The Budget is still passing through the Committee stage, where several modifications have been made. It has become the chief topic of discussion, and the Press of all shades of opinion is at one in condemning some of the measures proposed. These include a levy of 6 per cent. on salaries and pensions, 15 per cent. on net income, 75 per cent. on inheritances in the direct line, and a heavy percentage on capital, including property of different kinds. Incomes of 9,000 lei per annum in the towns and 7,000 lei and under in the country are to be exempt from income tax.

Export of Cereals.

The Village Co-operatives have been charged with the export of the 20,000 wagons of wheat for the purchase of which the French Government contracted with the Roumanian Minister of Finance on December 8, 1920. Precedence is to be given on rail and river for the transport of this grain to the ports, and the co-operatives are to be exempted from the 1 per cent. commission tax on its value.

The *Moniteur Officiel* of April 10 publishes a decision of the Council of Ministers authorising the export to Switzerland of 500 wagons of wheat, subject to an export tax of 15,000 lei per wagon. This tax will not be paid by the exporters but will be credited towards the payment for certain supplies ordered by the Roumanian Postal Department from the Société anonyme des Laminiers et cablerie of Cossonay, and from Hasler of Berne, to the value of 2,781,680 Swiss francs. As guarantee for the execution of the contract the exporter will deposit with the Ministry of Industry and Commerce a bank guarantee of 7,500,000 lei.

In order to provide the sterling necessary for the payment of certain sums in England the Government has decided that Messrs. Spears and Brunstrom may export 20,000 wagons of maize to England at the world market price with a reduction of two and a-half per cent. for commission, delivery to be made in November. The concessionaires will have to purchase the maize and find the means of transport.

Owing to the long drought the Government has prohibited for the time being the export of all other cereals.

Miscellaneous

The Council of Ministers has decided that of the extraordinary credit of 30 million lei provided by the law of 1920 ten millions shall be employed for the purchase of horses and cattle, etc., required by the populations in the devastated regions.

The owners of gold mines have addressed an appeal to the Government requesting that the fixed price of gold be raised so as to allow them a profit of 15 per cent., or that they be allowed to export it.

BULGARIA.

SOFIA, April 20.

Live Stock for Allied States.

May 1 has been fixed as the date on which Bulgaria must deliver to the three neighbouring States all the sheep, cattle, horses, oxen, and other animals, due to them under Article 127 of the Peace Treaty. Orders have been given for the rounding up of the animals, and in order that there may be no scarcity of meat, and that prices may not run too high, the period April 20-30 is to be observed as a meatless one throughout the country.

Yugoslavia, Roumania, and Greece have intimated to Bulgaria that they wish the animals delivered at places which are some considerable distance inside their respective frontiers. The Bulgarians say that it will not be possible to do this, as the guards accompanying the animals cannot cross the frontiers, and also on account of the difficulty that would be experienced in feeding the beasts.

It is not yet decided where they will be handed over, but it does not seem at all likely that the various commissioners who are collecting the animals will have finished their work by May 1. The total number of beasts to be handed over is 70,825, of which Roumania is due to receive the most, viz., 15,000 sheep, 5,250 horses, 6,060 head of cattle, and 4,450 oxen and mules.

Miscellaneous.

Coming back to Sofia after an absence of only four months, one is greatly struck by the much larger stocks that are on view in the shops and warehouses, and their greater variety. Goods have been coming in in large quantities, and one is glad to be able to state that as regards actual merchandise England is fully holding her own.

The low rate of exchange still ruling—one receives 325 liras for the £1—is, however, the great drawback to our traders, and it is to be feared that unless a good deal of rain falls during the next two or three weeks, prospects of a good harvest, on which any great improvement in the exchange depends, will be seriously impaired. For the past two and a-half months there has been hardly any rain, and the whole country bears a very parched and dried-up aspect.

M. Dashkaloff, Minister of Industry and Commerce, in the course of an interview, told me that he was very well satisfied with his recent European tour, and was especially struck with the manufactures that he saw whilst visiting Birmingham and Glasgow. He is advising Bulgarian commercial men to go to England and thus see for themselves the goods that they need.

SYRIA.

BEYROUT, April 12.

Beyrout Fair Postponed.

As was anticipated, the opening of the Beyrout Fair has had to be postponed from April 1 until April 15, while the official inauguration will not take place before the 25th of the month. Even then the buildings in the public garden of Liberty Square, allocated for exhibits of native industries, and meant to represent the four principal towns of Syria, as well as the restaurant building behind the old Seraglio, can hardly be ready. Apart from this the original date of opening could not have been kept because of the delayed return of General Gouraud, whose special interest in this essentially French enterprise is evidenced by his references to it in some of his recent conferences on Syria. The commercial crisis, which Syria, like all other countries, is going through at present will, it is feared, interfere with the success of the fair, but not, it may be hoped, to the extent of discouraging the project of making it an annual event.

[A Reuter message from Paris states that the fair was opened by General Gouraud on April 30.]

New Wireless Station.

The French, who were foremost among European Powers in the practical application of wireless telegraphy in their overseas dominions, are devoting special attention here to this method of quick communication. Besides the military station which is nearing completion at Jdeidé—a couple of miles or so on the east side of the town—another very powerful station is to be set up in Khaldé, three or four miles south of Beyrout. A French company has obtained the concession for this central station and other lesser stations in Syria, and their rates are said to be most reason-

able. If they are as cheap as the rates obtaining in Tunis, it will be a veritable boon to the public. It is understood that the station will admit of direct transmission to Bizerta and Bordeaux. The company has already secured the necessary land—an area of about a million square meters—and the work on the principal building will shortly be started. Those who, like the shipping agents, have been suffering no little trouble in their business from recurring interruptions of the wires owing to atmospheric or political disturbances, will especially welcome a medium that cannot be affected by these factors. Since the Kemalist rising telegraphic communication with Mersina has been completely interrupted, and the only medium of communication open to the public has been a more or less irregular postal service.

Railway Projects.

The reconstruction of the Tripoli-Homs line, the rails of which were torn up by the Turks during the war for use in Southern Palestine, is going on rapidly, and it is expected that its completion will be effected in the course of a few months.

The next railway works to be taken in hand will be the broad gauge line between Beyrout and Tripoli to connect with the Tripoli-Rayak-Aleppo system, and the direct line between Alexandretta and Aleppo. There are two alternative plans for this line. One would involve the cutting of a tunnel through the mountain behind Alexandretta, while the other is for a line following the coast to Antioch and running thence northward to Aleppo. The latter plan is likely to be adopted.

ADVERTISING IN MOROCCO.

His Majesty's Consul at Casablanca (Mr. H. L. Rabino) has furnished to the Department of Overseas Trade a report on advertising in Morocco, of which the following are extracts:—

"The native is of a conservative disposition, and is only attracted by the well-known marks, designs, and patterns of goods or their coverings to which he has long been accustomed, so that advertising is a waste of time and expense, and its aims are not understood by the native mind. In all cases of trade marks and inscriptions to be placed on the goods, or their coverings, the description of the quality, etc., if in the Arabic language, should be short and to the point, avoiding all unnecessary comparisons with other similar goods, and strictly abstaining from the use of the name of 'Allah' or any of the terms by which the Deity is usually designated. It is useful to draw attention to the fact that the article is of British manufacture, but native taste as to size, shape, design, and mode of packing, etc., should be studied by the manufacturer.

"With the above remarks, advertising as a means of furthering business with the natives of Morocco can be dismissed as unproductive generally of any perceptible results; not so, however, with the large and growing European population who can be reached through the same media as employed in Continental Europe, though the letterpress or posters, etc., should be in the French, Spanish, and even Italian languages in the French zone of Morocco, where showrooms, advertising novelties, calendars, sandwich men, illuminated screens, posters, and daily papers are all used to give publicity and to reach the European population, but Morocco is not the country in which to embark on a campaign of advertising any article which has not already proved its potentialities in the markets of the world."

As regards the Spanish zone, there would not appear to be much scope for advertising, as the following report by the British Vice-Consul at Tetuan will indicate:—

"Advertising here is still in its infancy, and, in view of the general illiteracy especially of the Moorish population as regards either their own or any other language, it is likely to remain so for a considerable number of years. Pictorial advertisement by posters is practically unknown, even in the Spanish quarter of the town, and it would scarcely be worth while for British manufacturers to advertise here at all unless perhaps in consultation with their local agents, whose names should be prominently displayed on the advertisements."

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated April 28:—During the week ending April 16 crop prospects fair to good generally, except in North-West Frontier Province and unirrigated areas of the Punjab, where rain badly wanted. Jute sowings practically completed, except for Northern Bengal and Deshi districts. Sowings probably short, but weather hitherto favourable, and bright sunshine would be beneficial. Bombay cotton arrivals from September 1, 1920, to April 22, 1921, were 1,840,000 bales, as compared with 2,350,000 bales for the corresponding period of last year. Bombay imported piecegoods market steady; some fresh business with Manchester for Karachi and Calcutta markets reported. Indian trade returns for twelve months from April, 1920, to March, 1921 (in lakhs of rupees):—Imports, merchandise, 33,551; exports, 25,636; net exports of gold, 914; net imports of silver, 742; reverse councils, 2,855. Net balance of trade against India, Rs.4,967 lakhs. The previous year showed a balance of trade in favour of India by Rs.8,844 lakhs.

COTTON GROWING IN MESOPOTAMIA.*

III.—THE POLITICAL ASPECT.

(FROM A CORRESPONDENT.)

BAGHDAD.

In previous articles the commercial possibilities of cotton cultivation in Mesopotamia and the experimental work already undertaken with the view to increasing the area under cotton have been discussed. It remains to consider the changes that are likely to accrue in the event of cotton being commonly introduced into the crop rotation on those lands which enjoy a perennial flow of water.

A review of the topography and of the main agricultural practices in vogue will lead to a better appreciation of the place which cotton can take in the life of the Arab population. Broadly speaking, cultivated lands in Mesopotamia may be divided into the unirrigated zone and the irrigated zone. The unirrigated zone is that belt of land stretching the whole length of the country from the Shatt-el-Arab to Asia Minor. This is the sub-montane tract which skirts the foot of the Pusht-i-kuh and Kurdistan Hills. It normally receives enough rain to grow successful crops of wheat. The common rotation is wheat followed by fallow.

It is with the irrigated zone that we are mostly concerned. Here the cultivation is more intensive, and as a natural consequence the population more dense than in the unirrigated parts. Irrigation water is applied to the land by one of the three methods, in the order of their importance: (a) By perennial gravitation canals; (b) by inundation canals; and (c) by mechanical lift.

It is the perennial canals constructed by engineers along prescribed gradients that comprise the major portion of the irrigated zone. The agricultural development and wealth of the country depend primarily on an extension of this system of irrigation. The chief areas which are now controlled by perennial irrigation are the Diala tract, the Feluja-Baghdad tract, the Hindia-Hillah tract, and the Amara tract. The Shatt-el-Arab date zone is included under inundation canals.

The inundation canals comprise the creeks which take the tidal flow along both banks of the Shatt-el-Arab; and, secondly, the series of flood-distributary channels along the whole course of the Euphrates and the Tigris from the points at which they enter the Mesopotamian Plain, at Ramadi and Sammarra respectively, to their junction at Kurnah.

The contour of the country lends itself readily to this latter use of flood water. Both rivers, from the points at which they enter the alluvial plain, have built up ridges of alluvium which are barely perceptible to the naked eye. During the flood season, in the absence of protective "bunds," the surrounding country becomes inundated. Travelling by river in the flood season in Lower Mesopotamia it is quite a common scene to see as far as the eye can reach continuous sheets of shallow water separated from the river on both banks by a relatively narrow strip of land which constitutes the ridge referred to.

Wherever the contour of the adjoining country lends itself to the practice the Arab endeavours to direct the flood inundation water on to his land. The flood season is normally between March and May each year. Seed is sown with the rains in winter from December to the end of January. The rainy season extends from December to April. On the alluvial plain these rains are seldom sufficient to mature a

cereal crop. But where flood water is available to give the crop at least one and generally two irrigations at the tail end of the rainy season a good crop of cereals can in normal years be secured. As the level of the river subsides these inundation canals cease to function, and as a result no summer crop is grown in the lands commanded by them. During the "slack season" which follows the harvest and threshing of the corn in June large numbers of cultivators migrate annually to the rice areas further downstream, where they are engaged in harvesting the rice crop. They return to their native villages in time to prepare the land for the subsequent winter crop of cereals.

Thus swings the pendulum in so far as the majority of these cultivators are concerned. Others of this class are engaged in tending and caring for the sheep flocks, and still others used to (and some of them still do) eke out a meagre and precarious existence by raiding and looting during these summer months.

These riverain Arabs who have hitherto depended almost entirely on the sparse rainfall and on flood water to grow their winter crop of cereals are now devoting more attention than ever before to the intensive cultivation of that strip of land nearest the river. A very conspicuous feature of this riverain tract is the rapidly increasing number of centrifugal pumps that are being installed since the war. This fact in itself is a positive indication that the Arab in general is satisfied that his property will under British administration be reasonably secure, despite "Nationalist" movements.

Much has been written about the Arab preferring the nomadic pastoral life to the sedentary life of the cultivator. In so far as the Arab of Mesopotamia is concerned this is at root a fallacy. He adopts the nomadic life only by sheer force of necessity. During the Turkish régime, when but little security was guaranteed to life or property, the Arab could continue to live only in virtue of his mobility, and his property remained his only in virtue of its not being "immovable." His innate pastoral habits, acquired from his forefathers in Arabia proper, coupled with the steppe vegetation of large tracts in Mesopotamia, ensured the investment of his wealth in live stock being reasonably secure, and certainly more so than in immovable property.

A signal proof of the validity of the contention that the Mesopotamian Arab is an agriculturist at heart, as distinguished from a pastoralist, is to be found in the readiness with which he settles down wherever he is supplied with a perennial flow of water with which to cultivate crops, and whenever there is a reasonable degree of security that he may reap what he sows.

The lands controlled by all the existing perennial canals in Mesopotamia are occupied by Arab cultivators to the extent of their full requirements of labour for the winter crop of cereals. And, except for the relatively small quantity of rice at the tail of both the Tigris and the Euphrates canals, these winter cereals of wheat and barley are the staple food crops, and the primary source of income to the cultivators. During the summer months the only crops of any importance that are cultivated are inferior millets and maize, vegetables, and some low-grade cotton for the local market. The economics of the agricultural practices now adopted on the greater part of the area commanded by these canals would appear to be radically unsound in so far as the rotation of crops is concerned. But, as is the case with practically all agricultural practices, there are, or at least were, sound reasons for their adoption. In the past Mesopotamia has grown crops, with the one notable exception of dates, to meet the local demand only. Exportable produce was not grown, mainly owing to the absence of facilities for transport and of security that the produce, in course of transit, would reach its destination.

(To be concluded.)

PALESTINE BRICK AND TILE FACTORY.

The Department of Commerce and Industry of the Government of Palestine has forwarded to the Department of Overseas Trade particulars regarding the Brick and Tile Factory "Silicate" which will shortly be registered in Palestine as a limited company with a capital of £E75,000. The head office and factory will be at Tel-Aviv, Jaffa. The company has been formed to manufacture building bricks, by a patent process, from compressed sand and lime, and roofing tiles from asbestos and cement. It is also proposed to manufacture asbestos cement sheets suitable for building purposes. Production is expected to commence about the end of July. It is estimated that a daily output of 40,000 bricks will be made, which quantity will be doubled, should the demand arise, by the adoption of two shifts instead of one.

Yugoslavia states that the management of the State tobacco monopoly of Yugoslavia has granted to sixty farmers of the district of Tselje a concession for the cultivation of 218,000 plants.

A notice has been issued by the Egyptian War Trade Department to the effect that exports to Russia are no longer subject to an export licence, except in respect of articles of which the export from Egypt is, or may hereafter be, specifically prohibited.

ENGINEERING.

(By Our Engineering Representative.)

The Marine Engine.

The existing coal situation has caused renewed attention to be given to such questions as the economy of using Diesel oil engines in marine work, of using producer gas in motor lorries, of annealing malleable iron castings in oil furnaces, and of raising steam in oil-fired boilers. As a matter of fact, the events of the past month have given a remarkable fillip to the motor ship movement, and so it is an ill wind that blows no one any good. According to my friend, Mr. Perman, who is one of the leading authorities on the subject, and who has been conducting a good deal of research work on behalf of the motor ship, the price of oil fuel suitable for use with Diesel's has dropped from £10 to £6 per ton at British ports, a figure on the basis of which contracts for three years' supply seem to have been entered into. From this it will be seen that the views of those who prophesy a coming oil famine are apparently not shared by all who have oil to sell. Incidentally, however, it is worth emphasising that the fuel bill of a motor ship bunkering at British ports is now approximately one-half that of a steamer.

The increasing popularity of the motor ship may be gauged from the fact that at the end of last March there were 16 per cent. more motor ships under construction in the various shipyards of Great Britain than there were at the close of 1920, and those interested in comparative statistics will find food for thought in the fact that during the same period the number of steam-driven vessels being built was reduced by 5 per cent. Amongst the more important orders for motor ships recently given are two which are worthy of note, one being for a cargo vessel of no less than 15,000 tons capacity, and the other for a big passenger liner, the Domala, being built for the British India Steam Navigation Co., for trading between London and Calcutta. There are at present four big passenger liners, fitted with Diesel engines, being built in this country.

Gas-Driven Cars.

It is generally admitted that the high price of petrol is materially affecting the extensive use and development of the motor vehicle and tractor. Indeed, the question of running costs has a direct bearing, not only upon the future prosperity of the motor industry, but also upon the selling price of all road-borne commodities. Economy of operation is imperative in this connection, and any and every practical effort to reduce running expenses without impairing the efficiency of the heavy motor vehicle is to be welcomed.

Many attempts have been made during the past few years to find a satisfactory substitute for petrol, but the only direction in which a practical solution has been reached is that of using coal gas obtained by means of a suction plant fixed upon the vehicle itself. The following is an extract from the report of a sub-committee of a standing committee on the Investigation of Fuel Prices issued last November:—

The use of portable gas producers should be extended, more particularly for transport lorries, agricultural machinery, and omnibuses. This form of power would appear to be immediately available, and opens up the most hopeful avenue of speedy relief. Hitherto research in the application of this form of fuel to motor vehicles has been more or less in the experimental stages, but a sound commercial application has now been made by the manufacturers of the "Parker" producer gas plant, and a series of carefully compiled records of 3-ton lorries under actual working conditions show that a saving of at least 75 per cent. can be effected in the operation costs of any type of commercial motor vehicle.

A 3-ton lorry fitted with a Parker installation will carry a full load at the same speed as with petrol for 100 miles on a consumption of 300 lbs. of coke costing 10s. 9d.—the coke being priced at the outside figure of £4 per ton. The same vehicle running on petrol and doing the same work would consume about 17 gallons, costing £2 11s. Thus, in a journey of 100 miles a saving in fuel costs of £2 0s. 3d. is effected. Several 3-ton lorries equipped with the plant have been in regular use for some time, in which the fuel costs work out at 1.32d. per mile and .35d. per net ton mile.

The principle of the producer gas plant may briefly be outlined as follows:—A stream of air and steam is drawn through glowing coke, anthracite, or other fuel, producing a highly combustible but impure gas. This gas is conveyed by pipes through a dust box, where it is relieved of all solid impurities, and thence it passes to another chamber, where it is bubbled through water and afterwards scrubbed by passing up through a grid containing moistened pebbles, thus eliminating all volatile constituents which might otherwise gum up the engine. Thence the gas is conveyed to the engine throttle, which takes the place of the orthodox carburettor.

The feature of the Parker plant apart from its simplicity is its compactness. It can be fitted to any existing commercial motor vehicle or farm tractor in such a manner as to occupy no space that in the ordinary way would be utilised for useful loads, nor does any part of the installation project beyond the body line of the vehicle.

The producer itself is constructed of mild steel plate, with welded joints, surmounted by a hopper of similar material from

which the fuel (coke) is fed into the fire-box. This latter is situated at the bottom of the producer, and is equipped with a special refractory lining made from a patented composition, which resists heat to such a remarkable extent that an oxy-acetylene blowpipe flame has no destructive effect upon it. The fire grid supporting the incandescent fuel is a steel casting, and a novel point about the arrangement is that the bottom portion of the grid forms a trough containing water, which is kept at a definite level by means of a float feed, the supply being received from the tank, which previously carried the petrol supply. This device not only prevents overheating of the fire grid, but also supplies the necessary steam to the producer. Thus one of the most important points which have in the past hampered progress in the adaptation of producer gas to motor vehicles—namely, the rapid destruction of parts due to high temperature—has been satisfactorily overcome. Excessive weight and bulk have both been eliminated by the employment of mild steel plating throughout, and by keeping the outside dimensions of the plant down to the lowest practicable limits. The additional weight of the plant amounts to only about 8 or 10 lb. per h.p.

In the Parker plant the air is admitted at the top of the producer, passes down a jacket between the outer wall and fire-resisting liner, and thence, mixed with the steam, passes up through the grate, and so generates the gas. It is then conveyed by a large suction-pipe to the top of the dust-box, where it passes under a baffle plate, and, emerging from the other end of the box, is carried to the rear of the chassis, where the scrubber is situated. From the scrubber it is taken along the rear side of the chassis to the engine. An air-valve is provided, by which the driver can regulate the mixture. The hopper, which is situated above the producer, contains enough coke to run the vehicle a distance of about fifty miles, and it is provided with a quickly detachable lid, so that it can be replenished with a minimum of trouble. A hand-operated blower, placed at the right side of the producer, is provided for starting, which process takes about eleven minutes from the time that the fire has been lit. Thereafter starting after the vehicle has been stopped is a matter of simplicity, just as in the case of an engine using liquid fuel.

Another important feature of the plant is that the whole of the firebox may be removed by simply undoing a few nuts, so that in the event of a liner burning out a spare can easily be fitted, as all the fireboxes are interchangeable. The burnt firebox can be refired at a cost of about £3, and can afterwards be carried as a spare.

The company is manufacturing Parker producers to the order of the Crown Agents for the Colonies. These plants use charcoal as a fuel, and this fact must be of immense value to our colonies, and in fact in many parts of the world where charcoal, or in other words, timber is available, and where, owing to distance from the sea, oil fuel is almost prohibitive in cost. The above-mentioned plants are for use on vehicles in Nigeria, where petrol at the present time costs something like 15s. per gallon. The saving here will be enormous, for there is obviously an unlimited supply of charcoal in the densely wooded tracts of the colonies. It is expected that the development of this plant in Central Africa alone will make possible the development of huge tracts of country which are eminently suited for mechanical cultivation, although at the moment this is unremunerative owing to the cost of petrol.

The great feature of the company's designs and patents is that they have been successful in evolving a design of producer which will produce gas under the varying loads inevitable in road transport in a plant weighing approximately 400 lb., whereas a stationary producer gas engine plant for the same horse power weighs about 6 tons. Producer gas is, of course, in no way novel—it is accepted as the cheapest form of power available for all stationary engine purposes, and most of the gas engines in this country are, in fact, run on producer gas.

It is interesting to note that in the near future one of the Parker producer gas plants will be in use for bus work, the British Automobile Traction Company having taken delivery of a set for this purpose. One large firm of hirers is contracting for 250 sets, and a well-known member of the motor trade has announced that he has booked orders for no fewer than 1,000 sets. Another big corporation has placed an order for 500 sets.

The Parker plant in its present form is the result of years of experiment, and its design and operation have been so simplified that a driver without previous experience can operate it by following the simple directions provided with each installation. It is fire-proof and fool-proof, and there are no mechanically operated parts to get out of order. It is fitted to any existing petrol vehicle or tractor at a total cost of £150, and in fuel saving will pay for itself in anything from three months to six months' running. As already stated, experience shows that with a 3-ton lorry a sum of £2 0s. 3d. can be saved on a day's

PERFUMERY and GOOD TOILET GOODS.

Keen Prices for High Quality. Enquiries solicited.

C. A. STOKES & CO., LTD.,
No. 21, "ECLIPSOL" WORKS, BRISTOL.

London Showroom: CITY PRESS CHAMBERS, 149, ALDERSGATE STREET, E.C.1.

run of 100 miles compared with the petrol-driven lorry. Assuming 200 working days per year, the fuel costs for a lorry fitted with a Parker plant would be £503 2s. 6d. less than those of a petrol vehicle of the same power and carrying capacity.

Motor Speeds.

My old friend, Mr. Harry Vane, the managing director of Messrs. D. Napier and Son, Ltd., of Acton Vale, writes me as follows:—"Having regard to the considerable interest created by a special racing car at Brooklands Track on Easter Monday, attaining a speed of 120 m.p.h., it is interesting to recall that in November, 1908—nearly 13 years ago—a six-cylinder Napier attained a speed of 119.34 m.p.h. On this occasion the car used was a standard six-cylinder Napier adapted for racing purposes. It is significant that after the intervention of over 12 years a car with a special engine for high-speed racing should only slightly improve on the performance of the old six-cylinder Napier. Napier's, as you know, have had their share of racing experience, and are now concentrating on the production of the famous 40-50 h.p. six-cylinder model, as well as 450 h.p. and 1,000 h.p. Napier aero engines, which have proved themselves, each in their particular sphere, the best in the world."

Artificial Lighting.

Few who have had any considerable practical experience in the lighting of factories and workshops will be disposed to agree with the somewhat academic remarks of *Engineering* in this connection. The journal said recently that, with all due regard to illuminating engineers, it does not look upon the adequate lighting of a factory as being other than a simple matter. It continued: "We admit that if one went to the average electric wiring contractor and told him to prepare a scheme to give a minimum horizontal illumination of .05 foot-candles (sic) at floor level in a workshop, and a minimum illumination at three feet from the ground of 5 foot-candles for work-benches and machines, he might be considerably at a loss. The reason for this, however, would not be that the problem was a difficult one, but that the wiring contractor did not know much about his own job." To put it plainly, this is not worthy of the paper which put forward the view. The argument, if such it can be called, shows that the problem, difficult to a wiring contractor, would be a simple one to an engineer. As a matter of fact, so it is—to the specialist or illuminating engineer. It would be harder for a general engineer or a chemical, mechanical, or hydraulic engineer than any problem arising in the ordinary course of his specialist work. Does the paper intend to imply that any and every kind of engineer has a specialist knowledge of electrical work, particularly scientific electric lighting? It is certain that *Engineering* would be the last paper in the world to make such a claim, so that all the argument amounts to is that the problem, which would be difficult to any other class of engineer, would be simple to an illuminating engineer. Which, so far as I understand it—and I have been engaged in factory and workshop lighting for a number of years—is exactly what the illuminating engineers claim. Engineers who have specialised in electric lighting work will, however, agree with the contention that the illumination of workshops and factories would receive more attention, and bad examples would be rectified if works engineers or others concerned would make use of a foot-candle meter as an every-day workshop instrument. The unaided eye is a very poor judge of illumination intensities, but if a practice is made of actually reading and recording the candle-power in every important part of a factory, remarkable variations will probably be discovered and a general improvement of the bad patches is likely to be undertaken.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—A firm tendency has generally been in evidence in the market. Currants have been a strong spot, and rates have advanced. The shortage of sultanas has had its effect on the prices of this commodity, which are now very high. Persian dates have come to business well at advancing rates.

Sugar.—Home refined has been in good demand at the official prices. West Indian crystallised has come to business at 58s. to 62s., while American granulated at 65s. 6d. has lost 1s. 6d.

Coffee.—The futures market has been unsteady. East Indian has been done at 128s., and bold greyish and greenish is quoted at 94s. to 113s. Costa Rica has been done at 123s. 6d., and Nairobi good bold greenish was sold at 123s. 6d. Quotations are:—May, 39s.; July, 40s.; September, 40s. 6d.; December, 41s. 6d.; March, 42s.

Oilseeds.—The market has been firm. Indian linseed at 16s. 6d. is 1s. 6d. down, but La Plata at 14s. 6d. is 3d. up. Rapeseed is firm, with Toria at 18s., bold Ferozepore at 17s., and brown Cawnpore at 15s., an increase of 6d. in each case. Egyptian cottonseed (black) is 3d. up at 12s. 6d.

Oils.—Linseed oil is firm at 26s. Rape oil is steady, with crude at 45s. Refined cotton oil is quoted at 40s., and the Egyptian crude variety at 32s. Turpentine has come to business at 72s.

CURRENT PRICES.

General Produce.—Bacon, 172s. 6d. cwt.; butter, 257s. cwt.; cheese, 140s. cwt.; chillies, 100s. cwt.; eggs, 17s. 9d. per 120; cloves (Zanzibar), 94d. lb.; cocoa (Ceylon, good to fine), 75s. cwt.; coffee (Costa Rica), 110s. 6d. cwt.; coffee (East India bold), 115s. 6d. cwt.; coffee (Mocha longberry), 92s. 6d. cwt.; coffee (Santos superior), 52s. 6d. cwt.; ginger (washed Cochin), 45s. cwt.; hams, 147s. 6d. cwt.; lard, 81s. cwt.; nutmegs (110's to 80's), 114d. lb.; pepper (Singapore black), 34d. lb.; pepper (Muntok white), 84d. lb.; raisins (Valencia), 115s. cwt.; currants (Vostizza), 76s. 6d. cwt.; sultanas (Smyrna), 145s. cwt.; sugar (granulated), 67s. 74d. cwt.; sugar (No. 1 cubes) 72s. 3d. cwt.; sugar (white Java), 65s. 6d. cwt.; sugar (West Indian crystallised), 62s. 6d. cwt.; sago (small pearl), 24s. 9d. cwt.; sago flour, 13s. 9d. cwt.; rice (Rangoon No. 2), 17s. 6d. cwt.; rice (bran, Rangoon), £5 15s. ton; tea (Indian), 6d. lb.; tea (Ceylon), 64d. lb.; tea (Java), 4d. lb.; wheat (Australian), 81s. 44d. qr.; wheat (English white), 90s. qr.; wheat (La Plata), 79s. 9d. qr.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 94d. lb.; citric, 2s. 44d. lb.; tartaric, 1s. 84d. lb.; ammonia (sulphate), £20 5s. 74d. ton; arsenic (white powdered), £47 10s. ton; benzole (standard), 2s. 114d. gallon; bleaching powder (35 per cent.), £20 10s. ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 133s. 6d. cwt.; Potassium: Bichromate, 104d. lb.; chlorate, 64d. lb.; caustic, £47 10s. ton; nitrate, £54 ton; permanganate, 1s. 104d. lb.; prussiate yellow, 1s. 4d. lb.; sulphate (90 per cent.), £27 10s. ton; Sodium: Crystals, 150s. ton; bicarbonate, £11 ton; bichromate, 74d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 43d. lb.; caustic (70 per cent.), £22 5s. ton; hyposulphite, £23 10s. ton; prussiate, 84d. lb.; nitrate, £19 15s. ton; glycerine (crude 80 per cent.), £105 ton; glycerine (industrial 125 per cent.), £155 ton; sulphate of copper, £33 10s. ton; sulphate of iron, 150s. ton; lemon oil, 3s. 3d. lb.; quinine, 3s. 54d. oz.; red lead, £38 10s. ton; white dry lead, £41 15s. ton; white ground lead, £52 ton.

Metals.—Aluminium, £150 ton; antimony (English regulus), £39 12s. 6d. ton; bismuth, 7s. 6d. lb.; copper (standard), £69 16s. 3d. ton; copper (electro), £72 10s. ton; gold bars, 104s. 9d. oz.; iron (No. 3 Cleveland), 120s. ton; hematite (mixed number), 180s. ton; galvanised sheets, £23 ton; lead (soft foreign), £20 18s. 9d. ton; manganese Poti, 1s. 44d. unit; molybdenite, 55s. unit; nickel, £195 ton; platinum, 340s. oz.; plumbago, £30 ton; quicksilver, £11 10s. bottle; silver bars, 35d. oz.; spelter (G.O.D.), £26 3s. 9d. ton; tin (standard), £167 17s. 6d. ton; tin plates (20 by 14), 27s. box; wolfram, 12s. 3d. unit; zinc sheets, £36 10s. ton.

Hides and Skins.—Ox and heifer (first), 90 lbs. and up, 7d. lb.; 80 to 89 lbs., 7d. lb.; 70 to 79 lbs., 74d. lb.; 60 to 69 lbs., 64d. lb.; 59 lbs. and under, 54d. lb.; (second), 90 lbs. and up, 5d. lb.; 80 to 89 lbs., 5d. lb.; 70 to 79 lbs., 5d. lb.; 60 to 69 lbs., 44d. lb.; 59 lbs. and under, 34d. lb. Cows (first), 60 lbs. and up, 44d. lb.; 59 lbs. and under, 44d. lb.; (second), 60 lbs. and up, 34d. lb.; 59 lbs. and under, 34d. lb. Bulls (first), 3d. lb.; bulls (second), 2d. lb. Casualty hides, 24d. lb. Kips (first), 34d. lb.; kips (second), 24d. lb.; kips (third), 2d. lb. Calcutta market. Prices in rupees per 20 lb. Arsenic hides (cows), Agrad, 5 to 11; Durbhangas, 4 to 5; Patnas, 3 to 4; salted cows, 2.8 to 5. Arsenic hides (buffalo), 2.8 to 6. Skins: Calf, 6 to 8 per 20 lbs.; goat, 150 to 180 per 100 pieces. The Bombay hide and skin market is dull.

Miscellaneous.—Cotton (American), 8.31d. lb.; linseed (La Plata), £14 2s. 6d. ton; rape (Toria), £17 5s. ton; soya beans, £11 10s. ton; palm kernels, £18 ton; Oils: Linseed, £24 15s. ton; soya, £30 ton; cotton (crude), £29 ton; olive, £87 10s. ton; ground nut, £35 ton; palm, £32 ton; rape (crude), £44 ton; petroleum, 2s. 34d. gallon; turpentine (American), 57s. 6d. cwt. Rubber: Plantation (No. 1 crepe), 11d. lb.; smoked sheet, 10d. lb.; fine hard Para, 104d. lb.

SUDAN PRODUCE.**Rainfall and Cultivation.**

The following are further extracts from the C.E.B. report for February:—

Halfa Province.—Most favourable reports have been received regarding all sagia and seluka crops throughout the Province during January.

Nuba Mountains Province.—Ushur boards have completed their work, and according to reports, crops have been very good. No definite figures have yet been received.

Dongola Province.—Reports received from all Mamurias state that Spanish sparrows are causing a good deal of damage to the ripening barley and wheat crops, particularly on Argo Island and in Kerma Basin. Shooting parties have been organised throughout the Province. The village of Baga has been included in the Ghaba pumping area, adding some 150 feddans to the site.

Mongalla Province.—3.4 millimetres of rain during January at Mongalla. It is unusual to have rain in this month. The total rainfall at Mongalla in 1920 was 1,128.5 mms. (45.1 inches), compared with 1919 901.6 mms. (36 inches), 1918 850 mms. (34 inches). The readings of the Nile gauge on the first and last days of the month were 11.15 and 11.3, compared with 11.60 and 11.48 in 1920.

Bahr el Ghazal Province.—The dredger Agrab arrived at Meshra on the 27th, having cut through several blocks 300 yards in length, and reports river in a very bad condition, and estimates another two months' work. Rainfall for month nil. The Jur river is half a metre higher than it was this month last year.

Berber Province.—Grain prices continue to fall, but comparatively high prices are still being obtained for sakia dura and red dura from the atmurs, as compared with the feterita from the South. Near Abu Hamed, at the beginning of January, wheat was doing well. At Bouga pumping station (Berber), the damira-dura has averaged nearly 4 ardebs (380 rottles), and the large area of winter crops, principally wheat, with a considerable amount of Egyptian beans and Fasulia, was looking well.

Red Sea Province.—Tokar had some light rain towards the end of February. Rains in Beni Amer Hills were good and grazing excellent.

Trade.

Nuba Mountains Province.—Trade is disappointing. This is mostly caused by the slump in prices for native produce. There is little demand from the North for dura, simsim, and ful sudani, all of which are abundant in the province.

White Nile Province.—General slump in trade here appears also to be due to lack of ready money. Owing to the high prices obtainable last year, practically everyone, including a great number of merchants, put most of their ready money into cultivation.

Labour.

Halfa Province.—The labour situation is easier, and the cost slightly down. Difficulty is anticipated when work on hospital is started.

Khartoum Province.—The harvesting of the rain crops during January has absorbed most of the labour available in the province.

Nuba Mountains Province.—Average daily wage is P.T.4, plus food. There has been no scarcity of labour this year. Streams of natives have been applying for work in Talodi, and although nearly 500 have found employment under the different building schemes going on, many have been turned away. Batches of men have been found for work at Malakal and with the Army transport in the south, also for wood cutting, etc. The cause of their desire to find work may be traced, at any rate as far as Eliri is concerned, to the slump in prices of ful sudani and simsim. Eliri natives made a speciality of these two items, and in the past few years have done very well. This year they find their products on their hands unless they are willing to part at a very much reduced rate. Many are holding up their produce in hopes of better prices later, and in the meantime have been forced to look for work to keep them in money.

Dongola Province.—It is estimated that one-third of the male population has left the Province for Tokar and Makwar. Average local wage is P.T.5 a day.

White Nile Province.—Labour is still very scarce, and what is available is absorbed locally.

Kordofan Province.—The average number of labourers employed during February was 120 in El Obeid and thirty at Um Ruaba, at 70 mms. per diem in both places.

Berber Province.—The labour situation is becoming more difficult, principally in the towns, and the rate is mostly P.T.10.8 per day. There is as yet no serious shortage for agricultural purposes, and both Zeideb and Shendi record an improvement now that rain crops are in.

Cattle Plague.

Outbreaks of minor importance have occurred in the Blue Nile, Fung, and Kordofan Provinces. The Berber and Khartoum Provinces were reported clear of the disease during the latter half of the month. A veterinary inspector visited the Upper Nile Province during the month, and proceeded to Kodok to investigate diseases in that district. Whilst there he was instructed to proceed to Taiba, in Renk district, to inquire into cattle disease reported to be existing there. On arrival he found few cattle and no signs of disease. The veterinary inspector in Mongalla Province reports that during a tour in Kajo-Kaji and the southern districts he found rinderpest. He states that the natives, as a rule, do not believe that rinderpest is a contagious disease, but the majority are very interested in any suggestions to prevent the spread of this disease.

LANCASHIRE COTTON.**Cheerful Tone Maintained.**

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

The tone of the market during the past week has maintained its cheerful aspect, but during the last few days there has been a falling off in business. Although this slackening off in trade is attributable to the continuation of the coal strike, many prominent traders are of the opinion that buyers have satisfied their immediate wants, for during the last three weeks there has been quite a big trade done in Lancashire goods. With regard to cloth, the principal outlet of the Near East has been Egypt, and, at the beginning of the week, fair lots were reported as having gone through. Buyers for the Levant and Constantinople have not been altogether idle, but trade has been difficult to arrange. A feature of interest has been the steadiness displayed in Egyptian cotton circles. With regard to the new crop the latest advices show that the growth is about 30 days late. Quotations for Egyptian yarns have not fluctuated to any great extent, and a steady offtake has been registered. Cloth buyers for India have been in evidence, and fair lots of dhooties and other light cloths have been booked for Calcutta, Karachi, and Bombay. Transactions have been difficult to arrange on account of buyers insisting upon the insertion of a strike clause in contracts. Reports from China are not at all favourable, and shippers are slow in raising rates. American spinnings have been in fair request, and prices have been well held. In export bundles a fair trade has been done in dyed sorts for India and in extra hards for the Levant and other Near Eastern outlets.

LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows under date April 28:—

Egyptian Spot.—Taking into account the adverse conditions under which spinners are working at the moment, the demand has been on quite a satisfactory scale, the sales for the week totalling 2,000 bales (including 20 bales Sudan), against 1,900 bales (including 60 bales Sudan) in our last report. The inquiry continues to run nearly exclusively on the medium grades of Sakel. Uppers have been rather neglected, whilst a small business is reported in both the brown and white varieties. Egypt shows more disposition to let cotton go when bids at anything approaching the market value are cabled out. The basis for Sakel cotton there has eased somewhat, no doubt on the prospects of the duty on the imports of staple cotton into America becoming law in the near future. Quotations show no change during the past week. F.G.F. Sakel, 17.75d.

ENQUIRY BUREAU.

Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.

Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."

ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.

No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.

Agents Wanted Abroad.

ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be re-directed to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

112. An Alexandria firm wish to enter into business relations with United Kingdom firms dealing in the following exports:—Beers and stout; salmon, sardines, tinned fruit and vegetables; coconut oil; gunny bags; pepper, rice, flour and soap.

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114.—Importer in Karaohi (India), travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

COMPANY MEETINGS.

AGRICULTURAL BANK OF EGYPT.

The report of the directors on the working of the bank for 1920-21, submitted to the shareholders at the eighteenth ordinary general meeting, held at the offices of the bank in Cairo on April 29, states:—

The directors have to report that the net profits of the bank for the financial year 1920-21, in accordance with Article 40 of the statutes, amount to £E447,395. 797. From this amount there has to be deducted: The service of the debentures, £E236,012. 489; the provision for the reserve fund, £E13,439. 221; the provision for the special reserve fund, as per Article 40 of the statutes, £E18,153. 636—£E267,605. 346, leaving £E179,790. 451; and there has to be further deducted: Dividend on £1,250,000 preferred shares, £E48,750; commission to the National Bank of Egypt, £E8,151. 011—£E56,901. 011, leaving £E122,889. 440, which is available for distribution as dividend on ordinary and deferred shares. The ordinary shares have to receive, in the first instance, dividend at the rate of 5 per cent. per annum, £E120,900. The balance of £E1,989. 440 is available to the extent of one-half, or £E994. 720 for the ordinary shares, and to the extent of one-half, or £E994. 720 for the deferred shares.

Ordinary Shares.

The amounts therefore available for dividend on these shares are as follows:—Balance from the year ending January 31, 1920, £E379,795. 055; interest for the year, accrued on the above balance, £E18,989. 753—£E398,784. 808; for dividend at the rate of 5 per cent. per annum, £E120,900; further amount available, £E994. 720; total, £E520,679. 528. The directors propose to pay a dividend at the rate of 8s. per annum for the financial year 1920-21, amounting to £E193,440, and to carry forward the balance of £E327,239. 528.

Deferred Shares.

The amounts available for dividend on these shares are as follows:—Balance from the year ending January 31, 1920, £E317,084. 423; interest for the year, accrued on the above balance, £E15,854. 221; total, £E332,938. 644; amount available as above, £E994. 720; total, £E333,935. 364. The directors propose to pay a dividend of £40 per share, amounting to £E78,000, and to carry forward the balance of £E255,935. 364.

As will be seen above, we recommend the maintenance of the same dividends as those paid during the three previous years. In order to do so it is necessary to draw on the balances carried forward to the credit of the ordinary and deferred shareholders' accounts. During the year under review a transfer was effected of £50,000 nominal of British Government 5 per cent. War Loan 1929-47 from the general investment account to the account of the general reserve fund; the loss on this realisation of a part of the general investments has been deducted from the profits of the year. The fund formed for depreciation on investments stands at the same amount as in the previous year, viz., £E245,000. The special reserve fund formed in accordance with Article 40 of the statutes now stands at £E78,640. The latter fund was instituted to build up a reserve against possible losses connected with the extended powers granted to the bank, permitting it to invest its surplus funds in securities approved by the Egyptian Government and to make loans guaranteed by such securities or by mortgage. The total depreciation on our Government securities amounts on January 31, 1921, to £E384,529, but we do not recommend making any further provision against this out of the profits of this year. As regards the Mortgage Company of Egypt, we can confirm the opinion we expressed last year that the shares we hold in this company are worth the sum at which they are shown in our balance-sheet. There has been lately a marked revival in demands to the company for loans at good rates; but as might be expected the settlement of instalments has been affected by the fall in price and the slow disposal of cotton. Further purchases of debentures of the company have been made at lower prices than the offer of 1919. For the year ending March 31, 1920, the dividend paid was 12 per cent., as compared with 8 per cent. in previous years.

Arrears.

On January 31, 1921, the total arrears outstanding were £E172,760, against £E83,724 on January 31, 1920. Of the sum of £E172,760 in arrear shown above, £E73,102 represent interest. No credit has been taken in the profit and loss account for any part of this sum, since, in accordance with the statutes, only interest actually encashed can be included in the profits. The whole of the remainder, viz., £E99,658, representing capital overdue, has, as required by the statutes, been deducted from the profit and loss account before arriving at the balance available for distribution. Consequently any encashments made on account of the sum of £E172,760 will go entirely to the profit of the year in which they are effected. Up to March 15 the encashments since February 1, 1921, on account of the arrears of £E172,760 amount to £E6,000.

The sums collected during the past year from the annual instalment due and from the arrears of past years are considerably less than the corresponding amounts of the previous year. £E434,758 were collected out of the annual instalment of £E572,726 and £E47,700 from the arrears, making a total collection as regards these two items of £E482,458. It was to be expected that the encashments for account of arrears would sensibly diminish in view of the greatly reduced amount of the arrears outstanding for collection during the year. As regards the annual instalment, the collections during the earlier part

of the year were proportionate to those of previous years, but the rapid fall in the price of cotton just when the year's crop was coming on the market caused a marked diminution in the payment of the instalment in the Delta, with the result of increasing the total of the arrears to be carried forward to the ensuing year.

There were many applications for new loans during the earlier part of the year, and this demand was greatly increased later, due in great part to the temporary difficulties in which certain cultivators found themselves owing to the fall in the price of cotton and the difficulty in selling it during the last few months of the year under consideration. There is reason to believe that this increased demand for credit will continue during the coming year, and we expect to increase our output considerably. The total of loans exceeding £E1,000 each was £E120,273 on January 31, 1921. Our arrears on these loans were £E10,227.

Land Acquired.

The reduction in the area of land acquired by the bank during the year and in the total land still held by the bank is chiefly due to the decreased number of expropriation cases in which it was necessary to sell up the land. The area of land which the bank found it necessary to acquire during 1920-21 was 80 feddans, as compared with 207 feddans in 1919-20, and we have sold 402 feddans as compared with 531 the previous year; our land holding has thus decreased by some 322 feddans. We hope to be able to sell gradually the 425 feddans remaining on our hands at satisfactory prices. The number of expropriations made by the bank during the year are as follows:—Number of cases in hand on February 1, 1920, 780; number of new cases begun during 1920-21, 513; total, 1,293; cases settled, 851; balance, 442; cases brought to expropriation, 40; balance pending on January 31, 1921, 402. In ten of these cases of expropriation sixty feddans were bought in by the bank, and in thirty-four remaining cases 198 feddans were bought in by third parties.

We have to report that Sir Frederick Rowlatt, having retired from the office of Governor of the National Bank of Egypt, has ceased to be president of our board, and his successor at the National Bank of Egypt, Mr. B. Hornsby, takes his place, in accordance with our statutes. We take this opportunity of expressing to Sir Frederick Rowlatt our great regret on losing him as a colleague and our appreciation of the valuable services he has rendered to the bank during the fifteen years of his presidency. The directors beg to thank the staff at head office and the agencies for their satisfactory work during the year.

IONIAN BANK.

The annual general meeting of the Ionian Bank, Ltd., was held on April 26 at the offices of the company, Basilidon House, Moorgate Street, E.C., Sir John Stavridi (the Chairman) presiding.

The Secretary (Mr. John Lindsey) read the notice convening the meeting and the report of the auditors.

The Chairman said that there had been a steady advance and expansion in the business of the bank during the past year, in spite of political and commercial difficulties and adverse circumstances in Greece and in Egypt during the period under review. The general result was all the more remarkable when it was borne in mind that banking competition in Greece was now very keen, and that, in such competition, the Ionian Bank was to some extent handicapped by its conservative instincts and traditions, by the fact that all speculative handling of exchange was rigorously forbidden by the directors, and that the bank's profits were and could only be made from sound genuine banking business and on unimpeachable lines of policy. In Greece commercial conditions during the year had been determined largely by those prevailing in Western Europe. The abnormal activity and expansion there during the first half of the year led to an unprecedented rush of imports into Greece. Under the pressure the exchanges naturally gave way. Then in the second half of the year a determined attempt was made officially in Western Europe and in America to stop further advance of prices and to produce deflation. The fall in prices which resulted in England and the United States had most serious consequences on Greek commerce. In addition to these adverse conditions, the bank's business had been affected by the unsettled political situation, which had necessitated the adoption of a more than usually cautious policy on the part of the management during the last two months of the year. Such policy inevitably led to an accumulation of unemployed funds. Last November, owing to the change of Government, the Powers refused to allow Greece to draw unused credits in England and France granted to the previous Government. This financial boycott placed Greece in a most difficult position. Should the campaign in Asia Minor be prolonged, as seemed more than probable, and should the Great Powers maintain the financial boycott, the country would soon be in such straits as might lead to disaster, notwithstanding the recent loan of 500,000,000 drachmæ by the National Bank of Greece.

The Position in Egypt.

In Egypt the commercial year had been a black one. The prosperity of the country turned entirely upon cotton, which, after a phenomenal rise, had a precipitous and disastrous fall. It hit badly not merely the fellahen growers and the middle men, but also several of the banks. The Ionian Bank, however, had not only come unscathed through the crisis, but had earned almost its normal profits, while at the end of the year every existing account was substantially covered by margin or collateral.

The balance-sheet was, as usual, drawn up at approximate rates, namely, drachmæ 25 and piastres tariff 97.50 per £. In view of the heavy depreciation in drachmæ, adjusting rates

were necessary with a bank such as this, whose funds and transactions were in different currencies, and these rates only actually affected the figures of the balance-sheet by the net balances which required to be adjusted. In their case these balances were very slight, and fully provided for under "other liabilities." There was an apparent falling off in the gross figures, which were now £11,554,590, against £11,977,230. This falling off was entirely in the "other liabilities" and "other assets" accounts, and they welcomed this reduction, as it meant a return to a more normal state of affairs. During the war these accounts were swollen considerably by contra and suspense items, which had to appear on both sides of the balance-sheet pending final settlement, and they hoped in future that they might possibly be able to reduce these figures still more. The reserve fund, if the report and accounts were adopted, would be increased to £130,000. Deposits and current accounts showed a healthy increase of over £500,000, and the fluctuation in "bills payable" and "contingent liability" (the latter this year nil) were accounted for by market conditions. Shareholders would notice the strong showing which the bank again made in available cash on hand and at call. In investments there was a falling off of £189,713, due to customers' requirements, which, however, in no way affected the general position of the bank. "Bills receivable" showed an increase, due to larger holdings in British Government Treasury Bills. The increase in "bills discounted" followed an increase last year, so that the amount of commercial bills held by the branches of the bank, which two years ago amounted to only £285,859, now showed the satisfactory figure of £1,564,962, all good-class banking and commercial trade paper. They had written down all the investments of the bank to market value or under, which naturally had materially reduced the profits. Since December 31, when the books were closed, there had been a steady and material appreciation in the value of securities, and if the accounts had closed now instead of on December 31 there would have been a very different showing in the profits. It had been decided to appoint Mr. J. Lindsey (the secretary) as chief inspector of the bank, with headquarters in London, as from May 1. Mr. R. H. Fry, the assistant secretary, becoming secretary. The Chairman concluded by moving the adoption of the report and accounts.

Mr. Warrington Laing seconded the motion, which was unanimously adopted, and a final dividend was declared of 3s. per share, with a bonus of 1s. per share, both free of income-tax.

Mr. G. S. S. Guthrie was re-elected a director. Messrs. Cooper Brothers and Co. were reappointed auditors, and a vote of thanks to the chairman, directors, and staff concluded the proceedings.

INDO-EUROPEAN TELEGRAPH.

The fifty-fourth ordinary general meeting of the Indo-European Telegraph Company, Ltd., was held on April 27 at 18, Old Broad Street, E.C., Mr. J. Herbert Tritton (the Chairman) presiding.

The Chairman said that while the directors' report was for 1920 the accounts presented were those for 1918, though they hoped before the end of the summer to present those for 1919. The main position with regard to the Russian assets remained as outlined at the last meeting, except that normal accretions of interest, etc., had slightly increased the item of Russian Government debts to £97,223.

Turning to the report, the year 1920 had been a year of disappointment for directors and shareholders alike. Since their last meeting trouble after trouble had supervened in Eastern Europe and in the Near East, and they had found it impossible to maintain their existing position in many sections of the line, their officials and staff having, in many instances, to be withdrawn. Complications in the Near East also extended to Persia, culminating in the threatened withdrawal of the British troops from that country and the enforced evacuation of the families of all telegraph and other officials resident in Persia. Their representative in Teheran remained at his post, and was doing all in his power in the interests of the company. The Persian Government, having surmounted their difficulties, would be in a position doubtless to further the re-establishment of this company's telegraph system transiting their country, which, meanwhile, was in a state of suspended animation, though the international importance of the route seemed greater than ever.

Now they came to an important section of the route—namely, that controlled by the Soviet Government. They had learned from the Moscow Government that, in principle, there was no objection whatever to the conclusion of an arrangement by which their line would transit that territory on its old ground. The directors had also reason to hope that where the influence of the Soviet Government might be needed in territory which might be described as more or less debatable ground, it would be exercised in favour of the company. They were once more encouraged to hope that all might, within a measurable space of time, be again well with them, and that reconstruction and consolidation might here be begun along their route. It was only in the Polish section that reconstruction over a considerable distance might have to be faced, and even there they were confident that by the utilisation of temporary links pending permanent reconstruction they would very quickly supply a workable line.

The Chairman concluded by moving the adoption of the accounts, the payment of a final dividend for the year 1920 of £1 2s. 6d. per share (making 7 per cent.) and the distribution out of the equalisation of dividends fund of 15s. per share, both free of income-tax and payable on May 2.

Mr. Charles Holland seconded the motion, which was carried unanimously.

INDIAN ELECTRIC SUPPLY.

The report of the Indian Electric Supply and Traction Co. for 1920 states that the surplus on working in Cawnpore was £34,959, plus transfer fees, interest, and discount on Treasury bills in England, making £40,557. London expenditure was £2,462, and after providing £3,113 for debenture interest profit is £34,981, plus £3,803 brought in, making £38,784. After placing to reserve for depreciation and renewals £6,000, to general reserve £6,500, to debenture issue expenses written off £2,500, to new share issue expenses written off £514, the directors recommend a final dividend of 7 per cent. (making 10 per cent.), carrying forward, subject to taxation, £5,074.

NATIONAL BANK OF EGYPT.

Position at January 31, 1921, published in conformity with Article 8 of the Statutes.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 23 amounted to £10,091.

Mr. Francis Alexander Johnston has been elected a director of the Bank of British West Africa.

The shareholders of the Banque Marmorosch Blank et Cie have sanctioned an increase of capital from 125,000,000 to 250,000,000 lei.

The South Indian Railway Company announces an interim dividend from surplus profits of 2 per cent., less tax, making 3½ per cent. for half-year.

An official film record of the Duke of Connaught's Indian tour will be seen at the principal cinemas towards the end of June. A large proportion of the pictures deal with the scenery, the products, and the industries of India.

The traffic receipts of the Egyptian Delta Light Railways for the week ended April 10 amounted to £E8,807; total for year, £E8,807. For the corresponding period of last year receipts amounted to £E11,880 and £E11,880 respectively.

THE GHARBIEH LAND CO., CAIRO.

The Ordinary General Meeting of the above Company will be held in Cairo on the 30th May, 1921. Shareholders wishing to be represented at that Meeting should lodge their Share Warrants with the Anglo-Egyptian Bank, Limited, 27, Clements Lane, E.C., not later than the 14th May.

THE AGRICULTURAL BANK OF EGYPT.

NOTICE IS HEREBY GIVEN that at a General Meeting of the above-named Company, held in Cairo on the 29th April, 1921, it was decided that a Dividend of 8½ per Share on the ORDINARY Shares of £5 each and £40 per Share on the DEFERRED Shares of £5 each, should be paid on and after the 5th May, 1921, at THE NATIONAL BANK OF EGYPT in Cairo, Alexandria and London (6 and 7, King William Street, E.C.4). Payment will be made in London less Income Tax. The said Dividends will be paid to the holders of Ordinary and Deferred Share Warrants to Bearer on presentation of the respective Dividend Coupons (ORDINARY No. 18, DEFERRED No. 17) at the above Banks. Forms for listing the above-mentioned Coupons will be supplied on application by the Bankers above mentioned. Coupons must be left with the Bankers for previous examination.

Cairo, 29th April, 1921.

By order,
B. HORNSBY, President.

MOTOR CARS IN SYRIA.

Before the war there were only fifteen motor-cars and two trucks in Beyrout district (says an American consular report). Now automobiles number 700 and trucks 105, in addition to the trucks used by the French Army of Occupation. The major part of the trucks were purchased from the British Armies of Occupation in Egypt and Palestine. Second-hand motor trucks of European and American make, of from two to four ton loading capacity, are also being exported from Europe. Owing to the fact that transport by railway is limited, slow, and expensive, and that there is a shortage of carriages and horses due to the war, there is an open field in Syria for motor vehicles. Generally speaking, Syria is hilly, even mountainous, and good hill-climbing machines should find a sale. The total mileage of all the roads in the territory under the jurisdiction of the consulate general is about 1,500 miles. Cars should be equipped with double and solid brakes, because of the sharp stops and numerous turns. Carriages should be high on the wheels, and the radiator should have a large surface for cooling. Furthermore, cars should have electric unmooring, and three speeds are desirable on account of the steep grades.

It is reported that the Tariff Commission of the Roumanian Ministry of Finance has been considering the question of a considerable reduction in the export tax on petroleum and allied products.

The production of the Anglo-Egyptian Oilfields for the week ended April 29 was 3,189 tons, as against 3,007 tons for the previous week.

THE GREEK DEBT.

The Council of Foreign Bondholders issues the following information, compiled from figures published by the International Financial Commission at Athens, with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to February 28 (new style January 14 to March 13, 1921):—

	Monopolies, tobacco, stamps, stamped paper, Naxos emery.	Piræus Customs.
Gross receipts Feb., 1921.....	Dr. 4,392,839	Dr. 3,952,981
Do. do. 1920.....	4,416,250	4,890,161
Estimated receipts for 2 months (Law of Control).....	4,816,666	1,783,333
Actual do. do 1921.....	9,833,067	8,469,506
" " " 1920.....	9,187,335	9,828,421
Difference between estimated & actual receipts for 2 months.....	1921 + 5,016,401	+ 6,686,173
	1920 + 4,370,669	+ 8,045,088

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper and Naxos Emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos Emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

SHIPPING INTELLIGENCE.

GREEK SHIPPING SINCE 1914.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, April 19.

The eminent economist, Professor Andreadis, published recently a very interesting article dealing with the development of the Greek mercantile marine since 1914. This, says the Professor, was in a flourishing condition prior to the European conflict. During the first two years of the war, when the submarine warfare had not reached large proportions and freights had greatly increased, Greek shipowners realised enormous profits which, after allowing for expenses, were estimated at about 385 million drachmæ. Three unforeseen events, however, practically neutralised these important war profits. These were: (1) The intense submarine warfare carried out by Germany from early in 1917; (2) the Allied blockade; and (3) the requisition of Greek shipping by the Allies.

Greece, having lost through enemy action 66 per cent. of her mercantile marine, was hit harder than any other Allied or neutral country. Even Norway had lost fewer ships, that country's losses being only 40 per cent. The Allied blockade during 1916-1917 was a great blow, but matters became still worse in February, 1917, when the mercantile fleet was requisitioned by Great Britain and France.

Up to the day of the Armistice the Hellenic mercantile marine had lost 299 ships out of a total of 455. Greece was thus left with only 156 boats! In other words, the boats which had escaped destruction did not even equal three-sevenths of Greece's entire fleet. Even Germany's losses, which amounted to 36 per cent., were inferior to those of Greece. The Central Powers had sunk in proportion more ships flying the Greek flag than of any other nationality.

In January, 1920, the number of sailing vessels was practically equal to the pre-war figures. The net tonnage available on that date was 106,000, representing 1,048 vessels, as against 107,460 tons on January 1, 1915. The tonnage of steamships on January 1, 1920, had reached four-fifths of its pre-war figures, viz., 451,000, as against 550,000 tons on January 1, 1915. This rapid recovery was due to the many purchases effected by the shipowners, who actually placed orders abroad on the day after the Armistice. In 1919 alone they had ordered or purchased 48 ships, representing 112,000 tons net. There has been a marked tendency to buy big ships.

The Venizelist Government, in order to assist and encourage the reconstruction of the national mercantile marine, introduced two Bills in connection with the taxation on war profits. The shipowner who had suffered loss, but who benefited by the difference between the cost price of the boat he had lost and the compensation he had received, was exempted from taxation. He had, however, to pay the tax in advance, this being returned to him on his undertaking (within a period of two years from the date of the signature of the Peace Treaty) to place orders for ships the value of which must be equal to at least double the amount already paid for tax. A second Bill exempted from taxation all shipping profits realised after 1918. Unfortunately, these two laws so beneficial to the mercantile marine were now in danger of being cancelled by the new Government.

Referring to the compensations allotted, M. Andreadis said that Greece was treated in a very unjust manner. He points out that countries such as Brazil, which had played but a very small part in the Great War, were compensated by many German ships, whereas countries like France and Greece which were badly hit have received practically nothing. There were 11 German boats interned in Greek

ports in 1914, but when in 1917 Greece became officially a belligerent, and proceeded to seize these ships, she discovered that this had already been done by the Allies in the autumn of 1916. Furthermore, the Allied Commission for Indemnities have decided to consider Greece as a belligerent from the day she officially declared war on the Central Powers, and not from the date on which war was declared by the Venizelist revolutionary Government at Salonika. This would mean that Greece will only be entitled to receive an indemnity for losses sustained from and after June, 1917, instead of from October, 1916.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia, for Bombay (Glasgow, May 18 and Liverpool, May 31).

Anchor-Brocklebank Line.—S.s. Mangalore, for Calcutta (Birkenhead, May 11); s.s. Matheran, for Port Said, Colombo, Madras and Calcutta (London, May 26); s.s. Masirah, for Calcutta (Birkenhead, May 28); s.s. Imani, for Port Said, Colombo, Madras and Calcutta (London, June 11).

Bibby Line.—S.s. Warwickshire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, May 11); s.s. Leicestershire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, May 25).

Clan Line.—S.s. Clan Chattan, for Bombay and Persian Gulf (Birkenhead, May 5); s.s. Clan Ogilvy, for Colombo, Madras and Calcutta (Birkenhead, May 5); s.s. Clan MacTaggart, for Colombo, Madras and Calcutta (Birkenhead, May 19).

Cunard Line.—S.s. River Orontes, for Gibraltar (Liverpool, May 5); s.s. Tyria, for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool and Manchester, May 26; Swansea, May 31); s.s. Brescia, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, June 1; Glasgow, June 6, and Swansea, June 8).

Ellerman Line.—A steamer will sail for Gibraltar, Malta, Syra, Smyrna, and Constantinople, on June 11 from Liverpool.

Ellerman "City" Line.—S.s. City of Manchester, for Calcutta (Birkenhead, May 16); s.s. City of Exeter, for Bombay and Karachi (Birkenhead, May 27); s.s. City of Bristol, for Calcutta (Birkenhead, May 30).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Mediterranean, Egypt and Levant ports.

Glen Line.—S.s. Glenshane, for Port Said, Port Swettenham, Singapore, etc. (London, May 19); s.s. Glenamoy, for Port Said, Port Swettenham, Singapore, etc. (London, June 2); s.s. Glenade, for Port Said, Port Swettenham, Singapore, etc. (London, June 16).

Harrison Line.—S.s. Architect, for Calcutta (Liverpool, May 5); s.s. Astronomer, for Calcutta (Liverpool, May 19); s.s. Orator, for Port Said, Port Sudan, Aden, Mombasa, etc. (Birkenhead, in May).

Henderson Line.—S.s. Bhamo, for Port Said and Rangoon (Birkenhead, May 18).

Holt Line.—S.s. Ixion, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 6, and Birkenhead, May 13); s.s. Lycaon, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 6, and Birkenhead, May 13); s.s. Polyphemus, for Port Said, Suez, Batavia, etc. (Birkenhead, May 6).

