all the great oil fields of the world.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses. Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX. LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

**EXETER**
**ROYAL CLARENCE HOTEL**
*(facing beautiful Cathedral).*

**LONDON**
**HOTEL CRANBOURN**
**67a, Shaftesbury Avenue, W.C.2.**
**Self Contained Suites.**

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
**SMEDLEY'S HYDRO.**

**TORQUAY**
**VICTORIA & ALBERT HOTEL.**

***Cairo's Hotels de Luxe.***

**SHEPHEARD'S HOTEL.**
Open all the year round.

**SEMIRAMIS HOTEL.**
Splendid position on the East Bank of the Nile.

**THE ONLY ENGLISH HOTELS IN ALEXANDRIA.**
**Proprietor: AUGUSTUS VAN MILLINGEN.**

**WINDSOR HOTEL**
**(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.**
**American Bar and Restaurant, Billiards, and Lift.**

## GREECE'S CHOICE.

The defeat of M. Venizelos at the general election has created a situation of extreme embarrassment both for Greece and for the Entente Powers. We should like to think that the Greek Government and people, as well as Great Britain and France, are resolved at least on one course, that they will do nothing rashly or in a spirit of petty-mindedness. In the first flush of success the victors at the polls claimed the verdict as a declaration in favour of the recall of ex-King Constantine. The issue, indeed, was deliberately chosen by M. Venizelos, and he has accepted the interpretation placed upon the results by quitting Greece without waiting for the final returns. Fortunately the ex-King has been less precipitate, and has stated that he will resume the throne only at the direct bidding of a plebiscite. The delay allows time for thought; but the Entente Powers may feel obliged to declare their policy before Greece makes up her mind. What action, then, are the former to take? They are confronted with a fairly clear indication that, left to themselves, the Greeks will "plump" for the ex-King's return. Are Great Britain and France to veto such a step; are they to seek to influence Greece's decisions by threats of pains and penalties; or are they to stand aloof and silent? In our opinion there is a fourth course, which is better than any of these. The ideal solution, if it were possible, would be (as was suggested in THE NEAR EAST fifteen months ago, when it was apparent to any careful observer that Royalists and Venizelists were far more evenly divided than the latter would allow) that the country should have its popular Sovereign and M. Venizelos as his Prime Minister. Unfortunately, it is to be feared the personal feud between the two men is too bitter to make any such arrangement workable. The next best solution would be for the Entente Powers to make a virtue of necessity: they should raise no objection to the exercise by the Greek nation of its free choice, but they should require definite and public pledges of the ex-King as an antecedent condition to his acceptance, if Greece is to retain their practical goodwill. Beyond this the two Powers can hardly go without subsequent embarrassment to themselves. We know of no suggestion yet made in the French Press that ought to commend itself to enlightened British opinion. Great Britain suffered much from playing second fiddle to the French in Greece during the war, and from the mishandling by them of the negotiations which resulted in throwing King Constantine into the arms of Germany. There is no need to repeat the mistake to-day, and to follow the French in any attitude they may feel compelled to adopt as a result of having permanently alienated the sympathy of the Greek people, to whichever political camp they belong.

We are entirely unable to endorse all the harsh things that are being said and written about the Greek people for their attitude at the general election. The elimination of M. Venizelos from the political life of Greece will be a source of great weakness to the nation at this juncture, and it is difficult, perhaps, for the foreigner to understand how a man who has conferred such signal benefits upon his country could be not merely opposed, but actually defeated, in any constituency in which he stood. But apart from this one return it is idle to contend that in recording their votes the Greek people could attempt any adjustment of complicated international considerations with their verdict on home affairs. The public memory is proverbially short, and the Greek electorate was quite incapable, after three years, of revising its estimate of ex-King Constantine in the light of White Books or of the disclosures of private secretaries and others. All that it recalled of the critical days of 1917 would be the popularity of the monarch and the fact that he had been expelled by the very foreign Powers that had caused Greece to suffer so much by the blockade; against this it would set a host of unpleasant experiences for which it would hold the Government of the day responsible. Anyone who went about Greece with his eyes and ears open last year must have received evidence of the strength of the "royalist" feeling; this year he might have detected less insistence upon the return of King Constantine, but the forces ranged against the Government had been reinforced by the settled conviction of many that the Venizelist Government, whether on account of its leader's absence or for other reasons, had altogether run off the lines of constitutional procedure. If King Alexander had lived, it might have been possible to prevent the re-opening of the "Constantine question"; but with his death M. Venizelos found his hand forced, and at once accepted the challenge which he had refused so often before. It was too subtle an issue for a general election, and a "landslide" in favour of the exiled King is, perhaps, easier to understand than would have been a more evenly balanced result.

The touchstone in the settlement of the complicated problem must be the true interests of Greece, and these, we hold, will be consulted only if the present Greek Government and the protecting Powers take counsel together. There can be no question of the status of M. Rallis's Cabinet, and the whole matter should be amicably threshed out by the British and French Governments with the new Prime Minister. As the two Powers have allowed themselves to be so entirely misled as to the state of Greek opinion in the past, they cannot do better than to hear now what M. Rallis has to say on the subject before coming to any decision in regard to the succession to the Greek throne. We strongly deprecate any course which would tend to perpetuate the division of Greece into two bitterly hostile camps. Such a state of affairs could only assist the cause of unrest in the Near East. If, as has been suggested, the accession of the Crown Prince would offer the most satisfactory solution, it will only prove so if it is discussed in a friendly spirit and agreed upon by all concerned. There should, therefore, be no thought of any action on the part of Great Britain and France without reference to the Greek Government. The contention that the Treaties with Bulgaria and Turkey were made for the benefit of M. Venizelos, and not because Greece *qua* Greece was entitled to the territory assigned to her, may be true in fact, but we can hardly imagine any responsible statesman admitting it, still less acting upon it. There is much in these treaties which needs revision; but we should rather see Greece make the move from a sense of conviction than that the Allies should thus denounce their own actions and gratuitously insult the Greek nation. It is known that the acquisition of Thrace and the Smyrna territory aroused misgivings among some of the better-informed Greeks, who recognised the difficulty that the country experienced in administering efficiently its existing territory. An opportunity for rectifications will soon present itself, and if taken advantage of must necessarily enhance the prestige of the new Government. Its first concern, however, must be to ensure peace within the present frontiers of Greece. There must be not only a general amnesty, but a conscious resolve on the part of every Greek that at last bygones shall be bygones, and that the new régime will not repeat the mistakes of which it accuses the government of M. Venizelos.

## THE EGYPTIAN NEGOTIATIONS

The impression which seems to have been created in Egypt that there has been a deadlock in the discussions between the Nationalist Delegation and Lord Milner's Mission is hardly borne out by the facts of the case. As a result of the success with which the Egyptian Delegates met when they returned to Egypt to secure approval of the general terms of an agreement with Great Britain, they were inclined, on coming back to London, to press for a continuation of the discussions to a stage which would obviously have encroached upon the official negotiations that will precede the drawing-up of the final treaty. In particular the Delegates, or at least some of them, were anxious to obtain a formal cancellation of the Protectorate. On this point Lord Milner's Mission, we understand, refused to entertain a proposal which tended to modify the fundamentals of the previous agreement. The objection to the Protectorate came from extremist elements in Egypt, which were by no means entirely favourable to the Zaghloul Delegation It was, therefore, open to question whether the members would be well advised to identify themselves with a clamour that was not necessarily endorsed by the Moderates, whom they more directly represented. At best the question of the Protectorate was a controversy over a word. The aim of the negotiators was to prepare the ground for a treaty which would regulate the relations between Egypt and Great Britain on hard-and-fast lines. When the actual terms had been agreed upon, as being satisfactory to both parties, it would be immaterial whether some people chose to maintain that the Protectorate had been abolished or that it had been perpetuated. The only thing that will count will be the definite wording of the treaty. Accordingly the Delegates allowed themselves to be persuaded that the preliminary discussions had been advanced as far as was feasible, and they were advised to return again to Egypt with a view to creating a favourable atmosphere for the official negotiations. In Egypt they would be in close touch once more with Egyptian opinion, and would be able to decide to what extent fuller consideration of the subject by the public since they had left had strengthened their hands, or called for a further campaign in support of a policy on which they had set the seal of their own approval. With regard to the Protectorate, they would be able to find out whether the majority of the people were really as concerned over the word as they imagined, or whether in the light of subsequent developments there was not some misgiving lest Egypt might be left all at once too severely to its own resources. In either case the argument held good that it would be the wording of the treaty that determined the status of the country, and not popular interpretations of vague terminology. If the Delegates choose to maintain that the terms of the agreement nullified the Protectorate no one will challenge the expression of their opinion.

In Great Britain there can hardly be any doubt that people will see the wisdom of the Mission's contentions regarding phraseology at this stage. After very laborious negotiations a measure of understanding had been reached. To have the balance of that agreement upset by the grant of a new concession, even if Great Britain set no great store on the point, would merely encourage the extremists to make further requests, and there would be no finality. It was clearly a mistake on the part of the Delegation to lend itself to extremist clamour, and the fact that it was not unanimous on the subject is proof that moderate opinion in Egypt is now wholly on the side of Lord Milner's Mission.

There remains the question of the reception likely to be given to Lord Milner's recommendations in this country. In regard to this, perhaps all that can be usefully said is that there is no need to take any expression of opinion very seriously before the report has been submitted, and has been considered in its entirety. As far as can be gathered at present, there has been a tendency, possibly in the Cabinet as well as outside, to fasten upon one or another point without reference to the recommendations as a whole. The mission, it is understood, is now completing its report with all the speed possible on the part of men engaged in other work as well. When the report is submitted and published there will be time to consider carefully the proposed terms of an Anglo-Egyptian agreement in the light of Egypt's well-being, of Egyptian aspirations, and of the interests of the British Empire, not forgetting the views of the British community in Egypt.

## MODERN EGYPT.

Lecturing at the School of Oriental Studies, London, on November 9, Mr. D. A. Cameron said that in modern Egypt there were several communities differing in race, religion, and language, but all Egyptians. Out of the twelve million people, ten million were peasantry. These were Moslems, and so were a large part of the town population; but whereas the peasantry were lightly taxed and prosperous, the Moslems of Cairo and Alexandria suffered from the fact that Ismail had given away the best urban lands in those cities to wealthy foreign colonies. For forty years the foreigners had lived in cities with broad streets, well watered and otherwise tended, while the native population was cramped and overcrowded. This was one cause of present discontent. At the time of the original Moslem conquest a small portion of the population, chiefly in Assiout, had retained the Christian religion; their descendants were the Copts. These were like the Moslem population in most respects, and their women went even more closely veiled. Under the native rulers the Copts had been the account keepers of the country. The Jews were Sephardim Jews; they were quiet, law abiding, benevolent, of the highest integrity—people whom to know was to respect. The Greeks were a great intellectual force in Egypt; they were mostly born in the country. As a community they taxed themselves highly to give a real education to their children, and by frugality and temperance they acquired immense wealth. In every town in the Delta where there was any chance of making a profit a Greek community existed. The Levantines were people of French, Italian, or other west European descent, whose families had been settled in Egypt for several generations; they were thoroughly Egyptian. The wealth of the country belonged to the Levantines, Jews, and Greeks.

Speaking of the Capitulations, Mr. Cameron said these had originated in the time of Suleiman the Magnificent. The Moslems found they could not trade without foreign assistance, and set apart a walled enclosure in certain towns where foreigners could live and carry on the trade of the country. To-day the foreigner in Egypt claimed to be treated as a superior being. He insisted on security for himself and his bank. The trade of Egypt was almost entirely in the hands of foreigners, and the Capitulations were part of the price that had to be paid for carrying on that trade. Practically the foreigners were untaxed. There was a small house duty, and if a man held land there was a small land tax; but there were no taxes on trade. Foreigners had made immense wealth out of Egypt while paying scarcely anything towards the upkeep of the country; whereas if they had been taxed the Egyptian debt could have been paid off. But if the foreigner was taxed he would have to be represented in the Egyptian Parliament, and with his superior intelligence would rule the country.

## NEW PERSIAN CABINET.

The new Persian Cabinet, Reuter's Agency is officially informed is constituted as follows:—

| | |
|---|---|
| Prime Minister and Minister of the Interior | THE SIPAHDAR AZAM |
| Minister without Portfolio | NASR-EL-MOLK |
| Minister of Finance | AMIN-EL-MOLK |
| Minister of Justice | MIRZA SOLEIMAN KHAN |
| Minister of War | AMIR-I-NIZAM |
| Minister of Public Works | PRINCE SALAR LASHKAR |
| Minister of Posts and Telegraphs | SARDAR MOTAMED |
| Minister of Public Instruction | WAHID-EL-MOLK |
| Acting Minister for Foreign Affairs | FAHIM-OD-DOWLEH |

## Persia.

The *Times of India* of October 18 takes up a very firm attitude upon British action towards Persia. It does not beat about the bush:—

Lord Curzon declared his belief that the Anglo-Persian Agreement is in the interests of the country; also that the British Government is pressing for its submission to the Mejlis. In that Lord Curzon is perfectly sincere; he honestly believes that the Agreement is in the best interests of Persia, and that it will tend to the preservation of her integrity and independence. But that the Agreement was wisely conceived, we cannot believe. It is largely distrusted in Persia, save by the men who hoped to touch for their personal benefit the subsidies and loans made under it. It is still more largely distrusted abroad; it is regarded as an attempt to stake out in Persia privileged zones, and was a strong factor in producing in the United States suspicions that British policy was inconsistent with bona fides under the League of Nations. It is distrusted in India, where it is regarded as bringing Persia within the hegemony of the Empire. None of these things was contemplated by the authors; they have arisen in practice. One effect of this Treaty has been to encourage in Persia the most pernicious form of nationalism—that form of nationalism which rejects every form of advice from outside, yet will batten on foreign subsidies. There can be no health in Persia until this policy is ended. There can be no true nationalism without responsibility, and especially financial responsibility. To our mind there is no mental attitude more degrading than this fiery nationalism, pursued to the degree of spurning all advice, combined with the itching palm. Our policy towards Persia should be perfectly plain. It is that we have no ambitions whatsoever in that country, save to see it strong, peaceful, and independent; that we shall not in any circumstances intervene in its internal affairs; that if our help is sought, we shall gladly give it, but we shall not tender it until and unless it is sought. And above all, the policy of subsidies shall stop forthwith, and all British troops, whether called regular troops or gendarmerie, shall be recalled without delay. That is the only way in which to clear away the miasma of suspicion which now surrounds our policy; that is the only way in which to induce a sense of real responsibility amongst men who parade their uncompromising nationality on one hand and batten on our subsidies on the other. It is possible that the resolute enforcement of this policy may lead to men unfriendly to us being installed in power, that it may increase the confusions within the country itself. Those issues must be faced; there are reasons for believing that affairs in Persia must be worse before they are better, that the only way of making them permanently better is to inculcate the doctrine of real responsibility. There is the further possibility that the complete withdrawal of our influence, unless sought, may open Persia to the Bolsheviks, or the forces of Mustapha Kemal. Well, if Persia in this day of grace prefers Bolshevik rule or the inroads of Mustapha Kemal to close union with Great Britain, that is her affair. *Experientia docet;* we know what the result will be. But on the other hand there could be no more foolish policy than to sap true independence by subsidies and bribes; no more humiliating policy than to force on Persia a friendship which is accepted so far as money is concerned, but rejected in every other particular.

In Afghanistan, it says, our policy should be identical with that in Persia; and continues:—

The main point we desire to make is that there can be no peace in Central Asia as long as there is suspicion of British policy. There will always be suspicion of British policy as long as we interfere, or as long as we thrust on these peoples a friendship which they may want, but which they will not court. We must make the friendliness of our attitude perfectly clear; having done so it is for our neighbours to join hands or remain aloof at their own pleasure. We shall be met by the commonplace argument that we cannot remain indifferent to a state of chaos on our borders. Why not? What mighty interest have we in these countries which should make us worry over their internal affairs? What does it matter to us if they prefer misrule to orderly rule? We shall be met by the commonplace argument that ordered security in these lands is essential for the defence of India. Nonsense. The defence of India lies within her own strategic borders. It is not assisted by scattering small bodies of troops from Basra to Kurdistan, from the Euphrates to the Caspian Sea, or by littering the Meshed road with the bones of transport camels. It is perversely prejudiced by these adventures. The defence of India lies in securing in the country the best form of government attainable; by keeping our powder dry; by strengthening our frontiers. It does not lie in wandering all over Central Asia. Moreover, any form of government in these lands which is not genuinely responsible is bound to fail. The people, as Lord Curzon said, are burning to establish some new form of government. Well, that is their affairs; they are most nearly concerned. Until they have tried they will not learn that government is not quite the simple thing that impatient nationalists believe. The only way in which to meet this spirit is to give it full scope; we have no special responsibilities which lead us to attempt to play earthly providence to these lands.

## Our Eastern Empire.

The *New Statesman*, which has consistently opposed the policy of the British Government in Persia, is pleased to find what it calls "powerful reinforcement" of its views in the articles published recently in *The Times* by His Highness the Aga Khan. In its issue of November 13 it comments on these two articles, and proceeds to examine "that notorious document, the Esher Committee's Report." Very scathing are its remarks, and the two concluding paragraphs are written in similar fashion. Speaking of Mr. Lloyd George's Mesopotamia policy, it says:—

It raises two important considerations. One is its immediate effects on India. There is not much doubt about them. There is widespread and profound disgust in India with the Esher Committee's recommendations. Mistrust of our good faith was rife enough even before their appearance; it is redoubled to-day. "When I look at the Esher Report," says the Aga Khan, "I can well understand the suspicions of some of my countrymen. . . . We have watched with growing apprehension the vague policy of Asiatic adventure pursued, apparently without coherence and without clear direction, by the Central Government to which we have been proud to render obedience. Our misgivings have been deepened by the discovery that the views of the Government of India, still less Indian public opinion, count for little or nothing in the settlement of Imperial policy in the East. The Indian point of view, whether official or otherwise, appears to be entirely disregarded." Indians, in a word, are impatient to see a practical beginning of the reforms that are to give them the promised "Dominion status." And, as an earnest of this, they are to be sent abroad to fight for their masters' glory and their masters' oil! Is this "cooling the lava"?

The second consideration is one which touches not merely India in particular and our undertakings to India, but the whole British Empire. Our commitments in Mesopotamia have been attacked on the ground that they are a grievous burden on the British taxpayer—as indeed they are. And the burden will doubtless continue to grow under Mr. Churchill's able stewardship. But what is there beyond these present commitments? When we listen to the speeches of Ministers, and when we read such a document as the Esher Report, is it possible not to see opening out before us a splendid vista of adventurous conflict. "based partially on India and partially on home"—and partially, we would add, on Mosul? We shall very easily involve ourselves in a perilous net. There are Arabs, Kurds, Turks—not to speak of Russian Bolsheviks—to suppress, Persians to "protect," the French in Syria to quarrel with. We believe that if this Mesopotamian enterprise is to be carried on, its consequences will be a long step towards the break-up of the Empire. It is for the British people to say that it shall not be carried on. There is no decent argument in its favour. We are told that we have given pledges, that we are "trustees for the Arabs," "Keepers of the Middle East," and other high-sounding, farcical things. We are told that we cannot in honour withdraw and "leave our friends to be massacred," or that we must be in Mesopotamia in force to help the Arabs to get the oil of Mosul, or in order to defend India. All these pleas have been blown to the winds. We have given no pledges that need detain us in the country; the Arabs can very well do without us. The oil can be got without the help of British tanks and aeroplanes and armoured cars and a vast army of Indian horse and foot. And the holding of Basra affords ample security for India. We hope that the real meaning of this occupation will be appreciated in this country, as it is already appreciated in the East, before the "molten and moving lava" is in full eruption.

## "BISHOP OF EGYPT."

Reuter's Cairo correspondent writes (November 21):—The Right Rev. Llewellyn Gwynne, Bishop of Khartoum, was to-day enthroned Bishop of Egypt and the Sudan. Field-Marshal Viscount Allenby read the King's mandate, and the Bishop in Jerusalem performed the enthroning ceremony, which was of a most impressive character, Bishops of the Greek and other Eastern churches assisting. All Saints' Church, Cairo, is now officially the pro-cathedral of the new diocese.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Our Bucharest Correspondent, in his latest message, gives a very disquieting account of the agricultural outlook in Roumania. For a variety of reasons the peasants, it appears, are showing a marked reluctance to follow their normal avocation of tilling the soil, and at the time he wrote it was estimated that the sowings amounted to only seven to eight per cent. of last year's figures. Obviously a very serious position would be created if subsequent developments do not bring about a very material improvement in the estimate. If the country is to make a rapid recovery from the effects of the war the reconstruction of her oil and agricultural industries must go hand in hand. Neither alone can bring about conditions that will result in the leu being once more in the region of parity. Considerable progress is now being made in developing the oil industry, as will be evident from the latest figures, and if the efforts to improve communications meet with the success that would appear probable it will not be long before the oilfields are as fruitful a source of wealth to Roumania as they were before the war. Given progress in that direction and a bumper harvest next year and the Roumanian situation would be completely transformed. With that fact before them the Roumanian authorities may be trusted to do all that is possible to put a different complexion on the agricultural outlook.

***

Mr. Robert Miller, in his address at the general meeting of the Bengal-Nagpur Railway, referred to the large demands on the railway to expand its system to meet the growing needs of industry and commerce. The railway serves a great mineral area, while the Tata Iron and Steel Works are situated on its system. Mr. Miller pointed out that a new steel company was about to be established, and that other projects were materialising, while an immense new coal field was about to be opened up, and this would necessitate the construction of a new branch line about 150 miles in length. That, he added, would give "some idea of the extensions it will be necessary to make to meet the demands of the country for an increased supply of coal." The company has now in construction an important branch line to open up a supply of iron ore, and is about to complete an extension of the branch line to Gorumahsani for the supply of iron ore to the Tata Steel Works. In addition, the company is constructing a port at Vizagapatam, which they were confident, Mr. Miller said, "will prove a powerful factor in the development of the resources and the trade of the country generally, and will add especially to the prosperity of this railway."

***

These developments naturally mean a greatly increased demand for capital, and this, Mr. Miller pointed out, constitutes one of the principal problems before Indian railways. The capital requirements are at present met under the Railway Programme, but the amount available from this source is quite inadequate to meet the growing demand for extensions. The recently appointed Commission on the Indian Railways is to inquire into the question of the future financing of the lines, and Mr. Miller expressed the hope that the result would be the removal of difficulties on this score. Another question dealt with was the position of Indian railways from the investors' point of view. "Indian railways are, in my opinion," said Mr. Miller, "one of the best investments in the world," and he went on to remark that as regards the Bengal-Nagpur Railway it was impossible to see the end of the new traffic which was waiting to be given facilities. "In my opinion, and speaking for myself, there is no need for alarm about the future of India," he added. "Measures from which reforms are expected are on the Government table, and usually in such circumstances a certain amount of disturbance and agitation arises. I feel confident—again speaking for myself—that this trouble will pass away in time, and that India will settle down calmly to new conditions."

***

The paramount necessity for the reduction of expenditure by Governments at the present time was emphasised by Mr. McKenna in his address last week at Manchester University on "International Exchange." Stability of exchange, which is essential in the interests of international trade, can only be secured, he declared, "among nations whose Governments content themselves with an expenditure which is well within their power to meet without borrowing and without excessive taxation." He showed that in recent months the theory that prices levels are, generally speaking, determined by the relation between the purchasing power of a community and the available quantity of commodities has not been borne out. He gave two instances of this, one of which indicated *prima facie* that production had increased, whereas in reality it had expanded, while in the other case the deduction according to theory was either that production had increased more or diminished less than purchasing power, neither conclusion coinciding with the facts. The new factor which, in Mr. McKenna's view, has to be taken into consideration is the increased rate at which a nation's income is being spent. The present heavy taxation—a factor which affects all countries since the war—in Mr. McKenna's words, will "affect production injuriously, increase purchasing power, and raise the velocity of expenditure, and for all three reasons will tend to drive up prices."

***

As to the future, Mr. McKenna's conclusion is that the League of Nations, with its promise of peace and greatly reduced expenditure on armaments, offers the only hope of stable exchanges. Recent Budgets almost universally give point to this view. Though the greatest war in history is over, and the chief menace to peace removed, yet at a time when economy is absolutely vital, if the nations are to recover from the effects of the war, we still find large votes for armaments. And out of sixteen European countries only one this year shows a balance on the Budget! The recommendations of the Brussels Financial Conference regarding national finance unfortunately came too late to bear fruit until next year, and one can only hope that when the next series of Budgets have appeared their contents will afford unmistakable evidence that the nations concerned have read the writing on the wall correctly.

***

Some idea of the difficulties with which banking and other enterprises have had to contend in Turkey in recent months may be gathered from Lord Bessborough's speech at the general meeting of the Imperial Ottoman Bank. Political changes at Constantinople, the Anatolian disturbances, the closing of the Russian and other markets are among the adverse factors that have had to be faced. "Taking into consideration the disturbed state of Turkey and the general condition of affairs in the commercial and financial world," said Lord Bessborough, "we regard the result shown in the balance-sheet as highly satisfactory." A balance to the credit of the profit and loss account of £206,404 is shown for the year ended December 31, which is being carried forward. Lord Bessborough gave details of the way in which the committee have coped with the depreciation of Turkish and French currency, and pointed out that since the balance-sheet was made up further adjustments had been necessitated by the continued depreciation in the franc and the Turkish pound. All things considered, the bank has evidently come out of the difficult war period extremely well, and Lord Bessborough was able to state that gratifying results had been attained for the first six months of the present year.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## GREECE.

ATHENS, November 6.

**Adoption of Metric System.**

A new law has been passed by the Chamber of Deputies and published in the Government *Gazette* by which the metric system of weights and measures will shortly come into force throughout the country. Owners of old weights and measures must then deliver same to the authorities against payment of the value of the metal, while the Government will, on the other hand, supply the new weights and measures upon payment of their value. All weights and measures will be checked and stamped by the authorities prior to being used. They will also be examined annually, and, if found correct, re-stamped. Persons who do not keep a shop, but sell their commodities in the street, must produce their weights and measures to the nearest competent Department every April for checking and stamping. Persons continuing to use old weights and measures after the international metric system comes into force, or persons using unstamped weights and measures, will be severely dealt with. Within three months from the date upon which this law will come into force all documents submitted to the Government authorities must contain the new weights and measures: also merchants must apply them in their commercial books, advertisements and so forth.

New weights and measures will be supplied to the Government by auction, and local manufacturers will be given preference in cases where the prices quoted do not exceed foreign prices, plus five per cent. representing customs duty.

**Passengers from Abroad.**

The Ministry for Foreign Affairs has sent a circular to the Piræus port authorities to the effect that no passenger arriving from abroad must be allowed to land unless his passport has been duly viséd by the competent Hellenic consular authorities.

**More Paper Money.**

Speaking to a journalist, the Minister of Finance, M. Negropontis, stated that the signing of the convention between the Government and the National Bank of Greece with regard to the putting into circulation of a further sum of 400 million drachmæ, will take place in a few days. In any case, the approval of the Financial International Commission would be necessary.

## ROUMANIA.

BUCHAREST, November 7.

**Abnormal Frosts.**

During the last few days a severe frost has set in, such as has not been felt for sixty years at this period of the year. The thermometer showed from 9 to 12 degrees of frost, whilst up in the north towards Bucovina as much as 22 degrees were registered. Some rivers had a coating of ice from 10 to 15 cms. thick. This cold snap came very suddenly, and caught many people unprepared, especially as regards firewood, and as usual, the poor suffered more acutely in consequence.

Owing to the frost, the autumn sowings have been stopped. Up to now only 250,000 hectares—mostly wheat—have been sown. The frost was harmful to the seeds, as there was not sufficient snow to protect the sowings, and all vegetables not yet gathered are considered to be lost.

**Grave Agricultural Outlook.**

Since last week the general outlook has become very gloomy. The peasants seem very unwilling to work the soil. According to official news only seven to eight per cent. of arable land has been sown this year, as compared with last year's figures. There are many reasons for this. In the first place, there is the uncertainty as to the final ownership of the various allotments. Secondly, the peasants have not yet thrown off the "after-the-war" spirit. Then, owing to the bad state of the railway transport, most of the peasants are now occupied with road transport, which they have found to be more remunerative than farming. They have also gone in for commercial transactions, especially in milk, cheese, eggs, poultry, etc. As the peasant feels that he is his own landowner, he will not work on the big landowners' farms, and in many cases his own, with the result that there is a poor prospect of a good crop. This is causing a further depreciation of the lei, and is not improving the general situation at all. Everyone is out for himself and to make as much as he can, without considering the future of the country.

**Railways Under Military Control.**

The Government has decided to militarise the railways in order to put a stop to the general disorganisation and unrest and to prevent further strikes. This decision of the Ministers' Council appeared in the *Monitorul Oficial* of November 3, the contents of which ran as follows: 1. The entire staff of the Roumanian State Railways in the old kingdom, as well as in the new provinces, will come under the military régime, beginning from November 3, 1920. 2. The personnel who come under the groups which can be mobilised will be called up, with the obligation of responding within 24 hours from receipt of the order. 3. All those who are not liable to mobilisation, or who are over 46 and under 65 years of age, will have their services requisitioned, and both groups will continue to hold the positions occupied by them up till now, subject to military control. 4. In case of absence from or a refusal to do their duty, offenders will be punished according to military law.

It will be interesting to see how far the new régime will go to improve the deplorable situation now existing on the railways.

**Miscellaneous.**

The Ministry of Communications has received a credit for 5,313,000 lei for the construction of a new pipeline running from Baicoi to Giurgiu.

The Ministry of Railways has asked the Ministry of Finance to grant a credit of 153 million lei in order to pay for the 60 locomotives ordered from England.

## YUGOSLAVIA.

BELGRADE, November 11.

**The Budget.**

The Crown Prince has signed the provisional finance law for the year 1920-1921. The part dealing with the proposed tax on turnover has been dealt with in an earlier letter, together with the new customs and excise duties. Among other things, finance houses and limited liability companies will pay 2 per cent. on their gross revenue, as shown in their annual balance-sheets. On the urgent representations of Dr. Koroshets, certain local privileges have been granted to Slovenia and certain districts in Croatia. The law of State monopolies has been extended throughout the new provinces, but will be applied gradually during the years 1921-1922; the working out of the details has been entrusted to a special commission.

The estimates attain the respectable total of 4,800,000,000 dinars. This is greatly in excess of the original estimates owing to the very large credits for grants towards the cost of living to all State employees. The expenditure under this head will amount to 220,000,000 dinars, and 30,000,000 is earmarked for arrears of war pensions.

**Imports Four Times Exports.**

According to a return of the General Director of Customs, the exports from Yugoslavia for the first six months of the current year amounted to 465,086,035 dinars, while the value of imports for the same period is no less than 1,850,164,633 dinars, or four times as great as the exports. These figures explain the present rate of exchange, which is becoming worse every day.

## BULGARIA.

SOFIA, November 14.

**Reduction in Export Duties on Tobacco.**

By a vote of the Chamber, the customs duties on the export of Bulgarian tobacco have been reduced by 50 per cent.

**The Final Estimates.**

The Budget for the present financial year, as adopted by the Chamber, is as follows:—The expenditure amounts to 2,905,810,880 levas, consisting of Civil List, etc., 2,535,011 levas; Public Debt, 858,087,782; Ministries—Foreign Affairs, 47,158,365; Interior, 76,895,980; Public Health, 72,218,890; Public Instruction, 221,268,200; Exchequer, 136,791,091; Justice, 67,138,030; War Office, 538,159,712; Commerce, Industry and Labour, 236,077,902; Agriculture and Domains, 72,730,390; Public Works, 172,624,230; and Railways, Posts, Telegraphs, and Telephones, 364,770,845.

The revenues are estimated at 2,613,530,000 levas, made up as follows:—Direct taxes, 270,000,000; indirect taxes, 907,000,000; State monopolies, 228,000,000; various taxes, 95,650,000; fines and confiscations, 12,000,000; railways, posts, telegraphs, etc., 400,260,000; domains, 279,770,000; municipalities, etc., 20,500,000; sundries, 399,450,000.

## NEW ZAGREB BANK.

It is proposed to establish a new bank at Zagreb under the title of Shedisnje Zadruzna Banka, with a capital of 100,000,000 kronen, for the purpose of financing and organising the agricultural and economic output of the western districts of Yugoslavia. The chief founder of this bank is the Croatian-Slavonian Agricultural Co-operative Society of Zagreb, an organisation of considerable influence with wide connections with the peasant and agricultural societies in Croatia, Bosnia, Dalmatia and Slavonia. It is understood that the bank will be financed by the First Croatian Savings Bank and by other banks associated with it.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge*

*Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

**Agents Wanted Abroad.**

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be re-directed to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

102. A stamp collector wishes to purchase used Austrian stamps prior to the 1882 issue. Stamp dealers in the liberated provinces of Austria are asked to send bulk packages of such stamps to the care of the Editor of THE NEAR EAST, with the price in kronen of each stamp or price per dozen, per 100, etc., of each kind. All stamps required will be paid for at the price indicated and the rest returned. Newspaper stamps are not required, but rare postmarks should be included.

103. An Athens firm invites publishers of periodicals dealing with yarns (reports on local markets and world output) and cottons to send specimen copies with a view to its becoming a permanent subscriber.

104. A Greek firm is establishing an electric light station in Macedonia, and wishes to get into touch with firms dealing in the necessary machinery.

105. Engineering and general contractor in Mosul, Mesopotamia, wishes to get into touch with manufacturers in Great Britain.

106. Old-established English trading company with branches in Mesopotamia and Persia is willing to accept agencies there for manufacturers, etc.

107. Old established Turkish firm handling general stores situated in Smyrna and having branches in the interior invites exporters to quote prices for groceries. The firm also acts as agents for articles of general consumption in Asia Minor.

108. Hemp manufacturer in Croatia wishes to get into touch with rope manufacturers who would purchase hemp.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

## LANCASHIRE COTTON.

**Business Very Restricted.**

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

The past week has been notable for a further marked slump in raw cotton rates, and business in yarn and cloth has been reduced to very small dimensions. A nervous tone has prevailed, and there has been no confidence on the part of buyers. The feeling is growing that values must be somewhere near the bottom, but operators have not sufficient courage to purchase with any freedom. No particular change can be recorded in the outlook for the Egyptian cotton crop, but prices are distinctly easier, and wide fluctuations are taking place in futures. Trade demand remains poor, and spinners, owing to the continued absence of business in yarns, have purchased very sparingly. There has been distinct weakness in American cotton rates, in both New York and Liverpool. The crop in the United States is doing very well, and there is every probability of a substantial yield. Spinners of Egyptian yarns in Lancashire continue to work only four days a week, and even with the curtailment of production difficulty is experienced in clearing the output of the mills. There has been no activity worth mentioning in piece goods for the Near Eastern outlets. Egypt is overstocked, and Manchester shippers have been requested to stop shipments for the time being. The political situation in Europe is having the effect of thoroughly upsetting trade. India continues to provide an extensive inquiry, especially in light fabrics for Calcutta, but actual business has tended to fall off. Nothing of any moment has been done for China. Exporters to South America have looked on. There is a tendency for more looms to be started in Blackburn and Great Harwood, but unemployment in Burnley and district is extensive. American yarns are much lower in price than a week ago. Home users continue to purchase from hand to mouth. There is more pressure for delivery instructions. A few more orders have been booked in dyed yarns for India.

**Rupee Exchange.**

The Manchester Chamber of Commerce has published further information with regard to the cables which have recently been received from various trade associations in India relating to the critical condition of trade, which is largely due to the existing rate of exchange. The Chamber of Commerce has informed the India Office that traders in India consider themselves justified in any action which they may take in the way of resisting the payment of accounts until the exchange is more favourable, in view of their belief that the Government had promised a minimum rate of exchange of 2s. a rupee. The India Office, in reply, states that the Chamber is doubtless aware that the decision to adopt the recommendation of the Majority Report of the Indian Currency Committee of 1919, which had in view the fixation of the exchange value of the rupee at 2s., was announced on February 2, since which date until the end of September drafts on London were sold by the Government of India to the extent of approximately £50,000,000, with a view to the support of exchange. These large sales of sterling have not, for various reasons, in particular on account of the stagnation of the export, and the unusual strength of the import trade in India in recent months, operated effectively to check the downward movement of exchange. The Chamber is assured by the India Office that the situation is being constantly watched.

Messrs. D. Mouradian and Bigio, Ltd., manufacturers and calico printers, of 119 Portland Street, Manchester, announce that the name of the company has been changed to Maurice Bigio and Co., Ltd.

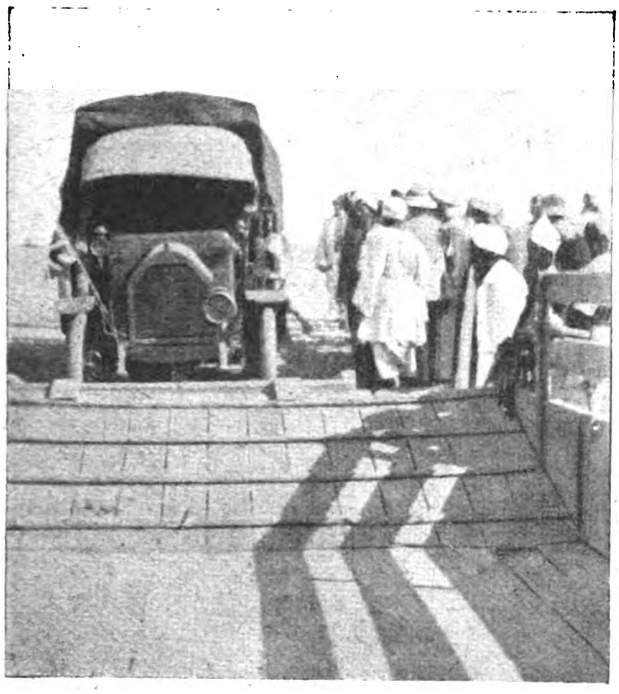
# MOTORING THROUGH A DESERT.

## The Solution of the Transport Problem.

*By Joseph Rhodes, A.M.I.Mech.E., A.M.I.Auto.E., S.G.S. (Author of "The Transport Question in the Sudan," etc.)*

At the present moment the rebellion in Mesopotamia has again brought into prominence the use of armoured motor-cars on the desert. There is no doubt that cars will play a most important part in the policing and administrating of all desert countries in the future. Many journeys have been accomplished which were considered until a short time ago to be impossible. I recently had an interesting journey



**Running on to the barge preparatory to crossing the Nile.**

through the Sudan, and a brief description of the run will, I think, be of interest to readers of THE NEAR EAST.

The car started from Asmora, the capital of Eritrea, and travelled over the rugged country to Kassala, the Eastern frontier of the Sudan, then through the tropical Sudan desert viâ Gedaref and Medani to Khartoum on the Nile, a distance of 600 miles. It returned by the same route without mishap. A glance at the map will convey some idea of the achievement. To accomplish such a pioneer journey over broken country, rugged hills, and across deep, sandy watercourses speaks well for the capabilities of the modern car.

The car was of the light lorry type, 25-35 h.p. The passengers were six in number, three Europeans and three natives. The Europeans were comfortably accommodated on the driving seat, and the servants were hanging on as best they could. Apart from passengers the car carried a load of 1½ tons. Thus there was more than three tons gross load on the tyres.

Camels and other draught animals are already under heavy demand, and it is realised that no great economic development can take place in districts dependent on animal transport. It is also of paramount importance that Government officials in outlying districts should be kept in rapid communication with their distant headquarters. The recent capture by the Arabs of a district political officer in Mesopotamia has emphasised this fact. A car will do in one day a journey which would take riding camels at least four days.

The vehicle required for desert work must be capable of negotiating the roughest roads, working with reliability under extreme conditions of climate, and carrying a good load, as in addition to transporting officials it may be required for transport. Stores, kit, spare tyres, tools, spare parts, water, large quantity of petrol, stout wood planks, and picks and shovels have to be always carried. The cooling system of the car must be ample, and the radiator extra large.

On the journey already referred to our first obstacle was the loose sand in the dried-up bed of the Gash River, which is 500 yards wide at the crossing. Our car plunged through the soft sand, but owing to the heavy load the wheels sank therein to a depth of 9 ins. to 1ft. We had anticipated this difficulty, and had brought two rolls of strongly woven wire-netting, which we laid along the surface of the sand, with the ends under the driving wheels. The start thus obtained allowed the car to travel 40 or 50 yards before the sand clogged the wheels again.

The repetition of this expedient enabled the car to reach the further bank after a 50-minutes' test of our engine-power. The road from here for 40 miles was over hard, arid plain, where we could proceed at full speed. The mountains of Abyssinia were on our left, and the car ran beautifully over ground covered with jute and thorn bushes. As we neared the River Atbara the speed had to be reduced owing to the presence of gullies across the track. Occasionally the crossing of these entailed a little spade work. We reached the river bank and ran gently over the large stones to the water. One of the natives forded in front of the car, which crossed the stream without any trouble, although the water washed over the bottom of the car body.

In the afternoon it took us an hour to get across a deep ravine, and we had to use our netting again on sand. In the evening we were travelling through thorn scrub when one of the front tyres burst. We had our spare wheel on in a few minutes. Darkness came on, and we proceeded with headlights to the desert village of Azaza.

The country was very rugged for seventeen miles, then we entered the town of Gedaref, a district headquarters of the Sudan. We left at 9.30 next day, and the next sixty miles was the worst road in the world. There are wide sun-cracks in the soil, and every few yards the car bumped into a hole. We averaged fourteen miles an hour. Two tyres burst during the day.

The road is perfectly straight and most monotonous. Mile after mile of dark-brown arid plain, without life, and covered with dry, yellow, coarse grass and thorn bushes. Occasionally camel caravans pass along. We reached the Blue Nile the following day, and crossed on a barge at Medani. We stayed at Medani for refreshments, and departed at noon The journey from there to Khartoum was mostly at full speed, and we marked off on the map the towns and villages passed. Towards evening we sighted the monuments of Khartoum, and at 6.30 p.m. were passing Khartoum Railway station.

We had accomplished in the last three and a-half days a journey which takes twelve days by riding camel. The car

**The cobblestoned bed of the River Atbara.**

had dual driving wheels and two spare wheels. There was not any engine trouble, and to carry out such a journey so successfully obviously emphasises the point that cars are an urgent necessity in the Sudan, Uganda, Mesopotamia, Rhodesia, and such countries.

# ENGINEERING.

## MORE OLYMPIA MODELS.

(From Our Own Correspondent.)

There was a certain interest attached to many of the exhibits at the Olympia Motor Show which was of a somewhat wider character than that generally found at motor exhibits, in that it illustrated vividly the curious frame of mind of many whose very livelihood depends on the success of the motor industry. It is fairly obvious that if orders are not obtained for certain makes of cars, the staffs employed will have to be curtailed, even if the factories producing them have not to be shut down altogether. Yet so far as a certain section of workpeople were concerned they were quite prepared to jeopardise their employment for the whole of next season for the sake of some triviality, some question of a real or fancied grievance which was as nothing compared with an issue so large as continued employment not only for themselves, but for the numerous other sections of workpeople concerned. A few of the coachbuilders were quite prepared to prevent several large firms from exhibiting their products at Olympia, although they must have realised all that this would have meant to the trade generally. To give only one instance of this, it was only by the courtesy of private owners that the great firm of Rolls-Royce, Ltd., were able to exhibit their latest cars. The firm's exhibit had to be rearranged entirely, owing to the strike mentioned; but two of the models shown closely resembled those which the firm had originally intended to stage.

### Rolls-Royce, Ltd.

The cars which were shown by this famous firm, whose name is a household word in motoring circles throughout the world, naturally attracted a great deal of attention, and the limousine, with a body by Messrs. Barker and Co., was almost the last word in motoring comfort. The design was that known as a *coupé de ville*, and was painted dark grey with black mouldings and black domed wings. The seating accommodation provided for two persons on the main seat and two on extra seats which fold under the floor when not in use. A detachable extension covered the front seat. An enclosed cabriolet, with body by the same firm of coachbuilders, was also shown in which the seating accommodation provided for two on the main seats and two on seats of the armchair type in front. Also shown was an open touring car with body by Messrs. Hooper and Co., with seating for four persons, including the driver. This presented a very smart appearance, being finished in yellow, with black valances and black wings, and upholstering in red leather. In connection with these the firm ask me to point out that the chassis were of the latest type and did not differ in any respect from those which they originally intended to show.

Emphasis must be placed on the fact that the Rolls-Royce policy does not provide for the production of a model of entirely new design at any given or particular period of the year. In this I hold the opinion, which is perhaps not universally held, that the firm are acting wisely. It is, of course, a good thing to be able to advertise that a firm will be showing something entirely new, or at any rate greatly improved, at the Motor Show. On the other hand, it is certainly a strong selling point to be able to assure a buyer that, at no matter what moment he makes his purchase, he will be supplied with a chassis which embodies all the improvements, whether in design or material, that the firm have been able to effect up to the date of the sale. The Rolls-Royce Company's productions are not known as 1920 or 1921 models. It is the endeavour of this peculiarly progressive firm to improve their chassis immediately any improvements which it is thought desirable to incorporate have passed the unusually severe endurance and other tests imposed upon them by the makers. I have just had a letter from the company emphasising this, and stating definitely that it is not their custom to withhold any improvements in order to show them for the first time at the motor exhibitions.

From a close examination of the engineering features of the Rolls-Royce chassis I have no hesitation in saying that in my opinion the products of the firm have now reached a state of perfection never before attained. Whether it be the engine, or the steering, or the springing, or the gear-changing mechanism, it is impossible to imagine anything that could be better designed, better made, or formed of better material. And yet improvements have been made in the past on parts which seemed, when first produced, to be the last word in quality production; and doubtless, although it is equally impossible to imagine how this can be done, improvements on the present design will eventually be made.

Something may be said here as to the quality of the materials used by the firm in the construction of their engines and chassis. Certain tests which I have been privileged to witness have convinced me as to their general excellence; but I am permitted to say now that there is no metal, no alloy of metals which might conceivably be an improvement which is not tested at the firm's laboratories and in their works with extraordinary pains; and should it be found better than something already used it is adopted, no matter at what cost, nor how much trouble may be involved in the change-over. In a nutshell, the quality of the whole of the materials used is superior in most parts of the chassis to those employed in pre-war days, and in no single instance is any material used that is inferior in any respect to that made use of before 1914. Tests which are now imposed on all material in the Rolls-Royce chassis are of so severe a nature that material which before the war was passed as being perfectly satisfactory is now condemned by the additional tests, and material of a superior quality is being used in its stead. Incidentally, although the fact is perhaps generally known, I may mention that there is still only one model of Rolls-Royce chassis—namely, the 40-50 horse-power—fitted with the remarkably efficient six-cylinder Rolls-Royce engine.

### Vauxhall Cars.

This well-known firm inform me that during the coming season they will continue to concentrate on their "D" and "E" types of chassis. The former of these is of 25 h.p. and the latter of 30-98 h.p., and is describable as a sporting type.

Messrs. Vauxhall Motors, Limited, have made no fundamental change in either of these two popular and well-tried designs during 1920. Certain points have been improved and minor alterations effected to add to the general efficiency of the cars, but so far as my examination went I was unable to see where any really important improvement could be made. As I said on another occasion, I think everyone knows the high reputation of this firm, and knows also that the 25 h.p. Vauxhall has maintained that reputation for a high-performance capacity of which the more noticeable features are smooth and steady running, light steering, excellent acceleration, and ample braking power. The engine, too, has a liveliness and reserve of power which enable a high average speed to be maintained during long journeys over roads and gradients of all kinds. Further, the 30-98 Vauxhall has distinguished itself in competition work, and the firm still holds the fastest time record for the well-known Shelsley Walsh hill climb.

At the show I was particularly interested in the Vauxhall-Windsor interior drive limousine on a 25 h.p. chassis. It is rather lighter in weight than the Vauxhall-Kington, and the arrangements in my opinion are such as must appeal to every car owner. The windows are of the horizontally sliding type, which gives a very wide range of control over the admission of air, and by their means ample ventilation can be ensured without any need for the passengers to sit exposed to draught. The lines of the body are, so far as I know, unique. The "tumble-home" removes to a large extent the shut-in feeling that obtains when riding in a roofed car that cuts off the sky-view. The joints, pillars, framing, and other parts depend for their stability rather upon the skill with which they are designed than upon their actual dimensions, a fact which is particularly noticeable in the V-shaped front and screen.

This particular car will seat four persons in comfort, and entrance is rendered particularly easy by the Vauxhall patent radially moving front seat. There is a freedom from rattle and drumming which is very marked even in comparison with the excellent closed coachwork which characterises most modern cars. The colour is Vauxhall green in the upper part, and the wings and mouldings are black.

This was, of course, not the only model shown. There was a strikingly handsome Vauxhall-Velox limousine on a 30-98 chassis, and I understand that this is the first time a limousine body has been built by the firm for this type of chassis. Obviously, a limousine with generous seating accommodation cannot be mounted on this particular type of chassis, and the seating accommodation consequently is for two persons in front, and either one or two in the rear, as the back seat is somewhat narrow. The complete enclosure provided enables this very fast and powerful car to be used in perfect comfort even in the coldest or roughest weather, and readers interested should write to the firm for further particulars of the production. As regards finish, the colour of the model shown was royal blue, with wings, frame, and moulding in black. The bonnet was of polished aluminium and the car was upholstered in royal blue morocco leather, with roof and sides lined to match.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—There are few new features to report. For most varieties of dried fruit a strong demand continues. Business in currants has not been quite so animated, except as regards Vostizzas, which are taken up very freely. Smyrna sultanas have been in firm request, and as supplies are extremely limited the tendency is towards a higher level of values. A good trade is being done in figs, especially Naturals, which are in plentiful supply, and consequently are coming to business at somewhat easier rates.

Coffee.—Prices show considerable reductions. The futures market has remained firm. Quotations are: December, 54s. 6d.; March, 53s. 3d.; May, 53s. 3d.; July, 53s. 3d.

Oilcakes.—Linseed cake has declined 14s. to 22s., while cottonseed cake is 1s. 6d. down at 11s. 6d. Other transactions include ground nut cake at 21s., cottonseed cake at 19s., and coconut cake at 15s. Palm kernel cake at 12s. is in poor demand.

Sugar.—The free market remains steady. West Indian crystallised is unaltered at 83s., while American granulated remains unchanged at 95s. White Mauritius is quoted at 94s. There has been a good demand for home refined at the official prices.

Oilseeds.—Prices on the whole have declined. Indian linseed has been done at 30s. and rapeseed is lower, with Toria at 34s. and bold Ferozepore at 33s. Cottonseed is quieter. Indian has come to business at 11s., and Egyptian has been done at 16s. 6d.

Seed Oils.—Prices have declined still further. Linseed oil has been done at 23s. to 35s. Refined rape oil is 6s. less at 86s., and the crude variety has declined 3s. at 72s. Turpentine has risen 4s. at 114s.

## CURRENT PRICES.

*General Produce.*—Bacon, 217s. 9d. cwt.; butter, 336s. cwt.; cheese, 170s. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 5½d. lb.; cocoa (Ceylon, good to fine), 140s. cwt.; coffee (Costa Rica), 113s. 6d. cwt.; East India bold, 117s. 6d. cwt.; Mocha, 147s. 6d. cwt.; eggs, 42s. per 120; ginger (washed Cochin), 57s. 6d. cwt.; hams, 220s. cwt.; lard, 164s. 3s. cwt.; nutmegs, 1s. 0¼d., 110's to 180's; pepper (Singapore black), 5½d. lb.; and Muntok white, 1s. 2¼. lb.; raisins (Valencia), 136s. cwt.; sugar (granulated), 96s. cwt.; No. 1 cubes, 100s. cwt.; Mauritius (free), 93s. 6d. cwt.; sultanas (Smyrna), 142s. cwt.; tapioca (Singapore), 2 1-16d. lb.; tea (Indian), 6¾d. lb.; Ceylon, 7½d. lb.; Java, 4¾d. lb.; wheat (Australian), 121s. 6d. qr.; English (white), 94s. qr.

*Metals.*—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard), £88 18s. 9d. ton; electro (wire bars), £100 10s. ton; gold bars, 121s. 8d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed), 260s. ton; nickel, £230 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £15 15s. bottle; silver bars, 53¾d. oz.; spelter (G.O.B.), £36 15s. ton; tin (standard), £247 15s.; wolfram, 23s. 9d. unit; zinc sheets, £56 10s.

*Chemicals.*—Acids:—Boric, 75s. cwt.; oxalic, 1s. 11½d. lb.; citric, 3s. 5½d. lb.; tartaric, 2s. 6½d. lb.; ammonia, £31 6s. 9d. ton; benzole (standard), 3s. 5½d. gallon; bleaching powder (35 per cent.), £27 10s. ton; borax crystals, 41s. cwt.; cream of tartar, 235s. cwt.; glycerine (crude 80 per cent.), £105 ton; industrial (1250 per cent.), £155 ton; lead (red), £56 10s. ton; white dry, £63 10s. ton; potassium:—bichromate, 1s. 7½d. lb.; chlorate, 8½d. lb.; caustic, £105 ton; nitrate, £70 ton; permanganate, 3s. 2½d. lb.; prussiato yellow, 1s. 9½d. lb.; sulphate (90°), £32 ton; sodium:—crystals, 190s. ton; bicarbonate, £13 15s. ton; bichromate, 1s. 1½d. lb.; alkali (58 per cent), £16 5s. ton; chlorate, 5d. lb.; caustic, £30 10s.; hyposulphate, £36 ton; prussiate, 1s. 1½d. lb.; nitrate, £23 5s. ton; sulph. iron, 160s. ton; sulph. copper, £41 10s. ton.

*Miscellaneous.*—Cotton (American, good midd.), 16.60d. lb.; linseed (La Plata), £29 15s. ton; oils: linseed, £63 ton; soya, £67 5s. ton; cotton (crude), £49 ton; olive, 21s. 6d. gallon; ground nut, £80 10s. ton; palm, £56 10s. ton; rape (crude), £74 10s. ton; palm kernels, £36 2s. 6d. ton; petroleum, 2s. 3d. gallon; rape (Toria), £34 7s. 6d. ton; rubber: plantation (No. 1 crêpe), 1s. 1¾d. lb.; smoked sheet, 1s. 0½d. lb.; fine hard Para, 1s. 5½d. lb.; Turpentine (American), 120s. cwt.

## SUDAN PRODUCE.

**Gum.**

The C.E.B. report for September states that the exports during the month amounted to 42,376 kilos of bleached, of the value of £E2,426; 686,649 kilos of hashab, of the value of £E33,201; and 107,936 kilos of talh, of the value of £E2,842, via Port Sudan; and 16,653 kilos of hashab of the value of £E810, via Halfa.

Kordofan Province.—1,751 kantars were sold in El Obeid market during September, as against 5,290 kantars during the same month last year, at an average price of £E1.338 per kantar of 100 rottles. Arrivals from Nahud were 736 as against 3,203 kantars during September last year. No gum was sold either at Um Ruaba or Rahad during September.

**Dura.**

Blue Nile Province.—More dura was brought into the Morodas than during the previous months, and there was a considerable drop in prices.

Darfur Province.—The price of dura during the month was P.T.8 per kirat, and of dukn and maize P.T.6 and 7 respectively.

Kordofan Province.—The following quantities of grain were sold in El Obeid market during the month (in ardebs of 420 rottles 189 kilos):—245 ardebs of dukn, 161 ardebs of dura.

Sennar Province.—During the month a small amount of old dura was brought in by natives for sale at P.T.105-120 the Government ardeb (300 rottles—135 kilos). The new dura is not yet threshed.

**Wheat.**

Dongola Province.—The price of wheat was P.T.15 to 16 the kirat.

**Sesame.**

Sennar Province.—During the month dealing in sesame is beginning, and the opening price is expected to be about P.T.450 to 500 per local ardeb of 480 rottles (216 kilos).

**Dates.**

Dongola Province.—A heavy date crop has been harvested, but the price is low. New crops fetch about P.T.13 the meila.

**Live Stock, Hides, and Skins.**

Berber Province.—192 cattle and 4,716 sheep and goats were sold in Damer market. Average prices fell to £E10 and £E2 respectively.

Kassala Province.—Twenty cattle and 1,133 sheep were exported from Kassala to the interior of the Sudan.

Red Sea Province.—Nine sheep and 148 head of cattle were exported via Port Sudan.

## LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended November 18:—Although offers from Alexandria have been materially reduced, there is no disposition on the part of spinners to enter into commitments, and whilst not wanting to adopt a too pessimistic tone, a general survey of the present trade conditions shows little hope of any immediate improvement. Spot and forward business has fallen to negligible proportions. Quite a fair inquiry has been witnessed here, chiefly for uppers, types 1-4, and for Sakellaridis, types 35-48, but the amount of business resulting was disappointingly small. A steady market seems a thing of the past, and spinners continue to supply their bare needs and refuse to buy a bale more. The only way to effect sales is to undercut the market, hence quotations tumble day by day. For example, good uppers are officially quoted to-day at 19.00d. per lb., yet strict good uppers were sold here to-day at 17.50d. per lb.! If anything can be referred to as "cheap" to-day, surely upper Egyptian cotton deserves the title, and yet the total sales for the whole Egyptian market have averaged barely 100 bales per day. C.i.f. business has been on a very small scale. Manchester reports this week are dismal in the extreme, and in the continued absence of trade support and increasing anxiety on the part of holders to realise their stocks, we look for prices to fall to a still lower level. Quotations have registered a decline of 700 points for Sakellaridis (fine and extra exceptionally 600 points) and 500 points for all grades of brown and upper. Fully good fair Sakel, 34.00d. Total sales, 650 bales.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable received from the Director-General of Commercial Intelligence, Calcutta, dated November 15:—During the week ended November 6 light to moderate rain fell in parts of North-Eastern and South-Eastern India. Prospects of crops generally fair, but rain badly wanted in the Punjab, North-West Frontier Province, Rajputana, Central Provinces, and Bihar, and in parts of Central India, Bombay, Hyderabad, and the unirrigated area in the United Provinces of Agra and Oudh. During the week ended November 13 light rainfall confined to Bay Islands and South Madras. Bombay cotton market deadlock unchanged; Bombay Cotton Brokers' Association strongly opposed to further business under control of board. Ready market quiet. Fine M.G. Oomra number three spot rate Rs. 290. Calcutta jute market quiet without important inquiries from abroad. Sellers considerably easier. Hessians dull with no business done and declining prices. Heavy goods dull. Bank rate is Calcutta and Bombay 6 per cent., Madras 7 per cent. Naihati-Habra-Satkira Railway (*i.e.*, east from Naihati) reconnaisance survey of 45 miles (broad gauge) by the Eastern Bengal State Railway sanctioned.

# COMPANY MEETINGS.

## IMPERIAL OTTOMAN BANK.

### Considerable Increase in Business.

The fifty-third general meeting of the Imperial Ottoman Bank was held on November 17 at Winchester House, Old Broad Street, E.C., the Earl of Bessborough, K.P., C.V.O., C.B., presiding.

The Chairman, in moving the adoption of the report and accounts, referred with deep regret to the loss which the committee had sustained since the last general meeting in the death of Baron Hottinguer, a participator in the foundation of the bank, whose connection with the committee in Paris, of which he was President for so many years, dated back to 1866. The delay in the Peace negotiations and the uncertainty of Turkey's future had had a profound effect on the economic situation of the country. The various political changes at Constantinople and, later, the Anatolian disturbances, with the consequent military intervention, were also adverse factors. The harvest of 1919, however, on the whole was good, although the difficulties of transport restricted exports, which were so necessary to any improvement in the Turkish exchange. Imports had, however, been considerable, both for the needs of the country and the establishment of stocks, and were largely centred in the warehouses at Constantinople with a view to re-export to Russia. The closing of the Russian and Anatolian markets, however, caused much congestion, and consequent commercial embarrassment. In the districts free from disturbances, taxes had been received regularly and in increased amounts, but, owing to the depreciation of currency, they remained insufficient to meet the foreign obligations for the payment of which they were hypothecated.

The period covered by the report and balance-sheet witnessed a considerable increase in the volume of their commercial operations, in spite of the political disturbance which existed, and unfortunately still continued to exist, in Turkey. The activities of many of their branches had been curtailed, particularly in the interior of Anatolia, which was entirely cut off from direct communication with Constantinople, and in some cases there it had been necessary to close the branch entirely for the time being. Taking into consideration the disturbed state of Turkey, and the general condition of affairs in the commercial and financial world, they regarded the result shown in the balance-sheet as highly satisfactory.

It would be quite obvious to all that the accounts were heavily affected by the depreciation in the Turkish pound and the franc in comparison with sterling. The Committee felt justified in asking them to appreciate the foresight with which, since the period of the Balkan War, they anticipated difficulties in Turkey and consequently arranged accordingly the distribution of the bank's funds. Had this precaution not been taken, and had they allowed a large surplus of funds to remain in Turkey, the resulting shrinkage in conversion to sterling, in which currency the accounts of the Bank had to be presented, would have been extremely serious.

The balance standing to the credit of the profit and loss account was £206,404 14s. 10d., which, in view of the unsettled condition of affairs in Anatolia and elsewhere, and the uncertain condition of the exchanges, they proposed to carry forward to the current year. Since the date of this balance-sheet, as they were aware, there had been a further heavy depreciation in the sterling value of the Turkish pound and the franc, which caused a diminution of sterling valuation for the balance-sheet figures, especially in that part of the assets which were at present in francs. The making of a provision for this diminution would absorb the carry-forward and even part of the statutory reserve, but it was to be hoped that this low value of the franc was only temporary.

The huge increase in the cost of living in Turkey and the Near East had necessitated their allowing further increases of salary to their staff. To Mr. Nias, their late director-general, who continued to discharge the functions of director-general until the end of 1919, they wished to record their gratitude for the distinguished services which he rendered to the bank in the course of the eighteen years during which he devoted himself to the furtherance of its interests. In conclusion, he would add that their more recent expansion had been in the opening of an office in the Ashar district of Busreh, as well as a branch at Kermanshah, which they were of opinion would assist in the development of their business in Mesopotamia. There, as elsewhere, they were devoting every energy to the assistance of trade development, and the offices more or less especially organised for this business, such as Manchester, London, Marseilles, Tunis, Egypt, Baghdad, and Busreh, were displaying most energetic efforts in assisting various trades, and the results should be satisfactory both to trade and the shareholders. Speaking at this time of year, he thought that they would be interested to know that the working results attained for the first six months of the current year had been gratifying.

Viscount Goschen, C.B.E., seconded the resolution, which was carried unanimously.

The Chairman then moved:—"That the Lord Hillingdon, Messrs. Henri Hottinguer, H. Finaly, and A. Berthelot, Lieut.-Colonel Sir Albert Stern, K.B.E., C.M.G., and Sir W. Guy Granet be and they are hereby elected members of the General Committee." General the Hon. Sir Herbert A. Lawrence, K.C.B., seconded the motion, which was unanimously agreed to.

The Chairman next proposed:—"That Messrs. J. Boissonnas, F. Vernes, the Earl of Bessborough, K.P., C.V.O., C.B., the Viscount Goschen, C.B.E., and Sir W. Lawrence Young, Bart., be and they are hereby re-elected members of the General Committee." The Lord Oranmore and Browne, K.P., seconded this, and it was unanimously adopted.

The meeting closed with a vote of thanks to the Committee, the management, and the staff at home and abroad, moved by Mr. A. Hood and seconded by Mr. A. G. Morrish.

## BENGAL—NAGPUR RAILWAY.

### Demands for Increased Facilities.

The sixty-second ordinary general meeting of the Bengal-Nagpur Railway Co., Ltd., was held November 18 at Gresham House, Old Broad Street, Mr. Robert Miller (chairman of the company) presiding.

Sir T. R. Wynne, K.C.S.I., K.C.I.E. (managing director), read the notice convening the meeting.

The Chairman, in moving the adoption of the report, said the gross earnings for the year were Rs.657 lakhs as compared with Rs.620 lakhs for the previous year. These figures showed that with the same mileage worked as in the previous year, the average earnings increased from Rs.441 per mile to Rs.469. The number of third-class passengers, who were the backbone of the coaching traffic, increased from 16,000,000 to 18,100,000 in 1919-20. The tonnage of the goods traffic increased by half a million tons, and the gross receipts for the same by Rs.11 lakhs. In 1918-19 the working expenses were Rs.307 lakhs, and in 1919-20 they were Rs.384 lakhs. The general result of working for the year under review had been the satisfactory increase in gross receipts, but also, on the other hand, a very large increase in working expenses. They were all aware how enormously the cost of living had increased, together with the great rise that had taken place in wages and in the cost of all materials, plant, and rolling-stock required for railway purposes. In spite of every endeavour to keep expenditure within the most economical limits, the percentage of working expenses for the year 1919-20 had been 58.54 of the gross earnings as against 49.01 in the previous year. With the cost of working increased from causes beyond control, it was reasonable that the rates charged to the public for railway transportation should be increased in India as they had been increased in England. Indian railways had been able to make some increase in rates, to compensate towards the high cost of working, but, as they were aware, the charges they were authorised to make were limited by maxima and minima rates for each class of goods, in a classification laid down by the Government of India. These maxima and minima rates were fixed many years ago, and the fixing of them was a function pertaining solely to the Government. He submitted that the Government of India would find ample justification for a review of the subject of rates, with the object of raising them.

The demands on the Bengal-Nagpur Railway to expand its system to meet the development of industry and commerce were large. They would grow, and they should be met. The railway served a great coal and mineral area of India. On its system were situated the Tata Iron and Steel Works, which were the only steel works at present in India producing steel. The production of steel in India was in its infancy, and in the opinion of the board India would eventually become one of the largest steel-producing countries in the world. A new steel company was about to be established on their railway system, and schemes for other installations were being matured. An immense new coal field, called the Karanpura, was about to be opened up by the extension of the Ramgarh Bokharo branch into it. When that new area—which in all probability would be a second Jharia coal field—was opened out, it would be necessary for them to make a chord line from it to their main line somewhere in the vicinity of Monarpur, a distance of about 150 miles, for the service of the western and southern coal traffic. That would give them some idea of the extensions it would be necessary to make to meet the demands of the country for an increased supply of coal. They would recollect, too, that they had now also in construction a very important branch line—the Amda Jamda—to open up a vast supply of the finest iron ore, and they were just completing an extension of the branch line to Gorumahsani for the supply of iron ore to the Tata Steel Works. Turning now in another direction, they had in hand the construction of a port at Vizagapatam, which would give a much required harbour on the East Coast. Every additional port helped to distribute the inland traffic more evenly over the railway channels, and so diverted to the opening of new country funds which would otherwise have to be expended on the comparatively sterile work of increasing the capacity of existing tracks. As a glance at the map would show, Vizagapatam was well placed for such a purpose, and it was also happy in the possession of physical features peculiarly suitable for the construction of a harbour and port which, on completion, they

were confident would prove a powerful factor in the development of the resources and the trade of the country generally, and would add especially to the prosperity of this railway.

The difficulty before them was how all the capital required for this development was to be provided. At present their capital requirements were met by the Government of India out of the yearly sum they were able to provide under what was called the Railway Programme, and with the growing demands for railway equipment and extensions in India, the annual amount of capital available was nothing like sufficient to meet the requirements of the Indian railway system. The question of the future financing of the railways of India was about to be thoroughly inquired into by the Railway Commission which was proceeding to India this winter. Indian railway companies were, in his opinion, one of the best investments in the world. The future of their company was a great one, and they could not yet see the end of the new traffic which was waiting only for them to give it facilities. There was no need for alarm about the future of India. Measures, from which reforms were expected, were on the Government table, and usually in such circumstances a certain amount of disturbance and agitation arose. He felt confident, however, that that trouble would pass away in time and that India would settle down calmly to new conditions.

Sir Charles Stewart-Wilson, K.C.I.E., seconded the motion, which was unanimously adopted.

## COMPANY NOTES AND REPORTS.

### South Indian Railway.

The report of the South Indian Railway Company, Ltd., for the year ended March 31 states that capital expenditure continued to be on a low scale during the whole of the year, the only outlay of importance being Rs. 9,37,399 on additional goods wagons, Rs. 2,54,982 on quarters for subordinate staff, Rs. 1,12,726 on strengthening of permanent way, and Rs. 84,996 on the strengthening of bridges, while the stores balance increased by Rs. 4,99,699. On the other hand, there were sundry credits to capital amounting to Rs. 7,26,132 for recoveries in adjustment of value of rolling stock supplied by the company for military purposes connected with the war. Compared with the previous year, there was an increase of Rs. 45,13,382 or 12.67 per cent. in the gross earnings, an increase of Rs. 53,72,384 or 36.63 per cent. in the working expenses, and a decrease of Rs. 13,59,002 or 6.93 per cent. in the net earnings. The increase in working expenses was due partly to increases in salaries and wages to meet the increased cost of the necessaries of life, partly to the higher cost of fuel, and partly to the larger expenditure on renewals, both of the permanent way and of rolling stock, which had to be deferred during the war by reason of difficulty in obtaining materials. The company's share of the surplus profits for the year 1919-20, including adjustments, amounted to Rs. 8,09,917, from which Indian income-tax was paid, amounting to Rs. 53,462, leaving Rs. 7,56,455, which was remitted home on May 20, 1920, by telegraphic transfer at exchange of 2s. 1d. per rupee, realising £78,797 8s. 2d. There is, however, a liability against this for Indian super-tax, the amount of which has not yet been ascertained. The company's share of the surplus profits was Rs. 45,473 more than in the previous year, and, owing to the higher exchange value of the rupee, the amount realised was £19,168 more. The balance at credit of surplus profits account on March 31, 1920, was £102,410 10s. 3d. Since that date various sums have been received and expended, and the account as at end of October, 1920, stands as follows:—Balance as at March 31, 1920, £102,410 10s. 3d.; surplus profits for the year 1919-20, £78,797 8s. 2d.; interest received on investments, £3,995 3s. 6d.; sundry advance recovered, £25—making the total receipts £185,228 1s. 11d. And the following payments have been made:—Interim dividend of 2 per cent., less income-tax, paid on July 1, 1920, £15,250; Indian super-tax for the year 1919-20, £1,306 1s. 4d.; English income-tax (final demand for 1919-20), £1,666 5s. 7d.; petty expenses, £7, leaving a balance to the credit of the surplus profits account, as at October 31, 1920, of £166,998 15s. The account is liable to charges for English income-tax, corporation tax, and excess profits duty, if any, as well as for Indian super-tax for the current year, for which demands have not, however, yet been made. The total distribution from surplus profits in the year 1919 was 4¼ per cent.—1¼ per cent. interim dividend on July 1, 1919, and final dividend of 3 per cent. on January 1, 1920. In raising the interim dividend paid from surplus profits on July 1, 1920, to 2 per cent., the board explained their desire to distribute the dividends more evenly between the two half-years. The board now recommend that for the year 1920 there be paid from surplus profits on January 1, 1921, a final dividend of 2½ per cent., making, with the guaranteed interest of 1¾ per cent., a total payment for the half-year of 4¼ per cent., less income-tax. The total distribution for the year will then be 8 per cent. (4½ per cent. from surplus profits and 3½ per cent. from guaranteed interest), as against 7¾ per cent. paid in the previous year.

### Sudan Plantations Syndicate.

The report of the Sudan Plantations Syndicate, Ltd., for the year ended June 30 states that the cotton crops which passed through the ginning factories resulted in the following shipments:—Zeidab, 1,889 bales; Tayiba, 2,306 bales; Barakat, 2,475 bales. The prices obtained for the cotton were very satisfactory. Tayiba Station continues to be run by the syndicate, but has now become part of the main Gezireh area. The station at Barakat remains a useful training ground for the steadily increasing staff employed in connection with the development of the larger area in the Gezireh. Pending completion of the works at the Sennar Dam, and the arrival of gravitation water, a pumping station is being erected at Hag Abdulla in connection with the development of the Gezireh, and which, incidentally, will bring a considerable area of new land under cotton cultivation next July, when it is expected that the installation will be ready. The profit and loss account for the twelve months, after deduction of all outgoings, shows a net profit of £228,759 1s. 1d. which, added to the balance brought forward from last year, viz., £60,452 15s. 4d., *less* directors' fees, since paid, £1,900, brings the total credit to £287,311 16s. 5d. The directors propose to deal with this sum as follows:—To recommend the declaration of a dividend of 5s., equal to 25 per cent. per share, together with a bonus of 2s., equal to 10 per cent. per share (both less income tax), absorbing £105,000; to carry forward the balance of £182,311 16s. 5d.—£287,311 16s. 5d. Meeting, Winchester House, Old Broad Street, E.C., December 15, noon.

## NEW COMPANIES.

### "Amanath" Palestine Arts and Crafts.

The "Amanath" Palestine Arts and Crafts Co. has been registered as a private company, with a capital of £10,000 in £50 shares. Objects: To develop arts and crafts industries in Palestine, and to act as merchants and agents for the sale of the products in Great Britain and the Dominions. The subscribers are:—H. L. Nathan, 1, Finsbury Square, E.C.; F. Mann, 5, Dalmeny Road, Tufnell Park, N.7; R. B. Syder, 27, Mincing Lane, E.C.; E. Good, 1, New Oxford Street, W.C.; H. Kaufman, 1, Gravel Lane, E.; and E. W. L. Epstein, 178-9, High Street, Shoreditch, E.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, November 6.

The depression continues, and the financial stringency is accentuated. The rapid rise in the exchange which has taken place during the week has increased the difficulties experienced by merchants in clearing the goods which they have received. Prices of imported articles of the first necessity, such as flour, sugar, petrol, have risen in consequence. Manufactured goods have not felt the effect up to the present for lack of demand.

*Imports*: Manufactures.—The sales for Roumania and the ports of the Crimea have almost completely ceased. There have only been a few small transactions for local consumption. Prices are stationary here; in centres of production they continue to fall.

*Colonial Produce*: Sugar.—The fall continues in America. Few transactions have been carried out here owing to the rise in the exchange. Quotations are in America 22½ dollars per 100 kilos; Java, afloat, £64-65 per ton, disposable £70-75 per ton, and in Customs £T48-49 per 100 kilos.

Coffee is firmer because of the rise in the exchange. Rio is Ps.45-50 per oke, and Santos Ps.50-55 per oke, both in transit.

Rice.—The fall continues, especially at Marseilles, where there have been large arrivals from the colonies. In two weeks prices have fallen from Ps.210 to Ps.170 per 100 kilos. In America also prices are falling. Buyers are showing themselves very reserved. Quotations are: Saigon No. 1 Ps.27-28 per oke, American Bleu-Rose, Ps.29-30 per oke, both in transit.

Petrol.—The demand is incessant, and prices are gradually rising. American is quoted £T6.40 per case of two bidons.

Flour (American).—The lack of arrivals during the week and the rise in the exchange have resulted in an increase in the price from £T1 to £T1¼ per sack. As no approaching arrivals are reported, a fresh rise is to be anticipated.

The arrivals of cereals are poor—1,800 sacks during the week. Quotations are Ps.18-19 wheat, and Ps.8 barley.

*Exports*.—Business has been insignificant.

Opium.—The sales of the week amount to twelve cases at the same prices as those quoted last week.

---

The onion crop of Egypt is reported on favourably this season.

The traffic receipts of the Egyptian Delta Light Railways, Ltd., for the week ended October 20, amounted to £E18,224; total for the year, £E266,451. For the corresponding periods of last year, receipts amounted to £E16,332 and £E158,417.

Piræus, Athens and Peloponnesus Railway.—The coupons and drawn 4½ per cent. bonds, due on Oct. 15 last, are now being paid at the office of Messrs. R. Raphael and Son, Austin Friars House, and must be left three clear days for examination.

National Bank of Turkey.—Notice is given to holders of founder's shares that, in accordance with the decision of the general meeting of shareholders, held August 31 last, Coupon 1 for the years 1911 and 1913 should now be presented for payment at the head office in Constantinople, or at the London Agency, 50, Cornhill, E.C.3.

The Indian and General Investment Trust has declared dividends for six months ended October 31 on the preferred stock at rate of 5 per cent. per annum and on deferred stock at rate of 8 per cent. per annum, payable December 10.

## ON 'CHANGE.

### Further General Decline.

(From Our Own Correspondent.)

London, Monday night.

During the past week further depression has developed as the result of the generally unfavourable position, and for the most prices have again declined. No other outcome could be expected in view of the serious commercial and financial position, the renewed fluctuations in the exchanges—and, last but not least, political developments in the Near East and elsewhere. To-day renewed weakness has been created by the adverse news from Ireland, and the markets closed on a very dull note.

In the circumstances Government securities are pretty well maintained, only slight declines taking place. Their firmness has, indeed, been the most notable feature of the week. Foreign bonds have been very weak, Greek stocks being specially depressed on account of the uncertain position.

As regards the other markets there is an unvarying tale of depression to be told. Industrials with few exceptions have continued to drop, practically all orders being from sellers. Further Continental liquidation has had its effect on oil shares, which have again found lower levels. Rubbers have been very depressed, and there have been heavy declines in a number of the leading shares.

Near Eastern securities have shared in the general weakness. Egyptian Guaranteed 3 per Cent. at 59½, Turkish Guaranteed 4 per Cent. 1855 at 67½, and Greek Guaranteed 2½ per Cent. 1898 at 59½ are all fairly steady, as are Turkish 3½ per Cent. Egyptian Tribute Bonds at 52½, a decline of half a point.

Greek securities, however, have slumped all along the line. The 5 per Cent. 1881 Loans is 5 points down at 45, while the 5 per Cent. 1884 Loan is only a point better. The 1890 Loan is 4¾ down at 45; Fundings have declined to the same level, while the 1910 and 1914 Loans are quoted respectively at 35 and 46. The 1902 Loan is quoted at 46

Banks are weaker in some cases. Agricultural 3½ per Cent. Bonds are ⅛ up at 58, and the 3½ per Cent. Guaranteed Bonds are unchanged at 60. National Bank of Egypt are 11-16 down, however, at 16¾, Imperial Ottoman Banks are 8½, while Land Banks are quoted 4½.

Land shares are depressed. Anglo-Egyptian Land Allotments are 3¼, and Behares 10, the Preference shares being again 65s. Egyptian Consolidated Lands are 1s. 6d., while Delta Lands are 2s. 6d. down at 10s. Egyptian and Foreign Trust are again lower at 12s. 6d., a decline of 1s. 3d. Gharbieh Lands are 2⅛, while New Egyptians are 1s. 9d. down at 24s. 3d. Union Foncieres are 3¼. Sudan Plantations have shed ⅛ at 4⅝.

Among miscellaneous descriptions Abyssinian Corporations have firmed up 6d. to ¼. Alexandria Waters are now 6½, Morums are 13s. 6d., a decline of 2s. 3d., while Egyptian Salt and Soda are 1 23-32

In Oils Anglo-Egyptians are considerably lower at 3⅞. Roumanian Consolidateds are, however, 1s. 3d. up at 22s. 3d.

---

A new steamer service between Barcelona, Marseilles, and the leading ports of the Near East is to be established shortly.

The traffic receipts of the Smyrna-Aidin Railway for the week ended November 6 amounted to £11,725.

A group of Belgian and French capitalists are establishing a large sugar mill in Dubrarica, with a capital of 30 million dinars.

The Transmediterranean Company has established a regular service of boats between Melilla and Oran.

Burma Railways.—Final distribution of 1¼ per cent., with a bonus of 2 per cent., both less tax, on account of surplus profits, to be distributed with the guaranteed interest payable January 1 next, making in all a return of 8 per cent. for the year 1920-21.

H.M. Consul at Kerman, Persia, asks that correspondence intended for H.M. Consulate there should be addressed to the British Consulate, Kerman, Persia, viâ Duzdab and Nuski, Baluchistan.

## TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned :—

### Egypt.

(*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*)

Pump Foundations and Power House.—The Inspector of Projects, Western Delta Division, Alexandria, invites tenders for the supply of pump foundations and power house for new Aboukir pumping station. November 30.

Candles.—The Financial Secretary, Egyptian Army, Cairo, invites tenders for the supply of seven tons (either English or metric tons) of candles, suitable for storage and use in tropical climate, to be delivered into 'Abbâsîya *Nuzl*, or one ton into 'Abbâsîya *Nuzl* and six tons c.i.f. Port Sudan. November 30 (L.).

Clothing, etc.—The Lunacy Division, 'Abbâsîya, Cairo, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for 'Abbâsîya and Khânka Asylums for one year from April 1, 1921. January 3 (L.).

Piles.—The Director-General, Main Roads and Bridges Department, Ministry of Communications, Cairo, invites tenders for the construction of new defending piles for the protection of the swing span at Benha Bridge over Raiyâh Taufiqi. December 4 (L.).

Twill.—The Egyptian War Department invites tenders for 10,000 yards of grey twill and 12,000 yards of khaki twill. November 29 (L.).

Wagons, etc.—The Egyptian Delta Railway Company invites tenders for the supply of (1) 260 steel bogie platform wagons with spare parts, and (2) 1,204 pairs of wheels and axles, steel-tired or chilled iron. (Spec., £1 1s. each, offices of company, 210-216, Gresham House, Old Broad Street.) December 6.

### India.

Refuse Destructor.—The Municipality of Bombay invites tenders for the manufacture, erection, and equipment of a refuse destructor for 200 tons of refuse a day. (Spec., 5s., Sir John Wolfe Barry, Lyster, and Partners, 2, Queen Anne's Gate, S.W.1.) March 4.

Copper Plates, etc.—The South Indian Railway Company invites tenders for the supply of (1) copper plates; (2) superheater elements; and (3) steel tires. (Spec., 1 and 2, 10s. each, 3, £1, offices of company, 91, York Street.) November 30.

Structural Steel.—The Assam-Bengal Railway Company invites tenders for the supply of structural steel, galvanised work, etc., for shops extension. (Spec., offices of company, Bishopsgate House, Bishopsgate.) December 1.

Boilers.—The India Office invites tenders for the supply of locomotive boilers. (Spec., Director-General of Stores, Whitehall.) December 3.

### Forthcoming Sailings.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—

*Anchor Line.*—S.s. Elysia, for Bombay (Liverpool, December 1); s.s. Circassia, for Bombay (Glasgow, December 4 and Liverpool, December 11).

*Anchor-Brocklebank Line.*—S.s. Masirah, for Calcutta (Birkenhead, December 8); s.s. Mahanada, for Port Said, Colombo, Madras, and Calcutta (leaves London December 4); s.s. Matra, for Port Said, Colombo, Madras, and Calcutta (leaves London December 14); s.s. Blackwell, for Port Said, Colombo, Madras, and Calcutta (leaves London December 24).

*Bibby Line.*—S.s. Dorsetshire, for Rangoon (London, December 8); s.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, December 1); s.s. Yorkshire, for Marseilles, Port Said, Colombo, and Rangoon (December 15).

*Byron Steamship Co.*—S.s. Maid of Athens for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 7).

*Clan Line.*—S.s. Clan Cumming, for Bombay and Persian Gulf (Birkenhead, December 8).

*Cunard Line.*—S.s. Tyria, for Gibraltar (Liverpool, December 2); s.s. Phrygia, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, December 18); s.s. Sea Victory, for Gibraltar, Malta, Piræus, Salonika, Constantinople, and Constantza (London, December 7).

*Ellerman City Line.*—S.s. City of Cairo, for Calcutta (Birkenhead, December 6); s.s. City of Manchester, for Calcutta (Birkenhead, December 20).

*Ellerman's Wescott and Laurence Line.*—S.s. Borodino, for Malta, Piræus, Salonika, Smyrna, and Constantinople (London, November 30).

*Glen Line.*—S.s. Glenamore, for Port Said, etc. (London, December 9); s.s. Glensanda, for Port Said, etc. (London, December 23); s.s. Glenapp, for Port Said, etc. (London, January 6).

*Harrison Line.*—S.s. Astronomer, for Calcutta (Liverpool, December 9); s.s. Architect, for Calcutta (Liverpool, December 22).

*Henderson Line.*—S.s. Sittang (freight only), for Port Said and Rangoon (Birkenhead, December 8).

*Holt (Alfred) and Co.'s Line.*—S.s. Achilles, for Port Said, etc. (Glasgow, December 9); s.s. Lycaon, for Port Said, etc. (Birkenhead, December 2).

*Moss Line.*—S.s. Amasis, for Gibraltar, Algiers, Malta and Alexandria (Liverpool, November 27); s.s. Limoges, for Piræus, Syra, Smyrna, Constantinople, Cyprus, and Beyrout (Liverpool, December 4).

*Papayanni Line.*—S.s. Malatian, for Malta and Alexandria, also taking cargo for Beyrout, Alexandretta, Mersina, Jaffa, Haifa, Cyprus, etc. (Liverpool, December 4); s.s. Maronian, for Algiers, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, December 11).

*P. and O. Line.*—S.s. Alipore, for Bombay (London, December 18); s.s. Karmala, for Bombay (London, December 17); s.s. Nore, for Colombo, Madras, and Calcutta, also taking cargo for Malta, Port Said, and Aden (London, December 17).

*P. and O. British India Line.*—S.s. Culna, for Colombo, Madras, and Calcutta (London, December 11); s.s. Chakrata, for Colombo, Madras, and Calcutta (London, end of December).

## OIL NOTES AND NEWS.

### Requirements of Roumanian Oil Industry.

His Majesty's Commercial Secretary at Bucharest has forwarded to the Department of Overseas Trade particulars of the electrical machinery and other materials which are urgently required for the reconstruction of the Roumanian oil industry. The list is a general estimate received from the Geological Institute at Bucharest, and it has not been found possible to indicate the exact requirements of each undertaking.

The requirements include conduits, copper wire, porcelain armatures with shade, protector, etc., for lamps in borings, three-phase asynchronous electric motors for borings, three-phase oil transformers, porcelain insulators, meters for motive power, meters for lighting, and a turbo-generating set of 10,000 kw.

For the reconstruction of the boring industry in the oil-fields riveting and hermetic gutters, small machines and pumps, boring cranes with accessories, boring bits, boring tools, hardware, iron sheets of different dimensions, iron sheets for tanks, galvanised steel cables, and lathes and other machines are needed. Tank barges and steamers are also required for carrying the oil on the Danube and on sea.

## TRADE WITH THE NEAR EAST.

### Tribute to British Methods.

An illustrated pamphlet has recently been issued by the Guaranty Trust Company of New York on "Trading with the Near East: Present Conditions and Future Prospects," describing the outlook in the various Near East markets for the guidance of American merchants and manufacturers. Great stress is laid on the unique opportunities for business enterprise in this region. Thus it is stated that there are future possibilities of almost unbelievable proportions for imports from and exports to the Eastern Mediterranean, the Sea of Marmora, and the Black Sea ports. "These entire sections must be fed, clothed, and largely rehabilitated. Roads, ports, railways, and public works of all kinds are needed everywhere." It is further pointed out that for the goods urgently needed, such as boots and shoes, leather, rubber, outer and underclothing, cutlery, cottonseed oil, sugar, bar and band iron, nails, carpenters' and machinists' tools, automobiles, jams and fats, the merchants of the Near East have very valuable products to send in exchange.

The Greek market comes in for special attention, and in referring to it a reference is made to the keen British competition that will be encountered there as "in every Near Eastern market, as British traders are much more liberal than American in their terms, extending credit where necessary, while many American exporters still insist upon 'cash with documents.'" This tribute to British enterprise is followed later on by an even more interesting statement that "the chief competitor will undoubtedly be Great Britain. A large number of British traders are already on the ground in every country of the Near East. There are British warships in every harbour and British military forces in many cities, messengers of peace and security for those oppressed communities which are building up a strong pro-British sentiment which assuredly will have an important influence in favour of British trade."

## JERUSALEM'S WATER SUPPLY.

The *Palestine Weekly* states that the Jerusalem Municipality is taking energetic measures to expedite the supply of water for domestic purposes, and householders have been approached for the purpose of ascertaining the extent of the demand. They will be required to pay the cost of installation and a flat rate of 5 per cent. on the rental.

The Romana-Americana Company has increased its capital to 150,000,000 lei by the creation of 225,000 new shares of 500 lei each.

The production of oil in Roumania in September amounted to 99,448 tons, making the total for the first nine months of the year 746,707 tons, as against 693,983 tons for the corresponding period of 1919.

Mr. T. M. Ainscough, O.B.E., His Majesty's Senior Trade Commissioner in India and Ceylon, will leave London on November 25 to join the P. and O. s.s. China at Marseilles, en route for Bombay. Mr. Ainscough hopes to arrive in Calcutta about December 20, and will then take over charge of his post.

One of the most interesting stands at the International Advertising Exhibition will be that of the Hassolel Co., the publishers of the *Palestine Daily Mail* and the *Palestine Weekly*. A beautiful display of Palestinian products will be on view. Recognising the value of the Exhibition for propaganda purposes, the Government of Palestine have extended official recognition to the stand, and have made themselves responsible for the collection of many of the samples that will be exhibited.

## NOTES OF THE WEEK.

### *The Allies and Greece.*

So far the most satisfactory development in the situation created by the result of the Greek elections is the resolve of the British Government not to allow itself to be stampeded by France into a futile veto on King Constantine's return. Indeed, it would appear as if the French Government had itself been persuaded of the folly of the suggestion, and is now more concerned to "get even" with the Greeks by revising the Treaty of Sèvres at their expense. Again, we would express the hope that no hasty action will be taken, and that a more careful examination of the whole Near Eastern position will be made than the Allies have found time for at any stage since the beginning of the war. They stand convicted of serious errors of judgment in the past, and they are not likely to stumble on the right path now, by merely gratifying French spite against an individual or a nation.

### *The Near Eastern Position.*

One of the results of the Greek elections has been to tear away the veil that was being kept in position with the greatest difficulty in order to hide the fact that the settlement devised by the Entente Powers was both unjust and unworkable. France and Italy had already recognised the fact, and were working on their own lines to curry favour with Bulgaria, and to show sympathy with the Turkish Nationalists, whose hostility is based entirely on the terms of the Treaty. The British Government, however, refused to admit its mistake; it trusted to Greece to extricate the Allies from their difficulties, and was, apparently, prepared to finance the military operations of the Greeks indefinitely in order to enable M. Venizelos to justify the settlement inspired by him. With the latter's defeat, however, the British Government's house of cards has fallen to the ground, and all that there is to show, as far as the Near East is concerned, for eighteen months' labours in Paris is the violation of Allied pledges in respect of Bulgarians, Turks, and Arabs, Greece unimpressed and indifferent, Turkey successfully defiant, and the whole Moslem world restless under imputed breaches of faith on the part of Great Britain. To meet this situation the French proposal, as we understand it, is to ride roughshod over the Greeks, and to give Mustapha Kemal Pasha anything he may ask for. There must surely be a better and more dignified course.

### *Towards a Sounder Settlement.*

The original mistake made by the Allies lay in their readiness to adopt a single point of view without attempting to bring their own dispassionate judgment to bear on a complicated question. If the blunder is not to be repeated, they must now examine all sides of the question. It is at least worth while to inquire why Greece has remained unimpressed by the magnitude of the concessions gained for her by M. Venizelos. The Allies will probably find that her seeming indifference is due to the circumstance that the price has been too heavy: martial law, mobilisation, financial strain, and the stress of social and political animosities must tell in course of time. It would have been unfair to ask M. Venizelos to admit that the Asiatic campaign, undertaken to extricate the Allies from a dilemma, was proving too onerous for Greece to continue. Possibly, however, the Government of M. Rallis will not only admit it, but will also welcome an arrangement that promises to promote peace between Greece and Turkey, and to relieve Greece of the strain of continued mobilisation. Such a *modus vivendi* might be found in making Smyrna an independent State on the lines of the Fiume settlement; but on this point, as well as in regard to any other proposal, it would be only right that the views of the inhabitants of the town should be taken into consideration. It would be part of the scheme that no change in Turkey's favour would be decided upon unless it ensured the acceptance by a united Turkey of the remainder of the modified terms. In this connection, however, the Allies would have to face the contention that, if the Treaty of Sèvres calls for modification, so does that of Neuilly. It is easy to say that all that was decided in Paris ought to be inviolate; but the fact remains that an opportunity now offers of effecting a settlement of the Near Eastern question which was not secured at the first misguided attempt on the part of the Paris Conference.

### *Britain and the Wider View.*

Meanwhile a conference between the British, French and Italian Governments is being held in London. The attitude of the British Government would seem to be modelled on the lines suggested in these columns last week, that pledges should be obtained from King Constantine with a view to stabilising the position in the Near East. There can be little doubt that the Greek people will themselves welcome a course which promises them peace abroad and at home, but it will be well not to lose sight of the fact that what is most to be desired is the establishment of lasting peace throughout the whole of the Near and Middle East.

## *Cyprus and Greece.*

When reference was made in these columns last week to the message sent to the British public by the Cypriot Delegation after its failure to persuade the British Government to accede at this juncture to the union of the island with Greece, we had not had the advantage of reading the article contributed by the head of the Delegation to the *New World*. In this Mr. Lanitis points out that the delegates have been able to assure themselves that the British Government is still in favour of the union of Cyprus with Greece, and that there was no more reason to fear any opposition on the part of military and naval opinion or of the Conservative party. The only consideration, he states, "which still causes the cautious British Cabinet to hold back, seems to be the fear that the Greeks may return to the Constantine policy." He adds: "Fearing to court reverses in the present troubled state of European affairs, [Mr.] Lloyd George's advisers are waiting until the elections finally prove M. Venizelos's triumph before they lay bare the Greek sympathies they feel. Anxious not to work for an enemy, they are waiting until Constantine's defeat and the political downfall of his supporters be publicly confirmed before they restore to the Grecian King one of the jewels of his crown." Out of the present troubled state of European affairs, therefore, emerges the one consolation that the Cypriot "Unionists" are minded not "to work for an enemy," and we may look for a long period of settled content on the island.

## *The Treaty of Rapallo.*

The Treaty of Rapallo, which was ratified by Yugoslavia on November 22, was formally approved by the Italian Chamber six days later, and the exchange of ratifications took place in Rome on Monday. Both parties to the Treaty are to be congratulated on the common sense they showed in the last stage of the long-drawn-out negotiations, and though there have been some grumbles in both countries, the Italians and the Yugoslavs are showing unmistakable relief that the question has been settled at last. Unfortunately we have to add that Dr. Trumbitch, the Yugoslav Foreign Minister, asked leave to retire from office as soon as his own Government ratified the Treaty, the reason he gave being that he considered his work finished. By his statesmanlike handling of this Adriatic problem, and of others that have arisen as a result of the war, he has well earned the goodwill not only of Yugoslavia, but of Europe as a whole. M. Vesnitch, the Prime Minister, is acting as Foreign Minister, but at a time when acute questions of home politics are exercising the new State, he will miss the sober judgment of his Croatian colleague.

## *Armenia and the Bolshevists.*

It is still very difficult to make out what is taking place in Armenia, but according to reports from Constantinople things have been going from bad to worse. On November 11—the very date on which the Armenian Government rejected demands put forward by the Turks, and announced that it would continue the struggle to the end—the Extremist Party, it is now reported, concluded an agréement with Moscow; and the Government resigned, unable to cope with internal disorders and attacks by the enemy at the same time. Apparently, the Agreement referred to stipulated for the immediate acceptance of the Turkish armistice terms, and for the occupation of debated territories by Bolshevist troops until the conclusion of peace. The Kemalists promptly improved the occasion by sending delegates to Tiflis to negotiate regarding Batoum, but what course those negotiations are following is not yet known.

## *A Cooling Friendship.*

This news is not very surprising in view of the straits to which Armenia was known to have been reduced; though it is true that the decision to carry on the struggle, and the report of the re-capture of Alexandropol gave rise to some hoping against hope. That it is bad news there is no denying, but the Constantinople reports referred to indicate that there may be a silver lining to this black cloud as to others. For the Turks are said to be not entirely pleased by these latest developments. They regard the Armeno-Bolshevist agreement as infringing the Brest-Litovsk Treaty, and they anticipate that their Bolshevist friends may interfere with their game in regard to the Batoum negotiations. Should the anticipation be fulfilled, as is not at all improbable, the Entente might be tempted to reconsider its attitude towards the Kemalists; and though the latter are just now very vigorously protesting that they will never have anything to do with the Entente until the Sèvres Treaty is substantially modified, a very interesting situation would undoubtedly be created.

## *The L.O.N. and Armenia.*

Meanwhile the League of Nations has, on the request of Lord Robert Cecil, considered the situation in Armenia, and has appointed a committee of six to consider what steps, if any, should be taken to put an end to hostilities between Armenia and her enemies. The discussion of the question by the League Assembly was noteworthy, because it produced two good speeches, one from Mr. Balfour and the other from M. Viviani, putting forward two radically different views of the case. Mr. Balfour was as desirous of helping as anybody could be, but he refused to shut his eyes to the difficulties of the case—the lack of defined frontiers; the fact that the League was not dealing with civilized States, or with people who cared in the least for public opinion; the unwillingness of any State to become mandatory unless the other States would guarantee it with money, men, and munitions. "We stand," said Mr. Balfour, "like people on the shore looking at the survivors of a wreck clinging to their foundering vessel and merely encouraging them to hold on." The simile, we fear, is only too apt. M. Viviani's speech was eloquent, but all he would urge was that the Council should try to find one Power to take the necessary steps to stop hostilities between Armenia and the Kemalists. It was generally understood that the attempt had been made and had failed. Apparently Moscow has achieved what the League could not accomplish. But whether Armenia is to be congratulated remains to be seen.

## *General Gouraud on Syria.*

General Gouraud is now in Paris, to give evidence before the Parliamentary Commissions which are considering the question of a vote for eight hundred million francs in respect of French military requirements in Syria, and he has given an interesting interview to the Paris correspondent of the *Morning Post*. Syria, he said, is now definitely pacified, and the pacification of Cilicia and the work of bringing it under French influence is only a matter of time. France must remain in Syria both for political and economic reasons; her abandonment of the country would have disastrous effects on her prestige in the Levant; and her economic interests compel her to remain, for when fully developed Syria and Cilicia will be as valuable economically as Egypt. Whether there will then be a French edition of the Milner Mission, General Gouraud omitted to say. He was, however, at pains to impress on his interviewer that "the relations between the English and the French officers and officials are now perfectly satisfactory, and our unity is complete in every respect." After a reference to the growth of Pan-Islamism, which, in his opinion, has been over-estimated, though it has to be reckoned with, the General concluded by declaring that "the essential basis of peace in the East is a close understanding between England and France." We welcome the frank expression of the High Commissioner's views, which makes much more pleasant reading than some of the statements he has had to make this year. But whether his optimism is entirely justified time alone can show. There are other factors in the Eastern problem besides Great Britain and France.

## *The Arab Problem.*

The King of the Hejaz has recalled his special mission (consisting of Prince Habib Loutfallah and Hassan Khalid Bey) from this country, and, it is understood, will send a second mission to Europe shortly, under the

Digitized by Google

leadership of one of his own sons. In view of what has taken place in Syria and Mesopotamia, it is not strange that relations between France and Great Britain on the one hand and the Hejaz on the other hand should be less cordial now than they were at the time of the Armistice. But the fact is none the less regrettable: it has already served to bring an understanding between the Turks and the Arabs within the bounds of the possible—which would never have been the case otherwise—and it is undoubtedly responsible for much of the unrest in the Arab world. We must expect that for some time there will be differences between tribes and sects such as that reported a few weeks ago at Koweit, when the Sheikh's forces were attacked by the Akhwan in quite the old Wahibite style. But troubles like these in Mesopotamia are another matter, and traceable to quite modern causes: and if the "unrest" should by any chance lead to the Arabs uniting against what they regarded as interference with their rights, it would be an unpleasant prospect for those against whom their anger was turned. In view of their past history that possibility may be regarded as rather remote, but it would be unwise to ignore it altogether. Our Government is doubtless keeping a watchful eye on the Arabian lands and bearing steadily in mind the pledges given to our Arab allies during the war. It would, however, be comforting to see signs that we had a settled Arab policy.

### *Indian Affairs.*

The week's news from India is scanty, but satisfactory in so far as it discloses no untoward developments in a situation where, as we have said before, time is on the side of the new constitutional arrangements. The elections have been going smoothly, and we have the assurance of a tolerably severe critic that Bombay, at least, has chosen a good Legislature, even though some prominent politicians remain for the present outside. We should have preferred to see the extremists inside instead of outside the council chamber, both in Bombay and elsewhere, because a Legislature is all the better for an effective Opposition, and a party which is left outside is under a strong temptation to adopt unconstitutional methods; but we see increasing reason to expect that this feature will prove to be transitory, and that the new Governments, when once they have got to work, will exert an attraction too strong to be resisted. Dignified and responsible office is sure to count for much in India, where for so many centuries office and nobility were synonymous terms, and the spectacle of Indian Ministers exercising real, if limited, power, disposing of patronage, and setting out to maintain a policy formulated by themselves, will do more than anything else to rally to the constitution those elements which, for the moment, have chosen, or have been tempted, to hold aloof.

### *The Extremist Position.*

We find ourselves encouraged in this attitude by the terms of the address which Lord Meston delivered last week at Manchester University. The ground covered was in a general way the same as that of the Rede Lecture which we noticed last summer, but the tone, while still commendably cautious, was more outspoken, and rather more optimistic. The most striking feature of the address was perhaps the definite identification of the extremists with the forces of reaction, a view which has been emphasised in these columns, but which is still something of a novelty in England, as the attitude of the Labour Party shows. Lord Meston gave a vivid description of the typical extremist, "exclusive, pontifical, and intolerant," resting on "narrow sectarian foundations of privilege and tradition," and working for "an India purified of the foreigner and all his apparatus of life and culture." On the other side, there is the wider hope of an India retaining all that is valuable in her own culture, but willing at the same time to learn from the West, and to attempt a new synthesis on the basis of a national life in which the citizens of all creeds and races may share. That hope is in effect the justification of the new constitution; its realisation is not yet assured, but Lord Meston committed himself to the opinion that it will eventually prevail.

## THE WEEK AT HOME.

London, Monday evening.

**Sinn Fein Plots.**

The publication by the Government of the evidence that the Sinn Fein gang had plotted to blow up the docks at Liverpool and the power-house at Manchester caused indignation, but little surprise; it had been rumoured for some time past that such a scheme was in contemplation. Apparently, some outrages of a similar kind have been planned for London, since barricades are being put up in Whitehall and Westminster to protect Downing Street and the Houses of Parliament. A series of fires which broke out at Liverpool has been ascribed to Sinn Fein.

In these circumstances the arrest of Mr. Arthur Griffith, the head of the Sinn Fein "Republic," could hardly be avoided, and it has been little criticised. It is noteworthy that no denunciation of the assassination of the British officers, who were done to death in Dublin on Sunday week, has been forthcoming from Sinn Fein.

