Rear-Admiral Mather Byles, whose death occurred on September 14 at Rosemount, Dawlish, commanded the Seagull during the Egyptian campaign of 1882, receiving for his services the medal, the Khedive's Bronze Star, and promotion to the rank of captain.

Major-General Herbert Maynard Ramsay, of Warnham, Horsham, whose death has occurred at the age of seventy-four years, entered the Indian Service in 1873. He attained the rank of Major-General in 1899, and retired in 1903. He was one of the Commissioners appointed to report on the Chaukidari system, 1890-91.

The death has taken place at Bideford, at the age of sixty-eight years, of Surgeon-General William Simson Pratt, C.B., who was at one time principal medical officer, Southern Command, and who was appointed in 1900 principal medical officer at Gibraltar. He saw service in the Sudan in 1884-5, when he was mentioned in despatches and promoted surgeon-major.

The Rev. Louis Borissow, whose death has just taken place at East Gilling Rectory, Yorkshire, at the age of seventy-seven, was formerly the tutor of H.H. the Jam Sahib of Nawanagar. The Jam Sahib was a frequent visitor at his Yorkshire rectory, and he was staying there at the time that he sustained injuries while out shooting near Scarborough two years ago. Mr. Borissow was a scholar of St. Catharine's College, Cambridge, and took orders in 1866.

Mr. William Ernest Gordon Leith, late Chief Magistrate, Calcutta, and Legal Remembrancer of the High Court of Judicature, Fort William, Bengal, died on September 16 at a nursing home, at the age of sixty-two. The son of the late Mr. John Farley Leith, Q.C., he was called to the Bar at the Middle Temple in 1879. He joined the Bengal Judicial Department in 1893, and was subsequently appointed Assistant Secretary to the Government of Bengal, Legislative Department. He was appointed Remembrancer of Legal Affairs in September, 1896, and retired from the service in 1902.

Lieutenant-Colonel Laurence A. M. Graeme, who died at Fonthill, Shaldon, Teignmouth, on September 14, was the only surviving son of Major Laurence Graeme, Lieutenant-Governor of Tobago. In 1853 he joined the Madras Fusiliers, and his active service included the Mutiny campaign, when he was with Havelock's column in two engagements and in the relief of Lucknow, being awarded the medal and two clasps. He also took part in the Abyssinian campaign, 1868, and received the medal, and was promoted brevet-major. Colonel Graeme, who retired in 1875, was one of the oldest magistrates for Devon. One of his sons, Colonel Lawrence Oliphant Graeme, was killed in action in France. Another son is in the Seaforth Highlanders.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

DAWNAY.—On September 12, in Cairo, the wife of Lieut.-Colonel Alan Dawnay, D.S.O.—a son. Villa Dawnay, Ghezireh, Cairo.

HOLME.—On the 13th inst., at Maymyo, Burma, the wife of H. B. Holme, I.C.S., I.A.R.O., of a daughter.

DEATHS.

LEITH.—On September 16, at a nursing home, William Ernest Gordon Leith, late Chief Magistrate, Calcutta, and Legal Remembrancer of the High Court of Judicature, Fort William, Bengal, aged sixty-two, son of the late John Farley Leith, Q.C.

MAGRATH.—On September 10, in Alexandria, Egypt, Beatrice, wife of Gerald P. Magrath, Egyptian Administration, and daughter of the late William Petch, of Southcotes, Leamington.

ROLL OF HONOUR.

O'SHEA.—Killed in action on September 11, Lieutenant Dermot Patrick O'Shea, Punjabis, Indian Army, aged 19 years and 7 months, the dearly loved younger son of Mr. and Mrs. F. Bernard O'Shea, Mount Prospect, Barton Cross, Torquay, and grandson of Colonel J. G. Kelly, C.B.

IN MEMORIAM.

O'SHEA.—Killed in action in Mesopotamia on May 23, 1916, Wilfred Bernard, dearly loved elder son of Mr. and Mrs. F. Bernard O'Shea.

According to a Zurich message, the Bulgarian Government has sent special Envoys to Germany, Austria, Sweden, and Switzerland to carry on an active propaganda in favour of the annexation of the Serbian and Roumanian territories now occupied by the Bulgarian armies. The Envoys in question are M. Militic, who is in Germany; M. Moloff (Austria), M. Chichmanoff (Sweden), and M. Mileff (Switzerland).

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

THE GREEK WHITE BOOK.

Revelations are the order of the day. Their value lies in the fact that they help towards a better understanding of what is at stake in this conflict, and perhaps when the last has been made the war will be found to be nearing its end. Only the protraction of the struggle has enabled the world to appreciate to the full the real divergence of the principles that divide the two sets of belligerents. An object-lesson of the slowness with which enlightenment has come was provided by the United States; the Vatican is still a stranger to it. The main difference between the honest pacifist and the rest of his fellow-countrymen is that his mind has become atrophied by reason of an obsession and has remained impervious to any idea beyond those which it assimilated in the days when war, as it is envisaged to-day, belonged to the realm of theory. With understanding of the issues at stake follows not only the resolve to substitute other and better conditions than those out of which the present tragedy emerged, but also the knowledge of what is required in the new order. Thus interspersed between the revelations we have the clear and striking enunciation of accumulating ideas with which the statesmen of the Grand Alliance outline from time to time the future organisation of the world, from national, political, social and economic points of view. How necessary it is that after this inferno of suffering the new era should be established on sound and lasting foundations the people as a whole discern but dimly to-day, and are apt to be impatient of a multiplicity of theories and schemes for the regeneration of society, while the war is still in progress. Such an attitude, however, is almost a negation of the moral forces at work behind the struggle. The Allied nations cannot lose sight of the fact that they have not merely to win the war, but also to reconstruct afterwards the whole framework of national endeavour and international relations in such a way that peace and prosperity may return to a stricken, exhausted world. The revelations, therefore, regarding the dark forces at work both before and during the war have a significance apart from the sensation that they naturally cause, and for this reason deserve to be studied closely.

If the disclosures regarding the German Emperor's intrigues with the ex-Tsar reveal the danger accruing from unrestricted militarism, the Greek White Book, though considerably more localised in its scope, constitutes an admirable exponent of German militarism's *alter ego*, *Kultur*. By this word the Germans understand both the particular bent of mind and the methods which have enabled them to reach the commanding position that was theirs at the outbreak of the Great War. The whole conception is essentially materialistic, and not ethical. Ex-King Constantine would be regarded as an apt disciple so long as he succeeded in his purpose of hoodwinking the Allies. As he has proved a failure, he may no longer be acclaimed in Germany as a sharer with the Bulgarians and Turks of the *Kultur* mantle; but the evidence afforded by the White Book is valuable from the double point of view, for it depicts the ex-King in his true colours, and shows how closely he relied upon German prompting for the steps he took. The full text of the diplomatic documents published by the Greek Government supplements the information given in the telegraphic summaries of four weeks ago, especially in regard to the Greco-Serbian Treaty. From the Military Convention, signed on June 1, 1913, simultaneously with the Treaty of Alliance, in which reference is made to the eventuality of Serbia being attacked "by another Power than Bulgaria," it is evident that King Constantine's contention that the alliance was of a purely Balkan character, and was not applicable to a general outbreak of war in Europe had no foundation in fact. Even more striking still is the evidence of the utterly unmoral attitude which characterised the Greek politicians who supported the King in his pro-German policy. We have the Foreign Minister discussing with the Greek Minister in Berlin the possibility of Greece aggrandising herself at the expense of her ally, Serbia, and later, M. Skouloudis, the Premier, solemnly assured the Chamber, "in the most categorical manner," that what had happened at Fort Rupel did not happen with the complicity of the Greek Government, "that the Greek Government did not agree to it, nor would they have tolerated it." Yet there is documentary evidence to prove that M. Skouloudis himself received an intimation from the German and Bulgarian Ministers of what was going to happen in regard to the passes of the Rupel ravine, and acknowledged its receipt.

But while for the outside world the Greek White Book has mainly an academic interest, in bringing home, as it does, to the imagination the unscrupulousness with which Germany has carried out her intrigues and the absence of any moral principle in her dealings with other nations, for Greece the significance is not so quickly exhausted. King Constantine was enabled to carry out his policy by means of the support of a substantial section of the political forces of the country. It was possible that for a time these could believe that they were in reality helping to spare their countrymen the horrors that had befallen Belgium and Serbia; but the treatment by the Germans and Bulgarians of the inhabitants of the occupied districts disposed of any comfortable theories of this nature, and left the subservient politician with no other guiding star than the behest or the gold of German agents. In spite of all that has happened these men have availed themselves of the freedom of speech secured for them in the Chamber under the Greek Constitution, and have sought to defend the actions which have earned for King Constantine and his several Governments the contempt of every right-minded man whether inside or outside Greece. Their demeanour suggests an intention to hinder, if they can, the reorganisation of Greece, and they will watch zealously for any opportunity to detract from the merits of M. Venizelos' achievements. But the spirit of frankness with which the Greek Prime Minister approaches every problem is likely to stand him in good stead, and it is to be hoped that it will be reciprocated in all his dealings with the Allies. So far the latter have done much to strengthen his position, but they have failed to remove the anomaly, from the Greek point of view, of the Italian occupation of a portion of Northern Epirus. In a spirited speech in which he set forth his reasons for refusing to accord seats in the Chamber to representatives of that district, M. Venizelos declared that while the Greeks had as yet no international title to Northern Epirus, they had with it "bonds stronger even than any declaration of men and any agreement of nations," and that Greece was bound to this section of unredeemed Hellenism by the firm determination of the majority of the inhabitants not to cease to be Greeks and not to accept subjection to foreign rule. It is possible that the problem is not so easy of solution as M. Venizelos' words imply; but that is no reason for burking the question, to the prejudice of the harmony of the Grand Alliance or of the domestic situation in Greece.

DALMATIA.

Physical Features.

Dalmatia is a coast strip squeezed in between the Adriatic and the vast limestone barrier of the Dinaric Alps, which in some places, as, for instance, near Ragusa, approach within a few miles of the shore. It runs from a point due north of Zara to a few miles south of Cattaro.

Dalmatia includes three harbours of great importance, Zara, Spalato, and the Bocche di Cattaro—the last the finest natural harbour in Europe, perhaps in the world. In the Bocche di Cattaro the whole British Fleet could ride at anchor. In addition, there are the three minor harbours of Gravosa—the port of Ragusa—Sebenico, and Trau. The Curzolari Islands are of great strategic importance. As the islands are very numerous and the distances between them comparatively short, they form ideal lurking places for submarines. The readiness of communication between them is illustrated by a famous Dalmatian legend similar to that of Hero and Leander. In this case, however, it was the lady—Margherita Spolitano—who used to swim nightly from one island to another to visit her lover. Ultimately Margherita was discovered and drowned by her brothers. Submarines now follow in the track of Margherita.

A record of the naval importance of the Dalmatian islands is to be found on the island of Lissa, where a marble lion commemorates the victory of the Austrian fleet over the Italians on July 20, 1866. The victory was the more remarkable because the Austrian fleet had no proper ironclads. Lissa was also the scene of a victory by the British over the French in 1811, which the British characteristically refused to commemorate, and have now long forgotten. Curzola was the scene of many Venetian naval battles in the Middle Ages, and was occupied by the British, who built a fort there in 1813. There are many excellent harbours in these islands, but the chief mediæval harbour was on the mainland, at Stagno, the outlet to the vale of the Narenta, now a place of no importance. Stagno was the harbour of the mediæval Bosnian kingdom, and was connected viâ Sarajevo with mediæval Serbia. It was ceded by Stephen Dushan—the greatest of Serbian mediæval monarchs—to Ragusa, but was used by him as the base for an advance up the Narenta in 1351. The numberless islands and indented fiords on this coast contrast strikingly with the Italian shore opposite, where harbours are almost non-existent, and where ships consequently have no protection against the Scirocco and the much-dreaded Bora or "Wind of the Dead." This in winter sweeps down from the narrow mountain gorges of Dalmatia in sudden and almost irresistible gusts, dangerous alike to landsmen and mariner. The islands afford an ideal protection against this wind, but between Ragusa and the mouth of the Bocche and between the inner islands of Lissa and Lagosta very rough weather is often experienced. Like the Lake of Galilee, the Adriatic is tideless, but subject to terrible storms. In such cases the Curzolari Islands provide a haven of refuge.

Traffic between the Dalmatian towns is seaborne, and railway communication with Bosnia is scanty and difficult. The rivers are few, little more than mountain torrents in the upper part of their course, and are often nearly dry in summer. In many places the absence of lakes and even of springs makes the construction of artificial reservoirs essential. Between Zara and Spalato the land is especially stony and barren, and the bare white hills resemble a gigantic wall.

In classical times Dalmatia was obviously incapable of producing much. According to Strabo, it could barely support its own population, though he seems to have thought that this was due rather to the ignorance of the inhabitants and their lawless character than to the inclemency of Nature. As a matter of fact, the heavy rains have a tendency to wash away such soil as collects on the mountains, and it is only by a system of artificial terraces that the population has been enabled to falsify Strabo's description. From Spalato southwards and on the islands the country is much more fertile, and vines, olives, figs, pomegranates, and oleanders grow luxuriantly in a semi-tropical climate. The jackal, another semi-tropical product, is found both on the coast line and on the islands. The climate gives a special character to the wines of the country, for the sun and the limestone limit the moisture in the grape. As a result, wines which the traveller imagines to be as light as Chianti or Capri he finds to have the strength and weight of Madeira. This characteristic, like so many others, emphasises the difference between Dalmatia and the Italian coast opposite. The Adriatic abounds in fish of all kinds, many peculiar to Dalmatia, the strangest of which is the Dalmatian cat-fish, whose sandpaper-like skin is used for scrubbing tables and floors.

Roman Influence.

The characteristics of such a land are obvious from this description. All its lines of development stretch out towards the sea, over which is borne food, wealth, civilisation, and the arts. As Venice is the nearest good harbour in Italy, it was there that the chief centre of attraction was to be found. But Rome left its mark on Dalmatia long before Venice did. The influence of Greece was hardly felt, but as the Roman Empire expanded Dalmatia was brought within its orbit. Pompey showed his genius for organisation by clearing the Adriatic of those bands of Illyrian pirates who haunted the creeks and islands of Dalmatia. Augustus reaped where Pompey sowed, and Dalmatia became Roman under him.

It became even more famous under Diocletian, who reared a magnificent palace at Spalato, to which he retired after governing the world for twenty years. More than 3,000 people still live within the very walls of the Emperor's palace. Owing to the solidity of its masonry, the inhabitants have been unable to destroy it, and, though lath and plaster cottages still hide part of the Roman structure, much has recently been revealed by the demolition of modern buildings. The style is of great interest as a transition between the Roman and the Byzantine. It stands indeed as an imposing symbol of an Empire that was actually passing from the Western to the Eastern Rome. No one who has seen it can forget the grandeur of its appearance, more especially when one stands at the very centre of the palace, near the broken Sphinx, whose paws still hold the symbol of the Sun. Opposite this last great monument of pagan Rome now stands a Christian campanile, and a cathedral rises above the tomb of the great pagan Emperor.

Four miles from Spalato is Salona.

Qua maris Adriaci longas ferit unda Salonas
Et tepidum in molles zephyros excurrit Iader.

(Lucan.)

The Iader, a magnificent torrent, finds its source in a green valley two miles above the Roman ruins at Salona. The town itself was the naval harbour and capital of the Roman Dalmatia. It contains ruins of the fifth and sixth centuries. When the barbarous Avars finally destroyed the town, the inhabitants took refuge in the deserted palace of Diocletian, and thus founded the importance of Spalato. What was only the site of an unusually magnificent Roman villa ultimately became the most important town in Dalmatia. For the time being, however, it was the day of Venice, and Zara and Ragusa rose into importance as the Middle Ages dawned.

The Expansion of Venice.

From the twelfth to the fifteenth centuries Dalmatia was the battleground of Venice and the land Powers of Hungary and Serbia, which were expanding towards the Adriatic. The struggle could not ultimately be doubtful, for the road by the sea was easy, and the mountains proved more formidable to armies than the Scirocco and the Bora were to ships. Though for certain periods Hungarian or Serbian kings controlled part of the country, their hold on it was never as secure as that of Venice. Circumstances favoured the growth of city life in Dalmatia—strong, independent, self-centred and self-sufficient. Thus there arose a civilisation as varied and artistic in its own way as was the far richer and more developed city life of Northern Italy. The apologists of nationality in Venice or Belgrade have claimed that this civilisation was exclusively Latin or Slavonic. It is difficult to say that it was either. Byzantine influences were not absent, and in its strange mixture of things that were Roman and things that were Greek, of things that

Digitized by Google

were Slav and things that were Italian, this civilisation proved itself eclectic and indefinable.

The sea power of Venice was not directed against Dalmatia until the naval republic decided on making the Adriatic a Venetian lake. With this end in view, she crept slowly along the Illyrian coast, seeking to use each Dalmatian harbour as a naval base and a stepping-stone to further conquests. Zara was the first victim, and the most permanent Latin conquest. It was acquired in 1202, and was the price demanded by Venice for conveying the Crusaders to Constantinople. Zara was more thoroughly Latinised than any other Dalmatian town. The cathedral is Romanesque, and the city abounds in Latin inscriptions and in Venetian art and architecture. Singularly enough, many of the buildings are erected from the fragments of Roman temples and tombs. Zara has since remained the stronghold of Italian influence in Dalmatia. It is now the only town on the whole coast governed by an exclusively Italian town council, and is the only place in Dalmatia where an Italian feels thoroughly at home.

Trau was the next victim. Remote as it is, and seldom visited, it represents perhaps the best example of the civilisation which Venice bestowed on its conquered peoples. The beauty of its art makes one inclined to forgive Venice for the cruelty with which it treated its subjects. Yet this lovely little town, still almost wholly mediæval in aspect, with its walls, its gates, and its towers, is not wholly Venetian in feeling. The Loggia, or open Court of Justice, with the winged lion of St. Mark in marble looking down on it, might have been taken straight from Venice itself, but the rich carving in the porch of the cathedral was due to the imagination of Slavonic sculptors working under Venetian influences, but not wholly in the Venetian spirit. Nevertheless the influence of Venice is clearly still supreme.

Ragusa.

Venetian art is less evident at Spalato, where the carvings on the great cathedral doorway were the work of Slavonic artists, and at Ragusa we are conscious of a further change. The art and architecture of the city, though Latinised, are clearly original; they are Ragusan, not Venetian. The reason is not far to seek. Ragusa occupied a unique position. Placed as it is upon the sea between two blood-red cliffs, surrounded as it still is by mediæval walls, and defended on the landward side by a gigantic limestone barrier, it was impregnable to attack either by land or sea. Serbian and Hungarian kings besieged the city many times in vain, and Venice found it wiser to make her an ally than an enemy. The result was that Ragusa took all from Venice which she needed and nothing which she disliked, so that in the literature, the art and architecture of Ragusa is found the supreme and harmonious blending of the Latin form and the Slavonic spirit. The Franciscan church of Ragusa, with its beautiful cloisters and corridor, is the work of Slav artists, while the Rector's Palace is a Renaissance building of a true Venetian type. Similarly her churches are filled with paintings acquired directly from Italy, and in the Renaissance period the nobles of Ragusa studied the humanities first in their own city and then in the Italian universities.

In the fifteenth century there arose and continued for three centuries a singular Ragusan school of literature. It was written in the Serbo- Croat tongue in Latin characters, and was based largely on Italian models. Every form of literature, from satire and novels to comedy and epic poetry, was represented, and there were also interesting developments in the study of science and history. Here again Latin and Slav imitation and originality strove with each other. It is an interesting fact that, though other towns in Dalmatia and in Jugoslav territory beyond had literary schools of a similar type, there seems to have been no conscious connection between them. Their spirit was wholly parochial or rather municipal. It was certainly not until the nineteenth, perhaps not until the twentieth, century that the modern ideal of nationality, overcoming natural barriers and local prejudices, dawned upon the cities of Dalmatia. Every prominent Dalmatian (if Zara be excepted) has expiated his patriotism in an Austrian barracks or gaol.

The modern aspect of the problem can be given in a few words. The population, according to the census of 1910, consists of over 600,000 Serbo-Croats, of about 18,000 Italians, and 3,000 Austro-Germans. The Italians are mostly at Zara, while the Germans are almost wholly officials. These figures tell their own tale, for, though Austrian statistics are not above suspicion, it is clear that the preponderance of Serbo-Croats is enormous. On ethnographic grounds Zara alone can claim to be Italian. No one would deny the civilising influences which Italy has brought to bear upon Dalmatia, influences which have the permanence of religion, art and trade, but during the present generation the position has been profoundly modified. Before, Italian influences were supreme and Italian business men controlled the city life of Dalmatia. During the last thirty years the Serbo-Croat element has gradually displaced the Italian on the governing bodies of the Dalmatian cities, and the Italian has become a shopkeeper, a sailor, or a citizen of Zara. The Italian contention now rests on memories rather than on realities. The modern feeling is best expressed by a fountain recently erected by the citizens of Spalato. In the midst of the water stands a marble nymph, pointing with outstretched arm towards Serbia.

GLADYS TEMPERLEY.

ARCHÆOLOGICAL NOTES.

Part II. of Professor Flinders Petrie's journal, "Ancient Egypt," of the present year, has just been issued, and contains several interesting articles, of which two are by Miss M. A. Murray. One of these reproduces two inscriptions in the collection of Sir Frederick Cook, at Richmond, one carved upon the false door of the tomb of a personage named Ni-Kau-Ptah, and the other a stele of a certain Tehuti-Hetep and his wife Kayay. This monument in the upper portion of the stele, both on obverse and reverse, depicts scenes of adoration; one of Isis-Hathor standing among the branches of a tree, the other Osiris enthroned. The three heliotypes provided give excellent views of the texts and tableaux, and "Ancient Egypt" renders valuable service in thus publishing accounts of relics buried in private collections.

The false door of Ni-Kau-Ptah's sepulchre is a very early piece of Egyptian sculpture, for its text proves that he flourished under the sixth dynasty. He was priest of the Pharaoh Sahu-Ra, and also of an obelisk called Ra-em-sep. The king was buried at Abusir, and this obelisk and three others are mentioned in tomb texts at Sakkara. Tehuti, owner of the other stele, lived under the XIX. dynasty, one of his offices being that of Rower to King Mereuptah. He may have been partly of foreign extraction, for he is stated to have been a chief of the Mashakabu.

His highest post appears to have been that of "Regulator of Foreign Embassies of the King." Professor Flinders Petrie points out that in the remarkable list of temple property published in the last volume of the Oxyrhynchus Papyri the Syrian deity, Atargatis Bethenunis, is mentioned. This reference is to Beit Hanaun, and the "House Beautiful," or "Gracious Habitation," is a title of Derceto. This Beit Hanaun—and we do not at present know of another—is between two and three miles from Gaza, and only a little further than three miles more to the north is a valley in which Diodonis says that there was a sacred fish-pond of Derceto.

Among the reports of discoveries is an excellent summary of the excavations carried on by Lieut. G. Pézard and his brother, who is an experienced explorer in Persia, at the mound of Sabzabad, near to the British Residency at Bushire. This site seems to have ceased to have been a town ever since about 3,000 years ago, because the earliest inscribed relics found near the surface are bricks bearing the names of kings of Anzan and Susa, such as the great Shilkhat-in-Shanshiriak of 1100 B.C. or thereabouts. The place then belonged to the Elamites, and their goddess, Kirinsha, is mentioned. At a lower level in the hill quantities of pottery with archaic decorations, and stone weapons and implements, have been found, but scarcely any traces of metal.

TANGIER TO TEHERAN.

I was, perhaps, not quite clear enough in my recent notes on the history of Constantinople, and the apathy of the Turks in general towards such matters as historical research and archæology. My references to the subject were of a purely general character, and I merely wished to point out that the Turks as a race could hardly claim to pose as patrons of anything that made for enlightenment. This characteristic of the majority has not, I am well aware, prevented archæological researches of the greatest value being conducted in the country, and in particular in Constantinople. In this connection all my readers, I am confident, are familiar with the excellent work accomplished by the late Professor Alexander van Millingen, the fruits of whose labours resulted in a number of valuable works, notably "Byzantine Constantinople" and "Constantinople." Had he lived, I believe it was Professor van Millingen's desire to establish a school at Constantinople on the lines of the British School at Athens. Perhaps that may even now come to pass when happier days dawn.

***

It would seem that I am a novice in the matter of the interpretations placed upon prophecies in the Bible. Some weeks ago I referred to some remarks in a monthly magazine known as *The Young Man and Woman* on the subject of the twelfth chapter of Daniel, with special reference to current events in Palestine. Readers were assured that in that chapter the fall of Turkey "is definitely dated to the year and even day," and that the event was to take place in October, 1917. As I could not follow the line of reasoning on which the interpretation of the chapter and of the particular verse was based, I sought for further enlightenment. Some water has since flowed under London Bridge, and when I turn eagerly to pursue the subject in the next number of *The Young Man and Young Woman*, this is what I read:—

"Next October may pass with all the war drums beating. But wait; in that month the decisive turn will take place in events appertaining to Turkey, and the future historian will verify the Inspired word. How long it will take to wind things up I do not know, but although everything and everybody seem dead against my conclusion, I stand to October next as the decisive month of the war. In what form I know not, and do not wish to know. 'Secret things belong to God.' But that October, 1917, is pre-eminently marked in biblical prophetical datings—I am certain." And a little further on: "By the fall of Turkey in October next I do not mean that every Turk will be cleared out of Europe. I mean that by that date the Ottoman Empire will have ceased to have any influence, authority, or power in the councils of Europe."

***

The only comment required is, perhaps, a note of exclamation. But I should like to point out to my confident friend that the Inspiration of the Bible is not impugned because his interpretation of certain passages in it is challenged or criticised. My own feeling is that any individual who sets himself up to declare of a prophecy that the sole reference is to this, that or the other event and that hereafter there can be nothing that fits the passage better, because his limited human intelligence imagines that he foresees a few weeks ahead something that will fit it, is suffering from a malady which is apt to become dangerous when he asks for a little latitude to be given to Holy Scripture in order that it may not be held to clash with his interpretation.

***

That the prophecies have a distinct reference is not disputed; but I prefer to think that when they come to be fulfilled the fact will be obvious and will not depend on the guessing powers of a monthly magazine. Moreover, if the prophecy in question in the twelfth chapter of Daniel was meant to refer to the fall of Turkey in October, 1917, the fall of Turkey will take place "there and then," and we shall not have to follow the lead of the Editor of *The Young Man and Woman* and bring human sophistry to the aid of biblical inspiration by discovering that as a matter of fact in that month "the Ottoman Empire will have ceased to have any influence, authority, or power in the councils of Europe." Having knocked about the world a bit, I am inclined to think that these displays of religious gymnastics, unless handled very carefully and reverently to the exclusion of "I am certain" or "I know," do more harm than good to the cause of true Christianity, which my confident friend really wishes to promote.

THE PRESS ON THE NEAR EAST

The Plight of Serbia.

The Serbian paper *La Serbie*, published in Geneva under the editorship of Dr. L. Markovitch, addresses the following appeals to the Allies on behalf of the starving population remaining in that country:—

The internal situation in Serbia grows worse with every day that passes. The population waits for help which is being but insufficiently and inadequately sent to it. In our last issue we pointed out the reasons which our Allies put forward, and which, in our opinion, do not justify failure to send due help to a nation which is starving. With such help the sufferings of our people could be alleviated, and at the same time the effect of the blockade would not be weakened. The Swiss Committee, whose task it is to help Serbians, affirms that all foodstuffs and help sent for Serbia will be distributed among the Serbian population, and that at the same time the old system of rationing will not be altered.

Numbers of persons in Serbia are deprived of food to such an extent that they can only eat bread once a week, and several kinds of food are quite unobtainable, as, for instance, milk, which, if sent, could save from death the children who are still living. Suits and boots are not to be found in Serbia, or are so dear that in present circumstances nobody is able to procure them. Assistance of this kind, if sent, will not diminish the effect of the blockade, because the recipients would certainly not pass any of it on to enemies who give nothing to them.

It is easy to see that military requirements and the most elementary laws of humanity are reconcilable, and with a little more goodwill it is quite possible to achieve and render a great service to the Serbian nation. It has been the duty of the Serbian representatives to explain to our English and American Allies that this is not a question of helping our enemies, but of saving the Serbian race from starvation. We again appeal to the generosity so often and abundantly shown by English, French, and Americans to save an unfortunate kinsfolk from a terrible situation. Just the same might be said of the Serbians who are prisoners or interned, whose lot is most tragic.

The second appeal describes the people of Serbia as threatened with a catastrophe more terrible than the great retreat, and continues:—"It is the question of money, which is being insufficiently and inadequately sent to them by the Government of Serbia and the Serbian Red Cross Society in Geneva. The special Commission charged with the despatch and distribution of the money actually possesses 25,000 postcards sent by that number of families to Geneva imploring help in the matter of food and clothing, and the Red Cross Society is unable to reply to these appeals owing to lack of money and other means of help. The Serbian Red Cross Society can obtain no help from the Serbian Government, which, as a matter of fact, is quite dependent in financial matters upon our Allies, and her resources are very limited.

The Serbian Government is sending only half pay to the officials left in Serbia. No help can be sent to families of the working class or to those who have lost their menfolk during the war by the Serbian Government on account of its limited resources. From January 1, 1916, until August 1, 1917—i.e., during a period of nineteen months—the Serbian Government sent them only 1,200,000 francs, amounting to 70,000 francs a month.

The amount of money required to save the remainder of the heroic Serbian population, which is bearing stoically the most terrible rule of subjugation, is really insignificant compared with the fidelity and the sacrifices endured in this war.

We are addressing this urgent appeal to our Allies, and beg them not to hesitate to save the Serbian population, which is on the verge of complete extinction.

Roumania's Part in the War.

General Basil Rudeano, Chief of the Roumanian Military Mission in Paris, has given to a representative of the *Morning Post* a detailed description of events on the Roumanian front during the twelve months that have elapsed since the Roumanians entered the war. The effects of the operations on the Roumanian front during August, 1917, are thus summed up:—

1. General Averesco's offensive, which was begun in Moldavia five days after the Austro-German counter-offensive in the Bukovina and Galicia, forced the enemy not only to refrain from drawing troops from the Roumanian front to aid in that counter-offensive, but compelled them to limit their action on the Russian front by transferring two or three divisions thence to the Roumanian front.

2. The Austrians and Germans, for the first time, suffered a check with their famous pincers offensive on the Eastern front.

3. The resistance of the Roumanian Army and its splendid *moral* had a most salutary effect on the Russian Army in Roumania by reviving in them their historic warlike qualities.

4. These events have shown the great importance of the Roumanian front from the point of view of the war as a whole.

5. These events have also shown beyond doubt that it is of the greatest importance to the Allies to strengthen the effort of the Roumanian Army by keeping it provided with an abundance of munitions and war material of the most efficient description.

Austria's Position.

In an article in the *Sheffield Daily Telegraph* Mr. Julian Grande comments on the fact that both Austria and Hungary to-day live in a state of perpetual crisis.

Digitized by Google

After summarising the indications of this he continues:—

Now it may, I think, be assumed that Austria must collapse in the course of the winter unless Germany by her intrigues, or Austria herself by her insinuations, can procure peace. Among British people there is still, I fear, a tendency to show a certain leniency towards Austria. Of this tendency Austria is well aware, and she exploits it to the utmost, although knowing full well that she is wholly undeserving of it.

The Stockholm Conference is but one German machination among many; and those who in England are attempting to support it or desiring to attend it are not merely endangering the future peace of Europe, but traitors to the men who have shed their blood for the Allied cause. The so-called Socialists in Germany and the Clericals in Austria, who are now trying to bring about some sort of patched-up peace, are emissaries of the German and Austrian General Staffs, of men, that is, who are well aware to what condition Austria-Hungary is now really reduced.

Again, those who imagine that there is any real democratic current of opinion either in Austria or Germany show an astounding ignorance of both countries. Democracy will not prevail in either until both are thoroughly defeated, which will be possible if the war is vigorously prosecuted for another winter. The military party in both the Central Empires may then be expected to collapse like a house of cards. Preparations for the evil day may even now be noticed. For instance, Major-General Höfer, head of the Austrian Food Office, took occasion to deliver a speech in Salzburg so recently as August 16, a speech which is an instance of how Austria is now being taught to realise that she may be forced to capitulate.

MR. MONTAGU'S VISIT TO INDIA.

Reuter's Simla correspondent telegraphs that the following official statement has been issued there:—Mr. Montagu's absence from England cannot be prolonged. It will, therefore, be necessary for him to concentrate his attention on the matters referred to in his announcement in the House of Commons of August 20. All deputations will be received by Mr. Montagu and the Viceroy. No addresses on subjects other than those specified will be received. The selected members will be granted private interviews. All deputations will submit their requests through the local Governments. It is desired that the views of all sections of the community may be heard.

THE BULGARIAN OCCUPATION OF SERBIA

The forced recruiting of Serbians by the Bulgarians in occupied Serbia, as is known, provoked a sanguinary uprising on the part of the exasperated population. Repressive measures followed, the Bulgarians being furious at such a striking check on their attempts to represent these populations as purely Bulgarian, and as being delivered by Bulgaria from the Serbian yoke. The Bulgarian Government has nevertheless done everything possible in order to hide the sad events which have been going on in Serbia, and which have led to the destruction and annihilation of whole districts. The Bulgarian Minister at Berne, M. Passaroff, has declared in the *Journal* of M. Debrit:—"There has been no indigenous movement of the nature of those to which you refer. At the moment of his last unfortunate offensive General Sarrail ordered bands to go through mountain paths in the occupied territory. We pursued these bands and took precautionary measures in the places concerned. But that is all. No measures were taken affecting the population."

An authentic neutral witness has, however, just published, in regard to this rising, a document which places a somewhat different complexion on the matter. Dr. Ferriere, M. H. Micheli, and M. K. de Watteville, delegates of the National Committee of the Red Cross, in their report of their journey into Bulgaria and their visitation of some of the prisoners' camps in Bulgaria (documents published in August, 1917, by Messrs. Georg et Cie., Genève), observe, on page 11, as follows:—

> To refer again to the interned civilians, their number has been increased as a result of the insurrection, by no means unimportant, which occurred in the month of March, 1917, in those districts of Serbia occupied by the Bulgarian troops, especially in the environs of Nish, as well as by partial revolts which were still going on during our stay in Sofia in May last. As a consequence of these popular movements, and of the repressive measures which followed, a large number of villages were burnt to the ground and their wretched inhabitants—old men, women, and children—transported wholesale into Bulgaria. We have encountered in every camp that we have visited numerous interned Serbian civilians of both sexes and every age—from an infant of eight days to a poor old woman of ninety years, who was bringing to an end her sad existence in these tragic circumstances, having at least the consolation of dying amid some of her family.

PROMINENT INDIAN INDUSTRIES.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The report that Sir Arthur Steel-Maitland has been chosen as Parliamentary Secretary of the new Department which is being created to co-ordinate and improve our commercial intelligence system is a welcome indication that the Government does not intend to allow the grass to grow under its feet, and that the establishment of the Department will be pushed on with all convenient speed. Obviously the sooner it is set up the better, as much time must naturally elapse before it can be really ready to fulfil its destined rôle in relation to post-war trade and industry. The choice of Sir Arthur Steel-Maitland to control the new Department is, incidentally, a satisfactory one. Sir Arthur has a considerable expérience of the affairs of the Dominions which should stand him in good stead in his new sphere of work, and he also has a very thorough knowledge of industrial conditions in general. From some points of view the appointment of a business man pure and simple would have been preferable, but failing that the choice is as good as could have been made.

***

While on the subject of the new Department, I would like to emphasise once more what I consider to be one of the greatest shortcomings of our present system of commercial intelligence, and that is the meagre information contained in the Consular reports. Other countries are amply served in this way. Their Consuls devote no end of time and labour to the search for details likely to be of use to manufacturers, and their reports are often a model of concise and valuable news. The United States consular reports are as good an instance of this as can be found. They are a perfect mine of useful information, and they are, above all, invariably up to date. I wish I could say as much for many of the productions of this country's representatives. I have no doubt, however, that under the present conditions of the Consular Service the results are as good as can be expected. But that is not saying much, and the reorganisation of the Consular Services that is in view will fail in its purpose if it does not lead to this country being as well served in this respect as its rivals.

***

The report of the Ottoman Railway from Smyrna to Aidin, which has just been issued, is, like its immediate predecessors, little more than a mere formal document. This is inevitable in view of the fact that no details of the working of the line are obtainable, the only certain thing being, indeed, that the Turkish Government is still in occupation of the undertaking. The statement of accounts, naturally very brief, shows an income of a few pounds from transfer fees, while the debit balance of £269,800 brought over from December 31, after allowing for interest and administrative charges, is increased to £358,100, as against £187,400 twelve months ago. It only remains to note that certificates of interest for the six months have been sent to the Debenture stockholders in accordance with the arrangement which was entered into in 1915.

***

Attention was drawn in an article last week to the thorough character of the preparations the Germans are making with a view to the commercial struggle after the war. Fresh light is thrown on this question in a report in "German Foreign Trade Organisation," which has just been issued by the United States Department of Commerce. This report emphasises the fact that Germany is literally leaving nothing undone that may be calculated to help her to overcome the handicap under which she will resume trading relations with the greater part of the world. Here is the picture given by the report of the commercial education of the German business men of the future:—"In the German commercial high schools at the present time emphasis is more than ever being laid on the higher courses in preparation for foreign trade. At the commercial high school in Berlin, for the winter semester 1916-17, 115 separate courses of instruction were offered. At the same time, that is, in 1916, in the midst of the war, the University of Berlin was offering no less than 94 courses of study, especially referred to as 'preparing for commerce and industry.' These courses cover commercial and maritime law, economics, sociology, international law, government, history, geography and foreign languages."

***

As to the principal trade objective of the Germans, the following extract from the report, which fully confirms what was said in the article referred to above, should be of great interest to my readers:—"German exporters are already planning campaigns for extending their business in the Near East. Some of the German writers on foreign trade urge the advisability of making the most of the German opportunities in that region, and are pointing out that, if sufficient energy were bestowed on the development of Mesopotamia, it would become a second Egypt. They are pointing out that the thing for Germany to do is to establish herself so firmly in the countries to the East that in any future contingency Germany would have overland communication with big and flourishing markets and sources of supply for raw materials all the way east to the Persian Gulf and the Red Sea. The German Levant banks are already there. Germany has already taken a hand in the construction of railroads in the Near East, and if the Germans can further irrigation and the growth of industries in that section Germany's future in the world trade will be more secure. The Near East is apparently one of the great fields where German competition will be keenest."

***

The report of the Suez Canal directors, which is given elsewhere in this issue, bears witness to the influence of the war by the picture it gives of reduced traffic and receipts. Throughout the war there has been a more or less gradual decrease in the use of the Canal, and this process can hardly be expected to undergo any very great change until the end of the struggle. Included in the report are a number of statistical tables of the Canal traffic from 1870 to 1916, which emphasise far more clearly than words the break in the continuity of progress due to the war. 1912 and 1913 were the most successful years, and the present conditions are best indicated by the fact that the figures for 1916 are between those for 1903 and 1904.

***

Mr. T. H. Mawson, of the School of Civic Design, Liverpool University, has a great opportunity before him in the task he has undertaken of replanning and rebuilding Salonika. After the war the seaborne trade of the Balkans will increase out of all proportion to what it was before, and Salonika's position is such that much of the trade is bound to pass through that port. But Salonika will have to compete for the trade with rival ports on the Adriatic as well as in the Ægean, and the future of the port will largely depend on the measures that are now taken to afford adequate facilities in the shape of warehouses, harbour accommodation and the like. What is obviously required is a programme of replanning which will take future developments into full consideration.

***

A circular has just been issued by the leading Eastern banks to their customers in Ceylon directing attention to the urgent need for economising as much as possible owing to the difficulty in financing exports, and it is pointed out that the restricted means by which funds placed in London can be brought back again have rendered the negotiation of sterling bills more and more difficult. The provision of funds required for estate upkeep has, it is stated, been one of the heaviest burdens laid upon the banks, and they are of the opinion that the time has come for the whole question of production and estate expenditure to receive careful attention. In their view the question of the curtailment of crop outputs is a matter of great urgency, since, while present conditions continue, it will be impossible for them to negotiate estate finance bills on the scale on which they have hitherto been drawn. Thus the companies are faced with a most difficult situation which would appear to admit of but one solution. The question is one of great importance, since the conditions referred to are bound to affect India just as much as Ceylon.

THE SUDAN AND ITS ECONOMIC ADVANCE.

14.—The Upper Nile Province.

By PERCY F. MARTIN, F.R.G.S.

By the five strangely shaped mountain peaks of granite, which rise up abruptly from the plain you can easily recognize where the Upper Nile—once known as the Kodok Province—begins, and where its boundaries adjoin those of the White Nile. To use the word "mountain" is, perhaps, to employ an incorrect term, since no hill is of a greater altitude than 600 feet; but in a country so uniformly flat as the Sudan any small elevation appears to the eye of exaggerated importance. The superficial area of the province is small, being no more than 42,340 square miles, but its population is one of the largest of the different political divisions, being estimated at over 303,470, a total exceeded by two other provinces only, those of Bahr-el-Ghazal and Kordofan, with populations of 810,000 and 336,589 respectively. Consisting formerly of but five districts, or *mamurias*, the province has now eight, including the trading station of Gambeila Enclave, which, strictly speaking, is within the boundaries of Abyssinia and only leased by the Government of that Empire to the Government of the Sudan. At one time the Upper Nile Province formed one of the largest in the Sudan, but in January of 1906 the boundaries were altered, so that the portion which lies south of north latitude 7° 30′ was formed into what is now known as the Mongalla Province.

Systematic Development Needed.

The natural resources of the Upper Nile Province are considerable, and with systematic development they could unquestionably be made to yield far more liberally to the general revenue than they do. The prosperity of the people is marked, and if they could but be induced to settle down permanently to the pursuit of peaceful occupations an entirely different result might be achieved. Agriculture forms the principal occupation of the people. Most of the people's wealth is to be found in their cattle and sheep, of which immense herds may be met with in the interior of the country. Between the natives and the Arabs a very active trade is carried on; the former have learned the value of money, and this has had an unlooked-for advantage to the Government, since in many cases it can now collect its taxes and duties in cash instead of having to accept them in kind. In the instance of the Nuers, who form so considerable a proportion of the population, and who inhabit its vast tracts of grassland, the native wealth consists entirely in the possession of cattle, only sufficient grain for home consumption being cultivated. The Shilluks, however, are different. This tribe has a unique code of laws and dwells under consistently administered tribal discipline, and is, in fact, industrious and enterprising.

The eight *mamurias* of the province are:—Abwong, Gambeila, Kodok, Malakal, Melut, Nasser, Renk, and Tonga. The first-named place is inhabited by the Dinkas, and is located upon one of the main roads leading across country to a small village called Gore. Gambeila, already referred to, is a valuable trading post. Nasser, where a Government post is also situated, occupies one of the most attractive positions, from a scenic point of view, upon the left bank of the Sobat river. The whole district is well wooded, and contains several stretches of country strongly suggestive of well-kept English parklands. This is the locality occupied by the Nuer tribes, whose villages are numerous.

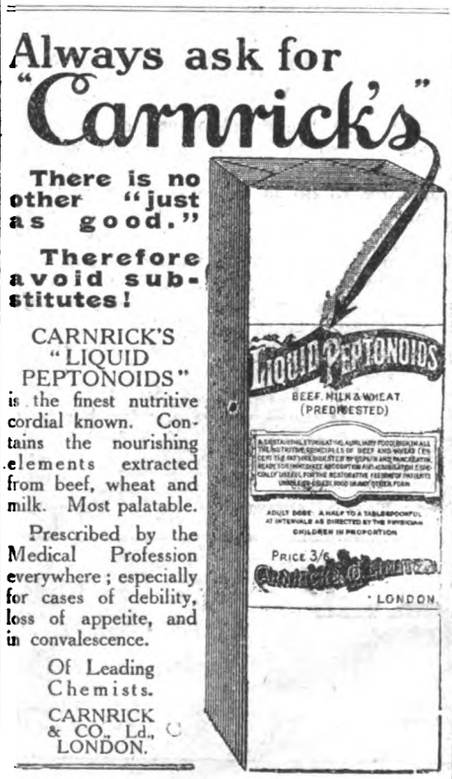
Malakal, the seat of the Provincial Government, has risen from an obscure village to a settlement of some importance, the site upon which it stands being considered more healthy than Kodok for Europeans. Kodok is a singularly prosaic and uninteresting place. Standing on the left bank of the river, the village is approached by a narrow backwater; the whole of the country around is extremely flat and covered with coarse grass, with here and there clusters of large umbrageous trees. The general aspect is monotonous, but it is improving somewhat as the place becomes more settled and better cared for. Renk, situated some 298 miles from Omdurman, is the headquarters of the district of the same name. It is a very trying place for any European to live in, the forests harbouring myriads of ferocious mosquitoes, whose attacks after sunset are beyond endurance.

The Outlook for the Future.

It is reasonable to take a hopeful view of the economic prospects of the Upper Nile Province. The key to the situation is the improved condition of the native population. It is said that every householder in the towns possesses at least one donkey, besides sheep and goats, while the generally high price of *dura* induces a large number of the natives to cultivate it assiduously. The growing of sesame is also on the increase, while greatly increased interest is taken in the picking of the *hashab* gum, especially by the Baggara Arabs of the north. The prospects of this industry are immense, and now that the newly-opened road from Um Barbeet to El Egeis is available, a considerable impetus has been given to its pursuit. It is believed that a good opening for the cultivation of cotton exists in this province, but the question of creating a ready market has still to be settled. The amount of labour available has also to be considered, as at present the demand is largely in excess of the supply. The ivory trade is, of course, languishing at the present time, but with the renewed demand from Europe and America after the war, this branch of the province's industries may be relied upon to revive.

The Government will, however, have to keep a careful eye upon the native elephant-hunters, whose methods threaten to exterminate the many herds of pachyderms that haunt the forests and plains of the Upper Nile province. Unauthorised chase of the elephant has gone on for so long that a marked decrease in the herds was noticed as long ago as 1913; since then the war in Europe has prevented the customary number of big-game hunters from taking their usual toll, but, in the absence of their exercising a beneficial supervision, the natives have been more reckless than ever in killing and burning the females and calves among the herds for the purpose of getting a few of the tuskers.

A commission has been appointed in Cyprus to enquire into and report on the extent, causes and effects of indebtedness in the Island, the realisation and distribution of the estates of debtors and insolvent persons, and whether any, and if so what, remedial measures are required for the protection of creditors and debtors and for the relief of the poorer classes of the community.



SUEZ CANAL AND THE WAR

A White Paper was issued on Monday containing the report of the directors of the Suez Canal for the past three years, together with some statistics for the first half of the present year. The most noticeable feature of the report is the decrease in traffic and receipts due to the war. We give below some extracts from the report.

The net tonnage for 1916 shows a decrease of 2,940,808 tons as compared with that of 1915, and a decrease of 7,084,148 tons as compared with that of 1914. The reduction of the transit dues to 6.25 frs. per ton from January 1, 1913, together with the reduction of tonnage, had the effect of reducing the gross receipts, which amounted in 1916 to 80,862,403 frs., as compared with 93,522,616 frs in 1915 and 122,248,853 frs. in 1914. In addition to the increase of 50 centimes per ton in transit dues, which came into effect on October 5, 1916, by a recent decision of the Council a further increase of 75 centimes per ton—making 8.50 frs. in all—to come into force on July 1, 1917, was made.

The number of vessels which passed through the Canal was 4,802 in 1914, 3,708 in 1915, and 31,110 in 1916, of which 3,078 in 1914, 2,736 in 1915, and 2,388 in 1916 carried the British flag. There was a decrease of 1,867,848 tons last year as compared with 1915 in the tonnage of British vessels, which amounted to 12,910,278 tons in 1914, 11,656,038 tons in 1915, and 9,788,190 tons in 1916. The tonnage of German vessels decreased from 3,352,287 tons in 1913 to 2,118,946 tons in 1914, and disappeared entirely in 1915 and 1916.

The percentage of British vessels and their net tonnage in 1916 was 76.8 and 79.4 respectively, as compared with 73.8 and 76.3 in 1915, and 64.1 and 66.5 in 1914. Of 1,885 merchant vessels and vessels in ballast of a net tonnage of 7,051,134 tons passing through the Canal in 1916, 1,509 ships of a net tonnage of 5,762,788 tons were British, being 80.5 per cent. of the number and 81.72 per cent. of the tonnage; Holland, Japan, France, Russia, Norway, Sweden, Denmark, Italy, America, Belgium, Spain, Roumania and Greece combined furnishing a total of 19.5 per cent. of the vessels and 18.28 per cent. of the tonnage of the carrying trade to the East through the Suez Canal.

In the ten years 1891-1900, the annual net tonnage ranged from 8,698,777 tons to 9,738,152 tons, and the transit receipts from 83,422,101 frs. to 90,623,608 frs. The average of the net tonnage was 8,588,947 tons, and of the transit receipts 80,006,013 frs.; while in 1916 the net tonnage amounted to 12,325,347 tons, and the transit receipts to 80,862,403 frs. The mean net tonnage per vessel, which in 1881 was only 1,517 tons, rose from 2,067 tons in 1891 to 2,926 tons in 1901, to 3,688 tons in 1911, and to 3,963 tons in 1916. Fifty steamers, exceeding 150 metres (492 feet) in length or more than 18 metres (59 feet) in breadth, with a draught of over 8 metres (26 feet 3 inches), passed through the Canal in 1916.

The number of troops carried through the Canal last year was 235,441, as against 119,812 in 1915 and 228,720 in 1914, being an increase of 115,629 over 1915. There was an increase of 66,421 French, 37,892 British, 8,647 Russian, 3,014 Italian, and 18 Spanish, against a decrease of 302 Dutch and 61 Belgian troops, compared with 1915. The number of civilians was 45,743 in 1916, against 86,653 in the preceding year, being a decrease of 40,910, while the number of special passengers was 1,846 in 1916, compared with 4,065 in 1915, or a decrease of 2,219.

The vessels of six lines (three British, two Dutch, and one Japanese) have ceased to use the Canal at the present time. The total traffic for the half-year ended June, 30, 1917, was 4,257,000 tons, as against 10,344,676 tons for the corresponding period of 1914. The net diminution in tonnage for the first half of 1917, as compared with the corresponding half-year of 1916, amounted to 2,000,924 tons. the reduction in commercial shipping being 2,121,801 tons, against an increase of 120,877 tons in ships used by the Italian, Greek, and Japanese Governments for military purposes.

The offices of the European Oilfields Corporation, Limited, have been removed to Worcester House, Wallbrook, E.C.

SEWING MACHINES FOR ADEN.

A Growing Demand.

For the following particulars of the trade in sewing machines with Aden we are indebted to a report of the United States Consul at Aden (Mr. Addison E. Southard) :—

The imports of sewing machines into Aden during the period since the beginning of the war have been greater than the total imports for the ten preceding years. The greatest number of machines imported during any one year from 1904 to 1913 was 269. The average annual imports during that ten-year period was 150 machines, compared with an annual average of 625 machines since the beginning of the war. In 1914, 269 sewing machines were imported, valued at $4,131 of which 23, valued at $496, came direct from the United States. This is the first time direct imports of American machines are credited in the Port Trust returns. In 1915 there were 580 machines imported, valued at $7,820, of which 48, worth $588, were imported direct from the United States. In 1916 there were 419 machines imported, valued at $4,899, but none came from the United States direct. Most of the imports for these three years were, however, American machines. They came to Aden from the English, Egyptian, and Indian agencies, and in the Aden import returns were credited to those countries.

The present year will probably show the largest sales since sewing machines were first sold in this market. There recently arrived a shipment of 600 machines of American make. The local agent estimates that of these, 100 machines will be sold in Aden, 200 in Abyssinia, 100 in Red Sea ports, and 200 in the Persian Gulf district. Aden is the distributing point for the sewing machine trade in the places named and in the Somaliland Protectorates. . . A good share of the increase may be attributed to the growing use of sewing machines among the natives, their greater purchasing power, owing to high prices obtained for many of their products, such as hides, skins, and gums, and to the effectiveness of more active selling methods on the part of local agents.

German Hold on the Market.

Before the war the trade of this district was largely supplied with cheap German-made machines, which were sold to dealers on favourable credit terms, and an active interest was also shown in pushing the sales. The next best sellers were the American made. They were, however, more expensive than the German makes and could not be secured by dealers upon the favourable credit terms offered by German exporters. Three well-known makes of German machines were sold in this market. Prices for hand machines ranged from $10 to $16 and foot-power machines sold from $25 to $30. Variations in these prices depended upon whether the machines had covers, attachments for special work, etc. Any considerably higher-priced machines would be beyond the average purchasing power of the natives, as this is not a market for expensive articles of any class. There are still a few German machines on the market, but the stocks are low.

Since the stoppage of supplies from Germany American machines have taken the lead. One American machine that was introduced in recent years sold at the popular price of 35 rupees ($11.35). It met with great favour until, according to the local dealer, high freight charges from America to Aden forced him to increase the price to 50 rupees ($16.22). There is, however, an opportunity for a greater increase in the sales of sewing machines, and the market is far from being fully developed. An American machine strongly established in this market is carried by the local agent in about ten different styles at prices ranging from 45 rupees ($14.60) to 300 rupees ($97.32). The demand, however, is principally for the lower-priced machines. A discount of 10 per cent. is given on cash purchases. Many machines are sold on the instalment plan.

Local Requirements.

There is a growing preference for foot-power over hand-power machines. Electrically operated machines could not be sold, as there is no general service electric plant in Aden. All machines for this market should be as nearly dust or sand proof as possible. Further, the climate of Aden quickly affects all metal parts susceptible to rust, unless protected with particular care. Much of the success of the American machines already sold here is due to the development of the market through a system of agencies which have long been established in Egypt and India. Being on the ground and familiar with local conditions they are much more successful in approaching the trade and placing their machines. Concerns attempting to work the market by means of correspondence are not apt to be so successful, unless they are fortunate enough to interest an active importer or dealer in taking up the introduction and sale of their machines. Persons interested in the market should send catalogues and price sheets to the local dealers. If possible, prices should be in English or Indian currency and quoted c.i.f. Aden. If f.o.b. quotations are given it is necessary to furnish an estimate of the freight and insurance charges from the port of shipment to Aden. There is no duty on sewing machines imported into Aden.

The Bengal Chamber of Commerce has received the following letter from the Government of Bengal, Commerce Department, dated Calcutta, July 31 :—I am directed to intimate, for the information of your Chamber, that the Secretary of State for India has agreed to the discharge of liabilities in Baghdad by approved Indian firms, provided the creditors in Baghdad are approved by the Government of India. I am also to say that there is no objection to Indian creditors accepting payments from Baghdad.

LANCASHIRE COTTON.

Slightly Increased Activity.

(From Our Own Correspondent.)

Manchester, Wednesday.

The tone of the market continues uncertain, but in certain quarters rather more business has been under consideration during the week. Definite information with regard to the decision of the Egyptian Government to limit the area under cotton for next season would be welcome, but it is understood the acreage will be fixed at 1,200,000 feddans. Lower prices in Bolton yarns cannot be expected, yet users hesitate to place orders freely. A little more business has been done, however, during the last few days. In cloth for Egypt a fair amount of inquiry has come through, but merchants are afraid of having goods on their hands which cannot be shipped, and a good deal of caution is now being exhibited in placing orders with manufacturers. According to telegrams, however, the situation in Cairo remains healthy. Although sized goods are still neglected for India a rather increased demand has come through in finishing and bleaching cloth for Calcutta and Bombay. Some exporters who have been nursing orders have been more disposed to operate. There has not been much activity for China. Buyers for several minor outlets have been by no means idle, and the turnover in piece goods may be described as rather larger than recently. Some manufacturers have derived support from war contracts, there being buying for our own Government and also for France. American yarns have been in rather increased request, and spinners tend to improve their position, especially producers of the superior marks. Only a miscellaneous trade has been done in export numbers.

OPENINGS FOR BRITISH TRADE.

Since the outbreak of the war, applications have been received at the Department of Commercial Intelligence from a large number of firms in all parts of the United Kingdom and abroad, who wish to get into communication with British manufacturers or producers of various classes of goods which have previously been obtained from Germany and Austria-Hungary.

Applications have been recorded (says the *Board of Trade Journal*) for the names of manufacturers or producers of the following (amongst other) articles. British manufacturers or producers of these articles now in a position to supply are invited to make application for the names of the enquirers :—Celluloid marking rings for poultry, chromic acid, curling irons, cheap (for Italy); glove-makers' waste, leather waste, such as roans, bucks chamois, suede etc.; machinery, etc: flexible shaft-driven portable tools, machinery for making toy marbles, small gear-cutting machines for cutting click gears; skins, basils, and kid; sodium sulphide, waste from women's and children's boot and shoe uppers, wood preservative, not containing coal tar oils, wooden shovels for margarine factories (for France).

Dr J. Collis Browne's Chlorodyne

Safeguard your Health with this Reliable Medicine.

Cuts short attacks of HYSTERIA, SPASMS, PALPITATION.

A true palliative in NEURALGIA, GOUT, TOOTHACHE, RHEUMATISM.

Checks and arrests FEVER, CROUP, AGUE.

ENGINEERING NOTES.

Cement for Russian Railways.

We had occasion in previous engineering notes to allude to the schemes for the construction of new railways in Russia after the war, and to the interest with which such schemes are followed by enterprising American groups. The committee which deals with the construction states in a recent report that the necessary new minimum mileage per annum cannot be estimated at less than 5,000 miles, and that to meet the requirements the Russian cement industry must be better developed. The import of cement into Russia before the war was considerable, as the home production was extremely small for many years. In 1912, for instance, it was only 10½ million barrels (of 10 poods); in 1913, 13½ million barrels; in 1914, 21 million barrels; and in 1915, 29½ million barrels. The war has proved a powerful stimulus in the development of the cement industry, seeing that in 1912 there were only thirty-four cement factories in existence, whilst on January 1, 1916, the number had risen to sixty-nine. The committee adds that "if a cement famine is to be averted, the present cement industry must be increased by at least 15 per cent." The question is worthy of attention, for it is well known that the whole of Asia Minor, Persia, and Southern Russia, besides the Balkan States, get very large supplies of cement annually from England and France, but especially from England, and the establishment of more cement factories in Southern Russia, as has apparently been recommended, will seriously affect the export of cement from England to those countries. The convenience and cheap rates of transport from Black Sea ports by sailing ships to any port in the Ægean Sea and Eastern Mediterranean will enable Russian cement to compete very effectively with any other European cement.

The Subsoil Plough.

In view of an unusual demand in the East for subsoil ploughs, it is evident that farmers have begun to understand the benefits derived from their use. Grain requires several tons of water to the acre, and in dry seasons, or in dry farming sections, the utmost care should be taken to conserve the moisture. When a subsoil plough has been used the water is retained in the little trenches made in the subsoil, and as the upper soil begins to dry the moisture spreads outward and upward, thus keeping the upper soil from baking or forming into what is known as hardpan. Another benefit obtained from the use of the subsoil plough is the loosening of the subsoil, so that the roots of growing plants can penetrate more deeply into the soil in search of the elements needed for their growth. British manufacturers would do well to introduce their subsoil ploughs to the East, where they, like other implements, can no longer be obtained *as usual* from Germany and Hungary.

Cork-faced Clutches.

The fitting of cork facings to cone clutches has, apparently, proved successful. An increased angle of about 16 degrees was necessary, compared with leather, and with this a very easy engagement was obtained as well as a positive disengagement. Contrary to expectations, the cork was found to be less susceptible to charring than leather under the effect of heavy duty and slippage. The results are sufficiently promising to suggest an important future for cork-faced cone clutches. American car makers are already experimenting with this invention.

The "Caterpillar" Tractor.

At the commencement of the war we had occasion to allude to the special features of the "caterpillar" tractor as an agricultural machine and later to note its remarkable adaptability for transport service on the dunes or on clay and soft soil, whether wet or dry. Its newer features and achievements on the battlefield consequent on its metamorphosis from "caterpillar" to a formidable and terrifying "tank" are not to be dealt with in these notes; but as in its original form, as a peaceful agricultural machine, it is still to the fore, and its services are fully appreciated by farmers at the present time, when scarcity of labour and war conditions are so embarrassing to them, a few notes concerning the efficiency of the "caterpillar" tractor for quick and economical cultivation, as proved in recent tests, should interest many farmers and landowners in the East.

The Tractor at Work.

The "caterpillar" at work is very interesting. The efficiency and speed with which it hauls the ploughs, and the results, from all points of view, are thought highly satisfactory by the farmers and experts, whilst its handling can be entrusted to an ordinary mechanic. One of the improved types of "caterpillars" was recently tested at work on stubble in association with, it is said, the largest plough procurable in this country—a six-furrow plough—and, according to reliable information, a very large space of land was ploughed on a consumption of fuel varying from 2½ to 3½ gallons of paraffin per acre, whilst eight and a-half acres were ploughed in six hours by a man who had never driven a tractor or even ploughed before he tried the "caterpillar." The same tractor has been working a 12-tine cultivator weighing 2½ tons, which, the owner declared, his steam tackle was not capable of efficiently hauling. These accomplishments are not surprising to those who are acquainted with the hauling and gripping power of the "caterpillar." The large sizes of "caterpillars" are specially suitable for large farms or for contract ploughing, whilst the small sizes can be employed in small holdings, etc.

Russian Demand for Locomotives.

Locomotive engine builders in the United Kingdom are, it is said, extremely busy, and so are those in America; but why the latter continue to look for, and are able to book new orders, while the former are, apparently, content with what they have in hand, and show no wish for more at present, is difficult to understand. According to the statement of a railway expert from Southern Russia, the demand for railway freight cars and locomotives is very large there, and it would seem impossible to meet it at the present time. The home car construction before the war amounted only to 1,450 locomotives and 32,000 cars for the whole Russian railway system. The Government has now decided to put aside annually a sum of 50,000,000 roubles, to be lent to new factories erected for the manufacture of cars and locomotives. In the meantime it is interesting to hear that American authorities estimate that recent foreign and domestic locomotive contracts accepted in that country are of the aggregate value of no less than £6,400,000. The number of engines ordered is 800, of which between 500 and 600 are for foreign buyers. Russia and France are the largest customers, but the orders also include engines for India, East Africa, Java, and the Belgian Congo.

Agricultural Machinery for Russia

Recent private and official reports state that the Russian agricultural districts on the Black Sea are in great want of agricultural machinery and implements. It is estimated that since the commencement of the war quite 50 per cent. of the machinery in the hands of the farmers in the districts of Rostov and Berdiansk has worn out and become useless. This applies specially to ploughs, harvesters, and threshers, and the cause is partly due to the extra work to which they have been put, and partly to their use by inexperienced people. A number of ploughs have been bought in Sweden by the Russian Ministry of Agriculture, and mowing, reaping, and binding machines have been ordered from the United States, Canada, and Sweden. It has previously been mentioned in these columns that during 1916, and even recently, American agents have been booking orders in these districts for machinery previously supplied by German and Austrian firms. They found the field clear of any other competitors, and, according to recent reports, have established themselves there. These districts were supplied about twenty years ago chiefly from the United Kingdom, and it will be the fault of British manufacturers if the present opportunity of regaining the market is lost.

GREEK CURRANTS.

Heavy Crop Forecasted.

Reports from the field indicate, says the United States Consul at Patras (Mr. A. B. Cooke) in a recent report that the Greek currant crop is in a very satisfactory condition. Despite a shortage of sulphur and sulphate of copper with which to fight the two chief foes of the currant vine, peronospotos and oidium, the vineyards do not seem to have suffered greatly up to date. Conservative estimates put the total prospective crop of dried currants at 160,000 tons. It is said that there are now on hand old stocks from 1916 amounting to some 50,000 tons. Most of these old stocks are too badly deteriorated for consumption as fruit, and will be used for the production of alcohol. About 20,000 tons of the old stocks are available for export purposes. This gives a total of 180,000 tons. As it is anticipated the legal "retention" will be in kind this season and not in cash, this would leave available for actual export some 135,000 tons of dried fruit.

Notwithstanding the anticipated heavy crop and the prospective shortage in tonnage to move the fruit to the world markets, Patras quotations remain firm. This steadiness is explained by local interests as due to the fact that there is a sharp demand for currants for wine-making purposes and also for the distillation of alcohol, both of which products have risen in price here more than 100 per cent. since December 1, 1916. Currants have also been consumed by the domestic market as food during the present year in quantities never heard of before and at high prices. Ordinary currants, which in normal times have retailed at 4 or 5 cents a pound, have sold during the past winter in the local markets as high as 15 cents a pound. Patras dealers maintain that these demands will continue into the new season, and that the shortage in exports will be balanced by the consumption in these new fields.

FRANCO-MOORISH FAIR AT RABAT.

A Franco-Moorish fair was to be opened at Rabat on September 15 and was expected to continue until the end of the month. The fair, says the *Board of Trade Journal*, is intended to be primarily a samples fair. Its programme includes: (1) Stalls for the sale of the products of local industries; (2) stalls for the sale of imported French products (perfumery, ironmongery, textiles, groceries, silks, passementerie, glassware, china, toys, etc.), all of which, it is remarked, should be cheap; (3) a display of articles and products of interest to agriculture; (4) the distribution of prizes for agriculture; and (5) numerous native attractions. The agricultural section will include a display of agricultural machinery and implements, and motor ploughing, land clearing, etc., competitions will take place. The fair buildings and grounds will cover about thirty acres.

FOLLOW-UP LETTERS.

An interesting point is raised by Mr. Alexander W. Weddell, United States Consul General at Athens, in a recent report in which he says:—Since the beginning of the European war many American firms have adopted the plan of following up original letters with one or more carbon copies, posted at dates subsequent to the mailing of the originals. It has frequently happened, however, that carbon copies of letters only have reached this office, with nothing to indicate the address of the writers. In such cases, where the originals were never received or where it was not possible to locate the senders through trade directories, no action on the part of the addressee has been possible. It is suggested that this difficulty could be obviated if the names and addresses of the firms were printed or stamped on the follow-up letters.

The Madras Government have under contemplation the establishment of a second agricultural college in the Northern Circars and the opening of a second engineering college in the same area.

PETROLEUM DEPOSITS IN MOROCCO.

A mission, directed by M. Gentil, has just completed its investigations as to petroleum deposits in the territory of the French protectorate of Morocco. M. Gentil, who is a member of the Faculté des Sciences, Paris (says a French contemporary), has been assisted in his researches by a number of reputed specialists.

The cost of the mission has been borne by a company, and the exploration has led to the delimitation of the zone in which the borings are to be undertaken. This drilling, moreover, will establish the truth as to whether the existing deposits can be exploited from an industrial point of view. The results of the inquiry made by the Gentil Mission are to be communicated as soon as possible to the Administration of the Protectorate, as well as to all the interests.

SOLE LEATHER CONTROLLED.

The Army Council gives notice that the control hitherto exercised by the War Department over leather is now extended so as to include all descriptions and classes of sole leather, including offals. The Army Council will proceed to arrange for the release of such quantities of sole leather as are not required for military purposes. The effect of this further control now established will be substantially to reduce the price of all that sole leather which has hitherto been free from any restriction under the Defence of the Realm Regulations. By this action prices of the various classes of leather will be brought approximately to their proper comparative values.

ADEN'S TRADE IN PEARL SHELLS.

Growing American Demand.

There has always been at least a limited American demand for Red Sea mother-of-pearl shells, says the United States Consul at Aden (Mr. Addison E. Southard) in a recent report, and inconsiderable shipments from Aden to the United States have been made from time to time. During the second quarter of the current year, however, the declared exports of mother-of-pearl shells from Aden to the United States have been greater in quantity and value than the total annual exports of the shells for any one of the past ten years. During this quarter 129,920 lbs., valued at $26,341, were shipped to the United States.

There are several pearl fisheries in the Red Sea and Gulf of Aden, and before the war the pearl-fishing industry and the trade in mother-of-pearl shells were important. For the three years preceding the war the annual exports of pearl shells from Aden averaged 539,280 lbs., valued at $113,233, the bulk of the exports going to the United Kingdom. Austria took the next largest amount. The pearl fisheries at present are not being worked to any considerable extent. The rest that the fishing-beds will have had will undoubtedly result in greater prosperity for the industry when the return of peace conditions permits it to be fully resumed.

The offices of the Madras and Southern Mahratta Railway, until further notice, will be at 25, Buckingham Palace Road, Westminster, S.W.1.

COMPANY REPORTS.

Smyrna-Aidin Railway.

The report of the Ottoman Railway from Smyrna to Aidin for the half-year ended June 30 last states that the Ottoman Government still remains in possession of the railway and its revenues. The accounts thus presented are incorporated with those from Smyrna to August 31, 1914, since which date no further returns have been received, and they are subject to adjustment as and when later returns are received. Certificates for the debenture interest for the half-year, amounting to £74,175, have been posted to the 4 per cent. and 5 per cent. debenture stockholders. hTe revenue account shows that the debit balance of £269,766 brought over from December 31, after allowing for interest and administrative charges, is increased to £358,149. The meeting will be held at Winchester House, Old Broad Street, E.C., September 25, at noon.

COMPANY NOTES.

Dividends, Payments, etc.

Messrs. R. Raphael and Sons, Austin Friars House, E.C., announce the numbers of Piræus, Athens and Peloponnesus Railway Company 4½ per cent. bonds drawn for repayment at par on October 15.

On the 30th instant a dividend at the rate of 5½ per cent. per annum on the Cumulative Preference shares of the Khedivial Mail Steamship company, less income-tax at the rate of 5s. in the £, for the six months to June 30, 1917, will be paid at the bank of Glyn Mills Currie and Co. The Preference transfer books will be closed from the 25th to the 30th instant, inclusive, for the preparation of dividend warants.

The directors of the Mercantile Bank of India announce an interim dividend at 6 per cent. for the half-year ended June 30 last.

The directors of the Eastern Telegraph Company announce the payment on the 15th proximo of the second quarterly interim dividend of 1½ per cent. on the ordinary stock, free of income-tax, in respect of profits for the year ending December 31, 1917.

The directors of the Eastern Extension Australasia and China Telegraph Company have declared a second quarterly interim dividend of 3s. per share, free of income-tax, in respect of profits for the year ending December 31 next, payable on the 15th proximo.

Oil Outputs.

Anglo-Egyptian.—Gemsah, week, 22 tons (previous week, 21 tons). Hurgada, 1,138 tons, against 4,379 tons.

Baku Russian.—Week ended September 8, 77,600 poods.

Bibi Eibat.—Production for week ending September 9, 51,750 poods, or 835 tons.

European Oilfields.—Production for week ending September 9, 75,500 poods.

Maikop Orient.—Plot 435a, Well 3.—production for week ending September 1, 10,500 poods; production for week ending September 8, 9,000 poods.

Maikop Pipeline and Transport.—Received for pumping week ended September 8, 52,370 poods (845 tons).

Russian Petroleum.—Week ended September 8, 39,600 poods.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses, and unsuccessful attacks during the week ended September 16 :—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft) :—

Arrivals	2,695
Sailings	2,737

British merchant vessels sunk by mine or submarine :—

1,600 tons gross or over	8
Under 1,600 tons gross	*20

British merchant vessels unsuccessfully attacked by submarines 6

British fishing vessel sunk 1

* Including nine sunk during week ended September 9.

ON 'CHANGE.

From Our Own Correspondent.

Throgmorton Avenue,
London, Thursday.

We have had again a very uninteresting week, and business has been reduced to a minimum. Changes in prices have been quite unimportant, and the general tone has been a fairly steady one. The error in Reuter's cable, to which we referred in our last week's report, has now been rectified and it turns out that the area which it is proposed to put under cotton next spring is 1,355,000 feddans.

In Government stocks, Egyptian Unifieds are a trifle quieter at 83½. Bank shares have been a steadier market. Some business has been done in Nationals at 16, but the price remains unaltered at 15⅞, with a good undertone. Agriculturals are 1 32 firmer at 5 31-32, some 500 shares which had been hanging over the market having now been placed.

In Anglo-Egyptians a few hundred shares have been done round 13¼. Land Banks are 1-16 quieter at 6 1-16. A few Delta Lights have been done at 6, and, in land shares, Delta Lands, after a fair amount of business between 13s. and 13s. 6d., finished 3d. down at 13s.

In New Egyptians there has also been a certain number of transactions between 13s. and 13s. 6d. Union Foncières are 2s. lower at 37s., and United Egyptian Lands are 3d. down at 1s.

In miscellaneous shares there have been a few transactions in Markets and Salts at generally unchanged prices, and there has been some support for Khedivial Mail round 31s.

In Greek stocks a small transaction was effected in 1884's round 59½, and Monopolies were done as low as 52½—half a point down. Otherwise there has been no change in prices.

Paris Bourse.

Quotations on Wednesday included :—Serbian 1895, 59.10 (unchanged); Crédit Foncier Egyptien, 765 (unchanged); Ottoman Bank, 480 (unchanged); Suez Canal shares, 4,585 (against 4,595).

Oil Shares.

On Wednesday Anglo-Egyptian (B) declined 3d. to 21s. 3d.—22s. 3d.

NEWS FROM ALL SOURCES.

Mr. William Knox D'Arcy, a director of the Anglo-Persian Oil Company, the Burma Oil Company and Campbell Praed and Co., who died on May 1, aged 67 years, left £984,012, the net personalty being £599,963.

1916-17 was not a good year for public companies in the Madras Presidency. During the year ended March 31, 1917, twelve new public companies were registered and twenty-seven ceased to exist. Apparently the war had little to do with these failures.

An exhibition of feminine art and industries, organised by L'Oeuvre des Industries Feminines en Egypte, will be held at the Jardin Rosette, Alexandria, from September 29 to October 7. The exhibition is under the patronage of her Highness the Sultana and Prince Ahmed Fouad.

According to reports from Turkestan the cotton planters there have decided to substitute cereals for cotton in order to solve the food shortage there.

September 11	230,000	100,000
September 14, 15	450,000	290,000
September 16	200,000	170,000
September 17	310,000	100,000

CONSTANTINOPLE RAILWAY TERMINUS DESTROYED.

Reuter's Zurich correspondent in a message dated September 15, says that the Swiss Insurance Company, Helvetia, has received a telegram from Constantinople, saying that the new railway station and two immense warehouses have been totally destroyed by fire, the damage done being estimated at over four million francs (£160,000). The station was built by the Germans as the terminus of the Bagdad Railway.

It has been decided to use oil instead of coal for the engines of the North Western Railway system in India. This decision is the result of experiments conducted over a long period. Oil tanks have been installed at Kiamari, and pipes will be laid between the tanks and Karachi Cantonment station.

ADMIRABLE SITES FOR WORKS, FACTORIES, ETC.

THE GREAT CENTRAL RAILWAY passes from the Metropolis Northwards through the centre of industrial England, throwing out its branches Eastward and Westward to the Coast. Its lines run over the great Coalfield which extends into the Counties of Yorkshire, Nottinghamshire, Derbyshire, and Lincolnshire, thus affording an easily accessible source of fuel supply.

¶ THIS COALFIELD IS THE LARGEST IN THE BRITISH ISLES, and was estimated by the Royal Commission of Coal Supplies (1905) to cover not only an area of approximately 4,066 square miles, but also to contain not less than forty-nine thousand million (49,000,000,000) tons of Coal. The Lancashire and North Wales Coalfields are also traversed by the Company's lines.

¶ THE NEW EASTERN PORT OF IMMINGHAM should particularly attract traders, as its modern equipment and accessibility at any time of the day or night, irrespective of tides, are important time and labour saving factors.

¶ ADJOINING THE GREAT CENTRAL RAILROAD at various parts of the system are situated VALUABLE SITES FOR WORKS, where, by the introduction of siding accommodation, goods can pass right into and directly out of the works, which GREATLY ASSISTS THE MANUFACTURER to attain his desired position in the World's Markets.

¶ For information, please communicate with the G.C.R. Publicity Office, 216, Marylebone Road, London, N.W.

¶ *Owners and Agents of LAND AND BUILDINGS FOR SALE OR TO BE LET near the Great Central Railway are requested to send particulars to the G.C. Estate Office, 12, Paton Street, Piccadilly, Manchester.*

SAM FAY, *General Manager.*

NOTES OF THE WEEK.

The battle continues to rage in Roumania, and no conclusion is yet visible. While the more excited correspondents are urging that Germany has shot her bolt, there is no sign yet that her efforts are at an end, or if they are, that they have not merely transferred their objective to the other end of the line, in the Baltic. In that region a further advance has been made, and now that Russia has repudiated both a separate peace and a civil war, it is quite likely that the Germans will prefer to concentrate their efforts in the north, where they can attempt to reach Petrograd, rather than to break through in Roumania. The former would appear to be the easier task in a military sense.

On the whole, the news from Russia has been less depressing, mainly because there has been less news, or else the correspondents have got tired of telegraphing manifestoes. Several more generals have refused the task of reorganising the army, but the non-effective troops are to be reduced; the panacea which will restore discipline and energy to the fleeing regiments, however, still remains to be found. In the political field there has been talk of harmonising the aims of the various provinces and peoples into an effective federation of States. It remains to be seen whether this can be done; certainly it will not be done if German agency can prevent it, since it becomes more and more Germany's interest to divide her eastern neighbour into a series of petty States. Russia appears dimly to perceive this danger, but whether she can overcome her present paralysis of will cannot be foreseen.

On one point a definite statement has been made. Poland has been promised full independence, and it is recognised that this implies an outlet to the sea to be effective; moreover, there is no adequate outlet in Lithuania. This indicates that in the opinion of Russia the Polish contention that the new Polish State should hold Danzig is sound—and Poland undoubtedly will recognise the sincerity of this statement, particularly in face of recent German equivocations on the subject. At the same time, it must be remembered that to deprive Germany of Danzig means to split not merely the German Empire but Prussia as well into two; and Germany would fight to the last cat, to use the Kaiser's words, before she would give that up. It would appear that the Russians, who were recently speaking of a people's peace as though it could be easily assured, do not quite realise how long a road a people's peace based on this particular assumption would prove.

Both Germany and Austria have purred like tigers in their answers to the Pope's peace note. They believe in disarmament (especially for other people), the freedom of the seas (especially for themselves), and universal peace (under their dominion). They omit any mention of territorial readjustments, they have forgotten to mention Belgium, Serbia or Roumania. The Pope is said to be pleased with these soft answers; His Holiness possibly feels it is something gained for Germany, the fire-eater, to profess to be mealy-mouthed, like the wolf in "Red Riding Hood." For our part, we prefer the frank sincerity of the answers given by Turkey and Bulgaria to the cant of Berlin and Vienna. Turkey wants the maintenance of full sovereignty over Turkish territory—a matter in which she has as much ground of complaint against her ally for demanding to exploit her by commercial treaties as against Britain for merely seizing a province or so. Bulgaria is understood to lay special stress on the principle of nationalities—and probably she will be able to demonstrate by the aid of German professors that all the desirable lands which she wishes to annex are really inhabited by Bulgarian nationals.

A curious episode marked the business of answering the note. Germany announced that Britain had offered peace to Berlin—an announcement which was speedily denied at Whitehall. The fact was that the British Government, before drafting its reply, asked some information from the Pope, and the Pope forwarded the question, which apparently he could not answer, to Germany, obviously with the best motives. This the German imagination—which appears to resemble a dyspeptic's digestive arrangements, in being usually too sluggish but occasionally disconcertingly rapid—construed into an offer of peace. It does not require much perspicuity to see that the information which the British Government required was about Belgium, and the German silence on that point is extremely eloquent.

Mr. Asquith's speech on the War Aims of the Allies at Leeds is an effective answer to the German and Austrian Notes. The latter are silent as to territorial restoration; the Allies insist that, besides restoration of Belgium and Alsace-Lorraine, "the just claims, long overdue, of Italy and Roumania" must be conceded; "there is heroic Serbia, who must not only be restored to her old home, but given the room to which she is entitled for her expanding national life. There is

Poland; there are the cases, not to be forgotten, of Greece and the Southern Slavs." Before there can be any peace, indeed before the actual fighting can cease, Mr. Asquith insists that Germany and Austria must admit these claims, since only secondary matters, of detail and not of principle, must be left over for the Peace Conference. It must be remembered that Mr. Asquith was speaking, not as a private member, but as one who is, on the occasion of a meeting of this kind, an authoritative exponent of the Government's aims. His declaration will be repeated during the next few days by actual members of the Government.

There is, then, no weakening whatever of our war aims, as the Germans have attempted to suggest in some quarters. Indeed, Admiral Tirpitz, who torpedoed himself some time ago and is now attempting to make for the safe harbour of office again under his own steam, seems to recognise the fact in his latest oration. It is true that, like the official Germans, he makes no reference to Serbia or the Near East at all—which has always been a secondary consideration to the German naval school—but he protests that if Germany evacuates Belgium, she will have lost the war. In this context we may point out that Serbia furnishes an exact parallel to Belgium.

The Kaiser has been to Sofia, where no doubt he has been calming his ally, who has given signs of late of being disturbed as to Bulgaria's share of the plunder. From Sofia William II. proceeded to the Roumanian front, where he congratulated the troops in his usual bombastic manner on their successes. By an oversight, however, he admitted that he did not know what the future had in store for Germany—the General Staff no doubt being uncertain at the moment whether they would be able to break through the Roumanian front. While the Kaiser was uttering these sentiments, the American Government was publishing full details of the devilish German plots against Roumania, which included the storing of poison and explosives in the German Legation at Bucharest, for use in case of need.

The atrocities committed by the Central Powers in Serbia seem to be endless. An account issued by the Serbian Legation states that a German general who visited Serbia asked why gallows had not yet been erected; the Austrians quickly took the hint and put up gallows in all the larger towns and villages, and pictures showing people hanging on them were soon circulated and distributed among the population. There are again a number of cases of deaths from starvation, disease and hard labour in the mines. These tragedies will only nerve the Serbian army to further exertions, and a determination to secure reparation.

A long article recently appeared in the *Corriere della Sera* on the Southern Slav question. Its friendliness and moderation of tone towards the Corfu agreement and the whole Jugoslav problem are excellent signs of the new feeling in Italy, which results mainly, no doubt, from the visit of Baron Sonnino to Paris and London and the reception of M. Pashitch in Rome. It may be hoped that in the next few months a similar friendly solution may be found to the long-standing difficulties between Greece and Italy. The outstanding questions in this case are perhaps more obstinate, but they are not beyond the power of true statecraft to settle amicably.

The public dissatisfaction at the continued silence of the War Office as regards military events on the Eastern fronts has not been met by the belated publication of Captain Nunn's despatch on the naval operations on the Tigris. It has been pointed out that no account has yet been published of the operations in Palestine, which terminated, or were not terminated, last April in the fight before Gaza, and that there can be no military object served in preserving this secrecy. Further, only a few lines have been published from time to time regarding Salonika, although months have passed since the last dispatch; while from Baghdad there has been nothing on the military side since General Maude's account of its capture.

Reference was made in these pages a few weeks ago to the recommendations of the Inter-Departmental Conference presided over by Lord Islington in regard to the system which is intended to take the place of indentured labour from India. The term has been invested with a considerable amount of bad repute, so that there has been a tendency to believe that nothing good could be associated with it. To some extent the reports of the Commissioners appointed in 1913 to investigate the conditions of life of Indian immigrants in various British colonies served to correct this erroneous impression; but the news that now reaches us from British Guiana bears striking testimony to the fact that indentured labour has not undermined the loyalty of the Indian colony. Many of the Indians working in British Guiana have been keen to enlist in the British Army. On a certain plantation on the west coast of the Demerara River several indentured East Indian labourers offered themselves as recruits for one of the contingents sent by the colony. Three of these were informed that they could not be accepted because they did not know English. After a time they returned to the manager of the plantation, telling him that they had been studying the language for the past three months, and considered that they were now efficient, and wished to be sent to the front, "to finish the war." Two of these had not yet completed their first indenture term of five years, and their desire to go to the front may, therefore, be taken as an indication that the East Indians in that colony appreciate the good treatment which they receive. Another Indian in British Guiana has devised a means of countering submarines, and he is anxious that his plan should be placed before the Admiralty in order that the submarine menace may be overcome.

The long-expected "Life of Sir Charles Dilke," which has just been published, contains numerous references to the politics of the Near East, which were among the multitudinous interests of that unfortunate statesman. Few of these have more than historical interest, for Dilke died before the Balkan League and the Balkan War; but his last conversation, with the late King George of Greece, may be quoted. It took place in 1910, when the King was in London on the occasion of King Edward VII.'s funeral. The King, who was inclined to deprecate the summoning of a national assembly, quoted the phrase once applied to himself, "Bon petit roi, manque d'energie." Dilke answered, "I don't know who said that, sir. Your prestige is exactly opposite to the German Emperor's prestige, but equally important to your country and peace. It may have been a fool who said it, but it was probably chaff." But Sir Charles took occasion to tell a very important member of the (royal) family that "Berlin and Athens were different." It is a pity that the hint so delicately administered was not taken; King Constantine has probably realised its truth during the past few weeks.

One other item is worth quoting. The 1880 Ministry of Gladstone—the "slip and slide Government"—which came into office pledged to retreat from South Africa and Afghanistan, had strongly criticised the British occupation of Cyprus in opposition, and in office had presented a statement declaring that there was no advantage, military or otherwise, in the retention of that island. The statement was underlined with an emphatic negative, the writer of which was Queen Victoria; the British remained in Cyprus. Again in 1885, when the same Government was trying to get out of its Egyptian difficulties, "We were informed that the Queen most strongly protested against our binding ourselves to leave Egypt." One cannot help feeling once again that Queen Victoria's foreign policy was more sensible than Gladstone's, and *a fortiori* better than Granville's; every political biography that is published reveals that more clearly.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, August 30.

War Gratuities to Government Staff.

The Commission specially appointed to look into the case of the junior Government employees and report on the financial assistance, if any, which should be given them to enable them to meet the increase that has taken place during the past year in the cost of living in Egypt, has made its report, and the Council of Ministers has decided to adopt its recommendations. A war gratuity is to be granted to all regular employees drawing £E16 per month and under, those drawing £E5 per month and under are to receive an addition of one-fifth of their pay, and all other employees one of £E1 per month. The increase is, therefore, on a scale varying from 20 per cent. to 6¼ per cent. Payments are to start from August 1, and will continue without alteration, subject to two months' clear notice in the *Journal Officiel*.

The gratuity is not a very large one, considering how living has increased of late, but all the same it is something, and the decision has been received in a grateful spirit by the officials concerned. A certain amount of relief has been afforded to the situation since the question of the small employees was first taken up by the reinsertion of cereals on the tariff and the rigid enforcement of the latter by the authorities. Prices of maize, rice, millet, etc., have been steadily falling, and that of wheat, which was specially left free, has shown a similar tendency, so that there is every hope that, with the gratuity now granted them the small officials will be well able to make both ends meet.

The Cotton Position.

No further announcement has as yet been made in connection with the project for the purchase of the seed from the 1917 cotton crop by the British Government, but details of the scheme are expected to be published very shortly. Meanwhile it is interesting to note that the decision of his Majesty's Government has had a steadying effect on the local market. It has caused people to wonder whether similar action will not soon be taken with regard to cotton itself, and although there is nothing to confirm this impression, it has been noticeable that speculators have kept off in a remarkable manner. That is all to the good. It is an open secret that the Government, with a view to providing for the cereal requirements of the country during the coming year, has decided to restrict the cotton area in 1918. Here, again, no details are forthcoming, but as the period of preparation for the crops to be sown before cotton is close at hand, it will not be long before a definite announcement of the extent to which the reduction will take place is made. It is interesting in this connection to note that in the first year of the war, when the cotton area was reduced from 1,755,000 feddans to 1,186,000 feddans, Egypt produced sufficient cereals for her own requirements and had still a margin left over for export.

The Question of Co-operation.

One of the more important after-war problems before the Anglo-Egyptian authorities is undoubtedly the introduction of some system of co-operation for the benefit of the agricultural population. A movement in this direction was, as a matter of fact, started some ten years ago, when some Egyptians with the encouragement of the present enlightened Sultan founded one or two co-operative societies. The ventures proved successful, but with two exceptions were only on a small scale. Impressed with the success, which had, however, attended the creation and working of these "syndicates," as they were called, the Government, in 1914, decided that the time had come when some definite step should be taken in the direction of providing the country with proper co-operative organization. A law was drafted, and had actually received the approval of the Legislative Assembly, when war broke out and put a stop to the project, as it did to so many others under consideration at that time. There is no doubt, however, that as soon as more peaceful conditions set in once more the project will have to be taken up again by the Government, for a study of the experience gained in other countries, notably in India, has shown the wide-reaching benefits, economic as well as social, which the introduction into Egypt of a well-organized and properly controlled co-operative system would confer on the Egyptians.

The few years which have had to elapse since the law was ready for promulgation will nevertheless not have been time lost. In the first place, it will be possible to amend the project in the light of fresh experience gained by other countries. Secondly, advantage has been taken of the interval imposed by the war on the introduction of the project to include a series of lectures on co-operation in the syllabus of the Higher School of Agriculture, so that every graduate proceeding thence from now onwards will have at least a grounding in co-operative theory, and thus will assist to spread and explain the object of the movement, when it receives its official impetus by the promulgation of the law. Thirdly, the prosperity which Egypt has enjoyed during the past three years has enabled the Agricultural Bank to recover arrears, and so put itself in a financial position where it could serve most usefully as a central bank for the co-operative movement.

In connection with the question of co-operation a most able book has just been published by Saddik Henein Bey, Director of the Administrative Service of the Ministry of Agriculture and Lecturer on Co-operation at the Higher School of Agriculture. Henein Bey has made an extended study of co-operation and of the methods employed in those countries where it has met with success. He has collected the result of his studies, together with a resumé and explanation of the various co-operative systems in vogue elsewhere, and a dissertation on the different aspects of the benefits of co-operation to such a country as Egypt, in a book which has attracted considerable attention in educational, economic, and scientific circles. Its outstanding features are the elegance of diction, the lucidity of the arguments brought forward, and the clear and logical manner in which the theme is developed. In his preface the author says that he has been impelled to publish his book by his conviction of the urgent necessity for the introduction of co-operation into Egypt and by the great success which has accompanied its application in countries which, compared with Egypt, have not required such assistance to anything like the same extent. Those who are qualified to speak on such matters consider the book an entirely new departure for this country, and are in agreement that it will be for many years to come the standard work for Egyptian students of co-operation. It is not often that one comes across an Egyptian who takes up a subject so earnestly and deeply, and is able to produce results of such value to the community. The initiative, enterprise, and ability displayed by Henein Bey in the publication of his book merit the highest commendation.

KHARTOUM NOTES.

(From a Correspondent.)

September 6.

The Departure of Mr. Bonham Carter.

The chief event of the last week has been the departure of Mr. Bonham Carter, C.M.G., the Legal Secretary, to take up a new appointment in Mesopotamia. He came out to the Sudan in 1899 to assume the duties of Legal Secretary, and organised the whole system of justice in the country, and he has been always looked upon by the natives as the fountain of Justice, not only from his official title but from his personal character. His generosity was very great and added to his reputation; he was regarded as combining British incorruptibility with Oriental generosity. In official circles he was not merely respected for his ability, but was relied upon for his level judgment, which, whilst it was ready to accept new ideas, was not liable to be carried away by enthusiasm for them. As one of those who planned and executed the administration of the Sudan from the beginning, his departure marks the end of a chapter in its history, and those who live there, whilst they cannot but admit the duty that calls him to a wider sphere, must salve the very genuine regret that they feel at his going by the certainty that he has before him a further successful career in a new and wider country, and by the expectancy of his success in that greater scope.

Mr. Bonham Carter spent three strenuous days in Khartoum. He entertained the members of his department at tea in his own house, and was the guest of honour that night at a dinner at the Sudan Club, at which the Governor-General presided in his capacity as president of the club. The following day there was a reception at the Egyptian Employees Club, at which Hassan Bey Ahmed, of the P.W.D., made an address and the Grand Kadi and the Mufti spoke in Arabic, and Mr. Bonham Carter replied. Apart from these social functions, there was inevitably a great deal of business to be done. A very large number of people came to the station to bid Mr. Bonham Carter God-speed, especially from Omdurman, where the inhabitants had had no opportunity of entertaining him or bidding him farewell, and the concourse of natives that had collected to do him honour was evidence, if any were needed, of the esteem and affection in which he was held.

General Stack and almost every official and officer in Khartoum were there to wish him luck, and Mr. Sterry, the Chief Judge, who succeeds him in the office of Legal Secretary, accompanied him as far as Shellal.

Among recent departures from Khartoum must be included that of Mr. Buckley, who has been transferred to the Assiout circle in Egypt, for which he started on the 3rd. He has been for a considerable time in charge of irrigation matters in the Sudan, and had applied for a change, which has now occurred. Mr. A. L. Prowde has taken his place at Khartoum.

Food Stuffs.

Crop prospects, which were a fortnight ago as pessimistic as possible, are now the exact opposite, and the probability is that there will be a very tolerable harvest, and in some parts it should amount to good. The rain of the last few days has been most cheering also to the temperament, and has spread a little freshness through the land.

The visit of Naus Bey to Khartoum to discuss the question of sugar supply has had some effect on the price; at least, as long as he was there it served to alarm the retailers. It is rumoured that the profiteering in the sugar trade is likely to receive a set-back shortly.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, September 2, 1917.

The debate on the reply to the King's Speech was closed with a long discourse from M. Venizelos, which occupied eight hours. The speech covered the whole period from the outbreak of the war to the present day, and exposed how ruinous to Greece was the policy adopted by King Constantine to gratify his personal feelings and his political ambitions regardless of his country's interests; it also indicated the extent to which that policy and the King's actions affected the whole course of the war. A large part of the speech was devoted to the events at the time when Turkey joined the Central Powers, and M. Venizelos explained how he did his utmost to unite Greece to the Allied Powers by his desire to send a force to the Dardanelles at the beginning of the bombardment, but how his plans, which had the entire support of the Cabinet and of ex-Ministers, were foiled by the military staff, who had assumed a pro-German attitude.

The result of the Dardanelles inquiry in England fully proved, M. Venizelos said, how the adoption of his policy would have resulted in the occupation of Constantinople and eventually in the making of peace with Turkey, and then Bulgaria would have remained neutral or would have joined the Allies. At the time when M. Venizelos was prepared to send a military force to the Dardanelles to co-operate with the naval operations there would have been practically no opposition to the landing. The Prime Minister spoke at great length on this episode, and showed how he had been thwarted by the King and the military staff, and how M. Streit, who was at that time Minister of Foreign Affairs in his Cabinet, was secretly working with the King against the policy of the Government.

The ignoring of the treaty with Serbia and the attitude of Bulgaria took up a good deal of M. Venizelos's attention, and he explained at length the difficulty he had to induce the King to mobilise when Bulgaria did so. It was on this occasion that Constantine said that he recognised that he was obliged to obey the will of his people, so far as the internal policy of his country was concerned, but when great questions of national policy were involved he considered the final decision remained with him. M. Venizelos referred to the negotiations which led to the landing of the Anglo-French troops at Salonika, and said that, after obtaining the King's approval to this course, a message came from his Majesty not to take any steps in the matter, the King's mind having been changed by his Germanised entourage. But his message arrived too late, for the decision had already been communicated to the British and French Ambassadors.

Reference was also made at some length to the illtreatment of the Greeks in Turkey, and particularly to the deportation of the Greek communities from the district of Aivali, from whence they were driven with great suffering to Broussa and elsewhere. Correspondence has been published showing how the Turks laid the blame on the Germans, who in turn used their stereotyped argument that it was a military necessity.

M. Venizelos referred to the republican spirit which some deputies had expressed in their speeches, but he said that he thought it was their duty to make another effort to allow Greece to be governed by a constitutional monarch. The debate closed with a vote of confidence to the Government, the motion stating that the Chamber, recognising the sacred character of international conventions and its obligations of alliance to Serbia, addresses a fraternal greeting to the heroic Serbian nation and, convinced that the whole Greek nation is ready for every sacrifice in order to participate in the universal struggle in favour of liberty on the side of the Allies, and in order to re-establish its national honour, to re-conquer lost territory, and to defend its national interests, approves of the address of the majority and expresses its entire confidence in the Government. This motion was unanimously carried by the 188 deputies present, the members of the Opposition having withdrawn from the Chamber during the delivery of the Premier's speech.

In the course of the debate one of the most interesting speeches was that of M. Politis, now Minister of Foreign Affairs, who, having been previously a permanent official at this Ministry, was thoroughly conversant with the course of events. He referred to the efforts made by Prince George to induce his brother to change his policy, and mentioned a telegram in which Prince George said that he implored King Constantine on his knees, with all his heart and in the interests of the country, to go ahead (join the Allies), and he implored him, with all feelings of devotion to his brother and to his country, to put an end to a situation full of dangers and serious consequences. "Believe me," said the Prince, "it is the supreme moment to save Greece from all her dangers." This was in April, when efforts were again being made to induce King Constantine to join the Allies. German influences, however, prevailed, and he maintained the policy which led him to his fate.

A commission has been formed to examine the laws passed by the illegally constituted Chambers, and it is proposed to commit the ex-Ministers to a High Court to be tried for high treason. In the meantime the process of cleansing is proceeding, and magistrates, ecclesiastics, and other public functionaries who have acted in opposition to the interests of the nation are being removed from office.

There are expressions of general regret that Sir Francis Elliot is not returning to Athens, but at the same time the choice of Lord Granville as his successor is received with much satisfaction.

The new French Ambassador, M. Billy, arrived on Friday, accompanied by M. Goddard, the French Under-Secretary for War.

CYPRUS NOTES.

(FROM A CORRESPONDENT.)

Greek Politicians.

Memorials asking for union with Greece have been launched by the Greek members of the Legislative Council, as anticipated. The authors probably profess to hope for success in the near future with more confidence than previously; for, whereas they had always to confess to themselves hitherto that they had a very bad case, they now consider that they have a very good one. At any rate, the object is to keep alive the idea that the Greek majority of the people hope that the island will soon form a part of Hellas. Whether the bulk of the population would really endorse the representations of their leaders is a very different matter. A referendum—if such a test were possible in the order of things, or could be honestly carried out—would probably show clearly that the people were averse from any change of administration, since they have discovered that, perhaps for the first time in history, they now have full security of life and property, and such freedom, in the best sense of the word, as is practicably possible. The bulk of the population remain quite indifferent to "politics," and only "demonstrate" when whipped up to a kind of fictitious excitement, at the bidding of the wirepullers, on some particular anniversary or other rare occasion. Most of the rural classes, moreover, are heavily indebted to moneylenders, and have to follow their lead; and the latter may sometimes impart a political colouring to the ideas of their clients. There is, at any rate, no desire for any change which would render them liable to military service. The Cypriot peasant is not a fighting man, and has never shown any disposition to take up arms; though some of the villagers, as well as townsmen, did indeed go as volunteers to the last Balkan wars. For many years after the occupation very few Greeks even enlisted in the local force of military police, though they have joined by degrees, until they have come to form about half the strength of that excellent force. The island Greeks are, however, it must be repeated, far from being a race of warriors like the Cretans and some other islanders. The Turkish element is, of course, entirely opposed to the despatch and the object of the memorials referred to.

The Censorship.

The Press Censorship has been practically removed, but a watchful eye is kept on Greek papers. Thus the *Kyprianos Phylax* ("Cyprus Guardian") was recently suspended for three months, and a fine was inflicted on the editor for publishing matter to which objection was taken. There seems, however, no valid reason why Greek papers thus muzzled should not be allowed to go out of the island, unnecessary loss and annoyance being now caused to proprietors at home and readers abroad. All sorts of rumours are afloat, *e.g.*, that the island is to be shortly handed over to Greece, that Famagusta is to be retained, and the scheme for a larger harbour carried out at a cost variously stated at from two to eight millions sterling.

At Troödos the absence of the troops is deplored by visitors and peasants alike. Expeditions on horseback are among the chief attractions. One of the best rides for those who can spare the time, and one which takes you through much interesting country, is down the steep valley of the Marathasa "river." After some miles of descent you reach the village of Pédoulas, which has become for Greek families of Nicosia what Platres, on the southern slope of Troödos, is for those of Limassol and Egypt. Here, two hotels have sprung up, and are well filled. Pédoulas and the neighbouring village of Móutulas are the great cherry producing villages, and grafts from English trees having been introduced, the native fruit has been greatly improved. Just below lies the village of Kalopanagiotes, famed for its sulphur springs, which are of great benefit for rheumatic and other affections; the water being also often conveyed to other places. Lower down you pass the "black hills" of slag which mark the site of ancient copper mines; and then, about four miles from the sea, you reach the large village of Lefka, abounding in luxuriant gardens, which supply many parts of the island with lemons and oranges. The water which runs down this valley has given rise to protracted law suits between Lefka, which found its supply and its "rights" seriously affected, and the upper villages, which appropriated more and more of the water for their growing needs. The dispute which arose, after going before the District and Appeal Courts of Nicosia, was finally taken before the Privy Council in London, the costs having, it is said, amounted to over £12,000. To the south-west of Lefka lie the ruins of Soli, to which Solon the legislator is said to have advised migration from other localities. An interesting alternative journey takes you up another valley, enables you to visit Katydhata, near the monastery of Skouriótissa ("Our Lady of the Slag"), where the American Mining Company is at work in copper mines, and back through Evrykhou, the western terminus of the Central (and only) Railway of Cyprus; through the picturesque, but steep, village of Kakopetria, and lastly through magnificent regions of the pine forest. Rides such as this, and many others, enable you to enjoy what is one of the principal charms of Cyprus, viz., the scenery of the wooded heights and valleys of the great Troödos and Adelphi ranges.

SYRIAN NOTES.

(FROM A CORRESPONDENT.)

The Beyrout Protestant College.

According to information received from a reliable source, on the rupture of diplomatic relations between Turkey and the United States of America, the Vali ordered the closing of the Syrian Protestant College at Beyrout. In view, however, of the great services that this institution has rendered to the country, and thanks to the prestige which its president enjoys with the authorities, the Ottoman Government ordered its reopening, and, a fortnight later, the normal course of college life was resumed. There was no interference with the staff, the students, the college property, or its equipment. Indeed, in spite of the prevailing famine and the impossibility of getting supplies from outside, owing to the blockade, the college continued to supply the needs of the students as in the past, and was able to do so, it is said, on the strength of the facilities which Jemal Pasha accorded to the college. If this should be the case, it will constitute one act of humanity in a somewhat black record. The Commencement Exercises and the ceremony of the distribution of diplomas and prizes took place as usual at the end of June last. The health of the students was good throughout, and while typhus fever raged in the town and claimed many victims, there were only a few cases inside the college, and these were confined chiefly to the servants. Only one Egyptian student died of this disease.

It should be mentioned to the great credit of the college faculty that, in spite of the interruption of the remittances from the parents and the increasing difficulty of obtaining foodstuffs, the Egyptian students were kept on, and the college was satisfied with receipts from them for the amounts due. None of these students was called up for military service. At the end of the academic year the college used to take the students who found it inconvenient to return to their homes abroad to the village of Shweir, in the Lebanon, for the summer vacation. This year, however, owing to the difficulty of getting foodstuffs on the mountain, these students, who are mostly Egyptians, were kept in the college. It has been announced that the college will, as usual, open on October 10 next; but it is thought improbable that any students will be accepted as boarders save those who have no homes in Syria or the Lebanon. The American College has thus been a kind of oasis of peace and plenty in the midst of a desert of misery.

The Maronite Patriarch.

According to news received from reliable quarters, the Maronite Patriarch has at last been exiled to an unknown destination in Turkey. This aged prelate has for some time past been living practically in self-exile in his remote summer residence at Diman, and it was thought that his retirement from public life, coupled with the fact of the infirmity of old age, would have made the Turkish authorities spare him this indignity. It is understood, however, that the Vatican is exercising all its influence with a view to the return of this high dignitary to his patriarchal seat.

ROUMANIAN NOTES.

(From a Correspondent.)

A German Intrigue?

Simultaneously with the Russian disaster in Galicia, and with the extremely powerful effort of Mackensen to conquer the last portion of Roumanian territory, a carefully organised intrigue has been set afoot. Its place of origin can be easily discerned; it is more difficult to survey its aim. News came through first that MM. Carp and Marghiloman had paid a visit to Berlin, "in connection with a weighty political question" suggested Wolff's Agency. We then learned that the German authorities had embarked upon extensive industrial and economic schemes in occupied Roumania, an action which indicated that a thorough reorganisation of the administration of the country was contemplated. And gradually information and suggestion began to abound in the enemy Press, to the effect that the idea of transforming Roumania into a sort of appendix of the Central Powers was being seriously considered. To that end a new Roumanian Government was to be called into being in Bucharest, which should proclaim that the Government in Jassy no more represented the country, and which should make without further delay a separate peace with the Central Powers. Such a policy, it is stated, has met with the support of various prominent Roumanians, amongst others of the Bessarabian Professor Constantin Stere, who remained in Bucharest when that town had to be abandoned. Why continue the present lethargic existence? Roumania had better submit to the inevitable, and enter upon a close union with the Powers of Central Europe.

It is hardly necessary for us to pay serious attention to such vagaries. That MM. Carp and Marghiloman have gone to Berlin is quite possible; but that they have gone there for the purpose of offering their country for sale no one could make us believe, and certainly not Wolff's Agency. The German Press ought really to show more common sense; they ought to know that the genial schemes of the German Foreign Office are not worth a day's life, unless the German War Office has also the power permanently to enforce them. The whole affair is obviously but another of the numerous and very naïve German attempts to sow dissension amongst the Roumanians and to discredit them in the eyes of the Allies. Why waste time and energy in such a way, whilst there are so many things which want attending to in Germany and in Austria-Hungary?

The most amusing incident of this episode is that its only effect has been to scare part of the Hungarian Press. The Hungarians are not at all anxious to add another seven and a-half million Roumanians to the three and a-half whom they already rule, a development "which would turn Bucharest into a centre of anti-Magyar agitation," warns the *Budapesti Hirlap*. The Roumanian question would become an insoluble internal problem of the monarchy, and the Hungarians would lose their directing position in its policy. This, it may be noted, is a somewhat careless avowal that the Hungarian supremacy is not based on any special ability on their part, but on the suppression of the voice of the other nationalities. "For Hungary," continues the paper in question, "the ruin of Serbia and Roumania is the best result of the war, for it has left her a free hand towards the nationalities"—which says a good deal for the future. The best thing, it suggests, is to make of Roumania a present to Bulgaria, otherwise we risk disappointing a friend in order to favour an enemy "who would bring 'the horse of Troy' into the house." The Magyars are a generous people!

The Reforms.

The two Chambers have now passed the final text of the Reform Bill, which modifies Article 19 of the Constitution referring to expropriation, and Articles 56 and 57 referring to the franchise and the organisation of the Legislature.

The extensive domains belonging to the families of great landowners will be cut up in virtue of the new dispositions introduced in Article 19, and will be distributed to the peasants under the following conditions:—

From the 3,180,000 hectares (ha. = 2½ acres) of arable land belonging to 5,300 owners who possess more than 100 ha., 2 mil. ha. of private property will be distributed to the peasants. This will be done in a proportion varying from 30 to 95 per cent., according to the size of the estate, and on the basis of a progressive scale to be expounded in a special law, the details of which are to be fixed in the next session of Parliament. In addition to these 2 mil. ha. of private property, there will be expropriated, in their totality, in order to be distributed to the peasants: the Crown lands, the lands belonging to the State, the estates belonging to various private and public bodies (monasteries, hospitals, companies, etc., etc.), the lands of the "absentees," that is of those owners who have themselves never cultivated their estates, and, finally, the lands of foreigners, whether by birth, marriage, or naturalisation.

The expropriated owners will be compensated in 5 per cent. redeemable Government stock, the nominal value counting as real value. The value of the lands will be determined by specially appointed commissions, against whose decisions the owners will be able to appeal to a Central Commission, and, in the last resort, to the ordinary Courts of Appeal. Recognised oil-lands up to 12,000 ha. will not be divided, but their owners will have to supply an equal extent of arable land, either in the same or in a neighbouring district. The average extent of the largest estates will probably not exceed in the future 250 ha.

The new law will have to be promulgated within six months from the liberation of the occupied territory. As the distribution of the estates will require, however, a number of years for its completion, a provisional division will be first carried out on each of these estates, the cultivation of which will be entrusted to the peasants inhabiting them, who will exploit them on the lines of agricultural co-operative associations.

Article 56, in its new form, provides that the Chamber of Deputies shall be composed of members elected by universal franchise, the ballot being secret and direct. There are, moreover, two interesting innovations. The measure which was rejected by the English Parliament, proportional representation, has been accepted without much difficulty by the Roumanian Legislature. In addition, in order to counteract the apathy of the illiterate and overworked peasant, and to make the franchise really universal, the exercise of the right of vote has been made a compulsory duty. The Senate will consist in future, as until now, of elected members, and of members by right. But the details of its constitution have been left to be determined by the special laws, the elaboration of which will form the task of the next parliamentary session. A revolution has been peacefully achieved in Roumania. The nature of its fruits will depend upon the sincerity with which the new dispositions will be applied, and upon the extent to which the social and economic conditions of the masses will be improved, in order to render them capable of enjoying usefully their new rights and exercising properly their new duties.

GERMAN PLOTS IN ROUMANIA.

Reuter's Agency has received the following official details regarding the disclosures made by Mr. Lansing concerning the diabolical plot against Roumania organised by the Germans in Bucharest. Although only now announced in Washington by the Secretary of State, the facts have been known officially for a long time, and, after exhaustive inquiries, were printed in pamphlet form. This account sets forth that the accredited representatives of Germany in Roumania had been guilty of acts described as "dastardly and devilish." German diplomatic couriers who were exempted by international privilege from the supervision of the Roumanian police had conveyed from the German Consulate at Brasso, in Hungary, to the German Consulate at Bucharest boxes of infernal machines and tubes of bacilli. These had been smuggled into the German Consulate, and on the day before Roumania declared war were transferred to the German Legation, which had been handed over to the American Minister on the departure of the German Minister.

At 11 in the morning of October 5 the Secretary of the American Legation and the Roumanian Prefect of Police went to the Legation, where the porter—a German, who had been in the service of the Legation for over twenty years—said that a box and several cases had been buried in the garden. The man declared that he had helped to bury the cases, which he had been warned to handle very carefully. Digging operations brought to light fifty "Bickford cords," with charges, and then fifty metal boxes. At another spot in the garden, protected by a covering of firewood, was found a box, bearing in red wax the German Consulate seal and the following direction:—"By King's Messenger! Very secret! Not to be thrown! Bucharest.—For Herr Kostoff. To His Honour the Colonel Military Attaché to the Imperial Bulgarian Embassy at Bucharest, Herr Samagieff." Beneath this first wrapper was a second, with the following direction:—"Very secret! By Tela. —To the Royal Colonel and Military Attaché, His Honour Herr von ——." The name had been rubbed out, but traces of the letters H A M . . . T . I N were recognisable (Colonel von Hammerstein was the German Military Attaché). Inside the box was a typewritten note in German to the following effect:—"Herewith 4 (four) tubes for horses and 4 for horned cattle. For use as directed. Each tube is sufficient for 200 head. If possible, administer direct through the animal's mouth; if not, in its fodder. Should be obliged for a little report on success with you. If there should be good news to report, Herr K.'s presence here for a day desirable."

In six little wooden boxes were found test-tubes filled with yellowish fluid. These phials and the cartridges were then sent away to be reported on. The latter were found by the Military Laboratory to be high explosives, with nitrate of ammonium and brotzl of great destructive effect. In the case of the test-tubes the Institute of Bacteriology reported that they contained glanders and anthrax bacilli of very virulent culture.

NEAR EAST BOOKSHELF.

RUSSIA'S RELATIONS WITH EUROPE.*

M. Gregor Alexinski is favourably known in this country as the author of a series of works describing the modern evolution of Russia. His latest work traces her relations with Europe since the ninth century of our era. Her plains were sparsely peopled by Slavs descended from early waves of the great Aryan migration. They lived in a state approaching anarchy until the arrival of Scandinavian adventurers, who organised three principalities in Northern Russia; and a few generations later certain Byzantine missionaries introduced Christianity, together with ideals of government borrowed from the Asiatic despotism which had ousted decadent Rome from eastern Europe. At a later date Germans belonging to the Hanseatic League gave Russia the mechanism of commerce, and it was subsequently developed by Jewish immigrants, whose share in the evolution of Russia's economic life has apparently escaped M. Alexinski's notice. Commercial jealousy is a frequent cause of warfare. The petty principalities and republics which came into being were rent with discord, and therefore powerless to resist the invasion of Tartar hordes which swept over Russia in the twelfth century. For two hundred years her people bore a yoke which would have crushed a less vital race. In 1480 their deliverance was achieved by Ivan III., Prince of Moscow, who afterwards destroyed the autonomy of other principalities and assumed the title of Hospodar, or Tsar, with the arms of the defunct Byzantine empire. Personal rule has the enormous disadvantage of depending for its success on the personal equation. A statesman who happens to be born in the purple may hasten the stages of his subjects' civilisation; an ambitious soldier may plunge them into ruinous wars of conquest; a megalomaniac may bring the principles of government into contempt; a ruler without energy or character may become the puppet of an intriguing clique. All Russia's Tsars belonged to one or more of these categories, and the ties of blood which bound their dynasty with Germans have always been used to thwart their empire's normal development. Thus Peter the Great's reforms were vitiated by his servile imitation of German models. Throughout the eighteenth century Russia was virtually ruled by a German colony. Well-meaning Alexander I. fell under the sway of reaction incarnate in the German Metternich. His successor, Nicholas I., established a Tartaro-Prussian despotism which came into disastrous collision with Western Europe. Alexander the Second's effort to set his house in order was well-nigh nullified by German agency. In our own day we find the Kaiser thrusting his cousin into a fatal conflict with Japan in order to give scope to Pan-German designs on the rest of the world. We find German influence in Turkey concentrated on efforts to prevent Russia from expanding southwards and south-eastwards; while her only outlet on the north-east became a Prussian lake. Finally, we see the ex-Tsar, who began a struggle for liberation so nobly, hemmed in by a barbed wire entanglement cast around him by German gold. All Russia's friends devoutly hope that the barriers erected by selfish and unscrupulous policy may disappear under the new regime. For her sons are a northern people instinctively seeking union with Western Europe. The converse of Napoleon's famous dictum applies to them; he might, indeed, have said with far greater truth, "Scratch a German and you will find a Hun." The Russian nature is receptive enough to assimilate every phase of European thought; but it is unfortunately dominated by discordant ideas in rapid succession. These characteristics explain the chameleon-like changes which have swept over the brand-new republic since the memorable revolution of Easter, 1917. M. Alexinski's book should be studied by all who desire to forecast the somewhat nebulous future of our great Ally. Its value would be increased, if he had paid some attention to chronological sequence and provided it with an index. He is deeply indebted to Mr. Bernard Miall, whose translation of our author's MS. shows consummate command of English and Russian idioms.

F. H. S.

BOOK NOTES.

Mr. John Murray will shortly publish the official history of "The Indian Corps in France." The work, which was originally undertaken at Lord Kitchener's request by Captain Sir Frederick Smith, and was completed by Lieut.-Colonel J. W. B. Merewether, C.I.E., is based on Corps and Divisional diaries. Earl Curzon of Kedleston has contributed the introduction to the book.

Considerable light will be thrown on the full extent of German influence in Turkey and the responsibility of German officialdom for the crime of the Armenian massacres in "Inside Constantinople," by Mr. Lewis Einstein, which Mr. Murray also announces for early publication. The author was formerly Minister Plenipotentiary in the U. S. Diplomatic Service, and was sent to Constantinople early in 1915 as special agent at the American Embassy.

Another book dealing with the same subject, and entitled "Two Years of War, Seen at Constantinople. Sketches of German and Young-Turkish Morals and Politics," by Dr. Harry Stuermer, will shortly be published by Messrs. Hodder and Stoughton.

Messrs. Allen and Unwin are about to issue "Czech Folk-Tales" (translated), by "J. B.," containing a collection of some of the most characteristic Czecho-Slovak tales which have not hitherto appeared in English.

"The Amateur Diplomat: A Novel," by Hugh S. Eayrs and T. B. Costain, is a "Ruritanian Novel," staged in a Middle East State. It is published by Messrs. Hodder and Stoughton at 5s. net.

"The Everlasting Quest," a poem by Mr. Henry L. Webb, which is nearly ready for publication by Messrs. Macmillan, tells the ancient Babylonian story of Gilgamesh who, refusing the love of the goddess Ishtor, is stricken with leprosy.

SYRIA AND PALESTINE RELIEF FUND.

Arrangements are being made for collections at churches, chapels, and mission halls throughout the country on Sunday, January 27, 1918, for the Syria and Palestine Relief Fund. Missionary societies of all denominations are co-operating to relieve the terrible distress. Food, medicine, and clothing are already entering Palestine, and goods stored in Egypt will continue to be sent to the country as further access is obtained. So vast is the work that it is estimated the fund will ultimately require £300,000, of which the sum of £50,000 is urgently needed to meet present requirements. All communications should be addressed to the Secretary, Syria and Palestine Relief Fund, 110, Victoria Street, Westminster, S.W. 1, from whom all information may be obtained.

NEW MOROCCO POSTAGE STAMPS.

A Paris contemporary announces that the issue of new Morocco postage stamps took place on September 1. The new postage stamps comprise six different types, representing the most interesting monuments of Morocco, viz.:—The Hassan Tower, Rabat, for the values 1c., 2c., and 3c.; Bab Dkaken, of Fez, for the values 5c., 10c., and 15c.; The Chellah Gateway, Rabat, for the values 20c., 25c., and 30c.; The Koutoubia of Marrakesh, for the values 35c., 40c., and 45c.; Bab Mansour de Meknes, for the values 50c. and 1f.; The Ruins of Volubilis, for the values 2f., 5f., and 10f. The stamps have been designed by M. de la Nézière.

*"Russia and Europe." By Gregor Alexinski. Translated from the MSS. by Bernard Miall. (London: T. Fisher Unwin. 10s. 6d. net).

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. September. 26	1917. September. 13	Friday	1335. Dulheggia. 11	5678. Tishri. 12
29	16	Saturday.....	12	13
30 October.	17	Sunday	13	14
1	18	Monday	14	15
2	19	Tuesday	15	16
3	20	Wednesday	16	17
4	21	Thursday	17	18

The Sultan of Egypt has returned to Cairo.

Colonel Popovitch, of the Serbian Army, has arrived in London from Petrograd.

Colonel Dragutin Dimitrivitch, of the Serbian Army, has left London for Salonika.

Captain Maximovitch, of the Serbian Army, left London on September 24 for Paris.

The Earl and Countess of Bessborough are passing the recess at Bessborough, Piltown, Kilkenny.

The Holy Carpet, with the pilgrims from Egypt, is reported to have reached Mecca on September 19.

According to a Vienna telegram, the ex-Khedive of Egypt is going to Constantinople early in October.

M. Dendramis, Secretary to the Greek Legation at Jassy, has left London for Roumania to resume his duties.

Colonel Koutsis, Military Attaché to the Greek Legation at Jassy, left London on September 20 for Athens.

Sir West Ridgeway underwent an operation at a nursing home on September 26, and is making good progress.

The American Red Cross Mission has arrived at Corfu, and was received by M. Pasitch, the Serbian Prime Minister.

Mr. G. Lionda, Managing Director of Lionda and Co., Ltd., has left England for Greece.

Mr. Sophianos, Greek Consul at Port Said, has been transferred to the Diplomatic Service, and has been replaced by Mr. Chalikiopoulos.

The Roumanian Minister and other prominent Roumanians now visiting London were entertained at dinner on September 24 at the Lyceum Club.

It is officially notified that persons travelling to Greece must now be in possession of passports bearing the visé of a Greek Diplomatic or Consular officer.

The King has authorised Mr. G. H. Morgan, lately an Inspector of the Egyptian Survey Department, to wear the Insignia of the Third Class of the Order of the Nile.

The Royal Engineers, at a railhead on the Suez Canal, are stated to have been so pleased with the entertainment at a Y.M.C.A. tent given by Miss Lena Ashwell's Concent Party that they "put it through" by telephone to soldiers in the trenches ten miles away.

Mr. Aftab Ahmad Khan, who was recently appointed to the Council of the Secretary of State for India, has arrived from India, and has taken his seat on the Council.

Earl Curzon of Kedleston had an audience of the King prior to the Council on September 24, and Sir J. Rennell Rodd had an audience of his Majesty after the Council.

Judge Amos, Councillor at the Native Court of Appeal, has arrived in Cairo from England, and has taken up his new work in connection with the abolition of the Capitulations.

It is reported that at a Congress of the Committee of Union and Progress on September 18 Talaat Pasha was re-elected President, and Midhat Shukri Bey and Hussein Djahid Vice-Presidents.

The death occurred from malaria on September 11, at Salonika, of Nurse Elizabeth Marjorie Gordon (Elma), V.A.D., eldest daughter of the late General William Gordon, of Anadoul, Croydon.

All male Ottoman subjects born in 1872, whether free from military service or not, have been called to the colours. Those living in Germany have been ordered to return to Constantinople immediately.

Reuter's Odessa correspondent states that General Mavrocordato, Chief of the Military Household of the King of Roumania, has been appointed representative of the Roumanian Headquarters on the staff of General Sarrail.

It is stated that the explosion and fire at the Constantinople terminus of the Baghdad Railway destroyed enormous quantities of war material, which had been collected there for use by a great expedition intended for the reconquest of Baghdad.

The King has approved the appointment of Sir Ali Imam, K.C.S.I., to be a Judge of the High Court of Judicature at Patna, in the place of Mr. Justice Sharf-ud-din, who has resigned on appointment to the Executive Council of the Lieutenant-Governor of Bihar and Orissa.

Mr. H. MacMichael, Sub-Governor, Darfur Province; Mr. Francis Atterbury, Inspector, Slave Trade Repression Department; and Mr. A. Hall, Inspector, Darfur Province, who had been holding the temporary rank of Kaimakam since the Darfur Expedition started, have now relinquished that rank.

Sheikh Salem-el-Bishri, Rector of Al Azhar University, Cairo, died on September 21 at the age of ninety-three. He retained possession of all his faculties to the last. Sir Reginald Wingate, the High Commissioner, was present on Saturday at the funeral, which is stated to have been one of the largest ever seen in Cairo.

The marriage arranged between Lieutenant Cecil Mansfeldt Norman, Rifle Brigade, and Helen Leman, daughter of the late Commander W. Aves, Royal Indian Marine, and Mrs. Aves, Normandie House, Cheltenham, will take place on Wednesday, October 17, at St. Margaret's Church, Westminster, at two o'clock.

A marriage has been arranged, and will shortly take place, between Lieutenant E. M. Daniel, R.F.A., youngest son of Mr. A. Y. Daniel, Ceylon, and Miss Agnes Sidney Wilkins, youngest daughter of the late Mr. Sidney William Wilkins, of The Quarry, Oxted, and the London Stock Exchange, and Mrs. Wilkins, of 116, Lexham Gardens.

Captain Guynemer, the famous French aviator, who has been reported as missing since September 11, was at one time an employee of the Paris branch of the Imperial Ottoman Bank, though he had left some little time when war broke out. For his services he has been decorated with the riband of the Legion of Honour, the Military Medal, and the War Cross.

The marriage was celebrated at Bakewell, Derby, on September 20, of the Rev. Arthur Rupert Browne-Wilkinson, son of the Rev. H. Browne-Wilkinson, of Nottingham, formerly curate at Bakewell, and for the last three years stationed at the Missionary College at Trichinopoly, and Miss Theresa Caroline Abraham, second daughter of the Bishop of Derby, Dr. Abraham, and Mrs. Charles Abraham, of the Vicarage, Bakewell. The Bishop of Southwell officiated at the service.

The members appointed in India to the Calcutta University Commission are Sir Ashutosh Mukharji, C.S.I., Judge of the High Court and Vice-Chancellor of the Calcutta University; Mr. W. W. Hornell, Director of Public Instruction, Bengal; and Dr. Zia-ud-din-Ahmed, C.I.E., of the Mohammedan Anglo-Oriental College, Aligarh. As already announced, the Chairman of the Commission will be Dr. Michael E. Sadler, C.B., Vice-Chancellor of the Leeds University. With him will be associated also the three other members appointed in the United Kingdom, viz., Mr. P. J. Hartog, C.I.E., London University; Professor Ramsay Muir, Manchester University; and Professor J. W. Gregory, Glasgow University.

TRAGEDY OF MONTENEGRO,

THE SMALLEST AND POOREST OF OUR ALLIES.

MONTENEGRIN RED CROSS AND RELIEF FUND

(Registered in City of London. Section 1. War Charities 1916)

needs £700 WEEKLY for Feeding Prisoners interned in Austria-Hungary.

Donations will be much appreciated and gratefully acknowledged by the Hon. Treasurer, LADY ROPER PARKINGTON, Claridge's Hotel, Brook Street, London, W.1.

APPOINTMENTS, PROMOTIONS, ETC.

Mr. Slater, Inspector, Khartoum Province, has been transferred to Kordofan Province.

Mr. C. H. Page, Assistant Director of Steamers, Sudan Government, has been appointed Acting Director to that Department in succession to the late Lewa W. B. Drury Pasha.

El Bimbashi J. L. Garstin, Sudan Government, has been promoted to the rank of Kaimakam, and has been transferred to the Supplies Department, E.A., as Assistant Director of that Department.

According to the *Egyptian Gazette*, Price Bey, Chief Sanitary Engineer, Department of Public Health, is to be kept in the service of the Government for a further period of not more than six months by a decision of the Council of Ministers.

Bimbashi J. A. Anketell Jones, A. B. James, and A. C. Frame, D.S.O., recently seconded for service with the Sudan Government, have been appointed Inspectors, Nuba Mountains Province, Berber Province, and Darfur Province respectively.

Bimbashi E. F. N. Burton, Inspector Bahr el Ghazal Province, Bimbashi A. J. Matthew, Inspector Kassala, and Bimbashi T. G. N. Bardwell, Inspector Kordofan, have been appointed magistrates of the first class under the code of criminal procedure.

Said Shoucair Pasha, Director-General of Accounts, Sudan Government, has been granted the Second Class of the Order of the Nile, and Mr. A. C. Parker, Secretary of the Sudan Railways Department, has been granted the Fourth Class of the same Order.

Major F. E. Evans, D.S.O., and Captain H. G. V. Huggett have been attached to the Egyptian Army as special service officers, and granted the temporary rank of Bimbashi. The services of the former have been placed at the disposal of the Sudan Government, and the latter has been attached to a Sudanese battalion.

His Highness the Sultan has been graciously pleased to confer the Order of the Nile, Fourth Class, on El Kaimakam S. M. Castle Bey, Blue Nile District; El Kaimakam D. H. Thorburn Bey, Sudanese; El Kaimakam J. L. Garstin Bey, Department of Supplies; El Kaimakam E. G. S. Hall Bey, Sudan Government; El Bimbashi D. Mills, Eastern Arab Corps; El Bimbashi S. McK. Saunders, Medical Corps; and El Bimbashi E. G. Warren, Sudanese, for valuable services in connection with the operations in Darfur last year.

Mr. Allen Smith, Sudan Public Works Department, and Mr. J. A. Bristow-Jones, Steamers Department, have also received the Order of the Nile, Fourth and Fifth Class respectively, for services in connection with the Darfur operations.

OBITUARY.

Mrs. Ellen Streater, widow of Mr. Jasper Streater, of Constantinople, died at Tooting Bec on September 18, aged seventy-three years.

We announce with regret the death of Mr. G. J. Stevens, the war correspondent, who was killed in the air-raid on Monday night. Mr. Stevens, who represented the *Daily Chronicle* in the Græco-Turkish War, was home on leave from Athens, where he was the correspondent of the *Daily Telegraph*. His wife was also injured in the raid.

Colonel Frederick Firebrace, R.E., whose death occurred recently, was chairman of the Great Indian Peninsula Railway Company. He received his commission in 1861, and joined the Indian Public Works Department as assistant engineer in the North-West Provinces. He was subsequently manager of the Rajputana State Railway, consulting engineer and joint secretary to Government in the Railway Branch, Bombay, and was promoted chief engineer in 1891.

The death has occurred in London of M. Frano Supilo, the Croatian Deputy, who led the Serbo-Croatian Coalition which prosecuted Dr. Friedjung, the Austrian historian in 1909 for false accusations of treason. M. Supilo had the good fortune to be in Switzerland on the outbreak of war, and thus escaped the persecution to which his friends were subjected by the Austro-Hungarian authorities. He came to England, where he was instrumental in organising the Southern Slav Committee.

Brevet-Colonel Francis Aylmer Maxwell, V.C., C.S.I., D.S.O., I.A., who was killed in action on September 21, was one of the few surviving members of Lord Kitchener's Indian Staff. Of his contemporaries General Hubert Hamilton, Colonel Fitzgerald, Colonel Raymond Marker and Colonel Victor Brooke have already fallen in the war. Colonel Maxwell entered the Indian Staff Corps from the Royal Sussex Regiment in 1893. His active service was seen in the Waziristan Expedition 1894-5, the operations in Chitral 1895, on the North-West Frontier 1897-8, the Tirah Expedition 1897-8, and the South African War 1899-1902. He gained the D.S.O. in the Tirah Expedition and the V.C. in the South African War. In 1910 Colonel Maxwell was Military Secretary to the Viceroy of India.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

ALLEN.—On September 21, at Cockley Cley Hall, Swaffham, Norfolk, the wife of Francis Allen, of a son—Raymond Claude Stafford.

JESSOP.—On September 26, at 9, Rue Maamoun, Moharrem Bey, the wife of A. W. Jessop, the Anglo-Egyptian Bank, Ltd., of a daughter.

STEPHENSON.—On September 27, the wife of Allan Stephenson, Mustafa Pasha, Ramleh, of a son.

MARRIAGE.

DICKEN-OGDEN.—On September 6, at H.B.M. Consulate and St. Mark's, Shoubra, Charles Vernon, eldest son of Admiral Dicken, of Norton, Winchester, to Alice Mary, eldest daughter of the late Mr. William Ogden, Public Works Department, Bombay, India.

DEATH.

SAWYER.—On September 24, at Mansura, Ronald Sawyer, only son of B. P. C. Sawyer and Mrs. Sawyer.

WHERE TO STAY.

FRIDAY, SEPTEMBER 28, 1917.

EGYPT AND THE WAR.

After a considerable spell of unexampled prosperity Egypt is experiencing practically the first interruption in the normal course of her affairs since the early days of the war. From the time when the initial dislocation caused by the outbreak of the European conflict had been overcome and the Imperial troops proved more than an adequate substitute for the lost tourist traffic, the country until now has been in the fortunate position of having gained much and lost little, if anything, by the war. Save for a shortage of coal and a certain precariousness in her communications due to submarine activities in the Mediterranean, Egypt has experienced few of the inconveniences that have modified existence in other countries within the zone of military operations. But the prolongation of the conflict has found a weak spot in her dependence upon sea-borne traffic for some of the prime necessaries of life. Accordingly, a special department is to be created for the control of supplies, and it is evident that organisation on scientific lines will be required to enable the country to face the immediate future with the least discomfort to itself. The first step has been to ensure that the shortage in imported cereals and flour shall be made good by increased home production. Accordingly, for the second time the area to be sown under cotton—Egypt's most paying crop—is to be restricted; but whereas the embargo of 1914 was prompted by fears which did not materialise and corresponded roughly to the reduction which would have taken place as a result of actual economic conditions, this year the restriction is enforced when cotton is fetching high prices, and the tendency would be to extend rather than to reduce the acreage under the plant. The economic aspect of the subject is dealt with elsewhere in this issue. Here it is only necessary to say that in the reasons given for the restriction the Egyptian Government is clearly on safer ground than it was in 1914. It will have been able to gauge the extent to which it is liable to be confronted with a shortage of foodstuffs next year, and however drastic the measure it has felt obliged to take, it cannot be blamed for refusing to run risks of a very grave character. The announcement that an exceptionally high Nile—the highest for twenty-three years—is anticipated may help to mitigate individual hardships and reconcile the fellahin to this particular enactment.

Egypt's experience during the war has provided a wonderful testimony to the soundness of the principles on which the administration has been based during recent years. The necessity of forgoing part of the large profits which cotton is now bringing in—last autumn it doubled in price within a space of three months—represents practically the only additional financial burden which the people have been called upon to shoulder during the last three years. Various measures were adopted to meet the special circumstances in which the country was placed by the outbreak of war, such as the fixing of maximum prices, the regulation of monetary and banking problems; but there has been no fresh direct taxation, and the greatly enhanced revenue has been obtained without requiring the taxpayer to make any greater direct contribution than the low one which was in force before the war. The danger of a long uninterrupted spell of prosperity lies in the fact that it may induce the belief in the country that the whole financial and economic structure is now resting on such firm foundations that henceforth it can be trusted to look after itself and to be independent of any peculiar wisdom or skill on the part of those who may be responsible for its maintenance. Such a view, however, ignores the potentialities of Egypt and the shortness of the distance that she has covered so far compared with that which is still ahead before a reasonable goal appears in sight. In no respect is this feature more apparent than in regard to public works, many of which are in abeyance owing to the war, and, it is to be feared, cannot yet secure the necessary sanction for their inception in spite of the favourable aspect of the financial situation. In the history of a country as in that of most businesses a stage is sooner or later reached when the more modest achievements of the early days are found wholly inadequate for the new conditions, and expansion on a comparatively large scale has to be faced, if the headway already made is not to be sacrificed. Egypt has approached this stage, and can no longer afford to be satisfied with what she has already accomplished or to accept it as a hard-and-fast model to which the future has to be moulded.

Apart from not regarding what past administrations have done for Egypt as the maximum of her achievements for all time, it is perhaps especially desirable that there should not be a stereotyped tradition attaching to the High Commissionership. In the case of both Lord Cromer and Lord Kitchener their individual prestige was such that it was inevitable that all the reins of government should find their way into their hands, and to none would the position seem more natural than to the Ministers and the advisers who were mainly concerned to carry out the policy of the chief British official. Sir Reginald Wingate has succeeded to the post with practically the same claims to one-man rule; but it is obvious that the supply of this type of representative is not inexhaustible. In the real interests of Egypt it may be doubted whether it is desirable that it should be; and for this reason we shall hope that the present High Commissioner will signalise his tenure of office by a determined effort to secure a wider devolution of responsibility among the higher Government officials. For a country to advance evenly along the road of administrative and economic progress it is better that the motive power should be as widely distributed as possible; and the interests of Egypt require that the traditions of high purpose and successful achievement should not be restricted to the High Commissionership, but should extend to all the Ministries as well. In this connection Sir Reginald Wingate is fortunate in having as Prime Minister Rushdi Pasha, who combines first-rate ability with readiness for responsibility. The return of Lord Edward Cecil to Egypt to resume the duties of Financial Adviser would seem to suggest that the High Commissioner prefers to have in the Government men capable of independent thought, who can be relied upon to state their own views, and will not necessarily look to him for all the motive power in Egyptian administration. If this interpretation should be right, Sir Reginald Wingate will already have set foot on a path which may be expected to link his name as a benefactor of Egypt with those of his great predecessors.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2.

THE ANTI-MONTENEGRIN CAMPAIGN.

By ALEX. DEVINE.

The series of slanders which have been permitted to appear in the English Press directed against Montenegro and her King present characteristics so regrettable as to be as difficult of English comprehension as they are opposed to all English notions of decency and fair-play. "Cricket" is not played in the Balkans, and it must never be forgotten by English students of Balkan questions that the mentality of many of these peoples cannot be measured by that of London, Paris, New York, or Rome.

The process which the "propaganda" against Montenegro has adopted may be stated briefly to be as follows:

First, the amiable suggestion that Montenegro and Serbia are one and the same, followed by a complete ignoring of the individual claims of the former State, then the spreading of evil rumour; and, finally, owing to the dignified silence of the King and Government of Montenegro (which, by the way, has no diplomatic representative in England), an open campaign full of untruths and calumnies.

The sources of these statements are easy to trace. They emanate in the first place from a certain party of political people and office-seekers (an element always most dangerous in the Balkans), a clique which is spending very considerable sums of money in a campaign for a great Serbia that is to absorb all the Slav peoples. This plan is not by any means to be confused with the legitimate and most desirable project of a federation of the Slav peoples; it aims at the establishment of a huge kingdom under the leadership of Serbia itself (which country, by the way, has only recently emerged from a period of political confusion, which their sufferings and bravery in recent years incline us to forget), under the leadership of the Karageorgevitch dynasty.

Standing in the way of this policy of absorption are many elements, but the chief is that of the older and prouder dynasty of Montenegro, and as a result King Nicholas has been the main object of the propagandists' determined attack. They have enlisted in their campaign the services of M. André Radovitch, the ex-Premier of Montenegro.

With regard to M. Radovitch, I have only a few words that I wish to say. I know him well; he has been my personal guest both in this country and in France and Italy, and I have not the faintest unfriendly feeling towards him. I simply believe him to be a misguided man. His political record is as extraordinary and strange as alone can be found in the Balkan countries. All, however, that need be said here is this: here we have a man who was Chief Minister to Montenegro, from whose lips I have on many occasions heard expressions of loyalty and devotion and the assurance of the loyalty and devotion of Montenegro to the Allied cause. He has now accomplished a complete *volte face*, and is working with all his power for the extinction of her dynasty. That M. Radovitch should stand aloof might possibly be understood, but that he should place his services at the disposal of the enemies of his old King and work against all that he once stood for is amply sufficient in itself to discredit him in the minds of fair-minded, unprejudiced people in this country.

Associated with M. Radovitch is a society of which apparently only he and one or two others are members (a society called "Le Comité Monténégrin pour l'Union Nationale"), using such influence as it can on the Continent of Europe. In addition to a perusal of the society's official *Bulletin Monténégrin*, I have had the advantage of receiving a long personal letter from M. Radovitch, in which he pours out his soul and sets forth all his grievances and all the scandals that he has directed against the King; in fact, a very full and intimate "apologia" for his action and conduct. Between the several publications, therefore, and M. Radovitch we may be said to possess all that the enemies of Montenegro can possibly say against the little country and her King.

I am in a position to state that there is not one single word of truth in the insinuations and charges impugning the absolute integrity and loyalty of King Nicholas towards his Allies, and I am perfectly confident that, despite the ability and strength of his opponents, they will fail simply because they are not "of the Truth." It is not seemly or desirable that these two sister nations (which really but for the machinations of wire-pullers are one at heart) should enter the public lists and engage in controversy and recrimination in the public Press, forgetful of the fact that they are Allied nations. Why at a time like the present, when there are such terrific world-wide issues at stake (compared with which either Montenegro or Serbia loom very small)—why at a time like this, when both countries are faced with the horrible problem of their dying and starving native populations, their equally miserable interned prisoners in Austria, and their refugees in Europe, one ounce of energy or one moment of time should be occupied in repelling or replying to these shameless attacks, it is difficult to justify.

Montenegro has never attacked Serbia or her King. She has not occupied herself in a campaign of intrigue. She has indeed been nobly silent under this constant persecution by Serbian propagandists.

In the *New Europe* of August 2, 1917, in an article directed against Montenegro, occur these words:—

> "The most striking proof of the discredit which he (the King) has brought upon himself is the refusal of the Allies to admit his representative to the recent (Balkan) Conference in Paris. Disregarding all hints, King Nicholas was unwise enough to give to the press a statement to the effect that Mr. Popovitch (the Premier) was the Montenegrin delegate to the Conference, who none the less remained outside."

There is not a single word of truth in this allegation. I have myself seen the invitation to this Conference from M. Ribot, and *Mr. Popovitch was at the Conference and spoke.*

Most of the attacks are of the same petty character, but two or three are of a graver order. But what do their authors expect? Do they consider that his Majesty should enter the lists and condescend to explain matters to them or defend himself and his country within the columns of their publication? Is this the time for such an attack on an Allied nation?

There can be no doubt in the minds of all unbiassed men that these attacks ought never to have been permitted. It is true that they were directed very cleverly against the King personally, but they are in reality and in substance an attack upon Montenegro, and an attempt to dispose of her nationality without the consent of her people. Surely it is the duty of the Government to protect our Allies from insult and from the "loose and mischievous talk" against which Sir Edward Carson so justly protested lately.

Simply as a matter of curiosity—and as a disclosure of Balkan propagandist methods—I will conclude by a reference to the recent declaration known as the "Corfu Agreement," signed by M. Pashitch, the Serbian Premier, and Dr. Trumbitch, of the Jugo-Slav Committee, in which Montenegro is calmly disposed of and placed under the Karageorgevitch Dynasty, *without any reference to the wishes of her people or her present*

WHITE HORSE WHISKY.
GREAT AGE AND BOUQUET.

KING OF SPAIN

Digitized by Google

Dynasty! On the other hand, the attitude of Montenegro towards the whole question of Jugo-Slavia is not only clear, but will commend itself to the intelligence of all unprejudiced people. She is not disposed to enter into any campaign of aggression or attack upon her fraternal neighbours. She takes up the line that the disposition of dynasties and national affairs is a problem for which *the people must find their own solution*, a view which has been reiterated over and over again by our own wisest statesmen. Montenegro has always been in favour of the union of all the Slavs, but not of a union merely of Montenegro with Serbia, or in other words the absorption of Montenegro by Serbia, in whose defence the country of King Nicholas has lost its liberty. At the present moment all attempts towards aggression or agreement appear to King Nicholas as an act not only premature, but unconstitutional and illegal. It is the Skupshtina, or National Parliament at Cettigne which must freely discuss any constitutional changes and alterations that may be imposed by the necessity of the new organization in Europe—and "the time is not yet."

The liberation of oppressed peoples, the right of the peoples to govern themselves without outside imposition, these things are sacred rights, and the Allied Powers must protect and watch these rights, the full liberty and independence of the referendum of the population of Montenegro over its own future national destiny. But in the meantime let there be an end to all these attacks, and let each country stand face front to the common enemy. In view of the fact that Montenegro has no means of expression in this country, and unfortunately not even a diplomatic agent, it behoves those of us who know her glorious past history, a history unstained by blood and undimmed by any treachery, to constitute ourselves as her active friends, determined at all events to see that she has fair play.

ARCHÆOLOGICAL NOTES.

Occasionally among the thousands of papyri of the Early Christian era found in Egypt a manuscript imported into the country may be found. One instance of this is a document in the Cairo Museum which contains a contract concerning a loan, drawn up at Constantinople. It was found at Aphrodite, in the Fayoum, and takes the form of an acknowledgment by two persons named Flavius Victor and Flavius Apollos for a loan amounting to 20 golden solidi. The lender was a banker named Anastasius, and the receipt states that the borrowers were to pay interest at the rate of 8 per cent. This reward for the accommodation is important, as it confirms the literary history of late Roman legislation, because by a law of Justinian confirmed by the 136th Novellus and the ninth Edict, which regulated bankers' rights, 8 per cent. had been declared the maximum. Two of the witnesses are employees or friends of the banker, whilst a third is an Egyptian who was at Byzantium at the time.

J. Offord.

THE SALONIKA RELIEF FUND.

The Lord Mayor's Fund at the Mansion House for the relief of the sufferers by the great fire at Salonika now amounts to over £11,000. This includes £5,000 received from the Joint Distribution Committee at New York for Jewish sufferers, and a sum of £676 collected by Mr. C. G. Montefiore. The Lord Mayor has received the following telegram from Mr. A. Palkis, the director of the Relief Department: "Census just completed shows 73,000 persons, or 14,000 families, homeless. Eight thousand persons are in tents, the remainder being crowded into the surviving houses under bad conditions. The Greek Government are building houses for 3,000 families, which, it is hoped, will be completed by December. Our most urgent requirement is blankets, of which all stocks here and in Old Greece are exhausted. Secondly, we want materials for women's clothes and underwear, men's ready-made clothes, and second-hand clothing in good condition. Tinned milk for babies would be very acceptable."

The aides-de-camp of ex-King Constantine, who remained with King Alexander, having shown discontent with the new régime, are about to be removed.

CORRESPONDENCE.

THE CAROB-TREE IN CYPRUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I read with interest the letter of "G. L. H." in The Near East of September 14. The importance of the carob crop to the island may be gathered from the fact that the latest Cyprus report, for 1915-16, gave the total value of exports as £650,490, the principal item being carobs, valued at £203,162, just over the value of all other agricultural produce exported in that year, viz., that of barley, wine, raisins, potatoes, pomegranates, oranges, and lemons, amounting to £202,995.

The annual yield of these locust beans cannot be accurately computed, as the available figures relate only to their exportation, and not to any actual assessment of the crop. "G. L. H." gives the yield as from 40,000 to 60,000 tons, say, an average of 50,000, which would indicate that production has increased considerably during the British occupation. In the year referred to the harvest was probably a very large one. Taking the price at 15s. the Aleppo kantar, f.o.b. (or £3 6s. 8d. the ton) a crop of 60,000 tons would yield £200,000.

The letter of "G. L. H." points to the principal need of Cyprus, viz., the prompt and more liberal expansion, on a scientific basis, of the Agricultural Department. The experimental orchards which he advocates should have been established long ago for the carob, as for various other, trees. As regards the carob disease (said to be *cecidomyia ceratonia*), one gathers that some progress has been made; for the report referred to says that research work has continued, that trees have been compulsorily treated in certain infected areas, that remedial operations can be easily performed by any tree owner, that notes were being made, but that "complete results will only be known after the next (*i.e.*, the present) harvest." Let us hope they will be satisfactory.

R. M.

Farnborough, September 21.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—To-day there commences the collection of carobs. For the prevention of disease the instructions contained in the High Commissioner's order and declaration are the same as last year.

Four (4) operations are necessary: the diseased beans have to be knocked off and collected—the young flowers varying in length from half an inch to two inches have to be removed and the bare axes of stunted fruit must be knocked off, and finally the whole mass must be gathered together and either buried in a pit with quicklime or be burnt.

Before considering the practicability of these operations, it may be well to state the view of the Agricultural Department, as expressed in its own journal. In September, 1915, the village of Athienou was by an order of the High Commissioner declared an infected area, and the officials and staff carried out the test. It is stated that 650 trees were treated by six persons in a very limited period of time, and that on examination of the area in the month of October only two diseased beans were found. The Department has also made the suggestion that the good carobs can be picked, and the flowers, stunted carobs, and bare axes be collected and burnt on the same day and by the same gang of labourers.

I have no hesitation in saying that this is an impossibility. Every owner of carob trees is far too busy seeing to the picking of the beans, the putting into sacks, the carriage of the sacks to the carob merchants' stores and the correct weighing of the same, to pay the strict attention necessary in order to ensure that all the flowers are rubbed off between the finger and thumb, the bare axes knocked off with small sticks, and the mass either buried or burnt.

Forty days, however, are allowed, and in many cases that is not too long a period if the work is to be thoroughly done. In the next letter I shall give my own experience.—I am, etc.,

G. L. H.

Kyrenia, Cyprus, August 20, 1917.

"A CORRECTION."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The last two words of the second paragraph of my letter in your last issue should have been "outlasted Venice" not "overlooked Venice." My writing was also doubtless responsible for the substitution of "carted away" for "carried away" in reference to deportations from Serbia. "H. N. Brailsford" should have been "Mr. H. N. Brailsford."—I am, etc.,

Canterbury, September 26. A. H. E. Taylor.

[We regret the mistakes to which our correspondent refers.—Ed.]

TANGIER TO TEHERAN.

It is of interest to note that one of General Maude's early acts after the capture of Baghdad was to make provision for the preservation of ancient monuments in Mesopotamia and to regulate dealings in antiquities. By a proclamation dated May 22, 1917, "all antiquities, to wit, all ancient monuments, ancient objects of vertu, relics movable and immovable of ancient times, which formerly were the property of the Ottoman Government, or shall hereafter be discovered, are the property of the Administration of the Occupied Territories." The term "ancient" for the purposes of this proclamation is defined as signifying antecedent to the year 1500 A.D. All discoveries are to be reported to the nearest Assistant Political Officer, and penalties are fixed for unlawful appropriation of antiquities, for damage done to them, or for traffic in them, except under licence.

***

But the most drastic clause of the proclamation is the one that states that anyone selling, or offering for sale as antiquity, any article which he has not reason to believe antique shall, on conviction, be liable to imprisonment for a period not exceeding six months, or to a fine not exceeding Rs. 10,000, or both; and his stock of antiquities or pseudo-antiquities shall be liable to be confiscated. It is a wholesome deterrent to forgeries, and the new régime has done well to introduce it at this early stage, while Birmingham and Berlin (rightly or wrongly reputed to be the home of the "modern antiquity") are otherwise engaged. Presumably there has been little doing in that line in the past, although it would be surpassing strange if the bazaars of Baghdad were to be wholly innocent in this respect. A necessary corollary to such a law will be the appointment of a Curator of Antiquities, for it is too much to expect that the Political Officers will one and all be archæological experts. Time was when the Athens Museum, under the direction of its Five Ephors, had to plead guilty to housing one or more forgeries.

***

A correspondent takes THE NEAR EAST to task for the spelling of Busreh, and cites various other forms of the word: Busra, Busrah, Bassorah—all of which, he contends, are wrong. The correct name, he states, is "Basrah or Basrat, from the Persian" *Bas-rah*, meaning "of many roads." He adds: "The only other town of similar name spelt in Arabic 'Busra' is a small inland town between Arabia and Syria on the way to Damascus." I am indebted to my correspondent for this interesting information. The derivation of the name of the town was new to me. I fear I must plead guilty to the spelling "Busreh," which to my ear seemed to reproduce the local pronunciation more closely than Basrah. The first syllable of the latter would inevitably be pronounced in this country as is the name of a certain ale or the horticultural substitute for string. What THE NEAR EAST has aimed at is to secure the nearest sound in English to the original.

***

There has been a very pretty quarrel in the German and Bulgarian Press over Bulgaria's claims to Macedonia. It originated from an article in which a German Socialist, writing in favour of peace by agreement, suggested that Serbia and Bulgaria should share Macedonia between them. He pointed out that the Slav element does not consciously belong to either nation, but was capable of being assimilated to both. The mere suggestion caused great indignation in Bulgarian circles, and the Bulgarian Minister in Berlin felt constrained to demolish the Socialist's argument. Unfortunately for M. Rizoff, Herr Wendel was speaking by the book, so much so that he could quote the Bulgarian Minister's words, spoken at an early period, in support of his contention. In fact, M. Rizoff appears at one time to have been quite busy in warning Bulgaria off Macedonia. But of course it is very unfair of the German Socialist Deputy to raise the question now. The incident, however, is instructive.

***

Our columns have borne witness to the satisfaction felt in Mesopotamia over the arrival of the British. It is not only in the minds of journalists that the enthusiasm exists. I am indebted to a correspondent for a copy of a private letter from an Arab friend at Feluja, and am only sorry I cannot reproduce the letter *in extenso*. But this is the burthen of it: "At last, after the vexations of the last moments and the horrors of the Turks, which have lasted nearly three years, we have been able to see with our own eyes and to salute with joy the British flag victoriously planted at Baghdad, and some days later at Feluja itself." Taking things all in all, it would seem as if the Turks had materially lightened our task for us.

CORSAIR.

THE PRESS ON THE NEAR EAST

A Palestine Village.

The following description of contemporary life in Khan Yunis, "the largest and most important village in Palestine which the British Expeditionary Force has hitherto occupied," appears in the *Manchester Guardian*:—

The village lies midway between Rafa, our border town, and Gaza, our present objective, separated from the sea by two or three miles of rolling sand dunes. Around it on every side is a belt of trees and orchards a mile or more in depth, and the water which makes possible this sudden blossoming of the plain is pumped from ancient wells lying in the midst of its lanes.

The great meeting-place of Khan Yunis to-day, however, is not the bazaar or the café. Nearly all the older men are assembled from early morning outside the tent of the Military Governor, and squat on the ground for hours. Since the British occupation a remarkable system of communistic production and distribution has been introduced. Many of the fields of the fellaheen cannot be cultivated owing to military movements, but the Governor pools the products of those that are worked and give their yield, and he rations, so far as necessary, the native inhabitants. Time is not precious among the Bedouin, and the distribution is a half-day employment for the heads of families. And while the sheikhs are congregated around the tents of the Kadi, the women and the younger men are gathered around the wells where they draw their rations of water. They come with the empty petrol tins and goolas (large earthen pots), which keep the water cool in arid summer, loaded on their heads or on donkeys, and a few Sinai police, picturesque in their brown head-scarves and jerseys and bandoliers, keep as good order among them as the City constables keep in the traffic outside the Mansion House.

The people are well content with the British occupation. If they have lost part of their harvest beneath the rolling of endless wheels, yet they get unheard-of prices for the produce which remains to them—a big piastre (2½d.) for a single egg in a country where they were sold at 10 for a piastre, 12 piastres for a chicken, and so forth. Their cattle, sheep, and goats were for the most part left to them by the Turks. The kine are well favoured though small—far better than any which Egypt produces. Strict measures are taken to protect the inhabitants and their property from any molestation by our soldiers, and the blessing of British rule is being daily learnt.

In the evening about the hour of sunset the village is at its liveliest. The sheikhs sit in the courts of their huts and discuss the distribution of the day and the news of the war, which no censorship can keep from passing among Arabs. The young gallants march the street, some in their rough sheepskin coats with coloured keffiyeh (head-scarves) held by the black woollen cord, others resplendent in yellow robes and turbans. The herds and flocks come trooping through the lanes, a young child usually heading them on a donkey, and the fellaheen return from the fields with their camels carrying their baskets of figs and grapes.

Peace Congress.

There is an illuminating article in the *Contemporary Review* on "The Three European Settlements"—1814-15, 1856, 1878. The author, Sir John Macdonell, writes with the idea that the examination of past settlements may help to prevent the repetition of some of the chief mistakes committed in all of them. Of the 1856 settlement he says:—

There was again a merely diplomatic settlement. The representative of the Great Powers talked of "systems," and were thinking mainly of military strength. There were provisions for the neutralisation of the Black Sea and the demolition of fortresses. As compared with the proceedings at Paris and Vienna, there was an improvement. There was not the same indecent scramble for territory. There was a genuine desire to help the cruelly treated Christian subjects of Turkey. The spirit of humanity was forcing its way into foreign politics; but no effective provision was made for the performance of the pledges which Turkey had given for the better treatment of her Christian subjects. There was a readiness to accept promises of reform which were never kept, or seriously endeavoured to be kept. Looking back, we now see how much the Treaty of Paris helped to postpone the break-up of Turkish rule and the birth of young nationalities which, but for the Crimean War, might long ago have come into existence and sown their wild oats. The settlement, not very glorious for the Allies, was humiliating to Russia. It imposed upon her restrictions as to the Black Sea, which were in a few years removed. So far, the settlement checked Russian advance into Europe; it turned her energies towards Asia. The conference did not settle—it, indeed, did not even really touch—the Polish question; Lord Clarendon, at the instance of Count Orloff, did not bring it up at the Congress, and in a few years (1862) broke out an insurrection which was cruelly repressed.

It was announced at the Admiralty on September 26 that Vice-Admiral Godfrey H. B. Mundy, C.B., M.V.O., has been placed on the Retired List, at his own request, in order to facilitate the promotion of junior officers (to date September 19). Admiral Mundy, who was born in 1860, entered the Navy in 1873. He served in the Egyptian war, 1882, as sub-lieutenant of H.M.S. Inconstant, and was awarded the Egyptian Medal and the Khedive's Bronze Star.

CONDITIONS IN SERBIA.

Mr. Vidak Koprivitsa, Lieutenant in the Second Regiment of the Serbian Combined Division, who, as an invalid prisoner, was recently exchanged by the Austro-Hungarian authorities, and who is now in a hospital in France, has written to some Serbian friends in England describing some of his experiences and the conditions prevailing in occupied Serbia and also in the internment camps in Austria-Hungary. He writes:—

Famine and the Gallows in Serbia.

I was taken prisoner along with other seriously wounded Serbian officers in the advance of the Austrians on Vrntsi, where there had been for some time British medical missions. The enemy immediately conducted a search of all houses in all the villages and towns of this district, and requisitioned all available food, leaving only half a pound of flour per head. The copper bells from the churches and all leather things the authorities quickly seized. Some days afterwards the wounded officers who had been left on the road between Kralyevo and Rashka were brought into our hospital; they told us terrible stories of what they had seen on the journey: the road was strewn with corpses of fugitives who had been killed by the Germans by the side of their carts and wagons. We were told how the Germans had done their horrid work to the cries of little children and the wailing of their mothers.

The German general who visited our town asked Prince Lopkovitch why he had not yet erected the gallows. The Austrians quickly took the hint and put up gallows in all the larger towns and villages, and pictures showing people hanging on them were soon circulated and distributed amongst the population.

Before a week was out the population began to feel the lack of bread; in our town there was only one baker to work, and nobody could get more than half a pound of bread.

Veritable Graveyards.

From Vrntsi we were removed to Keczkemet. The hospital where I was put had formerly been an old elementary school, in which many Serbians from Srem and the Banat, interned before we came here, had ended their martyred lives. Some months later we were removed through Budapest and Vienna to the North of Bohemia, to a town called Briks, where was an internment camp for Russians. Here the Chief of Staff of the 13th Russian Division, Colonel Kisselov, who had had a leg amputated as a consequence of wounds sustained in the Carpathians, greeted us very cordially. He collected a thousand francs amongst the Russians to help in the purchase of artificial limbs for Serbians. After five days at Briks we were removed to Heinrichsgrün, where in the earlier days of 1916 there had been 30,000 Serbian soldiers and 200 Serbian officers. In this camp the misery was appalling. When we arrived from twenty-five to thirty were dying daily, and the number grew rapidly. Many of our unhappy soldiers found their graves here through starvation, disease, and hard labour in the mines. It was heartbreaking to see officers as well as soldiers bare-footed in their rags—mere ghosts of men.

The soldiers were given some wretched wash which went by the name of soup. The "bread" we could hardly swallow, it was so bitter. It was made out of horse chestnuts, acorns and potato-peelings. The officers in the hospitals four times a week received as a special favour about a quarter of a pound of horse-flesh and some rye bread. The huts were deadly places, and the nights were bitterly cold, not only because of the wretched shelter, but owing to the lack of covering. Soldiers and officers fell ill suddenly and developed tuberculosis; there were 3,000 men affected by tuberculosis and absolutely without care or attention. Here died more than 20,000 victims.

Our complaints and cries for help directed to the Serbian Red Cross and to the Spanish Ambassador in Vienna brought no response.

Trench-Digging on the Italian Front.

In August, 1916, Bulgarian officers visited this camp, and began to pick out as "recruits" those men who hailed from the territories in Serbia occupied by the armies of King Ferdinand. At the beginning of September, 1916, I was removed to Aschach, where 150 officers and 25,000 soldiers were crowded together. Here also there reigned the same grim horrors. From this camp, as well as from others, the Austrians carried away Serbian soldiers to the Italian front in order that they might work on the construction of fortifications and in trench-digging. These martyrs of ours suffered terribly under the fire of the Italian artillery, and I have seen several of them after they had been wounded and captured.

Serbia's Need.

The following associations receive donations for Serbia, Serbian prisoners of war, Serbian orphans and suffering Serbian civilians: The Serbian Relief Fund (Treasurer, The Earl of Plymouth, C.B.), 5, Cromwell Road, London, S.W.; and the Serbian Red Cross Society, 195, Queen's Gate, London, S.W., where donations in money or material should be sent.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The effect of the blockade of Greece by the Allies is well brought out by the Customs returns for Piræus harbour. For the first six months of the current year the movement of goods amounted to 49,417 tons, to which exports contributed 19,696 tons, and imports, chiefly cereals and flour, gifts from America, 24,719 tons. The figures for the corresponding period in 1916 were 474,505 tons. In the same six months in 1917 the number of vessels using the harbour was 182 steamers and 922 sailing vessels, compared with 1,284 steamers and 2,378 sailing vessels in the first half of 1916.

***

The annual general meeting of the Roumanian Consolidated Oilfields was notable for a very interesting address by the chairman, Mr. W. Watson Rutherford, whose knowledge of Roumania entitles him to speak with authority on matters concerning that country. He expressed himself a convinced believer in the future of Roumania, and declared that the country, owing to its geographical position and natural resources, would be entitled to a commanding position in the development of the Eastern part of Europe after the war. "Endowed with a healthy climate and a fertile soil, which for centuries has produced the finest cereals of the world, and possessing unlimited supplies of natural gas and petroleum," he added, "Roumania is situate astride of the mouths of the Danube, the principal highway to the centre of Europe, and also has its ports of Constanza, Braila, Sulina, and Galatz facing towards the east, with easy access to the Mediterranean. Roumania's outlook, therefore, for centuries to come, is one of the most assured."

***

In a previous note on the company's annual report I dealt briefly with the prospects before the company in the light of the substantial claims for compensation that will come up for settlement after the war, and it is, therefore, unnecessary to do more than remark that Mr. Watson Rutherford went fully into the question of the claim against the British Government. His view is that the company's position represented by lands and oil rights, which stand at £697,000, and by the claims already sent in for £1,270,000, giving a surplus of £747,000 over the issued shares and debentures, means that instead of the shares standing at 13s. they ought to be worth considerably over double that amount. In estimating the future of the company and of the oil industry in Roumania in general, it would also be well to take into consideration the chairman's statement that "with regard to petroleum, there can be little doubt that the few scattered spots where hitherto this valuable fuel has been extracted in Roumania do not account for even a fractional percentage of the available oil lands.

***

One other point in the Chairman's speech deserves notice, and that is his reference to the destruction of the oil wells and machinery before the German advance. "The destruction last December," he said, "was so thorough and complete that, in spite of feverish exertions on the part of the German engineers, little petroleum has up to now been taken out, and even that cannot be turned to much useful purpose unless and until means can be found for refining, storing, and transporting it." This is particularly interesting in view of the truculent announcement in Berlin a few days ago of the Kaiser's visit to Roumania and his inspection of an oil well which had been repaired, and was alleged to be in full working order. I fancy the visit, if it took place, must have been on a par with the Hamburg incident, when the Kaiser expressed the desire to see an island on which he had played as a boy. There was no island, but the thoughtful Mayor provided one, and at the right moment called the Kaiser's attention to it as they passed. "Ah, how it all comes back to me!" said His Majesty.

***

The effect of the shortage of imports in Egypt is steadily becoming more pronounced, and as there is no prospect of any immediate alleviation of the tonnage question, the country will be more and more thrown on its own supplies. The problem before the Egyptian Government is the utilisation of existing resources, and with that end in view it is stated that a special department is to be created to control supplies and to centralise all matters connected with the question. Government control was, of course, inevitable under the circumstances, and it is well that the decision should be arrived at quickly before matters have reached a really critical stage. As things stand, the Government should have little difficulty in coping with the position.

***

The situation created by the restriction in the Egyptian cotton acreage is dealt with in an illuminating article by Professor Todd, which appears on the following page. He points out that the restriction will mean that the area under cotton in the Delta will be reduced by nearly 300,000 feddans, while the difference in Upper Egypt will be some 30,000 feddans. The suggestion that the immediate loss to Egypt entailed by the curtailment of her staple industry may not be serious, Professor Todd regards as a very risky assumption, even in these days. In his view, two factors will mitigate the effect of the restriction in the Lancashire industry. In the first place, the consumer will have to pay the increased cost, and, secondly, Lancashire will have to face the question of substitution. "Egypt," he concludes, "must not console herself with the delusion that it pays just as well to sell half a crop at double the price; that as soon as the war is over she will come back to growing cotton again; and that her old market will be waiting for her. It will, but—*at a price.*"

***

I wish to draw attention to a most interesting survey of the motor trade in Eastern Greece by Mr. G. P. Waller, the United States Vice-Consul at Athens, which will be found on another page in this issue. The facts he adduces show very clearly the immense scope that exists for the development of this trade. At the present time, of course, imports are naturally severely restricted as the effect of the war, and such is the demand for motor-cars that the exorbitant prices that are now being asked are willingly paid. That of itself speaks volumes for the post-war prospects, and it is to be hoped that British manufacturers, who enjoyed a fair share of the trade before the war, will have sufficient initiative to avail themselves of the opportunity which will then be presented.

***

It is an excellent omen for British trade with the Balkans after the war that endeavours are already being made in various directions here to prepare for the coming struggle. One of the organisations I have in mind in this connection is the General Anglo-Serbian Industrial and Financial Company, Ltd., of 106, Bishopsgate, E.C., whose purpose is to carry on financial, commercial, and industrial operations of all kinds in Serbia and in the Balkan States generally, and to facilitate economic relations with these countries. The company will shortly, it is stated, start a large concern for import and export trading with the Balkans, its primary object being, however, to supply all kinds of merchandise to Serbia both now and especially after the war.

***

The question of the Indian Exchange has come very prominently to the fore since the Indian Government's decision a few weeks ago to raise the selling rates for immediate telegraphic transfers to 1s. 5d. This policy led naturally to gold shipments from the United States, but this tendency was checked by the embargo placed by the Government of India on gold imports, except under special licence. The latest development, and one which removes the inducement to ship the metal, is an alteration in the exchangeable value of the rupee to gold as regards imports of the metal. Briefly, the situation is that the selling rates for Council drafts will be based roughly on the price of silver, while the ratio between imported gold and rupees will depend on the rates for Council drafts in London.

EGYPTIAN COTTON AREA.

The Government Restriction.

BY PROFESSOR TODD.

Once more the Egyptian Government has announced its intention of deliberately restricting the area to be put under cotton next year. The scale of restriction adopted is apparently the same as was finally arrived at after many changes in the autumn of 1914, namely the entire prohibition of cotton growing in the basins of Upper Egypt, and its restriction to a maximum of one third of all other land. This has unfortunately created a good deal of misunderstanding on this side as to the effect, for many people seem to have the impression that the basin lands of Upper Egypt meant the whole area of Upper Egypt. This of course is not the case. The basin lands represent probably a total of about 1¼ million feddans out of the total of 2¼ millions in Upper Egypt; but as there is practically no cotton at all grown on these basin lands (that follows naturally from the system of basin irrigation which gives no water at all during early summer and an overwhelming flood in early autumn just when cotton would be ripening) the prohibition hardly affects the question of the cotton area at all.

The effect of the restriction is shown in the annexed table. The total cultivated area in Egypt is a little over 5¼ million feddans, of which about 3 millions are in Lower Egypt and 2¼ in Upper Egypt. Omitting the 1¼ millions of basin lands in Upper Egypt there remains a possible cotton area of roughly 3 million feddans in the Delta and one million in Upper Egypt. The restriction to one third will mean that the area in Upper Egypt will be reduced by over 30,000 feddans while the difference in the Delta will be nearly 300,000 feddans. The probable effect on the crop is of course largely guesswork, because it depends on the yield of the crop per feddan for next year, but taking that at the average of recent years (and that is a generous allowance in view of the increasing depredations of the pink boll worm) it means a reduction of the crop by well over a million kantars. That is a very serious business indeed for the cotton trade, especially in Bolton, and it justifies a very careful scrutiny of the reasons given for the adoption of such a measure.

AREAS UNDER COTTON IN EGYPT, 1914-18.

Season.	Area under Cotton (feddans, 000's omitted).			Crop.	Average yield.
	Lower Egypt.	Upper Egypt.	Total.	Kantars.	Per feddan.
1914-15	1,373	382	1,755	6,490,221	3·69
1915-16	937	249	1,186	4,806,331	4·05
1916-17	1,290	366	1,655	5,062,590*	3·06
1917-18	1,294	383	1,677	*6,000,000*	*3·60*
1918-19	*1,000*	*350*	*1,350*	*4,860,000*	*3·60*

The figures *in italics* are estimates.
* Arrivals at Alexandria to August 31, 1917, subject to rectification.

It is satisfactory to know that these reasons are at least entirely different from those put forward in 1914. Then the object of the Government was quite frankly to reduce the supply so as to maintain the price at a higher level than they thought likely under the conditions then prevailing. The Government, acting on "information received," the source of which was never published, came to the conclusion that there was going to be a serious over-supply of cotton, and a débâcle in prices. In this opinion they were not alone; but they were alone in adopting compulsory measures to deal with the expected situation. As a matter of fact, these measures proved entirely unnecessary, for the cotton trade recovered something like its normal equilibrium much sooner than faint hearts expected, and long before the sowing season of 1915 came round it was evident that the situation could be left to look after itself, and the restriction was withdrawn officially, though rather late in the day. The reduction of acreage which followed amounted to just about the Government figure; but that would probably have taken place in any case owing to economic conditions.

As a side issue the Government then founded its action upon the necessity of growing a larger supply of cereals in Egypt for its own consumption, and this time the side issue has become the main reason. The necessity, it is alleged, is now imperative. The local population has been greatly augmented by the armies stationed in and near Egypt, and the difficulty of supplying them from more distant corn countries has become great, owing to the scarcity of tonnage.

To such arguments, if substantiated by the facts, there is, of course, no answer at all, and Lancashire would be the last to attempt to counter them by a plea based on its own expected losses due to the restriction. But, without casting any doubts upon their patriotism, there are certain points upon which the cotton trade in this country may claim to be reassured. In the first place, what is the total gain likely to be derived from the increased area that can be put under cereals in Egypt? Mr. G. C. Dudgeon, of the Egyptian Department of Agriculture, recently published in the Bulletin of the Imperial Institute certain figures of the results of the 1914-16 cereal crops which throw some light on the matter. From these it will be seen that the restriction of cotton by nearly 600,000 acres in 1915 apparently had the following effects:—In the case of wheat, it reduced the imports and increased the exports by about 50,000 metric tons each, and added about the same amount to the quantity available for consumption in the country—i.e., it increased the total production by about 150,000 metric tons. In the case of maize, the saving was a little over 200,000 metric tons, and rice fully 150,000 tons, giving a total of, roughly, 500,000 tons. Assuming, as above stated, that the reduction of acreage next year will be a little more than half of that of 1915, the saving will presumably be reduced in the same way—say, to 250,000 tons. To this must be added the saving in freight space for the reduced cotton crop—say, 50,000 tons.

We leave it to the responsible officials, who alone know all the facts of the position, to estimate the value to our interests of such a saving of freight space. In the present state of public information as to the shipping position it is useless for us to attempt to estimate it. But one point may be stressed; it is not the amount of shipping *to-day* that is in question. It is a year hence—or, rather, it is during the year beginning a year hence, i.e., the year from, say, August, 1918, to August, 1919. Is it to be understood that our present difficulties in the matter of shipping are going to continue, and presumably increase, until the last-mentioned date? That seems to the writer an excessively pessimistic view, in view of recent reductions of U-boat losses and the steady increase of the world's production of new tonnage.

It remains now to set against this saving the loss not only to the Lancashire industry, but to Egypt herself, which the proposed restriction entails. It has been suggested that the immediate loss to Egypt may be regarded as not serious, on the assumption that owing to war scarcity the prices of cereals in Egypt are now relatively as high as the price of cotton. But that is a very risky assumption even in these days, and it would, of course, have been utterly absurd in pre-war days. For there must be no overlooking the fact that under normal conditions cotton is by far the most profitable crop that can be grown in Egypt, and it will certainly be so again in Egypt after the war, whatever it may be now or a year hence. With Egyptian cotton at its present price, it is hard to believe that even at war prices wheat and maize can pay as well.

What, however, is the loss to the Lancashire industry going to be? It will be a very great inconvenience to have the supply of fine cotton still further reduced; it probably means a continuance of the present famine prices, and a restriction of Egyptian cotton to the most necessary uses, such as sewing cottons, aeroplane sail material and the finest white and mercerised fabrics, which will go up in price to such an extent as to reduce their consumption seriously. It will hurt Bolton pretty badly, but it will not be all dead loss to the industry as a whole, because, in the first place, the increased cost must be passed on to the consumer, and, in the second place, Lancashire will be compelled to take up once more the question of substitution; she has already done so, in fact, owing to the recent rise in price of Egyptian. For it must be remembered that paradoxical as it may seem Egyptian cotton was very cheap relatively to American, until its spectacular rise last winter (see NEAR EAST of June 22, 1917). This is brought out in the annexed table, which gives the prices of Egyptian and American with the former expressed in percentages as a premium over the latter. There is a curious history hidden in this table which is worth studying. It will be seen that for ten years before 1909 the average premium of Egyptian over American was about 45 per cent. The failure of the Egyptian crop of that year, disastrous even in comparison with the shortage of the American crop, sent the premium for the season up to 67 per cent., and at one time during the season it actually touched 102. But the result was substitution, in many branches of the trade where such a thing had never before been thought possible, of good American cotton for all but the best Egyptian, and the development of new processes which enabled the manufacturers to turn out American or half-American half-Egyptian fabrics, which, though not quite so good as the pure Egyptian, were quite good enough for the consumer, and were much better value at the money. The ultimate effect of that substitution on the Egyptian market is seen in the table. For six years after 1909-10 the Egyptian premium averaged only 40 per cent., although the Egyptian crops were distinctly smaller in proportion to the American than they had been in the ten years before 1909. Egyptian paid the penalty of its high price in 1909-10 by losing its monopoly of the fine-cotton fabrics, and it was only when Egyptian fell to relatively low levels again that manufacturers went back to it. And the same thing is happening to-day. The high price of Egyptian is driving the manufacturers to substitution on a greater scale than ever, and if, as seems likely, American cotton falls again while Egyptian, owing to the threatened restriction, remains high, substitution will be pressed to a degree and with a success never equalled before. In these days the consumer has to take what he can get, and pay pretty well whatever the producer likes to ask for it; and if he is shown a fabric slightly inferior to the best Egyptian but at half the price he will not only take it now, but he will stick to it afterwards, especially if hard times come again after the war.

AMERICAN AND EGYPTIAN CROPS AND SEASON'S AVERAGE PRICES, WITH PERCENTAGES.

Average of 6 seasons..			9.8	—	—	40.1
1916-1917	12,976	1,025	7.9	12.33	21.56	76

The writer would, therefore, impress upon all parties concerned that this is not merely a question of next year's crop. It is a matter which will produce very widespread effects on the operatives as well as the manufacturers, and in the long run, if not in the meantime, on the Egyptian fellah. Egypt must not console herself with the delusion that it pays just as well to sell half a crop at double the price, that as soon as the war is over she will come back to growing cotton again, and that her old market will be waiting for her. It will, but—*at a price!*

MOTOR TRADE IN EASTERN GREECE.

Scanty Supplies and High Prices.

For the following particulars of the development and future prospects of the motor trade in Eastern Greece we are indebted to a report of the United States Vice-Consul at Athens, Mr. George P. Waller, dated July 14.

In spite of the comparatively large number of self-propelled vehicles that have been imported into Greece during the last five years, it is felt that the use of the automobile is still in its infancy in Greece. Although railway communication is poor and large portions of the country are forced to depend upon hauling their goods long distances, the roadways, especially in the interior, are not much better than trails in many instances, and rural life is by no means highly developed. Absentee landlordism is frequent, and the soil is cultivated by poor but thrifty peasants. In the cities conditions are very different. Large numbers of shipowners have suddenly become wealthy, owing to successful operations in the Balkan and present wars. They desire automobiles for convenience, and in some cases to advertise the fact that they are able to pay the very high prices demanded for cars and for gasoline.

The comparative lightness of the average American product makes such machines peculiarly suitable to the rough roads of the greater part of Greece.

Expensive Motor Cars.

High freight rates, scarcity of ocean tonnage, and a duty of $0.0376 per pound have been given by salesmen in the local markets as the factors responsible for the high prices of automobiles in Greece. When the matter was investigated some months ago it was found that one car costing $695 at the American factory had been sold after three months' use in Greece for the equivalent of $1,700. The seller claimed that the car, with tyres, etc., cost him $1,600 delivered in Greece, and that had he cared to haggle and await a more gullible purchaser he could undoubtedly have sold the car for at least $2,000. Last month the writer had occasion to investigate the situation once more at the request of a friend who urgently needed a car at Salonika. The Athenian market offered at that time two cars. One was of local manufacture, built from the remains of an American 1914 automobile that had been wrecked. This car, which had originally cost $900, was offered for $1,900. The second car was a new American runabout of rather smart design. It had cost about $1,200 in the United States, and the dealer wanted $2,400 for it here.

Effect of the War.

After the entry of Italy into the war the exports of automobiles from Germany and Austria were automatically cut off; and as the Allied Governments had need in most cases of the entire output of factories for war purposes, the American manufacturer would have had a fair monopoly of the local market but for the restrictions of the Allies upon the imports of automobiles into Greece, laid down to prevent the shipment of cars from Greece to Austria and Bulgaria. Only a certain number of cars per month were allowed to be brought into Greece under this arrangement, and the situation was further complicated by the fact that automobiles were not allowed to be imported with tyres. Tyres had to be shipped separately through London under the provisions of the so-called Rubber and Tyre Convention.

Summary of Imports.

In 1912 the value of the automobiles imported into Greece was $51,151, and in 1913 $62,907. In 1914 and 1915, the first years for which detailed figures are available, the imports of passenger automobiles into Old Greece were as follows, by countries of origin :—

Countries of origin.	1914. $		1915. $
France	34,875	..	17,794
United States	23,266	..	32,119
England	16,474	..	12,590
Italy	14,474	..	12,927
Austria	7,720	..	2,026
Switzerland	5,790	..	—
Germany	3,088	..	2,026
Belgium	965	..	—
Total	106,652	..	79,482

Figures for 1916 are available only for the first nine months, and even for this period are thought to be incomplete; they may, however, be taken as minimum figures. According to these incomplete returns for January to September, 1916, the value of passenger automobiles imported into Greece from the United States was $126,605, and the imports of spare parts were valued at $6,295. During this period 24,313 tyres were imported, valued at $136,610, of which 16,001 came from France, 7,166 from England, 939 from the United States, and 207 from Italy. It is thought that if the importation of tyres had been unrestricted the United States could have sold $100,000 to Greece instead of $939 worth.

The following table shows the imports into Greece of gasoline and lubricating oils by countries during 1914, 1915, and the first nine months of 1916 :—

Countries of origin.	1914. $		1915. $		Jan.-Sept., 1916. $
United States	45,046	..	117,080	..	65,725
England	6,727	..	9,329	..	5,854
Russia	3,609	..	—	..	1,341
Germany	21,897	..	465	..	496
Austria	9,256	..	873	..	292
France	2,792	..	1,538	..	32
Belgium	1,075	..	—	..	—
Turkey	514	..	—	..	—
Roumania	—	..	464	..	—
Italy	—	..	296	..	—
Total	90,926	..	130,045	.	73,740

It should be borne in mind that the foregoing import figures do not include oils, benzine, spare parts, automobiles, engines, or tyres imported for the use of the Royal Hellenic Marine, the Army, or Government Departments. The figures represent only private purchases upon which duty has been paid. The duty on automobiles is 3.76 c. per pound; on tyres, 1 c. per pound; on oils, 1.37 c. per pound; and on gasoline, 3.4 c. per pound.

Development of the Trade.

The development of the automobile trade in Greece may be traced directly to the Balkan wars of 1912-13, when the Army and the people realised the importance of the automobile in war as well as in civil life. Road improvement is to be expected in connection with the increasing imports of automobiles For several years before the outbreak of the war of 1914 nearly every Continental manufacturer of tyres had an agency in Greece, with completely equipped sample rooms and agents ready to make sales upon almost any terms. Although there has always been a demand for American tyres, not one American firm, so far as this office is aware, has ever opened an agency in this district.

It is thought that after the war there will be an exceedingly rich field in Eastern Greece for automobiles, tyres, parts, etc. Perhaps the best means of getting in touch with the local market is a reliable commission agent familiar with the language, customs, needs, and preferences of the market. It is exceedingly difficult to do business direct. A commission agent fully accredited and allowed a generous commission on sales can build up a steady market often in a comparatively short time, which may later justify the opening of a branch house in the country. It is hardly necessary to add that it is all-important that such agents be given exclusive territory.

EGYPT'S TRADE.

(From Our Own Correspondent.)

Cairo, August 26.

Good Returns for July.

The Customs returns for July show a continuation of the improvement of the condition of the foreign trade of Egypt. Exports during the month amounted to £E1,919,567, just about double the figure for the previous July, and imports to £E2,820,232, as compared with £E2,594,232 a year ago. For the seven months exports come to £E22,841,522 and imports to £E6,650,509 respectively, an improvement of £E5,527,019 and a decrease of £E355,677 on 1916.

The principal imports during July were preserved meat, £E105,240; flour, £E50,818; coffee, £E70,309; petroleum, £E194,945; olive oil, £E45,791; stationery, £E39,609; coal, £E566,590; drugs, £E21,690, cotton threads, £E40,295; cotton tissues, £E590,862; wool tissues, £E62,949; sacks, £E60,386; worked iron and steel, £E76,171 and tobacco, £E210,680. The chief exports were skins and tanned goods, £E56,634; cotton seed, £E43,631; cotton cake, £E73,909; sugar, £E88,280 and cotton, £E1,490,546.

Chief Increases.

Great Britain's share of the imports fell off slightly, but the decrease was made up by a considerable rise in the proportion of India and Australia due to increased meat, flour, coffee, and textile shipments. America increased by 50 per cent. owing to larger petroleum imports and Greece trebled her share by larger tobacco and oil shipments. Both France and Brazil fell off considerably. Under exports Great Britain increased the amount of her purchases but not in proportion to the total exports for the month. As usual all the cotton seed and cake was taken by her as well as just under 50 per cent. of the cotton. America rose from £E50,027 to £E554,350, entirely due to larger cotton purchases; the same reason accounted for a substantial rise in shipments to France and Japan. Exports to Russia and Spain were nil, whilst those to Switzerland fell to a negligible quantity.

Trade with the Sudan was brisk. Exports from Egypt rose from £E94,872 to £E124,412 and imports into Egypt from £E35,663 to £E211,662. The principal imports from the Sudan were livestock, £E12,390; maize, £E42,224; sesame, £E30,902; gum, £E15,729; and cotton, £E62,948. Chief exports from Egypt were sugar £E35,779, and cotton tissues £E30,050.

ENGINEERING NOTES.

Coal-Gas Development.

According to recent reports and expert opinion the use of town-gas as a substitute for petrol for motor vehicles has been established, and although it can probably only be regarded as a temporary substitute, it is certainly possible to employ town-gas largely for heavy vehicles which run regularly within a suitable radius of gas-producing centres. If this fuel is to be extensively adopted the use of gas stored at a safe pressure will become almost necessary. A description of the gas-container and its accessories at the top of the vehicle, as well as the method of operation, was given in these columns some time ago, when the first vehicle driven by coal-gas appeared in public. Since then improvements have been made, and in recent official trials it was proved that the system is a perfect success. The advantages are stated thus in the report :—(1) The holder or container can be easily and cheaply replenished with gas from any ordinary supply. (2) The holder behaves as its own constant pressure governor, thus obviating the necessity for auxiliary governing accessories. (3) There is no need for gas-compressing machinery. (4) It adds very little to the weight of the vehicle; and (5) the holder is cheap to instal.

The use of town-gas as fuel for motor wagons is of great interest to many public authorities and private owners of motor cars in the Near East, who, owing to the great scarcity of petrol and its high price, have been obliged to discontinue the use of their cars. By the employment of gas as fuel such difficulties will disappear; for it should be easy to provide facilities for replenishment through an ordinary meter of sufficient size at many places, and in certain cases it might be practicable to supply gas through prepayment meters.

At a trial a 35-h.p. or three-tonner wagon was run round a district having just about the average kind of road and variations of level at an average speed of nine miles per hour, at a consumption of 1,000 cubic feet of gas per twenty-five miles.

Trade After the War.

Mr. L. A. Paish, of the Commercial Intelligence Department of the Board of Trade, addressing a meeting of the brass trade in Birmingham last week, spoke of the strenuous efforts being made in Germany to get all manufacturers into syndicates as the only way of regaining "the place in the sun." The Board of Trade was anxious to co-operate with manufacturers, and was prepared to go as far as finding financial assistance in investigating any particular market. If manufacturers were to regain their trade after the war, it was absolutely necessary that they should combine.

The Board of Trade, whose endeavours to organise the country's industries for the forthcoming trade war are very praiseworthy, can do, or say, nothing better than that, and it will be the fault of the manufacturers if they find themselves unprepared when that time comes. It is argued by some that collective action may tend to discourage enterprise in two ways. If it takes the form of a bureaucratic régime, whether instituted by the State or adopted by the governing body of an industry, it almost inevitably results in diminished activity and initiative on the part of the individual. If it involves the pooling of profits, it removes the stimulus of competition, and so reduces the incentive to effort. But there is no reason why it should involve either of these evils. Competent authorities explained to those arguing that point that "voluntary co-operation implies unity of purpose, but not uniformity of method." Success depends upon the energy and ability with which each member pursues the common policy, and collective action need not exclude the element of competition. All manufacturers and exporters are interested in seeing that British goods are widely known and easily accessible in foreign markets. But collective advertising, exhibitions, arrangements for transport and financing shipments are only devoted to winning a market within which British firms may compete with each other. It must be admitted that the value of combined efforts for gaining a market is better understood in America and Germany than here. An instance is provided by the combined efforts of a number of American engineering firms to introduce their productions in the Russian and Eastern markets. They contributed to a scheme of collective advertising, and the distribution of a handbook on the quality and efficiency of American machinery, and on American financial and commercial conditions. This, and the "strenuous efforts" which Mr. Paish mentioned that are being made in Germany to get all manufacturers into syndicates, ought to rouse British manufacturers to prepare themselves before it is "too late."

SULPHUR DEPOSITS IN CYPRUS.

According to the *Cyprus Agricultural Journal*, sulphur has been found in the mines at Skouriotissa. A moderate deposit has already been located and steps are now being taken to extract and refine the sulphur and to prepare therefrom flowers of sulphur of a quality which, it is believed, will be suited for the treatment of vines.

LANCASHIRE COTTON.

An Uncertain Market.

FROM OUR OWN CORRESPONDENT.

MANCHESTER, Wednesday.

Business in the market this week has been disorganised by the smart advance in American cotton rates. The big rise of 110 points in Liverpool on Monday last gave business a shock, and although a considerable inquiry has come through in yarn and cloth most of the offers have been impracticable. Much interest has been taken in the scheme of the Government relating to trading in the raw material in Liverpool from the beginning of next week. The new conditions are welcome, and although the new contract is not so satisfactory as the old it is realised that greater concessions from the authorities could scarcely be expected under the circumstances. Fluctuations in Egyptian cotton rates continue to take place. The current growth is said to be doing generally well. In Egyptian yarns rather more inquiry has come round, but sales of any weight have been isolated. In cloth for Egypt a few more offers have been met with, and buyers who have been nursing orders have been more prepared to arrange contracts with manufacturers. It is to be regretted that shipping facilities remain so poor, as the season in Cairo has now begun and larger supplies are wanted. Inquiry for India has broadened, there being more bids for Calcutta, Bombay, and Madras than for a long time back. So far business in grey shirtings has not been feasible, but steady buying has occurred in finishing and bleaching descriptions. China has only given retail support. Purchasing for Java continues on an encouraging scale. Operations for South America have been somewhat checked by the higher prices required by manufacturers. Makers of heavy materials suitable for war purposes are busier than ever. American yarns for home use have been in increased request, but buyers have not readily paid advances, and a large part of the demand has been blocked. Only a miscellaneous business has been done in bundle yarns for India. The undercurrent of demand for France remains healthy.

With the retirement of Mr. A. E. G. Braithwaite the firm of Braithwaite and Kirk, engineers, Calcutta, has assumed the name of Braithwaite and Co.

IMITATION LEATHER.

The Greek Market.

The United States Consul-General at Athens, Mr. Alexander W. Weddell, gives some interesting particulars in a recent report with regard to the Greek market for imitation leather and the effects of the war on the importation of this commodity.

Imitation waterproof leathers have been imported into Greece for perhaps ten years, generally from England, Germany, Austria, and Italy, under various names and in varying qualities, widths, grains, and colours. Their sale has increased greatly in the last few years, and it has been estimated that in the year preceding the outbreak of the war imports reached a total value of $135,000. During the war the figure has dropped, and now a generous estimate of the annual imports would be $6,000. On account of higher prices demanded by American producers of imitation leathers, their products have not sold well in this district. American imitation leather is said to have cost before the war 15 to 20 per cent. more than other goods. Because of the large demand, combined with general shipping difficulties, very little imitation leather is found on the Greek market to-day. Any of this product it is possible to deliver could be sold without effort, it is thought.

Pre-War Sources of Supply.

Perhaps the largest and most important producers that made shipments to Greece before the war were the British Pluvinsin Co., Limited, Manchester, and a firm in Austria. The more expensive qualities came from the English company, and medium grades from the Austrian firm, while cheaper styles, particularly for bookbinding, came from Italy. The only practicable method of building up a market for American goods in this district, or in other portions of the Eastern Mediterranean and Levant, is through the medium of a reliable commission agent, fully accredited, having exclusive territory, and familiar with local customs, needs, and languages.

Advertising in this district is very costly, and is of doubtful utility, except in particular cases, in which the agent's opinion should receive careful attention. Reading matter for local use should be in French, or, better still, in modern Greek. Greek customs duties on articles of this class are assessed at the rate of 1.45 drachmae per oke, according to paragraph 332a of the Greek tariff.

Credit Required.

Greek merchants, for many years before the outbreak of this war, were so favoured in the matter of credits, particularly by German firms, that it is still extremely difficult to induce them to consider the comparatively severe terms that many American firms have insisted upon since the cutting off of German sources of supply from the Hellenic market threw a large amount of Greek trade into their hands. A good commission agent, in thorough touch with his customers, should have no difficulty in establishing cash terms, but this is a matter which doubtless would be arranged in individual cases. The Austrian company that has been mentioned was very glad to extend eight months' credit in most cases as a matter of course. Under present conditions, however, confirmed or irrevocable credits could be opened in New York before shipment, if thought necessary.

Imitation rubber products shipped to Greece are generally packed in rolls, in solid wooden cases, each case containing strips from 40 to 50 feet long, and from 46 to 50 inches wide. It is earnestly suggested that manufacturers should not attempt to do business directly with local merchants, but in case they insist on that method they should write to these firms in modern Greek. Inasmuch as there is little or no chance that anyone in Greece will attempt to counterfeit imitation leather, it is not felt necessary that American manufacturers should go through the intricate and costly steps required to register their product with the Government.

NEWS FROM ALL SOURCES.

A tug brought in on September 22 to East London the crew of the Greek steamer "Eugenie S. Embiricos," bound for there, which ran ashore thirty-seven miles west of the port.

The Times Cairo correspondent states that everything indicates that this year's Nile flood will be higher than that of 1916, which was the highest for 22 years. The levels of the White and Blue Niles have kept exceedingly high for some time, and the water supply is more than assured. Orders have been given to watch the banks of the Nile closely and to prevent breaching.

It is thought that the cultivation of ground nuts will be taken up more seriously now in Cyprus, owing to the prohibition of the importation of this commodity, as there are several parts of the island where they can be successfully cultivated.

The Madras Government has discountenanced further experiments in the manufacture of soda-water bottles at the Government factory. Investigations are still proceeding with regard to the bangle industry, but it is thought very doubtful whether an indigenous craft could survive without a heavy duty on Austrian glass.

The Postmaster-General announces that the Government of India have decided that the value of British postal orders paid in India to any one individual on the same day must not exceed £20.

For the three months ended June 30 Indian exports and imports were as follows:—Exports: Indian produce and manufacture, Rs.57,29,73,760; bullion, Rs.21,17,315; Government paper enfaced, Rs.45,200; total, Rs.57,51,36,275. Imports: Merchandise, Rs.31,32,42,936; bullion, Rs.4,60,61,715; council bills sold, Rs.15,67,16,000; Government paper written off, Rs.35,20,000; total, Rs.51,95,40,650. 1917-1918 balance in favour of India, Rs.5,55,95,625, or at exchange at 1s. 4d., £3,706,375.

H.M. Consul at Adis Abeba reports, under date August 9, that in dealing with any firm in Abyssinia, especially at the present time, when commercial conditions are unstable, it would be well for British firms to do business cash against documents at Jibuti or Adis Abeba, or to work through the Bank of Abyssinia.

A MINISTRY OF COMMERCE.

Views in Industrial Centres.

It was only to be expected that the Government scheme for a Department of Commercial Intelligence would direct renewed attention to the advisability of the creation of a Ministry of Commerce, which would unite under one control all the varied functions at present exercised by a number of separate authorities. In the industrial centres opinion has long been in favour of such a Ministry, and, judging by the following passage from an article in the September issue of the *Middlesbrough Monthly Circular* it is gaining in force:

"It is quite obvious that after the war there will have to be a very drastic reorganization of our lop-sided, overlapping and often competitive Government Departments, and out of this reorganization a really complete, well-ordered and self-contained Ministry of Commerce might well emerge. It is not easy to exaggerate the importance of a real Ministry of Commerce in relation to the innumerable problems which must press for settlement immediately after the conclusion of peace. It is, therefore, in the highest degree desirable that the Chambers of Commerce and all the other organizations concerned for the welfare of British trade should press the matter insistently upon the attention of the Government and refuse to be put off with any partial or incomplete scheme. There was never a more opportune time for bringing about a genuine revision of the whole question of the attitude of the State towards the enterprise of its citizens in foreign countries. In pre-war days successive Governments, immersed in party politics, complacently ignored anything and everything that did not spell votes, but the logic of events since the war began has compelled attention to the shaken foundations of our industrial prosperity. Moreover, the war has given a much-needed stimulus to the organization of trade interests throughout the country, and our politicians are beginning to realize that they already constitute a force which will have to be reckoned with. Moreover, the belief in the eventual co-operation of capital and labour for the maintenance and expansion of our industries is not now confined to mere visionaries, but is, we venture to think, moving rapidly into the sphere of practical politics. This, in itself, should provide an immense accession of strength to those who are determined that trade interests shall no longer be neglected as they have been in the past."

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses and unsuccessful attacks during the week ended September 23, 3 p.m.:—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft):—

Arrivals	2,775
Sailings	2,691

British merchant vessels sunk by mine or submarine:—

1,600 tons gross or over	*13
Under 1,600 tons gross	2
British merchant vessels unsuccessfully attacked by submarines	†10
British fishing vessels sunk	2

* Including one sunk during week ending September 16.

† Including one attacked during week ended September 9, and two during week ended September 16.

COMPANY MEETING.

Smyrna-Aidin Railway.

Presiding at the meeting of the Ottoman Railway from Smyrna to Aidin on Tuesday, Lord Rathmore said that so far as they had been able to obtain any reliable information, their railway and rolling stock appeared not to have suffered any serious damage beyond the wear and tear of the uses they had been put to by the Ottoman Government. He added that, having recently seen in the newspapers a report that bombs had been dropped on Smyrna, he had made inquiries of the proper official authorities whether they had received any information to that effect, but he was told that they had no news of the alleged bombing or of any exceptional events affecting the railway. That seemed to confirm their opinion that nothing of an alarming character had lately befallen the line. He went pretty fully in March last into the view which the directors held as to the position and prospects of the company, and also explained the steps they had taken for the safeguarding and advancement of their interests at the termination of the war. He could not usefully add anything now to what he then said on those subjects.

COMPANY NOTES.

Dividends, Payments, etc.

Messrs. N. M. Rothschild and Sons announce the numbers of 253 bonds, amounting to £73,000, of the Ottoman Four per Cent. Loan of 1891 (secured by Egyptian Tribute), which have been drawn for redemption on October 10.

The Bank of England is prepared to receive the coupons due 1st proximo on bonds of the Greek Guaranteed £2 10s. per Cent. Gold Loan of 1898. The necessary lists can be procured on application at the dividend pay office, 3, Princes Street, E.C.

Coupon No. 40 of the Egyptian Delta Light Railways, Limited, falling due October 1, on the 5 per cent. debentures, should now be lodged at the Bank of England, E.C., for payment.

Oil Outputs.

Cheleken.—Production fortnight ending August 11 (n.s.), 209 tons; fortnight ending August 25 (n.s.), 178 tons; fortnight ending September 8 (n.s.), 214 tons.

Bibi Eibat.—Production for week ending September 16, 50,867 poods (or 821 tons).

European Oilfields.—Production for week ending September 16, 71,500 poods.

Baku Russian.—Estimated gross production week ending September 15, 76,500 poods.

Russian Petroleum.—Estimated production for week ending September 15, 37,800 poods.

Spies Petroleum.—Production, including 965 poods from ambars, for week ending September 16, 192,205 poods, or about 3,100 tons; total production for year from January 14 to September 16, 6,173,315 poods, or about 99,570 tons; total production for corresponding period last year, 6,016,655 poods, or about 97,043 tons.

Anglo-Egyptian.—Gemsah, 20 tons; Hurgada, 1,734 tons.

ON 'CHANGE.

FROM OUR OWN CORRESPONDENT.
THROGMORTON AVENUE,
London, Thursday.

We have again had a very quiet week, but on the whole the tone has been rather better although business has continued very restricted. The news from Egypt that the Nile flood this year promises to be even better than that of last year, which constituted practically a record, has no doubt contributed to the better feeling.

In Government stocks Unifieds have been dealt in to some extent up to 84, and 3½ per cent. preference have improved ½ to 73, at which price a fairly important transaction took place.

In Bank shares Nationals and Agriculturals are both unchanged, and only small transactions have been effected round current prices. Anglo-Egyptians are ⅛ down at 13⅛, some shares having come on the market.

In Land shares Aboukirs are a firm spot with buyers at 19s., but no sellers under 20s. Allotments are very steady round 3, and the company is believed to have made some satisfactory sales of land recently. In Behéras there has been nothing doing, but some shares are probably obtainable at about 12. Delta Lands have been dealt in to some extent between 12s. 9d. and 13s. 6d., and a fair number of New Egyptians have changed hands round 13s. 3d. Union Foncières were dealt in for some hundreds of shares round 37s. early in the week, but they have since improved 2s. to 39s. on some further buyers coming into the market.

In miscellaneous shares Alexandria Water are ⅛ quieter at 12⅜, whilst Khedivial Mail have been in demand and are 4s. higher at 35s., with a fair amount of business passing. Markets have been dealt in in a small way round 27s. and a fair amount of Salt and Soda shares have been done round 25s. 9d., an advance of 3d. since last week.

In Greek securities 81's and 84's were dealt in in a small way round 60, and closed more or less nominal about 61, an advance of 1½ since last week. On the other hand Monopolies are flat with a drop of 1½ points at 51. Rentes are in some request at about 44 and Currant Bonds are wanted at 91, but there are no sellers of the latter. Bank of Athens shares have been in demand for Athens and closed ⅛ better at 3, at which price some business was done.

Paris Bourse.

Quotations on Wednesday included:—Serbian (1895), 59 (unchanged); Credit Foncier Egyptien, 755 (against 760); Ottoman Bank, 500 (against 492); Suez Canal, 4,580 (against 4,589).

Oil Shares.

Wednesday's markings were notable for a substantial rise of 1s. 3d. in Anglo-Egyptians B to 24s.—25s. Roumanian Consols declined 3d. to 12s. 3d.—13s. 3d.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to July 31, 1917 (New Style: January 14 to August 13, 1917):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, July 1917		3,058,061	994,000
Do. do. do. 1916		3,140,949	2,538,000
Estimated Receipts for 7 months (Law of Control)		16,858,333	6,241,666
Actual do. do., 1917		18,060,730	6,746,000
Do. do. do., 1916		20,158,119	16,422,000
Difference between estimated and actual receipts for 7 months	1917	+ 1,202,396	+ 504,333
	1916	+ 3,299,786	+10,180,333

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49·1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

NOTES OF THE WEEK.

The outstanding military event of the week has been General Maude's brilliant success in Mesopotamia. At the moment it is impossible to gauge the full effect of the victory, but it is known that thirteen guns and twelve machine-guns have been taken, while 600 wounded and 3,200 unwounded prisoners are in our hands and two hundred Turkish dead have been buried by our men. On the most conservative estimate, this represents a very substantial gain, which will do much to increase the already considerable British prestige in the Middle East.

Unless the much-advertised rumours of a forthcoming Turkish offensive in Mesopotamia were purely fictitious, General Maude would seem to have anticipated the enemy's blow in a fashion which will make it difficult for the promised threat to be carried out. It was pointed out at the time, however, that, while the German newspapers were talking about Baghdad, they might be really referring to Palestine. Should the Germans have prepared a counter-attack on our troops at Gaza, the action on the Euphrates would hardly dislocate their arrangements, but it might, on the contrary, cause them to hasten their preparations. Turkish prestige reached its height at the surrender of Kut nearly eighteen months ago, but it has now fallen very far from that standard, and it is not perhaps very likely to recover, although it would be rash to assume that the Turk as a fighting factor has been eliminated for the rest of the war.

Peace talk has again been active during the week. The German Foreign Office has continued its tortuous manœuvres, publicly proclaiming that it stands where it did on the matter of Belgium and France, while privately it has offered peace to the Western Powers. Its terms, as reported by the French Ambassador in Petrograd, were that England and France should obtain what they wanted in the west, while Russia was to be sold to Germany in the east. This engaging project, which agrees substantially with the reading of the German peace aims put forward in these columns some weeks ago, was indignantly repudiated by the Western Powers, who remain faithful to the Pact of London. Probably Germany still wonders why we stand by Russia; in similar circumstances Berlin would certainly have joined in plundering an ally long ago.

There remains the rather obscure Papal activity. The Pope, whose sincerity everybody admits (except a few fire-eating German pastors of another persuasion), and whose incidental desire to restore the temporal power can hardly be considered a crime in the head of the Vatican, still remains officially hopeful of success. A curious statement has been issued from Papal sources that Germany is willing to give up Belgium and Northern France, but nothing is said as to the conditions, and it may be surmised once again that the condition would be an open door for Germany in Russia and the Balkans. Although the Pan-Germans would rage at such a decision, or indeed at anything short of annexing the earth, the mass of German opinion would probably consider such a peace satisfactory. The Socialists, tame and otherwise, supported the war originally on the ground of the peril from Russia, and they would claim that their support had been justified, if a peace were concluded which removed that peril from the horizon. The business community, on the other hand, which looks for fresh markets to replace those which have been lost during the war, would be satisfied, if it secured Russia, the Balkans and Asia Minor to exploit. Politically, too, a disguised but effective German control over a divided Russia would secure Prussian dominance in Europe, and leave her in a better position for the "final reckoning" with England and France, which German Professordom would proclaim inevitable in another thirty years' time. It may be assumed, too, that the disarmament proposal, in which Germany echoes the Pope, would be made to apply very drastically to Russia and the Balkan States. For the present, Germany continues to take a suspicious interest in the national movements in Lithuania and Courland, in order to transform the autonomist movement in those provinces into one that demands complete separation from Russia—in which event Germany calculates that these little countries could be made dependent on Berlin.

Count Czernin, the Austro-Hungarian Foreign Minister, has found it necessary to imitate his colleagues in the German Government by seeming to discuss peace. After the usual statement that Vienna was unprepared for war, which is an improvement in finesse on the theory that the Central Powers did not want war, although it approaches no nearer to the truth, he proceeded to talk generalities in the now fashionable manner. He is ready for disarmament, for arbitration, for economic peace; in fact, for the millennium. It is perhaps something gained to have made our enemies talk of such things, for this is at least a more excellent song than the other one of conquering the world. But there are certain verses omitted, and those the very ones that the audience want

Digitized by Google

to hear. Count Czernin has nothing to say about Roumania or Serbia; he does not even hint at restitution.

It is true that he has dropped indemnities, except as a debating point. He is venturesome enough to remark that "*even* Germany has most emphatically professed adherence to the idea of all-round disarmament"—a phrase which may awaken some susceptibilities in Berlin. But all these generalities about "the new world-order" are no substitute for the plain answer that is demanded as to the destiny of the occupied countries. The Austrian silence on that point, and the official German statement that these matters are kept for bargaining at the peace conference, are sufficient indication that the Central Powers have not yet abandoned their dreams of expansion. This pious language will be rated at its proper value by those who have knowledge of the brutal policy still being pursued in Serbia.

Some further details of that policy have been given in *The Times*. The population of Nish has diminished by 60 per cent., and is now mainly women and children. All the men capable of bearing arms, and even elderly men have been transported into Bulgaria, where they are employed in road-making. Children have been taken from their homes and flogged in order to make them reveal the hidden stores of arms and ammunition which were supposed to be secreted by their parents. Many things have been stolen by the Bulgarians; the present Burgomaster is a Bulgarian café-keeper of a low class, who treats the people insolently.

The Bulgarian Prime Minister has assured a German newspaper that the meeting of the German Emperor and King Ferdinand, "and another important event which is imminent, but which for the present must remain a secret," will once more demonstrate the unity of the Central Powers. The mysterious secret event probably indicates that Berlin has granted another loan to Sofia—it is the sort of thing that the recipient naturally would not talk about too much—in return for which it is quite possible that Bulgaria may pursue a more active military policy than has been evident lately.

From Roumania, or rather from Odessa, comes news of rather serious difficulties in provisioning the population, which is hardly to be wondered at in view of the loss of territory, the difficulty of cultivating the uninvaded districts at the same time that the army was being reorganised, and the disturbance of conditions in Russia. Great sympathy will be felt in this country with our friends in Moldavia, a sympathy which is not the less sincere, because it is mingled with admiration for the plucky way in which Roumania has so far surmounted the unavoidable troubles of the past year, and the great fight which she has put up against the enemy. It is rumoured in Odessa that a fresh offensive is shortly to be launched against Roumania, but it remains to be seen whether the enemy's intentions have been correctly judged. On this side the prevailing impression is that Germany is removing very large numbers of men from the eastern to the western front.

Whatever the future may have in store on the Roumanian front, comparative quiet now prevails, and the Germans are using the interval, after their usual manner, in propagandist work. Regularly every afternoon the minenwerfer throw across the Sereth River the Bucharest newspapers, now produced under German control, and manifestoes are also sent over imploring "our Roumanian comrades" to come back and recover their freedom, and visit their homes; or, if they will not venture themselves, at least to write to their families, the Germans promising to deliver the correspondence. The Teutonic mind is wonderfully constructed, if it imagines that this kind of thing has any effect, but as the same policy has been pursued from time to time in France, and more especially in Russia, it is probable that some professor of psychology has advised it as an effective peace offensive. The weak point of the business is that two can play at the game, and the Roumanians have retorted by exhibiting posters bearing the legend, "If you have had enough of the war, why not come over to us? We will give you decent bread." It is a retort both courteous and effective.

An apparently trustworthy account which has appeared in *The Times* indicates that the economic situation of the Ottoman Empire goes from bad to worse. In Turkey only 60 per cent. of the average acreage of wheat was under cultivation this spring; fruits and figs are available, but bread and onions are scarce. The soldiers are often without bread to eat, and in Constantinople fish is canned by the Germans for German use alone. The German troops are better treated than the Turks, which naturally causes discontent in the Ottoman army, and Enver Pasha is said to have asked that better treatment should be given to his soldiers. Should it be the fact that a Turkish general on Turkish territory has to ask his ally for better conditions for his own men, it shows to what a position of degradation Germany has reduced Turkey. But it seems clear from this statement that not even the Germans can do much to provision themselves from Asia Minor. Rather exalted expectations of importing food from Asia Minor into Prussia by way of the Balkan Railway have appeared in the German newspapers from time to time. But these Press promises will hardly have done anything to satisfy Teuton hunger; indeed, it should have been obvious from the beginning that any large increase of production in Asia Minor—a sufficiently difficult problem at the best, which even in peace time would take some years to bring to a satisfactory solution—would be practically impossible in war time, when the working population was so largely drawn upon for military service.

Some further documents have been issued in connection with the Athens outbreak of last December. It appears that orders were issued by the Greek General Staff on November 29 ordering the Athens garrison to occupy all the commanding positions about the city and all public buildings, and, if the Allied detachments tried to take possession, to offer armed resistance and to fire upon them if necessary. While these orders were being issued, King Constantine was giving assurances to the French Admiral that he agreed to the Allies entering Athens, and would only make a show of resistance. The ex-monarch appears to have studied political ethics at Potsdam with some success.

It seems that Viennese opinion is becoming rather alarmed over the Corfu agreement and the Southern Slav movement. The *Neue Freie Presse*, which has attained its influence by always saying what the average man in Vienna thinks that he thinks, has been discussing the question of Dalmatia. It denounces the Entente for "interfering in our internal affairs, and employing Serbia as a bolt to bar our way to the East." The possession of the Dalmatian coast, says this paper, is a vital necessity for Austria, since, if she loses it, she would be absolutely cut off from the Balkans, and Austrian merchandise could only reach Serbia and Bulgaria by traversing Hungary—which is popularly supposed to have some political connection with Austria.

A contemporary which reflects with unfailing precision the ideas of thirty years ago is very angry because Mr. Asquith put in a word for Greece in his Leeds speech. As a matter of fact, all that the ex-Premier said was that "there are the cases, not to be forgotten, of Greece and the Southern Slavs," which is surely not very strong doctrine, even allowing for our excellent contemporary's dislike of the Southern Slavs. M. Venizelos has admitted that his vision of a Greater Greece has been partially compromised by the late King's policy, but it must in justice be recognised that it was a personal policy, and since King Constantine's removal Greece has played the game. She may not have scored so many runs as if she had had an earlier innings; but it is a little hard, if she is not to be reckoned on the score-sheet at all.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 7.

The Mecca Pilgrimage.

The first of the ceremonies preceding the departure of the Holy Carpet for Mecca took place, as usual, on the Mastaba at the foot of the Citadel on Saturday last. This ceremony, which is called "Al Kiswa," in contrast with the one that takes place a week later, and goes by the name of "Al Mahmal," consists in the official conveyance of the "Kiswa," or covering for the Kaaba at Mecca, from the factory where it has been woven to the Hassanein Mosque, where it remains until the time comes for the caravan to leave for Suez, en route for Jedda and the Holy Shrines. The Kiswa ceremony was this year presided over by the Prime Minister, H.E. Hussein Rushdi Pasha, who represented H.H. the Sultan. An interesting feature in last Saturday's proceedings was the presence amongst the spectators of a large number of British convalescents, who by special arrangement had been accorded a prominent position, from which they were able to follow all the details of this picturesque ceremonial.

The Cotton Seed Crop.

In my letter of August 17 I reported that a proclamation had been issued by General Allenby forbidding all dealings in cotton seed from the new crop, in view of the intention of the British Government to purchase all that was available for export. The negotiations necessary to the elaboration of a scheme of purchase have now been concluded, and on Monday last a notice was issued by the British authorities announcing that a board, to be known as "The Cotton Seed Control Board," had been appointed to effect on behalf of H.B.M.'s Government the purchase, storing and shipping of the 1917-18 crop of cotton seed. The notice goes on to say that the Board is authorised to purchase in Alexandria on the basis of P.T.100 per ardeb for Fayumi and Upper Egypt, P.T.92 per ardeb for Affifi, Assili, Nubari and Abbassi, and P.T.85 per ardeb for Sakellarides seed; these prices are for fair average quality, and allowances above and below the standards, which will be fixed by the Board, will be made. No one will be allowed to purchase seed without a licence from the Board, and special provision has been made to meet the requirements of the local crushing mills.

The only class of seed which is outside the control of the Board is seed for sowing purposes, and it is expressly stated that all arrangements in connection with that seed shall be kept in the hands of the Egyptian Government. Simultaneously with the above order another was issued, with the approval of the General Officer Commanding his Majesty's Forces in Egypt, ordering that until further notice cotton seed may only leave a ginnery, if it is consigned to Alexandria, is issued on licence to the crushers, or is issued for sowing purposes either direct to the Ministry or to cultivators under licence from the Ministry of Agriculture. In other words, all seed for sowing purposes is now placed under the control of the Ministry of Agriculture, and no one may issue it without a special permit from that administration.

It is to be hoped that this will mean that an improvement will make itself evident in the crop as the result of the greater attention which the Ministry will be able to give to the quality of the seed issued to cultivators. Of course, for some little time, at any rate until an adequate staff is available, no great improvement must be expected, but all the same the control which is now conferred on the Egyptian Government must result in the elimination of the unscrupulous element of dealers, who have in the past been responsible for the dissemination of inferior and mixed seed throughout the country, and who, under the system of licences, will no longer be able to impose on the fellahin with impunity. I might mention that the Government already controls about one-fifth of the sowing seed used annually, through the distribution of seed which the Ministry of Agriculture makes on credit to the small fellahin land-owners, but the new arrangement affords it a much wider and firmer control over the sowing seed.

The realization of the hopes of the extermination of the pink boll worm, through disinfection of the seed, has once more had to be postponed, owing to the difficulties encountered under present conditions in obtaining the necessary machines. At first it was ordered under the law introduced last autumn that every factory, to be allowed to work, must install a fumigation machine approved of by the Ministry of Agriculture. The installation was to be finished by September 1 this year. Early in the year, however, it was evident that the number of machines required for the whole country would not be obtainable from Home, and it was arranged that the law should only be applied to Upper Egypt, and that it should be suspended in so far as Lower Egypt was concerned. Now, however, it is found impossible to obtain even the small number required for the southern provinces, and in consequence the application of the law has had to be completely suspended until further notice. It is a great pity that this delay has had to be incurred in the execution of a scheme which the experts are sanguine would, together with the destruction of the bolls left on the cotton plants after the final picking, completely eradicate the pink boll worm, but the delay cannot be helped in the circumstances, and we can only hope that in the meantime the ravages of that pest will not increase too much.

The Cairo City Police.

Colonel George Harvey Pasha, who is about to proceed on leave, has definitely decided to retire from the Commandantship of the Cairo City Police on the expiration of that leave. Harvey Pasha, who is one of the oldest officials in the country, has done yeoman service out here. He succeeded to his present position on the retirement of Mansfield Pasha some ten years ago, and he has been responsible for a number of reforms, which have added greatly to the efficiency of the force. He has always been noted for his fearlessness, and he never showed that quality better than during the troublous period just prior to the appointment of Lord Kitchener as British Agent, as the writer can testify from his own personal observation. Few people, moreover, realise what a debt is owed to the retiring Commandant for the bold and able manner in which he controlled affairs and carried on during the early months of the war, when the powers that then were scarcely seemed themselves to know what policy to adopt towards the cosmopolitan element which existed in the city and sheltered a multitude of spies and political agents, and when the Pasha took upon himself the great responsibility of acting as he thought fit. Colonel Harvey has fully deserved a rest from his life of ceaseless activity, and he will be much missed in Cairo, where his striking figure had caused him to become quite a landmark.

It is not known definitely who will succeed to the Commandantship of Cairo, but there is every likelihood of Russel Bey, Harvey Pasha's second-in-command, obtaining the appointment. If he does, it will be a well-merited promotion, for Russel Bey is a most efficient police officer and fully understands how to handle populations such as abound in Cairo, as his conduct during the riots in Alexandria some years ago conclusively demonstrated. Under him the Cairo City Police ought to do much good work and prove an eminently efficient body of men.

The Question of Taxation.

A local contemporary has published a statement that a commission of experts has arrived here in order to study the question of fresh taxation. This information is, however, quite incorrect. It is, moreover, not likely that any scheme such as would require consideration by a commission from outside will be put forward before the end of the war, and indeed it is far more probable that, if fresh taxation is to be imposed, as the Acting Financial Adviser's report leads us to expect, it will be introduced without taking the advice of any experts from home. It is a thousand pities that there is to-day no means of tapping the fortunes made by certain local people through the war, and also that advantage cannot be taken of the present prosperous condition of the agri-

Digitized by Google

cultural element to levy now a contribution towards post-war capital works expenditure. The latter expenditure will, after all, be for their direct benefit, and they would to-day not feel any reasonable extra taxation which might be imposed on them to raise part of the sum required. It is true that, theoretically speaking, the money made by the agricultural element will still exist as a taxable asset after the war; but, all the same, it appears highly regrettable that the present opportunity, when the fellah would not feel the levy, should be allowed to slip by.

In this connection it is interesting to note that the balance of trade between Egypt and the world since the outbreak of war is about £E23,000,000 in the former's favour. If to this are added the bank balances abroad, which, owing to the heavy purchases made in this country by the British Army, must be very considerable, one can obtain a fair idea of the wealth that has accrued to Egypt and of the great change that has come over the financial relations of this country with Europe since and owing to the outbreak of war.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, September 9, 1917.

The Late Cabinets.

The Chamber of Deputies adjourned last Monday for twenty days, and the Premier has gone to Ipati for a well-earned rest.

The last question to occupy their attention was the motion to defer the Skouloudes and Lambros Cabinets to the High Court. The motion was carried almost unanimously by those present, and two commissions were named to inquire into the grounds on which they are accused, which are briefly as follows:—First, for having accepted office knowing that they did not enjoy the confidence of the people; secondly, for having dissolved the Chamber of 1915 because its policy was contrary to that which the ex-King wanted to impose; thirdly, for having prevented by force and by illegal measures meetings of the Liberal Party and for having prevented the people from meeting to give expression to their views; fourthly, for having organised a system of espionage and of terrorising those of an opposite opinion; and, fifthly, for having maintained the people mobilised with the exclusive purpose of carrying out their political opinions and for having employed the reservists to spy upon and terrorise the people opposed to their views. In the reference to the commissions these accusations are amplified and details are given of the acts of which they are accused.

The members of the Skouloudes Cabinet are:—General Yannakitsas, MM. D. Gounaris, S. Dragoumis, D. Rally, A. Michelidakis, and M. Hadjacos; and the members of the Lambros Cabinet are MM. A. Tselos, E. Zalacosta, J. Damianos, J. Hadjopoulo, M. Soultamis, S. Tzanetouleas, A. Apostolides, J. Argyropoulo, T. Eliopoulos, N. Drakos, and E. Charilaou. A motion has also been presented to defer the Gounaris Cabinet to the High Court, and this will be discussed on the meeting of the Chamber.

The King and the Constitution.

The reply to the Address from the Throne has been presented to King Alexander, and on receiving it his Majesty said that the national representation may be certain that they will always find in him not only the guardian of the Constitution and of its national traditions, but also a faithful collaborator in all decisions taken for the success of national aims. He had no doubt that the representatives of the nation, in the face of the great events which the country will have to meet, will show themselves worthy of the hopes of the nation, and, having in view the supreme interests, will do all that their love for their country dictates to realise the historical rights of the nation.

German Intrigues.

The publication of further official correspondence has revealed what efforts were made by Germany to induce Greece not only to renounce her treaty with Serbia, but actually to join Bulgaria in attacking the Serbians. One despatch from the Greek Minister in Berlin to the Greek Government in October, 1914, may be quoted as an illustration of German mentality and expectations.

This despatch describes an interview which the Greek Minister had with Mr. Zimmermann, in which the latter said that the German Government was glad that Russia had declared war against Turkey, because it would necessitate the withdrawal of Russian troops from the German and Austrian fronts, and because, on the other hand, Turkey, profiting from this state of war, would, as they hoped, proclaim a holy war in Asia, India and Africa, and then the rising of the Mussulman world would make a difficult situation for France, and especially for England, who was afraid of her position in Egypt and in India. As for Greece, Zimmermann renewed his assurance that Turkey had no intention of attacking her, and that it was in Germany's interests that Turkey should confine herself to Russia. As regards Bulgaria, he thought she would not intervene then, but that if she did later on it was in Greece's interests not to interfere. On the Greek Minister remarking that they had a treaty with Serbia, Zimmermann replied that treaties nowadays had a minimum value, and concluded by saying, "Try to detach yourselves from Serbia as soon as possible."

General News.

Great satisfaction is expressed here at the evacuation of Epirus by the Italians. Janina has been reoccupied by Greek officials and by some troops of the national army, and Greek officials are also being re-installed in the other towns vacated by the Italians.

A project is to be submitted to Parliament for the purchase by the State of the Greek railways. It is proposed to effect the purchase by means of a loan from the National Bank to the Government, who will issue shares for public subscription.

A fire broke out yesterday in the beautiful pine forests around Pentilicon, and assumed large proportions, destroying many thousands of beautiful trees. These continual forest fires in the summer are a great disaster for the country, and it is surprising that some efficient means are not adopted to try to prevent their occurrence. It is estimated that over 60,000 acres of forest are annually destroyed by fires of suspicious origin. A short time ago the Minister of Agriculture issued a notice to the effect that, as these fires are suspected to be the work of persons wishing to utilise the ground for pasture or agriculture, or especially for obtaining the wood, for which there is now a good sale, from the burnt trees, the use of the burnt districts shall not be allowed for a period of ten years.

In addition to this destruction by fire, many thousands of trees are annually crippled by the incisions made for the extraction of turpentine, which is used in the manufacture of certain wines. No planting of trees takes place to replace those annually destroyed.

The British community, who were scattered after the events of last December, are gradually returning to Athens. The Sunday morning service in the Anglican Church has been kept up since the departure of the chaplain by Dr. Rowe and Mr. Waller, the American Vice-Consul-General, and it is now hoped that the appointment of a new chaplain will not be longer delayed. The Britannia Club for ladies is being reopened through the energy of Mrs. Triandafyllides, much to the satisfaction of the many who made use of it.

THE SERBIAN RED CROSS.

The Serbian Legation states that at a meeting held at 9, Ennismore Gardens, on September 27, a Committee was formed for a branch of the Serbian Red Cross Society in Great Britain, which will take over from the Serbian Legation the representation of this society as the first Serbian charity administered in this country by Serbs with the aid of their British friends. Great stress was laid by the Minister who proposed the creation of this Committee on the close collaboration to be maintained with the British Committees which have been working in this country since the beginning of the war for Serbia and the Serbs. The Committee is formed under the patronage of his Royal Highness the Crown Prince of Serbia. The Serbian Minister and Mme. Jovanovitch have consented to be Presidents, and Prince and Princess Karageorgevitch have accepted the vice-presidency. All communications should be sent to the Hon. Secretaries, Miss A. J. Dickinson or Mrs. Robert Frank, and donations to Dr. P. Vuyevic, at 9, Ennismore Gardens, S.W. 7. Cheques may be made payable and sent also to the Serbian Minister, 195, Queen's Gate, S.W. 7.

According to the Milan correspondent of *The Times*, Dr. Benesh, General Secretary of the National Council of Czechs in Paris, in an interview with a representative of the *Perseveranza*, stated that the Czechs and Slovaks wish to see an agreement established between Italy and the Jugoslavs in regard to the Adriatic as a preliminary to an entente between Italy and the Slav States of Eastern Europe.

ANCIENT EGYPTIAN RELIGION.

BY JOSEPH OFFORD.

The late Sir Gaston Maspero at one time in his career intended to write a great book upon the religion of the ancient Egyptians. In it was to be included the animistic and magical primitive concepts provided in the texts of some 4,000 words preserved in the inscriptions of the Sixth Dynasty Pyramids at Sakkara, of which works he was the premier translator. But his onerous official duties in Egypt took up too much of his time to permit of his composing such a *magnum opus*. Moreover, it was found that many early coffins emblazoned with religious texts gave other recensions of the "Pyramid" texts, and these have been for a number of years in course of publication by M. Lacau, whilst fresh papyri containing variant copies of chapters from the "Book for the Dead" and other theological works were continually being found and edited. Maspero, therefore, postponed the book he intended to write, and it will now never be produced. He collected, however, augmented, and re-edited in several volumes of his vast "Bibliothèque Egyptologique" his many long and important articles upon Egyptian religion, which had mostly appeared in the *Revue de l'Histoire des Religions*, altering them where new evidence rendered his first statements imperfect. He also continued up to the week of his death to review, chiefly in the *Revue Critique*, all the more important books upon the subject that came out, adding his ideas on the subject. In addition to this, he printed a summary of his matured views in the archæological journal, *Memnon*, Vol. 6, 1912, and we have his final summary in the 1915 fourth edition of the "Guide au Musée du Caire." When these essays are collected and published in a last volume of his works, we shall probably possess all that he desired to express of his conception of this intricate subject.

There were some ideas concerning ancient Egyptian religion of which he was a determined opponent, and he never modified his opinion. One of these was the theory enunciated chiefly by Brugsch Pasha and M. Paul Pierret—founded it must be admitted upon an almost unique knowledge of the old Egyptian religious writings—that in the course of time the priests had arrived at a true monotheistic conception of the Deity; that they taught among themselves, and expressed, though often in a mysterious manner, in their sacred books that all the variety of deities were but types and manifestation of the One Omnipotent uncreated God. Maspero would have none of this "esoteric monotheism," and could detect no evolutionary religious progress by the Nile: first, because he showed that the texts relied upon were jumbled together, if they were of the kind wished for, from all ages of the long Egyptian history. Therefore, they could not be utilised as forming a type of advanced religious tenets at any particular epoch. Secondly, he could not accept such views, because he proved that the apparent monotheism of the holy temple books originated from what he termed geographical and political causes. When the priests of Thebes desired to place their special city deity, Ammon, in the place of supreme deity in order that Thebes should be politically and geographically the Egyptian metropolis, they alleged that the other local gods of Memphis, Tanis, Hermopolis, and Abydos, and even those of Syria, did Ammon homage. They made him a sort of suzerain of the territorial gods, and all Egyptian gods were the special divinities of some special site. This one deity was then lauded in Theban theology as the One above all others, and for a time it seemed as if he would become a national god. The Theban hymns to Ammon are in expression fairly monotheistic. But with the fall of the Theban Empire fell the rôle of Ammon as ruler of the gods, and towards the Twentieth Dynasty, when its Pharaohs shook off the political yoke of the Theban priesthood, the ancient polytheism returned, only to become more rampant and the pantheon more prolific until the arrival of Christianity. Even then some members of the old crowd of deities crept into the new church as canonised saints, and Isis and Horus became the mediæval mother and child. For the early century catacomb paintings and other Christian relics and literature knew nothing of her. Mary, Queen of Heaven, with her star-spangled robe, coronet, and infant in arms or upon her knee would have been bowed down to, if placed in bygone days in any shrine of Isis in the Delta.

Maspero, in one of his notes in the Cairo Museum Guide, explains that whilst Egypt never had one single God it was full of *Dieux uniques*. Thus Ra was the one god for Heliopolis, Osiris for Abydos. The one god was the special one of every temple or town or village that had its particular deity, including the crocodile, and even ichneumon deities of Fayoum hamlets. The feudal spirit kept alive the deities of locality, and the inhabitants of each particular district supposed to have within its boundaries one special divine protector never would nor did accept the idea that he or she or it was merely a manifestation of and so inferior to some god, however great his reputation or vast the territory whose people adored him may have been.

There is a proof of this from the mystical and magical religious books never mentioned by Maspero, which may, therefore, have escaped his notice. That is, that in the next world, according to the description of it given to us by the Egyptian Theocracy themselves, there were many gods, and they were territorial. We have the story of the ship of Ra sailing along the celestial Nile, with its crew of gods galore, and as passengers some of the spirits of most saintly Egyptians, or of those who had sanctified themselves by huge donations to the temple Wakfs. They pass through twelve portals, each leading to the separate territorial domain of a deity who owned his piece of the Elysian fields. If the philosophers of the sacred colleges failed to conceive of one single God as deity of Heaven, and parcelled out Paradise among divers divinities, they certainly never achieved the concept of one Lord of All for them here below.

SCHOOL OF ORIENTAL STUDIES.

LANGUAGE DIFFICULTY OVERRATED.

It had been intended to issue a quarterly journal at the School of Oriental Studies dealing with Oriental languages, but this project being impossible for the present, it was decided, in order to make the aims and objects of the school better known, to issue a *Bulletin*. This publication, which has just been issued, is admirably calculated to achieve the desired end. In addition to a summary of the various movements leading to the establishment of the institution, and an account of the opening ceremony by the King, there are a number of articles of Orientalist interest, such as papers by Mr. J. D. Anderson, I.C.S., retired, on "The Phonetics of the Bengali Language" and "Metre and Accent." Summaries of a number of lectures delivered at the school and book reviews complete an excellent work, which shows very clearly the high standard that will be set when the school is at length in a position to undertake its project of a quarterly journal.

In an introduction to the *Bulletin*, Mr. Edward Denison Ross, the Director of the School, states that two great obstacles have hitherto impeded the spread of Oriental studies: (1) the difficulties which are supposed to attend the acquirement of Eastern tongues, and (2) the absence of proper incentives. The average Englishman has an exaggerated view of the difficulties which attend the study of Oriental languages as compared with Western tongues, and this is much to be regretted, for, although all Eastern languages have a strange appearance to those who do not know them, it is in practice only the first step that costs. The number of persons who have any idea of the languages spoken by our fellow-subjects east of Suez is lamentably small, and not till such misconceptions are dismissed can we hope for the spread among our own people of that knowledge of the East which is so essential to the happy relations which should exist between European and Oriental races.

As to the absence of proper incentives, Mr. Denison Ross points out that no prospect of a livelihood could reasonably be held out to anyone taking up these subjects in the past. Positions commanding a decent salary in the various Universities in England did not number in the British Isles a dozen all told, and the encouragement of language study in the Civil Service and in the Army has never been sufficient to arouse general enthusiasm. It is especially this want of practical encouragement that has so long delayed the establishment in this country of a School of Oriental Studies. In this connection attention may be drawn to the study of Hindustani. It is greatly to be regretted that a language which is understood throughout the length and breadth of India, and which is spoken, though seldom correctly, by thousands of English men and women daily during their sojourn in that country, should so rarely be an object of serious study outside the small band of those who seek for rewards.

It is by no means universally recognised, he continues, that a beginning of this, as of all Eastern languages, can best be made at home. This is, of course, self-evident in the case of travellers, but it also applies to those who intend to reside in an Eastern country. For, apart from considerations of climate, which in most Oriental countries tend at the outset to reduce the energies, it is certainly the case that during the first year or so of residence in a totally strange country a man's time is fully occupied in learning his new duties and in adapting himself to unwonted surroundings. Such are not the conditions in which to embark on the acquisition of a new language. On the other hand, if the newcomer arrives with a definite linguistic stock-in-trade, if he has mastered the alphabet, the rudiments of grammar, and even a limited vocabulary of the language spoken in the country of his adoption, he is not only able to adapt himself more readily to the new conditions, but also to profit in a far greater measure by the language teaching which may be available locally than one arriving without such equipment. It may now be confidently presumed that with the creation of the School a fuller recognition will be given to the importance of Oriental studies, and that with this recognition better prospects will be held out both in the academic and in the practical spheres of activity; and it is to be hoped that the facilities now offered will bring about a marked and permanent increase in the number of Oriental students, and that the common interests, both human and literary, which have hitherto reposed on all too slender foundations may be correspondingly strengthened.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE ANTI-MONTENEGRIN CAMPAIGN.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The unfortunate differences between Serbia and Montenegro, touched upon by Mr. Devine, are of very much older standing than he indicates. A brief outline of them may be of interest, for the South Slav question is of great importance.

In 1900, when I first visited Montenegro, the Montenegrins reckoned themselves as the most important of, and the leaders of, the South Slavs. During the next few years I used to hear the reconstruction of Tsar Dushan's mediæval Empire talked of with the Petrovitch dynasty as its head. Montenegro was seen at that time by West Europe through the glamour of the Gladstone-Tennyson myth. I saw it so myself, and did not at first perceive the rottenness at the core, although at the time a sharp attack was made on the country in the American Press by emigrant Montenegrins.

In 1902 I was in Serbia, and then, rather to my surprise, learnt that there was a movement on foot, which had but few supporters, to put Prince Mirko of Montenegro on the throne of Serbia. I was in Cettigne in 1903, when King Alexander was assassinated. There was wild excitement, and the report at once ran round that Mirko would be King. There was some disappointment over the result, but the nation as a whole rejoiced greatly at the change of dynasty. I went to the gala performance at the theatre, and King Peter, being son-in-law to King (then Prince) Nikola, his election to the throne was held as the next best thing.

Prince Nikola himself expressed his satisfaction to me, and stated that King Alexander's death was a necessity. The parting of the ways soon came. It was in 1905 that I first heard Montenegrins complain bitterly against the government of their country. Especially in the outlying parts there was evidently an anti-Petrovitch party. The Prince granted a constitution suddenly to the country. This was taken as a sign of reform. But soon I was told that the Parliament had no power, and things were no better. Things came to a climax in 1907, when a large number of the leading men of Montenegro were arrested on a charge of plotting to assassinate the Prince and several members of his family by means of some bombs which had been manufactured in the Royal arsenal in Serbia. I do not pretend to decide the rights and wrongs of the affair. I was in London when the arrests took place. When I returned to Montenegro, in 1908, I found the whole country torn into parties and the wildest accusations flying round. A number of persons were found guilty, including M. Radovitch. Some were shot, others condemned to long terms of imprisonment. Some saw the hand of Austria in it, some of Russia, some of both. There was intense bitterness, spy-mania flourished. The net result was much hatred between Serbia and Montenegro, and a distinct *rapprochement* between Montenegro and Bulgaria. In 1910, when Prince Nikola assumed the title of King, it was remarked that the King of Serbia was not present at the fêtes. In 1911 I spent quite three months in Podgoritza, where men concerned in the bomb affair were imprisoned, and found that feeling on the subject ran very high, sympathy being with the prisoners. People even expressed the opinion that no united Serbia could be formed until the two reigning dynasties had followed that of the Obrenovitches. Further tension between Serbia and Montenegro soon followed. The Serbian Metropolitan of Prizren was deposed for malpractices, and in his stead a Montenegrin obtained the post—by what means I do not know. I was in Scutari at the time. The one Orthodox priest there received letters from a Serbian source bidding him refuse to recognise the election of the Montenegrin. The Montenegrin Consul, M. P. Plamenatz, was very wroth about this, and explained to me that the Serbs were attempting to claim the district, whereas in case of the break-up of Turkey it should by right fall to Montenegro. I was in Montenegro when the Balkan War broke out, and heard a very great deal of what was going on. It was generally believed that the Montenegrin army was very far superior to that of the Serbs. I had heard of an agreement between Bulgaria and Montenegro before hearing of anything about one with Serbia. The Montenegrins declared war a fortnight, in fact, before any of their allies with the intention of sweeping up all the territory they wished for before the Serbs took the field. They would then be head of Great Serbia. I had all my meals with officers, soldiers, and officials, so saw the fluctuation of opinion and events at very close quarters. Briefly, Montenegro's plan failed completely. The anti-dynastic party rejoiced. The other was bitterly disappointed. The pro-dynastic party, however, did not lose hope of even yet being head of Jugoslavia, and when it compromised with Austria in 1915 Prince Mirko, whom I had seen dissembling his disappointment at the Cettigne Theatre in 1903, remained in Montenegro and visited Vienna, with the result, as has been already published, that it was suggested that he should occupy the coveted post.

Into the rights and wrongs of this lamentable state of affairs I will not enter, and I studiously avoided when in the country identifying myself with any party (there were at least three). I record the facts as I saw them.

There is, it is true, no diplomatic agent to explain matters, but Montenegro has a Consul-General in England, who I found, when I applied to him, was not able to offer any explanation of the state of affairs. Which I took as a very bad sign.—I am, etc.,

M. EDITH DURHAM.

[The subject is dealt with in our leading article. Here, perhaps, it may be stated that Miss Durham's information confirms the contention that propaganda is the life and soul of the Balkans. A foreign observer in any country is almost inevitably bound to be brought into touch mainly with one element to the exclusion of others, and as a rule that element will be the most restless one. Our correspondent probably heard in Montenegro exactly what an energetic investigator might hear nowadays *mutatis mutandis* in the United Kingdom, if attention were paid only to the statements of Sinn Feiners, Pacifists, Shop Stewards, and King Charles the Martyrists. It is not always easy to determine national tendencies from individual expressions of opinion, and it may be doubted whether even the fact that Miss Durham saw Prince Mirko dissembling his disappointment would be accepted in a court of law as evidence of a widespread conspiracy in Montenegro to absorb Serbia.—ED. N.E.]