Johnston Line.—S.s. Aviemore, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, May 21); s.s.

Venice, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, June 11).

Maindy Line.—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, middle of May).

Papayanni Line.—S.s. Grodno, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, May 7); s.s. City of Palermo, for Malta and Alexandria (also taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, Cyprus, etc.) (Liverpool, May 13).

P. and O. Line.—S.s. Dongola, for Bombay (London, May 6); s.s. Kashgar, for Bombay (London, May 20); s.s. Nyanza, for Colombo, Madras, and Calcutta (also taking cargo for Malta, Port Said, and Aden) (London, May 20).

P. and O. British India Line.—S.s. Margha, for Colombo, Madras, and Calcutta (London, May 13); s.s. Gambada, for Bombay and Karachi (London, May 14); s.s. Manela, for Bombay and Karachi (London, May 28); s.s. Hatimura, for Colombo, Madras, and Calcutta (London, June 4).

Prince Line.—S.s. Glendhu, for Tunis, Malta, and Alexandria (also taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Latakia, Alexandretta, Mersina, and Cyprus ports, with option of transhipment at Alexandria) (Manchester, May 6).

YUGOSLAV MERCHANT FLEET.

Greater Serbia is preparing to have a merchant fleet of her own in conformity with her requirements now that she possesses a sea-board, says the *Journal of Commerce*. One of the first companies to be created is the Crao Shipping Line, with registered offices at Spalato, whose capital is 100 million dinars. A concern, which is to be called the Serbian Lloyd, is also to be formed in the port. The nucleus of its fleet will be twenty ships handed over by members of the Denikin forces now refugees in Turkish territory. Russians will in this way own the majority of the capital. At Ragusa similar plans are going forward with the assistance of British financiers. It is already settled that there is to be a regular Serbian service between this port and Great Britain.

SHIPPING AT THE PIRÆUS.

There were 513 arrivals of various steamers at the Piræus during March (O.S.) of the following nationalities:—Greek, 410; British, 32; Italian, 22; American, 10; French, 8; Inter-Allied, 7; Russian, 7; Roumanian, 6; German, 3; Dutch, 2; Swedish, 2; Japanese, 1; Belgian, 1; Egyptian, 1; Canadian, 1. The number of sailing vessels of various nationalities which entered the port during the month was 426.

LESS CONGESTION AT GALATZ.

Messrs. Watson and Yonell have issued the following communication, received from their Galatz house:—The dock organisation has considerably improved, and the masters of steamers express their satisfaction with the rate of discharge. The congestion having been worked down, goods can now much more easily be manipulated on the quay and in the warehouses, to the great satisfaction of consignees and others. The railways are removing goods stored at the docks at the rate of ten to fifteen trucks per day, destined for the interior, and much less time is lost in the transit of goods to destination, especially on the Galatz-Bucharest line.

The services of a representative of the P. and O. Banking Corporation are now available for the banking and monetary business of passengers on board the larger P. and O. passenger vessels at the time of embarkation in London or on arrival at Plymouth.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Drugs, etc.—Tenders are invited for the supply of drugs, etc., required for the period July 1, 1921, to March 31, 1922, by the Department of Public Health, Cairo. The articles required include various drugs and chemicals, surgical dressings, and various sundries, such as bottles, ointment pots, filter paper, etc., etc. Tenders will be received by the Director of Stores, Department of Public Health, Cairo, up till noon on May 10. (D.O.T.)

Coal Tar.—Tenders are invited for the supply of a thousand tons of coal tar to the Roads Office Tanzim Department, Cairo, to be delivered between July 1 and October 15. Alternative prices can be quoted for British Standard Specification No. 2, of any coal gas tar suitable for road spraying. May 15. (D.O.T.)

Saddles, etc.—The Egyptian War Department invites tenders for (1) saddles, No. 1, officers'; (2) brushes and brooms; (3) rugs, horse; tenders are due on May 12, and to remain open seven days; (4) cement, Portland, tenders are due on May 13, and to remain open seven days; (5) 1,000 yards of galvanised wire mosquito netting; tenders are due on May 18, and to remain open seven days. Samples of (1) and (3) may be seen, and particulars of (2), (4), and (5) obtained at the office of the Inspecting Engineer to the Egyptian Government, Queen Anne's Chambers, Westminster, S.W.1.

India.

Steel Bars, etc.—The Great Indian Peninsula Railway Company invite tenders for the supply of the following stores, namely:—Mild steel bars, sections, etc., stationery, etc., Sheffield tools, etc., brake beams for wagons. Specifications and prices of tender can be obtained from the company's offices, 48, Copthall Avenue, E.C.2, May 10.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on April 15 were as follows:—Agricultural Bank of Egypt, £4 19-32; Alexandria Water Co., Ltd., £6½; Anglo-American Nile Steam, £3; Associated Cotton Ginnings, £25-32; Banque d'Orient, Fr. 61; Behera Ord., £E8 9-16; Behera Priv., £E3 3-16; Bonded Stores, £10½; Brasseries d'Egypte Fr. 115; Building Lands of Egypt, £11-16; Cassa di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Egyptien, Fr. 590; Credit Foncier Fondateur, Fr. 7.700 ex; Credit Foncier 1886 Oblig., Frs. 328; Credit Foncier 1911 Oblig., Frs. 229½; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Cap., Fr. 73½; Eaux du Caire Jouissance, Fr. 99½; Egypt and Levant s.s. Ord., 27s. 9d.; Egyptian Delta Light Railways, £4½; Filature Nationale d'Egypte, £10½; Gabbari Lands, £2; Immeubles d'Egypte, Soc. An. des., £5 3-32; Khedivial Mail S.S. Co. Pref., £2½; Khedivial Mail S.S. Co. Ord., 110s.; Kom Ombo Ste. Ane. de Wadi, £4½; Kom. Ombo Ste. Fondateur, £35; Land Bank of Egypt, Parts de Fond., £35; Lots Turc. Fr. 45; Menzaleh Canal Navigation, Pt. 280 ex; Nungovich Hotels, £7½; Ramleh Railway, £1½; Salt and Soda, 27s. 9d.; Tram. d'Alexandrie Priv., Fr. 40; Tram d'Alexandrie Div., Fr. 55; Union Fonciere d'Egypte, £2 9-16; Egypt Hotels, £2 1-16; Urbaines et Rurales, £3.

NOTES OF THE WEEK.

"A Small Incident."

In enumerating the various matters that come up before the Cabinet Mr. Lloyd George in a public speech last Saturday described Asia Minor as a small incident, and in those words we probably have a measure of the attention now being paid to the Near Eastern problem. This neglect, if inevitable, is unfortunate, for the incident in question is not only keeping two peoples at war, but is also responsible, directly or indirectly, for unrest over a considerable portion of the continent of Asia. One danger in relegating the Turkish question to the background at this time is that the moderate element at Angora, which created a good impression at the London Conference, may be overborne by the extremists. Already the agreement with France would seem to have been shelved, and further fighting is reported in Cilicia. Bekir Sami Bey is still hopeful that the Powers will make a new treaty of peace with Turkey, but in the absence of any indication that he has definite ground for this hope, the Angora Government may decide that the Delegation was unduly optimistic and shape its policy accordingly.

Revising the Treaty of Sèvres.

In a letter to the Indian Moslem Delegation which came to England to express its views in regard to the revision of the Treaty of Sèvres, Mr. Montagu has thrown some light on the Allied Government's intentions towards Turkey. After premising that Turkey will be as free and independent as she was before the war, save for the limitation of armaments imposed upon her and the internationalisation of the Straits, the Secretary of State for India pointed out that "there is every reason to hope that Adrianople will have a special autonomous organisation to be determined by the Council of the League of Nations; that the rights of Moslems throughout Thrace will be recognised and respected by the provisions of the Treaty; and that steps will be taken to secure the demilitarisation of that part of Thrace which would threaten the new Turkish frontier."

A Basis of Settlement.

There is a distinct advance in Mr. Montagu's words on the attitude of the London Conference, which, while compelled to reconsider the question of Smyrna, refused to entertain any suggestions regarding Thrace. Very gradually the Allied Governments are beginning to realise the hopelessness of their first attempt to settle the Near Eastern question. From an autonomous

organisation for Adrianople and demilitarisation for that part of Thrace which would threaten the new Turkish frontier it should not prove a long way to autonomy for Macedonia and demilitarisation along all Balkan frontiers. If the latter is necessary in the interests of peace along Turkey's European frontier, it is required far more urgently along other boundary lines in South-Eastern Europe. Whatever authority can prescribe demilitarisation on one frontier will be equally able to enact it for all. Without some such demilitarised zone for a few years to come there will be no real peace in the Balkans. Already mutual recriminations are being bandied between Serbian and Bulgarian, Greek and Bulgarian, Albanian and Serbian, and it may only be a matter of time before even Greeks and Serbians are similarly embroiled. Allocation of blame is beside the point. There will always be friction so long as armed forces exist along the frontiers. Crude diseases often call for crude remedies. With demilitarised zones—the conception is the Allied Governments' own—and heavy economic penalties for any violation of foreign territory, all the States will be concerned to see that the peace is kept. But Macedonia must have autonomy as well.

A Trade Handicap.

In our leading article this week an appeal is made in the interests of British trade for the abolition of the Clearing Office system as applied to Bulgarian debts. It is not a question of remitting any of the indebtedness of Bulgaria or of her nationals, but merely a common-sense step for the benefit of British business houses, in view of the fact that our Allies have waived their right to establish Clearing Offices. There are sufficient handicaps to trade to-day, without superimposing those of a bureaucratic character. Where there are any cases in regard to which the chances of payment or compensation are held to be doubtful, enough machinery exists to enforce an equitable settlement, without penalising trade in general between this country and Bulgaria. There is, for instance, the question of the losses incurred by two enterprises founded by British capital at Varna and Yamboli, but there should be no reason why this or any other matter is not susceptible of a satisfactory solution without keeping out of circulation for trade purposes the money held in Great Britain by a number of Bulgarian traders. At the University of Sofia lectureships in a variety of foreign languages have been instituted; the lectureship in English is conspicuous by its absence. There may be no actual connection between the two circumstances; but unsuccessful application, it is understood, has been made for the liberation of a

sum of Bulgarian money (about £15,000) invested in England which was bequeathed some time ago to the University of Sofia. When international trade rivalry promises to be keen there is no need to weight the scales against our own people.

Rioting at Jaffa.

Jaffa has been the scene of rioting of a rather serious character, in which about forty people were killed and some 150 wounded. Although described by many papers as a "racial" struggle, it is quite clear that the trouble began in consequence of attempts by Communists to rouse up class hatred and to establish a Communist régime; but eventually it developed—as was inevitable in the circumstances—into a fight between Jews and Arabs. The first step in the business was an attempt, on May 1, by Jewish Communists, to break up a Labour meeting, and this was followed by fighting, in which most of the casualties reported seem to have occurred. Troops and armoured cars restored order, and on May 2 all was reported quiet. The next day there were further disturbances, and martial law was proclaimed. Thereafter Jaffa appears to have been quiet, and official reports state that "apart from small incidents no disturbances took place in Palestine" on May 6. The authorities have handled the situation firmly and wisely, and though disturbing reports are reaching the country regarding trouble at Nablous and elsewhere, it is to be hoped that the unrest will now die out. But it is unfortunate that Ramadan has to be faced just now, since that month is always trying to Moslem patience; and Sir Herbert Samuel and his assistants will doubtless be deeply thankful when it is over.

Zaghloul's Petulance.

The breach between the Egyptian Cabinet and Zaghloul Pasha is now complete. Our Cairo Correspondent in his letter this week gives some details of the events which led up to it; and since that letter was despatched Zaghloul has been busily widening the breach till there is not the remotest chance of anyone being able to close it in the near future. Happily, he has not thus far been able to carry the country with him, and his attempts to discredit Adly Pasha and the Government are meeting with scant success. They appear indeed to have cost him the adherence of several influential old followers and to have brought him no fresh recruits of any value. His declaration that he would now refuse to co-operate with the Government even if it agreed to all his demands can have done him no good, for it must have reminded even his warmest admirers of the "shan't play" of a spoilt child who is not allowed to take the leading part in a game upon which it has set its heart. The Government, on the other hand, has scored heavily. It has issued a statement setting forth its own point of view, controverting Zaghloul's statements to the effect that it has been putting pressure on the people to obtain an expression of confidence in itself, and declaring that, since he has made co-operation with him impossible, the Ministry will go forward with the negotiations without him. That is not only the courageous course to follow, but the only one likely to lead to any result; and if the Egyptians are wise they will now lend Adly Yeghen Pasha and his colleagues all the support they can.

The Mixed Courts in Egypt.

A little while ago the British Residency in Cairo asked the representatives in Egypt of the Capitulatory Powers to obtain the sanction of their Governments to the prolongation until November 1 of the existence of the Mixed Courts. Most of the Powers concerned very promptly agreed to the step proposed, but the United States' reply had not been received when, at the end of April, a Decree extending the period was signed by the Sultan and issued; and the United States were specifically excepted from the operations of the Decree. It will be remembered that there has been some question regarding the appointment of an American judge in the Mixed Court of Appeal, and that there has been a vacancy there for about six months. This not unnaturally gave rise to rumours that America was withholding her acquiescence in the further prolongation as a protest

against this state of affairs; and those who would fain see misunderstanding between America and Great Britain in Egypt began to feel hopeful. The hope has been very short-lived, however, for the United States have now notified their agreement, and American subjects in Egypt will again be able to claim legal rights in the Mixed Courts.

The Bombay Labour Department.

The mail papers contain the welcome announcement that Sir George Lloyd has set up a Department to deal with Labour questions in Bombay. The main object at the outset is to secure, and to publish, accurate information regarding the economic and social condition of the workers, topics of which the Indian public is at present hopelessly ignorant; arbitration will not be attempted just yet, but the services of the experts will be available for what is probably the more useful process of conciliation, and every one will share the hope expressed by the organiser that the Department will be instrumental in opening a new chapter in industrial progress in the Presidency, a chapter which may prove better reading than the old. If we might offer a suggestion to the experts, we should urge them to pay particular attention to the feelings and prejudices of that very elusive person, the worker's wife; she does not take a prominent part in industrial disputes, but she has immense influence over those who do, and unless the Department can be sure what she really wants, it cannot be in the best position to intervene with effect.

The Bengal Council.

When we referred a few weeks ago to the heavy reduction of the police Budget effected by the Bengal Legislative Council, we expressed the hope that the representatives of that eminently progressive Province would realise by next Budget time the necessity of giving their police a chance. We are glad to recognise that we did less than justice to the political aptitude of the members of the Council, for the matter was reopened in a later debate, in the course of which it was made fairly clear that a supplementary estimate covering the bulk of the reduction would receive favourable consideration; the Council in fact required only a week or so where we allowed a year, and, as Lord Ronaldshay observed in addressing the members, the fact that the initiative was taken by them is of the happiest augury for the future. Nobody supposed that the new Councils would at the outset avoid all the pitfalls in the path, but many observers feared that they would be slow to recognise that a mistake had been made. In this matter, as in so many others, Bengal has given the rest of the country a lead which is likely to prove most valuable in the future, and in many branches of administration other than that which is affected at the moment.

The Task of the Police.

At the same time it must unfortunately be admitted that the efficiency of the police is itself a matter of particular importance all over India. Such news as the cables have recently transmitted has related almost exclusively to outbreaks of violence in widely scattered areas, and the ordinary Englishman is probably forming the idea that India is in revolt. He is wrong, but all the same there can be no question that the lower classes are being tempted to forget the lesson they have been learning for the last century, the lesson that the law must be obeyed. The common feature of recent occurrences is simply mob law; the liberty of individuals is interfered with, the police are attacked when they try to do their duty, and their prisoners are rescued by force. These activities are, of course, not general, but they are far too numerous, and anyone can see that their extension would wreck the new Constitution, or any other which might be established in its place. The old tradition of lawlessness is still potent among many of the most active classes of the people, and the only possible safeguard is a progressive improvement in the efficiency of the police. It is primarily a question of money, and it would be an excellent thing for India if the landholders and capitalists, the people who stand to lose most, would come forward at this juncture and give the politicians a definite lead.

THE WEEK AT HOME.

LONDON, Monday Evening.

Coal.

No open move has been made to settle the coal strike during the week, and none seems definitely under consideration at the moment. It appears to have given the industry a rude shock to discover that the Government could be firm in its refusal to increase the subsidy; there is no doubt that coal owners and miners alike anticipated that they would be allowed to make good their deficiencies out of the taxpayer's pocket. The fact that any help is to be limited and temporary has proved disconcerting, and they are slowly digesting the portent. The end of reflection in this instance appears to be bitter.

Suggestions are now being put forward that the miners should ballot for or against a resumption of work on the modified terms. But this would mean the practical defeat of the Miners' Federation policy of a national pool, and the Federation does not appear ready to acknowledge defeat, although its funds must be running low. The miners themselves are living on credit, which their local shopkeepers, dependent on their custom, cannot refuse; but they must be running up heavy scores which will take a long time to pay off.

It is practically admitted that a better organisation of capital and improved machinery in the mines, combined with a better temper among the miners, would soon increase production, and put the industry on its legs again. But there are no signs of what we used to call "a change of heart" as yet apparent; the struggle is simply one of force against force. It is not a reassuring prospect.

A few more trains are knocked off day by day, and locomotives are obviously being run more slowly on main line trains to economise fuel. But, in spite of the reduced services, outside the suburban zone of London trains are not full; the conclusion is that the public is stopping at home whenever it can. It will soon have to go to bed earlier; some of the gas and electricity undertakings are notifying their customers that lights will be cut off at 9.30. As it is hardly necessary to light up until half-past eight, this does not allow much consumption of current.

The Railway Agreement.

There is at least one bright point in the industrial outlook. The railways are to be decontrolled in August, and some had feared that, as the decontrol of coal precipitated a strike, the same cause might precipitate similar consequences on the railways. It is true that neither the companies nor the men want a conflict, and the public abominates the idea, but sometimes these things happen in spite of that. A joint board has therefore been instituted to discuss the whole question of wages from time to time; its purpose might briefly be defined as being intended to obviate friction before it arises. Some of the old-fashioned shareholders and more autocratic managers may possibly object privately, but the idea has been widely approved, and there is little doubt that it will work satisfactorily. *O! si sic omnia.*

An Irish Truce?

A mediæval historian once expressed the opinion that the Irish question would be settled shortly before the Day of Judgment. One does not want to raise any fears of the approaching end of the world, but there are some indications that a truce may at last be on the road to discussion. A week or so ago the newspapers announced that Lord Derby had been in Ireland on a secret mission, and in disguise. Lord Derby is not an easy person to disguise, and his costume consisted in a pair of horn spectacles (in addition to, not subtracted from, his ordinary attire), but he took the name of "Mr. Edwards," he had the benevolent sympathy of the Prime Minister, and he had interviews with Sinn Feiners. Apparently nothing came of it, but the paragraphists and political note writers were fertile in speculations as to what might have happened.

Now, however, Sir James Craig, the first Premier of Ulster, has had an interview with Mr. de Valera. It is suggested that the interview took place at the suggestion of the new Irish Viceroy, but this is not confirmed. In any event, the interview took place. Neither side has made any statement as to what lines the conversation followed, but it is reasonable to suppose that the discussion was not entirely about the weather.

The air is full of talk about a settlement, Dominion Home Rule, and the usual constitutional paraphernalia. It would not be wise to build too great hopes on this incident, but its significance cannot be denied, and certain deductions may be made without improbability. It is admitted that there is a moderate and an extremist party among the Sinn Feiners. The extremists demand an Irish Republic, and nothing less; with them neither Ulster nor the British Government can come to any arrangement. But it has always been understood that the moderates would accept a good deal less—something not very different from Dominion Home Rule, towards which the existing Irish Home Rule Act is a long step forward. It is possible that this moderate section would not be averse from working the Southern Parliament recently instituted, for which elections are to take place in about a fortnight's time. At one time it was thought that these elections would be postponed on account of the gravity of the situation in the South, but it was announced a few days ago that the elections are certain to be held. As the British Government would hardly order them to go forward if they had not some grounds for believing that people would vote, it looks as though pretty definite information had been received that the Sinn Fein moderates will exercise the franchise, and that they are numerous enough to hold the extremists in check.

If they decide to work the Southern Parliament seriously, that may be the beginning of the end of the present difficulty, and the sign of a return to reason in Irish affairs. There is at least one indication that this may be so; for Sir James Craig, after his interview with Mr. de Valera, stated that when the two Irish Parliaments had been established and the Council of Ireland constituted the necessary link would be forged between Northern and Southern Ireland. It seems improbable that he would have looked so far ahead had the immediate situation been hopeless.

An Artistic Storm.

A sudden breeze has disturbed the respectable quiet of the Royal Academy of Art. For years past the Academy has been ridiculed by the critics and the younger artists as the abode of "official" art; new movements have knocked at the doors in vain for recognition, and exhibits were said to be almost standardised. This year, however, an agonised protest has come from Mr. F. O. Salisbury that a veritable typhoon of reform

has swept Burlington House. He is himself hung—or is it hanged?—but he complains that well-known artists who have been accepted without a murmur for an incredible number of years past have been rejected, while mere youths and flappers of fifteen and sixteen have been taken. Obviously, this means a serious loss in revenue and reputation to the older men.

A reply has been forthcoming: almost as many pictures as before have been hung; the rejections have been exaggerated, the novelties enlarged by rumour; youth has been served, but not too well, according to the apologists. But the real sting lies in the tail of the answer: more people have been to the Academy in the first week this year than ever, and if the rejected are dissatisfied, they are told to go and open an exhibition of their own elsewhere.

Bacteria at Beckenham.

The pathways of science are proverbially hard, but a novel difficulty has caused some little discussion and amusement this week. A farm and laboratory for the research and manufacture of anti-toxins and serums had to be set up, and, unfortunately, the promoters of the enterprise, who were scientifically (and no doubt morally) above reproach, pitched on Beckenham for their location. Beckenham is a quiet suburb near London, whose chief products are the top-hat and the perambulator; it sneers at Streatham and looks up to Chislehurst, and has every middle-class virtue.

But Beckenham was seriously perturbed. It had visions of guinea-pigs with scarlet fever, dogs with diphtheria, and donkeys with smallpox on the experimental farm; what if the donkey got loose and whisked its bacterial tail in the neighbourhood of the perambulator, or the diphtheritic dachshund bit the top-hat on its way to the station one morning? In vain the men of science have protested; Beckenham will have no bugs or beetles or bacterial farms to disturb its peace, and every other suburb is now suspicious of scientific farmers who grow diseases on cats and monkeys. We must have

our bottled bacteria, but apparently Beckenham will not have a private zoo at any price.

The Week's Books.

"Fijian Society" (Macmillan), by the Rev. W. Deane, is one of the best anthropological books I have seen for some time; it has illuminating discussions on ancestor worship, cannibalism, etc. The institution of taboo appears to have been taken over by Christianity from the Pagans, like some other Pagan ideas; at least, the author writes that in Fiji "the Bible becomes taboo and likewise the Sabbath Day, and both the Book and the Day are held in greater respect in Fiji than either in Europe or Australia."

"The Life of Whitelaw Reid" (Thornton Butterworth), by Royal Cortissoz, is a real contribution to international history. The book contains many of the shrewd impressions of Reid, as ambassador, of the statesmen and policies of Europe with which he was brought into contact, and much of his correspondence with Roosevelt is full of interest. Typical of the President is his remark to Reid on his action in the Morocco question: "In this Algeiras matter you will notice that while I was most suave and pleasant with the Emperor, yet when it became necessary at the end I stood him on his head with great decision." Reid early formed the opinion that the ex-Kaiser, for all his professions, was a standing danger to European peace, while King Edward he looked upon as its real mainstay. There are many piquant and revealing anecdotes about British politicians, which will be widely quoted.

Mr. Graham Wallas made his name on the L.C.C., and then wrote an admirable work on "Human Nature in Politics." His next book, "The Great Society," was perhaps not so successful, but his latest publication, "Our Social Heritage" (Allen and Unwin), is likely to find many readers. Mr. Wallas is not dogmatic, and he belongs to no particular school, but his pages are full of thought.

OCELLUS.

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE
NEAR AND MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

(From Our Own Correspondents.)

EGYPT.

CAIRO, April 30.

The Political Situation.

All hope of Zaghloul Pasha's joining with the Cabinet in its negotiations with the British Government disappeared on Monday last. That morning an interview had appeared in the *Ahram* in which Adly Pasha, replying to the statements made by Zaghloul Pasha two days before, sought to put the position of the Government clearly before the Egyptian public. He explained that Zaghloul Pasha's demand that the Sultan should issue a rescript stating the objects for which the negotiations were being undertaken was altogether unconstitutional, for that would be bringing His Highness into politics, and he considered that Zaghloul's requirements would be adequately met if the Cabinet addressed a letter to the Sultan setting forth in detail those objects. As regards Zaghloul Pasha's claim to the presidency and the selection of the majority of the members of the Official Delegation, Adly Pasha's reply followed closely on the lines of the explanation given in my last letter. He contested Zaghloul's claim that the president of such a delegation should have the right to stop the negotiations when he liked. Such power, he said, lay only with the delegation as a whole, and in his opinion it would be useless to send a delegation unless, first, they were all agreed on their objects, and, secondly, each member had an equal voice.

The decision of the Cabinet that it could not agree to Zaghloul's claim to the presidency of the Official Delegation or his demand for the rescript from the Sultan was conveyed to Zaghloul Pasha that afternoon by Rushdi Pasha. Evidently Zaghloul Pasha was so enraged at this refusal that he took the opportunity of a tea party given in his honour at Shubra in order to deliver a speech in which he declared that the Cabinet was a tool of the British Government, whose will alone it executed and to whom it owed its nomination, that it had deceived the nation and was therefore unworthy of its trust, and that he considered that his "Wafd" alone was qualified to represent, or to enjoy the confidence of, the nation. It was a most violent speech, undoubtedly intended to incite the country against the Cabinet—which it is instructive to note he had himself declared but a week or so previously, *i.e.*, before his claim to the presidency had been rejected, to be a body carrying out the will, and meriting the confidence, of the nation, with which it would be a pleasure to him to co-operate.

So far he has not achieved his object. On the contrary, the violence of his language and the uncalled-for nature of his attack threaten to rebound on his head, for everyone except the students and some of the extremist element now sees through his attitude, and certainly disapproves of the mud thrown at a Cabinet which consists of men who have done so much for their country. There are indeed unmistakable signs that the saner elements will rally in support of the Cabinet. Already five members of the Delegation have recorded in writing their disapproval of Zaghloul Pasha's attitude, and their view that the Cabinet should have the nation's full support although the Wafd should not collaborate with it. Another member—viz., Abdel Aziz Bey Fahmy—has already voiced similar views in a speech delivered to the Native Bar. Shaarawi Pasha, for some time Treasurer and a liberal contributor to the Wafd's funds, has resigned, and three other members have intimated that they consider that the Wafd should collaborate with the Cabinet and that the presidency of the Official Delegation should go to the Prime Minister.

The net result of these secessions is that Zaghloul Pasha alone remains of the members of the Wafd, who received the so-called mandate from the nation in 1919,

that only part of the members co-opted by him adhere to him, and that he has now to rely for support no longer on responsible elements in the population but on the students—and not all of them—and the irresponsible elements on whose fanatical and credulous minds he knows only too well how to play. The elements that really count for anything are in fact gravitating towards the Cabinet, which in undertaking negotiations on its own responsibility, as it intends to do, will have the full support of those elements; but while Zaghloul Pasha has been forsaken by the responsibly minded and decent Egyptians, the fact that his adherents are now mainly drawn from the irresponsible and fanatical classes may mean that we shall again have demonstrations and trouble. If this should be the case, then it will be patent to the world what a factor for agitation and discord Zaghloul Pasha is, for until he took the political movement in hand in 1919 we had no troubles of this sort, and until he returned at the beginning of the month the situation was in every respect most satisfactory and peace reigned in the land.

The High Commissioner in Alexandria.

The High Commissioner and Lady Allenby paid a special visit this week to Alexandria, where during their stay they were the guests of Mr. Richard Abdy. One of the objects of Lord Allenby's visit was to unveil and present to the French community a memorial to the French soldiers who, during the war, were buried in Alexandria.

Some little while back a committee was formed in Alexandria in order to collect funds for the execution of the general desire that had been expressed to erect a monument as a tribute to the gallant Frenchmen who had fallen in the great cause and as a recognition of the great kindness shown by the French Colony in Egypt to the British troops serving here. The necessary funds were collected without difficulty, and the memorial was entrusted to Mr. R. Erlanger, who designed it, and Mr. Stavro Mikhailidis, who carried out the work of erection. The memorial, which is erected on a site given by the Alexandria Municipality, consists of a broken column in yellow Calabrian marble, on one side of which is inscribed the following:—"In memory of French soldiers fallen during the great war and offered by members of the British Community to the French Colony to commemorate the glorious deeds of arms performed by the French Armies, 1914-1918"; and on the other sides are engraved the names of the 310 French soldiers buried in Alexandria. The unveiling ceremony was carried out with full military honours. Mr. Abdy opened the proceedings with a speech in which he explained the object of the memorial. He was followed by Lord Allenby, who paid a personal tribute to the gallantry of the French Army, and who at the conclusion of his speech unveiled the memorial. The Guard of Honour then presented arms, the "Last Post" was sounded to the accompaniment of the drums, and, after "reveillé" had been called, Monsieur Gaillard, the French Diplomatic Agent, and Monsieur Lebsohn, representing the French Colony, returned thanks for the generous act of the British Community.

Two Excellent Horticultural Shows.

While at Alexandria Lord and Lady Allenby attended the flower show, which her ladyship opened on the second day. The exhibition was generally conceded to be a great improvement on the one held last year, and, certainly, to judge by the quality of the exhibits and the number of the exhibitors the Alexandria Horticultural Society would appear to be doing very good and successful work.

An excellent rose show has also been held in Cairo at the Semiramis Hotel. In spite of the trying weather we have lately had, there was a fine array of blooms, particularly of the "Edouard Heust" variety, and in addition to roses there was an interesting exhibit of cut flowers grown from bulbs. The attendance was very good, and Lord and Lady Allenby found time to pay a visit before leaving for Alexandria.

YUGOSLAVIA.

ZAGREB, April 30.

The Constitution in Making.

The Constituent Assembly has shut its doors over the holidays, for this week is the Orthodox Easter, and most of the deputies are off to their constituencies, and the ministers on tours of inspection. The Yugoslav Assembly is probably one of the most picturesque in Europe. When a black-coated advocate from one of the main centres has finished his speech he will be followed by a stalwart peasant, in his practical and picturesque costume, perhaps from the Shumadia, the heart of Serbia, or by a short-sleeved Bosniak, or by a "Turk," or Mohammedan Bosnian, with perhaps a frock coat, and a turban. Here all the dialects of Yugoslav speech may be heard, from the Macedonian drawl, plentifully interspersed with Turkish, to the now almost purely Slav Croat, from which foreign, and especially German, words are now mercilessly banned. But the dialectical differences are no greater than those heard in different parts of Great Britain, except when Slovenes talk, for theirs is, indeed, a distinct language. But they can all understand each other, and most of the Slovenes who have been by now some time in politics have learnt to speak Serbo-Croat, or, at all events, largely to mix it with their own vintage.

One of the best speeches recently heard was from a Slovene peasant. There has always been a rivalry between the country folk and the townsmen. In Serbia the former contemptuously refer to the latter as "*jesvari*," from "*jezevi*," the Turkish word for a coffee-pot, as though they were constantly brewing those delicious little cups of coffee, while the townsmen retort by referring to the country folk as *dripts*, or bumpkins. But on this occasion a *dripts* scored. He made a moving appeal to the Assembly to throw aside party differences and, above all, to pass the Constitution. Union, he said, was the prime and fundamental essence: to retain it, we must have our Constitution; that once attained, they could squabble as much as they liked. His audience, one of the most critical imaginable, expected to hear a few village saws from this bronzed and stalwart figure, and were startled at his earnestness and his statesman-like views. His speech was, indeed, a contrast to that of Dr. Trumbitch, for he said that, much as he disliked many of the clauses in the draft, he would vote for the Constitution, as the prime necessity of the State.

Dr. Trumbitch's Views.

The speech of Dr. Trumbitch on the Constitution caused some sensation, not only on account of the universal respect which the author commands, but on account of the opinions expressed. It was remarkable, too, that it was begun in one week, and continued on the following Monday. Dr. Trumbitch pointed out that the three fundamental facts which could not be surmounted were: first, the Serbs are the most numerous, powerful, and politically experienced, and had made the greatest sacrifices for the cause of the union, and therefore nothing could be carried against their desires; secondly, that the country must have a constitution; and thirdly, that the country, from its birth, is essentially a monarchy under the Karageorge dynasty. He then proceeded to criticise all the draft constitutions that had been put forward, and demolished the idea of a federal system, since the country cannot be conveniently subdivided either upon an economic basis, or territorially, or ethnographically. He criticised very vigorously the draft as at present accepted by the

Government, chiefly on the grounds that it is no improvement on the old Serbian Constitution of thirty years ago, but mainly because the power of Parliament over the purse is not absolute. After stating some other points of objection, he surprised his hearers by saying that unless the Government met his suggestions, he would not be able to vote for the draft.

The speech has produced a feeling of disappointment, as Dr. Trumbitch has a deservedly high reputation for constructive statesmanship, of which the first tangible token was the Declaration of Corfu, and the latest was the Treaty of Rapallo, since when he has retired from the public, only appearing at the elections to be returned for his native constituency in Dalmatia, by a very large majority. Moreover, he enjoys the distinction of being the only independent non-party member in the House. It is noticed that his speech, however, is destructive rather than constructive: that he attacks all draft constitutions equally impartially; and that the only suggestion he can offer is a weak compromise, that the administration of the State be provisionally left grouped round the four leading centres of Belgrade, Zagreb, Liubliana and Serajevo.

The agreement with the Mohammedans of Bosnia has annoyed the Peasants' Party as well as the Socialists, and they have stated that they consider that they are no longer bound by their declaration of support provided that their demands are met. At the same time, they admit in principle that they will vote for the Constitution and support the Government.

Meanwhile, municipal elections in Slovenia are interesting as showing the present grouping, after the five months that have elapsed since the general election. Dr. Korshet's Clericals have got twenty-seven members, against the Social Democrats thirty-nine; the National Socialists get twenty-three, and the Communists ten, while the Democrats get forty-four, which shows that they are gaining ground, and are quite the strongest party in Slovenia.

"What's in a Name?"

One of the important details to be settled with the Constitution is the official name of the State. As is generally known, it is the Kingdom of the Serbs, Croats, and Slovenes, abbreviated usually to S.H.S., with the native form of Croat, that is Hrvats, although in British official documents it is always referred to, for some reason, as the *State*, instead of the *kingdom* of the S.H.S. This title, although rather clumsy, has the merit of mentioning the three branches of the people and so maintaining immemorial tradition. Most Serbs, especially the army, were in favour of the title of Greater Serbia, but out of deference to their Croat and Slovene brothers, this was not pressed. But in the new provinces, especially in the Croatian districts, there is a vigorous movement in favour of the title of Yugoslavia, which is now generally known in Europe, which they connect with their struggles for freedom. The Government is in receipt of shoals of telegrams pressing for the name of Yugoslavia, especially from Zagreb, Slovenia and Dalmatia; while Srem, the Voivodina and parts of Bosnia equally insistently press for S.H.S. Most of the political parties have agreed to the title of Yugoslavia, although some suggest a combination of the lot. The Radicals, however, jib at Yugoslavia, and the decision of the Democrats is awaited with interest. Probably S.H.S. will carry the day, and Yugoslavia be used as a convenient abbreviation.

ROUMANIA.

BUCHAREST, April 27.

Parliament.

During the past week the Agrarian Reform Bill for Transylvania has been passed by the Senate. In both Houses the measure for imposing a 50 per cent. duty on goods imported from Germany has been discussed at length. Objections were made on the one hand because it would raise the price to the consumer, and on the other because the tax could be evaded by shipping the goods through Belgium or Switzerland. After a strong speech in its favour, however, by M. Take Jonescu the measure was passed. The Budget has not yet come

before Parliament, but a monthly vote on account has been granted to bring certain of its measures into force as from April 1 this year.

The Parliamentary Session has been extended until May 28, with a break of a fortnight for the Easter vacation. Sunday, May 1, is the Roumanian Easter Sunday, and Government offices are all closed from April 28 to May 4.

Motor Buses for Bucharest.

A few months ago a limited company was formed, with the name Sardat and a capital of 3,000,000 lei, to be increased to 5,000,000 lei, which received a concession from the town authorities to run motor-buses in the Bucharest streets. Their appearance has been looked forward to with lively interest, as the few trams hitherto running have been notoriously insufficient and always hopelessly overcrowded. The inauguration of three of the motor-bus services took place last week. At the same time one or two of the horse tram services, unused since the war, were revived. The result was immediately felt on the electric trams, and it became possible to travel on them with comparative comfort, and even to find a seat occasionally. The Sardat company has acquired for its workshops a site of 4,500 sq. metres, on which the necessary buildings are being erected. The buses used are on the latest pattern adopted in Paris, and are divided into compartments of first and second class. The fares are 3 and 2 lei respectively for the whole course (e.g., St. George's Market to the Station), and 2 lei or 1.50 for any section of it. The electric tramway fare now is 1 lei for the whole route or any part of it. The buses are very comfortable, and strict orders have been issued that no more than the prescribed number of passengers must be admitted. Altogether Bucharest is congratulating itself on the introduction of an enterprise which is helping to restore its self-respect.

The New Taxes.

On Monday, April 25, at the request of the Press Association of Bucharest, M. Titulescu, the Minister of Finance, gave a lecture in the hall of the Fondation Carol on the new taxes introduced by his Budget. The Minister explained to a crowded audience why he favoured direct rather than indirect taxation. The latter, he said, affected labour, while the former affected capital. He claimed that his Budget included all the expenses of the Government, and said that he had introduced all the economies possible. In replying to a criticism that has been raised in the Press of certain parties against the large number of Ministers in the Government, he said that it was not the number of Ministers that mattered so much as the number of their staffs, and these have been reduced. He stated that most of the taxes were only old measures co-ordinated, systematised, and rendered equitable, and he appeared to convince his audience of the justice of the proposed measures on the whole.

Various.

It is reported that the Council of Ministers has authorised the Aviation Department of the Ministry of Communications to establish an aeroplane factory in Roumania to supply aeroplanes both to the military and civil aeroplane services.

In view of the anti-Roumanian movements which have recently been discovered in Transylvania among the Magyar communities, it has been officially announced that all correspondence with Hungary will be censored in Roumania as from April 20.

The rain has come at last. For several hours during each of the last three days it has rained steadily, though not very heavily. Good rains were reported in Bessarabia and other parts of the country last week.

BULGARIA.

SOFIA, April 27.

Illness of M. Stambolisky.

The one topic of conversation during the past week has been the illness of M. Stambolisky, the Prime Minister. Ever since he returned from his European tour in January he has been in poor health, and from the end of March until the middle of this month he was

suffering from a bad abscess. He had, however, so far recovered that last week he was able to get up and attend to his duties, and when I saw him for a few minutes ten days ago he seemed to be in excellent spirits. On the following day he complained of feeling unwell, and shortly afterwards the doctors attending him announced that he had influenza, which has since developed into broncho-pneumonia. For two or three days his condition was very serious, but he is now better, although it is not possible yet to say how long he will need to recuperate.

M. Dimitroff, Minister of the Interior, who is expected back to-morrow from Prague, will act as Prime Minister and Minister of War, whilst M. Dashkaloff has been nominated provisionally Minister of Foreign Affairs. Although the American Government has agreed to M. Dimitroff's going to Washington as Minister, it seems unlikely that he will do so, as he personally prefers to remain in his present position, and will probably seize the present situation as an opportunity of arranging for the nomination of another representative to the United States.

The Opposition parties have, of course, everything to gain and nothing to lose by the temporary withdrawal of the Prime Minister from the political arena, and they are endeavouring to see a way of turning the present situation to account. M. Draghieff, who may be styled an Agrarian Communist, is at present staying quietly at Stara-Zagora, but he is not likely to remain a passive spectator if any change occurs in the Cabinet, and it is to be feared that there may even be certain dissensions amongst the more influential members of the Cabinet regarding questions of internal policy.

All these troubles will not help Bulgaria in her somewhat critical financial and economic situation, and it cannot be too strongly insisted on that what is required is a strong and united Cabinet, which only the Agrarians can at present supply. The present Government undoubtedly has its faults. What Government has not? But while M. Stambolisky is at the helm it is at least one ship, with one helmsman.

Relations with Yugoslavia.

Relations between Bulgaria and Yugoslavia continue to be somewhat strained, and there has been some talk lately of Yugoslavia applying certain sanctions against this country, in the event of the cattle due under the Peace Treaty not being delivered on May 1 and the Law of Compulsory Labour not being abolished. The sanctions, which are as yet only shadowy in form, include the taking over of the Pernik Coal Mine, an act which would at once paralyse the whole of the commerce of Bulgaria.

In this connection it is interesting to note the interview that M. Rakitch, the Yugoslavian Minister here, recently accorded to a representative of the *Den*, a local daily. M. Rakitch said that Yugoslavia had no wish to take over Pernik, as the Bulgarians had already handed over the 50,000 tons of coal which is due from them on August 9 of each year, and that they were, in fact, proposing to begin sending next year's instalment now. The Minister also stated that Yugoslavia had no wish to remain on bad terms with Bulgaria, but that the Belgrade and Sofia Press was largely responsible for the present tension. He hoped that both countries would keep this point in view, and ended by saying that he would do all in his power to preserve friendly relations. The interview has made a considerable stir here, and will be of use in quieting the minds of the Bulgarians. The delivery of the cattle and other animals will, however, take place on Serbian territory, as the request of the Bulgarian Government that the delivery might take place on or about the frontier has been refused.

General News.

Next Sunday will be Easter Sunday here, and the traditional service will be held at midnight on Saturday in the Sveti Kral, at which the King, his Ministers, and the Corps Diplomatique are expected to attend.

The Inter-Allied Military Commission to fix the new Greco-Bulgarian frontier has now arrived here, and will shortly proceed to Philippopolis, which will be their headquarters during the summer. The Commission, on which Lieut.-Col. Allcard, R.A., is the British representative, spent four months in the autumn of last year on the frontier, but during the winter have been unable to carry on their work. As they have to delimit a frontier of, roughly, 300 miles, a third of which is entirely unmapped, it is estimated that they will be out here for at least another two years.

ASIA MINOR.

SMYRNA, April 23.

News has reached Smyrna to-day that a daring band of Kemalists have succeeded in blowing up the railway bridge at Iné, which is a station between Alashehir and Ushak. The engine of a train passing at the time was also blown up. This means that the Greek army defending Ushak is deprived of supplies by railway. The Greek military authorities in Smyrna have commandeered all horses and carts, as they evidently require these for their transport work now that the railway to Ushak has thus been cut by the Kemalists.

CYPRUS.

NICOSIA (Undated).

The Situation.

The incidents that arose out of the Greek Centenary celebrations have caused much excitement and talk, and, it is to be hoped, serious reflection on the part of the agitating element. The open defiance of Government orders is, of course, condemned by all sensible persons. It was clearly one of the consequences of the extreme toleration and lenient attitude of the Government towards the demonstrations, flag-waving, political speeches, etc., of many years past. Those who organised the forbidden processions did but follow the example of leaders who have long tried how far they could go in behaviour calculated to lead to disorder. In the Turkish community, which regarded the proceedings with complete composure, and perhaps a little derision, there was entire tranquillity and a consciousness of the futility of the proceedings as regards their real aims.

The Greeks in America.

The autocephalous Greek Church of Cyprus has never been long without its internal troubles. Even during the

British occupation it has been divided against itself for over ten years, over a somewhat undignified contest between two rival bishops who were candidates for the office of Archbishop: an antagonism which caused much heart-burning and a great social upheaval throughout the island. There is now some fear of another Church "scandal," which recalls the island discussion. The late Metropolitan of Athens, Meletios Metaxákis, who was for some years Bishop of Kition, in Cyprus, was dispossessed of his throne after the fall of M. Venizelos, and is now in New York. As a result, it is said, of consultation in England with the late Acting Œcumenical Patriarch, Dorotheos, Meletios has assumed the spiritual charge of all Orthodox Greeks in the United States. In an encyclical issued by him he asserts that, according to the Canons of the Holy Synod, it was by an unconstitutional act on the part of that body that he was deprived of his see, that he left Athens in compliance with the dictates of a higher power, and that it is by desire of the Church that he takes up the position now assumed. Meanwhile, however, the Hellenic Government has decided to despatch to America Germanos, Bishop of Lacedæmon, as Exarch, to take charge of the Greek Church in the States. Unless, therefore, Meletios—who, by the way, is one of the most distinguished and able prelates of the Eastern Orthodox Church, withdraws his claim or submits the matter to higher authority, there will be fresh ecclesiastical troubles ahead. The outcome is awaited with much interest in Cyprus.

It has been definitely decided that Jacobus, Bishop of Papho, is to be bishop of the newly created see of the Menoufieh district in Egypt, with residence at Tanta. He will act as representative of the Patriarch at Alexandria, and will shortly take up his new duties.

Population of Cyprus.

According to figures recently published, the island population at the end of 1920 was 315,219. The births during the year were 28.7 per 1,000. There has been a fair increase in the rate of births over deaths, and much is no doubt due to improved sanitation, new water supplies, increased medical attendance, measures against mosquitos, and a general improvement in all conditions of life both in towns and villages.

There has been some good rain, which has relieved the situation and done much good throughout the island.

Gold to the value of £245,000 was landed at Plymouth last week from India. The consignment, consisting of bars and sovereigns, was shipped from Liverpool yesterday for New York.

We have received the first report for 1919-1921 of the British Committee of the Russian Red Cross Fund in Great Britain. It contains a short history of the inception of the Fund, and particulars of its efforts, among other places, in Lemnos, Egypt, and Serbia.

It is almost certain, says a message from The Hague, that Lieutenant Goedhart, of the Dutch Navy, will be unable to carry out his plan of flying to the Dutch East Indies, owing to serious difficulties that have arisen in regard to the flight across Mesopotamia.

M. Drashkovitch, Serbian Minister of the Interior, while entering his car at Belgrade late at night last week, was fired at by an unknown person. The Minister, however, struck the weapon out of his assailant's hand with his umbrella. The stranger vanished in the darkness.

ST. GEORGE IN BULGARIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In the very interesting article of Miss Estelle Blyth on St. George in your number for April 21 there is no mention of his connection with the Bulgarians.

In the tenth century three noblemen of Ochrida, who assumed the names of Aaron and Moses and Ivan, of the family of Tsar Samuel, founded the monastery of Zograph, on Mount Athos. An ancient document of this institution claims relationship of the three brothers with the Emperor Justinian, said to have been a Slav, who founded the autocephalous church of Ochrida, as well as St. Sophia. They hesitated as to which would be the best saint to dedicate their foundation to. One preferred St. Nikolas, but another insisted on St. Clement of Ochrida. To settle their differences they prayed to God to decide the question. Then one night, when they went into their chapel to pray, in the words of the old chronicle: "Oh, wonder! they saw that on a prepared board there was formed the portrait of the Great Martyr, the Conqueror and Miracle-Worker, George." There was, therefore, no doubt as to whom the monastery was to be dedicated, and it was called "Zograph," from the Greek for portrait. But the authorities at Byzantium were incredulous, and sent a bishop to verify the miracle. This doubting Thomas said it was a most ordinary portrait, and to show his contempt stuck his finger through it. But the outraged saint held the finger firm, and the bishop was not allowed to withdraw it until he had admitted his sin and craved forgiveness. And to-day the monks show a hole in the picture as undoubted proof of the miracle. As to the fact of the hole, your Correspondent can testify. The life of St. George, describing his martyrdom and the foundation of the monastery, is described in a pamphlet in Bulgarian, published by the monks, entitled "The Life, Sufferings, and Miracles of the Great Martyr, Conqueror, and Miracle-Worker, Saint George," which also gives a detailed account of the miracles worked by him in the annals of the monastery, in which we read, among other things, how in 1714 the saint visited his wrath upon some Turkish villagers who had stolen the crops from the monk's estate by setting fire to his property in the night. This great miracle is described in a manuscript by the monk Yakov in 1785, and concludes with the pious words: "All who saw this fearful and terrible miracle praised All Gracious God and His champion, the Great Martyr, Conqueror, and Miracle-Worker, Saint George. Under his protection we are protected from the seen and unseen enemies. Amen!"—I am, etc.,

YOUR CORRESPONDENT IN YUGOSLAVIA.

"TRUTH ABOUT THE BALKANS."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—An article in the latest *Quarterly*, by Mr. H. C. Woods, "The Truth About the Balkans," to which you have already called attention, certainly repays study. The first three pages contain a masterly summary of the general situation and give in clear and precise language intelligible reasons for some post-war anomalies confronting us in those regions. The public is accustomed to rely on facts ascertained by the painstaking personal research of Mr. Woods, and to accept the sidelights he throws on events and consequences; but in his conscientious endeavour to be fair, he sometimes allows himself to be biased. For example, he is unduly concerned for the export trade of Bulgaria, owing to her lack of a direct exit on the Aegean, while he scarcely touches on the hardships of Serbia, deprived of her one viable means of communication with the Adriatic until she evolves a route and port on the coast of Dalmatia—an injustice that will hamper for decades her trade with Western Europe.

Again, he errs in maintaining that Albania was neutral in the late war, as the ferocity with which the Moslem tribes attacked, plundered, and murdered sections of the retiring Serbian army can scarcely be called neutrality. He forgets that Serbia is fully entitled to take precautionary measures against her hostile, savage neighbours, just as France seeks to protect herself against possible future encroachments on her territory. The withdrawal of Serbian troops from certain positions would mean the resumption of raids by the ever restless Albanians.—I am, etc.,

E. CHRISTITCH.

May 8, 1921.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

May 2.—Commander Kenworthy asked whether it was true that coercive measures were being taken by the authorities in Egypt to compel the people to affix their signatures to a declaration of confidence in the present Premier, and against Zaghoul Pasha, and whether steps would be taken to reassure the people of Egypt of the good faith of the British Government without any further delay. Mr. Harmsworth replied that he had no information which would justify in the smallest degree the suggestion contained in the first part of the question, and that for the rest, no reasonable person in Egypt entertained any doubt as to the good faith of the British Government.

Mr. Spoor asked whether there were any indications that the Yugoslavs intend to apply sanctions against Bulgaria, and whether the compulsory labour law remains in force; and whether any steps could be taken to prevent an outbreak of hostilities between Yugoslavia and Bulgaria. Mr. Harmsworth replied that the answer to the first part of the question was in the affirmative. The British Ambassador in Paris had been instructed to draw the attention of the Ambassadors' Conference to the situation which had arisen between Yugoslavia and Bulgaria, and to suggest that a friendly warning should be addressed to the former to the effect that no hostile action by them in respect of Bulgaria could be authorised. As regards the compulsory labour law in Bulgaria, the Inter-Allied Commission of Control is taking steps with a view to its repeal.

May 4.—In a return presented in reply to a question by Sir William Davison regarding the total number of casualties in the Great War, the following are given as the number of casualties suffered by Near Eastern countries:—

	Killed.	Wounded.
Turkey.....	300,000	570,000
Bulgaria.....	101,224	152,400
Greece.....	5,000	21,000
Serbia.....	127,535	133,148
India.....	61,398	70,859

In reply to Colonel Yate, who asked for an appreciation of the situation in Waziristan, Sir William Mitchell-Thompson replied that the Commander-in-Chief in India, who had just returned from a tour in Waziristan, stated that the activities of the recalcitrant sections of the Mahsuds and Waziris had considerably increased. They were now devoting their energies to destroying our convoys on every possible occasion, and had made several determined attacks on them, the latest of which, on April 23, resulted in the loss of one British officer killed, four wounded; two Indian officers killed, four wounded; two Indian other ranks killed and 26 wounded. Among the causes to which this recrudescence of warlike activity was attributed were the conditions dependent on the negotiations at Kabul and the approach of the hot weather.

May 5.—Lord Robert Cecil asked the Prime Minister whether the Permanent Mandates Commission of the League of Nations is now fully constituted; and, if not, who have accepted the invitation of the Council of the League to serve on the Commission. Mr. Balfour replied that on February 22, 1921, the Council decided to invite representatives of the following countries to become members of the Permanent Mandates Commission:—France (M. Beau), Spain, the United States (Governor Forbes), Portugal, Great Britain (Mr. Ormsby Gore), Belgium, Holland, Italy, and Japan. All these had accepted with the exception of Governor Forbes, who, having accepted an official mission from the Government of the United States, had been obliged to decline.

In reply to a question by Mr. Aubrey Herbert asking for information regarding the reports of attacks by Yugoslav troops upon Albanians in the district of Kossovo, Mr. Harmsworth stated that, according to information received from the British Minister in Belgrade, a certain number of families belonging to Komitajis who had failed to surrender after due warning had been grouped in internment camps at Nish and Kragujevats until work could be found for them. The reports of massacres of women and children which appeared almost daily in the local Turkish Press were not to be trusted.

Education in India.

The *Manchester Guardian* of April 29 contains an article on "National Education in India," written by a Bombay correspondent. The writer states that education is the root problem of India.

It is natural, but not quite fair, for the self expressive nations, who have sacrificed so much for their ideals of freedom or culture, to ask what efforts India has made to achieve national education. The answer is that she has done next to nothing. Her excuse is that she has never had a chance. Her bitterest complaint is that England has thrust down her throat a draught of poison producing slave mentality. The preposterousness of this assertion does not prevent India from believing it. She is uneasily aware that when England tried to develop indigenous education she could find nothing to develop. True, there were the "gurus," but the essence of that system was that the disciples must become members of the "guru's" households, and receive the impress of his personality by constant attendance on him, so the number that one "guru" could train must have been extremely limited. The training was for renunciation of the earth, not for its inheritance. The disciples dreamed of becoming anchorites, not citizens. In Burma the East India Company found something in the Buddhist monastic system which they could develop. In India they found nothing.

He then details the various attempts at national education which have sprung up with the growth of Nationalism, but these, he says, have either been unsuccessful, or derive so much help from the Government that they hardly count as expressions of Nationalist ideals.

There remains the almost frantic attempt now being made by Mr. Gandhi to establish national education. It is mainly a destructive campaign. Mr. Gandhi frankly does not care much what happens to the present generation of students so long as a demonstration is made against Western schemes of education. To boycott the existing schools, hit the prestige of the British, rouse Nationalist emotions in the young, these are his objectives rather than the spread of education. It is true that when the boycotting students asked what was to become of them Mr. Gandhi replied that schools would be opened for them, but he was plainly disappointed by the request. In his opinion, at a time of crisis like the present, no student should be thinking of his own career; he should be willing to sally forth into the countryside to do propaganda work for the Nationalist cause. Still, schools have been provided in many places for those weaker brethren who still care about their own future. In these every schoolboy and undergraduate is expected to spend two hours daily. A considerable number of students have entered these national schools, and the names of some well-known professors are found on the staffs. But as these professors are also ubiquitous agitators all over India, it is hard to believe that they get much work done in the colleges. The staffs are largely composed of voluntary teachers, who give what time they can spare from their own work, which is not exactly the best way to organise a school. There are, in fact, no funds from which to pay the teachers a living wage. It is not hard to see the rock on which the Non-Co-operators' scheme will suffer shipwreck.

Meantime, Mr. Gandhi's gallant but hare-brained attempt has had some good results. It has shown that Nationalism has other functions to perform than mere crabbing of the Government. It has constructive work to do. Mr. Gandhi has called on the Nationalists to act as well as talk. He has brought home to them that patriotism calls for self-denial. He has asked his fellow-countrymen to formulate their views on national education, to come down to facts, to decide which language is to be the *lingua franca* of India. He has proved that schools can be carried on without buildings, at least in India, and finally that everything turns on the pay of the teachers. All these are useful lessons for the country as a whole. Education is almost entirely under Indian control to-day. It is one of the transferred subjects. If India chooses she can change her national mentality, as Germany changed hers. She can educate her children to the old belief that life is a nightmare better ended than mended, or she can bring them into line with the other nations of the world and make her peculiar contribution to the world's needs. In any case, she is face to face with her biggest chance for hundreds of years.

Egyptian Moderates and Extremists.

The *Glasgow Herald* of April 30 contains an article upon "The Egyptian Crisis," which puts clearly the position of the different parties in Egypt. "The protagonist parties seem pretty equally divided, Adly Pasha being supported by some of the intelligentsia and by the prominent local Jewish families; Zaghlul by the students, fellahen, and labourers." But the whole question is one which the Egyptians themselves must settle:—

Though intimately concerned in the issue of the crisis, the British Government is not in a position to interfere effectively in what is primarily a domestic dissension. No doubt if the practice of intimidation by the Zaghlulites continues, and serious disturbance is threatened, proper measures will be taken for the maintenance of order. But the Egyptian Moderates must fight their own battle, and it is to be hoped that now, when something like open war has been declared between them and the Extremists, they will not allow themselves to be shouted down by their noisy opponents. A little strong self-assertion on their part will be of inestimable importance to the future of Egypt, since if the negotiations which culminated in

the Milner Agreement are now definitely broken off owing to Zaghlulite intractableness, months, if not years, may elapse before the pre-Reservations atmosphere can be recreated. Meanwhile the best hope of a peaceful solution lies partly in gradual realisation by the Egyptians as a nation of the sorry figure they are made to cut by the antics indulged in as the result of political differences which, as a clever and progressive people, they ought at least to make a semblance of trying to compose with some show of dignity and restraint. It is possible, too, that in the case of Zaghlul himself there may eventually be some sort of reaction, as there is beginning to be in that of the Indian extremist, Gandhi. Even the most fervid enthusiast among the Nationalist leader's supporters must in time come to perceive danger to national independence in such an arrogant assumption of authority as that with which Zaghlul has sought to overbear the existing constitutional government of his country.

Mesopotamia.

The *Daily Telegraph* of May 5 contains a last survey by Mr. Perceval Landon of Irak, which he believes could, properly handled, be developed into a community of much prosperity. And such development, he says, "it is our duty to guide, support, and supervise, not merely because of the vast potential service that Irak may render to less-favoured countries, but because the world looks with reason to us to justify ourselves in this matter."

The work that remains to be done is very great, as it is useless to lull ourselves to sleep with any illusion that the task is more than just begun. Equally impossible is it to pretend that the tutelage we are bound to provide for Mesopotamia is not set about with subtle difficulties that only consummate and sempiternal tact can hope to overcome. But in the whole strange history of the Empire there probably never was a case in which our essential quality as a guide and guard of races sorely in need of help has been so clearly challenged as in this trusteeship for another's sole advantage. The kernel of the whole matter is that we have it not in us to fail the men of Irak at this fateful passage in their history. But, in conclusion, this is a thing that must again be dwelt upon with all the earnestness of which I am capable. Every succeeding day has brought it home to me more clearly that in its present mood of division and natural mistrust of one another the people of Irak should still be nursed for a while longer into a better sense of, and a deeper wish for unity. As I have said, in the present time of waiting the desire of each community is not to have the present direct link with the British in the person of the High Commissioner weakened or even obscured by the votes of their neighbours in a substitute for the House of Commons, a desire which becomes more evident as time passes. That it may be overcome is a reasonable hope, but it seems to me that to challenge immediately in an untutored Arab race that self-restraint and even self-renunciation which alone makes representative Government possible is to make a future more difficult for them and for us than if, by continuing for a while the present policy, we yield to the deepest political instinct of the vast majority in Mesopotamia. We have, indeed, given an undertaking, and Irak would not prefer that its fulfilment should be put off for a while. There is no question but that the jarring sects and races of Irak, with their diversified interests, prejudices, geographical and industrial differences, would all be best pleased with a year's, or even two years', respite from the clash of party politicians, and the great bitterness certain to be thereby created.

AN ANCIENT MOSQUE LAMP.

A notable feature in the sale recently at Christie's of the late Morgan S. Williams's collection was a mid-fourteenth-century Arab glass mosque lamp, with six loop handles for suspension, the neck decorated with inscriptions from the Koran, and the bowl inscribed with the name of the Sultan Mohammad Ben Kalauon (died 1341). This lamp, which is 13 ins. high, was presented to the late owner by the Shah of Persia, and was now purchased by Messrs. Duveen at 2,500 guineas. The sale realised the unexpectedly high total of £45,307.

It is stated from Cairo that the United States has now signified its acquiescence in the half-year extension of the mandate for the mixed Courts in Egypt.

MUSICAL NOTES.

The Guild of Players and Singers.

This guild, which has the extremely laudable intention of making concert matters at once of commercial success and of increased artistic achievement, began its very notable series of experiments at the Steinway Hall on May 4. Its scheme is to bring on the same platform three or more artists, who are thus to share expenses and mutually to improve their knowledge of art. At this concert the chief performers were Mme. Lily Henkel at the pianoforte, Miss Grace Crawford, as singer, and the Pennington String Quartet. The virtues of the first two are well known, and there is need but to mention that Mme. Henkel played in Howells' "Comedy Suite for Clarinet and Pianoforte," and later in Fibich's placidly uninteresting quintet with much skill and quiet charm. Miss Crawford's artistry is a finished and beautifully zestful thing; in Bliss' "Rout" she was magnificent, and in some old Italian songs, which Bliss has arranged with string quartet accompaniment, her pure feeling was a joy. But she did not get to the bottom either of Bliss' delightful "Ragwort" or of Goossens' "Appeal," though for introducing "The Dandelion" of Bliss, which nursery rhyme is most cunningly set for voice and clarinet alone, she could be forgiven all. In the playing of the Pennington Quartet there was a surprisingly marked advance on their previous performances.

New Music.

The courage of Mr. Edward Clark in introducing new music to England is beyond all praise; and at his orchestral concerts he has set us thinking hard over such composers as Busoni, Schönberg, Bliss, and the notorious "Six" of Paris. Of the examples of these last Frenchmen (one of whom, however, is a gentle lady) which Mr. Clark brought to us, I find it impossible to write in measured terms; to me it seems incredible that they should be taken seriously (or, more accurately, should be considered) at all. Busoni's Concertino for clarinet and Schönberg's "Kammersinfonie" are another matter; here is deliberate, calculated music, whose essence it is extremely difficult on one hearing to appreciate. The Schönberg was particularly complex, with a preponderance in the wind instruments that was hard for ears accustomed to the prominence of what the modern school despises as "the caressing strings" to comprehend. The version of Bliss' "Rout," an hilariously spirited thing, which had been specially arranged for these concerts, was not so effective as the original version. We can now, after three concerts, estimate the value of Mr. Clark's conducting. It is obvious that he excels in the more modern and superficially complex works; his reading of Stravinsky's "Fire-Bird Suite," for instance, will not soon be forgotten. But in the older works, such as Mozart's "Haffner Serenade," he so lacks flexibility of rhythm that an undeserved monotony creeps into them. However, we are profoundly grateful to him and to his excellent body of musicians for infusing new spirit into our music.

Two Singers.

Not often do we find such promise in a singer's first song recital as was in that of Miss Ivy Philips at the Wigmore Hall on May 3. She has a very pure, rich voice, strong, yet well controlled. At present she is far better developed on the side of sustained tragedy than on the lighter, more graceful side, but there is little apparent reason why she should not become an all-round artist. Her choice of programme was neither ambitious nor too well chosen, her singing of four art ballads by her accompanist, Mr. Bryceson Treharne, being in particular a quite superfluous mistake. But there is no doubt of her musical sense, which, when it is united with a better judgment, should take her far.