English opinion has quite perceptibly hardened against the Irish Republican movement during the past few days, but the debates on the Home Rule Bill in the House of Lords have been maintained at a high level. The speakers, in the best traditions of Parliament, have ignored the outrages, and attended to the problem in hand, which is the reform of Irish government in the direction of autonomy. The speeches of Lord Birkenhead and Lord Grey of Fallodon are by common consent entitled to rank among classics of political oratory. But it remains to be seen whether events will not again outstrip debate: it must be admitted that while the public applauds it does not altogether share the serene optimism which Ministers profess.

In the House of Commons an unfortunate fracas occurred when Mr. Devlin, one of the few remaining Irish Nationalists, put a question to the Irish Secretary immediately after the latter had given a dreadful description of the Dublin assassinations. The House was horror-struck at the account, and it boiled over when Mr. Devlin not only expressed no regret for the occurrences, but put a question which seemed to convey that the Government was as bad as the assassins. A Coalition member assaulted Mr. Devlin, and the sitting was suspended for a time. Happily there has been no repetition of this unfortunate scene.

**Independent Liberals and Others.**

The "Wee Frees" have again been demonstrating to prove they are not dead. A conference was held at Bradford; Mr. Asquith made the usual speech, Sir John Simon followed, and Mr. Runciman wagged the tail of the gaunt and flagging animal. There was also a meeting of the party in London, the upshot of which seems to have been that everybody agreed that every-

body else of that persuasion was a very fine fellow, and that the other forty-five millions or so in these islands were very poor stuff indeed. Liberal statesmen of the old school used to have something to say. They may still have, but they do not say it.

But great hopes are anticipated from the new Manchester Liberalism, a summary of whose chief features was given in this column some time ago. At any rate, it has more relevance to the problems of the day than anything the present party leaders talk about, and if it bears evidences of genuine thought and feeling it may well find a following. But Liberalism as a conquering force is always in the nature of a crusade, which is precisely where it differs from Toryism; and with all possible respect for Professor Ramsay Muir and his merry men, I do not quite detect the crusading note in their appeal. Their policy is rather that of a middle party.

But the word has gone forth from all parties that there is to be a tremendous revival of political activity in December. Great statesmen are to address great provincial audiences, and lists of speakers are already published. It needs no great perspicacity to predict that the thing will fail to rouse any enthusiasm. The political apathy for which we are rebuked by the party managers will not be dissolved by oratory.

These good folks, indeed, who denounce our apathy fail to perceive the signs of the times. England is thinking steadily at the moment, but not on party political lines, and it is not prepared to have its thinking done for it at second-hand. When it wants orators, it will listen to them; for the moment it does not. What it does want at the moment, and what it is getting, is books. Against all the traditions, the country is educating itself, and the amount of books it is reading—serious books—is astonishing. The most diligent reader in the community just now is the working-man who, with increased leisure and more money, is steadily reading text-books of politics, economics, and similar subjects. He has discovered a new world, and for the time being does not want to be disturbed. What the upshot of his reading and his meditations may be nobody knows, but I fancy he will be more ready and competent to form his own opinion in the future than before, and less inclined to take his politics ready-made.

**The Future of the Church.**

An assembly of divines and prominent laymen has been discussing the future of the Church under the Enabling Act. No definite conclusion seems to have emerged, but the Church Councils are at work in parishes all over the country. In most cases the relations between parson and Council appear to be cordial, but there are a few instances where an autocratic or unpopular vicar seems to be at loggerheads with his lay representatives. But even a quarrel, however regrettable, is a sign that people think the issue worth quarrelling about, and in that sense, let us hope, may be construed as an indication of renewed vitality.

**A Great Engineering Scheme.**

The Severn Tunnel not being sufficient to accommodate the increasing South Wales railway traffic, the Great Western has for some time planned a bridge over the river at the same spot. It is now suggested that the scheme shall be enlarged to harness the tides of the river in order to generate electricity. An enormous mass of water goes to waste, and it is believed that this could be utilised as at Niagara. One difficulty is said to be the variability of the tides, which would require large storage accumulators. The project, which would require many millions of capital and thousands of men's labour for some years, appears to be one of the greatest engineering schemes that has ever been floated; but it is being seriously considered by the Ministry of Transport, and Sir Eric Geddes is not frightened of a thing because it is big. Cardiff is said to be openly sceptical, but Cardiff deals in coal, and the Severn Bridge electricity scheme would dispense with a good deal of coal, so Cardiff is not entirely disinterested.

**The Downfall of England.**

When the M.C.C. won their first two matches in Australia so easily, foolish people on this side suggested

the possibility that the team might win all its matches outright. But New South Wales quickly made short work of that forecast, and now one or two of the arm-chair students of form and averages have gone to the other extreme, and hint that if we win one test out of five we may think ourselves lucky. Of course, that is absurd, but it is the fact that the Sydney ground and team have given our men an awkward jar.

**A Problem in Legitimacy.**

A curious case is reported from Norwich. Some years ago a woman in that city was informed by the War Office that her husband, a soldier, had been killed; after some time she married again, and in due course a child was born. Recently she received another communication from the War Office, informing her that a regrettable mistake had been made, and that it was not her husband but another man of the same name who had been killed. Later her husband came back to England, and she has returned to him. The second marriage, of course, was legally void, but it would seem rather hard if the child should be branded as illegitimate. The same point arises, of course, in "Enoch Arden," but Tennyson, being a mere poet and not a lawyer, shirked the issue and gave us verse instead of a masterly discussion in equity and common law.

**Falling Prices.**

Housewives, who ought to know, assure me that their housekeeping books show a real reduction of prices at last. Sugar is coming down again, and bread will probably be reduced soon; it is expected that other staple foods may follow. Perhaps we have at last reached the turn of the tide; but, for all that, last month's Board of Trade returns still showed an increase in the general cost of living. But this was mainly due to the abolition of the bread subsidy.

I gather that shopkeepers are rather depressed about the prospects of the Christmas trade. But they always are at the end of November—yet by Christmas Eve they seldom have anything left for the late shopper.

**An International Back.**

Harry Thickett, the old international full-back, who died last week, had a unique title to fame apart from his football record. Called up during the war for medical examination as a recruit, he was probably the only man who was totally and permanently rejected as too heavy to fight. He turned the scale at 24 st. 7 lb., and even then he was putting on flesh.

**Books and Literature.**

The welter of Christmas gift-books—which means what nobody would willingly read himself, but presents to other folk's children—is now upon us, and the book-shops are overcrowded with annuals and the illustrated forms of print. Fortunately little boys and girls are destructive, or the world would sink under the burden of seasonable literature.

Ignoring the delights of this infantile Elysium, I have been reading Mr. Balfour's "Essays, Speculative and Political" (Hodder and Stoughton). The order of the descriptive adjectives in the title shows that the distinguished author is under no doubt as to the relative importance of his subjects; and one feels, as one felt when reading "The Foundations of Belief," that great as Mr. Balfour is as a statesman, he might have been greater still as a metaphysician had he so chosen, "instead of going about stealing ducks." The political essays have no permanent interest, although the message on Zionism has already become historic; the philosophical papers possess the rare distinction which Mr. Balfour always shows in this form. The book as a whole cannot but remind one of the lament of the college don: "Alas, that a man who had it in him to adorn with grace, and possibly even with distinction, the Chair of a Regius Professor in an ancient university should sink so low as to accept so modern an office as that of Prime Minister."

Rear-Admiral W. S. Sims, who is well-remembered here as the head of the American Navy, has written "Victory at Sea" (John Murray). It is an excellent but modest chronicle: he points out the difficulties of the position in 1917, which were not fully realised by the public at the time, and discusses the manner in which the Sinn Feiners embarrassed the American Fleet at Cork, while sending information to German spies.

The "Recollections of the Empress Eugénie" (Cassell), by M. Augustin Filon, contains a sketch of the life of the last Empress of the French, and makes a handsome memorial volume.

A word should be given to "The Evolution of Parliament" (Longmans), by Professor A. F. Pollard. It is an admirable study in political history. One has always thought it a pity that Mr. Pollard was a professor instead of an M.P.—he once admitted as much himself at a meeting of the now defunct Ethological Society—and this book makes one realise that in gaining a historian we have lost a statesman.

The "Life of Goethe" (Murray), by P. Hume Brown, is a solid and substantial piece of work that is likely to become the standard biography in English of the greatest German poet.

OCELLUS.

## A FRIEND OF BENGAL.

The death of Dr. J. Drummond Anderson will be regretted even more widely in Bengal than in this country. It is twenty years since he left India, but as University Teacher of Bengali at Cambridge, and more recently at the School of Oriental Studies, he had gradually become the recognised exponent of the literature and culture of the most brilliant race of India. Modest and retiring though he was, he could not keep silent when an individual member of that race achieved distinction in any field of activity, and anyone who dared to criticise Bengal was certain of extracting from him an apt and learned reply. His relations with Indian students in particular were almost ideal, and the enthusiasm of his old pupils was a revelation to those who had learned by experience to regard teachers of Indian languages as an efficient but uninteresting body of scholars. His name will probably be remembered mainly through his excellent little manual of the Bengali language which was published last year, but his real work was the promotion of intimate and friendly relations between England and Bengal.

## THE GOVERNMENT OF MESOPOTAMIA.

The following messages have been exchanged between his Majesty's Government and his Highness the Nakib of Baghdad, President of the Provisional Council of State of Mesopotamia:

His Majesty's Government to his Highness the Nakib:—

His Majesty's Government are much gratified to learn that you have felt able to accept Presidency of newly-formed Council of State. They appreciate your patriotism and public spirit in thus identifying yourself with preliminary steps that are being taken under guidance of British High Commissioner towards creation of national government in Irak. His Majesty's Government are confident your action will cause widespread gratification both inside and outside Irak, and they offer you cordial good wishes for success of your labours for welfare of your country.

His Highness the Nakib to His Majesty's Government:—

I tender hearty thanks for the good wishes expressed in the message received from His Majesty's Government, and beg to state that the interests of both British and Arab races are one, and both are linked together with the bonds of sincerity.

I am confident that both nations will proceed hand in hand towards success and assist in furthering peace and prosperity.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, November 14.

**The High Commissioner.**

The High Commissioner, accompanied by Lady Allenby, Mr. W. Selby, First Secretary, and Mr. Keown-Boyd, Oriental Secretary, arrived last Thursday by the Caledonia, which brought a further large number of Government officials and residents. Lord Allenby had an interview with the Sultan at Ras el Tin Palace on Friday morning, and came up to Cairo by special train. He was accorded an official reception, those assembled on the platform including, despite the shortness of the notice, most of the higher officials and principal residents and a large element of representative Egyptians. His Excellency, who for the first time made his appearance in civilian attire, looked in the best of health, and the remark one heard on everybody's lips was that in the grey top hat and frock coat—a costume rendered historic in Egypt by the late Earl of Cromer—Lord Allenby looked even handsomer than he did in uniform, and filled in every respect the part of a British representative abroad.

Sir John and Lady Maxwell, who had also arrived by the Caledonia, travelled up by the special train with Lord and Lady Allenby. They have come out to Egypt for their health, and after a short stay at Helouan will go up to Luxor.

**The "Independence" Anniversary.**

Saturday being the 13th, the Cairo committee of the Egyptian Delegation and its supporters decided to celebrate the anniversary of the presentation by Zaghloul Pasha and two other members of the demand for the evacuation of the British troops and the granting of the independence of Egypt to Sir Reginald Wingate at the Residency on November 13, 1918. The committee had originally had the intention of organising a fête in the Ezbekia Gardens, but in the end the celebration took the form of a luncheon party at Shepheard's Hotel. There were over 300 guests, representing every section of the Egyptian population and including many ex-Ministers. The chair was taken by Prince Youssef Kemal, cousin of the Sultan, who, when lunch was over, made an excellent speech, in which he said that his illustrious ancestor, Mohammed Ali Pasha, had enjoined the members of his family always to consider themselves and act as part of Egypt, that they were proud of being Egyptians, and that he himself had every hope that the present difficulties which confronted them all would end satisfactorily. The chief speaker of the afternoon was Hussein Rushdi Pasha, the ex-Prime Minister. In the course of his speech he admitted that the two Cabinets over which he had presided had been in entire sympathy with the national movement headed by Zaghloul Pasha and the Egyptian Delegation; and spoke in most eulogistic terms of Lord Milner, whom he characterised as being one of the far-sighted statesmen England has always found in times of crisis, to whom she owed her glory, and of Lord Allenby, whom he commended for his wisdom in releasing the four Pashas who were sent to Malta in March, 1918. Rushdi Pasha earnestly advised his fellow countrymen not to be dismayed at the suspension of conversations which has taken place, pointing out that in all political and diplomatic negotiations such difficulties are quite unavoidable; and he concluded by hoping that a settlement on the basis of Egypt's right to self-determine would not be long in coming.

The only other speaker was Fathalla Barakat Pasha, a member of the Cairo Committee, and a nephew of Zaghloul Pasha, whose speech consisted mainly of a eulogy of his uncle. At the conclusion of the luncheon a resolution was put to the assembled company and unanimously accepted for communication to Zaghloul Pasha to the effect that the Egyptian nation entirely supports the Egyptian Delegation in its present attitude, particularly with regard to the demand for the abolition of the Protectorate, and that it implicitly trusts and has complete confidence in Zaghloul Pasha and his colleagues.

As regards the Hoi-Polloi, its celebration of the day consisted in parading the streets in the wake of bodies of students and schoolboys, who in honour of the occasion had taken a holiday, and who shouted as they passed the political phrases which have now become popular catchwords, and to which since the discussion in the House of Lords has now been added "Down with Salisbury." The police had no difficulty whatsoever in handling these bodies—one can scarcely call them demonstrations—and no untoward incident marred the day until shortly after dusk an officer was shot at and badly wounded in the Shubra district.

One has, however, no right to say at this early juncture of the inquiry that this unfortunate incident had anything to do with the day's celebrations. The assailant, who managed to escape, was seen by some people, and apparently wore a khaki coat over his "Galabea," and while attire is in such cases often more a disguise than the normal dress of the aggressor, the fact that the officer held a position in which he had to handle natives leads one rather to infer that this may have been an act of personal vengeance, whose only connection with the present situation lay possibly in the fact that the assailant was incited by, or took advantage of, the present popular excitement to obtain his revenge. Apart from this incident, the day passed off in a most satisfactory manner.

**The Political Situation.**

All said and done, the country has taken the development in the situation exceedingly well, and even the vernacular Press is by no means as outspoken and as violently partisan as might have been expected. The first telegrams received here were to a certain extent misleading, in that they gave the impression that there had been a definite rupture of relations, but subsequent information makes it appear that a rupture *quâ* rupture has not taken place, and that matters will from now onwards follow the normal course which negotiations would be expected to pursue.

The general anticipation is that, as soon as the British Cabinet has been able to consider the Milner Mission's report and its recommendations, and has decided on the future policy of the British Government, the basis on which it would be prepared to negotiate will be communicated to the Sultan, and that the Egyptian Government will nominate its own plenipotentiaries to meet those of the British Government. I am firmly convinced that as matters have progressed no really serious opposition will be raised in this country to this line of action; for everyone is weary of the suspense, and would be quite prepared to agree to the reservations being left, as Lord Milner informed Zaghloul Pasha would be done, for discussion between duly accredited representatives of the two countries.

## YUGOSLAVIA.

BELGRADE, November 17.

**The Adriatic Settlement.**

The excitement of the week is, of course, the Italian settlement, which came with such lightning-like abruptness after the long-drawn delay and interminable conversations in Paris. The news first appeared in a wireless communication to the *Politika* from its correspondent, and was rapidly passed round and telegraphed to Zagreb and Liubliana. Although everybody was startled by the suddenness of the decision, most people had discounted it in advance, and looked upon it as inevitable; though, of course, the hot-blooded younger generation and natives from the districts affected were full of indignation, and held crowded meetings of protest. But it is really generally understood that for political reasons England and France were supporting Italy, and that what was termed a conference was in reality a deputation to receive an ultimatum. In a

Digitized by Google

reasoned article, the commercial paper, the *Trgovinski Glasnik*, points out the inevitableness of the whole thing, how the delegates had no alternative but to accept, other than recourse to arms, which at present is unthinkable; for behind the terms offered by Italy stood the unfortunate Treaty of London. Such a treaty, the paper continues, forced upon an unwilling people can be honourably observed, and even welcomed, as an end to a situation which had become intolerable, so that normal commercial relations may be resumed between the two neighbouring countries. Still, it can hardly be regarded as a basis of an entente and military and commercial alliance, though it is certainly hoped that it will put a stop to the unending intrigues of the past eighteen months where the hostile hand of Italy has been seen at work in Hungary and Bulgaria, and, above all, in Montenegro and Albania.

**King Nicholas "Abandoned."**

The news first sent by the correspondent of the *Politika* states that Italy abandons her demand for the neutralisation of Shebenik (Sebenico), and in recognising the Kingdoms of the Serbs, Croats and Slovenes, abandons its support of ex-King Nicholas, so that the Montenegrin question becomes purely an internal one. But in the text, as it appeared in the same paper a few days later, although the new triune kingdom is recognised, there is no explicit reference to ex-King Nicholas; so his abandonment is by implication, unless there is a supplementary document; nor is there any mention of Shebenik.

There remains a trifling number of Italian settlers, or Italianised Dalmatians, in Shebenik, Spalato, and perhaps one or two other towns in the northern portion of Dalmatia, but the number is negligible compared with the Yugoslavs who remain in Italian territory, who amount to about half a million, the majority being Slovenes. This has produced a depressing effect in Liubliana, where there have been hostile demonstrations, and blame is thrown on the Belgrade Government. There are sure to be mutual recriminations, and Belgrade's reply to Liubliana is: "Who lost Klagenfurt?" There is, of course, acute discontent at Zagreb, where the final loss of Fiume is more keenly felt than in Belgrade, and the anti-Serb elements are using the incident as a weapon of attack; while the Serbs retort that the Croats near the boundary line took good care to make money by smuggling goods and provisions into Fiume and so helping their enemies, that the Croats make fine speeches and write patriotic articles, but that when it comes to action they draw back. But the best evidence that the conclusion is the most favourable possible for Yugoslavia under present circumstances is the discontent of the chauvinistic and nationalist Press in Italy. In fact, the "whole-hoggers" on both sides are naturally disappointed, and the reasonable elements are reconciled to the inevitable.

**The Convention with Czecho-Slovakia.**

The text is now published of the convention with Czecho-Slovakia. It is very brief, consisting of only six clauses. Both parties agree mutually to assist the other in the event of an attack by Hungary on either party, and they undertake to make no other alliance without the consent of the other party. The convention is for two years, and will be submitted to the League of Nations.

**The Mónitors Dispute.**

On the 8th the Naval Commission arrived from Budapest to take over the monitors of the former Austro-Hungarian fleet which the Inter-Allied Council has distributed to Roumania and the Danube Commission. The Acting Minister of Foreign Affairs declined to hand over pending the return of M. Vesnitch, to which the Commission replied that they could not accept this answer, and returned to Budapest. On the 11th the Press Bureau issued a *communiqué* explaining that the captured craft had been handed over to Admiral Troubridge, commanding the Allied forces on the Danube who delivered them to the Serbs for custody, and that under the Treaty of Saint Germain they are to be distributed by the Allies: so that the Council's demand will have to be satisfied, though, of course, the expense of maintenance will be refunded. And so the Serbs once more complain, as did the Russians in the old days, that the good work done by their troops is undone by the diplomatists. Celovats (Klagenfurt), Rijeka (Fiume), Istria, and now the monitors!

**Bulgarian Territory Occupied.**

The Serbian authorities have completed the occupation of the Bulgarian villages on the east of the Timok allotted them by the peace treaty in order to give a strategic frontier against Bulgaria; that is to say, Zlokuciane, Gradsko, Halvo, Mali Jacenovatz, Veliki Jacenovatz, Bratievtsi, Shipkovo, and Krnomashnitsa and Kojlovo.

**Enthronement of Patriarch.**

Dimitri, first Patriarch of the renewed United Serbian Orthodox Church, was enthroned on the 13th, amid a distinguished company, including the President of the Skupshtina, the President of the Academy of Sciences, M. Zhuyovitch, Voivodas Boyovitch and Stepanovitch, Admiral Pritsa, General Jurishitch-Sturm, and a number of other soldiers, ministers and politicians. The Crown Prince, who was obviously deeply moved, handed the staff of office to the new Patriarch at ten o'clock in the Belgrade Cathedral. After a brief but impressive silence the choir burst into a triumphant Hallelujah, when the Patriarch, with his magnificent gold and embroidered vestments, mounted the patriarchal throne; after which the Prince took his seat upon the royal chair. The Patriarch thanked the Prince for confirming his election, and then, surrounded by his archihierarchs, archimandrites and protohierarchs, delivered a discourse upon the historic significance of the patriarchate and its rôle in Serbian history. Perhaps it was not by chance that he turned towards Dr. Koroshets, leader of the Slovene Clericals, with the words: "With us there is no clericalism to hamper the State: our Serbian Orthodox Church is not like the church in some other lands, against which justifiable complaint is constantly raised."

## GREECE.

ATHENS, November 13.

**Two Demonstrations.**

This is the end of the last week before the elections, and a very lively propaganda is being carried on in Athens. The streets are plastered with photographs of the Ministers and candidates for Parliament, and leaflets setting forth their aims and virtues are being distributed broadcast. On Sunday the Nationalists, or rather the Royalists—because these have now openly declared that their programme and their firm intention is to bring back ex-King Constantine—held their first and only demonstration. This meeting, which was nothing less than a test of the party's real strength, showed that the number of M. Venizelos's opponents has increased considerably of late, and the Venizelists have now begun to realise that they are not going to have it all their own way. The demonstrators, who had concentrated at Constitution Square numbered 35,000-40,000. Of course, they were not all Athenians; the organising committee had been working very hard, and in order to ensure the success of the meeting had arranged for the conveyance from Piræus and the neighbouring towns and villages to the capital of as many of their party's friends as possible. The Nationalists' leader, M. Gounaris, speaking to the crowd from a balcony, endeavoured to convince it what a lot of harm M. Venizelos had done to the country and how happy everybody would be when the Nationalists came to power. He ended his speech by saying that Constantine was the legitimate King of the Hellenes, and asked the demonstrators to cheer for him, which, of course, they promptly did.

The demonstration of the Venizelists which took place on Thursday was a veriable apotheosis for the Greek Premier. Between 70,000 and 75,000 people—the largest crowd ever seen at a demonstration in Athens—had taken up every available space in Constitution Square to applaud their beloved Prime Minister and assure him of their support in the great fight. M. Venizelos delivered his speech from a balcony of the Hotel d'Angleterre; and then the monster crowd, preceded by a band, torch-bearers, banners, and huge photographs of the Prime Minister and the other candidates

for Athens, entered Stadium Street, which was brilliantly illuminated for the occasion. Every window, balcony, and available point of vantage was filled by people cheering, waving their handkerchiefs and even bed-sheets, and throwing flowers to the crowds below. A huge anchor, the Liberals' emblem, weighing 800 okes, was brought to Athens by a party of enthusiastic demonstrators from Piræus, and followed the demonstration in a motor-car decorated with flowers. Perfect order reigned throughout the meeting, and the manifestants dispersed very quietly on reaching M. Venizelos's house in University Avenue.

As was the case at the time of the Stadium Victory celebrations, the Opposition papers advised the Royalists to remain indoors during the Venizelist demonstration, so as not to add to the number of people participating, and thus give the impression—to the foreigners in particular—that the meeting was a large one.

**Measures Against the White Slave Traffic.**

The Minister of the Interior has addressed a circular to all the prefectures in the country forbidding the issue of passports for Egypt to all young girls under twenty-one who are not accompanied by their father, brother, or a very near relative. In many cases Greek girls have been lured to Egypt by promises of good positions and so forth, only to discover, when arriving at Port Said or Alexandria, that they had fallen into the hands of white slave traffickers.

**The Departure of the Swedish Crown Prince.**

A farewell dinner was given by His Royal Highness the Crown Prince of Sweden at the Hotel de la Grande Bretagne last Saturday night to the Minister for Foreign Affairs, M. Politis. Among those present were the Crown Prince's uncle, Prince Eugene, the Swedish professor M. Loundpmum, and Professor Sotiriadis of Athens University. His Royal Highness, after spending nearly a month in Greece, left Athens on Monday for Rome via Brindisi.

**The Frontier Commission.**

The International Commission for the delimitation of the new frontiers has been obliged to abandon its work owing to the heavy fall of snow in the frontier regions, and has returned to Salonika. It is a question whether the Commission will be able to resume its work before next spring.

## TURKEY.

CONSTANTINOPLE, November 15.

**The Government and the Nationalists.**

The new Government has set to work with considerable energy to "eliminate the dualism" which is complicating the position of Turkey, and Izzet Pasha, particularly, is pursuing his difficult task with all the promptness and singleness of purpose that characterise the veteran soldier. Hitherto, however, so far as the outer world can tell, the Government's efforts have not met with much success. In accordance with the traditional procedure of the Sublime Porte, a thick veil of mystery enshrouds what is actually taking place, but in the present instance there is a better reason than usual for secrecy. For there can be little doubt that the preliminary replies that have been received from Angora would scarcely be of such a conciliatory nature as to make an optimistic impression upon the Allies with regard to the possibility of the new Cabinet's ability to find a solution for the Anatolian problem. It has apparently been decided that before an official mission proceeds to Anatolia to negotiate with the Nationalists, a basis for discussion is to be created by semi-official communications, partly through couriers and directly, and partly through intermediaries. A mission composed of unknown officials has already reached Angora, although the official statement mentioned only one "delegate," whose task was said by Izzet Pasha to be to "establish contact between the Government and Anatolia." The Nationalist administration is now said to have removed to Sivas; and, although no motive is given, the fact that communications are thereby rendered more difficult may be some indication as to the true direction of the wind. Up to the 14th inst. the Government is said to have received no news from the delegate sent to Anatolia, but this is merely official bluff. According to the *Bosphore*, of November 10, Mustapha Kemal has put forward the following conditions as a basis for negotiations with the central Government:—

1. The evacuation of Smyrna and Adrianople.
2. Modification of the financial and economic clauses of the Sèvres Treaty.
3. The abrogation of the Capitulations.
4. A general and unrestricted amnesty.
5. The constitution of a Ministry "enjoying the confidence of the nation."

There is no indication as to the authenticity of the above statement, but there is every reason to believe that it represents fairly accurately the stand that will be taken by the Nationalists; and if such a communication has indeed reached Izzet Pasha it is easy to understand why the negotiations with Anatolia are being cloaked with such secrecy.

In other directions the new Cabinet has been busy with the new organisation, according to the terms of the peace treaty, of the Turkish army and gendarmerie, and a commission has been formed for the purpose of selecting the officers who are to be maintained. The official statement declares that only those officers will be retained who have not interfered in politics. Under such conditions it will be difficult to find a sufficient number even for the very limited forces that Turkey will be allowed to maintain.

**"Madhead Mehmed."**

Travellers arriving from Anatolia give some amusing details of an anti-Nationalist outbreak at Konia at the commencement of October, under the leadership of a certain "Delibash" (Madhead!) Mehmed, who had previously been the hero of a similar exploit at Bozkir. With 200 followers, Madhead Mehmed descended upon Konia, having very sanely cut all the telegraph wires as a preliminary. The Nationalist governor and administration hastily packed up, "in order to save the town from destruction," and, incidentally, to preserve their valuable skins. The "rebels," as the Turkish papers naïvely denominated Madhead Mehmed and his followers, nominated a new governor named Mustapha, who was surely a bosom friend of Mehmed, and set to work to make as much hay as possible while the fine weather lasted. In reply to proposals from the commander of the local Nationalist detachment to negotiate, Mehmed proposed a kind of tourney between an equal number of men from each side. The Nationalist commander had no sense of humour, and somewhat churlishly refused this sporting offer. Meanwhile, some rumour of the affair had reached Angora, and after having governed Konia for three days, Madhead Mehmed and his friends made themselves scarce, and the Nationalist administration was restored. Subsequently, it appears that the Chelebi of the Mevlevi dervishes at Konia was arrested for having joined in Madhead Mehmed's dance, instead of confining his gyrations to his own monastery. Such is life in Konia.

**Nationalist "Victories."**

During the past week there has been some lively fighting between the Nationalists and the Greeks in the neighbourhood of Ismidt, Broussa, and Simav. The Nationalists claim "glorious victories," but the Greeks say that there has been merely a retirement according to plan, and that only from certain points which they had never any intention of retaining. Once the elections are over the Greeks will probably give the Nationalists a few more lessons, which will most likely be forgotten as quickly as past lessons.

In view of their successes upon the eastern front, it can hardly be a matter for surprise that the Nationalists should be in an arrogant frame of mind. On October 15, the Nationalist Chief of Staff, Ismet Bey, after having given a glowing account of the state of affairs upon all fronts, informed the Great National Assembly that his faith in the final victory of the Nationalist cause was unshakeable. Naturally, the Assembly has therefore decided that unless the central Government can guarantee that the Nationalist point of view, that is, the

## ROYAL SCHOOL
FOR
## Daughters of Officers of the Army.

Patrons
Their MAJESTIES THE KING AND QUEEN
and HER MAJESTY QUEEN ALEXANDRA.
Chairman: Lt.-Col. A. GRUBB. J.P.
Vice-Chairman—Surgeon-Gen. SIR WILLIAM TAYLOR, K.C.B.

Daughters of Officers of the Army are admitted to the above Schools according to the circumstances of their parents, at rates of £20, £45, £65, and £80 a year. Granddaughters of Officers are admitted at £45, £65, and £80 a year according to circumstances, and a limited number of daughters of civilians are admitted at £120 a year when there are vacancies. There are 15 Scholarships, open to competition, in the School, of amounts varying from £10 to £20 up to one of £50.

As half of the School consists of pupils on the £15 foundation, which includes both board and education, a deficiency of about £2,500 a year has to be met by contributions, which are earnestly solicited. Donations of £5 5s., giving one vote for life, or subscriptions of 10s. 6d., giving one vote for the year, may be sent to

abrogation of the Sèvres Treaty, will be accepted, there shall be no negotiations.

**Too Much Bolshevism.**

At the same time it is reported that the Bolshevists are making every effort to render abortive the efforts to bring about an understanding with the central Government, which has, of course, declared its resolve to carry out the Peace Treaty. The Bolshevist "Embassy" at Angora is said to be spending money freely with this object, and even the Nationalist newspaper, *Yeni Gun*, which is edited by our old Pan-Turanian and Unionist friend, Yunus Nadi, has complained about the flood of Bolshevist propaganda that has been let loose in Anatolia. It looks as if the *Yeni Gun* will soon have cause to complain about another kind of flood from the same source.

Meanwhile, all Anatolia is in the grip of military fever. All men up to the age of 46 have been called to the colours, and non-Moslems can only obtain exemption by the payment of a heavy sum every month. An arms factory has started working at Angora, and is said to be turning out quite a respectable quantity of small arms and munitions under the direction of foreign experts.

**Armenia.**

The tragic result of the withdrawal of the British forces from Batoum and the Caucasus is now apparent, and is certainly the preliminary to still more serious developments. The probable consequences of our withdrawal from Batoum were pointed out in a former letter, and although that forecast has been fulfilled so far only in regard to Armenia, there can be little doubt that the rest of the story will be along the lines then indicated. At one time it was believed that the Georgians would support the Armenians in their own interests, but there is good reason to believe that the Georgians took another view with regard to the best means of self-preservation. Long before the Nationalist offensive was commenced against the Armenians, Yusuf Kemal, one of the Nationalist leaders, began negotiations with the Georgian delegates at Baku, and just before the offensive commenced the same individual returned to Angora and informed the Great National Assembly, during a secret sitting, of certain arrangements that had been made with the Georgians with regard to the impending operations against Armenia. That the Georgians will soon repent of their short-sighted policy goes without saying, but that will make no difference to matters. Meanwhile, it is apparent that further negotiations are proceeding between Georgia and the Soviet Government. Husseinoff, the Azerbaijan Premier, has been in Tiflis, and has just returned to Baku, while Legrand, the Soviet representative at Erivan, has just left the Armenian capital for Tiflis. The rumour that the Turks have demanded the evacuation of Batoum by the Georgians has not yet been confirmed, but it is practically certain that that is the next move. It will be interesting to see what the Georgians will do in the circumstances.

The Armenians fought to their last cartridge, and in their humble way have played a glorious part. The fall of Kars made a very painful impression in Constantinople, and on November 12 requiem masses were celebrated in all the Armenian churches, and all Armenian institutions were closed in token of the unfortunate little nation's mourning.

**The Crimean Tragedy.**

The final collapse of the South Russian campaign, an episode akin to that of La Vendée over a hundred and twenty years ago, opens up a further vista of alarming possibilities. Public opinion here inclines to the belief that the Bolshevists will now turn their attention to Roumania, primarily for the purpose of "freeing" Bessarabia from the "capitalist yoke," but also with an eye to much more extensive adventures. Certain it is that the Red hosts will now seek a fresh victim, and there is a certain precedent for an advance through the Balkans to Constantinople. But perhaps the German brains that direct the Red armies have realised that precedents are somewhat dangerous things to follow. Nevertheless, whether the Caucasus or the Balkans is to be the scene of the next drama, the outlook is far from reassuring.

## CYPRUS.

Nicosia (undated).

**Unionists and the Legislative Council.**

On October 22 the Council met under the presidency of the High Commissioner, five elected Greek, one Turkish, and the six official members being present. Mr. Sevéris, a Greek member, presented a petition praying that the Government grant of £450 to Greek schools at Nicosia might be increased to meet the growing expenses, which have risen from £900 to £4,000. The King's Advocate then introduced a Bill to establish an office to deal with debts relating to Austria. M. Laniti, a Greek member, opposed, saying, "I do so because I consider that the Legislative Council in which we ought to meet is not this one, but the Hellenic Chamber, from which we alone of almost all parts of Hellenism are excluded, and this contrary to every principle of justice and ethical right." The opposition was rejected by the seven votes of the officials and the Ottoman member. The King's Advocate then proposed the first reading of the Bill, and M. Laniti proceeded to oppose it on the same grounds as before, upon which Irfan Bey, the Turkish member, said, "I rejoice, Mr. President, that my Greek colleagues are not pleased with the state of things." Voting took place with the same result; and a similar scene was repeated when the King's Advocate introduced a Bill relating to the debts and properties of Bulgarian subjects.

The attitude of the Greek members, who include the foremost agitators, seems to indicate clearly what line they intend to adopt. It will no doubt be the old story of factious opposition to every Government measure, and obstruction to the course of progress which it is their duty to promote, but which has long been a secondary consideration. They will continue to agitate for "union," both in the Council and elsewhere, in the belief that the Government will "not be able to endure the existence of a restless focus of Hellenic patriotism." This is plainly stated in the report of an interview with one of the members published in an Alexandrian paper. It will perhaps be more probable that British patience will become weary of an unreasonable and captious opposition, and that, as in 1904 (when a serious warning was given by the British Government, in similar circumstances, as to what must inevitably be the consequence of persistent and organised obstruction), it will become necessary to deal drastically with an element which, while professing to represent local Greek opinion, systematically fails to co-operate in the work of island administration and reconstruction.

**General News.**

The High Commissioner, with Mrs. Stevenson, is leaving for England on October 27, their two children remaining at Nicosia. Mr. Fenn, the chief secretary, will act during his absence on leave. Mr. Hart Davies will take his place, Mr. A. McLaughlan acting as assistant.

On October 22, at a meeting of the Greek members of Legislature and those of the Aid Committee, the Bishop of Papho presiding, it was decided to call a pan-Cypriot meeting at an early date.

A police corporal has been killed by accident while driving with other warders to the central prison outside Nicosia. An axle of the carriage broke, and the horses taking fright brought it into violent collision with a wall. The warders were more or less injured.

Sultan Fuad visited the Muled el Nabi popular fair, at Cairo, which ended on November 23. The fair is held annually in celebration of the birthday of the Prophet.

## GREAT BRITAIN AND THE EAST.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The revision of the Turkish Treaty is advocated in many quarters, but usually with special reference to the Smyrna territory. Many of those who advocate this policy appear to overlook the fact that Thrace is more Moslem than Smyrna, and that the Greeks have less right to Adrianople than to certain parts of the Ionian coast. If any revision of the recent settlement in the Near East takes place, it is to be hoped that the claims both of Eastern and Western Thrace to liberation from Greek rule will be carefully considered. Western Thrace was handed over to Greece, in defiance of the wishes of the population, on the clear understanding that M. Venizelos would assure to Bulgaria a free commercial outlet to the Ægean Sea; but we cannot expect the Bulgarians to rely on any assurances which may be given them by "Constantine Bulgaroctonos" or his supporters.—I am, etc.,

LELAND BUXTON.

45, Kensington Park Gardens,
Ladbroke Square, W.11.
November 28, 1920.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—As you are aware, during the past year I have repeatedly, both in THE NEAR EAST and *The Times*, urged that Turkey was not receiving fair treatment at the hands of Europe, and if our rulers persisted in enforcing the Turkish Treaty it would mean a lot of unnecessary bloodshed in the Middle East and probably trouble in India, where the loyalty of our Moslem subjects would be strained to breaking point. I failed entirely to influence either the Government or the British public, as voiced by the Press; there was nothing for it, therefore, but to leave it to the future to show that my reasoning was sound and my fears justified. I had not long to wait, as fighting began at once and has been continuous since I last wrote, both in Mesopotamia and elsewhere. Now the collapse of the White Russian forces in the Crimea has left the Bolshevists free to join up with Mustapha Kemal or to continue their aggressive policy in Asia and Persia. Yet I have no hesitation in stating that had we offered the Turkish nationalists even one half of the sympathy and financial assistance we were prepared to give Persia, the Turkish manhood would have been aiding us to wipe up the mess caused by the war, instead of joining forces with their hereditary foes against us. As it is, we are powerless even to go to the assistance of the Armenians, who have been left to make the best terms they can both with the Turks and Bolshevists. In Mesopotamia, too, after the useless expenditure of millions, the economy campaign in England is forcing the Government to evacuate and the policy of employing Indian troops outside India for an indefinite period is being also seriously questioned. Finally, the Greek elections have demonstrated that the Greeks as a nation are not prepared to remain mobilised so as to enjoy the favours showered on them by the Peace Delegates hypnotised by M. Venizelos.

By the time this letter appears in print Mr. Lloyd George will have had his interview with M. Leygues, and for the peace of the Middle East it is sincerely hoped that the Treaty of Sèvres will be entirely revised. By all means let the Greeks keep their Constantine, but let his kingdom be limited to a lesser Greece than contemplated by M. Venizelos, and let us hear nothing more of a Greek mandate to acquire territory in the vicinity of Smyrna or to suppress the Turks in Anatolia.

Let it, too, be recognised that Turkish Nationalists are not all "brigands," but patriots who, with financial assistance and goodwill from Europe are better able to play the policeman in their own country than any Christian Power however civilised. If the money we have expended in Mesopotamia had been utilised to put the Turks on their legs again, what a different story there would be now to tell! I have no wish to take undue credit to myself, but I think that the Editor will bear me out when I state that, so long ago as November 11, 1919, I wrote to *The Times* urging that the Egyptian Nationalists should be invited to become members of the Milner Commission. At that time you, Sir, described the proposal as a "daring one," and it was only some six months later that we heard of Zaghloul Pasha being in London conferring with Lord Milner. It is true that the result of those conferences has still to materialise in the form of a treaty, but if one may judge from the official communiqués to the Press an agreement is likely to be reached. If a second Lord Milner cannot be found to confer with Mustapha Kemel, why not extend the scope of the Milner inquiry so as to include the future government of what has hitherto been known as the Turkish Empire? I remember years ago hearing the late Lord Cromer state that the Egyptian question was really part and parcel of the larger Near Eastern question. In my humble opinion Lord Cromer was perfectly right, and as the British Cabinet is apparently (?) prepared to be so generous in dealing with Egypt there is all the more reason why France should also be generous in the matter of Syria. Let these two Powers agree to accept a joint mandate for the Turkish Empire *as a whole*, and we shall have made a long step in advance towards a general peace.

I am, etc.,

Biarritz, November 27. COLES PASHA.

## AMERICAN RELIEF IN THE NEAR EAST

TO THE EDITOR OF "THE NEAR EAST."

Sir,—My attention has just been called to an Editorial reference in your valuable paper to what it calls "a scandal" on the work of the Near East Relief, formerly known as the American Committee for Relief in the Near East, and referred to in your Editorial as "American Relief Mission for Armenia." The "scandal" seems to consist of the discovery that the Relief Committee is importing into the country agricultural implements and machinery "intended for sale." The conclusion seems to be drawn that the organisation has gone into commercialism, and so is unworthy of public confidence.

The present writer has been the active chairman of that relief organisation from its beginning, and a member of its executive committee. He has been present at all of its meetings, except when he was in Turkey as director of its relief commission sent to that country immediately following the Armistice. In Turkey he organised the various relief centres, defined the policy to be followed, and inaugurated the work, with some five hundred volunteer American workers.

The one policy decided upon was that all relief should, as far as possible, be administered in a way least likely to pauperise the recipients. The vast number of refugees were not paupers in the ordinary sense of the word, but, through the misfortunes of war and its accompanying horrors, found themselves wholly destitute. Our plan, which was also the one proposed by themselves, was to get these people into a position as soon as possible where they could once more be independent. The most of them owned land, but had been stripped of all farming implements. The artisans had nothing but their bare hands, as all tools were stolen at the time of the deportations. In consultation with British officers in Aleppo, Aintab, Marash, Urfa, and elsewhere, as well as after consultation with Armenian leaders, we decided that the best and most permanent form of relief we could render was to provide these people with imperatively needed implements, tools, and machines. Large numbers of Armenian dependents asked that they might purchase rather than receive as a gift the things they must have.

It was discovered that Turkey is fully capable of producing all the food required to feed all the people, and more, but it was wholly lacking in tools and farm implements. It at once became apparent that to provide these would be the sanest of charities. Those able to pay for necessary tools were, of course, compelled to do so, and those who desired to give pledges for future payment were accommodated, while others received aid freely.

At the same time, the committee has over 100,000 orphans whom they are supporting in whole or in part. These are taught trades, etc., and are made to till the land, and so become self-respecting as well as self-supporting. Tools, machinery, and agricultural implements are imported for their use.

The charter of the Near East Relief Organisation granted by the Congress of the United States authorises the chartered body "to provide relief, and to assist in repatriation, rehabilitation, and re-establishment of suffering and dependent peoples of the Near East and adjacent areas: to provide for the care of orphans and widows, and to promote the social, economic, and industrial welfare of those who have been rendered destitute, or dependent," etc., etc.

This relief organisation is not going into commercialism, but is endeavouring to re-establish a scattered and shattered people upon a self-respecting and self-supporting basis, using only such means as must commend themselves to all reasonable persons.—I am, etc.,

JAMES L. BARTON,
Chairman, Near East Relief.

14, Beacon Street, Boston, Mass., November 12, 1920.

[The reference in Mr. Barton's letter is to a "Note of the Week" in our issue of September 23. We then commented on a Constantinople message to *The Times*, which stated that certain members of the American Relief Commission to the Near East had been arrested on a charge of corrupt practices

Digitized by Google

in connection with the relief activities; and to a letter from a British officer in Georgia, quoted in the *Morning Post*, in which reference was made to a "scandal" connected with the American Relief Mission for Armenia.—ED.]

## THE TURKISH TREATY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I enclose a copy of a "Plea and Protest" against the Turkish Treaty, and a Memorial to the League of Nations on the same subject. I shall be very glad if you will publish these documents, with the signatures attached, in your paper.— I am, etc.,

22, Berners Street, W.1. LELAND BUXTON.

November 25, 1920.

[The following is the text of the Memorial referred to by our correspondent. We regret that it is impossible to publish "A Plea and Protest," owing to lack of space.—ED.]

To The Secretary-General,

THE LEAGUE OF NATIONS, GENEVA.

Sir,

1. We, the undersigned British subjects irrespective of race or creed, beg to submit this humble appeal to the Assembly to take steps under Article 19 of the Covenant to advise the reconsideration by members of the League of the Treaty of Peace with Turkey signed at Sèvres on August 19, 1920.

2. We do so in the profound conviction that the Treaty, by the intense dissatisfaction it has caused to the Moslems of India and Western Asia, and by the sense of injustice and oppression it has engendered in Turkey and other countries immediately affected, has brought about international conditions "whose continuance," in the words of the Article, on which we base the appeal, is calculated to "endanger the peace of the world." It is inconsistent with the principles of liberty and national self-determination so strongly emphasised by the Allies through the later stages of the war, in which the Moslem subjects of the Allied Powers took a full and—in some theatres—a most responsible share. It also violates pledges specifically given—and notably by the British Prime Minister on January 5, 1918, when he declared that the Allies were not fighting "to deprive Turkey of its capital, or of the rich and renowned lands of Asia Minor and Thrace, which are predominantly Turkish in race." He added, at a later stage: "We do not challenge the maintenance of the Turkish Empire in the home-lands of the Turkish race with its capital at Constantinople."

3. In spite of this declaration, the Treaty transfers to Greece the whole of Thrace, right up to the Chataldja lines, with the exception of the Derkos area, which supplies water to Constantinople. The cession includes Adrianople, regarded by the Moslems as one of their most sacred places and preponderantly inhabited by Turks. To their grief and dismay, the people of Thrace have been transferred to an alien government, traditionally hostile to the Turks. They were given no such option as in the somewhat analogous case of Schleswig-Holstein, where the Allied Powers, applying the principle of self-determination, allowed the people to choose for themselves by plebiscite between Danish and German sovereignty.

4. Even in Asia Minor the Turkish Government has been compelled to transfer to Greece "the exercise of her rights of sovereignty over a special area round Smyrna." In this area, extending 100 miles, the Greek Government is to be responsible for administration, may keep troops there to maintain order, may include the territory in the Greek system, and is to establish the local Parliament on the basis of a scheme of proportional representation. After five years such local Parliament may ask, by a majority of votes, for the definitive incorporation of the City of Smyrna and the hinterland in the Kingdom of Greece. The Council of the League of Nations may require a preliminary plebiscite. The long postponement of this step gives the fullest opportunity for the "man in possession" to secure an artificial preponderance in number of the Greek element and of persons compelled by circumstances, against their will and judgment, to vote for the elimination of the remaining mere shadow of Turkish sovereignty. Smyrna is the chief outlet of Anatolia to the sea, and the commercial and industrial centre of an immense part of the country, and its absorption by a foreign Power will paralyse the economic life of what will nominally remain of "the rich and renowned lands of Asia Minor" under Turkish rule.

5. In the portion of the pre-war Turkish Empire not predominantly Turkish in race, the situation is not less inimical to Moslem contentment and the Peace of the World. The support given to the Allied cause by the Arabs of the Middle East was secured by promises of Arabian autonomy and self-determination in the countries concerned. The Arab kingdom of Syria enjoyed a very short-lived existence, and France is exercising there a mandate from the Supreme Allied Council, while Great Britain is similarly engaged in Palestine and Mesopotamia. It is notorious that neither in Syria nor Mesopotamia are the conditions of mandatory authority laid down in Article 22 of the Covenant being fulfilled. The wishes of the communities concerned were not "a principal consideration in the selection of the Mandatory." So far from the existence of these communities as independent nations being "provisionally recognised, subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone," the Mandatories are engaged in subjugating the inhabitants, at heavy cost to themselves and to the bitter resentment of the Arabs, on whom they seek to impose an elaborate Westernised system of administration, unsuited to their traditions and environment. The large employment of Indian troops for this purpose, in Mesopotamia, into the third year since the Armistice, has intensified the indignation of Indians, while the cost to the British Exchequer of this state of war is persistently criticised by important organs of public opinion. The League of Nations has a direct responsibility for the manner in which mandates are carried out, and justice demands that their underlying principles should be observed, and that they should not be a cover, as at present, for the exploitation of weak and small nations.

6. Finally, we come to those features of the Treaty which virtually destroy Turkish sovereignty in those areas which are to remain nominally under Turkish rule. While Germany has been allowed unfettered control over her diminished military establishment, the army of not more than 50,000 men Turkey is permitted to maintain is to be under the "control, organisation, and distribution" of an Inter-Allied Commission, composed entirely of representatives of the Allied Powers and with Turkey herself unrepresented. In the not less vital department of finance there is a like state of vassalage. The whole country is placed under a financial Commission, composed of a representative of each of the interested Allied Powers—France, Great Britain, and Italy—to whom a Turkish representative is added "in a consultative capacity." The powers of this body are so large as virtually to deprive the Turkish Government of any authority over the revenue and expenditure of the country or of its fiscal policy. Turkey, in fact, is deprived of the essential attributes of a sovereign State.

7. While Article 36 of the Treaty lays down that the rights and title of the Turkish Government over Constantinople shall not be affected, "and that the said Government of His Majesty the Sultan shall be entitled to reside there and to maintain there the capital of the Turkish State," Constantinople is made part of the "zone of the Straits." This zone will be under the jurisdiction of the "Commission of the Straits," over which neither the Sultan nor any other Turkish authority will have any power or control. The Commission may establish their organisation at Constantinople, and will be entitled, as often as they think desirable, to proceed to any spot whatever in Turkish territory, or to send sub-commissions, or to authorise one or more of their numbers to go, to any such points.

8. Under such conditions the sovereignty of the Sultan is so limited and violated that Turkey ceases to be an independent Power. For all practical purposes the Khalif, upon whose temporal power the Moslems of the world lay great religious emphasis, will be no more than a political prisoner in his nominal capital, where he and his Government will inevitably be exposed to perpetual harassment from the foreign military and financial dictators, without whose assent no substantial detail of administration can be carried out. The extreme severity of the terms of the Treaty, in comparison with those imposed on the Christian Powers defeated in the war, has had a most disastrous effect in shaking the faith not only of Moslems, but of other Eastern peoples, in the tolerance, justice, and honour of the Allied Powers, and the sincerity of the principles laid down for the peace settlement while the issue of the war had still to be determined.

9. For these reasons we humbly pray the Assembly to exercise the duty imposed upon it by Article 19 of the Covenant to advise the reconsideration of this unhappy Treaty, so out of harmony with the principles of the Covenant, so disturbing a factor in international relationships, especially between Asia and Europe, and so inimical to that peace of the world which it is the express purpose of the League of Nations to foster and conserve.

We have the honour to be, etc.,

# NEAR EAST BOOKSHELF.

I.—"THE BAGGING OF BAGHDAD." By Ernest Betts. (London: The Bodley Head. 7s. 6d. net.)

II.—"THE LAST DAYS OF THE ROMANOVS." By Robert Wilton. (London: Thornton Butterworth, Ltd. 1920. 15s. net.)

III.—"THE QUATRAINS OF OMAR KHAYYAM: A NEW TRANSLATION." By O. A. Shrubsole. (London: Marlborough and Co. Wrapper, 2s. 6d.; cloth, 3s. 6d. net.)

## I.—THROUGH MUD TO VICTORY.

"This book," says the author in the first sentence of his preface, "is an attempt to set down as freely as possible an individual war experience." It is, we are inclined to think, a very successful attempt, too—in spite of its title, which certainly does not predispose us in its favour. It is consistently subjective rather than objective; but, in spite of that fact—or, perhaps, because of it—Mr. Betts now and then brings home to us in an extraordinarily vivid way the conditions under which our men fought and marched, lived and died, in Mesopotamia during the second advance on Baghdad.

We should like the book better if Chapters 13, 14, and 15 had been omitted. They give us some of the author's impressions of India, gleaned during sick leave, and they strike us as rather superficial. We hold no brief for the Englishman in India; but our own observation leads us to conclusions very different from those of Mr. Betts. Personally, we do *not* "enjoy teacups . . . and euphemisms and scandal"; and we are sure that a great many of our countrymen and countrywomen in India are of the same opinion; and to say that India "can be recommended as the school for scandal" is as untrue as it is unjust. Nor is it correct to proclaim that the Indian's religion—which one, by the way?—is "incomprehensible to the white man": the works on the subject by European scholars offer sufficient evidence to the contrary. It is true that India has its Captain Gadsbys and its Mrs. Threegans, and perhaps they are a growing number; but it has also its Wresleys, its Stricklands, its Mrs. Vansuythens, and—if anybody cares for the type—its Aurelian McGoggins. Moreover, did not even Captain Gadsby sometimes discuss "Shakespeare and the musical glasses"? We fear that Mr. Betts has been less than fair in these three chapters.

The rest of the book is good reading. We do not know why our author should place the disappearance of the "glories" of Mesopotamia "some three thousand years" ago, and we make bold to remark that his ideas of pre-war Irak el-Arabi need some revision; but when he is telling us of what he saw himself, and—even more so—of what effect his experiences had upon him, he is extremely interesting. As we have indicated above, he sometimes succeeds in calling up a scene before us with extraordinary vividness. This is notably the case in regard to his seventh chapter, which, for one reader at least, did more than all the most sustained efforts of the "special correspondents" to give one a glance at the working of the mind of a young soldier of the New Army. The descriptions of the capture of Kut and of the subsequent victorious advance on Baghdad are also capital—from a civilian's point of view. The book is not likely to meet with the approval of the recruiting sergeant, but the ordinary man will find it full of human interest. Mr. Betts volunteered to do his bit, and did it; and, we feel sure, did it well. But he did not like doing it; army life has no attraction for him; and he makes no pretence to the contrary. He throws some light on his outlook when he writes of a conversation with a brother officer:—

This evening fatalism was the subject he had embarked upon—a choice which seemed to me peculiarly inappropriate to the moment. Few care to be convinced that their death on a certain date is part of a prearranged plan that has been worked out like algebra on a blackboard. It is intolerable to think of it. And his views on marching are clear:—

Picture to yourself a long, straggling column of men crawling across the desert, each heavily laden with that vast museum of war material every soldier has to carry, their tired shoulders bent to a half-stumble, their eyes searching the ground for places that would afford a reliable grip. Marching under such conditions is a stiff, aching, maddening business that rapidly uses up a man. It was tragic to see our platoons doing their utmost to cover the ground. . . .

Those who know the country will be tickled by many a neat touch, such as: "We arrived at Garmat Ali—a small village more clearly visible on the map than on the banks

of the Tigris." But why, oh, why does Mr. Betts write of wishing for a witch to "come flying on a broom from Baghdad with a magic carpet under her arm"? The carpet could get along without the broom and the witch. But the touch is interesting as showing how very distinctly English is the author's outlook.

## II.—THE TRAGEDY OF AN IMPERIAL HOUSE.

Mr. Robert Wilton was special correspondent of *The Times* during Admiral Koltchak's advance against the Bolshevists in Siberia. On arriving at Ekaterinburg, in March, 1919, he foregathered with a judicial officer named Sokolov, who was conducting an inquiry into the circumstances attending the Imperial Family's disappearance. He took an active part in the local investigations, and was entrusted by M. Sokolov with a complete record of the evidence of eye-witnesses. He has now published a translation of these telling documents, which enable Western readers to follow the victims through every phase of their sufferings. New light is thrown on the character of Nicholas II. and his spouse. He seems to have been a passionate lover of Russia and a staunch friend of the Entente. There is, indeed, reason for believing that he was murdered because the Moscow camarilla and their German wirepullers knew that he would never ratify the shameful Treaty of Brest-Litovsk. The Emperor's intelligence and amiability are beyond all question, but qualities which would have made him happy as a private individual were neutralised by his uxorious disposition and his ingrained weakness of will. It is equally clear that the Empress Alexandra did not deserve the obloquy hurled at her in our newspapers, which precluded the offer of an asylum in England. She was anything but pro-German; she shared her husband's love of Russia, and her dearest wish it was to preserve her son's heritage intact. But Alexandra's absolutist tendencies led her to veto the proposed convocation of the Duma in 1916, which would have ushered in a constitutional régime. Her religion was deeply tinged with fanaticism bred by hysteria, whence the disastrous influence of Rasputin, who appears to have been a tool in the hands of far greater scoundrels. The four Grand Duchesses were innocent and charming girls, while the little heir-apparent, despite inherited disease, gave proof that he possessed a stronger will than his luckless father.

The Provisional Government which came into office after Nicholas's abdication banished the imperial family to Tobolsk; and while Kerensky remained in power they had little to complain of except the loss of liberty. A change for the worse came with the Bolshevist revolution of October, 1917. The prisoners were half-starved and treated with every conceivable indignity. On April 22, 1918, they were transferred to closer confinement at Ekaterinburg; and at midnight on July 16 they were slaughtered with indescribable brutality. Five attendants shared their fate—faithful to death; and every member of the House of Romanov who fell into the Bolshevists' clutches was summarily executed.

Students of history will trace an extraordinarily close parallel between the French Reign of Terror, in 1792-4, and the last phase of the Russian Revolution. Both began with a campaign of slander, which sapped the foundations of loyalty; both were characterised by fanaticism, incoherence, and barbarity. But the Jacobins had some excuse for adopting harsh measures. Queen Marie Antoinette had plotted the overthrow of the Republic; France was honeycombed with Royalist conspiracies; her territory was invaded by foreign armies, whose leaders threatened to wreak vengeance on the King's rebellious subjects, and lashed a proud people to madness by their insults. No such palliation can be offered for the atrocities perpetrated in Russia; and Mr. Wilton's impartial narrative should convince the most credulous partisan of Bolshevism that the gang of miscreants who organised the most appalling crime in history stand outside the pale of civilisation.

F. H. S.

## III.—AN UNHIBERNIAN OMAR.

The cult of Omar Khayyam has spread enormously in this country during the past quarter of a century, but it is safe to say that much of the homage rendered to the Tent Maker should by rights be accorded to Fitzgerald. The Irishman, it seems to us, took the Persian's verses, saturated himself in their spirit, and then presented them to the world, in a form closely resembling that of the original, and highly attractive, but in regard to substance owing almost as much to him as to Omar. Mr. Shrubsole's translation, which Messrs. Marlborough present to us in a very attractive booklet, certainly bears out this view. It is an entirely new translation, and "endeavours to present Omar as he really is," and though it has not, in our opinion, the charm of Fitzgerald's paraphrase, it is an interesting study and a piece of work on which the translator is to be congratulated. Those acquainted with what we may call "the authorised version" will find here several shocks; but they will read Mr. Shrubsole's translation with profit, if not always with pleasure, and will surely feel grateful to him for enabling them to get a truer view into the nature of the Persian original. The Introduction will be helpful to new acquaintances, but the Notes might well have been made more numerous and fuller, for the benefit of readers quite unacquainted with the East. The little book deserves to be in demand at this gift-giving season.

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day,*
*How Sultán after Sultán with his Pomp*
*Abode his Hour or two, and went his way.*

—OMAR KHAYYAM.

"One has often heard of the biter getting bit, but it is seldom one hears of the lawyer getting left," writes an Egyptian correspondent. "The prophet Isaiah pronounced a woe upon those who justified the wicked for a reward, but evidently he did not think the wicked would prey upon the wicked, and he never said anything about the man who justified the wicked and did *not* get his reward. To come to the point. There is a story that in Egypt a temporary officer and —— was haled before a court-martial and accused of passing cheques which the bankers did not recognise. He engaged a learned counsel, who managed to persuade the Court that his client had done no such thing. However, he was obliged to own his error afterwards (not publicly), for his bill was paid by a cheque which also the bankers refused to recognise! Accounts are cash in advance (no cheques accepted) now with that legal luminary, to say nothing of refreshers which leave nothing to chance."

***

I suppose we all know one or two people with a passion for "making martyrs of themselves," as the saying goes; but martyrdom of the kind indicated is generally pretty cheap, and the day of the real thing—the thumb-screw and the rack, or the stake-and-faggot kind—is gone for ever, let us hope, so far as this country is concerned. Martyrdom in the cause of one's religion is, however, still possible in the East, and in some parts of it even probable unless one walks warily; though reports of such sacrifices are unlikely to find their way into the Press of the West. But the improbable happens sometimes, as the recent publication in *The Times* of an incident at Sultanabad serves to remind us. True, the martyrdom took place six months ago, but the victims have at least achieved the modern equivalent for fame—if rather late in the day.

***

In case you have not read the story, I will outline it here; for it seems to me to be worth telling as a record of real heroism and devotion to an ideal. It begins—rather scrappily, unfortunately—with "the martyrdom of a whole family, which took place at Sultanabad on February 16," presumably because the said family were Bahais, or followers of Bahai'ullah, a sect professing "a universal quietist religion," and as harmless and likable as our own Quakers. The poor people's friends were at first afraid to bury them; but a certain Hajji Arab undertook the responsibility, and, evidently labouring under a strong sense of indignation, had himself photographed with the bodies of the murdered children. "This photograph," says *The Times*, eventually "reached the outer world and became a cause of offence." I am not surprised. Modern Inquisitors do not love publicity as a rule. But if the Hajji had acted bravely, he had also been highly indiscreet, as the sequel showed. For the Mollahs of Sultanabad trumped up against him a charge of burning a copy of the Koran; and in spite of appeals to Teheran, on May 29 last he was publicly hanged in Sultanabad. That is the bare outline of the story. If only poor Hajji Arab had lived in the West what excellent "copy" he would have provided for the Press!

CORSAIR.

## AL AND GENERAL.

**TO-DAY.**

December 2 (New Style).
November 19 (Old Style).
Rabia I., 21, 1339 A.H. of the Moslem Calendar.
Kislev 21, of the Jewish Calendar.

Adly Yeghen Pasha arrived at Alexandria on November 28.

It is stated that General Wrangel is going to Belgrade early this month.

Lord and Lady Douglas Compton have arrived at the Hôtel St. George, Algiers.

Sir Murdoch Macdonald sailed in the P. and O. steamer Caledonia this week for Egypt.

M. Sophocles Venizelos, the son of the ex-Greek Prime Minister, arrived in Paris last week.

Sir Ian Hamilton and Lady Benn left London last week for Colombo and Bombay in the s.s. Orsova.

Mr. Lewis Haslam, M.P., and Mrs. and Miss Haslam have left for India, and expect to be away until April.

Mrs. Alec Tweedie and her sister, Mrs. Francis Goodbody, are in Damascus on their way to Palestine and Egypt.

The Duke of Connaught will sail from Marseilles for India on December 18 on board the British Dreadnought Malaya.

Dr. Trumbitch, ex-Foreign Minister of Yugoslavia, will stand as an independent candidate for a constituency in Dalmatia.

Professor Flinders Petrie and Mrs. Petrie left England for Egypt on November 18, to undertake excavations again in that country.

The Czecho-Slovak Minister has gone to Prague on a special mission. M. Dohalsky, First Secretary, will act as Chargé d'Affaires.

The marriage of Monsieur M. Beza, Secretary of the Roumanian Legation, with Mlle. Ada Zagescu took place last week in Paris.

Sir Dorabji Tata, of Bombay, has given £1,000 to the fund for increasing the clinical facilities for the medical education of women at the Royal Free Hospital.

M. Luke Z. Pierides, of Cyprus, who was lately in London, has met with a serious accident in Paris. He is now convalescent, and hopes to return to Cyprus shortly.

Lord Rawlinson, the new Commander-in-Chief in India, arrived at Delhi last week. Guards of honour were furnished from the Royal Irish Regiment and the 6th Jat Light Infantry.

The delegate of the Georgian Government addressed members of the 1900 Club on December 1. His subject was "The Present Russian Situation and its Bearing on the British Isles and the Middle East."

Under the auspices of the Royal Institute of British Architects (9, Conduit Street, W.1), Mr. Martin S. Briggs will, on December 13, at 8 p.m., deliver a lecture on "Saracenic Architecture in Egypt and Palestine."

M. Clemenceau arrived at Rangoon on November 23, and was the guest of the Lieutenant-Governor during his stay. He left for Mandalay three days later, and will return by the river route as far as Prome. From there he goes by rail to Calcutta.

M. Stancioff, the newly appointed Bulgarian Envoy Extraordinary and Minister Plenipotentiary to the Court of St. James, has arrived in London from Paris, and will present his letter of credence to the King on His Majesty's return to Buckingham Palace from Sandringham.

Mrs. Doughty-Wylie will sell early next year the Theberton Hall estate, Suffolk, and will use the proceeds for the erection of a memorial at Sudd-el-Bahr to Colonel C. H. M. Doughty-Wylie, V.C., and those who fell with him at Gallipoli. A site has been obtained from the Turkish Government.

The Rome correspondent of the *Morning Post* writes (November 28):—"The Emir Idriss, Chief of the Senussi, who was recognised as the autonomous ruler of certain parts of Cyrenaica, with the title of "Highness," in the agreement of October 25, arrived here to-day to visit the King, and was received with marked honours."

Field-Marshal Lord Methuen, the Hon. Sir Arthur Stanley, Sir Courtauld Thomson, Major-General Sir Thomas Yarr, and Sir Basil Mayhew were present at the first réunion dinner of the Malta B.R.C. Staff, held, under the presidency of Lieutenant-Colonel Frank Ashley, in the Oak Room at the Trocadero on November 27.

The King has given unrestricted permission to wear the Order of the White Eagle, awarded by the King of the Serbs, Croats, and Slovenes "for distinguished services rendered during the course of the campaign," to Major George T. C. Paget, Special List, and Captain Harold Sherwood Spencer, Royal Irish Fusiliers (Special Reserve), who were the Political Officers of the British Adriatic Mission.

M. Stambolisky, the Bulgarian Prime Minister, arrived in Brussels on November 28 to discuss economic and financial questions and the purchase of railway material. In consequence of the change in the political situation in Greece, he has had to postpone his intended visit to Athens, and will now go direct to Warsaw and afterwards to Belgrade.

Our Belgrade Correspondent writes (November 17):—
At the meeting of the League of Nations at Geneva, the Kingdom of the Serbs, Croats, and Slovenes is represented by Dr. M. Spalajkovitch, formerly Minister at Petrograd, Dr. Ivan Zholger, Professor of Liubliana University, and Dr. Ladislav Politch, Professor of Zagreb University.
M. Vesnitch, Prime Minister, Dr. Trumbitch, Minister of Foreign Affairs, and M. Kosta Stoyanovitch, Minister of Finance, returned to Belgrade by special train from Italy on Thursday, the 11th inst.

The King has been pleased, by Warrants under His Majesty's Royal Sign Manual, to grant permission to wear the following decorations, which have been conferred in recognition of valuable services rendered during the war:—

LEGION OF HONOUR (FRANCE).

CROSS OF CHEVALIER.—John Garstang, Esq., M.A., D.Sc., John Rankin Professor of the Methods and Practice of Archæology in the University of Liverpool, Director of the British School of Archæology in Jerusalem.

ORDER OF THE REDEEMER (GREECE).

CROSS OF OFFICER.—Frederick Benjamin Wood, Esq., O.B.E., I.S.O., lately British Consul at Patras.
CROSS OF CHEVALIER.—Shirley Clifford Atchley, Esq.

ORDER OF THE NILE.

THIRD CLASS.—Clive Preen, Esq., lately Assistant Custodian of enemy property in Egypt.

## APPOINTMENTS, ETC.

M. Veverka has been appointed Czecho-Slovak Minister to Roumania.

Mr. C. R. Ashbee's appointment as Civic Adviser to the City of Jerusalem has been renewed for three years.

M. Pavlovitch, Chief of the Cabinet of the Yugoslav Ministry for Foreign Affairs, has been appointed Chargé d'Affaires of the Legation at Bucharest.

Mr. Philip Lindsay Buckland, Barrister-at-Law, has been appointed a Judge of the High Court of Judicature at Fort William, Bengal, in place of Sir Ernest Fletcher who has retired.

## OBITUARY.

News has reached England that Mr. Duke Baker died on November 6, at the Deaconesses' Hospital, Alexandria. He was formerly Manager of the Anglo-Egyptian Bank at Alexandria, and was one of the oldest British residents in Egypt.

The death occurred on November 27, at Hitchin, of the Bishop of Gibraltar. Dr. Henry Joseph Corbett Knight, who was appointed to the see in 1911, was the sixth Anglican Bishop of Gibraltar. His bishopric stretched from Oporto

Digitized by Google

to Baku, and for the cause of Anglicanism throughout Southern Europe and the Near East his work was unremitting.

The death has occurred at Cambridge of Dr. James Drummond Anderson, Litt.D., of Gonville and Caius College, and University Teacher in Bengali. He was formerly connected with the Indian Civil Service for twenty-five years. He went to Cambridge in 1908, and in the following year received the honorary degree of Master of Arts. Upon taking up the Teachership in Bengali last year he proceeded to the degree of Doctor of Letters.

## NEWS IN BRIEF.

Greek infantry was sent to Crete on November 26 to deal with a "slight effervescence" in the Island.

A Constantinople report says that the Georgian authorities have arrested some fifty Turkish suspects and various Mussulman chiefs.

As a token of France's respect for M. Venizelos, the Paris Municipal Council has decided to rename one of the streets in the city the Rue Venizelos.

Urged by the British Government, Persia has decided that the Megliss shall meet immediately, and it is hoped that it will be opened in ten days' time.

Two British soldiers who were kidnapped on the North-West Frontier some weeks ago by men of the Zakka Khel have been returned unharmed to Peshawar.

The trial of Aveni Rustem, the young Albanian student who shot Essad Pasha Toptan, the Albanian leader, on June 13 last, has begun at the Seine Assizes.

The *Morning Post* Cairo correspondent states that the Mouled El-Nebi celebrations on November 23 passed off quietly. The Court was in mourning for the Princess Fatma.

A telegram from the Viceroy of India, dated November 17, states that hostilities between the Dir and Swat tribes are likely to take place. A *lashkar* of 2,500 Dirwals is reported to have collected.

The *Morning Post* Cairo correspondent telegraphs that Viscount Allenby has issued a proclamation under Martial Law empowering the Public Custodian of Enemy Property in Egypt to sell the property of the ex-Khedive Abbas Hilmi.

The battleship Emperor of India, which has been manned by a new crew, left Sheerness last week for the Mediterranean, to resume duties as flagship of Rear-Admiral Sir R. Webb, commanding the Fourth Battle Squadron, and second in command of the Mediterranean Fleet.

It is reported from Belgrade that the Albanian Government in Tirana resigned on November 20, and that Elias Bey Vrioni, believed to be Italophil, has formed a Cabinet in which Fuad Bey, said to be a Young Turk, is Minister of the Interior and Zef Zurani is Minister of Finance.

## EGYPT AND THE SUDAN.

On November 16 Mr. D. A. Cameron concluded the short course of lectures on Modern Egypt that he has been giving at the London School of Oriental Studies. Speaking of the Sudan, he said that the name was an intensive plural of the Arabic word for black. A hundred years hence there would be a rich and prosperous province in the Eastern Sudan; that country would have its railways leading inland from Port Sudan, and would be quite independent of Egypt. Until now Egypt had been everything and the Sudan nothing, but a new condition was growing up; and, some day, the triangle in the Senaar province south of Khartoum and between the White and Blue Niles would be more important than even that other triangle—the Nile delta. When this country was opened up there would be difficulties between the Sudan and Egypt as to who should have the water brought down by the rivers; the only solution was for the British Government to control the water supply of both countries and to control it firmly.

Speaking of historical and political conditions, the lecturer said that after Kitchener's conquest a convention was made under which, in the Anglo-Egyptian Sudan, the two flags, British and Egyptian, were to be flown side by side. There were to be no capitulations or anything of the sort, and the Governor-General was to be a British officer recommended by the British Government and appointed by the Khedive. That was the organic law, and under it the country had been ruled by British officers for twenty years. When the British officers first went there as rulers the Sudanese were surprised that their new governors did not want to beat, kill, or enslave them. They said, "This is a strange kind of man; all he cares about is to go out shooting." No Egyptian had ever had anything to do with the Sudan except in a subordinate capacity, and if Egypt was to be independent the Sudan had an equal right to self-determination; the two countries should be separated, and the Sudan should not be allowed to fall under Egypt.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

**EXETER**
**ROYAL CLARENCE HOTEL**
*(facing beautiful Cathedral).*

**LONDON**
**HOTEL CRANBOURN**
**67a, Shaftesbury Avenue, W.C.2.**
**Self Contained Suites.**

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
**SMEDLEY'S HYDRO.**

**TORQUAY**
**VICTORIA & ALBERT HOTEL.**

***Cairo's Hotels de Luxe.***

**SHEPHEARD'S HOTEL.**
Open all the year round.

**SEMIRAMIS HOTEL.**
Splendid position on the East Bank of the Nile.

**THE ONLY ENGLISH HOTELS IN ALEXANDRIA.**
**Proprietor: AUGUSTUS VAN MILLINGEN.**

**WINDSOR HOTEL**
**(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.**
**American Bar and Restaurant, Billiards, and Lift.**

**SUMMER PALACE HOTEL,**
**GLYMENOPOULO, RAMLEH.**
This Hotel is situated near the Beach. Open all the Year.
**Every Modern Comfort. American Bar, Restaurant, Bathing Cabins on the Beach. Billiards. Daily Concerts on the Verandah.**

**NAJEM HOURY'S CYPRUS HOTELS COMPANY.**
OPEN ALL THE YEAR ROUND—
**NIKOSIA—Cyprus Palace Hotel.**
**LIMASSOL—Olympus Hotel.**
**FAMAGUSTA—Savoy Hotel.**
**LARNACA—Majestic Hotel.**
FOR SUMMER SEASON—
**TROODOS—Olympus Hotel.**
6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
**NAJEM HOURY & SONS, Limassol, Cyprus.**
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, and Larnaca.

## PUBLICITY IN INDIAN ADMINISTRATION.

The efforts which administrators in many countries are making to secure publicity must be accounted one of the most remarkable by-products of four years of war. In England, indeed, the change may almost be described as a revolution, for here, more than anywhere else, the methods of the permanent officials seemed to be modelled on the actions of the humble mole, which shuns the daylight and conducts its operations beneath an almost impenetrable screen. In the old days policy was recognised to be a topic suitable for public discussion; legislators might talk, and journalists might write, so long as they could secure an audience; but when once the policy was settled its execution was not regarded as a matter in which the public had any further concern. The experts had received their orders, and were carrying them out; there was nothing left to be said; and if some importunate person were bold enough to raise inconvenient questions, all that needed to be done was to extinguish him in a flood of that peculiar official dialect whose merit consisted in its combination of politeness and unintelligibility. On the whole the British public was inclined to accept this view. Administration counted for little in its daily life, and provided the post-office was reasonably efficient and the tax-collector not unreasonably offensive, there was, in fact, little to be said worth saying. But the war quickly made this attitude impossible. The administration had to shoulder new burdens, and was brought into closer contact with the public in its daily life; efficient departments found the need of an expositor, inefficient departments realised the advantages of a screen, and both classes sought the aid of the public Press. How well they were served is now a matter of history; the habit of publicity seems definitely to have been acquired; the mole has ceased to be the symbol of the permanent official.

In India, too, the war has brought a change, but there the original position was different, and the adaptation has followed distinctive lines. The Indian Governments were indeed often negligent in explaining their activities to their own subjects, but they consistently endeavoured to justify themselves in the eyes of the civilised world, and year by year they maintained a steady output of reports and statistics designed to achieve this object. They were not, like the British departments, contemptuously silent, but the result was very nearly the same, for the civilised world failed to study the literature provided at the cost of so much effort; it was, in fact, unreadable when taken in the mass, and that is in these days a valid excuse for continued ignorance. When the war came, therefore, the Indian Governments had what may be termed machinery for publicity ready to hand; it was rusty and cumbrous and inefficient, but it was there, and, following the immemorial fashion of the country, they decided not to scrap it, but to furbish it up. The literature was to be converted into journalism, and if journalists could not be tempted into the departments, their methods could at least be imitated, and their achievements could possibly be surpassed. An example of the new style lies before us in the latest issue of that venerable institution, the "Statement Exhibiting the Moral and Material Progress and Condition of India." In the old days that "Statement" was a bye-word; the contents included, it is true, a large amount of matter relevant to the title, but the facts were set out in a manner so jejune and uninforming that the whole was unreadable, and its publication was welcomed only by those critics who delight to gibe. No such criticism can be passed upon the latest issue. It is essentially good journalism, written in a pleasant, easy style, adorned but not overwhelmed by the *clichés* and catchwords of the moment, illustrated by those ingenious diagrams which the present generation has been taught to admire, and, in a word, excellently adapted to the tastes of its potential readers. When, however, the question of relevancy is raised, a somewhat less favourable verdict must be passed. We turn to the volume for enlightenment on the vast topic of the condition and progress of a fifth of our race; we find in it many facts, and perhaps one or two accidental fictions, bearing on that topic, but we find nearly as much on a wholly different subject, the activities of the various Governments, and the measure and causes of their failure or success. Taken as a whole, it must be classed as apologetics rather than exposition, and, while speaking a new language, it reproduces faithfully the tone and matter of the Blue-books of the past, the familiar self-congratulation when things have gone tolerably well, the equally familiar pained surprise at those unforeseen and regrettable incidents which persist in occurring, and, most familiar of all, the perennial optimism, which is confident that, whatever the mishaps of yesterday, the promise of to-morrow will be realised. In a word, the volume is readable, but often irrelevant; the style may be new, but the matter is very old: and students of experience will rise from its perusal with the feeling that the fusion of journalism and bureaucracy is not likely to result in an entirely neutral mixture. In some countries it is conceivable that the journalist may win: in India it is more probable that he will be absorbed in the bureaucracy, and while retaining or even developing his own manner, will become more and more the exponent of the time-honoured official view.

We have not dwelt on this volume mainly because of its intrinsic importance, though the progress and condition of a fifth of our race is a topic which should appeal to the majority of thinking men. The lesson which we wish to draw from it is of somewhat different import. Publicity in administration has in our judgment come to stay, but publicity does not imply the attainment of final or ultimate truth. The public, relying on a long experience, does not expect such truth from politicians, and it need not be expected from administrators. We do not for a moment suggest that they will attempt consciously to mislead: there is less passion in administration than in politics, and consequently less risk of the cruder forms of distortion; but the fact remains that no administration and no department can be trusted to give a final verdict on its own activities, and the more attractive its presentment, the more need is there for the public to remain on guard. The departmental view is always instructive, but hardly ever conclusive, and if it is put forward more cogently than of old, independent criticism must display a corresponding increase in activity. The public is the final judge of the success or failure of the administrators employed to manage its affairs. In the past it has not infrequently been misled by the unnecessary reticence of its servants, and we believe that the tendency we are discussing will be advantageous in so far as it may ensure that the official case is clearly and intelligibly put forward; but it is a commonplace of the forum that increased skill in advocacy demands increased perspicacity on the bench, and when the public has listened with due attention to all that is so put forward it must still exercise an independent judgment, must appraise all forms of special pleading at their proper worth, and must in the last resort decide for itself whether its work has been well done. The advent of publicity is definitely a gain, but it may increase rather than diminish the obligations of the public.

# WITH THE R.A.F. IN THE LIBYAN DESERT.

**By G. W. T. Garrood.**

On the south-eastern borders of Tripoli, in the Libyan Desert, not far from Jarabub, the Holy City of the Senussi, in a depression 80 ft. below sea level, lies the Oasis of Siwa, the gateway of the West, leading direct to Egypt.

I was in charge of the expedition of aeroplanes which set out on December 28, 1918, for the purpose of surveying and photographing this oasis from the air. My instructions were to compile a photographic mosaic of about 900 square miles of the oasis from a height of 10,000 ft., while all strategical points were to be photographed obliquely from 500 ft. The map made from the photographs taken by this expedition measures 35 ft. long by 15 ft. high when mounted. Between three thousand and four thousand negatives were exposed, all, with the exception of about seventy, from an altitude of 10,000 ft. In tackling this work the whole area was divided into sections, over which the machines operated. A timing apparatus was used which allowed for an overlap of 10 per cent. or each photograph. In a direct line 216 negatives were exposed, giving a 10 per cent. overlap (each negative covering approximately three-quarters of a square mile) in one flight of 3½ hours' duration. It is believed this constitutes a record.

The expedition, comprising three aeroplanes, left Alexandria at daybreak on December 28, 1918, following the railway line as far as El Hammam, crossing Arabs Gulf, and arriving at El Daaba (125 miles west of Alexandria) at about 8.30 p.m. We reached Mersa Matruh the following day, and on December 30 landed at Solloum. The Italian fort on the Tripoli border is some few hundreds of yards only from the Solloum fort. While here we were entertained most hospitably by the Italians; weekly parties were held alternately by the Italians and English, a contingent from one fort being the weekly guests of the other fort. On January 2 we headed for Siwa. As we passed over the Italian fort, flying in line, the machines dipped and the Italian flag was dipped in return. Our flight was practically due south, and was painfully monotonous. A *masrah* (camel track) which does duty as a motor road, is scarcely visible at 2,000 feet, but is worth following, as in the event of a forced landing the chances of being found are far greater. There was nothing in sight on either side of the *masrah* but barren, rocky desert, with occasional patches of scrub. The distance from Solloum to Siwa is only about 200 miles, but, owing to a strong, contrary wind, this occupied four hours' flying time. The first glimpse of Siwa was obtained from a distance of forty miles, the chain of hills forming the northern boundary being just visible. Then followed shimmering lakes, huge patches of date palms, and acres of cultivated land. Very anxiously did we watch for the signal of our landing-place—the firing of a smoke bomb by our mechanics, who had preceded us by road, escorted by Rolls-Royce armoured cars. The faint puff of smoke was located, and we landed by the camp just outside the Oasis of Siwa. The camp consisted of 24 army bell tents with a marquee for the officers' mess. These were surrounded by entanglements and machine-gun emplacements. The camp also boasted a look-out tower 34 feet high, constructed with the trunks of date palms.

We soon made ourselves comfortable, and prepared to start our work next day. It is monotonous work photographing from an altitude of 10,000 ft., but hour after hour, and day after day we kept at it, with occasional intervals when excursions were made to interesting districts. One of these days off was taken in a flight to Jarabub, the Holy City of the Senussi, distant about 85 miles from the camp. No Christian or other "heretic" may approach within 5 miles of the city walls, and strict orders were issued to this effect in regard to our machines. We were very disappointed with our visit, and although we used our most powerful binoculars we saw nothing rivalling St. Paul's, London. The town is built on a hill, and is surrounded by a thick wall, which we afterwards learned was 13 to 15 ft. thick. We could discern the mosque and the dome of the building covering the tomb of the first Grand Senussi. Although the population of Jarabub does not exceed four hundred, this mosque is capable of seating five times that number of worshippers. Among the population are 80 negro slaves devoted to the service of the mosque.

Very different is the capital of the oasis—Siwa Town. Here there is a population of four thousand, while the town itself is a perfect rabbit warren of streets and alleys (seldom more than a yard wide) at varying levels, which are connected in some places by hundreds of steps, dark slimy tunnels, and slippery passages. The houses are built of *sabakha* obtained from the salt marshes, which, when sunbaked into bricks, becomes as hard as cement. The house framing is of palm trunks. The Siwans believe in skyscrapers, for many of their houses contain ten storeys. The Siwans themselves are a decadent tribe, probably of Berber origin. They are lazy, immoral, and untrustworthy. Their language, the origin of which has never been traced, is unlike any other known tongue; but little is known of their history; for explorers unless in force are not considered safe in the oasis. That there was a Roman occupation of the site is evidenced by the remains of wells and walls of Roman construction, and many of the natives to-day have noses of a pure Roman type.

On another occasion we visited Aghurmi, a town of some importance in the oasis, to take tea with the Sheikh. We set out by road, a convoy of nine cars fully equipped for a picnic. Geb-el-Mut (Hill of the Dead) was first visited. This is an extensive rocky hill, honeycombed with tombs and passages hewn out of the solid rock, many of which contain allegorical paintings similar to those found in Lower Egypt. It was here that one of our number adopted a mummy found in an excellent state of preservation; this mummy was christened "Violet," and became a permanent member of our mess. Subsequently she was flown to Alexandria and packed off to England by the pilot who found her.

To return to our excursions. We had lunch near Ain Maghazis, one of the many Roman wells existing in the oasis. The largest of these wells is about 50 feet in diameter, and the temperature is never less than 30 deg. F. above that of the atmosphere in winter. We could obtain no satisfactory explanation of this phenomenon. The ruins of the Temple of Jupiter Ammon were visited next. Parts of the masonry have been removed for the purpose of building a mosque in Siwa Town, which, however, has never been completed. Massive marble columns, well carved with strange designs, still stand. There is no known marble quarry within many hundreds of miles, yet here stand these columns, each weighing not less than thirty tons. How they were transported, and from whence is a mystery.

The village of Aghurmi was reached in the afternoon. It stands on a high rock, and is completely surrounded by a thick high wall, having but one gateway for all traffic. From beneath this rock emerge about a dozen springs of hot, cold, fresh and salt water. The mechanics picnicked in the head Sheikh's garden outside of the wall, while the officers were escorted to the head Sheikh's apartments, which necessitated journeying through the

tunnels and narrow stairs leading to the summit of the rock. Drinking tea with a Siwan sheikh is an important function as well as an honour, and there is quite a code of etiquette to be observed. We were requested to seat ourselves on a beautiful Bedouin carpet which covered the entire floor of the room. Then the first brew of tea was brought in. It was green, and seemed to be without either milk or sugar. The kettle of crude native pottery was kept on the boil over a charcoal fire; the first brew being consumed the dregs in the teapot are retained for the second brew, a bunch of mint and a little more green tea being added; the third brew was made from the remains of the second, to which a few lemon leaves were added. When drinking it is necessary to make as much noise as possible, this being considered a mark of appreciation. It is a great insult to the sheikh to leave the tea drinking before the third brew, and a still greater insult to remain after the third brew has been consumed. We had been warned of this, and quickly made our adieux, not, however, before the sheikh had given us many baskets of dates and other fruit to take back to camp. Dates are the chief product of the Siwa oasis, many hundreds of tons being convoyed annually to the coast by Bedouin camel caravans An interesting feature of the oasis was a sand dune 500 ft. high, with a crater at the summit On windy days a column of sand, often 30 ft. high, is carried upwards, giving the crater an appearance of smoking.

We paid many visits to the large clay pans which are scattered among the hills, where many hundreds of flint implements were found, including arrow- and spear-heads and hard grinding stones for crushing grain. On the completion of our photographic work we were given a farewell luncheon by the Siwan sheikhs. At this entertainment fourteen courses were served. On March 2 last year we left the oasis with many interesting curios and gruesome relics strapped on every available part of our machines.

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:—*

ARABIA. ARMENIA. GREECE. INDIA: Lajpat Rai (Passport). (November 22.)

ARMENIA. SERBIA (BRITISH LOANS). ANGLO-PERSIAN AGREEMENT. (November 23.)

INDIA: Incitement to Disaffection.—Dyer Fund.—Elections.—Burma (Government of India Act).—Outrages.—Punjab Disturbances (Amnesty).—Rupee Exchange.—Compulsory Military Service.—Stores Depot (Pensions). PALESTINE (MANDATE). INDIA: Seditious Speech.—Uncovenanted Services.—Arms Rules, 1920.—Civil Service, Memorials.—Publicity Officer. Burma. RUSSIA: Batoum. EMIR FAISAL. ARMENIA. (November 24.)

PEACE TREATIES: Asia Minor. MONTENEGRO. GREECE. PALESTINE (BRITISH GARRISON) INDIA: Army Pay Accounts—Officers' Passages.—Police Pay.—Leave and Unemployed Pay (Officers). (November 25.)

### Palestine.

On the eternal problem of Jew and Arab *Palestine*, of November 20, says:—

When Zionists speak of Jews as the necessary cement of Palestine nationality they have no idea of establishing a racial tyranny or of ousting Arabs from any of their existing rights. They do not ask Arabs to become Jews, but only that they shall become loyal Palestinians. It is an inevitable condition of the formation of a nation that the first allegiance of its people shall be to the land, and it is the peculiar distinction of the British that they alone have known how to create these new nationalities. Canada, Australia, and South Africa are British only because their people are Canadians, South Africans, and Australians first. That is the ideal that we wish to see pursued by the British in forming the new Palestinian nationality. Quebec and the rest of Canada are one in spite of the different racial strains because they are all Canadians. We ask no more from the Arabs than that they shall be loyal to the ideal of Palestine a nation as the French of Quebec are loyal to the ideal of Canada a nation. And we recognise, too, that Jewish immigrants will need training in the same ideal. They, too, will need to discipline themselves to the processes of political education.

### Greece—

The *Manchester Guardian* of November 18 has some strong comments upon M. Gounaris and his reported policy. It says:—

He proposes not only to restore the man who destroyed constitutional government in Greece in order to help Germany and injure the Allies, but also to pocket the rewards which the Allies have bestowed on Greece for the services of M. Venizelos. But we are not so simple as M. Gounaris supposes. We shall continue to hope that many of those who have helped to defeat M. Venizelos have been moved by their own discontents and are no friends of King Constantine. In that event a plebiscite may decide against him and his son, and so put a natural end to a situation which even by the defeat of M. Venizelos is sufficiently disagreeable to the friends of Greece. But if a plebiscite should recall Constantine to the Greek throne—and there are ways of manipulating plebiscites—then unquestionably we should have to reconsider our attitude to Greece. It is one thing, for instance, to grant the custody of the northern coast of the Dardanelles, as is done by the Turkish Treaty (not yet completed, by the by), to a liberal-minded Greece in sympathy with the Allies; it would be quite another to entrust it to a reactionary Greece ruled by a pro-Prussian autocrat who might be trusted in any future difficulties to do what he could to repay an old grudge against France and England.

### —and the Allies.

"The result of the Greek election," says the *Outlook* of November 20, "can only be recognised as a disaster; the only question is as to the exact nature and scope of the trouble." It proceeds to comment upon the greatness of M. Venizelos, and upon what it calls the flagrant ingratitude that the Greek people have shown towards him.

But the full ingloriousness of the transaction is not illustrated by the rejection of Venizelos. It is not so much by their antipathies as by their preferences that the Greeks stand condemned as a people incapable of a noble future. They do not simply desire to get rid of a rule which, it is true, would have compelled them to put up with some small and transient sacrifices for the sake of a greater good. They are anxious to revive a rule which combined at once the vilest and the most ludicrous features of Prussianism and Potsdamism Doubtless King Constantine was not the most sinister figure of the great war, but certainly he was the most contemptible. He was false to everything and everybody but his wife's relations and those principles which he had imbibed in contact with the Prussian Court. He betrayed his great Minister, he betrayed his Ally, he lied to France and England, he performed for Germany the kind of services which are only undertaken by men destitute of the smallest conception, we will not say of kingly but of gentlemanly honour. Germany used the treason; even Germany could hardly have respected the traitor.

It praises the British and French Press for "warning the Greeks of what they will incur by carrying bad taste too far"; and continues:—

Quite apart from pertectly justifiable regard to the undesirability of again converting the palace of Athens into a German agency, it would be clearly impossible to continue with men like Streit and Gounaris arrangements entered into with Venizelos. Thus the Greek Army in Anatolia is financed by Great Britain, and can only be operated in strict understanding with the Allies, and in every direction our recent relations with Greece have been based on the belief that she had cut herself off from a past none too creditable, quite apart from the special infamies of her late monarch. To such relations there must be an abrupt end if Constantine is restored, and in any case it will not be easy, in the absence of M. Venizelos, to feel any confidence in Greek policy. The Greeks, if they were wiser, would take note of the nature of Italian comment on the new situation. Italy, naturally enough, is not anxious for a Greater Greece that would dispute Italian ascendancy in the Mediterranean, and she has watched with anxiety as well as admiration the diplomatic successes of M. Venizelos. Now that that great man has fallen, the Italians, by no means displeased, describe him truly enough, as "too big a man for a small country." We may adapt the phrase. Constantine is too small a man for a big country. If he goes back it must be to a country appropriately small.

# MUSICAL NOTES.

### Women and Music.

Of all the arts music is theoretically that in which the matter of sex plays the last part, and there is no logical reason for the inferiority of women in music. But the practice disproves the theory. The whole question of this inferiority was raised in an interesting and most challenging way by Dr. Ethel Smyth at the concert which the Ladies' String Quartet, a combination new to London, gave at the Wigmore Hall on November 20. In introducing this quartet Dr. Smyth made some remarks on "Sex and Music" which are worthy of note. She pleaded (a hopelessly inadequate word for her!) that women should enjoy an equality of opportunity with men, particularly in orchestras, and her scorn was ireful when she spoke of Mr. Hamilton Harty's recent decision to banish the war-time ladies from the Hallé orchestra. For it was in an orchestra (said she) that the best chance of the future composer lay, and the scarcity of women-composers was largely due to their lack of orchestral training. Any orchestra must, she asseverated, be improved by the presence of women, for they, whose emotion lay nearer the surface than men's, could more easily express their soul, and, in addition, they would, by mere virtue of their sex, speed the jaded male player on to better deeds.

Well, there can be no argument against these statements, except to say that things are not so. I believe these opinions to be, in fact, utter bosh.

However, in Dr. Ethel Smyth's Quartet in E minor and J. R. Heath's "Serbian" Quartet, the Ladies' String Quartet did show a certain amount of talent. To compare them with any more well-known quartet, either wholly male or mixed, would be folly; for they have no one virtue that cannot be improved. They certainly play with care, even with keenness; but their discipline is slack, their intonation vagrant, and their tone does not blend. Yet in Dr. Smyth's Quartet they did bring out points which were missed in the Philharmonic String Quartet's performance of it a few weeks ago; and in the first and last movements of the "Serbian" Quartet they succeeded in suggesting the atmospherical origin of the composition. J. R. Heath is a particularly interesting composer to Near Eastern readers: he has saturated himself in the idioms of Macedonia and of the neighbouring regions, and he writes exceedingly well. In this quartet both the heavy sorrow and the wild mirth of the Serbs are very faithfully suggested.

### Violinists.

It may be because Mlle. Jelly d'Aranyi, who gave a recital at the Wigmore Hall on November 22, can so easily express her soul that she at present falls just short of the highest rank. For there are a few occasions when her emotion and excitement detract from the form of her playing. But apart from that she is a glorious fiddler. With Mr. John Petrie Dunn as pianist, she played the "Kreutzer" Sonata beautifully, the variations being particularly excellent. (Though as a performance of chamber music it was spoiled by the lifeless interpretation of the pianist, whose methods did not at any time blend with Mlle. d'Aranyi's.) There is little that she does not know about Beethoven and Bach, whose Concerto in A minor she played perfectly; but for these big composers she must find a pianist sympathetic with her. She has her own very vivid way of interpreting them, and does not as yet appear to have persuaded any pianist that hers is the right way. That is why her best things (except, of course, when she is unaccompanied) are the small things, when she is supported by an accompanist, and not partnered by a pianist; in these, such as F. S. Kelly's "Jig" or Kreisler's "Liebesfreud," she is, I think, unbeatable. Without any doubt at all she is one of the finest fiddlers in this country. Her colleague, Mr. Dunn, played, in addition to some Chopin, the tremendous Paganini-Brahms Variations, but he made little of them. For in truth they are only for the masters.

Another fine violinist, M. Paul Kochanski, gave a recital earlier on the same day at the same hall. I was disappointed in missing his performance of the Sonata in E major of Arnold Bax, for he is said to have a genius for modern music. But the slight things I did hear—Saint-Saëns' "Havanaise," a Chopin nocturne, Glazounow's "Mélodie Arabe," and Paganini's "Campanella"—were sufficient to show that he is uncommonly good. His technique is brilliant, though not infallible; his phrasing is very neat, and his individuality marked—so marked, indeed, that Mr. O'Connor-Morris, a very capable accompanist, could not at all times cope with it.

### A Chamber Concert.

The third of the series of concerts which the London Chamber Concert Society has organised at the Wigmore Hall was given on November 16, and was all through delightful. It was devoted to music of the 17th and 18th centuries, and the charm of these old things was irresistible. Many of them speak for themselves, which is much the same thing as saying that they need first and last perfect execution. This they had. M. Salmon, in Sonatas by Cervetto and Dupuits, and in pieces by Porpora, Corelli, Couperin, and Senaille, all of which he himself had harmonised for the pianoforte, obtained from his 'cello more delicate shades and phrasing than are often heard from this instrument; and, moreover, his fine art was beautifully sustained by Mr. Harold Craxton at the piano. Mlle. Jelly d'Aranyi, in Bach's unaccompanied Adagio and Fugue in C, played most fervently and satisfyingly. And Mrs. Norman O'Neill played Scarlatti, Leonardo Leo, and Daquin with such strictness, neatness, and perfect clarity that a harpsichord would surely have suited her methods better. This was in every way an admirable concert.

### Suggia and Siloti.

One wondered very much how Mme. Guilhermina Suggia would sound with M. Siloti in Chopin's Sonata for 'cello and pianoforte, for they have, superficially, at any rate, nothing in common in their methods. But it can be said at once, and without attempting an explanation, that it was a wonderful performance. Neither instrument at any time overbalanced the other, and nothing was missed. In the Scherzo, Mme. Suggia obtained a most divine delicacy, and the Largo was made appealingly beautiful. The truth that is in M. Siloti, but that is sometimes overshadowed, shone dazzlingly throughout the sonata; and the common performance was unforgettable. Very rarely do two such supreme artists arrive by different routes at the same goal. After all, it is the goal that matters, and though one is in these days inclined to lay stress on the rightness or wrongness of any particular approach to beauty, when truth and beauty are by whatsoever means found together the discovery should be announced with profound gratitude.

### Hofmann.

There is nothing that M. Josef Hofmann, whose last recital at the Queen's Hall was given on November 23, loves more than technical clarity. For sheer lucidity it is not conceivable that his playing of the Handel-Brahms Variations and Fugue could be improved; it simply sparkled with brilliance. There was something breathless in the coloured ease with which he overcame the tremendous difficulties; but it was from the technical point of view that his reading was greatest. And then came a bewildering thing. Why this amazing artist should so have bent the rhythm of Chopin's Ballade in G minor I do not understand. I admire M. Hofmann profoundly, but there are some things, as I said at his first recital, very baffling in his individuality. One is certain that there is no insincerity, no pose in him; but it was only the most gorgeous playing of a Chopin mazurka that could temporarily efface the memory of the Ballade. In more Chopin and Scriabin he proved beyond any doubt what we already knew, that he is one of the world's artists. There is no pianist more certain of a welcome in London.

### An Anglo-Russian Concert.

The popularity and understanding of Russian music in England are pretty well assured now, and in this movement Miss Lilias Mackinnon and M. Lazare Saminsky, two of the chief organisers of an Anglo-Russian concert which was given at the Steinway Hall on November 23, have had no little share. My admiration for Miss Mackinnon's Scriabin is intense, though on this particular evening she was not playing so well as usual. Perhaps the main interest of the concert was in the first appearance in England of Mrs. Xenia Baddeley, a mezzo-soprano. Unfortunately I was not in time to hear her in some English songs, but in some Russian songs by Rimsky-Korsakoff, Stravinsky, and Moussorgsky she showed that she has a keen musical sense, an uncommonly accurate ear, and a good deal of simple charm. There are some deficiencies in her singing at present, e.g., in breath control, but there is nothing artificial, nothing insincere in her methods; in the very fine "Song of the Woman Inn-keeper" from Moussorgsky's "The Fair of Sorotchin," for instance, where there was plenty of scope and much temptation for dramatic display, she maintained a convincing yet spirited reticence. I think Stravinsky's two Children's Songs were rubbish—this kind of thing is fashionable now—but Mrs. Baddeley sang them quite charmingly. It is to be hoped that she will soon introduce to us some more Russian music, particularly as M. Saminsky, on whom and on whose choir we were relying for making known to us Russian music as yet unperformed in England, is very shortly going to America.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***America and Mesopotamia Oil.***

Mr. Colby's Note to Great Britain on the subject of the Franco-British oil agreement would appear to indicate an entire change in America's attitude to affairs outside her own continent. America since the Armistice has steadfastly refrained from affording the Allies any assistance in coping with the manifold problems with which they have been faced in the Near and Middle East, and her attitude in regard to the oil question in the circumstances must lie open to the suspicion that she desires to share in the fruits of victory without bearing the "burden and heat of the day." The American move is without doubt due to the pressure of the powerful oil interests in that country, and it is the more incomprehensible seeing that America has within her own borders something like 70 per cent. of the world's oil supplies.

***Bulgaria's Grain Surplus.***

In the early part of the year the weather in the Balkans was uniformly favourable for the crops, and great hopes were entertained that the harvest would go far towards setting several of the distressed countries on their feet again. Unfortunately, the early promise of spring was to some extent blighted by very severe storms which swept over South-Eastern Europe in the early part of the summer, causing great damage to the crops. As will be seen, however, from an official statement given elsewhere in these columns, in at least one country hopes of a bumper harvest seem likely to be fulfilled. It is estimated that the yield of the five principal crops of Bulgaria will give a surplus available for export of no less than 936,250 tons. As the annual export for the ten years before the war only amounted on the average to 538,943 tons, it will be seen that if the estimate is borne out Bulgaria will be in a particularly favourable position, and it would obviously mean that in a very short time there could be a considerable improvement in the Bulgarian exchange.

***Yugoslav Timber Stocks.***

A report from Zagreb on the Yugoslav timber market, which has been forwarded to me by a valued correspondent, will, I think, be of considerable interest to British importers of wood for constructional purposes. "Since the large houses in Vienna and Budapest who exploit the forests in Croatia have been obliged to transfer themselves into the new kingdom of the Serbs, Croats, and Slovenes," it states, "the timber market has assumed great importance. At the moment, as timber shipments are made by rail to Fiume and from there by sea, business has been greatly restricted by reason of the political situation in Fiume, and in consequence a quantity of constructional timber ready for shipment, estimated at about 300,000 cubic metres, has accumulated at the sawmills, which are mostly situated along the principal railway between Zagreb and Fiume. We hope that the newly-concluded arrangements with Italy will shortly enable export to be resumed, and shall be pleased to place any of your friends in direct touch with the principal merchants here." If any of my readers who desire further information will write to me I shall be glad to place them in touch with my correspondent.

***The P. and O. Report.***

During the war period the P. and O. report naturally gave the minimum information regarding the company's operations, but the need for secrecy no longer obtains, and it is surprising in the circumstances that this policy should still be persisted in, and that this year's report should give even more scanty details than that for the previous twelve months. Last year the net result was shown as £614,600, after providing for depreciation, etc., and after making allocations to the reserve fund, the contingent fund, and the provident good service fund, amounting in all to £1,000,000. This time it is simply stated that "after allowing for depreciation and making an allocation to the insurance fund, which, with the net premia received during the year, after meeting all claims, will then stand at £2,500,000, there is a credit balance on the year's accounts, including £115,230 2s. 5d. brought forward from last year, of £772,606 17s. 2d.

***Distribution of Profits.***

The inference to be drawn from a comparison of these two statements is that there has been a very substantial decline in earnings during the past year. But this conjecture is not supported by the proposed distribution of profits. As previously recorded in these columns, it is proposed to increase the dividend and bonus on the Deferred shares from 12 per cent. free of income-tax to 15 per cent. free of income-tax, and in addition to make a similar bonus share distribution to that of last year. Shareholders will, therefore, receive a slightly enhanced return, which would certainly suggest that results for the past twelve months have again shown an improvement. It remains to note the statement in the report that the numerous companies now associated with the P. and O. have so far contributed very moderate dividends to the company, the policy having been to husband their resources, and this is presumably the reason why the comparison between the two reports would seem to show a decrease in profits. This conservative policy, it is pointed out, has resulted in an increment in the value of the P. and O. holdings in the associated companies, and it is out of the increased value of these holdings that the proposed share bonus is to be made.