NEAR EAST BOOKSHELF.

GLASS HOUSES IN THE BALKANS.*

The Serbian Society will one day wake up to find that it is high time to save Serbia from some of her friends. It is possible to have too much propaganda, and there is a distinct danger lest excessive championship of a country which has already made good in the eyes of the world may result in injuring the cause which it is intended to promote. No one disputes the fact that before the war Britons failed to realize how closely their Imperial interests were linked up with Serbia and the Balkans generally. But the same Britons were equally oblivious to even more vital interests much nearer home. They know it now, and they know something of what Serbia stands for. No doubt they have more to learn; but they know just enough to be able to criticize or, at least, to check the statements of their teachers. Of one thing they have every right to be suspicious, and that is of any non-Balkan would-be teacher who supports the doctrine that there must needs be for all time antagonism in the Balkans. Of course, Serbians and Bulgarians hate one another—very naturally; but the British public will do well to suspect anyone of their own nationality who is found nowadays preaching the doctrine of Balkan enmity and encouraging the peoples to go on hating one another. It might almost be thought that these propagandists know nothing of their own history and have never heard of mortal enmity between Scotsmen and Englishmen. They render no service to the people whose cause they champion by adding fuel to Balkan fires, but they stultify their claims to be considered the friends of Serbia.

To anyone who knows the Balkan peoples and approaches his subject without prejudice, it is a matter of keen regret to see the multiplication of partisan literature, all as provocative as the village politician in his own café. The future of the Balkans depends on the ability of the component parts to hold together, and any English writer ought to hesitate before he pens a single word that is not calculated to promote that end, or that does not have that end in the background. A book that falls short of this standard may be readable, but it is likely to be unequal, if not unreliable, as a serious contribution to history.

So much for the subject of Balkan propaganda, whether Bulgarian or Serbian. If from these general reflections one turns to Mr. A. H. E. Taylor's book we are struck at once by the fact that his choice of title proclaims his propagandist intentions, and, to some extent, the text confirms them. "A Plea for Serbia" may have been a legitimate title

* "The Future of the Southern Slavs." By A. H. E. Taylor. (London: T. Fisher Unwin. Price, 12s. 6d. net.)

Digitized by Google

for a magazine article in 1897, but it rings false to-day. Nor is the average reader reassured when he is told that the article of twenty years ago was "disfigured by the anti-Russian prejudice common at the time which, with fuller knowledge, I abjured soon after." The natural instinct is to see whether the author has abjured *all* bias, and when it is found that most obviously he has not the discovery may prejudice his reputation as an authority on the subject with which he deals. He begins his book with a collection of unpleasant things said by British writers about Serbia at various dates, and one is tempted to ask *Cui bono?* No doubt these things were said, and perhaps they were very stupid things to say. But there were some remarkably unpleasant people in Serbia at the time, and it is by no means certain that the saying of harsh things about them was not beneficial in the long run. At the worst, it only proves that there were propagandists in those days, who, we may feel confident, have now very solemnly "abjured" their anti-Serbian prejudice.

To anyone who has never been a propagandist, and, consequently, has no very violent denunciations to withdraw, it is obvious that a people or Government who could acquiesce, say, in a trial which led to the conviction on absolutely no evidence of M. Pasitch and others to various terms of penal servitude, were far from being "a credit to civilization." To-day the world knows what the Serbians have since achieved, but it is a wise nation which can look back thoughtfully on the past and take note of errors that have to be avoided in the future.

For his anti-Russian prejudice of twenty years ago Mr. Taylor would seem now to have substituted an anti-Italian prejudice. On page 161 he gives a summary of the Adriatic agreement between Italy and the Triple Entente, concluded on April 27, 1915. As the official text of the Treaty has not been published, there is no means of knowing whether this version is accurate in all its details or not. If it should be, many will agree with Mr. Taylor that the agreement entails a grave injustice to Serbia, and they will sympathise with any Serbian who kicks against the pricks. The part to be played by an English publicist, however, in a work claiming historical value, ought surely to be to make a revision of the Treaty easier by doing all that is possible to improve the relations between Italians and Serbians, rather than to exacerbate both parties. If the terms of the Treaty are as stated, they should be modified, and it may be expected that the Serbian Prime Minister will have done more towards securing better terms by maintaining friendly relations with the Italian Government than by adopting an intransigent attitude.

If the destinies of the world were always settled by newspaper articles, there would be much to be said for all the extracts with which this book is embellished, and for our author's insistence upon Bulgarian hostility to the Allies. What would one expect but to find that "the Bulgarian papers are full of abuse not only of Russia but of the other two Powers of the Triple Entente as well," and that "they are equally insistent on the unanimity of Bulgarian feeling"? How could they write otherwise? But the point to be borne in mind is that sooner or later, for the peace of Europe, Serbia and Bulgaria must live in amity. This consummation may seem impossible to-day. It remains, however, the goal which all those who are sincerely attached to the Balkans ought to have before them; and, having it before them, they ought to avoid anything that may help to keep the peoples apart after the war. To cite Bulgarian outrages is really no argument, for the reason that the Bulgarians would retort by asking what became of the Bulgarian population in certain districts in Serbian military occupation after the second Balkan War. The subject, in any case, is a thorny one for a foreigner to handle, for battle, murder, and sudden death have hitherto had a different value in the Near East from that accorded to them in English armchairs.

But although Mr. Taylor is a propagandist and makes no secret of his bias, it must not be overlooked that his main object is to give an historical sketch of Serbia and of the Jugoslav people. In this connection he has compiled useful data, and his book will certainly contribute to a better understanding of the advantages that are likely to accrue to Europe from a prosperous and peaceful Jugoslav State.

A RUSSIAN ANTHOLOGY.*

There is an Italian proverb which brands translators as "traitors," implying that people who attempt to render foreign idioms in their mother-tongue are more anxious to write it correctly than to preserve the spirit of the original. This judgment, harsh though it be, is not without justification. For a nation's literature, and especially its poems, are the outpourings of a collective soul. Now, the doctrine of metempsychosis has never taken root in Europe; no Westerner believes that souls can be transferred at will from one earthly tabernacle to another. Hence a translator has to choose between the lilt, the atmosphere, the colour, the sound of two languages; and he naturally gives preference to his own. Mme. Jarentzov has taken a new departure in boldly asserting that no one save a Russian is capable of clothing his country's poetry in an English garb. Her erudite Introduction, extending over thirty-nine pages, demonstrates the enormous difficulty of the task. While British poets are eternally hampered by the paucity of rhymes in their vernacular, their Russian fellow-bards have an immense range of assonant words to play with. For example, there are eighteen Russian expressions rhyming with *dyaivetsa*, "maiden," and fourteen with *liubet*, "to love." Nor is this all. Most nouns, pronouns, and adjectives have from six to eight declension-endings, and many verbs have twenty terminations, all of which command a similar set of rhymes, and each variety yet another set. What would not our Shelley have accomplished with such a literary tool as Russian—Shelley, who had to drag in a "pale portress" in order to find a jingle for "fortress"? Opinions will differ as to the success of Mme. Jarentzov's daring experiment; but most British readers will admit that her renderings of Pushkin's "Bronze Horseman," and of Lermontov's "The Demon" are not unworthy of their splendid originals. Her version of Pushkin's prophetic "Ode to Liberty" is, perhaps, a fair sample of Mme. Jarentzov's work. It ends:—

"Hark to the Truth, ye Tsars and Kings!
Neither rewards nor prosecutions,
Nor prisons' gloom nor altars' wings
Can shield you safe from revolutions.

Come, first abase with bended knees
Your heads 'neath Law's protective entry—
And at your thrones shall stand as sentry
The nations' liberty and peace!"

This anthology proves a power of assimilation which argues well for Russia's future. Lermontov's "Bronze Horseman" owes much to "Paradise Lost," and Krylov's "Two Dogs" was evidently suggested by poor Burns's delightful lyric which bears the same title. This characteristic is, perhaps, explained by heredity. Jukovski had a Turkish mother, Pushkin a negro great-grandfather; Lermontov was descended from a Scottish immigrant named Learmouth; and mixed ancestry is revealed by all the fine portraits which add to the charm of a remarkable book.

F. H. S.

BOOK NOTES.

Hachette et Cie are the publishers of a pamphlet in defence of the French treatment of German prisoners in Morocco, entitled "Les Prisonniers Allemands au Maroc," the price of which is 2 francs.

Messrs. Allenson have just published "With the Anzacs in Cairo," by the Rev. Guy Thornton, C.F.

Mr. Humphrey Milford has issued "Muhammedan Law of Marriage and Divorce," by Ahmed Shukri, at the price of 4s. 6d. net.

Among Messrs. Kegan, Paul, Trench and Co.'s latest publications is "Roumania's Cause and Ideals," by Mr. Leonard A. Magnus. The work gives the history of Roumania, Transylvania, and Bessarabia, with an account of the negotiations between Austria and Roumania preceding the war.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. October.	1917. September.		1335. Dulheggia.	5678. Tishri.
5	22	Friday	18	19
6	23	Saturday.....	19	20
7	24	Sunday	20	21
8	25	Monday	21	22
9	26	Tuesday	22	23
10	27	Wednesday	23	24
11	28	Thursday	24	25

Princess Ghica arrived in town on September 28 from Jassy.

Colonel Vaescu, of the Roumanian Army, has left London for Paris.

M. Comsa, a Roumanian member of Parliament, left town on September 28 for Paris.

M. Stavridis, Greek Consul-General in London, has been appointed Counsellor of Legation in London.

Captain Dr. David Albala, of the Serbian Army, has left London for Washington on a medical mission.

General Demostene, of the Roumanian Army Medical Corps, has arrived in London from Petrograd on his way to Paris.

Mohamed Shukri Pasha, Under Secretary for Justice, has returned to Cairo and resumed his duties at the Ministry of Justice.

Monday next, October 8, is the anniversary of the birthday of King Nicholas of Montenegro, who was born in 1841 at Niégoch.

Thursday next, October 11, is the birthday anniversary of the youngest son of King Nicholas, Prince Peter, who was born at Cettinje in 1889.

According to the *Ahram*, Colonel Harvey Pasha, Commandant of the Cairo City Police, will officially leave his post during the first week in November.

We regret to learn that Captain Sterling, R.A.M.C., late of the Church Missionary Society in Gaza, is in a London nursing home very seriously ill.

The appointment is gazetted of Captain Lord C. A. Carnegie, Scots Guards, as Aide-de-Camp on the personal staff of the Viceroy of India, vice Second Lieutenant E. B. Baring, Hampshire Regiment, resigned.

Mr. Richard Whately, of Bath, formerly Chief Engineer of the Bombay, Baroda, and Central India Railway Company, left estate of the gross value of £21,949.

Next Wednesday, October 10, at 5.30, Dr. Ronald Burrows, Principal of King's College, London, will deliver a lecture at the college on "Greece as an Ally." The Greek Minister will preside.

On the occasion of the Name Day of the King of Greece, Ali Zulficar Pasha, Governor of Cairo, and Colonel G. Harvey Pasha, Commandant of the Cairo city police, paid a visit to the Greek Consul-General.

A divisional commander in the Punjab has sent from Simla £100 to the Church Army Hut Fund, to defray for twenty weeks the upkeep of a Church Army recreation hut in France, where his own son, a gunner, is on active service.

It is reported that the Nile flood has now exceeded last year's exceptional levels, though it is not yet dangerous. In the Sudan the flood has beaten all records, and at Khartoum energetic measures have been taken to keep out the water.

M. Victor Antonescu, the ex-Finance Minister of Roumania, has been appointed Roumanian Minister in Paris, M. Alexandre Lahovary, the present Roumanian Minister in the French capital, having been placed in charge of the Roumanian Legation in Rome.

The engagement is announced of Mr. Charles Robert Plant Cooper, I.C.S., Burma, son of the late Mr. J. C. Cooper, of Cheltenham, and Dorothy Evelyn, younger daughter of the late Captain R. J. Pollen, I.M.S., and of Mrs. Pollen, of Bath and Maymyo, Burma. The marriage will take place in Maymyo in October.

Senor Mitjana, the present First Secretary at the Spanish Legation in Constantinople, has been appointed Minister to Colombia.

It is reported that the leaders of the Serbian National Party in Bosnia and Herzegovina, G. Yeftanovitch and V. Shola, have been released from prison.

The marriage was celebrated recently at the Garrison Church, Kasr El Nil, Cairo, of the Rev. A. J. White, C.F., and Grace Winifred, daughter of Mr. H. S. Green, of Dulwich.

In a speech at the Congress of the Committee of Union and Progress, Talaat Pasha is reported to have defended the Turkish treatment of the Armenians, and to have said that the Ottoman Government had sent several commissions of investigation, and that those who had been guilty of misdeeds had been condemned to the severest punishment, even to death.

The Greek Legation has been instructed by the Greek Government to notify to all concerned that no sale or transfer of a Greek merchant ship of whatever description or size is permitted either to a Greek or a foreign subject without the prior express permission and sanction of the Greek Government, and that any contravention of this decision would entail the severest material and personal penalties.

The second session of the School of Oriental Studies, Finsbury Circus, was opened on October 1. Last session there were 150 students, and it is expected that the number this session will be at least as high. Among the students are candidates for the Indian Civil Service, Government officials who are to take up appointments in Eastern possessions, missionaries, and employees of commercial houses having dealings with the East.

According to Reuter's Amsterdam correspondent, a semi-official Sofia telegram, referring to unconfirmed Washington reports alleging that the Bulgarian Minister at Washington, M. Panaretoff, had declared "that Bulgaria desired peace, and that the termination of the war was an imperative necessity for the Central Powers," states that the Bulgarian Minister at Washington has been instructed to declare that Bulgaria certainly desires peace, but only in union with her Allies, as indicated in her reply to the Pope.

The Consul-General for Montenegro is officially informed that the Russian Government, on behalf of the Montenegrin Government, have recently forwarded to the First Commissioner of his Majesty's Works, as a present for the Armoury of the Tower of London, a sword of Montenegrin pattern. The Consul-General has been asked to convey to the Montenegrin Government the cordial thanks of his Majesty's Government for this gift, which it is proposed to place among the collection of swords presented by the Allied Nations now in course of formation at the Tower.

Reuter's Amsterdam correspondent states that the *Vossische Zeitung* publishes an interview granted to its Sofia correspondent by Dr. Radoslavoff, the Bulgarian Premier, with reference to the meeting between King Ferdinand and the German Emperor. Dr. Radoslavoff remarked: "This meeting, and another important event which is imminent, but which for the present must remain a secret, will once more give the Entente forcible and solid proof of the unity between our Governments and reigning houses, already shown by the common spirit of our replies to the Pope."

An application has been made to the Chancellor of the Diocese of London (Sir A. B. Kempe) for a faculty to authorise the carrying out of certain work in the church of Holy Trinity, Brompton, as a memorial to the late Sir David William Keith Barr, K.C.S.I., a member of the Council of India. The proposed memorial includes the erection of new choir stalls and the affixing of a tablet on the wall of the south aisle of the church. Included in the inscription on the tablet is the following:—"Single-minded, courageous, gentle, just, he was the example of what a British political officer should be, teaching the Indian Princes and peoples the inspiring lesson that East and West may be one."

APPOINTMENTS, PROMOTIONS, ETC.

Lieut. C. A. M. van Millingen, the Rifle Brigade, elder son of the late Professor van Millingen, has been promoted to the rank of Captain.

The Sultan has been pleased to confer the First Class Order of the Nile on Mr. E. Bonham Carter, C.M.G., Legal Secretary, Sudan Government, on the occasion of his retirement from the Sudan Civil Service.

The Sultan has conferred the Second Class Order of the Nile on Henri Naus Bey, general manager of the Sucreries and Raffineries d'Egypte, in recognition of the eminent services rendered by him to Egypt, both in connection with the cultivation of the sugar cane and the supply of sugar to Egypt and the Sudan in his capacity as general manager of the sugar company as well as in other directions. He is a member of several commissions and is taking an active part in the economic development of Egypt. Naus Bey has recently returned to Egypt from the Sudan, where he was on a visit in connection with the sugar supply.

OBITUARY.

The death occurred in London on September 24 of Colonel Graham Claude Herbert, late Royal Fusiliers, second son of the late Hon. Robert Charles and Mrs. Herbert, of Orleton, Wellington, Shropshire. Colonel Herbert served in the Afghan War of 1880, taking part in the defence of Kandahar and the sortie on Deh Khoja. He retired in 1910.

Second Lieutenant C. W. S. Littlewood, M.C., R.E., who was killed in action on July 10, was the only son of Mr. and Mrs. W. Littlewood, of Cairo. He was born in 1897, and was educated at Stonyhurst College and Downside School, passing direct to the Royal Military College, Woolwich, in 1915. He was gazetted second lieutenant in February, 1916, and in October, 1916, he went to the front and saw a good deal of fighting. He was awarded the Military Cross in April.

The death occurred on August 25, at Alexandria, of Captain Miller, Inspector, Sudan Civil Service. At the funeral, which took place the following day, the High Commissioner was represented by Captain Alexander, A.D.C., and the Sirdar by Lieut.-Colonel Carroll, D.S.O., P.M.O., Egyptian Army, while others present were Lieut.-Colonel L. K. Smith, D.S.O., O.C., Khartoum District; Major Worthington Wilmer, D.S.O., Major Pattisson, Arkache Bey, and Mr. R. K. Winter (representing the Civil Secretary, Sudan Government).

Major (Temporary Lieutenant-Colonel) Norman McDonald Teacher, D.S.O., Royal Scots Fusiliers, who was killed in action on September 26, was the younger son of the late Mr. Donald Teacher and Mrs. Stiles. He was born in 1878, and was gazetted to the Royal Scots Fusiliers in 1898. Colonel Teacher was employed with the Egyptian Army from 1904 to 1913, and was D.A.A.G. from 1908 to 1909. For services in Egypt he received the Orders of the Osmanieh (4th Class) and the Medjidieh (3rd Class), and in the present war he had been awarded the D.S.O. Colonel Teacher served in the South African War, taking part in the actions and operations that preceded the Relief of Ladysmith, and afterwards in many of the other important actions, and received for his services the Queen's and the King's medals with seven clasps.

The funeral of M. Frano Supilo at the Golders Green Crematorium on October 1 was attended by many personal friends and sympathisers with the Southern Slav cause. The Serbian Minister and Mme. Jovanovitch were present at the religious service in the chapel, and also Colonel M. Nikolaievitch (Military Attaché) and other members of the staff of the Legation. Others present were Sir Edward Boyle, Lady Boyle, Dr. Seton-Watson, Mr. Wickham Steed, Mr. and Mrs. Mitrovitch, Professor Popovitch, Professor Gjoigjeretch and Dr. Sultotitch. The Southern Slav Committee was represented by Dr. Micic, Dr. Gregorin, Dr. Vasilyevitch, Dr. Manditch, and Dr. Trinestitch. The coffin and hearse were draped with the British, Serbian, Croatian, and Slovene colours, and there were wreaths from the Serbian Legation, the Southern Slav Committee, and the Southern Slav National Defence in South America.

CHRISTMAS PARCELS FOR THE TROOPS

The Postmaster-General announces that letters and parcels intended for delivery to the troops in Egypt, Salonika, etc., by Christmas should be posted in time to reach London as long as possible in advance of the dates given below:—

	Parcels.		Letters.
Mesopotamian Expeditionary Force	Oct. 18	....	Oct. 30
East African Expeditionary Force.....	Oct. 18	....	Oct. 30
Egyptian Expeditionary Force.....	Nov. 12	....	Nov. 27
Salonika Force	Nov. 12	....	Nov. 27

Special attention is drawn to the following regulations:—

(1) Letters and parcels must be fully addressed.

(2) Parcels must be very strongly packed.

(3) Fruit, perishable articles, bottles, pudding basins and the like are prohibited.

(4) The name and address of the sender must be written on the outside of parcels; parcels which do not comply with this rule will be refused.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

ANAGNOSTOPOULO.—On September 22, at Buckley, Alexandria, Egypt, the wife of John Anagnostopoulo—a daughter.

MACMILLAN.—On September 27, at Rutlam, Central India, the wife of Hugh Macmillan—a daughter.

PALMER.—On September 29, at Ratnagiri, Bombay, the wife of Charles Edgar Palmer, I.C.S.—a daughter.

ROLL OF HONOUR.

GIBBS.—Killed in action, on September 20, 1917, Major Stanley Gordon Gibbs, A.S.C., D.A.Q.M.G., Anzac Corps, the greatly-beloved younger son of Mr. and Mrs. H. F. Gibbs, 17, Abingdon Court, Kensington, W. Aged 31. Australian and Egyptian papers, please copy.

GRIFFITH.—On September 20 at Colaba Hospital, Bombay, from hemorrhage of the brain contracted while on service in Mesopotamia, George Herbert, Colonel Royal Engineers, second son of the late Colonel J. H. Griffith, Royal Engineers, and husband of Alice Mabel Griffith, Highfield, Lymington, Hants, aged 47.

TEACHER.—Killed in action on September 26, Major (Temp. Lt.-Col.) Norman M. Teacher, D.S.O., Royal Scots Fusiliers, younger son of the late Donald Teacher and of Mrs. Stiles, and husband of Dorothy Teacher.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.

FRIDAY, OCTOBER 5, 1917.

MONTENEGRO AND SERBIA.

Montenegro's misfortunes have given rise to somewhat violent recriminations within a section of the Serb brotherhood, and, unless care is exercised, a minor controversy may have results out of all proportion to its real significance. For a long time the quarrel was confined, as far as the public Press was concerned, to Swiss organs; but its recent transference to the pages of an English publication suggests that an attempt is to be made to prejudice, if possible, the solidarity of the Grand Alliance. It is one thing for Montenegrins and Serbians to strive among themselves; it is another to force their quarrel upon the notice of the Allied public in such a way that one party or the other stands to be prejudiced, even if the nations themselves are not held up to contumely. Any trouble of this nature is to be regretted, and there can be no justification for magnifying an incident occurring in, so to speak, a very small corner of the Alliance into a matter calling for the official notice of all the Allied countries. For it is obvious that for the time being neither the Montenegrin nor the Serbian nation can associate itself as a whole with the controversy. If, when the peoples come together again in freedom in their own country, they refuse to recognise that any ground exists for a quarrel amongst themselves, the attempt to make an international affair of personal bickerings will be seen to be particularly reprehensible. We do not claim to be able to lay bare the true record of what has happened in Montenegro since the outbreak of the war; we only know what has been said on one side and the denials that have followed on the other. But when these are set forth in their entirety, it is not difficult to see that nothing is to be gained by an attempt to extend the controversy outside the ranks of the Montenegrins and Serbians.

The attack, which is ostensibly directed against King Nicholas on account of the part which he and his family are alleged to have played in the war, is now being directed openly by M. Radovitch, who accepted the post of Prime Minister to King Nicholas, when official Montenegro became domiciled in France. For the moment then we may leave out of consideration the question of the extent to which he may be serving the ends of outside propagandists, the latter, if they exist, having clearly taken cover behind the person of an ex-Prime Minister of Montenegro. M. Radovitch, we understand, repeats some of the charges brought against King Nicholas or his sons in the *Gazette de Lausanne*, but does not mention the denials that subsequently appeared in the same paper. The burden of the indictment is that one or more of the King's sons contrived to maintain relations with Austria-Hungary while Montenegro was at war with her, that there have been negotiations in Switzerland for a separate peace, and that Prince Mirko was purposely left behind in Montenegro to reinsure the country and the dynasty in the event of the Central Powers winning the war. As already indicated, some of the charges have been met, detailed explanations being given of the circumstances on which they were based. It is beside the point here to inquire whether the refutations satisfied the critics of the Montenegrin Royal Family; but it is obvious that there ought to be no reference in an English publication to the charges unless the answers to them are also recorded. M. Radovitch, however, has now shifted his ground from the criticism of past shortcomings to a consideration of after-the-war problems. On his own showing, he took advantage of his appointment as Prime Minister to urge King Nicholas to eliminate himself, in order to allow Montenegro to become incorporated with Serbia. It was a part of M. Radovitch's scheme that King Nicholas and King Peter of Serbia should both abdicate in favour of Prince Alexander, and that the succession to the throne of the united state should be assigned after the latter to Prince Danilo of Montenegro, who incidentally is the prince charged by M. Radovitch with having entered into negotiations with the Central Powers for a separate peace! Even the fact that Prince Danilo's wife is German does not seem to affect in M. Radovitch's eyes his candidature for the throne of a Greater Serbia. Now it may have been a perfectly proper and statesmanlike course for the Montenegrin Prime Minister to make such a recommendation to his sovereign, and if the latter refused to act upon his advice, it was open to him to resign, as in fact he did. Whether it was exactly polite on M. Radovitch's part at once to form a society having as its object the forcing of King Nicholas to adopt the course recommended him is another matter. The fact remains that, unless those who may be behind any movement that the controversy represents can show a more important issue, the precise quarrel of which the Allies are being urged to take note is one between the King and his ex-Prime Minister. King Nicholas, it is fair to add, does not seem to have "hit it off" with M. Radovitch's successor, and evidently a band of Montenegrin "intellectuals" is resolved upon sinking their country's separate existence in that of Serbia.

Here, plainly, we have a purely Montenegrin question. If King Nicholas sets any store upon being regarded as a constitutional monarch, his first instinct must be that such a question concerns the nation as a whole, and ought not to be decided by a mere handful of people who may be grouped round his Court. Quite a number of well-wishers of Montenegro might possibly be prepared to argue in favour of union with Serbia; few, if any, would think of urging that the step must be taken now when, for all intents and purposes, neither Montenegro nor Serbia exists, and when the act of union could not be given practical effect. But we are not concerned with the pros and cons of the course which is the subject at issue between King Nicholas and his ex-Prime Minister. The Allies are concerned to see that no bone of contention is thrown among them; that no quarrel between Montenegrins should be used, for instance, to encourage Serbia to contemplate action which, while it might seem to simplify the federation of the Southern Slavs, would most certainly prejudice her in the eyes of her Allies, and, therefore, jeopardise the future of the Southern Slav State. From every point of view it can be shown to be the duty of Allied publicists to refrain from lending themselves to partisan quarrels in the Balkans. The task of learning the whole truth is often impossible of achievement. There may be the strongest evidence for accusing Prince Peter of having the Bulgarian National Anthem played by a Montenegrin regimental band, until he points out that Bulgaria was not then at war with the Allies; it may seem a terrible reproof for King Nicholas that the Tsar of Russia should confer the Order of the White Eagle on a Prime Minister whom he has dismissed, until, indeed, it is realized that the decision in regard to the decoration was taken while M. Radovitch still basked in the sunshine of the King's favour as a loyal and patriotic Prime Minister. It matters little what the precise nature of the charges may be; outsiders who are asked to hold King Nicholas guilty of charges brought mainly, if not entirely, against his sons, will inevitably be given *ex parte* statements. In the present instance King Nicholas does not appear to have taken much notice of his detractors. His defence, if he considers one called for, may be for the ears of the Allied Governments alone. Few can have followed the fortunes of Montenegro and its ruling House without realizing the difficulties of the King's position. The future of Montenegro will probably be determined in her own interests and in those of the Southern Slavs and the Allies without the help of Press attacks.

PERSIA AND THE RUSSIAN REVOLUTION.

By MIRZA FIROOZ KHAN.

TABRIZ, August 10.

First Effects.

The echo of the Russian revolution has reached Persia, and its first effect has been to loosen the hands, the tongues and the pens of the people of that country. Persian mashroota had apparently been killed by the former Russian régime, but in reality it was slumbering. Now that that old régime is no more, the eleven-year-old freedom of old Iran has arisen from its slumber, shaken itself, looked around, and thought it is time to celebrate the anniversary of its birth for the first time in its life. And it was celebrated with all the glory, pomp and ceremony that liberty can bring to a nation. It was celebrated not only by the Persians themselves, but also by others—by Armenians and Jews and by the Russians, who made fiery speeches. A Russian military officer, for instance, declared in his speech, " You Persians are more cultured and more intelligent than we are; for you fought and got your liberty and Constitution eleven years ago, while we Russians are only just getting ours. We are—as a nation—eleven years behind you. Long live the Persian Constitution, long live the Persian people." Another Russian officer said, " You Persians have been for eleven long years under the fear and pressure of the old Russian régime, and have not dared to celebrate your freedom every year; but now you need no longer fear us, for the old régime and with it that fear and pressure have gone down to Tartarus; you need not fear us any longer. We—officers and people—also are a liberty-loving people, for we also have been crushed under the heel of the old serpent Tsar as much as you have! Hereafter we are not only neighbours, but brothers in freedom, and we are glad to be permitted to join you in celebrating the eleventh birthday of the old Persian Constitution and freedom. Long live Persia, long live Persian freedom! " Both speeches were followed by long and hearty cheers. Knowing the old Russian régime, and knowing and remembering how Persia was being pressed under its heel up to only a few days ago, one can hardly persuade oneself to believe the sincerity of these speeches, but then we have no palpable reason—at present—to suspect insincerity, and we accept their good words at their face value.

The first result of the removal of northern pressure was a change in the Cabinet. Sipahdar's Ministry had to go and with it its promises—control over Persian Finance by Russia and England—were " scrapped." The new Cabinet began a very bold policy, demanding that the Russian Army should leave Persian territory, on the ground that the Russians were fighting for the freedom of other smaller nations, and had no intention of appropriating other people's territory. This was, or seemed to be, a very good and patriotic step at first, but the Cabinet soon found out that they had acted foolishly. Soon afterwards America declared war against Germany, and this fact struck the Persians dumb! For up to that date German agents had persuaded the Persians—both people and Cabinet—that America would soon join Germany and declare war against England and Japan, and then, as the Russians would be forced to double their forces on the German front, they would withdraw their troops from Persia, and the Persian army would have a glorious chance to avenge itself upon the retreating Russians. Germans knew, of course, that America would not fight England, but Persians, blinded by the intensity of their hatred of Russia, were deceived by them. The Cabinet then regretted both its refusal to recognise the validity of Sipahdar's promises and also their haughty demand that Russians should clear out of Persian territory. In regard to the former, it was realised that the machinery of government would not move without the oil of British finance, that even the Ministers themselves would have to work without salary. On the subject of the Russian troops reflection showed that, if they left Persia, their places would soon be filled by Turkish and Kurdish hordes, as happened when the Russians evacuated Azerbaijan in December, 1914, and the Kurds and Turks overran Tabriz.

The Reaction Against Russia.

During the first days of liberty in Russia, the new Government informed their diplomatic and consular officers in Persia by a circular notice that for the future they were not to interfere or meddle in Persia's purely domestic affairs. The Persian inhabitants of the province of Azerbaijan were duly informed, and their joy was extreme. They were satisfied that now they had real liberty, but unfortunately they mistook liberty for licence. They began to assert themselves everywhere and in everything, whether they were right or wrong, without considering whether it was lawful or not. They had liberty and power, and were going to exercise it to the full. The Russian rouble went down in price, and even in some places it was not accepted. And Persians came forward daily with a new demand. They refused to sell bread, hay or wheat to Russians, or to the Armenian and Jelo Syrians, who had taken refuge in the western part of this province (Urumiah, Salmast, Khoi) from the Turks and Kurds. They demanded that these " foreigners," these refugees, should leave Persia and go to their own lands, of course, to be massacred, as they knew well enough. Some murders of these refugees took place in Urumiah. This had to be stopped, and it was stopped. Americans in Urumiah protested against these outrages, and the Russian Consul was forced to do something, for these murders of Christians by Persians reacted on the prestige and dignity of Russians, who had been the " protectors " of the Christians in Persia from the time of the last Russo-Persian War (1827). A notice was posted by the Russian Consul in Urumiah in every part of the city in four languages—Russian, Persian, Armenian and Syrian. It ran as follows:—

" To the Persian people of Urumiah.

" The new Russian Government gave notice some time ago that henceforth there was to be no interference in Persian affairs. That notice seems to have been misinterpreted or misunderstood as conferring upon Persians liberty to commit murders and atrocities upon Christians. Russia, however, has not declared that she will not interfere in Christian affairs. The murder of fifteen Christians without provocation cannot be tolerated. Persians seem to have acquired boldness and ' face ' from our first notice. I declare that hereafter any Persian, of whatever position or rank, who dares to insult or murder a Christian, or to cause even a single nose to bleed, will be punished by the Russians in their own Persian manner."

This notice put an immediate stop to the malpractices, and quiet reigned everywhere once more, even in the remotest villages. Bread, wheat and hay, which had been unprocurable, became at once plentiful in the bazaar, and life assumed its peaceful course once more.

While these things were happening in Urumiah a different state of affairs obtained in Khoi and Dilman. There the people, finding that they could not vent their feelings against the Russians by forcible means, resorted to other methods. The wealthy closed their shops, landowners kept their grain stored away and refused to bring it to the bazaars for sale, while the women were instructed to pour into the bazaars and make demonstrations against the landowners, the pretext being the scarcity of bread and the non-existence of grain. The ruse did not deceive the Russian General who had succeeded General Chernazooboff. He at once informed Petrograd of what was happening in Dilman and of the Persian propensity for mischief, and received orders to

Digitized by Google

take whatever steps might be necessary to restore order, to maintain public security and to safeguard the prestige of the Russian army. The General—a Pole, by the way—that same evening called a meeting of the chief citizens, at which the Governor was present, as well as a representative of the Armenian community and His Beatitude Beniamin Mar-Shimon, the Patriarch of Jelo-Syrians from Jolamerik. The General's speech was to the following effect:—"Gentlemen,—It is some days now since the bazaar has been closed; there is no bread, no grain, and women are making demonstrations; you refuse to sell grain to Christian refugees from Turkey, and have hidden your wheat. I have informed Petrograd, and the orders I have received are to bombard Dilman, if you do not behave like men and neighbours, and if you continue to close your shops and do not open the doors of your grain stores and sell them at bazaar prices to the starving people. Accordingly, I put the following demands to you:—1. You must open your bazaar and attend to business. 2. You must open your stores and sell grain to the Armenian and Jelo-Syrian refugees. 3. You must stop your demonstrations. 4. You must stop your threats to massacre or expel the Christian refugees from Turkey. If you agree to these demands, we will remain friends; if not, I have orders from Petrograd to bombard your town and to raze it to the ground. We have declared that we would not interfere in Persian home affairs, but that does not mean that we will permit you to starve us to death or to starve us out of Persia. You have misunderstood our meaning. In future you must never dare to insult in word or deed any Russian or any Christian, and you must sell in the bazaars to a Christian whatever is for sale to a Persian. If you agree to these suggestions all will be well; if not, to-morrow morning at eight o'clock I will give my orders to bombard the town. If the shops are not open by seven o'clock, I shall start my work at eight o'clock punctually."

Defeating the Boycott.

The Persians present in the meeting apologised profusely for what had taken place, and gave various reasons for the demonstrations and the closing of the bazaar.

The next day the bazaar was opened, and the women had disappeared, but bread and wheat were not forthcoming. The Russian General, however, had decided not to do his work by halves. He at once ordered parties of soldiers under a minor officer to search every house and building for grain. Eight large stores were found, each containing 20 kharvars of grain (kharvar = 1,200 English pounds). The Persian Governor, who had declared positively that there was no grain in the city, was dismissed, and the store-owners were forced to open their stores and sell the grain to the people at the price that the bazaar fixed, which was at from 18-22 krans a Russian pood; at the same time the Armenian Relief Committee from Tiflis bought 20,000 poods of grain in Maragha, and had it transported into Dilman across Lake Urumiah in Russian boats. This grain the Committee sold at cost price, which was just one-half of the Dilman price, to the Armenian and Syrian refugees. By this means the price of grain was reduced to 9-10 krans a pood, but as soon as this quantity was disposed of the Persians again raised the price of their grain to 16-18 krans. The Armenian Committee again brought over another 20,000 poods, and this was sufficient to make the refugees independent of the local supply. The result was that the price of grain went down, because there were no more buyers, and the Persians regretted that they had not sold theirs when it could command a good price.

A more sinister episode than the boycott was brought about by the rapid fall of the exchange value of the rouble, which before the war was worth from 105 to 110 shahis, a year ago was worth 54 shahis, four months ago had gradually declined to 34, and suddenly dropped to 16 shahis. A quarrel arose in the Urumiah bazaar over the refusal of a shop-owner to accept a 100-rouble note from a Russian soldier. A native policeman sought to smooth over the difficulty, but both he and the shopman were shot by the soldier. What followed is not clear, but later in the day the bazaar was fired and enormous damage done to the richest quarter of Urumiah.

THE MARTYRDOM OF SERBIA.

Serbian Prisoners in Austria.

A Serbian officer, Colonel Nikola Tomassovitch, who a short time ago was exchanged as an invalid from the internment camp at Mutthausen, gave the following report to the Serbian Minister in Berne concerning the Serbian prisoners of war in Austria-Hungary:—

". . . The feeding of our prisoners is extremely bad, especially in the case of our soldiers, who are enduring true martyrdom in the prisoner camps. They die systematically of hunger because the quantity of food they have is not only insufficient, but harmful. In the morning they receive some kind of hot water mixed with coffee or tea—quite unfit to drink; at midday and in the evening they have a soup made of the peelings of potatoes and other vegetables, mixed with roots and leaves, so that it is impossible to tell exactly what it is composed of. There is meat only once a week—a mere mouthful. In the winter we watched our soldiers on one occasion passing our barracks on their way to the next camp. They met a load of turnips guarded by sentinels, but they threw themselves on the cart, seized the turnips and began to eat them without stopping to clean them, and paid no attention to the blows given them by the guards. We often saw them searching the refuse heap for bones or scraps of food. They just rubbed the bones a little before beginning to gnaw them. Sometimes we would see them pulling up grass for food.

"In general the food of the officers is better than that of the men, and especially recently, when some food was sent from abroad by charitable committees. The men are much more numerous, and only a few of them receive any of this food. It should also be remembered that there are in the camps, besides the prisoners of war, many interned civilians, women and children. The parcels which arrive are distributed amongst those people, and everybody gets only a very little, because those who send the parcels are hardly aware that there are civilians as well as soldiers in the camps, and what a great number there are to be helped. The greatest relief, especially for the soldiers, was the bread which was sent by the Red Cross in Berne, two or three times a month. If it is in any way possible, these consignments should be sent regularly, as it is the only help of this kind sent to the prisoner camps.

"The nursing of the men is done in the camps themselves; but, according to the statements of the doctors, any nursing is useless, the food being so bad and so scarce that the soldiers are slowly dying of starvation. It is not only the sick, but also the unwounded, who are so exhausted by hunger and suffer so much in the winter from insufficient warmth that the morning finds them dead or frozen. So far there are in Austria-Hungary at least 50,000 graves of Serbian soldiers.

"There are no sanitary supplies; for instance, medicated wool is lacking, and instead of it some kind of soft paper is used."

An Enemy Admission.

The Serbian Press Bureau in London issues the following statement:—

"The terrible sufferings of the Serbian people are now beginning to be realised even by the Press of Germany. The following passage is taken from the *Vorwaerts* of September 17, the leading organ of the German Socialists:

"'No single people have suffered in this war anything like so terribly as the Serbs. In the giant graveyards between the Danube and the lakes of Ochrida and Doiran lie buried the youthful strength and manhood of Serbia; her women and children, too, have perished by tens of thousands in the bitterness of the Albanian mountain winter during the retreat of 1915. Considerably more than one million Serbians have been swept away since the end of July, 1914; of every four Serbians then living, whether man, woman, or child, to-day at least one is dead. That is the same as if 17,000,000 Germans had been removed from the land of the living.'"

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2.

TANGIER TO TEHERAN.

We are encouraging one another to believe that the world will be a better and more moral place to live in as a result of the war. If it is, the change will have been brought about by the application of the homœopathic principle that like cures like. The war has hardly been a synonym for goodness in itself, and it has certainly prompted a wonderfully large number of people to produce the very worst that could possibly be in them. If, therefore, the Ethiopian is thinking of changing his skin, he would do well to start getting busy about it. The war at best, I fear, is only a surgical operation, and not an alchemist discovery for turning base metals into gold. It will not alter the familiar aspect of the leopard, but may perhaps remove his teeth and claws, which, so to speak, are the officially dangerous part of him. After all, the world suffers more from official than from unofficial acts. Society has done much to protect itself against the individual wrongdoer, but it has been hopelessly at the mercy of the Government malevolently inclined.

***

The allusion is not solely to Germany, although she has specialised in official villainy more than any other nation. But if all the secrets of all diplomacy could be laid bare there would be a wonderful record of international nastinesses, one imagines. Not all will have been centrally inspired, but they have been under an official ægis. They may not have been so aggressively immoral as the acts of Swedish diplomacy or the poisonous devices that Germany planned for Roumania's hurt. But up and down the world, from Tangier to Teheran, and still more from China to Peru, some nations have rarely lost an opportunity of doing one another an ill-turn, it may be only by giving the protection of naturalisation to the evildoers among the other's nationals. Germany is not the only nation that has made international espionage a fine art. Is all this to stop at the end of the war? Its worst features will, it is to be hoped. Of the most promising augury is the better understanding now subsisting between the United States and Japan. Viscount Ishii's speeches in America will have gone far to allay the suspicion of Japan that has hitherto existed on the American continent, and the Tokio Government will be well advised to see that its official attitude is clearly understood by all its nationals abroad. Modern Japan owes everything to the promoting of its intellectuals, who are also its rulers, and for this reason, possibly, foreigners are apt to imagine that no Japanese is ever "on his own," that every Japanese hawker or trader, for instance, who has been responsible for the Japanese penetration of India, is in some way or another on Government business as well. Viscount Ishii's speech, if it means anything, means that all such fears of Japanese activities are baseless.

***

Such reflections, I suppose, are prompted by the disclosures regarding Bolo Pasha, in the background of whose activities flits the sinister shadow of the ex-Khedive, Abbas. In many respects the latter is the most pathetic of the war's derelicts, although, goodness knows, he has forfeited all claim to pity. Constantine of Greece was by nature and instinct merely a family man, who by mistake became a king; he will revert without difficulty, and possibly without regret, to the virtually private life that was his in his earlier days as Crown Prince. Already he seems to have settled down in Switzerland to the new existence, and is pleased enough to pose with his family before the camera. The ex-Khedive, on the other hand, is more strenuously engaged as Germany's flunkey, hurrying between Constantinople and Switzerland, interviewing agents and haggling over terms, content after protracted negotiations to draw his 10 per cent. commission, which he must needs share with someone else, and to return perhaps to the Bosphorus until shortage of funds compels him to do some fresh work for his living. What is to be the frame of mind of such people at the end of the war? Will they accept the world's verdict and mend their ways, or are they to be allowed to remain nuclei of intrigue and unrest, who will always have to be kept under surveillance? *Qui vivra verra.*

***

I have been interested to read the proposal of a Professor of Meteorology at Harvard University, Mr. Alexander McAdie, who is also director of the Blue Hill Observatory, to scrap the Fahrenheit and Centigrade thermometers and to start with a new one. The Professor elaborates his scheme in the *Geographical Review* of New York. His main concern is for low temperatures, and for this reason he would start with 0° as absolute zero, the zero of no molecular motion; 1,000° would be freezing point (32° F. or 0° C.), and 1,100° (practically 80° F.) would meet the popular conception of warm. The new everyday thermometer would presumably be graded between 900° and 1,350°. Without doubt the elimination of the two readings Fahrenheit and Centrigrade would be a considerable advantage. The ordinary mortal, who is accustomed to one, has great difficulty in thinking rapidly in terms of the other. The article also reminds us that "at a height of four kilometres (13,124 ft.) and above, temperatures are below zero of the Centigrade scale, even in midsummer and even over the Equator, and at a height of six kilometres the same is true for the Fahrenheit scale."

CORSAIR.

THE PRESS ON THE NEAR EAST

The Salonika Fire.

The best description of the great Salonika conflagration that has reached this country is contained in a letter from a British officer, of which extracts were published in the *Morning Post*. After dealing with the efforts of the people to escape, he continues:—

I returned to camp about 7.45, after coming to the conclusion that nothing could stop the fire on the leeward side, that it would sweep right across the town to the eastern wall, and that the main business part of the town, south of Rue Ignatia, and the upper part of the Turkish quarter, together with the residential suburb of Kolemania, would be safe. From the camp, which is on high ground, we had a good view of the scene. It looked like some Promethean furnace; the flames licked up scores of feet into the pall of smoke which covered the scene of the fire and stretched over the dome of starlit sky as far as the eye could reach, like the smoke from the funnel of an enormous steamer. The upper part of the Turkish quarter, spread up the steep side of the hill, was lit up, and the details of its quaint little white red-roofed houses could plainly be seen. Here and there the graceful white minarets and the domes of the mosques stood out in relief against the flames, and that wonderful old, historic building, the Church of St. Demetrius, was very clear.

Then occurred the most disastrous event in the whole affair. The wind, which had hitherto been blowing from W.N.W., suddenly veered round to N. Up to then the very force of the wind had tended to keep the path of the fire narrow, the width varying, but probably never being much more than about 300 yards. With that change in the wind's direction this front was increased *to a mile*, for the distance the fire had travelled was now the measure of its breadth. Between this new front and the sea lay the most valuable part of Salonika, its principal stores, banks, shops, offices, and hotels. Nothing could save this part of the town now; the front was too broad for anything to be done.

For some time the British and other fire engines had been on the quay ready to do what was possible within their radius, limited as it was by their enforced position at the water's edge. And they did most excellent work, one British fire engine work-

EDUCATIONAL.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
THE SCHOOL RE-OPENED ON OCTOBER 1.
For particulars, apply to E. DENISON ROSS, Director.

ROYAL SCHOOL
FOR
Daughters of Officers of the Army.

Patrons:
Their MAJESTIES THE KING AND QUEEN
and HER MAJESTY QUEEN ALEXANDRA.
Chairman: LT.-COL. A. GRUBB. J.P.
Vice-Chairman: SURGEON-GEN. SIR WILLIAM TAYLOR, K.C.B.

Daughters of Officers of the Army are admitted to the above Schools according to the circumstances of their parents, at rates of £20, £45, £65, and £80 a year. Granddaughters of Officers are admitted at £45, £65, and £80 a year according to circumstances, and a limited number of daughters of civilians are admitted at £120 a year when there are vacancies. There are 15 Scholarships, open to competition, in the School, of amounts varying from £10 to £20 up to one of £50.

As half of the School consists of pupils on the £15 foundation, which includes both board and education, a deficiency of about £2,500 a year has to be met by contributions, which are earnestly solicited. Donations of £5 5s., giving one vote for life, or subscriptions of 10s. 6d., giving one vote for the year, may be sent to

F. W. T. ATTREE, COLONEL (late R.E.), Secretary.
Office: Panton House, 25, Haymarket, S.W.1.

Digitized by Google

ing for eighteen hours without a stop with the same crew and officer, pumping 500 gallons a minute. They concentrated on saving the docks and one or two important buildings adjacent thereto, and this they succeeded in doing, credit being largely due to the above-mentioned fire engine, helped by several naval pumps. These were the only mechanical pumps available, the local ones being manual. During the night the fire swept down to the sea, demolishing everything in its path except one building, which has been out of bounds for months on account of its German ownership. This, with their usual beastly but laudable foresight, was built of ferro-concrete, and had fireproof shutters. Even the glass of this store is not cracked.

Unfortunately, the destruction extended far enough to include St. Demetrius and stopped dead—the houses on the other side are practically undamaged. Its substantial structure and the change in the wind saved the Prefecture, but for the rest nothing remains but ruins. The houses were all built of rubble plastered over and whitened, and there was a good deal of timber in the walls. All the stuff was as dry as tinder, so that with the narrow streets it is little wonder that the fire spread.

The Red Cross at Work.

A report on Red Cross work in Mesopotamia appeared in our columns a few months ago. From a fuller history of the society's activities which has appeared in *The Times*, the following extract, dealing with the work at Salonika, is taken:—

With the abandonment of the expedition at the Dardanelles much of the Red Cross machinery which was employed there was diverted to cater for the Allied Armies which were established at Salonika. Here again a separate Commission was set up. It was inaugurated early in 1916 by the creation of a big depot for stores, the original consignment of £20,000 worth of goods and material being the largest single "despatch" which had up to that time been made from the headquarters in London. These goods filled 2,000 cases and bales and weighed 250 tons. They were the groundwork of an undertaking on behalf of the Red Cross in which all the experience of previous Commissions was available, and a service which has been of enormous value to every Army—British, French, Italian, Russian, Serbian, and the Greek forces of the Provisional Government—engaged on the Macedonian front. Under Major H. L. Fitzpatrick, this Commission has never lacked in energy, nor in opportunities to employ it. It has maintained an admirable ambulance service right up to the front lines, which in July last had to its credit a mileage of 5,218 for the month; a convoy of 30 ambulances provided specially for the Serbian Army covered in the same month 16,620 miles, and carried 2,878 men, and the stores branch, with an addition in May last of 30 more units drawing its supplies, has now well over 400 units on its books—units which, in the single month of July, made as many as 409 requisitions, many running to a hundred different articles. The invalid kitchens and canteens, which here, as everywhere else, are in a large degree the special province of women workers, are kept continuously busy, and supply from 120,000 to 200,000 diets a month; four new kitchens, making 13 in all, were opened in July. There are canteens on the quays and in the advanced zones of operations, and, of course, all the usual provision for inquiries for the wounded and missing and for the distribution of gifts, newspapers, magazines, and books. As all the special "comforts" work is additional to the ordinary business of transport and treatment of the wounded, and as all the different branches have won very high appreciation from the British and Allied Army Commanders, the Salonika Commission can at the end of more than a year and a half of sound, solid endeavour and achievement claim to be in all respects thoroughly representative of Red Cross efficiency.

A Master Builder.

The Morocco correspondent of *The Times* in a recent article gave a most vivid description of the building of the palace of the Bahia by Bou Ahmed, the Grand Vizier of Morocco. An opportunist by nature, Bou Ahmed seized the occasion presented by the death of the Sultan in 1895 to obtain the chief power for himself. He achieved this end without much difficulty, and, having done so, set himself to the work of the building of the "Bahia":—

With stone and mortar and the money and blood of men, by every exaction and cruelty, by murder and sudden death, he built it, raising court after court—grandiose and fantastic—to please his own pride or the fancies of some woman. Every favourite had her courtyard and her apartments, and little it mattered to her, or to the man who for a time cherished her, how many might die, how many might starve, that the ceilings of carved cedar-wood might be paid for, or the marble fountain basins be brought from Italy. The Vizier's revenues were prodigious, for every coin that came to the Moorish Government passed through his hands, and a few went on to the Imperial Treasury, but only a few. He was alone and omnipotent. A sort of superstitious romance encircled him and his wealth. His name was whispered in the streets and in the byways.

He started largely. He took a whole quarter of the town and razed it to the ground. It covered many, many acres. No householder could resist his onslaught. Where necessity arose, he compensated, according to his own ideas, the owners of the houses he destroyed. In other cases he found it unnecessary to do so. Whole households were turned loose into the world. Beyond were gardens, great groves of olives and oranges. He became possessed of them, tearing down the dividing walls and laying out the whole as a great park.

By the irony of fate Bou Ahmed's enjoyment of the monstrous palace was shortlived, for he died in 1900.

The Sultan wept the loss of the man of iron will who had set him firmly on the throne. On foot he followed his body to the grave, and returned to sign the edict of the confiscation of all his property. In the Bahia reigned confusion and lamentation. The great courts rang with the wailing and the shrieks of the women—and the palace, deprived of the iron hand of its master, became a pandemonium. Its inmates knew that a great crisis was at hand, and each strove to steal as much as he or she could in the few hours that yet remained. Safes were broken open, jewels were torn from their settings, the more easily to be concealed, the doors of the treasure-rooms and the store-rooms were torn from their hinges. Wives, concubines, and slaves fought and looted—and, it is said, killed—for how many jealousies found their chance of revenge; and in the midst of it all came the Sultan's emissaries and the soldiers, to continue the loot and pillage in the name of the Sovereign. For days caravans of mules passed through the streets bearing Bou Ahmed's treasures to the Sultan's Palace. Then the women were driven forth—the older ones to hunger, and perhaps to death; the younger to live as best they might. The slaves fled, or were passed on to new masters.

LONDON COUNTY & WESTMINSTER BANK, LTD.

ESTABLISHED IN 1836.

CAPITAL - £14,000,000, in 700,000 Shares of £20 each.

PAID-UP CAPITAL - £3,500,000. RESERVE - £4,000,000.

Chairman - THE RIGHT HON. THE VISCOUNT GOSCHEN.

Deputy Chairman - WALTER LEAF, ESQ.

HEAD OFFICE: 41, LOTHBURY, E.C.2.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

It is not an easy matter to obtain any reliable information regarding the economic position in Turkey, but such news as comes through is fully corroborative of the view that the Sublime Porte is in the last stage of financial exhaustion. Before the war Turkey was on the verge of bankruptcy, so the effect of her war liabilities can be well imagined. Some interesting light on their incidence has recently been given by a neutral who lately arrived at Geneva from Constantinople and was interviewed by a correspondent of the *Temps*. Paper has naturally displaced coin, and two-piastre stamps are a medium of circulation. In Constantinople itself Turkish paper money is stated to be 50 per cent. below its gold value, and in the provinces lower still. Then Turkey has incurred liabilities to Germany of £T142,000,000 and to Austria-Hungary of £T10,500,000; while the usual item for unpaid salaries now amounts to £T27,500,000.

***

The picture of conditions given by this neutral enables one to form a fairly clear idea of the desperate economic position of Turkey. The position, indeed, must be such that its very hopelessness is no doubt one of the determining factors in inducing Enver Pasha and his colleagues to continue a losing struggle on the principle that so far as they are concerned nothing that can conceivably happen can make matters worse than they are. They realise that when the war ends the Allies will certainly give Turkey no assistance while they are in a position to prostitute the destinies of the country for their personal ends, and so they fight on for a further brief lease of power. But, with the economic position what it is, they may not be in a position even to do that very long, for it would not take many Ramadiehs to undermine the last props of the falling structure.

***

In estimating the future of oil undertakings in Roumania it will be necessary to take into consideration the operation of the new Reform Act, particulars of which were given by a correspondent in last week's issue of THE NEAR EAST. The section of the Act which will affect oil companies is that which modifies Article 19 of the Constitution referring to expropriation with the object of putting an end to the tenure of large estates in the country. "Recognised oil lands up to 12,000 ha.," says the correspondent, "will not be divided, but their owners will have to supply an equal extent of arable land, either in the same or in a neighbouring district." It remains to be seen what will be the actual effect of this restriction on existing oil companies in Roumania.

***

The British Empire Producers' Organisation calls attention to yet another instance of the way in which Germany contrived to profit by acting as middleman between two countries. In the present case Indo-Russian trade provided the opportunity for Germany's activities. "Germany's big slice of the general import trade into Russia of manufactured articles," says the organisation, "was notorious; her grip on the supply of tropical raw material to Russia was less known, but is equally significant. For instance, taking fifteen articles of Indian produce, from beeswax to tea, of the total import of such produce into Russia before the war—13¾ millions sterling in value—Germany is credited with 5¼ millions sterling, or over 38 per cent.! To this has probably to be added a further 1½ millions, representing Germany's transit trade, making 6¾ millions sterling in all. When it is remembered that by far the largest Indian import into Russia is tea, and that Germany's share in this particular trade is infinitesimal, the significance of the figures is still more marked."

***

Despite the preoccupations of the war I note that the French have been steadily pursuing the task of improving and developing communications in Morocco. Of course, matters have not advanced as quickly as they would under more happier circumstances; but all the same sufficient progress has been made to ensure the country's rapid economic advance after the war. As showing what has been accomplished it may be mentioned that in 1916 out of a total of 2,000 kilometres of first-class roads which had been sanctioned 800 kilometres had been completed, and 900 were in course of construction. During the year the coast road from Mazagan to Casablanca, Rabat, and Kenitra was finished except for the larger bridges, the construction of which cannot be undertaken until after the war; while the road from Casablanca to Marrakesh was completed except for some 15 kilometres, which have since been finished.

***

It is not often that British traders come in for praise for catering for the requirements of a market, and on that account some notes from the *Journal of the British Chamber of Commerce for Morocco*, which are given elsewhere in this issue, are of exceptional interest. The Morocco market, it is stated, has been carefully studied by British exporters, and if trade has been lost it has been over the question of price, and not because the goods were not what was required. If this be so, it is indeed good hearing. I only wish it were possible to draw the conclusion from this pleasing example of competent trade enterprise that our export houses as a whole were acquiring a new outlook as regards the necessity for meeting local needs. But this, I fear, is not yet the case, though British traders generally have undoubtedly progressed far in this direction in the last few years.

***

I am glad to note that the *Journal* is of the opinion that British firms are fully awake to the necessity of preparing to meet the post-war requirements of the Morocco market. As I have pointed out before, Morocco presents one of the most promising opportunities for British trade after the war, given adequate organisation, and as British firms are alive to the situation it should be possible largely to replace enemy trade in this market. The principal difficulty, apart from the question of shipping, would seem to be the fact that cheapness is the ruling factor, but this ought not to be an insuperable obstacle. Surely it should be possible for British manufacturers to produce goods cheaply enough to withstand the competition of other countries there.

***

From January 1 there is to be an increase of 2 fr. 50 c. per ton of 40 cubic ft. in the dues for ships in ballast passing through the Suez Canal. This increase will bring the dues for laden and empty ships to the same level—8 fr. 50 c. Previously the company has lent encouragement to the outward passage of ships in ballast, and this change of policy is, no doubt, due to the fact that the company holds that discrimination is no longer justified under the changed circumstances. It is an interesting fact, incidentally, that, despite the various increases in the Canal rates during the war, the receipts have shown a serious decline. As a matter of fact, the receipts for the period from January 1 to September 27 last were less than half that for the same period in 1913. The figures then were 92,310,000 fr., and the receipts for this period in the following years show a steady decrease. In 1914 the receipts were 88,090,000 fr.; in 1915, 68,220,000 fr.; in 1916, 57,850,000 fr.; and in the present year, 44,340,000 fr.

***

The report of the Gharbieh Land Co. is, on the whole, rather encouraging. The means adopted to meet the shortage of fuel, which had been one of the great sources of anxiety to the company, have proved equal to the situation, and next year it is hoped to introduce improvements which will reduce the expenditure on irrigation and at the same time ensure a better water supply. Various factors exercised a detrimental effect on the sale of property during the year, but all the same the company disposed of about 30 feddans of land at an average price of about £E85 a feddan.

THE WAR SETTLEMENT AND THE TRADE OF SERBIA.

I.—The Position Before the War.

British economic relations with Serbia, as with other Balkan countries, have been in the past, as we have only too good reason to know, of an almost negligible character, thanks largely to the reluctance of British traders to enter what they considered small markets, where competition was keen, and where it would have been necessary to abandon many of their old-fashioned methods in favour of a more flexible attitude as regards local requirements. It is one of the few things for which we have to thank the war that trade conditions in the Balkans will in the future be infinitely more favourable from the point of view of the British trader. German and Austrian competition, with the inevitable corollaries of long credits, cheap prices, and inferior wares, will still be present, but it will be tempered by a strong reluctance on the part of the inhabitants to accept enemy goods where those of the Allies are accessible. In Serbia this tendency towards an economic *rapprochement* with the Allies will be found at its strongest, for of all the Balkan countries none has suffered more during the war at the hands of the Central Powers, while in the past the shadow of the Dual Monarchy and its partner loomed over all the activities of the country, cramping its natural development, and, above all, preventing it from obtaining the desired outlet to the sea, which would have conferred economic, and therefore political, freedom. It is, indeed, as certain as anything can be, that if Serbia has her way her trade relations with the enemy Powers will be kept after the war at the smallest possible dimensions. But Serbia's desires in this respect will avail nothing if British and other Allied traders are not ready to afford her the opportunity of inaugurating a new era of trade relations. The problem, in fact, resolves itself into the question of how far our traders are willing to prepare now for the future.

Serbia Before the War.

As a prelude to a consideration of the probable nature and extent of the Serbian market after the war, and the measures that are being, and will be taken to bring about intimate trade relations between this country and Serbia—important plans have already been made with this end in view—it will be advisable to give a brief sketch of the economic conditions of the country before the war, in order that probable developments may be accurately estimated, for in this, as in other cases, the past may be made to serve as the mirror for the future.

Perhaps the best idea of Serbia's pre-war position may be gathered by saying that in some respects it was not unlike that of this country prior to the industrial revolution. While a large proportion of the three or four million inhabitants were still engaged in agricultural pursuits or in simple cottage industries, the era of the factory and of commercial concentration was already at hand. Industries such as the manufacture of sugar, of cotton and woollen manufactures, and of straw and felt hats were well established, and their development and the creation of new industries was proceeding apace. Mining, however, was backward, despite the fact that there is plenty of copper, lead-quartz, antimony, and other mineral ores in the country. Of these only copper had been mined on an extensive scale. Development in this, as in other directions, was hampered by a variety of factors, principally financial in character. They are one and all handicaps of the type which naturally confront a country on the eve of its development, and as showing the conditions which will have to be faced, it may be well to enumerate them.

The Financial Question.

Finance, as we have noted, has been the chief retarding influence. Here the difficulty has been twofold. In the first place, it has never been easy for Serbia to attract foreign capital; and, secondly, money rates have been inconveniently high, 10 to 12 per cent. being paid. Then there have been the added handicaps of bad communications, both as regards railways and roads; and, lastly, an absence of sufficient skilled labour.

For some little time before the war, as a matter of fact, capital had been easier to obtain, and French capitalists in particular had shown themselves ready and willing to participate in the development of the country. The explanation of this change of attitude is to be found in the fact that for some years Serbia's finances had been on the up-grade. Until towards the end of the nineteenth century the financial situation can only be described as indifferent, the causes of this being in general bad financial administration, heavy expenditure on the army, and a system under which every change of government entailed a series of pensions. How heavily the last item counted in the balance-sheet may be seen from the figures for pensions in 1907, when 4,481,197 francs were allocated under this head. The improvement in Serbian credit when it began was steadily maintained, and while the Serbian 4 per cent. Unified Loan was quoted on the Paris Bourse at 68-69 in 1896, it had risen by 1911 to 93. This appreciation is the more notable when it is borne in mind that Serbian indebtedness was on the increase. In 1911, for instance, the Serbian debt amounted to 659,056,000 francs, a sum which entailed the setting aside of 32,304,500 francs to provide for the interest and a sinking fund. In other ways, mainly through expenses entailed by wars and the maintenance of a larger army, the expenditure was increasing, but the development of the State was such that the revenue was keeping pace with the demands made upon it; and while in 1881 it amounted to only 23,419,835 francs, it reached in 1911 over 120,000,000 francs.

Exports and Imports.

The growing material prosperity of the country before the war may be even better estimated from the increasing value of its exports and imports. The figures for the two years 1910 and 1911 will illustrate this point. In the former year Serbia imported goods worth 84,695,641 frs., while her exports amounted to 98,388,028 frs. In 1911, however, the imports had increased to 115,425,415 frs., and the exports to 116,916,357. Serbia's chief customers were, of course, the Central Powers. In 1911 the Austrian imports from Serbia amounted to 48,433,392 frs., and the corresponding exports to 47,447,981 frs.; while the figures for the same period for Germany were 28,932,926 frs. and 31,346,860 frs. Great Britain's imports from Serbia were infinitesimal, while her exports in 1911 amounted to only 9,524,278 frs. To this figure, however, should be added the imports of one or more commodities, which Germany, acting in her favourite capacity of middleman, took from this country to place on the Serbian market.

Geographical considerations, reinforced by the policy of peaceful penetration, is the explanation of the commanding position that the Central Powers occupied with regard to the trade of Serbia. Cut off entirely from the sea, Serbia was bound to be more or less in a position of economic dependence on the Dual Monarchy and its Ally. And from the economic state a measure of political dependence was bound to arise. Under similar conditions a recurrence of this dependence is inevitable, and it is no exaggeration to say that Serbia's future is entirely bound up in the nature of the war settlement.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses and unsuccessful attacks during the week ended September 30, 3 p.m.:—

Arrivals 2,630
Sailings 2,742

British merchant vessels sunk by mine or submarine:—

1,600 tons gross or over *11
Under 1,600 tons gross 2
British merchant vessels unsuccessfully attacked by submarines..... †16
British fishing vessels sunk 0

* Including one sunk during week ended July 29 and one during week ended August 12.

† Including three attacked during week ended September 16 and four during week ended September 23.

GERMAN AND AUSTRIAN CATALOGUES

In order that British manufacturers may have an opportunity of familiarising themselves with German and Austrian methods of advertising, the Board of Trade have collected over 8,000 specimen catalogues of German and Austrian origin, and these may be inspected at the Department of Commercial Intelligence, Basinghall Street, London, E.C.2. A new index has been prepared, in which the catalogues are classified both as regards articles of manufacture and names of manufacturers, thus rendering identification of any particular catalogue a simple matter. Copies of this index may be obtained by United Kingdom manufacturers on application to the Comptroller-General, Department of Commercial Intelligence.

Dr J. Collis Browne's Chlorodyne

Safeguard your Health with this Reliable Medicine.

Cuts short attacks of HYSTERIA, SPASMS, PALPITATION.
A true palliative in NEURALGIA, GOUT, TOOTHACHE, RHEUMATISM.
Checks and arrests FEVER, CROUP, AGUE.
The Best Remedy known for COUGHS, COLDS, ASTHMA, BRONCHITIS.

ACTS LIKE A CHARM IN DIARRHŒA, CHOLERA, DYSENTERY.

Of all Chemists, 1/3, 3/-, 5/-.

ADEN'S EXPORTS OF SENNA LEAVES.

Increased Trade with United States.

We are indebted to a report of Mr. Addison E. Southard, United States Consul at Aden, for the following particulars of the development of Aden's export trade in senna leaves:—

Among the exports to the United States for the second quarter of the calendar year 1917, declared at the Aden consulate, those of senna leaves take a more prominent place than ever before in the history of American trade with Aden.

The local article of commerce known as senna consists of the leaves of some species of Cassia which grow wild in several parts of this commercial district. It is used for medicinal purposes. The native name is "senna makki." The supply in the Aden market consists chiefly of two kinds or grades, known as "Yemeni" and "Jibuti." The Yemeni grade is much the better and comes to Aden from the Yemen and other Red Sea Arabian Provinces, while the second grade is collected in Abyssinia and French Somaliland, and is shipped from Jibuti to Aden.

Senna reaches Aden in large bales weighing from 12 to 16 maunds each. Recent prices for the uncleaned senna have been 5 rupees and 8 annas ($1.78) per maund for the Yemeni, and 1 rupee less per maund for the Jibuti grade. These prices are approximately 2 rupees higher than the normal figures.

The senna is cleaned in Aden. Indian women are employed to pick it over and throw out twigs, discoloured leaves, etc. Leaves of other plants which resemble the senna leaves are often mixed with it in the districts of production to increase the weight. Considerable skill, therefore, is said to be needed by the women who do the cleaning, in order to find and throw out these foreign leaves. If rain falls while the senna is being sundried in the districts of production, the dried leaf turns black, and these also must be removed when the senna is cleaned for export. An uncleaned bale often gives less than half a bale of cleaned and picked product fit for foreign markets.

Export Trade of Recent Growth.

Only recently has it become an article of export to Europe and to the United States, although small quantities occasionally have gone to Egypt and to India. During the past fifteen months a demand has developed in the United States, and the first exports of senna recorded at this consulate were shipped during the second quarter of 1916, when 31,273 pounds, valued at $7,946, were sent to American importers. During the third quarter of 1916, a small amount, valued at $1,613 went to the United States. The next shipments were made during the second quarter of the current year, and they amounted to 82,868 pounds, valued at $42,407. During this quarter senna leaves ranked next to skins in the value of Aden exports to the United States. American importers apparently are paying fancy prices for the product. The total exports of all commodities to the United States during the second quarter of the current year reached a value of $869,609, which is about 70 per cent. of the total value of the exports during the first quarter of this year.

Three Months' Exports.

Exports to the United States during the second quarter of 1917 also were considerably smaller in amount than those during the second quarter of the preceding year. The declared exports from Aden to the United States during the second quarter of 1917, compared with those for the corresponding quarter of the preceding year, were:—

Articles.	April-June, 1916.		April-June, 1917.	
	Quantity.	alue. $	Quantity.	Value. $
Civet .....ozs.	—	—	4,505	5,502
Coffee ....cwt.	4,116	84,188	1,110	25,933
Gum .....lbs.	11,200	1,672	62,720	8,095
Mother-of-pearl shells.lbs.	—	—	129.920	26.341
Senna .....lbs.	31,273	7,946	82,868	42,407
Skins ....scores	86,024	1,078,169	46,762	761,331
Total	—	1,171,975	—	869,609

During the past twelve months there has been an unusually active demand for senna leaves from the United Kingdom. Local dealers now say that both the American and the English demands seem to be at least temporarily satisfied. Accordingly the market is inactive, and there are no new shipments coming in from the districts of production. The possible supply, however, is large and local dealers say that they can furnish considerable quantities if desired. Lack of shipping facilities is an obstacle to any immediate further development of this trade.

THE MOROCCO MARKET.

Enterprise of British Traders.

It cannot be said that Morocco has been badly catered for by United Kingdom manufacturers and exporters in the past, says the *Journal of the British Chamber of Commerce for Morocco*. With regard to the principal imports, especially those intended for the native trade, British exporters have studied the needs of Morocco very carefully, and with very satisfactory results. Where trade has been lost in an article, as in the case of woollen cloth, it has, as a rule, been entirely a question of price, and not of failure to make exactly what was required. There are, of course, some articles in the supply of which British manufacturers have not shown themselves adaptable, but most of these have been in comparatively small demand, or have only become important in recent years. In the history of British trade with Morocco there is not much evidence of inability to meet the special demands of the market.

After the War.

In the matter of preparing for trade after the war, there are welcome signs that United Kingdom firms, especially those new to Moroccan trade, are mindful of the need of making preparations in anticipation of the time when they will be able to export much more freely. Nevertheless, more requires to be done in order to keep importers of British goods in Morocco informed of the position in the United Kingdom—of the present difficulties as regards manufacturing and exporting, and of the prospects of manufacturers being able, after the war, to supply Moroccan demands, the filling of which during the war has had to be left to other countries. If the position can be made plain to importers, the temporary arrangements which have had to be effected in order to obtain supplies from other countries will not be so likely to become permanent, and many trade opportunities will thus remain for the benefit of United Kingdom firms.

So far at least as the native trade in Morocco is concerned, cheapness is likely to remain for long a deciding factor. It is most desirable, therefore, that the ability of the United Kingdom after the war to produce cheaply, as well as the willingness of manufacturers to adapt their goods to the requirements of Morocco, should be made known to importers at once.

Messrs. Gray, Dawes and Company removed on Monday to their new offices, 122, Leadenhall Street, London, E.C.3, to which address all communications should be directed.

BANK OF BRITISH WEST AFRICA, Limited.

Established 1894.

Bankers to the Governments of the Colonies of the Gambia, Sierra Leone, Gold Coast, and Nigeria.

ENGINEERING NOTES.

One-Wheel Tractors.

With a view to eliminating the possibility of minor collisions which so often take place in narrow and restricted thoroughfares, and to enable a vehicle to be readily extricated from congested areas, a one-wheel tractor of a simple design has been brought out, which seems to meet with much favour. The outstanding feature of the tractor is implied by its name. It has only one wheel, which is steered through conventional-type gearing. The power unit is an engine with a bore and stroke of 3¾ ins. by 5⅛ ins. respectively. High-tension magneto is used for ignition, and the cooling water is carried in a tank which has a 56-gallon capacity. It is so disposed as to counterbalance the weight of the engine. The drive from the engine is transmitted through a clutch to a three-speed gear-box. There are the usual two brakes, the service brake being carried on the cross shaft, and is externally operated, while the emergency brake is, internally placed. Stability is given to the tractor by attaching the rearwardly-extending main frame to the front axle of the wagon. The weight is balanced on the single wheel, so that the wagon axle is not overloaded; it simply gives support to the tractor. The attachment to a wagon need not be permanent. For the narrow streets and roads of many towns in the Near East the one-wheel tractor will be found very suitable.

Coal Gas for Motors.

The use of coal gas for motor cars is evidently increasing. In previous engineering notes we described the method of operation and the necessary gas equipment. The announcement of motor-car manufacturers that they are now supplying gas equipments specially prepared for their vans and cars is a sign of the popularity of the new system. They are so designed with their set of fittings as to be readily adapted to the car by any garage mechanic or even the car owner. The prices vary between £10 and £20, according to size.

Mineral Wealth of the Sudan.

The reports made by various prospectors to mining syndicates, and the records of competent travellers who have made notes on the mineral resources of the Anglo-Egyptian Sudan, have already proved that the area is rich in mineral deposits. Coal, copper ore, gold ore, graphite, gypsum and alabaster, iron ore, lea dore, limestone and marble, natron and salt, are mentioned as the principal substances the existence of which is indisputable. With regard to coal, however, an official report refers to it as an occurrence of impure lignite in Dongola, of which no indications of a workable deposit are known, and it is stated to be unlikely, so far as one can judge from the geology of the Sudan, that any large deposits of coal will be found! But against this view there are reports of German mineralogists, who assert that the deposits of coal in the Sudan are abundant. Gypsum and alabaster occur in enormous quantities on the Red Sea coast, north of Port Sudan. Surface iron ore is abundant, covering an area of 80,000 square kilometres in the Bahr-el-Ghazal province alone. However, in spite of all reports and successful technical investigations, generally speaking, very little has been done, up to now, for the exploitation of these mineral deposits on a practical basis. Yet all the substances that are mentioned above are in great demand at the present moment.

Lignite, or Brown Coal.

In view of the possibilities for the exploitation of the Sudan lignite mines, referred to in the above notes, and the enormous use of that kind of coal in the Near East since the war began for all purposes, it will be of interest to those concerned in such mines to know that lignite is only the "despised brown coal," of limited use and indifferent value. In previous engineering notes we alluded to its utility as fuel for suction-gas plants, but recent reports reveal that much greater value has been discovered in it. The Germans, in their incessant efforts to relieve their difficult position from the effects of a stringent blockade, have succeeded in developing a process of treating brown coal in a producer which, in addition to furnishing power gas with recovery of sulphate of ammonia, also makes use of the previously worthless tar by extraction of burning oil for the use of the Navy, lubricating oil, and paraffin; whilst from the residue is produced coke suitable for the manufacture of carbon electrodes for electro-chemical purposes. The extraction of oils from brown coal, which, according to the *Neue Zürcher Zeitung*, is now being thus carried on in two large plants erected at Rositz and Regis, is of great importance for German war needs. A process recently discovered enables the yield of ozokerit to be increased from 12 per cent. to nearly double that amount, and in addition a quantity of low-grade fat suitable for leather treatment is obtained as a by-product. The output of gas from the distillation of brown coal has also been improved, and is transmitted over considerable distances for power and lighting purposes, though it is found that under existing conditions it does not pay to transmit gas beyond a twenty-five-mile radius, though this is likely to be improved upon in the near future. Thus the mines of lignite in the Near East are of much greater value than they hitherto were to the country and their owners.

Information has reached the Serbian Red Cross in London that in Dalmatia flour is fetching 21s. 6d. a lb.; wheat from 7s. 6d. to 8s. 6d. a lb.; and even maize flour as much as 5s. a lb. Coal is already being sold at 30s. 6d. per cwt. In one village alone, with a pre-war population of only 1,100, there have been seventy cases of death through starvation.

AGRICULTURE IN EASTERN GREECE.

An Agricultural Society.

In view of the existing food shortage throughout the world the Greek Government is taking active steps, says the United States Consul-General at Athens (Mr. Alexander W. Weddell) in a recent report, to bring under cultivation every available acre of land in Greece. As a means to this end plans are now being perfected for the formation of an agricultural society which will have a capital of 40,000,000 drachmae, and in which the Government, individuals, and banks will be stockholders. It is estimated by competent authorities that there are now available in Macedonia some 900,000 stremma (222,300 acres), belonging in large part to the Government. For the use of this Government land and the land of individuals not now under cultivation the society will pay 2 drachmae per stremma per year.

The Royal decree chartering the society has not yet been prepared, and it is therefore not possible to give details concerning its powers and activities, but it is evident that its promoters, with active Governmental assistance, are preparing to undertake the development of this considerable domain with zeal and intelligence. As an earnest of this it may be mentioned that a $700,000 credit has already been opened in the United States, and that orders have been given through an American company for the purchase and forwarding of 200 tractors, 600 ploughs, 2,000 pitchforks, 500 three-disc harrows, 2,000 two-drum rollers, 1,000 one-horse hoes 1,000 hand hoes, and 3,000 scythes. The company has also been requested to arrange for sending out 50 mechanicians, adjustors, and conductors, to remain for a period of four months in Greece, teaching local workmen in the upkeep, repair, and operation of this equipment.

The Ministry of Revictualing of Greece estimates that the first year's yield from the land to be placed under cultivation should equal 100,000 tons of wheat; in addition, it is proposed to plant other crops than wheat.

Reuter's Cairo correspondent states that the Sultan of Egypt has signed decrees creating a new department for the control of all supplies, appointing as Controller Mr. James Ireland Craig, at present Controller of State Statistics.

LANCASHIRE COTTON.

An Unsettled Market.

FROM OUR OWN CORRESPONDENT.

MANCHESTER, Wednesday.

The market has been very unsettled during the past week. Considerable interest was taken last Monday in the re-opening of the futures market in Liverpool but the necessary revision in official quotations caused some confusion. The scheme as a whole however is now working smoothly and traders are well satisfied with the new contract. Official reports relating to the American crop have been unfavourable and prices have again advanced. It has been extremely difficult for spinners and manufacturers to secure adequate advances, business to a large extent being blocked. The recent improvement in the inquiry for Egyptian yarns has been maintained and although operations have again been somewhat irregular certain sellers have had a very fair week. Some of the stock-taking results of Bolton Spinning Companies for the six months ending September are very encouraging. In cloth for Egypt the higher prices have checked progress and although some necessary buying has occurred there has not been any general flow of orders. Some advices relating to the Egyptian cotton crop have been rather better and there seems to be a disposition to increase estimates of the yield. In cloth for India more activity has shown itself in mulls and jaconets, but shirtings and dhooties remain very quiet, and producers cannot obtain relief. Chine buyers have given very little support. Dealings for Java, Singapore and South America have been on a rather restricted scale. In American yarns for home use prices are distinctly dearer on the week and although the undercurrent of demand continues healthier buyers have hesitated to place anything more than small orders. An encouraging turnover has again transpired in yarns suitable for France.

The report of the National Bank of India for the six months ended June 30 last states that the net profits, after providing for all bad and doubtful debts, amount to £143,771, £106,689 is brought forward, and the available total is, therefore, £250,460. The directors have declared an interim dividend at the rate of 16 per cent. per annum, free of income-tax, payable 28th instant, leaving a balance of £170,460 to be carried forward.

COMPANY REPORT.

THE GHARBIEH LAND COMPANY.

We give below some extracts from the annual report of the Gharbieh Land Company.

Lands.

The company's estates, the area of which on February 28, 1917, was 7,899 feddans 16 kirats 13 sahms, figure in the balance-sheet for the sum of £E441,631, which includes, besides the cost price, all expenditure on improvements, etc., up to the date of closing the accounts.

Irrigation and Drainage.

The irrigation and drainage of the company's lands has, since the war broke out, been a matter of grave and constant anxiety. In the last report an account was given of the various means adopted from the outset to deal effectively with the coal crisis. These means, having given excellent results, were, during the past year, extended and improved, and it is thanks to them that it was possible to ensure the normal working of the company's lift machinery and provide for all the needs of the estates without any appreciable additional outlay. Moreover, this matter continues to receive all the attention it demands, and it is hoped to realise during this and next year certain improvements which will considerably reduce the expenditure on irrigation and at the same time ensure a better water supply in the future.

Cultivation was on the whole satisfactory and showed marked progress as compared with the agricultural results of the two previous years. There was a shortage in the Egyptian cotton crop, but the deficiency was amply compensated by the enhanced price of cotton in 1916. The cotton crop at Ras-el-Khalig was early in general, and the pink boll-worm, which was fought with the greatest energy, did not cause as much damage to the crops as in certain districts in the immediate neighbourhood of the company's lands where considerable losses were sustained. During the past two or three years, by special selection of the seed and careful picking, the company has succeeded in improving the quality of its cotton and in substantially increasing the ginning outturn. Similar progress is shown in the yield of the other crops raised on the company's lands, especially cereals, the cultivation of which since the war has been somewhat extended. Although the cotton crop derived from the company's lands was not sold at the highest prices attained, the actual sale proceeds enabled many tenants and purchasers to pay their 1916 rents and instalments, as well as a portion of their arrears. The rents for the current year have been increased and, if the prices of cotton and other agricultural produce remain approximately at present levels, it may be possible to collect some of the arrears which had hitherto been considered irrecoverable.

Land Sales.

Since the war the number of forced sales has considerably increased and the numerous expropriations, due especially to the agricultural set-back in the years 1914 and 1915, had entirely stopped transactions in landed property. The company's lands were particularly affected in this respect by reason of the large area of lands expropriated. An extensive agricultural estate adjacent to the company's lands was put up for sale by order of the Courts, and the exceptionally low prices at which this property was sold have necessarily the effect of turning away from the company's property purchasers intent on securing land at bargain prices. During the year the company was, however, able to dispose of some 30 feddans of land at an average price of about £E85 a feddan, and there is reason to hope that, as the above deterrent has now been removed, sales in the current year will be more active, provided the crop is a good one and prices are favourable.

The company's indebtedness to the Egyptian Enterprise and Development Company has been increased by the interest accrued and the additional advances made during the year. As stated in the last report, the company was able, thanks to the intervention of the Egyptian Enterprise and Development Company, to obtain from its debenture

holders time for the payment of the half-yearly coupon due December, 1915, and the two coupons due last year. The December, 1915, coupon has already been paid, and the June and December, 1916, coupons, together with interest thereon at 5 per cent. per annum, are to be paid in December next.

Profit and Loss Account.

As already pointed out, the 1916-17 rents were fixed on the basis of prices ruling in 1915. The rise in prices having occurred much later, its effect will be felt only on future rents. The agricultural profits amounted to £E9,642, and the gross profits of the company to £E16,204. The general expenses, debenture services, interest, and sums written off amounted, on the other hand, to £E20,901. In this figure are included certain exceptional and temporary charges, such as those incidental to the deferred debenture coupons, which will cease shortly. With the estimated increase of income this year there will in all probability be a surplus, and it is to be hoped that the company will soon be in a position to begin to pay off its debts and thus gradually diminish interest charges.

COMPANY NOTES.

Oil Outputs.

Anglo-Egyptian.—Gemsah, week, 21 tons (previous week 20 tons); Hurgada, 1,876 tons, against 1,734 tons.

Baku Russian.—Week ended September 22, 74,400 poods.

Bibi Eibat.—Week ended September 23, 49,817 poods (804 tons).

European Oilfields.—Week ended September 23, 69,800 poods.

North Caucasian.—Week ended September 22, 884,120 poods (14,260 tons); week ended September 29, 878,350 poods (14,167 tons).

Spies Petroleum.—Production, including 2,245 poods from ambars, for week ending September 23, 196,680 poods, or about 3,172 tons; total production for the year from January 14 to September 23, 6,369,995 poods, or about 102,742 tons; total production for corresponding period last year, 6,159,225 poods, or about 99,342 tons.

Russian Petroleum.—Week ended September 22, 41,700 poods.

Dividends, Payments, etc.

Ottoman 4 per Cent. Loan on the Egyptian Tribute.—The half-yearly coupons for interest due 10th inst. will be paid on or after that date at the banking house of Messrs. Glyn, Mills, Currie, and Co., 67, Lombard Street.

TRAIAN ROUMANIAN OIL.

Company's Claim for Compensation.

A circular has been issued by the directors of the Traian Roumanian Oil Company stating that the company's stocks of oil, wells, plant and installations were destroyed, in common with those of other Rumanian oil companies, in the months of November and December, 1916, by the British Military Mission in order to prevent their falling into the hands of the enemy, and the directors are, therefore, not in a position to submit accounts for the past year. A provisional claim has been forwarded to the British Government for the property destroyed, amounting to £277,625, but that figure does not include the extra costs which will be entailed in the erection of buildings, etc., after the termination of hostilities, as compared with pre-war prices.

THE PRINCE LINE.

The twenty-third ordinary general meeting of the Prince Line, Ltd., which concern is so largely interested in the shipping trade of the Near East, was held at Newcastle-on-Tyne on Saturday, Lord Furness (the chairman of the company) presiding. The profit for the year, after making the necessary provision for taxation, etc., amounts to £430,816 16s. 4d., as against £495,328 7s. 8d. last year. It is proposed to pay the same dividend as last year—namely, 30 per cent. An interim dividend of 5 per cent. was distributed in March last, and a final dividend of 25 per cent. will be posted to the shareholders within the next few days.

ON 'CHANGE.

THROGMORTON AVENUE,
London, Thursday.

Business this week has been practically at a standstill. In Government stocks there is some inquiry from Egypt at about half a point under prices on this side, and consequently no business results.

In Bank shares there have been a few small transactions in Agriculturals round 5 15-16, and a few Agricultural Deferreds changed hands at 460. Bank of Athens shares have been in strong demand at 3 for account of Athens, but sellers on this side are scarce, and nothing has been done.

A few Delta Light Railway Prefs. were done at 6⅛. In Land shares, apart from some transactions in Delta Lands and New Egyptians round 13s. 3d., and in Gharbieh Lands at about 1⅝, there has been nothing doing at all.

Alexandria Waters are ⅛ lower at 12½, but, on the other hand, Khedivials have been quietly in demand, and finished 6d. up at 35s. 6d. There have also been some transactions in Salts and Sodas round 25s. 9d.

In Greek Government stocks, Rentes have been done at 44½ ex div., a rise of about one point, and Monopolies are nominally one point up at 52. The 1890 Loan is also half a point up at 55½. On the other hand, there are some sellers of Funding at about 54.

Oil Shares.

Roumanian Consols were unchanged on Wednesday. Anglo-Egyptians (B) rose 6d. to 23s. 9d.-24s. 9d., and Spies declined 3d. to 10s. 3d.-11s. 3d.

Paris Bourse.

Wednesday's quotations were as follows:—Credit Foncier Egyptien, 750 (unchanged), Suez Canal shares, 4,600 (against 4,590).

EGYPT'S REVENUE.

FROM OUR OWN CORRESPONDENT.
CAIRO, September 2.

Excellent Returns for May.

The State accounts for May show that revenue to the extent of £E3,274,438 was collected, as against £E2,920,451 in the same month a year ago, and that expenditure amounting to £E3,716,547, as compared with £E3,818,441, was incurred. The position of the country's finances so far is £E455,881 better than it was at the same date in 1916, i.e., a deficit of only £E442,109 compared with one of £E897,990 at the end of the previous May.

The chief items of revenue during the month were:—Land tax, £E505,648; Customs, £E176,970; tobacco dues, £E137,889; mixed courts fees, £E81,665; native courts fees, £E35,450; railways, £E343,354; rent of land, £E48,235; Ghaffir Cess, £E128,988; interest on investments, £E39,972; extraordinary receipts, £E175,580. So far, land tax is up by £E157,774, mixed courts fees by £E26,689, domains receipts by £E24,438, and extraordinary receipts by £E175,580. The principal decreases are:—Customs, £E31,109; tobacco dues, £E162.846; and railways by £E38,247. On the expenditure side the most noteworthy items during the month were:—Irrigation, £E75,608; railways, £E194,597; War Office, £E56,626; Ghaffir service, £E56,452; pensions and indemnities, £E62,991; and police, £E41,193.

The offices of the South Indian Railway Company, Ltd., have been removed to Finsbury Pavement House, E.C.2.

TERRIBLE REPORTS from Syria—

2.—From a Missionary in the Interior.

"I write these few lines that you may know I am still alive, but I cannot walk a step that I do not see someone lying dead in dirt and filth, and I thank God that He has permitted me to remain and serve this awful need. This letter goes to you by the kindness of Brother B———, who will post it in Europe.

"Two hours ago I was in the Bab Tuma quarter, distributing what had been sent me from Beirut, and there I saw thirteen bodies in the street, one of them having been murdered, and all surrounded by their loved ones. One day's harvest of death.

"One cannot walk anywhere in Damascus and not see hundreds of such sights. In an interview with the Mayor of the city as to the best method of distribution of relief, I learned that the number of inhabitants was supposed to be about 400,000, but that 120,000 had died during the past two years.

FAMINE IN THE HOLY LAND

The demand for adequate funds to provide FOOD, MEDICINE and CLOTHING to relieve the terrible distress of the people of the Holy Land is one of the UTMOST URGENCY.

£300,000 WANTED
of which £50,000 is needed at once.

FOOD, MEDICINE and CLOTHING are being distributed. Stored goods will be sent into the country as further access is obtained. Relief will be given to all in need—Christian, Jew and Arab alike

Chairman (London), Lt.-Col. Sir Henry MacMahon, G.C.M.G., &c. (late High Commissioner in Egypt).
Hon. Treasurer, J. F. W. Deacon, Esq., Williams Deacon's Bank, Ltd.

NOTES OF THE WEEK.

Although General Maude's victory in Mesopotamia was somewhat overshadowed a day or two later by the successful operations of the British Army on the Flanders front, the further details that have been received from Baghdad emphasise the importance of the action at Ramadieh. The number of prisoners is larger than was at first reported, and the booty greater, including railway material, steam launches, and a quantity of engineering material. After a victory so decisive no counter-attack by the Turks will be possible for some considerable time, the whole of their forces in the neighbourhood having been captured. It remains to be seen whether the enemy attempts to avenge the day by moving further troops eastwards to oppose General Maude. To do so would take some considerable time in any case, and would necessarily weaken the Turkish forces elsewhere; but to accept the defeat as final would in the end be as severe a blow to Ottoman prestige as the defeat itself.

The remaining Turkish front, in Palestine, has witnessed nothing out of the ordinary, according to the usual laconic British report; the Turks on their side have reported an intense artillery activity. (It seems to have become a tradition of the British Army not to mention these bombardments, which are usually the prelude to action.) But neither side has yet attacked, and the world is left to wonder where the anticipated Turkish offensive is to be made. It was rather loudly advertised in Germany a couple of months ago, and Falkenhayn's visit to Jerusalem was significantly mentioned. It may be, of course, that the whole thing was a plan to delude the Entente, but in that event it must have deluded a number of Germans as well.

The week has been relatively quiet on the Eastern European front. The Roumanian battle has died down, but a curious statement has been issued that General Jancovescu, the Roumanian Minister of War, has expressed the hope that von Mackensen's expected offensive will not be carried out, "owing to the infection of the Russian troops on the Roumanian front with Maximalist ideas." He is reported to have added that the Roumanian troops would, notwithstanding this infection, put up a stout fight. If this utterance is genuine—and Ministers do not usually reveal their weaknesses, or urge their opponents not to fight after admitting that the conditions are favourable to them—it throws a sinister light on the recent Russian activities. The difficulty in the Russian army, it has been said, is that the troops have no will to fight, and that their discipline has been corrupted by the notorious Order No. 1 and the intrigues of agitators and pacifists in the ranks. It was natural, of course, that these gentry, not all of whom are above suspicion of being in German pay, should endeavour to spread their revolutionary doctrines among the Roumanian ranks, which have hitherto been sound, but it would be extremely disquieting were it discovered that their efforts had been successful. Fortunately, there is no reason to believe that the situation is really serious at present, and it is to be hoped that energetic steps will be taken to combat this propaganda.

From Russia itself there is no news that can be construed as really improving the situation. A new Provisional Government has been formed, and its acts are impatiently awaited. If it imitates its predecessor in issuing manifestoes and delaying action, Russia will almost begin to despair of itself. The position is admittedly critical, and anarchy stalks the infant Republic, but constructive work is still to seek. The publication of General Korniloff's justification, while it does not explain his fall, disposes of the slander that he intended to restore the old régime—a slander that was industriously propagated in pacifist circles here and elsewhere—and it leaves an uncomfortable suspicion that some treachery was used towards him; but the true story of this unhappy episode is unlikely to be published for many a long day.

Meantime, further indications of the separatist spirit have been announced. Finland is preparing, or has prepared, to proclaim itself a republic, united by the weakest of ties with Russia, if united at all; the proposed bond is so fragile as to be almost invisible. The movement in the Ukraine seems to be following the same course, and every manifesto which comes from that quarter lays all the stress on local rights, and practically ignores the central tie. The restraining hand of M. Kerensky and his colleagues, although it is no doubt exercised, does not appear to have the effect in these quarters that might be anticipated.

In these circumstances, the German newspapers naturally continue to speculate on the dissolution of Russia, and Austria's desire for peace is probably ac-

Digitized by Google

centuated by the dual consideration that Russia will no longer menace her as a Great Power, and will leave her a free hand in the Balkans. German writers are proclaiming the necessity of annexing or controlling Courland and Lithuania—a sermon which follows naturally on the text of Riga—while Austrian publicists dilate on the congenial theme that the collapse of Russia deprives the Southern Slav movement of all its moral support, and leaves them nothing to hope for but the clemency of Vienna. If that were the case, their condition would indeed be desperate. But the assumption that Russia is permanently *hors de combat* is rather daring, even in an Austrian writer; and while the present difficulties of our Ally do undoubtedly tend to affect the position of the Southern Slav movement adversely, that movement progresses notwithstanding. The Corfu pact came after, and not before, the troubles of Russia had become manifest; the *rapprochement* with Italy followed the Corfu pact. And one result of the Russian upheaval has been to demonstrate the fact that the Jugoslavs rely mainly on themselves, and only in a secondary degree on outside encouragement. The latter is admittedly important, but the former is vital. Despite the Russian revolution, the Jugoslav cause has progressed more in the last six months than it did in the previous six years, and probably it is precisely that consideration which troubles the Austrian writer. A movement which flourishes in spite of adverse circumstances has proved its strength.

There have been certain mysterious comings and goings in the Near East which merit notice. The German Emperor, after weeping over the destruction which the Russians had caused in Galicia—in the same way, possibly, that his heart "bled" for Louvain, in order to impress the credulous—had the opportunity of a conversation on the Imperial train with the Emperor Charles, and this is to be followed by a consultation with King Ferdinand and the Sultan at Sofia. No statement has been issued as to the subjects to be discussed, nor has any further light yet been thrown on the important agreement which M. Radoslavoff announced had been arranged with Bulgaria. It would be idle to speculate on the topic, but it is at least probable that the discussions at the Sovereigns' meeting will envisage the whole future of Balkan politics, as understood by the Central Powers.

It is curious that at the very time when this meeting of monarchs was announced the rumour that Bulgaria was anxious to conclude a separate peace should again obtain currency. The report, which appeared in the *Morning Post*, was to the effect that Bulgarian emissaries in Switzerland have been in touch with "a well-known individual," whose identity is not mentioned, but who is said to have intimate relations with the Roumanian delegates concerned with the Roumanian prisoners. The suggestion is that Roumania was to restore the new Dobrudja to Bulgaria, and to profess herself disinterested as regards her claims in the Balkans and all the claims of other Powers in the Balkans. In other words, Roumania was to give up her gains under the Treaty of Bucharest and to abandon the Roumanian population of Transylvania; in return for which she would presumably obtain—although this is significantly not so stated definitely—the restoration of her territories at present in German occupation. It would mean for Roumania the *status quo* of 1912.

These overtures have, of course, been contemptuously rejected. Were they accepted, Roumania would become a third-rate State on sufferance; her independence would be merely nominal, and she would in fact if not in name be a vassal of the Central Powers. That is not the destiny of a fighting people which has borne misfortune and suffering with the fortitude of the Roumanians. M. Také Jonescu has stated in the last few days that the idea of peace at the present time is ridiculous, and while hinting that these peace proposals were not unconnected with the Kaiser's visit to Sofia, he rejects the whole idea on which it is based. It may be remarked that these proposals appear to have emanated from the envoys who, it was announced some weeks ago, were sent from Bulgaria to Switzerland, Germany and Sweden to instruct the European public regarding the justice of the Bulgarian territorial ambitions. If this is the way they have fulfilled their mission in Switzerland, it will be interesting to hear what proposals they put on foot in Stockholm.

The report which has been received from Odessa to the effect that a series of massacres of Arabs has been carried out in Asia Minor by Djemal Pasha lacks confirmation at present. But unfortunately there is nothing improbable either in the story as a whole or in the details which have been received, to the effect that a number of well-known persons, among whom were members of the Arab Committee working in Paris before the war, are among the victims. If, as is feared, the massacres rival those in Armenia two years ago, both in extent and savagery, the present régime in Turkey will have provided one more argument for its elimination from the world's Empires at the peace settlement. Further news of this outbreak will be awaited with anxiety.

The news of renewed German activity in Morocco, which is sent by *The Times* Tangier correspondent, is disquieting, but scarcely surprising. Spain has not yet made her rule felt over more than one-tenth of her area in Morocco; the remaining nine-tenths offers full scope to German plotters, and we know, too, from experience that Berlin is by no means averse from compromising a neutral and officially friendly nation, should it suit her purpose to do so. That she cares no more for Spain than for Sweden is proved by the escape of the interned submarine from Cadiz, and we shall probably hear before long of the existence of a concerted system of agitation in Morocco. The legitimate economic interests of Germany there before the war were practically nil, and they have certainly not increased since 1914, but gamblers who have nothing to lose and may, therefore, have something to gain are not deterred by that consideration. It is Germany's business to stir up trouble wherever she can, on the off-chance that it may turn out to her advantage.

Mr. Montagu is to be accompanied on his visit to India by Lord Donoughmore and Mr. Charles Roberts. The former is a capable Chairman of Committees in the House of Lords; the latter, who is best known in temperance political circles, was for a short time Under-Secretary for India in the House of Commons. As a speaker he scarcely impressed the Chamber, but as Chairman of the Putumayo Committee he was a distinct success, and his firm and masterful handling of that controversy was in welcome contrast to the proceedings of the Marconi Committee, which sat in the neighbouring Committee-room during the same session. Mr. Roberts is understood to favour the advanced political school of thought in India.

The full exoneration of Sir Edward Barrow, which has been announced by the War and India Offices, will come as no surprise to the readers of THE NEAR EAST. In commenting on the Mesopotamia in our issue of June 29, we remarked that "if we were tempted to cavil with any of its findings it would be with the prominence given to General Barrow's name," and it is very satisfactory to find that after full consideration of the papers in the case the authorities have decided that there is no case to submit to the Army Council. We imagine that this verdict will be endorsed by instructed public opinion, although it will, of course, be cavilled at by those who are calling for everybody's head on a charger—unless the latter impulsive critics at large have forgotten what the case was about, as is not improbable, seeing that three months have elapsed since the report was published.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 14.

The Mecca Pilgrimage.

The final ceremony in connection with the departure of the Holy Carpet for Mecca was celebrated on Saturday last in the presence of the Prime Minister, who as usual represented the Sultan, and Lieutenant-Colonel J. K. Watson, who represented the High Commissioner. The Carpet, with its escort and the pilgrims, left Suez on Tuesday for Jedda. The number of pilgrims this year is smaller than usual. It is not known whether the King of the Hejaz will go down to Jedda to receive the Mahmal, as he did last year; but in any event its safe passage to and from Mecca has been guaranteed by him. The Egyptian Government has sent a medical mission to Jedda to superintend the sanitary arrangements.

The Restriction of the Cotton Area.

The Egyptian Government has at last come to a decision with regard to the cotton area in 1918, and a decree was issued on Sunday prohibiting cotton sowing in the basins of Upper Egypt, and restricting its cultivation in the other areas to one-third of every holding. Certain lands in the basin areas are to be exempted from the total prohibition and are to come under the limitation clause, whilst other lands which cannot grow cereals are not to be interfered with at all. Heavier penalties than usual are to be inflicted for disregard of this order, and in addition to a fine and imprisonment offenders will also have their crop pulled up. It is expected that the reduction in the area will amount to about 300,000 feddans. That is to say the cotton area will be in the neighbourhood of 1,400,000 feddans, as compared with 1,745,000 feddans this year. The reduction is not as great as in 1915 owing to the above-mentioned exceptions, which were not allowed in the first year of the war. The preamble of the decree states that this reduction has been decided upon, because it is not possible to count on any imports of flour or cereals from abroad, and the country does not in the ordinary way produce sufficient for its own needs. It is confidently hoped that the reduction in the cotton area now decided upon will result in an extra production of cereals that will meet all the requirements of the local population. The measure has been generally well received by the agricultural element, which recognises the seriousness of the situation necessitating its adoption and which, as it happens, has been somewhat reconciled to the substitution of cereals for cotton by the fall which the latter has undergone in price of late.

The Medium of Instruction in Higher Schools.

It is stated that it has been decided that instruction at the Higher School of Agriculture shall, except in one or two minor subjects, in future be given in English. This is an excellent departure; for, albeit, it may be very desirable that students should receive instruction as much as possible through the medium of their own native tongue, nevertheless, in scientific subjects and those akin to them, it is imperative that graduates shall be able to keep themselves abreast of the times after they have left their college by following the technical, professionl, and scientific records and publications made from time to time by foreign experts, who one and all write either in English or French, or whose works are translated into one of those languages.

But in order that it may be possible to give instruction in the higher colleges in English, and that the student may be able to follow the course from the start, it is essential that he shall start with a good grounding in that language. In this connection it is interesting to recall what Sir W. Brunyate wrote in his last report. Speaking of the School of Law, he said:—

The examiners and the Principal once more complain of the candidates' defective knowledge of European languages, and it has now been found necessary to establish lectures in the English language at the School itself. This is, of course, the inevitable result of the change of policy adopted some ten years ago, in pursuance of which the Arabic language is now almost exclusively used as the medium of instruction in the primary and secondary schools. If I am not mistaken, Egypt is not the only country in which the question has given rise to controversy, and the controversy is one in which I have no desire to participate. I can only record that, for the purpose of the Ministry of Justice, it is a serious disadvantage that our future magistrates should be, to a measurable extent, in less direct touch with European thought.

Considering that English is fast ousting French in official and commercial circles, and that it is becoming next to Arabic the predominant language in Egypt, it is on the face of it necessary for every Egyptian who wishes to make his way in life to have a thorough knowledge of that language, and for his studies in the secondary and primary schools to be so directed that on leaving he may be qualified to follow higher instruction equally well whether it is given in Arabic or in English. If this cannot be done in the primary schools, and it is quite possible that there are inherent difficulties in the way, there should be no such difficulty in the case of the secondary schools, and every effort should be made to turn out pupils who are capable of following lectures in English, and who do not, as has been the case of the Law School entrants, have to be given further instruction in that language, before they are able to take up satisfactorily the studies for which they are primarily attending the Higher Schools.

In regard to this very question of the linguistic medium of instruction in scientific and other kindred subjects, it is interesting to recall the experience of the American College at Beyrout. When the college was first started it was decided by the committee to give instruction in all scientific subjects, including medicine, through the medium of Arabic. A lot of expense and trouble was incurred in having books written on the various subjects and in arranging to keep them up to date. After a short while, however, it was found that science was making such rapid advances that it was quite impossible to keep track of all the new developments and theories, if Arabic were adhered to as the medium of instruction, and the committee recognising that, if they were to do their duty by their graduates, they must give them courses which embraced all the latest discoveries and theses, reluctantly decided to adopt the system of teaching all sciences, including medicine, in English. This experience of what is generally recognised as one of the most important educational institutions in the East certainly goes a long way towards strengthening the position of those who maintain that instruction in science and other kindred subjects to be of any real use must be imparted to Orientals through the medium of a European language.

THE VICTORY OF RAMADIEH.

The War Office states that Lieut.-General Sir Stanley Maude has sent the following telegram in reply to the King's message of congratulation:—

"Your Imperial Majesty's gracious message has been received by the troops concerned with loyal enthusiasm and gratitude. All ranks in Mesopotamia are imbued with confidence in the future and a firm resolve to prosecute this campaign to a successful conclusion."

THE LATE SULTAN HUSSEIN.

The news of the death of the Sultan of Egypt on October 9 has been received with genuine regret in this country by all who have followed his work in the interests of Egypt and of the British Empire during his short reign.

Hussein Kamel was the second and favourite son of Ismail Pasha. He was born in Cairo on December 20, 1853, and at the age of thirteen years was sent to Paris to complete his education. The outbreak of the Franco-German War caused him to return to Egypt, where, for the next few years, he occupied high official posts. When Ismail was deposed in 1879 Hussein Kamel accompanied him into exile, and was absent from Egypt for three years. On his return he at once developed that keen interest in the welfare of Egypt that has characterised his whole career, and devoted himself particularly to agricultural and educational matters. He became a personal friend of Lord Cromer's, and, though occupying no office, was able to make his influence felt on the strength of his recognised ability and his devotion to his country's interests. In January, 1909, he accepted the Presidency of the Legislative Council and General Assembly, but retained the post for one year only.

On the outbreak of the European War the Khedive Abbas was in Turkey. His return to Egypt was repeatedly postponed, and when Turkey entered the struggle it was evident that he had thrown in his lot with the Central Alliance. On December 18, 1914, Egypt was declared a British Protectorate, and on the following day it was announced that Abbas Hilmi had been deposed from the Khediviate, and that that high dignity had been offered, with the title of Sultan of Egypt, to his Highness Prince Hussein Kamel Pasha, and had been accepted by him.

Of the new Sultan a correspondent in these columns wrote as follows:—

"He stands for a new spirit in Egypt; a spirit which has grown apace in the last few years, but—happily—without political form. It is a pro-Egyptian spirit, which, knowing that the peculiar people of Egypt have persisted unchanged by thousands of years of foreign rule, looks to the common people, the real people of Egypt, and watches on their behalf. Not that Sultan Hussein is a democrat in the Western sense. He is very much a prince. Keen aquiline features, a great yellow moustache, and the scarlet *tarboush* thrust back on the forehead, are the first impressions which his visitor receives. He has been described as resembling a French cavalry officer in his carriage and appearance, and the comparison is not inept. By no means a typical farmer, yet agriculture and its development is his hobby, in a land where the farmer is king. Being a prince, not merely in name, he has stood aside from the intrigues which afflict public life in Egypt, and has thereby earned respect and some misunderstanding. Trained under French influence and in a French Court, his appreciation of any English work is proportional to the value of that work for Egypt, and this is all to the good for England; it will raise our standard of achievement."

In a formal statement which he gave as a message to the people of England on his accession, Sultan Hussein declared that he had accepted the Sultanate, not lightheartedly, but with a full sense of his responsibility to fulfil a sacred duty, and in the hope that he might be able to render service to his people. "I trust entirely in England," he continued, "and I hope that she trusts me. I have always dealt straightly; my past bears witness thereto. I have worked for good relations between Egypt and England." The promise of loyalty then given was faithfully observed during his brief reign, and he has passed away leaving the two countries under a deep obligation to him. He will be remembered for the conscientious fulfilment of his Royal duties, for the close interest he displayed in all matters affecting the welfare of the people of Egypt and for his open-handed generosity. To the latter his frequent contributions to war charities bore eloquent testimony.

Prince Ahmed Fuad, who becomes the second Sultan of Egypt, is the youngest son of Ismail Pasha. He was born in 1868, and was educated mainly in Italy.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, September 16, 1917.

King Alexander's Name-day.

The event of the week has been the celebration of King Alexander's name-day, which took place on Wednesday with perhaps greater show than used to be displayed for his father on similar occasions.

In the morning the King proceeded in state to the Cathedral, where he was received by the Ministers and public functionaries; there were also present the representatives of the Foreign Missions. On his Majesty's return to the Palace an official reception was held. The Chamber was decorated, and there was a good display of bunting in the town, and certain places were illuminated in the evening. The King received a very cordial reception from the large crowds who lined the streets through which he passed.

The Moral of the Nation.

In spite of these demonstrations of loyalty and the apparent satisfaction at the new order of things, it would be a delusion to suppose that the "Royalists" have been suppressed or have changed their views, nor can it be said that the disclosures of the White Book have had very much effect on the anti-Venizelists. Revelations of this nature two years ago would have had a much greater effect on the public mind, but during the past two years much has taken place to cause difference of opinion on Greece's policy. At the time of the Dardanelles campaign it may safely be asserted that the people were eager to take part, and there was great regret when the ex-King vetoed M. Venizelos's plans. The probability of a Greek military force entering Constantinople, with the possible eventuality of offering a thanksgiving in St. Sophia, was a prospect which appealed to the people's imagination and aroused their enthusiasm; but two years of political strife and a long period of idle mobilisation have produced a certain amount of demoralisation, disorganisation, and lack of enthusiasm, which cannot be put right very easily and quickly, even though Greece's greatest politician of modern times again takes the reins of power.

The prospect too of a general mobilisation later on, instead of arousing national patriotism, is rather regarded with disfavour, as there are many who are still obsessed with the opinion that Germany is not going to be beaten, though those entertaining these views maintain them more as an argument against military operations which will affect them personally, and they are probably not their real convictions.

Economic Conditions.

At the present time the economic conditions of the country, as the effect of six months' blockade, seem worse than they have ever been since the outbreak of war, and the scarcity of foodstuffs and the enormous increase in the cost of living have naturally had the effect of causing a certain amount of dissatisfaction rather than of infusing enthusiasm in the adoption of a political régime which will oblige the people to fight and once more to leave their homes and their occupations. Greece has naturally, to a certain extent, profited from the effects of the war in the same way as other countries, and much money has been made by shipowners and by anybody who had anything of utility to sell. There is an air of prosperity in some quarters, but, on the other hand, the working and industrial classes are suffering from penury. Many industries are at a standstill or are being worked on a reduced scale, owing to want of fuel and materials, and the limited tonnage which now enters the Piræus has, of course, thrown numberless people out of work. Thus the loss of occupation, in addition to the greater cost of living is not a state of things to conduce to enthusiasm.

Although the grocers' shops seem well stocked with groceries in tins, etc., yet the staple articles of one's daily diet such as flour, sugar, rice, macaroni, coffee, are scarce, and can only be obtained in limited quantities by tickets. The Government has now taken over the sale of all these articles, as well as of dried vegetables; but the scarcity of tonnage has delayed the arrival of sufficient stocks of these necessaries of life. The scarcity of rice and macaroni—two articles which so largely enter into the people's diet in these climates—is very much felt, more especially as potatoes are practically unobtainable. Green vegetables are also scarce and are expensive: and as it was found that the milk was being watered, the Minister of Provisions has forbidden any butter to be made, so that commodity is now unobtainable.

The absence of gas owing to want of coal has caused an increase in the demand for electricity; but owing to lack

Digitized by Google

of coal the production of sufficient power to meet the increased demand is not possible. Those streets which were lighted by gas are now in darkness, and the absence of gas for domestic purposes for cooking and lighting in private houses has necessitated the consumption of wood lignite or charcoal, which have all gone up in price, and the use of candles for lighting purposes.

It is hoped to effect an economy in the consumption of electricity by restricting the lighting of public places and the earlier closing of places of amusement and shops and other establishments. Measures to this end are now being adopted. During the hot summer evenings the inhabitants of Athens linger in the gardens and in the numerous open-air cinemas and theatres, but with the cooler nights there will be no hardship or inconvenience in closing all these places of entertainment before midnight. The adoption of "summer time" would have effected a further economy, but Greece has not yet followed the western countries of Europe in that respect.

Problems of Administration.

The project which will be submitted to Parliament for taking over the railways in Greece will include the Larissa railway, the Papouli-Salonika line, the Macedonian railways, which were held principally by Austrian and German capitalists, and which were seized by the Venizelos Cabinet in 1915, and the Volo-Trikalla-Larissa line.

The assistance of foreign Advisers is being obtained for various services. A British Naval Mission is again to come to Greece for the organisation of the Navy, and a French Military Mission under General Braquet, which is said to consist of eighty officers of various branches, has arrived to instruct the Greek army in the art of modern warfare, and special camps are being prepared for the purpose. A Financial Mission has also arrived under the Sub-Governor of the Bank of France, Monsieur Sergent, for the purpose of reorganising Greece's finances, and Italian officers are being engaged for the gendarmerie.

From to-day no newspaper may be sold under one penny, and must be limited in size.

THE FATE OF MONASTIR.

An issue of the *Balkan News*, which has taken a long time to reach this country, contains a vivid account of the great fire at Salonika, which fortunately spared the offices of the paper "in a region which is completely destroyed." The paper mentions the fact that on the day before the outbreak of the fire Monastir was bombarded by incendiary shells, 2,000 of them falling in six hours, so that 1,000 private houses were destroyed and the town had to be completely evacuated.

GREECE AS AN ALLY.

On Tuesday evening Dr. Burrowe lectured at King's College on "Greece as an Ally." He said it was only now, after three years of war, that Greece was formally and officially our ally, yet during the whole time the majority of her people had sympathised with the Entente, and the authorised Government of the country for long periods considered itself potentially our ally, and held that Greece was committed to enter the war on our side in certain contingencies. Dr. Burrows, after discussing the Greek White Book and speeches in the Greek Parliament in August, then detailed the story of Constantine's treachery. He read a telegram from Constantine to the Kaiser, sent in August, 1914, and stating that the former could best help the latter by not declaring war, but by maintaining friendly neutrality. He explained the position with regard to the Greco-Serbian treaty, and told the story of the treacherous surrender of Fort Rupel, and of Skouloudis's successful attempt to mislead the Greek people on that occasion. A matter which he went into at some length was that of a forged letter, represented as being by Venizelos, and hinting at the assassination of Constantine.

Now that Greece was our ally troops had been raised which, with those on the Macedonian front, would amount to 110,000 or 120,000 men. By the spring it was hoped the number would be 300,000. Difficulties were arising from the reluctance of the local Italian officials to evacuate northern Epiros and from the financial situation. In spite of three German loans, Constantine and his Governments had practically reduced Greece to bankruptcy, and Venizelos had had to make good the ravages of the Salonika fire, besides dealing with the problem of the refugees from Turkey and Bulgaria.

M. Gennadius, the Greek Minister, who presided and moved a vote of thanks, said that, with regard to the treaty with Serbia, of which Dr. Burrows had given an explanation, M. Venizelos had said that, even if there had been no treaty, it was Greece's interest and duty to go to the help of Serbia. If Greece allowed Serbia to be crushed, not only would it be an iniquitous thing, but a most fatal error in regard to Greece's own interests. The struggle that went on before Greece came in as an ally of the Entente, amounting practically to civil war, ought not to be forgotten. It was the greatest and noblest act of Venizelos that he had redeemed the honour of Greece by bringing the country to co-operate with its neighbours, allies and friends, the Serbians.

M. Jovanovitch, the Serbian Minister, who was present on the platform, added a few words in French, saying that for a hundred years Serbia and Greece had marched together, and that it was the desire of Serbia that they might do so in the present and the future.

CORRESPONDENCE.

"THE FUTURE OF THE SOUTHERN SLAVS."

TO THE EDITOR OF "THE NEAR EAST."

SIR,—I regret that I must ask for space in which to reply to the long attack in your current issue, a great part of which I consider unjustifiable.

"Hecatomb" in his first paragraph charges me (if the reference is not to me the charge is without point) with "preaching the doctrine of Balkan enmity and encouraging the peoples to go on hating one another." I deny that absolutely; it is an absolute travesty of my views, and I challenge "Hecatomb" to quote any passage in which I "preach the doctrine" of enmity. I believe that it will be a long time before Serbs and Bulgars can be friends, and so I said. I also believe, and many others with me, that it will be a long time before French and Germans are friends, but are we therefore preaching the doctrine of European enmity? I condemned the "finis Bulgariæ" attitude (p. 247), said that it would be wrong to partition the territory of Old Bulgaria (*ibid*), and urged that no "unnecessary hindrance should be placed in her way of an eventual *rapprochement*" (p. 248). Such an accord contains, of course, the eventual solution of the Balkan problem, but my judgment forbids me to see it in the near future (I should like to be wrong), or to assume its existence as a basis for certain conditions of present policy.

In his third paragraph your reviewer states that my "choice of a title proclaims [my] propagandist intentions. 'A Plea for Serbia,'" etc. Anyone reading that might suppose that "A Plea for Serbia" were the title of my book instead of a chapter heading. The title is correctly given in the footnote as "The Future of the Southern Slavs," and how anyone can read propagandist intentions into that title I cannot imagine; a more colourless title would be difficult to conceive. My abjuration of anti-Russian prejudice in an article twenty years old seems to annoy him almost as much as the supposed discovery of a new one. He is wrong in implying that I had some "very violent denunciations" to withdraw; that is his own characteristic gloss. In the same paragraph, in reference to certain quotations, he says of the authors that "we may feel confident" that they "have now very solemnly 'abjured' [why does the word so annoy him?] their anti-Serbian prejudice." As a student of Near Eastern literature he knows, or might know, that, apart altogether from proposals to gain over Bulgaria at Serbia's expense and from the Austrophil current which would seriously jeopardise Serb and Jugoslav interests, bitter attacks in terms have been made on Serbia since the war, nor have their authors ever "abjured," solemnly or otherwise. This feeling has been deplored to me by one of the best known and most able of Serb diplomatists—not stationed in England either now or in the past. "Hecatomb's" confidence is quite misplaced, as he should have been aware. His reference to the imprisonment of M. Pashitch could be countered by one to the fate of Stambulov, but *Cui bono?* as he would say, with a fine disregard of the origin and meaning of the phrase.

"Hecatomb" gives no evidence to support his attribution of anti-Italian prejudice, and he would find it difficult to do so, seeing that I took the evidence as to Dalmatia almost entirely from Italian sources, and that of set purpose. In 1911 I was taken to task by friends for espousing the Italian cause in the Tripoli affair, at a time when British opinion was largely condemnatory. As I state in my book, I believe that the interests of Italians and Southern Slavs are identical.

In his penultimate paragraph I am taken to task for my quotations from Bulgarian papers. "What would one expect but to find that 'the Bulgarian papers are full of abuse . . . ?'" "How could they write otherwise?" But we were told (surely he knew this) that the Bulgarians were friendly to England and France, that no Bulgarian Ministry could last a month that was opposed to those Powers, that the Bulgarians would never fight the Russians, that M. Geshov was phil-Ententist, etc. I expected to find some evidence of all this in the Bulgarian Press, but, when I found none, said so, and gave evidence of the fact. Was that illegitimate? Should not the alleged attitude have been reflected in the Press as cross-currents are in other countries? Would an Austrian publicist seeking evidence of English feeling with regard to Balkan affairs be wrong to quote, *e.g.*, the leading articles of THE NEAR EAST? Had I given my evidence without quotation I should rightly have been told that my story was undocumented and unsupported by evidence.

Your reviewer says that to cite Bulgarian outrages is no argument, as the Bulgarian might retort in kind. His own remark is no argument, but merely an example, granting his contention, of the fallacy that two wrongs make a right. Your readers should be suspicious of a would-be critic who preaches the doctrine that massacres in the Balkans are not to be accounted of.

In his concluding paragraph "Hecatomb" says that my main object is to give an historical sketch of Serbia and the Jugo Slav people. That is a contradiction of his previous affirmation of my "propagandist intentions" based on the alleged title of the book, and also of the actual title and the contents. The main concern of "The Future of the Southern Slavs" is the future of the Southern Slavs. I fail to see how a book of unbounded prejudice, of great bias, of incitement to racial hatred, and of propagandist intentions so gross as to call forth an appeal to the Serbian Society to save Serbia from some of her friends, "will certainly contribute to a better understanding of" anything save the manifold delinquencies of the author. "Hecatomb" should have had the courage of his convictions and damned me to the end.

Whether he is himself free from prejudice I leave your readers to judge. It is not difficult, I think, to see his affinities and the real cause of his attack. In view, then, of his violent "reaction" to my book, I feel entitled to conclude with one word—*Habet*!—I am, etc.,

Canterbury, October 9. A. H. E. TAYLOR.

TANGIER TO TEHERAN.

Needless to say, I am all for adventures, and there have been a good many from time to time connected with the Balkans. But I found my breath rather taken away by a recent suggestion that Lord Milner should become the ruler of Albania. It is put forward in a new book, "The Future of the Southern Slavs," which contains some useful information about the Southern Slavs, but pays rather close attention to Balkan polemics. As a matter of fact, before dropping this particular brick, the author took the precaution of wrapping it up, in order to deaden the sound:—"If an administrator of the calibre of, *e.g.*, Lord Milner were to be sent out for ten years," etc.; further, he contrived at the last moment to slip a piece of blotting-paper on to the spot where it was going to fall, for there is a footnote: "Written before party politicians had re-discovered him. Presumably we shall henceforth use his talents for ourselves."

***

I have been trying hard to picture to myself Lord Milner as Acting Mpret. It would be all right from Albania's point of view, and the process of having their heads metaphorically knocked together by him would be an excellent experience for cantankerous chieftains, while his perfectly reckless riding (of South African days) would have greatly impressed them. But what of Lord Milner's own point of view? After all, the failure of party politicians to re-discover him was no fault of his, that the further penalty should be imposed upon him. I am pretty sure that the author's "Hamlet" would have had to be played without the Prince, even if Great Britain had remained unmindful of the talents of the first High Commissioner of South Africa. After all, for a man who cares nothing for pride of place or pomp of power, but seeks scope for a master intellect, it is a poor compliment to suggest that he should devote the rest of his life to inculcating law and order among headstrong mountaineers.

***

The work of sweeping up the débris left by the Constantine régime in Greece is proving tragedy enough to the new Greek Government. But it has contrived to introduce the lighter vein in the order that compelled the population of Athens and the Piræus to remain indoors from sunrise to noon one day while they were counted for bread tickets. We are apt to grumble here at having to lose twenty minutes or an hour of the working day as the result of taking cover during an air-raid; but a nation that submits to being kept indoors until noon is either very docile or not very busy; perhaps, as the day chosen was a Sunday, one ought to add—not very religious.

***

Desperate diseases call for violent remedies, and in this case the disease was very, very bad. The population of the two cities is between 300,000 and 400,000, and twice the number of bread tickets had been issued under the Constantine régime. If everybody had received two, all would have been well; but the trouble was that the perjured few had divided the surplus tickets amongst themselves, and the bulk of the people obtained half rations. Government and public spirit must have been reduced to a pretty low ebb when such a state of things became possible. Individual lapses in regard to food regulations are comprehensible, but this seems to have been an official expedient to bribe the Reservists at the expense of the people as a whole.

NEAR EAST BOOKSHELF.

THE SERBIAN RETREAT.*

This little book gives, in fuller detail than we have seen elsewhere, the story of the Serbian retreat from Nish to Corfu, and presents an intensely pathetic picture of the sufferings of an exiled nation, an account of hopes raised only to be dashed again, of the expectation that the Allies would come to the rescue of the hard-pressed kingdom, the reluctant decision to quit the capital, the difficulty of accommodating the Serbian Government and the Allied Legations at Rechka, Mitrovitsa, Prisrend, and the progressively increasing hardships as the company reached the borders of Albania. At one time there was a disposition to blame the Allies—we need not wonder at that when one remembers the outburst of indignation in England at Sir Edward Grey's unfulfilled pledge to Serbia—at another time came uncertainty as to the next step. The Government would lose touch with its own forces. It was undecided which route to follow. It had to burn more and more of its records to lighten its load; the Legations could not always burn their official impedimenta, and seals and similar incumbrances were thrown into the rivers. Then, finally, that nothing should be lacking of tragedy, after the knowledge that the Serbian army could no longer find a footing on Serbian soil, came the news that Montenegro had also suffered disaster. To this distressing accompaniment, which must have seemed the final ruin of the Slav cause in the Balkans, marched the Serbians through Podgoritsa and Scutari to the sea; on their road, in that bitter winter, they passed the corpses of men and of animals, mute testimonies to the horrors of the war. Even then their troubles were not yet over, for the King and his Prime Minister found telegraphic communication with Italy interrupted, and the transport of the Serbian army across the Adriatic seemed for the moment a hopeless enterprise.

After this pitiable experience one need not have wondered if the heart of the Serbian people had been broken and their courage gone. Obviously the Germans calculated that such would be the case; probably they did not recognise their mistake until the Serbians re-entered Monastir eighteen months later. But when the German Emperor made his bombastic speech in Nish in the autumn of 1915 he thought he had finished with that enemy for good.

The recovery of Serbia, however, is no part of this book; it begins at Nish and ends at Corfu. But the story of that retreat and exile, which the author rightly calls a Serbian Odyssey, will never be forgotten. It is a theme worthy of a great poet, but it is perhaps not less impressive in the studiously unadorned narrative of M. Boppe, who was not merely an eyewitness of, but a participant in, the journey.

THE FATE OF EUROPE.†

"Mr. Dick sets us all right," remarked Miss Betsy Trotwood one day, when Janet had been chasing donkeys off the green. Mr. Ellis Barker accepts a similar excellent position in these days. Some few people in England have grumbled at heavy taxation, and foretold our ruin; Mr. Barker boldly insists that it is our salvation, like the nail in the pilgrim's boot. Man, he declares, is a lazy animal, who will only work hard when he is compelled. Low taxation means that he has plenty of money for himself, high taxation that he has little. The only way to get more is to work harder, and in the long run men would rather work harder than go without their accustomed luxuries; therefore we shall all work harder, and the nation will flourish in consequence. It is undoubtedly true. But it also gives the ordinary man, who, *ex hypothesi*, is a lazy person, a rather uncomfortable feeling. One recognises instinctively that Mr. Barker would be a terrible schoolmaster.

The bulk of this book, which bears traces of a great deal of research, has appeared month by month in the *Nineteenth Century*, and the author has done well to rescue it from the fate of most monthly journalism. Time has, on the whole, dealt rather kindly with him in these breathless days. If the Polish question has advanced a good many stages since he wrote, he can claim in compensation that Mr. Lloyd George has followed out his recommendations in reconstructing the British Government. Mr. Booker's weak point is on the side of social reconstruction; but Mr. Barker's real aim, we take it, in this book is to discuss foreign policy. At any rate, that will be its main interest for readers of THE NEAR EAST.

On these matters the author is clear and explicit, and supports his conclusions by an abundance—perhaps almost a superabundance—of historical evidence. Unfortunately he does not deal with the Balkans in detail, only glancing at them in chapters on Constantinople and Austria. He enters more at large into the future of Asia Minor. Here he would like to see England in general control; but France, in his opinion, should have Syria and Cilicia, Greece Smyrna and the hinterland, Italy Adalia, while Russia takes charge of Armenia. It should, of course, be predicated that in discussing the future both of Asia Minor and of Constantinople Mr. Barker wrote before the Russian revolution, and the new Russia's decision, probably only temporary, to throw away ambition, has made some of these pages read rather curiously. But Mr. Barker would probably answer that, unless Russia breaks up altogether, whatever school of thought rules at Petrograd must in the long run come back to these ambitions, dictated as they are by economics and geography; and we should accept the answer—always provided that the time had not gone by for Russia to take the opportunity. There is such a thing as a nation that misses the tide.

Further east, Mr. Barker is quite clear that it is Britain's duty to take Mesopotamia, and hold it. His reasoning is here extremely trenchant. We have already an interest in the country, apart from the interest of present possession; plans were laid for its irrigation by British engineers some few years before the war, and there is no doubt whatever that irrigation would pay, for the soil is as fertile as ever, and twenty years would again make the country a second and a greater Egypt. Moreover, it would furnish an outlet for Indian labour and energy; for that reason alone (which also applies to German East Africa) Mr. Barker advises its retention. He holds that there would be little or no direct profit to the Empire in retaining these possessions—a point on which there may be two opinions, in view of the continually increasing demand for raw materials from the tropics; but Mr. Barker is obviously right in holding that these countries should not be handed back to Germany or Turkey.

It will be seen from these conclusions that the author is entirely against any peace by negotiation, whether *viâ* Scandinavia or Rome; he looks for a clean-cut victory, and he is not afraid of the cost. Indeed, he looks on the cost almost as a doctor's tonic which, although unpleasant to take, has a revivifying effect on the patient. The latter, as he points out, does not produce as much as the American per head: "it follows" (from statistics of production cited) "that Great Britain can treble her yearly output, her yearly income, and her national wealth by Americanising her industries. The Americanisation of British industries has already begun. In the course of the war production per man has approximately doubled. It can once more be doubled, and more than doubled, to the great benefit of the workers and of the nation as a whole."

Mr. Barker does not conciliate the reader by his style, which is as devoid of grace as a punt-pole. But, like a punt-pole, it usually gets to the bottom!

Princess Ghica of Roumania has left London for Paris.

M. Take Jonescu, the Roumanian statesman, has arrived at Odessa.

To-day is also the birthday of Princess Elisabeth of Roumania.

The Persian Minister visited Mr. Balfour at the Foreign Office on October 5.

Sir Valentine Chirol has returned to England after a prolonged stay in India.

The Sultan of Turkey is reported to have arrived in Adrianople, en route for Sofia.

M. Kolovitch, Secretary to the Serbian Legation in Petrograd, has arrived in London from Paris.

Lord Granville, the new British Minister to Greece, and Lady Granville arrived in Athens on October 8.

A Vienna telegram states that the Austrian Emperor has received in audience Abbas Hilmi, the ex-Khedive of Egypt.

The School of Slavonic Studies at King's College has arranged various interesting lectures relating to Poland and other Slav problems.

Commander Locker-Lampson, M.P., who was in command of the British Armoured Car Unit in Russia, arrived in England on October 9.

M. Victor Antonescu, the newly-appointed Roumanian Minister to Paris, has left town for the French capital to take up his diplomatic duties.

Lieut.-Colonel Boyd Francis Alexander, Rifle Brigade, a Mutiny veteran, who died on August 19, left unsettled estate of the value of £74,378.

Messages received from Athens at the beginning of the week stated that M. Venizelos was slightly indisposed, and had gone into the country for a few days.

To-day is the anniversary of the birthday of Princess Natalie of Montenegro. She was born at Trieste in 1882, and married Prince Mirko at Cettigne in 1902.

King Alexander of Greece has conferred the Order of the Saviour on a number of French officers of all ranks, and on French Consuls and Vice-Consuls.

It is understood, says *The Times*, that the successor of General Sir Archibald Hunter in the Aldershot command is Lieut.-General Sir Archibald Murray, lately in command in Egypt.

TRAGEDY OF MONTENEGRO,

THE SMALLEST AND POOREST OF OUR ALLIES.

MONTENEGRIN RED CROSS AND RELIEF FUND,

11, VICTORIA STREET, LONDON, S.W.1

(Registered in City of London. Section 1. War Charities 1916)

needs £700 WEEKLY for Feeding Prisoners interned in Austria-Hungary.

Donations will be much appreciated and gratefully acknowledged by the Hon. Treasurer, LADY ROPER PARKINGTON, Claridge's Hotel, Brook Street, London, W.1.

Dr. Anghelescu, the newly-appointed Roumanian Minister to Washington, and M. Coanda and M. Trifonescu, members of the Roumanian Parliament, arrived in London on October 8 from Roumania.

The Serbian Cabinet has finally decided to transfer itself to Salonika, and the diplomatic representatives of the Entente, who are at present in Corfu, will in due course join the Serbian Government there.

It is reported that "hunger typhus" and tuberculosis are rife among the Montenegrins interned in Austrian and Hungarian prison camps as the result of want and exposure, and that numbers of men and women are dying.

Colonel Phillott, late Indian Army, has arrived in Cairo, and has assumed, on behalf of Bishop MacInnes, the duties of General Director of the Syria and Palestine Relief Fund. His office, kindly lent by Mr. Davies Bryan, is on the first floor in St. David's Buildings, Cairo.

A marriage is arranged between William Henry, eldest son of Mr. and Mrs. J. W. Smith, Gibraltar, and Villa Vieja, Algeciras, and Mary Claire, second daughter of Mr. and Mrs. Alfred Darley, Carysfort, Blackrock, Dublin, and Kippure, County Wicklow.

Sir Maurice Fitzmaurice, C.M.G., has been appointed by the Lord President to fill the vacancy on the Advisory Council of the Committee of the Privy Council for Scientific and Industrial Research caused by the retirement, by rotation, of Mr. W. Duddell, C.B.E., F.R.S.

A Bosnian regiment, with its officers and arms, is reported to have deserted bodily from the Austrian ranks, passing over to the Roumanian lines at Ocna. The men said their example would be followed at every opportunity by all the Czechs and Southern Slavs of the Austrian Army.

Among the bequests of Mrs. Sarah Elizabeth Phillips, of Southwick, Sussex, who died on September 10, leaving estate of the gross value of £7,433, was a diamond and gold snuffbox, presented to her husband by the Sultan Abdul Aziz, which she left to her son to be preserved as an heirloom.

Both Serbia and Montenegro have sent delegates to the meetings of the Permanent Committee of the Allied Pensions Committee, the first of which was held in London on October 9. Serbia is represented by M. Agathonvitch and Colonel Soubotitch, and M. Marculio represents Montenegro.

The ninth Earl of Elgin, of Broomhall, Dunfermline, who was Viceroy of India 1894-9, and Secretary of State for the Colonies 1905-8, who died on January 18 last, left personal estate of the value of £232,294. The executors are the present Earl of Elgin and Major the Hon. Robert Bruce (sons), and Sir Henry Babington Smith, K.C.B.

Mr. E. S. Montagu, Secretary of State for India, has invited the Earl of Donoughmore, K.P., Chairman of Committees of the House of Lords, and Mr. Charles Roberts, M.P., to accompany him to India, and they have accepted his invitation. During Mr. Montagu's absence Lord Islington will represent him in Parliament and in the Ministry.

Reuter's Zurich correspondent announces that a Vienna telegram to the *Münchener Neueste Nachrichten* states that the Emperor Charles and the Kaiser will shortly proceed to Sofia, where the Sultan of Turkey is also going. A conference of the Monarchs of the Quadruple Alliance, to which, in view of present circumstances, great importance is attached, will be held.

General Jancovescu, Roumanian Minister of War, who has arrived at the Russian Headquarters, expressed the hope that, owing to the infection of the Russian troops on the Roumanian front with Maximalist ideas, von Mackensen's proposed offensive will not be carried out, although, he added, "the Roumanian troops are well prepared to offer a stout resistance."

M. Lambros, the Greek ex-Prime Minister, was brought before the Parliamentary Commission on Thursday, October 4, and put in a written statement to the effect that, in accordance with his legal rights, he reserved his defence, and declined to make any other reply to the charge against him. His defence would be made before the High Court. After signing this refusal he was liberated.

According to information from the Caucasus front (says *The Times* correspondent at Odessa), a series of massacres of Arabs has been carried out in Asia Minor by Djemal Pasha. Among the victims are a number of well-educated persons, members of the Arab Committee working in Paris before the war, and regarded as national leaders. Many of these were invited to return to Turkey during the war and entrusted with various duties, but they have now been arrested and hanged. The massacres are stated to rival the Armenian horrors, both in extent and savagery.

Digitized by Google

The marriage took place very quietly on Wednesday of Commander Francis C. Vaughan, R.N., third son of the late Cedric Vaughan, of Millom, Cumberland, and Miss Morna Rawlins, M.B., B.S.Lond., only daughter of Mr. Thomas Rawlins, late of the Indian Civil Service, and Mrs. Rawlins, 27, Barkston Gardens. Only the nearest relatives were present, owing to the recent death in action of the bridegroom's youngest brother.

APPOINTMENTS, PROMOTIONS, ETC.

Bimbashi J. H. R. Yardley, D.S.O., Sudan Army, has been transferred to the Equatorial Battalion.

Captain C. A. M. van Millingen, the Rifle Brigade, elder son of the late Professor van Millingen, has been awarded the Military Cross.

Captain N. B. Hunter, Highland Light Infantry, has been attached to the Egyptian Army as a Special Service Officer, and granted the temporary rank of Bimbashi.

Kaimakams A. G. Rainsford-Hannay Bey, D.S.O., Acting Director, Military Works Department, and E. D. F. Gee Bey, Artillery, have been struck off the strength of the Egyptian Army.

OBITUARY.

Mr. John Bowring Spence, British Consul-General at Tripoli, died there on September 26 after a severe illness. He was born in 1861, educated at Dulwich College, and held consular appointments at Leghorn, Madrid, Madeira, and Trieste.

Major William Guy Harington, D.S.O., Indian Army, who died on September 28 of wounds received in action, was the eldest son of Lieutenant-Colonel H. N. V. Harington, I.M.S., retired. He passed out of Woolwich into the Royal Artillery in 1904, and transferred to the Indian Army four years later. During the present war he had been awarded the D.S.O.

Major Sidney Miles Toppin, M.C., Royal Garrison Artillery, who was killed in action on September 27, was the only surviving son of Major-General and Mrs. Toppin, of Westminster Cottage, Branksome Park, Bournemouth. He entered the Royal Artillery in 1900, and in 1912, when he secured his captaincy, he was seconded for service with the Egyptian Army. He had gained the Military Cross in the present war.

Captain Henry Deedes Nutt Mackenzie, M.D., R.A.M.C., attached R.F.A., who was killed on October 4, had been employed by the Governments of both India and Egypt as a special plague medical officer. Soon after the outbreak of war Captain Mackenzie offered his services to the Serbian Government, and was the first British doctor to join the Serbian Army. After some months' service he returned to England suffering from a severe attack of typhus fever. During the summer of 1915 he worked in France under the French Red Cross, but in October he was given a commission in the Royal Army Medical Corps.

The death occurred on September 30, at Chagford, Devon, of Colonel Arthur Nicholls, late commanding 55th Coke's Rifles. Colonel Nicholls saw service in the Egyptian Expedition of 1882, being awarded the Bronze Star; in the Zhob Valley Expedition of 1890, and in the first and second Miranzi Expeditions, for which he received the medal with clasp. In the Tirah campaign of 1897-8 he was present at the capture of the Sampagha and Arhanga Passes, at the action of Saran Sar, and the operations in the Bazar Valley, being mentioned in despatches and receiving the medal with two clasps. Colonel Nicholls also took part in the operations in the Mohmand country in 1908, and obtained the medal with clasp.

Dr. Charles Wells, the well-known Oriental scholar, died at his residence in Carlton Terrace, Portslade, Brighton, on October 4, aged 79 years. For a quarter of a century he acted as Oriental translator to the Foreign Office, in which post he succeeded Sir James Redhouse. Dr. Wells, who was born in London, and educated at King's College, where he was Turkish Prizeman in 1860, acted as special correspondent in the Schleswig-Holstein War of 1864, and was Professor of English at the Imperial Naval College, Constantinople, from 1870 to 1874. Subsequently he was private secretary to General Kemball on the Turco-Persian Frontier Commission and in the Turco-Serbian War of 1876. Dr. Wells was the author of many publications, including an essay on political economy in Turkish, a practical grammar of the Turkish language, and a revised and enlarged edition of Redhouse's Turkish dictionary.

If you are willing to help

FRIDAY, OCTOBER 12, 1917.

THE BATTLE OF RAMADIEH.

The resumption of operations in Mesopotamia would seem to have taken the British public almost as much by surprise as it did Ahmed Bey, the Turkish Commander at Ramadieh. Baghdad is such a conspicuous landmark in this part of the world that after its occupation, when General Maude's victorious troops become immobilised by the summer heat, there was a tendency to forget that the city was not in itself the goal of the campaign. It was, indeed, characteristic of the diffident manner in which successes are regarded in Great Britain that the country was far more concerned for the safety of the Expedition than with the actual significance of its achievements. Expectation in regard to Mesopotamia centred in the possibility of a Turkish attack, for the public was more prepared to accept von Falkenhayn at the value put upon him by German report than to credit General Maude with any special military aptitude. The duel between the two is not yet at an end, and we do not propose at this moment to institute a comparison between them on insufficient data. What is established is that General Maude has got his blow in first, and has scored a very considerable advantage in the first round. The success at Ramadieh was complete and decisive. The Turks were taken unawares—in itself a striking exploit, inasmuch as they were fighting on their own ground, and Ahmed Bey's sole task was to keep watch on the British troops—and the whole force, numbering about 4,000, was accounted for in killed or prisoners. As was natural, little had been heard of the measures taken to strengthen General Maude's position; but nothing is better calculated to hearten both the Mesopotamia Army and the home public in regard to the future than the thoroughness with which this preliminary piece of work has been carried out. It was by no means desirable that the impression should gain currency either in enemy or in British circles that Baghdad was the goal of the Expedition. Primarily, Great Britain is fighting the Turks to defeat them and through them the Central Powers; but in Mesopotamia she is under the obligation of freeing the Arabs from the Turkish yoke, and to achieve this end the enemy must be driven out of a much larger tract of country than that which the Expedition now holds. A variety of circumstances have helped to retard General Maude's progress, and sooner or later a point will be reached beyond which it will not be advisable for him to advance. There are, however, certain well-defined objectives which he may be supposed to have in view, and these, we may be sure, lie beyond Ramadieh on the Euphrates and Samarra on the Tigris.

If the capture of Ramadieh, as an indication that British plans in Mesopotamia have been conceived at last on an adequate scale, has an importance for Great Britain beyond the actual limits of the military enterprise, it will be found to have no less a significance for the enemy. Viewed by itself as an episode in Armageddon, the incident may seem unimportant. It has occurred in almost the most distant theatre of war, and entails a loss to German-Turkish arms of less than five thousand men. On the fortunes of the struggle in Europe it can be said to have no direct influence, as it does not deprive either the eastern or the western front of a single man. The burden of German consolation for the Turks will run on these or similar lines; but it will not be a matter for wonder if the latter regard the subject in a different light. In one sense of the term Turkey entered the war because she could not help it. Her rulers, however, while carrying out German orders in return for German gold, were given certain definite assurances, the fulfilment of which was ultimately to justify their action. The Turkish Empire, and not only the members of the Committee of Union and Progress, was meant to benefit by the war. There can be little doubt that compensation for Turkish efforts was to be found in Egypt and Mesopotamia. But it is precisely in these directions that Turkey's undoing is gradually being consummated. In both she has yielded ground; in the latter very considerably. For a time, we may imagine, the Germans have been able to explain away the various *contretemps*, and they will have been lavish with their promises of what can yet be done, if Turkey submits further to German domination and puts forth a greater effort. The loan of Marshal von Falkenhayn proves that Germany's arts of persuasion had to be supported with tangible evidence of her sincerity. If this great soldier is unable to make good, there will be a very strong inclination to revise the Turkish estimate of Germany's power and of her chances of victory in the war. To the enemy, therefore, the reverse at Ramadieh will seem a challenge to the belief in von Falkenhayn's star, and unless it is promptly answered by the German Field-Marshal there is likely to be a still further straining of the relations between the Turks and their masters. Herein, perhaps, lies the chief significance of General Maude's success. After three years of war the Turks must have found occasion to modify their opinion of German efficiency; it has accomplished marvels, but it has failed to substantiate its claims and has to admit defeat. A few crushing blows at this time ought to complete Turkey's disillusionment.

What is wanted in the East is something in the nature of the repeated sledge-hammer blows that Sir Douglas Haig is administering on the Western front. It is not in the power of Sir Stanley Maude to carry out such a programme single-handed, and once more the paralysing effect of the Russian revolution causes the Allied arm, raised ready to strike, to fall and hang limply. The news of activity in Armenia showed that the Russians realised what was expected of them and were anxious to co-operate to the best of their power. But the chaos at the centre prevents sustained military effort in any Russian theatre, and General Maude cannot count on just that assistance which would threaten the enemy's line of communication and facilitate the British advance on Mosul. On the contrary, the uncertainty of the position on his right flank, which the Russians seem no longer able to protect, is probably the chief, if not the only, obstacle to the prosecution of the campaign on a scale calculated to bring about within a reasonable time a decisive result in the Middle East. There remains, however, one way of making up to General Maude what he lacks owing to the inability of the Russians to assist him, and that is by diverting the attention of the Turks in another direction. Practically six months have passed since the Egyptian Expeditionary Force came to a standstill at the Wadi-el-Ghuzzeh. Throughout this period it has been known that no reliance could be placed on a Russian offensive, and that consequently Great Britain must carry on her own shoulders practically the whole of the campaign against Turkey. In these circumstances it would be almost incredible that the British military authorities should have failed to make provision for this task as well as for the others which have fallen to them. The difficulties in the way of an advance from Sinai into Palestine are great, and the distance of this front from the Mesopotamian operations precludes success in one quarter from reacting immediately on the other. The Turks' lines of

communications to both fronts, however, converge in the north of Syria, and it is in that region that Turkey is most vulnerable. A successful advance from Gaza must embarrass Marshal von Falkenhayn's movements in Mesopotamia, because when once it were launched there might be difficulty in arresting it. But the soundest strategy on the British part must be to strike where a single blow can be felt in two directions. Disappointment at the inactivity on the Gaza front will be justified only if it is found that the force has been marking time aimlessly. If on the other hand there has been a new orientation of Great Britain's task in Western Asia as a result of the virtual elimination of the Russian forces in Armenia, the six months' comparative quiescence need not be grudged. A few weeks now should suffice to clear up a matter which has much exercised the public mind.

THE SULTAN OF EGYPT.

It is with sincere regret that the British Empire has learned of the death of Sultan Hussein. He has occupied the throne of Egypt for less than three years; but in that short time he has proved himself a wise, successful, and generous ruler. His name will always be associated with a definite milestone in Egypt's long history. As a Prince he had been conspicuous as a keen and practical patriot, and, whether in office or out of office, had devoted himself to promoting the welfare of his country. The future of Egypt, he realised, turned on the promotion of agriculture and the spread of education. To both subjects he paid special attention, and his disinterestedness won for him a wide reputation as a friend of the fellaheen. He was essentially an Egyptian first and foremost; his education and upbringing were calculated to make him French in his sympathies. That he should have thrown in his lot with the British must be attributed to a settled conviction that in this direction only lay the salvation of his country. He risked much, however, in associating himself with the declaration of a British Protectorate, and in accepting the invitation of the British Government to become Sultan. The preceding years had witnessed an extension of the nationalist movement, and articulate opinion in Egypt had come to contemplate a slackening of the ties with Great Britain rather than a more definite linking up of the two countries. Moreover, the disposition of the Khedive could not fail to arouse misgivings, which became more pronounced when the Sultan of Turkey refused to recognise the new order in Egypt, and proclaimed its ruler an outlaw of Islam. In ascending the throne, therefore, as the nominee of Great Britain, Sultan Hussein inevitably forfeited much of his previous popularity. It is safe to say, however, that before he died he had won it all back again, and had added to his reputation among his own people. His unassuming manner and his unstinted devotion to Egypt's interests did much to disarm criticism and to commend him to the affections of all patriotic Egyptians. The exigencies of the war have caused the country in some respects to mark time during his reign, and politically an anomalous position has prevailed. But the prosperity of the people has been maintained, and Sultan Hussein has set a valuable example of the way in which the most Egyptian of Egyptians can combine love for his own country and the practical application of democratic principles in statecraft with absolute loyalty to the British connection.

He is succeeded by his youngest brother, Prince Ahmed Fuad, whose inclinations and past services justify the belief that the splendid tradition begun by Sultan Hussein will be continued, in the interests of Egypt and of the Egyptians.

THE SUPREME OBSTACLE IN THE BALKANS.

(From a Correspondent.)

There is one question which almost every Englishman has asked some time or another about our army at Salonika, and that is, "*Why does so little happen there?*" The answer to that question can be compressed into one word, "Terrain." In fact, if the average man were to take a good map of Macedonia—the Austrian 1:200,000 map, for instance—and study it for half an hour, keeping always in mind what the requirements of a modern army in the way of transport are, he would be able to answer his own question for himself. For he would then realise that the problem before us in the Balkans is that of waging an offensive campaign with all the elaborate machinery of present-day warfare in a country so uncivilised, so broken, so mountainous and so deprived of roads, that it would have been considered a difficult area of operations even in the Napoleonic days, when an infantryman could carry all the ammunition he required for a day's fighting in a couple of pouches strapped to his belt, when the heaviest field artillery in use could be dragged by a team of six horses, and when all our modern bulky and ponderous supplies of shells and entrenching-material and field-telegraphs and hospital-stores were entirely unknown. But in the matter of transport an army of these days differs from one of the Napoleonic epoch just as much as a family undertaking a household removal differs from a family going to the seaside for a holiday. And, as for a removal, so for a modern campaign, if the distance to be covered is anything more than a very short one, a railway or at least a road capable of bearing heavy motor traffic is absolutely essential.

Now it is just there that the great impediment to our arms in the Balkans lies. For the purposes of a modern campaign Macedonia is a desert, almost entirely devoid of the means of communication required by a force in the field. Look at the front that our Salonika army holds. It stretches in a south-easterly curve from the Vardar to the Gulf of Orfano—a line about 90 miles in length, and at an average distance of 50 miles from the base at Salonika. Every part of that front has to be supplied with food and ammunition and stores, yet the facilities of transport for this purpose that were in existence when we arrived in the country consisted only of two single lines of railway running to the extreme left wing of our front and one solitary and extremely hilly road connecting Salonika with the middle of it. Obviously it would be impossible to supply an army dispersed over so vast an area with no more routes available for the purpose than that. So one of the principal tasks that has occupied the energies of the British in the Balkans up to now has been the essential one of making new means of communication. Roads and bridges and light railways have had to be built in all directions as an absolutely indispensable preliminary before the idea of an advance could even be contemplated.

It must further be borne in mind that in the Balkans this labour of preparation has been even more arduous than on other fronts where we have armies fighting in the wilderness. It is a hard enough task to lay a railway across the Egyptian desert, but it would be an infinitely greater undertaking to cut and tunnel a line through that irregular welter of steep hills across which the Seres Road twists and climbs in constant and confusing gradients in the course of the fifty miles that separate Salonika from the Struma. Thanks, however, to much painstaking work of a kind that cannot be

recorded in a military *communiqué*, our army in the Balkans has at length been well established on its present line, with communications from base to front that are adequate for the supply of its needs, not only under the comparatively passive conditions that prevail at present, but also in the event of an enemy attack upon us in Macedonia.

To this extent, then, the difficulties of terrain as regards transport in the Balkans have been overcome. But how does the same obstacle continue to affect the possibility of a future advance on our part? Regarding this it must be admitted that the conditions ahead of us are even more difficult than those with which we have had to cope hitherto. The two great obstacles to the movements of troops in the Balkans are mountains and mud. Both of them enter largely into the problem of the future possibilities of a forward movement in Macedonia. The marshes of the Struma valley make a permanent No Man's Land of certain sectors of our front, but even where such immediate hindrances to an offensive do not exist, there stands over against us along the whole of our line a practically unbroken chain of mountains, on the foothills and southern slopes of which the Bulgar positions lie. Take your stand on a height like the Gola Ridge at the angle of our front at Doiran Lake, and you will have before you, running like a continuous black wall that blocks the horizon to the north, the formidable Belashitza Range, steep and sheer, which is crowned until well on into the spring with snow. Right away to the west behind Lake Doiran stretches this Alpine chain, and only loses itself there among another complicated system of mountains equally rugged and pathless, their sides covered with impassable scrub and loose rocks and split into countless deep ravines, which fills the central part of Macedonia. Turn your eyes eastwards, and beyond the mouth of the Rupel Pass down which the Struma flows into the broad valley where our entrenched positions are, you behold a prospect equally discouraging—irregular hills, rising here and there to a mountain peak, crossed by no road and threaded by no continuous valley. In the whole of that long rampart that confronts our entrenched line there are but two gaps. One of them is the Vardar valley, the other is the Rupel Pass. Both these breaks in the wall are narrow gorges affording the enemy every advantage for their defence, and the Pass of Rupel is made still more formidable by the existence of the famous fort that protects its entrance, which in turn has been rendered yet stronger by the outworks of fortified villages which the Bulgars hold in front of it.

Nor are conditions more favourable for an Allied advance to the west of the Vardar, where the French, Serbs, Russians, Italians and Greeks are holding the line. It is mountains, mountains all the way, until you come to Monastir, where, if we could win the strong hill positions immediately north of the town to which the enemy has hung on obstinately ever since Monastir was retaken by the Allies nearly a year ago, we should have the flat Prilep plain ahead of us. But the Prilep plain only leads to the Babouna Pass, one of the most difficult defiles in the whole of the Balkans, twisting in steep zigzags through a complex of precipitous slopes. In addition to obstructing the path of an Allied forward movement against Bulgaria, the positions which the enemy everywhere holds against us upon these hills are extremely strong from the nature of the ground. Ridge succeeds ridge with baffling monotony, and when ground has been won little by little for weeks on end, as was the case with the Serbians in the loop of the Cerna River last autumn, it is only to find the Bulgar still established at the last in a strong situation presenting exactly the same difficulties of attack as did the very first from which he was ejected.

But however successful our Balkan army is in driving the Bulgars from the line on which they are established, their victory remains an empty one unless it can be followed up. That is why transport is the dominant feature of the Balkan campaign, where the terrain presents such unusual difficulty for movement. The only kind of locomotion, in fact, suitable for the Balkans is either ox-wagons or donkeys, and the requirements of modern armies are so vast that these primitive and traditional freight-methods are entirely inadequate.

This, then, is the explanation of the fact that for nearly two years now both the enemy and ourselves have maintained large armies in Macedonia which have been impotent to make any real impression the one on the other. In the first place, the nature of the ground is such that we have not been able so far to force the line which the Bulgars hold, and, in the second place, if we could force it, the same difficulty of terrain would very seriously hamper us in following up any success that might be won.

THE CONDITION OF PALESTINE.

At the annual meeting of the Jerusalem and the East Mission, held on October 9 at the Church House, Westminster, Lieut.-Colonel Sir Henry McMahon gave some account of the present condition of the population of Palestine. He said that all knew of the sufferings of the Armenians, how the Turks, with the connivance of their German supporters, had effected the almost total extermination of a large portion of the people by measures of incredible brutality and barbarism. Many had heard how the Turks had made every effort to exterminate the brave people of the Lebanon. Further south, in Syria and Palestine, there was no actual evidence of a deliberate policy to exterminate, but natural causes arising from the peculiar primitive and barbarous methods of the Turkish Government had caused sufferings to the people which were little less than those which would result from a deliberate policy of extermination. Since the commencement of the war the country had become the highway of an army intended originally to invade Egypt, but now driven to defend its own country.

The youth and manhood of Syria and Palestine, he continued, had been impressed and deported for military service or labour, the food, and even most of the clothing, of the inhabitants had been requisitioned for the use of the troops, and, to aggravate the sufferings and still further impede the subsequent development of the people, agricultural implements and pumping engines had also been requisitioned for the sake of the metal they contained. Olive and fruit trees, which had already been ravaged by the locust visitation of 1915, had been cut down in increasing quantities to supply fuel to the railways. Starvation had brought disease, and the mortality from typhus and other scourges was appalling. This description of the condition of the people applied to all, Moslem, Jew and Christian alike; but the unfortunate Arab inhabitants of the country had suffered even worse than the rest, because the Turks had retaliated upon them for the revolt of the Arabs of the Hejaz and elsewhere. The most recent corroboration of these dark reports as to the condition of the people had been brought by the officials of American missions who had lately returned from Palestine. With the coming away of these Americans had departed all hope of getting relief into the country. But every effort must be made so that directly the British troops had opened the road succour might be taken to the afflicted people.

The Bishop of London said that it must be to everyone who was not actually asleep a matter of burning interest as to what was going to happen to Jerusalem. No one could contemplate lightly the tremendous meaning of the entry of the British Army into the Holy Land. So far as his voice was concerned, the war would not be stopped, if Palestine was going to remain in the hands of the Turks. The Bishop, making a strong appeal on behalf of the Relief Fund for the East, said that the apathy of the people at home in this respect should surely be dispelled by the knowledge that the Sultan had contributed one thousand guineas towards the building of the Memorial Cathedral in Cairo. The people in the East did not believe an Englishman ever prayed, because he displayed none of the outward signs or symbols of his faith, but when they saw the great Cathedral reared up they would believe that Englishmen really had a God.

KING GEORGE'S MESSAGE TO GREECE.

Reuter's Athens correspondent, in a message dated October 5, says:—Mr. Crackanthorpe, First Secretary of the British Legation here, was received by the King this morning, when he handed to his Majesty an autograph letter from King George replying to King Alexander's letter announcing his advent to the Throne. The text of King George's letter is as follows:—

"Sir, My Brother, and Dear Cousin,—I have received from the hands of M. Jean Gennadius the letter which your Majesty addressed to me on the 6th day of July last, informing me of your accession to the Throne of Greece. It gives me much pleasure to note your Majesty's assurances of your earnest desire to strengthen the bonds of friendship and alliance which unite our two Crowns, and I would have your Majesty believe that nothing shall be wanting on my part which may tend to promote the prosperity and welfare of the people united under your Majesty's sceptre. In offering to your Majesty my cordial good wishes for your health and happiness and for the prosperity of your reign, I avail myself of this opportunity to assure your Majesty of the invariable friendship and highest esteem with which I am, Sir, my brother, and dear cousin, your Majesty's affectionate brother and cousin.—George R.I."

THE PRESS ON THE NEAR EAST

Persia and the War.

Under the heading of "Travel Memories," Lieut.-Col. A. C. Yate describes in the *Scottish Geographical Magazine* a journey in the Middle East, undertaken more than twenty-five years ago. But the narrative lapses at times into the consideration of contemporary conditions, and in the following passage the writer refers to the position in Persia to-day:—

In her wide experience of the vicissitudes of fortune, in love, war, and all other crises of existence, from the days of the absolute monarchy of the Great Cyrus to those of the constitutional government of Ahmed Mirza, the youthful Shah of to-day, Persia is second to no nation. Tartar, Arab, Turk, Afghan, Briton, French, and Russian have all moulded her destinies. Finally comes the Teuton, thinking to make her the instrument of his vast ambitions, which aim at nothing less than an empire extending from the mouths of the Elbe and Scheldt to that of the Yangtsekiang. Is Persia, having escaped from the embraces of the Bear, to fall into the clutches of the Eagle, while the Lion looks on? As matters stand at this moment, that is not likely. It is the Lion that will, in all probability, secure, as far as possible, the independence and prosperity to the land of the Lion and the Sun. Intelligence which, at the end of August, had filtered through Russia, stated that the Russian forces, based upon Hamadan, were still holding their own near the Lake of Zeribar, which is situated about eight miles to the south-west of Penjvin and some seventy miles east by north of Sinna. In the interests of the maintenance of peace in Persia, and as a support to Sir Stanley Maude, who may at any time be called upon to face German, Austrian, and Turkish troops under the command of General von Falkenhayn, and whose defeat would probably be the signal for a renewal of anarchy in Persia, we cannot but welcome the news that General Baratoff and his detachment are still to the fore. We may further presume from this that Kasr-i-shirin and Khanikin, important posts on the Turco-Persian frontier not far from the Diyala river, and due east of General Maude's position near Samara, are still held by the Russians. Many of us, with anxious eyes turned towards Mesopotamia, and some remembering those who have found their last resting-place at or near Kut-el-Amara and under or near the great arch of Ctesiphon, cannot but have read with keen feelings the story in *Blackwood* for August of "The Battle Beyond Baghdad," so admirably told by a Highland officer. Satisfaction devoid of sentiment also greets the announcement made by Mr. R. I. Money in the *Geographical Journal* for September that "the Hindiya barrage (on the Euphrates, forty miles south of Baghdad) was found uninjured on the British occupation of Baghdad."

American Influence in the Balkans.

Mr. Lewis R. Freeman, who claims the distinction of being the only journalist visiting Athens in the period of King Constantine's "exaltation" who did not have an interview with him—the offer of an interview was made, but was withdrawn when the United States entered the war—writes in *Land and Water* on the influence which Balkan emigrants returning from America exercise upon public opinion in their respective countries. In regard to Greece he says:—

One meets many returned emigrants from America in all parts of Greece—as everywhere else in the Balkans—and it is an interesting fact that every one of those whom I encountered at this crucial epoch in Hellenic history was a most staunch Venizelist, and intensely bitter against Constantine and the whole Royalist régime. A family who gave me shelter for a couple of days in a little village on the slopes of Mount Olympus, in the course of my precarious journey by land from Old Greece to Salonika, furnished a fair example of the discriminating attitude adopted by even the most ignorant of these as a consequence of their "spell of freedom" across the water. Five brothers of this patriarchal establishment had spent from four to eight years apiece working in the mines and smelters of the Western States, and all of them had eventually returned to invest their "fortunes" in sheep and goats, and to become "leading citizens" of the cliff-begirt little Olympian village of Leptacara.

The eldest brother had erected a small café and rest-house at the temporary terminus of the railway line, which he had named "Hotel Tacoma," in honour of a more pretentious hostelry in the last town he had worked at in Washington. He celebrated the arrival of the first "reel 'Mer'can" the village had ever known by "shouting the house" in true Western mining camp fashion, everyone being provided with a glass of *mastic*, and toasts being freely drunk.

Of the Bulgarian Mr. Freeman writes:—

If the truth were known, I think it might well turn out that, of all the Balkan peoples, the Bulgar was the one most impressed by the entry of America into the war. Of all Bulgarian overseas emigrants ten went to the United States to one to any other country, and in the exaggerated imaginations of these and their friends, America constituted just about all there was of importance in the whole outside world. The actual significance of President Wilson's action could not possibly have spread very rapidly in Bulgaria, and yet even by the middle of May there had been a noticeable increase in the number of Bulgars deserting to the British armies on the Struma and Vardar, an increase which the Intelligence Officers had traced directly to the entrance of America.

"It is a remarkable fact," a British officer engaged in interrogating prisoners said to me, "that of recent Bulgar deserters fully 15 per cent. have been in the United States at one time or another, and the number of the latter is on the increase. These ignore completely the technical fact that their country is not at war with the United States, and say simply that they do not want to fight against America, and that they laid down their arms just as soon as they had a chance."

The French, Serbs and Italians were also reporting increased Bulgar desertions at this time, and it was at a prison camp of the latter near the Cerna that I had the opportunity to talk with a genial cobbler who had once worked in Fall River, and who, with his shoe-making tools under his arm, had sauntered over from the Bulgar lines the week before. He had come home, he said, to fight Serbs, not Englishmen, Frenchmen and Italians. He had been trying to screw up his nerve to desert for some time, but hadn't got it to the sticking point until a friend—another returned Americansky—had picked up a paper dropped from an aeroplane saying that America had joined the Allies. Shortly afterwards, taking advantage of the confusion following the sniping of an officer, he slipped out of a sap and over to the wire in front of the Italian trenches without being missed.

LONDON UNIVERSITY LECTURES.

Professor Popovitch gave the first lecture of this session's courses on the Serbian language at King's College, London University, on Tuesday, October 9. Besides an elementary course in this language, he will also give lectures on literature. The syllabus at King's College also includes an elementary course and a senior course in modern Greek. The lecturers for this subject are Mrs. Mary Gardner and M. C. Kessary.

At University College, Gower Street, Dr. T. G. Pinches will give the two remaining lectures of his course on "Shinar and Asshur: Pictures of an Early Civilisation," on October 18 and 25, at 5 p.m. Mrs. Mary Gardner will give a lecture on "Athens and its Buildings" on October 23, at 5 p.m.; and Mr. S. G. Kanjere will lecture on "Hindu Religion and Philosophy" on Fridays, from October 26 to November 30, at 5.30 p.m.

At the London School of Economics a course of lectures will be given on "The Empire, its Commerce and Commercial Requirements." The lectures begin to-day, and will be given on successive Fridays at 5 p.m. Admission will be by ticket, which may be obtained on application to the secretary. The introductory lecture, on "The Commercial Geography of the Empire," will be by Professor A. W. Kirkaldy, Professor of Finance in the University of Birmingham. In the Ethnology section Professor C. G. Seligman is lecturing on "The Peoples of Europe" on Wednesdays, at 2 p.m., dealing with the North and South Slavs, the Greeks, and others. The course began on October 10.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

A circular has just been issued to the shareholders of the Anglo-Roumanian Petroleum Company stating that the forthcoming meeting will be merely formal since no accounts for the past year can be submitted owing to the fact that the company's properties in Roumania were among those destroyed by the British Military Mission last year to prevent their falling into the hands of the enemy. A claim for compensation has been made on the British Government for £208,825 5s. 5d. The directors state that this claim has been made on a most equitable basis, and they are of the opinion that its settlement should present no difficulty. Like other Near East undertakings, the company was just getting over the effects of the Balkan War when the present war broke out, interrupting its development and restricting its production. Then followed the events of last year, when we are told that "all the wells were destroyed and the labour of years swept away in a few hours." In this picture there is one great consolation, namely, the convincing tribute it pays to the British Commission's work.

***

At the annual meeting of the Mooply Valley Rubber Company, the report of which will be found elsewhere in this issue, Mr. L. F. W. Davidson gave a most encouraging picture of the agricultural and financial position of the company. The profits, which were £5,422 in 1914 and £17,044 in 1915, rose to £27,525 for the past season, which, in the present case, comprises fifteen months. The crop similarly shows a satisfactory increase, the figures being 126,000 lb. in 1914, 212,000 lb. in 1915, and 468,000 lb. for the fifteen months under review. Mooply Valley, of course, takes the highest place among the South Indian estates, and the reason for this may be seen from Mr. Davidson's survey of the prudent and careful management of the estates. It only remains to add that the profits would have permitted the payment of a final dividend, but the directors are of the opinion that it is advisable to defer a dividend until the end of the year, when there will probably be a dividend of 10 per cent.

***

A return issued by the National Bank of Egypt of the Egyptian note circulation shows that the total amount in circulation at the end of July was £E17,300,000, this being a slight decrease on the figures at the end of June, which were £E17,500,000. The gold reserve was about the same at £E4,852,609, but British Treasury bills held in lieu of gold have declined about £E100,000 to £E3,797,391. Other securities held against the note issue were about the same. Egyptian Treasury bills and Egyptian Government securities and securities guaranteed by the Egyptian Government were unchanged, but there was a decrease in British Treasury bills and Exchequer bonds from £E5,318,239 to £E5,218,239.

***

The figures I quoted last week of Turkey's debts to her allies must be read in the light of the speech delivered last March by Djavid Bey, the Turkish Finance Minister, in which he reviewed Turkish finances during the war, for their full importance to be perceived. By March, it seems that Turkey's war indebtedness was at least £T180,000,000, making her total debt £T330,000,000. Her yearly deficit, which is, of course, rapidly increasing, has so far been met by the issue of paper against periodical loans from Germany and Austria, principally the former. Germany's first loan was in October, 1914, and consisted of £T5,000,000 in gold. This is the only occasion that specie has actually been sent to Turkey, though subsequently gold has been placed to her credit in steel chambers in Berlin and Vienna. This transaction—perhaps the most picturesque financial feat of the war—must have been singularly difficult for Turkey's leaders, for the task naturally devolved on them of drawing glowing visions of the piles of gold standing to Turkey's credit in those cities. Finally, Germany has issued Treasury notes to Turkey which are redeemable in gold at various periods.

***

That, in short, is the way in which Turkey's finances have been supported during the war. Except for the original £T5,000,000, her constantly growing paper currency is based on no better security than the word of Germany, and this very fact implies that Germany possesses the means of controlling Turkey's financial systems. In other words, Germany has a lever on which she is no doubt relying for the commercial exploitation of the country after the war. As to this prospect, Djavid Bey's remarks are interesting. He would welcome foreign capital and German capital would have the preference, but he laid stress on the fact that the Turks themselves must have a substantial share in new enterprises. "After the war," he added, "we shall cultivate economic relations of every kind with all the nations—friendly, allied, neutral, and enemy—without any distinction." This is not exactly what Germany has in mind, and if this is the trend of opinion in Turkey, it is easy to understand the bitter comment made to Djavid Bey in Berlin that "Turks had become too jingo, too extreme in their nationalism."

***

The ruinous consequences of the course pursued by the late régime in Greece may be seen from the figures given by M. Negropontes, the Minister of Finance, in presenting the Budgets for 1915, 1916, and 1917. There was, it appears, a deficit on the Budget of 1915 of over eight million drachmæ while the deficit for 1916 was no less than 160,999,000 drachmæ. M. Negropontes states that the accounts were in hopeless disorder, and it is very evident that the pro-German régime ended not a moment too soon for the salvation of the country. As it is, Greece has suffered economically almost as much as if she had been in the war from the commencement, and the restoration of her finances will be a most difficult proposition. M. Negropontes indicated in his speech how welcome assistance from the Allies would be in this task. Greece need have no anxiety on this score, for it is certain that the Allies will give her every help in their power to establish her fortunes on their former basis.

***

I referred recently to the efforts Turkey is making to increase her trade relations with Switzerland, that country having been selected by the Sublime Porte for attention chiefly because of the large number of Turkish refugees who have settled there. While Turkey can scarcely be considered in the light of a potential trade rival, it is just as well that Great Britain and her Allies should be on the alert for their own trade interests in Switzerland, and on that account I welcome the announcement in this week's *Board of Trade Journal* that Mr. G. B. Beak, Acting British Consul-General at Zurich, who is now visiting this country, will be prepared to interview by appointment representatives of British firms at the Department of Commercial Intelligence. British firms desiring to have an interview with Mr. Beak must make their applications not later than October 18 to the Comptroller-General, Department of Commercial Intelligence, 73, Basinghall Street, E.C.2, quoting the reference number 46,273/17.

***

The *Monthly Record* of the Manchester Chamber of Commerce contains the text of a letter addressed by the secretary of the Chamber to the President of the Board of Trade on the subject of the restriction in the Egyptian cotton acreage. Reference is made to the extreme undesirability, from the Lancashire point of view, of the measure, and it is suggested that all the cotton that is forthcoming from the reduced area should be confined to Great Britain and the Allied countries. "There is no reason whatever, but quite the contrary," the letter continues, "why neutral nations, with possible leakages through their intermediary to Germany, should get a single pound of this cotton, which is so urgently wanted in this country."

THE WAR SETTLEMENT AND THE TRADE OF SERBIA.

II.—Ports and Communications.

In the previous article it was pointed out that in the years immediately preceding the war Serbia's economic condition in general had been on the up-grade, and seemed to afford every prospect of a prosperous future. The war has naturally made this vista somewhat remote; indeed, it would not be going too far to say that, if the war ended with Serbia's status as it was in 1914, her position would be unfavourable in the extreme. Her considerable national debt would be greatly increased, there would be an inadequate revenue to set against increased expenditure, and, lastly, but most serious of all, there would be the fact that her population had decreased during the struggle to an extent of something like 25 per cent. Added to all this there would be the assured dominance of the Central Powers over every sphere of the country's life.

That is the impossible side of the picture, and we mention it only to bring into brighter relief the prospects that the war settlement holds forth for Serbia. Obviously no one can say precisely to what extent Serbia's position will be affected by the peace, but it is morally certain that it will leave her far greater in territory and population than before, and that she will have her outlet to the sea, and with it her freedom from the influence of the Central Powers. To attempt to indicate in any detail Serbia's probable expansion would be a hazardous undertaking, and one which would be unjustified at the moment. It may, however, be said that Serbia will no doubt receive a considerable accession of territory to the north-west, which should go far to satisfy moderate Southern Slav aspirations, while a larger or smaller portion of the Adriatic coast line, with important harbours, will be hers.

Value of a Coast Line.

It is this latter factor, as we have already indicated, which will be all important for Serbia's future. Her increased territory and population should give Serbia the opportunity of quickly demonstrating her economic promise, but the coast line alone can confer that freedom without which any progress which she might make would be of small purpose. To realise this we need not go back to pre-war days; the war itself is the aptest example of Serbia's complete dependence on the communications of other States—and when we say that we might with equal truth have added that the communications in question had a northerly direction. To the south Serbia's one outlet was via Salonika. It was, of course, by this route that British trade with Serbia was carried on, and the unsatisfactory character of this line of communication before the Greeks obtained the port was one reason for the smallness of the trade, for in Turkish days business was handicapped because dues and rates, and, in fact, everything connected with the transit trade, were of a very uncertain character, varying, no doubt, according to the precise degree of Turkish financial instability at the time. In the fighting before the retreat, Serbia learnt to her cost the inadequacy of the southern communication. She had to depend for almost all her supplies on the line from Salonika, for there was no other direct route by which they could be sent. Obviously a single route was insufficient, and it is the more praiseworthy that the little country was able to sustain the unequal struggle as long as she did before finally retreating to the Adriatic.

Steps to Promote Trade.

Once Serbia has her coastline, with one or more ports, it will be the task of the maritime Powers among the Allies, particularly Great Britain, by encouraging the growth of their trade with the country, to help Serbia to develop her seaborne commerce sufficiently to counterbalance the importance of the northern routes. And in this respect immediate preparation is necessary. Private enterprise with a view to the promotion of trade with Serbia after the war has already been the subject of comment in these columns. Much more than individual activity is called for, however, if really satisfactory results are to be achieved, and in this connection it is gratifying to learn that the Serbian Government has for some time been contemplating the task of bringing before the notice of British merchant houses the considerable trade opportunities that will presently be presented in Serbia. In doing anything at this time, the obvious difficulty is that no one can pretend to know what Serbia will require immediately after peace is declared. Her needs will depend on a variety of factors, notably whether the enemy has been driven out of the country, or evacuates it as the result of a crushing defeat elsewhere. In the former case precedent suggests that everything will be more or less destroyed, and that railways, bridges, houses, etc., will all have to be restored. In the latter case the work of destruction will have been much less, and the resumption of the normal activities of the country much more speedy.

In these circumstances the chief question is to prepare the ground for more intimate trade relations between this country and Serbia. The Serbian Legation will give special attention to this question, and endeavour to bring before business houses here the importance of Serbian trade. It is proposed to arrange meetings at which lectures will be given on various aspects of Serbian trade, and in a variety of ways every endeavour will be made to persuade business men to enter the Serbian market after the war.

The scheme is certainly most promising, and it only needs to be carried out in the spirit in which it has been conceived to achieve the success it deserves. As matters stand, indeed, it is difficult to imagine any method better calculated to secure the desired end, and it will certainly prevent British exporters from falling back on the time-worn excuse that they do not care to enter the Balkan market because they are unfamiliar with the conditions.

SERBIAN TRADE AFTER THE WAR.

The secretary of the Manchester Chamber of Commerce has received a letter from the Serbian Military Economic Direction in which attention is called to the desirability of closer commercial and industrial relations between this country and Serbia, as a result of the changed conditions caused by the war. With this object in view, the Serbian Government have formed the department which will have the special task of collecting all necessary information concerning the financial, commercial, and industrial resources of the Allied countries and of making known the needs of the Serbian people and the commercial and economic conditions of Serbia.

English firms are invited to send to the department (Rue Bulgaroeten, 87, Salonika) particulars as to the classes of goods which they supply and the conditions of sale, together with catalogues, price lists, and, if possible, samples. The department will supply information as to the Serbian commercial and financial situation.

The condition of cotton in Lower Egypt is 94 and in Upper Egypt 96, says Reuter's Cairo Correspondent. The final result is not expected to be so favourable as was anticipated, but the quality of the fibre and the ginning outturn are particularly good.

THE GREEK BUDGET.

Reuter's Athens correspondent in a message dated October 6 says:—M. Negropontes, Minister of Finance, to-day submitted the 1915, 1916 and 1917 Budgets to the Chamber. In an analysis of the economic situation the Minister declared that unhappily it was not satisfactory, but he was not astonished to find such a situation after two such years, in which politics had turned the glory of Greece to humiliation and her flourishing finances to chaos. "It is sufficient to say," he added, "that we have found the accounts in a state of complete disorganisation and disorder. The anomalies are really tragical. Consequently, as the figures given do not emanate from the official account books, we cannot guarantee their absolute exactness. Nevertheless, we do not despair; we are certain that in our economic efforts, as in our political endeavours, we shall be helped by our great Allies. We ought, however, to place all the resources of the State at the disposal of the country, and we particularly appeal to those classes whose fortunes have disproportionately increased during the war. Imbued with the unwearying patriotism of the true Greek spirit, we will rebuild the country on the ruins left by our predecessors." The Minister then announced that the Budget for 1915 showed a deficit of 8,559,360 drachmæ and that for 1916 a deficit of 160,999,000 drachmæ. The revenue for the latter year amounted to 263,554,997 drachmæ and the expenditure to 595,912,993 drachmæ. The extra ordinary funds show a deficit of 190,008,020 drachmæ.

NEW GREEK TAXES.

Decrees levying sundry stamp taxes that are expected materially to contribute to the financial strength of Greece have recently been promulgated by the Hellenic Government, says the United States Consul-General at Athens (Mr. Alexander W. Weddell) in a recent report. A tax stamp must now be affixed to all letters, money orders, parcels passing through the post, telegrams, railway tickets, bills of lading, tickets to theatres and other places of amusement where an admission fee is charged, receipts for money paid, petitions, Custom House papers, authentication of signatures by notaries public, programmes, advertisements when exposed to public view on separate cards or sheets, posters, and all bills in restaurants, hotels, tea rooms, coffee shops, beer halls, and wine shops where food is served. In addition, a 3 per cent. tax is to be collected on the annual income of every church, and one of 5 per cent. on the annual income of every monastery in the kingdom. Three per cent. will be collected from the incomes of persons in the Government service. Penalties are provided for violation or wilful evasion of this tax.

The *Preporetz* announces that the Deutsche Bank is opening a branch at Sofia shortly.

Owing to a short circuit, says Reuter's Petrograd correspondent in a message dated October 5, a fierce fire broke out in a naphtha reservoir at Baku and spread to other reservoirs. More than a million poods of naphtha are in flames.

The delegates to the Inter-Parliamentary Conference on Trade, says the Paris correspondent of the *Morning Post*, met on October 8, at the Luxembourg, under the presidency of M. Mark Reveille. The work of the conference will be to examine practical measures for bringng about the successful completion of the economic programme of the Allies, and to prepare the agenda for the conference to be held shortly in London. Among the members of the conference are representatives of Roumania and Serbia.

LANCASHIRE COTTON.

Prices Again Advanced.

(From Our Own Correspondent.)

Manchester, Wednesday.

We have to record a further advance in prices compared with a week ago, and producers of yarn and cloth have been very stiff at the higher figures. Sentiment in American cotton circles has again been bullish, owing to reports of frost doing damage to the crop. The labour situation in Oldham has caused increased anxiety, and owing to the strike of piecers about forty mills at the time of writing are standing idle. The operatives are protesting against the policy of the Control Board in providing for the fully staffing of machinery, which means a reduction in wages for young persons. There seems to be no set-back to the healthy reports relating to the Egyptian crop, and there is now talk of the yield being six and a-half million cantars. The larger demand in Egyptian yarns has been maintained, and some improvement is now showing itself in the position of producers of 60's twist. The hardening tendency in prices has forced out rather more business in piece goods for Egypt, although operators are very uncertain as to the boats available during the next few months. Some producers of grey shirtings have done rather better. For India grey staples have been neglected, but an increasing turnover has taken place in dhooties, jaconets, mulls, and printing and bleaching cloths. Demand for China still lags behind. There has been plenty of inquiry about for Java, Singapore, and South America. Favourable reports continue to be received from the home trade. Manufacturers are in a better position to hold out for profitable prices than for a long time back. American yarns for home use have again moved off freely at hardening rates. The margin of profit in many counts and qualities is being widened. In odd lots a little more has been done in bundle yarns for India, but in the export section as a whole the chief support comes from France. A good deal of interest has been taken in the details relating to the shipments of Egyptian cotton for the season ended August 31 last. Messrs. Choremi, Benachi and Co. head the list with 95,373 bales, followed by Carver Brothers and Co., Ltd., with 92,467 bales, and Peel and Co., Ltd., with 81,384 bales. It is of interest to note that with regard to shipments to England, Messrs. Peel and Co., Ltd., with 64,094 bales, are a long way ahead of any other firm. The next largest amount being 36,313 bales for Messrs. Carver Brothers and Co., Ltd.

RAILWAYS IN LIBYA.

The forthcoming publication is announced of a report from M. Carlo Riveri, Director-General of the Libyan Railways, which will be an historical document (says a French contemporary) on the construction work effected by the military administration since the occupation of the Libyan Railways from May, 1913, to June, 1915. On the latter date 200 kilometres were under exploitation, 180 in Tripoli and 20 in Cyrenaica. Moreover, 60 kilometres were on the point of being completed. The average cost of construction has risen to about 54,000 frs. per kilometre. The yield per kilometre was 4,780 frs. in Tripoli and 4,000 frs. in Cyrenaica, higher by almost half as compared with a number of complemental lines in Italy. The Tripolitan system starts from Tripoli and proceeds via Tadjoura towards its provisional terminal point, which is at El Argela, about half a day's journey from El Charian. It will be continued in future, on the one side, in the direction of Zouara, and from the Tunisian frontier and to the south as far as Misurati and to the port of Bou-Chiffa.

Mr. A. V. Paton has been elected President of the Liverpool Cotton Exchange.

COMMERCIAL INTELLIGENCE

A meeting of the Advisory Committee to the Board of Trade on Commercial Intelligence was held at 7, Whitehall Gardens, recently, the President of the Board of Trade being in the chair. A report on the work of the Department of Commercial Intelligence during the third quarter of 1917 was laid before the committee, and the President of the Board of Trade and Sir A. H. Steel-Maitland made statements as to the reconstitution on an extended scale of this department under the arrangements recently concluded between the Board of Trade and the Foreign Office. A report to the Board of Trade on the work of the committee since its appointment in 1913 was adopted, and, this being the final meeting, the President expressed to the members his appreciation of the valuable assistance given by them to the Board of Trade during their period of office.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses and unsuccessful attacks during the week ended October 7, 3 p.m. :—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft) :—

Arrivals	2,519
Sailings	2,632

British merchant vessels sunk by mine or submarine :—

1,600 tons gross or over	*14
Under 1,600 tons gross	†2
British merchant vessels unsuccessfully attacked by submarines	‡5
British fishing vessels sunk	3

* Including one sunk during week ended September 30.

† Including one sunk during week ended September 30.

‡ Including one attacked during week ended September 23 and two during week ended September 30.

SUDAN RAILWAYS IN 1916.

The annual report of the Sudan Government Railways for 1916, which has just been issued, shows that the progress made by this undertaking has not only been maintained but actually accelerated despite the inevitable handicaps due to the war. In 1915 traffic revenue declined by £E3,803, but for the period under review the figures are £E711,600 as against £E515,004, a very substantial increase, while the gross revenue increased from £E592,683 to £E824,957. This increase is partly due to additional Government receipts amounting to £E55,715, due to the military operations in Darfur, and receipts amounting to £E38,491 in connection with the export of camels and certain materials to Egypt. The gross expenditure, which stood at £E382,204 in 1915 as against £E443,380 in 1914, rose to £E522,204, the chief factor in this increase being the cost of coal, which was £E182,688 as against £E74,764 in 1915. Welsh coal, it may be mentioned, reached £5 10s. c.i.f. Port Sudan as against 27s. before the war. Despite this the ratio of expenditure to earnings showed a further decline standing at 63.3 per cent. as against 64.5 per cent. in 1915 and 74.1 per cent. in 1914. In this connection the report states that it must be remembered that all relaying has been suspended, and that the department has been much understaffed owing to officials being lent for work elsewhere, these things tending to reduce the cost of working. The total profit for the year was £E302,753 as against £E210,479 in 1915, and £E154,832 in 1914.

"As stated last year," says the report, "the general financial situation has necessitated the most rigid economy being enforced throughout the Government service, and this has prevented the railway from taking advantage of its increased revenue, and also involved a reduction in the normal expenditure on relaying and other services. One Government department cannot stand alone, a fact not always realised. Thus, not only was it necessary to suspend relaying in 1915 and 1916, but it is very probable that a similar course will have to be adopted in 1917. The provision of sleepers is, however, of such vital and pressing importance that should this prove to be the case we trust it will be found possible to allot a sum of £E30,000 for this purpose from the surplus revenue of the past year when the year's accounts are closed. Everything possible is being done to utilise old sleepers for minor repairs and to conserve the stock of new sleepers on hand before the war, but this will soon now be exhausted. Efforts are being made to get a suitable sleeper from the forests of the upper reaches of the White Nile, but there are great practical difficulties." The management add that while generally speaking there is no immediate need for anxiety, in so far as they are now unable to carry out renewals on a systematic basis, it will become necessary to do so in future years to an extent which will almost certainly exceed the ordinary resources of the annual revenue and involve capital expenditure.

The surtax of 10 per cent., which was introduced, early in 1916, on all goods rates owing to the increasing price of coal and has been increased to 20 per cent. as from the beginning of 1917, is stated to have had no injurious effect on trade whatever. "In point of fact," says the report, "it has not really been felt by the native trader at all, as it is trivial in proportion to the prices now paid for gum and cereals, and is in any case entirely borne by the consumer. For the same reason the raising of the surtax to 20 per cent. should have no effect whatever on the volume of export traffic. Imports and local traffic have both increased, and though prices in the Sudan are very high this is principally due to the general rise in prices elsewhere and to the increase in sea freights, and not to the railway surtax, which represents a very small percentage of values."

Among the statistics given are the following:—Public passenger receipts have risen by £E13,356, but are, nevertheless £E9,293 lower than in 1914. Fourth class native traffic has improved considerably, the increase in the number of passengers carried being no less than 65,004, or 33 per cent. more than in 1915, while receipts show an increase of £E9,563, or 35 per cent. Government passenger receipts have increased from £E135,655 to £E185,186. Exports have increased by 16,504 tons, mainly due to dura, of which 81,959 tons were exported during the year, 26,547 tons being sent to Egypt, via Halfa, as against 7210 tons in 1915. The export of dura viâ the Red Sea has declined by 7,279 tons. In spite of the fact that the rate for simsim was raised, the export has risen from 8,912 tons in 1915 to 12,887 tons in 1916, an increase of 31 per cent. Imports have increased slightly in total. The quantity of sugar imported is still considerably less than in the years preceding the war, but imports in 1916 were 1,509 tons more than in 1915.

In 1916 the Steamers Branch showed increased profits in common with the railways. The Shellal-Halfa Reach showed a profit of £E11,285 as against a loss of £E136 for 1915, while the Dongola Reach receipts were £E9,675 as against an expenditure of £E7,049, giving a profit of £E2,626 as against £E2,345 in 1915. Finally the Port Sudan Dockyard and Harbours made a profit of £E1,181 as against a loss in 1915 of £E1,276 and in 1914 of £E4,591.

An interesting reference is made in the report to the work of the London Passenger Agency, which is under the control of Mr. A. S. Bull, European Traffic Manager. The agency, says the report, "has proved of great value in bringing Sudan products to the notice of British firms. There is considerable scope for development in this direction. The demand for grain is already insistent, and heavy exports of dura to Egypt are being made. There is no reason why, assuming the necessary irrigation can be assured, a market also in Europe should not be permanently secured for Sudan cereals. Mr. Bull has been of great assistance in securing passages for officers and officials from England during a difficult period."

STRIKE AT BAKU OILFIELDS.

A telegram from Baku, says *Reuter's* Petrograd correspondent, states that at a conference of workmen's delegates from all the oil wells it was decided to declare a general strike, to begin on the 10th, in consequence of the employers' refusal not to discharge workmen except with the consent of the workmen's trade unions. The conference immediately appointed a strike committee.

ANGLO-ROUMANIAN PETROLEUM.

Company's Claim for Compensation.

The directors of the Anglo-Roumanian Petroleum Company, Ltd., announce that the meeting convened for October 16 is being held in order to comply with the Companies Acts, Section 64, but the proceedings will be necessarily formal. In November and December last the company's wells, plant, machinery and other property in Roumania were destroyed by the British Military Mission in order to prevent their falling into the hands of the enemy. The directors are, therefore, not in a position to submit accounts for the past year. A claim for the cost of reinstating the company's properties, amounting to £208,825 5s. 5d., has been lodged with the British Government. The claim is made on a most equitable basis, and should, therefore, offer no difficulty in the way of settlement. As soon as the negotiations with the British Government have been completed, the board will call the shareholders together and place the position fully before them. As shareholders are aware, the company was just recovering from the effects of the Balkan war, and the development of the properties was in active progress when the present war broke out. Several wells which were practically down to the oil source would have come into production within a few weeks, and others were well advanced. In view of the dislocation of the oil market and the difficulty of disposing of crude oil, except perhaps to agents of the enemy, it was decided to restrict the output to a quantity sufficient only to meet the current expenditure. In consequence the wells upon which the company had spent so much time and money were not brought into production but left pending a return to normal conditions. All the wells were destroyed and the labour of years swept away in a few hours. The issued capital of the company is £150,000. Debentures amounting to £17,500 are outstanding, upon which £13,966 13s. 4d. has been called up. The profits for a period of eight years since the incorporation of the company (less dividends paid £10,968 11s. 2d.) have all been applied in the development of the company's properties.

ENGINEERING NOTES.

Technical Hints on Olive Oil.

Olive gathering normally begins in the Near East at this time. Olive oil mills and presses are cleaned and overhauled for the forthcoming work of extracting the oil. It is probable that new presses will be required to replace those which are old or damaged; and it is also certain that they cannot be supplied from Germany or Austria, or by local makers. Oil mill proprietors should know that olive-oil presses, either screw or hydraulic, can be obtained in England, and can, we believe, be exported by a special permit. There are a few British firms that have recently made a speciality of the construction of these olive-oil presses, but apparently their existence is not known to buyers in the Near East, and thus American and German firms have hitherto been the principal suppliers of such presses.

Effect of Prolonged Pressing.

The result of a number of technical trials made in the South of France on the expression of olive oil under different conditions proved that ripe and well-crushed olives give the best yield in the first pressing, and that, although prolonged pressing increases the yield, the quality of the oil may be lowered, and that the maximum yield is obtained by the addition of hot water in the second pressing. These results ought to be studied by olive growers in the Near East, who, in their eagerness to extract as much oil as possible, prolong the first pressing, and then have a second and even a third pressing with the addition of hot water, in the meantime making no attempt to separate the oil from the first pressing, which is of better quality from that of the following pressings, which in taste and colour is much inferior to the former. This apparent carelessness on the part of the grower is responsible for the unsatisfactory position in which the olive oil of the Near East often stands in the wholesale markets.

A new method of decolourising olive oil, described in an official French bulletin, will also be of interest to olive growers. It involves agitation with an aqueous solution of tannin. From one to five parts by weight of tannin is required for 100 parts of oil, according to the depth of colour. On standing, the aqueous solution of tannin settles to the bottom, and the decolourised oil can then be run off.

Openings in the Caucasus.

We had occasion in previous engineering notes to point out the importance of the Caucasus as a market for agricultural machinery in the near future; and this view is confirmed by a recent report of the British Consul in that district, who, in dealing with the possibilities for trade in that part of the Russian Empire, states that "the Germans paid special attention to that part, and latterly showed much energy in developing its resources, especially in commodities for export." That kind of "energy" is one of the effective methods assumed by the Germans in their efforts to obtain a market. By interesting themselves in the development of the country's resources they gained the confidence of the inhabitants, and after that were easily able to win the market. At least so it happened in the Near East. Baku is one of the large commercial centres in the Trans-Caucasus which generally supplies the territory situated east of Batoum and the other oilfields of the Caucasus, as well as the North of Persia and Transcaspia, with many commodities. The last district is a large tract of country exporting many cereals, and calling for increasing supplies of agricultural machinery. "It is a country with great possibilities in the near future," the Consul asserts. Extensive tracts of land are continually coming under irrigation, and the country contains much undeveloped mineral wealth. All important Baku merchants have their agents or branch offices in Transcaspia, as well as in all the large towns of the Caucasus and oil-producing centres.

PETROLEUM OILS.

The Right Hon. Walter Long, M.P., has been requested by the War Cabinet to take control of all questions affecting petroleum oils and petroleum products. Mr. Long has appointed Professor Cadman, C.M.G., Petroleum Adviser to the Colonial Office and Professor of Mining of the University of Birmingham, to be his technical adviser and liaison officer between the various Government departments. Professor Cadman will also take charge of an organisation which will be established for giving effect to Mr. Long's instructions, and will assume the title of Director of the Petroleum Executive. Mr. L. S. Shrapnel-Smith, chairman of the Joint Committee of Mechanical Road Transport Associations, has been appointed Economy Officer to the Petroleum Executive, and he will be concerned in introducing economies both in his Majesty's services and in the civil use of petroleum and petroleum products. The headquarters of the Petroleum Executive are at 8, Northumberland Avenue, W.C.2, to which all communications should be addressed.

WHEAT CULTIVATION IN EGYPT.

The *Egyptian Mail* announces that the Ministry of Agriculture has sent a commission to Mariut to make experiments in wheat cultivation in its lands. These experiments will at present be limited to 7,000 feddans, and if the result is satisfactory more land will be put under cultivation. These 7,000 feddans are situated to the south of the Bahig railway station.

COMPANY MEETINGS.

MOOPLY VALLEY RUBBER.

The seventh ordinary general meeting of the Mooply Valley Rubber Company, Ltd., was held on Tuesday, in the Council Room of the Rubber Growers' Association, 38, Eastcheap, E.C., Mr. L. F. W. Davidson (Managing Director) presiding.

The Secretary (Mr. Charles E. Lewis) having read the notice and the report of the auditors,

The Chairman said that it would be seen from the report, in which comparative figures for the season under review with those of the previous two seasons were given, that the profits were progressive, and had risen from £5,422 in 1914 to £17,044 in 1915, and to £27,525 for the past season which comprised 15 months. The crop also showed a continuous and satisfactory increase, that for 1914 being 126,000 lbs., for 1915 212,000 lbs., and for 1916-17 468,000 lbs. The material excess of 61,000 lbs. of crop over the estimate for the past season was due in a considerable measure to cultivation. The gross prices obtained for the last three years were 2s. 1½d., 2s. 9d. and 2s. 7½d. approximately, and although 1½d less had been realised for the last season's crop than for that of the previous year 2s. 7½d. was a fair price, and left a good margin for profit. The cost of production at first sight was unsatisfactory, but was easily accounted for. The cost had risen from 1s. 0.11d. in 1915 to 1s. 2.42d. in the past year. The causes which had contributed to this great increase in cost were—(1) two seasons, January to March, in their present report, which would not occur again; (2) a large area of young rubber coming into tapping; (3) great increases in freight, insurance, dock charges, etc.; (4) 71 per cent of general charges were debited to profit and loss account, as against 28.5 per cent. last year; and (5) extra cultivation. The crop from their oldest rubber was produced last year at under 7d. per lb. f.o.b., the figure given by Mr. Nicoll as the probable ultimate cost of producing Mooply rubber. The general charges and weeding last season averaged about Rs6,500 a month, or, say £433 sterling. During the six months of the two periods of January to March for the two years, with a crop averaging 12,200 lbs. a month, the charges came to 8d. per lb. of rubber, while for the last three months of the year, October to December, with an average crop of 86,000 lbs. a month, the general charges and weeding came to only 1.2d. per lb., and for December they got the extraordinary crop of 111,000 lbs. at a cost of only 0.93d. per lb.

Last year they brought 1,500 acres into tapping, and in this year's programme provision was originally made for tapping a further 1,200 acres of young rubber, but mainly on account of the difficulty of securing freight for their crop they had decided to leave that rubber untapped for another year. That would reduce the crop by about 100,000 lbs., but would make very little difference in the profit. Freight had risen to £12 15s a ton, as against 60s. before the war, and dock charges had increased by 30 per cent. The manager had been allowed to spend more on extra cultivation than was originally intended, and the results had been most gratifying. Mr. Mead considered it had already repaid itself, and it would assuredly yield lasting results and give increased crops in the future. The property was perfectly clean now, and it was weeded very cheaply. Pests and diseases and plant sanitation had been constantly dealt with with satisfactory results. The Government experimental station for that part of South India would shortly be established on Mooply, and the Government could depend on Mr. Mead and his assistants to use every endeavour to assist the authorities in dealing with the scientific side of their industry. With regard to the factory work, the quality of the output had on the whole been satisfactory, and they had no fear as to Mooply ultimately turning out an even class of high quality rubber. They had expended £16,000 on capital account on estates, buildings and machinery, as against £9,000 forecasted last year, but they were satisfied that the money had been wisely invested. They had again taken £14,000 from profits to add to development reserve account, which now amounted to £36,000. He regretted that the Board had not been able to declare a dividend equivalent to the profits earned during the past year, as in that case they would have paid something like 15 per cent. The directors had carefully considered what it was best to do with the £11,431 in hand, and had reluctantly come to the conclusion that the wisest course was to postpone the payment of a dividend, owing to the uncertainties of the financial situation in future, but, if circumstances justified it, to declare a dividend before the end of the present year, which they hoped would be 10 per cent. To the end of September they had secured a crop of about 200,000 lbs., as compared with 136,000 lbs. to the same date last year. Their estimate of crop for the present year was 604,000 lbs., and from the way it was coming in it seemed probable they would have secured 650,000 lbs., but they had decided to postpone the tapping of the 1,200 acres of young rubber till next season, and this meant a reduction of about 100,000 lbs. crop, with a very slight reduction on estimated profits, while the untapped rubber will be benefited by being allowed another year's growth, and yield a correspondingly large crop next year. Capital expenditure is estimated at £6,000, including the cost of a 200 acre clearing. Their present difficulties were principally: (1) Difficulty in obtaining freight. (2) Difficulty in finance. (3) And excess profits duty looming ahead. The difficulty in regard to freight is a serious matter. So far they had been able to move all their produce, and the only disadvantage they had suffered from was the payment of excessive freight rates. The present difficulties in connection with finance were common to all Eastern businesses like theirs. They were chiefly due to the adverse balance of trade with India, and the consequent great difficulty of remitting to India the proceeds paid in gold in this country for rubber in order to meet the estate expenditure. The remedy for this lay with the Government, both here and in India, to devise and bring into effect some adequate method of relieving the stringency of the present exchange position. Their bankers had been able to help them in this matter recently, and they hoped to make such arrangements from time to time as would enable them to procure the necessary funds for working the estate out there, but the position at present was one of great anxiety. The third matter that might induce them to modify their programme was the recent increase of excess profits duty to 80 per cent. of the excess profits made over a certain amount (above £15,000 in the case of Mooply).

Notwithstanding these anxieties in regard to finance and shipping and excess profits duty their position was very sound, and for the benefit of those shareholders who might not have the opportunity of reading Mr. Coombe's report he would conclude with two paragraphs from it. Mr. Coombe, as many of them were aware, had the reputation of being one of the ablest visiting agents in Ceylon, and his opinion carried great weight. In his general remarks he says:—

"It is unnecessary for me to set forth in detail facts concerning the situation, etc., of this property, which are already well-known to the directors, but I should like to say at once that there can be no two opinions with regard to the class in which this fine property stands, for it is undoubtedly, as far as my knowledge of rubber in this country goes, out by itself."

He concludes his report with the following words:—

"This fine estate has without a doubt a great future before it, for it is remarkably well favoured in every respect. The land is good; the rubber is, on the whole, even, well-grown and healthy; the yield promises exceedingly well; labour is in good supply and of excellent quality; the condition of the estate and class of work being done are well above the average, while, last but not least, the management is all that can be desired." He begged to move: "That the report of the directors and statement of accounts for the year 1916 be received and adopted."

Mr. W. J. Lucking, in seconding the motion, said that while no doubt shareholders felt disappointment at the postponement of the dividend, he was quite sure the wisdom of the course adopted by the directors would be appreciated, and he sincerely trusted that the expectation of a dividend by the end of the current year would be realised.

The Chairman, in answer to questions, said that their estate was not suitable for the cultivation of either coffee or tea. When he mentioned the end of the year as the probable date of the dividend he referred to the December of this year.

The motion was carried unanimously, the retiring director, Mr. T. C. Forbes, was re-elected, and the auditors, Messrs. Cooper Brothers and Co., were reappointed.

The sum of £200 was voted to war charities in the discretion of the Board, and a hearty vote of thanks to the chairman and directors, and to the manager and staff on the estate, terminated the proceedings.

ASSAM RAILWAYS AND TRADING.

The thirty-seventh ordinary general meeting of the Assam Railways and Trading Company, Ltd., was held on Wednesday at Winchester House, Old Broad Street, London, Lord Ribblesdale (the Chairman) presiding. The Secretary (Mr. S. Maclean Jack) read the notice convening the meeting and the report of the auditors.

The Chairman, in moving the adoption of the report and accounts, first referred to the loss which the company had sustained by the death of Mr. Evan A. Jack, who was one of the founders of the company, and to the appointment of Mr. S. S. Hawkins, who for many years acted as agent and general manager for the company in India, to fill the vacant seat on the Board. Proceeding, the Chairman stated that the result of the working of the railway for the past year was a profit of £37,528, which showed a slight improvement on that of last year. All the conditions remained very much the same as when he last addressed the shareholders, although the various difficulties arising from the war, which he then touched on, had been rather accentuated. The bogie coaches which he spoke of last year had been brought or were being brought into active service, but they had no further wagon stock available. They had, however, registered an order for it, and he hoped they would get delivery directly the war was over. With regard to the colliery, the profit was rather more than that of last year, and the sales had been on a larger scale. The increased quantity sold had to come from their stocks, as the output for the year was not up to the usual level, one of the principal causes being shortage of labour due to Government recruiting for military purposes. It was expected that the outturn for the current year would return to the normal figure—something like 300,000 tons. With reference to the company's investments, he was glad to say that both the

Assam Oil Company and the Makum (Assam) Tea Company had been able to increase slightly their rate of distribution, and the current year would have the benefit of this increase. As he had often told the shareholders, the company's interests and those of the tea industry were indissolubly connected, and what affected that industry favourably or adversely also affected their own company, although not to the same extent. Tea gardens were undoubtedly going through a very difficult time at the moment. They had difficulties with their shipping, finance and labour. Those temporary difficulties could not be ignored, but he was as strong a believer in the industry as he ever was.

Returning to the railway, and referring to the Sibsagar branch, the Board had been interesting themselves in the plans for a line southwards from Dibrugarh, which would practically be an extension of their own railway, and which they understood the Assam Government wished to see carried out. The directors thought it would be very desirable to have it carried out, because it would open up a new country where sources of traffic were already developed. The scheme had not yet reached a sufficiently advanced stage of development for him to be able to tell the shareholders very much about it, but they were carrying out the necessary reconnaissance survey, and it was hoped that shortly a sufficient amount of information would be available for the matter to be considered and dealt with. The directors believed that considerable benefits would arise to this company from such a development. In regard to the collieries, he was able to tell the shareholders that they had ample untouched areas of coal to replace all they had extracted from the present workings. By means of cross-measure roads they were testing and proving other seams with satisfactory results; in fact, in one of their mines, which, owing to one of those twistings of the seam which sometimes occurred, had not proved as large in area as expected, they had, by means of a cross-measure road, opened up another seam, which would more than replace what they thought they had missed. In addition, there was little doubt that three or four miles to the south-east of the coal area of which he had been speaking they had in the Lekha-Pani area coal land which they believed to be very valuable, and they were at the moment discussing the best methods for opening it out. As the shareholders knew, they were the owners of sawmills, and these were now being actively employed in the making of tea boxes. There was a very great dearth of boxes, and the authorities had expressed the desire that all sawmills in the district should do what they could to assist in overcoming the difficulty. The company had accordingly started cutting and had booked a considerable number of orders for boxes. The progress of the Namdang Tea Company during the past year had been quite satisfactory, and this season they were for the first time manufacturing their own tea. Referring to the accounts, in the general revenue account they had written off the balance of the new issue expenses, a part of which they wrote off last year. He was sure the shareholders would all approve of their having taken up £30,000 of the War Loan. They had also subscribed £10,000 to the Indian War Loan. It was not intended, however, to hold these permanently, as, owing to other commitments and requirements, they could hardly make such a large investment of money outside the company. As to the result of the year's working, the balance of general revenue account was £108,771, against £105,297, and this showed a small but satisfactory increase. All the preference dividends had been paid up to the end of the year, and in March last an interim dividend of 2 per cent. was paid on the "B" stock. The Board recommended a final dividend of 3 per cent., making a total distribution of 5 per cent. for the year, carrying forward a balance of £3,475.

Mr. Walter Butler seconded the resolution, which was carried unanimously.

The dividends recommended were approved and the retiring directors and auditors were re-elected.

European Oilfields.—The register of holders of first debenture stock will be closed from 15th to 31st instant, inclusive.

ON 'CHANGE.

(From Our Own Correspondent.)
Throgmorton Avenue,
London, Thursday.

The tendency in our market this week has been, on the whole, better, and there has been a certain amount of nibbling for shares at current prices, but business has continued very restricted. Both Egyptian Unifieds and 3½ per cent. Prefs. have been in demand, and are ¼ up at 84 and 73¼ respectively.

In Bank shares Agriculturals and Nationals are both ⅛ better at 6½ and 16 respectively, with some small business passing. Anglo-Egyptian Banks have also improved 3-16 to 13 3-16. There has been a persistent inquiry for Bank of Athens shares, of which, however, the supply here at current prices is exceedingly limited; and the shares closed 3-16 up at 3 5-16. The feature in the bank market, however, has been the jump in Land Banks, which, after changing hands at 6 7-32, 6¼, and 6 5-16, have jumped to 6⅜, showing a rise of 9-16 since last week.

Delta Lights are rather firmer, having been done yesterday at 6⅛, showing a rise of ⅛. Aboukirs have been exceptionally quieter, closing 1s. lower at 18s. 6d.; but this weakness has been due to some small sales on a falling market. The news from the property as regards the cotton crop, etc., is, we understand, of a satisfactory character. Behéras are rather quieter at 11⅜, and Delta Lands are 1½d. down at 13s. 3d.

There has been a fair turnover in New Egyptians at the unchanged price of 13s. 3d. Union Foncières keep steady at 39s.

In Miscellaneous shares Markets and Salts are 3d. down at 26s. 6d. and 25s. 6d. respectively, and Khedivial Mails are 6d. easier at 35s.

In Greek Government stocks there has been practically nothing doing apart from some small transactions in Rentes at 44, a decline of ½, and an unimportant transaction that took place in Larissas round 55.

Oil Shares.

Wednesday's prices showed some fluctuations. Anglo-Egyptians (B) rose 9d. to 26s. 9d.—27s. 9d. Roumanian Consols, however, declined 6d. to 11s. 6d.—12s. 6d.

Paris Bourse.

Wednesday's quotations included the following:—Egyptian Unified, 96 (against 95.55); Serbian 1895, 59.10 (against 59); Turkish Unified, 60.10 (against 59.50); Suez Canal Shares, 4,605 (against 4,600).

COMPANY NOTES.

Dividends, Payments, etc.

The annual drawing of the Four and a-Half per Cent. Debentures (Series "B") of the Land and Mortgage Company of Egypt, Limited, will take place on the 19th inst., at 11.30 a.m., at the offices of the company, 59, Suffolk House, Laurence Pountney Hill, London, E.C.

The directors of the Indo-European Telegraph Company have declared an interim dividend for the half-year ended June 30 last at the rate of 5 per cent. per annum, free of tax, payable on and after November 1 next to holders registered 31st instant.

NOTES OF THE WEEK.

The most spectacular event of the week has been the German Emperor's visit to Constantinople, which was beflagged for the occasion. This visit to the Sultan, following immediately upon the Kaiser's trip to Sofia, will no doubt be interpreted in the Press of the Central Powers as another indication of the stability of the Teutonic alliance; and from that point of view it may teach a useful lesson to those in this country who expected Austria to collapse in 1914 and Turkey in 1915. The Quadruple Alliance has held together for over three years, and there is no prospect of its immediate dissolution. Indeed, short of a military *débâcle* in the East, it cannot dissolve until Germany herself is beaten, for it is Germany that binds the other three together.

Nevertheless, there are signs that all is not well. An article in the *Weser Zeitung*, which has sometimes been used to reflect official German views, suggests that one of the objects of the Kaiser's visit to King Ferdinand was to encourage the Bulgarians to attack the Entente forces at Salonika, and hints that a thorough agreement was come to over this matter between Berlin and Sofia. In view of the fact that Bulgaria has been openly agitating for still more annexations to compensate her for the unexpected length of the war, it would not be surprising if this report were near the truth. In return for the further loan which Bulgaria has recently obtained from Berlin, that country may have demanded the possession of Salonika, and been told that she can keep it if she can get it. Certainly Germany has no longer any reason to consider the feelings of Greece on the subject. But, at the same time, the possession of the port by the Bulgars would raise a pretty quarrel in the Balkans. If Salonika were going begging, Turkey might well ask why Bulgaria and not the Ottoman Empire should have the reversion of the old Turkish port, and a still more formidable claim could be advanced by Austria. The possession of Salonika has notoriously been coveted by Austria for a generation, and Vienna is not likely to acquiesce quietly in the acquisition by Bulgaria of all the plums in the Balkan pudding.

The Kaiser's visit to South-Eastern Europe coincides with an admission of the gravity of the financial position. It is announced that Germany has lent Turkey for her internal needs ninety-three million Turkish liras since the beginning of the war; in addition, she has lent twenty-five million liras for military transport over the Anatolian and Baghdad Railways, and Turkey owes another twenty-five million liras for ammunition; other Turkish debts amount to thirty-eight million liras, more than half of which was borrowed from Austria. The Turkish debt service takes twenty out of twenty-two millions total revenue, which means that Turkey is practically bankrupt. This is, of course, no new position for the Ottoman Empire; the seriousness of the situation is that Turkey, by borrowing from Berlin, has sold herself and her future, lock, stock, and barrel, to Germany, and the longer the war lasts the nearer does she come to economic slavery.

There can be no blinking the fact that, if this transaction stood alone, and if Germany were to win the war outright, as was the calculation of her financiers when they made the earlier, at least, of these loans, the transaction would have been well worth while from the point of view of Berlin, however difficult to justify from that of Constantinople. The right to exploit the whole of the Ottoman Empire would be cheaply purchased for a couple of hundred millions sterling, even if the interest on the debt were never paid: and it would carry with it, too, the opportunity for Germany to extend her power over Persia and the whole Middle East. But the transaction does not stand alone, for Bulgaria has also had to be financed; moreover, the prolongation of the war, which has ruined Austrian finances, has also rendered those of Germany precarious, and consequently put a different appearance on the Turkish position.

Some calculations which have recently appeared in the *Deutsche Tageszeitung*, which appear to be well founded so far as they can be compared with other sources of information, throw a striking light on that aspect of the case. The Pan-German organ calculates that Germany will have to bear extra taxation amounting to £600,000,000 sterling, as compared with pre-war taxation of £175,000,000 sterling, and that the utmost additional taxation she could bear would be £300,000,000. As the raising of this sum, it says, would require an almost superhuman effort, and this would leave a deficit of £125,000,000 sterling, it is argued that Germany must have annexations or indemnities to pay for the war, or she will find it impossible to carry on. That is as it may be; we shall weep no tears on this side of the Channel over the financial ruin of Germany. But the point as concerns Turkey seems to be this—that the more Germany finds it impossible to obtain annexations or indemnities from her enemies, the more firmly she will hold on to the securities she has obtained

Digitized by Google

from her allies in the shape of treaties and solemn promises. That is the one valid asset she has, and the allies will probably find when they come to examine the terms of peace in detail that Turkish and Bulgarian finance is inextricably interwoven with that of Germany and Austria. The fact that the latest issue of Turkish paper money for £T50,000,000 is backed by German Exchequer Bonds deposited in the Ottoman Public Debt confirms this impression.

While the battle line in Roumania has been quiet, the Russian defeat in the Gulf of Finland, coming as it does hard upon the fall of Riga, is a serious event that is bound to react along the whole eastern front. Part of the Russian Baltic Fleet appears to have fought bravely, and part the very reverse; the morale in the navy as in the army seems to be patchy. At any rate, the Germans are in possession of the islands which command the Gulf; the Russian army has again had to retire, and the menace to Petrograd has become more direct. It is by no means certain yet, however, that the Germans will play for this great prize this year—the time in which to obtain it before winter sets in grows short, and they may prefer to make thorough preparations for its capture in the spring of 1918, risking, of course, the restoration of a fighting spirit in Russia, which may render their desires vain.

Faced by this latest difficulty, M. Kerensky, who is unfortunately ill, has threatened, and the Soviet has appealed to, the soldiers. It does not yet appear whether either threat or appeal will be effectual. The Soviet speaks good words, but to those who read them at a distance the effect seems to be discounted by the fact that every manifesto urging a continuation of the fight has a tendency to end with words declaring in favour of an early peace, as though somebody had added them as an afterthought. One thing at a time is a sound motto, even in politics, the most fluid of the sciences.

The constitutional, as distinct from the military and social, reorganisation of the Republic appears to stand much where it did. A proclamation has been issued by the Ukraine Committee announcing that that territory will be "a politically autonomous" unit comprising the whole Ukraine nation. Despite the sacred word "autonomy," this bald statement appears to lay far more stress upon the independence of the Ukraine than on the union with Russia, and the fact that the Committee of the Ukraine also claims to be represented at the Peace Conference is very significant of the same tendency. It is quite obvious that, if this thinly disguised separatist tendency is allowed to continue unchecked, the day of Russian influence in the Balkans is practically at an end, and the whole of the Black Sea problem is transformed.

Whatever may be the future of what must now by courtesy be called the Ukraine nation, if they desire to set up for themselves, or in a *ménage* where their relations with Petrograd must be at the best delicate from time to time, it cannot be contended by even their most ardent supporters that they would pull the same weight in the European boat as undivided Russia. Judging by the Balkan *status quo* before the war, they would be hardly, if at all, more powerful than Roumania. Now northern Russia may, if it chooses, divorce itself utterly from Balkan affairs, but the Ukraine cannot divest itself of its physical position, and geographical cause usually spells political consequence. The position, therefore, would be that the Ukraine, which lives by exporting its produce from the Black Sea ports, would have the same interest in the Black Sea and in the Dardanelles question as Russia in the past, with less power to make its voice heard. It could hardly aspire, as Russia aspired, to be the protector of Slav interests in the Balkans, because a protector who is no stronger than that which he protects is ridiculous. On the other hand, it could not simply pursue a policy of negation and isolation. It lies on what must always be one of the high roads of the world's commerce—the great railway line from Lemberg to Odessa traverses practically the whole Ukraine from east to west—and those who build their house on a highway cannot complain if passers-by are more numerous than they like. The passer-by, moreover, sometimes has the awkward habit of mistaking the house on the highway for a hotel and stopping there. The German commercial traveller is already considering the possibility of using the Ukraine after this fashion.

The new Sultan of Egypt assumes his august office at an interesting time, and his letter to the Prime Minister strikes entirely the right note. The frontiers of the country, which seemed threatened three years ago, are now reasonably secure; dangers are dissipated, and the prosperity of Egypt is re-established. The Sultan pledges himself to achieve the full programme laid down by his predecessor, and in particular he mentions the general education of the masses as a necessity for the prosperous future of Egypt. He begins his reign under the happiest auspices, and the whole British Empire will wish him a long and successful period of rule.

Mr. Asquith did well to place in his latest war aims speech the claims of the Balkan nationalities in so clear a light. "Take once more," he said, "the case of gallant Serbia and her neighbours and kinsmen, the Southern Slavs, or that of indomitable Roumania. These little States have as much right to their place in the sun as the richest and most populous and best-armed of those which are called the Great Powers. They have hitherto led a cramped, to some extent a starved and even a mutilated life. To give them their natural boundaries is not merely not an act of aggression; it is to pay a debt long since demanded by justice—it is to bow to that highest form of political expediency which recognises that there is no more noxious breeding ground for war, and the causes of war, than the existence of detached and discontented nationalities artificially severed from their kindred and their proper home."

In view of recent rumours, and the fact that an unfortunate expression in a speech by Lord Robert Cecil some time ago was used in Austria as a basis for the suggestion that Britain was prepared to abandon the cause of Serbia and the Southern Slavs, this straightforward speaking is doubly welcome. The speakers at these meetings state the aims of the British Government with full authority for their words, and they will not be forgotten in Austria. They have already caused something of a commotion in Germany.

Some further particulars of the anti-Armenian campaign have been furnished by an American missionary from Kharput, who reports that the killing off of the males is now practically completed, and the women and children are now being treated in a way which confirms the suspicion that the Turks intend nothing less than the extermination of the whole race. It may be noted, by the way, that Mr. Einstein's book on Constantinople, which has just been published, and which contains the diary of his residence there as a diplomatist during the earlier part of the war, leaves no room for doubt that the German Government were official accomplices of the Turkish Government in this appalling policy. The excuse privately given by the Turkish authorities was that the Armenians knew too much, and were politically dangerous. The fact that, according to Mr. Einstein, there was no particular personal ill-feeling between Turks and Armenians, but that the massacres were ordered and planned as a set piece of State policy, only makes the horror of the thing more complete. Unfortunately the United States were powerless to mitigate the disaster to the Armenians, Western Europe is equally helpless, and Russia, which could by this time have hoped to achieve something, had it not been for internal discord, cannot advance to the succour of a people in whom she has always taken a deep interest.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, Sept. 21.

Courban Bairam.

The feast of Courban Bairam occurs next week, and all Government offices will be closed officially for five days. I say "officially," for in many administrations the stress of work is so great that the staff takes very few days off and will certainly be hard at it for the best part of the coming holiday. As has been done in past years, a Fetwa has been obtained by the Prime Minister from the Ulema of Al Azhar to the effect that there is nothing in the Islamic Laws which forbids the faithful from limiting their sacrifices on great religious occasions to what is strictly necessary, and Rushdi Pasha, in communicating this opinion to the people has enjoined them not to follow their habit of killing large numbers of calves and lambs on the occasion of the feast of Courban Bairam, but to think of the interests of the country, and merely to sacrifice what is absolutely necessary, even if it is only one animal. The Prime Minister has done very rightly to try to prevent the wholesale slaughter which takes place on feast days, for the number of cattle and sheep in the country has decreased very much owing to the reckless manner in which the people have been slaughtering their young beasts and to the additional fact that, except from the Sudan, whence until quite recently very little was received, no livestock is coming in from the countries which in pre-war days supplied Egypt annually with very considerable quantities.

Administrative Changes.

It is said that important changes are about to take place in the higher personnel of at least two Ministries, but it is expected that the return of Lord Edward Cecil will be awaited before any definite decision is taken in the matter of these promotions. Meanwhile the Government is, I understand, studying a scheme for the formation of a new Department to which will be entrusted the task of controlling all supplies in the country. In some circles it is stated that what might be called a Food Controller is to be set up, but it would appear that the scheme is a much wider one than that, and that it will tend to the centralisation of most of the work which is at present being done in connection with the question of supplies by various commissions and administrations. No announcement has as yet been made as to the staff which will be appointed to this new department, but it is understood that it will be a highly qualified one, and will be directed by men who thoroughly understand the subject with which they will have to deal. The Government's decision is a very wise one, for with the almost complete cessation of imports of foodstuffs and of articles of first necessity the internal situation might quite easily become a very serious one, if some responsible and competent authority were not set up to deal with the various problems that are about to arise.

A Potato Famine.

For some considerable time now there has been a potato famine in Egypt, and tubers, which formerly cost about P.T.1 per oke, could with difficulty be purchased at P.T.10 per oke. Many people turned to sweet potatoes, of which there is an ample supply in the country, but the lack of the ordinary variety made itself very much felt. Indeed, it came as quite a revelation to most of us to find how much people in this country generally depended on potatoes in their daily menu. Fortunately, the military authorities happened to have a surplus available, and it was arranged that they should place this quantity at the disposal of the civil population at nominal prices. Last week these potatoes were put on sale in Alexandria and Cairo, but so great was the rush that the distribution had to be suspended. A fresh arrangement for delivery to the public has now been made, and householders are able to procure up to five okes daily at various centres. It is hoped that this supply released by the Army will to a certain extent relieve the situation until the new crop comes on the market.

The Ministry of Justice.

Owing to the enormous amount of extra work entailed by the Capitulations Commission, of which he is commission reporter, Sir William Brunyate, the Judicial Adviser, has found it necessary to obtain the services of an assistant who can relieve him of much of the routine work connected with his ministry, and he has appointed for this purpose Mr. Sheldon Amos, who has just returned from England, where he has been occupied for the past two years on work connected with the war, and who has been seconded from the Native Court of Appeal until such time as his services are no longer required on the administrative side of the Ministry of Justice.

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, September 13.

The Nile Flood.

After a series of cloudy and wet days a spell of hotter weather has set in, and is proving somewhat oppressive owing to the amount of damp in the air. But this is a small disadvantage to set against the prospects of a good harvest. The price of millet has fallen steadily, and there is some hope that it will go below the £T100 mark. The chief object of interest at the moment is the question whether or not the town is to be flooded out. The sea-wall, which has been a project of many years, has been almost completed this year, and it is fortunate that this is so, as the flood is a record, and in previous years would already have been over the bank in different places. Now, however, the water is actually higher than it has ever been known since the present Government was established, and there are reports from Roseires showing that the water is likely to increase yet further. The level at Roseires is 165 cm. higher than it was this time last year, and that was an exceptional year, and the foot that it rose in the last twenty-four hours may be just enough to make the difference. For the difficulty is that the levels of the ground fall back from the river bank, so that if the water does come over the bank it spreads over a considerable area, and will not be able to flow back into the river until the flood level has sunk a good deal. In the meanwhile the water stands and makes a convenient breeding-place for mosquitos and produces all the troubles attendant on stagnant water. This was the state of affairs that caused Khartoum to be called a "death trap" in the old days of Gordon. Now it is only abnormal conditions that can reproduce the old state of affairs. Still, the next few days will be of great interest. It is possible to stave off the flood with sand bags and banks, but to hold up the flood of the Nile is no easier than to curb Mother Gunga.

The Sugar Problem.

The recent visit of Naus Bey was of great interest to the population of Omdurman. He is the guiding spirit

of the Sucreries Egyptiennes, and the price of sugar has been the source of much concern to the native, who consumes an almost incredible amount of that article. The price of the "ras," or loaf, used in peace times to be about 3½ P.T., or 8d. Recently it has been as high as 12 P.T. and even more, and prices in remote places were correspondingly enhanced. The reason was not so much that sugar was not to be obtained, as that there were some "profiteers" who were manipulating the supply to serve their needs. Their consciousness that the arrival of Naus Bey was likely to affect them was shown by the fact that the price of sugar dropped on his arrival from 12 P.T. to 5½, and, though on his departure it showed a tendency to rise, the move seemed to be rather a tentative one, like that of a naughty schoolboy who sees the master's back is turned, and it is not likely that the price will return to such an exorbitant rate of profit as before.

Live Stock.

The cattle market is doing well, and the disease that made its customary appearance seems to have been checked. The advance in prices since the war began has been very noticeable. A bull that at the beginning of the war fetched £8 can now be sold at almost double that sum, and there are cases of animals fetching £20. Sheep, too, that were nominally from 15s. to £1 are now nearer £3. This is no doubt due to the very considerable demand from Egypt.

SYRIAN NOTES.

(From a Correspondent.)

Economic Conditions.

Two persons who are in the best position to know the real facts, and whose moral standing admits of no doubt being cast on the veracity of their statements, have given the following account of the state of Beyrout and the Lebanon at the time when they left the country last June:—

The inhabitants of Beyrout and the Lebanon have borne untold sufferings in this war. Large numbers have died of starvation and of typhus fever, and we have ascertained that some of the villages of the Lebanon have lost one-third and others even more than one-half of their inhabitants. It became a familiar sight for us to see daily on both sides of the streets of Beyrout women and children lying in a state of exhaustion and some reduced to such a condition that they could no longer beg audibly.

Paper money fell in the end to one quarter of its face value, and the prices of commodities, especially of foodstuffs and articles of clothing, rose to unprecedented figures. The paralysis of industry and trade, which threw out of employment large numbers of the working-class, led to an aggravation of the situation. By way of illustrating this appalling state of things the prices of certain articles may be cited:—Wheat, 80 piastres per oke (about 2¾ lb.), the price in normal times being 2 piastres; oil, 80-100 piastres; olives, 50-70 piastres; soap, 80-100 piastres; petroleum, £T15-20 the case of two tins. Under these circumstances, distress was no more confined to the poor, but overtook eventually the upper classes who once lived in ease and comfort. Many of these were compelled to sell their belongings and properties at ridiculous prices; and, as payment was made in paper money at its face value, the loss to them was further increased fourfold. Those who were fortunate enough to find money-lenders had to pay usurious rates of interest. It was not long before many of these exhausted their means and fell to the level of the poor class.

Relief Measures.

Vast sums were received from abroad for distribution among the destitute, and one of these correspondents, who had taken part in this work of relief, solemnly affirms that it was carried out most conscientiously and judiciously. Last winter the Americans organised a relief committee which bought large quantities of wheat and other cereals, and distributed them among the poor and needy of Beyrout and the Lebanon, especially the latter, where distress was most acute; but the ill-starred Syrians lost this last remaining source of help through the rupture of diplomatic relations between America and Turkey. This was, indeed, the crowning of their ill-luck, as the rupture came about just as the American relief ship Cæsar was due to arrive in Syrian waters.

Changes in Turkish Policy.

The largest share of criminality in this wholesale and wanton destruction of life falls to Germany; for it has been established beyond doubt that whole trainloads of foodstuffs were sent from Turkey to Germany while the people in the former country were dying of hunger. The above-mentioned correspondents mention that, judging by news received by them from reliable sources, the economic situation in Anatolia itself is equally grave, though not to the same extent as in Syria. In the case of Syria the situation was aggravated by race hatred, stirred to the pitch of fierce vengeance by the outbreak of the Arab revolt in the Hejaz, which, indeed, the Turks themselves provoked by their insane excesses. The Turkish Government finally awoke, although too late, to its suicidal policy, and, seeing that the country was on the verge of depopulation, and that its productivity was already so seriously undermined that the military situation was threatened thereby through the revictualling problem, it started relief work in the shape of public kitchens and the distribution of bread rations on the ticket system, two or three times a week according to the place and circumstance. A card received by a friend here from a person of the same standing as the above-mentioned correspondents, and who left Syria at the same time as they did, contains the following sentence, which throws a lurid light on the appalling condition of Syria. "There will be," he says, "no grapes this year in the Lebanon, for the famished population had to eat the raw fruit before it ripened." But if the poor and middle classes have suffered so seriously through the economic situation, the financial and trading class of ampler means did not escape the blighting hand of the Turk, who created the occasion through the depreciation of the paper currency. It has previously been explained how Jemal Pasha used the most violent means to enforce the maintenance of this currency at its par value. Since then the change in the military situation in favour of the Allies, and the threatened invasion of Palestine, made the Turks alter their tactics and institute a régime of conciliation, so that, in case of a successful enemy advance in Syria, they should not have to deal at the same time with an enemy from outside and inside. The unfortunate check, however, at Gaza followed by the temporary collapse of Russia's military power, made them revert to their old tyrannical methods, and the correspondents in question mention the names of some well-known merchants whom they met on their way home, who were deported to Asia Minor on account of their legitimate refusal to accept paper money at more than its current value. Indeed, the reign of terror, with its concomitants of hanging and exile, is said to be again instituted in all its former rigour.

According to semi-official news just received, the intervention of the Vatican, in favour of the aged Maronite Patriarch who was deported, together with his episcopal suite, has been fruitless.

CYPRUS NOTES.

(From a Correspondent.)

The End of Summer.

The summer season is drawing to a close. It has not been on the whole a very exhausting one, although there have been, as always, some trying heat waves, especially in August. A few officers and a very few soldiers have been up country to recuperate. A fair number of British residents, especially ladies, who braved the hot season in the plains, have been hospitably received in the few houses and bungalows which exist at a height of over 5,000 ft. The danger, as in India, is that a visit of a few days only is sometimes apt to do more harm than good, and it is hardly advisable to spend less than two or three weeks in these heights. Once you are on Troödos, however, the climate is magnificent under the pine trees. As soon as you leave the shade the heat is, of course, oppressive.

In other parts of the island the slack season has passed in monotony. The telegraph brings war news in brief, but the English papers are anxiously looked for, and the loss of several incoming, as well as outgoing, mails has been much deplored.

The Military Police.

Whatever may happen in the future, near or far, it is not yet fated that Cyprus should become a "place of arms," as Lord Beaconsfield anticipated. After the "retreat of the 10,000" that landed in 1878, the island garrison was fixed at half a battalion, and it was a general's command. So it remained till about 1894, when it was reduced to one company, drawn from Malta or Egypt. It was at one time proposed that even this small British force should be withdrawn, and that reliance should be placed, in accordance with Colonial policy elsewhere, on a native body of police. The peaceful relations on which Turks and Greeks lived together seemed to justify the proposal. It was well, however, that more prudent counsels prevailed, and that the small handful of our men was retained. Time showed that the decision was a wise one. In 1912 disorders occurred which threatened to

Digitized by Google

become serious. On the occasion of a popular festival at Limassol Turks and Greeks came to blows over some insult in a café; the local police could not control the rioters, and the Commandant was obliged to give orders, for the first and only time under British rule, to fire on the mob, which was about to invade the Turkish quarters. Several were killed and others wounded. The island garrison (always until recently quartered during winter about three miles from Limassol), then a company of the Devonshire Regiment, was called in; and another company of the same regiment was despatched from Egypt and sent to Nicosia. Since that time complete tranquillity has again reigned in Cyprus.

The local force of military police has proved an excellent body. Besides their regular duties of keeping peace and order, they are employed on almost every conceivable duty, such as escorting officials and tax collectors, conveyance of specie, work of coastguarding, on quarantine during periods of disease among man and beast, for distribution and posting of innumerable notices, and even as hangmen. To the people in general the zaptieh is the embodiment of executive power, and his uniform, a very becoming one, inspires prompt respect. The full establishment, in a population of something under 300,000, is at present about 788, made up of 23 officers, 250 mounted N.C.O.'s and men, and 515 foot. It is generally slightly under strength. Of the total, one officer and eighty N.C.O.'s and men are detailed for prison duties, leaving about 700 available for general police work. The Chief Commandant, Captain Gallagher, D.S.O., is now on active service. Major Bailey, Commissioner of Papho, is acting for him. The force is distributed among the six administrative districts. Some years ago rural police stations were created throughout the island, and the patrol work has been of very great value in checking crime, especially in stamping out animal thefts, which had been rife. Work has been increased in recent years by the enforcement of martial law. The standard of qualifications has been greatly raised. There are only twenty illiterate men in the force; and no man is enlisted unless he can speak two languages, and write one. Regular classes in English, Turkish, and Greek are held. The comfort of the men in quarters has been increased, though there is still room for improvement in this respect. Discipline is good, and although there is a disposition among natives, regardless of reason, to blame the police for anything that goes wrong, relations with the people of all communities are quite satisfactory, and altogether the force fully deserves the commendation which is generally given to it.

MESOPOTAMIA.

A Proclamation.

A recent proclamation issued by Sir Stanley Maude to the people of Iraq reads as follows:—

Whereas the whole of Iraq, eastward of Kanainiyah, at the junction of the Sakhlawiyah Canal with the Euphrates, and southward of El Ajik, five miles upstream of Samarrah, on the Tigris, is in the effective occupation of the armed forces of Great Britain, and Whereas within that area the authority of the Turkish Government has ceased to be valid, and has been replaced by that of the General Officer Commanding the Army of Occupation, and Whereas the wishes and policy of the Army Commander have been made known to the people of Iraq from time to time in various Regulations, Proclamations, and Notifications issued by him or under his authority, and, further, Whereas it has come to the notice of the Army Commander that there still exists among the people of Iraq, and especially among the people of the Baghdad Vilayet, a certain amount of ignorance and misapprehension as regards certain matters not less vital to their own welfare than to that of the Army of Occupation.

Now, therefore, be it known to all it may concern:—First, that peaceful inhabitants of the country are at perfect liberty to pursue their ordinary occupations so far as is consistent with the military necessities of the Army of Occupation, and are indeed desired to do so; while, in view of the considerate treatment they are thus accorded, they are expected to render obedience to British Officials, to take no part in hostilities, and to refrain from all acts calculated to be prejudicial to the safety and operations of the Army of Occupation; and, secondly, that the acts of commission and omission herein below set forth constitute offences against the authority of the General Officer Commanding the Army of Occupation, and are punishable on conviction of the offender by any competent Court with the penalty of death or any lesser penalty at the discretion of the convicting Court or the Army Commander, whensoever and wheresoever committed, even by persons innocent of any evil intent, to save whom from loss and suffering due to thoughtless acts is the object of this re-statement in convenient form of offences deemed to be prejudicial to the welfare of the Army of Occupation.

Twenty-one major acts of commission or omission are enumerated; they include carrying arms or being in possession of arms or ammunition without proper authority, supplying or carrying information to the enemy, intentionally misleading our troops when acting as guide or interpreter, assisting the enemy, fouling or in any way interfering with the water supply, wilfully causing or attempting to cause inundations, and wilfully damaging or stranding river craft of any kind. The Proclamation continues:—

The following are also offences which are ordinarily punishable on conviction by imprisonment or any lesser punishment:—

22. Failure to extinguish or exhibit lights as prescribed by order of competent authority from time to time.

23. Failure to take out passes as prescribed or to report at such time and place as directed, or without written permission leaving any area within which ordered to reside.

24. Selling any commodity at prices in excess of those prescribed by competent authority from time to time.

25. Furnishing liquor to troops.

26. Evading or attempting to evade Censorship regulations.

27. Making exaggerated or false complaints against troops.

28. Making exaggerated or false claims in respect of damage sustained.

NOTE 1.—This Proclamation applies to and shall have effect throughout the whole of the Occupied Territory without exception, and it shall be deemed to be in force from the date of its publication.

It shall furthermore be held to extend to any territory hereafter coming within the effective occupation of the Armed Forces of Great Britain in Iraq.

NOTE 2.—The offences above set forth shall primarily be triable by Military Courts, Military Governors, Deputy Military Governors, and all Officers generally or specially invested with the powers of Military Governors and Deputy Military Governors, but, if any act of commission or omission declared in the foregoing summary to be an offence against the authority of the General Officer Commanding the Army of Occupation is also an offence against the Ordinary Criminal Law extended to certain portions of the Occupied Territory by regulations of the Army Commander or otherwise, it shall be within the competence of the regular criminal courts established in pursuance of such regulations to take cognisance of and try such offence if there be no military objection to their so doing.

F. S. MAUDE, LIEUT.-GENERAL,
Commanding Army of Occupation.

The New Bridge at Amarah.

On August 15 a new bridge across the Tigris at Amarah was opened for traffic by Major-General Sir George MacMunn, Inspector-General of Communications. The first pile of the bridge, which had long been needed both as a public convenience and for military purposes, was driven on March 25. Four and a-half months later the work was complete, the bridge having been constructed entirely of material, already in Mesopotamia, which could be spared from other works. The following particulars of the bridge, which is to be known as the MacMunn Bridge, are taken from the *Basrah Times*:—

The general arrangement of the bridge is that of two fixed piers carried out into the river from either bank, in line with one another, but not meeting. The gap between them through which the ships pass is 285 feet wide, and can be spanned by a floating structure so attached to one of the piers that it can easily be swung in or out of position, accordingly as it is required to "make" the bridge for traffic to pass over it, or to "break" it for river traffic to pass through it. The two piers or approaches are carried on piles at a height of about 2½ feet above high-water level, and they and the opening portion have an effective width for traffic of 20 feet which is divided between two roadways for horse and wheeled traffic and two footways. The total length of the bridge between the faces of the abutments on either bank is 750 feet. The longer of the two approaches, that from the left bank, is 294 feet in length, and is entirely constructed of timber. The opening portion of the bridge consists of nine steel girder spans of 30 feet centres, carried on ten steel pontoons, each 30½ feet long by 13½ feet wide. This structure is attached at one end by a special flexible hinge to a pontoon at the end of the left bank approach, and when in the closed position the other end abuts on a similar pontoon attached to the right bank approach. These pontoons can move only in a vertical direction, any other movement being prevented by the guide piles between which they are placed. The bridge is opened and closed by a steam winch fixed on the right bank of the river. The two fixed pontoons are connected to the approaches from the banks by means of steel girder ramps each 62 feet long between the centres of their bearings. These ramps allow the roadway to accommodate itself to the rise and fall of the river (7¼ feet) without making an excessive gradient at high or low water. The maximum grade on the ramps during times of low water or highest flood is 1 in 18. The gaps in the roadway caused by the movement of the ramps are always covered and protected by hinged plates. The pontoons and the opening portion of the bridge have been designed to carry a load of 8½ tons moving at fifteen miles an hour. If vehicles moving at this speed are used it will be possible to transport over 20,000 tons across the bridge every hour. The bridge can be opened and closed by three men in 4½ minutes, a considerable contrast with the old bridge, to close which alone took nineteen men—sometimes assisted by a tug—anything from thirty to forty-five minutes.