Of Miss Calista Rogers, whose recital was at the Æolian Hall on May 4, there is not much to say that is new. Her songs were chosen with evidently sincere intention, but too many of them were cast in the grand, severe mould, and these needed the finest and subtlest gifts of treatment for the underlining of their differences. The attempt to do so of itself was creditable, but it cannot be said that Miss Rogers sustained a keen interest in her interpretations. It was, therefore, with all the more relief that we heard her turn from four serious Elizabethan songs and three dully honest settings by Winthrop Rogers of Walt Whitman to such delightful pictorial compositions as Pizzetti's music to the Greek folk-song "San Basilio." And how satisfying Miss Rogers can be when her voice is not unduly stretched was seen in Schubert's exquisite "Schlummerlied" and in Ireland's "I have twelve Oxen," both of which were full of dainty charm.

ANDANTE.

PERSONAL AND GENERAL.

TO-DAY.

May 12 (New Style).

April 29 (Old Style).

Ramadan 4, 1339 A.H. of the Moslem Calendar.

Ayar 4, 5681, of the Jewish Calendar.

Lord Colum Crichton-Stuart has returned to London.

Prince George Cantacuzène has arrived in Paris from Bucharest.

The Maharaja of Kapurthala, the Raja of Pudukota, and the Raja of Rajpipla are now in France.

Sir Rajendra and Lady Mookerjee have arrived from India, and are staying at Queen Anne's Mansions.

The anniversary meeting of the Royal Asiatic Society took place at 74, Grosvenor Street, W., on May 10.

Mrs. James Conchie and Miss Skerrett have returned from India, and have left for Castle Feddal, Perthshire.

The Maharani of Baroda has arrived at Claridge's Hotel from Paris with her son, Prince D. Gaekwar of Baroda.

M. Mavrocordato, the newly-appointed Roumanian Minister to Tokio, has arrived in London on his way to Japan.

Earl and Countess Curzon of Kedleston will entertain a house party for Whitsun, which will assemble to-morrow at Hackwood Park.

M. Vladimir Milanovitch, Secretary to the Legation of the Kingdom of Serbs, Croats, and Slovenes, has returned to London from Paris.

The marriage arranged between Mr. R. E. H. Crosbie, Palestine Civil Service, and Miss E. S. C. Muller will take place at All Saints', Kenley, on May 28.

Sir John and Lady Barran have left Sawley Hall, Ripon, for Palestine, on a visit to the High Commissioner. They expect to be home about the middle of June.

General Sir Herbert Vaughan Cox had the honour of being received by the King on May 5 upon relinquishing his appointment as Military Secretary, India Office.

Our Zagreb Correspondent writes (April 30):—Admiral Andrews, the American naval commandant at Spalato, has left in the cruiser Olympia. A farewell dinner was given in his honour before his departure.

Lord and Lady Plumer have arrived in England from Malta. The Governor is taking two months' leave, during which time the Lieutenant-Governor, Mr. W. C. P. Robertson, will administer the Government.

The Hon. Srinavasa Sastu, the representative of British India at the Imperial Cabinet, has arrived from India. The Maharao of Cutch, the representative of the Indian States, will arrive at the end of the month.

M. Boeresco, Roumanian Minister Plenipotentiary, by command of the King of Roumania, visited Cardinal Bourne on May 5, and offered the good wishes of His Majesty on the occasion of the Cardinal's silver jubilee.

Under the auspices of the Central Asian Society, at the Royal Society's Lecture Room, Burlington House, Piccadilly, W., on May 18, Mrs. Rosita Forbes will lecture on "The Senussi as a Factor in North African Development." The lecture will begin at 4.30 p.m.

A group of Jewish doctors in the United States, under the leadership of Dr. Nathan Ratnow, have decided to raise a fund of a million dollars for the purpose of setting up a medical faculty at the University of Jerusalem. The first fifty thousand dollars have already been collected.

The following official announcement, dated May 5, has been issued in Athens: Prince and Princess Christopher and the son of the Princess, Mr. Leeds, left to-day for Paris. The Crown Prince of Roumania and Princess Helen embarked on board the Carol on their return to Bucharest.

A marriage has been arranged, and will take place in June, between Charles Bertram Smales, Imperial Forest Service, Burma, son of Mr. and Mrs. Charles Smales, of

Whitby, Yorkshire, and Dorothy Margaret, eldest daughter of Mr. and Mrs. G. D. White, of Chartfield Avenue, Putney Hill, S.W.

The Calcutta dinner will be held at the Hotel Cecil on Tuesday, May 31. Mr. J. C. Shorrocks will preside, and the guest of the evening will be the Hon. Sir Arthur Lawley, G.C.S.I., etc. Applications for tickets (£1 1s.) should be made promptly to Mr. Walter Davies, "Downhurst," Castle Bar Road, Ealing.

Sir B. and Lady Mullick, Sir Stanley and Lady Reed, the Hon. Marion Best, from Bombay; Mr. R. H. Dun, Chief Justice of the Sudan, from Egypt; Sir B. and Lady Robertson, the Countess of Donoughmore, from Marseilles; Major-General Sir H. and Lady Guthrie Smith, and Mr. Yashida, of the Japanese Embassy, arrived at Plymouth last week by the P. and O. liner Kaiser-i-Hind.

A marriage has been arranged, and will shortly take place, between Colonel Walter Lambert, D.S.O., 29th Lancers (Indian Cavalry), only son of the late Sir John Lambert, K.C.I.E., and of Lady Lambert, and Mabel Janetta, widow of Sir Montague A. R. Cholmeley, fourth Baronet, Easton, Grantham, and eldest daughter of Mr. and Mrs. Montagu Waldo-Sibthorp, Canwick Hall, Lincoln.

On May 6, by command of the King, Major-General Sir John Hanbury-Williams, Marshal of the Diplomatic Corps, called upon the Persian Minister at the Legation, 47, Braham Gardens, and offered the King's congratulations to the Shah of Persia on the twenty-fourth anniversary of his birth. The full text of his Majesty's message was immediately telegraphed to the Shah. During the day cards were left on behalf of the Prime Minister, the Secretary of State for Foreign Affairs, the Lord Chamberlain, and Brigadier-General Sir Douglas F. R. Dawson, State Chamberlain. The Persian Minister in celebration of the event entertained at luncheon his Highness Nasserol-Mulk, ex-Regent, Mirza Hossein Khan Alai, Persian Minister in Madrid, Prince Mohamed Mirza, Prince Anowshiravan Mirza, Maghadam Khan (Counsellor of Legation), Fathollah Khan Noury, Mirza Issa Khan, Ebrakim Khan, and Gholam Hossein Khan.

Our Zagreb Correspondent writes (April 30):— It will be remembered that Count Karolyi, first ruler of Hungary after the flight of the King, and a prominent Socialist, fled to Italy, whence he was abruptly expelled on the grounds of alleged Bolshevik intrigues, and that no country would have the poor Count. Although a Magyar, and therefore by heredity unsympathetic to the Yugoslavs, in his despair he appealed to them. Permission was promptly granted for him to come into Yugoslavia and settle at Dubrovnik. It is now reported that he has addressed a letter of thanks to the Government for their hospitality, in which he says how happy he is, after the persecution he has suffered in various lands, at last to find himself comfortable and at peace in free and democratic Yugoslavia, which has the same aims as himself, namely, the prevention of any conceivable return of the Hapsburgs. Coming from a Magyar magnate and owner of great estates in Hungary, this is indeed strange reading.

APPOINTMENTS, ETC.

The Hon. W. Ormsby Gore has accepted an invitation to represent Great Britain on the Permanent Mandates Commission of the League of Nations.

Mr. C. C. Watson, I.C.S., C.I.C., Political Agent in Rajputana, has been appointed Acting Political A.D.C. to the Secretary of State for India, in succession to the late Lieut.-Colonel Sir James Dunlop-Smith.

OBITUARY.

The death is announced from Rome of Sir Henry Howard, who had served in the Diplomatic Service in Greece, and was formerly British Minister to the Holy See.

We regret to announce the death of Mr. T. M. Gibbon, C.I.E., which took place at Beddington, West Croydon, in his eighty-third year. Mr. Gibbon was a member of the Viceroy's Council in Lord Dufferin's viceroyalty, and was well known in tea and indigo circles in Eastern Bengal and Assam. He was also manager for many years of the Bettiah Raj.

Our Zagreb Correspondent writes (April 30):— I much regret to announce the unexpected and sudden death of

General Branko Yovanovitch, Minister of War. The late General commanded the cavalry division as far as Corfu, whence he went to France on sick leave. Since the union he has on three separate occasions been Minister of War, where he earned the respect of all who came into contact with him.

Colonel W. Carter Giffard, D.S.O., late of the 41st Welch Regiment, has died at Keswick. He served in Egypt in 1886, taking part in the Sudan-Suakim action at Gemerijah, being mentioned in despatches, and receiving the Egyptian medal with clasps, and the Medjidieh Khedive Star, 4th Class. He was wounded in the Karaga Expedition, 1897-99, and again mentioned in despatches, and received the medal with clasp and promoted to brevet rank of Lieutenant-Colonel.

Lieutenant-Colonel James A. Ezechiel, Royal Army Service Corps, died last week at the Ministry of Pensions Hospital, Ruskin Park. He first saw active service in the Afghan War of 1880, for which he was awarded the medal. He took part in the Burmese Expedition of 1886-8, was mentioned in despatches, and received the medal and two clasps. He also received the medal with clasp for the North-West Frontier Campaign of 1897-8, and was present at the actions of Sampaga and Arhanga and the operations in the Bara Valley in the Tirah Campaign of 1897, being again mentioned in despatches.

Major-General Sidney Mercer Renny, C.S.I., C.I.E., late Director-General of Ordnance, India, has died at Brighton, at the age of fifty-nine. Son of the late Major-General G. A. Renny, V.C., he had his first commission in July, 1880, and eight years later joined the Ordnance Department in India, serving first as Assistant-Superintendent of the gun-carriage factory, Fatehgarh, and afterwards at the foundry and shell factory at Cossipore. Subsequently, after a short engagement at the India Office, he became Inspector-General of Ordnance Factories in India, and was in 1906 appointed Director of Ordnance Factories, Woolwich. He became Director-General of Ordnance, India, in 1917. General Renny served in the Burmese Expedition of 1885-6.

NEWS IN BRIEF.

It is proposed to establish a Czecho-Slovak Legation in Athens. Sir Rabindranath Tagore has been invited to visit Czecho-Slovakia.

The new maritime code of Morocco was brought into force in the Commercial Court at Casablanca on May 7.

At a meeting of the British and Foreign Bible Society, held at Queen's Hall last week, it was stated that the revision of the Bulgarian Bible, begun before the war, had been completed, and that the printing had commenced.

According to a recent census the present population of Hungary, apart from the territory occupied by Yugoslavia, is 7,840,000. Budapest has a population of 1,184,000.

Our Yugoslavia Correspondent writes:—The former royal train of King Peter, which was commandeered by the enemy during the war and then reported discovered in Germany, appears to have been broken up. Parts of it have actually been found in different parts of Germany, in very bad condition, and one coach has just been identified in Bulgaria, where it has been employed as a movable lodging for General Zhekov.

THURSDAY, MAY 12, 1921.

AN ECONOMIC BOOMERANG.

During the war enemy property in the Allied countries was sequestrated as a matter of course, and in the Treaties of Peace it was stipulated that pecuniary obligations existing between Allied nationals and enemy nationals should be settled through the intervention of clearing offices. In view, however, of the difference in the world status of the four enemy States, it seems to have occurred to the Supreme Council that an arrangement which might be advisable in the case of Germany and Austria would not necessarily be imperative for Bulgaria and Turkey. Accordingly, in the Treaty of Sèvres, no mention was made of a Clearing Office for the settlement of Turkish debts; but the Allies reserved to themselves the right to deal as they thought fit with all Turkish property, rights, and interests in their respective countries, and to hold these against amounts due to their own nationals from Turkish nationals. In the Treaty of Neuilly provision was made for a Clearing Office, and Sections III. and IV., with their annexes, elaborate the details connected with the system. Some misgiving, however, seized the Supreme Council at the last moment, as Clause (c) of Article 176 stipulated that "the provisions of this Article and of the Annexe hereto shall not apply as between Bulgaria on the one hand and any one of the Allied and Associated Powers . . . on the other hand, unless within a period of one month from the deposit of the ratification of the present Treaty by the Power in question . . . notice to that effect is given to Bulgaria by the Government of such Allied or Associated Power." There is reason to believe that shortly after the Armistice, when the Treasury came to consider the question of Bulgarian indebtedness as far as British nationals were concerned, it was decided that the amounts involved on each side were not sufficient to warrant official machinery for collection and payment, and for a period payments of pre-war indebtedness were made without official intervention between Bulgarian and British nationals. Other counsels prevailed in Paris; the Clearing Office was established by the terms of the Treaty, and the British Government instituted a single department to deal with Austrian and Bulgarian debts, thus effectively delaying the liquidation of both.

The establishment of a Clearing Office can be justified on two grounds: first, that the sum total of Bulgarian money and property in Great Britain is considerable enough to make it desirable that it should be held against payment of any indemnity to which Bulgaria has rendered herself liable; and secondly, that there might be a tendency on the part of Bulgarian debtors to evade the payment of their obligations. In view of the decision attributed to the Treasury at the beginning of 1919 the first ground would not seem to hold

good, and with regard to the second it can be said that the experience of British merchants and manufacturers is against the existence of any such tendency. But there could be little or no objection to the Clearing Office system, if it had been enforced uniformly by the "Allies." What would seem to have taken place at the Paris Conference is that the British representatives were persuaded to agree to the enforcement of the system against Bulgaria at a time when our Allies had already made up their minds not to enforce it themselves. Certainly both Italy and France hastened to inform Bulgaria before the month stipulated by the Treaty had expired that they had no intention of setting up Clearing Offices or of impounding Bulgarian moneys or properties in their respective countries. The Bulgarians, indeed, could have had no misgivings on the subject, inasmuch as long before the Treaty of Neuilly was signed or even drafted commercial relations had been resumed by French and Italians under the auspices of so-called military missions, which left no doubt in the Bulgarian mind that no obstacles to trade would be met with in France or Italy. The United States, it is understood, have followed the lead of our Allies, with certain restrictions regarding two Bulgarian insurance companies doing business in America, which have to prove that no German, Austrian, or Hungarian capital is involved. Great Britain alone of the Allied Great Powers has deliberately placed obstacles in the way of the resumption of trade by her nationals with Bulgaria, and advantage has been taken of her example by our Balkan Allies to refuse to release any Bulgarian property within their territories as a penal measure against the late enemy.

We do not raise the question of the Clearing Office in the interests of Bulgaria, but solely from the point of view of British interests. The most superficial acquaintance with the course of events in the Balkans since the Armistice must satisfy anyone that France, Italy, and the United States have benefited, and designedly, from according to Bulgaria the preferential treatment that has been denied her by Great Britain. It stands to reason that it should be so. The first people in Bulgaria anxious to trade with Great Britain would be those who had so traded before the war, and who would be the most likely to have sums of money in this country. That money, whether owed or not, is still locked up. If the same firms have money similarly placed in the other Allied countries it will have been liberated a year ago or more for trade purposes; naturally, these firms will do business with France, Italy, or the United States, as the case may be, rather than with Great Britain, when they cannot tell what fate is in store for the money they hold in the latter. The result is seen in the impetus given since the war to French, Italian, and American trade in Bulgaria; French banking groups have taken a financial interest in a number of Bulgarian banks and industrial companies; an Italo-Bulgarian bank has been established in Sofia; business between the United States and Bulgaria since the war has been, as far as can be gathered, on a larger scale than before 1915. It is not claimed that the isolated enforcement by Great Britain of the Clearing House system under the Treaty of Neuilly is solely responsible for this condition of things, or for the backwardness of British capital and trade in interesting itself in Bulgaria; but at least the system will have prevented a certain amount of Bulgarian money from being spent on British goods. There is clearly no reason why Great Britain alone should establish a Clearing House, when her Allies are able to cite the waiving of their right as a claim on Bulgarian goodwill.

WATCHING WILD ANIMALS.

By A. P. Davis.

Scent versus Sight.

Observing wild animals in their haunts, especially in the glorious autumn weather and amid the magnificent scenery of the Himalayas, is always interesting and delightful. In a forest glade at from 6,000 ft. to 10,000 ft. altitude you may sit comfortably at the foot of a thick oak or a rhododendron tree, and if your clothes match the surroundings, and a few twigs of green stuff are cunningly planted around, any forest denizen may pass within a few yards and not notice you. I have viewed a pair of kakur (muntjac, or barking deer), buck and doe, at about 300 yards, and watched them slowly approach and walk past my ambush within twenty yards, the doe leading. How daintily these deerlets tread the ground, grazing here, browsing there, heads and necks moving with peculiar jerky motions, and though their colour is a bright golden bay, when one of them is standing still in the shade it is often difficult to make out the animal until a flick of its tail, which is white underneath, betrays it.

As in the case of all deer, their noses are very keen, and many times I have seen a doe kakur on coming to my trail turn quickly and lead the buck away. Often I have pointed this out to a native shikari, who, though he had spent his life in the jungles and killed a good many head of game with his old muzzle-loading rifle, was unable to believe that animals could wind human beings, or dogs wind game-birds. This man, and others, have frequently, when my setter has turned and stood game-birds from a path at my heel, drawn attention to the fact by saying: "Sahib, your dog is looking at something!"

I have then crouched down level with the dog and bidden the man do the same, asking him what he could see.

"Only bushes, or grass and rocks," as the case might be, he would reply.

"And the dog cannot see anything either," I would say; "but the wonderful nose Nature has given him enables him to smell game-birds as easily as you can smell a dead cow."

A herd of tahr (wild goats) is interesting to watch. A full-grown male in his winter coat, grey mane almost sweeping the ground, is a grand, jungly-looking beast. He believes in a plurality of wives, the more the merrier, and is ready to fight for them.

Late one November evening I watched, through binoculars at about 400 yards, a very fine old buck tahr drive a younger one away across a frightful precipice, and on returning to his harem dash at another amorous youngster, sending him flying in an opposite direction. This fine old patriarch was stalked and shot the following morning. His horns measured over 14 ins., and he was an enormously fat and heavy beast.

One October evening, while watching a herd of tahr feeding about 100 yards distant, I was waiting for the old buck to show himself, when a bear passed just below the tahr and came along a sheep-path a few yards below the bushes where my shikari and I were concealed. Presently the bear got our wind, stood up for a second, then gave a grunt and scuttled off into a thicket. The tahr had taken no notice of the bear until it grunted, when they became alarmed, and an old terhny (female) led them away over a rocky spur into a dense brake of dwarf bamboos. I caught just a glimpse of the shaggy mane and black hindquarters of the old "boss-buck" as he dived into cover in rear of his large family—about twenty.

Bear and Boar.

One January evening, while waiting in ambush for a large bear whose tracks were visible in a patch of snow, a very fine old boar walked by within ten yards of us. We had plenty of meat in camp, or I should have shot this boar. I thought, too, that the big bear might appear later. The pig winded us from about twenty yards, lifted his wicked-looking old head, gave a few grunts, and ambled leisurely away. The bear did not appear after all.

A "sunder" of pig are not uninteresting. One November morning, when out looking for game-birds, accompanied by my spaniel, I heard a loud squealing in a ravine some distance below. I called "Nell" to heel, took out my shot cartridges, and reloaded with spherical bullets. Farther

down I saw a good place for watching from, and was soon concealed among some thin bushes. The squealing broke out again, quite near, and from my side of the ravine I watched seventeen pig walking slowly in single file along the steep pine-clad slope opposite. The leader was a huge boar, and just behind him was another, rather smaller, the one which was squealing so hideously. He had evidently been punished, but more was coming. The leading pig suddenly turned and charged the noisy one, catching him just amidships, and sending him rolling down the slope and very nearly into the stream. The cowed brute picked himself up, and struggled back to the rearmost place. Meanwhile the big leader and two or three others emerged from some scrub and boulders immediately opposite my ambush, and stood under an overhanging rock about forty yards from me. I shot the big boar, which toppled over, grunting fiercely, and fell with a loud splash into a deep pool, and with my left barrel hit another boar, which made off into some oak scrub. I waded the stream, followed the blood trail, and finished the beast off with a bullet in its shoulder. The big boar had meanwhile sunk in water five or six feet deep, from which my men had considerable difficulty in getting him out: a huge, heavy brute, with long tusks.

"Small Fry"—and Big.

One March evening while watching in open, park-like, forest for a big sambur stag, which I knew to be about, a hind, followed by a young stag, appeared within 50 yards. My shikari, intent on venison, tried to persuade me that this, a stag with horns about two feet long, was the fine animal I was expecting. I smiled, and proceeded to make tiger-like noises, as I wished to make the deer move away without stampeding them. The young stag stamped a fore foot, shook his head, and tried to look dignified, while the hind seemed much alarmed. After a few minutes the hind turned and walked away, followed by the young stag, much to the shikari's disappointment.

On an evening in November I sat on a log among some bushes to watch for a kakur buck, these small deer being excellent eating, when a sambur hind and calf, followed by a splendid stag, came ambling along almost in my direction. I waited till the stag was within about forty yards, and bagged him with an old "Henry".450, 4 drams of black powder, and a solid bullet of pure lead. His horns, which measured 38 ins., were massive, and with a good spread. I had often seen the tracks of this stag, and marks of where he had rubbed his horns on young conifer trees, but never expected to bag him so easily.

A herd of burrel (wild sheep) is always interesting to watch, and often you have to observe them for some hours until they move off to where they may be stalked. It may be bitterly cold, too, as these wideawake animals live on the open moors and crags well above the timber line. I bagged my first burrel in December, 1894, after a long watch and long stalk, at about 14,000 feet above sea level.

Ewes as Sentinels.

Usually a burrel ewe acts as sentinel, but in June, July and August several old rams often herd together, and at these times a ram is as reliable a sentinel as a ewe. Once, while stalking a herd of twenty rams, I saw one of them suddenly leave the others and hasten a hundred yards or so down a grassy slope to a rock, where he lay down, watchful, for over an hour. The old fellow sensed some danger, and remained on duty till it had passed. There was another danger, though, in the shape of a .360 double cordite express, and about two hours later the old sentinel and two other fine old rams became trophies of the chase. Their heads, with arching horns from 22 ins. to 25 ins. round the curve, look well mounted on shields.

I once watched a single ewe scouting in front of four rams. Fresh grass was sprouting luxuriantly after the rapidly melting snow, and until the ewe lay down the rams would advance no further up the nullah. When they grazed up level the ewe moved on slowly, the rams waiting till she lay down, evidently the "all clear" signal. My two shikaris and I were reclining among some rocks in full view of the wild sheep, and we kept almost as still as the rocks themselves. At last, after an exciting watch, the little herd arrived within 150 yards of us, across a small snow-fed stream; and with my .360 I took down the two best rams.

BY APPOINTMENT.

PURE SCOTCH

Both tahr and burrel sentinels will usually, before moving on with the herd to the far side of a spur, return to have a final look, so it is unwise for the sahib and his shikari to advance across the open until the sentry disappears for the second time.

A herd of ten or more goral (so-called Himalayan chamois), perhaps as many as twenty, may frequently be viewed grazing on a slope where fresh grass has sprouted; but, on being alarmed, the herd will often split up into twos, threes, and singles, making off over precipitous ground in different directions. Sometimes a sharp whistle will cause one of them to halt and look around, giving time for a quick, well-aimed shot. At these times the preference for a well-balanced double-barrel rifle to a single, or magazine, is noticeable. Given a broad, shallow backsight, not too near one's eye, and a fairly large ivory-tipped foresight, my experience is that one can get on to an object more rapidly than along the narrow incline of a single. An accurate well-finished double rifle, of British make, is a beautiful weapon and usually worth the price charged for it.

The Maternal Instinct.

One October evening I noticed a goral behaving in a strange manner. My binoculars showed the animal to have a kid with her, and the two were standing on a narrow flat-topped rock, up and around which a pair of pine martens were manoeuvring. The mother goral kept turning round, stamping, and lowering her head, the kid keeping close behind her. I watched for a few minutes and then decided to try to stalk within gunshot of the martens. By taking advantage of trees, rocks, and scrub, old Ram Singh and I managed to approach within forty yards, and giving the shikari my rifle in exchange for my shotgun, I bagged the two martens, right and left, with No. 6 shot. The gorals jumped off the rock and fled. The pine martens would certainly have killed the kid, perhaps the mother, too.

It is curious to note how often an animal on being alarmed will run some distance, and, just as you think it is about to disappear round a spur, or into a thicket, will suddenly halt and look back. I have often bagged a fine beast when it has stopped for that last gaze.

To be able to imitate an animal's call, or alarm note, is useful on occasion. A kakur on being disturbed sometimes makes a curious "clicking" noise with its tongue, though the alarm note of both sexes is a hoarse bark. Early one morning in the forest above my bungalow I disturbed a kakur buck, and heard him bound away on my right, just catching a view as he topped a low spur. I followed, and peering over the spur imitated the clicking noise the little deer was making as he ambled away through the oak bushes. Suddenly he stopped, turned broadside on, and gazed in my direction, giving me a chance of putting a bullet through his heart at about sixty yards range.

I bled the deer with my hunting knife, carried it to the path, and left it lying head downwards on a slope. My house was only about 300 yards below, so I strolled down and sent a man up to fetch the kakur. Shortly afterwards the simple fellow returned and said he could only find a little pool of blood, and he thought the kakur must have run away! I at once suspected that a leopard must have taken the deer, and after a long search, guided by drops of blood, we found the buck about 500 yards from where I had left it. It was jammed between two pine saplings, the viscera torn out, and some of the flesh already eaten. I had an ambush made a few yards away from the carcass; and that evening shot a fine young male leopard through its brain, about five yards from my ambush.

Alarms and Love Calls.

The alarm noise of a goral is a peculiar sound, half sneeze, half cough, and not difficult to imitate. More than once after watching ground frequented by goral, and not seeing one, I have, by imitating this noise, caused one to spring up suddenly and show itself. The roar of a leopard, a succession of coughing grunts, sounding at a distance like a saw cutting hard timber, may be learnt with practice. I have often answered a leopard, and made one answer me. Once I obtained a quick shot at one by this means, the bullet striking the ground only an inch or two above "Spots" head. This "sawing roar" is the call of a leopard to its mate. When angry and charging, the roars sound very fierce, and with plenty of volume in them.

The mating roar of a tiger is a deep-throated moaning whine, uttered five or six times in succession at irregular intervals. I have heard a Himalayan tigress keep up these roars throughout the night, while she went for a prowl of several miles. Once she continued her loud "miaows" till nearly noon and another time till past 10 a.m. When angry at being disturbed, a tiger will often give a low murmuring growl, followed by a "haa-eh," a real cat-like noise. I have heard these horrid low growls from a distance of a few yards on two occasions. A wounded tiger will give a succession of quick, loud, terrific roars when charging and attacking. Often a leopard, also a tiger, will not utter a

sound when wounded, perhaps fatally. Bears, unless shot in the head, or neck, usually howl loudly on being hit by a bullet.

When sitting in ambush near a "kill," waiting for a tiger, or a panther, to keep its appointment, one frequently has opportunities of observing wild things. For foxes, jackals, hyenas, martens, and mongooses all have a turn; and should one of these poachers vanish suddenly it is almost a sure sign that the great cat who killed is not far away, though the artful brute may not show itself for some time.

Traps for Big Game.

Interesting as it is to observe big game, it is not wise to watch a tiger, or panther, for long while it is feeding. The brute is all greed, suspicion, jealousy, eyes and ears, and no chance of obtaining a clear shot should be lost. A friend of mine told me he once saw a leopard walk up to its kill and begin feeding. "W." said to himself: "Now, I will just let 'old Spots' have a good tuck in," but a minute later something frightened the leopard, and it suddenly left its kill never to return.

When, as often happens, one of the great cats has been driven away by a plucky native from goats, sheep, or cattle, the brute is sure to haunt the vicinity for another chance. Then is the time to tie a bait: a noisy goat for a panther, a young male buffalo for a tiger. The bait must be tied after the shooter is ambushed, or it will not call. A calling goat is almost a sure draw for a panther. On two occasions I have seen a panther spring on a goat. Once I shot "Spots" before it had time to do the goat any injury; on the other occasion the panther pulled the goat behind a bush, and by the time I was in position for a clear shot the victim had been seized by its neck.

An exciting moment was when watching over a young buffalo which had been tied up as bait for a tigress. The great striped cat appeared from behind some bushes, over sixty yards from the old oak where I was ambushed 12 feet above the ground. She stood gazing at the bait for a second or two, and then approached with fierce eyes and galloping bounds. I could not save the bait, as the tigress's movements were so quick and violent. She caught the poor beast round the shoulders with her terrible claws, and fixing her teeth in the back of its neck shook it savagely, then, as she was trying to drag it into the thicket beyond my tree her arched back was towards me, within twelve yards, and I dropped her dead with a soft-nose .450 bullet.

THE EUPHRATES & TIGRIS STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the River Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

Bulgarian Bonds.

The negotiations with Bulgaria on the subject of the resumption of the debt service have not yet led to a final settlement of this important matter, but as the stage of concrete proposals has been reached, I imagine that British bondholders will shortly know where they stand. The position, as I understand it, is that while Bulgaria is willing to pay in French francs at once the whole of the arrears of coupons and drawn bonds of the loans of 1902 and 1907, which are mainly held in France, and to continue the service on these loans on the same lines up to April of next year, it is proposed, as regards the loans of 1892 and 1909, in which English holders are chiefly interested, that payment of the arrears should be spread over two years or thereabouts, the service in this case also to be made in French francs.

The Ter Meulen Scheme Explained.

I have just received a little booklet issued by the League of Nations, explaining in a clear and succinct form the details of the Ter Meulen scheme for international credits as approved by the League. The booklet, which will be noticed in these columns in due course, emphasises the flexibility of the Ter Meulen scheme, and it is pointed out that while objections may be made against it, it possesses the outstanding advantage "that it provides a means for effectively mobilising the whole credit of a country behind each of its individual traders in such a manner that traders in other countries who might shrink from the risk of dealing with individuals alone may be expected to enter freely upon business." Granted that the scheme would appear to offer a promising solution for the trade impasse that has come about as the result of war conditions, it would be surprising if British traders could be persuaded to take more than an academic interest in it as yet, seeing that a considerable time must elapse before it can be brought into operation. What they are concerned with is what is going to happen in the intervening period, and information on that point is still not forthcoming from the Government in the shape of their new export credit scheme. The difficulties of the time certainly provide excuses for the delay that has taken place, but it is many weeks now since the details of the scheme were revealed to a critical public. Surely they are not going to hesitate until the Ter Meulen scheme is in working order?

The Coal Strike and Oil.

It is certain that one effect of the long-drawn-out coal strike will be to give an immense impetus to the use of oil instead of coal by factories and public utility undertakings. Very many firms six months or even a year ago began to consider the possibility of oil as a fuel, but changes of so radical a nature take a very long time to come about in this country, unless, as in the present case, external events supply a very pressing reason for the alteration. Now the necessary investigations are being hurried on in all directions, as the business community has been made to realise very forcibly the advantage of having an alternative fuel supply, in order to safeguard itself against any recurrence of the present trouble. Of course, one can imagine a combination of circumstances which would temporarily cut us off from our oil supplies, but it is unlikely in the extreme that commerce would ever be deprived of both fuels at the same time.

The Outlook for Trade.

Unfortunately, the extent to which oil can help us in our present troubles is distinctly limited, and it is evident that, failing a speedy settlement—as to the chances of which there is little on which to base an opinion—we must be prepared to see the wheels of industry come almost to a standstill for a time. Obviously, the effect of this stoppage of industry must be immensely to retard our progress in regaining our pre-war trade position and to jeopardise our prospects of obtaining the hoped-for share in the commerce of the markets where our late enemies had formerly virtually a monopoly. The only cheerful aspect of the position is that the strike has chanced to take place at a time of world-wide "slump," when, with the best will in the world, our manufacturers could not have made any great headway even in the countries where the exchanges present no obstacle to commerce, as buying has for a long time

been reduced to the veriest minimum. At any other period the strike would have done incalculable and perhaps irretrievable harm; as it is, its external effects are to a large extent circumscribed, though they may yet prove serious enough should the impression gain ground abroad that our capacity to deliver goods to order must henceforth be in some doubt. The permanence of that view will depend entirely on Labour's attitude in the future.

Development of Albania.

The question of the development of Albania's resources is now, I understand, being taken seriously in hand by the Government. The nature of the task before the Valona authorities will be realised when it is borne in mind that in the most real sense of the term Albania has remained up to the present time a purely agricultural community. It possesses neither banks nor railways, and its articles of export are negligible. In short, it is a question of starting at the foundations. The plans of the authorities include the establishment of a bank and a trading company, while foreign assistance is being enlisted to ascertain the extent of the country's mineral resources, in particular as regards coal and oil. In the latter connection, it will be recalled that our Albanian Correspondent recorded in a recent letter the arrival of representatives of the Anglo-Persian Oil Company.

Roumanian Consul for Liverpool.

My readers will be interested to learn that the King of Roumania has appointed Mr. J. G. Evans, manager of the Mediterranean department of Messrs. Furness Withy and Co., Ltd., honorary consul for Roumania in Liverpool. This is the first time that Roumania has been represented at Liverpool, and the appointment may be taken as a welcome indication that Roumania expects to do a greatly increased trade with Great Britain in the future. Mr. Evans, it may be mentioned, has been associated with the Johnston Line for about thirty years, and was one of the directors of the line before it was taken over by Messrs. Furness Withy, and the close associations of the Johnston Line with Roumania naturally place Mr. Evans in a position of special advantage owing to his knowledge of Roumanian trade conditions.

Foreign Buyers and Exhibitions.

I am strongly of the opinion that the time has come when some definite steps should be taken to ensure the presence of foreign buyers at our exhibitions. They are invited, I know, to the British Industries Fair, but that event, important as it is, is far from covering the whole ground of British industrial potentialities, and, so far as I know, little organised effort is made to bring to their notice the specialised fairs, one or more of which are held every month in London. Of course, it may be argued that in the case of printing machinery, for instance, the foreigner will come here if he wants it, but until the merits of the latest exhibits have been brought more or less forcibly to his notice his need may have escaped his attention. It is of no use to hold exhibitions which are attended mainly by British people. The primary function of exhibitions is to accelerate the fruits of judicious advertising, and to accomplish that purpose the foreign buyer must be attracted.

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

ROUMANIA.

BUCHAREST, April 27.

Relations With Czechoslovakia.

M. Dvoracak, head of the Oriental Department of the Ministry of Commerce at Prague, and Captain Konecny, of the same department, arrived in Bucharest on Saturday as delegates of the Czechoslovak Government, for the purpose of signing a commercial treaty between their Government and Roumania. The text of the treaty had been previously drawn up, and it was signed on Saturday afternoon at the Ministry of Foreign Affairs by M. Take Jonescu (who has not yet left on his short leave abroad), in the name of the Roumanian Government, and by the Czechoslovak Minister in Bucharest, as well as the above delegates. The treaty is for one year, but may be extended by common consent.

Czechoslovakia having inherited most of the industries of the former Austria-Hungary, Roumania hopes by this convention to arrange for an advantageous interchange of goods and to be in a position to obtain from a neighbour some of the material necessary for the reconstruction of her industries, such as locomotives, boring plant for the oil-fields, machinery for sugar factories, agricultural machinery, etc. Incidentally, it may be remarked that the chief handicap as regards the sugar factories would appear to be not so much the lack of machinery as of sugar beet. Under present conditions this crop does not offer sufficient inducements to cultivators, and how to ensure sufficient supplies for the factories has become a rather serious problem.

Miscellaneous.

The Government has decided to appoint a Commission to go to Warsaw, for the purpose of negotiating a commercial treaty with Poland on the same general lines as that just concluded with Czechoslovakia.

It is understood that good progress is being made by the Committee appointed to fix the exact frontier between Roumania and Czechoslovakia.

BULGARIA.

SOFIA, April 27.

The Moratorium.

As the moratorium which has been in force since the outbreak of war in September, 1915, is to be raised shortly, a meeting of traders representing most of the principal manufacturers in Bulgaria was held at the Sofia Chamber of Commerce on the 25th inst., and after a good deal of discussion it was decided to form a combine with the object of alleviating financial distress amongst themselves as a result of the numerous debts that will have to be paid.

This step will not be to the liking of the general public, as, owing to the lack of competition, prices will speedily rise. The Government will, however, probably take steps to prevent the carrying out of this scheme.

It is probable that Bulgarians who have debts to other Bulgarians will be allowed to pay in banknotes equivalent to the same value in gold or silver as before the war; for instance, if 20,000 levas in gold was owed before September, 1915, it will be only necessary now to pay 20,000 levas in paper. If, however, the debt is from a Bulgarian

to a foreigner, the question of the value of the exchange will be one of arrangement, and it will probably be necessary for a Bulgarian to multiply the amount of his debt by nine, or even more. Most of the banks are adopting a very cautious policy in consequence, and money is scarce and dear.

The Reparations Commission.

The regrettable illness of M. Stambolisky has prevented the Commission of Reparations from making very much progress, but on May 2 the chiefs and their principal assistants are starting on a week's tour round the principal towns of Bulgaria.

YUGOSLAVIA.

ZAGREB, April 30.

A Universal Tax.

A bill will shortly come before the Ministerial Council which will affect not only all commercial people in the country, but also professional men, foreign commercial residents and even those who are only temporarily here. This is a new form of the unlamented tax on turnover. This time it will be worded so as to include the incomes of professional men such as lawyers and medical men. The only exemptions are in regard to the conveyance of real property and transactions with cheques and bills of exchange. The tax will be 1 per cent., but it is anticipated that only $\frac{1}{2}$ per cent. will be levied at first. The tax will be payable every three months, and special books must be kept. Visitors to the country, who do not keep books here, will be obliged to report the results of their transactions. The penalties will be excessively heavy.

Relations With Italy.

Out of deference to public opinion, the Government has broken off negotiations for a commercial treaty with Italy, and the Italian members, after being entertained to a dinner at the *Srpski Kralj*, have returned to their homes. The reason is that the Italians are not loyally carrying out their engagements entered into in the Treaty of Rapallo. Telegrams from Split complain that the Italians have postponed the evacuation of Zones II. and III. in Dalmatia, apparently awaiting the results of the elections in Italy, for if the Nationalists get the upper hand they will tear up the Treaty of Rapallo. Troops and warships are again assembling at Shibenik (Sibenico). The new Italian Consul has arrived at Split, and the gunboat *Puglia* should therefore leave, but she still remains in the bay. Feelings are embittered, too, by the recent excesses of the Fascists in Istria, where they have been persecuting the unprotected Slavonic population. Events in Fiume, too, look ugly, and make Italy an uncomfortable neighbour, especially when her internal differences lead to a railway strike which holds up the Orient Express, cuts Belgrade and Zagreb off from her mails and from Trieste, the only seaport upon which Yugoslavia is dependent since Fiume is denied her.

General News.

Dr. Kumanudi, Minister of Finance, states that the Government is expending three million dinars a month on the support of Russian refugees. This is apart from the financial support received from England, which pays for the upkeep of 20,000, while France supports 18,000. Up to date, Yugoslavia has spent 33 million dinars on this relief work.

The Reparation Commission in Paris has allotted to Yugoslavia 52 per cent. of the total output of the Pechuy collieries for the first two years after the ratification of the peace treaty.

It is reported that the Reparation Commission in Paris has decided that the former Austro-Hungarian Consulate in Belgrade belongs to Yugoslavia, but that Austria can bring an action for recovery in the Serbian courts. This fine building, with its pretty garden, is now the Ministry of the Interior.

It is stated that the Government has resolved to spend 250 million dinars on railway construction, and that the programme will include the following new branch lines:—Kochevje-Ogulin, Prekomurje-Maribor, Nish-Knjazevatz, and Uzice-Vardishte.

According to a Sarajevo report, the Government has concluded a contract with a German group for the sale of 200,000 tons of iron ore from Bosnia at a good price, payment to be made partly in cash and partly in coke, which the country needs badly.

• The police have issued a new tariff of cab-fares in Zagreb.

COTTON GROWING IN MESOPOTAMIA.*

III.—THE POLITICAL ASPECT.

(Concluded.)

(FROM A CORRESPONDENT.)

Maximum use is already made of the available water for the winter crops; but for the summer crops the Arab is often at a loss to know what use to make of his water. A specific case in point is that of the new Yusufiyah canal, dug as a military necessity during the war to increase the production of grain. On the lower reaches of this canal the cultivators grew the usual summer crops, and catered largely for the Baghdad vegetable market, whose demands had previously been met from the lift-irrigated gardens near the city. In consequence of this large and sudden increase in the supply of summer vegetables the market price fell to such an extent in 1920 as to render the cost of transport from the canal area to Baghdad greater than the market value of the produce. As a result hundreds of tons of melons and other vegetables were allowed to rot on the land.

It was on this canal that the Agricultural Department arranged with a local sheikh to grow on contract eighty acres of cotton of that variety which had shown greatest promise in the experiments conducted near Baghdad the previous two seasons. It was agreed that the cultivators should get 40 per cent. of the value of the crop, together with the cotton stalks, which had a high value as fuel; the Government took 30 per cent. as its revenue share, the Agricultural Department took 25 per cent. acting as capitalist, and the sheikh was given 5 per cent. (Arabic *backsheesh*) for his kindly interest.

The outcome of this effort to discover whether cotton cultivation is or is not a sound commercial proposition is not without interest. The work was started under the supervision of an Englishman (later replaced by an Indian) and two imported Egyptian cultivators, all three of whom lived under canvas on the estate. There were no buildings, as the cultivators, who were but recently mostly nomadic, still prefer their goat-hair tents to permanent buildings. Owing to the delay in the arrival of the supervising staff the sheikh changed his views on the bargain that had been concluded with him, and sowed a late crop of barley and wheat. After a little cajoling, coupled with gentle pressure, he was persuaded to plough in the germinated cereal crop in preparation for the cotton crop. He was compensated to the extent of the seed sown. The cotton (an American variety which has been given the commercial name of *Mesopot White*) was sown in season, and gave every promise of a very high yield. When it was about to come into bearing the disturbances broke out on the Euphrates, and life in the "blue" became somewhat unhealthy for exotics. The supervising staff was therefore recalled to Baghdad. The irrigation staff on this canal was also recalled, and as a result the distribution of water became irregular. Instead of being irrigated every ten days in August and September the cotton crop received its last irrigation in the middle of August.

All the cultivators on this canal had been outlawed as rebels without discrimination. Touch was maintained with the progress of the work by weekly visits to Baghdad of some of the cultivators, who exposed no more of their faces than was necessary to evade the traffic. On this being brought to the notice of Intelligence Branch, G.H.Q., a charge was brought against the Agricultural Officer of trading with the enemy! He was, of course, acquitted. On news being received by these cultivators that a neighbouring sheikh, who had given much trouble, was about to be bombed by aeroplane, they advanced the plea that they should not be bombed, as they were the only cultivators on this canal who at that time of year possessed immovable property. Or, to use their expression, "we have four hundred camel loads of cotton and we cannot go into the desert leaving this behind." By arrangement with the authorities concerned they were permitted to deliver their cotton at the ginners erected for the purpose in Baghdad by the British Cotton Growing Association.

On the occasion on which the neighbouring sheikh was bombed, one observer, whose powers of observation were

somewhat erratic, dropped a bomb amongst the cotton cultivators. On this being reported to the Agricultural Officer by an Arab, he was informed that the casualties were three donkeys, two cows, and a man. (The order of precedence is not the writer's.)

In settling the accounts of these cultivators, each family cultivating six acres was paid an average of Rs. 1,000, being 40 per cent. of the value of the crop based on Liverpool prices, less freight and insurance charges. The average yield of seed cotton per acre was 1,250 lb., despite the irregular treatment given to the crop subsequent to the outbreak of the disturbances. This yield compares favourably with the average yield of 1,200 lb. of seed cotton per acre in Egypt, 600 lb. in America, and 300 lb. in India.

The facts of special interest that have been revealed as the result of this first attempt to grow cotton in Mesopotamia on a commercial basis are: (a) by cultivating cotton the Arab is given full-time occupation throughout the summer months; (b) even with irregular and unkind treatment of the crop the yield of cotton can be equal to the average yield of the cotton crop in Egypt; (c) Arabs who but a few years previously were mostly pastoral in their habits can, and will, with suitable instruction, cultivate cotton in the intensive manner adopted in Egypt; and (d) at the price ruling in October, 1920, with Middling American cotton at 17d. per lb., the cultivation of cotton in the Irak can be highly profitable.

In the opinion of the writer, the cultivation of cotton on a comprehensive scale in Irak cannot but contribute to a large extent to the material welfare of the cultivating class, to the expansion of trade, to the prosperity and revenues of the country in general, and, indirectly, perhaps, to the maintenance of peace and order.

WAREHOUSING FACILITIES IN BELGRADE

We are indebted to the London office of the Banque Franco-Serbe for the following information, which they have received from their chief office in Belgrade, dated April 27. They write:—

"At the present moment our Belgrade office know of no warehouses available for the storing of further goods, as, owing to the accumulating stocks in Belgrade, all the usual accommodation is fully occupied, and their 'Merchandise Department' is constantly looking for public or private warehouses, where further space may be available, but they see no immediate prospect of obtaining space, except by private arrangement between importers there and foreign exporters. In view of this extreme shortage, our head office has authorised the immediate construction by this bank of two large warehouses on the banks of the River Save, which, it is hoped, will eventually accommodate about 800 truck loads, and for which railway facilities and sidings are being applied for from the State railways. It is hoped also that a part of the construction will be finished by September next, and the balance within the following few months.

"In the meantime our office in Belgrade instructs us to make it quite clear to exporters in this country that all instructions for warehousing goods will only be accepted by this bank without responsibility, and that all such consignments will be at the risk of the shipper, as should warehouse accommodation not be found, and as the customs insist on all goods being cleared within a limited period, the merchandise may have to be left in the open and may suffer considerable damage. We would therefore strongly advise exporters for the present to endeavour to arrange with their customers in Belgrade to guarantee that private warehouse accommodation will be found, and, if necessary, placed at the disposal of the bank handling the documents, should it be desired only to release goods against payment. We shall, of course, be pleased to answer inquiries to the best of our ability."

Roumania has reduced her export taxes on timber by about 50 per cent.

The duty on goods entering Mesopotamia has been raised to 15 per cent. *ad valorem*.

It is estimated that the production of beet sugar in Europe will amount to 74,000,000 cwt. in the current year, an increase of 21,000,000 cwt. on last year's figures.

OAKEY'S

The Original Preparation
for polishing Cutlery.

Canisters, 1d., 2d., 3d., 6d., 1s., 2s. 6d., and 4s. each.

WELLINGTON MILLS, WESTMINSTER BRIDGE ROAD, LONDON, S.E.1.

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1½" to 3½" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

PRINTING TRADES EXHIBITION**SOME NOTABLE EXHIBITS.**

(FROM OUR OWN CORRESPONDENT.)

If the Sixth International Printing, Stationery, and Allied Trades Exhibition at the Royal Agricultural Hall, which closes this week, is not the best exhibition London has seen this year, or indeed since 1914, it comes very near being so. I cannot call to mind another which so adequately fulfils the purpose of demonstrating the potentialities of a great industry.

It is not infrequently the case at these exhibitions that a mere tour of inspection is in itself no light ordeal. In the present instance it was far more so than usual, for there was scarcely a stand that did not merit the closest attention; and to appreciate all the various features of the exhibition would be an impossibility in one or even two visits.

Judging by the animated aspect of the gangways, the exhibition has made a very fair appeal to the general public, but if the interesting nature of the exhibits had been widely known, I think there is no doubt that there would have been a full house each day. The title of the exhibition is apt to be rather misleading to the uninitiated, conveying as it does the idea of an elaborate show of books, prints, and such-like things. Of course, these things were there, though they needed looking for; but the vast bulk of the exhibits consisted of machinery used in one or another of the many processes in connection with printing. Indeed, it might well have been called an exhibition of printing machinery.

Looking down from the galleries across the vast floor, there was practically nothing to be seen but machinery, most of it in motion. In a very large annexe and in a smaller one it was the same. Here were presses remorselessly dealing with sheet after sheet of paper, finally putting them into place with human intelligence and with inhuman accuracy. There was a machine turning paper into envelopes at an incredible rate per hour, and a little further on one came upon a most elaborate pressing machine for providing paper for accounts, which had to traverse a remarkable journey before finally appearing covered with lines of different colours. Then there were opportunities at several stands of watching the delicate processes of colour printing, and these, judging by the crowds in the vicinity, were evidently a great attraction.

I am not going to pretend to deal thoroughly with the exhibits. In the case of an exhibition of this size, and with the space at my disposal, that would be out of the question. I shall confine myself to referring to some of the more important firms for whose products there should be, in my opinion, a good market in the future in the regions with which this journal deals.

The Lanston Monotype Corporation, Ltd., had a very interesting stand, where were displayed examples of their monotype machines and various presses. A rotary offset press and a two-revolution press were on view at the stand of Messrs. Furnival and Co., Ltd., who also showed other machinery. Messrs. George Mann and Co., Ltd., exhibited among other things single-colour rotary offset machines, and two-colour and perfecting rotary offset machines.

I was particularly interested in the stand of the Dalziel Foundry, Ltd., showing numerous specimens of stereos for rotary and flat printing. Another notable exhibit was that of Messrs. Usher-Walker, Ltd., showing various presses, the "Crosland," Self-Clamp Guillotine, a machine for

extracting dust from type cases, and other machinery in operation.

Messrs. Hampson, Bettridge, and Co. had a large range of machinery on view, including wire-stitching machines, an index-printing machine for two colours, box-making machinery, and a cardboard-cutting machine. Another very interesting stand was that of Messrs. Hunters, Ltd., showing apparatus for photo-engraving and photo-lithography, etc.

Messrs. John Greig and Sons were showing their latest model of the "New Conqueror" self-clamp guillotine combined with an automatic paper-shaving apparatus. They also exhibited a 31-in. rotary perforating machine with a creasing and slitting attachment and a steam-power nipping machine. The Slogger Engineering Company, Ltd., exhibited their "Slogger" paper-feeding machine, which can be fitted to any sheet-fed machine. At the stand of the famous firm of James Spicer and Sons, Ltd., a wide range of writing, printing, enamelled and art papers, waxed papers and bags, were on view, also writing pads, compendiums, files, etc.

A large selection of printing machines and presses were shown by Messrs. John Ratcliff and Sons, Ltd. A direct rotary machine, a flat-bed offset machine, a flat-bed lithographic machine, and a flat-bed tinplate printing machine were among their exhibits, which also included a litho graining machine and a varnishing machine. The stand of Fry's Metal Foundry contained a most comprehensive range of printer's equipment. Various kinds of printing metals were shown, and many types of melting pots, driers, and foundry equipment were also on view.

The Marshall Engraving Company, Ltd., were exhibiting an extensive range of children's books, half-tone and fine art work. Mention must also be made of their embossing dies, which were a notable feature of their exhibit. Seven Linotype composing machines, three of which were of the multiple magazine type, were shown by Linotype and Machinery, Ltd., together with examples of linotype, stereotype, and other metals made by this firm. They also showed two letterpress printing machines equipped with pile delivery. Messrs. A. W. Penrose and Co., Ltd., were exhibiting their Universal engraving machines, lithographic, hand-proofing and reversing press, also a velogravure sheet-fed printing machine.

CANTACUZENE OIL LANDS.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, April 27.

A concession for ninety-nine years has been acquired by the Societ  Sospiro for the exploitation of about 20,000 hectares of oil land in the Prahova district belonging to the Cantacuzene family. The company has the exclusive right of exploitation of these rich lands for the period mentioned, the owners receiving one-sixth of the share capital. The company will have a 50 per cent. interest in an affiliated company for the distribution and sale of its products. The Sospiro Company is composed exclusively of a Franco-Roumanian group, and its capital has recently been increased to 350 million lei. Preparatory work has already begun, and at the moment negotiations are going on for the purchase abroad of material and plant to the value of 125 million lei. Owing to the situation of the land in the midst of one of the most productive of the oil districts, this is likely to become one of the most important petroleum enterprises in Roumania, and it is a matter for congratulation that the riches of that land will no longer remain unutilised.

A Set of Four

Edgar Allen Water-hardening Carbon Tool Steels for Engineers, Smiths, Boiler-makers, etc., carry a mark which guarantees their quality, like the Hall-mark on gold. This mark

means money saved to the consumer. Each of these steels is standardized to ensure uniformity and reliable character, and each consignment is exactly as good as the preceding and succeeding ones.

Edgar Allen's Carbon Tool Steels

are made in four qualities, from Class H, the highest grade, through Classes P and E to Class C, the cheapest Tool Steel which can be trusted. A practical handbook showing the right steel to use for making chisels, punches, drills, reamers, taps and all other tools will be sent on receipt of the signed Request Form by Edgar Allen & Co., Ltd., Imperial Steel Works, Sheffield.

Sole Agents for: Greece, Serbia, Bulgaria, Roumania, Turkey in Europe—

LIONDA & CO., Ltd.,

London, Liverpool, Athens, Piræus, Salonica and Constantinople.

Business Houses trading with Turkey can insure Foreign Exchange with the Bank. Banks, Commercial Houses and others having interests in Turkey are invited to apply for terms.

Manufacturers and Merchants may address their enquiries to the Head Office for Trade Lists of Importers and Exporters.

ENGINEERING.

(BY OUR ENGINEERING REPRESENTATIVE.)

Motor Spirit Tax.

The Automobile Association has just obtained the views of the Rt. Hon. F. G. Kellaway, M.P., on certain questions of importance to the motoring community, and he has expressed the opinion, which is shared by all motorists, that a flat rate duty on motor spirit is the most equitable and practical method of obtaining the greater proportion of the contribution of motor traffic towards road expenses. He indicated that if it were administratively possible he would be prepared to support legislation for the reinstatement of taxation on motor fuel as an alternative to the present inequitable system.

Oil Engine Progress.

The position of the British internal combustion engine industry was referred to in very favourable terms the other day by Mr. J. L. Chaloner, at the first meeting this year of the Diesel Engine Users' Association, and his remarks gave rise to a great deal of favourable comment. He outlined the directions in which development might be looked forward to in relation to Continental and American competition, and showed that of the high-pressure oil engines in this country quite 25 per cent. were working on the mechanical injection principle, of which 50 per cent. were 2-stroke engines. In the case of medium pressure engines 96 per cent. worked on the mechanical injection principle, whilst 58 per cent. were 2-stroke engines. These data clearly showed the tendency towards 2-stroke design, and the position which the mechanical injection principle already holds in regard to the heavy oil engine. One of the chief points he made was as to the imperative necessity of further flexibility on the part of the engines in order that heavy grade oils might be used to a greater extent for internal combustion engines. The increased demand for petrol has necessitated the introduction of refining processes which will produce a higher percentage of volatile spirits, but, as every engineer is aware, this has been done at the expense of another constituent, which, in this case, is gas oil. To quote Mr. Chaloner's exact words, "Further flexibility on the part of these engines is therefore imperative in order that heavy grade oil may be used for internal combustion engines, and manufacturers will have to continue experiments with a view to making modifications which will enable internal combustion engines to deal with such grades as are to-day being recognised as the standard fuel for oil-fired furnaces and boilers." The efforts made in this country to simplify oil engine construction have met with greater success than on the Continent, as in Germany and Scandinavia, or in the United States. The main feature of the high compression oil engine in this country is that it does not use so high a degree of compression as the Diesel engine, and at the same time it dispenses with the air compressor and the attendant air service system.

In his paper Mr. Chaloner described and compared various methods of fuel atomisation and also of air, mechanical and gas pressure injection. He considered, and with his conclusions most engineers will be disposed to agree, that the gas pressure system might be discarded as a practical solution of the fuel injection method for internal combustion engines. The principle involved is now generally regarded as being only suitable for light fuels, and the mechanical difficulties in the way of a perfect result are many and not easy of solution. The greater portion of the charge, in this method, is in contact with burnt gases, and these render it a far from easy matter to bring the combustion air into contact with the fuel within the limited time of the combustion period.

It was pointed out that the part which turbulence plays in the combustion process has been fully realised, and it has been suggested that with mechanical injection only a very much lower degree of turbulence was possible. However, as he said, the rate of gasification of the oil could be utilised equally well, and owing to the absence of the cooling action of the expanding air the conditions were improved. The rate of vaporisation was proportional to the surface of each oil globule, and hence in the case of higher atomisation the degree of turbulence increased in proportion. The general tendency of introducing long

stroke designs for marine and other slow-running engines produced conditions favourable to the application of mechanical injection.

In his paper Mr. Chaloner did not suggest that the problem of mechanical injection had been solved, but the results obtained so far showed that satisfactory progress is being made. The prospects are certainly most promising, and the possibility of designing a satisfactory 2-stroke engine without any mechanically-controlled valves justifies the closest attention by engineers who are anxious to further the progress of oil engine development. There is no doubt, in this connection, that the two-stroke mechanical injection engine will assist materially in bringing the various types of internal combustion prime movers into a greater uniformity of design.

New Standards.

Of more than usual interest is the announcement that the British Engineering Standards Association have prepared, at the request of the Institution of Electrical Engineers, a standard specification for soldering sockets for electric cables of sizes ranging from 0.0018 to 1.0 square inch in cross sectional area. There has previously been a certain lack of uniformity, and this has been deplored by all who have had practical experience in the work of connecting up large installations, and carrying out switchboard and big dynamo and motor work.

The new specification includes all the necessary definitions and clauses relating to the material and dimensions of both cast and wrought lug sockets, and also of all types of clamps and clamp sockets, which at present are the only two patterns of sockets standardised. In the specification, attention is rightly drawn to the necessity for exercising care to see that the cable fits the socket fairly closely. A loose fit means that there will be an appreciable thickness of solder between the walls of the socket and the strands of the cable, and as the conductivity, etc., of solder is not the same as that of brass and copper trouble may result through heating. In the standard specification, a maximum diameter of hole is specified for each size of cast lug socket, and if smaller cables, for any reason, are used with large-sized lugs smaller holes should be provided. Of clamp sockets there are only nine sizes given, and the actual diameter of hole to be bored for each is specified. Copies of the new standard specification may be obtained from the offices of the Association at 28, Victoria Street, at a cost of 1s. 2d. post free.

Temperature Control.

Reference to the close automatic control of the temperature of electric furnaces has already been made in these columns. A new thermostat has been introduced by a British firm which can be set for temperatures up to 400 degs. Fahr. It appears that in this device the expansion of a volatile fluid contained in a small capsule is so arranged that it will operate an electric switch, so that as soon as the full temperature is reached the current will be cut down. Naturally this will cause the temperature to tend to fall, but as soon as that is the case the current is automatically switched on again, this operation continuing automatically and regularly so as to hold the oven or furnace at the required heat. A point worthy of notice is that the device acts outside the oven, so that there is no danger of any spark coming into contact with any inflammable gas given off by the product under treatment in the oven.

It is reported that the Roumanian Vulcan Company has recently been reorganised, with the support of the Société de Construction des Batignolles, Messrs. Schneider and Co., and Dyle and Bacalan.

Notice is hereby given that the forty-third ORDINARY GENERAL MEETING of the Shareholders will be held at the Company's Offices, Alexandria, on Wednesday, the 1st June, 1921, at four o'clock in the afternoon, for the transaction of the ordinary business of the Company, pursuant to Act of Parliament. Holders of Share Warrants to Bearer desiring to attend or to be represented at the Meeting must deposit their Share Warrants in London before the 20th May, 1921, or in Alexandria before the 28th May, 1921, until after the Meeting, at Messrs. Barclays Bank, Limited, 1, Pall Mall East, London, S.W.1. or at the Anglo-Egyptian Bank, Limited, Alexandria, or at some other approved bank in London or Alexandria.

Dated, Alexandria, Egypt, the 21st April, 1921.

By order of the Board,

J. E. CORNISH, Secretary General.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Sugar.—Home refined is reduced 2s. all round. West Indian crystallised has come to business at 57s. to 60s., while American granulated at 62s. 6d. has lost 3s. White Java has been done at 30s. Futures are:—June, 26s.; July, 25s.; August, 22s.; September, 22s.; October, 19s. 9d.; November, 19s. 3d.; December, 19s.; October-December sold at 19s.

Coffee.—The market has been fairly steady. East Indian good bold colouring is quoted at 137s.; bold grey-greenish at 92s. 6d. and peaberry at 86s. to 148s. Nairobi bold to fine bold greenish is 115s. to 135s.; bold greyish, 80s. to 86s.; and peaberry from 80s. to 135s. Futures are:—May, 40s.; July, 39s. 9d.; September, 40s. 10½d.; December, 41s. 7½d.; March, 42s. 6d.

Oilseeds.—The market has been firm. Indian linseed is harder at 17s.—a gain of 6d. Rapeseed is higher, with Toria at 19s., bold Ferozepore at 18s., and brown Cawnpore at 16s. Cotton-seed is steady, with Bombay at 10s. 6d. and the Egyptian black variety at 12s. 9d., an increase of 3d.

Oils.—Linseed oil is quieter at 28s. Rape oil is firm, with crude at 46s. and refined at 54s. Refined cotton oil has come to business at 42s., and Egyptian crude at 35s.; deodorised at 47s. There has been a great demand for turpentine this week. The price has risen from 72s. to 105s.

CURRENT PRICES.

General Produce.—Bacon, 172s. 6d. cwt.; butter, 232s. cwt.; cheese, 150s. cwt.; chillies, 90s. cwt.; eggs, 17s. 6d. per 120; cloves (Zanzibar), 9½d. lb.; cocoa (Ceylon, good to fine), 73s. 6d. cwt.; coffee (Costa Rica), 110s. 6d. cwt.; coffee (East India bold), 115s. 6d. cwt.; coffee (Mocha longberry), 92s. 6d. cwt.; coffee (Santos superior), 54s. cwt.; ginger (washed Cochín), 42s. 6d. cwt.; hams, 144s. cwt.; lard, 81s. cwt.; nutmegs (110's to 80's), 11½d. lb.; pepper (Singapore black), 5½d. lb.; pepper (Muntok white), 8½d. lb.; raisins (Valencia), 110s. cwt.; currants (Vostizza), 73s. 6d. cwt.; sultanas (Smyrna), 145s. cwt.; sugar (granulated), 65s. 7½d. cwt.; sugar (No. 1 cubes), 70s. 3d. cwt.; sugar (white Java), 62s. 6d. cwt.; sugar (West Indian crystallised), 60s. 6d. cwt.; sago (small pearl), 25s. 9d. cwt.; sago flour, 14s. 3d. cwt.; rice (Rangoon No. 2), 16s. 9d. cwt.; rice (bran, Rangoon), £5 15s. ton; tea (Indian), 6d. lb.; tea (Ceylon), 6½d. lb.; tea (Java), 4d. lb.; wheat (Australian), 81s. 4½d. qr.; wheat (English white), 88s. 6d. qr.; wheat (La Plata), 74s. 3d. cwt.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 9½d. lb.; citric, 2s. 5d. lb.; tartaric, 1s. 8½d. lb.; ammonia (sulphate), £20 5s. 7½d. ton; arsenic (white powdered), £47 10s. ton; benzole (standard), 2s. 11½d. gallon; bleaching powder (35 per cent.), £20 10s. ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 137s. 6d. cwt.; Potassium: Bichromate, 10d. lb.; chlorate, 6½d. lb.; caustic, £47 10s. ton; nitrate, £54 ton; permanganate, 1s. 10½d. lb.; prussiate yellow, 1s. 4d. lb.; sulphate (90 per cent.), £27 10s. ton; Sodium: Crystals, 150s. ton; bicarbonate, £10 15s. ton; bichromate, 7d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 5s. ton; hyposulphite, £23 10s. ton; prussiate, 8½d. lb.; nitrate, £19 15s. ton; glycerine (crude 80 per cent.), £105 ton; glycerine (industrial 125 per cent.), £155 ton; sulphate of copper, £32 ton; sulphate of iron, 150s. ton; lemon oil, 3s. 2d. lb.; quinine, 3s. 5½d. lb.; red lead, £38 10s. ton; white dry lead, £41 15s. ton; white ground lead, £52 ton.