***Germany and Egypt.***

From Egypt comes the report of the commencement of German trade propaganda on an important scale. As I have had occasion to point out on several occasions, it was only to be anticipated that at the first opportunity Germany would endeavour to re-assert herself in a market in which before the war she was gaining a very prominent position, and it is evident that she is now attempting to do so with characteristic thoroughness. Unfortunately, British firms have failed to take adequate advantage of the chance with which they have been presented since 1914 to establish themselves firmly in the market, and the position is thus much more favourable for the enterprising and wily Teuton than it would otherwise have been. There is still time for British merchants and manufacturers to capture a large share of the Egyptian market, but they will have to bestir themselves and adopt different and less dilatory methods if success is to attend their efforts.

***Cotton Growing in the Sudan.***

The high prices that have been obtained during the past year for Egyptian cotton have naturally greatly favoured the operations of the Sudan Plantations Syndicate, and the excellent report which is now forthcoming is not in the circumstances unexpected. The net profits amounted to £228,759, as against £59,046, and with the balance brought in the available surplus is £287,312, as against £94,202. It is proposed to utilise this to pay a dividend of 25 per cent. and a bonus of 10 per cent., which on the increased capital will absorb £105,000, and to carry forward £182,311. For the previous twelve months the dividend was 25 per cent., which absorbed £33,750. In the last few months the price of Egyptian cotton has fallen heavily, and in the near future it is improbable that anything like the recent high level of values will again be reached, but the acreage which the company has under cotton is increasing, and compensation should be forthcoming in increased production.

***The Abyssinian Corporation.***

A very disappointing report is forthcoming from the Abyssinian Corporation for its first nineteen months. There was a total loss for that period of £149,916, the loss on trading amounting to £41,796, to which has to be added administration expenses, bringing the amount to £66,068.

Digitized by Google

The adverse exchanges resulted in a loss of £21,849, while stocks had to be written down to the extent of £62,000. The unprecedented fluctuations in the exchange and the abnormal conditions existing in the world's markets, especially in regard to hides, coffee, and cotton goods, are stated to have been the principal factors that have operated adversely. Conditions have unfortunately not improved in these respects, and it is evident that the circumstances being what they are the directors will have no easy task in grappling with the situation.

***An Assured Footing.***

In times like these through which we are passing it would be surprising if undertakings of what may be termed the enterprising order did not suffer vicissitudes, and while ill-fortune has attended the initial operations of the Corporation, it is only natural to anticipate that in due course satisfactory results will be forthcoming, for it is unthinkable that the world's market conditions will continue indefinitely in their present unfavourable condition; and the improvement when it comes is likely to be rapid. The Corporation has this in its favour, that it is now very firmly established in Abyssinia. It has acquired the premises of Messrs. Jewaji and Co., of Adis Abeba, and has taken over their stocks, while their lands at Harrar and Dire-Daoua have been purchased, constituting an important addition to the businesses previously taken over. The Corporation is unquestionably in a position to take full advantage of favourable developments in the commercial position.

COMMENTATOR.

## LANCASHIRE COTTON.

### Depression Accentuated.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

There has not been an encouraging feature about the market during the past week, and doleful reports have been circulated in all sections. The tone has been very unsettled, and the downward movement in raw cotton rates has continued. Spinners and manufacturers have lost further ground, and buyers have held aloof in a more determined manner than ever. Prices of Egyptian cotton have continued to give way. It is understood that the position in Egypt as a result of the fall in prices is causing some anxiety, but it is hard to see what action can be taken by the special commission which has been appointed to inquire into the situation. Lancashire spinners continue to purchase very sparingly, and the takings of users in the United States are distinctly less than last year. In American cotton circles bearish sentiment continues pronounced. The continued easier tendency is certainly remarkable, and is largely due to financial stringency. Egyptian yarns have again moved off very slowly. Spinners have been prepared to accept wretched prices, but users have not been tempted to buy. Operations in piece goods for all the Near Eastern outlets have been very restricted. Business for Egypt cannot be expected until stocks on the other side are reduced. The political situation makes against trade developments, especially in Turkey and Greece. Fewer offers have been about in cloth for India. All merchants are feeling very severely the depreciation in values. Owing to the trade depression the Masters' Federation has recommended spinners engaged on American cotton to curtail production by 50 per cent., and the result of the ballot will be made known at the end of this week. All kinds of yarn continue very dull. About a week ago there was rather more activity in bundles for India, but the demand has fallen off.

## GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 14 to October 13 (new style), 1920.

| | Monopolies, tobacco, stamps, stamped paper, Naxos emery. | Piræus Customs. |
|---|---|---|
| | Drachmæ. | Drachmæ. |
| Gross receipts, Sept. 1920 ..... | 6,063,644 | 4,716,000 |
| Do. do. 1919 ..... | 4,369,746 | 4,178,889 |
| Estimated receipts for 9 months (Law of Control) | 21,675,000 | 8,025,000 |
| Actual do. do. 1920 | 48,802,856 | 43,153,049 |
| Do. do. do. 1919 | 35,408,794 | 35,009,394 |
| Difference between estimated and actual receipts for 9 months ..... 1920 | +27,127,856 | +35,128,049 |
| Difference between estimated and actual receipts for 9 months ..... 1919 | +13,733,794 | +26,984,394 |

Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1/5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## EGYPT.

CAIRO, November 11.

### Expenditure Increasing.

The State accounts up to the end of May have just been published. During the two months revenue has amounted to £E5,708,341, as compared with £E3,369,939, and expenditure to £E6,090,919, as against £E4,332,983 at the end of May, 1919. The main increases in revenue are land tax £E97,668, Customs dues £E857,529, tobacco dues £E183,354, mixed courts fees £E173,664, railways £E620,395, Ghaffir cess receipts £E123,478; while the main items under expenditure are irrigation department £E175,883, railways £E1,378,668, indemnities for cost of living £E516,521, public debt £E1,869,003.

The increase in receipts from Customs, railways, etc., was expected owing to the expansion in turnover in the former and the raising of the rates in the latter; that from mixed courts fees is due to the large number of land transactions which has taken place; but while the latter may now diminish owing to the decline in the cotton market, the returns from the other revenue-earning departments, especially the Customs, are likely to continue their upward tendency for some time.

Revenue during the first two months of the financial year has increased by £E2,338,402 and expenditure by £E1,757,936, and as a result the excess of the latter over the former, which is always recorded during the early part of the financial year, has been reduced from £E963,044 to £E382,578.

## GREECE.

ATHENS, November 13.

### Athens-Salonika Line Repaired.

The damage caused on many parts of the Athens-Salonika railway line by the recent heavy rains has now been repaired, and the trains have resumed their regular service between the two cities. For the past fortnight travellers from European countries proceeding to Athens by the "Acropole Express" were obliged to spend a night in Salonika and to continue their journey on the following day by sea, not a very pleasant experience in view of the small boats employed on the Salonika-Piræus route and the exceptionally heavy seas prevailing at the time.

## YUGOSLAVIA.

BELGRADE, November 17.

### The Privileged Natiopal Bank.

On Thursday the annual general meeting of the Narodna Banka was held to receive the report on the proceedings from 1914 to 1919, during which the bank passed through a series of vicissitudes rare in the history of any such institution. The period covers the expansion following the two successful Balkan wars, the removal of the bank to Krushevats and Nish, the evacuation to Salonika and Marseilles, the triumphal return on February 16, 1919, and its expansion into the Privileged National Bank of the Kingdom of the Serbs, Croats, and Slovenes on February 1 of this year.

The chief function of the bank during this period has been the financial assistance of the Government, in which connection it has issued an enormous amount of paper money, and has minted 30,000,000 dinars in silver. The board claims that the paper issues for State purposes have been entirely covered by the gold deposit or by assets held abroad up to 1918, but after that date, when the Government withdrew money and promised to cover it, the cover did not always arrive, so that at the time of the conversion into the issuing bank for the united kingdom, while almost 400 million dinars were covered, 247,488,136 were uncovered. At the end of 1919 the bank had 664,007,460 dinars in paper money in circulation, with a cover in metal amounting to 82,483,006 dinars, and assets held abroad amounting to 351,995,612 francs, presumably French. During the war the bank issued less paper money in proportion than most other belligerent banks.

The net profit of the bank for the period under review is returned at 1,349,381 dinars, of which 364,332 falls to the State, the percentage allotment is 134,938, 639,066 is allocated to the dividend reserve fund, and 850,110 is for the shareholders.

The proceedings of the bank during the period in question were criticised by M. Nikola Stanarevitch, but the report was adopted with a resolution authorising the board to conclude an arrangement with the Minister of Finance granting the Government a loan, without security or interest, of 1,500,000,000 dinars, apart from earlier credits duly authorised, to be refunded in ten years, but including in it the 425 millions which the State owes to the bank on account of the "debt on the dinar-krone notes" and the uncovered balance.

### Proposed Railways.

As a result of the Italian agreement, there are again rumours of big railway projects to provide better communications between Yugoslavia and Italy. The proposals include the extension of trans-Balkan lines from beyond the Danube through Montenegro by the valley of the Drin to the Adriatic, and also a line from Bitolj (Monastir) to Valona, which would re-establish the old line of communication from Salonika to the Adriatic.

### Miscellaneous.

The Ministry of Food and Reconstruction has published its balance-sheet for the past five months, during which time it has distributed various commodities to the value of 23,486,650 dinars.

The Government has opened the frontier towards Hungary to enable the mutual exchange of goods and food.

The settlement with Italy has had a tonic effect upon the Bourse. Cheques on Paris fell from 239.80 dinars per 100 francs to 218, and cheques on London from 133 dinars per £ to 128.

The sugar-beet harvest is reported to be a good one, and stocks have already been delivered to the factories, so that the crisis of last year will be avoided.

# THE ADMINISTRATION OF MESOPOTAMIA.

## PROGRESS UNDER DIFFICULTIES.

For its adequate appreciation it is necessary to peruse the recently-issued report of the Revenue Department of the Occupied Territory of Mesopotamia with a mind oblivious to happenings subsequent to the period to which it refers. As it stands, it is a record of admirable administrative achievement which will justly bear comparison with any similar case in which the British have been faced with the task of evolving ordered rule out of chaos. In many respects, indeed, it would be difficult to find a parallel for the complexity of the problems with which our representatives were confronted, and a perusal of the pages of the report can only leave the reader with a feeling of sheer wonder at the efficient and thoroughly successful manner in which they were tackled. To place the system of revenue collection on something approaching a firm basis in a country like Mesopotamia, largely inhabited by nomad tribes, and with a population unaccustomed to anything but the most nominal suzerainty, is certainly no light achievement. It is a far cry from the Baghdad-Busrah region to Constantinople, and the writ of the Sultan ran very haltingly in Irak, and the results of taxation depended on the energy of the local collectors, and even more so on the willingness of the taxpayer. The British authorities found that they had to build from the beginning, and the report constitutes a moving tribute to the zeal and energy with which the task was approached. For sheer capacity to govern the Mesopotamian episode will take high rank in the long list of occasions on which we have found ourselves forced to take up the "white man's burden."

That is one aspect of the report, but there is another side to the picture, and one which cannot be left untouched. For those who know the country the events of the last few months carry their own moral. The Arab as a class is no lover of law and order. Town-planning, land reclamation, the construction of roads and bridges, things of this kind have no attraction for him. In the popular phrase of the hour, they leave him "very cold." His preference is for a life of ease unhampered by restrictions and without interference by officials. He tolerated the Turkish rule because it was remote and to all intents and purposes non-existent. Had it been otherwise, it may be taken for granted that he would have made his voice heard in no uncertain terms. Unquestionably, he would never look with favour on those who tried to introduce into the country too suddenly the habiliments of civilisation—which, may it be timorously suggested, pall sometimes even in the West. Now, the British rule has been neither remote nor unapparent, and for the first time the Arab has been brought face to face with the machinery of ordered government. The conditions of his life have been regulated, he has seen very definite steps taken to further the development of the country, and he has had evidence that all progress has to be paid for in the systematisation of taxation. How he has accepted the position may be gauged by the statement in the report that in one district there was some attempt at organised resistance to the collection of land revenue, "which, however, collapsed before the adroit tactics of the Political Officer," and that in other parts "demands were very readily paid as soon as the revenue payer realised that payment really was inevitable."

The statistics given in the report give point to the question whether the steps taken to reorganise the revenue were altogether politic. A very striking comparison is given between the Turkish taxation of 1909 and that of last year. In 1909 the receipts amounted to £T240,830 and in 1919 to £T832,400, or more than three times as much. It is pointed out that "the relation between the two sets of figures can be amply justified by (1) extension and improvement of irrigation, (2) consequent expansion of agriculture, (3) greater security, (4) rise in prices of agricultural produce, (5) more equable collection"; but of these points 3 and 5 carry practically no weight, while the others would be less important to the Arabs than they would be to us, and certainly would not counterbalance the thought that they were undoubtedly paying higher taxes. Elsewhere in the report the position in Mesopotamia and the Punjab is compared, and the figures given only seem to emphasise the point that taxation has been kept at too high a level in Mesopotamia. Briefly, the incidence of land revenue demand in Mesopotamia is estimated at Rs.5 10a per head, as against Rs. 2 3a for the Punjab. It is pointed out that the real difference may not be so great as would appear from these figures, since the estimate of population may well be erroneous, also that the Irak land revenue demand includes Rs. 18 lakhs of date revenue and Rs. 10 lakhs on account of fruit and vegetable tax, and that there are a number of other differences. But, making allowance for these factors, it would certainly appear that the ratio of taxation is high in view of the state of development of the country, and is it not possible—indeed, probable—that in the incidence of taxation, enforced in many cases for the first time under the British Occupation, we have one of the chief factors in causing unrest in the country? Quotation is made in the report of Lord Curzon's statement in a speech on the occasion of the unveiling of a memorial tablet to Lord Cromer that the latter had often told him that "secrets of success in Eastern Administrations were light taxation of peasantry and confidence in Government." In no country that has come under our supervision has it been necessary to exercise greater care with regard to the financial position, and while in no way wishing to underestimate the work of the British officials, the report certainly does lend colour to the view that insufficient attention has been paid to this factor.

## PROPOSED ASWAN POWER-HOUSE.

The *Architect's Journal* of November 24 contains a full-page perspective of a "Proposed Hydro-Electric Power-House, Aswan, Egypt," by D. A. Beveridge, Licentiate R.I.B.A. A plan and section of the proposed building are also given, together with some notes. The power-house proposed is designed to supply constant power throughout the year, thus turning to further advantage the great Aswan dam and the 8½ million cubic feet of water which it is capable of storing up. Before the erection of the dam there was, of course, a great outcry about the vandalism of its projectors; and it cannot be denied that Philæ has suffered by the execution of the scheme; but, on the other hand, the gain to Egypt as a whole is very great, and in this utilitarian age is held to outweigh far the artistic loss involved. In any case, as far as we can judge from the drawings, Mr. Beveridge's design is well adapted to its surroundings, being inspired by ancient Egyptian models; and though the power-house is unlikely to excite the enthusiasm that cultured tourists profess to feel when gazing at Pharaoh's Bed, it should at least avoid the fate of being described as a "modern eyesore" by even the most "greenery-yallery" of gushing trippers.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable, received from the Director-General of Commercial Intelligence, Calcutta, dated November 22.—During the week ended November 13, light to moderate rain has fallen in South Madras. Prospects of crops generally fair, but rain urgently needed in the Punjab, North-West Frontier and Central Provinces, Rajputana, parts of Central India, Bombay, Hyderabad, Mysore, the unirrigated area of the United Provinces of Agra and Oudh and in Bihar. During the week ended November 20, monsoon vigorous and general in South of Peninsula. Bombay cotton ready market quiet. Fine M. G. Oomra number three spot rate Rs. 280. Bombay piecegoods market depressed with little retail inquiry. Calcutta Jute market depressed with practically no business and declining prices owing to the absence of foreign inquiries. First actuals Rs. 78 to Rs. 80 per bale (400 lb.). Hessians improved tone with advancing prices owing to mills unanimously agreeing to work five days a week for six months from January 1 next. Bank rate is 7 per cent. in Calcutta and Bombay as against 6 per cent. during week ended November 15. The rate in Madras is 7 per cent. as during the previous week.

# AUSTIN

## *The Best Car Investment*

The man who buys an Austin Twenty ensures a permanent value. Why? Because the design of the Austin is destined to be the standard for years to come. This claim is based on the opinions of well-known experts.

The Austin rate of output is increasing by leaps and bounds. The prompt man gets priority. Full particulars will be gladly supplied by your local distributors:

Messrs. Ed. Kurk & Co., London Garage, 1, Rue Sultan Fouad, Alexandria. (Agency for cars and lorries in Egypt and the Soudan.)

Messrs. Strick, Scott & Co., Baghdad (Agency for our cars and are handling all our lines, in Mesopotamia and Persia).

Messrs. Hassan Hoss & Co., Beyrouth. (Agency for Austin Cars and Commercial Vehicles in Syria.)

# ENGINEERING.

## THE MOTOR SHOW.

### III.—Some Outstanding Productions.

(From Our Own Correspondent.)

Messrs. Humber, Ltd., were showing four of their special types, as well as a shipped chassis. The models were a 2—3 seater, and a coupé of the well-known 10 h.p. size, and a 5-seater and saloon of the more powerful 15.9 h.p. size. The 10 h.p. coupé finished in dark blue, with a black leather collapsible hood, was a very striking production, and the chassis should prove extremely popular overseas. In my view this coupé would be an ideal car for the business or the professional man.

Of course, Humbers were practically the pioneers of the road, and one would naturally expect to find their more powerful model replete with all the adjuncts and comforts necessary to a proper enjoyment of the road. In this one would not be disappointed; every adjustment is readily accessible, and the car has a well-finished appearance, with an entire absence of those showy but useless fitments which waste so much time when cleaning is being done. The mudguarding is adequate and substantial, and the majority of the nickelled parts have broad faces, which lend themselves to easy polishing. The divided wind screen, with the two separate panels set at different angles, affords a clear view of the road without any possibility of inconvenience through undue draught.

A car which should sell well is the Alvis, made by Messrs. T. G. John, Ltd., of Coventry. The 10 h.p. chassis has a particularly robust frame, and the sub-frame, which carries the radiator, engine, and gear-box, is particularly strong. Wherever possible weight has been cut down without sacrificing strength, and a four-speed gear-box is fitted. The engine is of the monobloc type with side-by-side valves, and aluminium pistons are fitted. The clutch is of the internal leather-faced variety, with a multiple steel plate universal joint between it and the gear-box. The wheel-base is exceptionally long for so light a car, being 9 ft. 2 ins., and the wheel-track is 4 ft. 2 ins. Both sets of brakes are of the internally-expanding type acting on the driving wheels.

One of the pioneer firms in the industry, dating from 1896, is Belsize Motors, Ltd., and they were exhibiting at the Olympia show a 15 h.p. chassis of particularly strong and robust construction. It has a four-cylinder engine which is capable of an output of just over 20 h.p., with forced lubrication and water cooling, assisted by the usual fan. The electrical units for lighting and starting are by the well-known Rotax Co., and every part of the chassis is of exceptionally good design. A ferodo-lined cone clutch is used and a four-speed gear-box is fitted. All four suspension springs are of the semi-elliptic type, and the principal dimensions are: wheel base 9 ft. 8 ins., track 4 ft. 6 ins., and body space 8 ft. 8 ins. The ground clearance is 10 ins., and the chassis weighs approximately 19 cwt.

The Calcott car, by Messrs. Calcott Bros., Ltd., of Coventry, has a four-cylinder monobloc engine with a Treasury rating of 11.9 h.p., and here again is a model which should command a ready sale in overseas markets. The valves are side by side and are interchangeable, and cooling is by thermo-syphon assisted by fan. The camshaft runs in ball bearings, and a flexible coupling is interposed in the magneto drive. The crankshaft runs in three white metal bearings, and the clutch to the three-speed gear-box is fabric lined. Two universal joints are employed in the propeller shaft, and the bevel-driven rear axle is of the fully-floating type, the casing carrying the wheels on which, in drums, both sets of brakes act. The car can be obtained either as a two or a four-seater.

The Charron-Laycock, shown by the London Motor Garage Co., Ltd., of Wardour Street, London, represents a combination of British and French practice, being constructed by Messrs. Laycock, of Sheffield, from Charron designs. The engine is of the four-cylinder type, with forced lubrication, and the cylinder heads are detachable in one piece. The clutch is ferodo-lined, and conveys the drive through a fabric joint to the three-speed gear box. Steering is by worm and sector, and a feature of the chassis is its strong construction and the massiveness of the differential.

Last year, at about this time, I had a good deal to say regarding the Cubitt car, made by the Cubitt Engineering Co., Ltd., of Conduit Street, and the new model is an advance, if such a thing be possible, on the last year's production. The 1921 model is a sound engineering proposition, and cars of this make should serve to popularise still further British productions in overseas markets. The frame is narrow and level-topped with only one intermediate. The engine is of the four-cylinder type, monobloc, and there is over-shot worm drive transmission to the fully-floating back axle. Forced lubrication is provided, and Rotax dynamo for lighting and starting is fitted. The cone clutch is mounted on a naked splined shaft with one easy-detachable joint, and the suspension is by semi-elliptic springs. The car can be obtained either in the two-seater sporting or the four-seater standard pattern.

A light car which particularly commended itself to me as being suitable for export purposes was the "D.F.P." shown by Messrs. Bentley and Bentley, Ltd., of 12 h.p. It has a four-cylinder monobloc engine in a thermo-syphon cooling system, and like the majority of cars this year is provided with a lighting and starting set. The four-speed gear-box is connected to a plain leather to metal clutch, and the propeller shaft is hollow. The service brake pedal operates the brakes on the rear wheels, and the lever brake works on the transmission drum brake for emergency use. The steering is by worm and wheel, and can be adjusted by means of an eccentric bushing.

An interesting car is that made by the well-known firm of Douglas Motors, Ltd., of Bristol. It has an extremely simple lay-out, and has a transversely mounted engine of the twin-cylinder horizontally opposed type, giving 10.5 h.p. The crank-shaft is carefully balanced, and the engine is practically vibrationless. Three speeds and reverse are provided by the strongly built gear-box, and the final drive is by plain bevels over a spur-type differential with a semi-floating axle. Both brakes operate on the rear wheels, and the steering, which is by worm and wheel, is adjustable by means of an eccentric bush. The chassis weighs, approximately, 8½ cwt., and ample ground clearance is provided.

The Enfield-Allday Motors, Ltd., of Small Heath, Birmingham, have apparently given up both the girder type five-cylinder radial-engined chassis, on which I commented last year, and the concentric-posted collar valves, which were a feature of that engine. The new 10 h.p. chassis has a four-cylinder engine of the monobloc type, water cooled, and the three-bearing crankshaft is drilled for forced lubrication. Transmission is by a dry cone clutch to a three-speed gear-box, through a fabric-jointed intermediate shaft. The front springs are of the semi-elliptic, and the rear of the cantilever types. The wheels are detachable, of the disc type, steel pressed, and the wheel base is 9 ft., with a track width of 4 ft. The ground clearance is 9 inches, and every part of the chassis is of robust design and constructed of the highest grade of material.

I believe the lightest four-wheeler shown was that of the Grahame-White Co., which has a single-cylinder air-cooled engine rated at 3½ h.p. The transmission is through a single plate clutch, with cork insertions, and steering is by pulley and cable. The total weight is under 5 cwt. Another model made by the same firm has a 5-7 h.p. engine, of the two-cylinder horizontally opposed type, made by the Coventry Victor Co. This is transversely mounted in the dropped front part of the frame, and the variable speed drive is of the friction disc type.

The "H.E.," made by the Herbert Engineering Co., Ltd., of Caversham, Reading, has no strikingly novel features, but embodies all the essential good points of modern practice. The engine, which is rated at 14-20 h.p., is of the four-cylinder type with detachable head, and the water cooling system consists of a fan, spindle driven and jacket enclosed impeller pump. The clutch is of the ten plate variety, running dry, and two Hardy joints connect it to the transmission. A four-speed gear box is fitted, and there is an over-shot worm and wheel final drive to a fully floating axle. The rear springing is by underslung semi elliptics, and both sets of brakes lie side by side within the rear wheel hubs. The wheel-base and hack are 9 ft. 6 in. and 4 ft. 2 in. respectively, and the chassis is of a type which should render the car eminently suited for the rough roads likely to be found in the Near East and in the Colonies.

One of the most interesting of the many newcomers to the show was the Orpington, a British-made car, shown by the G.N.U. Motor and Accessories Co., of Westbourne Grove, London. The car has a Coventry-Simplex engine rated at 10-12 h.p., cooled on the thermo-syphon system. The cone clutch is ferodo lined, working on to a three-speed gear box, and the enclosed propeller shaft transmits to a bevel-driven rear axle. The wheels are Sankey pressed steel detachables, and whilst an electric lighting set is fitted, an electric starter is not considered necessary. The rear springs, which are quarter-elliptic, are splayed so as to give a wire support to the chassis over the back axle.

The S.P.A. shown by Vandy's Ltd., of 40, Albemarle Street, London, though not a British car, is an exceptionally fine production, and one that reflects great credit on Italian engineers. The "Vandy" car, exhibited by the same firm, is a car assembled in this country from parts, many of which are made here and others imported from Allied countries. It has a six-cylinder engine of 23 h.p., and is fitted with C.A.V. electric lighting and starting sets. The cylinder head is detachable, the clutch is of the plate type, and a four-speed gear box is provided. The final drive is of the spiral-bevel type, and suspension is by half-elliptic springs. The pressed steel wheels are of the detachable type, and Messrs. Vandy's have certainly turned out a very fine productio

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Coffee.—Prices have varied considerably. The futures market has been easier. Quotations are: December, 58s.; March, 52s. 6d.; May, 54s.; July, 55s.; and September, 55s.

Oilcakes.—Linseed cake has remained the same at 22s., but cottonseed cake has risen 1s. 6d. at 13s. Other transactions comprise Arachis cake at 13s. to 14s., and coconut cake at 14s. to 16s.

Sugar.—The free market has been quiet and steady. West Indian crystallized is unaltered at 83s., and American granulated is the same at 95s. White Mauritius remains unchanged at 94s. Home refined has met with a good demand at the official prices.

Oilseeds.—Prices have remained steady. Indian linseed has been done at 27s., and rapeseed is lower, with Toria at 31s. and bold Ferozepore at 30s., both 3s. down. Cottonseed has declined, Indian being 9s. and Egyptian 15s.

Seed Oils.—There has been a steady rise in prices. Linseed has come to business at 46s. to 47s. Refined rape oil is firm at 86s., and the crude variety is unchanged at 72s. Turpentine has declined 9s. to 105s.

Dried Fruit.—The market position is much the same. Currants have been taken up readily, though rates are unchanged. Fair business has been done in sultanas, while figs have continued in strong request.

## CURRENT PRICES.

General Produce.—Bacon, 217s. 9d. cwt.; butter, 336s. cwt.; cheese, 170s. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 5½d. lb.; cocoa (Ceylon, good to fine), 135s. cwt.; coffee (Costa Rica), 110s. cwt.; East India bold, 117s. 6d. cwt.; Mocha, 147s. 6d.; eggs, 36s. 8d. per 120; ginger (washed Cochin), 57s. 6d. cwt.; hams, 220s. cwt.; lard, 167s. 9d. cwt.; nutmegs, 1s. 0¾d. 110's to 180's; pepper (Singapore, black), 5½d. lb., and Muntok white, 1s. 1½d. lb.; raisins (Valencia), 139s. 6d. cwt.; sugar (granulated), 96s. cwt.; No. 1 cubes, 100s. cwt.; Mauritius, 93s. 6d. cwt.; sultanas (Smyrna), 146s. 6d. cwt.; tapioca (Singapore), 2 1-16d. lb.; tea (Indian), 6¾d. lb.; Ceylon, 7¼d. lb.; Java, 4¾d. lb.; wheat (Australian), 121s. 6d. qr.; English (white), 94s. qr.

Hides and Skins.—Ox and Heifer.—First, 90 lb. and up, 9d. lb.; 80-89 lb., 9d. lb.; 70-79 lb., 9d. lb.; 60-69 lb., 9⅛d. lb.; 59 lb. and under, 8¾d. lb. Cows (first), 60 lb. and up, 8½d. lb.; 59 lb. and under, 8d. lb. Cows (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 6d. lb. Bulls (first), 7¼d. lb.; second, 5¾d. lb.; kips (first), 7¼d. lb.; second, 6⅛d. lb.; third, 5¼d. lb.

Metals.—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard), £83 10s. ton; electro, wire bars, £95 10s. ton; gold bars, 119s. 4d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed number), 260s. ton; lead (soft foreign), £33 10s. ton; manganese Poti, 3s. 3d. unit; molybdenite, 62s. 6d. unit; nickel, £225 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £15 15s. ton; silver bars, 50d. oz.; spelter (G.O.B.), £34 12s. 6d. ton; tin (standard), £241 10s. ton; wolfram, 23s. unit; zinc sheets, £53 10s. ton; tin plates (20 by 14), 40s. 3d. box.

Chemicals.—Acids: Boric, 75s. cwt.; oxalic, 1s. 10½d. lb.; citric, 3s. 3½d. lb.; tartaric, 2s. 5d. lb.; ammonia (sulphate), £31 6s. 9d. ton; benzole (standard), 39d. gallon; bleaching powder (35 per cent.), £24 ton; borax crystals, 41s. cwt.; cream of tartar, 220s. cwt.; glycerine (crude, 80 per cent.), £105 ton; industrial (1.250 per cent.), £155 ton; lead (red), £55 2s. 6d. ton; white dry, £61 7s. 6d. ton; potassium: bichromate, 1s. 6½d. lb.; chlorate, 8½d. lb.; caustic, £90 10s. ton; nitrate, £68 10s. ton; permanganate, 3s. 1½d. lb.; prussiate yellow, 1s. 9½d. lb.; sulphate (90 per cent.), £31 ton; sodium: crystals, 190s. ton; bicarbonate, £12 ton; bichromate, 1s. 0½d. lb.; alkali (58 per cent.), £11 15s. ton; chlorate, 5d. lb.; caustic (70 per cent.), £30 ton; hyposulphite, £35 ton; prussiate, 1s. 1½d. lb.; nitrate, £23 5s. ton; sulphate copper, £41 10s. ton; sulphate iron, 160s. ton.

Miscellaneous.—Cotton (American fully good mid.), 15.65d. lb.; Egyptian F.G.F. Sakel, 18.2d. lb.; linseed (La Plata), £26 10s. ton; rape (Toria), £33 15s. ton; soya beans, £21 ton; palm kernels, £33 12s. ton. Oils: linseed, £56 15s. ton; soya, £65 10s. ton; cotton (crude), £53 10s. ton; olive, 21s. 6d. gallon; ground nut, £76 ton; palm, £52 ton; rape (crude), £73 10s. ton; petroleum, 2s. 3d. gallon; turpentine, 108s. cwt. Rubber: plantation (No. 1 crepe), 1s. 1d. lb.; smoked sheet, 1s. 0½d. lb.; fine hard Para, 1s. 4¾d. lb.

## SMYRNA OPIUM REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended November 13:—The sales this week on our market amount to forty-seven cases of all denominations at 16s. to 20s. as to quality. The exchange is piastres 470 per pound sterling for cheque and 0.72 dollars for one Turkish paper pound. The arrivals are 647 cases, against 970 cases at same date last year, and the whole stock on this market in first and second hands is about 830. There are several buyers on our market, presumably for Continental account, but owing to our small available stock each fresh buyer has to pay higher in order to be able to secure a few cases.

## DRIED FRUIT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows, under date November 23:—

Currants.—It is becoming a very difficult task to say anything about the market. Each day that comes round finds the position much the same as the preceding one, and things could hardly be quieter even in summer trading. Transactions are of a very limited character, buyers showing no interest in the article, and the weakening of prices has a further restraining influence on business. Some sales of very excellent quality of old Gulf are reported at 62s. new fruit; very little life and prices move in buyers favour, with the exception of Vostizza, which realises full rates. The Trentino with further supplies is due end of the week. Quotations are: Calamata, 75s.; Pyrgos, 77s. to 78s.; Amalias, 80 to 82s.; Patras and Gulf, 85s. to 90s.; Zante, 86s. to 90s., Vostizza, 98s. to 104s. Total arrivals from commencement of season to date 12,390 tons. Duty payments from commencement of season to date 2,355 tons.

Valencia Raisins.—Seedless are more appreciated owing to first hand stocks of selected being cleared. The Santa Ana has arrived after a protracted voyage, and is now discharging. Latest sales comprise: ½ boxes, 126s. to 130s.; ¼ boxes, 140s. to 150s.; seedless, 120s. to 125s.

Sultanas.—Stock is getting reduced to very small dimensions and sells slowly at late rates.—Quotations are: Common, 135s. to 138s.; ordinary to fine, 140s. to 155s.

Figs.—The few remaining are moving off at full value. Naturals: Prices tend in buyers favour and are slow of sale at 60s. to 68s. Sales are: Layers, 145s. to 160s.; Locoums, 170s. to 190s.

## LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended November 25: The situation remains much as it was when we last wrote. The trade still holds aloof, and business here has been on a retail scale. The enquiry has been chiefly for Upper and Zagora (types 1-4), and Sakel (types 35-39). Quotations continue to pursue the market in its downward career, and there is nothing that we can see at the moment that is likely to induce a halt. As we have before mentioned, there is a comparatively large stock of Sudan and Tokar cotton, about 9,000 bales, still held in Liverpool, most of which is of second or third quality: the value of this class of cotton depreciates very rapidly as compared with the regular growths, and with best Uppers offered to-day at 16.00d. per lb., the holders of the former are not to be envied. In spite of efforts made in Egypt to hold back the crop, the stock in Liverpool is beginning to increase, and, unless the off-take speedily improves, the pressure on the already unsupported market will be still further increased. Much as we would like to turn "bullish" for a change, we can see nothing in the immediate future to warrant a change of attitude. Manchester reports have been consistently lifeless, and c.i.f. business is truthfully described as "dull." Quotations of Upper show a decline of 2d. per lb., those of Sakel 3d. per lb. (with fine and extra fine exceptionally 2½d. lower), whilst brown is reduced 3½d. all round. Total sales 900 bales, of which ten bales were Sudan. Fully good fair Sakel 31.00d.

## EGYPTIAN CROPS.

The bulletin of the Egyptian Ministry of Agriculture gives the following particulars regarding crop conditions in October:

*Cotton.*—The weather has been on the whole favourable, though somewhat changeable, the nights being damp and cold. The first picking is finished and the second has been taken in most places. The second picking is giving satisfactory results in the northern districts of the Delta. The chief operations in progress are the completion of the second picking and the removal of the cotton sticks. The average yield of the crop is below normal.

*Maize (Nili).*—Weather has been favourable to the growth of the crop and water supply ample. The crop is healthy and free from pests, and is reaching maturity. Harvesting has commenced in some provinces. An average yield is expected.

Digitized by Google

*Millet.*—The crop is promising well. Stalk-borer has been noticed in almost all provinces of Upper Egypt, but damage done is slight.

*Rice* (*Séfi*).—The crop is healthy and free from pests. Harvesting and threshing are in progress. A good average yield is expected. High prices of labour in Beheira for weeding will affect the quality of the crop.

*Rice* (*Nili*).—Harvesting the early-sown crop has begun in Faiyûm. Elsewhere the crop is progressing favourably.

*Sugar Cane.*—The crop is growing well. Cultivators have begun cutting the crop for human consumption. Cutting the crop for factories will probably begin during the next month. An average yield is expected.

*Ground Nuts.*—The crop is growing satisfactorily, and the yield is an average one.

*Bersîm.*—Sowing is general, and the crop is germinating well.

## SUDAN PRODUCE.

### Rainfall and Cultivation.

The following particulars are taken from the C.E.B. report for September:—

In the Berber province the river, after falling away abnormally early, has now to some extent recovered, and is holding well. It is doubtful if basin cultivation will be made the most of this year, especially as there is a heavy growth of "Seid" grass on Wad Hamid, owing to the preoccupation of the people with rain cultivation, which is everywhere reported to be excellent. It is also possible that Sakia cultivation will suffer in the coming year, but the people seem to be sticking well to the pump-lands.

In the Blue Nile province the rains of August continued up to the middle of September, and the general condition of the crops is excellent. The area cultivated is enormous, and although in parts it is patchy, in no part is the crop expected to fail completely, and, on the other hand, in every district it is possible to drive through areas for ten miles of the most excellent dura.

The figures for rainfall in Medani up to the end of September were 597.9 millimetres. Apart from the heavy rainfall, the outstanding feature has been the lack of pests. It is feared that there will be some delay in gathering the crop, owing to the abnormal amount of malaria prevalent.

In the Darfur province the rains continued fairly steadily during August, and the total rainfall in El Fasher is greater than that of the whole of last year. In most parts of the province the crops are assured, even if the rains fail completely in September; but in El Fasher and Eastern Darfur a little more rain is still required. Given the requisite in September, the crops throughout the province should be abnormally good, unless they are damaged by locusts, which have appeared in Nyala district during the latter part of August.

In the Sennar province reports are excellent. Reports of local attacks by Andat beetle have been received from both Sennar and Singa, but areas affected seem very small. Elephants have caused many complaints from both banks south of Karkoj, and various selected men have been lent rifles and a few rounds of ammunition to scare them.

In the Upper Nile province good and regular rains are reported for September throughout the province, except at Renk, where only occasional showers have been experienced.

In the White Nile province rains continued good in the first half of September throughout the province. In the latter half of the month there has been little rain, but the crops may be said to have been already assured almost universally without it.

## BULGARIAN CROPS.

An official statement which has recently been issued estimates the production (in tons) of the five principal crops of Bulgaria as follows (the figures for the previous year being given in brackets): Wheat, 1,120,000 (920,112); rye, 353,000 (259,401); barley, 272,000 (225,809); oats, 141,000 (107,226); maize, 1,107,000 (985,296). The amounts (in tons) required to satisfy internal requirements are as follows: Wheat, 812,000; rye, 291,000; barley, 215,000; oats, 141,000; maize, 499,000. The following quantities (in tons) can be exported: Wheat, 369,000; rye, 62,000; barley, 57,000; oats, 248; maize, 503,000; the total available for export being, therefore, 936,250 tons.

During the ten years 1905-14, the average annual exports were as follows (in tons): Wheat, 248,977; rye, 49,211; barley, 43,398; oats, 13,658; maize, 183,198; or a total of 538,943 tons. It follows that the expected surplus of the present crop will surpass by about 72½ per cent. the average amount exported during this period.

## PRUNE INDUSTRY IN YUGOSLAVIA.

The only dried fruit which is produced in a commercial quantity in Serbia is prunes (says an American consular report). According to official statistics, 220,000 hectares (453,620 acres) are planted in prune orchards. The chief centres of production are Serbia and Bosnia. The production in Serbia totals about 40,000 metric tons annually, and the total production of Bosnia about 23,000 metric tons. Approximately 40 per cent. of these prunes are used in the manufacture of prune brandy (shljevovitza), 40 per cent. is dried, and the remainder is made into jam. At the present time considerable difficulty is being experienced in drying the prunes owing to the bad condition of the ovens. However, the Minister of Agriculture has opened a credit to be used in repairing defective ovens, and has also purchased a certain number of new ovens for use in the prune districts.

# COMPANY MEETINGS.

## ANGLO-EGYPTIAN BANK, LTD.

### Affiliation to Barclays.

The thirty-fourth ordinary general meeting of the Anglo-Egyptian Bank, Limited, was held on November 23, at the bank, 27, Clement's Lane, E.C., Mr. Raoul H. Foà (the chairman) presiding.

The Secretary (Mr. Geo. H. Soul) read the notice convening the meeting and the auditors' report.

The Chairman, in the course of his remarks, said:—A very noteworthy occurrence in the history of this bank has been the acquisition of over 101,000 out of the 120,000 of our shares by Barclays Bank, Limited. The affiliation of our business to one of so strong an institution as Barclays Bank seemed to me and my colleagues eminently desirable, and that our opinion was shared by a large majority of the shareholders has been proved by the number of those who accepted the offer of purchase made by Barclays Bank, Limited.

The object which the chairman of Barclays Bank had in view in acquiring our business was the very laudable one of wishing to create a chain of banks working in all portions of the British Empire and its Dependencies, though I question whether, in view of the negotiations now going on between the members of Lord Milner's Mission and the members of the Egyptian Nationalist Party, headed by Zaghlul Pasha, this be the right term to use to describe the relationship which is to exist between Egypt and England, and which will perhaps be modified in the way in which you have had detailed in the newspapers. Politics do not come within the scope of the matters I have to deal with, and I can only express the hope that the outcome of these negotiations will be satisfactory to both England and Egypt, for any alliance in which one of the Allies is dissatisfied never lasts long.

At this time last year the prices of commodities were very high; this year a fall, especially marked in raw materials, has taken place, and promises to become even more marked. At the end of last year there was still a great demand for all material, raw or manufactured. The price of cotton, the staple commodity of Egypt, stood at 45d. for fully good fair Sakellaridis and rose to 96d. on February 20, to fall to its present price, 32½d.

Among the directors facing you to-day is Mr. J. E. Mounsey, a director of Barclays Bank, who has been nominated by them to represent them on our board, and whose election at your hands we cordially recommend. His knowledge of banking is great, and will, I am sure, be of great use to us. Another newcomer among us, and one whom I am specially glad to recommend to you for election, is Colonel Hall. When I was in Egypt last year I came across him, and was much struck by his profound knowledge of Egypt and the Egyptians. For more than twenty-three years he has lived in that country and has built railways both there and in the Sudan, and when I had the advantage of making his acquaintance he was occupying the position of traffic manager to the Egyptian State Railways.

Conditions throughout the world governing the movement of merchandise, and dependent generally upon the insufficiency of cash and of credit, have made banking a more than usually difficult and preoccupying calling. You have, no doubt, read how nearly all banks have been obliged to restrict the accommodation given to merchants, their customers, and although we are not inclined, of course, to encourage further business at the present moment, I am sure that there are but few instances where we have had to deny our customers the assistance they have required at our hands. The great fall in the value of Manchester goods has not added to our feeling of security in Egypt, but I think I may tell you that we have taken all possible precautions to safeguard your interests in these, as in all matters coming under our purview.

To turn to our balance-sheet, you will see few important changes. The deposit, current, and other accounts have fallen from £17,100,000 to £15,400,000. On the other side, the cash in London, etc., has fallen from £3,600,000 to £1,900,000. Of our investments, £1,750,000 are short-dated securities, and will, within a very short space of time, be repaid at a premium. The bills receivable, including Treasury Bills, amount to £8,460,000. You will remember, of course, that we are dealing with figures as at August 31, which is the apex of the idle time in Egypt. As to the distribution, we propose to pay to the shareholders the very handsome dividend of 15 per cent. *plus* 2½ per cent. bonus, both free of income-tax, as has been our

custom in the past few years. We reserve for the premises nearly £13,000, and we carry forward £50,000, whereas last year we only carried forward £40,000. In conclusion, the chairman moved the adoption of the report and accounts.

Mr. H. A. Richardson seconded the motion, which was unanimously agreed to, and the dividend and bonus recommended were also approved.

The retiring directors and the auditors were re-elected, and the meeting concluded with a cordial vote of thanks to the chairman, directors, and staff, proposed by Mr. Cosmo Bevan, and seconded by Mr. Leonard K. Jarvis.

## COMPANY NOTES AND REPORTS.

### P. and O.

The report of the Peninsular and Oriental Steam Navigation Co. for the year ended September 30 states that the cost of overhauling the steamers which were severely knocked about during the war has been very serious, and has materially reduced the result of the year's operations. After allowing for depreciation and making an allocation to the insurance fund, which with the net premia received during the year, after meeting all claims, will then stand at £2,500,000, there is a credit balance on the year's accounts, including £115.230 2s. 5d. brought forward from last year, of £772,606 17s. 2d. The directors propose to deal with this balance as follows:—5 per cent. dividend on the Preferred stock, £152,000; 12 per cent. dividend and 3 per cent. bonus on the Deferred stock, free of income-tax (of which 2½ per cent. on the Preferred stock and 6 per cent. on the Deferred stock was paid as an interim dividend in May last), £508.668; leaving £111,938 17s. 2d. to be carried forward to next account. The companies which have become associated with the P. and O. have so far contributed very moderate dividends to the P. and O. exchequer, the policy having been to husband their resources. This being the case, there has been an increment in the value of the P. and O. holdings in associated companies, which in all cases stand at the purchase price in the books of the company, and the directors feel justified in distributing on this occasion something in the neighbourhood of £205,000 in Deferred stock to the Deferred stockholders whose names were on the register on November 23 in proportion to their holdings. Fractions will be dealt with by a cash payment at the rate of £450 for £100 stock. This new stock will rank for dividend as from October 1, 1920, and will in all respects be *pari passu* with existing Deferred stock. £15,860 of the first and £17,740 of the second Debenture stock has been redeemed during the past twelve months, but, as mentioned in previous reports, the company retains the power to make a re-issue.

The eight steamers referred to in last year's report as having been taken over from H.M. Government, viz., the s.s. Peshawur, Lahore, Nagpore, Alipore, Jeypore, Kidderpore, Eston and Redcar, are all in commission, and so far the results of their working have not been unsatisfactory. The refrigeration of the s.s. Peshawur, which had to be postponed owing to labour difficulties until the ship had made a round voyage, has now been completed. The large passenger and mail steamer building at Messrs. Cammell Laird's yard at Birkenhead is making slow progress, and is not likely to be delivered until the end of next year. The five ships of the "B" class, contracted for with Messrs. Harland and Wolff for the company's Australian emigrant and cargo business via the Cape, are progressing. One, the s.s. Ballarat, has been launched, and is expected to be delivered early next year. The work on the large passenger steamer building with Messrs. Sir W. G. Armstrong, Whitworth and Co., of Elswick, is progressing. The mail and passenger steamers Naldera and Narkunda are in commission, and have made voyages to Bombay and Australia. They are proving popular ships. Only one of the company's vessels now remains under full requisition to the Government, viz., the s.s. Assaye. This vessel has now been over six consecutive years in Government service. The s.s. Isis has been sold. The s.s. Morea, Malwa, Mantua, China, and Caledonia have been refitted after their lengthy war service, and are again in commission. The s.s. Egypt and Macedonia are still being reconditioned, but are expected to be completed in the spring. The directors are glad to be able to report that the fleet has been navigated during the year without any serious casualty.

The mail contract continues to be worked, under arrangement with the Post Office, on the lines mentioned in the last report. The mail services to China and Australia, as well as to India, will be re-established as soon as the reconditioning of the ships and the delivery of those now building make this possible. The new passenger office in Cockspur Street, known as the P. and O. House, was opened in May last, and is proving a great convenience to the public. The directors lately had an opportunity of acquiring a controlling interest in the General Steam Navigation Co., and while the line will continue to be worked as a separate concern, it will be a valuable adjunct to the company's services, more particularly in connection with Continental trade, and it will admit of a concentration of agencies, especially in Northern Europe. The transaction was completed on November 1, and is not included in this year's accounts. The cost of working under every head continues to increase. Meeting, offices of the company, Wednesday, December 8, 11 a.m.

### Abyssinian Corporation.

The accounts of the Abyssinian Corporation for the period to June 30 show a loss (after charging depreciation, loss on exchange, and provision for anticipated loss on stocks) of £149.916. The principal factors which have operated adversely upon the result of the year's trading are the unprecedented fluctuations in exchange and the abnormal conditions existing in the world's markets, especially in regard to hides, coffee, and cotton goods, which are the commodities chiefly dealt in by the corporation. The ordinary shares of the corporation became fully paid on and after April 8 last. All outstanding calls have now been paid. Of the 150.000 Ordinary shares reserved for subscription in Abyssinia 58,725 have been applied for and allotted. Mr. C. F. Rey has resigned the post of general manager, and the board have appointed Lt.-Col. D. A. Sandford, D.S.O., to be his successor. The latter took over the management on September 15. The businesses of Messrs. Gerolimato and Armanza and Messrs. J. D. Nicholas and Co. have been purchased as going concerns. The commodious premises of Messrs. Jewaji and Co., at Adis-Abeba, have been leased, their stocks taken over, and their lands and buildings at Harrar and Dire-Daoua have been purchased. The directors have much pleasure in stating that His Highness Ras Tafari, Regent and Heir Apparent to the Throne of Abyssinia, has consented to become a member of the board. Meeting, Winchester House, December 2, at 12.30.

### British Merchants' Morocco Association.

The third annual report of the British Merchants' Morocco Association states that the number of members has increased since the last general meeting from 160 to 180. The association has sustained a heavy loss in the resignation of the office of president and chairman of the council by the Right Honourable the Earl of Onslow, upon his recent appointment as Civil Lord of the Admiralty. Lord Onslow was deeply interested in the cause of the association, and the council desire to record their high appreciation of his services, and of the able way in which he discharged the duties of president and chairman. The question of a successor to Lord Onslow is receiving consideration. The resignation by Mr. P. B. Robinson, as from December 31 next, of the office of secretary to the association has been accepted with great regret. In view of his business duties, Mr. Robinson finds it impossible to devote the time which the efficient discharge of the secretarial work of the association requires. It is felt by the council that at no time more than the present is it necessary for close attention to be concentrated upon Moroccan affairs, and it has been decided, in the interests of members, to secure the whole-time services of a secretary in the place of Mr. Robinson. The new appointment, when made, will necessarily entail greatly increased charges, and it is hoped that the support of many more British firms interested in Morocco may be obtained, so that a compensating increase in revenue may be realised. It is due mainly to Mr. Robinson that the association has been so successful, and the council are glad to intimate that his election as honorary treasurer will ensure the continuance of his connection with the association.

A branch of the Bank of British West Africa, Ltd., is about to be opened at Mogador, making an important addition to the branches already established at Tangier, Rabat, Casablanca, Mazagan, Saffi, Fez, and Marrakesh, and it is hoped that other extensions may follow as soon as circumstances permit. The development of British enterprise has been considerably strengthened by the opening of branches of the Bank of British West Africa, Ltd., in Morocco, and it is of interest to note that this bank is now closely allied to the following British banking institutions: Lloyds Bank, Ltd., London County Westminster and Parr's Bank, Ltd., National Provincial and Union Bank of England, Ltd., Standard Bank of South Africa, Ltd. The position as regards the French Protectorate remains as reported last year—namely, that, whilst France desires to be relieved of the obligations of the Act of Algeciras and the Franco-German Treaties of 1909 and 1911, as also of the system of the Capitulations, there is every reason for hoping that, in any event, British interests will be adequately safeguarded. It is understood that France is morally pledged, subject to the surrender of the international servitudes, to the principle of the "open door" in the French Protectorate, namely, commercial, economic and industrial equality for all the Allied Powers who were signatories to the Act of Algeciras.

Notwithstanding the somewhat unfavourable trade conditions which have for some little time prevailed in Morocco, as in most countries, it is satisfactory to record an extension in the number of British steamship companies directly serving Morocco. The congestion at the port of Casablanca, due mainly to the inadequacy of lighters and cranes, has caused very serious delay and inconvenience to steamship owners and merchants interested. Correspondence on this subject has been exchanged with the French protectorate authorities. It is recognised that mail steamers, under the port rules, enjoy a preference as regards the use of lighters and cranes, but it is felt that, under the actual conditions obtaining, greater consideration should be shown to British and other cargo steamers, even if this would entail the French mail steamers, in the capacity of cargo-carrying vessels, sharing, to some extent, the present inconvenience resulting from the deficiencies of the port arrangements. The association is assured that every possible step is being taken with a view to securing an adequate supply of lighters and cranes, and with a view to remedying the state of affairs which has existed.

Amongst other subjects which have engaged the attention of the council since the last general meeting of members may be mentioned debts due to British creditors of enemy estates in Morocco, warehouse accommodation at Gibraltar for Morocco cargo, British consular post at Oudjda, Taxe Intérieure de Consommation on teas, coffee, spices, etc., demonetisation of Hassani currency in the French Protectorate of Morocco, and French Government stocks of green tea at Marseilles.

## UPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

MERSINA.

The report for September states:—Business here has not yet recovered, and a state of stagnation prevails. Despite the dearness of freights, merchants still find it profitable to resell their merchandise at Adana, where it appears that better prices are offered them.

This town is without telegraphic communication even with Tarsus and Adana. Telegrams from Europe reach us by post, and generally after the arrival of the confirmatory letter. European telegraph offices, in accepting telegrams for Cilicia, are misleading the business community. Communications between Adana and Mersina being very irregular, correspondence intended for us arrives only after considerable delay. Bills of lading and similar documents, the collection of which is entrusted to us by clients in Europe, reach us long after the arrival in the Customs of the goods to which they refer. As the goods are not withdrawn in time by the consignees, they are consequently liable to warehouse charges.

SALONIKA, October 31.

The sowings have been up to the normal. Stocks of cereals here are unimportant. Quotations per oke are: Wheat 1.10—1.20 drachmæ; maize, 0.80—0.85 drachmæ; and barley, 0.70—0.75 drachmæ.

Wool.—Stocks of white wool are exhausted. Stocks of black wool amount to fifteen to twenty thousand okes.

Olive Oil.—The crop is considered to be very good. The market shows a tendency to fall. Quotations, 6—7 drachmæ per oke.

Opium.—Stocks amount to eighteen to twenty thousand okes. There is no demand. The nominal prices are 70—75 drachmæ per oke.

Tobacco.—The gathering was concluded at the end of September. The crop is of good quality, and in quantity is about the same as that of the previous year.

Skins.—There have been no transactions. Stocks here amount to 240,000 skins. The nominal quotations are 12—14 drachmæ the pair.

Cotton.—Prices have fallen considerably. Smyrna is quoted 5—6 drachmæ, and American 6—7 drachmæ per oke.

## EGYPTIAN COTTON POSITION

Reuter's Cairo correspondent, in a message, dated November 28, states:—

The Government has appointed a Commission, consisting of three Egyptian and three British members, to study the economic effect, so far as Egypt is concerned, of the world-wide fall in cotton prices, and to consider measures to alleviate the difficulties of small cultivators and tenants arising therefrom. Meanwhile, landowners are urged to refrain from exacting the immediate payment of rent beyond the capacity of the tenant.

In a long statement issued by the Government it is said:—The price of cotton now approximates to the 1918 figures. The great rise in prices last year was due to the extravagance and monetary inflation which swept over the world after the signing of the Armistice. Egyptian cotton benefited abnormally, rising 300 per cent. A general reaction, however, has now set in. At present there is a world-wide check in public and private expenditure, speculation has been arrested, and those holding goods in the hope of realising higher prices have been compelled to enter the market, thus bringing about the fall, which is reflected in the prices of nearly all commodities.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

### Egypt.

*(The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.)*

Equipment and Clothing.—The Egyptian Ministry of the Interior invites tenders for the supply of equipment and clothing required by the Abbassia and Khanka Asylums for one year from April 1, 1921. United Kingdom firms tendering must have a resident agent in Egypt.—January 3.

Nainsook.—The Egyptian War Department invites tenders for the supply of 16,000 yards of nainsook, cotton, white, 42 in. —December 8 (L.).

Pipes.—The Chief Engineer, Main Drainage Department, Ministry of Public Works, Cairo, invites tenders for the supply of cast-iron pipes and specials. December 29.

Cement Blocks.—The Surveyor-General, Survey of Egypt, Giza (Mudiriya) invites tenders for the supply of 20,000 and 100,000 cement blocks. December 15.

Clothing.—The Sub-Director of Stores, Ministry of Education, Sharia Insha, Cairo, invites tenders for the supply of clothing required for the school year 1920-1921. December 4.

General Stores, etc.—The Postmaster-General, Alexandria, invites tenders for the supply of general stores, uniforms, tarboushes, and boots, as well as the execution of certain works of stencilling mail bags, etc., engraving, and paint at Alexandria, and also the maintenance and repair of electric light installations, clocks and watches at Alexandria and Cairo, for the financial year 1921-1922. Copies of specifications are obtainable from the Central Stores, G.P.O., Alexandria. December 15.

### India.

Refuse Destructor.—The Municipality of Bombay invites tenders for the manufacture, erection, and equipment of a refuse destructor for 200 tons of refuse a day. (Spec., 5s., Sir John Wolfe Barry, Lyster, and Partners, 2, Queen Anne's Gate, S.W.1.) March 4.

### Yugoslavia.

Leather.—A company of boot manufacturers of Vranje, Serbia, are inquiring for names of United Kingdom firms in a position to supply 50,000 kilogrammes of sole leather and upper leather for army boots which they have contracted to make for the Serbian Government. The name and address of the company referred to, etc., will be furnished by the Department of Overseas Trade, 35, Old Queen Street, S.W.1

## NEW COMPANIES.

### Lancashire (Egyptian) Cotton.

Objects: To carry on the business of shippers, exporters, importers, brokers and factors of and dealers in cotton, flax, wool, jute, silk or other fibrous substances, etc. Secretary: P. Isherwood, Court Chambers, 15, Mawdsley Street, Bolton.

### Sudan Madani Explorations.

Sudan Madani Explorations, Ltd., has been registered with a capital of £10,000 in £1 shares. Objects: To seek openings for capital in Africa or elsewhere, prospectors of mines, etc. Subscribers include: J. R. Sowerby, 5, John Street, Bedford Row, solicitor; R. A. Holden, 5, John Street, Bedford Row, solicitor; C. F. Bartlett, 30, Wolseley Gardens, Gunnersbury, secretary to public company. Solicitors: Richardson, Sowerby, Holden and Co., 5, John Street, Bedford Row, W.C.

The Egyptian Customs Administration have decided to build two new stores on Mole E at Alexandria, each of which will be over 4,000 square metres in area. The estimated cost is £E84,000.

## ON 'CHANGE.

### Another Dull Week.

(From Our Own Correspondent.)

London, Monday.

Again the week has been one of almost unrelieved depression, and in most markets a renewed movement downwards is to be recorded. The general position at home and abroad continues to exercise an adverse influence, and during the week there has been much Continental selling, which has given a fresh impetus to the general decline.

In view of the large disbursements to be made in interest on the War Loans, it is not surprising that Government stocks should have shared in the general dullness, fractional losses being registered in various directions. Foreign funds have been very weak, especially Greek securities, which have undergone a further general decline.

In the other markets the tone has been very dull. Considerable liquidation has been going on, and prices have been marked down all along the line. Industrials have been specially weak, while notable falls have been sustained by the leaders in the Oil market. Rubbers as usual have moved downwards.

Near Eastern securities have again shown weakness. Egyptian Guaranteed 3 per Cent. are $\frac{1}{8}$ down at 59$\frac{3}{8}$, while Turkish 3$\frac{1}{2}$ per Cent. Egyptian Tribute Bonds at 52$\frac{3}{8}$ have declined a similar amount. Greek securities are one or two points lower all round.

Banks have been dull. Agricultural 3$\frac{1}{2}$ per Cent. Bonds have weakened $\frac{1}{4}$ to 57$\frac{3}{4}$, but the 3$\frac{1}{2}$ per Cent. Guaranteed Bonds are unchanged at 60. Imperial Ottoman Banks are $\frac{1}{8}$ down at 7$\frac{1}{8}$.

Land shares have participated in the prevailing depression. Beheras are $\frac{1}{2}$ down at 9$\frac{1}{2}$, while Delta Lands have shed 3d. at 9s. 9d. Gharbieh Lands have lost $\frac{1}{8}$ at 2, while there has been a drop of 2s. 3d. in New Egyptians to 22s. Union Foncieres at 3 are $\frac{1}{4}$ down. Despite the favourable report, Sudan Plantations have receded $\frac{3}{8}$ to 4$\frac{1}{4}$.

Oils have been dull. Anglo-Egyptians are $\frac{3}{8}$ down at 2$\frac{3}{4}$, while Roumanian Consolidated at 20s. are 2s. 3d. lower.

The Czecho-Slovakian Parliamentary Committee has reduced the amount of the proposed Budget Bill by 260,000,000 kronen.

The Secretary of State for India has appointed Mr. James Tuke, a director of the British Linen Bank and of Barclays Bank, Limited, to be a member of the Committee appointed to consider various questions in connection with the administration of the Indian Railways.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |
|---|---|---|---|
| Alexandria | Piastres to £ | 97$\frac{1}{2}$ | 97 $\frac{7}{16}$ |

## COMPANY NEWS IN BRIEF.

Société impériale ottomane d'éclairage par le gaz et l'électricité.—The annual general meeting will be held at Paris on December 3.

Egyptian Markets, Limited.—First Five per Cent. Debenture Coupons No. 44 falling due December 1, 1920, are payable at the Anglo-Egyptian Bank, Limited, 27, Clements Lane, London, E.C.4, at the face value, and at the branch offices of the Anglo-Egyptian Bank, Limited, at Cairo and Alexandria, at the current rate of exchange.

The traffic receipts of the Egyptian Delta Light Railways, Ltd., for the week ended October 31 amounted to £E20,665; total for the year £E287,116. For the corresponding period of last year receipts amounted to £E3,755; total for year £E111,789.

The traffic receipts of the Smyrna-Aidin Railway for the week ended November 13 amounted to £10,973.

The Compagnie de Navigation Mixte has ordered two steamers of 10,000 tons for service between Marseilles and Bombay, Karachi, and the ports of the Persian Gulf from March 21.

An extraordinary general meeting of the Steaua Romana Company will be held on December 15 at Bucharest for the purpose of increasing the company's capital from 100,000,000 lei to 300,000,000 lei.

Bombay Baroda and Central India Railway.—York Street, Westminster, London, S.W.1, having been renamed "Petty France," the address is now 91, Petty France, Westminster, S.W.1.

The Constantinople Telephone accounts for the period from January 1, 1914, to December 31, 1919, show a balance at debit of net revenue account of £T55,594

Captain F. W. Shannon, chairman and managing director of the Shannon Company, Limited, has left for Cairo on a business visit.

The Chartered Bank of India, Australia, and China announce that the Right Hon. Sir John Newell Jordan, G.C.I.E., K.C.B., K.C.M.G., has been elected a director of the bank.

Roumania has placed a large order for railway engines with a Pilsen firm.

The Ionian Bank is to deposit a Bill in Parliament to extinguish the liability attaching to the shares in the event of winding-up. The shares are fully paid, but are liable, in the event of liquidation, for another £5 each.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

### Agents Wanted Abroad.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

101. A correspondent in Lagos, Nigeria, wishes to get into touch with manufacturers of Arab red fez caps.

102. A stamp collector wishes to purchase used Austrian stamps prior to the 1882 issue. Stamp dealers in the liberated provinces of Austria are asked to send bulk packages of such stamps to the care of the Editor of THE NEAR EAST, with the price in kronen of each stamp or price per dozen, per 100, etc., of each kind. All stamps required will be paid for at the price indicated and the rest returned. Newspaper stamps are not required, but rare postmarks should be included.

103. An Athens firm invites publishers of periodicals dealing with yarns (reports on local markets and world output) and cottons to send specimen copies with a view to its becoming a permanent subscriber.

104. A Greek firm is establishing an electric light station in Macedonia, and wishes to get into touch with firms dealing in the necessary machinery.

105. Engineering and general contractor in Mosul, Mesopotamia, wishes to get into touch with manufacturers in Great Britain.

106. Old-established English trading company with branches in Mesopotamia and Persia is willing to accept agencies there for manufacturers, etc.

107. Old established Turkish firm handling general stores situated in Smyrna and having branches in the interior invites exporters to quote prices for groceries. The firm also acts as agents for articles of general consumption in Asia Minor.

108. Hemp manufacturer in Croatia wishes to get into touch with rope manufacturers who would purchase hemp.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

## NOTES OF THE WEEK.

### *Greece and King Constantine.*

With the wider aspects of the Greek situation we deal in our leading article. At the moment of writing, the earliest reports of the plébiscite held in Greece on November 5 indicate an overwhelming majority in favour of ex-King Constantine's recall; but from Lucerne it is announced that the latter is still studying the position created by the Allies' message. As the three Governments are stated to have ruled out the succession of the Duke of Sparta as an acceptable alternative to the ex-King's return, it would appear as if they imagined that the nomination of Prince Paul would solve all difficulties. We doubt whether such a step would bring finality to the Greek problem, or peace to the Hellenic people. The Near East has suffered enough from the indeterminate state in which the Allies have left its affairs for the last two years, and we should view with a lively anxiety the prospect of a further extension of this condition of things.

### *The Anglo-French Alliance.*

The mistake of the Allied Governments in their handling of the Greek problem is the failure to inquire as to what is likely to be the logical result of each proposal. Even if they hope to coerce the Greek people into a course of action that it does not favour, the outcome can hardly be satisfactory to the Allies or to the Near East. On the other hand, it is not difficult to forecast what will happen if King Constantine returns to Greece. The history of the last year or so will repeat itself. Within a month of his arrival in Athens, French and Italian emissaries will start to persuade him and the Greek people—as they have tried to persuade the Bulgarians and the Turkish Nationalists—that Greece owes her misfortunes to Great Britain, that France and Italy were all along opposed to any harsh measures being adopted, and that they are prepared to do all they can to ameliorate Greece's unhappy lot—through the medium of certain concessions. The British Government, fearing to incur the imputation of not living up to the "inspired" denunciation of ex-King Constantine at the Downing Street Conference, will choose that moment to tighten the screw; the French Government will drop hints as to the extreme philhellene disposition of this or that British official, and a further injury will be done to British interests by the withdrawal of a good representative. We yield to no one in our conviction that the Anglo-French Alliance is a necessity for Europe, and that everything possible should be done to strengthen it. One of the first things required is for the British and French Governments to face everyday facts in the Near East, for if they do not it will be from that quarter that the Alliance will be undermined. The reason why Lord Derby's recent speech on the Alliance in Manchester fell flat is that his audience were business men in touch with conditions in the Eastern Mediterranean.

### *The Yugoslav Elections.*

The Parliamentary elections in Yugoslavia are now over. The Radicals have secured the greatest number of seats, while the Democrats have done very well, and the Peasants Party has achieved remarkable results in Croatia. In the circumstances it seems almost certain that a Radical-Democrat coalition Government will be called into power, and it is to be hoped that it will do quickly and smoothly the work that has to be done in passing the Constitution. The election has shown clearly that an overwhelming majority is in favour of the union, and it is now for the politicians to see that the country gets what it wants. Any renewal of the party intrigues and manœuvres which were so embarrassing in the last days of the old Parliament, and which so harmed Yugoslav interests abroad and so exasperated her own people, will surely not be tolerated now. Those enemies of the Triune Kingdom who hoped that the elections would play into their hands must be bitterly disappointed, but they will not sit down with their hands folded in their laps and bewail their disappointment. Rather will they renew their efforts to sow discord between the brethren; and no better help could be given them than a resumption of the old party game.

### *Balkan "Bands" Again.*

In expressing a desire to visit Belgrade and enter into personal relations with the Yugoslav Government, M. Stambolisky has given fresh proof of his courageous determination to leave nothing undone that may serve to bring about more cordial relations between Bulgaria and her neighbours. Evidently he believes in doing things himself, and his tour has had such good results so far that his belief is certainly well founded. It is, therefore, all the more regrettable that his success abroad should be imperilled by the acts of irresponsible and irreconcileable elements at home, which find pleasure in making mischief in ways only too familiar throughout the Balkans. Our Zagreb Correspondent refers to the activities of certain *komitajis* in Southern Serbia and to rumours and reports to which those activities have given rise. Most of those reports are undoubtedly grossly exaggerated, and probably many of them have no foundation at all in fact—it is incredible, for instance,

Digitized by Google

that Signor d'Annunzio is nowadays in any position to give assistance to anyone at all—but they serve to keep alive feelings and memories which it would be to the advantage of both countries to have forgotten. It is most unfortunate that the war did not put an end to these provocations, but as things are it is perhaps remarkable that we have not heard more of "bands" and their doings. They are now being reported not from one Balkan country only, but from several. But Balkan statesmen have still a chance to prevent the plague from attaining its old proportions, and if Belgrade responds to M. Stambolisky's advance, a step in the right direction will have been taken.

### *The Fiume Comedy.*

The Fiume comedy is evidently nearing the end of its run, and public interest in the piece shows every sign of being exhausted. D'Annunzio has kept up his histrionics, and even went so far as to fire on the Italian warships that were sent to blockade Fiume, Arbe, and Veglia. Moreover, he threatened, a few days ago, to declare war on Italy, with all the inevitable consequences. Happily, Rome is keeping wonderfully cool under this foolish provocation, and the end of the business is inevitable. The city of Fiume is reported to be as tired of the Poet and his merry men as the rest of the world, and his followers are falling away fast. It is understood that the principal object of the blockade imposed by the Italian Government is to prevent the Poet's forces from coming in contact with the Yugoslav detachments stationed in the hinterland of Fiume; but it is not to be expected that the tolerance shown by the Governments both of Rome and of Belgrade will be continued indefinitely.

### *Mr. Montagu on Mesopotamia.*

In the days before the war—but after 1898—travellers who entered Mesopotamia were often puzzled to know why the British Consul at Busreh was appointed from home, while the Consul-General, or Resident, at Baghdad was appointed from India. When they were told that before 1898 both appointments had been made by India they were usually more puzzled than before to understand why when the change was made in regard to Busreh it was not made in regard to Baghdad also. No doubt there was a satisfactory explanation, but it was never forthcoming—or if it were, we never heard it. We are reminded of the subject by the admission made last week by Mr. Montagu, the Secretary for India, when he told a meeting at the Constitutional Club that the civil administration of Mesopotamia was controlled by the India Office in London, and that the policy in the country was determined by an inter-departmental committee presided over by the Secretary for Foreign Affairs, on which the India Office, the War Office, and the Treasury were represented. He added that there was no worse system of administration than administration by a committee, and that there was nothing so puzzling to the general public as divided control. The latter statement, at any rate, is beyond challenge, but we are bound to admit that Mr. Montagu's speech itself provided one or two puzzles of considerable intricacy.

### *The Withdrawal Policy.*

Mr. Montagu informed his audience, for example, that there was overwhelming evidence to show that the present administration was not only popular, but was trusted by the Arabs. If emphasis be laid on the word "present," this may be literally true; but it must be acknowledged that the Arabs have chosen an extraordinary way to show their liking and trust. We do not wish, however, to attempt solutions of Mesopotamia puzzles just now. We are glad to note that Mr. Montagu spoke out clearly on two points. We could not, he said, have left the country at the time of the Armistice retaining a hold only on Busreh, as some critics had suggested: for to have done so would have been contrary to the whole spirit and letter of our statements to the Arabs, and would have meant abandoning the country either to Turkish revenge or to chaos. And as to copying the old Turkish method of "governing" the country by pitting one Arab tribe against another, he would sooner leave the land than be a party to such a policy. A little while ago it would have seemed superfluous for any British Minister to make such statements, but in view of the unbalanced criticism to which the Government's Mesopotamian policy has been subjected of late Mr. Montagu was not ill-advised in making them now. Let us have economy by all means, but do not let us neglect our duty in order to save our pocket.

### *Armenia Embraces Bolshevism.*

Reports from and regarding Armenia seem to grow less trustworthy, if possible, day by day. It is now announced that the news of the Armenian reoccupation of Kars and Alexandropol was untrue, and that the Turks and the Bolshevists have not (yet) fallen out, as they were said to have done. On the contrary, according to Moscow reports, Armenia has been declared a Soviet Republic, and as a consequence "the eternal hate of Armenians and Mohammedans has been turned into fraternal solidarity," and Turkish Nationalists, Armenians, and Bolshevists are busily employed in exchanging compliments and promises of assistance. These reports are startling, but they confirm others, to which we referred last week, and to that extent serve to indicate that Bolshevism really has got a hold on the much-reduced Armenian Republic. The name of the leader of the revolt is given as Kassian; and it is stated that the Republic of Azerbaijan has handed over to Armenia Zangezur, Nakhitchevan, and Nagorny Karabagh. Moralists will regret that a falling away from grace should meet so promptly with such a reward; and practical politicians must recognise that many Armenians will inevitably compare Bolshevist performances with Western promises and expressions of sympathy.

### *One Result.*

It would be quite unfair to blame the Armenians as a nation for the action of the extremists, and we hope and believe that the present phase of affairs will be of short duration. The good fight against overwhelming odds that was put up by the late Government affords grounds for such hope, and we cannot believe that the "eternal hate" of Turk and Armenian is safely buried in Bolshevistic brotherliness—though we are ready to admit that if such were indeed the case, Bolshevism would have one strong claim on the world's good opinion. But for the time being the change has had results, not unforeseen, but none the less unpleasant from the Allied point of view. Mustapha Kemal is reported to have received a number of aeroplanes and armoured cars from the Soviet Government, and to be preparing for a vigorous attack on the Greeks on the Ismidt-Smyrna front; and if he was inclined to take up an unaccommodating attitude before in the matter of negotiating with Constantinople, he is likely now to prove hopelessly intransigent.

### *Moscow Exultant.*

The Moscow message which conveyed the news of Armenia's fall to the world contained the statement that "neither the assurances of Great Britain, nor Wilson's celebrated promises, nor the promises of the League of Nations could save Armenia from massacre and annihilation." It is to be feared that neither President Wilson's offer of mediation nor his suggestion that the boundaries of Armenia should be widely extended will arouse any particular enthusiasm in Armenia to-day. Nor will the well-intentioned efforts of the League of Nations on behalf of the Republic be likely to undo the effect of the Russian action, especially in view of the League's unanimous decision last week that Armenia's demand for admission as a member could not be granted pending the ratification of the Treaty of Sèvres. The League's refusal was, of course, based on the fact that officially Armenia has no standing as an independent State until the Treaty is signed, but the correctness of this attitude will hardly be appreciated by the Armenians. As to President Wilson's suggestion that the Armenian frontiers should be extended so as to take in Trebizond and Erzeroum and to reach almost to the Adana vilayet, that also failed to win the League's approval, for the reason that it would

Digitized by Google

increase the difficulty of protecting Armenia. Here, again, the League's view is doubtless correct, but even in their present difficult position the Armenians cannot be expected to be enthusiastic about it.

### *The Indian Frontier.*

The latest official statements appear to justify the view that a period of tranquillity on the Indian frontier is at least a reasonable possibility. So far the course of events has been normal; the causes of unrest, among them the Afghan war and the agitation in India, were too strong to fail of their effect; the inevitable military operations have been successfully concluded; the recalcitrant tribes have definitely submitted; and some of them are now restoring their economic position by making roads, which will facilitate the maintenance of order in the future. One of the charms of this part of the world is that the tribes are usually good losers, and after each failure settle down to reasonably satisfactory behaviour—till the next time. It would, of course, be much pleasanter to be assured that there will be no next time, but such an assurance cannot be expected just now. A strong and friendly Afghanistan is the first condition precedent for permanent peace on the frontier, and until the Afghan situation is stabilised, all that can be done is to deal sternly with each outbreak as it occurs, and to improve progressively the organisation required on our side to make prompt action more easy and certain than in the past.

### *Lord Selborne's Protest.*

A nice question is raised by Lord Selborne's vigorous protest in the House of Lords against the failure of the authorities in India to counteract the malignant propaganda of calumnies and lies, which, in his view, threatens the success of the great constitutional experiment. The propaganda is unfortunately a fact, as a glance at almost any Indian newspaper will show; it might well wreck the experiment, and those who rely on the old bureaucratic government naturally contend that a counter-propaganda should have been started long ago. On the other hand, we have India's active politicians gradually, and painfully, sorting themselves into parties; and official propaganda would, from the nature of the case, be barely distinguishable from the campaign of one of these parties, and thus we should have the administration appearing before the public in the guise of a partisan, a position which, apart from other obvious objections, would almost certainly strengthen its declared opponents in the struggle. The difficulty is, to our mind, unavoidable at this early stage of what must be a gradual transition from bureaucracy to democracy, and we are not disposed to blame the Government for deciding to hold its hand as long as possible. Once the parties are formed, we may be confident that truth will emerge; we cannot feel confident yet, but we may hope that Lord Chelmsford's declared attitude of vigilant patience will be justified by results.

### *Service in India.*

Mr. Justice Bailhache's decision in a recent action against the Secretary of State for India makes rather unpleasant reading, for it shows that large numbers of men have been engaged for service under contracts the terms of which are now judicially described as "most unfortunate and misleading." The ordinary form of agreement for temporary service in India provides for an engagement for five years certain subject to dismissal for established misconduct, but makes no reference to the rule of law that servants of the Crown are liable at any time to dismissal without notice—"at pleasure," as the phrase goes—yet the Administration claims on occasion the benefit of this rule, and the Courts hold that they are bound to act on it, and that a servant dismissed for no fault is not entitled to any form of compensation. The rule in question is, of course, well known to lawyers, but young men looking for employment are not likely to seek legal advice on the terms of an agreement offered by a public office, and we trust the authorities will lose no time in accepting the judge's cautious suggestion that the form of contract should in future be less misleading. Whether men of the right stamp will accept a contract stating their real liabilities is another question altogether.

## THE WEEK AT HOME.

London, Monday evening.

**Politics and Parties.**

The Government has not been very happy this last week. It is true that Mr. Lloyd George, having been entertained for the first time by the Constitutional Club, that vast caravanserai of modern Conservatism, where the waiters look so much more like Tory peers than the members, may feel that there are no more worlds to conquer. But at Westminster the tides have been rather choppy. There are signs that the House of Lords may be *difficile* over the Home Rule Bill, and it is quite perceptibly ready to destroy the Agricultural Bill and its author, Lord Lee.

There may possibly be some trouble over this matter. Lord Lee is determined that the land of this country shall produce more; and Mr. Lloyd George, who still remembers the land campaign of 1912—when it is said that our present Premier first learned the considerable difference between a pheasant and a mangel-wurzel—backs him up. But the peers are inclined to take up the old-fashioned attitude that the land belongs to the landlord—which is precisely what it hardly ever does—and that he can do what he likes with his own. It is the old question of the State and the individual once more; to which, I think, is added a certain personal dislike of Lord Lee. The Peers do not object to him because his title is new—everything pre-1914 is now the old nobility—but because he is a Conservative in other things, and a Radical in agriculture, which, in their opinion, is the equivalent of the wolf in sheep's clothing.

The rebellious peers are reinforced by the Free Traders, whose objection to British agriculture is profound; and by the Independent Liberals, on the simple but sufficient grounds that a Coalition measure is a bad measure. Labour does not count in this business, and as it is not quite sure where it stands in agriculture, it will probably look as wise as it can and back the winner after the race is over. But, then, official Labour is purely urban.

**Ireland.**

The Irish position, apart from the House of Lords, is for the moment a shade more hopeful. It is an open secret that negotiations have been going on in Dublin between the Government and Sinn Fein, mainly under the auspices of Mr. Arthur Henderson—"Uncle Arthur" of the Labour Party—and in this morning's paper it is announced that Sinn Fein has asked for a truce. Exactly what significance is to be attached to this, beyond the obvious meaning, it would be premature to say. Clearly Sinn Fein finds that murder does not pay, as might easily have been discovered before the campaign of terrorism was started; but whether the leaders of the so-called Irish Republic are prepared to enter into constitutional negotiations remains to be seen. In that event, the Home Rule Bill would need considerable revision, and there is already some talk of this being undertaken. But this is rather running ahead of the situation. This at least can be said, that if there is a real desire for peace and friendship in Ireland, it will immediately find an answering echo in this country.

**The Navy.**

One had hoped that the world, or more particularly Britain, was not to be troubled with armament controversies for some time. But apparently it is not to

Digitized by Google

be. The controversy of capital ship v. submarine has broken out again; the Admiralty, which is said to have decided on the capital ship, is denounced and applauded alternately; and behind these things are horrid hints of great naval preparations being made by the United States and Japan. If it were suggested that these two great Powers were building in order to fight each other, it would not matter so much from a purely selfish point of view; but the agitators make the point that the old two-Power standard should apply against both these countries.

If that were really seriously intended, it would seem an admirable ground for discovering an aeroplane that could convey one to Mars, for the prospects of civilisation on this earth would seem to be too insecure to make it worth while to continue living here; but I doubt if the public takes this agitation very seriously. Now the war is over, we are all pacificists; the only militarists left are the old conscientious objectors, most of whom are now agitating for a class war.

**Licensing and Dumping.**

There is some little feeling between the two wings of the Coalition at the moment. The Liberals want Licensing Reform, and the Tories, suspicious of "Pussyfoot," don't; the Tories want legislation against German and other dumping, and the Liberals, suspicious of Protection, don't. For the moment licensing is off, and the brewers breathe again; but the anti-dumping measure is also off, and regulations for the admission of dyes and other German produce are more in favour in official quarters, as the line of least resistance. The rivalry of the two wings is not likely to lead to serious difficulties, but the Liberal Independents, who live off the crumbs that fall from the master's table, are making the most of these domestic discords. But in the happy Christmas atmosphere that the official whips are creating some kind of solution may be attained before the 1921 session. The Independent Liberals talk loudly of principle, but if there is one obvious principle in politics it is that two people cannot both pass through a gate at the same time, and as both licensing reform and anti-dumping are necessary, it is merely a question of which comes first, and how much of each gets through.

**City Pessimism.**

The City appears to be extraordinarily depressed just now, not because of Labour attacks on capital, but because of actual capital difficulties. Everybody wants money to enlarge their factories or to start new ones, but nobody seems to have any money. There have been many new capital issues this last few weeks, but few of them have been fully subscribed; and one or two of the largest emissions have left 70 or 80 per cent. on the hands of the underwriters and finance houses. The habit of buying shares in the open market rather than on the prospectus has, of course, been growing for some years, experience having shown that it is often possible to buy at a discount a week or two after the issue, but that does not explain the recent failure to allot more than 20 or 25 per cent. of many large companies, and these shares are not, I believe, going off very well now that they are quoted at a substantial discount. Some of the finance houses are consequently loaded up with what is little better than a lot of paper, and the Stock Exchange is equally unhappy. It never likes too many new issues at once, as these dry up its regular business but far worse than a new issue which is successful is a new issue which fails.

There is, of course, no question of a panic; the simple fact is that everybody is hard up. The inevitable result is a crescendo of the agitation against Mr. Chamberlain, who searches our pockets so thoroughly, but that is not much use, because Mr. Thomas, of the Labour Party, in his recent book, "When Labour Rules," gives a direct hint that the income-tax will not be lowered by Labour in office, and there is also a more intelligible campaign on behalf of national economy.

There is no doubt that the revolt against the new bureaucracy is increasing. The Ministry of Food is to go; it has discharged an unpopular duty with real efficiency, and has succeeded in curbing both the profiteer and the greedy private citizen; but, having done all this, the public bids it remember that, like the man in the Gospel, it is still an unprofitable servant. The Ministry of Health has succeeded in making itself unpopular with the doctors and the country as a whole, and the inevitable Dr. Addison will soon be in hot water again. Once a Government Department has taken root, it is very difficult to dig it up again; but if the Labour Exchanges and the Ministry of Health were abolished, few tears would be shed except by the officials, and the Budget would be an easier matter next year.

The real danger of the extravagant expenditure is that if these luxury departments are not cut off the economists will begin to attack education, which is doing extraordinarily well under Mr. Fisher, and is more important than a Ministry of Health which does not cure anybody and a Labour Exchange which finds nobody a job except its own officials. But some of the Government cargo will have to go.

**Bishop Temple.**

Canon Temple, who has been appointed to the Bishopric of Manchester at the early age of thirty-nine, was born in the ecclesiastical purple, his father being the rugged Archbishop Temple, whose share in the authorship of "Essays and Reviews" created so great a stir in mid-Victorian days. The son has inherited his father's ability, and as the founder and head of the "Life and Liberty" movement has taken a great part in Church affairs. Courage and administrative talent seem to run in this family, and it would not be very surprising if Canon Temple eventually reached Canterbury—it would be the first instance, I think, of hereditary succession in the Primacy.

The new Bishop is in no sense a great theologian, but an active organiser who knows what he wants and can write well, and also, I believe, deliver a good sermon. If that is so, there will be two bishops who can preach—for, according to a wicked story, Mr. Lloyd George is said to have appointed Bishop Hensley Henson because, as a Nonconformist, he thought it only fair that the Church should have one bishop who could preach. But that, like the tale that is going round of the Birthday Knight "who bought his title on an overdraft," may be *ben trovato*.

**The Week's Books.**

"The Life of Lord Gorell" (Murray), by Mr. J. G. de Montmorency, contains, like all legal biographies, a great deal that only a lawyer could read—accounts of old cases in which forensic triumphs were won; but quite half the book is taken up with Lord Gorell's views on divorce—a subject on which the President of the Divorce Court had a peculiar right to speak with authority.

More interesting to the general reader is "Some Experiences of a New Guinea Resident Magistrate" (John Lane), by Captain A. W. Monckton. It is one of the most attractive books of travel in a savage country that I have read for a long time, and although the literature of Papua is already large it can challenge comparison with any previous works on the subject, and beat most of them.

I do not know whether Mr. Locke Ellis has timed his translation of the Agamemnon (Selwyn and Blount) to fit in with the controversy over the present King of Greece. Any rendering of Æschylus has always to challenge comparison with Professor Blackie's spirited version, but Mr. Ellis emerges not unsuccessfully from the ordeal. He does not seem to have quite the sweep and power of the great Professor, but there is a grim remorselessness in his lines that is truly Æschylean.

There is a great deal of difference between the modern European and the ancient Greek drama; but Miss Storm Jameson, in "Modern Drama in Europe" (Collins), seems rather doubtful whether things have improved much. Her book is a stimulating piece of brilliant pessimism. Miss Jameson is a writer who is likely to be heard of again; she published a clever novel, called "The Pot Boils," or boils over—the precise title escapes me—which was, as the critics say, "instinct with the spirit of revolt against the conventions." From what I have read of her work, I should say she has every faculty except that of repose.

OCELLUS.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, November 22.

**Return of the Sultan.**

The Sultan returned to Cairo on Monday after a stay of six months in Alexandria. He came up to Cairo by special train, accompanied by the Ministers and the Acting Financial Adviser. His Highness made a short stop at Damanhour, Tanta, Shebin-el-Kom, and Benha, at each of which stations he was received by the Mudir and the notables. On arrival in Cairo he had an exceedingly warm reception, there being unusually large crowds along the route to Abdin palace. The Sultan proposes to pay a visit to Mansura towards the end of this month, and on December 20 he will start on a cruise up the Nile, travelling as far as Aswan and stopping at all the important points on the way up or down.

The Court has gone into mourning for twenty-one days on the occasion of the death of the Princess Fatma Ismail, eldest sister of Sultan Fuad and sole surviving daughter of the late Khedive Ismail. Her Highness, who had but recently returned from Constantinople, died suddenly on Thursday, and was accorded a State funeral. The late Princess was well known for her charitable acts, among the most noteworthy being the generous gift of jewels which she made to the Egyptian University on the occasion of its foundation in 1910.

**The Political Situation.**

The political situation continues for all purposes unchanged. The London papers with the account of the discussion in the House of Lords and the leading articles written on the subject have now arrived, and the local Press is busy commenting on the various interpretations which, according to the point of view of the particular element behind them, their editors are putting on the statements made.

The main point of interest, however, is the position of Adly Pasha Yeghen, who, although he has taken no public part in the controversy since he retired from the Cabinet in May, 1919, is known to have been instrumental in bringing about the meeting between the Milner Mission and Zaghloul Pasha and his associates, and the draft terms which Zaghloul Pasha recently rejected.

The Delegation organ went so far as to state that Adly Pasha was not in agreement with Zaghloul in the attitude he had latterly taken up, and that he was of opinion that the "reservations" could well be left to be discussed in the course of the official negotiations. Vehement contradictions of this have been forthcoming from Zaghloul Pasha, from various of his colleagues in Paris, and from Adly Pasha himself; but all this does not prevent the firm conviction that the original statement made by the Delegation organ was correct. In the meantime, relatively speaking, a halt has been called, and everyone is waiting for the next official move.

The opinion is gaining ground that a settlement will not be so speedily reached as was originally believed and hoped, and that in view of the evident division of opinion in the Cabinet and as a result of Zaghloul's attitude, which, it is felt, may materially have weakened Lord Milner's position, it is very improbable that Egypt will get more than he offered to Zaghloul, and very possible that she will get less.

**A New Bishopric.**

Yesterday the ceremony of enthroning Bishop Gwynne as Bishop of Egypt, the Sudan, and the Red Sea took place at All Saints' Church. The ceremony was performed by Dr. R. McInnes, Bishop in Jerusalem, Canon Gairdner officiating as his chaplain, and Canon Horan, chaplain of All Saints' Church, officiating in the same capacity to the new bishop. There was a very full and representative congregation, including the High Commissioner and Lady Allenby, the principal chaplains to the Forces, and the senior clergy in Alexandria and Cairo. Representatives of the Greek Orthodox, the Armenian, the Syrian, and the Coptic Churches also attended, and the Sultan was specially represented by his Grand Chamberlain, Said Zulfikar Pasha. Lord Allenby read the King's Mandate to the new bishop; Dr. McInnes read the letter from the Archbishop of Canterbury authorising him to perform the ceremony of enthronement; and the sermon—a very earnest one—was preached by the new Bishop, who as Suffragan Bishop of Khartoum has been long known to us, and who during the war rendered distinguished service in France on the Chaplain-General's staff.

In reading the Archbishop's authority Dr. McInnes added a few words as to the circumstances which had necessitated the creation of this new diocese. It appears that already twenty-two years ago the late Dr. Blyth found the diocese of Jerusalem and the East too large, and suggested to the then Archbishop of Canterbury that the time had come to separate Egypt and the Sudan and form those two areas into a new diocese. The Archbishop agreed, but political events prevented the realisation of the scheme, and until his retirement Dr. Blyth continued to administer the huge area placed under his jurisdiction.

It was only a year ago that Bishop McInnes was in a position to put forward a concrete scheme, but he met with ready support from the Archbishop of Canterbury, who had stipulated that he should retain the Jerusalem diocese but agreed to appoint Bishop Gwynne to the new one on the nomination of Bishop McInnes.

With regard to the choice of All Saints for the ceremony, it was explained that, while Dr. McInnes had been enthroned in St. George's Cathedral in Jerusalem, Bishop Gwynne obviously could not be enthroned in the same place, owing to the splitting up of the diocese. The only cathedral in the new diocese was at Khartoum—too far distant for the ceremony to be performed there—and Bishop Gwynne had accordingly selected All Saints' Church in Cairo as his pro-cathedral. One would like to add that in view of the long-standing connection between All Saints and the Anglican community in Egypt and the Sudan, no more fitting selection could have been made.

**A Gruesome Murder Discovery.**

Not long ago somewhat of a sensation was caused by the discovery of a number of female remains near Tanta, and it was concluded that these belonged to various public women who at one time or another during the last year or so had disappeared without any trace of their whereabouts. This week another and similar gruesome discovery has been made in Alexandria, where, according to the latest official report, the remains of no less than fifteen women have been found. The discovery was made by pure accident. It appears that a police officer, noticing a peculiar odour when passing a certain house, reported the matter, and an investigation was made, in the course whereof the floor of one of the rooms was pulled up and two bodies were found buried there. Simultaneously, repairs that were being carried out in a house close by brought to light other human remains. Further excavations were made at both houses, and up to date no less than twelve more bodies have been found. Some of the remains have been identified as those of women—not all of them public women—who have been reported missing for some time, and for whom the police have been searching; and it is believed that, as in the case of the Tanta murders, these women, who were all known to be wearing golden ornaments, were enticed by some means or another into these houses and there murdered for the sake of the valuables they wore. The inquiry is continuing, and other suspected houses have been searched and further remains are reported to have been found. Meanwhile the owners of the two houses, who are sisters, together with two other women and six men are now under arrest.

# YUGOSLAVIA.

ZAGREB, November 30.

**The Elections.**

The general elections have passed off without a hitch, indeed, with very little excitement. Only at Kolashin and some other place in Montenegro the *zelenashi* tried their brigand tactics, and a few lives were lost. General abstinence was proclaimed throughout the country, and neither wine nor *raki* was allowed to be sold for the three days.

The results are satisfactory, although, of course, the final details are not yet to hand. But it is clear that the destructive elements have failed, and the constructive elements have an overwhelming majority, greatly to the disgust of the Magyars and other enemies of Yugoslavia, who preached that the young triune kingdom was on the eve of dislocation, and that Croatia and Slovenia would inevitably fall asunder. At the same time no one party has a working majority, owing to the fact that the people are young to politics, which was virtually a forbidden game under the Hapsburgs, at least for the peasants, who have been inarticulate hitherto.

The Radicals have come out the strongest, and will have about a hundred seats in the new Skupshtina; after them the Democrats, with from eighty to ninety seats. Next comes Raditch's Peasant Party, with about fifty seats. This is a new phenomenon. Stjepan Raditch has spent most of the time since the union in gaol, for working with the enemies of the country, and the disorders in Croatia last summer were attributed to the machinations of his agents. He cried, "Long live the Republic," and his avowed policy was to establish a republic of peasants. But the day before the elections the Crown Prince proclaimed an amnesty, and Raditch, crying now "Long Live the Prince Regent," hurried off to the polling stations. He has won a big victory in Croatia, and it is probable that the Alliance of Agriculturists in Serbia will join forces with him. After all, in a country where over 90 per cent. of the population are peasants, it is not a bad thing for them to be well represented in the House by a strong party, and it looks as though Raditch will exchange the prison cell for a portfolio.

The balance is made up by a mass of minor more or less ill-defined and weak organisations. Dr. Koroshets' Clerical Party in Slovenia has come to grief, to the content of the country generally. The minor Croatian parties, of which there are ten, including the Narodny Club, have made a poor show, and the Communists have lost 40 per cent. of their ground in Zagreb, as well as in the Voivodina. It seems anomalous that they have gained ground in Macedonia of all places; but it is well known that there they have been simply an anti-Serbian party and so had the support of the Bulgarophils, Albanians and Turks, as of the *zelenashi* in Montenegro.

M. Vesnitch was rejected at Skoplje, but will probably be returned in another borough, for candidates may stand for several places simultaneously. Of other prominent politicians Dr. Laginja, leader of the Narodny Club and Ban of Croatia, has been returned for Virovitica, and M. Svetozar Pribichevitch and Dr. Lukinitch for Lika.

What form the new Government will take is not yet certain. It is considered probable that Radicals and Democrats will combine to pass the new constitution, but neither can form a Cabinet alone. It is possible that the Radicals will make an alliance with the Peasant Party, with whom it is said M. Stojan Protitch is already flirting. Meanwhile, the Provisional Parliament of the Kingdom of the Serbs, Croats and Slovenes has been dissolved with no tears on any side, as also the old Serbian Skupshtina and the Croatian Diet. The first duties of the new Constituent Assembly will be to check the returns and then to pass to its proper constituent functions, which, it is anticipated, will keep it busy for about six months. It will then convert itself into a legislative body, and be dissolved in two years. Unless anything unforeseen turns up, fresh elections will be held at the end of 1922 or the beginning of 1923. By that time it is probable that the mass of minor parties in Croatia and Bosnia will have been absorbed, and the political horizon crystallised out.

**The New Constitution.**

The draft of the new constitution has been drawn up by Professor Markovitch, who adopts the two chamber system. The Senate will consist of one hundred members elected for nine years, of whom one-third will retire by rotation every third year.

The sky looks clearer for Yugoslavia: the Italian difficulty settled; the elections over satisfactorily, with the decisive defeat of the destructive elements and a great majority in favour of the continuance of the union. The mass of peasants released from the mediæval conditions of Austria-Hungary have had their first lesson in politics, and from now on will take an active, and probably a wholesome, part in the government of the country, of which they form so overwhelming a majority.

**Russian Refugees.**

The Russian colony in Belgrade has been diminished by the removal of a considerable number to other parts of the country. As we have reported previously, many have set to work to establish business, and some are doing very well. A pathetic case is that of General Melnikoff, who has opened a shoemaker's shop in the Takovska. It is a very humble business, but the gallant general is in earnest, and his ambition is to extend his premises beyond the one, tiny, ill-lit room which serves him as home and office, so that he could have a living room, and the luxury of a kitchen. On the outbreak of war, the general was Chief of Staff in Turkestan. He commanded a regiment in the fighting in Poland and Galicia in 1915, when he was severely wounded.

**Dr. Trumbitch.**

Considerable comment has been aroused by the resignation of Dr. Trumbitch on the eve of the general elections. Dr. Trumbitch, who was well-known in London as Chairman of the Yugoslav Committee during the war, states that he accepted the portfolio of Foreign Affairs only provisionally, and that now the agreement with Italy is complete he considers his task is done. It is not likely that he will leave public life.

A telegram from Cettigne states that on November 26 there were celebrations of the anniversary of the union, the more enthusiastic on account of the agreement with Italy, which removes the dynastic problem from Montenegro.

**Relations with Bulgaria.**

M. Teodoroff, Bulgarian *Chargé d'Affaires*, has inquired of the Minister of Foreign Affairs whether the Government will receive M. Stambolisky. The newspaper comments on this are interesting, especially one in the *Politika*, in which, referring to the occupation of Tsaribrod and Basilograd, the writer points out that the emancipation of the people cannot come from the outside, but must proceed from the centre. That is why the imperialist efforts of the old Tsar Simeon, and in recent times those of Ferdinand, had only purely temporary success, whereas the development of Serbia began in the Shumadia, and gradually expanded outwards, first Nish and Vranja, then Kumanovo and Bitolj (Monastir), and finally the great expansion of the past few years. Therefore the occupation of Tsaribrod and Basilograd, as also of Strumnitsa, is but one more step in the relentless course of events, which must inevitably lead to the final and complete union of all the Yugoslavs.

But while M. Stambolisky is endeavouring to ensure friendly relations with his neighbour and late enemy, the chauvinistic element in Bulgaria is regarded here as trying to upset his plans. Thus it is alleged that the present representatives of the old Macedonian Committee are working hand-in-glove with all Serbia's enemies; that communistic literature was found in abundance on the killed and wounded among the Bulgarian *komitajis* recently defeated in Southern Serbia; that they are in touch with the restless Albanians; and that they are receiving arms and other assistance from d'Annunzio. The agreement with Italy will remove one of their sources of supply, and the few remaining *zelenashi* in Montenegro will not be able to give them

Digitized by Google

much help. It is also believed that they have an understanding with the anti-Serb elements in Croatia, such as the separatist Frankist party and Raditch's Peasant Republic party, and with the fairly numerous Communists, who are reinforced by the Magyars, Germans, Jews, and such foreign elements.

**The Adriatic Effervescence.**

In the face of all these misgivings, it is gratifying to read reassuring news from Dalmatia. It is reported from Split that Senator Markona (? Marconi) and General Garibaldi have arrived at Shebenik (Sebenico) to calm the people, and with General Taranto called upon all Italian officers to obey and to evacuate the town. The naval commander has forbidden his officers and men to have communication with d'Annunzio, and immediately left the town.

**General News.**

Considerable interest has been aroused by the publication in the *Politika* of a telegram from London, according to which the Heir-Presumptive to the throne of the Serbs, Croats, and Slovenes, in the event of the Crown Prince Regent having no children, would be the young Prince Svevlad—or Vsevolod in the Russian form—the eldest son of the late Grand Duke John Constantine and Princess Helena of Serbia, sister to the Crown Prince. Prince Svevlad is now nine years old. The Princess succeeded in escaping with him when his father was murdered by Bolshevists at Agopaievsk. If the young prince were to come to the throne, there would be three dynasties united in the sovereign of the Serbs, Croats, and Solvenes, and all Slavonic—that is, the Karageorgevitch, Petrovitch-Njegush, and Romanoff.

Dalmatian colonists in South America, who are numerous and, on the whole, prosperous, have subscribed 1;700,000 kronen for Dubrovnik (Ragusa). It is stated that the money will be devoted to the Children's Asylum and the Artisans' School in Dubrovnik, and that the colony, further, is prepared to raise funds for the building of a new home for poor children.

## ROUMANIA.

BUCHAREST, November 22.

**Political Changes.**

The following changes in the Cabinet have taken place: M. D. Grecianu, formerly Minister of Public Works, has gone to the Ministry of Justice; M. Octavian Tasluanu, who was Minister of Industry and Commerce, will now take over the Ministry of Public Works; and General Averescu, the President of the Council of Ministers and Minister without portfolio, will take charge of the Ministry of Industry and Commerce. M. Anton Moscony, Minister of Transylvania, and Baron I. V. Starcea, Minister of Bukovina, have both resigned, and been given high posts at Court.

**Parliamentary Procedure.**

Parliament will open, in ordinary session, on November 28.

The Parliamentary Committee appointed to study the regulations to be adopted in the Lower House has decided on the following modifications. In view of the waste of time in the last Parliamentary session by the numerous interpellations, it has been decided that only the sittings on Mondays shall be devoted to this purpose. With regard to questions addressed to Ministers, the new regulation demands that verbal questions must be as short as possible, and that answers must be given within three days.

**Complaints of Hungarian Atrocities.**

Several meetings have been held throughout the country and in Bucharest to protest against atrocities committed on, and the persecutions of the Roumanian population in Hungary by the Hungarians, and also against the attack made on the Roumanian Military Attaché at Budapest by two Hungarian officers. Resolutions were passed that the Government should take drastic measures to stop the recurrence of these incidents, if necessary by reprisals.

**The Court.**

The King, accompanied by Princess Elisabeth, saw Prince George of Greece off by the Simplon Express to Switzerland. In the course of this week the Royal family will return from Sinaia to Bucharest for the winter season.

**General News.**

The damage caused by the German invasion of the country amounts, according to the last evaluation, to 12 milliard lei.

The Ministry of Finance has decided to withdraw from circulation the 100 and 20 lei Banca Generala Notes. This withdrawal will be carried out in proportion to the available stock of Banca Nationala notes.

It is rumoured that the City of Bucharest has succeeded in obtaining a loan of £ st. 1,000,000 on the London market, repayable in twenty-one years. This loan will only be redeemable after six years.

The gale that was reported to have taken place in the North Sea a week ago has extended to Roumania. It lasted for twenty-four hours, causing considerable damage by tearing down trees and taking off roofs of houses. This gale was followed by a drifting snowstorm, which stopped a good many trains as well as road transport, and interrupted telephonic and telegraphic communication throughout the country.