TANGIER TO TEHERAN

The Ides of October have passed, and with them the Turkish year 1335 comes to an end. In THE NEAR EAST of July 20 I drew attention to the very positive assertions made in a contemporary known as *The Young Man and Woman* regarding the interpretation of Daniel XII., 12: "Blessed is he that waiteth, and cometh to the thousand three hundred and five and thirty days." Here, we were told, was predicted clearly and unmistakably the downfall of Turkey in October, 1917. Why that particular month I did not discover, unless it was that it gave our seer the longest run for his prophecy, as it happened to be the last month of the Turkish year 1335. Needless to say, the challenging of the attempt to restrict the words of Daniel to a certain contemporary event did not imply that my belief in Holy Writ was a whit less profound than that of the editor of *The Young Man and Woman*. On the contrary, tht reluctance to intrude one's limited mundane intelligence into the subject of the prophecy solely with the object of enlivening the pages of a magazine and deriving *kudos* for a palpable guess argues greater reverence for the Word.

***

It would have been particularly gratifying to see the guess "come off"; but even three months ago the prospect of the happening was distinctly remote. Very probably these lucubrations of a contemporary were not intended for critical young men and women, for the mild *caveat* I then entered caused the author at once to hedge. I was taken to task for being too literal. (My sole point was the effrontery of declaring that the fall of Turkey had been "definitely dated to the year, and even day," in Daniel.) Instances were cited of similar attempts to fasten down prophecies to a specific date; the date had passed, and things looked black for the would-be prophet-interpreter, when lo! years or months afterwards something was divulged which went to prove that on that very date the beginning of the end had begun. Very probably the readers of *The Young Man and Woman* will be told to suspend judgment and to continue their subscriptions a little longer. Then when there has been time to forget the details they will be told triumphantly that the seer is justified of his guesses, for obviously the downfall of Turkey is to be dated from the visit of the German Emperor to Constantinople, or from the day of the departure from —— of the additional units which enabled General Allenby to advance at Gaza, or from the date of the manufacture of the last shell which the British forces fired before the Turks surrendered. There are endless possibilities, of course, at this kind of game; but most people will wish that these would-be prophets would leave the Scriptures alone.

***

I feel far more kindly disposed towards the disciples of Joanna Southcott, although here again the precise usefulness of this heroine-worship is far to seek. It seems that in a letter written by Joanna Southcott to King George III., dated December 21, 1802, occurred the following words: "If your Majesty should find it expedient to draw your sword in this war against the Turks, you will be victorious, and you will possess the Holy City of Jerusalem, for the fulfilment of the Scriptures is at hand." George III., however, did not act upon this advice; Great Britain was at war with Napoleon, and the latter chose to attack her through Egypt, which was nominally Turkish territory. The British, acting on the principle of giving battle to their enemy wherever he was to be found, engaged him on Turkish soil, making common cause with the Turks, whom Napoleon had attacked. "The fulfilment of the Scriptures" had to wait, but now Joanna Southcott and her sayings have been revived for Great Britain's present benefit.

***

"Joanna Southcott," runs a communication which has reached me, "is said to be set as a clock to this nation—again the exact hour has struck—[N.B.—Some months ago, evidently.]—for the very day that the news of the victory in Palestine was received in Parliament, that very day No. 13 of the Express leaflets announcing that we are to possess Jerusalem was in the hands of many members of both Houses of Parliament. . . . Whether men believe in them or not, these prophecies are being unmistakably fulfilled. . . . 'Egypt you must first possess.' How true! We are now in secure possession. The very day this republished prophecy arrived in London, a year or so ago, the annexation of Egypt was simultaneously published in the newspapers."

***

There seems to be some confusion here between George III. and George V., but I hardly think that matters. Joanna Southcott, or the somebody who revived her writings, was most comprehensive. Among the things "predicted" were air-raids, trench warfare ("under the type of a flood which occurred at Weston, or Western, Place, Battle Bridge, St. Pancras"), the submarine menace, and scarcity of bread and meat ("foreshadowed by Joanna's appetite being taken from both for three months, June 21 to September 20, which is also set as a sign to this nation"). Having got so far, we are presumably expected to feel all the better for it and for Joanna's prophecies; but do we? Nevertheless, the prophets or the interpreters continue to turn out masses of stuff in which they all thoroughly believe, and are rather hurt if everybody else does not do the same.

CORSAIR.

MONTENEGRINS IN AUSTRIAN PRISON CAMPS.

In these days of universal suffering the common tendency is to accentuate the tragedy that is most familiar. But from time to time stories reach us from distant lands, stories so impelling in their horror, in their cruelty, and in their terrible sadness that we forget the sorrow which is our own, and of our best we give.

An authentic story of the conditions prevailing in the Austro-Hungarian prison camps of Karlstein and Boldogasszony, where thousands of Montenegrins are interned, has just reached the Montenegrin Red Cross and Relief Fund from a neutral, who, because he acted in the capacity of a military chemist to the Montenegrin Government, was promptly interned soon after the occupation of the country by the Austrians, but eventually was released through the energy of his Minister in Vienna, and made his way to Geneva.

He states that the effects of overcrowding at Karlstein are positively inhuman. Irrespective of age and profession, the male population of Montenegro are herded in small insanitary rooms, which cannot be kept clean—rooms that must do duty for cooking, sleeping and living. In order to secure a modicum of health the windows must needs be kept open all night, and at Karlstein it can be very cold. What is the result? Rheumatism in its acutest form is rife, tuberculosis following on its heels, for often these poor folk, in the depth of winter, have to go without coals for ten days at a stretch. True, there is a hospital with five beds, but it is practically useless being transferred to one of these, for there are hardly any medicaments, and, whatever the complaint, there is no variation in the food. Montenegrin prisoners of war stricken with typhus only receive the same measure and kind of food as that served out to healthier prisoners.

How are the prisoners fed? In the morning, tea without bread; noon, about ½ lb. of atrociously bad bread. With this beetroot soup is provided—a tasteless concoction. Meat of a very inferior quality appears twice weekly. At night, stewed potatoes and tea. The dreadful monotony, together with the very bad quality of the food supplied, has brought on all forms of stomach trouble, and also what is known as "hunger typhus."

Add to this pitiable condition of life the absence of warm clothing for the long winter months, the inability to keep healthily warm ill-nurtured bodies, the impossibility of adequate medical treatment for the sick prisoners, and the hopelessly insanitary rooms in which these poor people are huddled together, it is clear that every effort to ameliorate their lot on the part of the Montenegrin Red Cross and Relief Fund produces invaluable results.

At Boldogasszony, in Hungary, the conditions are much worse than at other camps. Rough shanties or huts have been erected in a huge unsheltered field, with practically no room for physical exercise. The interned have no dining hall, no place where to sit or rest. They are compelled to spend their day on their beds, where they must eat, sit and sleep. There the food is worse than at Karlstein—so bad, indeed, that many of those physically able to work begged to be allowed to work in the neighbouring villages, hoping thus to secure better food. Unfortunately no better food came as the result of their labour, and many fell ill and died.

The released neutral military chemist states that "all the interned Montenegrins set their hopes on you—the Montenegrin Red Cross and Relief Fund—and they rely on you to save their lives."

Lady Roper Parkington, the Hon. Treasurer of the Fund, is most anxious to be able to relieve the lot of these suffering people, thousands in number, and any donations towards this end will be gratefully received by her at Claridge's Hotel, London, W.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2.

NEAR EAST BOOKSHELF.

THE GOVERNANCE OF EUROPE.

This book* contains the substance of a course of lectures originally delivered to a large audience of teachers, and intended, in the author's words, to reduce a complex and confused century to comprehensible categories, to emphasise its dominant characteristics, and to render it more easily teachable. Subject to one reservation, the result of this effort is, to our mind, thoroughly satisfactory. The author traces the interaction of the main forces which dominated the political life of the century—the aspiration for European unity, the growth of democracy and nationality, the later rise of the spirit of Imperialism, and finally the German bid for world-supremacy, which, as he clearly shows, is the root of all the evil of the last three years. The treatment of such a vast subject will necessarily give rise to some difference of opinion: encyclopædists and specialists will ask for an ampler supply of dates and facts and details, while a generation nourished on the pictorial system will possibly desire more colour and incident than Professor Hearnshaw thinks fit to supply; but such criticisms are mutually destructive, and really bear testimony to the skill with which large masses of not too tractable material have been reduced to a convenient compass. We welcome, too, the tone in which the book is written: the Professor is not afraid of rhetoric when it is called for by the subject, and there is a refreshing absence of that air of disdainful superiority which mars much of the political writing of the present day. It is a straightforward and well-written book, which can be safely recommended to anyone who wishes to obtain within moderate compass a clear and illuminating summary of the great political movements of the century.

We have made one reservation in expressing this judgment. In a few passages we have noticed what seems to us to be a failure to secure a just historical perspective: past events are occasionally viewed somewhat too much in the light of later knowledge, and consequently insufficient allowance is made for the circumstances of the time. Such passages, as we have said, are few, and we must content ourselves with examining one of them by way of sample. In his preface the author states that the tragedy of the century "consisted in the frustration of the beneficent movement towards a federated Continent peacefully administered under recognised international law by, first, the blind antagonism of reactionaries, and, secondly, the mad perversity, much more fatal in its results, of revolutionaries, idealogues and fanatics." That statement seems to us to describe a truism rather than a tragedy: the world would doubtless have gone better, if human nature had been different; but human nature being what it was (and is), the "beneficent movement" really had no chance of leading to any satisfactory outcome. It consisted, as the Professor shows elsewhere, partly of a vague cosmopolitanism which counted for very little, and partly of that "Concert of Europe" which was an effective agency for a few years after Waterloo. The Concert was inspired by the idea of dynasticism, incarnate in Metternich, the most important person in Europe at the time; to him, and to most of his fellows, peoples existed for the benefit of their monarchs, and to treat this attitude as "reactionary" is to antedate the progress of thought by something like a century. In 1815 dynasticism was still dominant in Europe, and so long as it existed there was no hope of a permanently federated Continent: foundations had to be laid in the individual States before such a superstructure could be even contemplated. Here it is pleasant to remember that England led the way. Castlereagh and Canning wrecked the Concert by asserting the right of every people to determine its own form of government; but in wrecking the Concert they opened a road which seemed to lead to better things. Freed from this incubus, the peoples tried to organise themselves; but, being composed of human beings, they made many and grievous mistakes, so that the conflict between nations and dynasties outlasted the century, and even in 1914 dynastic ideals controlled the fate of the greater part of Europe. They have had heavy shocks during the last three years; the return to Athens of Venizelos is significant far beyond the borders of Greece: America has declared for their final obliteration, and at last there seem to be grounds for hope that the nations will be free to organise themselves on foundations which a century ago had not been laid.

Whether they will succeed in doing so is another question. Professor Hearnshaw concludes his book with the remark that the League of Law is already coming into existence, and we hope that his view is correct; but we should not forget that a century ago the same hopes were not less widely felt. To the larger part of Europe dynasties in those days appeared as stable foundations as the national democracies appear to-day, and we may be as much mistaken as our forefathers have been proved to be. The ideal of organisation on economic lines has probably more adherents now than that of national democracies could claim in 1815, and it is possible that the new League may collapse like the old Concert, because the peoples, who settle these questions in the long run, decide that the foundations must be pulled up and laid afresh. To the reader who desires to estimate for himself the probabilities of such new developments we can recommend no more stimulating introduction to the subject than that which Professor Hearnshaw has provided.

* "Main Currents of European History." By Professor F. J. C. Hearnshaw. (Macmillan. 7s. 6d. net.)

BOOKS RECEIVED.

At the Front in Macedonia. By E. P. Stebbing. (London: John Lane. 6s. net.)

Gems of Arabic Literature. By Syed Hamood Hason, Headmaster, Government Anglo-Vernacular Schools, Crater, Aden. (Aden: Rs.7.)

The Question of the Bosphorus and Dardanelles. By Coleman Phillipson and Noel Buxton, M.P. (London: Stevens and Haynes. 12s. 6d. net.)

BOOK NOTES.

Mr. Edward Arnold will shortly publish Captain E. Crawshay's "Lines from an Officer's Note-book," the scenes of which range from Ypres to the Mediterranean, and close in the fighting zone of the Sinai Peninsula.

"The Frontiers of Language and Nationality in Europe," by Mr. Leon Dominian, is about to be published by Messrs. Constable on behalf of the American Geographical Society of New York.

Messrs. Chapman and Hall will publish at the beginning of November a new record of campaigning experiences on the Eastern front, by Mr. R. Scotland Liddell, entitled "Actions and Reactions in Russia."

Messrs. Allen and Unwin have just issued "Bohemia's Case for Independence," by Dr. Edouard Benés. The volume contains an introduction by Mr. Henry Wickham Stead.

The story of the operations in Mesopotamia, down to the capture of Baghdad by General Maude last March, is continued in Part 164 (Volume 13) of *The Times* History and Encyclopædia of the War, which has just been published, at the price of 8d.

LETTERS FOR MESOPOTAMIA WOUNDED.

The Postmaster-General announces that delay is avoided if correspondence for officers and men of the Mesopotamian Expeditionary Force who are invalided in Mesopotamia or invalided to India is addressed as follows, and not to a particular hospital: If in Mesopotamia, care of Casualties, Busreh; if in India, care of Casualties, Bombay. In each case the address given should be preceded by the number, rank, name and particulars of the unit. This form of address should be continued to be used until the addressee is known to have returned to duty.

PARCELS FOR PRISONERS IN TURKEY.

The Postmaster-General announces that, according to information furnished by the Swiss Post Office, the recent suspension of the parcel post to prisoners of war in Turkey in Asia, other than those interned at Magnesia, has been removed. Parcels for prisoners of war in Turkey in Asia, as well as parcels for prisoners in Turkey in Europe, are therefore again being accepted at post offices, subject to the general regulations governing the acceptance and transmission of parcels for prisoners of war.

The "Lion Sermon," which was founded in the seventeenth century by Sir John Gayer, a Lord Mayor of London, to commemorate his escape from a lion in Arabia, was preached on October 16 at the Church of St. Katharine Cree, Leadenhall Street. Sir John left a sum of £200 for the purpose, but this money has long been diverted to other uses, and the service is now continued voluntarily.

Any Books mentioned on this page, or any other Publication, can be obtained at the published price, plus 3d. postage in the United Kingdom, or 6d. abroad, from

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. October.	1917. October.		1336. Muharram.	5678. Heshvan.
19	6	Friday	3	3
20	7	Saturday.....	4	4
21	8	Sunday	5	5
22	9	Monday	6	6
23	10	Tuesday	7	7
24	11	Wednesday	8	8
25	12	Thursday	9	9

Having concluded its work at Salonika, the Serbian Government has returned to Corfu.

Lady Barclay, wife of the British Minister in Roumania, has arrived in London from Jassy.

The Persian Minister was among the diplomatic visitors at the Foreign Office on October 11.

Mr. R. E. More, Governor of Khartoum Province, returned from leave last month to Khartoum.

Prince Antoine Bibescu, First Secretary to the Roumanian Legation, has returned to London from the Continent.

Colonel P. Peshitch, Chief of the Serbian Headquarter Staff at Corfu, arrived in London on October 15.

Major Hibbert, who was temporarily attached to the Civil Secretary's office, has taken up his work as Inspector of Khartoum.

The Earl of Galloway, who served with the Black Watch in the Crimea and the Mutiny, celebrated his eighty-first birthday on October 14.

A memorial service for Miss Agnes de Selincourt, Principal of Westfield College, was held at St. Luke's Church, Hampstead, on October 11.

Colonel Tralescu, of the Roumanian Army, has arrived in London. He was formerly Military Attaché at the Roumanian Legation in Rome.

The Home Member of the Government of India has introduced a Bill into the Supreme Legislature providing for a censorship of cinema exhibitions.

The *Osservatore Romano* formally contradicts the statement that Mgr. Camassei, the Latin Patriarch of Jerusalem, is a prisoner in the hands of the Turks.

The Bhavnagar Medal, for Indian Civil Service candidates at Cambridge University, has been awarded to Mr. S. L. Mehta, B.A., Ahmedabad and Clare College.

Lord Granville, the new British Minister to Greece, has been received at the Palace in Athens with the usual ceremonial on presenting his credentials to the King.

Mr. R. A. Bence Pembroke left Khartoum at the beginning of September for a holiday in Egypt. On his return he will take up the duties of Inspector of Khartoum North.

Lieutenant-Commander Aristide Moraïtinis, Royal Greek Navy, attached R.N.A.S., Eastern Mediterranean, and brother to Mrs. Cecil Pilcher, has been awarded the D.S.O.

TRAGEDY OF MONTENEGRO,

THE SMALLEST AND POOREST OF OUR ALLIES.

MONTENEGRIN RED CROSS

AND RELIEF FUND,

11, VICTORIA STREET, LONDON, S.W.1

(Registered in City of London. Section 1. War Charities 1916)

needs £700 WEEKLY for Feeding Prisoners interned in Austria-Hungary.

Donations will be much appreciated and gratefully acknowledged by the Hon. Treasurer, LADY ROPER PARKINGTON, Claridge's Hotel, Brook Street, London, W.1.

M. Victor Jonescu, brother of M. Take Jonescu, arrived in London recently on his way to Lisbon, where he has been appointed Envoy Extraordinary and Minister Plenipotentiary.

The Committee of the Greek Blue Cross have decided to dedicate the sum of £E4,000 for the purchase of surgical instruments and the equipment of an ambulance for the Greek army.

Captain E. C. Midwinter, C.B., C.M.G., D.S.O., General Manager of the Sudan Government Railways, who has been on leave in England for some months, is returning to the Sudan this week.

The Rome correspondent of the *Morning Post* states that M. Pashitch is about to form a Coalition Ministry of all parties, retaining the Premiership himself. M. Stojanovich will probably become Foreign Minister.

The Greek Chamber has welcomed the proposal by the Government to award a pension to the daughter of Mr. Stevens, the war correspondent (who was killed in London in a recent air-raid), for services rendered to Greece.

In the Vienna Reichsrath, on October 2, the Slovene Deputy, M. Benkovitch, stated that in Bosnia in one day 100 persons were sentenced to death by a military tribunal and summarily shot. The rest of his speech was censored.

A marriage has been arranged, and will shortly take place, between Lieut. Hough, West Yorks, eldest son of Mr. V. Lacy Hough, East Malling, late Civil Commissioner of Burma, and Miss Ethel Perry, second daughter of R. Perry, Esq., M.D., F.F.P.S., Glasgow.

The Times states that Baron Mongheur has been appointed Belgian Minister to the Court of St. James's, in succession to M. Paul Hymans. Baron Mongheur, who was formerly Belgian Minister to Mexico and to the United States, was Minister to Turkey at the outbreak of war.

Miss Alice Sergeant, Assistant Lecturer in History at Westfield College, London, has been appointed as Inspectress of Schools in Madras in the Indian Educational Service. Miss Anderson Scott, of Newnham College, Cambridge, has been appointed to succeed her in residence for the session at Westfield College.

It is reported from Cairo that the Australians with the Egyptian forces intend to erect a memorial to their comrades who have fallen in Sinai and Palestine. The memorial will probably take the form of a broken column, and will be erected on the bank of the Suez Canal. The New Zealanders are planning a similar memorial.

The Roumanian Minister, M. Nicolas Misu, visited Bath on Tuesday, and was entertained at luncheon by the Mayor at the Guildhall. After the luncheon Mrs. Gordon, F.R.G.S., gave a lecture (illustrated by lantern slides from photographs sent by the Queen of Roumania) at the Pump Room, at 5.15, in aid of the Roumanian Red Cross Hospitals.

The Government of Bombay are remaining at Poona during the present month, and are thus modifying the practice of two annual visits to Mahableshwar. The first migration to Mahableshwar takes place in the spring, and then the Government goes on to Poona for the monsoon, returning to Mahableshwar at the end of September for a month or so before going to Bombay.

The postal organisation established for the kingdom of the Hejaz, says the *Egyptian Gazette*, is gradually developing its series of postage stamps. They are long oblong labels of purely Arabesque design and inscription. The regular postage stamps now comprise five denominations—viz., ⅛ piastre, yellow; ¼ piastre, green; ½ piastre, scarlet; 1 piastre, blue; and 2 piastres, claret.

At a meeting of the Wantage Lodge, No. 3,178, at Princes Hotel, Jermyn Street, on October 16, Mr. A. S. M. Anik was installed Worshipful Master, being the first member of the Bhorah Moslem community to reach the chair of any lodge in this country. The function was the occasion for a distinguished gathering, and the messages of congratulation included letters from the M.W.G.M. the Duke of Connaught, the M.W. Pro G.M. Lord Ampthill, P.G.M. Lord George Hamilton, Mr. Montagu (Secretary of State for India), and the Aga Khan.

According to a Constantinople telegram, extensive preparations were made for the impending visit of the Kaiser. The Sultan, surrounded by the Imperial Princes, members of the Cabinet, Senate, and Chamber of Deputies, received his guest at the station, and the two monarchs subsequently drove to the Palace, where the German Emperor was to reside. According to later information, the Sultan has conferred on his guest the Diamond Star of the Iftichar Order, the highest Turkish war decoration, while the Kaiser has conferred on the Sultan the star and chain with diamonds of the Order of the House of Hohenzollern. Later a conference took place between the Monarchs, which was attended by Talaat Pasha, Enver Pasha, Hakki Pasha, and Baron von Kühlmann.

The Crown Prince and Crown Princess of Serbia, who are visiting the West Riding in order personally to thank Yorkshire for help given to Serbia, were entertained at luncheon at Bradford by the Lord Mayor on October 17. Subsequently they attended a civic reception at Halifax and visited a number of mills and the hospital.

The marriage arranged between Geoffrey Leonard, only son of Sir Henry Winterbotham, K.C.S.I., and Lady Winterbotham, of Hill Grange, Leckhampton, Cheltenham, and Hilda, youngest daughter of Mr. D. Norton, C.S.I., and Mrs. Norton, of Engedi, Eastbourne, will take place quietly at St. Saviour's, Eastbourne, at 2.30 p.m. on November 3. There will be no reception, but all friends will be welcome at the church.

OBITUARY.

Mr. Saroda Charan Mitter, late Judge of the Calcutta High Court, has died at Calcutta in his sixty-ninth year.

The death occurred on September 30, from wounds received in action the same day, of Mr. P. L. Smith, a former member of the London staff of the Imperial Ottoman Bank.

The death occurred on October 13 of Colonel Sir Edward Thomas Devanant Cotton-Jodrell, K.C.B., of Reascheath Hall, Nantwich, in his seventy-first year. He was the son of G. E. L. Cotton, late Bishop of Calcutta, and assumed the name of Jodrell in 1890.

The death took place on October 11, after a severe operation, of Mr. John Gorman Ford, the son of Sir Francis Clare Ford, G.C.B., G.C.M.G., who was at one time Ambassador in Madrid, Constantinople, and Rome. Mr. Ford was also in the Diplomatic Service.

Second Lieutenant K. Gulbenkian, Middlesex Regiment, who fell on September 20, was born in London in 1891, of Armenian parents, the late Mr. Garabed Gulbenkian and Mrs. Gulbenkian, of 2, Holland Park Avenue, W., and was educated at St. Paul's School. He enlisted at the outbreak of war in the Middlesex Regiment, and after serving in the ranks as 1st Class Signaller, he was recommended for a commission last February and sent home to join an O.T.C. He received his commission in July, and returned to the front on September 1.

Second Lieutenant Derek Percy Cox, R.F.C., who was returned as missing on August 21 last, and is now reported to have been killed on that day, aged 21, was the only son of Major-General Sir Percy Cox and Lady Cox. He was educated at Harrow, Woolwich, and Sandhurst, joined the Machine Gun Corps early in 1915, and remained with this corps until he was transferred to the R.F.C. in May, 1916. In October, 1916, he was invalided home, and after two months' leave rejoined the R.F.C. in England. Having obtained a pilot's certificate, he went to the front again last June, and remained there until his death.

APPOINTMENTS, PROMOTIONS, ETC.

Kaimakam F. Bonnelli Bey, Assistant Commandant of the Suez Canal Police, who had been attached to the Alexandria city police for a few weeks, has been detailed for temporary duty at the Ministry of Interior.

Among the appointments and transfers published in the *Sudan Government Gazette* are the following :—

El Bimbashi R. P. Mahaffy, transferred to the Sudan Government, is appointed District Judge, Legal Department.

Mr. H. B. Johnston, transferred to the Sudan Government, is appointed Assistant Marine Biologist.

El Bimbashi G. G. Macdonald, transferred to the Sudan Government, is appointed Inspector of Agriculture.

Captain H. W. Bedford, transferred to the Sudan Government, is appointed Assistant Entomologist, Education Department.

El Bimbashi M. W. Gray, transferred to the Sudan Government, is appointed Inspector of Agriculture, for duty with the Resources Board.

El Bimbashi V. P. Walley, transferred to the Sudan Government, is appointed Inspector of Agriculture, for duty with the Resources Board.

El Bimbashi G. H. Corbet, transferred to the Sudan Government, is appointed Inspector of Agriculture, for duty with the Resources Board.

El Bimbashi J. Stevenson Hamilton, 2nd Inspector, Mongalla Province, has been appointed a Magistrate of the First Class under the Code of Criminal Procedure.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

JACOMB.—On October 10, at Beni Swef, Egypt, the wife of E. Bernard Jacomb, Egyptian Irrigation Service, of a son.

MAUDE.—On Monday, September 24, 1917, at the Deaconesses Hospital, Cairo, the wife of J. Lupton Maude, of a son.

DEATHS.

ASKEW.—On October 5, drowned in Mediterranean by enemy submarine, Claude Arthur Cary Askew, Major, attached Serbian Army, and Alice, his wife.

COLLEY.—On October 5, in Egypt, Robert William Colley, of Cairo, only son of the late Robert Colley, of Paddington, and Mrs. Colley, Tunbridge Wells, aged 32.

VAN HORNE.—On September 20, at her residence, Schutz, Ramleh, Rebecca Ashton, wife of William Grant Van Horne.

NAILER.—On October 12, 1917, at 37, St. Michael's Road, Bedford, Lieut.-Colonel H. A. F. Nailer, late I.M.S. (retired). (Indian papers, please copy.)

OMAN.—On October 8, at Hill Side, Gibraltar, Niel Oman, Esq., M.D., Port Surgeon, aged eighty-two.

ROLL OF HONOUR.

COX.—Posted as missing on August 21 last, now reported killed on that date, Derek Percy Cox, Second Lieutenant, R.F.C., dearly-loved only son of Major-General Sir Percy Cox and Lady Cox, aged 21 years.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.). ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

FRIDAY, OCTOBER 19, 1917.

THE ALLIES' WAR AIMS.

A spirit of misgiving is abroad which affects to have reason for supposing that the Allies, and in particular Great Britain, are turning over in their minds possible terms of peace with a view to hitting upon a decent minimum, rather than to insisting at all costs upon the ideal maximum. No definite grounds for the fears entertained are given, and we find it difficult to believe that they have any real justification. But that they exist, both in this country and among certain of the Allies, is evident, and in such circumstances no opportunity of exorcising them ought to be lost. It may be that more than was necessary has been read into omissions on the part of Government spokesmen when they have referred in general language to peace conditions. The aspirations of all the Allies now cover so much ground that it is almost impossible to enumerate them at length within the compass of a single speech. The ordinary speaker is tempted to confine his remarks to such points as will be as familiar to his audience as they are to himself. But a too frequent reiteration of the Allied aims in Western Europe without any detailed reference to the prospective settlement in the Near East is bound sooner or later to create misunderstanding. Such a stage would seem now to have been reached, with the result that here and there doubts are thrown on the Allies' resolve to see the war through to its logical and necessary conclusion. Mr. Asquith's latest speech will have served to correct this impression, but it ought to have been recognised that the Allied war aims have been set forth on several occasions. They were stated very definitley in the reply given to President Wilson when they were declared to include "the restitution of provinces formerly torn from the Ailies by force or against the wish of their inhabitants; the liberation of the Italians, as also of the Slavs, Roumanes, and Czecho-Slovaks from foreign domination; the setting free of the populations subject to the bloody tyranny of the Turks; and the turning out of Europe of the Ottoman Empire, as decidedly alien to Western civilisation." It is difficult to see how the Allies can recede from the determination thus clearly expressed. Until the details have to be worked out they may appear not to have realised the full significance of the undertaking given; but there can be no question, when it comes to the conclusion of peace, of their failing the natianalities to whom they are so solemnly pledged.

It would be especially unfortunate that, at a moment when the Roumanians are making, perhaps, their most valuable contribution to the Allied cause, they should be allowed to feel the least uncertainty in regard to the ultimate realization of their national aims. These entail "the liberation of . . . Roumanes . . . from foreign domination." The reference is primarily to the three and a-half million kinsfolk in Hungary and to a further quarter of a million in the Bukovina. There is no need here to labour the conditions under which the Roumanians in Transylvania have lived for many centuries, and more particularly during the last fifty years, when the sense of national unity with the kingdom across the Carpathians has been felt more strongly, and when, in the face of the suppression awaiting it in Hungary, all intellectual thought in "Romania Irredenta" was forode to seek refuge in Roumania, and served to kindle the feeling of solidarity between the two parts of the nation. Suffice it to say that for many decades the liberation of the Roumanians under the Austro-Hungarian yoke has been the main goal of Roumania's policy and provided the stimulus that prompted her to stake everything in a war on the side of the Entente. There should, therefore, be no more room for doubt in the mind of any Roumanian than there is among the Belgians that the end of the war will mean the realization of all their aims. It may be, indeed, that the Roumanians will even gain more than they had dared to expect. They entered the war without, as far as is known, any definite understanding in regard to Bessarabia. If Russia adheres to the intentions she now professes she may elect of her own volition to restore that province to Roumania, and thus to complete the union of a race which will form a homogeneous State of thirteen million people. In the case of the Southern Slavs there must be less cause for uncertainty in regard to the Allies' intentions; but the attainment of the national goal presents greater difficulties. A settlement has first to be reached with Italy, and then the details of a working federation among the various Jugoslav units have to be arranged. Steps have already been taken in both directions, in the negotiations between the Serbian Prime Minister and the Italian Government, and in the Corfu Agreement. A Southern Slav State is assured with the victory of the Allies; the only point in which it may disappoint some expectations may be in regard to its actual boundaries.

Until there is evidence to the contrary, we must suppose that the Allied Governments are satisfied that the success of the Grand Alliance spells the attainment of the national aims in greater or less degree for all concerned. It is, however, in the minds of the people that the misgivings have arisen; and while confirmation of them may be sought in the omissions in the speeches of public men, they will have been caused in the first instance by the misguided utterances of those who have set themselves to discover short-cuts to peace. The "peace without victory" theory still lingers in some quarters. For those who entertain it the war is to be brought to an end by bargaining, and naturally the aims in which they feel least interested are to be sacrificed in the attempt to let the enemy down lightly. Belgium is near enough to Great Britain to enable the seekers after an early peace to appreciate the desirability of complete restoration and reparation; the Serbians and Roumanians also provide instances of a people expelled from their own country, and so must be reinstated with or without compensation; some allowance is also made for France's prescriptive right to Alsace-Lorraine. Beyond these cardinal features all claims or aspirations are apt to be classed as imperialistic, and, therefore, to be ignored or sacrificed. The short-sightedness of such a view is, or ought to be, apparent. Apart from the fact that the feelings of exiled Belgians or Serbians have been hardly more harrowed than those of the Southern Slavs and Roumanians under the Austro-Hungarian yoke, there is the outstanding goal for the attainment of which all this blood and treasure have been shed for three long years. There can be no permanent peace in Europe until the nationalities whose sufferings under foreign domination have been a constant source of friction or unrest have been freed and left to work out their own political salvation. The liberation of Slavs and Czecho-Slovaks entails the break-up of Austria-Hungary, however much some people may wish to close their eyes to the fact. As the Dual Monarchy will only accept its fate when it has acknowledged defeat, it is foolishness to talk of peace until victory has been won in the field. Fortunately for the Allies, this break-up of Austria not only spells liberty and justice for subject nationalities, but supplies the needed guarantees for a long, if not permanent, peace. A Southern Slav State of twelve million inhabitants and a Greater Roumania of thirteen million will interpose so effective a barrier to Austro-German designs on the East and, through the East, on the peace of the world, that these consummations must necessarily figure in the forefront of the Allies' war aims.

A PILGRIMAGE TO NICÆA.

THE CITY OF THE CREED AND THE CRUSADERS.

The East seems ever to have been the land of pilgrims and the place of pilgrimages. Jerusalem and Mecca, both within the borders of the Ottoman Empire (at least until recently) have called, and men have straightway set their faces towards them for centuries. It is like the call of the Spring, to which everything that has life must respond.

Nicæa, the special city of our springtime pilgrimage a few years ago, may be as the bird flies forty miles from Constantinople, but after the less buoyant fashion that men may travel it is reckoned some sixty miles from the old Byzantine capital. The easiest way to journey to it in these days is to cross the Bosphorus in the early morning, when the sun paints anew—always in rose colour—the domes and minarets of Santa Sophia and her alien sister mosques.

Just opposite Seraglio Point, on the Asian side, is the starting-place of the Anatolian railway, with trains not many times a day for points in Asia Minor and that further mysterious region we call The Interior. From this Haidar Pasha, once a part of old Chalcedon, "the city of the blind men" (for blind were they who first chose to locate a city here rather than where later was located Byzantium!) we set forth almost exactly in the path of the old caravan route to Baghdad. At pretty towns we frequently paused, with the Sea of Marmora, the Isles of Prinkipo, and later the Gulf of Nicomedia on the one side, and vine and olive-clad slopes on the other.

Our little company of pilgrims consisted of four persons, one of the four, happily, a historian. "You will notice," said he, "the great number of cemeteries along this route. A large part of them, I fancy, are pre-Turkish, the old burial-places being adopted by the successive races who have occupied this region. Were one to excavate here he would doubtless come across interesting Greek and Roman inscriptions."

Within two hours we reached the station of Guebzeh. Here below us, on a picturesque rock near the sea, were the ruins of an old castle and fortifications—all that a ruin should be, with towers and crumbling walls overgrown with ivy. "This we know little about," said our historian. "It was probably occupied by the Turks before and after the taking of Constantinople, and was evidently rebuilt by them from material of a building that already occupied the site." It was a one-time Byzantine fortress.

The town of Guebzeh was lost above us in a little hollow among the high hills some three miles from the station. But on one of the highest points in all this region stood two sombre patriarchal cypress trees darkly outlined against the warm sky. They mark the traditional site of Hannibal's tomb. History proves pretty clearly that the great Carthagenian (some call him a greater than Alexander who also came this way), wearied by battles and pursued by enemies both at home and abroad, after various wanderings gave up the fight at a city by these shores. Tradition says that he lies here, guarded by the two cypresses, those "only constant mourners of the dead," as Byron calls them. We are learning now to listen to tradition and find that it is often able to verify history. At any rate, in this instance both tradition and recent archæological research agree in locating Hannibal's last resting-place to this immediate region.

The train bore us on, past fields of flax, exquisitely blue of blossom, to Nicomedia, at the head of the gulf that bears, or once bore, its name. Now both are called Ismidt. Of the old Nicomedia, the once brilliant Roman capital and largest city of Asia Minor, so full of noteworthy buildings in Pliny's day, and still further ornamented by Justinian, where the Christians were persecuted by Diocletian, and where died Constantine the Great, there are very few remains. Nothing, however, can mar its incomparable site, and the Turkish town of to-day, while not imposing, is not unpleasing in its appearance.

From Ismidt the railroad runs along the shores of Lake Sebanja, and the high hills in the background have already grown to be mountains. Beyond the lake comes the broad and fertile valley of the Sangarius, over which stream Justinian built his famous bridge that bore, in effect, this inscription:—"Thou also . . . Sangarius . . . whose impetuous course is stayed by these arches—thou flowest now a servant of imperial labour, formerly rebellious to boats and formerly indomitable, now thou art girded by an inflexible stone." The river since that time has seen fit to change its course by a detour of many miles, but the bridge remains a very romantic and decorative, if not useful, specimen of Roman architecture to grace the landscape.

Through this valley of the Sangarius we swept by fields, ready for the opium gatherers, of white and purple poppies looking like huge tissue-paper flowers, and as if they ought to rustle as the breeze passed over them. Then for a short distance the mountains closed in upon the stream, by the side of which the railway ran, making a narrow winding cañon and lending a brief Swiss element to the landscape. Lastly, we came to Mekejeh, where we left the train and bargained with wild-looking picturesque men, wearing embroidered waistcoats, baggy trousers, and yards of gay silk belt holding grim weapons, for still more picturesque-looking *arabas*, or native wagons. Along with these arabas and their *arabajis* (drivers) usually go two or four mounted *zaptiehs* (guards), as for many years past these mountains have not been free from at least the suspicion of brigands. Our arabas being in readiness, and our bargaining quickly done, we began the long climb, up, up the mountains that separated the valley of the Sangarius from the valley of our desire on the other side. Looking below us we saw a little cluster of ruins, a tower and fortifications—our first real reminder of Crusader times, although we had come by a Crusader line of march.

Two hours more and we were on the summit of the pass! Away in the distance before us and below us lay a bit of shining surface that we knew to be Lake Ascanius. Nicæa, at its head, was still too distant to be discerned as a separate object in the landscape, but the mountains round about rose gloriously, full of colour and restful majesty. It was at twilight time that we descended into the valley—a valley that with its lake and surrounding heights made as fair a picture as ever a May-day afterglow and crescent moon could outline. It was Italian in colour and feeling; it was Asia Minor in its mystery and suggestion.

Isnik is the name by which Nicæa is called to-day. Its small population is Moslem and Greek, and of industries the cultivation of the silkworm furnishes the greater part. Its few hundred houses or mud huts have shrunken into the centre of the large space enclosed by the noble line of walls and towers; it is like a lonely, pitiful little dwarf trying to make a home in a great ruined palace. There were four gates leading into the city in the olden days; the Lefkeh gate, the Stamboul gate, the Yenishehr gate, and the water gate. We entered by the imposing Lefkeh gate or gates, for there are here three lines of walls, each with a characteristic entrance, through which an ancient aqueduct, one of the five aqueducts built by Justinian, still leads waters from the mountain to distribute in fountains and flowing streams throughout the town. Within the walls a lane running through cultivated fields and avenues of plane and mulberry trees led us into the narrow streets of the town, and to the house that was to shelter us for the night. The muezzin was making his last musical call to prayer from the minaret of the green mosque, the nightingales had begun their sweet, intermittent

serenades, and the storks had flown home to their nests on roofs and ruined towers, there to stand as picturesque sentinels through the night. In the little courtyard of our hospitable, though primitive, Hotel de Nicée were gathered suggestive bits of marble-heads, torsos, and stones bearing inscriptions in a classic tongue. These were the first outward evening impressions of the four pilgrims to Nicæa.

In the morning, a morning all sunshine and warmth, came the question: "Where are we to begin? At what shrine were we first to pay tribute?"

"Let us climb some height that we may get a general outline of the walls, which are in point of architecture and preservation, together with those of Constantinople, the most interesting city walls in existence to-day!" said our historian.

A minaret set in the heart of the town seemed the nearest and likeliest vantage point, and this we climbed to find the little world we sought at our feet. There lay the complete circuit of the walls, with their massive gates and stately towers; here and there were a few breaks and openings to suggest battering armies and the successive sieges they have suffered from the Arabs, Greeks, and Latins. We soon came down from our winding citadel to make the acquaintance in detail of the walls, the gates, and the ruins of Santa Sophia, and to visit parts of the surrounding country. A second and broader general view was taken later from the hillside back of the town, where rests a part of a sarcophagus, cyclopean in size, of good workmanship, and belonging evidently to an early period. For whom it was made and for what place intended even tradition has no explanation. It was doubtless being borne to some other place and was left temporarily, and as it proved permanently, on this hillside to make another point of pilgrimage for Nicæa pilgrims.

But to return to some of Nicæa's monuments within the walls. To the north are the ruins of the old theatre. Lacking a hillside into which to build its raised seats, after the fashion of Greek and Roman theatres, those early architects went into the earth and built a foundation of sloping arches, still singularly well preserved. The large auditorium of the theatre itself is now appropriately overgrown with blossoming poppies—the flower of oblivion. Nearer the centre of the enclosure are the ruins of Nicæa's Santa, or rather, Agia Sophia, where that somewhat inglorious second Council of the Church was held in 787. It was during the reign of the Empress Irene, and as the circumstances connected with it are somewhat romantic as well as interesting, I will briefly tell the story:—

During the seventh and eighth centuries Christianity was the religion of the State. The populace had been ordered to become Christians; but the Christianity they adopted and the paganism they abandoned became strangely interwoven. They carried their pagan forms into the new religion, and image-worship showed signs of being as conspicuous a feature in the new as it had been in the old faith. This was especially the case, as might have been expected, in Greece. The opponents of the new idolatry, known as the iconoclasts or image-breakers, were strongest in Constantinople. The advent of Irene to the throne greatly discouraged them. She was a bright Greek girl, had been brought up in Athens, and was greatly addicted to the semi-pagan practices which the iconoclasts opposed. When she failed to win over the opposing faction in Constantinople to her side (they were the puritans of her age, and would have no kind of picture or image-worship), she accepted the proposal to have a council of the Universal Church in the capital in order to arrive at an authoritative decision. Bishops came from all parts of the Christian world and met in Santa Sophia—in Constantinople's unsurpassed Santa Sophia. When the iconoclast population learned that the majority appeared opposed to the iconoclast reformation, they met in the hippodrome and attacked the members of the council. Thereupon Irene, wilful lady and Sovereign, suggested that the sittings should be transferred to Nicæa. The proposal was gladly accepted. Probably the fame of the great Council of 325 had much to do with the choice of Nicæa as a debating ground. At any rate, to this city they came, and the place where they met was in this early church of Agia Sophia. In that day it was a stately well-proportioned building; a basilica in shape, but with a dome which in this respect marks an epoch in Byzantine architecture. At the present time its ruined walls furnish homes for nesting storks—the patron bird of Asia Minor. It seems also to be the haunt of wandering dervishes, and of beggars with claims on one's sympathies that cannot be denied. But before passing on to the description of the Nicæa of to-day I must not fail to say that the decision arrived at by Irene's Council was that while paintings might be allowed in the churches to aid in the devotions, sculptured images were forbidden.

Quite near to the Lefkeh gate is the Yeshil Jami, the green mosque, built in the golden days of Seljukian art by a grand vizier of Murad I. Its graceful minaret with the green tiles, the charming façade with its columns bearing ornate and original capitals, the delicate carving observable throughout the whole exterior, make it one of the rarest specimens of architecture of its kind in all Asia Minor. Indeed, it is the one artistic building, together with its *medresseh* and *imâret*, that is left to grace the Nicæa of to-day.

MARY A. POYNTER.

(To be continued.)

CORRESPONDENCE.

THE CAROB TREE IN CYPRUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In my last letter allusion was made to the difficulties encountered in carrying out the Agricultural Department's instructions in dealing with carob disease.

My experience in the year 1916 bears out my contention that the combat cannot be carried on with success if entrusted to the peasant proprietors alone. For my own part, I devoted my whole time to the work from the middle of August to the end of September. I sweltered in the sunshine and the heat, and personally watched those engaged in cleaning the trees. I found that men only were useless, for they could not move along the branches and pick off the blossom. I employed small boys, with a man who remained on the ground, who cleaned what was within his reach and directed operations generally. Let me quote from the Government "Gazette":—"Owners of carob trees shall remove all carob beans suffering from plant disease as well as all flowers, and the bare axes from which stunted fruit may have fallen. All such beans, flowers and axes shall be knocked off and the fruit forthwith collected and burned or buried in quicklime."

The work was carried on for forty days, as prescribed by law, and yet some trees were untouched. To knock off flowers in October would have meant absolute loss of next year's crop. I may here say that the trees which were not taken in hand produced as large a crop in 1917 as in 1916. The evidence of my own eyes is that all the blossom knocked off in September does not come again, and the conclusion is that a diminished crop in the succeeding year follows the faithful carrying out of the official instructions.

My crop of carobs for 1917 was very much smaller than that of 1916. Some trees which had been rigidly stripped of blossom during the month of September produced scarcely any fruit. My armament for carrying on the campaign consisted of a forester's ladder, a step-ladder 12 ft. in height and a wheelbarrow. These were all required in order to reach certain parts of the trees, and even with their assistance it was impossible to reach all of them.

Political Parties in Bulgaria.

An Austrian writer has recently given the readers of the *Pester Lloyd* a diagnosis of politics and political parties in Bulgaria. He has little that is new to say on the subject, but the source of the commentary makes it of interest. Probably he has been at pains to represent the Bulgarians as being a little more politically inclined than they really are. Formerly the main concern of the peasant was his own land, and he was content to leave politics mainly to the few who made a living out of it. Whether five years of war has changed all that must remain for the present an open question.

I have counted ten parties, eight of which represent the *bourgeois* section. What of their programmes? The Bulgarian is a patriot to the tips of his fingers, and a conscious defender of the people's rights. The ancient nobility disappeared completely during the five centuries of Turkish rule, and a new one has as yet scarcely appeared. The land and all movable property are still equally distributed, 99 per cent. of the arable land being occupied by small holdings of thirty acres. Industry is in its infancy. The towns, Sofia excepted, are without importance. The rich in the land are not very rich, the poor are not very poor. The economic disparity between them is, therefore, not too great. There are no Church questions, no national problems clamouring for solution. Eighty per cent. of the inhabitants of the kingdom are Bulgars. The 12 per cent. Turks side willy-nilly with the Government, and the rest are scattered and powerless. Universal, direct, and secret suffrage has long been introduced. Everybody in the country, even the Social Democrats, are Imperialists as regards Dobrudja and Macedonia. What, then, constitutes the standard of these parties? Liberals, Democrats, Nationalists, Progressives, or Radicals—the names are arbitrarily chosen, and might be exchanged without loss or gain to the meaning of the term. All the *bourgeois* parties pursue the same aim in internal policy, viz., the preservation and extension of the people's rights—one sole aim. Even with regard to the means for attaining their object, all these parties are absolutely in agreement, and it is impossible to discern the slightest shade of difference between them; there is certainly now and again a slight difference between the parties as regards their attitude towards Russia. The Russophil parties will have to adopt a more or less fresh orientation after the Russian Revolution; up to date nothing has happened. But even this one apparent standard—Russophil or Russophobe—has dropped completely into the background since the Balkan war, and almost disappeared since Bulgaria's entry into the world war. But, you will ask me, are there, then, any political conflicts whatsoever in Bulgaria? Indeed there are, and very violent ones too. There are no parties, as we understand the term; but there are "clans," coteries, groups and affinities, and these fight each other with the greatest fury. Everybody belongs, father and son, to the political following of some chief or other—practically everybody. You scarcely ever meet anybody who is politically indifferent. The uniformity of their programmes explains the political behaviour of these "clans." The Opposition sharply criticises the methods of the party in office, and even the Tsar, so long as it bears none of the responsibility itself. But when the Opposition comes into power—which generally happens at the end of a few years—then the boot is on the other leg, and it employs the same methods which it had criticised in the preceding Government. A change of Government does not mean any change in the internal policy of the country.

War Weariness in Bulgaria.

Under the above heading a correspondent in *The Times* discusses the present situation in Bulgaria. His remarks are a very direct challenge to those who have searched the Bulgarian Press in vain for sentiments friendly to the Entente, and infer from that fact that all the Bulgarians stand solidly behind the Government.

The present situation in Bulgaria is worth some attention. The extreme unpopularity of the Radoslavoff Government, which has been in power for the past four years, seems to be approaching a critical point. This Government, it must be remembered, has never really been more than a Court clique of singularly corrupt politicians maintained in power by the King. Two years of war have left it with scarcely a shred of respect or authority.

* * * * * * *

The fact which gives this situation a more than domestic interest is that the Radoslavoff Government is practically the only genuinely pro-German element in Bulgaria. It is well known, of course, that the Bulgarian people as a whole were never quite in favour of the German connection. Indeed, it was this knowledge which, perhaps more than anything else, misled the Entente diplomatists in 1915. If the nation had been consulted in advance, directly or indirectly, it is doubtful whether it would ever have sanctioned an alliance either with Germany or with Turkey. The accomplished fact it did accept, on the explicit assurance of the Government that by that and by no other means it would be possible to realise quickly and at a small sacrifice the dream of "National Union"—that is to say, the recovery of the Macedonian lands which were lost to Bulgaria through her wicked blunder in making the second Balkan war. The pro-Entente and neutralist parties were not able to hold out any equally definite hope. The King and Radoslavoff got their way.

"War weariness" has been brought about by other circumstances than the maintenance of the army in the field for two years. It is realised, according to the writer in *The Times*, that Germany is not going to be victorious, and that a permanent settlement, therefore, in accordance with Bulgaria's aims can only be obtained by the consent of her present enemies, and that this consent will never be given to the Allies of Germany. There is also the feeling that Germany is preparing for a settlement that will not lay much stress on Bulgarian aspirations. To these fears "there is added the still deeper exasperation caused by the notorious corruption of the Government." The author of the article betrays no propagandist tendencies. He does not even suggest the possibility of detaching Bulgaria from her alliance. His summing up is as follows:—

In the natural course of events, it seems likely that very shortly after the meeting of the Sobranye Radoslavoff will be defeated and will resign, and the Opposition will be called upon to form a Government. What the policy of the new Government will be it would be rash to attempt to prophesy. It depends amongst other things, of course, upon the extent to which the parties of the Extreme Left are represented. But the change may be real and important, with consequences as unwelcome to Germany as they would be welcome to the overwhelming majority of the Bulgarian people and the Bulgarian Army.

Sidelights on Turkish History.

There is a striking article on the Armenian question in the *Fortnightly Review* from the pen of Ismail Kemal Bey, at one time President of the Provisional Government of Albania. He analyses Abdul Hamid's hatred of the Armenians, and attributes it to the fact that the ex-Sultan felt that he had no control over the evolution of his Christian subjects. Considering everything that had been accomplished in the way of reform or high politics during the time of his father and his predecessors as being misfortunes for the dynasty and the Empire, Abdul Hamid looked askance at the Christians, who frequented the foreign educational establishments, who travelled and carried on constant relations with Europe and America, and who would be the very people to press for reforms. He therefore believed it necessary to exterminate the Armenians in order to prevent the contagion of liberal ideas in the empire. As for the courage necessary to do what he did in regard to the Armenians, this, Ismail Kemal Bey considers, Abdul Hamid derived from a formal and secret understanding with Alexander II., "by which the Sultan undertook to give up his right—which had been guaranteed by the Treaty of Berlin—to occupy militarily the passes of the Balkans, while the Tsar engaged to defend the Sultan and his throne against all aggression from without or uprising within the empire."

After the first massacre the Sultan, relying on this agreement, felt strong enough to reject the British demands for Armenian reforms. But he made certain promises, and proceeded in a thoroughly characteristic manner to pretend to give effect to them. But the British Ambassador, Sir Philip Currie, was not to be put off in this way. The Sultan then put forward an alternative scheme of reform, but did nothing to carry out the proposals. On September 30, 1895, the Armenians held a pacific demonstration before the Palace and the Porte. Massacres followed. Ultimately the Ambassadors, including the Russian and French, were stirred to action. The former conceived the idea of doubling the stationary vessels which each Ambassador had a right to have at Constantinople, and to disembark a contingent of troops from each. This proposal scared the Sultan. Ismail Kemal Bey was summoned to avert the danger, and secured Abdul Hamid's consent to certain reforms which would have satisfied the Powers. At midnight he went to the house of Sir Adam Block, the first dragoman, and together they went to the Embassy to see Sir Michael Herbert, who had already retired for the night. Ismail Kemal Bey continues his narrative as follows:—

We had a long conversation, which, unfortunately, bore no fruit. I did all I could to try to persuade the Chargé d'affaires that it was a unique occasion to profit by the Sultan's disposition to grant what would never be obtained from him in other circumstances, which would assure real government to the country and establish order throughout.

It seemed to me there was no danger in this time believing in the sincerity of the Sultan. If the next day his Majesty's decision was realised, the result would have been far and above all the advantages that one could hope to obtain from the presence of five warships before the Golden Horn. But it was impossible for Sir Michael Herbert to make up his mind to submit the matter immediately and confidentially to Lord Salisbury. In face of this obstinacy, I then advised Sir Michael, no longer in the capacity of a messenger of the Sultan, but in my private capacity as a patriot, to allow the whole fleet, which was then at Lemnos, to enter Constantinople Harbour, and to force on the Sultan the will of Great Britain, whose only object was salvation for the empire and peace for her people. But after five hours of conversation I was compelled to return to the palace and announce that my mission had

Digitized by Google

failed. Thus, through the lack of decision of this diplomat, once more a great opportunity for Turkey was lost.

I deeply regret the absence on that occasion of Sir Philip Currie. If he had been at Constantinople that night the opportunity would not have been lost, and the affairs of the East would have taken on an entirely different aspect for the good of everybody. But there is a fatality in affairs which cannot be averted, and events take the course prescribed by destiny. The vessels arrived, and the Sultan's apprehensions were not realised. But, in spite of the warships, the trouble and the massacres continued, and Europe thought no more of them.

THE DEPOPULATION OF SERBIA.

The Serbian Press Bureau at Corfu has issued the following: —"The Bulgarians and Germans are carrying off our population even into Asia Minor, especially to the Konia district, where there are now a large number of Serbians and Italians. They are beginning to deport thither numbers of women and children, but especially the male population, since the Bulgarians desire to denude the country of as many men as possible. The Serbian Government took the necessary steps to obtain the cessation of the deportations to Asia Minor, but Bulgarian official circles always declared that no such deportations had ever taken place. The wife of a Dutch newspaper correspondent who recently arrived at The Hague from Nish declares that absolute panic prevails at Nish and in the environs. Nearly all the adults are interned, the robberies and pillaging are indescribable, and the dearness of living passes belief. In spite of all this, everyone believes that the Allies will be victorious."

Mr. Henry Riggs, an American missionary, returned from Kharput, in Asia Minor, confirms the apparent purpose of the Turks to exterminate the Armenian race, says Reuter's New York correspondent. The killing off of the men, he says, is practically complete. He saw skeletons by thousands on the roadside when he finally left Kharput. The air in the vicinity was foul from the dead bodies. Women and children were more like wolves than human beings. Babies were buried with their mothers, who had succumbed to their privations, and often women threw their own children into the Euphrates, lest a worse fate should befall them.

DEATH OF MAJOR AND MRS. ASKEW.

We regret to announce the death, by drowning in the Mediterranean, of Major Claude Arthur Cary Askew and Mrs. Askew. Their vessel was attacked by a submarine on October 5. Major and Mrs. Askew had achieved considerable fame as novelists and writers of short stories. "The Shulamite," their first novel, which came out in 1904, and was dramatised and produced at the Savoy in 1906, attracted much attention. It proved the first of a long series of publications, in all of which Major and Mrs. Askew acted in collaboration. They were married in 1900, Mrs. Askew being the eldest surviving daughter of the late Colonel Henry Leake, of the 44th and 70th Regiments. During the war both Major Askew and his wife had been in Serbia, Major Askew being attached to the Serbian Army, and only a little over a year ago their book, "The Stricken Land," was published, giving a striking account of their experiences while with the Serbian Army in its retreat from Prishtina to Alessio. They are survived by two children.

BUST OF EARL KITCHENER.

The War Office was the scene of an interesting ceremony on October 15, when Mr. Richard Belt, the sculptor, presented to the Lord Kitchener National Memorial Fund Committee a gun-metal bust of the late Field Marshal Earl Kitchener, which he has recently executed. Among those present at the function were Sir George Arthur, Private Secretary to the late Field Marshal; Mr. H. T. Creedy, Hon. Secretary to the Lord Kitchener National Memorial Fund; Sir Reginald Brade, representing the Army Council; and personal friends and comrades of Lord Kitchener. The bust, which stands on an oak pedestal panelled with laurel leaves, has been placed at the head of the grand staircase leading from the entrance hall to the upper floor. In presenting his work Mr. Belt said:—"I did it so that future generations should know the features of the soldier at whose call the great army of free men rallied and bravely left these shores to fight and die for the oppressed, for humanity, and for justice." In accepting the gift and its custody on behalf of the Army Council, Sir Reginald Brade thanked the sculptor for his generosity, congratulated him on the excellence of the likeness he had produced, and declared he could think of no more fitting site for the bust than the office in which Lord Kitchener performed his crowning work.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The new financial agreement which is reported to have been arrived at between Germany and Turkey lends added point to my comments last week. I then pointed out that Germany had contrived to satisfy Turkish requirements by merely nominal financial transactions, and that since the first loan of £T5,000,000 no gold had actually passed between Berlin and Constantinople. The present transaction is very much on a par with those which have preceded it. Germany, it is stated, will deposit with the Ottoman Public Debt Exchequer bonds to the value of £T50,000,000, against which the Turkish Government will issue paper money for the same amount. The new issue can hardly have any appreciable effect on the financial position, as Turkey's credit already stands at such a low ebb that paper money is worth only about 30 per cent. of its face value, but the transaction will have the effect of giving Germany one more lever with which to control the economic future of the country after the war.

***

Judging by a remarkable article which appeared recently in the *Preporetz*, I imagine that the Bulgarian Government was of the opinion that, in view of the approaching meeting of enemy Sovereigns in Sofia, it was expedient to issue a reminder to their allies of the nature of the obligations they had undertaken with regard to Bulgaria. The article is not couched in exactly felicitous terms. There are some very tactless references to Austria's financial condition, while one or two sentences rather suggest the blackmailer approaching an unwilling victim. However, Bulgaria doubtless knows her allies well enough to appreciate the kind of sentiment that will appeal to them; and even if they desired to do so, Bulgaria is sufficiently indispensable to them to be secure from the administration of the mildest of rebukes.

***

As I think it will interest my readers, I give the most piquant portion of the article. Commencing with the soothing remark that Austro-Hungarian banknotes have lost much of their value, owing to the low metallic reserve, the *Preporetz* continues:—"For some fourteen milliards of Hungarian notes in circulation the deposit in the State Bank hardly reaches one milliard. The result of this is that one kilogramme of gold is at present worth in Budapest over 14,000 crowns, whereas in July, 1914, the value was not more than 3,280 crowns. As for ourselves, the financial situation is better, considering that we hold pledges from our allies that all our war expenditure will be reimbursed by them by means of long term loans at a very low rate of interest. Glued to the backs of our great allies, the possibility is before us of holding out to the end of the war without fear of bankruptcy."

***

In view of the deplorable state in which Greek finances were left by the old régime, it was only to be expected that, sooner or later, the Government would have recourse to a loan to meet their obligations; and the decision to issue a 6 per cent. loan for payments connected with requisitioning and war material will therefore occasion no surprise. It is not improbable that the present issue will form the forerunner of a larger loan. There is much to be said for this method of coping with the financial situation; for whatever the position of the State finances, there is no question that in various parts of Greece much wealth has been amassed during the war. Shipping firms, for instance, have enjoyed great prosperity, and for other undertakings too the war has not been without its compensations. In this connection it will be remembered that M. Negropontes, in his Budget speech, referred "to those classes whose fortunes have disproportionately increased during the war."

***

The extent to which Germany and her ally made use of the raw materials of the Empire in the work of preparation for the coming struggle is even now scarcely realised. The British Empire Producers' Organisation provides an apt illustration of the process as regards India's exports of raw leather. "From 1911-1913," says the organisation, "the normal export of Indian cow hides to Hamburg and Bremen was about 3½ millions per annum, but in the first six months of 1914 the figures to these two ports were over 2 1-3 millions. In addition, Austria used to take normally nearly 1½ million Indian cow hides through Trieste, and in the first six months of 1914 took over 1,178,000. In three and a half years before the war these enemy ports together took from India nearly 19½ millions of cow hides. Allowing 50 per cent. for the leather exported from Germany for sale after tanning, enough Indian leather to make over thirteen million pairs of Army boots per year was retained in the two countries. In addition, out of Indian buffalo hides exported to Germany and Austria, enough were retained to make over fourteen million pairs of Army boots per year."

***

The figures for the export trade of Morocco for 1915 and 1916 show very clearly the remarkable development of the country in recent years. Of barley, for example, the chief grain export of Morocco, while the exports in 1914 were only 168,300 kilos, in 1916 the total was 121,080,900 kilos. Wheat exports in the same period advanced from 400 kilos to 31,043,300 kilos, maize from 409,400 kilos to 17,124,400 kilos, and beans from 44,700 kilos to 13,983,600 kilos. What this advance in trade has meant to the ports of Morocco may be seen from the description given elsewhere in this issue of the recent progress of Casablanca, the chief port in the French zone. And the process that is taking place at Casablanca is being repeated, though on a smaller scale, at other ports on the coast.

***

Almost every day some fresh evidence comes to hand with regard to the thorough nature of the preparations which Germany is making with a view to securing her economic position in the Balkans after the war. The latest indications are furnished by the activities of the Deutsche Bank, which has just established a branch at Bucharest, and will open another at Sofia very shortly. Before the war the German and Austrian banks played a very important part in securing the trade predominance of those Powers in the Balkans, and it is evident that the end of the war will find this means of commercial predation greatly extended. Fortunately there are signs that, even if they are permitted to resume their operations with the same freedom as before, which is very unlikely, these banks will not have the field quite so much to themselves. To say nothing of the British Trade Corporation, we have the prospective formation of a trade bank with branches in Serbia and Greece, and there is every reason for thinking that this will be by no means the only enterprise undertaken with a view to facilitating trade relations between Great Britain and her Allies in the Balkans.

***

A statement was recently issued by the Roumanian Legation here which throws a very interesting light on German methods in the occupied territory of Roumania. It seems that the German administration there has granted to the Banque Générale of Bucharest the right to issue notes—a right which belongs only to the Banque Nationale de Roumanie. At the same time, the property of the latter bank in Bucharest has been seized, and out of the proceeds loans have been granted to district councils to the value of 250,000,000 lei. "The Banque Nationale de Roumanie being a private establishment, and its capital belonging to the shareholders," the statement continues, "all principles of private and public right are gravely infringed by the unprecedented measures thus taken by the German authorities. For this reason the General Council of the Banque Nationale de Roumanie protest energetically against such measures, and consider it necessary to draw the attention of the foreign Governments to the judicial consequences which might result for the subjects of Allied and neutral countries should they take a part in the financial transactions made with the property of the Banque Nationale de Roumanie by the German authorities in the occupied parts of Roumania."

SUDAN TRADE DURING 1916.

Promising Development.

While it may not be quite correct to say that the war has meant the economic salvation of the Sudan it is at least certain that the period covered by the struggle has been for that territory one of most remarkable progress. After the record trade year of 1911 when the external trade amounted to £E3,779.526, trade returns showed a steady decline until in 1914 the figures only amounted to £E3,056,530. It might naturally have been expected that the war would have meant the continuance, if not the acceleration of this decline, but so far from this being the case the external trade for 1915 totalled £E3.498,831, while the figures for the year just passed amounted to £E5,254,087, by far the highest total on record. For the present year we have the figures to the end of July, which show that this gratifying progress has not only been maintained but actually improved. The imports for that period amounted to £E1.709,604 as against £E1.324.922 in 1916, while the corresponding figures for exports are £E2,255,523 and £E1,612.849. In other words imports have increased by 29 per cent., and exports by nearly 40 per cent. It will be evident from this increase that it will not be necessary for the results for the remaining five months to be unduly favourable for the trade returns of 1917 to be far better than those of 1916. The significance of this trade advance will be better appreciated when it is borne in mind that as recently as 1902 the external trade of the Sudan only totalled £E2.135,004. Presuming that the figures for 1917 will be in the neighbourhood of £E7,000,000, as seems very probable, it means that within a brief period of ten years trade has increased by something like 350 per cent.!

This striking economic advance lends special interest to the annual report of the Central Economic Board of the Sudan Government for 1916. In that year, as we have already noted, trade returns were the best on record, and as war conditions may be held to have had a fairly stable effect during the period, an examination of the year's trade should afford some interesting data as to the country's economic development in the future.

Exports and Imports.

Exports amounted in 1916 to £E2,238,403, and imports to £E2,661,468 a very substantial increase on previous figures. In both cases, however, the rise in prices has to be taken into consideration in comparing the totals with those of previous years. How far this factor may be held to have operated may be judged from the statement in the report that at values ruling in 1913 imports in 1916 would have been worth only £E1,913,916. On the same basis exports in 1916 would have been worth £E2.148,613, though in this case it is pointed out that the comparison would be misleading owing to the exceptional prices of agricultural produce in the Sudan in 1913 due to the drought. Happily there are other and far more satisfactory causes than increased prices to account for the improved trade returns. As regards exports there was a considerable increase in quantity of the chief products, notably gum arabic, dura, sesame, and dates and camels, while in the lists of imports, with a few exceptions, almost all articles show an increase. In the latter case an important factor in the enhanced figures is the increased value of Government imports.

The balance of trade was not so favourable in 1916 as in the previous year. In 1915 the value of exports exceeded the net value of imports, while in 1916 there was a balance of imports over exports of £E145.953. The annexed table, given in the report, shows the ratio between imports and exports (not including re-exports), since 1908 :—

1908	the value of exports was	27·2%	of value of imports		
1909	,,	,,	37·9%	,,	,,
1910	,,	,,	50·6%	,,	,,
1911	,,	,,	60·5%	,,	,,
1912	,,	,,	69·7%	,,	,,
1913	,,	,,	56·1%	,,	,,
1914	,,	,,	53·9%	,,	,,
1915	,,	,,	92·5%	,,	,,
1916	,,	,,	85·9%	,,	,,

In 1917, judging by the marked increase in the exports for the first seven months, there should once again be a balance over the imports.

The early effects of the war on the trade of the Sudan are too well known to need recapitulation. There was a natural restriction of demand, combined with a growing shortage of shipping. Fortunately for the prosperity of the country, neither of these difficulties has proved insurmountable, for as it happens, the annual rainfall during the war has been so plentiful that produce has been forthcoming for export in abundance. Consequently, says the report, the principal economic problem has lain in the question as to the most effective method of disposing of this produce. The war itself may be said to have done much to solve this problem. For instance, there is now a strong and, it may be added, a growing demand abroad for dura, the principal food grain of the native population. Thus, while in 1915 46,000 tons of this commodity were exported, principally to Eritrea and Arabia, the quantity being 14,000 tons in advance of previous figures, in 1916 there were demands for dura from England and France and elsewhere, and the exports rose to 56,000 tons. In this connection it is interesting to note that the opinion is expressed that "this opening for dura overseas should remain good for years to come, and even when the world's production of cereals has returned to the normal there will still be opportunities for the sale of dura in England, provided it can be put on the market at a competitive price."

Trade with Egypt.

The conditions under which the war is being waged naturally tend to accentuate the connection between countries with adjoining land frontiers, and one result of the war has been to demonstrate beyond question the value of the Sudan to Egypt as a source of food supplies. Great stress is laid on this aspect in the report, in which it is stated that "in order to augment food supplies in Egypt large areas in the Northern Sudan are being put as fast as possible under wheat cultivation by means of pump irrigation. The total area aimed at is 20,000 acres, but success this season depends on whether the pumps and engines arrive in time. This enterprise is seriously hindered by being undertaken in war time. It is purely an emergency measure, and it is to be regarded as an effort undertaken on imperial grounds as a contribution to the Empire's food supply."

One of the Sudan's principal exports to Egypt is livestock. In 1916 the exports of livestock were smaller than in 1915, partly because of cattle disease, but chiefly because Egypt has been drawing on its internal resources. Obviously, that process cannot continue indefinitely, and it is fully recognised, it is stated, that Egypt will soon be almost entirely dependent on the Sudan for its meat supply, and that special measures are being taken to prepare for that eventuality.

An Imperial Trade.

One aspect of the Sudan trade, and that the most important of all, still remains to be dealt with, and that is that both as regards exports and imports the trade is to an increasing extent carried on within the Empire. Thus, in 1916 the exports to British territory were £E1,718,198, representing 75 per cent. of the total exports, as against £E1,077,505 in 1915, representing 68 per cent., and £E701,977 in 1914, representing 69 per cent. There was a large increase also in imports from British territory. In 1916 the figures were £E2,241,888, representing 88 per cent. of the total imports, as against £E1,405,489 in 1915. It may be mentioned in conclusion that there is no reason to regard this increase of British trade as being in any way due to the withdrawal of enemy competition. As a matter of fact, the Sudan was probably as free from the commercial penetration of Germany and her Ally as any part of the British possessions. Nothing can better illustrate this than the fact that in 1913 the total imports from Germany, Austria, and Turkey only amounted to £E121,033 out of an import trade valued at £E2,109,476.

The Deutsche Bank has opened a branch in Bucharest.

ADEN AS A CANDLE MARKET.

For the following particulars of the Aden import trade in candles we are indebted to a report of the United States Consul at Aden, Mr. Addison E. Southard :—

Aden normally imports about $20,000 worth of paraffin wax candles per year. Nearly half of the average imports are sent to the various markets in this commercial district which are served by Aden. Owing to the restriction of trade with many of these markets the imports of candles have steadily declined in amount and value since the year before the war. The average annual imports for the past five years have been 235,755 lb., valued at $16,164. The imports for 1916 amounted to 148,544 lb., valued at $9,882, which is less than two-thirds of the amount and value imported in 1913, the last year before the war. The market is supplied mainly from British India. The two principal importers, one a French and the other an American firm, get their candles from the Burma Oil Company and from the Indo-Burma Petroleum Company respectively. Great Britain, France and Holland supply certain fancy and special kinds of candles.

Popular Brands.

The two most popular brands sold here are the "Fez" and the "Cock and Key" respectively. The former brand is packed eight candles to the package, which weighs 13 ozs. The candles are 6½ ins. long. There are 100 packages to the case. A case weighs about 75 lb. The latter brand is packed also eight candles to the package, but the candles are 6¼ ins. long, and a package weighs 12 ozs. There are 100 packages to the case. The "Fez" brand sold before the war at Rs. 19 per case, and the latest price quoted is Rs. 37½ per case. The "Cock and Key" brand sold before the war at Rs. 16, and the latest price quoted is Rs. 31 per case. A brand of candles that is used principally for carriage lamps is imported from Holland. These candles retail in Aden at 22 cents per packet of eight candles, which is 12 cents more than the pre-war price.

Market Requirements.

The "Fez" brand is popular with the Mohammedan natives on account of its trademark. Retailers suggest as possible trade marks for other brands which may be introduced, a green flag, a camel, a horse, or an Arab or Somali dressed in native costume. The name or description of the mark should be in Arabic. The packets of candles most widely sold here are wrapped in strong indigo-blue paper, and any new brands introduced should be similarly wrapped. Local merchants would like a candle weighing a little less to the package and with a smaller number of packages to the case. The small shopkeeper usually buys by the case, and he prefers not to buy so large a case at one time. The local importer or jobber woud find it easier to sell 50-package cases than to sell cases of 100 packages. Candles intended for sale in this market should be made to stand the very hot climate without becoming soft. Cases of candles exported to markets off the coast are carried by pack animals and exposed sometimes for days to the direct rays of a very hot sun. Candles are used by the better class of natives for ordinary lighting purposes. There is also a large demand for use in the various mosques. Considerable quantities of candles are also said to be used in the Arabian interior and in Abyssinia for the adulteration of beeswax. One exporter in Aden is said to have received from the interior a few years ago a large quantity of beeswax which he found to be 40 per cent. adulteration with candles.

The largest quantities of candles exported from Aden go to Abyssinia. The next largest quantity is exported to the Yemen, and to other Asiatic Red Sea Provinces. Smaller quantities go to the British and Italian Somalilands. Considerable quantities are sent in some years to Port Sudan. The fact that all of these places export beeswax may be of some significance in their importance as markets for candles.

Reuter's Baku correspondent in a message dated October 13, says :—The general strike in the naphtha district continues. The town is calm. The theatres and cafés have been closed by the strikers.

LANCASHIRE COTTON.

An Active Demand.

(From Our Own Correspondent.)

Manchester, Wednesday.

Although business in the market has been rather irregular demand has continued active and many producers have again tended to strengthen their position. Prices are on a very high level, but there are few indications of easier rates in the near future. Very mixed reports are being received as to the outlook for the American crop. The Egyptian growth continues to make steady progress. Certain qualities are much more plentiful than others. The official estimate of the yield should come to hand within the next week or two. Egyptian yarns have again been in healthy request. Freer buying has occurred in 62's and 82's weft. The coarser counts in carded descriptions are now doing better. Producers engaged on fine numbers have nothing to complain about. Encouraging advices have been received from Egypt with regard to the distribution of piece-goods, the difficulty at the moment is to get cloths abroad. Fair buying has taken place in anticipation of future wants. Rather more business has been done for the West Coast of Africa in a variety of fabrics. India has provided plenty of orders in dhooties and printing cloths, and there are now indications of increased activity in grey shirtings. Manufacturers have presented a stiffer front to buyers than for a long time back. Prices in American yarns have again tended to harden. Quick delivery in superior marks have commanded very full rates. The sales have again been encouraging. A few more lines have been booked in fine yarns for India. Shippers to Egypt are making representations to the Government, through the Manchester Chamber of Commerce, to provide more boats to that outlet.

EGYPTIAN COTTON RESTRICTION.

A Lancashire Protest.

The Council of the Oldham Chamber of Commerce have sent a protest to the Foreign Office of the Board of Trade in regard to the proposed reduction of the cotton crop acreage in Egypt, which the Council considers a most serious matter for the trade of Lancashire. In regard to Indian raw cotton, Mr. R. H. Jackson, of Messrs. Hoyle and Jackson, Primrose Bank and Chamber Mills, Oldham, and a Vice-Chairman of the Master Cotton Spinners' Association, has informed the Council that he had seen samples of Indian cotton, but they were practically of no use to Lancashire, the staple being too short. The Secretary, Mr. J. C. Atkins, was instructed to write the Imperial Institute for the samples, and Mr. R. H. Jackson and Mr. C. C. Newton, manager of the Lion Mill Co., Royton, were appointed to examine the same and present a report to a future meeting.

EGYPT'S FINANCES.

Improved Figures for June.

(From Our Own Correspondent.)

Cairo, Sept. 21.

The State accounts for the first quarter of the financial year have just been published, and give figures which reveal an improvement on the corresponding period of last year. Revenue amounts to £E5,063,868, and expenditure to £E4,826,454, as compared with £E4,591,290 and £E4,781,351 respectively. Revenue has, therefore, improved by £E472,578, and expenditure, in spite of the increased cost of everything, has only risen by £E45,103. There is, as a result, a surplus of £E237,414, as against a deficit of £E190,061 at the end of June, 1916. On both sides of the account are included the Ghaffir receipts and expenditure, which did not figure in the Budget last year. The Ghaffir tax shows, so far, a surplus; but even taking that into consideration, this year's figures for the first quarter are a decided improvement on those for the June quarter of 1916.

Chief Increases.

During the month the principal items on the revenue side were:—Land tax, £E574,672; Customs, £E229,497; tobacco dues, £E159,498; judicial fees, £E114,634; railways, £E363,274; Ghaffir cess, £E106,774. For the quarter, land tax shows an increase of £E113,794; Mixed Courts fees, one of £E41,080; Domains receipts, one of £E25,223; and sundry miscellaneous receipts, one of £E75,580. The main decreases are:—Tobacco dues, £E162,442; railways, £E30,070, and interest on investments, £E21,440. The chief items of expenditure during the month were:—Irrigation, £E99,240; railways, £E253,878; War Office, £E66,877; Ghaffirs, £E62,181. Compared with last year, expenditure on irrigation has risen by £E19,649, but that on railways and the Egyptian War Office has decreased by £E202,103 and £E32,095 respectively.

INDIA GOLD STANDARD RESERVE.

The following statement shows the form in which the balance of the reserve was held on the 30th ultimo:—In India—Gold, £15,000. In England—Cash placed by the Secretary of State at short notice £6,062,154, British and Colonial Government securities (value on 30th ultimo) £27,431,499, together £33,493,653, making a total of £33,508,653.

The Aboukir Company has received a telegram from Egypt stating:—"Sold 3,000 kantars of cotton on satisfactory terms."

The directors of the South Indian Railway Company, Ltd., have decided to pay a final dividend of 1 per cent., less income-tax, from surplus profits on January 1, 1918, in addition to the guaranteed interest of 1¾ per cent., for the half-year ending December 31, 1917, making a total distribution for the half-year of 2¾ per cent., and, together with the payment that was made on July 1, 1917, a total payment of 5½ per cent. for the year.

TRADE AFTER THE WAR.

Supply of Raw Materials.

Dr. Addison, the Minister of Reconstruction, after consultation with the other Government Departments concerned, has appointed a committee to consider and report upon questions connected with the supplies of raw materials which will be required by British industries for the purpose of restoring and developing trade after the termination of the war, and the best means of securing and distributing supplies, due regard being had to the interests of the Allies. The Committee is requested, in regard to many commodities which might not be available in sufficient quantities and at reasonable prices through the ordinary commercial channels, to consult members of the trades concerned with regard to any steps that may be necessary to safeguard the needs of industry and to secure convenient and equitable distribution.

The Committee, which will be known as the Central Committee on Supplies of Materials, consists of the following:—Sir Clarendon Hyde (chairman), Sir Henry Birchenough, K.C.M.G., Cecil Budd, Esq., Sir Charles W. Fielding, K.B.E., Sir H. Babington Smith, K.C.B., Wallace Thorneycroft, Esq., and Andrew Weir, Esq. The secretary is Mr. J. F. Ronca (Board of Trade), communications to whom should be addressed at the Ministry of Reconstruction, 2, Queen Anne's Gate Buildings, Westminster, S.W.1.

RECONSTRUCTION.

Action of the London Chamber of Commerce.

At a meeting of the Council of London Chamber of Commerce on October 10, the question of reconstruction as affecting industry and trade was referred to the trade sections concerned, with a view to the formulation of a definite policy in the interests of manufacturers and merchants, and it was referred to a special committee to report as to the desirability of the early release from military service, after the war, of men in commercial occupations, including principals, partners, clerks, and technical experts, whose places have been kept open for them or whose services will be urgently required after the war. Arrangements were also agreed upon for a public meeting of merchants and others on the question of Government control of trade.

PROHIBITED EXPORTS.

Complete List Available.

The Department of Commercial Intelligence has received from the War Trade Department (says the *Board of Trade Journal*) a number of copies of the list of goods the export of which from the United Kingdom to certain or all destinations is prohibited by the Royal Proclamation of May 10, 1917, as amended by the Orders-of-Council of June 22, July 13, August 14, and August 28. The list is thus complete to date, and, within the limits of the available supply, British firms may obtain gratis copies of the list on application, either personally or by letter, to the Department of Commercial Intelligence, 73, Basinghall Street, London, E.C.2. In making written application, envelopes should be marked "Prohibited Exports."

ANGLO-PERSIAN OIL COMPANY.

The Anglo-Persian Oil Company has, it is stated, agreed to lease for 99 years a wharf at the King's Dock, Swansea, embracing 4,444 square yards, for the purpose of importing and exporting petroleum. A minimum rental of £10,000 per annum is guaranteed by the company, but in the event of only two or three boats being sent to Swansea by the company the income to the Swansea Harbour Trust will be about £40,000 a year. The company proposes to construct refining works at Skewen, about a mile from the dock, to which the crude oil will be pumped through a pipeline and then returned to the wharf for shipment.

ENGINEERING NOTES.

Life-Saving Apparatus.

In these days of submarine warfare a really good life-saving apparatus is a most valuable acquisition. It is well known that kapok, a light and resilient fibre, is remarkably buoyant, its buoyancy being five times greater than that of cork. One pound of kapok immersed in water will, it is found, support twenty-five times its own weight. Experiments further prove that a fully-dressed person of average weight, when in water, requires a buoyancy of 8 lbs. to 10 lbs. to keep afloat, and that a lifebelt or jacket capable of supporting over 15 lbs. of dead weight in water will keep the head and shoulders well out of the water. Based, apparently, on these factors, a very efficient life-saving apparatus has been designed in the form of a waistcoat, which weighs about 2 lbs. and contains 1 lb. of the best kapok, so that there is an ample margin of buoyancy for supporting a fully-dressed person. It is made in either blue or khaki-coloured cloth, and it seems that this novel life-saving waistcoat is already attracting the attention of travellers.

Another life-saving apparatus is in the form of a suit or overall. Although not attractive in appearance, it has many advantages over the ordinary cork belt or life-buoy: one great point in its favour being that the person wearing it is kept warm whilst afloat, and the bad effects of cold and exposure are avoided. One has simply to step into the suit, or overall, and pull it up round the neck. The wearer can easily support five others in the water. A pocket is provided to carry liquid refreshments, and a whistle by which to direct rescuers.

Synthetic Rubber.

The synthetic production of indiarubber appears to have got beyond the laboratory stage in Germany, and is now being worked on a commercial scale. The basis of the process is, apparently, acetylene, which, by the addition of suitable re-agents, is first converted into "isopren," and the conversion of the "isopren" into rubber is accomplished by the method worked out by Hofmann, using a suitable catalytic agent.

Aluminium from Clay.

"Necessity is the mother of invention," as it is proved by the incessant research work of the Germans for the discovery of substitutes for metals and other materials of which they are in great need. The attempts to produce aluminium from clay, according to the *Neue Zürcher Zeitung*, have been crowned with success, and will make Germany independent of foreign supplies of bauxite in the future, which latter is, however, also available in **Hungary**.

"Mineral Wool" from Basalt Rock

Basalt is a hard, dark-coloured rock of igneous origin—*i.e.*, produced by the solidification of molten lava. It occurs either as intrusive sheets, like the Edinburgh Castle Rock and Salisbury Craig in England, and some craggy promontories and hills seen in Southern Italy and on the coast of Eastern Mediterranean, or in vertical columns as in the Giant's Causeway in Ireland, in some parts of Calabria in Italy, in Syria, and other parts of the Near East. Basalt rocks also occur in Bohemia, Croatia, and the Balkans. It is now reported that an American firm operating in Australia has started works near Melbourne for turning the local basalt into "mineral wool" for use as an insulator in packing machinery and ice-chests, and as a substitute for asbestos. The basalt is melted down with a proportion of freestone (*i.e.*, any stone easily worked with tools, but especially fine-grained sandstone) and limestone, and then steam, at an immense pressure, is forced through the fluid. The liquid rock thus aerated flies into the air and falls in flakes on the floor..

The process is apparently simple and inexpensive, and if the product proves a good substitute for asbestos there is every possibility that a new mining industry may be created in certain districts in the Near East where basalt, freestone and limestone are often found in close proximity and not far from the sea.

Engineering Prospects in Morocco.

France, according to authentic statements, is at the present time paying more attention to the development of colonial agriculture than she has ever done before. Preparatory measures are already being taken, and the chief effort is being directed at the moment to Morocco, where the prospects for creating a profitable industry are particularly good. For some years past annual shows have been held at Rabat, and although at first they excited more curiosity than interest, they have done valuable educational work, and agriculturists are now fully appreciating the value of modern tillage methods. As Morocco is almost entirely lacking in up-to-date farm requisites, there is a great opening for the agricultural engineer when he is able to supply the demand. A large number of big estates are being created by European settlers, who will require considerable quantities of machinery; and while it is hardly possible to deal with all these needs at the moment, it is nevertheless certain that Morocco will be a good market for all kinds of requisites as soon as manufacturers are able once more to prepare for the foreign and colonial trade. In the meantime, British firms desirous of acquiring business in Morocco should start now to arrange their plan of action, remembering that success will probably fall to those first in the field.

TRADING WITH THE ENEMY.

The Controller of the Foreign Trade Department has issued a new list of additions to the statutory list of firms of enemy nationality or enemy association with whom persons in the United Kingdom are forbidden to trade. Copies of this list can be obtained at a trifling cost from the Superintendent of Publications, H.M. Stationery Office, Imperial House, Kingsway, W.C.

Sir Charles H. Armstrong has been elected chairman of the Great Indian Peninsula Railway in succession to the late Colonel F. Firebrace.

AMERICAN TRADE WITH TUNIS.

In a recent report, Mr. Edwin C. Kemp, United States Consul at Tunis, gives the following particulars of American trade there:—

An increase in American trade with the French protectorate of Tunisia waits principally upon improved shipping facilities. Although Tunisia is one of the world's smaller markets, the importation of American goods, valued in 1916 at 1,576,608 dols., could probably be more than doubled if adequate means of transportation were established. The French and English embargoes have particularly increased the demand for American goods, already augmented since the beginning of the war by the closing of German and Austrian sources of supply. Before the war Austria, with a direct steamship line to Tunis, considered the market worth the establishment of a commercial museum at Tunis; but this is now closed; there is also an Italian commercial museum as well as a British chamber of commerce.

A preliminary canvass showed orders immediately available for 7,000 tons of agricultural and mining machinery and accessories, iron and steel products, tin plate, wire, rails, pumps, hardware, tools, machine tools, mineral oil and lubricants, carbide, binder twine, textiles, sulphur, meat products, etc., besides orders for coal, of which, it is stated, 5,000 tons per month could be used.

Another factor that would greatly facilitate the sale of American goods in Tunisia would be a branch American bank at Marseilles. Such a bank could easily handle the Tunisia business, and also aid in establishing the credits that competition after the war will make necessary. As it is, the smaller dealers claim that cash terms and long delays in shipping now tie up more capital than they can afford, and so they prefer to go without the goods. Lastly, but very important, is the need for catalogues in French. A good translation, cheaply printed and inserted in the regular English edition, would, in most cases, serve every purpose. If the American manufacturer should attempt to make up an order from a catalogue in French he would better appreciate what he is asking his French customer to do when he sends him a catalogue in English.

In most lines of goods the sending of a personal representative to Tunisia is hardly advisable at present; but as Tunisia, with Algeria and Morocco, may be considered an extension of the French market, a representative sent to France might find it profitable to include French North Africa in his itinerary. Many firms in Tunis have branch houses in Algeria and vice versa. The markets are very similar, the chief differences being in size and in the tariff schedules, in which Tunisia has the advantage of a lower rate than Algeria.

The Ceylon Government has prohibited the importation of tea into the Island, whether for local consumption or for transhipment, except under licence from the Principal Collector of Customs.

Dr J. Collis Browne's Chlorodyne

Safeguard your Health with this Reliable Medicine.

Cuts short attacks of HYSTERIA, SPASMS, PALPITATION.

A true palliative in NEURALGIA, GOUT, TOOTHACHE, RHEUMATISM.

Checks and arrests FEVER, CROUP, AGUE.

MOROCCO.

The Development of Casablanca.

Constant witnesses of the reforms and progress realised at Casablanca since the establishment of the French Protectorate cannot be so greatly impressed with the results (says a Paris contemporary) as those who only see them after an interval of some years. It is only the latter who can make an exact comparison of what the great port of Western Morocco was some years ago and what it is to-day.

The traffic of the port of Casablanca, which was valued at a dozen million francs in 1907, amounted in 1916 to 107,843,359 frs. After the war the trade of Casablanca will certainly exceed the results obtained up to now, and when the port works are completed and Casablanca is connected by rail with the Southern capital increased prosperity will result. France's share in the trade has continually increased since the occupation. Out of imports valued at 85,870,230 frs. in 1916, French commerce was represented by 51,205,510 frs. During that year the imports from that country into France amounted to 19,072,355 frs.

Sugar heads the list of the principal articles of import. For the natives of the Chaouia and the hinterland, France imported, in 1916-17, sugar worth 17,113,503 frs. After sugar cottons take second place in the list of imported articles. They come almost entirely from Manchester. Out of the total imports of 10,231,000 frs., British imports in these goods represented, in 1916, 8,948,647 frs. In the case of woollen cloths, French industry has benefited by the absence of German and Austrian competition. From 208,000 frs. in 1913, French imports of these goods reached, in 1916, 538,000 frs. The same progress has been made in the case of Lyons silk goods, the muslins of St. Quentin, and articles of European consumption.

The name of the Odessa Merchants' Bank has been changed to the Russian Trade and Transport Bank, and the head office has with the approval of the Russian Minister of Finance been transferred to Petrograd, leaving a branch at Odessa.

THE TRADE OF EGYPT.

(From Our Own Correspondent.)
Cairo, September 25.

Increased Exports in August.

The Customs returns for August show a falling off in imports, but a considerable increase in exports. Thus, imports during the month came to £E2,304,958 and exports to £E2,717,821, as against £E2,708,283 and £E1,119,343 in August, 1916. For the eight months the former are £E759,022 down and the latter £E7,125,497 up on last year.

The principal imports during the month were:—Skins, £E21,322 (two-thirds from Great Britain and the balance from France); flour, £E70,186 (practically all from India); coffee, £E27,142 (40 per cent. from India and the balance from Abyssinia, Brazil, and Massawa); mineral oils, £E24,593 (75 per cent. from Great Britain and 20 per cent from America); stationery, £E45,155 (just under half from Italy and 30 per cent. from Great Britain); coal, £E113,744 (all from Great Britain); drugs (£E24,763 (France and Great Britain practically share this trade); textiles, £E1,140,411 (Great Britain sent 60 per cent. of the whole category, but 90 per cent. of the cotton and wool tissues, whilst India supplied all the sacks, as usual (£E235,393); worked iron and steel, £E57,098 (of which 75 per cent. from Great Britain); machinery, £E35,050 (Great Britain supplied half), and tobacco, £E212,549 (of which Greece sent 80 per cent.). It is noteworthy that no chemical sugar, manures, benzine, or petroleum were imported during the month, that coal imports fell from 99,000 tons to 15,000 tons, but that flour imports increased by 626 tons from 1,734 tons.

Chief Exports.

The chief exports during the month were:—Cotton seed, £E40,911; cotton cake, £E30,328 (all of which went to Great Britain); skins and tanned goods, £E62,776 (of which half went to Greece); sugar, £E61,196 (40 per cent. to Greece and 45 per cent. to India); gum, £E33,906 (60 per cent. to France, 20 per cent. to Australia); cotton seed oil, £E23,922 (practically all to France); alcohol, £E12,244 (half to Greece); caustic soda, £E13,967 (all to Italy); cotton, £2,275,732 (54 per cent. to Great Britain, 20 per cent. to Italy, and 25 per cent. to Japan); cigarettes, £36,838. No eggs or wool were exported during the month; exports of cotton seed were 20,504 ardebs less, but those of sugar 538 tons, of gum 582 tons, of cotton 50,697 cantars less. On the other hand, although exports of cigarettes fell off by 3,811 kilos, the value was £E12,648 more.

Increased Trade with Sudan.

Trade between Egypt and the Sudan appears to be flourishing. Imports into Egypt during the month rose from £E36,640 to £E182,757, and exports into the Sudan from £E81,347 to £E113,547. For the eight months imports into Egypt have nearly doubled. The principal items under the latter are:—Live stock, £E34,515 (9,709 head); millet £E12,793; sesame, £E9,560; gum, £E22,231; and cotton, £E52,832. Exports into the Sudan were:—Refined sugar, £E32,875; and cotton tissues £E21,497; the other items were small.

COMMERCIAL INTELLIGENCE.

The Council of the London Chamber of Commerce has passed the following resolution:—"That this Council welcomes the establishment of the new Commercial Intelligence Department instituted under the joint auspices of the Foreign Office and Board of Trade, and offers the cordial support of the Chamber in any measures which may assist the development of the new Department on business lines, as a step towards the establishment of a Ministry of Commerce."

BANK OF BRITISH WEST AFRICA, Limited.

COMPANY NOTES.

Dividends, Payments, etc.

Anchor Line (Henderson Brothers).—The transfer books of the 5½ per cent. preference shares and the 4½ per cent. debenture stock will be closed from 18th to 31st inst. inclusive.

Messrs. J. Henry Schröder and Company announce that they have now received the necessary funds for the payment of the coupon of the Royal Roumanian Government 4½ per cent. gold bonds, 1913, due on October 1, and that such coupons can now be lodged at their counting-house between the hours of 11 and 2 o'clock.

Messrs. R. Raphael and Sons announce that the coupons and drawn bonds of the Piræus, Athens and Peloponnesus Railway, 4½ per cent. bonds due on the 15th inst., are now being paid at their office, Austin Friars House, E.C.

The Eastern Telegraph Company, Ltd., announce the payment by warrants on November 1, of interest for the half-year to October 31 on their 4 per cent. mortgage debenture stock. The transfer books of the debenture stock will be closed from the 26th to the 31st inst., both days inclusive.

Oil Outputs.

Anglo-Egyptian — Gemsah. — Production for week, 633 tons (previous week 21 tons); Hurgada, 2,923 tons (against 3,440 tons).

Baku Russian.—Week ended October 6, 72,700 poods.

Black Sea Amalgamated.—Production of crude oil for week ending October 6, 20,670 poods (333 tons).

European Oilfields.—Week ended October 7, 70,200 poods.

Maikop Combine.—Production of crude oil for week ending October 6, 21,846 poods (352 tons).

Maikop Orient Oil.—Plot 435a, well 3.—Production, week ended October 6, 10,500 poods.

North Caucasian.—Week ended September 5/18, 691,840 poods (11,159 tons). Week ending September 12/25, 551,840 poods (8,900 tons). Week ending September 19/October 2, 418,800 poods (6,755 tons).

Russian Petroleum.—Estimated production week ending October 6, 45,100 poods.

TURKEY'S FINANCIAL LIABILITIES.

The Turks, says *Reuter's* Athens correspondent in a message dated October 10, as is well known, have from time immemorial lived from day to day, but the day seems not far off when they will, so to say, have to go through the bankruptcy court. In this connection the following information is of interest. The loans made by Germany to Turkey for the internal needs of the Ottoman Empire since Turkey engaged to join the Central Powers amount to 93,000,000 Turkish liras. Further, Germany has lent Turkey 25,000,000 liras for the payment of:—(a) Military transports by the Anatolian and Baghdad railways. (b) Coupons to bondholders in Austria and Germany. (c) War material and military equipments ordered in Germany.

Turkey owes Germany another 25,000,000 liras for ammunition supplied. The loans made by Germany to Turkey since she became the Ally of the Central Powers amount to no less than 143,000,000 liras, to which must be added 38,000,000 liras. Of this latter amount 24,000,000 liras were borrowed in Austria for the payment of amounts due to the Oriental railways and for the cost of heavy artillery ordered from the Sooda works. Of the same amount the sum of 8,383,000 liras is said to have been set aside for the payment of coupons to bondholders in England and France and of certain liabilities of the Ministry of War.

NEW GREEK LOAN.

In the Chamber to-day, says Reuter's Athens correspondent in a message dated October 11, M. Negropontes, Minister of Finance, introduced a Bill authorising an internal loan of a hundred million drachmae, which will be devoted to the payment for goods requisitioned and war material.

An earlier message refers to the loan as being a Six per Cent. issue.

ON 'CHANGE.

(From Our Own Correspondent.)
Throgmorton Avenue,
London, E.C.2.

The better tendency referred to in our market report last week has continued, and there has been a revival of activity accompanied by an improvement in prices. The factors underlying this improved state of affairs are the further recovery in the price of cotton and the big expansion in the note issue of the National Bank of Egypt; which is a good barometer of the active trade conditions ruling in Egypt.

In Government stocks, Egyptian Unifieds have been bought at 84, and are still wanted, but sellers are asking 84¼. In Egyptian 3½ per cent. preferences there is a persistent demand, but sellers are scarce. Bank shares have been a strong market, the feature being a rise of ⅝ in Nationals to 16⅝, and of ⅜ in Land Banks to 7. Agricultural Banks also are up 3-16 at 6 5-16 and Anglo-Egyptians 1-16 at 13¼. Ionian Banks are wanted at the improved price of about 4¾.

In land shares, the activity has so far been confined to Aboukirs, which are 1s. 3d. better at 19s. 9d.; to Allotments, which have been bought on Egyptian account, and which are 1-16 better at 3 1-16, to Delta Lands, which are 3d. higher at 13s. 6d., and to New Egyptians which have improved 4½ to 13s. 7½d.

In miscellaneous shares, Alexandria Waters have been done in a small way at 12⅝, and there has also been a certain amount of business in Markets and Salts round last week's prices. Khedivial Mails have been exceptionally dull and show a drop of 1s. at 34s., although the figures for the year to June 30 last are expected to make a very excellent showing.

In Greek Government bonds, beyond a fall of one point in Rentes to 43, there is no quotable change; but there are some small buyers about of Greek Currant Bonds round 92, with large buyers at 91.

Paris Bourse.

Prices generally have shown an upward tendency. Greek shares have been in considerable favour on the Exchange.

Oil Shares.

The only change on Wednesday was in Anglo-Egyptians (B), which declined 6d. to 28s.—29s.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses, and unsuccessful attacks during the week ended October 14, 3 p.m.:—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft):—

Arrivals	2,124
Sailings	2,094

British merchant vessels sunk by mine or submarine:—

1,600 tons gross or over	12
Under 1,600 tons gross	*6
British merchant vessels unsuccessfully attacked by submarines	†5
British fishing vessel sunk	‡1

* Including one sunk during week ended September 30 and one sunk during week ended October 7.

† Including two attacked during week ended October 7.

‡ During week ended October 7.

NOTES OF THE WEEK.

The German Emperor's visit to Constantinople finished, after the orthodox manner, with a banquet and a telegram of thanks speeding the parting guest. The Kaiser speaks of these "unforgettable days," and looks forward to the co-operation of Germany and Turkey in spreading German "kultur" after the war—in other words, to Turkey buying German goods to pay for her war loan. But no further statement has been issued as to the object of the Imperial excursion, or even whether that object has been achieved. The telegrams, of course, convey nothing, and are meant to convey nothing, but it is more than probable that the Kaiser has heard some plain speaking in private, both at Sofia and Constantinople, as to the interminable duration of the war.

Whatever currents there may be in either capital making for a speedy peace, the Kaiser will have found it necessary to conciliate, lest these should progress from the desire for a speedy peace to the demand for a separate peace. Sofia has made it quite clear that Bulgaria is dissatisfied not only with the length of the war, but with the promised rewards. Turkey can look for no rewards—for she cannot seriously expect any longer that Egypt will be reduced—but she may at least desire her lost provinces back again. On this point, no doubt, the Kaiser has been full of assurances as to the restoration of Mesopotamia; but whether any plans have been laid for a resumption of the Turco-German offensive either before Baghdad or Gaza will not be known for some time.

It must be remembered, however, that the Kaiser is almost as much concerned for the recovery of Baghdad as the Sultan. Many millions of German money have been sunk in the railway, and German plans for the control of the Persian Gulf are merely postponed, not abandoned. The Emperor has certainly not discouraged the German banks from investing their money in this scheme, and the banks, whose business it is to take note of facts and not of rhetoric, will scarcely feel that their holdings in Asia are very secure. In view of the recent action of the Deutsche Bank, which undoubtedly realises that its opportunities in Western Europe are likely to be severely limited in future, and is therefore extending its operations in the Near East—a branch has been opened at Bucharest as well as Sofia within the last few weeks—their influence on policy is likely to be weighty, if not decisive.

On the assumption that Germany wins the war in the East and agrees to a draw more or less disadvantageous to herself in the West, the German financiers are now beginning to act. It is, of course, an assumption that none of the Allies will admit for a moment, but it is worth while examining as the key to many movements otherwise inexplicable in Germany at the moment. It means, presumably, that the Colonial party which held the Government's ear at the beginning of the war is out of the saddle for the moment, and the exponents of rail-power as against sea-power have won the day. The Balkans are to be used as a German bridgehead into Asia—a fact which explains the silence of Germany as to the Near East in its answer to the Pope—while the real indemnity for the war is to be obtained from Turkey and Russia.

Germany appears to argue that although the Balkans and Asia Minor have been impoverished by war, they are countries which are naturally rich and could be developed by modern industrialism. Moreover, they have plenty of cheap labour, and the war has taught Germany a good deal as to the possibility of controlling, by methods not far removed from those of the slave-proprietor, the labour of people under her control. It is quite true that thousands of people die when they are forced in this ruthless fashion, but we may be quite sure that from the point of view of German finance this is a matter of no importance, while from the political standpoint it may even be regarded as a recommendation. Nothing so effectually lessens the so-called "Slav peril" as a diminution of the Slav population.

Fortunately, there is reason to hope that this danger of German concentration in the Near East is understood by the Allies, whose Balkan policy has improved since the occultation of Viscount Grey. It is no longer possible for even the most insular politician to pretend that Britain has no concern with the destiny of Constantinople, and the late negotiations in London over the Italo-Jugoslav problem indicate that we are not now content with merely passive methods. It is probable that while the military issue of the war will be more and more concentrated in the West, the political issues will be more and more settled in the East.

It may be admitted that, if this hypothesis were sound, Germany would emerge from the war, if not with profit, at least with the prospect of making profit

Digitized by Google

in the next twenty years. Her actual boundaries might not be enlarged, but her sphere of influence would be enormous, and her Allies or dependents would not be long before they discovered that the Teutonic camel in the tent had thrust them outside. More and more does the question of finding markets for Germany after the war become the urgent pre-occupation of her manufacturers, and therefore of her financiers. America is definitely closed to her, and the same German newspapers which, for obvious reasons, profess to ridicule the military contribution of the United States are openly pessimistic as to the future of German commerce in the Western hemisphere. It is admitted that the prospects of exploiting the British Empire are not much more favourable, and the vision of a reconciled and friendly France, which appeals so strongly to the leader-writers of Berlin from time to time, does not delude the business men. There remains, therefore, only the East, and thither Germany is now driven irresistibly alike by her military successes, her political instinct which leads her to follow the path of least resistance, and her financial necessities.

Very meagre reports of the proceedings in the Greek Chamber have so far been received in London. The members of the late Administrations have made their defence, and in one case—that of M. Ralli—the spectacle of a very old man defending his political honour in a speech that lasted no less than fourteen hours appears to have excited some sympathy among the auditors. But the upshot is as was expected: the Cabinets of King Constantine are to be tried on a charge of treason. No other course was possible, in view of the evidence that has been published since the abdication, and the Government of M. Venizelos has done wisely to insist on this act of justice to the country being done.

In the course of these debates, M. Venizelos incidentally revealed the whole of King Constantine's policy in one pregnant sentence. "On the capture of Janina," he said, "I was expounding to him the advantages of an abandonment of Greece's neutrality, and he replied, 'How can I affront the Emperor and go to war against him?'" Clearly the Kaiser knew his man when he telegraphed to "the husband of my sister, whose place is by my side." The King's further statement that, "He would rather commit suicide than abandon neutrality to fight on the side of the Entente," was in a sense prophetic, for he has in fact committed political suicide.

In connection with this matter, it is to be noticed that the Archbishop of Athens has been degraded, and certain other bishops share his fate for having taken part in the ceremony of anathema against M. Venizelos. When the clergy unwarrantably interfere in politics as these ecclesiastics did, they have nobody but themselves to thank if they are subjected to temporal penalties when the side they espouse loses the day. Some of the recent activities of the Greek Church have by no means tended to edification, or even to the strength of the Church itself.

Changes, however, are not confined to the Greek branch of the Orthodox Church. The Russian revolution has been responsible this last week for two very significant steps. In the first place, the Orthodox Church in Russia is to be democratised, and to receive an elective priesthood and other boons; in the second place full liberty has been given to the Roman Catholic Church; there is complete freedom of association for all religious orders, including even the Jesuits, who have been banned before now in Catholic countries, and freedom to teach in the schools; and no restrictions will be put in the way of conversion to Catholicism (or presumably to any other religious body). These two decisions are of very considerable importance, and they are certain to effect in one way or another the whole of the Balkans as well as Russia proper. Those who know the Russian Church best are by no means certain that it will profit by, or even welcome, this new liberty; on the contrary, the same tendencies towards disintegration which have shown themselves in the State this last six months may manifest themselves in the Church.

In that event, the soil would be receptive for the progress of Catholicism. The Roman Church retains its ordered discipline and the tradition of centuries intact, whereas the Orthodox Church in Russia cannot but be shaken in both respects; the Roman Church is better equipped intellectually than the rival whom it has never ceased to regard as schismatic, and Propaganda is certainly not without plans for the conversion of Russia, which it can hope to reach through Poland, most Catholic of countries, and the Ukraine, whose Uniat Church recognises the authority of the Vatican. Catholicism has gone ahead, numerically although not perhaps politically, in many parts of the Continent in late years, notably in Prussia and Holland; but no such opportunity has opened out before it as the present since the discovery of the Indies.

It was pointed out in these columns some weeks ago, in commenting on the Papal Note, that the real, if unexpressed, aim of the Vatican was a threefold one—the restoration of the temporal power, the political preservation of Austria as the bulwark of the Papacy, and the reunion of Christendom under the sway of Rome. The first appears to have definitely failed, the second is directly contrary to the programme of the Entente, the third lies altogether outside their ambition. But its development, although it is certain to be slow, should be carefully watched among the deeper movements which are making for the reconstruction of Europe. The prospect of reuniting Christendom is one to appeal to the most ambitious of men, and in the event of Rome obtaining any considerable influence in Russia it may be accepted that the numerically weaker Christian Churches of the Balkans would be at least equally receptive. With the different doctrines (which, to the non-theological eye, are perhaps not very different) we are not directly concerned, but spiritual movements are seldom without their temporal consequences.

The Jewish question appears to be still exciting controversy in Roumania. M. Take Jonescu, in discussing the problem of Jewish liberties in the Chamber at Jassy, remarked that, "when the Jews are fellow-citizens like ourselves, we are determined that they should not be foreigners to us, and that we should not appear to be their brothers while being really their enemies." But while concluding his speech with a declaration that he would not lay down his arms until the Jewish question had been solved, he entered a caveat against the idea that when new provinces were attached to Roumania in which were Jews who had fought under the enemy's flag, these latter should have privileges which were denied to the Roumanian Jews. It is evident from the tone and heat displayed in his speech that the opposition displayed to the enfranchisement of the Jews is not yet defeated in Roumania.

One need not make much of the Turkish bulletin reporting a British repulse in Mesopotamia. The Turkish claims are unusually modest, and we know from experience that their communiqués have a habit of dealing with shadows, while the British deal with matters of substance. It is to be noted that the Turkish communiqué admits that the Ottoman Mesopotamian Army is on the defensive.

That Germany should have gone to the assistance of Austria on the Isonzo may or may not be an indication that Austria is fought to a standstill, and needs help from her more powerful Ally. However that may be,

Digitized by Google

it certainly indicates that Germany is alive to the vital character of the Adriatic problem. If Italy can defeat Austria, as she seems to have defeated her pretty thoroughly already, not only will the Central Powers lose their outlet on the Adriatic, but they will have to resign themselves to the creation of the Jugoslav State, which means the end of Austria as at present constituted, and consequently of Germany's ambition to dominate the Southern Slavs and the Balkans. The latest move is apparently an indication that Berlin regards the Southern Slav question as more serious than the Roumanian, the forces that have been used on the Isonzo having been presumably diverted from Moldavia, since they could hardly have been spared from the Russian front at the present time, largely denuded as it is, and certainly not from the west. The blow follows hard upon rumours of further mutinies and strikes in Austria, and it may be taken as indirectly an answer by Germany to Count Czernin's now celebrated peace speech.

It is to be hoped that the recent publication in a contemporary of a large "diagrammatic map of the future South Slav State" is not intended to represent a resolve on the part of the supporters of the Southern Slavs in this country to repudiate M. Pasitch and his efforts to come to a working agreement with the Italian Government. The map, as it stands, is a very deliberate challenge to any understanding with Italy, as it bars her from any part of the Dalmatian coast, while allotting her the islands of Lussin and Lissa. It may be that the Italians will ultimately be content with such an arrangement; but it is evident that they are far from accepting it at the present moment, and those who are working for an amicable agreement between the two nationalities can only regret that the work of reconciling conflicting claims should be rendered more difficult by such aggressive challenges as this particular map.

From another point of view, moreover, the map seems to be deliberately provocative. No internal boundaries within the future Southern Slav State are indicated, and for the purposes of the propaganda that it is intended to serve there may well have been no particular need for them. At the same time, there is reason to suppose that, if the different elements in the future federated State could be consulted, they would favour the recognition of such boundaries, and that they will insist upon this recognition in due course, on the ground that the State is not merely a Greater Serbia, but is to be, in the terms of the Corfu Agreement, "the Kingdom of the Serbs, Croats, and Slovenes." The absence of internal boundaries would by itself not be so noticeable, but it coincides with a marked rebuff to Montenegro, in carefully excluding Skutari from the new State. On the merits of the Montenegrin claim to that town there is no need to enter here; but clearly if one of the countries forming the new federation had received consideration at the hands of the authors of the map, the southern boundary must have been extended to the River Drin.

The omission can hardly have been due to modesty or to a judicial weighing of rival claims, in view of the fact that Zara, with its Italian municipality, is annexed, under the disguise of a free city. The publication in which the map appears has recently come forward as the champion of a scheme for the removal of Montenegro from the category of European States before her people can be given an opportunity to decide their own fate, and it can only be supposed that the ignoring of Montenegrin aspirations in this map is part of an underhand campaign to sow discord between two of Great Britain's allies. All true friends of the Balkans must deprecate these unsavoury propagandist efforts. It is well known that there are feuds and rivalries in the Balkan Peninsula, but the only dignified rôle for Britons to play is to refuse to be a party to them, and to spare no effort to bring all the peoples together in peace and amity.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 27.

The Nile Flood.

The flood is attracting to itself considerable attention, and everything points to this year's being not only higher than that of 1916, which beat all records for twenty-two years, but also approaching measurably to the highest on record. The levels on the Blue Nile at Roseires have been steadily rising during the past month, and the last few days they have been fluctuating in a most remarkable manner. They are at present well above the point where they stood at this date last year, and are about three metres above normal. Down in Middle and Lower Egypt the river has assumed the proportions of a raging torrent, and the scene at the various bridges is wonderful. As a result of this continued rise in the levels divers tracts of land in Upper and Middle Egypt, where, owing to the good water supply earlier in the year, cereals were being grown, are under water, and there is a danger of further tracts being flooded. Every precaution is being taken to protect the river banks and to prevent any breaches, which might quite possibly take place owing to the extra pressure that is being brought to bear on them. The White Nile is slightly above normal, but that only affects the river in Egypt at low flood. Everything indicates that, whatever happens, there will be an abundance of water for all purposes from now onwards until the next flood. This is highly satisfactory owing to the necessity for extending cereal cultivation as much as possible so that the country can be self-supporting; but the flood itself will seriously preoccupy the authorities for some time yet.

The Cotton Seed Question.

The conditions under which cotton-seed for sowing (Takawi) will be controlled by the Government during the coming season have now been published. No factory will be allowed to sell or deliver Takawi, unless it is specially licensed to that effect by the Ministry of Agriculture, and no seed may be delivered to anyone, unless that person produces a permit from the Ministry authorising the delivery to him of a stipulated quantity. As in past years, the Ministry will distribute Takawi on credit and for cash to the cultivators, mostly of the smaller category. The new system, which is the result of the purchase by H.B.M.'s Government of all the cotton-seed available for export, will create an enormous amount of extra work; but the Government considers that the results that will be obtained from it will more than compensate for the additional expense and labour entailed.

Death of the Rector of Al Azhar.

On Friday last the death of Sheikh Selim El Bishri, the Rector of Al Azhar University, took place. He was accorded a most imposing funeral. H.H. the Sultan, H.E. the High Commissioner, the Commander-in-Chief, the Prime Minister and the Sirdar were specially represented, and in addition the attendance included all the Under-Secretaries, the Ulema headed by their directors, the students of Al Azhar, the School for Cadis and other institutions in which the Rector was interested, and a vast concourse of notables and officials. Those in a position to judge state that his funeral was one of the largest ever seen in Egypt of late. One interesting feature was the coffin, which was a plain wooden one, open to the sky, and not covered with any pall. A special service was held in Al Azhar Mosque, where addresses were delivered.

The late Rector of Al Azhar was a most remarkable man. He died after but two days' illness at the age of ninety-three, in full possession of all his faculties, and an analysis of the crowd which attended his funeral testified to the great esteem in which he was generally held. Everyone who came in contact with him was always struck by his strong personality and the wide

Digitized by Google

outlook that he took on life. Sheikh Selim El Bishri exercised throughout his long career a conciliatory influence over his co-religionists, and always preached unity amongst all communities. He himself put this doctrine into practice in 1910, when on the occasion of the Adana massacre, he had the courage to publish a protest against the action of the Turks, which bore testimony, by the dignity but obvious sincerity of its tone, to the religious tolerance of which he was himself such an advocate. Sheikh Selim's breadth of mind enabled him to play a prominent part in the reforms in religious education which have been introduced of late years. The various crises which have arisen at Al Azhar owe their successful settlement to his wise intervention, and the more satisfactory character of the instruction now given at that great institution and at the other religious colleges, including the School for Cadis, which was created a few years ago under his management, is due to his recognition of the fact that the principles and system of Moslem education badly needed modernising.

Interesting Development in Local Government.

An important advance in local self-government in this country has just been made. At one of its recent sittings the Council of Ministers approved of a scheme providing for the creation of what are to be known as Village Councils. These bodies, which will comprise an elected and nominated element, will fill a rôle somewhat similar to that of the urban district councils at home. They will look after the hygiene of the village where they are created, and do other local municipal work which would be for the benefit of their fellow-villagers, and of the country in general. They will also have the right to levy local taxation to enable them to carry out any work of improvement, but their activities will be subject to the approval of the Municipalities and Local Commissions Section of the Ministry of the Interior, which, under the able direction of Dr. W. Betts, C.M.G., exercise an effective control over the various local government bodies operating in the country.

The decision to create Village Councils is an excellent innovation; for while on the one hand it will conduce to the improvement of the conditions of village life, which are at present notoriously deplorable, by the spirit of emulation which will be engendered amongst adjacent villages, on the other hand it will give the people in the villages an opportunity to fit themselves for the higher forms of local government which exist. It is worthy of note that these Village Councils have been created in response to popular demand, and that they will receive no financial assistance from the Government, but be entirely self-supporting. This marks an interesting development in national character, for up to comparatively recently the people showed little active interest in the question of local government, and steadfastly refused to lend any financial assistance in the matter. Now in order to obtain the benefits of these municipal bodies they actually impose on themselves voluntary taxation.

GUTHRIE & VALENTINE

Civil and Military Tailors

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum.

The Late Colonel Lewis.

The news of the death of Lieut.-Colonel R. P. Lewis somewhere on the Flanders front has been received in the Sudan with very great regret. He had spent many years in the Sudan, and had acquired friends wherever he went. He sprang early into fame as wicket-keeper for Oxford University when he was an undergraduate at University College. Subsequently he took up journalism in London, and was connected with the *Idler* after its transfer from Robert Barr. The enterprise was not very successful, and on the outbreak of the Boer War he joined the Devonshire Regiment and adopted the profession of a soldier, though he always kept up a great interest in things literary. He was seconded later to the Egyptian Army, and was attached to the Sudan Government. Posted as Inspector in the Western Bahr-el-Ghazal, he remained there for some years, but, unfortunately, contracted black-water fever, and was ordered to be employed in a less fever-stricken district. He was then appointed intelligence officer, and was acting in that capacity upon the outbreak of war. In 1915 he was able to do a short period of service at Gallipoli, and in the following year he returned to the British Army, and after being employed for a while in Egypt, was given the opportunity to go to France. When he was wounded he was in command of a battalion of the Manchesters.

A man of very wide acquaintance and varied experience, he was a most amusing *raconteur*, and won friends wherever he went. He took a great interest in racing at Khartoum, and owned several ponies, and was not infrequently successful with them. He was of a remarkable generosity, not only in subscribing to the known objects of charity, but in helping privately in cases that never came to public notice, and his death is an intimate loss to every man who knew in him a genial companion, a sportsman, and a typical English gentleman.

A Record Flood.

The common idea of Egypt as the land flowing with milk and honey is somewhat erroneous. The milk is too often buffaloes' or goats', and honey takes no place in the products of modern Egypt. The prosperity of Egypt not only depends on the Nile, but also on the control of it. If the flood is too big, it tends to raise the level of the water so near the surface of the soil that the land is water-logged, and the crop will not materialise. To those who have travelled through the Delta and observed how near the level of the fresh water is to that of the sea it must always be a marvel how the land is not a mass of salt from the infiltration of the sea. Thus the management of the Nile flood is a most important factor in the prosperity of Egypt, and it was this that prompted the building of the Assouan dam, one of the greatest modern works, and one that can bear comparison with the amazing structures of ancient Egypt. How this problem may best be solved—namely, how to provide Egypt with a steady flow of water which will neither fail in a poor year nor tend to wash the country into the sea in too high a flood—is under the consideration of the experts. In the Sudan, on the other hand, there are no difficulties of that sort. It is true that good land may be flooded out, but only to bring more within the reach of cultivation, and there the higher the flood the better pleased is the native, who is provided with irrigated land at no cost to himself. The bank of the Nile is almost always a little higher than the land a little distance away. If the flood reaches a certain level a vast area parallel to the river is flooded, and upon this a good crop can be obtained with little trouble. In some places the area flooded is sufficiently large to be called a basin, and steps have been taken in some of them—in fact, the great majority—to ensure that the water can reach them in a comparatively low Nile. Even so, a high Nile will fill the basins much more, and it will also flood a lot of land that in normal times is not considered as arable, because it is too far from the river to work to profit, and there is not enough rain to grow a rain crop. This year the river has beaten all its own records for a very considerable period, and the view to anyone travelling into Khartoum from the north is in remarkable contrast with its ordinary appearance. The water extends sometimes on both sides of the railway line, and there is always a vast sheet of water visible. As the Nile drops this all becomes available for cultivation, and that, too, of the simplest kind, as the soil has been so long without being flooded that it can be assumed to be free from the cut-worm or suchlike pest of perennial cultivation. The river has remained at the height of flood for so long a time that very likely it may be impossible to get the water off some of the basins before the land gets water-logged. Even so, there will be so great an expanse added to

Digitized by Google

the normal area that it will be practically impossible for the natives available for the purpose to get the land all under cultivation. Not only the banks of the Nile profit, but there are many little islands which, after being flooded, are covered with grass, and save the trouble of growing fodder. When it is remembered that in native calculations one-quarter of the crop, on land worked by water-wheel, has to go to feeding the animals that work the wheel, the value of an extraneous source of forage can be easily imagined. At the present moment the natives are hoping for a fully average crop from the rain lands of the Gezira, which forms the chief supply for marketable purposes owing to its vicinity to the railway. Over and above that they hope to get a certain amount of results from the overspill into some of the large marshes on the banks of the Blue Nile. There is the vast crop to be raised on the land vacated by the sinking Nile on the White Nile, which, being very shallow and broad, provides an exceptionally large area for cultivation of this sort. Further north there is every basin full, and enormous extents of open country flooded for this year for the first time almost within the memory of man. All this will be only supplementary to the very large crops that can be obtained by the water-wheel when the lift is reduced to a minimum and the water stays high for a long time. Labour to deal with all this will be the main problem, and that has been the great difficulty in the Sudan for a long time, and will be so until the population has adjusted itself to the needs of the country. For that, time is the only cure.

THE SITUATION IN GREECE.

(From Our Own Correspondent.)

Athens, September 30.

The Food Shortage.

The food question has become somewhat acute, and M. Venizelos has taken the matter in hand for the present.

A notice appeared in the papers the other day to the effect that no vegetables of any description, fresh or dried (with the exception of tomatoes), no macaroni, rice or other farinaceous food, and no fresh fish must be served in any hotel or restaurant until further notice, and that only on two days in the week may sweet dishes be served. A severe penalty will be inflicted in case of contravention of this order. This somewhat drastic measure, which practically reduces the diet of these establishments to only bread and meat, eggs and cheese, is said to be due to the extreme difficulty, if not impossibility, of the general public to obtain vegetables and fish of late.

The hotel-keepers apparently have, through arrangements with contractors, been able to buy up almost all this produce, which is brought on the market in limited quantities, and the general public have, therefore, been unable to obtain any, to the distraction of housekeepers. The scarcity of vegetables in Athens is said to be due to the insufficient means of transport from country places and from the islands. Scarcity of steamers and the reduced number of trains, through want of fuel and owing to military requirements, have prevented the daily arrivals of country produce, and this state of affairs, coming on the top of the scarcity of rice, macaroni and flour, has called for serious measures to appease the growing dissatisfaction and anxiety of the people.

The Shipping Problem.

Since the blockade was raised, it is alleged, very small quantities of foodstuffs have arrived in Greece, and the inability of the Greeks to use their own steamers as they wish for their own purposes has evoked very unfavourable comment. There are apparently hundreds of tons of general merchandise waiting in England for shipment to Greece for the transport of which English steamers are not available. But Why should we not be allowed to use our own steamers? it is asked. It is hoped that the situation will improve in a short time after the arrivals of further supplies now on the way, but in the meantime it is very unsatisfactory. Further, the suspension of the parcels post from England to Greece is also a great drawback, as many articles were formerly brought by this means.

New Salonika.

The reconstruction of Salonika is occupying the attention of the Government, and arrangements are being made to obtain the services of Mr. Mawson, the English architect, who is expected to arrive soon with a body of assistants to draw up plans for the rebuilding of the town. A great deal of dissatisfaction, if not dismay, has been caused by a proposed scheme to expropriate parts of the burnt quarter, and after the plans of reconstruction have been completed, to sell the sites at auction or otherwise, a measure which would doubtless deprive many of the original holders of their property at a great sacrifice. In the meantime, as can be imagined, after such a large fire, the life and trade of the town are completely disorganised. Things are lifeless, while the desolation and misery are, it is said, indescribable, and one wonders how the homeless thousands are to get through the coming winter.

News in General.

Some of the events of December 2, 1916, are being shown on the cinema film; but when the pictures were taken by the Royalist party it was little thought that they would be used for the purpose of illustrating their own misdeeds to the world. One of the scenes shown is the transfer of the Venizelist prisoners from the Chamber, where they were kept for some time, to the Averoff prison, and the ill-treatment they received on that occasion is fully testified to by the camera. Another film illustrates the public anathematising of M. Venizelos by the Church on the Champs de Mars. The pictures show the whole proceedings, and how an effigy of M. Venizelos was stoned by the vagabonds collected there for the occasion. This may be taken as one of the most disgraceful episodes in the reign of Constantine, and indicates the extent to which his hatred of the eminent statesman carried him.

No rain has yet fallen in Athens, and the scarcity of water is greater than ever. It is an additional anxiety for householders, already harassed by the difficulty and expense of procuring anything to eat, and also the means of cooking and lighting. Projects have from time to time been submitted to improve the water supply of the city, but year follows year without any decision being taken, and the present state of affairs is somewhat of a reflection on past Governments. One of the effects of the scarcity of water is that the streets are never watered, and with a strong wind the city is enveloped in dust.

A censorship of correspondence has been established at the Post Office, and, probably owing to an insufficient or inefficient staff, considerable delay results in the despatch of letters. If the Government intend to maintain a rigorous censorship of all letters leaving the country, it is to be hoped that arrangements will be made to avoid delay as much as possible, for at present a letter to England through the Greek Post Office may take about a month to reach its destination.

LOST MEDITERRANEAN MAILS.

The Postmaster-General announces the loss at sea through enemy action of:—(1) Letter mails for the Salonika Force and Hospitals at Malta containing letters, etc., but not parcels, which reached the Army Post Office, London, for dispatch between 2.20 p.m. on the 5th and 2.20 p.m. on the 6th inst. (2) Letter mails containing letters, etc., but not parcels, for the civilian population of Salonika and district and many of the Greek islands, which reached the General Post Office, London, for dispatch on the 4th inst. (3) Parcels mails containing parcels for the hospitals at Malta, which reached the Army Post Office, London, for dispatch between noon on the 5th and noon on the 6th inst.

THE KAISER'S TURKISH TOUR.

Reuter's Amsterdam correspondent states that, according to a Constantinople telegram, the Kaiser has addressed the following telegram to the Sultan:—"Before leaving the territory of the Ottoman Empire I must again express to your Majesty my warmest and most cordial thanks for the tokens of friendship and the hearty hospitality which your Majesty lavished upon me during the unforgettable days I have spent in Constantinople. I am extraordinarily gratified at the friendly relations which developed between us on the occasion of my visit to your capital, relations which I am convinced constitute a strong guarantee that the existing ties between our countries will daily grow in strength and durability."

The Sultan replied:—"I am gratified at your Majesty's friendly visit, and retain the most pleasant recollections of the agreeable days we spent together. Your Majesty may be sure that I and my people will ever remember this striking proof of sincere friendship, and that the alliance which so closely unites our two countries will thereby be still more firmly established."

TRAGEDY OF MONTENEGRO,
THE SMALLEST AND POOREST OF OUR ALLIES.
MONTENEGRIN RED CROSS

SYRIAN NOTES.

(From a Correspondent.)

The Fall of Jemal Pasha.

Jemal Pasha, if report be true, has at last paid, in part, the penalty of his evil deeds in Syria. So long as his policy of terrorism had an outward show of success he received the favour and approval of the Constantinople Government; but, as soon as the disastrous consequences that such a policy was sure to entail in the end began to reveal themselves, the Young Turks, as is their wont, made a scapegoat of him. By the public avowal of the Grand Shereef of Mecca, one of the determining factors of his revolt against the Turks was the atrocities committed by Jemal against the Arabs of Syria. Since then the continued aggravation of the situation provoked a series of revolts, first that of the Druses of Hauran, then that of the Ansairi of the Lattakia mountains, and finally that of the Bedouin of Syria and Palestine, who have now made common cause with their erstwhile enemies the Druses. It will probably not be very far from the mark to set down the defeat and capture of the Turkish garrison at Akaba as due in no small measure to this spread of the spirit of revolt, of which a small force of the troops of Emir Faisal, the eldest son of the King of the Hejaz, was able to avail itself. But it was Jemal's culminating crime, the persecution of the Jews, that brought matters to a head and precipitated his downfall. This roused all the Jews of the Old and New World, and it may well have been the pressure that Jewish finance exercised on the military party in Germany that made the Emperor summon the Nero of Syria to Berlin, ostensibly to grant him a decoration, but, in reality, unless all indications are at fault, to mark his recall.

The New Governor of Syria.

There can be no better proof of the Young Turks' conviction of the error and failure of Jemal's terrorising policy than his replacement by Izzet Pasha, who was instrumental in effecting the pact between the Imam Yehya, the supreme chieftain of the Yemen, and the Turkish Government, which pact testified to his statesmanship and his wise spirit of compromise. The writer was told by persons who knew Izzet Pasha intimately at Damascus that he represents the best type of Turkish gentleman. He is said, by the way, to have received his military education in the same institution as the Kaiser. But the statesmanship of Izzet is not likely to improve a situation which, from the political standpoint at least, would seem to be irretrievable. The spirit of open revolt has gained virtually the whole chain of Bedouin tribes running from Maan in the South to Aleppo in the North, as well as the Druses of Hauran. The King of the Hejaz having pushed his military operations as far north as Southern Palestine, and by the occupation of Akaba and the territory surrounding Maan established a point of contact with the British forces at Gaza, on the one hand, and with the Bedouin and Druses of Syria on the other, is now in a position to keep the spirit of revolt among the latter aflame and to impart a more militant and practical character to the anti-Turkish movement, which had so far been in a smouldering state. A more or less regular line of communication between the northernmost base of the Hejaz Arab forces and the Bedouin and Druses of Syria and Palestine is now established. Refugees from Syria relate that, while Damascus and other inland towns, such as Homs and Hama, are now suffering less from famine and disease, the situation in Beyrout and the Lebanon is much more serious. Typhus in Beyrout is said to have been claiming victims by the hundreds. When the last reports published by American missionaries, who left Syria a few months ago, state that the calamity which has befallen this unhappy country surpasses in magnitude that of Belgium, and describe Syria as one vast cemetery, the appalling conditions obtaining there may well be imagined. Although the callousness of the Turk might make him proof against all this suffering, he has at last become alive to the gravity of the situation, and it is reported that the authorities have lately been making a serious effort to alleviate the prevailing misery by a free distribution of foodstuffs. When talk of peace is being so persistently kept up by Germany it is natural that the Turks should be actuated by the desire of appearing at any international congress with some semblance of respectability, with a view to obtaining a hearing for their claims. It remains to be seen how far Izzet Pasha will succeed in bringing things back to a state approximating the normal.

Military Service.

The last order with regard to military service was that the military exoneration tax was to be no longer accepted, save in particular cases, when the tax should be in the form of a quantity of wheat worth, according to present prices, £400.

Although the Organic Law of the Lebanon has been abolished, and the Mountain has been divided into three districts, the first of which was annexed to the Vilayet of Beyrout, the second to Tripoli—which was detached from the latter as a Mutessarifiet—and the third to Baalbeck, nevertheless, regular conscription has not yet been applied to the inhabitants. The Turkish authorities, however, are said to have practically mobilised the Lebanese for auxiliary work, such as road-building, trench-digging, and other works of defence.

Germany and the Palestine Jews.

The success attending the agitation promoted by Jews abroad in favour of their oppressed co-religionists in Palestine may be gauged from the fact that the Ministry of Foreign Affairs in Berlin has instructed the German Military Headquarters in Turkey to send a Commission of Inquiry to Palestine in order to investigate the charges of wholesale massacre and pillage committed on the Jews there. The Jewish Societies in Germany have collected considerable sums of money with the object of sending another deputation to Palestine on the same mission. The American Diplomatic Agent at Stockholm reports that the number of Jews sent out of Jaffa and Jerusalem amounts to 14,000. Again, the delegates of Jewish Societies in Buenos Ayres called on the President of the Argentine Republic, and requested him to assist the Spanish Government in its defence of the persecuted Jews in Jaffa and Jerusalem, and the President promised them all help in this connection.

The Ottoman Government, evidently perturbed by this world-wide agitation, published an official notice to the effect that it did not order the evacuation of Jaffa and Jerusalem as a measure of retaliation or revenge taken against certain elements of the population, but rather as a military measure meant to facilitate the Army's task in defending these two towns.

The Arab Spirit.

A story which reaches me serves to contrast, in a striking manner, the new methods which the Arabs are introducing into the country with Turkish terrorism. A party of fugitives from Syria report that they were joined by a traveller, who from the outset seemed to them rather suspicious, on account of the excellent variety of food with which he was provided, while they had encountered great hardships in obtaining the simplest food and even water on their journey. Further, he continually plied them with questions which betrayed a more than ordinary inquisitiveness; so that, finally being satisfied that he was a spy, they reported him to the Emir Faisal. The latter sent for the man, and, after ordering £20 to be given him, said to him, "Now, go back, my son, to whence you came, and tell those who sent you that there is no need for them to resort to such hidden ways for getting information about us, as we have nothing to hide; they can in all safety send openly men from their part who can go back to them to report what they have seen."

WORKERS NEEDED IN SALONIKA.

For those unable to take up active military service an opportunity to do exceptional work is offered by the Y.M.C.A. An urgent appeal from Salonika has been received by Sir Arthur Yapp, begging for more workers to be sent out at once, otherwise some centres will be compelled to close. The work presents great possibilities, for, to quote an officer lately returned from Salonika: "The only people who do anything for the troops out there are the Y.M.C.A." They are in need of more marquees, more reading-rooms and literature, more concert parties, and games. It is hoped that many will come forward to aid in the national work that is being done in this quarter of the war zone.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
THE SCHOOL RE-OPENED ON OCTOBER 1.
For particulars, apply to E. DENISON ROSS, Director.

NEAR EAST BOOKSHELF.

THE RISE OF NATIONALITY IN THE BALKANS.

"The sins of the European Concert have come back to roost, and this country is paying for its mismanagement of the Balkan problem a generation ago by a situation in which French and British blood is being shed, and shed inevitably, upon the soil of Macedonia." Such is the blazing truth which the learned writer of "The Rise of Nationality in the Balkans" would have his readers realise. The seething unrest of South-Eastern Europe has been a constant menace to the peace of the nations for at least two centuries, and no final settlement can ever be made until it is recognised by all those who look for peace that it is not the interest of the "Great Powers," but the prosperous future of the Balkan nations themselves which must be the primary consideration in all coming arrangements. During the past two centuries three central facts have dominated Balkan history. First, the persistent struggle for freedom of the subject Christian races against the bloodstained and incompetent rule of the Ottoman Turks—a race "utterly incapable of constructive work or probity of administration." Second, the perpetual intermeddling of the Great Powers in Balkan affairs in their own purely selfish interests, and third, the steady rise of national feeling among the Balkan peoples themselves. Dr. Seton-Watson enlarges upon these facts most convincingly. No more terse and well-balanced account of the various Balkan nations exists. Their slow and painful progress towards self-government must find a sympathetic response in the minds of most readers. To-day's events are but the recurrence of the tragedies of centuries. It is interesting, for example, to recall just now that in earlier days, "in less than sixty years there were no fewer than five foreign occupations of Moldavia and Wallachia, four Russian and one Austrian." Of all figures that move across the scene it is a Hohenzollern Prince who—quite justly as we believe—receives the highest praise. "The accession of Prince Charles of Prussia may be regarded as the turning point of all Roumanian history. His long reign of forty-eight years has completely transformed Roumania from a corrupt and backward dependency of the Turks to much the most powerful, independent State in South-East Europe, and a very large share of the credit for this transformation falls to King Charles himself, alike as statesman, as soldier, and as organiser."

With regard to the Young Turks, the author shows how much the democratic peoples were once mistaken. "Few events have been more misunderstood than the Young Turks Revolution of 1908." The account here given of the incompetence and ruthlessness of the gang that have captured the Government in Constantinople will be a revelation to some. How the revolution has led to the present crisis is clear. "As time passed it became more and more obvious that the sole hope of salvation lay in the army. Hence it was absolutely inevitable that the Young Turks should fall under German influence, since the Germans alone could be relied upon to reorganise the army without at the same time interfering with the autocratic designs of the Committee of Union and Progress."

In Part II. Dr. Seton-Watson describes the formation of the Balkan League, the unexpectedly successful Turco-Balkan war, the tragic break-up of the League, and the second Balkan war.

There are doubtless many points still obscure in this tangled web, but the author illuminates others, and particularly with regard to Bulgaria reveals much of which the British public were quite in the dark at the time. The sympathy of England was undoubtedly with Bulgaria even when the second Balkan war happened, a position largely due to the extraordinary way the Bulgarian authorities controlled the war news in their own interests. Detailed reports of battles fought at Tcherkeskoj and Tchataldja—which never occurred—on the 3rd to the 9th November, 1912, were supplied to the *Reichspost* of Vienna, and thus to the world; and in the same way, seven months later, "on 30th of June it was announced officially from Sofia that the Serbian troops had opened sustained fire upon the Bulgarian lines between Zletovo and Shtep." It is now known beyond doubt that Bulgaria deliberately planned a surprise attack on her erstwhile allies at the very spot, naively thinking that by taking forceable possession of much coveted territory without a declaration of war they would be able to appear before the Conference table in Petrograd in a more favourable position from being in actual occupation of the land she hoped then to obtain by treaty. The whole occurrence is unpardonable. "In all the grim story of modern Balkan warfare this repulsive incident stands out above all the rest . . . that on certain sections of the front Serbian and Bulgarian officers dined together on the evening preceding the final 'stab in the back,' and the very men who a few hours before, with the fatal orders in their pockets, had been clinking glasses with their Serbian comrades, crept back at the dead of night in the hope of slaughtering them unawares."

Macedonia will still be a perplexed problem when the conclusion of the war comes. "With the single exception of Hungary there is no part of Europe where the medley of race is so great." "Peopled with a fluid population of Turks, Albanians, Jews, Greeks, Bulgars, Serbs, and Vlachs, Macedonia has been the home of ceaseless and varying racial animosities, of rival racial and ecclesiastical propagandas, both backed, as the Christian States of the peninsula grew stronger, by its particular racial affinity beyond the Turkish frontiers."

But, in spite of all, Dr. Seton-Watson is not without hope that this restless corner of Europe may some day see peace. The Balkan nations must realise that there is no future for them until they agree among themselves. "A definite accord between Serb and Bulgar would obviously be the prelude of a new era in the history of Balkan independence," and the only hope of this is to restrain once for all those outside influences which have busied themselves in fomenting the Serbo-Bulgarian feud.

The History unfortunately breaks off where we should much like to learn more of the author's views. Owing to "his departure from London on military duties" the book is published incomplete; but Dr. Seton-Watson has now returned to London. The missing chapters may some day appear as Part III., and we must hope that they will narrate the dawn of a new and better era in these much tried lands.

The Rise of Nationality in the Balkans. By R. W. Seton-Watson (London: Constable and Co., Ltd., 1917. 10s. 6d. net.)

THE LATE CANON STERLING, M.A., M.B., B.Sc., Durh.

(Captain R.A.M.C. Hon. Canon St. George's Collegiate Church, Jerusalem. Medical Missionary C.M.S., Gaza.)

A large circle who, within recent years, have been associated with Palestine and Syria will learn with sorrow that Captain Sterling, R.A.M.C., passed away at St. Thomas's Home, St. Thomas's Hospital, London, on the 17th inst., after a prolonged and painful illness. Robert Sterling was a man of varied gifts and extraordinary energy. After taking his arts' course and being ordained, he elected to pursue further studies at Durham University with a view to medical mission work. In these medical studies, although carried on while he was doing regular clerical duties, he greatly distinguished himself. In 1892 he was sent by the C.M.S. to Gaza, where he gained an ever-increasing influence among the people of that city and the whole district around by his surgical skill. While immersed in this work, together with the clerical supervision of the mission station—duties which would have absorbed all the energy of most men in such a hot climate—he found time to acquire a quite unusual mastery of Arabic, so that he was not only able to speak and preach with fluency, but he also published two books, "A Grammar of the Arabic Language," which has for long been used as a text-book at Oxford University, and "Arabic and English Idioms." During the twenty-two years that Dr. Sterling was associated with this station he greatly extended the work; he rebuilt the hospital, making it the chief surgical centre in the whole district, and he made regular itinerating tours, reaching as far south as El Arish. His influence among the people of the land was unique, and he will be remembered for many years to come. The late Bishop Blyth, as a recognition of his appreciation of his work, made him an Hon. Canon of St. George's Collegiate Church, Jerusalem. Soon after the outbreak of the war Dr. Sterling joined the R.A.M.C. as lieutenant, and after a year was made captain. Though considerably over the ordinary military age for foreign service with the R.A.M.C. he was, by his own request, transferred, after a period of service at home, to the Palestine front, where his knowledge of the land and the people was of considerable value to the military authorities. Before he was finally invalided home he had the melancholy satisfaction of viewing his old home in Gaza from a high point within the British lines. He will be sadly missed by his friends, both European and Palestinian, who will all sympathise with his wife and family in their heavy loss.

A HOSPITAL BOMBARDED.

The following statement is issued by the Roumanian Embassy:—

"On October 11 and 12 the town of Galatz was bombarded by the enemy. On October 11, 140 shells of heavy artillery, and on the 12th 30 bombs, were dropped by five aeroplanes on the town. Four inhabitants were killed and 20 wounded. The principal hospital, in which there were 650 wounded and nurses, was hit by thirty-two shells, several patients and nurses were dangerously wounded, the chapel destroyed, and the hospital had to be evacuated. These proceedings are contrary to the rules of the Hague Convention of October 18, 1907, Article 27. The Roumanian Government raises the strongest protest against the bombardment of a hospital, and, according to Article 3 of the same Convention, will hold the enemy responsible for all the damage done."

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. October.	1917. October.		1336. Muharram.	5678. Heshvan.
26	13	Friday	10	10
27	14	Saturday.....	11	11
28	15	Sunday	12	12
29	16	Monday	13	13
30	17	Tuesday	14	14
31	18	Wednesday	15	15
November 1	19	Thursday	16	16

The Serbian Minister has returned to town from Bradford.

Prince and Princess Murat arrived in London on October 18 from the Continent.

General Vallesono, of the Roumanian Army, arrived in London on October 19 from Jassy.

Dr. Angelescu, the newly-appointed Roumanian Minister at Washington, has left London for Paris.

Monday will be the anniversary of the birthday of Queen Marie of Roumania, who was born in 1875.

M. Naoum, ex-Greek Minister at Sofia, has been appointed Director-General of the Greek Foreign Office.

Colonel Ferigo, formerly Military Attaché to the Italian Legation in Roumania, left London on October 19 for Rome.

Prince D. Bogdan, a member of the Roumanian Parliament, and Princess Bogdan left London on October 19 for Paris.

It is reported that the ex-King Constantine has undergone a successful operation, and that his condition is satisfactory.

Colonel the Earl of Stradbroke has arrived in England on leave from Egypt, and is staying at Henham Hall, Wangford.

M. Rendis, who has been appointed Greek Chargé d'Affaires of the Legation at Stockholm, has arrived in London on his way to Sweden.

M. Victor Jonescu, the newly-appointed Roumanian Minister to Lisbon, left London on October 18 for Paris on his way to Portugal to take up his new duties.

Sir Lucas and Lady Ralli have endowed six beds in University College Hospital for the treatment of Bright's disease in memory of their late son, Captain Leo L. Ralli, A.S.C.

The King has given authority to Mr. Frederick Parker Walton, Director of the Sultania School of Law, Cairo, to wear the Insignia of the Third Class of the Order of the Nile.

Among recent wills is that of the late Lieut.-Colonel Colin William Macrury, late I.M.S., of Broadwalk Hotel, De Vere Gardens, Kensington, who left estate of the gross value of £7,973.

The sudden death is reported of the prominent Slovene patriot, Mgr. Janez Krek, one of the most effective orators of the Vienna Parliament and a strong supporter of the unity of Serbs, Croats, and Slovenes.

General Mavrocordato, of the Roumanian Army, attached to the Headquarters of the Allied Armies at Salonika, attended by Lieutenant Michael Sturdza, A.D.C., has arrived in London from Roumania.

It was announced in the *London Gazette* on October 18 that Lieutenant-General Sir H. B. B. Watkis, K.C.B., Indian Army, had been appointed to be General, vice Sir M. H. S. Grover, K.C.B., K.C.I.E.

A telegram from Cairo states that the Alexandria Sporting Club has given £4,000 from racing profits to military charities. In pre-war days racing did not realise more than a few hundred pounds profit annually.

M. Pashitch, the Serbian Prime Minister, has expressed to the family of the late Major Claude Askew, the well-known novelist, his profound sympathy with them in connection with the tragic death of Major Askew and his wife.

Prince and Princess Alexis Karageorgevitch of Serbia, who have been visiting Yorkshire recently in connection with meetings arranged by the Serbian Consul at Bradford in aid of the Serbian Relief Fund and the Serbian Red Cross, left London on October 23 for Paris.

The Cairo correspondent of *The Times* telegraphs that the Holy Carpet has returned from Mecca, and that the new Sultan presided at the usual ceremony. The returning pilgrims state that the pilgrimage passed off in the best conditions.

A marriage has been arranged between Lieutenant Errol Mews, R.F.A., second son of Mr. Herbert Mews, of Whychcote, Portslade, and Ruby Evelyn, eldest daughter of the late Mr. Constantine Ionides and Mrs. Ionides, of 10, Second Avenue, Hove.

It is stated that, as a result of the fire at Salonika, out of a total civil population of 278,749 no fewer than 73,448 were rendered homeless. At present 7,592 persons are in tents and 65,856 in houses and public buildings, all overcrowded, and fully half are children under 12.

On Sunday, October 21, the anniversary of the Battle of Navarino was celebrated in Greece for the first time. There was a celebration at the Olympia Theatre, Athens, in the presence of King Alexander, M. Venizelos and all the Cabinet Ministers and the entire Diplomatic Corps.

The Sirdar, reporting on the results of "Our Day" in the Sudan, says:—"'Our Day' appeal in the Sudan has realised £8,214 to date. Owing to distance of out stations, it will take some time denitely to ascertain the final amount subscribed."

At the Serbian Church in Corfu, on October 21, a service in memory of Major Claude Askew and of his wife, Mrs. Alice Askew, was conducted by the Archbishop of Serbia, who paid an eloquent tribute to the benevolent work of Major and Mrs. Askew, to whom, he said, the Serbian people owed eternal gratitude.

Commissioner Booth-Tucker, the head of the Salvation Army in India, who is at present in London consulting with General Booth in regard to the extension of the work in that country, has arranged to address several meetings in London on Indian problems, the first of which took place at the Congress Hall, Clapton, on October 21.

Colonel P. Peshitch, of the Serbian Headquarters Staff, had the honour of being received in audience by the King at Buckingham Palace on October 19, when he delivered to his Majesty an autograph letter from the Crown Prince Regent of Serbia. The same day Major N. Arion, Roumanian Military Attaché, had the honour of being received in audience by the King.

The War Office announce that the King has approved of the dignity of a Knight Commander of the Order of Saint Michael and Saint George being conferred upon Major-General Sir Harry Triscott Brooking, K.C.B., Indian Army, in recognition of distinguished services in the field in connection with the capture of Ramadieh, on the Euphrates, which was effected on September 29.

A first list of subscriptions received at the Greek Consulate at Newcastle for the Lord Mayor of London's fund for the relief of sufferers by the Salonika fire has now been issued, giving a total of £128 10s. 11d. This sum has been forwarded by the Lord Mayor of Newcastle, together with a contribution of 200 guineas from the Consul for Greece there, Mr. Leonard Macarthy.

Miss Hughes, Secretary of the Royal Asiatic Society since 1904, is resigning her post on her approaching marriage with Mr. R. W. Frazer, formerly of the Madras Civil Service, and afterwards Secretary of the London Institution. Her successor will be Colonel H. A. Rose, late of the Punjab Civil Service. He is an authority on Indian ethnography, and was the author of the Punjab Census report for 1901.

M. Politis, Greek Minister of Foreign Affairs, speaking in the Chamber, said that the idea of a signature of peace had been circulated by persons, parties, and Governments who have an interest in deceiving public opinion. The truth, however, was that peace was not imminent, and the war would be a long one.

It is understood that, according to present arrangements, Mr. H. A. L. Fisher, Minister of Education, will act as representative of the India Office in the House of Commons in the absence of the Secretary of State in India. Mr. Fisher is already familiar with certain aspects of Indian conditions, for he was a member of the Public Services Commission, and in that capacity visited the country.

Our Khartoum correspondent, writing on September 27, says:—H.E. the Acting Sirdar and Governor-General, arrived from Erkowit with his staff on the afternoon of the 24th. His arrival was private, and he proceeded at once to the Palace. The morning being the first day of the Feast of Bairam, he held a levée, after reading out the list of those who received decorations and robes of honour, and presenting those who were in Khartoum with their honours. It is expected that he will proceed north shortly. He will be joined at Atbara by Mrs. Stack, who has been staying at Erkowit.

APPOINTMENTS, PROMOTIONS, ETC.

Lewa F. Carroll Pasha, Principal Medical Officer, Egyptian Army, and Lewa R. C. R. Owen Pasha, C.M.G., Governor Mongalla Province, returned to Khartoum at the beginning of October on the expiration of their leave.

The Rev. A. H. Longley has obtained leave of absence for one year, and the work of the Delta Chaplaincy will be carried on by the Rev. A. E. Stanley, M.A., who, with the Bishop's sanction, has kindly agreed to take his place while he is on furlough from his duties as chaplain in India.

Major R. Pringle, of the Finance Ministry, Cairo, is shortly leaving Egypt for good, says the *Egyptian Mail*. He has been requested by the Egyptian Government to assist Sir A. L. Webb in London in the purchase of stores required in Egypt. He has served Egypt for many years, and will be greatly missed by his numerous friends in that country.

OBITUARY.

SIR PARDEY LUKIS.

We regret to announce the death of Sir Charles Pardey Lukis, K.C.S.I., M.D.London, F.R.C.S.England, Director-General of Indian Medical Services, aged sixty years.

Sir Pardey received his professional education at St. Bartholomew's Hospital, and entered the I.M.S. in 1880 at the top of the list. In the following year he served with the Waziristan Field Force, and three years later in the Zhob Valley. He was transferred to the civil branch, and was appointed to various posts in the United Provinces. In 1899 he became Civil Surgeon of Simla, and was later appointed honorary surgeon to the Viceroy.

He became, in 1905, Principal and Professor of Medicine in the Calcutta Medical College, and First Physician of the College Hospital. He was appointed Director-General in 1910, and has thus held that appointment for some eight years, a period during which remarkable progress was made in original research in medicine in India, a subject in which he took special interest. He was the editor of a journal devoted to this subject, and was the author of "A Manual of Tropical Hygiene."

Sir Pardey had passed the age for retirement, and had remained in his post at the earnest request of the authorities, who desired him to retain it until the end of the war. He leaves a widow, the daughter of the late Colonel John Stewart, R.A., C.I.E., and sister of Mrs. F. H. Skrine. The family consists of two sons and three daughters. The eldest son, it will be remembered, took a commission in the London Regiment immediately after the outbreak of war, and was killed in France in March, 1915.

As we go to press we learn of the death of Sir William James Herschel, I.C.S., retired, which occurred on Wednesday morning at his residence, the Rectory House, Warfield, Berks.

Colonel H. P. Ralston Crawfurd, I.A., has died at Kensington after a short illness. He obtained his commission in 1855, and served with the Burmese Expedition of 1885-86, for which he received the medal with clasp.

Lady Meade died on October 21 at her residence in Stafford Terrace, Kensington. She was the daughter of Lieut.-Colonel Malcolm, Resident of Baroda, and married in 1853 Sir Richard John Meade, K.C.S.I., C.I.E., who died in 1894.

Major Ernest Glanville Waymouth, R.A., who died on October 16, aged 48, obtained his commission from Woolwich in 1888. He saw service in the Nile Expedition in 1898, and was mentioned in despatches for his services, receiving the 4th Class of the Medjidie and medal.

The death is announced of Mr. Henry W. J. Bagnell, I.C.S., retired, at the age of 56. He was the son of the late Rev. Henry Bagnell, rector of Nuffield, Oxfordshire, and was educated at Eastbourne College, at Keble College, Oxford, and at Trinity College, Dublin, and joined the Indian Civil Service in 1882.

The death took place at 20, Ennismore Gardens, on October 19, after a short illness, of Lieutenant-Colonel W. B. Miller, son of the late Dr. Rector Miller, of Perth, and brother of Lady Davson. He saw service with the Egyptian Expedition in 1882, was present in the action at Kassassin, and was mentioned in despatches.

Dr. Edward Hull, whose death has just taken place, succeeded Professor J. B. Jukes as Director of the Geological Survey of Ireland and Professor of Geology in the Royal College of Science, Dublin, in 1869, and did not retire from the service until the completion of the Irish Survey in 1890. An expedition organised by the Palestine Exploration Society in 1883 was placed under Professor Hull's charge, and a long journey through the Sinaitic Peninsula and Southern Palestine resulted in throwing considerable light on the geological structure of that region. One of the members of the party was the late Lord Kitchener, then a captain in the Royal Engineers. Professor Hull was elected a Fellow of the Royal Society in 1867, and in 1879 received the honorary degree of LL.D. from the University of Glasgow.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

LIDDELL.—On October 19, at Gezireh, Cairo, to Major (Temp. Lieut.-Colonel) John Stewart Liddell, C.M.G., D.S.O. (late R.E.), and Mrs. Liddell—a daughter.

SWAN.—On October 12, at Cairo, Egypt, the wife of Percy Swan, of a daughter.

MARRIAGE.

LONGLEY—MUIRHEAD.—On October 18, at St. Peter's, Eaton Square, by the Rev. L. S. Westall and the Rev. J. Longley, father of the bridegroom, the Rev. A. H. Longley, Delta Chaplain, Egypt, to Margaret Lauder Lilian Muirhead, Broomwood, St. Albans.

DEATH.

MEADE.—On October 21, 1917, at 19, Stafford Terrace, Kensington, Emily Salter Meade, widow of Colonel Sir Richard John Meade, K.C.S.I., C.I.E., in her 85th year.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.). ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NEW FACTORS IN INDIAN POLITICS.

It is difficult in these days for the ordinary citizen of the Empire to follow the developments of the political situation in India. The mails arrive at lengthy and uncertain intervals, the cable service is necessarily curtailed, and such items of news as reach this country are too often crowded out by matters deemed to be of more immediate interest to the public. The position is much to be regretted, for in India history is just now in the making, and when India sets out to make history she works on the grand scale, and produces results which the rest of the world must take into account. If we look below the surface of the present situation, we find that the most striking feature is the entry of new forces into the political arena. To the ordinary observer the field has hitherto been occupied by two parties only: the small but active class of politicians eager for a larger share of administrative power, and the established bureaucracy, not by any means unmindful of the aspirations of their adversaries, but still faithful to the ideal of administrative efficiency, and at the same time conscious of their responsibility on the one hand to the Empire and on the other to the silent masses of the Indian population. The opposed ideals are by no means irreconcilable, and to some acute observers the position has appeared to call for the introduction of a neutral moderating element, which should strike out a path of orderly progress for the Indian peoples as a whole. The new fact in the situation is that India appears to be providing this moderating element for herself. The active politicians do not make up the whole nation: above them and below them in the social scale are other classes, in the aggregate of much greater importance, which have hitherto been silent spectators, but which are now beginning to make their voices heard, and are taking up a middle position, that may well serve as a rallying point for all Indians of good will. Let us glance for a moment at these new forces in the field.

On the one side we have the aristocratic and propertied interests of the country. The last few decades have witnessed a remarkable change in the outlook of these classes, a change which must be attributed in part to the spread of education, and in part to the cumulative effect of distinctively British influences. The Indian aristocracy is no longer entirely absorbed in the pursuit of pleasure, as that word has hitherto been understood in Eastern countries: many of the younger men, and also some of their seniors, are devoting more and more attention to public affairs, while some of them have been thinking hard, and are now learning to translate their thoughts into speech and action. This new development is typified by the Maharaja of Bikanir, whose figure has become familiar to the Empire since his appearance at the last Imperial Conference, but the important thing is that he does not stand alone: there are other Princes, and there are many other men of established position, though their names are as yet unknown beyond the limits of India, who occupy the same platform, and who exercise a steadily increasing influence over the opinion of the country. These men are good nationalists, and good Imperialists also: they are cordially at one with the politicians in desiring that the immense possibilities of India shall be realised through the efforts of her sons; but, gifted as they are with a wider and a saner outlook, they are able to perceive more clearly the difficulties which have to be faced and overcome; they are less confident of the sufficiency of changes in political machinery; they realise more clearly the need for steady and gradual progress towards the common ideal; and they are exerting their great influence strongly and persistently in this direction. At the other end of the social scale there is naturally less definite change of thought or action to record. The masses of the people, some but newly freed from hereditary servitude, and all alike drilled into subservience by centuries of exploitation and oppression, have not yet found a way of expressing what they feel. They are not consciously nationalists, still less Imperialists; but they are no longer wholly inattentive to the processes by which their future is determined. Their immediate interests are economic; they are becoming less and less disposed to toil, as they have toiled in the past, for the sole benefit of landlords, money-lenders and lawyers; and the struggle to express what is in their minds is just beginning to produce some visible results. Already their views are represented in a section of the Indian Press, until recently devoted to purely political interests, and the policy put forward on their behalf is in essence indistinguishable from that adopted by the enlightened aristocracy. Both parties alike ask for steady and orderly progress in national development, not merely in the revision of political and administrative institutions, but in all fields of activity, and both parties are at one in demanding that this development shall be conducted by the same British rule which has already led the people out of the deserts in which they were wandering, and which alone can be trusted to safeguard the remainder of the tedious journey towards the promised land.

Thus the problem of India's development may be said in one sense to be increasing in complexity: only a few years ago it seemed that a single, clear-cut issue lay between the opposing forces, while now we have to reckon with more numerous parties, and with policies which merge and overlap. This apparent complexity is, however, the first condition of progress towards a satisfactory solution. The problem does not consist in finding the best way of handing over the destinies of India to a small number of active politicians: it consists rather in enabling India to control her own destinies. India is a complex entity, and for the satisfactory solution of this problem it is essential that no important interest shall be left out of account. The easy solutions which have been offered by some of her most ardent politicians fail precisely because they have ignored this essential condition, and the importance of the new movements at which we have glanced lies in the fact that they demonstrate the futility of such an attitude. Politicians of diverse views have united to demand a form of government which should first and foremost perpetuate the predominance already secured by their order, and they have made this demand in the name of India as a whole. India is now repudiating that demand, and is beginning to ask for a wider and more perfect synthesis. The new voices are in no sense reactionary, nor on the other hand are they extreme: they represent the great mass of moderate opinion, anxious to press forward, but refusing to press forward in the dark. Herein lies the vast opportunity presented to the statesmen of the Empire in these days. There can no longer be any question of the goal in view, but there are still wide differences regarding the road by which it shall be reached. These differences, however, admit of reconciliation, and the sound sense of India is indicating the true line of advance: it is for the statesmen to seize the occasion so presented, to consider the country's urgent needs rather than the details of its political machinery, and to put forward a policy which shall lead to the establishment of a strong and self-reliant nation.

PERSIA AND THE RUSSIAN REVOLUTION.

By MIRZA FIROOZ KHAN.

II.* TABRIZ, August.

A Change of Officials.

One of the first results of the revolution in Russia, as far as Persia was concerned, was the sweeping changes made in Russian officialdom. As will be imagined, there was adequate reason for the step, apart from any personal considerations. Russia had not been satisfactorily represented in Persia. There had been a number of bad scandals which could not be concealed from public notice. Perhaps one of the worst was the traffic in arms with the chieftains of Kurdish tribes. Needless to say, the Russian Government had no knowledge of these transactions, and was itself a sufferer, in so far as the payment received for Government rifles and ammunition was generally supposed to remain with one or more of the officials on the spot.

The circumstances attending the departure of one member of the old régime are not without interest. General Chernazoboff was at Urumiah when he received notice of his recall, and he at once took a boat for Sharafkaneh, with a view to joining the Tiflis railway. At Sharafkaneh he addressed a farewell speech to some Russian troops, announcing the deposition of the Tsar, and informing the soldiers that they were now free men. According to a report, the old general at the end of his speech made the unfortunate slip, from sheer force of habit, of saying, "Long live the Tsar!" There was, of course, an ominous silence, and, recollecting himself, he said, "Chort!" (the devil) "I forgot; the Tsar is gone. You should say 'Long live the new Government!'" At this one of the soldiers asked for permission to make a speech, and, having been granted it, promptly put some rather pointed questions to General Chernazoboff. The latter ordered the offender to be brought to him, but the soldier stated that there was no need for that to be done, as he would come of his own accord. Accordingly, coming nearer to the general, he repeated his questions. By this time the demeanour of the troops was unmistakable, and General Chernazoboff considered it wiser to beat a hasty retreat.

The Governor of Urumiah, Prince Ehtimad-ed-Dowleh, was involved in the fall of General Chernazoboff, whose nominee he had been, and on the strength of whose protection he had been able to adopt a somewhat independent attitude towards the Governor-General of Azerbaijan. A pretext apparently had to be found for dealing with Prince Ehtimad. He had had occasion to go to Khoi, one of the towns under his jurisdiction, in order to investigate the affairs of the district. His visit coincided with the eleventh anniversary of the Persian Constitution, and he omitted to take any part in the celebrations. The Prince had acted as secretary to the late Shuja-ed-Dowleh, and was regarded as an anti-constitutionalist. It was the first occasion on which any attempt had been made on a large scale to celebrate the anniversary of the Constitution, and probably the abstention of the Governor of Urumiah attracted some attention. Almost immediately afterwards orders were received for his arrest, and he was sent under escort to Tabriz, where, it is reported, he has remained since, not in actual confinement, but under supervision in the house which he occupies.

* Part I. appeared in THE NEAR EAST of October 5.

Prince Mois-ed-Dowleh was subsequently appointed Governor of Urumiah, but he does not seem to have been able to hit it off with the Russians, and after a short stay in the district returned to Tabriz.

Economic Conditions.

A further change brought about by the Russian revolution concerns the trade relations between the two countries. In order to counteract the fall in the exchange value of the rouble, the Imperial Government had prohibited the importation into Russia of Persian dried fruits—raisins, sabza, almonds, apricots, plums, etc. It was hoped in this way to stop the flow of Russian money into Persia. The Persian Government was not in a position to retaliate at the time, but one of its first acts when the Russian Provisional Government proclaimed the policy of non-interference in Persian affairs was to forbid the export of rice and wheat to Russia. It may be said in passing that the most likely explanation of the sudden fall in the value of the rouble in Persia—though in this respect there was merely a reflection of what was taking place in every part of the world—was the veto on the export of Russian goods into Persia. The Persians rely upon Russia for sugar, kerosene, clothing material of all kinds, leather, nails and a variety of other products, but the chief article of import is sugar. It is understood that the Russian Bank of Tabriz enjoys a monopoly of the importation of sugar from Russia into Persia, and of late the price to the Persian consumer has been exceedingly high, in spite of the fact that there was known to have been no corresponding increase in the price in Russia. A brief respite was caused by the importation of a quantity of brown sugar from India, which was sold at just half the price of the Russian product. The price of Russian loaf sugar came down for a time, but the Indian supply was not enough to bring about a permanent reduction. In spite of the almost prohibitive cost, the Persians showed that they could not dispense with sugar. Tea-drinking is an indispensable feature of the life of the country, and sugar seems to be for the Persians an indispensable adjunct to a cup of tea. Six months ago a boycott was started in Tabriz, under the leadership of the Mujtahid, against the tea-drinking habit. A number of tea-houses were closed in the enthusiasm of the moment, but the boycott lasted only three days. To meet the sugar difficulty an attempt was made to use raisins in its stead in tea. This, again, did not succeed. Persia remains confronted with a sugar problem, but is left with the uncomfortable impression that her troubles are not solely due to a genuine shortage of the product, but that she is being victimised in the interests of foreign profiteers.

THE TURKS IN ANCIENT TIMES.

Last Wednesday at the School of Oriental Studies, London, Miss M. A. Czaplicka delivered an address upon the Turks, dealing more especially with those outside the Turkish Empire. She said that there were about forty million Turks distributed in south-eastern Europe and across Asia as far as China. Those of Europe and Asia Minor were of mixed descent. The Turks of Turkestan, southern Siberia, and neighbouring parts of Asia were largely mixed with an Iranian element. Further east the Turanian, or nearly pure, Turk was to be found. It was quite an erroneous notion which identified the Turkish race with the Mohammedan religion; many of them were still Shamanists. The culture of the Turks had been chiefly derived from neighbouring peoples—Arab, Persian, or Chinese. Archæological investigation had shown that in the most ancient times the Turks were a peaceful people, inhabiting the dense forests of Siberia. Later, they had taken to live on the steppes, and had become warlike. Herodotus said of the Turks of his time that they believed themselves to be descended from a she-wolf, and this idea had been recently revived by the Pan-Turanians. All investigation into early Turkish origins and the like was to-day used by the Central Empires as a means of propagating the idea of a Turanian empire, in which all people of Turkish or allied race were to be united under the leadership of the Ottoman Turks of Europe.

TANGIER TO TEHERAN

Rumour and surmise are busy over the movements of the ex-Khedive. From the decent obscurity of his retreat in Switzerland he was suddenly dragged into the light of publicity in connection with the Bolo scandals, and almost immediately afterwards he has returned to Constantinople. His own explanation of the change in his plans seems to have been that important happenings were pending in Turkey which called for his attendance by the side of his lawful suzerain. A writer in the *Correspondance d'Orient*, however, suggests very different motives for his departure; among them a recall pure and simple by the Committee of Union and Progress, the proposed marriage of two of his daughters with the two sons of the Sultan of Turkey, a touching belief in Von Falkenhayn's plans in regard to Egypt, or, finally, a sordid desire to participate in the transactions by which speculators or financiers are benefiting at the expense of the public and the State.

***

With these suggestions I am less concerned than with the assertion that Abbas Hilmi has been at pains to let it be known that his views towards Great Britain have undergone a complete change, and that he is anxious to be reinstated in the British Government's good books. He would in such circumstances advance no claim to the throne of Egypt for himself, but he would like to see his eldest son recognised as heir apparent. At the same time he would ask for favourable treatment in regard to his financial interests in Egypt. No doubt. Being essentially of a business turn of mind, Abbas Hilmi will be conversant with the principle of a *quid pro quo*, and it would be of interest to know what equivalent service he would consider that he was rendering to Great Britain. As a matter of fact, he has already done us the only good turn he has ever had it in his power, or is likely to have it in his power, to do us, and that was by throwing in his lot with Turkey and enabling Egypt to be rid of him. There, I trow, is to be found the end of Abbas, as far as the British Empire is concerned, for there cannot be the least justification for troubling the future of Egypt by reintroducing into the country either him or any of his sons.

***

It would certainly have been a natural attitude on the part of the ex-Khedive to wish to be allowed to bask in the sunshine of the German Emperor's visit to Constantinople Indeed, his absence on such an occasion must have given rise to comment. In such an assembly he had no need to fear reproaches for mishandling the Bolo business. There would be too many openings for the retort courteous for even Abbas Hilmi to miss them all. William II. was on much safer ground in his speech at the banquet in eulogising Turco-German successes, and it is to be presumed that even in private conversations he will have refrained from raising the subject of failures, whether Abbas Hilmi's or his own.

***

A few days ago I was reading a young soldier's account of our recent advance in Flanders, or, rather, of his own share in it, when, among numerous graphic touches that helped me to realize the character of the fighting, I came across a casual reference to the Near East. Describing how he and a few others followed a certain captain at one part of the advance, the writer mentioned that the man next to him was "a Roumanian Jew," who had been formerly employed in one of the large London banks. From the letter it is clear that the Roumanian did his share of the day's work like a man; and in a later passage the Londoner pays a high compliment to his abilities in the less strenuous parts of the soldier's calling. He regrets that the Roumanian was on the sick list, and was, therefore, not available for bargaining with the peasants and others from whom our men bought food when they were sent back for a rest. "X——," he writes, "is a marvel at getting whatever is to be got, and I am afraid I was a very poor substitute. . . . He can speak ten or twelve languages, and has a wonderfully persuasive manner with him." Evidently one platoon of a particular London regiment appreciates the alliance with Roumania.

***

The Petrograd correspondent of *The Times* told not long ago of a Russian cabman who showed a weakness for keeping on the wrong side of the road, and who resented being ordered by a militiaman to take the right side. "The militia," he said to *The Times* correspondent, "are worse than the police. They are always sticking their noses where they are not wanted." With feelings that we can all understand—and sympathize with, I fancy!—the correspondent asked what, indeed, was the worth of the liberty that Russia is now enjoying if one could not drive where and how he liked. The freedom-loving cabby detected no irony in the query. Far from it! "You speak truth," he exclaimed. "What is the use of liberty if we cannot do what we like?"

***

I reproduce the story not because I find it edifying to contemplate the present state of Russia or because I think my readers are likely to do so, but because it might quite well have been told, almost without the alteration of a single word, by a newspaper correspondent in Constantinople at the time of the Young Turkish revolution. At that time we heard many such tales, and I rather fancy I have retold some of them in these columns. I remember, too, that Sir Mark Sykes wrote an article—either in the *Spectator* or the *Outlook*, I think it was—entitled "Hurriet" (Liberty), which showed how exactly similar was the average Turkish revolutionary's view on the subject to that of the Russian cabman. One hopes and believes, however, that the Russian revolution is fated to lead to better things than its Turkish predecessor, so to say. With all respect to the Petrograd "cabby," I would suggest that what *he* wants is a little less "liberty" and a better developed sense of duty. And he is not alone in Russia.

CORSAIR.

CORRESPONDENCE.

THE CAROB TREE IN CYPRUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The letter of G. L. H. (NEAR EAST, October 19) details his own experience in carrying out the law dealing with carob beans suffering from the disease now attacking the trees. The case as presented is quite typical of the present state of things in Cyprus. It is just what one would expect in the circumstances. The writer, a British subject, did what probably no native owner of carob trees did, *i.e.*, equipped himself, as far as he could, with appliances needed for careful compliance with the regulations; providing "a forester's ladder, a step-ladder, and a wheel-barrow," and employing small boys to climb along light branches, which even thus cannot all be reached. The work was carried out, as directed, during forty days.

The first impression derived from the letter is that, if the Government had acted as G. L. H. did, they would before this have come to precisely the same conclusion, viz., that the law as it stands is impracticable. G. L. H. does not suggest a remedy; but in a previous letter he has pointed out that the Government should have established an orchard of carob trees, in which all necessary experiments should have been systematically carried out, results and deductions being duly recorded. He contends that at present "the combat cannot be carried on with success if entrusted to the present proprietors alone." The Government could not, of course, pay an army of supervisors, many, perhaps, of doubtful capability or trustworthiness; but some other measures are obviously necessary. G. L. H., moreover, notes that "the faithful carrying out of the official instructions leads to a decreasing crop." Blossom knocked off in September does not come again. This calls to mind the destructive Cypriot method of beating the olive trees, which the Agricultural Department is endeavouring to combat. It is clear that in the case of this serious carob disease every possible effort should be made to utilise the experience of the few who are devoting careful attention to the problem. The fact is that little remedial work can be carried out in Cyprus except under compulsion. The more intelligent and well-to-do peasants themselves sometimes strongly advocate compulsion and the imposition of a small tax on agriculturists to meet the cost of the prescribed measures, where the Government does not itself undertake this work, as it does in the destruction of locusts, for which a tax was levied on all classes. What is said of the carob disease may be said also of some others, *e.g.*, of the *oïdium*, which so largely attacks the vines. This disease is not combated according to Government directions, which require that the peasants should sulphur the affected vines two, and often three, times. Many villagers do not sulphur them at all.

The Agricultural Department cannot be blamed, as it works hard and creditably on inadequate votes, and its modest demands, when involving expenditure, only too often meet with a cold and discouraging refusal.

It now remains to be seen what course will be followed in the admittedly difficult circumstances described by G. L. H. As a small contribution to the discussion, may I suggest the voluntary employment of children, as far as possible, in the carob growing areas during thirty or forty days in August and September? In this work village school teachers, many of whom, both Turk and Greek, now attend lectures in agriculture, could largely assist. The great importance of the carob tree to Cyprus is my excuse for writing.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Despatches from Salonika and Palestine. Oct. 18.

Questions were asked by Mr. DILLON as to why no despatch had been published giving details of the Battle of Gaza and of the operations which led up to and followed that battle, and why no details were published of military operations in Greece and Macedonia; and by Mr. G. LAMBERT as to when despatches would be published recording the operations of the British Forces at Salonika and in Palestine.

Mr. MACPHERSON, in reply, said :—A despatch from General Milne, dated October 1, dealing with the operations at Salonika, has just been received at the War Office and will be published as soon as possible. A despatch has also been received from General Sir Archibald Murray dealing with the operations on the Palestine frontier up to the date on which he relinquished the command; but this has been temporarily withheld from publication on the advice of the Chief of the Imperial General Staff, as its publication at the present time might supply the enemy with valuable information. I may remind my right hon. friend that we are the only nation engaged in the present war which publishes despatches from commanders in the field. The conditions of present-day warfare, which were not contemplated when the practice of issuing despatches was established, make it necessary occasionally to delay publication for purely military reasons. I may add that *communiqués* dealing with the operations in Greece and Macedonia in which British troops are engaged are issued regularly whenever there is anything to report. My hon. friend may rest assured that no operations have taken place which have not been dealt with in *communiqués*.

In further reply to Mr. G. LAMBERT, who asked whether any further information could be given by Press correspondents as to these affairs at Gaza and Salonika, Mr. MACPHERSON said that he did not think it would be useful or desirable to publish anything in addition to what was official.

Commander WEDGWOOD asked whether the delay in the publication of the Gaza despatch was not due to the fact that in public circles it was announced as a great victory.

Mr. MACPHERSON : I am quite convinced that the reason I have given is the true one.

The Man Power of Malta, Gibraltar and Cyprus.

Colonel YATE asked the Secretary of State for the Colonies whether he would state how many men have been furnished by the Colonies of Malta, Gibraltar, and Cyprus, respectively, for combatant service and for labour battalions in the present war; and what proportion these men bear to the total population of each colony.

Mr. WALTER LONG : I do not consider that it would be in the public interest to give the detailed figures. The matter has, of course, engaged the attention of the War Office and myself, and we have no reason to be dissatisfied with the position as regards the colonies mentioned.

Our Prisoners in Turkey. Oct. 19.

Mr. JAMES HOPE, replying to Sir J. SPEAR, said :—His Majesty's Government have been endeavouring for a long time to come to an agreement with the Turkish Government for the exchange of a reasonable number of invalid prisoners of war as a preliminary to a wider measure of exchange, but that they have met with no response on the part of the Ottoman Government, who are well aware that the prisoners in British hands are well treated.

In reply to Mr. KING, Mr. MACPHERSON said that Surgeon-General Sir W. Babtie, who was censured in the Mesopotamia Commission's report had submitted his explanation, which the Army Council had found satisfactory. He had been recalled from leave and had resumed his official duties. The Council still await the explanations of the other officers concerned.

The British Ministers at Athens. Oct. 22.

Mr. KING asked the Secretary of State for Foreign Affairs whether Sir Francis Eliot has ceased to be British Minister at Athens; if so, on what date he was withdrawn; and what reasons are given for his withdrawal?

Mr. BALFOUR, answering Mr. KING, said Sir Francis Elliot had ceased to be British Minister at Athens. He left Athens on June 17 last. During the past three years Sir F. Elliot continuously occupied, to the complete satisfaction of his Majesty's Government, a post of the highest responsibility and of very great physical strain, and the departure of King Constantine and return of M. Venizelos to Athens afforded a suitable occasion for asking Sir F. Elliot to undertake important work at home, but of a less arduous and exhausting nature.

Moroccan Agreement. Oct. 23.

Mr. KING asked the Secretary of State for Foreign Affairs whether he had any information about the condition of Morocco; whether any arrangements have been made or are contemplated to modify the Moroccan agreement of 1912; and whether the native population of Morocco would be allowed to decide the sovereignty under which they were to live.

Mr. BALFOUR said that the Government was not aware that any modification was contemplated in the Moroccan agreement of 1912.

Supplies for Mesopotamia.

Mr. MACPHERSON, in reply to Sir J. JARDINE, said :—The General Officer Commanding-in-Chief is responsible that sufficient provision is made for the medical and surgical treatment, including medicines and appliances, for the troops at all stations in any particular theatre of war, and I have reason to suppose that provision in Mesopotamia is not merely sufficient, but ample in every respect. All demands for medical stores are promptly met, and in addition to the medical stores depôts in Mesopotamia a special depôt has been established at Bombay to facilitate supply. The supply of fresh vegetables is good, and amounts to 67 per cent. of the total vegetable ration. Fruit and dates are also available locally and issued to the troops.

British Subjects in Syria. Oct. 24.

In reply to Mr. PONSONBY, Mr. BALFOUR said :—There are a considerable number of British subjects in Syria. We have little information as to their treatment and condition, but the United States consular officers have endeavoured to assist them in the past, and the Netherlands Consul-General at Beyrout was especially requested to report on the subject before he left this country on his way to his post.

The Future of Armenia.

Reference was made last week to an article by Ismail Kemal Bey in the *Fortnightly Review*. Before dealing with the future the writer describes the heterogeneous composition ethnologically of this part of Asia Minor. From the religious point of view, he says, it presents the aspects of a series of small Christian islets in a sea of Mohammedanism.

It will be seen that the total Armenian population subject to the three Powers in Asia and in European Russia amounts to approximately 1,800,000, but the 760,000 Armenians of Turkish Asia are spread over the fourteen vilayets and two sanjaks among a population of 10,000,000 Turkish and Kurd Mussulmans and about 1,500,000 Greek, Nestorian, and other Christians. The conditions under which this brave Armenian race are dispersed all over Asia has at all times been a serious obstacle to finding a practical solution of the Armenian question.

Ismail Kemal Bey refers to French efforts to settle the question, but suggests that they were handicapped by the scruples which French politicians at that time had against rousing the susceptibilities of Russia. But that is all changed now, and he offers the following solution :—

Now that Russia has given the world the magnificent spectacle of a revolution the greatness and extent of which almost surpass the imagination, in which it announces as its chief aim the emancipation of all people, beginning with those that were under the Russian yoke itself, this difficulty can no longer exist. The only problem, then, is to settle the position of the Armenians in relation to their neighbours in Asiatic Turkey; and in my view the most logical solution is the establishment of an Armenian State having as its centre Etchmiazin (which is the natural political and religious centre), and containing the region of Ararat, with the adjacent provinces now belonging to the three Powers. This State, whose central point would be the cradle of the Armenian race, spread across the most interesting mountains in the history of humanity and circumscribing the most fertile valleys and plains in the world, might be made a model of a modern State. Containing more than two million inhabitants, and striding across the peninsula from the Black Sea to the Caspian Sea, backed by the Christian region of the Caucasus, it would not only suffice to assure the prosperity of the Armenians, but would be an element of order and stability in the centre of the heterogeneous populations of Asia Minor. Just as St. Gregory, who converted the Armenians to Christianity, founded the City of Etchmiazin, at the wish of Jesus Christ, who, as he declared, appeared to him in a vision, so it would be a happy inspiration of some modern disciple of civilisation to go and refound the capital and State of the Armenians.

The Salonika Front: A Meek Appeal.

There is much truth in the remark of a writer in *The New Europe* that "no enterprise during the war—not even the attempted seizure of Gallipoli peninsula—has been the subject of more divergent criticism than the provision and maintenance of the Anglo-French armies based upon Salonika." He himself, however, is only prepared to couch a very hesitant lance for a more definite policy, and is content towards the end of the article merely to "assume that the Allied armies based upon Salonika will be maintained." They continue, he admits, to fulfil a rôle of high political importance, but for the rest he can only suggest activity in Macedonia at the expense of other theatres.

"Of what they (the Allied armies) may achieve in the purely military sphere I have already confessed myself incompetent to speak. But even a civilian may venture to ask how it can be easier to provide troops, transport, and stores for Mesopotamia and Palestine than for the Balkans, and this at a moment when

Digitized by Google

the adhesion of Greece and the Italian occupation of southern Albania offer us the choice of a shorter sea route between Brindisi and the Gulf of Corinth or Santa Quaranta? And he may perhaps be allowed also to ask, what military objects are sought in striking at the Turk in outlying parts of his Empire, rather than upon the direct route between Berlin and Constantinople? I can understand a man who says that we need every man, every gun, every aeroplane in France; I cannot understand those who would starve Salonika and yet send expeditions to the uttermost ends of the earth."

—— the Push and Go School.

A more vigorous criticism appears in the *Welsh Outlook*, which devotes a large part of one issue to Serbia and the war in the Balkans, using as its text Mr. Lloyd George's tribute at the luncheon given by the Serbian Society on August 7.

A determined and energetic offensive on the South-Eastern front would yield valuable and almost immediate results. The first step would be the cutting of the railway between Sofia and Constantinople and the consequent breaking of communications between Turkey and Berlin. The next step would be the crushing of Bulgaria and the establishment of communication with the Roumanian and Russian forces. Thus the closing of the "back door" would bring about the economic isolation of the Central Powers. They would be encircled with a ring of steel; the blockade would be complete; the supplies of cotton, metals, and other essential products, which now flow into enemy countries from Asia Minor, would be entirely cut off. This could only mean the beginning of the end.

Contrast this policy for a moment with the obsession which still prevails in certain quarters—that the Western front is the "only" decisive theatre of the war, and that victory can only be achieved by the gradual process of killing off Germans. Costly offensives involving thousands of casualties which bring no decision and to which the enemy replies by a series of retirements, thereby shortening his line and increasing his available reserves, seem to be the order of the day. On the Balkan front the Allies appear to be content to allow one opportunity after another for dealing a decisive blow to slip by.

* * *

For a successful advance very careful preparations are needed, and, in the case of a composite force such as the Allies have at Salonika, it is absolutely essential that the supreme direction is in the hands of an Allied General Staff. This is the only really effective means of securing complete co-operation between the various contingents which make up the Army of the Balkans, and it is the only effective means of making certain that no expert opinion and advice is at any time disregarded. Another essential is that England should have a military mission with the Serbian Army. Serbia is the only country of the Allies to whom we have not sent a military mission. This state of affairs would be ridiculous except for the element of tragedy contained in it. Our troops are being thrown away on the Macedonian front in many cases simply for want of that expert knowledge of local conditions which the Serbian General Staff possesses in an exceptional degree, and which it is only too ready to place at our disposal were there any adequate liaison between the Serbs and our own military authorities.

TABLETS FOUND AT SUSA.

One of the last discoveries made by the French explorers at Susa, in Persia, before abandoning, on account of the war, their work there, which has for many years been carried on with such prolific results, was secured by clearing away an artificial mound in front of the ruins of the Palace of Darius. The elevation was found to conceal a series of tombs, dating from the seventh century B.C., when the Semitic Babylonians were ruling in Elam. Beyond some vases and bronze rings no antiquities of artistic value were unearthed; but among the graves there was found a terra-cotta case containing seven inscribed tablets. The texts they bear are of a novel nature, for they give a kind of introduction for the deceased into the next world. Or, rather, the pious expression of his hopes; or those of his surviving relatives for his future welfare. This branch of eschatology has been much to the front in recent religious controversy, and these newly found inscriptions throw considerable light upon views concerning these matters in Persia, or Elam, before the arrival of Zoroaster's followers in Western Asia. One of the defunct appears to have been very unfortunate while living, for his tablet text tells us that he departed without any regret from the morass of hardship and fatigue here below.

According to *Al-Mokattam*, Dr. Granville, President of the Quarantine Board of Alexandria, will probably succeed Sir David Simple on his retirement from the post of Director-General of the Public Health Department.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Some very significant statements have recently appeared in the German Press regarding that country's financial interests in Roumania, which point very clearly to the fact that the control of the petroleum fields there is now one of Germany's special objects in the war. That this should be the case is not at all surprising when the history of Germany's strenuous and unscrupulous attempts to obtain an interest in the oilfields is borne in mind. Devices of the most shady description were resorted to which resulted in Germany first obtaining a footing in the fields and subsequently the predominant interest. In the "big push" for the oil industry German capitalists and diplomats worked together, and were assisted by foreign confederates, and as this "peaceful penetration" secured Germany ample supplies of oil it was no doubt felt that the tactics adopted were amply justified.

***

The reason for the Press campaign to which I have referred is, of course, Germany's fear that the results of years of intrigue have not only been jeopardised, but have been absolutely destroyed through the situation arising out of the war. And so *Germania*, the organ of the Central Party, declares that "What we must wish for in any case on the conclusion of peace is a guarantee for the very important financial interests of Germany in Roumania, quite apart from the free economic movement of German capital and German labour, and further the absolutely free export of the raw material which has hitherto been supplied by Roumania and which we shall need henceforth and also cereals and petroleum." The *Täglische Berichte über die Petroleum Industrie*, of Austria, commenting on this passage, goes even further, and after stating that "there can be no difference of opinion as to the fact that the sovereignty of Roumania can no longer be allowed to exist," says that the special interests of German capital in Roumania should be directly guaranteed by the Central Powers, as it must be regarded as obvious that, especially for political reasons, the riches of Roumania in petroleum must henceforth be placed under the definite control of the Central Powers.

***

A later and even more interesting reference to the subject appeared in the *Deutsche Balkan Zeitung* on September 10. The journal calmly assumes that Roumanians will forget what they have suffered in the war, and says that "economic guarantees regarding Roumanian petroleum will be all the more easily obtained because before the war the influence of German technical skill and German capital was considerable in Roumania." It may be held in some quarters that it is unnecessary to ascribe too great importance to these Press statements. That is, however, not my opinion, for I think there is every reason to regard them as part of a carefully calculated campaign intended to obtain the support of the German public for what it seems is going to be one of Germany's peace aims.

***

Djavid Bey's speech on the Turkish Budget, interesting though it undoubtedly was, leaves us very much in the dark on a number of very important points with regard to the finances of the Sublime Porte. He said nothing, for instance, on the subject of the amount of paper currency now in circulation. We know that ever since the war Turkey has been industriously weakening her credit by the issue of paper money, but there is little or no guide as to the nature of the amount. One imagines that it must be somewhere about four or five hundred millions, but it is mere surmise, and even these considerable figures may have been largely surpassed. Then there is another interesting point. The Turkish Finance Minister said that the revenue for the year would be roughly £T20,000,000. Where is this sum to come from? Turkey's commerce is at an end, the male population has been decimated by the war, and the Armenians, who provided the vast bulk of Turkish revenues, have been practically crushed out of existence.

***

In the circumstances I should regard a revenue of only £T5,000,000 as a most remarkable achievement; but even if Djavid Bey's figures are accepted as accurate, which I am sure they are not, a revenue of £T20,000,000 would be quite an inadequate sum with which to meet even the ordinary expenses of the country. According to the Finance Minister himself, nine-tenths of the amount is required for the service of the Turkish public debt, so that an infinitesimal portion is left to cover all the other expenses of the State. And these figures, be it noted, come from a source interested in painting the best possible picture of the situation.

***

According to all accounts freights have risen at Aden to unprecedented heights owing to the war. Here is an illustration of this which has just come to my notice. Some merchants chartered a small steamer to take a cargo to Egypt, a distance of about 1,400 miles. They paid 40,000 rupees for the charter, and as the steamer only had a carrying capacity of 300 tons the freight rate worked out at about 179s. per ton, as against the normal rate of 12s. 6d. per ton, figures which, I think, speak for themselves.

***

Greece is the latest country to be affected by a fuel shortage, and Reuter's correspondent at Athens, in a message dated October 16, declares that the question is assuming alarming proportions there. From the particulars he gives it is evident that the outlook is very difficult, but there is no need to regard it as unduly serious, for Greece is much better situated than a country like Egypt, for example, since there are supplies of wood fuel to draw upon. Still, the shortage comes at a particularly awkward time, especially in view of the forecasts that the coming winter will be even more severe than usual.

***

Particulars are given in the annual report of the Central Economic Board of the Sudan Government of the work of the Imperial Institute in 1916 in reference to products of the Sudan likely to be suitable for export. The experiments conducted covered a wide field, ranging from beans to Maharet grass oil, and the report was on the whole quite favourable. Most of the products examined were considered suitable for the home market, and as a result of the investigations the Sudan trade should benefit considerably in future years.

***

Elsewhere will be found the report of the annual meeting of the Assam-Bengal Railway Company, Limited. The past year has shown fairly satisfactory results for this undertaking, the gross receipts amounting to Rs.67,38,485 4-6, and the working expenses to Rs.52,59,155 9-6. The ratio of working expenses to gross receipts was thus 78.04 per cent., as against 77.90 in the previous year, and the net earnings (retained by the Secretary of State in reduction of the charges for interest incurred by him) amounted to Rs.14,79,329 11-0. Chief interest at the meeting centred in the chairman's remarks regarding the efforts made by the board to have the outlying section of the Eastern Bengal State Railway, lying to the east of the Brahmaputra, transferred to the company. Representations on the subject were first made in 1902, and in 1914 there was reason to think the transfer a matter of time only, but now fresh opposition has developed, and the question is to be raised again this winter when a member of the board will lay the case before the Government of India.

***

A very satisfactory account of the year's working of the Nizam's Guaranteed State Railways was given by Mr. C. A. Winter, the chairman, at the annual meeting on Tuesday. As regards the broad gauge, there was an increase in earnings and a decrease in working expenses, and the surplus earnings amounted to £54,648. There was a reduction in earnings and working expenses as regards the metre gauge, the reduction in earnings being due to a falling off in goods and to plague and unseasonable rains in the early part of the year. The profits of the metre gauge, however, amounted to £28,376.

The Mesopotamia Oilfields.

Germany and the Baghdad Railway.

Not the least interesting feature of the recent operations on the Mesopotamian front is the fact that the regions where fighting has been in progress since the fall of Baghdad include the southern fringe of the Mesopotamian oilfields. The position of these fields, which are of no little importance, have no doubt played a very considerable part in strengthening the Turks' determination to maintain their hold on Baghdad, and it also supplies an additional reason why a counter-offensive—if a counter-offensive there is to be—should take place in Mesopotamia instead of elsewhere.

Importance of the Railway.

The oilfields, it may be noted, present a straggling appearance on a map. The main bed lies at Gayara, south of Mosul, with three smaller beds between it and that town, and the other petroleum deposits are in scattered groups, ranging in a kind of semi-circle from Altum Keupri to Hit, the majority of the beds being between the former place and Mendali. The second part of the semi-circle commences just the other side of Baghdad. It may be said that there is no particular interest in the exposition of the situation of the field, nor is there, so far as the natural position goes. The interest of it lies in the alignment of the Baghdad railway with regard to the fields. The line of the railway bisects a minor field at Hamman Ali, and goes right across the chief deposit at Gayara, while it would be an easy matter to link up the other fields with the railway by means of branch lines.

A Possible Concession?

In the light of this connection between the railway and the oilfields, Germany's solicitude for the control of the railroad is self-evident, and it will be surprising if she does not make the most desperate efforts to retain it in her keeping. Any other course would be at variance with the policy she pursued before the war in Roumania and elsewhere in regard to the acquisition of oil concessions. "Commentator" refers in his notes this week to signs in the enemy Press of a campaign having as its object the retention by Germany of the control of the oil areas in that country. No doubt the enemy regards these oilfields as indispensable to his welfare after the war because of their proximity, and nothing short of force is likely to dispel the illusion. There is another and a more cogent reason why Germany should wish to retain access to the Mesopotamian fields. As everyone is aware, Turkey's finances are in a hopeless condition, and but for Germany's help, given for the most part in the nominal form of credit in one shape or another, it would long ago have been impossible for her to continue the struggle. Now, a creditor usually expects security for his loans, and Germany being what she is, it is reasonable to assume that her help has only ben given in return for a consideration of some kind, and what better consideration could Turkey give or her Ally desire than a concession with regard to the oilfields? By stretching a great many points, it might be possible to read into Djavid Bey's Budget speech an implied freedom from obligations of this nature, and he certainly indicated that after the war German capital would merely have the preference over that from other countries. All things considered, it is better, however, to interpret his remarks in the opposite sense, and to conclude that he was merely indulging in a little bluff in order to persuade Germany to make further financial advances for fear her Ally should develop an unexpected vein of obstinacy.

History of the Fields.

The interest that Germany took in the oilfields before the war is perhaps the best proof of all of her present intentions with regard to them. The history of her connection with them shows also, as a matter of fact, that even the past master of the art of "peaceful penetration" can on occasion make a really serious blunder, for our enemy was at one time under the impression that the oilfields were not worth exploiting, and was inclined to make no effort to join in their development. Several articles have already appeared in THE NEAR EAST on the early history of the oilfields, but it may be worth while, all the same, to recapitulate the facts from 1871, when an expert visited the site and made an unencouraging report. A second expert declared, some years later, that the difficulties of transport were such that petroleum from the United States was able to compete in Mesopotamia with the local product. Then, in 1901, came a favourable report from a third expert. At that time the wells, all of which, with one exception, belonged to the Administration of the Imperial Civil List, produced about £T1,400 per annum. The report had the effect on the Germans that might have been expected, and in 1904 the Anatolian Railway Company, which had just come under German control, entered into negotiations for the oil sources, and obtained a year's option for a forty years' concession for the fields. This concession was not taken up. In the meantime the Deutsche Bank had sent out a committee of experts—German experts, be it noted—to report on the fields, and they brought back a most unfavourable account. They declared that oil was only to be encountered in local formations, and that it was of poor quality. That was quite sufficient for the Deutsche Bank, the most enterprising medium of German penetration, and nothing more was done until 1914, when British interests entered the field to negotiate a concession with Germans merely as participators instead of principals in the enterprise. That, in short, is the history of the undertaking so far as Germany has been concerned. But for the war, no doubt, we should have witnessed an energetic attempt to atone for her early failure by the introduction of the methods that have served so well in Roumania.

Value and Extent.

As to the nature of the fields, it may be pointed out that the oil districts extend over some four hundred kilometres, and that the oil is of excellent quality, and is found in abundance. Two difficulties will have to be overcome, however, if the wells are to be exploited successfully in the future. The first is the question of transport, which can be solved by railway development and in other ways. The second and more serious difficulty is the scarcity of labour, and it would be necessary for the adequate staffing of the wells to bring workmen to the country. With these qualifications, it is safe to say that, given proper development, the Mesopotamian oil wells should in time be a very valuable addition to the oil-producing properties of the world. Their potentialities may be gauged from the description of the various beds in the vilayets of Baghdad and Mosul, in the report of the expert mentioned above, a summary of which we reproduce:—

ABJAK.—Oil is found on the surface over an area 120 metres long. This field is not at present worked, and is not of a good quality.

BABA GURGUR.—North of Kirkuk. An oil area of some fifty acres in extent, worked in a very primitive fashion by natives. Natural gas in large quantities appears here, and in 1901 was burning.

GAYARA.—On the Tigris. This field is of immense extent, and can be classed with that at Mendali as being the best in Mesopotamia. There are "innumerable petroleum springs," which have formed "a layer of asphalt many metres in thickness," and also pools and lakes of petroleum, some of which are nearly 1,000 feet in length. The oil is of a very high quality, and from the greater part of the area the oil is completely free from either sulphur or salt water. At the southern end of this field naptha trickles out of the cliffs at El Fatt'ha, through which the Tigris here breaks its way and runs to waste in the river.

GUIL.—South of Chemchema. An extensive field producing oil of the best quality and unusual purity. Although refined only by crude native methods, it is stated to burn better than the best Russian oil scientifically refined.

NIMRUD.—The petroleum from this field, which was not worked at the time of the report, is of poor quality and nearly black. It rises throughout a zone some 800 metres long, and runs to waste in the river.

KIFRI.—The sources at Kifri appear to be best in an area which extends a long way beyond the points actually worked. A considerable deposit of black asphalt nearly six feet thick has been formed. This is of unusually good quality.

TUZ KHURMATLI.—This is one of the richest fields in the country. The oil trickles from the soil for a distance of well over a mile along the right bank of a stream, and has formed many layers of asphalt from 12 to 15 feet thick. The conditions are very favourable for boring. The output of refined oil was limited by the exigencies of the season, the extent of the local demand, and the capacity of the sheepskin vessels in which it was transported at the time of the survey.

ZAHROU.—On an island in the Chabur. The oilfield is very rich, and for eight miles along the river bank "the petroleum streams down from above in more than thirty little rills."

HIT AND RAMADIEH.—There are numerous and important springs of bituminous pitch in this area, and in one place they have formed a pitch lake nearly two miles in diameter.

MENDALI.—The oil springs are some distance north-west from the town, and are the most copious that the expert had seen. Over a dozen wells spouted into the air with great violence. The oil is of a very high quality, and the native refining was better here than anywhere else.

NAPHATA.—Near the Euphrates, below Hit. The petroleum springs here, although both copious and of fair quality, were not to be compared with the three first-class fields at Mendali, Gayara, and Tuz Khurmatli.

FUTURE TRADE CHANGES.

Livery Companies' Opportunity.

Speaking on "Trade after the War: an opportunity for the Guilds," at a City Livery Club luncheon last week, at the Holborn Restaurant, Major W. H. Champness referred to the great changes which would come about after the war, and said that, while it was undesirable that Parliament should do more than help the traders of the Empire, some organisation was absolutely necessary—some body that Parliament on the one hand and the commercial classes on the other hand could trust. It must be a representative body, with great knowledge and large powers. It must be sufficiently exalted to be above suspicion, sufficiently acquainted with all branches of industry so as to be able to advise and occasionally guide individual traders. At present no such body existed. He thought they had in embryo the framework of such an organisation in the Livery Companies. For centuries they had been associated with the trade and commerce of England. They had supported and controlled the trades, they had supported education, elementary, secondary and technical, and they had the necessary machinery. Behind them was the weight of centuries, in which they had played their part in building up the welfare of the Kingdom through the various crafts.

PETROLEUM PRODUCTION AND RESEARCH.

Sir Boverton Redwood, Bart., Director of Petroleum Research, who has been adviser on petroleum to the various departments of the Government for many years, has been appointed by Mr. Walter Long Director of Technical Investigations in the recently created Petroleum Executive, with a view to his dealing with technical questions of the highest importance, including the co-ordination of the work of petroleum production and that of petroleum research. In order to devote himself to his new duties Sir Boverton Redwood will cease to act as Director of Petroleum Research.

EGYPTIAN COTTON CROP.

Outlook Satisfactory.

The Ministry of Agriculture in Egypt in its monthly bulletin comments as follows on the condition of the cotton crop in September :—

Unfavourable weather prevailed in the province of Beheira throughout the month; elsewhere the weather was on the whole favourable, although low temperature and humidity, especially at night, were reported from most provinces towards the middle and latter part of the month, checking the opening of the late bolls. Water supply was ample. The first picking has practically come to an end in Upper Egypt, and is reported as satisfactory. In Lower Egypt it is making rapid progress, and the results obtained so far are good, except in Beheira and Daqahliya, where they are somewhat disappointing. The prospects of the second picking are almost everywhere far from good, and the final result of the crop is not expected to turn out quite as favourably as was hoped last month. It is a satisfactory feature, however, to note that particularly good reports have been received of the quality of the fibre and seed and of the high ginning out-turn. The Pink Boll worm attack has naturally been on the ascendant during the month. The increase on last year is most remarkable in Upper and Middle Egypt.

Condition of Other Crops.

The following particulars are from the same source :—

Rice (*Séft*).—Weather generally favourable though cold; the stormy days between the 16th and 19th laid a certain amount of the early rice. Water supply plentiful. Mild attacks of stalk borer and a smut fungus have caused damage of small importance. The crop is ripening everywhere, and harvesting of the early rice has commenced in Beheira and Daqahliya.

Rice (*Nili*).—Water supply ample, though some complaints were received regarding scarcity of water from villages lying on the tails of canals. On the whole, the crop is growing well, but the late-sown rice is not as satisfactory as the early one, which is now flowering.

Maize (*Nili*).—Weather favourable during the first half of the month, but cold and unfavourable during the second half, especially for late maize. Water supply sufficient. Watering, hoeing, thinning, and manuring are in progress. Stalk borer and aphis are reported in a few provinces, but the damage caused is not of significant importance. The worst enemy, however, is the crow, which in some places is said to have eaten very large quantities of the ripe and half-ripe cobs. Late-sown crop cultivated on islands and near the Nile banks is either damaged by flooding or by the infiltration caused by the high Nile. The crop has, on the whole, progressed very favourably, and is very promising now. It should not be overlooked, however, that the shortage of fertilisers, and even of farmyard manure, coupled with the increase in area under the crop, is likely to influence the average yield, which otherwise must have been a record one.

Millet (*Séft*).—Weather favourable. Very slight attacks of stalk borer and smut in Beni Suef and Assiout. The crop is almost entirely harvested and threshed, and the yield is satisfactory.

Millet (*Nili*).—Owing to the high flood, the area under this crop is inconsiderable in Assiout and Girga, and in Qena and Assouan great injury was caused to the crop grown on the Nile banks. In the growth of Fayum the early-sown millet is satisfactory, and the crop as a whole is well advancing.

Sugar-Cane. — Weather favourable and water supply sufficient. The stalk borer is widely spread, but the crop is well advancing, and cutting of canes for local consumption has begun.

Earth-Nuts.—Weather suitable and water supply satisfactory. No enemies. The crop is very much better than last year.

LANCASHIRE COTTON.

A Strong Market.

(From Our Own Correspondent.)

Manchester, Wednesday.

We have again experienced a strong and hardening market. Fresh high records have been established in yarn and cloth prices. Here and there buying has been somewhat checked by the stiffer attitude of sellers, but in spite of increasing difficulties in arranging transactions a substantial business has been done. Sentiment with regard to American cotton prices has again been bullish, and some people are talking of half a crown being paid for middling descriptions before the end of the year. According to some reports there is a possibility of the Egyptian growth being rather more than 6,000,000 cantars. An extensive business has again been done in Egyptian yarns. Some special sales have been put through in certain counts and qualities suitable for aeroplane cloths. Free buying has also occurred in descriptions suitable for India. Encouraging advices have been received as to clearances of piece goods in Egypt. It is hoped that the representations to the Government with regard to shipping facilities will be successful. Sized materials and miscellaneous fabrics have again moved off well. For India a considerable inquiry has again been experienced in light cloths, but only isolated transactions have occurred in shirtings. China has given rather more support in both grey and white goods. The undercurrent of demand for the West Coast of Africa remains healthy. American yarns have advanced in price from day to day, and numerous spinners are now very independent. An encouraging business has again been done.

EXPORT OF CEREALS FROM THE SUDAN

A proclamation has been issued restricting the export of cereals and flour from the Sudan. It prohibits the export of barley, millet, spiked millet, maize and wheat, or flour made from these cereals, from the Sudan to any destination without the permission of the officer appointed for the purpose. Consignments of less than ten tons may, however, be sent to Egypt viâ Halfa without licence. The object of the decree is to enable the Government to control the export of cereals.

BAKU STRIKE ENDED.

The strike in the oil fields (says Reuter's Baku correspondent, in a message dated October 17), which has lasted nine days, is at an end. The men have returned to work, most of their demands having been conceded by the employers.

ADEN HARBOUR CHARGES.

Recent Changes.

The increased cost of operating harbour and pilot boats, tugs, lighters, etc., brought about by war conditions is chiefly responsible (says the United States Consul at Aden, Mr. Addison E. Southard, in a recent report) for recent increases in the harbour dues, pilotage fees, and landing and shipping charges at Aden. Under the higher scale a steamer discharging part or full cargo or landing passengers at Aden will pay harbour dues of 3 cents per ton register. Steamers calling for coal or provisions only will pay 12 cents per 100 tons register. Ships paying full harbour dues do not pay mooring fees for the first 48 hours. After that they pay at the rate of $1.46 per day. Steamers not paying full harbour dues are charged mooring fees at the rate of 73 cents per day. For running mooring lines (not compulsory) a charge of $2.43 is made. Pilotage fees for the inner harbour are at the rate of 97 cents per 100 tons register during the day. At night the rates are 50 per cent. additional. For the outer harbour only half the ordinary rates are charged. The minimum pilotage fee chargeable is $5.13, and fees are chargeable in excess of this amount, calculated at the rates specified on the tonnage of the vessel. For detention of the pilot beyond the first hour a charge of $5.13 per hour is made. These harbour dues and pilotage fees are uniformly 50 per cent. greater than the former charges. Ships do not come alongside the wharves at Aden, and all goods are carried by lighters between ship and shore. A landing or shipping charge is made on each piece of freight handled.

Landing and Shipping Increases.

The local Chamber of Commerce and shipping firms at a recent meeting decided upon an increase in landing and shipping charges for certain items. The old charges have been in effect since 1895. Several changes were made, the increases in most cases amounting to 50 per cent. The shipping charges on skins and coffee, the principal exports from Aden to the United States, were raised. The rate on coffee has been increased from 4 to 6 cents per bag. The rate on skins was 8 cents per bale. The new rate is 12 cents per bale of not over 25 cubic feet in size and 16 cents per bale of more than 25 cubic feet. On gums the rate has been increased from 2 to 4 cents per hundredweight. The principal imports from the United States into Aden are cotton piece goods and kerosene, and the charges on these two items have been increased from 6 to 8 cents per bale for the former and from 4 to 8 cents per case for the latter.

The landing and shipping charges in general range from a minimum of 2 cents per piece to an average maximum of $1.62 per piece. A case of a dozen bottles of beer, a basket of potatoes or onions, a hundredweight of copper, brass, rope, etc., are handled at the minimum rate. A horse, a carriage, or similarly large or bulky article, is charged for at the maximum rate of $1.62. The one exception to this maximum rate is a charge of $2.43 for lightering a billiard-table.

Goods not listed are charged for at the rate of 97 cents per ton if in less than 10-ton lots, and at the rate of 65 cents per ton if in greater than 10-ton lots. This is an increase in each instance of 16 cents over the former charges.

ENGINEERING NOTES.

Machinery for S. Russia.

The investigators who have just returned to this country from Russia, some of whom started out last May and have travelled six thousand miles through the country, declare themselves "more than convinced that there is a large market in Southern Russia in particular for British implements and machinery." As we have often had occasion to assert this fact in these columns, we are glad to see this confirmation. British manufacturers, however, are again told that they must be prepared to compete with the Germans in the very important matter of credit to buyers on equal grounds. Russian farmers, it is pointed out, demand a continuance of the benefits of the long credit system to which they have been accustomed, and the disinclination to allow this has been, it is stated, one of the greatest hindrances to the giving of orders for English implements. This hesitancy is now declared to be a "credit bogey," and the investigators report that "it will be a great pity if our share of orders for agricultural machinery is lost in this way, since there is a huge trade to be done."

We are very glad to see that what, in dealing with the question of long credit in these columns three years ago, we characterised as "the long credit scare," is now similarly characterised by expert travellers on the spot. We have always contradicted the statements that in Southern Russia as well as in the Near East the Germans contrived to secure the markets by giving long credits, and pointed out that their success was chiefly due to their energy and to their methods of dealing through and with their agents and their banking houses. Where credit was given, full security was required and obtained. They selected agents of good standing and capable of assuring themselves as to the trustworthiness of buyers. To such agents, as a rule, the credit was given and not directly to the average buyers. The German banks through their numerous agents in those regions were also of much assistance to manufacturers, and often arranged and carried through credit business for the latter. British manufacturers on the other hand were not so careful in the selection of agents, they had no proper information, no local banking support, they acted separately and individually, and often competed against each other, while the Germans were co-operating with and supporting each other. The "long credit" business was often a "scare" to dishearten or drive away British or other competitors, and it succeeded. But wherever British firms, especially engineering firms were well and substantially represented they had always an advantage over German competition. Such firms are still dominating the markets, there and are, as a rule, manufacturers of heavy machinery. Change of methods and, if possible, co-operation, is needed to capture those markets.

Artificial Rick Drying.

Many think that with the harvesting and piling up the wheat sheaves into a rick the farmer's anxieties and cares are almost ended; that the fruit of his labour is gathered and safe in the rick, and that threshing and storing the grain are only a question of time and convenience. Yet, while the completion of harvesting affords a certain amount of satisfaction to the farmer, the danger of corn heating in the rick is a constant nightmare to him until storing is effected. Corn heating in the rick often baffles the hopes of the farmer and landowner especially in the Near East, where, owing to climatic conditions and to the very slow progress of threshing, this trouble often occurs, damaging the quality as well as the quantity of the corn. To prevent this happening, especially when there are many ricks in a group, is a rather difficult matter; whilst the drying of ricks by natural means—sun or air—is, as a rule, a laborious, wasteful, and uncertain performance. Hence, probably, the average farmer's practice of leaving his ricks to their fate until threshing. A new and very practical system, therefore, of rick-drying by mechanical fan, which is practised by an English scientific farmer, will undoubtedly interest every agriculturist in the East.

The Process Described.

The drying plant comprises a 6-in. centrifugal blowing fan, driven by a 2-h.p. petrol engine fixed on a portable frame, and a wooden pipe made of planks 6 in. wide and 16 ft. long. One end of the pipe is joined to the fan, whilst the other reaches the centre of the rick, into which the air from the fan is discharged. Some ricks were treated by this contrivance, and, when threshed, the wheat was found to be hard and dry, and in better condition than that from ricks erected afterwards, which were carried in even better condition than the fanned ones. A rick was found to be at a temperature of 74 degrees, which, half an hour after the fan was started fell to 56 degrees, the same as the outside temperature. Each rick was blown into for about sixteen hours in two periods of eight hours each at an interval of a week. The engine and fan were easily moved from rick to rick. The size of the above 6-in. centrifugal blowing fan was found to be well suited for ricks 8 yards by 5 yards. The pipe according to expert advice should be first put in when the rick is about 4 ft. off the ground; it will then sink as the rick gets firm, till its end is at a convenient height to fix to the fan. A wooden box is fitted to the delivery of the fan, the box having an opening cut in it just the size of the pipe, which is inserted in the opening, and the crack packed with waste held down by a strip of wood. The pressure inside the pipe with the fan working was measured, and found to be equal to 1 inch of mercury; so that the drying effect must be greater than that of a full-sized gale. In cases of larger size ricks it may be necessary to provide one or two more outlets on the wooden pipe to deliver the air to different parts of the rick simultaneously, instead of blowing it all to the centre. It is evident that the apparatus is very simple and very efficient. The wooden pipes can be made by any ordinary carpenter, and the fan can be driven by any small engine that is used for other purposes on the farm, if a new one for the purpose is not wanted. A British-made centrifugal fan is strongly recommended, being far superior in efficiency and durability to any designs imported in the East from elsewhere. In the meantime British fan manufacturers, especially those who are renowned as specialists should try to come in touch with the Eastern markets, where, apart from the above possibilities, there is always a large demand for fans for all purposes, which hitherto were supplied by Germany and America.

Merefa-Kherson Railway.

It is reported that, in spite of the political troubles in Russia, an early completion of the new railway line between Merefa and Kherson is very probable. The difficulty of obtaining the necessary rails has been apparently, surmounted, and a certain portion is being laid down. This line will be very important for the export of grain and ore from Kherson. The Government, as already reported, has confirmed the project for constructing a railway from Saratov to Alexandrovsk. The carrying out of this project will enable goods from the Saratov district to reach the port of Kherson, via the Dneiper, and *vice versa*, thus considerably increasing the volume of exports and imports at Kherson. Progress is also being made with the construction of the railway between Kherson and Djankoi, which will join Kherson with the Crimea-Kertch line, to which allusion was made in previous notes. The Government has already sanctioned the building of a bridge over the Dneiper, which will be sufficiently high to permit the unimpeded passage of river traffic; the building of the bridge was supposed to begin this year, but so far nothing has yet been confirmed about it.

TRADING WITH THE ENEMY.

Consolidated List of Names.

The Controller of the Foreign Trade Department has issued a new consolidating list, containing the names of over two thousand persons and firms with whom persons in the United Kingdom are forbidden to trade under the Trading with the Enemy (Statutory List) Proclamation, 1916. Although the statutory list has now been in existence for more than a year, cases still come to the notice of the Foreign Trade Department in which firms are corresponding with persons on the list, and they not infrequently give as an excuse that they have never heard of the list. It is important that everyone engaged in foreign trade should realise that he is under an obligation to make himself familiar with the statutory list and to observe it in his dealings. Failure in this respect renders him liable to the heavy penalties provided by the Trading with the Enemy Acts, and these apply to holding any communication whatever with anybody on the statutory list, and not merely to entering into an agreement or continuing to carry on business with such persons. In exceptional cases, where it appears to be necessary and where it is not contrary to the public interest, a licence may be obtained from the Foreign Trade Department exempting from the prohibition.

OPPORTUNITY FOR BRITISH FIRMS.

The Acting British Consul at Fez (Mr. J. Dawkins) reports, says the *Board of Trade Journal*, that a firm of Moorish subjects established at that port wishes to get into touch with United Kingdom suppliers of the following goods, for which there is stated to be a demand:—Socks, shirts, and underclothing of wool, cotton, and silk; braces; cloth caps, straw hats, and sun helmets; handkerchiefs, gloves, all grades; bath towels; table cloths, napkins, and counterpanes; cotton, thread; footwear and gaiters, waterproofs, rubber; cheap handbags, stationery; and wire rat traps. The firm does business on its own account for cash against documents. Correspondence with the firm may be conducted in French. United Kingdom manufacturers and exporters of the articles mentioned, desirous of doing business in Fez, may obtain the name and address of the firm referred to on application to the Department of Commercial Intelligence. In making application, the reference number (363) should be quoted.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses and unsuccessful attacks during the week ended October 21, 3 p.m.:—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft):—

Arrivals	2,648
Sailings	2,689

British merchant vessels sunk by mine or submarine:—

1,600 tons gross or over	17
Under 1,600 tons gross	8
British merchant vessels unsuccessfully attacked by submarines	*7
British fishing vessels sunk	0

* Including one attacked during week ended October 14.

COMPANY MEETINGS.

ASSAM-BENGAL RAILWAY COMPANY, LIMITED.

The ordinary general meeting was held on Tuesday at the office, 80, Bishopsgate, London, Mr. James M. Rendel, the chairman and managing director, presiding.

The Acting Secretary (Mr. Thos. C. Brett) read the notice convening the meeting and the report of the auditors.

The Chairman, at the outset of his remarks, regretted that their friend and colleague, Sir F. R. Upcott, had felt it necessary to resign the chairmanship, but the directors were glad to think that he would retain his seat on the board.

Continuing, he said:—Reference is made in the report to three branch lines now under construction, which, though owned by independent companies, are to be worked by the Assam-Bengal Railway as part of its system. I wish to take the opportunity of stating in regard to these three lines—and the observation will apply equally well to any other lines of which we may hereafter become the working agency—that we shall at all times do our best to consult the interests of their shareholders, to carry out, in a liberal spirit, the obligations we have undertaken towards them, and to leave them no cause hereafter to regret that their future has been entrusted to the Assam-Bengal Railway. But I must also point out, on the other side, that if we are to make the most of these branch lines, the development of the Assam-Bengal Railway into a large and powerful system, earning a surplus revenue, and, in respect to mileage and the volume of its traffic, able to hold its own in public estimation with other large railways in India, is of hardly less importance to them than it is to us. It is to be hoped, therefore, that the promoters and shareholders of these lines will lend all the support they can to the efforts which the board are continually making in this direction, and in particular that they will not fail to urge upon the Government the necessity, not only of turning to the fullest account the great natural advantages of the Port of Chittagong, on which the Assam-Bengal Railway system converges, but also of placing the port in direct and easy communcation with its hinterland by concentrating under the management of the Assam-Bengal Railway all lines of railway within that area, the natural and obvious boundary of which is the Brahmaputra River, or, as it is known in its lower reaches, the Jamuna or the Padma.

And this brings me to a special point which, as you know, has long been before the authorities in India and in England—I mean the claim of the board that the outlying section of the Eastern Bengal State Railway lying to the east of the Brahmaputra, including the independently owned extension to Jaggernathgunj, the whole of which is known shortly as the Dacca-Mymensingh line, should be transferred to the Assam-Bengal Railway system, to which it is now physically connected at two points—namely, to the north at Mymensingh, where it meets the Mymensingh-Bhairab Bazar line, and to the south at Tangi, near Dacca, where it meets the recently constructed Bhairab-Tangi extension of the Assam-Bengal Railway. The first representation of the board on this subject was addressed to the India Office, as far back as the year 1902. From that time onward the application has been constantly renewed at every suitable opportunity, and when the Bhairab-Tangi extension was opened in July, 1914, we had every reason to believe that the transfer of the Dacca-Mymensingh line was a question of time only, and a very short time, too. Unfortunately, we have heard, with surprise and disappointment, within the last twelve months, that new and unexpected opposition in an unexpected quarter has appeared, and that for the time being we are held up. I hope it may not be for long. Meanwhile, the position in which the matter now stands, as the result of recent correspondence with the India Office, is that the board have decided, with the concurrence of the Secretary of State, to depute one of their number to visit India during the coming winter season, in order to lay the case in all its bearings before the Government of India and its advisers in that country.

In these circumstances, it would, I think, serve no useful purpose, at the present stage, to review the past history of the controversy, or to forestall in any way the discussion which is in prospect by entering on a statement, which would of necessity be incomplete, of the grounds not only of public policy and administrative expediency, but also of equity and fairness, on which our claim is confidently based. I may, however, without indiscretion, say that the transfer is strongly supported by the Government of Bengal, as the Governor of the Province has himself made this public, on the occasion of a visit to Chittagong a few weeks ago, in a reply to the addresses of welcome presented to him on that occasion. I will only add that, if there is any feeling in Calcutta that, as a consequence of the transfer, the interests of the trade of that great city may be prejudiced, in the smallest degree, in favour of its small and struggling neighbour, we are still ready, as we have always been, to accept any conditions which the Railway Board may consider to be reasonably necessary to protect the Calcutta route. Our policy is not to impose disabilities, but to remove them; not to block the way to Calcutta, but to open wide the door to Chittagong. Let me add, in conclusion, that the limited staff of this small line has taken its full share of the burden and sacrifice of these times. He concluded by proposing the adoption of the report and accounts.

Mr. R. S. Strachey seconded the motion, which was carried unanimously.

The retiring director and auditors were re-elected, and a vote of thanks to the staff in India and England terminated the proceedings.

THE NIZAM'S GUARANTEED STATE RAILWAYS.

The sixty-fourth general meeting of his Highness the Nizam's Guaranteed State Railways Company, Ltd., was held on Tuesday at Winchester House, Old Broad Street, E.C., Mr. C. A. Winter (the chairman) presiding.

The Secretary (Mr. M. T. Walker) read the notice and the report of the auditors.

The Chairman, in moving the adoption of the report and accounts, said: This is the first meeting that we have held under our new arrangement of having one meeting a year instead of two, and the accounts now in your hands relate to a whole year. The capital account of the broad gauge shows that there was no change during the year in the capital created, raised and received. The expenditure on capital account was £33,016, of which £14,085 was spent on rolling stock, and the balance on additional works and general improvements. The expenditure on rolling stock includes the purchase and erection of ten passenger engines. The comparative statement of the working of the line shows an increase in earnings and a decrease in working expenses. This decrease in working expenses is accounted for as follows: Previous working expenses were debited with the contribution to the renewal fund, which is now closed. The renewal programme has been suspended owing to the impossibility of obtaining rails and material, and the renewal loan account has been closed. The surplus

Digitized by Google

earnings for the year, hitherto credited to the renewal loan account, amounting to £54,648, have been divided between H.H. Government and the company. The company's moiety, less income-tax, has been credited to surplus earnings. The important work of remodelling the Secunderabad station is progressing, but the difficulty in obtaining materials also applies to this. Owing to the inability to obtain stores, the maintenance and repairs to locomotives is a serious problem, and everything possible is being done to conserve them. After the war there will be a large accumulation of deferred maintenance work to be carried out, both on the locomotives and carriages and on the permanent way. In the early part of the year plague was very prevalent and seriously interfered with work and traffics in some districts, and, among other things, necessitated the closing of the Hyderabad City booking office from December 17, 1916, to April 30, 1917.

I will now deal with the metre gauge. There was no addition to the capital account during the year. The capital expenditure was on additional works and general improvements of the line. There was a sum of Rs.20,917 spent on rolling stock, but against this there was a credit of Rs.52,348, being the amount received from the Government of India for the purchase of an engine and ten wagons, thus leaving a credit of Rs.31,431 under the head of rolling stock. There still remain four miles of renewals of the steel sleepers, but this work must continue in abeyance, as no sleepers can now be obtained. The comparative table before you shows a reduction both in earnings and in working expenses. The decrease in earnings is attributed to a falling off in goods, and to plague and unseasonable rains in the first half of the year. The decrease in working expenses was due to less repair work being carried out in the locomotive department owing to the impossibility of obtaining stores and to less work being done on the line for the same reason. There will be a large accumulation of work to be carried out after the war on this line when stores and materials are again procurable. The net result of the year's earnings shows surplus profits amounting to £28,376, which has been divided between H.H. Government and the company. The share of the company has been credited to surplus earnings. With regard to the Secunderabad-Gadag extension, the first portion of this line, Secunderabad to Mahbubnagar, was opened for passenger and goods traffic on October 1 last year, a distance of 70.22 miles. A very severe epidemic of plague occurred in the districts served by this line and greatly interfered with all traffic, both coaching and goods. Transport difficulties also checked the goods traffic. Owing to the difficulty of obtaining materials of all kinds, it is impossible to say when the completion of the first section to Guduwal will be effected. You will understand that the difficulties in managing a railway under present circumstances are very great, and I hope you will agree with me in thinking that it is a matter of congratulation to us all that the results of the year's working are so satisfactory.

Mr. Leonard Mortimer seconded the resolution, which was carried unanimously, and the retiring directors and auditors having been re-elected the proceedings terminated.

SUEZ CANAL RECEIPTS.

The traffic receipts for the Suez Canal were as follows on the undermentioned dates:—

	1916. Francs.	1917. Francs.
October 19, 20.....	490,000	210.000
,, 21, 22.....	640,000	650,000

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Avenue,
Thursday.

The revival of activity which commenced last week has continued, and there has been a great deal of fresh buying this week, in which Egypt has participated also, and in most instances prices are again closing at a higher level. All advices from the other side continue favourable, and, unless anything unforeseen occurs, the improvement in values should make further headway. In Government bonds a large business was done in Unifieds at 84¼, a rise of ¼. The 3½ per cent. prefs. were also in demand, but no business resulted, as there were no sellers.

In Bank shares the feature was the rise in National Banks at one time to 17¼; but they are closing somewhat quieter at 17, a rise of ⅜. Agriculturals, which were done up to 6 13-32, are closing unchanged at 6 5-16. Anglo-Egyptians have continued to be wanted in the neighbourhood of 13½, and Land Banks have further improved ¼ to 7¼, on a persistent demand, which resulted in a very fair amount of business

There has been no change to record in Delta Lights, which have remained neglected. In Land shares a large business has been doing in New Egyptians, and the price has improved 10½d. to 14s. 6d. Beheras have been bought for Egypt, changing hands last at 12, a rise of ¼. Behéra Prefs. are also wanted, but sellers at current prices do not exist. Delta Lands have also been dealt in pretty largely, and have improved 6d. to 14s. In Union Foncières a few hundred shares have changed hands at the unchanged level of 1 15-16.

In miscellaneous shares, Markets are 6d. up at 27s., and Salts have been quite a feature, rising 2s. to 27s. 6d. on some small buying in a market bare of sellers. Khedivial Mails have been exceptionally dull, and are 1s. down at 33s.

In Greek securities, apart from some demand for Monopolies and Rentes, prices are all unchanged. Monopolies are a point up at 53, and Rentes are ½ better at 43½.

Paris Bourse.

Closing quotations on Wednesday were:—Egyptian Unified, 99; Serbian, 1895, 59.75; Turkish Unified, 60.10; Ottoman Bank, 475; Suez Canal shares, 4,740.

Oil Shares.

Wednesday's prices showed some fluctuations:—Anglo-Egyptians (B) fell 6d. to 27s. 6d.—28s. 6d., and Ural Caspians declined 1-16 to 1 5-16—1 7-16. Roumanian Consols were unchanged at 11s. 6d—12s. 6d.

COMPANY NOTES.

Oil Outputs.

Bibi Eibat.—Production for week ended October 7, 48,067 poods, or 775 tons.

British Maikop Oil.—Production half-week ended September 30, 822 poods (about 13 tons); week ended October 7, 2,342 poods (about 38 tons); week ended October 14, 2,146 poods (about 35 tons).

North Caucasian.—Total production week ended September 26-October 9, 651,569 poods (or 10,509 tons).

Spies Petroleum.—Production, including 11,280 poods from ambars, for week ending October 14, 202,110 poods, or about 3,260 tons; total production for year from January 14 to October 14, 6,958,720 poods, or about 112,237 tons; total production for corresponding period last year, 6,603,795 poods, or about 106,513 tons.

Dividends, Payments, etc.

The directors of the Burmah Oil Company announce an interim dividend of 1s. 6d. per share (15 per cent), free of tax, on the Ordinary shares and 6 per cent., less tax, on the Preference shares. The rate is the same as last year.

The Bank of England are prepared to receive the coupons due the 1st prox. on Egyptian Unified Bonds; the necessary lists can be procured on application at the Dividend Pay Offices, 3, Prince's Street, E.C.

NOTES OF THE WEEK.

The one outstanding event of the week, the German assault on Italy, is bound to influence both the military and the political situation in the Near East, as well as elsewhere. In Italy the disaster—for it is nothing less—has had the effect of reuniting the country; from France and England it has called forth not merely sympathy, but active help. Roumania, united by such close ties of friendship with Rome, cannot send assistance directly, but she can at least "keep her end up" with vigour, and occupy a certain number of German troops. There can be no doubt that the inactivity of the Russian Army is the source of this stroke, to achieve which Mackensen has been transferred from the Roumanian front.

The blow strikes primarily, of course, at Italy, for whom every Englishman feels a traditional admiration, but indirectly it affects the Jugoslav problem. A dominant Austria in Venetia and the Adriatic would mean the death-blow to all hopes of Jugoslav emancipation, and the disquiet in Vienna at the progress of the Jugoslav ideal, and not least with its unexpected *rapprochement* with Italy, was evidently one of the causes which led to the Austrian demand for an offensive being acceded to by Berlin. The young Emperor appears definitely to have abandoned his earlier and rather hesitating belief in Trialism as a possible policy, and Count Czernin's profession of faith in peace by disarmament, which was obviously made with his tongue in his cheek—since the preparations for the offensive were afoot when he spoke—has also vanished.

Whatever the military result of this move—and we are confident that Italy will be able to arrest it—it marks still further the declension of Austria into the position of a German serf. She has been unable to resist the Italians in what has become for her the chief seat of the war, and Prussian soldiers and generals have had to be called in. Moreover, the speech of her Finance Minister, made since the opening of the new offensive, admits that Austria is unable to pay the interest on her war loans, and has had to resort to "credit operations." The nature of these transactions is not specified, but the reticence will not deceive the world for a moment. The necessary "credit operations" have consisted in a loan from Berlin, and, like all other operations, they are a painful but necessary process, to which the patient only submits when there is nothing else to be done. In the present case, no doubt they will bring temporary relief to the sufferer, at the price of aggravating a still more serious disease—that of being under German control. This last disease is incurable, and it is quite certain that the Prussian physicians have insisted on a long price from the sufferer.

The consequence of this double dose, both military and political, would be that the Southern Slavs would fall under the joint servitude of Vienna and Berlin. Viennese rule has only been tolerable in the past, so far as it has been tolerable, by the weakness and occasional impotence of the Austrian Government; but there would be no inefficiency in the Berlin control. Bismarck once spoke of Austria as a house built of bad Slav bricks and good German mortar. Under the control of Prussia, the Slav bricks would be held very tightly in their place. During the past twenty years the tendency has been entirely the other way, and the German mortar has been crushed out in several places by the Slav bricks—a fact which has caused much alarm at Berlin, particularly since the Southern Slav movement assumed formidable proportions not long before the war. For that reason Prussia is becoming more and more set on the maintenance of Austria as a Germanic Power under Prussian domination.

It is more and more clear, in this depressing moment, that the Near East will have to be saved in the West. All hope of an Italian offensive is definitely at an end. The Salonika army remains—the Salonika army. Greece is hampered by shortage of food, and the intrigues of King Constantine's followers. The Roumanian army could advance, if the Russian army had not resolved itself into a debating society. Although some of the more courageous Russian politicians now recognise that dreams are not realities, the only sign of improvement is their frank admission that there is no improvement. But the separatist movement continues unchecked: the Ukraine national flag has been raised in the Black Sea fleet, and no protest has been recorded from Petrograd. Anarchy spreads, pogroms continue, and the prospect of famine grows steadily worse. Meantime, the Soviet is revising its peace terms for presentation at Paris, oblivious of the fact that the steadfast determination of France is not likely to be shaken by paper programmes.

A single blow, however serious it may be, will not have the least effect in persuading the Allies to change

Digitized by Google

their programme for the liberation and reconstruction of Europe, as the Germans hoped; but it is well to recognise that while this is the case, it commits the Allies to a long war. If the diagnosis given above is correct—that the political programme of the Entente in the Near East can only be achieved by military action in the West—it inevitably implies a longer war than was in prospect at the time when the assistance of Russia was expected to be decisive. Meantime, it would be well if some of the publicists were to cease their exposition of the "exhausted Germany" theory. Undoubtedly Germany recognises that she is not so strong relatively as she was, since she tacitly admits that she can no longer attack on the Western front with any prospect of success. But it is equally certain that she is not exhausted, or she would not be able to spare a large army to help an ally in what to her must remain a secondary theatre of the war.

It may be noticed that the few British politicians who remain incurably faithful to Bulgaria have seized the present time as a favourable one to advocate once more a separate peace with that country, and with Austria and Turkey. As to Austria, after accepting the help of Germany to win her own particular battles, it may be said that she could not have a separate peace even if she would; of Bulgaria, that at this moment she would not if she could. King Ferdinand would, no doubt, like to get away with the booty: but he has contracted obligations to Berlin, which has performed more than the Allies can promise, although less, as internal evidence shows, than his inordinate appetite desires; and a separate peace would at once expose him to the assault of his present Allies. The hour when the Germans are advancing into Italy is hardly a propitious one in which to explain to him that the Central Powers have perished from exhaustion.

The latest revelations as to the ex-King and Queen of the Hellenes have finally bereft them of the dignity that sometimes hedges an exiled monarch. The King stands convicted of sending confidential information as to the Entente, with whom he had relations as a neutral (altogether apart from their peculiar responsibility as protecting Powers), direct to Berlin. A paid spy, like the half-breed dancer on the Paris stage, could have done no more, and would have done no less. He took orders from the Kaiser, and executed them. The Queen, for her part, referred to opponents as "pigs." But then she is a Hohenzollern.

The Turks seem to have started out to write their latest communiqué with the intention of claiming a victory, and to have half-abandoned the idea before they completed the paragraph. The facts are that they attacked a line of British cavalry outposts, and that, although our men were heavily outnumbered, they held on, while repeated subsequent charges by Turkish cavalry only gave them "a slight gain of ground," with losses which far outnumbered our own. If we cannot claim this as a success, most certainly the Turks cannot.

The Government has published Sir Charles Munro's despatch covering operations in Aden, South and South-East Persia, and the North-West Frontier. In Persia our operations have been mainly concerned with defeating the agents of German propaganda. As regards Aden, which has been almost forgotten at home as a theatre of war, he remarks that in the period under review—March 10, 1916, to March 31, 1917—the Turks made only one attempt to assume the offensive, when they were easily beaten off. Some months later the British attacked the Turkish ports at Jabir and Mahat with complete success. The enemy casualties were 200, and the action had a demoralising effect on the Turkish Arab auxiliaries, whilst achieving its object of preventing the withdrawal of Turkish troops from Lahej towards the Yemen. A tribute is paid to the co-operation of the Navy.

In Eastern Persia, where only a small force was maintained, in co-operation with Russia, to frustrate the activity of German agents, raids were made on our lines of communication by certain tribes in Persian Baluchistan. Punitive operations were undertaken, and several actions were fought under difficult conditions, but the tribe which had given most trouble submitted. As a whole the work, both here and on the North-West Frontier (where activity has been almost incessant), has been very quietly, but none the less efficiently, done. It is inevitable that it should be to a certain extent overshadowed by the greater events in the West, but it is equally essential to the security of the Empire.

Last week's Indian debate in the House of Lords may fairly be described as useful, in that it brought out clearly the facts of an exceedingly difficult position. The difficulty must be attributed in the main to the somewhat erratic activities of Mrs. Besant, an elderly lady who is rarely outside the circle of the limelight; she is probably best known for her advocacy of various forms of religion and its opposite, but of late she seems to have been aiming at the political leadership of India, and has devoted her abundant energies to a propaganda in favour of what she calls Home Rule. Her aspirations may be legitimate, but her methods have been undoubtedly dangerous. Lord Sydenham, who knows parts of India well, said in the debate that language of the kind used by her was "exactly calculated to rouse an excitable people to rebellion"; and Lord Curzon, speaking for the Government, joined in denunciation of the "abominable and wicked things" said in the course of her campaign.

The Indian Governments are extraordinarily tolerant, but they found Mrs. Besant too much. First one province and then another excluded her from its limits, and at last the Liberal statesman who is Governor of Madras subjected her to the mild restrictive measure known in India as internment, which may best be described as a humane and comfortable form of muzzling. The necessity of that action was not questioned in the debate. It produced, however, some curious results. Indian politics were at the moment all "nerves"; it was known that proposals for constitutional reform had gone home; the delay in dealing with them—in itself easily explained by the preoccupations of the Cabinet—gave rise to the strongest apprehensions; and the internment was accepted very widely as a sign that the "forces of reaction" had triumphed. Mrs. Besant is by no means universally popular among Indian politicians, but in these circumstances she became a symbol rather than a person, and Press and platform were submerged in a wave of sentiment of the sort which in countries like India very soon becomes the dominating feature of a situation.

The result was to place the Supreme Government in a very difficult position. The most active minds in India were rapidly developing hostility, none the less real because it was based on sentiment, against the British administration as a whole. It was agreed that constitutional changes must come, and it was obvious that the new environment threatened to render their effective introduction impossible. Persistence in the attitude adopted towards Mrs. Besant would have involved not merely an extended campaign of repression, but the risk of a definite breach between the Administration and the small but powerful section of the Indian population, on whose co-operation it has of late so much relied. Lord Chelmsford and his colleagues had to decide whether this risk should be run; they declined to take it, and so Mrs. Besant was released on the strength of some rather vague "assurances" that she would behave herself for a time.

This policy can be judged only by results, and the time for judgment has not yet come. The official speakers in the House of Lords claimed that an improvement in the situation is already apparent, but, of course, that counts for very little, and, on the other hand, there is abundant evidence of anxiety among some of the strongest supporters of British rule. Of one thing, however, we may

Digitized by Google

be certain: the decision taken by Lord Chelmsford and his colleagues, whether right or wrong, is the outcome of a definite policy, and is not due to the weakness or the tendency to drift from which the interests of India have occasionally suffered during recent years. The Indian Constitution is to be reformed, and ordinary administrative doctrines are to be subordinated, if necessary, to the exigencies of the reformers' policy. It is a strong decision, and it may be wise, but on this point we are not inclined to prophesy. In any case, the decision adds greatly to the responsibility undertaken by Mr. Montagu, the Secretary of State, who is to investigate the constitutional question for himself and on the spot. His position is not free from embarrassment, for he has made speeches to the youth of England, and the youth of India have adopted his epigrams as so many clauses in the Great Charter of their country. They will hold him to his phrases, and there will be bitter disappointment, if he fails to deliver the promised goods. Fortunately for himself, he is going out "on the distinct understanding" that he will make no speeches. He will be able, therefore, to give more time to the study of his subject, and there is no reason why he should not succeed in grasping the main factors of what is undoubtedly a very complex problem, and, later on, help to produce a satisfactory practical solution.

The formation of "The Indo-British Association in London" is evidence that the march of events in India is very properly attracting more and more attention in this country. Any organisation that undertakes to promote fuller knowledge of Indian affairs in Great Britain and of British affairs in India has a wide scope and a career of supreme usefulness before it. It is, undoubtedly, necessary in these days, when extremist views find frequent expression in India, to emphasise the fact that the true interests of the people of India are entirely bound up with the continuance of British rule. But, as Lord Sydenham, the President, indicated in his opening address to the new association, acceptance of this principle is not incompatible with the desire to see reforms introduced in India. The object of the Indo-British Association will be to promote and protect the true interests of the people of India; at the same time it will enable not only British residents, but the domiciled community and all loyal Indians as well, to feel that they have in the heart of the Empire a body of earnest people who will give them full support whenever they need it.

Despite, or possibly in consequence of, the controversy between Zionists and anti-Zionists during the summer, a further manifesto has been issued by various British Jewish societies, advocating the reconstitution of Palestine as the national home of the Jewish people, and "trusting that his Majesty's Government will use its best endeavours for the achievement of this object." It is not stated in the resolution whether the advocates of this policy would prefer autonomy under the protection of Britain or some other great Power, or whether their aim is full sovereign independence.

It would be well to have this obscurity cleared up, and indeed it would become essential to do so before any definite steps were taken to realise this aspiration; but it is quite possible that it is on this very point that there is a divergence of opinion in Jewry. The resolution as it stands will be received with a good deal of sympathy, and that not only in Jewish circles. It is probably hoped in due course to obtain some indication of the Government's attitude towards the question of the repatriation of the Jews. Although numerous manifestoes have been issued, both in Russia by the revolutionary committees (on which Jewish influence is obviously very strong) and in other countries, claiming the complete freedom of the Jews, it does not appear that the British Government has yet made, or been actually called upon to make, any definite pronouncement of its attitude. That it will be sympathetic need hardly be doubted.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 4.