Metals.—Aluminium, £150 ton; antimony (English regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £70 5s. ton; copper (electro), £72 10s. ton; gold bars, 104s. 2½d. oz.; iron (No. 3 Cleveland), 124s. 6d. ton; hematite (mixed number), 180s. ton; galvanised sheets, £23 ton; lead (soft foreign), £21 1s. 3d. ton; manganese Poti, 1s. 4½d. unit; molybdenite, 55s. unit; nickel, £195 ton; platinum, 340s. oz.; plumbago, £30 ton; quicksilver, £11 10s. bottle; silver bars, 35d. oz.; spelter (G.O.B.), £26 ton; tin (standard), £172 15s. ton; tin plates, 26s. 6d. box; wolfram, 12s. 6d. unit; zinc sheets, £36 10s. ton.

Hides and Skins.—Ox and heifer (first), 90 lbs. and up, 7½d. lb.; 80 to 89 lbs., 7½d. lb.; 70 to 79 lbs., 7½d. lb.; 60 to 69 lbs., 7½d. lb.; 59 lbs. and under, 6d. lb.; (second), 90 lbs. and up, 5½d. lb.; 80 to 89 lbs., 5½d. lb.; 70 to 79 lbs., 5½d. lb.; 60 to 69 lbs., 5½d. lb.; 59 lbs. and under, 4½d. lb. Cows (first), 60 lbs. and up, 4½d. lb.; 59 lbs. and under, 4½d.; (second), 60 lbs. and up, 3½d. lb.; 59 lbs. and under, 3½d. lb.; bulls (first), 3½d. lb.; bulls (second) 2½d. lb.; casualty hides, 2½d. lb.; kips (first), 4½d. lb.; kips (second), 3½d. lb.; kips (third), 3d. lb.; calf casualty (first), 6½d. lb.; calf casualty (second), 4d. lb. Calcutta market, prices in rupees per 20 lb.:—Arsenic hides (cows), Agras, 5 to 11; Durbhargas, 3.4 to 5.4; Patnas, 2.8 to 4; salted cows, 2.8 to 5; arsenic hides (buffalo), 2.8 to 7. Skins, calf, 6 to 8 per 20 lb.; goat, 185 to 205 per 100 pieces. Bombay hide and skin market dull.

Miscellaneous.—Cotton (American), 8.08d. lb.; linseed (La Plata), £14 5s. ton; rape (Toria), £17 10s. ton; soya beans, £11 10s. ton; palm kernels, £19 7s. 6d. ton. Oils: Linseed, £25 10s. ton; soya, £31 ton; cotton (crude), £31 ton; olive, £32 10s. ton; ground nut, £35 ton; palm, £31 15s. ton; rape (crude), £44 ton; petroleum 2s. 3½d. gallon; Rubber: Plantation (No. 1 crêpe), 10½d. lb.; smoked sheet, 9½d. lb.; fine hard Para, 10½d. lb.

LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 5:—

The better inquiry experienced during the previous fortnight has not been maintained, unfortunately, and business during the past week has been conducted on a very limited scale. This state of affairs was only to be expected, however, in view of the very critical times through which the industry is passing, and we do not look for any marked increase of business until the coal question shows more signs of being settled. More mills must of necessity close down from lack of fuel as time goes on, and the spot inquiry is bound to feel the effect. What inquiry there has been has continued to centre chiefly round Sakel, fully good fair to good, and some fifty bales of Sudan cotton have been absorbed. Manchester reports continue to be encouraging in tone, particularly where piece goods are concerned, and there seems to be a fairly steady movement in this quarter, which, if continued, should prove of much value to the trade in general. C.i.f. business has been practically at a standstill. Quotations generally show a decline of 50 points, but good fair and fully good fair Sakellaridis are exceptionally 75 points lower. Sales, 600, which includes fifty bales Sudan. Fully good fair Sakellaridis 17.00d.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Paper.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of squared paper. May 24.

Cardboard Portfolios.—The Central Stores Department of the Egyptian Ministry of Finance invites tenders for the supply of the following material:—900 portfolios cardboard, 70 by 70 by 7 cms.; 600 portfolios cardboard, 85 by 75 by 7 cms.; 500 portfolios cardboard, 60 by 60 by 7 cms.; 1,500 portfolios cardboard, with flap, 28 by 37 by 7 cms. Sealed samples in duplicate of the goods must be submitted with tenders. Delivery of the goods is to take place within ninety days of the acceptance of the tender. Only those firms with a representative resident in Egypt can tender for Egyptian Government contracts.—May 25.

General Stores and Clothing.—H.M. Commercial Agent for Egypt reports that tenders will be received by the Director of Stores, Frontier Districts Administration, Alexandria, for the supply of general stores and clothing. The tenderer must have an agent resident in Egypt. June 14. (D.O.T.)

Yugoslavia.

Dredgers, etc.—The General Direction of Waterways, Department of the Yugoslavian Ministry of Agriculture and Waters, invites tenders for the supply of two chain bucket dredgers, one tug boat, and eight lighters provided with means for discharging contents downwards through hull. The successful tenderer must deposit, if a Yugoslavian subject 10 per cent., if a foreigner 20 per cent. of the total value of the tender. All tenders must bear a 10 dinar duty stamp, and should be addressed to the General Direction of Waterways, 81, Krunska ulica, Belgrade. June 6 (D.O.T.).

THE ZAGREB MARKET.

(FROM OUR OWN CORRESPONDENT.)

ZAGREB, April 30.

It is interesting to note that the chief buyers in the Zagreb market are Italians. This year's spring fair has not been so busy as last year's, and most of the buyers have been foreigners, almost all Italians, who have been buying the best stock and putting up the prices. Thus oxen weighing over 500 kilos have risen from 24-30 to 28-32 kronen per kilo, round about which prices the Italians have bought three hundred head. Pigs were scarce, the price fluctuating between 32 and 34 kronen per kilo. Cows realised 18-20 kronen per kilo. There were any number of horses, but they met with a poor demand, only Italians buying, at prices between 30,000 and 36,000 kronen each.

The following were the market prices (in kronen) of food and vegetables on April 28: Young potatoes, 12 per kilo; onions, 14; peas, 32 per kilo; eggs, 2 apiece; milk, 6 per litre; best butter, 60 per kilo; spinach, 4-5 per kilo; leeks, 6 per kilo; chickens, 60-90 a pair; cocks, 80-140 per pair; turkeys, 100 each.

ADVANCE IN RAW FUR PRICES.

The report of the London Fur Trade Association on the April raw fur skin sales states:—The number of buyers attending the present series of sales was again very large and the buying well distributed. France bought more freely in fine furs, and there were buyers from America, Italy, and Austria, the latter taking some of the most expensive goods. Germany again was a considerable buyer of many articles, securing a very large proportion of Musquash. The home trade bought freely in various articles, taking quite a good proportion of the skunk offered. Chinese and Japanese goods met with poor demand, and, even though lower prices would have been accepted, comparatively little was actually sold. Australian goods being in short supply and in good demand for the United States of America sold at much higher prices. By far the larger part of the American furs offered were sold, mostly at or above last prices, very few articles suffering decline, thus showing that the trade generally was not overstocked. Had it not been for the labour troubles and the consequent depression of trade the home demands would have been greater still and the prices even higher. The quotations given show prices compared with the January sale.

Black bear, unaltered; brown bear, declined 25 per cent.; grizzly bear, sold at high prices; beaver has advanced 10 per cent.; advance principally in large skins; civet cat, unaltered; chinchilla, sold freely at high prices; ermine, advanced 20 per cent.; fisher, advanced 30 per cent.; fitch, unaltered; blue fox, advanced 25 per cent. to 30 per cent.; cross fox, advanced 10 per cent.; red fox, advanced 10 per cent.; silver fox, good silvery skins 15 per cent. higher, blacks unaltered; white fox, advanced 25 per cent. higher, blacks unaltered; American fox, unaltered; white hare, mostly withdrawn; kolinsky, unaltered; Persian lamb, unaltered; lynx, advanced 30 per cent.; American marten, advanced 20 per cent.; baum marten, advanced 25 per cent.; stone marten, unaltered; mink, advanced 30 per cent. on average; mole, advanced 40 per cent.; monkey, advanced 40 per cent.; black musquash, unaltered; brown musquash unaltered; southern musquash, sold at full January prices; nutria, advanced 20 per cent.; American opossum, few good lots last sale prices, low grades declined 10 per cent.; otter, advanced 25 per cent.; raccoon, unaltered; Russian sable, unaltered; skunk, somewhat higher, principally in seconds, long stripes and whites; squirrel, unaltered; wolf, advanced 15 per cent.; wolverine, advanced 20 per cent.; seals fur, sold well at reasonable prices.

Chinese and Japanese Furs.—Civet cat, not sold; red fox, poor collection, advanced 30 per cent.; goat rugs, improved demand at slightly lower prices; black and grey goat skins, declined 20 per cent.; white goat skins, January prices; kid skins and crosses, best goods sold rather higher, others neglected; kolinsky, not sold; lamb, slink, crosses, sold much better; Thibet lamb, Dahtung advanced 10 per cent., remainder unchanged; leopard, part sold at rather higher prices; marmot, unaltered, many unsold; mink or weasel, advanced 25 per cent.; pahmi, withdrawn; white rabbit, best skins declined 25 per cent., mostly withdrawn; raccoon, unaltered, only few sold; wolf, unsold but January prices offered; Japanese badger, none sold; Japanese fox, a good demand at steady prices; Japanese marten, in better request, best grades sold well; flying squirrel, advanced 10 per cent.

YUGOSLAVIAN PLUMS.

(FROM OUR OWN CORRESPONDENT.)

ZAGREB, April 30.

Promising reports are coming in regarding the plum trade. The chief markets for plums and pekmez, or plum jelly, are Switzerland, Germany, and Denmark, the last two absorbing large quantities of pekmez in barrels. The authorities are taking steps to encourage this trade, and propose to reduce the export tax.

IMPROVED BULGARIAN CROP OUTLOOK.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, April 27.

The gloomy estimates of the effects of the continuance of the drought on the harvest have been put out of court in the last few days, as considerable rain has fallen. Provided a little more falls next month, it is believed now that there will be an excellent harvest.

DRIED FRUIT.

Messrs. J. C. Houghton and Co. report as follows for the fortnight ended May 3:—

Currants.—The month opened with a continuation of the improved demand referred to at the close of March, but during the past fortnight the market has been overshadowed by the grave industrial crisis, and it is most unfortunate for traders that this trouble has arisen upon the eve of Whitsuntide when there were distinct signs of business broadening. Buyers have now decided to suspend activities until the labour situation has cleared, the outlook being too uncertain for an increasing business to be done. The s.s. Certo arrived with 850 tons for disposal, and an active demand was expected owing to a large proportion of the cargo being packed in quarter cases, a welcome change after the unsatisfactory condition in which the fruit in bags has been arriving. With the settlement of the miners' strike a renewal of activities is looked for. Fresh landed Zante fruit was in excellent condition, and the best parcels met a ready sale. Bags, 75s. to 77s.; $\frac{1}{2}$ -cases, 75s. to 78s. and up to 82s. for choice Casalina smalls. Quotations are:—Pyrgos and Amalias, 60s. to 70s.; Patras, 68s. to 75s.; Zante, 72s. to 80s.; Gulf and Panariti, 72s. to 78s.; Vostizza, 82s. to 95s. Total arrivals from commencement of season to date, 20,000 tons. The Asturian has arrived with about 800 tons for sale.

Valencia Raisins.—Only a few parcels of seedless available, and selling at 85s. to 90s.

Sultanias.—Continue strong, and all varieties have advanced in price. Greeks selling at 137s. 6d., Smyrna at 135s. up to 150s. for fine. Afghans, owing to the scarcity of other growths, are more in request, and realised: red, 92s. 6d. to 97s. 6d.; yellow, 110s. to 120s.

Figs.—The higher prices have checked the demand. Latest quotations are 40s. to 50s.

It is reported that an exposition of Roumanian industry will be opened at Bucharest on August 14.

The receipts of the Suez Canal from April 15 to 21 amounted to 2,630,000 francs, as against 2,270,000 francs for the same period in 1920.

THE CRISIS IN THE TEA INDUSTRY.

An authoritative article on the production of tea in the Empire and its relation to the tea trade of the world is contained in the current number of the *Bulletin* of the Imperial Institute. It deals in an interesting way with the growth of tea drinking in various parts of the world, gives particulars of the industry in all tea-producing countries, and discusses the causes which have led to the present serious crisis in the industry.

India and Ceylon together produce more than two-thirds of all the tea which enters into the world's commerce, their most serious competitor at the present time being Java. At the beginning of 1919 prices in London for all grades of tea were good and stocks in the United Kingdom were not excessive, but apparently no account was taken of stocks held in producing countries. The tea trade had been disorganised by the war and by Government control, and as no danger signals pointing to over-production were raised, the plantations in the British and Dutch Indies in 1919 produced tea to their full capacity. The Russian market, which had been taking nearly 100,000,000 lb. of plantation tea yearly, was lost, and stocks began to accumulate, until in the middle of last year the actual situation was realised, and there was a break in prices for all the lower grades, which have since been selling below the economic value. There is no question regarding the soundness and ultimate prosperity of the tea industries of India and Ceylon, but the immediate outlook for many estates is very critical. The seriousness of the position is apparent from the fact that the plantation industry in the two countries supports at least 3,000,000 workers and their dependents.

It is thus to the common interest of both producer and consumer that the tea industry should be placed on a sound basis. The most serious obstacle, however, to the return of more healthy trade conditions is the great accumulation of stocks of common teas. In the absence of a demand from Russia there appears to be little prospect in the immediate future of reducing the volume of these stocks, but unless this is effected or the sales of tea regulated there can be no recovery in prices for a long time.

ON 'CHANGE.**Business Restricted.**

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday night.

A very quiet tone has prevailed in most markets during the week, and to-day the tendency has been towards dullness, owing to the industrial outlook, business being further restricted by the unfavourable news from Poland.

Gilt-edged securities are closing on a steady note. Consols are 47½, while the Five per Cent. War Loan is 87 11-16 and Fundings are 71½. The Sudan Loan has been fairly firm at 92½, while the new Indian Loan is now at a premium of 3½. Foreign bonds have been firm in most cases; Argentines have, however, been rather dull.

Things have been very quiet in the Industrial group, and a dull tone developed this morning in the absence of buying. Shipping shares have been featureless for the most part. P. and O. Deferred are closing at 345. Eagles have provided the feature of the Oil market during the week, closing just under 7. Burmahs have been rather a weak spot. There is nothing of interest to report as regards Rubbers, except that in a number of instances shares have again moved downwards.

COMPANY NOTES AND REPORTS.**Calcutta Electric Supply.**

The profit of the Calcutta Electric Supply Corporation for 1920, including interest on deposits, was £270,160, plus £45,699 brought in, making £315,859, less debenture interest (accrued) £4,578, preference dividend £24,750, interim dividend of 4 per cent. (actual) on ordinary shares £16,775, income-tax and excess profits duty £32,749 and interest on consumers' deposits £1,385, leaving £235,621. The directors recommend writing off total costs of debenture issue in 1920 £24,793, reserve for taxation £63,000, transfer to reserve fund £5,000, to depreciation and renewals £43,760, to insurance £3,000, to retiring gratuity fund £2,000, final dividend on ordinary shares at 6 per cent. (actual), making 10 per cent., and in addition 1 per cent. bonus, carrying forward £42,386. It is proposed to grant to the staff in India bonus equivalent to 2 per cent. of net Indian profits in respect of 1920. Reserve for depreciation and renewals is increased to £348,719, and reserve fund will stand at £155,991. Expenditure on capital account amounted to £338,936, the total outlay to December 31 being £1,764,844.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated May 2:—During the week ending April 23 general crop prospects unchanged. Bombay cotton market firm; fine M.G. Oomra, May Rs.250, July Rs.268; piecegoods market unchanged. Local cloth market strong; demand continues. Calcutta jute and gunny markets very quiet. Rangoon paddy arrivals fair, with prices unchanged. White rice steady during past week, prices of specials finally firming up to Rs.432.8 per 100 baskets of 75 lbs. each. At tea sales on April 26 offerings consisted mostly in plain cup teas. Good prices for few teas with quality, but the rest weaker, particularly dust. 774,688 packages sold to date at an average price of five annas, three pies per lb. No change in bank rates.

A branch of the Anglo-Egyptian Bank has been opened at Nazareth.

Coupons due May 15 of the Imperial Government of Persia 5 per cent. Loan, 1911, will be paid at 25, Abchurch Lane, or at Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, E.C., and must be left three clear days for verification.

TOBACCO TRADE EXHIBITION.**Cigarette Making Machinery.**

(FROM OUR OWN CORRESPONDENT.)

But for the exhibits of cigarette-making machinery, etc., the recent tobacco trade exhibition at the Royal Horticultural Hall would have been a somewhat commonplace affair. Cigars, cigarettes, and smokers' requisites do not lend themselves to display in the mass, however interesting the individual exhibits are made. There seemed to be rather too much of these things, and too little suggestion of the manufacturing side of the industry.

I have said that the machinery exhibits provided the redeeming feature, and these were well worth a visit. All the best-known makers of cigarette machinery were exhibiting, and the different machines were shown in operation at intervals, and unquestionably provided the outstanding attraction for visitors. The American Machine and Foundry Co., Ltd., manufacturers of the Standard Cigarette Machine, the Chico Cigarette Machine, tobacco cutters, cigar making machinery, etc., had a most interesting stand showing a large variety of their machines. At an adjacent stand Messrs. Carreras were showing their famous Baron "British Empire" Cigarette Machine. Then a little further off the United Cigarette Machine Company had a large stand where they were exhibiting their well-known "Universal" and "U.K." cigarette machines. This firm was also showing their latest automatic knife-grinding machine for circular cigarette knives. Finally, reference must be made to the interesting stand of Messrs. Jones Bros., of Tottenham, showing their "Handfiller" cigarette-making machines and packet-making machines, which have special claims on the attention of small manufacturers, and for which there should be an excellent market in many centres in the Near East.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on April 23 were as follows:—Agricultural Bank of Egypt, £4½; Alexandria Water Co., Ltd., £6 9-16; Anglo-American Nile Steam, £3; Associated Cotton Ginners, £½; Banque d'Orient, Fr. 69; Behera Ord., £E8½; Behera Priv., £3 7-32; Bonded Stores, £9 15-16; Brasseries d'Egypte, Fr. 115; Building Lands of Egypt, £11-16; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 7,700 ex; Credit Foncier Egyptien, Fr. 593; Credit Foncier 1888 Oblig., Fr. 327½; Credit Foncier 1903 Oblig., Fr. 236; Credit Foncier 1911 Oblig., Fr. 228; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 73½; Eaux du Caire Jouissance, Fr. 99½; Egypt and Levant S.S. Ord., 27s. 7½d.; Egyptian Delta Light Railways, £4½; Filature Nationale d'Egypte, £11; Gabbari Lands, £½; Immeubles d'Egypte Soc. An. des., £5 1-16; Khedivial Mail S.S. Co., Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2½; Kom Ombo Ste. Ane. de Wadi, £4½; Kom Ombo Ste. Fondateur, £35; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 44½; Menzaleh Canal Navigation, Pt. 280 ex; Nungovich Hotels, £6 31-32; Ramleh Railway, £1½; Salt and Soda, 27s. 3d.; Tram. d'Alexandrie Priv., Fr. 40; Tram. d'Alexandrie Div., Fr. 52; Union Fonciere d'Egypte, £2 7-16; Egypt Hotels, £2 1-16; Urbaines et Rurales, £3.

During the nine months ended December, 1920, over 43,000 bicycles were imported into India, in addition to a large quantity of parts and accessories.

A Bill authorising the extension of the port of Algiers by the construction of an outer harbour and two basins has been signed by the French President.

Orchestral and band instruments may be imported into Roumania without special authorisation, upon compliance with the usual Customs formalities.

SHIPPING INTELLIGENCE.

GRAVOSA PORT TO BE DEVELOPED.

(FROM OUR OWN CORRESPONDENT.)

ZAGREB, April 30.

As Yugoslavia is deprived of its two natural ports of ingress, and can obtain access to them only subject to the precarious goodwill of two neighbouring nations, the Government has decided to make the best of its only national port, Gruz or Gravosa. Work will shortly be undertaken to render the port usable by ocean-going steamers and to convert it also into a base for the navy. As a port it is not so bad, but it is connected with the interior only by a narrow-gauge mountain railway of considerable length, with a change at Brod, on the Save, to standard gauge, involving a breaking of bulk.

CALCUTTA'S NEW DOCK.

The work is well in hand on the King George's Dock in Calcutta, says the *Journal of Commerce*. Owing to the nature of the soil, it is proposed to construct both entrances and the dock itself by sinking wells or monoliths. The first section of the work will consist of the entrance lock and dry docks and the northern portion, comprising altogether 11 berths, arrangements being made to use the first five of these as soon as they are ready, probably by 1927. It is estimated that each year's work will involve the utilisation of large quantities of bricks, lime, cement, steel, and stone, and that 13,250,000 cubic feet of excavating will be done, employing some 10,000 labourers. The dock system will consist of a basin and two long arms, each about 4,500 feet long by 650 feet wide. When complete the water area of the dock will be about 190 acres, the length of the quay wall about 25,000 feet, and the number of berths 35. The two dry docks will measure in all 1,190 by 80 feet. Thirty-three of the berths will be equipped as import or export berths, one will be for steamers waiting, and the other will be equipped for heavy lifts.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia, for Bombay (taking cargo for Karachi and coast ports), (Glasgow, May 18, and Liverpool, May 31).

Anchor-Brocklebank Line.—S.s. Matheran, for Port Said, Colombo, Madras and Calcutta (London, May 26); s.s. Masirah, for Calcutta (Birkenhead, May 28); s.s. Imani, for Port Said, Colombo, Madras and Calcutta (London, June 11).

Bibby Line.—S.s. Herefordshire, for Rangoon (London, in May); s.s. Leicestershire, for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 25).

Byron Steamship Line.—S.s. Maid of Delos will sail shortly from Liverpool to Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila.

Clan Line.—S.s. Mactaggart, for Colombo, Madras and Calcutta (Birkenhead, May 19); s.s. Clan MacKellar, for Bombay and Persian Gulf (Birkenhead, May 23).

Cunard Line.—S.s. Tyria, for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania (Liverpool, May 26; Manchester, May 26; and Swansea, May 31); s.s. Brescia, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna,

Constantza, and Sulina (Liverpool, June 1; Manchester, June 1; Glasgow, June 6; and Swansea, June 8).

Ellerman Line.—A steamer will sail for Gibraltar, Malta, Syra, Smyrna, and Constantinople, on June 11 from Liverpool.

Ellerman's "City" Line.—S.s. City of Manchester, for Calcutta (Birkenhead, May 16); s.s. City of Exeter, for Bombay and Karachi (Birkenhead, May 27); s.s. City of Bristol, for Calcutta (Birkenhead, May 30).

Ellerman's "Hall" Line.—S.s. Rialto, for Karachi and the Punjab (Liverpool, in May); s.s. City of Baroda, for Bombay, Karachi and the Punjab (Liverpool, June 3).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Mediterranean, Egypt and Levant ports.

Glen Line.—S.s. Glenshane, for Port Said, Port Swettenham, Singapore, etc. (London, May 19); s.s. Glenamoy, for Port Said, Port Swettenham, Singapore, etc. (London, June 2); s.s. Glenade, for Port Said, Port Swettenham, Singapore, etc. (London, June 16); s.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, June 30).

Glynn Line.—S.s. Riposto, for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, in May).

Harrison Line.—A steamer will sail for Calcutta on May 19 from Liverpool.

Henderson Line.—S.s. Bhamo, for Port Said and Rangoon (Birkenhead, May 18).

Holt Line.—S.s. Ixion, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 13); s.s. Lycan, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 13); s.s. Helenus, for Port Said, Port Swettenham, Singapore, etc. (Swansea, May 13, and Birkenhead, May 20); s.s. Calchas, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 20).

Johnston Line.—S.s. Aviemore, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, May 21); s.s. Venice, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, June 11).

Maindy Line.—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, middle of May); s.s. Maindy Transport, for Antwerp and Moroccan ports (London, middle of June).

Moss Line.—S.s. Litra, for Gibraltar, Algiers, Malta, Alexandria (transhipping to Moroccan, Cyprus, and Syrian coast ports) (Liverpool, May 28); s.s. Limoges, for Gibraltar, Malta, Piræus, Syra, Smyrna, Salonika and Constantinople (Liverpool, June 18).

Papayanni Line.—S.s. City of Palermo, for Malta and Alexandria (taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, Cyprus, etc.) (Liverpool, May 13).

P. and O. Line.—S.s. Nyanza, for Colombo, Madras, and Calcutta (also taking cargo for Malta, Port Said, and Aden) (London, May 20); *s.s. Kashgar, for Bombay (London, May 20); *s.s. Karmala, for Bombay (London, June 3). (*Taking cargo for Gibraltar, Port Said and Aden; also with transhipment at Bombay for Indian coast and Persian Gulf ports.)

P. and O. British India Line.—S.s. Margha, for Colombo, Madras and Calcutta (taking cargo for Port Said, Suez and Aden) (London, May 13); s.s. Gambada, for Bombay and Karachi, calling at Port Sudan (taking cargo for Persian Gulf and Malabar coast ports) (London, May 14); s.s. Mancla, for Bombay and Karachi (taking cargo for Persian Gulf and Malabar coast ports) (London, May 28); s.s. Hatimura, for Colombo, Madras, and Calcutta, calling at Port Sudan (taking cargo for Port Said, Suez, and Aden) (London, June 4); s.s. Machobra, for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, June 24).

On May 1 a steamship service was inaugurated between Vienna, Pressburg, and Belgrade.

Samouprava states that the Yugoslav Government is considering a scheme for cutting off the bend on the Save at Koupinovo, which, in addition to shortening the course of the river by about 20 km., will permit of the draining of the neighbouring marshes, and will supply water power of some 20,000 h.p.

ANCHOR LINE

FIRST-CLASS PASSENGERS ONLY.

LIVERPOOL to BOMBAY.

KARACHI (via Bombay) calling at Gibraltar and Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.

FITTED WITH ELECTRIC FANS.

NOTES OF THE WEEK.

Arab and Jew in Palestine.

An inquiry is being held into the Jaffa riots, and until an official report on the subject has been issued most people will be content with a sweeping denunciation of the incident. Certainly there can be no question of revising British policy in Palestine or introducing new schemes on the strength of any deductions made in one quarter or another from the regrettable occurrences in Jaffa. For this reason we hold Mr. Jabotinsky's proposal, outlined in a letter to *The Times*, at least premature; he would make a British garrison, with one-half of its strength recruited locally from Jewish inhabitants, responsible for the maintenance of order in Palestine, and would refuse the Arabs the right to bear arms. Now, whatever degree of responsibility may be proved to attach to Arab policemen in connection with the deaths of Jews and Arabs at Jaffa, such a suggestion as that put forward by Mr. Jabotinsky offers no permanent arrangement for the country. Arabs and Jews will have to live side by side on equal terms, and the responsible people among both must get together to pave the way to that goal. Some outbursts may prove unavoidable, but the surest way to perpetuate unrest will be to appear to weight the scales in favour of the Jewish minority.

Keeping Touch with Angora.

It would be of interest to know to what extent touch is being maintained between the Allied Governments and the Angora authorities. In view of Mr. Montagu's declaration that the Allies are prepared to secure a special autonomous organisation for Adrianople, there would seem to be a distinct need for conveying this decision officially to Mustapha Kemal Pasha. Presumably the French are able to carry on their negotiations regarding Cilicia, and the statement of Bekir Sami Bey to the effect that a new Allied Conference in connection with the Treaty of Sevres will take place shortly in Italy suggests that information passes between Rome and Angora. But Bekir Sami Bey's assertion has been contradicted by the British Government. It is desirable, therefore, that, if the Allies as a whole have come to any new decision with regard to the Turkish settlement, the communication of that decision should be made in agreed terms which do not leave any loophole for misunderstanding. The report that the Turks are preparing trouble in Thrace with the object of preventing the movement of Greek troops from that province to Asia Minor may or may not be true; but it suggests the possi-

bility of the Allies' finding that the pitch in Thrace has been quered, and that their well-meaning endeavours to evolve peace in the Near East have been frustrated. Without doubt the Angora Government ought to have known all about the Allies' intentions regarding Adrianople as soon as, if not before, the Indian Moslem Delegation learned them from Mr. Montagu.

A Turkish Gendarmerie.

Brigands have for some time been active in the Constantinople-Ismid region, and it is now announced that General Harington, the G.O.C. of the British Army in Constantinople, is organising two companies of Turkish gendarmes and a squadron of Turkish cavalry, all under British officers, to put an end to the activities of these gentlemen. The arrangement is said to be made "without prejudice to future Allied decisions." That is, if we may say so, distinctly British; and—if we may say so again—the new force, therefore, starts off under very happy auspices. British officers have served in the Turkish Gendarmerie in the past, and the partnership has always had good results. Officers and men have usually become good friends very quickly, and we have the best of reasons for saying that the officers as a rule were enthusiastic believers in the good qualities of the Turk. Conditions in the Ismid region just now are not perhaps as favourable as could be desired for a renewal of the old good understanding. Nevertheless, if the right type of officer be chosen it will surely come about, and we therefore very heartily welcome the announcement made.

Great Britain and Hungary.

The vote of thanks passed by the Hungarian Parliament to those members of the House of Commons who spoke in favour of Hungary on the occasion of the ratification of the Treaty of Trianon may be taken as part of a definite Magyar policy to bring about closer relationship between the two countries. On April 29 the *Pester Lloyd* devoted two pages to a report of the House of Commons session on April 20 and an able article on Anglo-Magyar relations, both from the pen of M. Felix Valyi. The burden of the article was to prove that the Hungarian question is part and parcel of the problem of the Orient, closely linked with the future of Turkey and of Islam, as well as with the Russo-Polish question; that from the days of Cromwell the importance of Hungary to England had been acknowledged by English statesmen; and that only closer co-operation between Great Britain and Hungary would enable the former to prove equal to her destiny in Asia. Just as an understanding

with Turkey, its advance-guard in Europe, is necessary if the problem of Islam is to be solved, so, runs the argument, is an understanding with Hungary necessary if full advantage is to be taken of the opportunities offered by Turkey.

A Practical Policy.

All that M. Valyi says is interesting, and much of it is very true; but his line of argument forces him to separate Hungary from her geographical position and to arrogate for his country a rôle that strictly belongs to South-Eastern Europe as a whole. Indeed, he accomplishes the feat of discussing the relations of Europe and Asia, and the part that Great Britain can play in the latter continent on the strength of Magyar and Turkish co-operation, without mentioning Hungary's neighbours beyond a passing reference to what he calls the "egotistical Balkan peoples." But it is difficult to see how Hungary can look eastwards without a thought for the countries lying between her and Turkey-in-Asia. The mere fact that she has set her aspirations so high at this time will confirm her neighbours in their belief that she is still a menace to Europe. There is only one world policy feasible nowadays—the promotion of peace—and that sums up from A to Z Great Britain's mission in Asia or anywhere else. The British people would gladly welcome any co-operation that the Magyars can give them to this end, but the most practical contribution that Hungary can make is to improve her relations with her neighbours, to disarm their suspicions, and to see that nothing is done to revive international misgivings. Hungary has ample evidence of Great Britain's goodwill, but obviously there can be no real *rapprochement* so long as any such step might legitimately give offence to our Balkan Allies on the ground that Magyar policy is still prejudicial to the peace of South-Eastern Europe.

Tea and Politics.

"Tea and tattle" has long been recognised as a dangerous combination in other countries besides Great Britain, but it has been left to Egypt to discover the possibilities of the tea-party as a political weapon. Of late we have heard a good deal about tea-parties given in honour of this notable or of that; and one given quite recently in honour of Zaghloul Pasha has led to much heart-burning, and may well have far more serious consequences. The Cabinet, it seems, forbade certain Government officials to organise this entertainment, and on its prohibition being ignored very naturally suspended the offenders. At the party Zaghloul Pasha made an attack upon Adly Yeghen Pasha, which was of so virulent a character that the majority of the Legislative Assembly delegates present, who were the guests of honour, left the room. But this sign of disapproval of Zaghloul's present mood and methods did not deter a number of officials from discussing the advisability of striking, as a mark of sympathy with their disobedient fellows. Possibly because the Cabinet let it be known that any officials who struck would be summarily dismissed, the meeting decided against a strike. So far the Cabinet has shown commendable firmness, and the Zaghloulites have achieved nothing—unless it be an achievement to rival the Mad Hatter and the March Hare in the matter of tea-parties.

A Word to the Extremists.

It is much to be regretted that Zaghloul, having captured the fancy and won the favour of the Egyptians, should at this critical time fail to use his undoubted power in the right way. In allowing himself to be influenced by pique and personal ambition, as it can hardly be denied that he is doing at present, he is doing his country the worst turn possible. For, unless he is ready to admit that he demands the leadership of the Official Delegation from reasons of personal vanity, he says in effect that he does not believe that Egypt can produce any other man capable of representing it; and by their blind, but vociferous, support of his claims the Extremists seem to show that they share his belief. If he and they were right Egypt would indeed be bankrupt of statesmen. Fortunately for those who wish to see the Milner proposals put into practice, the Moderates appear to be gaining ground. But the Extremists would

do well to remember that the proposals are as yet only proposals, and that manœuvres such as those lately executed by the Zaghloulites will not help to convert them into accomplished facts.

Our Withdrawal from Persia.

The Persian ambition to see both the British and the Bolshevik forces leave the country is in a fair way towards realisation. The Teheran correspondent of *The Times* reports that the Bolshevik troops are now being withdrawn from the Menjil front, and that the evacuation of our own troops is proceeding rapidly. It is perhaps permissible to guess that the Persian Government would prefer that if there is to be any delay at all it should be on the part of the British. Indeed, there can be very little doubt that they would have been glad if we could have kept a force on the spot while they formed a working army of their own; and they are unlikely to have forgotten that, quite apart from other considerations, geographical facts make it certain that the Bolsheviks could undo their work of evacuation much more quickly than we could. It is all very well for Commissar Rothstein, the newly-arrived Bolshevik Minister, to pay roundabout compliments to the Shah and to proclaim that the independence of Persia is dear to the Soviet, but the Persians are not altogether simpletons, and however much the leopard may talk of having changed his spots they would probably prefer to see for themselves that he had shed his claws.

Lord Reading at Simla.

Lord Reading's speech to the Simla municipality, the text of which was promptly circulated in this country, was obviously intended for a wider audience, and it may fairly be described as the pronouncement of a diplomatist. Apart from the compliments inevitable on such an occasion, the bulk of it consisted of a declaration that the ordinary law—not special measures of repression—must be enforced against those agitators who have been inciting the people to violence, but incidentally there was a hint that men like Mr. Gandhi, who "have consistently denounced violence," might see their way to assist in the solution of conflicts of opinion by promoting mutual sympathy and understanding. Whether this hint has led to business is still uncertain. The cable has said that Mr. Gandhi had an interview with the Viceroy during the week-end, but up to the time of going to press no further information has been received. There have, however, been indications that Mr. Gandhi and some of his associates have been disquieted by recent developments of the propaganda initiated by them, and it is possible that some of them may be seeking an opportunity of rallying to the Constitution; in that case the clear duty of the Government is to make things easy, and the task is one for which Lord Reading's gifts are particularly suitable.

The Indian Census.

In spite of strikes and other obstacles, India was able to take the Census according to plan, and the provisional figures have been published with commendable promptitude. The results are not very different from what was expected; the population of Burma has continued to increase, but India proper has as a whole stagnated, and the effect of the terrible epidemic of influenza three years ago is plainly visible in the totals returned for many parts of the country. The final figures must be awaited before definite inferences can be drawn as to all the causes at work, but, causes apart, we do not think the stagnation is a matter for regret. The great need of India just now is an acceleration of that improvement in the standard of life which has proceeded so slowly that many Indians have failed to notice it. India as a whole is not over-populated, though congested areas unhappily exist, but the country needs quality rather than quantity, and a temporary slackening in the rate of increase at least gives time for the ameliorative influences to work; the extent of their operation depends mainly on the lead given by those Indians who have gained the people's ear, and it is particularly unfortunate at the present juncture that the gospel of grinding poverty should be preached so widely by Mr. Gandhi and his associates.

THE WEEK AT HOME.

Holidays at Home ?

It is a strange Whitsuntide. The coal stoppage continues; there is talk again of a partial railway and transport strike. The simple life is no longer a luxury of the idle rich—it is becoming so much a necessity that England will soon be a very nice country to live out of. Travelling by rail is getting impossible except for the pure-bred Londoner, who has got so used to strap-hanging and having his toes trodden on that he has almost forgotten how to sit down in public; but people are putting a brave face on it, and are holiday-making by road, in motors, motor-buses, and bicycles—anything rather than stop in that "home, sweet home" which we worship in the abstract and avoid in the concrete.

London is taking what the newspapers call "the creeping paralysis" of the coal crisis rather casually; and the countryman, in these days of revived agriculture, is too busy to think about such things. It is the Midlands and the North that are feeling the pinch—and the holiday resorts. At one famous spa, usually busy at this time of the year, there are hardly any visitors; the baths are deserted, the doctors and nurses are idle, and the Blue Transylvanian Band is playing in what used to be called the Kursaal to the waitresses and the programme-sellers. The South Coast seaside places are less unhappy, because the motor-charabancs bring them a good many people, but the East Coast, which is not so well served, is almost deserted, and several of the hotels which usually open on May 1 are shut, and show no signs of life.

On the actual coal question there has been no indication of compromise or agreement. Outside parties have proffered disinterested suggestions which have at least the appearance of being reasonable to the lay mind, but neither owners nor miners have given any sign. It is manifest that each side wants to break the power of the other, and when that temper exists, the struggle is likely to be a long one.

The State and the Struggle.

Unluckily the trouble shows every indication of spreading. In order to keep essential services going the Government has imported coal from abroad, and there has been a disposition among railwaymen to look on this as "tainted," and refuse to handle it. One sees their point of view, but I think it is logically untenable. Capital and Labour in the coalfields may fight till Doomsday, but the rest of us propose to go on living, and it is not yet a crime to burn logs in one's grate because coal cannot be obtained, nor is it a felony to get on a motor-bus because the railways are starved for fuel. Every man for himself, but the State for us all, and if coal is necessary for certain essential purposes, then it is up to the State to see that it can be obtained from abroad if it is not produced at home.

Englishmen, being a practical race, have never worked out a systematic theory of the State, but it looks as though they may have to do so one of these days. But we shall have to do it on ethical, not economic lines; for in the present economic struggle between Capital and Labour neither side is entirely right; both sides are pursuing ulterior motives which are entirely economic, and ethics seem forgotten. Yet in the long run the State must depend on ethics, not economics, and there is nothing non-ethical in protecting the common interest of every citizen while two sections of the community are engaged in starving each other out. The fact that they are incidentally starving the rest of us gives us not only an interest in their proceedings, but compels us to discover alternatives to their services.

Protection in Parliament.

The House of Commons has been engaged in discussing Protection—one hopes there will be some industries left to protect when the present industrial troubles are over. On the whole, the Government has so far had an easier passage than was expected. Sir Godfrey Collins, the publisher, has deserted them, but otherwise the Coalition shows no sign of splitting over fiscal questions. Undoubtedly this fair weather has been largely due to Sir Alfred Mond, a one-time Free Trader, who spoke from the Government side and

denounced his old allies. They took it in good part, although Mr. Wedgwood Benn could not resist quoting Browning's "Lost Leader." But they seemed unable to answer his arguments, and Mr. Asquith, who used to be the pillar of Free Trade, was as ineffective on this as on other controversial questions when he delivered his set speech.

The German Acceptance.

Amid the troubles at home, the German acceptance of the Allied terms has passed with little notice. At least one source of trouble has now been removed. A great many people were apprehensive of rather serious entanglements, but the Government appears to have gauged the situation accurately, and those who stood by France in determining to exact reparations have now been justified.

M.P.'s Salaries.

But the Government has been severely criticised for another decision. It announced that in future members would be given free travelling facilities and receive their salaries free of income-tax. There may be a case for franking them on the railways, for journeys to their constituencies in these days of dear travelling make a hole in the modest £400 a year; but there is no case whatever for exempting them from the payment of taxes. It is a vicious principle to have any privileged class free of taxation, but of all men who pay the tax surely the last man to be exempted is the man who decides its amount. There has been a universal outcry against the decision, and it will almost certainly be rescinded. It is already being suggested that the difficulty should be got over by allowing members £500 instead of £400 a year, which would work out apparently at very much the same thing as exempting them from income-tax, but at a time when wages are generally falling there really seems no reason why the nominal guardians of the public purse should vote themselves more.

Two Visitors.

London has been interested in watching the Japanese Crown Prince, who has made a round of public and ceremonial visits. He was not in the least what was expected, and looked far more like a serious medical student in uniform than the heir to a great military Empire. The new American Ambassador has also arrived, and his photograph has been in all the papers; but he was already fairly well known in London as a publisher and journalist. There has been some criticism of his appointment in America, but none here.

The Oil Age.

The nineteenth century was the age of coal; it seems probable that the twentieth will see the beginning of the end of its predominance. The constant upheavals in the coal trade and the continuous increase in the price (to say nothing of the deterioration of quality) have given oil its opportunity. The head of a great engineering firm told me a day or two ago that he could stand one coal strike, but not two in a year; he has work on hand and hundreds of men in regular employment, but had he relied on coal the contracts would have been cancelled and the works closed. The whole of the shops have now been converted to oil engines, with the exception of two, which, for technical reasons, must be worked with anthracite and coke. The price of oil has fallen, the supply is adequate, and even if coal were plentiful and cheap nothing would induce this firm to return to the older method.

The same tale is told everywhere. Locomotive engines are being converted to burn oil—the process of conversion is said to take only a few days—and the Underground Railways and County Council trams are seriously considering turning to oil for their power. Coal has held its own against oil so long because it was cheap, accessible, and easily obtained. Now that all these attributes have vanished the twilight of the coal age seems to have set in. Oil will at least make for a cleaner and less foggy civilisation.

Direct Action in Cricket.

It is said that the professional bull-fighters in Spain stopped in the middle of the fight the other day, and applied direct action to get shorter hours and higher wages. We have not quite come to that in England yet,

but we seem to be near it. The Australian cricketers are agitating for a shorter day—twelve to six—with a five-day week; and the usual lunch and tea interval, which will reduce cricket to about four hours a day, I suppose. The price of admission is also increased when they are playing. This sort of thing will kill cricket if it goes any further; possibly there will be a down-stumps movement and a demand for a national pool in the middle of the first Test match. But if the professional element once dominates first-class cricket, its doom is certain.

Births, Marriages and Deaths.

Owing to the unsettled industrial position, the census has been put off for a few weeks. But the Registrar's figures, usually accurate enough, for the first quarter of 1921, contain some interesting information. Births have fallen very heavily, as compared with a year ago—that was, the most fertile year for a long time, the present is the least (with the exception of the war years). Even at that, however, there was an excess of births over deaths during the first quarter of 1921 of 80,000—the death-rate, which was the lowest on record last year, having again fallen. In spite of rates and taxes, strikes, lock-outs, and other incidental worries of existence, people show a tendency to live longer than ever—perhaps these troubles are good for us.

The Week's Books.

A new Ibañez novel has been published by Constable—"Woman Triumphant." The Spanish writer is now becoming one of the most popular in England, and the present work is well up to the level of "The Four Horsemen of the Apocalypse" and "Mare Nostrum."

It is said that every young Oxford graduate writes a novel about Oxford—Cambridge men do not do just this sort of thing. Some of these books get published; many will remember, for example, Humphrey Dickinson's "Keddy" a few years ago, which raised high hopes that would have been fulfilled had not Dickinson died heroically in the war. But those who like this

kind of book will be well advised to get "A City in the Foreground" (Constable), by Gerald Hopkins, which describes university life at the present day.

"Meteorology" (Blackie), by A. E. M. Geddes, is, so far as I know, the first great work on the weather. As a matter of fact it is a good deal more than that, for it discusses the atmosphere, radiation, storms, snow, hail, the cause—not the cure—of fogs, and the various instruments which the modern meteorologist uses. Perhaps the most interesting section is the illustrated chapter on Clouds. This is likely to become a standard work.

Robert Moffat, the father-in-law of Livingstone, was one of the missionaries who made history. His son, "John Smith Moffat" (John Murray), was only second in distinction to his father; old South Africans will remember that he could not always see eye to eye with Cecil Rhodes. His life has now been written by his son, and it is something more than the usual biography of a missionary—it is a record of adventures, both physical and spiritual, undergone by a heroic man in the wilderness.

Mr. H. G. Wells bids fair to leave a hundred volumes when he dies, so rapidly does he produce books; indeed, he is showing more and more a tendency to sacrifice quality to quantity. "The Salvaging of Civilisation" (Cassell) is a plea for a United States of Europe. It strikes one as the hurried work of a tired man; even the style has less than the usual grace and spirit. One would like to compel Mr. Wells to take a holiday for two or three years—to cut the traces and camp the horses, as he put it in one of his earlier works—and then he would give us something really good.

In "The Acquisitive Society" (Bell), by R. H. Tawney, a plea is put up for the reconstruction of society on a more communistic basis; acquisition—that is to say, individualism and capital—has broken down, and a new motive must be set up, which can only be found, according to Mr. Tawney, in co-operation, not competition; he believes that the higher ethical concept will secure increased economic efficiency.

OCELLUS.

The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

Also:—
THE "UNIVERSAL" CIGARETTE MACHINE.
THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.
"S.M." DOUBLE AUTOMATIC CIRCULAR KNIFE GRINDING MACHINE.
AUTOMATIC CIGARETTE-WASTE STRIPPING MACHINE.

United Cigarette Machine Co., Inc.
59, Holborn Viaduct,
LONDON, England.

THE NEAR AND MIDDLE EAST

(From Our Own Correspondents.)

YUGOSLAVIA

ZAGREB, May 5.

Attempt on M. Drashkovitch.

On grounds of health, M. Drashkovitch has been trying for some time to resign the portfolio of the Interior, and it was actually reported a little time ago that he had done so and that M. Pribitchevitch had taken over. Believing this report, I passed it on; but it was, after all, not true. Change in the Cabinet was very undesirable at the moment, and M. Drashkovitch consented to carry on a little longer. Then the lamentable and sudden death of General Yovanovitch, the Minister for War, created a vacancy, which must be filled without delay. M. Drashkovitch stepped into the breach and performed the duties of Minister of War over the Serbian Easter, when many of the members of the Government were away. They are now back in Belgrade, and the shuffling of the Cabinet is being discussed.

In this connection, the Democratic party was holding a meeting at the Kolarats on Tuesday, and Dr. Davidovitch, M. Drashkovitch, and two friends left the building about midnight. Suddenly a young man, about 20 years of age and well dressed, walked up to the party, levelled a revolver at M. Drashkovitch's head and fired. The weapon missed fire, and, startled by the two clicks, as he made a second attempt, the man lost his head and bolted towards the Pozorishna Ulica. M. Drashkovitch at once ran after him and endeavoured to catch him, armed only with an umbrella, with which he succeeded in hitting him once or twice but without knocking him over. Youth was on the miscreant's side, and he succeeded in making his escape through the deserted streets. The crime is attributed to revenge on the part of the Communists for the Minister's drastic action in suppressing their nefarious plots.

Yugoslavs in Rome.

In Rome there is an establishment called the "Istituto di San Girolamo degli Schiavoni," which has been, and is likely again to be, the subject of considerable diplomatic activity.

As long ago as the thirteenth century a considerable number of Croats performed pilgrimages to Rome, and set to work to provide themselves with a home. They bought a piece of neglected land between the Castello S. Angello and Ripette, put the ground into cultivation, and, of course, planted vineyards. Gradually the district became built over, and we find such street names as Ripetta, Schiavonia, and Vicolo degli Schiavoni. By a Bull of April 21, 1453, Pope Nicolas V. gave the Croats the little church of St. Marina, with permission to form a hospice there. They accepted the gift and rechristened the church after St. Geronimo, who was known to be a Yugoslav, either from Dalmatia or from Medjumurje. It remained an essentially Yugoslav institution, patronised by all Roman Catholic Croats and their kinsmen. In 1842, it was taken under the protection of Austria-Hungary, in consequence of which it was treated as enemy property during the war; and now the Yugoslavs claim it as their national property. This, of course, does not suit the Italians, and a deputy recently put a question in the House on the subject. The point is that the Italians are trying to maintain that it is Dalmatian or Illyrian, as opposed to Croat or Yugoslav, it being their policy that Dalmatia or the ancient Illyria is part of Italy. As the Italians have succeeded in getting Zadar (Zara), some of the islands, and virtually also Fiume for themselves, it is a matter of considerable importance to Yugoslavia.

The sentimental interest is great. Saints Cyril and Methodius, the apostles of Slavdom and inventors of the Slavonic alphabet, studied there, as well as plenty of Croatia's most distinguished scholars. But apart from this, the practical and mundane interest is strong. The institute contains a valuable collection of historical material, and has considerable property. Bishop Strossmayer, who was virtually the founder of the Yugoslav

movement, alone endowed it with 20,000 florins, and there were many others.

"As Others See Us."

The Croatian papers followed the crisis in England with very close attention, and welcomed the decision of the railway and transport worker as evidence of the good sense of the English, which is sure to prevail in the long run. Now that the matter is reduced to a pure mining strike, interest has fallen off. The papers continue, however, to give thumbnail sketches of the prominent men on both sides.

A Journalistic Resurrection.

The great Russian daily, the *Novoe Vremya*, has reappeared, and it is nice to see the familiar old title, with the same old type, once more. It is produced by the same brains, for M. A. Suvorin is a refugee in Belgrade, his great possessions and business having been destroyed or confiscated by the Bolsheviks. No. 1 appeared recently, and the price is one dinar. It is devoted, naturally, chiefly to Russian interests, and is produced in the former style, though on a more modest scale, and in a more democratic spirit, as befits the changed times.

ROUMANIA.

BUCHAREST, May 4.

The Orthodox Easter.

All official business has ceased for a week on account of the Easter Holiday. The feast is celebrated here in accordance with the usage in the Greek Orthodox Church, and after the old calendar; for even the Germans, during their short reign here, were unable to induce the Primate either by persuasion or coercion to adopt the calendar of Western Europe, though it has been adopted for all secular business. This often causes confusion, for religious societies are in the habit of sending out notices of their meetings giving the dates according to the old style, without saying so, whereas in all other matters the new style is used.

On Good Friday evening the King, attended by the Court, went to service at the Cathedral at 7.30. The Ministers and high functionaries of State, Foreign Military Attachés, and General Officers of the Army were also present, and the troops of the garrison were massed in the Cathedral Court. The service lasted about an hour. On Saturday night the King, accompanied by the Royal Guard, attended the midnight Resurrection Service at the Cathedral, during which, according to an old tradition, he signed his name in the Bible. All the high State officials were again present.

The theatres and places of amusement have been empty all the week, as Orthodox Christians have been absorbed in their devotions.

There have been one or two very good concerts, however, which drew large crowds. On Easter Monday Huberman played at the Athenée to a crowded and very appreciative audience, while on Tuesday the Philharmonic Society gave a symphony concert in the afternoon, with M. Georgescu conducting. In the course of the next week Madame Cella Delavrancea (who has recently married M. Aristide Blank, of the well-known bank of Marmorosch Blank and Co.) will give a series

TURKEY.

CONSTANTINOPLE, May 4.

Imperial Princes Need Not Apply.

The sudden and clandestine departure of the son of the Heir Apparent last week caused a sensation only equalled by his equally sudden return. Prince Omar Faruk is a really fine young man of about twenty-three or four years of age, and has had a thorough military training in Germany, which he considered would be of some value to his country in its struggle against the Greeks. Hence his sudden excursion to Ineboli. Such have been the bitterness and intensity of Nationalist propaganda against the Sultan that it was pardonable to conclude at the time that the young Prince had come to an arrangement with the Nationalist Administration whereby he would be proclaimed Regent upon his arrival in Angora. As it happened, however, he was not even permitted to land, and it is, therefore, clear that he must have been acting entirely on his own account so far as the Nationalists were concerned. There was a time when the Nationalists were exceedingly eager to attract an Imperial Prince to Anatolia, and it is clear that some change has occurred in the meantime. There is not the slightest doubt that the Angora Administration is resolved to take certain steps against the present Sultan when the right moment comes. Why, therefore, have they refused to allow Prince Omar Faruk to enter Anatolia? It may be that their plans are not yet sufficiently advanced, and the presence of the Prince might be a source of embarrassment. On the other hand, it is possible that their plans are much more advanced than most people suppose, and that those plans concern not only the present Sultan personally, but the entire Imperial Family. As long ago as last August, when Jelaeddin Arif Bey went to Moscow and a Bolshevik

delegate arrived in Angora, it was ascertained that the Khalifate question had been discussed between the Angora and Moscow Governments. Obviously the combination of theocratic and political powers in the hands of a monarch is contrary to the elementary principles of democracy, apart from the doctrines of Bolshevism, and as the Nationalists are nothing if not democratic, like their predecessors, the Young Turks and the Committee of Union and Progress, the only solution is the separation of the Khalifate from the Sultanate. This is probably the clue to the refusal of the Nationalist authorities to allow Prince Omar Faruk to land at Ineboli.

Current of Nationalist Policy.

The dynastic question may be regarded as the dominant factor in the interior policy of the Nationalist programme to-day. The Great National Assembly has ratified a new constitutional law, which supersedes the old Constitutional Charter, and deprives the Sultan of all his administrative prerogatives with the exception of the power to pardon criminals. The theory is, of course, sound enough from the democratic point of view; but democratic principles cannot be applied to Turkey in their entirety. The truth of the matter is that the changes made by the Nationalists in the Constitution are based upon considerations other than those connected with democratic principles. In the first place, it is clearly realised that the present Sultan is an inveterate foe of what may be termed the Janissary rule, inaugurated by the Young Turks and emulated by the Nationalists. The only way of obviating reprisals upon the part of the Sultan against the leaders of the Nationalist movement as soon as peace is concluded is to clip his wings.

The other reason is of more importance, and is bound up with Nationalist foreign policy, the keystone of which is militant Pan-Islamism with the support of the Bolsheviks.

The foreign policy of the Angora Government is to-day perfectly apparent. Treaties have been signed with the Russians and the Afghans, who are also bound together by a complementary treaty. Thus Angora and Kabul are the basic angles of a triangle, of which the apex is Moscow.

It is not surprising in these circumstances that there should be good grounds for believing that deep-laid plans have been made for stirring up trouble in Syria, Palestine, Mesopotamia, Arabia, and Persia, to say nothing of Egypt and India.

The Moral Effects of the Greek Reverse.

As was to be expected, the effects of the Nationalist victory at In Eunu have not made the political situation any easier. The moral of the Nationalists has improved considerably, and they are quite persuaded that in time the Greeks can and will be driven out of Anatolia entirely. The result has been that the agreement concluded with the French by Bekir Sami Bey in London has not been endorsed by the Great National Assembly, which requires certain drastic modifications of the most important clauses before it will consent to a permanent peace. Even towards their good friends the Italians the Nationalists have been rather rude recently. The Angora Press has been publishing articles in which Italian military history is reviewed from the perspective of Adis Abeba and Tripoli, which is unkind at least; and all apparently because an over-zealous Italian official had the effrontery to meddle with a Nationalist postal courier. So far as the British are concerned, the Anatolian Press is more bitterly hostile than ever, and refuses to believe for an instant in British professions of neutrality in the recent fighting. This means that to the Nationalists Greek failure is equivalent to British failure, and the situation is thereby further complicated.

British Policy.

Certainly, British policy in Turkey has not been more successful since the Armistice than it was prior to the Great War. For some time it was difficult to tell whether we had any policy towards Turkey or not, but it became clear in time that we favoured "the substitution for a decadent and hostile Turkey of a resurgent and

progressive Power that will ensure peace and prosperity in the Near East." Even so, outstanding mistakes have been made by the British Government. The most important mistake seems to have been a complete inability to appreciate the Turkish situation in particular and the Near Eastern situation in general. The next most important mistake was the complete failure to give the Greeks the moral support they required against the Angora insurgents at a time when it might have been possible for them to fulfil the task assigned to them. That would have meant insisting with the utmost firmness that sticks were not to be thrust by others between the legs of the Greek army whenever it began to advance, and that assistance should not be given to the enemy. There were, doubtless, good reasons why this step could not be taken, but, then, our policy should not have been based upon an undertaking which we ourselves were powerless to assist or save from failure. The final mistakes have been misplaced faith in the power of Greece, and the ignoring of the fact that the total population of Greater Greece is barely that of London, whilst the conquest of Anatolia would be an undertaking more arduous than that of South Africa.

The present position is that the Power we have backed is unable to advance and dare not retreat. We are unable to afford any assistance, and, on the other hand, we have practically destroyed all hope of a reconciliation with the Turks. Such is the position to-day, and if the back numbers of THE NEAR EAST are re-examined it will be found that no more and no less was expected.

ALBANIA.

TIRANA, April 28.

Opening of Parliament.

Contrary to expectation, Parliament was opened on April 21, with all due ceremony. The Deputies for Scutari had been elected already, but had not arrived, and the Deputies for Dibra, Lumi, and Hassi were not present; but the Government did not wish to postpone the opening any longer. Of a total of eighty-six Deputies, seventy-one were present. Thus, on Thursday, the three members of the Supreme Council—Akif Elbasani, Dr. Michael Turtuli, and Abdi Toptani, Monseigneur Bumci being detained at Scutari by reasons of health—inaugurated the first Albanian Chamber elected by the universal (but indirect) suffrage of the nation. Mr. Eyres, the British Consul; M. Castoldi, Italian Minister; M. Gobi, Italian Consul at Durazzo; the entire Mission of the American Red Cross; and many Albanian notables had been invited to the ceremony.

Dr. Turtuli read the Inaugural Speech. It dwelt upon the firm intention of Albania to maintain good relations with all the Powers and especially with its neighbours. It touched on the entry of Albania into the League of Nations, as a guarantee of the political life of the country. Then it expressed the hope that the pourparlers opened up at Rome with the Consulta will lead to good results, and that Serbia, responding to the goodwill of Albania, will herself give proof of her good intentions by evacuating the Serbian territory which she has occupied without justification.

From its opening until yesterday the Parliament has been occupied in examining the credentials of all the Deputies. M. Pandeli Evangjeli, of Koritza, and a former delegate of Albania in Paris, has been provisionally elected President of the Chamber, on the strength of his seniority.

It is thought probable that as soon as the absent deputies from Scutari and elsewhere arrive, the present Prime Minister, M. Ilias Vrioni, will resign, in order that a new Cabinet may be formed.

Mission to Belgrade.

Colonel Ali Riza has left for Belgrade on a mission to the Yugoslav Government. This is the third attempt made by the Albanian Government to bring about an understanding with Yugoslavia, in the hope of securing the withdrawal of the Yugoslav troops from those Albanian regions which they have occupied since the beginning of 1918.

M. Justin Godart, Deputy for Lyons, has been in Albania for the past six weeks. He has visited Valona, Argyrokastro, Koritza, and Scutari, and is leaving Albania in a couple of days. He has been accorded a very warm welcome by all the Albanians, official and unofficial; for, though the reason for his visit has not been made public, it is generally believed that he has an official mission of some kind. Some say that he has been sent by the Carnegie

Endowment, which wishes to assist the Albanians in their educational development. In any case, his visit has given much satisfaction here, and it is understood that he, too, has found it very enjoyable.

CYPRUS.

NICOSIA, April 25.

The Greek Archbishop and the Government.

The High Commissioner has replied, through the Chief Secretary, to the protest made by the Archbishop, Kyrillos, as to being called to the Commissioner's office, in connection with the proposed processions on the occasion of the Centenary celebrations. His Eminence claimed that all communications from the Government or the Law Courts should be conveyed to him at his palace. The reply stated that this claim cannot in any way be recognised. The Archbishop thereupon wrote again at some length, stating that the regrettable scenes which occurred on April 7 were due to the "unjustifiable" orders of the authorities and to the arbitrary manner in which the orders were carried out. He invites the attention of the High Commissioner to the conduct of the police, and states that his protest will be forwarded to the Secretary of State for the Colonies. The Chief Secretary, in reply, has merely acknowledged receipt of the letter, and states that he has nothing to add to the previous communication. The Archbishop and the Greek Members of Council have drawn up a long statement regarding the events of April 7, to be despatched to the Secretary of State.

As regards the Prelate's assertions respecting the police intervention—during which, by the way, a member of the force was badly injured—they are quite incorrect. It is easy to understand how it came about that some basis for the claim he has made should exist. Under Turkish rule the Archbishop and bishops came to occupy positions of much power and importance. The former, as Ethnarch of his people, became almost a greater power than the actual Governor. The Moslem ruler, indeed, administered largely through the bishops. The Government aided them to collect their dues (and often to fleece their flocks) by the aid of Zaptiehs, while the Bishops co-operated with the Governor in both his legal collections and his exactions. They enjoyed many exemptions and privileges, and it was the withdrawal of these privileges—quite incompatible with British rule—which caused no little friction and ill-feeling for some years after the occupation.

The court-martial has sentenced a villager of Strovolo, near Nicosia, to five years' imprisonment, another to one year, and two others to two months, in connection with the disturbances. There have been further communications respecting the arrangements to be observed during the coming Pan-Cypriot sports, which are to last four days.

Government Hospital for Limassol.

The High Commissioner has visited Limassol to lay the foundation stone of a Government hospital, which is being built there. He was received by the Commissioner, Major Bolton, O.B.E., Dr. E. Corsellis, D.M.O., and the Mayor. The High Commissioner, in a speech, commended the efforts of the Commissioner, and of the late Mayor, Mr. Spyros Araousos.

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1" to 3¼" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

"THE TRUTH ABOUT THE BALKANS."

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The review of my article, "The Truth About the Balkans" (published in the current number of the *Quarterly Review*), which appears in your issue of May 5, is so important and—I am sure, accidentally—so misleading in its references to my remarks about Roumania as to require brief comment.

It says "that the foreigner from a land where politics are run under different rules is apt to imagine that Roumania, like Sodom of old, is likely to perish for want of five righteous men. It remains to be seen whether the inferences which the writer has drawn obviously from the speeches of ardent politicians will be borne out by the course of actual events." The answer to these remarks is that the reader of the article in question or of any of my books or other publications must be the judge as to whether I am a "foreigner" likely to be possessed of such misconceptions in regard to the Balkans, and that I drew my "inferences" not from the "speeches of ardent politicians," but from a careful study of the situation on the spot and from information acquired from diplomatic and other authorities whose identities it would be unjustifiable to disclose.

Further, you state that "one is forced to wonder how many personal experiences have gone to make up the winter of the artist's discontent," and you go on to infer that such "discontent" is or was connected with some supposed difficulty of mine in securing hotel accommodation. I do not propose here and now to give chapter or verse for my experiences, and this because to do so might result in the taking of reprisals against certain Roumanian officials, who are no better and no worse than many of their compatriots. As the question of hotels has been mentioned, it may, however, interest your readers to know that, thanks to the good offices of the Roumanian authorities, who secured me a room and to whom I am most grateful, I was not even called upon to pay a penny for what you call the "privilege of admission"—a privilege which, I understand, is indeed costly of purchase to those compelled to resort to such means.

Whilst, after due consideration and re-consideration, I am perfectly prepared to adhere to all that I have said about Roumania, and whilst there are many points in your notice upon which I might comment, the principal purpose of this letter is to refer to two distinct features of your review.

(1) The inferred and I imagine unintentional comparison between the Irish American and myself I hope means that the writer of the notice in question has not really read or does not understand the true sense of an article which must be perused as a whole. Thus, in the course of what might be read as an attempt to establish my bias against a particular country, I notice no references whatever are made to my explanation that the territorial acquisitions secured by Roumania are justified upon the basis of nationality and to my explicit suggestion that, perhaps without allowing sufficiently for the fact that conditions are universally worse than before the war, the populations of the new territories compare the present state of things with those which previously existed.