## GREECE.

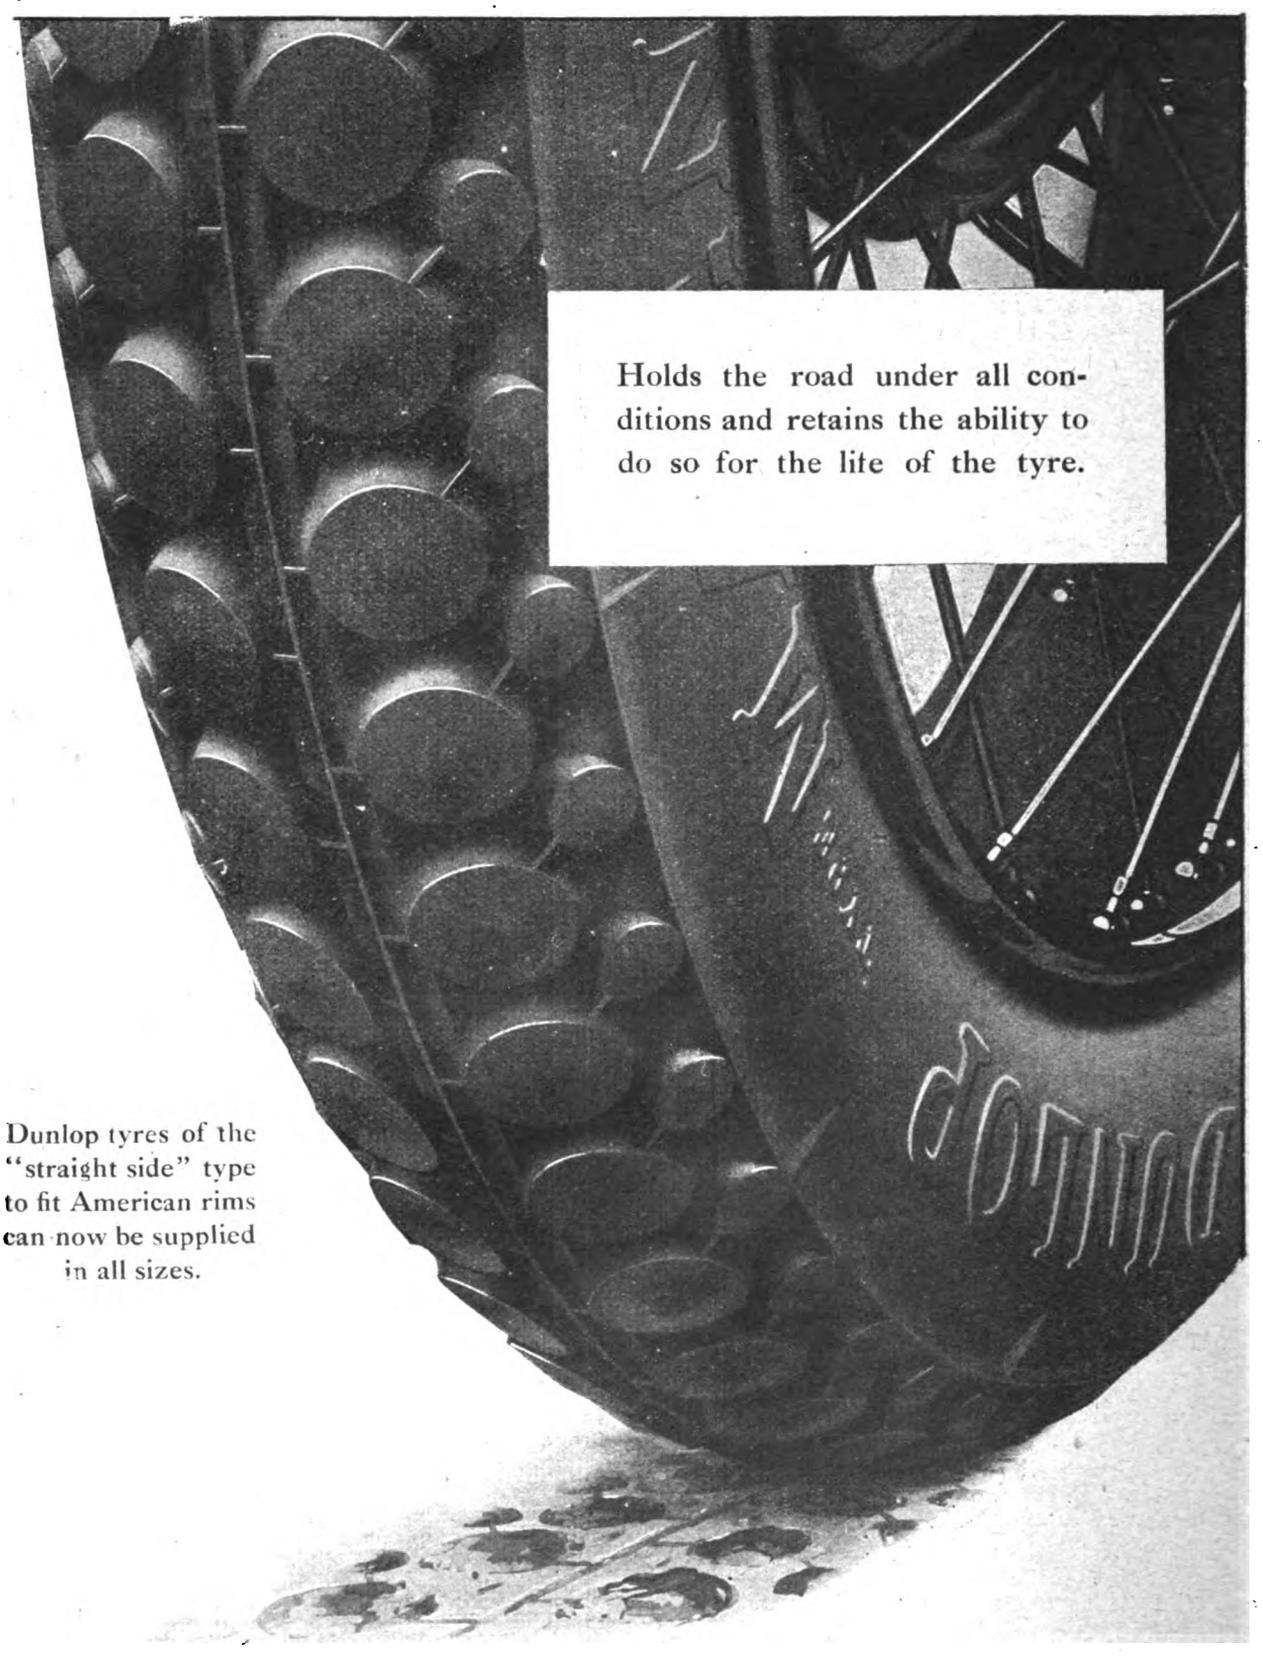
ATHENS, November 21.

**The Result of the Elections.**

History has repeated itself. Coumoundouros in 1880, Tricoupis in 1895, and now Venizelos. Who could have thought after last week's monster demonstration that in but a few days the Liberals would lose the power which had been theirs since 1917, and that even their able leader himself would have to leave the country so dear to him and for the welfare of which he had worked so hard? But the unexpected has happened. The Venizelists were not only beaten, they were literally routed. Even the most optimistic Royalists were rubbing their eyes with wonder when the results of last Sunday's elections became known. They naturally expected to win the fight, but not for a single moment did they dream of such an overwhelming majority. The results of the polling at the front are not yet to hand, but even should these be favourable to the Liberals it is a question whether the latter will be represented in the Chamber by more than 135 members, which gives to the Royalists a majority of 98. These figures will, of course, alter considerably if, as generally thought, the majority of the Turkish members elected in Thrace under the Venizelist flag, go over to the rival camp. In Attica and Bœotia, where the most hopeful Royalists did not expect to secure more than half a dozen seats, not one of the twenty-two Venizelist candidates was successful. M. Venizelos himself was over three thousand votes below the lowest of his successful opponents. One must not, however, blame the Athenians for their Premier's downfall. In Athens itself the result of the polling was more or less a draw, while in Piræus the Venizelists obtained a small majority. It was the numerous small towns and villages in Attica and Bœotia which deprived the great statesman of the privilege of attending the meetings of the Greek Chamber. In the Peloponnesus, in Thessaly, and in Macedonia, the victory of the Royalists was complete, not one of the Venizelist candidates having secured a seat.

On Monday afternoon M. Venizelos visited the Regent, Admiral Coundouriotis, and tendered the resignation of the Liberal Cabinet. The new Cabinet was then formed by M. Demetrius Ralli, who, after taking the usual oath of allegiance, requested the Regent to resign his office. The Dowager Queen Olga has been appointed Regent pending the return to Greece of her son, ex-King Constantine. This will be definitely decided by the plébiscite, which will take place soon after the convocation of the new Chamber next Saturday. In the meantime in all the public buildings M. Venizelos' photographs have been replaced by those of King Constantine, while in the tribunals justice is being administered in the name of the King. Great enthusiasm prevails throughout the country, and photographs of the King and Queen are sold by thousands. All political prisoners have been released, and all the

Digitized by Google



Dunlop tyres of the "straight side" type to fit American rims can now be supplied in all sizes.

# DUNLOP

## THE NEW MAGNUM TYPE

TRADE MARK

Digitized by Google

officers of the Army and Navy who had been forced by the Liberals to resign have been reinstated.

The new Premier, M. Ralli, has declared through the Press that the Government's foreign policy will be identical with that followed by M. Venizelos. With regard to the internal policy the Premier stated that his sole desire was to effect a reconciliation between the two parties, and promised that no reprisals whatsoever against the Venizelists will be allowed. It is sincerely to be hoped that this wise step will become the starting point towards bringing relief to the tragic sore from which Greece has suffered for the past few years.

M. Venizelos, as stated above, has left Greece. Before going he urged his friends and followers to abide by the decision of the people and assist the new Government in its heavy task in discharging the greatly increased responsibilities of the country. The absence of M. Venizelos from the meetings of the Hellenic Chamber will certainly be greatly felt not only by his friends, but also by his enemies, who, after all, cannot help admitting that it was by his foreign policy and through his almost superhuman efforts that Greece has become what she is to-day.

**Resignation of Officials.**

Many of the officers who had served with the National Defence Army on the Macedonian front during the war have tendered their resignation. The High Commissioner for Greece at Smyrna, M. Stergiadis, has likewise tendered his resignation. M. Ralli, however, requested him to reconsider his decision and to continue serving his country. It is to be hoped that M. Stergiadis will accede to the Prime Minister's request, and remain at the post which he has so successfully filled for the past eighteen months.

The Commander-in-Chief of the Greek Armies, General Paraskevopoulos, has been recalled by the Government, and is succeeded by General Papoulas, one of the reinstated officers.

The Greek Ambassadors in London, Berlin, Washington, Paris, Tokio, and Berne have resigned their offices. The names of their successors are not yet known.

## TURKEY.

CONSTANTINOPLE, November 22.

**The Negotiations with Angora.**

Beyond a bare announcement to the effect that the delegate sent by the Government to Anatolia to effect a *liaison* with the Nationalists had reached Ineboli on his way back to Constantinople, practically nothing further has transpired with regard to the preliminary negotiations between the Sublime Porte and the Nationalists. There can hardly be much doubt, however, that the Cabinet has by this time received such information as to make the situation fairly clear. Izzet Pasha would certainly have let it be known if matters were progressing favourably, and the absence of news, in this instance, cannot be regarded as a favourable omen.

**The Greek Elections.**

The result of the Greek Elections created a tremendous sensation in Constantinople, and the effect was heightened by a premature announcement to the effect that the Venizelists had obtained a crushing majority. The Greek newspapers published glowing leading articles, and the Greek shops in Pera displayed flags to celebrate the occasion. On the afternoon of the same day, however, the truth became known. At first it was received with incredulity, and in their bewilderment the partisans of M. Venizelos described the official announcement of the Hellenic High Commission as "a manœuvre," although to what end it was not easy to guess. When, at last, it was realised that the idol had been dragged from his pedestal there were some exciting scenes. Venizelists, usually belonging to the Ottoman Greek class, became involved in acrimonious discussions with Constantinists, usually officers or men of the Hellenic army; and in more than one café there were free fights, which resulted in a heavy expenditure of crockery and the interference of the Inter-Allied Police.

The Turks made no secret of their jubilation, although the press was forced by the censorship to observe a certain reserve; and in spite of the new Greek Cabinet's announcement that it has no intention of following a different foreign policy from that of its predecessor, it is generally realised that the entire outlook has been changed.

**The Crimean Tragedy.**

During the past week about one hundred and thirty thousand refugees have arrived from Sevastopol and other parts of the Crimea. Doubtless, details have already appeared in the European press, but it is impossible to refrain from emphasising the truly appalling condition of these unfortunates. Truly enough, charity begins at home, but it should not stop there. The great majority of the refugees are still on board the ships in which they arrived, and in which they were crowded in a manner that would not be permitted in transporting pigs in England. This was, of course, inevitable, on account of the large number of people who dared not stay to face the Red Terror, and the insufficient number of ships. But once arrived in Constantinople waters, they expected to be disembarked, and risked the discomfort and dangers of the voyage. Unfortunately, the capital, for some time past, has been overcrowded to such an extent that it is absolutely impossible to accommodate more than a very small fraction of the refugees. All available public buildings are already occupied; every available house has already been requisitioned; and housing accommodation even for the permanent population has become a most difficult problem. Sanitary conditions in Constantinople, moreover, are not so perfect that the addition to the population of over a hundred thousand people, amongst whom typhus and small-pox have appeared, could be considered with equanimity. On the other hand, the ships have run out of food and water, and there was no organisation in existence capable of dealing adequately with the situation immediately. The British, American, and other foreign colonies hurriedly organised relief committees; and, of course, the French authorities, as officially responsible for the refugees, are doing their utmost to cope with the situation. The call came so suddenly, however, and local resources were so defective from every point of view, that outside help is absolutely essential, if the barest assistance dictated by the most elementary principles of humanity is to be given. Imagine eleven thousand people herded together, regardless of age and sex, in one steamer of moderate tonnage, and kept there for two weeks without food or fresh water. A very large proportion of the refugees are women and children, and their sufferings have been heartrending. As to the reality of the terror from which these unhappy people have fled, let there be no doubt. Soviet Russia is no place for women, for any woman is at the disposal of the local commissar at any time and at any place, under no matter what conditions. This is not a legend, but fact for which there exists undeniable proof.

**Anatolia.**

According to the latest reports from the eastern front, the Armenians have recommenced hostilities, and have succeeded in reoccupying Alexandropol; but too much importance should not be attached to this information. If the Armenians had been in a position to maintain a successful resistance, they would never have yielded Kars, nor would they have concluded the armistice with Kiazim Karabekir. Doubtless in the interval they may have received fresh supplies of war material, and thus have been enabled to make one more desperate endeavour to re-establish the situation in their favour. It is also true that the Soviet Government has declared its neutrality with regard to the conflict, but it is impossible to attach the slightest value to the declarations of the Soviet Government. By its acts alone can it be judged, and there is every reason to believe, in spite of official assurances, that Moscow and Angora are in agreement in regard to Armenia. It is perhaps better to wait a little longer before coming

Digitized by Google

to a definite conclusion in the matter; for it is just possible that the Soviets intend to show Anatolia precisely what Bolshevism means, and are utilising the Armenians to exhaust the Turkish forces in the east, as a preliminary.

## CYPRUS.

CYPRUS, November 6.

**The Late King Alexander.**

Two matters absorb public attention—the death of King Alexander and the decision of the British Government to retain the island. On receipt of the news of the King's death on the night of October 29 by the Hellenic Consul-General, M. Artemis, it was conveyed by him to the Officer Administering the Government, who immediately expressed his deep regret through the Chief Secretary in person, and directed that flags should be flown at half-mast. Bells were tolled, and there has been general sorrow over the sad fate of the young King, who had quite won the esteem of the Greek people, and for whose recovery prayers had been offered in Greek churches at Nicosia by direction of the acting Archbishop.

**The British Decision.**

The decision of the British Government was announced by telegram to the Bishop of Papho by the Archbishop and two members of the deputation in London. At Nicosia a meeting was convened at the Archbishop's palace, at which Kleopas, the Abbot of Kykkou, presided. It was addressed by the Abbot, M. Severis, M.L.C., the Mayor, M. Liassides, and others. A resolution was passed protesting against the decision, and stating that "the people of Cyprus" would continue, by every lawful means and at every sacrifice, the struggle until their national aspirations were fulfilled. Copies were sent to the Officer Administrating, and the Secretary of State to the Colonies, signed by the Abbot. Meetings denouncing the decision have been held in some of the chief towns. Nowhere has there been any appreciation of the outlook, and never in Cyprus has the group of political agitators regarded its claim except from a purely insular point of view, without an endeavour to see it in its proper perspective. There has been a "one and only" solution of a "question" created by itself, viz., union with Greece.

**Vine Disease.**

The fear that Phylloxera had appeared in some Papho vineyards has happily proved to be unfounded. The disease is pronounced by an inspector of the Agricultural Department to be *Peronospera viticola*. Should this be the case it will be new to Cyprus. So far only two pests have caused any serious injury to island vines, the worst and most wide-spread being an *oidium*, or mould, imported into Europe from America some eighty years ago. The other is a small lepidopterous parasite, the *Procris ampelophaga*. Measures are being taken to spray the affected vines with a solution containing sulphur and sulphate of copper.

**General News.**

The High Commissioner left Cyprus on October 27. The Acting Officers have taken up their duties in their respective departments and in the Executive Council.

Mr. A. Mavrogordato is retiring after over forty years' service in the financial department and on various other duties.

The Bishop of Papho, who has been acting for the Archbishop, is leaving on a visit to Egypt at first opportunity.

The "Aid Committee" has remitted £340 to the deputation in London.

### ALBANIANS AT TIRANA.

TO THE EDITOR OF "THE NEAR EAST."

Sir, The following telegram has been sent by the Albanian refugees at Tirana to Mr. Lloyd George:—

We, thirty-five thousand inhabitants of the Dibra district, flying from death and the persecution of the Serbs, who have destroyed our homes and possessions, have come to Tirana, where we are completely destitute and homeless. We appeal to the humanitarian feelings of the British people to persuade the Yugoslav Government to evacuate the Dibra region, which is part of the Albania of 1913, thus saving us from death, famine, sickness, and other privations by allowing us to return to our homes.

It is signed by the Mufti and other notables. The American Red Cross and a member of the Anglo-Albanian Society who has lately returned from Tirana both confirm the above facts. The refugees are in wretched condition. Funds for their relief will be accepted and administered by the American Red Cross if addressed for that purpose to Dr. Emerson, the American Red Cross, 2, Place de Rivoli, Paris.—I am, etc., M. E. DURHAM

(Hon. Sec., Anglo-Albanian Society).

December 3.

### THE OCCUPATION OF THRACE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I have at last got from Athens the copy of the *Messager d'Athenes* with reference to the information which appeared in THE NEAR EAST of July 8, as regards the visit of the Bulgarian Pressmen to the Thracian refugees at Mustafa.

This information caused a controversy by a "Bulgarian in England" and others; in fact, I have been accused as having "fabricated fallacious quotations in a most unscrupulous way," and I was further challenged to produce the copy with the information in question which, it is alleged, has been repudiated by the Sophian *Zora* of July 31.

Your anonymous correspondent will probably agree with me that you are the better qualified person to act as the arbitrator in our difference. I therefore forward to you the copy of the *Messager d'Athenes*, and, I am sure, my Bulgarian opponent will now acknowledge that I, personally, had nothing to do with the regrettable misquotation committed by the *Messager d'Athenes*. I, on my part, most sincerely regret that I omitted to mention the source of the information which I sent to your esteemed journal. This would have saved much trouble at a time when Greek and Bulgar ought to understand one another.—I am, etc.,

THEODORE D. MOSCONA.

32, Oxford Street, Manchester.
November 24, 1920.

The following is the paragraph from *Le Messager d'Athenes* to which M. Moscona refers:—

*Les Bulgares dementis par eux-mêmes.*

On mande de Sophia: Le *Zora* vient fort à propos répondre aux doléances du gouvernement bulgare sur les populations bulgares que l'occupation grecque de la Thrace contraint à l'exil.

D'apres le *Zora* ces infortunées populations arrachées du sol natal sont tout simplement des Bulgares, de Bulgarie qui s'installèrent en Thrace après les guerres balkaniques. Voici ce qu'écrit le journal dans son numéro du 3 juin n.s.

L'Association des journalistes bulgares a visité, en compagnie de journalistes étrangers, à Moustapha pacha les Bulgares rentrant de la Thrace où ils s'étaient installés depuis 1913 et que la presse bulgare appelle les réfugiés de Thrace. Parmi les journalistes étrangers se trouvent M. Zigris, correspondant de la *Gazette de Lausanne*.

Des phonographes et des opérateurs de cinéma avient été conviés à suivre l'expédition.

[M. Moscona has clearly exculpated himself from the charge to which he, very naturally, objects, of "fabricating" quotations. This correspondence is now closed.—ED.]

### A TURKISH DISH.

TO THE EDITOR OF "THE NEAR EAST."

SIR,—The explanations that have been given are all very good, but I think the following one is the most authentic. I had it from an old Turk in the City of Dervishes, Konia (Iconium), the most central and the most bigoted city of Asiatic Turkey. The ingredients of the dish are correctly given by my friend Mr. Alfred Silley, but he should have added—plenty and plenty of olive oil:—

An Imam partook of this dish at a friend's house, and found it so much to his taste that, on his return home, he at once instructed his wife in its preparation, and ordered that it should be served to him every day. "But," remarked his wife, "a great quantity of oil will be required." "Be at ease, wife, you will have enough to-morrow to last for a long time." The Imam next day bought a large quantity of oil at a great sacrifice to his purse. A few days later the Imam missed his dish, and angrily demanded the reason, to be informed that the large quantity of oil was exhausted! On this the Imam fainted (baïldi).

Gourmets inclined to jealousy ascribe the fainting fit to the over-burdening of the stomach.

As regards garlic, the Turks are not particularly fond of it, but have the greatest respect for it. The moment the roof is built over a new house a string of garlic, with an old shoe, is hung from the most prominent eave of it—to keep off the evil eye.—I am, etc., P. M. MATTHEKEFF.

Sofia, November 11, 1920.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

## I.—TYPHUS IN SERBIA.

While it was a matter of common knowledge during the war that typhus was prevalent in Serbia, and that its possible spread to our Army in Macedonia was one of the unpleasant contingencies for which the medical administration had ever to be prepared, few were aware that the epidemics of typhus and of relapsing fever which swept simultaneously through Serbia in the first six months of 1915 surpassed in severity any recorded in the history of the past century. That these epidemics were checked before they had wiped out the army and general population of Serbia redounds greatly to the credit of the small medical mission sent out from England early in 1915, in response to the urgent appeal of the Serbian Government, and the record of its work, set out in the paper read by Colonel Hunter, its distinguished head, before the Section of Epidemiology and State Medicine of the Royal Society of Medicine, and now published in book form, is one that can hardly be bettered by any organised body of medical men called upon to fight disease during the great war. For a work of the kind it is surprisingly free from technicalities calculated to render it unintelligible to the ordinary reader, and it consequently deserves the attention of a far wider public than that to which it was primarily addressed.

Typhus and relapsing fever are both essentially preventive diseases, and their presence in a community under normal conditions is tantamount to a denial of its right to claim the attainment of a high standard of civilisation; but from time immemorial they have followed in the track of armies, and together with enteric fever and cholera have always to be reckoned with by the organisers of the dreadful business of war. The mere fact that after the greatest war the world has ever known, involving the employment of armies aggregating many millions of soldiers, creating the maximum amount of disturbance in the lives of the communities involved in it, and protracted over a period of four years, no great devastating outbreak of epidemic disease has swept over the afflicted countries speaks volumes for the amazing progress made in the science of sanitation and preventive medicine in recent years. Who "won the war"? is a question which is likely to be debated furiously by all the nations who took part in it for many years to come, and it is too much to hope that an answer satisfactory to all of them will ever be given to the question; but one is inclined to think that when in future years it is asked why this war was not succeeded by a universal epidemic, the credit for the happy escape of humanity from this crowning horror will be divided pretty equally between the twin sciences of preventive medicine and bacteriology. When Serbia appealed to England for help in combating the fearful epidemic which broke out in 1915, as a result mainly of the utter incompetence of the sanitary administration of the invading Austrian armies, her Government thought of doctors, nurses, hospitals, medical stores—the question of treating the victims of the epidemic being uppermost in their minds. In a few weeks the problem was recognised in quite another aspect, and to their quick appreciation of the great truth made clear to them by Colonel Hunter and his colleagues, that epidemic disease can only be stamped out at its source, must be largely ascribed the success of the anti-typhus campaign in Serbia in 1915. Space does not admit of the many interesting facts in connection with this episode in the great war brought to light in Colonel Hunter's work being dealt with in the space of this short review, but in view of the enormous importance to the future of the countries of the Near East of improving the sanitary standard of the population in all of them, the methods by which a fearful epidemic was checked in 1915 by a handful of practical scientists deserves to be very closely studied by all who have the interests of these countries at heart.

## II.—ROUND ABOUT EGYPT.

A leisure hour may be whiled away over this little collection of humorous rambles; and if they raise a laugh which will "add something to our fragment of life," the author's modest aim will be satisfied. Taking us to the Nile Valley, he gives us glimpses of hotel and desert life, "born in sunny hours"—sometimes perhaps too sunny: for he finds that ten hours a day of pitiless Egyptian sunshine makes one long for a gulp of crisp, cutting breezes, and sigh for the very weather "which you curse at home." The gorgeous sunsets seem artificial, and are labelled as "arranged and produced by Imre Kiralfy." As to the native types, the principal difference between Kopts and Moslems is that "the former are not compelled to abstain from whisky." The Arab is not an abandoned liar, but "feels that an elaborate lie is worth a dozen simple truths." He is what ages of tyranny have made him; but we cannot agree that "no one has a kind word to say" of the Egyptian.

At Luxor the author takes part in an exciting donkey race on a "white moke, Rameses the Great," and, what is more, proves that magic is not dead in the land of miracles. For, while playing twilight golf in view of the Dashour pyramids, he is startled by the apparition of the great Thothmes III., whose "withered skin creaked like the stretching of brown paper." He enters into the spirit of the game. He grasps the author's driving mashie, and "gathering himself into a furious whirl of dry bones and yellow linen thirty centuries old, he brought down the iron with a crash"; but with the impact of the blow the mighty Pharaoh crumbles into a heap of mouldering dust. As a sportsman at home, Mr. Horsley gives us amusing sketches of trout-fishing, and of the dragging of a one-fish pond.

## III.—ADVENTURES BY SEA AND LAND.

Although written in the form of an autobiography, this is not an account of the author's own experiences, but of those of a great friend. To put himself so completely in the place of another—and not an imaginary—person, seems a curious and difficult undertaking. Indeed, the author himself acknowledges this in his note, but he is absolutely justified by the eminently successful result. The hero of this story ran away to sea when he was fifteen, and from that time led a wonderfully exciting life. There are twenty-three chapters in this volume, and they are all filled with accounts of actual adventures—the periods when nothing out of the way was happening are passed over with a few words. First of all we have the boy's life at sea—it is, of course, in the days of sailing ships—and some splendidly thrilling adventures. Sometimes it seems rather that we have strayed by mistake into the realms of Stevenson or Conrad. After some years of this life the young man made his way to India, and there is an amusing incident recorded of his attempt to begin his career on land as the guard of a train. Very soon he joined the then newly-formed Indian Police as assistant-superintendent, and there are many exciting stories of the detective variety, and some good tales of big game shooting. The picture of India in the years immediately after the Mutiny is very interesting. After this we follow the experiences of Mr. Gouldsbury's friend as he worked his way up from the post of assistant-superintendent of gaols to inspector-general of gaols, until the last chapter when he just escapes a violent death by a magnificent piece of bluff. It will be seen from this short summary that Mr. Gouldsbury may well use the sub-title "A Career of Adventure," and no one could read the book without sometimes holding his breath with excitement, nor without being carried along by the spirit that inspires it. There are tragic and gruesome adventures, and there are gay, lighthearted adventures, and through them all we feel that undismayed courage and determination in the face of all difficulties which make the unconquerable spirit of man so much the most wonderful of all created things. Mr. Gouldsbury's great gift of being able to tell a story vividly and so as to hold the reader's attention all the time has enabled him to express in a splendid way his friendship for one who must indeed have been worth having for a friend.

## IV.—AN EASTERN POET-PHILOSOPHER.

For more than 3,000 years the relations between human individuality and external matter have been the subject of strenuous debate. Hindu philosophers arrived at the conclusion that everything except the Absolute is illusion. Buddha crystallised their concepts into the injunction "Kill desire, and live only to accumulate merit which will be of service in future re-births." Building on foundations laid by that great Reformer the Sufis of Persia elaborated a creed of quietism and self-negation. Baha 'Ulla strove to neutralise its static influence by proclaiming that salvation may be attained by ethical conduct. But the goal of all Oriental philosophy is absorption in an unknowable entity, diversely styled God, the Divine Essence and the Universal Soul.

"Om Mani Padmi Om,
The dewdrop slips into a glittering sea."

A school has arisen in the Middle East which rebels against the pantheism and the arid self-renunciation inculcated by its predecessors. Inspired by the dynamic force of Western thought, it proclaims self-development as a means of attaining Godhead. Sheikh Muhammad Iqbal of Lahore is a protagonist in this movement. Although Urdu is his mother tongue, he has clothed his philosophy in flowing Persian verse, which abounds in quaint conceits, cryptic utterances, and allusions which are utterly beyond the ken of a European reader. Dr. Reynold Nicholson, who teaches Persian at Cambridge, admits that the translator's task is one of unusual difficulty, but a key to Muhammad Iqbal's system is given by Muhammad Shafi, quoted *in extenso* in the Introduction.

Our author regards the universe as an association of individuals, but it is not yet a co-ordinated whole. Creation is still in progress, and man may take his share therein by helping to bring order out of chaos. Man's true ideal is not the negation, but the vigorous assertion of his individuality. He attains it by becoming increasingly unique, and drawing nearer to God, who is the most unique Individual. He is not ultimately absorbed into God, rather will he absorb God into himself. Self-dependence is the goal of education; love, meaning a desire to assimilate, strengthens the Ego, while dependence on others weakens it. The process of self-development involves three phases—obedience to God's law, self-control, and divine vicegerency. In Muhammad Iqbal's eyes the evolution of humanity will culminate in a democracy of unique individuals, governed by the most unique of all. Here we note the far-reaching influence of Nietzsche, who cherished the same vision of an ideally perfect race. But his outlook was blurred by atheism and aristocratic prejudice. Abhorring the "rule of the herd," he proclaimed an ultimate dictatorship of supermen, who would emancipate themselves from the so-called Moral Law. Widely different is Muhammad Iqbal's Kingdom of God on Earth. Nor does he use the word "democracy" in the sense with which we are all familiar. For the democracies of Europe and America originated in the extension of economic opportunity, and are haunted by the spectre of anarchism, while the Democracy of Islam

is a spiritual principle based on the assumption that every human being is a centre of latent power, the possibilities of which may be developed by cultivating a certain type of character. Out of this plebeian material Islam has formed men of the noblest type. Is not, then, the Democracy of early Islam an experimental refutation of the ideas of Nietzsche?

Albeit that he has drunk deeply from the well-springs of Plato, Hegel, Nietzsche, and Bergson, Muhammad Iqbal remains a follower of the Prophet. His ideal is a Pan-Islamism which will adapt itself to modern conditions, and find expression through the sword. The theories of this poet-philosopher are rapidly gaining ground throughout the Middle East, and must be reckoned with by statesmen on whom devolves the almost superhuman task of guiding its destinies.

F. H. S.

## V.—A BIBLICAL PLAY.

In this volume are contained "Absalom," a tragedy; "The Sham Hero," a comedy; a "Prologue to an Unwritten Drama," and eight "Poems." The author is a Japanese, and these works have been translated, with the assistance of H. M. Sainsbury, from his native language; but his work is remarkable in the complete absence, at any rate in the two plays, of the effort of translation. The English, in fact, is excellent.

There are considerable merits in "Absalom," which is founded upon but differs materially from the Biblical record. It is a very powerful tragedy (its acting rights incidentally and significantly are reserved by Mr. Martin Harvey), with colour, movement, and conviction. The chief characters are Absalom, who is made a hero deserving of pity, Abishag the Shunammite, and Ahitophel, here the father of Uriah. There are a prologue and three acts, taking place respectively in a chamber in the King's house in Geshu, on the level roof of Abishag's house on a little hill near Jerusalem, in a stone-built hall in the royal house of Hebron, and in Absalom's tent in a mountain pass near Mahanaim. The author has admirably demonstrated the sequence of events and the psychology of the agents; and the outline of the whole is both strong and clear. This piece would, we imagine, make an even better stage-play than it reads.

"The Sham Hero," which is described as "a comedy for marionettes," has for scene Antioch. It is a simple tale of love, in which one knight attempts, by merely stealing his brother knight's armour, to capture both his virtues and the love of the lady Callista. Though without the strong and unusual writing which makes "Absalom" so fine a play, it is both amusing and convincing, and suggests, like the first play, a certain amount of local colour.

The remaining things in the book are indifferent, and do not reveal the fact that the author is a poet. He appears to be able to get the heart of the matter more easily than the form, and his management of the free verse form is even more clumsy and spasmodic than is that of the majority of his compeers in this mode. But we have little doubt that he is a playwright to be considered.

## VI.—A FABLE RE-TOLD.

Here is the old story of Arachne very delicately told in the form of a play. Miss Phillpotts has conserved perfectly the essence of the fable, and the characters of her own invention are quite proper to its spirit. There is indeed not much to make of Arachne, for apart from the fact that she challenged Athena in her art of spinning and for her impudence was changed into a spider, little is known of her. But of this Lydian story the authoress has made a very tender play, with passions half-human and half-fairy. The choice wistfulness of it is beautifully feminine, the conception thoroughly poetical. We would not be so rash as to say that she has written poetry, but her mood is genuine and her inspiration at least select. The play is most tastefully produced, and it contains some excellently apt decorations by Miss Doris M. Palmer. It is cheap, and would make an admirable present.

## BOOKS RECEIVED.

"How to Identify Persian Rugs." By C. J. Delabère May. (London: G. Bell and Sons, Ltd. 6s. net.)

Commercial Directory: Baghdad-Basrah, 1920. (London: Department of Overseas Trade. Baghdad: Government Press.)

## "THE GREAT THACKERAY CLAN."

Our Reviewer writes:—

A word of apology is due to the author and the publisher of "The Ritchies in India" for a sentence in your review implying that the book contained no pedigree of the great clan with whose doings it is concerned. When I wrote that sentence I had perused the book as far as the map lying beyond the index, and I thought I had reached the end, but this evening I happened to drop the book, and some feet of pedigree unrolled themselves from behind the map, where they had been secured by an extra touch of the binder's paste—a pedigree large enough to satisfy the most exigent reader.

In January the firm of Marlborough is adding two more books to their "Self-Taught Series." These are to be "Serbo-Croatian Self Taught" by the natural method with phonetic pronunciation, by J. J. R. O'Beirne; and "Gujerati Self Taught," by N. M. Dhruva, Grasia College, Gondal (Kathiawar), India.

# MUSICAL NOTES.

### A Serbian Violinist and Others.

It is rather surprising that the qualities which one usually gets in Yugoslav fiddlers—dash, fire, a brooding depth and so on—are not those in which M. Zlatko Balokovitch, who gave a recital at the Wigmore Hall on December 1, is pre-eminent. His chief merit lies in an all-round soundness, a virtue which two of his compatriots in this country, M. Miro Shlik and M. Bratza can in no wise be said to possess. Sound is the adjective which must be applied to his playing of Dunhill's Sonata in F major (Op. 50), and again to Mozart's concerto in D major. It is quite possible that the impression created would have been greater had not the playing of his accompanist, M. Ljudevit Kraus, been so wooden and so entirely without poetry. M. Balokovitch was at his best, and it was a very good best, in a Dvorak dance; but even his keenly spirited interpretation of two Sevcik things, "Bretislav" and "Holka Modrooka," could not make them sound of much moment. But to know this Balkan fiddler as he really is one should go to the Wigmore Hall on December 15, for then he is playing a Sonata written by Countess Dora Peyacsevitch (dedicated to himself by the way), and also a sonata by the Roumanian composer, Stan Golestan.

There is an uncommon refinement in the playing of M. Paul Kochanski, the Polish violinist. Such vulgarities as artificial emotion, forced tone, or uncontrolled fervour, never are found in his playing. But he was unwise in choosing M. Arthur Rubinstein to partner him in a sonata recital at the Wigmore Hall on December 2. For though at times the artistry of the two was mated, on the whole the balance was bad, owing to the forgetting by the pianist of the fact that he was not a solo artist. When M. Rubinstein did show restraint, as in the third movement of Bach's Sonata in E major, or in the Scherzo of Beethoven's in C minor (Op. 30), the *ensemble* was excellent, and we heard some fine playing; but for the most part he was far too noisy and exuberant, and the exquisite art that is in M. Kochanski was overshadowed.

I always feel that it is a rather damning thing to say that an artist shows promise, but in these days when so many of all sorts come forward, it really must be said occasionally. Certainly, it is true of Miss Gladys Clark, who gave a violin recital at the Wigmore Hall on December 1. There were technical faults in her playing of Brahms' Sonata in G major, and she offended against the golden rule with Brahms that he must be broad, but she did prove that she has both character and temperament. Her thinness of tone decreased in the "Larghetto" of Handel-Huhay, and she was very pleasing in a minuet of Handel, but the causes that prompted her to proceed with a vague, purposeless, and somewhat shapeless "Poem" of Mr. G. O'Connor-Howes (who was her excellent accompanist) are mysterious. Nevertheless, she is an interesting player, who, at least in interpretation, uses her brains.

### The Carl Rosa Opera Company.

The temporary retirement from opera of Sir Thomas Beecham is a tragic event, for there is no one else capable of producing what all musicians wish—opera in London all the year round. But the Carl Rosa Company, which began a four weeks' season at Covent Garden on November 22, though not aiming so high, is doing great service in the cause of opera throughout England. In the present season they are giving fourteen operas, and from most accounts they appear to be maintaining a good working standard. So far I have been to but one—Wolf-Ferrari's "Jewels of the Madonna"—which was performed on December 3. In this work, which is not an excellent one, the disadvantages of singing in English were more obvious than is usual, for the awkwardness of *parlando* English is very great. Moreover, the juxtaposition of absolutely opposite styles, particularly the sacred and profane, produces such a medley of incongruities that any attempt at unity of feeling is impossible. It is possible, therefore, to admire this work only in its details, but, that said, little but praise can be given to the rattlingly good orchestration of the Neapolitan folk-songs which Ferrari has selected. In this presentation the staging and externals generally were good, but the choruses rather lacked spirit, and the enunciation of the principals (Miss Beatrice Miranda, as Maliella, Mr. William Boland as Gennaro, and Mr. Hebden Foster as Rafaele) was scarcely comforting. However, one is grateful in this difficult country for what opera one can get.

### Miss Gertrude Blomfield.

At Miss Gertrude Blomfield's concert at the Wigmore Hall on November there was a shining array of talent, which, though very pleasing in itself, scarcely seemed to make her own reputation more secure. To hear that fine 'cellist, Mr. Felix Salmond, and that excellent pianist, Mr. Harold Craxton, in Rachmaninoff's Sonata in G minor was a splendid experience; to listen to the pure playing of Mr. Craxton in Purcell and Arne, as revised by himself, was again an unalloyed joy; and to incline one ear towards the mighty Signor Corrado in Stradella, Verdi, and Umberto Giordano, was very good; but one felt that Miss Blomfield's part was too small. She has a pleasing voice, of breadth, though of no great depth, and she sings the English language, at any rate, very well. One sees more and more, however, that Purcell's "Dido's Lament" is really only for the bigger singers, and something like the same is true even of Bridge's "Love Went A-Riding," while half the beauty of Ireland's "The Adoration" lies in the exquisite sequence of the words of Arthur Symons, which must be repeated absolutely correctly (Miss Blomfield unfortunately got the first verse all wrong) if they are not to seem decadent. In duets with Signor Corrado, by Mendelssohn and Mozart, the blend of the two voices was quite surprisingly good, though Miss Blomfield's German is not so good as her English or Italian.

### The London Choral Society.

This society has many good things to its credit, but its performance of Elgar's "Dream of Gerontius" at the Queen's Hall on December 1 cannot be recorded as one of them. The presentation was, in fact, a big disappointment, and one thing alone—the singing of Miss Olga Haley—relieved it from the reproach of being thoroughly plebeian. The conductor (Mr. Arthur Fagge) is dull, prosaic, and too easily contented; the orchestra, a fine contingent from the London Symphony Orchestra, was allowed far too much rope; the choir had been insufficiently disciplined, and had, moreover, poor tone and execrable enunciation; and of the solo artists in this most Catholic of works Mr. John Adams sang like a mild Dissenter and Mr. Robert Radford like an irreverent pagan. The choral singing was badly managed; in those fierce passages where the chorus are representing demons, and in which they appeared to have most varied and contradictory ideas of *staccato* singing, it was indeed devilishly bad. In all this untidy performance there was but one consolation—the chaste and psychologically sound singing of Miss Haley. It is in capturing the mood of Cardinal Newman's poem that the greatness of "The Dream of Gerontius" lies, for Elgar has not succeeded perfectly in presenting all the details ("Softly and gently, dearly-ransomed soul" is an example of this failure), and it was precisely in their inability to realise the essential religious atmosphere of the work that the biggest demerits of the choir lay. A few details were well done, a few climaxes excellently secured, but these were as nothing when the guiding thread was lost.

### Miss Winifred Christie.

In those dim days before the war, Miss Winifred Christie had, I believe, a big reputation as a pianist, and she has recently returned from America to prove that she can sustain it. At the Queen's Hall on December 3 she gave an orchestral concert with Mr. Hamilton Harty conducting the London Symphony Orchestra. It is little detraction to her to say that the main interest lay in Mr. Harty, for after he had commenced the concert with Berlioz's "Beatrice and Benedict," one could not expect better things. Mr. Harty undoubtedly has a *flair* for Berlioz, in whom his genius seems to shine most splendidly. In Beethoven's fourth Concerto Miss Christie showed some neat phrasing, but was a little too unrhythmical in her climaxes, but she was very satisfying in Franck's excellent "Les Djinns"; and the sparkling brilliance of her technique in Liszt's first concerto was a joy.

### The London Chamber Concert Society.

The autumn series of the concerts organised by the London Chamber Concert Society at the Wigmore Hall came to an end on November 30, but it is good to know that another series is to begin next April. At this concert the standard was scarcely maintained. Elgar's beautiful Quartet, Schubert's Quintet (Op. 163), and a Sonata for Violoncello and Pianoforte by Jean Huré were the things performed. It is invidious to say which quartet best interprets Elgar, but certainly it was not this one, which was composed of Miss Marjorie Hayward, Mr. E. Virgo, Mr. Frank Bridge, and Mr. Felix Salmond. Miss Hayward, the leader, has many excellent qualities, but she was too impetuous for Elgar, the playing of whom must have the appearance of spontaneous impulse; and the fervent methods of Mr. Felix Salmond, who was new to this combination (and was also sitting in an outside position), did not blend with those of the rest of the quartet. But matters were very much better in the Schubert, for, apart from some imperfect intonation, the whole was played with a gusto and finish that were utterly delightful. Huré's Sonata, a thin, trivial, pretty thing, seemed out of place at this concert, worthily played though it was by Mr. Salmond and Mr. Craxton, for it has mortality written all over it.

ANDANTE.

## PERSONAL AND GENERAL.

**TO-DAY.**

December 9 (New Style).
November 26 (Old Style).
Rabia I. 28, 1339 A.H. of the Moslem Calendar Kislev 28, 5681, of the Jewish Calendar.

Mr. Charles Woods left Sofia on November 25 for Bucharest.

Lieut.-General Sir Frederick and Lady McCracken have arrived at the Hôtel St. George, Algiers.

Lord and Lady Carnarvon and their daughter, Lady Evelyn Herbert, are going to Egypt shortly.

Colonel Arion returned to London last week from Japan and visited Prince Nicholas of Roumania at Eton.

The Duke of Roxburghe, whose brother married lately Miss José Collins (the daughter of the late Lottie Collins), is going to Cairo early in January.

Lieut.-General Sir Henry Wilson had on December 3 the honour of being received by the King upon relinquishing his appointment as General Officer Commanding Allied Corps, Turkey-in-Europe.

The British Government has forwarded an expression of its thanks on behalf of the nation to Admiral Sir John de Robeck for his distinguished services as British Commissioner at Constantinople.

Major-General Sir Fabian Ware, Vice-Chairman of the Imperial War Graves Commission, is on a tour of inspection through the Eastern war theatres in connection with the cemeteries to be constructed.

Prince Zeid, youngest son of the King of the Hejaz, left Cairo for Mecca on November 20, accompanied by Emir Jamil, Sheikh Abdelmalek el Khatib (the Hejaz representative in Egypt), and his A.D.C.'s.

M. Mitilineff (the Roumanian Minister to The Hague), Mme. Mitilineff, Mlle. Mitilineff (accompanied by M. Boeresco, Minister Plenipotentiary and Roumanian Chargé d'Affaires) visited the House of Commons last week. The Roumanian Minister to The Hague left London on December 2 for Paris.

M. Boeresco, Minister Plenipotentiary and Chargé d'Affaires of the Roumanian Legation, gave a luncheon last week at which the guests included Albertha Marchioness of Blandford, the Earl of Munster, Countess Percy, the Roumanian Minister to The Hague and Mme. Mitilineff.

Our Bucharest Correspondent writes (November 22):—

Dr. Seton Watson is now in Bucharest. He will go into Transylvania to study the present situation there, after which he will proceed to Prague.

The well-known Russian author Simion Yuskevici has arrived in Bucharest, and after a short stay will continue his journey to America. In Russia he is classed with Gorki and Andreev.

**OUTFITS** FOR EGYPT, INDIA, AND THE FAR EAST.

Gentlemen visiting the East this Winter can be supplied with suitable clothing and the necessary equipment for travel, camp, or bungalow, at short notice.

*List "H" giving full particulars and prices by return on application.*

Kit renewals required by officials returning from leave, and complete outfits for those newly appointed, at moderate cost.

**THRESHER & GLENNY,**
*INDIAN & TROPICAL OUTFITTERS,*
**152 & 153, STRAND, LONDON, W.C.**

## THE ROYAL VISIT TO INDIA.

The programme for the visit of the Duke of Connaught to Delhi has been arranged as follows:

February 7.—Inauguration of the Chamber of Princes and formal reception of Princes.

February 9.—Inauguration of the Council of State and Imperial Legislative Assembly. A State banquet.

February 10.—Presentation of St. John Ambulance Corps badges. Laying of the foundation-stone of the All-India War Memorial on the site of the new city.

February 11.—A State ball.

February 12.—Laying of the foundation-stone of the Legislative Chamber in new Delhi. A military garden party.

February 14.—Garden party in the fort, with illuminations of fireworks.

February 15.—Private departure.

## APPOINTMENTS, ETC.

Mr. Addison E. Southard, American Consul, Aden, has been transferred to the American Consulate at Jerusalem.

The appointment of Major-General Sir G. M. Kirkpatrick, K.C.B., K.C.S.I., to be General Officer Commanding the Forces in China, in succession to Major-General F. Ventris, C.B. (retired pay), has been gazetted, dating as from November 20.

The King has approved the appointment of General Sir G. F. Milne, G.C.M.G., K.C.B., D.S.O., to be Lieutenant of the Tower of London, in succession to Lieutenant-General the Earl of Cavan, K.P., G.C.M.G., K.C.B., M.V.O., who has vacated the appointment.

The King has approved of the appointment of Brigadier-General Herbert E. Blumberg, C.B., Royal Marine Light Infantry, to be Adjutant-General, Royal Marines, *vice* the late Major-General Gunning M. Campbell, C.B., A.D.C., to date November 30, 1920. General Blumberg was from July, 1918, G.O.C. in the Ægean Islands and Military Governor of Lemnos, Tenedos, and Imbros.

## OBITUARY.

The death has occurred of Mr. Thomas William Rolleston, who, though best known as an Irish publicist, also did excellent work in helping Mr. Laurence Binyon, Mr. E. B. Havell, Mr. Rothenstein, and Dr. T. W. Arnold to found the India Society, a society which has done much for Indian art and literature.

## ROUMANIAN LIFE AND LANGUAGE.

Lecturing at King's College, London, on December 2, M. Beza said that long before the arrival of the Turks the Roumanians had to form the first guard at the gate of Europe. Tribe after tribe sought its way through Bessarabia or the Dobruja; some disappeared, but others remained, or left deep traces of their influence. Among these were the Slavs, whose language for a long time occupied in Roumania a position similar to that of Norman French in England during the eleventh and twelfth centuries. Slavonian was the sacred language, and even after it had disappeared its characters were used for printing Roumanian, a practice which continued until the middle of the nineteenth century. There were a good many Slavonic words in Roumanian still, but a language was classified chiefly according to its structure. Besides this, most of the words in frequent use, expressing fundamental ideas in life, were from the Latin. The most characteristic feature of Roumania was the peasant, hard-working and simple, dressed in white linen or sheepskin. The peasant would rarely affirm anything confidently—"Perhaps it might be so" was a very common expression. This was because in the past everything had made him suspicious. Some popular proverbs were: "Justice is as the rulers make it," "Thieves increase with the making of new laws," "Thieves nowadays are not in forests but in offices," "The man who goes to law often loses an ox to win a cat." As regards religion, one found in the Roumanian peasant a curious blending of creeds and superstition. Christianity had come to the country through the medium of many heretical sects. Among these were the Bogomils, who taught a sort of dualism; a proverb which showed the effect of their teaching on the peasant's mind ran: "God is great, but the devil is clever." Some proverbs about woman were as follows: "Even the devil cannot escape a woman," "A woman's petticoat is the devil's binder," and "Woman turned the devil's hair white." Roumania was a country which had other interests for us besides its oilfields, its commercial opportunities, and its politicians.

The Principal of King's College, who presided, said that if he was not mistaken the same idea was at the base of the Bogomil teaching as at that of the Albigensian heresy; it was that of two powers, good and evil, engaged in continual struggle. In Southern France the Albigensian heresy had been persecuted out of existence in one of the bloodiest persecutions recorded in history; but in Roumania the Bogomils had been

Digitized by Google

tolerated. In the seventeenth century Transylvania was called the Holland of the East; Holland at that time was the most tolerant country of Western Europe.

M. Boerescu (the Roumanian Minister), in moving a vote of thanks, said that his Government would do everything possible to promote intellectual intercourse between that country and England. He had just received a letter to say that his Government had made the necessary arrangements to allow M. Beza to start next month a course of lectures at the Bucharest and Cluj Universities on the romantic periods of English literature, and he had himself obtained permission from the Vice-Chancellor of Oxford University for three Roumanian theological students to begin a course there next January.

## THE Y.M.C.A. IN CONSTANTINOPLE.

The need for maintaining Y.M.C.A. work among British troops in Constantinople is emphasised by a representative of the English National Council of Y.M.C.A.s who has just returned from a visit of inspection. In the opinion of a highly placed British officer this is no time for closing down or even reducing the Association's efforts. The centre of Y.M.C.A. work in the city is the Red Triangle Club on the Rue de Pera, the principal street in modern Constantinople. During the week ending November 13 this finely-equipped club and hostel was used by 1,463 British soldiers, besides hundreds of British and American sailors of the navy and mercantile marine, and Indian and Maltese troops—2,323 in all; 1,100 teas and suppers were served during the week, and 450 men attended the Y.M.C.A. cinema. At Mashlak, also, on the outskirts of the city, a valuable work is being done at the 20th Stationary Hospital, while on the other side of the Bosphorus work is still carried on at two camps on the Sea of Marmora—among Indian troops at Bostanjik and with a brigade of artillery stationed opposite the Island of Prinkipo.

## NEWS IN BRIEF.

The Alexandria flower show has been fixed for April 22, 23 and 24.

The International Danube Commission opened its third session at Vienna last week.

Lord Allenby has issued a proclamation ordering the liquidation of Austrian property in Egypt.

Dr. Ansari has been elected president of the Indian Moslem League, which is to meet at Nagpur in December.

A denial has been given in Belgrade to the report that the Serbian Government had not yet repatriated the Bulgarian prisoners of war.

Marshal Izzet Pasha, Minister of the Interior, and his mission left Constantinople last week for Bilejik, to negotiate with the Turkish Nationalists.

Excavations on the site of Volubilis, in Morocco, have revealed inscriptions dating from the reigns of the Gordian Emperors, 235-244 A.D., and also a number of sling-missiles.

The Maharaja of Jaipur has made a gift to the British Government of 3¼ lakhs of rupees (about £24,000), which were due to the State of Jaipur for extra expenditure incurred during the war.

According to the latest reports, the general elections in Yugoslavia for the Constituent Assembly have resulted as follows:—102 Radicals, 94 Democrats, 42 Communists, 51 Croatian Agrarians (Raditch Party), 33 Serb Agrarians, 25 Mohammedans, and 21 Catholic People's Party.

An Encyclical letter has been circulated by the Pope fixing December 21 and 28 for collections in aid of the children, not only of Central Europe, but of all the countries which have suffered through the war. The Pope has contributed 100,000 lire (about £1,050) to the "Save the Children Fund."

In connection with the formation of a Council of State for the administration of Mesopotamia, most cordial messages have been exchanged between Lord Chelmsford and the Nakeeb of Baghdad, in which the latter assures the Viceroy that with the British the Arab nations are striving towards the common end—peace.

News has been received in India from Turkestan that the Bolshevists have issued a proclamation there ordering all women to register themselves for national service. Moslem women have also been forcibly unveiled, and Bolshevist female orators are urging the women to desert their husbands unless they are given full liberties.

According to the *Journal*, Tangier was struck on November 27 by a huge waterspout. The ensuing floods burst open doors and dislodged pavements. Several houses collapsed. In the town itself three persons were killed by the falling of a wall, and in the surrounding country two children and several natives were drowned.

The Geneva correspondent of the *Morning Post* states that the new Greek Government contemplates sending to London as Chargé d'Affaires and successor to M. Caclamanos, M. Rangabé, who, he affirms, "was placed by M. Venizelos on the retired list for displaying too marked sympathies for the Constantinist régime and its German friends."

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers Companions, Secretaries, Governesses. Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

**EXETER**
**ROYAL CLARENCE HOTEL**
*(facing beautiful Cathedral).*

**LONDON**
**HOTEL CRANBOURN**
**67a, Shaftesbury Avenue, W.C.2.**
**Self Contained Suites.**

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
**SMEDLEY'S HYDRO.**

**TORQUAY**
**VICTORIA & ALBERT HOTEL.**

*Cairo's Hotels de Luxe.*
**SHEPHEARD'S HOTEL.**
Open all the year round.
**SEMIRAMIS HOTEL.**
Splendid position on the East Bank of the Nile.

**THE ONLY ENGLISH HOTELS IN ALEXANDRIA.**
Proprietor: AUGUSTUS VAN MILLINGEN.

## THE POWERS AND GREECE.

The Entente Powers were admittedly confronted with an embarrassing situation when Greece rejected M. Venizelos at the general election and left no room for doubt as to her wish to recall ex-King Constantine. There were two obvious courses of action open, supported respectively by the French and by the Italian Government: to veto the return of the ex-monarch or to do nothing. The British Government, as far as is known, had no definite views; but as a result of the conference in London the three Powers have agreed upon a compromise. Ex-King Constantine's return is not to be forcibly opposed; but the Greeks have been informed that his restoration to the Throne could only be regarded as a ratification by Greece of his hostile acts; and the communication added: "This step would create a new and unfavourable situation in the relations between Greece and the Allies, and in that case the three Governments reserve to themselves complete liberty in dealing with the situation thus created." The message was despatched to Greece in time for the plebiscite held on Sunday on the ex-King's recall. It was clearly the hope of the three Governments that the vague threat might influence the decision of the Greek people, and so extricate the Powers out of a dilemma which they could not, or dared not, face in a constructive, a generous, or a courageous spirit. Only subsequently was the Greek Government notified that the financial support hitherto given to Greece by Great Britain and France, in conjunction with the United States, whose share has already been handed over, is to be suspended. As far as the first message was concerned, the Greek people were left in the dark as to the pains and penalties to which they were exposing themselves at the hands of the Entente Powers in the event of their gratifying the national desire to see ex-King Constantine recalled. The course taken by the three Governments seems to us to be neither fair, dignified nor practical. It was unfair, because, reaching the Greeks at the eleventh hour, it afforded no clear indication of the form that the Allies' displeasure might assume, so as to admit of a reasoned choice; it was undignified, having regard to the relative positions of the three Powers and Greece, with or without King Constantine; and it certainly does not help to solve a difficult problem. We had hoped that the *amour propre* of the three Governments, to say nothing of their intelligence, would have saved them from placing themselves in a false position. The British Cabinet has sought to justify the Near Eastern settlement as being based on the definite policy of giving support to a strong Greece. On the strength of a single election it is prepared to denounce the Greece of its own creation, and to antagonise for all time the people it has favoured at the risk of offending millions of British subjects. Mr. Lloyd George, we are told, at a meeting of the Allied statesmen spoke as one inspired in his denunciation of ex-King Constantine. A more valuable, if more difficult, contribution to the discussion, we are inclined to think, would have been an attempt to suggest a consistent and harmonious policy for the Allies in the Near East.

By their plebiscite the Greeks have decided to stand or fall by King Constantine. The result was foreseen by M. Venizelos, and it would be imagined that the Allied Governments could have evolved a better plan of campaign than to indulge in vague threats against a people whom a few weeks previously they had flattered as the salt of the earth, or at least of the Near East. A more straightforward course of action would have been to admit the disillusionment caused by the Greek elections, and then to have examined *de novo* the whole situation with regard to Greece. If the Allies' favourite *protégé* in the Near East at the first available opportunity records its whole-hearted devotion to a Sovereign whose attitude and conduct during the war were held by the Allies to have been disloyal to them and to have caused them "great embarrassment and loss," it would seem to stand to reason that the Allies' estimate either of the Sovereign or of the *protégé* must have been at fault. If the former, an occasion presented itself of correcting a misunderstanding, and the Allies could have counted upon a loyal and united Greece; if, on the other hand, it could be shown that the Allies were ill-advised to take Thrace from the Bulgarians and Turks, and Smyrna from the Turks, then the only statesmanlike course to adopt would be to rescind or revise the mistaken treaties. It is difficult to see how the step taken by the three Governments satisfies either their intellect or their conscience, and they must be prepared for the widely-held belief that in regard to all Near Eastern affairs they have proved themselves to lack both. We hold no brief for King Constantine; but we do not think that Greece is being treated fairly by the Allied Powers. If the ex-monarch had to be recalled, it was a comparatively easy matter to enforce safeguards and to obtain guarantees for his good behaviour. By their present action the three Powers merely "put the backs up" of both King and people, leaving Greece's future policy to be prompted by pique rather than to be conceived in a broad-minded spirit for the good of the Near East as a whole. For, let there be no mistake, even if ex-King Constantine were to refuse to return to Greece, the resentment or worse will abide in the country.

As things are, the Allies have merely made a confused situation worse confounded. Having entrusted Greece with certain responsibilities in connection with the Treaty of Sèvres, they withdraw their confidence and support from her, but hesitate to revise the Treaty. This action is not calculated to make Mustapha Kemal more reasonable or to hasten the return to settled conditions in Turkey. If the additional folly of withholding the balance of the credits opened in Great Britain and France for the Greek Government is persisted in, one of the first consequences will be a fresh fall in the value of the drachma and further disabilities on Allied trade, chiefly on British trade, in the Levant. And what is the end in view? The Allied Governments apparently have none. If King Constantine and the Greek people suddenly acquire the disposition and attributes of archangels, it will make no difference to the Allied Powers. Such at least is the only possible inference to be drawn from the wisdom of the three Governments. King Constantine's crimes were wrought during the war, the Greek people's at the recent election. They can never expiate them, in the opinion of Mr. Lloyd George, M. Leygues, and Count Sforza. If these statesmen held other views, they would, at least, have waited until further offences had been committed, or would have threatened definite pains and penalties for such offences when committed or contemplated. The mistake has been not to distinguish between arbitrary action on the part of an ex-King expelled from his country and the deliberate choice of a people. It would seem to have been overlooked in the Council Chamber of Downing Street that the very wrekin has echoed with the dogma of self-determination, and that the self-same wiseacres, having decreed that neither they nor the Greeks must have anything to do with ex-King Constantine, proceeded without a pause to discuss how they might most profitably allow their hands to be grasped by Messrs. Lenin and Trotsky.

# OUR ARAB ALLIES.

## "The Word of an Englishman."

The Emir Faisal arrived in this country last week, in order, it was semi-officially announced, to thank King George for presents lately sent to his father, King Hussein. Nobody who has followed the Arab question at all closely will have felt any surprise that our Government should have taken advantage of his presence to consult him regarding the unsettled condition of Mesopotamia and other allied subjects. THE NEAR EAST has endeavoured to keep before its readers the importance of the Arab factor in the great problem of the after-war settlement, and the present time, when there is talk of readjustment in many directions, would seem to be a suitable one for putting forward briefly the Arab view on certain phases of the problem. If justice is to be done, and if Great Britain's reputation for honourable dealing is not to be severely shaken throughout the Near and Middle East, this view must be taken into account, faced squarely, and either acknowledged to be right or be shown to be wrong. We are dealing with a people who hold very strong ideas on the subject of honour, and who do not understand the subtleties of modern diplomacy.

Put as briefly as possible, the unrest that is now so noticeable in the Arab world is very largely attributable to the Arabs' belief that we and our Allies have failed to keep certain definite promises that we made to them when we wanted their aid in the war. We do not say that they are right, but undoubtedly they believe that they are right; and, unless the powers that be are keeping back relevant facts of importance, we should find it hard to show that they were wrong.

They point out that negotiations were carried on early in 1915 between King Hussein (then Grand Shereef) and the British Government, on whose behalf the High Commissioner in Egypt, Sir Henry McMahon, acted. The result of those negotiations, they hold, was agreement on the following lines:—

(1) The establishment of an Arab kingdom, extending from the Persian Gulf to the limits of Cilicia, including Aleppo, Damascus, Hama, and Homs, up to the frontier of Egypt, with a special administration for the vilayets of Busreh and Baghdad, to be arranged with the Grand Shereef at the end of the war.

(2) The Shereef left open the question of the Lebanon, Beyrout, and its coast and its possible cession to France; but in the picturesque Arab phrase he merely "averted his eyes," and frankly warned us that after the Armistice he would reopen the subject.

(3) The British Government undertook to support the Arab kingdom, to give it advice, to protect it from foreign attacks; and the Arabs, on their side, were to accept only British advisers.

Two points emerge from the correspondence between the Grand Shereef and the High Commissioner: first, that the former constantly pressed for *explicit* statements; and secondly, that he was very anxious to have dealings with no other European nation than Great Britain. The High Commissioner, in a letter written at the end of October, expressed his thanks for the Shereef's desire to avoid doing anything that might injure the Franco-British Alliance, which, as the negotiations had shown, we were concerned to safeguard.

The date of these negotiations is important—from the Arab point of view extremely so—for they contend that nothing in the Sykes-Picot Agreement (made in May, 1916) can afford any excuse for our failure to observe pledges solemnly entered into six or seven months earlier. Moreover, they declare that when King Hussein first heard of the Sykes-Picot Agreement—through Jemal Pasha, who got his information from the Bolshevists—he called the attention of the British High Commissioner to it, and received a reply which set his mind at rest. This reply (they say) stated that Jemal Pasha had got hold of a provisional undertaking between France, Russia, and Great Britain, designed to prevent difficulties arising between them; that he had, wilfully or through ignorance, distorted its purpose, and, especially, that he had omitted reference to stipulations contained in it, safeguarding the interests of native populations, and providing that their consent should be obtained for arrangements suggested. Finally, the reply recognised that the withdrawal of Russia and the success of the Arab revolt had put an entirely different complexion on affairs. In the Arab view, these statements and admissions make it clearly impossible for anything in the Sykes-Picot Agreement to stand in the way of the fulfilment of Great Britain's pledges to themselves. They took up arms on the strength of certain promises made to them by the Grand Shereef, and those promises were based on pledges given to him by Great Britain. It has never been suggested that the Arabs did not perform their part of the bargain, and any arrangement subsequently entered into with a third party cannot, naturally, take precedence over the earlier one with them.

In addition to the correspondence and agreement between the Grand Shereef and Sir Henry McMahon, the Arabs cite assurances given to certain Syrians of Cairo in June, 1917, to the effect that pre-war Arab States and Arab regions freed by military action of their inhabitants during the war should remain entirely independent. They also refer to the Anglo-French Declaration of November, 1918, promising to encourage native government in Mesopotamia and Syria,* whose people were to choose their governments freely for themselves. And, again, they will tell you that British Ministers have since that date renewed the promises—Mr. Lloyd George, for example, in September, 1919, and Lord Curzon a month later.

"Now," they ask, "where is the independent Arab kingdom? What of Homs, Hama, Aleppo, Damascus?" With regard to Mesopotamia they are less restive than with regard to Syria and Palestine, partly because they remember the British stipulations (referred to above) concerning the Busreh and Baghdad vilayets, and partly because they recognise that the British, who are there now, freed the country from Turkey by force of arms. The latter consideration holds good to some extent with regard to Palestine, though it would be idle to pretend that the Arabs anywhere accept the present arrangement with anything like contentment. But in Syria things are very different. There they see installed the French, who (they say) so far from sending an army to rescue the country were glad to receive help from Europe, Asia and America to keep the enemy from their own capital; they see that General Gouraud's army has forcibly occupied the towns specifically promised to themselves; and they most bitterly resent the high-handed treatment meted out to Faisal, the King chosen for themselves by the Syrians, and the man who fought loyally side by side with the British. If you should point out that the French are acting under a mandate, they ask you whether the mandate was drawn up and approved by the League of Nations, or whether its terms are those of a conqueror. According to the Covenant of the League of Nations, they remind you, the wishes of the people concerned must be a principal consideration in the enforcing of a mandate, but the only effort to ascertain the wishes of the people of Syria was that made by a United States commission in 1919. The Arabs were given to understand that the report of that commission would guide the Peace Conference when it was deciding the future of the country. The report has never been published, but it is generally known that it was by no means favourable to France. Why is it still kept secret?

The story of what happened in Syria between the time of its evacuation by British troops (November, 1919) and the occupation of Damascus by the French (July, 1920) is too long to be retold here, however briefly; but its effect upon the Arab mind was very marked, and from the point of view of our interests very deplorable. For, it must be clearly understood, the Arabs hold us responsible, and consider that we have failed to redeem our pledges to them. King Hussein has steadily maintained the attitude that he has nothing to do with any other Power than Great Britain. It is an open secret that he once wrote that even if arrangements more favourable to himself and his country should be made by the Peace Conference and not communicated to him through Great Britain

* See THE NEAR EAST, November 15 1918.

Digitized by Google

he considered that he would be denied the mercy of God if he should accept such an arrangement—meaning, of course, that he would thereby be going behind the back of the friend to whom he had entrusted his case. The Emir Faisal, too, declares that he attended the Conference only because Great Britain insisted on it. It is to Great Britain, therefore, that they look for justice. If the feeling that they have not received it is allowed to remain, the consequences may be very serious. On the face of it, it looks as if a very bad blunder had been made somewhere in the business. The presence of the Emir Faisal in London may afford an opportunity to put the matter right. It has been suggested that he should be given the rulership of Mesopotamia. That is a question for the people of Mesopotamia, the Emir himself, and the British Government. But in any case such an appointment would not dispose of the difficulty regarding Syria and Palestine. The only way out of that trouble would be for us to face it squarely, to take France into our fullest confidence, and to stand by our word at all costs. If our word has not been given as represented, if the Arabs' point of view is mistaken, it should not be impossible to make the mistake apparent to them—and to the East generally. Unless that is done the expression "the word of an Englishman" may change its signification for the Oriental world.

## THE EMIR FAISAL.

The Emir Faisal arrived in London on December 2 from the Continent. General Haddad Pasha met his Royal Highness at Dover and accompanied him to Victoria Station, which was reached at a quarter past nine. The Emir Faisal, who was attended by Tahsin Bey, Commandant Kadry, and Salah Izzeddin (Secretary), was met by Sir Edward Wallington, who represented the King, Mr. J. B. Monck (representing the Secretary of State for Foreign Affairs), and Major A. Dawnay (representing the War Office). He has taken up residence at 12a, Berkeley Square.

On Friday the Emir, accompanied by General Haddad and members of his staff, laid a wreath on the Cenotaph and another on the Unknown Warrior's grave. Both wreaths were bound with ribbons in the Arab colours—black, white, green and crimson. Afterwards the Emir walked round the Abbey and inspected the monuments, being specially interested in that of Lord Stratford de Redcliffe.

On Saturday the Emir was received by the King, in attendance on whom were Lord Curzon and the gentlemen of the Royal Household. The Emir, in the course of a speech of thanks, which was translated by General Haddad, emphasised the loyalty of King Hussein and the Shereefian family to His Britannic Majesty, and expressed his father's hope that the British and Arab peoples would remain united in the bonds of friendship.

On Sunday the Emir left cards on the Prince of Wales, Queen Alexandra, the Prime Minister, Mr. Bonar Law, Lord Curzon, Lord Milner, and several private friends.

# PRESS ON THE NEAR EAST.

### "Nationalist" Spleen.

A correspondent sends us the following translation of a note which appeared in the Angora newspaper, *Hakimet i Millie*, of October 23. It is interesting, as our correspondent observes, as giving some indication of Nationalist mentality:—

The rumour of Damad Ferid Pasha's fall has been in circulation for the past few days, and yesterday the news was confirmed by the Anatolian Agency (The Nationalist Press Bureau). As a matter of fact, his colleagues and friends in Stambul had turned against him, and his fall was expected. The Stambul newspapers attribute his fall to reasons of health, but it is clear that this is not the real reason. In any case, the fall of Damad Ferid Pasha's Cabinet is of no great importance to us, for our real enemy is England. All these changes are part of the ruses and tricks of the British. Therefore, all that concerns us in regard to the fall of Damad Ferid Pasha is to ascertain exactly what the British finger is seeking to obtain. We shall soon know.

### The East: Great Britain and France.

In an article entitled "The Next War in Russia," the *Nation* of November 27 unloads characteristically some of its views upon the state of the world. Commenting upon the various policies advocated by the Allied Powers for the settlement of the Near East, it says:—

We have no word to write in defence of British policy in Turkey. It has been governed from start to finish by economic and strategic Imperialism, it has betrayed humanity in the persons of the Armenians, while also wronging the Turks and estranging India. None the less, in this crisis of the moment the worse danger by far is the policy of France. It is logical and well thought out, as ours is not. France is aiming, over the body of Turkey, at Russia. She is quite right in thinking the Turks important in that connection. Win them over, and the conquest of the Caucasus would be easy. Save the Armenians and another step would give you the oil of Baku, and the loss of that fuel would bring the reviving transport system of Russia once more into chaos. Then toss your Wrangel once more into the Crimea, and if you could revive 1854 exactly, by sending some Turks to back him, so much the better. It is probably the best of the many schemes yet devised, and can always be completed by a subsidised *coup d'état* at Warsaw, which would again bring the French party in Poland to power. Then, of course, the Poles would renew their war.

We are not speculating without data. Already, before the last of Wrangel's refugees has been put into quarantine in Turkey for typhus and smallpox, the French have begun to reorganise his army. They mean, under the eyes of the international control, under the ægis of the League of Nations, to use Constantinople as a basis for the next war on Russia. That mania obsesses them, and they have no thought of desisting. Their Eastern course, in itself rather madder than ours, but a trifle more plausible, is in reality only a phase of their anti-Russian policy. They press it with skilful speeches at Geneva. They back it with Cabinet intrigues and Press propaganda in London. They mean to see it through. To this policy of ruin Mr. Lloyd George, absorbed in terrorising Ireland, opposes only a fitful and nerveless resistance. It means, if it goes on, a division of Europe, more deep cut than the division of the war itself. If they can make the League of Nations an accomplice in this war upon Socialist Russia (and that is plainly their aim), they will have branded it as a militant, capitalistic organisation. That taunt was uttered by Lenin long ago. It will be justified if the League lends itself to this Eastern policy. There is just one feasible way of saving Armenia, and that is to make peace with Russia. French leadership might convert the League into the ideal of the less far-seeing portion of the Middle Class. But Labour would be driven to take Lenin's view of it. The alternative would then present itself, with a sharpness worthy of French logic, between the two Internationals. The League would be an item in French militarist plans, and the hope of the capitalist die-hards. Over against it, as the one inevitable alternative, would stand the Moscow International. Our helplessness and inefficiency in this crisis will mean, perhaps, that Russia has a hard time before her, but it may mean also that the Russian idea of a Continental revolution is many stages nearer realisation. A League that challenged Labour, excluded Germany, and sanctioned war on Russia, would be all that the most unrelenting Marxist could desire. It would be the class war made international.

### Egypt.

The December number of the *Round Table* contains a very sound, impartial article upon "Egypt a Nation." The various stages in the story of Great Britain and Egypt are interestingly set out. Here is an example:—

From about 1885 onwards, in reports from Egypt and in public and private utterances at home, one notes the idea of our occupation as a mere means for restoring order beginning to pass into an idea that we were there to develop the country and its people towards self-government on British lines. Fired with the ideal of making—in Ismail's phrase—a piece of Africa into a piece of Europe, the first generation of our administrators laid out large plans and dug foundations wide and deep. Measures for attaining the very best began to be mooted, which presupposed large expenditure over long periods, and such political stability as only an established system of European

Digitized by Google

government could guarantee. Such a measure, for example, was the damming of the Nile. It was not then held axiomatic that, if a western occupation of an eastern land is ever to be brought naturally and easily to a close, not the absolutely best possible system of administration should be aimed at, but the best which Orientals have the capacity to handle by themselves. Still less was it held that second-rate government by natives is better for any land in the long run than first-rate government by aliens—for the simple reason that with the former alone will the people ever identify itself. Having no such views as these, being without ulterior imperialist designs and only concerned to do what was to their hand in the best possible way, our administrators went ahead with the Europeanisation of Egypt.

The changes in the psychology of the Egyptians during the late war are well described, showing on what easy material the leaders of the rebellion of March, 1919, had to work:

In the warlike atmosphere of the last four years Egypt had come to be treated as a subject land, and the foreign force as a whole, and some of its overseas elements in particular, knowing nothing about fine distinctions between Occupation, Protectorate, or Imperial Possession, had not been considerate of native feeling. There was discontent about the original recruitment of *fellahin* for the Labour Corps, their long service in a colder, wetter climate, and some injustices they had suffered here and there at the hands of Levantine gangers; but, in fact, less than has been alleged, for this service proved profitable and was cheerfully performed by the majority. There was some resentment, too, at an impolitic collection for the Red Cross; but this affected comparatively few. None of these griefs, nor all together, would have been sufficient to provoke an outbreak. They only added heat to a fire which had long been burning but banked down.

Coming to the Milner-Zaghloul proposals, it says:—

We approve, and have always approved, the institution of responsible self-government in every country which has arrived at a common national consciousness and developed common patriotic spirit in a sufficient number of its citizens possessing such education and experience as qualify them to assume its administration. It is the opinion of the Commission that the position is such as to justify the establishment of responsible government in Egypt; and we would welcome a generous measure; but at the same time it remains to be seen whether an electorate competent to form the basis of genuine responsible government can be developed. Mandarin government will not endure. We cannot, moreover, blind ourselves to the probability that, for some time to come, at any rate, its internal government will be distinctly less efficient than it has been, even allowing for the considerable defects of the latter years of our own control.

### Allied Policy in the Near East.

The *Saturday Review* of November 27 has the following comment upon the problem arising out of the fall of M. Venizelos:—

It would seem, therefore, that before things get any worse there are open to the Allies two courses which, if speedily adopted, might mitigate the evil effects which menace the prosperity of the Near East. The first is to hasten by every known means the creation in Asia Minor of the Arab States, so long hoped for, yet so long deferred. If sympathetically directed, these might prove an effective buffer against Bolshevism in countries where, both by tradition and religion, there should be a natural antagonism to a form of government based upon an ill-digested mass of the crudest theories of Western intellectual superiority. The second remedy should be to give open support immediately to the members of the Petit Entente, which might, hereafter, become an important Balkan Federation of States, with a political and commercial future before it that would make Greece pause before she threw her fate and her fortunes into the other camp. These proposals can be but palliatives for the mischief which the events of the past month have disclosed, but even such remedies are worth consideration when it is too late to find a cure.

### Palestine.

The *Manchester Guardian* of December 4 has an article upon Palestine in which it insists upon the duties of Great Britain in assisting the rebirth of the Jewish Nation. It begins:—

The great enterprise of the conversion of Palestine from a poor and almost derelict province of the Ottoman Empire into the home of a nation equipped with all the machinery of an advanced modern State has reached a decisive point. This great transformation can take place only with the aid and under the direction of Great Britain, and it is Great Britain which must prepare the terms of the "mandate" under which the country is to be held and the process of conversion to begin. . . . Much progress has been made, and Palestine has already become the most peaceful and progressive part of the late Ottoman Empire. This is a beginning, but it is only a beginning, and everything now depends on the facilities to be given under the mandate now in course of preparation by our Foreign Office for Jewish enterprise and for the economic development of the country. The Jewish people have already discovered in the course of their history that bricks cannot be made without straw, and it is a vital condition for the success of this great undertaking that the terms of the mandate should recognise fully and clearly the great principle of policy which has inspired the Jewish people all over the world with enthusiasm and the spirit of self-sacrifice, and should embody the material conditions necessary as a foundation for the new order.

### Articles to Note.

"The Egyptian Situation," by Sir Malcolm McIlwraith, K.C.M.G., in the *Fortnightly Review* (December).

"Egypt and the Milner Proposals," by the Hon. W. Ormsby-Gore, M.P., in the *Nineteenth Century* (December).

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report*:—

PEACE TREATIES: Turkey. ARMENIA. MESOPOTAMIA: Barracks and Cantonments.—Barbed Wire.—Rupee (Exchange Rate). BRITISH ARMY: Mesopotamia and Persia (Casualties). EGYPT. ASIA MINOR (GREEK ARMY). (November 30).

MESOPOTAMIA. INDIA: North-West Frontier (Raids).—India Stores, Belvedere Road. LEAGUE OF NATIONS: Palestine and Mesopotamia Mandates.—ARMENIA. INDIA: Burma, Constitution.—Burma (Rice Control).—Crime. Malta (Tobacco Imports). (December 1).

ALBANIA: PALESTINE, ZIONIST MOVEMENT. INDIA: Dr. S. Bose (Passport). ASIA MINOR (MUNITIONS). (December 2.)

INDIA: Civil Service Pensions.—Officer's Effects (Lieutenant C. F. Leese). (December 3.)

## CHESS.

The first stage of the championship tournament of the City of London Chess Club is now nearing its end, and it is at any rate possible to forecast the leaders in the three heats. Mr. Herbert Jacobs leads in Section A, Sir G. A. Thomas in Section B, and Mr. Ross in Section C, and it would appear probable that they will now maintain their position to the end.

The Metropolitan championship is not yet sufficiently far advanced for any detailed comment, and I will only point out now that Mr. R. H. V. Scott has made a very good start, and from the way in which he has won his games it is evident that he will make a bold bid to recover his title. In due course I hope to give a number of games from this and the City competition.

The London League competition, so far as it has gone, would seem to bear out my prediction that the Metropolitan club will have a good deal to say with regard to the destination of the trophy. The club has so far won all its matches very easily, and on present form would appear to have the strongest team in the League.

PROBLEM No. 27.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***An Oil Rumour.***

It was to be expected that the despatch of the American note on the oil question would give rise to rumours of various descriptions, and it was, therefore, with no surprise that I read the report from Washington that it was understood that the British Government had decided to sell out all its interests in the oil-producing business. Now that meant, if it meant anything, that the Government intended to withdraw from participation in the Anglo-Persian enterprise, which of itself was enough to contradict the report, for there is no conceivable reason in the world why the Government should do any such thing merely because America happens to have an eye on the Mesopotamian oilfields. Needless to say, no credence was attached to the report in responsible quarters, and it was not long before an emphatic denial was forthcoming of any such intentions on the part of the Government.

***

***The Prosperity of Cyprus.***

It is evident from the White Paper on Cyprus, which is dealt with elsewhere in these columns, that during the past year Cypriots had little reason to grumble at conditions in the island. Trade expanded considerably, and the revenue return was excellent, there being for the third year in succession a satisfactory balance on the right side. The agriculturists as a whole benefited by the increased prices obtained for their produce, and it is pointed out that their improved standard of living has been maintained, while, as showing the general prosperity, reference is made to the large imports of motor-cars into the island. The one fly in the ointment during the year was the steady rise in the cost of living, which Cyprus as well as every other district in the world has had to face. This was particularly in evidence as regards bread, owing to the effect of drought on the cereal harvest, and this called for special measures on the part of the authorities. But this temporary misfortune was far more than compensated for in other directions, and I should imagine that most Cypriots, looking back at the constantly growing prosperity of the island under British protection during recent years, must now be of the opinion that they could scarcely expect such favourable conditions under any other rule.

***

***Sudan Trade Expansion.***

The figures for the trade of the Sudan for the first eight months of this year reveal a remarkably satisfactory state of affairs. In regard to both imports and exports a marked expansion is recorded, but the principal increase has been in exports, and while for the corresponding period of 1909 there was a large balance of trade against the Sudan, this has now been reduced to comparatively small proportions. The imports have risen from £E3,048,014 to £E4,431,734, while the exports show the remarkable increase of from £E1,790,925 to £E3,889,675. A particularly noteworthy feature of the returns is that the trade continues to be mainly within the Empire, Egypt heading the list of countries from which the Sudan draws its supplies, with the United Kingdom and India and Aden second and third respectively far above all other countries, while in countries importing goods from the Sudan the United Kingdom now takes the first place, with Egypt a good second, the two between them accounting for £E3,548,242, leaving only an insignificant portion for other countries.

***

***Arabs and Government Arak.***

One scarcely expects to find anything amusing in Blue-books; but I fancy that those who know the Arabs would be immensely entertained by reading the somewhat dry description in the report of the Revenue Department of the Occupied Territory of Mesopotamia, which was reviewed in these columns last week, of licensing reforms in the Busreh district. The Busreh arak monopoly expired early last year, and the still head duty system was inaugurated, a contract being given to a company for the manufacture of the liquor at 25 degrees under London proof spirit. For the first month of the new system the duty on sales exceeded Rs.34,000, but in the following month it fell to Rs.19,000, and in the third month there was a further drop to Rs.17,500. The reasons for this were that the Arab found his arak too weak, and that the new arak did not contain the popular flavours, and the consequence was that he was turning to cheap imported liquors, chiefly whisky. It was then decided to permit the distillation of arak at 10 degrees under London proof, and so for the fourth month there was a rapid rise in the duty to Rs.25,000.

***

***Egyptian Salt and Soda.***

The year ended August 31, 1918, marked the climax of the war-time prosperity of the Egyptian Salt and Soda Company. The results of that period enabled a dividend of 60 per cent. to be declared, but in the following year there was a decline in the net profits, and there was a reduction of 15 per cent. in the dividend. The results of the past year show a further decrease in net profits to £E207,301, and it is now proposed to pay a dividend of 30 per cent., so that in two years the dividend will have been reduced by half. As the allocations include £E15,371 for depreciation, £E7,762 for writing down investments, £E7,000 for provision for eventualities, and £E40,000 transferred to reserve to meet the expenditure towards the completion of the Moharrem Bey works, and £E115,520 is carried forward, as against £123,957 brought in, it will be seen that the proposed distribution is well within the compass of the company.

***

***Lord Bessborough.***

Widespread regret will be felt at the death of Lord Bessborough, K.P., C.V.O., C.B., which occurred suddenly at Birmingham last week. A man of wide and varied financial and business activities, he was specially concerned with Near Eastern affairs, in which he took a particular interest, and he was chairman of the Bank of Roumania and also a director of the Imperial Ottoman Bank.

***

***Roumanian Consolidated.***

In February, 1919, the Roumanian Consolidated Oilfields regained possession of its oil properties, and the report which has just been issued shows that since that time rapid strides have been made with the work of reconstruction. Since the Armistice a large part of £1,000,000 has been expended, and the result of the efforts of the company is that the concern, given favourable developments in Roumania, is now within sight of a period when the production should reach record figures. The company has issued 200,000 £1 shares for cash, and has also borrowed about £200,000, whilst its available resources, including the proceeds of its oil production, it is pointed out, have been expended in new machinery and plant and in development, and there are still considerable sums to pay for machinery and tools already ordered, and for transport to Roumania. A further £250,000, it is estimated, will be required to complete the programme of reconstruction.

***

***The Company's Claim.***

The above figures are compared in the report with those given in the company's claim, and it is pointed out that the value of the stores of oil and refined products included in the destruction was approximately £185,000. Twenty-five thousand tons of petroleum have been produced since the Armistice, representing, at £8 per ton, £200,000. These

**BANK OF ROUMANIA LIMITED**

(FOUNDED 1866.)

*Head Office:* 27, THROGMORTON ST., LONDON, E.C. 2.

Branch: 11, CALEA VICTORIEI, BUCAREST.

*Directors:*

E. W. H. BARRY, Esq. | GENERAL THE HON. SIR H. A. LAWRENCE, K.C.B.
THE VISCOUNT GOSCHEN. | P. NAVILLE, Esq.

Digitized by Google

figures, with the amount previously stated, bring the total to £1,035,000, as against £1,072,000 in the claim. The balance of the company's total claim of £1,270,724 consists of two years' average profits during the period, while the machinery, tools, etc., were being manufactured and exported to Roumania and fixed *in situ* ready for work, to which would require to be added interest on loss of profits during the years which have elapsed while payment has been withheld. It is maintained that these figures go to prove that the valuations of the assets which the British Military Mission destroyed amount almost to the same sum as the actual and estimated cost of the reconstruction work now being carried on, but it is emphasised that to-day's prices are much above the values stated in the claim as at the time of destruction. It is explained that the difference is accounted for by the fact that certain portions of the destroyed works are not so far included in the programme of reconstruction, and there is only to be one refinery as against two. The position with regard to the company's claim against the Government is then briefly dealt with in the report. At the instance of the company the matter came before the High Court in March, and a verdict was given for the company. It was understood that counsel for both sides would confer together with the object of ascertaining the amount payable. No such conference took place, and the Crown has now given notice of appeal.

COMMENTATOR.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cable, received from the Director-General of Commercial Intelligence, Calcutta, dated November 29.—Crop prospects generally fair, but rain urgently required in North-Western India, Bombay, and Central Provinces, and parts of Central India, Bihar and Orissa, and West Bengal. During the week ending November 27 rainfall heavy and general in South Madras. Bombay cotton ready market quiet but steady. Fine M G Oomra number three spot rate Rs.280. Piecegoods market further weakened by further fall in exchange. Some retail inquiry. Calcutta jute market slightly steadier. Hessians dull, with practically no business, but with prices steady. Heavy goods quiet, with moderate inquiry for heavy Cees for next year. The preceding week's rate of 7 per cent. in Bombay, Calcutta, and Madras remains unchanged. Price of paddy in Rangoon has fallen to Rs.125 per 100 baskets owing to the announcement of the cessation of control between India and Burma on January 1, 1921. Until very recently the price was Rs.180.

It is reported that the Yugoslav Government have commissioned a French group to work out the plans for a Danube-Salonika Canal 600 km. in length, capable of being navigated by vessels of 10,000 tons.

Telegraphic rates to Algeria and Tunis are now 3d. a word.

A report from Brussels states that the Belgian Government are making considerable purchases of wheat from Yugoslavia.

Two thousand five hundred tons of chrome ore, of the value of 365,000 drachmæ, were exported from Volo in July to America. This was the only shipment made during the six months, April-September.

The traffic receipts of the Egyptian Delta Light Railway for the week ended November 10 amounted to £E19,343, making the total for the year £E306,459. For the corresponding periods of 1919 the totals were £E18,356 and £E193,683.

The capital of the Union Cotton Co. of Alexandria has been raised to £E200,000.

The India Office reports: Treasury bills outstanding on March 31, 1920, Rs.52,96,60,000; issued from April 1 to November 27, 1920, Rs.91,85,90,000; total, Rs.144,82,50,000. Discharged from April 1 to November 27, Rs.46,30,50,000; outstanding on November 27, 1920, Rs.98,52,00,000.

## SERBIAN STATE BONDS.

### PAYMENT OF COUPONS.

The Yugoslav Ministry of Finance has issued the following statement:—

From the beginning of the Great War we have always remitted to the banks the necessary sums for the payment of the annuities. In the beginning of the war the Serbian Government put at the disposition of the French banks the whole annuity for the loans issued in France, as well as for the loans issued in Germany and France. After July, 1916, the Allies handed over the necessary sums for the annuities direct to the banks, with the exception of the parts of the annuities which belonged to the emissions issued in hostile countries.

A great many owners of Serbian State bonds apply to this Ministry direct or through our Legations abroad asking for the payment of their coupons of our pre-war loans for the period from January 1, 1915, to July 1, 1919, with the notification that the banks in Paris refused to pay out the coupons, stating that the sums destined for the payment of these coupons have been consumed. To prove the readiness of our Government to meet all obligations, and that they keep in sight the interest of the owners of our bonds, the Minister of Finance has issued the following ordinance, sub. D.K. 6227, on November 3, 1920:—

All the coupons of our pre-war loans for the period from January 1, 1915, to July 1, 1919, which were unpaid have to be paid exclusively at the head office of the Ministry of Finance in Belgrade.

In order that it may be established if the coupons which have to be paid belonged before the war to subjects of Allied countries, it is necessary to send to the Ministry of Finance with the coupons also the corresponding bonds, as, according to the Peace Treaty, subjects of the ex-enemy countries have no right to demand the payment of the coupons. The owners are bound to prove by certificates that they owned the coupons before the war, and to state where these coupons were paid to them before the war.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

**Egypt.**

(*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked* (*L*) *are to be obtained.*)

Equipment and Clothing.—The Egyptian Ministry of the Interior invites tenders for the supply of equipment and clothing required by the Abbassia and Khanka Asylums for one year from April 1, 1921. United Kingdom firms tendering must have a resident agent in Egypt.—January 3.

Pipes.—The Chief Engineer, Main Drainage Department, Ministry of Public Works, Cairo, invites tenders for the supply of cast-iron pipes and specials. December 29.

Cement Blocks.—The Surveyor-General, Survey of Egypt, Giza (Mudiriya) invites tenders for the supply of 20,000 and 100,000 cement blocks. December 15.

General Stores, etc.—The Postmaster-General, Alexandria, invites tenders for the supply of general stores, uniforms, tarboushes, and boots, as well as the execution of certain works of stencilling mail bags, etc., engraving, and paint at Alexandria, and also the maintenance and repair of electric light installations, clocks and watches at Alexandria and Cairo, for the financial year 1921-1922. Copies of specifications are obtainable from the Central Stores, G.P.O., Alexandria. December 15.

Clothing.—The Director-General, Customs Administration, Alexandria, invites tenders for the supply of clothing required for the personnel of the Customs Administration for the year 1921. January 18.

Clothing.—The Director of Stores, Department of Public Health, Cairo, invites tenders for the supply of clothing, equipment, etc., required for the year 1921-1922. January 5.

Sawband Blades.—The Department of Ordnance Services, Egyptian Army, Citadel, Cairo, invite tenders for the supply of sawband blades, $\frac{3}{8}$ in., $\frac{1}{2}$ in., $\frac{5}{8}$ in., $\frac{3}{4}$ in., $\frac{7}{8}$ in., 1 in., 50 ft. December 15.

**India.**

Refuse Destructor.—The Municipality of Bombay invites tenders for the manufacture, erection, and equipment of a refuse destructor for 200 tons of refuse a day. (Spec., 5s., Sir John Wolfe Barry, Lyster, and Partners, 2, Queen Anne's Gate, S.W.1.) March 4.

**Yugoslavia.**

Leather.—A company of boot manufacturers of Vranje, Serbia, are inquiring for names of United Kingdom firms in a position to supply 50,000 kilogrammes of sole leather and upper leather for army boots which they have contracted to make for the Serbian Government. The name and address of the company referred to, etc., will be furnished by the Department of Overseas Trade, 35, Old Queen Street, S.W.1.

# Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## EGYPT.

CAIRO, November 18.

**The Financial Position.**

The State accounts for the first quarter of the financial year, which have just been issued, show a marked increase in receipts and expenditure, though the financial position is not so good as at the end of the same period in 1919. On June 30 revenue amounted to £E8,613,468 and expenditure to £E9,062,163, as compared with £E5,713,801 and £E5,857,211 on the same date last year. There is, therefore, an increase of £E2,899,667 in revenue and £E3,204,952 in expenditure, giving an excess of the latter over the former of £E448,695, as against one of £E143,410.

The principal items in which there is an increase in revenue are: Land tax, £E128,519; Customs, £E1,101,748; tobacco dues £E342,019; mixed court fees, £E185,703; native court fees, £E72,160; railways, £E646,405; military exemption fees, £E91,460; ghaffir cess, £E170,514. The only decreases are in date tax and excise duty, both of which have been remitted, and in sale of land, which is £E16,419 down.

On the expenditure side the main increases are: Survey, £E71,797; prisons, £E85,938; irrigation, £E86,578; railways, £E1,607,334; indemnities for cost of living, £E474,301. It is to be remarked that the increase in revenue from Customs and tobacco dues is roughly 100 per cent., and that from railways about 60 per cent., and it will be very interesting to see whether these proportions are maintained during the rest of the year.

In view of the fact that there is an exceedingly serious slump in trade, and that the drop in cotton is causing growers to keep back their crops in an unginned condition rather than sell at the present low prices, the country is indeed in for a somewhat stringent time, and while there is no doubt that the people as a whole have any amount of money, the drop in cotton, unaccompanied by any decrease in the cost of living, affecting as it does their rate of expenditure and their investments in land, etc., cannot fail to react on certain important items in the State budget.

## GREECE.

ATHENS, November 21.

**Customs Receipts.**

The receipts of the Piræus Customs during October amounted to 7,338,882.85 drachmæ in paper and 415,454.55 drachmæ in gold. Compared with the receipts during the corresponding period last year, there is an increase this year of 1,175,514.60 drachmæ in paper and a decrease of 150,705.40 drachmæ in gold.

**Shipping at the Piræus.**

There were 424 arrivals of various steamers in the port of Piræus during October of the following nationalities:—Greek 346, British 22, Italian 13, Inter-Allied 12, Dutch 6, Roumanian 5, Russian 4, French 3, American 3, Spanish 3, German 3, Swedish 2, Norwegian 1, Belgian 1. The number of sailing vessels of various nationalities which entered the port during the month was 274.

## YUGOSLAVIA.

BELGRADE, November 30.

**Austrian Bonds.**

It is reported that the Minister of Finance has authorised the public subscription of Austrian bonds in Yugoslavia, the object of which is to enable Austria to purchase food and some other commodities. The Press is hostile to the scheme as it means the export of Yugoslav money, although an improvement in the Austrian exchange would be welcomed as a means of improving commercial relations between the two countries, which are now no longer hostile, and can be of considerable mutual help. The Austrian krona is not worth more than 6 paras in Belgrade.

**Rising Cost of Living.**

The cost of living in Belgrade, already one of the dearest towns in Europe, is steadily mounting. Tram fares have now been raised 50 per cent., and the price of electric light has also been raised. The municipality has granted a special allowance of 15 dinars a day to its employees, with an extra 4 dinars for each dependent child. This in turn means, presumably, an increase in rates and municipal dues and octroi.

**The Copenhagen Consulate.**

The Consulate of the Kingdom of the Serbs, Croats, and Slovenes at Copenhagen has been abolished. It was established as a war measure, and on its abolition the Government expressed its warmest thanks to the Danish Government for the numerous services rendered in establishing communication between Serbian refugees and those who remained behind in their fatherland during the enemy occupation.

## ROUMANIA.

BUCHAREST, November 22.

**Rumoured Concession of Railways.**

During the last few days the rumour has been circulated in the local Press that the Roumanian railways will be conceded to foreign companies. Some papers say that it is only a question of ceding the workshops of the railway, and despite the denial by the Government Press, the general idea is that they will have no other alternative but to do so, as the railway system is getting worse and worse every day instead of better. If such a rumour had been spread a few months ago, it would have been considered against the interest of the country and unpatriotic to hand over the management of a State institution of this importance to a foreign company.

It is stated that the Government is treating with a British concern, since a mission of British engineers arrived the other day in Bucharest. It is also affirmed that the Government might try to alleviate the situation by ceding the railways to a group of Roumanian engineers, who would bring from Germany a number of skilled labourers and specialists to assist them. A decisive step will have to be taken very soon, as it is generally felt that the deplorable state of the railway transport is one of the main reasons why the economical and financial development of the country is retarded

**Arrival of Japanese Mission.**

A Japanese Mission has arrived in Bucharest, composed of Dr. Ohno, Japanese Consul-General in Germany, and Dr. K. Minetomo. These gentlemen have been sent by the Japanese Government to study the general financial and economical position of Roumania with a view to forming a commercial treaty between the two countries.

The visit is the result of Prince Carol's voyage to the Orient, and his interview with Japanese statesmen, when he impressed on them the importance of opening commercial relations between the two countries. He also proposed that, owing to the unfavourable rate of exchange in Roumania, Japan should accept Roumanian Treasury bonds in exchange for goods.

**New British Consulate.**

To illustrate the interest which Great Britain is taking in Roumania and its new provinces, it may be noted that beside the Consulate recently established at Cluj, Transylvania, some two months ago, a Consulate has now been opened at Czernovitz, the capital of Bukovina.

**The Housing Problem.**

In view of the acute shortage of houses in the principal towns throughout the country, and especially for the purpose of finding quarters for Government officials and Army

Digitized by Google

personnel generally, as well as refugees, the Government intends to bring forward a Bill introducing compulsory billeting. Its provisions are as follows:—(1) An official billeting committee will be appointed in every town. (2) Foreigners will only be granted a "Billet de Sejour" for 15 days at a stretch. (3) Provincials who have houses in the provinces will have to return to them. (4) No local people will be allowed to stay in hotels. (5) In private houses, every person is allowed two rooms and an extra room for every member of the family. (6) In order to encourage people to build, this law will not affect those who are already building or intend to build.

**Luxury Imports Prohibited.**

General Averescu, since taking over the Ministry of Industry and Commerce, has made further drastic changes in this department, of which the principal one is the prohibition of the import of all luxury goods—without exception. This will include goods such as silk, silk goods, artificial silk, furs, velvet, silver or gold-plated goods, patent leather shoes and boots and fancy footwear, powder, powder-puffs, perfumes, carpets, chocolate, cocoa, jams, and marmalade, preserved fruit, caviare, oysters, liqueurs, wines, furniture, fancy birds and dogs, musical instruments, etc., etc. This decision is welcomed by the general public, as a great deal of money has gone out of the country for unnecessary goods, instead of being utilised for the importation of material and machinery for restarting industries destroyed during the war. General Averescu has also decided to cancel all export permits for wheat and rye if the same are not compensated for by the import of goods useful to the general public.

## LANCASHIRE COTTON.

### Market Still Inactive.

(From Our Own Correspondent.)

Manchester, Monday.

The market continues in a very unsatisfactory condition. There is still that lack of confidence in current rates which checks enterprise, and buyers have only been prepared to purchase small lots to meet urgent requirements. It is not reasonable to expect that prices will fall much lower, but the outlook remains very uncertain, and there are no signs of any definite turn in values. Many ups and downs continue to take place in Egyptian cotton prices. Lancashire spinners are not any more disposed to purchase freely. Uncertainty exists as to what will be done by the Egyptian Government with regard to the acreage next season, but there is a possibility of the area under cultivation being restricted. In Egyptian yarns a little more demand has been about, but sales of any weight have been quite isolated, and when spinners have sold they have had to accept wretched prices. Local mills engaged on Egyptian cotton continue to run only four days a week. In the American spinning section the short time proposal has been carried, and the factories are now only working twenty-four hours a week instead of forty-eight. During the last few days there has been an increased demand for beams, and some producers have obtained a little relief. Export yarns have not attracted much attention. In cloth for the Near Eastern outlets business has been of retail dimensions. Merchants with connections in Egypt are still chiefly occupied in working off dear contracts. The political situation abroad is not by any means all that could be desired. With regard to India, Calcutta continues to send forward a considerable inquiry, but buying has been very patchy. Manchester merchants are very severely harassed by poor remittances from the other side, and the situation has been discussed at the Chamber of Commerce, but no definite action has so far been taken. Letters and telegrams from China remain discouraging. No demand of any importance has come through for South America. Home trade buyers have continued to purchase from hand to mouth.

This year's olive crop in Volo is reported to be the best one for eight years.

## CYPRUS IN 1919-20.

### GREAT INCREASE IN TRADE.

For several years now conditions in Cyprus have on the whole been very satisfactory, and the recently issued White Paper shows that during 1919-20 the general level of prosperity was largely maintained. High prices have been realised for all kinds of produce, and the position of the peasantry has considerably improved. But the year has not been without its adverse factors. There was a poor cereal harvest, owing to the excessive drought, with the result that there was a marked rise in the price of bread, and it became necessary for the Government to take steps to provide bread at a reasonable price. Then the cost of living was steadily rising, but, of course, as far as the agricultural community was concerned, this was largely counterbalanced by the increased yield of the crops. As indicating the improved position, it is noted that large numbers of motor-cars have been imported, and are now plying regularly on all the principal roads of the island.

**Finance.**

The revenue amounted to £602,927, or slightly below the record established in 1918-19 of £610,499, and to this has to be added the usual grant in aid of £50,000, making the total £578,200. The expenditure, including the Cyprus share of the Turkish national debt charge of £92,800, amounted to £578,200, as against £587,475, there being thus a surplus of £74,727, as compared with £73,024. Though the revenue decreased it is pointed out that actually the receipts were the best ever recorded, as the total only includes £14,300 for arrears of the previous year's tithes, while the total for 1918-19 included £51,395 under this heading. It may be noted that except for tithes there were increases under all the principal heads of revenue. For three years now Cyprus has had substantial surpluses, and the island's finances are now in a most flourishing condition.

**Imports and Exports.**

There was a marked increase in both exports and imports in the year under review. The value of the exports amounted to £1,371,580, an increase of £510,235, while that of the imports was £1,525,427, an increase of £511,845. There was thus again a substantial balance of trade against Cyprus. Both as regards exports and imports the trade was chiefly confined to the British Empire. Thus of the exports the United Kingdom's share amounted to £313,455, while British possessions, colonies, and protectorates accounted for a further £664,424, or together practically two-thirds of the total. Outside the Empire the principal customers of Cyprus were Greece and France, who took goods to the value respectively of £123,982 and £104,212. In the import trade the predominance of the Empire was very pronounced, 81.2 per cent. of the imports coming from the United Kingdom or elsewhere within the Empire. But the position in this respect was not quite so satisfactory as in the previous year, when the Empire's share of the imports was no less than 87.6 per cent.