The Bairam feast has passed by peacefully, and on Monday all the Government staff who had spent the summer at Ramleh resumed their duties in the capital. The Residency has also returned to Cairo.

The Mecca Pilgrimage.

Telegraphic advices have been received by the Palace from the Emir el Hagg to the effect that the ceremonies at Mecca in connection with the pilgrimage were performed without incident, and that the caravan with the pilgrims has embarked on its return journey via Jedda. The International Quarantine Board has decided, in view of the excellent health reports received from the Hejaz, to declare this year's pilgrimage as free from infection.

The Nile Flood.

The levels on the Blue Nile and the Atbara have dropped since my last letter, and are now below the point at which they stood this time last year. As it takes about a month for a drop at Roseires to make itself felt in Middle and Lower Egypt, the levels in the latter two zones still remain abnormally high. At Kafr el Zayat, Benha, and Cairo the river is not much below the level of the bridges, but so far there has been no serious inundation, though, of course, infiltration is extending, and will continue to extend for some time. There is every hope, now that Roseires has fallen, that the worst is over in so far as the flood is concerned, but it must not be forgotten that the time of greatest strain on the banks is not during the actual flood, but after the water has begun to subside, and that consequently the irrigation service still has an anxious period before it. As I said last week, however, every precaution has been taken, and we count on the irrigation officials meeting this year with the same success as has attended their efforts in this direction in previous years.

The Question of Supplies.

The event of the week has been the creation of a Department of Supplies, for which the Sultan signed a decree on the 26th ult. This new department, which will be attached to the Ministry of the Interior, will deal with all questions concerning the supplies of foodstuffs and articles of first necessity required by the country. According to the terms of the decree, it will study local prices, follow the fluctuations on the various markets, take the necessary steps to regulate these prices, inquire into and provide for any local shortage which may manifest itself, prevent hoarding and cornering, and generally safeguard the interests of the country in the matter of supplies.

Since the outbreak of war this work has been done by the Egyptian Government Supplies Commission, which has been a purely consultative body, depending directly from the Prime Minister, to whom it made its recommendations and who ordered their execution. This Commission has done excellent work during the three years it has been in existence, but the time has come when some central authority, having full executive powers, is necessary to cope with the situation which has now arisen. It is considered that the desired end will be attained by the creation of a Department of Supplies, having at its head a Controller, who will deal not only with foodstuffs, but also with all matters directly or indirectly affecting the general question of supplies. He will be more than a Food Controller, and his title will be Controller of Supplies.

The head of the new department is Mr. J. I. Craig, for whose appointment the Sultan has signed a decree. Mr. Craig is the Controller of State Statistics. He has done most valuable work for the Government, especially since the war, and he organised the census of the population which was taken last spring. Opinion is unanimous that no better choice could have been made; in fact, that he is the one man for the post. It is recognised that the task before him is no easy one, but there is a general feeling of confidence that his ability and experience will enable him successfully to tackle the

Digitized by Google

various economic and other problems which the near future holds in store for Egypt. If anything is needed to reconcile Mr. Craig to the great burden which he has assumed, it should surely be the fact that he is assured of the sympathy and goodwill of every element of the population of this country.

An Excise Duty on Sugar.

Somewhat of a sensation was caused this week by the publication of a decree establishing an Excise duty on all sugar manufactured and consumed in Egypt. The only exception to this duty is the sugar consumed by the British forces. The duty is fixed at 17.5 milliemes per oke, or £E.14 per ton. The annual local consumption is approximately 70,000 tons, but the imposition of this tax will probably reduce it by some 20 per cent., as, on the one hand, it will drive the lower classes to consume sugar made by other means than those employed at the refineries, and, on the other, the poorer European elements will consume less of the refined article. It is calculated that the net revenue accruing to the Egyptian Government will be about £E800,000 per annum.

This new tax has been imposed, of course, because the Government finds itself compelled to tap new sources of income. Its revenues may be expanding, but that expansion is purely temporary, and is due to the abnormal circumstances created by the war. It is, indeed, according to the accounts, in a very prosperous position. That prosperity, however, is really only apparent owing to the fact that necessary expenditure on maintenance and repairs has had to be postponed on account of the difficulty in obtaining materials. When the war ceases revenue from the existing sources will perforce fall off, but, on the other hand, there will be heavy calls for expenditure on works which have been unduly delayed. It is, therefore, imperative that the Government should create for itself fresh sources of income, and this Excise tax on sugar is one of the expedients to which it is being forced to have recourse to raise money.

The Egyptian sugar industry has flourished considerably since the outbreak of war, and, thanks to this circumstance, the Société des Sucreries et de la Raffinerie D'Egypte, which has the monopoly of refining in the country, has been able entirely to consolidate its position, which was far from brilliant in 1913, and pay its shareholders a series of bumper dividends. In view of the fact that the export trade in sugar has expanded so much, surprise has been expressed that the Excise duty or rather an equivalent tax, has not also been imposed on sugar exported from Egypt. The explanation is that international treaties prevent the raising of the export duty. This is, indeed, regrettable, seeing that the refineries have been and are still making such enormous profits, and contribute not one farthing thereof towards the cost of administration of the country. It is sincerely to be hoped that the Egyptian Government will find some means of tapping what in the case of not only the sugar refineries, but also of various other local industrial and commercial enterprises, constitutes a very legitimate source of revenue to the State.

BRITISH PRISONERS IN TURKEY.

Mr. Hume-Williams, on October 25, presided over a meeting of the committee of members formed some time ago for the alleviation of the deplorable condition of British prisoners of war in the hands of the Turks. A resolution was passed in the following terms:—"This meeting learns with deep regret that the Government has been unable since the House adjourned to do anything to mitigate the suffering of British and Indian prisoners in Turkey, and earnestly hopes that immediate and energetic steps will be taken to effect an improvement in their condition." The committee is by no means insensible of the earnest efforts already made by the Government to alleviate the deplorable condition of these unfortunate prisoners. Efforts have been made to secure an agreement for exchange, on the lines of that concluded with Germany at a meeting of the delegates of the two nations at The Hague; but the difficulty is that the Turks refuse to reply to any representations made through the neutral Powers. Moreover, parcels of food and remittances of money rarely reach their destination. Of 4,900 parcels sent since August 1, only 82 have been acknowledged, and most of the money goes astray, and the condition of these prisoners is deplorable in the extreme. The methods of the Young Turkish Party seem to be more Hunnish than those of the Huns.

ROUMANIAN NOTES.

(From a Correspondent.)

The Papal Note.

The proposals contained in the Papal Note were hardly of a nature to satisfy the Roumanian people, ignoring as they did both the past and the present situation in Austria-Hungary. "The Pope's proposals," writes the Government paper *Mishcarea*, "impress one as having come indirectly from Germany: they are the proposals of Berlin sent out through the offices of the Papal palace." The direct offer of peace made previously by Germany met with but a cold reception. "So to-day Germany changes its tactics, but the Pope's signature will hardly contribute to the realisation of that peace at which German Imperialism is aiming." Another paper, *Romania*, writes:—"In his Note the Pope overlooks the national claims of Serbia and Roumania, for which these countries sacrificed heroically all that was best among their populations. Why were we excommunicated? Is it because Serbia and Roumania are not Catholic, but Orthodox? Perhaps. But the Pope has broken the tradition of acute diplomacy which used to distinguish the Vatican by ostentatiously differentiating between the God he represents and between our God, who, after all, is also Christian. In our earlier history Stephen the Great did not make such differentiations, and his men generously shed their blood in order to defend Rome against the onslaught of the Pagans; and the then Pope did not think it below himself to thank the little Roumanian prince and to proclaim him the defender of Christianity in the East. Or has 'Deus' been replaced by 'Gott' at the Vatican?"

Anglo-Roumanian Relations.

The foundation of the Anglo-Roumanian Society in London was hailed with deep satisfaction by the Roumanian Press of all shades and opinions. All expressions of sympathy and of appreciation for the deeds of our soldiers are, naturally, welcome to us (writes *Romania*). But our satisfaction for what has happened in London is the greater for our having been somewhat neglected until now by the English people. The foundation of the Anglo-Roumanian Society is not only a great encouragement in the tragic and heroic times in which we are living, but is also satisfactory evidence of the fact that we have gained the friendship of the English people, of that wonderful nation whose indomitable will has always secured victory." The chief Governmental paper, *L'Indépendance Roumaine*, deals with the event in two successive issues. The writer of the first leader does not think it correct to assert that Roumania was as indifferent towards England as England appeared to be towards Roumania. Kept a prisoner by the Treaty of Alliance in the German sphere of influence, Roumania "has never ceased to feel the greatest admiration for English civilisation; she has always known how to appreciate the impressive spectacle of that immense and harmonious work, of the development of English thought and power all the world over—as real civilising work as there ever was. . . . Roumania could, therefore, not see without regret that these sentiments produced no response, and that France and England, almost completely ignoring her, made no attempts to deliver, at least morally and economically, if not politically, the prisoner who secretly, and often openly, was calling to them from the depth of his heart." But that is now passed, and present events entitle us to look forward to a new era, in which common sentiments will preside over the common work, in which Roumania will share with her Allies.

Roumanian-American Relations.

The attention which the United States are showing the much-tried Roumanian nation has greatly impressed both people and Government. Some time ago a military mission under General Hugh Scott visited Moldavia as the carriers of a message of sympathy from our American Ally. But the Americans are a practical people, and they know that in the circumstances in which we have to carry on the war material assistance must come foremost. The United States Government are, therefore, seconding a committee, composed of thirty-eight prominent men belonging to the commercial, medical and financial worlds, for the purpose of inquiring into our needs, and thus to enable our Government to provide adequate support. The need seems to be great indeed, to judge from the fact that the authorities had to appeal to private people to provide hospitality for the American guests.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 7, 1917.

The Bread Ration Census.

Athens this morning resembles a city of the dead. Not a single vehicle of any description is moving, the local train services are suspended, the churches are closed, and not a human being is seen in the streets, save the military patrols. There is a weird silence, and one is reminded of the scenes of revolutions and massacres in Constantinople and of the eventful days of December 1 and 2 last in Athens, when deserted streets forewarned one of danger. But there is no revolution to-day; it is a peaceful measure—a census-taking—principally for the purpose of arriving at a correct number of bread tickets to be issued to the inhabitants of Athens and the Piræus. This course became necessary owing to the excessive number of bread tickets which had been issued through the abuse of an imperfect system of distribution. The present bread tickets, it is said, are nearly double the number of the inhabitants, with the result that there is a larger consumption of bread than should be. A military order was issued during the week, calling upon all the inhabitants to remain in their homes until noon, and the Ministry of Food issued an explanatory notice of the procedure to be adopted for taking the census. The daily ration of bread will be fixed when the exact number of the inhabitants has been ascertained.

The Food Question.

The food question is quite the absorbing topic of the day. Efforts are apparently being made by the authorities to increase the daily arrivals of fish and country produce; but supplies from overseas come in slowly, and grain and rice, the two most important articles, are still scarce. One of the greatest difficulties the authorities have to contend with is that of profiteering.

It is to be expected that on occasions like these holders of articles which are in demand will seek to make as much profit as possible, and evidently there are hidden stocks of some things. The Ministry of Food made a long statement to the Press explaining the steps that were being taken to replenish the country's stocks of foodstuffs, and very correctly attributed the present state of affairs to the effects of the ex-King's misgovernment. The Royalists naturally make capital out of the present situation, and say that there was not this scarcity in Constantine's time, when Greece was neutral; but, as a matter of fact, this is the outcome of their own policy.

A National Celebration.

The city this morning is in striking contrast to its gay appearance last Sunday, when three great events in the history of modern Greece were celebrated. A dinner was given last week to M. Venizelos to celebrate his departure from Athens last year, and a great demonstration was organised for last Sunday to commemorate the revolution of 1909, the declaration of the Balkan War in 1912, and the departure of M. Venizelos in 1916, all three events having occurred in the month of September. Athens was quite *en fête* and the streets decorated. There were celebrations in the churches, patriotic representations in the theatres, and a gala performance in the Municipal Theatre attended by M. Venizelos, the Ministers, some of the representatives of the foreign missions, and many officials. The military procession in the evening of about 5,000 soldiers carrying Chinese lanterns was quite picturesque, as the three columns, headed by their bands, passed through the illuminated streets amidst the cheers from the dense crowds.

Disorganised Finances.

The Chamber resumed its sittings last Monday, and has been occupied in ordinary legislative work. Yesterday the Minister of Finance had the unenviable task of presenting the budget for the current year. It can be imagined that the finances of the State have got into a chaotic condition during the past two years, and one is not, therefore, surprised to hear the Minister say, in a discourse full of lamentations, that he was unable to present a true state of the finances of the country owing to the confusion in the book-keeping of the Ministry. He said that they knew that the service had not been conducted with the order and method desirable; but he could never imagine that such disorder and absence of method could exist to such an extent as to make it doubtful, if not impossible, for the Government to control the financial situation of the State. The revenue for the financial year of 1917 is estimated at 263,554,997 drachmæ and the expenditure at 595,912,993 drachmæ, showing a deficit of 332,357,996 drachmæ. This deficit will be met, to a certain extent, it is proposed, by the income tax, an interior loan and a tax on excess profits.

News in General.

The two commissions of inquiry in respect to the actions of the Skouloudis and Lambros Cabinets have been interrogating the Ministers indicted. M. Lambros did not appear before the Court when summoned, so had to be conducted by the police. He and M. Ralli declined to make any statement, and reserved their defence for the High Court.

The military authorities have issued a notice to the effect that all subjects of enemy countries in the district of Athens will henceforth be under police control and must report themselves three times a week to the police authority. This appears to be quite a necessary measure considering that there are still many enemy subjects in Athens who form a nucleus to which the ne'er-do-weels identified with the former *régime* will be attracted with the object of fomenting trouble.

One naturally sympathises with the Government in their efforts to re-establish order and to take measures for the welfare of the country; but there is one measure that they have taken which is open to some criticism and is not likely to be of much benefit—that of the censorship at the Post Office. This seems to be carried to unnecessary extremes, for there can be no advantage in censoring and considerably delaying correspondence to England, private letters having taken as long as five or six weeks to reach their destination. As mentioned in last week's letter, it is to be hoped that the postal censorship will be conducted with celerity and discretion so as to cause as little delay as possible and to avoid the inconvenience and annoyance which are now complained of.

It is estimated that the number of people rendered homeless by the fire at Salonika amounts to 75,439 out of a population of 271,000. Of these 25,000 are lodged in tents, 4,400 in the mosques, and the remainder dispersed amongst relatives, friends, etc. The Jews were the greatest sufferers, numbering 52,000, the remainder of the victims being half Christians and half Mussulmans.

CYPRUS NOTES.

(From a Correspondent.)

High Days and Holidays.

The *Kourban Bairam*, celebrated about seventy days after the *Ramazan Bairam*, is being quietly observed by the Moslem community. It was decided last year that the horse and agricultural show usually held at Nicosia on this anniversary should be fixed in future for the spring—a good arrangement, as Bairam, for years to come, will revolve through the hottest months, following the lunar calendar. This year it coincides with the Greek Festival of the Cross, in honour of which a large fair is held at the village of Omodhos, near Troödos. The place is one of the centres of the wine industry, in which the once celebrated *muscàto* variety was made, and acquired a reputation that has vanished.

Should you wish to inspect one of the larger monasteries at your ease, and to see something of the abbot and other inmates, it is well to avoid the time of the Festival, with its crowds and attendant drawbacks. On the other hand, no one should miss an opportunity of attending one of these great popular gatherings, which present many interesting features. The Fair of Omodhos is a typical one. It is celebrated on September 27 (N.S.), and is regarded as marking the break-up of summer, or beginning of the rainy season, at any rate in the hills. It brings together a crowd of some thousands. As the Festival approaches great strings of mules and donkeys wind their way through the mountains, carrying holiday-makers of both sexes and all ages, in bright colours and picturesque groups. Many of them convey goods for sale, the products of their particular district and industry. On arrival at the monastery which surrounds the Church of the Cross you find every corner occupied, the more distinguished visitors being entertained in special guest chambers. The courtyard is filled, and in the stables and outhouses the animals of pilgrims and visitors are tethered. Tents are not used as in Egypt and other neighbouring countries. Religious duty comes first in order. On the day of the Festival the church bells summon the devout at an early hour. The edifice always contains an old painting of the Virgin or of the patron saint, and probably some highly venerated relic. The *ikon* is kissed, a silent prayer is made, an offering is given, and a taper is lit and placed near the *ikon* by the priest. After this duty the day is given up to business and pleasure. All round the church or precincts of the monastery all available spaces are fully occupied by booths and stalls, sheltered by awnings from the scorching sun. Silversmiths from the capital and other towns, who wander from fair to fair,

Digitized by Google

secure a prominent place near the principal entrance. Their merchandise includes silver spoons, forks for native sweets, bangles, earrings, crosses, vessels for sprinkling rose-water, and charms of various kinds. Often they sell silver "antiques," such as buckles, clasps, charm-boxes, coins, and tempting odds and ends. Passing on, you wend your way through double lines of booths in which native silks, cotton goods—European and native—copperware, crockery, glass, trinkets, toys, camel and goat-bells, ironware and many other useful articles are sold. Then come numerous stalls for sweets, confectionery, and fruits fresh and dried. There are cookshops where meat, *kibabs*, rissoles, eggs, native cheese, dough-nuts fried in honey and many delicacies pleasing to the native taste are offered. One article which always appears is the almost mummified meat of goat and sheep, called *apokté*. This consists of the whole carcase of the animal, which has been split in halves and flattened out, salted and dried in the sun. Though it does not commend itself to the European palate, it is much appreciated by the natives.

There are considerable sales of livestock, ponies, mules, asses, sheep, goats and pigs. Since the British occupation a horse fair has generally been held under Government auspices, prizes being given for different classes of ponies and donkeys. The game of *jerid*, so popular in the East, is often played by horsemen, chiefly Turks. Good humour prevails everywhere. Turks often mingle sociably with Greeks. People are out for the fun of the fair and jollification quite as much as for business. There are many coffee-shops, where cooling drinks can be obtained, and they are well filled with holiday-makers, chatting, smoking, and listening to fiddlers. A stroll in the village, especially towards evening, may bring you to a café, where the mandoline and zither, and nowadays a wheezy gramophone, attract visitors. Here may be seen dancing by men and youths, which evokes much applause and clapping of hands. The performers, many of them skilful and graceful, in spite of their high boots, remind you vividly of our own Highlanders.

THE CASE OF BOHEMIA.

Although the question of Bohemia can scarcely be called a question of the Near East, yet it bears such close relation to all other problems of Central Europe and that of the Balkans alike that it falls well within the scope of this review. The question of Austria is really the question of Bohemia, and the importance of a right solution of the Austrian problem cannot remain without effect upon the Near East. Austria's mission was to serve as a bulwark against the Turks. Now she is the bulwark of German imperialism, and forms Prussia's "bridge to the East," threatening thus directly the existence of all Central European and Balkan peoples. She cannot be prevented from playing this sinister part unless she is dismembered. Albert Sorel wrote in 1902:—"The day when the Oriental question is solved, Europe will inevitably be confronted with the Austrian question." And that day has now arrived. The Austrian Slavs, Roumanians and Italians have been too long the dupes of Vienna and Budapest; to-day they are determined to achieve independence and work out their own salvation. Among the Austrian Slavs the Czechs may with every justification be placed foremost, both as regards their numbers and the high level of their economic strength and civilisation.

Legally speaking, Bohemia is an independent State to-day, for she concluded a mere defensive Alliance through the person of a common monarch with Austria and Hungary in 1526. However, her rights and liberties have ever since been constantly violated by the autocratic and treacherous Habsburg dynasty, and the result of this fateful dependence of Bohemia on Vienna has been the fact that during this war the ten million Czechs became, together with other Austrian Slavs and Latins, the dupes of German Imperialism, without their consent and against their will, Czech soldiers surrendered wholesale to Russia and Serbia, and thousands of them are to-day fighting in the Allies' ranks.

On entering the Reichsrat on May 30 last, after three years of terrorism and absolutism in Austria, the Czechs solemnly made the following declaration:—"While taking a stand at this historic moment on the natural right of all peoples to decide their own destinies and free development—a right which in our case is still further strengthened by inalienable, fully recognised historic rights—we shall, at the head of our people, work for the union of all branches of the Czecho-Slovak people in a single democratic Bohemian State." During the subsequent debates they declared the question of Bohemia to be an international question which only the Peace Conference could decide. This declaration was only natural, if we consider that even the Prussians recognised the international character of the question of Bohemia, when in 1866 they issued a proclamation asking for the Czechs' support against Austria in return for independence for Bohemia. "The master of Bohemia will be the master of Europe," said Bismarck, and the Allies declared in their Note to President Wilson in January last "the liberation of Czecho-Slovaks from foreign domination" to be one of their war aims.

The lands belonging to the Bohemian Crown—*i.e.*, Bohemia, Moravia and Silesia, as well as the north-western part of Hungary, inhabited by the Czechs' near kinsmen, the Slovaks—form the richest part of Austria-Hungary. They would be economically self-supporting, and would have an outlet to the Baltic Sea by concluding a close alliance with Poland. Such an alliance between the two brotherly Slav nations of Poland and Bohemia would mean a block of forty million, which would be a barrier strong enough to arrest Germany's "*Drang nach Osten*," especially if, on the other hand, a strong Italy, Jugo-slavia and Greater Roumania should bar Germany's push towards the Adriatic, the Near East and the Persian Gulf. The reorganisation of Europe on the principle of nationality would mean the reduction of Austria-Hungary to her proper racial boundaries, consisting of exclusively German and Magyar territory. It would mean the emancipation of thirty million Slavs and Latins from the Habsburg yoke. This solution would be not only in the interests of justice and humanity, in so far as it would deliver the nations concerned from the German-Magyar racial tyranny, but it is directly postulated by the interests of the Allies themselves and the world at large, in so far as it is in the interests of the principles of democracy and a just and lasting peace in Europe, for which the Allies are fighting.

RECENT DISCOVERIES IN MESOPOTAMIA.

In recent years the recovery and publication of lengthy and important historical annals in the cuneiform script of ancient Mesopotamian monarchs have been very frequent. The British Museum began this new series of documents with their lately acquired cylinder of Sennacherib and a stele of Tukulti-Ninip I. Then the French followed by publishing a record of the campaigns of Esarhaddon and a long inscription describing a war of Tukulti-Ninip II. The geographical information alone derivable from the numerous records of expeditions in Mesopotamia and the neighbouring countries provides material for formulating a map of Asia Minor from the Persian Gulf to the Mediterranean, and from Elam almost to the Euxine, including the mountainous districts around Lake Van, at the time of the Hebrew kingdom. The records indicate the extent of the campaigns of warrior monarchs of various dynasties and districts upon the Tigris and Euphrates. Their conquests sometimes included distant lands acquired by themselves or their generals and administrators, such as Syria, Palestine and even Cyprus. That the Babylonian and Assyrian dominions were at times so widespread was known from several inscriptions previously found, as well as these more lately discovered; also by the fact that the writing characters for all Syria and Judæa and South-Eastern Asia Minor before the exodus were cuneiform. But the complete *recits de guerre*, excepting those of a few kings, such as Assurbannipal, Shalmaneser and Esarhaddon, were wanting.

In these records mention is sometimes made of similar far-reaching conquests by royal predecessors many centuries previously, and these have been supposed to be somewhat mythical. This view must now to a great extent be abandoned because the University of Pennsylvania, in Vols. IV. and V. of their series of Babylonian inscriptions, have now published part of the annals of a king named Sargon, of Agade, and of another monarch, Laugal-zaggisi of Uruk, or Erech, which gives authentic particulars of similar distant wars earlier by many centuries than those hitherto known

Lougal-zaggisi reigned at Uruk for twenty-five years, and he or his predecessors must have secured the overlordship of all the various peoples between the Persian Gulf and the Mediterranean, and, moreover, have retained their sway, not an easy task because of the differences of race, language, and religion. However powerful the king of Uruk may have been, Sargon, lord of Agade, and also of the city of Nippur, one of the most important towns of ancient Mesopotamia, made short work of him and captured his capital. Lougal-zaggisi made a last defence in a great battle to the north-west of Uruk, assisted by fifty governors of his sub-

Digitized by Google

ject cities or districts, and the men of all his vassal states. Sargon vanquished the whole array and took the king captive to Nippur. There he held a great service, or fête, in honour of his victory in the temple of Nippur's senior divinity Enlil, to whose help Sargon assigned his triumph. In return the priests appear to have created Sargon the great *Ishakku*, or viceroy, under Enlil's protection, of all his own and the recently acquired territory, and of any more he might by feat of arms obtain.

Fortified by divine authority, Sargon set out to conquer the country to the south-east of Agade, beginning with the city of Ur and its domains. Turning eastward, he took other towns, such as Lagash and Eninna, also Umma, the birthplace of Lougal-zaggisi. The kings of Ur had by invasion or friendship acquired close relations with princes and peoples to the west and north-west. Such ownership, or alliance, with the mountain regions to the north and west was ever absolutely essential to the Mesopotamians as they increased in population and civilisation, because their great alluvial plain practically did not contain either stone, precious metals, or large tree growth for timber.

The records of Babylonian forays, always joyfully acclaim reaching the cedar forests of Lebanon and Anti-Lebanon, and the tree-clad slopes of the Taurus, with the stores of metalliferous ores beneath their sterile soil. This time Sargon conquered all these regions and divided them into three governments of Mari, Jarimuta, and Ibla. We have not space to identify here the geographical boundaries of the three provinces; but Jarimuta, at the much later date of the Tel-el-Amarua despatches, is identified with the district known to us as the Plain of Antioch, extended so as to reach the bend of the Upper Euphrates.

We have termed Sargon King of Agade, but it was not until after these successful wars that he became so. On returning from his last expedition, described in his annals now in Philadelphia, he says so vast was his power that (like a Scandinavian viking) 5,400 men took their daily meal with him, besides many princes, proud to be his vassals.

He restored the decayed famous old city of Kish, in Akkad, in honour of being monarch of both Akkad and Sumer. The patron goddess of the first land was Inanna, and as he had become Ishakku, or fief holder, of the deity Enlil of Nippur, he now became feudatory of the divine Innana. Similarly for Sumer he styles himself Pashish of its gods, a word perhaps ancestor of the Pasha of to-day, and states that he also holds Sumer as in fief for Enlil, by whose help he had acquired it. It was as memorial of this that he founded Agade, to be for ever connected with his name.

JOSEPH OFFORD.

THE INDO-BRITISH ASSOCIATION.

At a largely attended meeting, held in the Cannon Street Hotel, on October 30, with Lord Sydenham in the chair, an association was formed, under the title of "The Indo-British Association in London," for the purpose of protecting the interests in India of British and Indians alike. The speakers, in addition to the chairman, were Mr. C. J. Shorrock, Sir John Hewett, Sir Francis Younghusband and Lord Harris. The following committee was appointed, with power to add to their number, for the purpose of taking steps to establish the association:—Lord Sydenham (President), Mr. C. J. Shorrock, Sir David Yule, Sir John Hewett, Sir Francis Younghusband, Mr. Jackson and Sir Charles McLeod.

Whatever effect the war may have on the celebration of Christmas, there will remain a very considerable section of the population of the country who will look for the time-honoured reminders of the season. It was, therefore, to be expected that Messrs. Raphael Tuck and Sons, the premier house in the Christmas card trade, would adapt themselves to the times. Their cards and numerous publications are essentially topical; but they are more than that, for by laying stress on the artistic side in regard to their productions they promote directly the cause of art and education in these islands.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Russia and Roumania—No Separate Peace. Oct. 25.

LORD R. CECIL, replying to a question by Mr. Pennefather as to the impression prevailing in many circles in Russia and Roumania that the Western Powers were contemplating a separate peace at the expense of Russia, said:—I am glad to have this opportunity of giving a categorical denial on behalf of his Majesty's Government to this imputation, which has been fostered by enemy agents in Russia in the hope of producing a discouraging effect upon our Eastern Allies. His Majesty's Government are determined to abide by their Russian Allies and to assist them in consolidating their new-found liberty. His Majesty's Government realise also the great debt which they owe to the Roumanian Government and army, and they fully appreciate the valiant resistance which our Roumanian Ally is offering in a period of exceptional difficulty and trial; the Roumanian people may rest assured that this country will not desert them in the present crisis.

The Allies and Bulgaria. Oct. 30.

Mr. NOEL BUXTON raised the question of advantage being taken of the present feeling in Austria and Bulgaria in order that an attempt might be made to detach these countries from their alliance with Germany.

Mr. BALFOUR, in the course of his reply, said:—

My hon. friend said it would be a great desideratum that Bulgaria at the end of the war should be left without a grievance. I should like every nation to be left at the end of the war without a grievance. But, after all, Bulgaria is in the field against us. Bulgaria is our enemy. Whether, if the affairs of this country had been better managed, she would have been our friend is another point. My hon. friend appears to hold that it was the blundering of the Allied Governments, perhaps even the blundering of my predecessor in office, which brought Bulgaria into the war. I cannot agree with that statement. I am not going to undertake the defence of Sir Edward Grey's foreign policy. I am not sure that I have the knowledge for it, and I think it had better be left to himself to do it when he thinks fit. He has always refrained from making any general survey of the important months and years in which he held the post of Foreign Secretary, and I believe he has refrained on the highest public grounds. He did not believe that any public service would be done—much the contrary—by raking up these ashes of controversy, and he probably felt that the case could not be made until the war was over, and until documents, authorities, and statements could be made with safety to his country and to the Allies, which could not be made in the course of the war. No doubt historians will occupy themselves with it, and I believe they will come to a different conclusion from that which commends itself to my hon. friend.

However that may be, whether diplomatic dexterity could or could not have kept Bulgaria out of the war, the fact is Bulgaria is in the war. She has deliberately determined to become the enemy of nations who certainly conceived she was bound to them by strong ties of gratitude and consideration. She has done it deliberately, and it is perfectly useless to criticise, to comment, still more to condemn, actions which I think have been most disastrous to the world, but which, in the opinion of Bulgarian statesmen at all events, however bad for other people, is good for Bulgaria. Nevertheless, I should also like to see Bulgaria and other nations come out of the war without grievance, because grievance is the source of new wars, and when we come out of this war I do not wish it to leave any cause, if it can be avoided, of new wars.

There are other people whom I wish to see come out of the war without a grievance—Serbia, Greece, Roumania are our Allies. They are fighting gallantly, they are undergoing great sacrifices for the common cause, in which my hon. friend believes as much as I do. They are fighting on the right side, even in my hon. friend's opinion. They are fighting on the side of light against darkness. Let them come out of the war without grievance. I am intensely desirous that some means may be found by which, when this war is over, the Balkan States should be able to live in amity with each other, and form together a force united against aggression from outside. All of them had their life crushed out of them under the oppressive heel of the Turk. Each one of them has fought the same battles for freedom, and, with European assistance always remember, have fought that battle successfully, have obtained independence, autonomy, and self-government, and have shown in almost every respect that they were not unworthy of it by the progress they have made in every civilised art. In one thing only—I do not at this moment apportion the blame anywhere—they have failed. United as one would think they might be by the common memory of the oppression from which they have escaped, they have never contrived to live in friendship with one another.

The whole of Balkan history is an unhappy history, because the Balkan States could not live in peace with one another. I have no desire dearer to my heart in connection with these regions than that this miserable state of things should somehow or other be brought to an end, and that nations that ought to be friends should be friends indeed. But we have not got to the point when that has become a matter of practical and immediate policy. We are in the midst of a war. In that war we have Allies to whom we are bound by every tie of loyalty; and therefore, much as I desire that Bulgaria may come out of the war without a grievance, that absence of grievance must not be bought by betraying those who have thrown everything they have into the Allied cause and are prepared to fight it out with us to the end.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. November	1917. October.		1336. Muharram.	5678. Heshvan.
2	20	Friday	17	17
3	21	Saturday.....	18	18
4	22	Sunday	19	19
5	23	Monday	20	20
6	24	Tuesday	21	21
7	25	Wednesday	22	22
8	26	Thursday.....	23	23

General Valleanu, of the Roumanian Army, has left London for Paris.

Sir Harcourt Butler has arrived in London, and is staying at the Carlton Hotel.

Colonel Caretas, of the Roumanian Army, left London on October 30 for France.

Professor A. Belitch, of the University at Belgrade, has arrived in London from Petrograd.

H.H. the Nizam of Hyderabad has given Lady Chelmsford a lakh of rupees for "Our Day" Fund.

Nine Germans and Austrians engaged in propaganda work in Greece have been arrested.

Brevet Colonel E. H. Boome, C.M.G., Indian Army, has been appointed temporary Brigadier-General whilst commanding a garrison.

Commander Oliver Locker-Lampson, M.P., R.N.V.R., had the honour of being received by the King at Buckingham Palace on October 27.

The Mohammedan celebration of the Mohurrum has passed off quietly, says Reuter's Bombay correspondent in a message dated October 28.

Rai Bahadur Sarupchand Hukamchand of Indore has given four lakhs of rupees to the Lady Hardinge Medical College for Women at Delhi.

King Alexander of Greece has conferred upon M. Gennadius, the Greek Minister in London, the Grand Commandership of the Order of the Saviour.

The Earl and Countess of Bessborough arrived at their residence in Cavendish Square on October 30 from Bessborough, Piltown, County Kilkenny.

Three classes of Greek Reservists belonging to motor and railway battalions and five classes of officers of Reserve for auxiliary service have been called to the colours.

M. Constantine Rentis, of the Greek Diplomatic Service, arrived in London from the Continent last week, and left last Tuesday for Stockholm, where he will act as Chargé d'Affaires.

M. Victor Antonescu, the Roumanian Minister in Paris, and Dr. Istrati, formerly a member of the Roumanian Cabinet, arrived in London on October 30 from the French capital.

M. Voislav Antonievitch, First Secretary to the Serbian Legation in London, has been appointed Chargé d'Affaires to the Serbian Legation in Rome, and will leave town in a few days.

The Countess of Yarborough, who is deeply interested in helping the Montenegrins interned in Austria-Hungary, has kindly consented to join the committee of the Montenegrin Red Cross and Relief Fund.

After refusing motions for a new trial of the case in which Gustav Jacobsen and three alleged co-conspirators were charged with fomenting rebellion in India from the United States (says Reuter's Chicago correspondent, in a message dated October 29), the Court to-day sentenced Jacobsen, Wehde, and Boehm, all Germans, to two years' imprisonment and a fine of $10,000 (£2,000) each, and Heramba Laloupta, a Hindu, to eighteen months' imprisonment and a fine of $200 (£40)

Before the African Society at King's College, Strand, to-day, at 4, Mr. J. M. MacLeod, British Consul at Fez, will lecture on "The Work of France in Morocco." The chair will be taken by Sir Harry Johnston.

M. Boerescu, First Secretary to the Roumanian Legation in London, who has been recuperating in the country for several weeks, left town on October 26 for Chenies, on a visit to the Marchioness of Blandford.

President Wilson has appealed to Americans again to contribute to the relief of Armenians and Syrians, whose situation, due to Turkish atrocities, is, he says, "so distressing as to make a special appeal to the sympathies of all."

The marriage arranged between Mr. Beaumont Albany Percival, C.M.S., eldest son of the late Mr. Theodore Percival, I.C.S., and Stella, youngest daughter of the Rev. W. C. Riland Bedford, of Cotswold, Leamington, will take place shortly at Gibraltar.

M. Victor Antonescu, the newly appointed Roumanian Minister in Paris, in presenting his credentials to the French President, expressed his firm conviction that Roumania, in spite of the trials she was undergoing at the moment, was ready to endure any sufferings and make any sacrifices.

Nurse Florence Piper, daughter of Mr. Robert Piper, J.P., of Oakwood, Worthing, has been decorated with the Serbian Cross of Mercy. Miss Piper was in Serbia with a nursing unit during the whole of 1915, and carried out her duties despite indescribable discomforts and dangers.

A large number of Serbian prisoners of war have succeeded in escaping from Germany. Many of them were taken during the campaign of 1915, and they give terrible reports of Austro-Hungarian barbarity in Serbia at that time. They assert that prisoners were killed *en masse*.

It is announced in the *London Gazette* that the following appointment has been made in India:—Commands.—To be a temporary Divisional Commander.—Maj.-Gen. Sir G. V. Kemball, K.C.M.G., C.B., D.S.O., British Service, vice Lt.-Gen. Sir F. J. Aylmer, V.C., K.C.B., British Service (June 1).

A telegram from Berlin (says the Copenhagen correspondent of the *Morning Post*) states that the German Emperor has invited the Sultan of Turkey to go to Berlin. At the Turkish Legation in Berlin it is thought that the invitation will be accepted, and all Germany is looking forward with interest to his visit.

Mr. Hughes-Buller, who has recently retired from the Indian Civil Service, in which he held the appointment of Inspector of Police, Bengal, has been appointed by the Secretary of the Ministry of National Service Civilian Director of Recruiting for the counties of Gloucester, Wiltshire, Dorset, Somerset, Devon and Cornwall.

Reuter's Simla correspondent states that, as the outcome of the recommendations of the Mesopotamia Commission and of subsequent discussions on conditions in the military hospitals in India, a small committee, of which Sir George Makins will be president, will inspect the hospitals for British troops in India and issue a report regarding them.

The Queen of Roumania has sent to the Mayor of Bath the following reply to the telegram sent to her on the occasion of the visit of M. Nicolas Misu:—"Profoundly touched by your manifestation of sympathy for me and my country. I beg you to receive my heartfelt thanks, and to express to your fellow-citizens my gratified appreciation of your kind message."

The Rev. H. Colin Walker, vicar of Christ Church, Warley, who has returned to his parish after twelve months as Chaplain to the Forces in Mesopotamia, states that great care has been taken with the soldiers' cemeteries in Mesopotamia. Crosses have been obtained from India, and though flowers are not obtainable, neatness, cleanliness, and order mark the last resting-places of our brave soldiers.

According to *The Times* correspondent at Athens, the *Hestia* announces that among the documents in the ciphered correspondence between King Constantine and his wife and Berlin, the key to which has lately been discovered, is a long telegram from Queen Sophie to the Kaiser recounting in detail the "victory" of King Constantine over the Anglo-French forces at Athens on December 1 and 2, and extolling the Germanophile sentiments of the Greek Government and nation. The tenor of the message is said to give the impression that it is a simple execution of orders received from Berlin. The *dossier* is also said to contain

TRAGEDY OF MONTENEGRO,

THE SMALLEST AND POOREST OF OUR ALLIES.

MONTENEGRIN RED CROSS

AND RELIEF FUND,

11, VICTORIA STREET, LONDON, S.W.1

(Registered in City of London. Section 1. War Charities 1916)

needs £700 WEEKLY for Feeding Prisoners interned in Austria-Hungary.

Donations will be much appreciated and gratefully acknowledged by the Hon. Treasurer, LADY ROPER PARKINGTON, Claridge's Hotel, Brook Street, London, W.1.

Digitized by Google

a series of telegrams from Berlin dealing in great detail with the organisation of irregular bands and their co-operation with Constantine's regular troops in a treacherous attack upon the Allies. It is expected that all the documents in this interesting correspondence will be laid before the Chamber either to-night or on Friday.

A telegram from Allahabad says that the Anglo-Indian Conference has passed a resolution expressing apprehension at the present policy of the Government of India in dealing with political agitators. Any movement for the expansion of self-government in India should, it is declared, recognise the interests of all the peoples of India, including Anglo-Indians.

The Union of Jugoslavs in Russia declares that the solution of the Jugoslav problem proposed in the Soviet's instructions to M. Skobeleff, who is to represent the Soviet at the Inter-Ally Conference in Paris, is inconsistent with the principles of democracy, and, in particular, with the principle of the right of peoples to control their own destiny.

APPOINTMENTS, PROMOTIONS, ETC.

Miralai H. G. A. Garcia Bey, D.S.O., Financial Secretary, Egyptian Army, has been granted the temporary rank of Lewa.

El Bimbashi S. McK. Saunders, Medical Corps, and El Bimbashi Hon. T. P. P. Butler, Artillery, have been promoted Kaimakams.

Lieut. J. D. Lawrence, Manchester Regiment, has been taken on the strength of the Egyptian Army as Special Service Officer, with the rank of Bimbashi, and posted to the Bahr El Ghazal district.

The following decorations were conferred on the occasion of the Bairam:—The Order of the Nile.—2nd Class.—El Lewa A. Cameron Pasha, Governor, Sennar Province; El Lewa R. C. R. Owen Pasha, C.M.G., Governor, Mongalla Province; El Lewa F. Burges Pasha, Police Magistrate, Khartoum. 3rd Class.—Mr. C. P. Browne, Governor, Berber Province; Mr. K. C. P. Struve, Governor, White Nile Province; Captain C. McKey, Director, Customs Department. 4th Class.—El Kaimakam P. G. W. Maynard Bey, Sudan Government; Mr. W. R. G. Bond, Sudan Government; Mr. R. Fawkes, Sudan Government; Mr. T. E. Fyers, Sudan Government; Mr. G. Warder, Sudan Government; Mr. H. F. King, Sudan Government.

OBITUARY.

News has been received of the death of Captain Maximovitch, of the Serbian Army, who was well known in London. He was drowned at Salonika.

Captain Arthur Gerald Brian, Duke of Cornwall's L.I., who died from wounds on October 16, was the youngest son of Mr. and Mrs. H. E. Brian, of Cairo, and of Holmbury, Berkhamsted, and was 22 years old.

Deputy-Surgeon-General John Davidge, late of the Army Medical Staff, whose death has occurred at Hove at the age of eighty-six years, served with the Bhutan Expedition of 1865-6 and with the Egyptian Expedition of 1882.

M. Georges Argyropoulo, Director of the Press Agency at Salonika, died at Geneva on October 16, aged thirty-three years. The deceased, who was a descendant of a very old Constantinople family, was a journalist by profession and an able writer.

Mr. Gustavus Barton-Groves, whose death has taken place at Paignton, entered the Postal Department of India in 1869, and after twenty-five years' service was appointed Deputy Postmaster-General for Rajputana. Appointed officiating Postmaster-General for Bombay, he subsequently went to Madras in the same capacity, and after twelve months' service was confirmed in that appointment.

Sub-Assistant Surgeon Benjamin Reuben, Mahrattas, is reported to have died at Aleppo, where he was a prisoner of war, after a severe and protracted illness. He was mentioned in General Townshend's despatch, published in the *London Gazette* of July 23, 1916, for conspicuous services in Mesopotamia.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

CAMPBELL.—On October 26, at the British Legation, Adis Abeba, Abyssinia, to Gerald and Margaret Campbell—a daughter.

CHENEVIX TRENCH.—On September 28, 1917, at Quetta, India, the wife of Major R. Chenevix Trench, Indian Political Dept., of a daughter.

MARRIAGE.

BURRARD—MUMM.—On October 26, at St. John's Church, Southwick Crescent, by the Rev. W. H. Spurrier, Vicar of Bibury, Glos., Captain Gerald Burrard, D.S.O., Royal Field Artillery, only son of Colonel Sir Sidney Burrard, K.C.S.I., F.R.S., and Lady Burrard, to Hilda Elizabeth, youngest daughter of Mr. and Mrs. R. J. Mumm, 82, Oxford Terrace, Hyde Park.

DEATHS.

BARTON-GROVES.—On October 24, at Melita, Paignton, Gustavus Barton-Groves, Postmaster-General, Madras (retired).

WARLOW.—On October 7, at Alexandria, Emily Rose, wife of the Venerable Archdeacon Warlow, after a very brief illness.

ROLL OF HONOUR.

BRIAN.—On October 16, of wounds, Arthur Gerald Brian, Capt., D. of Corn. L.I., dearly loved youngest son of Mr. and Mrs. H. E. Brian, of Cairo, Egypt, and of Holmbury, Berkhamsted, aged 22.

COOKE.—On September 8, 1917, accidentally killed in Alexandria, Egypt, while on active service with Queen Alexandra Imperial Nursing Service Reserve, Ella Kate, youngest daughter of the late Henry Cooke, of Grafton Road, Auckland, New Zealand.

If you are willing to help

THE SERBIAN ARMY

SEND YOUR DONATION FOR

THE SERBIAN RED CROSS

to the Serbian Legation in London, which is alone authorised to collect funds in Great Britain and the Dominions for the "Serbian Red Cross Society."

There is a separate fund for the

RELIEF OF THE DISTRESS OF THE

SERBIAN CIVIL POPULATION

at the disposal of the Serbian Minister, from which money is sent where it is most urgently needed. The address of the Serbian Legation is 195, Queen's Gate, S.W.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.

Open all the year round.

SEMIRAMIS HOTEL.

Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.

Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,

In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.

Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL

(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.

Full Pension, P.T.50; Room, P.T.20; Lunch, P.T.15; Dinner, P.T.20.

For long stay, apply to the Manager.

SUMMER PALACE HOTEL,

GLYMENOPOULO, RAMLEH.

This Hotel is situated near the Beach. Open all the Year. Bathing Cabins.

Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

FRIDAY, NOVEMBER 2, 1917.

BRITAIN AND MESOPOTAMIA.

The clearer appreciation of Germany's aims, particularly in the East, that the war has brought in its train has served to throw into strong relief the anomaly that, on the very eve of the outbreak, the British and German Governments should have concluded an agreement purporting to embody a solution of outstanding questions in Western Asia. As no official statement of the terms of that agreement has been published, it has been inferred—perhaps not unnaturally—that the compromise was more favourable to Germany than the British Government cared to admit. The fact that Great Britain abandoned the attitude of opposition to the Baghdad Railway which she had previously adopted seemed in itself, in the light of subsequent events, an unwarrantable concession, and in the absence of accurate knowledge of the *quid pro quo* that she received, there has been a tendency to impute to the Government of the day a culpable sacrifice of British interests. What purpose it was hoped to serve by refusing to reveal the full details of the negotiations is not apparent; but the reasons that held good for so long, we may now infer, are supposed to have lost some, if not all, their cogency; and, according to the fashion of the hour, semi-official light is vouchsafed, albeit tardily, on a question of paramount interest. There can hardly be any other explanation of an illuminating article, entitled "The Baghdad Railway," in the current issue of the *Quarterly Review*. The writer claims as his main object "a scrupulously fair and impartial statement, so far as available information permits, of the Baghdad Railway negotiations which took place in London in the years preceding the war." In fulfilling his task it is evident that he has been particularly fortunate in the information that he has found available. It has enabled him not only to present a narrative, complete for all practical purposes, but also, as we shall endeavour to show, to inspire the British public with some grounds for confidence in the future handling by the Government of the Mesopotamian problem.

Dividing the history of railway development in Turkey into three stages, the writer shows how, in the first period before 1888, railway construction in Asia Minor, which was entirely in British hands, rested on a commercial basis, being confined to lines that had a reasonable prospect of proving remunerative undertakings. This cautious policy did not cover the whole of what were regarded as the requirements of the country, and when British financiers refused to abandon it Germany stepped into the arena. The first concession she obtained was for the line to Angora; in 1893 the extension to Konia was secured. As the prospects of the Smyrna-Aidin Railway were likely to be affected by the latter line, the British Government proposed that the several interests involved should be examined and, if possible, reconciled. This suggestion was at once parried by Germany with a threat to thwart British plans in Egypt, and although representations in Berlin caused the Germans to modify their Egyptian attitude, the extension to Konia was granted. At this time the view was largely held in Great Britain that the refusal to allow an increase in the Turkish Customs duties would effectively prevent the extension of the Anatolian Railway to Baghdad. Even when, in 1899, as a result of the German Emperor's visit to Constantinople in the previous year, an agreement between Turkey and Germany determined the actual route of the Baghdad line, this disbelief in the railway materialising was maintained, although Great Britain took steps to affirm her long-standing interests in the Persian Gulf and her determination to resist encroachment in that direction. Four years later the Baghdad Railway Convention was signed, and it became evident that Germany was prepared to carry through the project whether the British Government acquiesced in it or not. In the opinion of the writer of the article, the chance of Germany accepting any terms for British co-operation that would have been acceptable to Great Britain was by this time remote. As the event proved, the failure to come to an agreement was fortunate. It prevented the line from being finished when war broke out in 1914. Financial difficulties had supervened, and the rate of construction was slow; but Germany's hold on the railway and, consequently, the danger to British interests at the head of the Persian Gulf, had taken more definite shape. Further, the position of the British and French Governments was weakened by Russia's action in having "somewhat precipitately squared accounts with Germany" regarding the railway in the Potsdam Agreement of 1911. It was, then, in these circumstances, according to the same authority, that the British Government sought to make the best of a bad job. "The immediate problem was to render the Baghdad Railway, not, indeed, free of menace to British interests—for this immunity could not have been secured at that late stage by negotiators, however capable—but as innocuous as possible before the enterprise had been brought single-handed to a practical completion, when the German attitude would undoubtedly have hardened, and less favourable terms could have been obtained."

The effect of the agreement, according to the writer in the *Quarterly Review*, whose summary of the terms are reproduced on another page, was to secure recognition of Great Britain's paramount position in the Persian Gulf, and to confirm her in her privileges of navigation on the Tigris and Euphrates. The Baghdad Railway was to run to Busreh, there were to be two British directors on the Board, and the construction and exploitation of ports at Busreh and Baghdad were to be entrusted to a separate company, in which British interests were to have a 40 per cent. participation. It is not necessary here to inquire whether Germany, with the consciousness of the imminence of war, affected more generosity than she intended to display in practice. What is of interest is that Great Britain, after having failed for so long to give adequate consideration to British interests in Mesopotamia, should at the eleventh hour have shown sufficient knowledge and appreciation of the position to insist upon the terms ultimately granted to her. The war has thrown the Baghdad Railway scheme into the melting pot; for the main objective has passed out of the hands of the parties to the Convention of 1903, and the line, if it is to be completed, must rely upon a fresh agreement. But the abortive negotiations with Germany and Turkey gave Great Britain navigation concessions on the Euphrates as far as the Aleppo meridian and on the Tigris up to Mosul. The mention of these places indicates the extent of what ought to be the British sphere of interest in Mesopotamia. With Germany in the strong position that she occupied in 1914, it was not possible to obtain more than navigation concessions on the waterways of this area. Now Great Britain has the opportunity of reaping more fully where she has sown. "It is the simple truth," we are told, "that the commercial prosperity of Baghdad and Busreh during the past three centuries, and their whole maritime trade, were built up and maintained through British enterprise and sacrifice." Whatever is claimed now is in trust for the Arabs; but we should see to it that the future of the country is in no way handicapped by failure to secure control of sufficient territory to provide for its development on a large scale.

JUSTICE IN INDIA AND EGYPT.

By COLES PASHA.

It is so many years since I left India that I am unable to say whether the complete separation of judicial and administrative functions is still a plank in the Indian Reformer's platform. I know that at one time it was a hardy annual, and no Congress assembled without the proposal being put forward in one form or another. Possibly seeing self-government within reach the Indian Nationalist has for the moment ceased to trouble himself about such a minor detail as the reform of the Judiciary. However, with so many schemes in the air, I am sure that it will not be long before we shall again hear how impossible it is to expect impartial justice from an official who is also charged with other administrative duties, and the complete separation of the two services will be once more urged.

During the whole of my forty years' service in the East I have been closely connected with the administration of justice, first in India where the magistrates are also Revenue officials, and subsequently in Egypt, where the Judiciary is an entirely separate body. I have thus had a unique experience of the working of the two systems. The conclusions I have arrived at may be, therefore, not without interest, especially at the present time, when, apart from any change contemplated in India, the Protectorate having been declared in Egypt, a revision of the Codes is also under consideration.

To those unacquainted with the Indian system it may be as well to explain, before proceeding further, that it is the administration of justice on the criminal and not on the civil side I propose to discuss. Judges and subordinate judges on the civil side have nothing to do with the general administration in India, at least not in the Bombay Presidency, where I was serving. Similarly a Sessions Judge, to whom an appeal lies in all but petty criminal cases, has no administrative duties outside his own Court. He is responsible to the High Court (Court of Appeal), by whom alone his decisions can be reversed or revised. It is only in disposing of the lesser misdemeanours that we find the administrative Official sitting in judgment as a magistrate. To an ordinary Englishman the idea of the same official supervising the collection of revenue and also having the power to inflict punishment for offences committed is undoubtedly repugnant. Hence the Indian Nationalist, agitating to stop this so-called abuse, met with considerable support from our Home Legislators, even when I left India years ago, and it says a good deal for the proved efficacy of the system that it has continued so long. Needless to say, too, that the Indian authorities were not without reason when they deliberately adopted the system, and drafted the Code of Criminal Procedure some fifty years ago.

Let us see who are the executive officers who exercise these judicial duties. They are called Collectors and Assistant Collectors, but in reality they are Governors and Deputy Governors of provinces with populations running into hundreds of thousands. They, in fact, took the place of native administrators, who prior to English rule collected revenue and dispensed justice as best they could. The India Government of the day came to the conclusion that it was better to graft than uproot, and the administration of justice in India for the past half-century has demonstrated how sound was the decision arrived at.

From a public security point of view, the most important chapters of the Indian Code are those relating to police investigation and preliminary inquiry by magistrates. Although the police as a body are under the orders of an English Superintendent, he in turn is subordinate to the Collector, who is also the chief magistrate of the Province. Every offence has to be reported by the police to a magistrate, who either disposes of the case himself or commits for trial to a superior court. Once reported, the police take their instructions from the magistrate having jurisdiction, local or divisional, as the case may be. It is to these magistrates, Governors and Deputy-Governors, that the native population looks for justice, and their prestige is enhanced accordingly, no small asset in the general administration of an Eastern country.

In 1882 we found exactly the same problem confronting us in Egypt. How was justice to be introduced where the Mudir (native Governor) and his "kourbash" had reigned supreme for so many generations? Following the Indian precedent, one would imagine that the Indian Codes, backed by a few Indian officials, were all that was required. Unfortunately, the solution of the problem was complicated by the fact that a few years previously the "Mixed Tribunals" and the French Codes had been established to deal with civil questions arising between Egyptians and Europeans, also between Europeans of different nationalities. Nubar Pasha had been largely responsible for the introduction of these Tribunals, and being once more Prime Minister he persuaded Lord Cromer (Sir E. Baring he then was) that all that was required was to translate these French Codes into Arabic and promulgate them as the law to be administered by the newly-created Native Tribunals. Sir B. Maxwell was sent from England as Judicial Adviser, and Mr. Clifford Lloyd came to the Interior as Inspector-General of Reforms.

I do not think that Sir B. Maxwell had any experience of the working of the French Codes, but he was too good a barrister not to speak to his brief. Mr. Clifford Lloyd, who came straight from Ireland, where he had done excellent service as a resident magistrate, at once started to reorganise the police on Irish lines, and endeavoured to rehabilitate the Mudirs with some magisterial powers. The situation very soon became impossible; both Sir B. Maxwell and Mr. Clifford Lloyd left Egypt, and returning to England fought out their official quarrel in the columns of *The Times*.

That Mr. Clifford Lloyd was in the right may be gleaned from the fact that special Courts had to be established to suppress brigandage, and for thirty-five years H.B.M.'s Consul-General in Egypt has been writing reports explaining the reforms introduced by the Judicial Advisers, who have followed Sir B. Maxwell. There has also been an annual apology for the unsatisfactory state of public security.[1] All the changes introduced by the several Judicial Advisers need not here be recapitulated. It will suffice to say that should Nubar Pasha revisit Egypt in the flesh he would not recognise the existing Law as the Codes he fathered in 1882!

In the matter of granting magisterial powers to administrative officers the Egyptian Ministry of Justice has, however, remained obdurate, and steadily refused to countenance any proposal of the kind; neither has there been any change in the Parquet system except that the Parquet has now also the powers of a Committing Magistrate, a prerogative never contemplated in the original French Code. But I propose to discuss this Parquet system later.

As stated, to give in detail all the reforms introduced by the various Judicial Advisers during the past thirty-five years can serve no useful purpose, but I think it is of interest to compare the Tribunals existing in Egypt at the present time with corresponding Courts

(1) 1913, murders, 813; attempted murders, 601; robberies, 428; other crimes, 2,254. In addition, misdemeanours and petty contraventions.

in India. To make the comparison complete I have added a column showing how the Tribunals in Egypt were originally constituted in 1882.

India.	*Egypt* (1917).	*Egypt* (1883).
I. High Court. (In each Presidency). Powers of appeal and revision.	I. No appeal. (Cassation only.)	I. Court of Appeal. (Sitting in Cairo.)
II. Sessions Court. (Single Judge with assessors). Any punishment.	II. Assize Court, (Three Appeal Judges, on circuit from Cairo.) Any punishment.	II. Crime Tribunal. (Three Judges.) Any punishment.
III. Magistrate. (2) 1st class (Single magistrate.) Two years or fine or both. (1) Power to commit to Sessions Court.	III. Summary Judge. (Single Judge.) Two years or fine or both.	III. Delit Tribunal. (Three Judges.) Three years or fine or both.
IV. Magistrate. (2) 2nd class. (Single magistrate.) Six months or fine, or both.	IV. Merkaz Court. (Single Judge.) On circuit in cities only. Seven days or £1 fine, or both.	IV. Contravention Tribunal. (Single Judge.) Seven days or £1 fine, or both.
V. Magistrate. (2) 3rd class. (Single magistrate.) Three months or £5 fine, or both.	V. Cantonal Court. (Bench of Village Head Men.) Twenty-four hours or 5s., or both.	V. None.

(1) Power to commit for trial in Egypt formerly exercised by Juge d'Instruction now granted to the Parquet.
(2) These magistrates also exercise administrative duties.

NEAR EAST BOOKSHELF.

THE GROWTH AND DECAY OF THE TURKISH EMPIRE.*

A popular history of the Turks is a timely publication to-day, and Lord Eversley's new work on "The Turkish Empire," written as it is with his usual ability and charm, should have a wide circulation. Lord Eversley writes with the mature knowledge of a lifelong interest in Turkey, and is able to describe many events in the past sixty years with the authority of one who knows the land and the people, and is personally acquainted with many of the leading political personages. He has availed himself of much new historical material which has come to light since the publication of Creasy's classical work, and his conclusions will have wide acceptance among those who know Turkey and its inhabitants. His narrative gives an unbiassed account of the greatness of those early rulers who built up the Empire, while by no means glossing over their cruelty, treachery, and sensuality. Our pro-Turk attitude of the days of Beaconsfield seems hardly believable to-day after we have experienced the faithlessness and savagery of Abdul Hamid, and yet this history clearly demonstrates that, with regard to cold-blooded massacre and brutality, the "great assassin" was but the survival unto our day of an average member of a family of rulers impregnated with ideals of brute force and reckless disregard of individual freedom and human life. Even the greatest of the Turkish Sovereigns, "Solyman the Magnificent," murdered his own sons in cold blood, executed from mere caprice his Viziers, who had served him with devotion; massacred in tens of thousands the hapless inhabitants of conquered provinces, and by the introduction of venality and corruption—and the influence of the harem—into his public appointments sowed the seeds of the later decay of the Empire. "The harem was the centre from which corruption spread throughout the Turkish Empire."

There are no contemporary Turkish histories of the early Ottoman Sultans, and the traditions are unreliable, but it is clear, as the author points out, that even from the first the Ottoman Turks, ethnologically, had but a minor share in the making and upkeep of the Empire. The original Nomad Turks were a very small tribe, who, flying before the Mongols, settled among their kinsmen, the Seljukian Turks, in Western Asia Minor, where they first adopted Islam and imposed their language upon the people. As their domination rapidly extended they absorbed many thousands of Greeks and Slavs, who adopted Islam "because they were abandoned by their natural protectors, the Greeks of Constantinople." This mixed race, of which the Ottoman Turks are but a nucleus, called themselves "Osmanlis," and used the term "Turk" as one of contempt for their inferior neighbours. In the Royal house there can be now little indeed of Turkish blood when for centuries the mothers of future Sultans have been beautiful captives or slaves—Greeks, Armenians, Slavs, Italians, or Russians. It has indeed been suggested that possibly the Turkish descent was entirely broken with Selem II. The greater number of the Ottoman Generals who distinguished themselves in the early days of conquest were not of Turkish race, but were Greeks, Albanians, Slavs, and Italians who had embraced Islam, while almost all the commanders and the crews of the Ottoman Navy were Greeks. The most effective corps in the Ottoman Army in the days of the Empire's greatness was formed exclusively of the sons of Christian parents in the Balkans, conscripted at an early age, and forcibly converted to Islam. Even after the destruction of these Janissaries the best fighting stock was non-Turkish—from the Balkans and Albania in particular. The Empire to-day is in the hands of leaders of whom hardly one can claim to be a pure-blood Turk. Thus Enver is a renegade Pole, Djavid belongs to the strange sect of Dummeh Jews, Talaat is of Bulgarian gipsy blood, Ahmed Riza is half Magyar and half Circassian, Carasso is a Spanish Jew, and the military leaders are largely German and Austrian. It is impossible to look upon the "Turks" as a nation as we consider nationality to-day.

The author also calls attention to the often-overlooked fact that "there is nothing to show that the Ottoman soldiers were animated by any religious zeal in their campaigns in Europe." Their conquests are in this respect quite different from those of the early Arab followers of Mohammed. For the Turks it was the hope of the plunder of conquered cities, of men for slaves and women for the harem, and the "confiscation of land and its distribution among the soldiers as a reward of bravery" which inspired their conquests. Indeed, all through the centuries the Turk appears to have been but a poor exponent of Islam, and it is a vain mistake to confuse the religious veneer of this corrupt people with the religion of the Prophet of Arabia. Drunkenness and gross debauchery, quite inconsistent with the teaching of the Koran, have again and again disgraced the Ottoman rulers, and Islam has never been more badly represented than by those who have held rule in Constantinople. To-day there seems to be little attempt at any but a most perfunctory acquiescence.

Even more remarkable than the rise of the Empire has been the slowness of its decay. Chances of improvement have been given again and again, but in vain. Propped up by the European nations, through their mutual jealousies, when every sign of rapid disintegration were present, it has held together in spite of its atrocious misgovernment. England to-day can hardly look back with pride on the part she has taken in the past out of self-interest and the fear of Russia in hindering the natural consequences of national decay. Those who read the pages of this history will fully endorse the calm and philosophic conclusion of the author.

"Whatever the future may have in store. . . . there is one certain moral to be drawn from the story which has been told in these pages, namely, that an empire originally founded on the predatory instincts of an alien military caste, and whose rulers during the last four hundred years have never recognised that they have any responsibility for the good government and well-being of the races subject to them, could not, if there be any law of human progress in the world, be permanent, and was destined ultimately to perish by the sword."

It only remains to add that the value of the book is increased by an interesting medallion portrait of Mohammed the Conqueror, a genealogy of the Ottoman Sultans, and three coloured maps. These last show in a graphic manner the varying boundaries of the Turkish Empire and neighbouring States, but would be more valuable to the general reader if they were more fully supplied with the names of places mentioned in the history, particularly in the accounts of the various campaigns.

THE PRESS ON THE NEAR EAST.

The Baghdad Railway.

The current issue of the *Quarterly Review*, which contains several articles of special interest to readers of THE NEAR EAST, includes an important statement on the Baghdad Railway. Relying evidently on inside information, the writer gives the course of the negotiations in London before the outbreak of the war, and his version of the agreements between Great Britain and Turkey and between Germany and Great Britain, which were concluded, but not ratified, leaves a very different impression from that which the previous silence of the British Government on the subject had created. The course of the negotiations is thus set forth:—

In the late summer of 1912 they (the British Government) appear to have withdrawn their request for British participation in the Gulf sections of the Baghdad Railway, and intimated their readiness to assent to the Customs increase on condition that British interests should be safeguarded by a satisfactory agreement on the following points:—(1) A complete adjustment was to be reached defining the respective interests of Great Britain and Turkey in the neighbourhood of the Persian Gulf. (2) Turkey was to recognise the right of Great Britain to undertake, in the future as in the past, the duty of lighting, buoying and policing the Persian Gulf. (3) The terminus of the Baghdad Railway was to be at Busreh, and no railway was to be continued beyond Busreh in the direction of the Persian Gulf without the consent of the British Government. (4) There was to be a settlement of the long-standing difficulties concerning the navigation of the Shatt-el-Arab and the future control of the port of Busreh. (5) A final settlement was to be concluded in regard to the Turco-Persian frontier. (6) The time-honoured British rights of navigation on the rivers of Mesopotamia were to be confirmed and extended. (7) Differential treatment on all railways in Asiatic Turkey was to be precluded by express treaty stipulation. (8) Two British representatives, agreeable to the British Government, were to be admitted to the Board of the Baghdad Railway Company.

Hakki Pasha arrived in London to negotiate on this basis early in 1913. Rapid progress was made in the ensuing months, and, when the negotiations had reached an advanced stage, Turkey intimated that she wished to obtain our assent to the creation of further sources of revenue, in the shape of consumption taxes and municipal *octroi* dues. The British Government agreed to extend the basis of negotiation as desired, provided that various outstanding questions, in which our interests were closely involved, were simultaneously settled. These included the ratification of the Aden boundary agreement of 1905; the regularisation of the legal position of British institutions (religious, educational and medical) in Turkey; the acceptance of the general principle that all irrigation works in Mesopotamia, other than the very considerable sections for which British firms alone had already tendered, should be put up to open tender; the reduction of the Turkish light dues levied upon shipping; a settlement in regard to the oil concessions of the provinces of Mosul and Baghdad, in certain fields in the caza of Ajloun (south of Lake Tiberias), and in the Farsan Archipelago, the settlement, by arbitration, of a large number of British pecuniary claims; the removal of the Turkish veto on the borrowing powers of Egypt; and, finally, the prolongation from 1950 to 1999 of the concession of the Smyrna-Aidin Railway, together with the grant of extensions of the line (amounting in all to 200 miles), and of rights of navigation on Lakes Eghirdir and Beyshehir.

Details of the Agreement.

The following is the version given of the agreement between Great Britain and Turkey:—

The British definition of the *status quo* in the Persian Gulf was accepted in all essential details; and Turkey agreed in substance to all the other points laid down by the British Government in 1912, as enumerated above. She abandoned her pretensions to suzerainty over the Peninsula of El Katr and adjacent regions. Great Britain recognised the nominal suzerainty of the Porte over Koweit, which, with the adjacent territory and islands claimed by the Sheikh, was to be an autonomous kaza of the Ottoman Empire; and Turkey undertook not to interfere with the internal affairs of the Sheikh and his subjects, and to recognise the validity of the conventions concluded by the Sheikh with the British Government, giving us, *inter alia*, control of his foreign relations, and preventing him from alienating any portion of his territory without our consent.

* * * *

It appears that we agreed to a Turkish agent residing at Koweit. Although the agent was expressly debarred from any intervention other than the protection of the interests of Ottoman subjects from other parts of the Empire, the arrangement was, we apprehend, but too likely to give rise to local friction. On the other hand, provision was made to secure both the Sheikh of Koweit and his friend, the Sheikh of Mohammerah, in the undisturbed enjoyment of their valuable date properties on the Turkish bank of the Shatt-el-Arab. Generally speaking, the Koweit settlement appears to have been satisfactory.

* * * *

With regard to the Shatt-el-Arab, Turkey agreed to the institution of a Riverain Commission with the Turkish façade and British control. The Commission was to be empowered to levy dues on all vessels entering the river; but this, in view of the Capitulations, could only be done by agreement with the Powers concerned, and it was one of the points necessarily dealt with in direct negotiation between England and Germany.

* * * *

By the settlement the whole control of navigation, including the requisite measures of river conservancy, which were specially desirable in view of the wasteful irrigation methods of the Arabs, was to be placed in British hands. The existing British navigation company was to be confirmed in the privileges which it had enjoyed, including the right to fly the British flag. A new Turkish company was to be formed, under the Chairmanship of Lord Inchcape, to take over the existing Turkish navigation company, with power to add indefinitely to its fleet of vessels. Fifty per cent. of the share capital in the new Turkish company, with a casting vote, was to be British. The remainder of the capital was to be subscribed by the Turkish Government, without power of alienation, except as regards 20 per cent., which was to be transferred to the Germans in consideration of the immediate surrender by the latter of their irrigation rights under the Baghdad Railway Convention of 1903, and of their agreement to British participation in the construction of the ports of Baghdad and Busreh.

* * * *

The Negotiations with Germany.

So much for the arrangements with Turkey. They were, of necessity, followed by negotiations between London and Berlin. These negotiations, which began in May, 1913, reached a conclusion in June, 1914. The substance of the arrangements arrived at was as follows: Great Britain undertook not to oppose the Baghdad Railway system, which was carefully defined. Germany undertook not to oppose British control of the navigation of Mesopotamian rivers. Germany and Great Britain both undertook to use their best endeavours to secure the due execution of an arrangement between the Baghdad Railway Company and the Porte providing that the terminus of the line should be at Busreh, that there should be two British Directors on the Baghdad Railway, and that the construction and exploitation of ports at Baghdad and Busreh should be carried out by a separate company. British interests were to have a 40 per cent. participation in this company. Both Governments undertook to prevent any discrimination in treatment on the railway or waterways of Asiatic Turkey. The German Government bound themselves in no circumstances, except by agreement with Great Britain, to support the establishment of any port or railway terminus on the Persian Gulf. They also recognised, by agreeing to the levy, by the proposed Riverain Commission, of dues on German ships, the special position of Great Britain on the Shatt-el-Arab. The British Government bound themselves not to support the establishment of any railway in direct competition with the Baghdad Railway. A line from Egypt to the Gulf, and lines as feeders for the river navigation, were expressly stated not to be in direct competition.

A Story of Brigandage.

Mr. F. G. Templer tells a wonderful story in *Blackwood's Magazine* of an outbreak of brigandage in Cyprus some thirty years ago. The chief culprits were three brothers, and not the least remarkable feature of the story is that the elder had ended his career and had served some years of his sentence of

EDUCATIONAL.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa; and on Oriental and African Religions and Customs.

THE SCHOOL RE-OPENED ON OCTOBER 1.

For particulars, apply to E. DENISON ROSS, Director.

ROYAL SCHOOL
FOR
Daughters of Officers of the Army.

Patrons:
Their MAJESTIES THE KING AND QUEEN
and HER MAJESTY QUEEN ALEXANDRA.
Chairman: LT.-COL. A. GRUBB, J.P.
Vice-Chairman: SURGEON-GEN. SIR WILLIAM TAYLOR, K.C.B.

Daughters of Officers of the Army are admitted to the above Schools according to the circumstances of their parents, at rates of £20, £45, £65, and £80 a year. Granddaughters of Officers are admitted at £45, £65, and £80 a year according to circumstances, and a limited number of daughters of civilians are admitted at £120 a year when there are vacancies. There are 15 Scholarships, open to competition, in the School, of amounts varying from £10 to £20 up to one of £50.

As half of the School consists of pupils on the £15 foundation, which includes both board and education, a deficiency of about £2,500 a year has to be met by contributions, which are earnestly solicited. Donations of £5 5s., giving one vote for life, or subscriptions of 10s. 6d., giving one vote for the year, may be sent to

F. W. T. ATTREE, COLONEL (late R.E.), Secretary.

Office: Panton House, 25, Haymarket, S.W.1.

penal servitude for life before his brothers took to the hills. The trouble that the police had to contend with was the unwillingness of the peasantry to give information against the outlaws. That is generally the experience of all countries where brigandage has been rife. It was the case in Bulgaria, when the steps finally taken in Cyprus were also adopted; but with this difference, that when the last band was tracked to the village that befriended it and to the inn that was its chief rendezvous, the house was surrounded and all the inmates, brigands, innkeeper, family, and guests were summarily lined up against the wall and shot. After that brigandage became unpopular in Bulgaria. In Cyprus the lines on which the authorities proceeded were to give instructions to the police to report any man who was merely suspected of having aided or harboured the fugitives, and upon such report alone the man and his family were liable to be deported to the fortress of Famagusta. Here is the story of the first brigand's last encounter, which ultimately led to his surrender:—

When they went down and saw the body, it was clear what had happened. The two shots that had been heard just as it was getting dark, had been fired by Hassan and Abdullah. Hassan had perhaps got his shot in a fraction of a moment before the other fired, with the result that he had killed his man, but not without receiving the shot of Abdullah, which wounded him grievously in the left hand, raised as it was in the act of shooting, and thus protecting his face. It was found from the traces of blood that when they both fired they were about fourteen or fifteen yards apart. Abdullah must have died at once, while Hassan had evidently received a serious wound, as there was a quantity of blood all round the spot where he stood when he fired. He got clear away, and a long time elapsed before the extent of his injuries became known, but it is not too much to say that those wounds were the cause of his ultimate capture. . . . Abdullah died in the attempt, but was successful in this, that Hassan was crippled. Although he stuffed up his wounds with moss, etc., it was not long before gangrene supervened, and the tortures he endured induced him to lie up all he could. After some months of suffering, being all the time closely hunted by the police, he surrendered to them, and some of his fingers had to be amputated. He was put upon his trial for the murder of Abdullah, was convicted, and sentenced to death; but it was felt that, after all, Abdullah was out to kill him, and under the circumstances the death sentence was respited to one of *travaux forcés* or imprisonment for life.

THE LATE LADY MEADE.

[From a Correspondent.]

The death of Lady Meade, which was recorded in the Near East last week, removes one of a generation fast passing away. Born in India in 1833, she returned there in 1851, and was married, a couple of years later, to Captain, afterwards General, Sir Richard Meade, a distinguished soldier, political officer, and administrator. Lady Meade was a Miss Malcolm, a daughter of Colonel Duncan Malcolm, who died at a comparatively early age, as Resident at Baroda, a post held in after years by Lady Meade's husband and eldest son. The Malcolms, at the time she was born at the Residency, Hyderabad, were well known throughout India, where her great-uncle, General Sir John Malcolm, had greatly distinguished himself as a soldier, diplomatist and writer. He had been Governor of Bombay shortly before Lady Meade was born, and her father would probably have gone high, if his life had been spared. Lady Meade was with her husband during the outbreak of the Mutiny, when they escaped, with their young children, with much difficulty, and were in great danger. They were accompanied by Captain (afterwards Sir John) Murray and the late Lady Murray, who was Lady Meade's sister. Both ladies received the thanks of the Government of India, after the suppression of the Mutiny, for their behaviour and calm courage, which was considered to have delayed the outbreak for some days.

Sir Richard Meade afterwards held various important posts at the Courts of Gwalior, Indore, Mysore, Baroda, and Hyderabad, to all of which he was accompanied by his wife, except Baroda, where she was prevented from going. As the wife of the Resident of these places she won the affection of a great many friends, who remained constant to her long after they had all left India for good. Lady Meade was essentially one of those who are now described as "Mid-Victorian," and she was throughout a model wife and mother; but she always took the lead wherever she was and her charm as a hostess and head of a large establishment aided her husband in the success of his life. Besides being gifted with great courage in times of danger, Lady Meade was an ardent and loyal friend to those whom she loved and liked. She never forgot a friend, and it may be said of her that she was "Sans peur and sans réproche." Throughout her life she was a sincere Christian, and was devoted to the Established Church of England. Till very recently she never missed a service at her favourite church, St. Luke's, Redcliff Square, and it was befitting that a part of the funeral service was performed there by the Vicar, who knew her so well, and for whom she had such a regard.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The Chancellor of the Exchequer, in bringing in the new Vote of Credit for £400,000,000 in the House of Commons on Tuesday, stated that it would last until January, and that another vote would be necessary before the end of the session. Since the beginning of the year the daily outlay has amounted on the average to £6,648,000, or £1,237,000 above the estimate—a figure including recoverable amounts equivalent to £1,000,000 a day. This is to be largely attributed to an excess in the expenditure on the Army and Navy of £590,000 daily. During the remainder of the financial year the increased pay to the Army and Navy will have to be taken into account, so that the final returns will probably be even less favourable. The Chancellor has decided not to introduce an interim Budget, a decision which will be welcomed in trade circles since too frequent changes in taxation tend to have an unduly unsettling effect. It is also very evident that it is too late in the year for additional taxation to have any great influence.

***

As to the future, it seems only too probable that the next Budget will see increases in both direct and indirect taxation. While it might be too much to say that this will be popular, it is certain that there is no better method of dealing with the financial situation than meeting the maximum amount of expenditure out of current income. The national bill, it will be noted, has now reached £5,000,000,000, and the Chancellor explained that, deducting from this sum advances to the Allies and the Dominions, the gift of the Indian Government, and the amount of the National Debt before the war, our total war indebtedness is £3,000,000,000. In this connection he gave an interesting comparison with Germany's war finances. So far Votes of Credit have been passed in the Reichstag for £4,700,000,000. This sum, however, does not include advances to allies or such things as separation allowances, and he pointed out that, leaving these items out of account, the £4,700,000,000 represents additional war debt, since Germany has never raised by taxation any part of the war expenditure. So that Germany's position is just as unfavourable as ours is satisfactory in the circumstances. It is to be hoped that Turkey and the other allies of Germany, whose credit stands on little more than her word, will give these figures their careful consideration.

***

Elsewhere will be found particulars of a provisional agreement entered into by the Hain Steamship Company for the sale of its shares to the Peninsular and Oriental Steam Navigation Company at £80 per £10 share. The Hain Steamship Company has an issued capital of £499,570, and its fleet consists of twenty-seven cargo steamers of a gross tonnage of 108,787. During its short existence the company has enjoyed exceptional prosperity owing very largely, of course, to the conditions arising out of the war; and its last two yearly dividends have been at the rate of 35 per cent. The amount involved in the proposed purchase is naturally, therefore, very high, working out at an average of about £37 per ton.

***

Reference was made in the recent report of the Central Economic Board of the Sudan Government to the fact that the exports of livestock to Egypt were less than usual during the past year, chiefly because that country was using up its own resources. Present conditions are no doubt a sufficient excuse for this, but it is all the same greatly to be regretted, for the cattle-breeding industry in Egypt has declined ever since 1912, and this action cannot but result in the end in making the country more dependent on outside sources, and that, too, at a time when world supplies will be at a low ebb. Fortunately there will be the Sudan to fall back upon, but while there is every reason to think that the supplies from that source will be equal to the demand, it is to be hoped for many reasons that no efforts will be spared after the war to make Egypt as self-supporting as possible as regards this commodity.

***

The optimistic forecast of future Russo-Indian trade relations given by M. de Nabokoff and Baron Heyking at a meeting of the East Indian Association this week finds ample confirmation in the report of the two trade commissioners who were deputed in July, 1916, by the Government of India, at the instance of the Madras Chamber of Commerce to Russia, to promote direct commercial relations between Southern India and that country. Before the war tea was India's chief export to Russia, but it is their view that as our Eastern Ally develops there will be a growing demand for raw materials such as jute, oil seeds, tanning materials and rubber, which India can supply. Rice was in constantly greater demand in Russia before the war, and, as a matter of fact, the imports increased in the last fifteen years by 150 per cent. In the supply of this commodity Persia has been a strong competitor, but most of Russia's rice came from Rangoon, *of course, viâ Germany.*

***

At the time that war broke out Russia was importing about 1,000,000 hundredweight of jute annually, and the commissioners are of the opinion that the market for this product will continue to expand. It is believed, however, that Indian cotton will be in small demand, as the mills in the centre of the Russian textile industry use American cotton or cotton from Russian Central Asia, while short-stapled cotton, if required, is principally obtained from Persia and the Caucasus. There is likely to be an occasional demand for the better Indian cottons for mixing with the American product when the price of that commodity is high. Copra and beeswax offer more hopeful prospects for Indian trade. Russian imports of copra doubled in the last fifteen years, and of these imports a third came from India. Before the war beeswax was imported to the value of £600,000 annually. Most of it came from Germany, that country, as usual, collecting the material from India and elsewhere. In fact, Germany habitually acted as middleman between Russia and India, and the growth of direct trade relations between the two countries would be a very serious blow for her.

***

Suggestions have been made in various quarters that the Allies should utilise the economic weapon they possess in the control of the greater part of the world's sources of raw material to force Germany to accept their terms by the threat of excluding her from their markets for a period which would be automatically increased in proportion to the time her resistance was continued after the formal notification. That there is much to be said for this policy seems clear from the fact that its mere discussion has not been without its effect on the enemy. The business classes in Germany appear greatly alarmed at the prospect; so much so, indeed, that they have inaugurated a "no annexation" movement with the intention of impressing on their Government the fatal results that would accrue to the country were a commercial war to follow the ending of the struggle.

***

No very great effort of imagination is required to realise how pitiable would be Germany's plight were she to be cut off from external sources of raw materials. During the war the curtailment of her supplies has been comparatively slow in its effect because the struggle was prepared for and immense reserves secured. Were the war to end to-morrow, however, Germany would be lacking in many of the most essential raw materials—cotton, for instance, for which she depends on Egypt, India, and the United States, and the shortage of which is now a source of even greater trouble to her than the question of food. It is only necessary to mention oil, coffee, rubber, and wool as among the many substances which Germany must obtain from outside for the value of the economic weapon to be evident beyond dispute. But Germany is not dependent on foreign countries only for raw materials. Her allies, Austria, Turkey, and Bulgaria, between them only took about one-eighth of her total exports before the war, so that the markets of the Allies are necessary for her very existence.

THE SUDAN AND ITS ECONOMIC ADVANCE.

15.—The White Nile Province.*

By Percy F. Martin, F.R.G.S.

The White Nile—which gives its name to an entire province—has been described as forming, with its tributaries, "the life blood of the Sudan." For nearly 2,036 miles this magnificent waterway traverses the country from south to north, receiving, on its course, the rivers Bahr-el-Ghazal, Sobat, Blue Nile and Atbara. The province bearing its name is one of the three of the smaller political departments—Khartoum and the Blue Nile are the other two—the superficial area not exceeding 13,090 miles, while the population is estimated at under 130,000. Official figures put this at 155,000, but there is reason to believe this total is excessive; the adult population, at any rate, does not exceed 52,000.

The province is better known than most to visitors to the Sudan, on account of the river steamboat trips organised by the Government, which, if followed to the terminus, Rejf, afford an excellent idea of the interior of the Sudan, and a more or less superficial acquaintance with its lesser-known tribes.

Those who venture to penetrate into the interior are usually impressed with the large amount of land under cultivation, and with the number of villages, usually well built and clean-looking, and inhabited by a people apparently intelligent and by no means unfriendly. The land in parts is of a very generous nature; and it is in this province, be it remembered, that is found a considerable portion of the territory known as the Gezireh, the irrigation and eventual cultivation of which for cotton is the great hope of the Administration. Up till now cultivation has been entirely due to the rains or the Nile flood, and in times past—such as 1898 and 1906—this flood, in places, has been from six to ten miles inland from the true bank of the river. But such a rise is quite exceptional. At such times the crops are excellent, and the people avail themselves of the opportunity to hoard their harvests, as much as three years' supply of the people's requirements having been won at a single harvest. With the introduction of modern agricultural machinery much more might be done with the land. Cattle-raising is a standing industry among the people, but as the land is subject to long and severe droughts, no reliance can be placed upon this pursuit as a revenue producer. The inhabitants of the Geteina, Kawa and Dueim districts are breeders of flocks and herds, and in good times—that is to say, when the rains have been both early and prolonged—have amassed a good deal of money, which has meant the prompt payment to Government of the herd-tax. Horse-breeding is likewise encouraged among the Arabs, an annual horse show having been organised.

The principal town in the province is El Dueim, which has, however, lost much of its importance as a produce-market since the railway came to El Obeid in the adjoining province of Kordofan. Many of the more prominent among the El Dueim merchants have now left the town after transferring their businesses and their residences to El Obeid. Houses in El Dueim to-day realize something less than 30 per cent. of their former value, while more than three-fourths of the business premises seem to lack tenants. The markets of the town, like those of Geteina, Kawa, and Kosti, are now owned and conducted by the Government instead of being rented to native contractors.

El Geteina, or, as it is sometimes called, Zeinoba, is a large village divided into two parts and forming the headquarters of the district. The village is situated about thirty-five miles from Omdurman, and is 180 miles by road from Khartoum. The surrounding country is flat, but by no means unpleasing to the eye. Goz Abu Gama, the headquarters of the district of the same name, stands on the right bank of the White Nile, opposite the island of Wurelat. This island, like others of a similar formation, makes its appearance in the river during the months of January and February; it is then covered with large, coarse grass, very brilliant in colouring. The eastern channel opposite to Goz Abu Gama dries up completely during the rainless season.

Kawa, a large village on the right bank of the Nile, is the official residence of a British Inspector. At this port the White Nile river steamers take on wood for fuel; it appears to be a thriving and busy little place, a large and well-attended market being held there at frequent intervals, while considerable activity exists in native boat-building. All around there is cultivation on an extensive scale, the crops including wheat, barley, dura, onions, lubia, dukhn, bamia and other produce. The once dense forests in the vicinity provide the wood for the steamers; but as no fresh planting is being undertaken it can only be a question of time before the district becomes almost denuded of wood supplies.

Although the town of Kosti—like that of El Dueim—has lost something of its original importance since the continuation of the railway as far as El Obeid, it remains a busy place and the focus of considerable commerce. Situated on the east bank of the Nile, Kosti lies some 180 miles from Khartoum, with which it is connected by railway. The murkas consist of about fifty different villages, and, ordinarily, the population averages between 7,000 and 8,000. During the rainy season, however, the inhabitants dwindle to about as many hundreds, for all who can do so leave the town in order to cultivate their small plots of land, whole families and villages working together vigorously. At this time of the year Kosti becomes a dead place; even the permanent Egyptian officials find little to do, while the Europeans deem it convenient to take their annual leave at home or in Egypt. The myriads of mosquitoes and sand-flies then have the place to themselves.

There are few buildings of any note in the town, but the one-time grass and straw-built mosque has given place to a more substantial, square-shaped erection of cut-stone, with battlemented walls, the foundations resting upon inverted arches. The most remarkable feature about Kosti, however, is the magnificent span-bridge which crosses the Nile a few hundred yards below the town. The construction is considered to rank as one of the finest of its kind; it is of the swing-type, thus enabling the river steamers, which stand high out of the water and have tall chimney-stacks, to pass up and down stream without difficulty.

The river-station of Taufikia, which is some 550 miles from Khartoum, forms the distributing centre for the important trade carried on the Sobat, the Bahr-el-Ghazal, and the Bahr-el-Zaraf rivers. There are native barracks of brick, and several other Government buildings. It was at this spot that Sir Samuel Baker, the great explorer, made his headquarters in 1865, and he named his settlement after his patron Tewfik the Khedive.

* This series, which commenced on December 29, is concluded with this article.

INDIAN PRODUCTS AND ADULTERATION.

The prevalence of the practice of adulterating Indian produce before export has once more been engaging the attention of the Indian Government, says the British Empire Producers' Organisation in its monthly *Empire Trade Notes*. The question is an old one, and though the purity of a few Indian products—and most notably wheat—receives nowadays adequate attention, the Indian Government do not think such an assertion can be made generally. It is common knowledge that cotton and jute are still watered, while ground nuts, hides, indigo, hemp, beeswax, and oils are found adulterated. The Indian native is perhaps not quite such an artist in adulteration as the Chinese, but he knows far more about it than is healthy for the reputation of Indian products. The Government of India do not favour meeting the evil by legislation, which they think would be difficult to carry out and also ineffective. They point out that the buyers of Indian produce ought to be able to effect an improvement by combining to decline adulterated goods. A more practical suggestion, in the opinion of the organisation, is that trade associations in India should institute some system of certifying to the purity of Indian products before export. An educational and publicity campaign directed to pointing out the short-sightedness of the adulteration habit might also be worth considering. In the life and death competition of after-the-war trading, it is claimed by the organisation that we must not allow the historic reputation for quality of our products to be prejudiced. For this, in fact, is not merely an Indian question: it is an Imperial question.

Colonel H. E. Rawson, R.E., C.B., will give an illustrated paper on "The Sun as Empire Builder" at a meeting of the Royal Colonial Institute at the Royal Society's Lecture Theatre, Burlington House, on November 20.

ANGLO-PERSIAN OIL.

Excess Profits Duty.

The *London Gazette*, of October 30, contained the following order of the Board of Referees for increasing the statutory percentage of profits for the purpose of excess profits duty:—

Oil Production in Persia.

Application of the Anglo-Persian Oil Company. The Board of Referees decided that the percentage shall be increased in the case of a company to 11 per cent.; in the case of a private firm:—

(a) For accounting periods ending prior to January 1, 1917, to 11 per cent., plus 1 per cent.;

(b) for accounting periods ending after December 31, 1916, to 11 per cent., plus 2 per cent., except that for the purposes of subsection (2) of section 41 of the principal Act the statutory percentage shall be 11 per cent., plus 1 per cent., with the addition for accounting periods ended after December 31, 1916, of 3 per cent. for the purposes of subsection (1) of section 41, and paragraph 4 of Part II. of the fourth schedule to the principal Act.

ROUMANIAN OIL COMPANIES.

Claims for Destroyed Property.

So far three Anglo-Roumanian oil companies have announced the extent of their claims against the British Government in respect of property destroyed by the British military mission under Colonel Sir J. Norton Griffiths. The claims are as follows:—Roumanian Consolidated, £1,270,724; Traian Roumanian, £277,625; and Anglo-Roumanian, £208,825. There are, of course, further claims with respect to interest, the cost of reconstruction prior to resuming work, and other things. The list also by no means exhausts likely claims, and in this connection it may be pointed out that reference was made in the report of the Roumanian Consolidated Company to fifteen British oil companies which were operating in Roumania. It is probable, however, that the three claims already made will be among the largest.

TRADE MARKS.

Cotton Goods in Egypt.

The following letter has been addressed to H.M. High Commissioner for Egypt by the secretary of the Manchester Chamber of Commerce, with reference to correspondence which had been published in the *Monthly Record* of the Chamber:—

"The Secretary of State for Foreign Affairs has informed this Chamber that a sub-committee of the Egyptian Capitulations Committee has been appointed to deal with the question of trade-marks, and that you have suggested to the sub-committee that they should examine the question of frauds, of which the folding and marking of cotton goods is an instance. I am therefore instructed to hand you a copy of the correspondence which has passed between this Chamber and the Foreign Office on this question, and to say that the committee of the Manchester Chamber which has had this subject under consideration has heard of the action which you have taken with very much interest, and entertains the earnest hope that you will continue to do what you can to remedy the evil practice disclosed in this correspondence. A copy of the correspondence was sent by Mr. Balfour's permission to the British Chamber of Commerce, Alexandria, on August 29. I enclose a copy of the covering letter to that Chamber, which contains the question which the sub-committee of the Capitulations Committee will probably regard as very pertinent to the inquiry which your Excellency has suggested they should undertake. I am to mention that the British Chamber of Commerce, Alexandria, is being kept *au courant* with what is now taking place."

THE P. AND O.

Purchase of Hain Steamship Company.

It is understood that the Peninsular and Oriental Steam Navigation Company is to purchase the Hain Steamship Company. The price provisionally agreed upon is reported to be £80 per £10 share, which represents a payment of £3,996,000 as the paid up capital of the company is £499,000. The shares stand in the market at about 34½. The transaction will mark yet another stage in the expansion of the P. and O. In June last the company secured control of the Union Steamship Company of New Zealand, while only eleven months previously it bought the controlling interest in the New Zealand Shipping Company, and through it of the Federal Steam Navigation Company. Just about three years ago, too, there was the great shipping combine between the P. and O. and the British India Steam Navigation Company.

The Hain Steamship Company is a comparatively new concern, dating back to 1901, and the present negotiations must be largely attributed, no doubt, to the death a year ago of the founder of the company, Sir Edward Hain, which followed on the death in action in 1915 of his only son, Captain Edward Hain. The company's authorised capital is £500,000, and £200,000 4½ per cent. debentures have also been issued, but these were redeemed in 1915. There was no announcement of a dividend during the first two years of the company's operations, but subsequently dividends amounting to almost 180 per cent. have been paid. The company had an excellent year in 1913 when the gross profits amounted to £350,800, and the net profit to £178,300, a dividend of 25 per cent. being paid. The following year the returns were not so good, the net profits being £50,100, and the dividend 10 per cent. During the war years, however, as the appended table shows, the operations of the company have been remarkably successful:—

Year ended June 30.	Net Profit. £	Dividend per cent.	Depreciation. £	Carry forward. £
1915	99,400	20	150,000	7,700
1916	172,800	35	250,000	5,600
1917	216,900	35	not disclosed	47,700

A letter has been received by shareholders of the Hain Steamship Company, dated October 27, with reference to the offer of the P. and O. Company. The executors of the late Sir Edward Hain and Son, and some of the largest shareholders, it is stated, approve of it. The offer is conditional upon the holders of 76 per cent., or such lesser number as the purchasers may fix, of the issued shares, accepting it by November 15. As regards shareholders in the United Kingdom, the offer will lapse unless accepted by that date.

The world's wheat crop this year for the principal countries which have reported, including the United States, is 1,665,489,000 bushels, an increase of 3.3 per cent. over 1916. The world's barley crop shows an increase of 2.4 per cent., rye 10.7 per cent., oats 19.9 per cent. and corn 25.3 per cent.

ENGINEERING NOTES.

Coal Gas for Motors.

The use of coal-gas, or what is more generally known as town-gas, as a substitute for petrol for motor traction, is at present exercising the minds of all motor-car owners in this country as well as abroad. Its adoption for private and commercial purposes, on small and large vehicles, is proceeding at an astonishing rate in this country, where there are already more than sixty factories which have taken up the work of conversion. People abroad, especially in the East, where, owing to the great scarcity of petrol, thousands of petrol-driven vehicles are idle, are keenly concerned in the matter, and but for the lack of necessary information, there would already have been numerous conversions of petrol-cars to gas-driven cars. It was previously pointed out that the gas which supplies the motive power for the new method of locomotion is stored in a large bag made of hard cloth fabric, lined on each side with rubber, and is placed on the roof of the car. A simple tubular contrivance is affixed to the balloon-like gas-bag and to the engine cylinders, and one feature of the arrangement is that this additional mechanism does not prevent a driver from running his car by petrol if he so desires. The appearance of a car with such an overhead gas container is not attractive, but it offers many conveniences. The alternative is the compression system, and this method, by which the gas is carried in cylinders at high pressure, seems to meet with considerable favour.

The Compressed System.

In spite, however, of the apparent popularity of this process, there are many who think that the liability of cylinders to fracture when subjected to high stresses and continual vibration is a serious point against the use of compressed gas. It largely depends, of course, on the material from which the cylinders are made, and, although some of the compressed gas equipments now in the market have cylinders made of steel, copper, other composite metals, and even composite rubber, none has yet given ground for complaint. All have their special merits, and are made by well-known British firms. One recent equipment contains features which may make it specially suitable for private as well as commercial vehicles in the East. The cylinders, made in various dimensions and consequent cubic capacity, are prepared to meet a pressure of 250 atmospheres (3,750 lb. per square inch), and may safely be charged up to a pressure of 125 atmospheres (or 1,875 lb. per square inch), and even to 150 atmospheres. The largest cylinders, measuring 48 inches in length by 8 inches in diameter (internally) have a capacity of 1⅓ cubic feet, and at the pressure of 125 atmospheres would carry about 170 cubic feet of gas. Thus, if six such cylinders were coupled up the aggregate capacity at 125 atmospheres would be 1,000 cubic feet, which, on the assumption of 10 miles to the gallon of petrol, would represent sufficient fuel for 40 miles, rating 250 cubic feet of coal-gas as being equivalent to one gallon of motor spirit. By increasing the pressure to 150 atmospheres, the fuel capacity of the six cylinders would be raised to 1,200 cubic feet, or 50 miles radius of action upon a single charge of the reservoirs. This outfit would be suitable for large commercial vehicles, while for smaller vehicles proportional outfits are supplied.

Motors in Morocco.

At the annual fair at Rabat in September, the exhibits were fairly numerous, in spite of the present transport difficulties. They were mostly of French origin, with a good sprinkling of American firms. Amongst the most prominent French firms having stands were Berliet, Peugeot, Rochet-Schneider, Renault, Panhard, De Dion, and Chenard; while America was represented by the Ford, Dodge, Pullman, Saxon, National, Hudson, and Overland companies. The tyre section included Michelin, Dunlop, Bergougnan, and Goodrich. Several motor tractors were on show, these being nearly all of French manufacture, America having the Bull as their only representative.

Machinery for the Government.

Landowners and importers of agricultural machinery in the East, who are complaining that British manufacturers are not anxious to take new orders for quick delivery at present, may be appeased if they know that apart from other important war-work which manufacturers are carrying on, during the next twelve months the Agricultural Machinery Department of the Ministry of Munitions will require, as a minimum, the following agricultural implements and machinery:—8,000 horse-drawn ploughs, 2,000 cultivators, 2,000 seed drills, 2,750 rollers, 5,500 harrows of ridged and jointed type, 400 land presses, 7,000 self-binders, 1,400 disc harrows, both tractor and horse drawn, 1,350, horse drawn farm tip carts, 650 horse drawn flat top lorries, 50 thrashing machines, 3ft. 6 in. and 4ft. 6 in., and some thousands of 2-furrow ploughs for tractors of a special design. Any firms (manufacturers or importers) who, in addition to their normal output, can supply the whole or part of these requirements are invited to communicate with the Controller of the Department named, stating what implements they can offer and the date and rate of deliveries. Some of the above implements and machinery are urgently needed, and orders so undertaken receive, of course, attention before private orders.

Oil Engines from Baku.

There is a large demand for internal combustion engines of from 2½ h.p. to 100 h.p. for the oilfields in the Baku district of Russia. Engines built to run on natural gas from the wells are in considerable use on some of the oilfields, but owing to the uncertainty of the supply of gas an attachment by which the engine can also be run on crude oil is usually asked for. The value of the district of Baku as a market for oil-engines, motor cars, pumping machinery, etc., has often been pointed out in these columns. German, French, and American firms were the principal suppliers before the war, the obstacle to British firms entering the market having been the "credit bogey." It is noteworthy, however, that most German firms at the time were doing large business on the safe terms of sending goods on consignment to their bankers to be paid for when delivered, the result of systematic methods in dealing with local importers.

German Methods.

It is reported on good authority that classes have been established in Germany for discharged soldiers to train them as commercial travellers after the war. They are being taught the Russian language and Russian methods. In addition, some 40,000 women are being taught the same language, so that they may be able to conduct correspondence and replace the depleted ranks of the men. At the same time the novel idea is being worked out in Germany of providing the Russian agricultural prisoners with sample machines to take back to their villages with a promise of a commission on any they may sell. A rather expensive method of advertising at a time when their enemy thinks that it is of no use advertising now, and prefers to take the "too late" risks! However, the above report is another proof of the German preparations for the forthcoming trade war.

New Route between East and West

French railway circles, it is said, are giving attention to a plan of constructing through railway routes between Western and Eastern Europe which shall be independent of the German and Austrian railway systems. Before the war a traveller from London or Paris to Southern Russia proceeded viâ Vienna, whence he had the choice of three routes: viâ Budapest—Belgrade — Nish — Sofia—Adrianople—Constantinople (the Orient Express); Agram—Bucharest—Constanza (in Roumania); and Cracow—Lemberg—Odessa. All these are, however, dependent on the railway systems of enemy countries, and the route from Paris to Constantinople viâ France, Milan, Cervignano and Agram, which was suggested over ten years ago, but which, for obvious reasons, was objected to by the Austrian State railways, is now being considered. The French and Italian railways are strongly in favour of the project. It has the advantage of being shorter than the route viâ Vienna.

The percentage of the total area of cultivated land in Egypt in which wheat was grown was 16.9 in 1912-13 and 1913-14; in 1914-15 it was 19.4; in 1915-16, 18.1, and 1916-17 only 14.0.

SUDAN PRODUCTS.

Search for New Markets.

Reference was made in these columns last week to the economic investigations of the Imperial Institute on behalf of the Sudan Government. The following particulars of the inquiries are given in the recently published report of the Central Economic Board :—

During the year 1916, reports were forwarded by the Imperial Institute to the Government of the Sudan on the following subjects, on the basis of investigations conducted in the Scientific and Technical Research Department, followed when necessary by the submission of the products to commercial experts and manufacturers for valuation or technical trial :—Voandzeia Subterranea beans, dates, barley, tamarind fruit, colocynth pulp, Mahareb grass oil (Cymbopogon Sennaarensis). The results of the more important investigations are summarised below :—

Voandzeia Subterranea Beans. — These beans were found to be practically identical in composition with a sample examined at the Imperial Institute in 1915. A firm of importers stated that this class of bean is hardly suitable for the London market, but would probably be saleable in some of the Colonial and also some of the Southern Continental markets. They considered that in the latter markets the value of the beans, if shipped in good condition, might be as high as £E20 per ton under pre-war conditions. An Aberdeen firm stated that if the beans were offered in good condition and suitably prepared it was possible that a market could be found for them in the United Kingdom similar to that which exists for split peas.

Dates.—Small trial consignments of Gondeila, Garban and Bertamuda dates were found to be of good quality and to resemble the Sayer variety of dates shipped from the Persian Gulf. The dates were sold in London at 24s. per cwt., and firms consulted by the Imperial Institute in connection with the inquiry recommended that larger shipments should be forwarded.

Barley.—A small consignment of barley from Berber Province, of satisfactory appearance and composition. After examination at the Imperial Institute the grain was submitted to malting experts and millers, who were of opinion that it would be suitable for malting and valued it at from 54s. to 60s. per quarter of 448 lb. c.i.f. in the United Kingdom. The consignment was subsequently sold in London at a rather higher price—viz., 60s. per 400 lb.

Tamarind Fruit.—A sample of dry tamarind fruits from Mongalla Province. A firm of brokers stated that in order to estimate the value of this product it would be necessary to have a sample barrel of the fruits, free from rind and preserved in molasses. They pointed out that the fruits were smaller and less fleshy than those imported from Barbados and Antigua, adding that the normal value of West Indian tamarinds varies between 10s. and 20s. per cwt., though current prices under war conditions were somewhat higher. A firm of wholesale druggists also stated that there would be no demand for dry tamarinds in the condition of the sample, though they closely resembled the West Indian fruit in flavour, and would be saleable if freed from the pods and properly preserved in syrup.

Colocynth Pulp.—A sample of colocynth pulp free from seeds, which was of satisfactory quality except for a slight brown colour in parts and the presence of some yellowish dust. The pulp was valued at 1s. 3d. per lb. c.i.f. London, but it would probably realise a slightly higher price if free from dust and discoloured material. Merchants stated that there is a good demand for this product in London.

"Mahareb" Grass Oil (Cymbopogon Sennaarensis).—A sample of oil which was distilled from the grass at the Imperial Institute and submitted to firms interested in such products. The reports of manufacturers of pharmaceutical and perfumers' products, essential oil distillers, and soapmakers, generally confirmed the opinions previously expressed that it is unlikely that any industrial opening can be found for this oil.

RUSSO-INDIAN TRADE RELATIONS.

Value of the Persian Route.

Presiding at a meeting of the East India Association on Monday, at which a lecture was given by Baron Heyking on "The Potentialities of Russo-Indian Trade Relations," M. de Nabokoff, Russian Charge d'Affaires in London, said the war had removed a great many of the impossibilities of trade between Russia and India and allowed them to see a vision. To him that vision was a railway which would give them the possibility of loading cargo on the rails of North Russia and sending it to Madras; and if the means of construction were applied in the future as the means of destruction were applied now, the introduction of the aeroplane in their commercial life. The future development of Russia and India had one point in common. It was that the spirit of individual initiative in Russia would not be hampered by Governmen or official interference.

Baron Heyking said that among the adverse circumstances which had hampered the expansion of Indo-Russian trade relations in the past, the political factor played a great part. One condition which was against the development of Russo-Indian trade relations was the lack of means of communication between the two countries, but beneficial results might be expected by connecting the Russian railway system with that of India through Persia via Quetta. This railway project was bound to be a potent factor for the development of Russo-Indian intercourse.

LANCASHIRE COTTON.

Advance in Prices.

(From Our Own Correspondent.)

Manchester, Wednesday.

Prices in the market have continued to advance and fresh high records have been established in raw cotton, yarn and cloth. Numerous traders express surprise at the amount of business which continues to be done at such extraordinary prices. Many people believe, however, that the top in values has not yet been reached. Favourable reports on the whole have come through relating to the Egyptian cotton crop, and it is expected that the official estimate of the yield will at least be 6,000,000 cantars. Spinners have called freely during the week. Egyptian yarns have been in active demand, and most spinners have strengthened their position. A rather increasing trade has been reported in piece goods for Egypt. Houses on this side have received instructions from abroad to purchase certain cloths at the best prices possible, but supplies must be obtained. Opportunities of shipping are still very unsatisfactory. In cloth for India operations have been rather irregular. Rather improved bids have been met with in shirtings for Calcutta, but only small lots have been put through. Bleaching cloths have moved off fairly well with rather less activity in printing descriptions. The outlook for China remains poor, and some advices this week have been rather discouraging A steady business has been done for the South American outlets. The demand in American yarns has been well maintained, and a large business has been done at advancing rates. It has been difficult to secure delivery of ring beams. The finer numbers in wefts are at a premium. India has given fair support in the higher counts of yarn, but has done very little in 40's mule. A healthy inquiry has again been reported in yarns suitable for France.

Anxiety with regard to the food situation in Athens, says *The Times* correspondent there, has been relieved by the arrival of two large cargoes of wheat at the Piræus. The existing scarcity, however, is not so great as to justify the continuous inflation of prices that we are now witnessing. People are beginning to realise that they are victims of certain local profiteers, and show signs of revolt.

PERSIAN TRADE.

Kazvin : A Distributing Centre.

The chief trade of Kazvin and district is the export of raisins and cotton, but a considerable amount of business is also done in general exports and imports, says the British Vice-Consul at Kazvin, Mr. E. J. Goodwin, in the course of some notes on the trade of the district for the year ended March 20. Goods from Russia—sugar, tea, textiles, hardware, and sundry goods of every description—are dealt with by commission agents and distributed from Kazvin to other parts of Persia; while raisins, almonds, pistachios, and dried fruit, produced locally, cotton from Kashan, Isfahan, and other districts, and opium, henna, etc., from Yezd are purchased for export to Europe. The bulk of imports are Russian, but when the Baghdad-Kermanshah-Hamadan road is open a large quantity of Manchester cotton goods and Indian spices come into the town. In normal times about 300,000 pouds of sugar pass through the hands of Kazvin traders annually and of this amount one-third is retained for local use. During the past two years the importation of sugar has been very small.

The Import Trade.

Cotton piece-goods come mostly from Russia, but during the last two years supplies from that country have greatly decreased. Whenever possible the bazaars are well stocked with Manchester goods, but this, as stated above, depends upon the condition of the Baghdad-Hamadan road, which is closed at present. Russian cotton piece-goods imported into Kazvin usually amount to 500,000 tomans annually. Russian petroleum only is imported into Kazvin, and, as a rule, to the extent of 750,000 pouds annually. One-third of this quantity is disposed of in local districts. Since the beginning of the war imports of petroleum have decreased by about one-half. Nearly all the imports of hardware and cutlery are Russian, or were formerly Austrian, while most of the lamps imported were German.

A great deal of gunny is used in Kazvin. The supply comes from India via Russia. Boots, shoes, sandals, etc., for the natives are made locally and in Teheran from native leather. A great quantity of boots and shoes of European styles are worn by the Persians, the parts being imported from Russia and put together in Persia. Spices are all imported into Kazvin from India via Southern Persia, and also, when possible, via Batoum.

British Goods in Demand.

There appears to be an increasing desire among Kazvin shopkeepers who trade in sundries to deal in British goods. Formerly their stocks were partly Austrian and German, but since goods of Austrian and German manufacture have been difficult to obtain they have had the opportunity of giving British goods a fair trial. Mr. Goodwin is of the opinion that the fact that they have given entire satisfaction will be proved in the future.

TELEGRAPH MONEY ORDERS FOR INDIA.

The Telegraph Money Order Service with British Oversea Dominions were extended on November 1 to India (including Burma), Indian Post Office Agencies in French India, and Aden. A special feature of the service is the transmission of the telegrams of advice at the deferred rates, which reduces the charges by one half. The full rate service is available for cases of special urgency.

EXHIBITION OF EASTERN CARPETS.

An interesting exhibition of Eastern carpets and rugs obtained from Persia, India, and elsewhere by enemy firms whose businesses in this country have been liquidated by the Board of Trade, was held last week at the Midland Hotel, Manchester, the fabrics being subsequently offered for sale. Among the rugs was one presented to Charles the Great by Mahomet II. and valued at £7,000. The exhibits also included a fourteenth-century Ispahan rug valued at £14,000, a prayer rug for the Mecca pilgrimage, and a royal Sineh rug with 700 stitches to the square inch and more than two hundred shades of colouring.

COMPANY NOTES.

Dividends, Payments, etc.

The directors of the Anglo-Egyptian Bank, Limited, recommend a dividend of 10s. per share for the half-year to August 31, making, with the interim dividend of 5s. per share, 15 per cent. for the year, and a bonus of 2s. 6d. per share, both free of tax. After providing in full for depreciation of securities and all taxation, and appropriating £9,000 bonus to staff, £10,000 to premises account, £20,000 to reserve fund, they carry forward £67,000. The date of the annual meeting is fixed for November 23.

Oil Outputs.

Anglo-Egyptian.—Gemsah production for week, 159 tons (previous week, 633 tons). Hurgada production for week, 3,041 tons, against 2,923 tons.

Bibi Eibat.—Week ended October 14, 44,117 poods (712 tons).

British Maikop Oil.—Production week ended October 20, 825 poods (about 13 tons).

European Oilfields.—Production for week ended October 21, 64,200 poods. Production for week ended 14th not yet to hand.

Maikap Orient.—Plot 435a, well 3.—Week ended October 20, 11,100 poods.

Spies Petroleum.—Production, including 1,800 poods from ambars, for week ending October 1, 199,610 poods (or about 3,220 tons); total production for year from January 14 to October 21, 7,158,330 poods (or about 115,457 tons); total production for the corresponding period last year, 6,752,305 poods (or about 108,908 tons).

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses and unsuccessful attacks during the week ended October 28, 3 p.m. :—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft) :—

Arrivals	2,285
Sailings	2,321

British merchant vessels sunk by mine or submarine :—

1,600 tons gross or over	*14
Under 1,600 tons gross	4
British merchant vessels unsuccessfully attacked by submarine	1
British fishing vessels sunk	Nil

*Including one sunk during week ended October 21.

Mr. Palmer, the Custodian of Alien Property, has announced (says Reuter's Washington correspondent) that it is not intended to seize money deposited in the banks by subjects of Germany or of Germany's allies.

THE

GENERAL ANGLO-SERBIAN INDUSTRIAL & FINANCIAL COMPANY, LIMITED,

106, Bishopsgate, London, E.C.2

The Company has been formed to promote British Trade and Industry in SERBIA and other BALKAN STATES.

The Company is a Promoting Company, and is prepared to consider any proposals for the Financing and Exportation of any trade business.

Agents in ROME, and as soon as circumstances will allow Branches will be opened in SERBIA and other BALKAN STATES.

Correspondence is invited from those interested in SERBIA and the other BALKAN STATES, or contemplating business with SERBIA and the other States when communication is restored.

BUYERS' GUIDE.

CHRISTMAS CARDS, POST CARDS, &c.

Raphael Tuck and Sons, Ltd., Moorfields, London, E.C.

ENGINE AND HYDRAULIC PACKING MANUFACTURERS.

Attwater and Sons (Manufacturers of Metallic Flax, Asbestos Cotton, Steam Engine and Hydraulic Packings), Preston.

SPINNING MACHINERY.

GEO. THOMAS & CO., Manchester. Tel. and Cable Address: "Samoht, Manchester." Exporters of all classes of Machinery for Spinning, Weaving, Bleaching, Printing, etc., Cotton, Wool, etc. Testing Machines for all purposes, Tachometers, Balances, &c.

ON 'CHANGE.

(From Our Own Correspondent.)
Throgmorton Avenue.
Wednesday.

Last week our market was very active, and prices were all tending upwards. But the news at the opening of our market this week of the Italian set-back created a temporary feeling of depression, with the result that many intending purchasers withdrew their orders, and several investors began taking profits. To-day, however, these sales have subsided, and fresh buyers have come along; the tone has become good, and prices are closing with an upward tendency. The very favourable information cabled by *The Times* correspondent from Cairo as regards the general conditions in Egypt, has no doubt been a factor in this improved feeling. Cotton is again rising in price; all reports from the other side continue of a very satisfactory nature; and sales of land, which are of the greatest importance so far as the companies are concerned, are taking place daily at very satisfactory prices.

In Government stocks all the Egyptian Unifieds on offer here were taken early in the week at 84¼, and to-day there are buyers at 84½, but sellers are scarce. In the 3½ per cent. preferences there have been persistent buyers at last week's price of 71½, but very little business has gone through, sellers being few and far between.

In Bank shares, Nationals, after some trifling transactions down to 16¾, closed ⅛ up at 17⅛ on some fairly large buying orders for Egypt. Agriculturals, which had dropped ⅛ to 6 3-16 are 1-16 lower at the close at 6¼. Some small business was done in the 4 per cent. preferences round 7. Anglo-Egyptian Banks have had a jump of ½ to-day to 13¾ on the exceedingly satisfactory report just issued. In Land Banks there have been constant buyers throughout the week, and a fair amount of business has been transacted, but the price remains unchanged. Delta Light Railway preferences are, after being somewhat quieter and changing hands as low as 6, closing 1-16 up at 6⅛, with a small transaction to-day at 6 3-16.

In Land shares Aboukirs, after touching 19s., are 3d. up at 19s. 9d. on a fairly large purchaser coming into the market to-day. Behéras have been in persistent demand at 12, but no shares are offering at the moment. Behéra preferences have changed hands in a fair line at 4 7-16, a rise of 3-16. Delta Lands, after dropping to 13s. 6d., were in demand again to-day, and closed only fractionally lower at 13s. 9¾d. New Egyptians, which had spurted to almost 15s., came back at one time under profit-taking sales to 14s. 1½d., but they are again on the up grade to-night at 14s. 4½d., which represents a quite fractional decline on the week. Sidi Salems are wanted, and the price is 1s. up at 16s., but business is difficult, as sellers are wanting higher prices. Union Foncières were done at 40s., a rise of 1-16, and there are probably further buyers.

In miscellaneous shares Alexandria Waters changed hands at 12¾, a rise of 3-16; some steady business has been done in Markets round 27s. 3d., a rise of 3d.; and Salts are 6d. up at 28s., with a very fair amount of business passing. Khedivial Mails have remained exceptionally inactive and unchanged.

In Greek securities Monopolies are a point up at 54, as are also Rentes at 44½. Some few thousand pounds of the latter have changed hands. There has been a small transaction in Four Per Cent. 1902 at 63. In Currant Bonds there is a seller on the market of a small quantity at 93½.

Oil Shares.

Wednesday's prices showed a rising tendency. Anglo-Egyptians (B) rose 1s. 6d. to 27s. 6d.—28s. 6d. Roumanian Consols were unchanged at 11s.—12s., but North Caucasians were 1-32 better at 1 1-32—1 3-32, and Burmahs rose 1-16 to 6⅝—6¾.

The Controller of the Foreign Trade Department has just issued a new list of additions to the statutory list of firms of enemy nationality or enemy association with whom persons in the United Kingdom are forbidden to trade. Copies can be obtained at a trifling cost from the Superintendent of Publications, Stationery Office, Imperial House, Kingsway, W.C.

A dark and ominous curtain cutting off the HOLY LAND from our eyes

is only occasionally lifted when neutrals are able to smuggle letters through from the interior. These letters give us

glimpses of terrible suffering

"I visited Junieh recently . . . they told me that in the town and just outside there were 5,000 dead. Typhus and cholera are rampant. The Mayor said fifty wagons were kept busy carting away the dead from the streets. A pall of melancholy is settling over the entire country. Omnipresent fear, famine, sickness and execution have wiped smiles from every face. There is an utter lack of medicines, grain and fuel."

THE SYRIA & PALESTINE RELIEF FUND

has been founded to relieve this terrible distress. Missionary Societies of all denominations have united to carry out the work. Consignments of food, medicine and clothing are already entering Palestine. Goods stored in Egypt will continue to be poured into the country as further access is obtained.

£300,000 wanted

(£50,000 needed at once.)

Relief will be given to all in need—Christian, Jew, and Arab alike.

Chairman (London): Lieut.-Col. Sir HENRY MACMAHON, G.C.M.G., etc. (late High Commissioner in Egypt). Hon. Treasurer: J. F. W. DEACON, Esq., Williams Deacons Bank, Ltd.

Please send your DONATION to-day to the Secretary, Syria and Palestine Relief Fund, 110, Victoria Street, S.W.1.

NOTES OF THE WEEK.

The pressing danger on the Italian front has changed what would otherwise have been a brilliant week for the Allies into one of cloud and shadow. The Austro-German forces, favoured by the luck of the weather, as well as by the fruits of their political propaganda in the Italian ranks, have swept forward across the Tagliamento, and it is becoming doubtful whether Venice can be saved from the latest irruption from the North. Its loss would be serious, not only because of the blow to Entente prestige which the capture of so famous a city must cause, but also because Venice is an important naval centre.

It is quite useless to minimise the gravity of the position, as is, unfortunately, being done in some quarters. Italy has been invaded many times before, and the invaders have seldom been checked at the first onset in the northern plains, although they have nearly always failed to hold the peninsula in the end. The invasion has, it is true, reunited Italian opinion in favour of the war (with the exception of the extreme Italian Socialists, who threaten a pacifist campaign in France and England as well as their own country), but it has, unfortunately, done much the same for Austria. It must be remembered that Court circles in Vienna have never ceased to look on Venetia as a legitimate Austrian province, and the young Emperor would presumably not be averse to regaining the territory which Francis Joseph lost. No specific statement has been issued from Vienna on this point, and the Press has been officiously reticent; but the desire to reincorporate the Italian provinces in the Austrian Empire, always hungry for dominion, is more in keeping with traditional Hapsburg policy than the renunciation which Count Czernin recently discussed with all the gravity of the professional *poseur*.

Clearly the Italian question raises vital issues for the Near East as well as for Central and Western Europe. Without a definite Italian victory the Jugoslav programme remains so much waste paper, and all the nationalist aspirations of the Slavonic peoples in Austria would be doomed. That fact, which the events of the past few days has made patent to all, should stamp the Italo-Jugoslav *rapprochement* with the prospect of permanence. The misunderstandings which prevailed until last summer have at last been dissipated, and misfortune has demonstrated that the only chance of salvation for the two peoples lies in the dismemberment of Austria.

On the other hand, it is fairly certain that Austria will reply to the threat of dismemberment in similar fashion. It will not be enough for her to retain the Jugoslavs under her control; she will attempt to remove all danger from her path by endeavouring to dismember Italy, which has been an inconvenience to Germany as well as to Austria since the Turkish War, and a positive danger since 1914. Now the most convenient way for Austria to dismember Italy would be to seize Venetia and the northern plains for herself, and to divide the rest of the peninsula in two by restoring the temporal power of the Pope—a cause for which Austria, as a strongly Catholic country, has a strong partiality, and against which her master Germany has no particular reason for protesting. The Papacy itself, as is well known, has never acquiesced whole-heartedly in its renunciation of that anomaly.

In this connection the rapidly increasing importance of the Vatican in European affairs scarcely seems to have been adequately grasped in England. The Papal Peace Note, which was respectfully ignored in Western Europe, has been enthusiastically received in Russia, where its pacifist doctrines evoked an instant echo, and its silence on the future of the Balkans tallied exactly with the current attitude of Petrograd; it was followed very shortly by the proclamation of freedom for the Catholic Church in Russia. Again, the new German Chancellor is a Catholic, and, moreover, a man who has all his life been an outspoken adherent of the Centre Party and a supporter of the Jesuits—who have also received their freedom in Russia. The appointment is very significant, for Prussia is still a nominally Protestant country. Assuredly the Pope has no reason to regret his intervention in the maelstrom.

The counter-military moves of the Entente against the Austrian aggression are necessarily secret, but they cannot remain secret long, if they are to be effective. Their actual political attitude, of course, remains unchanged. The pacifist grouplet made a demonstration in the House of Commons which fell flatter than their previous experiments, and Mr. Balfour had no difficulty in answering them, and his challenge to them on the questions of Armenia and Poland was significant. The case of Armenia is so gross that even the pacifists can only ignore it, but to include the independence of Poland in our war aims is a very satisfactory indication that the Government is certain of the stedfast temper of the

Digitized by Google

country; for whilst the Jugoslav programme implies the dismemberment of Austria, the restoration of Polish independence necessarily connotes the curtailment of Germany, and the latter task is likely to be more difficult than the former. But on all sides public opinion, although it reserves judgment as to the wisdom of the Allies' strategy, has shown an admirable fortitude in face of the latest German blow, which is strikingly in contrast to the nervousness shown in September when the Stockholm plot filled the air. The public has wisely settled down to the fact that the war may be indefinitely prolonged. And it prefers that rather than the "peace by negotiation," which would be a defeat by Germany. The German politician who announced last week that, in spite of everything, "England will not be ready for peace for a long time yet," deserves a decoration, or, rather, he deserves exemption from a decoration, as the wisest man in the Central Empires.

Apart from the Italian campaign, the week has been uniformly successful. The Canadian victory on the western front lies outside our province, as does also the final French success at the Chemin des Dames, which has at last ended the three-years' battle of the Aisne, the most searching test, perhaps, of the magnificent endurance of France that history has ever shown. But in other theatres of the war two useful actions have been reported. On the Tigris the British have made a further advance, and the enemy have been driven back on Tekrit after a brilliant little action which left prisoners and ammunition in our hands.

A more substantial advantage is reported from Palestine, where the Turks had announced a paper victory a day or two before the British obtained the more usual type of military success. General Allenby, after a long period of inaction, reported an advance against Gaza and the occupation of Beersheba, with over 2,600 prisoners. The Turks have concealed their chagrin in their usual bulletins. The capture of Gaza, reported a few days after the fall of Beersheba, was not unexpected after the previous bulletins. The Turks would appear to have fought well, but to have been outclassed by the British; and it may well be that their loss of this important point will cause them to revise their future strategy. The campaign in Palestine is by no means won, and probably many hard battles lie ahead, but at least it is progressing on right lines, and General Allenby's future movements will be awaited with considerable interest.

It is very natural that Jewish national feeling should be stirred by these events in the ancient patrimony of Israel, and the suggestion has been put forward of concerted action by the Jews to obtain assurances from the British Government as to the future of Palestine. It is stated that these assurances, if satisfactory, should have a great effect on Jewish sentiment towards the war, particularly in enemy countries. That is as it may be; one cannot help remembering that there was a controversy on the subject of national or religious allegiance among the Jews last summer, and that in the latest published Jewish resolutions on this matter the actual form of government desired in Palestine, in the event of repatriation, is left vague. There is no particular reason why the British Government—which has shown itself sympathetic to Zionism in the past—should not give satisfactory assurances as to the future of Palestine; but it would probably be better for the Jews to say exactly what they want before they ask Downing Street to define its position. For the bulk of British Jews, in any case, the question seems to be of no actual personal concern; it is unlikely that very many, either here or in the United States, or, for the matter of that, in Germany either, would return to the Holy Land. But the question has a very direct bearing on the future of Poland, where the Jewish question is only of less importance than the national question itself.

Every week brings its further revelation of King Constantine's perfidy. In the latest Royal telegrams that have been deciphered at Athens, however, the ex-Queen plays the leading part, entreating for a German army to drive the Allies into the sea, demanding German aid against the blockade, and frankly admitting that "we desired to enter the war on the side of Germany." That desire at least was restrained by wholesome fear of "British forces reported to be at Malta." The ex-Queen does not cut a very impressive figure in these confidential telegrams, but she was undoubtedly a useful asset for Germany.

It is said that there is still a small faction in Greece which desires to see King Constantine and his Consort return, and which predicts that within a year they will be back again. Loyalty, even to the unworthy, can sometimes be respected, but those who are working for this end would do well to remember that, if the consummation they profess to desire should be attained, Greece would not be a kingdom, but a German province ruled by a Governor-General (or his wife), who would take their orders direct from Potsdam.

Stockholm Conferences are rather out of fashion in these days, but some interest attaches to the programme put before the Organisation Committee, whatever that may be, of that body by the Serbian Socialist Party. While this manifesto begins with the usual preliminaries of no annexations or indemnities, without which no document is nowadays complete, it goes on to demand the reunion of Bosnia and Herzegovina with Serbia, and the union of Montenegro with the latter; the access of Serbia to the sea, the independence of Poland, full autonomy for Finland and the Ukraine under Russian democratic rule, and the deliverance of Armenia from Turkey. These demands, which are reasonable enough, will hardly be acceptable to even the minority wing of the Prussian Socialists. Another suggestion is the novel one that the origin of the war should not be discussed, and that all the Great Powers should contribute financial help to Serbia. On this it has only to be said that the Entente have already made some contributions to Serbia, and that it is obviously the turn of the Central Powers, which have done the damage, to do something towards reparation. This statement will probably be ignored by our English pacifists, since it conflicts with the views of Berlin.

There have been several speeches in Russia this week on foreign policy which have touched on the future of the Dardanelles. It is impossible to summarise these statements, which are vague, discursive, and contradictory, but a cautious reading of them appears to indicate that some of the members of the new Government are aware that foreign policy cannot be exclusively maintained on a basis of renunciation, and that the danger of Russia being shut off both from the Black Sea and the Baltic appears to be increasingly realised. Great opposition has naturally been manifested to this view, as was foreseen in Maximalist circles, which are again endeavouring to concentrate all the available force of the country into their own hands. Whatever the upshot of the latter attempt, it seems to be evident that the older school, which recognises facts, has still power to make its voice heard, although it may not have the power to carry out its ideas.

Few people outside the charmed circle of défaitists in Russia have been able to see how she could definitely resign all interest in the Black Sea. One may call it Imperialism, if one chooses, but it is no more evidence of Imperialism than, say, a British interest in the English Channel; it is dictated by the economic necessities of Russia, which are stronger than phrases. In the long run the facts must triumph over the phrases, unless the phrasemongers carry out their intention of making peace with Germany. There were several ugly suggestions of this kind in the telegrams last week, but up to the present the Government have shown a creditable firmness in dealing with them, despite the deplorable statement of M. Kerenski to an American interviewer that Russia was worn out, and that it was the turn of the Western Powers to carry the weight of the war.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 12. (*Delayed.*)

The Death of Sultan Hussein I.

As the cables will have already informed you, Sultan Hussein I. died on the 9th inst. at Abdin Palace. His death was by no means unexpected. He was suddenly taken ill last winter, and had to undergo an operation. The latter was in a sense but a slight one, nevertheless it was no secret that grave fears were entertained as to his recovery from the malady which then began to manifest itself, and which was the real cause of his death. His Highness did, however, recover sufficiently to make an extended tour in Upper Egypt, but he was ordered by his physicians to take a complete rest, and in consequence he spent the entire summer on his estates at Gabaris. Towards the beginning of September he expressed the desire to make a short river trip down the Rosetta branch of the Nile. The voyage was embarked upon, and he reached Dessuk safely. There he was suddenly seized with fainting fits, and his doctors, his family, and the Prime Minister were hastily summoned. For a time it looked as if he would succumb, but although he survived the attack, it became apparent that the end was not far off, and, as I informed you at the time, a hurried return was made to Cairo by the Cabinet, the Residency, and the Household.

His Highness arrived at the Barrage on board his yacht on September 25, and appeared to have improved in health. He remained there until October 5, when, at his wish, it was decided to take him to the Walda Palace at Helwan. His flotilla duly went to Helwan, but he was not able to land, as he again became ill. The yacht returned, therefore, to Cairo, and on Sunday, the 7th, after a consultation, it was decided to transfer him to Abdin Palace. This decision once taken, the Sultan appeared to take a turn for the better. Getting up, he insisted on dressing himself. He walked on to the deck and expressed his intention of walking on land to his car. He was quite rightly dissuaded from doing so by his staff, and he was accordingly carried on shore and conveyed to Abdin. The effort and excitement of what turned out to be his last drive through his capital did not have any immediate bad effects, and throughout the Sunday His Highness maintained his strength and attended to the more urgent matters of business. He slept well that night, and the next morning seemed no worse for the previous day's exertion, receiving the Ministers as usual; but later on in the day fainting fits set in once more, and it was evident that the end was approaching. All that night anxious watch was kept, but it was not until ten o'clock on the morning of the Tuesday (October 9) that he began to sink, and from that hour he did not speak again. His end—quite a peaceful one—came at 12.10 p.m.

Immediately the standard was lowered to half-mast, and the news of the Sultan's death was announced to the country by the Premier, Rushdi Pasha, in a touching and almost heartbroken message. Shortly afterwards the High Commissioner drove over to convey his own condolences and deliver to Prince Fuad a letter from the British Government expressing its grief at the death of his brother, and formally offering him the Sultanate, with succession to his heirs in a line to be eventually determined between the British Government and himself. Prince Fuad accepted the offer, but no public pronouncement could be made until after the funeral beyond the publication in the Official Journal on the day of the Sultan's death of the letter from the British Government and of one addressed to Sultan Hussein the day before by his only son, Prince Kamel Eddine, renouncing whatever claim, title, or pretension he might have to the succession to the Sultanate.

FOR INSURANCES OF ALL KINDS.

THE GENERAL INSURANCE OFFICE OF EGYPT.
ALEXANDRIA: 5, RUE AVEROFF. CAIRO: 23, SOLIMAN PACHA.

The funeral took place on the afternoon of the 10th. It was a most simple ceremony, and because of its simplicity was all the more impressive. The Sultan had expressed the wish that his interment should take place with the least possible fuss or formality. He asked that there should be no parade of animals destined to be sacrificed at the place of burial, that there should be no wailing, that the members of the Tarikas should not read prayers or the Koran during the procession, and that none of the usual celebrations which take place in connection with the death of a Moslem, and especially forty days after that event, should be held. His wishes were respected, and the result was a funeral which, by reason of its utter simplicity and of the silence attending its progress, contrasted strangely with the pomp and circumstance amid which we Westerners lay our sovereigns to rest, but which made an indelible impression on all who attended or watched it.

Punctually at three o'clock the cortège emerged from the Palace. At its head marched detachments from the Egyptian Army, followed by deputations from the various schools, the Rector of El Azhar, the Grand Mufti, the Ulema, and the bodyguard. As the coffin appeared at the door of the Palace a salute of twenty-one guns was fired from the barracks on the square and from the Citadel. The coffin was covered with a plain but exceedingly handsome pall, with the late Sultan's tarbush surmounting it. According to custom, it was carried, the honour falling to Marines of the Sultan's yacht. By the side of the bier walked the Household and a detachment from the bodyguard. Immediately behind came the chief mourners, Prince Kamel Eddine, the Sultan's son, and Princes Fuad and Mahmud, his brothers, followed directly by the High Commissioner, the Prime Minister, the Ministers, representatives of the Commander-in-Chief, the Senior Naval Officer, and the Sirdar, the Diplomatic Corps, the Under-Secretaries of State, the Public Debt Commissioners, the clergy of every denomination, the provincial governors, the Government officials, the leading members of the commercial community, and the provincial notables. The rear of the procession was brought up by detachments of British and Australasian troops. The cortège passed down Abdin Street to the Opera Square, and then up the Mohamed Ali Street to the Rifal Mosque, which stands below the Citadel hill. The entire route was lined by British troops, and, despite the fact that the crowds in the streets surpassed anything ever seen before, everything passed off in the most perfect order. The High Commissioner and most of the officials followed the bier up to the Rifal Mosque, where they left the procession and where a religious ceremony took place, the remains of Sultan Hussein being laid to rest close to where his father, Ismail, was buried. Government offices and all public establishments were closed on the day of the funeral.

Immediately after the funeral preparations were begun for celebrating the accession of the new Sultan. His Highness Prince Ahmed Fuad, who will henceforward be styled Sultan Fuad I., announced his acceptance of the offer made him by H.B.M.'s Government by a rescript addressed to the Prime Minister, in which, after paying a tribute to the great part played by his predecessor in the administration and development of the country during the past three very anxious years, he declared his intention to devote himself in even closer collaboration with his people to the execution of the programme traced at the time of his accession by Sultan Hussein, and to the realisation of the reforms so necessary to assure the material and moral progress of Egypt. At the same time Sultan Fuad called upon Rushdi Pasha to form a new Cabinet, the old one having, by the death of Sultan Hussein, lost its mandate and resigned. Rushdi Pasha replied, accepting this command, in spite of his bad state of health and the shock which he had suffered by the death of "a master who to him was also a friend," and proposed the reconstruction of the old Cabinet as it was. His proposal was accepted, and a decree confirming the old Cabinet was at once signed and promulgated.

The following day, October 11, the new Sultan made his official entry into Abdin Palace. Shortly after

Digitized by Google

ten o'clock his Highness left his villa near the Savoy Hotel in a State barouche drawn by four magnificent bays, with coachmen and footmen in brilliant liveries, and sais running beside the carriage. By his side sat the Prime Minister, and in open carriages following drove the other Ministers. The cortège was headed by a detachment of the cavalry of the body-guard on white horses, while immediately behind the State carriage came another detachment of the body-guard on bays. The cortège drove past the Savoy Hotel, down the Kasr el Nil and Manakh Streets, across the Opera Square into Abdin Street, and down that street on to Abdin Square, the entire route being lined with British troops. As the Sultan's carriage entered Abdin Square a salute of twenty-one guns was fired from the barracks, the British and Egyptian guards of honour drawn up outside the Palace presented arms, the Sultania Anthem was played, and the vast concourse of guests who had been waiting in the courtyard rose to their feet. The new Sultan was acclaimed all along the route, and appeared, as he drove through the Palace gates, to be very satisfied with his reception.

On alighting from his carriage Sultan Fuad was received by the Princes, the Rector of El Azhar, the Grand Mufti, the President and Vice-President of the Legislative Assembly, the President of the Mahkama Sharia, the Advisers and Under Secretaries, the principal Law Officers, and the Governor of Cairo. He was conducted to the reception hall, where a few minutes later he received the High Commissioner. Sir Reginald Wingate arrived in a motor-car, followed by other cars containing the Residency staff, General Allenby, G.O.C. the British troops in Egypt, Admiral Jackson, Major-General Stack, Acting Sirdar and Governor-General of the Sudan and their staffs. In presenting the Sultan Fuad his congratulations, Sir Reginald informed him that H.M. the King, with whom the new Sultan had exchanged cordial messages the previous day, had conferred on him the Grand Cross of the Order of the Bath. After the High Commissioner had taken his departure, the Sultan received the Pashas, officials, and notables; no speeches were made, and the reception lasted until noon. Later on in the day Sultan Fuad proceeded to the Residency, accompanied by Rushdi Pasha. He was received with military honours, and took tea with Sir Reginald and Lady Wingate, staying at the Residency over three-quarters of an hour. His Highness, after visiting Prince Kamel Eddine at his villa, proceeded to his own villa, where he spent the night. By rescript addressed to the Prime Minister the Sultan has ordered that henceforward the wife of the late Sultan shall be known as Her Highness the Sultana Melek, and that Prince Kamel Eddine, his wife, his own daughter, the Princess Few Kia, and the three daughters of the late Sultan shall bear the title of Sultania Highnesses.

BEERSHEBA.

Beersheba, or as the modern Arabs call it Bir-es-seba, has during this present war sprung into life and notoriety after a sleep of centuries. Famous as a sacred shrine in the days of Abraham (Gen. xxi. 33), and associated with incidents in the life of Hagar (Gen. xxi., 17), Isaac (Gen. xxvi. 24), Jacob (Gen. xlvi. 2), and Elijah (I. Kings, xix. 5), it is perhaps most familiar to us as the extreme southern town of Canaan. From "Dan to Beersheba," or from "Beersheba to Dan," are constantly recurring phrases in the Bible, and our army in occupying and passing north of this spot more truly enters the actual "Land of Promise" than in any other advance they have made on the Palestine front. South and east of Beersheba the land is but a wilderness; northward and north-westwards we pass into districts which in the spring are great corn and pasture lands. Beersheba itself occupies a fertile, though treeless, expanse on the course of a great valley, which after running south from Hebron as the Wady-el-Khatil here turns westwards under the name of Wady-Bîr-es-Seba and deepens still further west into the Wady Ghuzzeh or the Valley of Gaza. The original site of the town of Beersheba (or Sheba) of Old Testament times was upon a lofty hill some three miles east of the present town. This hill is known as *Tell-es-Seba*, and upon it we have the superimposed remains of successive occupations from the Seleucid period backwards through Hebrew times to still earlier ages. Deposits of pottery enable archæologists to infer that this site was occupied altogether for considerably over a thousand years. Like all these ancient sites it is a place of considerable natural strength, and it is interesting to read that it was strongly fortified during the recent operations. After the Seleucid period a new town was built on the lower and better-watered ground where the modern buildings now are; the soil here is richly strewn with Roman and Byzantine remains, and several interesting rock-cut inscriptions have been recovered. The foundations of two Byzantine churches have also been uncovered. All this civilization decayed after the Arab conquest, and the site was utterly deserted—except by wandering Bedouin—until very recent years. The adventurous tourist who wandered far from the settled country did so at some considerable risk, and the accounts of the discovery by Professor Geo. Robinson, of Chicago, of seven choked-up wells there was read with great interest when published a few years ago. It may be mentioned, however, that Beersheba does not mean, as many suppose, the "Seven Wells" (actually there are more than seven ancient wells at this site), but most probably the "Well of the Seven," or, as is suggested in Gen. xxi. 31, "The Well of the Oath."

Only a few years before the outbreak of war the Turks decided to strengthen their southern frontier, and at the same time civilize and subdue the wandering Bedouin of this district. They cleared the wells of rubbish and, by establishing oil-engine pumps, obtained from them a perennial supply of good water. They built a Serai or Government House, a mosque, a post and telegraph office, and a Khan. Encouraged by the security thus afforded a number of merchants built shops, until the settled population must before 1914 have reached upwards of one thousand. The houses and streets were well supplied with water, and a number of eucalyptus trees were planted. An unusually enlightened Turkish Kaimakam or Governor, who really had his heart in his work, managed to convert this district into a little oasis of prosperity, where shortly before there had been nothing but desert. The small town with its smart new, red-roofed buildings, its garrison of Turkish cavalry, and its revived life was a pleasant contrast to the stagnation, desertion and ruin of a few years previously. Since the outbreak of the was Beersheba has come into much greater prominence as the chief depôt for the troops and stores accumulated for the attack on Egypt. It was soon connected up with Hebron and Jerusalem by an excellent carriage road, which was later prolonged south to el Auja. The southward extension of the Haifa-Damascus railway, which before the war was begun from Afuleh, in the Plain of Esdraelon, and was intended to link up with the Jaffa-Jerusalem Railway at Ramleh, was now speedily pushed on to Beersheba itself. This place thus became of great strategic importance as the place of junction of the main road through Central Palestine with the railway traversing the maratime plain.

When we consider the comparative abundance of water here, in this the "Negeb," or waterless "South" land, and the fact that it is the eastern end of the long line of defence which the Turks have fortified against us, diagonally from just south of Gaza, the importance of its capture will be realized as great. Those who were in Jerusalem last spring report that when the British forces so nearly got through at Gaza, the garrison of Beersheba fled, and the place was for some days entirely undefended. Its capture now after a stiff fight will doubtless make an even deeper impression in Palestine. To hold Beersheba is to hold the pivot of the whole Turkish defence line. In the waterless wilderness to the east—even in the rainy season—little serious opposition to a turning movement can be made when this oasis is in the hands of the attacking force. The occupation of Beersheba, though but the first step, is actually a very great stride into Palestine. E. W. G. M.

ROUMANIAN NOTES.

(From a Correspondent.)

Roumanian Supplies.

The Roumanian authorities are multiplying their efforts to avoid a repetition of the terrible situation which prevailed last winter in Moldavia. There is no possibility, unfortunately, of making home-production satisfy all the needs of the population, and, in the main, conditions of life will continue to reflect the state of affairs, in production and transport, of our Russian neighbour. At the same time nothing must be left undone to make the available land and labour as productive as circumstances allow. To that effect all market-gardening has been placed under the direct control of the authorities. Further, regulations have been issued making the cultivation of the arable lands compulsory, the Government supplying all the necessary seeds, as well as a working-capital varying from 60-80 fcs. per hectare, which is to be repaid without interest from the value of the future crop. Should circumstances resulting from the war prevent the farmers from gathering in their crops, they will be under no obligation to repay the advances made to them, and will receive in addition a compensation for expenses incurred in cultivation. In the same way the necessary labour will be procured by the local authorities.

Health Conditions.

România publishes an interview with Dr. Cantacuzino, Director of Public Health. In the army there is no epidemic. It is none the less true that we are faced with serious dangers, but we are well prepared for meeting any epidemic outbreak. Among the civil population typhoid fever is present on a small scale. This epidemic has spread somewhat of late; the fault is solely that of those who do not understand the necessity for their submitting to preventive measures. There is also an epidemic of jaundice, but that is not a serious disease. There is now no strong centre of infection, but only isolated cases of typhus; while we are able to keep the army immune by means of successive vaccinations, that is more difficult to achieve in the case of the civil population and of some of the military who avoid regular vaccination.

There was a serious danger of an epidemic of cholera, which broke out with certain force in the Dobrudja three weeks after the Roumanian mobilisation, and, as a result of contact with the Bulgarian population and troops. But the vaccinations carried out at the time not only staved, but actually suppressed, the epidemic—there is not a single case of cholera at present in the country.

We owe these results to the excellent work of our bacteriological laboratories. Not only have they covered all our needs, but they supply every month enormous quantities of vaccination material to the Russian army in Roumania. "You supply us with more doses of anti-tetanus serum than all the Russian and other bacteriological institutes together," declared the Chief of the Russian Medical Service.

Dr. Cantacuzino also mentioned the interesting fact that, while in Serbia mortality from typhoid fever was up to 50 and even 60 per cent., in Roumania it never rose higher than 15 per cent., except among the medical corps, where it reached 40 per cent.

That there is nevertheless still room for improvement is shown by the fact that during the first three weeks of August 436 deaths occurred, as against 100 births.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, Oct. 14, 1917.

The Loss of the "Cita di Bari."

The sinking of the Italian mail steamer "Cita di Bari" on her voyage from Gallipoli to Corfu has aroused quite a storm of indignation in the local Press. The Italian mail boats have so far been practically immune from submarine attack, and this disaster, therefore, came rather as a surprise, and is of particular interest here from the fact that the vessel carried about 350 Greek passengers, amongst whom were Consular officials who have come away from Turkey owing to the breaking off of diplomatic relations. These men, after having experienced the hardships of life in Turkey, and after long and painful journeys, have fallen victims of Teutonic barbarism when so close to their destination. The great loss of life is said to have been caused by the Huns firing on the passengers after they had left the ships in boats. This is the first disaster in which a large number of Greeks have lost their lives.

The Food Problem.

The census last Sunday seems to have been carried out as well as could be expected, and, as anticipated, the actual number of the inhabitants of Athens was found to be considerably less than the number of bread tickets which had been issued. The census showed the population of Athens to be 221,000, whereas 415,000 tickets were in circulation. The allowance of bread per person per day has been fixed at a quarter of an oke, equal to about 11 ounces. Each person was given a large card, marked into small divisions, one of which is to be detached daily and handed to your baker. Anyone leaving Athens must deliver his bread card to the proper authority.

There does not seem to be any improvement in the food question so far, and the tendency of everyone to hoard has the effect of immediately clearing off any necessary commodity as soon as it appears on the market. Matches, for instance, are practically unobtainable, and these and other articles are being taken over by the Ministry of Food, and will be rationed by ticket. The scarcity of fuel appears to be one of the greatest difficulties the Government have to contend with, as the train services have to be curtailed, and there is then insufficient means of bringing goods to Athens from the provinces.

It is announced that assessors have arrived in Salonika from England to assess the losses of the English offices in the recent fire. These losses are estimated to be as follows:—"North British and Mercantile," £1,200,000; "Sun," £480,000; "Northern," 250,000; "Patriotic," £200,000; "Union," £120,000; "Lancashire," £100,000; "General," £80,000; "Western," £48,000; "Central," £16,000.

The Venizelist newspapers make very sympathetic reference to the death of Mr. G. Stevens, the *Daily Telegraph* correspondent, and comment on the services Mr. Stevens rendered to Greece by his steadfast opposition to the Constantine régime. A public meeting is announced for the 21st instant to give expression to these sentiments.

THE CRUSADES.

At Sion College, on Tuesday, the Rev. J. P. Whitney (Professor of Ecclesiastical History at King's College) began a course of lectures on the Crusades. In the course of his remarks he said that during the whole period from the eleventh to the fifteenth centuries there was fighting going on between Christians and Mohammedans, but there were periods when this state of things was more acute. Eight such periods were recognised as the Crusades of 1095, 1147, 1190—of peculiar interest to us because of Richard I.'s part in it—1203, 1217, 1228, 1248, and 1270. The French nation played a predominant part in the Crusades, one result being that to-day the name Frank was a general term in the East for a European. The Crusaders found the Eastern Empire with its seat at Constantinople, then a great Christian city. The firmness of the empire was one of the great facts of history, for it gave fixed rule and general peace to the East at a time when barbarians had overrun the West. Besides the Eastern Empire, the Crusaders found the Turks, to whom they were, of course, hostile. The Empire and the Crusaders did not work well together, for the Emperor was naturally jealous of the crusading leaders, and his policy was different from theirs. Besides this, the Crusaders were of mixed nationalities among themselves, so that there was great lack of unity of control. Nevertheless, they had military success at first, and were able to take Jerusalem and to found Christian principalities in the midst of the more or less Mohammedan East. A long period of wars, followed by negotiations almost as fierce, ensued. Rivalries in trade and politics which belonged to the West were introduced into the East, and even the leadership of the Papacy, when it was made effective, was not able to unite the crusading forces. These difficulties reached their height in the Fourth Crusade, when the Crusaders sacked Constantinople and set up a Latin kingdom there.

CYPRUS NOTES.

(From a Correspondent.)

The Indebtedness of the Peasants.

The report of the Commission appointed to inquire into the extent and causes of indebtedness in the island should be one of particular interest, and it must be hoped that it will lead to some real betterment of the agricultural classes. The members are the Chief Justice, Sir Charles Tyser, Mr. J. C. Fenn, Chief Assistant Secretary, and Mr. J. S. Markides, Chief Registrar and Interpreter of the Supreme Court. Sir Charles Tyser has in several reports called attention to the conditions of village life as connected with usury. Mr. Fenn is intimately acquainted with the financial situation, having acted both as Treasurer and, for a considerable time, as Chief Secretary. Mr. Markides has had a long experience in various offices, and has been a remarkably competent interpreter in both District and Supreme Courts. A better choice could not have been made.

The High Commissioner, in his opening speech to the Legislative Council this year, spoke of the hopeless present condition, and stated that it must be provided that honest debtors who had done their best to fulfil their obligations, but failed, should be able to start afresh, after giving up their goods to the creditor, instead of having "nothing to look forward to but a life-long drudgery and dependency, or emigration to a foreign country." He referred to Solon, who had dealt successfully with a very similar state of things in Greece some 2,500 years ago.

Many interesting features of the present indebtedness of the peasantry will, no doubt, be brought to light, but it can hardly be expected that the conclusions to be drawn will differ much from those reached in the case of previous inquiries that have been made from time to time. It has long been obvious that no real progress can be made by the agricultural classes until some remedy is found against the curse of the usurer, who, as another report asserted, "still remains an incubus in every village in the island." Villagers must be helped with loans that will enable them to put into practice the lessons which the Agricultural Department is endeavouring to teach them. After many years of disappointment and unrealized schemes, it was believed in 1906 that an opportunity would be given to the Cypriot farmer by an "experiment" very similar to one which had been working successfully in the valley of the Nile. An agreement was entered into between the Government of Cyprus and the Anglo-Egyptian Land Allotment Company, which gave to the latter the exclusive right of establishing an Agricultural Bank in Cyprus for fifty years. The bank was duly opened. Its principal business was to make advances to the agricultural and industrial classes upon the security of immovable property, stock and produce, and upon personal and such other security as the company might determine. The rate of interest was not to exceed 9 per cent. The movement was in large measure due to the energy of Sir William Wilcocks, who paid many visits to Cyprus. The results have, however, been disappointing, and the hoped-for era of regeneration has not yet been inaugurated. It was also trusted by many that the law passed in 1914 "to provide for the Constitution and Control of Co-operative Credit Societies" would encourage thrift and help to free agriculturists from "the yoke which still lies heavily upon them." Hopes are now once more raised that the present inquiry will not, like so many others, have been made in vain.

The subscriptions received by the British Farmers' Red Cross Fund up to the week ended November 2 amounted to £714,875. A letter has just been received by the fund from the Acting Director of the Motor Launch and Hospital Ship Department of the British Red Cross Society, who has just returned from Mesopotamia, stating that the ambulance launch "May," one of the launches provided last year by the Farmers' Fund, has proved one of the most successful boats in the country.

CONDITIONS IN SERBIA.

Not long ago, in the Vienna Parliament, Deputy Dr. V. Ribar, protesting against the systematic extermination of the Serbian population, said:

Go to the Balkans, and you shall see how the former flourishing towns and villages are now but smouldering ruins. Not military necessity, but the deliberate will of the authorities has devastated our lands in such manner as has not been witnessed in Europe since Kossovo. Our unhappy people has been scattered to the winds; from whole districts the military authorities have carried off women and old men and children, just as did the Assyrians and Babylonians the conquered peoples of ancient times. From the vicinity of Nish alone the Bulgars have carried away 30,000 persons to the deserts of Asia Minor. It is a war of extermination of the Jugoslavs. The Allies speak about a restoration of Serbia and the unification of the Serbian race. *Serbia* they may save, but not the Serbs and Jugoslavs, for there will not be one there at all to rejoice in the blessing of peace.

In the Hungarian Parliament in Budapest a similar protest was raised by the Hungarian Deputy, Mr. Zoltan Vermes, who, referring to the barbarity of the Bulgarians and their crimes against the unfortunate population of Serbia, said:

As commandant of a detachment my duties called me to the mining village of Maidanpek, from which neighbourhood is obtained the pyrites necessary for the manufacture of munitions. The monarchy needs some 120,000 tons of pyrites, of which quantity this mine alone produces 40,000 tons; its regular working, therefore, is of capital importance for the monarchy. There are working in the mine 1,080 labourers, invalided soldiers, and interned persons from the Serbian civilian population. But the mine is adjacent to the Bulgarian administrative territory, where the Bulgarians pursue with the cruellest severity bands of insurgent Serbs, whose relatives they systematically put to death; thus at Maidanpek executions are the order of the day. Nobody troubles to bury the bodies of those who thus meet their fate; one after another whole villages are cleared of the friends and relatives of these unhappy people; the Bulgarians round up the people and send them off, some to the Dobrudja, others to Asia Minor. In this way farms are left masterless and cattle to stray over the country; and even the richest villages fall into a state of utter wretchedness, so that the workmen in the mine are unable with any certainty to procure even the barest necessaries of life. Representations had been made without result to the Bulgarian Government; it appears, indeed, that the matter is not urgent in Bulgarian eyes. Therefore, the moral obligation rests with the Bulgarian Government of taking the matter into its own hands and of trying to save the lives of at least a proportion of these poor people. But this is only a special instance; there is a crying need on every hand for a more humane administration of these lands. For nearly four years now children have gone without schooling, sick people have been allowed to die without any medical assistance or alleviations of any kind, loathsome diseases have spread among the people, and yet there is not the slightest attempt at any betterment of conditions on the part of the administration.

THE INFLUENCE OF M. VENIZELOS.

Lecturing at a joint meeting of the Historical and Classical Association at 22, Russell Square, on November 2, on "Venizelos and the Future of Modern Greece," Dr. Burrows said that in regard to material progress Venizelos made very little difference. From the establishment of the monarchy Greece had made great strides in prosperity and riches. There was also great progress in the spirit of freedom. Before this war Greek finance had gradually found itself on a very firm and sound basis. What corruption existed was the corruption of being easy-going and unwilling to offend friends. There was, however, before Venizelist times, a great amount of inefficiency. This inefficiency of administration wrought ruin in the army and navy and brought about the war against Turkey in 1897. The advent of Venizelos, Dr. Burrows continued, crystallised a renascence which had already begun. When he came the torch he carried was the torch of telling the truth, palatable or not, and that was the secret of Venizelos's strength and power. It was largely Venizelos's achievement to have built up the Balkan Alliance. During the Balkan war Greece, by having command of the sea, was able to isolate European Turkey from Asiatic Turkey. After that war Venizelos so wanted to keep Bulgaria in such an alliance that it was only as a last resort that he was driven to make the defensive treaty with Serbia in 1913. Even at the time of the treaty of Bucharest, if there had been any chance of Bulgaria to come to an agreement, Venizelos would not have asked for the Kavalla district. When Venizelos maintained that the Serbian treaty was valid he was right, and Constantine had now been proved wrong. King Constantine, with his eyes open, signed the treaty, and yet Constantine had the face to say the treaty was not valid. He was tempted by the German Emperor to come out on the German side at the beginning of the war and had been really on their side from the first. But that did not excuse our culpable mistakes in allowing him to deceive us and in giving him such wonderful chances. Looking back on the history of the war, we had no right to criticise Greece as a whole. The vast majority of Greeks never changed their minds as supporters of the Entente from first to last. We must make the Salonika front absolutely safe. If that were done there was at least the possibility of a Balkan *bloc* with us at the end of the war. That was the only way to bring Bulgaria to her senses.

NEAR EAST BOOKSHELF.

FRANCE AND THE EAST.*

M. Driault's work on the Eastern Question is a standard book, and he has done wisely to bring it up to date, so far as it can be brought up to date. Unfortunately, history moves too quickly in these days for the historian, and there are signs that the last chapter was written in the brief period between the intervention of Roumania and the fall of Bucharest. A remark, too, that the Eastern front has become as immovable as the Western is obviously no longer true, and the reaction of the Russian revolution, with the necessary (or unnecessary) consequences on the whole Eastern Question, consequently lies outside the scope of this book. That is one of the difficulties of writing contemporary history, and in this case contemporary history almost necessarily involves a certain amount of prophecy. And one can hardly blame the historian if he refuses the mantle of the prophet; his vocation has made him too painfully familiar with the unfulfilled prophecies of the past to compete in that dangerous trade.

The author, as is well known, takes a wide view of the Eastern question. Considering its essence to lie in the conflict between Christianity and Mohammedanism, he is forced by his thesis to examine the position not merely in the Balkans and Asia Minor, but from India to Senegambia, and to pass in review the colonial policy of all the Great Powers in Africa and Asia. It would be easy, of course, to pick holes in a narrative that is necessarily condensed. We think, for instance, that he gives too great credit to our own Government for a continuity of foreign or colonial policy. Before the last ten years or so it had certainly not been visible to Englishmen, and possibly a further examination of our political biographies, official documents and—if M. Driault is of the true heroic mould that befits a son of France—even of our Victorian statesmen's speeches will convince him that rather considerable fluctuations have occurred from time to time. It is true that the caravan has marched on in the end, but it has sometimes turned aside from the straight path when the political dogs have barked particularly loudly. His glowing account of the brilliant work done by France in the founding of her new colonial empire—a work whose excellence is becoming more and more understood in England, whose judgment in colonial affairs is at least that of an expert as well as a friend—is, however, a model historical summary, whose only fault is that it is not sufficiently detailed. But, in view of his main proposition, that the Eastern Question is emphatically one of rival creeds, he does not appear to bring out sufficiently one outstanding contrast between British and French administration. He remarks, quite truly, that France is introducing her civilisation, which is essentially Christian, in Mohammedan countries; and he suggests that it may be possible to fuse the two creeds and the two ways of life in one new culture, suitable to the country and the people, under French control. He does not elaborate this pregnant thought, no doubt for the reason that it would require a whole treatise to do so: but also he does not point out the contrast with the British system, which tends, so far as it can, to leave religious questions outside the ambit of statecraft altogether. The contrast is significant; it is impossible at present to say which method will be finally endorsed by history. It is always possible that both will have a partial success. Nor does M. Driault mention the fact, rather sadly admitted by many of our own luminaries, that in many, if not in most, parts of British Africa Islam is progressing more rapidly than Christianity. A study of the different methods pursued by French and British evangelists would be of great interest.

On the actual problem of the Near East, M. Driault is emphatic that the only solution, after a long and patient analysis of the various elements of the case, is that which he briefly describes as "the end of Turkey"—with Germany debarred from sharing in the estate as too late a comer to the sick man's bedside. In England at least there will be no disposition to criticise this attitude. On the other hand, as regards the federation or union of the Balkan States, he is pessimistic. The formation of the Balkan League, he remarks, was a miracle, and miracles do not commonly repeat themselves. He cites the Allied and German diplomacy of 1914-16 as evidence of the difficulty of accommodating their rival interests; but this is not altogether conclusive. The Allies were undoubtedly sincere in wishing to reconstruct a Balkan League, but their diplomatic methods were as unfortunate as their military ideas at that time, and Germany was frankly cynical in her policy. But cynicism is not necessarily a guarantee of permanent success.

We have only to add that since it is in the nature of things that an eighth edition of this book will soon be called for the author should at once add the additional chapter which recent events in Russia has now made inevitable.

*La Question d'Orient. Par Edouard Driault. (Librairie Felix Alcan, Paris. 7f.)

GERMANY AND THE BALKAN FRONT.

GREEK DIPLOMATIST'S REVELATIONS.

ATHENS, November 6.

The *Eleftheros Typos* publishes the following information regarding the offensive projected by the Germans in Macedonia—information which is known to emanate from a young Greek diplomatist who served in Berlin and afterwards at Berne where he remained until the dethronement of King Constantine, whose faithful servant he was, and who has now been dismissed from the service. He says that negotiations between the German Staff and King Constantine for an offensive began in 1915, when the Allies' forces in Macedonia were not formidable. The Germans, unwilling to employ their forces on the Balkan front, persuaded King Ferdinand of Bulgaria to undertake the offensive, and then General von Falkenhayn demanded King Constantine's assent. King Constantine replied that he himself had always advocated an offensive on condition that it was made only by the Austrians and Germans, as he did not trust the Bulgarians. The Germans thereupon officially guaranteed that the Bulgarians would evacuate Greek territory immediately after the Allies had been driven away, but King Constantine still hesitated, and the Germans then threatened to withdraw the guarantees they had given. At this juncture the Queen intervened, and King Constantine assented on the following conditions:—

1. The supreme command to be in German hands
2. No initiative to be allowed to the Bulgarian commanders.
3. The Bulgarians not to be allowed to enter Macedonian villages.
4. All damage caused and all requisitions to be paid for immediately.
5. No Bulgarian officer or soldier to be allowed to enter Salonika.
6. The Greek territory to be evacuated immediately after the operations were over.
7. Monastir to be ceded to Greece as compensation.

These conditions were proposed through a diplomatic channel, and Herr von Jagow replied that, as far as the conditions of a military order were concerned, means would be found to have them accepted by the General Staff, but he would not hear of the cession of Monastir. General von Falkenhayn apparently favoured King Constantine's conditions, and submitted them to the Kaiser, who referred them to Field Marshal von Hindenburg. Hindenburg, however, who was in constant disagreement with Falkenhayn, categorically declared that an offensive on the Balkan front was unprofitable, inasmuch as the concentration of the Allies' forces at Salonika relieved the situation on the Western front. Hindenburg further maintained that, if the Bulgarians were given the opportunity to occupy Salonika, they would immediately conclude peace with the Entente, while it was the Central Powers' interest to retain them as Allies till the end of the war. Hindenburg's determined attitude put an end to all idea of an offensive on the Balkan front, which, according to the dismissed Greek diplomatist, never took place and never will take place. Hindenburg's view, he says, has always prevailed.—Reuter.

	November			
14	1	Wednesday	29	29
15	2	Thursday	30	30

The Greek Minister was among the diplomatic visitors to the Foreign Office on November 2.

Lord and Lady Oranmore and Browne have arrived in London from Castle Macgarrett, Co. Mayo.

A Constantinople telegram dated October 31 announces that the Parliamentary Session has opened.

M. Voislav Antonievitch, the Serbian Chargé d'Affaires of the Legation in Rome, has left London for Italy.

Mme. Grouitch, the wife of the Serbian Minister at Berne, arrived in London on November 2 from Switzerland on her way to America.

A number of Serbian officers have been decorated by the Roumanian Government for their heroism when fighting with the Roumanian Army.

The Order of the White Eagle, 4th Class (with swords), has been conferred on Cdr. (Acting Captain) Dennis A. H. Larking, C.M.G., by the King of Serbia.

At a General Court of Governors of Guy's Hospital, Colonel Sir Francis E. Younghusband, K.C.S.I., K.C.I.E., was elected one of the Governors of the Corporation.

Sir Spencer Harcourt Butler, Lieutenant-Governor Designate of the United Provinces, had an audience of the King on November 5 at Buckingham Palace.

M. Milos Jadjiz, a sub-lieutenant in the Serbian Reserve, who is now at the Salonika front, has during the war lost six brothers, all of whom were killed in the ranks of the Serbian army.

According to an Athens message, Mr. Balfour's reply to Mr. Buxton in the House of Commons on the question of the position of Bulgaria has come as a great relief, and has created an excellent impression in Greek official circles.

On October 30 the King of the Hellenes visited the barracks at Athens and inspected the troops. He expressed his satisfaction at the new spirit of the officers, whom he urged to hasten the preparations for war in order to crush the Bulgar enemy.

On the recommendation of the Hellenic Government the King of the Hellenes (Reuter's Agency learns) has conferred the Grand Commandership of the Royal Order of the Saviour on M. Gennadius, the Greek Minister in London, for distinguished services.

M. Venizelos arrived in Rome on November 2, and subsequently proceeded to Nice, where he arrived on Sunday evening. Reuter's Paris correspondent reports that M. Venizelos is expected there when M. Painléve returns from Italy, and that he will afterwards proceed to London.

According to a statement made in New York by Mr. Frank W. Jackson, chairman of the Relief Committee for Greeks of Asia Minor, the Turk has turned against the Greek Christians in his dominions, and more than 700,000 have fallen victims to persecution in the form of death, suffering or deportation.

Mr. Frederick Ongley, Registrar-General in Cyprus, is on his way home on leave, and spending some time in Paris. Mr. Ongley is the best Turkish scholar among the British in Cyprus, and has been able to render good service on that account not only within, but also outside, the sphere of his own department.

The Foreign Secretary has appointed an Advisory Committee in London to consider the drafts of the legislation for Egypt which is being prepared by the Capitulations Commission in Cairo. The Committee consists of:—The Lord Advocate (chairman), Mr. Justice Rowlatt, Sir Mackenzie Chalmers, Sir Erle Richards, Mr. C. J. B. Hurst, Mr. W. R. Briscoe, and Mr. H. W. Malkin. The secretary is Mr. L. C. Liddell, 21, St. James's Square, S.W.1.

The offices of the Roumanian Government Committee of the Commission Internationale de Ravitaillement have been removed to Queen's House, Kingsway.

A memorial service for Lord Basil Blackwood, Grenadier Guards, will be held at the Church of St. Martin-in-the-Fields, Trafalgar Square, on Tuesday, at 12 o'clock.

Viscount Knutsford was the principal speaker at the annual meeting of the Highgate War Hospital Supply Depot on November 6, at which during the past year nearly a quarter of a million articles were made to be sent to hospitals in Mesopotamia, Serbia, Italy, Belgium and Roumania, and to the casualty clearing stations and hospitals in France.

Archdeacon Beresford Potter, since he left Cyprus, accompanied by Mrs. Potter, has had, it would seem, some unlooked-for experiences, if our information is correct. He decided to avoid the Mediterranean and to travel home by the Cape. But at Ceylon he found this was impracticable, and resolved to proceed by Japan and the Siberian railway. The outbreak of the revolution in Russia caused another change of plan, and he went viâ San Francisco to Canada, where he now is.

Sir Michael O'Dwyer, Lieutenant-Governor of the Punjab, speaking at the Jhelum Durbar (says Reuter's Lahore correspondent in a message dated November 4) said that the Government had not been slow to recognise the claims of those fighting, for it had placed at the disposal of the Commander-in-Chief 178,000 acres in the Lower Bari Doab colony, to be allotted as rewards to those who have rendered distinguished services in the field. The Punjab's contributions to the Indian Army since August 1, 1914, the Governor added, amounted to about 220,000 men.

During July, August, and September 592,240 books were sent from the Red Cross and Order of St. John War Library to the sick and wounded. Of these 199,320 were distributed in Great Britain, 27,000 in Alexandria, 21,800 in Malta, 36,680 in Salonika, 11,000 in Bombay, 47,920 in Busreh, 2,000 in Port Said, and 240 in Roumania. Gifts of books from the public are urgently needed, and should be sent direct to the Hon. Secretary, War Library, Surrey House, Marble Arch, London, W.1.

Reuter's Corfu correspondent writes that on his appointment as Italian Prime Minister, Signor Orlando sent M. Pashitch, the Serbian Prime Minister, a message expressing anew "the feelings of sympathy and solidarity felt by the Italian people towards the generous people of Serbia," and asserting Italy's faith in victory. To this M. Pashitch replied, saying that it was his "deep conviction that the Italian people, guided by its patriotism, which is proof against everything, and by its gallant army, which is ready for everything, will obtain a definite victory over the common enemy."

The Postmaster-General announces the loss through enemy action of parcel mails containing in most cases about a fortnight's postings from China, Hongkong, Siam, North Borneo, Straits Settlements, Ceylon, India, Mesopotamia, Aden, British Somaliland, Egypt, Cyprus and Malta, and dated as follows:—Shanghai, August 28; Hongkong, August 31; Singapore, September 10; Penang, September 13; Colombo, September 22; Busreh, September 15; Calcutta, September 22; Karachi, September 23; Madras, September 25; Bombay, September 27; Aden, October 5; Port Said, October 11; Cyprus, October 3; Malta, October 18. No letter mails were lost.

The Times correspondent with the Roumanian Army says that the anniversary of Queen Mary's birth was celebrated on October 29 in a spirit which showed the desire of the whole nation to manifest its deep love and gratitude for all that her Majesty has done for this country since the outbreak of war. Notwithstanding manifold difficulties and dangers, the Queen has always remained among her beloved soldiers in the hospitals, both throughout the hardships of last winter and during the heavy fighting this summer, encouraging and cheering by her presence the sick and wounded. Time and again her Majesty was to be seen in the hospitals right up at the front, and repeatedly she was exposed to the bombs of enemy aeroplanes. When those around her begged her to take shelter, she always refused, replying, "We are all bound to do our duty in time of danger," and proceeded with a smile on her errand of mercy as if nothing had happened.

APPOINTMENTS, PROMOTIONS, ETC.

The *London Gazette* announces that the King has approved the appointment of General Sir Arthur Arnold Barrett, K.C.B., K.C.S.I., K.C.V.O., and Lieutenant-General Sir William Riddell Birdwood, K.C.B., K.C.S.I., K.C.M.G., C.I.E., D.S.O., to be Aides-de-Camp General to his Majesty, in place of General Sir Beauchamp Duff, G.C.B., G.C.S.I., K.C.V.O., C.I.E., and General Sir John Eccles Nixon, K.C.B., Dated November 3, 1917.

Mr. T. F. D. Miller, K.C., has been appointed Chief Justice of the High Court of Judicature at Patna, in the place of Sir Edward Chamier, who has resigned.

M. von Etter, Russian ex-Minister at Teheran, has been appointed Minister to Portugal, and M. Stochin, Councillor of the Russian Embassy at Tokyo, Minister at Teheran.

OBITUARY.

COLONEL H. M. VIBART.

Colonel Henry Meredith Vibart, late Madras Engineers, whose death took place on November 1 at Woodlands, Henley-on-Thames, was born at Taunton in 1839. He was the second son of Mr. Henry Vibart, Madras Civil Service, and was educated at Addiscombe College, obtaining his commission in the Honourable East India Company's Engineers in the Mutiny year. He arrived in India in 1859, and was shortly afterwards appointed to the Public Works Department. He became Under-Secretary for Irrigation in 1879, and ten years later was appointed Superintendent Engineer. He retired from the service in 1891. He published the "Military History of Madras Engineers and Pioneers; an Account of Addiscombe, its Heroes and Men of Note"; "Richard Baird Smith, the Leader of the Delhi Heroes of 1857"; and a Life of General Sir Harry Prendergast, V.C., G.C.B., R.E.

Colonel George Dodsworth Stawell, whose death took place at Bristol on November 2, in his sixty-ninth year, received his commission in 1868, and was for some time Director of Military Education in India.

Lord Abercromby, whose death occurred in London last week, was a descendant of Sir Ralph Abercromby, who died at the battle of Alexandria in 1801, and whose widow was created Baroness Abercromby immediately after his death.

The death has occurred in India, at the age of 62, of Mr. R. L. Shubrick, who was appointed Superintendent of Gaols in Madras in 1890. He was the only son of the late General R. Shubrick and grandson of the late Sir W. R. Gilbert.

Major Linwood Field, M.C., R.F.A., second son of Mr. Moyle Field, late of the Irrigation Department, P.W.D., Punjab, was killed on October 26, while in command of a battery. He was educated at Wellington College and Woolwich, and obtained his commission in the R.F.A. in 1908. He served in South Africa and India, and went to the front with the Indian Expeditionary Force in 1914. He received the M.C. for great gallantry in saving the wounded under heavy shell fire last year.

Lieutenant-Colonel Henry Augustus Fitzroy Nailer, I.M.S., retired, has died at Bedford. Educated at Edinburgh University, he qualified as a Licentiate of the Royal College of Physicians and Surgeons in Edinburgh, and was on military duty till 1882, when he was appointed Civil Surgeon at Chingleput, reaching the rank of lieutenant-colonel. He was district medical and sanitary officer at Tanjore from 1899, and retired from the Service in 1903.

Mr. Reginald Pemberton Russell, C.S.I., whose death has occurred at Hill View, Uckfield, at the age of 57, was a son of the late Rev. S. F. Russell, rector of Isfield, Sussex. He was educated at the Royal Indian Engineers' College, Egham, and Coopers Hill, and was appointed to the Public Works Department in India in 1882. He served on the Punjab Irrigation Works from 1883 to 1907, when he was transferred to Burma, where he served as Superintending Engineer and Chief Engineer and Secretary to the Government.

The funeral took place on November 5 at All Saints', Ennismore Gardens, of Colonel R. C. Hare, of Reymerston Hall, Attleborough, Norfolk, who died on October 31. Born in 1844, he was the eldest son of the late Lieutenant-Colonel the Hon. Richard Hare and a great-grandson of the first Earl of Listowel. He became an ensign in the 22nd Cheshire Regiment, and later was appointed A.D.C. to Sir C. A. Windham, then Commander-in-Chief in Canada. After being adjutant to the Cheshire Regiment, he served through the Ashanti Campaign, and subsequently passed through the Staff College. He served in Cyprus as D.A.Q.M.G. to Viscount Wolseley, and was then appointed brigade major at Aldershot. In the Egyptian Campaign of 1882 he was twice mentioned in despatches, and received the medal, bronze star, and the brevet of major, and was appointed to the Medjidie Order, Fourth Class. Later he commanded the 64th Manchester District and the 24th Brecon District, and was made a C.B. in 1900.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

ADDINGTON.—On November 1, at Jhansi, India, the wife of Captain the Hon. R. A. Addington, of a son.

CARRE CARTER.—On October 31, at 77, Gunterstone Road, W., the wife of Major J. F. Carre Carter, I.A., General Staff, of a daughter.

YOUNG.—On October 22, at Ridgeway Place, Simla, the wife of Gerard Mackworth Young, I.C.S., of a daughter.

MARRIAGE.

STOW—NASH.—On September 17, at the British Consulate, Tunis, Lieut.-Com. Charles Fenwick Stow, R.N., youngest son of the late Rev. Fenwick W. Stow, Vicar of Aysgarth, Yorks, and Mrs. Fenwick W. Stow, of 14A, Edith Grove, Chelsea, S.W., to Cicely Ingle Nash, youngest daughter of the late Mr. and Mrs. Turrell Nash, Guildford, Surrey.

DEATHS.

LASSALLE.—On October 15, at Grasse, A.M., France, Lieut.-Colonel Lassalle, retired, Bengal Army, and Assistant Commissioner at Beawr and Agmere.

LIVINGSTONE.—On October 30, at Altrincham, Arthur William, late of Baghdad, youngest son of the late Alexander Speid Livingstone, aged 53.

RUSSELL.—On November 2, at Hill View, Uckfield, Reginald Pemberton Russell, C.S.I., late Secretary to Government of India, P.W.D., aged 57 years, eldest son of the late Rev. S. F. Russell, of Isfield.

KILLED IN ACTION.

RAWLING.—Killed in action on October 28, Brigadier-General Cecil Godfrey Rawling, C.M.G., C.I.E., commanding Infantry Brigade, beloved son of Mrs. Rawling, of 16, Montagu Street, Portman Square, W.

THE ALLIES AND ROUMANIA.

The moral of the grave setback in Italy is that the Allies cannot afford to regard their various fronts as so many watertight compartments, in each of which whatever happens is the concern only of those immediately in charge. Where the honour of all is pooled, so is their responsibility. If the Italian authorities were aware of the enemy's attempts to suborn the loyalty of the troops on the Isonzo, they did wrong to ignore them; but they were even more ill-advised to disguise the fact from the Allied Governments. The defence of that particular sector of the vast line which stretches from the channel through France, Italy, and the Balkans to the Gulf of Finland was not a purely Italian affair, even though Italian troops were unsupported save by a handful of Allied gunners. It would have been better, therefore, to have disclosed the special weakness to which this sector was exposed, in order that joint counsel might have been taken to cope with it. In Italy the mischief is already done, and other steps have had to be taken to make good the deficiencies in the co-operation of the Allies. It is not too late, however, to apply the experience thus gained. What has happened on the Isonzo may, unless the necessary precautions are taken, recur on other fronts. The signal success of their intrigues in the one case will make the Germans the more eager to redouble their similar efforts elsewhere, and the Allies should see to it that the danger is discussed with as much frankness by the authorities concerned as would be the shortage of munitions or the need for special help. But it is not merely to guard against intrigue that a tightening up of joint responsibility is required. A reverse at any one point affects directly or indirectly the whole of the long Allied front, and as far as possible the steps employed to obviate such an event ought to be applied with equal thoroughness in every sector. For the time being Russia drops out of the picture. If M. Kerensky really meant to suggest that she was "worn out," the reference must have been to that exhaustion that comes from over-talking and not from fighting. That the Petrograd for which he speaks is not Russia may be inferred from the scarcity of food in the capital, while plenty reigns elsewhere. The Russian giant is bemused with the drugged wine of revolution, but as soon as he has thrown off the stupor his strength will return to him.

Fortunately for the Allies the vastness of Russia prevents the enemy from pressing home his advantage, and having helped to place a dangerous weapon in the giant's hand, he leaves him in the hope that he may do himself a mortal injury. A more vulnerable spot was offered by Italy, and there for the present the Germans stand committed. If they have resources for another assault, the blow must almost inevitably fall upon Roumania, and even if the season of the year or other causes hinder military operations, intrigue no less insidious than that which undermined the defence of the Isonzo will be set on foot in the Carpathians and along the Sereth. Are then the Allied Governments better informed of conditions on the Roumanian front than they were of the situation in Italy? We have no means of knowing; but there can be no doubt that more attention is likely to be given to the subject, if public opinion in Great Britain shows an enlightened interest in Roumania's position. A message from Odessa to *The Times* states that in well-informed quarters the opinion is expressed that the Russian and Roumanian troops will succeed in maintaining their positions throughout the winter, enabling the Roumanian Court and Government to remain in residence at Jassy. For both armies, however, the correspondent adds, the question of supply is now becoming urgent. It requires no special knowledge to understand the real significance of this message. The fact that even the possibility of a further retreat in Roumania had to be contemplated is serious enough; but as no limit could be put to the extent of the failure of the Russian Army, there could be no certainty in regard to the degree in which the Roumanian Army might be involved. Apart from this consideration, however, there is clearly a more preventable danger to be guarded against—the shortage of food. In the narrow limits of the territory left to them the Roumanians, we believe, have done wonders; but they have not been able to grow sufficient grain for the requirements of their own population and of the large Russian Army within their borders. Foodstuffs must reach them from without; that is to say, they must come from or through Russia. There is abundant evidence to prove that Russia has in the country more than enough for her own needs and those of Roumania. Defective organisation and other causes have led to local shortages, and practically nothing is reaching Roumania. Even if the Allies felt obliged to stand aside, while Russia worked out her own salvation, they cannot allow the Roumanians to starve; still less can they remain indifferent to the prospect of the Russian and Roumanian armies leaving their present line in Moldavia in order to find in Russia the food that they know is to be had there for the asking. In a matter of this nature the Allied Governments can be deterred by no fears of wounding susceptibilities. Between now and January Russia's railways and her whole system of transport must be reorganised with a view to providing both Russian and Roumanian troops with the supplies of which they are in urgent need.

When the history of Roumania's part in this war comes to be written, it will be seen that she has a special claim on the respect and admiration of her Allies. No people, probably, has found itself so rapidly as the Roumanians. There were many aspects in Roumanian public life before the war that were regretted by the more thoughtful Roumanians themselves. The gulf between the peasants, who formed nearly five-sixths of the population, and the upper classes, the lack of the sense of responsibility shown by the latter and the low standard of administrative efficiency—these and other admitted failings have been shed with wonderful completeness under the pressure of the crisis through which the country has passed. There is now an admirable solidarity between all sections of the nation. The army under French training has been welded into a splendid fighting machine, and no praise is too high for it for the manner in which it checked von Mackensen when the Russian withdrawal in the north threatened to involve the whole eastern line. The organisation behind the battle front leaves nothing to be desired; the Roumanian railways are in good working order, and if supplies of food and munitions are forthcoming, Roumania, with the help of the Russian troops fighting with her, will yet render a good account of herself. It rests with her Allies to see that her efforts are adequately supported and in time.

LORD HARDINGE AND MESOPOTAMIA.

H.H. the Maharaja of Bikanir, on the occasion of laying the foundation-stone of the Hardinge Municipal Hall at Bikanir (says Reuter's Bombay correspondent), paid an eloquent tribute to Lord Hardinge. India, the Maharaja said, never had a better or a truer friend. In referring to the Mesopotamia report, the Maharaja declared:—"India realises that the initial failure of the campaign was due to a military system which sooner or later was foredoomed to fail, and especially so under the strain of a war of this magnitude. India knows that only theoretically can Lord Hardinge be held responsible."

JUSTICE IN INDIA AND EGYPT.

(*Continued.*)

By COLES PASHA.

It will be seen that the French classification of offences into crimes, delits and contraventions has, as far as the Courts are concerned, been entirely abandoned. Plurality of judges, another important feature of French justice, is now only considered necessary when dealing with the grave offences tried by the Assize Courts, from which there is no appeal except on a point of law (Cassation).

Whether the abolition of the right of appeal is or is not a reform was a point much discussed in Judicial circles when the change was made. It is remarkable, too, that this change in the law in Egypt was brought about at the very time that a Court of Appeal in criminal cases was being created in England. But anything was better than the old system in Egypt, where the accused had to appear and witnesses were generally recalled before the Court of Appeal, necessitating months before a prisoner was finally convicted. The Indian system of the Appeal Court confirming the sentence or otherwise on evidence recorded by the lower Court without calling up the accused or witnesses did not find favour in Egypt, though suggested as an alternative to Assize Courts.

In every other respect the reorganised Tribunals are undoubtedly a success. The Cantonal Courts (the late Lord Kitchener's creation) are probably copied from Petty Magistrates' Benches in certain districts in India. These are the only Courts in Egypt not officered by the regular Judiciary. Personally, I am of opinion that these Cantonal Courts should have increased powers, and the head of the sub-district (Mamur-el-Merkaz) should be ex-officio chairman. This would bring these Cantonal Courts more in line with third-class magistrates' Courts in India. I fancy, too, that, as local government develops in India, we shall see more of these Benches gradually taking the place of local third-class magistrates.

The question will probably now be asked, Why with all these admitted reforms in Egypt do murders and robberies still continue so prevalent? Is it to be attributed to the fact that the administrative officers are still without any magisterial powers? This undoubtedly was the principal cause in the early days of the occupation; but so many years have passed since the Mudir was dethroned that I doubt whether reinstating him in his former position on the Indian lines would now have the desired effect. Public security must, I think, be improved by some other means.

In an earlier paragraph a brief reference was made to the Parquet system. Some years ago an English barrister found himself attached to the Parquet on his arrival in Egypt, and, so the story goes, naïvely asked "What is the Parquet?" It is a very natural question for anyone not conversant with French Codes to ask, and I will endeavour to answer it.

The Parquet is the Public Prosecutor's Department, presided over by the Procureur-Général, without which no French Court can take action. The members of the Parquet are solicitors and barristers combined, pleading to the briefs they have themselves prepared. In Egypt they are also Committing Magistrates, taking the place of the French Juge d'Instruction. Except when arresting defenders caught *in flagrante delicto* the police as a body have no defined powers other than may be delegated by the Parquet in each case. A Parquet inquiry is not a "Police Investigation" in the Indian and English sense, but a "Judicial Inquiry" admissible as evidence, and has in consequence to be very carefully prepared. I have been told by more than one Judge of Appeal that they rely more on this preliminary inquiry than on evidence subsequently recorded by the Courts, when "the witnesses have been got at." This statement would most certainly shock an Indian magistrate, but it must be remembered that the whole tendency of the French Code is to complete the trial before the Court is reached. On the other hand, any Indian police officer will tell you that in the East evidence has to be extracted, and it by no means follows that the original statement of a witness is the one to be relied on!

In Egypt there is no law of evidence to guide a magistrate or police officer, and I leave my readers to imagine the amount of irrelevant matter which usually forms part of a *procés verbal* (Judicial Proceeding), to say nothing of contradictory statements made by the same witness. All this has to be waded through, and sifted by the judge dealing with the case. Luckily for the prosecution, Egyptian judges are not so particular as in India, and evidence is accepted which an Indian magistrate would not listen to. Notwithstanding this, the percentage of acquittals is very high.* An Egyptian Court gets through many more cases in a day than an Indian Court, the Court Proceeding being often very summary when compared with the Parquet inquiry.

We thus see that it is the Parquet and not the Police who are responsible, or should be held responsible. But the trouble does not end here. The members of the Parquet are highly educated (Egyptian Schools) young men, undoubtedly more intelligent than the average police officers, and probably of a higher standard of morality, but their forte is with the pen and not in the saddle. They visit scenes of crime, it is true, but never sleep out, if they can possibly avoid it, pinning their faith on cross-examinations conducted in their own offices, where witnesses are all summoned. Again, their long residence in Cairo to complete their legal training has left them out of touch with village customs almost as much as a European. Finally, as subordinates of the Ministry of Justice, they are officially quite independent of the Mudir, the head of the Province, who takes his orders from the Minister of the Interior.

Theoretically, the legal acumen of the Parquet and the local knowledge of the Police should prove a combination hard to better. But in practice it is by no means a success, as the interference of the Parquet in the large majority of misdemeanours and in all serious crime enables the police officers to shift the burden of responsibility to other shoulders. Unfortunately, too, this drawing up of long *procés verbaux* is a very infectious disease, and the amount of time and ink wasted by police officers in the petty cases left to them to deal with is appalling, time which would have been more profitably spent inspecting villages and making themselves generally acquainted with their charges.

This is all very different from the Indian system, which provides for the assistance of the Public Prosecutor in serious cases, but only to advise on points of law and to speak to a brief prepared by the police. In India the police know that not only are they responsible for the prevention of crime, but also for the detection and prosecution of offenders.

Of course, the Egyptian Parquet should take the place of the Indian Criminal Investigation Department, and it is a matter of comment that the English police officers have been allowed to create a criminal investigation department alongside the Parquet. I doubt whether there is any country in the world where, for its size, so much money is expended on the prosecu-

tion of offenders, and, I may add, with such poor results.

To the Indian authorities I say, therefore, stick to the Courts and your Code of Criminal Procedure. You will not improve on it, even if Nationalists have earned the right to govern themselves to a certain extent.

The Egyptian Government has paid heavily all these years in both blood (murders) and treasure (stolen property) for its obstinacy in not adopting the Indian system from the first, but to go back to that system now is, I am afraid, too late. There is no reason, however, why the existing Parquet system should not be vastly improved. Let the whole Parquet, with the Procureur-Général, be transferred to the Interior, abolishing or amalgamating with the Parquet the Criminal Investigation Department. Let them cease to be Committing Magistrates, which power may be granted to Summary Judges (see table printed in last week's issue). Make the young members of the Parquet understand that they are not magistrates so much as legal advisers of the police, and with them will be held jointly responsible by the Minister of the Interior for the prevention of crime. See that the responsibility is exacted, and in a few years there will be no longer any necessity for H.B.M.'s representatives to write apologetic reports for the state of public security.

I must not close this article without some reference to the Bureau of Antecedents, and system of finger prints organised by Harvey Pasha, Chief of the Cairo Police. It is the one department in Egypt which has nothing to learn from either India or England, and I might almost say France. I remember some years ago a high judicial official stating in one of his annual reports that he had yet to learn that there were many Egyptians with criminal antecedents! Harvey Pasha's Criminal Antecedent Sheets with finger prints have altered all this, and, what is more to the purpose, the Egyptian Courts now no longer hesitate to accept these sheets as evidence of identity. It was only a few weeks ago that I read about some magistrate in England who was converted to the finger-print system, apparently much against his will. I, too, constantly read in the Press that such and such a warder or constable was being put up as a witness to identify the prisoner as having previously served a long term of penal servitude. When I mentally compare this crude procedure with the system appertaining in Egypt, well, I smile!

CORRESPONDENCE.

THE HON. EVELINA HAVERFIELD'S COMFORTS FUND FOR SERBIAN SOLDIERS AND PRISONERS (REGISTERED).

TO THE EDITOR OF "THE NEAR EAST."

Sir,—May I ask the hospitality of your paper to publish a special urgent appeal on behalf of Serbian soldiers and prisoners?

In conjunction with the Serbian Relief Fund, I am arranging to send comforts to the Serbs in the trenches at Salonika. These men, it should be remembered, form an army of "lonely soldiers," who have now no country from which to receive parcels.

Those of us who have seen the Serb under all conditions —when flushed with his brilliant victories over the Austrians in 1914; when, alone and unsupported, facing the combined attacks of Austria, Germany and Bulgaria in the autumn of 1915—those of us who shared with him hunger and captivity, and others who took part in that terrible march across the Albanian snows, realise that every effort must be made to contribute to the comfort of Serbia's heroic army throughout the coming winter.

In appealing for woollen comforts, I would also ask for concertinas, flutes and mouth-organs. If all readers of this letter would put even sixpence into an envelope and send it to me at the above address, think what a substantial help that would be!—Yours faithfully,

EVELINA HAVERFIELD.

22, Old Burlington Street, W.1.

TANGIER TO TEHERAN

It is to be hoped that some conscientious German professor has been compiling a list of the references to *Kultur* in public utterances during the war, with a view to publishing a Cult of Kultur Honour List. The Emperor, of course, would easily head the document. Even if the Germans could disguise from themselves the fact that the mere mention of the word gives the world furiously to laugh these days, one would have thought that they would by now have grown tired of the oft reiteration of it. But no; their hide-bound complacency is proof against anything, and quite solemnly they proclaim to the world the solidarity of German and Turkish co-operation in the peaceful works of *Kultur*. If I were a member of the Committee of Union and Progress, I should no doubt rather like the idea, but if I were a German I should blush for *Kultur*. Seeing that it is essentially of German invention and of German make, one would want to know how it came about that it was so easily assimilated by Turks alone of the people of Europe and Asia.

***

The decipherment of the messages exchanged between the Athens and Berlin Palaces seems unlikely to increase the world's respect for either ex-King Constantine or his better half. The treachery of the former in offering to attack the Allies in the rear, if only his Royal Brother-in-law would attack them in the front, will hardly surprise anyone, after the revelations that had already been made before this latest batch; and if anybody is surprised by ex-Queen Sophie's reference to the Allies as "infamous pigs," they must have lost sight of her Hohenzollern ancestry. As tales that I have told before in these columns would indicate, the temper of this Royal Lady has apparently developed at the expense of her manners. When she found herself (and her husband) in a tight place, it was quite natural for her to relieve her feelings in language which elsewhere than in Prussia would be left to the fish market.

***

That useful, if unornamental, animal, the Pig, will no doubt experience a certain relief if it learns that a comparison has been instituted between itself and the Allies. The only other comparison drawn between it and Man, in this war was, I believe, that instituted by Jemal Pasha in the moment of exasperation when he heard of the Goeben's treachery in the Black Sea. Then, you will remember, he exclaimed furiously: "*Ce cochon de Souchon!*" But Admiral Souchon was, after all, only a German; and the pig must have felt pretty bad about it ever since.

***

The air raids by moonlight have undoubtedly caused many people in this country to pay more attention to the movements of the moon than ever they have done before. One heard such strange-sounding expressions as, "I'm afraid we are going to have a clear moonlight night," and "There doesn't seem much hope of clouds or rain just now, does there?" These expressions do not, as a rule, indicate fear, but rather annoyance. But the fact remains that the moon has become an object of special interest. One lady remarked to me that she supposed the moon was more closely watched and more talked about now than ever before. She was surprised when I pointed out to her that in Moslem lands the new moon that begins Ramadan and the one that ends that month of fasting are both looked out for by many millions of people with an anxiety that no thought of Gotha or Zeppelin can stir in the stolid Englishman. It is possible that the Germans may greet the appearance of the full moon with wild enthusiasm, as affording them a fine chance for "frightfulness"; but I am quite sure that their enthusiasm is as nothing compared with that of the Moslem who hails the moon that puts an end to the Fast of Ramadan.

A KITCHENER MEMORIAL CHAPEL.

The Lord Mayor presided at the Mansion House on November 2 at a meeting of the Council of the Lord Kitchener Memorial Fund, when a committee was appointed to confer with the Dean and Chapter of St. Paul's as to the practicability of erecting a memorial chapel in the Cathedral. With regard to other aspects of the memorial, it was stated that a committee of educational experts is preparing a scheme of Kitchener scholarships for sons of officers and men serving in the present war, and for young men already in the fighting forces whose academic studies have been interrupted by the war.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Vote of Thanks to the Army, Navy, and Mercantile Marine. Oct. 29.

[Considerations of space prevented any reference last week to the Vote of Thanks to the Army, Navy and Mercantile Marine. No summary can do justice to the speeches delivered by the Prime Minister and Mr. Asquith on that occasion, but we may append here the references to the Indian Army.]

Mr. LLOYD GEORGE: ". . . . And then there is India. How bravely, how loyally she has supported the British arms! The memory of the powerful aid which she willingly accorded in the hour of our trouble will not be forgotten after the war is over, and when the affairs of India come up for examination and for action." . . .

Colonel YATE: May I, as an old Indian officer, be permitted to say one word to associate myself with what the Prime Minister has told us regarding the doings of the Indian Army in this war? We must remember that the 70,000 men who formed the first force from India landed in France in the autumn of 1914, just about the time of the first battle of Ypres, and that they came just in time to fill up the gaps then, and to help to hold the trenches until our New Army was ready. Those men came over at a moment's notice—the first Indians, I may say, that ever came over to fight in Europe, utterly strange and foreign to the country. We all know that Indians can stand heat, and we know, as the result of the Tibet Expedition, they can stand cold, but what Indians cannot stand is wet and cold. Now, the way those 70,000 men stuck it out there through the whole of that terrible winter of 1914-15 is a thing that should always remain in our memory for generations to come. They took their full share in the trenches. I have often heard described the terrible sufferings they went through—how, when they got out of the trenches, their feet were so swollen that they could hardly crawl back to their billets; how the little Ghurkas were up to the waist in mud, and it took two men to get each of them out of the trenches. Well, those men stuck it all through the winter of 1914-15, and we owe them undying gratitude for what they did. The infantry afterwards went to Mesopotamia. The Indian cavalry are still in France, and will have their fourth winter there this year. Not one of those men has had leave, and yet there is not a murmur. Those Indian cavalrymen have lands and have great cause to want to get home, and yet there they are. We hear continual complaints here of men not getting leave for eighteen months, yet those men have been nearly four years in France and have never had any. It is the same with the Indian Army in East Africa; the men have never had any leave, and we hear no grumbling. The Indian Army also has served in Egypt and done well there. They have also won admiration in Salonika and elsewhere. I need not say a word about Mesopotamia or as to how the Indian forces stuck it throughout the whole siege of Kut. The country owes a great debt of gratitude to the Indian Army, and I am proud to think that they have now received this mark of appreciation.

Wheat Elevators. Oct. 31.

Colonel YATE asked the Secretary of State for India if he would state what steps were being taken by the Government of India to further the erection of wheat elevators in India.

Mr. FISHER: I understand that the Punjab Government are constructing, as an experimental measure, an elevator at Lyallpur, the centre of the wheat trade of the Punjab. The war has delayed its completion. Until the system has been practically tried its suitability to Indian agricultural conditions cannot be confidently predicted.

Tobacco for Soldiers.

Colonel YATE asked the Secretary of State for India if presents of tobacco and cigarettes sent to soldiers in India were admitted free of duty; and, if so, why the same privilege was not accorded to the officers.

Mr. FISHER: The concessions already granted are as stated by the Secretary of State in reply to the hon. member for the College Division of Glasgow on June 21 last. After careful consideration of various proposals the Government of India have decided that they cannot further extend these concessions.

Royal Indian Marines.

Colonel YATE asked the Secretary of State for India whether the petition presented to the Viceroy and Governor-General of India in May, 1916, by the commanders and senior lieutenants of the Royal Indian Marine had yet been considered, and, if so, whether he could now state the terms of the reply.

Mr. FISHER: No information is available here regarding the petition in question. But the Government of India have proposed certain measures which were sanctioned in May and July last respectively, namely:—(1) Grant of certain supernumerary promotions in succession to officers specially retained on the active list since January 1, 1916, in the rank of first-grade commander and chief engineer. (2) Adoption of naval designations for officers of the executive and engineer branches of the Royal Indian Marine, including the grant of the rank and title of captain to officers hitherto designated first grade commanders.

Forestry in Cyprus. Oct. 25.

Colonel YATE asked the Secretary of State for the Colonies whether he would state what amount had been sanctioned this year for the development of forestry in Cyprus; what area of land had been declared State forests; what laws had been issued for the protection of these forests; and what steps had been taken for the encouragement of the growth of the carob tree and other similar products of the island.

Mr. HEWINS: The answer to my hon. friend's four questions are:—(1) £40,843; (2) over 700 square miles; (3) the Forest Laws of 1879, 1881, and 1889, the Fuel Ground Law of 1901, and the Goats Law of 1913; (4) improved methods of cultivation and of protection against pests have been introduced, and facilities for instruction in agriculture and forestry have been provided at various centres.

The Secretary for India's Absence.

Sir JOHN JARDINE asked the Prime Minister—(1) Whether he would state which of the Secretaries of State, during the absence in India or on his way there and back of the Secretary of State for India, has and performs the powers and duties relating to the government or revenues of India contemplated by the Government of India Act, 1915, and in particular what Secretary of State during the absence of the Secretary of State for India from the realm does, as provided in Clause 2 thereof, superintend, direct and control all acts, operations and concerns which relate to the government or revenues of India, and all grants of salaries, gratuities and allowances, and all other payments and charges out of or on the revenues of India; (2) which of the Principal Secretaries of State is, during the absence from the United Kingdom of the present Secretary of State for India, responsible to the Crown and Parliament for the exercise of the Royal prerogative in the Government of India; (3) whether he would state what officer of the Crown does, during the absence from the United Kingdom of the present Secretary of State for India on his expedition to India, exercise the duties of convening and deliberating with the Council of India and of voting at meetings of that Council, and in particular in regard to such matters as Section 28 of the Government of India Act, 1915, requires to be decided at a meeting of the Council of India with the concurrence of a majority of votes in respect of raising money, mortgaging estates, making contracts, and giving assurances.

The CHANCELLOR of the EXCHEQUER, replying to Sir J. Jardine, said:—Technically my right hon. friend the Secretary of State for India, during his absence from this country, retains responsibility for the due and proper exercise of the powers vested in him by the Government of India Act, 1915, and an Act of Parliament would be required to relieve him of these responsibilities; but the Cabinet were of opinion that as a temporary expedient the following arrangements would suffice. Despatches to India require the signature of the Secretary of State. Any Secretary of State may act for any other, and at present the despatches are being signed by my right hon. friend the Secretary of State for the Colonies. Most of the powers of the Secretary of State for India are exercised by the Secretary of State in Council, and the Act provides for meetings of the Council for the transaction of business in the absence of the Secretary of State. Council continues to meet weekly, the Vice-President presiding, as required by the Act. Urgent questions of the first importance will be decided by the Cabinet. Questions of importance, but not of great urgency, will be decided after the Secretary of State for India's views have been obtained by telegraph. Questions of less importance will be decided in the Department in accordance with ordinary Departmental procedure. Lord Islington, Parliamentary Under-Secretary of State, represents the Secretary of State in the Ministry and in Parliament.

Commander WEDGWOOD: Do I understand that Lord Islington is not actually acting in place of the Secretary of State at present?

The CHANCELLOR of the EXCHEQUER: Yes, he is acting for the Secretary of State, so far as anyone can act for him.

Commander WEDGWOOD: And has the powers which the Secretary of State would have in Council?

The CHANCELLOR of the EXCHEQUER: That is subject to what I have already said: "So far as it is possible for anyone else to act for him."

Mr. CHAMBERLAIN: Is my right hon. friend aware that the Vice-Chairman of the Council selected from time to time by the Council, and in the absence of the Secretary of State from Council meetings, takes the chair; also that the Parliamentary Secretary of the office is not a member of the Council, and has no right to speak there, though he habitually attends its sittings?

The CHANCELLOR of the EXCHEQUER: I was not aware of that.

[Mr. Chamberlain subsequently corrected his statement by saying that, in consequence of the absence of the Secretary of State for India, the Under-Secretaries of State, though not voting in Council, were now empowered to address the Council on subjects which come before them.]

Replying to Mr. LOUGH, the CHANCELLOR of the EXCHEQUER said: We could not have made any other arrangement except by an Act of Parliament. The arrangements to be made in his absence were submitted by the Secretary of State for India to the Cabinet, and approved by them.

East African Campaign (Indian Troops). Nov. 6.

Colonel YATE asked the Under-Secretary of State for War whether he could state what arrangements had been made to inquire into the condition of the Indian troops serving in East Africa, with special reference to their medical equipment, convalescent treatment, and rationing.

Mr. MACPHERSON: Yes, sir; a special inquiry is being made by officers who have been deputed for this purpose.

THE PRESS ON THE NEAR EAST.

The Future of Albania.

Miss M. E. Durham has written an interesting article on the Albanian question in the *Contemporary Review*. A devoted friend of Albania, she has the firsthand knowledge of the country that enables her to penetrate below the surface of the feud of rival chiefs and tribes, and what she invites her readers to look upon is a people with a national instinct strongly developed and consciously striving throughout the generations for political unity and independence. Miss Durham, in popular language, "has no use for" Essad Pasha. She is prepared to welcome an Italian protectorate, with a foreign prince as ruler. Her solution of the Albanian question is as follows:—

France and Italy have now reclaimed those districts for Albania; France has declared Koritza an Albanian republic, and has again hoisted the Albanian flag there. The reason why Albania's foes are so anxious to deprive her of Koritza is that there are large deposits of brown coal and copper in the neighbourhood. And they hope by depriving the Albanians of all their cultivable land and mineral resources to make independent existence impossible for them.

Albania's future must now be considered. It has been amply proved that a mixed Commission of control is useless, as the Commissioners work each for his own country and not for Albania. Greece and Bulgaria, when first liberated, were given strong protectors, and financed till able to stand alone. Albania should receive similar protection. And of the many Powers Italy seems the best qualified for the post. It is very much to her interest to have a strong Albania and a friendly one on the Adriatic coast. Albania has traded amicably with Italy since the early days of the Venetian Republic, and, as we have seen, Venice and Albania together resisted the Turkish invasion.

Another proven point is that Albania's worst troubles have been caused by her rival Beys. Old Prenk Bib Doda, head of the Mirdites, remarked cheerily one day to the Prince of Wied: "If you want to make a united Albania you must hang Ismail Kémal, Essad Pasha, and me—don't forget me!" It is not necessary to take such drastic measures, but nations on all sides are throwing off their hereditary despots, and the Albanians are well aware that the Beys, who have torn Albania to pieces in the past, must not be allowed to do so in the future. There is not one hereditary Bey whom the nation as a whole would now accept as ruler. They ask for a foreign Prince, but a better one this time—and protection.

Italy, if she will see that Albania's frontiers are so rectified that all Albanian districts are included within it, and will say, "Hands off!" to would-be intruders, would give such satisfaction to the whole nation that no objection is likely to be made to her holding Valona with a small garrison. But it must be clearly understood that no attempts at Italianising are made, and that Albania is free to develop on her own lines and save her own soul. Such an arrangement would make for future peace. Albania divided between the Serbs and Greeks would be only a future Poland and a source of great weakness to those who annexed her. The Albanians are second to none in the Balkans for energy and intelligence, apt both at trade and handicraft. Other Balkan peoples have been given their chance. The Albanian has struggled for freedom as much as any of them. Let us hope that his day, too, will now dawn.

THE EDUCATION OF WOMEN IN EASTERN LANDS.

There was an interesting discussion at a meeting of the Société Internationale de Philologie on Monday, when Lady Stuart delivered an address on the position of woman, and, still more, of the child in East and West. She said that one of the links which should unite East and West was the education on proper lines of the mothers of this country and of those of India. The present system of education in this country she condemned, as not taking into account the individuality of each child, and she outlined a scheme for the education of the women and children of India on better lines.

Mufti Mohammed Sadig said that much of what had been said by Lady Stuart was applicable, not only in India, but to the whole of the East. Over thirteen centuries ago the Holy Prophet had perceived what was required as to the education of the young, and had solemnly declared that Paradise lay at the feet of the mother.

Professor Léon said that he did not know India; but that, so far as Turkey was concerned, for some time past the Government there—particularly during the reign of the ex-Sultan—had been making efforts to educate the female population. Many girls' schools had been established, a large number of them being organised at the cost of Abdul Hamid's privy purse. The education given therein was similar to what used to be a girl's education in England.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Brief but significant reference is made in the White Paper on Malta in 1916-17, some extracts from which are given elsewhere, to the effect of war conditions in the Colony. Like other parts of the Empire, Malta has been affected by the increased cost of the necessaries of life, and the influence of this factor has, it is stated, been accentuated there because of the high proportion of the industrial and labouring classes to the total population. This factor has had the natural effect of preventing a corresponding rise in wages, with the result that every advance in the cost of living has been acutely felt. The situation which has thus arisen has been met by Government measures of a similar nature to those which have been adopted in this country. Steps have been taken for the contral of prices and the maintenance of supplies, and these objects are being attained by the operations of a Food Control Board and a Supplies and Prices Board.

***

Financial and trade matters during the year are very briefly summarised in the report, and I must, therefore, withhold extended comment until the arrival of the annual Blue Book. It may be noted, however, that the finances of the Colony have sustained a slight set-back, and that owing to increased expenditure there was a debit balance of £2,304 on the year, as against a surplus in 1915-16 of £52,613. Trade conditions in general were satisfactory. Imports were well above the average, while exports showed an increase of £30,803. During the year considerable progress was made in agriculture; 42,687 acres were under cultivation, as against 41,614 in the previous year, and the area of uncultivated land had diminished to 3,979 acres. Of this area 18,330 acres were under cereals, an increase of over 4,000 acres, and it is pointed out that the advance is to be attributed to the high prices obtainable for produce.

***

A correspondent of THE NEAR EAST gives some very interesting particulars this week of the latest development of German methods in Roumania, which make it clear that matters are pursuing exactly the same course there as in Belgium. It seems that the German authorities in the occupied territory have now issued an order for the liquidation of concerns in which the Allied subjects are interested. This latest example of peaceful penetration is one which particularly affects this country, for, as our correspondent shows, British interests in Roumania are greater than those of any other of the Allies. In this connection it will be noticed that the present order only affects this country, France, and Belgium; and that American and Italian interests are so far untouched. One wonders at the idea at the back of Germany's mind in these subtle distinctions.

***

No doubt the principal reason for the order is to be found in the extent of British interests in Roumania, since while Germany must know that her coming defeat will render anything she does now null and void, she is probably under the impression that her action will cause a good deal of annoyance. It may also be due to the desire to render the process of reconstruction as complex as possible. In the case of any other country one would hesitate to draw this deduction; but Germany's conduct during the war has been such that even this intention cannot be dismissed as out of the question. Incidentally I imagine that the first sign that the process of confiscation was in operation was afforded by the report of the treatment accorded to the Bank of Roumania in Bucharest, to which I referred recently.

***

In imposing an excise duty on sugar manufactured and consumed in the country the Egyptian Government has adopted a prudent method of raising additional revenue. Sugar has been selected for this taxation for the very good reason that its price in Egypt has kept far below what it brings in Europe. Its price works out roughly at 3d. per pound, and the duty of £E.14, which is estimated to produce £E800,000 a year, is expected to add 1½d to the price, an addition which, it is maintained, the public can well afford to bear. There is no possibility of the increased price affecting consumption and so hindering production, for it must be remembered that export requirements will readily absorb any surplus that may exist. It may be pointed out in this connection that the export of sugar has greatly increased since the commencement of the war, and last year 28,000 tons were exported a total which, according to present indications, will be easily surpassed this year.

***

I think it may be of interest to my readers to give the figures and particulars of the redemption arrangements so far as is known of various Turkish note issues, which are covered in one form or another by the Central Powers. The first issue was £T5,661,000, repayable in gold six months after peace, and secured by gold deposited in safes in Germany and Austria. The second and third issues, amounting to £T7,800,000, and £T11,700,000 respectively, are covered by German Exchequer bonds, and are to be repayed in gold a year after peace. The fourth issue, amounting to £T27,777,940, is covered by German bonds deposited in Constantinople, and its term of redemption in gold is from three to seven years after peace; and the fifth, totalling £T32,000,000, is also covered by German bonds, and is redeemable in gold in from eight to eleven years after peace. The last issue of notes covered by Germany amounted to £T50,000,000, and was made against the deposit of German bonds. The total value of the notes issued in these circumstances amounts, therefore, to over £T134,000,000.

***

Signs have not been wanting for some time that Germany's Near Eastern allies are no longer quite so friendly disposed to Germany's commercial methods as they were. The latest indication of this emanates from Bulgaria, where, according to a correspondent, whose message appears on another page, in order to take public attention from the war, wide schemes are being undertaken for the promotion of trade. The motive no doubt has Germany's full approval, but the means adopted are evidently the cause of considerable anxiety, for she sees that the process of keeping the Bulgarian public quiet will entail serious drawbacks to her own commercial enterprises in that country. There is just a suspicion, of comic opera about the business; for Germany is suffering from too frequently demonstrating her methods, which, judging by the correspondent's description of the expansion of Bulgarian banking enterprises, that country must have studied to considerable advantage.

***

I am glad to note that next year's British Industries Fair will be on a more pretentious scale than on previous occasions. This institution in the course of its short life has already firmly established itself in public favour, and its promoters are so impressed with its success that they rightly look upon it now as an annual event. It is certainly a most valuable medium for its purpose: the capture of enemy trade. On each occasion the fair has been held, buyers have come from all parts of the world, and much business has been done, and the development of the project suggests very forcibly that if the fair does not actually eclipse the Leipzig Fair after the war it will at any rate prove a most formidable rival to that event.

***

The August return of the National Bank of Egypt of the Egyptian note circulation shows that at the end of that month the total note circulation was £E18,400,000, an advance of £E1,100,000 on the July figures. The gold reserve against the note issue amounted to £E4,482,309, as against £E4,852,609, while the holding of special British Treasury bills came to £E4,717,691, as against £E3,797,391. The holding of Egyptian Treasury bills was unchanged at £E2,876,250. There was also no change in the amount of Egyptian Government securities and securities guaranteed by the Egyptian Government, but British Treasury bills and Exchequer bonds amounted to £E5,768,239, as against £E5,218,239 at the end of July.

GREAT BRITAIN, SERBIA, AND ROUMANIA.

Development After the War.

It is probably not an exaggeration to say that the most difficult problem of reconstruction after the war will be found in the Balkans, and, if it is difficult, it will be so because the needs of the Near East are as yet only imperfectly understood in the West. There is a tendency to think that the word "settlement" covers all that is required, and that when that process has been accomplished nothing more will be necessary. It is well, therefore, to emphasise the fact that so far from this being the case, the task of seeing that the Central Powers make due reparation for the damage they have done in Serbia and Roumania will only be the first duty of Great Britain and her Allies. Settlement in that limited sense would merely secure these States their former existence, and that is not enough.

A Final Settlement.

The chief object of the Allies is to achieve a settlement of such a nature as will, if not prevent, at least render remote the possibility of future wars. It would be the very negation of this policy if the Balkan States were restored without being strengthened, for it is certain that, be the results of this war ever so unfavourable to the Central Powers, Germany and her Ally will still continue to cast longing glances towards the East, and when time has enabled them to recover to some extent from the strain of the war they will only be deterred from translating these glances into action by the fact that the way to the East is barred by strong independent communities. This was far from being the rôle of Serbia and Roumania before the war, but it will be theirs in the future, if this country sees to it that the development of their material resources is not hampered or hindered by the lack of capital. We say this country, because Great Britain alone of the Western Powers (America excepted) is likely to be in a position to help other countries after the war. Her assistance will in the first place take the form of loans, but these will require to be supplemented by private enterprise, and the extent to which this will be forthcoming will depend entirely on whether financiers can be induced to take a large view of their obligations. They will be faced with a profusion of promising opportunities at home and these will no doubt tend to diminish their interest in foreign undertakings especially in a field like the Near East which they have hitherto regarded as precarious, and to induce their co-operation to a requisite extent it will be necessary not only to impress upon them the importance of the issues at stake in the Balkans, but also the fact that capital invested in countries like Serbia and Roumania is likely to prove in the end a far from unremunerative investment. Once they understand the position they may be trusted to take the right view of their responsibilities.

There can be no question of the character of the issues at stake. The problem is briefly whether or no we are willing to prevent the possibility of a return to pre-war conditions in Serbia and Roumania, with all that would imply. To ignore the needs of these countries, or only to give them half-hearted assistance, would mean that as soon as the Central Powers had in some measure recovered their strength, they would again find an easy field for their commercial penetration in the Near East, and once more we should see Serbia economically in the grip of Austria-Hungary, and Roumania being "peacefully" exploited by the Ally of the Dual Monarchy. The mere contemplation of this possibility is enough, and we must hope that nothing will be left undone to prevent the remotest chance of its recurrence.

Economic Prospects.

It may possibly be asked whether the prospects of the economic independence of Serbia and Roumania are such as to justify optimism. As to this there is little room for doubt. Neither country, it must be remembered, has enjoyed a very long period of independence, and their existence has been maintained under the worst possible conditions. They have had to face external dangers from many quarters, and their economic development has been carried on under the hopeless handicap of having to be constantly prepared to defend their hardly-won freedom. But despite the fact that war and the preparation for war have occupied the greater part of their energies to the detriment of internal affairs, both countries have, all the same, been able to make a considerable economic advance, and it is certain that their position would have been materially improved before the war, if only they had had adequate financial assistance. In this respect, of course, Roumania has been much better off than her neighbour, for the reason that her vast oil resources have attracted capital from all parts, and have indirectly tended to draw attention to the potentialities of the country. But the work of development there has only begun, while in Serbia, which has been practically neglected by foreign capitalists, very little progress has been made in the realisation of her undoubted resources. The primary need of both countries is for communications of all kinds, if their industrial possibilities are to be realised, and this requirement is particularly pressing in the case of Serbia, in order that she may not be compelled to avail herself in the future of the trade routes of the Central Powers. Once the roads, railways, and it may be added ports, are adequately developed both countries will be on the high road to economic freedom.

Pre-War Schemes.

Wide schemes of development of this nature were, as a matter of fact, on foot in 1914—a fact which speaks volumes for the energy and the recuperative powers of these States, seeing that a comparatively short interval had elapsed since the Balkan wars. In Roumania, indeed, a vast field was being opened up for engineering enterprise. It was proposed to erect works of various kinds in the Dobrudja, and there was to be much road making and railway construction there, while in Roumania proper new railways and bridges were to be constructed. The proposals were not, however, limited to work of this character. They also included town planning to some extent, and in Bucharest itself it was intended to build a great central railway station, a new town hall, and also larger Government offices. Serbian development was to run on very similar lines. There, also, much railway construction was in view. A trans-Balkan railway from the Danube to the Adriatic was to be completed, there was to be a line from Uskub to Monastir, and the Salonika railway was to be linked up with other lines. In addition, there was in view the canalisation of the Morava river, with the idea of the reclamation of vast areas of uncultivated land. All these schemes were contingent, of course, on financial facilities from abroad, and it is doubtful whether capital would have been forthcoming sufficiently quickly to make rapid progress possible. After the war it will be the duty of this country to see that it is possible to proceed with this construction at once as a preliminary to the industrial development of these countries. Failure in this respect will not only postpone the industrial future of Serbia and Roumania, but it may even mean that when it comes it will be through the medium of the Central Powers—a fact which is sufficient in itself to set failure on one side.

The Position of Bulgaria.

Even when adequate assistance has been given to Serbia and Roumania to assure them a prosperous future, it is by no means certain that the task of Great Britain in the Balkans will be completed. The prosperity of the Balkan countries is, for various reasons, dependent to some extent on the condition of their neighbours. In other words, affairs in one district have a habit of interacting elsewhere, and it would be the height of bad policy if Great Britain were content to promote the establishment of a series of Naboth's vineyards in the Balkans for the envy of less fortunate neighbours. It may, in short, be necessary, if after the total requirements of our friends in the Near East have been completely satisfied, to make loans for the purposes of development even to a country like Bulgaria, which has taken arms against us, for it must be remembered that a nation whose economic circumstances are indifferent must always be a danger to peace; for a discontented people are readily induced to engage in warlike adventures, on the principle that nothing can happen which is likely to alter their state for the worse, while the hazard of war may conceivably mean the dawn of better things. In this fact lies a clue to past history in the Near East. When the war ends Bulgaria's position will be in every way inferior to that of her Balkan neighbours, and it will be a long time before she will be able to look to her German Allies for assistance. Her economic position in the meantime is likely to do anything but reconcile her to the growing prosperity of her former opponents, and thus assistance given to them alone can hardly advance the hope of a permanent settlement in the Near East. The idea of helping Bulgaria is admittedly repugnant to our sentiments at this moment, but when the time for help comes it will probably be found that the recipient is no longer the country ruled by a Coburger and governed by a clique in German pay. The aim of the Allies must be a federated Balkans; everything possible should be done to bring that about; and, having brought it about, to see that it is maintained in prosperity on a sound basis.

U.S. LOAN TO ROUMANIA.

Coincident with the news that a conference has been sitting in London to consider the Roumanian situation (says Reuter's Washington correspondent in a message dated November 5), it is announced here that the United States have advanced 3,000,000 dollars to Roumania through Russia.

MALTA IN 1916-1917.

A Satisfactory Position.

A White Paper has just been issued containing a report on the Blue Book for Malta for 1916-17, from which we give the following extracts :—

The revenue for the year 1916-17 was £460,165, and the expenditure £462,469; there was, therefore, an excess of expenditure over revenue of £2,304. The total amount collected on dutiable articles imported for his Majesty's Naval and Military Services, and subsequently refunded to the Imperial Government in the form drawback, was £38,352. The actual revenue for the year was, therefore, £421,813, and the actual expenditure £424,117. The net surplus on March 31, 1917, stood at £43,074, as against £45,378 on the corresponding date of the previous year.

Imports and Exports.

The total value of the imports of merchandise, including the value of goods entered by parcel post and excluding bullion and goods imported for transhipment, was £3,318,412, as compared with £3,213,890 in 1915-16, showing an increase of £104,522. The value of imports during the year was £835,945 above the average for the past three years. The value of exports amounted to £589,552, as against £558,749 in 1915-16, showing an increase of £30,803 in the year under review. Food, drink, and tobacco account for £168,384 of the total, raw materials for £369,402, manufactured articles for £13,265, and miscellaneous exports for the remainder.

Agriculture.

The total area of land under cultivation was 42,687 acres, as against 41,614 in the previous year, while the area of uncultivated land was estimated at 3,979 acres, as against 4,780 in 1915-16. At the end of the year under review, the number of holdings was estimated at 11,107 (the average acreage being 3.7 acres per holding), as against 11,095 in 1915-16. The principal agricultural products were cereals (including wheat), barley, and "mischiato" (a mixture of both), forage, potatoes, cumnin-seed, and onions. The total area under cereals was 18,330 acres, as compared with 14,157 in the previous year, the increase being due to the high prices of wheat, barley, etc. The total yield was :—Wheat, 30,160 quarters; barley, 18,856 quarters; and mischiato, 4,982 quarters.

The area under beans and other pulse was 2,005 acres, against 2,231 acres in 1915-16, and the total yield was 3,430 quarters, as compared with 4,386 quarters in the previous year. The area planted with potatoes was 3,190 acres, as against 3,161 acres in 1915-16, and the total yield was 190,900 cwts., as compared with 304,500 cwts. in 1915-16. The quantity of imported potatoes during 1916-17 was 49,836 cwts., of which 47,386 cwts. were used as seed and the rest consumed locally or re-exported.

The area planted with onions was 1,279 acres, as against 1,219 acres in 1915-16. The yield amounted to 6,054 tons, as compared with 6,607 tons in the previous year. Cummin seed was planted on 923 acres, against 2,597 acres in 1915-16. The yield amounted to 3,725 cwts., as against 13,795 in the previous year. The total quantity of oranges, lemons, and mandarines gathered is estimated at 169,500 dozen, as against 181,750 in 1915-16. There was no exportation of oranges during the year.

Cotton was grown on 817 acres, as against 946 acres, and the total yield was 158,420 lbs. (or an average of 193 lbs. per acre), against 183,580 lbs. (an average of 194 lbs. per acre) in 1915-16. The average price per lb. obtained was 9¼d. The quantity exported was 102,434 lbs., as against 22,778 in the previous year. 10,913 acres were under clover, barley green, vetches, etc., as against 11,012 acres in the previous year. The total yield amounted to 323,114 loads of ten bundles each, as compared with 310,415 loads in 1915-16.

GERMAN METHODS IN ROUMANIA.

"Liquidation" of Allied Interests.

(From a Correspondent.)

An order has been issued by the German authorities in the occupied territories of Roumania arranging for the liquidation of undertakings in which the preponderating capital, either directly or indirectly, belongs to British, French, or Belgian citizens, or undertakings which are conducted or supervised from British, French, or Belgian territory. This also applies to British, French, or Belgian shares in an undertaking. The new order is based on the German order concerning the compulsory management of enemy undertakings in Belgium, which was proclaimed on February 17, 1915, and amplified by supplementary provisions on February 18 and December 30 of that year.

British Interests Concerned.

Great Britain, France, and Belgium have mostly invested their capital in the petroleum trade, the capital invested by France amounting to 45, of Great Britain to 115, and of Belgium to 10 million lei. The Italian capital invested in the petroleum trade was estimated in 1914 at ten and the American capital at fifteen million lei. As will be seen from the order, only British, French, and Belgian undertakings are affected at present. Amongst the British undertakings affected by the new order the foremost is the Bank of Roumania, Limited, which was founded in 1865, and is the oldest of the larger Roumanian Banks, besides being the Court bank of the Roumanian Royal Family. Before the entry of Roumania into the war this bank had a capital of about forty-five million lei. In none of the Roumanian banks had France an overwhelming amount of capital invested, nor is the Belgian influence in the Roumanian banks so great that the Belgians hold a controlling position in any particular institution. If one examines the number of British, French, and Belgian undertakings, it will be seen that British interests are, comparatively speaking, more affected than French.

BRITISH COMMERCIAL BANK.

The share interest in the British Commercial Bank, Limited, having been acquired by a well-known financial group, all the directors, namely, Mr. Gerald Walton Williams, Mr. George Grinnell Milne, the Hon Mark Francis Napier, and the Hon. Edmund William Parker, have retired from the board in favour of representatives of the purchasing group. Mr. G. H. Butterfield remains as manager.

COMMERCIAL INTELLIGENCE.

At a meeting of the Commercial Committee of the House of Commons on Wednesday a report from a Sub-Committee was considered and adopted on the Government scheme for a Commercial Intelligence Service. The view is expressed that the present proposals should be given a fair trial, though the committee remain of the opinion that a Ministry of Commerce should be created, and they trust that this development will follow in due course.

FRANCE IN MOROCCO.

The Work of Development.

Lecturing for the African Society at King's College, London, on November 2, on "The Work of France in Morocco," Mr. J. M. McLeod, British Consul at Fez, declared himself to be an enthusiast with regard to France's work in that country during the past five years. Discussing what had been accomplished, he said that the first step had been the establishment of a friendly feeling, and the fostering of local trade and the establishment of a medical service helped most effectively in attaining the desired result. "So complete has been the success," he added, "that, notwithstanding the numerous temptations afforded by the war, and the intrigues of our common enemy, not a single area has tried to secede from French influence." Veterinary, agricultural, and meteorological services had been established, and attention had been paid to forestry, the preservation of ancient monuments, and the administration of justice.

Financial Policy.

As regards the financial policy pursued by France, Mr. McLeod said that £1,450,000 had been spent on roads, £400,000 on hospitals and dispensaries, £400,000 on schools and colleges, £80,000 on irrigation, £40,000 on the preservation of historic monuments, and £2,000,000 on the port of Casablanca. Light railways extended over 250 miles; there were 1,000 miles of mule tracks for wheel traffic in dry weather, and 250 miles of macadamised roads. The new schools numbered about 70, with 6,000 scholars; there were high-class, secondary, and primary schools for Europeans, Franco-Arab schools for girls and boys, technical schools and workshops, and schools for the children of Senegalese soldiers. France, he went on, might not be able to continue her past liberality; she would have to take stock of the natural resources of the country, and the Protectorate would have to adopt the arduous but wholesome method of self-help. In paying tribute to the work in Morocco of Sir John Drummond-Hay, Mr. McLeod said that it was Sir John's great treaty of 1856 which first put foreign relations with Morocco on an indisputable footing, and provided the basis on which foreign influence could be brought to bear on the country.

Sir Harry Johnston, Vice-President of the African Society, who presided at the meeting, said that the admirable work already achieved by France gave promise of still greater development in the opening up of Central Africa. Lord Carnock said that France's energy had been almost American in its "push," and warmly acclaimed the policy of the "open door" and equality in trade. Dr. Churcher and Mr. Travers Buxton also joined in the discussion, and expressed keen appreciation of the work of France in Morocco.

ENGINEERING NOTES.

Compressed Gas for Motors.

Allusion was made in last week's Engineering Notes to a compressed goal-gas equipment for motor vehicles. The cylinders, made of metal and specially constructed to meet a pressure of 250 atmospheres (3,750 lb. per square inch), are made in various dimensions, the largest being 48 inches in length by 8 inches in diameter. Such a cylinder at a pressure of 125 atmospheres would carry about 170 cubic feet of gas. We now hear that another equipment has recently been brought out, with cylinders made of a composition of rubber and canvas, and other materials, which is giving very satisfactory results. The cylinder, about 54 inches long by 15 inches diameter, and weighing about 60 lb., will hold, it is said, the equivalent of two gallons of petrol. Therefore, rating 250 cubic feet of coal-gas as being equivalent to one gallon of petrol, the cylinder would carry 500 cubic feet of gas, or, on the assumption of ten miles to the gallon of petrol (= 250 cubic ft. of gas), the cylinder would contain fuel for twenty miles. Thus, two or three of these cylinders coupled up and carried on the roof of the car would represent the equivalent of four or six gallons of petrol, sufficient fuel for forty or fifty miles. The interest which has been aroused by the rubber and fabric cylinder for carrying coal-gas under high compression has, apparently, encouraged a well-known rubber firm to take up and equip further premises to be devoted exclusively to this new branch of industry.

A Motor Street Washer.

A probable disillusion for a traveller in the East is the uncleanliness of the streets. The cause may be traced to the climatic conditions, to the inadequate system of road making, to the lack of modern methods and implements for cleaning the streets, and not infrequently to the Oriental apathy of some municipal authorities who adhere to the old hand-brooms and watering barrels because they have not seen or heard of the modern mechanical means for street cleaning, etc. A motor street-washing-machine which has recently been inspected at work by the municipal authorities of a London district would undoubtedly interest all municipal authorities in the East. The vehicle is fitted with a tank capable of holding 1,100 gallons of water, and the water is sprayed on to the road surface through two spherical nozzles, fitted in front of the chassis, under a pressure varying from 36-60 lb. per square inch, at an angle of 45 degrees, by means of a centrifugal pump driven from the engine. This high pressure water loosens the dirt, and the road surface is cleansed by means of rubber squeegees, made in three sections fitted on to a hinged framework, fixed under the chassis about midway between the front and rear axles, and free to adapt itself to inequalities of the road surface. It is claimed that twenty to twenty-five miles of roadway can be washed in a day, and the machines can also be used, if required, for ordinary street watering. Apart from the obvious merits of the machine in view of the present shortage of labour, and the satisfactory results, such a machine would be a boon to many towns in the East.

Petroleum in Great Britain.

We had occasion in previous engineering notes to refer to the possibility of striking oil in commercial quantities in this country. Since then the Government Bill making provision for oil-searching in the United Kingdom has been brought forward, but in spite of the speed with which the Bill is progressing in the Parliament, and the experts' opinion, there are still many who doubt whether oil in commercial quantities will ever be found here. Yet there are abundant proofs that true oilfields exist in England as well as in Scotland. Probably it is not well known that as early as 1847 a petroleum spring was discovered in Derbyshire, which for two years yielded about 300 gallons daily of a dark, thick oil, and then dried up, but scientists whose advice was asked at the time did not know much about it, and the spring was abandoned. Later in 1859 oil was struck in Scotland, where the Broxburn shale-oil works were established and a regular home supply of paraffin was secured. This was followed by just as satisfactory results in other parts of Scotland, and the success of these Scottish oilfields would have been greater had the source of the American rock oil not been found about the same time. That natural oil, requiring far less treatment, and being in great abundance, had the effect of paralysing the Scottish oil industry. In 1892, after a slight earthquake shock in Somerset, there appeared considerable quantities of petroleum in a water well, but after several barrels had been secured the supply ceased. The results of recent borings at Kelham, near Newark, Norfolk, and other districts also proved the existence of oil. With regard to Heathfield, which we mentioned in previous engineering notes as a promising field, it is perhaps not well known that near the Heathfield railway station the railway company started boring in 1896 to find water, but after going some hundred feet down gas was discovered. This was utilised by the railway for the lighting system of the station, and it was also used in Heathfield itself for a time. A company was formed to exploit the gas, and found it in every way satisfactory, pure, and of exceptional heating quality.

A foreign expert recently expressed to the writer his firm belief that England will soon be found to be one of the important oilfields in Europe.

BULGARIAN BANKING ENTERPRISE.

Anxiety of German Interests.

(From a Correspondent.)

Following the example of the Germans and Young Turks, the Bulgarians have recently contracted a downright mania for reforms. In order to divert the attention of the public from the want existing in all circles owing to the interminable war, reform and reorganisation is being made in all directions with the support of the Government, and banks and limited companies are being formed on all sides for the promotion of trade.

Recently the Bulgarian Trading Bank ("Bulgarische Handelsbank") made a new issue of shares, and now the "Bulgarische Kreditbank Ghirdap" is calling for subscriptions for six million lewa new shares. Both undertakings have a strictly national character, and desire to work without German capital or German "help." A Vintner's Bank ("Losarbka Banka") has just been established with a share capital of four million lewa, to be devoted to the vine-growing and wine trade, whilst the "Rosowa Banka" will concern itself with the development of attar of roses undertakings.

Naturally, the German banks are not allowing themselves to be stifled easily, and therefore a branch of the Deutsche Bank has recently been opened in Sofia, and a branch of the "Diskontogesellschaft" has also been established under the name of "Welika Bulgaria" (Greater Bulgaria), with a capital of 500,000 lewa, in order to promote the mining industry. In order to flatter the Bulgarians and to make them subject to German wishes, the Germans promise Bulgaria on the one hand the annexation of the Roumanian Dobrudja, and on the other hand the restraining of German firms from participation in Bulgarian "national" undertakings.

POST-WAR FINANCE.

The current issue of the *Fortnightly Review* contains an open letter by Mr. Oswald Stoll addressed to Lord Milner, in which the writer advocates his theory of the popularisation of public credit for the benefit of the general industrial community, taking for his text Lord Milner's "England in Egypt." "Our present and future obligations," he says, "are really crushing." I will again quote from your book and say: 'By far the most effectual way of ultimately lightening that and every other burden of the people is to develop still further the productive powers of the country, and perhaps the Empire.' Now, just as the high native authority, whom you quote, once said: 'If your object is the prosperity of Egypt create a reservoir,' I say to you: 'If your object is British prosperity open freely to the British industrial community the existing reservoir of British credit.' You have said: 'Egypt is a country which cries aloud for the application of capital to elicit its great latent wealth.' So the whole field of British industry in its perilous condition of increasing obligations and denudation of resources cries aloud for the application of the equivalent of capital not only to elicit its great latent wealth but also to prevent a terrible impasse. The proposed activities of small groups of financiers will not do. There is much more to be done. Fixed productive capital is the vast reservoir already created which holds a wealth of British credit which can be to the British industrial community what oil sent through pipe lines is to Rockefeller, or water from Assouan to the controllers of the Nile delta. You said of Egypt: 'The question of creating a vast reservoir to collect the river water in the months of abundance, in order to give it out again in the months of drought, is therefore the most interesting problem, which now confronts, not only the engineers, but the financiers of Egypt.' In our case the vast reservoir exists in the form of the credit system and its implications; the engineers and the financiers have long had a monopoly of its productive waters. There is enough for them still, and they are welcome to it. But more must be added in both quantity and quality and liberally distributed among many others who can establish a right to it."

LANCASHIRE COTTON.

The Question of Supplies.

(From Our Own Correspondent.)

Manchester, Wednesday.

The position of affairs in our industry is getting more abnormal from week to week. There seems to be no end to the upward movement in prices. In this connection fresh records seem to be established from day to day. Considerable interest has been taken especially in fine spinning circles in the official estimate of the Egyptian cotton crop by the Alexandria General Produce Association, the forecast being 6,250,000 to 6,500,000 cantars, as compared with a yield for last year of 5,126,000 cantars. Some merchants here seem to think the estimate rather generous, but the outlook for supplies is undoubtedly encouraging. The question of importance to people here is how to get the cotton to Lancashire on a freer scale. The same thing applies with regard to the American staple. In the Liverpool market at the moment there are more buyers than sellers. A large inquiry has come round in Egyptian yarns, and from day to day a substantial business has been done at hardening rates. The position of producers of fine combed numbers is particularly strong, and undoubtedly many firms are making a lot of money. In cloth for Egypt there have been indications of rather less activity. Many houses are waiting for more promising news relating to shipping facilities. Goods are undoubtedly backing up in the Manchester warehouses waiting for boats. In piece goods for India a considerable inquiry has come round, and a fairly healthy turnover has transpired in light finishing and bleaching fabrics. More sales put through in grey shirtings for Calcutta. There has been no move on the part of exporters to China. Manufacturers continue to derive support from Government contracts, and the home trade has again done well. The position of American spinners is stronger than ever. Some producers have declined to quote owing to the uncertainty as to raw cotton supplies.

TRADING WITH THE ENEMY.

The Controller of the Foreign Trade Department issues a new list of additions to the Statutory List of firms of enemy nationality or enemy association with whom persons in the United Kingdom are forbidden to trade. Copies of this list can be obtained at a trifling cost from the Superintendent of Publications, H.M. Stationery Office, Imperial House, Kingsway, W.C.

INDIA'S JUTE CROP.

Final Estimated Output for 1917.

The *Indian Trade Journal* has published the final forecast of the 1917 jute crop in Bengal, Bihar and Orissa, and Assam, based on reports received by the respective Departments of Agriculture, as follows:—The area under jute in the three Provinces this year is put at 2,729,699 acres, as compared with 2,702,699 acres in 1916, an increase of 27,000 acres. The final estimated output for the three Provinces is 8,904,364 bales in 1917, as against 8,379,853 bales in 1916, an increase of 524,511 bales. In Bengal (where on an average of the five years ended 1915-16 the area under jute represents 87.7 per cent. of the total area under jute in British India) the weather was favourable for the crop in its early stages. July was generally seasonable, although the crop in some districts suffered from insect and fungus attacks. The crop may be described as a very good one, on the whole, in most of the Eastern Bengal districts, moderate only in Northern Bengal, and good in Western Bengal. The final acreage figure for that Province for 1917 is returned as 2,412,427 acres, as compared with 2,383,562 acres in 1916; and the estimated output this year is 7,948,956 bales, as compared with 7,497,875 bales in 1916, an increase of 451,081 bales.

SUBMARINE WARFARE.

The Admiralty makes the following return of arrivals, sailings, war losses, and unsuccessful attacks during the week ended November 4, 3 p.m.:—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft):—

Arrivals	2,384
Sailings	2,379

British merchant vessels sunk by mine or submarine:—

1,600 tons gross or over	*8
Under 1,600 tons gross	†4
British merchant vessels unsuccessfully attacked by submarines	‡6
British fishing vessels sunk	Nil

* Includes two sunk during week ended October 14.

† Includes one sunk during week ended October 14.

‡ Includes two attacked during week ended October 14, one attacked during week ended October 21, and two attacked during week ended October 28.

COMPANY NOTES.

Dividends, Payments, etc.

The court of directors of the Royal Mail Steam Packet Company have resolved to pay out of the profits of the current year an interim dividend for the half-year ended June 30 last, at the rate of 5 per cent. per annum (less income tax) on the preference stock, and an interim dividend at the rate of 4 per cent. per annum (less income tax) on the ordinary stock, being at the same rate as in the last two years. The dividend warrants will be posted to the proprietors on November 16.

Government of Persia Five per Cent. Sterling Loan of 1911.—The coupons due 15th inst. will be paid on and after that date at the Imperial Bank of Persia, 25, Abchurch Lane, E.C.4, or at their bankers, Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, E.C.3, and must be left three clear days for verification.

Land Bank of Egypt.—The ordinary general meeting will be held at Alexandria on 4th proximo.

The directors of the Hyderabad (Deccan) Company have declared an interim dividend of 1s. per share, less income-tax, payable 10th proximo to holders registered 6th inst.

The European Oilfields Corporation, Ltd., announce that first debenture stock to the nominal amount of £9,919 5s. has been purchased and cancelled. The original issue of £169,092 10s. is now reduced to £134,417 15s.

At the seventy-seventh ordinary general meeting of the Peninsular and Oriental Steam Navigation Compny, tao be held on December 12, at 11 a.m., the directors, after providing for the usual dividend at the rate of 5 per cent. per annum on the preferred stock, less income tax, will recommend a dividend on the deferred stock of 6 per cent. for the six months, together with a bonus at the rate of 6 per cent., both free of income tax, making, with the interim dividend of 6 per cent paid in May, a total distribution on the deferred stock of 18 per cent. for the year. Dividend warrants will be posted on December 17.

ON 'CHANGE.

(From Our Own Correspondent.)
Throgmorton Avenue,
Wednesday.