(2) Naturally, owing to lack of space, you are unable to publish extensive quotations from articles under review. Nevertheless, surely it would do greater justice to all concerned were you to print a whole, even if only a single passage, rather than to select disjointed sentences in such a manner that those sentences are divorced from the context of which they form an integral part. For example, you have omitted my declarations that "something has been done to solve the Agrarian and Jewish Questions," and that "the Chamber is now composed of members elected—nominally without interference—by the direct vote of the population." The omission of such remarks, which should have been included either immediately between or as actual parts of the passages which you have printed at some length—an omission which I suppose occurred by an oversight—alters the meaning of criticisms which (like those made in the same article and in regard to other Balkan countries) are intended in a friendly spirit, and for the purpose of showing that the dawn of a new era can only take place in the Balkans when real reforms are instituted, when recriminations are at an end, and when tolerance is practised by all concerned.

I am, etc.,

May 9, 1921.

H. CHARLES WOODS.

A MOSLEM STORY FROM JERUSALEM.

THE WISDOM OF AGE AND THE WISDOM OF YOUTH.

The palace of the Sultan was all in a turmoil; servants, guards, ministers, were rushing hither and thither in a state of the greatest agitation which no one could calm. In the harem the Sultana and her ladies were fluttering to and fro like a crowd of frightened doves. Full cause was there for all this perturbation and unrest, even during the quiet hours of night, when the hand of Allah lays sleep upon the eyelids of His children, for the Sultan had waked in terror from a dream of ill-omen. In his dream he had beheld all the teeth fall suddenly from his mouth and lie scattered before him. Oh, dream of horrid portent! Oh, woe to the Sultan and his land! The Sultan beat his breast and cried aloud in his despair: "Now woe is me, for if but one tooth had fallen from my mouth in my dream, it had foreshadowed evil; but what shall come upon me now, since all dropped in one moment of time!"

Through the darkness of night the Sultan's attendants sped on their ways, here and there in the silent city, summoning to the palace the members of the Sultan's Council, and all those who had any claim to be considered wise or learned men.

The Sultan sat upon his bed, wrapped in a robe of richest silk from the looms of Damascus, and he shivered, not with cold but with fear. The Councillors and wise men, thus hastily summoned from their quiet beds, shivered also, for the Sultan's brow was dark and his eye stormy; nor was he likely to welcome any interpretation of his dream that was not comforting to his agitated soul.

The Sultan related his dream, and silence fell upon the room. All present knew the meaning to be evil, and each waited for his neighbour to speak first.

At length a young man, but newly come with honour from the Schools at Damascus, stepped forward, eager to show forth his learning and to win the Sultan's favour.

"O Sultan, Master of the World and Glory of the Ages," he said, "your dream is of an evil colour for you and for those who serve you. Sad and dire is the meaning thereof. For, behold, it foretells the destruction of all your kindred in one day and in your sight!"

Wrath filled the Sultan as these dismal words fell upon his ear, and he called aloud to his guards: "Take this fellow to prison, and let him have one hundred strokes upon the soles of his feet ere the sun be risen! Let him remain in the darkness for a year and a day, and let him be fed only on bread and water! Thus shall he learn not to trifle with his Sultan."

The wretched youth was led away, lamenting his sad fate; and silence fell upon those who were left, for they feared to tempt their fortune by interpreting the Sultan's dream. But the Sultan addressed them angrily, and swore that if they did not tell him the true meaning of his dream, and that instantly, they all should follow the presumptuous youth to prison and remain there until their wisdom returned to them.

At that the oldest of the Councillors stepped forward and spoke in quiet tones.

"O Commander of the Faithful and Admiration of the Universe," he said, "greatly has your Majesty been favoured by Heaven! Has there not been revealed to you in a dream the thing which shall gladden your royal heart in the day when it comes to pass? Know then, O most noble Sultan, that Allah, out of mercy to your subjects, has vouchsafed to tell you that you shall outlive all your kindred, and this your own eyes shall see between the rising and the setting of a sun."

"Lo, here is wisdom!" cried the Sultan. "Blessed be my ears on which such words of honey and of truth have fallen this day! Fill his mouth with pearls, for has it not spoken golden words? Hang upon his neck a double chain of gold, and clothe him in the richest robe of honour that my treasury affords. And get you all hence to your homes in peace!"

The Councillors and wise men willingly departed, the last to leave the royal palace being the Grand Vizier and his young son. As they passed through the iron gates into the peaceful moonlit streets the boy whispered to his father: "O, my father, explain to me out of your wisdom the difference between those two interpretations of the Sultan's dream, for to me they seemed the same."

"My son," replied the Vizier, speaking low, "as you go through life you will learn that what counts is not what a man says, but the way in which he says it!"

ESTELLE BLYTH.

PRESS ON THE NEAR EAST.

The Problem of Anatolia.

The Special Correspondent of the *Manchester Guardian*, who has been writing on the Greek retreat, gives in the issue for May 13 some impressions derived from that event. For the moment, he says, military operations are at a standstill. In the first bout the Kemalists have prevented the Greek army from attaining its objective, and he doubts whether Greece has the resources for making the attempt again.

On the other hand, I am equally sceptical about the ability of the Kemalists to drive the Greek army from its former strong positions to which it has now successfully retired. The campaign may end in stalemate, leaving the political problems that have occasioned it to be settled, after all, by inter-Allied arbitration. And, in anticipation of this, I want to plead with the diplomatists to put the values at stake in their true proportion—that is, to think first and foremost of the tormented civil population. I do not confine my plea to the Greeks and Armenians who have been uprooted during the last few days. Many Turkish houses, too, have been burnt, and many Turkish families made homeless during the recent military operations. The best settlement will be the one which makes for the least unhappiness of the greatest number of civilians in Anatolia, irrespective of religion or race.

I should like to rule out two solutions to begin with. One is the maintenance of Greek administration in the great regions of Western Anatolia now occupied by the Greek Army. The other is the replacement of Greek administration over the same area and population by that of the Kemalists. I do not think that the Kemalists will lay down their arms so long as Greece holds any part of Anatolia, and I do not think that the Greek army will retreat—or can be expelled from—the part it occupies so long as that means leaving the Greek minorities here to the mercy of the Kemalists. Along these two lines I see no possibility of peace or of a tolerable existence for the civil population. Under the conditions produced by eight or nine years of war, Greeks can really no longer live under Turkish rule nor Turks under Greek rule. Therefore, ruling out these, I think there are two feasible solutions, one of which is much better than the other. The parts of Western Anatolia where there is a considerable non-Turkish minority, or, in other words, a mixed population, should be separated from both Turkey and Greece and formed into an independent administrative unit. The natural area would be the old Aidin vilayet plus the Greek town of Aivali, and Thrace might either be included in the area or administered separately on the same lines. The personnel of the administration should be drawn from the local nationalities in a fixed proportion, from the gendarmerie right up to the local Parliament and Cabinet, and there should be an inter-Allied control, not to do the administration itself, but to see that the mixed administration recruited from the local nationalities is fairly worked. This system would be the same in essentials as that which worked so successfully in the Lebanon vilayet during the half-century before the war, and I believe that it would bring peace, not only to Greece and Turkey, but to the unhappy population of the area concerned.

The success of his scheme would, however, depend absolutely on the completely united action of England, France, and Italy—a condition which, he admits, is not easy to realise. In the event of the existing jealousy surviving—

I see no alternative to an interchange of populations. There are some hundreds of thousands of Christians in Anatolia and some hundreds of thousands of Moslems in Thrace and Macedonia. Leave the Asiatic territories under Turkish sovereignty, the European under Greek, and interchange the minorities so as to have only Christians under Greek and only Moslems under Turkish government. It may come to this, but if Allied diplomatists decide upon it through failure to find a more constructive settlement, they ought to realise beforehand what a last desperate resort it is. To begin with, it would not be economically sound, for the Greeks and Turks are not merely different nationalities, but different social classes, and the operation would be not unlike concentrating all the tradespeople of England in one set of counties and all the working people in another. It would also be a vast surgical operation inflicted on two nationalities or classes under such unfavourable conditions that it might kill rather than cure. Even in pre-war days, when there was some margin of money, food, clothing, housing and transport in the world, the transplantation of such large populations would have been a difficult undertaking. Under present conditions it is hard to see how it could be accomplished without immense suffering and mortality. But if it is eventually decreed, there is one factor of capital importance, and that is time. If such an interchange of population were spread over a period of six months, with the military *status quo* stabilised during this period under Allied supervision, it would have some chance of success. If, on the other hand, the same thing were attempted within the space of one month or a fortnight or a few days, and during the course of military operations, it might well be the most terrible chapter in the history of human suffering in Anatolia.

Armenia.

In the *New Armenia* of March-April, Mr. W. G. Smith writes an article called "History Repeats Itself." He says:—

It has been repeated so often that it is now a commonplace that the Turk has been maintained in his political power by the mutual jealousies of the leading countries of Europe. It

was hoped and believed that whatever might be the outcome of the recent great war, his downfall was assured. He had been false to Great Britain, to France, and to Italy, the three Powers to whom he owed his salvation after the Crimean War and after the Russian advance to Adrianople. The population of these countries is professedly Christian. Their cabinets exist in the long run because they respond to popular sentiment. After they have borne with patience the outbreaks of Turkish malevolence in the massacres of 1876, 1896, and of 1906, and, finally, the well-nigh successful effort to wipe out the entire Armenian people in Turkey in 1914-15, one can find no words to express the emotions that are aroused by the present statesmanship of these three Powers, as shown in their attitude towards this same unchanged and unchangeable Turk.

Very openly, leading French and Italian public men, moved no doubt by the hidden hand of international financiers, are seeking to resuscitate the Turkish Empire, returning to the same old discreditable policy of the past. Knowing that the Turks are incapable of governing themselves, let alone subject peoples, and chargeable with knowledge, if they do not know, that they are sowing the seeds of future massacres, persecutions, and wars, they seem about to condone the relentless massacre of a million of their fellow Christians and to set up assassins as the rulers of a reorganised Turkey.

No such humiliation has happened in many a day to these proud governments as that to which they are submitting now, when they bow before the demands of Mustapha Kemal. If they were right when they forced the unwilling hands of the Sultan's representatives to sign the Treaty of Sévres, what can they think of themselves now when they invite his rebellious subject, who represents the same policy that has made the names of Enver and Djemal and Talaat infamous, to meet them in consultation as to the future of conquered Turkey? Could there be a greater example of political cynicism than is shown by the Council of Premiers which has so lately adjourned in London, giving with difficulty a grudging opportunity to the Armenians to present their case and then ignoring it, and awaiting the final decision of the Turkish insurgent as to how much he will yield as a condition of peace?

He suggests that, had it not been for the services of the Armenians in the late war, the story of the conquest of Asia Minor by the Allied armies under Allenby might have been very different. It is indeed impossible to withhold sympathy from the Armenians, but to say that Allenby was in Asia Minor and that the Armenians vitally influenced his successes elsewhere is surely wide of the truth. The writer ends his appeal for the unhappy country by saying that the "common-sense justice of mankind," and "rightly directed public opinion," will ultimately prevail in Armenia's favour.

THE PRINCE AND ASIATIC RESEARCH.

The Prince of Wales has been invited to become a Vice-Patron of the Royal Asiatic Society, a position filled both by his grandfather and his father before, on accession, they successively became Patron. Lord Reading has been invited to be a Vice-Patron, and it is proposed that all succeeding Viceroy should hold the position. At the anniversary meeting of the society on May 10 Lord Meston said it was unfortunately true that the traditions of scholarship which used to attach to the public services in India had in recent years become a little thin. Increased pressure of life and the strain of work gave scanty leisure for the pleasant communion with the older school of cultured Indians. But he believed there would be a revival of civilian scholarship. Meanwhile there had arisen a new school of young Indian investigators, many of them belonging to the society, versed in modern ideas of criticism, exploring the field with honesty and sincerity. He regarded this as one of the best fruits of the new Nationalist movement.

SOMALILAND MEDAL.

It is officially announced that the King has approved of the Africa General Service Medal, instituted in 1916, with clasp "Somaliland, 1920," being granted to personnel of the Imperial, Indian, and Colonial Forces who, under the general directions of the Governor and Commander-in-Chief of the Protectorate, and under the command of Major (temporary Colonel) G. H. Summers, Officer Commanding Troops, Somaliland, took part in the military operations in Somaliland between January 21, 1920, and February 12, 1920. Officers, soldiers, and others already awarded the medal, or who are in possession of the Africa General Service Medal instituted by King Edward VII., will receive the clasp only.

NEAR EAST BOOKSHELF.

- I.—"WHEN TURKEY WAS TURKEY." By Mary A. Poynter. (London: George Routledge and Sons. 12s. 6d. net.)
 II.—"THE TOUR." By Louis Couperus. Translated from the Dutch by Alexander Teixeira de Mattos. (London: Thornton Butterworth. 8s. net.)
 III.—"THE BACKBONE OF AFRICA." By Sir Alfred Sharpe, K.C.M.G., C.B. (London: H. F. and G. Witherby. 16s. net.)

I.—AN ENGLISHWOMAN'S IMPRESSIONS OF TURKISH LIFE.

Lovers of Thackeray will recollect that one of the most telling episodes in "Vanity Fair" takes place at Brussels, within hearing of the cannon of Waterloo. Mrs. Poynter displays the same aloofness from a great drama which passed before her eyes. Constantinople was her headquarters during the Revolution of 1908, the Italian aggression in Tripoli, and the commencement of Turkey's struggle with Great Britain. Yet a good deal of her time was spent in touring through the Near East during years which were pregnant with evil for Turkey and the world. Many of her experiences have already delighted readers of this paper, while others were contributed to the *Spectator*, *Athenæum*, and *Harper's Magazine*. These sketches now appear in book form, with an introduction by the late Sir Edwin Pears, who writes:—

The descriptions are those of a well-educated Englishwoman who has read and seen much and travelled far afield, and yet could never be called a bluestocking. They are always pleasant reading. There are touches of pathos and of sympathy with people suffering under misgovernment. There are many passages which unconsciously stimulate the reader to consult authorities on the subject of which she is speaking, and to learn more of it.

Sir Edwin's opinion will be shared by all who feel the charm of unregenerate Turkey, although many will wish that Mrs. Poynter's remarkable powers of description had been given to more important themes.

A discerning eye is shown in her references to the politics of that troublous time; but at the outset of the Revolution which hurled Abdul Hamid from his throne she shared the common belief that a golden age had dawned for Turkey. On August 3, 1908, she wrote:—

All the people of the country—Moslems and Christians—wear a badge with "Liberty, Justice, Fraternity" upon it. Turkish Hodjas and Christian priests embracing and cheering each other is a new sight in Constantinople; and if this fraternal spirit endures, what far-reaching good may not be born of the movement?

Its subsequent phases, alas! have proved the truth of Mr. Barry Pain's witty dictum, "Some things begin well and end badly, such as kittens, revolutions, and platonic love." But 1908 was the psychological moment for a renewal of the ancient friendship between Great Britain and Turkey. On August 12 Mrs. Poynter recorded an enthusiastic reception given to Sir Gerard Lowther, when he was officially received as Ambassador, and added:—

It is extraordinary how the Turks are turning to Great Britain, partly, we think, because she has not exploited their country as Germany and other countries have. The Committee of Union and Progress seem to be doing their work wonderfully well so far. We know a number of Young Turks, like "Filosof" Riza Tewfik, who tell us many interesting things, and seem to be very keen on putting the administration of the country on a thoroughly good footing.

Who can doubt that, if our Foreign Office had shown active sympathy with the new régime, and if our interests had been worthily represented at Constantinople, the world-war would have ended far sooner—perhaps would never have begun? Finding no response from Turkey's ancient ally, the Committee of Union and Progress hearkened to the wiles of Wilhelmstrasse; and its leaders, suborned by German gold, brought their luckless country into collision with a Power which had been its fast friend for more than a century. F. H. S.

II.—SIGHTSEEING IN THE FIRST CENTURY.

This is a description of a tour made by a young Roman patrician in the reign of Tiberius. Lucius travels with a gorgeous retinue, including his greedy old uncle, the freedman who had been his tutor, and the beautiful Greek slave whom he eventually marries. He is travelling to seek distraction from his overwhelming sorrow at the disappearance of his favourite slave, Ilia, and also with a secret hope that he may discover her whereabouts from the soothsayers and priests of Egypt. It is at the Temple of Ammon-Râ that he finally learns the truth, long since guessed by all his followers, and knows that she had eloped with a common sailor. In the first chapter we find Lucius, plunged in gloom, nearing Alexandria in his beautiful ship, and we leave him sailing for Babylon, with his bride and his former tutor, reduced indeed to poverty by the news that Tiberius has seized all his estates, but having

found in the ancient land of Egypt a calm, philosophical happiness. The whole book is rather weighed down with the load of the author's knowledge of the Egypt of the period. The descriptions of scenes and customs with which every page is crowded are given with a lavishness of coloured detail that suggests something of the nature of "Chu Chin Chow" on an advanced scale; it is therefore surprising that of all faults we should be aware of that of dullness, but the dry bones of study are too apparent through the gorgeous covering of romantic phrases. The most successful character is Caleb, who acts as guide to the party in their sightseeing, and through whom the author rather subtly indicates that the light in which a tourist was regarded nearly two thousand years ago was much the same as it is to-day. The story is a creation in a lighter vein than that which his admirers expect from this great Dutch author, and it is a pity that it should prove, on the whole, a little wearisome.

III.—BRITAIN'S EAST AFRICAN EMPIRE.

This is a record of travel before and during the Great War by a former governor of Nyassaland. It is at once very interesting, informative, and defective. Governors of Crown Colonies, although, as in this case, "mighty hunters before the Lord," very often make indifferent authors. Long subjection to the mandarinic tendencies of Colonial Under-Secretaries, preternatural dignity and reserve, adopted to secure Gubernatorial dignity in a backward land flowing with whiskies and sodas and pestilential rivers; an ever-present fear of doing or saying, like James I. and Steenie Buckingham, or the other way round, the wrong thing—are some of the considerations which support our theory. Sir Alfred Sharpe's book is a definite Imperial treatise, compiled in a fairly unconventional style, and certainly worthy of a place on every political and geographical bookshelf throughout the Empire, for it deals with two-sevenths of the continent of Africa, and contains suggestions of moment to the Empire. But the full blast of censure must fall upon the irritating meanness of the maps. Almost every page necessitates a reference to cartography, for the book is in the main a comprehensive, although not very detailed, survey of Eastern Africa from Northern Rhodesia to the Bahr-el-Gazal, and three mean little maps are an unfair handicap to the author. When a second edition of this book is required—which, we trust, will be soon—we recommend this criticism to Messrs. Witherby, who, we understand, intend to embark largely on the publication of books of travel. The illustrations are very fair, and the amount of elephant hunting is simply "scrumptious." The schoolboy, however, will kick at this part of the story because Sir Alfred omits all the thrills—perhaps in his less histrionic anxiety to weigh the tusks.

BOOKS RECEIVED.

"A Grammatical Guide and Numerous Idioms and Phrases for Beginners in the Ewe Dialect." By Professor D. Westermann, and translated from the German by C. D. Trotter, Esq., District Commissioner, Gold Coast Colony. (London: Harrison and Sons, Ltd.)

"A Painter in Palestine." By Donald Maxwell. With an Introduction by the Dean of Rochester. (London: The Bodley Head. 6s. 6d. net.)

"The Post Office of India and Its Story." By Geoffrey Clarke. With 16 illustrations. (London: The Bodley Head. 16s. net.)

"Gujarati Self-Taught." By N. M. Dhruva. (London: E. Marlborough and Co. 3s. 6d. net.)

The current issue of the Palestine Exploration Fund's *Quarterly Statement* contains some further particulars of the excavations at Askalon and a "History of Askalon," the latter being a paper read by Mr. W. J. Phythian-Adams before the British School of Archaeology last November. Dr. E. W. G. Masterman contributes an interesting paper, "The Pool of Bethesda," and the other features are as usual. An appeal for funds to continue the good work at Askalon is made in the "Notes and News," and we hope it will meet with a satisfactory response.

ARABIC (Syrian) SELF-TAUGHT

(In Arabic and Roman Characters.)

Revised and Enlarged by REV. N. ODEH.

Containing Travel Talk, Conversation and Classified Vocabularies for Travelling, Useful and Necessary Expressions: Professions and Trades, Religious Terms with English Phonetic Pronunciation arranged for use "At a Glance"; also Elementary Grammar, Illustration of Turkish Government Coinage used in Syria, Money with English and American Values, etc., etc.

Red Cloth, 4/- net; Blue Wrapper, 3/- net. Postage, 3d. extra.

Sold by all BOOKSELLERS. Write for Prospectus and Catalogue No. 35. London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.4.

MUSICAL NOTES.

Mr. Victor Benham.

Continental reputations are strangely made, and there is none more puzzling than that of Mr. Victor Benham, an English pianist, who abroad and especially in Germany is described as the "greatest living English pianist." He is nothing of the kind. It is true that his conceptions are sometimes large, but his technique is limited, to say the least of it. At his recital at the Wigmore Hall on April 25 he began with Beethoven's last Sonata, Op. III., a sufficiently severe test for any pianist. In the Adagio and the Allegro-Maestoso we forgave him a good deal of bad tone, an unequal balance between the hands, and plenty of wrong notes for the spaciousness and the even nobility of his idea; but the dull placidity of the divine Arietta and the variations we could not forgive—the pedal devices, in particular, of this lovely part the pianist either scorned or did not understand. I listened further to three Chopin preludes, vulgarly linked together by banal chords; and after that I left the hall.

Moiseiwitsch.

This famous pianist gave an orchestral concert at the Queen's Hall on May 3, the concertos he played with Sir Henry Wood's orchestra being Beethoven's "Emperor," Schumann's in A minor, and Ernest Schelling's "Suite Fantastique." His technique is as humanly perfect as is possible, and he has carried the refinement of tone to the utmost limits. Nothing could have been more dazzling than his brilliance in Schelling's rather superficial suite. But with all this pianism, he lacks imaginative greatness, for of the architectural greatness of the "Emperor" he gave little suggestion, and we had to wait until well into the second movement of Schumann's most romantic concerto to feel its poetry. Further, Moiseiwitsch has an inexplicable habit of emphasising melody at the expense of the harmonies, a quite unwarrantable method, particularly in the classics. His technical capacities are as great as those of Heifetz, but he shares with the violinist an inability to move us.

Violin Arrangements.

At Miss Murray Lambert's recital at the Wigmore Hall on May 2 we had some rather surprising examples of what may happen to music when it is arranged for the violin. For we not only had an "Allegro giocoso" of Handel-Harty sounding as Irish as might be, but we had also a proof that negro spirituals are simply impossible when performed by anything but the human voice. The sentimentality of "Nobody knows de trouble I've seen" became absurd in Clarence Cameron White's arrangement of it; and his "Negro Dance" ("Sometimes I feel like a motherless child") was a hybrid affair. That sincerity which always characterises Miss Lambert's playing was here in abundance; but for larger works like Pizzetti's Sonata in A major her technique and intonation are not sufficiently impeccable to make the pleasure of listening to them unalloyed—the less so when the pianoforte part is played by so crushingly individual a pianist as Mr. Norman Wilks.

Mr. Hugh Marleyn.

Mr. Marleyn is making a bold bid for distinction in his leadership of the Langham Choral-Orchestral Society, and there was stuff in his operatic concert at the Queen's Hall on May 10 to test the greatest of conductors. Unfortunately, I could stay to hear only the "Tannhäuser" overture, a duet scena (inartistically enough sung by Miss Beatrice Miranda and Mr. William Boland) from "Aida," and "Introduction and Wedding Procession" from Rimsky-Korsakoff's "Le Coq d'Or." From these things it was evident how heavily Mr. Marleyn leans to the dramatic and dynamic sides of conducting; he has more vivid intensity than some of our more developed conductors. But something went wrong with the rhythm of the brass in the overture, which instruments, moreover, were more than a match for the strings. And in the Rimsky-Korsakoff it was not until the Wedding March that we could hear the impulse of the thing, though there the brightness of the colours was dazzlingly portrayed.

ANDANTE.

SCHOOLS & TUTORS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., are in close touch with all the leading educational establishments in England for boys and girls, and are able to advise parents, where to find early vacancies. Their knowledge of these establishments, for the majority of which they supply the teaching staffs, extends over 20 years and they are thus in a position to give information and advice difficult to obtain elsewhere.

An explanatory booklet "On the choice of a School" will be sent post free on application.

TRUMAN & KNIGHTLEY, LTD.,
61-62, CONDUIT STREET, LONDON, ENGLAND.
Phone: Mayfair 1063-1064.

PERSONAL AND GENERAL.

TO-DAY.

May 19 (New Style).

May 6 (Old Style).

Ramadan 11, 1339 of the Moslem Calendar.

Ayar 11, 5681 of the Jewish Calendar.

The Aga Khan left London on May 13 for Paris.

Sir Davison Dalziel has left 18, Grosvenor Place, for Paris.

M. Stambolisky, Prime Minister of Bulgaria, has recovered from his illness and has taken up his duties.

Lord and Lady Inchcape, who are at Glenapp Castle, will return to London towards the end of this week.

Sir Alexander and Lady Roger left for Constantinople on May 15, and they are not expected to return until June 7.

Viscount Chelmsford will be entertained to dinner by the members of the India Office on May 27 at Claridge's Hotel.

Sir Rennell and Lady Rodd, who arrived in Nice from Rome last week, will return to London towards the end of this week.

Messrs. Blackwood and Sons announce that on May 26 they are publishing a new novel by Mrs. Maud Diver, entitled "Far to Seek," which deals with recent events in India.

Mr. Henry Staveley Lawrence has been appointed member of the Governor of Bombay's Executive Council in place of Sir George Seymour Curtis, whose term of office has expired.

Prince George, with other officers from the Iron Duke, has been paying a flying visit to Cairo incognito, staying at Shepherd's. On May 11 he visited the Pyramids and the Citadel, and the following day he lunched at the Residency, returning to his ship, the Iron Duke, at night.

The King of the Hejaz has conferred the First Class of the Order of the Nahde on General Haddad Pasha, in recognition of his valuable services rendered in Europe on behalf of the Arabs.

The marriage arranged between Captain John Le Clerc Fowle, 15th Lancers, I.A., and Adelaide Kathleen, elder daughter of Lieutenant-Colonel Chichester, 28th Punjabis, I.A., and Mrs. Chichester, will take place on June 1 at Srinagar, India.

The marriage arranged between Captain Ronald James Allan, M.C., Gurkha Rifles, Indian Army, and Miss Dorothy May Wilson, only daughter of W. Wilson, Bearsden, Argyllshire, will take place on June 6, at St. Enoch Station Hotel, Glasgow.

The *London Gazette* announces that letters patent have passed the Great Seal conferring the dignity of a baronet of the United Kingdom upon General Sir Charles Carmichael Monro, G.C.B., G.C.S.I., G.C.M.G., of Bearcrofts, in the shire of Stirling, and the heirs male of his body lawfully begotten.

The Central Council of the Over-Seas Club and Patriotic League will entertain Mrs. Rosita Forbes at luncheon at the Hyde Park Hotel on Friday, May 20. Mrs. Forbes recently travelled through the Libyan Desert, and penetrated to Kufra, the headquarters of the Senussi. The chair will be taken by Lord Charnwood.

The marriage was celebrated on May 2, at St. Thomas's Cathedral, Bombay, between Captain Clifford F. Scott-Ruffe, M.C., C.V.O., 2nd Sappers and Miners, Indian Army, younger son of Mr. and Mrs. Frank Fellingham Ruffe, India, and Kitty, second daughter of the late Mr. Lewis Utton and Mrs. Utton, of Victoria Avenue, Southend-on-Sea.

It is stated in a Reuter message from Cairo that a delegation composed of Adly Pasha (Prime Minister), Rushdy Pasha (Vice-Premier), Talaat Pasha, Ismail Sidky Pasha, Minister of Finance; Mohammed Chafik Pasha, and Youssef Suleiman Pasha, is expected to leave for London at the end of this month to conduct official negotiations with the British Government. A number of experts will accompany the delegation.

APPOINTMENTS, ETC.

M. Varatassi has been appointed Greek Diplomatic Agent of Greece in Cairo.

M. Dimitroff, formerly Bulgarian Minister of the Interior, has been appointed Minister at Washington.

Vice-Admiral Salaun has been appointed Commander-in-Chief of the Eastern Mediterranean Squadron of the French Navy.

Mr. A. E. Robinson, Inspector of Accounts, Sudan Customs Department, has been appointed Controller, Press Section, Intelligence Department.

Major J. Carey Evans (son-in-law of Mr. Lloyd George), who has been staff surgeon of the Bangalore Brigade and Residency surgeon for some time, has been appointed surgeon on the staff of the Viceroy of India.

The King recently received at Buckingham Palace Colonel Sir Malcolm Murray, Comptroller of the Household of the Duke of Connaught (who accompanied his Royal Highness to India), and invested him with the insignia of a Companion of the Order of the Indian Empire.

The Secretary of State for India in Council has been pleased to make the following appointments to the Indian Educational Service:—(1) To be Professor of History in the University of Rangoon—Daniel George Edward Hall, M.A. (Lond.). (2) To be Professor of Physics in Presidency College, Madras—Shankar Rao Ullal Savor, D.Sc. (Lond.), B.A. (Cantab), F.R.A.S. (3) To be Professor of Biology in the University of Rangoon—James Brontë Gatenby, B.A., B.Sc., D.Phil. (Oxon). (4) To be Assistant Lecturer in Education in the University of Rangoon—Una Helen Stuart Tilley. (5) To be Vice-Principal of the Government High School for Indian Girls, Lucknow—Margaret Lloyd Harvey.

OBITUARY.

The death has occurred, as the result of an accident, of General Sir George Wolseley. The General was the son of a soldier and a brother of the distinguished Field-Marshal Viscount Wolseley, and during his fifty years in the Army had borne his full share of active service. Born in July, 1839, he was gazetted an ensign in the Cheshire Regiment in 1857, and afterwards exchanged into the 84th Regiment, with which he served in the Indian Mutiny campaign, receiving the medal. In the Afghan War of 1878-9 he served as Assistant Adjutant-General with the Kandahar Field Force, was mentioned in despatches, and for his services received the medal and the brevet of lieutenant-colonel. Then followed the Egyptian Expedition of 1882, and here again he gave a good account of himself. Colonel Wolseley had the post of Assistant Adjutant-General, and was present at the Battle of Tel-el-Kebir, where his brother was in supreme command. His services again earned him a "mention," and he received the medal with clasp, the Bronze Star, the 3rd Class of the Medjidie, and was appointed an A.D.C. to Queen Victoria. In the Nile Campaign of 1884-5 he again had the post of Assistant Adjutant-General, and afterwards served as colonel on the Staff, commanding the troops at Abu Gus. The Burmese Expedition two years later saw him in command of a brigade, and he commanded the force which annexed Wuntho. The Indian Government thanked him for his services in this affair, and he was subsequently given the K.C.B. Sir

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

George had command of the forces in the Punjab (with the rank of Lieutenant-General) in 1897-8, and of the Madras forces from the latter year until 1903. He retired with the rank of General in 1906, and in the following year was awarded the Grand Cross of the Bath.

NEWS IN BRIEF.

General Gouraud was entertained at a banquet at Beyrout on May 8 by 300 prominent citizens.

It is stated that M. Jonnart has accepted temporarily the mission to represent France at the Vatican.

Two passenger trains were in collision at Rutlam Station on the Bombay-Baroda Railway, one person being killed and three injured.

The Maharajah of Indore, dressed in an Indian general's uniform, laid a wreath on the grave of the Unknown Soldier in Paris on May 13.

Allegations brought against Greek troops by the Indian Moslem Delegation are to be laid before the Greek Government by H.M. Minister at Athens.

A division of the French Mediterranean Fleet commanded by Vice-Admiral Charlier arrived at Gibraltar on May 10 from Casablanca on a visit.

Fevzi Pasha, the Nationalist Grand Vizier and Minister of War at Angora, has assumed the rank of general, and taken command of an army corps.

Baron Ushida, Japanese High Commissioner, has been received in audience by the Sultan of Turkey. This marks the inception of diplomatic relations between Turkey and Japan.

According to the latest information, twelve persons were killed and thirty injured in the collision which occurred on May 11 on the Hansi-Manikpur section of the Great Indian Peninsula Railway.

In heavy fighting during an advance in Morocco, in which Handa, Harcha, and Gaylet were secured, the Spaniards had a captain and sixteen privates killed and seventy-four other casualties.

The new Swedish motor-ship *Elmaren*, bound for Europe from Australia, has run aground on a reef 1,000 miles south-west of Colombo, says a Reuter telegram from Colombo. The damage is believed to be serious.

As a result of the Note of the Porte complaining that excesses had been committed by Greek irregulars in Anatolia, two inter-Allied military missions, headed by British officers, have left Constantinople to conduct inquiries.

The converted "mystery" ship *Haim Mazza*, which recently left for the Mediterranean, was reconditioned and fitted out for its new duties as a passenger carrier in the service of a Greek firm by Messrs. Vosper and Co., of Portsmouth.

Our Bucharest Correspondent writes (May 4): A party of Roumanian students, accompanied by some of their professors, have gone on an excursion to Italy. They arrived in Rome on April 27 and were received at the station by representatives of various scholastic institutions who gave them a very warm welcome.

British subjects resident in Turkey having claims on the Turkish Government for losses and damages before and during the war have decided to make urgent representations to the British Government with a view to obtaining an early settlement of these claims, the non-payment of which in many cases is bearing hardly on British subjects who have lost their all owing to forcible requisitioning by the Turkish authorities or wilful destruction.

POLITICS AND POVERTY.

We have recorded from time to time the evidence which has accumulated to demonstrate the obvious initial success of the new Indian legislatures; to-day we invite our readers to look a little below the surface and take note of what seems to us the most significant result so far achieved in those institutions, the awakening of Indian politicians to the great fundamental problem of the national poverty of their motherland. Unfortunately, it is impossible to question the statement that India, though increasing in wealth, is still poor, in the sense that the national income is insufficient to meet the ever-growing needs of the people, and outside observers have often wondered at the way in which Indians have been content to ignore this obvious fact. The explanation is, however, really simple. Even in England one can still trace the effects of the old idea that the Government is an entity distinct from the nation, and that it commands a mysterious stock of wealth which it is apt to divert from the national good to its own sinister purposes. The same idea has hitherto dominated the Indian outlook, and while it would have been repudiated by experienced politicians, it has remained lying at the back of their minds, and its influence has been impressed on every discussion of finance. Its practical importance became manifest when the reforms initiated by Lord Morley forced Indian politicians into a solid opposition to the Government. Ardent opponents inevitably condemned the existing scale of taxation, while they were insistent in their demands for heavy expenditure; confronted with a meagre budget, they reconciled their criticisms with their aspirations by the doctrine that the national resources, in theory adequate, were being squandered by an extravagant bureaucracy, and that a rearrangement of grants would suffice to meet all national needs. The doctrine was ludicrous to any one who knew by experience the meticulous and penurious habits of the Indian Treasury, but among politicians it held the field, and the result was seen when the new legislatures were given a large measure of control over the budget. In every province enthusiastic economists set to work to scrutinise the estimates head by head, and item by item, seeking to find the channels by which the national resources were dissipated, and they have been quick to recognise the failure of their search. Some changes in the estimates have, indeed, been made and relatively small sums have been economised, chiefly by the postponement of expenditure recognised to be desirable, but taken as a whole the various budgets stand, and a few weeks' contact with hard facts has sufficed to demonstrate the untenability of a cherished doctrine. The national needs are now seen to be even greater than had been supposed; the money to meet them is available neither in the Treasury nor in the pockets of the people; and by this route Indian politicians are rapidly reaching the unpleasant but indisputable conclusion that the nation cannot pay for what it wants, and that it must earn before it can spend. In India, as in so many other countries, political and social progress is retarded by the hard fact of poverty.

The rapid acceptance of this conclusion will be obvious to any student of the Indian Press, but as a single

example we may cite a speech delivered last month by Mr. P. C. Mitter, the Minister for Education in Bengal. Education is one of the most urgent, and most costly, needs, and we find the Minister in charge of it insisting that the most pressing problem of the moment is to improve the economic condition of the country; schools, like everything else, must depend on an increase in income, and while mines and factories may make important contributions, the bulk of that increase must be extracted from the soil. That is in our opinion a just appreciation of the position: India is waiting on the peasant, and until the peasants realise a larger income the country as a whole cannot go forward. How then is the essential change to be brought about? The answer must allow for the fact that the question has two sides: there is much which the Government can do, but the response is at least as important as the stimulus. The Government is, on the whole, playing its part: the diagnosis of the material needs of agriculture is complete, and much has already been done to facilitate the supply of capital, to bring water to the thirsty land, to supplement traditional skill by the resources of science, and to put the peasant in a better position than he has ever occupied before; the stimulus has been provided from above, and India is anxiously awaiting the response from below. Those who best know the country assure us that the response is already visible, but that the pace is still too slow. The real economic weakness of India lies in the lack of what may be called productive energy. If we look at a progressive community of the new world we find everywhere men busily engaged in anticipating their neighbours' needs, offering facilities in advance of the immediate demand, pressing their schemes in season and out, hustling forward on the productive road. In India the scene is very different. Demand is slow to find expression, but supply lags far behind demand; obvious needs remain unsatisfied, and men look wistfully towards the State, hoping to receive as a boon what their own energy could supply. The problem is, in fact, now almost wholly psychological; India stands waiting for the increased supplies of food and materials which the peasant alone can furnish; the peasant is moving, but far too slowly; what measures can be taken to accelerate the pace?

That is the great fundamental question confronting Ministers and politicians in every Indian province, and the authorities of nearly every Indian State. It is not our purpose to offer a solution, which must be sought in India, and by Indians, but something may be said with advantage regarding the conditions of the search. Too much stress cannot be laid on the fact that it is a question of leading, and not of driving. The indigenous traditions of administration point directly to the application of compulsion in such a case, but it can be asserted with confidence that any attempt at compulsion would fail to achieve its object, while it would probably wreck the new Constitution, just as compulsion wrecked the Empire of Aurangzeb. If, then, the peasant is to be led, those who would lead must be quick to lay aside a large mass of pre-conceived ideas and set to work to acquire accurate knowledge of the peasant's mentality. Judging by the speeches reported in the Indian Press, such knowledge is lacking among many Indian politicians, who offer to the peasant not what he wants but what they think he ought to accept. It was all very well in the old days to talk glibly of compulsory education, or the enforcement of a high standard of sanitation, or similar boons, but very little study will suffice to bring conviction of the futility of such offers at the present juncture; to the peasant as he is, a good road or bridge means much more than a school, a free market has greater attraction than a scientific system of drainage, and if he is to be led forward the appeal must be made to him as he is and not as others think he ought to be. The recent changes in India have in their essence constituted an approach towards reality, and that is the road which has still to be pursued. The task of Indian Ministers is to awaken the peasant's imagination, to break the bonds forged during the centuries of oppressive rule, and to liberate the productive energy which is now latent; until they succeed in that task their ambitious schemes of national advance will fall short of accomplishment.

SOME NOTES ON DALMATIA.

(BY OUR ZAGREB CORRESPONDENT.)

ZAGREB, May 5.

In the gulf between the rocky promontory of Istria and the Croatian coast, nearly opposite Fiume, there is an irregular island which has been referred to often enough in the Press recently, for it has been occupied by Italian troops since the break-up of Austria. Its Italian name, by which it is best known in Europe, is Veglia, but the real name is Krk. For it is a purely Croatian island, and all the inhabitants are Yugoslavs. This picturesque place has an area of about 450 square kilometres, and its rocky coasts are indented, to afford useful harbours to its sea-faring population. It is, however, less rocky and mountainous than its neighbour, Cres, or Cherso, which has remained under Italian domination. Its rolling hills are covered with woods, meadows and vineyards. There are about 25,000 inhabitants, without exception Croats: only in the chief town Krk, from which the island takes its name, is Italian spoken, an inheritance from the days of Venetian possession.

In the days of ancient Rome this town was called Curicta, which the Slav colonists converted into Krk. In the village of Bashka, on the eastern coast, there is preserved an ancient inscription in the Glagolitic characters, which is one of the oldest of Croatian antiquities. It relates how in the year 1100 King Zvonimir visited the island. Years later the island fell under the sway of Venice, but as the Venetian power fluctuated the family of Frankopani became all-powerful. Their ancient castle is still to be seen at Vrbnik. But in 1480 Matthias Corvin, King of Hungary, sent an expedition to overthrow the Frankopani, who appealed to Venice for protection. The artful Venetians advised him to come to them for refuge, and took care not to let him return. Thereafter, Venice held the island until the fall of the republic in 1797. From that date it has belonged not to Hungary-Croatia, but to Austria, and was treated for administrative purposes together with Istria.

The island is very rich in antiquities, especially in the old Croatian Glagolitic literature, and has preserved so many ancient customs and dialects, that it is a veritable gold mine, and almost virgin ground, too, for the antiquary and the folk-lore student. For four and a-half centuries the natives have been cut off from their fellow Slavs, and only last week were they restored to the fold, when the Yugoslav civil and military authorities formally took possession of Krk, amid the rejoicings of the inhabitants.

The quaint and picturesque old towns of Dalmatia, and the pretty islands are mostly known to Europe through their Italian names, since most of them were held for many years by Venice. But the people are essentially Slav, and Italian is known in the towns only. Zadar or Zara is the most Italianised of all, and the farther south one goes, the fainter is Italian influence. The beautiful city of Dubrovnik, or Ragusa, was never under Venice, but a haughty rival, as an independent republic of patricians, those trading vessels, known as Ragosies, whence, by metathesis, Argosies, penetrated to London, with silks and spices from the East.

With the exception of a few, the islands and coast are once more joined to their Slavonic mainland, and henceforward will be known by their correct names, so the following vocabulary is offered for the benefit of the bewildered reader:—

First, Fiume, which, of course means river, is known in Slav by the native word Rijeka. The big island facing it is Veglia in Italian, but Krk in Slav. Its neighbour Cherso is Cres, and Arbe is Rab. Only Pago is the same in both tongues. Pretty Loshinj is better known as Lussin in Italian. Opposite Zadar or Zara is the long slender island of Dugi Otok, or Long Island, which is known in Italian as Lunga. Spalato, from Diocletian's old palatium, is corrupted in Slav into Split or Splijet (pronounced Spleejet). The Italian Lesina in Slav is Hvar; Curzola is Korčula; Busi is Bishevo. Meleda is Mljet and Lagosta is Lastovo, that is, the Crayfish turned to the Swallow Island. The long, straggling peninsula of Sabioncello, where the jackal is said to survive, is Pelješats. Ragusa, the lovely, is already well known as Dubrovnik, the grove of oaks; that is to say, while its port Gravosa is Gruz, the hamlet of Ragusa Vecchia, the original mother-colony, is Cavtat (Tsavtat). In the Boke Kotorske or Bocche di Cattaro, Castel Nuovo is Erceg Novi, and Cattaro is Kotor. Further south, where foreigners rarely penetrate, Budua is little altered to Budva, a quaint little walled city well worth a visit. On the Montenegrin coast, the two Albanian villages of Bar and Ulcinj are better known under their Venetian names of Antivari and Dulcigno. Beyond that point are the mouths of the Boyana, and the wilds of Albania, with its own special problems.

A hundred years ago there were French troops in Yugoslavia—not as mission, nor as allies, but as enemies.

although they politically espoused the national cause even in those early days. It is not generally known that at the battle of Arcola, on November 15, 1790, it was Croat and Serbian troops that opposed Napoleon and compelled the French to make a flanking movement. Bernadotte tried to stir up the Slovenes against Vienna, and issued proclamations to them in their own language, which the Austrian Government had never recognised. On April 2, 1797, Napoleon himself came to Celovats, Klagenfurt, and called upon the Slovenes to rise under his protection. But they were all war-weary, and Napoleon came to terms with the Austrians at Leoben on April 19, by which Austria acquired Istria and Dalmatia. At the end of the month Napoleon left Liubliana for Italy, and Bernadotte handed over to Austria the Slovene districts of Krain, Korushka and Goritz, most of which is Italian to-day.

By the Treaty of Pressburg of 1805, Austria handed over to France Dalmatia, the Bocche di Cattaro, Istria without Trieste and a part of Croatia; so Serbs, Croats and Slovenes fell under the French sceptre. But this brought the French into conflict with other enemies. The natives offered a fair amount of resistance, but they reached Zadar late in January. This caused great uneasiness at Dubrovnik, where the patricians were divided into two parties—those who were in favour of maintaining their immemorial neutrality and the pro-French party. They fortified the town, however, while further south the Montenegrins, assisted by a detachment of Russians, got ready to oppose the French advance. General Lauriston arrived before the gates of Dubrovnik on May 27, and promised to respect the liberties and traditions of the republic. Resistance was useless, and the French troops quietly took possession, in the name of Napoleon, Emperor of France and King of Italy. This caused great stir in the Bocche; and a Russo-Montenegrin army, under Prince Viazemsky and Vladika Peter II., the great poet and soldier, marched to avenge the breach of the neutrality of Dubrovnik. The force consisted of 3,500 Montenegrins and 1,200 Russians. On June 3 they beat the French at Tsavtat, compelling them to withdraw behind the fortifications of Dubrovnik. The Montenegrins occupied the heights round the town, and the Russian fleet blockaded from the sea. The French were 7,000 strong, but were in an uncomfortable position, and it looked as though they must surrender the town, when reinforcements arrived and attacked the Montenegrins in the rear. Vladika Peter had a narrow escape of being captured, and was compelled to retire with his men to Gruz, where the Russians re-embarked and the Montenegrins withdrew to the heights of Kanavle. The Russians destroyed the shipbuilding yard where the Ragusans for centuries had built their famous "argosies," and all the villages around were in flames. Thus Dubrovnik lost its immemorial freedom, which it had defended successfully against Turks and Venetians alike, and became a French possession, and Marmont became Duc de Raguse.

Late in August news came through to Cettigne that the Tsar had not ratified the Peace concluded at Paris, and hostilities were resumed. The Vladika collected a force of about 6,000 Montenegrins, and Bokelj and Admiral Senjanin had about 3,000 Russians. Fierce fighting took place round Erceg Novi and up the coast, and the French were obliged to withdraw to Tsavtat (Ragusa Vecchia), where they fortified themselves. After some delay, both sides received reinforcements, and a fearful battle took place near Novi. It was a desperate hand-to-hand struggle, and the French, in spite of their bravery, could not hold out against the fury of the stalwart mountaineers. The battle raged till midnight, and at dawn the French withdrew to Tsavtat, pursued and harassed by the Slavs. Thus the Montenegrins defended the Bocche successfully against the might of Napoleon.

There was another diminutive statelet, Poljica, which fell a victim like its bigger brother, Dubrovnik. Its freedom had been granted by the old Croatian kings, and respected

Leaders of the World's Office Equipment and Filing Systems.

even by the Venetians and Austrians, but not by the French. The natives rose. Admiral Senjanin landed 500 Russian marines to help, but to no avail. The French suppressed this revolt savagely, and Poljica lost its independence.

In 1806 there was plenty of fighting between the French and Turks on one side, and Russians and Montenegrins on the other, in Montenegro and Herzegovina. There was fighting at Nikshitch, which was then Turkish, for it was not incorporated into Montenegro till the Berlin Treaty, at Trebinje. At last, in 1807, peace between France and Russia was concluded, by which the Tsar gave the Bocche to the French, and withdrew his fleet from the Adriatic. The news came like a thunderbolt to the sturdy Montenegrins and Bokelji, who had fought so hard for their freedom, only to be betrayed by the Tsar. The former withdrew to their mountain fastnesses, and on August 10, Marmont entered the Bocche and proclaimed it French territory.

THE CARAVANSERAI.

*Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultan after Sultan with his Pomp
Abode his Hour or two, and went his way.*

—OMAR KHAYYAM.

My recent reference to quaint epitaphs at home and abroad has brought me some more samples, and I cannot resist the temptation to quote a couple. The first comes (I am told) from a tomb in Winchcombe Church, Worcestershire, and is as follows:—

Beneath this stone securely fixed
Lies Mary, third wife of Samuel Dann.
She's gone to Heav'n inextricably mixed
With pieces of Jane and Mary Ann.

The other specimen I regard as "doubtful," even though it reaches me through a channel that should be above suspicion; for my informant is unable to say what part of the country it hails from, though he is sure it is genuine. Judge for yourselves:—

Here reposes Sarah Bowder,
Who died while taking a seidlitz powder.
If she had been more self-possessed,
She'd have waited until it effervesced.

It is almost as bad as the one about the lady and her three daughters who lie in some sort of vaults as a result of taking certain waters instead of Epsom salts; and though it may be regarded as instructive, it has not the fine human note that I seem to detect about the one composed (I feel sure) by Samuel Dann himself.

The animals of the Near East have been much in the public eye of late. The Zoo has had some notable additions, in the pair of gazelles sent home by Sir Percy Cox; and the papers have given us details about them and their past which for my part I have found at least as interesting as the particulars of footlight favourites and "cinema stars," which take up so much space these days. And now, I see, the dear old Chu Chin Chow camel has achieved fame by the none-too-easy method of frightening a coal-cart horse. Horses are nervous things, no doubt, but it seems to me that dragging a ton or so of coal about the slippery London streets generally knocks all the spirit of "shy" out of any horse. Yet, when the Chu Chin Chow's camel appeared suddenly in Charles Street, Regent Street, a horse drawing a coal cart shied at it, and to such effect as to cause damage to the extent of over £30 to a passing taxi. The matter went to the courts, and the judge found that there was no negligence on the part of the humped-one's owner, and therefore there were no damages. "Everyone," said the learned judge, "knew that horses did not like the smell or the sight of camels"; and though the statement was perhaps rather too sweeping, it was doubtless right in the main. The judge added that horses probably objected to the smell more than the sight. Are not these personal remarks just a trifle unkind? As to their truth, I certainly shall not dispute that.

CORSAIR.

GOVERNMENT MEDICAL WORK IN AFRICA.

Doctor J. B. Christopherson, C.B.E., writing in the May issue of *Central Africa*, the journal of the Universities Mission to Central Africa, on the medical work at Magila, a mission station in the northern part of Tanganyika territory (late G.E.A.), states that 200 out-patients are daily seen at this hospital, consisting chiefly of ankylostoma (hook-worm), bilharzia, yaws, malaria, dysentery, relapsing fever, and he urges that such work should be supported by Government funds, as the mission requires assistance for its medical work, in view of the fact that the Government is not able to provide sufficient doctors to cope with the disease amongst the native population of Central Africa. In support of his demand for Government help, he says that

most tropical diseases are curable—many could be stamped out—that tropical countries will not prosper until they are made habitable for everyone—black and white—and that in this respect the doctor is the only modern "pioneer of civilisation," and only he can pave the way for trade and commerce. The labour question—the pressing problem all over the African continent—will have to be solved by Africa itself owing to racial difficulties. At present natives cannot be moved about from one place to another without transferring their maladies and infecting new places. The natives must be made mobile by being made healthy. Medical science, in fact, offers the only adequate means of solving the great African "labour question." Therefore, public health work should be the first charge on Government funds in tropical Africa.

Although governments only can attack disease in the tropics on a scale sufficiently large to meet with success, not a single government in Africa attacked the health problem with thoroughness, and so none get the great results they might.

He advocates the free issue by the Government of quinine and paraffin to all persons suffering from malaria in all malarious districts in the tropics, the free distribution of quinine and paraffin to the Universities Mission for its public health work; also the stocking at the hospital at Magila of standard remedies for the treatment of yaws, ankylostoma, bilharzia, dysentery, smallpox, and other prevalent and disabling maladies, for use in the interests of the natives on the Government behalf; all such diseases should receive free and compulsory treatment in Africa. He says that Government doctors in Tropical Africa are engaged chiefly to look after the health of Government officials, whereas the natives should receive more attention—if the real interests of the country were adequately considered. Governments should make use of all resources in their power, including any help the missionaries can give, to improve the health of the native, if any impression is to be made on the frightful diseases of Tropical Africa.

The above recommendations appear to be fitting and timely, for we have heard of Governments who will not permit persons not having recognised professional qualifications from dispensing and dealing with remedies. This is unfortunate for some of the U.M.C.A. stations in Central Africa, whose nurses have been doing useful medical work, and who, from the nature of things, are often unsupervised by a doctor. An exception should be made in the case of this regulation, no doubt intended to stop the work of the charlatan and the quack, in order that it may not stop also really useful medical work being done by mission nurses and other intelligentsia.

During the war nurses were authorised in the surgical units at the front to give chloroform, and there is no reason whatever why experienced nurses should not dispense well-known and routine remedies when doctors are not available in Central Africa.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Conditions in Bulgaria.

In the speech recently made by M. Bouroff, a former Minister of Finance, a report of which appears on another page, one seems to detect a new note in Bulgarian political criticism. Principles and policies are more emphasised than personalities. In a small country with nine political parties it is difficult for leaders to get away from the Codlin-Short form of controversy. M. Bouroff urged that there should be no political parties in Bulgaria to-day, but that the whole nation should combine on democratic lines and stand for freedom of individuality, of work, and of personal rights. M. Bouroff is exercised in mind over the Consortium, which has certainly a considerable amount of criticism to answer, as it is credited by its opponents with having lost the country anything up to two milliards of levas, what with loss of price and the spoiling of the grain. But as the subject is being investigated by the Reparations Commission, we may expect shortly to know the facts of the matter.

Oil Coming into its Own.

Developments during the last week or so leave no doubt that the strike has indelibly impressed upon the business community the necessity of having another fuel at its disposal, and the result is that one principal consequence of the miners' movement will have been to precipitate the oil age. It was inevitable, but without industrial troubles coal would probably have reigned supreme for a number of years yet. It is not now in danger of absolute dethronement, since for household purposes people will have no choice but to continue looking to the mines for their supplies, but very soon it will be a dual kingship, with oil as the predominant partner, if, as will probably be the case, seeing that this fuel is cheaper and easier to use, it is adopted for practically all commercial purposes. We can only hope in the circumstances that Great Britain's good fortune in the past will continue, and that the opening of the oil age will be heralded by the discovery of really important oilfields in this country, since the prospect that in the years to come the demand for coal abroad will dwindle as oil comes into its own is serious enough, without the added handicap of having to obtain our oil supplies from overseas.

Meaning to Oil Industry.

To the oil industry the dawn of the age means, of course, everything. It seems strange now that only last year the question of finding markets for the ever-increasing output of oil was raised. To-day the boot is on the other leg, and instead of the fear that supply is outpacing demand there seems valid ground for apprehension that in the immediate future demand may temporarily outstrip supply. One imagines that the great change in the outlook will give a great stimulus to the development of the oil resources of Roumania, Bulgaria, and other Near-Eastern centres. Transport has been, and still is, unfortunately, a retarding influence in Roumania, but it is improving steadily, if not so rapidly as might have been hoped, and it should not be long now before Roumania again takes her place among the great oil exporting countries of the world. As I have had occasion to remark before, the Near Eastern exchanges afford a most unreliable index of the economic positions of the various countries, and Roumania's, with her great oil resources, but with the leu at about 215 for sterling, is surely the most absurd illustration of all.

A Possible Consequence.

Great changes usually leave their mark on a country, and it may be anticipated that the substitution of oil for coal in industry will have some interesting social consequences. There will almost certainly be a change in the distribution of the industrial population of the country, perhaps not pronounced for some years, but the tendency will be there all the same for those who look for these things. The industrial revolution of the last century swept the workers into factories in the Midlands and the North in close proximity to the minefields. As oil has to be brought by sea, is it not probable, unless we develop unsuspected resources here, that the trend of industry will be to the south and south-west coasts, or to centres elsewhere in close proximity to ports, with a view to reducing transport costs? One does not care to think of thriving industrial centres

in the south, but, of course, there is this to be remembered, that the oil city to come will not be the smoky place that the mind instinctively pictures when the word "industry" is mentioned.

The Falling Drachma.

The movements of the Greek exchange provided the outstanding feature of the foreign exchange market last week. Ever since the changed régime in Greece, Greek exchange has steadily depreciated, but last week a sharp fall took place, the rate going out to 86 drachmæ. Subsequently, there was a sharp reaction, presumably the result of the control that has been introduced with the object, it is stated, of checking speculation in exchange. No doubt speculation has had much to do with the fluctuations in the drachmæ, but the main cause is to be found in recent political developments, and the depreciation may be taken to indicate the disquiet felt at the country's general financial and economic position.

The Ter Meulen Scheme—

From the details of the Ter Meulen scheme for the restoration of trade with impoverished countries, which are set out in another column, it will be seen that it is well suited to achieve its object. There is, however, the very serious drawback that its utilisation depends entirely on whether or not the countries it is designed to help will make use of it. It is not probable that the Governments concerned will take action unless they are convinced that there is an internal demand for the scheme, and we are therefore, faced with the prospect that it may be shelved indefinitely pending a strong movement on the part of the national traders. That is a most unsatisfactory state of affairs, because world commerce cannot go on in its present state for long without there being a great danger of very serious consequences; and emphatically the need of the moment is that an export credits scheme should be put into immediate operation. Traders are simply not in a position to wait while Governments are making up their minds to sacrifice temporarily a part of their revenues in order to obtain an issue of bonds.

—And the League.

As pointed out in the review of the scheme, British business men can contribute to insuring its adoption by impressing on importers in foreign countries, who are unable to obtain the credits they desire by other means, that the scheme offers the best prospect of the required facilities. Admittedly, any pressure of that kind would be useful, but such a campaign is likely to take some time to mature. It is now many months since the League of Nations officially sponsored the scheme, and I assume that efforts have been made by that body to insure the co-operation of the countries concerned. It is, or should be, able to speak with peculiar authority on this matter, and if it has not been able to arrange for the utilisation of the scheme, then all that can be said is that it would have been better to have left the matter alone. But, as I have said, I take it for granted that the necessary steps have been taken, and that it will not be long before bonds have been allotted to a number of countries.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

ROUMANIA.

BUCHAREST, April 27.

Price of Bread.

The price of bread and flour is still fixed by the State, and new rates have just been issued which, however, represent a very slight modification of those ruling up till now. The price of white flour is to be 4.50 per kilo, and of brown flour 2.50 per kilo. The price of the brown bread usually eaten by the working classes is to be 2.25 per kilo, as against 25 bani before the war. The new price of the fine white loaf, known as "franzela," and resembling a Vienna roll, is 2.50 lei, as against 20 bani before the war, i.e., twelve and a-half times the pre-war price.

BUCHAREST, May 4.

Roumanian Industries Fair.

The Council of Ministers has approved a proposal put forward by the Ministry of Industry and Commerce that a fair should be organised for the exhibition of samples of Roumanian industrial products. The fair is to be held in the Carol Park, and will be opened on August 14. Foreign goods will not be exhibited. M. Manoilescu, Director-General of Industry, has been appointed "Commissaire Général" of the fair, which it is proposed to make an annual event.

Treasury Bonds.

The Government have approved the decision of M. Titulescu, Minister of Finance, that no more Treasury Bonds should be issued except in Roumanian lei. One appreciates the wisdom of this measure on reading that on March 1 there were Treasury Bonds in circulation issued in various currencies which at the present rate of exchange amount to 18,255.4 million lei.

Exports in 1920.

The export figures for 1920, which have now been published by the Bureau of Statistics, show that Roumania's exports amounted in value to over two and a-half milliards of lei. The total grain exports of rather under 930,000 tons (metric) represent less than half the grain exports in pre-war years, which ranged from two to three million tons. The total petroleum exports amounted to about 246 thousand tons, which is a great improvement upon the 1919 figure, but still far below the normal. The petroleum production in 1920 was over one million tons, as against an average of nearly two million in the three years 1913-1915. Less than half of that was used for home consumption, so there would appear to be a certain surplus left for exportation; but the very imperfect transport arrangements are still a great handicap, and production has to be limited for lack of storage room.

General News.

The Roumanian delegation to the conference at Revel leaves Bucharest to-day. It is headed by M. Filalitty.

It is stated that during the first fortnight in April the sales of the factories of the State Monopolies situated in Moldavia, Bucovina and Bessarabia amounted in value to 38 million lei. The monopolies include tobacco, salt and matches.

A company has just been founded in Arad for the manufacture of locomotives, railway carriages, dynamos, motors,

etc., with a capital of 75 million lei, of which M. Camille Costagliani, of Vienna, has subscribed 50 millions.

An agreement has been made by the Roumanian Government Commissioner for private railways with the representatives of Budapest societies possessing private lines in Transylvania. It has been decided that all these societies shall be registered with the Roumanian authorities, and that their contracts with the Hungarian Railways will be renewed with the *Căile Ferate Române*. A Roumanian Railway Commission has been established at Cluj.

It is announced that the bauxite deposits of the Bihor district are about to be bought by a group of Roumanian financiers for 40 million lei.

The Government has been informed by the Roumanian representative with the Inter-Allied Commission at Wiesbaden that several locomotives have been discovered which were removed from Roumania by the Germans during their occupation of Wallachia, and it is hoped that they will soon be restored to Roumania. In spite of the various contracts placed abroad for locomotives very few have yet been delivered, and still fewer have been put into working order. All the same, the transport situation has slightly improved during the last few months.

BULGARIA.

SOFIA, April 30.

M. Bourroff on the Outlook.

M. Bourroff, ex-Minister of Finance, made an important speech at the Renaissance Theatre, Sofia, on April 17, in the course of which he reviewed the present political and economic situation of Bulgaria. He commenced by referring to the attitude of the Allies towards Bulgaria. "Whatever we do," he declared, "is wrong, though the Agrarian Government has done its best to demonstrate to the Allies its loyal intentions and its wishes to fulfil the obligations imposed upon the country by the Peace Treaty." Until now, the speaker went on, these efforts had been fruitless, and even the visits of M. Stambolisky and other Ministers to Europe had not achieved any success.

He took a very gloomy view of the economic situation, pointing out one by one the downfall of the various industries caused by the policy of the Government. Taking first the "flour industry" he said that until two years ago Constantinople was the Bulgarian market; but now it was the United States that sent flour there. Twice as much alcohol as was required for local needs was produced in Bulgaria, but owing to the export having been forbidden, factories were stopping production. The same applied to eggs, and the tax of 10-12 levas a kilo on tobacco, which was ruling last year, caused the foreign market to be lost with resulting damage brought upon a great national industry. Then again, as regards raw leather, which Bulgaria had in plenty, prices in Europe were high, but the export was stopped, and now when the restrictions have been removed prices in Europe had fallen, and by this alone 150 million levas were lost to the country.

The speaker then proceeded to deal with the Consortium, which he described as the worst of all the evils. It was first created in order to supersede the Government monopoly of wheat, which existed during the war, and it was also intended to increase the value of the leva. It was successful at the outset, with the assistance of the wheat merchants, but after a time it began to be a burden on the country, and up to April 15, 1921, the Consortium had only been able to obtain 54 million kilograms of wheat from two harvests, which represented about a third of the amount collected before. Then the price of wheat during the past seven or eight months had fallen as much as 60 per cent., and the leva also had fallen heavily. From this Bulgaria and the producers of wheat were losing milliards, but the Government said that the nation would bear the losses, but here, said M. Bourroff, came the point: "Who are the nation? Are they not the very same producers?"

"I am asked," M. Bourroff went on, "when the cost of living in Bulgaria will fall; this can only happen when there is more production, less consumption, and large and well-organised exportation. If these three things come to pass the leva will rise and there will be a corresponding fall in the cost of living. It is not important how many levas you get for your production or your work, but it is important what international value the paper currency will have."

Speaking of the Budget, M. Bourroff said that the deficit of this and last year's Budget, together with the different

credits, amounted to two milliards of levas, and it would be noticed that not a leva had been put aside for the paying of the indemnity. This deficit was equal to the whole capital of the country, and they could not raise themselves from the mire that they were in if the Government continued their present policy, which did not allow of a safe guarantee for capital. The citizens knew that the burden was heavy, and realised that while the country was becoming poor they were also individually becoming poor. "They recognise that they must pay," he continued, "but the payment must be righteously made; the measure which was brought forward to tax the whole population according to their incomes and their belongings should have been passed. The country is dissatisfied, and the fact that at the last election 180,000 votes were cast for communism is a proof of this dissatisfaction."