**Industries.**

The progress of the island's staple industry, agriculture, may be judged from the fact that during the year there was a considerable demand for agricultural machinery. The Agricultural Department has accomplished much notable work in supplying information to farmers concerning tractors, ploughs, cultivators, etc., and in arranging for the importation of tractors and other machinery for demonstration purposes. High prices prevailed for fruit in 1919, and the result of this factor was to give a great stimulus to fruit cultivation. New vineyards were planted, and the cultivation of apples has been extended, while new varieties of Smyrna figs have been introduced.

As regards other industries, a great impetus has been given to wine making from the higher prices obtainable, and in 1919 1,450,800 gallons of wine were exported, of the value of £125,495, as against 1,178,552 gallons of the value of £68,005 for the previous year. In 1918 the exports of terra umbra fell to 53 tons, but in 1919 they rose to 2,785 tons, of the value of £6,255, and it is stated that the trade is increasing rapidly.

# ENGINEERING.

## Oil Engines: Training Wanted.

The development of oil-engined or motor ship construction within the next generation will depend to a great extent upon the embryo engineers who are now receiving their theoretical training at the various technical colleges and institutes throughout the kingdom. The *Motor Ship* naturally views this with importance, and emphasises that it is clearly desirable that in the minds of these students should be instilled some understanding of the possibilities that lie before them. It is, therefore, essential that efficient instruction in oil engine design and manufacture should form part of the curriculum of every engineering course; yet in practically every college with which we are acquainted the engineering student is being brought up on the oldest, most out-of-date steam practice, so that when he leaves college he has perhaps scarcely heard of the Diesel engine and in all probability has never seen one, although he may have obtained his engineering degree proclaiming his theoretical knowledge in all branches of engineering.

This is utterly wrong, and is not only unfair to the student from the direct point of view in that it does not give him a chance of earning his living, but it causes him to derive his engineering education in an atmosphere such as existed 20 or 30 years ago. It says much for the attraction which internal-combustion engineering exerts upon the younger minds that, in spite of this disability, students, after they have left college, are in many cases drawn towards this branch, although they find that they have practically to start afresh from the beginning.

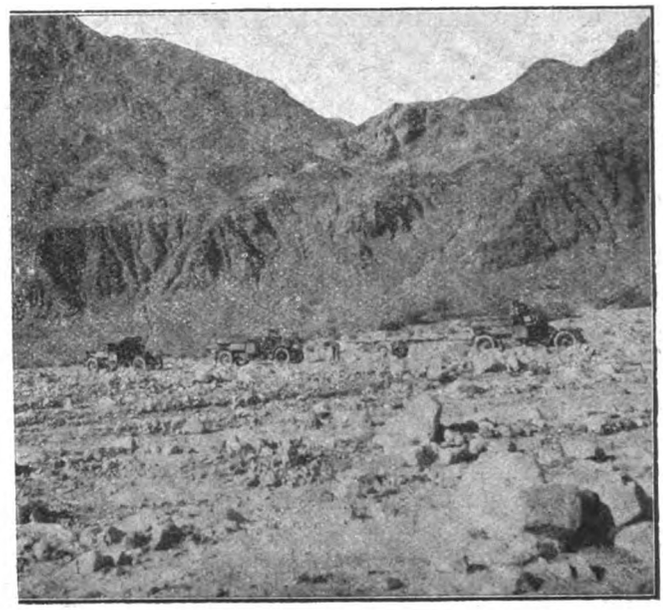
The reason for this unsatisfactory state of things is not far to seek. Some of the professors are out of touch with modern developments in practical engineering science, and are probably not even aware of the important part which the oil engine is now playing in marine and industrial work. Even if they do realise it, they are inclined to feel that they cannot make it a feature of their engineering course since they themselves know little or nothing concerning the subject, and perhaps have neither the time nor the inclination to take it up. Moreover, the only lecturer on oil engines who can be of much value to students is one who, besides possessing a good theoretical knowledge, has also had some practical experience with the modern type of Diesel engine.

The solution of the problem lies in the appointment of several specialised lecturers on oil engines, if necessary, attracting them directly from the industry, so that their knowledge is complete and up to date. Many of the leading engineering concerns in this country, who are now turning their attention towards oil engine development, have some influence in the control of technical colleges, and we agree with the *Motor Ship* in the view that these large firms should turn their attention to this subject and use such influence as they possess in order to cause the oil engine to play a more prominent part in engineering instruction.

A double purpose would be served by this action. There is considerable need for further independent research work on oil engines. Lecturers or professors who are appointed for oil engineering should be encouraged to carry out investigations, and all colleges should be provided with experimental engines. It may be mentioned here that the question of cost need hardly enter into the matter, as we understand that the Admiralty are prepared to supply submarine engine of the Diesel type for this purpose.

## The Crossley Car.

The merits of the Crossley productions have been dealt with on more than one occasion in these columns, but one point which perhaps deserves further reference is the great reputation they have earned for all-round ability in negotiating really difficult country. Rough country is the crucial test of the modern car, and in the future, when there is going to be a very great demand for the motor as a means of transport in undeveloped lands, it will be surprising if the Crossley is not well to the fore. A letter written during the war to the company pays a wonderful testimony to the efficiency of the Crossley in the Arabian desert. "I have been in charge of five of your cars," says the writer, "for twelve months, and during that time they had to undergo some of the severest tests that one could think of, and they have stood up to it admirably. There were no roads except those we made ourselves, and we had to go over boulders and rough country like you see in the photos, day after day, not forgetting the soft sand, of which there was plenty, and I'll back a Crossley against any other car for getting across and out of it; they are marvels. There were other makes of cars with other units, but the good old Crossley stood the test better than any of them, and I know some parts where it has been the only car to reach. Really, I can't speak too highly of them, their performance has been so good; each car used to do an average of 100 miles per day, and *sometimes* got a day in.



CROSSLEY MOTORS IN THE ARABIAN DESERT.

Considering the bad country we had to drive over, we had very little trouble all the time."

## Oil Fuel.

A warning note regarding the use of oil fuel has been struck by Lord Pirrie, head of the famous shipbuilding firm of Harland and Wolff, of Belfast. He has just returned from a tour of the Mexican oilfields, and has been greatly impressed by the extraordinary demand for oil of all grades and by the comparative scarcity of oil for fuel purposes. On his return he told an interviewer that the whole subject of oil supply was causing him great concern, the more so that he had in the past advised so many of his shipping friends to change over the heating of their ships' boilers from coal to oil burning. He added: "I now feel very strongly that only the large express steamers will be secure as to their supplies. I am advising my friends to stop converting ordinary cargo vessels, or they may find themselves in difficulties."

It must be remembered that this warning does not apply with equal force to the employment of oil-driven internal combustion engines of the Diesel or semi-Diesel type. These engines are extremely economical and efficient, and show a saving of about 60 per cent. in the amount of fuel used. The main reason for the great increase in the price of oil for fuel purposes during the past eighteen months—an increase of about 100 per cent.—is on account of the wholesale conversion of steamships into oil-fuel burning vessels, and the construction of new cargo and other boats fitted with oil-fired boilers. There is, however, a distinct slowing-down in the rate of this conversion and construction, and it is felt that when existing contracts have been completed few, if any, more orders for such work will be given out.

## Road Making and Repairing.

The subject of road making and repairing is now one of great interest to the road user as well as to the engineer During the past few years very little new construction and repair work has been undertaken except to meet military requirements, and in every part of Europe much has to be

done to bring the roads and highways into as good a condition as they were before the war.

More than usual interest is being taken in this subject, as in one of the countries which was least affected by the war, concrete roads, at first tried as an experiment, are coming largely into favour. These are proving extremely durable, and although the cost of construction is higher than in the case of macadam roads, or even of roads covered with asphalte, or made with small stone and gravel bound together with tar or a bitumen compound, there is no doubt that the expense of repairing and of maintenance is so low that these roads show an appreciable financial advantage.

Fourteen years ago there were only six miles of concrete roads in the whole of the United States. These were found so satisfactory that this method of roadmaking was extended and developed, and by the end of last year no less than 11,000 miles of concrete road were in use in that country. For the present year the expenditure on new concrete roads in that country will amount to about 600,000,000 dollars, a fact which is sufficient answer to those few engineers who hold that concrete has not yet been proved to be a suitable material for road making.

The statement has been made that roads of this type gave way under the influence of damp, frost, and intense heat, and that they cracked and came to pieces under the hammering action of horse traffic and of iron-wheeled vehicles, but this view is flatly contradicted by those who have had lengthy experience in this method of construction. In many parts of England concrete roads have been laid down, and these have not only stood up to their work remarkably well, but their success has been such that many more miles of roadway constructed in that manner are to be built in the near future. A number of civil engineering and specialist firms are interested in the matter, and wherever new roads are to be constructed it would seem advisable that no steps should be taken until full particulars of the new method are obtained.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting in touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge*

*Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

### Agents Wanted Abroad.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

108. Hemp manufacturer in Croatia wishes to get into touch with rope manufacturers who would purchase hemp.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

*To be obtained at all Bookstalls.*

## SHIPPING INTELLIGENCE.

### Forthcoming Sailings.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

*Anchor Line.*—S.s. Circassia, for Bombay (Liverpool, December 18).

*Anchor-Brocklebank Line*—S.s. Matra, for Port Said, Colombo, Madras, and Calcutta (leaves London December 14); s.s. Maimyo, for Calcutta (Birkenhead, December 18); s.s. Blackwell, for Port Said, Colombo, Madras, and Calcutta (leaves London December 24); s.s. Mathura for Calcutta (Birkenhead, December 29); s.s. Imani, for Port Said, Colombo, Madras, and Calcutta (leaves London January 7).

*Bibby Line.*—S.s. Yorkshire, for Marseilles, Port Said, Colombo, and Rangoon (December 15); s.s. Derbyshire for Marseilles, Port Said, Colombo and Rangoon (Liverpool, December 29).

*Byron Steamship Line.*—S.s. Lord Broughton for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 23).

*Clan Line.*—S.s. Clan Cumming for Bombay and Persian Gulf (Birkenhead, December 17); s.s. Clan Macindoe, for Colombo, Madras and Calcutta (Birkenhead, December 30).

*Cunard Line.*—S.s. Phrygia, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, December 18).

*Ellerman's City Line.*—S.s. City of Manchester, for Calcutta (Birkenhead, December 20); s.s. Crosby Hall for Bombay and Karachi (Birkenhead, December 22); s.s. City of Lucknow, for Calcutta (Birkenhead, December 31).

*Hall Line.*—S.s. City of Calcutta, for Bombay and Karachi (Liverpool, December 15); s.s. Merton Hall, for Karachi (Liverpool, December 17).

*Harrison Line.*—S.s. Architect, for Calcutta (Liverpool, December 22); s.s. Inventor, for Calcutta (Liverpool, December 22); s.s. Inventor, for Calcutta (Liverpool, January 12).

*Henderson Line.*—S.s. Chindwin, for Port Said and Rangoon (Birkenhead, December 22).

*Holt Line.*—S.s. Achilles, for Port Said, etc. (Birkenhead, December 16); s.s. Helenus, for Port Said, etc. (Birkenhead, December 23); s.s. Eurypylus, for Port Said, etc. (Birkenhead, December 23).

*Johnston Line.*—S.s. Cundall, for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 24). A steamer will sail on December 24 for Syra, Smyrna, and Constantinople.

*Moss Line.* — S.s. Sitra, for Gibraltar, Algiers, Malta, Alexandria (with through transhipment to Moroccan, Algerian, Cyprus, and Syrian coast ports), (Liverpool, December 18).

*Prince Line.*—S.s. Black Prince for Tunis, Malta, Alexandria, Syrian Coast ports and Cyprus (Manchester, December 14).

*P. and O. Line.*—S.s. Karmala, for Bombay (London, December 17); s.s. Nore, for Colombo, Madras, and Calcutta, also taking cargo for Malta, Port Said, and Aden (London, December 17); s.s. Kaisar-i-Hind, for Bombay (London, December 31).

*P. and O. British India Line.*—S.s. Margha, for Port Sudan (London, December 17); s.s. Nerbudda, for Colombo, Madras, and Calcutta (London, December 24); s.s. Chakratta, for Colombo, Madras, and Calcutta (London, end of December); s.s. Neuralia, for Bombay and Karachi (London, January 7); s.s. Chyebassa, for Colombo, Madras, and Calcutta (London, January 15).

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has been dull during the week, buyers showing a very evident tendency to hold aloof, presumably in expectation of lower prices. The market in currants has been featureless. There is now much less demand for this commodity, especially for the lower qualities. It may be anticipated, however, that this phase will not be of long duration. Very small supplies of sultanas are available, but despite that fact, transactions have been effected at distinctly easier rates. There is nothing new to report with regard to figs. Large quantities of Persian dates are available, but there has so far not been any remarkable demand for them.

Coffee.—Prices have generally been easier, and business has been restricted. The futures market has been rather weak. Quotations are:—December, 56s., a drop of 2s.; March is unchanged at 52s. 6d.; May is 1s. lower at 53s.; July is 6d. down at 54s. 6d.; and September remains unaltered at 55s.

Sugar.—The free market has been somewhat depressed. West Indian crystallised is 11s. down at 72s., and American granulated has come to business at 80s. White Mauritius is 15s. down at 79s. Home refined met with a good demand at the official prices.

Oilcakes.—Linseed cake is 21s. 6d., a decline of 6d.; while cottonseed has come to business at 12s., a drop of 1s. Other transactions include Arachis cake at 14s. 6d. and coconut cake at 16s.

Oilseeds.—There have been a number of declines. Indian linseed has been steady at 27s., but rapeseed is lower, with Toria at 29s. 6d. and bold Ferozepore at 28s. 6d., both 2s. 6d. down. Indian cottonseed is 1s. up at 10s., but Egyptian is 6d down at 14s. 6d.

Seed Oils.—There has been a steady rise in prices. Linseed oil has come to business at 50s. Refined rape oil is slightly higher at 88s. to 90s., and the crude variety has gone up 10s. to 82s. Turpentine is unchanged at 105s.

## CURRENT PRICES.

General Produce.—Bacon, 217s. 9d. cwt.; butter, 336s. cwt.; cheese, 161s. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 5½d. lb.; cocoa (Ceylon, good to fine), 135s. cwt.; coffee (Costa Rica), 113s. 6d. cwt.; East Indian bold, 117s. 6d. cwt.; Mocha (longberry), 140s. cwt.; eggs, 40s. 8d. per 120; ginger (washed Cochin), 52s. 6d. cwt.; hams, 220s. cwt.; lard, 157s. cwt.; nutmegs, 1s. 1d. 110's to 180's; pepper (Singapore, black), 5d. lb.; and Muntok white, 1s. 0¾d. lb.; raisins (Valencia), 130s. 6d. cwt.; sultanas (Smyrna), 147s. 6d. cwt.; currants (Vostizza), 100s. cwt.; sugar (granulated), 96s. cwt.; No. 1 cubes, 100s. cwt.; Mauritius, 93s. 6d. cwt.; tapioca (fair Singapore), 2d. lb.; tea (Indian), 6¾d. lb.; Ceylon, 6¾d. lb.; Java, 4¾d. lb.; wheat (Australian), 121s. 6d. qr.; English (white), 94s. qr.

Hides and Skins.—London prices:—Ox and Heifer.—First, 90 lbs. and up, 8½d. lb.; 80 to 89 lbs., 8½d. lb.; 70 to 79 lbs., 8¼d. lb.; 60 to 69 lbs., 8¼d. lb.; 59 lbs. and under, 8¼d. lb.; cows (first), 60 lbs. and up, 7¾d. lb.; 59 lbs. and under, 7¾d. lb.; cows (second), 60 lbs. and up, 6⅞d. lb.; 59 lbs. and under, 7¾d. lb.; bulls (first), 7d. lb.; (second), 5⅛d. lb.; kips (first), 7¼d. lb.; (second), 5¾d. lb.; (third), 4¾d. lb. Calcutta prices:—Arsenic Cow Hides.—Agras, Rs.8.8 to 15.0 per 20 lbs.; Durbhangas, Rs. 6.0 to 7.0 per 20 lbs.; Patnas, Rs.5.0 to 6.0 per 20 lbs.; salted cows, Rs.4.0 to 8.8 per 20 lbs.; Arsenic buffalo hides, Rs.2.8 to 6.0 per 20 lbs.; skins—calf, Rs. 8.0 to 10.0 per 20 lbs.; goat, 140.0 to 160.0 per 100 pieces.

Metals.—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard), £78 5s. ton; electro, wire bars, £91 ton; gold bars, 116s. 9d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed number), 260s. ton; lead (soft foreign), £29 7s. 6d. ton; manganese Poti, 3s. 3d. unit; molybdenite, 60s. unit; nickel, £220 ton; platinum, 520s. oz.; plumbago, £37 10s. ton; quicksilver, £15 7s. 6d. bottle; silver bars, 47⅞d. oz.; spelter (G.O.B.), £32 12s. 6d. ton; tin (standard), £226 ton; tin plates (20 by 14), 39s. 6d. box; wolfram, 22s. 0½d. unit; zinc sheets, £53 ton.

Chemicals.—Acids:—Boric, 75s. cwt.; oxalic, 1s. 10½d. lb.; citric, 3s. 3¼d. lb.; tartaric, 2s. 4½d. lb.; ammonia (sulphate), £31 6s. 9d. ton; benzole (standard), 3s. 6½d. gallon; bleaching powder (35 per cent.), £24 ton; borax crystals, 41s. cwt.; cream of tartar, 215s. cwt.; Potassium—bichromate, 1s. 6d. lb.; chlorate, 8½d. lb.; caustic, £85 ton; nitrate, £68 10s. ton; permanganate, 3s. 1½d. lb.; prussiate yellow, 1s. 8½d. lb.; sulphate (90 per cent.), £29 ton; Sodium—crystals, 190s. ton; bicarbonate, £12 ton; bichromate, 1s. 0½d. lb.; alkali (58 per cent.), £11 15s. ton; chlorate, 5d. lb.; caustic (70 per cent.), £29 10s. ton; hyposulphite, £35 ton; prussiate, 1s. 1½d. lb.; nitrate, £23 5s. ton; sulphate copper, £41 10s. ton; sulphate iron, 150s. ton; glycerine (crude 80 per cent.), £105 ton; industrial (1,250 per cent.), £155 ton; lead (red), £53 ton; white dry, £59 2s. 6d. ton.

Miscellaneous.—Cotton (American, fully good mid.), 11.71d. lb.; linseed (La Plata), £22 10s. ton; rape (Toria), £32 ton; soya beans, £21 ton; palm kernels, £30 10s. ton; Oils—linseed, £47 10s. ton; soya, £57 ton; cotton (crude), £47 10s. ton; olive, 21s. 6d. gallon; ground nut, £71 ton; palm, £47 5s. ton; rape (crude), £72 10s. ton; petroleum, 2s. 3d. gallon; turpentine, 114s. cwt.; Rubber—plantation No. 1 crêpe, 1s. 1½d. lb.; smoked sheet, 1s. 0½d. lb.; fine hard Para, 1s. 3½d. lb.

## DRIED FRUIT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows under date November 30:—

Currants.—Business throughout the week has again been of very limited dimensions, the country refraining from purchasing, though this is normally the period of the season's greatest activity. This can only be attributed to unfavourable world-wide economic and financial conditions, the lack of resources, and unwillingness to make commitments through fear of lower prices. The strength of the Greek market has a stimulating effect on holders, who appear content to await the renewal of the demand instead of forcing sales at a time when buyers are indifferent. The s.s. Trentino has arrived, but only a small portion of her cargo is for the market. Quotations are:—Calamata and Pyrgos, 75s. to 77s.; Amalias, 80s. to 82s.; Patras and Gulf, 82s. to 90s.; Zante, 84s. to 88s.; Vostizza, 96s. to 104s.; old fruit, 60s. to 62s. Total arrivals from commencement of season to date, 14,470 tons.

Valencia Raisins.—Samples of Santa Ana brought a little relief to the buyers, a portion of her cargo landed tender and out of condition, but good fruit was quickly disposed of, ½-boxes realising from 130s. to 135s., ¼-boxes realising from 150s. to 155s., seedless selling at 124s. to 125s.

Sultanas are in steady demand at easier prices. Greeks move quietly in buyers' favour. Afghans—Arrivals per s.s City of Calcutta and Circassia: yellow qualities sold 120s. to 127s; red variety neglected. Quotations are:—Smyrna, 138s. to 152s.; Greeks, 145s. to 150s.

Figs.—The last arrival per s.s. Amasis is almost cleared. Quotations are:—Layers, 145s. to 160s.; Locoums, 160s. to 180s.; bags of naturals difficult of sale, 58s. to 65s.

## LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson, in their report for the week ended December 2, state:—The past week has witnessed a mild sort of reaction, both in spot and futures. The primary cause was the purchase of a "line" for future delivery, variously estimated at from 1,000 to 2,000 bales, by one of the leading concerns in the North of England. In ordinary times, such a purchase would have passed almost without notice, but with the conditions ruling at the moment it seemed to possess for many a rather more than ordinary significance. Alexandria futures at once jumped up, probably on covering against the above purchases, and a certain amount of "short" interest, both there and in Liverpool was liquidated. To-day's Manchester report is a trifle more cheerful, and the usual rumours about "more doing" are filtering through from that quarter. The spot sales of 1,400 bales consisted chiefly of upper cotton, types 1-4; to-day, quotations of upper are actually advanced 50 points. This improvement is not likely to be maintained, however, as cotton is freely offered at quotation prices. There was a little inquiry for Sakellaridis and white cotton, but only a small business resulted. Brown and Sudan cottons were neglected. At the moment, the market as a whole gives one the impression of marking time, but there is no real stability, and a very little encouragement either way would have a marked effect. With trade support still withheld, lower prices seem probable even yet. Quotations of upper show a decline on the week of 1d. for good fair to good, and 1½d. for fine and extra fine. Sakellaridis is 2½d. down for good fair and fully good fair, 3½d. down for good, and 4½d. down for fine and extra fine. Brown is reduced 1½d. for good fair to good, and 2d. for fine and extra fine. Fully good fair Sakellaridis 28.50d.

## SUPPLIES AND PRICES IN TURKEY

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

CONSTANTINOPLE, November 20.

The complete cessation of business with Russia has been offset to some extent by some sales negotiated for local consumption as well as for the Anatolian ports of the Black Sea, the effect of which has been to relieve the market somewhat.

The news received from Manchester records a rapid recovery in the prices of manufactures; this development, coupled with the movements of the exchange, has stopped the fall in prices on this market. There is some demand for winter clothing, but otherwise there is no business.

**Produce.**

Sugar.—The fall in prices continues in producing countries. Some offers at reduced prices have been made from Java, New York, and Marseilles. Java sugar in shipment from America is quoted at 17 dollars per 100 kilos, and American sugar at 21 dollars per 100 kilos c.i.f. Constantinople. In this market quotations are £69-72 per ton, while for sugar in Customs the rate is £T51-52 per 100 kilos.

Coffee.—Despite the fall in centres of origin prices are sustained by the rise in exchange and the lack of good qualities. Quotations per oke are:—Rio No. 1, Ps. 50; No. 2, Ps. 46-47; No. 3, Ps. 42.43, all for goods in transit.

Rice.—Prices have fallen in the chief European markets because of the heavy arrivals. Saigon No. 1, in shipment from Marseilles, is quoted at 170 francs per 100 kilos, and in this market at Ps. 25. American Bleu-Rose is quoted 17-17½ dollars per 100 kilos and Ps. 28-32 per oke in transit.

Petrol.—The market is firm, owing to the small arrivals and the rise in the exchange. The case of two bidons realises Ps. 560-665, and the tendency of the market is to rise.

Exports.—As regards exports, there is almost complete inactivity. The arrivals are unimportant, and no business has taken place.

Mohair.—The nominal prices are Ps.85 extra, Ps. 75 firsts, and Ps. 65 seconds.

Cotton.—Fifty bales have arrived from Adana. First qualities are quoted at Ps. 75-80 per oke, and seconds at Ps. 65-70 per oke.

RHODES.

The report for September states:—Business in sponges has been delayed because of the disagreement between the Italian Customs authorities and the exporters of Tripoli. The authorities lay claim to a tax of 15 per cent. on the value of the merchandise exported, contrary, it appears, to the conventions previously established. Shipments from Calymnos are held up for the time being at Benghasi for this reason.

## RICE EXPORTS FROM INDIA

Reuter's Delhi correspondent, in a message dated December 4, states that Burma traders will be allowed to export rice from January 1 next to any destination subject to licence. The Government estimate that out of 2,100,000 tons of white rice 1,000,000 tons will be available for export to foreign countries from Burma. This amount may be increased if India does not require the balance for herself. The Government reserve the power to reimpose the system of strict control should the rise in price necessitate such action.

Alexandria Water.—Interim dividend of 4 per cent. (4s. per share) on Ordinary, payable December 15 (Coupon 64).

## ON 'CHANGE.

### Marked Fluctuations.

(From Our Own Correspondent.)

London, Monday Night.

During the last few days the markets took a turn for the better, and this morning quite a cheerful note was in evidence on the improved news regarding the Irish situation, coupled with more favourable intelligence from abroad and the absence of Continental liquidation, which has been such a marked feature in recent weeks. Unfortunately, the brighter tone proved to be only a passing phase, for the astonishing result of the Seven Towns Loan brought about a fresh wave of depression, and the day closed with uncertainty prodominating most markets.

Gilt-edged stocks, which had been rather depressed on the financial outlook, have been much firmer, and despite the unfavourable opening this week, have more or less held their own. Foreign stocks are again closing a weak feature, while Greek securities continue to present a very depressed appearance.

There is little that calls for comment with regard to the other markets. Industrials were holding up well until the news of the loan result was received; subsequently irregularity prevailed, and there were a number of fluctuations. Oils have been a specially weak feature, but Rubbers have been the turn stronger.

Near Eastern securities have been firmer. Egyptian Guaranteed 3 per cent. are ⅛ up at 59½. Turkish Guaranteed 4 per cent. 1855 have been steady at 67½, while Greek Guaranteed 2½ per cent. 1898 are unchanged at 59½. Turkish 3½ per cent. Egyptian Tribute Bonds have picked up ⅝ to 53.

Greek securities have continued weak, and prices in a number of cases represent only nominal quotations. The 5 per cent. 1881 Loan is now 41, and the 5 per cent. 1884 issue is the same. The 5 per cent. 1890 Loan is again lower at 41, and Fundings a point below that, while the 1910 and 1914 Loans are quoted respectively at 32 and 41. The 1902 Loan is down to 31.

Banks have been variable. Agricultural 3½ per cent. Bonds have dropped 2¾ to 55, while the 3½ per cent. Guaranteed Bonds are three points down at 60. On the other hand, Imperial Ottoman Banks have risen 15-16 to 8. National Bank of Egypts are now 16 13-16, while Land Banks are quoted 4⅝, at which there are buyers.

In some cases a better tone has been in evidence among Land shares. Beheras have been a notably firm spot, rising ½ to 10, while the Preference shares are quoted at 2¾. Anglo-Egyptian Land Allotments are 3¼, while Egyptian Consolidated Lands are 1s. 4d. Delta Lands are 9d. up at 10s. 6d., while Gharbieh Lands are unchanged at 2. New Egyptians are 3s. up at 25s., but Union Foncières are unchanged at 3. Sudan Plantations have been firm and are closing 3-16 up at 4 7-16.

Among Miscellaneous descriptions Abyssinian Corporations are ¼, while Alexandria Waters are 6½, Morums 13s., and Egyptian Salts and Sodas 1⅞.

Oils have been firmer. Anglo-Egyptians are ⅛ up at 2⅞, while Roumanian Consolidateds are 9d. up at 20s. 9d. Phœnix is 12s. 6d. and Steaua Romana 18s.

## OIL OUTPUTS.

Anglo-Egyptian—Week ended November 28.—Gemsah, nil; Hurgada, 3,640 tons (previous week, 3,678 tons).

The production for October from the leased area of the Algerian Oilfields, Ltd., amounted to 42,673 kilos.

## CONTROL OF WHEAT AND FLOUR IN ROUMANIA.

By a Ministerial decision the flour mills of Roumania, states the Commercial Secretary to H.M. Legation at Bucharest, are to mill only one quality of flour, which will consist of the whole wheat except 23 per cent. of husk and 2 per cent. loss, leaving 75 per cent. flour. An exception to this rule is to be made, however, in the case of certain of the larger flour mills, which will receive the authorisation of the Under-Secretary of State for Reconstruction and Approvisionment to mill flour of luxury quality representing 5 per cent. of the wheat stocks. It is stated that this luxury flour will be sold to the pastry cooks at a minimum price of 4 lei per kilogram, while any surplus will be exported against compensation. The 5 per cent. quota of flour of luxury quality is declared purchasable only by the State, which reserves to itself the right of sale.

## NEWS FROM ALL SOURCES.

It is proposed to hold an Italian Exhibition in Alexandria during February, 1921.

Germany has shipped to Roumania chemical products to the value of four million lei.

During October 408 ships, conveying 32,365 passengers, arrived at Port Said from the Mediterranean.

Sucrerie et raffinerie de Roustchouc.—The annual general meeting will be held at Brussels on December 13.

There should be a good market for mowing and reaping machinery in Turkey with the restoration of normal conditions.

The area under tobacco cultivation in Transylvania has increased to 4,500 hectares, compared with 3,000 hectares for 1919. This year's production is estimated at 4,500 to 5,000 tons, or about 20 per cent. of the estimate for all Roumania.

A booklet entitled "British Government Securities and the Investor" has been issued by the London office of the Guaranty Trust Company of New York, summarising the investment features of several of the more important outstanding British Government securities.

The Commissioner at Athens of the Federation of British Industries reports that the works recently undertaken with a view to increasing the production of the salt mines at Anavissos, Greece, are believed to have been entirely successful. It is calculated that these mines will yield more than 60,000 tons of salt this year, and that the importation of this commodity should therefore no longer be necessary.

The following goods may only be exported from Greece with an export licence granted by the Greek Ministry of Supplies:—Animals in general, arms, biscuits, bread, boots, butter, cereals, condensed milk, codfish, coffee, cheese, eggs, flour, fodder, fuel (all kinds), gunpowder, dynamite and explosives, matches, metals (in general, raw or worked), olives and olive oil, paste foods, petroleum and petrol (benzine), potatoes, pulses, rice, salt, sugar, soap, timber (all kinds), wool.

# THE INDIAN MARKET.

## NEED FOR CARE BY EXPORTERS.

In an article in the *Board of Trade Journal* on "Trade between the United Kingdom and India," Mr. T. M. Ainscough, O.B.E., H.M. Senior Trade Commissioner in India and Ceylon, discusses the present conditions in the Indian market and points out that India at the present time is passing through a very difficult period of financial stringency and acute trade congestion.

"India, considered statistically," he says, "is in a much stronger position than certain other Eastern markets, and if only the goods could be moved up country and cleared into consumption, confidence would soon be restored. The consuming districts in the Mofussil are not heavily stocked, but they simply cannot afford to pay the prices asked by importers in the ports. Until dealers are willing to face their losses and liquidate their stocks, which were bought at the top of the market and at a much higher rate of exchange, it is difficult to see how any improvement in the situation can be effected.

"In the meantime the greatest care should be taken by exporting houses in this country not to add to the present difficulties by shipping goods which they may have reason to fear will not be taken up. The Eastern banks are carrying a very heavy financial burden in all countries of the East at the present time, and it is incumbent on the exporter in this country to realise this fact and to modify his commitments as far as possible until the position improves. There has been a considerable amount of business done with small Indian traders during the past two boom years by firms in the United Kingdom who have had little experience of the dangers and pitfalls of the market, and it is primarily to them that I would address this warning. . . .

"Despite the present difficult position in India, which I feel convinced is a temporary one, being due partly to the fluctuations of exchange, partly to a natural reaction after a great industrial boom, and mainly to depressed and uncertain world conditions, I still believe that the general state of the country is good, and there is cause for some optimism in viewing the future. The present monsoon, although it cannot be termed an excellent one, is a fair average, or what would be called in India 'a twelve-anna monsoon.' The country is still short of a great variety of goods, notwithstanding the present stocks in the ports, but purchases have been withheld owing to high rupee prices at the current rate of exchange. When the present abnormal situation is cleared, as I hope and believe it will be before next spring, I look forward to India continuing along the path of material progress in which she has made such great strides during the past few years, and I have little doubt that British trade will be able to maintain and extend its position and will materially contribute to the prosperity of a new and transformed India."

## COMPANY NOTES AND REPORTS.

### Madras and Southern Mahratta Railway.

The report of the Madras and Southern Mahratta Railway Co., Ltd., for the year ended November 24, states that the capital expenditure during the year was Rs.110.50 lakhs, viz:—On construction account, open line, Rs.46.70 lakhs; on suspense account, Rs.63.80 lakhs. Of Rs.46.70 lakhs charged to open line construction account, Rs.44.98 lakhs were expended on the broad gauge, viz., Rs.16.05 lakhs on works, and Rs.28.93 lakhs on rolling stock; and Rs.3.44 lakhs were expended on works on the metre gauge, which was reduced by a credit to rolling stock of Rs.1.72 lakhs. The gross earnings of the entire system amounted to Rs.630.81 lakhs, as compared with Rs.604.07 lakhs; while the working expenses amounted to Rs.342.58 lakhs, or 54.31 per cent., as compared with Rs.290.28 lakhs, or 48.05 per cent. for the previous year. With an increase in the gross earnings of Rs.26.74 lakhs and in working expenses of Rs.52.30 lakhs there was a decrease of net earnings to the extent of Rs.25.56 lakhs. Although 140 miles of metre gauge were made over to the Mysore Durbar on October 1, 1919, the increase in gross earnings has been well sustained. The gross earnings of the company's and State lines amounted to Rs.570.04 lakhs, being an increase of Rs.28.28 lakhs on those for 1918-19. The increase in coaching earnings was Rs.28.78 lakhs, in miscellaneous earnings Rs.1.93 lakhs, and the decrease in goods earnings Rs.2.43 lakhs. The working expenses amounted to Rs.309.55 lakhs, an increase of Rs.49.99 lakhs, the result being a decrease in the net earnings of Rs.21.71 lakhs. The working expenses of the entire system for the year amounted to Rs.342.58 lakhs, or 54.31 per cent. of the gross earnings, as compared with Rs.290.28 lakhs or 48.05 per cent. for 1918-19. The company's share of the surplus profits of the company's and State lines for the year 1919-20, less Indian income tax and Indian supertax, amounted to Rs.42,34,131, which has been paid by Government and remitted at 2s. 1½d. per rupee, realising £445,882 6s. 4d. The company's share of the surplus profits from the Mysore State lines for the year 1919-20 realised £9,488 1s. 7d. The surplus profits for the whole year therefore realised £455,370 7s. 11d. Over £167,000 of this is due to the high rate of exchange as compared with the old contract rate of Rs.15 to the pound. The interest on investments for the same period amounted to £28,814 0s. 5d., so that the total receipts for the year 1919-20 amounted to £484,184 8s. 4d., compared with £385,550 7s. 5d. for the year 1918-19. The directors recommend a payment on January 1 next of a final dividend of 25s. per cent., and, in consequence of the favourable rate of the Indian exchange as above-mentioned, a bonus of £3 per cent. from the stockholders' revenue account, in addition to the guaranteed interest of £1 15s. per cent. to be received from Government on that date under the terms of the company's contract, making the total distribution for the half-year £6 per cent., all subject to English income tax.

### Burma Railways.

The gross earnings of the Burma Railways Company for the year to March 31 totalled Rs.2,96,86,497, and working expenses Rs.1,63,67,461, leaving net earnings Rs.1,33,19,036, against Rs.1,23,21,888 for the previous year. The net capital expenditure on open line work and rolling stock amounted to Rs.15,01,594. The company's share of surplus profits, after deduction of Indian taxation, was £309,505, against £225,748. Coaching earnings improved by about 23 per cent. Goods earnings increased by 6.4 per cent. and working expenses increased by 17 per cent. Including £157,682 brought forward and reserve for excess profits duty £44,400, less net debit to surplus profits from November 1, 1919, to March 31, 1920, £652, income tax for 1919-20 £31,599, excess profits duty to March 31, 1919, £28,443, amount available is £141,387, plus net interest received, less charges, £4,620, making £455,513. Final dividend of 1¼ per cent. and bonus of 2 per cent., both less tax, is recommended, making 8 per cent., leaving £304,477, subject to excess profits duty, corporation tax, and income-tax, amounting to £124,000. Reserve fund, represented by securities, totals £53,030. Meeting, Gresham House, E.C., December 14, 11.30 a.m.

### Egyptian Salt and Soda.

The report of the Egyptian Salt and Soda Company for the year ended August 31 states that the soda works at the Wadi Natron have been closed down during the year. With regard to the Moharrem Bey factory, new contracts have been made for the supply of the necessary installation, and if no unforeseen delay in the delivery of the machinery occurs the directors hope that this branch may be ready towards the end of 1921. To complete these works £E40,000 has been set aside. Gross profits were £E215,427,052, from which is deducted general administration expenses £E5,074,181, interest on Debentures £E3,050,937, leaving a net profit of £E207,301,934. Directors have set aside for depreciation £E15,371,880, for writing down value of investments £E7,762,000, provision for eventualities £E7,000,000, leaving £E177,168,054. The balance carried forward was £E123,957, making £E301,125,054. Directors propose a dividend representing 30 per cent. on the share capital (6s. per share), to transfer £E40,000 to reserve to meet expenditure towards completion of the Moharrem Bey works, the balance of £E115,520,894 being carried forward. Meeting, Alexandria, Egypt, December 31.

### Bengal Dooars Railway.

The report of the Bengal Dooars Railway states that the general results of the working during the six months ended March 31, compared with those for the corresponding six months, show: Gross earnings, Rs.10,76,563, increase Rs.1,46,657; working expenses, Rs.4,66,697, increase Rs.49,895; net earnings, Rs. 6,09,866, increase Rs. 96,762; percentage of working expenses on gross earnings, 43.35, against 44.82; net earnings in sterling, less Indian income-tax, £38,117, increase £6,048; gain by exchange, £22,755, increase £18,372. The amount at credit of the net revenue account is £64,473, from which must be deducted £14,000, the amount of the 3½ per cent. interim dividend paid on the Ordinary stock on August 3, leaving £50,475. The directors have placed £5,000 to the reserve, bringing it up to £171,373, and recommend a bonus of 1 per cent. on the Ordinary stock for the six months ended March 31, 1920, less income-tax, carrying forward £41,473. It is hoped in future years to pay an interim dividend in April and to hold the ordinary general meeting and pay a final dividend in respect of the annual accounts to the previous March 31 in October. Ordinary stock dividend warrants will be posted on December 20. Meeting, Gresham House, December 16, at 3.15.

## THE ALEXANDRIA WATER CO., LTD.

### Interim Dividend.

NOTICE is hereby given that an Interim Dividend of Four Shillings per £5 Share on Coupon No. 64 is payable on and after the 15th of December, 1920, at Messrs. Barclays Bank, Ltd., 1, Pall Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Ltd., in Alexandria, upon the making of a declaration as to ownership in the form required by the above Banks, form of which will be supplied upon application.

Dated, Alexandria, 12th Nov., 1920.

By order of the Board,
K. B. WOODD-SMITH,
Manager.

The directors of the Empire of India and Ceylon Tea Co. announce a dividend of 2½ per cent. (5s. per share) on the preference capital, payable January 1.

The traffic receipts of the Smyrna-Aidin Railway for the week ended November 20 amounted to £11,348.

The board of directors of the Guaranty Trust Company of New York have declared the regular quarterly dividend of 5 per cent.

The numbers are announced of 476 four per cent. Egyptian Government Irrigation Trust Certificates, which have been drawn for redemption on January 1.

## NOTES OF THE WEEK.

### *King Constantine's Return.*

In spite of the Allies' warning the die has been cast in Greece; according to present plans, and in the absence of any *contretemps*, King Constantine will return to Athens next Sunday. The Greek Government would seem to have sent the King a formal notification of the result of the plebiscite, with a statement to the effect that the people regard him as "the emblem of national unity," but there is no record of any specific request to return. On the other hand, the Government is said to have stipulated that M. Streit and Commander Paparigopoulos, naval aide-de-camp, should not accompany the King to Greece. If this should be the case, the decision is a wise one, as it will undoubtedly make it easier for the Allies to re-open relations with King Constantine.

### *The Allies' Attitude.*

In the pursuit of the single-minded aim of peace and progress in the Near East we cannot but hope that the Allies will lose no time in making conjointly a new orientation of their Near Eastern policy. Last week it was suggested in these columns that the attempt to boycott King Constantine and the Greek Government would sooner or later break down in the face of independent action on the part of one or both of Great Britain's partners in the Entente. The *Temps* has since referred openly to what it describes as "France's resolve to come to terms with the Turks"; and if France experiences no difficulty in coming to terms with Mustapha Kemal—the *Temps* calls the act "an emancipation rather than a humiliation"—she will certainly not be long in making overtures to King Constantine, if such a policy offers any advantages. It will, therefore, be more consonant with the Allies' dignity if they make some attempt to appreciate the circumstances which have led to King Constantine's recall and to come to an understanding with him. After all, if their worst fears are confirmed, and King Constantine proves to be more militaristic and irresponsible than the ex-Emperor William, they owe it to their Serbian Allies, as well as to other States in the Near East, to protect them from the dread-inspiring Juggernaut whose return to the Greek throne they have refrained from vetoing.

### *Admiral Mark Kerr's Testimony.*

A striking contribution to an understanding of the part played by Greece from the early days of the war is made by Admiral Mark Kerr in the *Morning Post* of December 11 and 13. The two articles, although dealing with only a small part of the story, have some bearing on the general estimate of King Constantine. The Greek Government, moreover, is understood to be prepared to show that the Greek White Book which forms the basis of the Allied indictment against King Constantine is misleading in some important particulars. As an instance, it suggests that the telegram stating that the King's sympathies were with Germany was not an isolated message despatched on King Constantine's sole responsibility, but was sent with the knowledge and approval of M. Venizelos as a covering document to a longer communication from the Greek Government to the German Government—a communication which, significantly, was not printed in the White Book. Be all this as it may, the Allies in their own interests should not allow the matter to be canvassed in a dilettante fashion. We should prefer to see the question rapidly brought to a head by the Allies inviting the Greek Government to remove their misgivings, if it can. If after a careful inquiry into the whole subject the Allies are satisfied that mistakes were made on both sides prior to the departure of King Constantine from Greece, and that a better case can now be made out for the King, they should state so officially and rehabilitate him in the eyes of the world. If, on the other hand, full knowledge of both sides of the history of the early days of the war confirms them in their estimate of King Constantine, and they are satisfied that he cannot be allowed to expiate his offences, then they should tell Greece so. As things are at present, the Greeks are as convinced as King Constantine himself that Great Britain at least is labouring under a complete misapprehension, through relying for her information on French officials.

### *Greece and the Treaty of Sevres.*

It is apparently expected in some quarters that King Constantine, having received the homage of his people, will then formally abdicate in deference to the Allies' hostility to his person. Whether the situation calls for such heroic action on his part must depend on further representations on the part of the Allies, after they have had an opportunity of reconsidering their policy.

Digitized by Google

In the meantime the Allied Governments are thought to be exercised by the fear lest King Constantine should seek to outdo M. Venizelos by adding to the territorial accessions which the latter has secured for Greece. One of the first things that the King will learn on his return to Greece is that the Greek nation has no desire for further conquests at the price of continued mobilisation, stagnant trade and excessive financial burdens. The only sphere in which he can hope to eclipse M. Venizelos is in restoring peace and prosperity to his distracted country. He will notice the haste with which the Allies, having given Greece Smyrna, are anxious to take it from her again, and, if he has the intelligence with which he is generally credited, he will realise that the only policy which offers to bring him personal success is to make Greece administratively efficient, and to trust to her aspirations being met when she is equal to the new responsibilities.

### *A Round Table Conference.*

If the Allied Governments can bring themselves to regulate their relations with Greece in conformity with their own interests and the interests of the Near East, their next step might well be a conference at which British, French, Greek, and Turkish representatives were invited to arrive at a settlement which, while not ignoring the facts of the war, promised to restore peace to the Near and Middle East and to leave the various peoples free to concentrate their efforts on economic reconstruction.

### *The Fiume Trouble.*

Three small warships having been seized by their crews and placed at Signor d'Annunzio's service, the magnetic poet has been encouraged to continue on his own erratic course. A Parliamentary Delegation, composed of fifteen members, which interviewed him last week, returned to Rome in optimistic mood, and it looked for the moment as if the end of an impossible situation was at hand; but the next day two torpedo craft suddenly transferred their allegiance to the poet, and he was so charmed by this tribute to his popularity that he seems to be now determined to prolong the run of his comedy. Evidence accumulates that Fiume is thoroughly tired of him, and ready to recognise the Treaty of Rapallo the minute its "liberator" will allow it to do so, but d'Annunzio is reported to be reckoning on a serious split within Yugoslavia, and to be gambling on the chance. According to one report a republic has actually been proclaimed in Croatia, and Raditch, the leader of the Peasant Party, is working in conjunction with d'Annunzio. But the source of the report renders it suspect, and by the time these lines are in print it will probably have been contradicted.

### *A Bomb in Bucharest.*

On Thursday of last week a bomb exploded in the Roumanian Senate, shortly after the opening of the sitting. The Bishop of Orada-Mare was killed on the spot; M. Grecianu, the Minister of Justice, was so severely injured that his life was despaired of; and the President of the Senate, General Coanda, and two other persons were also wounded. The bomb, which was of the clockwork type, is supposed to have been placed overnight behind the presidential chair, and the outrage is regarded as an isolated Anarchist crime. A state of siege has been declared in Bucharest as a precautionary measure; and all parties have combined in denouncing the outrage, which has caused the greatest indignation throughout the country. Socialism had never been able to obtain any hold on Roumania until very recently, and Anarchy made no appeal to the Roumanian peasant. Probably for those reasons, the country has been singularly free from outrages such as that of last week, and it is to be hoped that this instance will long remain a solitary one.

### *France, Cilicia and Syria.*

That France has been feeling the strain of the Syrian mandate for some time has been clear to close observers; and lately some ingenious proposals have been put forward by French writers for enabling her to ease the burden while still keeping the position of Mandatory. Last week General Gouraud and M. Leygues made statements of much interest on the subject before the Foreign Affairs and Finance Commissions. Both speakers indicated clearly their wish that France might soon be in a position to evacuate Cilicia, where the Turks were giving her much trouble, but to keep Syria, the value of which to France they very naturally rated high. General Gouraud was particularly outspoken in his praise of the Turks, and in stating his opinion that it was not France's concern if Greece was unable to make the military and financial sacrifices necessary for the retention of Thrace and Smyrna; and the French Prime Minister was equally frank in expressing his belief that before long the Allies would agree to give Turkey "an honourable peace."

### *A Turkish Victory.*

The opinion is undoubtedly gaining ground that the Treaty of Sèvres has been rendered unworkable by the course events have followed since it was prepared, and that in view of recent happenings it might be not only generous, but wise also, to come to terms with the Turkish Nationalists. If the responsible statesmen of the Allied countries adopt that view, we shall most certainly not quarrel with it; but until it is adopted it seems strange for a leading General of one of the Allied countries to suggest that it is no concern of his country to lend support to the enforcing of the Allies' terms on the enemy. It will be interesting to see how French opinion will be affected by the news of the defeat which, according to the *Temps*, has been inflicted on a French force some forty miles south-east of Latakia by the Turks. The latter are reported to have captured prisoners and war material, besides killing a number of Frenchmen. The *Temps* regards the incident as a fresh reason for revising the Treaty of Sèvres—an argument which will probably cause much surprise on this side of the Channel—and protests against France being called on to sacrifice men in Cilicia in order to uphold Greek pretentions in Smyrna.

### *Indian Politics.*

The news from India continues to be encouraging to those of us who have maintained an attitude of cautious optimism in a situation where there are no precedents to rely on, and many real grounds for anxiety. To borrow a metaphor from medical science, the body politic is reacting against the poison injected by the advocates of non-co-operation, and if the reaction was at first somewhat feeble, it is gathering strength as it proceeds. Men who carry weight have of late been speaking out: the important province of Bengal has ranged itself definitely on the side of orderly constitutional advance; and the equally important, if less vocal, intelligence of the United Provinces is clearly hardening against the attempts to wreck its most cherished educational institutions, the established Hindu University at Benares, and the embryo Moslem University at Aligarh. Madras appears to have ignored the cult of non-co-operation in its devotion to the complex social question of brahmanical supremacy, a question which it must take the lead in solving, and there are grounds for hoping that the other large provinces have secured, at the least, legislatures which will work. Meanwhile, the unconstitutional party is obviously at a loss for new expedients, and the significance of that fact will be apparent to every practical politician; the original attack has failed, and the tacticians are seeking for an inspiration which may result in restoring their position.

### *The Agitators' Nemesis.*

It looks, indeed, rather as if the non-co-operators would shortly come to be regarded as a public nuisance. Many classes are being offended in succession, and parents in particular, who still count for more than undergraduates, though they make less noise, resent bitterly the tactics which threaten to destroy their authority over their sons. As to the latest development recorded in the cables, the interruption of funeral ceremonies, we may be confident that, though some fanatics may approve, Indians in the mass will condemn measures which outrage their deepest feelings and interfere with the most sacred of their religious obligations.

Digitized by Google

It is quite possible that, if the agitators persist in such forms of activity, one or other of the new legislatures may voice a popular demand for their forcible suppression, a step which would justify an immediate change of front on the part of the executive, but in any case the present indications are that the authorities have acted wisely in allowing plenty of rope. The agitation has at least afforded a crucial test of the fitness of India to take even the first steps towards responsible self-government, and if India stands the strain, she may look for much more rapid progress than anyone expected when the new constitution was promised three years ago.

### *Sedition and Intimidation.*

No one familiar with Indian conditions will be surprised that the attempt to wreck the constitution has been marked by the employment of religious intimidation in the form with which the country is unhappily familiar. The act of voting has, we are told, been represented as a sin ranking in magnitude with the slaughter of a hundred cows, and since to kill a single cow brings guilt which no Hindu can contemplate, the use of such a threat has probably interfered materially with the elections in which it was employed. We trust the Government will draw a clear distinction between sedition against themselves, which they have agreed to tolerate for the moment, and this form of intimidation, which is treason against the whole future of India. Experience shows that in electioneering, as in other forms of human activity, bad habits are quickly acquired, while their subsequent eradication may be a matter of the greatest difficulty: the habit of imputing sin to political opponents is one which might very easily become prevalent, and no effort should be spared to prevent its growth by the application from the outset of the severe penalties already provided by the law.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### The Opposition's Collapse.

In the early part of the week there was a great flourish of trumpets from the Opposition; sage heads were nodded, and the newspapers informed us with many headlines that we were about to see what we were about to see. Big business denounced Mr. Austen Chamberlain, and even announced his successor; the Wee Frees denounced Mr. Lloyd George as a spendthrift; the Labour men denounced militarism in Mesopotamia, and the *Daily Mail* denounced everybody, to the extreme anguish of the *Daily News*, which hates to see that great Liberal virtue, economy, coyly entering Carmelite House. The Government, like the Jackdaw of Rheims, was cursed all round.

But nothing whatever happened. The House of Commons, bargee fashion, turned round and denounced the *Daily Mail*, to the indignation of all its contemporaries, which had to advertise the hated rival in their own reports. Big business collapsed, after its habit. The Wee Frees, bereft of Mr. Asquith, who was away at Paisley, collapsed, after their habit. Labour mostly forgot to turn up, after its habit; and Mr. Austen Chamberlain won all along the line.

There is something very puzzling about Mr. Chamberlain. He is always under-estimated by his fellow politicians—not, I think, by the public—and consequently he always surprises them by the excellence of his speech. He confounded all the prophecies of a huge deficit; he gave facts and figures to show that the Government was steadily economising in every department where it could do so at the moment and—he sat down. Nobody attempted to answer him. The Opposition had a case, and they made the worst of it.

### The Irish Problem.

It has been a strange week in Ireland. The forces of order have made themselves heard once more, the Galway County Council, a Sinn Fein body, condemning the assassinations and arson committed in the name of Sinn Fein; while Father O'Flanagan, a courageous Roman priest, sent a telegram to Mr. Lloyd George openly advocating peace. The fact was announced—what had been surmised by the well-informed—that the Government has been carrying on negotiations with prominent Irishmen with a view to an accommodation. it has neglected no road that seemed likely to lead to peace.

But the hopes built upon these happenings were rudely disturbed. It became necessary to proclaim martial law in the south-west counties of Ireland; and outside Cork, another ambush of British forces was carried out with fatal results. The now inevitable reprisals took the form of firing Cork; several of the main streets and public buildings of that city have been reduced to ruins, and panic set in among the private inhabitants. Immediately following upon this, the Bishop of Cork issued a denunciation of the policy of ambush as both cowardly and immoral, and gave notice that he would resort to the extreme measure of excommunicating any who took part in it. It is hardly likely that this strong measure will fail of some effect; meanwhile, the people of Cork have petitioned the British General in charge of the garrison there to protect them, and he has, of course, promised to do so.

The proposed "truce of God" is evidently not yet. But despite these outrages and reprisals, there seems some reason to believe that Ireland itself is revolting against systematised murder as a means of securing autonomy. It is by no means too soon.

It is understood that the semi-official negotiations are to continue, but it is clear that they will have little hope of success while ambushing is a daily occurrence.

### The Abbey and St. Paul's.

The Westminster Abbey fund progresses slowly but steadily; there are few big donations, but rather more than half the amount required has been raised. Meanwhile, St. Paul's Cathedral is again in difficulties; it is the old trouble of too large a dome pressing on inadequate pillars. These are gradually being rebuilt and strengthened, but the cost is heavy. St. Paul's, however, is not making a general appeal, partly in order not to compete with the Abbey; the Cathedral is the peculiar property of the City, and it is obtaining help quietly from City men. About £10,000 has been raised; it is believed that £100,000 will be required.

### Judges' Salaries.

There is a good deal of talk at the Bar as to the urgent necessity of raising the judges' salaries. When the salary of a Judge of the High Court was fixed at five thousand a year, it was a very considerable sum; now its value is in any case less than half, and about fifteen hundred a year is deducted in taxation. A judge is, of course, entitled to a pension when he retires, but it is so much less than his salary that several judges really cannot afford to retire, in spite of increasing deafness and other physical infirmity.

An equally serious consideration is that if the judges' salaries are not increased—it is suggested that they

should be doubled—it will be difficult in future to get the best men at the Bar to accept judgeships. For various reasons, not least of which is that of the prestige which attaches to a judge, distinguished counsel are ready to incur a financial loss when they are promoted to the Bench. But they cannot be expected to reduce their income beyond a certain amount, and the best men at the Bar would consider a mere five thousand a year disastrous.

The judges can hardly strike, or go in procession to Trafalgar Square, to exploit their grievances. But it is common knowledge that the question of Ministerial salaries is shortly to be discussed, and the whole problem could well be considered together.

The most monstrous case, of course, of all is the five thousand a year of the Prime Minister, and the fact that there is no pension is equally inequitable. In the past rich men have held the post who did not want the pension—both Mr. Balfour and Campbell-Bannerman were wealthy, Gladstone was never poor, and the Salisburys have never yet begged their bread in the streets of Hatfield; but both Mr. Asquith and Mr. Lloyd George are poor men. It is generally felt that any man who has once been Prime Minister should be entitled to a pension. It would hardly ever happen that more than two men would be drawing the pension at the same time.

**Club Troubles.**

The clubs are again in difficulties. All except the National Liberal have put up their subscriptions, but, apparently, the increase is not enough, and a further levy will have to be made, which, however, will operate to reduce the membership. There are complaints, too, that coffee-room charges are extortionate. I cannot speak generally, but at the only two clubs which I frequent they serve a better dinner for five shillings than at a restaurant for seven-and-six; and the only better and cheaper catering that I know is in the restaurant cars of the Great Eastern Railway, which are uniformly excellent.

But the financial straits of some of the clubs are so serious that they have been driven to the most desperate of all reforms—the admission of ladies, not as guests, but as members. In the old days the only woman who crossed the threshold of the average club was the charwoman; and I remember a serious discussion on club casuistry—if a member was dying in the club smoking-room, and his wife called to see him, would the committee be justified in letting her in? But now one of the staid service clubs, where admirals and generals snore in unison, is about to admit women as members—W.R.A.F.'s and W.R.E.N.'s of high degree, presumably, and others may have to follow suit. Probably the Athenæum will be the last to bow the knee to the conquering petticoat; after all, it is the only place where the Bishops can escape their wives.

**Cambridge and Women.**

But Cambridge has done this week what the clubs dare not do—repulse the women. By a fair majority Tabland has rejected the plea that women should have the full privileges of the University; the country clergy, as usual, are blamed for the adverse vote—I know not with what truth. There has been a good deal of derisive comment on the vote from the feminists, but I have heard some unregenerate males openly confess their joy at the result in language whose strength entirely acquitted them of any connection with the country clergy.

**Unemployment.**

It has become quite a common thing for the unemployed to seize public buildings, such as libraries, municipal baths, and so on, and to use them as committee rooms. Several more instances have been reported this week; no damage is done, and no serious protest is made by the authorities; in fact, the thing is treated quite good-naturedly. In most cases an amicable arrangement is come to, and the town hall or library is vacated after a few days. One or two nervous municipalities have begun to guard their town halls, but there has been no attempt to damage property, and the behaviour of the men concerned has usually been perfectly "correct" in circumstances that might easily have led to trouble.

**The Week's Books.**

Two stupendous works on the soul have been sent to me this week. The first, "In Search of the Soul" (Kegan Paul), is by Dr. Bernard Hollander, the well-known mental specialist, whose "First Signs of Insanity" is a standard work. (This latter book, by the way, got me into an awkward difficulty some years ago. I bought it for a Christmas present for a medical friend, and a volume of somebody's sermons for a parson. Unluckily, I left the bookseller to dispatch them, with the result that the doctor, who was an agnostic, received the sermons, and the parson, who was a rising preacher, obtained a text-book on insanity. Things have never been quite the same since.) Fortunately, the present work would do for either doctor or parson, since the general conclusion is that the soul is still beyond definite knowledge, and only to be conceived by faith.

The second book of the kind is "From the Unconscious to the Conscious" (Collins), by Dr. Gustav Geley, Director of the International Metapsychical Institute at Paris. Its general thesis is that of Schopenhauer without his pessimism, a kind of Schopenhauer without tears. An unconscious will strives ever towards consciousness, and this is the divine order and purpose of the universe. It is a curious combination of scientific reasoning and emotional writing; the author rejects Darwin, ignores Bateson, sneers at mysticism, yet teaches that humanity has a divine spark at the very centre of the soul—the essential mystical doctrine—and believes in reincarnation. It can best be described as a much-modified Bergson; it is very stimulating reading, but the logic is frequently defective, and it will be accepted by the emotional rather than the scientific.

"The World of Sound" (G. Bell and Sons), by Sir William Bragg, F.R.S., is frankly more to my taste than an inconclusive discussion on the soul. It is as interesting as the celebrated lectures delivered by Tyndall forty years ago on light, heat, and sound; and like those lectures, these also were spoken at the Royal Institution. They discuss sound in music, sounds of the town, country, and sea; and sounds in war.

Mr. H. G. Wells has spent a fortnight in Russia, has written a book about it, and is now busily quarrelling with Mr. Churchill over the latter's criticism of his work. Mr. Wells may be described as generally friendly to the Bolshevists in the book, "Russia in the Shadows" (Hodder and Stoughton), but his remarks on their weaknesses are not particularly encouraging. He holds that nobody else could rule Russia, at any rate, at present; but he says "the credit and industrial system that produced commodities has broken down, and so far the attempts to replace it, by some other form of protection, have been ineffective. So that nowhere are there any new things."

That is rather damning; still more is the forecast that if this continues, "Nothing will be left of Russia but a country of peasants; the towns will be practically deserted and in ruins; the railways will be rusting in disuse. With the railways will go the last vestiges of any general government. The peasants are absolutely illiterate and collectively stupid, capable of resisting interference, but incapable of comprehensive foresight and organisation. They will become a sort of human swamp, in a state of division, petty civil war, and political squalor; with a famine whenever the harvests are bad; and they will be breeding epidemics for the rest of Europe. They will lapse towards Asia."

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## GREECE.

ATHENS, Nov. 27.

**The Plebiscite.**

The Government has definitely decided that the plebiscite on King Constantine will take place on November 22 (O.S.). As soon as the result is known the King will be invited to return to Athens.

A meeting was held yesterday at the Liberal Club here by the Venizelist deputies and ex-deputies, who discussed the question of the attitude to be adopted by their party with regard to the plebiscite. As a result of this meeting the Liberals issued a *communiqué* to the Press to the effect that the plebiscite about to take place is not considered necessary, and the Liberal Party, in consenting to it would be instrumental in an action the sole object of which is to transfer the responsibility for any consequences that might arise as a result of the King's restoration from the Government to the people. The *communiqué* points out that the elections of November 1, by which over 40 per cent. of the electors opposed the restoration of King Constantine, have proved sufficiently what the people's sentiments are. A plebicite would not, therefore, be the sincere opinion of the Greek people, but merely the product of falsification and the result of a psychological pressure, in view of the conditions under which it will take place and seeing that it concerns a person already recognised by the Government as the legitimate King of Greece, and that same Government is to-day ruling in his name. The *communiqué* finally states that the Liberals will hold the Government responsible for any consequences arising as a result of the plebiscite to which the latter has invited the people, who are completely in the dark as to the real position of the dynastic question from an international point of view.

**The Return of the Princes.**

Prince Andrew, Prince Christopher, and their sister, Grand Duchess Mary, arrived in Athens from Switzerland last Tuesday. They were received at the Piræus by their mother, the Dowager Queen Olga, the Council of Ministers, and the Mayor of Piræus, with the Municipal Council. An immense crowd had gathered on the quay and cheered the Princes, who immediately departed in their motor cars for Athens. On Boulevard Sygros, and about a mile or so outside the capital, the crowds were so dense that the Royal motor cars were unable to continue their journey, and the Princes alighted to thank the cheering people. They were promptly seized and carried shoulder high to the Royal Palace. Prince Andrew, in a short speech from the balcony of the Palace, thanked the people for their great reception, and added that both he and his brother were proud to belong to such a noble nation.

On Wednesday morning the Princes visited the Prime Minister. The Government has decided to reinstate the Princes in the Greek Army, with the rank held by them prior to their departure from Greece in 1917.

**A General Amnesty.**

The Government *Gazette* has published a Royal Decree, by which general amnesty is granted to all political offenders, whether their case has already been dealt with or not. This amnesty does not, however, include those connected with the disturbances which took place in Athens on August 13 as a result of the attempt on M. Venizelos's life in Paris.

**A Hard Worker.**

M. Demetrius Ralli, the President of the Council of Ministers, is 80 years old, although he himself will not admit that he is more than 76. In spite of his great age, the Greek Premier is a very hard worker. Two days ago he worked at the Ministry for Foreign Affairs unceasingly from 11 a.m. to 10 p.m. without partaking of any food during all these long hours. It is rumoured, however, that he drank about half a dozen small cups of Turkish coffee, which, as is well known, is a first-class stimulant.

## ROUMANIA.

BUCHAREST, November 27.

**Betrothal of Prince Carol.**

The *Monitorul Oficial* announced on November 21 the betrothal of Crown Prince Carol of Roumania to Princess Helen of Greece, which took place at Lucerne in the presence of Queen Marie of Roumania and the Greek Royal family.

**The Order of Michael the Brave.**

According to the yearly custom, a banquet was given by the King to the holders of the order of Michael the Brave, which is the highest military order in the country.

Besides the King, who is the Master of the Order, 158 officers of all ranks, regular and reserve, took part, headed by General Averescu, the Prime Minister. The first toast—to the Cavaliers—was given by the King. General Averescu replied on behalf of his colleagues of the Order and in the name of the Army, assuring the King that he could rely on them in case of any danger, and that the spirit of sacrifice and love for the country reigned supreme in the Roumanian Army.

**Press Telegraphic Service.**

Beginning on November 20 Roumania has resumed the press telegraphic service with England, Belgium, Greece, France, Algiers and Tunis, which was suspended during the war. Telegrams will enjoy the usual 50 per cent. reduction of charge.

**Trial of Socialist Leaders.**

After a trial lasting four weeks, seven of the Socialist leaders who were arrested last month, when they attempted to bring about a general strike, have been sentenced to five years' penal servitude, with liberty to appeal. The majority are members of Parliament; they were judged not by the Civil Courts, but by the Military. The Government, in explaining the trial and sentence, says that these men were sentenced not as Socialists, but as agitators and conspirators against the State; in other words, that they are paying penalty for their acts, and not for their principles.

The general feeling is that the sentence is rather too severe. The trial had two sides: political and juridical. From the political point of view it is considered to have been a mistake, as it gave the impression in some quarters that the Government meant to deal a blow at the Socialist party before the opening of Parliament, whereas it has actually given the leaders a chance to pose as heroes, and has thereby strengthened their party. From a juridical point of view it is held that they should have been judged according to the Trancu-Jassi Law and not under military law; for, with the Armistice two years old, the peace treaties ratified, and the army demobilised, the country could hardly be regarded as still in a state of war.

**Destructive Gale in the Black Sea.**

Further details of the storm which raged over the Black Sea a week ago show that it was of quite exceptional severity, and that besides causing much damage to shipping it also led to the loss of many lives. The Roumanian steamer Emperor Trajan, which left Sulina on November 19 for Constantza, encountered terrific weather, and after proceeding about five miles was forced to put back to Sulina; and she was not able to resume her interrupted voyage until the 23rd—a delay of five days. From Varna comes the report that two boats were sunk with all hands, and at Sulina and around Snakes Island the gale played havoc with the fishing boats, and about 200 fishermen are said to have been drowned.

**The Danube: Navigating Troubles.**

The lowness of the Danube has already impeded navigation of the river. Many sandbanks have formed, and have caused several barges to strand. Now, on top of this trouble, there is every prospect that the river

Digitized by Google

will be frozen this year. In that case the consequences will be most unpleasant for the country, and especially for the riverside towns, which will have difficulty in providing themselves with fuel and other necessaries. Moreover, it will injure trade considerably, as large boats will be debarred from calling at Galatz and Braila. Constantza will thus become the only port available; and it is practically cut off from the rest of the country, as the Borcea bridge over the Danube has not yet been repaired.

## TURKEY.

CONSTANTINOPLE, Nov. 29.

**The Negotiations with Angora.**

The event of the week, so far as local politics are concerned, has been the return of the Government's delegate to Angora. The identity of this courier has now been allowed to leak out—which is fair ground for the assumption that the essential communications between the Cabinet and Mustapha Kemal have passed through a totally different channel—and he is known to be a certain Staff Captain named Neshet Bey, who returned to Constantinople, apparently without any "camouflage," by a Turkish steamer from Ineboli, with the appropriate name of Umid (Hope). He arrived in Constantinople on Monday morning, and immediately had a long interview with the Minister of the Interior, Marshal Izzet Pasha. Since then the Cabinet has held several important meetings, and there can be no doubt that the Government is on the eve of taking decisions that may have far-reaching effects. Yet the only official information that is vouchsafed to the docile public is that "the purpose pursued by the Government in sending an agent to Angora was to establish a preliminary contact with the Anatolians. This contact has now taken place. Telegraphic communications have been established. The Government will act for the best." In spite, however, of this official reticence, there are grounds for believing that the Nationalists, while not exactly rejecting the olive branch, still maintain their fundamental demand, that is, the drastic modification of the Treaty of Sèvres. The result of the Hellenic elections will certainly have inspired them with the same hopes as those which have arisen among Turks of another colour, and they will be alive to the advantages of arriving at an understanding with the Allies, as an alternative to relying upon the Bolshevists to "save" Anatolia and Islam from the wicked Imperialists. It is not surprising, therefore, that the Government should have been informed that an official delegation would be welcomed—under certain conditions.

This delegation was to have left for Angora immediately, but the conditions happen to include one which necessitates obtaining an assurance from the Allies that the Treaty of Sèvres will be modified in accordance with certain desires of the Nationalists. Thus the real problem has been definitely enunciated at last, for, as has been repeatedly stated in previous letters, the fundamental quarrel of the Nationalists is with the introduction of Greek dominion in Anatolia. It is true that there are several other not unimportant desiderata put forward by Mustapha Kemal, and many more by the extremists of the Unionist school; but if the above-mentioned matter could be settled, it would not be long before Anatolia settled down once again. Thus, the chances of the present Cabinet's success depend entirely upon the willingness of the Allies to reconsider the Treaty of Sèvres, chiefly as regards those clauses which affect Smyrna. Whether the Allies, singly or collectively, are willing to take any action in the direction indicated, and upon what other circumstances that action may depend, are questions which are beyond the scope of this letter.

**Anatolia.**

The exact state of the relations between the Nationalists and their Bolshevist "allies" has become a subject

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR AND MIDDLE EAST.

*Embodies the following advantages:—*

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

UNITED CIGARETTE MACHINE CO. Inc.,
80, Coleman Street,
LONDON, ENGLAND.

Digitized by Google

of absorbing interest, although information on the subject is so scanty, unreliable, and contradictory that it is impossible as yet to come to any definite conclusion. It seems tolerably clear that there has been a rift in the lute, but it is by no means clear whether this was caused by Bolshevist apprehensions as to the possible results attendant upon a Turkish advance to the Armeno-Azerbaijan frontier, or whether it was caused by Bolshevist pique because the overtures of the Central Government, a "capitalist" and "imperialist" concern, were not scornfully rebuffed. It is only certain that hostilities against the Armenians have ceased, temporarily at least, and as a result of an armistice that was practically imposed by the Soviet Government of Moscow. On the other hand, it is common knowledge that the Nationalists accepted Chicherin's offer, made some three or four months ago, that frontier disputes with Armenia and Persia should be settled by the friendly mediation of the Moscow Government. Unless the Nationalists have succeeded in persuading the Bolshevists that they are bluffing the Allies and the Central Government, however, the Moscow Government could hardly regard the progress of affairs with a benevolent eye. The order to Kiazim Karabekir's army to withdraw to the west of the Arpa River, and the denunciation of the Brest-Litovsk Treaty, therefore, may be regarded as a sharp intimation to Angora to "toe the line," rather than as an indication of Bolshevist fears of a general uprising in Azerbaijan if the Turks reached the frontier, although this consideration must also have had some weight in the Soviet Councils.

Meanwhile the "Communist Party" in the Great National Assembly continues its activities, but so far its only practical success has been the acceptance by the Assembly of its proposals to make Anatolia "dry." Any shopkeeper in whose establishment the smallest quantity of "raki" is discovered is fined £T50, and the liquor is immediately thrown away. It is reported that these measures are being rigorously applied, but one may be permitted to doubt whether the interdiction is extended to the very apex of the Nationalist pyramid, for Mustapha Kemal used to have a nice taste in wines.

**Nemesis.**

During the administration of Damad Ferid Pasha, a determined effort was made to bring to justice some of the numerous criminals implicated in the massacres and deportations of the Armenians during the war. Unfortunately, however, but as usual also, the special Court-martial formed for the purpose was utilised for certain unworthy political purposes, and a number of distinguished Turkish personalities were sentenced to various penalties for having taken part in what was called the "pillage" of Yildiz. One more turn of the wheel has brought the other side into power, and no time has been lost in taking advantage of the situation. Thus "Kurd" Mustapha Pasha, the President of Damad Ferid Pasha's Court-martial, has now been under arrest for some time, under an accusation of having rendered illegal judgments. Any stick is good enough for certain purposes, and the justice or otherwise of the charge is really a minor detail; but the outlook for Mustapha Pasha is certainly somewhat gloomy, or would be if it were not practically certain that there will be another amnesty very shortly. After all, Mustapha Pasha is a patriot, and in Turkey every patriot is condemned to death sooner or later. But it is astonishing how few succumb.

**The Russians.**

With the departure of the bulk of the refugees for the various camps which have been placed at the disposal of the French authorities, matters have greatly improved during the last week. The three thousand odd persons who have been permitted to land here are encountering the greatest difficulties in finding accommodation, and certain householders are fleecing them pitilessly. On the whole, however, they seem to be managing somehow, although heaven alone knows how. One or two lucky ones are staying at the Pera Palace Hotel, but they must have had a stock of valuables with them.

## ASIA MINOR.

SMYRNA, November 18.

**The Fall of Venizelos.**

The entire Greek population of this province consider that "Old Greece" has committed suicide by dismissing from power Venizelos. The result is altogether inexplicable to them because the Greeks of Asia Minor are believed to have voted solidly for Venizelos. Business is quite paralysed in consequence of this affair, and the money changers are refusing to accept Greek money, pretending that they do not know the rate of exchange.

The High Commissioner, M. Sterghiades, a staunch Venizelist, has resigned his post, and as he has ruled this province with a strong hand, his departure leaves the direction of affairs without a head. On the other hand, the Turks are jubilant; in fact, the Greek people have played completely into the hands of their enemies by rejecting Venizelos. In the Smyrna bazaars the Turks assume mock serious airs and pretend to lament the sad loss of "Our dear Prime Minister." The Greek population seem completely stunned, and Smyrna has about the same melancholy appearance as it had when the Germans were rushing towards Paris in 1914.

SMYRNA, November 23.

**A Theatrical Demonstration.**

Officers of the Greek Army and Navy are emphatically showing themselves strong for what they call "their Dear King Constantine." Last night at the Smyrna Theatre groups of officers posted photos of Constantine round the boxes and vociferously cheered every time one of the photos was affixed. The performance was "The Chocolate Soldier," but before the orchestra was allowed to play the music of the piece they were compelled to play Constantine's hymn, which was enthusiastically applauded by the officers. A British officer, in uniform, sitting in one of the boxes, discreetly withdrew while the hymn was being played, but on his return the Greek officers pointedly saluted him and then ordered the band to play the British National Anthem, which was repeated to satisfy the exigencies of the audience—for both officers and civilians approved of the British hymn. Then the officers called for the "Marseillaise," and afterwards for the Italian National Anthem, to emphasise their good wishes for the Entente. When the heroine should have sung her plaintive solo to her absent lover's photo, the officers substituted a photo of ex-King Constantine, and, naturally the words "Come, come," interpreted as the exhortation for the ex-King's return, were loudly applauded by the officers.

Meanwhile, bands of soldiers were perambulating the principal streets of the city singing Constantine's hymn and destroying any photo of Venizelos they came across. Several times fights were prevented by officers enjoining the soldiers to cease taunting the Greek civilians, who are mostly warm supporters of the defeated Premier. The civilians' gloom at the loss of Venizelos has been deepened by the discovery that all the officers and most of the soldiers are not only ardent Royalists, but what is more appalling to the Smyrna Greeks, anti-Venizelists. Ex-King Constantine was harshly unsympathetic to the Smyrna Greeks during the years of the persecution, and they fear his return to power will mean a reversal of the Venizelos policy.

**Cynical Turks.**

Nothing amuses the Smyrna Turks more than to see Greek soldiers cutting down the photos of Venizelos. Surely, they say, Allah has heard their prayers and the enemy of the Moslems is destroyed by his own people. There are in Smyrna many Cretans who claim to have been twice driven out of house and home by Venizelos—from Crete and Macedonia—and they are rejoicing at having escaped, as they believe, a third exile through their tormentor being himself exiled.

A Royalist general, A. Papoulas, has been sent to Smyrna to take over the command of the army operating against the Kemalists, replacing the gallant officer, Pareskevopoulos, who has led the army so brilliantly. The new commander was previously Chief of Police at Patras.

## ALBANIA.

VALONA, December 10.

**The New Government.**

A new Government has been formed as a result of the former Ministry—that of Suleiman Bey Delvina—having lost the confidence of the Legislative Assembly and of the Senate. The following compose the new Cabinet: Ilias Bey Vrioni, President of the Council and Minister of Foreign Affairs; Fuad Zembrak, Minister of the Interior; Jafer Ypi, Minister of Justice; Tef Tsurani, Minister of Finance; Kristag Flogi, Minister of Public Instruction; Salaheddin.

Minister of War. The four members forming the Supreme Council have not been changed. They are Monseigneur L. Bumci (Bishop of Alessio), Akif Elbasani, Abdi Toptani, and Dr. M. Tourtouli. The change of Government, the fall of the late Cabinet and the accession to power of the new Ministry have all been accomplished quietly and without any sign of unrest. It is to be hoped that the new Cabinet will enjoy some stability.

**Difficulties with the Serbians.**

In spite of the apparent calm and of the silence maintained by the Press, Albania has been encountering considerable difficulties with Serbia. The latter State occupies a large amount of Albanian territory under the pretext that the Italians are still maintaining a garrison of 200 soldiers at Scutari. The Albanian authorities have repeatedly asked for the evacuation of the occupied territories by the Serbian troops, while giving Yugoslavia the assurances that the Italians will evacuate Scutari just as they have evacuated Valona. So far the Serbians have taken no notice of these representations. They have, on the contrary, exasperated the Albanian population. Troubles have arisen, and some 120 villages on Albanian territory have been completely destroyed by the Serbians. There are at this moment between 35,000 and 40,000 refugees—men, women, and children—at Tirana and in its immediate neighbourhood. All these people are in a miserable plight. It is difficult to understand the reasons prompting the Serbian attitude, for it has always been believed that the interests of both Serbia and Albania pointed to the necessity of the two countries living in friendly relationship.

**An Internal Loan.**

In spite of the heavy expenses incurred by keeping such a large number of men on a war-footing in Albania, the revenue of the country has been sufficient to meet the expenditure. The Albanian Parliament decided, towards the end of last May, to authorise the floating of an internal loan, which has met with satisfactory results. Large sums were provided by the Albanians living in the United States of America, among whom M. Midhat Fracheri has recently completed a tour as representative of the country.

**The Murder of Essad Pasha.**

The acquittal of Avni Rustem, the young Albanian student who killed Essad Pasha Toptani in Paris on June 13, has been received with great satisfaction by Albanians in Albania and abroad. It is held to have been creditable to French justice that the intrigues and crimes of Essad Pasha should have been so clearly denounced by the judgment of the court. At the same time it is welcomed as a triumph of the Albanian cause and a condemnation of the political machinations aimed against Albania.

**Albania and the League of Nations.**

Albania has asked to be admitted into the League of Nations, having presented a well-reasoned memorandum on this subject at Geneva. It was hoped in Albania that this request would not be refused, for admission was regarded as a favour or an act of justice to which every nation, large or small, is entitled. Unfortunately, the petition has not been granted, the question of Albania's admission to the League having been postponed. Public opinion in Albania is inclined to attribute the delay to the combined efforts of Italy and Serbia. The excuse given is that the international status of Albania has not yet been determined. In Albania, however, the people are satisfied that the status of the country has been established by the will of the people, and that any doubt as to its international status is merely due to the difficulties raised by its neighbours.

## CYPRUS.

NICOSIA (Undated).

**Roads and Forests.**

A Greek member of Council for Nicosia, M. Severis, in an interview with the officer administering the Government, has presented a number of petitions. One relates to various roads that require repair in order to be of use for motor traffic, which continues rapidly to increase. His list might be supplemented by claims of equal urgency from most other districts. The O.A.G. replied that if surplus funds allowed the work would be carried out this year; if not, next. The maintenance of roads—the construction of which has been so lamentably slow and difficult in Cyprus—constitutes a serious call on the Public Works Vote.

Other petitions related chiefly to the forests. Various villages near the State forests beg that the cost of fuel sold by the Forest Department, which has been increased from 2½ to 12 piastres (1s. 4d.) the load (mule or donkey), may be reduced to the former rate. The claim for substantial reduction, in the present state of finances, is quite reasonable, especially as under Turkish law villagers living near the forests always had the privilege of taking dry fuel for domestic purposes. The other petitions were from villagers asking permission to graze flocks within the State forests; and this is quite another matter. One cannot but regret that the Government has not adopted a firmer tone than it has in the past. The members of Council take different views on the subject. M. Theodótou, for instance, has for years been an advocate of strict exclusion, and has done much to uphold forest interests. But others are not all of his way of thinking. They have not been able to harden their hearts against the blandishments of the flock owners. The reply of the O.A.G. was that, while grazing could not be allowed within deliminated forests, where there is danger to seedlings and reafforestation, he would endeavour to find other tracts near the forests for the purpose. But the mischief is that from these very regions bordering on what remains of State forests there cannot but be a great increase of most injurious trespass inside the forest limits, which is far too frequent as it is. A steady and systematic reduction of goats would be far wiser policy, hard as it might seem at first in individual cases—where, however, it would be preferable to compensate owners. Other countries have faced precisely the same difficulties firmly, so why not Cyprus? It is to be hoped that very strict discrimination will be exercised in carrying out this hazardous half-promise. The Principal Forest Officer, it may be added, is deservedly popular throughout the island, for he has always sympathised with village needs and interests.

**Improvements at Nicosia.**

The Forest Department proposes, after the next good rains, to plant a number of trees to form avenues on roads leading from Nicosia to Larnaca, Kyrenia, Lefkóniko, Kormakíti, and other places. It is proposed to carry out similar plantations in other districts at future dates; and indeed it seems strange that some other towns should not participate this season in these benefits. The difficulty in Cyprus is to keep the trees alive for the first years during the summer months of drought; but the employment of prison labour greatly facilitates this class of work.

**General News.**

Lord Milner's message that the island of Cyprus will be retained by Britain has been published in a Government *Gazette Extraordinary* (November 17). As far as the island in general is concerned, the news has been received with perfect equanimity and satisfaction. The protests made in some of the towns and largest village centres were a matter of course. The last members of the London deputation arrived at Famagusta yesterday.

Mr. Howard, President of the Larnaca Court, has been transferred to Limassol. Major Bolton, C.B.E., Commissioner of Limassol, is expected from England before Christmas.

NICOSIA, November 16.

**Disastrous Fire at Nicosia.**

The Greek community has suffered a grievous loss from a fire which, on the night of November 7, destroyed their principal educational establishment, the Pan-Cypriot Gymnasium. This large building was regarded with pride by the Greeks. The cause of the outbreak is unknown. The flames soon spread unchecked, as the means of coping with fires are lacking at Nicosia, as in most towns; and the greater part of the building, with its classrooms and library, fell a prey to the flames. The principal of the Gymnasium, M. Doukákis, who lived in the building, but was absent at Larnaca, was summoned by telegram and hurried back.

The blow is a serious one for the community, especially as the building was not insured. The Government is being approached with a view to a loan for rebuilding. A committee of professors is appealing to the Hellenic Government, the University of Athens, and other bodies for help and for contributions of books. Fortunately, the educational course is not interrupted, as a town school adjoining, which escaped the fire, can be utilised, as well as rooms in the Archbishop's palace. This calamity intensifies the manifest need of providing means for fighting fires. The municipality should long ago have attended to this want, and should now pull itself together for an effort. The deep-rooted objection to levying rates is the chief obstacle, added to a characteristic want of enterprise.

**General News.**

Murders still continue to be far too frequent. A Moslem, Hassan Hussein, has been found killed between Nicosia and Kyrenia, and his brother Ahmet Kunely wounded. They are said to have been stealing olives. Another village murder has taken place owing to a brawl at a feast. Arrests have been made in each case.

A medal of the Royal Humane Society has been conferred on a Greek boy named Ch. Piperides, who, though unable to swim, saved two children from drowning in flood water of the river Pedias, near Nicosia. The presentation took place at Government House, the Chief Commandant of Police, the Chief Inspector of Schools, Canon Newham, and others being present.

## THE CARAVANSERAI.

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day,*
*How Sultán after Sultán with his Pomp*
*Abode his Hour or two, and went his way.*
—OMAR KHAYYAM.

Recently at the Tower Bridge Police Court, an American was charged with stealing a tobacco-box from a missioner attached to the Southwark Diocesan Mission, who had befriended him and given him shelter after he had been charged at another police-court. The prisoner, it seemed, had been offering the box for sale at Finsbury for 2s., but its real value was about £100; for it was made of platinum, there was only one other box like it in London, and it had been presented to Mr. Embling, the missioner, by a famous man—none other than Nuri Pasha, of the Turkish Nationalist forces. The British Museum thought so well of it that they had made an offer for it on account of its unique workmanship; but we must suppose, since the box still belonged to Mr. Embling, that he had rejected the offer because it had associations for him. And here comes the part of the story that will cause surprise to some people: the box had been given to the missioner by the Pasha "in recognition of his efforts in staying the massacre of Turks by Greek soldiers."

***

A correspondent forwards two newspaper cuttings, neatly pasted on a sheet and headed: "A Chapter in the History of Human Error." The first cutting is from the *Pioneer Mail* of November 19. It gives a report of the sighting of a capsized Arab sailing boat in the Indian Ocean by a steamer, and is entitled, "A Buggalow at Sea." Curiously enough, the description of the unfortunate craft being thus correctly given in the heading, in the message itself we read that the steamer's captain reported that he "observed *bungalow* floating bottom up," etc. That is the first stage in the "History of Human Error." The second is given in the other cutting, which is from the *Daily Express* of December 12, and is headed: "Bungalow's Ocean Trip." In the text, which is sent by the *Express's* Bombay correspondent, the same mistake occurs in substituting the familiar word for the unfamiliar; so that the London sub-editor may very easily be forgiven, but it looks as if the Bombay correspondent had been caught napping. For the benefit of readers unacquainted with the fact, I may add that a *buggalow* is a largish sailing boat of top-heavy appearance, not unlike the drawings of small ships of the time of Columbus. Some of them can, nevertheless, sail remarkably fast, as some of our gunboats engaged in suppressing slave-running in the Persian Gulf would very readily testify.

***

I am glad to see that a writer in the *Morning Post* has been putting in a good word for the Camel. That much-derided beast, says the writer, is a grumbler, but he *does* work, and he has pluck; and comparisons which a mule would doubtless regard as odious, if only he could read the article, are drawn between the two animals. It seems to me that the *Post's* correspondent has hit off the camel's weakness, as well as his good points, to a nicety. Who has not heard the Camel's hubbly-bubbley protests when he is loaded, when he is made to lie down to unload, when he is told to hurry up, when he is halted, when—well, when he is asked to do anything at all, in fact, or when anything at all is done to him? And I am bound to admit that he is not above taking a sly nip out of you, if he gets the chance. But he *is* a worker; and as workers are becoming increasingly rare, I think we should try to forget his grumblings.

## CORRESPONDENCE.

*The columns of* THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

### "BALKAN RUMOURS."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I am grateful to you for the space accorded to my letter under the above heading in your issue of November 18. I shall be further grateful if you will allow me to add a few more words on the subject.

The facts as regards the statement made by your Athens Correspondent, which I quoted in my earlier letter, are these:—

In Kirk-klisse there were, on the arrival of the Greek authorities, three Bulgarian priests and one Bulgarian church. The church was closed, and two of the priests, S. Shivaroff and S. Pavloff, were expelled, and are now in Bulgaria, refugees, in destitution.

The right to belong to one's church, to belong to one's nation, the protection of the minorities *sanctified* by the treaty of peace is of no avail in such cases where the Greek rules the Bulgárian

The third Bulgarian priest of the town was Dimiter Prodanoff, aged 85 years, more or less bedridden. Rather than go into exile, to suffer and perish on the road and see his family destroyed, he consented to be considered henceforward as belonging to the Greek Church.—I am, etc.,

P. M. MATTHEEFF.

Sofia, November 29, 1920.

### FRIENDS OR FOES?

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In *The Times* of December 1 we learn from the Lucerne correspondent that in 1918, when the Greek Army was holding a very important position on the Salonika front, treacherous negotiations were commenced with the Bulgarian staff. In fact, if we are to believe the correspondent, it was owing only to an unforeseen movement of troops that a considerable portion of the Greek Army did not go over to the enemy. *The Times* publishes this information without comment, and strange to say, this "incident" has received no special notice from the Press. But surely it is of interest to the public to know if this premeditated treachery was communicated to the Allies when the Treaty of Sèvres was under consideration? It seems hardly credible that the Bulgarians should have kept silent when a treaty so detrimental to their aspirations was being drafted. Yet it is equally incomprehensible that the Allies knowing of this further act of treachery should have gone out of their way to reward Greece at the expense of both Turkey and Bulgaria. Is it that the Greeks as a nation are, like King Constantine, misunderstood by all who are not intimate friends? Perhaps THE NEAR EAST can throw some light on the subject.—I am, etc.,

COLES PASHA.

Biarritz, December 11.

### THE ARABS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—For many years I have sustained in the British Press the cause of the Arabs against their Turkish masters, and their claim to national rehabilitation.

Thanks to British intervention and help in the late war, they are now free from their oppressors, and measures are being considered for their organisation into a self-governed community, even where France is concerned.

Those of them who were most imbued with the national sentiment, and co-operated with the Allies, were promised by the British representative the fruit of their labour, and I consider that all such promises are being scrupulously carried out, as far, and as fast, as circumstances allow. The conditions made in this bargain were not of the best, but it is not true to say that Great Britain has failed to redeem its word.

British statesmen viewed at one time, I believe, with all sincerity and pleasure, the possible restoration of an all-embracing Arabian kingdom, but that depended on the agreement of the Arabs between themselves, and their ability to secure it, and not on British view or dictation. So far all tendency among them is towards decentralisation, and here the matter must rest. Those who wish Great Britain to use coercion on their behalf, and try to make us and make the Arabs believe that they have a grievance against Great Britain, are enemies of their own people.—I am, etc.,

A SYRIAN.

# PRESS ON THE NEAR EAST.

## Changing Baghdad.

The *Basrah Times* (October 30) contained an article, "Baghdad To-day," written by a native of the city, who was on a visit to the southern town. The following extracts will be of interest to all who knew either Baghdad or Irak el-Arabi before the war.

The demand for buildings and houses far exceeds the supply, and rents have soared. The city is a regular beehive now, and with everybody working and building, one cannot but be an optimist regarding the future of the metropolis of Mesopotamia.

The old social entrenched prejudices among the elements composing the population are breaking down gradually. Some of these prejudices are the greatest hindrances to advancement. The people have just begun to see the disease, and willingly or not, they are beginning to apply the remedy. There is a continual increase in the attendance at the schools. There are two Arabic daily papers and one English. There are also two weekly journals.

The political change, more than any other, has aroused the people from a long sleep. Who ever mentioned "Our Country" before? Nobody cared; nobody dared. Now "Al 'Iraq" is on the lips of the humblest. They are talking of citizenship, of an independent and prosperous Mesopotamia. The Baghdadi deplores the unsettled conditions created by the tribesmen, and longs for peace and political rest. Even the Muhammadan would not welcome the entry of tribesmen into his city, first because he believes he is the better man, and second, because he knows he would not be spared in the event of any pillaging taking place.

An industrial change was bound to follow from these events. It is true that the prices have gone up, but where in the world have they not gone up? Baghdad has never been more prosperous and alive commercially for the last 500 years than it is now. The railways between Basrah, Baghdad, and Mosul, and the increased number of river boats, are largely responsible for the present position of commerce. Unfortunately, every time there is an uprising, when the railway lines are damaged, and when caravans are attacked, there is a set-back to the flow of commerce; but no sooner is order established than business is restored. . . . When affairs are more settled and a purely civil administration is established, when the railway is again working efficiently, and the road to Aleppo and the Levant is permanently opened; when the caravans from and to Persia go about unmolested, and when irrigation and agriculture are developed, and cotton and other things are grown—who can foretell the prosperity that will come to the city?

## Greece.

Under the heading "The Price of Constantine," the *Manchester Guardian*, of December 9, has the following remarks:—

The Greeks can, of course, have Constantine for king if they so decide, as they have for the present decided—not, perhaps, without judicious pressure—but they will have to pay for him. What are the factors that should determine the attitude of the Western Powers towards the accomplished fact? Having but little confidence in the new order, we are fully justified in taking some necessary precautions. We are justified, in the first place, in withdrawing the assistance which we were prepared to give to a friend whom we trusted, but are not prepared to give to a successor whom we have no reason to trust. That, in fact, is the meaning of the decision of the Allies misleadingly described as a "financial blockade." France and Great Britain had placed at the disposal of the late Greek Government certain credits in Paris and in London. The unused remainder of those credits has now been cancelled. It is common sense not to lend money to a creditor whom we have no longer reason to trust. But that is not the only matter in which we are interested. There is the vital question of the Straits. At the conclusion of the war it was proposed that the Straits, together with Eastern Thrace, should be internationalised under the control of the League of Nations. But the confidence inspired by M. Venizelos induced the Allies to hand over Eastern Thrace to Greece, thus bringing her territory to the gates of Constantinople and the shores of the Sea of Marmora. It was then a risky arrangement. It is now an impossible one. The original plan of internationalising the Straits and the Thracian territory which dominate them was the sound one, and should be revived.

## The French View of Greece.

The Paris Correspondent of the *Birmingham Post*, writing in the issue for December 7, concisely sums up the French attitude towards the return of Constantine.

In the French policy there are two very definite and well-accounted-for motives. The first is disgust at the possibility of the return of Constantine to the throne of Greece. They would, if they could, do anything to prevent that, for the memory of the massacre of the French sailors on December 1, 1916, is still very bitter. In that there is the first difference of opinion between the French and our own Government. The reluctance in Britain, on personal grounds, to accept Constantine is not by any means so strong in their opinion as it is here. Had it been so, they feel that the warning conveyed in the Note of Friday would have been much stronger, and instead of containing a threat of possible penalties later would have conveyed a flat statement of the penalties that would be incurred if Constantine were elected. The second motive is the French wish to have done with the Treaty of Sevres. Article after article is appearing in the Press arguing or pleading for better relations with Turkey and the withdrawal, or at least amendment, of the treaty. In this the French show themselves realists. They argue, and with every appearance of right, that the Nationalist Government of Mustapha Kemal is the *de facto* Government of Turkey, and that it is with it that the Allies should deal. There are, of course, wheels within wheels in the matter, and not the least important is the cost without reward which the holding of Cilicia has been to the French.

He continues with an historical sketch of Allied policy:—

What the French are asking themselves is always: "What will Constantine's return mean?" He has already declared that he will continue the policy of Venizelos and maintain the Greek troops in Asia Minor in order to secure the enforcement of the Treaty of Sevres. Now the French never liked the Venizelos policy at all. At San Remo Foch told the Premiers that it would take 300,000 troops to maintain the Treaty, and M. Millerand tried then to get it discarded. At Boulogne, however, M. Venizelos outwitted him, and turned up with the offer of the Greek army to enforce the Treaty and push back Mustapha Kemal. Mr. Lloyd George eagerly accepted, and M. Millerand was forced to agree, without any enthusiasm. It was, therefore, not entirely with regret that many people here regarded the fall of the great Greek Minister. They felt that the chance had come to get rid of the burdensome Turkish Treaty, and to make a new deal with Mustapha as well as with the Constantinople Government. But now Constantine has, it is believed, given a definite promise to the British Government to carry on the Venizelist policy with regard to the Treaty and to enforce it. Whether he can is a matter of opinion. Evidently our Foreign Office believes in his power, but the French mistrust with possibly equal reason, the will and ability of the Greek people to sustain a long and tedious occupation of Asia Minor. To them the ideal settlement would be the election of the Crown Prince George to the throne. They believe he would never be strong enough even to attempt the continuance of the Venizelist policy, and so very soon the Allies would have to face the fact that the Turkish Treaty must be revised. As it is, it is highly doubtful whether the Chamber will ever ratify the Treaty, and even with the election of one king or the other we are not at the end of the business. In it all there is a curious contrast between the policies in Britain and France towards Russia and towards the Turks. Towards Russia the British Government's policy of seeking some way of living amicably together has every appearance of having more sense in it than that of France, who, while powerless to upset the Soviet regime, yet supports every reaction. But in the case of Turkey the position seems reversed. Is it in our interest to try to make a big Greek Empire which the Greeks will hold together only by years of war? Would it not be better to scrap the Treaty of Sevres, which no one likes, and make a deal with Mustapha Kemal? "Only time will show," one diplomat said to me when discussing the matter, and the French, with more insight because with less prejudice than they have in the matter of Russia, are convinced that time will show that they were right.

# MUSICAL NOTES.

**Singers.**

In a recital which Mme. Salteni-Mochi, an Italian soprano, gave at the Wigmore Hall, on November 30, there was much more of interest than of inspiration. For the programme, which consisted of songs by sixteenth, seventeenth, and eighteenth century composers, contained some unusually lovely things. The names of Falconieri, De Luca, Marcello, and Legrenzi do not occur in recitals often enough to have become hackneyed; and the inclusion of works by them shows Mme. Mochi to be a singer of refined taste. Her voice itself is not a moving one; there is too much vibrato, there is too little tone-colour, and there is a lack of certainty and flexibility, as was proved in some coloratura in *aric* by Mozart She also sang two delightful songs by Rameau and Monsigny, but her Italian things were better than her French. Very evidently Mme. Mochi has a rare knowledge of what is good, and it is a great misfortune that her technical skill is not commensurate with it.

It was not a happy experience to be at the song recital which Mme. Pauline Theurer gave at the Æolian Hall on December 2. She has no claims on an artistic public, and on practically every detail of singing—interpretation, technique, choice of song, and so on—she must be counted out. One does not know quite what to call a vocalist who, beside the names of Schumann, Schubert, and Rubinstein can with sweet confidence place the names of Landon Ronald. David Dick Slater, and Woodforde-Finden—does one?

In the public display which Miss Margarita Mackerras gave of her singing at the Æolian Hall on December 9 it was evident that her ambition had over-leaped itself. To begin a programme, however excellent (and hers was excellent) with things as difficult as the Polonaise from Bizet's "Fair Maid of Perth," Purcell's "O Lead Me to Some Peaceful Gloom," and an air from a Bach cantata, means that in addition to skill you must have much confidence. Skill undoubtedly Miss Mackerras has, but her unfortunate nervousness played unhappy pranks with it; it made her seem technically unequal (especially in flexibility) to what she had gallantly undertaken; it made her indulge in *tremolo*; and it made her intonation very uncertain. In such circumstances it was hard to appreciate her accurately; with more assurance one can remark the fine taste and discrimination shown in her choice of songs.

Of all sins with which singers can most certainly be charged, bad intonation is probably the most common. However, it is one from which Miss A. D. Fletcher, who gave a recital at the Wigmore Hall on December 10, is almost entirely free. Her mezzo-soprano voice has some splendidly true and rich notes, particularly in the middle and lower registers, and she aroused in one those hopes for the bearing out of which one often sighs. Her Scarlatti and Pergolesi songs were beautifully done; such refinement and restraint as she showed in "Se tu m'ami" are seldom seen in a first recital. But later things brought disappointment: some Scotch traditional songs were but moderately done; Vaughan-Williams' "The Roadside Fire" was poor; the inclusion of Walter Rummel's "Ecstasy" was a strange error. Nevertheless, Miss Fletcher showed sufficient intelligence and independent thought to be remembered. She was assisted by Mr. John Pauer, a quite promising pianist, whose chief merits are, like hers, restraint and independence. Both in Bach's "Italian" concerto, and in Schumann's "Toccata" there were signs that his mind is as yet in advance of his technique, and that when the one is brought up to the standard of the other he will be a fine player.

**The Strolling Players.**

The society which goes under this name has, I believe, the largest amateur orchestra in existence. One had doubts at the concert which it gave at the Queen's Hall on December 9 whether it was not too large, for most of the fun seemed to be enjoyed by the players themselves. Although its conductor (Mr. Joseph Ivimey) is a very sincere man, he must have felt its unwieldiness in Stanford's "Irish" Symphony (the only item I was able to hear), for the independence of some of the stringed instruments made one suspicious of some of the blessings of liberty. But in truth the Symphony itself is a dull, dull work; as it went on one grew even so heretical as to say that nothing great could be maintained out of folk-tunes, and that to construct whole movements from them was at best ingenious. Stanford can do the small things excellently; he has, for example, written some exquisite songs; but his *magna opera* I do not think immortal.

**A Violinist.**

In Miss Grey-Handcock's playing there is much merit. At her recital at the Wigmore Hall on November 23 she was bold enough to tackle César Franck's Sonata and the "Devil's Trill" of Tartini. She really felt and communicated the beauties of the Franck, though in strenuous passages her intonation wandered, and she was not strict enough in the canonical movement (the last). Her technique is not sufficiently advanced for the "Devil's Trill"; and her playing of this was brave, but a mistake. But Kreisler's "Recitativo and Scherzo-Caprice" was inside her powers, and she played it splendidly. This piece alone was enough to show that she has a future; and in Friedmann Bach's "Grave" and in a Dvorak dance she gave supplementary evidence of the fact.

**Mr. Arthur Rubinstein.**

It was worth sitting through M. Rubinstein's recital at Wigmore Hall on December 7 for the sake of the last quarter of an hour. From the point of convenience his programme, chronologically arranged, should have been reversed, for in the first part (Beethoven's Sonata in E flat, Op. 31) it was a player we heard; in the second (Liszt's Sonata in B minor) it was a pianist; in the third (a group of Debussy) a potential artist; and not until the last (a Spanish group, consisting of Ravel's "Alborado del Gracioso," and "Rondena" and "Navarra" of Albeniz) did we hear the complete poet. It seems clear now that M. Rubinstein cannot interpret classical music; his Beethoven was at times maddening in its alternate wilfulness, affectedness, and impurity of tone, while a remarkably poor use of the pedal made his technical efficiency a pathetic affair. In Liszt's ostentatious sonata there is but one thing that makes it worth the tremendous trouble of playing—the extraction of eloquence from its false rhetoric; and why so accomplished a pianist as M. Rubinstein could not achieve it I don't know, but he didn't. We drew perceptibly nearer to the heart of the matter in Debussy, for in "Ondine" and in "L'Isle Joyeuse" particularly the core was reached and opened to us; so that it was on an easy flood of conviction that M. Rubinstein swept us along in his Spanish pieces. It may be a facile thing, and it is, I suspect, a rather tiring thing, this Spanish rhythm, but it is truly invigorating. There was no doubt about M. Rubinstein's capture of the essence of Albeniz: it was really great playing that was heard in "Rondena."

# NEAR EAST BOOKSHELF.

I.—"COLLECTED PROSE OF JAMES ELROY FLECKER." (London: Bell and Sons. 7s. 6d. net.)

II.—"THE MYSTERY OF MONTENEGRO." By Alex. Devine. (London: Richard Clay and Sons, Ltd. 2d.)

## I.—THE PARNASSIAN OF THE EAST.

That the Near East exercises a fanciful spell upon almost all Englishmen who visit it is merely to state a fact, but it is not always realised that most of them are impotent before that spell. The amount of good literature inspired by these regions is comparatively small; the quantity of good verse and of prose that is not mainly descriptive is incredibly meagre. But it is not simply because of his relative greatness in this matter that Flecker as an artist stands apart, for of him, as easily as of any one of his contemporaries, one can prophesy immortality. To his most exquisite art the East brought that colour and impulse which make a reading of his "Golden Journey to Samarkand" so rare a delight, which make of even so slender achievements as his a unique thing in modern literature.