We have again had a fairly active market this week, and there have been some interesting developments in certain directions. On the whole, in spite of the depressing Italian news, prices have held remarkably well; in fact, most changes are again in the upward direction, and, no doubt, this improvement would have been still more accentuated had the news from Italy shown any improvement. The Egyptian demand for certain shares has again been a supporting influence, and all the news from that side continues to be of a very encouraging nature.

In Government stocks Egyptian Unifieds have been in persistent demand, and closed with a rise of ⅜ at 83¼ ex div.; but business has been very restricted owing to the lack of sellers. The same remark applies to Egypt 3½ per cent. prefs. Some small transactions took place in City of Alexandria bonds round 78.

In Bank shares National Banks and Anglo-Egyptians have both been strong features; the former closing ¼ higher at 17⅜, after business as high as 17½, and the latter being half a point up at 14¼. There has also been some demand for Agricultural Bank Prefs., which have firmed up ⅛ to 7⅛.

In land shares the great feature has been the rise in Behéras, which have risen 1 to 13 on buying orders from Egypt. Aboukirs have been in local demand, and are 6d. higher at 20s. 3d.; whilst some transactions have taken place in Union Foncières round 2. Another firm spot has been Sidi Salems, which have jumped up 1s. 6d. to 17s. 6d. on a strong local demand in a market devoid of sellers. Delta Lands and New Egyptians have been rather quieter, some profit-taking having been in progress; but they are both only fractionally easier.

In miscellaneous shares Egyptian Markets are 3d. firmer at 27s. 6d., after some transactions at higher prices; and Alexandria Waters are 1/16 firmer at 12⅛. Khedivial Mails, after their recent neglect, have returned to favour, and have jumped up 2s. 6d. to 35s. 6d. Salts and Sodas have provided another feature, and are closing 2s. 6d. up, at 30s. 6d., on a sustained demand throughout the week both from Egypt and locally.

In Greek securities Monopolies were two points lower at 52, and Rentes one point down at 43½; but otherwise there is no change to report.

Oil Shares.

Anglo Egyptians (B) rose 1s. 6d. on Wednsday to 27s. 6d.-28s. 6d., Bakus declined 3d. to 1s. 9d.-2s. 3d., but Roumanian Consols improved 6d. to 11s.-12s.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to August 31, 1917 (New Style: January 14 to September 13, 1917):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, Aug. 1917		3,158,506	1,555,000
Do. do. do 1916		2,957,941	1,783,000
Estimated Receipts for 8 months (Law of Control)		19,266,666	7,133,333
Actual do. do., 1917		21,219,236	8,301,000
Do. do. do., 1916		23,116,060	18,185,000
Difference between estimated and actual receipts for 8 months	1917	+ 1,952,569	+ 1,167,666
	1916	+ 3,849,394	+ 11,051,666

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

NOTES OF THE WEEK.

The past week has not been a happy one for the Allies. Although the German advance in Italy has been less rapid, it has not been checked yet, and the enemy has been able to claim very considerable captures of men and guns. It is understood that help has been sent by France and Britain to Italy, but it will naturally take time for this to tell, and in this interval an impetuous speech by Mr. Lloyd George in Paris has been seized upon by the critics at home. The small pacifist element and the rather more numerous disgruntled faction will probably seize the opportunity to assault the Government; more sober military opinion is apprehensive that the Prime Minister may have let his heart run away with his head, and in his passion for results has contemplated a dispersion of our military effort.

The week has been quiet in the Balkans, and there appears to have been no recrudescence of activity on the Roumanian front. There have been some signs, however, of political movements. Bulgaria has again stated her war-aims, which are bluntly annexationist, and consist of the Dobrudja, Macedonia, and the "Bulgarian districts of Serbia." The Germans have made some play with the Jewish question in Roumania, but for the moment their interests lie elsewhere, and they are engaged in squabbling over Poland with Austria, and in discussing the future control of Lithuania and Courland. But the whole Balkan situation has been overshadowed by the extraordinary events in Petrograd, where "Lenin," a German agent, ousted M. Kerensky. If Lenin can hold his ground he will carry out his policy, which is a simple one—to make peace and to give the land to the peasants. In that event the end of Russia would be an accomplished fact.

Germany is apparently waiting on events. She cannot make peace with Russia unless Russia has a Government to make peace with, and the Maximalists must have at least a show of stability before she can publicly arrange terms. (Presumably she has already made known to Lenin, in his last trip through Germany, the rough outline of her demands, and he is not the sort of person to raise any objection on the score of honour or patriotism.) There is some indication that the actual terms would be the quasi-independence of Russian Poland, the resignation of Lithuania and Courland, and possibly Finland, by the Russian Government, the forfeiting of any interest in the Balkans, and the free, or at any rate the preferential, admission of German and Austrian goods on to the Russian market. In return Germany would probably arrange to grant loans to Russia, which would bring her immediate relief but permanent slavery. Once Lenin had done his work for Germany, he would be dismissed with an appropriate pension.

The nearer troubles of Italy have no doubt been responsible for driving this sinister prospect into the background. But while the situation in the Venetian plain is undoubtedly grave, that in the East of Europe is certainly worse. Germany hopes that Austria may find compensation for her heavy war losses in the north of Italy, but she proposes to obtain her own compensation elsewhere. With Russia out of the way, as she hopes, she calculates that the Allies would find it impossible to save Serbia, and that Roumania, isolated as she would be by the defection or dissolution of her neighbour, would have to make terms—which would not be generous. The road to the East would then be open.

There are, however, certain clouds on Germany's horizon. Roumania was never more ardent, and her message this week has rung through the world, that if Russia lets her down, her army will not give up the fight, but will get itself transported through Siberia and round the world, and fight Germany again on the Western front. That is the spirit of which victory is bred. Further than that, while all seems secure for the Central Powers in Eastern Europe, the real objective of Germany is Asia Minor, and here the British are steadily eating their way forward.

General Maude has registered another success on the Tigris, and the campaign there goes brilliantly. For the present there is no sign of any counter-attack, although we have learnt not to boast about such things while the war is on with an enemy who has so many uncomfortable surprises up his sleeve. But the British troops, having accomplished their work at Tekrit, have returned to their original positions; the Turkish army has retreated further north. Apparently no further advance was contemplated by us at the time, and in a country of this description it would be imprudent to go forward indefinitely without full arrangements being made. General Maude's army is now a long way from its base, and all supplies have to be transported great distances after they are landed at the head of the Persian Gulf; but that fact would not, of course, pre-

Digitized by Google

clude a further advance should it prove desirable at a later period.

On the other side of the Turkish front our armies go from one success to another in Palestine. General Allenby's reports are uniformly favourable, and a rapid advance is now being made. It is only a few days since Gaza and Beersheba fell into our hands, but the capture of Ascalon, which revived memories of Richard I. and the Crusaders, has been followed by a concentration against the Turkish forces near Jaffa. It would be absurd to talk of the Turkish retreat as a rout, since they are still putting up a stiff resistance, and it would be wise not to speculate about the immediate capture of Jerusalem, whose fall would have an effect on public opinion not less pronounced than that caused by the occupation of Baghdad early in the year. But it is evident, from the British Government's assurance to the Jewish community—to which extended reference is made elsewhere in this issue—that we are contemplating the conquest of the whole of Palestine in the present campaign.

It will be remembered, of course, that Palestine has already been conquered once by a Western Power since the Turkish occupation thirteen centuries ago. The French and others took Palestine in the Crusades, and held it for many years, but their dominion was not permanent, partly owing, no doubt, to difficulties of transport through the whole length of the Mediterranean in those days, but also very largely to political divisions and disputes among the Christians in Palestine itself—a foretaste of what might happen under any future scheme of international control.

M. Venizelos is sure of a warm welcome on his present visit to London. A meeting will be held to-day at the Mansion House to give him a public greeting by the City of London; and the statesman who saved Greece in the end for the Allies, in spite of every conceivable obstacle being put in his way, cannot but be greeted with esteem. It is probable that, although the political situation in the Near East will no doubt be re-examined carefully, his visit is mainly concerned with the economic position of Greece, which remains unsatisfactory. The shortage of food, which has been felt for some months past, is by no means overcome, and this fact is, of course, being exploited for all that it is worth, and a good deal more, by the Royalist and pro-German factions, which, if they have lost their power, have still a considerable capacity for making mischief. In view of the general world-shortage of food, however, which grows increasingly serious month by month, it will not be an altogether easy matter to provide Greece with the supplies of which she is in need.

The Salonika despatches have been published at last. They do not contain much information, for the very excellent reason that little has occurred on this front for several months. It appears that an offensive was contemplated, postponed, and, if not actually abandoned, that it remains in abeyance indefinitely. Possibly it may be felt by the authorities that our objects in the Levant may be more easily and quickly achieved through Palestine than at Salonika, where the geographical conditions alone make an advance a very difficult matter.

It may be noted that the despatch speaks very cautiously as to the health of the troops. It cannot say more than that has been "satisfactory on the whole," which is scarcely reassuring. It was admitted months ago that a large part of the Struma line had to be evacuated on account of sickness, and the prevalence of malaria has been a serious problem that has not yet been solved. It is well known that some dissatisfaction has been expressed on this matter in private letters from this front, which has caused much anxiety among relatives at home. It cannot be said that the very restrained statement in General Milne's report will do much to reassure opinion.

The Austrians appear to have learnt a lesson from the Germans in their peace-in-war propaganda in Italy. It will be recalled that the Germans made a practice of bombarding the Roumanian lines with pamphlets in the intervals of the more usual artillery fire; we have not heard that they have done this in Flanders, no doubt because they regard the British as an illiterate and stupid race, but they are liberally scattering the Italian lines with paper. They inform our Allies that the British have come to Italy to enslave them, and to act as police; but the most interesting of their efforts is that in which the Italians are told they are placing their country in the hands of the British "monster," instead of coming to an agreement with Austria. "We will not," says this manifesto, "give away a foot of the land or of the sea, but we are always ready honestly to divide with you the domination of the Adriatic. In this case you will remain free masters of a free sea. But if you do not decide upon this, then good-bye Adriatic, good-bye to your shipping and commerce, and you will inevitably disappear down the insatiable throat of the English lion, like the Russians." This last seems to us, we admit, on the whole the very worst comparison in the world, but the Austrian propagandist presumably thought it would be believed. The theory of a free Adriatic, however, which can be divided between Italy and Austria, is a bold one in view of the past and the consistent anti-Italian policy of Vienna.

President Wilson's latest speech again shows a full grasp of the position in Eastern Europe. He speaks of the Baghdad Railway as a line projected to carry a flank attack into half-a-dozen countries along the line of route, with the intention of dominating those countries by the Central Empires—a fact which constitutes an intolerable menace to the free development of Eastern Europe and Asia Minor; it is a case of the "bulk of German power inserted into the heart of the world"—a phrase that will not be forgotten.

While the President still draws his fine distinction between the German people and their Government—a distinction that now verges on the academic—he is under no illusions as to the source or the aim of their power. He dismisses the peace proposals in which Germany talks of Belgium, Northern France, and Alsace-Lorraine briefly as "shams"—these do not touch "the heart of the matter," which lies in Eastern Europe and the Baghdad Railway. No doubt there is a danger that America, like ourselves, will tend to think too much of territorial questions in the West, while forgetting the still more serious problems of the East, out of which the war took its rise and over whose settlement it will probably draw to an end; but President Wilson's plain statement will tend to correct this attitude, and it is in itself a guarantee that Germany will not be able to end the war by the kind of peace which she desires.

The new law forbidding enemy aliens in the United States from handling explosives in mining operations is significant, in that it is extended to apply to subjects of any nation at war with an ally of the United States. This prohibition, therefore, includes Austrians, Turks, and Bulgars in the category of enemy aliens, although the United States is not actually at war with any Power except Germany. Juridically the position is a curious one, and it is quite possible that the lawyers will make some play with it, for it is a convention that all nations are friendly until they are actually at war, and a Bulgar or a Turk in the United States who has hitherto been legally secure as a neutral will now find himself threatened with possible difficulties. Actually, however, the reason for this action is clear—it is the danger of sabotage and incendiarism. It is not sufficient to take precautions against Germans, inasmuch as they could suborn subjects of their Allies, and the American Government has been wise to recognise the fact. It would not be very surprising if the United States eventually issued a declaration of war against Turkey, Bulgaria, and Austria, to regularise a position which must become more and more difficult as American participation in the war increases.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 19.

The New Sultanate.

The past has been a busy week in official circles, for, in addition to the customary visits after the accession of the new Sovereign, we have had all the ceremonies attendant on the Moslem New Year and the return of the Holy Carpet from Mecca. The net result of all this has been that Government Offices have been closed for five out of the past nine days. That has not, however, meant complete cessation of work. There is, indeed, so much of importance being done at the present moment that it would be quite impossible to suspend work for such a long period, and some of the departments have worked steadily through all the holidays.

H.H. the Sultan has been occupied during the past week with receiving the visits of various notables and calling on such of them as he decided to honour with his presence. Among the latter was Hussein Rushdi Pasha, who was visited at his house. On Monday, his Highness for the first time presided at the ceremony of receiving back the Holy Carpet on its return from Mecca. The proceedings were, as usual, very picturesque. According to the reports given by returning pilgrims the pilgrimage passed off under the best conditions, and everyone appears very satisfied with the arrangements.

On Thursday, on the occasion of the Moslem New Year, the Sultan held a reception at Abdin Palace. There was a very large attendance, and his Highness took the opportunity of addressing each of the groups as they were introduced to him. The next day Sultan Fuad drove up to the Mohamed Ali Mosque at the Citadel in order to perform the usual weekly prayer. He was accompanied by Rushdi Pasha, and was met at the Mosque by the high religious dignitaries and the Ulema. After the service his Highness visited the tomb of Mohamed Ali, the founder of his dynasty. The route from the entrance to the Citadel up to the Mosque was kept by British troops.

The Sultan is still living in his villa, and it is not expected that he will take up his official residence in Abdin Palace for some time yet. The Press and the people appear to be very friendly disposed towards the new Sovereign, who is giving proofs of his intention to follow in the footsteps of his brother. Especially is pleasure expressed at his visit to the Prime Minister at his private house, and at the handsome contributions which he has just made to charitable institutions. Divers other acts of his have evoked warm approval, and there is no doubt that, if Sultan Fuad continues as he has begun, he will attain a high place in the affections of his people.

"Our Day" in Egypt.

"Our Day," which was fixed for the 17th inst. in Egypt has been an unlooked for success. All the lists have not as yet been completed, but the total even now comes to over £E118,000. In 1915 the amount subscribed was £E110,000, and in 1916 £E88,000, so that this year will easily establish a record for this country. Considering that no pressure whatever has been placed on any element to subscribe, the result is undoubtedly satisfactory in the extreme. On the one hand it is an indication of the regard held for the great work done by the British Red Cross, and on the other it is a distinct demonstration on the part of the Egyptians of loyalty to and sympathy with the British cause. I hope next week to be able to give final figures, with some interesting details of the elements which have contributed to make up this substantial amount.

The Meritorious Service Medal.

The first awards of the Medal for Meritorious Service recently created by the Sultan have now been made. These awards were announced about a fortnight ago, but the recent change in the Sultanate prevented me from commenting on them in my last letter. Five silver medals and twenty-three bronze medals have been conferred. All but four have been awarded to men of the Egyptian Camel Transport Corps, and the four exceptions are men of the Egyptian Labour Corps. The explanatory footnotes appended to each award one and all pay a tribute to the gallantry shown by these men when under fire from aeroplanes or during the operations at Gaza and to the great assistance rendered by them. We had already heard from officers and men returning from the front lines what splendid work both these corps, which are recruited direct from the fellahin masses, had done in very trying circumstances, and it is exceedingly satisfactory to find that these accounts are now officially confirmed, and that these deeds of gallantry are being fittingly rewarded.

The Paper Shortage.

The shortage of paper is making itself acutely felt. There appears to be no lack of newspaper, judging by the fact that all the local Press is maintaining its editions, and that some of the journals are even resuming the issue of supplements. But there is certainly a shortage of writing paper, and the situation has become so serious that the Government has had to make very stringent regulations with regard to the use of stationery in its departments. No longer does one receive huge envelopes enclosing letters written on the smallest form of writing paper; no longer are sheets of foolscap used for the mere acknowledgment of letters. To-day even the most important communications are written on sheets from which any unwritten portion is detached before despatch for use for other letters, whilst envelopes are used several times over, and in the majority of cases, in lieu of envelopes, the letters are fastened at each end by a sort of wafer. The state of affairs will certainly become very serious if, as is stated, the stocks at the disposal of the Government are now reduced to only a few days' supply based on normal requirements and if no further imports of any importance arrive. It will probably end in old dossiers being brought out from the archives and all papers having any unwritten portion being extracted from them and taken into use as writing paper. As it is, many departments are utilising forms the backs of which are free from printed or written matter. We shall, of course, survive this crisis as we have done so many others, but there is no doubt that this paper stringency has shown that everyone can get on with far less paper than was supposed to be the case, and that there has in the past been a not inconsiderable overuse of stationery on the part of the individual as well as the State. The present crisis should result in the introduction of more economical methods, in so far as stationery is concerned, than have been followed in the past.

SULTAN FUAD I. OF EGYPT.

(From Our Own Correspondent.)

Cairo, October 12 (delayed).

The popularity and success enjoyed by the late Sultan make the task of his brother, Prince Ahmed Fuad, who has been called upon to succeed him, far from an easy one, but there is every hope that his training and intelligence will enable him fully to rise to the occasion. Sultan Fuad is the youngest son of the late Khedive Ismail, and is forty-nine years of age, having been born on March 26, 1868. He made all his studies in Europe, spending a considerable time in Switzerland, Austria, and Italy. In the latter country he qualified for a military career and passed through the Military Academy and School of Artillery and Engineering at Turin, finally entering the Italian Army as an officer in one of the crack corps, the 13th Regiment of Artillery. Throughout his sojourn in Europe, and during his frequent subsequent visits there he moved in the highest and most intellectual circles, and he has, as a result, acquired an insight into European politics, a knowledge of the world, and an appreciation of the position held by Great Britain and of the principles she represents, which should stand him in great stead in the exalted position he has now been called upon to fill.

Except for the occasion on which he stood a candidate for the throne of Albania, Sultan Fuad has not taken any active part in politics, and he has for many years now devoted himself to the social and intellectual development of this country. It is no doubt due to his contact in his early years with the great intellects of Europe that he has evinced such a penchant for scientific and similar work, and has become such an active patron of arts and sciences. There are, indeed, few intellectual enterprises in Egypt which do not owe something, often a great deal, of their success

Digitized by Google

to the interest of the new Sultan, and he has shown himself ever ready to lend his practical support to any charitable objects and to any attempt to promote local industries. In this he has certainly emulated his brother. An idea of the diversity of his interests can be obtained from the facts that he was the promoter and first president of the Egyptian University, that at the time of his succession he was president of the Sultania Geographical Society, of the Sultania Society of Political Economy, of the Egyptian Red Crescent Society, of the Association Internationale d'Association Publique, and that it was entirely due to his initiative that the Hydrobiological Institution was created by the Alexandria Municipality and that the recent very successful exhibition of Egyptian-made lace was held.

The new Sultan may not be as well known to the mass of the people as was his brother Hussein at the time of his accession, but he undoubtedly possesses all the qualifications that go to make a successful Oriental ruler. He has a sympathetic personality and a pleasing manner; he is exceedingly tolerant and broad-minded. Compared with the other candidates, Sultan Fuad is certainly the man most fitted by his intellect and his training to succeed to the Sultanate, and as he has declared his intention to follow in the footsteps of his illustrious brother, there is every reason to expect that his reign, which, in the natural course of events, should be considerably longer, will be equally successful and equally fruitful of benefits to his country and his subjects.

In connection with the succession of Prince Fuad it is interesting to note that on Monday, the 8th, when it was apparent to all that the death of Sultan Hussein was imminent, the latter's son, Prince Kamel Eddine, addressed to him a letter in which, after recalling that, although the succession had not been settled, his father had expressed the desire that he should succeed him, he asked permission to renounce, and actually did renounce, whatever rights or pretensions he might have as his only son to the Sultanate. It should be clearly understood, however, that Prince Kamel Eddine was not the heir apparent, for in the terms of its original offer to Sultan Hussein the British Government was free to place on the throne any member of the family of Mohamed Ali whom it might choose to select. His renunciation of whatever claims he might have been able to bring to bear merely, therefore, removed one candidate from the list, and although the late Sultan is survived by two other brothers senior to Ahmed Fuad, and there are in Egypt other older members of the family of Mohamed Ali, it was Ahmed Fuad who was selected by the British Government as being the man naturally indicated as successor to the Sultanate. Another interesting point is that in the communication to Sultan Hussein appointing him to the Sultanate, the British Government stated that the succession was to be vested hereditarily in the family of Mohamed Ali according to a line to be laid down later on, whereas in the communication to Sultan Fuad the Sultanate is offered to him and his heirs according to such order of succession as shall be established by agreement between H.B.M.'s Government and himself. Sultan Fuad, it should be added, has but one child—a daughter, the Princess Fukia.

Rushdi Pasha's Ministry.

I trust it will not be considered out of place if I add a few words of appreciation of the new Ministry. It is really a new one only in name, for, with the exception of H.E. Ibrahim Fathy Pasha, who about eighteen months ago succeeded H.E. Ismail Sidki Pasha at the Wakfs, its members have all held office throughout the reign of the late Sultan. They have one and all done excellent work during those three years, and the renewal of their mandate is a well-merited recognition of their services. To the Prime Minister, H.E. Hussein Rushdi Pasha, however, the greatest credit is due. On him, since with his presidential office he combines the direction of the Ministry of the Interior, one of the most important administrations in the country, has necessarily fallen the bulk of the work and of the responsibility, and he has acquitted himself of his very difficult task in a manner which evokes on all hands the liveliest admiration. The past three years have been years of acute stress and anxiety. It cannot always have been easy to conciliate the various interests concerned, meet the requirements of the military *régime*, and content all parties, yet under the able direction of its president the Cabinet has always contrived with dignity to strike the happy medium, and at no time has there been any friction or any trouble of any description. Rushdi Pasha has served Egypt and Great Britain so well, and has displayed such unique qualities, that it is sincerely to be hoped that some means will speedily be found of lightening his task, which, under existing conditions, is stupendous for one man, so that he may be enabled as long as possible to devote to the service of the State the unflagging energy, courageous initiative, and sound judgment of which he has given proof.

ROUMANIAN NOTES.

(From a Correspondent.)

The Roumanians in Bessarabia.

The new Russian *régime* has resulted in a very satisfactory development concerning the cultural life of the Roumanians in Bessarabia. In the time of the old *régime* the Roumanians were not allowed to establish national schools. Now a number of Roumanian elementary schools have been opened, replacing as many Russian elementary schools. In addition a few Roumanian secondary schools, seminars, and training colleges for teachers were shortly to be opened. Roumanian text-books and prayer-books are being printed, and for the first time a Roumanian printing establishment is to be created in Kishinev. An educational review is also contemplated. Three hundred and fifty men and women teachers have already qualified for the new Roumanian elementary schools. A choir composed of such teachers gave recently a concert, at which Roumanian national songs formed the main item. There is indeed a new spirit in Russia.

Roumanian Refugees in Russia.

The bulk of the Roumanian refugees who have crossed the frontier have found hospitality in Odessa. By arrangement with the military governor of the town, the delegates of the Roumanian Government have been able to secure an adequate amount of necessaries for those in their charge, and they have been, moreover, able to purchase these supplies at the prices ruling for army purchases. A main depôt has been established in Odessa, with branches in Kherson and other towns inhabited by Roumanian refugees, from which the latter can buy food and wearing apparel. In Kherson a communal kitchen is already at work for the benefit of Roumanian refugees.

In Occupied Roumania.

The German authorities are multiplying their devices for making the occupied territory render as much as possible in supplies, money, and labour. A recent proclamation decrees that, on paying for corn supplies from the last crop, a deduction will be made for all sums due by the seller, either as taxes or other debts due to the State, the district, or the communal authorities for the fiscal years 1916-1917 and 1917-1918, as well as for any advances they may have received for the purpose of cultivation.

The landowners who have abandoned their properties have to pay a supplementary imposition, ten times as heavy as the ordinary taxes; and as those concerned are absent, the German authorities proceed to sell their estates.

It is also stated that the Germans have removed all the tramway-rails from Bucharest.

Roumanian Prisoners in Germany.

There had been repeated and insistent rumours suggesting that Roumanian prisoners in Germany were being treated with special severity. There has now come to hand some official German figures, which are almost incredible in the situation they disclose. According to that information, the total number of Roumanian prisoners in German camps has been 53,057, of whom 19,525 have died, while 16,645 were in hospital at the time of the publication of these figures. But, further, the same source of information intimates that from the 19,525 prisoners who died since their capture, 108 died from disease, 406 as the result of wounds received in action, while for the rest—that is, for 19,009 prisoners—the cause of their death is passed over in silence. Not even the most pessimistically inclined dared contemplate such a situation; is it necessary to add anything to the tale these figures tell?

THE NILE FLOOD.

Reference was recently made in our Cairo correspondence to the interest attracting to the Nile flood this year, which promised to beat all records for the last twenty-three years. The following are some of the readings on the dates indicated at Roseires, Khartoum, and Assouan Reservoir:—

	Roseires or Blue Nile.		Khartoum.		Assouan Reservoir.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 21.

Parliament and the late Cabinets.

The Deputies have had an interesting week in the Chamber, as the two Commissions which were appointed to inquire into the accusations against the Skouloudis and Lambros Cabinets have presented their reports, and these reveal much of what went on behind the scenes during these periods.

The conclusions of the Skouloudis Commission are, succinctly, that the members inculpated did:—(1) Assume office without enjoying the confidence of the people, and signed the decree of dissolution of the Chamber of May which had been constitutionally convened, and that, with the intention of abolishing the Constitution and adopting a personal policy of the King; (2) in violation of the Constitution they exercised legislative power and issued illegal decrees granting various personal favours to officers in the Army and Navy, and thus involved the country in an expense of six million drachmae; (3) they contracted two loans in Germany in a clandestine manner, and granted the National Bank an extension of its privileges for twenty-five years for its intervention in the matter; (4) for Party purposes they restored Ottoman property in Macedonia which the State had been holding as a lien for Greek property seized by the Turks; (5) they violated the treaty with Serbia and carried out a series of acts likely to help their enemies, such as communicating with the Austro-German forces in the Balkans, etc.; (6) they employed violence to terrorize public opinion and adopted aggressive measures against the Liberal newspapers and individuals; (7) they maintained a useless mobilization of the Army during nine months; (8) they systematically provoked in the Army violent demonstrations against the Liberals, and thus lowered the *moral* of the Army; (9) they permitted and encouraged German propaganda; (10) they delivered Rupel and certain towns in Macedonia, an army corps and material of war to the value of several millions, to the Bulgarians. The report concludes by proposing that all the members of the Skouloudis Cabinet, excepting Admiral Condouriotis, be deferred to the High Court. The final discussion took place last night, when M. Ralli made a long speech explaining his association with the Skouloudis Cabinet. The Chamber sat from five o'clock yesterday afternoon until ten this morning, when a vote was taken on each member separately, and resulted in MM. Skouloudis, Dragoumis, Ralli, Gounaris, Yannakitsas, Michelidakis, and Hadjakos being deferred to the High Court.

The report of the Lambros Commission begins by refering to the efforts made by the ex-King, in concert with Dousmanis, Metaxa, Streit, and Gounaris, to involve Greece in a policy inimical to the Allies, and enumerates the various occasions on which King Constantine and the Lambros Cabinet acted contrary to the Constitution. Reference is made to the responsibility of the Lambros Cabinet in connection with the Reservist Leagues, and in allowing arms to be distributed to the Reservists, and its connection with the events of December 1, when the Anglo-French troops were attacked, and to its complicity in the organization of armed bands to attack the Allied troops in Thessaly. The report states that from all the documents and witnesses it is proved that the Lambros Cabinet had other objects in view than the interests of the country, and that there are documents to prove that this Cabinet was in communication with Bulgaria with the view of co-operating with them against the Allies. The report concludes by recommending that all the members of the Lambros Cabinet, with the exception of M. T. Eliopoulos, be deferred to the High Court for high treason. The debate on this report takes place in a day or two.

Whilst Parliament has been occupying itself with the Cabinets, the ecclesiastical tribunal has been trying various members of the clergy for having mixed up in politics and for having taken part in the anathematising of M. Venizelos last year. Many have been punished by seclusion in a convent, and others have been dismissed from the offices they held.

M. Politis, the Minister of Foreign Affairs, took the opportunity of making a statement in the Chamber the other day to the effect that the people should not be under the illusion that peace is near at hand. He explained that all the recent peace talk, especially in Greece, was fostered by the Germanophils with the object of counteracting the efforts of the Government to stimulate the people to the necessity of Greece taking its share in the destruction of German militarism and of recovering her lost territory.

From day to day.

The scarcity of fuel in Athens has become acute, and each day last week it was feared that the city would be in darkness, as sufficient wood, which is the only fuel available, could not be brought in for the electric power station. The tram and train services have had to be curtailed, as well as the lighting. All places of amusement have to close before twelve; most shops must close at six, others of greater usefulness may remain open an hour or two longer. Arrangements are now being made to cut down all the trees in the Tatoi woods which were damaged by last year's fire, and the quantity of timber thus obtained, it is expected, will keep the electricity going for about eight months.

Coffee and sugar, of which very small quantities exist, are being rationed by ticket by the Ministry of Food; in fact, most foodstuffs are now only obtainable by tickets.

Last Monday Lord Granville presented his letters of credence to the King. Three Court carriages conveyed the British Minister and his staff to the King's palace.

"BRITISH REFUGEES FROM TURKEY FUND" (Incorporated).

Lady Lowther writes:—

"May we bring to the notice of those who do not realise it the serious situation of many British families, formerly residents in Turkey, who, owing to the war, are stranded in various countries with a mere pittance extended to them in their distress.

"We appeal to their fellow-countrymen to help them to tide over these months of anxiety until they can return to their homes and take up their work again.

"We have assisted many during the last years, thanks to the generous sympathy of friends; the length of the war and the increase of our responsibilities oblige us now to appeal to a wider public.

"We assist with grants, loans, and education.

"Hoping that our prayer will not be in vain, we appeal to Great Britain not to forget her own children among the many calls that come to her."

It is to be hoped Lady Lowther's further appeal will meet with an immediate response. Readers of The Near East will recall the good work already done by the Fund. H.R.H. Princess Louise, Duchess of Argyll, is Patron of the Fund, Sir Louis Mallet is President, and the Hon. Treasurer is Mr. Geo. P. Baker, 5, Giltspur Street, London, E.C.1.

WELCOME TO VENIZELOS,

PRIME MINISTER OF
OUR ALLY GREECE.

A

PUBLIC MEETING

Under the auspices of the
ANGLO-HELLENIC LEAGUE,

will be held at

THE MANSION HOUSE,

TO-DAY (FRIDAY), Nov. 16,

at 4.30 p.m.

A LIST OF SPEAKERS WILL
— BE ANNOUNCED —
and

VENIZELOS WILL REPLY.

The Chair will be taken by

THE LORD MAYOR.

ADMISSION FREE.

THE TRAVAIL OF RUSSIA.

Professor Alexander Belitch, of the University of Belgrade and member of the Serbian Academy of Science, who has spent two years in Russia and has been an eye-witness of the cataclysmic events of the past few months, has just reached the British Isles. He expresses himself with vigour, hopefulness, and insight upon the present condition of Russia.

"You ask me about the present state of Russia," said Professor Belitch. "Well, the Democratic Socialistic party is upholding authority, notwithstanding all the stress and strain of recent events, which means, of course, that the Government contains some positive elements. In all the throes of the Revolution there are evolving elements of stability; under the influence of the perils from without and the gigantic changes from within, this process is completing itself with amazing rapidity. Obviously, it is not altogether easy to find new forms of internal arrangement corresponding to the democratic and socialistic ideas of the directors of the destiny of New Russia, and in pursuit of these ideas a good deal of energy is, of course, being consumed. But surely we must all follow this time of extraordinary effort with more than ordinary sympathy, and the greatest possible help should certainly be extended to this Russian people, who need a power almost Titanic, if they are to rise to the demands of their vast runaway State machine. Not only the help of all the citizens and peoples of the great Russian Empire, but also the help of all her Allies—and that, moreover, in the most diverse directions—is imperative, if the Russian State is to emerge as victor over all obstacles; obstacles which have developed themselves out of the very fundamentals of her existence and under the influence of a liberty now freely bestowed on all, but which was formerly yielded so grudgingly. Just as in the life of individuals there are moments of exceptional strain and effort which determine the direction of their life and achievement in the future, so is it also in the life of the State. It is such moments that Russia is passing through now, and it is to the interest of all her Allies that these efforts should be put forth to the utmost."

"And what about the Russian army?"

"I understand very well that you are interested most of all in the military power and significance of Russia. The army is so great, the country so vast, that it is impossible to take in everything at the first survey. Conditions vary in different localities. Generally speaking, in spite of the Korniloff incident, I think the signs are reassuring. It would be most unjust to judge the Russian army simply by recent defeats. The Russian artillery is without doubt worthy of respect, and worthy of respect in its entirety. Take the Russian cavalry; practically the bulk of Russian cavalry is animated by an admirable military spirit. Mention need hardly be made of the Cossacks, who are soldiers by birth, and with whom fighting is an essential part of their mental make-up. Many infantry regiments are characterised by their excellent fighting spirit, particularly those which are in close connection with the cavalry units, and of the remaining regiments there are many which are in very good fighting condition. I do not know whether it is realised how well the Polish regiments have acquitted themselves on various occasions.

"You may see in different parts of the interior, scattered about in tens and tens of thousands, portions of the great mobilised army, which amounts in all to over 15 million men. In these vastly scattered groups of men one often finds, it is true, a spirit of vacillation, but commanding officers have told me of regiments which, though at first they left their positions without showing fight at all, had afterwards been inspired to put up the toughest resistance and fight like lions.

"No; I do not think that things on the Russian Front will come to a *débâcle*. Rather do I think that, the more furious the German attacks, the sooner will stability be restored to the Russian Front.

"You ask me about Professor Masaryk and his work in Russia. The great Czech patriot is tirelessly working, and has speedily brought order to the Czech ranks in Russia. The Czech brigade has displayed wonderful bravery on the Russian Front, was mentioned in despatches during the July offensive, and this great Czech army will beyond doubt fulfil the hopes of the Bohemian people. Moreover, tens and tens of thousands of first-rate, intelligent and exceedingly well disciplined Czech working men are serving in the Russian military factories.

"The Jugoslav Volunteer Corps is continuing its work on the Roumanian Front. It is true that a portion of it is now being transferred to the Allied Front beyond Russia, but the greater part still remains on the Southern Russian Front. The fact that the Southern Slav Volunteers have been entrusted with the defence of some of the most vulnerable spots of the Southern Russian Front proves how much their services in the earlier combats were appreciated.

"The noble example of the Roumanian Royal Family has evoked the warmest admiration of the Roumanian people. People thought that King Ferdinand of Roumania would probably move deeper into Russia and avail himself of the offer of beautiful quarters near Odessa But he remained with his army, in a modest little house at Jassy, strenuously engaged in the work of military reorganisation. With him stayed, too, the whole of the Royal Family, each of them showing the greatest devotion to the welfare of the soldiers; and indeed that part of the Roumanian army which has been reorganised shows what excellent military material Roumania possesses. The numerous attacks and counter-attacks made by the enemy at Olta and other places proved the truth of the view of the Russian and Roumanian military experts that the Roumanian army of to-day was worthy to stand beside the best of the Allied troops. Evidently the help given by the Allies has here attained the very maximum of efficiency."

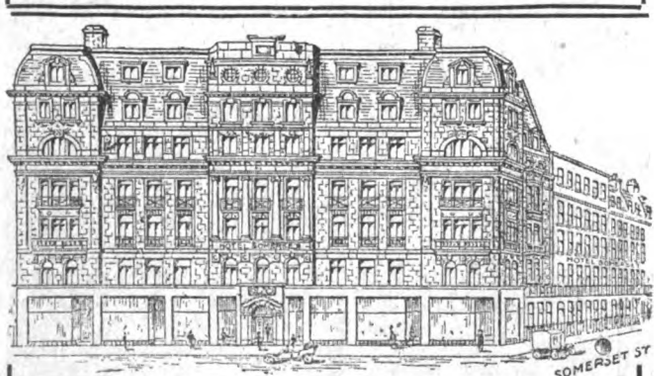
SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

THE SCHOOL RE-OPENED ON OCTOBER 1.

For particulars, apply to E. DENISON ROSS, Director.



HOTEL SOMERSET,
ORCHARD STREET (by Selfridge's) OXFORD STREET, W.
Most comfortable and home-like Establishment. English cooking a special feature. Eggs, Butter, Poultry direct from the farm.
200 well-appointed bedrooms with fitted basins (h. & c.). 30 bath-rooms.
15 private Suites. Passenger lift. Own Artesian Well.
Magnificent Georgian Dining Hall (100 tables,)
Inclusive terms from 10/- to 15/- daily; 3 to 4½ guineas weekly.
Double room 16/- to 21/- daily; 5 to 7 guineas weekly.
Bedroom, bath, breakfast (3 courses) 7/6 daily.

"NAVAL & MILITARY" HOTEL
HARRINGTON ROAD, SOUTH KENSINGTON, LONDON.
Only 200 yards from District Station and "Piccadilly Tube" (S. Ken. Station). For all Services and the General Public. Two Lifts. Excellent Cuisine. Exceptional Reception Rooms. 100 Bedrooms.
Cables: "NAVAMILOT LONDON." Telephones: KENSINGTON 5425 (4 lines.)

STRANGERS' HOME FOR ASIATICS,
WEST INDIA DOCK ROAD, LIMEHOUSE, LONDON, E.
"I was a stranger and ye took me in."
CONTRIBUTIONS ARE SOLICITED from the many who owe fortune or competence to India and China, and will be thankfully received by the SECRETARY or by MESSRS. BARCLAY & CO., LTD., 54, LOMBARD STREET, E.C.

AYAHS' HOME,
26, King Edward Road, South Hackney, London.
ESTABLISHED 1825.
IN CONNECTION WITH THE LONDON CITY MISSION.
Hindustani spoken. Ayahs boarded and lodged at 18s. per week each until their Return Passage is paid or a Situation secured for them to return. Ayahs met at any Dock or Railway Station in London. Experienced, well-recommended Ayahs taken entirely off Ladies' hands for a certain payment, which differs according to time of year. Ladies proceeding to India or China requiring an Ayah can generally obtain one by applying to Mrs. FLETCHER, Matron.

NEAR EAST BOOKSHELF.

WITH THE TURKS IN THE WAR.

Deux ans de Guerre à Constantinople; par Dr. Harry Stuermer. (Paris: Payot et Cie., 3 fr. 5 c.)

Inside Constantinople: A Diplomat's Diary. By Lewis Einstein. (London: John Murray. 6s. net.)

These two books are written from opposite points of view. Mr. Einstein was a neutral diplomatist with a pro-Ally leaning in Constantinople; Dr. Harry Stuermer is a German who, after taking his share of the fighting in the Eastern front, went to the Dardanelles as correspondent of the *Cologne Gazette.* A Turcophil on his arrival in the Near East, he was utterly revolted by the Turkish massacres of the Armenians and his other experiences at Constantinople, with the result that he threw up his post, abandoned his country, and wrote this heartfelt testimony in Switzerland. The book bears its own witness to his sincerity, for it is written in French, and at some loss to the style, although at a considerable gain to its frankness, he has refused to allow it to be revised by anybody. It is an axiom that nobody but a Frenchman can write good French, but Dr. Stuermer has at least produced a forcible indictment of Prussian arrogance and Turkish brutality.

Mr. Einstein's volume, which is reproduced in the diary form in which it was originally written, would cause even Mr. Winston Churchill some doubts of his omniscience if he should chance to read it. The Allies blundered badly, both in strategy and diplomacy. Had we landed an army at the same time as the naval bombardment the Turks would have been taken by surprise, and Constantinople might have been rushed; as it was, they had six weeks' full warning of what was coming, and made their plans and their defences accordingly. In the landing, or rather landings, there were also grave blunders, and one is left with the conviction that Kitchener and Byng were wise when they determined on evacuation. It was either that or another half-million men to be exposed, not only to a difficult military enterprise but to the certainty of disease.

Our diplomacy was equally at fault. The treachery which Bulgaria contemplated was known in Constantinople long before it was anticipated in London. But we were not the only ones to blunder. Russia's negotiations with Roumania were hopelessly bungled, and one is left with a sense of admiration for Roumania that she did not succumb to the German tempter, whose voice was loudly heard in Bucharest. Germany intrigued as hard in Roumania as in Greece, but she failed as utterly in the one case as she succeeded in the other. It is curious that in both cases there was a Hohenzollern on the throne—for the Queen of the Hellenes was obviously a stronger man than her husband.

Another point Mr. Einstein makes is that the Russian blockade of Constantinople was inefficient. Time after time supplies came in which the Black Sea fleet should have stopped; it is only too evident, and, indeed, M. Claude Anet in *La Révolution Russe* agrees, that slackness and indiscipline were rampant in the Russian Army and Navy even before the revolution.

Mr. Einstein's indictment of the Allies is perfectly unconscious, because he was strongly pro-Ally in his sentiments, and indeed had some little unpleasantness to endure on that account from his German diplomatic colleagues, whose manners were those of Prussia and not of the civilised world. But the indictment is all the more forcible on that account.

One *mot* he quotes that will live: "Deutschland über Allah." It is indeed in the Ottoman Empire to-day.

ROUMANIA'S ORDEAL.*

If anything can bring home to a people who have had nothing approaching the experience, some idea of what the Roumanians went through when their country was overrun by Austro-German forces, it will be the simple, but telling, narrative of "A Roumanian Diary." The diary form is kept throughout, although, as Lady Kennard explains in the preface, the entries are not all her own. At a date unspecified she was obliged to return to England, and the story was taken up by friends whom she had left behind, and she has merely preserved their letters. Diaries are apt to be tedious. There is, however, nothing tedious in this one. A slavish adhesion to dates is avoided. The entries are for the most part jottings at wide intervals. Only in the crowded moments that followed the retreat to Jassy do they cling more closely to the calendar.

It will be well if as many Britons as possible read this book. As a nation we have not given enough attention to the bitter fate of the Roumanians. The omission does not imply lack of heart, or, indeed, lack of appreciation, of their servies. It has simply not been possible to follow the Roumanian story in any detail. Now that it is told, and told so well, the experience of our Allies will be better known. The writers have restricted themselves to recounting just the daily happenings; with the political side of the history of those days they do not concern themselves, although there is sufficient indication in the book to show that they might have amplified their recital in this direction most interestingly. Enough that we have here a glimpse into the misery and sorrows of those black days that followed the evacuation of Bucharest and witnessed the attempt of a capital to house itself without notice in a small town already overfull.

In the earlier part Lady Kennard gives a true, if faintly outlined, picture of Roumania before her entry into the war. To-day it is a different people that is stemming the German advance into Moldavia, and, perhaps, there is no happier passage in the book than that in which the new order is depicted in these few closing lines:—

"Roumania is deserving of notice and appreciation. She has proved herself, and in the greatest manner, which does not savour of ostentation. All that has been lately accomplished spells silent work and no small devotion to what has grown in this our century to be the greatest cause. Strangers who had knowledge and experience, who came to put machinery in motion, remain here, it is true. But they stay to work, and are no longer required to lead. The army trusts its officers, the nation appreciates its King, and we outsiders feel that we want to go home and tell the family of Allies that our little brother Roumania has grown into a man of whom we have reason to be very proud."

* "A Roumanian Diary," 1915, 1916, 1917. By Lady Kennard. (Heinemann London. 5s. net.)

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Ex-King Constantine. Nov. 13.

Mr. LYNCH asked the Secretary of State for Foreign Affairs whether the British representative at Athens ever informed the Foreign Office of the installation of wireless telegraphy by which ex-King Constantine was kept in continual communication with the German court and the military commanders; whether any of the messages interchanged were ever read and reported to the Foreign Office; and what action, if any, the Allied representatives took in consequence.

Lord R. CECIL informed Mr. Lynch that his Majesty's Government had been well aware that King Constantine was in direct communication with Berlin. It was a fact that certain of his messages were intercepted.

Prince Nicholas's Visit.

Mr. LYNCH asked the Under-Secretary of State for Foreign Affairs whether his attention had been called to the fact of the disclosures recently made in Greece that the object of the visit of Prince Nicholas to this country was to defeat the war aims of the Alliance by representing to the British Court that the efficient carrying out of the military plans would place the dynasty in danger; whether the mission of Prince Nicholas received encouragement in this country; and, if so, whether the military plans were altered in consequence.

Lord R. CECIL: The answer to the first part of the question is in the affirmative, and that to the second and third parts in the negative.

The Jews and Palestine. Nov. 14.

Mr. BALFOUR, in rely to the question by Mr. King whether, in the event of a national home for the Jews being established in Palestine, it was intended that Jews who were citizens of enemy Powers should, under proper safeguards, be allowed to become citizens of their national home, said: It is too early to make any statement on this subject.

The aim of Zionism is to create for the Jewish people a home in Palestine secured by public law.

THE ZIONIST REVIEW

THE ORGAN OF THE ENGLISH ZIONIST FEDERATION.

An advanced stores depot of the Red Cross was opened in Beersheba on the 7th inst.

Mr. Frank Rattigan, First Secretary to the British Legation in Jassy, has arrived in London.

Mr. Montagu, the Secretary of State for India, and the party accompanying him, have arrived safely at Bombay.

It is officially announced that the Swiss Government has undertaken the distribution of supplies to the Serbians in Serbia.

Major-General Gordon Cavanagh, aged 88, of Hove, an Indian Mutiny veteran, left estate of the gross value of £8,741.

The Postmaster-General announces that, until further notice, parcels cannot be accepted for transmission by post to Italy and Greece.

Sir Prabashankar Pattani, accompanied by Lady Pattani, has arrived from India, and on Tuesday took his seat as a member of the Council of India.

The Postmaster-General announces that beginning this week the Indian mails will be despatched fortnightly. No information can be given as regards dates of posting.

M. Michalopoulos, one of the Secretaries to the Greek Cabinet who accompanied M. Venizelos, the Prime Minister, on his departure from Athens, has arrived in London.

M. George Todorovitch, formerly Secretary to the Serbian Legation in London, has arrived in town from Corfu on his way to Washington, where he will be Secretary to the Legation.

Mr. W. F. Rice, C.S.I., Chief Secretary to the Government of Burma, is acting as Lieutenant-Governor, pending the arrival of Sir Reginald Craddock, the successor to Sir Harcourt Butler.

The anniversary of the fall of Salonika was celebrated in Athens on November 8. The "Te Deum" was sung in the Cathedral, the Diplomatic Corps attending in full uniform. The King was indisposed, and was not present.

It is announced that the term of office of Sir Archdale Earle, Chief Commissioner of Assam, has been extended to the end of March next, when he will be succeeded by Mr. N. D. Beatson-Bell, member of the Bengal Executive Council.

The engagement is announced of Arthur Philip Coote, of the Sudan Civil Service, fifth son of Sir Algernon Coote, Bt., H.M.L., of Ballyfin, Ireland, and Margaretta (Madge), second daughter of Mr. A. Leslie Wright, J.P., of Butterley Hall, Derby.

The engagement is announced between Kaimakam S. C. Peacock Bey, of the Ports and Lights Administration, Alexandria, son of Mr. and Mrs. W. Peacock, Eddington, Kent, and Eugénie, elder daughter of Mr. and Mrs. C. Cantoni, of Ibrahimieh, Ramleh, Alexandria.

SERBIAN LEGATION, 195, Queen's Gate, S.W.

Mr. Herbert Brown, of the British Farmers' Red Cross Fund, has been asked once again to organise a collection from the milling and corn trades for the Y.M.C.A. as a Christmas appeal.

Mr. William Wordsworth, C.I.E., of Villa Wordsworth, Capri, Italy, the eldest surviving grandson of the poet, and formerly principal of Elphinstone College, Bombay, who died on March 7, aged 80, has left property of the value of £9,964.

The Dowager Marchioness of Dufferin and Ava had the honour of being received by the King at Buckingham Palace on November 14, when his Majesty invested her with the Insignia of a Dame Commander of the Most Excellent Order of the British Empire.

A service in memory of Second-Lieutenant Lord Basil Blackwood, Grenadier Guards, who was killed in action on July 4, was held on November 13 at the church of St. Martin-in-the-Fields. The service, which was fully choral, was taken by the Rev. H. R. L. Sheppard, the vicar.

The following Army appointment has been notified in the *London Gazette*:—Memoranda.—Brevet Colonel (temporary Brigadier-General) C. W. G. Richardson, Indian Infantry, to be temporary Major-General whilst employed as Deputy Quartermaster-General, India. October 1.

The King has sent the following telegram to General Allenby:—"I heartily congratulate you and the troops under your command upon the successful results of your ably conceived plans, which have been crowned by the capture of Gaza. I admire the spirit of tenacity and endurance displayed by all ranks.—GEORGE R.I."

Lord Grenfell's important collection of Egyptian and other antiquities was sold at Sotheby's this week. £265 was paid for a very fine head of a King, in black basalt, of the 12th dynasty. The head of the young Rameses, in limestone, from Thebes, of the 18th dynasty, sold for £120, and a cat's head, in bronze, of very fine workmanship, brought £60.

The Serbian Relief Fund and the Serbian Red Cross announce that an exhibition of Serbo-Croatian art will be opened at the Grafton Galleries on Saturday, December 1, when new works by Ivan Mestrovic and other well-known Serbian artists will be shown. Concerts of Slavonic music and lectures on Serbian history, art, and literature will be given.

At a large mass meeting of Jews, held at Alexandria on November 12, a resolution was carried urging the reconstitution of Palestine as a national home for Jews. The resolution also expressed the hope that his Britannic Majesty's Government would use its best endeavours to facilitate the achievement of the object. A demonstration took place subsequently.

The British Refugees from Turkey Fund, Lowndes House, Lowndes Place, Belgrave Square, S.W.1, of which Lady Lowther is chairman, asks for help to alleviate the distress among British residents from Turkey. Many respectable families hitherto carrying on business in these important markets have lost their all. A full statement of the work and a balance-sheet will be forwarded on application to the Hon. Treasurer, Mr. Geo. P. Baker, 5, Giltspur Street, E.C.1.

The British Farmers' Red Cross Fund has received in subscriptions, up to the week ended November 9, the sum of £718,419 16s. 5d., of which £357,295 has been devoted to the purpose of hospital work at home and in France, Belgium, Serbia, Dardanelles, the Persian Gulf, East Africa, Egypt, and Mesopotamia. Further assistance is urgently needed, and all offers of help will be gratefully received by the Secretary, Room 5, Tower Bridge Flour Mills, Shad Thames, Bermondsey, S.E.1.

M. Venizelos, who arrived in London on November 13, was met at Charing Cross by the Greek Minister, M. Gennadius, the Greek Consul-General, the Staff of the Legation, and many members of the Greek Colony. The members of the Mission are M. Diomedes, former Minister of Finance, the Governor-General of Salonika, and the President of the Oriental Bank. M. Venizelos is staying at the Ritz Hotel as the guest of the British Government. He visited the Foreign Office and 10, Downing Street, and had a conference with M. Gennadius on the formal arrangements for his visit.

M. Venizelos called at Buckingham Palace and Marlborough House on Wednesday. During the day, accompanied by the Greek Minister, he visited the Allied Embassies and Legations, and in the evening had a conference with Mr. Balfour at the Foreign Office. In the evening M. Venizelos dined with Miss Helena Schilizzi, at 37, Upper Brook Street. The members of the Diplomatic Corps and British Government, and the members of the Greek colony left cards.

A special general meeting of the Greek community in London was held on November 12 in the Merchants' Hall, Baltic Exchange, under the presidency of Mr. Schilizzi to organise a reception for M. Venizelos. The meeting was well attended, among those present being Mr. Gennadius, the Greek Minister. At the instance of Mr. G. Sevastopulo, a committee was formed to deal with the reception, consisting of Mr. Marchetti, as chairman, Miss Helena Schilizzi, Mr. M. Embirios, Mr. Eumorfopulos, and opthers.

Seven more Serbian students are in residence at Oxford this term, in addition to the eight already maintained by the Serbian Relief Fund, and five theological students maintained by a separate fund, who had been admitted as non-collegiate students. Of the seven one is an "advanced student" for the new degree of Doctor of Philosophy and another a student of music who has already entered for the first examination of Bachelor of Music. The others are forestry students, who have been working for the last year under the direction of Sir William Schlich and are now admitted as guests at different colleges.

APPOINTMENTS, PROMOTIONS, ETC.

Lord Edward Cecil, Financial Adviser to the Egyptian Government, who has been in England since the beginning of this year, has returned to Egypt.

Mr. E. Bonham-Carter, late Judicial Adviser to the Sudan Government, has arrived at Baghdad and taken up his new duties as the Senior Judicial Officer in Mesopotamia.

Bimbashi J. D. Lawrence, of the Bahr el Ghazel district, has been transferred to the Equatorial Battalion, and replaced by Bimbashi F. A. L. Lawrence, of the Upper Nile district.

Kaimakam A. Crawford Bey, Western Arab Corps, has been granted the temporary rank of Miralaj, and Bimbashi L. Danels, Sudan Veterinary Department, has been granted the temporary rank of Kaimakam.

It is announced in the *London Gazette* that Lieut.-General Sir W. R. Birdwood, K.C.B., K.C.S.I., K.C.M.G., C.I.E., D.S.O., Indian Army, Aide-de-Camp General to the King, has been appointed to be General.

Judge Larcher, President of the Mixed Court of Appeal, and Mr. Laloe, the Vice-President, have been re-elected to the same positions at the annual meeting of the General Assembly of Judges at the Mixed Tribunal.

The Acting Governor-General of the Sudan has appointed Mr. R. H. Dun, Chief Justice of the Sudan Courts, to succeed W. W. Sherry, appointed Legal Secretary; and Mr. N. J. Davidson, now Judge of the High Court, to be Advocate-General.

OBITUARY.

Mr. Edward Grey, late of the Bengal Civil Service, has died at Woodleigh, Sussex, at the age of eighty-five. He was the sole surviving son of the Right Hon. Sir Charles Edward Grey, and entered the service of the Hon. East India Company on the Bengal Establishment in 1853, retiring in 1879.

Lieutenant-Colonel Alan Bryant, D.S.O., Gloucester Regiment, who was killed on October 17, was the eldest son of Mr. and Mrs. G. R. Bryant, of Boscombe, Hants. He was born in 1869, and educated at Marlborough, Cassel, and Sandhurst. He received his commission in the Gloucester Regiment in 1890, and served with his regiment in Ireland, Malta, Egypt, and India.

Lieutenant Reginald Gordon Hill, M.C., R.A.M.C., who was killed in action on October 11, in his 30th year, was the only surviving son of Mr. George W. Hill, of 21, West Hill, Highgate. During the war between Italy and Turkey, Lieutenant Hill was first surgeon to the field hospital of the Ottoman forces in the hinterland of Tripoli. At the outbreak of the present war he was on a visit to Australia, but immediately returned and obtained a commission in the R.F.A.

Brigadier-General Cecil Godfrey Rawling, C.M.G., C.I.E., who was killed in action on October 28, was born in 1870, and was the son of the late Mr. S. Bartlett Rawling, of Beaumont House, Stoke, and of Mrs. Rawling, of 16, Montagu Street, Portman Square, W. He was educated at Clifton College, and in 1891 entered the Army, obtaining his commission in the Somerset L.I. He saw active service on the North-West Frontier of India in 1897-98. In 1903 he explored and surveyed 40,000 square miles of Western Tibet, and in 1904-5 commanded the Gartok Expedition across Tibet, receiving the thanks of the Government of India, and in 1909 being awarded the Murchison Bequest by the Royal Geographical Society, of which he was elected a Fellow. In June, 1916, he was gazetted temporary brigadier-general.

MAILS FOR GREECE LOST.

A civil mail containing correspondence (except parcels) for Greece, and a mail containing correspondence for the British troops at Corfu, posted approximately between September 23 and September 25, inclusive, and parcels for the British troops at Corfu, posted approximately between August 31 and September 16, inclusive, have been lost at sea through enemy action. Registration with the Post Office does not cover losses due to acts of war, and no claims for compensation arising out of the loss of these mails can accordingly be entertained.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

APOSTOLIDES.—On November 6, 1917, at Calcutta, the wife of Colonel E. Apostolides (née Frances Graham), honorary A.D.C. to the Viceroy of India—a son.

EDWARDS.—On November 12, at 34, The Grove, Ealing, W.5. the wife of Second Lieutenant F. M. Edwards (Egyptian Camel Transport Corps), of a daughter.

MARSH.—On November 10, at Srinagar, Kashmir, the wife of Captain A. C. Marsh (Egyptian Army), of a son.

OULTON.—On November 8, at Cairo, the wife of Ernest Vivian Oulton, M.B., of a daughter.

SIMPSON.—On November 7, at Cairo, the wife of M. F. Simpson, Khartoum, of a son.

MARRIAGE.

WEAKLEY—RUFFER.—On November 6, at H.B.M. Consulate and St. Mark's Church, Alexandria, Arthur Leonard Weakley, Captain, R.A.M.C., only surviving son of Dr. and Mrs. Weakley, of Forest Gate, to Honora Vere, second daughter of the late Sir Armand Ruffer, M.D., C.M.G., etc., and Lady Ruffer, of Ramleh, Egypt.

DEATHS.

DYCE.—On November 8, at Linden Gardens, Hyde Park, W., Capt. Cecil Coles Dyce, retired Indian Army, aged 75.

DAWSON.—On November 11, at Saranac Lake, New York State, U.S.A., Geoffrey William, of the Indian Civil Service (Burma), fourth son of the late James Dawson, of The Avenue, Upper Norwood, aged 45.

GREY.—On Wednesday, November 7, 1917, at Woodleigh, Rutherfield, Sussex, Edward Grey, late of Bengal Civil Service, sole surviving son of the Right Honourable Charles Edward Grey, G.C.H., aged 85.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20;
Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—

THE LAND OF PROMISE.

It is a characteristic of the British nation that it takes its successes calmly and its failures seriously. Possibly no achievement at the present moment would compensate in the public mind entirely for the set-back to the Allied arms in Italy, and if Germany aspired to creating an atmosphere of depression bordering on consternation she has gone a long way towards attaining her end. But the powerful blow that has been dealt at the Italian front is at best only a temporarily successful sortie from the beleaguered fortress, which may add a little to the garrison's slender stock of supplies, but leaves it still further reduced in man-power. With all hope of relief from without cut off, such a sortie, while embarrassing the investing force, brings no practical advantage to the besieged, provided the former does not allow itself to be stampeded. On the other hand, any tightening of the steel ring round the fortress, even at the point farthest from the citadel, serves to remind those inside who are cognisant of the facts of the situation of the increasing hopelessness of their position. For this reason the double pressure now being exercised on the enemy's forces in Palestine and Mesopotamia has a greater value than a cursory glance at the war map may accord to it. Both these fronts are far removed from Constantinople, and still farther from Berlin; but the enemy has no new resources to draw upon with which to make good his losses, and at the lowest estimate the defeats must have their proportionate effect on his *moral*. Viewed as isolated engagements, there could be no comparison between the overwhelming Austro-German success in Northern Italy and the satisfactory but limited progress made by General Allenby and by Sir Stanley Maude. In their bearing on the war as a whole, however, the Allies may yet be justified in regarding the Eastern operations as an offset to the reverse in Europe. With the elimination of Jemal Pasha from Syria, the Germans exercise sole military control over all the fighting in Turkey. It is they and not incompetent Turkish commanders who have been forced to give ground, and this factor will not be lost on the Turks.

However the balance in regard to the military events of the last two weeks may incline, there can be no question that the Allies in general and the British in particular have in the operations in Palestine the most potent stimulus that the nations in arms could desire. Justice is an abstract conception that can hardly ever be dissociated from conflicting arguments; democracy under the inspiring phraseology of President Wilson opened out new millenial ideas that promised to sweep all before them, until the Russian revolution brought them tumbling to earth again; and even liberty has been parodied by Hohenzollern and Maximalist alike, until its genuine votaries shrink from making use of the word. Nothing, however, can affect the associations that cling to the name of Palestine, and no nation could play the part that Great Britain has now been called upon to perform without being thrilled by the thought of being an instrument in the shaping of the destiny of the Promised Land. It was surely the happiest inspiration that prompted the British Government on the threshold of what it is hoped will prove a successful advance through Syria to remove all possibility of misunderstanding by making known the disinterestedness of its attitude towards the country. "His Majesty's Government," the Secretary of State for Foreign Affairs has assured the head of the Zionist movement, "views with favour the establishment in Palestine of a national home for the Jewish people, and will use its best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country." The decision accords at once with the religious and political instinct of the British race. That Palestine would ultimately become once more a national home for the Jewish people has always been a settled conviction among those who have pondered over its future in the light of the past; and a long tradition connects England with the efforts directed towards that end. Politically the solution has much to commend it. The status of a Jewish Palestine has yet to be settled; but we may dismiss from our minds the idea of a minor State that may be tempted to plunge into international politics as an unattached unit on the look-out for a high bidder for its political support. Rather may we hope to find in the New Palestine such an enclave set between East and West as will prove a harmonising medium between the two and a moral buffer against all political aggrandisement in this part of the world.

No little misconception would seem to exist with regard to the precise significance of the so-called Zionist movement. Even in the ranks of Jewry itself differences of opinion have prevailed, and have tended to inspire doubts in non-Jewish circles as to the wisdom of the step to which the British Government has now pledged its support. First of all, let it be said, there is no suggestion of the whole of Jewry flocking back to Palestine; there would be no room for them there, and any incentive to make the change in their domicile would be entirely lacking among the bulk of the people. On the other hand, Palestine is for all true Jews a spiritual centre, and deep down in their being they associate with it, if not their own individual place of residence, at least the home of a sufficient number of Jewish people to make it the focus of Jewish life and Jewish civilization. Such a Jewish commonwealth can only grow up to fulfil its destiny under the protection of a strong and ordered State, which will guarantee it immunity from outside interference, security of life and property, and the impartial administration of justice. For its own material development it must look to itself, and in this connection it will be recalled that Jewish agricultural and urban settlements already exist in Palestine, and are a nucleus ready to hand for the new commonwealth. They point to the probable lines on which the development of the country will take place, expedited or retarded according to the degree of assistance on which Zionism can count. The valley is full of bones, and, lo! they are very dry; many stages have to be passed through before these dry bones stand upon their feet, an exceeding great army. Of Palestine it will then be true that "This land that was desolate is become like the Garden of Eden, and the waste and desolate and ruined cities are become fenced and are inhabited." Towards that consummation it would seem that Great Britain in the dispensation of Providence will have played no small part.

CONDITIONS IN SYRIA.

At the "International Board" dinner at the Lyceum Club on November 12, Mr. Holz, of the United States Embassy, spoke of his recent experiences in Syria in connection with the distribution of relief sent from the United States to the war sufferers in Syria. Starvation, typhus, and small-pox had worked havoc among the Druses and the Christians, and in Damascus, Beirout, and other places the population, he said, had diminished by 60 per cent. From the outbreak of hostilities in that part of the war area to last April, when the United States joined the Allies, Mr. Holz and his committee, aided by American missionaries, distributed £2,000,000 and kept many of the sufferers alive. With money in their possession, the people could buy food by a careful administration of "palm oil." Relief work had been cut off since last spring, and Mr. Holz feared that the condition of the people must now be deplorable.

ROUMANIA'S THREE DAYS.

By M. CORBESCO,
Prefect of Police in Bucharest.

The First Day, August 14, 1916.

War! Mobilisation! That was the secret which the first day revealed. War had raged two years outside. Two years during which the consciousness of our power, anxiety for our interests, and the obligations of our neutrality, for form's sake, made us face with suppressed feelings of revolt the procedure of the corrupt German propaganda in our midst, while both heart and reason had already made their choice.

One must have lived through these two years with us, in the growing development of the national spirit, under the insolence of those who supposed their designs assured; lived with us who believed our good faith abused, under the torture of doubt which at moments almost won over the most patient; one must have elbowed one's way through the demonstrations by day and by night, cleaned up the damage from stone-throwing and pistol shot, replaced the broken windows, given a deaf ear to insult and calumny, have watched over the good, and marked down the wicked; one must have lived through all this to be able to judge of the tension that drove some to desperation and others to depression, to be able to understand at last the beneficial relaxation that melted into one the weariness and the violence, from which evolved an enthusiastic national sentiment.

Our dignity was avenged. The day August 14 gave all this! From early morning the streets were packed with dense crowds watching the Ministers going to the Crown Council, and eagerly discussing the pros and cons of the situation. War! The police were glad to find the public taken up with a spectacle, for it had work to do. It was disconnecting all the electric wires in the houses of the "gentlemen" at Bucharest, at Sinaia, in the valley towns as in the mountains, wherever an indiscreet word could be whispered along a line the telephone suddenly became out of order for those who were likely to be indiscreet on this day. Secret agents in civilian dress quietly entered the houses marked on their little books, and never came out alone. At the Prefecture of Police the big guardroom began to fill up with those "gentlemen" always arriving, always accompanied. By night they must have numbered close on a thousand. A nice little present for Count Czernin!

Time presses. They have brought me 20,000 posters, all wet from the press, declaring a state of siege. It is almost time for the Crown Council to have ended. A feverish public watches the faces of the Councillors. What is the decision? Ah! there they are! They pass in motor-cars, and are gone, but the public, with that marvellous intuition, has grasped the fact.

War! War! The posters are passed from hand to hand; the growl of war surges from the crowd. The German "gentlemen" are assured by plain-clothes men that they need have no fear; they will be safely conducted.

An hour passes, and from all street corners the buglers sound the call: Mobilisation! To arms! Then were street scenes seen; people kissed, shouting aloud for the joy that had been suppressed; crowds made their way to the Palace, raising a mighty shout to acclaim the king who had delivered them. Although I had been two years Prefect, I was amazed at the dignity of this people, who throughout this time had clamoured for war, and had not hidden their feelings from the "gentlemen"; now that the gauntlet had been thrown down, they did not cry insults, but treated them with the silence they deserved.

Thus this day that had begun with the fever of lingering doubt, on which the afternoon brought deliverance for relaxed nerves, came to an end, and the silence of night fell on the 400,000 inhabitants, who in retirement prepared for the morrow of unknown suffering, but also of the realisation of the nation's hope.

At the same hour of the following day the church bells rang the first air-raid warning, and with the new darkness in the silent streets the enemy came, the sky was sprayed with gold, the cannon rent the night, and my telephone kept ticking "Hallo! Department of Police; Street ——; No. ——; 25 dead; 65 wounded!" And for hours the call repeated itself through the night!

The Second Day, November 22, 1916.

It is 10 p.m. My hand is waiting on the telephone, waiting for one more call, as if I could not bear to leave it; and yet the message is finished. The chief group of armies operating near Bucharest has communicated the prearranged secret signal for the retreat and the evacuation of the town.

I dream, but one must act. The day had been heavy, agonising, and yet with rays of hope. One had heard the cannon all day. Enemy patrols had visited the waterworks twenty miles away; refugees from the country had poured in—a constant stream—as if to find protection behind our walls, while the townsfolk were fleeing as if the same walls had lost all friendliness. Now it is over. The town is deserted, the houses are closed, and we must leave, too!

The last orders, the last couriers, a last piercing syren as signal, and in the growing darkness the last convoys were organised, and the thousands of workmen of the Arsenal were drawn up charged to save all they could and destroy the rest. The last sounds I hear are the deafening explosions of the powder factories and the ammunition.

The ever-growing convoys fill the streets. Leaving the town, we are already on the high road, sodden and ruined by the heavy rains. Columns of provisions, munitions for the troops, refugees in carts, in perambulators, in motor lorries, on foot, riding in smart carriages, in taxicabs; all like an ever-moving thick stream. It is horrible. Silence reigns but for the hoarse cries of the drivers in the dark, and the straining of the men and horses at the effort demanded of them. And this stream will move all night and all day. Against the flicker of the lanterns the sillhouettes of the bent backs of the men are darker than the black night.

The men do not speak. Now and then they stifle a curse at a broken trace or a bale that shifts on an overburdened horse. One hears no complaints. I feel that men so silent must have heavy thoughts—thoughts that suffering makes reasonable. But there is no despair, notwithstanding those whom I saw fall by the way.

The Third Day, August 14, 1917.

A year has passed. Those men who were silent in the fantastic night march, steeped in mud and their thoughts, I have seen nearly all since. They are here at Jassy, in the Arsenal, in the Polytechnic, in the workshops, on the railways, reconstructing for the defence of the country that is left them. They are working with all their energy and strength, on the meagre diet that is allotted to us all. Now they speak, they even let themselves go! They acclaim Albert Thomas and Vandervelde, and General Scott, and all those who have come here to us, to bring from so far words of hope, and the comfort of our great Allies.

These men speak at last, and they speak with sense. The day after the Agrarian Reforms were voted I went amongst them. I rejoiced in their joy, and was touched by the depth of their new thoughts. I spoke to them of the King and the Royal Family, for we all love the beauty of the children and their gentle natures. This family have taken such a burthen on them that it seems to us as if they would lighten us of all the load! Not an impure thought has come to these men from the Revolution next door. This says much for our national children. The love of the King has deepened every day. This says much for the King, whom we now call "Ferdinand the Faithful."

This third day, which has begun after our retreat in Moldavia, is a long day, a hard day, a day which will last until after the war: a day of patience, of travail and ever renewed effort. By means of it we have already found ourselves as a nation. We have realised, too, I believe, that the trials that we must still pass through, which make one learn by the heart, as well

Digitized by Google

as by the reason, will attach us more and more to the Sovereign and kindle in us a more passionate patriotism. These trials reveal a mystic communion of souls which can even reach to the unknown, and in the brotherhood of right and justice we shall, I believe, touch the great heart of England, to whom these lines are addressed. It is by these trials that we hope for a dignified peace.

BATTLES ON THE PHILISTINE PLAINS.

The turning of the Eastern flank of the Turkish defence at Beersheba has been followed with dramatic suddenness by the collapse of the whole fortified line of the Turks. Gaza has been aptly described as the "outpost of Africa, the door of Asia." Through this door our troops are entering the great rolling fertile downs of Philistia. History is but repeating itself. Nearly 3,600 years ago the great conquering Thothmes III. was held up at Gaza when advancing from Egypt to conquer Canaan, and later Egyptian kings held this city as the outpost of their land. When Assyria held Canaan their kings fortified Gaza against Egypt until some centuries later, when the position was reversed and Pharaoh Necho II. again made this city an Egyptian outpost. Here Cambyses, in 529 B.C., was long delayed on his route to Egypt. Alexander the Great also took it by siege. It was never, except for a very short time under Alexander Jannæus, in Hebrew possession. Under the Romans it flourished as a free city, and maintained its prosperity until it fell to the arms of Abu Bekr in 635 A.D. It never really recovered its prosperity under Crusader or Turk, and it is not remarkable that our soldiers in entering this modern town have experienced some disappointment at what they found. Gaza also outrivalled Damascus and was once the most populous city in Palestine. To-day, in spite of its abiding position of natural advantage—in a veritable oasis—it is but a collection of mud houses with a few mosques. The "Great Mosque" was originally a Christian Church built in the twelfth century and dedicated to St. John. Cities with such favourable advantages as Gaza never perish entirely, and it is probable that from its present low condition it will soon rise to something of its erstwhile importance. It has always been Egyptian in its life and ways, and one hopes that it may become once again, as it has been so often in the past, a frontier outpost town of Egypt itself.

Our troops seem to have passed the deep Wady el Hesy, on the banks of which—some fifteen miles east of the Mediterranean—rises the famous Tell el Hesy, excavated by the Palestine Exploration Fund a quarter of a century ago, and then proved to be the site of Lachish, which "throughout history played second to Gaza, now an outpost of Egypt, and was a frontier fortress of Syria."

Following along the coast, at a spot where the enormous sand dunes, which continue up the coast all the way to Jaffa, become a little thin and allow approach to the sea, lie the ruined walls of Ashkelon. This, the second greatest of the Philistine cities—now known as Askalon—has a great and glorious history, to which its abundant ruins, largely now covered by sand swept up from the beach, bear witness. In the centre of the great semicircle of the Crusading walls—successors, on the same foundations, of those of Roman times—lies a great elongated mound, the site of the Philistine city referred to in the lament over Saul, "Publish it not in the streets of Askelon" (2 Sam. i. 20). The sea has on one side worn away parts of this mound, exposing upon the surface of an almost perpendicular cliff the successive remains of the earlier civilisation. Some day we may hope that from this spot may be recovered the archæological secrets of the mysterious Philistines. The site of Askelon is also one well suited to a renewed civilisation. The Crusaders considered it the most important post in S.W. Palestine, and the contemporary Arabs described it as the "Bride of Syria."

Yet another of the five great cities of the Philistines has been reached in Ashdod—now Esdud—just halfway between Gaza and Jaffa. To-day this once great city is but a large village near the edge of the fertile Wady Sukereir. The ruthless sand, ever drifting eastwards, threatens to cover the "tell," now tree-clad, which hides the remains of the Philistine city and the temple of Dagon.

While progress on the west side of the plain has been rapid—and to seize and hold the coast is for us important—the Turks seem to be making a stand on the road from Gaza to Hebron, not far from Bert Jebrin, and near where in ancient time stood the fortress of Monshah (now Tell Sandahannah) to defend this very route. Another nine miles N.E. of this, gleaming white from afar, stands the remarkable hill Till es Safi, the Blanchegarde of the Crusaders and the probable site of the Philistine Gath. As this guards the entrance into the hills by the Wady es Sunt, the Vale of Elah, we shall probably hear of this spot in the military reports before long.

What a gladdening change it must be to our men from the desert wastes south of Wady el Ghuzzeh to the open downs dotted with villages and trees of the Plains of Philistia!

TANGIER TO TEHERAN

An amusing story about an archæological "find" made by a Colonial Army chaplain has been going the rounds lately. Apparently it found its way home in a letter written to the headmaster of Lewes Grammar School by Sir Samuel Shead. At any rate, that is the authority quoted by the *Morning Post*, in which I had read the tale. The chaplain referred to appears to have been doing a little quiet excavation on his own account in "a temple" regarding which no particulars are given that would enable us to locate it. But the padre is reported to have found "under a beautiful Mosaic floor . . . a body, which he identified as John of Antioch"; and as telegraphing to the Colonial authorities for permission to remove his find. The reply, we are told, was: "He has been reported missing for some time; please send his identity disc."

***

It is a pleasing tale; but there are one or two points in it that make me doubt whether it is literally true in every respect. I am ready to assume that the enterprising padre was removing that "beautiful Mosaic floor"—or as much of it as he could conveniently tackle—in the interests of Science, when he, accidentally, made his find, I can hardly imagine his telegraphing for permission to remove the said find. Of course, he may have had the intention of getting the authorities to pay ex's; for he seems to have possessed the born excavator's unlimited cheek. We should like to have been told his reasons for identifying his find as John of Antioch. What makes me more inclined to suspect that someone is indulging in the gentle art of leg-pulling is the fact that stories of this kind have always flourished exceedingly in Turkish soil.

***

For many of these stories there is, of course, quite substantial foundation. For instance, Sir Edwin Pears was once consulted in Constantinople about a man who had been arrested for failing to produce one Paulos of Galata, who was suspected of printing a set of rules of a Greek benefit society, of which the police did not approve. The Turkish officials were not to be fooled. The prisoner might say what he chose, but there, on the paper, were the words:—'Επ.....Παύλου πρὸς.....Γαλάτ.....It was all very well to endeavour to make out that they referred to something that preceded them, which was extracted from a letter written long since by Paulos to the Galatians; that Paulos was dead; and that the Galatians were *not* the inhabitants of the Galata quarter. A likely story indeed! . . . And it took some very hard swearing, and some very substantial securities before the Turkish Sherlock Holmeses were satisfied. You can read the details in Sir Edwin's "Turkey and its People."

***

The publication of the text of ex-Queen Sophie's now notorious telegram sheds a certain light on the character of its sender. Taken in conjunction with the wording of other telegrams in the series, it shows how entirely of herself and her own interests were the ex-Queen's thoughts; how entirely she failed to identify herself in spirit with Greece and the Greeks. Misled, one supposes, by the courtiers and self-seekers, she speaks of "the sympathy already shown by the Greek people for the cause of Germany," and yet she speaks of herself as "exiled and unhappy" amidst these ardent Germanophils! And how very, very sorry she is for herself and her hard lot. "You can realise my position," she exclaims, self-pitying, and "How I suffer." But the subject that seems to be mentioned most times in these telegraphic masterpieces is—food! It almost looks as if the Royal Lady shared certain characteristics with the Infamous Pig.

***

A correspondent who has recently returned from Russia, having had occasion to travel to the north from Odessa, has thrown considerable light on the situation in that country. To take only the question of food supplies. All along the route there was no indication of any shortage; bread, butter, eggs, milk, and fruit could be had at the stations in plenty and cheaply. Then came an abrupt change when the Petrograd zone was reached. The mileage from the capital was not mentioned, but wherever the line happens to be, it is drawn pretty incisively. At the first station within the zone what could be had for forty kopeks at the last station now cost four or five roubles; and from that point this scale of charges was maintained. The question of transport may have something to do with the problem, but the real trouble seems to be that the rest of Russia is, to use a colloquialism, so sick at what is happening in the capital that it refuses to supply it with provisions. My correspondent's view is that the Government which aspires to be Permanent, and not Provisional, will have to rid itself somehow or other of the Petrograd atmosphere, which is far too impregnated with German microbes—male and female—to be healthy.

CORSAIR.

THE PRESS ON THE NEAR EAST.

Settlement in the Balkans.

The current number of the *Quarterly Review* is of special "Near Eastern" interest. Reference has already been made in these columns to an article on the Baghdad Railway. Even more significant is an unsigned article, entitled "Settlement in the Balkans," which boldly maps out in detail the territorial arrangements which should follow the war. The writer's conclusions are not likely to pass unchallenged, but they constitute, as far as we are aware, the first attempt outside the pages of THE NEAR EAST to envisage the settlement as a whole. Moreover, the proposed settlement starts from a premise for which we have consistently stipulated: that it was to be "imposed from above"—a phrase which will be familiar to our readers in this connection.

"It is our interest as well as our duty to remedy a state of affairs which has set Europe in flames, and to establish in the Balkans, the gateway of the East, a firm and enduring peace, the only sure guarantee for our own tranquillity in the future. This can only be attained by satisfying the legitimate aspirations of the Balkan nationalities. The settlement must be just and free from any taint of vindictiveness; it must be imposed from above and maintained under penalties, perhaps even *manu militari* for a certain time, until the military and Chauvinistic elements have been brought to reason, which have so often stifled the voice of good sense and overborne the wishes of the majority in these States. With a just delimitation of frontiers the irredentist agitations in the various countries will cease to exist, and with **their disappearance the Chauvinists** and militarists will lose much of the leverage with which they have hitherto worked on the various Courts, Governments, and populations."

Turning to details, the writer gives the following solution in regard to the Dobrudja:—

In any case it is necessary that Roumania should have full access to the sea and that the channels of communication should be entirely Roumanian. This is not the case with regard to her ports on the Danube, Braila and Galatz, inasmuch as the lower course of the river from Reni to the apex of the delta is subject to Russian control. It is, therefore, desirable that Sulina, Constantza and Magnalia should continue to be Roumanian; Roumania has already incurred great expense in providing Constanza with a harbour and with railway access to the interior.

It is otherwise with the southern portion of the Dobrudja, assigned to Bulgaria by the Berlin Treaty, but appropriated by Roumania in 1913. The Bulgarian element in the Dobrudja is divided into two groups, the northern and the southern. The northern group, extending from little north of Constanza to Tulcha, is isolated by Turkish and Tartar strata from the southern, which extends south and south-west in compact masses from near Mangalia to Baltchik and Dobritch, where it again encounters the Moslem element. Baltchik, Dobritch and Kavarna should obviously be returned to Bulgaria, and the best arrangement from every point of view would be a return to the decision of the European Conference at Petrograd in March, 1913, which accorded Silistria (mainly a Turkish town) to Roumania, together with small circumjacent territory, and drew a line thence to the sea coast a little south of Mangalia. This arrangement would give back to Bulgaria a district which is mainly Bulgarian wherever it is not Turkish, and would revive a European decision which ought not to have been set aside by the Treaty of Bucharest.

It is not possible here to deal with all the points raised in the *Quarterly Review* article, which is accompanied by a map illustrating the suggested settlement. It is proposed that the Theiss should be Roumania's western boundary, with a line bearing north-east from a point opposite Zenta, and keeping to the east of Grosswardein and to the south of Czernowitz.

The Macedonian Question.

The proposals in regard to Bulgaria will be anathema to some people, but the writer handles his subject fearlessly, keeping in view, as we believe, the goal of a permanent peace in the Balkans rather than restricting his outlook to the days of heated animosities that will follow the war. The Bulgarians—however unworthy—are given the Enos-Midia line and a part of the Dobrudja taken from them by the Treaty of Bucharest. Their boundary with Greece is to start from the Struma, running north of Nigrita and south of Vodena, to Mount Grammos on the Albanian frontier, close to the source of the Devol.

An important point is made in connection with the Ægean ports and the hinterland.

If Salonika must remain Greek, Kavala will largely take the

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2.

place of that port as the distributing centre for the Bulgarian populations of central and even western Macedonia. Greece can never possess the back-country of these important ports, and if she is allowed to retain one of them it is the most she can hope for. Furthermore, it should be remembered that British and other foreign trade, which Germany and Austria-Hungary hope to oust from the peninsula, will be excluded from these regions unless the Macedonian seaports are left in the hands of the State which controls the interior. The creation of a Greek Dalmatia on the Ægean coast would be alike injurious to the prospects of Western commerce and to the prosperity of these ports and of the regions which derive their supplies from them.

The writer is not favourably disposed towards a Greek Salonika. In answering the question: Is Salonika to be Greek in which "the principle of nationality is not involved?" he says:—

In this case, as in that of the other seaports, the paramount claims of the back-country take the first place. The Bulgarian peasant element, speaking a dialect which presents the nearest approach to the old Slavonic, the language of SS. Cyril and Methodius, descends to the sea-coast west of the town, but the fact, which was recognised by the Treaty of San Stefano, possesses no significance unless central and western Macedonia accrue to Bulgaria. Greece is already abundantly provided with seaports and can never possess the Macedonian interior, on which Salonika depends for her future prosperity. A Customs barrier must prove a serious drawback to that prosperity, which in any case Greece will hardly be disposed to encourage at the expense of Piræus. In the future, commercial rivalry between the Jews and Greeks will result in the impoverishment of the Hebrew element, hitherto by far the wealthiest in the city. The population was Jewish, Turkish, Greek, Bulgarian, in the order named, before the Balkan wars; to-day, under Greek rule, the Turkish population has diminished, the Greek has increased, and the Bulgarian has been almost exterminated. The Jewish still remains the first in wealth and numbers, but its prosperity has declined; Greeks and Jews, as is well known, do not live happily together. The ideal solution would be a Jewish republic and a free port under the protection of the Powers.

Montenegro, according to our authority, should "receive her legitimate extension" to the north, and he would not allow the Drin to be her southern boundary. The subject of Italian claims to a foothold on the Dalmatian coast is not touched upon. The Serbian-Bulgarian frontier is to follow the course of the Timok and to cut the contested zone roughly in two.

Finally, the writer in the *Quarterly Review* sums up his suggestions in the following words:—

A re-partition of territories effected on the lines above indicated would furnish the basis for an enduring peace in the Balkans. The promulgation of such a scheme would be met with an outcry all round, especially on the part of those who desire to appropriate what is not theirs; but proposals for the dismemberment of any Balkan nation or nations could not be listened to at a moment when the world is meditating the reconstitution of unhappy Poland. Such proposals should be rejected as impolitic, and as contrary to our declared programme, and the Balkan States, exhausted by the war, would soon settle down to the peaceful development of their new possessions. It is not too much to anticipate that consciousness of their mutual interests, aided by experience of the calamities resulting from their quarrels, would soon bring them together in a new Balkan League, defensive in character, and designed to resist encroachment from without. Such an alliance or confederation would form the best and surest barrier against German aggression in the East.

GEOGRAPHICAL CONSIDERATIONS IN THE BALKANS.

Sir Thomas Holdich, President of the Royal Geographical Society, at the first meeting of the session at Burlington Gardens on November 12, read a paper on political adjustments in the Near East as they may be affected by geographical conditions. One great principle of adjustment to be observed, he said, should be to give each country space and opportunity for independent development such as might remove all incentives to discontent. It was not to be effected by any fixed, sentimental basis of affinity of language, religion, or culture. International disputes were not uncommon between people of one race and one language. The first geographical condition required for an environment which would keep a people contented and happy was space. There must be room enough for development on the lines best suited to the character of the people. They might hope that out of the welter and turmoil of war a way might be found for contentment in the Balkans by a recognition of those geographical interests which were essential to the prosperity of each community individually.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

That Mr. McLeod, British Consul at Fez, should declare himself an enthusiast with regard to the work of France in Morocco in his recent lecture on the subject, is not surprising in view of the remarkable constructive work accomplished there by our Ally during the last few years. In Morocco France has probably attained her highest development so far as a colonising power, and the results of her work there are of a kind which will bear comparison with the colonising work of any other Power. The best test of the success of colonisation is to be sought in the people who are the subject of the experiment, and in Morocco such an inquiry could only redound to France's credit. The natives are more than reconciled to her rule; they are satisfied with it, and as Mr. McLeod stated, "notwithstanding the numerous temptations afforded by the war and the intrigues of our common enemy, not a single area has tried to secede from French influence."

***

France's rule in Morocco may perhaps be best described if I say that in general it has followed the lines which have been pursued elsewhere by this country with such marked success. Following the establishment of order, the work of developing the country was systematically carried out, and, with this end in view, agricultural, veterinary, and other services were set up. France realised that if the work was to be successful it would be necessary to undertake schemes entailing expenditure on an extensive scale without any prospect of an immediate return. How thoroughly she set herself to this task will be gathered from the fact that £1,450,000 has been spent on roadmaking, £80,000 on irrigation, and £2,000,000 on the development of Casablanca, not to speak of large sums for the construction of railways. Naturally the war will prevent the continuance of this work on the same scale in the near future, but enough has already been done to ensure the prosperity of the country.

***

An excellent example of the way in which the Empire has failed to utilise its resources of food and raw materials is provided in the case of rice. India contributes some 40 per cent. of the world's trade in this commodity, and of this amount in 1913-14, 42.6 per cent. was exported to British countries and 57.4 to foreign countries. Holland's share was 13.8 per cent., Germany's 13.1 per cent., and Austria-Hungary's 8.7 per cent., while the share of the United Kingdom was only 6.7 per cent. This is to be attributed to the fact that rice-milling, once a flourishing British industry, was unable to withstand the competition of the Dutch and German mills, so that most of the rice consumed in this country, though grown within the Empire, was supplied through foreign sources. War conditions have happily put an end to this anomalous state of things, but whether the recovered trade will be retained in the future is another matter. In this connection, I may recall the fact that the Indian trade in rice has been enquired into by a special committee of the Imperial Institute. It is understood that this enquiry, now nearly complete, has made it apparent that something can be done to increase the market for rice within the Empire.

***

It will be seen from an announcement which appears on another page that the Department of Commercial Intelligence is compiling a list of manufacturers for the use of our trade officials abroad. This action is a commendable indication of the fact that the authorities are now becoming alive to the necessity of leaving nothing undone to further the interests of British trade. Obviously the list, when completed, will be most valuable in helping the establishment of trade relations abroad, and it is to be hoped that manufacturers will not delay in placing whatever information is desired at the disposal of the department. Criticism in connection with such a useful project may seem invidious, but, all the same, I cannot help wondering why such a necessary step has not been undertaken in the past.

***

What evidence there is on the subject points unmistakably to the fact that Turkey is feeling the economic pinch more and more every month. The latest indication of this is to be found in a telegram from Constantinople published in the *Cologne Gazette*, according to which three meatless days had been appointed in Constantinople, beginning on November 1, and the slaughtering of cattle had been restricted to eleven slaughter-houses. The fuel question appears from the telegram to be very acute, for the hope is expressed that "the fine woods around the city will not be too extensively drawn upon." When it is remembered that in addition to this general absence of supplies—for shortage would apparently be scarcely the correct term—there is the fact that the best revenue-producing parts of the country are now practically sterile, either because they are in the occupation of the Allies or because the inhabitants have been ruined, Turkey's unfortunate state can well be realised.

***

It is a curious commentary on Turkish psychology that her hopeless internal position has not had a restrictive effect on her commercial activities. On the contrary, possibly inspired by Bulgaria's desire to institute reforms to keep the people quiet, she is showing every indication in the day of her trouble of wishing to prepare for the commercial struggle of the future. The situation is distinctly humorous, but there is also something almost pathetic in the vision of the Turk on his last legs keeping up appearances to the end by the establishment of various companies the Alpha and Omega of whose operations will be their winding up.

***

Malta, I hear, has been experiencing an even more severe shortage of matches than that which we had in this country some few weeks ago. Most of the matches used there have been furnished by Sweden, but for obvious reasons supplies from this source have been hard to obtain of late, so that Malta has for some time been dependent on the United Kingdom and Italy for its matches. As both countries have experienced great difficulty in meeting home demands, it will readily be recognised that they could hardly do much to ease the situation.

***

German trade methods in Turkey, which enabled her to oust all competitors from the Turkish market, and finally to obtain for herself a position of commanding influence in that country, are the subject of an article on page 576, to which I desire to call my readers' attention. The writer contrasts British and German trade methods, to the manifest disadvantage of ourselves, pointing out that in diplomacy, financial facilities, and also in business acumen this country has not been a match for its rival. I mention this article because, while I know the subject has been dealt with in one form or another time and again, I feel that the subject is one on which it would be impossible to throw too much light. No matter how badly the Teuton is crushed in the war, I am firmly convinced that sooner or later we shall find him using his old commercial methods, always with the ulterior motive in view, and the only way to meet that contingency is to see to it that there is no unnecessary delay in removing whatever weaknesses exist from our own system.

***

The report of the Anglo-Egyptian Bank, Ltd., which appears on another page, makes very satisfactory reading since the results of the past year have been the best in the history of the institution. This year the net profit is £144,347, as against £100,276 in 1915-16, and to this has to be added £52,000 brought forward, making the total £196,347. The dividend paid is 20 per cent., with a bonus of 2s. 6d. per share, as against 15 per cent. and a bonus of 2½ per cent. in 1915-16, and 15 per cent. for each of the three previous years. This comparison is even better than it appears, for the company reverted recently to the practice of paying dividends free of tax. This only partially affected the 1915-16 figures, but obviously it greatly enhances the value of this year's declaration.

GERMANY AND TURKEY.

British and German Commercial Methods.

When the full story of Germany's relations with Turkey is written history will be the richer by a unique chapter, for there is no previous record of a nation obtaining a commanding influence over another in the way in which Germany has done, by means of the adroit use of the arts of peace, and that, too, in so brief a space of time. Only seventeen years ago, as a matter of fact, Germany had barely succeeded in securing a trade footing in Turkey. Her actual exports to that country were then worth just over half a million sterling, as against the figures for Great Britain of £7,364,900; and at the time the idea might well have seemed preposterous that the interests of this country and her Allies could have been vitally affected by Teuton competition. As events were to prove, Turkish soil was destined to afford a most fruitful field for Germany's commercial penetration, and within a few years her exports to Turkey began to approach the British figures, which, instead of maintaining a normal increase, remained more or less stationary from 1900 onwards. Increased trade where Germany is concerned has always meant increased influence, and so it was in this case. Turkish Government contracts and concessions began to fall to her to an increasing extent, and German enterprise, indeed, began to give shape to almost every phase of the country's economic life. Turkey's collapse in the Balkan war marked a break in this process, for German merchants and financiers became nervous as to the country's future, and showed no disposition for a time to increase their liabilities. As a result, a few contracts and concessions fell to Great Britain, but the pause in the penetration was brief, and when the present war broke out Germany's position in Turkey was at least as strong as it had ever been. There is no need to recapitulate the circumstances which led to Turkey's adhesion to the cause of the Central Powers, but we may well ask ourselves whether, in the circumstances, Turkey's intervention was not inevitable, even failing an unfortunate episode like the escape of the Goeben and the Breslau. If it was, then all that has since followed in Mesopotamia, in Gallipoli, and Palestine is part of the price this country has had to pay for its lethargic commercial policy.

"Peaceful Penetration."

The methods by which Germany established her position in Turkey differed from those that marked her economic course in other parts of the world in one important respect only—her Eastern ambitions led her to concentrate on her campaign in Turkey at the expense of enterprises further afield. They are none the less interesting on that account, and an informative article on the subject in the current issue of the *Quarterly Review* deserves special notice from the light it throws on a question which cannot be too often ventilated, if the world is to take proper precautions against Teuton aggression in the future. Commencing by pointing out that the foreigner's trade differs in one particular especially from British overseas trade—namely, that trade follows the bank instead of the flag—the writer shows that the factors which have conduced to Germany's success in Turkey have been diplomacy, commercial influence, and finance. "The capture of commerce in the Near East," he says, "was accomplished by German activity on the one hand and British inactivity on the other. On the one side there was a thorough and continuous effort to capture the Turkish import trade, which was backed by German diplomatic and Consular influence, and furthered by the offer of commercial facilities and financial assistance. To these must be added the careful conduct of the German merchant and his capacity to meet the wishes of his client in regard to the quality of the goods and the form best suited to the necessities of the country and customer. On the other side, we have to note the absence of diplomatic and Consular influence, as well as of commercial and financial aid, while the somewhat crude methods of English commerce and the generally careless 'take-it-or-leave-it' style of the British merchant, together with his reluctance to study the nature of the article wanted, the requirements of the country, and the wants of the client, placed him at a further disadvantage." We have quoted this passage because it is an admirable summary of the reasons why British interests failed to hold their own against Germany in the past. It is also painful reading, since it shows that not in one direction, but in all, changes will be essential if we are to hold our own in the post-war competition. Changes in the usual meaning of the term are, indeed, not what is wanted; it is rather a revolutionary reorganisation of our methods that is required.

The Handicap of Tradition.

The question at issue as far as we are concerned is, "Are we capable of putting our house in order so that we may avoid a repetition of this state of things?" And if we hesitate to answer with a decided affirmative it is only because of the immense influence of tradition in this country. There is no getting away from the fact that Germany scored in Turkey and elsewhere principally because her diplomatists had what may be called a material view of their functions. It was not their duty to ignore commerce or to isolate themselves from their Consular service. On the contrary, their activities were largely centred on furthering their country's trade, and in achieving this aim they and the Consular officials worked, so to speak, hand in hand. Our diplomatic service, on the other hand, acting in accordance with British administrative tradition, has kept itself severely aloof from questions of trade, and this tradition has prevented the intimate relations between it and the Consular service which are essential if national interests are to be safeguarded. Complaints against the system—or absence of system—have been made many times in the past, and as often have led to nothing being done. If there is hope now it is because we are labouring under the spur of stern necessity, with the vision before us of a future in which the hall-mark of efficiency will be utility. We shall not be able to afford to follow tradition in the future, if tradition lays a handicap on our national well-being. In this case it certainly does, and will continue to do so until an altered outlook is brought about, under which every member of the service will consider the furtherance of our trade interests as one of his most important duties.

Banking—Germany's Best Instrument.

We have to thank tradition also for the fact that our banks have never shown the slightest disposition to establish branches in Turkey, so that until 1909, when the Banque Nationale de Turquie was founded, our business men had no alternative but to deal with foreign banking institutions. What this absence of banking facilities meant is aptly illustrated by the writer of the article referred to in showing what the Deutsche Bank and its connections accomplished for their country in Turkey. At every turn the bank was at the disposal of its country's business men. "Did a merchant wish to do business," he points out, "the bank would find him an agent in the country. The agent would be someone, of course, probably a German or Austrian, recommended by the local branch; and, if he was a native agent, he would be promised the bank's financial support, if he would bring over his clientèle or portfolio of customers to the German merchant and throw over his British houses. The parties, that is, merchant and customer, would soon be in communication through the agent. Did the German merchant want to be financed? That would be easy. The bank's idea of the merchant's dealing with the customer would be so much against the invoice and bill of lading, so much by a three months' bill, and the balance in a six months' bill, or some such terms, perhaps of longer date. The bank would even offer to take charge of the whole matter from first to last, and, if the merchant desired, would finance him up to 70 per cent. or 80 per cent. of the amount against the bank's receiving the bills of lading or other securities." This may serve to convey some idea of the way in which the bank furthered Germany's commercial penetration. It is only a small part of the picture, however, for the bank's interests were all-pervading, and were, it may be added, marked by the most unscrupulous disregard for accepted commercial practices. Thus it was not an uncommon thing for the bank to obtain a customer of another institution by the offer of better terms, and when it had learnt everything about his business methods and resources, a German competitor would make his appearance with the usual result. The presence of British banks in Turkey would not only have served to safeguard our countrymen from insidious attacks of this kind, but would also have proved a strong obstacle in the path of German aggression generally.

Attitude of British Merchants.

Lastly, we come to the attitude of the British merchant with regard to foreign trade, and here again we find tradition playing its usual dilatory rôle. Adaptability has always been the predominant characteristic of the German trader, and whatever the peculiar requirements of a market, he might be depended upon to satisfy them if it was humanly possible. Unfortunately, this has been the very antithesis of the attitude of British merchants. First in the field, they may have had the monopoly of a market for many years, and fail to maintain their supremacy solely because of an inability to move with the times and produce an article in keeping with present needs. An excellent instance of this is given in the article. English light ploughs were being used in a district, but they were too heavy for the country, and the English agent for the ploughs devised a lighter plough, and had one constructed locally, which fully satisfied the natives. Firms in England, however, refused to manufacture the plough, though the agent offered to take several thousand within a fixed term. The invention was taken up in America, with the result that the English ploughs were driven out of the market. It is the spirit which makes that kind of thing possible which must be combated if we are to hold our own against increasing foreign competition.

BRITISH GOODS FOR FOREIGN MARKETS.

Compilation of Directory of Manufacturers.

The Department of Commercial Intelligence of the Board of Trade is compiling an Index or Directory of British and Irish manufacturers which it is proposed to forward to Trade Commissioners, Consular Officers, and other Correspondents of the Board of Trade abroad, for their own use in dealing with enquiries which they may receive, for the supply of British and Irish goods, both now and for delivery after the war. A large number of firms have already supplied information as to their products to the Department, but before transmitting this information abroad it is desired that all manufacturers in the United Kingdom interested in the export trade should have an opportunity of applying for the inclusion of their names in this index. The department is now compiling the sections of the index dealing with the following trades:—(1) China, earthenware and stoneware trades. (2) Glass trade. (3) Basketwares. (4) Woodwares. (5) Brush trade.

Manufacturers in these trades in the United Kingdom are invited to supply in letter form: (a) A detailed list of the articles they manufacture for export; (b) A list of the foreign and colonial markets in which they are more especially interested; (c) The names and addresses of their overseas exports; (d) Terms of business, such as, whether their trade is done direct with buyers or agents abroad, or through merchants or agents established in the United Kingdom; and (e) Any other information likely to be of use in enabling enquiries from persons desirous of purchasing goods in the United Kingdom to be dealt with adequately.

Manufacturers who desire to apply for the inclusion of their names in this index should forward particulars to the Department of Commercial Intelligence, 73, Basinghall Street, London, E.C.2. Envelopes should be marked "Index." The Index is not intended for publication, but is for official use only in the Department of Commercial Intelligence and by His Majesty's Trade Commissioners, etc. It is not proposed to insert trade advertisements.

ADEN'S DATE TRADE.

Influence of the War.

The date trade of Aden, the importance of which may be gauged from the fact that on the average 7,851 tons have been dealt with annually for the past five years, is the subject of some interesting comments by the United States Consul at Aden, Mr. Addison E. Southard, in a recent report (some extracts from which are given below), in the course of which he expresses the opinion that there are considerable possibilities as regards the development of an export trade.

The Arab is ordinarily assumed to be the principal consumer of dates, but the greater portion of the considerable quantity handled in this market is consumed by Somalis. Aden date merchants make by far the largest exports to Somaliland ports on the neighbouring African coast, and during the past two years increasing quantities of dates have gone there to be used as food because of diminished supplies of rice and other grains which ordinarily are important in the native Somali diet. Some of these people eat little else than dates and meat during the periods when grains are scarce or high in price. The Turkish Yemen takes the next largest supply of dates from Aden. Abyssinia also imports considerable quantities of dates from Aden.

Aden merchants import their greatest supplies of dates from Muscat and Busreh. Muscat dates are of two qualities, the best being known by the trade name of Fard and the second grade being known as Zakal. The Busreh dates imported are classified under the two trade names of Samaran and Hallawi. The Fard date in the Aden market, which is usually in a half-dried state, is considered the best, and is preferred by the Arabs and Indians. The Zakal is a wet date, and is considered as of second quality. The Somalis prefer and consume large quantities of this variety. The wet dates keep much longer and better than the dried or semi-dried kinds.

Prices and Supplies.

Muscat dates sold during the past season in the Aden market at an average price of 12 rupees per bale, and the Busreh dates sold at an average of 2 rupees less per bale. Dates carried over from the preceding year find a ready market at an average reduction of $1.30 from the regular price per bale. This reduced price is effective upon the arrival of new stock. Notwithstanding the large quantities of dates handled in the Aden market, none are exported abroad, the entire quantity being consumed within the Red Sea and Gulf of Aden districts. Although the Aden hinterland is supplied to a considerable extent with imported dates, there are a number of date groves in that country, the fruit from which is largely consumed while fresh. Normally, fresh dates are always obtainable in the Aden market during the season. Although it would seem that owing to disturbed conditions in the Persian Gulf region there would be diminished supplies of dates, local dealers say that they have had no trouble in securing their usual supplies. Moreover, they pay from 10 to 15 per cent. less for the fruit than before the war. This has prevented a greater increase in the native cost of living, as grains and other food items have become much more expensive. Dates are an excellent substitute for the more expensive foods.

Trade Prospects.

Owing to its position as a trade centre with direct connections to foreign markets, local dealers are of the opinion that Aden could and may become a centre for the export of dates abroad. Buggalows must come to Aden for cargoes of grain, kerosene, cotton piece goods, and similar merchandise, which are distributed from here in important quantities to the date-growing districts, and cargoes of dates can be brought to Aden without the otherwise high transportation charges which would add materially to the cost landed here. The possible establishing of direct steamship connections between Aden and the United States would undoubtedly make it profitable to bring dates in this way from Muscat to Aden for export to American importers.

EGYPT'S FINANCES.

Excellent Returns for July.

(From Our Own Correspondent.)

Cairo, October 14.

The State accounts continue in a flourishing condition, and the figures for July, just published, show that at the end of that month the surplus had grown to £E361,506, as compared with a deficit of £E150,101 a year ago. Revenue during the month amounted to £E1,407,035 and expenditure to £E1,282,943. The principal items under receipts were:—Direct taxes, £E368,365; Customs, £E248,381; tobacco dues, £E139,602; judicial fees, £E98,691; railways, £E338,634; ghaffir cess, £E52,742; and miscellaneous receipts, £E35,405. On the expenditure side the chief items were:—Irrigation, £E125,052; railways, £E322,580; War Office, £E88,399; pensions and indemnities, £E55,949; ghaffirs, £E59,340; and reservoir annuity, £E76,648.

It is interesting to note that, compared with the situation just prior to the outbreak of the war, the returns are much better this year. Thus, at the end of July, 1914, the revenue came to £E5,358,741 and the expenditure to £E6,380,075, whence there was a deficit of £E1,021,334. Land and other direct taxes are up some half million; Customs are £E200,000 better; so also are railway receipts; tobacco dues are, however, down by about £E100,000; port and light dues by £E130,000. Even allowing for the inclusion now of the receipts and expenditure on account of the ghaffir cess, the difference in favour of the current year is exceedingly marked.

Reuter's Cairo correspondent telegraphs that the Egyptian cotton condition is as follows:—Lower Egypt, 86; Upper Egypt, 94. The second picking mostly finished poorer than anticipated, but it was larger than last year. There has been a satisfactory diminution of bollworm in Lower Egypt.

PROMOTION OF BRITISH TRADE.

Next Year's Industries Fair.

Next year's British Industries Fair, for which application forms for exhibiting space are now being issued by the Board of Trade, will be considerably larger than those of previous years. The last two fairs were held in the Victoria and Albert Museum and the Imperial Institute, and, though wonderfully successful, the space which was then available was by no means sufficient to meet the demands of the exhibitors. In many cases, in fact, exhibitors' applications for space had to be cut down by as much as 60 per cent., and the fact of the fair being in two buildings caused some inconvenience. The 1918 fair, which will, as usual, open on the last Monday in February (February 25), and remain open for a fortnight, is to be held in premises which the Port of London Authority have been so good as to place at the disposal of the Board of Trade, and it is hoped that the available space will be sufficient to meet exhibitors' requirements, at any rate for this coming year, as the fair will, owing to the war, again be restricted to the following trades:—Earthenware and china trade, glass trade, fancy goods trade, paper, stationery, and printing trades, toy and games trade.

The fact that the building for next year's fair contains about twice as much space as the Board was able to secure at the Victoria and Albert Museum is only one of its advantages. In the first place, it is more conveniently situated for business men, being near the Tower Bridge and only a few minutes' walk from Mark Lane Station on the Metropolitan and District Railways; and, in the second, the building is exceptionally well suited for the purpose of the fair, being a large roof-lighted warehouse on one floor. Some idea of its size can be gained from the fact that its area would be sufficient to accommodate two full-sized Rugby football fields. As in past years, invitations to the fair will be issued by the Board of Trade, and admission will be restricted to *bonâ-fide* buyers in the trades concerned.

As the increased size of the fair and the growing shortage of labour will make the work of preparation exceptionally difficult, it is hoped that firms who are anxious to exhibit will send in their applications for space to the Director, British Industries Fair, 10, Basinghall Street, London, E.C.2, at the earliest possible moment.

INDIAN GOLD STANDARD RESERVE.

The India Office has issued the following statement, showing the form in which the balance of the gold standard reserve was held on October 31:—In India, nil. In England—Cash placed by the Secretary of State for India in Council at short notice, £6,024,443; British and Colonial Government securities (values as on September 30, 1917), £23,026,578; British Government securities since purchased (cost price), £4,529,871.

Dr J. Collis Browne's Chlorodyne

Safeguard your Health with this Reliable Medicine.

Cuts short attacks of HYSTERIA, SPASMS, PALPITATION.

A true palliative in NEURALGIA, GOUT, TOOTHACHE, RHEUMATISM.

Checks and arrests FEVER, CROUP, AGUE.

The Best Remedy known for COUGHS, COLDS, ASTHMA, BRONCHITIS.

ACTS LIKE A CHARM IN DIARRHŒA, CHOLERA, DYSENTERY.

Of all Chemists, 1/3, 3/-, 5/-.

ENGINEERING NOTES.

Petroleum in France.

It is reported that petroleum has been discovered in France by a landowner in the Department of the Aisne, who in sinking a well struck oil deposits which appear to extend over a large area. This is the first time that petroleum has been found in that country, and as it is one of the few natural products in which the country appeared to be entirely deficient, the discovery has awakened a great deal of interest, and is particularly valuable at a time when the petrol supplies of the future have become a matter of such vast importance.

Motor Cars for Persia.

It was early in the year 1913 that a motor car, the first ever seen in that locality, ran from Teheran to Ispahan, viâ Kashan (about 290 miles) in 124 hours, including about 100 hours' stoppages. Its appearance made a powerful appeal to the Persian imagination, and all well-to-do people wanted to know all about it, and if it could be obtained in England. Needless to say, the above-mentioned motor car was of German make, the owner being a German commercial traveller, who combined with his ostensible occupation as agent for a German manufactory or chemical products that of launching German-made motor vehicles in the Persian market. The war, which has upset all German plans and ambitions in that direction, has also upset a considerable trade which German banking houses and energetic commercial travellers managed to establish during the last few years. And now that the market in that region is beyond the reach of the enemy it is doubtful whether any British firm has yet thought of trying to come in touch with it. It is well known that Persians prefer and admire British-made goods, and in the case of motor cars, motor cycles, etc., there is an excellent opportunity for British makers to secure a good footing in that market before it is secured by rivals, among whom may be mentioned Japan, who is now a competitor in motor cars and cycles, and is doing her best to gain the Eastern markets.

Special Requirements.

It may be of interest to motor car makers to mention here some of the special requirements, over and above the general one of extreme solidity, in motor vehicles destined for use in Persia. (a) Owing to the numerous small "camel's-back" bridges considerable extra *clearance* is necessary, otherwise the front wheels are on one side of the bridge and the hind wheels on the other, and the under shield below the fly-wheel catches the top of the culvert. At least 15¾ inches clearance is necessary. (b) The maximum speed attained by the large car above-mentioned in the course of its journey from Resht, viâ Teheran, to Ispahan (about 422 miles), according to official reports, was 62 kiloms. (about 39 miles) per hour. This speed could not, in the present general condition of the roads, be increased with safety or comfort. Portions of the roads are very heavy with sand; other portions, after rain, become like ploughed fields. Hence a comparatively low top-speed gear is necessary. (c) The streets of Persian towns, like those of all towns in the East, being as a rule very narrow and winding, with sharp corners, an extra big lock is required in order to drive round the corners safely.

Electric Hot Water.

To obtain hot water practically as quickly as electric light by turning a button is the purpose of a new device in the electric heating field. It is an electric heating attachment which can be easily and quickly attached in place of the ordinary cold-water spigot, and which, it is claimed, will give water from warm to hot, as desired, within three seconds after the small button or switch is turned. In operation the apparatus is extremely simple, the same motion controlling both water and electricity. The water will continue to run from the heater as long as wanted. The apparatus weighs less than two pounds, and takes its electric power from any convenient electric socket.

Artificial Fuel.

With the fuel question becoming a very serious problem, the provision of artificial substitutes is a matter of pressing concern. Many experiments have already been made to utilise waste products of little value to produce an artificial fuel, and of these one of the most promising has been with regard to the use of rice husks. The idea is not a new one, for, as a matter of fact, rice husks have been used in Spain for years as fuel for the boilers in rice mills; but their use has been open to the objection that the burning process does not consume the whole of the husk. However, the experiment has been made of mixing the husk with tar, and then submitting the mixture to hydraulic pressure, and this appears to have given satisfactory results. The process should be of interest to Egypt, where the fuel shortage is pronounced, and to other rice-producing countries as one means of meeting the scarcity of fuel.

Utility of Straw.

In the Near East, especially in Roumania, Greece (in Thessaly), Southern Russia, Northern Syria and some other districts, the method of disposing of the straw when threshing is taking place is, as a rule, to burn it as fuel in the portable engines which drive the threshing machine on the field, or to cut and bruise it for fodder; but most of it is really wasted in various ways on the farm. This waste is inexcusable now, since straw is much more valuable than was realised hitherto. A consulting chemist to a Scottish agricultural society asserts that farmers themselves can make straw of greater feeding value by treating it with a weak solution of caustic soda and heating it under pressure for about sixty hours. Straw can also be used for making various grades of paper, strawboards and the production of nitrogen for fertilising purposes.

Gas from Straw.

Another profitable use of the straw has been found in Canada, where the ordinary method of disposing of it is to burn it, and at night during the threshing season all the cornfields of Canada are lit up with these enormous bonfires. In Western Canada alone, where the annual average yield of straw is 20,000,000 tons, it has been proved that 10,000 cubic feet of good inflammable gas can be obtained from a ton of straw distilled in closed retorts. The heating value of straw is 400 British thermal units per cubic foot, so Western Canada's annual straw yield might be converted into twenty-two billion horse-power hours, or seven times the power obtained from the Niagara Falls. Thus by the utilisation of the wasted straw in the cornfields of Roumania, Greece, South Russia, and North Syria for the production of gas great power would be obtained which would facilitate not only the cultivation of a much larger area of land, but also the establishment of other industries.

Fuel Research.

The Fuel Research Board established by Parliament is proceeding satisfactorily with its important work. The immediate problem it is attempting to solve is whether an economical and efficient apparatus can be devised for the carbonisation of coal at low temperatures, and whether, by the use of such an apparatus for the carbonisation of properly selected coals, products will be obtained of a collective value greater than that of the original coal, plus the cost of carbonisation and handling. Among the points which the Board is attempting to elucidate are:—(1) Can electric power be obtained more cheaply if the coal used for steam raising is first subjected to processes of carbonisation and gasification? and (2) can the thirty-five to forty million tons of coal which are now used every year for domestic purposes be wholly or partially replaced by smokeless fuel, solid or gasless, prepared by the carbonisation of this coal?

German Banks in Roumania.

Germany's systematic preparations for the coming trade war have often been pointed out in these columns. Her commercial strategy to regain and hold the markets in the Near East is evidently based on the same financial plan which in past years enabled her to predominate in those markets. It was the establishment of a considerable number of German banks and banking agencies in Asia Minor that enabled German manufacturers to have an easy and speedy success in that region. Landowners, masters of industry and users of machinery, notwithstanding the prevailing prejudice against German machinery, found sufficient inducement in these banks to give their orders to German manufacturers. The transactions were safe, and both buyer and seller were satisfied with the mediation of the bank. Some idea of the preparations Germany is making to push trade in Roumania and Southern Russia is furnished by the fact that the Deutsche Bank has just decided to raise new capital to the extent of twenty-five million marks with the intention of opening branch offices and agencies in the countries named. Official sanction for the new scheme has already been sought from the Government.

COTTON PRODUCTION.

Egyptian and Sudan Prospects.

At the monthly meeting of the Council of the British Cotton Growing Association at 15, Cross Street, Manchester, on November 6, at which Mr. J. A. Hutton presided, it was stated that some important information had recently been received with regard to the possibilities of increasing the production of cotton in Egypt and the Sudan. In Egypt the drainage and irrigation schemes, it was stated, should in course of time add another 800,000 bales of 500 lb. each to the Egyptian cotton crop, and in the Sudan the dam and canalisation schemes should produce, within a period of, say, twenty-five years, something like 440,000 bales of 550 lb. each. It was extremely satisfactory to know that there was every reason to anticipate an increase of about 1¼ million bales from Egypt and the Sudan, with possibilities in the future of a further increase if large storage works were constructed on the upper waters of the Blue Nile. With regard to the scheme for irrigating the Gezira Plain, a telegram was read from the Board of Trade stating that Sir Albert Stanley was hopeful of arranging with the Treasury for an advance to enable the preliminary works in connection with the scheme to be proceeded with.

The Roumanian Minister at The Hague, says Reuter's correspondent there, has communicated to the Dutch Government a protest from the National Bank of Bucharest against the action of the German authorities in the occupied territories of Roumania.

PREMIER OIL AND PIPE LINE.

Claim for Damage to Property.

The directors of the Premier Oil and Pipe Line Company state that they have now received an assurance of official assistance in securing the appointment of an authoritative committee to obtain settlement of their claim, already lodged with the proper authorities in Russia, for compensation for the destruction of the Peczenizyn refinery, stocks of oil, and other products, by order of the military authorities during the retreat of the Russian armies. The Peczenizyn refinery and several small wells situated near Kolomea, Eastern Galicia, had previously been handed over to the company's representative, who had been working them subject to military control.

TRADE OPENINGS IN MALTA.

The Collector of Customs at Valetta reports, says the *Board of Trade Journal*, that a firm of importers in that town desires to obtain agencies for the Maltese market, on a commission basis, for United Kingdom manufacturers and exporters of travelling goods (of leather cloth, compressed cane, or vulcanised fibre), including attaché, suit, music and luncheon cases and trunks; also writing pads, etc.; braces, suspenders, men's belts, etc.; and workmen's cheap flannel shirts (grey and other colours). The firm states that the class of goods preferred is of the cheap and popular kind which was formerly supplied in large quantities by Germany and Austria, although some good business can be done in higher-priced leather travelling goods.

LANCASHIRE COTTON.

A Disturbed Market.

(From Our Own Correspondent.)

Manchester, Wednesday.

The market this week has almost reached a state of chaos, and, owing to the important developments which have recently occurred relating to the American cotton situation, less business has been done, numerous spinners and manufacturers having refused to quote. The Cotton Control Board has decided that from the beginning of next week all firms using American cotton, except those engaged on Government contracts, must stop 40 per cent. of their machinery. The shipping situation across the Atlantic, so far as raw cotton is concerned, is very serious, and very little of the article is now heading for this country. It is expected that within the next few days it will be decided to impose a severe restriction upon the running of looms. The outlook for supplies of Egyptian cotton remains healthy, but increased difficulties are being experienced in sending the article to Lancashire, and prices remain very stiff. In Egyptian yarns there has been rather less activity, but spinners have been difficult to deal with, especially in the finer counts. There has been plenty of inquiry about in cloth for Egypt, but, owing to the extraordinary conditions which prevail, fewer transactions have been arranged. Exporters who have recently purchased freely are well satisfied with their action, and the problem now is to get the goods into consumption abroad. A large inquiry has been met with in cloth for India, but shippers have not found it an easy matter to secure quotations to wire out. No particular fresh news has come through from China. Strong and heavy materials have again been sold fairly freely for the purposes of the war. The operative spinners have renewed their application for an increase in wages of 30 per cent., and the weavers have made a demand for a rise of 40 per cent. A majority of American spinners have refused to quote. Where business has been done, distinct advances in prices have had to be paid. Although demand for France keeps up well, business in export yarn has been on a comparatively small scale.

WORLD'S CRUDE PETROLEUM OUTPUT.

The following statistics of the world's crude petroleum production for 1916 have been prepared by the United States Geological Survey:—

Country.	Barrels of 42 gallons.	Metric tons.	Per cent. of totals.
United States.....	*300,767,158	40,102,286	65·29
Russia	†72,801.110	9,933,387	15·81

COMPANY REPORTS.

Oriental Gas.

The report of the Oriental Gas Company for the year ended June 30 states that the conduct of business has been attended by restrictions and obstacles in no degree less formidable than the preceding year. The directors have, however, been able to maintain a full supply of standard quality gas, and thus to meet all the requirements of the military and civil authorities and of private consumers. The gas rental realised shows a small reduction, but this is heavily counterbalanced by the increased returns yielded by the sale of the residual products. The balance of revenue account carried to the credit of profit and loss, after allocating £5,000 to a renewals suspense account, is £26,077, or £874 more than last year. Operations in the nature of extensions and other work properly assignable to capital have been limited by the difficulty, and in some cases the impossibility, of obtaining materials. Such expenditure as has been incurred has been defrayed out of the revenue of the year. The rate of exchange has been exceptionally favourable, producing an increment of £665 to the equalisation account. Acting in conformity with the provisions of the Lands Acquisition Act, the directors have sold to the Government of India a parcel of surplus land, realising £4,107. The directors recommend the payment, on the 22nd instant, of a dividend at the rate of 4½ per cent., less income-tax, making 8 per cent., less tax, for the year. Meeting, Finsbury House, Blomfield Street, E.C., 21st instant, noon.

Anglo-Egyptian Bank.

The report of the Anglo-Egyptian Bank, Limited, states that the gross profits for the year to August 31, after making full provision for all bad and doubtful debts and oil taxation, are £247,617, and, deducting the expenses, amounting to £103,269, there remains £144,347 net profit for the year. To this amount must be added £52,000, the balance carried forward on August 31, 1916, making £196,347 which the directors propose should be dealt with in the following manner:—Contribution to staff provident fund £2,847; interim dividend at 10 per cent. per annum, paid, free of income tax, June 1, £25,000; dividend of 20 per cent. per annum and bonus of 2s. 6d. per share, free of income tax, to be paid on December 1, £62,500; transfer to reserve fund, £20,000; bonus to staff, £9,000; written off premises account, £10,000; balance carried forward, £67,000.

COMPANY NOTES.

Dividends, Payments, etc.

The directors of the Bank of British West Africa have declared an interim dividend at the rate of 3½ per cent. (less income-tax) for the half-year ended September 30 last, payable 1st proximo. Dividend is the same as last year.

The directors of the India General Navigation and Railway Company, Limited, have declared interim dividends of 2½ per cent. on the Preference and 4 per cent. on the Ordinary shares, free of income-tax, payable on the 27th inst.

The directors of the Indian Electric Supply and Traction Company have declared an interim dividend of 2½ per cent., being at the rate of 5 per cent. per annum, payable 8th instant.

Oil Outputs.

Anglo-Egyptian.—Gemsah.—Production for week, 22 tons (previous week 21 tons); Hurgada, 3,960 tons, against 3,993 tons.

Baku Russian.—Week ended November 3, 72,300 poods.

Bibi Eibat.—Week ended October 21, 44,117 poods (712 tons).

British Maikop.—Week ended November 3, 1,740 poods (28 tons).

European Oilfields.—Week ended November 4, 69,100 poods.

North Caucasian. — Week ended October 17-30, 514,338 poods (8,296 tons).

Russian Petroleum .—Week ended October 27, 40,500 poods.

Spies (week ended November 4, including 1,980 poods from ambars, 242,650 poods (3,914 tons). Total, 7,610,160 poods (122,745 tons), against 7,073,520 poods (114,089 tons)).

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Avenue,
Wednesday.

We have had a very active market this week in many of the Egyptian shares, especially in the Land and Miscellaneous groups. A good deal of buying has come from Egypt as the result of the great prosperity over there and the pressure of available funds seeking investment.

In Government stocks prices have remained quietly firm. As regards banks, there has been some quiet buying of Agriculturals, which are 1-16 firmer at 6¼, but National Banks, on some small sales on an unwilling market, are ¼ down at 17⅛. Land Banks have also receded ⅛ to 7⅛. Anglo-Egyptians have been firm, with some steady absorption of shares going on round 14¼.

In Land shares, Aboukirs are 3d. better at 20s. 6d. on some demand from Egypt. Allotments have jumped up ¼ to 3⅜, but the scarcity of sellers has interfered with business. Behéras have been in persistent demand for Egypt round last week's price, 13; but transactions have been limited, as there are few sellers at the present level, and there are buyers to-night at 13⅛. Delta Lands are ½d. higher at 13s. 10½d., and Egyptian and Foreign Trusts have improved 1-32 to 7s. 6d. New Egyptians have been quite a feature, and large transactions have taken place, with the result that the shares show a rise on the week of 1s. 3d. at 15s. 3d. For the first time for a very considerable period the price of these shares has reached a higher level in Egypt than on this side, and, consequently, a good many thousand shares have been bought here for Egyptian account.

Another feature in our market has been the persistent demand on local account for Sidi Salems, which are 3s. 9d. higher than last week at 21s. 3d. Union Foncières have also been in demand, both on Egyptian and local account, and, after rising to 43s. 6d., closed at 42s. 6d., showing a rise of ⅛. A fractional improvement has taken place in United Lands to 1s., at which price some business has been done.

In Miscellaneous shares the feature of the week has been the advance in Salts and Sodas, which, on rumours of a largely increased dividend, have been bought in big quantities both here and from Egypt. At one time their price reached 36s. to 37s., but on profit taking they have eased off to about 35s., showing a rise of 4s. 6d. on the week. Another interesting movement has been the advance of a further 2s. 6d. in Khedivial Mails to 38s., brought about by local buying.

In Greek bonds there is no change in prices to record, but a firm tone has characterised the market.

Paris Bourse.

Business was restricted. Closing prices included Turkish Unified, 57.50; Credit Foncier Egyptian, 765; Suez Canal shares, 4,502.

Oil Shares.

Closing prices showed a weak tendency. Anglo-Egyptians (B) fell 6d. to 26s.—27s. New Caucasian were 1s. lower at 3s. 6d.—4s. 6d.; while North Caucasian declined 1-32 to 29-32—31,32, and Spies 6d. to 8s. 6d.—9s. 6d. Roumanian Consols were unchanged.

THE

GENERAL ANGLO-SERBIAN INDUSTRIAL & FINANCIAL COMPANY, LIMITED,

106, Bishopsgate, London, E.C.2

The Company has been formed to promote British Trade and Industry in SERBIA and other BALKAN STATES.

TURKISH SUPPLIES TO CENTRAL EMPIRES.

In the House of Commons on Tuesday, Major David Davies asked the Under-Secretary of State for Foreign Affairs whether, in view of the urgency of cutting off the sources of supply of the Central Powers, he had yet taken any steps to obtain information as to the quantity of supplies of food, cotton, metals, and other essential products for the manufacture of munitions of war sent during the twelve months ending June 30, 1917, from the Turkish Empire and Bulgaria to the Central Powers; and whether, if such information had not been obtained, he would communicate the desirability of obtaining it to the heads of the Intelligence Department?

Lord R. Cecil: It is obviously not in the public interest to discuss in the form of question and answer in this House the possibility and means of obtaining intelligence from enemy countries. I can only assure the hon. and gallant member that His Majesty's Government are fully alive to the importance of obtaining information as to the supplies available to and received by the enemy from all sources.

The exports of wolfram ore from Tavoy in July amounted to 221 tons 6 cwt., as against 258 tons 9 cwt. in 1916.

NOTES OF THE WEEK.

The past week has been more cheerful for the Allies than its predecessors. There has been a brilliant success on the Somme. In England the political crisis caused by Mr. Lloyd George's hotly-debated Paris speech has been dispelled by the simple process of declaring that no crisis existed; moreover, it became evident that the country was in no mood to get rid of the present Prime Minister "to make Mr. Asquith king." In France M. Clemenceau's presence at the head of a new Ministry is a guarantee of firmness and vigour. In Italy our Allies have begun to recover themselves, and they are putting up a great fight against the invader. Venice may have to go, but there are good hopes that the Austro-Germans will not be able to cross the Adige. It is clear that great battles will again be fought on the historic fields of Verona and Vicenza.

The Germans are naturally elated by their successes, and the Kaiser has been unable to restrain his oratory. But one or two of the more sober German newspapers have expressed misgivings of late; for while they are jubilant over Russia and Italy, they begin to realize that certain military movements are occurring in Palestine and Mesopotamia which scarcely redound to the credit of the Quadruple Alliance. Not only were they unable to save Baghdad, but they have been unable to prevent a further British advance up the Tigris; and in Palestine, which is considerably nearer the German base, they have so far given nothing but good advice to the Turk.

The British advance continues rapidly and irresistibly in the Holy Land: Joppa has fallen, as in the days of Judas Maccabæus, without serious resistance; stern fighting has taken place elsewhere, but the Turks have everywhere been worsted, and our armies, securely based on the coast, now reach from the south to the north-west of Jerusalem. Unless the Turkish armies intend to risk being shut up in the capital, there is now only one practicable way of retreat—the historic road from Jerusalem to Jericho.

The whole ground of this last week's campaign has brought into the newspapers the old familiar names of the Scriptures. Joppa was the city from which Jonah embarked on his perilous adventure, and in later years the home of Simon the Tanner and Dorcas, and the scene of Peter's vision on the housetop; while the British line has now passed that village of the plain, Emmaus, where Judas Maccabæus won a great victory over his enemies.

The whole occupied country, according to the able correspondent with the British Army, has welcomed our advance and the return of law after the recent exactions of the Turks. The sufferings of the people appear to have been very great, the Turkish armies having practically eaten up the country and paid their way with worthless paper money. The British Army is being received as a deliverer from intolerable tyranny by those on the spot, and Jews all over the world have also expressed their sense of gratification at the destiny which the British Government has announced for the Holy Land. The sole exception is the Jewish-German Press, which, however, is probably unable to say what it thinks.

The Government evidently kept back the despatches on the earlier operations before Gaza until it could announce some solid success in the same region. It was very unfortunate that the fighting in April was spoken of as being very successful, when in fact the direct contrary was the case; it would have been better for the Government to have told the truth, since many knew what the newspapers were not allowed to publish. General Murray's attack on Gaza, in fact, failed to achieve its object; we were unable to break through the Turkish lines, and our casualties were very heavy. General Dobell was relieved of his subsidiary command, as being unequal to the strain of further operations, and also, no doubt, because he had not succeeded in the task set him, and General Murray was shortly afterwards recalled.

We are not here concerned to judge the work of these distinguished soldiers, and for the moment it is enough that their failure has been retrieved. The summer has evidently been spent in the refitting of the British Expeditionary Force. Whether it was adequate for the work it was expected to do last spring, or faultily led, are matters which must be left to military experts; but it is well known that it is our almost invariable practice to embark on large undertakings with inade-

Digitized by Google

quate forces, to waste men, time and money by this means, and finally to take the job seriously in hand when our prestige has suffered from an unnecessary reverse. *Plus ça change, plus c'est la même chose* in England.

Now that we really have put our backs into these two Asiatic campaigns, they must be thinking uncomfortable thoughts in Constantinople. If the Turks take Bethmann-Hollweg's famous advice to "look at the map," they will notice that while every other member of the Quadruple Alliance has conquered additional territory, Turkey alone has lost it, and her losses in Asia are about as great as the German successes in Europe. Moreover, the Germans are much more anxious to get land for themselves than to help the Turks out of the ditch; for every column that appears in the Berlin newspapers about Palestine a thousand appear about Poland, and the Kaiser unkindly omits the Holy Land from his speeches and serenely ignores Mesopotamia. But the Turks may be forgiven, if they are more interested in Antioch than Riga, and if they wonder why Mackensen was sent to Venetia when there was so excellent a field for his abilities in Asia Minor.

M. Venizelos, in an interview in London this week, has suggested that Turkey may consider a separate peace before long. Probably she has considered it long since, but it is doubtful whether she has the power to cut adrift. The dog who is led on a chain by his master may prefer another road, but if his master keeps tight hold of the chain and drags him along the problem becomes rather a difficult one. Turkey has had money as well as troops and munitions from Germany in the past; she has made treaties giving commercial privileges to Germany, and her present rulers have staked everything on a German victory. Like the sword-swallower at the circus, they will find it much more difficult to pull the thing out than it was to get it down.

The sudden death of General Maude in Mesopotamia is a serious loss. He was in the prime of life, and as a member of the "Old Contemptibles" he began the present war as a colonel, taking part in the first battle of Ypres. He was sent East at a time when the surrender of Kut for a time shattered our prestige, and in one short year he has raised our military fame to a higher pinnacle than it has ever before reached in the Middle East. He has had, of course, more adequate forces and munitionment than the gallant but unfortunate Townshend, who was given an impossible task by a Government which was anxious to counterbalance the Dardanelles disaster by a resounding success at Baghdad, but which prepared—the old fault of Downing Street—for a major expedition on a minor scale; but even adequate intervals are useless without good generalship, and Maude's brilliant successes were entirely his own. There may have been greater commanders on the Allied side, but Maude is the only one, except Botha in South-West Africa, who has won an important campaign throughout. He rests with his laurels in the place where he won them, but England will not forget Maude of Mesopotamia.

Serious anxiety has been felt as to the condition of the British prisoners who were taken at Kut. It was known some time ago that the conditions at the officers' camps were comparatively good, but the men's camps are very unsatisfactory. It is now stated that the majority of the able-bodied prisoners of war have been sent to work on the construction of the Baghdad Railway east of Aleppo. They are under the German Construction Company, "who may be supposed," according to the official statement of the British Government, "to have an interest in keeping them in health." We wish we could be convinced of that. The German Government which has deported French and Belgian workers into Germany has shown no such solicitude.

In Austria-Hungary nothing political ever changes. An order has been issued prohibiting the inhabitants of the Slovak, Ruthene, and Roumanian districts of Hungary from acquiring landed property without the consent of the Government. It is clearly intended to forbid Slavs from becoming landowners, since that, according to the proposed scheme of electoral reform, would give them equal rights with Magyars in the suffrage. Hungary is no more likely to reform herself from within than Germany, but this unyielding attitude will undoubtedly strengthen the nationalist determination of the oppressed Roumanians and Jugoslavs to achieve their independence.

On the other hand, it appears that some of the sufferings which Austria has inflicted on the unhappy countries she has overrun have descended on her own head. Even the abbreviated reports of the late debate in the Reichsrath as to the physical condition of the people make terrible reading. Tuberculosis has spared neither Slav nor German, and its ravages become worse and worse week by week. In Vienna particularly it has grown worse, yet Vienna has for years been the most consumptive city in Europe, owing to insanitary houses and the low wages paid to the Slav immigrants from the provinces. But the disease has now spread everywhere from Galicia to Dalmatia, and members of all parties, for once in accord, appear to have agreed that nothing could be done. The war has been the effective ally of tuberculosis in every country, but nowhere is the toll so heavy as in the Empire which was primarily responsible for the war.

The *Manchester Guardian* appears to have involved itself in an unfortunate controversy in its references to Austria and the smaller nationalities within that Empire, and has brought down denunciation upon itself from Lord Hugh Cecil and others. The *Guardian* in its defence remarks that "it has yet to be proved that autonomy would not, in some cases at least, be preferred to separation." That is strictly true, no doubt, in the same sense that the immortality of the soul and many other things have yet to be proved, but for all practical purposes the evidence is accepted by most people as sufficient. The *Guardian* further adds that "there are conflicting claims" among the nationalities; it forgets, or at least does not mention, that these conflicting claims are rapidly being adjusted. A controversialist in a difficulty will do many strange things, but the *Guardian's* continued defence of Austrian autonomy will probably give way in time, like the Hindenburg line. The maintenance of Austria is entirely inconsistent with the Liberal policy of which the *Guardian* is one of the leading exponents.

The forthcoming visit of M. Venizelos to America, which is announced for next spring, evidently argues confidence in the stability of the new regime in Greece, and as such it is encouraging. Although every member of the European Entente has sent distinguished members of its Government to Washington in the present year, none has yet despatched its Prime Minister, and the visit of M. Venizelos will therefore be unique.

The commander of the Third British Army in France, Sir Julian Byng, is well known in Egypt, where he was Commander-in-Chief of the British forces for three years before the war broke out. He was actually in Cairo at the beginning of hostilities, and in the absence in England of Lord Kitchener he had practically to assume the responsibility for the safety of Egypt, on whose frontiers German agents disguised as natives had been extremely active for some months before—no doubt in pursuance of the confessed German policy of stirring up trouble in the territories of possible enemies. The British, however, were not so sleepy as Berlin had anticipated, the activities of these gentry having been carefully observed, and their origin and intentions being known. General Byng was soon recalled to active service, and he reached the Western front in time to take part in the first battle of Ypres. Since then his only visit to the East has been to the Dardanelles, where he advised and carried out the evacuation of Suvla Bay.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 28.

Prayers for Rain.

Last Sunday was quite a day of public functions. In the morning there were religious processions, and prayers were said in the churches for rain, as the country was greatly suffering from the continuous drought. It has been an exceptionally dry summer and autumn, and apart from the shortage of water in Athens, the situation was becoming serious for agriculturalists and for vegetation. The weather broke on Tuesday, and copious rains have fallen every day since then.

The Anniversary of Navarino.

In the evening the ninetieth anniversary of the battle of Navarino was commemorated by a gathering at the Municipal Theatre attended by the King, the Premier, and the Cabinet Ministers, the Allied Ministers, and the élite of Athens. The theatre was crowded, and the occasion was marked with enthusiasm. It was, in fact, a patriotic manifestation in favour of the Protecting Powers. The proceedings were opened by a speech from M. Sotiriades, Professor of History at the University. He related the circumstances which brought about the battle of Navarino, and said that the three Great Powers saved Greece, created the Hellenic kingdom, and placed it under their protection. This protection has never failed, and to-day these Powers are not only their protectors, but also their Allies. This discourse was followed by speeches from the French, Russian, and British Ministers. The respective national anthems were played, and at the close of the meeting there was a great demonstration.

The Victims of a Naval Outrage.

There was a funeral service in the Cathedral in memory of the Greek consular officials who met their death through the torpedoing of the "Cita di Bari." The service, which was one of great solemnity, was attended by M. Venizelos and many of the high officials, and the very large gathering testified to the sympathy felt for the loss in such tragic circumstances of these men who had already undergone great hardships in remote places in Turkey. There were about sixty of them, and not one was saved. M. Naoum, of the Ministry of Foreign Affairs, deposited a wreath on behalf of the Greek Government and made a touching address, which was followed by a discourse from M. Callergis, late Greek Minister at Constantinople. He spoke of the services these men had rendered to Greece in trying and unprecedented circumstances in distant places in Asia Minor, and of the anguish they had suffered in witnessing the terrible persecutions of their fellow-subjects by the Turks. In their tragic death, he added, they have given their lives to their country in the same way as their brothers in arms on the battlefield.

The Week in Parliament.

The Chamber of Deputies, after a week's hard work, adjourned on Friday *sine die*. The sittings were mostly occupied with the discussion on the three Constantinian Cabinets accused of high treason, and in the course of the debates many Deputies related their experiences of the Germanophil policy of these Cabinets, and how every opportunity was taken to thwart the Allied Powers. There was some debate on the report of the Commission on the Lambros Cabinet, and the voting resulted in MM. Lambros, Tsellos, Zalacostas, Damianos, Soullaris, Tsanetouleas, Hadzopoulos, Apostolides, Drakos, and Charilaos being deferred to the High Court. A debate took place on the proposition to defer M. Gounaris and his colleagues to the High Court, and a commission was eventually nominated to inquire into the accusations against this Cabinet. The Chamber also nominated the judges who are to constitute the High Court to try the members of the Skouloudis and Lambros Cabinets.

THE GEOGRAPHY OF THE PALESTINE ADVANCE.

During General Allenby's victorious advance four important valleys (or wadis) have been successfully passed, at each one of which the Turks appear to have attempted to make a stand. The greatest and deepest was Wady el Ghuzzeh, *i.e.*, the "Valley of Gaza" (Ghuzzeh is the Arabic name, which is much nearer the Hebrew than the Greek form, Gaza). Here we were long held up, and the difficulties were so great that the enemy seems to have thought his position impregnable. After taking Gaza just after midnight on the 7th instant, our troops followed hard after the Turks, and reached the Wady el Hesy the same morning, and by the next day this barrier was successfully negotiated, both at its mouth and in its centre, where our forces arrived north of Tell el Hesy (ancient Lachish). Again the enemy made a stand at Wady es Sukereir—a valley which takes its rise near Beit Jebrin, and has many branches. Here the Turks were driven out before they could complete any strong defences, and we rapidly advanced to the important Wady es Surâr. It is evident they resolved to make a determined stand here, and not without reason, because, with this in our hands, the Jaffa-Jerusalem Railway, and almost certainly the Jaffa-Jerusalem road, would be at our mercy. The Wady es Surâr is in many ways the most important valley in Southern Palestine, because of its intimate connection with the "Holy City." It begins with two heads high up in the plateau of Judæa: the northern branch starts near Er Ram, the ancient Ramah of Benjamin, some four miles north of Jerusalem, and, running a rapidly deepening course south-west, is crossed by the Jaffa-Jerusalem road near Kulonieh—the last great dip in the road before it ascends to Jerusalem; the southern branch is now of great importance, as up it runs the Jaffa-Jerusalem Railway to the city itself, the upper end being known as the Wady el Wurd, or the Valley of Roses. Both these branches run very deeply between lofty and steep mountains, and the main valley is continued to the foothills under the name of the Wady Ismaen. The narrow gorge passes out of the mountains somewhat abruptly, and expands into an open valley—the Vale of Sorek of the O.T. (Judges xvi., 4), famous for its association with the Story of Samson. On its southern slopes—on a low hill near the railway station of Deir Aban—lies Ain Shems, the site of Behshemesh, famous for the incident of the return of the pestilence-bearing Ark by the panic-stricken Philistines (I. Sam. vi., 9). The site of this ancient city was excavated by the Palestine Exploration Fund shortly before the war, and its ancient walls and gates were uncovered. Within sight of Ain Shems, some three

miles to the south-west, lies Tibnah, the site of Timnath, the scene of many of Samson's adventures with the Philistines (Judges, Chapters 14 and 15). On the opposite side of the valley lies a dominating hill, rising 800 ft. above the dry torrent bed, which is crowned by the little village of Surah—Zorah, the birthplace of Samson (Jug. 13)—while up a fertile branch valley running north is Eshua, the ancient Eshtaol (Judges xiii., 24). This particular part of the wady also has a geographical importance, because a very important valley, which divides the mountains of Judæa from the fertile district known as the Shephelah, crosses it here at right angles running north and south. The vale is open and fertile, and in the spring is green with corn. Once it was famous for its vineyards, signs of which are still abundant around the little Jewish colony of Artuf. The railway follows the Wady es Surâr till a little beyond the station of Sejed, and then traverses some slightly higher ground to the station at Naameh, where our troops seem to have first seized and cut it. Near Naameh is a high isolated hill, Tell el Jezereh, on whose southern side lies the village of Abu Shusheh. This tell is the site of ancient Gezer—which has been thoroughly excavated by the Palestine Exploration Fund—and the trenches left by the explorers may perhaps have been used by the Turks, who were killed or captured in such numbers there on the 15th inst. As from here both the railway to the south and the high road to the north are dominated for miles, the Turks' failure to hold this spot is a sign of their demoralisation.

The Wady es Surâr from Naameh passes westwards past El Katra and El Mughar, where the Turks put up a most determined opposition—broken by Scottish Territorials after most bloody fights—and some three miles south of Akir, the ancient Ekron, the site of a Jewish colony—now in our hands. A little west of Mughar the valley turns sharply north-west and on the southern edge a few miles on lies Yebnah, now a mere hamlet, but the site of the once-important town of Jamnia, a meeting-place at one time of the Jewish Sanhedrim and in the times of the Crusades occupied by their strong fortress of Ibelin. A church belonging to that period is now one of the village mosques. The ancient city had a seaport more used than Joppa itself, situated at the mouth of the river now known as the Nahr Rubin.

The defences of the Wady es Surâr being overcome, our Army has swept northward to Ramleh, the Turkish headquarters, and on to Lydda, which were both captured by Anzac cavalry on the 15th. Ramleh, now but a townlet of from seven to eight thousand inhabitants, of whom two-thirds are Moslems, is very picturesque, its old buildings lying amid groups of palms. It and the adjoining Lydda lie in a perfect oasis of fertility—or did before the war—there being thousands of olives and fruit trees and well-cultivated fields for miles around. The two towns are connected both by the railway and by a sandy road amidst high hedges of prickly pear. In the eighth century A.D. Ramleh became an Arab town of importance—there are no earlier traditions—it was very prosperous in the Middle Ages, and in the days of the Crusaders was the seat of a Bishopric. The large mosque there was then a newly-built Christian church. Near the town is a handsome and conspicuous tower, which was once attached to a large mosque, of which only the outlines of the foundations are to-day visible. The adjoining and slightly smaller town, Ludd, is the Lod of Ezra ii., 33, Neh. vii., 37, and the Lydda of Acts ix., 32. It was an important town in the early Christian centuries, and has been famous since the sixth century for the church built over the tomb of St. George. The buildings over the tomb have been several times destroyed and rebuilt. The site of the old church is now occupied by a mosque, but there is a Greek church in the near vicinity.

Here our forces have reached a fertile and beautiful district with large groves of olives—a splendid outlook on all sides—and many towns and villages within sight of interesting historical association. Most important of all, direct communication with Jerusalem by rail and by western road is now cut off, and the position of the garrison there—if such there be—may well be becoming precarious. Jaffa has now been captured and the route to Jerusalem through the Valley of Ajalon by way of Bethoron (Beit Ur) has already been invaded. General Allenby's successful sweep along the Maritime Plain has completed the conquest of the ancient domain of the Philistines, and all their five great cities—Gaza, Ashkelon, Gath, Ashdod, and Ekron—are in British hands. We therefore now have a great stretch of corn-growing land of splendid fertility, which it is to be hoped will be ploughed and sown—for this is the season—without delay, besides orchards of olives, oranges, lemons, and other fruit trees and abundant gardens.

E. W. G. M.

SYRIANS AND TURKS.

DISCIPLINE IN THE TURKISH ARMY.

The following statement gives the experiences of a fugitive from Syria. It reaches us from a trustworthy source, to whom the informant was personally known:—

"At the end of last year, on the strength of a false accusation, I was exiled to Anatolia, and what struck me as being most significant was the complete change of attitude on the part of the Turkish Government towards the Syrians—a change which, by no mere coincidence, followed the Arab movement of independence. Neither I nor any of my fellow deportees were the object of that cruel and contemptuous treatment to which our predecessors were subjected. I was allowed to stop at every large town on the way and as long as I reasonably wished, and received an adequate allowance for my daily needs. Indeed, I learned that the Government issued orders to the local authorities in Asia Minor to the effect that the Syrians should be well treated, and that any breach of these orders would incur the severest penalty. In these orders Jemal Pasha is said to have taken care to explain that the deportees were temporarily removed for military reasons, and that the Syrians were not traitors or Ententophil.

"Throughout the period of our exile my comrades and I lived in comparative comfort, and received every ten days our allowances, which varied from five to twenty piastres per day, according to the social status of the person. Indeed, we were allowed to choose from among the well-furnished Armenian houses the one we wished, and to take any additional household article from the churches, which apparently were being used, since the massacres, as stores. After some time I was called to the colours, and as I had already paid the exemption tax it went against the grain for me to pay a second tax, especially as it would have meant merely the postponement of the call; so I resolved to try to escape to Syria in order to join the Arab forces and contribute my small share to the deliverance of my country. There was an officer on whose friendship I could rely and to whom I confided my plan; but he disapproved of it, saying that travelling in those regions in civilian dress would expose me to the gravest dangers. He therefore suggested my joining the troops bound for Constantinople, where I should find my plan of travelling to Syria much more susceptible of execution. The noteworthy fact should here be mentioned that the High Command had ordered that no Syrians were to serve in the 4th and 8th Army, both of which are still kept in Syria.

"On arriving at the capital, I found that the inhabitants were in greater distress there than anywhere else in the Empire. I providentially met there an Armenian non-commissioned officer charged with the distribution of privates among the different units, and when I asked him to send me to the army in Syria he was greatly surprised, as he believed that the inhabitants there tear the skin off the Turkish soldiers and eat up their flesh. I smiled inwardly at this naïve remark and invented a plausible excuse; then, after no little trouble, got round him. Presently I boarded, with 650 troops, the train bound for stricken Syria. At Byzanti there is a gap on the line up to a place called Kilk Boghassi, which we covered on foot in five days. When the troops were counted it was found that out of the 650 men only 150 remained. The others had fled back to their homes with their arms. This does away with the false assertion of the Turks that there are no cases of desertion among the Anatolians. The fact is that the Turks themselves are as sick of the war as the Arabs. The few, indeed, that did not desert expected to save themselves later by going over to the Arab forces or to the British. This secret intention was confided to me by more than one

Digitized by Google

of this remnant, who thought I was one of them. as I had mastered Turkish in the Government school. In this connection the following fact may be mentioned, illustrating as it does the economic straits to which the Ottoman Army has come. The stock of uniforms having been exhausted, the supply depots at Constantinople have been issuing Austrian second-hand uniforms, even with the very buttons on them bearing the sign of the Cross and the Austrian crown below. This gave the occasion to many of my comrades, each time they passed a village or town, to pass the ironical remark, 'We are going to the Holy War (Jehad). Behold the Cross on our breast as proof.' Hatred of the Germans is becoming increasingly fierce, but it is not given open expression. Germans are cursed and spat upon, but at a safe distance.

"From Kilk Boghassi we proceeded again on foot to Osmaniyeh, where we received orders to change our route to Marash, thence in a north-westerly direction to Diarbekir. We, however, took no heed of these orders, and continued our march until we met on the way an officer with a company of thirty men, who, on learning that we were going to Aleppo, kindly asked us to accompany him thither. We soon learned that his duties were to present lists of the men that were with him at each of the military messes we passed by, so as to get the necessary ration issues. This good officer used to gather the old crusts and give to each of us a handful or two, and sell the fresh stuff to the inhabitants at two piastres the handful. These so-called military feeding houses are built of wood, and have been set up by the Ministry of War for feeding the troops on march.

"We continued our journey on foot until we reached Aleppo, where I forthwith started working for a permit to travel by rail to Damascus, but the last order we received was that we should proceed to Diarbekir viâ Marash, as already mentioned. The anarchy, however, that reigned was such that such orders received but scanty attention, and the actual authority lay in the hands of the corporals and the lower gendarmerie officers. Mine is a case in point. I went to a corporal in the recrüiting depot, and put in his hand a silver dollar, which seemed to work instantaneous magic. He handed me at once a new teskeré, mentioning that I belonged to Division —— and Battalion ——, stationed at Gaza (here the narrator showed the paper to his interlocutor), then had me shut up in one of the places of worship pending the date of my departure. Among the crowd of men I met there was a young Damascene, who told me that he had been living there for the last eight months in comfort and ease, and that each time his turn came he used to tip the corporal with a quarter of a dollar, and he expected by this simple means to continue this life of ease in the " temple of God " until the end of the war.

On the way to Damascus the train stopped at Riak, where the military doctors sorted out the unfit, who were allowed to continue the journey by rail, while the rest, among whom I unfortunately was, performed it on foot. Immediately on my arrival I went clandestinely to see my parents, who could hardly believe their eyes. What struck me above all things was the absence of all respect for the Government. The people openly criticised and abused it, and this complete change seems in great part to have been determined by the echo of the continued successes of the Arab forces and the extension of their military operations to the very gates of Eastern Syria. The growing gravity of the situation did not escape Jemal Pasha, who, further to insure his personal safety, took up for residence the palace of a notable at Salhie, outside the city, and removed the military headquarters to the house of Nazim Pasha near by; additional precautions were taken by posting more sentinels and guards along the roads leading to and the gardens surrounding these quarters, to such an extent that a passer-by is forcibly reminded of the days of Abdul Hamid and Yildiz. Despite all these precautions, Jemal dare no more venture out of his house except in a motor-car, which dashes at high speed escorted by three others."

The fugitive concluded his narrative by saying: "As soon as I heard at Damascus of the fine feats of the Arab forces I became impatient to join them, and, having managed to secure a horse, rode away across the desert. It filled my heart with delight to see all the Bedouins I met on the way, awaiting with impatience the arrival of their brethren from Arabia."

PORT SAID IN WAR TIME.

FROM OUR CORRESPONDENT.

PORT SAID, October 22.

After Three Years.

The fourth year of war sees vast changes in the conditions of life at Port Said. With commodities essential to bare existence extremely high in price and lamentably low in quality one cannot help recalling pre-war days, when such luxuries as Australian beef and New Zealand mutton could be obtained in any quantity and at reasonable prices. Nowadays all the Colonial output that comes this way is (very rightly) reserved for the Forces. Butter has disappeared, and in its place we have a mixture tasting of coconut oil, with perhaps a slight flavour of gamoose milk. Potatoes have not been seen in Port Said market for many months past, but there is the sweet yam to remind us of what has been. One may dream of ham, bacon, cheese, English sauces, etc., but only to awake to their bitter absence, save, perhaps, in the case of a white Greek cheese, which is salt to the taste and apt to be gritty. Coal is ever rising in price and difficult to obtain. Paraffin oil, greatly used here for cooking purposes, has a way of drying up periodically, and there have been times when it could not be bought at all. There is, however, no shortage of foodstuffs, and the populace exists mainly on Sudanese meat, such local vegetables and fruit as are obtainable, and bread, which, although still white, is not particularly appetising.

One "carries on," however—in fact, most residents here have been "carrying on" without a break since the summer of 1913 or 1914. Port Said in normal times is not an easy place to leave for a short rest, and in these days of doubled rail fares, greatly increased hotel expenses, and the trouble of obtaining permits to leave the Canal zone—not to mention the pressing claims of business—a change from the daily routine cannot be lightly undertaken.

The business houses here, consisting mainly of coaling and shipping firms, are finding some difficulty at the present time in coping with the increasing demands on their floating plant. A number of lighters, tugs, etc., have been hired or taken over by the authorities, and it has been found necessary to pool resources with a view to obtaining the best results from such plant as remains.

Coal for bunkering purposes now costs over £12 a ton, but the quantities of bunkers supplied have fallen off considerably with the diversion of shipping into other channels.

A striking feature of the past summer has been the variety of the troops seen in the port from time to time, including British and French Colonials and the soldiers and sailors of other Allied Powers from the five continents. In this respect Port Said has well maintained its reputation as a cosmopolitan port, and the meeting-place of the East and West.

The Sultan's Accession.

The accession of H.H. Sultan Fuad was greeted with a salute from Allied warships in port, and the event was celebrated in the town by a general holiday, all Government offices, banks, and commercial houses being closed.

"Our Day."

A concert was held at the "El Dorado" Hall on the 19th in aid of "Our Day," the proceeds of which are to be devoted to the British Red Cross funds. An influential committee, under the presidency of H.E. Heddaya Bey, the Governor of the Suez Canal Zone, was responsible for the general arrangements, an exceedingly entertaining programme being given before a crowded house, composed almost entirely of British soldiers, sailors, and residents.

The performers, who were principally from the Services, included several pre-war professional artists, the outstanding features being a Shakespearean recital by Captain Morrell and a ventriloquial entertainment by Mr. Tom B. Wheatley.

The subscriptions in Port Said, in response to the High Commissioner's appeal, including the proceeds of the concert, exceed £1,400.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutra countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.2,

M. VENIZELOS IN LONDON.

Reception in the City.

The Mansion House has rarely been the scene of such enthusiasm as was shown on Friday on the occasion of a meeting arranged at short notice by the Anglo-Hellenic League, and presided over by the Lord Mayor, to welcome M. Venizelos, the Prime Minister of Greece, who had come to the meeting to ask aid in some of the difficulties with which his country is faced. The great hall of the Mansion House was filled from end to end when the time for the meeting arrived, and large numbers of people had to be refused admission. On the platform with the Lord Mayor were some of the most prominent members of the Government—Mr. Balfour, Earl Curzon, and Mr. Churchill—and leading representatives of important interests in the City. The meeting was held in circumstances which hardly lent themselves to optimism, but the tone of the gathering was one of unalloyed hope, and M. Venizelos had no reason to complain of his reception, for the vast audience, which showed the utmost enthusiasm throughout, literally rose at him when he stood up to deliver his address.

Speeches of warm welcome were delivered by the three Cabinet Ministers who were present. Mr. Balfour referred to Mr. Venizelos as, by common consent, the most distinguished living representative of the great historic Greek race. He was an illustrious member of an illustrious race, but he was also one of the great contemporary statesmen of the world, struggling in alliance with other statesmen to further the interests not merely of his country, but of mankind at large. Referring to Greece's difficulties during the war, he said there were circumstances that would tax the statesmanship, temper, and endurance of any man. M. Venizelos had triumphantly steered the fortunes of Greece through all these perils, and his country was now entering waters which, whether rough or smooth, would not, he hoped, be disturbed by those cross-currents which had made steering so difficult in the last three years

Mr. Balfour's tribute was echoed by Lord Curzon, who said that, faced with intrigue, disloyalty, and treachery in the highest quarters, persecuted, with his followers, by those who held the reins of power, M. Venizelos never swerved for a moment, but held by his own and by the people who were faithful to him. He was sure, he added, that M. Venizelos would state his case to their statesmen with prudence and with moderation. He was sure that they would meet him to the fullest extent that lay in their power. He was a man who had stood by them through three difficult and critical years. They would stand by him to the end.

Mr. Churchill, after joining in welcoming M. Venizelos, who, he said, had friends here as loyal and as true as he could find in any part of the world, briefly commented on the outlook. "The voyage," he said, "is perilous; it is reaching its most perilous period. But we know that the barque of British fortunes has weathered gales and tempests as fierce as these, and we see through the darkness those lights shining which spell for Britain, for Greece, and for civilisation, a broad and assured future of safety and of freedom."

M. Venizelos, who, as stated, was received with tumultuous applause, which was renewed on the conclusion of his address, which was delivered in English, gave a candid and frank survey of Greece's position during the war. He showed how his policy of joining the Allies had been thwarted by the Crown, and how, if he had been able to pursue his chosen course, the struggle might have ended by now with complete victory for the Allies. The right moment for intervention was that of the Dardanelles expedition, and had his policy not been frustrated he could assert that the occupation of the Peninsula, which was then unprepared for defence, would have been the work of a week, and the moral effect on Constantinople would have been such that a separate peace with Turkey would have been the most probable result. The Narrows would have been open to the Allies, the otherwise difficult equipment of Russia would have been effected by way of the Black Sea, the Russian retreat of 1915 would have been prevented, Bulgaria would not have dared to move against the Entente Powers, and peace might have been secured in the course of the year 1916. The King, M. Venizelos said, treated the Constitution as the Kaiser did treaties—as scraps of paper. He prevented all this, and declared his intention of keeping neutral, unless Bulgaria attacked Serbia, when the treaty with Serbia would necessitate their interference. Yet six months later he repudiated the treaty with Serbia, and he acted all through as the German Emperor's agent in Greece. He asked them not to judge the Greek nation as responsible for the personal policy of the dethroned King, nor to consider the violation of the treaty with Serbia as reflecting upon them. He could assure them that during that protracted and painful crisis the great majority of the Greek people never approved of that treacherous policy. The good opinion of their great Empire was a precious asset for the Greek people. Ever since their resuscitation to a free political existence the Greeks had looked for guidance to the great and splendid lessons which British political life offered. In it they had found harmoniously blended personal liberty with that order which ensured progress. All the Greek statesmen, all worthy of that name, had been unanimous in their belief that the edifice which had been reared by the genius of the British people and which was known as the British Empire, or the British Commonwealth, was the grandest political creation in the life of man. It was only, he went on, by such a victory that would abolish brutal force and would establish justice, that real peace could be secured—a peace that must not be a mere truce, during which the world would continue to be crushed with military expenditure, and after a few years find itself, out of breath, faced with the horrors of a fresh war; but a peace that would establish the community of nations and would create a new world, a better world than that in which the will of a single man was sufficient to plunge humanity into this unprecedented catastrophe. Toward the new edifice which had thus to be raised, Greece could contribute but a few minor blocks of stone. Yet she would be proud to know that, in the midst of dire difficulties and in spite of the disastrous consequences of the absolutism of her King, she remained to the end faithful to her obligations and refused to accept the dogma of "scraps of paper."

M. Gennadius, in proposing a vote of thanks to the Lord Mayor and the speakers, said the meeting was a fresh earnest of Englishmen's sympathy for and secular attachment to Greek ideals. After years of internal struggle as trying as actual war, Greece had joined the Allies without making any conditions, exacting any promises, or bargaining for any advantages. She had come in to do her duty

On Saturday M. Venizelos was welcomed by the Greek community at a reception given in his honour at the Grafton Galleries. M. G. Marchetti, of the Greek Legation, presided, and the Greek Minister, M. Gennadius, was among those present. On Monday he was the guest of the Inter-Allied Parliamentary Committee at luncheon in the Harcourt Room of the House of Commons. Lord Bryce presided at the luncheon, when those present included Lord Milner, Sir George Cave, Mr. John Hodge, Mr. George Barnes, Mr. Herbert Samuel, the Greek Minister, M. Argyropoulo, Lord Newton, Lord Peel, Lord Burnham, Lord Southwark, Lord Salisbury, Lord Sanderson, Lord Edmund Talbot, Lord Stuart of Wortley, Mr. Evelyn Cecil, Sir H. Dalziel, M. Diomedes, M. Caropanos, and the Duke of Mondragone. On that occasion M. Venizelos made a short speech, in the course of which he expressed a belief that one of the most important and beneficial results of the final victory of the Allies would be the organisation of a community of democratic nations.

PERSIAN EPICS.

Dr. P. S. G. Dubash gave an address on Sunday evening at the Sufi headquarters, 86, Ladbroke Road, W., on the ancient epics of Persia. He said the Persian or Iranian epics were probably the oldest in the world, for the very word Aryan was but a corruption of Iranian. One of the oldest related to Kaosmun, the first monarch and, indeed, the first man according to Persian mythology. He was said to have been so popular among men and beasts that when he came down from the hills, where he lived as a hermit, not only human beings, but also birds and beasts, flocked round him and sought his advice. The story of Orpheus offered a parallel, but the Persian hero did not need a lute. His son was killed by a dragon, and the story of his grandson Husheng was the Persian legend as to the origin of fire and fire worship. Husheng sought to avenge the death of his father. He attacked the dragon, throwing an enormous stone at it. This struck another stone, causing sparks, which ignited the dry grass near. Husheng's followers were alarmed at the phenomenon and ran away, but the hero had the courage to remain and investigate. Thus man discovered a most useful servant, and fire worship was begun. Another poem told of the four questions put to Zal, and his answers to them. Said the questioner: "I see twelve trees, each with thirty branches, and in the kingdom of Persia they neither grow very short nor very long. What are they?" Zal at once answered that these were the twelve months of the year. The reference to the branches being neither very short nor very long, Dr. Dubash explained, meant that in Persia the days are not greatly different in length throughout the year. The second question was: "I see two horses running one after another, one black, the other white. They run eternally towards a goal they never reach. What are they?" Zal answered that these were day and night. "I see," again said the questioner, "a strong man reaping green and dry mercilessly throughout time. What is that?" Zal replied that it was death, taking young and old. The fourth question was: "Built on a rock a town was set, but man preferred to live in the plain below. Then came a mighty flood, and man longed for the rock-built town. What is it?" Zal replied that the rock-built town was Eternity. Man's living in the plain signified his love of ease and pleasure; but, when great trouble overwhelmed him, he realised that eternal peace and rest was best after all.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

THE SCHOOL RE-OPENED ON OCTOBER 1.

For particulars, apply to E. DENISON ROSS, Director.

NEAR EAST BOOKSHELF.

INDIA AND THE FUTURE.*

Let it be said at the outset, and with all due gratitude, that this book is not "globe-trotting," though a preliminary glance at the illustrations might raise suspicion in the reader's mind. Mr. Archer visited India, and "its problems became an obsession," but instead of solving them on the homeward voyage he set to work to study them, and his book contains ample evidence of wide and judicious reading as well as hard thought; it is, therefore, a serious and important contribution to a discussion which cannot be neglected by any citizen of the Empire. In one respect the book is *infelix opportunitate*. Completed in 1914, it was laid aside for the time, and was prepared for publication last May by the addition of footnotes and a "postscript-proem"; much water has flowed down the Ganges since May, and the main contention of the book is already *chose jugée*, for the declaration that India is eventually to govern herself grants by anticipation the conclusion to which Mr. Archer's arguments lead. But to say this is not to pronounce the book out of date; to our mind its real value lies not in the conclusion, but in the examination of the varied and complex problems by which the Administration is confronted, problems which have still to be solved, though we may hope that their solution will be facilitated by the declaration in question. This examination has been conducted with insight and judgment, and can be recommended with confidence to all serious students.

Mr. Archer hits hard, but by no means indiscriminately. Peasants and politicians, bureaucrats and "Hinduizers," are all faithfully dealt with, and, human nature being what it is, most of them doubtless deserve most of what they get. Occasionally, perhaps, the punishment is excessive, and Mr. Archer mimght have made momre allowances, if he had been more intimate with the objects of his censure; if so, the fault is in the right direction, for India just now needs plain speaking more than anything else, and she has been hearing so many smooth things that signs of surfeit are becoming apparent. We welcome in particular the outspoken denunciation of the "Hinduizers"—an extensive class who have been poisoning the minds of the rising generation with mythical tales of the glories of the Indian past. That past is supremely interesting, and is worthy of the closest critical study, as Mr. Archer insists; but the wanton imagining of triumphs in politics, art, religion, and social organisation constitutes not merely an insult to the India of to-day, but the gravest practical danger to the India of to-morrow. There will probably be a howl of indignant protest when Mr. Archer's book reaches India, but we imagine he will not mind that; he has said many things which were wanted, and it is unnecessary to add that he has said them incisively and so clearly that no room is left for misunderstanding.

THE LATE LORD KITCHENER. †

In his well-considered foreword Lord Reay summarises the purport of this little book in a few happy words as "a touching tribute to the memory of the late Field-Marshal Earl Kitchener," whose "fine character appealed to the King's Indian as well as British subjects," and as "an expression of sympathy which shows how India shares in the joy and sorrows of the British Empire." In the preface which follows the Maharani illustrates that love of hero-worship which is so common amongst the warlike nations of the East. Earl Kitchener, with his devotion to duty and his thoroughness of execution, appealed to the Maharani and her friends as worthy of a place amongst the traditional heroes of her race, and it is from this point of view that the book is written.

But there is more. It is a very interesting account of Lord Kitchener's life, in which the leading events of a truly great career are summarized and commented on. It begins with an account of his early days at Woolwich, and afterwards in the Sudan, followed by South Africa, army reform in India, and, lastly, the great task where his energy and ability in a few months "transformed a nation trained for generations in the arts of peace into a military people." The book is well printed, and contains many interesting photographs. Those who are so fortunate as to read it will not only gather much information about a splendid career, but will also see that the days of chivalry, with all their attendant hero worship, have by no means passed away.

* "India and the Future." By William Archer. (Hutchinson and Co. 16s. net).

†"Field Marshall Lord Kitchener of Khartoum, K.G." A Tribute to Hi Memory. By Nandkuverba, C.I. Maharani of Bhavnagar.

THE RUSSIAN REVOLUTION.

M. Claude Anet, the correspondent of the *Petit Parisien* at Petrograd, is a journalist with the historic vein. In his book, *La Révolution Russe* (Payot et Cie., Paris, 4 fcs.) he covers the whole ground of those amazing months from March to May in the Russian capital and at the front; and, with a brilliant style that carries the reader along from page to page, he sketches one episode after another from the brilliant hope which arose with the dawn of the new liberty to the utter impotence of "no indemnities or annexations." The Russian soldiers, it appears, thought that indemnities and annexations were two foreign cities, like Constantinople, which they had no desire to take. The full story of the notorious "Order No. 1," which ruined the Russian army, is given, and the frenzied attempts to restore discipline and a fighting spirit against the German fraternising and alcohol; and there is a pleasant picture, which gains by the sombre contrast in which it is placed, of the Roumanian army ready to fight while the Russian troops hung back or deserted. The point is made that desertions began long before the actual revolution.

It has been the misfortune of the present reviewer to read many books on the Russian revolution. The best have been indifferent, and the worst very bad indeed; it is a relief to come across one which can be honestly praised as a record at once vivid and truthful.

SERBIAN SONGS AND POEMS.*

During the war we all have been learning much of the Serbian people. Our sympathies have been roused by their misfortunes, our admiration by their fortitude. This little volume of songs and poems will help us to enter into a deeper appreciation of this wonderful race. It will be a revelation to many that these rough mountain fighters delight so in poetry. Here, "With undisguised voice and in many moods we hear Serbia speaking for herself. Human strength and weakness, love and hate, nobility and baseness are set forth with primitive simplicity." The translator is qualified for his task by intimate knowledge of Serbia and the Serbians, and by a passionate admiration of and sympathy with the people.

* "Serbian Songs and Poems." Translated by J. W. Wiles, M.A. (London Geo. Allen and Unwin, Ltd. 2s. 6d. net.)

Messrs. DENT'S New Book.

THE EXPLOITATION OF PLANTS

contains Long and Authoritative Papers on

TROPICAL EXPLOITATION, with Special Reference to **RUBBER,** by Dr. J. C. WILLIS, late of Ceylon and Rio Janeiro.
THE COTTON PLANT, its Dependent Industries and Natural Science, by Dr. W. LAWRENCE BALLS, late of Egypt.
TEA MAKING, by Dr. S. E. CHANDLER, Imperial Institute.

With other Botanical Papers by Leading Authorities, specially referring to the Empire.

Order "The Exploitation of Plants," price 2/6 net, at any Bookseller's. (Ready Next Week.)

29	16	Thursday	14	14

M. Pashitch, the Serbian Prime Minister, arrived in Paris on November 18.

The Serbian Minister called at the Foreign Office on November 20.

Mr. A. Van Millingen, of Alexandria, is returning to Egypt early next month.

The Government Commission has reported against a daylight saving scheme for Egypt.

M. George Todorovitch, Secretary to the Serbian Legation, has left London for Washington.

Dr. Varnava, Bishop of Skoplje and Metropolitan of Goruja Misia, has arrived in London from Petrograd.

M. Popovitch, the Premier of Montenegro, has returned to Paris to take part in the forthcoming Allies' Conference.

An offer from the town of Halesowen, Worcestershire, to provide a Y.M.C.A. Hut for Palestine has been accepted.

The Lord Chancellor has appointed the Rev. J. R. Fellows, late chaplain, Srinagar, India, to the vicarage of East Tilbury.

M. Milsrad Voujitchitch, Under Secretary to the Serbian Minister of the Interior, has arrived in London from the Continent.

To-morrow afternoon the Union of the East and West will perform "Savitri" in King George's Hall, Y.M.C.A., Tottenham Court Road.

We regret to announce that Second Lieutenant W. Cumming, of the Egyptian Education Department, was wounded on the 8th instant in Palestine.

At Corpus Christi College, Cambridge, the Brotherton Sanskrit Prize has been awarded to Mr. C. D. Deshmukh, B.A., designate, of Jesus College.

Dr. Voukitchévitch Némanya, who has been appointed Secretary to the Serbian Legation in London, has arrived in England and entered on his duties.

Sir Lucas Ralli called upon M. Venizelos on November 16 and handed him £5,000 for the Greek War Fund, leaving the disposal of it entirely to the Greek Premier.

The Council of the Society for the Promotion of Hellenic Studies, on the occasion of his visit to London, elected M. Venizelos an honorary member of the society.

Lieut. C. Wilkinson, formerly sub-editor of the *Egyptian Gazette*, and now attached to the Commission Internationale de Ravitaillement, has been promoted to the rank of captain.

M. Venizelos breakfasted with Mr. Lloyd George at No. 10, Downing Street on November 15. In the evening M. Venizelos was entertained to dinner by M. Gennadius at the Greek Legation. M. Venizelos had the honour of being received by the King at Buckingham Palace on November 18, and of being invited to luncheon with their Majesties. On November 21 M. Venizelos was entertained at luncheon by Admiral Sir John Jellicoe.

Mr. Harold Thomas Beresford-Hope, of 11, Courtfield Road, South Kensington, Third Secretary at the British Legation at Athens, who died on July 17, aged 33, left estate of the value of £67,167. The testator left a quantity of George III. silver plate to the First Commissioner of Works for the use of any Embassy, Legation, or Mission established in Poland within five years of his death, or for such other Embassy, Legation, or Mission to be selected by the First Commissioner, and the executors are empowered to make up with other silver a complete service, with ornaments, for twenty-five persons.

LADY, WISHING to go to INDIA, would like to meet lady or party, with view to companionship in travelling through India. Willing to contribute half expenses in return for escort.—Reply to Box 501, care of THE NEAR EAST Offices, 1, Devonshire Square, E.C.2

Mr. P. S. Taylor, formerly manager of THE NEAR EAST, has been granted a commission as lieutenant in the Egyptian Labour Corps, and is shortly proceeding on service.

Dr. Kramarzh's organ, the *Narodni Listy*, of Prague, declares that "the Czechs have only one programme—namely, to have an absolutely independent State of their own."

At a mass meeting of Jews held at Johannesburg, presided over by the Chief Rabbi, a resolution was carried in favour of the establishment of a national home for Jews in Palestine, and thanking the Imperial Government for the sympathy and support which it has given to the proposal.

Brigadier-General A. Carton de Wiart, V.C., D.S.O., son of the late well-known Cairo barrister, Maitre Carton de Wiart, whose name has again appeared in the official casualty list, has now been wounded five times in the present war—in May, 1915, July and October, 1916, and April and November, 1917.

It is officially announced that his Highness the Sultan of Egypt has conferred the Grand Cordon of the Order of the Nile on General Sir Edmund Henry Hynman Allenby, K.C.B., Colonel 5th Lancers, and Commander-in-Chief, Egyptian Expeditionary Force, in recognition of his distinguished services to Egypt during recent operations.

The King has given permission to Mr. James Berry, B.S., F.R.C.S., to wear the insignia of the Fourth Class of the Order of the Star of Roumania, and of the Third Class of the Order of St. Sava, the latter conferred by the King of Serbia; also to Mr. C. H. Lyddon to wear the insignia of the Fourth Class of the Order of the Nile, conferred by the late Sultan of Egypt.

Any Indian Army officers who served in France and Belgium with the first seven divisions who desire to attend the Choral Commemoration at the Royal Albert Hall on Saturday, December 15, at half past two o'clock, are invited to send their names to the Military Secretary, India Office. A box is to be placed at their disposal by the executive committee for the commemoration.

The Cairo correspondent of the *Morning Post* states that Major Evelyn Rothschild, who died on November 17 in that city of wounds in the head received in the great Yeomanry charge, was buried there on November 19. The funeral was a very imposing one, in which representatives of all the local Jewish societies took part. There were several thousands of spectators. Lord Dalmeny was present.

The Sufi Order is holding its autumn and winter meetings at 86, Ladbroke Road, Holland Park, W., on Sunday mornings and evenings, and on Tuesday evenings. Last Tuesday's address was by Inyat Khan, his subject being the spirit of Islam. He said that Islam was considered in the West to be the religion taught by Mahomet, but it was properly the religion that had been taught since the creation of the world by various inspired messengers. It was a message of peace on earth, and all who brought that message—Zoroaster, Moses, Christ, Mahomet, and others—were messengers of Islam. The spirit of all religion was one; but differences with regard to teachers, differences of commercial or other interests, aspirations after family, national, racial, or other predominance, together with the mere desire to be different from other people, had split mankind into a number of religious camps. Not all Moslems had known the spirit of Islam; the Sufis had done so. Sufism had survived persecution, when its adherents had been driven to hide in forests, caves and jungles. It sought not to divide mankind, but to unite Moslem, Zoroastrian, Christian, and all others in one essential truth, and in the spirit of peace.

11th K.E.O. LANCERS.

A COMFORTS FUND, which will co-operate with THE INDIAN COMFORTS FUND, has been started for the Regiment.

APPOINTMENTS, PROMOTIONS, ETC.

The following appointments are announced in the *Sudan Government Gazette* :—

El Kaimakam E. W. Viscount Hawarden Bey, Senior Inspector, Bahr-el-Ghazal Province, to be Governor, Bahr-el-Ghazal Province.

El Kaimakam C. S. Northcote Bey, 1st Inspector, Bahr-el-Ghazal Province, to be Senior Inspector, Bahr-el-Ghazal Province.

OBITUARY.

SIR STANLEY MAUDE.

The news of the death after a short illness of General Sir Stanley Maude, Commander-in-Chief in Mesopotamia, has been received with widespread regret. The late officer was born in 1864, and twenty years later received his commission in the Coldstream Guards. He saw active service in the Sudan in 1885, when he was present at the actions of Hasheen and Tamai, and subsequently in the South African War, where he greatly distinguished himself. He afterwards held a number of important appointments, including those of Military Secretary to the Governor-General of Canada and Assistant Director of the Territorial Force at the War Office. When war broke out Maude was on the General Staff of the 5th Division, and he went with that division to France, and was severely wounded while in command of the 14th Infantry Brigade. In 1915 he was promoted major-general, and appointed to the command of the 13th Infantry Division, with which he presently proceeded to Mesopotamia. It was, as it happened, in that scene of the war that he received the opportunity of his career, for he was chosen in August, 1916, to succeed Sir Percy Lake as Commander-in-Chief. That his selection was more than justified became evident from the first, for he devoted himself assiduously to the task of reorganising his forces and improving his lines of communication, and this he carried out in conjunction with the authorities at home and in India to such good effect that when the time came to advance he had made success as certain as it was within human attainment to do.

It is not for his contemporaries to attempt to appraise the precise value of his masterly tactics, which resulted in his advance to and beyond Kut and onwards to Baghdad; that is a matter for history to decide; but this much is clear, however, that if success unmitigated by any failure whatsoever—success complete and rapid in its development, and apparently flawless in its conception—counts for anything, then General Maude's fame is safe in the hands of posterity. From the moment of its initiation, the achievement of his aims was never for a moment in doubt. Starting in December, he occupied the line of the Hai River, cleared the banks of that river as far as Kut, and then, by determined tactics, drove the Turks out of their positions there back into Kut. A brilliant stroke followed, for, feinting in one direction, he succeeded in misleading the enemy, and continued to cross the river at Shumran. The crossing marked the end of the Turkish resistance in that neighbourhood; they turned in retreat, which rapidly developed into a rout. Maude was not the man to fail to seize such an opportunity; he followed hard after the Turks, and on March 11 entered Baghdad.

Having seized certain advanced positions, Maude again devoted himself to the task of preparing for further developments, among the measures he took being the development of local resources, so that his army would not be so dependent on communications. Nothing of note happened until well on into September, when the Turks, possibly misunderstanding his apparent inactivity, ventured to approach somewhat closer. Maude waited his time, and when a Turkish division reached Ramadieh he marched out by night, completely surprised the enemy on the following day (September 28), and by an encircling movement compelled his surrender. Subsequently the Turks on the Tigris became aggressive, and they also were dealt a sharp lesson, for they were attacked and driven from their entrenched position at Tekrit on November 5. Then, when the Turks had retired some fifty miles, Maude brought his men back to their original positions.

His death, which came as a great shock to the people of this country, deprives the Empire of one of its most brilliant members, and the Army of one of its most capable leaders. The Prime Minister, in announcing his death in the House of Commons, referred to him as "one of the most distinguished soldiers in command of the British Forces in the field." In the hour of his triumph, added Mr. Lloyd George, he had been stricken down by a fell disease, and the country mourned the loss of one of its most valued sons.

COLONEL E. G. SKINNER, C.B.

The death took place at 52, Kimbolton Road, Bedford, on November 18, of Colonel Edmund Grey Skinner, C.B. The son of Russell Morland Skinner, sometime Judge of Kishnagur, he was born in 1850, and joined the Army Ordnance Department in 1867. He saw service in the Egyptian Expedition of 1882, being present at the battle of Kassassin, and was mentioned in the despatches. In the Sudan operations three years later he was C.O.O. of the expedition, and took part in the battle of Suakin. He was made C.B. in 1891, and retired from the service in 1901.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

CLARKE.—At Simla, the wife of Major G. A. Clarke, Indian Army, of a son.

FORSTER.—On Nov. 17, 1917, at Cairo, to Mr. and Mrs. Arnold J. Forster, Sudan Civil Service—a son.

MARRIAGE.

LYLE—LEEK.—On November 15,, at St. Mark's Church, Wolverhampton, by the Rev. G. Swindells, Archibald Lyle, late of Busreh, Persian Gulf, to Edith, only daughter of Mr. and Mrs. Leek, Woodsetton Farm, Dudley.

DEATHS.

GUNNING.—On November 14, 1917, at Cape Town, Brigadier-General Orlando George Gunning, C.M.G., D.S.O., Indian Army. aged 50.

HARVEY.—On Nov. 13, of enteric, at Poona, Ernst Anthon Harvey, of the Indian (Madras) Civil Service and Indian Army Reserve, formerly of Haileybury, and St. John's College, Oxford, eldest son of Robert and Anna M. C. Harvey, of Rothley, near Leicester, aged 32 years.

KAYE.—On November 17, at 17, Lincoln House, Basil Street, Knightsbridge, Lieut.-Colonel James Levett Kaye, late Political Department of the Government of India, aged 55.

PERROTT.—On November 13, in Cairo, the most dearly-loved wife of Charles Harold Perrott, Barrister-at-Law.

TATE.—On November 13, 1917, at Slieve-na-failte, Whiteabbey, Co. Antrim, Alexander Chambers Tate (late Madras Civil Service), aged 61.

ROLL OF HONOUR.

SCRUTTON.—Now reported by the War Office to have died as prisoner in a Bulgarian hospital, shortly after Sept. 10, 1916, of wounds received in fighting on the Struma on Sept. 10, 1916, Hugh Urquhart Scrutton, Captain, Northumberland Fusiliers, Military Cross, and three times mentioned in despatches, youngest son of Lord Justice and Lady Scrutton, aged 21.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

FRIDAY, NOVEMBER 23, 1917.

THE VISIT OF M. VENIZELOS.

As a people, Britons are not given to the use of superlatives. When, therefore, the rule is broken in favour of a foreigner, we may feel certain that the tribute is both genuine and deserved. Public opinion in this country has unanimously endorsed all that has been said in honour of M. Venizelos on the occasion of his present visit to London. Neither Mr. Balfour, in describing him as one of the great contemporary statesmen of the world, nor Lord Bryce, in speaking of him as one of the foremost men, not only in Europe but among all the nations of the world, was straining after oratorical effect; both did no more than justice to perhaps the most striking career among public men of recent times. It is well, moreover, at a moment when the Allies are championing the cause of small nations, that it should be recognised that statesmanship is not necessarily confined to the Great Powers. If M. Venizelos has been all that is claimed for him, then an additional argument has been found for the claim of small nationalities to work out their own salvation, and thus to contribute their quota by precept or example to the progress of civilization. It is the more remarkable that a small country such as Greece should have produced the man who by common consent has stood out in his generation as one who united pre-eminently in his own person capacity for action with breadth of vision. M. Venizelos has won the position he now holds among his contemporaries entirely on his own merits, at a period when his country, through no fault of her own, counted as the most negligible in Europe. His record shows that he grasped as soon as anybody the meaning of the world-crisis, and saw the moral principle at issue in the war. Quick of decision, he was ready at once to throw the whole weight of Greece's support into the scale. When he found himself thwarted in his purpose, he was prepared to stake all on his conviction. Amid the stress of graver preoccupations, it has perhaps not been fully realized how greatly he dared in setting up his Provisional Government at Salonika in defiance of constituted authority. The step, however, was characteristic of the man, who from the time of his first appearance in Greek public life has disdained that trimming and compromise with principle that come so easily to the average politician.

Three occasions stand out in the life of M. Venizelos when he has set himself to attain a remote, if not seemingly inaccessible, goal, and has reached it in the face of almost overwhelming odds. When he first took to the hills in Crete, his challenge to Turkish rule in the island showed little chance of success; but the same masterfulness of purpose, which was to stand him in good stead later in life enabled him to win through, and in the end the long-cherished aim of union with Greece was acomplished. He was summoned to the mainland at a grave crisis in the history of Greece, when the task of re-establishing administrative order out of chaos, and of cleansing the Augean stables of Greek politics had to be performed virtually single-handed. On the very day of his arrival in Athens he found himself in sharp disagreement with the people of the capital, and the reforms that he had to introduce could not fail to antagonise those who had battened on the corrupt political system of the past. Within a few years discipline and efficiency had been restored within the army, and Greek administrative methods were no longer a by-word in Europe. The patent honesty of M. Venizelos's intentions had won him the support of the majority of the nation, and the success of his regime was sealed by the Greek victories in the Balkan Wars. The outbreak of the present struggle followed. Once again M. Venizelos was confronted with what promised to be an insuperable obstacle between him and his cherished goal. King Constantine refused to allow Greece's support to be given to the Allies, and prepared to make common cause with the Central Powers. The measures adopted by M. Venizelos to cope with this situation were novel and bold. Many of his best friends doubted the wisdom of the course he chose to pursue; but he held to his own line of policy, which in the end was shown to be justified. The Royalist Government in Athens made way for the Provisional Government at Salonika, and in due course Greece was able to undertake her preparations for ranging herself officially and whole-heartedly on the side of the Allies. Thus, if greatness consists in having worthy aims and in persevering until they are attained, then M. Venizelos is great. Selfish considerations or a desire for self-aggrandisement have been conspicuously absent from his career. At each stage of his public life he has stood forth as the champion of high ideas, whose disinterestedness has been above suspicion.

His third and last great struggle is over. Constitutionalism has been restored to Greece, but M. Venizelos finds that his duty to his country in this connection is not yet liquidated. He has restored to the Greeks their self-respect, but he has not yet secured for all the people of the country the wherewithal to live. Amid a general world shortage of foodstuffs Greece has fared particularly ill. The fault lies mainly with King Constantine's regime. To check its intrigues with the Central Powers an economic blockade had to be enforced. Greece exhausted all her stocks, and when the time came for the removal of the blockade, she found herself with no reserve to tide over the time until supplies could reach her, if not normally, at least regularly. M. Venizelos, it may be taken for granted, is not visiting the Allied countries merely to receive eulogies upon his achievements. The object of his mission is to make such arrangements as will enable him to finish the task that he has undertaken. Until Greece has placed the whole of her available military strength in the field by the side of the Allies she will not have played her part. But with the civilian population on the shortest of rations and the army without adequate supplies there can be no question of the Greeks taking the field in force. The country must be provisioned before M. Venizelos can rest content with what he has done. In urging upon the Allied Governments the need for practical steps in this direction, the Greek Prime Minister has a doubly strong case. Apart from the moral obligation to come to the assistance of a regenerated Greece, there is the potential value of the support that the Greek army may yet render to the Allied cause. The Central Powers can never evade the necessity of seeking easy triumphs in the field with a view to heartening their respective peoples. When the thrust against Italy has exhausted itself, the German higher command may decide that the Salonika front offers the most reasonable prospect of a successful attack. The presence of two hundred thousand Greeks in the fighting line or in reserve would more than balance the reinforcements the enemy are likely to be able to spare for this theatre. But this force must be fed and adequately equipped, a task beyond the capacity of the Greek military authorities without the Allies' help. M. Venizelos's visit, we may be sure, had a practical object, and it is to be hoped that the Allies will enable him to make the fullest use of Greek man-power in the common cause.

GERMAN BUILDINGS AT JERUSALEM.

The rise of German influence in Palestine, which owed its remarkable expansion to the Kaiser's visit in 1898, has expressed itself in the outward and visible form of large, costly, and exceedingly ugly buildings erected throughout the country. Those at Jerusalem are all on cleverly chosen sites which dominate the city completely, whether situated within the walls or without.

The German church, the Erlöserkirche, which the Kaiser ostensibly came out to open, stands on the site of the old Hospice of the Knights of St. John of Jerusalem. Various remnants of the old building are incorporated in the church, and the unsightly tower designed by the Kaiser, which is exactly like an elongated candle-snuffer, commands the entire city at a glance. At the opening of this church the Kaiser preached a little sermon, in which he explained that the cause of Germany's greatness was the open Bible in her land; and he closed his peroration most impressively with the words, "As for me and my house we will serve the Lord!"

The very large Hospice of St. Paul (apportioned to the German Lazarists) stands exactly opposite the city walls outside the Damascus Gate. Only half of it was completed in 1914, though why such an enormous building was required could never be explained satisfactorily. Probably the explanation volunteered by one of the fathers there was a true one, though rather puzzling at the time. "It is too large for us now, but we shall want all the room afterwards, and then we must make it also larger." No doubt all these German places were built in view of that good time "afterwards," when Germany was to possess, or at least to dominate, the Holy Land. The Hospice contained many bedrooms, large and small, one of which could accommodate fifteen persons; it was rather quaintly described as being intended for "poor professors, who could not pay much, and did not mind sleeping together." A small but interesting museum, including birds, beasts, and reptiles of Palestine and other countries, attracted many visitors. From the windows of the Hospice some of the loveliest views of the city were obtained.

A sister-house of this institution, at one of the sites of Emmaus, was a favourite place with residents at Jerusalem, who went out sometimes for a day, sometimes for several weeks, and everyone found the fathers most genial and kind. I am tempted to this digression by the recollection of a story told by some English people who were spending a few days there in August, 1914. They had retired to their rooms after dinner, and were thinking of bed, when an extraordinary tumult broke out in the usually quiet quarters of the fathers. They could hear loud, excited voices, healths being drunk, and an increasing clamour as if newcomers were arriving and being told some very wonderful news. The next morning one of the visitors asked a father if they had been celebrating a special or local festival. "No," he answered, "but our Consul at Jerusalem sent us out the news that England and Germany are at war."

The English visitor was appalled, and exclaimed, "But you were all *rejoicing* over something! Surely you are not glad that we are at war?"

He answered, quite soberly, "For years we in Germany have gone on making our army and navy larger and larger, and the country has been taxed for them. If we do not use them, what excuse have we for keeping them so large? And if our people at home are taxed like this, and still the army and navy are not used, they will rise, and there will be war in Germany. It will be war either at home or abroad, therefore we rejoice because it is war abroad."

The establishment of the German Benedictines just outside the Zion Gate and next to Nebi Daoud (the tomb of David), is another of Germany's large and dominating buildings. The church has swallowed a great deal of money, but has not grown beautiful on it; it is, however, beautifully kept. There is a large crypt under the church, which gives back a loud hollow echo when people are walking about the church. Before the church was finished this echo was most disturbing, and magnified the sound till three or four persons walking about seemed like a crowd; but now that matting and carpets have been laid down the echo has been modified, though not conquered. The Moslems of Nebi Daoud are a fanatical and turbulent set, and the very thought of a Christian church so close to their sacred shrines was hateful to them. They raised a good deal of opposition from the first, but the ex-Sultan had given his word to the Kaiser, and of course the matter had to go forward. The Moslems then fiercely stipulated that no bells should be rung, nor even hung, in the church on that spot, and the promise was given. When, later on, some large bells arrived from Germany, presented, I think, by the Kaiser, the Moslems of Nebi Daoud were agitated afresh, and again urged their protest. They were assured that the bells were only for show; that, as the Kaiser himself had sent them, they could not well be refused, and the promise was repeated that they should not even be hung, far less rung. Just before Prince Eitel Fritz arrived in Jerusalem to attend the opening service (April, 1910), the bells were secretly hoisted into place; and as he entered the church they burst out into a triumphant peal. The Nebi Daoudis' anger and protests were impotent. The bells have been rung regularly ever since.

The most imposing of all the German establishments at Jerusalem is the Kaiserin Victoria Augusta Stiftung on the Mount of Olives. It belongs to the Empress, and the site was given to her by the ex-Sultan, because she expressed the wish that she could build up there a house of rest for missionaries. A very large tract of ground was included in this "concession," and the Kaiser and Kaiserin interested themselves keenly in the erection of the remarkable and solid group of buildings, now known as the Stiftung. The German Court contributed largely to it, and the coats-of-arms of the donors are perpetuated (I had almost said perpetrated) in glaring stained-glass windows in the church. The Stiftung is built with an inner quadrangle and a sunk court. It is an immensely strong building and very ornate, the entrance doorway and all the side doors are carved in a bewildering mixture of styles and periods. The dining-hall and reception rooms are of splendid proportions, with high-raftered ceilings and mediæval fireplaces, and a gallery. The bedrooms open on one side into a closed-in cloister, commanding the quadrangle, and on the other into balconies, which belong to the room or suite of rooms, and overlook the lands east of Jordan. Electric light, and the only real bathroom in Jerusalem, add to the comfort of the Stiftung, which is by far the most luxurious house in Palestine. The large grounds were still in process of being laid out in 1914; a broad carriage drive sweeps up to the front; and seats and summer-houses are placed here and there in the garden, where the views over Moab are loveliest. A great tower (also of the extinguisher pattern) rises from the centre of the building, and is fitted with loud-voiced bells, presented (with due regard to their respective sizes), by the Kaiser, Kaiserin, and Crown Prince; while a very powerful searchlight sweeps the country for miles around, lights up every stone in the city, and, it is said, is visible some twenty miles out to sea. We never quite understood why a philanthropic guest-house for missionaries required a searchlight. The place was managed by some Kaiserwerth deaconesses, towards whom everyone who has stayed there can feel only gratitude and respect. There is a large vineyard on the other side of the road which belongs to the Stiftung from which one can look down upon Jerusalem, the Beloved City of every age and of every nation, which lies in all her beauty and dignity completely at the mercy of the Stiftung. From the windows and garden at the back there are wonderful views of the Jordan and the Dead Sea, with the Mountains of Moab beyond; and to watch the sun rise day after day over those enchanted regions, to see the little silver mists of dawn, the ever-changing play of colour and the sweep of light and shade across the hills, is to behold beauty itself—a wonder indescribable.

The church in the Stiftung is richly but inartistically adorned with portraits of monarchs and heroes who have played a part in the history of the land—David, Judas Maccabæus, Richard I., Louis the Crusader, and so on, the largest and most important being the Kaiser and Kaiserin in Byzantine costumes, holding a model of the Stiftung, and encircled by the "rainbow round about the Throne." Scenes from the Book of the Revelation are also portrayed, in a fashion startling rather than beautiful. There is a fine organ—rather loud, perhaps, for the size of the building.

The Kaiser's keen interest in the Stiftung always struck us as being rather out of proportion. He insisted on being informed of everything that took place, even to the names and number of people who stayed there. One winter, when

a succession of bad storms had made it impossible for the mails to leave Jaffa, he telegraphed for news, as the usual weekly report had not reached him. As early as 1912 guns were being taken up to the Stiftung, concealed in packing-cases and described as "furniture." A broken case revealed the contents of one and explained the remarkable heaviness of the consignment. Throughout 1914 the royal suite of rooms was being decorated in a scheme of scarlet and gold, though apparently no royal visit was impending. Even more remarkable was the steady work on concrete emplacements, the explanation being that the building had been finished in such a hurry that the walls were not safe, and so these "supports" were necessary.

One wing of the Stiftung was set apart for the use of a scientific expedition sent out by the Kaiser to study malaria, with a view to freeing the country from this great trouble. It did not seem to be altogether the Kaiser's business, but, as a German said, "Our Kaiser does love Jerusalem so much—he is always thinking of it!" No doubt. Jerusalem was keenly interested in these investigations, and when the professor in charge politely requested leave to test the water in all the cisterns, so as to discover which were the infected areas, everyone was extremely pleasant about it and allowed him to do so. In this way accurate information was obtained of the depth and capacity of every cistern in Jerusalem, in all the foreign institutions, the only one that refused being a Latin monastery, and the Germans loudly condemned such "unfriendliness." I am afraid the rest of Jerusalem was more easily hoodwinked. This took place early in 1914, as far as I remember.

About the same time everyone was commenting on the sudden withdrawal from circulation of all German gold; it was impossible to get it anywhere, though it had been fairly plentiful before. There was a German bank in Jerusalem, and a post office, also a large colony near the station, many German shops, an hotel, and several schools round about. When one of these, known as Pastor Schneller's Orphanage, was burnt down one year, the Kaiser ordered a collection to be made in every church throughout Germany on a certain Sunday, the result being such an overflowing of wealth that the wages paid to the men rebuilding the school were the talk of the place. The German Hospital was a very good one, where the surgery, it is said, was well up to date and the nursing somewhat behind it.

There is no doubt that Germany was preparing long beforehand to seize Palestine, whether Turkey came in on her side or not.

ESTELLE BLYTH.

TANGIER TO TEHERAN.

Few people can remain insensible to the thrill that the progress of British troops northward through Palestine evokes to-day. But the country was the scene of battles and sieges before the time of the Children of Israel, and it is not without interest to recall that we have records of the capture of Joppa in the reign of the Egyptian Pharaoh Thotmes III., between three and four thousand years ago. There is a papyrus entitled "How Thoutii captured the town of Joppa," and I am indebted to a correspondent for a summary of it. There is probably, he writes, some historical foundation for the event, because we know from other Egyptian records that there was a general named Thoutii who held commands in Syria and Phœnicia. Possibly we have something that was once a valued possession of his in the shape of a bronze dagger inscribed with his name, now in the museum at Darmstadt.

***

The story, reminiscent of Troy, with a touch of Ali Baba, runs as follows:—Joppa had been placed, as was often the case in Egyptian foreign policy, again in the possession of its chief after he had been conquered. But he had revolted and massacred the few Egyptian soldiers left to watch over the city. Thotmes, on receipt of this news, was greatly enraged and consulted his staff and the magicians. They were both loth to advise, and thereupon Thoutii asked Pharaoh to intrust him with his royal baton and troops, both foot and chariots, in order that he might chastise "the vile once-vanquished Prince of Joppa." The papyrus is in rather bad condition, but sufficiently legible for us to understand Thoutii's *modus operandi*. He provided four hundred large jars, and having arrived near Joppa sent word to the chief that Pharaoh, being jealous of his, Thoutii's, prowess, had attempted to assassinate him, and so he and the troops under his command had deserted the Egyptian service and wished to become the followers of him of Joppa.

***

The prince was delighted, and came out from his walled city to meet Thoutii, and, forming a camp, invited the Egyptian and his men to come to him. At an opportune moment Thoutii asked permission for the remainder of his little force, with their pack horses bearing the jars of forage, to enter the town, where they could find stabling and storing room for the provender. The story contains some mystical allusion to the Joppa chief's desire to see the baton of power of the Pharaoh, which Thoutii had hidden in a forage basket. Thoutii fetched it, but only to strike the chief with it and render him insensible. Thoutii then concealed two hundred of his smaller-sized soldiers in as many of the large jars and sent them, accompanied by three hundred more, into the city. The plot succeeded. The gates were opened to them, the cavalcade entered the town. The soldiers in the jars leapt forth to aid their three hundred comrades and took the garrison prisoners, binding them, after the Egyptian fashion, with cords and yokes, articles which Thoutii had thoughtfully placed in the jars and forage panniers, instead of the forage these were supposed to contain.

***

I have been interested in a discussion that has been raised on the subject of the languages required for the Entrance Examination for Class I. of the Civil Service. It appears that no papers are to be set in Spanish, Russian, or Italian, unless one year before the examination it can be proved to the satisfaction of the Civil Service Commissioners that at least one candidate will enter who may be reasonably expected to attain the standard required from candidates in French and German. Of course, this stipulation has been cited as an instance of the unprogressive tendency of the powers that be and as the negation of all commercial expansion after the war. That is probably an unnecessarily extreme view to hold. Certainly the Civil Service Commissioners have gone out of their way to save themselves a modicum of trouble. Very likely they would have found themselves arranging for papers for which for a few years no candidates would present themselves; but neither the labour nor the expense entailed would be enough to offset the encouragement given to candidates to take one or other of the three languages in question. The elaborate conditions now imposed will deter a few people from doing so at first. In the long run, however, some one will have the courage of his convictions, and in practice it will be found that papers in Spanish, Russian, and Italian are a regular feature of the examination.

***

It is satisfactory to see that the value of Spanish is being insisted upon. Of its commercial usefulness there can be no doubt. It probably ranks second—*longo intervallo*—to English as the *lingua franca* of commerce. The point is arguable, I know, for I have often heard it argued; but on the whole the potentialities of Latin America are a considerable weight in its favour. Whether this point—the commercial utility of Spanish—will appeal to candidates for Class I. of the Civil Service is another matter. The war has given an impetus to the learning of languages among Britons; but the first tendency will naturally be towards those of the more prominent of our Allies. Then there are the linguistic needs of the Empire itself, and we shall certainly require a large percentage of students to make themselves proficient in Arabic. In these circumstances the learning of Spanish will want all the encouragement it can get, and for this reason it is to be hoped that the Civil Commissioners will set a good example by removing at the first opportunity even the shadow of an obstacle that they have placed in its way.

CORSAIR.

"OUR DAY" IN INDIA.

Stimulated by the successful results of the collections made in the United Kingdom and the Dominions, Lady Chelmsford's "Our Day" preparations for December 12, supported by the provincial Governors, Lieutenant-Governors, and Commissioners, with powerful committees, are proceeding apace throughout India and Burma, says Reuter's Delhi correspondent, in a message dated November 13. Efforts in aid will be made throughout the entire country, as the Viceroy has declared December 12 a public holiday. Her Majesty Queen Mary has sent out a number of gifts through the Secretary of State, for lucky bags. In the provinces H.H. the Nizam of Hyderabad has already given the Vicereine one lakh of rupees, the Maharaja Holkar of Indore half a lakh, the Maharaja of Jaipur a quarter of a lakh. Mr. Seth Sakhlall Karnani, a banker, of Calcutta, has defrayed the cost of ten million Union Jack button-hole flags from England, and another Calcutta citizen, Mr. B. Borooah, has paid for the cost of three million. A postal seal is now being sold by the post offices. The Army is taking an active part, and is arranging military displays. The Calcutta and Bombay Turf Clubs are giving the proceeds of special race days, and flag days have been arranged everywhere. "Our Day" special posters are displayed in public places. Arrangements, including elephant and motor-car processions, have been organised at numerous centres. The Indian States are joining keenly in the schemes, and remarkable public interest is aroused in the towns and rural districts

HOUSE OF COMMONS.

Indian Income Tax Levied in Persia. Nov. 14.

Colonel YATE asked the Secretary of State for India whether he would state under what circumstances the re-imposition of Indian income-tax on the pay of officers of the Indian Army serving in Persia had been sanctioned; and whether, considering that the levy of Indian income-tax from the pay of civil officers serving in Persia was abandoned in 1910 as being illegal, he would take steps to put a stop to the imposition of income-tax on the pay of officers of the Indian Army now serving in Persia.

Mr. FISHER: I am not aware that Indian income-tax is being recovered from officers of the Indian Army serving in Persia. Such a course would be contrary to the practice of the Government of India in recent years. If the hon. and gallant member will furnish me with any instances in which tax is being recovered I will have inquiry made.

Colonel YATE: May I ask the right hon. gentleman to inquire from the Government of India if it is so?

Sir J. JARDINE: Can the right hon. gentleman point out whether this is imposed by virtue of powers of the Indian Legislature, or whether it is a mere executive order of some sort?

Mr. FISHER: I am not aware that this tax has been imposed.

Indian Pay and Allowances.

Colonel YATE asked the Secretary of State for India whether he would say why the new rules, issued in August last, regarding the pay and allowances to sick and wounded officers of the Indian Army should be dependent upon the War Office or the Treasury as to the date of their application, which was fixed for February 17, 1917; and whether, considering that it is the duty of the India Office and the Government of India to provide for the sick and wounded officers of the Indian Army, he would now arrange to pay the increased charges on account of these allowances from Indian revenues with effect from the date of the commencement of the war?

Mr. FISHER: The consent of the War Office and the Treasury was necessitated by the fact that under the Parliamentary resolutions of September 16 and November 26, 1914, which determined the liability of Indian revenues in respect of the charges of expeditionary forces despatched from India, the additional allowances sanctioned under the new rules fall to be borne by Imperial revenues.

Colonel YATE: May I ask whether the right hon. gentleman will not take into consideration the fact that the Indian Army are under the care of the India Office and the Government of India, and will he do anything to put those officers, sick and wounded officers, on a proper footing?

Mr. FISHER: Under the arrangement made between the Secretary of State for India and the Army Council, it was settled that the net cost to be borne by the War Office should equal the actual cost incurred by us—the cost that would have been incurred if the troops had remained in England. It follows from that, as the hon. and gallant member will appreciate, that the full cost of all officers and men on sick leave falls upon the War Office.

Colonel YATE: I am sorry to say I do not appreciate that at all. I ask if he will give this allowance from the India Office dating from the commencement of the war?

Gen. Sir IVOR PHILIPPS: Will the right hon. gentleman see that British officers in the Indian Army and British men in the Indian Army do not suffer owing to some red-tape procedure between the War Office and the India Office?

Malta and the War. Nov. 15.

Colonel YATE asked the Secretary of State for the Colonies whether, considering that in the Report on Malta for 1916-17 (No. 935) there was no mention of the war or of the part Malta had taken in the prosecution of the war or in the provision of men and material for either combatant or non-combatant service, he would have the omission rectified in the ensuing Report.

Mr. HEWINS: I will suggest to Lord Methuen that, so far as publication is desirable, mention of the part taken by Malta in the war might be included in the next Report.

British Prisoners in Turkey.

In a written reply to questions concerning the fate of the officers and men of the Oxford and Bucks Light Infantry taken prisoner at Kut, Mr. JAMES HOPE states:—

According to our last definite information, nine officer prisoners of war in this regiment were distributed as follows:—In Yozgad five, Kastamun three, Constantinople one. The conditions at officers' camps are comparatively good. We also heard that there were 86 non-commissioned officers and privates of this regiment distributed at eighteen camps, and that there were five others whose camps were not known. A certain number of these men were orderlies to officer prisoners, and relatively well off, but the conditions at all the men's camps were unsatisfactory.

Since, however, we received the above information, it has been reported that the majority of all able-bodied prisoners of war have been moved to work on the Baghdad railway, east of Aleppo. Complete lists of those working there are being obtained, pending which, it is not possible to say what men have been so transferred, or from what camps. The men working on the railway are under the German Construction Company, who may be supposed to have an interest in keeping them in health, and with whom the Netherlands Minister at Constantinople has made arrangements for their benefit.

THE PRESS ON THE NEAR EAST

The Future of Italy.

"The Gates of the Mediterranean" is the title of an interesting, if discursive, article in the November issue of the *Fortnightly Review*. The writer, Mr. Cecil Battine, would have us keep our eyes on Italy. She is a rising State, with the consciousness of her destiny and of the unity of the Italian people. His suggestion that Great Britain's diplomatic action in this direction is at present fettered by obligations to certain Allies is likely to be challenged by those who hold that an equitable settlement in part of the Balkans is likely to be prevented by premature pledges to Italy. The article continues:—

"The reality which we have got to face is that Italy is no more willing to see the Slav dominate the eastern shore of the Adriatic than the German or Austrian. Italians have a keen eye on all the territory which adjoins their own, and certainly have more than an academic interest in the future of the Balkan Peninsula. Italian soil does not support even the present population of Italy, which overflows into America, North and South, besides emigrating into neighbouring European and African territory. Italian Governments in the future have no choice whatever; they must seek to guide the flow of Italian people into States which can confederate with the kingdom and which can range themselves with Italian interests and objectives in the near future. The population of the Balkans, as of the Trentino, is largely tinged with Italian blood; so are the people of the Levant. The Italian attack on Turkey in 1911 was caused by the need to find elbow room, the fear of being shut in which oppresses every expanding nationality on the European Continent in these days. Finally, Italy has by no means forgotten that she inherits the traditions, if not the Empire, of Rome. To rule in the Balkan Peninsula is not a defined ambition as yet, but it would be a natural development in Italian opinion if the nation continues on its path of progress, while its neighbours continue to decay. After all, the Romans may have as good a right to the Dardanelles as the Turks have to the Bosphorus."

Later on the writer returns to the charge:—

"It will be of great importance to us in the future as in the past that Constantinople, with the adjoining Straits, should be within the domain of a friendly Power. The past proves that we cannot be sure which State will be hostile or friendly in the future, though some are more likely to be friendly to us than others. It would certainly be more to our interest that the Italians should reign at Stamboul than the Russians, Germans, or Turks, with all of whom we have been at war to prevent this very contingency. Much depends on our diplomacy in the future in selecting and supporting our friends, because prestige will count for less in future world politics than the actual power to make good a promise. Vague treaty engagements such as we had with Belgium, unsupported by the armed forces required to make them good, is like the backing of a bill in commerce without the cash to meet it. Perhaps our interests would be served even better if the Balkan people could rule and defend their own Peninsula, together with the Asiatic coast of the narrow straits connecting the Black Sea with the Ægean. At the present moment such a solution seems impossible to those who have no intimate knowledge of the Near East and who judge of recent events by what they have been able to read in the London Press. But vast changes have taken place in the Balkans as elsewhere, nor will the course of history follow the former channel in those stormy regions, for the relative value of all the States and their potentialities for future expansion have been vitally affected. Serbia, Greece, Bulgaria, and Roumania have all changed their relative importance *vis-à-vis* to one another.

Mr. Battine's remedy is that Great Britain should carefully foster the friendship of Italy and favour an understanding between her and Bulgaria on the basis of the most permanent obstacle to Germany's *Drang nach Osten*.

Sultan Mulai Hafid of Morocco.

The *Strand Magazine* has a most entertaining article from the pen of Mr. Walter B. Harris on the idiosyncracies (and worse) of Sultan Mulai Hafid of Morocco. The article to be properly enjoyed must be read from beginning to end, but the story of the dentist's claim against the Sultan lends itself to quotation:—

In the first flush of his success at the beginning of his reign, Mulai Hafid was setting himself up as an orthodox Sovereign by Divine Right—and this necessitated a menagerie. It is one of the attributes of Royalty, which has almost disappeared except in the East, though at one time universal. It is, perhaps, fortunate. The hurried entrance of an excited rhinoceros amongst the guests at a garden-party at Windsor Castle would prove embarrassing, and so, to a lesser degree, would be the presence of a hyena at the evening service at St. George's Chapel; but at Morocco similar incidents would have attracted little or no attention. The father of Mulai Hafid, Mulai Hassein, allowed his tame leopards to roam about his reception-rooms, but his son, more timid by nature, confined the leopards in cages and replaced them in his drawing-room by guinea-pigs. The effect lost in majesty, but the afternoon callers were less nervous.

So the dentist was sent to Hamburg to buy wild beasts from Hagenbeck. But he erred. He should have returned with the menagerie and shared its glory. He delayed, and when he arrived in Fez a few months later the novelty and glamour of the wild beasts was passed, and the reception that he and the belated and unpaid-for lion—the last of the series of lions—met with was by no means enthusiastic. Mulai Hafid had discovered that the upkeep of so many sheep-eating beasts was expensive, as the tribes, on the eve of revolt, refused to supply the sheep, and insultingly demanded payment.

So far, the claim presented no insurmountable difficulties, but there were complications, for the Sultan, immensely attracted by the mechanism of the dentist's operating-chair, had some time previously ordered from the dentist, and paid for, a throne to be constructed on the same mechanical principles. This throne had never been supplied, so there was a counterclaim. The Sultan stated that he had paid for the lion, or, if he hadn't, then it was a State debt, for which he was not responsible, and demanded the delivery of his mechanical throne. The question was still under discussion when the term of the dentist's contract expired, and the ex-Sultan notified him that it would not be renewed. But the dentist held a trump card, for the ex-Sultan had lodged him, rent free, in a little villa situated on one of his Majesty's Tangier properties. The dentist refused to quit, and the Spanish authorities upheld him, for by the capitulations each Power protects the interests of its respective subjects. A body of slaves were sent to eject him. They found the villa barricaded, and were met with pistol-shots. The complications were becoming serious and international in character. The Sultan, the French authorities, the Spanish dentist, the black slaves, the writer, a British subject, and the German lion threatened to cause annoyance to the Governments of Europe if recourse was made to firearms. The writer made an impassioned prayer for conciliation on everyone's part. After much delay and no little difficulty, an interview was arranged between the ex-Sultan and the dentist, at which as mediator the writer was to be present. Each was studiously coached in the part he was to play. The dentist's plaintive appeals to the generosity of the ex-Sovereign were carefully rehearsed, as was also the Sovereign's "gracious reply," while the writer's little speech on the blessing of brotherly love was a gem of the first quality.

Mulai Hafid was seated on a divan studiously reading a book, when the dentist entered and made his obeisance; this obeisance, polite but intentionally curtailed, did not meet with his Majesty's approval. Instead of, as arranged, smilingly acknowledging the dentist's salutation, the ex-Sultan continued reading half aloud in a sing-song drawl.

A long period ensued, broken by one of the suite, who said: "My lord the king, the dentist is here."

Without raising his eyes from his book the ex-Sultan asked in the softest of voices:—

"Has he brought my mechanical throne?"

Now, that wasn't on the programme at all. There was to have been no mention of such distressing objects as dentist-chair thrones or lions. There was to have been purely and simply a reconciliation, a sum of money promised to the dentist if he would quit the villa, and a general abandonment of claim and counter-claim. But, alas! before anyone could intervene, the dentist had shouted out:—

"Pay me for my lion!"

And then the fat was in the fire. For some moments the atmosphere boiled with vituperative allusions to lions and dentist-chair thrones, until, while the writer restrained the infuriated potentate, the dentist was, struggling and shouting, removed from the presence chamber.

By dint of great persuasion, the writer eventually brought about a settlement. The Sultan did not get his throne, nor did he pay for the lion, which the Protectorate Government took over, not having been informed that it had meanwhile died. The dentist received a sum of money in payment of all his claims. The writer, whose solution it was, got the thanks of none of them, all three parties concerned expressing themselves as dissatisfied with the settlement reached.

THE GORDON MEMORIAL COLLEGE.

In transmitting the fifteenth annual report of the Gordon Memorial College at Khartoum, the High Commissioner in Egypt refers as follows to the loss sustained by the college in the deaths of Earl Kitchener and the Earl of Cromer:—"In the persons of Lord Kitchener and Lord Cromer we have lost two great servants of the Empire who were intimately connected with the foundation of the Gordon College and had its interests very near to heart. It would, I feel, be appropriate and desirable that the name of the late Lord Cromer should be associated with that of Lord Kitchener in the projected Memorial to the latter—a Medical School for the Sudan—a project which not only had Lord Cromer's hearty approval, but also for which, as Mr. Crowfoot states, he made a powerful appeal for funds."

The principal of the college, Mr. John W. Crowfoot, also pays a tribute in his report to the deep interest taken in the college by Lord Kitchener and Lord Cromer. "Lord Kitchener," he says, "was the founder of the Gordon Memorial College, but, more than this, he laid down the lines which it should follow, and the measure of success which has come to his foundation is largely due to the policy he prescribed." Then, referring to Sir Reginald Wingate's departure from the Sudan to take up the High Commissionership, he says:—"It was very appropriate, therefore, in every way that one of the last acts of Sir Reginald Wingate in the Sudan should be the issue of an appeal on behalf of a worthy medical school building to serve as a Sudan Memorial to Lord Kitchener, an appeal which was powerfully supported in England by Lord Cromer. Lord Kitchener himself had foreseen the need which would arise for this school, and had himself suggested that it should work in conjunction with the Wellcome Tropical Research Laboratories. The present war has forced this question before the Sudan Government in an unexpected way by shutting off absolutely the supply of doctors from the Syrian Schools of Medicine and compelling the Government to take steps to replace them from native sources. The Gordon College cannot provide suitable candidates for another two years at least, nor is it proposed to begin the necessary buildings until the price of building materials reaches a reasonable level, but, thanks to the Kitchener Memorial, within a measurable time such steps will be taken as should place the future recruiting of the medical service on a satisfactory basis."

The work of the college has been carried on under some difficulty in the past year owing to an insufficient staff, and this, too, at a time when the numbers attending the various sections have increased considerably. This increase will, it is thought, be maintained because of the future medical requirements of the country, and because a new field of employment has been opened to graduates by the appointment of a number of former students as sub-mamurs in the administrative service. As regards the research department, it is stated that the conditions which led to a serious reduction in the work in 1915 operated even more seriously in the past year, and many branches will have been brought to a complete standstill. Much good work was, however, accomplished at the Central Research Hall, and progress has been made in the Entomological Section for an extension in the immediate future.

Punch's Almanack for 1918 is a cheerful reminder that Christmas is coming and that the war is still on. As a large part of it is devoted to what may or may not happen when the war is over, we can but hope that in this particular *Punch's* optimism will prove prophetic in principle, if not in detail. The Almanack is an admirable sixpenny investment.

"The Treasure of the Tigris: A Tale of Mesopotamia," by Lieut.-Colonel A. F. Mockler-Ferryman, will be published shortly by Messrs. Black.

Mr. Heinemann will publish this month "My Round of the War," by Mr. Basil Clarke. The author's travels as a war correspondent took him to Serbia, Roumania, Bukovina, and Bessarabia, and his adventures are set down in this personal record.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

After falling completely out of favour, the idea of an economic union of the Central Powers and their Allies after the war has had a brief but uneventful resurrection. Probably the main reason why the idea again appears to have been dropped is the fear of retaliatory measures on the part of the Allies, since, as I have pointed out already, there is no misapprehension in certain circles in Germany as to the effect of a definite economic cleavage between the two groups of Powers. It is, indeed, quite well realised that we control the most important raw materials of the world, and that Germany and her Allies would be helpless if denied access to them, so that any suggestion of an economic union would be futile. Still, it was an interesting conception while it lasted, and its ventilation has been far from useless, for the abandonment of the scheme must open the eyes of quite a number of enemy subjects who had come to regard Germany as practically omnipotent.

***

Some interesting comments were made on this subject recently in a leading article in *Die Zeit*, which was prefaced by the frank statement that the idea of the proposed politico-economic union of the Central Powers is defunct. "The whole scheme," it declares, "arose from a mistaken enthusiasm excited by the military alliance between Germany, Austria-Hungary, Bulgaria, and Turkey, which led many to advocate that the alliance should be converted into a close economic commercial union to be continued after the war. The plans of the Paris Economic Congress of 1916 first showed the perils that the Central States would encounter through their proposed union, which could only further the aims of the enemy. Neither Bulgaria nor Turkey ever showed any enthusiasm for the project, while the Hungarians absolutely refused to entertain the idea of a twenty years' 'Ausgleich,' which was regarded as indispensable for the success of the new union. The necessity of keeping a free hand for a period after the war was at last recognised, and the whole Central Europe idea vanished like a dream."

***

In commenting on the report of the Central Economic Board of the Sudan Government I called attention to the valuable work of the Imperial Institute in furthering the work of finding a larger field for Sudan products. As will be seen from the report recently presented to the Executive Council of the Institute, a summary of which appears elsewhere in this issue, this side of the Institute's work has attained great importance during the war. Indeed, the Institute has now come to act as a kind of central bureau of information for the Empire overseas, and the increasing scope of its work can be gathered from the fact that in recent investigations it has dealt with such widely different products as maize grown in Nigeria, Nyasaland tobacco, and British East African minerals. Naturally the Institute has principally been of assistance in indicating the suitability or otherwise of various products for consumption in the United Kingdom; but it has also given advice on such subjects as the cultivation of foodstuffs overseas.

***

Nothing has been more impressive during the war than the rapidity with which the British authorities in Mesopotamia and elsewhere have taken steps to promote the welfare of the inhabitants and the development of the country in the rear of our advancing armies. An interesting sidelight is thrown on this work by the United States Consul at Baghdad, Mr. Oscar S. Heizer, in a recent report. "The British authorities at Baghdad," he writes, "are endeavouring to introduce modern farming implements, such as motor-drawn gang ploughs, reapers, threshing machines, etc., into this region; also windmills for the purpose of drawing water from the river for irrigation purposes. The country about here is flat, and windmills could do great service if once introduced." To say that war can ever have a constructive side seems an absurd paradox, but it is one which our work in Mesopotamia has proved to be a profound truth, and the reason why our development of that country is so significant is that it is a work which its rulers would have accomplished generations ago if they had had the least title to be considered a ruling race.

***

The report of the Egyptian Hotels, Ltd., which has just been issued, makes, on the whole, disappointing reading. The profits, after charging all expenses in connection with the working of the hotels, stand at £11,599 16s. 11d., figures which represent a substantial decline on the 1916 figures of £29,000. This profit is further reduced by the deduction of London and Cairo charges to £9,800. The sum of £4,300 was brought forward from the previous year, and the addition of this amount and the deduction of other charges leaves a balance of £3,900, which is to be carried forward. Last year a year's interest was paid on the preference shares, and £10,000 placed to reserve, but this year there are no such distributions. In war time hotel-keeping must be fraught with such ups and downs, and in this connection it may be noted that since the close of the company's financial year Shepheard's Hotel has enjoyed a considerable increase of business.

***

On another page will be found a recent report on the Greek currant crop by the United States Consul at Patras. The crop, it appears, was harvested without damage by rain, while it also escaped injury through peronospora, though in the absence of sulphur some damage was caused by oidium. It was estimated at about 140,000 tons, a very fair yield in the circumstances, and composed of fruit of medium good quality. At the time the Consul made his report there was little or no anxiety as to the disposal of the crop, as it was regarded as certain that at least half the yield could be disposed of locally for the purposes of wine and alcohol manufacture.

***

There are two main schools of thought on the question of reorganisation after the war: the one maintaining that it will be fraught with innumerable difficulties, and that in the best circumstances the warring nations are faced with a most critical economic position when peace is concluded; the other holding that the process of readjustment will be as easy as was the mobilisation of industry for war purposes. One of the latest contributions to this controversy—if controversy it be—is to be found in a recent circular of the National City Bank of New York, and may be said to be of special interest as representing the view of American business interests. The writer asks the question whether there may not be "a period of hesitation, confusion, unemployment, and depression," and answers it by saying that "the best assurance that this danger will be averted is the fact that it is everywhere recognised, and that steps are being planned to deal with it." He then proceeds to refer to the position in various countries, and arrives at the conclusion that normal progress which has everywhere been interrupted "will be resumed with a rush as soon as general confidence in the situation is established and there is assurance that capital and credit will be available."

***

As regards this provision, he points out that credit for peace purposes will certainly outlast credit for war purposes. "Whatever the war debts may be," he adds, "it is apparent that their payment is dependent upon the rehabilitation of industry. There can be but one opinion among statesmen, financiers, and all classes as to the immediate necessity for the resumption of industry. The shops, mills, mines, laboratories and fields will be waiting, and the goods when produced will pay for themselves in the exchanges. The resumption of industry and trade has little need of Government credit in the sense of requiring resort to the taxing power, but it will need co-ordinating, stabilising support through the period of reorganisation, and it is quite certain that this will be provided in Europe." There is certainly material for comfort in this American view; but it is to be hoped that the feeling that matters will readjust themselves will not be permitted to conduce to a *laisser faire* policy, and that everything possible will be done to assist the process. And the time for completing plans for this purpose is the present; it will be too late when it becomes clear that peace is at hand.

ROUMANIA'S FUEL SUPPLIES.

Development of Resources of Moldavia.

One of the greatest drawbacks with which the Allies have had to contend during the war has been the fact that the course of the struggle has made it necessary on more than one occasion to face the temporary occupation by Germany of lands of great economic value. The most notable instances, of course, are the invasion of Northern France and the occupation of Belgium. Then followed the invasion of Serbia, which gave the enemy possession of copper mines that now form, no doubt, the Central Powers' main source of supply of that commodity, while the occupation of Galicia gave them immense oil resources. Finally, the Roumanian retirement placed at the disposal of the Central Powers further oil-bearing areas of incalculable use in the event of it being possible to bore new wells and otherwise carry out, within a comparatively short space of time, the reconstruction rendered necessary by the thorough nature of the destructive work of the British Military Mission.

Of the two results of these enemy successes, the possession by them of new stores of raw material and the reduction in the Allied resources, the latter has been in some respects the more serious. But, as we have seen in the case of France, the handicap, difficult though it has been, has only served to further the better utilisation of her remaining raw materials. That the process has been much the same as regards Roumania will be gathered from the optimistic reports that have been recently forthcoming with respect to that country's military and economic position; and her success will be appraised at its correct value when it is borne in mind that the country suffered far more severely even than France, inasmuch as the greater part of Roumania was occupied, and that not the least valuable portion.

What the retirement meant to Roumania can best be illustrated in the light of its effect on her production of fuel. The normal fuel consumption of the country was 1,330,047 metric tons, made up of 600,000 metric tons of petrol, 30,000 of benzine, 30,000 of motorine, 443,647 of imported coal, 226,400 of lignite, 50,000 of lamp petrol, 12,000 of lubricating oils, and 2,000 of paraffin. After the retreat Roumania no longer had her vast oil supplies to draw upon, while the difficulties attending the importation of coal were, of course, practically insuperable. She had, therefore, to fall back upon the scanty mineral resources which remained, and trust to increased output to meet her needs. The fuel required was now very much less than before, but, even so, it was much above what was ordinarily produced from these sources. Of petroleum alone, 14,384 metric tons monthly were, as a matter of fact, required to meet the needs of the army and of industry, and for other purposes of prime necessity. The following table shows the various kinds of oil fuel required monthly and the amount available after the loss of the Province of Wallachia:—

	Required metric tons.		Available metric tons.
Petrol	9,000	..	3,700
Motorine	1,300	..	—
Benzine	1,940	..	190
Lamp Petrol	1,214	..	600
Various mineral oils	870	..	—
Paraffin	60	..	—
	14,384	..	4,490

To make good the deficit of 9,894 tons, Roumania had to rely on increasing the production of the mineral resources of the district of Bacau. These are:—

1. The petroliferous regions of Moinesti, Tazlau, Zemes, Solout, Stanesti.
2. The brown coal of the valley of Comanesti.
3. The salt mine of Targu-Ocna.

Unfortunately, the production of petroleum in Moldavia had always been on a small scale; the yearly output amounted to no more than 29,000 tons, or 80-90 tons a day. The coal mines had been partially abandoned, and their production had at the best period scarcely reached 12,000 tons a year, or 30-35 a day. The Targu-Ocna mine, worked by the State, the output of which was 52,000 tons a year, or 145 a day, alone offered possibilities of increased production, on account of the nature of the mine, and in view of the excellent plant. Besides the fact that these resources were inadequate, there was the handicap of a lack of boring materials and of machinery of all kinds, and there was no possibility of importing these things. In the circumstances, it is not a little remarkable that it was found possible to accelerate production, and that, as will be seen from the following table, on an extensive scale:—

PRODUCTION OF PETROLEUM AND COAL IN MOLDAVIA.

	Oil. Metric tons.	Monthly.	Coal. Metric tons.	Monthly.
1915	28,931	2,411	12,000	1,000
1916	18,312	2,616	7,000	1,000
(Jan.-July) 1917	25,800	3,686	40,600	5,800
(Jan.-July)				

On the basis of the 1915 figures this means that the production of oil for the current year will have been increased by 15,300 tons (50 per cent.), and that of coal by 55,600 tons (480 per cent.). The monthly increase as regards oil is, however, only 1,285 tons compared with 1915, and 1,080 tons as against 1916. Taking the latter figure as the basis for calculation, it is evident that the increase, good though it has been, does not go far to meet the monthly shortage of 9,894 tons. The shortage has, however, no doubt been to some extent met by the increased coal output, the remarkable figures for which constitute the best possible proof that the country has done everything that could be done with the means at her disposal.

OIL WELLS OF ROUMANIA.

At the annual meeting of the British Borneo Petroleum Syndicate last week the chairman, Mr. W. Maclachlan, stated that they had invested £7,500 in a one-half interest in the British Borneo Extension Syndicate, which owned oil lands and producing oil wells in Roumania. They were very valuable, but last year they were destroyed when it was likely they would fall into the hands of the enemy, and a claim for the cost of reinstating the wells, plant and property had been lodged with the British Foreign Office. He had little doubt it would receive reasonable and fair treatment from the Government.

The offices of the Anglo-Persian Oil Company, Limited, have been removed from Gresham House, 24, Old Broad Street, E.C.2, to Britannic House, 23, Great Winchester Street, E.C.2.

GREEK CURRANT CROP.

The Export Question.

We give below some further details regarding this year's Greek currant crop, for which we are indebted to a report of the United States Consul at Patras, Mr. A. B. Cooke, dated September 15:—

The Greek currant crop has now been entirely harvested and stored without damage from rains in any province. The weather has been unusually favourable to currant growers. Growers were fearful in the spring that the crop would suffer from the ravages of peronospora and oidium, the two great enemies to the vineyards. Fortunately, the weather was unfavourable to the development of the former, and so the crop suffered but little from that source. Oidium, however, caused considerable damage in the absence of sulphur with which to combat it; and reports from all currant-growing districts indicate that the fruit shows the effect of this disease both in quality and quantity.

Estimate of the Crop.

The crop of 1917-18 is now conservatively estimated at about 140,000 tons. There are also available at this writing 10,000 to 15,000 tons of old crop. The fruit of all districts is reported to be of medium good quality. The local market is just now very unstable, owing to great uncertainty as to how the export crop will be handled. Ocean freights are above all record. Quotations current to-day to Liverpool are 650s. per ton exclusive of insurance and war risk. Quotations current to New York are now 600s. per ton, exclusive of insurance and war risk. In the face of these freight rates and the great lack of tonnage to handle fruit even at these prices, local shippers are uncertain about negotiating for sales abroad. A report on the local market says that the British Government is negotiating for purchases of fruit up to 40,000 tons. It is stated that the Government will send here representatives to purchase fruit, which will be shipped under control of the Government and at its risk. This will leave something more than 100,000 tons of fruit to be disposed of. Shippers hope to make at least fair sales to the American market, though they are frank to say that high cost of fruit here and higher freight rates will put the Greek fruit at a great disadvantage on the American market as compared with prices of California fruit.

Local interests, however, are far from discouraged at the prospect. They state that if the foreign markets take even approximately half the crop the remainder can be disposed of on domestic markets, where there is a good demand at fair prices for wine and alcohol manufacture. The market, however, is very sluggish just now.

The privileged company has issued a printed statement of currants exported during the years 1914-15, 1915-16, and 1916-17. According to this statement, the total exports of currants from Greece for these three years were, respectively 221,859,409, 209,023,018, and 107,567,801 Venetian lbs. (1.05 English lb.).

The elected members of the Port of London Authority have co-opted Sir Charles Campbell McLeod, of the firm of McLeod, Russell and Co., to fill the vacancy caused by the resignation of Mr. George Theodore Crosfield.

EMPIRE RESOURCES.

A report recently presented to the Executive Council of the Imperial Institute summarises numerous investigations by the Institute relating to the development of Empire industry and trade.

The Department of Agriculture in Burma, which is devoting much attention to the improvement of Rangoon rice, forwarded a series of twelve varieties of rice for examination, with a view to the selection of those best suited for the British market. A report on the subject has been furnished giving the opinions of British rice millers and others as to the types of rice required in this country, and further inquiries are in progress as to the value of these various rices for brewing, manufacture of rice starch, and other industrial purposes. In continuation of efforts to encourage the production in Egypt of potatoes, recommendations have been made to the Egyptian Government as to the best variety for the purpose, and arrangements have been completed for sowing. Among other materials dealt with in the report are Egyptian drugs.

Sudan Products.

In this connection it may be mentioned that the following account of the work of the Technical Information Bureau of the Institute, as far as its activities related to the Sudan, is given in the recent report of the Central Economic Board of the Sudan Government:—

A number of inquiries on the subject of dura were received during the year, and information was supplied as to its composition, food value, and use as a poultry food. The question of the utilisation of the grain for brewing purposes was also further considered, in consultation with brewers and brewing technologists in the United Kingdom. The previous reports from brewers regarding dura were not very favourable, but the matter is considered to be worthy of further attention. A firm of brewing experts has expressed a desire to carry out large scale trials in co-operation with the Imperial Institute, and arrangements had been made at the end of the year for the shipment of a consignment from the Sudan for this purpose.

A firm of importers of tanning materials consulted the Imperial Institute on the subject of the fermentation of tanning liquors prepared from sant pods, and asked whether the difficulty could be overcome. In reply the use of the ground pods freed from seeds was suggested, and the firm were informed of the results of the examination at the Imperial Institute of a sample of this ground material from the Sudan. A sample of the powder and a small specimen of leather tanned therewith were also sent to them. The firm expressed the opinion that this ground material might command a good sale in the United Kingdom, but that the price would depend on the existing state of the market for tanning materials. They valued it at the time at about 10s. per unit per cent. of tannin, which would bring the price to about £27 per ton.

Other Sudan products regarding which information was supplied to inquirers, included senna, gum arabic and other gums and resins, colocynth seeds, dom palm seeds, beeswax, dates, lime fruit products, the cultivation of various economic plants, and Nile "sudd."

Lord Glenconner has joined the Empire Resources Development Committee.

RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

ALGERIAN VINE INDUSTRY.

Demand for Sulphate of Copper.

Owing to the present scarcity and active demand, there is an excellent market in Algeria for sulphate of copper says the United States Consul at Algiers, Mr. A. C. Frost, in a recent report. This commodity, which is extensively employed in viniculture, is normally supplied by France, and to a limited extent by Great Britain. These countries, by reason of lower transportation costs, have enjoyed a natural monopoly. The British Government last year prohibited the exportation of copper sulphate, but the Algerian authorities succeeded in securing permits for exports to Algeria. An effort has also been made, with official encouragement, to stimulate production in this country, and there is one plant now producing a certain quantity, but meeting only a very small part of the demand. Orders are now being placed, and one local dealer told this consulate that 3,000 tons could be sold here if suitable terms were obtainable.

The total imports into Algeria for the last three years for which statistics are available follow: For 1913, 3,608 metric tons; for 1914, 3,925 metric tons; and for 1915, 4,217 metric tons. The price of copper sulphate on the market of Algiers increased from 250 francs per metric ton in January, 1914, to 1,250 francs in January, 1917. Since then the market has steadily advanced, and present quotations are well over 2,000 francs per metric ton. The tariff on sulphate of copper from the United States is 3 francs per quintal or $0.26 per 100 pounds. Owing to the rapid development of wine growing in Algeria in recent years the market for copper sulphate has been constantly expanding and is likely to have a steady increase.

MOTOR SERVICE FOR MAILS IN INDIA.

The experiment was made in Madras in February of using three motor vans instead of horse vans for the conveyance of mail bags. This was the first time anything of the kind had been attempted in India, and it was so successful that it was decided to discontinue the entire horse service. Three lorries converted into vans were added to the first three, and four other vans have been brought into use. The substitution of motor vehicles for the old horse vans has, it is stated, resulted in a considerable saving to the Government, which can readily be understood as the Postal Department in Madras had to maintain a stable of forty-seven horses. The cars have also reduced the time of transit between the several offices.

GREEK TOBACCO CROP.

Early Forecasts Unfulfilled.

In view of the fact that little has so far been heard regarding the Greek tobacco crop, it may be of interest to quote a recent report of the United States Consul at Athens, Mr. Alexander W. Weddell, dealing with the outlook at the beginning of August.

"Although earlier forecasts on this year's tobacco crop were optimistic, owing to the great area planted as a direct result of the high prices prevailing last year," he says, "lack of rain during the past two months has caused a serious falling off in the probable amount of the crop, as far as an excess production was anticipated. The quality of the plants remains excellent, and very high prices are anticipated, both on account of the high level set in prices during last year and because of the fact that it is reported that several large combinations are in the field endeavouring to secure a larger proportion of the crop, and competition is expected to be keen. A rough estimate of the probable yield and prices of tobacco in the various provinces is given below:—

District.	Probable yield.	Expected prices.
	Pounds.	Per pound.
Argos	11,286,000	$0.34-$0.41
Agrinion	4,232,250	.68- .75
Domestic consumption	7,053,750	.48- .55
Thessaly-Lamia	25,393,500	.62- .68
Islands	11,286,000	.55- .68
Other sources	2,821,150	.68- 1.03

OPENINGS FOR BRITISH TRADE.

Since the outbreak of the war applications have been received at the Department of Commercial Intelligence from a large number of firms in all parts of the United Kingdom and abroad who wish to get into communication with British manufacturers or producers of various classes of goods which have previously been obtained from Germany and Austria-Hungary. Applications have been recorded during the past week for the names of manufacturers or producers of the following (among other) articles. British manufacturers or producers of these articles now in a position to supply are invited to make application for the names of the inquirers:—Chemicals—Bicarbonate of soda, borate of soda, boric acid, calcium silicide, London purple, Paris green; imitation greaseproof paper: machinery for making felt wads for use with sporting rifle cartridges; machinery for the production of clocks and parts thereof.

ENGINEERING NOTES.

The Utilisation of Peat.

War conditions have brought forward again the question of the utilisation of peat as fuel. The question is one that has received considerable attention in recent years from engineers, scientists and others. Two years ago we had occasion to deal in these columns with the subject, and to point out the wealth that is in the peat-bog. Peat bogs exist in the British Isles, and many large ones are found in several parts of Europe and the Near East, where their existence is often considered a scourge to the surrounding district. The efforts to establish peat as fuel on a commercial basis have not always been successful. That may be attributed more to the methods employed, both financial and industrial, than to anything else. However, whether for this or other reasons, all recent efforts for this purpose have been, more or less, of a sporadic nature and on a small scale; and had it not been for the war compelling every nation to consider all possible sources of home produced fuel, it is improbable that any attention would now be drawn towards the possibilities of peat bogs. Thus, we find that the Government Fuel Research Board, with the sanction of the Privy Council Committee for Scientific and Industrial Research, has appointed a committee of inquiry into the utilisation of the Irish peat deposits. The committee will investigate the experience already gained in Ireland in respect of the winning, preparation and use of peat for fuel and other purposes. It will also suggest the means to be taken to ascertain the conditions under which, in the most favourably situated localities, it can be profitably won, prepared, and used, having regard to the economic conditions of Ireland. It will specially devote itself to finding out any practical means of compressing and drying the peat. That is just the point in which many promising processes have failed; for if costly compressing and drying plant have to be erected, this, added to the labour charges for winning the peat, and the cost of transporting it after treatment, may render impossible the sale of peat fuel at a price to compete with that at which coal is sold.