Turning to the political situation, M. Bouroff said that there were only two possible policies—firstly, the policy of personal property, which ensured the surety of the person, the work, and the capital, while the Government kept the control for national solidarity and justice; secondly, there was the policy of communism, by which the Government took all means of production into its own hands and everyone had to work for the whole in order to gain a bare living. The first policy would create progress, the second would create nothing. They had only to regard the tragic plight of Russia to see the truth of the latter statement. "But what is the policy of the Agrarian Government? It is neither the one nor the other; it is aimless, and only destroys without creating." In conclusion, M. Bouroff said that there must be no political parties in Bulgaria today, and that the only hope of prosperity lay in the alliance of democracy and the bourgeois, and by the word "bourgeois" he understood every Bulgarian who was for the freedom of individuality, of work, and of personal rights.

YUGOSLAVIA.

ZAGREB, May 5.

General News.

The repairs of the Save bridge at Belgrade are at last finished, and the familiar old structure has again resumed its pre-war aspect, after having been blown up and repaired nearly half-a-dozen times during the past seven years.

The Ministry of Trade and Commerce has decided to take active steps to encourage industry in the country. The

Government will promote the foundation of works for handling the various raw materials of which the country possesses such large supplies, and will grant credits for this purpose. A scheme is being worked out in detail by the Ministry for the approval of the Cabinet.

It has been decided to place substantial orders for heavy locomotives in America, and for trucks in France and Belgium.

Immigrants into Yugoslavia will in future be able to bring in their personal and household property free of duty. There will, of course, be the necessary formalities to complete, as well as the necessary permission to immigrate.

CYPRUS.

NICOSIA, April 25.

Crop Prospects.

The barley harvest, regarding which there had been great anxiety, has begun in all the most forward parts of the island. Fortunately, the late good rains came just in time to save the crops. Wheat, some of which is backward, is also doing well in consequence, but more rain is required. The cereal harvest in general, including oats and vetches, should be on the whole satisfactory. Prices for carobs remain at 20s. to 21s. the kantar (£4 9s. to £4 13s. the ton). Wine fetches 20s. to 25s. the "load" (about 8d. to 10d. the gallon), oil, 22 piastres (2s. 5d. the litre), barley, 3s. a bushel. The general outlook is now favourable for all produce.

The Roumanian Ministry of Finance has announced its decision to reduce the export taxes on the oil industry. The new taxes, which only await the sanction of the Cabinet, are to be as follows:—Light benzine, 6,000, plus 1,000 lei commission per car; heavy benzine, 5,200, plus 800 lei commission; lamp oil, 2,000, plus 300 lei commission; gasoline, 2,800, plus 500 lei commission; heavy oil, 7,000, plus 1,000 lei commission.

The Sudan Government Railways has issued a leaflet describing the route between Egypt, the Sudan, and Uganda and British East Africa. The route is from Cairo to Khartoum by rail, from Khartoum to Rejaf by steamer, from Rejaf to Nimule by road, and thence on via Butiaba, Masindi, Masindi Port, Namasagali to Jinja, whence the journey is performed by steamers of the Uganda Marine and by the Uganda Railways to Nairobi and Mombasa.

TRADE AND THE EXCHANGES.

THE TER MEULEN SCHEME.

"International Credits," a little brochure just issued by the International Credits Office of the League of Nations, gives a practical exposition of the Ter Meulen export credits scheme, which has been approved by the League as providing a satisfactory remedy for the handicap to trade created by the present position of the foreign exchanges.

It needs no demonstration that the use of artificial expedients for the restoration of trade and industry lays itself open to serious objections. Unfortunately, the circumstances of the times leave no option in this respect. At the end of the war the world was left in the position of a patient rallying into convalescence after a terrible fever. Since November, 1918, thirty months have passed, and while the patient has improved the progress has been far too slow, and it is clear that more drastic treatment is required if the process of recuperation is to be hastened, and the danger of serious complications avoided. This was clearly recognised by the Brussels Financial Conference, and the special Credits Committee appointed by this body to consider the problem of international credits unanimously recommended to the Conference the scheme of M Ter Meulen, of Messrs. Hope and Co., Amsterdam. Following its approval it was decided to appoint an organiser to:—

1. Prepare a constitution for the international Commission;
2. Work out the details of the scheme in all its bearings, including the preparation, with legal advice where necessary, of forms of bonds, pledges, etc.;
3. Consider how far the scheme can be worked in conjunction with services existing in various countries (e.g., Export Credits scheme in the United Kingdom; Edge Act in U.S.A.);
4. Make inquiries as to how far borrowing countries are likely to avail themselves of the scheme; and
5. Advise the executive organisations likely to be required, with an estimate of the cost thereof, which, if the scheme eventually becomes effective, should be covered out of the proceeds of reasonable charges for commission.

The Scheme Explained.

The "Ter Meulen" scheme, it is emphasised, is not a panacea for all the troubles of the time, but is, in brief, an attempt to assist traders in impoverished countries to import on credit, so as to re-establish industry and revive trade. It is proposed to do this by the provision of a special form of security to reinforce the credit of importers. The Government of an impoverished country will give particulars to the International Financial Commission, which is to be formed by the League, of the national assets which it is willing to pledge as security for credits granted to its traders. It will be the duty of the Commission to decide the gold value of these assets, and then to authorize the country concerned to issue Government bonds up to that value. The Government can then lend these bonds to its traders for use as security in order to obtain credit from traders in other countries.

From the above it will be seen that the scheme is in no way a complicated affair; on the contrary, it is simplicity personified, and is so framed as to serve the needs of the most impoverished country. Every State has at its disposal some revenue-producing assets, such, for instance, as customs duties or monopolies, which can be given a gold value. The amount of the bonds to be issued will, of course, not exceed that value, and the revenues arising from the pledged securities will be paid to the Commission. There is, therefore, every justification for the hope that traders will recognise the bonds, which will probably be redeemable in from five to ten years, as valuable security and grant credits on them.

Stress is laid on the point that the utilisation of the scheme will not involve any real alteration in the normal course of business. Terms will be arranged between the importer and the exporter in the usual way, and the importer will then borrow from his Government, for whatever term for which he has obtained credit, the requisite amount of bonds that he has to deposit as security. On the completion of the transaction, that is, when the importer has made payment in full on the expiry of the credit period, the bonds will be returned to him, and he will hand them back to his Government for cancellation, when the security which stood behind them will be available for further issues of bonds to the same amount. Should there be default, however, the exporter detains the bonds, and has the choice of either keeping them as an investment or selling them and paying himself out of the proceeds of the sale. In the event of his deciding to sell the bonds must be offered first to the issuing Government for redemption by meeting in full the exporter's claim. Should the Government decline to do this then the bonds can be sold in the open market, any balance accruing above the claim going to the issuing Government, while should the bonds realise less than the

required amount the exporter will have a claim for the deficiency against the importer.

Such, in short, is the method by which the scheme will operate. It may not be perfect, but it would, at any rate, appear to provide a suitable method of getting over the difficulty of the exchanges, and the result of its adoption, it is justly pointed out, should be "a process of gradually increasing improvement, which will soon bring a return of conditions in which industry and commerce will be possible without any abnormal assistance." There will be, therefore, it may be hoped, no unnecessary delay in bringing it into operation. Unfortunately, unlike the new export credits scheme which our Government are proposing to introduce, the Ter Meulen scheme cannot be made available at a moment's notice, for the very good reason that it is not a matter for a single authority. The League of Nations has sponsored it, but its utilisation depends entirely on the willingness of the Governments of the countries concerned to apply for an issue of bonds. Pending this action, nothing can be done. The most effective way of bringing the scheme into effect will be by the development of a demand in importing countries for an issue of bonds, and exporters here can play their part in stimulating such a demand by impressing upon their would-be customers that the scheme provides the best method of obtaining the desired facilities on reasonable terms.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on April 28 were as follows:—Agricultural Bank of Egypt, £4½; Alexandria Water Co., Ltd., £6 9-16; Anglo-American Nile Steam, £3; Associated Cotton Ginners, £4; Banque d'Orient, Fr. 59; Behera Ord., £E8; Behera Priv., £3 3-16; Bonded Stores, £9 15-16; Brasseries d'Egypte, Fr. 115; Building Lands of Egypt, £11-16; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com. d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 7,700 ex; Credit Foncier Egyptien, Fr. 589; Credit Foncier 1885 Oblig., Fr. 328; Credit Foncier 1903 Oblig., Fr. 235½; Credit Foncier 1911 Oblig., Fr. 229; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 75; Eaux du Caire Jouissance, Fr. 100; Egypt and Levant S.S. THE BULGARIAN EXCHANGE IN 1920.

INCUBUS OF THE CONSORTIUM.

The Sofia Stock Exchange has recently published a small brochure on the foreign exchange situation in Bulgaria during 1920, of which the following is a *résumé* of the more significant passages.

The State Budget was voted with a deficit of 340 million leva, which probably will be twice as large in reality in spite of economies effected in expenditure. The regulation of imports and exports seems to have been carried out without any organised system, as it is reported that the export of various goods was not permitted at the proper time when export could have been organised, but was allowed only when markets and prices abroad had become unfavourable. On the other hand, imports were under a vacillating régime, which had an unfavourable effect until free imports were allowed, with the exception of those goods mentioned in the law of 1918. The number of exportable goods from which currency could have been obtained for the payment of increased imports was not, however, increased.

While matters were considerably quieter in Bulgaria during 1920 than in the previous year, yet internal, fiscal, social, and economic measures increased the paralysis in production, exchange, and credit, and caused a greater demand for foreign currency, etc., which reacted unfavourably on the exchange rates. In conjunction with this, the increased fiduciary circulation also had its disadvantageous effect.

The Sofia exchange market was especially under the influence of the law for the Centrale des Devises and the Consortium for the export of cereals. This law was partly abolished on May 15, 1920, but the regulation requiring one-third of exchange on exports remains in force. While this was a necessary measure at that time, it now seems to be desirable that the whole of the exchange from exports should be freed.

The Consortium has had, and still has, a very important effect on the state of the exchange. Created originally for one year, it was prolonged, although it had apparently failed to justify the great expectations entertained with regard to it. At the end of June, and especially during July, of last year it became obvious that this method was impractical, that it was hampering export at a time when a large surplus of various kinds of cereals remained unexported and an abundant harvest had still to be gathered.

In anticipation of the eventual freeing of the export of cereals—a freedom which would cause the maximum amount of cereals to be exported in the least time—the value of the leva rapidly improved during July. In a few days very favourable changes took place. For instance, the Sofia Bourse quoted exchange on London as follows:—June 3, 263; June 15, 257; July 8, 190; July 15, 178; August 3, 189; December 30, 324. Notwithstanding this, the export of cereals was and is still controlled by the Consortium. Cereals represent 75 per cent. of the country's normal exports, and without this export equilibrium is impossible. Withdrawn from the international commercial balance, no improvement in the currency could be expected, and the exchange rate once more took the upward path and still continues to do so.

The opinion held in Bulgarian commercial circles is that the Consortium method of export as at present organised cannot improve the currency, as the cereals are bought from the producers at fixed prices, and by the time they are reaped, sorted, stored, and loaded they are burdened with expenses which are essentially inflexible. If the international price of cereals falls, it is necessary, in order to cover the first (purchase) price and subsequent expenses, to increase the exchange rate—i.e., for the same or reduced prices in foreign currency more Bulgarian leva must be obtained by exchanging them at a higher rate. Owing to the fact that the Consortium holds three-quarters of the country's exportable commodities, it is in a position to dictate the exchange rates on account of its privileged position.

The creation of the Consortium, together with the results given, go to show that the grouping of any part of economic life in an artificial manner reflects unfavourably on the economic life. It is unnecessary to point out how such an organised export paralyses exports in general, discourages production, decreases consumption, hampers internal and external trade, affects the budget and credit system, and introduces into the complex economic system unknown factors which kill all enterprise.

The need for foreign currency is growing in Bulgaria. The course of exchange was especially noticeable during July last, due to the reasons already explained, and also during the month of November, when a tendency was observed towards fresh correlation of all currencies abroad. During the whole time, however, bourse transactions only took place on a cash basis.

PAPER-PULP SUPPLIES FROM INDIA.

An interesting paper was read before the Royal Society of Arts recently on this subject by Mr. William Raitt, F.C.S., cellulose expert to the Government of India.

In 1913 the world's consumption of paper was estimated, said Mr. Raitt, at ten million tons annually, increasing at the rate of 25 per cent. every ten years. It must be now nearly twelve millions, or would be if the supplies were available. Of this about 80 per cent. was produced from wood—coniferous wood and preferably spruce. In 1913, although there had been a slow but gradual appreciation of values during the previous ten years, it was still possible to deliver chemically prepared pulp in this country at £9 to £10, and mechanically prepared, or ground wood pulp, at £5 10s. to £6 per dry ton, and newsprint paper could be produced for a penny per pound. Now values were four to five times these figures. The causes stated in order of their importance from lesser to greater were these:—(a) The slow but gradual rise of values in pulp and all that it depended upon dating from the period of lowest prices about fifteen years ago. During the war this was, by reason of controls, restrictions and reduced consumption, more or less in suspense, but had now fallen on the industry with five years' cumulative effect. (b) The universal appreciation in value of timber for constructional purposes. The sawmill was now a better market than the pulp factory. (c) Effects of the war in permanently increased costs for labour, freights, fuel, and machinery and equipment. (d) The total cessation for six years past of manufacturing expansion. (e) The demand for wood had outrun the supply. The trees would not grow as fast as they were cut.

The last of these was the root cause of the trouble, and was a constantly increasing menace. It did not necessarily imply that the world's stock of timber has been seriously depleted, but it did mean that the forests most favourably situated for exploitation—the areas which produced the penny per pound newsprint—had been largely reduced in productiveness and in many instances destroyed for ever. Expansion in wood-pulp production must seek its supplies at greater distance and increased cost. Notwithstanding this, the new values of pulp, making all allowances for temporary inflation, rendered such expansion abundantly justified. How much greater, therefore, was the justification for the introduction of a material which was one of nature's waste products, which reproduced itself naturally and rapidly, for which no sawmill competed and which offered itself at nature's valuation, which was next door to nothing!

So they asked themselves the question, What could India do to fill the gap which had been created? The answer was, a great deal, though not so much, perhaps, as he sometimes heard assumed. When the threatened shortage of paper supplies began to be agitated, some fifteen years ago, he remembered an eminent scientist issuing what was intended to be a reassuring statement to the effect that "a paper famine was unthinkable, because paper could be made from any vegetable substance, and the world teemed with that." The dictum was seized upon by the Press and circulated round the world, and no doubt brought comfort to many anxious consumers. But, like many other assertions of many other eminent scientists, it was, considered as cold fact, perfectly true, and at the same time, considered as a practical contribution to a difficult problem, perfectly misleading and fallacious. Paper *could* be made from any vegetable substance, but money could not, and the paper-maker had a quite natural reluctance to make paper unless he could transform it into banknotes. But the eminent scientist's utterance gave rise to a whole crop of wild-cat

proposals to make paper from everything, anything, and sometimes bordering on nothing. Nature, however, was not so fantastically generous as that. He whom she would favour must delve into her secrets slowly, deeply, carefully; hoping all things, proving all things, until finally he could hold fast to that which was good. This had been in essence the principle upon which the investigations of the Indian Forest Research Institute had been carried on. They had thought it more important in the early stages of their proceedings to save people's money than teach them how to make it, for nothing was more fatal to a promising industry than a disastrous failure at its start. At the same time, while paying considerable attention to the how-not-to-do-it programme, they had met with an encouraging success on the positive side. The net result was that so far they had found only two small groups, both belonging to the Gramineae, which were economically sound as regards the quantity and quality of their cellulose and the manufacturing conditions under which they could be exploited. These were bamboos and a few Savannah grasses. But, though few in number, in the aggregate they meant something considerable. It was he thought, a modest estimate to say that from bamboo, taking only that which was available under possible manufacturing conditions, Burma, Bengal, and South-West India could produce ten million tons of pulp per annum, and Assam, from Savannah grasses, three million. India could, therefore, produce pulp for the whole world. Let them consider also the growth conditions under which this was obtainable. To grow a spruce or fir tree to pulp wood size took from forty to sixty years, with the result that a factory which might at its start have its supplies at its back door found these year by year receding into the distance with constantly increasing transport costs. Bamboos and grasses came to maturity as yearly or eighteen monthly growths, and all they had to be careful of was not to reduce the reproductive vigour of the plant by too frequent cropping. With bamboo this might mean a three to five year rotation of cropping, and with grasses two to three years. They must therefore have a sufficient area to exploit to allow of those rest periods; but that only meant that for a ten thousand ton pulp output per annum with average figures for yield and rotation, a 20,000-acre reserve would keep a factory going in perpetuance—a vastly different condition of affairs from those governing a wood pulp insulation which lived on its capital from the start or must adopt a re-afforesting policy, which reacted badly upon costs.

ENGINEERING.

(By Our Engineering Representative.)

An Improved Car

Though retaining much the same appearance as its immediate predecessor, the new 1921 Humber differs in one or two respects, and, whilst the general design and arrangement remain much the same, the alterations which have been incorporated are such as will lift the Humber out of the "high average" well into the front rank of British productions.

The new model, for one thing, is of increased power. The engine has now a bore of 68 m.m., with 120 m.m. stroke which gives a cubic capacity of 1,743 cubic c.m., and entitles it to a Treasury rating of 11.4 horse-power. The engine is of the monobloc, single unit type, with clutch and gear, is now fitted with a detachable cylinder head, whilst the valve mechanism and springs are covered with large-sized inspection covers. All this has greatly simplified the work of clearing away carbon deposit and of grinding-in and adjusting valves, and the owner-driver who likes to carry out all his own adjustments and repairs will appreciate the alteration in design. The inlet and exhaust manifolds have been arranged on one side with the carburettor and its attachments, thus giving a good clear space for the fitting of the Lucas single-unit dynamotor and high-tension magneto.

An innovation which will also be appreciated is the use of a new type of silent chain for the magneto drive and for operating the dynamotor, etc. The chain is of larger size than heretofore, thus obviating any risk of stretching, and ensuring long life. All these chains are, of course, completely enclosed.

A point worthy of notice is that aluminium pistons are now used, and the adoption of these, together with the increased bore of the cylinders, has given an added liveliness to the engine and a quickness of acceleration which was never a striking feature of the majority of British light cars. From an engineer's point of view, interest attaches to these aluminium pistons in that they are made with a split skirt which causes the piston to cling to the cylinder walls and at the same time prevents slapping. For some reason unknown to me, the usual arrangement of gudgeon pin and small end appears to be reversed. The gudgeon pin seems

now to be fixed in the little end of the connecting rod to oscillate in bearings machined in the bosses in the piston. I am not clear as to the advantage of this, and shall be glad to hear further concerning it from the firm in order that I may pass the information on to my readers.

The cylinders are thermo-syphon cooled, and the radiator has been raised somewhat, an alteration which certainly adds to the smart appearance of the car. Lubrication is by a gear-driven pump, bolted to the crank-case in a readily accessible position. Oil is drawn from a sump and delivered to troughs, into which the big ends of the connecting rods dip, and, being provided with spoons, throw the oil up to the big end bearings and cylinder walls. The sump has a removable filter, and contains an oil-level gauge which shows at a glance how much oil is in the crank-case.

Transmission is by a propeller shaft with two universal joints, the first of which is of the flexible disc and the second of the enclosed box type. Half elliptic springs, specially long, take the torque, these being anchored at the forward ends inside hollow brackets riveted to the chassis frame and hung on shackles at the ends of a cross member which spans the rear ends of the frame. The side members of this are arched over the back axle, so as to allow of the rise and fall of the chassis and axle.

The body work strikes a very high note, and the four-seater touring body in particular is one of the smartest bodies on the road. The mudguards are well moulded, and the top edges of the body are slightly curved over. A good stream line effect is also obtained. The upholstery is in hand-buffed leather, and the fastenings of the doors are internal, so as not to break the harmonious lines of the body.

Spun Glass Filters.

In connection with the oil industry considerable trouble has been experienced by reason of the quantity of fine sand held in suspension. This is not present, of course, in every oil yield, but where it is it rapidly destroys the working barrels and also the tubings by its pronounced cutting action.

The value of spun glass as a filtering medium has recently been demonstrated by a remarkable series of experiments in which a strainer was constructed in the somewhat rough, but nevertheless highly efficient, manner of taking two pieces of pipe of different diameters and loosely packing the intervening space with spun glass. It is said that the tests were made on the roughest of brown oil and sludges that could be obtained from an oil refinery, and it was found that even the finest portions of sand, and other foreign matters, were eliminated. From a description it seems that the process increased the most minute water globules to the size of a pea, thus making the complete removal of the water a comparatively easy matter.

Glass, of course, is not only extremely hard, its hardness being practically the same as that of sand, but it is also non-corrosive and non-corrodible. Even the finest threads of spun glass possess sufficient strength to span openings of about $\frac{1}{2}$ inch in diameter, and to clean them all that is required is to sluice the threads with a little petrol or benzene; in fact, any light oil product can be used for the purpose. The experiments have not yet been completed, and details of further results will be awaited with interest.

Austin Output.

In spite of the coal strike, and all other difficulties, this company is turning out more cars than at any previous period in the year. May sales have gone up with a bound, and the call of the motoring public for the "Austin Twenty" is keen and continuous.

GENERAL
MERCHANDISE

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Sugar.—Home refined is steady. West Indian Crystallised has come to business at 55s. to 58s., but American granulated at 61s. 6d. has lost 1s. Czechoslovakian sold at 32s. Futures are:—June, 25s.; July, 24s. 6d.; August, 20s.; September, 21s. 6d.; October, 19s. 9d.; November, 19s. 3d.; October-December, 19s. 4½d.; December, 18s. 9d.

Coffee.—The market has been unsettled. East Indian good bold colouring is quoted at 108s.; bold grey-greenish at 85s. 6d.; and peaberry at 93s. 6d. to 99s. 6d. Costa Rica, bold to good bold greenish, has come to business at 108s. 6d. to 117s. 6d., and peaberry at 130s. to 145s. Nairobi ordinary bold to good bold greyish is 86s. to 102s. 6d.; medium, 74s. to 80s.; and peaberry, 80s. to 90s. Futures are:—May, 39s. 6d.; July, 39s. 6d.; September, 41s.; December, 41s. 6d.; March, 42s.

Oilseeds.—A firm tone has characterised the market. Indian linseed is unchanged at 17s. Rapeseed has risen, with Toria at 19s. 6d.; bold Ferozepore at 18s. 6d.; and brown Cawnpore at 16s. 6d., a rise of 6d. in each case. Cottonseed is steady, with Bombay unchanged at 10s. 6d., and the Egyptian black variety 3d. lower at 12s. 6d.

Oils.—Unsteadiness has prevailed. Linseed oil has gained 1s. at 29s. Rape oil is higher, with crude at 49s. and refined at 57s.; increases of 3s. in both cases. Refined cotton oil has come to business at 42s. Egyptian crude at 34s. has shed 1s., but deodorised is unaltered at 47s. The price of turpentine has been very irregular during the week, and is now quoted at 90s., which is lower by 15s. than last week.

ROUMANIAN CROPS IN 1920.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 4.

The Statistical Bureau has just published the following figures regarding some of the principal crops in 1920:—

Wheat was sown on an area of 838,536 hectares, as against 1,199,758 in 1919 and 1,900,000 in normal years. The harvest amounted to 623,860 tons, as against 1,319,330 in 1919, and a normal yield of 1,206,340. The average weight per hectolitre in the Old Kingdom of Roumania was 74.4 kilos., rather below the normal average.

Maize was sown on an area of 1,954,874 hectares, almost equal to the normal area, and the production amounted to 2,013,640 tons, as against 2,739,500 in normal years. The quantity required for home use (food and seed) is estimated at about 1,450,000 tons.

It is hoped that the 1921 harvest will show an improvement on that of last year, as more of the expropriated land will have been distributed, and, the army having been placed on a peace footing, a great many peasants have returned to their villages and their land. The much-needed rain has come at last, and fairly good reports are coming in from the provinces regarding the harvest prospects, though several districts have suffered pretty severely from the drought and forage has been exceedingly scarce.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated May 9:—During the week ending April 30 crop prospects fair to good generally, except in North-West Frontier Province, unirrigated areas of the Punjab and Hyderabad, where rain badly wanted. Bombay cotton market steady. Fine M.G. Oomra May Rs. 261, July Rs. 278. From September 1, 1920, to April 29, 1921, 1,918,000 bales arrived in Bombay as compared with 2,444,000 bales during the corresponding period of the preceding year. Piecegoods market unchanged, but optimistic as regards future demand. 86,082 packages of imported piecegoods were in Bombay Port Trust warehouses at the end of April last, which is 4,617 less than the figure at end of February. Calcutta jute and gunny markets very quiet; new jute prospects continue excellent with favourable weather. Rangoon paddy arrivals fair by boat, but poor on rail. Arrivals mostly previously contracted for, and it is difficult to buy fresh arrivals under Rs. 187 per 100 baskets of 46 lb. each. White rice prices have advanced to Rs. 460 and Rs. 490 per 100 baskets of 75 lb. each, for specials and small mill qualities respectively. At tea sale on May 3 offerings mostly plain and unattractive; useful liquors again sold readily, with fair inquiry for well-made leaf teas, but prices generally unchanged. 795,930 packages sold to date at an average price of 5 annas 2 pies per lb. Land revenue suspended for one year in two districts in the Hyderabad State—viz., Aurangabad and Bir—being most affected by the prevailing famine. Survey of 17½ miles for construction of Jambusar-Kavi Railway (agricultural area in Broach district of the Bombay Presidency) by Bombay, Baroda, and Central India Railway Company sanctioned. No change in bank rates.

LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for March:—

The failure of the London Conference to reconcile the Greek and Turkish interests in Anatolia has cast a deep gloom over the commercial communities of Constantinople and Smyrna, and the optimism which previously existed has been completely swept away. A marked increase in the purchases made on behalf of the Kemalists was noticed until about the third week of the month, when the Greek advance commenced, since when this trade has practically ceased, owing to the increased difficulties of transport to Kemalistan Anatolia.

Since the recommencement of hostilities in Anatolia, and as the result of the requisition of Greek vessels lying in Smyrna harbour, for the transport of troops and war material from Greece, communication with Smyrna has become extremely difficult, as a very large part of the carrying trade, both for passengers and merchandise, between Smyrna and Constantinople is in Greek bottoms. Railway communication with Salonika was also interrupted for a short period by a strike of the railway employees.

During the early part of the month, the Samsoun-Sivas railway was occupying the attention of the Angora Government, and it has since been decided to form a company with a capital of £T.5,000,000 to take over the work; of the capital, £T.500,000 is to be subscribed by the founders, and the remainder of the shares, each of £T.5, it is hoped will be taken up by the landowners and farmers whose property adjoins the railway. It is further stated that the permanent way will be complete by the end of May, when the task of laying the rails will be commenced. Some attention is being devoted to the concession for the lighting of Constantinople. By the terms of the concession, the gas company undertakes to hand over to the prefecture all plant in good order, on the termination of the concession, which is seven years hence. In view of the enormous increase in the cost of gas production the company has decided not to request a renewal of the concession, and the prefecture is at present negotiating with several other companies who are seeking it. Prices generally have fallen, though it is interesting to note that the great fall in values which has taken place during the past few months is by no means reflected in the retail prices, which still remain high when compared with those obtaining in other European cities.

ALEXANDRIA WATER COMPANY, LIMITED.

Notice is hereby given that the forty-third ORDINARY GENERAL MEETING of the Shareholders will be held at the Company's Offices, Alexandria, on Wednesday, the 1st June, 1921, at four o'clock in the afternoon, for the transaction of the ordinary business of the Company, pursuant to Act of Parliament. Holders of Share Warrants to Bearer desiring to attend or to be represented at the Meeting must deposit their Share Warrants in London before the 20th May, 1921, or in Alexandria before the 28th May, 1921, until after the Meeting, at Messrs. Barclays Bank, Limited, 1, Pall Mall East, London, S.W.1. or at the Anglo-Egyptian Bank, Limited, Alexandria, or at some other approved bank in London or Alexandria.

Dated, Alexandria, Egypt, the 21st April, 1921.

By order of the Board,

J. E. CORNISH, Secretary General.

COUNCIL of ADMINISTRATION of the OTTOMAN PUBLIC DEBT.

NOTICE to HOLDERS of the OTTOMAN 4 PER CENT. UNIFIED CONVERTED DEBT.

The Council of Administration of the Ottoman Public Debt inform holders of the Unified Debt that in accordance with Article No. 1 of the Décret-Annexe, and without prejudice to their rights under that Article, they have decided to authorise the PAYMENT in London of the sum of 1s. 3d. on account of each half-yearly coupon of 8s. to Allied and Neutral holders who are in possession of overdue coupons due March, 1915, to March, 1920, inclusive.

The provision for the payment of this amount is in the hands of the Imperial Ottoman Bank, London Agency.

Holders are invited to present the above-mentioned coupons before the 1st September, 1921, at the Imperial Ottoman Bank, 26, Throgmorton Street, E.C.2, either direct or through the intermediary of any of the undermentioned Establishments:—

Imperial Ottoman Bank, 7, Rue Meyerbeer	Paris
Banque de Paris et des Pays Bas	"
Comptoir National d'Escompte de Paris	"
Crédit Lyonnais	"
Société Générale pour favoriser le Développement du Commerce et de l'Industrie	"
Société Générale de Crédit Industriel et Commercial	"
Crédit Mobilier Français	"
Banca d'Italia	Rome
Banca Commerciale Italiana	"
Banque de Bruxelles	Brussels
Banque de Paris et des Pays Bas	"
Banque Centrale Anversoise	Antwerp

In exchange for the coupons accompanied by a declaration of nationality, holders will receive at the same time as the cash payment receipts representing their rights.

These decisions are not applicable to holders presenting only coupons due March, 1910, September, 1919, and March, 1920, either separately or together.

Constantinople, 8th April, 1921.

With reference to the foregoing advertisement the Imperial Ottoman Bank give notice that they are prepared to receive on and after the 1st instant the above-mentioned coupons, listed on forms which can be obtained on application. The cash payment is subject to deduction of income-tax and 2½ per cent. for stamp duty.

It will be a convenience if holders will present coupons through their Bankers.

IMPERIAL OTTOMAN BANK, 26, Throgmorton Street, E.C.2
14th May, 1921.

STEEL PRODUCTION IN CZECHOSLOVAKIA.

The steel production in Czechoslovakia in 1920 amounted to 972,976 tons, including 163,663 tons or 16.82 per cent. of Bessemer and Thomas steel, 792,794 tons or 81.48 per cent. of Martin steel, and 16,519 tons or 1.70 per cent. of electric steel. In comparison with 1919, when the output amounted to 786,022 tons, the production has increased by 186,954 tons, or 23.8 per cent. This increase is due to the fact that the steel works, especially in Slovakia, are better provided with coal than in 1919.

MACHINERY IN CZECHOSLOVAKIA.

At the recent general meeting of the Czechoslovak Joint Stock Company for the manufacture of machinery, the annual report showed that the output during 1920 was mainly for export. The post-war difficulties have not yet disappeared. They consist specially of a shortage of coal and coke, the terms of delivery for raw materials, the rapid increase in the prices of transport materials, and the rise in salaries and general expenses. These difficulties have been partly met by concluding long-term contracts without guarantee of a fixed price. Satisfactory results have thus been obtained, and the company has a large number of orders on hand. The total profits amounting to 4,873,391 crowns have been distributed as follows: 500,000 crowns to the reserve funds, 200,000 crowns for grants to disabled workmen, 100,000 crowns for grants to disabled officials, 800,000 crowns reserve for the tax on property, 2,800,000 crowns for dividends (14 per cent.), 318,141 crowns for royalties in accordance with the statutes, and 155,250 crowns carried forward to the new account. The proposal of the Board of Management to raise the capital from 30 to 50 million crowns was adopted unanimously, as well as the scheme for modifying the statutes.

RUBBER EXHIBITION.

It is announced that over forty British and foreign countries have secured space at the Fifth International Exhibition of Rubber, which is to be held at the Royal Agricultural Hall from June 3 to 17. The various Governments, in addition to rubber, will exhibit tropical products such as oils and cottons, which are directly essential to the welfare of the rubber industry.

OTTOMAN UNIFIED DEBT.**Coupon Payment to Allies and Neutrals.**

The Administration of the Ottoman Public Debt announces that a payment at the rate of 1s. 3d. per coupon per unitary bond of £20 of the Ottoman Converted Unified Four per Cent. Debt will be payable to Allies and neutrals on account of the eleven coupons from March, 1915, to March, 1920. This payment will be made in London by the Imperial Ottoman Bank, 26, Throgmorton Street, E.C., where the coupons may be deposited on and after May 18.

LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 12:—It would be difficult to imagine a spot market more depressing than the one we have experienced during the past week. The small inquiry has been chiefly for Sakellaridis and white cotton, but hardly sufficient business has transpired to test prices. The basis for Sakellaridis shows signs of weakening, and the confirmed optimism for which Egypt is noted is being severely tested by the continuance of the unhappy conditions prevailing in our country just now. The latest cloud on the horizon is the prospect of a serious dispute on the wages reduction question between the owners and operators in the trade. Although opinions differ, the general impression is that the dispute will be settled on an amicable basis. Many excellent authorities persist in their view that a considerable volume of "waiting" business is mounting up, and that, granted a settlement of the coal dispute, an early revival is prophesied for the trade. C.I.F. business is stagnant. Manchester reports indicate a waiting policy. Total sales 500 bales. Quotations are generally reduced 50 points, with the exception of good and the grades above in Sakellaridis, which are only 25 points down on the week. F.G.F. Sakellaridis to-day, 16.50d.

NEWS FROM ALL SOURCES.

The Roumanian Government have denounced the Trade and Navigation Agreement with Holland dated March 15, 1899, from April 2, 1922.

The production of opium in Yugoslavia in 1920 amounted to about 150,000 kilos, and came principally from the districts of Veles, Kavadar, Kumanovo, Stip, Radovic, and Prilip.

The importation of saltpetre and opium into Palestine is only permitted under special licence issued by the Director of Public Security and the Department of Health respectively in that country.

Matches, cigarette papers, and playing cards have been added to the list of Bulgarian Government monopolies, and a special commission is studying the question of creating a State monopoly of oils.

An American Consular report states that there are only about 250 motor-cycles in Yugoslavia, mostly of European make. The horse-power of the machines used varies from 2½ to 9.

A census of the tyres fitted on competing machines in the A.C.U. one-day trial held at Brooklands the other day, showed that out of 133 46 per cent. were Dunlop, whilst five out of ten special certificates and six out of sixteen first-class certificates went to machines fitted with this make.

The annual general meeting of the Suez Canal Company will be held in Paris on June 6. Shares may be deposited in London with Messrs. N. M. Rothschild and Sons, who will in due course deliver a card of admission to the meeting or a form of proxy.

Due to the greatly increased importations of automobiles into Egypt in 1920 the market for rubber tyres was considerably increased, and despite the present slump in the automobile trade there is still a more or less constant but limited demand for tyres, says an American Consular report. There are approximately 4,500 motor vehicles in use throughout Egypt at the present time. It is estimated that 85 per cent. of the tyres used are of the clincher type and the remaining 15 per cent. straight edge.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Paper.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of squared paper. May 24.

Typewriters.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of Arabic typewriters. May 24.

General Stores.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of general stores required for the second half-year 1921-1922. June 13.

General Stores and Clothing.—H.M. Commercial Agent for Egypt reports that tenders will be received by the Director of Stores, Frontier Districts Administration, Alexandria, for the supply of general stores and clothing. The tenderer must have an agent resident in Egypt. June 14. (D.O.T.)

Rope, Etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of ropes, canvas, etc., required for the second half of the financial year 1921-1922. June 15.

Yugoslavia.

Motor Boats.—The Commercial Secretary to H.M. Legation at Belgrade reports a call for tenders for the supply of motor-boats, to be used for inspection purposes on the Danube and its confluent. The boats must carry five persons and be fitted with petrol motors of 20 to 30 h.p., and have a maximum draught of 50 centimetres. Movable covers to form cabins must be fitted. Hulls may be of wood or metal, and if of wood must be oak or pitch pine. Prices should be quoted for six or ten boats. Date of delivery, speed of boats in calm water, fuel consumption drawings and photographs, and all other necessary particulars must be sent with tenders. Prices must be quoted f.o.b. works or port of despatch, and, in addition, cost of transport between works or port of despatch and Belgrade or Galatz. These last quotations (for transport) will not be binding on the contractor, but should be estimated from inquiries made from different transport agencies. The contractor whose offer is accepted must deposit, if a subject of Yugoslavia, 10 per cent., if a foreigner, 20 per cent. of the total value of the contract. It is also necessary that tenders bear a 10 dinar duty stamp.—June 4 (D.O.T.).

Dredgers, etc.—The General Direction of Waterways, Department of the Yugoslavian Ministry of Agriculture and Waters, invites tenders for the supply of two chain bucket dredgers, one tug boat, and eight lighters provided with means for discharging contents downwards through hull. The successful tenderer must deposit, if a Yugoslavian subject 10 per cent., if a foreigner 20 per cent. of the total value of the tender. All tenders must bear a 10 dinar duty stamp, and should be addressed to the General Direction of Waterways, 81, Krunska ulica, Belgrade. June 6 (D.O.T.).

India.

Stores.—The Great Indian Peninsula Railway Company invites tenders for the supply of the following stores:—Wheels and axles and straight axles (forgings), cast-iron pot sleepers, tie bars, gibs, and cotters, steel fishbolts, chair bolts, spikes, etc., cranked fishplates, cast-iron waterpipes, etc., fencing materials, fencing-wire strand. Specifications and forms of tender may be obtained at the company's offices. May 24.

Morocco.

Construction of Buildings in Morocco.—Tenders are invited by the Secretariat of the Delegacion de Fomento in Tetuan for the building of a church, episcopal palace, mission and schools. May 25. (D.O.T.)

Egyptian Markets.—Further dividend on ordinary of 5 per cent., less tax, making 10 per cent. for year 1920.

SHIPPING INTELLIGENCE.

ACTIVITY AT ROUMANIAN PORTS.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 4.

During 1921 the ports have been very busy with the export of grain, a large part of which is being shipped in fulfilment of Government contracts in exchange for materials required for the reconstruction of industries—chiefly agricultural machinery and implements. During March the following quantities (in tons) of various products were exported through the ports of Braila, Galatz, Balic and Orsova:—Barley and oats, 84,000; rye, 2,320; beans, 1,590; timber, 3,890; crude petroleum, 3,100.

PORT FACILITIES AT CONSTANTINOPLE.

The first annual review of the National Bank of Turkey, the object of which is to supplement the information contained in the bank's monthly market review, contains much valuable information on various aspects of the economic situation of Turkey, which should make it a most useful addition to the business man's bookshelf. Finance, trade and commerce are the subject of a general survey; movements of trade, the cost of living, the quotation of securities, customs receipts, and the course of exchanges, etc., are dealt with statistically in a series of appendices, and the brochure also contains an interesting article on "The Port of Constantinople and its Communications," in which emphasis is laid on the advantageous position of the port:—

It is the best and most natural outlet for the riches of Anatolia, and its geographical proximity to the Black Sea Ports of Russia, Roumania, Bulgaria, and the Trans-Caucasian States gives it an unrivalled importance as a transit port. It is a natural port, and little has been done to modernise it. The fairway has not been dredged, and very large ships are therefore unable to come up to the quay, but have to be unloaded into lighters. The quay accommodation itself is entirely inadequate for the commerce of the port, but though various schemes have been suggested for the extension of quayside, there are many difficulties to be surmounted before this defect can be overcome. Any further extensions will have to be made on the Marmora side of the port, as the strong Bosphorus current offers too many drawbacks to the extension of the present quays at Galata. Further, the Galata area is very thickly covered with buildings, chiefly offices and the usual seaport slums; extension there would therefore involve great expense, and an aggravation of the already serious housing problem.

The article goes on to deal with the communications of Constantinople with the hinterland, and the view is expressed that the city "possesses peculiar assets which should raise it to a position of great importance, both as a terminal port and as a transit junction." Of the city's future it is said:—

The future of Constantinople, considered as a port, depends to a large extent upon the political decisions regarding the attribution of territory and spheres of influence in Asia Minor. For example, the ultimate cession of the Smyrna area to Greece would modify the present distribution of trade as between Constantinople and Smyrna. It is understood that the Greeks would be prepared to spend large sums for the equipment of Smyrna as a modern port; should these plans materialise, there can be no doubt but that Constantinople would lose a considerable amount of business.

There are many suggestions for the improvement of communication in the interior. Of these, the most notable, perhaps, is the proposed construction of a railway from Samsoun to Sivas, with branch lines to the smaller towns. The opening

of such a railway would divert from Constantinople the large trade in wheat, skins, etc., which come from the Sivas Plain, and would find an outlet at Samsoun, the Black Sea port. The present condition of almost complete isolation of Constantinople, which is due to political upheavals, may, however, be considerably modified by the eventual reopening of trade with South Russia. Since the Armistice the series of adverse circumstances . . . coupled with the resultant depreciation of the currency, have had grave effects on trade, and many merchants have found themselves in serious difficulties.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia, for Bombay (taking cargo for Karachi and coast ports) (Liverpool, May 31).

Anchor-Brocklebank Line.—S.s. Matheran, for Port Said, Colombo, Madras and Calcutta (London, May 26); s.s. Masirah, for Calcutta (Birkenhead, May 28); s.s. Imani, for Port Said, Colombo, Madras and Calcutta (London, June 11).

Bibby Line.—S.s. Herefordshire, for Rangoon (London, in May); s.s. Leicestershire, for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, May 25).

Clan Line.—S.s. Clan Mackellar, for Bombay and Persian Gulf (Birkenhead, May 23).

Cunard Line.—S.s. Tyria for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina and Catania (Liverpool, May 26; Manchester, May 26; and Swansea, May 31); s.s. Brescia, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, June 1; Manchester, June 1; Glasgow, June 6; and Swansea, June 8).

Ellerman Line.—S.s. Asturian, for Gibraltar, Malta and Alexandria (Liverpool, June 4); s.s. Belgravian, for Gibraltar, Malta, Patras, Syra, Smyrna and Constantinople (Liverpool, June 11); s.s. Bosnian, for Genoa, Leghorn, Naples, Palermo, Messina and Catania (Liverpool, June 16).

Ellerman "City" Line.—S.s. City of Exeter, for Bombay and Karachi (Birkenhead, May 27); s.s. City of Bristol, for Calcutta (Birkenhead, May 30).

Ellerman's Westcott and Laurance Line.—Regular sailings every fortnight for Mediterranean, Egypt and Levant ports.

Glen Line.—S.s. Glenamoy, for Port Said, Port Swettenham, Singapore, etc. (London, June 2); s.s. Glenade, for Port Said, Port Swettenham, Singapore, etc. (London, June 16); s.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, June 30).

Glynn Line.—S.s. Riposto, for Genoa, Leghorn, Naples, Catania, Messina and Palermo (Liverpool, in May).

Harrison Line.—S.s. Matador, for Calcutta (Liverpool, May 30); s.s. Craftsmen, for Calcutta (Liverpool, June 16).

Henderson Line.—S.s. Arracan, for Port Said and Rangoon (Birkenhead, June 1).

Holt Line.—S.s. Helenus, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, May 20); s.s. Teiresias, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, May 27; Birkenhead, June 2).

Johnston Line.—S.s. Pomaron, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, May 21); a steamer will sail from Liverpool on June 11 for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz and Braila.

Maindy Line.—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, May 25); s.s. Maindy Transport, for Antwerp and Moroccan ports (London, middle of June).

Moss Line.—S.s. Sitra, for Gibraltar, Algiers, Malta, Alexandria (transhipping to Moroccan, Cyprus, and Syrian coast ports) (Liverpool, May 28); s.s. Limoges, for Gibraltar, Malta, Piræus, Syra, Smyrna, Salonika and Constantinople (Liverpool, June 18).

P. and O. Line.—S.s. Nyanza, for Colombo, Madras and Calcutta (also taking cargo for Malta, Port Said and Aden) (London, May 20); *s.s. Kashgar, for Bombay (London, May 20); *s.s. Karmala, for Bombay (London, June 3); s.s. Novara, for Colombo, Madras and Calcutta (London, June 3) (also taking cargo for Malta, Port Said and Aden); *s.s. China, for Bombay (London, June 10). (*Taking cargo for Gibraltar, Port Said and Aden, also for Indian coast and Persian Gulf ports, with transhipment at Bombay).

P. and O. British India Line.—S.s. Manela, for Bombay and Karachi (taking cargo for Persian Gulf and Malabar coast ports) (London, May 28); s.s. Hatimura, for Colombo, Madras and Calcutta, calling at Port Sudan (taking cargo for Port Said, Suez and Aden) (London, June 4); s.s. Tanfield, for Bombay and Karachi (London, June 18); s.s. Masobra, for Colombo, Madras and Calcutta (taking cargo for Port Said, Suez and Aden) (London, June 24).

Prince Line.—S.s. Soldier Prince, for Tunis, Malta and Alexandria (taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Latakia, Alexandretta, Mersina and Cyprus ports) (Manchester, May 28).

NOTES OF THE WEEK.

The Yugoslav Constitution.

The Constituent Assembly in Belgrade has passed the Constitution of the Kingdom of the Serbs, Croats, and Slovenes by 227 votes to 93, and this satisfactory majority, it is to be hoped, will prove an earnest of the measure of unanimity with which the new State will settle down to the serious work of reconstruction after the war. A notable dissident was Dr. Trumbitch, who by his masterly handling of some of the negotiations regarding Yugoslavia's foreign affairs has won for himself abroad a reputation for sound common-sense and constructive statesmanship. But in the Constituent Assembly Dr. Trumbitch was the one and only Independent, and he would seem to have lived up to the tenets of his party by refusing to accept any of the suggestions put forward for the new Constitution. He was at least consistent, and there is no reason to suppose that he would prefer to see his country remain any longer in political chaos merely because he held that it was attempting something for which it was not ripe. No doubt there are political troubles ahead for Yugoslavia; but it is difficult to believe that she will not be better off with the Constitution, although defective in parts, settled, and thus at liberty to devote some attention to her economic development.

Angora's Choice.

Are the Turks once more to be betrayed by the incompetence of their ruling class? Recent events at Angora inevitably force the question upon the Allies. Up to a certain point Mustapha Kemal Pasha played a dignified and not unpatriotic part. Taking advantage of Anatolia's geographical position, he exposed the weakness of the Treaty of Sevres and compelled the Supreme Council to listen to the Turkish point of view. His representatives achieved a personal success at the London Conference, which was still further enhanced when the Greek military offensive was held and then thrown back. At this stage the good sense of the Angora Government seems to have taken flight. Instead of following up the line of action which had won for Bekir Samy Bey golden opinions in London, the Angora authorities have repudiated their spokesmen and have behaved in a manner that was only to be expected either from a wholly uncivilised people or from a group of men who were resolved to remain outlaws to the world. For the time being Mustapha Kemal Pasha and his followers can adopt such a course with impunity, and may persuade themselves that they are fine fellows. They will find it more difficult to show that they are studying the interests of Turkey rather than pandering to their own vanity at the

expense of their hapless fellow countrymen who want peace and settled government.

A Breach of Faith.

The conventions entered into by the Turkish representatives in London have been disavowed in Angora, and Bekir Samy Bey has given proof of his own sense of honour by resigning. A reconstruction of the Cabinet followed. Unless, therefore, wiser counsels prevail, Mustapha Kemal Pasha would seem to have decided that he can dispense with any mutual understanding with the Allies, and will be able to impose his own will upon them. There can be no surer way of adding to Turkey's difficulties. In the meantime the Angora Government has broken faith with Great Britain in the matter of an exchange of prisoners. Forty of the sixty-four Turkish prisoners detained at Malta have been released by the British Government, but so far there is no sign of the British prisoners in Mustapha Kemal's hands being released. As already stated, this is a proceeding which may commend itself to Angora, but, if persisted in, it will effectually remove Mustapha Kemal from any list of patriots and statesmen and place him in the category of brigands or successful adventurers.

Rahmi Bey.

Among the names of the Turkish prisoners who have been released from Malta we are glad to find that of Rahmi Bey. Attention has been called on several occasions in these columns to the apparent injustice of keeping under detention a man who, in the incongruous circumstances of the war in the Near East, had shown himself consistently well disposed towards Great Britain and had been highly spoken of by the British community in Smyrna. Rahmi Bey has always shown marked independence of character in regard to Turkish politics, and it may be inferred that it was partly owing to this trait that the Constantinople Government showed a readiness to have him removed where he could not exercise his fearless criticism at its expense. If he had been a free agent all this time there is every reason to suppose that he might have proved a useful intermediary with the Angora authorities. As things are, he has left Malta, and is now in Rome, waiting for the permission of the British Government to come to England, where, it is understood, he wishes to have a son educated. It is to be hoped that the further injustice of refusing him authority to land in this country will not be committed.

Fresh Trouble in Egypt.

The policy of inflaming public opinion in order the more easily to make it serve his own purposes, which

Zaghoul Pasha has pursued of late, has now had its inevitable consequence: both in Cairo and in Alexandria there has been rioting, and Egypt is threatened with a recrudescence of widespread troubles. The latest reports available at the time of writing describe the situation as being well in hand, but the mob has been blooded, and nothing but the firmest treatment now will prevent fresh outbreaks. Happily, the Government is reported to be firmly resolved to stand its ground, and to take whatever step may be necessary to crush out this attempt at revolution. At first, placed in a very difficult position by Zaghoul's skilful, if unprincipled, manoeuvres, it acted with extraordinary leniency; and, indeed, forbearance appears to have been carried to a dangerous point, for the police and military were not allowed to fire on the mob. To their credit, both police and soldiers showed restraint, as well as courage, under those trying conditions; but at last it became clear that leniency was quite misplaced and misunderstood—as always by the Egyptians—and a firmer policy has been substituted, apparently with satisfactory results.

The Extremists' Folly.

There is no need to go into details of the damage done and the casualties reported up to date. The important thing is that the Egyptians, or those of them who regard Zaghoul Pasha as the ideal leader of their nation, have again taken to violence to secure their "independence," thereby strengthening the hands of those who hold that they are as a nation still quite unready for the gift. Indeed, the one thing that these "demonstrations" have succeeded in demonstrating is the unfitness of those who take part in them for self-government. For, after all "independence" is to be granted freely by Great Britain, not wrested from her by force, and she herself will in the long run have to say on what terms the gift is to be made. She has invited the Egyptian Government to send a delegation to London to discuss the matter; the Government, which was lately accepted by the nation as thoroughly representative, has accepted the invitation; and, surely, the next step should be to see what terms are actually proposed. To behave as the Egyptians are behaving now can only imperil the success of the negotiations and flatter Zaghoul's vanity. The world at large will have noted that nothing but the presence of British troops saved foreigners in Alexandria from massacre, and the city from a repetition of 1882.

Persian Road Concession Cancelled.

On Saturday *The Times* published a message from its Teheran correspondent, in which he wrote:—"The Persian Government has cancelled the concessions granted to the Persian Transport Company, a well-known British concern," and, a little later, "the concessions include the so-called 'Lynch Road' through the Bakhtiari country." The latter statement is, we understand, incorrect, and the action of the Persian Government concerns only the Teheran-Sultanabad road, the Teheran-Kum road, and the Kum-Ispahan road, an extension of the Teheran-Kum stretch, which is not yet completed. Even so, it is difficult to understand the Persian Government's action. According to the report quoted, the Government alleges that the company never carried out the terms of the concessions. That allegation may, or may not, be literally true—we are not acquainted with the terms of the concession—but in view of the extremely disturbed conditions that have ruled in Persia for a long time, it looks as if the Persian Government were taking advantage of a technical failure for some hidden reason of its own. In a letter to *The Times*, the Persian Minister states that his Government have "dealt very leniently with Messrs. Lynch," and have granted them several successive periods of grace; but even so, the question still remains: Has the delay been unreasonable in view of the conditions prevailing? The Russians' road concessions in Persia have been cancelled, and since *l'appétit vient en mangeant*, Seyyid Zia ed-Din may now have made up his mind to a clean sweep. If, technically, he is within his rights, protest would probably be vain. But it would be interesting to know

whether in this case he draws his inspiration from Moscow, which has shown a pretty taste in the way of forgetting old friends and past services.

Lord Reading and Mr. Gandhi.

As yet we have no definite news of the outcome of the conversations between Lord Reading and Mr. Gandhi at Simla, for the former has made no statement, while the reports of the latter's speech are too condensed to permit of any inference being drawn from them; it would, however, be unwise to encourage high hopes of the immediate result, for the simple reason that some of the leaders of non-co-operation are absolutely impracticable persons. An American professor who has recently been studying Indian politics at first hand has classed a few of the leaders definitely as "medical cases," and one can accept his diagnosis so far at least as to say that they have unfortunately failed to share in the general increase of a sense of responsibility, which has been so marked a feature of Indian political life. The immediate collapse of the movement is not to be expected, but all the same Lord Reading will have done an excellent bit of work if he has succeeded in opening a road by which the more reasonable non-co-operators can enter the constitutional fold. As we said last week, some of them are obviously tired of being outside, and such of them as can realise the facts of the position will be able to do useful work for India by and by.

Facts and Dreams.

The truth is that the non-co-operators have been living in a land of dreams, and inventing facts to suit themselves. The recent attack on State education, to take a conspicuous instance, was based largely on the statement that its tendency was to produce "slave mentality" among the students, and quite worthy people believed this because the assertion was made so loudly and repeatedly. The treatment of that myth by the *Bengalee* is an excellent example of the return to reality. Our contemporary is unable to understand how education in "the glorious literature, history, and politics of England, inspired by the spirit of the valiant warriors who fought for progress and freedom, can be said to foster slave mentality," and it states the plain truth that the servility produced by a thousand years of foreign subjection has already practically disappeared under the impact of English education. India, in fact, learned freedom almost unconsciously, and it is only now that the fact is being realised. Neither Mr. Banerjee nor Mr. Gandhi would have been possible under Afghan or Mogul rule, and the essential difference between them is that the former has grasped a truth which has not yet penetrated the latter's dream.

Lord Chelmsford's Apologia.

Lord Chelmsford's speech at the Royal Colonial Institute constituted the most outspoken statement and defence of his policy which has yet appeared. Summaries often fail to do justice in such cases, but perhaps the essence of his apologia may be stated as follows: He started with the conclusion that the old régime was worn out; he saw that the immediate future depended on the growth of an effective moderate party; and, beset by extremists on both sides, he relied throughout on the men who formed the nucleus of that party, even in the early days when it had neither head nor body. The result is seen to-day in every Indian legislature, and there is, in fact, no question that his policy has secured a striking success at the outset, so striking, indeed, that there is some risk of overlooking the difficulties which have still to be surmounted. A sane and responsible body of politicians has been brought into existence, but they have still to be brought into some organic relation with the masses of the people. The Councils have made a good beginning; the constituencies have still to be developed, and, with new ideas and vague aspirations stirring among large masses of ignorant people, the task is as urgent as it is delicate. To employ a metaphor appropriate to the season, Lord Chelmsford played a fine innings, and has given his side a good start, but the match is by no means over.

THE WEEK AT HOME.

LONDON, Monday Evening.

A Coal Concordat.

The coal dispute still drags on interminably and uselessly; there has been no formal meeting of the parties. But progress has been made towards a settlement. Private meetings have been held between leaders on either side, at "wayside inns" or, rather, at seaside villas; informal dinners have taken place, hints have been dropped, and soundings made. All has been wrapped in impenetrable secrecy, and Fleet Street, baulked of news, has been reduced to printing "Make Peace Now" on the placards.

A general public conference of miners and owners, with the Government in the chair, will probably be held towards the end of this week, and will formally ratify the negotiations now being carried on; another ten days should see the resumption of work. The lines on which the settlement will be made are already beginning to emerge. Both sides are naturally anxious to save their faces, but neither side will win everything it set out to get. The miners will drop the pool; on the other hand, the owners will make a better offer of wages—a still better offer than the better offer which was already better than the original offer which was "all the industry could afford" in March. Wages will be lower than they were before the trouble, but higher than they would have been had the strike not taken place.

Whether the domestic public will have to pay more for their coal remains to be seen. But it is quite impossible to make industrial coal dearer, or manufacturers will turn to oil; indeed, those who have done so already will not return to coal, and unless the price of coal is reduced, others will follow their example. Both owners and miners foresee the danger of losing their market while they are quarrelling over terms.

On the other hand, it is admitted that economies can be made in production and distribution. The old system of individual collieries was obviously wasteful, and half the trouble has come because capital was less efficiently organised than labour. Lord Londonderry, a great coal-owner, has suggested an amalgamation of collieries to secure greater cheapness of production, and something on these lines is certain to be done. There has been some criticism of his plan on the ground that it would form a coal trust with intolerable power, and do away with competition; the *Westminster Gazette*, which still lives in the shadow of John Stuart Mill—the substance of that economist has long since vanished—has roundly condemned the whole idea. But the net result of competition appears to be that we generally get bad coal at a high price, and sometimes no coal at all at any price, which does not seem a very hopeful outcome. A coal trust would certainly have to be watched by the State. But so must an everlasting coal crisis be watched by the State. Theoretically it could increase the price of coal to an extortionate price. But practically it could not do so. It would merely stimulate the already great trade in wood and peat for private consumption and oil would finally dethrone it for industrial consumption. For that reason it would probably aim at reducing the price to something like a reasonable sum.

A Trade Revival?

Business men seem rather hopeful of the immediate future. The City frankly believes that the worst is over, and expects a speedy resumption of trade; even manufacturers have been seen to smile. It will take some time to absorb the existing unemployment—six months, according to those who ought to know—but orders are coming in, and the voice of the consumer is heard in our land, a little querulous and doubtful, it is true, but still audible to those with ears.

England, France and Europe.

Foreign affairs have almost rivalled coal in interest this week. Mr. Lloyd George's speech some days ago showed that the British and French Governments did not see eye to eye about Poland and Silesia. The usual newspaper discussion, which sometimes became a re-creation between Paris and London, followed, and the Prime Minister issued a vigorous reply, pointing

out that the American and Italian newspapers sided with England against France. There was certainly some provocation, but it was not a particularly wise act, and there has been a great deal of lifting of eyebrows and shrugging of shoulders in the clubs.

But apart from these exchanges the position is very simple. France does not believe that the downfall of Germany is permanent, and since Russia has collapsed, it is her policy to set up a strong Poland to co-operate with her against Germany in Continental affairs. England also thinks that Germany will recover, but not in measurable time; she is not so sure of the permanence of Russia's collapse as France, and she is sympathetic to Polish freedom. But she is disappointed that the restoration of Polish independence has meant the resurrection of Polish Imperialism, and she has no belief whatever in either the justice or the practicability of the Polish claims to large territories east and west of her present natural boundaries. The Polish adventures at Kieff and Vilna last year definitely modified English opinion, and Korfanty's action in Silesia this spring has only deepened that impression. The British standpoint is that the Poles are to have their pound of flesh according to the Treaty of Versailles, but not an ounce more; justice must be done impartially, and our word kept to all parties. It is not for us to have the "scrap of paper" reproach thrown back at us by the Germans.

The Imperial Conference.

But apart from this, England is tending rather to turn away from Continental affairs; after every great war we begin to neglect European politics, and some of our political prophets preach the glories of isolation—the Americans did the same a year ago. Isolation is, of course, impossible; what really happens is that the British Empire takes the place of European politics, and Canadian and Australian affairs usurp the attention hitherto directed on the Continental States. One sees the visible signs of it already, in the prominence being given to the meeting of the Imperial Conference next month, when the statesmen of the Dominions will assemble in London to discuss matters with Mr. Winston Churchill. Many constitutional questions will come up for debate, but the tendency of the Conference will be to emphasise the political autonomy of the Empire.

The Political Calm.

Home politics, says one of the Lobby correspondents disconsolately, are utterly dead; he is evidently driven to make bricks without straw. There is little chance of their reviving this year, and even the Opposition have given up talking of a general election—indeed, I notice that Mr. Cole, one of the intellectuals of Labour, has admitted that his side would probably not get a majority if an election took place. When that is acknowledged there cannot be any life in domestic politics.

The remainder of the session should be fairly easy. There is no controversy over the Budget. Anti-dumping seemed at one time likely to cause a pother, but the spectacle of a Free Trader like Sir Alfred Mond defending the measure from the Government side has rather taken the heart out of the Liberals—and Labour, though willing to wound, is afraid to strike, because it believes in its heart of hearts that the measure may increase employment.

Licensing reform seems to be postponed. And the coal trouble has for the time being put the nationalisation controversy out of the field altogether. Of course, there are personal intrigues beneath the surface, but these matters are of no interest except to the individuals concerned; the Government as a whole is perfectly safe.

Ireland.

Meanwhile the Irish Southern elections have been held with the expected results. There were few contests, and a solid block of over a hundred Sinn Feiners will face a minority of four Unionists, who represent the Universities. It is believed that there are conciliatory, or, at least, moderating, influences beneath the surface, but the extremists are determined to wreck any chance of agreement if they can. Only a few days ago there were several attempted assassinations by Sinn Feiners in London, and one of the victims has since died. They have not been disavowed by the Sinn Fein leaders, but these latter have at the same time not denied the possibility of a meeting with the Government to discuss the terms of a concordat. Their own position is probably not too easy; those who have relied on murder as a policy cannot always drop their tools at the precise moment when they become inconvenient.

A Test Match.

The Americans beat us badly at golf last week, and the pessimists are saying that the Australians are going to beat us at cricket next week. The first Test Match of the season—it is the hundredth of the series—begins at Nottingham on Saturday. Douglas, of Essex, has again been chosen captain for England, although there

was a very audible demand for C. B. Fry, who, though nearly fifty, is still a great player. Only eight of the eleven have so far been picked, several of whom took part in the disastrous tour last winter; but Hobbs has to stand down owing to injury. This is in itself a calamity, for he is the greatest bat of the day, and his enforced absence from Surrey this season has seen that county collapse time after time. The remainder are good men, but hardly in the same class as the Australians or an England team before the war.

The Week's Books.

Two books on the present discontents may be mentioned. "The New Labour Outlook" (Leonard Parsons), by Robert Williams, the prominent transport leader, gives the extremist view; on the other hand, when looking through "Labour and the New World" (Cassell), there were moments when one detects a cautious and conservative tendency in Mr. Philip Snowden, who used to be considered rather a firebrand. He remarks that "a sudden overthrow of the capitalist system in Great Britain would immediately reduce ninety per cent. of the population to a state of actual starvation"; but he believes that "a new and permanent social order can never be established on any other basis than the consent and co-operation of an enlightened democracy," and, as regards bureaucracy and nationalisation, "the only safeguard against the danger of large bodies of public servants using their political power in their own interests is the development of a social spirit . . . which will need considerable educational work." Mr. Snowden was once in the Civil Service.

A lighter book is "The Glass of Fashion" (Mills and Boon) by "A Gentleman with a Duster," who published a volume of personal portraits that had a vogue last autumn. It is full of small epigrams, such as "Few men set out to reach hell, but most of us are for ever losing our way to heaven." Quite a number of railway travellers like just this sort of thing when they find it on the bookstalls.

OCELLUS.

THE "UNIVERSAL" CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and, by an interchange of parts, also crimped cigarettes.

IN DAILY USE THROUGHOUT THE
NEAR AND MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

(From Our Own Correspondents.)

EGYPT.

CAIRO, May 7.

The Political Situation.

Since my last letter full details have come to hand of a regrettable incident at Tanta, where a serious demonstration took place last week. It was started by students in favour of Saad Pasha Zaghloul, and carried on by the mob, and the crowd refused to disperse when ordered to by the police; it attacked the latter, besieged one of the police stations, and burnt the Mudir's car. What appears to have aggravated matters is the fact that when the Commandant of Police, finding the mob would not disperse, ordered his men to fire over their heads, one of them fired into the crowd and hit two men. So violent did the mob then become that the local police became powerless, and Egyptian troops had to be sent down from Cairo to restore order. They only did so after making use of their rifles.