Beside his verse, and that delicious romance called "The King of Alsander," Flecker did not write much. The shortness of his life indeed did not permit of much (he was only thirty when he died in Switzerland in 1915); and it is a book of fewer than 300 pages that contains all the prose that he would probably have wished reprinted. There are in this book only a few things that would intimately concern the reader of this journal, its main contents being "The Last Generation," a very amusing fantasy, "The Grecians: A Dialogue on Education," which cleverly sets out Flecker's conception of an English schoolmaster's duties, and some critical studies of tendencies and personalities in modern literature. But between these there are some slight yet memorable sketches of the Near East, sketches which show especially the intensity of the poet's sense of colour, and his delight in the semi-humorous wisdom of the East. There is the story of Mansur, who started from Stamboul bearing presents from the Sultan to the Sultan of China, but was intercepted by the King of India, of his consequent adventures and end; there is the priceless picture of Candilli, with words so lovely that to give an extract from it would equal Lord Leverhulme's recent act; there is the nostalgic sequence of paragraphs in "The 'Bus in Stamboul"; there is the sketch of a battle near Beyrouth—"Forgotten Warfare," which even now conserves an extraordinary vividness; and last and greatest there are the seven "Translations from the Gulistan," one at least of which may be quoted:—

One of the Saintly saw a big man wild with passion and foaming at the mouth, and asked what was the matter. Someone replied, "He is suffering from an opprobrious epithet." "Why," rejoined the Saint, "he could carry a ton of bricks; can't he bear a mocking word?"

Weak of will and intellect,
Do you think that men who place
Fists in their opponent's face
Win approval or respect?

said the Saint, and, after a pause, he continued:—

Though their arms be adamant,
Though they scalp an elephant,
Men without humanity
Seem contemptible to me.

In Flecker's life there were two consuming passions, England and Greece. It is said that, apart from Greece, he did not really love the East—perhaps because he was so practical a poet—and one writer states that "his intercourse with Mohammedans had led him to find more good in Christianity than he had previously expected." However this may be, it is very certain that the beauties of other lands made him but love his own country more dearly still; the prompting is evident many times in this book. When, for example, he recognises the motor-bus in Stamboul as a Cricklewood bus, he "could weep for the bitterness of my exile and my great desire for London town and English faces; for the thunder of Charing Cross and the cries of Oxford Circus, for the sweep of Regent Street, and the motors of Piccadilly, for the glory of a great Empire and the fellowship of men." Even the utter loveliness of Candilli makes him "long for a slag-heap or a gasworks, or any strong, bold, ugly thing to break the spell of this terrible and malignant beauty that saps body and soul."

To say that this volume does not show Flecker at his best would be petty, for it was in verse that his ambitions lay and that his achievements, in spite of the brevity of his career, lie; in the prose here collected there is rather the promise than the attainment of great writing and sustained thought. What style of prose writing he would have cultivated, or rather upon what subjects he would have written, it is impossible to say, for he followed no school, he indulged in no discernible tendencies. With his verse, of course, it is quite different; here, though he stood apart, he had definite aims and definite means. That this volume will be bought by all lovers of his verse (which means practically all lovers of English verse) we do not doubt, and this not so much for their actual contents as for the fact that where words are few they are doubly precious. It may not increase the reputation of his poetry, but it certainly helps to explain and to confirm it.

## II.—THE TREATMENT OF MONTENEGRO.

"The Mystery of Montenegro," which is the title given by Mr. Devine to his masterly pamphlet, consists in the fact that whereas something like a dozen explicit pledges have been given at various times by different Allied statesmen regarding the independence of Montenegro, not a single attempt has been made to give effect either to the letter or to the spirit of any one of these pledges. It would have been thought that concern for their individual reputation would have prompted the members of the Supreme Council to see that, whatever the fate of Montenegro, it should have been brought about by the free choice of the Montenegrin people. The Roumanians have been compelled to withdraw from Hungary and part of the Banat, the Yugoslavs from the Klagenfurt plebiscite area, but no attempt has been made to require the Serbians to leave Montenegro free for the space of time necessary for the exercise of an unfettered popular vote. Yet, in spite of the protestations of the Serbian authorities that the so-called Podgoritza National Assembly was a legally constituted body, the Allied Governments have had the courage to reject the contention and to refuse to accept the decision of that packed assembly. The mere fact that resort was made to such advice on the part of the Serbians to bolster up their cause in Montenegro is sufficient to condemn every claim of theirs in regard to the country and every action committed in it. But the Allies pay no heed, and from all accounts the last situation in the unhapy land is worse than the first.

Such are the bald facts. No explanation can be offered, except that the Allied statesmen have bandied and broken so many pledges that they have become callous: Turks, Arabs, Montenegrins, all are quoting chapter and verse of the most formal pledges, but no one in authority pays any heed.

Mr. Devine has marshalled the most definite of the promises given to the Montenegrins, and then proceeds to discuss the legal status of Montenegro. Now that Italy has withdrawn her support, there would seem to be little chance of the miracle happening—the granting of fair play to a much-tried people. The line of least resistance is apparently to be followed to the end, and the Allied Governments, if they spare a thought to the subject, will hug to themselves the belief that the recent elections gave the Montenegrins the opportunity they required for self-determination. Mr. Devine's latest pamphlet is a pungent summary of the manner in which justice has been denied to the Montenegrins.

## BOOK RECEIVED.

"A Dweller in Mesopotamia: Being the Adventures of an Official Artist in the Garden of Eden." By Donald Maxwell. With sketches in colour, monochrome and line by the Author. (London: The Bodley Head. 25s. net.)

A DWELLER IN MESOPOTAMIA

By DONALD MAXWELL. Author of "Adventures with a Sketch-Book," "The Last Crusade," etc. Crown 4to. 25s. net.

To draw the East nearer to view and reproduce something of its burning colour has been left largely to Mr. Donald Maxwell, and his new book is full of beautiful drawings in colour, monochrome and line of Baghdad, Amara, Babylon, and the neighbouring country. It makes an ideal gift book.

# PERSONAL AND GENERAL.

**TO-DAY.**
December 16 (New Style).
December 3 (Old Style).
Rabia II., 6. 1339 A.H. of the Moslem Calendar.
Tebet 5, 5681 of the Jewish Calendar.

The Aga Khan has left Paris for the Riviera.

Mr. J. D. Bourchier arrived in Sofia at the beginning of this month.

Mr. T. B. Hohler, British High Commissioner in Hungary, left London last week for Budapest.

Lady Dering has been spending a few days in Paris before joining Sir Herbert Dering at Bucharest.

Sir Horace Rumbold, the British High Commissioner at Constantinople, was received by the Sultan last week.

The Belgian Ambassador was visited last week by M. Boeresco, Minister Plenipotentiary and Roumanian Chargé d'Affaires.

The Gaekwar of Baroda left London last week for Paris, on his way to Switzerland. He will proceed to India in the early part of the New Year.

The Earl of Cromer, Chief of the Staff accompanying the Duke of Connaught to India, leaves London to-day with other members of the Staff.

Mlle. Olga Masaryk, daughter of Dr. Masaryk, President of the Czecho-Slovakia Republic, was married at Prague on Thursday last to Dr. Revilliod.

The Bulgarian Minister returned to London on December 12 from Brussels, where he has been visiting M. Stambolisky, the Bulgarian Premier.

Last month Marquis Garroni, the first European Ambassador to be appointed to Turkey since the war, took up his post at Constantinople. He was Italian Ambassador there before the war.

At a meeting of the Central Asian Society this afternoon (December 16), at 4.30, Major-General L. C. Dunsterville, C.B., will lecture on "The Military Mission to North-West Persia, 1918." Lord Carnock will preside.

The Central Council of the Overseas Club and Patriotic League is entertaining at their monthly lunch, on December 21, at the Connaught Rooms, Mr. Ronald Storrs, Governor of Jerusalem. Viscount Northcliffe will preside.

Our Liverpool Correspondent writes:—Mr. B. A. Malandrinos, Consul-General for Greece at Liverpool, who has been seriously ill, is now on a fair way to recovery. It will, however, be several weeks before he is able to leave his room.

Colonel Arion, who accompanied the Crown Prince of Roumania on his recent tour, left London last week for Lucerne to meet his Royal Highness and accompany him to Bucharest. Colonel Arion will, however, return to London shortly.

Mr. Robert Theodore Gunter May, F.R.G.S., F.L.S., was last week elected, by special election, Fellow of Magdalen College, Oxford, with a view to his carrying on his researches into the changes of level in the Mediterranean basin.

Lord Carmichael presided at a meeting of the Royal Colonial Institute, held at the Edward VII. Rooms, Hotel Victoria, on December 14, when Sir Francis Younghusband read a paper on "India and England: The True Tie Between Them."

Our Cyprus Correspondent writes (November 16):—
The Principal Forest Officer, Mr. A. K. Bovill, is returning to duty in Cyprus, under the rule which admits of extension of service beyond the age at which an official can, should he desire, retire on pension.

News of the death in England, through a motor accident, of Dr. R. Cleveland, who was for many years Chief Medical Officer in Cyprus, has been received with feelings of much regret. Dr. Cleveland had recently inherited a fortune from his mother.

The Maharaj-Rana of Jhalawar gave a farewell reception to a large number of friends in the Eastern galleries of the Imperial Institute last week. He left this country on December 10 for a tour in Europe and Egypt, and will return to his State near the end of January.

Twenty of the drawings made by Mr. James McBey as official artist to the Egyptian Expeditionary Force, between May, 1917, and January, 1919, are now exhibited at the British Museum. The selection at present on view illustrates scenes in Egypt and the Desert of Sinai, and events on the advance into Palestine on the way to Jerusalem. These will be replaced later by sketches illustrating the campaign in Palestine and Syria.

Sir Ernest Birch left Portsmouth last week in H.M.S. Malaya for Marseilles, India, and the Malay Peninsula, where the Sultans, Chiefs, and people of the four Federated Malay States, who presented H.M.S. Malaya to the British Navy, will have an opportunity of seeing her. The Duke of Connaught and his staff will join the ship at Marseilles on December 18 for Madras. Sir Ernest Birch returns to England in March in H.M.S. Malaya.

The Royal Asiatic Society, which celebrates its centenary in 1923, has an interesting programme for the first half of next year. On January 18 Miss H. C. Bowser will give a lantern lecture on the Buddhist temples of the Diamond Mountain, Korea; on February 8 Miss Houston will relate her experiences in Russian Turkestan; on March 8 Mr. Lane (late South Persia Rifles) will describe "Modern Fars"; Mr. Levy will lecture on "Baghdad to Teheran" on April 12, and Mr. Grant Brown on Burma on June 14. The three last-named lectures are with lantern slides.

The wedding of Mr. Edwin Samuel, son of Sir Herbert Samuel, the High Commissioner, and Miss Hadassa Grasowsky, of Jaffa, was solemnised on December 6. The ceremony was held in the Assembly Room of the ex-Kaiser's Palace at Jerusalem, and was attended by 900 guests. The Rabbis of Salonika, Jerusalem, and Jaffa officiated. The gathering was of the most cosmopolitan character, and a variety of costumes was to be seen distinguishing the three faiths represented. After the ceremony the Sheikh Abu Midden clothed the bridegroom in Arab garb and initiated him as a Sheikh of Beersheba.

## APPOINTMENTS, ETC.

General Pellé has been appointed French High Commissioner in Constantinople.

M. Petroff-Tchomakoff has been appointed First Secretary to the Bulgarian Legation in London.

Dr. Yovan Yovanovitch has been appointed Consul-General in London of the Kingdom of Serbs, Croats, and Slovenes.

Colonel J. G. Grieg, the well-known Hampshire and Army cricketer, at present Military Secretary to the Governor-General of Bombay, has been appointed secretary to the Hampshire County Cricket Club. He will not, however, be able to take up the post until 1922.

The following appointments were announced at the Admiralty last week:—
Rear-Admiral Henry B. Pelly, to be Senior Naval Officer, Gibraltar, in succession to Rear-Admiral Tyrwhitt, to date January 17, 1921
Rear-Admiral Sir Reginald Y. Tyrwhitt, to be Rear-Admiral Commanding, 3rd Light Cruiser Squadron (Mediterranean), in succession to Vice-Admiral Sir George P. W. Hope, to date January 17, 1921.

## MISSION TO KABUL.

The following announcement has been published by the Government of India:—
"As is known, the recent conversations at Mussooree were intended to clear the ground for final negotiations between the British and Afghan Governments for a permanent Treaty of Friendship. The Afghan delegates returned to Kabul at the end of July to lay the results of these discussions before the Ameer. Recently the Ameer, after full consideration of the reports of his delegates, wrote to the Viceroy in most friendly terms inviting a British Mission to Kabul for the conclusion of a Treaty, and His Majesty's Government have now authorised the Government of India to accept this invitation. The Mission will consist of Mr. Dobbs, Nawab Sir Shams Shah, Mr. Pears, Lieut.-Colonel Muspratt, and Mr. Acheson. It is hoped that the Mission will be able to cross the frontier in the last week of December."

## NEWS IN BRIEF.

The Milner Mission's Report on Egypt is likely to be submitted to the Foreign Office very shortly.

Twenty-five villages are reported to have been destroyed by an earthquake in the Tepeleni district of Albania.

A Paris message states that Czecho-Slovakia will probably succeed Greece on the Council of the League of Nations.

The representatives of the Porte were enthusiastically welcomed by Mustapha Kemal Pasha on their arrival at Angora.

A Delhi message states that about ten Indian cavalry regiments and some thirty infantry regiments will be gradually disbanded.

M. Clemenceau has arrived in Calcutta, and was accorded an enthusiastic reception by French, British, and Indian residents.

Fighting between the Dir and Swat Lashkars has begun, as the Nawab of Dir is anxious to recover territory captured from him last year.

The Executive Committee of the American Near East Relief Committee has given £612,000 for the immediate relief of distress in Armenia.

*Al Mokattam* reports that the Syrian Cabinet, formed after the assassination of Ala-ed-Din er Rubi at Khirbet Shazaleh on August 20, has been dismissed.

Shevket Bey, former Director-General of the Administrative Section of the Foreign Office in Constantinople, has been appointed Turkish Minister to Sweden.

No rain has fallen in Algeria for twelve months, and M. Abel, the Governor-General, has arrived in France to take part in a debate in the Chamber on the threatened famine.

A train going from Suk Ahras to Tebessa, Algeria, has been derailed and attacked by a gang of 30 bandits, who wounded seriously the conductor, a brakesman, and a gendarme.

President Wilson has appealed to Americans to contribute "out of their abundance" to help stricken Armenia as being again overrun by Turkish Nationalists, Kurds, and Bolshevists.

The Orthodox Archbishop of Cyprus announces that the Greek members of the Cyprus Legislative Council have tendered the resignation of their seats owing to the refusal of the British Government to give the island to Greece.

A claim for £30,000 for war damages in the East, especially in Palestine, has been made by the London Jews' Society, but nothing has been received from the Government, nor does there appear to be any likelihood of payment in the near future, if at all.

The Viceroy of India has placed an appeal received from the British Famine Relief Committee in Peking before the Princes and people of India, and has expressed confidence that their knowledge of the calamity in North China will result in their making a generous response.

The India Office has issued through the Stationery Office a Review of the Civil Administration of Mesopotamia during the British military occupation; that is, down to the summer of the present year. The report has been prepared for the Acting Civil Commissioner by Miss Gertrude Lowthian Bell, C.B.E.

Officers of the Indian Army, Indian Army Reserve of Officers, and of the Royal Indian Marine who have become permanently incapacitated by active service in the war, or subsequent military operations, should apply for help, if required, to the Officers' Families Fund, which is acting as almoner on behalf of the Imperial Indian Relief Fund in respect to such cases. The address of the secretary is: The Officers' Families Fund, 1, Chesterfield Gardens, Mayfair, W.1.

It is officially stated that it has been decided by the Georgian Government at Tiflis to reorganise the diplomatic representation of the Republic in foreign countries. In consequence of this decision all Diplomatic Missions and Legations have been abolished until this reorganisation is completed. The Georgian Republic will now have one central representative organisation, which is to be in Paris, and which will have agents in other countries. At the head of the Central Body will be M. E. Gueguetchkori, the Minister of Foreign Affairs in Georgia.

## DEATH.

GOURLAY.—At Coniston, Milngavie, on December 6, Helen Mary, the beloved wife of Professor Charles Gourlay, and daughter of the late Alexander Ramsay, Constantinople; deeply regretted. (The only intimation. No mourning, by request.)

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

PERSIA.—Ex-Officer, age 24¾, single. Six years resident in Persia (three with Military). Good colloquial knowledge of Persian. Accustomed to handling natives. Wishes to obtain employment with Commercial house interests in Persia. Willing to return to Persia two or three years hence. What offers? —Box 175, THE NEAR EAST, 1, Devonshire Square, E.C.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added),"**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

## ARABIA: THE NEED FOR A CONFERENCE.

The importance of Arabia both for France and for Great Britain is generally recognised by those who have followed recent developments in the Near and Middle East. Cradle of Islam, and containing within its borders the birthplace and the tomb of Mohammed and the chief centre of Moslem pilgrimage, it naturally looms large in the eyes of all good Moslems. It may be true that little love is lost between Indians and Arabs, and that the liking of the people of Syria for the natives of North Africa is not marked; but neither France nor Britain can ignore the fact that Arabic is the language of the Koran, and that it is towards Mecca that all good Moslems turn when they pray. Neither of them is in fact likely to ignore it, but there have been times during the past year when we have been tempted to wonder whether they were not undervaluing the Arabs and Arabian influence in mapping out their policy for the Near East. It would be futile to pretend that the Arabs regard us now with as much favour as they did in the days of the war; our troubles in Mesopotamia are sufficient evidence to the contrary, and though we know little of what the Hejaz is really thinking, we have heard enough to warn us of a change there also; while the fact that we have had to intervene between the Sheikh of Koweit and the followers of Ibn Saud suggests unpleasant possibilities in the Nejd and El Hasa. And if we are less in favour with the Arabs now than we were a year ago, what can be said regarding the French? We prefer not to give the answer to that question, France having shown herself even more sensitive than usual on the subject. But it is safe to say that in Paris, as well as in London, those whose duty it is to observe these things are fain to admit that the skies which looked so clear over Arabia and the adjacent lands only a little while ago are to-day obscured by ominous sand-clouds. The storm may affect the desert alone, or it may burst over the lands bordering the desert. In any case Eastern travellers tell us that it is always advisable to take precautions when such phenomena are observed. If some powerful and unfriendly Jinnee guides the storm, so much the worse for the traveller. To abandon metaphor: the unrest now noticeable in the Arab world may work itself out without spreading beyond the Arab lands, but it may take a form that would seriously inconvenience France and Great Britain, and the chances of its doing so would be greatly increased if the Wahhabi spirit—of which a correspondent gives an account on another page—should spread to-day as it did on the former occasion of its manifestation.

The Turkish method of ruling the Arabs was extremely simple, consisting of a faithful application of the principle *divide et impera*. In Irak and in Western Arabia the same policy was steadfastly pursued: tribe was set against tribe, emir against emir, sheikh against sheikh, with results well known to the world. Unfortunately, it has to be acknowledged that the Arab character and the ideals of the Desert tended to make the task of the Turks an easy one; and it is to be feared that, until the Desert is conquered, it will always be a nursery for the Ishmaelite spirit and a stronghold for the man who respects not Law and has no love for Order. It is not that the Arab is incapable of steady work or of acquiring settled habits, as the industrious agriculturist of the Yemen and the law-abiding citizen of Baghdad or Damascus serve to show; but sometimes he declines most obstinately to recognise that the ways of agriculture and of commerce are the only right ways to follow in these days. At the present time the *Akhwan* afford an illustration of the restlessness that sweeps over Central Arabia from time to time, often taking the form of a religious upheaval. The conflict between Ibn Saud and King Hussein in the early part of this year was probably due to other causes, but it affords another example of the lack of unity among the Arabs; and the rivalries of Shammar and Anazeh and of numerous smaller tribes all serve to show where the weakness of the Arab character lies. Again, the failure of Irak to unite in choosing a ruler immediately after the Armistice makes us wonder whether the old spirit of intrigue which made Kufa notorious is still alive in the land. But it would be unwise to jump to any conclusion. We must remember that the consciousness of nationality has only been quickened in the Arab mind quite recently, after lying numbed for a very long period. It is true that many Arabs were working for their freedom before the outbreak of the war gave them their chance, but the movement was still very young, and had hardly extended beyond the large towns when the storm burst. As far as the Arabs were concerned, the surprise of the war was not that they did not work together better, but that they worked together as well as they actually did.

Now, Arab rivalries are, naturally, the concern principally of the Arabs themselves, but, for the reasons given above, Great Britain and France must be and are interested in every phase of the Arab problem as it has developed since the war. It would certainly be to their interests that the Arab unrest should be calmed and that peace should reign in the Arabian peninsula and the adjacent Arab lands. But that desirable state of affairs can only be brought about if the causes of unrest are frankly recognised and removed, and if the Arab leaders can be induced to discuss their differences in a spirit of give and take and with the object of arriving at some kind of federation, however loose it may have to be in its early stages. Some time ago THE NEAR EAST suggested that if these leaders would meet and endeavour to come to an understanding on some such lines the first great step towards a really united Arabia would be taken. To-day, having regard to events of the past twelve months, it seems that the most profitable conference would be one in which Great Britain and France, as well as Arabia, should be represented. Irak-el-Arabi, Syria, and Palestine should also send representatives, freely chosen by the Arabs, and the utmost freedom in discussion should be encouraged. By such means there would be some hope of reaching a general settlement, and certainly France and Great Britain would be afforded an opportunity of learning how to give effect to the promises they made in the statement which they issued jointly in November, 1918. That statement declared categorically that the two Governments aimed at "encouraging and assisting the establishment of indigenous governments and administrations in Syria and Mesopotamia," at "inspiring and encouraging local initiative," and at putting an end to dissensions that had been too long turned to advantage by Turkish policy. A conference such as we suggest would surely go far towards securing the fulfilment of the purposes thus eloquently expressed. Incidentally, it might also put an end to other discussions than those fostered—in the past—by the Turks. What we should hope for most from it would be that it would remove from the minds of the Arabs misunderstandings such as those referred to in the recently issued "Review of the Civil Administration of Mesopotamia," and that it would give to France and Britain an opportunity of reconsidering their Arab policies, and, if necessary, of revising them.

## "THE NEAR EAST."

# "BRETHREN" OF THE DESERT.

**By Edwin E. Calverley.**

There is war in Arabia. It is a war of Arabs against Arabs now. There is no telling what it may become in the not distant future.

The Arabs of Central Arabia have formed a brotherhood. They call themselves the *Akhwan*, the "Brethren." It is a religious brotherhood. When they command anyone to join them they say: "Become religious!" and the convert says: "I have become religious!"

The *Akhwan* are not a new sect in Islam: they are Islam. They are the only true Moslems; all others, whether they call themselves Moslems or not, are *kafirs*, unbelievers. All who do not join them are to be put to the sword, or to pay the *juzia*, the poll tax of subject peoples. The *jihad*, or holy war, is an accepted obligation. The "holy war" of the Turks was a failure: the "holy war" of the Arabs is succeeding. It is a genuine holy war on the part of the fighters, at least, for they fight from religious motives and for religious results; for them it is a war of the true Moslems against the rest of the world to make it Moslem, or subject to Islam.

All this, of course, has its parallel in original Mohammedanism; and, indeed, the movement may be understood to have for its watch-cry: "Back to the Koran!" Just a century and a-half ago a similar movement began, in the same region, under the patronage of the same ruling family, ran its strong and destructive course for several generations, and was finally brought to nought by Mohammed Ali and Ibrahim Pasha of Egypt, and the Ibn Rashid dynasty of Hail, in North Arabia. Mohammed Abd al-Wahhab was the founder of the movement in those days, and Muhammad bin Saud was its political and military chieftain. The Wahhabis, as their followers were called, spread terror before them, and devastation marked their trail.

The present brotherhood of *Akhwan* is Wahhabism revived and redoubled. Its characteristics are the same, but intensified; the transcendence of the Deity, the exclusive claims of the Other World, and the death-deserving sinfulness of smoking are the outstanding features of their faith and practice. Palgrave described the conception of the Deity in the Koran as a "Pantheism of Force," and there is much to justify the phrase; Allah to the *Akhwan* is the Oriental Despot, infinite in power, absolute in will, and all-embracing in activity. The present-day *Akhwan* are reported to leave to his fate a person who has fallen into a well, and is unable to get out again without help. His fate was "written upon him" by Allah, and far be it from them to interfere with Allah's plans and works.

Palgrave's observations of the zeal of the Wahhabis for other-worldly ideals and interests led him to consider them Puritans. The *Akhwan* are also Puritans. All must attend all the prayers, or suffer beating, banishment, or the burning of one's house; all must learn the prayers and the fundamentals of the faith—a new and formidable task for the untutored Bedoo of the desert; all must wear the *amama*, the white head-band of the faithful; all must abjure wine, strange women and song, and apparel of silk and gold. All women must dress in black and attend only their special bazaars. Men must keep their sleeves and their moustaches short and wear their beards and cloaks long. They must not sacrifice on feast days, or assign the merit of their complete recital of the Koran, or say prayers for the benefit of their parents or other forebears unless they have died in the true *din*, or religion. Money of the same metal must be exchanged by weight, a weight of rupees for an equal weight of *rials* or Maria Theresa dollars. Profit may be made in the buying or selling of money of different metals. Fellowship with unbelievers must be replaced by separation or treatment with contempt. None but true followers may exchange the greetings, "*Salaam alaykum*," and "Upon you be peace." Modern inventions and modern conveniences are innovations, and must be dispensed with as far as possible. People returning from contaminated cities, like Koweit, Bahrain, and Busreh, where infidels and tobacco are tolerated, must not be given the Moslem greeting for three days.

The *Akhwan* are zealots. Gibbon describes the Arabs of another century—the Karmatians, another brand of Moslem extremists. Five hundred of them appeared under Abu Tahir before Baghdad, which had 30,000 defenders. A messenger warned the Karmatian of his danger. Abu Tahir turned "to three of his companions; he commanded the first to plunge a dagger into his breast, the second to leap into the Tigris, and the third to cast himself headlong down a precipice. They obeyed without a murmur. . . . 'Before the evening your general shall be chained among my dogs,' he said to the messenger, and before the evening the menace was executed."

The *Akhwan* appeared before Jahira, an outpost of Koweit, on the third Saturday of October of 1920. Those who had swords and rifles fought with them; those who had not rushed with their comrades up to the wall and gate of the castle, where the Sheikh of Koweit and his soldiers were besieged; they bared their breasts, stretched out their arms, and shouted: "Here am I! I am one of the Brethren! Who will kill me? Who will send me to heaven? Here am I! Kill me!" Every man that fell, fell forward on his face, if he could. Others were helped to fall forward. To do so meant to take the attitude of prostration in prayer, when, says a tradition, one is nearest Allah, and is sure to have his petitions heard. Zealots they are. War is a duty. The one who kills is sure of heaven. Death is welcome; anyone of them who is killed goes straight to heaven. Battle is a pleasure. Their battle-cries are their only songs.

*Ya Ikhwani! Ya ahl al-din!*
*Ya Ikhwani! Ya ahl al-din!*
*Iyaka nabud wa iyaka nastain!*
O Brethren! O faith men!
O Brethren! O faith men!
Thee (Allah) we adore!
Thine aid we implore!

When an *akhu*, a "brother," dies in battle, his comrades shout to him: "Remember me to your Lord!" When they kill a *kafir*, others collect his blood in the cup of their hands and smear it on their faces and chests, to share in the merit of the deed. They kill the wounded when they can, and women and children are also slaughtered. The only casualties that returned to Koweit from the attack on Hamd in May of this year were walking cases. On that occasion the *Akhwan* remained on the field. The more recent battle at Jahira lasted two days, and the soldiers of Koweit could see the "Brethren" go among the fallen and kill those who moved. At this battle the *Akhwan* ran out of ammunition. They asked for a truce, which Sheikh Salim granted before he saw his reinforcements coming to him by boat from Kowait.

The political significance of this new movement in Arabia may be briefly sketched. The Wahhabi movement died down with the destruction of the power of Ibn Saud, first by the Egyptians, under the orders of Turkey, and later by the Ibn Rashid dynasty at Hail. Indeed, the present Ibn Saud, whose given name is Abdulaziz, was in his youth an exile in Koweit, under the protection of the great Mubarak. It was Sheikh Mubarak who enabled Abdulaziz to make a surprise

attack upon the small garrison of Ibn Rashid at Riadh and regain his throne and the leadership of his people. With the increase of his power came the revival of the peculiar religious convictions of his people. Descendants of the original Wahhabi still lived in Riadh. As always, they were welcome under the Ibn Saud régime to teach their tenets. They gained adherents, who called themselves "Brethren." They became separatists, and founded a town of their own, called Irtawiya. Meanwhile, Ibn Saud had taken Al-Ahsa (Al-Hasa) from the Turks. Then the Great War came. Ibn Saud became an ally of the British. He drew a large subsidy, and he distributed it among the *Akhwan*. The "Brethren" propagated their faith among the Bedouin. Their numbers had grown; they had founded other towns; and by the time the Great War was over, practically all the desert tribes, except the Shammar in the north, had joined the *Akhwan*, for might was now on their side.

Early in 1920 Ibn Saud's forces attacked and defeated an army of the Shereef of Mecca. This gave him arms and ammunition and encouragement, and early in the summer he turned to Eastern Arabia. He took the wells of Jaria (Quria), within the borders of the Sheikh of Kuwait, and began building a mosque and forty dwellings to make a town, such as Moslem tradition requires so that the special Friday worship may be valid there. The Battle of Hamd followed and secured the place for him. Ibn Saud now controls the road from Kowait to Al-Ahsa. During the summer engagements, unimportant, save to the killed and wounded and their families, have occurred whenever parties of the *Akhwan* met tribesmen belonging to the Koweit or Shammar sheikhs. The American Mission hospital at Koweit has had a constant stream of gunshot patients all the summer.

But why should the Emir of Central Arabia seek to absorb the territory of the Sheikh of Koweit? The claim of the Wahhabi made half a century ago to be king of the whole gulf country had never been admitted by the British nor justified by the event. It may be that the present Emir believes that an accomplished fact will become an accepted arrangement; and Koweit would certainly be invaluable to him. He has the coast province of Al-Ahsa, with the port of Katif and Ujair as a customs point; but the hundreds of thousands of bags of rice and piece goods that are imported into Nejd every year through these places are landed at Bahrain and pay customs duties to the Sheikh of the Bahrain Islands, and are then shipped in country craft to Ujair. The customs and other expenses are a tax that Ibn Saud naturally wants to avoid for his people. To get goods through Koweit means paying customs duties to another sheikh. This sheikh is not the Mubarak to whom he was under obligations. It is Mubarak's second son, Salim, who now rules the town, and there are no bonds of gratitude or friendship between the two men. The enthusiasm of the *Akhwan* is a tremendous military asset. Koweit is a town of *kafirs;* the "Brethren" want to convert it. It has the finest harbour in the Gulf, and would be an immeasurable advantage to him.

Sheikh Salim knows the value of Koweit to the Emir of Central Arabia, and he knows something of his ambitions. After the attack on Hamd he began building a clay wall around his town. Koweit lies like a broken triangle, with one side along the bay and the opposite angle pointing into the desert. The new wall makes a circle of five or six miles from sea to sea. It is about six feet thick at the base and eleven or twelve feet high, with the upper part thinner, leaving standing room for the defenders. At intervals there are some two dozen towers, extending beyond and above the wall. Frequent loop-holes mark the whole length of the wall, and four gates with extra large towers allow egress and ingress.

There have been recent efforts to establish peace between Ibn Saud and Ibn Subah of Koweit on the basis of the territorial terms which the British Government have guaranteed to the "trucial chiefs" of the Persian Gulf. Sheikh Salim bin Mubarak bin Subah was willing, and went to Jahira, fifteen miles away at the head of the Bay of Koweit, to withdraw the force that he had stationed there. While he was there the *Akhwan* came. They took the village of 100 houses, but could not capture the castle, which the sheikh and his 800 soldiers had occupied. His food and water supplies were naturally small, for he was not expecting further fighting, and they were almost exhausted when the ammunition of the "Brethren" was finished. The *Akhwan* offered him a truce; which he would not renounce when his reinforcements arrived shortly afterwards. He permitted them to retain the loot they had taken and himself returned to Koweit, leaving only a small garrison on the spot. His losses were under a hundred killed and several hundred wounded, some of whom are women. These casualties are being cared for at the American Mission Hospitals for men and women at Koweit, in charge of the only doctors in that part of the country. The *Akhwan* are reported to have lost 800 killed and as many more wounded, bringing their casualties up to nearly half their force of 4,000 men. Of the wounded there is no doubt that many have died, for they had no medical aid with them.

Fresh negotiations for peace are under way. The *Akhwan* general, Duwaish, sent a delegation of two, and later of seven, "Brethren" to announce his terms. Sheikh Salim refused acceptance, and has finally requested British aid It has come: two armed ships are in the harbour, and an aeroplane arrived the day this was written. The town is relieved, and cordiality toward the British was never so great as now.

## CHESS.

Surrey and Lancashire met on December 11 at the Imperial Chess Club in the final of the county championship. The match was left undecided, Surrey leading at the close by five to three, four games being left for adjudication. The positions in the unfinished games did not suggest much prospect of Lancashire gaining the necessary points, and it may be taken almost for granted that the championship will go to Surrey.

The preliminary heats of the City of London championship should be finished this week. Already a number of the principal competitors have finished their games. Mr. H. Jacobs has won Section A with 7½, while Mr. R. P. Michell has scored 6 with one to play. In Section B, in which there are nine games to be played, Sir G. A. Thomas is first with 8 and one to play, while Mr. J. H. Blake has 5, with one to play. In Section C, Mr. Ross and Mr. Barlow stand equal first with 5½, each having one game to play. Mr. R. H. V. Scott, who is in this section, has not been doing so well as in the recent championship, and his appearance in the final will depend on the result of his last game.

Four rounds have so far been played in the Metropolitan Championship, and in this competition Mr. Scott is leading, having won all his games.

The really interesting part of the season will only commence after Christmas, when we shall have the final of the City Championship, and the various other tournaments will begin to reach interesting stages. In a few weeks, too, the Murton Cup handicap will be starting, and I anticipate a record entry for this ever-popular event.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***Egypt's Commercial Position.***

For some months now the commercial position in Egypt has been increasingly unsatisfactory, and at the present time the indications are that the country is in for a somewhat anxious period. Various factors are responsible for the prevailing depression. For one thing Egypt has been affected to some extent by the conditions that have developed in the world's markets since the commencement of the year. Another and very important factor has been the overloading of the market, which has been carried on to such an extent that it is estimated that Egypt has now almost a year's stocks of certain classes of goods over and above her immediate requirements, largely the result, of course, of the congestion in neighbouring markets. But the most important factor of all has been the fall in the price of cotton, which is now quoted at roughly one-fourth of the rate that obtained early in the year. Cotton is the basis of Egypt's prosperity, and the country's purchasing power depends on the price obtained for the crop. The present slump in this commodity means an enormous decrease in the potential purchasing power of the country, and while it is maintained the development of business cannot fail to be restricted.

***The Outlook.***

Difficult as the position undoubtedly is, there is no reason for taking a pessimistic view of the outlook. It is as certain as anything that the price of cotton will not remain at its present low level, while all the indications are that the prevailing trade depression throughout the world's markets has reached its culminating point, and an improvement at no very distant date may not unreasonably be anticipated. No doubt it will take time before matters adjust themselves in the Egyptian market; fortunately, however, the country is well equipped as the result of the prosperity of the last few years to meet a crisis such as that which has arisen. The importance of that factor must not be overlooked. In previous crises the country was more or less unprepared, but even then the recuperative process was not protracted. This time, recovery when it comes should be rapid. In the meantime, it need scarcely be urged that British manufacturers and exporters should exercise great care in dealing with this market. There are now, and will be during the next few months, important openings for enterprise, especially in connection with works of development; but, apart from this, merchants would be well advised to walk warily.

***Restriction of Cotton Area.***

For some time it has been expected that Egypt would meet the fall in cotton by again restricting the area under cotton cultivation, and the announcement last week of this step will, therefore, have occasioned no surprise. Artificial expedients of this nature are always open to a certain amount of objection, but it is easy to understand that the authorities in Egypt—apart from wishing to increase local food production—have come to the conclusion that in the circumstances it was the best means of safeguarding the country's interests. Naturally the policy is unacceptable to Lancashire, for it means that the cotton centre may possibly have to go short of cotton at a time when demand is again brisk; but it is the growers whom the officials have had to consider in the first place; and their lot, as Professor Todd showed in a lecture at Manchester last week, is just now anything but an enviable one. It may be hoped that the temporary restriction of the area under cotton in Egypt will give an impetus to the movement to develop cotton cultivation in other centres, especially in the Sudan. But anything that may be done in the direction of promoting the growing of the crop elsewhere can, unfortunately, have no effect next year, when it would seem that the world will be faced with a reduced yield of cotton both in Egypt and America.

***The P. and O. Meeting.***

The annual meeting of the P. and O. has come to be regarded as an event of outstanding importance in financial and commercial circles, because of the practice of the chairman to devote a considerable portion of his speech on that occasion to a critical analysis of the situation in general, and in particular, of course, of the position of the shipping industry. This time, as usual, Lord Inchcape's address contained much of interest. As was to be expected, he devoted considerable attention to the question of the increased cost of passages. "We have, to our great regret, been compelled," he said, "to raise our rates of passage money in all directions to keep pace to some extent with the great advance in the cost of coal, wages, stores, operating expenses generally, the increase in dock charges, dock labour, and costs of overhaul; and even with the higher rates now being charged it is difficult to make both ends meet, and in many cases it is an impossibility. It is hard on our passengers to have to pay higher rates of passage money, but it is not our fault. As soon as we can reduce rates to an economic level we will do so. At present we are carrying passengers at less than cost." Lord Inchcape went on to refer to the heavy cost of the large passenger vessels now under construction, and stated that, "so far as we can judge, it will be impossible to run them profitably as separate units." As a result of the conservative policy that the company has pursued the P. and O. is, however, in a far stronger position than other companies, for the existing fleet stands in the company's books at a very moderate figure, so that when the new ships are added the company's fleet "will still stand at a low figure, and considerably under pre-war prices."

***Sales of Ex-enemy Ships.***

The disposal of the ex-enemy ships on behalf of the Government was dealt with by Lord Inchcape in the course of his speech. So far, ninety-three of these ships have been sold, and it is hoped before long to dispose of the balance. Lord Inchcape explained that when he was asked to undertake the sale of these ships he concluded that it was his duty to do what he could "to relieve the Government of the possible necessity of running them themselves, which would have been disastrous from every point of view." Proceeding to express his opinion of these vessels, he declared that while many of the more recently built cargo vessels were excellent, "the passenger steamers are, as a rule, not a patch upon ours in design, arrangement, comfort, ventilation, or deck space, and the accommodation provided for the officers, engineers, and crews is miles below our standard. In every case, large sums of money will have to be spent to bring the passenger ships up to anything approaching British ideas, and even then they will fall short of our own ships. The shipbuilders and shipowners of this country, so far as I can see, had nothing to learn from Germany in shipconstruction."

***Anglo-Persian Oil Report.***

A very satisfactory report is forthcoming from the Anglo-Persian Oil Company for the year ended March 31. The net profits increased from £2,011,000 to £2,611,000, and £275,528 was brought forward, the available total being thus £2,887,143. From this amount £233,302 has to be deducted for new issue expenses, and out of the balance it is proposed to allocate £80,000 to debenture stock redemption reserve, £50,000 to preference share reserve (in both cases the same as last year), £575,000 to the general reserve, as against £300,000, and £100,000 as before to the amortisation reserve. The preference shares have already received 6 per cent., absorbing £210,000, and it is proposed to bring this up 8 per cent. as last year, which will absorb a further £100,000, and to pay a dividend of 20 per cent., less tax, on the ordinary shares, as against 10 per cent., tax free, for 1919, absorbing £627,863, as against £300,000, leaving £910,978 to be carried forward.

## GREECE.

ATHENS, November 27.

### Possibilities of Dedeagatch.

The *Economist of Athens*, commenting on the unexploited riches of Thrace, points out that Dedeagatch could easily become one of the most important ports in the Near East if only the Government would take immediate steps to improve agriculture in Thrace. During the period from 1888 to 1898 large exporting firms, such as Vallianos, Kanella, Savastopoulos, and the famous French firm of Dreyffus and Allatini, were established at Dedeagatch. At that time the Ottoman Government afforded many facilities to importing and exporting merchants, while the important traffic of the port was due to the reduction of freights by the Eastern railways, also by the Bulgarian railways as far as consignments from Eastern Roumelia were concerned. In 1899, however, when the Chir-Yampoli-Bourgas railway line was constructed, the Bulgarian Government concentrated all its attention on the port of Bourgas, as a result of which the traffic at Dedeagatch commenced to decrease. The director of the Chamber of Commerce at Salonika, M. Becris, states that the port of Dedeagatch can regain its former importance if the following measures are adopted:—1. Financial assistance to merchants and landowners transacting business dealings. 2. The immediate construction of warehouses similar to those existing prior to the bombardment. 3. The construction of a harbour or at least a breakwater. 4. Reduction of railway fares on the junction railway line. 5. Appropriation of the lands situated along the railway line, and the rebuilding of the warehouses which were burnt down. If the above suggestions are carried out by the Government, the port of Dedeagatch will occupy an important trade position in the Ægean Sea in view of the fact that the Bulgarian Government, in accordance with the convention of Neuilly, will use that port as a commercial outlet. Further, the Government must see that the Thracian Customs tariff is similar to that in force throughout Greece, as the present tariff in Thrace seriously impedes all business dealings.

### Olive Oil Production.

The new Minister of Foodstuffs, M. Calogeropoulos, has declared that, according to information already to hand, this year's olive oil production in Greece will exceed considerably that of last year. It is estimated that it will reach 140 million okes at the very least, and in view of this the Government has authorised the export of last year's stocks.

## ROUMANIA.

BUCHAREST, November 27.

### The Trade Situation.

It was to be foreseen that as the winter advanced, and owing to the transport difficulties the prices of commodities would rise, despite the fact that, according to reports, American prices have decreased considerably. This rise has come quicker than was expected, and has been chiefly caused by the continual rise of the lei, which to-day stands at about 240-250 to the £. Merchants who did not cover their goods when they were ordered, or are not being granted credit, thereby having to cover at the present rate of exchange, will either have to increase their prices between 10 and 20 per cent.—which prices in many cases they will not be able to obtain—or stop their sales altogether, and if short of money will be obliged to sell under cost.

Despite this position, trade has not been lacking, as a good many people fear a further depreciation of the lei.

The State has received substantial quantities of goods through the Ministry of Reconstruction and the different co-operative societies, but is not in a position to alleviate the situation by distributing the goods to the different centres owing to transport difficulties, and they are still stored at the ports of arrival.

The depreciation of the lei and the transport difficulties have affected textiles more than any other commodity, as they are mostly imported from countries that have a high rate of exchange, such as England. Cotton yarn, which is the principal article of the season, was sold at the beginning of last week for 500 lei per bundle. This week it started at 550 lei and went up to even 620 lei for Clegg's brand, and even at this price it is very hard to find. American Cabot C went from 15.50 to 16 lei per yard. Cabot A went to 16.50 lei per yard Chiffon, the price of which has been stationary up to now, has risen to 17 lei per metre—0.80 m. wide. Cotton prints, narrow width, are bringing 15 lei per metre, and zephyr, middling quality, 22 lei per metre. The prices of flannelettes have not increased, the wholesalers having covered the cost at the old rate, and wish to get rid of it to provide themselves with funds to buy spring and summer goods. The prices are 22-25 lei per yard.

Stagnation continues in the iron trade. Many merchants have only just received their orders placed in February and March, and are not able to release their goods, as the banks demand immediate payment, and the merchants do not feel inclined to do so at the present rate of exchange. Merchants who have ventured on large business with little capital of their own are in a critical position.

Numerous offers are coming from Germany and Austria, but merchants cannot avail themselves of these offers, as they are short of funds and the banks will not advance any money. Offers include nails at 5.50 marks loco factory, tin-plate at 85 crowns, black sheets at 60 crowns, tin-pots at 22 lei per piece c.i.f. Galatz, iron blacks at 32 crowns, and iron rails at 3.60 marks.

Scythes have been sold at 14 lei per piece loco factory and 21 lei f.o.b. Galatz to arrive before the close of the Danube navigation. Ploughs ("Boar" make) are offered at 480 lei per plough delivered at Bucharest, for delivery next season. "Sack" ploughs are offered at 525 lei loco Bucharest. Merchants are still abstaining from buying agricultural machinery, owing to the high cost, and on account of the competition of the State through co-operative societies.

There is a sufficient stock of leather for soles, thanks to the important quantities which have been bought, especially from Italy. Sales are rather weak, and prices have been kept rather low. Home manufactured leather for soles can be bought at 70 lei per kilo; while better quality sole leather can be bought at 70 lei per kilo.

Local raw hides are excessively expensive, as 23 lei per kilo for crude and 27 lei for salted skins is being asked; therefore, factories are limiting their activity, awaiting cheaper supplies from Italy. Leather is sold at 140 lei per kilogram 8-9 cms. thick, 3-4 cms. thick at 160 lei, 2-3 cms. thick at 180 lei, 1-2 cms. thick at 230 lei. Coarse leather is sold at 50-60 lei per kilogram. Boots have gone up in price, owing to the high cost of labour, despite the great supplies of boots from Italy, Czecho-Slovakia, and Switzerland.

After the slump which lasted for six weeks the market in glassware and household goods has brightened up, and there has been a great demand for kitchen utensils, stoves, and cutlery. Glasses are 6-8 lei per piece, and china plates 12 lei, both wholesale. A table service of 24 pieces costs 800-1,600 lei, enamelled pots are 45-50 lei per piece wholesale, small oil-stoves are 300 lei retail, and coal stoves 2,500-3,000 lei per piece medium size.

### Miscellaneous.

A very promising measure has been introduced by the Ministry of Industry to increase the value of the lei. Permits of export will only be granted to those exporters or banks who can prove that they have bought lei on the markets abroad. The object of this is to reduce the stocks of lei existing abroad, which have mostly been used for speculation.

# "Standard" TOBACCO MACHINERY

"The Seal of STANDARD SATISFACTION"

The utmost improvement in production methods marks the general tendency with up-to-date firms for the re-establishment of trade.

In the case of Tobacco Factories this tendency is reflected in the universal substitution of "STANDARD" Mechanical Equipment for other makes of lower efficiency.

An investigation of the capabilities of "STANDARD" Machines convinces beyond dispute that they effect real economy in manufacturing costs and as the result have been adopted in the World's Largest Cigarette and Tobacco Factories. This fact in itself speaks volumes for "STANDARD" Service.

## The "STANDARD" CIGARETTE MACHINE

For quality and quantity in Cigarette production this Machine is unexcelled and is adaptable for the manufacture of cigarettes of all kinds and classes.

From January 1 to September 1 Roumania exported goods to the value of more than one milliard lei. The exports included the following (in wagons of 10,000 kilograms):—Maize, 17,000; barley, 14,500; oats, 331; rye, 781; wheat, 1; wheat flour, 6½; refined paraffin, 8,694; petrol, 3,821; lubricating oils, 906; crude oil, 350.

## CYPRUS.

NICOSIA, November 16.

**Loss of a Prince Liner.**

While the s.s. Italian Prince was en route between Papho and Limassol, with a large cargo of carobs, fire broke out. Notwithstanding all the efforts of the crew, the flames could not be got under; and, after salving all that was possible, the vessel had to be abandoned to its fate, after the fire had been burning for many days.

## TURKISH FRUIT REPORT.

### The Situation: Effect on Markets.

Messrs. C. J. Giraud and Co., Smyrna, report as follows under date November 25:—Since our last issue of October 4, the following shipments have been made to the United Kingdom: To London, October 19, per s.s. Borodino, 18,858 boxes of sultanas, 44,698 bags of figs, 1,310 boxes and sk/ton cases of figs. November 3, per s.s. Sea Victory, 4,579 boxes of sultanas, 20,275 bags of figs, 709 boxes and sk/ton cases of figs. November 13, per s.s. Gourko, 44,707 boxes of sultanas, 31,529 bags of figs, and 413 boxes and sk/ton cases of figs. Shipments to Liverpool: October 12, per s.s. Serbino, 27,183 boxes of sultanas, 21,002 bags of figs, 460 boxes and sk/ton cases of figs. October 26, per s.s. Amasis, 11,427 boxes of sultanas, 19,728 bags of figs, 955 boxes and sk/ton cases of figs. November 12, per s.s. Belgravian, 14,758 boxes of sultanas, 3,071 bags of figs, 315 boxes and sk/ton cases of figs. The season can now be considered as practically closed, and there is small prospect of further shipments of importance or any resumption of business until the turn of the year, when the spring demand develops. The total shipments this season to the United Kingdom to this date are as follows:—To London: 268,581 boxes of sultanas, 263,217 bags of figs, 6,926 sk/ton cases and boxes of figs. To Liverpool:—184,399 bags of sultanas, 131,257 bags of figs, 4,391 sk/ton cases and boxes of figs. To Bristol: 23,157 boxes of sultanas, 11,740 bags of figs, 200 sk/ton cases and boxes of figs. To Glasgow: 18,906 boxes of sultanas, 15,130 bags of figs, 192 sk/ton cases and boxes of figs. The totals were: 495,043 boxes of sultanas, 421,344 bags of figs, 11,709 sk/ton cases and boxes of figs equal to about 6,500 net tons, 5,000 net tons, and 1,500 net tons respectively. The shipments to the United Kingdom to the same date in 1919 amounted to 14,500 tons sultanas and 3,000 tons figs. The total arrivals of sultanas to date are 86,055 bags against 158,200 bags in 1919: the sales to date are 76,500 bags against 151,000 bags in 1919; stock, 9,500 bags against 7,000 bags in 1919. These figures are exclusive of Vourla. The total shipments to date, including Vourla, amount to about 11,500 tons, distributed as follows:—To the United Kingdom, 6,500 tons; to the Continent, United States, Canada, etc., about 5,000 tons; total, 11,500 tons. Estimated stocks remaining in the country, about 25,000 bags, or, say, 3,500 tons; estimated probable result of the yield, say, maximum 15,000 tons.

Figs.—Total arrivals to date amount to 82,000 loads, or 18,000 tons, against 45,000 loads, or 10,000 tons in 1919. Stocks remaining amount to about 2,500 tons in Smyrna and about 3,000 tons in the interior, consisting mainly of inferior qualities fit for distillery purposes or for coffee adulteration on Continental markets.

A fair extent of business has been transacted in sultanas during the past few weeks, but demand latterly, as usual at this time of the year, is slackening, but some orders amounting to about 300 tons have these days been placed on the market for New York and Canadian account and are in course of shipment by the steamships Putnam and Jefferson County. There has been relatively less activity in figs. Prices both for sultanas and figs have been influenced in foreign parities by the steady rise in sterling and dollar exchange. Sterling rates in the early part of October averaged about piastres 430, whereas since the end of the month fluctuations have been pretty sharp and the rate has latterly been fairly steady about piastres 480, thus reducing the foreign equivalent of cost by fully 10 per cent. Dollar exchange has moved in sympathy.

Reference to political matters would hardly come within the scope of a report of this nature were it not for the very close bearing which things political have on matters commercial in this unsettled part of the world. The results of the recent elections in Greece, the Bolshevist successes in the South of Russia, and the Nationalist movement in the interior of Asia Minor are factors calculated to delay indefinitely a settlement or readjustment of the whole Turkish question. The uncertainty in the general situation and outlook, credit restrictions, suspension of trade relations with the interior of the country, etc., are tending to paralyse mercantile enterprise and activity. With reduced crops and prohibition on the exportation of several of the country's products, the volume of exports is being steadily reduced, thereby materially diminishing the buying power of the country. Large stocks of imported goods lying at Smyrna, Constantinople, etc., cannot be disposed of except at ruinous losses. The displacement also of the native population in various parts of the country is not only aggravating the outlook but is entailing untold misery and suffering on thousands. Every factor indeed is making for increasing instability and discontent. At no time since the Armistice has the whole situation appeared so uncertain and threatening. It is no surprise that uneasiness about the future is developing and fears are increasing that the conflict of International interests may finally cause a general upheaval throughout the whole country and still further postpone a settlement for which the whole population has vainly waited for two years.

## COTTON SPINNING IN 1920.

### Record Dividends.

Mr. Frederick W. Tattersall, of Manchester, has prepared his usual analysis of the reports of Lancashire cotton spinning companies for the twelve months ended November 30. The figures show that record dividends have been paid. In previous years it has been possible to give comparative figures relating to profits, but very few cotton companies in Lancashire now issue balance-sheets, and statistics of a reliable character are not available. Particulars have been obtained, however, of 100 companies, the average dividend being 29.47 per cent. on share capital. The payments have absorbed £2,263,899. It may also be said that thirteen companies during the year have made bonus calls amounting to £241,927 out of profits. From a dividend point of view 1920 has been the best year ever experienced in the Lancashire trade, the average dividend for 1919 being 21 per cent., whereas previous to that year the most prosperous period was 1907, when the average dividend was nearly 16 per cent. The 100 mills dealt with contain 3,021,034 mule spindles, 1,190,812 ring spindles, and 5,813,910 weft spindles. The past year opened with the trade boom at its height, but since the spring business has shown a decided decline. Spinners are now having much difficulty in clearing the production of yarn, and all mills, both American and Egyptian, are running short time. It is probable that the stocktaking announcements at the end of December will be less satisfactory than for some time back, and most companies will have to pay smaller dividends.

Roumania has signified her adherence to the International Trade Marks and Patents Convention.

The directors of the New Egyptian Company intend to redeem the whole of the five per cent. first mortgage debentures for £125,000 now outstanding on March 1 next at £102 10s. per £100 debenture, or £51 5s. per £50 debenture.

# ENGINEERING.

## Iron and Steel Production.

The Statistical Bulletin of the National Federation of Iron and Steel Manufacturers contains some figures which should be brought to the notice of everyone engaged in this industry, as they show how serious an effect the coal strike had upon the production of iron and steel in this country. It may be said that, coming at the time when American and German ironmasters were arranging a pact likely to operate adversely to British trade, it was doubly serious. As to that, it is impossible to say anything definitely. The political harm done is not a thing that can be measured and expressed in concrete terms. When we deal with the actual tangible fact of output reduction we are in a position to support conclusions by actual figures.

For instance, analysis of the returns shows us that the production of pig-iron in September amounted to 741,000 tons. This was a little below that for August, which was 752,000 tons; but a moment's reflection will show that it was at a higher rate per day, viz.: 24,700 tons, as against 24,260 tons. In the three months ended September 30 the total production amounted to 2,244,000 tons, or an annual rate of nearly nine million tons, which is very little below the highest rate attained when filling the demands of the war.

It was at this time, when everything in the iron and steel trade was in an exceptionally good condition, that unintelligent brains prompted an aimless poking of fingers into the wheels of trade. The coal strike came and passed, but so severe was its effect that production during October fell to 533,200 tons, or 207,800 tons below the September output. It would, perhaps, be better to compare with August's figures, on account of the equal number of days, and to say that the October output was 218,800 tons below that of August. According to the highest authorities it is improbable that the September figures will be equalled for some time by reason of the tremendous setback the industry received through the strike.

The output of steel last September was 884,700 tons, the highest monthly total since the Armistice. This output was equal to an annual rate of 10,616,400 tons. Owing to the coal strike, production fell 330,000 tons to a total of only 554,300 during October, and the opinion is that it will take the industry months, if not years, to regain its lost position. No wonder there is unemployment in the engineering trades. With iron and steel production so seriously affected, so drastically reduced by hot-head action, the greatest difficulty is being experienced in keeping ordinary engineering works going, and here it may be said that should the Severn barrage scheme be put in hand in the near future, with the consequent withdrawal of raw materials from the engineering industry, it would in itself cause a vast volume of unemployment which might have disastrous and wide-reaching effects.

Figures show that the total output of steel for the ten months ended October 31 amounted to 7,805,100 tons, as against 6,507,000 tons for the same period in 1919. These figures should be read beside the returns from the U.S.A., from which we find that the United States output of steel was 3,524,000 tons in September and 3,543,000 tons in October. The production of pig iron in the States during September was 3,129,000, and during October amounted to 3,278,000 tons. Incidentally, the highest monthly output in the U.S.A. was during March, when it reached 3,376,000 tons. So far as American exports are concerned, the exports of iron and steel and manufactures thereof in October represented 11.2 per cent. of the total, as compared with about 37 per cent. for textiles. This proportion of 11.2 per cent. compares with that of 7.7 per cent. last January, and it is interesting to note that every month's figures shows a slight improvement.

Exports of iron and steel from the United Kingdom amounted to 274,000 tons in October, as against a monthly average of 185,400 tons in 1919 and of 411,000 tons in 1913. Exports of iron and steel from the United States were 393,000 tons in August, as against a monthly average of 362,100 tons in 1919 and 241,000 tons in 1913.

## Earth Roads.

In view of the interest which is being taken at the present time in roads and roadmaking, whilst admitting the great superiority of concrete roads to all others, the next in the order of general suitability being those constructed of tar macadam covered with a bituminous coating, it must be pointed out that even to-day earth and gravel roads may and do give good service, and may be used with complete success in districts where the traffic is neither heavy nor frequent.

Roads of that type should be well drained and properly crowned. The maintenance of such a road is comparatively easy and far from expensive, even if the work is done with quite exceptional care. On the other hand, good drainage is not easy to secure except in very favourable situations, yet upon this drainage the life of the road actually depends. As a matter of fact, a road in order to be properly drained must have the proper longitudinal grade; a maximum grade of from 0.5 to 1.0 per cent., with a maximum grade generally of 5.0 per cent., according to Mr. R. G. Terrell, who supplied the writer with a good deal of information on the subject when Commissioner of the State Department of Public Roads in a southern American State. The minimum grade is necessary in order to give the side ditches the proper amount of fall to carry the water away from the road. Side ditches, further, should never be made deep and narrow, but, on the other hand, should have a high capacity. If extra drainage is necessary a good deal of tile may be used with advantage or a deep ditch with a sufficient fall and outlet may be excavated along the roadway and filled with tile or large stone. Where roads are placed alongside hills a ditch should be dug along the upper side, which should have sufficient capacity to take away all the water that would otherwise wash across or through the road.

If the road has been properly located and properly drained it should have a very long life; in fact, the writer knows of one British road in particular where this method of construction was carried out and which has lasted with comparatively few repairs for upwards of 3,000 years. As a matter of fact, it was in good condition when the Romans landed and has remained in good condition ever since.

## Tractors at Smithfield.

At the Smithfield Show the Austin Motor Company, Limited, exhibited the well-known Austin farm tractor with a plough. This light-weight machine is of straightforward, substantial design and very sturdy in construction. Its trunk chassis is carried at the front on a spring pivot, which allows the axle free movement to meet undulations of the ground, thus relieving the machine of all strain, and providing a true three-point suspension.

The Austin farm tractor has a four-cylinder engine with detachable head, and runs on paraffin. It has magneto ignition and thermo-syphon cooling. The gears run always in oil on roller bearings. Control of the machine is of the simplest character, and can be learned in a few minutes.

Ready for work, the tractor weighs about 28 cwt., and its power is ample for ploughing the most difficult land. It will plough 5 or 6 acres a day on average land, will thresh all day long on a consumption of 1½ gallons of paraffin per hour, and will reap at the rate of 6 acres in three hours. It will drive all kinds of machinery, such as chaff-cutters, mill grindstones, saws, cake-crushers, and so on, while it is capable of hauling a four-horse load on the road.

## A Licence Holder.

Under the new regulations, the special licence cards which are to be issued to motorists must be fitted in a waterproof metal case with glass front, and this case must be attached to some convenient part of the car, so that it will be clearly visible to anyone standing on the near side of the car. Messrs. S. Smith and Sons (M.A.), Ltd., of 179-185, Great Portland Street, London, W.1, have sent me a sample of a licence-holder which they have introduced, and which seems to me to be suitable for the purpose in every way. It is neat, strong, well finished, and inexpensive, and can be obtained in either brass or nickel. I understand Scotland Yard are using this holder for all their cars, cycles, and vans.

## Oil-Driven Vessels.

An interesting event took place a few days ago at Barrow shipyard, when the Semmiole, a motor-driven vessel belonging to the Anglo-American Oil Co., was launched. The vessel, which was built by Vickers, is the latest addition to the already large fleet of ships which have discarded the use of coal fuel for steam-raising purposes, and rely upon the internal combustion of oil to supply the necessary power. The opinion of Sir John Vickers, expressed on this occasion, is that the heavy oil engine is certain, sooner or later, to play a great part in developing the British mercantile marine.

## THE ALEXANDRIA WATER CO., LTD.

### Interim Dividend.

NOTICE is hereby given that an Interim Dividend of Four Shillings per £5 Share on Coupon No. 64 is payable on and after the 15th of December, 1920, at Messrs. Barclays Bank, Ltd., 1, Pall Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Ltd., in Alexandria, upon the making of a declaration as to ownership in the form required by the above Banks, form of which will be supplied upon application.

Dated, Alexandria, 12th Nov., 1920.

# ROUMANIA.

**AREA** (after Peace Treaties of 1919) **122,282 sq. miles.**

In 1914 the cultivated area was (according to an estimate of Dr. Colesco) 34,475,750 acres; of which 13,074,922 were ploughed lands, 468,670 were vineyards and orchards, 1,436,960 were meadows, 2,948,472 were pastures, and 5,705,750 were forests.

**POPULATION. About 17,400,000.**

**IMPORTS (1915). £8,533,234.**

United Kingdom, £848,997; Austria-Hungary, £3,718,182; Belgium, £43,230; Germany, £3,575,159; France, £660,287; Turkey, £558,238; Italy, £762,023.

**EXPORTS (1915). £21,742,379.**

United Kingdom, £2,238; Austria-Hungary, £13,576,255; Belgium, £2,343; Germany, £7,044,803; Turkey, £443,325; Italy, £37,838.

[NOTE.—In 1914 the Imports from the U.K. amounted to £2,231,773, and the Exports to it to £1,433,535.]

# BANQUE DE CREDIT ROUMAIN

(Joint Stock Company)

FULLY PAID-UP CAPITAL AND RESERVES:

**110,000,000 LEI.**

**BUCHAREST. BRAILA.**
**GALATZ. CONSTANZA**

The BANK opens current accounts, collects and discounts bills, &c., on Roumania and other countries. Collects dividends, makes advances on shares and other securities, and upon merchandise, and carries on all usual banking transactions. Receives cereals on consignment and undertakes their sale.

# BANCA ROMANEASCA. *Established 1911.*

**Authorised Capital, 160,000,000 Lei. Capital Paid Up, 100,000,000 Lei. Reserve Fund, 38,936,306 Lei.**

**Head Office in BUCAREST, 5, Strada Smardan.**

**Branches in BAZARGIC, BRAILA, CONSTANTZA, CZERNOWITZ (Bucovina), GALATZ, KISHINEFF (Bessarabia), SILISTRIA, TULCEA, TEMESVAR.**

**Council of Administration:**—*President*, G. N. BAGDAT, former President of the High Court of Justice and Cour de Cassation.
*Vice-President*, G. I. STOICESCO, former Vice-President of the Senate, Professor of the University.

**Board of Directors and Members:**—C. G. COCIASU, Barrister, former Vice-President of the Senate; V. BRATIANU, former Manager of the Banque Nationale de Roumanie, former Minister; D. D. BRAGADIRU, Merchant and Manufacturer; Al. F. BADESCU, Engineer, General Manager of the Société de Tramways de Bucarest; G. CORBESCO, Barrister; I. G. DUCA, former Minister; I. I. STANCULEANU, Barrister, former Member of Parliament; AL. N. STEFANESCU, former Manager of the Banque Nationale de Roumanie.

**Auditors:**—D. MATAK, Engineer, Manufacturer; H. FULGA, retired, former Bank Manager; V. V. STEFAN, former General Manager of the Ministry of Industry and Commerce; Em. DAN, former General Manager in the Ministry.

**General Manager:**—N. P. STEFANESCO, Engineer, Inspector-General, former General Manager of the Navigation Fluviale du Danube.

**Manager:**—I. SAVESCO. **Sub-Managers:**—N. BANULESCO, C. T. TEODORESCO, ION C. PILIDI, S. HENZEL, D. CONSTANTINESCO.

Banking transactions of every description. Deposits repayable on demand and with notice. Cheques and letters of credit issued on all countries. Stock Exchange orders executed in Roumania and abroad. Advances on securities, discounts and collections. Bonds, shares and objects of value received for safe keeping. Applications received for all issues without charge.

# NEAR EAST MARKETS.

## LONDON MARKET REPORT.

Dried Fruit.—Business has been very restricted. Currants have been in poor request, especially the lower varieties, and it is obvious that consumers are holding aloof in the expectation of lower prices. There has been a negligible enquiry for sultanas, while dates and most varieties of figs have moved off slowly.

Coffee.—Prices have been easier. The futures market has been rather inactive. Quotations are:—December, 53s. 6d., a drop of 2s. 6d.; March has shed 6d. at 52s.; May is 6d. lower at 52s. 6d.; July is 1s. 6d. down at 53s.; and September is 1s. lower at 54s.

Sugar.—The free market has been steady. West Indian crystallised is the same at 72s., and American granulated has come to business at 80s. White Mauritius is unchanged at 79s. Home refined has met with a good demand at the official prices.

Oilcakes.—Linseed cake is 20s., a decline of 1s. 6d., while cottonseed has come to business at 11s., a drop of 1s. Other transactions include Arachis cake at 14s., and coconut cake at 14s.

Oilseeds.—Indian linseed has been steady at 27s., but rapeseed is lower with Toria at 24s., and bold Ferozepore at 23s., 2s. 6d. and 5s. 6d. down respectively.

Seed Oils.—There has been a steady decline in prices. Linseed oil has come to business at 45s. Turpentine is unchanged at 105s.

## CURRENT PRICES.

*General Produce.*—Bacon, 217s. 9d. cwt.; butter, 336s. cwt.; cheese, 158s. 6d. cwt.; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 4½d. lb.; cocoa (Ceylon, good to fine), 132s. 6d. cwt.; coffee (Costa Rica), 113s. 6d. cwt.; East Indian bold, 117s. 6d. cwt.; Mocha (longberry), 140s. cwt.; eggs,, 44s. 2d. per 120; ginger (washed Cochin), 52s. 6d. cwt.; hams, 220s. cwt.; lard, 167s. 9d. cwt.; nutmegs, 1s. 1d. per 110's to 120's; pepper (Singapore, black), 4½d. lb.; and Muntok white, 11d. lb.; raisins (Valencia), 142s. 6d. cwt.; sultanas (Smyrna), 147s. 6d. cwt.; currants (Vostizza), 99s. cwt.; sugar (granulated), 80s. cwt.; No. 1 cubes, 84s. cwt.; Mauritius (free), 79s. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 26s. 6d. cwt.; rice (Rangoon No. 2), 167s. 9d. cwt.; bran (Rangoon), 31s. 9d. cwt.; tea (Indian), 6½d. lb.; Ceylon, 6¾d. lb.; Java, 4¾d. lb; wheat (Australian), 113s. 6d. qr.; English (white), 87s. 6d. qr.

*Metals.*—Aluminium, £175 ton; bismuth, 12s. 6d. lb.; copper (standard), £77 ton; electro, wire bars, £86 15s. ton; gold bars, 117s. 4½d. oz; iron (No. 3 Cleveland), 225s. ton; hematite (mixed number), 260s. a ton; lead (soft foreign), £26 17s. 6d. a ton; manganese Poti, 3s. 0½d. unit; molybdenite, 60s. unit; nickel, £220 ton; platinum, 520s. oz.; plumbago. £37 10s. ton; quicksilver, £15 2s. 6d. bottle; silver bars, 44d. oz.; spelter (G.O.B.), £30 5s. ton; tin (standard), £214 ton; wolfram, 20s. 6d. unit; tin plates (20 by 14), 38s. 6d. box; zinc sheets. £52 10s. ton.

*Chemicals.*—Acids:—Boric, 75s. cwt.; oxalic, 1s. 7d. lb.; citric, 3s. 1d. lb.; tartaric, 2s. 3½d. lb; ammonia (sulphate), £31 11s. 9d. ton; benzole (standard), 3s. 6½d. gallon; arsenic (white powdered), £75 10s. ton; bleaching powder (35 per cent.), £22 10s. ton.; borax crystals, 41s. cwt.; cream of tartar, 212s. 6d. cwt.; potassium:—bi-chromate, 1s. 4½d. lb.; chlorate, 8½d. lb.; caustic, £85 ton; nitrate, £65 ton; permanganate, 3s. 1½d. lb.; prussiate yellow, 1s. 8½d. lb.; sulphate (90 per cent.), £28 10s. ton; sodium—crystals, 190s. ton; bi-carbonate, £11 15s. ton; bi-chromate, 1s. 0½d. lb.; alkali (58 per cent.), £10 15s. ton; chlorate, 5d. lb.; caustic (70 per cent.), £29 10s. ton; hyposulphate, £34 ton; prussiate, 1s. 1½d. lb.; nitrate, £23 7s. 5d. ton; sulphate copper, £41 ton; sulphate iron, 150s. ton; glycerine (crude 80 per cent.), £105 ton; industrial (1,250 per cent.), £155 ton; lead (red), £50 10s. ton; white dry, £56 5s. ton; white ground, £66 5s. ton.

*Miscellaneous.*—Cotton (American, fully good mid.), 12.70d. lb.; Egyptian, Sakellaridis, 12.15d. lb.; linseed (La Plata), £23 5s. ton; rape (Toria), £30 ton; soya beans, £21 ton; palm kernels, £30 10s. ton; oils:—linseed, £48 10s. ton; soya, £51 ton; cotton (crude), £44 ton; olive, 21s. 6d. gallon; ground nut, £62 ton; palm, £48 15s. ton; rape (crude), £72 10s. ton; petroleum, 2s. 3d. gallon; turpentine (American), 109s. 6d. cwt.; rubber:—plantation No 1 crêpe, 1s. 1¾d. lb.; smoked sheet, 1s. 1½d. lb.; fine hard Para, 1s. 3d. lb.

## DRIED FRUIT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows under date December 7:—

Currants.—The situation has not materially altered during the week, and business is exceedingly flat, which is not surprising considering the general unsettled trade in all markets, and buyers continue their waiting policy, only operating for absolute requirements. Meanwhile a potential demand is accumulating, but when this will assert itself and to what extent is difficult to foresee. The only trade passing was in Pyrgos at 75s., Gulf at 86s. to 90s., and a further consignment of Vostizza shade dried in ¼ c/s met a ready sale at 100s. to 104s. Quotations are:—Pyrgos, 75s.; Amalias, 77s. to 80s.; Patras, 80s. to 82s.; Gulf and Panariti, 86s. to 92s.; Zante, 84s. to 88s.; Vostizza, 92s. to 104s. Total arrivals from commencement of season to date, 14,470 tons.

Valencia Raisins.—Sound quality per Santa Ana was easily disposed of: ½ boxes 130s. to 135s., and ¼ boxes 145s. to 155s., but unsound condition parcels difficult to move. Seedless slow, 124s.

Sultanas.—The sale has proved most disappointing, and although stocks are extremely light, progress is difficult even at concessions in value. Afghans, yellow variety, compare very favourably with Smyrna in quality and price at 120s. to 127s. 6d., but the red class are unsaleable. Quotations are: Smyrna, 135s. to 150s.; Greeks, 140s. to 150s.; Afghans, yellow, 120s. to 127s. 6d.; Afghans, red, 110s.

Figs.—Pending fresh supplies close at hand the market is bare of skeleton cases. Bags, Naturals, prices show a further decline, 56s. to 65s., without attracting buyers.

## LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson, in their report for the week ended December 10, state:—The feature in our market during the past week has been its steadiness. A few months ago, when prices were sliding downhill at an alarming rate, a frequent catchword in the mouths of optimists was that, given steady markets, the trade would come in and buy freely. It is perhaps unfair to take one week as a test, but certainly at the moment the trade appear as far off coming in as ever! American mills have now stopped down to 50 per cent. short time, thus, after some deliberation, coming into line with the Egyptian section. Doubtless, in time, this measure will have a certain effect, but for the moment a feeling almost of apathy seems to have settled on Liverpool and Manchester, and reports from the latter centre are uniformly bad. Reports from Egypt are to the effect that the Government have ordered a reduction of one-third in the acreage to be planted; but this has failed to arouse any excitement here and the effect on this season's crop will be negligible.

Following on a meeting of protest held in Liverpool last July, efforts are now being made by the Department of Agriculture at Cairo to prohibit the further cultivation of Pilion cotton. The high yield per acre makes the cultivation of this cotton attractive to the grower, and it is reported that a large quantity has been produced this year. As far as Lancashire is concerned, it is still a very doubtful commodity and has not yet got beyond the experimental stage. The few small lots of Pilion cotton that we have seen so far this season have little to recommend them, for they do not possess either the silkiness or the length and strength of the genuine Sakellaridis, which this growth is expected, in some quarters, to supplant. With the continued absence of trade support it would appear likely that the price of Sakellaridis will drop somewhat from its present level, but for the present Uppers seem to be about right when viewed from the basis of American contract.

The small demand experienced this week has again been mainly for Uppers (types 1-4). A few bales of Sakellaridis (good and above) were sold, but white, brown and Sudan cotton were all neglected. Quotations show a decline of 50 points for good fair to good Sakellaridis, whilst fine Uppers are exceptionally raised 50 points. Fully good fair Sakel to-day is quoted at 28.00d. Total sales 700 bales.

# COMPANY MEETING.

## P. AND O.

### Lord Inchcape on the Outlook.

Presiding at the annual general meeting of the P. and O. stockholders on December 8, Lord Inchcape expressed regret that, in view of the none too rosy future of shipping, they were unable to propose a more generous dividend on the company's deferred stock.

Although they had had, much to their regret, to raise passenger rates in all directions, they were, owing to the high level of operating expenses, carrying passengers at less than cost. The cost of compliance with demands by the stewards' and other unions for increased living space had necessarily to be passed on to the public. While it would appear to be impossible profitably to run, as separate units, the large passenger vessels now building, the value at which their fleet stood as a whole would bring the average value of these costly vessels considerably under pre-war prices. The satisfactory operation of the underwriting account had enabled them to increase the insurance fund by half a million to £2,500,000. He could only add to the report that while they—and not they alone—had difficulties to face, they would, with the economic recovery which must arrive, be able to overcome them.

Alluding to his purchase and re-sale of the Government standard ships, he had, he said, been asked by the Government to dispose also of the ex-German steamers, and had considered it his duty to do so, in order to relieve the Government of the possible necessity of running them themselves. He had sold ninety-three of the ex-enemy vessels, and hoped soon to dispose of the balance. While many of the more recently built cargo vessels were excellent in every way, the German passenger ships were far below the British standard. His experience had led him to the conclusion that the shipbuilders of this country had nothing to learn from Germany in ship construction.

#### Fallacy of "Key" Industries.

He could not understand why shipping, so far from being regarded as a key industry, was especially penalised under the excess profits duty, nor why the manufacture of magnetos should be regarded as a key industry, and agriculture, the only indispensable industry, should not. The war had revealed them as dependent on Germany for synthetic dyes, magnetos, drugs, chemicals, and many other articles and materials; it also showed that Germany was even more dependent upon them. Their war-time improvisations were probably inferior, but they served the emergency. To make them now the foundation of our fiscal policy was a counsel of suicide. If it was necessary to foster any industry, they had better have subsidies than licences, prohibition, and their attendant establishments. The truth of the matter lay in the paradox that it was just as accurate to say there were no key industries as to say that every industry was a key industry. From the many processes and materials and forms of human skill that went to the making of the products of modern manufacturing, it was absurd to select one and declare it to be more essential than the rest, where all were equally essential. The logical outcome of the agitation over key industries was, he said, that Great Britain should only manufacture goods, all the raw materials and ingredients of which were to be found within the British Isles, or, at any rate, within the British Empire, for to that fantastic conclusion the key industry argument inevitably led. The only real service which the Government could render would be to leave the weather-beaten strength of British trade to fight its own battles in its own way.

#### Need for Industrial Peace.

There was a good deal of nonsense spoken about employers and employed. They were, he continued, all employers of each other. The dustman employed the bootmaker, the 'bus driver the tailor, and so on, and these in turn employed others. They employed him, the speaker, to look after the P. and O., and he employed others to help him. The nation employed His Majesty the King to reign over them—which he did uncommonly well—and he in turn employed Ministers to assist—or perhaps to hinder—him. In fact, they were, he said, already communists in the best sense of the term. Unique among the nations of the world, they had freedom, social happiness and equality of opportunity, and, losing these precious legacies, they would lose everything. They had just weathered a strike in the coal industry which, had it continued, would have paralysed the life of the country. National prosperity was impossible when exposed to such recurrent menaces to basic industries. If this country was not to become a second Holland, they must have industrial peace. The British workman was more advantageously placed than any other body of workmen on earth, but his benefits would be worth nothing if he did not pull his weight, and restrain the wild men who were striving to wreck him. With the unions restricting output to the level of the least efficient worker, and controlled by advocates of continuous war between employer and employed, the industrial outlook was as grave as it could be. It was in such conditions impossible for a British manufacturer to quote terms and a delivery date. As a consequence orders were going abroad and unemployment increasing. Industrial peace was becoming for them a question of national ruin or national salvation. Without harder work and a durable concordat between labour and capital they would never be able to break the hopeless chase of wages after prices, which made it impossible for their would-be customers to buy their goods. A year of stabilised wages would recover in trade all that they yielded up during the war. Without that truce, the days of their commercial and financial supremacy were numbered.

#### Anti-Dumping Legislation Condemned.

He was, he continued, an unrepentant Free Trader; and he was convinced that the country's need was, more than ever, commercial liberty, without the obstruction of tariffs or bureaucratic meddling—even so stalwart a Protectionist as Professor Hewins had declared that the whole conception of key industries was academic and impracticable. He had listened the other night to a moving speech by the Prime Minister which was absolutely sound, economically, until he came to dumping, as to which, he said, the Government were pledged to take action. There had been no such dumpers as British manufacturers; and to embark on an anti-dumping campaign would be setting an example to which they could take no exception in others. Carried to its logical conclusion this would mean a total cessation of international trade, and they would be reduced to taking in one another's washing. Economic laws must assert themselves. Foreign nations might be able to supply them more cheaply than they could supply themselves. France might, and Germany, with her low mark value, would, certainly, be a competitor. Protection as a remedy would be worse than the disease. They had to get back to sound economics and to their gold standard if these islands were to maintain their position in the world. The Government could greatly help the nation to get once more on the straight and narrow path of sound economics by refusing to have anything to do with protection; by freeing industry from control; and by abolishing the Excess Profits Tax, which was exhausting all reserves and preventing fresh developments, and by balancing its expenditure and income. The "New World," of which they heard so much, would, if based on bankruptcy, not be much of a success.

#### Excess Profits Duty.

The E.P.D. had proved unfair and pernicious. People with a favourable datum line were sure of their untaxed pre-war profits; others with a datum line which was unfavourable were mulcted in from 40 to 60 per cent. of anything extra they made. The duty, through private and business extravagance, through inflated wages and consequent inflation of prices and of paper currency, was leading the country to financial chaos. Relied upon during the current year for a large portion of the revenue, the E.P.D. showed a serious decrease, with enormous reclamations against the Treasury. Nobody more condemned it than the Chancellor, who was its author, now that he had some years of practical business experience. It was not the Government alone which was to blame, but the members who, representing the people in Parliament, seemed unconscious of the threat of bank-

ruptcy latent in all sorts of schemes for which money was voted and for which they could not afford to pay. The Prime Minister had intimated that drastic economies were to be instituted. It was to be hoped he would in this respect show the same courage which he displayed during the war. Economy did not consist in dismissing a few Whitehall messengers and typists. As an example there were crowds of functionaries on the Tigris fattening on Government pay, doing work which the commercial community there could do better at less cost, who ought to be wiped out.

### Trade Depression.

Before the war 40 per cent. of their exports went to Europe, and neither they nor any of the Allies, nor any of the States that their joint victory had brought into precarious existence would be prosperous and stable until the economic recovery was general, and included both the vanquished and the victors. One and all would revive from the war in proportion as Germany and Austria and Russia and Hungary revived. One reason for the depression of British industry was the absence of continental demand. It was something to the good that they were at last making a beginning towards the resumption of trade with Russia, but much more would have to be done if Europe was to find its feet. For five years Europe produced merely to destroy. As a consequence Europe and the world were poorer. The wealth so destroyed was now represented by paper obligations from the various Governments, which meant from the people themselves. Interest on this debt could only be paid by taxation, and taxation could only be paid by production, failing which there must ensue bankruptcy or, partly or wholly, repudiation.

They had, he went on, got into this position :—Higher wages and shorter hours were everywhere demanded, yet unemployment was increasing and the Government were starting relief works at the expense of the taxpayer. Men who were not allowed by the unions to take employment at a world-economic wage the Government proposed to support out of the Consolidated Fund. The whole system was wrong, and was bound to end in disaster. He hoped they would forgive him for expressing his views at length. Nothing which those who had charge of great undertakings could do would achieve success if cardinal principles were disregarded, and their financial, industrial, and labour difficulties would be surmounted only if they steered a safe and prudent course.

### The Company's Position.

As for the P. and O. Company, if it were broken up to-morrow —which it would not be—and its assets sold below market value, its preference stock paid in full, its debentures redeemed at par, its employees pensioned off, and the directors compensated for loss of office, sufficient would remain to give the deferred stockholders to-day's market price for their holdings—and possibly more.

In conclusion, he referred with regret to the loss they had sustained by the death of their former colleagues, Mr. Williams and Lord Cunliffe, and expressed his gratitude to commanders, officers, engineers and their subordinates, and to the company's employees all over the world for their loyal and fraternal co-operation in carrying on the work of the company.

## COMPANY NOTES AND REPORTS.

### Anglo-Persian Oil.

The report of the Anglo-Persian Oil Company for the year ended March 31 states that the profit for the year, after allowing for depreciation, debenture interest, home charges, and royalty, amounts to £2,611,615 4s. 5d., to which has to be added the balance brought forward from 1919, £275,527 19s. 8d., making a total of £2,887,143 4s. 1d., from which falls to be deducted : stamp duty, registration fees, etc., on increased capital and debenture stock, and expenses of issue, £233,302 1s. 3d.—£2,653,841 2s. 10d. ; and the following appropriations have been made :—Debenture stock redemption reserve £80,000, preference share reserve £50,000, general reserve £575,000, amortisation reserve £100,000 (£805,000)—£1,848,841 2s. 10d. From this the following dividends, less income tax, have already been paid on the preference shares at the rate of 6 per cent. per annum :—For half-year ended September 30, 1919, £60,000 ; for half-year ended March 31, 1920, £150,000 ; and the directors now recommend the payment of the following further dividends, less income tax :—20 per cent. per annum on the amounts paid up on the ordinary shares £627,863 0s. 2d., 2 per cent. per annum additional on the preference shares, making 8 per cent. for the year £100,000 (£937,863 0s. 2d.), leaving a balance of £910,978 2s. 8d. to be carried forward, subject to excess profits duty and corporation profits tax for the year ended March 31, 1920. In December last year an issue was made of 3,000,000 participating preference shares of £1 each at a premium of 3s. per share. 4,500,000 ordinary shares of £1 each (of which 3,000,000 are fully paid and 1,500,000 are called up to the extent of 1s. per share) at par, and £2,600,000 5 per cent. debenture stock at £85 per cent.

The refinery in Persia has worked satisfactorily during the period covered by the accounts and the throughput has been further considerably increased. The extensions referred to in previous reports are making good progress, and are being brought into operation as completed. The completion of the refinery at Swansea has been delayed by labour troubles and by the prevailing slowness of building operations, but it is expected that it will be ready to start working during the first half of next year. The oil wells in Persia continue to maintain their satisfactory rate of output. The additional pumping stations referred to in the last report will soon be finished, and arrangements have been made for a further increase in the pipe line capacity to carry the additional quantities of crude that will be required for the extended refineries in Persia, the refinery at Swansea, and also to provide supplies for the affiliated companies in Scotland, France, Australia, and elsewhere. The company, through its subsidiary, the British Tanker Co., Ltd., and other associated companies, has placed orders for a further large number of tankers, in order to meet the increasing transport requirements. The company, through its subsidiary the D'Arcy Exploration Co., Ltd., is prospecting in various parts of the world, and wherever geological conditions are reported to be favourable for obtaining oil in commercial quantities drilling is being carried out. The other various subsidiary companies carrying on different branches of the company's business have all had a successful year, and arrangements are being made for largely extending their operations.

The company has acquired an interest in the Scottish American Oil and Transport Co., Ltd., and has undertaken its technical and commercial management, and also that of its subsidiary, Tankers, Ltd. An agreement has been entered into with the Commonwealth Government whereby a company entitled "The Commonwealth Oil Refineries, Ltd.," has been formed with a capital of £500,000, for the purpose of refining in Australia. The capital is being subscribed for jointly by the Commonwealth Government and the company. Arrangements have been completed for the formation of a French company with a capital of 100,000,000 francs, to undertake the refining and distribution of oil, and the development of the indigenous oil resources, in France and the French colonies. The capital will be subscribed for jointly by French interests and the company. A large interest has been taken in a new company which has been registered under the title of "The British Oil Bunkering Company, Ltd.," with a capital of £1,200,000 for the purpose of carrying on a bunkering business in liquid fuel. As the company's insurance business is now so large as to justify the company carrying a large proportion of its own risks, a subsidiary company for this purpose has been formed under the title of "The Tanker Insurance Company, Ltd.," with a capital of £100,000, all of which has been subscribed for by the company and its subsidiaries.

Meeting, Winchester House, E.C., December 20, noon.

### British India Steam Navigation.

The accounts for the year to September 30 last show, after providing for depreciation, an available balance (including £22,188 brought in) of £184,898, which the directors recommend should be distributed (less interim dividends paid in May last) as follows : Dividend of 5 per cent. on preference stock, £35,000 ; dividend of 8 per cent., free of tax, on shares, £76,576 ; special bonus of 5 per cent., free of tax, on shares, £47,860 ; carried forward, £25,462. The steamers were fully employed during the year, excepting those which were for certain periods laid up for reconditioning, after long employment in Government service. Five steamers are still running under requisition by Government at Blue Book rates, which are not remunerative. Five old steamers were sold for breaking up, viz. : Booldana, Dumra, Dwarka, Palamcotta, and Ramapoora, and two steamers were lost during the year, viz. ; the Fazilka, which was wrecked on Nicobar Island, and the Erinpura, which grounded on the Mushejera Reef, Great Hanish Island, and which has, since closing accounts, been abandoned to the underwriters as a constructive total loss. Both steamers were insured, and the insurance money has been recovered from the underwriters.

The Secretary of State for India announces that Mr. B. A. White, senior resident partner of Messrs. Bird and Co., Calcutta, has been appointed a member of the Committee of Inquiry into Indian Railways, as the representative of European commercial interests in India, instead of Mr. C. F. Beadel, of Calcutta, who is unable to act.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

JAFFA.

The report for October states:—As a result of large arrivals of cereals during the month, especially wheat, barley, and millet, a considerable decline has occurred in the prices of these products, notably as regards those of which the export is still prohibited. The prices of wheat and barley have also been affected by the unfavourable position with regard to the wheat crop, as a result of the heavy rains of the previous year. The market for manufactured goods is completely inactive in consequence of the uncertainty of the European market position.

HAIFA.

The report for October states:—As a result of the prohibition of the export of cereals from Palestine, the market is quiet, and under the influence of that measure and the financial stringency prices have undergone a considerable decline. The Government estimates that this year's crop will suffice for the needs of the country, and does not anticipate for the time being a surplus that will permit of exports. Prices (per 100 kilos) are as follows:—Wheat, 54s.; lentils, 45s.; sorghum, 30s.; sesame, 90s. These prices are nominal, and holders cannot find openings for the disposal of their stocks, and are contenting themselves with selling in small quantities to the retailers.

The crop of olive oil is large and of excellent quality. It is estimated that it will amount to 1,200 tons, two-thirds of which will be available for export, one-third being needed for internal consumption. Prices vary according to the quality of the oil between £E100 and £E125 per French ton. The export of this commodity, which was prohibited last year, is now permitted as regards the stock of the old crop, estimated at between 350 and 400 tons.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended October 27:—This week's sales amount to 67 cases from 14s. 10d. to 16s. 6d. for current qualities of 9 per cent. to 10 per cent., and from 17s. to 19s. 6d. per lb.. for Carahissar as to quality. The arrivals are 700 cases against 1,050 at same date last year, and our available stock is to-day about 745 cases. The exchange for cheque on London is 483 piastres per pound sterling, and 0.71 dollars for one Turkish paper pound.

## ON 'CHANGE.

### Further General Decline.

(From Our Own Correspondent.)

London, Monday night.

It was hoped that the worst had been seen of the depression that has been overhanging all markets for some weeks, but the past few days proved this expectation to be unjustified. While there have been no specially unfavourable developments abroad, there has, all the same, been a strong outburst of Continental liquidation, and this, combined with continued offerings from London and the provinces, has resulted in a further general decline.

Gilt-edged securities have shared in the prevailing weakness and there have been fractional declines in a number of directions. Foreign bonds have been a specially weak feature, Greeks in particular suffering losses.

In regard to other markets, there is an invariable tale of depression to be told. Industrials have been markedly dull, owing to heavy liquidation and the lack of support, it being a case, for the most part, of all sellers and no buyers, and, as a result, there has been a fairly general shrinkage of values. Oils have participated in the general weakness, while rubbers—need it be said?—have readily joined in the downward march.

Near Eastern securities have drooped somewhat. Egyptian Guaranteed 3 per Cent. are ½ down at 59, while Turkish Guaranteed 4 per Cent. have shed 1½ at 66. Greek Guaranteed 2½ per Cent., 1898, have fallen 5½ to 54, while Turkish 3½ per Cent. Egyptian Tribute Bonds are ¼ lower at 52¾.

Greek securities have declined almost all along the line. The 5 per Cent. 1881 Loan is 3½ down at 37½, and the 5 per Cent. 1884 issue has shed an equal amount at 37½. The 5 per Cent. 1890 Loan is 3 points down at 38, while Fundings at 38 have fallen 2 points, and the 1910 and 1914 Loans are quoted at 30 and 37½, a drop of 2 and 3½ points respectively. The 1902 Loan is exceptionally 3½ up at 34½.

Banks have been weak. Agricultural 3½ per Cent. Bonds have remained unchanged at 55, but the 3½ per Cent. Guaranteed Bonds are three points down at 57. Imperial Ottoman Banks have declined a ¼ to 7¾, and National Bank of Egypts have shed 5/16 at 16½. Land Banks are a shade stronger at 4½, at which level there are unsatisfied buyers.

There have been a number of fluctuations in Land shares. Beheras are ½ point lower at 9½, while the Preference shares remain the same at 2¾. Anglo-Egyptian Land Allotments are unaltered at 3½, while Egyptian Consolidated Lands are 1d. lower at 1s. 3d. Delta Lands are 10s., a drop of 6d., while Gharbieh Lands are unchanged at 2. New Egyptians are 1s. 6d. down at 23s. 6d., while Union Foncieres are exceptionally 1/8 up at 3½. Sudan Plantations have been a rather weak spot, and are closing 3/16 down at 4¼.

Among Miscellaneous descriptions Abyssinian Corporations are unchanged at ¼. Alexandria Waters have firmed up ¼ to 6¾, at which there are buyers. Morums are 9d. down at 12s. 3d., while Egyptian Salts and Sodas are unchanged at 35s.

Oils have been weak. Anglo-Egyptians have fallen ¾ to 2½. Phœnix are 2s. 6d. down at 10s., Roumanian Consolidated are 3s. 3d. down at 17s. 6d., but Steaua Romana are unchanged at 18s.

---

The Indian Trade Commissioner has received the following cable from the Director-General of Commercial Intelligence, Calcutta, dated December 2, 1920:—An all-round increase in coal-miners' wages averaging from 15 to 25 per cent. has been granted with effect from November 29. Bombay cotton trade has reopened. Forward business and contracts for 1920-1921 crops are now proceeding.

## LANCASHIRE COTTON.

### The Egyptian Decision.

(From Our Own Correspondent.).

Manchester, Monday.

Trading conditions in the market have not improved since a week ago. The amount of inquiry, if anything, has been smaller than ever. Merchants are disposed to adopt a waiting policy until the prospects are clearer. In connection with Egyptian cotton the feature of interest has been the decision of the Government to restrict the acreage by one-third. The matter has been considered by the Manchester Cotton Association and the Chamber of Commerce, and Mr. E. F. Stockton, the president of the latter organisation, has sent a letter of protest to Lord Milner, the Colonial Secretary. The situation is serious for spinners of fine yarns in Lancashire, and if there is to be a decline in the output of Egyptian cotton of about 2,000,000 kantars there may be a distinct shortage of supplies next year, especially should there be a revival of trade. In the circumstances prices have been rather steadier, but users have not been stimulated to buy more freely. A quiet, unimportant turnover has taken place in Egyptian yarns. Many producers are pressing sellers, and open to accept very low rates. In piece goods for the Near Eastern outlets inquiry has been within a small compass. According to cable advices, however, clearances in some quarters are improving, and if prices could be stabilised there seems to be a possibility of more buying before very long. Operations for India and China have been checked to a greater extent by the fall in silver and the consequent drop in the value of the rupee to practically the pre-war level. In most weaving districts of Lancashire there is a tendency for more looms to stand idle for want of work. American yarns have again moved off slowly, and prices remain very irregular. Some special transactions have been put through in coarse counts and extra hard descriptions for the Levant.

## TENDERS INVITED.

### Egypt.

Photographic Material.—The Egyptian Ministry of the Interior invites tenders for the supply of photographic apparatus and materials (chemical, etc.) required for the year 1921-2. Tenders, which must be submitted by persons or firms residing or having a representative in Egypt, should be marked "Tender for the supply of Photographic Material," and addressed to The Director, Personnel and Equipment Department, Ministry of the Interior, Cairo, Egypt. January 31, 1921 (L.).

## SHIPPING INTELLIGENCE.

### German Ships for Greece.

(From Our Own Correspondent.)

Athens, November 27.

The Greek Government has been notified that twenty-nine German steamers have been allotted to Greece to replace those lost during the war through enemy action. Of these twenty-nine steamers, the approximate tonnage of which is 86,000, twelve, representing about 44,000 tons, will be handed over to Greece immediately. It is estimated that these steamers will make up for one-fifth of the total loss incurred by Greek shipping.

### Forthcoming Sailings.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parenthesis:—

*Anchor Line.*—S.s. Olympia, for Bombay (Liverpool, December 28).

*Anchor-Brocklebank Line.*—S.s. Maimyo, for Calcutta (Birkenhead, December 18); s.s. Blackwell, for Port Said, Colombo, Madras, and Calcutta (leaves London December 24); s.s. Mathura, for Calcutta (Birkenhead, December 29); s.s. Malakuta, for Calcutta (Birkenhead, December 29); s.s. Imani, for Port Said, Colombo, Madras, and Calcutta (leaves London January 7).

*Bibby Line.*—S.s. Derbyshire, for Marseilles, Port Said, Colombo and Rangoon (Liverpool, December 29).

*Byron Steamship Line.*—S.s. Lord Broughton, for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna and Constantza (Liverpool, December 23).

*Clan Line.*—S.s. Clan Macindoe, for Colombo, Madras, and Calcutta (Birkenhead, December 30).

*Cunard Line.*—S.s. Phrygia, for Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, December 18); s.s. Sea Serpent, for Patras and Venice (Liverpool, December 30).

*Ellerman's City Line.*—S.s. City of Manchester, for Calcutta (Birkenhead, December 20); s.s. Crosby Hall for Bombay and Karachi (Birkenhead, December 22); s.s. City of Pekin, for Karachi and Bombay (Birkenhead, December 22); s.s. City of Lucknow, for Calcutta (Birkenhead, December 31).

*Ellerman's Hall Line.*—S.s. Merton Hall, for Karachi (Liverpool, December 17); s.s. City of Alexandria, for Bombay (Liverpool, December 31).

*Glen Line.*—S.s. Glensanda, for Port Said, etc. (London, December 23); s.s. Glenapp, for Port Said, etc. (London, January 6); s.s. Carnarvonshire, for Port Said, etc. (London, January 20); s.s. Pembrokeshire, for Port Said, etc. (London, February 3).

*Harrison Line.*—S.s. Architect, for Calcutta (Liverpool, December 22); s.s. Inventor, for Calcutta (Liverpool, December 28); s.s. Orator, for Calcutta (Liverpool, January 12).

*Henderson Line.*—S.s. Chindwin, for Port Said and Rangoon (Birkenhead, December 22).

*Holt Line.*—S.s. Stentor, for Port Said, etc. (Swansea, December 21); s.s. Helenus, for Port Said, etc. (Birkenhead, December 23); s.s. Eurypylus, for Port Said, etc. (Birkenhead, December 23); s.s. Titan, for Port Said, etc. (Glasgow, December 30); s.s. Knight of the Garter, for Port Said, Singapore, etc. (Glasgow, December 30); s.s. Teiresias, for Port Said, Singapore, etc. (Birkenhead, December 30).

*Johnston Line.*—S.s. Cundall, for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 24). A steamer will sail on December 24 for Syra, Smyrna, and Constantinople.

*Moss Line.*—S.s. Sitra, for Gibraltar, Algiers, Malta, Alexandria (with through transhipment to Moroccan, Algerian, Cyprus, and Syrian coast ports), (Liverpool, December 21); s.s. Karnak, for Gibraltar, Malta, Piræus, Syra, Smyrna, and Constantinople (Liverpool, January 8).

*Papayanni Line.*—S.s. Maronian, for Malta and Alexandria, also taking cargo for Beyrout, Alexandretta, Jaffa, Haifa, Mersina, Port Said, and Cyprus, etc. (Liverpool, January 1).

*Power Line.*—S.s. Petworth, for Rabat, Laraiche, Tangier, Casablanca, etc. (London, middle of December); s.s. Pangbourne, for Rabat, Laraiche, Tangier, Casablanca, etc. (London, early in January).

*P. and O. Line.*—S.s. Karmala, for Bombay (London, December 17); s.s. Nore, for Colombo, Madras, and Calcutta, also taking cargo for Malta, Port Said, and Aden (London, December 17); s.s. Kashgar, for Bombay, also taking cargo for Gibraltar, Port Said, and Aden, with transhipment for Indian coast and Persian Gulf ports (London, December 24); s.s. Syria, for Colombo, Madras and Calcutta, also taking cargo for Malta, Port Said and Aden (London, December 31); s.s. Kaisar-i-Hind, for Bombay (London, December 31).

*P. and O. British India Line.*—S.s. Nerbudda, for Colombo, Madras, and Calcutta (London, December 24); s.s. Chakrata, for Colombo, Madras, and Calcutta (London, end of December); s.s. Neuralia, for Bombay and Karachi (London, January 7); s.s. Chyebassa, for Colombo, Madras, and Calcutta (London, January 15).

*Westcott and Laurance Line.*—S.s. Claro, for Malta, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (London, December 19).

## LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for October:—

Trade in Constantinople has not improved as every one hoped, and unfortunately it is not even possible to say that at the present moment there is an optimistic feeling about. The recent news from South Russia is not at all bright and the existing state of the European markets, especially Manchester and Bradford, has had an adverse effect on our position here, which was showing signs of resurrection in view of the recent revival of trade relations with certain of the Black Sea ports. Under existing conditions, it follows as a natural consequence that many of the foreign banks have found themselves compelled to restrict their accommodation to merchants in certain branches of commerce; the depreciation of Turkish currency which has taken place in the past few days, adds yet a further obstacle to the resumption of normal conditions of trade.

With the advent of the new Turkish Cabinet of experienced ministers, much is hoped for towards a settlement of the deplorable state of affairs at present existing in the interior. In these days of restricted trade the attention of merchants is ever turned towards Asia Minor and great hopes are centred on the re-establishment of commercial relations with what is, after all, the corner stone of the trade of Constantinople, for it is realised that the economic crisis here would be considerably ameliorated were the agricultural supplies, which have been accumulating in Asia Minor during the past year, freed for our markets.

It is officially stated with regard to concessions granted by the Government for the working of forest and mining undertakings that the war years shall not be considered as part of the duration of concessions. The Minister of Commerce is taking the necessary steps to modify the Acts dealing with this subject.

The Turkish exchange during the greater part of the month followed the course of the French franc in London, but during the last few days of October the lira depreciated. Some improvement was expected during the month owing to the export season in Smyrna being in full swing, but the almost total lack of exports from Constantinople resulted in a shortage of sterling and U.S. dollars which were in demand to meet imports. The rate for sterling rose from piastres 430 to piastres 450 between October 25 and 28, and revealed the very weak position of the Turkish currency when not backed up by exports. This depreciation may be expected to continue so long as Anatolia remains closed to trade and exportable goods are held up in the interior. The principal business done was in sterling, francs and U.S. dollars with some demand for cheques on Bucharest. A fairly large business was done in foreign money on the Bourse, although the course of the exchanges was unfavourable to local speculators who are generally on the "bull" side. The depreciation of the Turkish currency was unfavourable to the collection of bills drawn on Constantinople in sterling and dollars as many drawees endeavour to delay payments until rates are more favourable to them.

## NOTES OF THE WEEK.

### *King Constantine in Greece.*

King Constantine has returned to Greece. On the day of his arrival Athens gave itself up to the wildest transports of rejoicing. The demonstrations had nothing to do with international politics, and only the captious critic would have asked the Athenians to moderate their enthusiasm because behind the return of the popular hero lurked the shadow of the Allies' displeasure. In the King's message to his people, as reported, there is nothing to which exception can be taken. He was reminded, he said, of his father's motto, "My strength is in the love of the people," the truth of which King Constantine has a better opportunity of proving than ever was offered to King George of Greece, and somewhat courageously he added: "I shall devote all my efforts to tightening our very good relations with the great Allied Powers, and to consolidating our bonds with our gallant Ally, Serbia."

### *The Allied Attitude—*

At the moment, however, the great Allied Powers to whom King Constantine referred will have nothing to do with him. The more egregious blunder of recalling their representatives from Athens was not committed; but the British and French Ministers, as well as the various missions at work in Greece, have received official orders to sulk. Only the men who have blundered in practically every single decision taken in regard to the Near East over a period of five or six years could have hit upon such a plan, and fortunately for the reputation of Great Britain it is not necessary to regard it as representing the considered wisdom of the British Foreign Office. Like every other step taken of recent years in the East, it stands divorced from any far-sighted policy, and is merely the act of a man groping in the dark, or following the lead of another without understanding his movements or knowing his purpose. But even in the nursery a sulk has to come to an end sooner or later, and presumably the same fate awaits it when it bears the hall-mark of British and French statesmanship.