Peat Fuel in Other Countries.

Some successful processes for compressing and drying peat until its specific gravity is nearly equal to that of coal are now in use in Germany, Holland, Switzerland, Hungary and America. In Holland the scarcity of coal at the present time has led to the extensive development of the peat beds, and the Dutch Government has fixed a maximum price on peat. In Canada the Government has made a very thorough investigation into the possibilities of its peat bogs, and a bog which is at present being operated produced from 700 to 1,000 tons of peat in 1914, whilst in America, according to the *Journal of the American Peat Society*, a promising plant has been experimented with in the way of a dewaterer (hydro-extractor). Its capacity is approximately 11 short tons of wet peat per hour. It operates in a wet bog, and is carried on a lighter together with a dredge and a dryer. Wet material is brought up by the dredge and placed in the hopper of the dewaterer when it passes along a conveyor into the dryer and from the dryer into a storage barge, one complete operation with 11 short tons of wet peat taking something less than half an hour. In 1 short ton of wet peat there are 200 lbs. of peat and 1,800 lbs. of water. The dewaterer extracts 1,350 lbs. of water, leaving the material in a mealy condition when it passes to the dryer, where again, of the 450 lbs. of water left, 415 lbs. of water are dried off, leaving 200 lbs. of peat with 35 lbs. of water; that is, a 15 per cent. peat. Outside the power needed for operating the entire plant will not exceed 40 horse-power, and the dryer requires 400 lbs. of coal per ton of finished product.

An Electric Plant.

Although the total cost of the finished product is not given, we think that this new American plant is more costly and complicated than the plant which utilises electricity for the purpose of releasing the water, and which, we believe, was used with success in Ireland some years ago. By this process the raw peat in a broken state is put into a large vertical cylinder perforated with an enormous number of small holes. This cylinder is set in rapid motion, and a large percentage of the water is expelled by centrifugal force. When the water has been driven out, electrodotes are inserted in the peat, which is made the medium of completing the circuit between the positive and negative points. The resistance offered by the soft peat to the passage of the electric current leads to the generation of heat, which pulverises the material into minute particles. The current breaks up the cells of the peat and reduces them to fine powder, but the powder still retains all the oils in the original peat, the electric current in no way injuring the properties of the peat. The powdered peat is passed on to a kneading apparatus, where a teasing manipulator is used to bring the mass into a plaster condition, when it can be readily concentrated in any form desired. It is next passed on to the moulder, and the material is then formed into briquettes or any other shape required. The whole operation occupies about two hours, and it was said at the time that a ton of this peat-fuel could be produced by this process for five shillings.

Motor Trade with Russia.

The Russo-British Chambers of Commerce held a preliminary meeting of members interested in the engineering trades recently, Sir Francis Baker, Chairman of the Executive Committee, presiding. The meeting proceeded to classify the engineering interests, and under the classification "G" motor-car and accessory makers were included, amongst these being the names of well-known firms of London, Birmingham, Glasgow, Oldham, Manchester, Coventry, Luton, Wolverhampton, etc.

New Automatic Inflator.

There are various forms of automatic tyre inflators, but usually these have a connection with the engine. A new inflator which has recently been brought out is designed so that it operates by frictional contact with the thread of a back tyre. To use the device a wheel is jacked up and the engine is started. This causes the jacked wheel to rotate at high speed. The friction wheel of the inflator is then pressed against the tyre. The inflator is secured to a bracket at the rear end of one of the running boards.

Agricultural Machinery in Palestine.

With the approaching liberation of Palestine and Northern Syria, the attention of British engineers manufacturers, and machinery exporters should be directed towards that fertile land of promise. Apart from their individual interest, it is their duty to do their best to secure that important market for the benefit of British industry. The liberation of the country by the efforts and great sacrifices of the British Army must be completed by the development of its resources with the help of British industry. It is generally admitted that it is very doubtful if there is a field in any part of the world offering such brilliant prospects for the exploitation of agricultural machinery and implements as does Palestine and Northern Syria. Ploughing is done with a yoke of oxen or buffaloes hitched to a wooden plough with a straight point, which merely scratches the surface of the earth to a depth of 4 or 5 ins. The harrowing is done by drawing a heavy piece of timber crossways over the ground; reaping is accomplished by hand sickling, after which the grain is threshed out by stacking the straw in a low circular pile, and driving an ox over it hitched to a flat sled with sharp stones driven into the bottom. After the straw is cut fine it is pitched in the air, permitting the wind to blow the chaff away, when the grain is gathered from the ground, always with a greater or less quantity of stones and other foreign substances. Modern methods have been introduced in some districts in recent years, but the old methods outlined above, still prevail.

Ploughs Needed.

The more important farmers, not content with their surface-scratching, native-made ploughs, are casting them aside for British, American, German, and Austrian makes of light draught, and it is a common sight to see European ploughs working side by side with the old native-made monstrosities. Before the war most of the business was in the hands of Austrian and Hungarian plough-makers, though American goods were going in fast, both through Adana and Constantinople agencies, while English ploughs were occasionally sent through Egypt or Beyrout. The English-made ploughs, when they suit the soil of that or any other Oriental district, are highly esteemed, and seldom fail to give complete satisfaction. It should be borne in mind that practically the whole of Syria consists of stony, cloggy soil, very uneven, and has only weak, inferior cattle for ploughing purposes.

Agricultural Machinery in India.

There has been remarkable progress in mechanical cultivation in the Bombay Presidency this year, and the demand for agricultural machinery, it is asserted, has never been so large as now. Attempts to utilise agricultural motor-tractors have proved beyond dispute that there will be a good market for these machines. The Agricultural Department started recently the operation of steam ploughs to work virgin land, and we learn that several concerns have lately been formed to import tractors to work on a co-operative basis. As the soil is heavy, the demand will be chiefly for powerful tractors. On all farms belonging to the Department of Agriculture improved implements can be bought or hired, and it has now a large number of depots at which implements are kept for sale or hire, and spare parts are stocked. Each year the number of such depots is increased. So many implements are now bought direct from dealers by agricultural associations, co-operative societies, and by individuals, that it is not possible to compute the number sold annually, but taking only a few of the places in the Bombay Presidency at which such implements are available, it is found that sales amounted to 69,100 rupees, and charges for hiring to 2,750 rupees in 1916. Instruction in engine driving is being given at the workshop of the College Farm of the Department of Agriculture, and everything possible is being done to overcome the initial difficulties which must occur when inexperienced people take to the use of machinery.

RECONSTRUCTION.

Control of Imports and Exports.

The text has been issued of a Bill, introduced by Sir Albert Stanley, dealing with the temporary control of imports and exports after the war. It is stated in a memorandum that the effect of the measure will be to simplify and continue for a period of three years after the termination of the war the powers exercised during the war as regards the control of imports and exports. Otherwise, these powers would to a great extent lapse as soon as a state of war ceases to exist. It is pointed out that the restriction of imports and exports is in practice, subject in all cases to any licence which may be granted.

SUBMARINE WARFARE.

The Admiralty has issued the following return of arrivals, sailings, war losses, and unsuccessful attacks for the week ended November 18, 3 p.m. :—

Arrivals and sailings of merchant vessels of all nationalities (over 100 tons net) at and from United Kingdom ports (exclusive of fishing and local craft) :—

Arrivals	2,531
Sailings	2,463

British merchant vessels sunk by mine or submarine :—

1,600 tons gross or over	10
Under 1,600 tons gross	7
British merchant vessels unsuccessfully attacked by submarines	2
British fishing vessels sunk	0

In the report for the week ended November 11 six British merchantmen were reported sunk, only one of them being over 1,600 tons.

HAIN STEAMSHIP COMPANY.

P. and O. Offer.

A letter has been received by shareholders in the Hain Steamship Company from the managers stating, with reference to the offer of the Peninsular and Oriental Steam Navigation Company and the British India Steam Navigation Company for the purchase of shares, that they have already received authority from the holders of upwards of 85 per cent. to accept the offer. The managers have therefore accepted the offer on behalf of those shareholders from whom they have received the necessary authority.

EMPIRE DEVELOPMENT OR TAXATION?

The interim report of the Select Committee on National Expenditure was the subject of comment at a recent meeting of the Empire Resources Development Committee. The report affirms that even if the present rate of expenditure does not increase, and if the amount met from revenue proves to be in accordance with the estimate for 1917-18, each six months of the war will now necessitate a gross addition to the debt of about £1,000,000,000, or a net addition of about £750,000,000, if advances to the Allies and Dominions remain at their present level and are deducted from the gross debt.

The Empire Resources Development Committee holds that, in view of these disquieting figures, its policy of paying off the debt by the development "by the State for the State" of the Empire's vast resources, rather than by burdensome increments of taxation, should command the immediate attention of the authorities.

Mr. T. H. Marsden has been elected a director of the Land and Mortgage Company of Egypt in place of Mr. R. A. Huri, deceased.

LANCASHIRE COTTON.

Still Higher Prices.

(From Our Own Correspondent.)

Manchester, Wednesday.

A further upward movement in prices in the market has again to be recorded, and rates in yarn and cloth continue to advance quite irrespective of raw cotton quotations. Producers have now a distinct advantage over buyers, and in several sections there is a scramble to get hold of supplies. Rather more encouraging advices have been received relating to the outlook for American cotton supplies to this country, and the Government has promised increased shipping facilities during December compared with this month. There is no setback to the healthy prospects for the Egyptian growth, and a much larger production compared with last year is assured. There have been rumours that the Control Board is about to restrict the output of Egyptian yarns to 80 per cent., but no definite decision has yet been reached. The demand in both carded and combed qualities has been healthy, the turnover being of substantial dimensions. The scarcity of American yarns is resulting in a run on the coarser counts of Bolton spinnings, and producers of numbers about 60's are in a much stronger position than a few weeks ago. A considerable inquiry has again been dealt with in cloth for Egypt. Goods suitable for printing and dyeing have moved off freely, with occasional sales in sized materials. There seems to be the possibility of increased facilities for exporting in the near future. An active demand has been reported in miscellaneous fabrics for India, but comparatively little has been done in grey staples. Only odd lots have been put through for China. The home trade continues busy. American yarns have again been dearer, with an encouraging offtake at record prices. A few more offers have been met with in bundles for India, but not much has been done. Business for France keeps up well.

COMPANY REPORTS.

Egyptian Hotels, Limited.

The report of the Egyptian Hotels, Limited, for the year ending April 30, 1917, states that after charging all expenses in connection with the working of the hotels, the profits were £11,598 16s. 11d., as compared with £29,000 15s. 1d. for 1916, and £6,284 17s. 5d. in 1915. After providing for charges payable in London and Cairo the accounts show a profit of £9,754 10s. 11d.; the balance of undivided profit brought forward from last accounts is £4,350 13s. 4d., making a total £14,105 4s. 3d.; from this has to be deducted debenture interest, £3,541; one-fifth of the debenture expenses, reducing the balance carried forward on this account to £575, £574 19s. 10d.; depreciation of plant, fixtures and fittings at hotels, £5,076 16s. 3d.; and reserve for doubtful debts, £981 17s. 9d., leaving an available balance to be carried forward of £3,930 10s. 5d. Since the close of the company's financial year the business of Shepheard's Hotel has shown a considerable increase. Mr. J. J. Hug resigned his seat on the board of directors and the directors have for the past financial year reduced the amount divisible amongst them by way of fees by the proportion of remuneration previously paid yearly to Mr. Hug, but which has not been drawn by him during the financial year. The director retiring is Lord Claud Hamilton, who offers himself for re-election.

COMPANY NOTES.

Dividends, Payments, etc.

Egyptian Hotels.—The twentieth annual meeting will be held at the registered offices, 11, Ironmonger Lane, E.C., on November 27, at 2.30 p.m. The share transfer books will be closed from November 20 to 30, inclusive.

The directors of the Indian and General Investment Trust have declared an interim dividend for the six months ended October 31 last on the deferred stock at the rate of 8 per cent. per annum, payable 12th proximo.

The directors of the Assam Company announce a bonus of 10 per cent., or £2 per share, less tax, payable December 20, making 25 per cent. for the 1916 crop.

The directors of the Anglo-Persian Oil Company intimate a dividend of 6 per cent. for the year on the ordinary and 2 per cent. actual on the participating preference, making the preference dividend 8 per cent. This is the first time preference holders have received more than the stipulated 6 per cent.

Bengal-Nagpur Railway.—The register of members will be closed from December 6 to 31 inclusive. Dividend warrants will be posted January 1.

Oil Outputs.

Anglo-Egyptian. — Gemsah, production week, 19 tons (previous week 21 tons); Hurgada, 3,419 tons, against 3,135 tons.

North Caucasian.—Week ended November 6, 497,847 poods (or 8,029 tons).

Ural Caspian.—Week ended October 11, 143,323 poods (2,312 tons). Week ended October 18, 129,775 poods (2,093 tons). Week ended October 25, 150,515 poods (4,428 tons). Week ended November 1, 148,435 poods (2,394 tons).

SUEZ CANAL RECEIPTS.

The traffic receipts for the Suez Canal were as follows on the undermentioned dates:—

	1916. Francs.	1917. Francs.
November 17, 18.....	480,000	330,000

BUYERS' GUIDE.

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Avenue, Wednesday.

Our market has been rather quieter this week in sympathy with the general trend of things on the Stock Exchange, due no doubt to the continued bad news from Russia, and to the critical state of affairs on the Italian front. On the other hand, a good undertone has continued to prevail, consequent upon the very satisfactory reports constantly being received from Egypt.

In Government stocks Egyptian Unifieds, after some business at 83¾, have been in demand round 83½, but the great scarcity of sellers has restricted business. Egyptian 3½ per cent. preferences are also rather firmer round 72. In Bank shares, whilst Anglo-Egyptians are ⅛ up at 14⅝, both Agriculturals and Nationals are rather easier, the former being 3-16 lower at 6 1-16, and the latter ¼ down at 16⅞.

In Land shares Allotments have been dealt in to the extent of a few hundred shares round 3⅜, and a large business has been done in New Egyptians, for the most part at the slightly improved price of 15s. 4½d. Behéras, which changed hands at 13⅛ earlier in the week, have since been rather quieter, with a seller at about 13. Delta Lands have been done round 13s. 9d., and Sidi Salems are unchanged at 21s. 3d., after business as high as 22s. 6d. to 23s. Union Foncières are also 1-32 easier at 2 3-32. In United Egyptian Lands there have been some trifling transactions under 1s., but there are biggish buyers at the latter price.

In Miscellaneous shares there has been a fair demand, with a good deal of business for Egyptian Markets round 27s. 6d. Salts and Sodas, which had gone back to 34s., have again begun to improve, and are closing only 6d. easier at 34s. 6d. Khedivial Mails have continued to be quietly picked up, and are closing 1s. 3d. higher at 39s. 3d.

In Greek stocks, Rentes, Larissas and 1914's are all about ½ down. There has been rather more business doing in this market than for some time past, owing to small sellers having come along at prices which it has suited Greek buyers to pay.

Paris Bourse.

Closing quotations included:—Egyptian Unified, 92; Turkish Unified, 59.50; Credit Foncier Egyptian, 760; Suez Canal shares, 4,650.

Oil Shares.

Price showed a stable tendency. Anglo-Egyptians (B.), and Roumanian Consols were unchanged, and in other divisions of the market slight rises were recorded.

A NEW INDIAN BANK.

Under the title of the "Tata Industrial Bank" it is reported that a new Indian industrial bank has just been established at Bombay. The authorised capital is Rs.600,00,000, or £4,000,000, of which Rs.250,00,000 is paid up. The bank will conduct all ordinary and exchange business, while giving special attention to the development of existing and new industries, underwriting debentures, etc. It will have an expert intelligence section, scientific and commercial, to report on the schemes brought to its notice.

BRITISH INDUSTRIES FAIR.

As certain trade associations connected with trades eligible to participate in the British Industries Fair, 1918, have until recently been unable to hold meetings to discuss concerted participation, and in order to suit the convenience of a section of the trade Press, the Board of Trade have decided to extend the final date for the receipt of applications for space until November 30.

The difficulties of organisation due to the war make it of the highest importance, however, that all applications should be sent in to the Director, British Industries Fair, 10, Basinghall Street, London, E.C.2, at the earliest possible moment.

The applications for space so far received from manufacturers point to the coming fair being greatly increased both in size and importance.

Shipowners of the Piræus have decided to grant the Greek Government a loan on the security of the taxation on extra war profits.

NEWS FROM ALL SOURCES.

Greece has recently adopted the 24-hour time system, thus bringing Greek railway and steamship schedules into line with the Continental systems. The day begins at midnight, and the hours run consecutively to 24 o'clock.

Up to November 10, Indian Treasury bills have been sold to the following amounts:—

	Rupees.
6 months bills.....face value	8,85,00,000
9 months bills.....face value	2,76,30,900
12 months bills.....face value	14,75,000
Total.....	11,76,05,000

Equal at 1s. 5d. the rupee to £8,330,400.

Sir John Ellerman, Bart., has informed the committee of the hospital for officers at Regent's Park, N.W., which bears his name, that he will defray the cost of the hospital for another year from December 31, or for four months after the declaration of peace, if that date should be earlier.

The City Local Tribunal on Wednesday afternoon passed a resolution of sympathy with the family of Major Evelyn de Rothschild, the second son of Mr. Leopold de Rothschild, and brother of the Chief National Service Representative for the City of London.

Sir Richard Vassar Smith, chairman of Lloyds Bank, has been elected President of the Federation of British Industries for the forthcoming year, in succession to Mr. F. Dudley Docker, C.B.

NOTES OF THE WEEK.

The rapidity of the advance on the Palestine front has naturally not been maintained during the past week, and it was expected that the Turks would make a stand before Jerusalem, as proves to be the case. The length and strength of their resistance remain to be gauged; if the pessimistic comments in the German Press on this campaign are well founded, the capital should soon be in our hands. It would be unwise to anticipate the success until it is actually announced, but the progress of the British advance has already led to some pleasant recriminations between Turks and Germans. An article by the Constantinople correspondent of the *Vossische Zeitung* (the maiden aunt of the Prussian Press), admits that in an official sense it may be possible to speak of good relations between Berlin and Constantinople, but this understanding is liable to fluctuations, and at the present moment it is only of a moderate character. "Endless campaigns must not be counted on"—a paraphrase for saying that Turkey is tired of the war. Talaat's power is increasing while that of Enver is declining, continues the correspondent, which is not difficult to understand, since Enver banked everything on military success.

Talaat is said to have remarked that Turkey's real war aim is independence, and therefore she must also achieve independence *vis-à-vis* her allies—a cynical truth which will be understood in every Foreign Office. "Anyone who hopes for preference in tariff and economic questions has misunderstood Turkey's most earnest war aim"—a clear hit at the German policy of loans against economic treaties. The correspondent also says that Turkish-German unity will not be established by "friendship institutes"—we know that cheap method of German propaganda here also—but with blood and gold.

It would, of course, be foolish to pay too much attention to an article by a single correspondent, of whose mentality and digestion we are ignorant. It is essentially a plea for help, and it would be ridiculous not to recognise that Germany has helped her allies before, and may help them again, if she has the power. Now it is notorious that she has withdrawn men from the Russian front, and sent them to serve against France and Italy, and it may be that she is now reducing the strength of her line still further in order to send a contingent to Palestine. In any event, the stagnation on the Eastern front eases the demands on her munition factories for the European armies, and to that extent directly assists Turkey's munitionment. Apparently, when she has done all she can, she is still reckoned an unprofitable master. It is not for us to complain when rogues fall out.

The appointment of General Sir William Marshall to succeed the late Sir Stanley Maude in Mesopotamia is generally accepted in Service circles as the best that could have been made. The new commander is thoroughly familiar with the ground and the plan of campaign, as he has been associated with General Maude in his brilliant series of successes. England confidently looks to see him achieve fresh laurels for our armies on the Tigris.

The publication of the Russian secret treaties by the Leninites has produced no skeletons in the Allied cupboard, nobody is a penny the worse, and the promised revelations have fallen as flat as a German Chancellor crisis. We know what we knew before—that Russia wanted Constantinople, and that there was friction between Italy and the Jugoslavs; the revolutionaries might as well have told us that the earth is round and the sun is hot. There are no sticks with which to beat England such as Germany desired; for that reason, perhaps, Germany has invented one. The report has been spread that King Edward promised Austria a free hand in the Balkans, if the late Emperor would desert Germany, and that Francis II. indignantly refused. It is a very poor invention, that does no credit to the Munchausens of Berlin. King Edward did not meet the Emperor in the year named for the conversation, and he was far too well acquainted with European politics in general, and Balkan politics in particular, for such an idea to enter his head.

The position in Russia, which continues to go from bad to worse, is prejudicially affecting the whole situation in the Balkans. Russia has made an offer of peace, and is beginning to demobilise: there is little doubt that Germany will accept it willingly, and Austria joyfully, if Lenin can maintain himself. But the postulate is a dubious one. The Maximalists may be overturned any day, and with them vanishes the dishonourable project of a separate peace. Even if they maintain themselves, they have no power in the south, where Kaledin controls the Cossacks, the Army, and the food supply. As he will have nothing to do with peace, the Maximalists have to seduce or conquer him before their offer to Berlin becomes effective; but there seems little prospect of their succeeding against his determination.

Digitized by Google

His stubborn attitude is, of course, of value not only for the Allies as a whole, but particularly for Roumania, since his forces act as a shield for Roumania, and also inspire the hope that the position may yet right itself in Russia. The upshot of the civil war in Petrograd and Moscow is not yet certain, but it cannot be said that the language of the Lenin proclamations impresses one with any sense that this person is securely seated in power, nor does the proposal for another Stockholm conference inspire one with emotion. It has evidently been conveyed to Lenin that what Germany wants is not a separate, but a general peace; hence the revival of Stockholm. But the scheme is hate's labour lost; the Western Allies have made it perfectly clear that they will neither consider peace nor recognise the Leninite Government, and the United States are entirely with us in this respect.

If Germany succeeded in even a separate peace, it would undeniably make matters very difficult in the Balkans. The liberation of her prisoners in Russia would provide her with a new army, which would neutralise for a time the renewed Allied efforts. That army would certainly not be able to break through on the Western front—that is impregnable, as Mr. Lloyd George has reminded us, although General Byng's victory shows that the impregnability is on the British and not on the German side—but it would be a useful asset for Germany against either Roumania or Greece. M. Repoulis, the Acting Premier of Greece, in commenting on the probability of German action in the Balkans, to which M. Venizelos made reference in London last week, remarked, "We do not know whether and when the Germans will be able to act. I can only tell you that the Greek Government is proceeding with war preparations in the quickest possible way." That is the right spirit; and it will, of course, not have been forgotten in Athens that King Constantine's demands to be restored will lose nothing of their urgency from Switzerland. He has done a great deal for Germany, and there is no doubt that the Kaiser has pledged himself to give "the husband of my sister" his throne again with all convenient speed.

The announcement that a meeting is to be held on neutral territory between British and Turkish agents to discuss the question of prisoners will be welcomed in many quarters, particularly among those who have relatives in that unfortunate position. We hope that the proceedings will be attended with every success; if goodwill is present on both sides, the matter should not be very difficult of arrangement. Nor is there any reason why a similar conference should not take place with regard to our prisoners in Bulgarian hands, who seem to have been rather overlooked, no doubt because they are less numerous.

The procedure at these conferences, it is understood, is extremely rigid and formal. British and enemy delegates enter by opposite doors, a formal bow is made on either side, the business is then conducted under the chairmanship of a neutral, through whom every suggestion is passed. The business concluded, the delegates rise, another formal bow is exchanged, and they then retire by their respective doors. No social intercourse whatever passes between the two sides, and no matters are discussed other than those, so to speak, on the agenda.

Lord Lansdowne's remarkable letter in the *Daily Telegraph* of Thursday will certainly cause wide and not very favourable comment. He does not actually plead for a peace by negotiation, but he comes near to suggesting it. He confesses himself reluctant to enforce the economic boycott or the Paris Resolutions—he has always been inclined to Free Trade views—he wishes to negotiate about the freedom of the seas (which means something entirely different in Berlin from any conceivable definition either in Downing Street or Lansdowne House), and he would like a declaration that Germany is to be left a great Power, and that a League of Nations should be formed. Apparently Germany would be admitted to membership of the League.

The letter is even more remarkable for what it omits. It says no word of territorial restitution. It ignores Belgium and Northern France, Serbia, Roumania, and Montenegro. No doubt this is unintentional, but it leaves an unfortunate impression, and Lord Lansdowne is too old a statesman not to know that he will be judged as much by what he leaves out as by what he puts in his public utterances. The letter will almost certainly be reproduced *in extenso* in Germany, and the fact that an English politician in the front rank can write without condemning submarine war, or the atrocities, and without mentioning the oppressed nationalities which it is our intention to release, will be used by Baron Kühlmann as an indication that his peace "atmosphere" is spreading. Quite undesignedly, no doubt, the effect of the letter will be to encourage the enemy. We prefer President Wilson's direct language as to the danger of the Baghdad Railway, and so will most Englishmen. It is curious that Lord Lansdowne, who saw the danger of that scheme when he was Foreign Secretary in 1903, should be less awake to it in 1917. In the former case he was in advance of most of his countrymen; in the latter he drags considerably behind.

Lord Morley's "Recollections," which have just been published, contain a few references to Near Eastern matters. In Balkan affairs, as such, he clearly took no interest, but his official duties at the India Office brought him into touch with Persian Gulf and Baghdad Railway problems. As to these his standpoint was a simple one. He always regretted that England refused the proffered deal of 1903, and once refers to this as a "fatal" decision; he also had some talk, during his period of office, with German Ministers and once with the Emperor himself (at the time of King Edward's funeral) on the question. No hint is given in his letters to Lord Minto, which Lord Morley reprints, as to the amount of ground covered or his own attitude. But it may be surmised that nothing more than a preliminary sounding took place on the Kaiser's part, as the actual negotiations over the Baghdad Railway took place two years later, by which time Lord Morley was no longer at the India Office and the Agadir crisis had occurred. As to his actual attitude, other pages of the autobiography make it clear. It was that of the simple reactionary, who is against all accessions of territory or political influence on general principles.

He writes again and again to Lord Minto, who was by no means a very bellicose person, dwelling with almost shuddering insistence on the evil of frontier entanglements, quarrels, wars; and once he even implores his Viceroy to read the Sermon on the Mount—an irresistibly comic touch from the stern agnostic. Lord Morley's attitude towards India itself is summed up in the words that we must strive to give India the spirit, although it is clearly impossible to give the letter, of English institutions—an admirable counsel in itself. But it is somewhat vitiated by his persistent misunderstanding of the I.C.S., whose members seem throughout to be regarded as the embodiment of official folly. Hardly ever does he give a grudging word of praise to their work, but he continually speaks of them as Tchinovniks, a sufficient indication of his prejudice. On the other hand, when Lord Minto hints that the real danger to India is the House of Commons, Lord Morley throws up his hands in horror; he simply cannot believe it.

The Kaiser makes his appearance in these memoirs, bluffly assuring Lord Morley that British rule in India would last for ever; on which the brief comment of Lord Roberts was that the Kaiser evidently knew little about India. Probably the German Emperor, who clearly fascinated Lord Morley, simply thought it the civil thing to say, and hardly expected to be taken so seriously.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 26.

The Sultan at Al Azhar.

The Sultan paid his first visit to Al Azhar University on Sunday last. He was accompanied by the Prime Minister, and on his way drove through the native quarters, where he was warmly greeted by the people. He was received at the Mosque by the Ministers, the Chancellor, the Grand Mufti, and the Ulema, and stayed quite a long time inspecting the classes and talking to the students. Before he left, his Highness announced that he had given the sum of £E1,000 to be distributed amongst the students. On the previous afternoon an interesting ceremony took place at Abdin Palace, when the new Chancellor of Al Azhar, Sheikh Mohamed Abul Fadl, was clothed in the presence of the Sultan with the special robe of honour which is always conferred on holders of that post on their appointment.

"Our Day" in Egypt.

Subscriptions to "Our Day" are still rolling in, and the amount subscribed already considerably exceeds the figure (£E118,000) given last week as the total received up to then. This unprecedented result of the appeal is, undoubtedly, due to the spirit of co-operation which has characterised all the efforts to raise money. As mentioned last week, no pressure of any description has been put upon any element of the population, yet all have contributed their share. Especially should mention be made of the liberal gift of £E500 by Sultan Fuad, and of the extraordinary manner in which the rank and file of the forces at present in Egypt have subscribed, in itself a testimony of the opinion the Army has of the work of the Red Cross. In addition, all the Churches (Western and Eastern) most generously joined with the Anglican community and collected subscriptions on the Sunday preceding "Our Day." A prominent feature was the amount collected by the ladies of the British community, who took up their stations with collecting-boxes at the principal establishments in town, and canvassed all arrivals most indefatigably for subscriptions. Finally, it is to be noted that this record amount has been obtained without the assistance of any of the fêtes which had been organised the previous two years. This year, owing to the circumstances, it was decided to dispense with these features, and yet the result has surpassed not only all expectations, but also all records. All those who had any share in the organisation of "Our Day" in Egypt deserve hearty congratulations for the splendid success which has attended their efforts.

The Egyptian Auxiliary Services.

A decree has been issued this week modifying in certain respects the decree of November 4, 1902, laying down the conditions under which recruiting for the Egyptian Army and Marine is to be carried out. The new decree enacts that all persons liable for military service, excepting those who are liable to be called up during the next three months for medical examination, who are included in the ballot of 1917 or who are liable to be enlisted for a period of six years for the commission of an offence under the Recruiting Law, shall be exempt from the obligation to such service, if they shall enlist in and serve for a continuous period of one year with the Egyptian Labour Corps, the Camel Transport Corps, or any auxiliary service attached to H.M.'s Forces and recognized by order of the Minister of War.

The publication of this decree caused the most fantastic rumours to come into circulation, amongst them being the statement that this was merely the thin end of the wedge, and that the next step would be the conscription of every able-bodied man who could be spared from the land for service in the auxiliary corps. The object of this decree is, however, clearly stated in the preamble, viz., that it is necessary in the interests of the country to encourage voluntary enlistment in the services mentioned, while safeguarding the supply of recruits for the Egyptian Army. The work of the auxiliary services, which have so notably proved their value, is likely in the near future to become very much more extended than it has been in the past, and a greater number of men will be required. It was recognised that, whilst something must be done to attract recruits in sufficient numbers, at the same time some privilege should attach to such voluntary enlistment, and by granting exemption from the obligatory three years' service in the Egyptian Army in return for one year with one or other of the auxiliary services, it is thought and hoped that both ends will be attained. There is nothing behind this measure; it merely represents the desire to increase the strength of the auxiliary services up to its required limit and to offer the recruits some special privilege.

The Fuel Question.

From time to time reference has been made in these letters to experiments which were being carried out under Government auspices with the object of ascertaining whether any substitute for coal could be made out of the vegetable refuse remaining over after the various crops have been harvested. These experiments have been in progress for about two years now, and Mr. John F. Wells, at one time Inspector-General of Mines in this country, who has been conducting them, has at last been able to give Egypt the first fruits of his labours. He has evolved a scheme whereby gas can be made out of the vegetable matter in question, for use in engines using anthracite coal, and the Egyptian Government has arranged to put the details of this scheme at the disposal of all owners of engines free of any charge. A notice has been issued by the Ministry of Finance advising engine-owners that they can obtain full particulars and copies of the plans on application to Mr. Wells, who will demonstrate the working of the apparatus to them at his research works in Shubra. Owners, however, must employ their own engineers to carry out the work under their own responsibility. The gift of this scheme to engine-owners will be a veritable boon to them, for they were being hard put to it to find fuel, and were forced to pay enormous prices for what they were able to obtain. This scheme should result in a substantial reduction in the cost of working their engines, and it is not surprising to learn that Mr. Wells has been literally snowed under by applications from people wishing to take advantage of the offer. It is to be hoped that other results of Mr. Wells' experiments will be made public soon, and that they will, where possible, be placed at the disposal of the population.

Closely connected with the fuel question is that of lighting. A new circular has just been issued by the Government calling upon the general public to exercise the utmost economy in the consumption of fuel and in the use of electric light and gas, and announcing that in connection with the latter it has arranged with the companies holding the monopoly to waive their right to charge for a minimum annual consumption whether the quantity had been consumed or not. Thus consumers will from now onwards pay merely for what they consume. There is, therefore, every possibility that a considerable reduction in the consumption of electric light and gas will result; for whilst everybody was prepared to sacrifice himself or herself and put up with some inconvenience for the public good, it was exceedingly galling to know that economy might mean the burning of less coal, but that at the same time it spelt directly more profit to the companies concerned, and there is no doubt that many refused to reduce their consumption for the very reason that they objected to inflating the already substantial profits of these monopoly companies. The Government has done exceedingly wisely in prevailing on the latter to suspend the application of the minimum clause, and it is to be hoped that when things return to normal again, and that clause is once more put into force, it will see that the minimum is based on the reduced rate for electric light established some three years ago, and that it is not continued on the basis of the old and higher one, as has been the case up to now.

ROUMANIAN NOTES.

(From a Correspondent.)

"Embusques."

The needs of the Army, and the strain imposed by the war upon the population at large, have produced in Roumania, as elsewhere, a strong demand for the purification of the services behind the lines of young officers, placed and kept there by influential friends. Jassy especially was a regular nursery for such young, well-fed, and smartly-dressed officers, many of whom had never seen the battle-field, and all of whom were unhesitatingly enthusiastic about the achievements of "their" army. The new Minister of War, General Iancovescu, put a quick end to that state of affairs. Five hundred officers belonging to various services have been already sent to the front, the position of the remaining officers is being carefully investigated, and a decision of the Cabinet has provided that all officers, unless physically incapacitated, must go through a period of service at the front.

American Assistance.

The United States Red Cross Organisation has sent to Roumania twelve doctors and twelve nurses, together with a large quantity of sanitary material and food. Original is the fact that this mission is accompanied by a variety of specialists of standing—as, for instance, an engineer, an expert in social work, a politician well known for his organising ability, etc.

The Deficiency of Live Stock.

Interesting data have been published with regard to the serious diminution in Roumanian live-stock. The position is a serious one, because the main industry of the country (agriculture) will be fatally hampered unless the deficiency can be made good in time, because none of the other countries, belligerents or neutrals, will be in a position to export live-stock for a certain period after the war.

Horses.—Before the war Roumania possessed 1,218,563 horses. At the end of 1916 there remained in Moldavia 115,632 horses, and supposing that, at the best, 10 per cent. of the horses in occupied territory will be recovered, there will be a diminution of 947,463 in the total number, representing a minimum value of £11,500,000 Steps are being taken in order to find out from where breeding horses can be bought after the war, but it is considered that at least four times the value of the lost material will have to be paid, if indeed it will be possible to buy any horses at all.

Cattle.—According to a census taken on April 1, 1916, there were then in Roumania 2,937,877 head of cattle, of which Moldavia possessed 925,076. At the end of 1916 only 706,496 remained in Moldavia, a number which undoubtedly has since been considerably reduced; and, calculating on the same basis as above, there results a deficiency of 2,010,100 head of cattle, representing a minimum value of £16,000,000. It must be remembered in this connection that the peasant is largely dependent upon his cattle, not only for food, but especially for agricultural work—ploughing being generally carried out with teams of oxen—for the transport of his products over the rough Roumanian roads, and of the fuel and building material which he usually cuts himself in the nearest woods.

A similar situation prevails with regard to sheep, etc., and pigs, of which every peasant used to possess at least one or two, have disappeared almost completely.

Occupied Territory.

I have secured at last a copy of the *Gazeta Bucurastilor*, the chief paper now appearing in Bucharest, which is being edited and printed at the old offices of the *Adevarul*. One expected to find a publication heavily, though intelligently, censored; one discovered a rag which beats even the Tirpitz Press for its Pan-Germanism and for the abusive way in which it deals with the heads of the Jassy Government, from the King downwards. How the German authorities can possibly think that such kind of literature can gain for them the favour of the native population is hard to understand. But German activities often are hard to understand. No military news or *communiqués*, with the exception of those of the Central Powers, are published. Nor is there any other news except that gratuitously supplied by the German Wireless and by Wolff's Bureau. There is but one piece of interesting information, suggestive as to the ways in which the native population is handled, and of the kind of life the German military lead:

"Fines.—Twenty-one persons have been fined sums ranging from 30 to 60 lei for having allowed their dogs to go about free.

"A cab-driver was fined 50 lei for asking more than he was entitled to by the tariff.

"Four cab-owners have each been fined 30 lei for having arrived late at the cab-rank.

"Four cab-owners have each been fined 100 lei for failing to appear before the authority charged with the control of public vehicles.

"Three restaurant owners were fined 500 lei each for keeping their premises open and serving military after the appointed closing-time. They lost the right of closing later than other establishments, and their restaurants are not to be frequented any more by military."

ABYSSINIAN NEWS.

Since the last battle between the troops of the new Abyssinian Government and those of the dethroned Negus Jassu, nothing definite has been learned about the latter. It is still uncertain whether he is dead or alive, for conflicting rumours are current on the subject. The prevailing opinion, however, is that he did not take part in that engagement, but kept at a safe distance, not being confident of the issue.

It is expected that the Government will shortly issue a *communiqué* stating the true facts of the case. Even details of the fight were lacking for two months after it took place, owing to the torrential rains in the interior, which rendered communications most difficult. The rainy season, however, is approaching its end, and it will not be long before some of the tribes in that region will begin to flock to the capital, and from them a full and authentic account will be had.

According to one account, the Minister of War immediately after the battle proceeded to Jebel Magdala, where Jassu had taken up his residence and where one of his leaders still held out. The War Minister is now said to be in possession of half of this place. Jassu has lost his two chief leaders, Ras Amru Fiturari and Sarabthu, the first being killed and the second dying from wounds received in fighting.

THE BRITISH SCHOOL AT ATHENS.

There is a certain melancholy pleasure in reading, in the midst of war, of the purely peaceful activities of the æsthete, yet more, of the antiquarian, who works, after all, for the world, past, present, and future, and not merely for himself! The emotion is enhanced where ancient and modern Greece are concerned. Imagine Gallipoli, Salonika, Constantinople, Venizelos echoing, so to speak, around the Acropolis; and the British School of Athens continuing, unperturbed, its researches into the followers of Praxitiles, Byzantine music rhythms, the Bektashi, Petworth House, and the like. With this, too, it has given its quota to the war. Five students have fallen, and one of them—Guy Dickens—is the author of the first article in the Annual now published—a very excellent and discriminating discourse on the Praxitilean school; another, Roger Heath, contributed the second item, an admirably impromptu rendering of a charming little modern Greek poem.

The Annual—though it really covers 1914 to 1916 inclusive—is of profound interest, chiefly, of course, to "specialists"; but it is worth noting that modern Greece (we mean "modern" as relative to "ancient") has a prominent place. Such investigations have a definite practical value towards the understanding of the complexities of the Balkan Peninsula and the Turkish and other influences prevalent.

It is on the strength of its being very much alive in the present and not merely living in the past that the British School at Athens occupies a special position in the life of the country, and that many of those who have been associated with it have been able to fill such useful rôles at this time. Many romances are hidden within the pages of the Annual, apart from those that might be written round the Roll of Honour. Experts may differ whether a certain head is Praxitilean or post-Praxitilean; but the story of its experiences merely from the date of its discovery, say, near Ephesus, or in Athens itself within a few hundred yards of the King's Palace, to its appearance in the Boston Museum, would entail, in view of the embargo on the export of antiquities, a disquisition less learned, perhaps, but one of considerable human interest.

PHRASE BOOK for OFFICERS and MEN

FRENCH SELF-TAUGHT

For learning the Language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road, and Sea, Cycling, Motoring, Post, Telegraph, Health, Human Body, Food, Fruits, and Drink, etc. Commercial, NAVAL and MILITARY Terms. Conversation, so arranged that they may be learned AT A GLANCE, with ENGLISH PHONETIC PRONUNCIATION. Tables of Money with Illustration of Coinage, Weights and Measures.

Red Cloth, 2/- net.; Blue Wrapper, 1/3 net. Postage, 2d. extra.

French Self-Taught, Grammar and Key.

Green Cloth. 316 pp., 4/- net. Postage 4d. extra.

Sold by all BOOKSELLERS. Write for Prospectus and Catalogue No. 25.

THE ADVANCE INTO THE MOUNTAINS OF JUDÆA.

With the capture of the maritime plains around Ramleh and Lydda a new phase of warfare begins; the contest is carried into the mountains. Jerusalem lies on the central plateau of Judæa 2,450 ft. above sea level and 3,700 ft. above the Dead Sea to its east. The approaches of Jerusalem have always been formidable when defended by a brave and desperate foe, nature having provided the Holy City with natural defences of extraordinary strength. The mountain barrier is rugged, but there are four great passes which lead from the western plains to the central plateau. Two are historical battle sites; the other two have become important in consequence of modern conditions. Thus the Wady es Surar—described last week—has an importance never obtained in any previous war, because up its southern branch runs the Jaffa-Jerusalem Railway. The gorge is, however, so deep and narrow that before the railway could be of use to us the lofty mountains on each side would necessarily have to be cleared. We hold the line out in the plains and probably for some distance into the hill country, but inland our first seizure of the railway appears to have been on the 26th at Bettir. This is the next station to Jerusalem itself, and the site long years ago of one of the great Jewish tragedies. On the hill close to the modern village is Khirbet el-Yehud, "the ruin of the Jews," the site of Bethar, where the last followers of Bar Cochba withstood a three-years' seige by the Romans, and were finally massacred (A.D. 135) in such numbers that the place, it is stated, ran with torrents of blood. It was as I remember it a peaceful and charming spot, a favourite place for picnics from Jerusalem, from which in the spring months the children would return by the evening train laden with flowers from the hills around.

The second of these passes of modern importance is the Wady Ali, the narrow pass by which the Jerusalem-Jaffa road runs upwards into the mountains. The entrance into the pass is at Bab el Wad (lit. "The Gate of the Valley"), a narrow entrance between commanding hills which, report says, have long been powerfully fortified. After a steep and narrow ascent the road enters more open ground about Saris, and thence runs to Kuriet el Enab, a village more commonly known as Abu Ghosh, after a cut-throat bandit sheikh of the village, who a century ago, besides terrorising the villages around, used to rob pilgrims on their way to Jerusalem. The Crusaders considered this place the site of Kirjath-Jearim, but on no solid grounds, and built here a church the ruins of which have recently been restored by the Benedictines. We learn that this important point was carried at the point of the bayonet on November 19, thus cutting the carriage road. Probably our troops reached this road, not by the Wady Ali, but by the next route. From Kuriet el Enab the road runs down to the little valley of Dilb, then ascends in a zigzag course, and plunges down the steep sides of the Wady Beit Hanina (the northern arm of the Wady es Surar) to the little village—with its Jewish settlement—known as Kulonia (once a Roman colony). From here there is a steady ascent to Jerusalem, the "new" road along the northern side of the Wady, the other, or "old" road, up a branch valley slightly to the south.

But it is clear that our line of main advance has been up the historic "Valley of Ajalon"—the modern Wady Selman. This, all through history, has been the great route of armies. Down this pass Joshua drove the Canaanites (Josh., x. 10f.), up this valley the Philistines came to fight Saul at Michmash, and the Hebrews, after defeating them, smote the Philistines that day from Michmash to Ajalon (I. Sam., xiv. 31). Battles surged up and down this route in the days of the Græco-Syrians and the Romans. The Crusaders, in the first Crusade, reached and captured Jerusalem in two days by this route. In the third Crusade, Richard Cœur-de-Lion failed to take the city; indeed, only reached within twelve miles of it, being opposed by Saladin, and hampered by differences with his allies. The entrance to the valley—here broad and open—is near Gezer (now Abu Shusheh), but on reaching the mountains several routes are possible. The most famous, the line of a once much-frequented Roman road, was by the two Beth-horons, the lower and upper, now known as Beit Ur el Tahta and Beit Ur el Foka respectively. It is a difficult pass, and rendered more so by the patches of ruined Roman road which consist in places of slabs of bare rock, in others of rough masses of irregular flag-stones. I remember to-day how my horse's feet slithered about over such places twenty-four years ago. Our mounted men have ascended here. Beit Ur el Tahta was occupied November 18, and an advance was made within four miles of the Jerusalem-Nablus road at Beitunia. An official report states that they had later to return to Beit Ur el Foka.

A second path leads a little south through Beit Likia (which our Scottish troops occupied on November 19) to el Kubeibeh (the traditional Emmaus), and thence straight on to the dominating height of Nebi Samwil, the site of the traditional tomb of the Prophet Samuel, and not improbably that also of Mizpah. This great mountain ridge (2,935 feet high) our soldiers have now occupied (21st inst.), and a most important site it is. From the minaret of the Mosque—now we are told destroyed by Turkish guns—the view embraces Jerusalem and the Mount of Olives, the Mountains of Moab, Bethlehem, Jaffa, Ramleh, and the Mediterranean. It is a wonderful spot, and one from which both the Northern road, and the road from Jaffa can be commanded. When one rides round Jerusalem the mountain, with its mosque and minaret, can be seen from a hundred points. Though so near Jerusalem it is isolated from it by the deep valley—Wady Beit Hanina.

Thus our forces occupy an irregular line running from Beit Ur el Foka in the northern pass, through the mountain fortress of Nebi Samwil to Kuriet el Enab on the Jaffa-Jerusalem thence to Ain Kairim, which has a good carriage road, originally made by the Russians, which joins the high road near Jerusalem, and so over the hills to Bettir on the railway. Ain Kairim is the traditional home of John the Baptist, and the Russians have a convent here, with large and beautiful grounds planted with cypresses and other trees. It is one of the most charming spots round Jerusalem. Three of the passes are—if not fully occupied—at least in our possession, and Jerusalem itself is but a little over three miles from our nearest troops. We have, too, in Ain Kairim and Bettir the two best springs round Jerusalem. There is a fourth pass which, in years gone by, has been successfully negotiated when the Beth Horon pass failed. This is by the Wady Sûr—the highest part of the Wady es Sunt (the Vale of Elah). This comes out on the Judæan plateau some five miles north of Hebron, reaching there the great Southern road, which runs from Beersheba through Hebron and Bethelehem to Jerusalem. Along this route Jerusalem was captured by Antiochus III. with his general Lycius, who brought up here a vast army, with thirty-two elephants, and defeated Judas Maccabeus at Beth Zachariah, now Beit Zakarya (1 Macc., vi. 32f.).

It is a quite possible route for a modern army, and though we have had no news of any of our forces taking that way, we may yet hear of it. An advance along this route, with its comparatively good water supply (especially at "Solomon's pools"), would be of supreme importance, if accomplished, as it would not only threaten Jerusalem along the open and fairly level ground to its south, but an army so placed would seriously embarass the Turks' line of communications both for re-inforcements and of retreat along the Jerusalem-Jericho road.

Jerusalem has never been an easy city to capture when at all efficiently defended. The progress made so far, which has brought us so near the city, must be regarded as highly satisfactory when we consider the immense difficulty of the steep climb from the plain up such rugged passes in the face of a brave and well-organised foe, well supplied with modern guns and with all the advantages of choice of terrain.

THE WAY TO INDIA.

[*The peculiar interest of the following article in the "Cologne Gazette" justifies its reproduction at length in these columns. Comment upon it has to be deferred to our next issue.*]

In an article entitled "The Way to India," the *Kölnische Zeitung* of November 24 begins by recapitulating old arguments as to how the fear of a young, rising and successful Germany, whose natural desire to stretch its limits would eventually compel her to demand from Great Britain freedom of the seas, first made the latter go to war in order that she might by timely action check Germany's expansion, destroy her fleet and seize her colonies. The chief motive governing Great Britain's action in this, it is pointed out, was the necessity of securing the road to India.

"Germany's Eastern policy of to-day," continues the *Kölnische Zeitung*, "is based upon historical necessity. Our political ambition to hold Baghdad dates back to Charles the Great. It never came to anything, because, on the one hand, Germany did not possess the means to force her way there, and because, on the other hand, it is only in the last few decades that the necessity has become imperative enough to make of it a leading plank in our foreign policy. That our policy in this respect is purely defensive, depending as it does upon the friendship of Turkey, and is prompted solely by the need we have of obtaining access to the world's markets unhindered by England, a glance at the map will prove. For on the day when Germany succeeded in obtaining an independent outlet upon the Persian Gulf a great step would already have been made in achieving that equality upon the sea which we demand. England's unbounded command of the Indian Ocean would be thereby menaced. This she would never tolerate; here, therefore, the life interests of the two Empires meet and clash. For Germany must gain independent access to the Persian Gulf, if she does not wish to see herself cut off from the world's markets and the feeding of her population dependent upon England's goodwill; and England cannot permit our access to it, except at the price of diminished sovereignty at sea—that sovereignty upon which the safety of her island kingdom in the first place depends. England recognised these facts long since, and her attitude on the question of war with us was, therefore, long since fixed.

"The fact has even been admitted in writing by English authors that almost all England's Asiatic and most of her African conquests were made solely in order to erect a glacis round India, the most precious star of the British Empire. In pursuance of this idea, England conceived the purpose of acquiring a land route to India—an idea which is not new, as some suppose, but dates back to early days after the occupation of Egypt. The special significance of England's action in Egypt in this war has been already frequently discussed, and need not, therefore, be emphasised anew. Suffice it to point out once again that its conquest became imperative, if England, after the opening of the Suez Canal, was to remain undisputed master of the sea route to India."

The article then goes on to point out how systematically England has worked out her plan for the acquirement of the land route to India; how the first step was to buy the friendship of the heads of the Islam world, to incite the Arabs to revolt against the Turks, to start the idea of an Arab Khalif, a Turkish one being historically impossible. The second step, of course, was the occupation of Mesopotamia; the third, the military forcing of the passage from Egypt into the Arabian Desert. The last step was the acquiring, by diplomacy or by other methods, of those parts of Persia through which the land route would eventually pass.

"How far have the English reached these aims? The first tangible result of British propaganda in the Arabian world was the case of the Shereef of Mecca, who reappeared as king by grace of England. The military occupation of Mesopotamia has succeeded in so far as it was necessary for English plans. The well-known Anglo-Russian Agreement of 1907 settled the Persian question, but the wish for an exit from Egypt will, we hope, be denied to them. The Turks are fully alive to British designs upon the Turkish Empire. Some day we shall arrive at a settlement with Britain over Belgium, and also on the purely European questions between us, but never shall we reach an agreement with her on a question which in any way touches her colonial possessions, least of all, if thereby the connection between India and the mother country were to be jeopardised. Let the innocents who still believe the reverse be once more assured that England cares not a jot for her proclaimed principle of nationalities. It has no significance for her once it ceases to serve her interests. If, therefore, we fail to settle the Eastern issue on a basis of military success, we shall never compel her to abandon her Mesopotamian and Arabian plans, even if we get her down on her knees. She would stick to these to the bitter end.

"For us, of course, the German work of decades is at stake in Mesopotamia. The future will show whether Germany was ripe at the time for a policy which involved such expansion, or whether her political evolution failed to keep pace with it. Success in such undertakings attends that country whose broad masses are convinced of the national necessity for embarking on them. The greater part of the English working classes know what the British colonies mean to them. May the day soon dawn when Germany's foreign policy will find itself reposing on an equally solid basis of popular opinion."

ARCHÆOLOGICAL NOTES.

Palestine at the Roman Era.

In the 1916 issue of the "Annuaire de l'Ecole Pratique des Hautes Etudes" there is an important and lengthy essay by M. Maurice Vernes upon the geography of the Sinai Peninsula and Southern Palestine. His explanations of the geographical features of all the territory between the Nile and Central Palestine have a particular interest just now, in view of the military operations in these regions. He reproduces also an ancient map, portion of the Peutinger Tablet map of Egypt and Palestine at the Roman era. This shows the three routes feasible for the passage of armies from Egypt to Syria, with the names of the various cities and halting places. The coast lines of the Mediterranean and Gulf of Akaba are included, and it is undoubtedly the type of chart or map any Roman commander marching into Palestine would have used.

The Hittite Inscriptions.

In the number of the Journal of the Royal Asiatic Society for July, Dr. A. Cowley, of Oxford, prints what he modestly terms some "Notes on Hittite Hieroglyphic Inscriptions." In the essay he treats of the whole of the alphabet of this mysterious script of ancient Asia Minor, and also of the Determinative Prefixes which are such an important item for consideration when attempts are made to translate any hieroglyphic writing. All scholars who endeavour to find the secrets of Hittite inscriptions have to consider the work on the subject published during the last thirty years by Professor Sayce. One obstacle to an easy understanding of Hittite texts is that there are frequently several quite different signs, or pictures, for the same letter. Thus, in the list of letter symbols Dr. Cowley considers to be certainly ascertained, he gives two for D, 2 for M, 3 for N, 6 for K, and 6 for S. Since the excavations carried out at Carchemish for the British Museum a few years ago, the number of photographs of long Hittite inscriptions has been much increased. Unfortunately, the monuments themselves were left in the hands of the Turks, and therefore may have been destroyed.

Until further notice parcels (except those addressed to prisoners of war) for Switzerland, Spain, and Portugal, via France, cannot be accepted for transmission by post.

The Maitland Prize at Cambridge University for the ensuing year, of the value of about £125, will be awarded for the best essay on the following subject:—"The probable effects of the present European conflict upon the work of Christian Missions in the East."

A memorial service for Lieutenant-General Sir Stanley Maude will be held, with the approval of the Dean and Chapter, in St. Paul's Cathedral on Tuesday, December 4, at noon. The service will be conducted by Bishop Montgomery, the Prelate of the Order of St. Michael and St. George, of which Sir Stanley Maude was a member.

The *Morning Post* correspondent at Paris has learned from Jassy that as regards the Jewish question in Roumania, the Ministerial Council has decided that all Jewish non-commissioned officers fighting in the Roumanian Army shall henceforth be regarded as Roumanian citizens, having full political rights. As the result of this decree 200 Jewish non-commissioned officers have been made sub-lieutenants.

A Reuter telegram from Cape Town says that Brigadier-General O. G. Gunning, C.M.G., who had been invalided from Mesopotamia, died on November 14, and was buried at Wynberg with military honours. General Gunning, who was born in 1867, entered the Army in 1888, and saw service in the Miranzi Expedition of 1891, receiving the medal with clasp, and on the North-West Frontier in 1897-8, when he was severely wounded. He was created a C.M.G. in 1915 in recognition of his services in the present war.

NEAR EAST BOOKSHELF.

SIR COLIN SCOTT-MONCRIEFF. *

This is definitely a book to be read, for it contains a good story well told. As regards the telling, most of the book is in Sir Colin's own words—a thread of personal reminiscences and a larger bulk of really delightful letters, the whole being put together with considerable skill. The story itself is in many ways remarkable. Scott-Moncrieff joined the Bengal Engineers in time to see some active service in the later Mutiny campaigns, and then passed to the Irrigation Department, in which he spent a quarter of a century, broken by occasional interludes such as the famine in Mysore. His work in India was throughout distinguished; he rose to the rank of Chief Engineer, and in 1883 he retired, and might have looked forward to a quiet life in Cheltenham or Ealing, "where good Anglo-Indians go." As a matter of fact, he was then only half-way through his public career, and his homeward journey was interrupted by Lord Dufferin's summons to take over "the keys of the Nile." In one sense he may be said to have been lucky in this appointment, for, as he wrote himself, "Happy is the reformer who finds things so bad he cannot make a movement without making an improvement." Egypt, however, was immeasurably the luckier of the two, and his nine years of strenuous and successful work, in the face of difficulties which are now matters of history, laid the foundations of the wonderful material prosperity which the country now enjoys. Even this was not the end; after leaving Egypt he spent ten useful years as permanent head of the Scottish Office, and finally there was his work as President of the Indian Irrigation Commission, which has now been tested by sufficient time to justify the verdict that it was one of the very finest administrative achievements in the whole history of the Empire.

If we ask what was the secret of this remarkable career, we are met at the outset by the opinion of the profession that Sir Colin was not a great original engineer. His strength lay rather on the administrative side, and he was in fact a great administrator led by circumstances to devote his energies to the specific task of bringing water to thirsty land. This fact was recognised long before his appointment to the Scottish Office; in 1883 he had been offered the post of Financial Adviser to the Khedive, and still earlier his selection for famine work in Mysore was obviously determined by the same considerations. Now, the art of administration rests primarily on two sets of qualities. In the first place it requires a wide knowledge of human nature in all its varying aspects, and this knowledge Sir Colin undoubtedly possessed. He could choose men, and he could adapt the burden to the back; having mastered for himself the nature of the work to be done, he knew what part of it must be kept in his own hands, and what could be safely left to his subordinates; and he knew also how to get the best results from tools of varying quality. The administrator, however, requires something more than knowledge for complete success; he needs character as well as intellect, and it is at this point that we come to the real Sir Colin, as he was known to his friends and as he is pictured in this book. Like most other fine characters, its keynote was simplicity; he was, in a word, "straight," and it was here that his strength lay in dealing with the ryot or the fellah, as well as with the men of his own country or the cosmopolitan crowd with whom he mixed in Egypt. Such men are good to know, and if we have said that this book is decidedly one to be read, our main reason is that it enables us to know one of the very best.

TURKEY'S UNFORGIVEABLE CRIME.†

Much has been forgiven the Turk in years gone by, but his treatment of Armenia has without doubt sounded the death-knell of the Turkish Empire. Not even the Germans, when they learn, as they certainly will some day, the truth of this, the greatest crime in the war, will be able to find excuse for so frightful a record. By the strenuous efforts of the German rulers, the awful truth is being kept back, and doubtless what little news has reached the Central Powers has been discredited as political lies. At least one book on the subject, by a German who knows the facts, has been deliberately suppressed, and the author is now a refugee in a neutral land. "Armenia and the War" is written by an Armenian with all the force and vividness of an Eastern stirred to the depths by his people's wrongs. Nothing but the welter of misery which so long has lain around us on every hand could make it possible for any man to read such a tale without a sickening sense of horror. "Of all the peoples upon whom this war has brought calamity and suffering, the Armenians have had the most to endure," says Lord Bryce in the Introduction. The oft-told tale is apt to lose its appeal with repetition, but it is well ever to "Remember Armenia." The public would do well to refresh their memories by reading this clear and moving statement of Armenia's case at a time when it would seem that England at last is bringing to Turkey a retribution for her crimes. All talk of allowing Turkey ever again to dominate the non-Turkish races now liberated, or being liberated, from her talons will sink to silence in the contemplation of wickedness, bestiality, and massacre such as this. The chapter on the "Gentle and clean-fighting Turk" is one which our pro-Turks should digest. In the reparation and restoration to bleeding Armenia which must come, unless our "war aims" are not mere hypocrisy, the author rightly thinks that America and democratic Russia—with, it must be hoped, a recovered national sanity—must have a leading part. Whether the author's suggested settlement is workable remains to be seen, but some form of Autonomous Armenia must be established in common justice for a crime in which not only Turkey and Germany, but, sad to say, ourselves—all unwittingly, by the blundering diplomacy of the past—have all had a share.

TRANSLATIONS FROM THE ARABIC.*

"Gems of Arabic Literature" is a "key" to the Arabic text-book, *Ar-Rauzat-us-Zakiah*, and will doubtless be of considerable use to those preparing for the Higher Standard Examination in Arabic for the Government of India. As a whole, the narratives appear in this translation in idiomatic English, though occasionally there seems to be an unnecessary departure from the literal meaning of the text. The general reader will here find much of interest and entertainment in the English text alone. Considering the fact that the book is published in Aden, there are wonderfully few misprints. If there is any criticism to be made, it is in the selection of the subject matter—which, of course, is beyond the translator's control. The description of Syria by Abel Tida has no geographical interest, and the accounts of Paris and London, though distinctly diverting, are so entirely out of date, and in many respects so ridiculous, that they can, to say the least, hardly raise the respect for our civilization among the untravelled subjects of our Indian Empire.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. November 30	1917. November 17	Friday	1336. Saphar 15	5678. Kislev 15
December 1	18	Saturday.....	16	16
2	19	**Sunday**	17	17
3	20	Monday	18	18
4	21	Tuesday	19	19
5	22	Wednesday	20	20
6	23	Thursday	21	21

To-morrow will be the anniversary of the birthday of Queen Alexandra. The King and Queen are going to Sandringham for the occasion.

The Greek Minister was among the diplomatic callers at the Foreign Office on November 26.

Messrs. Ralli Brothers, of London, have forwarded to Athens the sum of £5,000 for the Greek Red Cross.

Baron Sonnino has thanked the Italian community in Cairo for the first instalment of £4,000 in aid of the refugees from the invaded districts of Italy.

The Hon. Thomas Stafford Sidney, Attorney-General of the Leeward Islands since 1909, who has died at Liverpool, aged fifty-four years, was at one time Advocate or the High Court of Madras.

H.H. the Aga Khan, who has been in ill-health for nearly a year past, and has been undergoing treatment in Switzerland for some months, has returned to France, and is making favourable progress.

A parcel mail for the Salonika Force, containing parcels which reached the Army Parcel Office, London, for despatch between November 1 and the evening of November 5, has been lost at sea through enemy action.

The Czech Press Bureau states that, according to the *Narodni Listy* of November 16, a resolution was adopted by the "Union of Czech Journalists" protesting against the continued severe Press censorship in Bohemia.

The inaugural meeting of the Anglo-Roumanian Society will be held at the Mansion House on Friday, December 7. The Lord Mayor will preside, and Sir Edward Carson, Lord Hugh Cecil, M.P., and Lord Dunedin will speak.

The Rev. Louis Borissow, aged seventy-seven, of the Rectory, East Gilling, Yorks, formerly tutor of H.H. Jam Sahib of Nawanagar, and at one time Chaplain and Precentor of Trinity College, Cambridge, left estate of the gross value of £7,276.

A telegram from Fiume states that the body of a woman has been washed ashore on the Island of Curzola, off the Dalmatian coast. Papers found in the pockets indicate that it is the body of Mrs. Alice Askew, the novelist. The body has been buried at a spot near the coast.

Speaking at a meeting of the Bengal Legislative Council on November 21, Lord Ronaldshay, Governor of Bengal, announced the appointment of a committee of Indians and Europeans, under a Judge of the King's Bench Division, to investigate the seditious movement in Bengal, says Reuter's Calcutta correspondent.

The Mayor of Athens has telegraphed to the Lord Mayor of London expressing the gratitude of the Greek people for the reception given to M. Venizelos, and saying:—"The sons of Greece are proud to have contributed to the triumph of the great cause, fighting at the side of gallant Great Britain and her noble armies."

M. Passaroff, Bulgarian Minister to Switzerland, recently intimated, it is reported, that he intended to forward his official archives to Sofia. Some of his numerous packing-cases, however, broke asunder, and proved to be full of boots, clothes, rubber, etc. M. Passaroff then discovered that his mother was seriously ill, and hurriedly departed for Sofia.

LADY, WISHING to go to INDIA, would like to meet lady or party, with view to companionship in travelling through India Willing to contribute half expenses in return for escort.—Reply to Box 501, care of THE NEAR EAST Offices, 1, Devonshire Square, E.C.2.

The King has given authority to Mr. C. H. Armbruster, of the Sudan Civil Service, to wear the insignia of the Third Class of the Order of the Nile, which decoration was conferred upon him by the late Sultan of Egypt.

The *Morning Post* learns from Cairo that Colonel Lord Edward Cecil, Financial Adviser to the Egyptian Government, is still in indifferent health. It had been hoped that he would improve in the Egyptian climate, but his condition is so unsatisfactory that it is possible that he will proceed to Switzerland to undergo a cure. Later news states that Lord Edward Cecil is seriously ill.

The marriage took place on November 27, at Llanishen Parish Church, of Lieutenant Adrian H. J. Stokes, D.S.C., R.N., third son of Sir Gabriel Stokes, K.C.S.I., of Dublin, and Miss Doris Louise England, youngest daughter of the late Mr. Edward England and Mrs. Edward England, of Parc, Llanishen, Glamorganshire.

M. Venizelos, the Greek Prime Minister, concluded his visit to London on November 27, and left for Paris. M. Venizelos was accompanied by the members of his suite. At the station were M. Gennadius, the Greek Minister, Mme. Gennadius, the personnel of the Legation, M. Embirocos, and Dr. R. M. Burrows, Principal of King's College.

The marriage took place on November 12, at Christ Church Cathedral, Victoria, B.C., of Mr. Henry Cuthbert Holmes, eldest son of Mr. William Cuthbert Holmes, I.C.S. (retired), and Mrs. Holmes, to Philippa Despard, second daughter of Frederick Bernard Pemberton and Mrs. Pemberton, of Mountjoy, Victoria, B.C. The Bishop of Columbia performed the rite.

Princess Patricia of Connaught has consented to open an exhibition of Serbo-Croat art at the Grafton Galleries to-morrow, at 2.30. The exhibition, which is under the patronage of Queen Alexandra and Prince Paul of Serbia, will be open daily until December 22 from ten till six, and the proceeds will be divided between the Serbian Relief Fund and the Serbian Red Cross.

The Secretary of State for India announces that Sir Michael O'Dwyer's tenure of the Lieutenant-Governorship of the Punjab, which would in the ordinary course expire in May next, has been extended for a year, and that Sir Mahadev Chaubal will retain his seat on the Executive Council of the Governor of Bombay until March 1, 1918, instead of vacating the appointment in December.

Dr. Arthur Herbert Norris, who has been appointed by the Home Secretary to be Chief Inspector of Reformatory and Industrial Schools, to fill the vacancy caused by the death of the late Mr. C. E. B. Russell, took up military duties on the outbreak of war as a captain in the R.A.M.C. He served with distinction in Gallipoli and France, and was awarded the Military Cross in November, 1916.

The Committee of the Lebanon Hospital (for Mental Diseases), Asfuriyeh, near Beyrout, Syria, will hold its twelfth annual general meeting at the rooms of the Medical Society of London, 11, Chandos Street, Cavendish Square, W. (close to Oxford Circus and Queen's Hall), on Friday next, December 7, at 3 p.m. Canon J. T. Parfit will give a lecture, illustrated by limelight views, "On the Outlook for Syria and Lebanon."

The King has been pleased to award the Albert Medal in Gold in recognition of the conspicuous gallantry and self-sacrifice of Mr. Robert Leiper Lindsay, late superintendent of the Tembi Pumping Station of the Anglo-Persian Oil Company, on the occasion of the destruction by fire in July last of a part of the pumping station, and the Albert Medal to Mr. James Still, his assistant, for the courage and devotion to duty displayed by him on the same occasion.

Lieutenant-General Dessino, Chief of the Russian Military Mission in England, received a telegram, dated November 23, from General Dukhonin, Commander-in-Chief of the Russian Armies, instructing him to express to the Chief of the Imperial General Staff, on behalf of himself and the whole Russian Army, the profoundest sympathy on the occasion of the death of General Maude, late Commander of the British Forces in Mesopotamia, whose brilliant successes in the field he had followed with such deep interest. General Dukhonin's message has been repeated to General Marshall, commanding the British Forces in Mesopotamia.

11th K.E.O. LANCERS.

A COMFORTS FUND, to co-operate with THE INDIAN COMFORTS FUND, has been started for the Regiment.

Will those interested please communicate with Mrs. HARTLEY, 33, Wilton Place, S.W.

Digitized by Google

APPOINTMENTS, PROMOTIONS, ETC.

Sir William Brunyate, Judicial Adviser in Egypt, has been appointed to act as Financial Adviser during the absence of Lord Edward Cecil.

His Majesty the King has been pleased to approve of the promotion to the substantive rank of General of Lieutenant-General (temporary General) the Honourable Sir Julian Hedworth George Byng, K.C.B., K.C.M.G., M.V.O., Colonel 3rd Hussars, commanding Third Army, in recognition of distinguished service in the field during recent operations.

It is officially announced that the King has been pleased to approve of the appointment of Lieutenant-General Sir William R Marshall, K.C.B., to command the forces in Mesopotamia. General Marshall, who is fifty-two years of age, served with distinction in the South African war and in France, and was selected in September of last year to command a corps in Mesopotamia, with the temporary rank of Lieutenant-General.

OBITUARY.

Mr. Robert Gerald Pantin, whose death has just occurred at the age of forty-six, was educated at Bradfield College and Wadham College, Oxford. He entered the Indian Civil Service in 1894, and served in the Central Provinces as Assistant Commissioner and Acting Under Secretary, being promoted to be a Deputy Commissioner ten years ago.

Sir Thomas Walker, K.C.I.E., C.S.I., a former Acting Lieutenant-Governor of the Punjab, died on November 25, aged sixty-eight years. He was Financial Commissioner of the Punjab when, in 1907, the newly-appointed Lieutenant-Governor broke down in health, and he held that position during a difficult year until the appointment of Sir Louis Dane in the spring of 1908.

Colonel Dudley North died at his residence in Down Street on November 22, aged seventy-seven years. He was educated at Harrow, and joined at the age of eighteen the 47th Loyal North Lancashire Regiment. From 1875 to 1878 he was Aide-de-Camp to the Governor of Malta, and in 1884 commanded the wing of the North Lancashire Regiment with the Zhob Valley Expedition. For five years, in the early 'nineties, he was Assistant Adjutant-General in Canada, and retired in 1897. He was created a C.B. in 1896.

The death occurred at his residence, 17, Lincoln House, Basil Street, Knightsbridge, on the 17th inst., of Lieut.-Col. James Levett Kaye, at the age of fifty-five. Col. Kaye was educated at Winchester and Sandhurst, and entered the Army in 1882; he served with the Royal Berkshire Regiment in Egypt and Gibraltar until 1885, including the Suakin campaign, 1885. He then joined the Indian Army, and in 1889 transferred to the Political Department of the Government of India. He was Settlement Commissioner in Kashmir 1895-1904, Political Agent at Alwar 1905, Resident at Indore 1907, and Resident in Mewar, Rajputana 1911. After retiring from the service he undertook war work in London, and was in harness at time of death. He married Edith Mary, only daughter of the late Mr. Stephen Harvey James, I.C.S., Secretary to the Government of India in the Legislative Department.

A military funeral was accorded Col. Kaye at Kensal Green Cemetery, where the Rev. B. C. H. Andrews officiated. The coffin, covered by the Union Jack, was conveyed on a gun carriage drawn by eight horses. The escort was composed of a squad of K.R.R.'s, who also formed the firing party, and bearers and the buglers under Sergt-Major Wild, all commanded by Captain Crockford. After the interment three vollevs were fired and the "Last Post" sounded by the buglers. The assembly included Col. R. A. Kaye, R.A. (brother), Lieut. James Kaye, R.E. (nephew), Mr. Ronald Collings, Dr. Beckett-Overy, Mr. Church, Col. Goodenough, Mr. W. Kaye, Mr. P. F. Hadow, Major Bourchier, Col. Mulroney, I.M.S., and Col. Impey.

Captain George Norman Berney, Herefordshire Regiment, who was killed in action on an Eastern Front on November 6, was twenty-five years of age, and the eldest child and only son of Mr. and Mrs. George Berney, of Hill House, Wimbledon. He was educated at Rokeby School, Wimbledon, and Haileybury, where he became College prefect, and received his colours as a member of the first Rugby Fifteen. On leaving school he was articled to Mr. J. Theodore Goddard, solicitor, of London, and he was preparing for his final examination when the war broke out. He enlisted as a private in the East Surrey Regiment, and afterwards received a commission in the Herefordshire Regiment on October 7, 1914. He took part with his regiment in the advance over the Salt Lake, and subsequent campaign in the Dardanelles, for which the regiment was specially mentioned in despatches. At the conclusion of this campaign he was invalided home to England for a short period. He rejoined his regiment directly he was convalescent without applying for leave, and went through the fighting on the Sinai Peninsula and elsewhere. Captain Berney was a keen sportsman and a well-known member of the famous Harlequins fifteen, playing as a full back. He was 6 ft. 2 ins. in height, and of superb physique, and he won the officers' Divisional heavy-weight boxing championship and also the officers' Brigade race at a tournament held recently in Palestine. *Sursum corda*, the motto of his old College, was the loadstar of his life.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

MARTEN.—On November 23, at Coonoor, South India, the wife of Stephen Alexander Marten, I.A.R.O., late of Perinaad Estate, Travancore, of a daughter.

MARRIAGE.

BAKER—DINGWELL-FORDYCE.—On November 20, 1917, at St. Edward's Church, Westminster, Colonel Eden Moyle Baker, late R.A., eldest son of the late Colonel F. Moffatt Baker, H.E., I.C.S., to Sidney Agnes (only daughter of the late Lieut.-General Sir J. Dingwell-Fordyce, K.C.B., Bengal Horse Artillery.

EDELMAN—KRASA.—On July 1, in London, Samuel Edelman, American Consular Service, lately at Damascus, Syria, to Etta, eldest daughter of the late Mr. Ferd. Krasa and Mrs. Ferd. Krasa, of 4, St. Cuthbert's Road, Brondesbury, N.W.

ASLAT—FOSTER.—On the 24th inst., at the Parish Church, Hampstead, by the Rev. E. Lees, M.A., vicar of St. Matthias, Canning Town, Captain E. K. S. Aslat, R.G.A., to Florence Muriel, second daughter of Harry Seymour Foster, J.P., D.L., Consul-General of Persia.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

FRIDAY, NOVEMBER 30, 1917.

WAR AIMS IN THE NEAR EAST

The spectacle of from twenty to thirty members of the House of Commons claiming to have discovered a peace formula calculated to bring the war at once to a satisfactory end to all concerned, if the Allies could be persuaded to accept it, can only be explained as an instance of arrested mentality. In the momentous days of the first week of August, 1914, when the different Governments were at pains to justify the outbreak of war, the British Foreign Secretary said that the conflict which had already broken out between the Central Powers and the Dual Alliance had originated in a dispute between Austria and Serbia, and he hinted that the violation of Belgian territory might prove the determining factor in regard to Great Britain's participation in it. The statement was literally true, and was regarded as adequate at the time; but as the war progressed it was found to afford no real explanation of the world-crisis. Gradually it came to be realized that a far greater complexity of causes and effects was responsible for plunging Europe into war, and different schools of thought proceeded to expand the list of racial, political, dynastic and commercial rivalries of which the conflagration might be regarded as the resultant. A still further stage was reached when it was brought home to the more thoughtful among the peoples that, whatever may have been the cause or causes of the war, an entirely different group of problems was involved in bringing it to an end. When President Wilson accepted this truth, the United States were able to range themselves with the Allies. The bulk of our pacifists, it is, perhaps, charitable to suppose, are still groping their way about in the maze of darkness and uncertainty that marked the early stages of the war. For them it continues to be in the main a dispute between Austria and Serbia, or a senseless misunderstanding arising from some such incident, and at its worst interpretation, they hold, the Belgian "mistake" can be atoned for by Germany by means of suitable reparation. As so often happens, features or characteristics escape notice until attention is drawn to them in an exaggerated form. For a caricature of pacifism, yet absolutely true to life, we are able to turn to the Bolshevist attempts at government in Petrograd. There the most abysmal ignorance dictates unchallenged to the world, or, at least, to the official Press and telegraph office. It may or may not be true that the cry of "no annexations or indemnities" found such immediate favour, because the reference was widely understood to be to two cities that the troops had no desire to take; but it is certainly established that the Bolshevist Government, while freely cutting up Russian territory into a variety of would-be independent States, repudiates the mere suggestion of the dismemberment of Austria-Hungary or of any action which might challenge the Tsarism of the Central Powers and improve the lot of their subject peoples.

The world might submit to be ruled by brute force; but it is inconceivable that it should acquiesce in the domination of ignorance, whether in the form of British pacifism or Bolshevist inconsistency. Slowly the group of problems involved in bringing the war to an end is being found to centre in a single paramount issue, whether (in the words of an American thinker) civilisation is to regard the principle of aggression as its highest law, and that nation is to be greatest which can mobilize the most terrific force and use it in the most savage way. How savagely the Central Powers have used their strength in this war few Britons are really capable of understanding, and the majority will probably make no attempt to understand fully. Something of the horror of Belgium's sufferings may have sunk into the British consciousness; but the tendency is to associate them with an abstract conception of militarism, which is vaguely expected to dissolve itself into thin air when the war ends in favour of the Allies. What is not realised is the extent to which this savagery has entered into the nature of the peoples of the Central Powers and their Allies—it may be as the direct product of militarism, but the temperament which lent itself to the latter has now absorbed the fruits of it into its bones and marrow. Belgium does not stand alone. Atrocities, possibly on a more intensive scale, have been perpetrated in Austria-Hungary against the actual subjects of the Hapsburg monarch. Similarly in territory occupied by the Bulgarians and in Turkey the same ruthless policy of oppression and extermination has been carried out, and in such circumstances as demonstrate unmistakably the part they occupy in the general administrative system directed from Berlin.

Nowhere has the belief in the clean-fighting Turk been clung to more tenaciously than in Great Britain, and even now the individual Osmanli is assured of the respect due to a stubborn antagonist. But the accumulation of evidence of the ruthless policy of extermination steadily pursued by the governing classes throughout the war leaves no room for a Turkish "empire" in a scheme of things purporting to endow future generations with a heritage of right controlling might. The outline of the story of Armenia's martyrdom is familiar to most readers of the public Press; occasional accounts of the persecution of Jews and Syrians have also been received, but it has not been possible to gauge the total effect of Turkish misdeeds in this direction. Now comes a statement issued by the Greek Government of what its countrymen in Turkey have suffered since the beginning of the European War. Not the least tragic feature in this memorandum is the evidence it adduces to show that in their anxiety to carry out the will of the German Government King Constantine and his Ministers deliberately set themselves to ignore the sufferings and appeals of the Greeks under Ottoman jurisdiction. Under the plea that deportation was a military necessity, insisted upon, as it happened, by the German Commander-in-Chief, General Liman von Sanders, these unfortunate people shared the fate of Armenians and Syrians, whose end was deliberately compassed under the same euphemism. They may not have been quite so systematically massacred, but the conditions under which they worked and were slowly starved to death reduced their numbers less rapidly, but almost as effectually. It is very clear that the Allies' war aims cannot ignore the situation in the Ottoman Empire any more than the case of Belgium. But as far as can be gathered the future of Turkey is left out of consideration both by Bolshevists and pacifists of other nationalities. To both in their indifference to historical fact and present-day experiences the Turks appear as the most desirable rulers not only of Constantinople, but also of Armenia, Syria, Mesopotamia, and Arabia. If they are not—and their history shows how fatal to the peace of the world will be the prolongation of a savage tyranny in these regions—then they must be ejected. No peace by agreement at the present moment would find the Turkish Government prepared to acquiesce in the complete emancipation of its subject peoples; and if by chance it was so prepared, there can be little doubt that Germany would repudiate the idea. The peace that the Allies could achieve to-day would be one that would leave the Germans in supreme control from the Baltic to Mesopotamia, and ready to perpetuate with Turkish help the system of eliminating all the non-Turkish elements in the Ottoman Empire. The Allies' obligations to these people who look to them for liberty and protection will allow no such peace, and for this reason the fighting in these parts must continue until the goal is achieved beyond all possibility of challenge.

CONSTITUTIONS IN THE MAKING.

By COLES PASHA.

It has always struck me as very remarkable that whereas Egypt is only separated from Europe by the breadth of the Mediterranean, and from India by some thousands of miles, rural life in Egypt should have so little in common with village communities in Europe and be similar in every respect with what one finds in many parts, if not the whole, of India. Such being the case, it is not surprising that local institutions which have proved a success in India should now be flourishing on the banks of the Nile, Egypt having during the last thirty years borrowed extensively from India in the shape of District and Municipal Councils and other forms of local government. As India is now embarking on Home Rule on a somewhat broader basis, it may be interesting to discuss whether she cannot in turn borrow from Egypt and reorganise her Councils on the model of the Egyptian Legislature, which in many respects is in advance of anything that India has yet attempted in the way of self-government. Before discussing the question, it is as well to explain briefly to those who are unacquainted with Egypt how the existing Constitution in that country has been arrived at.

Lord Dufferin, who was sent to Egypt after the suppression of the Arabi Rebellion, drafted a scheme of government which subsequently materialised into a Legislature of two houses, the Legislative Council and the General Assembly, both bodies being a combination of nominated and elected members. In addition, there was an Executive Council of eight Ministers selected by the Khedive, but not necessarily from the members of either Assembly. The Council of Ministers was alone vested with the power to initiate legislation; proposals for increase of taxation had to be approved by the General Assembly; with this exception neither of these semi-elected bodies had any right of veto. But all laws had to be submitted to and discussed by the Legislative Council as an advisory body prior to promulgation. In the Legislative Council there were fourteen members elected by the Provincial Councils from their own numbers and twelve others nominated by the Khedive. The General Assembly consisted of eighty members, viz., eight Ministers, twenty-six members of the Legislative Council, and forty-six elected by the representatives of villages.

It is now impossible to say what form the Constitution would have taken had Lord Dufferin known that the English occupation was going to continue for so many years. Had the occupation come to an end, possibly the General Assembly might have fulfilled the purposes for which it was created. As things were, it rarely met, and it was, in fact, a negligible quantity, except on one famous occasion when Sir E. Gorst decided that it should be consulted in connection with the Suez Canal concession, although extra taxation was in no way involved. The proposal was rejected by the General Assembly, notwithstanding that it was strongly supported by the British experts in the Finance Ministry. Egyptian Nationalists will tell you that the Assembly justified its existence by its action in this matter alone. Anyhow, it was undoubtedly a mistake on the part of Sir E. Gorst to have appealed, only to be refused; English prestige in general, and his in particular, suffered in consequence. I mention the incident as it may serve as an object-lesson in India in the future.

But we need not proceed further with the merits or demerits of the General Assembly, as in 1913 Lord Kitchener came to the conclusion that the Egyptian Constitution left much to be desired. His lordship accordingly revised the Organic Law and reconstituted both Chambers into one Legislative Assembly, with "a fresh electoral basis giving a more equally distributed and comprehensive representation to the people." Lord Kitchener was undoubtedly right in amalgamating the two Chambers into one General Assembly; but whether the franchise he created is superior to Lord Dufferin's is, I think, open to doubt.

As I have shown, the fourteen elected members of the Legislative Council were chosen by the Provincial Councillors from amongst themselves, whilst the forty-six elected members of the General Assembly were elected by the village representatives direct. The General Assembly may, therefore, be said to have been the more democratic body of the two. Lord Kitchener argued (see Annual Report for 1913) that a Provincial Councillor might be an excellent adviser in provincial matters but an incapable legislator. Again, that a man whose opinion might be very inferior in local subjects might well be of assistance in shaping legislation. It was, therefore, not logical to select the legislators from your Councillors. It was better, in fact, to give the man in the mud hut (man in the street) power to differentiate as to who would make the best Councillor and who the best legislator. The obvious reply to this argument is that *all* Provincial Councillors are not necessarily incapable legislators, and those most likely to further the interests of the State would probably be selected by their brother Councillors, who presumably would be more capable of making the selection than the ordinary peasant.

On the other hand, many professional politicians would perhaps not care to seek, in the first instance, election to a Provincial Council, and their services would, therefore, be lost as legislators. But this objection could be met by accepting as candidates for the Legislative Assembly others besides Councillors, still reserving the selection to Provincial Councillors. I cannot recognise Lord Kitchener in the rôle of a democrat, but radical reformers will undoubtedly agree with his lordship and tell you that by limiting the field of selection or the electors the fundamental principle of democracy is involved. I must, I fear, plead to being a Conservative in this respect. In my opinion it is a very moot point, even in the West, whether the man in the street should be allowed any direct vote for other than Local Councils. In Egypt and in India I do not hesitate to plump for Lord Dufferin's system of franchise rather than Lord Kitchener's. It is often forgotten that when democracy insisted on having a voice in the Government and a vote, the House of Commons was the only popular governing body in England. Since then decentralisation on a very liberal scale has been introduced and still continues; one's ideas of a franchise have, therefore, to be readjusted to an entirely different point of view. In India and in Egypt we have very wisely commenced from the bottom of the ladder, and the last thirty years has seen local self-government extensively developed, what with village Councils, "Talooka" and District Boards, etc., etc. The man in the mud hut has, therefore, a good deal to say in local affairs, all that really interests him or that he knows anything about. If necessary, give him still more power in connection with these local institutions, but do not ask him to decide who shall sit in the Legislative Assembly; let this be left to the "Elders" he has selected to govern him in local matters. If you extend the franchise you only widen the field for political organisations and wire-pullers generally; you get no nearer the so-called sovereign will of the people, for the simple reason that the majority are often unable to understand the issue and have no particular "will" to guide them.

As a matter of fact, too, I do not think that either the Indian or Egyptian Nationalists trouble themselves much about the popular vote. From their point of view the success or failure of any scheme of Home Rule will depend on whether the Executive forms part of, and is responsible to, the Legislative Assembly. We have seen that in Egypt the Executive, or Council of Ministers, is a body quite apart; I have often wondered whether it would not have been wiser, if from the first Lord Dufferin had laid down that the Council of Ministers should be selected from the Legislative Council he created. It certainly would have been one grievance less for Nationalists to agitate about, and I am sure that in the early days of the occupation elected Ministers could not have opposed their English advisers more than did Nubar, Cherif, Riaz, etc., who were nominated by the Khedive. At all events, I have recollections of a very rabid Nationalist becoming quite tame

Digitized by Google

when he was selected as a Minister on Lord Cromer's advice.

An elected Executive will take a good deal of swallowing in India, and I sympathise with the civilians who have for years ruled so successfully, whatever Mr. Ramsay Macdonald may say to the contrary. But the old order will soon die out, and, speaking from thirty years' experience in Egypt, I can say that persuading native Ministers has its attractive side. I often look back with pleasure to my association with Riaz Pasha, one of Egypt's strong men in the past. I did not always succeed in getting him to agree with me, but we remained the best of friends to the end, and I hope he respected me as I did him.

But to return to our Legislative Assembly, or whatever name it will be called in India, let the authorities with whom the decision will rest take their courage in both hands and create in each Presidency an elected Assembly with an Executive or Council of Ministers selected from that Assembly.

In Egypt, Lord Kitchener had comparatively an easy task to make the Assembly representative. Arabic was the common language, and provisions had only to be made for the Coptic community and the Bedouin tribes outside the elected body. This his lordship accomplished by providing for the nomination of a very limited number in addition to the elected body. There are no other nominees of the Government in the Assembly, but the non-elected Council of Ministers now takes part in the debates.

In India, to create a thoroughly representative body is a very formidable undertaking, if not an impossible one. In the Bombay Presidency alone Hindoos speak, besides English, three different vernacular languages recognised as official. There are also Mohammedans, Parsees, and a variety of sects and castes for whom special provision would have to be made. I do not see how it is possible to include all their interests by any scheme of proportional representation, at least to give the majorities anything like their fair share would mean the Assembly running into hundreds not at all desirable. I think that the only possible scheme is to let the District Councillors elect the Legislative Assembly not necessarily from their own numbers, but as delegates of the people, the District Councillors being themselves elected by village or group delegates. Provision should also be made for nominating a limited number from the most important minorities who might otherwise remain unrepresented.

(To be continued.)

THE "EGYPTIAN GAZETTE."

Owing to the paper shortage and its ever-increasing circulation, the *Egyptian Gazette* has decided to raise its subscription rates for Egypt, the Sudan, and Palestine as from the beginning of November. The new rates are as follows:—Twelve months, P.T. 300; six months, P.T. 160; three months, P.T. 90; one month, P.T. 35. For other parts of the world the old rates remain, plus P.T. 5 per month extra for postage.

CHURCH ARMY HUTS IN PALESTINE.

Prebendary Carlile, speaking at a sale of work in aid of the Church Army Recreation and Refreshment Huts for Soldiers, which was opened by Princess Arthur of Connaught at the Central Hall, Westminster, on November 27, said the Church Army were making arrangements in Palestine for work among the soldiers. They were expecting to have a telegram at any moment to say that they had got the Tanner's House in Joppa. He thought it would be put to much better use than tanning leather, if it were employed to brighten the lives of the boys who had gone on this pilgrimage in the Holy Land. He was also hoping to hear shortly that the Church Army Recreation Tent had been pitched on Mount Olivet.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
THE SCHOOL RE-OPENED ON OCTOBER 1.
For particulars, apply to E. DENISON ROSS, Director.

CORRESPONDENCE.

THE KING OF MONTENEGRO AND AUSTRIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—During a recent debate in the Rome Chamber, Signor Labriola (Independent Socialist) is reported to have read two telegrams respecting Montenegro. The first (according to this account), bearing date of December 21, 1915, from King Nicholas to the late Emperor of Austria, ran as follows:—

> "Your troops having occupied my country, I ask you for an armistice and peace. Your generous and chivalrous heart cannot be cruel to my people."

The Emperor Francis Joseph (again according to Signor Labriola) replied:—

> "I am glad to learn that your Majesty wishes for peace, which shall be made on the conditions already known."

The extracts and statements made by Signor Labriola, both as regards the telegram sent by King Nicholas, and equally the telegram of the late Emperor Francis Joseph, are entirely inexact. It simply is not true that the Austrian Emperor telegraphed that peace would be concluded "according to the already known conditions."

The text of the Emperor's reply was as follows:—

> "The conditions for the suspension of hostilities have already been communicated to your Majesty by my chief Military Commander. On being duly requested by your Government, the said commander will hand over the answer of my own Government."

What, then, were the circumstances in which King Nicholas was originally compelled to send his telegram to the Austrian Emperor? In the first place it was because this was the work of his Government, and in the second because the supreme Montenegrin Military Command (composed of high *Serbian* officers) demanded it. Before any telegram was sent, the Montenegrin Government had sent in their resignation, alleging that King Nicholas had rejected their proposition of suing for peace. And it also must be remembered that the Chief of the General Montenegrin Staff, the *Serbian* Colonel Pescitch wrote of his own initiative to the King proposing that Austria be approached with a demand for peace on account of the desperate condition of the Montenegrin army, left entirely destitute of all munitions and starving from want of food.

With one or two exceptions, the King of Montenegro was alone in his opposition to the discussion of peace terms, and his final consent to the sending of the telegram was forced upon him; at the same time his own personal conviction was strong that Austria was *not* prepared to conclude any reasonable peace terms. The King had already decided that he would never place his signature to any treaty of peace with Austria.

In order to save the country from its tragic situation and to render possible the conclusion of peace, one of the Allied representatives at Cettinge had even suggested to the King that he should abdicate, but his Majesty, by avoiding such a course, saved the honour of his country.

If any further proof were needed as to the matter of the peace negotiations with Austria, we may take this very telegram of the Emperor Francis Joseph himself, because, if such negotiations *had* taken place previously, the Emperor would not have telegraphed that his Supreme Military Command would give the answer for his Government.

The politics of King Nicholas are strictly *National* and in close and perfect agreement with the "Entente"—during his long reign the King has never deviated from this line. Those who slander him now, accusing him, amongst other charges, of favouring a peace with Austria, are the same people whose wish was father to the thought, and who hoped to see this disloyalty accomplished in order to bring about his abdication.

The diplomatic documents, which entirely support every statement I have made, are well known to the Allied Powers, but the Royal Government of Montenegro feels that the time has not yet come for the full *exposé* of these extraordinary accusations and slanders, both in the interests of the internal politics of Montenegro itself, and also as regards the unity of action of the Allied Powers.

The whole matter has simply been part of a deliberate intrigue against King Nicholas and Montenegro—an intrigue perfectly clear to the King, who evaded it, and removed himself to France, his action thus refuting all the slanders directed against him and his country.

King Nicholas, as Sovereign of Montenegro, has always done his duty, and, together with his people, has suffered and remained steadily attached to the common cause.

I am, etc., ALEX. DEVINE.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Jews and Palestine. Nov. 19.

Mr. KING asked the Secretary of State for Foreign Affairs whether the desire of the Government to see established a Jewish Zionist nationality in Palestine had been communicated to the Allied Powers, especially to France, Russia, Italy, and the Allied States; and whether it was one of the Allied war aims, or only a British war aim, to set up a Zionist community in the Holy Land.

Mr. BALFOUR: No official communication has been made to the Allies on the subject of establishing a Jewish nationality in Palestine, but his Majesty's Government believe that such a declaration as a war aim would meet with their approval. His Majesty's Government hope that the establishment in Palestine of a national home for the Jewish people will result from the present war.

British Prisoners in Turkey. Nov. 23.

Mr. HOPE, in reply to Mr. HUME-WILLIAMS, who asked how soon it was hoped that the conference between the Turks and the English with reference to an exchange of prisoners could take place, said it is anticipated that the conference between British and Turkish delegates at Berne will take place shortly, but the British representatives will not proceed there until information has been received that responsible Turkish delegates have left Constantinople. It has been frequently stated that his Majesty's Government are opposed to the exchange of valid combatants. The Turkish Government have consented to an official from the Netherlands Legation at Constantinople visiting internment camps for the purpose of ascertaining the requirements of winter clothing, but not for the purpose of general inspection and report. Opportunity will be taken of the Berne Conference to demand that full and unrestricted facilities for the latter purpose shall also be granted.

Ex-King Constantine. Nov. 26.

Mr. LYNCH asked the Secretary of State for Foreign Affairs whether the Allies guaranteed to ex-King Constantine an annual payment of 500,000 francs; if not, whether he could give the exact sum; whether he could state the services for which this payment was agreed to; whether any conditions were stipulated, such as, for instance, that the ex-king should not plot against the Allies; and whether he could give the proportion of this Royal income paid by the British Government.

Mr. BALFOUR informed Mr. Lynch, in reply, that the protecting Powers had not guaranteed any payment to King Constantine.

Mr. LYNCH: If they have not guaranteed him, have they paid him?

Mr. BALFOUR: The hon. gentleman is under a complete misapprehension. Nothing has been guaranteed, and, as far as I know, nothing has been paid.

Indian Army Officers.

Major H. TERRELL asked the Secretary of State for India whether officers in the Indian Army whose term of service had expired and who were over fifty-five years of age were, though unemployed, not allowed to leave India; whether such officers whilst unemployed received any and, if so, what pay beyond the pensions they have earned; would he say by what authority such officers were forbidden to return to England; and would he explain why such officers should be compelled to remain in India at their own expense and without pay?

The PRESIDENT of the BOARD OF EDUCATION: No information has been received to this effect, but inquiry will be made.

Major TERRELL asked whether officers in the Indian Army who had, during the war, been engaged on Staff work in France had been recalled to India, and there employed in various subordinate positions where their experience of Staff work on active service was of no use; and whether the Government would take steps to prevent such waste of Staff experience and see that experienced Staff officers are employed on Staff work.

Mr. FISHER: The Secretary of State for India must leave it to the judgment of the Commander-in-Chief in India to employ officers recalled from France to duty in India to the best advantage, having regard to their individual qualifications and capacities, as to which he is fully informed, and to the special needs for the time being of the Indian Army. At present experienced officers with knowledge of the Indian vernacular are urgently needed in India for the training of new units, and possibly some officers who have been on Staff duty in France are being utilised for this purpose.

The Exchange of Prisoners with Turkey, Nov. 27.

In answer to Mr. BLISS, Mr. J. F. HOPE said: My noble friend Lord Newton and Lieutenant-General Sir Herbert Belfield left this morning for Berne to meet Mouhktar Pasha and other Turkish delegates with a view to arranging an exchange of prisoners. They are accompanied by Mr. O'Reilly, of the Prisoners of War Department, and Captain Gattie, of the War Office.

Mr. BLISS asked whether there was any member of the British deputation who had special knowledge and experience of the Turkish Empire.

Mr. HOPE: I understand that the British representatives will have the benefit of the assistance of Mr. Matthews, who is in Switzerland, and who acted as Dragoman in Constantinople at the outbreak of the war.

Mr. BLISS asked whether he was a British subject.

Mr. HOPE thought he must be, and said he had been in the Levant Consular service.

Mr. TENNANT asked whether it was not a fact that Lord Newton himself had served diplomatically in Constantinople.

Mr. HOPE: I am not sure; but certainly he did in the Balkans.

General Milne's Despatch.

The CHANCELLOR of the EXCHEQUER, asked by Mr. G. LAMBERT to state whether General Milne's despatch describing the operations of the British Salonika Force was published as received, or was edited for publication, and whether the Government was satisfied with the relations existing between the Allied Commander-in-Chief and other commanding officers at Salonika, said General Milne's despatch was only edited in regard to a few minor military details, the publication of which might have been of assistance to the enemy. The last part of the question was one that he could not answer.

THE PRESS ON THE NEAR EAST

The Population of Busreh.

A census of the population of Busreh and 'Ashar was made in August, 1916, by house-to-house visitation, and the results have been published in the *Basrah Times*:—

The enumeration was conducted by men attached to the Sanitary Committee for Mesopotamia, kindly lent by A.D.M.S. (Sanitary) for the purpose. Each enumerator was given a certain definite area and was provided with an interpreter. The figures are as follows:—

	Total Civilian Population.	Troops and Government Employees.
Busreh	13,696	1,152
'Ashar	11,227	3,616
Arab Village of Um-el-Dijaaj	3,200	—
Estimated total	28,213	4,768
Total Population	32,891	

...The population comprises:—Arabs, 20,498; Jews, 3,347; Christians, 1,350; European civilians, 116; other nationalities, 2,812; total, 28,123.

The Arab population is distributed fairly equally between Busreh and 'Ashar. The Jews are almost entirely confined to Busreh; they occupy a definite quarter of the town. Christians are slightly more numerous in Busreh; in this term I include all indigenous residents professing adherence either to the Roman Catholic, Protestant, or Greek Churches, and include Syrians, Chaldeans, Armenians, converts (mainly Arabs) of the French Mission, Protestants (converts of the American Mission), and a few adherents of the Greek Church. "Civilian Europeans" are employed in the various agencies of Busreh. "Other nationalities" include chiefly:—Indians, Turks, Persians, Kurds, Soudanese, and a few Levantine Greeks and Russians. "Troops and Government Servants" are those occupying the barracks and billeted. The number of the staff and in-patients of the various hospitals were not included in the inquiry.

As the enumeration was a progressive act no meticulous accuracy is claimed for the figures, but it is believed they fairly approximate to the average population.

Reforms in the Hejaz.

An Arab correspondent at Jeddah records in *The Times* some of the reforms that have characterized the substitution of Arab for Turkish rule in the Hejaz. After describing the improved conditions under which the pilgrimage is now undertaken and the freedom of the pilgrims from robbery, extortion and violence, he mentions the steps taken to improve education and agriculture:—

Soon after organising the Government, the King of the Hejaz, anxious to educate his people, began to open schools. In Mecca five or six primary schools and one military school were opened a year ago. In Jeddah two primary schools have already been started, and preparations are being made for some others. An agricultural school and another for geology are also to be opened. The reader may laugh at this, but I assure him that there is a large area of land fit for agriculture, and there are many places that have plenty of water for irrigation, such as Mount El Huda, Wadi Qarn, Wadi Thimalah, and Wadi Adwan, as well as all the districts of Turbah and Southern Hejaz. The Arab Government has sent to Egypt and other countries for professors and teachers for these two schools.

The King has encouraged the teachers of theology and those who expound the traditions of Mohamed the Prophet in the Sanctuary at Mecca. Three courses of religious instruction are given daily in the Haram, on the lines of that given at El Azhar University in Cairo, and Arabic penmanship is also taught in the Haram.

There is still plenty of room for improvement in sanitation, but the municipalities of Jeddah and Mecca are endeavouring to keep the towns clean. Incinerators have been established,

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of THE NEAR EAST to a friend in a neutral country they should order its despatch by the publishers, at 1, Devonshire Square, London, E.C.2.

Digitized by Google

and good hospitals with good practitioners are now to be found in the Hejaz. The Public Works Department is rapidly widening the narrow streets in Mecca, and steps are also being taken to improve the Customs Service.

The Future of the Khalifate.

An informative article in *The Moslem World* sums up the position in regard to the Khalifate, which is described as "the symbol of the traditionally and theoretically essential and necessary political unity of the Moslem world." The interest of the present situation, it is stated, lies in this question: Will the Khalif of the future continue to maintain this claim to the headship of a politically unified Islam, and will Islam continue to feel itself a political unity over against the non-Moslem world, or will the principle of nationality prevail among the Moslem peoples as it has elsewhere, and their Khalifate become merely a symbol of religious unity. After a brief reference to the early history of the Khalifate, the author, Professor D. B. Macdonald, continues:—

The resultant present situation can be put quite shortly. Moslems to-day look to, roughly, six different supreme rulers. By far the largest number render an allegiance, often dubious, to the Ottoman Sultan. On a basis of strict canon law his claim to that allegiance is shaky, for almost all Islam accepts as valid a statement put into the mouth of Mohammed that the Khalif must be of the tribe of Quraish, that of the Prophet himself. Abd ul-Hamid, the late deposed Sultan, felt the force of this so strongly that the tradition in question had to be omitted in collections of traditions printed at Constantinople. The true basis of the Ottoman claim is really pragmatic. That Sultan is undoubtedly the greatest independent ruler in the Moslem world, and to him, therefore, the headship belongs by right. This basis would, of course, vanish with the vanishing or considerable curtailment of Turkey.

The other rulers are (2) the Invisible Imam of the Twelver sect of Shiites. "All Persia believes that the twelfth in descent from Ali (the cousin and son-in-law of the Prophet and the fourth Khalif of the Sunnites) was removed by Allah (about A.D. 874) from the sight of men and is now being preserved alive in retirement until his time to reappear shall come." For Persians he is the real head of their Government, and the Shah is only a *locum tenens*. (3) The Aga Khan. (4) The Imam of the Yemen. (5) The Shereef of Mecca, who, according to the author, may be expected to raise the question of the Khalifate when independence has finally been recognised. (6) The Imam of Oman. Further, the Senussi, repenting of their recent union of the Turks, may, it is thought, take refuge in independence in regard to the Khalifate.

In the main, Professor Macdonald inclines to the view that the drift of Moslem thought is towards setting apart Mecca and Medina, with their surrounding territory, as a kind of Estates of the Church, and towards choosing as Khalif the head of the Shereef families there.

THE LATE DR. ELSIE INGLIS.

We regret to learn of the death of Dr. Elsie Inglis, M.B., C.M., Commissioner of the London Units of the Scottish Women's Hospitals, which took place at Newcastle-upon-Tyne on November 26. Miss Inglis, to whom belonged the credit of being the originator of the Scottish Women's Hospitals, served her country with the most praiseworthy self-sacrifice and devotion during the war. Serbia was the scene of her most strenuous work. She went there in the spring of 1915, when the typhus scourge was at its worst, and organised four big hospital units where the need was greatest. Thanks to the endeavours of herself and of many other workers of the Allied countries, the epidemic was overcome. Then followed the invasion, when Miss Inglis rendered equally meritorious service, and, through refusing to leave her Serbian wounded at Kraljevo, was captured by the enemy. Released with her staff after great discomforts, she wished to go to Mesopotamia, but, being unable to do so, continued her work for Serbia in this country. Then last year she set out for the Dobruja front, and went through the Roumanian retreat. She had only recently returned from Russia.

Under the presidency of Dr. Dickinson Berry, who, with her husband, Mr. James Berry, has rendered devoted service to Serbia during the last three years, a Serbian dinner was held at the Lyceum Club on November 26. The Serbian Minister and Mme. Jovannovitch were present, and among other guests were Dr. Popovitch, Dr. A. Trumbic, and Ivan Mestrovic. There was also a large gathering of women who had taken their part in helping Serbia. Dr. Berry said that the war had broken down barriers between nations, and in a brief but vivid description of some of her experiences told how the Allies were helping each other in ways which were not specially conspicuous, but were important and valuable. She was warmly supported by the Hon. Mrs. Haverfield in her tribute to the dauntless spirit of the Serbian nation. "The Serbian soldier, from the highest to the lowest, is a perfect gentleman," said Mrs. Haverfield, who added that she found the same excellent characteristics among the Jugoslavs.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The announcement that a first dividend would be paid on the ordinary shares of the Anglo-Persian Oil Company indicated excellent results during the past year, but the figures disclosed in the report make even better reading than might have been expected. The gross profits amount to £415,917, as against £178,386 in 1916 and £131,244 in 1915, while the net profits are £344,110, as against £135,037 and £90,431 for the two previous years. It is proposed to distribute 6 per cent. on the ordinary shares, the distribution involving the payment of 2 per cent. extra on the participating preference shares. £50,000 is placed to the preference shareholders' reserve, £100,000 to the general reserve fund, and £19,500 is carried forward. It is clear from these figures that but for the wise decision to commence the accumulation of reserves considerably larger dividends could have been paid.

***

The most promising feature of the report, however, is the statement that the field from which the subsidiary companies are drawing present supplies continues to develop most satisfactorily. The wells previously brought in still flow with practically undiminished production, and the new wells drilled in during the year are of an equally prolific character, thus confirming previous opinions as to the great richness of this field. It is further pointed out that a well sunk in a reserve field has proved a large additional area of productive territory, while a good show of oil, with strong gas pressure, has been struck on one of the new fields now being tested. It will be evident, therefore, that the most optimistic views on the prospects of the field are well on the way to realisation, which makes it more than ever a matter for congratulation that this country is in a position to draw on this vast source of oil supplies.

***

The chairman of the Anglo-Egyptian Bank, Mr. H. A. Richardson, had some very pleasant things to say at the general meeting of that institution this week, a report of which will be found elsewhere in this issue. There was, indeed, no reason for anything but optimism, for the past year has been the most satisfactory in the bank's history. For this happy result two factors are largely responsible. There is, first of all, the prosperity of the cotton industry, and, secondly, the fact that the presence of the troops in Egypt has largely increased banking operations. The chairman pointed out that to find figures approaching those of this year it would be necessary to go back a decade. "Then," he added, "Egypt was at the height of the ephemeral prosperity reached by the land boom, which collapsed in 1907, leaving wreckage which it took years to clear away. To-day its prosperity stands on a much surer foundation, with a balance of trade in its favour of over £20,000,000, and little or no speculation in land."

***

He then proceeded to illustrate the bank's progress by a few statistics, and showed that in the decade the deposits had grown by over £6,000,000, and they had £1 of liquid assets for every £1 of demand liability. Over the previous year deposits had increased by £1,500,000, and this improvement, he stated, was better than appeared because £1,000,000 which could only be regarded as temporary money had been replaced by deposits of a more substantial character. Among the other interesting facts he cited was that the investments of the bank included £1,000,000 Five per Cent. War Loan written down to 93. Before closing, Mr. Richardson briefly touched on the prospects of the current year. "The cotton crop," he said, "is estimated at 6¼ to 6½ million cantars, and, so far, our reports go to show that the quality of the arrivals in Alexandria is a great improvement upon that of recent years. If shipping can be provided for the greater part of this supply, Egypt will again coin money, for prices are well above last year's quotations.

***

The general meeting of the Egyptian Hotels, which is reported elsewhere, was notable for the optimism expressed by the chairman, Lord Claud Hamilton, for the future of the undertaking. He stated that he was very hopeful about the fortunes of the company when the war came to an end, as he thought Egypt would then become a great place of resort during the late autumn and winter months for both American and British people. For the rest, it is only necessary to note his statement that the improvement in the company's position during the last quarter of the financial year has been maintained up to the present time.

***

From what Sir Arthur Steel-Maitland, Director of the new Commercial Intelligence Department, said in his recent address to Liverpool business men, it is evident that the new department will fulfil expectations by working on far more satisfactory lines than its predecessors. The department, he said, was a "permanent department of action as well as intelligence, and if there should be an opening in a foreign country which Government support could legitimately develop it would receive that support." That seems to indicate the coming removal of the principal grievance that our commercial enterprise has failed in the past to receive the least semblance of official support. I also note with interest Sir Arthur's statement that the whole consular and commercial attaché service should be completely remodelled with the object of making it as helpful to the commercial community as a Government department could, also that "foreign policy in future must be very largely industrial and commercial in outlook and aspect."

***

The experiments that have been conducted in Egypt to find a substitute for coal as a means of meeting the present shortage have borne fruit, for Mr. John Wells has now produced a scheme by which gas can be made from vegetable matter, cotton stick, fibre, and other substances instead of anthracite. Obviously, the value of the process at the present time depends entirely on whether and to what extent it will be possible to adapt existing machinery to the purpose. There seems no reason to suppose, however, that there will be any undue difficulty in doing so, and it is satisfactory to learn that steps have been taken to encourage the adoption of the process, for, while its use will not solve the coal shortage, it will, at any rate, make existing supplies go much further than they otherwise would.

***

Among the new Greek taxes that are being imposed to cope with the unfortunate financial situation in which the country was placed by the late Governments is one of two drachmæ a kilo on exported tobacco. Egypt provides the best market for Greek tobacco, but it seems probable that one effect of the new tax will be a considerable diminution of the demand from that source. Until recently Greek tobacco was in small danger of serious competition in Egypt, but for some little time now Chinese and Japanese tobacco has been imported on a large scale, and it is to be presumed that the increased price of Greek tobacco will mean greater imports from these sources. It has to be remembered that there is no hindrance to the importation of Asiatic tobacco, and its cheapness—the best only costs PT55 per oke, while Greek tobacco never costs less than PT60 per oke—combined with its fair quality, which enables it to be blended with other tobaccos, gives it a great advantage, and now that the Greek tobacco is to be taxed, the Asiatic product wil not improbably take its place in the market.

***

The rapid growth of our Army finds apt reflection in the increasing prosperity of the business of Cox and Co., the well-known Army bankers. On October 4 the deposits stood at £16,921,400, as against £13,392,000 on October 9, 1916; while the cash holding was £7,638,000, as against £5,892,200 for the previous year. Treasury bills stood at £1,272,000, as against £1,928,000, but bills of exchange amounted to £2,760,700, as against £1,547,700, and investments in securities were £2,357,200, as against £1,909,800. Advances to customers stood at £3,170,200, compared with £2,420,000.

THE CALCUTTA HIDES TRADE.

Retrospect and Prospect.

Recent developments in connection with the Calcutta hide trade have again brought the question of the control of this important —one might say vital—industry into prominence. Since the war this trade has been the subject of various special arrangements culminating in the appointment of a Buying Committee in Calcutta composed of various prominent firms of purely British origin. This action met with undisguised approval both here and in India, and was generally regarded as settling the question of the control of this trade during the war. Now, however, it appears likely that the whole matter may be reopened. The trade is not one of purely Indian concern; its organisation is a matter of import to the Empire as a whole, and it is essential, therefore, that any change made must be justified on broad Imperial grounds. In the present case a proposal to include as agents of the Government members of the old hide ring has met with considerable opposition in Calcutta. The firms composing the Buying Committee are not unnaturally surprised at what must be regarded as the singularly vacillating attitude of the authorities. Apprehension at the outlook is no less widespread in London than in Calcutta, and in the circumstances it may be hoped that the authorities will pause before putting into force what those best qualified to know regard as an ill-considered proposal.

Growth of German Influence.

The *raison d'être* of the Buying Committee can best be illustrated by a brief survey of the position of the trade in recent years. Like so many other important British industries, the Calcutta hide trade at the outbreak of war was almost exclusively in German hands, as, indeed, it had been for nearly thirty years previously. The methods by which the result was achieved were very similar to those employed by the enemy elsewhere. The German firms in the trade were a "ring," and contrived to handle the great bulk of hides by the simple method of boycotting any outsider who dared to enter the trade. Against this ring nothing short of an effective combine working with the favour of the authorities would be of any avail.

Effect on British Trade.

The Germans firms, incidentally, had all the external support they could wish. They worked through a hide organisation at Hamburg, and they had above all the inestimable advantage of Government support, which took the form of a fiscal policy favourable to the increasing import into Germany of raw hides. Small wonder is it then that the figures for the export of hides to Germany and her Ally rose to 70 per cent. of India's total production. The balance practically represents the quantity of hides normally tanned in India and subsequently exported to this country, so that the enemy was obtaining his raw hides at the expense of British firms. The vision of British tanners turning to other sources of supply while on the other side of the North Sea German tanneries drew increasingly from British sources is not a pleasant retrospect, but it is unfortunately neither more nor less than the truth. And all this for lack of organisation. It need hardly be added, perhaps, that in the years immediately preceding the outbreak of war the German and Austrian imports of hides swelled to an enormous figure. The statistics are such as to leave no room for doubt that during that period India was unconsciously supplying the enemy with the raw leather necessary for his military plans. And there is some ground for the belief that the process did not stop there, for after the outbreak of war an immense business by firms still left in the trade was done with neutral countries.

Government Action.

We have seen the nature of the situation which confronted the Indian authorities in regard to the hides trade in 1914, and it now remains to examine the steps which were taken to deal with it. Almost at once the Government took steps to liquidate certain firms, at the same time licensing others with a German element, the licensed firms altering their constitution so that they could continue in the trade. Subsequently the Imperial Institute was asked to form a committee to inquire into the conditions of trade before, during, and after the war. The committee's findings were that the trade had been conducted to exclude all British firms and to further the interests of German tanners, whose wants were specially studied, and it recommended that during the war no firm having any connection with the pre-war German "ring" should be permitted to remain in the trade, and that after the war an export duty of at least 10 per cent. should be placed on all hides, to be rebated when proof was given that the hides had been tanned within the Empire. In these proposals it seemed that a sound and practical solution of the situation had been found. The next development followed when the British Government, requiring all the raw leather it could obtain, and being probably suspicious of the destination of the excessive Indian exports to neutral countries, became the sole buyer of all available hides. Thereupon, the India Government, to carry out the wishes of the home administration, invited certain British firms to form a Buying Committee, a step which was fully in accordance with the recommendations of the committee of the Imperial Institute. The firms concerned gave their consent on the understanding that no firm of German origin, or concerned as members of the old German "ring," was associated with them, and this stipulation was approved.

The Buying Committee.

With the establishment of the Buying Committee composed as it was of the leading British experts in the trade it might have been thought that nothing further remained to be done. Unfortunately the Government seems inclined to alter its policy, and to throw open the buying business to all firms, a course that would admit even those whose antecedents in regard to the German trade were not wholly above suspicion. This action, in present circumstances, would be little short of disastrous, for now, if ever, is the time to place the control of the trade on a sure footing, so that there can be no danger in the future that the trade will ever again be diverted from British hands. The removal of restrictions, so far from being calculated to achieve this end, might even prove a step in the opposite direction. In the present committee the authorities have at their disposal a body admirably fitted to frame a scheme for the future regulation of the trade. It is known, indeed, that the members had that idea in view when they took office, being under the impression that the committee would become the nucleus of a federation strong enough to resist any "ring" that might be formed in the future. The importance of the realisation of some such project lies in the fact that the German "ring" may, and probably will, be revived after the war, and then, if we are not ready to fight the enemy with suitable weapons, we must be prepared to see all that has been accomplished during the war came to naught. The trade will again flow to Germany, and the revived tanning industry in this country will endure a second death. Of equal importance is it that the arrangements for the control of the trade should be so ordered that they will readily lend themselves to the process of transition. The Home Government has fully realised this, and is taking steps accordingly, and it is the hope of all interested in British trade that the Government of India will work on similar lines, so that when the war ends the trade will be adequately organised to meet German opposition.

HOLLANDIA RICE MILLING COMPANY

In the House of Commons on November 26, Sir J. D. Rees asked the Secretary of State for India whether he was aware that the Hollandia Rice Milling Company, Ltd., Rangoon, was at the beginning of the war deemed by the Government of Burma a hostile firm and placed under control; that it was found that shares in the company were held by a German firm and by a Dutch firm trading in Germany; that one of the directors was resident in an enemy country; whether he was aware that irregularities were discovered; that on May 4, 1917, it was notified in the *India Gazette* that the firm was to be wound up, but that on or about June 1 the Government of India suspended the liquidation and cancelled its previous orders; whether he would state the reason for such cancellation; and what representations were made, and by whom, to induce the Indian Government to take such a step?

Mr. Herbert Fisher: So far as the Secretary of State's information goes, the facts are generally as stated in the first three parts of the question. He has no information that irregularities took place while the firm was trading under control. The business was ordered to be wound up on May 5, but on representation from the Netherlands Government this order was withdrawn on June 9. The Government of India then reported that the company was being allowed to carry on business pending discussion regarding its possible reconstruction. Further inquiries are being made as to the future position of the company.

EGYPT'S TRADE.

Improved Returns for September.

(From Our Own Correspondent.)

Cairo, October 26.

The trade returns for September published by the Customs administration show an improvement in both imports and exports. Imports during the month amounted to £E2,760,223 and exports to £E2,037,179, as compared with £E2,715,175 and £E1,518,688 a year ago. For the nine months the figures are imports £E21,715,670 and exports £E27,596,522, as against £E22,429,644 and £E19,952,534 at the end of September, 1916. The balance of trade is therefore steadily increasing in favour of this country.

Chief Imports.

The principal imports during the month were meat, £E269,344; flour, £E77,505—75 per cent. more in value but slightly less in quantity; raw sugar, £E182,166; petroleum, £E86,864; coal, £E384,118—about 20 per cent. less in value but only half the quantity imported in the previous September; chemical manures, £E148,019; textiles, £E770,538; cotton tissues, £E414,839—a decrease of 40 per cent. in quantity and 20 per cent. in value; and tobacco, £E180,469. The chief exports were skins and tanned goods, £E63,718; cotton seed, £E40,870—a decrease of 66 per cent. in value and in quantity; sugar, £E75,409—more than double in quantity; gum £E37,441—practically nil last year; and cotton, £E1,584,713—the value increased by £E542,033 and the quantity by 7,040 cantars. Cigarettes valued at £E29,766 and weighing 22,499 kilos were exported, a slight increase in value but a considerable one in quantity.

Trade with the United Kingdom.

Although the total imports remained the same for the month Great Britain's share fell by 20 per cent.; the deficit was, however, made up by India and Australia. The chief British imports were coal (all), textiles (over 80 per cent. of the cotton tissues) and worked iron and steel. Australia sent all the meat and India all the flour, tea, pepper, indigo, sacks and 80 per cent. of the cotton threads. The share of the United States and Italy fell off considerably, whilst those of Greece and Chili improved very much, the former owing to tobacco imports and the latter to nitrates imports. Under exports Great Britain's portion improved somewhat though not quite in proportion to the general increase. France doubled her purchases, Italy trebled hers and Japan took £E26,467 as against practically nothing this time last year. All the cotton seed and cake went as usual to Great Britain and 80 per cent. of the cotton. The balance of the latter went as to 12 per cent. to France and 7 per cent. to Italy. France took almost all the gum and cotton seed oil, whilst 75 per cent. of the sugar went to the same destination, the balance going to India. During the month new silver coins to the value of £E80,000 were imported from India, and new nickel coins worth £E10,000 from England.

Trade with the Sudan continued to flourish during the month. Imports into Egypt amounted to £E122,360 as against £E53,725 a year ago, and exports to the Sudan rose to £E128,101 from £E104,285. The principal imports into Egypt were live-stock, £E316,730; cereals, £E15,410; gum, £E216,915, and cotton £E36,979. Exports to the Sudan of note were refined sugar, £E38,890, and cotton tissues, £E14,801.

SHIPPING AMALGAMATION.

Another P. and O. Purchase.

The P. and O. Company has concluded another important shipping deal by acquiring the fleet of large modern steamers of the Nourse Line, owned by James Nourse, Ltd., of London and Calcutta. For over half a century the Nourse line has participated in the East and West Indian trade, its vessels being usually employed in the trade between Calcutta and the islands of the Southern Pacific.

The business will, it is understood, be maintained as a separate organisation. This makes the second shipping line to have been acquired in recent weeks by the P. and O. Company, for only about four weeks ago an agreement was concluded for the purchase of the Hain Steamship Company, Ltd.

TREBIZOND FILBERT CROP.

Uncertain Outlook.

In a district occupied by two belligerent forces, says the United States Consul at Trebizond, in a message dated August 25, it is impossible to obtain official or even reliable semi-official crop statistics. The two principal dealers in filberts, however, have informed this office that they estimate this season's crop for the coast district from Eloa to Hopa (the former to the west and the latter to the east of Trebizond, a distance of approximately 120 miles) to be about 18,500,000 pounds.

Last season's estimate for the immediate vicinity of Trebizond proper was 4,340,000 pounds, as against 17,551,000 pounds in 1913, and 31,000,000 pounds in 1914, an abnormal year. How much of this year's crop can be regularly gathered is very uncertain. The dealers are discouraged and their trade has already been seriously affected. They are also handicapped by the fact that the local executive committee has fixed the selling price at 8 roubles a pood, which at the normal rate of exchange equals $11.41 per 100 pounds; whereas the market price obtained in a near-by town where the sale is unrestricted is about 24 roubles a pood, or $34.22 per 100 pounds. The normal price before the war was $5.66 per 100 pounds.

Yield in Previous Years.

In 1910-11 the crop of filberts was smaller than in 1909-10, showing a difference of 24,000,000 pounds. The total exports for the season were 107,113,300 pounds, to which 5 per cent. for local consumption should be added to show the total amount produced. Of these exports 48 per cent. went to Germany, 22 per cent. to Austria, 10 per cent. to France, 10 per cent. to Egypt, 4 per cent. to America, 3 per cent. to England, and 3 per cent. to other countries. The crop of the 1911-12 season proved to be much smaller, the total being only 58,591,400 pounds. Prices were consequently much higher; they reached $6.11 per 100 pounds, as compared with $4.02 in 1910-11.

TRADE AFTER THE WAR.

Question of Government Control.

The Swansea Chamber of Commerce at a recent meeting protested strongly against the proposals that the Government control over imports and exports should continue for three years after the war, and expressed the opinion that trade would recover and extend by the removal of the present restrictions and limitations at the earliest possible moment after the conclusion of peace. The Chamber strongly urged that no period of time for control after the war should be decided upon until the views of traders were first ascertained.

The question was considered at the London Commercial Sale Rooms on Monday, and a similar attitude was taken up, the following resolution being carried by acclamation (there being only one dissentient):—"That this meeting of merchants, brokers, and others connected with Mincing Lane is strongly opposed to the continuation after the war of the Government's control of trading; and it declares that the best interests of the Empire require that the ordinary channels of business should be resumed with the least possible delay."

BANK OF BRITISH WEST AFRICA, Limited.

ENGINEERING NOTES.

Eastern Competitors.

In previous engineering notes we called the attention of British manufacturers to the great efforts of Japan to capture the Eastern trade hitherto in the hands of the manufacturers of Central Europe. Her recent bargaining with America to hand over to the latter what shipping she could spare in exchange for steel is a proof of her well-organised plans for the development of her iron and engineering industry for that, as well as other purposes. But apart from the businesslike Japanese activity, there is another rising competitor nearer than Japan, and fortunately within the British Empire, but of whom nevertheless careful note should be taken by the manufacturers and trade unionists in the United Kingdom. It is India, whose production of iron and steel is now large enough not only to supply the requirements of the country, but to send a fairly large amount to Australia and the Far East, where Indian brands are beginning to be well known. The principal customer is Japan; whilst in the financial year 1915-1916 the Indian Government took 85 per cent. of the output of the Tata steelworks alone for munitions. But apart from her potentiality in iron and steel, India is also progressing in the engineering industry, and in a short time will be able to supply a great part of the agricultural machinery and implements needed annually for the cultivation of her own vast lands, and perhaps of other Eastern countries. One of the latest indications of India's progress is her entrance into the motor manufacturing industry. A well-known Calcutta firm, we hear, has turned out a vehicle which has been built throughout in that city. Japan has also made good progress in motor manufacturing. The question therefore arises to what extent India, with her cheap and abundant labour and inexhaustible supplies of raw materials, and Japan will be able to compete with British trade in the Near, Middle, and Far East. This question must be seriously considered by British manufacturers.

New Gas Carburetter.

The utilisation of town-gas as fuel in motor-cars is attracting the attention of all users of motor-cars, and especially of companies owning commercial cars employed in transport or mail service in the East. The scarcity of petrol there is much greater than in this country, and hundreds of vehicles remain idle for want of petrol. Apparently only the want of sufficient information prevents owners from deciding whether flexible containers or pressure cylinders should be adopted. To such owners, as well as to others, it may be of interest to know that there are gas carburetters that can be used either with flexible containers or pressure cylinders. The chief features of one of the newest carburetters for such purpose is that it can be inserted between the present carburetter and the induction pipe; and either petrol or gas can be used at will without alteration. When using petrol, extra air can be let in through the gas carburetter, and when using gas the extra air can be let in through the petrol carburetter. Of course, when using gas the petrol is turned off. This carburetter is suitable for using gas from a collapsible holder or from a pressure system, and it is said that it does away with all difficulties when using gas from pressure containers, which defects consist of wasting gas, and from choking the induction system when the throttle is closed. The reducing valve is intended to be used in connection with an ordinary common reducing valve, which will reduce pressure from ,say, 1,500 lbs. to 2 lbs. or 3 lbs.; then this valve is put in, and this reduces the pressure down to a few ounces if necessary, and provides a reservoir for the engine to draw from.

LANCASHIRE COTTON.

Upward Movement Continues.

(From Our Own Correspondent.)

Manchester, Wednesday.

Prices in the market have continued to advance, and there seems to be no end to the upward movement. The increased rates required by spinners have somewhat checked operations, but the inquiry, especially in certain quarters, remains healthy, and it is evident numerous buyers believe that the top in values has not yet been reached. Very important matters are now engaging the authorities with regard to the future of our industry. The Control Board has considered the wages question and the curtailment of the running of looms. The weaving employers, in response to the application of the operatives for an increase of wages of 40 per cent., have offered 10 per cent. in December and a further 5 per cent. in February, and the proposal is receiving the consideration of the representatives of the workpeople. It is expected that the operatives will receive an advance in wages, but there is every probability of the levies upon the masters being continued and compensation paid to the employees who are thrown out of work as a result of the stoppage of machinery. No particular fresh news has been received relating to the Egyptian cotton crop. A demand has again been experienced in Egyptian yarns, and producers of both carded and combed qualities have tended to consolidate their position, which is now very strong. Operations in cloth for Egypt have not been quite so extensive. Some shippers seem to have satisfied their more important wants for the time being. There are expectations of rather freer exports during the next week or two, and very high freights are being paid.

COMPANY MEETINGS.

ANGLO-EGYPTIAN BANK.

The thirty-first ordinary general meeting of the Anglo-Egyptian Bank, Ltd., was held on Friday at the bank, 27, Clement's Lane, E.C., Mr. H. A. Richardson (the Chairman) presiding. The Secretary (Mr. George H. Soul) read the notice and the report of the auditors.

The Chairman said: I propose:—"That the directors' report and the accounts annexed thereto be received and adopted." Egypt has continued to prosper and we are able to give you record accounts. We must go back a decade to find figures approaching the total of our present balance-sheet and the profit and loss account we put before you to-day. Then Egypt was at the height of the ephemeral prosperity reached by the land boom, which collapsed in 1907, leaving wreckage which it took years to clear away. To-day its prosperity stands on a much surer foundation, with a balance of trade in its favour of over £20,000,000, and little or no speculation in land. Since that time our deposits have grown by over £6,000,000 and our balance-sheets have shown an increasingly strong position. We have now £1 of liquid assets for every £1 of demand liability. Such a position is highly satisfactory to those responsible for the management of the business and the yearly accounts, and I imagine also to those shareholders who scrutinise our balance-sheets to form their own opinion as to the risk of uncalled liability. In 1907 we showed £133,000 profit— a record until to-day, when we show £144,000, after having provided for the heavy extra taxation now required. This really phenomenal increase of actual profits is due to the growth of our deposits, the high value of money in London, and last, but not least, to the care and ability of our officers at all our branches. The prosperity of Egypt is, as you know, due to its cotton crop and the high price realised for it. The crop was only 5,111,000 cantars, but its value was £42,000,000, or more than double that of the preceding one. The cereal crops were, perhaps less in quantity than those of last year, owing to a large reduction in maize, but they have contributed their full share, as there has been a big advance in prices, while the continued presence of large numbers of soldiers in Egypt has much more than made up for the suspension of the pre-war tourist seasons. It is said that Egypt has added during the war at least £30,000,000 to its wealth. Everyone connected with Egypt must deplore the death of the late Sultan, the trusted friend of this country. We may be sure that the new Sultan will follow in the footsteps of his predecessor; his reign starts with the brilliant victories in Palestine, and we may hope they will prove a happy augury for the future, and that under him Egypt will go on prospering more and more.

The accounts show the same strong position and much the same features as last year. Deposits have increased by 1½ millions, but the improvement is better than the figures indicate, because a million of what could only have been regarded as temporary money included in last year's total has been repaid and replaced by deposits which should be of a more permanent nature. Bills payable are reduced to a quarter of a million, and are now really cheques and demand drafts in the Post Office. Acceptances for clients have merchandise behind them, and are now a declining quantity, because business has become largely cash instead of acceptances against documents. Our war loss reserve remains intact, and will do so as long as we can continue as hitherto providing out of revenue for all ascertained and expected losses. Investments include £1,000,000 5 per cent. National War Loan written down to 93. Advances show a gratifying increase of half a million. The dividend and bonus we give you this year are equal to a 23 1-3 per cent. tax deducted distribution. I am sure none of you will object to our having reverted to the old bad habit of paying our dividends tax free. You have the satisfaction of contributing a substantial amount to the country for excess profits duty. As regards the current year, the cotton crop is estimated at 6¼ to 6½ million cantars, and so far our reports go to show that the quality of the arrivals in Alexandria is a great improvement upon that of recent years. If shipping can be provided for the greater part of this supply Egypt will again coin money, for prices are well above last year's quotations. For next season the area of cotton cultivation has been reduced in order to leave more ground for the cereals—a wise act, for there is little use growing more cotton than can be shipped, and the prices of cereals in Egypt have reached a level which must impose great hardships on the poor who cannot grow their food and people who have only small fixed incomes to live upon.

Mr. R. H. Foà seconded the motion, which was carried unanimously.

EGYPTIAN HOTELS.

The nineteenth annual general meeting of the Egyptian Hotels, Ltd., was held at the offices of the company, 11, Ironmonger Lane, London, on Tuesday last, the chairman of the company, Lord Claud Hamilton, M.P., presiding.

The notice convening the meeting and the report of the auditors were read.

The Chairman said: Gentlemen,—The accounts for the year ended April 30, 1917, are in your hands. I regret that I am unable to report that the improvement shown in the accounts for the year ended April 30, 1916, was maintained, but it is a matter of congratulation that, in view of the decline in the receipts due to the exigencies of the situation in Egypt and to the great increase in the cost of the maintenance of the commissariat at Shepheard's Hotel, owing to the war, the profits earned reached the figure of £12,520. I may mention that considerable improvement in the position set in during the last quarter of the company's financial year, that this improvement has up to the present time been maintained and that it is the hope of myself and my co-directors that this will continue and be reflected in the next balance-sheet to be presented to you. With regard to the accounts, I have little to add to the directors' report attached thereto. The plant, fixtures and fittings have been consistently depreciated. The stock on hand has been valued by the hotel manager, and proper reserve has been made for any doubtful debts included in the sundry debtors. In conclusion, the best thanks of the board and of the shareholders are due to the members of the local board and to the hotel manager and his staff for the efficient manner in which they have carried on the company's business during this most trying year, which has been evidenced by the oft-expressed appreciation of the guests at the hotel. I now move:—"That the directors' report and accounts for the year ended April 30, 1917, as submitted to the shareholders, be received and adopted."

A question was asked with regard to the sale of some property belonging to the company, and in reply Sir William B. Peat said that a portion of the purchase money had been paid. The company still held possession of the land. At the present time it was impossible to get the purchase completed, but they could rest assured that the directors were looking after the interests of the company, and that eventually it would be completed.

The resolution that the report and accounts be received and adopted was seconded by Sir William B. Peat and carried unanimously.

Sir William B. Peat proposed the re-election of Lord Claud Hamilton, the retiring director. As a colleague of his lordship, he said, he could testify to the assiduous care which the Chairman had exercised and the invaluable benefit which the Board had received from his experience and advice on all matters connected with the affairs of the company.

Mr. Stavridi seconded the motion, which was unanimously agreed to.

The Chairman, in acknowledging his re-election, said he was very hopeful about the fortunes of the company when the war came to an end. He thought Egypt would then become a great place of resort during the late autumn and winter months for both American and British people.

On the motion of Mr. McAuslan, Messrs. Turquand Youngs and Co. were reappointed auditors.

A resolution was passed expressing the shareholders' appreciation of the able direction of the local board and of the assistance rendered by the manager and the staff, and a vote of thanks having been given to the Chairman, the proceedings terminated.

COMPANY REPORT.

ANGLO-PERSIAN.

The report of the Anglo-Persian Oil Company, Ltd., states that the profit for the year to March 31, after allowing for depreciation, debenture interest, home charges, etc., amounts to £344,109, to which has to be added the balance brought forward,

A WORLD-WIDE REPUTATION FOR OVER THREE-QUARTERS OF A CENTURY

Digitized by Google

£33,646, making a total of £377,756. From this the following dividends, less income-tax, have already been paid on the preference shares at the rate of 6 per cent. per annum: For half-year to September 30, 1916, £30,000; for half-year to March 31, 1917, £30,000; and the directors now recommend the payment of the following further dividends, less income-tax:—6 per cent. per annum on the ordinary shares, £128,219; 2 per cent. per annum additional on the preference shares, making 8 per cent. for the year, £20,000, leaving £169,537; out of which the following appropriations have been made:—To preference share reserve fund, £50,000; to general reserve fund, £100,000, leaving £19,537 to be carried forward. During the year his Majesty's Government paid a call of 2s. 6d. per share on their 2,000,000 ordinary shares. Since the close of the year the balance of 7s. 6d. per share has been called up and paid, and the Government have also taken up the £199,000 of 5 per cent. debenture stock for which they agreed to subscribe. The loss sustained by the company in consequence of the cutting of the pipeline by Persian tribesmen has now been ascertained to amount to £402,887, for which a claim has been duly lodged with the Persian Government. No credit for this has been taken in the trading account. The new 10-inch pipeline was completed and brought into operation in January. This completed one-half of the programme of extensions for which capital was subscribed by his Majesty's Government, but the year under review only gained a partial benefit from this capital outlay. The full benefit will, however, be reflected in the results of the current year. The refinery extensions referred to in the last report have not yet been completed owing to the loss at sea of a portion of the plant, but this material has been replaced and the extensions will be brought into operation at the earliest possible date. To meet urgent war requirements further immediate extensions are necessary, and to provide the capital for these it is proposed to make an issue at a premium of a further 1,000,000 participating preference shares of £1 each, ranking *pari passu* with and having the same rights as to dividend and participation as the existing preference shares. The Treasury's sanction to the issue has been obtained. The field from which the producing companies are drawing present supplies of crude continues to develop most satisfactorily. The wells previously brought in still flow with practically undiminished production, and the new wells drilled in during the year are of an equally prolific character, thus confirming previous opinions as to the great richness of this field. A further well sunk in a reserve field has proved a large additional area of productive territory, and on one of the new fields now being tested a good show of oil, with strong gas pressure, has been struck, but it has not yet been practicable to estimate its producing capacity. Since the close of the financial year the directors have purchased from the Public Trustee the whole of the shares of the formerly German-controlled undertakings of the British Petroleum Company, Ltd., the Homelight Oil Company, Ltd., and the Petroleum Steamship Company, Ltd. These should prove valuable acquisitions. The seven tank steamers contracted for in 1915 are now in commission, and several others have been acquired. The company's fleet now afloat numbers twenty-two vessels.

THE
GENERAL ANGLO-SERBIAN INDUSTRIAL & FINANCIAL COMPANY, LIMITED,
106, Bishopsgate, London, E.C.2

The Company has been formed to promote British Trade and Industry in SERBIA and other BALKAN STATES.

The Company is a Promoting Company, and is prepared to consider any proposals for the Financing and carrying on of any business in the above countries.

Agents in ROME, and as soon as circumstances will allow Branches will be opened in SERBIA and other BALKAN STATES.

Correspondence is invited from those interested in SERBIA and the BALKAN STATES, or contemplating business with these countries when communication is restored.

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Street,
Thursday.

Business has been on a much larger scale this week, the better news from the Italian front having, no doubt, contributed to some extent to a revival in the demand from Egypt. The further large increase in the circulation of the National Bank of Egypt and the continued rise in the price of cotton have also been favourable factors. As regards Government stocks, Egyptian Unifieds are again in demand at a quarter advance on last week's price; but business has continued very restricted, sellers being very scarce.

In Bank shares, Nationals, although unchanged until to-day, are now a firmer market, and close 3-16 up at 17⅛ on some good local buying. Agriculturals are 3-32 up at 6 5-32, all the shares on sale round this price having now been absorbed. A further rise of ¼ to 14 xd has to be recorded in Anglo-Egyptians. Land Banks are, exceptionally, 1-16 easier at 7, round which price some of the shares offering have been taken.

In railways, Delta Lights are 1/16 harder at 6 3/16. The features in Land shares have been Allotments, which have jumped up sharply ¼ to 3⅝, with a fair business doing, and Sidi Salems, which are over 5s. up at 20s. 3d. bid on some moderate buying in a rather restricted market. Aboukirs have improved 6d. to 21s., with a fair amount of business passing. Behéras are looking rather firmer, but their price remains unchanged at 13. Delta Lands have been neglected, but Gharbiehs have been in demand on Egyptian account, and are over ⅛ up at 1¾ bid. New Egyptians are 3d. higher at 15s. 7½d., with a large business going on daily; and, as the price of these shares is now higher in Egypt than on this side, it would not be surprising, should the present favourable tendency continue to see a further accentuation of the rise in these shares. Union Foncières are 3/32 higher at 2⅛, and here also a very fair amount of buying from Egypt has taken place up to about 43s. In United Egyptian Lands there are some biggish buyers about round 1s. Egyptian and Foreign Trusts are 3d. firmer at 7s. 9d., and, in view of the appreciation in many of the holdings, the shares should go to a higher level.

In Miscellaneous shares a small transaction took place in Alexandria Waters at 12⅜, and some business has been doing in Markets, which are 3d. higher at 27s. 9d. Salts and Sodas have been quite a feature, and, on buying from Egypt and local demand here, have improved about 2s. to round 36s. 6d. Khedivial Mails, after rising to 39s. 9d., close 3d. down to 39s.

In Greek securities the market has a firmer look, and some business has been done round current prices; but, apart from a rise of one point in 1890's to 56, there is no change to record.

Oil Shares.

Anglo-Egyptians (B) were unchanged at 28s. 6d.-29s. 6d., as were Roumanian Consols at 10s. 3d.-11s. 3d. Otherwise the market was rather weak. Burmah declined ⅛ and North Caucasians 1-32.

COMPANY NOTES.

Dividends, Payments, etc.

The directors of Ruston Proctor and Co. have declared a dividend of 5 per cent. per annum on the ordinary shares, the same as last year.

Egyptian Markets.—First 5 per cent. debenture coupons No. 38 falling due December 1, are payable at the Anglo-Egyptian Bank, 27, Clements Lane, E.C., at the face value, and at the branch offices of the Anglo-Egyptian Bank at Cairo and Alexandria, at the current rate of exchange.

Egyptian Salt and Soda.—On and after December 1 the registered office will be at 194, Palmerston House, Old Broad Street, E.C.2.

Spies Petroleum.—The eighteenth general meeting will be held at Winchester House, Old Broad Street, E.C., on December 6, at noon.

INDIA'S TRADE BANK.

In the House of Commons on Wednesday Sir J. D. Rees asked the Secretary for India whether he could give the House any information regarding the reported establishment in India of a trade bank; and would he say to what extent this bank, in the event of the report being founded upon fact, was to be a State or a State-aided institution.

Mr. Fisher, who replied, said the Secretary of State had seen the statement in the Press, but he had no further information. He had not sanctioned the establishment in India of a trade bank.

NOTES OF THE WEEK.

The military interest of the week has again been concentrated on the Western front. In Mesopotamia there was no particular activity, except for the briefly reported British success on the Diala, nor was any to be expected so soon after the appointment of a new Commander-in-Chief. In Palestine the rapid advance of a fortnight ago has come to an end for the time being, but, fortunately, it has not been necessary in General Allenby's case *reculer pour mieux sauter*. No doubt he will jump far enough and fast enough when the time comes, and the present interval is certainly not being wasted. The Turks have made one or two ineffectual assaults on our positions, and they are naturally strengthening their line against the further attack which is seen to be inevitable.

Meanwhile the Turkish talk of a separate peace continues and rather increases. The picturesque Hungarian, Count Karolyi, who has been staying in Switzerland for some days past, having persuaded himself that the Allies were ready to treat for peace, has admitted that Turkey is ready to consider proposals; and he appears to be sincere in his declarations, since he remarks that neither Bulgaria nor Austria is in a similar frame of mind, and further gives it as his opinion that Germany will come out of the war as the dominant Power in Europe—a doctrine which is hardly likely to ingratiate Karolyi with either England or France. (It is interesting to note that Admiral Tirpitz in an incautious interview has let slip that he is not so happy about the position, since in his opinion England has won more than Germany so far; but in fairness it must be admitted that his pessimism may be induced by half-pay.) As to Turkey, if she really requires a separate peace, she knows where to apply for terms. The marriage with the Kaiser has been so disastrous that one can well understand her desire for a divorce—particularly if she could be sure that Germany will not obtain custody of the one child of the union, the Baghdad Railway.

Unfortunately the alleged Turkish desire is matched by the Russian demand for a separate peace, which has already reached the stage of an armistice accomplished on the Eastern front between Russia on the one side and Germany, Austria, and Bulgaria on the other. From an armistice to the actual conclusion of peace may be a long or a short road; the Leninites have talked so much of "no annexations and no indemnities" that they may find the position a little awkward when they discover that Germany is out for the control of Poland, Lithuania, and Courland, a desire which her official spokesmen have so far veiled in rather clumsy language. Bulgaria has shown no such modest reticence. She has made it known that she insists on Macedonia, the Dobrudja, and part of Serbia—a demand which, if acceded to, would leave her the largest State in the Balkans.

The present heads in Russia, if they can be so called, have shown themselves so complaisant to German opinion and so hostile to the Allies that they may even swallow these demands, making peace at the expense of the western provinces of what once was Russia and of Roumania. In that case Germany would have won the game, but not the rubber. The position in the Balkans would be serious in the extreme, but not hopeless. Roumania would be isolated, since Russia would certainly not allow the Western Allies to communicate with Jassy; but we know that Roumania, with a heroism for which no words can be too high, intends to carry on, whatever happens. She has this consolation, that Kaledin in South Russia has no intention either of making peace with Germany or recognising the Berlin-subsidised Government of Lenin; and the position in the Ukraine is also not necessarily permanently favourable to the Central Powers, despite their intrigues of the last decade.

For the time being, Russia can no longer be considered as a great power—Siberia has this week imitated the other provinces and formally declared its independence—and the political situation both of Roumania and Turkey must, therefore, be profoundly modified. At the moment this is undeniably all in Germany's favour, but this will not necessarily prove to be so permanently. While the Teutonic Press is naturally exultant over this immediate gain, the more sober elements in the enemy journals seem to show an undercurrent of doubt, and to fear that a situation which has so suddenly turned in their favour may equally suddenly become clouded. No competent observer, either on the German or the British side of the hedge, believes that the present situation in Russia can last, and any change must almost necessarily be to our advantage. It is quite on the cards that Germany may make peace with Russia, and then discover that the real Russia will not make peace with her.

For the moment, while her statesmen are considering terms, her soldiers are certainly considering fresh campaigns. There are nearly two million German and Aus-

Digitized by Google

trian prisoners in Russia and Siberia, and the main object of the German General Staff no doubt is to speed up the politicians to make peace in order to get these men back again. The details of the conflict between the two will not be known for many a long day, but nobody who has read the memoirs of Busch will forget the conflict that raged between Bismarck and Moltke on the subject of peace terms in 1871, or doubt that a similar struggle is in progress now. If Germany makes peace, these prisoners will be a great asset to her, even though their numbers are subject to rather considerable deductions from the fact that a large proportion are Austrian Slavs, who cannot be depended on in the field.

These prisoners, together with the armies which will no longer be needed against Russia—the latter, however, being mostly second-line troops and men resting after Western service—would give Germany a large addition to her wasting man-power. Now these troops must be used in one of three ways:—(a) In the invasion of England, which from Germany's standpoint would be best of all, if it promised any chance of success, since she looks on England as her arch-enemy; (b) in the renewed attempt to break through the French front, which would give her a chance of reaching Paris and perhaps the Channel—an excellent second best, according to the Berlin calculation, but only a second best, since she would still be unable to touch England or the outer world; and (c) an attack on Roumania, Greece, or Italy, or the reinforcement of Turkey. This would in many ways be only a third best for Germany, since it would not win the war outright, as it would leave the Western Powers who are the stay of the war untouched. But it has in it superficially more of the elements of immediate success; it would be more satisfactory to Germany's allies (who, after all, may still venture to put in a word for themselves from time to time), and it would please those who wave flags and "look on the map," *à la* Bethmann-Hollweg. In that event the Salonika front, after a long stagnation, would again become of primary interest.

President Wilson has declared war on Austria, as was anticipated in THE NEAR EAST a fortnight ago, and he has stated that this should logically lead to war against Turkey and Bulgaria, only that these are "mere tools of Germany, and do not yet stand in the direct path of our necessary action." It may, nevertheless, become difficult at some future date for America to avoid a declaration of war against these States, unless indeed Turkey succeeds in cutting the painter. President Wilson has indirectly answered Lord Lansdowne's letter by his action; but while his speech will be welcomed by the Entente, it is possible that one passage in it will cause some uneasiness among the Jugoslavs—that in which he remarks that "we owe it to ourselves to say that we do not wish in any way to impair or to rearrange the Austro-Hungarian Empire." Now, the Corfu declaration, when carried out, implies a very considerable rearrangement and diminution of the Austrian Empire, and it has been generally understood that President Wilson was firmly in sympathy with this propaganda—indeed, some passages of his past speeches could be cited in support of that movement.

Probably, however, the governing clause in his speech "the peace we make must deliver the people of Austria-Hungary, the peoples of the Balkans, and the peoples of Turkey, alike in Europe and in Asia, from the impudent and alien dominion of the Prussian military and commercial autocracy"—will be accepted as sufficiently satisfactory by the small nations of the Near East and the peoples which are struggling for nationality. If Austria could be freed from Prussia, it would not be very difficult for the Roumanians and Jugoslavs to free themselves from Austria.

Lord Curzon's statement about Aden added little to our knowledge of the military position, probably for the excellent reason that there was little to add. He announced, however, that Aden has been transferred from the India Government to the Foreign Office. The change is not, perhaps, very important, although it may denote a certain change of orientation, Aden having been considered for the last fifty years "the frontier fortress of India," as the Cape used to be two centuries ago, whereas now it will have a constitutional status somewhat akin to that of a Crown Colony. The present war, however, has made so great a change in the prospects of the vast region between Egypt and India that there is something to be said for control of one of the vital points of the route directly by the British Government.

The news that the campaign in German East Africa has at last been brought to a successful end will be received with almost as much interest and relief in India as in England. Indian troops have taken a prominent part in the reduction of the last and largest of the German colonies, and the possibility of Indian settlement in that country after the war has already been discussed in various quarters. For many centuries, of course, before the Germans or even the Portuguese came to East Africa there was communication between that coast and India, but no actual settlement has been made there. Now, however, that the religious prejudice against crossing the sea is getting less in India there seems to be no particular reason why this method of coping with the ever-present population question should not be tried. It would help to relieve the position in India, and it would undoubtedly be of advantage to the development of East Africa.

The few German newspapers which have mentioned the British Government's decision with regard to the future of Palestine have affected to regard it as a mere political move, which will remain entirely without influence either on the course of the war or on Jewish opinion. That it will not affect the military situation will, of course, be admitted; it was never intended to do so. But the idea that it will not touch Jewish opinion is already demonstrated to be false. Appreciation has already been expressed in Jewish circles in Sweden and Holland among neutral States; from America have come messages of sympathy and congratulation. It was not, of course, to be expected that the Jews in Germany would openly express their approval; they are not in a position to do so, and some of them, no doubt, who are thoroughly acclimatised to the bleak Prussian soil, take only an academic interest in the project, although after the war, when the scheme is a success, they may find it wise to revise their opinion, if they intend to retain any real connection with Jewry. But it is palpably ridiculous to pretend that the great bulk of German Jews take no interest in the home of their race, and it will need more than a newspaper denial to convince the world that they are not following the development with acute interest.

Indeed, it may be suspected that discreet inquiries are being made through neutral sources as to the scope of the project. The official announcement, it will be remembered, necessarily confined itself to a statement of the main principle, and left the details in a nebulous condition, presumably for subsequent discussion. Much depends on the details, but these, of course, are to a large extent a matter for discussion with the Jews themselves. And on that matter, no doubt, Jews in enemy countries will take care to be informed. They will not need to rely entirely on such information as the German Government allows to be published for their knowledge.

In Lord Brassey's record of the Sunbeam, which has just appeared, is a reference to the ex-Queen of Greece which may be quoted. "Her Majesty was an annual visitor to Eastbourne; often I had the honour of being her partner at lawn tennis. When we sat out on one occasion, I remember, after a few moments of silence, these words of exclamation, 'Dear, dear England! How I love your land! How completely I feel at home when I am here! There is no land I love so truly.'" But *tempora mutantur, et nos mutamur*. . . . The Kaiser's sister has since dissembled her love with some success.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, November 2.

The Secretary of State for India.

Mr. Edwin Montagu, Secretary of State for India, has arrived here with his suite on his way to India. He is staying at the Residency as the guest of Sir Reginald and Lady Wingate. On Saturday last he was received in special audience by the Sultan, to whom he was introduced by the High Commissioner, and by whom he was afterwards entertained to luncheon. The guests included the Earl of Donoughmore, Sir William Duke, Sir J. Makins, Mr. Charles Roberts, the Prime Minister, the Ministers for Education, Justice, and Public Works and War, and the Hon. Mervyn Herbert and Captain Alexander, of the Residency Staff. On Monday Mr. Montagu, accompanied by Mr. Keown Boyd, of the Residency, visited Al Azhar, where he was received by the Chancellor and the Ulema. He made a complete round of all the classes, and had a long conversation with the Indian students.

The Egyptian Frontiers.

At their last sitting the Council Ministers approved of the grant of an additional credit for the formation of two further detachments of Camel Corps. These men are intended to do duty at the various frontier stations, where the situation is no longer such as to warrant the retention of British troops and where the work of policing can quite well be done by Egyptian forces. The new administration recently formed for the control of the various frontier territories has got going, and appears to be doing quite good work. It must not be expected that this new organisation should do anything more than simple police work, however, for it must of necessity be to a large extent a native-staffed department. Any extensive development or pacification of the regions it is called upon to administrate would require the employment of a large leavening of white men, and these cannot certainly be spared at present from the very much more important war work which still remains to be done in this part of the world. The fact that the new administration is able to arrange for the freeing of British troops from frontier police work for employment at more vital points alone should be sufficient justification for its existence, without its being expected to undertake any other more ambitious schemes.

In this connection it is interesting to note that the process of replacing able-bodied soldiers by civilians in the various base offices is proceeding apace. Ladies have been introduced into every branch, including Intelligence, and it has thus been found possible to send further up the line a considerable number of men who would have otherwise been employed less usefully. In addition, the civil administration has stepped in to the assistance of the military, and has set up what are known as civilian employment bureaux in Alexandria and Cairo for the recruitment of office labour from the civilian population, European as well as Egyptian, for employment in the various offices at the bases and in the Canal zone. I understand that these bureaux have registered a very considerable number of men for this work, and that the military authorities are daily drawing on them for labour to a very large extent.

The Control of Supplies.

The new Department of Supplies is gradually settling down to its functions under the Controller, Mr. J. I. Craig. Offices have been taken for it in the buildings occupied in peace times by the staff of the Legislative Assembly, the labours of which have been suspended since the war, and the complete control of all supplies will soon be carried into effect. Already the various Tariff Commissions have been forbidden to alter prices of the various commodities inscribed on the tariff without the previous permission of the department, and steps are being taken to put an end to the absurd anomalies which previously existed and which certainly were a source of irritation to the population, and to introduce some system of co-ordination between the provincial and urban tariffs. It will, of course, be some time before all the questions affecting supplies are tackled, for that depends largely on staff, and it is an exceedingly difficult matter to find the requisite men; but in the meanwhile no time is being lost in grappling with the more pressing and more serious features of the situation.

The Government has just issued an interesting note with regard to the functions of the new department. It puts on record the fact that it has been created for the control of foodstuffs and articles of first necessity, with a view to assuring that the quantities necessary to the country are available and to regulating their distribution in the various districts; but that its prime object is not, as has been somewhat freely stated, to buy up all the crops, so as to assure supplies for the British forces operating in and based upon Egypt. It is, of course, quite possible that the department will be called upon to arrange for providing these forces with certain supplies, but the Government points out that only such quantities as can be spared by Egypt will be taken up by the military authorities. This is a decidedly comforting communication, for it means that the requirements of the local population will be satisfied before anything is withdrawn for consumption by the British forces, and it allays for all time the fear which was prevalent that the purchases made by those forces would create a shortage locally in certain commodities.

The Racing Season.

The Cairo racing season was opened by an excellent meeting at Heliopolis on Saturday last. Owing to the high Nile, it will not be possible to open the racecourse at Gezira until a much later date than usual this year, but an ideal arrangement has been made whereby the course at Heliopolis, which has been closed for several years now, will be used until the inundations have subsided, and ultimately weekly meetings will be held alternately at Gezira and Heliopolis. The racing last week was excellent, and was thoroughly appreciated by the large khaki crowd that attended. It was in every way an auspicious send-off to the winter racing season, and all concerned are to be congratulated on the very satisfactory arrangements made by them.

CONSTITUTIONS IN THE MAKING.

By COLES PASHA

(*Continued.*)

In many respects the Egyptian classification of Ministries will form a useful precedent for a Presidency Executive. In 1913 Lord Kitchener decided that "Public Health" had outgrown the ordinary dimensions of a department, and very rightly cut off some of its branches, which really had little connection with public health. I think that his lordship would have been still wiser had he created a Ministry of Public Health and added to it the control of Local Government institutions which are now under the Interior. I suggest that this be done in India; we should then have a Presidency Executive consisting of Ministers of Justice, Interior, Public Works, Agriculture, Public Health and Local Government, Finance, Education, or seven in all.

The Ministry being an elected body and responsible to the Legislative Council, the Governor of the Presidency should cease to take an active part in the Council, representing the Crown rather than the Executive Head of the Presidency, as he does now. The Governor should be assisted by a Privy Council of four, two of whom should be members of the Indian Civil Service and two natives of India, to be nominated by the Governor-General in Privy Council. Every Act passed by the Legislative Council should be submitted for approval to the Governor in Privy Council, who would have the right to veto or approve the same, but not to amend. In the event of non-approval or veto, the Act to be returned with a reasoned statement as to why it has not been approved. If again submitted with a two-thirds' majority of the Council and again not approved, the final veto to rest with the Governor-General in Privy Council. The Governor in Privy Council should also have the power of summoning, adjourning, and dissolving the Legislative Council, the latter power, as also the dismissal of Ministers, to be exercised only after the approval of the Governor-General in Privy Council.

As the Governor will cease to take any active part in the debates of this Council, a "Speaker" will have to be appointed to preside. He should be selected from the Civil Service, not elected by the members. In contradistinction to the ex-officio presidents of the District and Local Boards, the Speaker of this Legislative Council must not be a managing director or dictator in any sense of the word. He should have no preconceived ideas on political questions, but, nevertheless, must be a strong man on points of order and procedure, as it will rest entirely with him to rule out objectionable motions, and the maintenance of order generally will be no easy matter. He will be responsible, too, that the Legislative Council does not exceed its powers and attempt to legislate on matters reserved as now for the Government of India.

I am of the opinion also that in case of a dissolution of the Legislative Council or dismissal of Ministers and the non-appointment of others, the Governor in Privy Council should carry on the duties of the Executive for the time being, and provision should be made for this in any Self-Government Act which may be introduced. The occasion will, I am sure, never arise, but the fact that the Statute contains such a provision might possibly, in some remote contingency, obviate the necessity of proclaiming Martial Law.

A period of three years will suffice for the life of the Council, and in ordinary circumstances the outgoing Ministers will continue in office until their successors are appointed.

There are many other details which cannot be dealt with in the space of a short article, but these are broadly the lines which, in my opinion, Presidency Home Rule should follow. The Indian Nationalist will be so pleased that he will probably not question the very real safeguard surrounding the elected Executive. On the other hand, I suppose my Indian Civil Service friends will be more than shocked at such radical proposals. But I can assure them that everything will go on much as it does now, and after a time it will come quite as natural to interview the native elected Minister to persuade him to accept your views on any particular reform as it is now to call on the Member of Council.

With the permanent Indian Civil Servant below and the Governor in Privy Council above, the Indian Minister will be between our old friends the "anvil and the hammer," and not have much of a chance of kicking over the traces, even if he desired to do so.

The reform (if you like to call it so) of the Presidency Council is comparatively easy; it is when you reach the Government of India, and higher still the Secretary of State in England, that the problem of Home Rule becomes much more difficult to solve. A well-known Indian reformer, now deceased, has left a last will and testament in the shape of a scheme of a Legislature for the Government of India on the model of the German Federal Council and Reichstag, and it seems to be generally accepted that the Reform Act of India will more or less follow these lines. But it must not be forgotten that the India Government is not acquiring sovereign powers ceded by other States, as Germany and Australia did. The Government of India possesses already sovereign rights; it is delegating to, not acquiring from, subordinate States. Perhaps, therefore, there is not the same necessity for a Federal Council or any other form of Second Chamber. But the great difficulty is, of course, that, even if you accept an elected native Executive in a Presidency, the Government of India's Council of Ministers must for many years still to come be composed largely of Englishmen—Interior, Justice, Education, and Public Works might *possibly* be filled by natives of India, but the Minister of Finance, War, Foreign Affairs, Railways, and Postmaster-General must certainly be English. A mixed Ministry of this description would in no way be under the control of an elected Legislative Assembly, whatever its relations with the Governor-General might be. The question arises, therefore, would it not be better to follow the American rather than the German precedent and keep your executive entirely separate from your elected Legislature, the Governor-General appointed by the King-Emperor taking the place of the elected President?

I am inclined to think that this offers the best solution, and is more in keeping with the existing form of the Government of India. There does not appear, however, any necessity to have a Senate and a House of Representatives; a single Chamber will suffice; but I should prefer to see it elected after the manner of the American Senate rather than after that of the German Reichstag. Lord Bryce has, I know, laid down that, whatever precautions you may make, the will of the people will nevertheless have the final word. In America, perhaps, but not in the East!

We have seen what a formidable task it is to elect even for a Presidency a popular Chamber to include all interests; it is certainly impossible to find seats in one Legislative Assembly for every community who may claim the right to be heard in the government of India as a whole. It seems to me wiser not to attempt to do so, merely leaving it to the Legislature of each Presidency to elect members to sit in the Legislative Council of India. In America the Legislature of each State elects the same number of Senators irrespective of size and population of the State. There is a special reason for this in America which does not exist in India. It seems only right, therefore, that the more important Presidencies should have a larger number of representatives in the Indian Council than the smaller Lieutenant-Governorships. (If all are not re-grouped into Presidencies.)

I would also ignore the American precedent, and would allow the Executive to take part in the proceedings of the Legislative Assembly as the Ministers do now (since Lord Kitchener's Reform Act) in Egypt, an English Minister presiding instead of a Speaker.

The same Egyptian law should also be a guide in the matter of initiating legislation, both the Executive Council and the Legislative Assembly being given the right to do so. But I would once more follow the American procedure and keep the Governor-General (the President) outside the Legislative Council, reserv-

Digitized by Google

ing for the Governor-General in Privy Council the same rights of veto or final approval of legislation emanating from the Legislative Assembly of India as the local Governor has for Presidency legislation. As the Executive of the Government of India will be a nominated and not an elected body, there does not seem to be any necessity to grant the Governor-General in Privy Council the right to dissolve the Legislative Assembly, and its life might be prolonged to five years instead of the three of the Presidency Councils. It might even be made an Assembly which never dies, as the American Senate.

The Privy Council should consist of six members, three being members of the Civil Service and three being natives of India to be nominated by the Secretary of State.

It may be observed that I have suggested a Minister of War rather than the Commander-in-Chief for the Viceroy's Council. As we all know, there has been much discussion on this point in connection with the late Lord Kitchener. I may state that at a private dinner given to Lord Kitchener in Cairo when he was on his way to India I, amongst others, was an interested listener when Lord Kitchener made no secret of what his views on the subject were. I remember that I remarked afterwards to my host that the official life of the Military Member of Council would not be a long one, as it was clear that Lord Kitchener intended to be the Minister of War as well as Commander-in-Chief. In fact, his lordship evidently thought that the Military Member of Council was, as Minister of War, more powerful than the Commander-in-Chief. It seemed clear to us that Lord Kitchener did not object to there being a Minister of War, only that it was not a post for an officer on full pay and of *subordinate rank to himself* to hold. This view of the case is not usually taken by Lord Kitchener's critics, and on this account the conversation after dinner is, I think, of interest.

Such is the brief sketch of a scheme which, I think, will satisfy Nationalists and do no harm, even if it does no good. It may be asked, "Why, as you recognise the difficulties of popular control in the Government of India, do you go out of the way and ask for trouble in the local government of a Presidency by creating elected Councils and Executives responsible to those Councils?" My answer is, "If I rightly understand the question, we are not out to consider what is the best form of government in India, but the best form of limited Home Rule which it is *agreed* shall be established. We have, in fact, reached India's goal, as *The Times* puts it. For the last fifty years we have been creating Municipal and District Councils, etc., etc., and teaching the people how to govern themselves. The next step is assuredly the Local Self-Government of a Presidency, even if the Government of India continues much as formerly."

As I am neither a politician nor a professional contributor to magazines, I suppose I have no right to be heard. On the other hand, it does not fall to the lot of every man to have served in the East for forty years with some of England's ablest administrators. I should indeed be wanting, if I had failed to form any views of my own on the various forms of government I have been associated with. I venture, therefore, to offer the conclusions I have arrived at for the consideration of the authorities who will have the final word on the Indian Home Rule proposals about to be discussed.

THE CITY AND M. VENIZELOS.

In a telegram to the Lord Mayor of London, the Mayor of the Piræus, M. Panagiotopoulos, says:—"The Piræus community, whose great Hellene, M. Venizelos, happens to be its first citizen, felt with national pride particularly deep emotion for the splendid welcome accorded at the Mansion House in the glorious metropolis of the British Empire to the great leader of Hellenism which was addressed by the Lord Mayor and eminent British statesmen. The Piræus Community, thankful and proud of the high honours bestowed on their eminent citizen, whose intrepid courage and sublime political ability enlarged Greece and afterwards entirely saved her from complete destruction, and now elevated her to the eminence of being allied to Great Powers excelling in civilisation, beg to express to your lordship cordial sentiments of infinite honour and gratitude from the people who are ready to suffer any sacrifice in partaking in the great struggle for humanity's highest ideals for which the noble nations of the Entente fight."

PERSIA AND THE RUSSIAN REVOLUTION.

FROM OUR CORRESPONDENT.

TABRIZ, October.

Signs of the Times.

Some time ago I was complaining to a highly intelligent Persian friend of the absence in such a large city as Tabriz of a good school, of free hospitals and of orphanages. I also pointed out that there was no good daily newspaper—not even a weekly one. His reply was that a newspaper was impossible, as it was bound to be the mouthpiece and organ of "others." We should not be able to write in it what we liked, but only what was allowed or ordered. Much of the latter would be in direct conflict with Persian interests, but the paper would have to publish it or run the risk of being suppressed.

This conversation took place during the old Russian régime. There is now a different Government in Russia; liberty is the order of the day, and Persia enjoys a certain amount of relaxation from Russian pressure. One of the first-fruits of the new-born freedom in Tabriz is the appearance of a Persian weekly magazine called *Tajaddood* (Reform). It is reported to enjoy the financial support of the Ministry of Finance.

The Democratic Party.

In a recent issue of the *Tajaddood* appeared the official manifesto of the Central Committeee of the Young Democratic Party. It read as follows:—

Brothers! The day of our expected liberty has come. It is time now that we should demand the punishment of those wicked officials who, continuously and unlawfully, have violated and pressed under foot our rights. Let us dismiss these traitors to the nation and enemies of their country, and let us give their positions to the promising young men of Iran, who are full of patriotism and energy. Let the seals of authority be allotted to these young men to whom treason is unknown, and who would not sacrifice the State's interests to their own personal gain. Do not allow those mean Ministers who are prepared to sell our country to foreigners to remain at their high posts. Do not be afraid to accord these wicked men their due punishment; the times demand it. The sordid desires and inclinations of these men are not in harmony with our present-day freedom. The work of regenerating our nation and country should be committed to those who would be responsible to the nation, and who would devote their whole energy and ability to leading Iran in the paths of progress and prosperity. O ye workmen and artisans of Iran, do not become careless, but work together, for yours is a glorious future, and victory. The successful issue of the Mejless elections depends upon your wide-awake and wise action. Take lessons from the experience of the past. Our country and our religion require us to be very careful in regard to the future.

Official Changes.

A similar manifesto was published in Teheran. Some changes both in the Cabinet and among the municipal officials of Tabriz have since taken place; but whether they were due to the manifesto it is difficult to say. Hadji Nazim, the Mayor of Tabriz, has resigned, and has been succeeded by Hadji Nizam-ed-Dowleh. The Assistant Governor has been dismissed; but the substitution of one "Dowleh" for another "Dowleh," of Sirdar Somebody for Sirdar Somebody Else, may not mean much as far as the real interests of the people are concerned. Persons are changed; the class from which the new officials are drawn remains the same. But the Democrats affect considerable satisfaction, although their own ranks have not been drawn upon to fill the vacancies. In any case, they urge, their voice has been heard and the party has secured recognition. Be that as it may, the fact remains that some of the dismissed officials were in very bad odour with the Government; they owed their appointments to Russian influence or pressure, and as soon as that influence was eliminated the men were removed from their offices.

But, as the event has proved, the people can now talk, and can also formulate demands. Moreover, they argue that if the Government to-day is willing to take a step forward to meet the people's wishes, to-morrow it may be willing to take ten steps. A good father was always telling his son that he ought never to be satisfied with a subordinate position, but ought always to try to become the head of something—a school, a factory, a firm, a party, or a community. If he could not be head of any of these, at any rate, let him be "head" of his own head. The Democrats, on this principle, have not yet become the head of the Government, but they have at least succeeded in being the head of their own party interests.

A further step taken by the Democratic Party (*Moutaraphiun Irani*) has been to send a telegram to the Joint Council of the Russian Workmen and Soldiers' Delegates in Petrograd. It ran as follows:—

The Russian Consuls and their officers in Persia, who were appointed by the former Government, and are still holding their

Digitized by Google

posts, are men of violent and unlawful principles. Their views and actions do not correspond with those of the new Liberal Government of Russia, and it is very desirable that they should all be replaced by men sharing the liberal and democratic opinions of Democratic Russia. They continue to follow the policy of absolutism in conjunction with their Persian agents and friends.

A list of officials falling under this ban was appended. No reply has so far been received—Petrograd has had some domestic troubles of its own in the meantime—but Consul-General Beliazeff has gone, and has been succeeded by an adherent of the new régime.

A Popular Demonstration.

There was a great procession in Tabriz the other day organised by the Democratic Party. Persian and Russian bands headed it, and in the ranks were Persians, Armenians, all the Russian troops in Tabriz, as well as the members of the local Council of Soldiers' Delegates. After visiting the Russian and British Consulates the procession went to the cemetery, where fiery speeches were made in honour of Persian and Armenian revolutionists—from the days of Sattar Khan to the present time—who had fought and fallen for the freedom of ancient and glorious Persia.

FORESTRY IN CYPRUS.

(From a Correspondent.)

An increase in the production of timber is admittedly among the pressing needs of the Empire, and the grant of £40,843 for the advancement of forestry in Cyprus, recently announced by Mr. Hewins, shows that the possibilities of this small dependency have not been overlooked. The re-afforestation of vast, devastated tracts, once so well clothed with trees, is one of the principal and most obvious needs of Cyprus. Had the interest on £40,000 been devoted, under expert advice, to this object during the last thirty or thirty-five years, the state of things as regards replanting would have been very different from what it is now. As it is, the feelings with which the announcement should be welcomed cannot fail to be mingled with some anxiety as regards the application of this comparatively large sum in the minds of those who have watched the course of events during the last forty years.

The British Government in general, and the Colonial Office in particular, have often been charged with indifference to the fortunes of Cyprus; and those who have made the charge would have little difficulty in showing cause for their suspicions. It is unnecessary to discuss them here. Whether the accusation is well founded or not, certain it is that Cyprus, while being drained by a grossly unfair annual "tribute" to the Porte, has until recently been treated with extreme parsimony. It is also undeniable that Britain, as Trustee for the island under the Anglo-Turkish Convention, has not done all that ought to have been done; for the fact was candidly admitted by Mr. Joseph Chamberlain during his tenure of office as Colonial Minister.

The case as regards the forests can be very briefly stated. When Cyprus was occupied in 1878, the reckless and criminal cutting down of trees, under the maladministration of many centuries, had been such as to threaten the speedy and utter denudation of the mountains, in which the remains of the State forests flourished, or, rather, languished. Sir Garnet Wolseley, the first Governor, lost no time in getting an Ordinance passed to amend the existing Turkish law for their protection, control, and management. In 1882 Sir Robert Biddulph reported that Cyprus was "in a critical stage as regards her forests." An able officer of the Forest Department in France, M. Madon, was appointed to take up the post of Principal Forest Officer. He made two admirable reports, and it would have been well, if many of his suggestions, pronounced as out of the question under the régime of rigid economy, had been carried out. After two years of valuable work, M. Madon left the island. An officer of the Indian Forest Department, Dr. Dobbs, took over the work; but during his brief sojourn he was almost exclusively engaged on forest delineation. Since that time not a single official who has had any training whatever in forestry has been in charge of the office. Circumstances, of course, called for a continuous, vigorous, and vigilant forest policy, and the Colonial Office cannot be exonerated from blame in allowing a generation to pass without taking the steps which were required. The Forest Office was, in turn, tacked on to that of the Land Registry, and that of agriculture, and it was not for years that it became an independent department; but still no official trained in forestry set foot in the island. In 1909 Mr. D. E. Hutchins was invited from East Africa to examine and report on the forests. He found that good police work was being done, and that precautions against fires were in hand, but that goat grazing still remained to be dealt with. Even now, there is reason to fear that the problem of the goats, which ought to have been drastically solved many years ago, is not handled with the firmness that is called for.

Much valuable time has been lost; but this is not all. There seems to have been a positive unwillingness to act upon the counsels of scientific advisers, even when they have been specially called in to study and report on local conditions. No one who has studied the various reports of these experts and the outcome of the missions can fail to note that their advice has generally fallen upon deaf ears. A few instances will suffice. A French expert, M. Mouillefert, was deputed to report on the island vines with a view to much-needed improvements, but practically nothing came of the suggestions made. When some years ago the extension of cotton growing was under consideration, Professor Wyndham Dunstan, F.R.S., Director of the Imperial Institute, was invited to visit Cyprus, and to report on its agricultural resources. Professor Dunstan recommended as essential the reorganization of the Agricultural Department under a scientifically trained agriculturist. This would have cost about £3,000 a year, to which objections were promptly raised. In the end, the cost was reduced to £1,000, to which the British Cotton Growing Association offered to contribute £100 a year. The authorities rejected the whole scheme.

The policy of progressive development inaugurated by Mr. Chamberlain led to a loan of £314,000 for a harbour, railway construction, and irrigation works. £60,000 was spent on storage reservoirs, but they are generally regarded as a failure. Referring to them, Professor Dunstan remarked, "I trust that no considerable sum of money will be spent on the extension of the reservoir system, except on the advice of an expert of established reputation." Again, with regard to artesian borings, these were recommended during the earliest years of the occupation. Nothing was done until recently, and then work was carried out in a half-hearted and incomplete manner. Professor Dunstan naturally advised that this very important work "should now be thoroughly carried out under expert supervision."

Present circumstances indicate the need of great caution. The war has caused largely increased demands on all forest produce, and the latest reports show a rapidly expanding revenue from sales, both for building purposes, fuel, etc. (£17,606 in 1915-16, as against £10,229 in the preceding year). The increasing use of steam saws at work is ominous. The gift of 2,000 tons of firewood to the troops in Egypt was of course quite right and proper. But is there not some fear that the drain may become excessive and retard the equilibrium which it is the object to restore, in view of the slow rate of growth in the necessary process of re-afforestation? The chief cause for apprehension, however, would seem to be lest there should be a failure to provide efficient coadjutors in the work that lies ahead.

These observations imply no reflection whatever upon the officials who have been entrusted with the management of the forests. On the contrary, heavily handicapped as they have been owing to lack of properly equipped staffs, they have faced the difficulties of the situation, carried out arduous duties with the greatest zeal and energy, and can point to much valuable work.

Everyone interested in Cyprus will be delighted to hear of the forward movement which is contemplated, but from the foregoing remarks, which are made in no spirit of captious criticism, it will hardly seem surprising if some misgivings should exist as to the disposal of the grant. The results should certainly be watched with the greatest interest, as no one can doubt that the restoration of the forests must contribute very largely towards the prosperity of this long-suffering island.

CORRESPONDENCE.

THE CALCUTTA HIDES TRADE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Your interesting and opportune article on the Calcutta Hides Trade draws attention to a subject of the highest importance not only to India but to the British Empire.

This trade had been permitted to get into the hands of firms concerning whose character the India Government itself had suspicions. Some of the firms, therefore, were liquidated and others were allowed to trade under licence. The next step was to get British firms to enter the business, so that the machinery of distribution should be kept running. At the present time certain British firms are acting as a buying committee, and there is no doubt they are quite capable of carrying on the trade, although it is obvious that British tanners cannot immediately deal with the total quantity available as a result of the cessation of export to enemy countries.

Where the India Government has undoubtedly failed is in not finally eliminating all firms belonging to the pre-war "ring." It is difficult for British tanners or for members of the Buying Committee to believe that the complete eradication of German influence is intended so long as any "ring" firm is permitted to continue either in the hides or goat skins trade. Vacillation in this matter thwarts the purpose of British merchants and tanners.

It was their intention, which they have not yet abandoned, so to enlarge their organisations as to be in a position, a year or two after the war, to deal with the whole quantity of hides available; but it is not to be supposed that serious developments will take place, until they are convinced that the India Government really means to get rid of all those firms by whose action this trade was diverted to Germany. The specious reasons advanced for this diversion do not carry conviction to an unprejudiced mind, and should not impose upon India Government officials. Let the India Government at once close down all "ring" firms and their offspring, and it will be made abundantly clear that British merchants and tanners have both the capital and capacity for conducting this trade successfully in the interests of the Empire. If the trade is finally lost to the Empire, it will be through the indecision of the authorities, and not because of lack of enterprise on the part of merchants and tanners.—I am, etc.,

MERCHANT.

London, E.C.3, Dec. 3, 1917.

GERMAN BUILDINGS IN JERUSALEM.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In connection with Miss Estelle Blyth's interesting description of the German Stiftung on the Mount of Olives, Jerusalem, I may say that since the war it had become the headquarters of the military at Jerusalem, and a month or two ago English airmen, flying from the coast, dropped fifty bombs on it and so destroyed it. This was reported in all our leading newspapers.

Nov. 30. A CONSTANT READER.

CAROB DISEASE IN CYPRUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The Agricultural Department claim that their instructions were faithfully carried out in the Kyrenia district by all except a few of the large land-owners. There are in the district at least one hundred thousand carob trees, and I am certain that at least one half of these were never touched. It must be remembered that in Cyprus the land often belongs to one man and the trees to another. Many men own carob trees who do not own land. As the villagers take no interest in the matter, it is quite certain that a man owning, say, a dozen trees twelve miles distant from his village, is not going to travel that distance in order to knock down diseased carobs, rub off the flowers, clear away axes and bury all this in quick-lime. Neither last year nor this were trees in my neighbourhood cleaned. Carping criticism, however, never does much good, so I refrain from saying more.

What is required is a remedy, and that can only be obtained if the Government take the matter in hand themselves instead of vainly trying to induce peasants to do what they are disinclined to do. It is doubtful whether all is yet known about the disease and its proper treatment. Therefore, the Agricultural Department should acquire, say, a square mile of trees, for which they would pay a moderate rent to the various proprietors. The land should be fenced in expensively and the boundaries clearly defined. Treatment would be continued more or less the whole year round, and in a few years a model plantation would have been created and an object lesson provided that would be of great service.

In the second place the Island Government ought to purchase a block of land in proximity to the buildings of the Agricultural Department at Nicosia, and on it form an orchard of carob trees on the same careful lines as does a fruit-grower in British Columbia.

In the third place, the Agricultural Department should be empowered to take under their control, immediately after the collection of carobs, large areas of land—to put on men to clean the trees under official supervision, and, if deemed right, recover from the owners a small sum for the work done. In this way large compact areas of land would be efficiently dealt with. The Department in their own Journal confess that villagers cannot be trusted to manage their trees. A large gang working steadily for a month under strict supervision and fully equipped with the necessary implements would do good work.

The putting into execution of these three suggestions of mine would involve expenditure of money, but that is the last thing to meet with the approval of those in authority. Nearly forty years ago the late Sir Charles Dilke said in Parliament that Cyprus was to be made the garden of the Near East. The British public may believe that this has been done, but men who live in the island know better. The Director of Agriculture is as anxious as I am that there should be a change of policy, and that "starvation" should no longer be the motto of his Department.

Kyrenia, Cyprus, October 9, 1917. G. L. H.

EDUCATIONAL.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

THE SCHOOL RE-OPENED ON OCTOBER 1.

For particulars, apply to E. DENISON ROSS, Director.

ROYAL SCHOOL
FOR
Daughters of Officers of the Army.

Patrons:
Their MAJESTIES THE KING AND QUEEN
and HER MAJESTY QUEEN ALEXANDRA.
Chairman: LT.-COL. A. GRUBB. J.P.
Vice-Chairman: SURGEON-GEN. SIR WILLIAM TAYLOR, K.C.B.

Daughters of Officers of the Army are admitted to the above Schools according to the circumstances of their parents, at rates of £20, £45, £65, and £80 a year. Granddaughters of Officers are admitted at £45, £65, and £80 a year according to circumstances, and a limited number of daughters of civilians are admitted at £120 a year when there are vacancies. There are 15 Scholarships, open to competition, in the School, of amounts varying from £10 to £20 up to one of £50.

As half of the School consists of pupils on the £15 foundation, which includes both board and education, a deficiency of about £2,500 a year has to be met by contributions, which are earnestly solicited. Donations of £5 5s., giving one vote for life, or subscriptions of 10s. 6d., giving one vote for the year, may be sent to

F. W. T. ATTREE, COLONEL (late R.E.), Secretary.

Office: Panton House, 25, Haymarket, S.W.1.

GUTHRIE & VALENTINE
Civil and Military Tailors
:: and Outfitters, ::

(ESTABLISHED 1812)

12, CORK ST., BURLINGTON GARDENS,
LONDON, W. Telephone: Mayfair 3222.

Complete Outfits for all Indian Regiments. Home Service Uniforms and Camp Equipment.

Outfits for Officers appointed to the (Unattached) Indian Army a speciality.

Full Estimates and price lists of mufti clothing and underwear on application.

IVAN MESTROVITCH AND HIS ART.

"Ivan Mestrovitch's Place in Art" was the title of an illuminating discourse at the Grafton Galleries, London, on December 4, by that most competent critic M. Bogdan Popovitch, Professor of Comparative Literature in the University of Belgrade, who has been known and honoured for many years on the Continent for his contributions to the literature of art. M. Bogdan Popovitch contended that art criticism should be, in the first place, the business of the artist himself. He who created must know best what he wanted to create, and, moreover, the knowledge required for the understanding of the plastic arts was of a quite special kind, and with such difficulty to be acquired that, exceptions apart, only the artists possessed it in full measure. A work of art had been defined as "an adequate expression of an interesting impression," and it might be said that of these the "adequate expression" was the more important element. A conception that was not adequately expressed was practically non-existent. Referring to Mestrovitch, they in Serbia, he said, were as proud of him as they were of their folk-poetry, and of that lofty poem full of high poetry and profound wisdom, "The Garland from the Mountain," by Nyegosh. Of his rank they thought what others had said of him a hundred times and what had been echoed from all the four quarters of the cultured world: "amazing" was the word by which his art had been, perhaps, most often characterised; "genius" was the other word regularly applied to him.

His æstho-psychological characteristics may be summed up in these words: technical skill, force, rebellion, dissonance, and patriotism, which latter, aided by his art, enabled him powerfully to express the secular aspirations of his nation. We have already noticed how important in a work of art is its technical side, the expression, the skill in execution, that there is no great artist without great technical skill. Mestrovitch, by common agreement, has it to an exceptional degree. The accuracy and sureness of his expression—that is to say, all his workmanship—is beyond praise. He is not a realist in the sense in which Rodin was; he does not reproduce reality exactly as we observe it ordinarily; he intensifies reality; he manipulated it for his own purposes, making the human frame, like Michael Angelo, a means of expressing his own powerful or violent feelings. Therefore, one should not always seek in his statues that flowing line which in Rodin's works—e.g., in his "Penseur"—in so marvellous a way recalls the flowing line of life. This flowing line would not be in accordance with the exaggerated emotion and impression which he wants to express, nor can it be preserved when the principal purpose is force, and when the attention is concentrated on significant details. The torso of the Serbian hero which you can see in the middle of the vestibule of the Victoria and Albert Museum shows in its quiet attitude the utmost possible effort, the muscles standing forth the while almost as separate organisms. But even in the greatest exaggeration of forms he does not transgress the limits of nature His observation and skill are too great to permit him making this mistake. This observation and this sure workmanship were his when he was in his early twenties. I remember his exhibitions in Belgrade in 1904, and in Agram in 1905, and remember my own surprise before a long series of his statues, which all testified among other things to a sureness, a forcibleness, and yet at the same time a softness of execution that was the touch of genius. It was like a revelation, and I ventured to write in a review on that occasion that a great artist had been born to my people. This skill has since only increased. He really does what he likes with his colossal figures. He gives them most difficult positions; he twists them, he draws them out, he crushes them in, as in the case of a strange feminine figure which I saw at an exhibition in Munich, a figure in round sculpture, but flattened out almost as a relief, as if, while still in clay, it had been deliberately crushed in all its length. In all cases the anatomy of the human body remains correct, in whatever material he works; he works with the same command of the medium, and handles clay, stucco, wood, and marble, as I have seen him at work, with the same amazing skill and ease. He really can say for himself what the great French sculptor, Puget, once proudly said of himself, in his quaint French of the seventeenth century:—

"I am at home among great things. I revel in working on them, and the marble trembles before me, however big the block may be."

His second characteristic quality is *force*, as displayed in both its aspects, the spontaneous or temperamental, and the voluntary or intentional. This quality is evident. Force is visible in almost every one of his works, and in their ensemble, in those colossal Michael Angelesque—in this case truly the right epithet—statues, with their impetuous and vehement attitudes, and their formidable tension of muscles, and the fecundity of the artist, and the crushing number and infinite variety of his works. At the age of thirty he had already produced several hundred sculptures. Alongside this spontaneous force goes, as I have already mentioned, a voluntary—almost intentional—display of strength. Forceful natures, which are themselves victims of their own strength, carry with them a violent need of expressing it strongly and ever more strongly, and are never satisfied with the expression supplied by their spontaneous strength. They go further; they are seeking a stronger expression than the spontaneous one, with which they are supplied by a strict observation of nature. Michael Angelo, despite his classical education, which mitigates his sombre mood of a dissatisfied Titan and preserves the line—Michael Angelo gives his boy David the stature of Goliath; twists his figures as with a corkscrew; disarticulates the human frame up to the limits of possibility, if not overstepping them. With Mestrovitch it is the same. In taking their spring, if I may say so, the artists of that category express more themselves than objective nature; they come to Nature with their feeling already in them, and add to her this inner feeling of theirs. Hyperbole is necessary to such artists, even at the risk of allowing some rhetoric to mingle with the general impression. Exaggeration with them is not insincere; it is their second nature.

A rebellious spirit is, as we have said, the third characteristic of Mestrovitch. Everything bears witness to it, and everything combined to give birth to it in him. You remember the reply Michael Angelo gave to the eulogy which a poet wrote in praise of his statue of "The Night," the reclining woman on the sarcophagus in the Medici Chapel in Florence. The poet, in praising it, had said that the woman seemed to be alive and that the statue could almost be awakened like a human being. Michael Angelo replied with these beautiful lines:—

Pleasant unto me is sleep,
And still more pleasant stone to be.
So long as shame and mischief last.
Neither to see nor feel, this for me is bliss;
Wake me not, therefore, pray speak softer.

"Shame and mischief"—such were the conditions which made Michael Angelo the rebellious and stormy Titan that he was. Now, the condition of things in Mestrovitch's Fatherland have been incomparably worse, and to-day words fail us to depict their horror.

We come to the fourth and last characteristic. It is clear that art born in such circumstances cannot have the harmony of classic art. It is full of dissonances—as in modern art in general one sees in all directions want of harmony, and even of equilibrium, not only in painting and sculpture, but also in the other arts, in architecture, in literature, and even in music. With the advent of democracy, new generations, before having benefited by the mitigating influences of a long experience which brings with it calm philosophy and refinement, have found themselves in the midst of acquisitions of an old and advanced civilisation and full of unsatisfied desires and new gifts. They have snatched at these acquisitions, and wish to express themselves, too, and rightly so; but this sudden advent has brought necessarily with it disharmony, and we see this paradox: a generation which is both young and old, both healthy and morbid, perhaps because those who gave them birth were themselves too civilised. Whence many an excess: Maximalism, Bolshevism in all fields. Whence, too, the defiance of conventions, the piercing, strident tone which seems to be the dominant note at least of certain products of modern art. Courage has been replaced by boldness; where formerly the artist showed sadness, now anguish is expressed; where formerly was heard the expression of anguish we hear now shrill cries. There is morbid nervousness in many works of modern art. As instances from literature and the other arts are well known to everybody, I will mention only one instance from music—from Debussy's music, whose character has been best shown in three lines of French short story. In this story the brother enters the room where his sister is playing the piano. On his entrance she rises, brushing a tear from her eye, whereupon her brother says, "You have been playing Debussy again." Yes, modern art is often a *crise de nerfs*, as the French say, a nervous paroxysm.

But those of us who belong to the older generation, with or without the above-mentioned philosophy or refinement, should be careful. All that is new to elder people does not seem beautiful. So it was in the whole course of the history of art, and great artists of previous generations condemned in their day works of the new generation which later generations proclaimed as masterpieces Beauty is ever enlarging its sphere, and mankind gradually gets used to new kinds of beauty—classic beauty, elegance and attractiveness did not exhaust the number of beautiful things, and new experience brought new beauties.

NEAR EAST BOOKSHELF.

GERMANISM AND ISLAM.*

An enormous literature has been called into being by German perfidy. The avalanche began with "J'Accuse!" and it gathers force from the revelations which are published in an ever-increasing volume by the Press. But Germans are so securely muzzled that the minority who possess a conscience dare not tell the world what they know; and the testimony of their foes is received with suspicion by waverers. For, incredible to relate, some inhabitants of this war-girt isle still believe that the Hohenzollerns and their dupes had no lust for world-dominion, that Belgium was invaded as a measure of self-defence, and that it would be wise to make peace with Germany by negotiation. Mr. Willimore's indictment is framed on a novel basis. Its counts are set forth in the form of a connected narrative, and rest on evidence given by Germans, or neutrals with a German bias. At this time of the day it is needless to criticise his counterblast to the self-styled "pacificists." A perusal of his volume will convince every one save a small but noisy clique of cranks that Germany has engineered a deeply-laid plot against the world's civilisation, and is attempting to carry it into effect with diabolical thoroughness.

For readers of THE NEAR EAST, chapters xi., "The Murder of a Nation," and xiv., "The Fate of Islam," possess a special interest. The first proves beyond any doubt that four-fifths of the Armenian subjects of Turkey have, since August, 1914, been massacred or doomed to a fate even worse than death. Further, that these horrors were enacted with the approval of German overlords, who gave a free hand to their vassals at Constantinople in return for their help against the Entente. A notion is current in this country that extermination was the only method of dealing with Armenians. They have been styled, by a writer who saw them through German spectacles, "Bengalis of the worst type, but possessing desperate courage." As a matter of fact, Armenians rank among the most gifted Asiatic races. Under just government they would have been a tower of strength to the Turkish Empire. The section which owes allegiance to Russia has fought staunchly in her armies, and shows marked aptitude for the arts of peace.

Even more important, from an Imperial point of view, is the evidence given in chapter xiv. of the German attitude towards Islam. At pp. 248-50 Mr. Willimore reproduces an official circular which the Governor of German East Africa issued to his subordinates in December, 1913. He enjoined them to check Mussulman propaganda by every means within their power, and suggested that, as a counter-irritant, they might well "encourage the natives to occupy themselves with breeding pigs"! This damning document was discovered by General Smuts in the archives of the German Residency at Moshi, which fell to his arms in 1916. It is a strange commentary on the announcement made by the Kaiser at Jerusalem in 1898, that he was the "Protector of all Mussulmans." By way of contrast, again, I may quote a passage from p. 250 of this useful book:—

> "At the beginning of the war a Mussulman native of India, resident in Turkey, told the writer that he was asked by a Turk how it was that 80,000 Albanians were able to revolt against their Turkish rulers, while 80,000,000 Mussulmans in India were content to remain under British rule; and that he had replied that Indian Mussulmans had no desire to throw off their allegiance to a Power which showed such respect as England does for the creed they profess. He told him, among other things, that more care is taken in India than in Turkey itself to ensure that no noise outside the mosques shall disturb the devotions of those within."

These words will find an echo in every Eastern country which enjoys the just and statesmanlike sway of Great Britain.

F. H. S.

WITH THE ANZACS IN CAIRO.†

This narrative of the work of an army chaplain, of the "muscular Christianity" type and brimming over with healthy humour, will appeal to many. The writer has many terrible things to say, which he states with great frankness, about the moral temptations of Cairo, and evidently he would have said even more but for the Censor, who is responsible for a blank page and a-half. But the reader feels he has a right to be open about what he has so thoroughly personally investigated. In this respect the book should do good. Other chapters about his religious duties and the splendid work of the Y.M.C.A. come as a refreshing counter-balance to the depressing parts. Most readers will feel that "The Old Captain" is the right sort, and the unstinted praise he gives to many of his fellow-workers will disarm the critic of this necessarily personal narrative of any accusation of egoism.

THE CZECHO-SLAVS.

While the case of the Jugoslavs has been convincingly put in an abundance of propagandist literature, to the extent that it is now openly recognised as a European question, rather less attention has, for one reason or another, been devoted to the Czechs of Bohemia and their kinsmen, the Czecho-Slavs of Northern Hungary. Yet the separatist agitation in Bohemia is older and not less important than that of the Jugoslavs, and their case at least as hard. The comparative neglect is to some extent repaired in *Bohemia's Case for Independence*, by Dr. Edouard Benes, of Prague University (George Allen and Unwin, 2s. 6d. net), whose work is introduced by a preface by Mr. Wickham Steed. Dr. Benes perhaps rather overstresses, as is natural in the circumstances, the historical connection between Britain and Bohemia, which has always been slight. To the ordinary observer in Prague before the war it certainly seemed that the Czechs were so fully occupied with their struggle against Germanism that they had little time to give to the study of any but their own affairs. Another contribution to the subject is by M. G. Beck, in *La Responsabilité de la Hongrie* (Payot et Cie., Paris, 3f. 5c.), which deals mainly with the Hungarian Slavs and contains some rather piquant chapters on secret service work by a secret service man of Austria at Agram, in which an Austrian official is stated to have said that Hungary was guilty of the murder of the Archduke Franz Ferdinand. The names and addresses are given of those who are said to have made these revelations.

M. Jan J. Kowalczyk has published a pamphlet, *Prussian Poland* (Petersen, Copenhagen), in which he analyses the position of the Poles under Prussian rule, and concludes that if they are "reunited with the whole Polish nation to an independent State, they will form one of the strongest pillars of the future European peace." The main facts cited are familiar to students of European politics.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. December 7	1917. November 24	Friday	1336. Saphar 22	5678. Kislev 22
8	25	Saturday.....	23	23
9	26	Sunday	24	24
10	27	Monday	25	25
11	28	Tuesday	26	26
12	29	Wednesday	27	27
13	30	Thursday	28	27

The Serbian Minister has returned to London from Scotland.

H.H. the Maharaja of Jodhpur has given a lakh of rupees to "Our Day" Fund.

The Rev. S. M. Zwemer has returned to Cairo after a six months' tour in India and China.

Four classes of the Greek Infantry Reserve and eight classes of Artillery have been called to the Colours.

It is estimated that 40,000 Greeks in the parts of Macedonia invaded by the Bulgarians have died of hunger and other hardships.

According to a Zurich telegram, ex-King Constantine has left the nursing home, where he has been for some time, completely cured.

A Government official in Kordofan states that recently the Syrians performed a play there in aid of the Red Cross "Our Day" Fund, and as a result collected £450.

Proceedings under military law are pending against certain Czech regiments charged with having this year "treacherously conspired against the Austro-Hungarian troops."

The Middlesex County Council, at a meeting held on November 29, unanimously decided to send a message of congratulation to General Sir Julian Byng and the soldiers under his command.

Last Monday (December 3) was the anniversary of the birthday of Prince Peter of Greece, who was born in Paris in 1908, and is the son of Prince George, brother of ex-King Constantine.

According to an estimate received by the Syria and Palestine Relief Fund there will be 125,000 children to care for in the Holy Land as the Allies advance.

The Athens *Hestia* states that the Greek population of Eastern Macedonia and the officials who remained there are in a deplorable situation under Bulgarian rule Forty thousand deaths from starvation occurred during the first few months of this year.

A memorial window to Major Ronald E. E. Kriekenbeek, Indian Army, and Captain John Peake Knight, D.S.O., Royal Horse Artillery, placed in St. Augustine's Church, Grove Park, S.E., was dedicated on December 2 by the Bishop of Woolwich. Major Kriekenbeek was killed in Mesopotamia.

The engagement is announced between Major A. H. MacIlwaine, M.C., R.H.A., eldest son of A. W. MacIlwaine, J.P., of Manor House, Ferriby, East Yorkshire, and Joan, eldest daughter of Lieutenant-Colonel J. Manners-Smith, V.C., C.V.O., C.I.E., Agent to the Governor-General for Rajputana, India.

Professor C. F. Burney, Professor of Interpretation of Holy Scripture, University of Oxford, has been appointed to deliver the Schweich Lectures on Biblical archæology, and will give three lectures on "Israel's Settlement in Canaan: the Biblical Tradition and its Historical Background," on the 13th, 17th, and 20th inst.

A meeting to inaugurate the Anglo-Roumanian Society is being held at the Mansion House this afternoon at a quarter past three o'clock. The Lord Mayor will preside, and the speakers will be Sir Edward Carson, Lord Hugh Cecil (President of the Society), Lord Dunedin, Mr. A. F. Whyte, M.P., and the Roumanian Minister.

The Agram newspaper *Hrvatska Irzava* of November 14 has published a letter dated from Blato Island, Curzola, in which Dr. Lujo Fouque states that Mrs. Askew was buried on October 13 not far from the sea, just beyond the fence of a vineyard. Dr. Fouque adds: "Within a few days we shall place above the grave a small monument with cross and a suitable inscription."

LADY, WISHING to go to INDIA, would like to meet lady or party, with view to companionship in travelling through India Willing to contribute half expenses in return for escort.—Reply to Box 501, care of THE NEAR EAST Offices, 1, Devonshire Square, E.C.2

Mr. Frederick Orgley, Registrar-General in Cyprus, is home on three months' leave, and is now in London.

Mr. W. J. Mackay, Chief Collector of the Cyprus Customs, will continue to reside at Limassol until after the war. Hitherto the office of the Chief Collector has been at Larnaca.

The marriage arranged between Captain Henry Harold Rookhurst Deane, Pioneers, I.A., only son of the late Lieutenant-Colonel Sir Harold Deane, K.C.S.I., and Lady Deane, 72, Overstrand Mansions, S.W., and Mary Emily de Courcy, daughter of Dr. and Mrs. Moir, St. Andrews, will take place in India as soon as a passport can be obtained.

Colonel Lord Montagu of Beaulieu, C.S.I., has arrived in Canada, where he has gone to lecture on aviation, with the object of stimulating interest in aerial matters, and more especially with a view to securing recruits for the R.F.C., both officer-cadets and rank and file. At the close of his mission Lord Montagu will proceed to India to resume his official duties there.

The first meeting between the British and Turkish delegates appointed to discuss the exchange of prisoners and the inspection of camps took place at Berne on December 3, under the presidency of M. Ador, formerly president of the International Committee of the Red Cross, now Federal Councillor and chief of the Political Department, by which the arrangements for the meeting were made.

In view of the severity of the climatic conditions it has been decided that an outfit allowance of £20 shall be issued to officers (including those granted commissions in the Regular Army before August 5, 1914) posted during the war for duty in Russia and Roumania between October 1 and April 30 in each year. This Army Order will be retrospective in the case of officers posted on or after October 1, 1916.

In a new Army Order just published, it is provided that a commission as second lieutenant on the unattached list of candidates for appointment to the Indian Army may be given to a cadet who has passed through a course of instruction at any of the Military Colleges, or to a duly qualified candidate from a University, or to a candidate approved by the Army Council on the recommendation of the Secretary for India.

It is noteworthy that during the war Indian emigrants who have found a home without the Empire have been most steadfast in their support of the British cause. The latest instance comes from Sumatra, where twenty-three Sikhs, living in various districts, have jointly subscribed one hundred and seven florins to British Red Cross funds. The subscribers were all of them of the poorest labouring class, and this fact throws the strongest light on their patriotism and self-sacrifice.

An impressive memorial service was held at St. Paul's Cathedral on December 4 for Lieutenant-General Sir Stanley Maude, K.C.B., C.M.G., D.S.O., whose death took place in Mesopotamia on November 18. A large congregation was present, representing all classes of the community, to pay their last tribute to the memory of the soldier who had rendered such distinguished service to the Empire. The King was represented at the service by General Sir William Robertson, Aide-de-Camp-General to his Majesty, and Queen Alexandra was represented by Colonel Sir Henry Streatfield.

Reuter's Simla correspondent in a message dated December 3 says:—"Lord Chelmsford and Mr. Montagu leave to-day for Calcutta, having received thirty addresses from Indian deputations and having granted sixty interviews to private individuals of all classes. Many questions relating to suggested reforms have been personally discussed with the heads of provinces who visited Delhi for that purpose. The extension of Sir Michael O'Dwyer's term of office as Lieutenant-Governor of the Punjab for one year has given keen pleasure."

So far only a very restricted amount of news has got through as to conditions behind the Allied lines in Palestine. All that can be told with certainty to-day is that, in the extreme south the people are suffering from disease owing to the utter absence of any medical advice or treatment. But a good deal can be inferred from the fact that the Syria and Palestine Relief Fund has heard by cable from Bishop MacInnes that the authorities have lost no time in cabling permits for relief workers, including missionaries.

AYAHS' HOME,

26, King Edward Road, South Hackney, London.

ESTABLISHED 1825.

IN CONNECTION WITH THE LONDON CITY MISSION.

Hindustani spoken. Ayahs boarded and lodged at 18s. per week each until their Return Passage is paid or a Situation secured for them to return. Ayahs met at any Dock or Railway Station in London. Experienced, well-recommended Ayahs taken entirely off Ladies' hands for a certain payment, which differs according to time of year. Ladies proceeding to India or China requiring an Ayah can generally obtain one by applying to Mrs. FLETCHER, Matron.

Colonel A. C. Yate lectured before the Central Asian Society on December 5 on "British Buffer States in Asia."

A number of Serbian officers were entertained at luncheon at the House of Commons on December 5 by Major David Davies, M.P. The Earl of Derby, in proposing the toast of "The Officers," expressed pleasure at being able to pay a tribute in the name of the British Army to the whole Serbian nation, and he prophesied that sooner or later the Allies would gain a victory by which Serbia would be given full reparation for her wrongs. The Serbian Minister and Dr. A. Trumbitch, the President of the Jugo-slav Committee, replied to the toast.

The Imperial Ottoman Bank has lost another member of its staff in the war in Private W. R. Green, who joined the temporary staff of the bank soon after the war broke out, and remained with it over a year. During that period he made eight unsuccessful attempts to join the Army, and was eventually accepted by the R.A.M.C. In June, 1916, he was transferred to a fighting regiment, and since then has seen service at various fronts. He was killed on November 6. This makes fourteen from the London and Manchester staff of this bank who have been killed in the war. Besides these two are missing and ten have been wounded, and two members of the British Overseas staff have been killed.

APPOINTMENTS, PROMOTIONS, ETC.

El Bimbashi L. Daniels, Sudan Government, has been granted the temporary rank of Kaimakam.

El Kaimakam A. Crauford Bey, Western Arab Corps, has been granted the temporary rank of Miralai.

Bimbashi E. C. Mylne, Egyptian Army, has been appointed Deputy Assistant Adjutant-General and replaced by Bimbashi B. T. Phillips, of the Equatorial Battalion.

Major Harry F. O. Thwaites, M.C., Royal Engineers, has been taken on the strength of the Egyptian Army as Kaimakam, and appointed Director, Military Works Department.

Kaimakam H. Castle Smith Bey, Inspector, Sudan Government, has been granted the rank of Miralai and appointed Aide-de-Camp to the Sultan vice Miralai W. D. Kenny Bey, seconded for special service.

The *London Gazette* of December 4 contained the first appointments in India to the Order of the British Empire. Lord Chelmsford and Lord Willingdon receive the G.C.B.E. Lady Chelmsford is appointed a Dame Grand Cross of the Order, while Sir J. P. Hewett and Sir C. R. Cleveland receive the K.C.B.E.

OBITUARY.

Mr. Ernest Dowson, late Superintendent of Indian Telegraphs, has died at Newquay, Cornwall, at the age of seventy years. His only son, Mr. Ernest MacLeod Dowson, is Director-General of the Survey of Egypt.

The death is announced, at the age of seventy-eight, of Khan Bahadur Muncherjee K. Marzban, C.I.E., who served for many years in the Bombay Public Works Department, and who was appointed on retirement Executive Engineer of the Bombay Municipality.

The death is reported, at Tokyo, on November 21, of Colonel William Ross Morton, Military Attaché at Tokyo and late Commanding Royal Engineers at Poona. He obtained a commission in 1881, and served with the Burmese Expedition in 1885, for which he received the medal with clasp.

The Hon. Frederic Henry North, who died recently at his residence in the Albany, Piccadilly, was a son of the sixth Earl of Guildford, and great-uncle of the present peer. He served, in the late 'fifties, for a short time in the Bombay Civil Service, and afterwards, for ten years, in the Diplomatic Service.

Mr. Alexander Chambers Tate, late of the Madras Civil Service, has died at Whiteabbey, County Antrim, at the age of sixty-one years. Educated at Queen's College, Belfast, and Trinity College, Dublin, he joined the service in 1879. He became Sub-Collector and Joint Magistrate at Godavari in 1894, and from 1902 till 1906, when he retired, was District and Sessions Judge.

The Baron de Kusel Bey (Samuel Selig Kusel), whose death took place on November 29 at the residence of his daughter at Dorman's Park, Surrey, at the age of sixty-nine, was born in Liverpool on June 12, 1848, and educated at Cheltenham. He was created an Italian Baron for services in Africa, having previously been created a Bey by the Khedive of Egypt in 1882 in connection with the Egyptian Expedition of that year, having been present at the bombardment of Alexandria. Baron de Kusel was formerly Controller-General of Egyptian Customs, and of the Gunpowder Department, and also Inspector-General of the Coastguards. He was Commander of the Medjidie, Osmanieh, and Nichan-ifihar, and Chevalier of the Crown of Italy. In 1915 he wrote "An Englishman's Recollections of Egypt." He married Elvira, daughter of Cleto Chini, of Leghorn and Cairo, in 1876, and leaves one daughter.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

WORTHAM.—On November 30, to Mr. and Mrs. H. E. Wortham, of 36, Charek El Falaki, Cairo, Egypt—a son.

MARRIAGES.

BELCHER—GERMAN.—On November 22, in Egypt, Edward Brymer Belcher (Indian Police), Lieut., attached to the Mysore Lancers, son of the Rev. Gilbert E. Belcher, rector of Chaldon, Surrey, and Mrs. Belcher, to Muriel, youngest daughter of the late Mr. William German and Mrs. German, of Ashby-de-la-Zouch.

McIVOR—CHAPMAN.—On November 21, at Folkestone, N. W. McIvor, Canadian Highlanders, son of Mr. Norman McIvor, of Quill Lake, Saskatchewan, Canada, to Sheila Hamilton, elder daughter of Major F. R. H. Chapman, late Indian Army, of Hocknorton, Camberley, Surrey.

ROBINSON—WAKEMAN-LONG.—On November 15, at the British Consulate, Alexandria, and afterwards at St. Mark's Church, Rear-Admiral Sir Henry Robinson, to Margaret, widow of the late Judge Wakeman-Long.

TAYLOR—SEDDALL.—On November 29, at the Brompton Oratory, London, Philip S. Taylor, Second Lieutenant E.L.C., to Daisy, youngest daughter of Edward T. Seddall, late District Inspector, Royal Irish Constabulary, and Mrs. Seddall, of Athlone, Co. Westmeath.

WILKINSON—RIMINGTON.—On October 3, at Simla, India, James Vere Stewart Wilkinson, I.C.S., youngest son of Rev. J. H. Wilkinson, Kingshot, Winchester, to Lucy Agnes, youngest daughter of Mr. F. C. Rimington, of Bombay.

DEATHS.

GORDON WALKER.—On November 25, at Puckaster, West Worthing, Sir Thomas Gordon Walker, K.C.I.E., C.S.I., LL.D., aged 68.

PERROTT.—On November 13, at Cairo, Gwendolin, the most dearly loved wife of Charles Harold Perrott, Barrister-at-law.

SEARLE.—On November 28, at a nursing home in Harrow-on-the-Hill, Arthur Henry Searle, eldest son of Major-General A. T. Searle, late Indian Army, aged fifty-five.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.). ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20;
Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

"THE ROAD TO INDIA."

To the few people in Great Britain who, labouring under the strain of a long war, are inclined to think that the antagonism between the two groups of belligerents is susceptible of being bridged by the single plank of "peace by agreement," an article in the *Cologne Gazette* which was quoted at some length in our issue of last week must have furnished material for serious reflection. Even Lord Lansdowne, in a letter that has gained some notoriety, began by recognising the achievement of security against a repetition of the curse that has fallen upon the world as an indispensable war aim, and it was only when he allowed himself to grade what he calls the war "desiderata" in an order of importance in inverse ratio to their geographical distance from Westminster that he conveyed to his readers the impression that his idea of security meant little more than an undertaking from Germany, on a fresh scrap of paper, to mend her ways. If there were any hope that the Germans had become actuated by a new spirit, we should expect to find them rendering at least lip homage to it in the fourth year of the war. However stoutly they cling to a belief in ultimate victory, it would be thought that they had by now sufficient reason to doubt whether the game was worth the candle, and to cast around for other methods of attaining their ends without antagonising the whole world. But in the whole range of German speeches and German writings during the war it would be difficult to find any indication to support the comfortable theories of our pacifists. On the contrary, just as the war has revealed to the Allies more fully the extent of the designs that Germany has so long harboured against the peace of the world, so does it seem to have convinced the Germans that any check they are now experiencing is due, not to the nature of those designs, but to a failure to make them comprehensive enough. In such an attitude there seems little scope for peace by agreement. The subject, we believe, would not be mentioned by anyone who is capable of envisaging the world-crisis as a whole. To affect to discover water-tight compartments in German policy such as would justify the Allies in differentiating between her aims in Western and those in South-Eastern Europe argues a profound ignorance of German history and of the German temperament as moulded in the school of Prussian militarism. Only when the latter has been eliminated—by an outside agency, but with the approval of the bulk of the German people themselves—can we hope that the true lessons of the war will be appreciated in Germany.

Almost at the moment when Lord Lansdowne was penning the suggestion that the settlement of the Near Eastern question was not worth the prolongation of the war an authoritative statement was being made in Germany in regard to German aims in the East. Let it be said in passing that it does not invalidate the authority of the *Cologne Gazette* to speak for the German people that it should be the recognised organ of the Foreign Office; for those who urge an early peace by agreement do not anticipate any other signatories on behalf of Germany than the men who now direct her destinies. According to the views, then, of those who are responsible for German policy the political ambition to hold Baghdad dates back to Charles the Great, but it was only in the last few decades that the necessity for making it the guiding principle of Germany's foreign policy became imperative. The whole attitude of the article is significant. Mere abuse of Great Britain is far from its intention; it is for the most part judicial in spirit. But there is no attempt to burke the outstanding fact, that the British people possess something that the Germans covet, and which the latter must be resolved to obtain. No blame, the writer of the article is good enough to infer, attaches to Great Britain. The safety of the island kingdom depends on the sovereignty of the sea, and that sovereignty will of necessity be impaired, if Germany secures access to the Persian Gulf. Thus the "life interests" of the two Empires are bound to clash in that part of the world. A settlement in regard to Belgium, and also on most of the purely European questions, is practicable, and will be reached some day, but never, in the opinion of the *Cologne Gazette*, can there be an agreement on a question which in any way touches Great Britain's colonial possessions, least of all if thereby the connection between India and the Mother Country were to be jeopardised. The obviousness of the actual position is cited as a stimulus to German endeavour to oust the rival, and it is to be hoped that the significance of the candid appeal that is finally made to the German people will not be lost upon readers in Great Britain. For Germans "the work of decades is at stake in Mesopotamia"—a sufficiently frank avowal of German policy in that region. And in order to spur them to further effort, they are reminded that success in such undertakings attends the country whose broadest classes are convinced of the national necessity for embarking upon them.

In the light of such a declaration of Germany's aims in the Middle East, what would be the prospect that peace at this stage would achieve the future security which Lord Lansdowne admits to be an indispensable aim of the war? On this point the *Cologne Gazette* is also instructive. After making the usual reference to the fixity of British aims in the East—a contention wholly falsified by Great Britain's pre-war policy, notably by the unratified agreement with Germany of 1914—the article proceeds to discuss the extent to which those aims have been attained. In confining its remarks to war measures, it supplies a further contradiction of the statement that British policy in this direction has been long fixed. Great Britain is supposed to have worked "systematically" for the acquirement of a land route to India. But, apart from the dubious results of the Anglo-Russian Agreement of 1907, the "system" does not appear to have been put into practice until Germany's action in forcing the Turks into the war against the Entente caused the British Government to abandon its consistently friendly attitude towards them. Three sets of operations are named as being essential to the success of the British plan—the inciting of the Arabs to revolt, the occupation of Mesopotamia, and the acquisition of an "exit" from Egypt. The first of these is acknowledged to be a "tangible result"; the military occupation of Mesopotamia is said to have succeeded in so far as is necessary for British plans; but the hope is expressed that the exit from Egypt will be denied. *Fas est et ab hoste doceri* The German estimate of the British Empire's needs in regard to India is probably not at fault, although we must make the necessary allowance for the difference in the methods likely to be adopted by British and Germans in attaining the same end. Loyalty, to the German mind, is the product of subjection, and is not to be looked for in a free land. A land route from Egypt to India would not connote the same thing for the German and for the British Empire; but even the British conception of it could not tolerate a section in avowedly hostile hands. The exit from Egypt, which the Germans seem so anxious to prevent, means nothing more than that the whole country from the Mediterranean to Mesopotamia should be administered, not for purely Turkish purposes, but in accordance with the aspirations of its various peoples. Until that end has been gained, there can be no complete security for the future. And as the same holds good for each portion of the map where national feelings have been stirred, there can be no peace worth having or worthy of the sacrifices made, until a settlement that embraces all has been achieved. Only since the war began has Great Britain been able to act fully upon the recognition of her responsibilities to India. She is evidently proceeding on sound lines, but the work has yet to be completed.

JUDÆA REDEMPTA.

(From a Jewish Correspondent.)

[*While not endorsing all the views expressed by our correspondent, we are glad to publish them as an interesting contribution to the discussion of an important subject.*]

The proposal to create a new State on a purely religious basis rings strange to modern ears. It comes like a post-dated echo of the Crusades, and is of a piece with the grateful mediævalism that has placed a wreath on Cœur-de-Lion's statue. Nevertheless, it is perfectly sound and up-to-date politics. Victorian statesmanship defended India and its approaches by maintaining a strong—but not too strong—Turkey, the integrity of whose Asiatic dominions it guaranteed. That policy became obsolete when Berlin swallowed Stamboul, and Mr. Asquith promptly announced that in Asia, as well as in Europe, Turkey had dug her grave with her own hands. But the problem remained. How were the approaches to India now to be safeguarded? Palestine is one of the hearts of the problem—Mesopotamia being the other—for Palestine, as the old Jewish kings once knew to their cost, is the highway to Egypt. Unless Palestine is secure, the Canal is in jeopardy. But, Turkish rule having collapsed, Palestine can be made secure only in one of two ways. Either Britain can annex it herself, or she can return it to its owners. Characteristically she has preferred the second alternative, and has offered it to the people with an historic claim upon its soil. The offer is one which a free people can honourably accept, but it springs from British political necessities, and its terms must be defined by those who make it. The independence which it is in Britain's interest to offer to the Jews must be unqualified. There can be no question of an autonomous Palestine under the Sultan's suzerainty or any such-like nonsensical diplomatic compromise. An autonomous Palestine would either be left unsupported, in which case the Turk would stifle it, or would be under British protection, in which case the main object of our policy would be defeated. The Palestine we are prepared to contemplate must be a second Belgium, not a second Egypt or Afghanistan. It must be a sovereign State, though its sovereignty might well be guaranteed by all the Christian Great Powers—including the at present hypothetical re-christianised Germany.

So much for the British offer. Will Jewry accept it? Influential sections of Jewish opinion have closed with it at once, despite a few muttered misgivings. The support of Hampstead and Johannesburg is no light thing, for Jewish support means substantial financial aid. But, apart from a few enthusiasts, neither Hampstead nor Johannesburg will order the furniture vans. Whatever difficulties the Westernised Jew may have to contend with, he belongs definitely to the Western world. It is the Jews of Eastern Europe who will give Palestine its new colonists, and from them no word has come or could have come. But they have the luminous intelligence of their race, and cannot fail to see that any reconstruction of Eastern Europe in conformity with the views of the Allies necessarily involves a settlement of the Jewish question. Until it is disposed of, all talk of a free Poland is a farce; there would be riots in Warsaw before the constitution was drafted. Similarly in Russia and Roumania the danger of religious outbreaks led to restrictive legislation quite out of keeping with Western ideas on individual liberty or religious toleration. The plain fact is that whereas the Jew has established himself and found his place in the sun in the West, in the East he is still an unassimilated interloper. If Eastern Europe is to know political and religious peace, some free path must be found for its Jewish population. The choice can only lie between emigration to America or emigration to Palestine.

Emigration to America will always appeal to the more venturous spirits with strong commercial instincts. But having regard to the well-developed qualities of the Jewish race, it would be the height of unwisdom to offer it a Palestine fitted only for agriculture. The country forms, it is true, a highway of trade, but the great marts lie beyond its borders. It is worth the most careful consideration whether the new Judæa should not include Damascus and Beirut. Its inhabitants will assuredly establish themselves in those cities, and a Palestine which was a purely agrarian State, and which offered no special opportunities for the marketing of goods, could never be regarded by the Jews as a truly national home.

Subject to this qualification, there seems no reason why the Jews of the Western world should not regard the new State with goodwill and reverence. They will, we trust, feel towards it much as a good American feels towards England. It will be, if we may make use without offence of a phrase lately fallen into disrepute, a spiritual home—a citadel of high traditions and in time, no doubt, of lofty aspirations. Centuries of suspicion and persecution have somewhat limited the Jewish character. In a sovereign Palestine the balance would be restored, and a Jewish university would have a message for others besides its students. The modern world knows all too little of the uncompromising moral spirit of the Hebrew prophets, and the teaching of a Jewish theological faculty would have a profound meaning for a Christendom tainted by Kultur.

One difficulty remains to be faced. It has been suggested that the establishment of a Jewish State will give a fillip to anti-Semitic feeling in the Western world, and in particular that whenever any economic friction occurs—and it will occur daily—the cry will be raised that these troublesome Jews ought to be packed off to their own country. Anti-Semitism is certainly active both in France and in Germany, and is at best latent in England. Here it is desirable to speak quite frankly. There is less goodwill to Judaism in England now than at any time within living memory. The explanation is simple. During the September air-raids the Tubes were thronged with foreign Jews. Londoners noted their behaviour with merited disgust, and the whole reputation of Jewry has suffered, not for the first time, through the curiously conspicuous misconduct of its worst members. It is only a passing phase, but it is perhaps just as well that the future of Palestine has not to be regulated in detail now. Is it altogether far-fetched to derive from this unfortunate and discreditable episode a further argument for a Jewish Palestine? What the Jew requires is a constant stimulus to a proper pride of race. Reckless individualism has been the cause of much anti-Semitic feeling. The Jew gives offence by a certain aggressive bumptiousness which he would subdue, if he remembered that to Christian spectators the whole Jewish race is represented in his person. Unhappily, the whole Jewish race has meant nothing tangible up to now. But in the world of to-morrow it will mean Palestine and the right to guard the Holy Places of Christendom. The thought that he is a member of a spiritual kingdom with an earthly seat may well guide and strengthen the Jew of the Western world in his efforts to prove himself a worthy citizen of the country to which he elects to belong.

HOUSE OF LORDS.

Fighting in the Aden Hinterland.

December 4.

Lord LAMINGTON asked whether further information could be given as to the recent fighting in the Aden Hinterland. He referred to a recent article in *The Times* on the establishment of a new kingdom in the Hejaz, and added that since he last addressed a question to the Government on this matter he was told that the administration of Aden had been transferred to the Foreign Office. He was not aware of anything in the past records of the Foreign Office that would give confidence to the belief that it could successfully administer a very important outpost like that of Aden.

Earl CURZON, in reply, said that there was not very much to say about what was going on in this theatre of war. The line which was being held by our troops was the same as that held since July, 1915. It described an arc about eleven miles from Aden. Throughout this period there had been constant patrol skirmishes and small outpost actions, and the Turkish positions and camps had been continually bombarded by our guns. On November 22 the latest and most successful of these local actions occurred on a somewhat larger scale than any of their predecessors. It was at a Turkish post called Jabir, which the British forces attacked and captured and the defences of which they destroyed. The Turks were occupying a position which they took from a Chief friendly to ourselves in the early stage of the war. Between their lines and ours there intervened a narrow strip of desolate and waterless country. Their troops were distributed over a wide area, and a portion of their forces was directly in front of ours. He had no definite information as to the tribes who were on friendly terms with us before the war began, but he believed that the statement he made on the last occasion held good. As to how the Turks in the south-western corner of the Aden Peninsula maintained communication with Turkey and secured supplies, so far as the British Government knew, they had no direct communication with Turkey at all and no reinforcements of supplies and ammunition and other war material had reached them. They had only the reserves in men and material. With regard to the administration of Aden, there had been no absolute transfer. This was a matter which could not be finally determined during the war. The reason why a modified transfer was taking place was that owing to the exigences of the war it became necessary to place the charge of the troops there, as at Mesopotamia and elsewhere, under the War Office. This caused some dislocation, because the political action was directed by a different authority. It was decided to put the political charge of Aden under the Home Government, and their adviser now was Sir Reginald Wingate. When the war came to an end the future of these areas would have to be reconsidered. In regard to the whole situation in Aden, the position was one they would like to see clearer. It would strengthen our position if we could drive the enemy out, but with the calls on our forces it had not been possible to take the action at Aden which would have been desirable in other circumstances.

Mesopotamia Awards.

Mr. MACPHERSON informed Colonel YATE that the actual number of rewards conferred in connection with the operations in Mesopotamia up to the end of March last was: To Staff officers, 142; to regimental officers, 467. The last-named included "immediate" awards to regimental officers under powers delegated to the Commander-in-Chief in the field. It must be borne in mind that in many cases the reward to an officer might be in respect of services prior to appointment to the Staff. The initiation of rewards rested with commanders in the field, and the Army Council were satisfied that the recommendations of such commanders were invariably made in the best interests of the Service, having regard to the intimate knowledge which commanders possessed of the value of the services rendered by their subordinates.

HOUSE OF COMMONS.

Declaration of Corfu.

November 30.

Lord R. CECIL, in reply to Mr. R. LAMBERT, who asked whether he was aware that the Declaration of Corfu constituted a menace to the integrity and independence of Montenegro, said:—His Majesty's Government are aware of the light in which the present Montenegrin Government view that declaration.

The Khalifate.

Mr. KING asked the Foreign Secretary whether, since the outbreak of war, Russia had any communications with this country relative to the proposals that the Sultan of Turkey should no longer be recognised as Khalif; if so, what attitude was then assumed on behalf of this country; and whether he would now declare that the Khalifate was a question for Islam alone to decide.

Lord R. CECIL: The answer to the first part of the question is in the affirmative, but his Majesty's Government have never departed from the attitude that the question of the Khalifate is one for Moslem opinion alone to decide.

Advances to Greece.

December 3.

Lord R. CECIL, replying to a question by Mr. LYNCH as to whether the Government or the Allies generally exercised any control over the money either lent or given to Greece since the beginning of the war; and, if so, to what extent and in what direction that control was exercised, said:—The answer to the first part of the question is in the affirmative. As regards the second part it is proposed to establish a mixed Commission to assist the Greek Government in the application of the funds provided; but the exact scope of this Commission has not as yet been definitely settled.

British Influence in Persia.

Lord R. CECIL, asked by Mr. KING whether by any agreement or understanding arrived at during the war this country has expressed its intention, or taken power, to establish British influence over that part of Persia declared to be neutral in the agreement with Russia made in 1907, said:—No definite proposals have been made in the matter, although his Majesty's Government have signified to the Russian Government that a revision of the Anglo-Russian Convention in the sense indicated will be a matter for eventual discussion between the two Governments.

Partition of Turkey.

Lord R. CECIL, in reply to a question by Mr. R. LAMBERT whether, as agreed in the Anglo-French-Russian Agreement of February 21, 1917, France was to receive at the close of the war from the Turkish dominions in Asia the seaboard of Syria, the Adana vilayet, and part of Lesser Armenia; and whether it was still the intention of the Allies, and confirmed by the Allied War Conference, to fight on till this was obtained, said:—No agreement of the nature mentioned was come to in the early part of this year. Such understandings with respect to Asia Minor as were come to between the Powers named did not involve annexations.

The Late Sir Stanley Maude.

December 4.

Mr. CHANCELLOR asked what was the ailment or disease that led to the death of Sir Stanley Maude.

Mr. MACPHERSON: I regret to state that it is confirmed that Sir Stanley Maude died of cholera.

In answer to a further question Mr. MACPHERSON said there were very few cases of cholera.

Royal Indian Marine.

December 5.

Mr. FISHER, replying on behalf of the India Office to Colonel YATE, said:—With regard to the absence of a reference to the Royal Indian Marine by name in the recent vote of thanks, the Secretary of State for India desires to associate himself with the remarks made by my right hon. friend the Parliamentary Secretary to the Admiralty on November 21, in reply to a similar question regarding the Royal Marines. Part of the Royal Indian Marine was taken over, as the statute provides, by the Royal Navy shortly after the outbreak of war. Other members of the service have done admirable work in conjunction with his Majesty's land forces and in the dockyards and Marine establishments in India. His Majesty's Government appreciate fully the services rendered in these various directions.

The Disturbances in Behar.

Mr. FISHER, in reply to Sir J. D. REES, said:—The disturbances in Behar were of a local character, being confined to parts of the Shahabad district, and of the neighbouring districts of Patna and Gaza, and arose out of disagreements between Hindus and Mahommedans about the celebration by the latter of the Bakr-Id festival. At this festival it is customary to sacrifice kine and other animals. Riots occurred in several villages, in the course of which there was some destruction and pillaging of property and loss of life and conflicts with the civil police. To restore normal conditions it was found necessary to patrol the disturbed area by a considerable force of Military Police and regular troops. The Viceroy reported on October 20 that since the 14th of that month no disturbances had taken place, and that the troops were being gradually withdrawn.

Prisoners of War.

Mr. T. DAVIES asked the Under Secretary for War to give the number of prisoners of war taken on all fronts, German, Turks, and other nationalities, up to and including those reported on November 26.

Mr. MACPHERSON said the figures were as follow: Germans, 127,102; Austrians and Bulgarians, 2,092; Turks, 43,105; native soldiers and followers, 8,652; making a grand total of 180,951.

The Future of Albania.

Mr. BALFOUR, answering a question by Commander WEDGWOOD, said:—His Majesty's Government have the warmest sympathy with the Albanian peoples and would welcome any solution which, accompanied by adequate security against future strife, was of a nature to safeguard the full exercise of their national rights.

THE SERBO-CROATIAN PROBLEM.

Mr. H. Wickham Steed delivered the first of two lectures on "Austria," at King's College, London, on December 1. He said that anyone who wished to understand the problem presented by the Austrian Empire must regard that empire as the dynastic estate of the House of Hapsburg. The mosaic of peoples which inhabited it was looked upon by the ruling house much as a cotton spinner regarded his material. It was something to be moulded and twisted into a desired form; the welfare of the peoples was only considered in so far as it seemed to be in accord with that of the dynasty.

In the course of some remarks with which he followed Mr. Steed's address, Mr. H. A. L. Fisher, president of the Board of Education, who was in the chair, said that there was a large number of problems connected with the subject of Austria on which he would like to receive some guidance; one was as to the real attitude of the Croats towards the South Slavonic problem. The Croats were born fighters, many of them mountaineers with a long military tradition; and their little villages had sent troops to the Austrian army for ages. They were Slavs, and had helped the Austrians to conquer the Magyars in 1849. The statue of their military leader of that time still stood in the market-place of Agram with his sword pointing at the Magyars. They hated the Magyars just as the Greeks hated the Bulgars. The question he would ask was: How many of the Croats now hated the Austrians? How far was there a real desire to break off from the Austrian Empire and unite with the Serbs of the Greek Church? This was one of the most interesting problems in the south-east of Europe.

THE UNITED STATES AND ROUMANIA.

Reuter's Washington correspondent announces that President Wilson has sent the following cordial assurance to the King of Roumania:—"The people of the United States have watched with feelings of the warmest sympathy and admiration the courageous struggle of your Majesty and of the people of Roumania to preserve from the domination of German militarism their national integrity and freedom. The Government of the United States is determined to continue to assist Roumania in this struggle. At the same time I wish to assure your Majesty that the United States will support Roumania after the war to its utmost ability, and in any final negotiations in the direction of peace will use its constant efforts to see that the integrity of Roumania as a free and independent nation is adequately safeguarded."

THE EGYPT EXPLORATION FUND.

The annual meeting of the Egypt Exploration Fund was held at the rooms of the Royal Society upon November 27, and the report and balance-sheet showed a deficit for the year of only some £70, instead of about £250 as in the previous year. Practically the whole of this sum is to be accounted for by the loss of sale of the society's valuable publications to scholars and libraries in the European countries now at war. The committee have very properly continued to publish volumes of the more important manuscripts upon papyrus that they have stored at Oxford, and the first volume of a particularly expensive work upon the Egyptian inscriptions in the Sinai Peninsula has also been issued.

An address was delivered by Dr. Bernard Grenfell disclosing some of the literary treasures among the papyri that he has recently deciphered, which will be published in Part 14 of the "Oxyrhynchus Papyri," and Volumes 3 and 4 of the "Tebtunis Papyri." He was able to mention such a series of manuscripts as will, when edited, place British papyrology in the premier position. The Tebtunis papyri are derived from the papier maché cartonage of mummies, which was manufactured out of a stiffened series of layers of old manuscripts. Generally, after careful separation and chemical treatment, the mummy case proves to have been made up of disconnected fragments. One recently examined, however, contained one large and complete papyrus, cut up into pieces but capable of being reconstituted. Alas! it was not a long-lost treasure of classic literature, but a long series of registrations of contracts of the year 233 B.C.

The "Oxyrhynchus Papyri" contains new pieces of ancient authors, chiefly poems by Pindar and orations by Lycias, and part of the later history of Greece, before Alexander, by Ephorus, also a portion of a speech by Lycurgus. Pieces of classic authors already known are also fairly plentiful, and these have an importance of their own as proving that the mediæval manuscripts that we have of the works of these authors are fairly representative of their writings, as those were accepted by scholars in Egypt some 800 to 1,000 years earlier than the existing codices.

PROMINENT INDIAN INDUSTRIES.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Auspicious as was the report of the Anglo-Persian Oil Company, the speech of the chairman, Mr. Charles Greenway, at Monday's general meeting, throws an even rosier light on the prospects of the company. The trading profit for the year amounted to £415,827 5s. 10d., as against £171,723 1s. 4d. in the previous year, a result which he described as "eminently satisfactory" in view of the fact that this profit included only a very small benefit from the capital subscribed by the Government. As regards the present year, when full benefit will be derived from the extensions carried out with the first half of this capital, he felt confident the trading profit would be not less than £800,000, and would probably be nearer £1,000,000. It is a matter for extreme satisfaction to know that the company's present and future profits cannot be regarded in the light of "war profits," since practically the whole of the products of the company "were either contracted before the war, or, in the cases of those contracted for since, have been sold at pre-war prices."

***

It will be remembered that opinion was divided at the outset as to the advisability of the Government's action in investing in the company. Even within the past twelve months unfavourable criticisms have been made in the Press. These were dealt with most effectively by the chairman, who declared that "if it were possible to assume that the Government repented of their bargain, I would undertake to find a purchaser for their 2,000,000 shares at not less than £6,000,000, and probably for as much as £8,000,000." He further predicted that this increment, which he rightly describes as magnificent on an investment which had only been locked up for an average period of eighteen months, would be only a small instalment of the increment that would be shown in the near future, when it had been possible to build refineries more commensurate with the vast supplies of crude oil at their disposal. In this connection he went on to refer to the delay in constructive work in general through the war, and said they must consider themselves very fortunate indeed to have been able to complete one-half of the programme for which the nation's money was provided by the beginning of the year.

***

Another matter of interest in regard to the future profits of the company was the reference to the decision of the Government of India to substitute to a large extent oil for coal on the Western Indian railways. Mr. Greenway pointed out that it took about thirty days for the round voyage to take coal from Bengal to the West Coast of India, while it only took half that time for the round voyage from the Persian Gulf. That means, of course, that the company will have a new and growing market for its products close at hand. On the question of demand, the chairman pointed out that the contracts which they had secured now amounted to a total of no less than 12,000,000 to 15,000,000 tons. "The value to the company of this enormous volume of assured business," he added, "is immense, for it renders us absolutely independent for many years to come of all competition. Rate wars or no rate wars, we shall always be certain of some profit, no matter at what prices we may have to sell our benzine and kerosene, and we can, therefore, regard with perfect equanimity any competition that may present itself in these products." In other words, the company is now in a practically impregnable position.

***

Comment on the chairman's speech would be incomplete without some reference to his description of the extraordinary richness of the company's oilfields. After stating that they had hesitated in past years to express the full extent of their belief in the possibilities of the oil territories, he went on to say that "the confirmatory evidence which we get as we proceed with our developments so exceeds our most sanguine expectations that the time has now come when we can express the opinion with a good deal of confidence that the oilfields embraced in our concession are among the most extensive and prolific of any in the world, and that Persia may even one day become as big a producer of oil as the United States." In support of this he gave some interesting details of the production of the fields, and pointed out that the production now obtainable from the field on which was situated well No. F7, which had so far yielded something like 1,750,000 tons of oil—"the only one," to quote the chairman's words, "from which we have been able regularly to produce, and, therefore, properly to gauge the extent of its producing capacity, and of the field as a whole"—was larger than the pre-war production of the whole of the Roumanian and Galician oilfields!

***

Further progress is again revealed in the report of the Peninsular and Oriental Steam Navigation Company, though, satisfactory as the result is, it is not to be compared with the marked advance made in 1915-16. No doubt the slower rate of progress is to be explained by the statement that during the past year the whole of the fleet not retained on Admiralty charter was taken over by the Ministry of Shipping at Blue-Book rates, the earnings being for account of the Government. The number of available vessels was reduced by the loss of several steamers owing to enemy action. These losses have doubtless been far more than made good by recent acquisitions of other lines; while as regards new tonnage, it is stated that the two mail steamers which have been under construction for three years will be shortly delivered as cargo steamers only, and that a contract has been entered into for the building of a large mail steamer of 16,000 tons, but that her delivery is very uncertain.

***

Turning to statistics, the year's net profits were £862,500, as against £780,500 in 1915-16, £404,200 in 1914-15, and £354,600 for the year before that. In other words, the net profits were just £82,000 more than those of the record year 1915-16, when the great increase in earnings was due to the acquisition of the British India and Federal fleets. During the financial year under review the control of the Union of New Zealand Company's business was obtained, but this has only affected the returns as far as the last three months are concerned, and for its full effect we must wait for the succeeding report. As to the allocation of the profits, £5,000 less is absorbed by debenture interest, and £100,000 is contributed to the provident, good service and contingent funds instead of the single allocation in the previous year of £126,000 to the reserve fund. The dividend on the deferred stock is again 18 per cent., involving this time the payment of an extra £112,000. Even so, £92,700 is carried forward, an advance of £7,400 on the previous figures.

***

I am now able to give a few further particulars regarding the recent outburst of commercial activity in Bulgaria. Among the latest companies to be formed is one at Rustchuk under the auspices of the Bulgarian Donau-Bank to finance and otherwise promote trade after the war. The capital of this company is 5,000,000 leva, which has mainly been obtained from Bulgarian sources. Then the Banque Balkanique has raised its capital by 50 per cent. to 15,000,000 leva, with a view to undertaking more extensive transactions in tobacco. A new company has also been formed in connection with the tobacco trade by a number of other banking houses, including the Herzog-Kenzern, the Ungarische Bank, and the Wiener Bank-Verein. Other developments, it is reported, will include the taking over of the banking house of Meyer and Attalion at Rustchuk by a new joint stock bank with a capital of 20,000,000 leva.

ROUMANIA'S INDUSTRIES.

The Past and the Future.—I.

No doubt the criticism might be, and will be, made that the present is hardly the time to discuss the industrial possibilities of Roumania. But it is just because of the present situation of the country that discussion is necessary. Reconstruction will not be the work of a moment in a country which, while taking part in the war, has kept its own territory more or less inviolate. Still less can it be so where invaded territory is in question, especially in the case of a country which must largely depend on external aid to repair the damage and to place its economic life once again on a normal footing. That is Roumania's position, and it must be obvious that the better the knowledge of her pre-war industrial situation the more certain it will be that her needs will be satisfied.

Roumania before the war was at an interesting stage of industrial development. The country had not had sufficient time to prepare for the proper utilisation of its resources, and, apart from agriculture and the production of petroleum, possessed no outstanding industry. The industrialisation of a mainly agricultural country is invariably a slow process without external assistance, and hitherto Roumania has not been able to attract sufficient foreign capital, except as regards the oilfields. The oil industry has, of course, proved an immense source of wealth, but it has been disadvantageous in one way, because, while drawing a certain amount of capital into the country for other purposes, it has, to some extent, overshadowed other industrial possibilities of the country.

Subsidisation of Industries.