An official inquiry has been opened, and the Commandant of Police has been sent before an Egyptian Military Court. But, although the Government has taken every possible measure in order to deal firmly with this question, the incident has naturally been used as a trump card by Zaghloul Pasha and his supporters; and, in a statement issued on Thursday last by him, it is adduced by Zaghloul Pasha as one of the reasons why, even if the Cabinet now accepted all his conditions, he would not consent to collaborate with it.

In face of this definite banging of the door, and, in fact, of the unmistakable declaration of hostilities which Zaghloul Pasha's more recent speeches and interviews represent, the Cabinet's sole course obviously is to proceed with the negotiations. Accordingly, two days ago it issued a statement in which, after replying to the various points raised by Zaghloul Pasha, it declared that it had reported to the Sultan, who had given orders for the formation of an official delegation under the presidency of Adly Pasha, and that it was engaged on drafting a note stating the objects of such a delegation and submitting the names to His Highness for his approval. We are now momentarily awaiting the publication of the names of the delegation, which, it is believed, will have certain outside experts attached to it as advisers.

The Mixed Courts.

The mandate of the Mixed Courts was renewed on April 30 by a Sultania decree for a further six months from May 1. In the above-mentioned decree the United States was excepted because no reply had been received from Washington, but, three days after its appearance, the American Agent was able to inform the Egyptian Government of his Government's acquiescence in the extension of the mandate of the Mixed Courts, and a supplementary decree in this connection is about to be issued. It is also interesting to note that the difficulty with Holland which caused that country to be excepted from the renewal last October has been overcome, the two judges whose nomination was the point in dispute having been appointed last week.

From what I gather, it is extremely unlikely that even on November 1 next it will be possible to introduce the contemplated legal reforms, and a further prolongation of the powers of the existing Courts will become necessary. It is, indeed, difficult to appreciate the optimism which the authorities appear to feel in this respect, and, considering the periodical difficulty that is experienced in obtaining the adhesion of the fifteen Capitulatory Powers to the prolongation in time for the promulgation of the decree, one would have thought that it would have been more satisfactory to obtain a renewal for at least a year.

SUDAN.

KHARTOUM, April 17.

The Political Situation.

The enthusiasm for Saad Pasha Zaghloul amongst the Egyptian Nationalist Party has caused a certain amount

of comment locally. Naturally, all Egyptians resident in the country are at heart firm supporters of the Pasha, and have evinced a certain amount of indignation at the alleged defection of Abdul Aziz Bey Fahmy, who was formerly a very prominent pillar of the delegation. The Sudani is on the surface indifferent, but when in confidential mood will volunteer the opinion that Zaghloul Pasha has apparently got Mr. Lloyd George stiff and cold, and is, in his opinion, far the cleverer statesman of the two. The opinion of the uneducated masses is indicated by the following little tale, which has the merit of being entirely veracious. A certain British officer employed in the Egyptian Army recently had cause to visit Egypt and took with him his black bātman, a private in one of the Sudanese Battalions. The course of his duties took the officer to Cairo, where he and his bātman were put up at one of the principal hotels. The dusky private was remarked as spending all his spare time during the stay in Cairo in sitting at the foot of the steps up to the terrace, obviously absorbed in the passing world, and seemed unwilling to stray out of sight of his billet. On the return journey the officer, out of curiosity, asked him what he thought of the city and its inhabitants. The bātman replied that the miles and endless miles of buildings and the noise and congestion of the traffic had got on his nerves, but that the Egyptians amused and interested him beyond measure. They reminded him of monkeys, for they would begin a job of work with the greatest enthusiasm, gradually slacken off in their endeavours, and start chattering, and finally forsake their unfinished work and start on something else. He concluded the exposition of his impressions by remarking, with decided animation: "By God, a fine city to sack, and, please the Almighty, oh Bey, you will lead us against the Egyptians before the end of this year!"

This from one who some eight months ago was an absolute savage, entirely untroubled over the cost of clothing, is somewhat illuminating.

The Blue and White Nile Dam Construction.

Trouble has been experienced recently both at Makwar and Gebel Aulia with the Yemeni labour. On April 2 some considerable trouble was experienced, and Government officials and servants of the Construction Company were obstructed in the execution of their various duties and subjected to personal insult. As a result some 600 labourers were sent down to Port Sudan under military escort for repatriation, giving cause for minor excitement on the way, notably at Musmar, where they broke out of the train and had to be forcibly entrained again. A further 600 have been dismissed from Gebel Aulia, and are being returned to Aden as soon as shipping can be provided.

Provincial News.

Communication between Gambeila and Bure has always been very difficult, and it is gratifying to hear that work is now well in progress on the road connecting these stations. The Dirbir bridges and the new road are expected to be open by the first week in June. If navigation of the Sobat and Baro Rivers is possible by then, there will be connection by the first steamer from Khartoum.

Horseshows have been held with considerable success at Sibdu (Dar Rizeigat) and Buram, some fifty remounts being purchased for the Egyptian Army, and a considerable number of ponies for police duties being acquired at the former locality.

The question of discovering a sufficient supply of water is of paramount importance in the Darfur Province. However, as a result of sinking various wells, good water has been found at a depth of 40 metres at Tubluk, and at 22 ft. at Zalingei. A new well is in course of being sunk at Abu Adam (Rahad).

A serious fire is reported to have broken out on the night of March 19-20 in a village north of Talodi. The high wind prevailing assisted the flames to such an extent that practically the whole village was wiped out, fortunately with no loss of life.

From Mongalla Province it is reported that the total rainfall for February was two millimetres. Oppressive heat has been experienced—the maximum temperature reaching

104 degrees. Rinderpest has, unfortunately, made its appearance amongst the buffaloes on the East Bank south of Malek.

It is very interesting to note that the natives appear to have overcome their aversion to vaccination, some thousands of persons having been voluntarily inoculated against small-pox at Gnopp, in the Bahr-el-Ghazal Province.

Reports from the Red Sea Province state that the Customs Department will move to summer quarters at Sinkat on May 8. Owing to the increasing number of vessels calling in at Port Sudan for bunkering and water considerable difficulty has been experienced in providing an adequate supply for both drinking and boiler purposes. Unfortunately, the pumping plant at Suakin has also broken down, occasioning simultaneous troubles in that port. In view of the fact that a very large proportion of the population of both towns migrate to the Red Sea hills during the summer months the position is not as acute as it might be, but the water supply is one of the most pressing problems of the province, and a committee has been appointed to go into the question thoroughly.

Dongola Province reports the death of Sheikh Mirghani Mohamed Siwar El Dahab, of the Sawarab, Bederia, at Merowe on April 5. The Sheikh was born in Kordofan in or about the year 1860. He joined the Mahdi there, and fought against the old Egyptian administration, being promoted to the rank of Emir for his services. After the battle of Toski he forsook the trade of soldiering, and settled down in Dongola as a religious teacher, and in view of his connection with the Mirghania became one of the leading notables of the province. He was extremely loyal to the new administration, and was distinguished for his personal charm and wonderful hospitality, and gained the affection of all who knew him.

YUGOSLAVIA.

ZAGREB, May 16.

The Constitution.

The event of the week has been the passing of the draft Constitution. The later speeches were curtailed, and the Chamber proceeded to vote as early as possible. There are 417 members of the Assembly, of whom 54 have not had their elections certified by the Examining Committee, for refusal to take the oath. (These are Raditch's party, the Frankovci, and M. Stoyan Protitch, who is out in the cold since his secession from his old party.) Thus there are 363 fully qualified deputies, of whom 320 were present at the division. Of these 227 voted for and 93 against the motion, which was thus carried by a large majority. The Government had an absolute majority of 18 out of all elected members, of 46 out of all properly qualified members, and 14 more than the requisite two-thirds of all members present.

It is noteworthy that Dr. Trumbitch voted "against," which produced a storm of applause from the Communists. His action is a little difficult to understand, but probably the explanation is that, having lost the confidence of his people in connection with the Treaty of Rapallo, he is taking up a highly democratic line in order to recover his popularity. He is credited with a scheme of organising a new party which will combine all elements hostile to the present Constitution.

The Narodny Club left the Chamber in protest before the voting, their present leader, Dr. Drinkovitch, declaring that his party recognised neither the Constitution nor the Assembly itself. But M. Pashitch neatly pointed out that it was late in the day to question the legality of the Assembly, which should have been done at the time of the elections. The properly elected Chamber, the result of absolutely free elections, has declared its will by a commanding majority, and the hard fact remains. It is not easy to understand the policy of the Narodny Club. Originally it was intended to protect the Croats against any possible hegemony of the Serbs, and was thus in direct opposition to the Democratic party, which is all for union and centralisation. The latter has a very strong backing in Croatia, although little is heard of it because it is not so demonstrative as its opponents.

Raditch and the Peasants.

The Zagreb papers have come out with a portrait of Mr. Lloyd George reading a document, beneath which is the following legend:—"We have learnt that Lloyd George has received, after the passing of the Draft Constitution in the Constituent Assembly, a note of protest in the name of 'the crushed people,' with the signa-

tures of Stjepan Raditch, the *perpetuum mobile* in speech; of Ivo Stozhir, the hero of high treason; of Jan Janechko, the living lower half of the Yugoslav Casement; Miss Miletitch, the future 'hofdame' of the President of the Croatian Republic. It is anticipated that as a consequence of this the English Cabinet will resign."

It is hard to take Raditch seriously, and nobody is really afraid of his movement. The peasants of the most prosperous parts of Croatia are simple souls, who believe all he tells them, and will go on believing till they are disillusioned. Private conversation with some of them in different villages has shown that this process has begun. The peasants have made some educational progress since the exaggerated disturbances in connection with the branding of stock last summer. When Karl Habsburg went to Budapest not a voice was raised on his behalf in any Croat district. Recruiting has proceeded with great success, better indeed than it used to do in the bad old Austrian days, and the purely Croat agricultural districts have carried the record for tax-paying in the united kingdom. Their country is green and smiling, fertile and well cultivated; it is so full of stock that men come from Austria and Italy, and even from Germany, to buy their cattle and horses. None of these things is evidence of a discontented peasantry. The cheery good morning and smiling faces of the sturdy folk of all ages and both sexes when the stranger motors through their villages, or stops and has a yarn with them on the roadside, tell their own tale. A full stomach and pocket and a rich farm afford a bad foundation for demagogues and agitators to work upon.

A Croat Idealist.

There has just passed away in Zagreb a fine specimen of the type of patriotic Yugoslav who made the last sacrifice for the idea of the union. When the war broke out Milan Hajdin was a student at Zagreb University, little more than a lad. He at once slipped across the river to Belgrade and joined Tankositch's band of irregulars, which were the first to hold the Save. In spite of not robust health, he followed his fearless leader through the desperate fighting on the Cer, and after the death of Tankositch, whose bones were afterwards dug up and scattered by the Austrians, he joined the famous band of Vuk Popovitch, whose names had become legendary by 1915. After Vuk's death, he joined the 23rd Infantry Regiment in the Vardar Division. He was wounded four times, and was in hospital since the war. A bullet through his chest aggravated the consumption which had not prevented his sharing all the terrible hardships of the long campaign, and he passed away, only twenty-six years old. At his funeral the farewell oration, in the name of the Association of Volunteers of Croatia, Slavonia, and Istria, was pronounced by Captain Lujo Lovritch, who was blinded in the Dobruja. Both these were Croats, and Croats of the best type, both young men, full of ideals, but men of action, not of politics, and ready to sacrifice everything for their country and the union. The politicians might well take a lesson from them.

Football Enthusiasts.

Both Serbs and Croats are keen footballers and play a good sporting game. The matches are reported in detail in the Press, and it looks odd to see our familiar English words appearing in a strange and, at first sight, uncouth guise. Such as "goalom," that is, in the instrumental case, but "goalman" seems an odd variant. A very keen match was recently fought at Maximir, near Zagreb, before a huge and enthusiastic crowd of

onlookers, between a Croatian and a representative Swedish team. After a hard tussle, the home team just succeeded in beating the visitors, but the attendance, the keenness of the criticism, and the space in the Press devoted to it made one rub one's eyes and wonder where on earth one was.

A Convict's Escape.

An exciting incident happened not long ago at Topchider, whose pleasant groves are so familiar to all visitors to Belgrade. There is a prison there, and gangs of convicts are a familiar sight, as they walk to their work on the Government farm and back, escorted by armed guards; and many of them wearing clanking chains. Incidentally, the terms of service of the guards show a perhaps unconscious sense of humour and poetic justice. If a guard allows a prisoner to escape, he is condemned himself to complete the unexpired portion of the prisoner's sentence. A few days ago, about four in the afternoon, a convict suddenly sprang on a guard, knocked him over, took his rifle, and put a bullet into him. That was the sign for a bolt, and several convicts took to their heels, including some long-term men wearing fetters. But the guard turned out sharply, and as all Serbs can hold a rifle straight nowadays, they brought a couple of their quarry down near the station, shot dead, and others wounded. Only one succeeded in escaping.

GREECE.

ATHENS, May 6.

The Prime Minister in Smyrna.

M. Gounaris, accompanied by the Minister of War, M. Theotokis, the Chief of Staff, Major-General Dousmanis, and the sub-Chief of Staff, Brigadier-General Stratigos, left for Smyrna last Thursday. The Prime Minister's departure, which was the result of many disquieting rumours as to the military situation at the front, was decided upon at a meeting held at the War Office on the previous day. At the same time, the Minister for Foreign Affairs issued an official *communiqué* denying the rumours of a Greek reverse; while late in the evening a Royal Decree was published in a special edition of the *Government Gazette* calling up the reserves of the 1903, 1904, 1912, and 1913a classes. One of the rumours referred to above, which was very widely circulated, casting a gloom over Athens, was that the Hellenic troops had been forced to abandon Ushak, which town was promptly occupied by the Turks. This news was published in the French, the Italian, and the Egyptian Press, though nothing had, so far, appeared in General Papoulas's *communiqués*, which, by the way, have become extremely terse of late.

Easter Day was not quite as joyful as might have been, and, although everybody thoroughly enjoyed his red eggs and the "magiritsa" soup after the midnight service, and the King paid his customary visit to the barracks on Sunday morning to wish the officers and men "Christos Anesti," people were not really happy. One did not mind the temporary loss of Afion Karahissar, which, it is argued, could easily be retaken as soon as the fresh reinforcements have reached their destination, but to lose Ushak, and thus endanger Smyrna itself, would be a heavy blow to the *amour propre* of the Hellene and to the prestige of the Hellenic army abroad. "What will Lloyd George think of us," a Greek officer was asking me the other day, "if we lose this war?" The Greek has always considered the little Welshman his best friend and the greatest supporter of his country's national aspirations, and would die with shame if anything happened which would shake the latter's faith in him.

It was not until Easter Monday that the news of the evacuation of Ushak proved to be void of any truth. An official telegram dispatched from that town announced the arrival there of M. Gounaris, M. Theotokis, General Papoulas, and General Dousmanis. The telegram went on to say that the Greek Premier had been present at the midnight Easter service, and had proceeded on the following morning as far as the Toulou Bounar trenches, which are at a distance of two kilometres from the Turkish lines.

The rumours about Ushak are attributed to the very efficient propaganda which the Kemalists are conducting in Europe and particularly in the French and Italian capitals. Both sections of the Athens Press are vigorously attacking the Government for not taking any steps to deny promptly all reports of imaginary Greek reverses, which are being so cleverly and so effectively circulated abroad by enemy agents.

Roumanian Students.

A party of eighty Roumanian students from Bucharest University and the School of Fine Arts, including fifteen ladies, arrived here from Constanza this morning, accompanied by Professor Stefanescu. They were received by a number of professors and Roumanian speaking students of the University of Athens, who arranged for their accommodation in the various hotels in the capital. The Roumanian excursionists will stay in Greece for a fortnight in order to visit various places of archaeological and historical interest.

ROUMANIA.

BUCHAREST, May 12.

Parliament.

Parliament is still closed on account of the Orthodox Easter holidays. The Budget does not meet with general approval; the Press and competent politicians have begun to discuss and to criticise it, urging greater economy and less taxation. An Opposition journalist demonstrated by figures its excessive imposition. M. Titulescu, the Minister of Finance, protested against his figures as intentionally false and designed to lead the public into error, and he invited the members of the Press Association to a conference, at which he expounded his whole financial policy, also the mode of reckoning—rather complex—how much everybody will have to pay, according to his possessions and income. He repeated his speech in the Chamber of Commerce for the benefit of the financial and commercial public. His design is to make everybody contribute in proportion to his capital and income towards the restoration of the finances of the State; and he aims also at reach-

ing those fortunes amassed during the war, and since, by profiteering, and especially by those who have held official positions which they misused for their personal interests. He wishes to be able to confiscate the whole property of the latter, but as the Constitution forbids entire confiscation he intends making them disgorge up to 92 per cent. of their ill-gotten wealth, and every former or present public official will have to prove the origin of his present possessions. The Minister declared frankly that he is willing to accept any suggestions or amendments put forward in a right spirit. The representatives of the big banks have already begun to confer with the Minister as to the taxation which the banks can bear without affecting trade and commerce in general, and similar meetings will take place with representatives of the manufacturers' and other associations. This new Budget scheme will not come before Parliament very soon, as the Agrarian Reform and other laws will have to be passed first; so there will be plenty of time for the Minister of Finance to study the feelings of all classes, and, having regard to his great ability, he will surely succeed in framing a Budget that will at the same time conciliate the taxpayer and satisfy the needs of the Exchequer.

M. Duca, a former Minister and a prominent member of the Liberal Party, whilst recently addressing his constituency, declared that his party acknowledges the necessity of introducing the proportional tax on capital and income, but considers the quota of taxation proposed by M. Titulescu to be excessive. He advocates the reduction of the expenses by reducing the number of the newly-created Ministries; all sinecures of all kinds should be abolished; a balanced budget should be worked out; and only after all this has been accomplished should the quota of taxation be fixed according to the real and vital needs of the State. There is no doubt that financial reform will serve as the future electoral platform, and the Liberal Party is cleverly adopting the alluring motto of "less expenditure, less taxation," which will attract very many adherents, and may help them to come to power again in due course.

Prince Carol's Return.

Prince Carol and his bride, Princess Helen, made their official entry into Bucharest on Sunday, the 8th inst., returning from Greece, where they have been staying since their marriage. The population of the capital accorded them a very loyal and enthusiastic welcome. The authorities have arranged extensive festivities with the usual street decorations and illumination. Delegations from all parts of the country will be presented, and the celebrations will last three days.

Miscellaneous News.

The Government of the U.S. has requested the assent of the Roumanian Government to the appointment of Mr. Peter Jay as the U.S. Plenipotentiary Minister to Roumania.

A fiendish outrage on the railway line Bender-Dassabarskaia in Bessarabia was perpetrated on the eve of the Orthodox Easter Holiday. A portion of the line was undermined, and an explosive placed there was timed to explode just when the train should pass. For unforeseen reasons, the train was luckily delayed for about fifteen minutes, and though the explosion took place at the appointed moment, destroying the line, it fortunately caused no casualties. The train was crowded with passengers, among whom were some members of Parliament. An investigation has been opened. The authorities attribute the outrage to a gang of Communists.

BULGARIA.

SOFIA, May 10.

Political.

M. Stambolisky's health is steadily improving, and last week the doctors pronounced him out of danger.

M. Yourlakoff is acting as President of the Council of Ministers, but the Sobranje is not sitting, and will probably not reassemble till the end of the month.

M. Dimitroff returned from his tour yesterday but is leaving for Prague to-day and, as I mentioned before, it does not seem likely that he will go to America, at any rate not for the time being.

The Government will now, however, have seriously to take up the question of reparations, and it is difficult to see how their present policy will bring them in the necessary revenue.

Tour of the Reparations Commission.

On Easter Monday the members of the Inter-Allied Commission, accompanied by M. Dashkoff and a few other Bulgarians, started on a four days' tour in the provinces.

I was fortunate enough to accompany the party. The special train left Sofia in the evening, and all the next day was spent at Rustchuk, visiting various places of interest. On arrival at Varna, on Wednesday, the train was taken alongside the quay, and after breakfast we all went by boat to Euxinograd to see over the King's Palace, which is six miles from Varna and is situated on a fine promontory, jutting out on the Black Sea. The weather was perfect and we had a glorious view of the bay and the coast stretching down towards Burgas.

Leaving Varna late that evening we woke next morning to find ourselves below Tirnova, the ancient capital of Bulgaria, which has been the scene of so many conflicts. Tirnova, which is easily the most picturesque place in Bulgaria, if not in all the Balkans, is a town of some 12,000 inhabitants, standing high up on a rock and completely surrounded by the river Yantra. The rock is shaped like the figure 8, and in the middle of the figure there is a narrow strip of ground, some fifteen yards broad, which connects the two circles of the eight.

We left at 2 o'clock, and during the afternoon and evening went through gorgeous scenery in the Balkan Mountains, finally dropping down to Stara Zagora. While descending from Krastetz to Torlova several of us journeyed by "Drazzine," which is a light sort of man-handled trolley. Next morning we were at Philippopolis, and it being May 6 (St. George's Day) we saw a march past of the local garrison.

The return to Sofia was accomplished without incident. The whole journey was extremely enjoyable and made under most comfortable conditions. M. Karakashoff, the Director of Railways, who was of the party, spared no pains to make it a success, and he certainly accomplished his purpose.

SOFIA, May 17.

Relations with Yugoslavia.

During the past few days the relations with Yugoslavia have again become strained, and the Press of both capitals is full of warnings about the future. There has been talk of Bulgaria giving over a certain quantity of guns and ammunition, but it is clearly laid down in Articles 80 and 98 of the Peace Treaty that it is the duty of the Inter-Allied Military Commission of Control to accept delivery of all war material, and it is now announced that the Commission will remain on for another three months. Although this involves more expense to Bulgaria, it will be of great use to her to have the Commission here in case of any warlike action on the part of Yugoslavia.

In the Sofia *Zora* of May 12 there appeared an interview with the President of the Military Commission, who stated that Bulgaria need have no fear for the future, as the representatives of the Great Powers here know that Bulgaria was loyally carrying out the terms of the Peace Treaty, and that, in any case, France would never permit Serbia to take action against Bulgaria. The speaker also declared that the anti-Bulgarian feeling in Serbia was not encouraged by the Government, but was rather the spirit that found favour in military circles. It is interesting, however, in the light of the above to note that so far it is only Great Britain and America, who have issued statements showing their disapproval of the steps proposed by the Serbians.

Another Note.

Yesterday the Bulgarian Government addressed a Note to the diplomatic representatives of the Great Powers here. The Note dealt with the alleged *Komitaji* bands operating on the Serbian frontier, and requested that the international court of inquiry, asked for last month, might be formed. The Note made mention

of the declarations in the Belgrade Press regarding the proposed sanctions, and even the modifications of the frontier fixed by the Peace Treaty. The Bulgarian Government declared itself willing to abide absolutely by the decisions of the court of inquiry, and said that the continuous Press statements were having a damaging and alarming effect in the country. In view of the above, the suggestion made to me humorously the other day by a friend here that it would help the Allies out of a double difficulty if they employed a few thousands of General Wrangel's troops from Constantinople to police both sides of the frontier in dispute would seem to have its points!

The Bulgarian Army.

If hostile action were taken by the Serbians, there would be no doubt of the result, as the Bulgarian Army is now reduced to the cadre of 33,000, which includes some 13,000 gendarmes and forest guards. These men must in the future all be volunteers, but up to the present only two or three hundred recruits have been obtained, in spite of the comparatively good rates of pay.

It is thought that some modifications may be allowed, as the question of money also enters into the discussion. The present army on a compulsory basis will cost 285 million levas a year, while the voluntary army would cost 600 million levas annually. The Reparations Commission will thus have to allow 315 millions levas, so to speak, to slip out of their hands, although, of course, increased taxation can be brought to bear on the nation. In the writer's view the great danger is neither of the above two points, but rather the fear that the Government will, if they see a voluntary army is inevitable, accede to the Allies' demands, and, regardless of cost, create an agrarian army which will be the tool of the Cabinet. This would be the only organised force in the country, and could overthrow the Constitution, justice, and all departments of State, and thus plunge yet one more country in Europe into a state of disorder and ruin.

General.

Four thousand soldiers from General Wrangel's army at Constantinople are to be employed as road labourers in Bulgaria.

The result will be shortly declared of a contract for supplying fourteen million postage stamps, which will bear the head of the late Mr. J. D. Bouchier.

TURKEY.

CONSTANTINOPLE, May 11.

The Calm before — ?

Very little worthy of mention has occurred during the past week. The Sublime Porte has been principally occupied with addressing protests to the Allies concerning alleged atrocities on the part of the Greeks against the Turkish population of Anatolia, and the arrest as prisoners of war of Turkish travellers from Bulgaria to Constantinople. Everyone is waiting for the Greeks to start another offensive as advertised. Easter has come and gone, but Constantine has not yet attended mass in Aya Sophia. The Cabinet seems to have settled down after the re-shuffling caused by the resignations of Izzet and Salih Pashas; and although the financial situation is as desperate as ever, one hears less about it than was the case a few weeks ago when various "incidents" were provoked by unpaid officials. The truth of the matter is that a very considerable number of Government officials have managed to get jobs in Angora, where there seems to be less difficulty in finding enough cash to balance the monthly salary list. In fact, the exodus from Constantinople has reached such proportions that a clamour has arisen among those who fear that there will not be enough loaves and fishes to go round. The Angora administration has, therefore, been compelled to take certain steps to stem the flood of immigrants. Incidentally, this is probably one of the principal causes of the "spy fever" which is raging in Anatolia at the present moment.

All the "spies" are, of course, said to be British, and it is reported that at the trial of one of these worthies Madame Berthe Gaulis, a well-known French lady corre-

spondent, was present. We shall, therefore, in all probability, be regaled in the near future with some sensational propaganda from the Ville Lumière.

The Greeks, like the Turks, have also become comparatively quiescent, which means that the silence is almost unearthly. The Venizelist officers are still here, and show no signs of falling in with the suggestion of the Athens Government, which agreed to their request for reinstatement provided they broke themselves up and let themselves be tried for disciplinary offences after the termination of hostilities. This sounds ungrateful, but perchance the Athens Government has become aware of certain deep schemes laid by the Committee for National Defence in Constantinople.

Anatolia.

Little information is available regarding the reception accorded to Bekir Sami Bey upon his return to Angora, but it appears that a bitter struggle for supremacy has been begun between the moderates and the extremists. The extremists are composed of ardent adherents of the defunct Committee of Union and Progress, and are out for a struggle to the death against the British. The moderates, on the other hand, are ready to make peace as soon as a maximum of concessions has been secured.

So far as can be judged the struggle is being waged with the utmost bitterness, and it is not exaggerating to affirm that upon its issue depends the fate of Mustapha Kemal and the entire Nationalist party. It is only necessary to recall the fate of Nazim Pasha in 1913 to understand the possibilities of the present situation in Anatolia.

CYPRUS.

NICOSIA, May 9.

A Peaceful Outlook.

Matters have settled down into complete tranquillity. The Greeks have been celebrating Easter with the usual rejoicings, and the local papers deal chiefly with the festival and the affairs of Greece. In conformity with the decision at Athens, the celebrations which were to have been carried out on the adjourned date of April 25 have now been indefinitely postponed, and the Pan-Cypriot Sports are not to be held.

The island is, as usual, full of rumours not worth recording. There has been no apprehension, it should be said, of any serious disturbance, especially as the Turkish element could be counted upon to preserve, as it has done, a completely correct and dignified attitude. But a small detachment of about eighty Sherwood Foresters has been quartered at the depot at Nicosia. The Ottoman community enters upon Ramadan to-day (May 9), which should bring round the Ramadan Bairam on June 7. As the hot weather approaches, preparations are being made for the summer season in the hills.

M. N. Katalános, an Hellenic subject, who has for many years past been a conspicuous promoter of disaffection in Cyprus, has been expelled, none too soon, from the island. After being confined for about ten days in the Central Prison, he has been placed on board an Austrian steamer for the Piræus. The Greek Consul has sent to the authorities his passport *visé* for Greece. M. Katalános has at various times come forward to deliver speeches well calculated to disturb the peace of the island, and he might with advantage have been invited to quit these shores many years ago; but a misplaced tolerance has allowed him to take a leading part among the agitators. The step now taken may be a wholesome warning, to supplement that recently given to M. N. Laniti, M.L.C., on similar grounds.

The Archbishop of Canterbury and Cyprus.

The reply of the Archbishop of Canterbury to the letter of the island Archbishop Kyrillos (dated March 25) is published by the *Phoné tes Kyprou*. His Grace assures the prelate and the Holy Synod of his earnest desire that the cordial relations existing between their respective Churches may continue, and indeed be strengthened. As regards political considerations, which the letter introduced, his Grace fears that he can do no more than devote his earnest care to supporting the authorities in both countries in all that may contribute to the harmony and happiness of the different communities who live together in the beautiful and famous island in which the Archbishop holds so eminent a position.

Mr. Stanley Fisher, Chief Justice, is on a visit to Jerusalem, as guest of Mr. Luke, the Assistant Governor. His place is filled by Mr. A. L. Stuart, Puisne Judge, while Mr. Grimshaw, P.D.C. at Papho, acts for the latter.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

"THE TRUTH ABOUT THE BALKANS."

TO THE EDITOR OF "THE NEAR EAST."

Sir, In reply to Madame Christitch's, in the main very complimentary, letter upon the subject of my article in the current number of the *Quarterly Review*—a letter published in your issue of May 12—I would only say that:—

(1) In apparently grudging Bulgaria even a commercial access to the Aegean, that lady seems to have forgotten the long-drawn-out and justifiable struggle of Serbia to secure an Adriatic port of her own—a struggle the ultimate and happy success of which was so materially furthered by the praiseworthy efforts and help of Madame Christitch herself.

(2) The positions of Bulgaria and of Albania, in their reference to Yugoslavia, are in no sense the same as that of Germany in her relation to France, and this because, if for no other reason, the population of the kingdom of the Serbs, Croats, and Slovenes is more than twice those of Bulgaria and Albania combined, whereas the population of France is still less than that of her Eastern neighbour.—I am, etc.,

H. CHARLES WOODS.

May 14, 1921.

THE OLYMPIANS AND THE DANUBE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The Danube, that serene and mighty waterway, has lately become subject to the consideration of High Olympus, in this instance taking the form of a Conference in Paris.

In the early days of the Danube Commission, before "high-brow" notions were allowed to obscure clear vision, things went sufficiently well, and though the Danube Commission was unable to prevent wars, its composition did not actually provoke them. The Danube Commission of pre-war constitution, minus the German representative, has been carrying on the task of administration provisionally, as far as outward appearances go, sufficiently satisfactorily. It is remarkable that the Commission, consisting of British, French, Italian, and Roumanian members—that is, three representatives of non-riparian against one of the riparian States—excludes the Kingdom of the Serbs, Croats, and Slovenes, and the Czechoslovak Republic, two allied nations, who are also interested in Danubian affairs.

The Conference of Olympians in Paris is now engaged in constituting a Permanent International Commission of Control over the Danube. The proposed constitution of this Commission is interesting. Non-riparian States—Great Britain, France, and Italy—send one representative each. Of the riparian, presumably Roumania, Bulgaria, the Kingdom of the Serbs, Croats and Slovenes, the Republican Monarchy of Hungary and the Czechoslovak Republic one each, and the German riparian States two. What are the German riparian States? German-Austria is one, no doubt; is the German Reich, as such, another? Or will Bavaria, Wuerttemberg, Hohenzollern-Sigmaringen, and Baden severally have a voice in the matter? One may imagine how impressive Teuton eloquence would become when discussing the necessity of controlling the Danube from its very source in the Baroque fountain in the castle-yard of Donaueschingen.

Whatever prompted the suggestion that Hungary be made the centre of gravity of the Danube system, it is based on entirely false premises. Hungary is not entitled to that position on any grounds whatever, either geographical, economic, or political. Geographically, though Budapest be roughly halfway between the source and the mouth of the Danube, it has no natural right to be considered anything but what it actually is—the capital of a small State which grew up round the stronghold conveniently situated on a fairly steep hill of a predatory Mongolian chief. There are no natural communications, such as waterways, leading to the Danube at this spot. Roads and railways were made to converge on Budapest as the distant provinces were forced to give their raw material towards creating a centralised industry in the capital—an economic falsity. The Olympians, therefore, would encourage an artificial economic centre in a country devoid of all the raw material necessary to industrial enterprise, and would check the industrial development of the Succession States and Roumania, who as Allies of the Great Powers achieved their political freedom, and may not be denied their economic independence. Politically the importance of Hungary lies in its capacity of doing mischief. Much the same may be said of Vienna as an economic and political "centre of gravity." In both cases the same influence seems to be at work, in both instances the activities which,

by oppression of the outlying Slav races, built up a corrupt empire, by wanton aggression in quest of further spheres of oppressive influence brought down that empire, are again at work to destroy what Western Europe and its Allies fought for.

Vienna and Budapest are swarming with international financial adventurers, whose chance of gain is favoured by political uncertainty, rather than by sound economic measures which tend to stabilise values.

The "centre of gravity" of the Danube system is to be found not in the capital of effete Austria or restless Hungary, both economically dependent on their riparian neighbours, but in the place where Nature has ordained it should be, and that place is Bratislava. Here, by means of the Morava, the big waterways are connected, or will be when the plans to that end have been carried out. Then, by way of Elbe, Oder, Vistula, Morava, and Danube, the North Sea, the Baltic, and Black Sea water communications will be established. Then the Succession States, who, being well acquainted with the influence of Vienna and Budapest, know how to deal with it, will settle down to those closer economic relations which the Danube encourages, and will thus gradually remove the causes which make Eastern Europe restless and discontented.

But as a matter of justice and expediency, someone should discourage the tendency of Olympians to overlook important geographical factors such as Bratislava, to disregard economic developments as of the Succession States, and to encourage ex-enemies against old and new Allies.

We cannot afford any more wars.—I am, etc.,

MID-EUROPEAN.

THE SITUATION IN EGYPT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The marked change in the attitude of the Egyptian towards the Briton is possibly not very noticeable to residents in the country, but it is a veritable eye-opener to those, like myself, who are paying a brief visit to Egypt. There appears to be a studied policy of antagonism to all things British; the favoured nation for the time being is Italy. As a result of frequenting the type of café that is rigorously shunned by the so-called respectable and fashionable community, and in the course of conversation with all sorts and conditions of washed and unwashed humanity, it has been possible to pick up a considerable amount of gossip of the underworld, which, I consider, reflects the ideas and opinions of the uneducated masses on the present political situation.

There can be no possible doubt that the so-called Nationalist movement is heavily financed by several of the wealthy and fanatical Egyptian princes; that their paid agents are continually at work inculcating a hatred of all things British; and that the lower classes are deliberately encouraged to insult covertly and to jostle British subjects on every occasion. The popular war-cry of the underworld of Alexandria is: "Inshallah fi'l ahar i-senna de mafeesh boranett fi'l Iskindireyèn," which may be translated as "Please God, there will be no wearers of hats in Alexandria at the end of this year." In other words, the inhabitants will wear either the tarbush of imma, meaning that all Europeans will be driven from the country by then. The recent labour troubles are attributed by many to the underground policy of an Italian group, who are credited with having furnished strike funds in certain cases. In this connection it is interesting to note that the only foreigners resident in the country who appear to favour self-government for Egypt are of Italian nationality. The Hellenic community, by far the largest in numbers, and, one

might say, the most important financially, view the prospect of a Pashalik with undisguised horror. A very great deal of stress has been laid on the blessings that will result from the abolition of the Capitulations, but it should be remembered that the only protection afforded to non-Egyptian subjects owning real estate in the country is that given by those same much-abused Capitulations, which certain members of the Milner Commission talked so glibly of abolishing, without, however, suggesting an alternative method of protecting non-Egyptian interests.

Imagine the position of a house-owner of, say, British extraction under entirely Egyptian rule. The odds are about 5,000 to 1 that after two years of self-government the police would be owed three or four months' arrears of pay. What is more natural for the Shawish than to look around for a suitable subject for blackmail in order to keep his own dependents from starvation? For countless generations he has been taught the advisability of always choosing the line of least resistance, and would accordingly descend on the British landlord with the complaint that his chimney smoked excessively or that his bath-water was running into the public thoroughfare, and that in default of a fairly substantial *pourboire* he would be reluctantly compelled to hale the said landlord to the local police-court there and then. A refusal to pay up would undoubtedly result in enforced detention in a filthy cell and a fine of many pounds on the morrow, which would be shared in certain proportions between the Shawish in question and the Mamour of the Kism. Nine out of ten, knowing their native, would backsheesh the Shawish straight away. This is a very minor example of what might, and certainly would, occur. The far-sighted foreigner who recognises what will happen under Egyptian self-government is very sanely and cautiously selling out all his interests in the country with a view to retiring to a safer locality in his old age.

The average Briton is very insular and possessed of excessive race prejudice, and in the case of the less travelled and experienced subject endeavours to force his mentality on the native, whose ideas and reasoning powers run in absolutely contrary directions. An amusing example of this is the following:—The British authorities, in the kindness of their hearts, are reputed to have placed a machine-gun detachment in or near the palace of Saad Pasha Zaghloul with the idea of protecting him from the too pressing affection of his native adherents. This mistaken act of kindness has been construed by the anti-Delegationists as clear proof that Saad Pasha Zaghloul is in British pay, and has been subsidised by perfidious Albion from the very beginning, and that the detachment is meant to protect him from the righteous vengeance of his betrayed compatriots! On the other hand, one is told by those who are not generally received into polite society that Saad Pasha Zaghloul is a tool in the hands of Omar Pasha Toussoun, the strong man in the background, who keeps up semi-royal state, has illimitable funds, his own brass band, and *corps d'élite* of pipers. There is little doubt that this powerful prince, one of the most intelligent and fanatical of the old régime, has enormous influence amongst the masses, and has, alas! certain cause to detest the British as a result of his experiences with immature officers. In view of his dominant personality, I should not be a bit surprised to see him oust the various pashas, collectively and individually, and finally gather the strings of Government in his own hands.

British influence in Egypt has been steadily on the decline since Lord Cromer surrendered the reins of control.—I am, etc.,

A PASSER-BY IN EGYPT.

Alexandria, May 10, 1921.

Like other countries that were involved in the war, Serbia is suffering from an excess of divorce cases (writes our Zagreb Correspondent). So great is the congestion that some cases have been waiting two years and even more. Measures have been taken to clear off a great deal of these arrears and to simplify and hasten procedure. No less than eight thousand cases have come forward.

BUILDING THE FUTURE OF THE HOLY LAND.

THE Holy Land holds a unique position in the heart of every Christian. We are all stirred to the depths by the thought that the care of Jerusalem and the diverse peoples of Palestine is to be entrusted to the British Empire.

The future of a country is in a great measure bound up with its schools. Sir Michael Sadler gives it as his opinion that the work of mission schools is of great and increasing importance. "They have an ideal which no nation can afford to lose, and they have at their command the priceless service of devoted men and women." We have a working example of what such schools should be in the Girls' High School, Jerusalem, which was started in 1919 under the joint management of four missionary bodies. Here Christian, Jew, and Moslem girls meet and learn to know, respect, and understand one another, and imbibe the very best that Western Christians can give them in the way of spiritual, intellectual, social, and political ideals.

A crisis has suddenly arisen owing to the receipt of notice that the school building, formerly a German orphanage and day school, must shortly be restored to its original owners.

It is therefore essential to raise £20,000 to provide a new school, £12,000 being required for the site and £8,000 for the first building. There is every reason to believe that in a few years the school will cover its own running expenses. It is for Christians to decide whether this historic opportunity is to be grasped and developed. Large and small contributions are needed, and should be sent to the Rev. E. M. Bickersteth, 12, Warwick Square, London, S.W.1, Secretary of the Joint Committee of the Co-operating Missionary Bodies. Cheques should be made payable to the "British High School, Jerusalem," and crossed "Messrs. Coutts and Co."

THE BRITISH HIGH SCHOOL FOR GIRLS AT JERUSALEM.

(FROM A CORRESPONDENT.)

We read in the Old Testament of Huldah, the Prophetess, who "dwelt in Jerusalem in the college," whom Hilkiah, the priest, and others sought in the day of trouble. The women of Palestine have played a great part in the history of the Holy Land from Bible times onwards, and they are to-day, perhaps, the most important factor in its life. I would not expect success for any reform which the women of Palestine had no will to support. People at home often make the mistake of thinking that the women of Palestine have no voice in matters; this is fully as absurd as it would be to say that they have *all* the power. In towns, at least, and certainly in Jerusalem itself, they take no mean place in affairs.

Bishop Blyth was wont to say that there was no instance in the Gospels of a woman turning her face away from our Lord, or of offering Him a slight, far less an unkindness; and Syrian girls would seize upon that thought with absolute joy and never let it go. In all his educational schemes the Bishop always gave the education of girls—the mothers of the future—the first place, and so it was that St. Mary's Home for Girls was the first thing he started—in 1889—whereas St. George's Boys' School was exactly ten years younger. He believed in giving a sound English education on English lines, and, first, a thorough knowledge of English as being the one road into literature, for there are no general or simple books in Arabic, nor story books, to cope with the needs of young minds eager to learn and to grow; not forgetting the purely domestic arts and—games! Strangely enough, games were a new feature in school life for little girls in Palestine; perhaps action and excitement were considered unmaidenly, but his experience of Syrian girls was that they could play games without losing their charming natural manners or their gentle ways and speech. They did more; they gave clear proof of the fine qualities of Syrian girls. One is now curator of a department in the Cape Town Museum; she is just twenty-five. One is a teacher in a L.C.C. school in England. Several are teaching in Palestine. Others have nursed with distinction in Egypt, and one passed her midwifery examination in London ahead of all the English girls, gaining 100 per cent. on nearly every point. One passed out among the first in a Government examination at the new high school last year. These girls have shown themselves fully as sturdy, independent, and reliable as their brothers.

The soil is good and deserves only the best seed. That best we believe to be what is understood by the term "a sound English education," which it is the aim of the new Girls' High School to give to the daughters of Palestine. The school was opened for paying pupils and for orphans in September, 1918, at the express request of the Military Government of Jerusalem by the Syria and Palestine Relief Fund; it was housed in the empty building known as "Talitha Kumi," formerly a German orphanage for girls, worked by the Kaiserswerth deaconesses. It began in a small way, but it began also in the best way, having for its head one who had already a long experience in educational work in the Near East. By July, 1919, good homes had been found for the orphans, and the Relief Fund was able to close its work in Palestine, now in the safe keeping of the British Occupation, and to concentrate its forces on the greater need of Syria. The school now became wholly available for girls whose parents could afford—and preferred—to pay for their education; and four of the British Missions already pledged to service in the Holy Land became responsible for it. Such co-operation was new in the history of missions in Palestine, and this unity of purpose was surely the happiest augury for the future of the school.

The school is run on simple, yet practical, lines. The staff are all first-rate teachers, whose aim is to give the girls a thoroughly sound education in English in all branches, from the kindergarten up to the Oxford and Cambridge Joint Board examinations. The Bible is taught as part of the curriculum, and each day's work begins with school prayers. The girls, in their many nationalities and types, show the extraordinary diversity of races and creeds which call the Holy Land home; there are English, American, Syrian, French, Russian, Armenian, Montenegrin, Persian, Bulgarian, Greek, and Jewish girls. It would be impossible for children of such widely differing creeds and nationalities to work together happily and peacefully in Palestine in any but an English school. It is the utter fairness and impartiality of British rule, indeed, whether in the small confines of a school or the wide spheres of political dominion, which make such harmony possible.

The high school is but in its third year, and results are yet to show; but the Palestine Government, which is eager to promote education and progress, believes that such a school can do valuable work in the new era in the history of the Holy Land. As a British institution, it has the sympathy and welcome of the Syrians themselves, who have always been thirsty for English education, and it will not overlook the claim of European children whose parents are working under the British mandate in Palestine. It is part of the strength of British rule that it gives its best unreservedly, and believes that nothing less than the best is good enough to give. The British Occupation has given to Palestine many of the things she most needs, but unless her people are to be educated in the principles of honour, liberality, and uprightness, which we believe to be implied in the term "An English education," these great benefits will lose much of their virtue in the future. Those who know the Syrians well have great confidence in their ability. The soil is good, and will, of the best seed, give a generous harvest in the days to come.

PRESS ON THE NEAR EAST.

Stephen Raditch.

The *New Statesman* of May 14 contains a very instructive article upon Stephen Raditch, the advocate of a Croat Peasants' Republic. It gives a definite picture of his picturesque personality, this orator in several languages, whose eloquence "has frequently carried him along and swept him round and round like a leaf, not only in a direction opposite to that which he previously travelled, but flying sometimes in the face of the most puissant and august authorities." It comments upon his declining to come to the Belgrade Government, and continues:—

There are those who say that the impulsive little man has changed his mind so often that it would be just as well to wait until he writes another motto on his banner. But Jugo-Slavia cannot afford to wait; if it survives the first few years of infancy we need not be afraid that it will fly apart. But just now everything must be done to encourage the centripetal forces. It would be grievous if a heavy blow were to be struck at this new State by one who has always been a patriotic Croat. It would be sad if he and his adherents were to do what will prevent the Croats from truly uniting for a long time with their brother Serbs. For if he continues with his propaganda of the Peasants' Republican Party he will make this union more and more hard to achieve. There are obstacles enough in the two people's different culture and traditions without the addition of any others. Raditch, however, is not one of those people who irrevocably make up their minds on any subject; in fact, his critics assert that the sentiments which he expresses at the end of one of his perivivid orations do not in the least tally with what he said at the beginning. They have pointed out that his republican ideas did not find utterance before the war, and he admits that when he heard the cry "Long live the Republic!" at a meeting of the Peasants' party on July 25, 1918, it came to him as a revelation. He accepted it. Four months after this famous meeting a Convention was held, with 2,874 delegates, who represented some 100,000 people. They pronounced themselves to be Republicans and Jugo-Slavs. At a meeting on February 3, 1919, 6,882 delegates, speaking on behalf of about 200,000 people, resolved to send in a petition for a Republic to the Jugo-Slav Government.

It proceeds to state his political beliefs:—"One should not try to be original, but should seek to interpret, as do the peasants, both the living generation and the ancestors. He wishes to retain the good which has been handed down—for example, the local dress and customs—but also to add the good which is the product of our time."

It must be remembered that the Serbs are a democratic people; they are by their nature in opposition to any force, civil or military, which might attempt to make the monarchy more absolute. The wisest Serbs do not forget that in the peasant lies their principal wealth, and although as yet the Serbian Peasants' Party does not hold many constituencies in the old kingdom, nevertheless it appears to have a brighter prospect than any other Serbian party, for in that country the revolt against the lawyer-politician is likely to be more efficacious than in France or England. One may look forward to an understanding between Raditch and this Serbian party, which is as yet only eighteen months old.

The uncertain factors appear to be the hold of Raditch over his peasants and over himself. Yet there is no denying the good work he has done for the peasants, whose love and confidence he has now secured. "But the question is whether he has got sufficient strength of will. With all his qualities of heart and brain, he has not managed to discard his zigzag impetuosity."

Those who are openly sailing in Raditch's boat are for the most part the hard-headed peasants. Yet a number of the intelligentsia are coming on board—some of them, no doubt, with a view to their own advancement, but others on account of their convictions. And a still greater number of the Croat intelligentsia look on him with sympathy—municipal officials, barristers, doctors, merchants, schoolmasters, and military officers. It is most foolish to pretend that all these people are thinking regretfully of the old Habsburg days—they are, in the vast majority, sincere and loyal Jugo-Slavs who have certain definite grievances. They do not believe that Croatia has fared very well since the institution of the new State, and it would seem wise to give them as much autonomy as is consonant with the interests of the whole country, for then they will only have themselves to blame if there is no improvement. When Belgrade makes a statesmanlike gesture, then Raditch will probably be able to persuade the peasants to abandon their republican slogan, as well as that sullen attitude towards the Government which they were far from entertaining when the State was first established. A conciliator is needed, and it seems possible that the wise old Nicholas Pashitch may be destined to fill that rôle, and live to witness the achievement of the ideal for which he has worked so long—a contented and really united Jugo-Slavia.

Armenia.

In the *Contemporary Review* of May, Viscount Bryce, O.M., writes from the Armenian aspect upon "The Revision of the Turkish Treaty." After giving a brief record of events from 1914, he says:—

It is, perhaps, too soon to apportion the blame between those responsible for this Near Eastern policy, the failure of which nobody denies. The excuse usually made is that the European Powers were waiting for the United States to take the action which they had, somewhat too light-mindedly, expected from

that Power. This excuse, however, does not justify either the initial blunder of a weak and improvident armistice, nor the want of foresight and of energy in neglecting to see it enforced. Neither need time be spent in discussing the causes which have been inducing some of the Powers to show favour to the Turks. We all have heard of the somewhat unworthy motives which are alleged to be at work; we have all noticed the pro-Turkish attitude of several important journals in some countries, and have sought an explanation. Why this tenderness for a Government which massacred a million of its innocent subjects six years ago, a Government which, whatever form it may take, has shown itself always irreclaimably corrupt, savage, and stupid?

It remains to ask what can be done now, if not to remedy the misfortunes which the policy, or want of policy, here described has entailed, yet at least to save something out of the wreck? Whatever the means to be adopted, the objects to be attained seem to be the following:—Secure, if possible, the retirement of Turkish and Bolshevik troops from the Armenian and Georgian Republics, by making this a condition of any agreement between Britain and France on the one hand and either of those invading Powers on the other. Compel the Turks to evacuate any territory heretofore Turkish that may be assigned to Armenia. This will keep some sort of an Armenian State in existence even if the Erivan Republic be for the time overrun. Make the concession of some local autonomous institutions sufficient to protect the Christian population of Eastern Cilicia a condition of any Treaty to be concluded with Turkey. Carry out the provisions of the Treaty of Versailles by providing funds which will enable some one of the minor Powers within the League of Nations to accept a mandate for Armenia, since it is known that none of the Great Powers will do so, and it is believed that one of the minor Powers will.

To accomplish these things, especially the last, will cost more money than it would have done to prevent the Turks from disregarding the Armistice and resuming their massacres of the Christians. But it will prove in the long run far more costly to allow our dangerous foes the Turks and Bolsheviks to threaten Afghanistan and India by dominating the regions that were to have been liberated, and some such action offers the only means of escaping the dishonour which will rest upon us if we abandon innocent peoples who suffered only because they were Christians, and to whom we promised liberty and protection.

The concessions which the London Conference has proposed to make to the Turks in Constantinople, Thrace, and Western Asia Minor are unfortunate and likely to give rise to further troubles, and it is much to be regretted that the opportunity of extinguishing Turkish rule in Constantinople, thus "cleaning up" a city which has been a nest of scoundrelism during the last five centuries, has been lost.

THE JAFFA RIOTS.

We are indebted to an occasional correspondent for permission to publish the following extract from a letter written from Jaffa on May 2. It confirms reports from other sources that the rioting was directly caused by the Communists, about whose admission to Palestine there have been so many warnings and complaints:—

"Yesterday was most exciting. Some Bolshevik Jews started a riot. First of all they came in in numbers from a colony just outside Jaffa, and had a meeting all against English rule, doing their best to get the Arabs up against it. This first meeting was at 11 a.m.; it was allowed, and soon after there was another one, of a very stormy kind, and then began the row. The Jews were the chief sufferers; some got awfully battered. . . . A lot of killing and wounding took place before the troops arrived. About midday the firing was very hot. — went out to see what was going on, and said afterwards that it was terrible, dead lying about the streets. . . . He said that it was all he could do to keep his hands off a man he passed, who was just shouting out awful things against England. This man was a few minutes later struck on the head by an Arab and battered to death by two or three. There are some terrible Jews here, real Bolsheviks. . . . To-day the whole town is closed, and they are still fighting."

MUSICAL NOTES.

A Greek Pianist.

Unfortunate conditions, the chief of which was due to the reduced means of travelling, prevented my hearing more of M. Leon Eustratiou's recital at the Æolian Hall, on May 12, than Rachmaninoff's G minor Prelude. M. Eustratiou is a Greek pianist, who is said to have a considerable Continental reputation, and he has, I believe, played in London before. In this prelude he showed a very facile technique, and a certain type of reckless bravery (which, gratefully enough, was not at the expense of accuracy) that readily took the fancy of his audience, many of whom were compatriots. For the quality of his tone he did not seem to care greatly, and his reading was more brilliantly superficial than deep.

Miss Lily West.

There was typical English playing in the pianoforte recital that Miss Lily West gave at the Wigmore Hall on May 12—a developed but quite fallible technique, a limited imagination, and an inflexible honesty of purpose. It was the respectable sort of playing that fills, day in and day out, the drawing-rooms of our bourgeoisie, a few times a little better, often a little worse. Beethoven's Andante in F was read with all the emphatic dullness in which it abounds, Scarlatti's "Pastorale and Capriccio" (oh, so worn) came rather to grief through missed or muffled notes, and, Ravel's "Pavane on a dead child" was done with great harmonic impropriety. This was the kind of recital which stamps us (for Miss West was no worse than many others) eternally as an inartistic nation.

The London String Quartet.

There are certain things to be said against the London String Quartet, but it is difficult to imagine anyone seriously gainsaying their performance (the first in England) of Kreisler's Quartet in A minor, at the Æolian Hall, on May 9. Their playing in this was extraordinarily spirited and enthusiastic, and at its finish they received with the composer an unusual ovation. Earlier they had played Mozart's Quartet in D minor, the first two movements indifferently, the last two superbly. Their finish in the Minuet was memorable. Of the Kreisler Quartet there is not much to say, because it itself says little. Its construction, of course, is very worthy, the instrumental balance being particularly noticeable. But it has little originality; it has many stereotyped effects, and is often reminiscent. Very certainly it is not worth the time and care that the London String Quartet must have spent on it.

The London Trio.

This trio, which consists of Miss Amina Goodwin (pianoforte), M. Pecsikai (violin), and Mr. Whitehouse (cello), has achieved a true *ensemble*, and their performances, therefore, have no external unpleasantnesses. In Beethoven's Trio in E flat (Op. 70) they played at once with careful accuracy and unaffected earnestness. After the passion for deep and individual interpretations, of which our concerts bear so many sad traces, it was mildly refreshing to hear three modest artists let the music speak for itself. Of course, the joy to be obtained from such a method (repeated in the performance by Miss Goodwin and M. Pecsikai of the "Kreutzer" Sonata) is definitely limited, but it has many merits. It was surprising at so genuine a concert as this to find the cellist repeating, in answer to absurd applause, a most rapid "Introduction and Perpetuo" of his own composition—there was something seriously wrong with someone's sense of values here. Miss Mary Roebuck varied the efficient placidity of the afternoon with some songs, the best sung of which was Arensky's "Coucous," and the worst Stanford's "Cutting Rushes," though much of the failure in this was due to the fact that the accompanist, Mr. S. Liddle, could never forget that it was not Mr. Plunket Greene who was singing.

A True Vocalist.

It is very seldom that one meets in a recital such technical artistry and musical sense as were proved to be Mr. Ingo Simon's possessions at the Wigmore Hall on May 20. His programme was made up of airs from Italian Operas, 1560—1901, and I was genuinely sorry to miss the first and earliest group. For though Mr. Simon's voice lacks freshness, moving power, and, generally speaking, tone-colour, so refined was his taste and so artistic his perception that it was a rare pleasure to listen to him. He even converted one to the use of gesture on the concert platform, with so nice a reticence did he employ it. He is to give another recital at the Wigmore Hall on May 31.

Senor Manuel de Falla.

This distinguished Spanish composer came over to England to play the pianoforte part of his "Nights in the Gardens of Spain," which was given its first performance in this country by Mr. Edward Clark at the Queen's Hall on

May 20. The work was not the highly coloured and exciting thing we had been led to believe it, and despite the composer's claim that it was not descriptive but expressive, its charm is certainly more pictorial than spiritual. Mr. Clark himself strengthened considerably his reputation as conductor, for into a horn concerto of Mozart (beautifully played by Mr. Aubrey Brain) he unexpectedly introduced a flexibility and gaiety that nearly saved the work from monotony. Of his interpretation of modern music I have already written in sufficient praise.

Pouishnoff's Last Recital.

Leff Pouishnoff, the magnificent Persian pianist, is to give his last recital this season at the Queen's Hall on June 2. His programme is largely made up of those trifles in which he particularly excels; it includes a Chopin group, and works by Rameau, Corelli, Moussorgsky, Rachmaninoff and Debussy. This is a concert not to be missed.

ANDANTE.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

May 9.—Mr. A. Williams asked whether His Majesty's Government had yet received any information as to the terms arranged between France and the Kemalists with regard to the French withdrawal from Cilicia; whether he could say how the proposed gendarmerie would be constituted and commanded; and what measure of responsibility would be retained by France for the Christian population of Cilicia. Mr. Harmsworth replied that he had some information from the Press and other sources as to the terms of the agreement said to have been concluded between the French and the Turkish Delegation in London, although he had not heard that it had been confirmed by the Turkish Assembly at Angora. Subject to this reservation, it appeared to have been in contemplation to withdraw the French troops within a month of the cessation of hostilities, to utilise the existing gendarmerie under French officers as the nucleus of the new gendarmerie, and to demand guarantees for the protection of minorities.

In reply to a question by Mr. Spoor on the formation of the Egyptian Delegation, Mr. Harmsworth replied that it was for the Egyptians to choose their delegation, and His Majesty's Government were reluctant to interfere at all as to the manner in which they should exercise that right.

Mr. A. Herbert asked the Prime Minister whether his attention had been called to a letter from the Secretary of State for India to the Indian Moslem delegation with reference to British policy with regard to Turkey; and why such a declaration in accordance with the Prime Minister's pledge of January 5, 1921, was not made eighteen months ago. The Prime Minister replied that the answer to the first part of the question was in the affirmative. As regarded the last part, he could add nothing to the previous replies which had been given to his hon. friend on this subject.

May 10.—In reply to a question by Sir H. Brittain on the Jaffa disturbances, Mr. Churchill stated that he had already communicated to the Press all particulars with reference to the recent disturbances. A Commission of Inquiry had been appointed to inquire into the matter, and it was not probable that further information would be forthcoming until it had completed its investigations.

Mr. Ormsby-Gore asked the Secretary of State for the Colonies when, and on what charge, Seyid Talib, of Busreh, late Minister of the Interior in the Baghdad Government, was arrested; whether he had since been deported for life, and whether he was in custody. Mr. Churchill answered that Seyid Talib Pasha, late Minister of the Interior in the Provisional Arab Government of Mesopotamia, was arrested at Baghdad on April 16. The charge was that while holding an important office, and responsible for public security, he made a speech in the presence of foreign Consuls and other gentlemen, in the course of which he stated that he was prepared, in certain eventualities, to have recourse to armed force against the Mandatory Power. In the interests of law and order he was accordingly deported to Ceylon, where he would be allowed to live at liberty with his family. The period of his detention would be dependent upon the course of events in Mesopotamia, and has not been fixed. In reply to a question by Mr. Ormsby-Gore whether deportation was carried out by a military court or by the order of the High Commissioner, Mr. Churchill stated that it was by the order of the High Commissioner.

May 12.—Sir Philip Magnus asked the Prime Minister when the Treaty of Sévres would be ratified; whether under Articles 125 and 129 of that Treaty British subjects resident in Palestine would have the option of electing to be Palestinian or of retaining their British nationality; whether as to that option a distinction was made between Jews and non-Jews who are British subjects; and, if so, whether he would take such steps as might be necessary before the ratification of the Treaty for the removal of such distinction from the terms of the Treaty? The Prime Minister replied to the first part of the question in the negative. With regard to the second part of the question, Article 129 of the Treaty would not affect the nationality of any British subjects in Palestine other than Jews who were "*habitually resident*" there, who would, under the Treaty, become citizens of Palestine. Persons affected by the provisions of Article 129 would have the same right as other persons habitually resident in Palestine to opt in accordance with Article 125, but that article gave no right to opt for either British or Palestinian nationality.

NEAR EAST BOOKSHELF.

- I.—"THE BALKANS: ROUMANIA, BULGARIA, SERBIA, and MONTE-NEGRO." By William Miller, M.A. "Stories of the Nations" series. (London: Fisher Unwin. 7s. 6d. net.)
- II.—"A DREAM OF OLD SOMERSET." By Frederick A. Goudge. (London: S. Allen Warner. 3s. net.)
- III.—"WAKE UP, PRINCES." By Khasherno Jadhava, Bombay. Rs. 6.
- IV.—"THE WRECK." By Rabindranath Tagore. (London: Macmillan and Co. 8s. 6d. net.)

I.—THE STORY OF THE BALKANS.

This is not a new edition, but a new impression of the second edition of Mr. Miller's well-known and very useful book. The fact that it is called for shows how interest in the Balkans has spread in this country of late years; and we welcome its appearance, while hoping that a new edition will take us beyond 1908. As far as it goes Mr. Miller's work is well done; he makes the confused history of the Balkans as clear as may be for the ordinary reader, and adapts his style to the highly popular series to which the volume belongs. It would be possible, no doubt, to point out faults; but of what book on the subject could not the same be said? And we find Mr. Miller at least as dependable as, and much more easy to read, than many writers on Balkan history, ancient and modern. The book can be unhesitatingly recommended for readers who wish to obtain a general view of the subject without wishing to go deeply into it. They will certainly find it interesting, and often entertaining; and the index will enable them to look up quickly any fact they want.

II.—OLD SOMERSET.

The charm of Somerset is well known to adults in this country, largely through the efforts of Mr. Cecil Sharp in collecting and in tirelessly seeking to popularise the folk-songs and dances of this county. In this little book, a pageant in seven scenes, it is the child whom the author has tried primarily to interest, and his enthusiasm for his task never flags. His characters are quite representative types, and though of his songs the two genuine Somerset ones are easily the best, the music as a whole adds attractive relief to the play.

The story of the book centres round Alice, the little girl creation of Lewis Carroll, who goes to sleep and dreams of all the things that are supposed to come to imaginative children—witches, kindly peasants, rich and rather superfluous gentlemen, and so on—and by means of these the author contrives to prefer some of the salient points in Somerset folk-lore. Mr. Goudge is perhaps limited by the audience for whom he is writing, and there might be more delicate and original poetry in his lines, but his effects are simply and surely made, and the little play is pleasantly produced.

III.—PROBLEMS OF THE INDIAN STATES.

The writer of this book, a high official in the Baroda State, offers an interesting contribution to the discussion of the future of the large number of States lying among the British provinces of India. The discussion is somewhat rhetorical, and would have benefited by compression and rearrangement, but the views propounded are clear enough. Liberate the States from the control exercised by the Government of India, and leave the Princes free to develop the ancient Indian theory of sovereignty in the light of modern democratic ideals. The author dislikes the Chamber of Princes as at present constituted, and his criticisms reflect sentiments which are known to prevail in some of the most important States; he offers an alternative constitution designed to give more weight to what he regards as the predominant interests, and much that he says on this topic is enlightening, but the subject is too large and too complex to be discussed here, and we must content ourselves with recommending the book to students who are prepared to take divergent views into consideration. Mr. Jadhava has not attempted a complete discussion, but he has put the case for one party forcibly and without offence.

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs,

For particulars, apply to Sir E. DENISON ROSS, Director.

IV.—AN INDIAN COMEDY OF ERRORS.