### *—and the Way Out.*

The Allied sulk in Athens was prompted by the desire to gloss over the conflict of views between the British and French Governments in regard to the Near East; but as only definite action can bring the Allies' divergent policies into harmony, we need not be over tender towards the negative course of trying to penalise Greece for the Allies' faults. The situation is as follows: France is hostile to Greece, wishes to curry favour with the Turks, and is working to have the Treaty of Sèvres revised in Turkey's favour. The British Government, which has had opportunity to realise the prejudice caused to British interests by the terms imposed upon the Turks, is opposed to any modification of the Treaty, but wants Greece to maintain her hold in Asia Minor, in spite of being deprived of Allied support as a result of France's insistence upon reprisals for the electoral defeat of M. Venizelos. By boycotting King Constantine the two Allies effectually stalemate themselves. The Greek Army will now take its orders only from the King; but if it is neither paid nor fed, it will take orders from no one, for it will cease to exist. If it is still wanted to do the Allies' work of coercing the Turkish Nationalists, it must be paid and adequately equipped. The British policy of "the Treaty and nothing but the Treaty," in spite of its having proved unworkable and harmful to British interests, we do not pretend to understand. On the other hand we would strongly oppose the boorish methods that have, quite justifiably, brought France into disrepute and hatred throughout the East. If the French contention that a mistake has been made in the terms of the Turkish Treaty is right—and it is impossible to dispute the fact—then the only honourable course for the Allies, as we have stated before, is to admit their error and to revise the Treaty in consultation with both the Greeks and the Turks. So obvious and just is this course that there can only be one thing to prevent its being adopted, and that is the personal vanity of those responsible for the Treaty, who shrink from admitting, what is patent to the whole world, that they have piled mistake upon mistake in their handling of the Near Eastern question.

### *A Reformed Greece.*

If King Constantine wishes to extend to the Allies in their dilemma the consideration which he holds was denied him in a similar predicament during the war, he will know what steps to avoid. In the first place, in spite of any powers that may be conferred upon him by the Greek Constitution, he will conform to what is generally regarded as constitutional usage and allow his Government alone to declare the will of Greece. The Greek Government will be able to state whether Greece is able single-handed to support the imperialistic designs mapped out for her by M. Venizelos, and if she is not, will signify its readiness to see those designs modified. Further, it can justify its claim to being based broadly on the people's will by showing that it represents the Greek people and not merely a political faction, eager to enjoy the spoils of office before it is remove

Digitized by Google

from power. The dismissal of University professors as a result of the change of Government, we need hardly say, is not understood in the West, and can only create a bad impression, unless a very strong case can be made out in its favour. No doubt it has been the custom in the Balkans in the past; but it will be idle to claim that the Greek people are engaged upon any "secular work for civilisation," if they perpetuate such petty-minded practices.

### *Bulgaria and the League of Nations.*

The admission of Bulgaria into the League of Nations is an act of common justice, but it is also a personal triumph for M. Stambolisky, the Prime Minister. It will not be enough, however, for Bulgaria merely to be a member of the League; her first care should be to see that she is ably represented at the League's discussions. In this connection we regret to think that a number of her most experienced citizens have dissociated themselves from the Government of the day, and are seemingly watching for an opportunity to make political capital out of mistakes made by the inexperienced Agrarian Party, instead of sinking party differences and lending their aid to the State. If they have Bulgaria's interests at heart, they will be pleased with the rapidity with which she has recovered the good opinion of the world, and will give the credit due to their Prime Minister. M. Stambolisky, on the other hand, can hardly fail to have realised as a result of his European tour the necessity of having around him and using in the service of the State the best brains of the nation. It would surely, therefore, strengthen his position in his own country as well as in Europe, if he signalised Bulgaria's entry into the League of Nations by a complete amnesty for the political errors of the war and removed from his administration the reproach of perpetuating political imprisonment as an adjunct of party government.

### *Albania as Member of the League.*

Another new member of the League of Nations is Albania, and in view of the fact that the League pledges itself to defend the territorial integrity of its members, we can only conclude that Albania's frontiers are regarded as fixed and will leave no room for irredentist unrest in the future. But unless steps are promptly taken to satisfy the world that this is actually the case, and unless all cause for complaint against her neighbours for encroaching upon her territory is taken away from Albania, the action of the League will be cited as proof of its uselessness and failure to correspond with the realities of everyday life.

### *The Roumanian Outrage.*

The dastardly crime in the Roumanian Senate has claimed another victim in M. Grecianu, Minister of Justice, who has succumbed to his injuries. His country loses a keen politician of conspicuous ability and great personal charm, whose influence was always in the direction of moderation, however high party feeling might run. It can but be hoped that the anarchical outrage, which has profoundly shocked Roumanian public opinion, will have a steadying effect on the political situation. It would if it brought about a general realisation that when politicians become too engrossed in their parliamentary conflicts an opening is left to the worst influences from which any country can suffer.

### *Holland and Yugoslavia.*

A Serbo-Dutch incident, unpleasant but not, it is to be hoped, likely to lead to very serious consequences, has to be recorded. During the war, it may be remembered, the Serbian Government imprisoned the Netherlands Consul, M. Rappaport, who is said to be of Austrian nationality, and who was accused of espionage. More recently, it is stated, a letter from him, containing uncomplimentary references to Serbians, came into the possession of the Belgrade Government, who a short time ago ordered him to leave the country within two days. According to Dutch reports, conversations were in progress, and an understanding was all but reached at the time when Yugoslavia issued the order for M. Rappaport's withdrawal. That step and the refusal of the Serbian Government to accept a note of protest in the name of his Government made it, in the opinion of the Dutch Government, impossible to maintain good relations with Yugoslavia, whose Chargé d'Affaires at The Hague was accordingly notified that his presence was no longer desired in Holland. At the same time it is announced, apparently with some authority, that the removal of the two representatives is not to be regarded as severing diplomatic relations between the two countries. That is as may be; and we shall hope that normal relations will be speedily restored. But the situation is too unpleasant to be ignored or allowed to persist.

### *Armenia and the League.*

Unlike Albania and Bulgaria, Armenia has failed to secure admission to the League of Nations, and Georgia has shared a similar fate. In the case of Armenia the Assembly's decision was due to the unsettled state of the country, the fear that it may fall entirely under the control of "enemies"—that is to say, it is to be supposed, of enemies of the League, in the form of Anarchy and Bolshevism—and the lack of stability of the present Government. In the circumstances the decision will be understood by all Armenians, and approved by very many of them. Moreover, the blow was softened by a motion expressing the "earnest hope" of the Assembly that "it may be possible to admit Armenia into full membership of the League at its next meeting." The hope is based on the efforts to be made by "the President of the United States, supported by the Governments of Spain and Brazil and by the Council of the League," on behalf of the Armenians, to secure them a settled government, within "the boundaries . . . . finally settled under the Treaty of Sèvres." We should like to think that this motion amounted to something more than a pious aspiration; but we find it difficult to believe that Spain, Brazil, and the Council of the League, even allied with President Wilson, will be able to get the Bolshevists or the Turkish Nationalists to respect frontiers marked out for Armenia, unless they can be defended by forces capable of inspiring a respect which has hitherto been sadly lacking on the part of these strangely-paired partners. If Armenia and Georgia are to be saved from the Bolshevist hordes it will have to be done quickly—and by weapons other than words.

### *The Government and the Near East.*

The Near East and our policy in Mesopotamia and in Persia were discussed at some length in the House of Commons on December 15. Mr. Churchill defended the expenditure on Mesopotamia and Persia, and, thanks to the many openings given him by his critics, came through the ordeal remarkably well. General Townshend made an interesting and picturesque maiden speech, in the course of which he declared that with a force of 70,000 troops he could conquer half Asia, and that if he had had that number instead of his little force of 13,000 men, only the Black Sea would have stopped them. Sir Park Goff indulged in some extraordinarily outspoken remarks regarding the Armenians—remarks which drew from "Tay Pay" an exclamation of horror—and Mr. Ormsby Gore renewed his plea for a new department to deal with the Middle East. The last speaker elicited from the Prime Minister the announcement that the Government had decided that instead of the War Office, the India Office, and the Foreign Office all having a voice in the direction of our Near Eastern policy, entire responsibility is to be made over to one of those departments—but which one the speaker did not specify. Perhaps the most important thing in the debate was Mr. Lloyd George's categorical statement that "It is part of our definite policy to clear out of Persia." He also declared that the Government is "determined to proceed with the redemption of the pledges made to the Arabs as to the setting up of an Arab State" in Mesopotamia; and he drove home the point that since those who criticised the Government about Mesopotamia had not the courage to say that we should clear out of it altogether, they had no right to say constantly that money was being squandered there.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**The Week in Parliament.**

The Government have had both good and bad fortune at Westminster. Home Rule is passed by both Houses; but the Lords have thrown out the Health Bill and amended Lord Lee's Agriculture Bill. On Home Rule the Peers simply did as they were told—since the Budget of 1909 and the Parliament Act the Upper House is chary of touching first-class Government measures. On Health they acted as an ordinary Conservative body; on Agriculture they merely thought of their own interests.

As a matter of fact, the Government simply asked for trouble on the Health Bill. It was an omnibus Bill, a sort of dustbin of the Ministry of Health; it contained provisions about convalescent soldiers, which are a matter of conscience to the community; provisions about financing the new housing schemes, which will have to be redeemed early next year, because the houses are already building and the builders are looking for their subsidy; and anything else that came into Dr. Addison's head.

The real trouble is that Dr. Addison's Bill is like the curate's egg of the story. Parts are reasonably good, but the other parts . . . And it is very natural that there is a noise about the less palatable parts of the egg; the Health Ministry at present is neither a fresh medical egg of the familiar variety, nor yet a properly hatched bureaucratic chicken, but something betwixt and between, a fearful and evil-smelling mystery. The House of Commons swallowed it, after one or two gulps; but it was too much for the Lords. One sniff at the unsavoury morsel, and there was no further pretence about it. They picked it up gingerly and threw it in the ashpit.

It is really a pity that Dr. Addison does not resign. Perhaps Mr. Lloyd George keeps him as a proof of the strength of the Government; for a Ministry that can contain Dr. Addison and not be seriously weakened has all the appearance of immortality. Personally he is a charming little man, with a good bedside manner; but I would sooner trust his medical than his political skill.

The action of the Peers on the Agriculture Bill was frankly selfish. It is necessary for this country to grow more food, and for that reason it is necessary to lay down a definite policy, to penalise the bad landlord and farmer and to reward the good one. But the Peers dislike being interfered with in the matter of land, and emasculated the Bill. There should logically be a great outcry among the Radicals against class-selfishness, but the Radicals, as Free Traders, were for once in league with the Peers, and it is rather difficult for the first assassin to denounce the second while burying the corpse.

**The End of the Session.**

The session is now practically over, and the Government is getting ready for 1921. It is admitted on all hands that it is distinctly stronger than a year ago; it has shaken down and got its second wind, and at by-elections it can hardly do wrong. The wicked—that is to say, the Opposition—continually imagine vain things, but they can do nothing against the solid Coalition phalanx. The Independent Liberals are split from top to bottom, with Mr. Asquith as Nestor murmuring wise saws, and the new Manchester school telling modern instances. Feeble as they are, they cut more ice in Parliament than Labour, mainly because they attend the House of Commons regularly; the younger men are pertinacious in criticism, and two of them are doing fairly well. Commander Kenworthy has often been rather a nuisance, and sometimes he has bored the House, but he is beginning to shape well as a politician. And Mr. Wedgwood Benn will one day be a force in Liberalism; he is plucky, persistent, and good-tempered, and consequently popular. The rest do not count.

The failure of Labour is difficult to explain. Apart from Messrs. Thomas and Clynes, who are something more than House of Commons men, the eighty odd Labour members are seldom heard. Old-fashioned people still survive who think of a Labour member as a soap-box agitator, but anything less like an agitator than the ordinary Labour member one has seldom seen. He is the very incarnation of silent respectability. He may possibly indulge in fiery denunciations of the existing order in Lancashire or Lanarkshire, but at Westminster he loses his tongue altogether, and the House of Commons, being a practical place, has no use for silent wisdom.

Nobody has yet made a great name in the Coalition ranks. The younger Tories have ideas, and speak well, and Mr. Ormsby-Gore begins to be heard with respect. Lord Wolmer, true to his ancestry, is too immersed in Church politics to take his proper place in what he considers the less important affairs of the State, Lord Hugh Cecil is Lord Wolmer on a larger scale, and Lord Robert Cecil is so engrossed with the League of Nations that he has forgotten the existence of that insignificant institution, the House of Commons.

The Government has not changed. The Prime Minister plays on the House as on an old fiddle; his touch is always true and firm. Mr. Bonar Law still looks the incarnation of pessimism, but he leads the House well. Mr. Churchill's only regret is that nobody attacks him, and he is understood to lament the degeneracy of an Opposition which has not the pluck to stand up to him. Mr. Austen Chamberlain has been hotly criticised, but has stood fire well.

Two men in the Cabinet have increased their reputations. Sir Hamar Greenwood, a bluff Canadian, has proved a redoubtable Chief Secretary for Ireland; and Sir Robert Horne, who was unknown five years ago, is already spoken of as a possible Conservative Prime Minister. He is an easy and pleasant speaker, firm yet courteous in negotiation—the Coal Strike settlement largely increased his prestige—and in private life he has a fund of excellent stories.

**St. Paul's Chapter House.**

Some months ago Sir George Paish suggested that Westminster Abbey should be sold to pay part of the National Debt. Since then the revelations of the poverty of the Church have shown people that it is not so rich a corporation as some imagined, and a further indication has now been given of the straits to which it is reduced. The Chapter House of St. Paul's, which was built by Wren, has been leased to Lloyds Bank, and Dean Inge and his chapter will have to hold their sessions elsewhere. It would be a graceful act for the bank, which is now so closely connected with the Cathedral, to assist its restoration fund by a substantial donation, and I have little doubt that something of the kind will be done before long.

**The Naval Scare.**

People here refuse to get excited over the Americo-Japanese naval scare. England is in peaceful mood, and more interested in internal problems than foreign rivalries at the moment. There are rumours that the Board of Admiralty have put forward a stupendous constructive programme, but it is generally felt that the future of naval war is uncertain—a feeling which the publication of the Jutland correspondence this week has increased—and that at least a chance should be given to the disarmament policy.

On this matter one hears the League of Nations spoken of with more respect than a year ago, when it was simply regarded as a futility. Here I think people are judging it entirely on its merits. The propagandists of the League only did harm; they meant well, but the meetings and the speeches, and the people who listened

Digitized by Google

and spoke, did not impress anybody. Now the League has really done something, both in Armenia and at Vilna, and consequently the public is watching its action. If it shows itself a growing force it will not lack support and sympathy.

**Riches and Poverty.**

London is a curious contrast just now. On the one hand, the shops are brilliant with Christmas presents, and thronged with purchasers; on the other hand, unemployment is increasing, and there is grave destitution and misery in the poorer quarters. The authorities are discussing remedial measures, but so far they have not been able to cope with the problem, and only a revival of trade can solve it. In many cases, I believe, lower wages are being offered and accepted by the unskilled workers, in whose ranks the situation is most acute.

There has been some talk of Christmas strikes by various bodies of employees in shops and theatres. It is doubtful whether these will be declared, and in any case it would be bad strategy from any point of view to declare a strike in any trade just now. It would merely widen the circle of unemployment and deplete charitable and trade union funds at the most difficult period. Those who are familiar with trade conditions say that there is some hope of an improvement early in the New Year.

**City Pessimism.**

The prevailing pessimism in the City was accentuated last week by the general fall of values, particularly on the Stock Exchange, and it was not relieved by the report that Farrow's Bank was in difficulties. This (Monday) morning the report proved to be well-founded, for the bank announced that it had suspended payment. Its failure will have little effect on the general financial position, for it was a small bank that had only small depositors, and it dates only from 1904. The stoppage, which comes at a particularly awkward time, will affect adversely a number of small tradesmen and others; there seems a fatality against this kind of institution, for the National Penny Bank and the Birkbeck Bank, its predecessors in kind, both failed. The two latter were, however, both considerably larger institutions; the current accounts of Farrow's Bank only totalled £2,180,000, and the total assets £3,986,865.

The stoppage will not, of course, affect in the least the stability of the great joint-stock institutions, which are well secured, but it will nevertheless tend to the spread of nervousness, which it would have been well on all grounds to avoid.

**The Week's Books.**

Mr. Belloc, in "The House of Commons and the Monarchy" (Allen and Unwin), announces that the elective system is degenerate and must be abolished, and that our only hope is in a restoration of the monarchical power. The author being who he is, the book is well written; but one sometimes wishes that Messrs. Belloc and Chesterton—for the reproach applies to both—would choose a theme worthy of their powers.

The "Autobiography of Andrew Carnegie" (Constable) is the usual rather dull record of a successful man's life. Carnegie convinced himself that war was no longer possible, and he never seems to have recovered from the outbreak of 1914.

Most essayists bore me to tears, and I will confess that I opened "The Sacred Wood" (Methuen), by Mr. T. S. Elliott, with a firm determination to put the book down if his estimates of literature showed any trace of preciosity. Although Mr. Elliott admits that he has written for the *Athenæum*, a paper which nobody but a librarian could even pretend to read, his literary criticism is reasonably human, particularly as regards the Elizabethans. On Dante, the supreme test of the critic, he fails. But then so did Macaulay. Those who like pleasant literary essays will like this little book.

"And Even Now" (Heinemann), by Max Beerbohm, needs no criticism. Max is just Max—unique.

Many will remember the notorious General Bernhardi, and his "World-Power or Downfall," which had a certain effect on German opinion before the war. He is now busy discussing the conditions of the next conflict, and a translation has been published in "The War of the Future" (Hutchinson). He does not expect to live to see the day dawn when Germany revenges herself for the past, but he is assured that the day will come, and insists that Germany "must be ruled by men who understand how to make war at the right moment," and that her military must "develop a proud feeling of detachment towards the civil population," and that when war comes "the politician must unconditionally submit to the will of the soldier." Clearly the General has learnt nothing.

OCELLUS.

## THE PERSIAN SITUATION.

At a meeting of the Central Asian Society, held at 74, Grosvenor Street, London, on December 16, Major-General L. C. Dunsterville, C.B., told again the remarkable story of his adventures with a small force in Persia and Baku during the later period of the war. Speaking of the present position in Persia, he said it was within the knowledge of all that the Treaty of 1907, dividing Persia into British, Russian, and neutral zones, had recently been annulled. Another Treaty had replaced it, drawn on August 9, 1919, but had not yet been ratified by the Mejliss. The few facts in the situation that remained unalterable were the enormous area of Persia, the large proportion of desert land, the small population, the small revenue, and the philosophic and unmilitary temper of the modern Persian. How could such a people, unimbued with any warlike feeling, defend an area of 630,000 square miles, and with frontiers aggregating 4,000 miles in length, against the powerful and ambitious neighbours who surrounded it? The revenue was totally inadequate; and there were no railways and scarcely any roads. An appeal had been made on sentimental grounds to the League of Nations, but, unfortunately, the League of Nations was itself little more than a sentimental idea. It behoved Britain to see Persia through her present difficulties.

Sir Hugh Barnes (chairman of the Imperial Bank of Persia) said that at the moment of speaking the Persian position was one of very serious crisis. Everything depended upon what would be the decision of the Mejliss as to the acceptance or otherwise of the Anglo-Persian agreement. Under the agreement the British Government had sent out certain officers some time ago to form the nucleus of a Persian army, together with Mr. Armitage Smith as financial adviser; but a new government had come into power in Persia, and the ministry there had decided that it could not confirm the agreement until it was approved by the Mejliss. There had since been very great delay in calling the Mejliss together, but information had now been received that it had met the previous Sunday, and we were all looking forward with great interest to see what would happen now.

## THE SHEREEF ALI HAIDAR.

Our Constantinople Correspondent informs us that his attention has been drawn to an erroneous statement in the article on "Turko-Arabian Relations," which he contributed to our issue of November 4. The Shereef Ali Haidar, he writes, was never at any time a member of the Committee of Union and Progress, and the phrase "a member of the Committee" should have been "a member of the Government."

## GREAT BRITAIN AND TURKEY.

The attention of his Majesty's Government has been drawn to a statement published in India that while France and Italy are pressing for the revision of the Turkish Treaty and for the restoration of Thrace and Smyrna to Turkey, Lord Curzon, on behalf of the British Government, is opposing their efforts "in the fanatical determination to destroy the Mohammedan Empire and nation." It is declared officially that there is not a word of truth in this statement, that it is grotesquely false in every particular, that it is clearly a malicious fabrication intended to make mischief, the fact being that the Allied Powers, Great Britain, France, and Italy, are acting together in absolute unison.

## TOPICS IN PARLIAMENT.

*The subjoined headings are those given in the official report:*—

LEAGUE OF NATIONS: Armenia.—Decisions, Publication.—Lithuania and Armenia. SUEZ CANAL. MESOPOTAMIA (OIL). MESOPOTAMIA. ARMENIA. EGYPT AND PALESTINE. INDIA: Pensions. (December 13.)

EGYPT (COTTON CROPS). MESOPOTAMIA. MONTENEGRO (ALLEGED ATROCITIES). INDIA: Exchange. (December 14.)

MESOPOTAMIA. INDIA: Rupee (Depreciation).—Bobbin Making.—Civil Service, Pensions.—New Council Elections.—Captured British Soldiers.—Kyber Railway. PEACE TREATIES: Turkey. INDIA: Dyer and Jallianwalla Bagh Memorial Funds. EAST PERSIA (WITHDRAWAL OF TROOPS). (December 15.)

PEACE TREATIES: Turkey. PALESTINE. GREECE. EMIR FAISAL. TREATY OF SEVRES (CILICIA AND SYRIA). LEAGUE OF NATIONS: Albania. EAST PERSIA (CORDON FORCE). INDIA: Burma (Reforms).—Delhi (New Works).—Public Works Officers (Technical Allowance).—Seditious Speeches and Articles (Prosecutions). (December 16.)

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, November 29.

**Return of Adly Yeghen Pasha.**

The chief political event this week has been the return of Adly Yeghen Pasha, who arrived at Alexandria yesterday. He was met by members of the Cairo Committee and by a number of ex-Ministers, including Rushdi Pasha, Sarwat Pasha, and Abdul Rahim Sabri Pasha, and was given a really fine reception both on board and in the city. In the afternoon a *thé d'honneur* was offered by Ahmed Yehya Pasha; on this occasion, however, contrary to the usage, no speeches were delivered. Public curiosity is, of course, centred on what Adly Pasha will say or do now that he has returned, but it will surprise those who know him intimately if he takes any active part in local politics or makes any public statements on the situation for the time being.

**The Political Situation.**

The political discussions which but a fortnight ago filled the vernacular Press, and were the sole topic of conversation wherever one went, have now had to give way before the economic situation, and it is no exaggeration to say that the minds of the people, high and low, rich and poor, are now entirely concentrated on the position of cotton to the almost complete exclusion of any political topic. Even the recent resignations among the Provincial Governors, with the resultant creation of vacancies, aroused little comment; and the intrigues which usually occur on such occasions are not at all apparent.

**The Conspiracy Trial.**

No little curiosity has been aroused by the delay in promulgating the sentences in the "Conspiracy Trial," which came to an end on October 5, when twenty-four of the accused were found guilty. One of the latter has since been released, and the delay in pronouncing the penalty inflicted on the other twenty-three has not unnaturally given rise to comment. It appears that in the first place all the documents had to be gone through, first by the civil, and then by the military authorities, and as they were very voluminous this examination could not be done in a short space of time; and, secondly, that there is a clause in the Indemnity Act of August last under which all proceedings and decisions of Military Courts have to be referred to the Judge Advocate-General, and that in accordance with this provision all the papers have been sent home. Hence the delay; but by now sufficient time has surely elapsed for the papers to have been dealt with in London. Although this delay is regrettable from the point of view that it is eminently desirable that sentence should always follow rapidly on a conviction, nevertheless it is not unfavourable to the accused, since all the time they will have spent under detention since October 5 will be deducted from whatever period of imprisonment they may have to serve; and in the case of those sentenced to hard labour the delay is particularly favourable, seeing that they will have spent all this intervening period under much lighter conditions. At the same time there are indications that the Government is following up the information which was divulged in the course of the above trial. Various Egyptian notables have been summoned to appear before the Military Delegate, and it would cause no surprise if in the near future we had another conspiracy case.

**The Ex-Khedive's Property.**

A proclamation was published this week ordering the Public Custodian to sell by auction or by private treaty the property of the ex-Khedive, which had been vested in his hands since July, 1916, and to pay out of the proceeds his mortgage and other debts. Abbas Hilmi Pasha owns considerable property in this country. His agricultural estates comprise over 20,000 feddans of good land, and he possesses some very valuable building property, some of it situated in the centre of Cairo, and including the fine palaces at Koubbeh and Montazah. As is well known, his properties were heavily mortgaged to the Crédit Foncier Egyptien. Some say this was to defray the cost of developing his estate at Doloman, others that he raised the money for the purpose of depositing it in Europe against the inevitable day of his having to leave Egypt, which he foresaw was coming. The value of all this property more than covers the amount of his mortgage and other debts, and by the time everything is disposed of a fair balance should remain to his credit. It is believed that the Government intend to acquire his two palaces, and that the remainder of his town property will be bought by local syndicates, but the present is certainly not the best moment to sell, and the liquidation will very probably last some time.

**The Alexandria Murders.**

The investigation into the question of the murders of women discovered at Alexandria, and reported by me last week, continues. No more bodies have been found. There is a strong suspicion that the Alexandria murders may have been committed by some of the same people who were responsible for the death of the women whose bodies were found last spring near Tanta. The chief accused in the Tanta case, who was condemned to death, has confessed and given full information to the authorities with regard to his accomplices. This information is being closely followed up by the police, and at least one of the men implicated appears to have been present at both places at the times the murders are believed to have taken place.

**The Aswan Power Scheme.**

I gather that the scheme for the utilisation of power generation at the Aswan Dam has made considerable progress. Sir Murdoch MacDonald, during his stay in England, took up this question, and now that he has returned the issue of his report containing his recommendations is expected very shortly.

## YUGOSLAVIA.

ZAGREB, December 1.

**The Political Position.**

The latest returns received at the Ministry of the Interior show that the Radicals have secured 101 seats, the Democrats 97, the Communists 54, and Raditch's Croatian Peasant Party 51 seats in the Constituent Assembly. Obviously, neither of the great parties can form a Cabinet without coalescing with some of the lesser groups, though it is confidently believed that the Radicals and the Democrats will work together in the essential constitution—building work. It is rumoured that the Radicals will join with Raditch's party; but in an interview with that politician he is credited with the statement that the Democratic programme approaches more closely to his views, while a prominent Democrat ridicules the idea, saying, "You do not know Raditch." Raditch himself appears to be an unstable demagogue, who has captured the confidence of the peasants by promising them a Republican Government, with autonomy and the usual programme of freedom from officials and taxation. Perhaps because he has been chastened by a prolonged sojourn in prison, but more probably because he feels the responsibility of forthcoming office, which is, after all, the best cure for Socialism, he has stated that he abandons any revolutionary ideas, and prefers to seek his object by constitutional means. He is a Republican on principle, because he maintains that a monarchy involves a crowd of courtiers, officials, and parasites, which the peasants have to pay for. He will join hands with the Serbian Peasants' Alliance, but reproaches them for their loyalty to the monarchical system. Anyhow, as he commands a quite formidable *bloc* he is sure to be offered a portfolio, and will be able to make his own terms, either with the Democrats or with the Radicals, and so hold the balance of power. The Radicals will endeavour to win the support of the Mohammedan element, an

Digitized by Google

probably of the Peasant Parties in Bosnia. Both the great "bourgeois" parties will combine against the Communists, who include the rag and bobtail of the disruptive elements—that is, the few genuine Communists, the separationist Frankovists, and the *Bugarashi* and Albanians of Macedonia. Everybody seems pleased at the failure of the Clerical Slovenes in their own country. Dr. Koroshets' group can show only 14 out of a possible 40 seats, evidence that the Slovene peasant is less priest-ridden than when at the last election (for the Austrian Parliament) Dr. Koroshets and his group swept the board.

Of the outlines of the new Constitution, it is enough to say that the most striking innovation is the introduction of a Senate, and the granting of wide autonomy to the provinces, to which the Democrats are now reconciled. These provinces will be about thirty in number, with not less than 200,000 nor more than 600,000 inhabitants.

**The Narodny Club.**

The Narodny Club has received its death-knell, for it has outlived its usefulness. The only prominent member of the party who has been returned is Dr. Laginja, the leader, and Ban of Croatia. Dr. Lorkovitch, the leader in the Skupshtina, and many others have failed at the elections, including the two Ministers, Dr. Kovatchevitch, Minister of Mines, and M. Drinkovitch, Minister of Posts and Telegraphs. The party served one useful purpose: by its adhesion it helped to solve the last Cabinet crisis, and made the government of the country possible. Its members will probably be absorbed in the other parties.

**Statistics of the Parties.**

The following analysis, although based on incomplete returns, is interesting as showing the state of the parties in the different districts. The numbers refer to the seats in the Constituent Assembly.

Serbia (old frontiers).—Democrats, 31; Radicals, 42; Communists, 14; Liberals (M. Ribarats, the leader and only survivor of this once all-powertul party), 1; Republicans, 1.

Southern Serbia and Macedonia.—Democrats, 15; Radicals 5 (it was at Skoplje that M. Vesnitch, himself a native of Novi-Bazar, was rejected); Communists (chiefly Bulgarophils and Albanians), 17; Republicans, 2; Undefined, 3 (probably local magnates of no specific party).

Croatia.—Raditch's Peasant Party, 51; Democrats, 18; Narodny Club, 5; Communists, 5; the "Right Party" (the Frankovists, who want separation and return to the old conditions, reactionary), 2; Clericals, 3.

Slovenia.—Democrats, 3; Communists, 2; Socialists, 5; Clericals, 15; National Socialists, 2.

Montenegro.—Democrats, 4; Radical, 1; Communists (Nicholites, "*Zelenashi*"), 4; Republican, 1.

**General News.**

The Regent has proclaimed an amnesty for the chief prisoners condemned at the Salonika treason trial. The following colonels are included, and their forfeited rights are returned to them: Colonels Milan Gr. Milovanovitch, Cheda Popovitch, Radoje Lazitch, Milutin Lazarevitch, and Mita Markovitch. Three of the most important, however, are excepted from the amnesty, namely, General Damian Popovitch, Colonel Tutsovitch, and Major Vemitch.

The Serbian natives of that district of the Baranya which has been allotted to Hungary have decided to abandon their ancient homes and migrate to the south. They have requested the Government to appoint a special commission to superintend the emigration.

ZAGREB, December 12.

**Political Combinations.**

Yugoslavia is passing through a critical and extremely interesting phase in its history, and the best political judges are chary of prophesying how the next week or two will turn out. The result of the elections has been a great disappointment in one respect, that not one party has come out strong enough to form an independent Government. It was hoped that the days of chronic crisis were over, and that there would no longer be that balance of power in the House which is fatal to firm government, but that there would be a strong Cabinet, kept well up to the mark by a considerable Opposition. But as it is, since there are 420 seats, even the Radicals and Democrats combined cannot quite make half that number, and if they unite, as it appears certain that they will, if only for the purposes of the Constituent Assembly, they will require the adhesion of another group to give them a bare majority. It is thought likely that the Bosnian Peasant Party and the Mohammedans will join up with them, as all have common interests against the Communists, and the Narodny Club and Dr. Koroshets' Clerical Party are reduced to insignificant numbers. The latter appear to be giving more trouble than their numbers justify; for at a recent meeting of their club they decided not to accept the Draft Constitution, that the Assembly itself is not competent, that the Rules of Procedure are not legal, and that their leader, Dr. Koroshets, should at once resign from the Cabinet. This he has done.

**The Croat Peasants' Party.**

The chief interest is concentrated on the Croat Peasants' Party, led by Stjepan Raditch. This is a remarkable man. He is said to have great ability and to be an unusual linguist, and the foundation of his political principles is an unshaken belief in the virtues of the Croatian peasant. The Croatian peasant is a good fellow, but in the old days had no political existence, and now he finds himself in possession of a new and unfamiliar toy. He is, therefore, easily led by the demagogy of Raditch, and came into Zagreb in his thousands to attend a mass meeting on the 8th. Disturbances were anticipated, but everything was conducted in perfect order. The dull, depressing drizzle and slush may have damped the crowd's spirits, for the grand demonstration through the town was abandoned. Everything was so quiet that the prohibition on alcoholic drinks, proclaimed from the previous evening for three days, was suddenly withdrawn.

At the meeting Raditch declared that the Croatian Peasants' Party formed a Croatian Peasants' Republic, but this thunder produced little impression. The point is that Raditch has overrated his position. In the first place he controls fifty seats out of the ninety-three which represent Croatia and Slavonia, and so has a bare majority in the district; he has a big majority in four of the eight counties, but is hopelessly outvoted in the other four, including the town of Zagreb. Raditch is wrong in stating that the resolution of the Croatian Diet of October 29, 1918, proclaimed a free and independent Croatia. What it did was to proclaim its independence of Austria-Hungary, and to pass the sovereign powers to the National Council, on which basis the National Council of all the Yugoslavs voted for the union of the Serbs, Croats, and Slovenes with the kingdom of Serbia, and the new triune kingdom came into existence on December 1, 1918. His legal position is weak, too. He commands but fifty out of a Parliament of 417 His party were elected under the electoral law for the Constituent Assembly, and their duty is to proceed to Belgrade and take part in that Assembly. If they do not, the law provides for new elections within

a month. It is generally believed that Raditch is clever enough to understand his position properly, that he is obliged to make "hot air" to please his misled constituents, and that he will go to Belgrade, where probably he will be offered a portfolio. The other two peasant parties—that is, the Bosnian and the Serbian—have many of the same ideals, and they will very likely join up with Raditch and form a *bloc*, if only he will quietly drop his idea of an independent and quite impossible republic of peasants of four of the counties of Croatia and Slavonia. The Serbian Peasants are monarchist, and the Bosnians are good Serbs. As well over 90 per cent. of the population are peasants, it is a very healthy thing for them to have a strong, combined, and organised party, which nobody can grudge them.

**The Cabinet and the Ban.**

As is natural, affairs in Croatia are arousing keen interest in Belgrade. The Cabinet sent for Dr. Laginja, the Ban, who is also leader of the Narodny Club, to give an explanation of his stewardship. The Ban, it may be remembered, scored a political success in getting himself nominated by the Prime Minister instead of being merely appointed by the Minister of the Interior. Now the Minister of the Interior, M. Drashkovitch, complained that the Ban failed to carry out his instructions. The Democrats roundly abuse the Ban, and throw upon him the responsibility for the success of the Peasants' Party for his favouring of Raditch, whom on one occasion he released from prison on his own authority. The Radicals themselves became somewhat alarmed. It is stated that M. Stoyan Protitch, who engineered the combine between the Radicals and the Narodny Club, now admits that he made the first political mistake of his life. M. Drashkovitch said he would resign unless the Ban were removed from his office forthwith. The upshot of all this was that Dr. Laginja was called upon to tender his resignation; which he did. As a temporary measure, his senior official will carry out the duties of Ban until the Constituent Assembly has done its work.

Meanwhile, the Democrats and Radicals are drawing nearer to each other. The Democrats have consented to the doyen of Serbian politicians, M. Nikola Pashitch, being head of the new Government, and now they are negotiating with Dr. Spaho and Hrasnitsa, leaders of the Bosnian Mohammedan Party. The remnants of the Narodny Club are also conferring with the Radicals, and it is expected that the Serbian and Bosnian Peasants will join them and form a solid black, while the Communists will be in opposition. And now the long-awaited Constituent Assembly has met and begun its labours.

**The Fiume Trouble.**

Affairs at Fiume are very naturally being followed with considerable interest in Yugoslavia. Hapsburg agents are said to be busy there under d'Annunzio's protection; they are probably the source of all anti-Yugoslav propaganda, and they realise that the Treaty of Rapallo is a very big nail in the Hapsburg coffin. Dr. Frank, who gave his name to the Frankovists, who are openly out for the break-up of Yugoslavia and the restoration of the Austrian Monarchy, and his helper Dr. Sachs, are reported to be now at Fiume, and in collaboration with a Dr. Shustershitch, who is conducting the propaganda of the party in Croatia.

**The Situation in Greece.**

Yugoslavia is also interested, deeply, in the Greek situation. Serbia has a treaty with Greece which expires early in the new year, and the impression is abroad that, as it was a treaty with M. Venizelos rather than with Greece, it may possibly not be renewed. A certain section of public opinion would not regard the non-renewal tragically. It argues that so long as Greece remains friendly, Yugoslavia cannot claim Salonika, but with Greece openly hostile, it is possible to look forward to the day when Serbia will have free access to the Ægean. An understanding with Bulgaria is by no means out of the question, and it would be a matter of arrangement for both States to have their own Ægean ports.

**General News.**

We have had a variety of postage stamps in Yugoslavia since the war. Serbia has used the issue prepared during the war and delivered at Corfu, with the portraits of King Peter and his grandfather Kara George Croatia, for a short time, had an issue of its own. Then there was the Yugoslav issue, with value in kronen, recently followed by a dinar issue for Yugoslavia. Soon all these will be withdrawn, as a new issue for the whole kingdom will be put into circulation early in the new year. These have been made in America, and the first portion already delivered.

In spite of many difficulties, both practical and political, the colonisation of the large estates in the Voivodina has had considerable success. Over five thousand colonists have been placed within a year, chiefly volunteers in the Serbian army from Bosnia and Herzegovina, and a substantial proportion of Lichane and Dalmatians. In the coming year the authorities hope to settle also a large number of refugees from the occupied parts of Istria, the Hungarian Baranya, and Roumanian Banat. The chief material difficulty has been the question of accommodation and buildings.

## ROUMANIA.

BUCHAREST, December 5.

**Political.**

On the eve of the opening of Parliament the different political parties held meetings to inform their members of their respective political status. General Averescu, in addressing his party, said that with regard to the external situation the Government are still negotiating with the Russian Soviets, and he feels that Russia will have no further pretensions in Bessarabia. He further announced that Commissar Chicherin had intervened, requesting that Roumania should not allow General Wrangel's troops to cross the Roumanian frontier. With regard to the financial situation, since M. Titulescu has succeeded in obtaining a loan to pay off the interest on the public debts, the question will improve. Besides, the financial resources will be increased by the new fiscal measures which have been prepared for the coming session. He further expects an improvement in the transport situation, with the arrival of more new locomotives. Touching on the political side, he said that the rumours about a coalition between the Liberals and his party were not true, and it was not his fault if collaboration with the other parties of the Opposition could not be brought about. Other leaders of the People's Party spoke, assuring General Averescu of the support they would give him in the next session.

M. Take Jonescu, in addressing his party, after explaining the external and internal position, touched on the transport question, the disorganisation of which he put down to preceding Governments. The present Government had placed the necessary orders for railway material, so that by next spring he feels confident that the lack of means of transport will not be felt. He further hopes that negotiations between the Transylvanian National Party and the present Government will be successful, which will give the Cabinet the strength it requires.

**Opening of Parliament.**

The opening of Parliament took place on November 28 with the usual ceremonial. At 11 a.m. a Te Deum was sung at the Cathedral, in the presence of the Royal Family, the Ministers, Members of Parliament, and high officials of State. These then proceeded to Parliament, where the Foreign Diplomats were also present. The King and Queen were warmly cheered on entering Parliament.

The King read his speech, in which he expressed his satisfaction at the good relationship between the people and the dynasty, and said it was a great pleasure to announce the betrothals of his son, Prince Carol, to Princess Helena of Greece, and of his daughter, Princess Elizabeth, to Prince George of Greece. The Roumanian international situation, his Majesty continued, is no

definitely settled by the ratification of the Peace Treaties. He especially emphasised the fact that the Great Powers have recognised the union of Bessarabia, thereby settling the eastern boundary of the country. Roumania's relationship with the Allied Powers had grown stronger, which was specially proved by the reception which the Minister of Foreign Affairs received abroad. With regard to other neighbouring countries, normal relations have already been established. The Danube question, which is so important to Roumania, is on the way to a satisfactory settlement. For the first time in the history of the country diplomatic relations have been established with the Vatican.

The King also mentioned the journey of Prince Carol to the Far East, and the new connections opened up with Japan for the first time. He then enumerated the various new reforms which are urgently needed for the reconstruction of the country. Besides reorganisation of the army, the fulfilment of the agrarian reform, the necessary measures to increase agricultural production, and the realisation of the franchise reform, he announced entire changes in the finances of the country. With regard to social matters, he mentioned a reform for the purpose of harmonising capital and labour.

The King finished his speech by announcing a radical reorganisation of the railways and of administration, improving the general status of the State officials, and new Church and school reforms.

**Escape of Socialist Prisoners.**

On the night of December 2, eleven Socialists, who had been arrested for plotting against the State, escaped from the military prison at Jilava. According to information received from the authorities, the escape was accomplished in the following manner. The walls dividing were rather thin, and the prisoners managed to break through them into a room which had a window. By means of a file a bar of the window was cut through, and by bending the other bars they managed to creep through and get clear away in the fog and darkness. Up to now, no trace of them has been found, and it is thought that they have had time to escape across the Danube into Bulgaria. The authorities are trying to find out whether this escape was helped by the soldiers on guard or by the civil attendants of the prison.

**Railway Accident.**

A terrible railway accident took place on the main Bucharest-Verciorova line on Thursday night, at a station called Matasaru. A passenger train, in the act of entering the station, collided with a goods train which was shunting to make room for the passenger train to enter the station. The concussion was so strong that the engine and six wagons of the passenger train were knocked off the line and smashed, burying under the debris a great number of passengers. Four people were killed and eighty injured. According to reports, the accident was due to the gross negligence of the signalman at Matasuru and to the engine drivers.

## GREECE.

ATHENS, December 4.

**Princesses Alice and Anastasia.**

Princess Alice accompanied by her three daughters, and Princess Anastasia, arrived in Athens from Switzerland last Tuesday. They were received at Phaleron by the Dowager Queen Olga, Prince Andrew and Prince Christopher, and the Council of Ministers. Prince Nicholas and Princess Helena are expected here to-morrow.

**Requiem for the Late King.**

A service in memory of the late King Alexander was held yesterday morning at the church on the Royal estate at Tatoi. The Dowager Queen Olga, Princes Andrew and Christopher, Princesses Alice and Anastasia, and the Grand Duchess Marv attended the ceremony. After the service those present visited the late King's grave and covered it with wreaths of flowers.

**The Dynastic Question.**

The Note of the Great Powers in connection with King Constantine's return to Greece, was presented to M. Ralli by the British, French, and Italian Ambassadors at eight o'clock last night. A Council of Ministers was immediately held to discuss the contents of the Note, and prepare a reply. Government circles do not hide the fact that the wording of the Note is more severe than was generally expected, and everybody now begins to realise that the Great Powers mean business. The Venizelist morning paper, *Patris*, in a leading article points out that if in spite of the Powers' Note the Government still persist in carrying out the plebiscite, such an action would constitute nothing less than an open challenge to the Allies, resulting in extremely grave consequences for the country. The Government, however, has apparently made up its mind to brave the wrath of the Powers, and has declared that it sees no reason why the plebiscite should be either postponed or cancelled; so this is definitely taking place to-morrow. Furthermore, a demonstration is being organised for to-night by the "Popular Political Syllogues." The crowds bearing photographs of King Constantine and flags of the Allied nations will demonstrate in front of the Allied Legations, clamouring for the return of the King, and assuring the Powers of their everlasting pro-Entente sentiments. Speeches will subsequently be delivered from a balcony in Constitution Square—I believe it will be the very same balcony from which less than a month ago M. Venizelos spoke to thousands of Athenians—in order to explain the importance of to-morrow's plebiscite. The Liberals have definitely decided to abstain, and have communicated their decision to their absent leader. M. Venizelos replied that if the aim of the Government is to throw on the people the responsibility for the consequences arising as a result of King Constantine's restoration the Liberal Party is fully justified in abstaining from the plebiscite, thus leaving the sole responsibility to the Government, which is in the best position to realise what these consequences will be.

**A Sad Anniversary.**

On December 1, the fourth anniversary of that eventful day on which so many British and French sailors fell at the foot of the Acropolis, a memorial service was held by the French at the cemetery at Piræus. Among those who attended the sad ceremony were the French Minister, M. de Billy, with the staff of the French Legation, the Serbian Minister, the French Consul, the Chief of the French Military Mission to Greece, General Gramat, and the officers of the French cruiser Edgar Quinet, with a detachment of bluejackets. The Mayor of Piræus, M. Panayotopoulos, and the President of the Municipal Council of that town, were also present. Magnificent wreaths of flowers were placed at the foot of the monument, erected some time ago in honour of the glorious dead by the French sailors "to their comrades," by the French Chamber of Commerce, by the Municipality of Piræus "to the honoured French dead," and by the Franco-Hellenic League "to the French sailors who died for their country." A wreath was also sent by the Greek Government with the following inscription:—"The Hellenic Government to the victims of the regrettable incidents of December 18/1, 1916." The Prime Minister was represented by his chief of Cabinet, M. Vikelas.

When the ceremony was concluded many of those present paid a visit to the tombs of the British sailors who had fallen on the same day. No service was held in memory of these heroes of England peacefully sleeping in a foreign land; wreaths were nevertheless placed there by the Greek Government, the Municipality of Piræus, and the Mayor of Piræus.

**Papers Suspend their Publication.**

Two Liberal morning papers, the *Nea Hellas* and the *Kairi*, have been obliged to suspend their publication owing to lack of readers. The *Kairi* was the oldest daily paper in Greece.

between the Sublime Porte and Angora, it is hoped that the prestige of the persons of which the delegation is composed will be a decisive factor in the development of the negotiations. Izzet Pasha is exceedingly popular with the Army; Salih Pasha gained considerable credit for his successful conduct of negotiations with Mustapha Kemal when Ali Riza Pasha became Grand Vizier last year; Hoja Fatin Effendi, the Imperial Astronomer, was one of the original founders of the Committee of Union and Progress, as was also Hussein Kiazim Bey, who is generally regarded, rightly or wrongly, as the particular advocate of the Nationalists in the present Cabinet. As the Government can have had no special assurance from the Allies with regard to the modification of the Treaty of Sèvres, it can only be supposed that the delegation is counting upon some such advantage, for which the present moment is peculiarly propitious, and hopes to persuade Mustapha Kemal to relax his uncompromising attitude, and take the first step towards an entente with the Allies. The success of the Government delegation depends, therefore, upon the results of the Conference of London; for there is not the slightest indication that Mustapha Kemal has any intention of changing his attitude with regard to Smyrna, although it is quite possible that he would be more than willing to discuss other matters in dispute. At the same time, it must be borne in mind that Mustapha Kemal is not altogether his own master, and that there are powerful influences at work to prevent a peaceful settlement between the Allies and Turkey. In fact, it would not be going too far to say that the Nationalists are so deeply involved with the Bolshevists that an entente between Anatolia and the Allies would almost certainly mean war between Turkey and Russia. It is becoming clearer every day that distinctions between Bolshevists and Russians are becoming meaningless, and that we have before us a Russia militant and aggressive, and infinitely more dangerous than the old Tsarist Russia. Mustapha Kemal himself is no partisan of Bolshevism, and has bowed most unwillingly to the necessities that were pendent to the "alliance" with the Soviet Government; but it is doubtful whether he could carry the day against the extremists, even if the road to an understanding were made clear by a preliminary assurance that the Allies would consent to a revision of the Treaty. It was perhaps this consideration that induced him to receive the Government delegation without having previously received a definite promise with regard to Smyrna.

**Anatolia.**

The Nationalists have recently redoubled their precautions with regard to the leakage of information from the interior, and it has therefore become rather more difficult to obtain details of the situation. There would appear to be little doubt, however, that in spite of the manifest enmity of the Angora Press towards the Communist agitators in Anatolia, Bolshevist "consulates" have been established in various parts of the country, and Bolshevist officials are carrying off matters with a very high hand. Whether there has been a certain difference of opinion or not with regard to the Armenian campaign, the misunderstanding does not seem to have interfered with the military plans of the Nationalists; for there is good reason to believe that a considerable part of the Eastern Army is now to be transferred to the western front. The Press in general, in spite of professions of respect for the members of the present Cabinet, is showing hostility to the idea of negotiations with the Sublime Porte, on the ground that the real quarrel is with the Allies, especially Great Britain, so that negotiations with the Central Government would be simply a waste of time. It remains to be seen, however, what tone will be adopted when Izzet Pasha arrives in Angora.

**The Caucasus.**

It has now become possible to piece together some of the details of the conspiracy whereby Armenia has been eliminated. In the first place it would appear to be true that the Armenians denounced the first armistice concluded with the Turks because they had been secretly encouraged to resume hostilities by the Bolshevist envoy Legrand, who allowed it to be understood that the Bolshevists had no intention of attacking Armenia from the east, so that the Armenian forces could be safely withdrawn and concentrated against the Turks. The Armenians clutched at the straw thus held out to them, and denounced the armistice. On November 12, however, the Turks captured Aghin, a station about 15 miles south of Alexandropol, and at the same time forced the Armenians to withdraw from the Igdir region to the north of the Arax River. On the 15th the Turks took Amamli, about 25 miles east of Alexandropol, and on the 18th the Armenians, realising the absolute hopelessness of continuing, signed the second armistice at Alexandropol. Negotiations for the conclusion of peace were commenced on November 26, but with characteristic duplicity the Bolshevists then invaded Armenia from the east with an army that was supposed to be composed of Armenian Bolshevists. This force reached Erivan without meeting with any serious resistance, and on December 4 a regular Soviet administration was set up in the Armenian capital. This has doubtless saved Armenia from being overrun by the Turks, but it means the end of Armenia all the same; for although the Bolshevists will probably continue to talk of the Armenian "Republic," Armenia will be no more an independent State than the "Republic" of Azerbaijan. In view of these facts, it is adding insult to injury to suggest that Mr. Wilson should define the frontiers of Armenia.

**The Part Played by Georgia.**

Whether the Georgians realised or not that from the beginning the struggle was hopeless, the fact remains that they gave the Armenians no assistance worthy of mention. At first sight the policy of Georgia would hardly seem to be of the noble order, but in view of the attitude of Europe and America, was it not the wisest thing for them to do to make "friends of the mammon of unrighteousness"? Now that Azerbaijan and Armenia have once again fallen under the paw of the bear, the turn of Georgia must also be drawing near, and there was no need to make matters worse by fighting a battle that was hopelessly lost from the beginning on account of the complete indifference of the rest of the world. It is worthy of note, in these circumstances, that a new Cabinet has come into power in Tiflis, under the leadership of M. Chekengeli, the leader of the moderate section of the Social Democrats. M. Chekengeli was the president of the Transcaucasian delegation that negotiated with the Turks in 1918, and ceded to the latter the "three sanjaks" of Batum, Kars, and Ardahan. Prior to the advent to power of the new Cabinet in Tiflis, a Turkish delegation arrived, under the presidency of Colonel Kiazim Bey, formerly Enver's principal A.D.C. The Georgian representative here, in the course of an interview, expressed the opinion that the purpose of the delegation was to assure the Georgian Government of the pacific intentions of the Turks. It is practically certain, however, that the negotiations really concerned the establishment of a dummy "independent" or "autonomous" State comprising the Batum region. If the Georgians yield, it will only be as a result of the absence of support from the Bolshevists, and this will mean that the latter have still some use for the Turks before they call for the final reckoning.

## ASIA MINOR.

SMYRNA, November 29.

**A Restaurant Incident.**

Last evening a serious disturbance took place in the principal Greek restaurant in Smyrna. It has been customary to play the Venizelos march at least once each evening. Greek Royalist officers ordered the band to play Constantine's hymn, "The Eagle's Son," instead of the Venizelos hymn, but it was received with angry protests from the audience, and was not applauded. This annoyed the officers, and they peremptorily ordered the band to repeat the Constantinist hymn. The owner of the restaurant, fearing trouble, refused to allow the band to play Constantine's hymn a second time, whereupon a Greek officer drew his revolver and began firing at random. A panic ensued and everybody fled: windows were smashed, tables overturned and nearly all the glasses broken on the tiled floor. The owner is

Digitized by Google

claiming £T3,000 for damages to his premises from the Greek military. Many comments are being made in Smyrna that the disturbance closely resembles what German officers have done in Berlin restaurants.

**The Housing Question.**

Since the Armistice very few tenants have paid rent in Smyrna, and there are no means by which they can be compelled to pay or evacuate the premises they occupy. The Greeks have promulgated a law to remedy this unsatisfactory state of things, but have not yet put it in force, so that tenants who are anxious to pay their rent feel bound to await the publication of the rent law. An American citizen, finding it impossible to get rent for a house situated at the Bella Vista, and also failing to evict the tenant, has reached a novel if expensive solution by removing the roof. The house will, of course, be flooded the first time there is rain, and the tenant's furniture will be seriously damaged if he persists in remaining.

## CYPRUS.

NICOSIA, December 6.

**Proposed Greek School in London.**

A Greek Cypriot, Mr. C. S. Hourmouzios, who resides in London, and ably conducts the weekly review *Hesperia*, in a recent article, reproduced here, strongly advocates the establishment of a Greek school in London. It is strange, he says, that in the great metropolis of the British Empire, which contains so large an Hellenic community, there should not be a single school in which the Greek language and literature can be taught and the spirit of the nation kept alive. In many other capitals and large cities, colonies of European nations (some not nearly so wealthy as that of the Greeks in London) often found schools of their own. Past neglect tends to alienate young Greeks from cultivating an intimate knowledge of their own tongue, causing them to regard it as quite unimportant, as compared with those more widely in use. Greek, however, will be increasingly needed in business transactions with the Near East, and an enlarged Greece. The writer, who is well supported, hopes to push his proposal to a successful issue.

**Attitude of the Greek "Union" Party.**

The Greek-speaking members of the Legislative Council have followed up their tactics of obstruction by resigning their seats. They have since held a meeting to decide upon their course of action. They are, it seems, to seek re-election in the next campaign (which they regard as certain) and then again to resign, unless they alter their minds in the interval. It is difficult to see what advantage they anticipate from this policy of pique and petulance, or to believe that they regard it is either wise or dignified. It is condemned by many leading Greeks who have the courage of their opinions; and meanwhile the mass of the people, as already stated, are profoundly indifferent to the town effervescence, and are contentedly minding their own business. Island interests now clearly demand that a limit should be placed to the terrible waste of time and the mischievous opposition which have done so much to impede legislation and block the road to progress in late years.

Turning to another aspect of the situation, it must be candidly admitted that Cyprus has its full measure of grievances, and that there are many real needs which call for prompt and serious attention. The island is now a British possession, and the old excuses for inaction, such as "the anomaly of our tenure," "the terms of the Convention," etc., no longer hold good. Leading natives hold that there are various flaws in the machinery with which the Government works. They consider, with some justification, that the right men are often not put in the right places. Perhaps an overhauling is needed. But all will agree that expert knowledge as to what is required should now lead to more tangible results in this backward and impoverished island. The needs cannot be specified here, but a beginning should certainly be made in the field of agriculture. Expenditure is, of course, needed, and the finances of Cyprus now warrant a new and liberal departure. If British possession is to be justified, the investment of capital must be invited and encouraged. At the same time, the native element should wake up to a worthier spirit of enterprise and co-operation.

**General News.**

A company of the Punjabi Regiment, with three British officers, which has been at Polemidia Camp, is being moved to the depot at Limassol. Rumour has it that a new British detachment is to be sent to Polemidia.

The Armenian orphans are to leave the island next spring, and Miss Nixon, who is in charge of them, is leaving at the end of December.

### EGYPT, INDEPENDENCE, AND COTTON

TO THE EDITOR OF "THE NEAR EAST."

Sir,—It is, I believe, generally known that the Egyptian's idea of modern commerce is not always very clear. The present low price of cotton seems to have become the absorbing topic, even eclipsing at times Independence. Extreme Nationalists have made use of the fall in prices for propaganda, and it has become a widespread belief that it is due to the English that the present crisis has been brought about, because the Egyptian with a lot of money gives trouble, but without it gives none. But the best thought-out plans sometimes go wrong, for it is said that the inhabitants of Beni-Souef recently held a meeting and finally dispatched the following cable: "To the King of England.—We do not want independence; please put up the price of cotton."

The latest, however, is different. On November 29 the Government communicated to the Press a statement giving an explanation of the fall in values generally, and appointing a Commission to inquire into the crisis locally. But one unfortunate paragraph has heaped coals on the fire. It is: "The Government is taking measures to try to alter the situation, and at the same time urges landowners to forbear exacting the immediate payment of rent in excess of that which the tenant is reasonably able to bear." This has set landowners ablaze. Relations between them and tenants are not perfect, and now, they declare, direct encouragement has been given for Bolshevism; or at least it is a subtle plot to bring in discord and upset their dreams of independence.

—I am, etc.,
C. L. B.

Alexandria, December 1, 1920.

### THE EVOLUTION OF THE MOSQUE.

Lecturing before the Royal Institute of British Architects on December 13 on the Saracenic Architecture of Egypt and Palestine, Mr. Martin S. Briggs said that the earliest mosque was built by Mohammed at Medina in A.D. 622, and was a primitive enclosure or yard with low walls. A portion of the enclosure was covered with a roof of palm trees and mud to form a shelter from the fierce rays of the sun, and, finally, this feature was extended all round the four sides of the courtyard. Afterwards came the *kibla*, or point in the wall which worshippers faced when they prayed; the *mihrab*—a semi-circular niche in the *kibla* wall—and a sort of wooden pulpit. Simple though it was, this structure already contained the essential features of the mosque plan. But the most striking feature of the mosque, the minaret, was a later addition, and was introduced so as to allow the muezzin's call to prayer to be heard over a wide area. The golden age of Saracenic architecture in Egypt and Palestine was the period of the Mamelukes, and, perhaps the most beautiful building in all Cairo was the tomb-mosque of Sultan Qalaun, built 1284-1285 A.D. The chief feature in this, as in all tomb mosques, was the dome over the tomb itself. It was after its erection that the dome came to be the principal factor in Cairo architecture, often used in skilful contrast with the slender form of the minaret. Under the Mamelukes mosque-planning showed a progressive development, the later mosques displaying an increasing richness of craftmanship. They were always built of stone; the favourite form of arch was the pointed horseshoe, but this was never exaggerated. The characteristic Cairo dome was rarely of the bulbous type, frequently regarded as typical of Saracenic architecture, but really characteristic only of Persia and Mesopotamia. The Turkish conquest of Egypt in 1517 was followed by a decline in Egyptian architecture.

In the discussion that followed, Professor T. W. Arnold objected to the use of the term "Saracen," which, he said, was never used by Arabs or any Moslems. It was a term of great antiquity, met first in Europe in the writings of Byzantine historians, who used it to describe their Moslem enemies.

Mr. E. P. Warren said the bulbous dome was the almost invariable form in Mesopotamia, where it was very splendid, being usually covered with glazed tiles or small plates of copper gilt. The tiles were of various colours and arranged with extraordinary ingenuity; they were made at the mosque itself. He had seen the craftsman making and painting his tiles and setting out his pattern on a model dome of similar curvature. The great Samarra dome, surrounded with white minarets and seen against the blue sky, was a magnificent sight.

## Armenia.

From the recent fate of Armenia the *Morning Post* (of December 11) draws its customary moral: do not trade with Bolshevist Russia. It says:—

After Bokhara and Azerbaijan comes the turn of Armenia. That unhappy country apparently is not after all going to be massacred by the Turks, but, what is almost as bad, it is to be Sovietised by the Bolsheviks We do not suppose for a moment that the Armenians espoused in a frenzy of enthusiasm the creed of Moscow; indeed, we are certain that the same process of prolonged intrigue and sudden application of force which was so successful in Bokhara and Azerbaijan has been used in this case also. The *coup* of the Bolsheviks comes at an interesting moment when the Allies are talking about modifying the Treaty of Sèvres, when the League of Nations has been exercising itself at Geneva about the protecting of Armenia, and when President Wilson has been considering the use of moral influences for the same beneficent purpose. While other people have been talking the Bolsheviks have been acting. We expect that the "moral influences" will be demobilised again for the moment, and as for the League of Nations, its leaders, we hope, are duly grateful to Mr. Lloyd George, M. Leygues, and Count Sforza for their advice not to admit Armenia at present to the fold. Indeed, that long-suffering sheep has by the magic of Moscow now been transformed into a wolf, and will probably be forced to express the same contempt for the Capitalistic League as the leader of the pack at Moscow. And as for the Allies themselves, Armenia is recognised as an independent State in the Treaty of Sèvres and therefore it is unnecessary for them any longer to talk about the possibility of "modifying" the document, for already its revision is being taken in hand for them by the Bolsheviks. The surrender of Armenia carries Trotsky a good step further in his move to the south and his plan for joining up with the Turkish Nationalists. Azerbaijan has gone, and Georgia, which is fundamentally anti-Bolshevist, must, we are afraid, also come to terms. We hope, therefore, that the supporters of the British trading agreement with Moscow will carefully note the seriousness of the present situation.

## Persia and India.

Writing in the *Daily Telegraph* under the above heading, Major Cecil Battine has some strong words on British indifference to these places:—

The British people have not tried to face the tremendous Indian problem, which is growing daily more insistent, but is continuing to subsidise India with vast sums by paying for these expeditions, which could not be justified except in so far as they are involved in the general defence of the North-West Frontier. Nor is there the slightest prospect of even the correct military policy being adopted until a united command of all the British and Indian land forces is achieved. Whatever hope the Secretary of State for India and his friends may have of the success of his new scheme of Indian Government, they must know how little enthusiasm these so-called reforms have kindled in India. They must also know, for it is common knowledge, that an unholy alliance exists between the Babu orators, the politician party, the more virile Mohammedans of the Punjab. The loyalty of this community has been tampered with from within and without, and their attitude is surly and verging on disaffection. An attack upon India from the North-West border would tax the resources of the Indian Army and State, especially as to the incidence of a fresh important war would be most unwelcome to the English electors, still staggering under the burdens of the German struggle.

And he pleads for a clean-cut policy:—

If we really intend to preserve the British sovereignty in India we cannot afford to trifle with the situation any longer. Our Executive should decide on this question and take the measures required. All the tribes of Central Asia and Persia are closely watching and waiting, as are also the Princes and people of India itself. The great majority would very much prefer to see the British Raj maintained, and, indeed, would fight for it, but only on the condition that we keep up our standard of valour, decision, and good faith. Directly wavering is apparent these folk will with one accord turn against us with scorn and disgust. It is especially worth noticing that the strenuous efforts of the British Prime Minister to arrive at a working, not to say friendly, agreement with the Soviet Government have not prevented it from persistently striving to stir up war, and even to strike a deadly felon blow against our Indian dominions. Fortunately the bloodthirsty proceedings and anti-religious tenets of these miscreants alienate possible allies and make up for the somewhat half-hearted support accorded to the agents of the Empire by the Government. But whether the responsibility for failure rests at Simla or in London no one knows, or is meant to know. The cost, however, on the taxpayer is very heavy.

## The East and the European Powers.

In an article called "The Optimists" the *New Statesman* of December 11 deals with the policy pursued, or rather adumbrated, by Messrs. Lloyd George and Leygues and Count Sforza. Their attitude towards the Greek succession cannot, it says, be divorced from their general policy, and an attempt to deal with the problem of ex-King Constantine *per se* is impossible:—

The Greek question, in point of fact, cannot be isolated. The problems of Turkey, of the Arabs of Syria and the Arabs of Mesopotamia, the Jews of Palestine, the Armenians, the Russian Bolsheviks, are all closely connected, and they must be faced as a whole, and not separately and as the whim takes us, by France and ourselves. Critical as we may be of some of the ideas and actions of the French in Asia, we must at least concede that they show a better appreciation of the need for a comprehensive settlement than does our own Government. Their position, no doubt, has for some time past been profoundly uncomfortable. Their struggle to maintain themselves in Cilicia has been less successful than ours in Mesopotamia, and though they have not spent so much money on it, they have spent, and are spending, more than is to the taste of the French taxpayers. They have had greater difficulties in Syria than we have had in Palestine—and they are not yet out of the wood. They have been bitterly chagrined by the loss of the prestige and influence which they once had in the Ottoman Empire, and a genuine sympathy with the Turks has combined with a less creditable fear of what they have called the "Anglo-Greek hegemony" to make them eager to revise the Treaty of Sèvres. But all these things, it may be argued, affect the outlook of France; they do not affect us in the same way. Why should we necessarily frame our plans to suit the French? The answer is that we are not suggesting anything of the sort. We are suggesting that the French and the British Governments ought to discuss and agree upon a common policy from Athens to the Caspian, and from Constantinople to the Persian Gulf, precisely because there is no other way of guaranteeing either our own legitimate interests or the peace of the Middle East.

What sort of policy, then, do we desire? The first thing that is requisite is to be clear about what is important and what is not. From the point of view of a statesmanlike settlement, the question of whether Constantine shall sit on his throne in Athens is a comparative trifle. The question whether General Gouraud was right in evicting the Emir Feisul from Damascus is another trifle. Yet those disputes, so far as we can see, are exciting far more interest in Paris and London than the settlement of Turkey or the exact conditions on which France is to operate in Syria, which are not trifles. The second principle, on which it is necessary to agree before definite measures can be concerted, is whether the European Powers are going to redeem their honour by acting disinterestedly for the welfare of the peoples in the Middle East. Hitherto the behaviour of France, of ourselves and of Italy, as far as she has been able to get her fingers into the pie, has been generally cynical to the last degree. The peoples themselves have been left under no illusions. The Greeks are aware that we have made a pawn of them, even though they may have been largely a willing pawn. The Syrians have been bandied between France and the Hedjaz, much as though they were a set of "landlord's fixtures." The Arabs of Mesopotamia have expressed their views of us in a painfully disconcerting manner. The Armenians, having been grossly left in the lurch, have at last done the only thing that was open to them, and compounded with Moscow. Those of us in England and France—and they were not a few—who had designed Armenia as an anti-Bolshevik base are, indeed, neatly requited by the establishment of a Bolshevik Government in Erivan!

The article concludes by suggesting revisions of the Treaty of Sèvres. Among these are: British withdrawal from Mesopotamia; mandates to be drawn up without delay for Syria and Palestine; and the problem of Armenia and the Caucasian States to be solved "by the common-sense expedient of making peace with Soviet Russia."

# MUSICAL NOTES.

### Pianists.

In nearly all Western attempts to write Eastern music there is something pathetically similar, and that similarity is the essentially counterfeit nature of the whole. But how well our ordinary public likes to be deceived by this sort of thing is shown by the success of "Chu Chin Chow," or "The Garden of Allah," and on another scale and by a different public the fact was demonstrated by the applause given to Mr. Vivian Langrish's playing of "Two Egyptian Sketches" at the Wigmore Hall on December 14. These two sketches, called, respectively, "Tanta" (In the Native Quarters) and "Zagazig," are the work of Mr. Leo Livens, who is fairly well known as an impressionist composer. But they are only echoes, clever echoes; the real East does not come through them to grip us. Mr. Langrish played them probably as well as they could be played, for he is without doubt a fine pianist in the making. There was, it is true, a certain absence of romantic warmth in his interpretation of Schumann's Fantaisie in C major (Op. 17), but he made B. J. Dale's Sonata in D minor sound far less dull than it really is. I should say that Mr. Langrish, unless he allows his judgment to become hopelessly sound, has a future.

How M. Vladimir Cernikoff, whose recital was at the Æolian Hall on December 16, can play as badly as at times he does is a mystery. To hear him in such things as a "Hornpipe" of Purcell or a "Gavotte" of Chanoine Ruick is to have one's æsthetic sense very sharply whetted, for he does these exquisitely well. But Beethoven's "Moonlight" was simply appalling; it was less than puerile in every way—rhythm, poetry, even accuracy. Matters did not improve, though a whole group of Chopin and pieces of Arthur Hervey and Albeniz were played, until he came to Liszt's "St. Francis Preaching to the Birds." And even this was followed with fond assurance by "La Campanella." Evidently M. Cernikoff does not know how well he can play: otherwise he would never perform anything later than the eighteenth century.

It is common wisdom now not to get to one of M. Arthur Rubinstein's recitals until he has finished with the classical pieces in his programme; for single pieces by such men as Scriabin, de Falla, and Albeniz are in his hands worth whole groups of Brahms and Chopin. On December 18, at the Wigmore Hall, I heard him in the "Vers la Flamme" of the Russian composer, and a "Fantasia" and the "Triana" of the two Spanish composers mentioned. His Scriabin started very promisingly, but as its luminosity grew more clangorous, so the pianist lost the control, not certainly of his hands, but of his head; the de Falla (dedicated to the pianist, by the way) was incredibly noisy, and not too cheerful; but his Albeniz was very beautiful indeed. M. Rubinstein most cunningly captures the curves and winding graces of Spanish rhythm; and he has what is most effective in contrast, a delightfully clear staccato. There is, in fact, no one I know who plays this kind of music as well as he. For encores he played, in addition to more Spanish music, a waltz of Chopin and "The Ruins of Athens" march, from the last two of which it was manifest that we have in him a potential Mark Hambourg. All efforts must be made to prevent his coming to this fate, for one capital surely cannot support two such dashing pianists.

### A Roumanian Sonata.

M. Zlatko Balokovitch included in his last recital at the Wigmore Hall, given on December 15, a sonata by Stan Golestan, a Roumanian composer, who is known to this country only through his two orchestral "Roumanian Rhapsodies." When this sonata was written I do not know, but its construction, which is far from being hodiernal, appears to resemble the César Franck type. There is no trace of modern, and little of national, idiom in it; the last movement (*allegro giocoso*) is the only one which, being a native dance, bears marks of the country of the composer. On the whole, it was a dull work to listen to, despite the fine tone with which it was played by the violinist. One hopes that in future recitals M. Balokovitch will find another accompanist than M. Ljudevit Kraus, whose insensitive methods do not suit those of this very capable Serbian fiddler.

### Singers.

If a choice had to be made between a good programme inadequately sung and a poor programme well sung, it would surely fall on the first. Now the programme of Mme. Salteni-Mochi's last recital at the Wigmore Hall on December 14 was a very beautiful one, but, as I have said before, her refined ambitions out-measure her achievements. Her flexibility and breath-control generally are insufficient for the *lieder* of Schubert, Schumann, and Brahms; but she certainly is worth hearing in atmospheric songs like those of Debussy. It was a pity that she sang her German songs in English, a tongue in which she is by no means infallible.

There are few English singers whose artistic aims are higher than those of Miss Dorothea Webb, who gave a recital of Foreign Songs at the Æolian Hall on December 18. Miss Webb is one of those rare, sincere singers who appeal only to the musical, who do not even try to please, but are content to let the music and their interpretation of it be judged wholly on their merits. In other words, she has no affectations; her ambitions are never less or more than musical in the strictest sense. This, of course, is extremely laudable, but for all but the maturest artists there is in it the danger, which Miss Webb has not completely overcome, of the partial elimination of personality; there is the risk of monotony. Now, Miss Webb is too fine an artist for any of her interpretations to be called invertebrate, but there are virtues which she sadly lacks, such as brightness and rhythmic gusto. In songs which are cast as it were in the half-light, where the tones are all shaded, and around every word shadows linger, or in songs where nearly everything depends on *legato* phrasing, she is practically perfect; but there were things that she sang on Saturday, such as Tacchinardi's "Notte di Natale," or Bruneau's "La Sarabande," which failed simply for lack of impulse. In other matters, however, her voice was very beautiful; there was very little wrong (and that little was due to insufficient breath-control to sustain a long *piano* phrase) with her two Brahms songs "Gestillte Sehnsucht" and "Geistliches Wiegenlied," with Mr. Frank Bridge accompanying impeccably on the viola; and her performance of Ravel's difficult "Asie" was a notable one—its quiet and magic reticence being splendidly reflected. It is worth remarking that Miss Ella Ivimey, who has long passed the stage of being merely capable, accompanies Miss Webb better than she does anyone else.

### The Bach Choir.

The Bach choir differs from nearly all other Southern choirs in that it is composed of people who treat choral singing first and last as music, not as a sport or a social entertainment. But for it and one or two other choirs a great deal of the splendid choral work that living British composers have done would have gone unperformed. On December 14, at the Queen's Hall, it gave, with the London Symphony Orchestra, under Sir Hugh Allen, Vaughan Williams' "Sea Symphony," and through all this extremely difficult work it sang very creditably, and often very finely. In this symphony, which is based on some lines from Walt Whitman, the best writing is for the orchestra; here are some great and beautiful thought and writing. Far more than the choral writing, some of which is not quite happily done, does the orchestra tell of the surge, the swell, and the flash of the waves. The impulse of the first three movements moves magnificently; but of the fourth, where the psychological nature of the symphony is more marked, I am not so certain. Sir Hugh Allen conducted the whole most invigoratingly, and if the first performance, ten years ago, were anything like this, it seems strange that its greatness can ever have been doubted.

Other things done at this concert were Armstrong Gibbs' "Crossings," a suite for orchestra, which certainly must have been charming for its original purpose of a school play, but does not stand when scored for a full orchestra. Gibbs is a composer for whom I have great respect, and on whom many hopes are being built, but at present his thought is too delicate and limited to resist much buffeting from brass and the heavier instruments of modern orchestration. Mr Adrian Boult, who conducted "Crossings" well, is not, I think, nearly as good in concerti as in other things, and the pianoforte concerto of Delius was not a perfect performance. Brilliantly played though it was by Mr. Aubyn Raymar (who hitherto had been known only as the excellent accompanist of Mr. Douglas Marshall), it had not the exquisite colourings distinctive of Delius, and appeared on this occasion to be more a *tour de force* than anything else. It was poor Smetana and his "Bartered Bride" overture which suffered by being the last piece at this concert, for the orchestra wished it over even more obviously than the audience.

ANDANTE.

---

M. Pashitch is reported to have been entrusted by the Yugoslav Prince Regent with the formation of a new Cabinet.

Part of a building at Saseno Island, near Valona, Albania, used by the Italian Navy, was carried away on Thursday by a landslide, caused by continuous bad weather, and a lieutenant and his two daughters, two warrant officers, three petty officers and ten sailors lost their lives.

An official dispatch from the Viceroy states that the Zakka Khel Jirga, interviewed in Peshawar, has undertaken to endeavour to make the Utman Khel stop raiding and return Government rifles immediately. It remains to be seen whether they can force the younger members of the section to comply.

Sir Herbert Samuel has announced that the time, place, and purpose of public meetings in Palestine must be declared in advance the announcements being countersigned by at least two responsible persons. The penalty for non-observance of this regulation is a month's imprisonment and a fine of £15.

# NEAR EAST BOOKSHELF.

I.—"Constantine I. and the Greek People." By Paxton Hibben. (New York: The Century Co. $3.50 net.)

II.—"LESSONS ON INDIAN AGRICULTURE." By D. Clouston. (London: Macmillan and Co.)

## I.—AUDI ET ALTERAM PARTEM.

Anyone who has experienced difficulty in understanding the recent course of events in Greece will find everything made plain to him on reading this book. He may refuse to be convinced that King Constantine was all along in the right and that M. Venizelos and the Allies were in the wrong; but he can no longer affect to be surprised that the Greeks should have recalled their former king. Mr. Hibben wrote his book in 1917, but in deference to the wishes expressed "in certain quarters," it was not published until this year. He describes the events in 1914-16 in Greece, as he saw them at the time, from the vantage point of a neutral. Even an ardent Venizelist, such as Major George Melas, has placed on record his "fixed belief that Constantine would have acted, if the Entente had handled him skilfully." Here we have a careful narrative which purports to give the steps actually taken by King Constantine to bring Greece in on the side of the Allies, and, at the same time, describes the amazing tactics adopted by the latter to frustrate his efforts. The whole story is too long and intricate to set out in the course of this review, even in brief. Everyone who wishes to understand Greece ought to read "Constantine I. and the Greek People"; certainly no Entente Government ought to take any further action in regard to Greece at the present time until the responsible head has studied its pages. Mr. Hibben's main contention is as follows:—King Constantine was concerned only with the military side of the Balkan question, and not with the political. When Greece refused to help Serbia in October, 1914, under the terms of the Alliance, both M. Venizelos and the King were at one in holding that the Greeks could not move so long as Bulgaria remained a menace on their flank. Afterwards M. Venizelos changed his opinion, and subordinated all other considerations to the view that "the present war was an opportunity for aggrandisement of Hellas such as would never come again."

He wanted to profit at once and to the utmost from the opportunity by throwing Greece unconditionally into the arms of the Entente Powers. He was impatient of any caution or of any well-considered plan of co-operation, consumed only by a fear lest the war should end before Greece, by her participation, should have gained vast territorial concessions in Asia Minor or elsewhere, a smaller dream of empire than that conceived by the German Kaiser, but not less imperialistic.

King Constantine, according to our author, was ready in the early days of 1915 to consider Greek support for the Allies, but it was to be on lines that satisfied military requirements, not a Dardanelles venture, and on terms that safeguarded Greece after the war. The Allies paid no heed to his overtures, having already made up their minds that M. Venizelos was their man, and not King Constantine. Gradually the King brought himself to abandon his conditions; but as he neared the point of unconditional co-operation, M. Venizelos and his followers saw that they would lose all political advantage if Greece entered the war behind the King, instead of behind M. Venizelos. Accordingly, resort was had to the revolutionary movement. (Here it may be mentioned that Mr. Hibben receives confirmation from Major Melas, who publishes a telegram sent to M. Venizelos at Canea, October, 1916, notifying him of the King's intention to declare war immediately on Bulgaria.) From this point everything went wrong. The Allies, who had never made any attempt to understand King Constantine's point of view, now became more than ever subservient to M. Venizelos's policy, and were encouraged by the latter in action that cut deeper and deeper into the Greek soul. Proof after proof, our author maintains, was afforded that M. Venizelos did not carry the Greek people with him in his attempt to split Greece in twain, but the Allies remained blind. Then came the demand for the surrender of rifles and guns. The French Admiral not only had the formal declaration of the Greek Government that it would not accede to the request, but also definite warning that the attempt to seize the arms would be resisted. Mr. Hibben holds that the Allied march on Athens was undertaken on the understanding that the Venezelists would simultaneously rise in the city itself. The plan miscarried; only a few shots were fired from Venezelist houses after the Allied forces had been surrounded. The Allies having held the capital for months with troops and police, on the ground that they were necessary to maintain order, chose this moment to withdraw both, leaving the Greeks to deal with the abortive revolution in their midst. "I do not know," writes Mr. Hibben, "how those who protested against its alleged cruelty would recommend that armed rebellion in the capital city of a country be handled—probably by putting salt on the tails of the revolutionists. The present war has given rise to many shining examples of hypocrisy; but I have yet to see the parallel of the self-righteousness with which the Greek Government has been criticised for its prompt, businesslike re-establishment of order in the Greek capital following the events of December 1." Mr. Hibben's narrative even renders the foolish act of anathematising M. Venizelos plausible. He takes leave of his readers with the account of a farewell interview with King Constantine in January, 1917, in which the latter delivers a very shrewd diagnosis of what subsequently happened under M. Venizelos's Government.

Reference may also be made to our author's reading of the Fort Rupel surrender. To what extent it may need to be modified in the light of telegrams published in the Greek White Book others will decide. The Greek Government of the day, it is pointed out, repeatedly asked the Allies to take over this portion of Macedonia to protect it against the Bulgarians. Not only did they refuse, but they also destroyed the bridge over which the provisioning and reinforcing of the Greek troops had previously been carried out, and, worse still, they had insisted upon the Greeks demobilising. Accordingly, the Greek Government decided that no resistance could be offered to the Bulgarians if they chose to advance. As to the surrender of the Fourth Army Corps, Mr. Hibben holds that the fault lay with the Allies in trying to coerce the Greek forces into joining General Sarrail's army.

As in the case of the surrender of Fort Rupel, the Allied military authorities seem to have taken the chance that when faced with the choice of joining General Sarrail's army or giving way before the Bulgars, the Greeks would choose the former. On every occasion, however, the Greeks have seen through this intention, and rather than be tricked into a course they have not deliberately chosen have chosen a course nullifying the Entente's calculations.

No one reading this book will feel called upon to fear lest Greek imperialism should prove more aggressive under King Constantine than under M. Venizelos. Moreover, if Mr. Hibben is right, the situation in Greece presents no difficulties to the Entente Powers, unless they persist in their former folly of never acknowledging that they had made a mistake.

## II.—INDIAN AGRICULTURE.

This is an elementary text-book of the subject, prepared by the Director of Agriculture in the Central Provinces. As with most books of the kind, its value will depend mainly on the quality of the oral instruction. In the hands of a good teacher, it should be a most useful aid: it might seem in other circumstances to give merely answers to certain types of examiners. The title is perhaps rather too wide for the scope: the differences of practice prevailing in India are probably too numerous and important to be generalised in a single volume, and we anticipate that students in the Punjab, for instance, or in Assam, would be more puzzled than helped by many of Mr. Clouston's illustrations. For the central parts of the country it should prove highly useful, provided always that the oral teaching is efficient.

M. Stambolisky, the Bulgarian Prime Minister, arrived at Prague last week.

Admiral Condouriotis, the former Greek Regent, arrived in Paris on December 19.

General Charpy has arrived in Constantinople to take over the command of the French troops there.

M. Fr. Borck-Dohalsky, First Secretary to the Czecho-Slovak Legation, left London last week for Prague.

The Marquis and Marchioness of Sligo have left 7, Upper Belgrave Street for Algeria, and will be away for two months.

The former Greek Commander-in-Chief, General Paraskevopoulos, and the ex-War Minister, M. Grivas, have left Athens for Nice.

Judge A. C. McBarnet, Counsellor of the Egyptian Native Court of Appeal, has been appointed Counsellor of the Mixed Court of Appeal.

The Danish Minister and Mme. de Grevenkop-Castenskiold left London last week for Tunis. They will be away for about two months.

The Hon. Mrs. Claude Rome, who accompanied Colonel Rome to Egypt last month, en route for India, has now returned to 33, Portland Place.

Lady Rumbold, wife of the British High Commissioner in Turkey, has become president of the Constantinople branch of the Women's Auxiliary of the Y.M.C.A.

Mrs. John Campbell has now recovered from her illness, and has, with her daughter, Miss Amy Campbell, left for Egypt, where they intend spending the winter.

M. Stancioff, the Bulgarian Minister to Great Britain, was received by the King at Buckingham Palace on December 17, and presented his credentials to his Majesty.

Mr. Peter Williams, a director of the P. and O. Steam Navigation Company and the British India Steam Navigation Co., left £168,256, of which he bequeathed about £20,000 to charity.

Sir Philip Gibbs has accepted the editorship of the *Review of Reviews*. His first number, which will include contributions by many well-known literary men, will appear on January 15.

President Wilson has selected Mr. Henry Morgenthau, the former United States Ambassador to Turkey, as his personal representative in the mediation between Armenia and the Turkish Nationalists.

**OUTFITS FOR EGYPT, INDIA, AND THE FAR EAST.**

Gentlemen visiting the East this Winter can be supplied with suitable clothing and the necessary equipment for travel, camp, or bungalow, at short notice.

*List "H" giving full particulars and prices by return on application.*

Kit renewals required by officials returning from leave, and complete outfits for those newly appointed, at moderate cost.

**THRESHER & GLENNY,**
*INDIAN & TROPICAL OUTFITTERS,*
**152 & 153, STRAND, LONDON, W.C.**

Prince Nicolas of Roumania arrived in London on Saturday from Eton, on his way to Bucharest, where he will spend Christmas and the New Year with his parents, the King and Queen of Roumania.

The Swedish Crown Prince, who has been away from Sweden for about ten weeks on a trip to Southern Europe, during which he visited Italy and Greece, returned to Stockholm on December 19.

Prince Paul of Serbia, having taken the shortened course in modern history at Oxford, was last week among the students who were reported as having satisfied the examiners. His College is Christ Church.

Brigadier-General Sir William H. Manning, Governor of Ceylon, was married at Colombo on December 11 to Olga Mary, the only daughter of Mr. and Mrs. H. Sefton-Jones, of 74, Cadogan Place, London.

Sir Ralph Sillery Benson, of Roebuck Grove, Donnybrook, Dublin, Judge of the High Court of Madras from 1896 to 1913, who died on October 19, aged 69, has left personal estate of the value of £21,712.

An engagement is announced between Monsieur Gabriel Dichter, of Bucharest and Paris, and Edith Jane, youngest daughter of the late Lieutenant-Colonel Barstow, Seaforth Highlanders, and Mrs. Barstow, Villa Louise, Bordighera.

Major-General Sir Fabian Ware, Vice-Chairman of the Imperial War Graves Commission, returned to London last week from a tour of inspection of the cemeteries and work of the Commission in Gallipoli, Macedonia, Ægean Islands, Palestine, Egypt, and Italy.

Mr. Ronald Storrs, Governor of Jerusalem, was the guest of the Overseas Club and Patriotic League at luncheon at the Connaught Rooms on December 21. In the absence of Lord Northcliffe, the chair was taken by Mr. Cecil Harmsworth, Under-Secretary of State for Foreign Affairs.

The marriage arranged between Vladimir I. Dushmanitch, LL.B., of Belgrade, Serbia, the Delegate of the Serbian Ministry of Finance in London, and Constance Jessie Millar, third daughter of Mr. and Mrs. David Rowan, Dunskaig, Ayr, Scotland, will take place at the Old Parish Church, Ayr, on December 29.

Prince Bibesco, the newly-appointed Roumanian Minister to Washington, returned to London last week from Bucharest. He will leave for the United States early in the New Year. Prince and Princess Bibesco will spend Christmas and the New Year with Mr. and Mrs. Asquith at The Wharf, Sutton Courtney.

General Sir Robert Baden-Powell and Lady Baden-Powell will, it is stated, sail for India on January 7, the former having accepted an invitation from Lord Chelmsford, Viceroy of India, to reorganise the Boy Scout movement there. The Duke of Connaught is President of the movement, and it is anticipated that the Indian branches will receive considerable impetus from the forthcoming presence of his Royal Highness in the country.

## APPOINTMENTS, ETC.

M. Radu Th. Djuwara has been appointed First Secretary to the Roumanian Legation in London.

The King has been pleased to approve of Colonel H. O. Parr, Indian Army, being appointed Aide-de-Camp to the King, Indian Establishment, vice Colonel F. M. Edwards, Indian Army, who has been placed on retired pay, with effect from April 1, 1919.

It is stated in the November *Bulletin* of the League of Red Cross Societies that Lieut.-Col. A. H. Hapgood, D.S.O., M.B., B.C., D.P.H., has been appointed to be Medical Director in charge of the League's Child Welfare work in Roumania. Dr. Hapgood has held appointments at the London Hospital and the Children's Hospital, Chelsea.

## OBITUARY.

The death has occurred at Nazareth, Palestine, of Miss Edith Johncock, Royal Red Cross, Matron of the British Hospital at Nazareth. Miss Johncock was a prisoner of the Turks for several years of the war, but remained in charge of the Nazareth Hospital for a great part of the time, attending on British and Turkish wounded prisoners of war. She was taken by the Turks to Damascus after the British advance, and was set free there. She had been

Digitized by Google

in Dover recuperating, and only returned to Nazareth recently. Miss Johncock received the Royal Red Cross for her assistance to the British wounded in Palestine.

The death occurred last week of Sir Charles Bruce, G.C.M.G., the distinguished Orientalist. The son of an Indian civil servant, Sir Charles Bruce was born in India in 1836. He devoted himself, mainly in Germany, to the study of Oriental languages and literature, more particularly Sanskrit and Zend-Pahlavi. While in Germany, studying under Professor Roth, he was able to assist in preliminary work for the great Sanskrit dictionary of Böhtlingk and Roth, published by the Imperial Academy of St. Petersburg. It was through the recommendation of these savants that the Imperial Academy published his work, "Die Geschichte von Nala." This was an attempt to restore the original text of an episode in the great Indian epic, the Mahabharata, and came to be used as a text-book in many Germany universities, as well as in the United States of America. His Vedic studies included an effective translation from the Atharva Veda. While serving as an assistant librarian at the British Museum, Bruce was selected, in 1865, for the Chair of Sanskrit at King's College.

The death has occurred of Lieut.-Colonel John Muir Hunter, C.S.I., O.B.E., at the age of seventy-six. He was gazetted to the Royal Artillery in 1864; he went out to India at the end of the following year, and was soon transferred to the Bombay Staff Corps. For thirty years, from 1872, he served as a political officer in various native States of Western India, and chiefly in Kathiawar, where he was chief agent for Government for the last five years of his service. He was a man of tact and discretion, and won the confidence and esteem of the long succession of Ruling Princes with whom he was brought into association.

## NEWS IN BRIEF.

A great congress of Eastern women will be held in Moscow on February 1, 1921.

All professors of the University of Athens appointed by M. Venizelos have been dismissed.

M. Advocaat, Dutch Minister in Serbia, is stated to have left Belgrade last week for Holland.

Nabi Bey, the Turkish peace delegate, was to leave Constantinople last week to resume his post in Paris.

Between 2,000 and 3,000 cases, each containing 1,440 eggs, are sent to England from Morocco every week.

The Greek destroyer Navkratousa has foundered near the Island of Milo, and is regarded as a total loss. The crew were saved.

The offices of the Military Attaché of the Roumanian Legation will be closed from to-morrow, the 24th instant, till next Wednesday.

A mail and goods train collided last week near Bommidi, on the South Indian Railway. Thirty Indians were killed and 35 injured.

Nine hundred wounded soldiers of General Wrangel's army have arrived at the Piræus, and are being distributed among the Greek hospitals in Athens.

M. Stanoievitch, the Serbian Chargé d'Affaires, left The Hague on December 16 as a result of the rupture of diplomatic relations between Yugoslavia and the Netherlands.

At a Cabinet meeting held at Belgrade on December 14 it was decided to grant an annual pension of 300,000 French francs to ex-King Nicholas of Montenegro and Queen Mylona.

M. Grecianu, the Roumanian Minister of Justice, died on December 12 as a result of injuries received in the bomb explosion in the Senate, reported in our columns last week.

Herr von Stockhammern, head of the Balkan Department at the German Foreign Office, has left for Belgrade to conduct negotiations for the resumption of economic relations with Yugoslavia.

India's central war memorial at Delhi will take the form of a memorial arch, of which the Duke of Connaught will lay the foundation-stone on February 10. Memorial tablets will also be set up in individual villages.

The French dispatch boat Bar-le-Duc, of the Eastern Mediterranean Squadron, has run aground on the Island of Eubœa (Negropont), near Cape Doro. The cruiser Ernest-Renan has been sent to her assistance.

By order of the Courts, Mme. Manos, the morganatic widow of King Alexander of Greece, is authorised to take immediate possession of her late husband's fortune, valued at 2,000,000 drachmae (£42,000) in specie and jewels.

The Cairo correspondent of *The Times* states that the misunderstanding with Holland over the appointment of Dutch Judges to the Mixed Tribunals is not yet officially settled, but it is understood that an arrangement satisfactory to both parties is imminent.

## APPOINTMENTS WANTED.

THE Ladies' League (under Royal Patronage), 118, New Bond Street, successfully recommends Lady Secretaries, Chaperons, Housekeepers, Companions, Secretaries, Governesses, Nursery Governesses, Nurse Companions, Lady Nurses, etc.

# WHERE TO STAY.

**For the convenience of visitors from overseas "THE NEAR EAST" offers its services in booking rooms at hotels in the United Kingdom, on receipt of instructions preferably a week before the date of arrival. When instructions are telegraphed the message can be abbreviated as follows:—**

**"EASTAPROX, LONDON. TWENTIETH MATLOCK TWO**

**(The visitor's name and place of residence abroad to be added)."**

**which would indicate that two rooms were required at Matlock on the 20th of the month.**

**BRISTOL**
**GRAND SPA HOTEL.**

**EXETER**
**ROYAL CLARENCE HOTEL**
*(facing beautiful Cathedral).*

**LONDON**
**HOTEL CRANBOURN**
**67a, Shaftesbury Avenue, W.C.2.**
**Self Contained Suites.**

**MANCHESTER**
The Victoria House, 254, Oxford Road.

**MATLOCK**
**SMEDLEY'S HYDRO.**

**TORQUAY**
**VICTORIA & ALBERT HOTEL.**

***Cairo's Hotels de Luxe.***

**SHEPHEARD'S HOTEL.**
Open all the year round.

**SEMIRAMIS HOTEL.**
Splendid position on the East Bank of the Nile.

**THE ONLY ENGLISH HOTELS IN ALEXANDRIA.**
Proprietor: AUGUSTUS VAN MILLINGEN.

**WINDSOR HOTEL**
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
American Bar and Restaurant,
Billiards, and Lift.

**SUMMER PALACE HOTEL,**
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Every Modern Comfort. American Bar, Restaurant.
Bathing Cabins on the Beach. Billiards.
Daily Concerts on the Verandah.

**NAJEM HOURY'S CYPRUS HOTELS COMPANY.**
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
LARNACA—Majestic Hotel.
FOR SUMMER SEASON—
TROODOS—Olympus Hotel.
6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, and Larnaca.
Head Offices and General Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

## POLITICAL DEVELOPMENTS IN INDIA.

The great experiment to which the Empire stands committed in India has now reached the stage where we may be confident that the main provinces will be equipped effectively with working legislatures, and it is time to attempt some estimate of the probable results of their labours. The new legislatures will not, of course, be perfect, but we know of none to which that epithet can justly be applied; the claim can fairly be made that the bulk of the members chosen have the approval of the majority of those electors who cared to record their votes, and the reputation of the House of Commons itself stands on no securer basis. Though full lists of the members have not yet been published in this country, it is already clear that a large proportion will be new to practical politics, and we must expect occasional outbursts of unreasoning idealism, some impatience of the necessary restraints of debate, determined efforts to spend more money than can be got; such features are likely to be prominent in the proceedings of the next few years, but assuming that the first Ministers are wisely chosen, they will gradually work their own cure, and the future of these institutions depends rather on the nature of the common mentality which will emerge. The members will meet with a preponderantly urban outlook, an outlook which is shared by less than a tenth of the population for whom they are to legislate, and almost the whole question of their efficiency turns on the extent to which they succeed in realising the needs and the aspirations of the countryside. In India nine people out of ten live in villages, and on the democratic theory which lies at the base of the whole experiment, the peasants' will must ultimately prevail; will the town-dwelling legislators accommodate themselves to this fundamental fact, or will they seek to perpetuate the old régime, under which the peasant toiled and the towns enjoyed the produce of his labour?

Those of our readers who are not familiar with Indian life may be surprised at the importance we attach to the existing divergence of opinion between the country and the town. Such conditions scarcely exist in the West, where, speaking broadly, town and country are mutually beneficial, and even in India, the great cities which have grown up as the result of British initiative already serve the country districts in many ways. But the typical Indian town is altogether different from such centres as Calcutta or Cawnpore. Its nucleus consists of a number of middle-class families, lineal representatives of the men who lived on the country for at least a thousand years, and still dominated more or less unconsciously by the ideals of the past. The bulk of its population is made up of men and women who serve the needs of these superiors, parasites upon parasites, and, taken in the mass, the least worthy section of Indian life. The town as a whole is, indeed, a parasitic growth, looking to the country for all its needs, and as yet scarcely beginning to be conscious of any resulting duty, whether in the social or the economic sphere; it has no moral claim to consideration, and its importance lies in the fact that the old-world ideas generated in its atmosphere dominate the great majority of the politicians of to-day, who talk glibly in the language of Mill and Bright, but have not yet learned to apply democratic doctrines to their own relations with the peasants. They have, indeed, made much progress under the teaching provided by the West: oppression is now far from their thoughts, and schemes for the benefit of the peasant win their ready approval; but the conception of the peasants as dominant in the State, and the ultimate masters of respectable people, is as yet utterly unfamiliar to those respectable people who have been masters for so long. For a practical illustration of the truth of this view, we need look no further than that topic of universal interest, the price of food. Nearly three Indians out of four live by agriculture, and, given good seasons, their well-being rises with the price of grain; yet in the last two years scarcely a single politician has uttered a word of protest against the action of the administration in controlling exports so as to ensure that food-grains shall be cheap. A genuine Indian democrat might have been expected to denounce such spoliation in unmeasured terms, as a boon to the idle rich, or a subsidy to capitalist employers, and all taken out of the pockets of poverty-stricken peasants, forming an immense majority of the people, but easily robbed because they have not yet grasped political power. In fact the politicians' theme has been just the opposite; their influence underlay the measures which were actually taken, and they would have welcomed even more drastic limitations than those which were enforced. We are not blaming the Government for what was done; we believe that their action was practically unavoidable in the topsy-turvy conditions of Indian political life; but we venture to prophesy that this is nearly the last occasion on which a British administration will be driven to expedients so familiar under the rule of Afghans or Moghuls. The fullest justification for constitutional change is to be found in the fact that the Indian peasant is beginning to wake up to some consciousness of his preponderant position in the commonwealth, and the same fact renders indispensable a complete readjustment of mental outlook on the part of the dwellers in the towns. They want, it is true, cheap food for themselves, and of late they have been able to impose their view on the Administration: they have now to realise that as time goes on their wishes will count for less and less, and that they must come to terms with the peasants before the wheel has swung full circle.

The question will perhaps be asked whether there is any prospect of the accomplishment of this readjustment in a peaceable and orderly manner, or whether the Indian peasant, like the peasants of so many other countries, will be driven to seize his rights by the strong hand. We believe the prospect to be hopeful. It is true that, as we have said, the politicians have so far tended to ignore the peasants' aspirations, but behind the politicians stand the men who think, and they are now beginning to realise something of the truth. As a single example, we quote a sentence from an Indian gentleman's letter which appeared last month: "Too long have we trumpeted our own middle-class cause as the cause of the whole nation without considering the interests of the masses. For our own interest, if we do not wish to be crushed, it behoves us to yield to the interests of others who form 70 per cent. of the nation, and who are beginning to be, though they are not yet, articulate." That candid statement might almost be taken as the motto of the new India. Such ideas are bound to spread from the thinkers to the schools, and from the schools to the politicians; their growth will be hastened by the fact that peasant-votes already control many of the seats in the legislatures, and if we make allowance for the remarkable adaptability of the Indian mind, we may look forward without undue optimism to a time when the outlook of the towns shall be radically changed, and the need for co-operation with the peasants shall dominate their political activity. The chief interest in the proceedings of the provincial legislatures during the next few years will lie in the progress made in this inevitable readjustment; there is time for it to be effected, but there is not much time to spare, and on its timely accomplishment depends the whole future of India.

## *"THE NEAR EAST."*

***As this week's issue of "The Near East" is the 52nd for the current year, there will be no issue of the paper on December 30.***

# JEWISH TALES FROM JERUSALEM.

## I.—KING SOLOMON AND THE HOOPOOS.

The Hoopoo, you must know, is a little golden-brown bird, slender of body, swift and straight on the wing, and it wears a gay little crown of golden feathers on its head. This is the story of how the Hoopoo got its crown.

One day, King Solomon lay down to rest in his garden at Jerusalem, but as the sun mounted in the sky, its beams struck full upon the Wise One's face as he lay among the flowers, and so all comfort went from him. Not wishing to leave his soft and fragrant couch, he said aloud: "Would that some kindly cloud would come between my face and the sun, that I might have shade!"

Almost as the King spoke a shadow came between the sun's fierce rays and his face, and a little rustling wind that came with it caused the Wise One to open his eyes and look up. There he saw, not a mist passing across the face of the sky, but a cloud of little Hoopoos hovering over him, with their wings wide spread to shield the royal countenance from the sun.

The King was so much pleased with the kindness of the Hoopoos, and so grateful for their service, that to reward them he gave to each a little crown of gold, and commanded that from henceforward to the end of time the Hoopoos should be known thereby, and their good deed be thus held in everlasting remembrance.

But one day, as the Wise King sat upon the throne to do judgment, and to deal with the complaints and desires of his people, behold, there came again that soft rustling sound, and a cloud of Hoopoos flew in through the open window and sank like a shower of little brown leaves all round the throne.

"Justice and help, great King!" cried the little birds.

"What would you?" asked King Solomon. "Lo, whatsoever you desire, it is yours, for the service you once rendered me."

"Great King," said the Hoopoos, "you gave us crowns of gold because we gave you shelter from the sun, and we wore them proudly. But now men snare us for the sake of our crowns, and throw away our bodies after they have robbed us, and, in truth, we are near to perishing altogether out of the land. Therefore, take away our crowns of gold, we pray you, and then men will let us live, and we shall flourish and be happy once more."

So, to please the little birds, King Solomon took away the crowns of gold, and gave them crowns of feathers in their stead. And even to this day, in Palestine, the Hoopoos wear their crowns in happiness and safety.

## II.—AT RACHEL'S TOMB.

Tradition has it that those who go on a certain day in October to pray at Rachel's Tomb, which stands beside the highway from Jerusalem to Bethlehem, will surely have their prayers exactly answered.

On such a day, in a year long since past, three men met at the hallowed spot to pray. They had not come hither by agreement, and they were not too well pleased to see each the other there; for one was a Christian, one a Moslem, and the third a Jew. Each, however, made the best of the presence of the other two, and each, with due politeness, begged that the other two would pray before he did; surely their prayers must be of infinitely more importance in the sight of heaven than his own poor supplications could ever be!

In the end it was the Moslem who first uttered his prayer to heaven, for, his being the religion of the Government of Palestine, precedence here seemed his right.

"Allah!" he prayed aloud, "grant that in this coming year as many Christians may perish as there be sheep sacrificed upon Thy holy mountain of Arafat at the Feast of Bairam!"

Stung to anger by this unkindly utterance, the Christian fell upon his knees and also prayed aloud:

"Oh, God! grant that as many Moslems may die as there were Easter eggs eaten this year in the Holy City of Jerusalem!"

Lifting his eyes to heaven, the Jew prayed softly: "Grant Thou to each his prayer!"

## III.—THE TWO SHOEMAKERS.

Many, many years ago it happened that there was a Jewish shoemaker who lived in Jerusalem. He was very clever at his craft, and in time his fame spread through the Holy City, and even to other parts of Palestine, so that everyone hastened to bring his work to Moses the Jew; for there was no other shoemaker who could make old shoes into new, and new shoes out of little odd scraps of leather which anyone else would have scorned to use. Day and night work flowed into Moses' hands as he sat in the dim little room that was all the home he had; and, after the work, like a little trickle of water, came wealth. Moses dug a hole in a corner of his room under one of the rough stones that paved it, and here he hid his money in little bags—gold pieces and silver pieces, hundreds and hundreds of coins, which were dearer to him than son or daughter to another man.