From 1886 to the present day is not a far cry, and when it is borne in mind that Roumania's economic development only dates from that year, it is not surprising that greater progress has not been made. It is, on the contrary, a remarkable tribute to the energy and initiative of the Roumanian people that in that short space of time a very considerable industrial advance should have been effected. Throughout this period the most striking feature is the systematic and thorough nature of the encouragement accorded by the authorities to commercial enterprises in general. The policy of the Government has been to give consistent support to home industries by means of protective taxes, freedom from taxation, subsidies, and in other ways of this kind. The first step was taken in 1887, when a law was passed giving numerous privileges to those who wished to establish industries in the country, among them freedom from direct taxation, exemption from Customs duties on machinery and similar things, and reduced railway charges for the manufactured article. That law was considerably modified in 1912, because owing to the fact that the privileges were for a term of years it gave preferential treatment to newer concerns. On the whole, the effects of this law have been satisfactory, though in some cases it has merely resulted in raising prices in Roumania. It has at any rate given indigenous industries a chance to raise their heads, which would certainly not have been the case, had there been no obstacle to the importation of goods from the Central Powers. That, as it was, the bulk of Roumania's imports came from those quarters suggests, however, that further measures will be necessary in future which, while framed so as to encourage trade with the Allies, will place an effectual ban against the commercial penetration of Germany and Austria.

Woollen Goods.

A wide field is covered by the country's industries, which include the manufacture of woollen and other fabrics, sugar, and paper. A brief sketch of the position of some of these industries before the war will seem to illustrate the country's potentialities. In 1912 the capital invested in the woollen trade amounted to nearly ten million lei (francs). The value of the raw material used in this industry amounted to over seven million lei a year, of which just a half was provided in the country. The home product was, however, not of the best quality, and the finest wools had to be obtained from abroad, principally from Germany and France. Roumania, in turn, exported her surplus wool to Austria, Serbia and Bulgaria, the value of these exports amounting in 1912 to just over a million lei. In 1912 thirteen factories were engaged in the manufacture of cotton goods, the value of which came in that year to 14,096,430 lei, and in the following year to 15,716,691 lei. This was far from sufficient to meet home consumption, and the country has always imported woollen goods on a large scale, the imports being chiefly goods of the finest quality, and coming, needless to say, mainly from Germany and Austria. The chief need of this industry is an improved source of raw material, and this will be a difficult problem to solve, since the increased cultivation of cereals has meant a corresponding decrease in the number of sheep. There is, however, wide scope for improvement in the strain of sheep, a question to which too little attention has been paid in the past. There have, it is true, been experiments in this direction, but they have been isolated instances, and not part of a general policy. Possibly some further encouragement accorded to the industry might bring about an improvement in this direction.

Hemp and Flax.

The hemp and flax industry, which represented in 1913 a capital of 2,245,632 lei, presents somewhat similar features. Here, too, Roumania has been handicapped by the lack of raw materials, which in the year in question were imported to the value of 1,742,036 lei, while home supplies were only worth 135,217 lei. The quantity of manufactured goods also fell much below what was consumed in the country, as may be seen from the figures for 1913, when they amounted to 1,290,805 k., and the imports were 435,453 k.

Sugar.

The sugar industry is an example of the misapplication of State aid. In this case the only benefit derived from State encouragement, in the shape of bounties and protective duties, has been that the local factories—the shareholders in which were to a great extent foreigners—were able to reap larger profits, while the home consumer had to pay an unnecessarily high price for the commodity, owing to the absence of foreign competition. The consumption of sugar in Roumania has always been on a low scale; in 1913, for instance, it was only one-eighth per head of the population compared with what it was in this country. That can easily be understood in view of the price of this article of food. The main problem before the authorities after the war will be to reduce the price of sugar, and to do this they must either permit unfettered foreign competition or arrange for increased production. The former method is obviously a matter for a stroke of the pen, while the latter is likely to be difficult to accomplish.

EGYPT'S FINANCES.

Substantial Shipping in August.

(From Our Own Correspondent.)

Cairo, November 2.

The State accounts for August, just published, show a substantial surplus in the Government's favour. Revenue for the five months comes to £E7,833,782 and expenditure to £E7,281,712, as against £E6,927,214 and £E6,976,784 respectively a year ago. Thus revenue has increased by about £E900,000 and expenditure by about £E300,000, leaving this year a surplus of £E552,070, compared with a deficit of £E49,570. The position is therefore £E600,000 better than it was at the end of August, 1916.

The most important items of revenue during the month were :—Land tax, £E144,926; customs, £E209;068; tobacco dues, £E144,165—the total so far shows, however, a falling off of £E163,419; mixed court fees, £E67,545; railways, £E367,635; ghaffir cess, £E47,199; and sundry extraordinary receipts, £E136,302. The chief items of expenditure during the month were :—Irrigation, £E107,776; railways, £E227,898; War Office £E96,788; public debt service, £E115,215. With regard to the surplus this year, it is, of course, to be noted that ghaffir cess makes its appearance for the first time, but as its receipts figure for £E377,342 and the expenditure debited against it for £E288,669, this item accounts only for about £E100,000 excess of revenue, so that there can be no question as to the present position being eminently satisfactory.

U.S. PURCHASES IN INDIA.

The Government of India, says Reuter's Delhi correspondent in a message dated November 30, have opened rupee credits within certain limits in favour of the Federal Reserve Bank of New York in order to finance purchases by the United States of supplies required in connection with the war. In regard to these arrangements discussions are now in progress with the United States with a view to the acquisition by them of the silver produced in the United States, of which a portion would be placed at the disposal of the Government of India, but a settlement has not yet been reached.

Viscount Goschen having resigned the chairmanship of the London County and Westminster Bank owing to the pressure of important public business at the Board of Agriculture, the Board have elected Mr. Walter Leaf chairman and Sir Montagu Turner deputy-chairman for the year 1918.

ADEN MARKET FOR CONFECTIONERY.

Trade Requirements.

Aden's imports of confectionery amount to an average of £7,000 worth a year, thus making the market one well worth the attention of manufacturers. The position of this trade is dealt with in a recent report of the United States Consul there, Mr. Addison E. Southard, who gives the following particulars regarding market conditions :—

The bulk of the imported sweets are of various classes of hard and semi-hard mixed candies. The Arabs, Indians, Somalis, and Jews, in the order named, use considerable quantities of these candies on festive occasions, such as marriage and birthday celebrations, and on feast days in general. The Arabs who can afford it always have plates of candies in their "mabrazes" or sitting rooms for the guests who may call as well as for members of the family. A great deal of this candy is consumed by the Arabs while eating khat. The khat habit is widely and generally practised, and often in the intervals between fresh chews of khat a piece of candy is eaten.

Khat is the Arabic name for a shrub which, so far as is known, grows only in the Turkish Yemen and in the Harrar district of Abyssinia. The young leaves and tender stems are chewed. Khat has a stimulating effect upon the nerve and brain cells, and is supposed to cheer the melancholy and to give strength to the weary. It is eaten only when fresh, and is very expensive in Aden. The wealthier Arabs gather at specified times in the afternoon and at night, in either public or private "mabrazes," for khat chewing and combine with it the reading of stories or of the Koran, singing, or serious conversation. The labourer, whenever he can afford it, chews khat as he works.

Methods of Packing.

The bulk of the hard candy sold here is manufactured by a well-known firm in England. It comes packed in sealed tine of 7 lbs. capacity. There are forty of these tins to a wooden case. The price per case before the war was from $6.50 to $7, and the latest price is from $12.50 to $14.50, with limited supplies obtainable. One of the 7-lb. tins of this candy sold before the war for $0.57, and the present price is almost double. The retail price per single pound was $0.10, and has now increased to $0.20. The flavours most liked by the natives are lemon and banana, although the candies are often of assorted flavours. Hard candies of very much the same quality are also imported in 1-lb. glass containers, tightly closed with screw tops. The prices for these are naturally somewhat higher than for the bulk candy, and only the small European population and the wealthier natives buy their sweets in this form. Chocolates, toffee, and similar fancy grades of sweets are imported in pound and half-pound packages. A considerable quantity of these grades is consumed by the European and wealthier natives. All are packed in tightly sealed tins or bottles. This method of packing is highly important in order that the contents may be kept fresh and presentable in this climate.

The natives are fond of another class of confectionery known as "A B C" lozenges, which come in assorted flavours and colours. They are manufactured in England. These sweets can be sold economically in small quantities, as they are usually packed in bulk —generally in tin-lined barrels containing a hundredweight. Eight or ten pieces are given for a pice. These lozenges are somewhat cheaper to the dealer than the hard candies packed in the 7-lb. tins. He can retail them at a lower price, and also benefits by the sale of the barrel and the tin, for which he receives about 25 cents each.

Mottoes.

The "A B C" lozenges resemble in composition the little flat pieces of candy known as "mottoes," which are so popular in the candy stores in America that cater to children's trade. "Mottoes" are in the shape of hearts, squares, circles, ovals, etc., and have stamped on them, usually in red, various little mottoes. If a selected lot of short and simple mottoes in Arabic, instead of English, were stamped on these pieces of candy, it is believed they would have a fair sale in this district, as such confectionery novelties appeal very much to the average native. The lozenges above referred to are smaller than "mottoes" and have one letter of the alphabet stamped on each piece: hence the name of "A B C."

The idea of Arabic "mottoes" and Arabic "A B C's" has been suggested to local shopkeepers familiar with the trade, and they think it likely that such a confectionery novelty would meet with a good and permanent demand. This candy, while designed especially for the comparatively limited Aden trade, would undoubtedly meet with a good demand in any district having a considerable Arab population. Taking all such districts into consideration, the possible market would be large enough to be well worth entering. Local shopkeepers have an indistinct recollection of having many years ago had small shipments of Arabic "mottoes" from Germany, but so far as they know there has been nothing of the sort on the market in recent years.

The value of the locally made sweets which are consumed is estimated to be greater than that of the imported sweets. By far the most important of the locally made sweets is "Turkish Delight." The principal ingredients of this confection are sugar and American starch. Flavouring is added, and for the fancy grades almond or groundnut kernels are used. "Turkish Delight" often makes up the bulk of the Arab breakfast, and sometimes contributes largely to his other meals. There are many grades, but those most used range in price from 8 to 25 cents a pound. The best quality is known as "Hallawat-Alloaz," which, translated, means "almond cake." It is quite unlikely that imported sweets of this sort could compete with those produced locally, which exactly suit the native taste and pocket book. This confection is not manufactured in any one place on a large scale, but is almost entirely the product of the small native home and shop industries.

There are no Custom duties to be paid upon sweets imported into Aden. The commercial language is English. Quotations should be, if possible, in terms of English or Indian currency, and c.i.f. Aden. The largest importers of sweets in Aden have usually deposited 5 per cent. in advance and paid the remainder of the bill, upon arrival of the goods, by cash against documents through the local bank.

ENGINEERING NOTES

Substitute for Coal in Egypt.

THE NEAR EAST Cairo correspondent referred in his letter in last week's issue to experiments which were being carried out for some time under the Egyptian Government's auspices with the object of ascertaining whether any substitute for coal could be made out of the vegetable refuse remaining over after the various crops had been harvested. He says that these experiments have been in progress for about two years, the result being a scheme whereby gas can be made out of the vegetable matter in question, for use in engines using anthracite coal (we presume it means suction gas producers). The scheme is not described, but, probably, some alterations in the fuel container or other parts of existing suction gas plants are proposed, or a special apparatus has been devised as an attachment to such plants, by which the use of vegetable refuse as fuel can be effected. But whatever the scheme may be, the Egyptian Government has apparently found it practically efficient, for it has made arrangements to put the details of this scheme at the disposal of all owners of engines (we presume suction gas engines), free of any charge, and an official notice has been issued advising such owners that they can obtain full particulars and copies of the plans on application, and that the working of the apparatus will be demonstrated to them at the research works in Shubra. The result was that, according to THE NEAR EAST correspondent, the director of the research department has been literally "snowed under" by applications from people wishing to take advantage of the offer. Perhaps it is a hyperbolic expression, but it corroborates, in a way, what in previous Engineering Notes we stated in reference to the use of suction gas as a motive power in the East, that "in recent years the introduction of suction gas plants has offered such great advantages that their use is constantly increasing, and many factories in towns, pumping and irrigation plants, and a variety of local Oriental industries, are now met in all directions using such plants for motive power." The numerous applications which "snowed under" the above-mentioned official in Egypt verify the above statement; and the remarks we made at the time that "difficulty is experienced in their (the plants) use when and where anthracite or other fuel, which is needed, has to be imported," adding that "a suction gas plant, which could work with fuel produced and obtained on the spot appeals to every enterprising individual in those regions," are also proved correct by the numerous applications for the new scheme in Egypt.

Judicious Advertising.

We made the above remarks more than three years ago, and before the war began, when we had occasion to describe in these columns a new suction gas producer, which could work continuously upon wood refuse, such as chips, wood blocks, shavings, sawdust, bark, olive refuse from oil mills, coconut husks and shells, rice husks, cotton pods, and many other vegetable waste materials. It could also, if desired, consume anthracite, lignite (brown coal), coke, peat, etc. Indeed, the apparatus could work successfully and cheaply in all parts of the East, as we pointed out at the time. It was, like similar other producers, of British manufacture and of very simple construction. The result was that we had many applications from our

readers from the East, and even from the United Kingdom, for further particulars and information where the apparatus could be obtained. We referred them to the manufacturers, but have not heard of the results. However, taking the present case of Egypt, where so much interest is being shown in such apparatus, it may be surmised that either these British-made suction gas producers, such as were described in these columns more than three years ago, are not appreciated in Egypt, or they are *not yet* known there! More probable the latter, for otherwise why should experiments be carried out in that locality to find out a method of doing practically what these British-made suction gas producers were successfully already doing? Is it not another proof of the inadequate methods of British advertising? For it is evident that because of such methods an invention which was of vital interest to such an important agricultural region as Egypt is was not made duly and adequately known there. British manufacturers, as a rule, are content with advertising, by preference, in their respective trade journals. And there, from year to year, their stereotyped, illustrated advertisements appear as regularly as the seasons without any change, except when names or addresses have to be altered. The illustrations occupy four-fifths of the space, whilst the wording, trimmed to a scant sentence or two, is tucked away in an obscure corner, with, apparently, no consideration of the relative importance of picture and wording. We admit that advertising in the trade journals is an imperative necessity for the manufacturer, for it keeps his name in front of the dealer, the merchant, the exporter, and importer at home and abroad, but for the general public—and we speak here with regard to foreign countries, and especially those in the East—this method of advertising is not efficient. The results of an advertisement in a strictly trade journal depend on the energy and disposition of the middleman, the commercial agent, the technical expert, etc., who see the advertisement; and, as a rule, buyers in the East prefer to do business without them. Therefore, without any intention to minimise the value of the trade journal as an advertising medium, we would suggest to engineering manufacturers and others not to overlook or underestimate the value of political and commercial journals. By natural instinct, the general public in the East is particularly interested in such publications. German and American firms, by making use of them as advertising mediums, spread their business successfully in all directions there. Now, we are trying to capture that business; but we cannot do it with the old, inadequate methods. It is said that all things wait for him who *comes*—if he comes quick enough and with the proper force; and if we mean to act only when the war is over, we may be sure to find others there. An advertising campaign is urgently needed *now* to prepare the way, but not of the stereotyped style which hits the bottom of the Consulates' waste-paper basket—a campaign to catch the interest, to hold the attention, to convince old and create new buyers in the East. Let manufacturers select publications of general interest, with a recognised circulation in the region to be attacked, and with explicit and convincing words say what they have now and what they can do after the war. Such an attack, if properly directed, will accomplish wonders, and make easier the capture of the enemy trade.

One-Way Ploughing Device.

A device has just been brought out which forms an important improvement in ploughing a field by a tractor. By this device two ploughs can be carried by one tractor, the ploughs being arranged so that one, on which the mould-board is designed to throw the soil to the off-side, is in operation while the tractor is traversing the field in one direction; the other, which is designed to turn the soil to the near side, being in use when the tractor is travelling in the reverse direction. The effect in ploughing a field is, of course, that all the furrows are laid one way, and blank spaces in the growing corn, where two sets of opposed furrows meet, are obviated. The arrangement is a simple one. Each plough is lifted or lowered by means of a two-throw crank-shaft. The cranks are set at 180 degrees, and one of them is coupled by chains to a point on the framework of the plough near the front end, the other to a point at the back of the plough frame. A half-revolution of the two shafts, acting in concert, raises one plough and swings it out of the direct line, and at the same time lowers the other to the operating position.

Patents in Zanzibar.

A decree has been issued by the Sultan of Zanzibar relative to patents, designs, and trade marks in the Protectorate. This decree supersedes the Indian law as to patents which was formerly in force in Zanzibar, and provides, *inter alia*, that letters patent for any invention may be granted in Zanzibar to any person holding in the United Kingdom or India a valid patent for such invention.

COMPANY MEETING.

ANGLO-PERSIAN OIL.

An Excellent Year.

The eighth ordinary general meeting of the Anglo-Persian Oil Company, Limited, was held on Monday at the registered office of the company, Britannic House, 23, Great Winchester Street, E.C., Mr. Charles Greenway (chairman and managing director) presiding.

The secretary (Mr. F. Macindoe) having read the notice convening the meeting and the report of the auditors,

The Chairman said:—Gentlemen,—The directors' report, balance-sheet, and profit and loss account having been duly circulated, we will, with your permission, follow the usual course of taking them as read. I am pleased to say that there has been some acceleration—about five weeks—in the presentation of the accounts this year, but they would have been submitted a month earlier had it not been for the postal delays now occurring. In the future, subject, of course, to postal irregularities, I hope we may be able to submit them not later than in the month of October in each year.

Accounts.

I will now ask you to kindly give your attention to the printed figures. Dealing first with the balance-sheet, you will see that the paid-up capital stood at £3,250,000, being an increase of £250,000 upon the figure of the previous year, due to the payment by his Majesty's Government of a further call of that amount. This payment brought the total amount of capital provided by the Government up to £1,251,000, leaving a balance of £949,000 still due at the end of the financial year out of the £2,200,000 which they undertook to provide by the agreement of 1914. This balance they have, as mentioned in the report, recently paid. I may mention that in addition to £199,000 of Debenture stock which has been issued to the Government in respect of a portion of the payment to which I have just referred, we have issued a further £1,400,000 of that stock, bringing our total Debenture issue at date up to £2,000,000. Including these Debentures, the total capital now issued amounts to £6,000,000. Beyond the Debentures we have no liabilities outstanding, either in respect of our recent large acquisitions of shares or on any other account, excepting the contingent liability of £209,741 2s. 2d. to the Burmah Oil Company, other than the usual liabilities to trade creditors, which are more than offset by the amount due to us by sundry debtors. The other items on the debit side are self-explanatory and do not, I think, need any comment. Coming to the credit side of the account, you will see that there has been an increase of about £200,000 in the first item, this being due to additional shares which have been taken up in our subsidiary companies to provide the further capital required by them from time to time for necessary developments. The item of "Refinery, tank installations, pipe lines, etc.," also shows an increase of about £145,000, this representing the outlay on the various large extensions which were carried out during the year, less the depreciation on the whole, which has been written off. The only other item in this account requiring comment is the claim against the Persian Government for the losses sustained by this company owing to the rising of Persian tribesmen in 1915. As you will see, these losses have now been ascertained to have amounted to the large total of £402,887 3s. 1d., and a claim has been lodged against the Persian Government for the payment of this amount. The further claims of our producing companies for losses sustained by them on the fields amount to £211,602, making a total of £614,489 3s. 1d. due to us by the Persian Government, and it is perhaps superfluous for me to say that had it not been for this destruction of property by Persian tribesmen the profits of the Anglo-Persian Company during the past two financial years would, to the extent that the claims represent loss of revenue, have been correspondingly greater.

Profits.

Turning to the profit and loss account, you will see that the trading profit for the year amounted to £415,827 5s. 10d. as against £171,725 1s. 4d. in the previous year, which fully confirms the anticipations expressed by me when I last had the pleasure of addressing you. This result has been arrived at after making a very liberal allowance for depreciation, and in view of the fact, to which attention is drawn in the report, that this profit only includes a very small benefit from the capital subscribed by his Majesty's Government, I think it may be considered as eminently satisfactory. During the current year we shall be deriving the full benefit of the extensions which have been carried out with the first half of this capital, and the year is now sufficiently advanced for me to be able to say with confidence that the trading profit shown in our next accounts will not be less than £800,000, and will probably be nearer £1,000,000. And this profit, gentlemen, I would particularly like to emphasise, can in no sense be regarded as "war profit," inasmuch as practically the whole of our products were either contracted for before the war or, in the case of those contracted for since, have been sold at pre-war prices. As regards excess profits duty, this company, in common with all concerns which were in process of development on the outbreak of war, is in the unfortunate position of having a very low pre-war standard of profits. We have therefore claimed to be assessed on a capital percentage basis and this has been fixed at 11 per cent., in addition to which we shall, of course, get the allowance of 3 per cent. on new capital put into the business since the beginning of the war. I think I may safely say that there will be no liability for this duty in respect of the past financial year. What the amount may be for the current year it is impossible at present to estimate, but in any case there will be an ample sum available for the payment of the full 8 per cent. dividend on the Preference shares, as well as a substantial one on the ordinary shares. In this connection I would like to refer to some misleading references to this company which have appeared in the Press during the past twelve months. Some of these journals, quite disregarding the explanations which I gave last year that no portion of the plant for which Government capital was provided had been in operation, and that our refineries had, from quite exceptional causes, been shut down for about five months, took the profits of the preceding year and tried to show from them that the Government had made a very bad investment. Another referred to the Government having "dabbled in petroleum to the nation's cost" and to their having sunk "millions" of public money in Persia, etc. To these writers I would commend a careful study of the accounts we are now submitting and, still more, of those which we shall be submitting for the current year. From the former they will see that not only had the Government, when these comments were written, not sunk "millions," but only one million and a quarter, but also that this million and a quarter had only just begun to fructify. No one can expect eggs to produce chickens until they are hatched, but the best proof that the Government eggs in this company are in the course of being satisfactorily hatched is that if it were possible to assume that the Government repented of their bargain I would undertake to find a purchaser for their 2,000,000 shares at not less than £6,000,000, and probably for as much as £8,000,000. (Applause.) This increment on an investment of £2,000,000, which has only been locked up for an average period of eighteen months, is, I think you will all agree, a magnificent one and one that quite refutes any suggestion that the Government have by their investment in this company made a bad investment or squandered public money. But this increment is, I predict with confidence, only a small instalment of the increment that will be shown five to ten years hence when we shall have been able to build refineries more commensurate with the vast supplies of crude which we have at our disposal. (Applause.) You all know, gentlemen, the time occupied, even under peace conditions, in laying pipe lines, erecting tanks and refineries, building jetties and in carrying out the other extensive engineering operations connected with the development of a large oil refining business in a country so remote as Persia. Under war conditions, with the difficulties in obtaining delivery of steel plant of all kinds, the delays in ocean transport, accentuated by the occasional loss of essential portions of plant by the action of enemy submarines, the interruptions to work caused by the scarcity of labour, etc., the time occupied is necessarily very much greater; and in the circumstances we consider ourselves very fortunate indeed that we have been able to complete one half of the programme for which the national money was provided at the beginning of this year. The other half it will not, I am afraid, be practicable to complete for some considerable time, and in the meantime we shall have to be satisfied with only a portion of the benefit of the national investment. This portion will, however, as I have just indicated, be eminently satisfactory, and when the whole benefits are shown they will be such as to gratify the desires of any investor.

Contracts.

While on the subject of the future profits of the company, I should like to take this opportunity of announcing that the Government of India, after a long series of experiments and trial runs, which have amply demonstrated the greater efficiency and economy of oil, have recently decided to substitute to a large extent oil for coal on the Western Indian railways. This substitution will not only be of financial advantage to the railways, but it will also—and this, as you all know, is a matter of the very greatest national importance at the present time—effect a very considerable economy in tonnage, inasmuch as the time occupied in carrying coal from Bengal to the West Coast of India is about thirty days for the round voyage, as against only fifteen days for the round voyage for oil from the Persian Gulf, whilst oil as a fuel for locomotives has roughly twice the efficiency of coal. In other words, to carry the fuel equivalent of 1,200,000 tons of coal, oil will only occupy space to the extent of 300,000 tons. The great importance to the nation, at the present time of stress, of the enormous economy of tonnage which will thus be effected is too obvious to need any elaboration, but I would like to take the opportunity of remarking that this is another of the many benefits which this country is gaining from the Government's participation in the business of this company. A similar substitution will, I understand, be carried out shortly on the Mesopotamian railways, whereby a further large economy of tonnage will be effected. You will be pleased to learn that the contracts which we have secured for fuel oil and other products now amount to a total of no fewer than 12,000,000 to 15,000,000 tons. The value to the company of this enormous volume of assured business is immense, for it renders us absolutely independent for many years to come of all competition. Rate wars, or no rate wars, we shall always be certain of some profit, no matter at what prices we may have to sell our benzine and kerosene, and we can therefore regard with perfect equanimity any competition that may present itself in these products. This, gentlemen, is an extremely happy position for an oil company to be in when, as in our case, it can be sure of an ample supply of the raw material, for it renders us absolutely unassailable, and enables us to take advantage of such opportunities as may occur for advantageously marketing the balance of our products. One of the journals to which I previously referred expressed a very earnest desire to be informed of the extent to which this company has been able to assist the Navy by deliveries of fuel oil. I should like very much to give this figure, because it would greatly emphasise the national importance of the company, but I am afraid that I cannot give the information asked for without committing a serious breach of the provisions of the Defence of the Realm Act, and the divulgence of this information must therefore be withheld until the conclusion of the war, when it can be disclosed without any danger. Apart from this assistance, however, the fact that the Admiralty and the War Office have had this substantial source of supply to draw from, in addition to others, has not only been of great service to the operations of the Allies, but it has, by the

competition which it has created, undoubtedly saved the nation many millions of public money in the lower prices at which it has enabled the Government to purchase the balance of its supplies. Though the company will, when the extensions now under contemplation are completed, doubtless be able to provide the whole of the British naval requirements of fuel oil, and also the requirements of the Government generally for all petroleum products, it would not be wise, either politically or economically, for the Government to rely upon any one country as its sole source of supply; but we shall, as you will have gathered from what I have said as to the volume of business already secured, have no difficulty at all in finding outlets for the balance of our production, apart from the great trade which awaits petroleum and benzol producers after the conclusion of the war, as the result of the extended use which is being developed by the war for spirit and petroleum products of all kinds for railway, marine, aviation, and industrial purposes.

State Participation.

Mr. Walter Long recently, in the House of Commons, said "that oil is probably more important than anything else; you may have men, munitions, and money, but if you have not got oil all other advantages will be of comparatively little value." Of this fact there can be no gainsaying. Although it has only recently come home to the minds of the people of this country, a nation which again enters into war without an ample supply, absolutely free from foreign control, of fuel oil for the service of its naval and mercantile fleet, of benzine for its motor transport and aircraft, of oil for the lubrication of th many mechanical appliances which so largely enter into modern warfare, and of aromatic hydro-carbons for the manufacture of high explosives, will be committing an act of madness. These are just as necessary for the successful conduct of a war as men, ships or munitions, and although in these days of great events and of wholesale upheavals of old political shibboleths, the national importance of the transaction is apt to be overlooked, the Minister and Cabinet who first recognised this essential fact by securing control of this company, and who thereby established an important source of supply, free from foreign or monopolistic domination of any kind, of a commodity which is necessary for our national existence, performed a greater service to this country, both financially and politically, than even did Disraeli when he concluded his historic purchase of Suez Canal shares. (Hear, hear.) A further very desirable step in the same direction is now being taken by the department which has been recently constituted under the presidency of Mr. Long in its efforts to promote the production of indigenous oil. But, although a good deal may be done in the development of production of oil from shale and coal, it is hopeless to expect that these sources of production can compete with natural oil, excepting under particularly favourable conditions, or that the quantity produced will ever meet the whole of the national requirements. And, so far as natural oil is concerned, the chances of finding it in quantity in this country are, if the opinions of geologists are of any value, so remote as to render this a very uncertain source of supply. Therefore, in addition to the steps which are being taken in connection with indigenous oil, what is wanted is an extension of the policy initiated when the Government secured a controlling interest in this company, and the formation of an "all-British" company, similarly controlled and free from foreign taint of any kind, to deal with the development of oilfields outside of the British Isles. This company might absorb all the existing British oil-producing companies and at the same time undertake the examination and exploitation, so far as concessions are obtainable, of all the known oil territories of the world not already taken up by these or other companies, but directing its attention more particularly to the British colonies and dependencies and to countries whose friendship can be relied upon. Some step of this kind is all the more essential now that the United States—hitherto the chief source of supply of the world—has come to the point where demand is overtaking production, and is beginning to have grave doubts as to whether she will be able to maintain her export trade for many years longer.

Purchase of German Companies.

In connection with the commercial aspects of the company's business, I will now refer to the important development which has recently taken place in the purchase of the shares of the German companies known as the British Petroleum Company, Ltd., the Homelight Oil Company, Ltd., and the Petroleum Steamship Company, Ltd. The two former are what is known in the trade as distributing companies, and their organisations will, later on, when our present arrangements for the sale of benzine and kerosene come to an end, doubtless prove a most valuable acquisition, as they will provide a means of disposing of our output of these products at much better prices than we are realising at present, for without such an organisation oil companies have necessarily to surrender to intermediaries a large portion of the profits realised on the sale of their products. These companies have, unfortunately, owing to the arrangements which have been made by the Board of Trade for the regulation of petroleum supplies with a view to economising man power and tonnage, had to abandon their share of the benzine trade of this country for the period of the war. They are, however, continuing their trade in kerosene, obtaining their supplies from the same sources as before, and will in the meantime make all necessary arrangements for resuming their business in benzine after conclusion of the war on a scale that will ensure their securing a substantial share of the trade of the United Kingdom. In this connection I may mention that the company's production of benzine is now at the rate of about 150,000 tons per annum, and will, by the time our extensions are completed, probably amount to 600,000 to 700,000 tons per annum. This may appear to be a very large figure compared with the United Kingdom's pre-war trade of less than 400,000 tons per annum, but with the very large increase in motor transport of all kinds which will certainly take place in this country and in Europe generally after the conclusion of the war, and with the entirely new demand which will have been created by the great development in aviation, I have not the slightest doubt that there will then be an offtake for all the benzine and all the benzol which the world will be able to produce. You have all probably read of the enormous increase in the consumption of benzine which has taken place in the United States during the past few years. The consumption there has now gone up to 5,000,000 to 6,000,000 tons per annum, or to about six times the total pre-war consumption of the United Kingdom and Europe, the population of which is vastly greater, and with the new aviation demand which is now being created America's requirement will no doubt in the future be very much larger. The same ratio of consumption will, given the necessary supplies of spirit, sooner or later be developed on this side of the Atlantic, and as it will be quite impossible for the United States to meet this demand, even if she can spare any at all for export, it is obvious that there is ample room in these markets for all the spirit that can be produced elsewhere for many years to come.

Fleet.

The purchase of the shares in the Petroleum Steamship Company, Limited, has given us an addition of nine tankers to our fleet, which, as mentioned in the report, now numbers 22 vessels of a deadweight capacity of 130,915 tons. In addition to these, we are managing nine other tankers of a deadweight capacity of 74,500 tons, bringing the total number of boats now being run by us up to 31, of a deadweight capacity of 205,415 tons. This fleet, though large, will not nearly suffice for our future requirements, and will need to

be augmented considerably whenever it may be practicable to purchase or build additional tonnage.

Pipe Line.

Our new 10 inch pipeline was completed in January last, and has since been working very satisfactorily. Unfortunately, however, a serious fire at our pumping station at Tembi in July last, which was, I regret to say, accompanied by the loss of the life, under particularly heroic circumstances, of our chief engineer there, Mr. R. L. Lindsay, has partly deprived us for the time being of the use of our smaller line, but we are still able to deliver to Abadan all the oil that our refineries will be capable of dealing with until our extensions are completed. That the whole station was not destroyed was entirely due to the great bravery displayed by Mr. Lindsay, who, when the outbreak took place, rushed through the flames to almost certain death to close down the valves, and to the aid given him by one of his assistants, Mr. Still, who very ably and at great risk to his life seconded Mr. Lindsay's efforts. You will be pleased to learn that this great courage and devotion to duty has been recognised by his Majesty by the bestowal on Mr. Lindsay of a posthumous decoration of a gold Albert Medal, the civilian equivalent to the V.C., and on Mr. Still of the ordinary Albert Medal, and also that these services have been liberally recognised by the company. (Applause.) The necessary repairs at the Tembi station are being carried out with as little loss of time as possible, and we are also at the same time arranging to erect the additional pumping stations necessary to bring the capacity of the lines up to a total of 3,000,000 tons per annum.

Refineries.

As mentioned in the report, the refinery extensions to which I referred in January last have not yet been completed owing to the loss at sea of some of the plant and to the delay under present conditions in replacing it, but we hope to get them in operation in the course of a few months. Further large extensions now require to be taken in hand immediately to meet urgent war requirements. The plant for these has already to a large extent been ordered, and to meet the additional capital outlay which will be incurred on them it is proposed to make an issue about a fortnight hence of a further 1,000,000 Participating Preference shares. These shares, which will rank for dividend as from October 1 last, will be issued at a premium, and at the conclusion of this meeting I shall submit to you the resolution necessary for carrying this increase of capital into effect.

Fields and Production.

As regards the fields which are being developed and tested by our producing companies, you will have seen from the report that these continue to show most satisfactory results. In past years we have hesitated to state the full extent of our belief in the great extent and richness of our oil territories, but the confirmatory evidence which we get as we proceed with our developments so exceeds our most sanguine expectations that the time has now come when we can express the opinion with a good deal of confidence that the oilfields embraced in our concession are among the most extensive and most prolific of any in the world, and that Persia may even one day become as big a producer of oil as the United States. One evidence of this is that in the field from which we are now obtaining our crude we could, had we the refineries to deal with it, now obtain a production of something like 4,000,000 tons per annum from the wells which have so far been carried down to the main horizon. These wells, nearly the whole of which have necessarily to be kept shut down until we can deal with their oil, are pretty widely scattered over the field, and so far as can be judged all the intervening territory is equally rich, since the gas pressure is constant throughout the field. I have several times previously referred to well No.F7, and you will be interested to learn that this well, which has so far yielded something like 1,750,000 tons of oil, still continues to produce as freely as ever, with practically no diminution in the gas pressure. This well, I may mention, is by no means exceptional, since many others which we have opened and tested appear to be just as prolific, but I quote it as it is the only one from which we have been able regularly to produce, and therefore properly to gauge the extent of its producing capacity and of the capacity of the field as a whole. The measure of the richness of this field can be better appreciated, gentlemen, when it is remembered that the production now obtainable from it is larger than the pre-war production from the whole of the Roumanian and Galician Oilfields, to obtain which production a total of something like 2,000 wells had to be worked and a capital of over £40,000,000 was employed. But this is not the only field which we have to rely upon for our supplies. Adjacent to it we have, as I mentioned at the last meeting, proved another field, which promises to be just as rich, and we have recently received a telegram reporting that another well which has been sunk on it has practically proved an additional square mile of productive territory. In the second outside field to which I referred last year the test well has now been carried down to 2,195 feet, and is passing through favourable strata. In the third outside field oil has been struck with strong gas pressure and, although it has not yet been practicable to test the capacity of this field, there is ground for anticipating that in it we have secured another valuable addition to our reserves of oil. This last field is, I may mention, situated some hundreds of miles nearer to the mouth of the Persian Gulf than any of the other fields so far tested by us, and is in close proximity to a deep water harbour, and, as there are several other good anticlines in the neighbourhood, we are hopeful that this may prove to be a field of the greatest importance. A further outside field which is now about to be tested is reported by our geologists to be of larger area than, and as likely to be just as rich as, the one from which we are now obtaining our production. In order that you may better appreciate the extent of the oil territory included in our concession I have had a map hung up for exhibition, and after the meeting I shall be pleased if shareholders will examine it, and I shall be glad to give them any explanation they may desire regarding it. From what I have said now and on former occasions you will, I think, be able to appreciate that, so far as supplies of crude oil are concerned, there is, as far as can be judged, practically no limit to our potentialities. The only limits are (1) refineries and (2) outlets for our manufactured products. The first of these is, in these days of shortage of steel, our principal difficulty, but we shall lose no opportunity of pushing on with the erection of further refineries until we are in a position more adequately to deal with the enormous supplies of crude which we have available. As regards the second limitation, namely, outlets for our products, there is, as I have already indicated, little to fear.

High Grade of Oil.

One other point of importance in connection with our crude which I should not pass over is that it is of an exceptionally high grade and much superior to the average of the oils produced on the American Continent. It contains a very large percentage of benzine and kerosene of the best quality, excellent lubricating oils, fuel oil of unusually high thermal efficiency and a good percentage of first-rate paraffin wax. This means that our crude is much more valuable than that of most of the producing fields of the world, whilst its cost of production—inasmuch as it is all obtained from flowing wells of big volume entailing the minimum of field expenditure—is much lower. These advantages, I may say, far more than compensate for any disadvantage at which we may be placed in freight as compared with fields which may be more favourably situated geographically for supplying the European markets.

War Services of Staff.

Before concluding my remarks, gentlemen, I would like again to draw attention to the work of our staff both in London and in Persia during the past year. I have already referred to the magnificent services rendered to us by the late Mr. Lindsay and by Mr. Still, but these are only characteristic of the devotion to duty which has been displayed by all, and which is inspired by the knowledge that they are serving a company in which the Government is the predominating partner and in work which is of vital importance to the nation in the prosecution of the war. The company has earned the distinction—a unique one, I think, for a joint stock concern—of a "mention in despatches," but the word "company" in this case is only a synonym for our staff, who have in many directions, and often at considerable risk to their lives, rendered services of a very valuable character to the authorities throughout the period of the military operations in Mesopotamia. Among other things they have rendered a large amount of assistance in the shipbuilding which has been going on in the Gulf, more particularly in the erection and fitting of the gunboats now operating on the Tigris, a large number of which were built in the company's yards.

Political Situation.

In this connection I have much pleasure in stating that the political situation in the part of Persia in which we are working remains in the same state of tranquillity as when we last met, and that we are able to carry on our operations in every direction without let or hindrance of any kind. I am also pleased to report that our relations with the Persian Government and with the local chiefs continue to be of a most friendly character. Gentlemen, I now beg to move: "That the report of the directors, balance-sheet and profit and loss account for the year ended March 31, 1917, be received, approved, and adopted." I will ask Lord Inchcape kindly to second this motion. Before putting the resolution to the meeting I shall be glad to answer, to the best of my power, any questions you may desire to put. (Applause.)

The Right Hon. Lord Inchcape, G.C.M.G., K.C.S.I., K.C.I.E.: I have great pleasure in seconding the resolution.

The Chairman: Have any shareholders any observations to make?

Mr. A. R. Ricardo: May I ask if the loss owing to the destruction of pipelines by the Persian tribes is being recouped by the company by withholding the royalties due to the Persian Government?

The Chairman: Yes, that is so. We are not paying any royalties until that claim has been met.

The resolution was then put to the meeting and carried unanimously.

Dividends.

The Chairman: The next business before the meeting is the declaration of dividends, and I now beg to move: "That an additional dividend of 2 per cent. on the Preference shares, making 8 per cent. for the year, be paid in respect of the year ended March 31, 1917, such dividend to be paid on January 31 next, together with the 3 per cent. interim dividend then falling due, and that a dividend of 6 per cent. per annum on the Ordinary shares in respect of the same year be paid on the same date." In moving this resolution I would like to draw attention to the appropriations of £50,000 and £100,000 respectively, which have been made to the "Preference share reserve fund" and to the "General reserve fund." The first of these appropriations has been made as the nucleus of a fund to be established for the protection of the Preference shareholders, in accordance with the terms of our original prospectus. The second has been made with the object of building up a fund for the purpose of amortising the cost of our concession and other properties. Both of these appropriations, which I have no doubt we shall be able to augment considerably in the near future, will, I am sure, meet with your approval. I will now ask Mr. Cargill kindly to second this motion.

Mr. John T. Cargill seconded the resolution, which was unanimously agreed to.

The Directorate.

The Chairman: The next resolution which I have to move is for the election of directors. Before proceeding to this matter, however, I would like to take the opportunity of referring to the great loss which we have sustained since we last met in the death of our esteemed colleague, Mr. W. Knox D'Arcy. As you all know, it is to Mr. D'Arcy's enterprise and far-sightedness in securing and exploiting the Persian oil concession that the Anglo-Persian Oil Company owes its existence to-day. But what many of you probably do not know is that it is entirely due to his strong spirit of Imperialism that the concession now remains in British hands, and it is a matter of the very greatest regret to us all that he should not have been with us for a few years longer

Digitized by Google

to see a fuller realisation of the expectations which he had formed as to the great future which awaited this company. Mr. D'Arcy, like that other great pioneer, Cecil Rhodes, with whom he had many traits in common, was a man of large heart and great integrity, and in his death we have to mourn the loss of a valuable colleague and an esteemed friend. I will now pass on to the subject of the resolution. Since we last met we have elected Mr. F. W. Lund and Mr. Frank C. Tiarks as members of the Board, and their election now requires confirmation. Everyone who knows these gentlemen will, I am sure, agree with me that by securing their co-operation we have materially strengthened the Board, and therefore I have no doubt that you will cordially support their re-election. We are advised that the election of Admiral Slade as an ordinary director also needs confirmation, and this appointment will likewise, I am sure, be agreed to unanimously. The directors retiring by rotation are Mr. John T. Cargill, Sir Campbell K. Finlay and Mr. H. E. Nichols. They are all eligible for re-election, and I have no doubt that you will wish that we should continue to avail ourselves of their extremely valuable services. I now beg to move :—"That the election of Mr. F. W. Lund, Mr. Frank C. Tiarks and Admiral Sir E. J. W. Slade as members of the Board be confirmed, and that Mr. John T. Cargill, Sir Campbell K. Finlay and Mr. H. E. Nichols, who retire by rotation and are eligible for re-election, be and are hereby re-elected members of the Board." I will ask Sir Hugh S. Barnes kindly to second this motion.

Sir Hugh S. Barnes, K.C.S.I., K.C.V.O., seconded the motion, which was unanimously adopted.

The Chairman : The next business of the meeting is the election of auditors, and I shall be obliged if two of the shareholders present will kindly propose and second the necessary resolution.

Mr. FitzAdam-Ormiston : Gentlemen,—I have pleasure in proposing the net resolution :—That Messrs. Brown, Fleming and Murray be re-elected as auditors for the ensuing year at such fee as may be determined by the Board."

Mr. W. A. Buchanan seconded the motion, which was passed unanimously.

The Chairman : This, gentlemen, concludes the business of the ordinary general meeting.

EXTRAORDINARY GENERAL MEETING

The Chairman : We will now proceed to hold the extraordinary general meeting, of which notice has been given, and I will ask the secretary to read the notice convening that meeting.

The secretary having read the notice,

The Chairman said :—Gentlemen, I do not think the resolutions which are to be submitted to this meeting require much explanation. As I have already mentioned at the preceding meeting, the additional capital is being created to provide the funds necessary for further extensions, which are to be carried out immediately in order to meet urgent war requirements of fuel oil and other products. Although undertaken at the moment to meet these urgent war requirements, the plant will, it is scarcely necessary to say, be of permanent utility, as it will be of the same character as that already installed, and will after the war serve to produce the various commodities for which we have entered into more permanent contracts. With regard to the second resolution, I would explain that the object of this is to maintain the majority of votes now held by the Government. They now hold 2,001,000 votes out of 4,000,000 With the proposed alteration they will hold 4,001,000 votes out of 8,000,000. The great advantages of the Government association are so obvious that they need no explanation, and I am sure you will support this resolution most cordially. I now beg to propose the first resolution, namely : "That the board be and they are hereby authorised to increase the capital of the company to £5,000,000 by the creation of 1,000,000 additional Preference shares of £1 each, ranking in all respects pari passu with the existing Preference shares of the company." I will ask Lord Inchcape to second this motion.

Lord Inchcape seconded the motion, which was carried unanimously.

The Chairman : I now beg to propose the second resolution, namely : "That the articles of association of the company be altered by cancelling the first sentence of article 70 and by substituting therefor the following sentence :—'Every member shall have one vote in respect of each Preference share held by him and two votes in respect of each Ordinary share held by him.'" I will ask Mr. J. T. Cargill kindly to second the motion.

Mr. Cargill seconded the motion, which was unanimously agreed to.

The Chairman : That concludes the business of the extraordinary general meeting.

PREFERENCE SHAREHOLDERS' MEETING.

The Chairman : We will now proceed to hold the Preference shareholders' meeting and I will ask the secretary to read the notice convening that meeting.

The secretary having read the notice,

The Chairman said : Gentlemen,—The resolution to be submitted to this meeting is self-explanatory. The only point in connection with it in regard to which shareholders would, perhaps, like some explanation is as to the method which will be followed in allotting applications for the new capital. The board have not yet settled this, beyond deciding that preference of some kind will, of course, be given to existing shareholders. One or two Preference shareholders have written suggesting that they are entitled to an allotment pro rata to their existing holdings, but I would point out that the Ordinary shareholders, who have gone for many years without dividends while the Preference shareholders have had theirs guaranteed, are also entitled to some consideration in this matter, and to the extent of their interest in the company the board will have no alternative but to pay some regard to their wishes in the matter of allotments. With this explanation I now beg to propose : "That this meeting of the holders of the Preference shares of Anglo-Persian Oil Company, Limited, hereby consents to the increase of the capital of the company to £5,000,000 by the creation of 1,000,000 additional Preference shares of £1 each, ranking in all respects pari passu with the existing Preference shares of the company." I will ask Mr. J. T. Cargill, who represents the principal Preference shareholder, to second the resolution.

Mr. Cargill formally seconded the resolution, and it was unanimously adopted.

The Chairman : Gentlemen, I have to thank you for your very kind attendance.

The proceedings then terminated.

COMPANY REPORTS.

P. and O.

The report of the Peninsular and Oriental Steam Navigation Company states that, after making provision for depreciation, bringing the provident good service fund up to £200,000, and adding £50,000 to the contingent fund, thus bringing it to £500,000, there is a credit balance on the year's accounts, including £85,329 brought forward, of £790,642. The directors propose to deal with this balance as follows :—Five per cent. dividend on the Preferred stock, £152,000 ; 12 per cent dividend and 6 per cent. bonus on the original Deferred stock, free of income tax, £486,66[illegible] (of which 2½ per cent. on Preferred stock and 6 per cent. on Deferred stock was paid as an interim dividend in May last) ; 6 per cent dividend and 6 per cent. bonus on the Deferred stock recently created, free of income tax, £59,255, leaving £92,712 to be carried forward. The dividends and bonus now recommended will be payable on and after the 18th inst. Debenture stock to the extent of £106,300 has been redeemed during the past twelve months, but the company retains the power to re-issue this. During the past year the whole of the fleet not retained on Admiralty charter has been taken over by the Ministry of Shipping at Blue-Book rates, the earnings being for account of the Government. The company's fleet has been reduced by several steamers during the year, owing to enemy action. The directors are able to state that the loss of life involved was very small, thanks to the discipline observed. The two mail steamers which have been under construction for three years will be shortly delivered, but they are being finished meantime as cargo carriers only. A contract has been entered into for the building of a large mail steamer of 16,000 tons, but her delivery is very uncertain. The arrangement referred to in the notice of meeting of June 18, with regard to the offer made to the Ordinary shareholders of the Union Steamship Company of New Zealand, Limited, whereby the company acquired the Ordinary shares of that company, having been approved at the meeting of stockholders on June 27, has been carried out, and shareholders holding 98 per cent. of the Union Steamship Company of New Zealand shares have already accepted the offer. In consequence of the requisitioning arrangements referred to in a preceding paragraph, the directors have agreed, as a temporary war measure, to restrict the service as from July 1 to a fortnightly line to and from Bombay. This, of course, involves a modification in the amount of the subsidy, which has been agreed with the Post Office. The mail service has been worked regularly, but at a great additional cost. The directors availed of a recent opportunity to acquire a further freehold frontage in Leadenhall Street adjoining the company's office. The board has also purchased the long lease of the Hamburg-America office, which was built by that company in Cockspur Street, and the West End branch will be transferred to these premises as soon as they are released from temporary Government use. Since the close of the company's financial year the directors have purchased the shares of the Hain Steamship Company, Limited, which came into the market owing to the death of the founder of the line. This fleet comprises some 27 large up-to-date cargo steamers, with a gross tonnage of 108,787 tons, and the purchase money, which will be in cash, will be provided by the company in conjunction with the British India Company. The British India Company has acquired the shares of the Nourse Line, which owns six steamers, with a gross tonnage of 23,496 tons. The vessels are of recent construction, and were built specially for service in the Tropics. The Nourse Line has a valuable trade in the East, which will work in well with the British India services.

Madras and Southern Mahratta Railway.

The report of the Madras and Southern Mahratta Railway Company for the year ended March 31, states that the gross earnings of the entire system worked by the company amounted to Rs5,19,73,685, as compared with Rs4,67,76,169 ; while the working expenses amounted to Rs2,65,25,544, or 51.04 per cent., as compared with Rs2,46,39,028 or 52.67 per cent. With an increase in the gross earnings of Rs51,97,517 and in working expenses of Rs18,86,516, there was an increase of net earnings of Rs33,11,001. The parcels traffic continues to show very substantial increases. The receipts have risen steadily from Rs9,53,000 in 1908 to Rs23,39,000 in 1916-17, the increase during the year being Rs5,34,000. The increase in general merchandise was accompanied by a decrease of 126,584 tons in weight. This decrease was in grain, minerals, oilseeds, cotton and spices, and was to a large extent due to the inability to provide rolling stock for a considerable quantity of traffic offering. There has been considerable enhancement in the port-to-port rates between Calcutta and Bombay and Madras. The gross earnings of the company's and State lines amounted to Rs4,64,06,975, being an increase of Rs48,69,150. The increase in coaching earnings was Rs20,63,497, in goods earnings Rs27,67,552, and in miscellaneous earnings Rs38,111. The working expenses amounted to Rs2,36,54,819, an increase of Rs17,96,995, the result being an increase in the net earnings of Rs30,72,165. The working expenses of the entire system amounted to Rs2,65,25,544, or

Digitized by Google

51.04 per cent. of the gross earnings, as compared with Rs2,46,39,028, or 52.67 per cent. The share of the surplus profits of the company's and State lines, less Indian income-tax, amounted to Rs34,04,857, which has been paid by Government and remitted at 1s. 4 7-32d. per rupee, realising £230,093. These results are abnormal owing to restrictions of expenditure. The arrears of renewals which are accumulating will have to be dealt with when different conditions prevail, and will seriously increase working expenses, thereby decreasing the net profits. The reserve fund is, however, being strengthened to enable the company to maintain as far as possible an equal distribution of dividend. Surplus profits for the whole year realised £236,164, and the total receipts were £245,473, compared with £184,817. The directors recommend a payment on January 1 of a final dividend of 25s. per cent. from the stockholders' revenue account, in addition to the guaranteed interest of £1 15s. per cent., making the total distribution for the half-year £3 per cent., all subject to English income-tax.—Meeting. 25, Buckingham Palace Road, S.W., 12th instant, noon.

Ellerman Lines.

The report of Ellerman Lines, Ltd., for the year ended December, 1916, states that the dividends on the two classes, preference shares and the preferred ordinary shares, have been paid to September 30, 1916, and it is proposed to pay a final dividend of £100,000 on the deferred shares. £750,000 is placed to reserve, making the reserve and guarantee funds £1,650,000, all of which is invested in Government securities.

COMPANY NOTES.

Dividends, Payments, etc.

Hyderabad (Deccan) Company.—An interim dividend of 1s. per share, less income tax, will be paid December 10. Holders of share warrants to bearer should present their coupons No. 24 for payment at the National Bank of India, 26, Bishopsgate, E.C., on or after that date.

The directors of the Egyptian Markets, Limited, have declared an interim dividend on the Ordinary shares of 5 per cent., less income tax at 5s. in the £, in respect of the year ending 31st instant, payable on and after 20th instant.

Oil Outputs.

Anglo-Egyptian Oilfields.—Gemsah production for week, 608 tons (last week, 19 tons); Hurgada production for week, 1,958 tons (last week, 3,419 tons).

Maikop Combine.—Production of crude oil for week ending November 17, 24,718 poods (399 tons).

BULGARIAN FINANCE.

A telegram from Sofia, says Reuter's Amsterdam correspondent in a message dated December 5, states that the Bulgarian Minister of Finance, speaking in the Sobranje, gave a very favourable account of the financial situation of the country. As regards the future, he reported that, in spite of the great increase of the public debt, the economic resources of unified Bulgaria would suffice largely to cover it.

The *Chicago Tribune* recently contained a striking article by Major H Maitland Kersey, D.S.O., managing director, Canadian Pacific Ocean Services, Ltd., entitled "Britain Points the Way to Victory." It is admirably calculated to give the people of the United States an insight into what Great Britain has done and is doing with increasing energy to wage a successful war.

ON 'CHANGE.

(From Our Own Correspondent.)

Throgmorton Avenue, Wednesday.

We have had this week a good deal of activity in certain directions, and, so far as land shares are concerned, the alterations in prices have in most cases been towards a higher level.

In Government stocks, Egyptian Unifieds are again ¼ up at 84 with sellers very scarce, and the same remark applies to Egypt 3½ per cent. preferreds. In Bank shares, Agriculturals are 1-32 easier at 6⅛, and Land Banks are a trifle lower at 7, sellers. Otherwise there is no change to record.

In railways, small business has been done in Delta Lights round the current price of 6 3-16. As regards land shares, there have been some fairly large transactions in Aboukirs without altering the price, which remains round 21. Allotments have been in persistent demand for Egyptian account with a very fair amount of business doing up to 3⅜, a rise of ⅛. Behéras are ⅛ up at 13⅛, Egypt having come in a buyer and absorbed all the shares offering round 13.

Delta Lands, although unchanged, look a firmer market, as the price in Egypt has improved to a level which may at any moment permit purchases on this side. Egyptian and Foreign Trusts have risen 6d. to 8s. 3d., thanks also to buying orders from Egypt, where the improvement in the various holdings of this concern has evidently began to attract attention. In Gharbieh Lands some business has again been done round last week's price of 35s., with further buyers, but sellers are now asking 37s. 6d. New Egyptians have again been the centre of large transactions, the bulk of the buying coming from Egypt, where the shares have reached a level distinctly above that current here; and the price has improved fractionally to 15s. 9d. after business as high as 16s.

Sidi Salems have again been bought on local account, but the price remains unaltered. Union Foncières have been quite a feature, and on large buying orders from Egypt have improved ¼ to 2⅜. In United Egyptian Lands there has been a certain amount of business doing up to 1s. 3d. In miscellaneous shares Markets have remained unchanged at 27s. 9d., and practically without business, although an interim dividend of 1s. per share—the same as last year—has been declared payable this month. Salts and Sodas have been largely dealt in between 35s. 9d. and 37s., closing 3d. down at 36s. 3d. Khedivial Mails have been a weak market and have reacted 1s. 6d. to 37s. 6d. on some pressure to sell on an unwilling market.

In Greek securities, apart from some small transactions in Rentes at 43 and in 1914 at 74½, there is nothing of importance to report, and prices are all unchanged, with the exception of Monopolies, which are ½ up at 52½.

Oil Shares.

Anglo-Egyptians (B) fell 6d. to 27s.-28s., and Ural Caspian declined 1-32 to 1-1⅛. Otherwise prices showed an upward trend.

OPENINGS FOR BRITISH TRADE.

Since the outbreak of war applications have been received at the Department of Commercial Intelligence from a large number of firms in all parts of the United Kingdom and abroad who wish to get into communication with British manufacturers or producers of various classes of goods which have previously been obtained from Germany and Austria-Hungary. Applications have been recorded, says *The Board of Trade Journal*, for the names of manufacturers or producers of the following (among other) articles. British manufacturers or producers of these articles now in a position to supply are invited to make application for the names of the inquirers:—Corrugated paper; die-casting machines (manufacturers wanted); maple or hickory skewers, spoons and forks, cheap tin and zinc (for India); strontium carbonate (producers wanted).

NOTES OF THE WEEK.

The surrender of Jerusalem is the great episode of the week. In the military operations that have to be undertaken before Palestine and Syria are wrested from the Turks, the stage that has brought General Allenby to Jerusalem is a comparatively short one. But the capture of the Holy City by British troops has a significance which cannot be measured merely in terms of its military aspect. It is an event which has profoundly stirred the whole of Christendom, and more than any declaration, however solemn, of war aims serves to link the Allied cause with the triumph of righteousness and justice. In Great Britain itself the moral effect may be appreciated less than in other countries, for the public mind is so fixed upon winning the war that it does not allow itself to set much store on any incident which does not seem to bring the end of this stupendous struggle definitely nearer. But the deliverance of Jerusalem from the dominion of the Turk fulfils a trust that may be held to have been specifically laid upon the English people seven centuries ago, and it has been carried out in a manner which is at once worthy of British military traditions and does credit to the religious instinct of the nation.

The German explanation that the city was abandoned because of its sacredness and because it was worthless from a military point of view, needs no comment. More interesting is the statement that when the Pope heard the news, he retired into his private chamber and remained on his knees in prayer for some time. The capture of the Holy City by a Christian force cannot fail to have moved His Holiness deeply, and it may be noticed that it will eventually raise certain large questions of ecclesiastical polity, which the Pope, as head of the Catholic Church, will, no doubt, help towards a decision. Jerusalem was, of course, connected with the Eastern Church before the Great Schism; but it has also been under Latin rule. And at the present moment, when the Russian Revolution has so profoundly modified the position of the Orthodox Church, it is possible that the Vatican anticipates an increase in its influence over the destinies of Eastern Christendom. That the Vatican appreciates the importance of the situation is shown by the statement of the Cardinal Vicar, that this is one of the most memorable dates in Christian history, and the order for public prayers of thankgiving in the Basilica of the Holy Cross of Jerusalem in Rome.

General Allenby's proclamation to the inhabitants and the steps which have been taken to safeguard the holy places have been judiciously thought out. The Moslem area round the Mosque of Omar is being guarded by Indian Moslems, and none who are not Mohammedans can pass the cordon; at Bethlehem and Rachel's Tomb guardians have been placed, and the hereditary custodians of the Wakf at the Gates of the Holy Sepulchre have been asked to continue at their posts.

The year 1917, whatever may be said as to the fortunes of war in Europe, has been brilliantly successful for the British arms in Asia. The capture of Baghdad and Jerusalem within a twelvemonth will raise our prestige higher than it has ever stood before in the East, and it must be remembered that as our prestige has risen, that of Germany, which has been built up during the past twenty years in the Near and Middle East, has declined, while that of Russia has collapsed altogether. Military success is the foundation of prestige, but it needs something more than military success to maintain prestige, and wise political action is a capable second. Happily, the recent proclamation as regards the future of Palestine is an indication that in political action we have not altogether lost the faculty of vision. We can compare that statement with any of the German Emperor's speeches with equanimity.

In Mesopotamia further small actions have resulted in our favour, and it is interesting to note that here, as in Palestine, the German Press has made no attempt to minimise the real nature of our success. While they continue to repeat, what is no doubt the truth, that the war will be lost or won in Europe, they are constrained to admit that, so far as they are concerned, the war is already lost outside Europe. It is significant that Turkey has hailed the prospect of peace with Russia with enthusiasm, but it is nothing to the enthusiasm with which she would greet a general peace.

As to that, she is admittedly in a difficult position. Peace with Russia would not relieve the Ottoman Empire of anything like the heavy burden that it would take from the German and Austrain Empires, since Russia has not held up many Turkish troops of late, and for the last few months the spectre of a Russian occupation of Constantinople cannot have kept many Ottoman statesmen awake. On the other hand, if it be true, as

Digitized by Google

is reported by a correspondent of the *Daily Telegraph*, that one of Germany's peace terms to Russia has been the demand for Austria to have full control of the Ukraine and the northern Black Sea ports, Turkey may well have preferred the old Russian Empire, ambitious but inefficient, which she knew, to the monstrous aggrandisement of her old enemy at Vienna with which she is threatened. For it may be taken for granted that in addition to this expansion Austria has not forgotten her old ambition to possess Salonika.

The statement of the reasons why the United States have not declared war on Turkey and Bulgaria issued by the Chairman of the Foreign Affairs Committee of the House of Representatives is, in brief, that Turkey has long been impatient of German control, and that Bulgaria does not share the colossal ambitions of Berlin, but has entered the war for a limited objective of her own. Both statements are, of course, true; what remains to be seen is whether Turkey and Bulgaria will take advantage of President Wilson's almost open invitation to make a separate peace implied in his distinction between the Central Powers and their satellites. There is this distinction between the two unfortunate puppets, however, that Bulgaria stands to gain, and Turkey stands to lose in any case. Whether the Allies or Germany win the war there will still be a Bulgaria, and that kingdom will in effect be more independent in the event of an Allied than a German victory; but, if the Allies win the war, Turkey will no longer have full control over the unhappy subject races in her dominions, while if Germany wins the war, she will no longer have control over even her own destinies.

Germany apparently still has faith in Turkey, since a further war credit of £T20,000,000 has been voted by the Senate at Constantinople, which has been loaned by Berlin, and it is stated that for twelve years after the war Germany will require no interest on these advances. Even if she did, Turkey could not pay; but she will, of course, have to pay in other ways—the way in which the aphis pays the ant for protection, by being sucked dry. Recent figures have shown that the Turkish revenue is not much more than sufficient to pay her own ordinary expenditure and a little over; but if Germany could gain control over even what remains of the Turkish Empire, she could afford to write off the loans and interest altogether and still call the bargain a good one.

Repudiation has, of course, been suggested, but it is becoming increasingly doubtful whether repudiation is a practical policy in these days, and the last week has put the question to an amusing test. The Leninites have threatened to repudiate their very considerable debt to France and England, and in that airy manner to cut one of the Gordian knots that hinder the coming of the Anarchic millennium. It would undoubtedly be an awkward thing for us, if they were to do so, but some of the more sober German papers have themselves discountenanced the idea almost as emphatically as we have. Germany is no doubt perfectly willing to finance Russia on terms laid down in Berlin, but she has an uncomfortable feeling that folk who repudiate their debts to Allies may one day play the same trick with their new friends, and to enforce payment would mean another war, or the heavy expense of Germany keeping a permanent garrison in Russia, or perhaps collecting the Russian revenue herself.

Unfortunately the collapse of Russia has temporarily involved the eclipse of Roumania. Not the slightest blame attaches to our brave Allies in Jassy, who have fought a gallant fight and may fight again yet; but it was certain that the Leninite will-to-impotence would gravely compromise the smaller nation. Deprived of half her territory and isolated on all sides, her position has long been extremely difficult, and her army is at the moment left in the air, although help may yet come from the Kaledin-Korniloff combination.

It has been rumoured that Germany has offered Roumania a separate peace, the terms being that she should resign the Dobruja to Bulgaria and receive in exchange Bessarabia. It is difficult to credit this report; in any event it is evidently not the full truth. That the Dobruja is destined, according to the German plan, for Bulgaria, is of course a commonplace, but that Germany would be willing to compensate her enemy with the more valuable province of Bessarabia, which Roumania has desired for many a long day, is unlikely. It is far more probable that Austria would put in a claim for this territory. In any event, the rumour is silent as to the destiny of the occupied province of Roumania and Bucharest; likewise as to the dynasty. After the language the German Emperor has used regarding the "traitor Hohenzollerns" and the "recreant King Ferdinand," it is hardly likely that he would negotiate peace with him on the basis of Bessarabia, even if he consented to negotiate with him at all.

That Austrian statesmen are ready for a policy of renunciation, as some too ardent souls in this country believed when Count Czernin made his speech a few weeks back, has been disproved by his later actions. The Foreign Minister of the Dual Monarchy evidently spoke with his tongue in his cheek, since the preparations for the offensive against Italy were already far advanced when he made his professions; and in his statement two or three days ago the matter was entirely dropped. Austria, being no longer engaged with Russia, is to help Germany on the Western front, and obviously she is to have a *quid pro quo* in the shape of territory. Since Bulgaria has already loudly pegged out her claim to Serbia and Macedonia, it seems natural to assume that Austrian compensation would be sought in Italy as a matter of "restoration," and in Southern Russia as a matter of expansion. It is possible, of course, that the latter step would be justified to a sceptical world as a measure of "national reunion"—the reunion of the Ruthenians under one subsidiary kingdom.

There would be nothing surprising in this claim. The German negotiations with the Leninites (whom we will not call the Russian Government) have revealed that Berlin is in an annexationist mood, and Prussia cannot very well expect to keep all the spoils for herself and deny her neighbours any—especially as Count Czernin has been at pains to remark that in some respects the position of Austria is more satisfactory than that of Germany. The Leninites were surprised, or profess to have been surprised, at the blunt German demands, and threatened to bombard the German lines with pamphlets. But they did not break off the negotiations, and it may be confidently predicted that they will not do so. They will be broken themselves first. The really important fact in the Russian situation is not the bluster of Lenin and the pronouncements of Trotsky, but the junction of Kaledin and Korniloff. The spirit of resistance is not yet quenched in the south-east of Russia, as it is too evidently in the north, and while that is so the situation in the Balkans, desperate though it be, may still be saved.

Count Czernin in his speech made some remarks on the future of Albania, which are well worth putting on record as an indication of the official Austrian view. He declares that in the part of Albania occupied by Austria, "We are trying, in *consistent continuation of our policy*, to produce a feeling of homogeneousness in the nation as well as one of State consciousness, and to create a basis for self-government and the country's cultural progress." The Austrian Foreign Minister has either forgotten the history of his country and the attitude of Vienna towards smaller nationalities for centuries, or else he is developing that type of cynical humour for which Austrian statecraft is famous. The latter alternative seems preferable.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, Nov. 9.

The Palestine Victory.

The one topic of conversation in the clubs, cafés, and bazaars is the wonderful victory in Palestine. The advance against Gaza had been awaited by the public for some little while, and rumours, more or less circumstantial, had been gaining in circulation as to the forces General Allenby had collected together at Khan Yunis; but it was never thought that the advance once started would be so rapid, nor that it would be made at such a small cost in casualties. Judging by what was experienced in the last attacks on Gaza, it was expected that the casualty list would be exceedingly heavy, and in anticipation most elaborate preparations had been made in the hospitals and convalescent homes in Cairo, Alexandria, and the Canal zone for the reception of the wounded. One can, indeed, scarcely credit that so much has been accomplished, that Gaza and Beersheba have fallen, that the enemy has been driven in headlong flight to the Jerusalem-Jaffa line, and that so many Turks have been accounted for so quickly and at such a small cost in men. (As a matter of fact, many of the casualties have been so slight that the men have since been able to return to their units in the field.) Everything appears to have been thought out and prepared with remarkable foresight and care, and the plan was undoubtedly executed with the same precision and ability. So far few details have come through of the actual fighting; but from what one hears the success of the operation, which ranks certainly amongst the most remarkable this war has witnessed, is due as much to the gallantry of our men as it is to the excellence of the staff work. The men of the London and Welsh regiments appear to have covered themselves with glory at several points, if one is to believe the version of some of the Australians, themselves no mean judges of fighting qualities, though there is little doubt from the details that have come through that all arms bore themselves with equal gallantry and steadiness.

The success of this offensive has had a tremendous effect in Egypt. Our recent victories on the Western front made quite a favourable impression on the Egyptians; General Maude's triumphant operations in Mesopotamia likewise impressed people; but the effect of those successes has been as nothing compared to that created by the news of the fall of Gaza and Beersheba and of the rout of the Turks. It is no exaggeration to say that our victorious advance into Palestine, whilst it has confirmed the reputation for field work and for economising as much as possible in lives with which General Allenby came here, and whilst it has raised "Allen Bey," as he is known to the indigenous population, enormously in their estimation, has at the same time incalculably increased our prestige and has gone a long way towards counterbalancing the unfortunate impression created by the Italian reverses. Indeed, this victory in Palestine has in that respect come very timely, and British is, so to speak, very much at a premium compared with other European stock.

That our offensive will have an important and far-reaching influence on the general campaign against the Turks is freely recognised in all circles out here. The fate of Medina is regarded as sealed, and a further advance on the part of the Shereefian forces is looked for with the result of finishing Turkish rule throughout the Hejaz.

Perhaps not unnatúrally the Syrian community is most jubilant at the news from Palestine. They see in the success of this initial operation the prospect of the speedy liberation of their suffering compatriots and the possibility of their being able in the very near future to give them the material assistance which they require and which it has so far been impossible to afford them. They evince unbounded confidence in the result of the present offensive, whilst expressing deep gratitude to the British for what they are about to do for their country.

THE DELIVERANCE OF JERUSALEM.

After just 400 years, now at last the Holy City passes out of the hands of the Turks. The long dark night of Turkish misrule, which so rapidly reduced the City from its former splendours, has now passed away for ever. Passed, too, for ever is that intolerant spirit in which the old Crusaders in 1099 captured the City, and showed no mercy for Jew or Moslem. To-day, under the British flag—be the occupation long or short—the rights of Moslem or Jew, of Greek, Latin, and Protestant, will all be preserved with sympathy. To millions all the world over the news of the deliverance of Jerusalem will be more real and a matter of greater joy than any news during the whole of this long, weary war.

In spite of a great deal that is new and tawdry, of much that is insanitary and unclean, Jerusalem to-day retains very much that must appeal to the religious man, to the historian, and to the antiquarian. No modern construction or "improvements" can hide the geographical features—the hills around Jerusalem. The valley of Hinnom in the west and the valley of the Kidron in the east still limit the site of the City as in ancient times. The Valley el Wad, known in the days of Josephus as the Tyropœan Valley, still divides the City's site into two mountain ridges. In the centre of the eastern ridge lies the hill, now entirely covered by the great Temple platform, known to travellers as the Temple area, but to the Moslems as *El Haram esh Sherif*, the noble sanctuary. In the Moslem world it enjoys a sanctity only second to that of Mecca. It is good news that from the very first the inviolability of this site has been secured by putting it into the hands of Indian Moslem guards. The vast platform enclosed to-day within the walls which stand on the foundations of those erected by Herod the Great, when he wished that his Temple should outrival that of Solomon himself, is mostly a level paved area, but in the centre rises the Dome of the Rock, the most beautiful building in the Near East. This was erected to cover the irregular massive outcrop of rock on which by tradition Abraham was in the act of slaying Isaac when God withheld his hand, and on which stood the brazen altar in the Temple of Solomon. At a later age, when Christians held this site, the high altar was built over the rock, so that it has during the ages been a place of worship for the three great principal religions. To the south of the Haram lies the great El Aksa mosque, which stands on the site where the Knights Templars had their great high quarters in Crusading days. In the centre of the eastern wall is the Byzantine gateway generally known as the Golden Gate, now walled up and never to be opened, according to local tradition, until a Christian conqueror enters by that route. At the northern end of the Haram, where stand to-day the Turkish barracks, once stood the great Antonia, the site according to tradition of Pilot's Judgment Hall.

Along the street leading from here down into El Wad, and then up the stepped street to the Church of the Holy Sepulchre runs the Vale of Via Dolorosa with its real stations of the Cross along the route. By this road countless pilgrims have made their way, praying at each shrine and sometimes carrying on their shoulders a great wooden cross, in remembrance of Him who carried the Cross for them. In the midst of the Christian quarter, surrounded by numerous chapels and all within one enclosure, stands a small chapel over the Holy Sepulchre itself. This site, although perhaps without much positive evidence for its authenticity, has been the most sacred site, the object of the prayers and tears of countless millions of followers of Christ during many centuries. The tomb itself, even if genuine, has been largely destroyed. The building over it is in appearance more like a kiosk than a church. The domed circular building enclosing it all has little of architectural pretensions, and yet the spot still draws the hearts of millions from every continent of the world. It is impossible for anyone with a really broad and sympathetic spirit to view without emotion the profound religious

Digitized by Google

devotion of the Russian peasantry or, may be, the pious French Catholics as they approach the spot. To them at least the spot is very real, and to them to worship here is the greatest privilege that earth can give. To the Jews for long centuries Jerusalem has been a place of mourning and their chief shrine "a wailing place." There outside the Temple area, where the great embossed stones of Herod's platform rise up in magnificent display, at all hours of the day a crowd of Jews from all countries may be seen going through their service of mourning for the glories of the Jerusalem that is no more. Let us hope that to them, too, the fact that Jerusalem is now delivered from the black night of her oppression will turn the mourning into joy.

The majority of the 80,000 inhabitants of Jerusalem are Jews. They have greatly increased during the last decades. They crowd the ancient City within the wall and their "colonies" are spread out on all the hills around, especially over the hills to the north of the City. They are of all classes. The majority are orthodox and keep the letter of the Talmudic Law with strictness, but recently an increasing number of reform Jews connected with the Zionist movement, particularly educationalists, have come to the City. The Jews of Jerusalem come from all lands. There are Polish or Ashkenazim Jews of every part of Europe, Spanish (Sephardim) Jews from Turkey and the shores of the Mediterranean, Moghrabee Jews from all along the coast of North Africa, Yemenite Jews—in physique like Arabs—from Southern Arabia, Syrian Jews from Aleppo, Damascus and Beirut, Baghdadi, Persian, Georgian, Bokhara Jews, and others. They are a varied collection, speaking many languages, wearing many varieties of costume, following many national customs—yet all are united in the ideal of Zion. They represent the great turning of the nation Zionwards, which is one of the most romantic movements of the present day. It is not only the Jews who represent many nations. The Christians, too, come from all lands and represent practically every division of the Catholic Church. Even the most modern and strange sects are to be found represented in the Holy City. It is the city to which gravitate "cranks" of all kinds, who find in the mysteries of the Prophetic Books abundant reasons for justifying their residence in Jerusalem.

The old City stands within its embattled walls, almost as perfect to-day as they were when built by Sultan Suleiman the Magnificent in the 16th century. These walls are built mainly upon the foundations of earlier walls, and still give the City an air of grandeur and picturesqueness. This can be seen to most advantage in the wonderful view of the City from the top of the Mount of Olives. There, looking across the Valley of the Kidron, the City lies spread out with her four-sided ancient walls, the Haram area with the Dome of the Rock lying fully open eastwards, and the numerous churches, church spires, and minarets rising among the masses of grey stone buildings, are set off in places by occasional trees. South of the southern wall, where once stood the most ancient part of the City, lies the site of the Zion of David—the hill now covered with gardens and trees. At the foot of this hill in the valley of the Kidron lies the Virgins' Fountain, called by the Arabs Ain Umm ed Deraj, literally the Spring of the Mother of the Steps, so called to-day because of the thirty steps by which the way leads down to the water. Once this spring gushed out from the hillside as the spring Gihon, the site where Solomon was crowned king, and from here Hezekiah laid his rock-cut aqueduct, which can be seen to-day, and still conducts the water to the Birket es Silwan or the Pool of Siloam, the lowest of the Valley el Wad.

For the tourist who has patience to study and is not content to take merely a superficial view Jerusalem must ever be a charm. Those who like myself have lived there have found a fascination growing year by year; few who leave there but long to return. For the student of history and archæology the City must ever be unique, and no fewer than four societies—English, American, French, and German—connected with exploration or archæological study are established in the City. It is a city of hotels and hospices; of hospitals, of which there are fifteen under various nations and religions; and of schools, of which there are very many, especially amongst the Jewish population. Undoubtedly before long we shall see here fulfilled one of the great problems of Zionist ambition, the establishment of a great Hebrew University.

In the past Jerusalem has been to a sad degree a city of contention, of quarrels among the churches, quarrels between the religions, quarrels between the various nationalities, all struggling to obtain an influence beyond their right. Jerusalem means "the Abode of Peace," and if by the taking of Jerusalem we might see established here a city of peace, a city of peace for itself, a city of union among the nations, a city of sympathetic mutual appreciation among the great religions of the world and the sects of Christendom, then we might indeed feel that the deliverance of Jerusalem was not a minor event, but the greatest outcome of the fearful disasters of this universal war. E. W. G. M.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, November 11.

King Constantine's Intrigues.

The publication of King Constantine's secret telegrams to Berlin has naturally been the subject of much comment in the Ententophile papers, and they have not spared the ex-King and Queen in their scathing remarks.

The Minister of Foreign Affairs has sent the transcript of the telegrams to the President of the Chamber, asking him to convey it to the High Court which is to try the members of the Skouloudis and Lambros Cabinets. He explains the manner in which the telegrams were sent and how they had been ciphered from an old code taken from the Ministry of Foreign Affairs. The *Patris* says:—"Let these telegrams be read in any way one likes, there will not be found in them a single paragraph, phrase, or proposition in favour of Greece or in the interests of the Greeks. All the anxiety shown was to serve the interests of Germany. Such a thing is comprehensible to a certain extent in the case of sovereigns from a different land having no attachment or sympathy with the country, who were unable to appreciate the wishes of the people; but what must be said of the advisers, diplomatists, and Ministers who are identified with these telegrams and who for two years have been the instruments of tyranny and of the violation of Hellenic honour?" The *Nea Hellas* declares that one would never have imagined that all the secrets of the country would have been communicated to Germany, as they were. All the military secrets and all the details of the army and its movements were communicated to the German staff, and Greece had become a protectorate, or, rather, a vassal State of Germany. The *Proodos* points out that it is perfectly clear now that Constantine more than once thought of attacking General Sarrail's army in the rear, and if he did not do so, it was from reasons independent of his will.

M. Venizelos's Tour.

The departure of M. Venizelos was kept a great secret, and his arrival in Rome was the first indication many had that he had left Athens. Hopes are expressed that much will result from his visit to France and England from a political point of view, and that the relations between Greece and the Allied Powers will be further strengthened. The hungry look forward with much anxiety to some more satisfactory arrangements being made to provision the country and to relieve the present deplorable situation. Foodstuffs arrive very slowly, and Greece seems to be living from hand to mouth. Owing to the want of fuel the train services are much reduced, and the means of bringing produce from the provinces are, therefore, insufficient to meet the requirements of the capital. Steps are being taken, however, to increase the output of lignite. Further, the Government have taken over all available Greek steamers, so as to make the best use of them, and a Commission has been formed to control all transport by land and water. The Ministry of Supplies from time to time fixes the prices at which most commodities are to be sold, with the view of preventing profiteering; but not much success has attended its efforts so far, inasmuch as hoarding and hiding are difficult to overcome. Olive trees, as is well known, abound in Greece, yet olives and oil are extremely difficult to obtain in Athens. Rice, macaroni, dried vegetables, sugar, and coffee are all rationed by tickets at intervals. The electric power difficulty appears to have been overcome for the present by obtaining wood from the burnt part of Tatoi forest, but certain restrictions on lighting are maintained.

CYPRUS NOTES.

(From a Correspondent.)

The carob crop has been a disappointing one, as was anticipated in most districts. The Troödos season was extended far into October, and those who were able to avoid the plains did well, as the heat of October this year was, as sometimes happens, oppressive. There has been no lack of supplies, though prices are kept at a high level.

By Orders in Council dated October 11 and 15 the High Commissioner has ordered the suspension of certain taxes imposed under the Locust Destruction Expenses Law, 1881. At the time of the British occupation the scourge of the locusts which affected important parts of the cereal-growing areas called for prompt attention. An Ottoman law was in force, but this required drastic amendment. A new measure was passed empowering the High Commissioner to give directions by Order in Council for varying or amending its provisions. In the same year another law was enacted to provide by taxation for the expenses of the campaign against the pest under new rules and methods. The Treasury might advance money up to £30,000 to be repaid by duties, rates, and taxes. All classes were laid under contribution, even officials being taxed, a step which was generally condemned as uncalled for in view of the small salaries paid in Cyprus. Very large sums were collected annually, the expenses rising to a very high figure, and only falling after many years as the locusts decreased. A large surplus accumulated, and came in process of time to be regarded as available for other purposes. When it was decided in 1898 that a railway should be constructed and a harbour formed at Famagusta, a happy thought occurred that a part of the Locust Fund should be appropriated to both these purposes. A law was passed to authorize the application of a part of the fund to meet a portion of the interest payable on capital outlay and loans for those works, and sinking funds in connection therewith. Locusts have thus contributed to the only railway and the only harbour, such as they are, in Cyprus! It has often been suggested by islanders, not unreasonably, that it would have been more appropriate to the objects of the law if the surplus fund were applied to the destruction of some of the other serious pests that afflict agriculture, rather than to railways and harbours. The authorities thought otherwise. The relief now given relates to the tax levied on house property, tithe-able produce, sheep and goats, which is suspended for one year from March 1, 1918, and that on trade profits and incomes, to be suspended till further notice. Information respecting the locust campaign of this year will be welcome.

ANGLO-ROUMANIAN SOCIETY.

INAUGURAL MEETING.

Last Friday, at the Mansion House, London, there was held the inaugural meeting of the Anglo-Roumanian Society. The Lord Mayor presided, and among those present were the Right Hon. the Lord Mayor, Lord Hugh Cecil, Sir Edward Carson, M.P., Lord Dunedin, the Roumanian Minister, A. F. Whyte, Esq., M.P., the Serbian Minister, the Brazilian Minister, M. de la Chaussée, representing the Italian Ambassador, Ronald McNeill, Esq., M.P., the Earl of Bessborough, Sheriff Rowland Blades, Sheriff F. Hepburn, Sir Arthur Evans, Sir William Grey-Wilson, Messrs. Annan Bryce, M.P., R. M. Burrows, E. W. H. Barry, Howard Corbett, J. E. Hodder-Williams, Hugh A. Law, H. Locke, A. W. A. Leeper, E. D. Madge, G. H. Mair, R. W. Seton-Watson, and Professor Gerothwohl.

In opening the proceedings, the Lord Mayor stated the objects of the Society as being to promote closer relations between the British Empire and Roumania by mutual study of the life, literature, and economic conditions of both countries, to support and to make known Roumania's just aspirations generally, and to spread a knowledge of Roumania, its political and geographical position in the Near East, and its importance for the welfare of the British Empire and for the maintenance of peace in Europe.

Sir Edward Carson addressed the meeting, and took the occasion solemnly to pledge the British nation and the British Government to the Roumanian cause. He said that he did not believe that the soul of any member of the community of the United Kingdom had become so degraded that he would wish for the termination of this war without the assertion of the liberty of this small and gallant race, and that the British Government had never swerved in its determination to carry out its duty towards Roumania. Roumania had come into the war not willingly, but because she was driven into it in order to maintain her very existence. She had suffered terribly, and the one nation to whom she was entitled to look for assistance—Russia—was unable to help her because of internal anarchy. Yet she had been true to the Allied cause. Referring to recent peace proposals, he said we were bound to renew to Serbia and Roumania our most solemn pledge that their war was our war, and, addressing the Roumanian Minister, he said: "I repeat to you, sir, the determination of this Government that we will go on to the end with you until we have reached the common object for which we have entered into this war; and I say this further, that if there is to be any compromise outside that which I lay down it would not be the present Government which represents his Majesty at the moment that would make such an ignominious peace." Later in his speech he stated that Serbia, Roumania, and Greece ought to be able, with our help, to build up a fabric which would help not only for the liberty of their peoples, but would greatly help in the solution of the problems of the Near East, and he concluded by stating that the people of this country would never come out of this war until, with the concurrence of the Allies, they had come to a satisfactory peace.

Lord Hugh Cecil moved a resolution expressing the meeting's desire for close relations of friendship and goodwill between this country and Roumania. He said the fate of Roumania depended on the issue of the great struggle now being waged all over the world, but most of all in Western Europe. We fought for two things, security and honour, but neither security nor honour would be ours if we did not restore to Roumania all that she had put in jeopardy by joining in this war. (Applause.) speaking of the future, he said that he hoped that after the war we should cultivate closer relations of friendship with those who had fought by our side. By this, he said, he did not only mean closer relations of friendship between the two Governments, however valuable these might be, but a closer intimacy between the peoples, such as would enable a large and wealthy country like our own to assist a country in the early stages of development in which Roumania would find herself after the war.

Lord Dunedin, who seconded the resolution, recalled some of his own experiences in Roumania. He said that when he first went there in 1872 there was no access to the country by railway from Western Europe. The easiest way was by Constantinople and Varna to Rustchuk, where you crossed the river to Giurgevo, whence the only railway in Roumania took you to Bucharest. At that time Roumania was not yet a kingdom, and as a united principality it was only six years old. In those days any commercial enterprise that was launched in Roumania was sure to be assisted by England. The English made the first Roumanian railway and the first Roumanian tramway, and they had made a beginning with the Roumanian oil industry. In later years all this had been changed, and the fault was ours. We had neglected Roumania, and so we had become nothing in Roumania and Germany had become everything. But the war had made a clean sweep now of German influence.

Mr. A. F. Whyte also supported the resolution, which was then put, and carried unanimously.

The Roumanian Minister proposed a vote of thanks to the Lord Mayor and Sheriffs. He said the Roumanians would never forget the support they had found in this country and the confidence the British nation had shown in them. They had to struggle against the heaviest possible odds for the accomplishment of their national ideal, which was the unity of their race and the liberation of their brethren now under a foreign yoke. Only a united Roumania, Serbia, and Greece could frustrate the expansion scheme of the Central Powers in the Near East.

Lord Bessborough seconded the vote of thanks, and read some extracts from letters from MM. Bratiano and Také Jonescu. M. Bratiano's letter said, among other things, that Roumania did not regret the sacrifices through which she had created her national unity, for, as the result of the final triumph, she would be sure to find a legitimate compensation in the prosperity of a greater Roumania, determined to develop a full life of intense work, and to share equal political rights to her loyal sons of every region and religion. M. Také Jonescu said that national unity had from all time been not only the dream of Roumanians, but the positive aim of all their efforts. There was not a Roumanian who was not imbued with the truth that so long as their race should not have obtained national unity it would not be able to take its proper place among the other races of the world.

The vote of thanks was heartily accorded, and the Lord Mayor briefly acknowledged the compliment, reminding the Roumanian Minister of the pledge that Sir Edward Carson had given of the enduring sympathy and unfailing support of this country.

A MAP OF PALESTINE.

Messrs. Edward Stanford, Limited, have published an excellent map of Palestine (scale, 8 miles to 1 inch), showing very clearly the mountainous character of the country. An inset of the country round Jerusalem (scale, 2 miles to 1 inch) brings home to one something of the difficulty confronting General Allenby in his capture of the Holy City. As it is to be hoped that the Palestine campaign is still in its early stage, the map (price 2s. 6d.) should prove invaluable to the elucidation of the further movements of the expedition.

THE NEW ARMENIA

A Literary and Political Periodical.

THE NEW ARMENIA, published monthly, is the only English periodical in America for those who are interested in Armenian life and letters, and for all devotees of justice who hold, with Gladstone, that 'TO SERVE ARMENIA IS TO SERVE CIVILIZATION.'

Yearly Subscription, $2.50 in advance.

Address—Editor of THE NEW ARMENIA, 949, Broadway, New York, N.Y

CORRESPONDENCE.

THE CONQUEST OF PALESTINE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Surely the use of the word "infidel" in the Lord Mayor's message to General Allenby is not to be taken according to its historical significance. There is a tendency in some quarters to regard the British operations in Palestine as a crusade, a term that denotes conflict between Christian and Moslem bodies. From the point of view of British Imperial interests nothing could be more unhappy, if only on account of the respect due from this country to genuine Mohammedan sentiment. For while Turkey is our enemy, the Khalifate itself has passed, by consent of the best Mohammedan elements, from the Ottoman Sultan into Arabian hands, and the supreme issue at the moment is how the Turk can most effectually be prevented from regaining access to the holy cities. It is probable, therefore, that the interests of the faith are best served by British ascendancy, for the Moslem world, as it emerges from the dominion of the Turk, seems bound to seek new political associations for its security; and what nation is more likely than Great Britain, with its great Mohammedan ties, to find acceptance?

That the Palestine Expedition, which has a purely military end, residing chiefly in the better protection of the Suez Canal, should be given a religious setting is most undesirable, and in this connection it may be interesting to quote the words of Professor Vambéry (a good friend of England in his time), when giving the writer his views some years ago on the question of the neutralisation of the Holy Land. He remarked the great revival that had taken place all over Islam, and he considered that that must be taken into account in dealing with the political status of Palestine, and particularly by England, the greatest Mohammedan Power in the world. For England, he observed, had won an Empire by wisdom and justice, and it was by that means she could and would retain it. Now that Islam has succeeded in detaching itself from its Ottoman connections, the counsel given by this distinguished traveller has even greater weight; and all reference, therefore, to infidelity in this connection is unfortunate, since it fails to take into account the transformation that has come over the Moslem world since the war began.—I am, etc.,

DOUGLAS M. GANE.

106, Leadenhall Street, E.C., December 12, 1917.

JUDÆA REDEMPTA.

To the Editor of The Near East.

Sir,—With reference to the article "Judæa Redempta," on page 633 of your last issue (December 7), I think it well to warn your readers that the views set forth in that article not only do not correspond to the claims of Zionism, but are in direct conflict with them. No responsible Zionist has ever dreamt of asking the Arab cities of Damascus and Beyrouth to be included in the new Judæa; these towns have never been Jewish and Jews have neither historic claims nor any other interest in them. Zionism, which is only the Jewish expression of the demand for national justice, could never associate itself with such a manifestly unjust demand.

It is also untrue that the Jews of Eastern Europe have not manifested their approval of the British Government's recent declaration. Owing to the present disorganisation of the postal services in Russia, Russian Jews have received the text of the declaration only after a delay of about three weeks; but as soon as they received the text enthusiastic demonstrations of gratitude to the British Government took place in all the important Jewish centres of Russia. In Petrograd a delegation of the Central Committee of Russian Zionists have presented to Sir G. Buchanan a written address expressing their deep gratitude to the British Government. All over Russia thanksgiving services have been held in the synagogues.

In Odessa, as may be gathered from the Press, the news of the British Government's declaration caused the greatest excitement. A great demonstration of all Jewish organisatons, including Jewish refugees from Roumania, was organised. A crowd, estimated at 150,000, occupied the streets for a radius of half a mile round the British Consulate, and a procession over two miles in length marched past that building, playing alternately the British and Jewish National Anthem. An address, signed by the chief of the Zionist movement in Odessa, was handed to the British Consul-General, asking the latter to express heartfelt thanks to King George, the British Government, and the British nation from all the Jews of Odessa.

From Salonika, again, enthusiastic telegrams have been received by the Foreign Office.

As to your correspondent's advice not to make of Palestine a purely agrarian state, nobody has ever entertained such an idea. There is no such thing in the world as a purely agrarian state. In the new Judæa, just as in any other economically sound state, there must and will be a normal sub-division of the activities of the people between agriculture, industry, and commerce. The necessary marts will be created by our efforts in the country, without encroaching upon the territory of our Arab neighbours, with whom we wish to live in harmony and peace.

As a conclusion, I should like to quote the remark made last Sunday in Manchester at a great Jewish thanksgiving meeting by Dr. Weizmann, the President of the English Zionist Federation, that "we should beware of the zeal of some of our 'friends' rather than of the attacks of our opponents." Surely the warning is most timely.—I am, etc.,

S. TOLKOWSKY.

57, St. Gabriel's Road Cricklewood, N.W.2.

THE SERBIAN SOCIETY.

The Serbian Society of Great Britain has issued a report on its activities during the first year of its existence, and it is evident from this record that the society has not only justified its formation, but is also in a position to perform much useful work in the days ahead. In a letter issued with the report the Executive Committee state:—

When the society was formed knowledge of the importance of the Serbian and Southern Slav questions was small, and the gulf that divided Italian and Southern Slav opinion wide indeed. The gulf has not yet been entirely bridged, but it has narrowed appreciably, and is daily narrowing, thanks in part to the force of events and in part to the work of enlightenment and persuasion which the Society has been able to undertake.

Apart from the work of propaganda and conciliation, the society has endeavoured and will endeavour to make known the sad plight of Serbia, and to enlist the support of the British and Allied peoples for the Serbian nation. The sufferings of Serbia are beyond description. Tens of thousands of her inhabitants have been deported to Hungary and Austria, where they have been left to starve. A fate even more terrible has befallen some 10,000 Serbian women and girls, who have been carried as slaves to Asia Minor. The enemy is aiming at nothing less than the extinction of the Serbian people, whose numbers are already sadly reduced in consequence of his inhuman policy. In these circumstances the society feels bound not to slacken its efforts and appeals to you for help in continuing them.

As the war draws to its close, and the question of the peace settlement acquires greater and more immediate prominence, the importance of the aims of the society becomes clearer, and its claims upon the support of those who are convinced that only a just European settlement can ensure a lasting peace grows more pressing and definite. The Executive Committee therefore appeals earnestly to you not only to continue the support given in the past, but to strengthen its hands by extending the membership of the society among your acquaintances.

In view of the urgent need of funds to carry on the work of the society, the Executive Committee has decided to raise the minimum annual subscription to one guinea. The office of the society is at Queen Anne's Chambers (Room 39), Westminster.

THE CAPTURE OF JERUSALEM.

Message from the King.

The following telegram was sent on December 10 by the King to General Sir E. H. H. Allenby:—

"The news of the occupation of Jerusalem will be received throughout my Empire with the greatest satisfaction, and I heartily congratulate you and all ranks on this success. Such an achievement is a fitting sequel to the hard marching and fighting of the troops, as well as to the organisation by which the difficulties of supply, transport, and water have been overcome. I rejoice to think that by skilful dispositions you have preserved intact the Holy Places.—GEORGE, R.I."

AYAHS' HOME,

26, King Edward Road, South Hackney, London.

ESTABLISHED 1825.

IN CONNECTION WITH THE LONDON CITY MISSION.

Hindustani spoken. Ayahs boarded and lodged at 18s. per week each until their Return Passage is paid or a Situation secured for them to return. Ayahs met at any Dock or Railway Station in London. Experienced, well-recommended Ayahs taken entirely off Ladies' hands for a certain payment, which differs according to time of year. Ladies proceeding to India or China requiring an Ayah can generally obtain one by applying to Mrs. FLETCHER, Matron.

STRANGERS' HOME FOR ASIATICS,

WEST INDIA DOCK ROAD, LIMEHOUSE, LONDON, E.

"I was a stranger and ye took me in."

CONTRIBUTIONS ARE SOLICITED from the many who owe fortune or competence to India and China, and will be thankfully received by the SECRETARY or by MESSRS. BARCLAY & CO., LTD., 54, LOMBARD STREET, E.C.

NEAR EAST BOOKSHELF.

DIPLOMATIC SIGNPOSTS.*

Professor Egerton calls this admirable little volume "A Rough Outline." It is rather a mosaic of British foreign policy in Europe, and necessarily outside of Europe, as seen by a skilful artist, piecing his facts together so that the finished slab shall preach a lesson. This lesson might very well be expressed thus: If you look on your country's story with the narrow eyes of party you will never realise that it is a great and noble country, constantly confessing its mistakes, constantly endeavouring to shed them, and continuously anxious to do justice to civilised and uncivilised peoples. Judicial impartiality is the keynote of the volume, and it is this virtue which makes it a convincing defence of British foreign policy, even for the most envious foreigner. It is entirely free from brag or boast. It insists with great fairness on the points of view of other Powers when in conflict with, or anxious to meet, our own. It sketches, for instance, very deftly Russia's desire for a weak Turkey and England's insistence on a strong anti-Russian-buffer Turkey, both countries being sinners against the general conscience of Europe which considered the Turk unfit to rule anywhere, and still to-day so considers. In the last chapter on "Sea Power and Neutrals," in a brave endeavour to sift the ever-present sands of Belligerent *versus* Neutral rights, Professor Egerton, with no little relish, quotes "the Prussian statesman Haugwitz, who said that the sea dominion of Great Britain was a hard thing to bear, but that the land dominion of Napoleon was a harder." The book, by apt quotations from speeches, memoranda, letters, and diplomatic conversations, gives us cameo sketches of "the folk that matter"—Frederick of Prussia, the Tsars Alexander and Nicholas, Napoleon, Chatham, Pitt, Fox, Burke, Addington, Wellington, Canning, Melbourne, Palmerston, Lord John Russell, Gladstone, Disraeli, Salisbury, Chamberlain, Cromer, Napoleon III., Thiers, Ferry, Bismarck—the whole with the artistry that hides the labour and holds the reader, always wiser now that the great war has shattered the many dreams and schemes of secret diplomacy.

Every schoolboy, Macaulay's included, may read this book with profit. Space permits of only one excerpt, and we select it as showing the author's calm grasp of essentials.

"The final concert, not of Europe only, but of the world, to which we must look forward as the ultimate goal, however slow and laborious may be the road to its attainment, can only be reached by attending to the old truth that 'Precept must be upon precept, precept upon precept; line upon line, line upon line; here a little and there a little.'

It may sound a paradox, but it is probably true that in the present temper of the world the best prospect of durable peace lies in the existence of strong alliances of Powers, ready to wage a defensive war on behalf of each other's interests, if attacked. It is highly probable that, had England been joined in a close alliance with France and Russia, so as to necessitate her intervention, Germany might have held back Austria from precipitating the great war, though whether, without a change in the German spirit, that would have been in the long run a blessing either to Great Britain or to Europe must remain very doubtful. Consider the force that would reside in a federation of the English-speaking nations of the world were such a combination to become possible, especially as that federation would be in close connection with the Allied Powers in the great war. Next to converting the temper that desires war, the best thing is to make war so dangerous a game that even those inclined to wax wanton will consider carefully before they embark upon it."

The book may be fittingly described as a series of diplomatic signposts along the high road to the greatest of all wars. It has an excellent index.

*"British Foreign Policy in Europe to the end of the 19th Century." By H. E. Egerton, M.A. (Macmillan.)

THE INDIAN EDUCATIONAL PROBLEM.*

The republication of these papers, which first appeared in 1911, is justified by the importance of their subject, not merely to India, but to the British Empire as a whole. Mr. James is well known in India, and his practical experience in the educational service gives him a right to be heard. He has succeeded in giving within small compass a clear history of the development of educational ideals and practice during the last century, and his book will serve as an introduction to anyone who wishes to understand the present position. Some of his contentions may be open to criticism, but we think that his main conclusions are not subject to dispute. India needs much more education, and, what is still more important, a vast improvement in the quality of the education now provided. Mr. James keeps strictly within the limits of his subject, and consequently he does not discuss at length the controlling factor of finance; the question is whether India can pay for what she needs, or whether she must wait till the increase of the national income brings these new benefits within her reach. That question has to be decided by statesmen, not by educational reformers, but the reformers are perfectly right to press their claims, and the book before us puts their case lucidly and effectively.

BOOKS RECEIVED.

The Crown of Hinduism. By J. N. Farquhar, M.A. (London: Humphrey Milford. 3s. 6d. net.)

A Vedic Reader for Students. By Arthur A. Macdowell, M.A., Ph.D. (London: Oxford University Press. 8s. 6d. net.)

The Church in the Furnace. Edited by F. B. Macnutt, Senior Chaplain to the Forces, Canon of Southwark. (London: Macmillan and Co., Ltd. 5s. net.)

The Story of the Salonika Army. By G. Ward Price. (London: Hodder and Stoughton. 6s. net.)

We regret that in our issue last week the name of the author of 'The Great Crime and its Moral" was incorrectly given as Willimore. The author is Mr. J. S. Willmore.

An excellent short history of Jerusalem, with a brief account of its principal places of interest and the ancient churches, is given in a short work by the late Colonel Sir Charles Watson, K.C.M.G., C.B., entitled "The Story of Jerusalem." It is published by Messrs. J. M. Dent and Co., or may be had from the Palestine Exploration Fund (4s. 6d. cloth, 5s. 6d. roan).

*"Education and Statesmanship in India." H. R. James. Longman 4s. 6d. net.

THE CUSTOMERS OF

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. December 14	1917. December 1	Friday	1336. Saphar 29 Rabia I.	5678. Kislev 28
15	2	Saturday.....	1	29 Tebet
16	3	Sunday	2	1
17	4	Monday	3	2
18	5	Tuesday	4	3
19	6	Wednesday	5	4
20	7	Thursday	6	5

Mme. Take Jonescu has arrived in London from the country.

Over £3,700 has been collected in Victoria in aid of Armenia.

Dr. Momtschilo Nintschitch, Serbian Minister of Public Works, has left Corfu for France.

A shipbuilding branch of the Indian Munitions Board will shortly be inaugurated, with headquarters at Calcutta.

The report of the Commission on the Army Medical Services in France, it is understood, will be completed shortly.

Monday will be the anniversary of the birthday of Alexander, Prince Royal of Serbia. He will be twenty-nine years of age.

To-day is the anniversary of the birthday of Prince Paul, the third son of ex-King Constantine. He was born at Athens in 1901.

The Greek Minister of Finance has applied to the Courts for the seizure of the property of the ex-Prime Ministers Skouloudis and Lambros.

Judge Kershaw has returned to Egypt after a long visit to the United States and the Far East, and has resumed his duties in the Native Court of Appeal.

It is stated that the second and final report of the Dardanelles Commission has been signed and presented. An interim report was issued some months ago.

Police and other administrative measures have been decreed in Greece against subjects of enemy countries, except Armenian subjects of Turkey, who will be treated as refugees.

On November 25 a memorial service for General Maude was held in the Citadel, Baghdad. His grave is in the centre of the British Cemetery to the north of the city, and near the old Turkish cavalry barracks.

The Parliamentary correspondent of the *Times* says that Borton Pasha has been appointed Military Governor of Jerusalem. He was Postmaster-General of Egypt. M. Picot is the head of the French Political Mission.

The Queen, accompanied by Princess Mary, visited the galleries of the Fine Art Society, 148, New Bond Street, on December 8, to view the pictures of Egypt and Nubia by Mr. A. O. Lamplough, and the collection of early Persian art. Princess Beatrice also visited the galleries.

A telegram from Adis Abeba, dated October 31, says that Lidj Jassu, the deposed ruler of Abyssinia, was not killed in the battle near Dessie. It is reported that he is now in the Dankalis country, but with very few followers. Magdala has surrendered to the troops of the Abyssinian Government.

Mr. J. L. Garvin presided at a concert at the National Liberal Club on Monday night in aid of the Lord Mayor's Fund for Armenian refugees, and in the course of a short speech on the history of Armenia said that of the two million Armenians living when the war began probably half had by now been destroyed.

The Serbian Minister (M. Yovan Yovanovitch), speaking at Whitefield Tabernacle on December 9, said all his nation had ever asked for was freedom—freedom in every sense, inside and outside. They were a democratic race, whose whole history was a long record of conflict for freedom, independence, and democratic principles. Serbia must be made stronger in the future in order to be a rampart against any future aggression by Germany.

The Serbian Press Bureau states that the Bulgarian Red Cross Society has informed the International Red Cross Committee that Serbian prisoners of war in Germany and Austria-Hungary are permitted to correspond with their families in the part of Serbia occupied by the Bulgarians; that prisoners and interned civilians are allowed to send photographs; and that correspondence between the civilian population in occupied Serbia and the members of their families is permitted.

Mr. B. W. Stainton, whose acquaintance with Persia dates back many years, has recently left England for that country.

The Greek Minister, who was confined to his room through illness towards the end of last week, is now much better, and has resumed his diplomatic duties.

Severe winter weather prevails all over Greece. For the first time for many years the ground in Athens is covered with snow. The scarcity of fuel is becoming alarming.

Major W. S. R. May, late Assistant Financial Secretary to the Sudan Government, has been appointed Financial Adviser to the Mesopotamian Administration, and will leave for Mesopotamia shortly.

The Maharajah of Nabha has given the British Government three lakhs of rupees for war expenses, 100 horses for Army use, and the loan of his houses at Simla, Ambala, and Lahore for the wounded.

The advance in Palestine has put fresh heart into the efforts of the Syria and Palestine Relief Fund organisers. It is felt that this is the psychological moment for an appeal to the whole nation for the relief of the vast flood of distress in the Holy Land. Sunday, January 27, 1918, will be set apart in the churches throughout the country for this purpose. The appeal is impersonal to many, yet it comes from a land in which Christ first taught the transcendent spiritual value of charity to the stranger.

Lady Jane Taylor was presented with a testimonial on Saturday afternoon at 101, Eaton Square, the residence of Viscountess Barrington, in recognition of the philanthropic work she has undertaken in the course of a long life. Lord Halsbury, in presenting Lady Jane Taylor with a cheque for £1,000, referred to the various schemes which Lady Jane had initiated or organised. These included the Egyptian War Fund to assist the families of those engaged in the Egyptian Campaign of 1882, which later became the Imperial War Fund.

The *Times* correspondent at Tangier, in a message dated December 6, says:—"I am requested by representative Jewish residents of Tangier to express on behalf of the whole Jewish population of Morocco their highest appreciation and heartfelt gratitude for the action of the British Government in Palestine. The Jews of Morocco were only lately freed from the political and social disadvantages under which they have lived, and this promise of the British Government awakens new religious hopes and aspirations among this long-suffering and worthy people."

A memorial service for Dr. Elsie Inglis was held on December 6 at St. Margaret's Church, Westminster. Princess on December 6 at St. Margaret's Church, Westminster. Princess Louise Duchess of Argyll was represented by Lady Frances Balfour, and the Diplomatic Corps by members of the French, Italian, and Russian Embassies, and the Legations of Serbia, Roumania, and Belgium. The Foreign Office was represented by Mr. Balfour, Lord Robert Cecil, Sir Walter Langley, the Hon. H. Nicolson, Mr. W. H. S. Martin, and Colonel Buchan, and others present were Sir Arthur Stanley on behalf of the British Red Cross Society, Commander Helmsley from the Ministry of Shipping, and Mr. O. Pelly Dick from India House.

APPOINTMENTS, PROMOTIONS, ETC.

El Bimbashi J. D. Mathews, Artillery, has been transferred to the Department of Ordnance.

Major Arion, the Military Attaché to the Roumanian Legation in London, has been promoted to Colonel.

Major-General Sir R. G. Egerton, K.C.B., K.C.I.E., Indian Army, has been gazetted temporary Lieutenant-General.

Mr. W. P. D. Clarke, Second Inspector, Berber Province, has been transferred to the Blue Nile Province in the same capacity.

Kaimakam W. F. Bagshaw Bey, of the Ordnance Department, Egyptian Government, has been appointed Assistant Director to that Department.

Engineer-Commander W. Scott Hill, R.N., formerly of the Sudan Government Steamers' Department, has been appointed First Assistant to the Engineer Manager, H.M. Dockyard, Rosyth.

The King has granted to the following Sudan Government officials his authority to wear decorations conferred upon them by the late Sultan of Egypt—Second Class of the Order of the Nile: Mr. E. C. Midwinter, C.B., C.M.G., D.S.O., late Captain, Royal Engineers, General Manager, Sudan Government Railways. Third Class of the Order of the Nile: Major (temporary Lieutenant-Colonel) H. D. Pearson, R.E., Director of Surveys. Fourth Class of the Order of the Nile: Mr. A. P. Bolland, Commercial Secretary; Mr. R. Hewison, Assistant Director of Agriculture; Mr. C. F. Rydes, Province Judge. Fifth Class of the Order of the Nile: Mr. H.Evans, Superintendent of Trams and Ferries, Khartoum Province.

OBITUARY.

SIR SWINTON JACOB.

The death of Colonel Sir Swinton Jacob, K.C.I.E., C.V.O., on the 4th inst., recalls a long and honourable record of service in India of unusual interest. Sir Swinton was a soldier, but he earned his reputation as an engineer and architect. This, though remarkable now, would not have been considered peculiar in former years. In the days of the East India Company civilians sometimes became soldiers; the hero of Arcot and of Plassey was a civil servant, and much more often military officers adopted civil careers. But Sir Swinton could hardly be called a company's servant; it is true he obtained his commission to the Bombay artillery from Addiscombe in 1858, but the Mutiny of 1857 had sealed the fate of the company, and in the following year the government of India was transferred to the Crown.

Sir Swinton's short career as a soldier was uneventful; he only once saw active service, in an expedition against the Arabs from Aden, and then he was offered the post of resident engineer to the Jaipur State, in Rajputana. He confessed he had qualms about accepting this appointment; he had not received an engineering education, and in a native State he would be his own chief, with no technical authority over him. Nevertheless, owing to innate love of his work and very exceptional ability, he achieved conspicuous successes. He was so successful with his irrigation schemes in Jaipur that he was subsequently invited to advise on similar works for the whole of Rajputana. But it is unnecessary to dwell on his talents as an engineer, because it is as an architect that his name will always be so widely remembered. The splendid examples of Mogul and Hindu buildings around him aroused his natural artistic instincts, and he became the first pioneer architect to adapt the Indo-Saracenic style to the requirements of modern life in India. The beauty of his designs in Jaipur soon attracted attention elsewhere; the French Government conferred on him the insignia of Officier à l'Académie des Beaux Arts, and his services were sought not only in India, but outside the Empire. The many beautiful public buildings, the palaces, memorials, and churches constructed to his designs are now among the sights of India; and it was owing to his high reputation that he was called into requisition for the architectural features of the two great Delhi Durbars of 1903 and 1912.

Sir Swinton's career in India from first to last extended over a period of forty-seven years, during which the country had seen eleven Viceroys, and never was a British officer more loved by all who knew him. Jaipur is one of the places which visitors to India never fail to see, and there Sir Swinton and Lady Jacob were always so helpful and hospitable that they made many friends. He had been greatly successful and greatly honoured, but his reputation had been obtained by the intrinsic value of his work, not by any forcefulness of character or personal ambition, and to the last he maintained his simple, almost boyish, disposition. He never built walls around himself; he was always accessible, sympathetic in trouble, and ready to make the griefs of others his own. And now that he has passed away there are many who will miss the host who never failed in the geniality of his welcome.

CAPTAIN GEORGE NORMAN BERNEY.

Further particulars now received from his Colonel and others in reference to the death in action of Captain George Norman Berney, of the Herefordshire Regiment, show that he fell in a sanguinary battle on November 6 at Khuweilfeh, situate on the way to Hebron, the Levitical City of Refuge west of the River Jordan, which has since been occupied by our troops. In this engagement Captain Berney and his company gained high distinction and complete victory, after desperate hand-to-hand fighting in thick mist. It resulted in the capture by them of many guns and prisoners. His Colonel has written to say:—"Had he lived he would most certainly have received some distinguished reward."

It may be of interest to note that in a letter just received, believed to be his last, consisting of a few lines which Captain Berney wrote home very shortly before he fell, he mentiond that his company had been in action "with success" on the previous day, and reaffirmed in the following words the intense admiration he had always expressed for his comrades:—"The men were fine. It is a privilege to lead them." As the farewell message of a soldier to soldiers there can be nothing grander than this simple tribute, with the inspiration it conveys.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

MACDONALD.—On December 3, at Mains of Mulben, Keith, the wife of Bimbashi G. G. Macdonald, Egyptian Army, of a son.

COLLINS.—On December 5, at 23, Amherst Road, Ealing, the wife of Bernard Abdy Collins, I.C.S., of a daughter (Diane Eleanor).

DEATHS.

GRIFFITHS.—On December 5, at Sherborne, Dorset, Linnette, wife of John Griffiths, formerly Principal of the School of Art, Bombay.

SNOW.—On October 27, Mary, the beloved wife of Walter Snow, Navigation Department, Messrs. Thos. Cook and Son (Egypt), Limited, Boulac, Cairo.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

FRIDAY, DECEMBER 14, 1917.

THE POLITICAL ATMOSPHERE IN INDIA.

Indian politics are dominated for the moment by the investigations of the Secretary of State, who is visiting the country in order to study the situation for himself and to discuss it on the spot. His mission is one of far-reaching importance, and the efforts of the Government have been directed for some time past towards the creation of a political atmosphere which should conduce to its successful prosecution. The need for a change of atmosphere cannot, unfortunately, be denied: owing to a variety of causes, the political classes, whose position has been greatly strengthened by the reforms of the last ten years, have of late been in the worst possible temper; they have, indeed, gone so far as to dally with an elaborate scheme of what is called passive resistance, and though they have put this particular project aside, their general attitude has been such as to render almost hopeless the idea of any cordial agreement on the numerous and complex questions which await solution. The attempt to change this atmosphere was abundantly justified, but its necessity should not blind us to the dangers incident to the undertaking: in India, even more than in other countries, an artificial atmosphere is apt to be a distorting medium, viewed through which inconvenient facts become blurred, the sharp edges of existing divisions lose their distinctness, and the roseate hues of harmony merge insensibly into the dense clouds of wilful obscurantism. It is, therefore, matter for satisfaction that just at this moment some exceptionally awkward facts have obtruded themselves in such a manner as to ensure recognition; their obtrusion has made Mr. Montagu's task more difficult, but at the same time has distinctly increased the possibility of its successful accomplishment. We propose to glance briefly at two of these intruders.

A serious outbreak of lawlessness in Bihar has shown the error of the view so fondly cherished by the politicians that the deep religious cleavage between Hindus and Moslems had been finally bridged by the agreement of their self-styled leaders on a common line of political action. For some months we have had scornful references to this ancient bogey, as sanguine people were disposed to regard it; we have been told that all religious dissensions had disappeared, and that the two communities had become fused in a single nationality; then came a local dispute about an old, old subject—the ritual sacrifice of cows—which Indian Moslems hold to be *de fide*, while Hindus regard it as the most impious sacrilege, and the hard facts of the situation came promptly into view. The peace was broken; in a moment the countryside was in a blaze, and nearly one hundred villages were looted before order was restored by the exertions of the British troops. The incident itself is in no way alarming: in India almost every day in the year brings equal possibilities of disturbance, and if the possibilities are realised on only one occasion out of a thousand, the reason must be sought in the efficiency of the much-maligned administration, which has learned by long and hard experience the right ways of preserving the peace. Only now and again is the administration momentarily at fault, and the result is an outbreak of the kind we have described: reduce the efficiency of the administration, and the number and importance of such outbreaks will assuredly increase. Such an incident, then, while it is not alarming or even surprising, carries a lesson which in India cannot safely be overlooked: Hindus and Moslems are not, in fact, united: the old-standing quarrel may blaze up at any moment, and it is only the strong and impartial British administration which protects the people from the bloodshed and rapine so familiar in the annals of the past. These facts are by no means pleasant, and every lover of India must long for the day when they will be no longer true; but at present they are terribly true, and no change in the political constitution can be contemplated which fails to allow for their existence.

The second fact which we have selected for notice is the reappearance in the political world of the representatives of British commercial interests. For some years past the great merchants and manufacturers of Calcutta and Bombay have manifested too little interest in the affairs of India, but this attitude is now a thing of the past, and at public meetings as well as in the Imperial Legislative Council the claim has been temperately but firmly asserted that British capital and enterprise are entitled to reasonable consideration in connection with the impending changes in the constitution. The claim is one which many Indian politicians would gladly ignore: they dream that the transfer of power to their own hands would make no difference in the social or economic world, and they particularly dislike being reminded of the almost inevitable reactions. India, however, cannot yet live without oversea capital, and the interests of capital cannot be ignored while so many of the inhabitants of the country depend upon it for their daily bread. The cautious and level-headed men who control British capital in India look at the words and deeds of the prominent politicians, and of late they have found but little to reassure them in the prospect. For years they have heard the politicians clamour for the "right" and the "honour" of defending their native land; they have seen the ridiculous fiasco resulting from the grant of this claim, when in the course of two months precisely 300 Indians out of the entire population offered themselves for enrolment; and they have deduced the obvious conclusion that such demands are advanced merely as counters in the political game. More recently they have watched with rising indignation the movement towards passive resistance at a time when the Empire is fighting for its life: the legal distinction between such conduct and active treason is doubtless perfectly clear, but men of business look rather to the moral and practical aspects of the case, and they feel that Imperial interests are seriously endangered by the predominance in the Councils of men who can even consider such a project. They see, in short, a group of nimble-witted men playing the political game for itself, and without regard to the vital and permanent interests of the country or the Empire, and they are exerting themselves to secure for this view the prominence it unquestionably deserves. Entrust the future of India to such men as these, and there is the gravest danger that the fertilising stream of capital will be checked in its course, to the detriment of Indians of every rank in life, but, most of all, to that of the peasants and workmen whose future depends on the economic progress of the country.

The emergence of such facts as we have indicated is indeed inconvenient to politicians at the present juncture. They have proclaimed the unity of India, and Indians proceed to demonstrate their disunion in the traditional fashion: they have hoped for a Golden Age, and they are warned that they may have to reckon with a starving proletariat. The current of constitutional reform would flow much more smoothly, if such rocks and sandbanks did not interrupt its course, and sanguine persons are apt to think that, if they shut their eyes very tightly, the obstacles which they cannot see need not be taken into account. But, however much we may sympathise with such aspirations, we are forced to recognise that the impediments exist. They are not necessarily permanent, and all who love India hope for the day when they shall have disappeared; but for the present they are there, and the attempt to ignore them can lead only to disaster. It is well, therefore, that the fact of their existence should be demonstrated once more. The pathway to reality is beset with such difficulties, and we have little doubt that the Secretary of State and his advisers will recognise the significance of the incidents to which we have referred.

SALONIKA.*

Salonika is *par excellence* the city of refugees, and of all the remarkable coincidences of the Great European War, one of the most curious has been the gradual assemblage of the most international Entente force in this most international of cities.

More than 50 per cent. of the total population consists of Jews, who are mainly descendants of those Jews who were expelled from Spain in the fifteenth century. There are Bulgarian, Serbian, and Turkish quarters in the town, and a Greek colony recently increased by the advent of refugees from Bulgaria and Asia Minor, and by Greek officials and their entourage introduced since 1912. There is also a considerable French and Italian colony, largely confined to the more well-to-do classes. Of indigenous population in the ordinary accepted sense, there exists only the descendants of the Jews to whom St. Paul preached.

In Salonika, as in all their non-Mohammedan territories, the Turks rather encouraged a promiscuous internationalism, provided the hard crust of Turkish officialdom was maintained. The existence of this internationalism possibly explains why the Greeks, though they had been hard at work hellenising since 1912, had made comparatively little progress by the end of 1915. When there is a population with a definitely national spirit to be won or broken, the problem is at least concrete; but when it is necessary to start by inculcating non-nationalism as opposed to pan-nationalism, the task is more complicated. In Salonika in 1915 every influence was in the other direction. Though the number of Spanish subjects was insignificant, the main language spoken in the town was the pure Spanish brought by the Jewish refugees after the fifteenth century, and retained by their descendants. French was the next predominant tongue, and Turkish, Greek, and Serbian could also be heard. Each community kept its own customs and its own ideals. The Jewish shops closed on Saturdays and Festivals, the Greeks on Sundays, if at all. The Greeks and Jews both used their own ancient calendars, and the other inhabitants the modern. Even a common method of fixing the time did not prevail. The Turkish population had their own system as distinct from the Greek official time which resembled the European. With the advent of the Allied armies, the complication was further increased by the addition of two more horologies, the naval and the military, and hence in making an appointment, the common practice was for the two parties to fix their watches and arrange to meet at a given hour by the agreed time.

Internationalism was further stereotyped by two facts. In 1912, when the cession of Salonika by Turkey appeared imminent, large sections of the population enrolled themselves as citizens of Austria, and such other countries as permitted it, of which Great Britain was not one. Even those Salonikans who did not take the plunge had under the Treaty of Athens until November, 1917, to decide whether they would remain Greek citizens. The consulates were kept busy enrolling new subjects. The enrolment was not regarded as implying any particular allegiance. It merely constituted a kind of protection against absorption into the Greek nation. Again, education and culture were largely foreign. For some years French schools and French culture had predominated, and only in very recent times Austrian schools of mushroom growth had sprung up under the able leading of the Austrian Consul-General, who took no pains to conceal his political motive.

As for the newspapers, there can be few towns with so limited an educated population where journalism flourishes so rampant. Each nationality and each section publishes not merely its own paper, but a series of editions daily. For the larger section of the reading population newspapers are the only form of literature. Not that they contain news, for the supply of this is meagre, and, as in every city of the East, news travels with a speed far outstripping that of any paper. The real appetite is for argument, recrimination, and discussion around the strangest of perennial topics, not to which nationality does Salonika belong, but by which nationality would Salonika prefer to be absorbed. This prevailing attitude of mind is well illustrated by the title chosen by a Salonikan author of a recent book giving the history of the town—" La Ville Convoitée " (" The Coveted Town ").

In 1915, when the Entente armies landed, the political mentality of the average Salonikan was much like that of one of the mythical beauties in ancient drama courted by various national suitors, with a newspaper chorus. It will be readily understood that this condition renders the subject peculiarly sensitive to new impressions. Here one misconception should be removed. The arrival of a foreign army was no new experience to Salonika, nor did the people regard the outbreak of the European War in any way as the cataclysm which we in England were bound to consider it. To the Salonikans the war was merely a stage in the natural evolution of events, a further act in the drama which began in 1908 with the Turkish revolution and continued with the two Balkan Wars.

The landing at first caused a certain amount of anxiety. A population which had experienced the exactions of the old Turkish régime, followed by the equally burdensome contracts of the Young Turks, in which Government debts were liquidated only by promises, and then witnessed the arrival of the Greek forces, which resulted in a miniature battle between Bulgars and Greeks in the upper part of the town, may be forgiven, if its welcome to an unknown army was none too cordial. Particularly is this the case when, as in Salonika in 1915, the agents of the Central Powers were as numerous and far more active than those of the Entente army. The population may well be excused for their bewilderment. It appeared as if the Fates intended Salonika to present the extreme limits of pan-nationalism.

The Entente army had its lines of communication on a railway which was originally Austrian, and had recently been taken over by the Greek Government, whose hostility to the Entente Powers was thinly veiled and broken only by occasional lapses into neutrality. German and Bulgarian agents moved about openly in the town, which was full of Entente troops. The people were diverted by hearing daily of the petty administrative obstacles raised by the Greek officials and the means by which with infinite patience the Entente armies overcame them. Within a very few weeks of the landing of the Allied armies the population of Salonika had begun to perceive two extraordinary differences between this conglomerate army and anything which they had previously experienced or imagined.

The first beginnings of a great moral lesson were being disclosed. They could readily recognise that the landing force consisted of two nationalities—French and British—differing considerably in externals, in habits, and in speech. With the French type they were now more or less familiar, as they had absorbed much of French culture. Of the British they knew nothing, or less than nothing, for the number of English-speaking Salonikans was insignificant. Now, in their past experience, Salonikans had known many forces composed of different nations, from the Macedonian gendarmerie to the Armies of the Balkan League, and had seen them, though starting on apparently good terms, inevitably give way to intrigue, if not to open rupture. Salonika waited for the usual signs of friction, as likewise did the emissaries of Constantine. Every influence was set to work by the Greek officials to foster rivalry and jealousy. First, one of the Entente Armies was praised and every facility placed at its disposal. Then this Army was harassed and hindered at every turn, while the other was taken into favour. One day the French were said to be gentlemen, and the next day they were incomprehensible, and it was the British who were easy to understand. Still, to the growing wonder of the town, where every move was public property, the Allied Armies kept on the best of terms.

The lesson was pushed home when, in addition to the French and British, came the Serbian and Italian

* The author of this article left Salonika before the disastrous fire took place, and refers to conditions as they were in the earlier stages of the allied occupation.

Digitized by Google

Forces. Then it was found that the Entente Armies, unlike any considerable force that had previously visited the Balkans, were well behaved and did not loot, and further, marvellous to relate, that large purchases were made by them and paid for in cash. Moreover, the Entente military police interfered little, asked for no favours, and even when employed in tasks giving such obvious opportunities for plunder as the expulsion of the consuls and agents of the Central Powers, they came away empty-handed. The lesson was particularly striking, because just before the arrival of the Allied Armies the town had been flooded with terrible accounts of the excesses of the British soldiery. The stolid impartiality of the ordinary British soldier particularly caught the local imagination. Under the Turkish régime, in a street row between a Turk and a Greek, the Turkish police battered the Greek much as in dealing with a dog fight a man tends to treat the other man's dog as the aggressor. The tradition had survived under the Greek régime until 1915. The contrast of the Entente methods could not fail to produce a sensation. The British soldier even stereotyped his impartiality by coining the Turkish "Heide" and Greek "Embros" into a composite "Heide-bros" to translate the British "move-on." At the Vardar gate, where all roads entering the town converge, traffic was regulated by French, Serbian, Italian, and British police working in the utmost harmony and with complete success.

Another great change soon followed. Prior to the arrival of the Allied Armies, Salonika was almost like a beleaguered city from the land side. Villagers came into the town occasionally, but few townspeople ventured into the country. The rail was almost the only safe means of egress, and few knew the country except from the railway carriage. The main cause was not the absence of roads, but the unsettled condition of the country. For a picnic on the adjacent mountain of Hortiach, it was necessary to obtain the protection of a kavasse from the all-powerful Austrian Consul-General. Even with the advent of the Greek régime of 1912, the condition of unrest had not disappeared, partly owing to the methods of the Greek police, who differed only from the Turks in the nationalities to whom they extended their protection, and in being somewhat more active. This condition of isolation continued largely through 1916.

In the meantime, the population of the country-side which had reason to dread the passage of troops, soon learnt that the "Entente" force was something new to them. Crops were carefully respected, the soldiery were disciplined and considerate, and instead of spreading havoc, or at least levying a toll, brought undreamt of wealth to the village. Bulgar, Turk, and Greek were treated on the same terms, and all that was required in return was abstention from active assistance of the enemy.

By the beginning of 1917, the effects of the new régime had begun to make themselves felt. The lands were cultivated as they had never been before. Villagers were able to pass from one place to another even with valuables without fear of molestation. One instance of many may be quoted to illustrate the enormous increase in prosperity due entirely to the new feeling of security. The old Turkish Government tax of 10 per cent. of the harvest had been continued by the Greeks and farmed out. In 1917, in a district through which a large body of troops were constantly passing, the tithes stood for nearly twice what they did in 1916. No greater compliment could be paid to the good discipline and good behaviour of a fighting force. Reports of the change gradually spread to Salonika, and the townspeople began to venture out into the countryside, in many cases for the first time. The process has been assisted by the excellent roads constructed by the Allied Armies where before only mule tracts existed. These are, perhaps, the most momentous changes resulting from the occupation of the Allied Armies. The town and the countryside have been rescued from their state of isolation, and paradoxical as it may seem by being dragged into the vortex of the war, the Turk, Bulgar, and Greek villages have experienced for the first time some of the blessings of peace.

One incidental result of the participation of so large a British force is interesting. In Salonika, and still more in the country, the British were a mere myth. They have now become a reality. As everywhere, the British equipment has been the subject of universal admiration; and thanks to the exemplary behaviour of the troops, the British character has been seen at its best, and appreciated.

The very large sums which have been expended in the country have enabled formerly poor villages to store quite considerable savings. Naturally the present is not a time when the opening of new channels of trade can be considered. But it is to be hoped that when the time comes British commerce will be ready to take advantage of the new fields in Macedonia in the opening of which the British Army has had a share.

HOUSE OF COMMONS.

Awards to Officers. Dec. 4.

Colonel YATE asked the Under-Secretary of State for War whether it had been brought to the notice of the Secretary of State that in the list of rewards granted to officers in connection with the recently published Mesopotamian despatch dealing with the operations there up to the end of March, 1917, of the 287 rewards given 147 were awarded to officers of the Staff and only 140 to the regimental officers; and whether steps would be taken to give the regimental officers their due share in these rewards in future.

Mr. MACPHERSON: The actual number of rewards conferred during the period referred to was—to Staff officers, 142; to regimental officers, 467. This latter includes "immediate" awards to regimental officers under powers delegated to the Commander-in-Chief in the field. It must be borne in mind that in many cases the reward to an officer may be in respect of service prior to appointment to the Staff. In regard to the latter part of the question, the initiation of rewards rests with commanders in the field, and the Army Council are satisfied that the recommendations of such commanders are invariably made in the best interests of the Service, having regard to the intimate knowledge which commanders possess of the value of the services rendered by their subordinates.

Colonel YATE: Does the hon. member not think that it comes hard upon some regimental officers when they see men promoted who may not have been under fire for twenty-four hours, while others who may have been for weeks and months under fire get nothing for it?

Mr. MACPHERSON: That may be so; but if my hon. and gallant friend will read my answer he will see that the proportion to regimental officers is very much greater than to Staff officers.

Brigadier-General M'CALMONT: Is the hon. gentleman aware that this is a matter about which there is a great deal of feeling throughout the Army, and will he in future take the opinion of regimental officers instead of always relying on Staff officers for information of this kind?

Mr. MACPHERSON: Hon. members have made it clear to me that there is a good deal of feeling, and I will certainly look into it.

The Roumanian Armistice. Dec. 10.

Mr. BALFOUR, asked by Mr. KING whether he could make any statement as to the position of Roumania; whether the Government and the Allies continued their material support of our Roumanian Allies; and whether supplies could still be sent to the Roumanian front, replied: I cannot with advantage say anything more than that the gallant Roumanian army has been obliged, by circumstances beyond its control, to conclude a military armistice.

THE PRESS ON THE NEAR EAST

The Pan-Turanian Movement.

The possibility of a disruption of that vast political system known as the Russian Empire provides a writer in *The Round Table* with the text for an informative article on "Turkey, Russia, and Islam." While the German Government plans for itself a glacis of vassal States and fosters anarchist and separatist movements in European Russia, the military oligarchy of Turkey, he points out, are cherishing yet wider ambitions of aggrandisement. They mean to revise the historic rôles. Russia is now to be the "sick man," and the Turks are to "free" the Turkish-speaking and Mohammedan people from democratic Russia. To indicate how serious these aspirations are and how dangerous they might become, the article gives an exhaustive account of the Pan-Turanian movement, from which the following extract dealing with the rise of Turkish nationalism is taken*:—

"The consciousness of nationality, like the word 'Pan-Turanian,' has come to the Osmanlis from Europe. The Ottoman Empire began as the very opposite of a national State. It is not called after any people who inhabit it, but after the prince who founded it—Osman. It is true that Osman and his tribe were Turks, but they were only one out of a dozen Turkish States in Anatolia, and their Turkish neighbours were their worst rivals and enemies. They built up their power by conquests in Europe. Their best taxpayers were Christian subjects, their standing Army Christian converts, their most loyal supporters apostate Albanians and Slavs, who changed their religion but kept their language. Till a century ago the Turkish nationality contributed practically nothing to the Ottoman State except the literary and official language of the governing classes, and that language was so diluted with Persian and Arabic that it had little left in common with the vulgar Turkish of the Anatolian peasantry. The bulk of Anatolia was a comparatively late acquisition of the Empire. It was a neglected region, to a large extent practically independent, under local feudal chiefs.

"During the last century, however, Anatolia has taken the place of the Balkan Peninsula as the 'home country' of the Ottoman Empire; for while the Balkan provinces have been breaking away, the Asiatic provinces have been brought more and more under central control. The same Sultan who lost Greece broke the power of the feudal aristocracy in Anatolia and Kurdistan. The process of disintegration in Europe reached its climax in the Balkan War of 1912-13; the process of centralisation in Asia Minor has been completed by the Committee of Union and Progress since the treaty of Bucharest, and especially since Turkey's entry into the European War.

"The most significant change has been in the composition of the Ottoman Army. The Janissaries, a hereditary professional army descended from forced Christian converts of all races, were destroyed in 1826. The modern Turkish Army is organised on the nineteenth century European basis of conscription from the civil population. Down to 1908 the conscripts were nominally drawn from the whole Mohammedan population of the Empire, and since the Revolution Christians and Jews have been made liable as well. But the Government never got hold of the nomads and mountaineers; the settled Arab population was not good military material nor easily mobilised on the most threatened frontiers, which till the present war were those in Europe. Both before and after 1908 the Mohammedan Turkish-speaking Anatolian peasantry have been the staple of the Ottoman conscript army—its most amenable recruits and its toughest soldiers—and the Anatolian upper classes have more and more supplied the centralised Empire with its officers and officials. Thus, when the conscious Turkish national movement began, the Ottoman State was already resting on a practical foundation of Turkish nationality.

"The cultivation of national consciousness by the Ottoman Turks was partly an imitation of older nationalist movements in Europe and partly the spontaneous product of similar conditions. Like most European nationalisms it started by being cultural rather than political. The first nationalist society was founded at Salonika in 1909, in the comparatively free atmosphere that prevailed during the first three years after the Young Turk Revolution. The founder of this society was a provincial notable—one Ziya Bey, of Diarbekir, who had come up to attend a Congress of the Committee of Union and Progress. Diarbekir is a Turkish enclave in Kurdish and Armenian territory, and it is characteristic of nationalist movements that their most fanatical leaders come from the debatable borderlands.

"Ziya Bey's group started a campaign to purge the literary Ottoman language of its Arabic and Persian borrowings, and to replace these by old Turkish words which had never been admitted into Ottoman literature. This might seem a fantastic aim, for it is only through the adoption of foreign words, idioms and rhythms that Turkish has been given literary form at all. Yet submerged languages in Europe have been revived in circumstances of almost equal difficulty, and this 'Pure Turkish' movement claims to have had complete success. The Turkish writers of the traditional school were routed, and the use of Arabic was even attacked in the ecclesiastical field. The Nationalists wished to translate the Koran, Friday Sermon, and Khutba (Prayer for the Khalif) into Turkish, and to remove the Arabic texts from the walls of Turkish mosques; but they had to drop this part of their programme, which was far in advance of ordinary Turkish opinion.

"This phase of Turkish Nationalism lasted from 1909 to the Balkan War of 1912-13. It was a doctrinaire imitation of the linguistic Nationalism of Europe, impossibilist, and unpolitical. The chief source of information about it is a book on 'The Turkish and Pan-Turkish Ideal," by Tekin Alp,* a pseudonym which is believed to cover the name of a certain Salonika Jew.† This is a good illustration of the artificial origins of the movement, and it throws some light also on its prospects of success. For the Salonika Jews are inseparable from the Committee of Union and Progress, and one of their number would hardly have taken up Pan-Turanianism so strongly unless he thought it had found favour in the eyes of the Committee. Tekin Alp evidently feels it politic to identify himself with the Nationalism of the ruling race in Turkey, as the Jews in Hungary have identified themselves with Magyarisation. But his book has to be used with caution; for though it has been written since the Committee of Union and Progress have taken up the Pan-Turanian idea, it is impossible to tell how much (if any) of its contents represent their policy. On the whole it is safer to take "Tekin Alp" as representing the doctrinaire school of Ziya Bey, and to judge the Pan-Turanianism of the Committee solely on the evidence of their political actions since the Balkan War.

"The Balkan War made Pan-Turanianism practical politics. The shock of that disaster penetrated to wider circles than had been affected by the academic movement of the previous years, and seems to have kindled a genuine desire for national regeneration among all educated Turks. A number of societies, with local branches in Anatolia, the Caucasus, and Turkestan, were founded to promote education, physical culture, the emancipation of women, and other really constructive aims; and from this time onwards the Government lent its support. The Ministry of Evkaf or Religious Endowments has made grants out of its enormous funds for the multiplication of national schools; there has been a scheme for reforming the Medressés—the reactionary Mohammedan ecclesiastical seminaries; and during the present war the Government has challenged the whole existing ecclesiastical order by sweeping legal reforms which will bring much of the former domain of the Sheriat (Sacred Law) under the civil jurisdiction. The Sheikh-ul-Islam resigned over this, but he was and remained an active 'Unionist,' and the *fait accompli* was accepted by his successor. It is possible that both were acting in collusion with the Government—calculating that this formal protest would be a safety-valve for discontent among the humbler members of the ecclesiastical body.*

"All these activities were inspirations from Europe, like the crusade for a pure Turkish language, but they were of a much sounder kind. The Osmanlis seem to have been impressed by the example of the Balkan States, which had built up their strength by internal reforms till they were able to beat Turkey in war. Unfortunately they also borrowed from Europe another idea—irredentism.

"'Observers,' Tekin Alp writes, 'who like myself are Macedonians, and like myself had ample opportunity of gaining an intimate knowledge of the irredentist propaganda of the Bulgars, Greeks, Serbs, and Vlachs, are able to judge the significance of this national ideal, and how sweet and inspiring it is to go through the greatest dangers for such a cause'—and he proceeds to sketch the life history of several young Macedonian Christians who, before the Balkan War, had sacrificed everything to work for their national unification. This may, of course, simply represent Tekin Alp's personal philosophy, but it is probably true that the Balkan War did influence such public opinion as exists in Turkey in this direction. During the century ending in the year 1912-13 the centre of gravity of Turkey had actually shifted from Europe to Anatolia. After 1913 there was a corresponding change in the national consciousness. The Turkish nation abandoned the tradition of being a dominant race in Europe, resolved to develop its own latent possibilities in Anatolia, and conceived the ambition of making up for lost alien subjects by attracting to itself the scattered branches of the Turkish race outside the Ottoman frontiers."

* *Turan*, it is pointed out, is a Persian word meaning in Persian mediæval poetry the steppes and deserts of Central Asia, in contrast to the settled country of Iran or Persia; Pan-Turanianism, however, in its origin is both artificial and European.

* Published in German by Kiepenheuer, Weimar, 1915.

† By residence only and not by race, to judge by his fore-name. His residence in Macedonia is proved by allusions to the book itself, where he actually calls himself a Macedonian.

* See *Zwei Kriegsjahre in Konstantinopel*, by Harry Stuermer, ex-correspondent of the *Kölnische Zeitung*. (Payot et Cie., Lausanne.)

PERSIAN SELF-TAUGHT

By SHEYKH HASAN.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

I pointed out recently that South Africa would be a serious competitor in the future as regards the production of Turkish tobacco. The report of the Tobacco Company of Rhodesia and South Africa, Limited, for the year 1916-17, which has just been issued, fully confirms this view. This company had under cultivation 1,013 acres, 603 acres being under tobacco, the yield being 214,041 lbs. of Virginia, and approximately 62,000 lbs. of Turkish leaf, the latter item showing a marked increase on the 19,196 lbs. for the previous year. The company is now extending its operations, and the acreage under Turkish tobacco for the coming season has been considerably increased.

***

The annual report on the Cyprus Blue Book for 1916-17, reference to which is made elsewhere, throws a very interesting light on the effect of war conditions on the economic life of the island. Thanks to the war, an extraordinary demand is stated to have arisen for Cyprus produce, with the result that the inhabitants are enjoying a period of exceptional prosperity. It is not to be expected that conditions due solely to the war can have any degree of permanence. Fortunately, there are other and more solid grounds for confidence in the future of Cyprus, notably in connection with the mining industry, which seems to offer excellent prospects of development in the near future.

***

A number of important matters were dealt with by Lord Inchcape in his speech at the meeting of the P. and O. Steam Navigation Company, notably the question of freight rates and the possibility of State-owned shipping after the war. On the latter subject he said:—"I may be wrong; but I am sanguine enough to hope that no Government will be so ill-advised as to kill the ship-owning industry of the British Empire, and to try and work it as a Government concern; and I go further than this, and I say if they attempt to interfere with it or to control it, while they cannot control that of other countries, they will land it in ruin." Referring to the submarine menace, he said that he did not take the view that it had ceased to be serious; it was, he said, graver than a couple of years ago.

***

The report of the Khedivial Mail Steamship and Graving Dock Company, Limited, for the past year discloses somewhat less favourable results than were recorded in the previous twelve months. That is not a matter for surprise, as 1915-16 was a record year for the company in every way. The gross profits reached the highest figure ever recorded, and the ordinary dividend was 25 per cent., as against the previous highest declaration of 10 per cent. It would be possible also to make too much of the fact that these results have not been equalled, for it must be remembered that for both periods the trading profit was reckoned after the deduction of all war taxation. Obviously the incidence of this item would be most severe in the period under review, and it may justifiably be assumed, therefore, that the trading profit has not declined to anything like the extent it appears to have done. As to the operations of the company, it is stated that a number of vessels continue to be used in various capacities in the services of the country, while others have gone on running between Egypt and the United Kingdom, which suggests that what business may have been lost in one direction through war conditions has been at least compensated elsewhere.

***

Turning to figures, the gross profit for the year was £51,500, as against £85,700 in 1915-16 and £53,400 in 1914-15. The net profit amounted to £24,100, as against £52,000 in 1915-16 and £19,700 in 1914-15. As, however, £28,600 was brought forward, the amount available for distribution was only about £12,000 less than in the previous year. Out of this sum an ordinary dividend of 20 per cent. is being paid, and £21,700, or £6,900 less than before, is carried forward. For the rest it may be noted that £18,000 is allocated to depreciation, as against £24,000, and the insurance fund is now £68,700, the latter item being an increase in the year of £24,100; while the value of the company's steamships is estimated at £120,400, or just under £50,000 less than last time. In the circumstances this can only be regarded as a most conservative estimate. On the whole shareholders have no reason for dissatisfaction with the report.

***

The Non-Ferrous Metal Industry Bill, which passed its second reading in the House of Commons on Tuesday, is an economic measure of the utmost importance for the future safety of the Empire. Put briefly, the object of the measure is to ensure that for a period of five years after the war the trade shall be free from the slightest trace of German influence and control in order to give our traders time for such organisation as will enable them to hold their own in the metal trade against any competition. That is its *raison d'être*, but the Bill, when passed, as it will be shortly, will also serve the very useful purpose of reminding the enemy that the control of the greater part of the raw materials of of the world is in the hands of the Allies, and that, as Mr. Bonar Law put it, we realise our power commercially, and when the time comes will not hesitate to use it.

***

The position with regard to the metal trade can best be explained by saying that before the war Germany's position with regard to it was on a par with her interest in the Calcutta hides trade, which was discussed in these columns two weeks ago. In other words, her influence was supreme in the trade. A group of German metal companies—the most important of them the Metallgesellschaft of Frankfurt—practically controlled the world's metal markets, and the organisation named had interests in undertakings in the United Kingdom and other parts of the Empire, as well as in the United States. The ramifications of these interests were very complex, and, therefore, not easy to be controlled Their ascendancy was, however, beyond question, as was proved by the Lead Convention which they established, giving them the control of the lead trade of the world. And the Bill is essential because it will prevent any such ascendancy in the future, and will ensure to the Empire the control of its own raw materials.

***

I learn that underwriting arrangements were in progress on Wednesday in connection with the new issue of £1,000,000 of preference shares by the Anglo-Persian Oil Company. It is understood that the price of issue will be 22s. 6d. per share.

***

Judging from the little information that is available, conditions in Bulgaria just now are far from pleasant for the masses of the population. The shortage of supplies and other factors have sent the cost of living up by leaps and bounds, and the resources of the public are now severely strained by the purchase of the bare necessities of life. In general it may be said that the war has only benefited a very limited clique in the country, and while a few men have amassed fortunes by means of army contracts and profiteering the struggle has spelt misery for the bulk of the inhabitants. It is to be hoped that this process will be accentuated, for the greater the effect of the economic pressure the sooner Bulgaria is likely to discover that she came in on the wrong side.

***

The current issue of the *Chamber of Commerce Journal* contains some striking criticisms of Government control and restriction of trade. It is urged that the merchant community, in particular, has been singled out for exceptional treatment, which has had the effect of seriously diminishing supplies. According to recent official returns there are now, it is pointed out, more than 10,000 controlled firms, and the control system, it is maintained, has operated in the direction of seriously reducing the activities of importing merchants. Leaving out of the question the necessity of extending emergency legislation for a brief period after the war, the idea of having the present system of control for three years is described as "a severe shock" to those who hope for the extension of British trade and industry.

Cyprus Trade in 1916-17.

Prosperity of the Island.

The year 1915-16 was one of marked prosperity for Cyprus, and it is gratifying to learn from the recently-published White Paper containing the annual report on the Blue Book for 1916-17 that the past year has also been an excellent one for the island. While the war has had detrimental effects in various countries, in Cyprus its influence has undoubtedly been beneficial. This has been principally due to the fact that Cyprus is in a position to export a considerable amount of surplus produce, and war conditions have made it an easy matter to dispose of this on satisfactory terms. Carobs, raisins, potatoes, mules, and donkeys have found ready purchasers in Egypt and elsewhere. The position is, perhaps, best summed up in the words of the report, that it is probably true to say that at no time for many hundreds of years has there been so great a demand as at present for the various products of Cyprus. The resultant prosperity is reflected in the revenue return, which, allowing for unsold tithe grain, is again the highest on record. It has also been reflected in a variety of other ways. Vine growers, for instance, are now freeing themselves from debt, and are devoting their new capital to the work of development; market gardeners, who have been similarly affected, are increasing the area of cultivation; and in general it is true to say that the economic life of the island is on the up grade. Whether this prosperity will survive the war is another question, and one into which we need not enter. It must suffice to say that at the moment Cyprus presents a most pleasant picture of progress.

Finance.

The local revenue was £332,584, as against £363,692 in 1915-16, and £290,110 in 1914-15. To this has to be added the Imperial grant in aid of £50,000, making the total revenue £382,584. On the other side, local expenditure came to £318,378, which is increased by the Island's share of the Turkish debt charge to £411,177, leaving a deficit on the year of £28,593. That would appear an unfavourable result, but it is only nominally so, for tithe grain to the value of £70,000, which had not been disposed of, is not included in the revenue account. Allowing for that sum, the total revenue for the year instead of being £31,108 below that of 1915-16 shows an increase of £38,892. The financial situation in general must be regarded as very satisfactory, especially as eleven out of the nineteen sources of revenue showed an increase over the previous figures.

Imports and Exports.

The value of imports in the period under review was £967,780, as against £588,019 in 1915-16, and £496,744 in 1914-15. The increase on the previous year was, therefore, no less than £379,761, as against an increase in 1915-16 of £91,275. The imports were composed of raw materials, £79,093; live animals, food, drink, and narcotics, £412,077; and manufactured articles, £476,610. As in the case of the Sudan, the trade was mainly with the Empire. Thus the United Kingdom and other parts of the Empire were responsible for imports to the value of £817,497, or 84.5 per cent. of the total. Greece comes next with £59,405, or 6. per cent., then Italy, with £29,604, or 3 per cent., and France with £15,831, or 1.6 per cent.; while the imports from all other countries amounted to £45,443.

The export trade also showed an increase, though not on such a remarkable scale—being £708,446, as against £650,490 in 1915-16, an increase of £57,956. The exports were composed of live animals, food, drink, and narcotics, £563,982; raw materials, £115,578; and manufactured articles, £28,886. Of these exports the United Kingdom's share was £163,988, while other parts of the Empire took goods to the value of £352,212. The balance was distributed as follows:—Greece, £85,906; France, £71,265; Italy, £12,854; United States, £9,467; Roumania, £15; and other countries, £12,739.

Industries.

The opinion is expressed in the report that there are indications that after the war the mining industry may regain some of the importance which it possessed in classical times. In this connection it may be recalled that reference was made last year to the considerable amount of prospecting and development that was then in progress. The Cyprian Mining Company's asbestos mine at Amiantos was worked throughout the year, and its output was a record one. The exports from this mine were 25,812 cwts., valued at £14,681, the figures for the previous year being 21,979 cwts., valued at £9,509. Men were employed at the mine for a total of 75,145 days, and women for a total of 26,123 days. Much work was also done at the Skouriotissa copper mine by the Cyprus Mines Corporation, but it is stated that the difficulty in obtaining freight made it necessary to defer the exportation of ore, and retarded the completion of the corporation's railway and pier works at Karavostasi. So far 2,500 feet of tunnel, crosscuts, and drifts have been bored, and 2,014 tons of ore extracted. During the year men were employed by the corporation for a total of 29,007 days, women for 10,021 days, and boys for 4,755 days. Fifteen tons of magnesite were extracted from the Akamas mine of the Cyprus Development Company, and were exported to the United Kingdom. Finally, 4,702 tons of terra umbra, to the value of £7,821, were exported during the year, as against 3,890 tons valued at £4,991 exported in the previous year. The quantity of gypsum exported amounted to 3,147 tons, valued at £1,814.

The past year was a good one for the wine industry; 1,230,400 gallons of ordinary Cyprus wines, valued at £78,932, were exported chiefly to Egypt, and exports of the heavy dessert wine, known as "vin de Chypre," amounted to 12,042 gallons, valued at £1,233. Exports of vinegar came to 162,739 gallons, valued at £3,049, and of spirit to 43,638 gallons, valued at £6,865. Other exports of home produce and manufactures included cigarettes, cordage and twine, cotton and woollen manufactures, and sumac leaves.

There was no sponge fishing in Cyprus waters in the year under review, but exports of the previous catch amounted to 1,138 okes valued at £2,590.

Communications.

The report states that the length of railway lines open for traffic during the year was 76 miles, and the length of lines maintained 81 miles. The work on the branch lines from the copper mine at Skouriotissa to the main line and thence to the sea near Karavostasi was continued until April, 1916, when the earthwork and masonry were completed. Since then the work has been at a standstill owing to the difficulty of obtaining materials and rolling-stock. The gross earnings of the railway in 1916-17 amounted to £19,914, and the expenses to £16,608, giving a profit of £3,306, as against a surplus of £1,919 in 1915-16, and of £1,617 in 1914-15. Train services, it is added, have been reduced as far as possible owing to the rise in the price of fuel.

Other features in the report will be dealt with in a subsequent issue.

TRADING WITH THE ENEMY.

The Controller of the Foreign Trade Department has issued a new list of additions to the Statutory list of firms of enemy nationality or enemy association with whom persons in the United Kingdom are forbidden to trade. Copies of this list can be obtained at a trifling cost from the Superintendent of Publications, H.M. Stationery Office, Imperial House, Kingsway, W.C.

ROUMANIA'S OIL FIELDS.

German Exploitation.

Judging by the comments of a writer in the *Rheinisch-Westfalische Zeitung*, there seems to be considerable dissatisfaction in Germany that it has not been possible to make more use of the Roumanian oilfields. The writer roundly declares that Germany does not seem to be any better off as far as the supply of oil for domestic use is concerned for having captured the Roumanian fields, and says that the shortage of petroleum is as serious as ever.

According to the latest estimates, there are some 700,000 tons of petroleum and its various products available for use in Roumania at the present time—roughly, the equivalent of four and a-half months' production in peace time. The Germans have now occupied the fields for about twelve months, and, in view of the remarkable thoroughness with which the British Military Mission carried out the work of destruction of the oil wells and refineries, this result can hardly be held to justify the comments of the German critic. That the enemy hopes that the production will be increased still further is indicated by the fact that there is talk of the construction of a pipe-line from Ploesti via Predeal, Kisuyszallass and Kiskernye, to Oderberg. This line, which would cost something like 15,000,000 marks, would, it is estimated, reduce the cost of transportation from its present cost of 2,100 marks per 10 tons to 50 marks. It is, however, extremely unlikely that the Germans will be able to undertake this ambitious project during the war.

NEWS FROM ALL SOURCES.

Estimates of the Egyptian crops show that all cereal crops are excellent. Rice is 23 per cent. and ground nuts 15 per cent. above the normal.

Of the loan to Greece from the Entente, it has been decided to devote, besides the sums destined for the Army, 100,000,000 drachmai (about £4,000,000) to needs of national economy, and an equal amount to road-building.

Mr. H. W. Lander, of Alexandria, has been appointed to the post of Manager of the Salonica Cigarette Company at Alexandria.

Sir Edward Hain, Chairman of the Hain Steamship Company and of Edward Hain and Sons, St. Ives and Cardiff, left a fortune of £630,000.

The Government of India commenced the issue of one-rupee currency notes in Calcutta, Madras, and Bombay on December 1, and will, it is understood, follow shortly with two and a-half rupee notes.

RICHES OF BURMA.

Under Government auspices, the minerals of Burma—or, at least, those specially valuable for war purposes—are now being vigorously worked. After the war the development of these and of Burma's minerals generally will, the British Empire Producers' Organisation understands, be still more vigorously undertaken. The country has, in fact, enormous mineral riches, but prospectors are badly wanted, and large tracts of country are still unexplored. On the agricultural side, too, developments may be expected. An expert from the Federated Malay States has recently been examining the Tavoy area with regard to cinchona cultivation on a large scale. Cinchona, the source of quinine, is already being grown to some extent in Burma, but the present scheme is for the cultivation of 60,000 acres. Throughout the British East the lead obtained by the Dutch with their extensive cinchona plantations in Java will certainly be challenged in the future. The prolific bamboo forests are another as yet but partially exploited source of wealth in Burma, the great economic importance of which has certainly not been adequately recognised hitherto. For this lack of vision the administration of Burma as a mere province of India itself an actual unit of Empire is probably to a certain extent responsible.

TIMBER PRODUCTION NEAR TREBIZOND.

Erection of Saw Mill.

Plans have been made for and work has already been started on the construction of a sawmill at Surmeneh, a small town on the Karadere River, twenty miles from Trebizond, says the United States Consul at Trebizond, Mr. W. L. Jenkin, in a report dated August last. The enterprise is being carried on under the direction of Signor Valatzi, an Italian, to whom a concession was granted by the former Russian authorities, and later ratified by the present Provisional Government, to cut down the timber on both sides of the Karadere River for a distance of eighty versts inland. The concession provides that by the end of the present calendar year 40,000 trunks must be sawed and delivered to the Voenni Stroitelvstvo (Army Construction Management) at a stated price. Any surplus may be sold to private purchasers. Although it is not anticipated that sawing operations can be commenced before November, the trees are being cut down and the bark removed while the sap is still in the trunks. About 400 workmen are employed at present. It is estimated that approximately 200,000 trunks can be cut and sawed yearly. Three trunks are said to be required for one cubic meter of sawn timber. The wood is mostly pine and beech. The machinery is being brought from Russia proper, but is not of Russian manufacture, having been imported there before the war from either England or Germany.

The Indo-British Association, which was inaugurated at a recent meeting at Cannon Street Hotel, has opened offices at 2 and 3, Norfolk Street, Strand, W.C. 2, and all interested in Indian affairs can obtain particulars of membership of the association on application to that address.

LANCASHIRE COTTON.

Demand for Piece Goods for Egypt

(From Our Own Correspondent.)

Manchester, Wednesday.

The tone of the market has continued quieter. Prices have advanced, but comparatively few buyers have been prepared to follow, and progress has been checked. The wages question has been settled for six months. The trades unions officials have accepted an advance of 15 per cent. on condition that the payments to unemployed workpeople continue on the same level as during the last three months. The Cotton Control Board has reduced by 50 per cent. the levies upon spinners and manufacturers who work more than 60 per cent. of their machinery. Recent healthy reports relating to the Egyptian cotton crop have been confirmed, and there is every probability of an output of nearly 6,500,000 cantars. Egyptian yarns have attracted rather less attention, but prices have again gone against buyers. In piece goods for Egypt a fair amount of inquiry has come through, but the turnover has been smaller than in recent previous weeks. It is understood that arrangements are being made for sending goods to Greece through Alexandria. India has bought fair lots of grey shirtings, chiefly for Bombay. Only retail sales have been put through for China. Not much has been done for South America. American yarns are again dearer on the week, and supplies of most counts and qualities are very scarce. Fresh buying has been on smaller lines. Bundles for India have not attracted much attention, but the undercurrent of demand for France keeps up well.

The *Norddeutsche Allgemeine Zeitung* states that during the year ended September 30 last nearly 400,000 prosecutions were undertaken for infringements of the food regulations in Prussia.

COTTON SPINNING IN 1917.

Big Profits.

Mr. Frederick W. Tattersall, of Manchester, has prepared an analysis of the stocktaking results of Lancashire cotton spinning companies for the twelve months ended November 30, 1917. Particulars are given of fifty concerns, and it is of interest to note that all the companies have made a profit. The total paid-up share capital of the fifty companies amounts to £1,885,347, with a loan capital of £1,067,387. The total profit of all the mills, after paying interest on loans and allowing for depreciation, amounts to £254,236, being an average profit per company of £5,085, as compared with £4,034 per company in the previous year. The profit on share capital works out at 13.48 per cent. per annum, as compared with 11.22 per cent. per annum in 1916. The profit on share and loan capital combined is 8.61 per cent. per annum, against 7.30 per cent. per annum in the previous year. The present total value of machinery and plant of the fifty mills amounts to £2,108,273. The spindles in the factories total 4,578,147. The experience of spinners during the past year has been better than in any twelve months since the beginning of the war, and the trade position at the moment is more profitable than for many years back. It is expected that the stocktaking results to be announced at the end of this month will show very big gains.

A statement was issued by the India Office on Tuesday night showing the form in which the balance of the gold standard reserve was held on November 30:—In India, nil; in England, cash placed by the Secretary of State for India in Council at short notice, £6,000,521; British and Colonial Government securities (value as on September 30), £21,965,653; British Government securities since purchased (cost price), £5,657,068; total, £33,623,242.

ENGINEERING NOTES

Engineering Prospects in China.

Now that British engineering firms are realising the importance of early organisation for the forthcoming trade struggle, any reliable information concerning their line of business in foreign markets is, of course, of much interest to them, especially when such information refers to markets presenting special features of attraction like Egypt and China. In an address before the Engineers' Club in Manchester, Mr. S. W. McGregor, referring to the commercial aspect of engineering in China, asserted that the future of that country's engineering is linked up much more largely than is generally supposed with the development of its railways and mineral resources. The Chinese Government at the present time are considering the standardisation of the railway lines, and many thousands of miles are ripe for construction. The mineral resources of China, Mr. McGregor says, are enormous, but, with few exceptions, they are practically unworked. How immense a field exists for the investment of capital in the exploiting of China's undeveloped minerals it is easy to imagine, as well as the splendid business in machinery which must follow this development. At present a considerable proportion of China's trade in engineering and machinery products is in the hands of American and Japanese firms, although before the war Great Britain did 30 per cent. of China's business in engineering and metal requisites, Germany coming second with 23 per cent., Japan third with 21 per cent., and Belgium fourth with 11 per cent.

Egypt as a Market.

With regard to Egypt as a market, it is reassuring to find that prosperity continues to mark our operations in that country. War or no war, the Egyptian Administration are determined to make the country prosperous, and they are meeting with continuous encouragement. One very striking indication of this is afforded by the excellent results which are attending the working of the Sudan Railways. According to the report for 1916, although the expenditure advanced from £E382,204 in 1915 to £E522,204, the Administration was enabled to earn a gross revenue of £E824,957, in comparison with £E592,683 in 1915. These figures are exclusive of repairs, which on some sections are badly needed; but there is no question that if the Sudan Railway were permitted to control their affairs as a separate department, instead of being included in the whole of the revenues of Egypt, the income would have been sufficient last year to provide at least the greater part of the money for the necessary re-equipment.

Motor Cars in Morocco.

According to the *Exportateur Français*, there are great possibilities in the motor-car market in Morocco, and this journal suggests the following as essential points in regard to the type of motor-car required for that country:—1. It should have an exceptionally strongly-built chassis, with clearance of 12 ins. 2. The body should be strongly built and as simple as possible. 3. The diameter of the wheels should not be more than 35 ins. 4. It must be obtainable at a reasonable price.

American Motor Cars in India.

From time to time we have pointed out in these columns the systematic activity of the American engineering firms in the Near and Far East, and the surprising results they have achieved in those markets. From Southern Russia to Asia Minor, from Persia to India, from Egypt to Japan, the expert American traveller and the convincing style of American advertising have done wonders from a business point of view during the last ten years. Of course, the war, which has driven the Germans out of those markets, has given the Americans a good opportunity of increasing their connections in the Eastern markets. However, after the war there will be plenty of business for both British and Americans in the East, if the Germans are kept out of it. A noteworthy proof of American energy in India is the large increase in the import of motor-cars from the United States, and the decrease in the imports from the United Kingdom. In a review of the trade of India in 1916-17 by the Department of Statistics it is shown that the number of motor-cars imported since the pre-war year 1913-14 were:—

	From the United Kingdom.	America.	Other countries.
1913-14 ..	1,669 ..	868 ..	343
1914-15 ..	1,350 ..	510 ..	145
1915-16 ..	787 ..	2,136 ..	198
1916-17 ..	489 ..	4,169 ..	120

The total imports increased in value to Rs. 1,54 lakhs from Rs.94 lakhs in the preceding year. Of this increase Rs.10 lakhs were accounted for by higher prices and Rs. 50 lakhs were due to an increase in the volume of the trade. The imports from the United States were valued at over Rs.1,22 lakhs and those from the United Kingdom at approximately Rs. 25 lakhs. The average declared value (*i.e.*, excluding duty) of British cars was Rs. 5,004 and of American cars Rs. 2,935 as against Rs. 4,133 and Rs. 2,440, respectively, in the preceding year. The comparative cheapness of the American car is striking, and this fact should be borne in mind by the British manufacturers in the forthcoming trade struggle. Orientals have always shown a marked preference for British made goods, but also a natural weakness for cheapness and bargains, and a good appearance often induces them to overlook solidity. It is a point that helped German methods.

Rubber Substitute.

The scarcity of rubber has apparently been got over in some way in Germany by the production of substitutes, which seem to be very suitable for certain purposes. According to a German paper, a good deal of attention is being paid at the moment to various forms of animal plant and mineral substances for the manufacture of tyres. In place of rubber, flax and hemp are being used. These are soaked in rubber, paraffin wax, or celluloid. Tyres are also made of a series of layers of calico steeped in rubber, or of strips of leather specially treated. In place of plant fibres, mineral substances are also in use. For instance, asbestos, which is mixed at a certain heat with balata rubber. It is also stated that air tubes for tyres are being made in Switzerland from Japanese silk paper soaked in a form of wax

COMPANY MEETINGS.

P. AND O.

The Government and the Shipping Industry.

The seventieth ordinary general meeting of the proprietors of the Peninsular and Oriental Steam Navigation Company was held on Wednesday at the offices, Leadenhall Street, under the presidency of the Right. Hon. Lord Inchcape, G.C.M.G., K.C.S.I., K.C.I.E., the chairman of the company.

The Secretary (Mr. Frederick John Abbott) having read the notice convening the meeting,

The Chairman said:—Ladies and gentlemen, in submitting our accounts and report for the past year, which I presume, as usual, you will take as read, as they have been in your hands for the past ten days, I am afraid part of what I have to say will not be very comforting to the shareholders. In the first place, I must express our deep regret at the loss we have sustained in the death of our colleague, Sir William Adamson, who had been a member of the board of the P. and O. Company for twenty-four years. Sir William's ripe experience and sound judgment had always been placed at the service of the company, while his unfailing courtesy and kindly disposition endeared him to all his colleagues. We have, I regret to say, also lost a young colleague, who joined us within the last three years, Mr. William Mackinnon. He had been serving in the Army since the outbreak of the war, and was killed in France six months ago while leading his company into action.

THE GOVERNMENT AND THE SHIPOWNERS.

When the war broke out the Government and the shipowners met together, and it was agreed that all ships required by the State for naval and military purposes should be chartered to Government at practically pre-war rates, and what is known as the Blue Book was framed accordingly. The vessels not required for Government service were left free to prosecute their ordinary work. This went on till the beginning of 1917. Tonnage was diminished by War Office and Admiralty requirements and by war losses, and freights rose in consequence—not by the action of the owners, but by the law of supply and demand. Then the Government went further, and suggested that they should also charter all the free steamers, and that the owners should work these ships on Government account, taking only the Blue Book rates of hire and handing over their surplus earnings to the Government, the idea being that tonnage would be saved through not being employed promiscuously. The suggestion was adopted by the shipowners, and the arrangement has gone on now for the past eight or ten months.

GRANT & CHINN,

The British Sanitary Engineers of Egypt and the Sudan,

CAIRO and ALEXANDRIA.

The fixing of rates of freight is no longer in the owners' hands—it is in the hands of the Ministry of Shippings, and the owners, at any rate, have the satisfaction of knowing that they are making nothing out of the war.

Recent Acquisitions.

At an extraordinary general meeting of the company held on June 27 last, it was decided to purchase the Union Steamship Company of New Zealand, with its fine fleet of seventy-four steamers, with a tonnage of 237,860 tons. This transaction went through without a hitch, and the company is now proprietor of 99 per cent. of the shares of the Union Company. No doubt, the remaining 1 per cent. will come in before long. A few weeks ago we had the opportunity of acquiring the Hain Steamship Company, which came into the market owing to the death of Sir Edward Hain. The fleet consists of some twenty-seven well-built cargo steamers, twenty-three of which are in commission and four under construction, the gross tonnage being 108,787 tons. The price paid for the shares of the company was a high one, but carried with it certain assets in addition to the ships, and while the shareholders in the Hain Steamship Company have realised their shares at a very satisfactory price to themselves, we hope that we, too, may have no reason to be dissatisfied with the terms of the purchase. We have also acquired within the last few weeks a small company known as the Nourse Line, which owns six modern high-class steamers of good speed, with a gross tonnage of 23,496 tons. These vessels are well adapted for trade in the tropics, where they have hitherto been employed. Four of the ships are of an average age of nine years, and two are completely new vessels. The price paid for this company was a moderate one, looking at the present and prospective cost of steamers, and we believe this transaction will also prove a satisfactory one for the P. and O. shareholders. A considerable proportion of the steamers we have lost have been of the cargo type, and the acquisition of the Hain and Nourse steamers, with a tonnage of 132,283, will be of material assistance in filling the blanks.

The value of the vessels we have lost has to a certain extent been recovered, but it would be impossible to replace them for their insured values, even if we were at liberty to build new ships, which we are not, the yards being occupied by what are known as standard ships for the Government. Owners are precluded from replenishing their fleets which have been denuded by enemy action. After the war, however, the individual effort which has built up the merchant service of this country, if left unfettered, will be equal to the occasion, and our mercantile marine will rapidly secure again the foremost place in the world.

Shipping after the War.

Attempts have been made to get some declaration of policy from the Government as to their attitude to shipping after the war. This is only natural, in view of the fact that Government has embarked in the building of merchant ships. We are frequently assured that there is no intention of nationalising shipping, but, so far, no official pronouncement has been made. The nearest approach to this is a remark recently made by the Chancellor of the Exchequer, that the amount now being invested in standard ships will come back to the Treasury after the war when the ships are sold.

We constantly hear eulogies passed on the services which the mercantile marine has rendered to the country during this war. We see it reported that Germany and other countries are to help shipowners to rebuild their fleets, and at the same time we observe a disposition on the part of a certain section in this country, notwithstanding all that shipowners, by their enterprise and energy, have done for the nation, to wrest their business from them and to work the shipping industry as a national affair. No wonder there is considerable unrest on the part of owners. No wonder fleets are being sold. The wonder is that anyone can be found to have the courage to buy them! Possibly we have been foolish in laying out your surplus funds in adding to your fleet. Possibly it might have been wiser to distribute the amounts realised for the ships that have been lost and to wind up the business. Against private competitors we can hold our own, but against a State-owned concern that is not possible, and if the organisations and the business which private individuals have built up by years of work are to be filched from them by the State, there is an end to all security of property. (Hear, hear.) I may be wrong, but I am sanguine enough to hope that no Government will be so ill-advised as to kill the shipowning industry of the British Empire and to try to work it as a Government concern; and I go further than this, and I say if they attempt to interfere with it or to control it while they cannot control that of other countries they will land it in ruin. (Hear, hear.) We seek for no Government assistance, we ask for no contribution from the taxpayer beyond a fair remuneration for services rendered in the carrying of mails, but we want no Government interference with our business when the Defence of the Realm Act is no longer necessary. (Cheers.)

Suppose shipping were nationalised, naturally all the other industries of the country would follow. It would be against all recognised public policy to make a profit out of industries conducted by the State, the revenue from income-tax would disappear, we should be living on each other. I make bold to say that the 5 per cent. Loan, which now stands in the neighbourhood of 93, would be nearer 50, and repudiation would be on the horizon. If nationalisation is proceeded with, Government will have to buy up the P. and O. and its allied concerns, and we shall have to seek an outlet for our capital and activities in some other field. If and when that occurs, there will not be much room for private enterprise in this country, Government officials will have swallowed everything, and will be suffering from an attack of indigestion! (Laughter.)

I am glad to say that the relations between ourselves and labour have continued to be perfectly friendly.

Pre-War Orders for New Vessels.

You will doubtless remember that some three years ago, just before the war broke out, we had ordered two new mail vessels. The construction of these was stopped by Government requirements, and they will not be delivered for another six months. In the meantime their character has been changed, as we were only allowed to proceed with their construction on condition that their passenger accommodation was left out in the meantime and that they were finished as cargo vessels. Other two refrigerated ships which we had contracted for have been placed on one side under Government orders to make way for standard ships, and a fifth vessel which we arranged for a year ago has not yet been begun.

I would take this opportunity of thanking the staffs and agents of the P. and O. and British India Companies ashore for their loyal and efficient co-operation during the year, and would reiterate what has been said in the report as to the splendid services which have been rendered by all our men afloat in very trying conditions. No words can express what the country owes to our merchant seamen for their services to the nation during this war. (Hear, hear.)

Accounts.

Turning to the accounts they are submitted in the simple form which you were good enough to approve a year ago. The result of the year's operations justifies the directors in proposing to the shareholders the same distribution as in the two previous years. I am afraid the accounts for 1917-18 will not be as good as they were in the years which preceded the war, but in existing circumstances we must submit to sacrifices. If we succeed in the current year in covering expenses, in providing for depreciation and contingencies, and in again having a balance sufficient without encroaching on our reserves to give the shareholders the proposed modest dividend on the large amount of capital actually employed in the business, we shall be thankful. Meantime, the cash resources of the P. and O. Company and its allies, which in ordinary course would have been put into new ships, have been lent to the Government to help to finance the war. These resources will be available to pay for new tonnage when we are permitted to build new ships. If it should be evident that such a time is never to come again, and that it is the intention to wipe out private enterprise and to turn the British Mercantile Marine into a State Department managed by officials tied up with red tape, then we shall distribute our rescources among our shareholders, after making proper provision for our employees, make our bow, and let the curtain fall on what has hitherto been the supremacy of British mercantile shipping on the seven seas. (Hear, hear.) I will now propose: "That the accounts and report be adopted," and will ask Mr. Rathbone to second the resolution. but before putting it to the stockholders I shall be glad to answer any questions which they may desire to put forward.

Mr. William Gair Rathbone,—I have the pleasure of seconding the resolution.

The Chairman then proposed "That a dividend for the half-year ended September 30 last of 2½ per cent. on the Preferred stock, less income-tax, and a dividend of 6 per cent., with a bonus of 6 per cent., on the Deferred

stock, free of income-tax, as recommended in the report, be now declared, and that payment of the same be made on and after the 18th inst."

Mr. Herbert Brooks.—I have very much pleasure in seconding the resolution.

The motion was carried unanimously.

The Chairman.—I now beg to propose "That Henry Neville Gladstone, Esq., be re-elected a director of this company."

Sir Montagu Cornish Turner.—I have much pleasure in seconding that.

The resolution was carried unanimously.

The Chairman.—I have also to propose "That Sir Walter Roper Lawrence, Bt., G.C.I.E., be re-elected a director of this company."

Mr. Ernest Haliburton Cunard.—I have much pleasure in seconding that resolution.

The motion was carried unanimously.

The meeting concluded with a vote of thanks to the chairman, the directors, and the staff of the P. and O., and its allied companies, moved by Mr. Thomas Dence, and seconded by Mr. Arthur Pitt, and carried unanimously.

BENGAL-NAGPUR RAILWAY CO., LTD.

The fifty-ninth ordinary general meeting of the stockholders was held on December 6 at the company's offices, Gresham House, Old Broad Street, Mr. Robert Miller (the chairman) presiding.

Sir T. R. Wynne, K.C.S.I., K.C.I.E., (managing director), read the notice convening the meeting and the auditors' report.

The chairman, in dealing with the accounts for the financial year ended March 31 last, said that the capital expenditure for that period amounted only to £214,500, and was incurred mainly on rolling stock ordered before the war, on improvements on the main line to facilitate traffic, on expenditure on the company's colliery at Bokharo, and on the purchase of the Tumsar Road-Tirodi Manganese Tramway. There was no capital expenditure on the construction of new lines. With regard to revenue, he stated that the net earnings increased from Rs.2,26,20,000 for the year ended March, 1916, to Rs.2,65,92,000 for the year ended March, 1917. The working expenses fell from 49.01 per cent. to 48.10 per cent. Passenger traffic showed an increase in receipts of about 8¼ lakhs, and goods traffic an increase of Rs.60 lakhs. The surplus revenue of the railway amounted to £723,612, of which the share of the company was £101,257 for the twelve months ended March 31, 1917, as compared with £68,910 for the previous corresponding period, and the share taken by the Government was £617,265, as compared with £415,358. These were very satisfactory figures, earned under conditions entirely different from those before the war.

Industrial Development in India.

There was no doubt that the war had created a great deal of traffic on the line which was of a temporary character, and when peace was declared this traffic would cease. At the same time, the normal conditions of trade had been revolutionised by the state of war. New markets had been opened for the productions of India, and the seeds of new industries hitherto strange to India had been sown which, when peace was restored in the world would, the board believed, bear fruit in adding to the productive wealth of the country and to the traffic of its railways, in which this undertaking would share. They tapped what was substantially a virgin territory. In fact, the war had developed, in his opinion, a new spirit of enterprise and adventure in what might be termed the steady old-fashioned business ways of India, and the result must be that when the war ended the railway would find that a large new traffic, which would be permanent, had been created. Another factor which would create new traffic for the railway was the diversion of traffic from the sea-coasting routes to destinations also on a railway route. In his opinion, the effect of the war on this railway would be to the good, and there was no need to fear that when it ended their present earnings would be seriously affected.

With regard to the condition of the railway, expenditure on this account was divisible under two very distinct heads. The first was the maintenance and the second was the improvement of the undertaking. These two distinct operations must not be confused together under the single head of "renewals." As regarded this railway, it had been well maintained up to date, and the last report by the Government inspector confirmed this view. In regard to improvements, viz., relaying with heavy rails and sleepers, construction of traffic facilities to meet increased traffic, new marshalling yards, new crossing stations, new staff quarters, extension of workshops—such works had necessarily been restricted to narrow limits for want of sufficient supplies from home of stores required for their construction. Such works of improvement were mainly chargeable to capital, and, as in previous years, it had been possible to met the revenue share of such expenditure and yet work at a reasonable percentage of gross receipts, he did not anticipate that their working expenses would increase very largely, though they would probably do so to some extent when the war ended. With the permanent growth of traffic which, he thought, the war would leave, they should be able to afford a good deall from revenue without entailing an undue burden on it for any year. As to capital expenditure, he remarked that for some years great caution must govern them, as the interest on all capital raised in the future would certainly be much higher than in the past, and if there was any danger of net receipts being affected, as would be most likely from the direction of high interest on capital for works which the railway must carry out to meet its public obligations.

The Vizagapatam Harbour.

The negotiations which had been in hand for the last three or four years for this railway to construct a harbour and docks at Vizagapatam had been successfully concluded, and the formal agreement with the Secretary of State was now in course of preparation. The harbour and docks would be constructed and worked by the Bengal-Nagpur Railway, and the port had every prospect of ranking equally with the other large ports of India, and would most certainly be a large factor in developing traffic on this railway. They had many projects incubating, waiting only for hostilities to cease to spring into existence. Great developments were taking place in the Tata Iron and Steel Company's works situated on this railway. The steel plant was being largely increased and other plant was to be erected which would induce the creation of other local industries, whose wants the steel company would later be able to cater for. In fact, the whole valley from Sini to Khargpur bade fair to be the site of an industrial development which would be of advantage to the railway.

After a tribute to the work of the staff, a large number of whom are engaged on military service, the Chairman said that it was proposed to pay a final dividend of ¾ per cent. and a bonus of 2 per cent., the dividend being the same but the bonus ½ per cent. higher than last year, leaving about £194,000 to be carried forward. In conclusion he moved the adoption of the report and accounts.

Mr. A. Brereton, C.S.I., seconded the resolution, which was carried, and the dividend and bonus, as recommended, being in addition to the guaranteed interest, were also agreed to.

MADRAS AND SOUTHERN MAHRATTA RLWY. CO., LTD.

The sixty-sixth ordinary general meeting was held on Wednesday at the offices, 25, Buckingham Palace Road, London, Colonel W. V. Constable, R.E., chairman of the company, presiding.

The Acting Secretary (Mr. P. A. Cory) having read the notice convening the meeting and the certificate of the auditors,

The Chairman, in moving the adoption of the report, said that the revenue account showed the company's share of the divisible surplus net earnings for the company's and State lines for the year 1916-17, and also for the Mysore State lines. The former, less Indian income-tax, amounted to Rs.34,04,857, realising £230,093 17s. 1d., while the latter came to Rs.90,018, realising £6,070 9s. 1d. These sums added together made the company's share of the surplus profits for the whole year £236,164 6s. 2d., an increase of £56,875 14s. 5d., compared with the amount received for the year 1915-16. The return for the year was equal to £4 14s. 6d. in excess of the guaranteed minimum of £3 10s. per cent. per annum, giving a total of £8 4s. 6d. per cent. on the company's capital of £5,000,000. It had been necessary on this special occasion to pay three dividends all out of one year's profits, so that in future they could pay an interim dividend in July and the final one in January. The total of these three dividends came to £175,000, leaving a balance of £61,164.

Inflated Surplus Profits.

The surplus profits, to a great extent, had been inflated because of abnormal restrictions of expenditure. Stockholders must be prepared for very heavy increased cost of working, although the board hoped, with the help of the reserve fund, if necessary, to maintain a steady 6 per cent. dividend. During the war all capital and revenue expenditure, other than that required for maintaining the railway in working order, had been deferred, with the result that working expenses were abnormally low and net earnings in consequence very high. The arrears would have

to be dealt with when more favourable conditions obtained. In the report the board referred to the liability for Indian super-tax and English excess profits duty. It had not yet been possible to ascertain the amount of these liabilities, and nothing had been paid on this account. In calculating the Indian super-tax they had to deduct the amount paid or to be paid for dividends as well as for any English excess profits duty, and the latter could not be ascertained until they could come to an agreement with the Surveyor of Taxes as to the amount to be allowed for deferred renewals. It was not only necessary to compare the actual expenditure with the average expenditure in the pre-war years, but they had to claim for an increase in the allowance in ratio of the increase in the capital value of the renewable assets as compared with the average capital value of such assets in the pre-war years; or, in other words, they must claim for the enhanced cost of all material, etc., a somewhat difficult task with prices continually on the increase. A peculiar point was that they would not tell the amount of the Indian super-tax until they ascertained the amount of the excess profits duty, and they could not determine what the excess profits were until they had ascertained the amount of Indian super-tax. These difficulties would, no doubt, be overcome in time. Indian railway companies at the present time suffered more perhaps than many other undertakings in regard to taxation. Taking surplus profits of the company's and State lines only, first they were charged one anna in the rupee, or one-sixteenth of their profits, for Indian income-tax. Then there was a graduated Indian super-tax on undistributed profits ranging from one anna to three annas in the rupee. What was left of the profits came home and was charged 3s. 9d. in the pound for English income-tax, i.e., 5s. in the pound less 1s. 3d. recoverable under Clause 43 of the Finance Act, 1916; and then they got a further charge of 80 per cent. for English excess profits duty. The excess profits duty might cease when peace came, but the super-tax would remain for some years after the end of the war. Whilst the excess profits tax was justifiable on every ground, the Indian super-tax could not be so described in relation to Indian railways. It was a prudent measure for railway administrations not to divide their profits earned up to the hilt, when heavy expenditure on account of deferred renewals was inevitable in the future, and it seemed, therefore, anomalous to handiap such efforts by the imposition of a super-tax on undistributed profits set apart for such purposes.

LAST HALF-YEAR'S WORKING.

The accounts for the half-year ended September 30, 1917, showed for the company's and State lines an increase of nearly 29 lakhs in gross earnings and five lakhs in working expenses over the corresponding period of 1916-17, with the result that the net earnings had grown by nearly 24 lakhs. The company's share of the company's and State lines and the Mysore State lines together gave a total of Rs.24.77 lakhs, or, at 1s. 5d. per rupee, £3 10s. 2d. on the capital of £5,000,000. The percentage of working expenses to gross earnings for the first half of 1917-18 was only 46.27 compared with 56.50, the average for the six pre-war years. These results might be considered as quite abnormal.

Mr. J. O'Connell seconded the resolution, which was adopted unanimously.

On the motion of the Chairman, seconded by Mr. L. R. Windham Forrest, a resolution was passed to pay a dividend of 25s. per cent., in addition to the guaranteed interest of 35s. per cent. to be received from the Government, for the half-year ending the 31st inst.

ON 'CHANGE.

(FROM OUR OWN CORRESPONDENT.)

THROGMORTON AVENUE, Wednesday.

There has been a great deal of activity again this week in the market for Egyptian land shares, and a large business has been transacted, at generally speaking a further improvement in values. The bulk of the demand has emanated from Egypt, and continues to be based upon the large sums of money seeking investment in consequence of the very great prosperity over there.

In Government stocks there has been no alteration in prices, but there are a good many unsatisfied buyers at the present level, as sellers continue very scarce. In Bank shares Agriculturals, after weakening to 6 1-16, closed unchanged at 6⅛. Anglo-Egyptians were ⅛ up at 14⅛. There has been some quiet buying of Delta Light Railway Prefs. round 6 3-16, and these shares appear an exceedingly attractive lock-up purchase at the present time.

Amongst the Land shares Allotments have continued in persistent demand, and are a further 3-16 higher at 3 15-16. In Behéras some business has been done at 13, and the Prefs. are 1-16 firmer at 4½. Dairas have been wanted, but there are no sellers. Delta Lands, after being quiet for a long time, have at last come into demand, and, on the buying orders from Egypt, have risen 1s. to 14s. 9d. Gharbieh Lands are 1-16 higher at 1⅞, but no transactions have taken place. Some business has again been done in Sidi Salems, but the price remains unaltered. New Egyptians have been daily dealt in in large quantities, and Egypt has absorbed all the shares offering on this side, with the result that sellers here are now less numerous, and the price is 6d. up at 16s. 3d. Another feature has been the demand from Egypt for Union Foncières, which have improved 5-16 to 2 11-16, a large business having been done. United Egyptian Lands are also fractionally firmer at 1s. 2d.

In Miscellaneous shares Salts, after dropping to 35s. 9d., closed somewhat firmer at 36s. 4½d., but Khedivial Mails have dropped 2s. 6d. to 35s., the report being considered somewhat disappointing—the dividend is only 4s. for the year, as against 5s. for the previous twelve months.

In Greek securities there has been rather more doing, as some sellers have come out, and this has enabled some purchases to be effected for Greek account. The only changes in prices are a drop of ½ in Monopolies and 1914's to 52 and 74 respectively, while Rentes are ¼ easier at 42¾.

Oil Shares.

Anglo-Egyptians (B) rose 6d. to 26s.-27s., and Roumanian Consols rose 6d. to 9s. 3d.-10s. 3d.

Paris Bourse.

Closing prices: Egyptian Unified, 91.25; Credit Foncier Egyptien, 759; Suez Canal shares, 4,595.

SUEZ CANAL RECEIPTS.

The traffic receipts for the Suez Canal were as follows on the undermentioned dates:—

NOTES OF THE WEEK.

The capture of Jerusalem has produced a resounding echo round the world. Germany, while denying its military, has tacitly admitted its political and openly affirmed its religious importance. Turkey has maintained a discreet silence in public over the loss of the sacred city; the world can only guess at the emotion which has charged the telegraph from Constantinople to Berlin. France, Italy, and America, the old Allies and the new, have been quick to recognise the importance of the event; but the news has apparently not reached Petrograd, as the Russian Government has not yet sent any congratulations.

The Vatican has been less reticent. The expression of a pious regret that Jerusalem was not taken by Catholic troops was natural, but it was accompanied by congratulations that the city is once more in Christian hands. A few carping critics found fault with these as being more correct than cordial, but the Pope heaped coals of fire on their heads by ordering rejoicings throughout Christendom, even in enemy countries. The spectacle of the Emperor of Austria and the King of Bavaria attending a service of thanksgiving for the fall of an Ally's city is one that only the ironic pen of a Gibbon could justly describe.

The German Emperor has succeeded in restraining his oratory over a topic which must have appealed to his historic imagination, but the German papers have promised the Turk that Jerusalem shall be restored. (They prudently omitted the date.) The Pope has promptly condemned this verbal consolation, by discountenancing any attempt to recover the city. His words have, of course, no influence on the Ottoman Government; they were, therefore, addressed to the Central Powers, who may or may not respect them.

The advance of General Allenby has caused a further slump in the German colonial school. At the beginning of the war they desired the French colonies, by Bethmann-Hollweg's own admission to the British Ambassador, and their "place in the sun" was to consist of most of tropical Africa. When British sea-power forbade that, the Germans turned to rail-power as a counterpoise, and the Baghdad Railway was to secure them not only Asia Minor and Middle Asia, but also an entry into Egypt and tropical Africa by another route. The year 1917 has been a rude disillusionment. The Baghdad Railway has lost its tail, and the British advance into Palestine has secured Egypt and Africa against Teutonism. Neither sea-power nor rail-power will avail Berlin. The colonial school must try again, but the first new attempt has not been very impressive, since it is a demand for the control of the Channel Tunnel, which does not yet exist. It would have been more practical to demand the debentures of the Chatham and Dover Railway as England's indemnity.

The real orientation of German policy, however, repulsed from the ocean and its further objectives, is becoming concentrated more definitely on the Near East and the East of Europe. The Leninite Government in Petrograd is ready to agree, to make peace, and even to sell its official Allies. An armistice has been concluded along the front, which allows fraternisation on a limited liability scale and trade on an unlimited scale. The first export from Germany to Russia is already preparing; it is an angel of peace, but its wings are stuffed with gold, and beneath its robes it carries the secret terms on which Russia will be admitted to the German paradise. The Leninites have denied the published terms, but they have not published the real terms.

Incidentally, they have dealt Roumania a cruel blow. Unable to corrupt her armies during the summer, by withdrawing all military support on the south-eastern frontier, they have now compelled their little neighbour to sign an armistice, and the cables are full of suggestions that Roumanian politicians at Bucharest are negotiating with Germany, and that the terms put forward by the enemy will include the abdication of King Ferdinand and the accession of his son Carol under German auspices. Undoubtedly, there are intrigues afoot at Bucharest, and it is highly probable that any peace terms the Germans would offer would insist on the abdication of the heroic King; it is perhaps less likely that they would nominate his son as successor. But it must be remembered that in these matters we only hear one side of the story. It is to the interest of the Germans to represent Roumania as in complaisant mood, and to the interest of the Leninites to cover their shame by involving another partner. But we have not yet heard the Roumanian story, and the last authentic message that came through from Jassy was that the Roumanians would rather go round the world and fight again on the western front than surrender.

The Russo-German armistice runs from the Baltic to Persia, and includes all the enemy Powers. The position, therefore of Petrograd is that it voluntarily

Digitized by Google

resigns all interest in Persia and in the Balkans; it has lost Siberia, the Ukraine, and Finland by declarations of independence on the part of those territories, and it has no authority in the Black Sea or the Caucasus. Further, it has no title to speak for Poland, Lithuania, or Courland. While it will not hurt a single German soldier, it is ready for a "red terror" in Petrograd, and more than ready to kill Cossacks and other recalcitrants—at least by word of mouth.

It is very doubtful whether a Government in this position, and one which has, moreover, abolished the Law Courts and is ready to repudiate its debts, can last. The Trotsky régime (for Lenin has sunk for the moment into obscurity) may conclude peace with Germany and then disappear; but one thing is certain, that, whoever succeeds them, the Russian Army, as at present constituted, has no stomach for fighting, and any calculations that the Allies have made on that score had better be put in the waste-paper backet at once, so far as the northern armies are concerned. What effect this may have on the destinies of the Baltic need not at the moment be considered; it is at least possible that Sweden may yet regret her too benevolent neutrality to Germany.

In the south the collapse of Russia need not yet be considered final. The fighting spirit survives in the Cossacks, and there are indications that Kief is not too docile. If resistance there can be organised, the Germans may find their victory will crumble in the mouth. For the present we are getting no really authentic news from the south at all; the Bolsheviks are apt pupils of Berlin in the fine art of falsifying news. Behind the screen of fiction it is quite possible that preparations are making for a new Russia which will definitely split with the German-directed puppets of Petrograd.

If that supposition is well founded, a new position will arise in the Black Sea, for any new State there would have to find its outlet on those waters (always assuming that it was not controlled from Vienna). Now, the State that controls the northern part of the Black Sea must necessarily play a part in Balkan politics, and it cannot resign its interest in the Dardanelles; neither can it remain permanently dissociated from the southern Black Sea, which brings it into touch with the Armenian problem. In any event, it is doubtful whether a Christian State in the Euxine could in fact refrain from quite special interest in Armenia, in view of the Turkish attitude towards that people and Church. Were Russia indeed to collapse finally and the Allies to agree to a negotiated peace, Armenia as well as the Armenians would be practically wiped off the map.

There is very little doubt that the Germans were ready to make peace on the terms of a free hand in Russia, and what they thought easy terms for the Allies in the west and overseas. Their success in Italy, however, and the release of their prisoners from Russia, which has apparently already begun, has raised their hopes of a victory in both east and west. We can only reiterate our belief that in grasping at both they will eventually lose both.

The pacifists have now abandoned the attempt to prove that Lord Lansdowne and President Wilson are in agreement; but before rushing to the congenial defence of M. Caillaux they have stopped for a moment to rejoice over President Wilson's silence over the Jugoslav programme. They have an insatiable faculty for pointing out points favourable to Germany before Germany has seen them herself—thus does the pacifist help the militarist. But President Wilson's scheme does not necessarily mean negation, for no statesman can make a full statement of his programme every time he speaks. And the pacifists have chosen to ignore the fact that he has declared war against Austria, which fits in rather badly with their thesis. For the moment they are almost as enthusiastic over the maintenance of Austria as they are over the dismemberment of Russia.

The claim of the late Russian Government to Constantinople was used as a stick to beat the British Government with in a debate in the House of Commons on Wednesday night. The few pacifists in that assembly are never tired of raising the question of war aims in order to embarrass the Government; and they have evolved the theory that they and not the Press really represent the opinion of the country. No doubt the fact that they have all been repudiated by their constituents furnishes the proof of this new theory of representative government. Mr. Ponsonby, who was the mischief-maker on the present occasion, was cogently answered by Mr. Balfour. The Russian claim to Constantinople was rather evidence against than for the alleged Imperialist aims of the British Government, as it meant a reversal of our historic policy in the East; and in any event the claim to Constantinople is no longer put forward by Russia. If some of these anti-British folk would expound their faith to their constituents, and prove their belief in democracy by offering themselves for re-election, it would be a touching proof of their belief in the justice of the German cause.

There is probably nobody, not even those who drew it up, who could endorse every word in the Trade Unions' peace programme, but equally there is no reasonable man who does not find a good deal that he agrees with. The idea that Great Britain should resign her Central African colonies to a League of Nations, for instance, may be as noble as that a Trade Union should hand over its trust funds to a benevolent employer, on the chance that he would administer the thing better; it would be a magnanimous example of trust and a demonstration of the brotherhood of man, but for all that, in this sorry world most people would prefer a guarantee of security before they entrusted the benevolent superior power with their property. The only part that specifically concerns the Near East is the recommendation that the Balkans should have a Customs Union and an organisation on national lines with just boundaries. That is what a good many people have said for some time past, and it is roughly the programme of the Allies.

The Trade Union programme makes further recommendations as to the settlement of Asia Minor and of the Dardanelles question—it suggests that Constantinople should be internationalised. We do not ourselves believe that this would succeed. International control has not been conspicuously successful where it has been tried so far, either in Egypt or the New Hebrides; it leads to intrigues and friction, and the more the members of the international board the more the intrigues and the friction would be. If we could believe that human nature had entirely changed by reason of the war, we might look forward to international control with fewer misgivings, but unfortunately there is no evidence that it has changed. However, one of the most interesting points about this programme is that it is a revised edition of one that was issued in the summer, and a comparison of the two documents shows that its compilers have changed their opinion on many points of detail. That fact shows a close study of the situation and an open mind, which will probably lead to still further revision.

The recall of General Sarrail from Salonika will be generally regretted by the Allied forces on that front. For two years he has had a very difficult post, and for the first eighteen months of that time he had to contend with the enmity of King Constantine. He will certainly be employed in some high military capacity in France; but the Salonika front will not necessarily lose its importance. Indeed, Mr. Bonar Law recently admitted in the House of Commons that the Germans might make an attack on Salonika, and that Constantine might return to Greece as part of the German Army. This was a wise warning, which was probably based on the numerous hints that have appeared of late in the German newspapers. At the same time, although he made no attempt to minimise the gravity of the present position in the Balkans—which would have been absurd in the present circumstances—he was by no means pessimistic as to the future. It is something achieved to have a united Greece on our side, with a Greek Army co operating with the Entente force at Salonika.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Sultan Fuad. Cairo, November 17.

Sultan Fuad, who has always taken great practical interest in all matters intellectual and educational, has embarked on a round of inspection visits to the principal educational institutions of the city. Very fittingly he opened his tour with the School of Medicine, which is the oldest school in the country, having been founded by his illustrious ancestor Mohamed Ali in 1827. His Highness was accompanied by the Minister for Education, Adly Yeghen Pasha, and was received at the school by the Adviser, Dr. Douglas Dunlop; the Under Secretary of State, Ismail Hassanein Pasha; the Principal, Dr. H. P. Keatinge; and the staff. He made a long tour of the class-rooms and theatre, addressing a few words to the lecturers and the students. On leaving the Sultan informed Dr. Keatinge that he would present a gold watch bearing the Sultania initials to each of the students passing first in the forthcoming examinations at the Schools of Medicine and Pharmacy.

With characteristic generosity his Highness has sent the sum of £E500 to be spent in Christmas presents to the British soldiers in hospital in Cairo. The nature of the gift has aroused very favourable comment, and much appreciation is expressed by the British community at the liberality and the broadness of mind which it denotes.

Continuing his round of the principal educational institutions of the city, the Sultan visited this week the School of Law and the School of Engineering. In the case of the visit to the former his Highness was accompanied by Abdel Khalek Pasha Sarwat, Minister of Justice, and was met at the School by the Grand Chamberlain, the Under-Secretary for Justice, Sir William Brunyate, the Judicial Adviser, the Procureur-General, the members of the Board of Administration of the School, and the Principal, Mr. F. P. Walton. The latter conducted the Sultan over the building, and, after the book had been signed, delivered an address of welcome to his Highness, who expressed himself as exceedingly pleased with all he had seen. At the School of Engineering the Sultan, who was accompanied by Adly Pasha Yeghen, Minister of Education, was received by Ismail Pasha Hassanein, Under-Secretary, Mr. Sidney Wells, Director-General of the Department of Technical Education, and Mr. Holt, the Principal. He was conducted round the class-rooms and laboratories, and received two addresses from the students. Before leaving each of these schools his Highness was photographed in the centre of a group containing all the officials present and the students.

The Sultan has conferred the Grand Cordon of the Order of the Nile on General Sir Edmund Allenby. His Highness is still residing in his villa near the Savoy Hotel, and will not take up his residence for some time yet at Abdin Palace, whither he proceeds every day for the transaction of State business and for receptions of European and Egyptian notables, of whom quite a large number have had the honour of an audience and of lunching with the Sultan.

The Palestine Front.

The public attention continues to be concentrated on the Palestine front, whence, as the *communiqués* will have informed you, excellent news is being received daily. The prisoners are being gradually moved up to Cairo, where the main concentration camps are. Many of them are fine-looking fellows, though there is quite a fair minority of weedy, tattered and underfed men amongst them. They seem to have been drawn from every conceivable element of the Turkish population. It is interesting to note, as showing how the Ottoman Higher Command conceals the real state of affairs from the army, that it is stated that the prisoners declared ignorance of the fall of Baghdad, and were decidedly crestfallen when they heard of all our successes in Mesopotamia.

Our own wounded are steadily coming in and most of the local hospitals are very busy, though not as busy as they expected to be. As an instance of the excellence of the transport and other arrangements I would mention that men wounded in this advance are in hospital in Cairo within four days. Considering the distance and the fact that all the supplies for the troops in the field have to be carried over the same line in the opposite direction, the shortness of this interval between the occurrence of the casualty and its treatment in hospital in Cairo is certainly a revelation, and redounds to the credit of those who are responsible for the railway organisation east of the Canal. A tour of the various wards gives the visitor an impression of unwonted cheerfulness on the part of the wounded, which contrasts strikingly with what one noticed during the Gallipoli days. Not that our men were not cheerful in the midst of their suffering and misfortune in those dark days, but the cheerfulness to-day is more buoyant and more confident. As the matron of one of the large hospitals aptly described to me the state of the men's minds, they may know that they are knocked out and disabled for life, but they feel that they have given fourpence and are receiving ninepence, whereas in the Gallipoli days they knew only too well that it was all the other way, and that their sufferings and afflictions were to no purpose. Certainly, the officers and men whom I have met during the past fortnight without exception express a confidence in the result which is decidedly refreshing.

Harvey Pasha's Retirement.

This week Colonel George Harvey Pasha, Commandant of the Cairo City Police, proceeded to England on three and a-half months' leave, at the end of which he will retire from the service. Harvey Pasha was seen off from the station by a large crowd of prominent British and Egyptian officials, including Colonel J. K. Watson, representing the High Commissioner; Mr. James Haines, the Adviser to the Interior; Sir George Macaulay, Under-Secretary for Railways, and the Grand Mufti. A few days before his departure he was entertained to a farewell tea party by his Egyptian staff at Shepheard's, where a parchment recording an appreciation of the eminent services rendered by him to the State and signed by all the members of the Cairo City Police was handed to him. Very eulogistic articles dealing with Harvey Pasha's career and his work in Egypt have appeared in the local Press, European and Egyptian, and intense satisfaction has been expressed at the decision of the Egyptian Government to make him a special cash payment on his retirement, so as to bring his pension up to an amount which will be more commensurate with the services he has rendered than that to which he was entitled under the ordinary pension law.

Supplies for the British Forces.

A notice signed by General Allenby has just been published announcing that, as circumstances require that in order to obtain the necessary supplies for the Egyptian Expeditionary Force use should be made of the requisitioning power vested in the military authorities, and as certain of the articles required are already subject to tariff rates, the necessary requisition orders will be signed by the competent military authority, and will be carried out through the Controller of Supplies and such other officials of the Civil Government as may be delegated by the President of the Council of Ministers. Articles thus requisitioned will be paid for at the existing tariff rates. In other words, the military authorities intend henceforward to avail themselves of the requisitioning powers which are vested in them, and which, as a matter of fact, they have in but rare cases put into operation in all cases where supplies are available but not forthcoming at the current tariff prices.

The reason this power has now had to be put into effect is that the existing legislation has proved to be inadequate for the present state of affairs in the country. The tariff law, which has been supposed to regulate prices and prevent unreasonable inflation thereof and the withholding of stocks from the market is, however, only applicable to merchants who habitually expose for sale. Unfortunately, owing to the prosperous condition of the cultivators, the latter are not, as they usually do, disposing of their surplus produce, but are retaining it with the object of forcing up prices. Apparently the term merchant cannot be stretched to include cultivators, who habitually produce more than their personal requirements in order to sell their excess production, and in the circumstances the only solution to this very unsatisfactory state of affairs has been to provide for the application of the requisitioning powers vested in the military authorities to every case where produce, of which there is ample in the country for the needs of the civil population with a margin for the British Army, is being withheld by persons who do not come within the meaning of the term merchant as defined by tariff law. This power will, however, only be invoked on behalf of the British Army itself, and the civil population will still have to do as best it can under the existing tariff law, which in many cases is for all practical purposes a dead letter.

Horticultural Show in Cairo.

A very interesting Horticultural Show was held in Cairo last week by the Egyptian Horticultural Society. This is the second show organised by the society since its reconstruction two years ago. The exhibits certainly reflected the interest which its members are taking in horticulture, and held out great promise for the eventual success of the enterprise when peace conditions permit of the Society developing its activities. The Society is under the patronage of H.H. the Sultan, and Sir Reginald Wingate is President; Lady Wingate, Sir Alexander Baird, and the Minister of Agriculture being Vice-Presidents, and Mr. J. Langley, Under-Secretary for Agriculture, chairman of the general committee. There is quite a substantial membership, a large proportion being Egyptians, and it is hoped to extend the list and to improve very considerably the cultivation of flowers, and especially vegetables and garden produce after the war, when seeds will be more easily procurable.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
THE SCHOOL RE-OPENED ON OCTOBER 1.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, November 25.

Greece and the Allies.

The two absorbing topics of the day here are M. Venizelos's visit to Western Europe and the food problem. The Ententophil papers give copious reports of the Prime Minister's visit to England, and his magnificent and well-merited reception seems to have given great pleasure to his supporters, and should contribute largely towards raising the moral of the nation. There is no disguising the fact that at the present time the dearness of living and the great scarcity of all the necessaries of life and the many discomforts experienced in consequence have produced very general discontent. The Venizelist papers advocate the necessity of Greece's taking an active part in the war to re-establish her prestige and carry out her treaty obligations towards Serbia, and to liberate their countrymen from the persecution of the Turks; but they point out that Greece must be placed in a position to fight, and the first duty of the Allies is to provide the country with sufficient foodstuffs, so as to remove the present difficulty of living. Greece must also be supplied, they say, with the necessary materials of warfare, and then the country, with its spirits raised and a well-equipped army, would be a very valuable asset to the Allies in Macedonia. The setback in Italy has not been without a certain repercussion here, and the pro-Germans have taken the opportunity to spread the report that the Central Powers were about to make a formidable attack in Macedonia. The probability of such operations is commented on by the papers, and it is felt that, if the Germans have any intention of taking the offensive in Macedonia, if only to create a moral effect in their favour, now is their opportunity, as later on, with large Greek forces added to the Allies, their chances of success would be greatly diminished.

The papers suggest that England should now carry out the offer made last year to cede Cyprus to Greece—an act which would give much gratification and go far to promote enthusiasm in the country's participation in the war.

Echoes of the Old Regime.

The authorities have taken a timely step in deporting to one of the islands most of the Germans who remained here, as well as a large number of Greeks who are likely to cause trouble by their pro-German propaganda. Under present conditions, such an element is a source of danger, especially as, it is said, the ex-King's entourage in Switzerland have been making efforts to send money to instigators here.

One of Baron Schenck's former satellites is publishing in one of the daily papers an account of the Baron's doings, and explains how, by means of ample funds, many of the Greek papers were bought. Large sums of money were spent in enlisting the services of various propagandists, and many women appear to have been employed for the purpose.

There is not much improvement so far in the supply of provisions, and all foodstuffs seem as scarce as ever, and all fuel is expensive and hard to obtain. From time to time the tram services are curtailed owing to insufficient electric power, and shops have still to close early in order to reduce the lighting. There is ample wood in the burnt parts of the forests, but the difficulty is to convey it to Athens.

M. Venizelos's Reception in England.

The *Hestia* has published an article by the Acting Prime Minister of Greece, M. Repoulis, on the reception accorded to M. Venizelos in England. After asking what England owes to M. Venizelos that she should extend to him this welcome, M. Repoulis proceeds:—"This is the immortal majesty of the English nation. The more than splendid character of the great race sparkles in the manifestations in honour of Venizelos. So that we may say that all these ceremonies in honour of the great Greek are honourable to the English character. The speeches of the great Lloyd George; the speeches of Balfour, who excels in political philosophy; the speeches of the great statesman Curzon; the speeches of the most eminent philosopher-historian Bryce; the

Digitized by Google

speeches of the Lord Mayor of the City; the speeches of the warm Philhellene Dr. Burrows; the articles of so many eminent journalists—not to mention the very great honour done him by the King of England—all these manifestations reflect the English character. Each of the most eminent men filled his part in the great picture, in order to represent the English soul, the British intellect.

"That is what is pictured in all the ceremonies in honour of Venizelos. Both the emotion and the pride which we feel as Greeks direct our attention to this wonderful phenomenon. The English admire the great Greek citizen and statesman; we admire the English character."

General News.

November 8 was a general holiday, being the festival of St. Demetrius and also the anniversary of the taking of Salonika, an event which, the papers remark, will remain an example in the history of nations. In the history of Greece, Salonika will remain an eternal monument—the more so in view of the importance it has assumed in this world war—and it will again become the scene of further triumphs for the nation. A public celebration was held with much pomp in the Cathedral, and attended by most of the high officials. The King, owing to indisposition, was unable to attend.

On November 11 a service was held in the Cathedral at the Piræus in memory of the British and French sailors who were killed in the events of last December. Many high military and civil officials were present, and after the service a procession, headed by a band, proceeded to the cemetery, and wreaths were laid on the graves on behalf of the Greek Army.

The Press show much indignation at the Pro-Bulgarian sympathies expressed by certain politicians in England, and they comment with satisfaction on the counter-movement in favour of Greece conducted by Dr. Burrows and others.

ROUMANIAN NOTES.

(From a Correspondent.)

Russo-Roumanian Relations.

The Roumanian Prime Minister has granted an interview to the Russian author, N. Breshko-Breshkovski, in the course of which M. Bratianu complained of the hostility displayed towards him by the Russian Press of the Left. The charges of anti-Semitism levelled at him were totally unjustified. "I am at the head of the Government," said M. Bratianu, "I occupy myself with internal and external politics, but never in a single one of my speeches have I said a single word against the Jews. Many of them have distinguished themselves in the course of the war. His Majesty has conferred decorations on them—before my eyes—for military deeds, and has contributed largely towards the assistance of those of them who have been invalided. . . . In general, I am surprised at the persistence of the Russian democratic organisations in interfering in Roumanian affairs. Roumania is an independent kingdom, a much afflicted and unfortunate kingdom, which might have avoided its misfortunes if its lot had not been bound up with that of Russia—but still an independent kingdom. The King, anticipating the desire of the Russian democracy, has pardoned thirty persons, of whom fourteen were Jews. What more does it want? The death penalty cannot be suppressed in war time either at the front or in the rear. So it is impossible that, in order to humour a few individuals, we should sacrifice whole regiments and divisions of fine, brave soldiers, whose life is precious to the people and for whose lives we are responsible to the country."

Turkey and Roumania.

Information regarding Turkish attempts to form an alliance with Roumania prior to the latter's intervention in the war is given in a leader in *L'Indépendance Roumaine*:—

"In 1914 a delegation of professors and students from the colleges of Constantinople arrived at Jassy . . . It asked for an offensive and defensive alliance with a view to fighting against those who had transformed Thrace and Macedonia into a desert and had massacred 500,000 Mahommedans in these two provinces. . . . Some months passed. The Ottomans ceded a further portion of their territory to the insatiable desires of the Bulgarian people. And we saw with stupefaction a new Turkish mission, headed by Talaat Bey, come and propose to us this time not a double alliance against the Bulgarian enemy, but a triple alliance against the Serbian friend."

In this connection it may be mentioned that on account of the contradictory theories propounded from time to time with reference to the circumstances in which Roumania entered the war, there is a growing demand on the part of public opinion for the publication of the diplomatic documents relating to that event. The demand has met, so far, with no response from official circles.

The Food Situation.

Complaints about the scarcity and dearness of various foodstuffs in Jassy, especially fruits and vegetables, continue, and the authorities are attacked for their inability to deal with the situation. "The communal authorities have reduced the prices of vegetables and fruit," writes a paper. "Excellent! But we offer a prize to anyone who can find any vegetables. . . . We are, therefore, justified in saying that the prices have only been reduced on paper." Meanwhile, a communal food controller has been appointed in the person of Professor Ioan Peretz, a measure which is welcomed by the Press. It is of interest that the Jassy prices are considerably higher than those obtaining in Piatra-Neamtz. The fact is established by a table of comparative prices published by a local paper, while a Jassy paper suggests that prices are even more modest in Vashis than in Piatra-Neamtz.

Occupied Territory.

I have received a direct letter from Bucharest, the first since the occupation of that town. Naturally, it conveys but little news of general interest. The more necessary commodities can, apparently, be obtained, but at exceedingly high prices. The Germans are extending the system of filling administrative positions with persons belonging to the native population, and, besides a large number of minor appointments, they have made the following Ministerial appointments:—

Interior	Costache Lupu
Agriculture	Dr. Antina
Justice	Hinna
Finance	Nenitzescu
Public Instruction	Virgil Arion

A MONTENEGRIN GENIUS.

Dr. R. M. Burrows, Principal of King's College, London, presided at a lecture given by Professor Pavle Popovitch at the Grafton Galleries on December 17. The subject announced in the public press was "Montenegro," but in introducing the lecturer the chairman said that this topic had been abandoned in favour of an address entitled "An Appreciation of the Prince-Bishop Njegosh."

Professor Popovitch introduced his subject with a brief outline of Montenegrin history, showing the close co-operation in the past between Montenegro and Serbia, and on this he based the claim now being advanced by Serbians for the political union of the two countries. He continued: It is my intention to speak to you about one of the greatest Montenegrins—indeed, one of the greatest Serbs—that ever lived, one who was both sovereign of Montenegro and at the same time the greatest poet of our nation—I mean Peter Petrovitch Njegosh. He was the Prince-Bishop, or Vladika—as we say in our language of Montenegro. I think I cannot show you Montenegro better or to greater advantage than as represented by the portrait of this great man, who was the supreme expression of his country. And in showing you his life and work, I consider that I also have an opportunity of dealing incidentally with the history, literature, and ethnography of Montenegro—to a certain extent, at least.

Peter Petrovitch Njegosh was born in 1813, in a Montenegrin village. He first attended a kind of elementary school at Bocche di Cattaro, and then continued his studies

privately under a tutor in Cetigne, his tutor being the Serbian poet Milutinovitch. He was a member of the house of Njegosh, which had ruled over Montenegro since the end of the seventeenth century, in the capacity of Prince-Bishops, Montenegro being in those days a theocratic principality. Njegosh was still quite a youth when, in 1830, he was elected to succeed his uncle, the deceased Prince-Bishop Peter I. Njegosh became a monk, and three years later, in 1833, when he was only twenty years of age, he was created Prince-Bishop in Petrograd, in the presence and by order of Tsar Nicholas I. himself. From that time onward he devoted his life to the government of his country and to his love of books and meditation, in the loneliness of Cetigne, broken only from time to time by his journeys to Russia, Italy, and Austria. He was an excellent sovereign, and it was he who first civilised and organised the turbulent and semi-barbarous tribes which constituted the Montenegro of yore. He also gave a position of international importance to his country, which had up to that time always been considered a Turkish province, and for which he, by his unwearied efforts, won respect and recognition as an independent Serbian State. He died in 1851, too young, alas! to accomplish all that was needful for the young Montenegrin State, and too young also to give his full literary measure.

He began his literary work very modestly. He wrote a few poems, short and without great value, mostly in the style of the national Montenegrin poetry; that is to say, not in the best style of Serbian national ballad poetry. In 1834 he published a very small volume of these poems, under the title "Pustinjak Cetinski" (the Hermit of Cetigne) and "Lijek Jarosti Turske" ("Remedy against the Fury of the Turks").

Later on, and especially after 1836, he composed poems and short lyrics in a greater vein and of very great merit. This evolution was due, above all things, to his own extensive and serious reading, and to an increasingly wider and deeper knowledge of foreign languages. He studied Russian, Italian, German, and especially French, which appealed to him greatly and which he learned to speak excellently well. It was then that he translated Lamartine's "Hymne à la Nuit," which appears to have been his favourite poem. In 1845 he composed his "Luca Microcosma" (Ray of the Microcosm), a philosophic poem of the highest merit, which was inspired by a passage in Milton's "Paradise Lost."

Finally, in 1847, he composed his masterpiece, the "Gorski Vijenac" ("The Mountain Garland"). This is a kind of epic drama, not unlike the ancient Greek plays, such as "The Persians," by Æschylus, for instance. His theme is furnished by an historic event—the extermination of the Turks in Montenegro at the beginning of the eighteenth century, that is to say, by the liberation of Montenegro. The work is largely inspired by the Serbian national ballad poetry. The essential features of this masterpiece are: a grandiose epic conception, a true and picturesque presentment of Montenegrin life; moreover, a touch of humour, local colour, and a pronounced national cachet; also an outpouring of lofty ideas, a profound philosophy of life, the bitter pessimism of a great genius, and the ardent patriotism of a man who has devoted himself to the good of his people. Finally, it is marked by a masterly and sublime diction, abounding in lyric passages, full of excellent, ringing exquisite verses, in which his great philosophical and poetical ideas are unfolded in the irreproachable form of classic sentences. All that he felt, Njegosh enshrined in his work. He enshrined his own personal romance in it; the romance of a civilised sovereign ruling over a semi-savage people; the romance of a philosopher surrounded by ignorant people; the romance of an ardent patriot who finds himself to give to his people what he so fervently desires to bestow upon them; the romance of a titanic genius whose upward flight is hindered and rendered impossible—in a word, the romance of Prometheus chained to the rock. "Whoever harbours within himself apart," says the French writer Xavier le Maistre, in speaking of our poet, "the spur of a burning thought which he cannot overcome, and to which cannot be given sufficient space, represents to me the ancient Prometheus gnawed by his vulture. More than anyone else, the poor Vladika of Montenegro, with his intellectual ardour, appeared to me in the loneliness of his life like some Prometheus chained to the Caucasus, a Prometheus at whose feet no daughter of Ocean wept. . . ." It is the romance of a Prometheus of this stamp which is enshrined in a masterly fashion in the "Gorski Vijenac," the greatest Serbian achievement in literature.

And here I have much pleasure in telling you that this masterpiece, which has already been translated into Russian, Czech, Bulgarian, Magyar, Italian, German, Swedish, and French, has now been translated into English by Mr. James Wiles, and will shortly appear.

After this work, Njegosh still published several poems, and in 1851 the non-dramatic Montenegrin historical drama, "Stjepan Mali" (Stephen the Small). His posthumous works include his "Slobodijada" (Montenegrin Freedom), an early work which is an epic dealing with Montenegrin history, fragments of translations of the "Iliad" and the "Song of Igor," a well-known Russian work.

At the close of the lecture Mr. Alex. Devine said that, though the lecture presented a charming treatment of a great subject, he wished to protest against the abandonment of the original lecture. He challenged any of the Serbian political propagandists in this country to lecture on "Montenegro," adding that he would certainly be present to expose the intrigues that had been carried on for so long a time against their defenceless sister country.

The Chairman ruled that any further discussion of the matter would be idle; in his view Professor Popovitch had fulfilled the task which he set himself, and no lecturer could be denied freedom of treatment of his subject. He held that it would be better to deal with the question in another lecture.

The meeting then closed.

THE CZECHO-SLOVAK ARMY.

The London Czech Press Bureau states that the formation of a Czecho-Slovak Army has just been recognised by the Allied Governments. The Army will partly consist of Czechs and Slovaks resident in the Allied countries, partly of Czecho-Slovak prisoners of war who, as Austrian soldiers, surrendered voluntarily to Russia and Serbia. The Czecho-Slovak Army is being organised by the Czecho-Slovak National Council in Paris, with the following members at the head:—Professor T. G. Masaryk, formerly Czech Deputy to the Austrian Reichsrat; Major Milan Stefanik, an eminent Slovak astronomist and a distinguished airman in the French Army; and Dr. Edward Benes, formerly lecturer at the University of Prague. The Czecho-Slovak Army will consist of at least 120,000 men. Many of them have already been decorated for bravery with Russian, Serbian, French, and Roumanian Orders. A considerable section of this army will be fighting on the French front, while in Russia there is a Czecho-Slovak Army Corps (formerly Brigade) at present. The army will have its own Czech (formerly Austrian) officers, and will swear allegiance to Professor Masaryk as President of the Czecho-Slovak National Council.

From the beginning of the war the twelve million Czecho-Slovaks have been on the side of the Entente. The Czechs in Russia, England, and France entered the Allies' armies as volunteers, the Czechs in America frustrated and revealed the dangerous and insidious German propaganda. In Austria they hampered Austria's military and economic progress; Czech regiments surrendered wholesale to Russia and Serbia.

Now the Czecho-Slovaks have been officially acknowledged as our allies, their National Council being, it is held, a kind of Provisional Government of the future Independent Bohemia. The aim of this Council is to work by all means in its power for the complete restoration of the Kingdom of Bohemia and the liberation of all Czecho-Slovaks of Bohemia, Moravia, Silesia, and Slovakia from the domination of Berlin, Vienna, and Budapest. Besides organising an autonomous army to fight on the side of the Entente, the Czecho-Slovak National Council issued also a war loan of twenty million francs to be subscribed by Czechs and Slovaks in the Allied countries, chiefly in America. The headquarters of the Council, which has branches in all the Allied countries, are at 18, Rue Bonaparte, Paris.

NEAR EAST BOOKSHELF.

GERMAN AIMS.*

Mr. Ellis Barker has done good work in making known to English readers Dr. Grumbach's book, which is neither more nor less than the soul of modern Germany laid bare. The Kaiser, the General Staff, Prussia, the Professors—many individuals, organisations, sects, so to speak, or other influences—have been blamed from time to time for the war. Some fond illusionists hold that, if this or that influence or individual were removed—or, as Mr. Lansbury would have it, converted by a mere handshake—the war would cease and world-wide permanent peace would result. Dr. Grumbach's book (which is not the outpouring of one man, but the collated opinion of the whole of the German Empire) proves the contrary. It reveals an unbroken union of opinion, and of clear and unobscured opinion, as held by the eighty or more millions of people united for the annexation of all they deem worth having, and against the one Power—Great Britain—who appears to them as the obstacle to that annexation. Moreover—and this is significant—the cant we know and ridicule, of the German Lamb *versus* the English Wolf, is notable in its absence. Only now and again (like the last ripple caused by a heavy stone cast into deep waters) do we see *Kultur*, unprotected Germany, piratical England, and the like—an echo, as it were, of schoolboy sentiment. The bulk of the volume is the unabashed, calm, and calculated avowal of the genuine aims—*en gros et en détail*—of the German nation, from Chancellor to peasant.

Take, for instance, the Note of the six great economic associations of Germany. It constitutes a straightforward—we may almost say an honest!—confession of faith, with no nonsense or sentiment—agreeing, moreover, with the dictum found further on, that, if economic expansion and progress is ensured, spiritual increase of *Kultur* will take care of itself! That was the maxim of Lord Cromer in Egypt, and no truer maxim can be found. The only question, indeed, is whether the *régime* assuring such progress is to be self-development under veiled and disinterested advice, or that tuition enforced on younger peoples by a "master nation" which "organises" life to such a pitch that suicide becomes enviable! But this last is merely a professorial opinion; the consensus of ideal is the elimination of crusades—"German blood is far too precious to be spilt in these." And even of the aims of Germany's allies, Austria and Turkey, not to say Bulgaria, must look after themselves, aided only so far as they contribute to the general Germanic plan.

It would be possible to write a brochure on the book and yet not exhaust its obvious and fateful lessons! But space forbids—as well as the feeling that the book must be read and re-read by every one who wishes or should wish to realise that we—England above all—are engaged, not merely in a war nor even in economic rivalry—(cement sent to Holland is a mere drop in the bucket!)—but in the one unexampled, inevitable struggle for the life or death of the world, unless, indeed, Mr. Barker has merely introduced another *ballon d'essai* of the Wolff Bureau, and justified the Lansburian and similar pretensions that anyone can end the war whenever they like to say so! R. F.

SIR RABINDRANATH TAGORE'S PLAYS.†

This book is likely to prove a disappointment to any readers who may be rash enough to argue from the title to the contents, and who expect "plays" to furnish something in the way of plot or action. The four short pieces which fill the volume would be more properly called dramatic sketches, or perhaps silhouettes, in which one, two, or three characters stand out against the eternal background of India. Nor can it be said that there is anything very novel in the characters themselves. An ascetic returns to the world for love—and loses it; two men love one girl—and one kills the other; kings and priests fall out—and the great goddess enjoys the blood for which she thirsts; another king loses the woman he loves. That is nearly all, but kings and priests and ascetics stand out from the shadowy crowd of minor characters as living beings whom we can know and understand, and therefore the book is well worth reading by anyone who cares for "poor humanity." There are, it will be seen, no happy endings, and the fact that we have not found the sketches depressing may be taken as evidence, were evidence needed, of the author's skill; while his ability to see the weak points of his countrymen is displayed in occasional flashes, as when a Brahmin remarks to a seditious meeting: "We have all agreed. He who thinks differently, let him leave this assembly." Certainly it is a book to be read, using the word in its obsolescent sense to signify a thoughtful and leisurely perusal.

† "Sacrifice and Other Plays." Sir Rabindranath Tagore. (Macmillan. 5s. net.)

A FEDERAL EMPIRE.*

Half a century has passed away since Sir Charles Dilke gave our forbears a bird's-eye view of the self-governing colonies which they owed to sea-power and the spirit of adventure. His "Greater Britain" was a much-needed antidote to the parochialism which prevailed in the 'sixties. At that epoch the Manchester School held unquestioned sway over public opinion. It preached a gospel of tepid internationalism on a commercial basis; called "Hands off!" to the Government in the economic sphere; assumed that universal Free Trade would link nations in the bonds of self-interest and render warfare impossible. There was no room in the theory of Cobden and Bright for colonies. It regarded them as a profitless burden, and prophesied that they would throw off allegiance to the mother-country as soon as they were able to dispense with her protection. The stimulus afforded by "Greater Britain" produced a broader and more statesmanlike outlook: a revolution in means of transit brought the colonies into closer connection with the heart of empire, and the rise of powerful rivals who turned a deaf ear to Cobdenite blandishments convinced the most parochially-minded Briton that union is strength. The colonies responded to the keener interest in their welfare shown by the Parliament and people of this country, and to-day they stand shoulder to shoulder with us in a struggle with the enemy of civilisation. A yearning for greater solidarity is felt throughout the Empire; and Mr. Saxon Mills has given full play to this laudable sentiment in a handbook which may be described as a "Greater Britain" brought up to date. In 271 pages he sketches the various problems which are offered by our dependencies, and suggests a common-sense solution for each of them. His panacea is Federation, implying complete autonomy in local affairs for the constituent parts, and centralisation in such as regard the Empire as a whole. In an appendix Mr. Saxon Mills summarizes the late Mr. J. K. Gokhale's scheme of Indian reform, which the Secretary of State is now attempting to carry into effect. Whether India is ripe for the fruition of Mr. Montagu's ideals—"the development of self-governing institutions with a view to the progressive realisation of responsible government"—is a question on which our author maintains a judicious silence. F. H. S.

CORRESPONDENCE.

THE FUTURE OF CYPRUS.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I beg to draw your kind attention to the strange and paradoxical things which your correspondent in Cyprus writes about Cyprus and Cypriots.

He suggested over and over again that the wish for union of Cyprus with the mother country, Greece, is not a unanimous wish of the whole Greek population, and that it is only a movement organised by some agitators in the island. Allow me, sir, to say distinctly that this suggestion is not at all true, and that Englishmen who wish to respect their country and themselves ought, above all, to respect the truth. I am always speaking frankly, or as ancient Greeks used to say, "*τὰ σύκα σύκα καὶ τὴν σκάφην σκάφην.*" You know very well how the whole Hellenic world esteems your nation and what a high respect we all have towards the liberal spirit and the political justice of your country. I trust in this liberal spirit and hope that you will kindly publish in your paper these lines.

I refer myself to facts. (1) In 1878, when Lord Wolseley came to the island as its first High Commissioner, the Archbishop of the island, addressing his Excellency on behalf of the Greek population, said to him that the Greeks of the island do not forget their origin and their aspirations. (2) When some years later, in 1881, the late Mr. Gladstone formed a Liberal Cabinet, the Greek population sent to him telegrams by which they submitted to the English Government their wish for union with Greece. "Nous aimons l'Angleterre et lui devons une grande reconnaissance, mais nous desirons être unis à la Grèce." Mr. Gladstone answered to the inhabitants through the High Commissioner, Sir R. Biddulph, that "while her Majesty's Government earnestly desire the happiness of Cyprus, they must remind the inhabitants that the island is held by this country under the convention with the Porte as a part of the Ottoman Empire, and that proposals which would be a violation of that convention cannot be discussed." (See Blue Book for Cyprus, 1881. p. 105.) (3) During the summer of 1888 the Archbishop, with three other members of the Legislative Council, went to London on a special mission for the affairs of Cyprus, and they submitted to the British Government the strong wish of the inhabitants for union with Greece. (4) Twice later at Pan-Cypriot meetings, especially when Joseph Chamberlain expressed some doubts in the House of Commons about the unanimity of this wish, enormous meetings held at the different districts of the island voted for union. (5) On December 1, 1911, the Greek members of the Legislative Council submitted a memorial to the High Commissioner, the second paragraph of which runs as follows: "Forming as we do, your Excellency, an inseparable portion of the Greek race, it is natural that we should feel in a strong and unsubduable manner the desire that our Fatherland should be annexed to the Hellenic kingdom." (6) On April 28, 1912, big meetings of the whole Greek population, held in the different districts simultaneously, voted that "They declare that no influence, no pressure, and no worldly power can suppress or change their national feelings of being annexed to the kingdom of Greece." (7) During the summer of the same year a special committee, of which I was a member, visited England for the affairs of Cyprus, and there we submitted the same wish to the Secretary of State for the Colonies. (8) The Greek members of the Council at the sessions of the Legislative Council every year submit resolutions for union with Greece for which they all vote unanimously. (9) Over four thousand Cypriots volunteered in the unfortunate Greco-Turkish War of 1897, and many of them took part at the insurrections of Crete and Macedonia. (10) Many thousand Cypriots also took part at the Balkan Wars of 1912 and 1913.

Is any one in a position to contradict these facts? If not, why does your correspondent so frivolously insult a whole population amongst whom fourteen thousand men are now with you and the Greek army at the Macedonian front as muleteers or soldiers, serving a common cause for liberty and civilisation?

I saw also in your correspondence from Cyprus that Cypriots are not a brave people, and different other hints to the same effect. I do not know what are the facts from which your correspondent draws this inference. Many Greek officers, and M. Venizelos himself, spoke to me in high terms of the bravery of the Cypriots.

Sir, I really did not intend to contradict statements which are obviously so untrue, but I heard at the club here many people expressing themselves so, "This is the way by which Englishmen pay our services and our devotion towards their struggle!" I personally know very well that England and English people bear no responsibility for the opinion of some little Englishmen of Cyprus, and I know also, and the whole people of Cyprus believe, that shortly the principle of nationality, for which you are fighting, will be applied in Cyprus; but I considered also that the complaints of the population ought to be heard, and I hope that you will be kind enough to serve justice by publishing these lines in your esteemed paper.—I am, etc.,

DR. NIC. KL. LANITIS.
Member of the Legislative Council,
Member of the Central Board of Education, etc.

Limassol, November 20, 1917.

[The passage in our Cyprus correspondence to which Dr. Lanitis refers is probably to be found in THE NEAR EAST of September 28. Our correspondent, under the heading "Greek Politicians," was dealing with the memorials for union with Greece which it is the custom of the Greek members of the Legislative Council to present to the Government from time to time. He wrote:—"At any rate, the object is to keep alive the idea that the Greek majority of the people hope that the island will soon form a part of Hellas. Whether the bulk of the population would really endorse the representations of their leaders is a very different matter. A referendum—if such a test were possible in the order of things, or could be honestly carried out—would probably show clearly that the people were averse from any change of administration, since they have discovered that, perhaps for the first time in history, they now have full security of life and property, and such freedom, in the best sense of the word, as is practicably possible. The bulk of the population remain quite indifferent to 'politics,' and only 'demonstrate' when whipped up to a kind of fictitious excitement, at the bidding of the wirepullers, on some particular anniversary or other rare occasion. Most of the rural classes, moreover, are heavily indebted to moneylenders, and have to follow their lead; and the latter may sometimes impart a political colouring to the ideas of their clients. There is, at any rate, no desire for any change which would render them liable to military service. The Cypriot peasant is not a fighting man, and has never shown any disposition to take up arms; though some of the villagers, as well as townsmen, did indeed go as volunteers to the last Balkan wars. For many years after the occupation very few Greeks even enlisted in the local force of military police, though they have joined by degrees, until they have come to form about half the strength of that excellent force. The island Greeks are, however, it must be repeated, far from being a race of warriors like the Cretans and some other islanders. The Turkish element is, of course, entirely opposed to the despatch and the object of the memorials referred to." It will be seen that there is no real conflict of evidence between what our correspondent wrote and the statements made by Dr. Lanitis. The former referred specifically to the "facts" enumerated in the above letter, and merely challenged the inference which Dr. Lanitis wishes to be drawn. As he stated, a referendum alone could establish the accuracy of that inference. In the contrast between the peaceful Cypriot peasant and the more bellicose Cretan reference was made to the characteristics of two peoples; the courage of the individual Cypriot was in no way impugned.—ED.]

THE PALESTINE VICTORY.

Arab Deputation to War Cabinet.

A delegation of the Moslem and Christian Arab members of the Syrian and Palestinian Colonies in Great Britain, headed by Count Zogheb, waited on the War Cabinet on December 12, and presented the following address:—

Your Excellencies,—The delegates of the Arab members of the Syrian and Palestinian Colonies in London and Manchester have begged to call on you to-day to express to your Excellencies their congratulations on the victory and capture of Jerusalem. They moreover express the desire that you should transmit to his Majesty and to his Majesty's forces their heartfelt congratulations, and the hope and the assurance that his Majesty's armies and the detachments of French and Italian contingents should continue their victorious march for the deliverance of the populations they are freeing from the despotism of Turkish rule. And the delegates of the Arab members of the Syrian and Palestinian Colonies in London hope your Excellencies will convey to General Allenby and to the valorous troops under his command the sincere expression of their gratitude for the sacrifices they are making to further the aims and aspirations of these populations for a lasting and hopeful establishment under the guidance and tutelage of their deliverers.

Mr. Bonar Law, on behalf of the Prime Minister, thanked the delegation for its messages, which he informed them should be conveyed as requested.

The delegation, which was composed of the following London members:—Mr. M. Wadia Kesrawani, Shaykh Ismail el Akki, Mr. Selim Ghaffir, Lieutenant Abd-ed-Din El Zein (of the Arab Legion), Comte Patrice de Zogheb, and of the following members from Manchester:—Mr. K. Jebara, Mr. E. Kahla, Mr. F. Hourani, subsequently visited the French and Italian Embassies, and were received by M. Cambon and the Marchese Imperiali, who were presented with addresses similar to that presented to the War Cabinet.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Rates of Pay in Mesopotamia. December 13.

COLONEL YATE asked the Under-Secretary of State for War whether assistant directors of railways and deputy directors of railways in Mesopotamia were given the same grading and rank as in France, Egypt, and Salonika.

Mr. MACPHERSON: The grading in Mesopotamia is not the same as in France and elsewhere. If it were the same, the Mesopotamian officers would lose by it, as they get higher pay by remaining on regimental rates, owing to the higher rates of pay of Royal Engineer officers on the Indian Establishment.

Salonika Expeditionary Force.

Mr. BILLING asked the Under-Secretary of State for War whether he could give the House any information as to the condition of our troops in Salonika?

Mr. MACPHERSON: I would call the attention of my hon. friend to the detailed statistics issued on August 9, 1917, to which I have nothing to add beyond stating that the improvement in health in comparison with former years is maintained.

Troops in India.

Mr. NIELD asked the Under-Secretary of State for War whether he was aware that considerable differences of opinion existed between the local Indian military authorities and the officers commanding battalions sent out to India for garrison duty to replace troops withdrawn for active service in the field as to the physical capacity of many non-commissioned officers and men in such substituted battalions who were suffering from (*inter alia*) v.d.h., rupture, varicocele, chronic bronchitis, asthma, rheumatism, and frost-bite, to perform in India the ordinary duties of native garrison battalions or sound and seasoned European troops; and whether any commanding officers have been removed from their command because of their action in limiting the duties of such substituted battalions to work which their physical condition would allow them to perform having regard to the climate?

Mr. MACPHERSON: So far as my information goes, the answer to both parts of my hon. and learned friend's question is in the negative. I should, however, be glad to receive any information which he may have in his possession.

Mr. NIELD asked the Under-Secretary of State for War how many non-commissioned officers and men belonging to battalions sent from home for garrison duty in India had either died or had been invalided to England within the past eighteen months; and to what extent such deaths and invaliding had been attributable to their unsuitability for full garrison duty under the climatic conditions of India?

Mr. MACPHERSON: I am afraid that this information is not available, and that it will be necessary to refer to India.

Palestine.

Mr. LYNCH asked the Secretary of State for Foreign Affairs whether, in regard to the future disposition of Palestine, he had kept in mind the century-long interests of France in that region; and whether, in all the steps hitherto taken and in the promises made, such as that of the restoration of the Jews to Jerusalem, he was acting in complete accord with the representatives of the French Republic?

Mr. BALFOUR: The hon. gentleman need be under no apprehension that in our policy in Palestine we shall fail to show the fullest consideration for the opinions of our Allies.

Mr. LYNCH: While recognising that, has an accord been already established, so that the Allies are working together in this matter?

Mr. BALFOUR: Yes; we are working in the fullest accord.

High Courts of Judicature.

Sir JOHN JARDINE asked the Secretary of State for India whether the Government of India had any intention to recommend the issue of letters patent setting up High Courts of Judicature for the Province of Burmah or the Province of the Punjab?

THE PRESIDENT OF THE BOARD OF EDUCATION (Mr. Herbert Fisher): As regards the Punjab, the Secretary of State for India has announced that after the war, as soon as financial considerations permit, a High Court will be established for the Punjab. As regards Burma, he has received no recommendation from the Government of India on the subject.

University (Rangoon).

Sir JOHN JARDINE asked what were the causes of the delays of the Government of India in creating the university at Rangoon for the Province of Burma, seeing that sanction had been given a long time ago?

Mr. FISHER: The establishment of a university at Rangoon has been agreed to in principle, but the Government of India have not yet been able to submit to the Secretary of State for his sanction a detailed scheme for constituting it or for providing the funds necessary for its formation and maintenance. The matter is still under discussion between the Local Government and the Government of India. It is hoped that it may be possible to utilise the experience of the Commission which, under the presidency of Dr. Sadler, is now inquiring into the state of the Calcutta University.

Indian Soldiers (Dependants).

COLONEL YATE asked the Secretary of State for India whether pensions were only granted to the widows of Indian soldiers who had fallen in France or in other theatres of war and not to the children; whether, in the event of the death of the widow, the orphan children were left unprovided for; and, if so, whether orders would be issued for the continuance of the pension to the orphan children?

Mr. FISHER: An Indian soldier may nominate his wife, or a child, or certain other near relatives, to receive whatever family pension may be admissible on his death. The pension under present regulations ceases on the death of the nominated heir, but the Secretary of State in Council has under consideration proposals for continuing the pension to the children where they are unprovided for.

Roumania and the Armistice. December 17.

LORD R. CECIL, replying to Mr. KING, who asked whether the Prime Minister was in a position to say what the terms were under which Roumania had concluded an armistice, said that he had no information regarding the terms of the armistice negotiated by the Roumanians beyond what appeared in the Press, except that he understood that it would only be in connection with the general or local Russian armistice so far as duration was concerned.

PHRASE BOOK for OFFICERS and MEN

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. December	1917. December		1336. Rabia I.	5678. Tebet
21	8	Friday	7	6
22	9	Saturday.....	8	7
23	10	Sunday	9	8
24	11	Monday	10	9
25	12	Tuesday	11	10
26	13	Wednesday	12	11
27	14	Thursday	13	12

The King received at Buckingham Palace, on December 19, Lady Maude, widow of Lieut.-General Sir Stanley Maude, who succumbed last month to cholera in Mesopotamia. The King expressed to Lady Maude his keen regret at the loss of her gallant husband, and handed to her the insignia of the K.C.B., which would have been bestowed upon her husband had he survived.

Queen Mary, attended by the Lady Bertha Dawkins, visited the Grafton Galleries on December 19 to inspect the exhibition of Serbian art, and was received by the wife of the Serbian Minister, Mme. Yovanovitch, and the hon. secretary, Miss A. J. Dickinson.

December 15 was the third anniversary of the retaking of Belgrade by the Serbians in 1914.

The Roumanian Minister was among the diplomatic visitors to the Foreign Office on December 17.

The King of Serbia has conferred the Grand Cross of the White Eagle, with swords, on General Allenby.