Time passed, and Moses grew old and bent, but still he worked from dawn to dark, and still the secret store of wealth increased from day to day.

But about this time there came another Jewish shoemaker to Jerusalem, and he took a little shop exactly opposite to the room where Moses worked. The new shoemaker was young, and he had been trained in Europe. He made gay little shoes for women's feet—red and blue and yellow and green—and he set them in his window like a row of flowers. What young girl could pass that way without being tempted in to buy? And he made soft white shoes for baby feet and set them on a shelf above the coloured ones. What mother's heart could pass them by? Human nature is fickle. It was not long before all the custom that had belonged to Moses crowded in at the doors of Solomon, his rival.

Moses saw old friends and patrons deserting him day by day. Sometimes he sat alone, with little work to do, from the time he opened his shutters in the morning till he put them up again at night. When he went out to do his marketing, it seemed to him that he saw Solomon's shoes everywhere, and never his own. Worse than all, as his work grew less and less the stream of his wealth began to run dry; instead of adding to his store of gold, he had to draw from it to supply his daily needs. And every day he was caught closer in the toils of a terrible black hatred of all men, and especially of his enemy and successful rival, Solomon.

One night, as Moses crouched over his buried treasure, wrapped in the blackness of his hatred and disappointment, a hand was laid on his shoulder, and an unknown voice bade him look up.

Starting to his feet in terror, he lifted his eyes and beheld the Archangel Gabriel standing over him, taller than the sons of men, and radiant with unearthly glory.

"Moses, thou son of Israel," said the heavenly visitant, "I am come to test thee and, if thou wilt, to lift the burden of thy trouble from thee. Whatsoever is the greatest wish of thy heart it shall be granted thee, but on this one condition—a double portion of that thou choosest shall be given to thy neighbour Solomon, for he too is of the House of Israel. Choose, therefore, and let thy heart be clean that thou mayest choose aright."

Long and earnestly Moses thought, for at the Archangel's words a hundred wishes sprang to life in his heart, and he knew not what to ask. He was lonely; should he ask a son, to comfort his old age and to carry on his name after he was dead? But then Solomon would have two sons, and now he was shamed through being the father of many daughters. Should he ask for wealth? No, that would not do; why should Solomon be enriched? Should he ask for his youth to be restored to him, that he might be strong again, and able to outmatch Solomon at his work? That would not do, for in any case Solomon had the advantage of him by many years. So he tortured himself with such thoughts, while the Archangel watched him gravely and in silence.

At length he lifted his face to the Archangel, and the story of his life was graven on it—toil and avarice and hatred.

"I have chosen," he said, with dry lips that hardly moved. "Let me be blinded in one eye!"

ESTELLE BLYTH.

## THE NEW BISHOP OF EGYPT.

Bishop Gwynne, who has just been appointed Bishop of Egypt as well as the Sudan, is well known in his new diocese, where he took duty for Bishop Blyth on various occasions. The Bishop had worked for some years in the Sudan as a missionary to the pagan tribes far beyond Khartoum, and was also chaplain to the forces stationed at Khartoum, when Bishop Blyth appointed him first Archdeacon of the Sudan. He had at one time the reputation of being the best shot at Khartoum. In 1909 he was consecrated in Southwark Cathedral as first Bishop of Khartoum, the new Bishopric being suffragan to Jerusalem. For many years Bishop Blyth urged the necessity of a separate Bishopric to meet the growing need of Egypt, and this has at length been achieved; there is no doubt that the right man has been appointed to this great task. When war broke out the Bishop was on leave in England; he at once applied for leave to serve, and went over to France with the first contingent as a chaplain (4th class). He was mentioned in Sir John French's first despatches, October, 1914, and again in 1918 by Sir Douglas Haig; and received, also, the C.M.G. and O.B.E. (military division). In 1915 the Bishop was appointed Deputy Chaplain General to the Forces on the Western Fronts, with oversight and control of the military chaplains' service with the forces, taking rank as major-general at G.H.Q. In this capacity he served till the end of the war, being demobilised in May, 1919, when he returned to Khartoum.

## THE CARAVANSERAI.

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day,*
*How Sultán after Sultán with his Pomp*
*Abode his Hour or two, and went his way.*
—Omar Khayyam.

I am always very doubtful whether the late Marquess of Salisbury really made use of the expression attributed to him about having "backed the wrong horse," in lending our support to Turkey. But whether he did or whether he didn't, the phrase seems to have inspired the writer of a very vigorous letter to *The Times*, who declared in his opening sentence: "It is manifest to everybody that in backing Greece the Entente has put its money on a rogue"; and goes on to suggest that the "right animal" is "unquestionably Bulgaria." As to the accuracy, or otherwise, of the views expressed, it is not for a mere keeper of a khan, like myself, to comment. But I cannot help thinking that the loss of Venizelos's services is likely to cost the Greeks dear, and the return of "ex-King Constantine" to cost them still dearer. Before that "double event" no criticism of the Greek stable would have been tolerated in *The Times*, I fancy.

***

Two of a trade can never agree. I understand that certain Swiss "interests" have been very busy spreading alarming reports about the present state of Egypt, and the unfitness of the Nile as a playground for the wealthy tourist just now; and Egypt is retaliating. The *Egyptian Gazette* published some weeks ago an article headed: "Swiss Summer Season: Few Tourists but many Accidents." So far, I think, Egypt is ahead.

***

The Near East—the geographical one; not this everywhere-popular journal—is in bad odour just now in Paris, I see. The gay city, we are told, is "suffering from an unparalleled invasion of Jews and other refugees from Russia and the Near East"; and these undesirables are said to have carried with them, from the "overcrowded and filthy quarters" in which they lived, all manner of dreadful diseases. I am not responsible for the language or the alleged facts, which I take from two of our "leading dailies." Among the diseases which these people are said to have imported into Paris are plague and a "mysterious infectious complaint," which the doctors have named "Malady No. 9." Only "9"? But is Paris quite sure that the disease, whatever it be, has been imported from the Near East, or, indeed, imported at all?

***

Mr. P. M. Mattheeff, whose name is doubtless familiar to many readers of The Near East, sends the following note upon the origin of the name of Kirk-Klisse, an important town to the east of Adrianople:—"The explanation," he writes, "will demonstrate the changes which names of places sometimes undergo in cases where a name given in one language is afterwards wrongly rendered in another language, owing to a similarity between two words, and the wrong name is later adopted in the original language. The Turkish name is Kirk-Klisse, or 'Forty Churches,' being compounded of 'Kirk,' a Turkish word, meaning forty, and the Greek word 'eklissia,' church. The Greek name of the town is 'Saranda eklissia,' saranda meaning forty. Thus the name has the same meaning in both Turkish and Greek. The Bulgarian name is Losengrad, the 'Town of the grape vine,' a very appropriate name, the place being the centre of a very old wine-producing district. The origin of the name Forty Churches must be sought in the old Turkish form, Kir-Klisse. 'Kir' means 'country'; therefore, the name means 'The Country Church,' or 'Church-in-the-Country.' Tradition has it that the present town is some distance from the site of the older one. The church of the old town had been saved from destruction, and for some time continued to serve as church for the new settlement, which the Turks called 'The town with the church in the country,' or Kir-Klisse. In time, even vestiges of the church in the country disappeared, and the 'Kir' became Kirk (forty). Whence Kirk-Klisse. Here we have a curious change of name, due to the cause set out above."

***

Personally, I am both interested in and convinced by Mr. Mattheeff's argument. I shall not be a bit surprised, however, if some Scottish correspondent suggests that the "Kirk" really *was* a kirk, with manse and all complete, in some dim period of history, and that by rights Kirk-Klisse should belong to Bonnie Scotland. But for the purposes of that argument, it would be far better if "Losengrad" could be translated as, say, "Highland Dew," or something with a more Scottish flavour than Grape-vine-town; for, though Scots, I understand, do not taboo wine entirely, they much prefer something with a bit more bite in it.

Corsair.

## CHESS.

Good progress has been made with the London League competition, in which the Metropolitan Club now stands first with five clear wins.

The following game was played last week in the City of London Championship:—

SICILIAN DEFENCE.

| White. | Black. | White. | Black. |
|---|---|---|---|
| 1 P—K4 | P—K3 | 20 KR—K | Kt—R4 |
| 2 P—QB4 (1) | P—QB4 (2) | 21 R—Q4 | QR—Kt |
| 3 Kt—KB3 | P—KKt3 (3) | 22 KR—Q | KR—Q |
| 4 P—Q4 | P x P | 23 K—B2 (9) | B—Kt2 |
| 5 Kt x P | Kt—QB3 | 24 B x B | Kt x B |
| 6 Kt—B3 | B—Kt2 | 25 Kt x P (10) | K x Kt |
| 7 Kt—Kt5 | Kt—K2 (4) | 26 R x P (ch) | R x R |
| 8 Kt—Q6 (ch) | K—B | 27 R x R (ch) | K—Kt |
| 9 B—K2 (5) | Kt—Q5 | 28 R—K7 | Kt—B4 |
| 10 B—K3 | Kt (K2)—B3 | 29 R x RP | R—KB |
| 11 P—KB4 (6) | Q—Kt3 | 30 P—Kt3 | P—KKt4 |
| 12 Q—Q2 (7) | Kt—B7 (ch) | 31 P—RQ4 | P x P |
| 13 Q x Kt | Q x B | 32 P x P | R x P |
| 14 Q—Q2 | B x Kt | 33 P—R5 | P x P |
| 15 Q x B | Q x Q | 34 R x P | R x P |
| 16 P x Q | P—Kt3 | 35 R—R8 (ch) | K—Kt2 |
| 17 P—K5 | K—K2 | 36 R—QB8 | K—Kt3 |
| 18 O—O | B—R3 | 37 R—B7 | P—R3 |
| 19 B—B3 (8) | QR—K | 38 Resigns (11) | |

(1) An attempt to avoid the orthodox variations of the French. The move is not particularly good, but at the same time it does not create any definite weakness.

(2) Turning the game into a Sicilian defence. The usual move is P—Q4, followed by 3 P x P, P x P, 4 P x P, Q x P, 5 Kt—QB3, and White has gained a move at the expense of an isolated pawn.

(3) The King's Fianchetto development is at present the fashionable way of treating the Sicilian.

(4) Except by B—K4 Black could not avoid moving his K.

(5) It is very doubtful whether this was the best move at White's disposal. Possibly B—K3 at once would have been better.

(6) A most dangerous manœuvre; still it happened to turn out well.

(7) The only way to avoid loss.

(8) Very effectively defending the P at B4, and absolutely cramping Black.

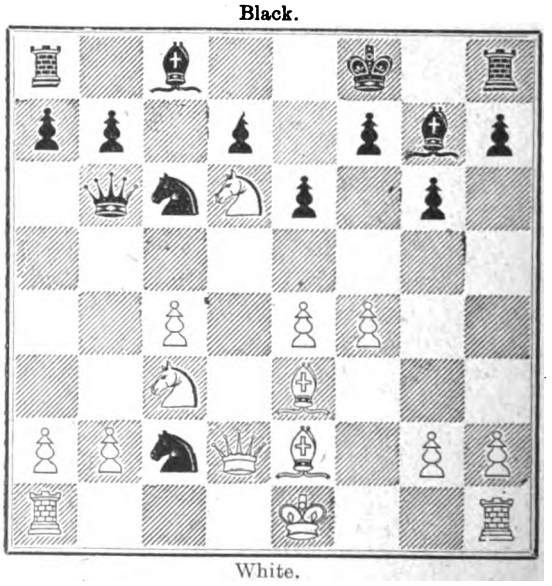
(9) As the game stands Black is lost. All White has to do is to wait to win, but that is just where he failed, and in trying to force the game lost.

(10) Ingenious, but it just fails.

(11) There was still much play left, but the end was inevitable.

Position after Black's 12th move—Kt-B7(ch).

Black.



White.

Caro-Kann.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***Trade with Greece.***

From the business point of view recent developments in Greece could scarcely be more unsatisfactory. So long as a state of uncertainty prevails the progress of industry and commerce must be handicapped, and the rapid depreciation of the Greek exchange simply illustrates the repercussion on the Greek market position of the trend of events. As long as matters remain in an unsettled state trade is bound to be at a standstill. It is not in the interests of Greece any more than it is in the interests of the Allies, and in particular of Great Britain, whose commercial relations with Greece have shown signs of developing on a most promising scale, that there should be a continuance of unstable conditions. Stability is an essential for Greece at this period of reconstruction as it is for the rest of the world, and it may be hoped that a *modus vivendi* will be arrived at which will enable this end to be achieved.

***The Kantara Bridge Decision.***

After all, it would seem that the Kantara Bridge is to go. The proposal is to replace it by a train ferry, a change which can only be regarded as most regrettable, for, however efficient the service, it cannot be held to compensate for the lack of direct communication. The importance of the bridge is that it has enabled the linking up of the Palestine and Egyptian railway system by the desert railway constructed by the British Army during the war. In giving consent to its erection the Canal Company made the stipulation that it should be removed after the war, if they so desired. No one will wish to maintain that the company is not fully within its rights in demanding the fulfilment of this undertaking, and the authorities had obviously no alternative but to carry out their pledge, but one is at a loss to understand the motive of the company in desiring the removal of the bridge. It is only a swing bridge, and as such could not interfere with the traffic. Why, then, should objection be taken to it?

***A Temporary Expedient?***

It is difficult to regard the train ferry service as a permanent arrangement, and sooner or later it would seem certain that through communication will have to be re-established. As a temporary substitute a train ferry may be all very well, but it has serious disadvantages, for however excellent its organisation it is bound to entail a considerable waste of time, while the amount of rolling-stock that can be utilised must necessarily be limited. The importance of the latter factor will be realised when the constantly increasing commercial intercourse between Egypt and Palestine is borne in mind. Palestine draws most of its supplies through Egypt, and also exports most of its produce the same way. When the harbours of Palestine are developed the position will, of course, be different, though the attraction of trade to the coastal exits will not in any way diminish the necessity for adequate railway facilities, and the requirements now and in the future cannot be met by the arrangement contemplated.

***Mesopotamian Oil Rights.***

Sir Charles Greenway devoted considerable attention in his speech at the general meeting of the Anglo-Persian Oil Company to the position taken up by the United States with regard to the Mesopotamian oilfields. He pointed out that it is a well-known doctrine of State succession that the Power which inherits alien territory must recognise previously acquired rights of private owners. "The Standard Oil Company, before the war," he continued, "claim to have acquired certain oil rights in Palestine, which may, for all anyone knows to-day, be just as valuable as the Mesopotamian oil rights. Similarly, we and other nationals, before the war, acquired rights in Mesopotamia and in other parts of the former Turkish Empire. All of these rights will necessarily have to be recognised, to the extent of the non-enemy interests in them, by the Administration, Arab or whatever else it may be, which eventually undertakes the Government of the mandated territories, unless, of course, the principles of Bolshevism are to be adopted in dealing with them."

***No "Closed Door" to U.S.***

Sir Charles emphasised the point that there is no question of the "closed door" to America, but quite the contrary. As he very justly pointed out, if the Standard Oil Company's rights in Palestine are to be recognised—and there is no indication that the company has any desire to abandon them—our rights and the rights of nationals other than enemy in the late Turkish Empire must equally be recognised. "To act otherwise," he went on, "would be to adopt the policy of the 'closed door' in favour of America and against British and other national interests. This object is, no doubt, the one that the supporters of the agitation have in view in the strong opposition which they have, in this and other directions, set up against the attempts of this country to make itself less dependent upon foreign controlled concerns for its supplies of oil. But it is difficult to believe that the monopolistic aims which are at the back of this opposition can receive support from the American nation as a whole, or that their aim should for a moment be allowed to disturb the friendly relations between the two countries." Sir Charles added that he had received an assurance from the head of the Standard Oil Company that he would make it his first duty on arrival in America to endeavour to clear up the misunderstanding that existed on the subject between the two countries.

***Foreign Samples Exhibition.***

The Foreign Samples Exhibition at 16, Old Bailey, affords a most commendable instance of the efforts that are being made by the authorities to assist the home manufacturer. The exhibits include samples from over twenty countries, and the undertaking should prove of the utmost value to the British trader, who will be enabled to see at a glance the kind of goods being produced by his competitors. I was not specially struck by the quality of the goods as a whole, and as a matter of fact many of the best samples emanated from British possessions, a pleasing and at the same time a consoling fact, for if we have to yield pride of place in some markets in the future, we may at least have the satisfaction of knowing that the trade is left "in the family," so to speak. The German productions on view were almost uniformly of indifferent quality, and an inspection of the weird and wonderful collection of Teutonic toys—notable among them being a monstrous dachshund—made one wonder however it was that our ex-enemy was so successful in this line before the war.

***Roumania's Agricultural Position.***

If the official statistics of the autumn sowings in Roumania, given this week by our Bucharest correspondent, disclose a rather more favourable position than might have been expected in view of the depressing report received recently, they show at the same time that there is a very great leeway to be made up before the country's crops are up to the normal level. The one satisfactory feature of the return is the extension in the area under wheat in the Old Kingdom, the figures being 250,000 hectares as against 190,000 hectares in a normal year. The other estimates for the Old Kingdom and Bessarabia make a very poor showing. Unfortunately, the prospect of any material improvement in the estimates when the final statistics are issued in January must be largely discounted, as during November the ground was frozen, and there were, consequently, no sowings

# Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## GREECE.

ATHENS, December 4.

**Customs Tariff for Thrace.**

At the proposal of the Minister of Finance the Council of Ministers have decided to apply the same Customs tariff in Thrace as that in force in the remainder of Greece, with effect from November 25 (O.S.). The importation into Thrace from Greece will be authorised of all goods except beer, spirits, tobacco, cigarettes, explosive materials, and flour.

**New Notes to be Destroyed?**

The Ministry of Finance has decided not to put into circulation the new five-drachmæ notes ordered recently in London, owing to the fact that these were issued without the authority of the International Commission of Financial Control being previously obtained. The notes, which represent a sum of twenty million drachmæ, will be destroyed if the Financial Commission definitely refuses to grant the necessary authority.

**Customs Receipts.**

The receipts of the Piræus Customs during the second ten days of November (O.S.) amounted to 2,159,003.80 drachmæ in paper and 132,711 drachmæ in gold. Compared with the receipts during the corresponding period last year there is an increase this year of 595,915.55 drachmæ in paper and a decrease of 33,764.60 drachmæ in gold.

**The Governor of the National Bank.**

In spite of various rumours to the contrary, M. Zaimis, the Governor of the National Bank of Greece, has apparently no intention of resigning his post. The board meeting, which will be held in the middle of December (O.S.), will decide whether the election of a new Governor is necessary. In accordance with the law the Government reserves the right to cancel the election of any Governor not meeting with its approval, in which case a new election would have to be held.

## ROUMANIA.

BUCHAREST, December 5.

**The Autumn Sowings.**

According to the estimates of the Statistics Department of the Ministry of Agriculture, the sowings up to the end of October in the Old Kingdom and Bessarabia were as follows (the figures representing hectares):—Old Kingdom: wheat, 250,000; rye, 8,000; rapeseed, 6,500. Bessarabia: wheat, 150,000; rye, 49,000; barley, 1,700; rapeseed, 155. In normal years the average sowings in the Old Kingdom were: wheat 190,000, and rye 80,000. The sowings in Bessarabia in 1919 were: wheat, 360,000, and rye 130,000. During November no sowings could be made, as the ground was frozen. At the end of January a new estimate of the area under cultivation will be issued by the Statistics Department.

The Ministry of Industry has now decided to permit the export of maize, barley, and oats free of all restrictions with the exception of the duty tax.

**New Oil Company.**

A very important oil transaction was carried out a few days ago in Paris and London. The well-known oilfields belonging to the family of George Cantacuzino have been conceded to an Anglo-French company called "Pen." These oilfields were first given to the Roumanian company "Sospiro," the shares of which are almost entirely held by the Cantacuzino family. Now the company will increase its capital by ceding to the "Pen" company an important part of the "Sospiro" shares. It is understood that a part of these shares will be open for subscription to the Roumanian public.

**Miscellaneous.**

The Ministry of Reconstruction has contracted with an Italian firm for 500,000 kilos of sole leather of the first quality at 45 Italian lire per kilo, including duty, delivered at a Roumanian port, against Treasury Bonds payable in two years at 6 per cent. per annum.

According to the *Monitorul Official* of December 2, the Ministry of Communications has been authorised to sign a contract with several German locomotive firms for the repair of 300 locomotives. For this purpose, a credit of about 900 million lei has been opened.

The Ministers Council has approved of the negotiations which have been made between the Minister of War and a French Military Mission for the export of large quantities of petrol and lamp oil in exchange for aeroplanes and general material.

**A French Loan.**

M. Titulescu, the Minister of Finance, has succeeded in obtaining in Paris a loan of 200 million francs, which will be used to pay the coupons of the public debt, overdue for four years. It is reported that the French Government gave great assistance in the arranging of the loan.

## CYPRUS.

NICOSIA, December 6.

**Vine Disease.**

Active steps are being taken to deal with the vine disease (*Peronospora viticola*) which has appeared in the Papho district. A number of areas have been gazetted as infected. In these all vine owners are ordered to strip and burn all leaves between November and December 20. In February and March all vines must be pruned and branches burned. In the spring they must be sprayed with Bordeaux mixture, as may be directed by the Director of Agriculture.

**The Weather.**

Weather conditions are unfavourable. There has been severe cold with snow in the hills, but no rain. This is badly wanted, and there is considerable anxiety regarding crops, especially in the west of the island. The want of pasturage is telling upon flocks, particularly of sheep.

## CANCELLATION OF INDIAN ORDERS.

A widely attended meeting of firms interested in the Indian export trade was held at the London Chamber of Commerce on December 17 to discuss the cancellation of orders by Indian buyers.

A resolution was passed inviting the East Indian section of the Chamber to confer with a committee drawn from the meeting, with the object of ascertaining whether concerted action against Indian merchants cancelling or repudiating shipments against their contracts was possible.

Attention was also drawn to a circular of the Bombay Port Trust intimating that it was their intention to sell by auction goods that had remained more than two months in the Port warehouses. A small deputation was appointed to wait upon the Indian exchange banks to point out to them the disastrous results of such action, and to urge their co-operation.

Tribute was paid to the manner in which English manufacturers had often, at considerable loss to themselves cancelled orders, and so assisted the merchants to meet the difficulty caused by the heavy fall in exchange and consequent wholesale repudiation of drafts against shipments of goods to India.

The Banca Natiunei, of Roumania, has elected Major A. W. Barratt to a seat on the board of directors. Major Barratt served in Roumania during part of the war, and was Military Attaché at Jassy during 1917 and 1918; after the Armistice he served on a military mission at Bucharest. The Banca Natiunei, of which Prince Ghika is chairman, has just augmented its capital to 100,000,000 lei and the reserves stand at 71,800,000 lei.

A company has been established at Agram for the establishment of air services between that town, Belgrade, Budapest, and Vienna.

# THE COTTON CRISIS IN EGYPT.

## A Serious Position.

(From Our Own Correspondent.)

Cairo, November 30.

During the past week or so the economic situation has become somewhat critical, and is having a disastrous effect on commerce. Cotton has been steadily falling throughout the year and to-day its price is half what it was at the beginning of the month. This naturally affects every element of the population, for in Egypt cotton is the controlling factor. The people suffering most are, of course, the agricultural classes who constitute the majority, and many who passed as wealthy cultivators a few weeks ago are to-day hard put to it for ready money. The trouble is that the demand from abroad is exceedingly slack, and that there are for all practical purposes no buyers in the interior, while the situation has been aggravated by the action of certain banks who have thrown substantial lots of cotton on to the market in order to cover themselves for their advances.

That there is certainly something abnormal in the local cotton situation is clearly indicated by the difference, even after allowing generously for freight and other shipping expenses, between spot prices in Alexandria and those in Liverpool. The situation is serious for the small cultivators, and in some instances even for the large landowners, none of whom can sell their crops, while the landlords are unable to obtain their rents from their tenants, who, agreeing to rentals fixed when the price of cotton was nearly three times the present figure, can certainly not pay what they owe in this respect.

Money is therefore tight, and is growing daily more so in every direction, and the country is faced with a crisis which might quite conceivably become serious. In view of the possible bad effect on the people and in order to counteract the political propaganda which interested parties are undoubtedly making, the Government has issued a communiqué explaining to the people that the present fall in the price of cotton is due to external economic causes, and calling upon landlords to be lenient with their tenants. At the same time, a strong Commission has been appointed to study the effect of the fall in cotton prices on the country, and to consider what measures of assistance can be rendered to the small cultivators and tenants who are undoubtedly sorely pressed and are likely to be more so in the near future.

There is, it is true, no doubt that as a result of the high prices obtained during the past year or so, the fellahin as a whole are relatively much better off than they have been for some time. Many of them have invested their profits in land—of this the land registration figures afford eloquent proof—and it is to be foreseen that the mortgage companies will become active again, but the depreciation has been so enormous and the cost of living and of cultivation remain so high that the larger portion of the rural population is bound to suffer severely.

It is, indeed, the fact that the fall in cotton has not been accompanied by a drop in the cost of living, which still remains very high. That makes the outlook so serious, and there is no knowing what the ultimate effect may be on the agricultural labour classes unless something occurs to relieve the situation.

Various schemes have been ventilated in the Press, such as limiting by law the cotton area in 1921, as was done in 1915, forming a syndicate to buy up cotton and hold it until a definite price has been reached, fixing a minimum price just as a maximum price was fixed in 1918, the purchase of cotton by the Government as in 1914, etc., and it is understood that these propositions are all being carefully studied by the Government and outside people interested in the economic situation; but something will have to be done without delay to prevent panic and to allay the anxiety and restlessness which are becoming daily more apparent amongst the agricultural classes.

The difficult position in which the agricultural masses now find themselves has naturally had its effect on commerce, and the drop in cotton prices coming on the top of over-speculation on the part of importers has considerably aggravated the situation. In cotton goods there is a slump, and, according to reliable estimates, it will take over a year for the country to absorb existing stocks. But in other directions also business is bad, and the tightness in the local money market is getting very intense. The banks are naturally, in the circumstances, extremely reluctant to grant advances or to renew credits, and importers, who, owing to the general tendency to retrench and economise, are finding it difficult to place their goods and obtain funds to meet their commitments, are being forced to realise their share holdings, with the result that even the best securities are far below their proper value.

We are undoubtedly in for a bad time, but I do not consider that an ultra pessimistic view of the situation and its consequences is warranted.

# EGYPT'S FINANCES IN 1919-20.

## Another Huge Surplus.

(From Our Own Correspondent.)

Cairo, December 1.

At its last sitting the Council of Ministers approved of the final account for the financial year 1919-1920. Revenue amounted to £E33,677,401 and expenditure to £E28,991,934, leaving a surplus of £E4,685,467. The Budget, it may be pointed out, was fixed at £E28,850,000, with a draft of £E1,550,000 on the reserve to balance the account, so that revenue has exceeded the estimates by £E6,377,401, and, although during the year supplementary credits of £E3,185,779 were approved, expenditure is only £E141,934 more than the original estimate.

The increase in revenue affects practically every head, and the following table indicates the expansion which has taken place since 1915:—

| | 1919-20 £E. | 1918-19 £E. | 1915-16 £E. |
|---|---|---|---|
| Direct Taxes | 5,624,260 | 5,612,291 | 5,594,314 |
| Customs | 6,627,536 | 4,189,168 | 1,839,270 |
| Tobacco dues | 3,327,325 | 2,156,523 | 1,990,868 |
| Excise | 499,979 | 580,398 | — |
| Port and Light dues | 179,185 | 91,428 | 150,175 |
| Fisheries | 71,316 | 58,422 | 34,214 |
| Stamp Duty | 76,102 | 51,234 | 40,130 |
| Assay dues | 37,130 | 31,720 | 3,502 |
| Mixed Courts | 1,412,618 | 1,056,809 | 747,037 |
| Native Courts | 509,196 | 430,922 | 427,876 |
| Mehkemehs and Courts of Wards | 145,132 | 119,208 | 62,618 |
| Railways | 7,135,030 | 6,991,105 | 3,724,348 |
| Telegraphs | 303,353 | 237,726 | 167,921 |
| Telephones | 196,098 | 251,005 | — |
| Post Office | 437,424 | 402,831 | 300,761 |
| State Domains | 1,272,955 | 989,288 | 810,848 |
| Military Exemption Fees | 476,580 | 191,340 | 86,210 |
| Ghafir cess | 1,048,656 | 833,634 | — |
| Pension contributions | 175 776 | 143,808 | 137,416 |
| Interest on Funds | 2,428,476 | 1,616,551 | 390,756 |
| Miscellaneous receipts and dues | 968,376 | 881,874 | 1,028,900 |
| Extraordinary receipts | 924,898 | 744,004 | 222,224 |
| Total | 33,677,401 | 27,661,289 | 17,759,418 |

From the above it can be seen that in the five years the revenue has almost doubled, and that, compared with last year, there is an increase of over £E6,000,000.

The increases in customs and tobacco dues are due, in the former case, to the rise in value of commodities and, in the latter, to the increase in the tariff. The expansion in Mixed Courts fees is the result of the greater activity in land sales owing to the profits made from the 1919 cotton crop. The same applies to the improvement in the military exemption fees and extraordinary receipts, of the latter of which over 90 per cent. represents proceeds of the sale of Government land.

On the expenditure side, the chief items have been Civil List, £E499,500; Survey Department, £E328,515; Education, £E628,689; Ministry of the Interior, £E637,932; Public Health, £E621,535; Prisons, £E310,530; Mixed Courts, £E317,168, Native Courts, £E519,183; Irrigation, £E1,655,909; State buildings, £E279,680; Cairo Municipal Department, £E309,032; Railways, £E5,516.354; Ghafirs, £E1,148,070; Police, £E711,338; Provincial Administrative Service, £E597,605; Egyptian Army, £E1,675,919; Pensions, £E779,406, Public Debt, £E4,594,917; War gratuities, £E2,546.750; extraordinary expenditure in connection with the war, £E508,260; purchase and distribution of articles of prime necessity, £E404,499 Practically every one of these headings shows an advance on the figures for 1918, the most notable increases being under Railways, £E1,783,619; and War Gratuities, £1,312,292.

The fact that the year's expenditure is £E3,043.845 less than the total budgetary credit is due to the difficulty in obtaining material, etc., and the economy is therefore merely a temporary one. The surplus realised on the financial year of £E4.596.994 has been transferred to the general reserve, which, as a result, stood on April 1, 1920, at £E15,576,832.

The position as regards the finances of the Government is, therefore, very satisfactory, but it must not be forgotten that there is an enormous amount of headway to be made up in the matter of maintenance and repair work neglected during the war, and that the country is faced with the prospect of considerable capital expenditure rendered necessary by the constant increase in the population and the consequent necessity for developing the productive resources of the country.

The reserve, as it now stands, is, of course, a guarantee in this respect, but the financial and economic situation has latterly undergone a very serious development, and, owing to the very marked fall in the price of cotton, it is quite possible that the Government may experience some difficulty in collecting the land tax and that other sources of revenue, such as customs, railways, land registration fees, and those directly dependent on the cotton position, will show a marked falling off, a falling off which apparent in the current financial year will very probably be more noticeable in the succeeding one.

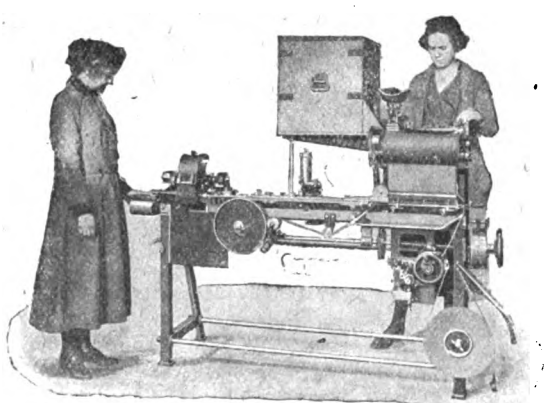
# "STANDARD" TOBACCO MACHINERY

Is exactly what its name implies—the unequalled standard of efficiency and faultlessness in Automatic Mechanical Equipment for every process in the manufacture of Tobacco

*From Plantation to Finished Product.*

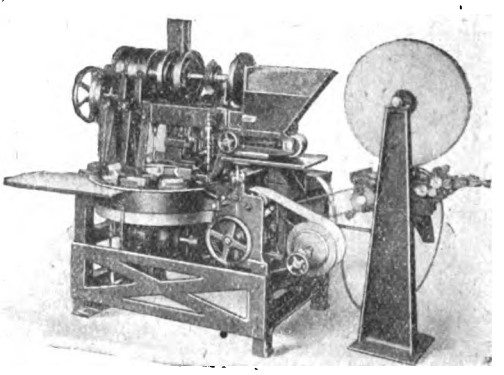
A.M.&F.Co

There are numerous progressive manufacturers who have found the adoption of "STANDARD" Machines reflected in a considerably improved balance sheet. What it has done for them it will do equally for *you*. This claim we are anxious to *prove* to you. Will you afford us the opportunity?



**THE "STANDARD-JUNIOR" CIGARETTE MACHINE.**

The ideal model for small manufacturers. Extensively used as an auxiliary machine in large factories.



**"STANDARD" CIGARETTE PACKING MACHINES.**

Cigarettes automatically wrapped in paper or tinfoil (or both) and packed in either paper "cups" or "shell and slide" packets.

*WRITE FOR ILLUSTRATED LISTS.*

## ENGINEERING.

### The Sunbeam Car.

I have just had an opportunity of examining as closely as I wished the two-standard Sunbeam chassis, and so far as I could see the general lay-out does not differ materially from that of the past season's models. Here and there I noticed minor improvements, but there has been no attempt to break away, for 1921, from the general lines of the chassis which did so well in 1920.

Personally speaking, I like the Sunbeam car as much as any on the market; I like the engine, the design of the chassis; everything, in short, connected with the car. I like it because first of all I am an engineer, and always admire a sound engineering job; secondly, as a motorist, I appreciate road comfort. Both the 16 and 24 h.p. Sunbeams are thoroughly good propositions, likely to give satisfaction to every user.

To take the 16 h.p. chassis first, the power unit consists of a four-cylinder monobloc engine having cylinders 80 by 150 millimetres bore and stroke, the water jacketing allowing for a specially large water circulation space.

Cast iron pistons are retained, it having been amply demonstrated that these are most generally satisfactory. The hollow crankshaft of ample diameter carried on five diecast white metal bearings, drives the camshaft direct through a silent chain. The valves are situated all on the near side of the cylinders, to which they are slightly inclined, and the whole of the valve mechanism is completely enclosed and extremely silent in operation. The engine has a very substantial aluminium crankcase, which is attached directly to the main frame.

Lubrication of the crankshaft bearings and of the big ends of the connecting-rods is of the forced type, being by means of a gear pump, which circulates the lubricating oil through the hollow crankshaft. For the camshaft bearings and various other parts splash lubrication has been found to be ample, and, so far as the forced portions of the lubrication is concerned, excess of oil pressure is guarded against by the fitting of an oil relief valve, designed to blow off at 12 lb. per square inch.

I was interested to note that the Sunbeam Co., like so many of our leading firms, have adopted the Autovac system of petrol feed, the fuel tank being fitted at the rear of the frame. I note also that the firm stick to the Claudel Hobson carburettor, which has proved so satisfactory in the past. The inlet pipe is water-jacketed, and the magneto and the centrifugal water pump are driven by a transverse shaft and skew gear. Incidentally, the magneto is situated on the "off" side of the engine, and the water pump on the opposite side.

I noticed that in the 1921 models the position of the starting motor is altered from the near to the off side, where it is fitted on a bracket attached to the crankcase at the side of the steering column instead of being attached to the frame, as in the 1920 models.

The clutch and gear-box are of the familiar Sunbeam pattern, the drive being taken to the rear axle by an open propeller shaft, both torque and drive being taken by the rear springs. All brakes are of the internal expanding type, the footbrake operating a drum at the rear of the gear-box, and the handbrake acting on the rear wheels. The springs, which are of very ample dimensions, are designed to be flat under normal load. The front springs are offset, and those at the rear underslung.

The frame has been considerably strengthened, and the rear wheel track has been widened to 4 ft. 9 in. The steering of the worm and sector type and the other controls are extremely easy in operation, the former in particular being very light and sensitive. The R.A.C. rating of this chassis is 15.9 h.p. The weight of the chassis is 18 cwt., and the length of the wheel base 10 ft. 4 in.

The 24 h.p. chassis is modelled on very similar lines, and with few exceptions the details are as described. The engine is of the 6-cylinder monobloc pattern, with a similar bore and stroke to that of the 16 h.p. engine, and the valves and reciprocating parts are practically identical with those of the similar model. The crankcase is mounted upon a subframe suspended at three points from the main frame. The drive to the magneto and the water pump are separate in this case, the former being by silent chain from the crankshaft and the latter by a similar chain from the camshaft. The magneto coupling in both models has a vernier adjusting flange, permitting extremely fine adjustments of the timing being made. An interesting feature of this model is the positive drive to the dynamo for the water pump spindle by means of a shaft through front and rear universal couplings.

### Aero Dynamics.

Rene Devillers' new book on the "Dynamics of the Aeroplane" is a striking and valuable contribution to the literature on the subject, and forms a fitting successor to his previous work on automobile and aeroplane engines. The circulation of this new book was prohibited during the war, but now that copies are available, Messrs. E. and F. N. Spon, the publishers, will probably be inundated by orders for copies. Every essential has been dealt with carefully and completely, and all current formulæ have been reduced to nomographic form, this being the first book in English in which this has been adopted. The book is to be recommended to all interested in aero-technics.

### Scottish Water Power.

An interesting reference was made a few days ago by Dr. T. Blackwood Murray to the possibility of utilising the vast amount of water-power which exists in the Scotch Highlands. Most of my engineering readers are aware that a very large works of the kind is, and has for some years been, in operation at Kinlochleven; but few probably are aware that this undertaking develops 40,000 h.p. continuously, day and night. A very different kind of undertaking, from the point of view of efficiency, from that foreshadowed in the gigantic but half-baked Severn barrage scheme, in which high expense and low efficiency seem the most outstanding features. With regard to Scotland, the total number of Board of Trade units generated by the steam power stations of Scotland for the year 1917-18 amounted to 537 millions, or less than half the possible output of the nine schemes suggested some little time ago by the Board of Trade Water-Power Resources Committee. It will be remembered that the Committee estimated that the average capital cost of their scheme would be £38 10s. per electrical horse-power developed, and that, even were the capital outlay as high as £60 per electrical horse-power, it would still be on an equality with a steam station working on coal costing 10s. per ton. With the present price of coal Dr. Murray estimated that the price of coal might be taken at £2 per ton delivered at the station, and at this price one electrical horse-power year would cost £10, so that in four years the fuel charges alone of the steam station would equal, and more than equal, the capital cost of the proposed water-power scheme. The depreciation allowance on water-power plant is extremely low, and it would seem unwise to delay pushing forward with these well-thought-out and important schemes which would not only effect such a saving in fuel, but result in an ample supply of cheap electrical power.

### Cold-working.

It would appear obvious that were it possible to cold-roll metal to any required degree the effect would be to increase its density, to make its particles more compact, and to increase its specific gravity. Indeed, the greater hardness of cold-worked metal is generally attributed to this increased compactness. Recently it was found that the density of mild steel is diminished if it be subjected to compressive stress which leads to distortion; it has also been shown that the density of steel and of platinum, when in wire form, was reduced by cold rolling, and it has been proved beyond all shadow of doubt that the density of cold-rolled wrought iron bars is less than that of the original metal, the reduction in diameter being more than compensated for by the increased length. This peculiarity is not readily noticeable as the first result of pressure is to close up all surface cracks, pores or imperfections, with the result that the bars appear to have actually gained in density. Hence, bars are usually more dense than the ingots from which they have been rolled, but the subsequent effect of cold working is slightly, but appreciably, to diminish the relative density of the worked material.

Textile mills in Yugoslavia have been working only 20 to 30 per cent. of their full capacity, owing to lack of fuel and raw cotton.

## GENERAL BANK OF GREECE.

*Paid-up Capital, Drs. 3,000,000.*

**Head Office - ATHENS.**

BANKING OPERATIONS:
Every description of Banking business transacted.

FINANCIAL OPERATIONS:
Investigations in connection with, and the promotion, organisation and financing of, Limited Joint Stock Companies, with a view to exploiting agricultural, industrial and mineral resources, executing technical works, etc.

COMMERCIAL AND SHIPPING DEPARTMENT:
Purchase and sale of goods on account of clients. Warehousing, Advertising and placing foreign products on the market. Agents for foreign companies and large commercial and industrial firms abroad. General Shipping Agents.

## POPULAR BANK OF GREECE.

**Head Office, ATHENS. Branch, PIRÆUS.**

Correspondents throughout Greece.

Established June, 1905, by the National Bank of Greece and a group of Capitalists.

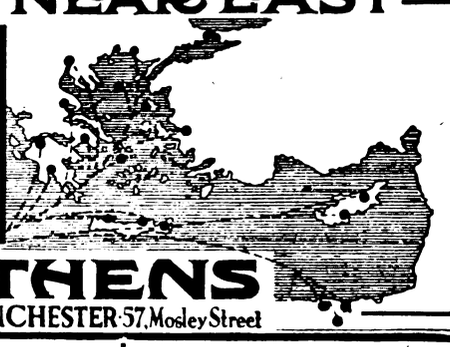
**CAPITAL - Drs. 1,500,000.**
**RESERVE FUND - Drs. 2,500,000.**
**Deposits and Credit Accounts. Drs. 100,000,000.**

The Bank specialises in the collection of Bills payable in Greece; it accepts goods on consignment, and undertakes their sale, and transacts every kind of Banking business.

*General Manager:* D. LOVERDO.

## TRADE WITH THE NEAR EAST

WITH its offices in all the principal towns in **Greece**, in **Egypt, Cyprus, Crete, Constantinople**, and in **Smyrna, the Bank extends exceptional Facilities for Export and Import Trade between Great Britain and the Near East generally**, and invites enquiries and correspondence relating thereto.



HEAD OFFICE: ATHENS.

## BANK OF ATHENS

LONDON: 22, Fenchurch Street E.C.3. MANCHESTER: 57, Mosley Street

## COMMERCIAL BANK OF GREECE, LIMITED.

**CAPITAL PAID-UP - Drs. 15,000,000.**
**RESERVE FUNDS Drs. 5,250,205.45.**

**Head Office: ATHENS.**

*Branches:*—**Piræus, Salonika, Patras, Volo, Syra, Calamata, Corfu, Cephalonia, Candia, Chios, Argos, Pyrgos, Vostizza (Ægion), Nauplia. Larissa.**

AGENTS IN ALL PARTS OF GREECE, THE LEVANT, AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT:
The Bank undertakes the warehousing and sale of goods consigned.

## GREECE.

Area 43,522 square miles. The cultivated area amounted to 5,746,300 acres, of which about 2,253,400 were under cereals, 518,900 under grapes and currants, 370,600 under oak trees, 296,500 under olives, and 2,223,900 were forests.

Population (1914), 5,000,000 approximately.

Chief Products (with average annual production):—Currants, 142,000 tons; wines, 3,000,000 casks; tobacco, 9,000,000 lb.; cereals, 8,000,000 bushels; olive oil, 200,000 casks.

The **MINERALS** of Greece include:—Iron, Marble, Magnesite, Emery, Lead, Lignite.

**IMPORTS** (1914), Old Greece only:—Total value £7,000,000, of which £2,000,000 from the United Kingdom; £1,800,000 from Germany and Austria Hungary; £1,000,000 from Russia.

**EXPORTS** (1914), Old Greece only:—Total value £4,000,000, of which £3,000,000 came to the United Kingdom.

**COINAGE.**—The unit is the Drachmæ, equivalent to a Franc (10d.). The current rate of exchange is about 48 Drachmæ to £1.

**FREIGHT.**—From England, 160/- + 10% primage.

**WEIGHTS AND MEASURES.**—It was decided in 1898 to introduce the metric system. The change is to be gradual from the old system, which is:—Oke = 2·82 lb., stater = 123·20 lb., livre (Venetian) = 1·05 lb., baril (wine) = 16·33 imperial gallons, kilo = 0·114 imperial quarter, pike = ⅔ of a yard, stremma = ·242 of an acre.

## BANK OF NATIONAL ECONOMY (of Greece)

Head Office: ATHENS.

*Branches:*

PIRÆUS, SYRA. PATRAS.

**Capital Paid Up - Drs. 10,000,000.**

Fully represented in all parts of the world for all kinds of commercial, financial, and shipping business.

*President.* L. EMBIRICOS. *Manager.* D. MIAOULIS.

# OIL NOTES AND NEWS.

## BOLSHEVIST OIL PRODUCTION.

### Failure of the Soviets.

(From a Correspondent.)

The shortage of fuel is one of the most crying evils in Soviet Russia. In towns the inhabitants are literally freezing in their unheated flats. The water-pipes in the houses are damaged, while almost all the town houses in Northern and Central Russia are in need of thorough repairs.

Railway traffic is gradually ceasing. On a journey the engine driver frequently finds no fuel at the station where the supply should be replenished. There have been cases when the sleepers from the adjacent track have had to be taken up for fuel, to enable the train to go on. The stoppage of factories and work has until lately been caused also by the want of fuel.

The forests of Russia have all the time been in the possession of the Bolshevists. The shortage of wood fuel in Petrograd and Moscow could never be explained away by the occupation of some other parts of the country by foreigners or anti-Bolshevists. On the other hand, until 1920, the collieries and oilfields of Russia had either never been in the power of the Bolshevists, or only for a very short time. The principal coalfields of Russia—those of the Donetz basin—lie to the South of Kharkov, extending almost to the Black Sea. This region was in the possession of the Bolshevists only during the first five months of 1919, and even then at intervals. Neither were the Bolshevists able to make use of the two principal oilfields—Grozny and Baku, as the former were hardly ever in their possession, while the latter could be worked by them only until May, 1919. When General Denikin occupied Tsaritsin, the Bolshevists were cut off from Baku.

By the beginning of 1920 the Bolshevists gained possession of all the south (the Crimea being of no economic importance whatever), and by the end of April, 1920, they had seized Baku. Since then all the coalfields and oilfields in European Russia have been in the possession of the Bolshevists, and the shortage of coal and oil in Soviet Russia must be attributed to some other causes.

At the present time it is possible to calculate the total deliveries of oil to Soviet Russia in 1920, i.e., the first year of Bolshevist rule in the oilfields. The richest Russian oilfields are in the Apsheron peninsula, with Baku as a centre. The Baku district produces three-quarters of all the oil in Russia. Thus in 1912 the Baku oilfields produced 465,000,000 poods* of the total output of 565,000,000 poods† for all Russia (of which about 42,000,000 poods were exported, and the remainder was absorbed by the home market).

According to the figures of the Soviet paper *Ekonomicheskaia Zhizn*, the Bolshevists reckoned on being able to obtain 150,000,000 poods of oil in this district from May (when they seized it) to January 1, 1921, but apparently even this "famine" estimate has not been justified. The following table shows the output of oil for the first 3½ months, which is not more than 57 per cent. of the estimated quantity.

| Months. | 1,000 Poods. | Months. | 1,000 Poods. |
|---|---|---|---|
| May ..... | 16,536 | August ..... | 12,163 |
| June ..... | 14,948 | September (15 days).. | 5,367 |
| July ..... | 13,201 | | |

The above table is taken from the *Ekonomicheskaia Zhizn* of October 13 (No. 228, October 13). The same paper likewise states that for the first eight months of 1920 the output averaged 15,500,000 poods per month. In 1919 the average was 19,000,000 poods, and in 1913 37,000,000 poods.

In July, 1920, the depth of wells bored was equal to 238 metres, while in the "unfavourable" year of 1919 (the expression used by the *Ekonomicheskaia Zhizn*) the average was 1,000 metres per month. At the beginning of 1920 there were 1,800 wells in the principal oilfields, in June there were 1,181, and in the end of August 845.

According to the Baku Soviet officials, this decline in production was due to the wholesale exodus of workmen, owing to food shortage. It is rather difficult to understand why food should be scarcer in Baku, under the Bolshevists, than under the Azerbaijan Government. The Bolshevists can bring as much corn as is wanted from the neighbouring Kuban and Terek territories, whereas the Azerbaijan Government was not allowed to import corn from these territories.

The usual method of transporting oil from Baku to Russia is by the Volga waterways. The oil is carried up the Volga as far as Ryninsk. Thus of the 4,500 kilometres over which Baku oil has to travel to Petrograd, only 450 kilometres are railways, the rest being waterways.

The Volga is already frozen over, and navigation was stopped in the middle of October. The railway joining Baku with Central Russia passed through Grozny, so that the transport of Grozny oil will practically hold up the Baku oil freights to Russia for an indefinite period. Thus Central Russia can get no more oil from Baku this year.

*(To be concluded.)*

* 1 pood = 36 lb.

† The figures are taken from Dmitriev's "Economic Geography of Russia."

## LEVANT MARKET REVIEW.

We give some further extracts from the market review of the National Bank of Turkey for October:—

*Grain.*—Not much of interest to chronicle in view of the fact that prices of grain are falling in Europe. In Roumania the price has risen somewhat, but this is principally due, it is said, to "shorts" being forced to cover. The month's arrivals of flour total about 6,000 tons, almost entirely from America, and principally of the following marks: Marlisco, Nelson, and Royal Seal. The market was, on the whole, fairly stable, with very little fluctuation. A few thousand sacks were transhipped from here mostly to Batoum.

Barley has risen to pts. 9¼ c.i.f. Smyrna on purchases for the Greek Intendance. Towards the end of the month considerable supplies from South Russia were unloaded at Sebastopol, and owing to the adverse reports received as to the conditions obtaining in South Russia it is more than probable that very small supplies will be coming down to Constantinople in the near future. Crimea has at the moment supplies sufficient to last about five months. On October 1 the s.s. Asturian sailed for Liverpool with about 3,000 tons of Crimean barley, which was realised eventually at prices ranging from 67s. down to 63s. per quarter. The s.s. Baffin also left Constantinople for the U.K. with about 3,000 tons of Crimean barley, which, after asking 68s., eventually realised 64s. 6d. per quarter. Since this shipments of Crimean barley to the U.K. have become impossible owing to the slump in the home markets to as low as 62s. 6d. per quarter. Strange to state, however, this slump was not felt on the local markets here. On the contrary, barley from the Crimea was firmly held, and whereas at the end of September the price was about 7¼ piastres per oke, it rose during the month of October to as much as 8½ and even 9 piastres per oke, at which price the chief buyers were the Greeks, destination being Smyrna. Arrivals during the month amounted in all to about 5,500 tons, of which none was shipped to the U.K. or Continent for the above reasons. In addition two steamers with about 1,500 tons each passed through from the Crimea to the Algerian coast.

*Sugar.*—About 2,500 tons arrived during September, mostly Java, transhipped from Port Said or New York. Prices have ranged round 80-85 pounds sterling per ton, the latter figure being about the highest touched during the month. As far as stocks held are concerned the market is not very well supplied with good quality sugar—by good is meant dry crystals—stocks are, in fact, small. The trouble which importers have had to contend with is that the general population in and around Constantinople will not take moist sugar, believing it to be sea-damaged; they are not accustomed to it. Many of the orders have been filled with part moist and part crystals. The result is that all new contracts entered into now provide for dry sugar only. The only people who have scored are confectioners and sweetmeat manufacturers, who have been able to pick up the moist, unsaleable elsewhere, down to as low as 70 pounds sterling per ton.

Some 800-1,000 tons were sent up to Roumania, who is still a buyer, and is nowadays going over our heads and buying direct in fairly large parcels. Closing price was 83-84 pounds sterling for dry per ton. For November shipment of Java the price is about 60 pounds sterling, and a fairly strong market.

*Rice.*—The market weakened considerably during the month, and towards the end prices slumped. About 1,000 to 1,500 tons arrived in port, principally from Port Said and Marseilles. Of this some small quantities were sold to Sebastopol and also Bulgaria. The highest price touched was about 28 pts. per oke, duty paid; but with the present exchange difficulties, and owing to the fact that the price in the U.S.A. has been falling considerably, the price on our market fell to 24-24½ pts. at the close of the month for Saigon I. and 24 for blue rose.

As to the future, lower prices are expected; in fact, offers have been received from place of origin at lower figures, and more business will probably ensue, as there is a very fair demand from Roumania. Dealers are fairly well stocked here with Saigon, except of the better qualities.

*Coffee.*—The market here is a very difficult one at the moment. Generally speaking, dealers are full of stock which was principally purchased some time ago at high prices, and they therefore display very little interest in fresh purchases. In consequence of this, any new dealings are of a somewhat speculative nature. Santos superior was dealt in up to 85s. per cwt. c.i.f., closing the month at 81s.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

### Prices Generally Lower.

Dried Fruit.—There is little of interest to report. Business has been very restricted except as regards the better grades of currants, which have been in fair request. Sultanas and figs have been more or less neglected.

Coffee.—A quiet tone has characterised the market. Costa Rica has been done at 115s.—150s., Indian at 118s.—120s., and Mocha at 140s.—170s. The futures market has been weak. Quotations:—December, 48s.; March, 47s. 6d.; July, 48s.; September, 49s.

Sugar.—The position is about the same, the free market remaining steady. West Indian crystallised is again lower at 66s.—71s., but white Mauritius is unchanged at 79s. Home refined continues in good demand at the official rates.

Oilcakes.—Prices are lower in most cases. Linseed cake has been done at 18s., a drop of 2s. Cottonseed cake is 1s. up at 12s.

Oilseeds.—The tone has generally been dull. Indian linseed is 3s. 6d. down at 23s. 6d., while La Plata is weak at 19s. 6d. Rapeseed has been inactive, with Toria 1s. 6d. lower at 22s. 6d., bold Ferozepore 1s. 6d. down at 21s. 6d., and brown Cawnpore at 29s. 6d.

Seed Oils.—Prices have continued to decline. Linseed oil has come to business at 42s., a decline of 3s., while turpentine is 5s. lower at 100s.

## CURRENT PRICES.

*General Produce.*—Bacon, 212s. 9d. cwt.; butter, 336s. cwt.; cheese, 161s. cwt.; chillies, 137s. 6d. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon, good to fine), 122s. 6d. cwt.; coffee (Costa Rica), 113s. 6d. cwt.; East Indian bold, 117s. 6d. cwt.; Mocha (longberry), 135s. cwt.; eggs, 44s. 2d. per 120; ginger (washed Cochin), 50s. cwt.; hams, 220s. cwt.; lard, 167s. 9d. cwt.; nutmegs, 1s. 1d. per 110's to 180's; pepper (Singapore, black), 4d. lb.; and Muntok white, 9½d. lb.; cinnamon (firsts), 1s. 8d. lb.; raisins (Valencia), 152s. 6d. cwt.; sultanas (Smyrna), 146s. cwt.; currants (Vostizza), 97s. cwt.; sugar (granulated), 30s. cwt.; No. 1 cubes, 84s. cwt.; Mauritius (free), 79s. cwt.; tapioca (fair Singapore), 1⅞d. lb.; sago (small pearl), 24s. cwt.; rice (Rangoon No. 2), 25s. 9d. cwt.; bran (Rangoon), £7 ton; tea (Indian), 6½d. lb.; Ceylon, 6⅞d. lb.; Java 4¾d. lb.; wheat (Australian), 113s. qr.; English (white), 87s. 6d. qr.

*Metals.*—Aluminium, £165 ton; bismuth, 12s. 6d. lb.; copper (standard), £79 12s. 6d. ton; electro, wire bars, £90 15s. ton; gold bars, 118s. 7d. oz.; iron (No. 3 Cleveland), 225s. ton; hematite (mixed number), 260s. ton; lead (soft foreign), £26 2s. 6d. ton; manganese Poti, 3s. 0½d. unit; molybdenite, 60s. unit; nickel £217 10s. ton; platinum, 510s. oz.; plumbago, £37 10s. ton; quicksilver, £14 17s. 6d. bottle; silver bars, 3s. 4½d. oz.; spelter (G.O.B.), £31 7s. 6d. ton; tin (standard), £222 10s. ton; tin plates (20 x 14), 36s. box; wolfram, 20s. 6d. unit; zinc sheets, £49 10s. ton.

*Chemicals.*—Acids: Boric, 75s. cwt.; oxalic, 1s. 6½d. lb.; citric, 2s. 11½d. lb.; tartaric, 2s. 3½d. lb.; ammonia (sulphate), £31 11s. 9d. ton; arsenic (white powdered), £74 10s. ton; benzole (standard), 3s. 6½d. gallon; bleaching powder (35 per cent.), £21 10s. ton; borax crystals, 41s. cwt.; cream of tartar, 207s. 6d. cwt.; potassium: bi-chromate, 1s. 3½d. lb.; chlorate, 8½d. lb.; caustic, £80 ton; nitrate, £62 10s. ton; permanganate, 3s. 1½d. lb.; prussiate yellow, 1s. 8½d. lb.; sulphate (90 per cent.), £28 10s. ton; sodium: crystals, 145s. ton; bi-carbonate, £11 15s. ton; bi-chromate, 11½d. lb.; alkali (58 per cent.), £10 15s. ton; chlorate, 5d. lb.; caustic (70 per cent.), £27 ton; hyposulphite, £24 10s. ton; prussiate, 1s. 1½d. lb.; nitrate, £23 7s. 6d. ton; sulphate of copper, £39 10s. ton; sulphate of iron, 150s. ton; glycerine (crude 80 per cent.), £105 ton; industrial (1250 per cent.), £155 ton; lemon oil, 5s. 1½d. lb.; quinine, 3s. 11½d. oz.; red lead, £49 ton; white dry lead, £56 15s. ton; white ground lead, £66 5s. ton.

*Hides and Skins.*—London prices:—Ox and Heifer.—First, 90 lbs. and up, 7⅞d. lb.; 80 to 89 lbs., 7⅞d. lb.; 70 to 79 lbs., 7½d. lb.; 60 to 69 lbs., 7½d. lb.; 59 lbs. and under, 7½d. lb. cows (first), 60 lbs. and up, 7⅜d. lb.; 59 lbs. and under, 7d. lb.: cows (second), 60 lbs. and up, 6¼d. lb.; 59 lbs. and under 5d. lb.; bulls (first), 6¼d. lb.; second, 5⅛d. lb.; kips (first), 7¼d. lb.; (second), 5¾d. lb.; (third), 4¾d. lb. Calcutta prices:—Quotations show no change, and the market is very dull. Arsenic Cow Hides.—Agras, Rs.8.8 to 15.0 per 20 lbs.; Durbhangas, Rs.6.0 to 7.0 per 20 lbs.; Patnas, Rs.5.0 to 6.0 per 20 lbs.; salted cows, Rs.4.0 to 8.8 per 20 lbs.; Arsenic buffalo hides, Rs.2.8 to 6.0 per 20 lbs.; skins—calf, Rs.8.0 to 10.0 per 20 lbs.; goat, 140.0 to 160.0 per 100 pieces.

*Miscellaneous.*—Cotton (American, fully good mid), 12.12d. lb.; linseed (La Plata), £22 2s. 6d.; rape (Toria), £24 ton; soya beans, £18 10s. ton; palm kernels, £30 7s. 6d.; Egyptian cotton, £13 17s. 6d. ton. Oils:—Linseed, £47 ton; soya, £54 10s. ton; cotton (crude), £46 ton; olive, 21s. 6d. gallon; ground nut, £60 ton; palm, £48 15s. ton; rape (crude), £72 10s. ton; petroleum, 2s. 3½d. gallon; turpentine, 105s. cwt. Rubber:—Plantation No. 1 crêpe, 1s. 0¾d. lb.; smoked sheet, 11½d. lb.; fine hard Para, 1s. 2d. lb.

## DRIED FRUIT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows under date December 14:—

Currants.—There has been no relief in the general slackness prevailing; in fact, the dullness has been accentuated by political developments in Greece, and by the severe depreciation of the Greek drachma. Business has been of the smallest possible dimensions, but no serious break in prices is recorded, holders on the whole being content to await the course of events, quietly confident that matters will right themselves in time, as the exportable quantity of fruit remaining in Greece is below the world's requirements. Elgen has arrived with about 500 tons for the market. Quotations are:—Pyrgos, 72s. to 75s.; Amalias, 75s. to 78s.; Patras, 78s. to 82s.; Gulf and Panariti, 82s. to 90s.; Zante, 82s. to 86s.; Vostizza, 90s. to 102s. Total arrivals from commencement of season to date, 15,000 tons.

Valencia Raisins.—Stocks are cleared, and no further shipments are expected before Christmas. Seedless lower at 120s.

Sultanas.—A further drop has occurred in values, and even at the decline sales are difficult to effect. Quotations are:—Smyrna, 130s. to 146s.; Greeks, 138s. to 142s.; Afghans red variety lower at 100s.

Figs.—Belgravian, with a small consignment, is discharging, but buyers appear indifferent, and the only sale reported shows a decline of 30s. per cwt.

## LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson, in their report for the week ended December 16, state:—Conditions governing the turnover in spot and forward cotton remain unchanged, and business has again been of a nominal character. The better demand that has been in evidence centred chiefly round Upper Egyptian, all other growths being neglected. The best quality Uppers are no longer as plentiful as they were a month ago, and prices in this section have hardened slightly; although both spot and futures have been showing distinct signs of steadiness of late, the trade still holds aloof, and advices from Manchester are more pessimistic than ever. We fail to see how any advance can be maintained unless backed by trade support, and the longer this support is withheld the more difficult will become the position of holders in face of the accumulation of cotton from crops which, even in normal times, would weigh heavily on the market. Nevertheless, the big downward movement of prices seems to have run its course for the time being at any rate, and it would not be illogical to expect a temporary reaction. Quotations for Sakellaridis are reduced 200 points, those of Brown 100 points, whilst Uppers are exceptionally raised 50 points. Sales, 750 bales, which includes 20 bales Sudan. Fully good fair Sakel 26.00d.

## OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended December 4:—The sales this week on our market amount to twenty cases, and at to-day's rate of exchange the piastre prices paid are equivalent to 19s. and 20s. per lb. for soft Yerli qualities, and 14s. to 17s. 6d. for manufacturing druggists qualities. The arrivals are 708 cases against 1,180 at same date last year, and our available stock is about 764 cases. The exchange to-day is piastres 498 per £ sterling for cheque, and 0.71 dollars for one Turkish paper £.

Yugoslavia has large reserves of timber of every kind, and especially of oak.

A permanent exhibition of Egyptian trades and industries is to be opened in Cairo on January 3.

OAKEY'S WELLINGTON KNIFE POLISH.
The Original Preparation for polishing Cutlery.
Canisters, 1d., 2d., 3d., 6d., 1s., 2s. 6d., and 4s. each.
SILVERSMITH'S SOAP, for Cleaning and Polishing Silver, Electro Plate, &c. Tablets, 6d.
"WELLINGTON BLACK LEAD" in Solid Blocks, 1d., 2d., and 4d. each, and 1s. Boxes.
Polishing Paste, Furniture Polish, Plate Powder.
Glass Paper, Emery Cloth, Black Lead Packers.
WELLINGTON MILLS, WESTMINSTER BRIDGE ROAD, LONDON, S.E.1.

# COMPANY MEETINGS.

## SUDAN PLANTATIONS SYNDICATE.

### A Satisfactory Year.

### Strong Financial Position.

The thirteenth ordinary general meeting of the Sudan Plantations Syndicate, Limited, was held on December 15 at Winchester House, Old Broad Street, Mr. F. Eckstein (the chairman of the company) presiding.

The Acting-Secretary having read the notice convening the meeting and the report of the auditors,

The Chairman said:—Gentlemen, once more I have the privilege of meeting you and of rendering you an account of our stewardship for the past year. The results of our undertaking have been, as you will have already seen from the published reports, very good indeed, due first and foremost to the amazingly high cotton prices, and, secondly, to exceptionally good crops at our two Gezireh stations. These results have been unusually good, and I feel compelled to ask you not to blame us if we cannot put before you a balance-sheet of equal excellence next year. Prices of cotton have receded very considerably, but against this our production of cotton ought to increase, not during this year, but in the year after. I make a point of mentioning this to prevent disappointment and possible reproaches at our next annual meeting. The profit for the year reaches the sum of £228,759 1s. 1d., against £59,000 in the previous year, and we propose to pay you the usual dividend of 25 per cent., as well as a bonus of 10 per cent. on our now doubled capital. This 35 per cent. will absorb £105,000.

### The Balance-Sheet.

I will now run shortly through the balance-sheet, in which you will find various changes. Our capital on June 30 was £297,790, but it stands to-day at £300,000. Out of the 150,000 shares offered to shareholders at the beginning of the year, 147,890 were taken up by the old shareholders. Of the remaining 2,110 shares we allowed our staff to take up 1,300, while we disposed of the remaining 810 shares in the open market through a well-known broker's firm at prices ranging between 90s. and 95s. From this you will see that the entire issue is disposed of. The Barakat reserve account—we formerly called it the Gezireh reserve account—has been increased from £26,000 to £32,409 16s. 5d., which completes the amortisation to be made under this heading. The share premium account, which figured in last year's balance-sheet at £110,000, has naturally been largely increased through our new issue. Creditors in the Sudan, about £271,000, largely represent our indebtedness to our tenants. Our indebtedness to the Sudan Government of £86,000 has since been paid. A further new item on the debit side of the balance-sheet is a loan account from the Sudan Government of £400,000, of which I gave you full details at our last annual meeting. On the credit side the only part which requires explanation is a new account under general development—viz., Gezireh Areas, about £82,000. All this expenditure has been incurred in connection with the new Hag Abdulla station, to which I will refer later on. The cotton account of £408,000 has been entirely liquidated since we closed our books, and we have received the corresponding sum in cash. Our financial position, as you can see, is very strong, but we shall have, in time to come, to spend large amounts and to make further issues.

### Profit and Loss Account.

Turning to the profit and loss account, our gross profits from all sources amount to £326,000, against £139,000 in the previous year. You will notice that we again ask you to agree to the payment of a well-earned bonus to our staff, and we also propose, subject to your approval, to set apart a sum of £5,000 for a staff provident fund, which I most strongly recommend to your acceptance. I need not tell you again that our staff has to work in a tropical climate, and it is really high time that we should start to make suitable provision for them. I earnestly beg of you, therefore, to allow us to add something every year to this fund. Our staff is necessarily getting larger in view of our greater activities, the growing importance of our work, and our increasing responsibilities. We carry forward, as already mentioned, £228,000. From this you have to deduct £105,000 for dividend, leaving £123,000, which seems a big sum, but unfortunately we have to set aside a very large amount for excess profits duty and corporation tax, so that when that is paid, as well as the directors' percentage, which comes to a modest figure, the real balance carried forward to the new year will be comparatively small. So much concerning last year's figures.

### Satisfactory Crops.

As already mentioned, our cotton crops in the Gezireh were extremely satisfactory. At Tayiba we produced 9,578 kantars, against 7,179 kantars, and at Barakat 10,294 kantars, against 8,079 kantars in the previous year. The Zeidab yield, however, was disappointing—namely, 7,700 kantars, against 8,495 kantars in the year before. On the other hand, the quality of this crop was very fine indeed, and so made up for the lower yield to some extent. For the coming year we have under cotton:—

| | |
|---|---|
| At Zeidab | 3,170 feddans |
| Barakat | 2,075 feddans |
| Tayiba | 1,700 feddans |
| in all | 6,945 feddans |

against 7,066 feddans in the past year. Picking at Zeidab commenced earlier this year than usual, and we have already 3,550 kantars in hand. The total crop should show slightly better results than last year. Concerning Barakat and Tayiba, our managing director informs us that the cotton looks well and healthy, though much later than usual. Under these circumstances we may look forward to a satisfactory return, provided the weather and other climatic conditions continue to be favourable.

### Gezireh Development.

Now a few words regarding our big scheme. We have started levelling on the southern end of the 300,000 feddans area where we are now erecting the new Hag Abdulla pumping station. Therefore the water supply from this station will be at once available and, later on, the first free flow of gravitation water will likewise be available as soon as the Sennar Dam is completed. Notwithstanding a quite unprecedented rise in the Blue Nile in April and May of this year, our managing director, Mr. Alexander MacIntyre, was able to build and complete the foundations of this new pumping station and to erect the walls of this installation to high flood level—a great work done under great difficulties in record time, as we had to battle for the supply of cement and other materials in the short time available.

Two 750 h.p. Diesel engines to drive the plant are delivered and on the ground. The pumps and auxiliary engines, etc., are not yet delivered, but are, I understand, well forward. So, if nothing unforeseen happens, we hope to have a first crop there in 1921-22. In connection with the Sudan Government's progress at the works of the Sennar Dam and Main Canal, I regret to say there has been some unavoidable delay. However, the work is once more in full swing, and we have every hope to see the first gravitation water flowing in 1924, in time for the 1924-25 crop. We certainly will do all we can to be ready by that time with an area of, say, 50,000 feddans, and in the following year with about 80,000 feddans.

### Syndicate's Policy.

To sum up, the Syndicate's policy is to synchronise—I cannot find a better word—the general development and expenditure of our Syndicate with the progress made by the Government on the Sennar Dam, main canals, and general works. Your board, some time ago, received with deep regret the news of the death of Sir William Mather, and I feel it is my duty to refer to this event at this meeting. Sir William took a sincere and entirely disinterested part in the building up of our Syndicate, and his help and advice in the early stages of our work was of the greatest possible assistance, so that we all owe him a debt of gratitude. At the beginning of this year we invited Brigadier-General Arthur Asquith to join our board. Mr. Asquith was, in former years, a resident of the Sudan, having been for a number of years a member of the Civil Service there. He knows the country well, and his experience, therefore, will be of great use to us. Unfortunately he is unable to be with us to-day, as he is at the moment inspecting our plantations in the Sudan. Our managing director, Mr. MacIntyre, has been over here for a few weeks to consult with us on some important matters. He has gone back again and is at his post in the Gezireh. I hope to pay a lengthy visit to the Sudan next month, as I have certain views regarding further extensions of our Syndicate's operations, which I am anxious to discuss with the authorities on the spot. This is all I think I can say to-day, and I should like to close my remarks with an expression of appreciation and of gratitude to our staff for their loyal and efficient services. I now beg to move:—"That the report of the directors and statement of accounts to June 30, 1920, now laid before the meeting, be and that the same hereby are received and adopted."

Lord Lovat, K.T., seconded the resolution, which was carried unanimously.

The Chairman next moved the declaration of the dividend and bonus recommended.

Mr. J. A. Hutton, in seconding the motion, said he would like to emphasise the warning of the chairman that shareholders must not expect such good results next year, because the company was not going to realise the same cotton prices.

The resolution was unanimously adopted.

The retiring directors (Brigadier-General Arthur M. Asquith, D.S.O., Lord Lovat, K.T., and Sir Lionel Phillips, Bart.) were re-elected, and Messrs. Cooper Brothers and Co. having been reappointed auditors, a cordial vote of thanks to the chairman and directors concluded the proceedings.

## ANGLO-PERSIAN OIL.

### Largely Increased Production.

### Company's Extensive Interests.

The eleventh ordinary general meeting of the Anglo-Persian Oil Co., Limited, was held on December 20 at Winchester House, Old Broad Street, E.C., Sir Charles Greenway, Bart. (the Chairman), presiding.

The Secretary (Mr. F. Macindoe) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Gentlemen,—With your permission we will, as usual, take the report as read. The statement you have before you is, I am pleased to say, again a most satisfactory one, and one which fully confirms the forecast which I made last year. Notwithstanding that the period covered by these accounts showed no very large increase in the throughput of our refinery, there is a substantial increase in profits, and for the current and succeeding years, as our various extensions come into operation, these will be largely augmented.

**Balance Sheet.**

Dealing with the accounts, you will see from the balance-sheet that our capital and debenture stock issues, particulars of which are given in the report, have during the twelve months under review been increased by £8,675,000. This amount is being expended in developments of one kind and another, which will in due course be reflected by increased credits in our profit and loss account.

The next item on the balance-sheet calling for remark is the amount due to the Persian Government in respect of royalties. I am pleased to say that, after very protracted negotiations, we have at last effected a settlement with the Persian Government in respect of our claim for losses sustained owing to the cutting of our pipeline in 1915 and other outstanding questions. This settlement, though not as satisfactory as we were entitled to expect, is a matter of congratulation, because it removes all ground for dispute, and therefore consolidates the friendly relations which have always been maintained between ourselves and the Persian Government.

The next item to which I will draw your attention is the amount at credit of the employees' provident pension and insurance fund. This shows the very substantial increase on the previous year of about £100,000, and as it is the intention of the board to continue to contribute to it out of profits on a liberal scale, this fund, in effect, constitutes a profit-sharing scheme of a very attractive character. That it is much appreciated by the employees of the company is demonstrated by the fact that the fund now comprises some 3,059 members.

The only other item calling for remark on the debit side of the balance-sheet is that of the reserves. As you will see, our total reserves, including the £185,000 at credit of share premium account, now amount to £2,000,000, which, I am sure, you will agree, is a very satisfactory amount considering the short period which has elapsed since we arrived at a profit-earning stage.

On the credit side of the account all I need call your attention to is the amount of our realisable assets. You will see, by adding the last four items together, that these total about £8,370,000, while on the other side of the account the off-setting liabilities only amount to about £2,500,000, showing that we had surplus assets at the end of the last financial year amounting to nearly £6,000,000. These are, of course, being drawn upon from time to time by the capital outlay which is being incurred in connection with the various extensions to which I have referred, but, on the other hand, this is being met to a substantial extent by surplus revenue.

**Profit and Loss Account.**

Dealing now with the profit and loss account, you will see that, although the gross profit amounted to £3,458,418 14s. 6d., as compared with £2,287,624 13s. 3d. in the previous year, or an increase of nearly £1,200,000, the net profit only showed an increase of a little over £600,000. This considerable variation is almost entirely due to large increased payments for income-tax and royalty. In the appropriation account you will see that after debiting stamp duty and other expenses connected with the last new issue of capital, and carrying a largely increased sum to the credit of general reserve, the net balance at the credit of the profit and loss account amounts to £1,848,841 1s. 10d., as compared with £735,527 19s. 8d. in the previous year. Out of this sum we have already paid the usual dividend of 6 per cent. per annum on the preference shares, and it is now proposed to declare a further participating dividend on the preference shares at the rate of 2 per cent. per annum, and a dividend of 20 per cent. per annum on the ordinary shares, both less income-tax.

**Return on Government Capital.**

On previous occasions I have referred to the return which His Majesty's Government have been getting on the capital which they had invested in the company. I do not propose to go into figures, but I would like to point out that this return is not to be measured merely by the dividend which is now being declared on the ordinary shares. Directly and indirectly, their return on the capital, which up till a short time before the close of the financial year now under review, represented their interest in the company, was far more than cent. per cent., and the new capital subscribed by them at the end of last year will in due course no doubt yield a proportionate return.

**Extensions and Developments.**

One or two of the extensions and developments to which I drew attention last year are already beginning to show their results. Among these I may mention Scottish Oils, Ltd., which as a result of the economies effected by the amalgamation, and assisted also by the favourable markets which have obtained during the present year, is now making a fair profit, notwithstanding that since we took over the concerns the working expenses have in other directions been increased by no less than £700,000 per annum, owing to increased wages, shorter hours and dearer coal. This early fulfilment of the anticipations expressed by me when I last addressed you is extremely gratifying to the Board, and will, I am sure, be equally so to everyone interested in the preservation and development of our national industries. But it is doubtful if this favourable position can be long maintained, as there are already indications of a decline in the prices of sulphate of ammonia and of some of our other main products.

We are, however, in pursuance of what I indicated last year, arranging largely to extend the capacity of the Scottish refineries with a view to increasing as far as practicable the output of shale oil, and at the same time refining Persian crude to such an extent as shale oil may not be available, whereby the incidence of working costs will be largely reduced and the Scottish shale oil industry, we hope, be preserved from the extinction which otherwise would shortly inevitably overtake it.

The other extensions and developments then referred to are in due course of execution, and will in time contribute largely to the company's profits. Of these I should refer to the refinery at Swansea. The completion of this has been much retarded by the difficulties which are unfortunately now attendant upon all building and engineering operations in this country, but we hope to commence work there in the first half of next year. In this connection I should mention that we have made arrangements with the Asiatic Petroleum Company whereby the benzine and kerosene produced at this refinery and in Scotland from Persian crude will be outside the operation of our contract for these products with that company, so that we shall, I am pleased to say, before long be in a position to market, through our subsidiary the British Petroleum Company, and the Scottish Oil Agency, the whole of the products obtained from these refineries.

**Further Developments.**

In the report we have drawn attention to further developments of the company's business. The first of these requiring comment is the interest which we have arranged to take in a French company. Attempts have been made in Parliament to throw doubt upon our wisdom in undertaking this development. In reply to these I need only say that the quantity of petroleum products which we shall shortly be in a position to market will be far in excess of the quantity that we can possibly dispose of in the United Kingdom. This being the case, there were only two alternatives before us—either (1) to create our own distributing organisations outside the United Kingdom for the sale of these surplus products or (2) to sell them to one or the other of the only two companies which are in a position to handle them at such prices as they might be willing to pay. What this would mean is best gathered from the fact that were we now marketing ourselves the whole of our products our profits would be fully double what they are to-day.

Between these two alternatives there can be no question as to which was the proper course to pursue. And not only must we create our own distributing organisations in France, but also in such of the other Continental countries and elsewhere as are likely to offer satisfactory outlets for our surplus products.

The question of creating adequate distributing organisations is a matter which is engaging our constant attention. Producing and refining are only one side of the oil business. It is equally or even more important to make such arrangements as may be necessary to enable us to sell our products to the best advantage, and no one would, I think, be bold enough to say that we should be doing our duty if we did not look well ahead and take these and all other steps necessary to avoid being forced to sell our surplus products to other oil companies on their own terms.

I should like in this connection to point out to the members of Parliament who from time to time ask questions in connection with this company in the House of Commons that the commercial administration of the company is entirely a matter for the Board, and that if members would care to address their inquiries to us we shall always be pleased to give them any information in our power.

**Commonwealth Oil Refineries, Ltd.**

Another development of great importance is the interest we have acquired, in conjunction with the Commonwealth Government, in a company entitled the Commonwealth Oil Refineries, Ltd., which has been formed with a capital of £500,000 for the purpose of establishing a refinery in Australia. The choice of title is not a very happy one, because it is reminiscent of a

former well-known company which was established for the purpose of dealing with Australian shale, but in view of the large interest which the Commonwealth Government has taken in the concern it was considered that a title indicative of their partnership in it was essential.

Until an internal supply of petroleum is available it is intended to import the crude oil required for the refinery, but it is hoped that the Dominions will, before long, be producing their own supplies of crude.

As you are probably aware, we have also undertaken, on behalf of the Commonwealth and British Governments, the examination and testing of the oil resources of New Guinea. The reports of our geologists on the area in Papua, on which for some years past the Commonwealth Government has been conducting test drilling, are, I am sorry to say, disappointing, but some other likely areas have been located, and test drilling on these will be started at once.

### British Oil Bunkering Company.

Another new departure requiring explanation is the interest we have acquired in a company we have established under the title of the British Oil Bunkering Co., Ltd. This, like the French company, is another necessary development of our business if it is to be carried on independently and our products be disposed of to the best advantage. In addition to the large quantity of fuel oil which we are now producing in Persia, and the still much larger quantity which we shall be producing in the near future, we are arranging for extensive supplies from various parts of the Western Hemisphere. To enable us to deal with these, we and our associated companies are arranging to establish bunkering installations in all the principal ports of the world. At the present time nineteen of such installations are erected and in operation, twenty-five more are either in course of erection, or sites and plant have been secured for them, and when our programme is completed the Bunkering Co. will be in a position to supply fuel oil in every part of the world.

### Oil Fuel Supplies.

Lord Pirrie, on his recent return from America, sounded notes of warning, first of all as to the wastefulness of burning liquid fuel under boilers for steam-raising, and, secondly, as to the danger to shipowners of building, or converting on a large scale, vessels to burn oil, whether under boilers or in internal combustion engines, without first making sure of their supplies of oil. I fully endorse what Lord Pirrie said on those two points. But I would point out that there is no ground for pessimism as to future supplies of liquid fuel. The difficulty is that new supplies of oil cannot be opened up as quickly as supplies of coal, or as quickly as vessels can be built or converted. In the case of oil not only have the fields to be located, but after they have been located a vast amount of work has to be done and a vast amount of material and labour has to be provided in the direction of drilling, laying pipe-lines, erection of storage tanks and refineries, and building of tankers to transport the oil to the points of consumption.

The world's production of liquid fuel, after deducting what is consumed internally by refineries and on railways, available for sale outside the countries of origin is to-day probably not more than 10,000,000 tons, but I see no reason to doubt that this will, in the course of a few years, even reckoning only supplies from already proved fields, amount to fully 50,000,000 tons, or the equivalent for burning in Diesel engines of 175,000,000 tons of coal. But this, for the reasons I have given, will require time to put on the market, and meanwhile shipowners should, as Lord Pirrie recommends, go slowly and make sure of their supplies in advance. Those who are first in the field for such oil as may be available will, however, have such an enormous advantage over those who remain dependent upon coal that there are already very evident indications of a "scramble" for the existing supplies.

As regards the future course of the market, it is difficult to prophesy, but so much of the price is made up of freight, which still for tankers stands at a very high level, that a decline on present prices may be regarded as a certainty whenever the supply of tanker tonnage approximates more nearly to the requirements of the trade. When this is likely to be shipowners themselves are able to judge as well as anyone.

### Quality of Petrol.

While on the subject of our products, I would like to say a few words about the quality of our petrol. It has been publicly stated by Sir Marcus Samuel that Persian petrol was almost useless for aviation purposes, while, on the other hand, the petrol of Sumatra and/or Borneo was an extraordinary spirit, possessing powers which no other petrol had. We have not considered it necessary to contradict this statement, or other misleading ones regarding the toluol contents of our oil, so long as our petrol was being marketed by Sir Marcus Samuel's companies, but now that we are about to market the Persian spirit under our own brands, the time has come to say that these statements are entirely without foundation, and to let it be known that the Air Ministry, after conducting exhaustive flight and chemical tests of our spirit, have submitted to us two long reports from the Air Research Department, in which the following conclusions are arrived at:—

"(1) Persian spirit No. 4 (Persian aviation spirit) is recommended for aeroplane engines, and it appears in all respects as satisfactory as Shell 'A' (Shell aviation spirit).

"(2) No alteration or adjustment to carburettors need be made when substituting one fuel for the other. It is considered that the fuel would be found quite satisfactory in service."

In view of the fact that we are now producing about 400,000 tons of Persian spirit per annum, and shall shortly be in a position to produce 700,000 to 800,000 tons per annum, this authoritative refutation of the misleading and damaging statements which have hitherto been made as to its quality is of great importance not only to the company, but to petrol consumers generally all over the world.

### Fields and Production.

As stated in the report, our fields in Persia still maintain their satisfactory rate of yield. The words "satisfactory rate" in the report should have been "extraordinarily high rate," as used by me on former occasions, for the wells from which we are producing continue to yield and maintain their pressure in a perfectly marvellous manner. For instance, well F7, to which I have frequently referred in former years, and which has been continuously flowing since November, 1911, is now giving a larger production than ever, maintaining a steady daily average of 11,000 barrels, with the well only partly opened and with very little diminution in pressure. We have many other equally good or better wells, but meantime these cannot be opened out until our pipeline capacity is further increased. We have been gradually extending the limits of the already proved areas, and the results are most gratifying, and I can now more than ever confirm the opinion I have frequently expressed on former occasions as to the great richness and potentialities of our fields.

We have still no new fields in Persia to report, as our operations have again been considerably interfered with during the past 12 months by transport and other difficulties, but the testing of the areas previously referred to, as well as others since selected, is being carried on as actively as possible, and there is every reason for anticipating favourable results. As mentioned in the report, we are also carrying out geological examinations in various other parts of the world, and on some of the areas selected we have already started test drilling operations.

### The Company's Fleet.

To meet our increasing transport requirements we have, since I last addressed you, arranged for further large additions to our fleet, and the total number of vessels which we and our associated companies now have afloat, building or on order, is 110, with a dead-weight capacity of over 1,000,000 tons—a fleet which is, I believe, not equalled by that of any other company. It is needless to say that we have only entered upon this big programme of tanker construction at a time when building costs are so high after the most serious consideration and in full confidence that the step will not only be justified pecuniarily, but is an absolutely necessary corollary of our other developments.

Tankers are an essential part of our business, just as much as wells, pipelines, refineries and distributing organisations. They have, indeed, been very aptly described by one of my colleagues as our "floating pipelines" to connect our fields and refineries with our distributing markets, and it would be folly for us to organise ourselves in the direction of production, refining, distribution, etc., for a trade of, say, 6,000,000 tons per annum if we are only provided with tankers capable of transporting, say, 1,000,000 tons per annum. The high cost of the tankers which we are now building will, however, be averaged down considerably by the low cost to which our present fleet has already been written down, and we also anticipate being able to write down the cost of the new boats very rapidly.

### Political Situation.

As indicated in the earlier part of my remarks, our relations with the Persian Government continue to be of a most cordial character. The disturbed conditions which have existed in Northern Persia and in Mesopotamia have in no way affected the work of our producing fields, which are, as you know, situated in Southern Persia, adjacent to the Persian Gulf, but they have to some extent interfered with the testing operations which we have been carrying on in the Persian territory bordering on Mesopotamia.

The situation in Northern Persia is, as you all know, extremely critical at the moment, but I have every confidence that the Mejliss will shortly ratify the Anglo-Persian Agreement, and thus place its Government in a position to ward off the dangers now threatening that part of Persia.

### America and Mesopotamia.

As to Mesopotamia, you will no doubt have seen from the Press the controversy which is going on in regard to the oil rights which were acquired before the war by us and others from the Turkish Government. The United States have, it is much to be regretted, made a diplomatic question of this matter on the ground that the recognition of these rights would be introducing the policy of the "closed door" in Mesopotamia in violation of the mandatory principle. The object of this agitation is apparent, but it is difficult for us in this country

to conceive how such an obviously erroneous contention can receive the diplomatic support of the United States Government, and I feel that it is my duty, as well as that of every loyal British and American subject, to endeavour to dispel the cloud of misunderstanding which has been created around this subject by Press writers and others, in order that the people of the two nations may have no doubt as to the real point at issue. This point is a very simple one indeed.

It is a well-known doctrine of State succession that the Power which inherits alien territory must recognise previously acquired rights of private owners. The Standard Oil Company before the war claim to have acquired certain oil rights in Palestine, which may, for all anyone knows to-day, be just as valuable as the Mesopotamian oil rights. Similarly, we and other nationals before the war acquired rights in Mesopotamia and in other parts of the former Turkish Empire. All these rights will necessarily have to be recognised, to the extent of the non-enemy interests in them, by the Administration, Arab or whatever else it may be, which eventually undertakes the Government of the mandated territories, unless, of course, the principles of Bolshevism are to be adopted in dealing with them. There is no question here of the "closed door" to America, but quite the contrary. If the Standard Oil Company's rights in Palestine are to be recognised—and I have seen no indication that they have any desire to abandon them—our rights and the rights of other nationals other than enemy in the late Turkish Empire must equally be recognised.

### No "Closed Door."

To act otherwise would be to adopt the policy of the "closed door" in favour of America, and against British and other national interests. This object is no doubt the one that the supporters of the agitation have in view in the strong opposition which they have in this and other directions set up against the attempts of this country to make itself less dependent upon foreign-controlled concerns for its supplies of oil. But it is difficult to believe that the monopolistic aims which are at the back of this opposition can receive support from the American nation as a whole, or that these aims should for a moment be allowed to disturb the friendly relations between the two countries. I had a call from Mr. Bedford, the head of the Standard Oil Company, on this subject a short time ago, on the eve of his departure to the United States, and on my explaining to him the misapprehension which existed on the American side as to the alleged "closed door" policy in Mesopotamia. I am pleased to say that he appeared to be quite satisfied, and gave me an assurance that he would make it his first duty on arrival in America to endeavour to clear up the unfortunate misunderstanding which exists on this subject between the two countries—an assurance which I hope shortly to see fulfilled, because I am satisfied that Mr. Bedford, who is a large-minded man, is himself well disposed towards this country, and would not for a moment support any policy of selfishness likely to cause disagreement between the two nations.

I am very pleased to see that Mr. Powell—the head of the Anglo-American Oil Company, the English branch of the Standard—in a recent speech at Barrow also expressed the opinion that no one country could, of course, expect to monopolise the oil supplies of the world. With these authoritative expressions of opinion from two of the principal representatives of American oil interests, I think we may assume that the irritation which has, very regrettably, been aroused in America recently over this matter has no serious foundation and that it will—like many others slight misunderstandings between the two countries—soon sink into the oblivion which it deserves.

Before I leave this subject I would like to refer to the pathetic account which was given recently in the Press of the enormous sacrifice which the United States had made in depleting itself—not without valuable consideration, be it remembered—of its reserves of oil for the welfare of the rest of the world. This was made the basis for claiming that American producers are entitled to their share in future oilfields outside America as well as the enormous ones in the United States and elsewhere which they already hold.

I am now wondering when we shall see similar demands put forward by the Bolshevists in regard to the oil supplied to other countries from Baku during the past forty years, and from the gold producers in South Africa, and even from our own colliery proprietors, for the gold and coal of which they have depleted themselves—for the welfare of the rest of the world!

But I would like to point out that the drain on American reserves will be checked just as much, and, in fact, a great deal more, if those outside territories are worked by British, French, or other nationals than they would be if worked by Americans. The only difference is that in the latter case America would still command its 80 per cent. to 85 per cent. of the oil supplies of the world, and the rest of the world be still left almost entirely dependent upon the present monopoly.

No one can reasonably object to American producers claiming a fair share of the world's supplies. But every other country in the world is entitled to object to their demanding a permanent 80 to 85 per cent. of the world's supplies, and to resent most strongly their opposition to the attempts of Great Britain and other countries to secure their fair share of these supplies, and one more nearly corresponding to their own requirements. To bring forward the mandatory principle in support of monopoly and of confiscation of acquired rights is to travesty all that the mandatory principle means, and the principles which, through the League of Nations, the rest of the world is endeavouring to establish.

### The Staff.

Before concluding I would like you to join with me in again expressing our great appreciation of the services of our staff.

**As regards our staff in Persia and Mesopotamia,** I cannot do better than quote from a review recently presented to Parliament on the civil administration of Mesopotamia. The author, when writing of the services rendered by the company, adds that "the records of its (the company's) work is one of which all associated with it, as well as the distant oilfields on which it depends, may well be proud."

But our operations now are not, as you know, confined only to Persia, but extend to this country and to almost every other part of the world, and it gives me the greatest pleasure to say that in every direction our employees show the greatest possible loyalty and devotion to their duty. There is an intense feeling of pride among them all at being associated with a company which they know is carrying on a great national work, and which will one day be one of the greatest concerns in the British Empire. We have around us now, I can say without exaggeration, the finest band of workers—both in regard to scientific and technical knowledge and ability and in enthusiasm—possessed by any oil company in the world. The only trouble is that we cannot augment our staff of trained men as rapidly as we should like owing to the hitherto inadequate facilities in this country for technical training in oil, but this is a difficulty which, by the endowments we have given to the Cambridge and Birmingham Universities, and by training men in our own fields, works and laboratories, will, no doubt, in time be overcome. Oil, as you know, is practically a new industry for the British Empire, and it is necessarily difficult to create at once the great number of geologists, field and refinery technicians, chemists and other specialists required for the big developments which we and other British companies are now undertaking, particularly at a time when so much expansion in the oil industry is going on all over the world. But now that the matter of producing these specialists in adequate numbers has been taken energetically in hand, there is no doubt that this country will—as it has done in the past in every other branch of scientific and technical work—soon be able to hold its place against any other country in the world.

I now beg to move:—"That the report of the directors, balance-sheet and profit and loss account for the year ended March 31, 1920, be received, approved and adopted," and I will ask Lord Inchcape kindly to second that motion.

The Rt. Hon. Lord Inchcape formally seconded the motion.

The report after some discussion was carried, and the dividends recommended were unanimously agreed to, and the meeting closed with a cordial vote of thanks to the chairman, moved by Sir J. D. Rees.

## TENDERS INVITED.

**Tenders are invited for the following contracts, and must be made by the dates mentioned :—**

### Egypt.

(*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked* (*L*) *are to be obtained.*)

Clothing.—The Director-General, Customs Administration, Alexandria, invites tenders for the supply of clothing required for the personnel of the Customs Administration for the year 1921. January 18.

Clothing.—The Director of Stores, Department of Public Health, Cairo, invites tenders for the supply of clothing, equipment, etc., required for the year 1921-1922. January 5.

The Secretary-General, Ports and Lights Administration, Arsenal, Alexandria, invites tenders for the supply of forage during one year from April 1, 1921, to March 31, 1922.

### Malta.

Mail Service.—Sealed tenders will be received at the Treasury Office, Malta, up to 10.30 a.m. on January 20, 1921, for the service of the conveyance of mails between Malta and a port in Sicily or in Italy.

Tenderers will give the following particulars:—(a) Number of weekly trips from and to Malta; (b) days of the week and hours of proposed arrivals and departures at Malta and at specified ports abroad; (c) gross and net tonnage of steamers, speed, passenger and other accommodation; (d) subsidy proposed to be demanded from the Government; (e) period of service for which the tender is made; (f) date of commencement of service.

Copies of conditions of contract may be obtained on application at the Treasury Office, Malta, or to the Crown Agents for the Colonies, 4, Millbank, Westminster, London, S.W.1.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has received the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated December 13, 1920:—During the week ending December 4 crop prospects generally fair, but rain urgently required in the Punjab, North-west Frontier Province, Central Provinces, Bombay, and parts of Central India, Hyderabad, and Bihar and Orissa. Bombay cotton market steady. M.G. fine Oomra March Rs. 268-8 As. Piece goods market depressed, with drop in rates, but continued retail inquiry. Bombay native piece goods association's resolution prohibits members from buying any foreign goods—ready or forward—from firms and auction rooms, with a view to stopping the unnecessary loading of the market by further commitments. Calcutta jute market very quiet with declining prices. Heavy goods—nothing doing. The preceding week's rate of 7 per cent. in Bombay, Calcutta and Madras remains unchanged.

Digitized by Google

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank.

STAMBOUL, December 4.

Prices of manufactured goods continue to fall. The appreciation of the pound sterling, which now stands at over 500 piastres, increases the difficulties experienced by merchants in paying for goods from abroad.

**Colonial Produce.**

Sugar.—The fall continues in countries of production. The heavy decline this week is due to the arrival of large consignments. Prices have fallen this week from £76 to £58 per ton. Java sugar for quick shipment from America is offered at 15.50 dollars per 100 kilos, as against 17 for the last two weeks. American sugar is offered at 17 dollars. Sugar in cartons is quoted at £T42-43 per 100 kilos, as against £T51 the previous week.

Coffee.—There has been a marked increase in prices. Rio No. 1 is quoted Ps. 49-50 per oke, and second grades at Ps. 42-46 per oke, both in transit.

Rice.—Some orders for Roumania have kept prices up. Saigon is quoted at Ps. 25 per oke, and American "Blue Rose" at Ps. 26-32 per oke, both in transit.

Oil.—The demand is unceasing and prices have risen to Ps. 660-670 per case of two bidons.

Exports.—The rise in the exchange has not improved the export trade, with the exception of opium, for which there has been a special demand. Other commodities are entirely neglected, and their prices tend to fall continually.

Opium.—80 cases have been sold at £T10.80-10.90 per oke Druggist Carahissar, and £T11.20-11.50 per oke for fine.

Mohair.—The arrivals have amounted to 250 bales; there have been no sales. Prices are again lower at Ps. 80 for Extra, and Ps. 75 for first grades.

Wool.—There have been no arrivals or sales. Prices have fallen sharply to Ps. 40 per oke.

Cotton.—This commodity has been neglected. Prices are Ps. 65 per oke.

ADRIANOPLE, November 24.

The dry weather in September stopped the preparatory work for the autumn sowings. Under the new regime the agriculture of the country ought to develop on an important scale. The scientific agriculturists engaged by the Government are making investigations with a view to the introduction of agricultural machinery, which is the only way of bringing into cultivation the vast lands left fallow for years.

In October the villagers, profiting by some showers, devoted themselves feverishly to work in the fields. The work went on everywhere, despite the cold of the second half of the month.

Constantinople, from which this region draws its imports, supplied to this market during the months of September and October manufactures and other commodities of the value of more than £T120.000. Despite the Customs duty our merchants are endeavouring again to supply goods to Constantinople as well as Salonika. Permission for export has been limited to some wagons of Karakatcheu wool in transit for Serbia. The export of foodstuffs is prohibited; of 35,000 bidons of cheese only one thousand was allowed to be exported by virtue of a special permit.

## ON 'CHANGE.

### Prices Again Give Way.

(From Our Own Correspondent.)

London, Monday night.

It is not yet possible to record a cessation of the downward movement of prices. During the past week there has been a further outburst of liquidation from the Continent, while there have been continued offerings from London and the provinces, the result being that in most of the markets prices are the turn lower.

Government securities have been generally dull, but there have been no marked changes in quotations. Foreign bonds have, of course, reacted, and quotations are for the most part depressed.

There is little satisfactory to record with regard to other markets, which have all suffered as the result of the selling that has been going on. Industrials have been lifeless, and changes where made have been towards lower levels. Oils have been noticeably weak, and rubbers are again lower on a further decline in the raw material.

Near Eastern securities have, generally speaking, been firmer. Egyptian Guaranteed 3 per cent. are a point down at 58. Turkish Guaranteed 4 per cent. are unchanged at 66, while Greek Guaranteed 2½ per cent. 1898 are ½ up at 54½. Turkish 3½ per cent. Egyptian Tribute Bonds are a point lower at 51¾.

Greek securities have recovered slightly from their depression. The 5 per cent. 1881 Loan is 2½ up at 40, and the 5 per cent. 1884 issue has risen an equal amount to 40. The 5 per cent. 1890 Loan has gained a point at 39, while Funding at 40 has advanced 2 points. The 1910 Loan remains unchanged at 30, whereas the 1914 Loan has gone up ½ point at 38. The 1902 Loan has also increased ½ point at 35.

Banks have been firm. Agricultural 3½ per cent. Bonds have remained unchanged at 55, and the 3½ per cent. Guaranteed Bonds are the same at 57. Imperial Ottoman Banks at 7¾ and National Bank of Egypts at 16½ are also unaltered. Land Banks are a shade lower at 4⅝.

There have been a number of changes in Land shares, for the most part in the upward direction. Beheras have risen ¼ to 9¾, while the preference shares are an equal amount up at 3. Anglo-Egyptian Land Allotments and Egyptian Consolidated Lands are unchanged at 3¼, and 1s. 3d. respectively. Delta Lands at 10s., and Gharbieh Lands at 2 are also unaltered. New Egyptians are 1s. up at 24s. 6d., while Union Foncieres have shed 1-16 at 3. Sudan Plantations have been weak, and have dropped ½ a point to 3¾.

Oils have been weak. Anglo-Egyptians have fallen ⅛ to 2⅜. Phœnix are 3d. down at 9s. 9d. Roumanian Consolidated are 5s. down at 12s. 6d., but Steaua Roumana are unchanged at 18s.

## NEW COMPANIES.

### Eirene Steamship.

The Eirene Steamship Co., Limited, was registered on December 8 as a private company with a capital of £100,000, in £10 shares. Agreement with E. M. Rodocanachi, P. J. Agelasto, and G. P. Sechiari, shipowners, shippers, insurance, passenger and general brokers, managers of shipping and other property, etc. The company is acquiring, through Messrs. Rodocanachi Sons and Co., from the Shipping Controller, the ex-enemy steamship Gudrun. Subscribers: J. E. Rodocanachi, 129, Palmerston House, Old Broad Street, E.C.2, shipowner; G. P. Sechiari, 129, Palmerston House, Old Broad Street, E.C.2, shipowner. Proposed directors: J. E. Rodocanachi, G. P. Sechiani, E. M. Rodocanachi, and P. J. Agelasto. Registered office, Palmerston House, Old Broad Street, E.C.

## LANCASHIRE COTTON.

### Dull Tone Prevails.

(From Our Own Correspondent.)

Manchester, Monday.

It is not possible to record any change for the better in the conditions prevailing in the market, and a very dull state of affairs continues to exist. One day follows another without there being any indication of a revival of demand, and owing to the small turnover in yarn and cloth the situation from the point of view of spinners and manufacturers tends to become worse. The position of Egyptian cotton-growers with regard to next season is rather vague, and the official reply from the British Government to the representations from Manchester does not help matters very much. Unless there is a big improvement in demand, a smaller crop next season will be quite sufficient to meet the needs of users. Prices remain irregular, and many people do not believe that the bottom has yet been reached. In Egyptian yarn the offtake continues poor. Now and again spinners are compelled to sell at wretched figures. The inquiry in cloth for the Near Eastern outlets shows no particular alteration. Isolated transactions have been mentioned for Egypt in bleaching descriptions. Printing sorts have attracted very little attention for the Levant. Dealers in that part of the world will have to reduce dear stocks before fresh buying of weight can take place. Bids for India have been few and far between, but now and again local merchants purchase speculatively when very cheap lots are offering. A little more inquiry has come through from China, but dealers in Shanghai are not yet ready to place fresh orders with Lancashire manufacturers. In all weaving districts curtailment of production is on a big scale. American yarns remain irregular in price, and the short time movement has not brought any definite relief. Export bundles continue in request for the Levant, particularly in extra hard descriptions, and dyed yarns have been wanted in small lots for India.

## FOREIGN EXCHANGES.

| Country. | Method of Quoting. | Parity of Exchange. | Latest Quotations |

---

The Bosphorus Light Vessel and the Life Saving Service in the Black Sea have been re-established.

In accordance with the decision of the Allied High Commissioners at their meeting, held on November 5, all vessels over five tons (net register) proceeding into the Black Sea will pay 100 paras (paper) per ton (net register) from November 5, 1920. The tax will be collected by the Receiver of Taxes at the Office of the Administration des Phares.

The Transmediterranean Company has established a regular service of boats between Melilla, Spanish Morocco, and Oran, in Algeria.

The Lloyd Triestino steamer service between Trieste and Alexandria, which has been running fortnightly, is now leaving every Thursday, calling at Brindisi on Friday.

According to an American consular report, a concession for a telephone exchange at Aleppo is to be arranged early next year.

A privileged Yugoslav commercial agency has been established in Antwerp for the development of commercial relations between Belgium and Yugoslavia.

The Royal Hellenic Agricultural Society is arranging for an exhibition of agricultural implements and produce to be held at Athens shortly.