The Muled El-Nebi, the anniversary of the Prophet's birthday, will fall this year on December 26.

M. Venizelos, accompanied by M. Romanos, the Greek Minister to France, visited the King of the Belgians on December 13.

M. Xenophol, the Roumanian Minister in Tokyo, has died after an operation. He arrived in Tokyo only recently.

Lady Rose Leveson Gower, wife of Commander the Hon. William Spencer Leveson Gower, gave birth to a daughter on December 12.

M. Venizelos, son of the Greek Prime Minister, who has been appointed Secretary to the Greek Legation in London, has entered upon his duties.

The Serbian Minister in Washington has received a telegram from the Czecho-Slovaks of America welcoming the declaration of war by the United States against Austria-Hungary, "our common enemy."

H.H. Lieut.-General Maharaja Sir Pertab Singh and H.H. Lieut.-Colonel the Raja of Ratlam had the honour of being invited to luncheon with the King and Queen at Buckingham Palace on December 17.

Lord Rothschild, on behalf of the Zionist organisations, accompanied by Mr. Tshellnow, Mr. Sokolow, and Dr. Weizmann, visited 10, Downing Street to congratulate the Prime Minister on the British entry into Jerusalem.

The Greek Minister and Mme. Gennadius are in mourning on account of the death of the eldest brother of Mme. Gennadius, Captain Malcolm Alfred Laing, late of the Hussars, and Lord-Lieutenant of the Orkneys and Shetlands.

A motion has been introduced in the United States House of Representatives congratulating the British Government on its support of a national home for the Jews in Palestine, and pledging the support of the United States in the undertaking.

The first batch of Bulgarian prisoners captured by the Greek troops on the Macedonian front has arrived at Athens, where those who are fitted for the work are employed in a large military vegetable garden on the outskirts of the town.

The King has been graciously pleased to approve of the award of the G.C.M.G. to General Sir Edmund Henry Hynman Allenby, K.C.B., Colonel 5th Lancers, Commanding in Chief Egyptian Expeditionary Force, in recognition of distinguished services in the field.

The King has also been pleased to appoint General Sir Edmund Allenby to be a Knight of Grace of the Order of St. John of Jerusalem in England

The marriage of Captain Ronald Sowerby Ruston, Cyclists Company, Suffolks, only son of Mr. and Mrs. Albert A. Ruston, of Grove Cottage, Exning, Suffolk, and Daphne, eldest daughter of Mrs. Mellis, of Hill Cottage, Duppas Hill Terrace, Croydon, took place at Alexandria, Egypt, on December 1.

The King has granted permission to Miss Lina Mary Potter, Licentiate in Medicine and Surgery in the Society of Apothecaries, London, to wear the Insignia of the Fifth Class of the Order of St. Sava, conferred upon her by the King of Serbia for her work with the Scottish Women's Hospitals for Foreign Service.

Mr. Ronald Storrs, Oriental Secretary to the Residency, has returned to Cairo from his visit to this country.

It has been decided, owing to the continued success of the Serbo-Croat Exhibition at the Grafton Galleries, to keep the exhibition open on Christmas Eve and Bank Holiday.

The *London Gazette* announces that Lieutenant-Colonel Edward Gelson Gregson, C.I.E., Indian Army, Reserve of Officers, has been awarded the C.M.G. for services rendered in connection with military operations in the field.

On the occasion of the birthday of Prince Alexander of Serbia a solemn service was celebrated on December 17 in the Cathedral at Corfu, in the presence of the Diplomatic Corps, the Allied Military Commanders and Admirals.

According to the *Messaggero*, the Pope will address a circular letter to all Bishops in belligerent States saying that, if any Christian country assists the Turks in an attempt to reconquer Jerusalem, it will be condemned by the Vatican.

During the celebration of the Feast of the Lights by the Jewish Battalion Lieutenant-Colonel J. H. Patterson read the following telegram from General Allenby :—"Your congratulations are warmly welcomed. Wish you had been with us." The message was received with great enthusiasm.

In a message sent to Mr. Wilson the Southern Slav Committee in London thanks the President for the stress he has laid upon the "liberation of the oppressed peoples of Austria-Hungary, which can only be compassed if these peoples and our people among them are completely separated from that autocratic State."

It is now stated that the Hon. Neil Primrose, M.P., was buried in the garden of the French convent at Ramleh, situated between Jaffa and Jerusalem.

Lieutenant the Hon. Alexandere Henry Louis Hardinge, Grenadier Guards, who is reported wounded, is the second and only surviving son of Lord Hardinge of Penshurst. He was born in 1894, and before receiving his commission in the Grenadier Guards was in the I.A.R.O., and was A.D.C. to his father when Viceroy of India. His elder brother, Lieutenant the Hon. Edward Charles Hardinge, D.S.O., died of wounds received in action in December, 1914.

The general conference of the Jugoslav Committee has recently been held in London under the presidency of Dr. Ante Trumbitch. The proceedings show that the Declaration of Corfu as the political programme of the entire nation has been accepted with approval and enthusiasm in all Serb, Croat, and Slovene circles in Europe and America. A special deputation of the Committee waited upon the United States Ambassador, Mr. Page, to express its satisfaction at the American declaration of war upon Austria-Hungary. An address was also telegraphed to President Wilson.

The Armenian Red Cross and Refugee Fund, of which Viscountess Bryce is President, appeals for funds to help Armenians by supporting the various guilds and unions which the refugees have reformed under new conditions for mutual help and relief. It is stated that there are 10,000 orphans to be fed, clothed, and educated, and that fifty-two orphanages exist for this purpose, but many more are needed. The Fund maintains its own orphanage at Alexandropol and helps others. Cheques should be made payable to the hon. treasurer, Mrs. Lydia Chambers, 35A, Elsham Road, Kensington, W.

Mr. Ronald McNeill, M.P., presiding at a lecture by Mr. H. Wickham Steed on "Jugoslav Christians and the New Europe," at the exhibition of Serbo-Croatian artists, at the Grafton Gallery, on December 15, said that one of our main war aims from the alliance with Serbia, Montenegro, Greece, and Italy, should be to promote such a rearrangement with the States bordering on the Danube and the Adriatic that all causes of disagreement between them should disappear and peace be preserved in that part of Europe. Mr. Steed said that the solution of the Adriatic problem lay in an honest and complete Italo-Southern-Slav agreement and alliance.

COLONEL BORTON PASHA.

A correspondent writes:—

When I read of Borton Pasha's appointment as Military Governor of "the new" Jerusalem—at least "a thousand and one" Military Governors of Jerusalem have preceded him—"I felt good," as our American children say. "Who is Borton Pasha?" asked the millions of religious and irreligious London. Little enough I knew, but they greedily listened; for the ancient lore, taught them in their nurseries, and half forgotten, returned and convinced them that the "conqueror of Jerusalem" had not selected his "Military Governor" without due regard for the fittest.

As a matter of fact, all the best men that England has passed through Egypt, including such names as Cromer, Kitchener, Wingate, Milner, Willcocks, Scott, and others, have, each in turn, come to international prominence as a surprise to the British people. Without exception they came to stay—Egypt being the h lf-way house of the known earth and seas. So, Colonel Borton, a mere Kitchener soldier when Kitchener was Sirdar, and subsequently appointed Postmaster-General of Egypt. To be P.M.G. of Egypt since 1883—Borton is the fourth—you must be a man of parts. General Allenby appointed in Jerusalem a man of parts. Could England have done otherwise? Until now she rarely has—from Drake to Kitchener.

War orders took me to Alexandria between August, 1916, and March, 1917. To-day there are three clubs in the city of Cleopatra to which all English or Allied officers are welcome. In the Union Club you might have met Colonel Borton Pasha, Postmaster-General, midday or evening, when not travelling on duty. If I remember rightly, he was President of that home of patriotism; he was the soul of it—I must use a French word—he was British *bonhomie* itself. Does he know the East? Well, if he does not, then Wingate, the present High Commissioner of Egypt, does not know the East.

If the Postmaster-Generalship of Egypt is a polyglotic job, as it is, what shall we say of the Military Governorship of the new Jerusalem? It will be a poly-ecclesiastic job. And who better fitted for the task than a soldier-administrator, whose dictionary does not contain the word fanaticism, and who knows how to be all things to all men?

THE CHURCH OF SERBIA.

Sir Thomas Jackson, Bart., R.A., delivered an illustrated lecture on "The Churches and Architecture of Serbia," at the Grafton Galleries, on December 7, and amply proved his thesis that in the fourteenth century Serbian architecture had a character all its own, and gave promise of a great future, when it was overwhelmed by the midnight of Turkish despotism. Serbian architecture was at this time marked by so much vitality and distinction that what it might have come to, had it not been interrupted, was a pleasant and interesting speculation. The Rev. Canon W. H. Carnegie, of Westminster, who presided, said that the British people were pledged to see that this war should not end without definite guarantees that Serbia should be reconstituted and reconstructed. But even so, she would still need our assistance, both spiritual and material. National history depended upon its spiritual elements, upon leadership, upon the type of men who came to the forefront. Serbia would need men of high character as well as great attainments; men who would work unselfishly on behalf of her people. Where was such leadership to come from, if not from the Church of Serbia? The Church was the spiritual embodiment of a race; it was the school of character. "You cannot do without it; you cannot displace it; it is the final court of appeal in these matters."

Given a spiritual, enlightened, and self-sacrificing Church, the future of Serbia was assured. The Church of Serbia had shared to the full in the tragic events that had overwhelmed the race. The whole ecclesiastical apparatus would have to be rebuilt when the war was over. The Serbian ecclesiastical authorities recognised this, and they had already come to the English Church for help. There were already a certain number of the more promising of the Serbian candidates for the priesthood in Oxford, and they hoped within the course of the next two or three months to have eighty or ninety under their auspices. There were already at Oxford men of the highest calibre and intellectual attainments. It would imply spiritual bankruptcy on our part, if we did not respond to Serbia's request. They welcomed these Serbian students, and wished above all that they should still remain Serbs, that they should not become anglicised, but become the natural leaders and guides of their race. Moreover, in trying to do this great thing, we had a unique opportunity of understanding the Slav race. It would be a great thing to establish a living bridge between the Slav and the Anglo-Saxon people. It was possible to have the most intimate commercial relationships with a people, and yet to remain utterly out of spiritual touch with that people. This the politicians were not always quick to understand. And yet Germany was a tremendous illustration of it.

OBITUARY.

Mr. Philip Longueville Barker, I.C.S., has died from enteric at Sialkot, Punjab. He was educated at the Charterhouse and Corpus Christi College, Oxford. He joined the service in 1898.

Lieut.-Colonel Edwin Christian Corbyn, Cavalry, I.A., who has been killed in action, saw service on the North-West Frontier in 1897-8, in the Tirah expedition, and in South Africa in 1902.

The Rev. S. Scott Allnutt, head of the Cambridge Mission to Delhi and Canon of Lahore Cathedral, died at Delhi on December 9 at the age of sixty-seven years. He was educated at St. John's College, Cambridge, and went out to India in 1879 on behalf of the Cambridge University Mission.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

BALLARD.—On December 17, the wife of Edward Ballard, Indian Agricultural Service, Lieut., Royal Field Artillery, of a daughter.

MAYNE.—On December 11, at Lyallpur, the wife of Major Eric M. Mayne, Army Remount Department, India, of a daughter.

MARRIAGES.

ROBINSON-WAKEMAN—LONG.—On November 15, at the British Consulate, Alexandria, and afterwards at St. Mark's Church, Rear-Admiral Sir Henry Robinson to Margaret, widow of the late Judge Wakeman-Long.

DRAYSON—LANE.—On Wednesday, October 10, 1917, at Lansdowne, U.P. India, Captain F. G. Drayson, M.C., Border Regiment, elder son of Captain A. F. H. Drayson, R.M., and Mrs. Drayson, The Mount, Brading, Isle of Wight, to Lilias, younger daughter of Lieutenant-Colonel D. T. Lane, I.M.S., and Mrs. Lane, Lansdowne.

ROLL OF HONOUR.

RUSSELL.—Killed in action on November 22, Captain Charles Russell, East Yorks Regt., attached Indian Army, youngest son of the late Champion Russell, of Stubbers, Essex, aged forty-five.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

FRIDAY, DECEMBER 21, 1917.

THE DELIVERANCE OF JERUSALEM.

The world has done well to recognise in the capture of Jerusalem a great moral event. Five weeks previously the British Government had indicated the spirit in which it had undertaken the invasion of Palestine by announcing its resolve to facilitate the establishment in the Holy Land of a national home for the Jewish people. At that moment General Allenby's force was still on the threshold of the country. Beersheba had been taken, but the enemy barred the way in front of Gaza. Almost before Zionism had had time to realise that it had received its charter, the British advance began. Gaza, Askalon, and Jaffa fell in quick succession, and Jerusalem was threatened. The first attempt to approach it from the north-west failed. Turkish reinforcements had been hurried up, and were able at one point to recapture ground that the British had occupied. For a short space it seemed as if the advance had been definitely checked. But with a feint on his left flank, General Allenby suddenly set his right wing in motion and delivered his real attack by the more difficult southern approaches. Hebron and Bethlehem were captured, and, passing to the east of Jerusalem, the British forces had completely turned the Turkish position at El Jib on the Nablus road. The enemy was forced to fall back along his whole front, and the surrender of Jerusalem was effected without the necessity of aiming a single shell in the direction of its walls. This circumstance, the manner of the British entry into the city, and the arrangements made for its temporary administration, have enhanced the moral effect of an event which has sent a thrill through all the nations of the world. No effort has been spared to respect the susceptibilities of Christian, Jew, and Moslem. Jerusalem, as a result of General Allenby's strategy, has experienced a minimum of the exigencies of war; the city remains under military occupation, but the main British force has passed on northwards, and behind the security that it provides the *Pax Britannica* has fallen upon the Abode of Peace. The inhabitants are bidden to pursue their lawful callings without fear of interruption. All that is held in reverence in Jerusalem by the adherents of either of the three great religions of mankind is to be maintained and protected according to the existing customs and beliefs of those to whose faith they are sacred.

But while it is right to emphasise the moral effect of the occupation of the Holy City, it will not be overlooked that the event is not without its military significance. In the first place the progress of the expedition indicates that so far the British forces have proved themselves superior to the enemy in numbers and generalship. Marshal von Falkenhayn may yet have to be reckoned with; but he has been unable to prevent the one success needed by British arms to clinch the whole-hearted support given by the Arab world to the Allied cause. It is likely to prove of no small military importance that a further blow has been dealt at the prestige of the Committee of Union and Progress, and that yet another bone of contention has been thrown between the Turks and the Germans. Apart from the success at Gallipoli, disaster has dogged the Turks since they entered the war under German compulsion. The Constantinople régime has contrived to keep a section of the people in ignorance of the fall of Baghdad; but it can hardly hope to repeat the achievement in the case of Jerusalem, even if it wished to do so. If the promise of the early stages of General Allenby's campaign is maintained, it should not be long before Beirut and Damascus are threatened, particularly if the Arabs, who were long ago reported in the neighbourhood of Ma'an, are now able to guard the British flank by a simultaneous advance up the Hejaz Railway. Although news may be suppressed in Mesopotamia, it does not follow that the knowledge of the bazaars of Damascus and Aleppo can be kept out of Constantinople. Sooner or later, indeed, the time must come when the Committee will have to choose between a breach with their German masters and an attempt to appease their own countrymen. The policy of monetary loans to the Cabinet is proving an unsatisfactory substitute for military assistance to the Turks as a whole, and, now that the recapture of Baghdad has not materialised, no amount of promises from Berlin, it would be thought, will dissipate the hard fact that Turkey alone among the countries of the Central Alliance has steadily lost ground throughout the war. The fall of Baghdad was a political blow of the first importance; the loss of Jerusalem, after the secession of Mecca, must destroy all that is left of the Turkish Government's prestige in the eyes of the Moslem world.

For the present the future of Jerusalem is left indeterminate. A British Military Governor has been appointed, and his administration, it may be presumed, will be maintained at least until the end of the war. No deference to religious susceptibilities, however, and no desire to avoid prejudging the ultimate status of the city ought to prevent the British authorities from carrying out the obvious and essential duties imposed upon a civilised régime. By common consent Jerusalem as a modern place of residence is insanitary, and leaves much to be desired in other respects. No time should be lost in making a start to remove these reproaches. The Eastern mind is not always attuned to Western "improvements"; but in the long run it values the results of municipal cleanliness and sanitation when they are carried out by others. There is little chance that a nation which frames or endorses General Allenby's proclamation to the inhabitants of Jerusalem will allow reforming zeal to outstrip discretion. In this connection we may deprecate the suggestion that a duty is imposed upon Christendom to remodel Jerusalem in accordance with the prior claims of Christianity. The proposal has been made in quarters that are usually regarded as responsible; but it is impossible to believe that it will win either national or Governmental sanction. It is true that the Jews once had a temple on the Rock, but the Kubbet-es-Sakhra is there to-day, and it is an object of veneration annually to thousands of pilgrims from all parts of the Mohammedan world. General Allenby has been better advised to leave it in the hands of its Moslem guardians, and if the spirit that prompted his decision is maintained, there may still be peace in Jerusalem, and there will be a better chance of peace among Moslems both within the British Empire and outside it. For some time to come the administration of Jerusalem will have its hands full in supplying the immediate wants of the civil population. Our enemies are not infrequently able to teach us valuable lessons. The Germans have given us one in arranging for trade within the widest possible limits to follow upon the heels of the armistice with Russia. The British Government would do well to pay more attention to this subject in the wake of its victorious armies in Mesopotamia and in Palestine. It should not be beyond the powers of organisation to ensure that, in addition to the urgent relief measures which have to be carried out, the inhabitants have their past hardships alleviated to some extent by an early revival of trade, and that—it ought not to be necessary to insist—British.

THE PALESTINE ADVANCE.

The capture of Jerusalem concludes one phase of our Palestine advance, but it can only be considered as one step towards our ultimate goal. Although the city itself seems secure, there is evidence from the official reports that the enemy have retired no great distance. The present lines appear to follow the Nahr el Aujeh from the sea westwards. A few days ago they were at el Burj, but now in the left centre—*i.e.*, in the low foothills of the Samaritan Mountains, they have advanced through el Midieh and Kibbiah to the ridge overlooking et Tireh —in the plain. In the centre we have no official data showing how far we have pushed along the Nablus road—not apparently further than el Bireh, if as far. There has been fighting to the north-east, and the Turks have been driven back, but evidently until all is organized for a further great advance nothing much will be done here. It is surprising to learn that on the 18th—so long after our capture of the city—Turks had to be driven out of the high-ground east of Abu Dis—only two miles south-east of the city.

I propose now to give a brief account of some of these spots which have been mentioned in the recent fighting. The name Nahr el Aujeh—the "crooked" river—has occurred in several despatches, and will no doubt do so again. It is the largest river in Western Palestine, though but a short one. It rises at a large fountain, Ras el Ain, some ten miles eastward from the sea. Here there is a square embattled fort, a mediæval building very like that at Solomon's Pool. Many suppose that Antipatris, a pleasing site described by Josephus, stood here. The course of the Aujeh is through low-lying banks of deep alluvial soil, and a heavy rain—such as occurs at intervals during this and the next two or three months in Palestine—causes floods, which convert the lands around into a quagmire. This river is the most southern of several such springs which traverse the Plain of Sharon from east to west, and all the plain is liable to become a sea of shallow lakes and liquid mud after a long spell of rainfall.

The banks of the Aujeh at other seasons are a favourite picnic place for the people of Jaffa. They go by carriage—much of the way through sandy soil—past the German colony of Sarona, and after a drive of some two and a half hours reach the river bank close to one of the numerous mills. Here is a beautiful mill-pond, with waterlilies and, what is so much appreciated in the Orient, abundant running water. It is possible to boat here on the little stream, but lower down its course this is not without danger, as the current is swift and apt to carry a boat over a dangerous bar where many a skiff has been capsized. The banks of the Aujeh are the haunt of the buffalo, as may be supposed by the name Birket el Jamus, "the pool of the Buffalo," a spot some seven miles east of Jaffa where Australian horsemen recently distinguished themselves by capturing 147 soldiers and two Turkish officers.

That the Aujeh should have been selected by the Turks as their line of defence was inevitable. After they were driven out of Wady es Surar there was no such line of natural strength south of the Aujeh. The river is wide and deep enough to form a considerable impediment to our advance, although we may hope it may be possible to turn it by our progress on the drier and hillier districts to the East. Long years ago Alexander Jannæus tried here to resist the southward progress of Antiochus by erecting a fortified wall, with wooden towers, between Kaphar Saba (now Kefr Saba) and the sea. The Syrian king, however, burnt the towers and swept away the defences.

It may be mentioned that Aujeh (or Auja), meaning crooked, is a common name in these parts, and a very appropriate one. El Auja, south of Beersheba, has been mentioned in our earliest reports, and there is another Nahr el Aujeh near Jericho. Indeed, as Sir G. A. Smith points out, by a curious coincidence these two rivers—one east and one west of the Central mountain ridge—may be considered geographically the eastern and western extremities of the boundary between Judæa and Samaria.

Eastwards of the Nahr el Aujeh, the first definite point mentioned is el Burj, literally, the tower, a place so called because of a tall square ruined tower—the remains, it is said, of the Château d'Arnauld, built by Richard I.

To the north-west of this is el Midieh, the site of Modin, famous as the home of Mattathias, the father of the Maccabees. It was the scene of the outbreak of the Jews against Antiochus IV. (I. Macc. ii., 15-28). The village lies a little off the old Roman road. There are considerable antiquarian remains around.

Kibbiah, some four miles due north of el Midieh, is generally identified as Gibbethon, where Nadab was slain by Baasha (I. Kings, 15-27), and, twenty-five years later, Omri was made king (I. Kings, 16, 157).

The remaining place of interest, Abu Dis, will be remembered by most recent travellers on the Jerusalem-Jericho road. It is a prosperous village occupying a lofty ridge, dominating the Jericho-Jerusalem road in the neighbourhood of Bethany. Few tourists visit it, but all see it. Through Abu Dis an important ancient road runs to the Dead Sea district. Many years ago the people of Abu Dis used to plunder travellers going to Jericho; the Turkish Government, finding it too much trouble to suppress them, made them guardians of the road, and, until quite recent years, all parties of travellers going to Jericho had to take one of these ruffianly-looking horsemen—bristling with antique swords, daggers, and pistols—on the journey down and back. A fixed tariff to these "guards" replaced—and led to the suppression of—the unrecognised robberies.

Like Bethany, Abu Dis is practically on the borders of the Wilderness of Judæa, and if this ridge is cleared, the enemy must now be at considerable disadvantage in this part.

E. W. G. M.

CROATIA.

Speaking at the Grafton Galleries on December 10, Dr. Seton-Watson said that the Southern Slav question was that of how Serbs, Croats, and Slovenes—kindred by race, but who had never been under one rule—could come together. They spoke one language, the only difference being in the alphabets with which it was written. No geographical line could be drawn between Croats, Serbs, and Slovenes, they were inextricably mingled. In the tenth century—two centuries after Serbs and Croats had made their way into that part of Europe—Croatia had already a national existence under its own dynasty. It had a highly developed art, and the Slavonic liturgy of that day was still preserved in about three hundred Roman Catholic churches along the Dalmatian coast. But in 1102 the independent Croatian kingdom was involved in war, overrun by the Hungarians, and came to an end. Since that time Croatia had owned allegiance to the Hungarian Crown, but had never lost its autonomous position, and had always maintained its constitutional claim as a sort of semi-federal State with Hungary. In 1912 the Hungarian Government, in defiance of all law and constitutional right, suspended the Croatian constitution. That was the year of the first Balkan war, and it was natural for the people of Croatia to contrast their own politically enslaved condition with that of their kinsmen, of whose splendid achievements they were hearing. Thus arose a revolutionary movement which the moderate men were not able to hold back, and of which the assassination of the Archduke Francis Ferdinand was one result. Austria-Hungary might even then have adopted a policy of radical reforms for her Southern Slav subjects such as would have pacified them and made peaceful relations with Serbia possible, but she adopted instead a policy of repression, so that when the present European war broke out Serbia stepped naturally into the position of being the Piedmont of the Southern Slavs.

FEZ.

(The writer was asked "What he thought of Fez?" Having no answer ready for this silly question, he referred it to inhabitants of the four following classes, and this is what they replied):—

THE MOOR: Home of my fathers, at whose gate
The tide of conquest rolls,
Last bulwark of our Western state
For true-believing souls!
Ah, woe is me, for Islam's sword!
Thy will be done, Almighty Lord!

THE JEW: A royal palace round whose walls
My race, like ivy, clings.
Now rules the Christian in these halls?
So let him! Earthly kings
Are all alike, so they uphold
My life, my freedom—and my gold.

THE GOOD COLONIST:—
(There was some difficulty in finding a representative of this class.)
A goodly vineyard! Grant, O Lord,
That I in it be blest!
Bless it in me! Thy grace afford,
That I may toil my best;
Nor e'er forget in search of pelf,
To love my neighbour as myself.

THE BAD COLONIST:—
A lucky-tub! It do stink some;
But, Oh! the boodle's here.
Just shove aside the native scum,
And grab your bit and clear!
Down, niggers, down! Up, shares! I say;
These native swine have had their day.

—ANON.

AUSTRIA AND THE SOUTHERN SLAVS.

Mr. H. Wickham Steed, in the course of his second lecture on December 8 on "Austria," at King's College, London, said that the President of the Board of Education, on the occasion of the first lecture, had asked a question relative to the movement among the Southern Slavs of the Austrian Empire towards unity with the kingdom of Serbia. Mr. Fisher had then seemed to doubt whether the Croats, who, in the past, had been the most loyal henchmen of the Hapsburg crown, were to-day really disposed to turn their backs upon it and to throw in their lot with their kinsmen of the kingdom of Serbia and the other Southern Slav lands. The question was embarrassing, because the bulk of the Croats lived under Austria, watched by the Austrian secret police, and subject to Austrian reprisals. Words spoken by himself might be followed by a terrible persecution, with imprisonment, and the gallows for those who had shown themselves to be at heart our friends. But one thing might be said. On the previous Wednesday, at a small luncheon at the House of Commons, there were assembled some dozens of Southern Slav officers who, at the beginning of the war, had belonged to the Austro-Hungarian army, who had surrendered voluntarily to one of our Allies, who were now commanding divisions of Austro-Hungarian Southern Slav troops, who had also surrendered voluntarily, and who were now about to join Serbia in order to fight against Austria-Hungary.

The lecturer then traced the history of Austria from the accession of Francis Joseph until to-day. Dealing with the rise of the Southern Slav question, he said that when it began to assume a practical form, it confronted the Hapsburgs with another problem not unlike those of German and Italian unity—problems which they had signally failed to solve in their own interest, because of a lack of the moral sense which is inseparable from constructive insight in politics. The question was whether the Southern Slavs were to be united with and for or in spite of and against the Hapsburgs. A policy was adopted of endeavouring to bring the whole Southern Slav race within the Austrian dominions by moral suasion, force, fraud, or any other means; and it was in pursuance of this policy that the assassination of the Austrian Heir Apparent was permitted. "The more," said Mr. Steed, "the details of the crime are studied, the more it becomes evident that the murder was deliberately permitted, if not organised, by the Austro-Hungarian authorities, in order to provide a pretext for a war which, by enabling Germany and Austria-Hungary to crush for ever Serbia and the Southern Slavs, should open the German road to the Balkans, Constantinople, and Asia Minor."

The Serbian Minister, who was present, moved a vote of thanks to the lecturer. In doing so, he said that Mr. Wickham Steed had shown in his writings that after the present war Austria ought to cease to exist. It was an empire composed of peoples of different nationalities, each of which wished to be independent and to lead its own individual life.

THE PRESS ON THE NEAR EAST

An Austrian View of Serbia's Future.

The following summary of an article written by the Austrian historian Heinrich Friedjung for the *Vossische Zeitung* is not calculated to encourage those who believe that the Central Powers are already in a mood of sweet reasonableness that is encouraging to the prospects of peace overtures:—

The writer says that it will be the duty of the victor to consider carefully the good of the Serbian people, and not to make it pay for the sins of its King and his advisers. The uniting of Serbia with Austria-Hungary would fulfil the desires of Serbo-Croats for national unity. This desire would also be realised by an autonomous Serbia, closely bound to Austria-Hungary by economic ties. In this way the Serbian people would emerge from the struggle victors in spite of its terrible sufferings. The House of Hapsburg would give better guarantees for the prosperous development of the Serbian people than its own national dynasty, which is responsible for all Serbia's troubles. It would be quixotic on the part of the Austrian Government to restore the Karageorge dynasty. From the point of view of the military security of Austria-Hungary the incorporation of Serbia is eminently desirable. If Serbia kept her army and her independence, she would be used as a tool by fanatics, supported by English, Russian, and Italian money. If she were incorporated in the Austrian Empire only small garrisons would be necessary. This is what would happen, if Germany and Austria could dictate terms of peace. However, other Great Powers will have to be consulted, particularly Russia. There is, nevertheless, a minimum upon which the Central Powers must insist. Even an autonomous Serbia must be bound as closely as possible to Austria-Hungary. The Serbian State can be restored, but not the Serbian army. Serbia could be made to choose between the disbandment of her army and the placing of it under the command of the Emperor of Austria. She would most likely choose the first alternative. In return for this Austria would allow Serbia to export her products northwards free of duty. The foolish policy of a tariff war against Austria's small neighbours must be abandoned. If the Serbian peasant does not have his son taken away for military service, and if he can export the products of the soil to Austria, he will be in an extraordinarily favourable position.

It would be a criminal error, the article continues, to unite Montenegro and Serbia and to set up a Montenegrin dynasty at Belgrade. Montenegro could be allowed her independence with the same precautions as those taken in the case of Serbia. Obviously Mount Lovtchen cannot be given back to her. Enemy statesmen, it is added, make fine speeches about even small nations being allowed to decide their own fate. But at the end of the war the great States will make use of the little ones in payment of their indemnities. Austria and Bulgaria will decide upon the future of the Balkans. At the Peace Congress the details of that settlement will have to be discussed, but in general there will be little change from the present position. There already exists a Balkan alliance between Austria, Bulgaria, and Turkey, and to this alliance Serbia will have to conform.

The Pan-Turanian Movement.

Continuing his analysis of the Pan-Turanian movement, the writer of the article entitled "Turkey, Russia, and Islam," in *The Round Table*, from which an extract was given last week, deals with the policy of the Committee of Union and Progress. He had shown how during the century ending in the years 1912-13 the centre of gravity of Turkey had shifted from Europe to Anatolia, and the Turkish nation conceived the ambition of making up for lost alien subjects by attracting to itself the scattered branches of the Turkish race outside the Ottoman frontiers. The article proceeds:—

Irredentism gave a new significance to the linguistic reforms of the Ziya Bey Group, for the Ottoman literary language, relieved of its special Arabic and Persian borrowings and reinforced by an eclectic pure-Turkish vocabulary, might become a *lingua franca* for all who spoke the various living Turkish dialects. The Pan-Turanian movement was thus advancing on to purely political ground, and at that point it was taken up by the Committee of Union and Progress.

The Committee were not Nationalists to begin with, chiefly because they ignored the nationality problems of the Ottoman Empire. Their primary aim was to maintain the integrity of the Empire, especially in Europe, and in this they agreed with Abd-ul-Hamid and all previous rulers of Turkey. They only differed as to the means; for, while Abd-ul-Hamid believed in despotism at home and a balance of jealousy among the European Powers, the Committee held that Turkey's best safeguard was internal strength, and the best source of strength political liberty. Their ideas of liberty were drawn from the French Revolution. "Liberty, Equality and Fraternity" would be proclaimed, all inhabitants of the Empire would rally to the State as free Ottoman citizens—just as Picards and Marseillais and Alsatians rallied to the French Republic after 1789—and the question of Nationality would solve itself.

This actually happened for the first six weeks after the proclamation of the Constitution in 1908. Men of all creeds and races embraced each other in the streets. But then they drew apart again and considered how they might turn the new régime to their own advantage. The Balkan nationalities rejected the

Digitized by Google

offer of a liberal Turkey altogether, and determined to take the first opportunity of completing their own unity and independence at Turkey's expense. Others, like the Arabs, the Armenians, and the Constantinopolitan and Anatolian Greeks, recognised that secession was impossible, but took measures to defend their own national individuality within the Ottoman State. The Arabs formed the main opposition in the new Parliament; the Armenians also wished for decentralisation, though they co-operated in Parliament with the Committee. The Committee found, in fine, that the Turks were the only element in the Empire that was not opposed to centralisation and had no political ideal incompatible with the Ottoman State idea. They therefore fell back upon their Turkish nationality, and came to think of Turkification as the natural means of achieving their ends. After the Balkan War they incorporated Turkification in their programme, but it is important to examine precisely what place they gave it.

It has been shown above that the Turkish version of Pan-Turanianism contains two general ideas : to purify and strengthen the Turkish Nationality within the Ottoman Empire, and to link up the Ottoman Turks with the other Turks in the world. These objects were first pursued in the cultural sphere by Ziya Bey's private group of "Intellectuals" and were promoted by peaceful propaganda. After 1913 they took on a political form and were incorporated in the programme of the Committee of Union and Progress. But while for Ziya Bey's followers Pan-Turanianism was an end in itself, for the Committee it is only an instrument. They will not give up movements that conflict with it, like Pan-Islamism, if these movements can still serve their turn, and they will not persist in it indefinitely in circumstances where it does not pay, as it is not paying at present in Syria, Mesopotamia and Arabia.

The contrast between academic Pan-Turanianism and the Pan-Turanianism of the Committee of Union and Progress can be drawn with precision.

The first aim of the Ziya Bey group was to purge the Turkish language and culture from foreign (*i.e.*, chiefly Arabic) influences. They were ready to violate some of the strongest prejudices of Islam for the sake of carrying this aim to its logical conclusion. The first aim of the Committee is to purge the Turkish State from foreign (*i.e.*, chiefly European) influences : extra-territoriality of foreign subjects, foreign control of Ottoman finance, railways, raw materials, and education. The doctrinaires dared to defy Islam; the Committee are far too prudent to defy Islam, but they have defied Europe. When the Concert of Europe broke down, they intervened in the war and denounced the Capitulations. And in 1916 they passed a "language ordinance" making the use of Turkish compulsory, after a year's delay, for banks, newspapers, trams, railways, steamship companies, book-keeping of private firms, and all business of a remotely public or legal character.†

Secondly, the doctrinaires proposed to strengthen the Turkish nationality in Anatolia by education and social reform. The Committee's method has been to exterminate the non-Turkish nationalities scattered through the country—first the Armenians and latterly the Greeks—and to give their lands and houses to "Muhajirs" (Mohammedan refugees from the provinces lost in 1912-13, partly Turks, but partly Slavs from the Balkan Peninsula and Greek-speaking Mohammedans from Crete). Another motive for the atrocities has been to make the war popular among the Turkish population by sating it with Armenian plunder—a purely temporary and opportunist aim—and they were also an appeal to that reactionary spirit of Mohammedan fanaticism against which the doctrinaires have declared war.

Thirdly, Tekin Alp seeks to change the political ideal of the Ottoman Turk from Imperialism to Irredentism—from ruling over alien Christian nationalities in Europe to "liberating" kindred Turkish populations in Russia and Central Asia. For the Committee it is rather a quantitative problem. In the Balkan War they lost territory, population and military prestige on their European frontiers. In the European War they hope to compensate or even out-balance these losses by corresponding gains in Asia and Africa; and here appears a fourth motive for the Armenian massacres, for the Armenians are an alien block separating the Ottoman Turks of Anatolia from the Azerbaijanis of Northern Persia and Russian Trans-Caucasia.

It is clear from the foregoing analysis that Pan-Turanianism is not the only weapon used by the exponents of Turkish aggrandisement. They possess another and an older weapon in Pan-Islamism. And in nothing is the opportunism of the Committee of Union and Progress more evident than in their attempt to use them both together. For, as has been shown above, the two creeds conflict. If Pan-Islamism were really a religious doctrine it would not be so incompatible with Pan-Turanianism as it is. But just as Pan-Turanianism is not really a racial movement, so Pan-Islamism is not really a religious movement. Both of them are political programmes for increasing the power of the Ottoman Empire abroad—rivals in the same field.

Most of the religious revivalism in Islam during the nineteenth century has been definitely anti-Ottoman. The Wahabis of Nejd and the Mahdists of the Egyptian Sudan both regarded the Turks as little better than Franks and Infidels; the Senussi retired to the Libyan desert to escape the contamination of Stambul. It is noteworthy that the supporters of all these movements were Arabs, were uncivilised, and were independent, by force of arms, of either Ottoman or European control. The Ottoman doctrine of Pan-Islamism appealed, on the other hand, to settled, civilised Mohammedan populations under the government of European Powers like Britain, France, and Russia. These populations had seen enough of European institutions to wish for them themselves. They aspired to become self-governing nations playing an independent part in international politics, and they admired Turkey because they believed her to be a Mohammedan State which already realised their ideal. They were not sufficiently well-informed to see through Turkey's European masquerade to the weakness and corruption underneath; they only saw in Turkey a model of what they hoped themselves to become, an existing guarantee for the political future of the peoples of Islam. For Islam is theoretically a political as well as a religious society. The Khalif is the temporal ruler of all good Mohammedans, as well as their religious head. It is true that this political unity broke down within a century of Mohammed's death, and has never been fully restored. But if the Khalif cannot exercise this universal power, the best alternative is that he should be an independent sovereign, powerful enough to make his wishes felt by the other sovereign Governments of the world, and this condition is fulfilled by the Sultan-Khalif at Constantinople; for the Ottoman Empire is the strongest and most enduring Mohammedan State there has been since the fall of the Abbasids.

The possibilities of political propaganda on these lines were perceived and cleverly exploited by Abd-ul-Hamid. The Ottoman strategic railway from Damascus to Medina, largely built out of the contributions of the Faithful from foreign countries, is a good example of his diplomacy; and this policy has been continued by the Committee of Union and Progress. In Tripoli, for instance, before the Italian conquest, the Ottoman Government was regarded by the natives as an irksome foreign oppression, but Enver Bey succeeded in winning over native sympathies; the Libyan Arab now looks on the Turk as his natural ally against the European invader; and even the Senussi have made common cause with him during the European war. It will be seen presently how the same policy has been developed in Asia.

Now this Pan-Islamic propaganda would be crippled at once by a logical following-out of the Pan-Turanian idea. If the Ottoman Empire is not an Islamic Great Power but a Turkish National State, and if Turkish Nationalism and Islam are ultimately irreconcilable, then the special ties which link the Mohammedan populations of other States to Turkey are broken. There is no more salvation for them in Turkey than in the British Empire or Russia or France, and the Committee of Union and Progress have no more claim on them than their established Governments. The Committee are well aware of this, and have avoided committing themselves openly to the Pan-Turanian creed where it is in flagrant contradiction to the Pan-Islamic. The Allies have laid hold of anti-Islamic and anti-Arab declarations by Pan-Turanian writers and acts of tyranny and repression by officials of the Committee of Union and Progress in the Arab provinces, and these have served excellently as anti-Turkish propaganda in the Arab world. But it would be difficult to convict the Committee, as a party or a government, of a Pan-Turanian programme which would discredit their Pan-Islamic professions.

The policy of the Committee, in fact, is to exploit both movements at once. While they find Pan-Islamism the more useful of the two abroad, it is clear that they set more store by Pan-Turanianism at home. Their object being to convert the Ottoman Empire into a highly organised militaristic State on the German pattern, they naturally find a more appropriate basis in common language than in common religion; and the following passage occurs in a resolution passed at the Congress of the Committee of Union and Progress in October, 1911 :—

"The character of the Empire must be Mohammedan, and respect must be secured for Mohammedan institutions and traditions. Other nationalities must be denied the right of organisation, for decentralisation and autonomy are treason to the Turkish Empire. The nationalities are a negligible quantity. They can keep their religion but not their language. The propagation of the Turkish language is a sovereign means of confirming the Mohammedan supremacy and assimilating the other elements."

This smooth assertion of contradictory principles is an excellent example of the Committee's attempt to blend the two ideas in their internal policy. It also reveals on which they lay more stress. The suggestion that the subject nationalities "may keep their religion but not their native language" is a complete reversal of the traditional policy of the early Ottoman conquerors, who allowed the Albanian and Bosnian nobility to keep not only their language but their estates when once they had accepted the Mohammedan faith.

† The stringency of the original draft was afterwards somewhat relaxed in the passage of the Bill through the Senate.

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS OF THE ARMY.

At an Election of Four Pupils at £20 a year on the 18th December, 1917, the following was the RESULT of the POLL:—

SUCCESSFUL.

	Votes.		Votes.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

At the general meeting of the Khedivial Mail Steamship and Graving Dock Company on Tuesday, the chairman, Lord Ernest Hamilton, went fairly fully into the causes of the fall in profits during the past year. The decrease in the net results—the net profit was £24,062 6s. 9d., as against £51,957 3s. 1d. in 1915-16—was mainly due, he stated, to the increased price of coal and to the increase in the cost of insurance against war risks. These items were respectively £48,000 and £124,000 higher than the previous year. As to the prospects of the coming year, he expressed the view that the position was very doubtful, and he went on to explain that the company was suffering through the operation of what are known as Blue Book rates in regard to four small ships trading between Egypt and the United Kingdom. The ships, he explained, were small, were slow sailers, and being old and designed on rather obsolete lines were very expensive to run. The Blue Book rates in this case fell far short of the actual running expenses, so that these four ships were entailing an actual loss to the company.

The general prosperity of banking institutions is reflected in the announcement that an increased final dividend is recommended by the directors of the Imperial Bank of Persia. The distribution now proposed is 5s. per share, as against 4s. a year ago and 3s. in 1915, making the return for the year ended September 30 8s., as against 7s. in 1916 and 6s in 1914-15. The dividend works out at the highly satisfactory rate of £6 3s. 1d. per cent.

***

The remarks I have made from time to time regarding the volume of India's pre-war trade with Russia were fully borne out by Mr. Chadwick, Indian Trade Commissioner, in the paper he read before the Royal Society of Arts, a summary of which is given on another page. India was under the impression that, outside tea, her exports to Russia were a negligible quantity, and, including that commodity, the direct trade only amounted to one and two-thirds millions a year. But that was very far from being the case, India's trade with Russia really totalling three or four times that amount. What may be called the hidden balance was accounted for, of course, by re-exports from Germany. According to Mr. Chadwick, there are possibilities of increasing direct trade between India and Russia after the war, and he also called attention to the possibilities of increased trade with France and Italy.

As regards Russia, however, the position is complicated at present by the fact that communications are not calculated to encourage direct trade intercourse with India, and a considerable interval must doubtless elapse before the Persian route is developed into a really serviceable trade channel. And in the meanwhile the possibility has to be faced that Germany will be able to re-establish her old trade influence over Russia, and should that happen, I fear that the Russian market would not be a profitable medium for Indian trade. Already, it may be pointed out, the Germans are taking advantage of the Russian situation by trying to re-commence trade while the armistice remains in force. Indeed, one correspondent spoke of the German troops being equipped with goods for the purpose of barter as soon as prolonged fraternisation made the process possible. This, if it be correct, affords a charming glimpse of the German mentality. With the enemy it is evidently a case of "Trade follows the gun," instead of "Trade follows the flag."

***

Lord Inchcape's speech at the general meeting of the P. and O., to which I referred briefly last week, is by far the most important utterance made on behalf of the mercantile marine during the war. It shows very plainly that shipping interests are deeply concerned regarding the future of the industry, owing to the absence of an official announcement by the authorities as to their post-war policy. That the Government should contemplate adding to their enormous responsibilities the control of this great industry is unthinkable, and it is a pity, therefore, that some more definite statement of policy has not been made than is contained in the remark of Mr. Bonar Law that the amount now being invested in standard ships would come back to the Treasury when the ships were sold.

***

There is, of course, no question that there have been indications calculated to disturb shipping interests. As Lord Inchcape put it, "we observe a disposition on the part of a certain section in this country, notwithstanding all that shipowners, by their enterprise and energy, have done for the nation, to wrest their business from them, and to work the shipping industry as a national affair." It would be interesting to know if those whose minds run on these lines ever realise exactly how much the supremacy of the mercantile marine, which has placed us in such a commanding position in the war, and without which we could not possibly have held our own successfully, owes to individual unfettered effort, and whether they are of the opinion that with nationalisation the industry would continue to enjoy the same able guidance that it has done in the past.

***

There is also the interesting point to remember that the process of nationalisation could hardly stop short at shipping. Sooner or later, all other industries would be involved. As to what the result of that would be I cannot do better than quote Lord Inchcape's words. "It would be against all recognised public policy," he pointed out, "to make a profit out of industries conducted by the State, the revenue from income-tax would disappear, we should be living on each other. I make bold to say that the 5 per cent. Loan, which now stands in the neighbourhood of 93, would be nearer 50, and repudiation would be on the horizon." It is not a pleasant vista to contemplate, but can anyone venture to say that, it is at all unlikely, should that improbable eventuality come to pass?

***

Comment hardly seems called for on the prospectus of the additional £1,000,000 6 per Cent. Cumulative Preference shares created at the recent meeting of the Anglo-Persian Oil Company. The prospects of the undertaking, at one time so strangely underestimated, are now fully realised, and in no quarter is there the slightest doubt regarding the richness of the company's properties. The undertaking is still in its infancy, and the original programme of development is far from completion; and, bearing this in mind, the result achieved during the past financial year may be left to speak for itself. The shares are offered generally, but special consideration is to be given on allotment to shareholders in the Anglo-Persian and its associated enterprise, the Burmah Oil Company, so that the general public will be fortunate to participate in the issue.

***

An interesting light is thrown on the German view of trade after the war by a series of essays just issued by the Central Union of the German Wholesale Trade. In one of them attention is called to the fact that large sums will have to be paid to foreign countries for imports, and it is pointed out that use must be made of the connections of the wholesale trade to obtain credit, so that payments will be better regulated. In this connection, emphasis is laid on the necessity of exporting goods of high value, such as potash and dyes, to obtain credits abroad. Evidently, however, the union is of the opinion that the expedient may not be sufficient, since it depends naturally on the willingness of other countries to take German goods, and so we get the pathetic observation that the problem would be greatly simplified by setting aside a large amount of gold for the use of importers.

The Romance of the Persian Oilfields.

FROM A CORRESPONDENT.

From Cæsar onwards, the commentators have laid it down that the art of war consists of doing the right thing, and doing it at once. But the writer of future commentaries will have to change this maxim. In the modern war of nations the point of supreme importance is to have done the right thing, and to have done it ten years before.

Of course, this is only a rather elaborate way of saying that war has become so technical a business that improvisation has been ruled out. The extent to which a great and powerful nation can still improvise is, indeed, remarkable. Witness "Kitchener's Army," and the huge host of well-trained and magnificently equipped fighting men the British Empire has poured into Flanders since the first hundred thousand stood the shock of the German onrush, and so gave civilisation time to mobilise its resources. Experience has shown that when urgency arises you can hurriedly turn citizens into soldiers and (metaphorically) beat your ploughshares into swords; but it has also proved that there are some things which you cannot improvise. And first and foremost of these is oil.

Mr. Walter Long, in the House of Commons the other day, dwelt on this subject at length. "Oil," he said, "is more important than anything else. You may have men, munitions, and money, but if you have not got oil all other advantages will be of comparatively little value." Few things are more striking than the rapidity with which the world has been rushed by the war into what may be described as the Oil Age. In essentials all fighting force depends on high motive power, and in some way or other high motive power is derived from oil or its products. The fast ships which give control of seapower, submarines, aeroplanes, high explosives, all these are directly and absolutely dependent on oil. The nation which in future faces the risks of war with another nation without having first secured to itself an adequate supply of oil on which it may rely in every conceivable combination of circumstances will be courting well-merited defeat. Probably all of us recognise this fact to-day, but how many recognised it a few years back? It is not too much to say that, but for the insight and vigorous initiative of a small handful of men, the British Empire would have been permanently shut off from any large and dependable source of supply, and would have been placed in the dangerous position of having to purchase this vital necessity from foreigners, or even, in certain contingencies, of not being able to get it at all.

A great deal has been heard of late of the development of the oil wealth of Persia, under the ægis of the Anglo-Persian Oil Company, but the general public has little idea of the romantic story which lies behind that young, vigorous, and essentially British undertaking. It may be well briefly to recapitulate the facts here, if only for the purpose of paying a well-deserved tribute to an Englishman whose services to his country have been almost wholly overlooked.

An Englishman's Enterprise.

That Persia was rich in oil was known in a general way to geologists for many years, and spasmodic attempts to exploit the country were made from time to time. The first man who took the business seriously in hand was William Knox-d'Arcy. In or about 1901 d'Arcy obtained a concession from the Persian Government, and set to work systematically to locate oil. In five years he spent out of his private resources no less than £300,000! He abundantly proved the existence of rich oilfields, though his first strike (near Khanikin) was too remote from the seaboard to be commercially practical. At this stage the foreign oil magnates, who had for years completely dominated the trade of the world, awoke to the great possibilities of Persia, and all sorts of tempting proposals were made to d'Arcy to sell a controlling interest in his concession. But d'Arcy was not out for money. He knew what the possession of vast oilfields meant to Great Britain, and he determined that Great Britain and no other country should control the supply from Persia. The financial burden being too great for his own shoulders, he enlisted the interest of the then First Lord of the Admiralty—Lord Selborne—and through him the co-operation of the Burmah Oil Company, and of that great Empire builder, Lord Strathcona. In 1908 oil was struck in another rich field, situated only 150 miles from the Persian Gulf port of Mohammerah, and in 1909 the Anglo-Persian Oil Company was formed with a working capital of £1,200,000.

It is a little sad to have to relate that when the Anglo-Persian Oil Company first made its appearance it was contemptuously and even spitefully referred to by a section of the Press as "the d'Arcy Relief Company." As has already been shown, the insinuation was as baseless as it was mean. Had D'Arcy been looking simply for money he could have secured much better terms from German or other foreign financiers. d'Arcy was not a man who cared about advertisement, and his pioneer work in founding this great enterprise is the only monument he has left. Now that he is dead, without, unhappily, living to see the complete fructification of his hopes, it is at least fitting to pay him this tardy tribute.

From 1909 to 1913 the Anglo-Persian Company did a great amount of development work. It laid a pipe-line to Abadan (a port on the Persian Gulf), built a refinery at the latter place, and carried out a great amount of geological tests. Hopeful as the prospects were, however, there came a time when the cost of this necessary development proved a heavy strain on the company's resources. Money kept going out—very little came back—and there were those who, to use an expressive Americanism, "began to get cold feet." The foreign magnates, who had been quietly watching and waiting, came along again with their tempting offers. One foreign controlled company in particular showed a very strong desire to "come in"—provided it secured control. Many great commercial enterprises have gone through critical days in their inception, and for a period the future of the oil fields of Persia hung in the balance.

Fuel for the Navy.

One man, however, never lost faith in the commercial future of the enterprise, and moreover formed the vision that so great an asset must at all costs be maintained as a national possession. This man was Mr. Charles Greenway, the chairman and managing director of the company, who with a robust faith in the great future of the enterprise and characteristic resourcefulness and energy determined to endeavour to induce the Government to provide the further money required to bring it to a successful issue. Many people were very sceptical. What precedent, they asked, was there for the British Government providing funds for commercial enterprises of a highly-speculative character? The story is told that Mr. Greenway broached the subject to a well-known legal adviser, and the legal adviser suggested that Mr. Greenway should consult a doctor. "You must have been over-working," he said, by way of dismissing the matter. But Mr. Greenway was not to be discouraged. A staunch supporter was found in Lord Fisher, the constructive genius of the modern Navy. Lord Fisher had early grasped the importance of oil, and he saw clearly the vital necessity of securing adequate supplies for the British Navy. Mr. Winston Churchill—then First Lord—took the matter up with his indomitable energy, and gradually "enthused" the Cabinet. Mr. Lloyd George gave the great weight of his personal support, and amongst the other leading men who were instrumental in carrying the project through were Mr. McKenna and Sir Francis Hopwood (now Lord Southborough), the then Civil Lord of the Admiralty. But to Mr. Churchill more than to any single Minister belongs the credit, and the nation has every reason to be grateful to him for the courage he displayed in forcing the matter through an apathetic, and, it must be admitted, rather hostile House of Commons.

The negotiations which ultimately led to the Government investing the substantial sum of £2,200,000 in the company received a considerable measure of publicity, and were widely commented on in the Press. It is interesting at this time of day to take up Hansard and read the debates in the House when the vote was asked for. If members ever re-read their own speeches those who have still a sense of shame may well blush to be reminded of some of the things they then said. It would be unkind to particularise, but it may be recalled that one member, who described himself as an expert in the oil trade, damned the proposal root and branch. He observed that it was a sound maxim that a greengrocer should not grow his own cabbages, proceeded to throw cold water on the idea that oil could ever be discovered in payable quantities in Persia, and wound up by solemnly assuring the Government that wisdom lay in depending for their supplies on the "competitive market" which was always sure to exist in oil." The "competitive market"—when the Oil Trust dominated the world's markets absolutely, and hardly a ton could be produced except at their price and on their conditions! A great deal more of this sort of nonsense was talked, but finally the Government secured its vote by a handsome majority.

The activities of the Anglo-Persian Oil Company since the great war began are necessarily shrouded behind a veil of secrecy. It is known that the company has rendered important service to the Allied cause by providing oil and oil products to the British Government at a time when both were urgently needed, but beyond this general statement nothing can be said. It may, however, be pointed out that the Persian source of supply has had its influence on the price of the commodity charged by other producers, and so the British taxpayer has gained in more ways than one.

Government Holding.

At the annual general meeting of the company, held on December 3, the chairman, Mr. C. Greenway, gave an interesting survey of the position, which deserves to be widely read in detail. A few of the main figures from his speech may, however, be conveniently quoted here. Working under all the limitations and disabilities imposed by the war, the company has in the past three years made very rapid progress. In 1916 the trading profit amounted to £171,723; in 1917 this jumped up to 415,327, while in the current year the business already done justifies Mr. Greenway in predicting that the trading profit will reach the huge figure of £800,000 to £1,000,000. The company's capital has been increased from the original £1,200,000 to no less than £6,000,000, and ultimately will no doubt reach a much higher figure. Contracts have already been secured for future delivery of something like 15,000,000 tons of oil products.

Some of the figures quoted by Mr. Greenway are bewildering in their immensity, although it must carefully be borne in mind that only a comparatively small section of the area embraced in the company's concession has so far been touched. The output is already larger than the pre-war production of the whole of the Roumanian and Galician oil fields, to obtain which it is estimated that more than £40,000,000 sterling of capital has been sunk and more than 2,000 wells opened out. Moreover the quality of Persian oil is exceptionally good. The crude product is rich in benzine and kerosene while it yields good lubricating oil, fuel oil of high thermol efficiency, and first-rate paraffin wax.

Mr. Greenway scored one notable point. When the Government, as already noted, entered into a contract to provide the company with £2,200,00 of capital, sapient critics averred that the bargain was financially unsound, and prophesied that all this money and probably more would all be lost. Financial writers enlarged on the theme, and spoke gloomily of "millions of the taxpayers' money" being sunk in an unprofitable enterprise. As a mere matter of fact, the Government has so far actually paid in cash £2,200,000, some of which has only recently

Digitized by Google

been handed over, and Mr. Greenway made the offer to the Government, that if it felt at all dissatisfied with its bargain, he would undertake to find purchasers for its interest for not less than £6,000,000, and perhaps £8,000,000. An investment which trebles or quadruples in value in an average period of eighteen months is one which most of us would be glad enough to get into! Nor may we take £8,000,000 as even an approximate estimate of the ultimate value of the Government holding in the company, and Mr. Greenway looks forward to the time when the annual yield in the shape of dividends will be multiplied many times over. Every schoolboy knows of Disraeli's famous purchase of Suez Canal shares, and no doubt in years to come future generations of schoolboys will applaud Mr. Winston Churchill's acuteness in acquiring control of the Anglo-Persian undertaking. Reputations for financial acumen have been built up on slenderer foundations.

Oil's Universal Use.

In this article so far attention has been confined to consideration of oil as an element of war, or, at least, as a commodity produced under war conditions. Somehow or other the war dominates our thoughts and colours our views on every subject. But peace will be restored to a stricken world one day, and with peace the demand for oil will be greater than ever. If we are to repair the wholesale destruction of wealth and wealth-producing plant which Europe has witnessed in these four devastating years, in any reasonable space of time, a great and concentrated effort is called for, and first and above all we shall have to improve our communications and increase our mechanical efficiency. Now, improvement of communications and increase of mechanical efficiency largely turn on the problem of an adequate supply of oil. The huge expansion that is coming in aeronautics means oil and still more oil. Ploughing by tractors instead of horse-drawn ploughs means oil and still more oil. It is not necessary to labour the argument. We are living in the oil age.

Here, at last, one may see the true significance and importance from an Imperial point of view of the dominating position which control of the great Persian fields gives to the British Empire. In other parts of the world production of oil is beginning to show signs of exhaustion. Many once rich fields are already exhausted, and as demand increases there is reason to fear that the supply will not be equal to meet it. The nation which has not its own supply under its own control, and which has to depend on what it can purchase from others, will be hopelessly handicapped; certainly no nation so placed can hope to retain front rank as a commercial Power. One may even go further and say that possession of adequate oil supplies should give the nation fortunate enough to possess them a commanding position in the struggle for supremacy, and in this connection the suggestion of Mr. Greenway, that the policy initiated by the Government in acquiring a controlling interest in the Persian fields should be further extended by the formation of an "All-British" company to acquire similar interests in other oilfields, developed or undeveloped, to add further to the security and prosperity of the nation, is deserving of the most serious consideration. While other fields, notably American and Russian, are giving out, the yield from Persia is as yet only in its first stages. As has already been stated, only a small portion of the vast concession obtained by Mr. d'Arcy has so far been tapped, and geologists are confident, from tests actually made, that great new areas of oil-bearing land remain to be opened up. Is it too much to say that this huge actual and potential wealth is going to play an important part in giving the British Empire a new impetus in the twentieth century which will ensure her commercial supremacy for generations to come?

The Fiat Company, at Turin, Italy, which has a capital of 50,000,000 liras, has recently absorbed the three following companies:—The Ferriere Piemontesi Steel and Iron Foundries, Rolling Mills, etc., capital 9,000,000 liras; the Officine gia Fili Diatto Railways and Trams Rolling Stock Works, capital 4,000,000 liras; and the Industrie Metallurgiche Torino Steel and Iron Works, with a capital of 4,000,000 liras.

INDIAN TRADE.

Post War Prospects in Russia, France, and Italy.

At a meeting of the Royal Society of Arts on December 13 a very interesting paper on "The Trade of India with Russia, France, and Italy" was read by Mr. D. T. Chadwick, I.C.S., Indian Trade Commissioner. He said that although the Asiatic markets were very important to India, the European ones were the most valuable. In 1913 foreign countries in Europe took one third of all India's exported goods, and the United Kingdom one quarter; and, curiously enough, India's trade with European foreign countries was practically equally divided between enemy countries and the Allies. Thus, although the channels through which trade would flow after the war were still most obscure, India was obviously very directly interested in the commercial needs and possibilities of the Allies, and, in cases where they had been buying Indian produce through Germany or Austria, in seeing whether direct relations could not be substituted for enemy trade.

Enemy Influence in Russia.

The extent of German penetration in Russia, he declared, almost surpassed the imagination of those who had not been there. In the big towns German and Russian were the languages of business—French or English was of little use. Over 10 per cent. of the ordinary commercial and news journals published in Russia before the war were printed in German. Even British trading houses had in the past given sole agencies for Northern Europe to Hamburg firms. Several Russian banks were organised or developed by German interests; large and compact properties in the towns were owned by Germans; behind all this was a very well equipped Consular service which Germans used freely.

In thinking of German trade with Russia it was wrong to think of it as confined to trade in manufactured goods. As far as India knew, Indian trade with Russia outside tea was almost negligible, being only worth about £400,000 a year. Including the tea trade, which had largely been developed by Russian merchants in Calcutta, the total of consignments direct from India to Russia was about one and two-thirds of a million sterling a year. The Russian returns, however, showed that before the war goods known to be of Indian origin to the value of three and two-thirds millions sterling reached Russia, and if an estimate was added for those whose identity of origin was lost in transit, due to rehandling or regrading, or polishing, etc., Russia's imports of Indian goods were worth between five and six millions, and covered a variety of articles, although in India they deemed the trade a small one, and one mostly restricted to tea. Manufacturers and merchants repeatedly said, he went on, that they had regularly bought Rangoon rice in Hamburg, Indian kips at Leipzig, jute from German houses, and so with pepper, castor, beeswax, etc. One merchant in Moscow went so far as to say, "Yes, you had the goods, but the Germans knew how to sell them."

Openings in Russia.

The largest openings, said Mr. Chadwick, seemed to lie with certain foodstuffs, oilseeds, light hides, reagents for soft tannage, medicinal plants, spices, beeswax, lac, and rubber. In oilseeds the position was peculiar. For linseed there was, of course, no need, and for castor an increasing one. There was a large and growing demand for edible vegetable large and growing demand for edible vegetable grades of copra. Another rapidly increasing civil demand was for long boots with soft uppers—which might also mean reagents for soft tannage such as myrabolams. Lac was in large demand in village industries round Moscow, whilst there was always a big market for scrap rubber for making goloshes, which were widely used by all grades of the community in the towns. The demand for Indian products was thus both varied and growing.

Trade with France.

The trade from India to France was old-established and considerable—viz., about 12 millions a year—and goods in the main went direct between the two countries. As a result of war there had been a large development in the industries of the Rhone Valley, and several of the biggest mills of the north had opened factories there. This would possibly create a new area using some of their Indian goods. In new lines of Indian goods there should in all probability be openings in France for a few articles. First, hides. Hitherto France had mostly bought Indian skins, and had purchased what hides she needed through Germany. The tanning industry had been developed, and was getting into closer touch with the original sources of the raw material. Hides might thus form a new line to France. Jute sacks for Havre, made exactly to specification as to markings and size, might be in demand in spite of the duty, if shipping freights continued high. He thought that in the main Indian trade with France would follow its usual course, with those possible additions, and, perhaps, tea, which was steadily growing in favour.

The Italian Market.

India's exports to Italy before the war were worth about five millions a year, and consisted almost entirely of raw materials for industries, such as cotton, jute, hides, oilseeds. The only foodstuffs taken in any quantity were wheat and pepper. There was not much scope for introducing new articles of food and drink from India, for Italy grew her own rice, did not drink tea, and preferred the cheaper South American coffee. It was in the development of her industries that the chief market for the future would lie, and the progress made there was remarkable. Italy promised to offer an alternative market to some extent to Germany for several of India's products, notably in cotton and hides, and perhaps in oilseeds. The Italian cotton mills already used a greater proportion of Indian cotton than did any of the other large European countries. Indian hides were bought to some extent in Germany, besides being imported direct. Moreover, a very considerable amount of chrome leather for uppers for boots—for which Indian hides were well suited—was imported from Germany. During the war that process had been developed in Italy, and much attention had been paid to the organisation and development of tanning industries. There was scope in hides for a considerable development, and it was a trade notoriously under German control. He also believed there were possibilities in regard to oilseeds. Tanning materials, mica, lac, rubber, and gums were asked for. Indian hemp was required, but complaints against quality were to be heard. Indian wheat was very largely blamed for the presence of dust, barley grains, and weevils; and although it was well suited for the manufacture of paste and macaroni, the Italians said they only bought it when the Russian and Roumanian crops were short.

OPENINGS FOR BRITISH TRADE.

Since the outbreak of the war, applications have been received at the Department of Commercial Intelligence from a large number of firms in all parts of the United Kingdom and abroad who wish to get into communication with British manufacturers or producers of various classes of goods which have previously been obtained from Germany and Austria-Hungary. Applications have now been recorded for the names of manufacturers or producers of the following (amongst other) articles; British manufacturers or producers of these articles now in a position to supply are invited to make application for the names of the inquirers:—Brace fittings (rustless metal); buckles for ladies' and gentlemen's trench coats; buttons for ladies' and gentlemen's trench coats; garter fittings (rustless metal); machinery for making wooden toothpicks; machine for marking thermometers; tie fittings (rustless metal); and whalebone for brushes.

ENGINEERING NOTES

Concrete Railway Sleepers.

In view of the high price of timber and the great demand for its use in other directions, the possibility of using concrete railway sleepers instead of wood is attracting the attention of many railway and engineering concerns at the present time. The question may also interest those concerned with railways in the Near East, where some important extensions and connections of existing railway lines have had to be postponed owing to the scarcity of timber for sleepers. As it happens, the principal material for the construction of concrete sleepers can be found in abundance in one or two of the Ægean Islands; some particulars, therefore, of experiments which have been carried out with concrete railway sleepers in various parts of the world may be of interest. In America the Pennsylvania lines have over 4,000 in use, and they and other railways have carried out trials with many different types. In England the South-Eastern and Chatham, the Midland, and Great Northern Joint Committee, the Great Central, the Great Eastern, the London and South-Western, and the London and North-Western have either tried them at different times or are arranging to do so. The Italian railway administration has long been using them extensively, and the French railways in Indo-China have been using them for many years on a very large scale. Trials have also been made with them on railways in France, Spain, Sweden, Bavaria, and India. Still, it cannot be said that, as yet, they have been definitely adopted anywhere, and evidently there are still difficulties which remain to be overcome, one of which is concerned with the attachment of the rail to the sleeper, and another the tendency for the concrete to crack and disintegrate. However, in view of the present difficulties of obtaining the required timber, and the possibility that they will continue long after the war, the question of using concrete sleepers is worthy of special consideration.

A Labour-Saving Cultivator.

Farmers and planters in the East are often in despair over the difficulty of finding efficient hands at the proper season for the cultivation of such plants as cotton, beets, vines, a variety of garden vegetables, etc., which, as a rule, are growing in rows or hills. From a general point of view, with the average Oriental farmer the employment of the ordinary plough ceases after the preparation of the field for sowing or drilling is accomplished. All subsequent processes for the cultivation of the plants, such as digging between the rows, hilling or hill-digging, etc., are done by hand with old-fashioned tools. The full development and generally the success of the plants depend on carrying out that kind of cultivation in time. Hence the anxiety of the farmer to secure the services of as many hands as he requires, even at high wages. Oriental landowners and farmers are showing a steadily increasing disposition to discard their old-fashioned agricultural implements and to replace them with the more convenient and labour-saving devices that are now available. A new cultivating machine of recent design, which can do the work of many hands in a plantation, will be of much interest to planters and farmers generally in the East. This machine is expressly designed for the cultivation of cotton, beets, vines, or any other plants in rows or hills, and can be obtained with an outfit of several different styles of blades, which enable it to be used for widely varying purposes. By simply loosening four nuts on the wheel standards the space between the wheels can be changed from 46 inches, the greatest width, to 34 inches, the narrowest, thus making it possible to cultivate rows from 24 inches apart to 54 inches. Ordinarily, four hilling shovels, 2½ inches wide, are used on each of the two gangs. The shovel standards can be raised or lowered or revolved at any angle desired by the operator. In addition, they can be set closer, and five shovels be put on each side of the gang, two or three being used on each gang. There is also a special disc attachment which enables the user of this cultivator to use either discs or shovels for his work.

The Perils of Restriction.

It is evident that in Sheffield, as in many other engineering centres, the belief is widely held that Government prohibitions and restrictions born of an understandable eagerness to help the war, are damaging foreign and colonial trade to a remarkable degree. As an instance the case of the most expensive Sheffield steels is pointed out. It is well known that for many years now the quality of Sheffield steel has been unsurpassed. Other nations may have been doing better as regards total production, but in point of quality Sheffield has always been an easy first. Thus Sheffield enjoyed a monopoly in this class of trade, for engineers all the world over relied on Sheffield steel alone for superior work. Substitutes were not tolerated, and just before the outbreak of the war Sheffield's pre-eminence seemed unchallenged and unchallengeable. To-day this valuable monopoly has been lost; and, according to a reliable source, local firms are denied facilities to cater for it, and the probability is that vast markets in the East and on the American continent will become the cockpit of bitter competition after the war, owing to the fact that Sheffield's isolation has enabled others to establish sound connections. Strenuous times are therefore ahead, and it behoves Sheffield firms to prepare for them. The same may be said with regard to a variety of British engineering products for which there is a great demand at the present moment, even in British colonies and protectorates, but which cannot be supplied owing to the existing restrictions. In the meantime foreign manufacturers avail themselves of every opportunity to do business in those markets and with methods which will make competition with them difficult after the war.

Italy as Motor Exporter.

While British manufacturers are under restrictions, statistics issued by the Italian Ministry of Finance, show that our Ally, now the most important motor exporting country in Europe, is still increasing the number and value of her automobile exports, while imports of motrs into that country are on the down grade. For the six months ending June, 1917, the number of motor vehicles exported was 4,148, of which 3,904 were lorries and 344 touring cars. The value of these vehicles was 66,008,805 liras. These quantities were nearly double those for the corresponding period of 1916. The Italian motor factories are meeting all the home requirements, as is shown by the import figures, which give only three lorries in the first six months of 1915, nine in 1916, and ten during the present year.

LANCASHIRE COTTON.

Business on Limited Scale.

(From Our Own Correspondent.)

Manchester, Wednesday.

The market has continued to present a strong appearance, and prices have again tended to go against buyers. Business on the whole has been on a rather limited scale. Here and there producers have picked up fair lines, but there has not been any general buying movement. The Control Board has completed its arrangements for the curtailment of production in weaving. From the beginning of next week all firms will have to reduce the output by 30 per cent. compared with normal times. The Egyptian cotton situation shows very little change. The growth is understood to be doing well, and prices keep fairly steady. Egyptian yarns, after being more active, are now rather quieter, but some producers have strengthened their position during the last few weeks. The undercurrent of demand in piece goods for Egypt keeps up fairly well, but there are more difficulties than ever in arranging transactions. Isolated sales have occurred in sized materials and also in printing cloths. India has given very little support, the offers mentioned in dhooties and jaconets for Madras being too low. No improvement has transpired in the offtake for China. Manufacturers who use bought yarn are now feeling rather severely the competition of those firms who both spin and weave. The upward movement in prices for American yarns continues, and it is now practically impossible to obtain early deliveries of certain counts and qualities. Only a retail trade has been done in export numbers.

According to *Reuter's* Melbourne correspondent, Mr. Hughes heartily applauds the British Metal Industries Bill.

EGYPT'S TRADE.

Improved Imports in October.

(From Our Own Correspondent.)

Cairo, November 25.

The Customs returns for October, just published, show a slight set-back in the export trade of the country, though imports have picked up somewhat. Thus, during the month exports amounted to £E2,201,634, and imports to £E2,711,844, as compared with £E4,063,213 and £E2,264,304 respectively in October, 1916. The position for the whole ten months now stands at a reduction of £E366,434 in imports, and an increase of £E5,782,409 on the figures for the corresponding period of last year.

Imports.

The chief imports during the month were: Preserved meat £E144,116 (all from Australia), flour £E161,091 (all from the Empire, mostly from India), coal £E264,228 (all from England—a decrease of 62,500 tons over the same month last year), cotton tissues £E398,176 (80 per cent. from England and the balance from Italy), sacks £E238,534 (all from India), tea £E57,081 (India), stationery £E59,349 (45 per cent. from Italy, 30 per cent. from England, whence practically all the writing and printing paper came), and 15 per cent. from Holland), worked iron and steel £E64,962 (70 per cent. from England, 16 per cent. from America), cotton threads £E56,556 (75 per cent. from India, 13 per cent. from Spain, and 10 per cent. from England), silken goods £E59,933 (60 per cent. from China, 20 per cent. from Italy, and 20 per cent. from Japan), and tobacco £E310,683 (70 per cent. from Greece, 14 per cent. from Japan. No sugar, petroleum, liquid fuel, benzine, fuel wood, or chemical manures were imported during the month.

Exports.

The most important exports were eggs £E23,989, cotton seed £E84,083 (in each case Great Britain took all), sugar £E111,284 (50 per cent. to French possessions in the Mediterranean and 45 per cent. to India), gum £E55,720 (80 per cent. to France and 16 per cent. to Italy), skins and tanned goods £E123,772 (45 per cent. to Greece, 35 per cent. to Italy), cotton £E1,593,728 (56 per cent. to Great Britain, 14 per cent. to Italy, 15 per cent. to France, 7 per cent. to Japan, and 6 per cent. to Spain)—America and Russia took no cotton, the export of which was £E1,769,646 less in value, and 371,985 kantars less in quantity than during the corresponding month last year—and cigarettes £E37,606. No cotton-seed cake was exported during the month.

Growth of Trade with India.

Turning to the share taken by the various foreign countries in Egypt's external trade during October, we find that under imports Great Britain has declined very much, from about one-half to one-third; the Empire's share is, however, more than kept up by the Colonies, India sending nearly five times what she did a year ago. The United States also fell off very much owing to no petroleum imports, but Greece made a most noticeable improvement, due to larger tobacco imports. Except for an increase in entries from Japan and China the other countries for all practical purposes maintained their proportions. Under exports Great Britain's share fell from over 70 per cent. to under 50 per cent., the United States dropped to practically nothing, and Russia and Portugal took nothing. On the other hand, France, Spain, Greece, Italy, and Japan substantially increased their share. During the month silver money amounting to £E185,479 was brought in, as to two-thirds from India and one-third from England.

Trade with the Sudan flourished during the month in question. Imports from Egypt into the Sudan rose from £E96,392 to £E151,586, and traffic in the opposite direction from £E70,705 to £E178,023. The principal imports into Egypt from the Sudan were live-stock £E86,375—about 50 per cent. more in number than a year ago, cereals £E18,213, gum £E59,266—up to date the total weight is six times what it was at the end of October, 1916. The chief exports from Egypt into the Sudan were: Sugar £E41,176, and cotton tissues £E27,580.

THE C.P.R. AND THE WAR.

Replying to a cablegram from Lord Mount Stephen, first president of the Canadian Pacific Railway Company, congratulating him on his speech on the work of the company in connection with the war, Lord Shaughessy, vice-president and chairman of the company, says:—"Many thanks for cable. Company pleased and gratified to have been able to render such important assistance and to be in a position to do more if occasion requires. You were the pioneer, and without you the enterprise would have perished in its infancy. In intervening years we passed through some heavy weather but the ship was built on staunch lines and came through safely. No one has more right to feel pleasure and pride because of present position than yourself."

THE CONTROL OF TRADE.

At the last meeting of the Council of the London Chamber of Commerce it was decided to place the following resolution upon the programme of the Associated Chambers annual meeting in March with reference to Government control of trade:—"That this Association views with apprehension the methods adopted by the Government in connection with the control of trade and industry as affecting the legitimate business of manufacturers, merchants and traders, and while recognising the necessity for reasonable restrictions in the national interests urges that they should not be continued after the war except where absolutely necessary in the economic interests of the country, which require that the existing channels of business in connection with imports and exports, combined with the practical experience of persons engaged therein, shall be utilised to the fullest possible extent."

The Treasury has been consulted under the Notification of the 18th January, 1915, and raises no objection to this issue.

It must be distinctly understood that in considering whether they have or have not any objection to New Issues the Treasury does not take any responsibility for the financial soundness of any schemes or for the correctness of any of the statements made or opinions expressed with regard to them.

A Copy of this Prospectus has been filed with the Registrar of Joint Stock Companies.

The Subscription List was Opened on the 19th December, 1917, and Closes on or before the 24th December, 1917

ANGLO-PERSIAN OIL COMPANY, LIMITED.

(Incorporated under the Companies (Consolidation) Act, 1908.)

SHARE CAPITAL - - - £5,000,000.

DIVIDED INTO

2,000,000 CUMULATIVE SIX PER CENT. (participating up to 8 per cent.) PREFERENCE SHARES of £1 each (of which 1,000,000 are already issued),

3,000,000 ORDINARY SHARES of £1 each (all issued and paid up).

The Company has also issued

£2,000,000 of FIVE PER CENT. FIRST DEBENTURE STOCK

(this Stock is redeemable by a sinking fund, and the amount issuable is limited to one-half of the Share Capital of the Company for the time being issued).

Issue of 1,000,000 Cumulative Six per Cent. (participating up to 8 per cent.) Preference Shares of £1 each, at £1 2s. 6d. per Share,

Payable—2s. 6d. per Share on Application, 5s. per Share (including the premium) on Allotment, 15s. per Share on 15th January, 1918.

The Shares now issued will rank for dividend as from the 1st October, 1917.

The permission of the Stock Exchange has been granted for dealings in the Shares now offered.

ABRIDGED PROSPECTUS.

The Company was registered on the 14th April, 1909, and, in addition to the Concession and the Shares in the First Exploitation Company, Limited, and the Bakhtiari Oil Company, as referred to in the full prospectus, has acquired the following further interests:—

(4) 27,680 fully-paid Shares of £1 each (making a total of £477,680 out of an issued Capital of £544,000) in the First Exploitation Co., Ltd.
(5) 282,000 fully-paid Shares of £1 each (making a total of £582,000 out of an issued Capital of £600,000) in the Bakhtiari Oil Co., Ltd.
(6) 200,000 fully-paid Shares of £1 each (the whole Capital) in the British Tanker Co., Ltd.
(7) 300,000 fully-paid Shares of £10 each (the whole Capital) in the British Petroleum Co., Ltd.
(8) 200,000 fully-paid Shares of £1 each (the whole Capital) in the Homelight Oil Co., Ltd.
(9) 362,582 fully-paid Shares of £1 each (the whole issued Capital) in the Petroleum Steamship Co., Ltd.,

and various other smaller investments.

The Company has, since its formation, carried out a large amount of exploratory and development work, with the result that large areas of very productive Oil territory have been proved. The further knowledge which has been gained during the past few years' operations leads to the conclusion that the Concession held by the Company covers a petroliferous area of enormous extent and great richness. The Oil now being produced is all obtained from flowing Wells of large volume, and consequently the cost of production is very low.

The Crude Oil is of a high grade, containing unusually large percentages of Benzine and Kerosene, good qualities of Lubricating Oils and Mineral Wax, Fuel, Oils of high thermal efficiency, and it also yields a satisfactory percentage of Aromatic Hydrocarbons.

Two Pipelines (one of 6 and 8 inches and another of 10 inches) have been laid from the Fields now being worked to the seaboard on the Persian Gulf; extensive up-to-date Refineries, Storage Tanks, Jetties, etc., have been erected and equipped; and a large fleet of Tank and other Steamers, Tugs, Lighters, etc., and also extensive Distributing Installations, have been built or otherwise acquired.

To provide additional funds for Pipelines, Refineries, etc., His Majesty's Government in the year 1914 subscribed at par for 2,000,000 Ordinary Shares of £1 each, 1,000 Preference Shares of £1 each, and £199,000 Debenture Stock; but only one-half of the Refineries for which this Capital was provided has yet come into operation.

The present issue of Participating Preference Shares is for the purpose of providing the Capital required for further considerable extensions to the Refineries, Pumping Stations, etc., which have to be immediately undertaken in order to meet urgent war requirements.

Up to March, 1916, the Company was more or less in the development stage. Notwithstanding that the delay in completion of the new Pipe-line consequent upon the disturbances in Persia in 1915 materially affected results, the net profit for the year ended 31st March, 1917, after charging Debenture Interest, the Royalties payable to the Persian Government, and making liberal allowance for depreciation, amounted to £344,109 15s. 8d., as shown by the audited accounts, although only a small portion of the Plant provided out of the Capital subscribed by His Majesty's Government had then come into operation.

For the current Financial Year, taking the actual results for the first eight months and estimating the remaining four months, the net profit, after paying Debenture Interest, allowing for Royalties and making liberal provision for depreciation, will amount to not less than £800,000, which is equivalent to six and one-half times the amount required to pay the cumulative dividend of 6 per cent. on the 2,000,000 Preference Shares and to two and one-third times the amount required to pay this cumulative dividend, plus 6 per cent. on the 3,000,000 Ordinary Shares and the additional 2 per cent. on the Preference Shares.

The profit will be substantially increased when the remainder of the above Plant comes into operation, and another large increase may be anticipated when the further extensions to be carried out with the present issue of Capital are completed. Moreover, a considerable additional income is anticipated from Dividends on the Shares which have recently been acquired in the British Petroleum Company, Limited, the Homelight Oil Company, Limited, the Petroleum Steamship Company, Limited, and the other concerns above enumerated.

Sales have been effected at remunerative prices of 12,000,000 to 15,000,000 tons of the Company's Products, ensuring substantial profits for many years to come.

The whole issue has been underwritten under a Contract dated 15th December, 1917, and made between the Company of the one part and Messrs. Robert Fleming and Co., of 8, Crosby Square, E.C., of the other part, for an underwriting Commission of 2 per cent., with an overriding Commission of ⅛ths per cent., and a Commission of ¼ per cent. to Messrs. Robert Fleming and Co. for procuring and arranging the underwriting.

Copies of the last-mentioned Contract, and of the Memorandum and Articles of Association, may be seen at the Office of the Company at any time during business hours.

Application for Shares should be made upon the Form accompanying the Prospectus, and be sent to any of the Company's Bankers, together with a remittance of the amount of the deposit.

Where no allotment is made the deposit will be returned in full, and where the number of shares allotted is less than that applied for, the balance of the deposit will be applied towards the sums payable on allotment, and/or in respect of the final call, and any surplus will be repaid to the applicant.

A brokerage of 1¼d. per Share will be paid on allotments made upon applications bearing Brokers' stamps.

Full Prospectuses, upon the terms of which alone applications will be received, and Forms of Application may be obtained at the Office of the Company, and of the Burmah Oil Company, Limited, in Glasgow and London, or from the respective Bankers and their branches.

Dated 19th December, 1917.

COMPANY MEETINGS.

KHEDIVIAL MAIL STEAMSHIP

The twentieth ordinary general meeting of the Khedivial Mail Steamship and Graving Dock Company, Ltd., was held on December 18, at Old Broad Street, London, Lord Ernest Hamilton (the Chairman) presiding.

The Acting Secretary (Mr. Alfred C. Silley) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Gentlemen, the net profit for the year, after deducting London office expenses, debenture interest, directors' fees, depreciation, etc., amounts to £24,062 6s. 9d., as against £51,957 3s. 1d. last year. The falling off in the net results is mainly due to the increase in the price of coal and the increase in the cost of insurance against war risks. Our coal bill is £48,000 higher than last year, and our insurance bill is £124,000 higher than last year. On the other hand, we have taken £230,000 more in freight on goods, but we have taken as against that £93,000 less on account of transport. Several of our ships throughout the period under review have been under Admiralty charter; a few of the smaller vessels have been free in the Red Sea; the s.s. "Kosseir" has been used to maintain the Cyprus contract, and four ships have traded fairly regularly since the beginning of the war between Egypt and the United Kingdom. These four ships have so far mainly been utilised, for the purpose of taking out coal for the purposes of the company's services in Egypt and returning with cotton seed and similar freights. With regard to the present uses to which these four ships are being put, I shall have a few words to add later on in my remarks. I regret to have to report that one of our steamers was sunk by a submarine. I do not think there is anything further to add with regard to the past year's working.

The shareholders are naturally always anxious to have some forecast as to the prospects of the coming year, and I think it is my duty to inform the meeting that the position in this respect is extremely doubtful. As most of you no doubt know, the Ministry of Shipping have requisitioned the greater part of the trading tonnage of the kingdom. Under this heading come our four small ships which since the beginning of the war, as I have already mentioned, have been regularly trading between Egypt and the United Kingdom. Since June—that is to say, very nearly from the date of the closing of last year's accounts—these four boats have been running under the control of the Ministry of Shipping. Under this system, as you are all aware, the trading profits of the ships are taken by the Government. The running expenses of the ships have to be defrayed by the company, and in return the company receives certain payments which are based on what are known as Blue Book rates. In the case of certain liners—I may, perhaps, say the majority of liners—there is the possibility that these Blue Book rates constitute an adequate rate of recompense. In our case they certainly do not. Our ships are small, are slow sailers, and, being old and designed on rather obsolete lines, are very expensive to run. This being so, the Blue Book rates fall short of the actual running expenses, so that these four ships running backwards and forwards between Egypt and the United Kingdom are at the present moment running at an actual loss to the company. This is so far only as direct loss is concerned. There is the further element of indirect loss which constitutes an even more serious feature. As I have already informed you, these four ships, so long as they were free, were used to feed our Egyptian services with coal. Under the present control system we are not at liberty to ship coal for our own uses except under special permission, which is not always obtainable. As a consequence we are in the position of being forced to buy coal at practically any price which the local merchants in Egypt choose to ask. We are forced to buy this coal in order to maintain our Government contracts, which, except for this self-sacrificing action on our part, would come to a standstill for want of fuel. The result is that the Cyprus mail contract service is being run at present at a very serious loss to the company. The company's two workshops at Alexandria and Suez, which are mainly employed in doing Admiralty work are in constant difficulties for coal supplies, and have, in fact, been forced on occasion to use cotton seed as a substitute fuel, and all the profit which should accrue from the Red Sea service is neutralised by the famine prices at which we have to buy coal in order to keep them going. Under these circumstances the question arises, and will naturally present itself to the mind of shareholders, as to how far it is justifiable for the Board of Directors to sacrifice the profits of their shareholders in the interests of patriotism.

We have made formal protests to the Ministry of Shipping, pointing out the great hardship of our peculiar case, and asking for special exemption to be granted us from conditions which may adequately pay other shipping companies differently situated from our own, but which certainly do not pay us. The question also arises as to how far we are under obligation to carry on the Cyprus mail contract on terms which were agreed upon before the war, and which even then did not leave us any extravagantly handsome margin of profit. The freights which we are allowed to charge in connection with this service are controlled by the Government, but the prices at which we have to buy coal are not controlled. This constitutes, in our opinion, a very grave hardship to a small company of this character, and I cannot believe that it can be intended that we should carry on a service which is a distinct advantage to the Government and without which they would be in a very awkward position, and at the same time that we should be forced to suffer financially for doing what we hold to be our duty. (Hear, hear.) All these matters have got to be very carefully considered, and for this reason it is impossible for me to forecast the future with any degree of certainty. I mention these facts, however, because I think it my duty to let shareholders know the extraordinary difficulties under which the Board is at present labouring. We are doing our very utmost to safeguard your interests as far as they can be safeguarded without coming into direct conflict with the Government. We have not the slightest desire as a Board to act in any manner which might be considered unpatriotic. At the same time we strongly hold the belief that though it may be right for shareholders in a shipping company to be called upon in such times as these to make certain sacrifices in the interests of their country, still we think that in our peculiarly situated case the sacrifices we are asked to make are altogether out of reason and ought not to be enforced. (Hear, hear.)

He proposed that the report be received and adopted.

Mr. Allen seconded the resolution, which was carried unanimously.

Mr. W. H. Skeel asked whether the chairman could give him any information as to the oil position in Egypt. Some of them had been cheered to know that there was oil there, and he would like to know whether there was any possibility of that helping them in the future as regarded their coal bill.

Mr. Hugh Reeves said that as a considerable ordinary shareholder he thought those present should congratulate the Chairman and directors on the very substantial balance-sheet presented. The Chairman had confined his remarks chiefly to the financial difficulties which they foresaw in these peculiar times of stress. The shareholders were obliged to him for pointing out what those difficulties were, and, as the last speaker but one had said, they would back them up in any way they could to get fair treatment. Why, as a shipping man said the other day, should the shareholders who had produced the most essential asset of the country—tonnage—be unnecessarily badly treated? Why should the people who produced the thing which went to the salvation of the country be treated as if they really should not be considered at all? (Hear, hear.) He had gathered from the Chairman's remarks that the company had done a very much bigger business during the year under the peculiar stress and strain which they knew had attended shipping ventures, but that unfortunately, had not resulted in an increased profit. However, looking at the capital values as stated in the balance-sheet, he discerned a certain amount of cautious management, and due care for the interests of the shareholders in that their capital assets had increased very materially. Looking at the matter from this point of view and putting a reasonable value upon the company's ships—and he happened to know something about the freehold property in Egypt—he regarded the position as peculiarly encouraging to the ordinary shareholder. If they took away from the liabilities side the debentures and the copious provision for sundry creditors and put a fair value upon their land and not an extravagant value upon their shipping they got a clear asset of about £1,000,000 for the shareholders. He thought this was a rather encouraging position for them, and he hoped that the directors would be able to rectify the difficulties which they foresaw and be in a position to pay the shareholders a good dividend next year. He congratulated the Board on the results they had obtained. (Applause.)

Mr. H. P. Henley asked whether the company would not give notice to the Government to cease running to Cyprus and so save a loss which was now being incurred. He also wished to ask, with regard to the item "Steamship realisation balance awaiting settlement," whether that matter had been settled.

Mr. F. T. Woolley, the representative of the auditors, said that the item referred to represented the value of the steamship which was submarined. No settlement had been arrived at with the underwriters at the time the accounts were made up. The steamer no longer existed as an asset, and therefore they had put it into a separate account.

The Chairman remarked that the matter had now been settled on quite a satisfactory basis. With regard to Mr. Wicksteed's first point, he must not attach too much importance to the book values of the ships. They

were arrived at by an automatic system of annual depreciation, and as the shareholders would have gathered from the rather rough estimate which Mr. Reeves had given, they did not in any sense represent the actual value of the company's ships. As a matter of fact, they had an up-to-date valuation of all the ships, but he did not know that this was the proper place to make such a valuation public—(hear, hear)—and if Mr. Wicksteed would allow him he would not answer his question more fully. He did not think it would be in the interests of the company to do so. With regard to the investments, almost all of them had been made since the war, and they were all in War Loans and Government bonds. There was very little depreciation; in fact, the cost price very nearly represented the actual sale value. As to the Cyprus contract, it was originally made for seven years, and he thought it had still two years to run. The directors had made representations to the Government to be allowed to drop the contract, but they had not entertained the Board's request, and they were at present in the position of being forced to carry on that contract on pre-war terms, which, in their opinion, ought not to be enforced in abnormal times like these. (Hear, hear.) Running expenses—coal and everything else—were at famine prices. They as a company were perfectly prepared to pay their proper proportion—80 per cent.—of excess profits duty, but they did not want to be taxed to the extent of over 100 per cent. They were not absolutely sitting down under these impositions. (Hear, hear.) At the present moment they were contesting them as far as they could legally do so, and they had some hopes that they would bring about better results anyhow, improved conditions of running, or, to put it in other words, obtain some material and valuable concession from the Ministry of Shipping or some other Government Department. With regard to oil in Egypt, he personally had heard nothing about the possibilities of economically using oil fuel in the Red Sea. He did not know whether Mr. Allen could add anything on that point.

Mr. Allen remarked that the supply was too intermittent for the matter to assume a practical aspect.

The resolution was then put to the meeting and carried unanimously.

The Chairman next moved:—"That a final dividend of 10 per cent. on the Ordinary shares of the company for the year ended June 30, 1917, be and is hereby declared payable on December 31, 1917."

This was seconded by Mr. Allen and unanimously agreed to.

The re-election of Lord Ernest Hamilton and Mr. Geoffrey Head, the retiring directors, was then proposed and agreed to.

Mr. Reeves, in seconding the motion, said that Mr. Allen, with his usual modesty, had not taken up the time of the meeting in explaining all the excellent services which had been rendered to the shareholders, particularly by the Chairman. He (the speaker) had already made some remarks giving his view of the achievements of the past year, and he hoped later on to try to express that in a practical manner. He was sure they could not make any mistake in re-electing their Chairman. With regard to Mr. Geoffrey Head, he was in a different category; he joined the Board at the time when they lost Mr. Temperley. Some of them hoped that Mr. Geoffrey Head was a purely shipping man, but it did not turn out that that was the case, and they had since been fortunate in obtaining other expert assistance. Mr. Geoffrey Head, however, was an expert insurance man; he was well placed in the City of London, and although since the beginning of the war he had been giving his services to the Ministry of Munitions and therefore had been absent from the Board, he thought it would be very ungracious on their part not to re-elect him. He had therefore much pleasure in also seconding his re-election.

The motion was carried unanimously.

The Chairman thanked the shareholders very heartily for his re-election, and added that he was very glad that Mr. Reeves had made the remarks he did with regard to Mr. Geoffrey Head. They would all have felt very sorry if he had not been re-elected on account of his absence, which was simply due to his desire to serve his country in a time of emergency.

Mr. Bailey moved: "That Messrs. Edwin Guthrie and Co. be and they are hereby reappointed auditors of the company, associated with Messrs. Peat Waterhouse and Co., of Alexandria, as before, at a remuneration of 400 guineas per annum, such fee to cover travelling expenses, any remuneration for any special services rendered to be settled by the Board."

Mr. Abbott seconded the motion, which was agreed to.

Mr. Reeves said that before the meeting concluded he wished to submit a resolution of which he had given private notice. He moved the same resolution successfully last year, and he hoped he would be equally successful on this occasion. It was to the effect that the income-tax in respect of the fees payable to directors in this country—such of them as bore English income-tax—be paid to them in addition to their modest salary. This was a business which was turning over, without capital, something like a half to three-quarters of a million of money. All they provided for their six directors was a sum of £2,000 per annum. The shareholders could see that £300 a year each for the responsibility of conducting a business which required the daily attention of one or more of the directors and certainly the weekly attention of every one of them was an insignificant sum. In fact, it was very difficult at the present time to get men of position in the City of London to take up such positions of responsibility. He hoped the directors would accept this slight recognition as a mark of the shareholders' goodwill for the services they were rendering.

Mr. Vere Herbert Smith, in seconding the proposition, said he felt that directors of companies were placed in an unfortunate position with regard to income-tax, and he thought that it would sooner or later become a general practice for shareholders to agree that the very large increased income-tax should be borne by the general body of shareholders rather than by the directors themselves.

The motion was carried unanimously.

Mr. Reeves said there was another matter which he wished to bring before the shareholders for acceptance or otherwise. They would remember that a couple of years ago they succeeded in obtaining the assistance of Mr. Bowen Rees as a useful adjunct to the Board, but owing to the fact that his business kept him in the Near East, he was unable all last year and this year to attend Board meetings and give the company the assistance which he had promised. He had naturally, by reason of his absence, lost his position on the Board. They had left working in London three gentlemen. He did not say this was insufficient strength for dealing with a company whose assets amounted to nearly a million pounds, but he would like the Board to bear in mind that it might be in their interest to co-opt some other suitable person. If someone could be found it would be no detriment but an advantage to the company to make up the Board in this country to four members. The other two members of the Board were more permanently in Egypt than they were before the war, because they could not go backwards or forwards. If the directors did co-opt another member he did not think that it should be done at their expense. He had already pointed out that the remuneration of the Board was a very modest one, and therefore it would be contradictory to suggest that if the opportunity were taken to co-opt someone else they should bear the whole expense out of their own pockets. He wished, therefore, to move that if under Article 87 the directors co-opted another member during the current year, their remuneration should be increased by an additional £300.

Mr. Vere Herbert Smith seconded the motion, which was carried unanimously.

The Chairman said he wished to thank the shareholders very much, on behalf of his colleagues and himself, for the very kind vote they had passed, and also to express their great appreciation not only of the act itself, but of the very kind words which accompanied it from both the proposer and the seconder. He was sure they all valued it very highly as an evidence of the shareholders' goodwill and confidence in their work. Neither he nor his colleagues had the slightest reason to think that Mr. Reeves was going to make such a proposition, and therefore they appreciated it very much indeed. With regard to the other suggestion of Mr. Reeves, he thought it was a fair and reasonable one. The directors in London numbered only three, and if they came across some gentleman whose services might be of the greatest value to the company, he did not think the extra cost to the company of £300 a year was either here or there, because he might be the means of increasing the profits of the company, or decreasing its loss, whichever way they liked to put it, by very large sums indeed.

The proceedings then terminated.

COMPANY REPORTS.

Bombay Baroda Railway.

The report of the Bombay, Baroda and Central India Railway Company, Ltd., includes the audited home accounts for the half-year ended September 30, and also the detailed accounts of the working of the railways in India for the six months ended March 31 last. For the half-year ended September 30 the detailed accounts prepared in India were not completed until near the end of November, and cannot therefore be received in time for inclusion, but will be presented at the meeting in June, 1918. Capital expenditure charged off during the half-year ended March 31 was Rs.10,82,290 for the broad gauge and a credit of Rs.66,957 for the metre gauge, of which Rs.1,18,067 and a credit of Rs. 2,58,418 respectively are on account of rolling stock. Gross earnings for the period amounted to Rs.3,94,95,035, increase Rs.14,31,399, expenditure Rs.1,60,27,610, decrease Rs.1,44,804, net earnings Rs.2,34,67,425, increase Rs.15,76,203, and percentage of expenditure to gross earnings 40.58, decrease 1.91. The latter low percentage is abnormal chiefly on account of the restriction of revenue charges due to the war. Coaching traffic increased Rs.8,51,358 on the broad gauge and Rs.6,25,014 on the metre gauge; goods traffic increased Rs.6,83,669 on the former and decreased Rs.6,30,146 on the broad gauge and increased Rs.51,935 on the broad gauge and increased Rs.51,,935 on the metre gauge, and telegraph increased Rs.7,611 on the former and Rs.5,643 on the latter. Total net earnings of the whole year amounted to Rs.4,16,06,792. Stockholders received 6¾ per cent. on the capital stock, against 5 per cent. for the previous year. Information from India justifies the directors in recommending the payment in January next of an interim dividend in respect of the current financial year of 10s. per cent. in addition to the guaranteed interest then due.

The accounts for the first half of the year up to September 30 have been closed, and the main results cabled from India are :—Gross earnings, broad gauge, Rs.2,28,23,000, against Rs.1,80,73,000; metre gauge, Rs.1,66,96,000, against Rs.1,65,09,000; total, Rs.3,95,19,000, against Rs.3,45,82,000; working expenses, broad gauge, Rs.93,91,000, against Rs.78,56,600; metre gauge, Rs.76,65,000, against Rs. 76,93,000; total, Rs.1,70,56,000, against Rs.1,55,49,000; net earnings, broad gauge, Rs.1,34,32,000, against Rs.1,02,17,000; metre gauge, Rs.90,31,000, against Rs.88,16,000; total, Rs.2,24,63,000, against Rs.1,90,33,000.

COMPANY NOTES.

Dividends, Payments, etc.

The directors of the Eastern Extension Australasia and China Telegraph Company, Limited, have declared a third quarterly interim dividend of 3s. per share, free of tax, payable January 15.

Land Bank of Egypt.—A dividend of 7s. 6d. per ordinary share and 2s. 1d. per founders' share is payable 17th instant, on presentation of coupons Nos. 15 and 11 respectively at the Comptoir National d'Escompte, London.

The directors of the Imperial Bank of Persia have declared a dividend for the half-year to September 20 of 5s. per share, free of income tax, payable on and after January 1, for which purpose the transfer books will be closed from the 20th to the 29th inst., both days inclusive.

British Burmah Petroleum.—Transfer books of the issue of £525,000 Six per Cent. First Mortgage Debenture stock will be closed from 18th to 31st instant, inclusive. Warrants payable on January 1.

The directors of the Bengal Coal Company, Limited, have declared a dividend of Rs.25 for the half-year to October 31, with a bonus of Rs.15 per share, Rs.1,30,000 to depreciation, Rs.4,40,000 to mines development, Rs.5,00,000 to dividend equalisation; balance, Rs.1,60,000 forward.

The directors of the Assam Railways and Trading Company have declared dividends on the Pre-Preference shares at 8 per cent. per annum, and on the New Six per Cent. Preference shares at 6 per cent. per annum for the half-year ending 31st instant, payable January 4 next; also "A" stock dividend of 4 per cent. for the half-year ended June 30 last, payable 22nd instant.

The Preference stock transfer books of the Rohilkund and Kumaon Railway Company, Limited, will be closed from the 20th inst. to January 5, inclusive, for the purpose of preparing the interest warrants payable to the shareholders whose names are on the register at the time of closing the books.

Associated Cotton Ginners of Egypt.—General meeting will be held in Alexandria on 27th inst., 4 p.m.

Egyptian Salt and Soda.—General meeting will be held at company's offices, 5, Rue Adib, Alexandria, on 28th inst. In addition to the ordinary business, approval will be asked of an agreement between the company and Mr. Eugene Debourg, the managing director. A copy of the agreement can be seen at the London office six days before the meeting. Transfer books will be closed from 22nd inst. to January 8.

Cheleken Oilfields.—Annual meeting will be held at Salisbury House, E.C., on 28th instant, at 12.30 p.m.

Oil Outputs.

Anglo-Egyptian.—Gemsah production for week, 22 tons (previous week, 22 tons); Hurgada, 2,840 tons, against 2,692 tons.

ON 'CHANGE.

(From Our Own Correspondent.)
Throgmorton Avenue, Wednesday.

Our market has not been quite so active, and, although a good deal of business was done in the early part of the week, things have become much quieter during the last few days. No doubt this is in a measure due to the approaching holidays, for which our market will be closed from the Friday night until the following Thursday morning. The general undertone continues to be a very confident one, and everything points to a renewal of activity and to higher prices in the coming year.

In Government stocks there is no change to report, except that there are sellers to a very small extent of both Egyptian Unifieds and 3½ per cent. preferences at current quotations. Bank shares have remained firm, with some business doing, and Delta Light Railway Preferences have been traded in to some extent round 6⅛.

In Land shares, Allotments have continued in strong demand, but there have been no sellers. Aboukirs have changed hands to some extent without altering the price. Behéras are exceptionally 3-16 lower at 12 13-16, due to a small sale on an unwilling market. Delta Lands early in the week were largely dealt in, and rose to 15s. 3d., but they are closing only 3d. better at 15s. Egyptian and Foreign Trusts on foreign and local buying jumped up 1s. to 9s. 3d., and are closing 9d. up at 9s., the improvement being due to the somewhat tardy recognition of the big rise in many of this concern's holdings. New Egyptians have been the centre of a large business, and are again 3d. firmer at 16s. 6d. A feature has been the persistent demand for United Egyptian Lands, which have improved 4d. to 1s. 6d.

In Miscellaneous shares, Alexandria Water are rather weaker at 12½ ex div., as also Egyptian Markets at 27s. 6d. Khedivial Mails have further receded 1s. to 34s. on the somewhat pessimistic remarks made at the meeting. Salts and Sodas has been a feature of strength, and have improved almost another 2s. to 38s. 3d., on the report showing a dividend of 25 per cent. and earnings much in excess of this figure.

In Greek securities the only change to record is a rise in Larissas, which have recovered the dividend just deducted.

Oil Shares.

Anglo-Egyptians (B) rose 6d. to 26s. 6d.-27s. 6d. Otherwise the market was indifferent, Anglo-Persian preferences declining 3d. to 24s. 6d.-25s. 6d.; while Spies fell 3d. to 6s. 9d.-7s. 9d.

The Egyptian Ministry of Agriculture has decided to publish a book containing coloured pictures of all useful birds, mentioning their uses.

The electrical works at Kolin, Bohemia, have been closed down through lack of coal, with disastrous results to the whole of the surrounding country, says *Reuter's* Zurich correspondent. Fourteen towns and 35 village communities are without light. Eight sugar refineries, eleven large mills, fifteen engineering works, the railway works and numerous other industrial establishments are all obliged to stop work.

THE ALEXANDRIA WATER COMPANY, LIMITED

Interim Dividend.

NOTICE IS HEREBY GIVEN that an INTERIM DIVIDEND of FOUR SHILLINGS per £5 share on COUPON No. 58 is PAYABLE on and after the 15th December, 1917, at Messrs. Barclays Bank, Limited, 1, Pall Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Limited, in Alexandria, upon the making of a declaration as to ownership in the form required by the above Banks, forms of which will be supplied upon application.

Dated Alexandria, 15th November, 1917.

By Order of the Board,
H. R. C. BLAGDEN,
Managing Director.

MORTGAGE COMPANY OF EGYPT.

The Board having decided to PAY a DIVIDEND on the 5 per Cent. Cumulative Preferred Shares for the half-year ending December 31, 1917, WARRANTS will be POSTED on the 31st instant, and BOOKS will be CLOSED from December 17 to December 31 inclusive.

ROBERT H. EDGAR, Secretary.

15th December, 1917.

NOTES OF THE WEEK.

General Allenby has made a further advance in Palestine, and the British Expeditionary Force reports the crossing of the Nasr-el-Aujeh on rafts and light bridges and the seizure of prisoners and booty. The Turks may have anticipated a long halt after the capture of Jerusalem, but it appears that they are not to be gratified. Their *communiqués* contain little information, as usual, but they allege British bombs in Jericho and British failures everywhere—not a very convincing piece of fiction.

On the other hand, the Turkish Foreign Minister has been reassuring the newspapers. He remarks that "the last word about Jerusalem has not yet been spoken. The military operations on the Mesopotamian and Palestine fronts are now developing favourably, and I am firmly convinced that a favourable solution will be found of pending questions with Russia." Clearly nothing is here for tears, according to the official view of Constantinople. But the world at large will hold that the one solid ground for Turkish satisfaction in the above statement is the collapse of Russia. The disappearance of the claimant for Constantinople may outweigh in modern Turkish eyes the loss of Jerusalem. The collapse of Russia may well be interpreted at the Porte as giving another lease of life to the Ottoman Empire, and there is no doubt that Germany is exploiting this fact to her own advantage among her Allies.

That Russia must be counted definitely out of the war is shown by several facts, quite apart from the actual armistice; the most significant indication is the order of the Bolshevist Government to the munition factories to cease making munitions of war, as these are no longer necessary. After that it is, of course, quite useless for M. Trotsky to keep up the pretence that he will break off negotiations, if the Germans do not agree to play the "no annexations" farce in the proper spirit of the time. The Teuton, although rather a heavy comedian, will probably do as requested in order to keep up appearances, and concede the shadow so long as he gets the substance; but with the order to cease making munitions public property, he knows how much he has to fear from Trotsky's anger. When the geese gnashed their teeth, it is not recorded that the fox fled.

Turkey is, therefore, no doubt, calculating on a reprieve. And it is conceivable that although both she and Germany may recognise that it will be beyond their power to recapture Palestine and Mesopotamia, they may hope to indemnify their losses at the expense of Russia. Petrograd, in its present mood of flinging away ambition, has no particular interest in the Caucasus; but Constantinople has. The Jews in power at Petrograd are not likely to be much moved by the sorrows of the Armenians, whom they object to as Christians, commercial competitors, and old friends of Russia, and, to a less extent, of English philanthropy; there is nothing in the Lenin-Trotsky manifestoes to show they feel any indignation at the Armenian massacres, and by that token we assume that they will be ready to give back Erzerum and Erzingan, the fruits of one of the most brilliant pieces of work done by the old Russian Staff—now unhappily destroyed—in the present war.

Moreover, they may also make renunciation of Trebizond, and that ancient city, the last home of the Byzantine Empire, which was restored to Christianity last year, will probably be handed over again at the peace negotiations. It is noteworthy that Turkish vessels are already resuming trade in the Black Sea, but their traffic will be liable to more interruptions than that of the German bagmen who have already arrived in Russia, since the Ukraine has refused to follow the policy of Petrograd, and the destiny of the Black Sea Fleet (now somewhat diminished in prestige) remains obscure. If it falls to the new Republic proclaimed at Kieff, it may fulfil some functions in the war even yet; if it comes under Bolshevist control, its guns might as well be turned into knitting-needles at once.

It is still uncertain how far Russian treachery to the Allies will involve Roumania. That M. Trotsky intends to do her as much damage as he can is quite evident from his handling of the American Red Cross mission. Apparently this incredible person construed it as a crime that America should do anything to relieve the necessities of Roumania and he would probably have guillotined the American Ambassador had he dared. As it was, he merely insulted him and jeered at his silence, just as a week or two before he objected to Sir George Buchanan for making a speech. This is the new autocracy; even Sir Oracle only insisted that no dog should bark when he opened his mouth, but M. Trotsky objects to silence as well. It would not be very astonishing to see a nervous breakdown on the part of this dictator.

The immediate consequence is, however, that he has prevented assistance from reaching Roumania, which is, no doubt, what he wanted to do; but at the same

Digitized by Google

time the growing strength of the Ukraine movement is an encouragement to the heroic Government at Jassy. The Germans are said to be using the period of the armistice to concentrate troops against the Roumanian and South Russian front. There can be no doubt that Petrograd would be only too willing that they should do so, since Petrograd discerns a danger to itself in the Ukraine-Roumanian spirit of independence. Bolshevik troops have been threatened against the Ukraine, they may also be threatened against the Roumanians. Fortunately these undisciplined hordes prefer to kill by words, like their leaders.

Meanwhile, the line which German policy will attempt to take is foreshadowed by an announcement in the *Münchener Neueste Nachrichten* that a deputation from the Courland Diet has arrived in Berlin with the message that the Diet assembled at Mitau has decided by unanimous vote that more intimate relations with Germany should be established. This will no doubt be treated as a demand for a German protectorate, or something not far short of economic and political subjection to Berlin. By what means this unanimous vote was obtained is not, of course, divulged —there has always been a strong German element in the province—but every effort will certainly be made to secure its imitation in other occupied countries. Some attempt to secure a similar movement has apparently been at the back of recent intrigues in Bucharest, but these seem definitely to have failed. We are not, however, at the end of that chapter.

The actual proposals which the Germans may make to the Russians have not yet been officially divulged by either side, but the demands of Bulgaria have again been shouted from the housetops. They are, of course, the Dobruja, with Macedonia and part of Serbia. There seems not the least likelihood that Russia will boggle over the terms. At the moment her statesmen are far more interested in the reform of the calendar—a project which has already advanced to the extent of abolishing Christmas and Easter.

A report has appeared in the *Politiken* of Copenhagen to the effect that the Turkish envoys who have been despatched to Switzerland to discuss the exchange of prisoners of war with the British delegates have brought with them proposals for a separate peace. The terms mentioned are definite: to the effect that Turkey will leave the Central Powers and join the Allies on condition that her lost territory is restored; it is further stated that these terms have been expressly endorsed by Enver Pasha. The *Politiken* is an excellent and sober newspaper, but even the best newspapers sometimes print unfounded rumours. No doubt Turkish sentiment has developed in favour of a separate peace since a year ago, and General Allenby will probably assist that development considerably in the next few weeks. But it is unlikely that the thing has gone anything like so far as the Copenhagen newspaper suggests.

In any event, Mr. Lloyd George's speech last Thursday contains, as it were, a reply by anticipation to any such proposals based on restoration of territory. He repeated his words of a few months ago at Glasgow —" What will happen to Mesopotamia must be left to the Peace Conference when it meets, but there is one thing that will never happen: it will never be restored to the blasting tyranny of the Turk. The same observation applies to Armenia—a land soaked with the blood of innocents massacred by the people who were bound to protect them." That must be taken as the considered basis of any scheme of separate peace, and it is doubtful whether Turkey is yet ready to accept it. No doubt Germany is offering her the restoration of her territories, as well as, perhaps, of Egypt and Cyprus in the shape of interest, if she will continue to believe in the ability of Berlin to win the war.

International Jewry has not been slow to mark its approval of the British Government's provision with regard to Palestine. A meeting has been held in New York, at which a Jewish speaker, speaking in Yiddish, declared that Great Britain's promise " in effect added another chapter to the Bible "; while the chairman of the meeting remarked that what Zionists were rejoicing over was " only a scrap of paper, but a scrap written in English, signed by the British Government, and, therefore, sacred and inviolable." We commend that *therefore* to the attention of Herr von Bethmann-Hollweg.

While these congratulations mark the temper of Jewry, the first actual plan, so far as we are aware, for the reconstruction of Palestine has been put forward by Mr. J. Ettinger at a meeting of the Jewish National Fund Commission for England. For some years past, as is fairly well known, he stated that extensive experiments had been carried out on farms and in communities in Palestine; but, in view of the new position, it is now necessary to embark on a far-seeing and comprehensive scheme. Mr. Ettinger remarked that all that this generation could do was to lay the foundation, but the Commission had in view a settlement of two million Jews, with eight hundred or a thousand cities, garden cities, and towns.

One interesting feature of this meeting was the announcement that the Jewish National Fund Commission had received congratulations from the Jews in enemy countries. The German Press has, of course, attempted to deny that the British Government's action in Palestine will have any effect on the opinion of German Jews; but the Jew cannot be dragooned in thought like the Prussian.

The Kaiser's Christmas speech is as poor in quality as a war-cake. Omitting the theological portions as beyond our province, he takes up the position that the war has come to an end in the East, but that in the West, " if the enemy does not want peace, then we must bring peace to the world by battering in with iron fist and shining sword the doors of those who will not have peace." It is perfectly true that in the East and the Near East the year closes with black prospects for the Allies, so far as Europe is concerned. But as soon as we extend the eye to Asia the situation is almost reversed—and the Kaiser is strangely silent about Jerusalem. If he is entitled to felicitate himself on his Bolshevik friends, he must nevertheless make a heavy discount on his Turkish stock.

Whatever the future of the Near East may be, it seems evident that the old Austrian ambition to have a leading part in its development is doomed to disappointment. The Near East requires financing, and German banks are now opening in the Balkans; Austrian ability to do anything of the kind no longer exists. The belated report of the Austro-Hungarian Bank shows that the Governments of Austria and Hungary have borrowed the total sum of 13,200,000,000 krones (nominally the krone is slightly more than a franc) against bonds; on the other hand, the holdings of gold have fallen from 1,094,900,000 krones to 264,200,000 krones, or more than three-fourths of the total amount held at the beginning of the war. The proportion of gold to paper is now less than 2½ per cent. gold to over 97½ paper.

These figures spell bankruptcy. But it would be interesting to know where the gold—never very frequently met with in Austria—has gone to. As to that the Bank has maintained a profound silence since the beginning of the war. Not much of it can have gone to Switzerland or other neutral countries. The loans of Sofia and Constantinople have been frankly contracted with Berlin and not Vienna. It was thought at one time that this gold had simply been stored in the vaults of the Bank as security against the paper, but the figures show that such is not the case, and it would seem that those who have held from the first that the largely swollen gold deposits of the Reichsbank in Berlin have owed a considerable part of their amount to the export of gold from the Austro-Hungarian Bank have been justified in their suspicions.

Digitized by Google

Austrian gold is no doubt a good security for Austrian loyalty, but Berlin has made certain, not only that Austria shall not leave the alliance without heavy loss to herself, but also that the financing of Eastern projects shall be done in Berlin, and not in Vienna. One of the minor conundrums of the war has, therefore, been settled by the publication of these figures, which throw a light on the past and future policy of the Central Empires by emphasising the subjection of Austria.

The alleged peace terms put forward by Germany through a neutral Legation at Washington are pretty much what was expected. Poland is to be an independent State under Austrian suzerainty; Roumania, Serbia, and Montenegro are to retain their original boundaries, right of access to the sea being granted to Serbia; Turkey to remain intact; England to pay Germany for her colonies, the money to be used for the restoration of Belgium, Northern France, Serbia, and Roumania; Russian territory conquered by Germany to be under a German protectorate. The daily Press has pointed out the ingenuity of making England pay for the devastation caused by the German armies; but the significance of the Near East proposals has been generally overlooked. Bulgaria, according to this proposal, gets nothing out of the war, since both Roumania and Serbia are to recover their territory. Yet Germany gets part of Russia, Austria the bulk of Poland, and Turkey gets back what she has lost, while Bulgaria is to lose what she has won. Sofia will probably have something to say to this, since Bulgaria is out for territory and nothing else, and has no mind to be sold by her Allies.

A recent question in the House of Commons confirmed the information that under the old régime Russia had suggested to Great Britain that the Sultan of Turkey should no longer be recognised as Khalif. At the same time it provided an opportunity for an official statement on the part of the British Government to the effect that it had never departed from the attitude that the Khalifate was a question for Islam alone to decide. No other attitude was conceivable, but it is well that the declaration should have been made emphatically in view of the interest that the enemy has in misrepresenting Great Britain's action or her intentions in this matter. Neither Germany nor Turkey has acquiesced willingly in the fiasco of the Holy War, proclaimed with such unction when the Young Turks threw in their lot in the war with their German paymasters. Every effort has been made to suborn the Moslem populations that had been loyal to one or other of the Allied Powers, and in Germany itself the fiction has been maintained of a Mohammedan India and Egypt merely counting the hours of their release from the British "yoke" at the hands of a liberty-purveying Germany.

With the help of some Egyptian nationalists and a few Indians of a similar kidney a brave show has been made in Germany of the two countries groaning under British oppression. But against the gratifying presence of a handful of Allied Adullamites in Berlin had to be set such stubborn facts as the loyalty and prosperity of Egypt and the success of the Arabs in their secession from the Ottoman Empire. To overcome this difficulty recourse has been had to organised propaganda with the double object of misleading the German people in regard to the attitude of the Moslem world, and of trying to bring the Moslem world to the condition in which it is depicted in Germany as already being. British designs against Islam have been a favourite theme, and it was inevitable that the possibility of interference with the Khalifate should be exploited strenuously. We cannot hope that the official statement of the British Government will obtain any wide publicity these days in Germany and Turkey. It should, however, be circulated not merely once, but repeatedly, throughout the rest of the Moslem world, in order that Arabs and others may have the facts in their possession when the echoes of German misrepresentations reach them.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, November 24.

The Financial Adviser's Illness.

It has been with the greatest regret that everyone has heard of the illness of Lord Edward Cecil, the Financial Adviser. He returned about six weeks ago from England, where, as it may be remembered, he had been occupied on war work since the spring, and he at once took up the reins of office again at the Ministry of Finance. It was, however, soon evident that his state of health left very much to be desired, and, after working strenuously for about ten days, picking up the threads and interviewing the leading residents and Egyptians, he was forced to give in and obey the doctor's orders to take a complete rest. He has been at Helwan for the last ten days, where it is hoped that the air and complete quiet will restore him. It is understood, however, that he will not be able to return to work for some time, and that the doctors have advised him to proceed as soon as possible to Switzerland. This breakdown in health of Lord Edward has come as a great disappointment out here, for great things had been hoped for from his resumption of office, and everyone joins in wishing him a speedy return to health, so that he may be able to take up again the work which he had carried out so well since the outbreak of war.

The Entertainment of the Troops.

A very successful fête was given last Saturday evening in the Ezbekia Gardens in aid of the funds of the Egyptian branch of the United Services Welfare Fund. The fête was under the patronage of the Sultan, General Allenby, and Admiral Jackson, and attracted a huge crowd all day. Amongst the visitors during the afternoon were the High Commissioner and Lady Wingate. The U.S.W.F. is charged with the supervision and financing of most of the entertainments given for the soldiers and sailors in Cairo and Alexandria, and under its auspices concert parties are organised to visit the various hospitals and camps. These parties consist of civilians as well as of military, many of them giving first-class performances, and some possess funds enabling them to pay their own way. Altogether the rank and file are well provided for when they are in hospital or on leave; but the man who does not get anything near the same attention paid to him and is indeed at times sorely neglected is the officer, especially the young one, up on leave or in garrison, who finds few efforts made to provide him with clean and healthy amusement or distraction. If only someone would take upon himself or herself the work of organising entertainments for officers or of bringing them into closer contact with congenial society, which undoubtedly exists in Cairo and Alexandria, they would earn the deepest gratitude of a large body of men, many of whom have admitted to me that even on leave they find time hanging heavily on their hands, and that they would give anything for a taste of the home life they miss so and for a few moments' conversation with women of their own class.

The Control of Cotton Exports.

A new committee has been set up in Alexandria by order of the Commander-in-Chief, General Allenby, for the control of the export of cotton from this country. The committee is to be known as "The Cotton Export Regulation Committee," and is presided over by Mr. A. King Lewis, the Director-General of Customs, and from the 20th inst. no cotton can be exported except under licence issued by this committee. Licences will be issued to exporters in respect of each country proportionate to the average quantities exported in recent years by each exporter, and, save so far as may be necessary for securing a reasonable margin to meet unexpected circumstances, they will be granted up to the maximum amount exported to each country during the 1916-17 season.

The object of the setting up of this control is stated in the official notice to be to provide for the distribution of the Egyptian cotton crop among various countries, more especially with due regard to the shipping space available. Cotton exports have, of course, been controlled in the past in the sense that nothing could be

Digitized by Google

sent out to a neutral country unless and until investigation had shown that no leakage into enemy countries could take place. The new control now set up will go further; for it will, it is understood, give preference to exports to Allied countries over those for neutral countries. By these means the very restricted amount of shipping at present available will be devoted as much as possible to meeting the requirements of the Allies, instead of, as so often has happened in the past, space being taken up by exports to neutrals at the very time when cargo was waiting for shipment to one or other of the Allies who happened to be badly in need of further supplies, but who, owing to the absorption of space by neutral shipments, had to wait until further shipping became available.

At the present moment Alexandria is crammed full of cotton and cotton seed, and it is computed that, at the rate exports are taking place, it will be some considerable time before the existing stocks can be cleared. So great has the congestion become that the Cotton Seed Control Board, which is entrusted with the purchase of the cotton seed crop on behalf of his Majesty's Government, has found itself compelled to issue a notice to the effect that it cannot receive any consignments of seed at Alexandria after the 27th inst. This is decidedly unfortunate, as the factories up country are hard at it ginning the crop, and every day more and more cotton and seed are becoming available, for which there exists in the interior little or no store accommodation, and which in normal times are sent direct to Alexandria. It is not quite clear how the situation is going to be handled; but it is understood that the authorities are fully alive to the serious position, and that they are considering how best to provide relief pending more shipping being made available for this country.

The Cambrai Victory.

The magnificent victory gained over the Germans at Cambrai has made a tremendous impression on the Egyptians, many of whom are frankly amazed at the simultaneous and consistently successful activity displayed by the British on all the fronts. This victory is all the more welcome out here seeing that it has been achieved by Lieut.-General Sir Julian Byng, who held the Egyptian command at the time war broke out, and who left here to take up the command of the Canadians in France in the autumn of 1914. Sir Julian and Lady Byng were most popular in Egypt; the latter charmed everybody by her delightful personality, whilst the General established a great reputation for efficiency, determination, and generalship, which has been more than justified by his work in France.

The late Major Evelyn de Rothschild.

Amongst the wounded in the recent fighting in Palestine was Major Evelyn de Rothschild, who was brought up to Cairo, but who unfortunately succumbed to his wounds last week. He was accorded a military funeral, which was exceedingly impressive. A service was first held in the Synagogue, where the Grand Rabbis of Alexandria and Cairo officiated, with the assistance of the Jewish chaplain to the Australian forces. British troops headed the procession, which included deputations from the Jewish communities and the local Jewish institutions. Immediately behind the coffin, which was borne on a gun carriage, walked Lord Dalmeny, representatives of the Residency, the Headquarters Staff, and the leaders of the Jewish community. Lord Dalmeny and Major Evelyn de Rothschild were, of course, cousins, and the former came up to attend the funeral direct from the battlefield where his brother had just been killed.

THE PALESTINE FRONT.

The news from Palestine describes a satisfactory advance near the coast, and gives the first detailed information of that advance from Hebron which decided the fate of Jerusalem.

Dealing with the first, it comes as a surprise to learn how very incomplete our advance has so far been at the el Aujeh line. It is satisfactory to know that the river has been successfully passed by a midnight attack (December 20-21) near its mouth—with naval co-operation—and an advance made to within two miles of the little port of Arsuf. This is a famous site. The name is probably derived from the Phœnician god Reseph, and, if so, it is an interesting illustration of reversion to an older form, because in the Seleucid age the city which stood here was called Apollonia. During the Crusading days this spot changed hands several times, being captured both by King Baldwin and King Richard I. Close to the old ruins is the Mosque known as the Haram of 'Ali ibn 'Aleim, or more popularly "Sidna Ali"—a much-revered Moslem shrine, so called after a warrior who bravely defended Arsuf against the Crusaders. The minaret, standing as it does upon a precipitous cliff above the sea, is a prominent landmark on the coast.

Further east our line is not quite so advanced. It includes Mulebbis, the native village near the well-known Jewish colony of Petach Tikvah. This is one of the largest of the colonies, extending to about 8,000 acres, with about 3,000 inhabitants. Much of the land is recovered from the marshes by drainage; large numbers of eucalyptus trees have been planted, and also valuable orange groves. S.E. of this lies Fejja and Rantieh, the latter on the railway, both occupied three days before Christmas.

In the mountain region we are again reminded how near the Turks are to the Holy City by the news that only on the 21st they were driven out of Ras ez Zamby, a lofty point east of the Jerusalem-Nablus road and only two miles N.E. of Bethany.

More interesting to those who know the land is the account given in the *Daily Telegraph* of the rapid advance along the southern road, which, by relieving the opposition to our advance from the west, undoubtedly led to the retreat of the Turks from Jerusalem. Clearly the Turks began along this southern line to find their position insecure before our approach. The Ras esh Sherifeh—that dominating point over 3,300 feet high which lies to the west of Solomon's Pools—although elaborately prepared for defence, was found evacuated, enabling our men to get to the springs and their great reservoirs, and to water their horses. These three pools—seven miles directly south of Jerusalem—are probably of Roman construction, in spite of their name. They lie in the course of the Wady Artas, the lowest and largest being 582 feet long, 177 feet broad, and 50 feet deep. There are four springs in this valley (but never in recent years more than partially filled) which supply the low level aqueduct running from these pools, and in ancient times there were two other aqueducts which fed these pools—one a 28-mile channel from Wâdy Arrub, and the other a system of wells connected together by an underground channel (a *khariz*) in Wady Biar. Both are now useless and broken.

From the Pools no direct attack was made on Bethlehem—which lies well to the east of the high road—but the important Christian village of Beit Jala (possibly the Goloh of Josh. xv. 56, II. Sam. xv. 12) was captured and the road defences turned. In Beit Jala there is a Greek orthodox church and school and Latin seminary and school, and a small German Protestant community, so that the small community has a considerable choice of religion. To the east of the town, between it and Bethlehem, is a wide open valley, full of most prosperous olive plantations. Happily, the Turks, finding their retreat in inevitable danger of being cut off on account of this turning movement, retired hurriedly all along the line, and apparently there was not much further opposition.

PERSIA AND THE RUSSIAN REVOLUTION.

(From Our Own Correspondent.)

Tabriz, October.

Turkish Propaganda in Persia.

A movement of some significance is on foot in this part of the world and deserves more than passing attention. I may, perhaps, preface my remarks by explaining the difference between the word "Turk" as it is understood in England and the meaning attached to it in Persia. We do not call Osmanlis Turks. The latter term is applied to Mohammedans living in Azerbaijan and in Caucasia, who were at one time Persians, when Caucasia was a part of the Persian Empire. Nowadays Persians, however, are those who live in the provinces of Farsistan, Irak-Ajemi, Mazandaram, Gilan and Khorasan. The inhabitants of Azerbaijan and Caucasia are called Turks, while those in other provinces have their own special tribal names, such as Bakhtiari, Luri, Kashgazi, etc.

Some Caucasians have recently appeared in Persia on a special mission, and have styled themselves either Social Democrats or patriots. They posed as Caucasian nationalists and their object apparently was to preach in Persia "the great idea." By this was meant that the Persians, being more intelligent and more advanced than their northern neighbours in democratic and republican principles, ought not to retain the anomaly of a monarchy. They urged that the Shah should be dethroned and Persia declared a republic, on the lines of the United States of America. After a certain amount of this preaching, a good deal of "demonstration of patriotism" and still more of promises of what would accrue from a republican Persia, the Caucasian delegates came to the conclusion that the Persians were, after all, still a long way behind Russia, and were too immature and unintelligent to benefit by the great idea.

This incident was followed at no great interval by a second movement, the objects of which may be set out as follows:—It was urged that (1) Azerbaijan is not a part of Persia; (2) that the inhabitants are not Persian, but Turks in the Caucasian sense of the term, and (3) that they should separate themselves from the rest of Persia and join the Caucasian Turks to form a separate independent state. This new nation was, of course, to be separate from Russia and to comprise Caucasia, Azerbaijan, Turkistan, Gherguzistan and Bashgiristan. The advocates of this movement claimed to be members of a Society in Caucasia known as Turk Federationists, and in this instance it would seem as if the word Turk carried a double significance. On the one hand they laid great stress on the establishment of a new nation, but in the same breath they put it forward as their second aim that all Moslems of whatever sect or tribe should become autonomous. There remains, however, a third idea about which less is spoken of openly at present, and it is that the new nation, as soon as it becomes an accomplished fact, should declare itself part and parcel of the old Osmanli Empire. It is believed here that Caucasia and Azerbaijan were promised to Turkey by the German Emperor in the event of victory, and it would seem as if the intention now was to ensure that these two provinces should still become part of the Sultan's Empire whichever way the war goes.

A German Spy.

In this connection I may cite an incident which occurred only a few days ago. The authorities arrested on the Baku-Tiflis train a "mollah"—a well-dressed typical Mussulman Mollah, save perhaps for his dark glasses. His peculiar accent gave rise to suspicion, and he was found to be a German. The blue eyes explained the dark glasses. His arrest created considerable sensation, and for a moment the attitude of his fellow-passengers was distinctly threatening. He declared that he had no fear of death, that he had expected to be arrested sooner or later. His one surprise had been that he had not been detected earlier, and he made some scathing remarks about the Russian police, who had allowed him to be at large in the country for two years.

The Demand for Reforms.

Azerbaijanis, it is needless to say, could never entertain the foolish idea of separating themselves from the rest of Iran in order to join themselves to the Caucasus. Still less are they likely to join the Osmanlis, whom they hate as Sunnis. They have no wish to become subjects of a Sultan whose aim, through the Committee of Union and Progress, is to Turkify all the races under his jurisdiction. At the same time the Azerbaijanis, while having no intention of betraying Iran, recognised that it was a propitious moment for obtaining concessions from the Central Government. The programme they put forward was as follows:—(*a*) The dismissal and exile from Tabriz of the former Governor-General Sirdar Rashid (who has since been assassinated); the exile of Basir-Sultanieh, a Russophil landowner, and three or four others who in the past had placed themselves under Russian protection, and had received Russian passports. (*b*) The opening of the Mejlis. (*c*) Permission to begin at once preparations for the election of members to the Mejliss. (*d*) That pardon and permission to return from exile should be given to those members of the Mejliss who are still in banishment. (*e*) An immediate reconstitution of the Cabinet, and the appointment of Ministers who would be neither Russophil nor Anglophil, but simply Persophil.

CYPRUS NOTES.

(From a Correspondent.)

Since the break-up of summer mild weather has prevailed. The rainfall since October has been sufficient to freshen up pasturage and to hearten all flock-owners; and has been of great benefit to carob trees. It has been insufficient for farmers in general, who are looking anxiously for December rains in all districts. Government is doing its best to encourage increased sowing of cereals, and of all vegetable produce. With this object the growing of tobacco has been wisely prohibited except under special licence, which is only granted in very exceptional circumstances. It is not allowed at all in the limited areas of naturally irrigated lands, or in those which have lain fallow last year, and which should consequently bear crops in the coming season, under the ordinary system of rotation. It should be explained that, except in lands watered by the few perennial torrents that exist, Cypriot farmers only cultivate half their holdings annually, leaving the remainder to recuperate. Artificial fertilization is very restricted and backward. It is, of course, unfortunate that tobacco cultivation should receive this temporary set-back just when the revival of this dormant industry is giving good promise of success. Those who raised good crops last year did very well, declining in many cases 10s. the oke (2 4-5 lbs.), or about 3s. 7d. the pound. A large number of agriculturists have in consequence applied for licences. Were these granted, cereal crops would suffer proportionately. It is satisfactory, on the one hand, to note that the results now reached point to a prosperous development of the tobacco industry after the war; and on the other, that excellent prices will no doubt continue to be realized from all cereal produce in the coming year by those who must perforce suspend for the present operations in the new and enticing field.

A new tariff of retail food prices has come into force from December 1, all previous orders being cancelled by public

notice. The consequence is, that various articles of consumption again practically disappear from the markets, and much illicit trading goes on, although many cases come before the Provost Marshals, the temptation to profiteer prevailing here as elsewhere. Government continues to issue wheat and barley from its tithe stores, and bread made of meal mixed in equal proportions is sold to the poor at 3¼ piastres (about 4½d.) the oke. Another quality containing 25 per cent. of barley is made for officials by bakers who deal exclusively in this kind. Bakers in general are now free to deal as they please. Hitherto the grain of 1916 only has been used; that of last harvest will be drawn upon about the middle of December. While all classes feel the further rise in prices, officials with small salaries still suffer most, and rumours are current that another bonus will be granted to those of certain grades.

Famagusta once more in its checkered annals shares with Nicosia a foremost place, and is rapidly growing in importance. Lighters and other coasting craft have been commandeered for use at that port, which daily becomes more and more a scene of activity. The news from Palestine causes the liveliest interest among all classes. Events there seem to promise the renewal of that intimate relationship between the island and the venerable mainland which ought to exist, but which has declined through the centuries and withered under the deadening influence of Turkish misrule.

BRITISH RED CROSS UNITS IN ROUMANIA.

The last of the two hospital units sent last year to Southern Russia and Roumania by the Joint War Committee of the British Red Cross Society and the Order of St. John of Jerusalem has now safely returned to England. The two units (called, for the sake of convenience, Unit "Y" and Unit "Z"), under the command of Dr. F. G. Clemow, C.M.G., sailed from Liverpool on September 2, 1916, and arrived in Archangel on September 14. Here a special train was made up, consisting of "class-cars" for the personnel, nine closed wagons for the material (which filled over 1,200 cases and bales), and open wagons for the fourteen motor ambulances, lorries, and cars with which the units were provided. The journey from Archangel to Odessa occupied ten days. Thence both units proceeded by train to Reni, and thence by boat to Galatz, where, working as one unit, they established a hospital of 240 beds in a large building, the Scuola Normala. Large numbers of severely wounded Roumanians from the fighting line in the Dobruja were admitted to the wards. At the end of December, however, it became necessary to evacuate all the hospitals in Galatz, and the units left there on Christmas Eve, and, with stores and motors intact, returned to Odessa.

After some delay here, Unit "Y," under Dr. Clemow, proceeded to Ismail, on the Danube, and opened a hospital of 140 beds in the largest building in the town—a girls' gymnasium or high school. Unit "Z," under Mr. James Berry, F.R.C.S., of the Royal Free Hospital, returned to Roumania and opened a tent hospital in the grounds of a large villa near to the town of Tecuci. Much valuable work was done here among the Roumanian wounded until the end of August, when the unit returned to England.

The hospital of Unit "Y" was attached to the Russian Naval Division in Ismail, and large numbers of sick and wounded were treated during the seven months it was open. Repeated and serious air-raids added to the numbers of wounded. In addition, a field dressing station was opened at Patlajanka at the exact apex of the Danube delta. In the autumn several members of the unit were compelled to return home on the expiry of their contracts with the British Red Cross. The remainder offered to establish a field hospital with the Russian army on any active front. The offer was accepted, and the unit proceeded to Roman, on the Roumanian front, for service with the 4th Russian Army. But by this time (the end of October) all prospect of active military operations on this—or indeed on any other Russian—front had ceased, and the unit consequently returned to England.

Both units throughout received every courtesy and facility from the Russian Red Cross Society and the Russian and Roumanian military authorities. That their services were appreciated is shown by the fact that the members of Dr. Clemow's unit received decorations and medals from the Russian authorities, and those of Mr. Berry's unit were similarly recognised by the Roumanian authorities.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Man Power in India. Dec. 19.

Mr. H. A. L. FISHER, replying to Sir J. D. REES, said: As a result of the establishment of a Central Recruiting Board in India the recruiting situation has been reviewed in all its bearings, the minimum requirements of the future ascertained, and a provincial and district organisation created by the civil and military authorities acting in concert for obtaining by voluntary enlistment the requisite number of combatant and non-combatant recruits. In these arrangements the principal native States have, at the wish of their rulers, been included. Speaking in the Imperial Legislative Council, the Viceroy has described these measures as highly successful. A steady flow of reinforcements to the various fronts has been maintained, and the raising of new units facilitated.

Cyprus and the War.

Colonel YATE asked the Secretary of State for the Colonies whether, considering that in the Report on Cyprus for the year 1916-17, No. 941, practically the only mention of the war was the statement that financially the island had been beneficially affected by the war, and that several thousand able-bodied Cypriots had been recruited on generous terms of pay to serve as muleteers with the Salonika Army, and had been able to remit substantial savings to their families in the island, he would have a report published showing what help in men, both for combatant service and in labour battalions, etc., and in materials, the colony had provided towards the prosecution of the war?

Mr. HEWINS: In present circumstances I do not think that there would be advantage in adopting this suggestion.

Colonel YATE: Will the hon. gentleman ask the authorities in Cyprus to try to put what information is available in next year's Report?

Mr. HEWINS: I will consider it.

War Prisoners in Bulgaria. Dec. 20.

Mr. JAMES HOPE, in a written reply to Lord H. CAVENDISH-BENTINCK, states that thirty British incapacitated non-commissioned officers and men were repatriated from Bulgaria in August last, and that no doubt further similar exchanges will take place from time to time. The question of the transfer to a neutral country of British combatant prisoners of war who have been interned in Bulgaria for eighteen months or more, is under consideration.

Great Britain and Persia.

Major D. DAVIES asked whether the Leader of the House was in a position to give an assurance, in view of the recent statement from Petrograd that the late Russian Government had agreed to Great Britain exercising a predominant *rôle* in the former neutral sphere in Persia, that the South Persian Rifles were not introduced as a first step towards a British occupation or annexation of that district?

The CHANCELLOR OF THE EXCHEQUER: In no sense was such an object contemplated. The force was created for the purpose of maintaining order and security for trade in South Persia. The existence of the force must not be construed as implying any change in the feeling of friendship we entertain towards Persia or in the pledges which have been given to respect the independence of that country, still less as indicating any desire for annexation.

THE HEJAZ CAMPAIGN.

The War Office make the following announcement:—

Reports have been received that an Arab force under Sherif Feisal, son of the King of Hejaz, destroyed a troop train south of Tebuk, on the Hejaz railway, some 350 miles north of Medina.

The whole of the Turkish detachment in the train were killed or captured, amongst the former being Suleiman Pasha Rifada, Paramount Chief of the Billi tribe, who, foolishly throwing in his lot with the Turks, was travelling in company with them.

Three hundred rifles were captured and a large quantity of ammunition, also £24,000 Turkish in gold.

THE NEW ARMENIA

A Literary and Political Periodical.

THE NEW ARMENIA, published monthly, is the only English periodical in America for those who are interested in Armenian life and letters, and for all devotees of justice who hold, with Gladstone, that 'TO SERVE ARMENIA IS TO SERVE CIVILIZATION'.

Yearly Subscription, $2.50 in advance.

Address—Editor of THE NEW ARMENIA, 949, Broadway, New York, N.Y.

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

THE SCHOOL RE-OPENED ON OCTOBER 1.

NEAR EAST BOOKSHELF.

A HISTORY OF SERBIA.*

Miss Waring's book is an interesting and spirited attempt to combine present politics with past history. Like other such attempts, it is not wholly successful, for the passions of to-day do not always reveal the mysteries of long ago. But it is, none the less, of real value, and its too great partiality for the Serbs is balanced by a sympathetic insight into their spirit and ideals. The chapters on the spirit of the Serbs (pp. 147-62) and Serbia and the War (pp. 228-49) are moving and picturesque. Yet there are many instances in which a somewhat polemical bias is evident. For instance, the map at the beginning of the book gives an ethnological picture of Macedonia, which is more favourable to the Serb than that of M. Cvijic himself was in 1909. In his map in the pamphlet, "L'Annexion de la Bosnie," M. Cvijic marks the area below Uskub, west of the Vardar to Ochrida, and east to Seres and Doxat, as belonging to Macedonian Slavs. These are distinguished from Serbo-Croats (*i.e.*, Jugoslavs). In her map, Miss Waring, following later Serb views, gives the whole of Serbian Macedonia to the Jugoslavs. This makes an obvious and important difference.

Again, we do not think it fair to speak of the "pretended tolerance of the Turk" in the fourteenth and fifteenth centuries. The tolerance was real, and greater than that of Western countries at this time. In the centuries when Hus and Latimer were burnt for heresy, the Turks recognised a Greek patriarch at Constantinople, and tolerated free-thinking sects of Dervishes. But Turkish toleration, once the widest in Europe, is now the narrowest. The difference between Serbian and Turkish progress cannot be shown more strikingly than by the fact that Serbia gave full civil and religious rights to the Catholic subjects she acquired from Turkey in 1913.

Again, it seems a little hard to lay on Austria the full blame for the folly of King Milan in declaring war on Bulgaria (p. 167), and the discussion of the phases of the Jugoslav question (pp. 187, 189, 198) is in the direction of heat rather than light. It is well to remember that the Serbian case, in general, is so strong on the bare facts that it is weakened, not strengthened, by any suspicion of bias in an English writer.

Though venturing to deprecate these apologetics, we should emphasise the general merits of the book. Anecdote and illustration are happily used to enliven a vigorous narrative, and the general grasp of the subject is excellent. We should also be grateful to Miss Waring for having induced the Serbian Minister to contribute a preface. It is of special interest as coming from one who was at Vienna when the ultimatum was delivered, and who has an almost unique knowledge of the Jugoslav problem. There is probably no statement which presents within a dozen pages or so such a clear and masterly exposition of the modern problems of Serbia.

IN THE PATHS OF THE TRIREME.†

Such is the secondary title that we submit to our gay and gallant author for use in an English edition of this, the third of his Great War pictures drawn from the life. Or we might say drawn out of the jaws of death, for it shows him dodging the "marmites" and submarines with the usual gallantry of a Frenchman and the eye of an artist. He takes us over the paths of the triremes of Ancient Rome, as known to the galley-slave Ben Hur, or later to the Barbary slave Don Quixote. The climacteric of his playful and terrific dabs of vermilion, ochre, and blue is the storm-height of Achi-Baba, the shells from which he anathematises from the beach of Sedd-el-Bahr. Every page of his live story book is good, and a little exaggeration here and there may be pardoned a vivid imagination. Here are some of his sub-titles to the Great Adventure: "The Iliad à la Française"; "We Encamp on the Land of the Gods (Mudros)"; Achi-Baba, or the Forty Difficulties"; "The Naked Army"; "Malta, or the Glorious Ambassadors"; "Vengeance on the Spot by the Trawler 'Marie Frédérique'"; "The Submarine Combat seen from Thirty Metres Below"; "The Three Ways of Burying a Corpse"; "The Verminous Isle." The style of our author is even boyish, and he is at no pains to hide his delight at being a Frenchman, and an ally of Britain at that.

How a British cruiser captain dined and champagned the three officers of a captured submarine and forced them to sing "Gott strafe England," to the accompaniment of the ship's piano, is one of many gems in a veritably Entente Cordiale volume. We should like to reproduce at length in the French original the fine apostrophe of our gallant dead, but considerations of space forbid. A translation of the book into English should be made.

* "Serbia." By L. F. Waring, B.A. (Dublin). Home University Library. Williams and Norgate. 1s. 3d.)

† "Les Compagnons de l'Aventure." By André Tudesq. (Attinger Frères, Paris. 3 fr. 50.)

SPY AND HERO.*

The spirit is willing, but the pen is weak. Nevertheless, we owe to the author, *after* his "Criminal, Spy, and Hero," the making, the marshalling, and the memory of this weirdest of British "beachcombers" of the Great War, whom the Fates seem to have driven to select the Arab world for his self-imposed stage of glory, love, tragedy, and death. Every resident in the Near East will want to read this unfinished story; and here and there some may assist in its completion. .

Walter Greenway (his alias), at the age of twenty-five, with unblemished character, the humorous son of "upper-lower middle-class" parents, was caught by police in an untenanted house, having entered through an attic window. He pleaded a passion for climbing, a love of joking, and an invitation to dinner by strangers whose names he did not know and whose address he had mistaken. He was given three months' hard labour, and on release took to burglaring, moody with his parents, his best friends, and England as he knew it. After four years of this and constant convictions, he unburdened himself to the author, a police-court missionary, who induced him to go to sea, where he could get all the climbing he wanted without burglary. He deserted at Colombo, after earning the united goodwill of his skipper and mates. He reappears eight years afterwards, eight years of deliberate silence, or anonymity, the husband of the bewitchingly beautiful daughter of a majestic Arab sheikh, the father of two "kittens" (girls) and one "dog" (boy), minus his left arm, full of scars, and a victim to dysentery; loss and acquisitions alike acquired by service as a spy during the first Mesopotamian advance. Of his subsequent exploits it would perhaps be unfair in this review to give even a summary, but they took him to Baghdad, whence he escaped to die, under English military nurses' care, in the arms of his devoted and inconsolable Arab wife. England, through readers of *Blackwood's Magazine*, which has published fragments of this Quixotic drama, is still trying to get into touch with the grand old pro-British sheikh, his lovely daughter, and Walter Greenway's dog and kittens —all of whom are hiding for fear of Turco-German vengeance.

The mystery that still exists is the charm of the story—the real thoughts and deeds of the spy-hero—the fate of his beloved ones. In the book itself the good missionary-author repeats himself occasionally in back-parlour dialogues, but he has not only told a story, but helped to make one which will live. After the war we shall expect to know more of Walter Greenway, outcast, and of those he loved.

A WAR TALE.†

Good wine needs no bush, and Captain Brereton's war tales require no commendation. In "The Armoured Car Scouts" the reader is taken to Armenia, and is held breathlessly through a vigorous narrative which turns on the experiences of Guy Grammond with a British naval armoured-car detachment serving under the orders of the Grand Duke Nicholas. Of course, a German spy plays a prominent part in it. There is no lack of incident throughout the 384 pages. The author handles his subject in a masterly manner, and brings home to the youthful reader some of the realities of the Great War.

PERSONAL AND GENERAL.

CALENDAR OF THE WEEK

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1917. December 28	1917. December 15	Friday	1336. Rabia I. 14	5678. Tebet 13
29	16	Saturday.....	15	14
30	17	Sunday	16	15
31	18	Monday	17	16
1918. January 1	19	Tuesday	18	17
2	20	Wednesday	19	18
3	21	Thursday	20	19

The Serbian War Mission has arrived in America.

M. Nintitch, Serbian Minister of Finance, has left London for Paris.

The French Ambassador was visited on December 20 by the Roumanian Minister.

General Guillaumat, the new Commander-in-Chief in succession to General Sarrail, arrived at Salonika, on December 22.

M. Romanos, the Greek Minister in Paris, left London on December 23 for the Legation in the French capital.

Lieutenant-Colonel Florescu, the newly-appointed Military Attaché to the Roumanian Legation in Italy, has arrived in London.

General Givkovitch, the Commander-in-Chief of the Jugoslav Division in Russia, has arrived in London, and has visited the Serbian Minister.

It is announced that Fathi Pasha, Egyptian Minister of Wakfs (Pious Foundations), has resigned. His successor has not yet been appointed.

As General Allenby is a native of Felixstowe, the London Society of East Anglians has sent him a telegram of congratulation on the taking of Jerusalem.

Mr. Lloyd George entertained M. Venizelos, the Greek Prime Minister, at luncheon on December 22. M. Venizelos left London for the Continent in the evening.

M. Michael Michaelovitch, who has been appointed secretary to the Serbian Legation in Rome, has arrived in London. He will leave shortly to take up his new duties.

At St. Mark's, Venice, Cardinal Lafontaine celebrated a thanksgiving service on December 23 for the liberation of Jerusalem, in the presence of the civil and military authorities.

Sir F. Evans, Acting Colonial Secretary, announces that over £5,000 has been collected at Gibraltar for "Our Day" British Red Cross Fund, and has been forwarded to the headquarters in London.

Autograph letters and historical MSS., by or relating to the Duke of Wellington and the Marquis Wellesley, Governor-General of India, "the property of a gentleman," will be sold at Christie's on February 19.

According to Reuter's correspondent at Madras, Lord Chelmsford, the Viceroy, and Mr. Montagu, with their party, arrived there on December 21. They were met by the Governor of Madras, Lord Pentland.

The Government of the Federated Malay States has contributed £10,000 to the funds of the Belgian Red Cross Society and £5,000 each to the funds of the Roumanian, Serbian, and Montenegrin Red Cross Societies.

Sir Charles Lyall, K.C.S.I., C.I.E., D.Litt., will read a paper on "Four Poems by Ta'abbata-Sharra, the Brigand Poet," before the Royal Asiatic Society, 22, Albemarle Street, W., on Tuesday, January 8, at 4 p.m.

The Greek Minister is in mourning owing to the death of his younger brother, M. Panagiotis Gennadius, for many years Director of Agriculture in Cyprus, and one of the most distinguished of scientific agriculturists in Greece.

It was announced by Royal Proclamation in the *London Gazette* on December 22 that a branch of the Mint is to be established at or near Bombay, either in the buildings of the Indian Mint or on such other site as the Governor-General of India in Council may approve.

A special tribunal at Arrah, Bengal, dealing with the Katar riot case, sentenced 97 of the accused to terms ranging from ten years' transportation to five years' rigorous imprisonment. Fines were added in several cases.

In a lecture at the Grafton Galleries on December 20 on "The Great Serbian Retreat," M. Milan Tchurtchin paid a high tribute to the devotion of the British nurses to the Serbian wounded and their bravery during the retreat.

At a meeting of the Lord Mayor's Armenian Relief Committee held at the House of Commons on December 20, it was stated that urgent messages had been received from Armenia regarding the position of a large number of refugees faced with impending starvation.

Dr. J. B. Christopherson, Director of the Civil Hospitals of Khartum and Omdurman, who has been acting as secretary to the Commission on Medical Establishments in France, has left for Khartum. The work of the Commission in France has been completed.

General Georgescu, the representative of the Roumanian Army attached to the British Headquarters, has returned to London (says Reuter's Agency) from France, where, by command of the King of Roumania, he presented to Sir Douglas Haig the Roumanian Royal Order of Michael the Brave.

All Protestant churches in France celebrated the liberation of Jerusalem from Turkish rule on December 23. In Paris the British and United States Ambassadors were present at a celebration at the French Calvinist Church of the Étoile in the Avenue de la Grande Armée, at which President Poincaré and the Government were represented.

There is no foundation for any apprehension on the part of the Armenians that the Armenian religious community was not represented at the time of the British entry into Jerusalem. A representative of the Armenian Patriarch (Reuter's Agency is informed) was received by the British General Officer Commanding, together with the representatives of the committees of other ecclesiastical bodies, at the ceremonial entry of the British forces into the Holy City.

The Crown Prince of Serbia has sent the following telegram, in acknowledgment of birthday congratulations, to Dr. Ante Trumbitch, president of the Jugoslav Committee in London:—"I have been deeply touched by your greeting addressed to me as the future Sovereign of the democratic State of the Serbians, Croatians, and Slovenes. I do not doubt that our Allies will fully appreciate the superhuman efforts of our race made towards our union, and I wish you all to be persuaded that I will devote all my efforts to achieve this ideal."

The following cablegram has been received by the United States Government from the American Acting Consul-General in Cairo:—"Long awaited opportunity relief Southern Palestine has arrived. Syria and Palestine Relief Fund supported by Syrian Fund is uptaking military authorities urgent request assistance. From destroyed, deserted Gaza to Jaffa sick, wounded civilians reach our first camp hospital. Three more medical units immediately required. Authorities estimate total monthly expenditure medical camps twelve thousand dollars. Seed, grain, and transport facilities also needed. Conspicuous success Fords in desert prompts request for twelve lorries and six motor ploughs. Can you help?"

A Cyprus correspondent writes:—Mr. Grimshaw has been appointed President of the District Court of Papho. As a temporary arrangement, during existing vacancies, he will divide his time between Papho and Limassol.

Mr. Alan Stuart, who has been for many years President of the Limassol Court, has been transferred to Larnaca, and will similarly divide his time between Larnaca and Limassol.

Mr. Russch, King's Advocate, is on the sick list, suffering from typhoid fever. Mr. Stuart is acting for him, and is at present at Nicosia.

Mr. Bowring, Receiver-General, is laid up, and it is feared is suffering from typhoid.

The capture of Baghdad sent a thrill through political and military centres; the capture of Jerusalem has stirred the religious imagination of the world—Christian, Jew, and Moslem; but relief must follow swiftly, or the Syrian will only be released to die. The Syria and Palestine Relief Fund hear from their general director in Cairo, Colonel Phillott, that the need of the hour is provision for the sick. Southern Palestine has been stripped of every medical necessity, and lacks the rudiments of hospital equipment, to say nothing of doctors, nurses, and drugs. And sickness is increased by lack of clothing in the wet cold of winter in the Syrian highlands. "Only the lucky ones," says Dr. Lloyd, at the refugee camp at Khan Yunis, "have more than one blanket"—a native make, half cotton. Dr. Glazebrook, U.S.A., Consul-General at Jerusalem, says, "The economic conditions are appalling." The terrible death-roll in the Lebanon is confirmed on every side. The chairman of the Administrative Committee in Cairo—Bishop MacInnes—has sent repeated urgent calls for help.

Digitized by Google

Major-General Sir H. A. Lawrence, K.C.B., was mentioned again in Sir Douglas Haig's last despatch. So also was Second Lieutenant (Hon. Captain) Viscount Duncannon. In civil life General Lawrence is a director of the Imperial Ottoman Bank, while Viscount Duncannon is the eldest son of the Earl of Bessborough, who is chairman of that bank, and also of the Bank of Roumania.

Captain Edward Allen Roe, Queen's West Surrey Regiment, who has been for the last two years in Egypt or Palestine, has been awarded the Military Cross. In congratulating him on this well-deserved award, his Brigadier-General stated that Captain Roe had always done splendid work in all operations in that theatre.

The Duke of Connaught, Grand Prior of the Order of the Hospital of St. John of Jerusalem in England, with the members and associates of the Order, will attend a solemn service of thanksgiving, for the deliverance of Jerusalem from the hands of the Turk at the Grand Priory Church, St. John's Square, Clerkenwell, on January 11, at noon.

It is reported from Athens that a Civil Tribunal of first instance, held at Athens on December 20, decreed the preliminary sequestration of the real estate of M. Skouloudis and M. Lambros to the value of £200,000 and £160,000 respectively. These sums apparently are considered to represent the minimum fine to which their Ministerial acts have rendered them liable.

Subscriptions to the British Farmers' Red Cross Fund have now reached the splendid total of £750,000, apart from the proceeds of sales amounting to between £30,000 and £40,000. The Fund, as is well known, has been the means of contributing materially to the comfort and well-being of the sick and wounded in every theatre of the war, and has done notably good work in Mesopotamia.

APPOINTMENTS, PROMOTIONS, ETC.

El Bimbashi (temporary Kaimakam) C. W. Ritson has been promoted to the rank of Kaimakam.

The King of Serbia has conferred the Order of the White Eagle (5th Class) on the following officers:—Lieut. Joseph H. Franklin, R.N.V.R.; Lieut. Arthur K. Griffith, R.N.V.R.; Lieut. Arthur E. Hewitt, R.N.V.R.; Lieut. Thomas L. Fellowes, R.N.V.R.; Lieut. Ernest Proe, R.N.V.R.

OBITUARY.

Lieutenant-Colonel Charles Lennox Tredcroft, J.P., who died at Merrow, Guildford, on December 20, in his 86th year, served in the Royal Horse Artillery in the Crimea, receiving the medal and clasp, and the Turkish medal and Order of Medjidie.

Mr. Edward Stanhope Pearson, late of the Bengal Civil Service, has died at Ealing, at the age of ninety-three years. He was the youngest son of the late Dr. Hugh Nicolas Pearson, Dean of Salisbury, and entered the Bengal Civil Service in 1842, retiring in 1872.

Colonel H. C. Marsh, late of the 18th Bengal Lancers, has died suddenly at Clarence Hill, Tunbridge Wells, aged eighty years. He served in the Afghan War of 1879-80, and with the Egyptian Expedition of 1882, for which he obtained the medal, the bronze star, and the 4th Class of the Osmanieh, and he retired with the rank of colonel in 1886.

Colonel James Langford Pearse, formerly of the King's Shropshire Light Infantry, and of Staines, died on December 21 at the age of fifty-eight. He saw service with the Egyptian Expedition of 1882, taking part in the defence of Alexandria, the occupation of Kafr Dowar, and the surrender of Damietta, and he also took part in the Sudan Expedition of 1885.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

NIXON.—On November 4, at Tavoy, Burma, the wife of Arthur B. Nixon, Indian Forestry Service—a daughter.

PUCKLE.—On December 16, at Peshawar, India, the wife of F. Hale Puckle, I.C.S. (Tempy. Capt., Mohmand Militia), of a daughter.

DEATHS.

FRASER.—On December 19, 1917, at The Vale, Weybridge, Elmira Jane, widow of John Fraser, Secretary of the Supreme Consular Court of Shanghai, and daughter of the late John J. A. Werry, Smyrna, aged eighty-seven.

LANE.—On December 17, at Aden, Guy Wilkinson Lane, Madras Police, third surviving son of the late Rev. E. Aldous Lane and of Mrs. Lane, Northcote, Lansdown, Bath.

MILTON.—On December 15, Charlotte Jeannette, daughter of the late Charles Munro, Esqre., Campbelltown, Argyllshire, and wife of Dr. Herbert Milton, Cairo.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO,
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

THE ONLY ENGLISH HOTELS IN ALEXANDRIA.
Proprietor: AUGUSTUS VAN MILLINGEN.

WINDSOR HOTEL
(Facing the Sea, opposite Y.M.C.A.), ALEXANDRIA.
Full Pension, P.T.50; Room, P.T.20;
Lunch, P.T.15; Dinner, P.T.20.
For long stay, apply to the Manager.

SUMMER PALACE HOTEL,
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.
Bathing Cabins.
Terms from: Pension, P.T.60; Lunch, P.T.20; Dinner, P.T.25.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
FOR SUMMER SEASON—
PLATRES—Platres Hotel. 4,000 feet above sea level. Open from May till October.
TROODOS—Olympus Hotel. 6,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troödos.
For Tickets and further Particulars, apply to
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troödos, Nikosia, Famagusta, Larnaca and Platres
Head Offices and Central Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

FRIDAY, DECEMBER 28, 1917.

TURKEY AND THE MOSLEM WORLD.

In recent issues of THE NEAR EAST have appeared extracts from an informative article in a contemporary on the so-called Pan-Turanian movement. This week we publish from our Tabriz correspondent a reference to the propaganda work now in progress in this connection in Persia, and his statement shows that there is substantial ground for believing that Great Britain is confronted with a definite and organised endeavour on the part of Turkey's rulers and of those who now stand behind them which calls for more than passing attention. Briefly stated, the aim is the aggrandisement of the Ottoman Empire for purposes of military aggression on the approved Prussian pattern. At a moment when there is a general tendency to accept as an axiom the break-up of Turkey as a result of the present war, the danger accruing from the aspirations of the Committee of Union and Progress may seem remote. But this view takes for granted the absence of any political manœuvres on the part of the Turkish Government to recover lost ground when it finally realises the seriousness of the position, as well as the absence of any conflicting interests among the Allied Governments when the future of the Ottoman Empire comes to be settled, and it ignores the new situation that may be brought about in Asia by the disintegration of Russia. It would be a grave mistake to minimise the potentialities of the Pan-Turkish movement. Its scope extends, in the first instance, to some twenty-seven million people, of whom only eight million are in the present Ottoman Empire, while twice that number are to be found within the Russian Empire. But beyond Pan-Turanianism, or, rather, side by side with it, lies Pan-Islamism. They are in essence rival political programmes for increasing the power of the Ottoman Empire abroad. In feeling their way to their goal the Committee began by accepting the assistance of doctrinaire Pan-Turanianism. The course of events has opened a wider vista than that of merely Turkifying the peoples of the Ottoman Empire, with the result that Irredentism may become substituted for Imperialism. Moreover, in its purely academic aspect Pan-Turanianism has had the immediate effect of alienating non-Turkish Islam; but it is not outside the bounds of probability that the Committee may yet make a bid to retrieve this initial mistake by offering concessions to outraged Arab opinion.

With the British conquest of Mesopotamia, the advance in Palestine, and the secession of the Arabs, the Imperialist cause in Turkey seemed to have fallen upon evil days. It was at this stage that developments in Russia introduced entirely new prospects for the movement. Included in the sixteen millions of Turkish-speaking peoples within the Russian Empire are the Tatars of Kazan and of the Caucasus, and some twelve million Turks of Central Asia, who inhabit the country between the Volga and the Caspian Sea on the west, and Chinese Turkestan on the east, where they are linked up with the Chinese Mohammedans. Intellectually the Kazan Tatars are the most important of the three groups, but the greater industrial future that may be expected to be in store for the Caucasus in view of the Baku oilfields makes it possible that the Southern Tatars, with the added advantage of their geographical position, will ultimately become the political centre for the Turkish-speaking populations of Russia, if not of the rest of the world as well. The success or failure of Pan-Turanianism as an Ottoman-Turk Irredentist movement, it is pointed out, largely depends on the attitude which the Kazan Tatars adopt towards it, and this in turn depends upon the political evolution of Russia. Geography and material interests bind these Tatars to the latter country; but in the present situation they cannot throw in their lot either with the anti-nationality policy for which the Cadets are coming to stand, or with the extreme separatism of the Finns and Ukrainians, which would leave them isolated by independent and probably chauvinistic States, from the Tatars of the Crimea and the Caucasus. Self-interest prompts them to favour national autonomy within a federal Russian republic; any reactionary movement is liable to compel them to turn to the Ottoman Empire for support and thus to give Turkish Irredentism a powerful stimulus. In the same way, chaos or repression in Russia will cause the Tatars of the Caucasus to turn to their Ottoman neighbours; but with this difference that their proximity to Anatolia would prevent them from maintaining an independent existence under Turkish jurisdiction, and the economic and cultural development of Baku would be arrested. Again, so long as the Russian Empire remained intact there was little hope of Turkish nationalism making headway in Central Asia; but separatist tendencies, never wholly eliminated, have gained a sudden accession of strength from Russia's domestic troubles. The whole population is Turkish, and of the Sunni sect of Islam. If Russia releases her hold of this region, German-Ottoman diplomacy can be relied upon to embody it in a Turkish-Islamic State. The prospects in this direction would amply atone for losses in Southern Mesopotamia and Syria. A Berlin-Bokhara project would take the place of the frustrated Berlin-Baghdad scheme, and there would be an additional incentive for Constantinople to make its peace with non-Turkish Islam, and to win back the allegiance of the Arabs.

It requires little imagination to understand that a State, of the proportions outlined, under the ægis of the Committee of Union and Progress, backed by Germany, would prove a standing menace to the peace of the world and to British interests in particular. What steps, if any, can be taken to guard against such a danger? Clearly militarism has to be as completely exorcised from Turkey as it is proposed to exorcise it from Germany. In the peace terms granted to the Turkish Government there must be no short-sighted policy which will hold out to the Turks the hope of still remaining a great Islamic Power capable of playing an independent part in international politics. In Anatolia there will be all the opportunity and scope required for a genuine Turkish national revival; but it must be freed from dreams of world-dominion. To this revival Great Britain, France, and Russia can lend their cordial support, and the Turkish-speaking peoples of Russia, it is suggested, might play the same part as that which Russia herself has played towards the Balkan Slavs. The crux of the problem lies in the political future of that great expanse of territory which under the disintegrating influences of revolution threatens to pass through anarchy to permanent disruption. If the danger is clearly foreseen, it will be possible to guard against it in some measure. The first step is to appreciate the facts of the situation, and not to fall into the error of the pacifist or the war-wearied in imagining, as Lord Lansdowne urged the country to do, that if the war-aims of the Allies are secured in Western Europe the rest of the world can well be left to look after itself. There is no danger of Great Britain's weakening in her support of Belgium, France, or the other countries to whom her word is pledged: there ought to be no danger of her weakening where her own interests are at stake. But ignorance constitutes a serious pitfall; and if the potentialities of the Pan-Turanian movement are not adequately realised, Germany's ambition of undermining the British Empire in the East may yet be achieved by devious ways.

INDIAN IDEALS AND EGYPTIAN EXPERIENCE.

BY JANUS.

Coles Pasha's wise and thoughtful articles on the reform of the Indian constitution will, I think, be cordially welcomed by everyone who is seeking for fresh light on the complex problems with which they deal. In one way and another the Egyptian administration owes a good deal to India, and now that India is in rather a tight place, though by no means threatened with constitutional bankruptcy, such repayments on account have a sentimental as well as a practical value, and should help to promote the harmony so desirable among the junior members of the Imperial family. The immediate aim of India's statesmen is, as Coles Pasha indicates, a move in the direction of what is called provincial autonomy, that is to say, to put the people of each province in the way of managing their own affairs. That again means responsible government, and a change in this direction is, I think, inevitable. I question whether opposition on the part of Anglo-Indians is likely to be so great as the articles suggest. There are, no doubt in India as elsewhere, old and crusted opponents of any change; but opinion has moved rapidly during the last few years, and I believe that, in official circles at least, a long step forward will be welcomed, always provided that when it has been taken the foot shall rest on solid ground, and neither remain suspended in mid air nor plunge into one of the many quagmires that lie so near the true path.

Egyptian experience is of particular value in connection with the apprehension, more frequently felt than expressed, that Indian Ministers and English officers will not work as a team. Egypt has shown, as Coles Pasha points out, an admirable example of team-work of this kind, and though both sides in India are at times liable to suffer from what the Babu described as "race-prejudice and colour-blindness," the danger can be avoided by self-control and tact, and still more by good will. Team-work of this kind has often succeeded in Native States in India, and perhaps I may be permitted to cap Coles Pasha's experience with my own. A few years ago I was one of a small band of English officers working under the orders of a Council of Indian Ministers. We were, I should say, a fairly average lot: there was a rather donnish educationist, a rabid sanitarian, a policeman burning with the honourable zeal of his calling, and, of course, a Sapper: all of us had been trained in British India, and I think all of us occasionally felt the position a little awkward, but on the whole we got on tolerably well, and, grumble as we might about the Ministers above us, we still claimed to be making better progress than the British provinces which lay around. This case is, of course, quite common in India, and for myself I have no doubt that, while individuals might prove "impossible," the Services as a whole would accommodate themselves to a system of responsible government, though they would claim the Englishman's privilege to grumble at the change.

The real difficulty in the way of introducing responsible government lies in the bilateral significance of the former word. If Ministers are responsible to the Councils, the members of the Council must in turn be made responsible to the people of the country, ultimately if not immediately to that silent and secretive person whom Coles Pasha aptly describes as the man in the mud hut. It is on this side that the administration in India has fallen so seriously behind. It is true that local government has advanced, but as yet it has scarcely reached the hut: the franchise for even local bodies is ridiculously narrow, and at the present time there is not even the nucleus of a body of voters which could keep the provincial Councils in check. Had village Councils been established on a reasonable scale even as late as ten years ago, such a nucleus would have been in existence by now, and the authors of past reforms bear a very heavy responsibility for neglecting this side of the question; but there is no use crying over spilt milk, and we have to make the best of the position as it stands. As I have said above, it is rather a tight place: the politicians on the Councils have secured power without responsibility: they demand much more power, and the demand must be met: but they have not the slightest desire to surrender their "unchartered freedom," and it is quite out of the question to ask them to wait till a body of experienced voters has been brought into existence. To put the matter metaphorically, the provincial boats are badly trimmed, but wind and tide forbid a halt, and the voyage must go on with such precautions as are possible, and with a certain temporary risk that some of them may capsize. Everyone must sympathise with Lord Chelmsford, who has to navigate the fleet, but bears no responsibility for its unseaworthy condition, and everyone must hope that the presence on board of Mr. Montagu, representing the owners, will conduce to a successful outcome.

The interpretation of this parable is that responsible government, with some judicious limitations, must be conferred on the provinces almost at once, and before the constituencices have learned how to form an opinion, or how to express it when formed. There are signs that the administration is at last tackling this question of constituencies in earnest, and for myself I believe that the peasants, who must have the final word, if the promise of self-government is not a fraud, will learn the rules of the game and begin to take an interest in it more quickly than many people suppose; but it would be idle to deny that the period while they are learning will be somewhat anxious, and that in one province or another there will be a real risk that Ministers may remain out of touch with the people, and attempt to introduce some measure which the people will not stand. To my mind, this is a strong argument for postponing any large alterations in the Government of India until responsible government has established itself firmly in the provinces. The people of India have deduced from their history the conclusion that all governments are essentially unstable; any sudden change will be interpreted as foreshadowing the collapse of their latest rulers, and many a man will hope for an early return of the good old days—

"When I rode a Dekhani charger, with the saddle-cloth gold-laced,
And a Persian sword, and a twelve-foot spear, and a pistol at my waist,"

and when

"From the Dekhan to the Himalay, five hundred of one clan,
They asked no leave of prince or chief as they swept thro' Hindustan."

There are still many dreamers in India, and it will be best that during the times of change they should continue to see the Viceroy and the Commander-in-Chief—their "Country-Lord" and "War-Lord"—representing the King-Emperor with undiminished authority and prestige. It is true that the existing system of military administration is altogether unsatisfactory, and, speaking for myself, I agree with Coles Pasha that a Minister of War is wanted on the Viceroy's Council; but the time is not suitable for such a change, and it would be better to carry on with the system as it stands than to do anything just now which might be interpreted by the masses as weakening the stability of one of the two pillars of the British Raj. Keep the Supreme Government as it is for the present, delegating indeed to the provincial administrations such powers as they require, and refraining from bureaucratic interference with their conduct of affairs, but standing by with the full power of the Empire at its back, until the changes in the provinces have been effected, and the new rulers have learned to know their masters, the men in the mud houses, the patient, silent millions who must be the first and final object of the Empire's regard. Let us get the foundations right first.

CORRESPONDENCE.

THE FUTURE OF DALMATIA.

TO THE EDITOR OF "THE NEAR EAST."

SIR,—As a Jugoslav, I have read with great interest the letters on "Italy and the Balkans," by F. Bonavia, and the able replies by Dr. Micic, that appeared in your columns in July and August last, and I hope that you will permit me to offer a few comments upon them.

I may say at once that, in my opinion, Mr. Bonavia has entirely failed to make out a case for Italy's supposed claim to Dalmatia on either historical, racial, or national grounds. More than this, I maintain that any attempt on the part of Italy or the Entente Powers to enforce such a claim would lead inevitably to the most disastrous consequences, and would absolutely prevent any peaceful or permanent settlement of the Jugoslav question or any satisfactory solution of the Balkan problem, with all its endless possibilities of discord and bloodshed for the future.

Mr. Bonavia argues, in the first place, that the Dalmatian coast at one time belonged to Italy, and that Italy may, therefore, justly claim it now. The answer is that the people inhabiting this country are now Slav to the extent of a little less than 97 per cent. of the population, that they are bound by the strongest racial and national ties to all the other Jugoslavs, and that they demand the right to govern themselves—that right of autonomy so dear to all small and enslaved nationalities, for which the Entente Powers are fighting to-day.

Mr. Bonavia tells us that Austria wrested Dalmatia from Italy and that it now ought to be restored. The answer is that neither Austria nor Italy ever had or could have the right to deprive the Jugoslavs of Dalmatia of their liberty and to coerce them into dependence upon a foreign ruler.

Mr. Bonavia cannot deny that the population of Dalmatia is overwhelmingly Slavonic. Dr. Seton-Watson has pointed out that in 1833 there were 16,000 Italians in Dalmatia and 360,000 Serbo-Croats; while in 1868 Tommaseo, the great Italian patriot, gave the numbers as 20,000 Italians and 400,000 Serbo-Croats. To-day barely 4 per cent. of the people at the outside are Italian by descent; and in reply to Mr. Bonavia's suggestion that the Italian element is so small because the Austrian rulers of Dalmatia have deliberately crushed or extirpated the Italians, I may quote from the well-known Slav historian, Tucic, the statement that "for opportunist reasons Austria has always favoured the Italian element" in Istria and Dalmatia; and, further, that if to-day Italy is apparently able to substantiate a claim to special interests in this part of the world, "this is the outcome of a chance state of affairs arbitrarily created by the Austrian Government." I may point out, also, in further disproof of Mr. Bonavia's statement that Austria has favoured the Slavs at the expense of the Italians in Dalmatia, this interesting fact—that, though the Austrian Government suspended all the Slav municipalities as soon as war broke out, the single Italian municipality of Zadar was alone unmolested and undisturbed.

I need hardly say that, if I could command enough of your space I could provide a large amount of evidence to support my contention that Dalmatia is wholly Slav in the only important senses—historically, racially, and in the political sympathies and aspirations of its people. But as Slavonic evidence may be regarded as prejudiced, I will refer to other authorities. Dr. Seton-Watson, in his "Balkans, Italy, and the Adriatic," tells us that "nothing could be more inaccurate and misleading" than to represent Dalmatia as ever having been an Italian province, for "Dalmatia is Slav, and has been so for a thousand years." As a logical consequence, this distinguished authority maintains (*e.g.*, in his contribution to "War and Democracy") that an Italian occupation of Dalmatia after the war is incredible and impossible. "Not only would it bring Italy inevitably into collision with the Southern Slavs: it would lead her on into the false and hopeless path of attempting to assimilate a hostile population by the aid of an insignificant minority which only exists in half a dozen towns, and in all the rest of the province is simply non-existent. The price paid would be the eternal enmity of all Slavs." Further, Dr. Seton-Watson argues that to separate Dalmatia from the rest of the Jugoslav States would "prevent even the beginning of a solution of the Southern Slav question." And the reason is that Dalmatia is in an ethnical, constitutional, and political sense an integral portion of Jugoslavia, and he concludes that "it is unthinkable that Serbo-Croat opinion would ever consent to the liberation of the one without the other." In almost the same words Sir Arthur Evans, addressing the Roya Geographical Society in January, 1916, told his hearers that Dalmatia is "as much an integral part of unredeemed Serbia as ever Lombardy and Venice were once parts of 'unredeemed' Italy." More evidence of the same sort can be drawn from numerous British authorities. Thus Mr. Arnold Toynbee, in his elaborate work on "Nationality and the War," simply declines to consider Italy's claim to the eastern coast of the Adriatic. "We have passed over her aspirations in Dalmatia without a word, because here the Venetian *régime* is a memory, and has resulted in no living racial fact. . . . Italy has as little justification for coming here as she has for ruling in Corfu or Zante." Similarly, Mr. Evans Lewin, in his recently published book, "The German Road to the East," observes, in regard to international rivalries in the Balkans, "Upon the question of Dalmatia it is not necessary to enter at any length . . . because Italians have practically no racial claims to the possession of Dalmatia. Whilst Italians inhabit the coastal towns they are an insignificant minority in the country at large. In Dalmatia, which is Slav, and has been so for a thousand years, Italy has no ethnographic claims whatever." Again, in "The Great Settlement," by Mr. Ernest Fayle, an important work on the readjustment of international affairs after the war, I find the following reference to this question: "Whatever claim Italy may base on historical associations, the overwhelming majority of the inhabitants of Dalmatia are Serbo-Croat, and not only national but geographical and economic considerations suggest that the natural fate of the province is union with an enlarged Serbia. Italy will be fully entitled to demand guarantees for the good treatment of the Italian inhabitants and for the protection of her commercial interests, but beyond this it is very much to be hoped that she will not go."

Unfortunately there are some Italians who would like to go a great deal further, and Mr. Bonavia is apparently one of them. But, to do the Italian nation justice, the views that he represents stand only for the restless ambitions of a small though noisy section of politicians and journalists who hold the same position in Italy as "Chauvinistes" in France and "Jingoes" in England. It is well to remember that the wild and reckless, not to say unscrupulous, projects of aggression and annexation which such men advocate get no countenance from the best type of Italian statesmen. Italians, at least, should never forget that Mazzini, the founder of Italian liberty and unity, frequently declared that Italy's eastern boundary stopped short at Istria, and that the eastern coast of the Adriatic was a region in which Slav elements predominated, and which must, therefore, be left to the Slavs. He described the ports of Dalmatia as necessary to the Southern Slavs, and he includes Dalmatia in "the Illyrian Serb State" which, he predicted, would one day arise on the Adriatic's eastern shore. Another great Italian patriot, Tommaseo, himself a Dalmatian by birth, declared that Dalmatia "had preserved the Slav character better than Italy its Italian." He denied that Dalmatia could ever be dependent on Italy, and in his most famous poem, his ode to Dalmatia, he prophesies the rebirth of his native land as part of the new Serbia, the Southern Slav State yet to be. And in the spirit of Mazzini and Tommaseo many of the most eminent of living Italians—Sonnino, Bisolate, Boselli, among others—have energetically disclaimed any intention of encroaching upon the national frontiers of the Jugoslavs. A year ago Signor Bisolate, then Minister of State, interviewed in Paris on this subject, said definitely, "The Italian race has suffered too much from oppression herself to oppress others. We shall not allow an 'irredentism' to arise against us." And he went on to assert that it would be Italy's mission to aid the Jugoslavs in assisting their national independence and vindicating their claim to freedom. Such influential newspapers as the *Secolo* and the *Corriere della Sera*, from which you yourself have quoted, have from time to time expressed approval of this just and sane policy, and I repeat that the only opposition to it arises from a small knot of fanatical enthusiasts who, in their eagerness to force their own nation's claims to the front, are for the moment wholly forgetful of the rights and interests of others.

What I have said so far seems to me to justify entirely my belief that Italy has no fair and reasonable excuse for demanding leave from the Entente Powers to intrude into Dalmatia. But even more important than this historical and political evidence should be in the eyes of the Powers the feelings of the Dalmatian people; there I can safely say that we are on firm ground, for I say, without fear of contradiction, from one who knows the country and the people as I know them, that the Dalmatians are Slavs heart and soul, that they have devoted themselves to the advancement of the Jugoslav cause, and that with it they will stand or fall. No section of the Croatian or Serbian people has displayed more energy and enthusiasm in the national cause than the Dalmatians; none have sacrificed themselves for it more willingly; none have rejoiced more proudly and enthusiastically in the glorious deeds by which Serbia has gained the right to claim for the whole great nation that she represents that liberty, independence, and power of self-government which the Allies have declared themselves ready to confer on all the subject nationalities of Europe. For the Dalmatians, like all the other Croats and Serbs, have taken these things very seriously. Dr. Seton-Watson has told his English hearers how, "at an age when our youth think of nothing but cricket and football, the students, and even the schoolboys, of Croatia, Dalmatia, and Bosnia became engrossed in political speculation, brooded over the wrongs of their disunited race, and dreamt of Serbia as the new Piedmont of the Balkans." And so, when Serbia won her triumphs in the Balkan wars, the Dalmatians "saw the dawn of day in the rising of the Balkan sun," and the hope then kindled, the certainty that sooner or later freedom would crown their efforts, has aroused in the hearts of all the Jugoslavs an enthusiasm and an inspiration that will not and cannot die. And because of these things it seems to me vitally important that the whole civilised world, and more especially the people of England, who have always been the champions of liberty and nationalism,

should recognise the terrible dangers involved in dealing with the Jugoslav question and with Dalmatia on any but nationalist lines. Dr. Seton-Watson, discussing Italy's ambitions, has said that "any attempt to lay hands on Dalmatia would be resisted to the death," and that is literally true. The Jugoslavs have waited and hoped and struggled for freedom for centuries; the Serbs, Croats, Slovenes, Bosnians, and Dalmatians have sacrificed themselves in countless thousands in the hope of breaking the tyrant's yoke; and the race which has overthrown the Turk and defied the Austrian will not, now that the hour of emancipation seems to have struck at last, tamely submit while its kinsfolk are handed over by the Powers for another foreign despotism to enslave. It is certain that the Austrians are better masters than the Turks, and it is probable that the Italians would be better masters than the Austrians; but that is beside the point. Good government, as the great American statesman said, is no substitute for self-government; and the Jugoslavs claim the right to rule themselves. It may be that all these fears and apprehensions are needless and groundless; it may be that the Allies have already induced the Italian extremists to take a more reasonable and equitable view of the situation, and that the agreement said to have been concluded at Paris three months ago provides for the establishment of the Jugoslav State of our dreams, including Dalmatia in the Serbo-Croatian-Slovene kingdom, which will assuredly rise from the ashes of the war. I can only trust that it may be so: but if it is otherwise, then nothing can be more certain than this—that a settlement which transfers Dalmatia or any part of it to Italy will settle nothing, and that a treaty concluded by the Powers on those lines will bring "not peace, but a sword." I am only a humble unit of the great Jugoslav family, and I send my voice in a faint whisper from far New Zealand, thousands of miles across the sea; but I know my country and my people, and when I, a Dalmatian of Brac (Brazza) say that the Serbs and Croats will fight to the death rather than accept servitude under another foreign tyranny in place of the promised freedom that their gallant deeds have won, I know that I do not speak for myself alone. May Britain and the Entente Powers be wise in time, for nothing but the emancipation of the whole Jugoslav race and its restoration to liberty and independence will ensure the future peace of Europe and the world.—I am, etc.,

"TURKISH" CIGARETTES.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The public have a wrong conception about what are called "Turkish cigarettes." Only a very small proportion of Turkish tobacco leaf is put into these cigarettes to blend the tobacco, which principally comes from Smyrna and other parts of Asia Minor, etc. The bulk of the tobacco which makes the Turkish cigarette so famous is really now "Grecian" tobacco, and not Turkish in any way. It is grown in Macedonia, as well as in many other parts of New Greece and Old Greece, the proportion used in manufacture being, say, 75 per cent. Macedonian, etc., and only about 25 per cent from Turkey. The latter amount can be done without, as most of the New Grecian Islands (Grecian Archipelago), now grow the same tobacco, if not better, as the Turks did in Turkey. I mean, of course, that these were something like the proportions before the war. Naturally now manufacturers are reluctantly obliged to use all sorts of substitutes, such as tobacco from China, Japan, etc., etc., seeing that very little tobacco leaf is imported from Greece through the war, and none whatever from Turkey. However, the main point of my letter is to call the attention of the public to the absurdity and foolishness of continually asking for Turkish cigarettes.

I do not think it is a compliment in any way to civilisation or to all the patriotic British, as well as Allied people to make any further use of the word "Turkish" under the present state of affairs and after all the horrors that the Turks have perpetrated on the poor unfortunate Armenians and Jews, as well as on the Greeks (the earliest of Christians, who number millions) living under the tyrannical Turkish yoke, I for one, as well as a good many others, would like to see these cigarettes sold under another name altogether.

They might be called by their real name—viz., "Grecian" or "Macedonian" cigarettes, but this thing does not depend entirely on the public. It depends principally on the manufacturers, who largely advertise the same, and also on the importers and brokers, that in future what were called "Turkish" cigarettes should be sold and advertised as "Grecian cigarettes," and the shopkeeper can explain to any purchaser the alteration in the name.

It certainly would be very unpatriotic indeed for us to keep up the word "Turkish," and by doing this we will not be doing justice to Grecian products or to Greece as an Ally of ours in the war. I do hope, therefore, that manufacturers, tobacconists, and the patriotic public will agree to the abolition, and to look upon anything Turkish with as much indignation and horror as they should look upon anything German, Austrian, or Bulgarian.—I am, etc.

NICHOLAS PAPANICOLY.

Primrose Club, St. James's, December 21, 1917.

THE PRESS ON THE NEAR EAST

The Pan-Turanian Movement.

Continuing his analysis of the Pan-Turanian movement, the writer of the article in *The Round Table*, from which extracts have been given in our two previous issues, deals with the activities of the committee of Union and Progress in the Middle East:—

Such, in outline, is the double-edged policy adopted by the present rulers of Turkey for the consolidation of the Turkish State and the extension of its dominion or its influence beyond its existing bounds. It may now be considered how this policy is operating in Central Asia.

The Eastern frontier of the Turkish Empire is separated from the Indian frontier of the British Empire by the two independent States of Persia and Afghanistan. The inhabitants of both are almost wholly Mohammedan, and in the northern districts of both there is a considerable Turkish-speaking population. The migrations from the Asiatic midlands between the eleventh and thirteenth centuries A.D., which carried Turkish-speaking tribes to Anatolia, the Caucasus and Eastern Europe, deposited them also in the provinces of Persia north of the Central Desert, especially in the most north-westerly province, Azerbaijan. Similarly, the provinces of Afghanistan between the Hindu-Kush and the Oxus are occupied by a predominantly Turkish population. They were once independent Turkish (Uzbeg) Khanates, like Khiva and Bokhara, and they were only annexed by Afghanistan during the years 1850-9.

These Turkish-speaking peoples provide an obvious opening for the propaganda of the Pan-Turanian school, and in Persia, at any rate, its exponents have been quick to seize it. But there are serious obstacles in their path. The Turkish speakers of Persia have at present no consciousness of Turkish nationality. They are separated from their neighbours in Turkey by sectarian differences; they are Shias, like the Persians, not Sunnis, like the Anatolian Turks. Moreover, as Tekin Alp himself admits, they still write letters in Persian and read Persian newspapers. But the chief obstacle to the spread of a Pan-Turkish Nationalist movement is the existence of a Persian Nationalist movement, of which, as it happens, Tabriz, the capital of Azerbaijan, has been the centre. Yet the Pan-Turanian doctrinaires are not discouraged by these difficulties. Tekin Alp proposes to give the Azerbaijanis a "Turkish soul"; and he tries to prove that this happy consummation would increase the internal strength of Persia. As a matter of fact, it would divide and weaken it. The forces of Persian Nationalism would be split asunder, and the Persians proper would be driven into hostility towards the Ottoman Empire.

The Committee of Union and Progress show no signs of committing such a blunder. Neither in Persia nor in Afghanistan, where the school of Tekin Alp might aspire to rouse the Uzbegs also to a sense of Turkish nationality, are they likely to press the Pan-Turanian aspect of their policy. Here, as in North Africa, their political instrument is rather Pan-Islamism. They pose as the liberators of Mohammedan States caught in the toils of British or Russian "imperialism," as the standard-bearers of the "Holy War" proclaimed in the name of the Khalif by the Sheikh-ul-Islam in October, 1914. They have suggested a Triple Alliance of Turkey, Persia and Afghanistan based on the principle of political independence for Islamic States. In the districts of Western Persia which they invaded they succeeded in persuading the Persian Nationalists to give them armed support; and they sent a mission to the Amir of Afghanistan which seriously embarrassed him in his neutrality. If this Pan-Islamic propaganda has so far borne little fruit, if the "Holy War" has proved a fiasco, it is mainly because Turkey has on the whole suffered military defeat. For the mainspring of Pan-Islamism, the presupposition of Turkey's championship of other Mohammedan peoples, is the prestige of the Ottoman armies. If those armies had marched victoriously into Tiflis, Cairo and Teheran, or if the Allies had never threatened Constantinople and captured Baghdad, Pan-Islamism might have produced far-reaching military and political results. And, even now, it is by no means bankrupt.

It was because it offered the wider possibilities of Ottoman aggrandisement that the Committee of Union and Progress have thus adopted the Pan-Islamic policy in Persia. But, if it finally fails, if it becomes clear that they cannot overthrow the Anglo-Russian *régime* and replace it by an Ottoman hegemony, they can fall back upon Pan-Turanianism and play for the smaller prize. They can try to detach from Persia her Turkish-speaking peoples and especially the Azerbaijanis, just across their eastern frontier. The Osmanlis have always coveted Azerbaijan; they occupied it more than once during the sixteenth and seventeenth centuries; in the winter of 1914-15 they overran it for a few weeks as an incident in their Caucasian offensive; and their designs upon the province might conceivably be assisted by domestic developments in Persia. If the Persian Nationalists came into power, they might adopt a chauvinistic policy, as Nationalists have all too often done in multi-national States. In that case the Azerbaijanis might be roused at last to the consciousness of being Turks, and might desire to cut themselves loose politically from Persia. But they might not turn in the first instance to the Ottoman Empire. While Azerbaijan borders on Turkey to the west, it borders on Russia to the north; and across the Russian frontier dwell the Tatars of the Caucasus, who belonged to Persia, like the Azerbaijanis, before the Russian annexation, and are closer to them in every way than to the Armenians and the Kurds across the Turkish frontier. It may be said, in fact, that the political destiny of the Azerbaijanis and the Caucasian Tatars will ultimately be the same.

Digitized by Google

They are bound in the end to gravitate in the same direction; and whether it will be westwards or northwards depends on the fate of Russia.

The article then reverts to the influence of the Russian revolution and the events that have followed it on the aspirations of the leaders of the Pan-Turkish movement. Within the Russian State there is a far greater Mohammedan population and a far greater Turkish-speaking population than in the Ottoman State. The writer continues:—

The number of Mohammedans in Russia may be estimated at something under twenty millions; and of these over sixteen millions speak Turkish, whereas the Turkish-speaking population of the Ottoman Empire is not more than eight millions. A vast field is thus opened in Russia for Pan-Turanian or Pan-Islamic exploitation.

The Mohammedans of Russia are distributed in large but not contiguous groups between the central plain of European Russia and the fringes of the mountain frontier of Northern India. The first of these groups, in geographical order, is that of the Tatars of Kazan, who live along the middle course of the Volga between Nizhni Novgorod (which is only some 250 miles east of Moscow) and Samara. Their centre is Kazan, where the river makes its great bend from east to south. They constitute an almost isolated enclave, surrounded by Great Russians on the west and Finnish tribes on the north and south. Beyond the Urals, in Western Siberia, there is another group of Tatars, some fifty thousand strong, around Tobolsk; and southwards, where the Volga joins the Caspian Sea, are the Tatars of Astrakhan. The Tatars of Kazan and Astrakhan together number about one million and a half. West and south, again, come the Tatars of the Crimea (under 200,000) and the Mohammedans of the Caucasus (about 2,500,000 Tatars and 1,500,000 others), cut off from each other and from the rest of the Russian Mohammedans by a broad belt of Ukrainians, Russians, Germans and Kalmucks, while nothing but the Black Sea and an artificial land-frontier divide them from the Mohammedans of Turkey and of Persia. But by far the largest Mohammedan district in Russia is that which stretches from the south-east corner of Europe for fifteen hundred miles across Central Asia. First come the Chuvashes on the fringes of the Volga plain, and the Bashkirs of the Urals; next, on the great midland steppe, the flourishing tribal confederacy of the Kirghiz, and among the Trans-Caspian oases a dwindling remnant of Turkmens; and beyond these again the Turks of Russian Turkestan and the dependent States of Khiva and Bokhara—in sum, a body of about twelve million Mohammedans, occupying an almost unbroken area between the Volga and the Caspian on the west, the line of the Trans-Siberian railway on the north, and the frontiers of Persia, Afghanistan, and the Chinese Empire on the south and east.

With the exception, then, of this Central Asiatic mass, which is itself broken up by belts of desert, the Mohammedans of Russia possess no geographical unity. They are only linked together by the great strategic lines of communication constructed by the Russian Government—the Trans-Siberian, Orenburg-Tashkend, and Trans-Caspian railways. And even the political unity which their common inclusion in the Russian Empire gives them is somewhat superficial. For the different Moslem populations have been incorporated in Russia at widely different dates—the Volga and Siberian Tatars in the sixteenth century; the Crimean Tatars not till 1783; the Moslems of the Caucasus between 1783 and 1868: the Kirghiz in the eighteenth and nineteenth centuries; the Uzbeg Khanates (Bokhara, Khiva, and Khokand) between 1868 and 1876; the Turkmens of Trans-Caspia between 1873 and 1886. And these historical differences are reflected in differences of administration. Kazan, for example, lies in the heart of modern Russia, and has long been in possession of ordinary Russian civil institutions; the Caucasus has been a vice-royalty containing some civil Governments and some military provinces, but not endowed with "zemstvos"; Trans-Caspia and Turkestan have been under military administration; Khiva and Bokhara have never been administered directly by Russia, their status being similar to that of the Native States in India.

Thus the Mohammedans of Russia are divided politically as well as geographically, and the two systems of grouping do not coincide. Yet another and a more important cross-division is created by their differences of culture.

In the first place, the Russian Mohammedans are not all of one sect. Central Asia and the Volga are more or less uniformly Sunni; but in the Caucasus there is an important Shia element in those districts which belonged to Persia before the Russian conquest, and the Caucasian Mohammedans have so far been partitioned between two rival religious primates, the Sunni Mufti and the Shia Sheikh-ul-Islam; while even among the Sunnis there has been no All-Russian ecclesiastical organisation. The Sunni community in the Caucasus, like the Shia, has been kept in isolation. The *Mohammedan Ecclesiastical Court* of Orenburg, (with its actual seat at Ufa), an official organ of the Russian Government, has exercised jurisdiction over the Mohammedans of European Russia (in the administrative sense); but the Crimea and the former territories of Lithuania were excluded, and its authority has not extended over Central Asia. In some Central Asiatic districts—for example, the Province of Siemiriechensk—the local Mohammedan ecclesiastical institutions appear to have been suppressed by Russia, while, on the other hand, the Khanates of Khiva and Bokhara have naturally retained ecclesiastical as well as political autonomy.

Secondly, there are profound social and economic diversities between different sections of the Mohammedan population. . . .

Thirdly, there is the division of language.

Over a million of the Russian Mohammedans belong to indigenous tribes of the Caucasus, speaking a variety of tongues; another million and a half, scattered through the Caucasus and the settled regions of Central Asia, speak Iranian dialects; the remainder, more than 16,000,000 in all, speak Turkish. But, while this vast Turkish-speaking element gives the Russian Mohammedans a certain predominant colour, its unifying effect is diminished by the existence of dialectical differences, which, heightening and also heightened by differences of culture and history, break them up into three main groups gravitating towards three distinct poles.

(i.) The centre for the Tatars of the Caucasus is Baku. They speak the same dialect as the Turkish-speaking population of the Persian province of Azerbaijan, and nearly the same as the Ottoman Turks of Anatolia. The Tatar Press at Baku employs the literary Ottoman language of Constantinople, which is Anatolian Turk diluted with Arabic and Persian. The dialect of the Crimean Tatars is also closely related to Osmanli and Azerbaijani, and there is considerable intercourse between the Crimea and Baku.

(ii.) The Tatars of Kazan, Astrakhan, and Tobolsk, with the Chuvashes and Bashkirs, are centred on Kazan. For the peoples of this group Turkish is, in the main, an adopted language. The Bashkirs and Chuvashes were originally Finnish-speaking tribes. The Tatars of Kazan, Astrakhan, and Tobolsk are a hybrid race, with Mongol conquerors imposed from above and Christian slaves introduced from below. The genuine Turkish element in them is small, and Kazan was Mohammedan in religion before it became Turkish in speech. The Tatar Khanate of Kazan was the direct successor of the Ugro-Finnic Kingdom of Bolghari or "White Bulgaria," and the "White Bulgarians" were converted to Islam in the tenth century, about fifty years before the Ukrainians and Russians were converted to Orthodox Christianity.

Kazan is thus an ancient Mohammedan, though a comparatively recent Turkish-speaking, centre. Its Islamic culture, which declined after its incorporation in Russia, has notably revived within the last generation. This revival is said to have begun in 1886, when two elementary school teachers were imported from Constantinople. From that time onwards schools were founded and students sent to Mohammedan universities abroad; but the great impetus came from the Russian Revolution of 1905, which struck off some of the shackles from the non-Russian languages in Russia and obtained a measure of freedom for the Press. Thus, whereas before 1905 the Volga-Ural Tatars had their Korans printed for them in Russian printing works, since 1905 a dozen large printing businesses are said to have been started by the Tatars in Kazan, Orenburg, and Ufa, where books are printed in Arabic for markets as distant as Egypt, the Hejaz, India, and the Dutch East Indies. In the same centres, it is said, between twenty and thirty weekly and daily newspapers have been established, printed for the Tatars themselves in their own Turkish dialect.

(iii.) The Turkish-speaking Mohammedans settled in the upper Syr-Darya and Amu-Darya basins are diverse in origin and blood, but they all speak the Chagatai dialect. Chagatai Turkish (or Eastern Turkish) differs widely from the Osmanli-Azerbaijani (or Western Turkish) dialects. Some of the commonest roots and suffixes are used with quite different meanings in the two groups, and each developed into a literary language on independent lines. Literary Chagatai has borrowed much less than literary Osmanli from Persian and Arabic. Famous books have been written in it—the Memoirs of Baber the Moghul in the sixteenth century, and Abu'l Ghazi's history in the seventeenth—and the literary tradition has never died out. Such Turkish newspapers as have yet been started in Tashkend and other cities of the Amu-Darya-Syr-Darya region are published in the Chagatai dialect, and it is unlikely to give way either to Osmanli or to Kazan Tatar.

The Kirghiz of the steppes and the Turkmens of the Trans-Caspian oases have yet to be dealt with, and they occupy a somewhat indeterminate position. As far as the Kirghiz tribesmen are developing any desire for culture and education, they appear to be gravitating north-westward towards the Kazan group rather than south-eastward towards the Chagatai group. The Turkmens, on the other hand, whose dialect belongs to the same "Western Turkish" group as that of the Caucasian Tatars, the Osmanlis of Anatolia and the Azerbaijanis, are drawn by their geographical position towards the Chagatai group.

The Mohammedans of the Russian Empire are thus split up by a number of cross-divisions, geographical, social, or economic, and linguistic or cultural, and none of the groupings coincide.

STRANGERS' HOME FOR ASIATICS,
WEST INDIA DOCK ROAD, LIMEHOUSE, LONDON, E.
"I was a stranger and ye took me in."
CONTRIBUTIONS ARE SOLICITED from the many who owe fortune or competence to India and China, and will be thankfully received by the SECRETARY or by MESSRS. BARCLAY & CO., LTD., 54, LOMBARD STREET, E.C.

AYAHS' HOME,
26, King Edward Road, South Hackney, London.
ESTABLISHED 1825.
IN CONNECTION WITH THE LONDON CITY MISSION.
Hindustani spoken. Ayahs boarded and lodged at 18s. per week each until their Return Passage is paid or a Situation secured for them to return. Ayahs met at any Dock or Railway Station in London. Experienced, well-recommended Ayahs taken entirely off Ladies' hands for a certain payment, which differs according to time of year. Ladies proceeding to India or China requiring an Ayah can generally obtain one by applying to Mrs. FLETCHER, Matron.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

While practically all other securities show the effect of the war in the marked discrepancy between present values and those that obtained before August, 1914, Egyptian securities, on the other hand—at any rate, most of them—show a most satisfactory balance in the other direction. This fact throws a curious light on the unexpected influences of war. I am quite sure that if anyone had been asked what would be the effect of a world conflict on Egypt's economic condition, the answer would have been that such an eventuality would have the worst possible consequences. In actual fact the reverse has been the case; the troops in Egypt have more than compensated for the loss of the tourists, and the demand for the country's produce has meant a period of remarkable prosperity for the population as a whole. It is not surprising, therefore, that investors should have been attracted to Egyptian securities to such purpose that some of the shares stand at almost double their pre-war price. Whether peace will mean the continuance of these conditions it is impossible to say at present; it would certainly be an unkind turn of the wheel of fate if a factor which would impart buoyancy to the most unpromising market had the opposite effect where Egypt is concerned.

***

Additional point is given to what I have said from time to time regarding the immense possibilities for business in Morocco after the war by some interesting notes by the Acting British Consul at Casablanca, Mr. H. W. Rabino, which will be found elsewhere in this issue. His remarks amount to this—that with the development of the country there will beyond doubt be considerable openings for British manufacturers, as the country's progress becomes more pronounced. And in this connection I feel constrained to lay stress on the point that hitherto the development of Morocco has proceeded at a remarkably rapid rate under French auspices, so that it is no use for our business men to hold their hands during what they consider a period of growth. If they want their fair share of the trade of the country they must be prepared to begin to compete for it now, for if the war ends without their having taken action they may find that more enterprising rivals have secured the business.

***

To turn from the general to the particular. The openings Mr. Rabino instances are just what might be expected in the case of a country in Morocco's position. For one thing, he says, there are great possibilities for trade in building materials as soon as the spread of communications leads to the development of the interior. Then there is the cement trade, once practically in British hands, but almost entirely lost owing to competition. Here a new factor has to be considered in the shape of a cement factory at Casablanca, but it is Mr. Rabino's view that, despite this added competition, the demand for cement will be so extensive that British manufacturers would be fully justified in making special efforts to regain their position in this market. It seems, however, that the best British cement is not suited to Morocco, but rather the second and third qualities, and it would also be well for British manufacturers to bear in mind Mr. Rabino's comments regarding the methods of dealing in this commodity.

***

I hope that Mr. Chadwick's comments on India's trade with France will be read and re-read in business circles in our great dependency, for he laid great stress on the point that in certain lines of goods India has failed to give satisfaction in the past. French dealers, it seemed, praised the way in which skins, coffee, castor, linseed, rubber, copra, and rice arrived, but condemned various articles, notably hemp, for the dust and dirt it contained. Amongst other complaints, it was declared that Indian tobacco was the worst marketed in the world, and that if it were better sorted and packed, and approximately graded, it would have a wide sale and a better price, while wheat was blamed for the presence of barley and the frequent mixture of small stones and dust. Obviously, all these matters can be, and, indeed, must be, remedied if India is to obtain the market to which her produce entitles her.

***

Another point he made was that in the future India must expect greater competition in this trade from the French colonies. "More and more attention," he said, "is being paid in France to the economic development of her tropical colonies, both by improving communications and by testing new crops," and he pointed out that the import duties had hitherto been a large factor in determining the class of Indian goods sent to France. "The general effect of these rates," he added, "appears to be that where supplies from India are not essential for the well-being of a French industry, the goods on entry are subject to duty wherever they compete with products produced in France or in the French colonies." Rice affords an instance of the application of this process, Saigon rice being admitted free, while rice not grown in French colonies is subject to a duty of 3 to 8 francs per 100 kilos. Ground nuts, however—the best variety of which is grown in a French colony—are admitted free because the French colonies cannot supply the requirements of the Marseilles oil industry.

***

As regards Indo-Italian trade, there will be general agreement with Mr. Chadwick's remark that "the interest to India of seeing Italy independent and strong, developing on friendly terms with the British Empire, seems obvious to anyone who looks at a map." His views on the development of this trade are, perhaps, best summed up in the statement that "the trade between India and Italy in both directions is greater, and seems to possess greater possibilities, than that between Italy and any other part of the Empire." It is in Italy, in his opinion, that India will find an alternative market to some extent to Germany for several of her products, notably cotton and hides, and possibly oilseeds.

***

It is interesting to note that the view that German trade and commerce will be resumed under the most difficult conditions is apparently openly recognised in the most important business circles in Germany, judging by a recent article by a well-known German authority on economics, Herr Bernhad. He accepts the fact that the claims of reconstruction will make it impossible for years to come for German manufacturers to resume their pre-war volume of exports. On the other hand, certain industries, notably chemical manufactures, will be in a position to start exporting as soon as peace is declared. But—and here is the important point—these exports will, in his opinion, be of small significance compared with the great increase in imports. What these necessary imports will be he goes on to explain. In the first place, it will be essential to import vast stores of foodstuffs, and there will also have to be large consignments of raw materials to enable factories now closed to recommence operations.

***

That is in brief the picture he draws of the position of Germany immediately after the war, and its interest for the Allies lies in the fact that it is nothing more or less than a confession of weakness - a confession all the more emphatic because it is delicately veiled. But then the writer could scarcely be expected to say in so many words that Germany is dependent on the Allies for her supplies, for that is what his remarks amount to. Knowing Germany as we do, after the bitter experience of almost forty-one months' warfare, we can realise that the reference to essential imports by a writer of Herr Bernhad's standing marks a distinct advance in public opinion. Presently, perhaps, we shall find Herr Bernhad writing not only that Germany must have imports, but that they must come from the Allies, if at all, and that it is at least possible that the continuance of Germany's attitude regarding "restoration and guarantees" may mean that the Allies may not feel inclined to share their resources with the enemy.

Roumania's Industries.

II.—The Past and the Future.

Cotton.

The cotton industry has so far made little headway in Roumania. This is not surprising, as all raw materials have to be obtained from abroad. Before the war there were, however, fifteen factories engaged in this industry, representing a capital of about eight million francs. Their production in 1913 amounted to 15,396,221 metres, valued at about eleven million francs. This was sufficient to meet something like one-fifth of the country's requirements, as may be seen from the trade figures for the previous year, when Roumania imported cotton goods to the value of over fifty-two million francs. There seems little reason to hope for any great improvement in this direction in the near future, for it is not one of those cases where a high protective tariff is likely to be of the slightest use. The only effect of such a measure, indeed, would be, as in the case of sugar, to raise prices to a prohibitive standard for home consumers. And the knowledge of this fact is scarcely likely to induce the Government to take any such action. In this connection it may be pointed out that opinion in Roumania is more centred on the possibility of importing the raw cotton instead of taking it in the form of cotton yarn. So far no progress has been made in this way, and, despite the fact that for some years prior to the outbreak of war, the manufacture of cotton goods has been on the up grade, not a single cotton mill has been established in the country. For this there is a tendency to blame the tariff, which is certainly low in this instance, but whether satisfactory results would accrue from its alteration is problematical, to say the least of it.

Paper.

What little success has been achieved in the industry of paper manufacture, in which some seventeen million francs are invested, has been almost entirely due to the convenient operation of the protective tariff. Imported paper is subject to duties ranging from 24 to 46 per cent., and the effect of this has been that the home industry has been able to hold its own against foreign competition in the cheaper and rougher lines of paper. More than that cannot be said. In justice it must be added that the industry has been severely handicapped by the price of raw materials, home-grown wood costing 20 to 22 francs a cubic metre. Manufacturers were forced, therefore, to import wood from Austria-Hungary, where its price was only 9 francs a cubic metre, as they found that, even with the cost of transport and customs duties added, it still meant a saving of money. It should not have been necessary for them to do this, since Roumania had at her disposal abundant supplies of wood. The utilisation of her forests has, however, been hampered by the lack of adequate communications, this being the real root of the trouble. After the war, provided the forests are more or less unimpaired, which must be extremely doubtful, it should be a comparatively easy matter to ensure a fair supply of raw material for the industry at a price considerably less than that for which it could be imported. This would mean that the industry would at least be maintained at its former position, and the possibility would exist that its operations might even be extended in certain directions. As regards the higher grades of paper, which have always been largely imported, it is improbable that foreign competition could be successfully encountered unless Roumanian industrial conditions in the future are very different from what they were before the war.

Metal.

The manufacture of metal goods has hitherto been carried on only to an insignificant extent, despite the fact that Roumania herself has provided a constantly growing market for these goods. The rapid development of the petroleum fields, the growth of industrial enterprises, and the demand for improved agricultural methods, all contributed to the increasing demand for machinery of all descriptions. A few quotations from the statistics of Roumanian imports for 1913 will serve to show the range of her requirements. The imports of motors and agricultural machinery of all kinds were valued at 15,406,172 francs, of rails to 4,819,960 francs, of dynamos and electric motors to 8,933,660 francs, and of electrical apparatus for telegraphs, telephones, etc., to 3,089,983 francs. The home industry was on the most limited scale, so much so, indeed, that Roumania was practically dependent, even for war materials, on other countries. It is possible that this position may be improved after the war; certainly no field of industrial enterprise presents greater scope for expansion, or offers better prospects for successful development, since the demand for machinery is bound to be very great in Roumania after the war. But any advance that is made in regard to this industry is bound to be slow, since there is so much leeway to make up, and especially because a nation which, not very long ago, might rightly have been regarded as being an agricultural community pure and simple, cannot produce a race of citizens equal to industrial work at a moment's notice. It is, on the contrary, rather a matter for generations. Still, this industry is, of all industries, the one in which it is most essential that progress should be made, and it may be hoped, therefore, that the fact that results may seem far distant will not prevent every effort being concentrated on its improvement.

Post-War Prospects.

From this brief survey it will be seen that at the outbreak of war Roumania was still at the commencement of her industrial development. That this should have been the case is, as we have pointed out, not at all a matter for surprise, since thirty years is all too short a period in which to obtain any marked results. This needs emphasis in view of the fact that Roumania's slow development has given rise to the idea that the Roumanian people as a whole are not possessed of the qualities necessary for industrial success. It is, of course, possible that this view has some justification, but the facts rather indicate that the country's handicap has been the lack of adequate support from abroad in the shape of capital and skilled labour. This will not be the case in the future, for Roumania's steadfast devotion to the cause of the Allies has assured her the fullest consideration when the time comes for her needs to be satisfied. On this account we may be reasonably optimistic regarding Roumania's industrial future. Her past, with its record of ill-success and slow progress, has been wiped away by the war; she will start a new page under the happiest auspices, sure in the support of staunch friends, whose only desire is that she should realise her fullest promise.

COMMERCIAL INTELLIGENCE

The New Department.

The new Joint Department of the Board of Trade and the Foreign Office, whose formation was announced in the recent White Paper on the future organization of commercial intelligence, has now been constituted. The new Department will be known as the Department of Overseas Trade (Development and Intelligence). It will be represented in Parliament by Sir Arthur Steel-Maitland, M.P., who will occupy the position both of Additional Under-Secretary of State for Foreign Affairs and also Additional Parliamentary Secretary to the Board of Trade. The Department will comprise the existing Department of Commercial Intelligence of the Board of Trade, including the management of the British Industries Fairs, the War Trade Intelligence Department; the section of the Foreign Trade Department of the Foreign Office dealing with Form K and with other matters relating to the promotion of trade abroad, and certain functions now performed at the Foreign Office in connection with commercial intelligence and with the Commercial Attaché and Consular Services. Sir William Clark, K.C.S.I., C.M.G., has been appointed Comptroller-General of the new Department, and Mr. F. G. A. Butler, C.B., C.M.G., formerly of the Colonial Office, has been appointed Director of the Overseas Division.

An advisory committee of business men to the new department is in process of formation, and will be announced shortly. The temporary headquarters of the department will be at 73, Basinghall Street, E.C.2, to which personal letters for Sir Arthur Steel-Maitland should be addressed. The commercial intelligence staff will for the present continue to be housed at the same address. The office in Basinghall Street contains an inquiry bureau, where information on all matters affecting trade can be obtained on personal application, or inquiries can be addressed there either by post or telephone (Telephone Nos., London Wall, 4713 and 4717). The War Trade Intelligence staff will remain in their existing offices in Lake Buildings, S.W.1.

MOROCCAN TRADE.

Openings for British Manufacturers

The following notes relative to openings for trade in the French zone in Morocco, furnished by the acting British Consul at Casablanca, Mr. H. W. Rabino, are published in the *Board of Trade Journal* :—

Building Material.

Building material is a branch of business in Morocco in which there are great possibilities, as, apart from a few of the coast ports at which building was being carried on very extensively at the commencement of the war, Morocco is in an undeveloped state. With the advent of railways and motor transport, it is highly probable that the larger towns such as Fez, Marrakesh (Morocco City), and Mequinez in the interior will be developed to the same extent, comparatively speaking, as Casablanca and Tangier.

At one time the bulk of the trade in cement was in United Kingdom hands, and large stocks were accumulated to keep the market supplied. In recent years, however, owing to the rise of keen French and Belgian competition, United Kingdom manufacturers have been able to secure only a small share of the total imports of this class of goods into Morocco. British cement is recognised as being far superior in quality, but prices—the first consideration in Morocco—cannot compete with those quoted for other makes. Business will become more difficult than hitherto now that a large cement factory has been established in Casablanca. Nevertheless, the present and prospective demands for this necessary article are such as would fully justify United Kingdom manufacturers in making special efforts to obtain a larger share of its importation into Morocco. The fact that British cement is always preferred for certain classes of work is a further argument in favour of their doing so. Cheap labour and the advantage gained by the production of the raw materials on the spot are important factors in the competition of locally made cement at Casablanca. This, however, does not yet apply to the other Moroccan ports, because the cost of packing and transport of cement to these ports tends to equalise the conditions as between imported cement and that manufactured in Casablanca.

It is said that the best British cement would be altogether too good for Morocco, but that the second and third qualities should find a good market. Cement intended for the interior of Morocco should be put up in barrels, unless the contrary is expressly stipulated in the order. Cement is usually imported from the United Kingdom into Casablanca in barrels of 180 kilogs. gross; while southern ports take barrels of 100 to 120 kilogs. gross. The usual terms of sale are cash against documents.

Contractors' Supplies.

The greater part of public and private constructional work entailing a demand for contractors' supplies will undoubtedly be executed by French contractors, who are favoured through having their own sources of supply. Consequently, no great opening can be anticipated in this direction for firms of other nationality. On the other hand, such items of contractors' equipment as spades, shovels, pick-axes, pumps, winches, etc., already have a market with the natives. These goods have been imported on a very large scale into Morocco by United Kingdom firms, both on order for native clients and as stock for retail sale. Stock so held has occasionally been bought up by French contractors, which would seem to indicate that encouraging prospects are not wanting in this line of business.

It is possible that no paving material will be imported into Morocco for some time to come, if ever, since the natural resources of the country may prove sufficient. But it may be pointed out in this connection that the material available is very inferior, in proof of which the bad state of the roads a few months after their completion or repair is instanced. The stone as yet available is, in fact, too soft to be suitable for road-making. Tar-macadam has not yet been introduced in any of the Moroccan municipal paving schemes, but, should the authorities eventually decide to adopt it, there would be a good opening for road tar, both artificial and natural. Concrete pavements are already in use, thus increasing the demand for cement.

It should be noted that the use of bitumen in making flat roofs has not yet been adopted in Morocco, although this method practically ensures a water-tight covering. The spread of European habits should provide an opening in course of time for materials employed in this method of roofing.

Sanitation Appliances.

As in the case of contractors' supplies, the European demand for sanitary appliances in French Morocco will always be met to a large extent by French firms and contractors who already keep stocks. The majority of the natives still use untrapped pipes, but it is quite certain that before long the adoption of sanitary slabs suitable for Oriental use, of the kind manufactured by almost every sanitary engineering firm in the United Kingdom, will become more or less compulsory. This article, therefore, is worth the serious attention of United Kingdom manufacturers. It is desirable that stocks of these goods should be held for sale against those possessed by competitors.

The demand for wall paper is unlikely to increase among the native population, and, in comparison with the various distempers and paints now available, it can scarcely be recommended. On the other hand, the inevitable increase in the European population as time goes on cannot fail to create a growing demand. Mr. Rabino considers that sample books of patterns would probably assist in securing moderate business; there is ample room for development. Distemper has already been introduced into Morocco, but is chiefly purchased in small quantities at present by way of speculation, and does not yet command an extensive market.

ADEN'S IMPORT OF PAINTS

Insufficient Consignments.

For the following particulars of the market for paints in the Aden district, we are indebted to a recent report of the United States Consul at Aden, Mr. Addison E. Southard :—

The consumption of paints of various classes in Aden amounts to $21,000 per annum. The value of turpentine, brushes, putty, and other painters' supplies averages $1,600 per annum. Preservative paints, such as zinc and lead pigments in oil, lead all other classes. Ready-mixed oil paints, enamel or carriage paints, and varnishes—which so far as their most important local uses are concerned may be classed as decorative paints—follow in the order named. The preservative paints that are sold in this market are almost exclusively British. Two well-known manufacturers have had their goods established here for years, and to the natives good paints and the trade names of these manufacturers are synonymous. On account of the increased prices and inability to obtain sufficient supplies of the old established paints it is likely that local importers will find it necessary to introduce other brands. They are expecting shortly to receive shipments of paint from a factory which is being established in Calcutta. So far as the Aden Port Trust returns show, the United States never has contributed to the paint imports here, but under the heading of painters' supplies for 1914 there were received from the United States 28 cwt. of turpentine, valued at $598. The demand for paints at Aden has noticeably diminished since the Turkish Yemen ports were closed to trade. Normally considerable quantities of the zinc and lead pigments in oil were re-exported to those places, where they were used principally in painting dhows, lighters, and similar small craft

Paints Required for Boats.

The bulk of the paints used in the port of Aden consists of zinc and lead pigments in oil. These are in greatest demand for use in painting dhows. A fair number of the native boats is built in Aden, and many from the neighbouring native ports come here for repairs, painting, etc. The owners of the considerable number of large dhows which come down from Muscat and the Persian Gulf during the winter months, to bring dates, carpets, and pearls to Aden, also take advantage of their stay here to give their boats a new coat of paint. When he can afford it the dhow owner will use a black zinc or lead paint for the bottom, zinc white for the sides, and zinc or lead yellow for the other parts of the craft, with the exception of the captain's quarters, which are finished with oil paints in such bright colours as blue or red. Lime for whitewashing is produced locally. There are said to be in the Turkish Yemen great quantities of red and blue stones which can be crushed into a powder suitable for making water paints. None of these red or blue stones, or of the powder made from them, were found in Aden shops.

The Wienerbankverein and the Oesterreichische Landesbank are interested in a huge Roumanian oil scheme, says the *Financial Times*. These banks have recently sent a special committee of experts to prospect certain oil-bearing lands with a view of constituting a great Austrian oil company in Roumania.

ENGINEERING NOTES.

Tractors for Orchards.

One of the reasons that farmers in the East hesitate in the selection and purchase of an agricultural tractor is the question of size. As has often been mentioned in these columns, the great majority of farmers there are small holders, with more orchards than open corn fields in their holdings; and while for the cultivation of the latter an average-sized tractor is suitable, the same cannot be used in orchards or in fields with many trees. Thus, a smallholder has not sufficient work for the ordinary-sized tractor, and the purchase of one is not considered advisable. One of the smallest models of tractors seen recently at work may be found very serviceable for such smallholders in the East. It is a compact little machine, essentially intended to be of use for orchard cultivation. Its ability to manipulate in confined and restricted areas is an outstanding feature. The power unit is a four-cylinder one, with a bore and stroke of 3½ ins. by 4 ins. respectively, and it gives 12 b.h.p. at 800 revolutions per minute. Transmission is by planetary gear. One speed in each direction is provided. Fuel consumption on this model works out at from 1½ to 2½ gallons per acre. A pulley is provided for driving stationary machinery.

Sugar Production in the Near East

The heavy decline in the production of sugar through the enemy control of the largest part of the beet-growing area in Europe has induced France and other countries to seek new sources of sugar supply, and in this connection valuable assistance has been rendered during the past year by the Agricultural Department of the United States in the way of experimenting with the production of sugar from maize and sorgo. It has been found that the weight of sugar from an acre of maize is superior to what is obtainable from an acre of beet, and considering that the maize crop requires far less attention, not to speak of the fact that its preliminary cultivation is much less costly, the discovery is most important. Maize and a great deal of sorgo are grown in all the southern parts of Europe, and in the Near East and particularly in Greece, Serbia, Roumania, Bulgaria, Thrace, Southern Russia, Syria, and Egypt, and crops of both kinds are raised so easily and cheaply that there seems every probability of the Near East becoming the main source of sugar supply in the future. As there is often a discrepancy regarding the identity of these two kinds of cereals, it may be added here that maize is what is commonly known in this country as Indian corn, and in the Near East as Arabian corn or *Kahlabohchi*, Turkish *misirbughdayi*, and Serbian *Kukuruz;* whilst sorgo is commonly known as millet, and in the Near East as Kehchri. Great quantities of the latter are used in the East for feeding cattle and poultry, but it is also made into cakes, or boiled and eaten by the poorer classes of peasantry.

Japanese Competition.

In view of the apparent demand for all classes of machinery and implements in the East, it is not out of place to remind British manufacturers that Japan continues to make great efforts to capture the cheaper Far Eastern trade hitherto mainly in the hands of the manufacturers of Central Europe, and that in her sphere of energy the Middle and Near East is included. The fact is one of which most careful note should be taken by British manufacturers, who are certain to find Japan an increasingly serious competitor.

This year's Indian cotton crop is officially expected to show a 15 per cent. acreage increase compared with last year, but a 10 per cent. decrease in production, due to the heavy monsoon in the flowering time.

LANCASHIRE COTTON.

Fair Demand from Egypt.

(From Our Own Correspondent.)

Manchester, Monday.

This has been a holiday week in the market, and very few serious attempts have been made at business. Most traders have been disposed to mark time, and more attention has been paid to stocktakings and squaring up matters before the end of the year, rather than the arranging of fresh contracts. No particular change can be recorded in the outlook for the Egyptian cotton crop. Yarns made from Egyptian cotton remain deeply sold, and the prices ruling are very profitable to spinners. A very fair demand continues to be experienced in piece goods for Egypt, but the offtake has not been so important as in recent previous weeks. Inquiry in cloth for India has been at a low ebb, and our customers continue to resist the high prices which are required by manufacturers. Very little demand has been experienced for China. Late last week extensive contracts were arranged in heavy goods for Allied purposes. American yarns continue strongly held, and although business has been disorganised, the undercurrent of demand for prompt delivery remains healthy. Nothing very encouraging can be said with regard to export trade in yarns at the moment.

Indian trade returns for November, says Reuter's Calcutta correspondent, show that the imports amounted to 11,197,000 rupees, being an increase of 1,668,000 rupees on the corresponding period of last year. Exports amounted to 13,633,000, a decrease of 1,653,000 rupees as compared with November, 1916. In the pre-war years 1913 imports amounted to 10,973,000 rupees and exports to 12,974,000 rupees.

EGYPT'S FINANCES.

September Returns Satisfactory.

(From Our Own Correspondent.)

Cairo, November 23.

The State accounts for September, just published, show a slight decrease in the surplus recorded the previous month, but the position still remains better than it was at the end of the corresponding month of 1916. During September revenue amounted to £E1,251,546 and expenditure to £E1,299,451. The principal items of revenue were land tax, £E155,405; Customs, £E160,511; tobacco dues, £E135,682; mixed court fees, £E65,103; railways, £E406,580; miscellaneous receipts, £E75,140; and ghaffir cess, £E29,626. The more important items of expenditure were irrigation, £E79,394; railways, £E220,303; ghaffirs, £E61,509; War Office, £E84,875; guaranteed debt coupon, £E153,563; and war gratuities, £E44,542.

Totals for Year.

The September account brings the first half of the financial year to a close. The total revenue for the period amounts to £E9,085,328 and expenditure to £E8,581,163, as against £E8,316,708 and £E8,116,994 respectively a year ago. Thus revenue has increased by over £E700,000 and expenditure by nearly £E500,000, leaving a surplus of £E504,165 to the credit of the current year, as against one of £E199,714 at the close of the first half of the preceding one. Of course, this year's accounts are swollen by the ghaffir tax, which did not figure in the previous year's returns. The receipts of the cess amount to £E406,968, but as, on the other side of the account, there is a total expenditure to date of £E350,178, the inclusion of this item merely affects the surplus to the extent of, roughly, £E50,000.

Increases in Revenue.

The main increases in revenue during the half year have been Customs, £E57,244; mixed courts, £E66,021; railways, £E75,433; military exemption fees, £E31,860; sundry extraordinary receipts, £E311,889; and, of course, the above-mentioned ghaffir cess of £E406,968. The sole decreases of any note were £E204,436 in the tobacco dues and £E31,943 in port dues; indeed, of the twenty-six items which go to make up the revenue all but six show improvements over the preceding year. The first half is always the lighter of the year by comparison with the second, which includes the heavier tax instalments, and normally covers the period of greatest traffic on the railways and in the Customs owing to the movement of cotton. We may, therefore, already look for a substantial surplus again when the current year's accounts are closed. Certainly, the position is eminently satisfactory.

COMPANY MEETINGS.

EUROPEAN OILFIELDS CORPORATION.

The Russian Situation.

Mr. Herbert Allen, presiding at the annual general meeting of the European Oilfields Corporation, Limited, on December 20, said he could conceive of few less pleasant or less satisfactory tasks than that of presiding, at the present time, over the general meeting of an English company operating in Russia. No one was interested in what they were doing a year ago; what was happening to-day they did not know, and what had yet to happen they could scarcely conjecture. The profit and loss account was practically a repetition of its immediate predecessor, but it afforded no criterion of what they were doing at the present time, and in no event could the current year be expected to turn out well for any Anglo-Russian enterprise. The directors had lost no opportunity since the revolutionary movement in Russia set in two years ago of withdrawing the company's surplus funds from that country, and altogether they had succeeded in getting over £92,000 at rates varying from 1s. 8¾d. to 11½d. per rouble, their average being 1s. 2½d. per rouble. The present rate was about 6½d., but, as a matter of fact, it was only nominal, the Russian Government having now put an entire stop on remittances. It had long been obvious that as Europe settled down to a long-drawn-out war the Russian exchange must go from bad to worse. The output of paper money had reached a total which almost baffled imagination, and notes of small denomination no longer had any value; they littered the streets like fallen leaves. They had long experienced great trouble with their workmen, and it had been much worse since the revolutionary outbreak last March, the men being encouraged in their excesses by Ministers more extreme even than themselves. The recent additions to wages in the Baku oil industry were estimated at five million roubles per month, which at normal rates would be equivalent to about £6,000 per annum. However, he was not going to be too hard on the Russian workmen, who, under far greater provocation, was behaving quite as well, and in some respects much more patriotically, than his British counterpart, besides which he was only following the teachings of English trades unionism. The doctrines of class hatred and plunder were preached with pretty equal vigour in both countries, and, furthermore, the Russian workmen, in listening to evil counsellors, had been influenced largely by hunger and despair, whilst labour in this country had begun to talk of revolution and confiscation not only before it felt the pinch of war, but whilst it was actually profiteering on the misfortunes of the country. As to the enactments, decrees, and proclamations of the crazy gang who, first under Kerensky and now under Lenin, were indulging in a travesty of national Government, if they were to take them seriously their own and similar companies might consider themselves *non est* so far as Russia was concerned, for there could be no just reason why, if private property was abolished, any line should be drawn between that of the individual and that of a joint-stock undertaking. The next thing they heard so much of now was the talk of repudiation by Russia of her national obligations. This had been described as national suicide, but Russia had already committed that. With her richest provinces already annexed to Germany, many more of them at the enemy's mercy, a score or so of independent Republics already proclaimed in other directions, and a currency valueless for purposes of exchange, it was difficult to see who was to look after Russia's foreign obligations and how. Besides, Russia was not alone in her doctrines of repudiation and confiscation. He would like to have the assurance of the Prime Minister, whose views on the subject of wealth and capital were not forgotten, that no Government of which he was a member would ever give countenance to any policy embodying the repudiation of the British obligations, levies on capital, or conscription of wealth. As to the revolution in Russia and what it would lead to, it was useless to draw analogies from the past history of other countries. But of one thing they could speak with certainty; Russia, with her fighting forces deliberately destroyed by her own rulers, was helpless to defend herself, and Germany would dictate her own terms; she would restore order in Russia when it suited her economic and political aims in that country. As to British assets and British interests in Russia—certainly in European Russia—they would be dealt with as Germany might dictate, and it was no use shutting one's eyes to that. With the Black Sea and its ports brought within the sphere of German influence, if not actually incorporated in the German Empire, it might be assumed that Russia's oil output, and more particularly that of Grozny, would once more flow westward and help supply Germany's requirements in the Balkans and Asia Minor. There was another thing they had got to remember, as business men, not as politicians. There was at present no Russian Republic; there was no properly constituted Government; there was an Empire, or part of an Empire, but no Emperor. The present so-called Government was merely a body of usurpers, having no mandate from the Russian people; no contract it could make would be good at law or binding upon future Governments. It had not been elected upon any constitutional franchise to any constitutional body; it had no credentials to represent Russia. In other words, authority was non-existent in Russia at the present time. They might wonder why he (the chairman) mixed business with politics. The reply was that business—not merely the business of the individual, but the business of the nation—and politics were inseparably interwoven, and never more so than in times of stress and danger like the present. If they were to win the war by silver bullets, then sound finance was their strongest weapon. It was all very well for them to talk, as they were apt to do, of Russia's political insanity, but when mob rule was made the subject of Government congratulations; when they were told, in so many words, that the establishment of ochlocracy in Russia was one of the great principles for which they had entered the war; when their public men could talk of five-hour working days and minimum weekly wages reckoned by the pound; when they were threatened almost simultaneously with repudiation of the national debt, the confiscation of all private wealth and the infliction of a

100 per cent. income-tax, then surely England herself was getting beyond the incipient stages of the same malady that had vanquished Russia.

BOMBAY, BARODA, AND CENTRAL INDIA RAILWAY CO

Increased Gross Receipts.

The 124th half-yearly general meeting of the Bombay, Baroda, and Central India Railway Company was held on December 21, at the Cannon Street Hotel, Major A. D. G. Shelley, R.E., the Chairman, presiding.

The Secretary (Mr. S. G. S. Young) having read the notice convening the meeting,

The Chairman, in the course of his address, said :—Gentlemen,—My remarks on the detailed results of working for the six months ended March 31 last will be brief, as the main figures were before you at the last meeting, and you have already received the final dividend in respect of your share of the profits for the year ended at that date.

Expenditure on Capital Account.

As regards expenditure on capital account, the debit for the half-year is only about one-third of that in the corresponding period of 1915-16, which in turn was half that of the same period in the previous year. The programme of special works of improvement drawn up in 1912, and which it was anticipated would be carried through in about ten years, has, of course, been greatly affected by war restrictions. The other feature of the half-year's working, the increase in coaching traffic, is highly satisfactory. The increase occurred both in numbers and earnings under all classes, both on the broad and metre gauge sections of the line. The bulk of the increase was naturally in third-class traffic, but all classes, as well as parcels and other miscellaneous receipts, contributed to the increase of nearly Rs15 lakhs, or over 11 per cent., in the earnings. In the latter part of the half-year under review a considerable curtailment of the train service was effected in consequence of the imperative need to reduce operating expenses as much as possible. All railways in India have taken similar measures at the request of the Government, and since the close of the half-year the reductions in the train services have been followed by a general increase in the fares charged for all classes of traffic. This enhancement was necessary in order to restrict traffic to the carrying capacity of the reduced train service, and because the old scales of charge were insufficient to cover the greatly increased cost of operation which now prevails. There was little variation in the total earnings from the goods traffic of the half-year compared with those of the corresponding period in 1916—an increase of about Rs6¾ lakhs on the broad gauge being offset by a decrease of about Rs6½ lakhs on the metre gauge. On the expenditure side of the account the variation in total is small.

Fall in Working Expenses.

With an increase of over Rs.14 lakhs in the gross receipts and this decrease of nearly Rs.1½ lakhs in expenditure, the percentage of expenditure to gross earnings has fallen to 40.58, as compared with 42.49 in the corresponding period, with 51.97 in March, 1915, and with an average of 45.92 during the two corresponding half-years preceding the war. I have already reminded you at these meetings of the charge for postponed renewals which will have to be met as soon as materials are obtainable after the close of hostilities. With the prolongation of the war and the great rise in price of English stores of every description, that liability must continue to increase, and may seriously affect the net earnings of the railway for some years after the conclusion of peace. Although this may prevent the earning and distribution of bonus dividends in excess of the standard dividend of 5 per cent., your board consider that there need not be any apprehensions of a reduction in the standard rate, as the substantial reserve fund which has been accumulated with the view of avoiding marked fluctuations in dividends should, in their opinion, suffice to maintain it.

Turning now to the dividend prospects of the current year, i.e., the year ending March 31 next, the net earnings of the half-year to September are about Rs.34 lakhs more than those of the corresponding half-year. Since the close of the half-year traffic earnings have shown a tendency to decrease, but, although there are still three months of the year to elapse, I think I am justified in anticipating that, with the usual interim dividend of 10s. per cent. from sunplus profits proposed to be paid in January next, the total distribution from surplus profits for the year ending March 31 next is not likely to be less than that made from the profits of the preceding year, and will also allow of some addition to the reserve fund. With the grants proposed this year towards the various charitable funds connected with the war the total sums contributed to such funds amount to £1,675 from the general revenues of the line, and £1,690 from the stockholders' revenue account. I now beg, gentlemen, to move :—"That the report of the directors, with the accounts now presented, be received and adopted."

Colonel W. V. Constable, R.E., seconded the resolution, which was carried unanimously.

On the motion of the chairman, seconded by Mr. T. J. Bennett, C.I.E., the following resolution was afterwards unanimously agreed to :—"That, in addition to the guaranteed interest of £1 10s. per cent. for the half-year ending December 31, 1917, an interim dividend at the rate of 10s. per £100 on the capital stock in respect of the profits for the financial year 1917-18 be paid to the holders of such stock who were registered in the company's books on the 10th instant."

The proceedings terminated with votes of thanks to Mr. R. Woolcombe, the company's agent, and to the Indian staff generally, and to the chairman and the directors.

COMPANY REPORTS.

Egyptian Salt and Soda.

The report of the Egyptian Salt and Soda Company, Limited, for the year ended August 31 states that the trading profit amounts to the record sum of £E236,038.029 millièmes. On the other hand, adds the report, the managing director, without the knowledge of the board, entered into certain cotton arbitrations which resulted in the loss of £E41,917.156 millièmes. The board is advised that these operations, although made in good faith and in the interests of the company, were outside the statutory powers of the company, and that consequently the managing director is legally responsible to make good the full amount of such loss. As the managing director contends that these operations were within the scope of the company's powers, and that, having effected them in good faith and in the interests of the company, he is not liable, the amount has been shown in the balance-sheet as an "amount in suspense." The directors have prepared an agreement with the managing director the effect of which will be that this liability will be admitted by him and will be discharged by a grant to him of the same amount by way of special remuneration for his services, and the net profits of the year will be reduced accordingly. Net profit, before writing off depreciation and making provision for reserves, amounts to £E229,509.830 millièmes. The directors have set aside for depreciation of the various factories £E19,757.950; made provision for completion of new works at Moharrem Bey for the exploitation of the new oil processes, £E20,000; for renewal of railway line and rolling stock at Wadi Natroun, £E10,000; transferred to reserve for bad and doubtful debts, £E3,000; and reserved as provision for the suspense item in the balance-sheet £E41,917.165, leaving a balance of £E134,834.724 millièmes. To this has to be added £E57,974.478 millièmes brought in. The directors propose a dividend representing 25 per cent. on the share capital (5s. per share), and that the balance of £E71,472.402 millièmes be carried forward. Meeting, 5, Rue Adib, Alexandria, to-day, 4.30 p.m.

COMPANY NOTES.

Dividends, Payments, etc.

The directors of the Egyptian Markets, Limited, have declared an interim dividend of 5 per cent. (less income-tax at 5s. in the £1 for the year to December 31 on the ordinary shares, payable forthwith at the Anglo-Egyptian Bank, Clements Lane, E.C.

The 3½ per cent. debenture stock transfer books of the Bengal and North-Western Railway Co., Limited, will be closed from January 1 to 14, inclusive, for the purpose of preparing interest warrants payable to those stockholders whose names are on the register at the time of closing the books.

Egyptian Salt and Soda.—Coupon No. 31 due 31st inst. on the £100,000 first mortgage debentures will be paid on that date by the National Bank of Egypt, 6 and 7, King William Street, E.C.

Khedivial Mail Steamship and Graving Dock.—Dividend of 10 per cent. on the ordinary shares, less tax at 5s., will be paid at Messrs. Glyn, Mills, Currie, and Co., London, and at the Imperial Ottoman Bank, Alexandria, on 31st instant. Ordinary transfer books were closed from 27th to 31st instant, inclusive.

"THE BOARD OF TRADE JOURNAL."

On Thursday, January 3, the *Board of Trade Journal* will be published in a new form and with an extended scope. The aim will be to give authoritative information regarding all the activities of the Board of Trade and of the new department formed jointly with the Foreign Office. Special attention will be paid to plans for assisting trade restoration after the war. Official information concerning Government orders affecting trade, Customs regulations and tariffs, openings for trade, etc., will continue to be given, and advantage will be taken of the improved and developed service of trade Commissioners within the Empire and of commercial Attachés' and Consuls' services in foreign countries, to secure for publication in the *Journal* fuller reports on oversea markets. The President has appointed Mr. Harcourt Kitchin, late editor of the *Glasgow Herald*, as editor of the new issue of the *Board of Trade Journal*. The price of the new *Journal* will be 6d. (post free 6½d.), but present subscribers will receive their copies without additional charge until their current subscriptions have run out. All communications should be addressed to the Editor, *Board of Trade Journal*, at Whitehall Gardens, S.W.1, or 73, Basinghall Street, E.C.2. The publishers are H.M. Stationery Office.