Bengali fiction is of comparatively recent growth. It originated during the era of our Early Victorian giants, whose influence is seen in the latest vernacular novel. Rabindranath Tagore has followed a well-beaten track in constructing "The Wreck"; but when we turn from plot and dialogue to the atmosphere which he conjures up, we are faced with a social environment which might well make Dickens and Thackeray turn in their honoured graves. "The Wreck" is a novel without a hero. Its leading character is a young lawyer named Ramesh, who falls in love with Hemnalini, the charming daughter of a Calcutta neighbour. His suit finds acceptance, and an auspicious date is fixed for his wedding. But Ramesh's father summons him home, and forces him to marry a young person named Susila. Ramesh goes through the ceremony in a fit of sulks, and deigns not to glance at his blushing bride. The entire wedding party then starts in a flotilla of boats for Susila's home—and is wrecked by a whirlwind on the Ganges. After the catastrophe Ramesh finds himself deposited by wind and wave on a sandbank with a beautiful girl, his father and all the rest of his family having perished. He naturally thinks that the lovely castaway is his bride; but she has a story of her own. She is an orphan named Kamala, whose miserly uncle implored every Brahman stranger he met to take her off his hands. A young doctor in that category, Nalinaksha by name, happened to call at Kamala's village, and on learning her sad plight chivalrously offered to marry her then and there! The wedding duly took place, and Nalinaksha embarked for home with his bride. His boat was wrecked by the tornado which destroyed Ramesh's flotilla, and Nalinaksha sought in vain for his poor little wife.

Ramesh soon discovers that Kamala is not the girl whom he had been compelled to marry, but accepts the curious situation with something more than philosophy. He carries Kamala to Calcutta, places her at a boarding school, and resumes intimate relations with Hemnalini's family. She is kept in ignorance of her rival's existence, and arrangements are made for her union with Ramesh. He, however, finds a double life impossible, and flees to Ghazipur with Kamala. After undergoing many vicissitudes, she meets Nalinaksha, and the curtain descends on an ideally happy pair. We are left in the dark as to Hemnalini's fate, and can only hope that she will not espouse so despicable a creature as Ramesh.

"The Wreck" will interest western readers by reason of the glimpse it gives of a civilisation differing entirely from their own; but it proves Rabindranath Tagore to be no exception to the rule that poets are very seldom convincing novelists.

CONSTABLE & CO. LTD. Orange St. LONDON W.C.2

PERSONAL AND GENERAL.

TO-DAY.

May 26 (New Style).

May 13 (Old Style).

Ramadan 18, 1339, of the Moslem Calendar.

Iyar 18, 5681, of the Jewish Calendar.

Prince Christopher of Greece has arrived in Rome.

Sir Rennell and Lady Rodd have arrived at 25, Cavendish Square, from Rome.

Lady Rumbold has arrived at 8, Lowndes Street from the British Embassy, Constantinople.

General Thomson, delegate of the International Committee of the Red Cross, has arrived in Sofia from Constantinople.

Our Sofia Correspondent writes (May 17): Sir Arthur Peel, the British Minister, has gone on leave to Constantinople.

Mr. E. C. D. Rawlins, Commercial Secretary to his Majesty's Legation at Athens, has arrived in this country on a short official visit.

General Gouraud arrived in Cairo on a visit to Lord Allenby on May 17, and was received with military honours. He is staying at the Residency.

Major-General Sir Lee Stack, Governor-General of the Sudan, who has been in Cairo for the past fortnight, is coming very shortly to this country.

The Prince Regent of Serbia is due to arrive this week in Paris. His Royal Highness travels *incognito*, and may possibly extend his journey to England.

Mr. and Mrs. Lamb, of Goldsborough, have arrived at 33, Bruton Street, where they will be joined by Major Lamb, who is on his way home on leave from Khartoum.

The annual dinner of the Central Asian Society will take place on June 15 at the Imperial Restaurant, Regent Street, W. Viscount Chelmsford will be the guest of the Society.

Our Sofia Correspondent reports that Lady Colvin, the wife of the British representative on the Reparations Commission, arrived in Sofia on April 30, accompanied by her daughter.

The Calcutta dinner will be held at the Hotel Cecil on Tuesday, May 31. Applications for tickets (price £1 1s.) should be made at once to Walter Davies, Downhurst, Ealing, W.5.

The marriage arranged between Mr. C. Owen, of Brookside, Ceylon, and Miss Phyllis Clare Henderson, will take place at St. Andrew's, Westminster, to-morrow, May 27, at 12 o'clock.

Mrs. Rosita Forbes was entertained by the Overseas Club and Patriotic League at luncheon on May 20 at the Hyde Park Hotel. A report of her lecture before the Central Asian Society will be found on another page.

At the Empire Council which is to be held in London next month, the following will represent India:—Right Hon. E. S. Montagu, Secretary of State for India; His Highness the Maharao of Cutch (one of the Princes of Western India); and Mr. Srimvasa Sastri.

Reuter's Athens Correspondent reports under the date of May 18:—The infant daughter of Madame Manoş, the widow of the late King Alexander, was baptised to-day in the Palatine Chapel in the presence of the entire Royal Family. The child has been given the name of Alexandra.

On May 17, at Oxford University, the degree of Doctor of Divinity *honoris causa* was conferred upon the Rev. Philip N. Waggett, M.A., Christ Church. During the war he served as a chaplain in France and Palestine. He was attached to the Headquarters Staff at Jerusalem, and entrusted with important political work.

The engagement is announced of Captain George Cecil Sloane Stanley, late Grenadier Guards, of Ury, Badulla, Ceylon, elder son of Mr. and Mrs. H. C. Sloane Stanley, of

42, Christchurch Road, Winchester, and Hilda Beatrice, younger daughter of the late Arthur F. Leach, of 34, Elm Park Gardens, S.W.

General Sir Arthur Hunter-Weston, who has recently been at Gallipoli for the purpose of selecting a site for the War Memorial, is now on his way back to England, accompanied by Lady Hunter-Weston. After a short stay of three days at Sofia, where they were received in audience by King Boris, General and Lady Hunter-Weston left for Belgrade on May 18.

The engagement is announced between Major and Brevet Lieutenant-Colonel Claude J. E. Auchinleck, D.S.O., O.B.E., 62nd Punjabis, elder son of the late Colonel J. C. A. Auchinleck, Royal Artillery, and Mrs. Auchinleck, of Greenways, Bourne, Farnham, Surrey, and Jessie, only daughter of the late Mr. Alexander Stewart, of Innerhadden, and Mrs. Stewart, Innerhadden, Kinloch Rannoch, Perthshire.

Our Sudan Correspondent writes (April 27):—

It is reported that His Excellency the Governor-General will leave for England early in May.

Le Chef de Bataillon Toureng, ex-Commandant of Wadai, who has travelled to Khartoum via El Fasher, is shortly proceeding to France on leave, and is reported to be about to be married. He proposes to take his wife back to Wadai via El Fasher.

Sir Charles H. Bedford, LL.D., D.Sc., late Director, Central Excise Laboratory for India, will read a paper before the Indian and Colonial Sections of the Royal Society of Arts to-morrow on "Industrial (including Power) Alcohol." The chair will be taken at 4.30 p.m. by Lord Southborough. Sir C. Bedford has just returned from India, where he has been experimentally investigating the commercial and technical possibilities of various waste vegetable materials for power alcohol production, as well as various matters relating to the denaturation of and Excise restrictions on alcohol.

Our Athens Correspondent writes (May 6):—

The Crown Prince of Roumania and his wife, Princess Helena, left Athens for Bucharest last Thursday evening.

Signor Montagna, the Italian Minister, has returned to Athens from Rome.

Prince Christopher and his wife, Princess Anastasia, left for Paris last Wednesday. They will also visit London. Prior to her departure the Princess made a donation of 30,000 drachmæ to the Hellenic Red Cross Society, 10,000 drachmæ to the widows and children of Greek soldiers who have fallen, and 10,000 drachmæ to Princess Elizabeth's fund in aid of the poor.

On the occasion of the Crown Prince's name-day (St. George's), a thanksgiving service was held at the old Palace Chapel in Athens. Only the members of the Royal Family were present. After the service the Ministers, the high State officials, and many superior officers proceeded to the Crown Prince's Palace and signed their names in the book of congratulations. In the afternoon the Dowager Queen Olga, accompanied by the Princes and Princesses, motored to Tatoi, where a service was held in memory of the late King George.

OBITUARY.

The death is announced from Peking of M. Boppe, the French Minister to China. M. Boppe had been for a long while in the French diplomatic service, his posts including the French Consulate at Jerusalem and the Counsellorship to the Embassy at Constantinople.

The death is announced at Mashobra, near Simla, of Colonel Sir Alfred Mackenzie, an Indian Mutiny veteran. Colonel Mackenzie, who was 85, entered the Bengal Cavalry in 1854 and served in the siege and capture of Delhi and Lucknow, being wounded at the latter. He also took part in the Afghanistan campaign of 1879-1880, was mentioned in despatches, and held the bronze star for the march from Kabul to Kandahar. He became Colonel in 1882, C.B. in 1886, and K.C.B., in the Military Division, in 1907.

The death of Mr. John Gerald Ritchie, late of the Bengal Civil Service, removes an important link, says *The Times*, in the long association of the Thackerays with India. His grandfather, John Ritchie, married a daughter of William Makepeace Thackeray, the elephant hunter and grandfather of the novelist. Gerald Ritchie's father, William Ritchie, sometime Advocate-General of Bengal, died at the

early age of forty-five, six months after appointment to the Law Membership of the Government of India. A younger son, the late Sir Richmond Ritchie, sometime Under-Secretary of State for India, married the daughter of the novelist. Gerald Ritchie was further connected with Thackeray, as his widow is a daughter of Colonel Sir Edward Thackeray, V.C., a first cousin of both the novelist and William Ritchie. He also leaves a daughter. Gerald Ritchie was born in Calcutta in 1853, and retained as a vivid recollection of childhood a mental picture of the Naval Brigade landed there for the defence of the city in the Mutiny. In India he did district work at Darjeeling and elsewhere, but his most important appointment was that of chairman of the Corporation of Calcutta between 1892 and 1896. He did his work efficiently and sensibly, and was able to hold his own amid the subtleties of Bengali debate without making enemies; indeed, he was genuinely popular with both Indians and his Service colleagues. He was a great reader, with a fund of literary knowledge. At the end of last year he published the family letters of his father and many delightful reminiscences of his own under the title of "The Ritchies in India," which is a continuation and amplification of Sir William Hunter's "The Thackerays in India."

INDIAN STUDENTS.

The Secretary for India has decided to appoint a committee to examine comprehensively the whole question of Indian students in the United Kingdom.

The Chairman of the Committee will be Lord Lytton (Under-Secretary for India), and the members will include Sir Deva P. Sarbadhikari (late Vice-Chancellor of Calcutta University), Diwan Bahadur M. Ramchandra Rao (member of Madras Legislative Council), Mr. Ernest Barker (Principal of King's College, London), Mr. M. N. Chatterjee (of the Y.M.C.A. Indian Students' Union, London), and Miss L. M. Brooks, Warden of the Royal Free Hospital School of Medicine for Women.

RULES OF GOLF.

As a result of the changes made in the rules of golf the Royal Insurance Company, Ltd., has issued a further edition of its invaluable booklet, giving the rules, explanations of terms, and a variety of other information regarding the Royal and ancient game. Material differences between the rules of 1912 and those of 1920 are shown in tabular form, and some notes respecting the rubber-core ball are added. Altogether the small publication is an invaluable boon to all golfers, and if it were possible for its merits to be enhanced they would be by the fact that readers of THE NEAR EAST may secure a copy of the booklet gratis on application to the Royal Insurance Company, Ltd., at its head offices, North John Street, Liverpool, or at 24-48, Lombard Street, London, or at any of its branches. Copies can only be supplied as far as the stock permits.

NEWS IN BRIEF.

Motor tractors, which are hired out to farmers, are in use in the Damascus and Aleppo districts.

Shefket Bey, formerly Turkish Minister at Stockholm, has been appointed Under-Secretary of State for Foreign Affairs.

Our Yugoslavia Correspondent informs us that it is reported in the Yugoslav Press that Princess Helena of Serbia will shortly leave for England for the purpose of the education of her children.

Our Sofia Correspondent reports that the Bulgarian Easter was celebrated with all the customary ceremonies, and that a great sports meeting was held outside the city on the Monday afternoon.

A Bill for the ratification of all the Draft Conventions and for the approval of recommendations adopted at the International Labour Conference at Washington has now been passed by the Roumanian Parliament.

The Arab, Moslem, and Christian Palestine Congress has protested to the Pope and the Powers against the present British policy in favouring Jewish immigration in view of the Bolshevik proclivities of many of the immigrants.

Four Turkish prisoners of war recently escaped from the custody of the Greeks and took refuge in the Italian Consulate in Smyrna. The Consulate was subsequently surrounded by the Greeks and the prisoners were eventually given up.

The Czechoslovak paper *Praga Presse* learns that M. Take Jonescu, Roumanian Minister for Foreign Affairs, intends to propose to the Yugoslav Government the conclusion of a political and military convention on the lines of that arrived at with Czechoslovakia.

The Metropolitans of Nazareth and Acre, who are residing in Jerusalem, are, reports Reuter, in disagreement with the Greek Orthodox Patriarch, and have refused to obey the Patriarch's order to return to their dioceses. The Government has ordered them to leave Palestine.

With the permission of the Palestine Government, excavation of the Biblical city of Beth-Shan (Beisan) is to be undertaken next month by the University of Pennsylvania Museum. The work will be under the direction of Mr. Clarence S. Fisher, Curator of the Egyptian Section of the Museum, who left London on Tuesday, and expects to begin work in about ten days.

ADVENTURES AMONG THE SENUSSI.

At a meeting of the Central Asian Society held in the Royal Society's Lecture Room, Burlington House, on May 18, Mrs. Rosita Forbes lectured on the Senussi. She said they were a religious order of comparatively recent origin, the founder, Sidi Mohammed ben Ali es Senussi, having been born in 1787. He was born in Algeria of a Berber tribe, but was a descendant of the prophet through Idris, founder of the Moroccan dynasty. His doctrine was based on the strictest interpretation of the letter of the Koran, was definitely opposed to all innovation, whether by Mohammedans or Christians, and found a readier acceptance among the uncontrolled Bedouin, to whom Turk and Christian were equally hateful, than among town dwellers. The Senussi were sometimes wrongly spoken of as a sect, but they had never been other than an ascetic confraternity, opposed to all forms of luxury or of ceremonial, and intolerant of any intercourse with Jew, Christian, or Infidel. In 1852 Sidi Ben Ali, the then head of the order, excommunicated the Sultan of Turkey for unorthodoxy, and, this making it necessary for him to remove his headquarters beyond Ottoman jurisdiction, he had established himself at Jaghbub, a little oasis on the edge of the Libyan desert. Subsequently, in 1894, under Mohammed el Mahdi, the headquarters were removed to Kufara. This was in an almost impregnable position, commanding the trade routes of half a continent, and from this date the growth of the mercantile power of the Order was assured. In 1911 the Senussi had withdrawn from the position that Turk and Christian were alike "outside the pale," and had united with the Turks against the Italians, and in 1914 they had made war on Egypt. Our victory then had been decisive and easily won.

Captain R. S. Gwatkin Williams followed with an account of the experiences of himself and about 100 sailors as prisoners of the Senussi during the war. Their ship, the *Tara*, had been torpedoed, and they had been landed at the secret base of the submarine which had torpedoed them and marched 130 miles into the Libyan desert to Bir Hakkim. There they had been half-starved. On one occasion they had lived for a time on a camel that they had pulled out of a well after it had been dead three or four days. When they stuck a knife into the camel such an aroma came out that they resolved to bury it, and did so; but in the night they had dug it up again. For the next four days they had fried camel, boiled camel, camel soup, and camel liver. Anyone who wanted to get an idea what camel flesh tasted like should go and smell the live animal in the Zoological Gardens. An important part of their dietary consisted of snails; there were snails in the desert that could live without water for a year, and these they used to collect and boil in a tin. Their captors allowed them a small ration of rice a day. He had escaped on one occasion, but had fallen in with some Bedouin, who would have killed him but for the arrival of two Turkish soldiers, who took him back to the prison camp. The rice was all gone, the prisoners had eaten all the snails and all the roots within miles of the camp, several of them had died of starvation, and the rest were very nearly doing so when they were rescued by a small force under the command of the Duke of Westminster.

Captain Gwatkin Williams described his captors as being like children—cruel at first, but kind in their own way when they got to know you. They were so poor that he was several times in danger of being murdered for the sake of the gold filling of his teeth, but he had escaped this fate by saying that the metal was not really gold but brass. This the Senussi had believed, for they could not imagine anyone so wealthy as to have golden teeth!

Shefky Bey, formerly Turkish Minister at Stockholm, has been appointed Under-Secretary of State for Foreign Affairs.

At a mass meeting of Indians in Nairobi (East Africa) a resolution to pay no income-tax, on the ground that there should be no taxation without representation, was unanimously adopted.

COMMUNISM IN THE NEAR EAST.

The frequency with which organised Communism now figures in the affairs of the Near East raises the question whether the countries concerned have to deal with a permanent and growing factor in domestic politics or with a passing phase that will lose its prominence as the effects of the Great War recede into the background and Russia liquidates her present troubles. There is no room for dogmatism on the subject, as the future of all these countries is linked up with too many elements of uncertainty to enable the point to be decided with mathematical accuracy. But at a time when the Near and Middle East seem to be on the threshold of great developments, when an era of progress and prosperity out of all comparison with the modest part they have played in the past opens out before them, it may not be unprofitable to take stock of the forces which may be held to make for or against the advance of communistic doctrines. The inquiry is of importance to the peoples themselves, as it may suggest lines of policy to be followed or avoided, and is not without interest to those who count on political and business relations with that part of the world, as the result can hardly fail, in a greater or less degree, to affect the confidence that is essential if international trade is to be on a satisfactory footing.

Apart from the "Sovietisation" of the whole of Transcaucasia, the more aggressive form of Communism in the Near and Middle East ranges from the still undetermined part played by Jewish Communists in the Jaffa riots to the attempt to destroy the new Yugoslav kingdom, so dramatically described to the Belgrade Assembly last month by M. Drashkovitch, Minister for the Interior. According to this indictment Yugoslavia had had to cope with a determined conspiracy, covering assassination and revolution, organised and financed from abroad. In other words, the Russian Soviet Government had tried to carry out in Central or South-Eastern Europe what it has successfully achieved in the Russian secession States of Azerbaijan, Armenia, and Georgia. Whether conditions in the new Yugoslav kingdom were supposed in Moscow to be playing into the Bolsheviks' hands and thus provoked a more elaborate campaign than has been attempted elsewhere, or whether ordinary Bolshevik propaganda discovered a particularly fertile soil must remain an open question. In any case these manifestations of Soviet intrigue, however alarming to the individual country at the moment, are less important to the inquiry we have undertaken than the headway made by political Communism. In Yugoslavia, it will be recalled, the Communists last November secured fifty-four seats in a Constituent Assembly of 420 deputies; at the municipal elections they captured both Belgrade and Zagreb, as well as other large towns. The Communist Party of Bulgaria is the second strongest in the Sobranje, with fifty seats out of 229. In Greece Communism has no parliamentary strength, but it has a cut-and-dried political programme and can, no doubt, claim to have made progress as an organisation in recent years. If in

Roumania Socialists and Communists can be classed together, as in Greece, they can still claim only seven seats in an Assembly of 568, and it may be regarded as a tribute to their sense of the hopelessness of their position that the chief demonstration that Communist doctrine has given of its existence has been recourse to the bomb. As far as Turkey is concerned, an alliance with Bolshevik Russia, which for any other country might imply some measure of sympathy with Soviet political theories, has in this connection no meaning. The Angora authorities consider that the world is in league against them, and finding the Russian régime in the same plight, have made common cause with it in the hope of being able to put up a more effective resistance. Communism and Turkish officialdom can have no other point of contact, and will part company as soon as they cease to be of advantage to one another. It is, indeed, one of the ironies of the situation in the Near and Middle East that the Allied Powers, having such a formidable opponent as Bolshevism, should not only have failed to enlist the support of the Moslem countries hemming in Russia on the south from the Mediterranean to Chinese Turkestan, but should have deliberately thrown the only part of Turkey which counts into the arms of Soviet Moscow.

The record of Communism both in Yugoslavia and in Bulgaria suggests that it has derived most of, if not all, its present parliamentary vitality from the war and its after-effects. A distinction is made by Marx and Engels between proletariat and peasantry; the former is the real revolutionary class, but inasmuch as the latter has to maintain a struggle against the bourgeois classes to prevent itself from falling (into the proletariat), the proletariat is encouraged to enlist the services of the peasantry in its fight against capital. The exponents of Communism, however, are silent as to the part to be played by the peasantry when the fight against capital has been successful. The resultant dictatorship is to be of the proletariat alone, as laid down by Marx, and if the experience of Russia is any criterion, it can hardly be said to promise a marked improvement in the condition of the peasantry. When, therefore, a peasant nation such as Bulgaria can return nearly 25 per cent. of its parliamentary deputies as Communists, or half the number of the official Peasant (Agrarian) Party, it is difficult to suppose that the electors who voted Communist did so altogether as followers, from knowledge and conviction, of Marx. Even a peasant population has its poorer or *bijwoner* class, and to these people the promise to distribute State lands as well as other property must make an appeal, while the Communist candidate in each case will know how to bait his hook to suit local prejudices. Thus it is alleged that in the Bulgarian elections of a year ago officials and teachers on strike voted Communist, just as in Yugoslavia the same practice offered in many districts, particularly in Serbian Macedonia, the readiest method of "going agin' the Government." Such recruits, however, bring Communism no permanent accession of strength. In the case of the urban proletariat in the Balkans it is inevitable that *post bellum* conditions should make for considerable discontent, and in this connection it is noticeable how domestic in character is the programme of the Greek Communists. Complete recognition is to be given to the Russian Labour Republic, and a Soviet Republic in the Balkans is to be created; but the party also sets store on the abolition of martial law, on the immediate requisition of all large buildings in order to ensure cheap lodgings for workmen, and on a general amnesty to all persons condemned for political and military offences. Only in the penultimate clause is a thought spared to the peasants, who are to be "re-established" on the lands on which they are now employed without indemnity to the landowners. Many of the conditions which have helped within the first few years after the war to swell the Communist electoral roll will gradually be eliminated. Moreover, even if an extreme form of Socialism should hold the reins of government in any Near Eastern country, it has yet to be shown that it would follow in every particular the lead that exotic Bolshevism has set in Russia. Power begets the love of power, hand in hand with which goes conservatism.

NEW ISSUE OF BULGARIAN STAMPS.

By the courtesy of Messrs. Bradbury, Wilkinson and Co. we are able to reproduce prints of a new series of stamps shortly to be issued by the Bulgarian Government.

All the stamps, it will be noticed, are of exceedingly fine workmanship. Three comprise a striking portrait

Shipka, with its Russian Monastery, the scene of the Turkish defeat in 1877 (75 stotinki); and Sofia, with the Cathedral in the centre of the picture (10 stotinki).

Whereas most of the stamps of the last issue were of two colours, the whole of the present issue consists of single-colour steel-plate stamps, border and vignette being from the same dies in each case. The colours

ENGRAVED AND PRINTED BY BRADBURY WILKINSON AND CO. LTD.

of King Boris. Of the picture vignettes three are familiar, having been used in a previous issue, although for different values. Thus, the former 1 stotinka (the fortress Church of Ivan Assen II. (13th century), near Stanimaka, to the south of Philippopolis) becomes 3 leva; the view of the principal church in the Rilo Monastery (where the late Mr. J. D. Bouchier is buried), formerly on the 30 stotinki stamp, now appears on the 5 leva; the view of Tirnova on the River Yantra has been transferred from the 3 stotinki to the 50 stotinki stamp. The other illustrations represent the Tsar Liberator (Alexander II.) statue in Sofia (20 stotinki); a Bulgarian peasant girl harvesting (2 leva);

in which these stamps are being printed are as follows:

10 leva, violet; 5 leva, blue; 3 leva, violet; 2 leva, brown; 1 leva, part of the issue red, part blue; 75 stotinki, part of the issue violet, part blue; 50 stotinki, orange; 25 stotinki, blue; 20 stotinki, green; 10 stotinki, blue-grey.

Since this issue was completed, the Bulgarian Government has placed another contract with Messrs. Bradbury, Wilkinson and Co. for a further issue of 14,000,000 stamps in memory of the late J. D. Bouchier. These stamps will be of two designs, one showing him full face, the other full length in native costume; they will be of different values, ranging from 10 stotinki to 5 leva.

BY APPOINTMENT.

PURE SCOTCH.

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1½" to 3½" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

IN ALEXANDRIA IN 1864.

BRITISH MERCHANTS' GRIEVANCES.

We are indebted to Messrs. Reuter's, Limited, for a copy of an old document, which records a number of resolutions passed at a meeting of British merchants held at the British Institute at Alexandria on Thursday January 21, 1864. These are followed by a memorial, dated February 10 of the same year, and addressed to "S. S. Saunders Esq., H.B. Majesty's Consul, Alexandria." Next comes a second letter to Mr. Saunders, of which a copy was sent also to: "R. G. Colquhoun Esq., C.B., H.B.M. Agent and Consul-General, Cairo," and which covered a copy of another resolution, given below. The paper is interesting for a number of reasons: it shows what difficulties British merchants in Egypt had to contend with half-a-century ago, and how sturdily they faced them; it shows how the truly Oriental system which caused them so much annoyance worked to the disadvantage of the country as well as of the foreigners; and it sets us wondering whether if and when the Egyptians are left to look after themselves, we may not see some very curious "reversions to type."

The first and second resolutions run:—

1°.—That the Egyptian Railway ought to be available for the transport of Goods for the public without respect of persons, whereas the Government, and the Daira of His Highness the Viceroy, have been in the frequent practice of monopolizing it, to the exclusion of the general public, and that in consequence of this injustice, in many instances, heavy pecuniary loss, and very serious embarrassment have resulted to the Mercantile community.

2°.—That the Railway Administration is both morally and legally responsible for the number of packages received, for transport, and for any pillage that may take place during Transit, although it has unjustly in many instances, refused all satisfaction to the owners, for property lost or damaged while in its custody.

The third resolution complains of the Egyptian Government and the Viceroy's Daira acting "most unjustly in monopolizing, as they often do, the transport by water to the interior"; which leads to the merchants being subjected to imposition, and often stopped from carrying on their business. Then comes a "grouse" at unloading and warehousing accommodation:—

4°.—That the system of treating the Goods of Merchants now practised at the Alexandrian Custom-House, is without precedent in any civilized country, valuable property being detained for six weeks, and upwards, owing to the want of Government porters to discharge the lighters.

That there is not enough accommodation provided to receive the Merchandise imported, nor even sufficient covered spaces provided to protect it from the weather, and from pillage; whereby heavy losses have been sustained by its owners, and that this abuse should be remedied without delay.

The latter clause of this resolution inevitably reminds us of what we read recently about congestion in certain docks that are *not* in Egypt. Indeed the first four clauses all seem to have a kind of prophetic "Great War" flavour about them. The fifth is concerned with the shortage of labourers to discharge steamers; and the sixth with the "disgraceful state" of the roads, "especially those from the Merchants' stores to the shipping wharves." And then we have another moral resolution:—

7°.—That the shameful system of bribery practised at the Railway Station and the Custom-House should be stopped.

The eighth resolution declares that "the accommodation at the Arsenal is totally insufficient" for the larding and storage of machinery, "which is likely to increase yearly." In the ninth the merchants declare:

That if H.H. the Viceroy of Egypt is of opinion that the Railway, and the Steamers on the Nile, are only sufficient for his own requirements and those of His Government, Her Majesty's representative be requested to demand of His Highness an authorization to enable the Commercial Community of this City to provide at their own cost, the necessary means of Transport, both by land and water, as an independent undertaking requiring no pecuniary aid from His Highness the Viceroy.

After this highly sporting offer, the Memorialists conclude their list of resolutions with another gentle dig:—

10°.—That the order of H.E. the Governor of Alexandria, having been, on several occasions, set at naught by subordinate officers, H.M. representative be requested to represent this to H.H. the Viceroy, in order to avoid the embarrassment which such a conflict of authority causes to the Mercantile Community.

The Memorial itself breathes the same spirit as the Resolutions. "It is not," the signatories declare, "because the grievances we complain of are of recent origin, that we have not before this time, as a body sought the assistance of our Consul. Those grievances have long existed, but of late they have increased to such an extent as to be no longer endurable." They go on to say that they have remained passive by reason of the

great professions so recently made by His Highness Ismail Pasha, on his accession to the Government of this Country, indulging the vain delusion that he would take some steps to show the sincerity of the promises he then made, and that he would at least alleviate, if not entirely remove the evils of which we complain.

But when we see H.H. the Viceroy in his Mercantile capacity, using the almost unlimited means at his command to secure his private interest, without regard to the ruin it may entail on us: we are reluctantly forced to address to you this our public protest and remonstrance.

The Memorial proceeds to give details of the charges brought in the Resolutions, and makes it very clear that the merchants had abundant reason for complaint. Property of the value of many thousands of pounds, it says, is detained for weeks, and sometimes for months, in transit on the railway. "Whole bales of goods are often stolen, and when complaint is made to the Transit Board, who are morally and legally responsible, remonstrances are met by an unblushing denial of responsibility." Then comes a very human confession:—

If these oppressions fell on all alike, your memorialists, although suffering grievously, would still have one ground of complaint the less. But is the same treatment applied to property which belongs to H.H. the Viceroy; or the Princes of the Viceregal family; or to the higher officers of the Government? Far from it. . . . To them every facility is afforded. . . .

The Viceroy, "in his Mercantile capacity," and his friends seem to have made the most of any advantage that was theirs!

The roads are described as "utterly unequal to the requirements of our Commerce," and then later we read: "Goods are heaped together in one confused mass on the open wharf, amid pools of water and mud, exposed to Sun, Rain, and pillage." After reference to promises of reform having been held out, and an inquiry by one of "H.H. Ministers . . . into our grievances, with a view to their remedy," the signatories remark: "While duly acknowledging this concession, we cannot forbear reminding you, who know the East, what little reliance is to be placed on mere promises."

The Memorial closes with a statement of the reasons for which the signatories "believe themselves entitled to every consideration at the hands of H.H. the Viceroy." It is signed by the following:—

Taylor and Co.	Anderson and Hobson.
Wm. Prehn and Co.	R. J. Moss and Co.
Henry Bulkeley.	Fairman and Co.
Dixon Brothers and Co.	P. Pasquale.
Joice Thurburn and Co.	Schilizzi and Liddell.
St. J. Forssmann.	P. I. Cavafy and Co.
Barker and Co.	Carver Bros and Gill.
Dickinson and Co.	Chas. J. Joice and Co.
John Corlett.	J. Haselden.
Fleming and Co.	W. B. Brough and Co.
Peel and Co.	

The later resolution referred to above reads:—

That this meeting, whilst acknowledging the attention of H.H. the Viceroy in sending His Excellency Ragheb Pasha to look into some of the grievances complained of, is, notwithstanding of opinion, that the unremitting attention both of Her Majesty's Consular General, and of Her Majesty's Consul in this City, is required in order to obtain their redress, and that a copy of this resolution be forwarded to each of these Gentlemen.

The impression created by reading this old paper is one of an Oriental land indeed—a land which could give Turkey hints in the matter of backsheesh and corruption generally. British administration has altered all that, but —.

THE KING EDWARD VII. STATUE FOR NEW DELHI.

On Saturday next Their Majesties the King and Queen are to visit Thames Ditton to inspect at the Burton Foundry the equestrian statue of King Edward VII. by Sir Thomas Brock, which is shortly to be despatched to India, where it will find its permanent home at New Delhi between the Jumma Masjid and the Fort.

When in 1900 the Queen-Empress died, the universal grief of the peoples of India led to a widespread movement for the erection of statues of her at various centres. To this development the idea of the memorial at New Delhi may be indirectly traced. Sir Thomas Brock, it is interesting to recall, was responsible for the statue at Cawnpore, which is looked upon as being an ideal representation of the Queen-Empress. Then in 1910 King Edward died, and though his brilliant reign had been short, the passing of the King-Emperor touched the imagination of India at least as acutely as the death of Queen Victoria. A movement was set on foot for the erection of a permanent memorial to him, and the committee appointed for this purpose, presided over by Lord Hardinge, decided to commission Sir Thomas Brock to execute a large equestrian statue of the King-Emperor for New Delhi.

That was some time before the war threw its all-embracing influence over the world, and but for that unhappy development the statue would long ago have stood in its destined place at Delhi. Early in the war the memorial was ready for the final process, but it was impossible to proceed with it as the moulders were wholly occupied in the production of war supplies.

In the autumn of 1916 the writer was privileged to inspect the full-sized model of the statue at one of Sir Thomas Brock's London studios. It is a noble and most impressive piece of work, and its vastness only serves to emphasise its inspiring character. King Edward, whose face is turned slightly towards the left so that he will look towards New Delhi, is represented on a charger in motion, and one can give no higher praise to the sculptor than to say that the whole conception is instinct with life. The King himself is a truly regal figure. Poised easily on the charger, he seems to be in a reflective mood, and his countenance has a rather severe aspect suggestive of hidden reserves of power. One can see the diplomat there, but the

man of action is more in evidence, and it is a monarch in very truth who looks down upon one. The statue is of the present, but it is also of all time and of all countries. It epitomises the great figures of history, taking their triumphs, contemplating the world with the serenity of soul that comes from the knowledge of a life well spent in the cause of country. For India the statue is ideal. It is indeed a King-Emperor who will gaze upon Delhi.

The height of the statue, with its pedestal, is forty feet. The Royal Arms are on one end of the pedestal, while at the other is the inscription: "This tablet was placed in position by His Majesty George V., Emperor of India, on the occasion of his visit to Delhi for the Coronation Durbar, December 15, 1911." Cartouches of laurel and decorative wings flank the shields bearing the arms and inscription. Lines of bold bronze ornament are below the side moulding of the pedestal, while shields with the arms of the United Kingdom are at the lower edge. Bronze panels are in the sides of the pedestal, bearing the following inscription—in English on the one side, in Persian on the other—in bold bronze letters:—

EDWARD VII. KING AND EMPEROR.

Let this monument, erected by the voluntary donations of thousands and thousands of his subjects throughout his Indian Empire, the rich giving of their wealth and the poor out of their poverty, bear witness to their grateful memory of his virtues and his might.

He was the father of his people, whose divers religions and customs he preserved impartially.

His voice stood for wisdom in the councils of the world.

His example was an inspiration to his Viceroy, his Governors,

His Captains, and the humblest of his subjects.

His sceptre ruled one-fifth of the dwellers on earth.

His justice protected the weak, rewarded the deserving, and punished the evil-doer.

His mercy provided hospitals for the sick, food for the famine-stricken, water for the thirsty soil, and learning for the student.

His sword was ever victorious. Soldiers of many races served in his great Army, obeying his august commands.

His ships made safe the highways of the ocean and guarded his wide dominions by land and sea.

He ensured amity between the nations of the world, and gave well-ordered peace to the peoples of his vast Empire.

He upheld the honour of Princes and the rights of the defenceless.

His reign was a blessing to his well-beloved India, an example to the great, and an encouragement to the humble.

His name shall be handed down from father to son throughout all ages as a mighty Emperor, a merciful Ruler, and a great Englishman.

Could any description be more appropriate, or, it may be added, more worthy of the statue?

ROUMANO-BULGARIAN FRONTIER INCIDENT.

The Bulgarian Press Bureau issues the following statement, dated Sofia, May 14:—

The joint Roumano-Bulgarian Commission charged to inquire into the late troubles on the Dobruja frontier have completed their report, which gives the following as the causes of the outbreak:—

(1) As passage of travellers was permitted only at a single point on the frontier, many travellers, desirous of evading the formalities and loss of time, tried to cross into Roumania at other points, but were surprised by the guards.

(2) A great many refugees, prosecuted by the authorities in both countries, in their desire to cross the frontier were met by the guards, and as they were taken in some cases for contrabandists they were generally chased, and sometimes there was serious fighting. In some cases the inhabitants of the local villages affected by these troubles joined in the fight.

The Commission came to the conclusion that out of a total of forty-seven cases only nine could be considered as "frontier incidents," even these being of no such importance as some interested parties wished to represent them. The Commission is of opinion that the accusations against Bulgaria as provoking the incidents are sheer attempts to disturb the good relations between Roumania and Bulgaria.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The Bulgarian Consortium.

In dealing with the official organisation appointed in 1919 to control the export of Bulgarian cereals, our Sofia correspondent makes out the best case that can be made for that body. Opinion in general, however, is, I fear, strongly against the Consortium. Bureaucratic control always works under difficulties, and in Bulgaria it was specially handicapped by local conditions. The requisite knowledge of trade conditions throughout the world, experience in handling big business, and disinterested impartiality, it is alleged, were all lacking in the Consortium. But it will be well if the Reparations Commission can institute an inquiry into the working of the Consortium and pass judgment. Here in England we have little to go upon beyond the fact that Bulgaria is still offering cereals at prices far above those at which the business world can purchase elsewhere.

Trade with Greece.

One of the many ways in which British traders were handicapped before the war in their efforts to develop trade with the Near East was the lack of opportunity of meeting British official representatives there, and of hearing from them at first-hand the prospects and the outlook as regards their particular lines. Reports are valuable in their way, but their utility is limited *inter alia* by the fact that by the time they appear the information they contain is unavoidably out of date and quite probably no longer applies. Certainly in the best circumstances they are no substitute for what may be called the "personal touch," which the Department of Overseas Trade are now endeavouring to supply by arranging for periodical visits by our representatives abroad. As recorded elsewhere in our columns, one of these has just reached this country—Mr. E. C. D. Rawlins, Commercial Secretary to H.M. Legation at Athens, who will be pleased to meet manufacturers and merchants who wish to discuss with him questions relating to trade with Greece, and who may desire information or advice regarding the appointment of agents, the marking and distributing of goods, terms of payment, Customs duties, or general information as to openings existing for British goods. I am asked to state that applications to interview Mr. Rawlins should be made immediately.

Future B.I.F.

The report of the committee which was appointed last year by the Board of Trade to consider the best policy to be adopted in future as regards the British Industries Fair, which has just been issued, strikes a rather indecisive note on the main issue—whether the fair should continue to be held at various centres or be concentrated in one place. The committee's opinion is that the ideal arrangement would be to hold the fair in one centre, London, in which respect it is simply echoing business sentiment generally on the matter, but it does not proceed to advocate an entire change. In its view, Glasgow should be given up as a centre for the fair, as it has not obtained adequate support, but it recommends the continuance of the Birmingham Fair as long as it receives support, and the addition to it of the trades represented at the Glasgow section.

An Improvement.

A fair at two centres—which presumably we may expect as a result of the report—will be a step in the right direction; but it seems a pity not to pursue the policy of concentration to its logical outcome by bringing the whole fair to London at once. As I have pointed out before, there is everything to be said in favour of the change. The division of the fair into two or more centres, even if, as was the case this year, the dates of the various sections vary a little, means that buyers will in all probability not see all the exhibits, while if the fair is held at one centre, every trade is given an equal opportunity of attracting attention. I am glad to see that the committee views with disfavour the proposal to hold fairs twice yearly. It would be an impossibility to organise a really representative exhibition in the spring and also in the autumn, and the season at which it is at present held is unquestionably the most advantageous, since buyers can come here first before going to the Continental fairs, which fall a little later.

Export Credits.

I had hoped that the comments on the Ter Meulen scheme last week would have been followed by a statement from the League of Nations as to the prospects of its early utilisation. But nothing of the kind has happened, and one is therefore left to the highly encouraging assumption that the adoption of the scheme by the impoverished countries of Europe will depend mainly on the intensity of propaganda by traders in more fortunately situated countries. If that is so it will be a long time before the scheme operates on a considerable scale. One can only hope that for the sake of British trade the authorities here will not delay much longer in introducing their new export credits scheme, which was primarily intended as a substitute until the Ter Meulen scheme was ready, but so far as can be seen will now have to be first choice for England in the Trade Test Match.

Tribute to British Scheme.

It should be an encouragement to the powers that be to hurry on their scheme to read a recent report by an Allied rival in which a tribute is paid to the results that are now being obtained in the Near East from the present scheme which it is destined to supplant. The report in question is from the Belgian Legation at Sofia, and praises the enterprise of British traders in Bulgaria, who, it says, are redoubling their efforts there, and are, thanks to the facilities afforded by the Export Credits Department, delivering their goods against acceptance of a sterling bill at twelve months, while very active rivals are only able to grant three or four months' credit. For several months, as a matter of fact, there has been an increasing tendency to take advantage of the scheme here, and as the only points to which exception is taken by traders will, it is assumed, be remedied in the revised scheme, there is no great reason why British merchants and manufacturers should concern themselves should there be any great delay in bringing the Ter Meulen scheme into operation.

Near Eastern Exchanges.

In the last few weeks the exchanges of the Balkan countries, with the significant exception of Greece, have undergone a decided improvement. The main cause of this is to be found in the outlook for the harvest, which is everywhere reported to be favourable. In the spring a prolonged drought seemed to threaten trouble, but the desired rains materialised, and, so far as can be judged, the dry period has not done any serious damage. The effort that the countries in question have been making to increase production may be judged from the statement of our Bucharest correspondent this week that all the arable land in Roumania is being utilised, and it is very evident that, unless unforeseen contingencies arise, these countries should have at their disposal this year large stocks of cereals for export. Provided adequate use is made of the surpluses, a further substantial improvement in the exchanges should take place by the autumn, particularly in the case of the lei, if only sufficient progress can be made in the reconstruction of Roumania's transport system to enable the development of the export trade in oil and cereals.

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

ROUMANIA.

BUCHAREST, May 12.

Market Depression.

Prices for imported goods in the wholesale market are pursuing a downward course, in accord with the tendency in the Western centres. Some articles are being sold here even below the cost price abroad. Owners of goods are anxious to dispose of some of their stocks even below cost, as they anticipate an appreciable increase in the buying power of the lei in the autumn. Retailers, however, are reducing their prices slowly and reluctantly.

Statistics for America.

In compliance with an official request from New York, the Minister of Finance is sending a compilation of all statistical data referring to the monetary circulation of Roumania, specifying the varieties of the issued banknotes, and also all the data referring to the Treasury bonds which have been issued since the outbreak of the war, and the amount of gold that has been extracted from the mines of the country during the same period.

Miscellaneous.

A delegation sent by the German Government has arrived in Bucharest with the object of dealing with the question of the deposits which Roumania had with the German Imperial Bank. On this occasion they will also discuss the question of the banknotes issued by the Banca Generala Romana which, as it is known, will be reimbursed by Germany.

Negotiations are in progress between Roumania and Poland for an economic treaty. A delegation of the respective experts will shortly start for Warsaw.

EGYPT.

CAIRO, May 7.

An Agricultural Rent Law.

The much-talked-of Agricultural Rent Law has at last been promulgated. One or more commissions are to be set up in each Mudiria, consisting of a judge as president and two notables; one representing the landlords and the other representing tenants. These commissions are to consider all complaints presented by tenants with regard to rentals to 1920-1921, and in giving its decision the commission is to take into consideration the current prices of cotton and other agricultural products the land can produce, but in no case may the rent be fixed at a figure less than the mean of the previous three years. If the price of cotton, on which the commission has based its decision, rises, the landlord will be entitled to an increase in rent equal to two-thirds of the difference between the old and new values based on the number of kantars which the land may produce.

This measure is a very excellent departure, and should have been adopted long ago, for a large number of current rentals had been fixed when cotton prices were very high, and the drop has meant not only considerable hardship to tenants, but also friction between them and the landlords, which, with its consequent possibilities of agrarian trouble, it is highly desirable to avoid at the present juncture.

Industrial Troubles.

For a fortnight the Cairo streets have been remarkably free from noise. This is due to the fact that the trams have ceased running, owing to a strike among the workers. There has been unrest amongst the latter for almost two years, and the company has little by little been compelled to make considerable concessions as regards pay and conditions of service. The workers have formed themselves into a syndicate, which latterly put forward demands of such a nature that the company declared it would rather shut down than be compelled to work solely for the benefit of its employees, which was what the conditions demanded amounted to.

It would seem, however, that a reign of terror, so to speak, is being exercised by a small portion of the workers over the rest, for the company has received offers to resume from a large number of its employees, who state that they are intimidated by their comrades, and ask for protection. That there is more than merely industrial grievances at the back of this movement, and that it is being supported from influential quarters, would appear to be indicated by the fact that the syndicate, which has only been in existence a year, and to which the workers merely pay a nominal monthly contribution, has been able to distribute strike pay on a sufficient scale to enable the workers to abstain from work. That the movement is receiving funds from outside would appear to be clear, and some strong action in the matter is certainly called for, but so far the Government has shown itself helpless to deal with the crisis.

THE SUDAN.

KHARTOUM, April 17.

Agricultural Show.

A successful agricultural show was held at Tokar at the beginning of April. Exhibits were well up to the average, and there was considerable competition for the various prizes that were offered. Lieut.-Colonel C. Wilson, Governor of the Red Sea Province, was present at the formal opening, and was enthusiastically received by the assembled populace.

GREECE.

ATHENS, May 7.

Sericulture in 1920.

Silkworm rearing, which had been neglected during the war, has been paid much more attention lately. 760,650 okas of cocoons were produced in the whole of Greece during 1920. Of these the province of Salonika contributed 212,459 okas, which were sold at an average price of 15 drachmæ per oka. The province of Messinia, which produces the best Greek silk, has only yielded 56,784 okas of cocoons, which were sold at about 20 drachmæ. 31,919 boxes of seeds (eggs) were used for the production of the above 760,650 okas of cocoons. Of these 12,124 were imported from abroad.

Scarcity of Nickel Coins.

There has been a marked shortage lately of nickel coins in this country, and the Government is considering the necessity of doubling the present circulation. The scarcity is mostly due to the export of large sums of nickel money to the newly acquired territories. The nickel coins in circulation at present represent a total of 502,699.20 drachmæ, which are distributed as follows:—5 lepta, 1,656,000, representing 82,800 drachmæ; 10 lepta, 1,500,000, representing 150,000 drachmæ; 20 lepta, 1,349,496, representing 269,899.20 drachmæ.

Customs Receipts.

The receipts of the Piræus Customs during the first ten days in April (O.S.) amounted to 2,344,115.35 drachmæ in paper and 73,667.30 drachmæ in gold. In comparison with the receipts during the corresponding period last year there is an increase this year of 113,871.25 drachmæ in paper and a decrease of 94,008.25 drachmæ in gold.

Miscellaneous.

The total amount of this year's olive oil to be exported abroad has been fixed by the Minister of Supplies at 32,408,480 okas.

In view of the economic situation of the country, the Government has abandoned the project of suppressing the Ministry of Supplies.

BULGARIA.

SOFIA, May 10.

The Consortium.

As anyone connected with Bulgaria knows, her main source of revenue is her agricultural wealth, and during the past eighteen months the exportation of all cereals has been in the hands of a Consortium, created in December, 1919, by the present Government. This Consortium sells all the cereals, and in doing this is assisted by three State banks and also by various co-operative syndicates.

Much has been written with regard to the Consortium, and there is considerable opposition to it amongst the commercial classes, in whose hands the buying and selling of grain had been previously. The opposition political parties have taken a strong line against it, and declare that the Consortium is killing the export grain trade, and that, instead of making the leva rise, it is having the reverse effect. They also claim that by restricting private enterprise it kills competition, and, further, that when the trade was in the hands of private individuals, much more care was taken in looking after the various cereals in the depôts and docks than is now the case.

To turn to the other side of the question, it is undoubtedly a fact that at present the great majority of the peasants are in favour of the Consortium, and, of course, this signifies that the majority of the country is in favour of it. The peasants say with some truth that under present conditions speculation in wheat prices is greatly lessened, and they also feel more secure, since large quantities of grain are in the country, and thus in the event of a bad harvest there can be no fear of famine.

The Consortium itself points to its profits for the period ending last September, which amount to 150 million levas. Ninety per cent. of these profits were put aside for the betterment of the industry, such as the instalment throughout the country of elevators, whilst by the law of 1919 the remaining 10 per cent. was divided amongst the three Government banks. This year the profits will not be so large, and it is intended to give 60 per cent. back to the producers, to allocate 25 per cent. for the construction of elevators, 10 per cent. to the co-operative syndicates, and 5 per cent. to the banks.

As regards the price of wheat to-day, there has certainly been a big fall, and to-day's price is 80 French francs per 100 kilos. The Consortium claims that they sell their stocks to the utmost of their ability, and are not adopting a waiting policy in the hope that prices will rise. These are some aspects of the question from the Bulgarian standpoint. It now remains for the Reparations Commission to examine the whole matter, and to advise the Government on their future policy in regard to the Consortium. M. Karadjoff, a Deputy, is the director of the Consortium, and is doing all in his power to ensure the smooth working of the organisation; but there are such big issues at stake, and there is so much adverse criticism from all quarters, that it would seem advisable to hold an inquiry into the working of this institution.

SOFIA, May 17.

The Financial Position.

A good illustration of the present financial position of Bulgaria is to be found in the way that capital is gradually leaving the country in one way or another. The Italian-Bulgarian Bank at Sofia alone has 200 million levas in deposit receipts, and this bank has not been established very long. Very few wealthy Bulgarians wish to have their money in a purely Bulgarian bank to-day, as they fear that some measures may be taken by the Government whereby the banks will be seriously penalised. Then a great part of the paper money in circulation is held abroad for speculative purposes.

The greater part of the money in the country is in the hands of the peasants, as they prefer to have the money in their houses, far from the hands of any city institutions. A good story illustrating this was told to me the other day by an ex-Minister of Finance. One peasant, richer than the average, had 30,000 Austrian kronen hoarded up in his house. After the armistice, with great sagacity, as it has since turned out, he decided to change them into levas. But what did he find? That they were all partly mouse-eaten, and it was only through the good offices of the ex-Minister that he was enabled to get them changed.

The Bulgarian peasant is to-day richer than he has ever been in his life before, and he has good reason to be content with his Government. He pays hardly any taxes, and is disposing of his wheat to-day to the Consortium at three levas a kilo. Nevertheless there are a few of the more educated peasants who are looking ahead, and what they see is not inclined to reassure them. The 1920 crop remains largely unsold, and in two months now the 1921 crop will

begin to be available. Buyers must be found abroad, and that speedily. Of late the Reparation Commission have been taking a close interest in the working of the Consortium, and it is said they are not too favourably disposed towards it. This is as may be, but the cardinal fact remains that while before the war approximately 600 million kilos of cereals were exported, in 1920 the figures were 150 million kilos.

YUGOSLAVIA.

ZAGREB, May 16.

Time Limit for Exchange of Krone.

The time limit for the exchange of the last krone notes throughout the kingdom has been prolonged until the end of the month. After May 31 the small krone notes which remain outstanding—that is, of the values of 1, 2, and 10 krone—will cease to be legal tender.

Yugoslav Delegation at Prague.

A delegation of several hundred Yugoslavs is officially visiting the Agricultural Exhibition at Prague, and will be present at the congress for the formation of a Panslavonic Chamber with its headquarters at Prague. At the same time a "Green International" will be formed, to which representatives of all peasant parties will be invited, and to which the Serbian peasants will probably go. M. Stepan Radich has asked for passports in this connection. Whether he will get them remains to be seen.

An Internal Loan?

The Belgrade correspondent of the Zagreb *Jutarnji List* reports that the Minister of Communications has declared that the country needs a huge loan of 500 million dinars, for a period of fifty years, at 7 per cent. interest. There are two possible alternatives, for the loan will be an internal one. Either the finance houses must form a syndicate and guarantee the issue, or a forced loan will be made.

CYPRUS.

CYPRUS, May 9.

New Motor Company.

A motor company has just been established to facilitate communication throughout the island. It starts with thirty cars, including Ford, Overland, and Maxwell cars. The public is invited to give its support to a purely local enterprise. The principal depôts are at Nicosia, Larnaca, and Limassol. The service promises to be efficient, and should be a very welcome addition to island locomotion.

MAIDAN-I-NAPHTHUN AND ABADAN.

(FROM A CORRESPONDENT.)

Maidan-i-Naphtun lies far from the busy haunts of men and away from the beaten track of the traveller in a valley surrounded by the snow-capped Baktiari mountains, which lie stretched across Persia from latitude 38.27 N. to longitude 33.24 E. Ten years ago one could have sought in vain for the place on any available map of Persia. It is now a place of great importance, and a veritable hive of industry. Looking down on it from the mountain pass which opens abruptly upon this arena one sees lying below one a thriving town, studded with boring rigs, engine-houses, dwelling-houses, workmen's huts and all the other essentials of a civilised settlement.

The inhabitants of this town are of widely different nationalities. There are, for instance, the Baktiari and Iranian Luris, a race of mountaineers, supposed to be subjects of the Shah, but owning, as a matter of fact, only a nominal allegiance; then there are Persians and Chaldeans, Englishmen, Scotchmen, and Canadians. It will be readily realised that the control of these different elements calls for something of the qualities of the diplomat.

From Maidan-i-Naphtun the oil is conducted by a pipeline to the Anglo-Persian company's refineries at Abadan on the Persian Gulf—a distance of roughly 150 miles. No one who has not passed over the country across which this pipe-line has been laid can conceive the magnitude of the difficulties which have confronted the undertaking, and have been overcome successfully. It was an arduous struggle against climate, country, and the elements, and these were only conquered by pluck, zeal and inexhaustible patience.

The pipes had to be conveyed up the river Karun and landed on the bank at the most accessible points. During May and June the Karun—like the Tigris—is subject to freshets—caused by the snow melting in the mountains—which come hurtling down, with the result that the river rises from ten to 20 feet in a few hours. These freshets caused serious delay at the commencement of the enterprise, for the erosion of the river banks, where the pipes were lying piled up in heaps, caused them to subside, and hundreds of pipes were lost, for the water comes down so heavily laden with silt that they were soon deeply buried in the river bed never to be recovered. The pipes thus lost had to be replaced, and the pipe-line was laid from Maidan-i-Naphtun to the refineries at Abadan on the Shat-el-Arab.

Only a few years ago Abadan was a marshy swamp with some struggling date palms to relieve its bare monotony. To-day what a change has come over the scene. Industry has touched the land with simply magical effects, and the once barren spot is now well on the way to being a thriving port. Wharves have been built—a great engineering achievement, as the stones, ironwork, cement, timber, and such-like material had to be brought from India or England and the whole site had to be reclaimed and protected from the river. Then there are houses and offices, and a splendid clubhouse for the staff of the company.

The company's sea-going tankers lie alongside the wharves and the oil is pumped into them in bulk for shipment. Here, too, the company ships the tins of oil with which people who live in the East are familiar.

The Company's oil is now used everywhere in the Persian Gulf, in India and at the towns and ports of the Red Sea—at Suez and Port Said. Before this wonderful and inexhaustible store of oil—which lay a rich treasure hidden and guarded by the Baktiari Mountains—was discovered, all the oil supplied to the East was shipped from Batoum.

SANITATION IN THE SUDAN.

(BY OUR KHARTOUM CORRESPONDENT.)

All visitors to Khartoum must have been struck by the very primitive methods of sanitation. The abnormal rains in 1920, with the consequent humidity of the atmosphere and phenomenal breeding of flies, made conditions absolutely perfect for an epidemic of bacillary dysentery. The possible ravages of this fell disease can only be realised by those who served in Gallipoli, where the number of sufferers from the complaint went into colossal figures. The after-effects of the scourge are invariably unpleasant, and take some time to recover from. The fact that Khartoum escaped from such a visitation can only be attributed to the benevolence of the Deity, who, according to the native, burst into unseemly laughter when He surveyed His handiwork, and on reflecting over existing conditions must have considered that the unfortunate resident had quite enough to put up without an additional discomfort of this description. It appears, however, somewhat unwise to count on the continued intervention of Allah in this respect, and steps should undoubtedly be taken to put in an up-to-date drainage scheme. This would naturally be a very costly project, but the extraordinary increase in the European population makes the subject one of extreme importance. From a financial point of view it would appear worth while to compare the cost of the present system, capitalised over a period of, say, fifteen to twenty years, with the outlay required for the installation of an up-to-date scheme. Apart from the unpleasantness of present methods, the existing transport service compares very unfavourably with a bunch of violets, and can by no stretch of imagination be considered as either sightly or savoury. Bazaar gossip has it that the bucket transport labourers were only able to carry out their duties when in a blissful state of intoxication, and struck for more pay in consequence of the increased cost of dhurrah, the basis of Marissa (a type of native beer), so that the authorities, to avoid being fleeced, were compelled to employ prison labour. Convicts apparently are so unenthusiastic over the new form of hard labour that crime has very materially decreased. Verily 'tis an ill wind that blows good to no man.

ENQUIRY BUREAU.

Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.

Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."

ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.

No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.

Agents Wanted Abroad.

ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be re-directed to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

112. An Alexandria firm wish to enter into business relations with United Kingdom firms dealing in the following exports:—Beers and stout; salmon, sardines, tinned fruit and vegetables; coconut oil; gunny bags; pepper, rice, flour and soap.

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114.—Importer in Karachi (India), travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers, and exporters. Specialities:—Exports: Medicinal herbs, dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116.—Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples, with prices and terms.

OIL NOTES AND NEWS.

BAKU AND GROZNY FIELDS.

Decline of Production Under Bolshevists.

It is now just a year since the Soviet Government took possession of the Baku oilfields. The Soviet Press gives some data which make it possible to judge of the results of the nationalisation of the petroleum industry.

The *Ekonomicheskaya Zhizn* for March 2 points out that before the war the Baku fields yielded up to 7,600,000 tons, while in 1920 the output was 2,900,000 tons. For the first four months, until the occupation of the district by the Bolshevists the output was 1,200,000 tons, while for the remaining eight months (May—December) of the Bolshevik occupation the output amounted to 1,700,000 tons. The Bolshevists did not even carry out their eight months' programme—viz., 2,400,000 tons. For the last four months (September—December) the average monthly output was 175,000 tons, whereas for the first four months of the year it maintained a level of 270,000 tons. January, 1921, showed a slight increase—i.e., 210,000 tons—but still this figure is below the estimated output for 1921—231,000 tons. The number of wells in January was 816, as against 775 in December, 835 in November, 986 in October, and 1,052 in September.

"The other branch of the industry," says the journal in a later issue, "namely, boring, is still paralysed." On January 1, 1921, 52 wells were being bored, whereas in November, 1920, there were 67, and in June 128. In January 51 *sazhens** were bored, which works out at a little over the November results (38 *sazhens*), but is quite insignificant when compared with the programme, which provided for 17,000 *sazhens* being bored in 1921. "It should not be forgotten," it is added, "that a prolonged decline in production and the almost total cessation of boring increases the alarming flooding of the petroliferous strata, and has already brought the petroleum industry to the verge of ruin."

The principal obstacle, it is declared, is the shortage of labour. All branches of the industry are suffering from it, but the shortage of pump-men is the most acute. Moreover, there are no workmen in the workshops which provide the boring appliances. Thus, at the end of November there were only 30 per cent. of the necessary number of turners at work and 23 per cent. of the smiths. This shortage of labour is explained by the exceedingly unfavourable food and housing conditions. The Soviet authorities cannot manage to provide the workers of this industry, which is so important to the Soviets, with sufficient food, footwear, and clothing. These are the general causes of the decline of Soviet industries, and their roots lie in the very organisation of Soviet economics, so that there is hardly any reason to expect—as this journal does—that there will be any improvement in the Baku petroleum industry. Meanwhile, Soviet industry is not affected by this decline in the output of petroleum, or, rather, the catastrophic petroleum shortage in Russia is caused, not by insufficient production in the Baku oilfields, but by the impossibility of exporting it from there. "In the current year," says the journal, "thanks to the old supplies in Baku, we have not felt the effects of the decline in petroleum production, but in 1922 there will be an abrupt change for the worse in the situation, unless boring and pumping operations are carried on far more energetically this year."

Information as to the output of petroleum at Grozny is very scanty, but it also points to great stagnation. Moreover, here the shortage of labour cannot be attributed to unfavourable food conditions, as the oilfields lie in the midst of a most fertile corn-producing district. The *Ekonomicheskaya Zhizn* gives the following information:—The output for 1921 was estimated at 1,900,000 tons. In January the output was 65,500 tons, or 40 per cent. of the estimated monthly output. As compared with the preceding months, the January output shows a certain increase. In November 50,800 tons of oil were raised, and in December 44,500 tons. Boring operations are, however, in a hopeless condition. In January the boring amounted to 42 *sazhens*, and in December to 49, whereas it had been estimated that the total annual boring would amount to 4,245 *sazhens*. As yet the stores of petroleum in Grozny are greater than the railways can transport, and perhaps here there is no danger of the supplies being exhausted, as the railways, in their present condition, cannot transport all the petroleum produced at Grozny.

* 1 *Sazhen* = 7 feet.

TURKISH GUARANTEED LOAN OF 1855.

Position of British Holders.

In the House of Commons recently Mr. Macquisten asked the Under-Secretary of State for Foreign Affairs what steps had been taken to protect the interests of the British holders of the Turkish loan of 1855, £5,000,000 sterling, secured by the tribute paid by Egypt to Turkey and on the customs of Smyrna and Syria and other revenues of the Ottoman Empire, the interest of which was guaranteed by England and France; was he aware that up to 1875 the Turkish Government provided a sinking fund for the redemption, and reduced the loan to £3,815,200 still outstanding; that under Article 112 of the Treaty of Sèvres Great Britain undertook to relieve Turkey of liability in respect to the loan secured on the Egyptian tribute; would the British Government carry out the obligations of the Turkish Government and provide the sinking fund of 1 per cent. per annum stipulated in the original loan contract for the redemption of the balance outstanding; was he aware that the tribute payable by Cyprus to the Turkish Government had been retained by the British Government since 1878, and that an accumulation of £500,000 had been invested in the name of the Financial Secretary to the Treasury; and would this sum be devoted towards the redemption of the outstanding 1855 loan?

Mr. Young: Under Article 112 of the Treaty of Sèvres the Government of Egypt will continue to apply the sums hitherto paid towards the interest on the Turkish guaranteed loan of 1855, and His Majesty's Government will continue to guarantee the interest on the loan. The holders of the loan are thus protected against any deterioration in their position as regards interest as compared with that in which they were before the war. No liability is undertaken by His Majesty's Government in Article 112 in respect of Turkey's failure since 1876 to provide for the redemption of the loan which should have been completed in 1900. The holders of the loan must be taken to have accepted the position created by the Turkish default, which was continuous for a period of thirty-eight years' peace with Turkey, and there appears to be no reason why their security should in this respect be improved at the expense of the taxpayer. The surplus of the Cyprus tribute (over and above the sum required to make up the interest on the loan) has been invested by the Treasury in British Government securities since 1892. Pending the coming into force of the Treaty of Sèvres no final decision can be taken with regard to the disposal of these securities.

The traffic receipts of the Smyrna-Aidin Railway for the week ended April 30 amounted to £10,238.

ENGINEERING.

Pier Reopened.

I am informed that the pontoon at the Royal Pier, Southampton, is again in use for steamer traffic, news that will be received with pleasure by motorists who have been inconvenienced during the last six months owing to the difficulties of embarking and disembarking cars on the Southampton-Cowes route. A few weeks ago the Automobile Association represented to the authorities that great inconvenience was being caused to A.A. members desirous of crossing to the Isle of Wight from Southampton, and as a result is able to announce the prompt restoration of the usual facilities.

Power Alcohol.

The Automobile Association points out that the use of power alcohol as a motor fuel is in danger of receiving a serious set-back, in view of the announcement that the Revenue Bill is likely to be entirely dropped. Certain concessions had been embodied in Clause 27 of the Bill, which would have enabled the Commissioners of Inland Revenue to make regulations tending towards the more rational handling of the power alcohol question. The Automobile Association, through the Motor Legislation Committee, is proposing to get the clause in question incorporated under another Act during the present session, and it is hoped that the general public, who are as vitally interested in the question of cheap transport as any individual motorist can be, will use every endeavour with their Parliamentary representatives to get this course adopted by the House of Commons.

Russian Engineering.

An interesting discussion took place recently at the Institution of Electrical Engineers on the position of the electrical engineering industry in Russia. Mr. C. L. Lipman stated that for the time being the Soviet Government is capable of maintaining order and is able to carry out a more or less complete plan for supplying electrical power to certain of the more important districts, the coal mining and metallurgical industries of the Siberian, Ural, Moscow, and Donetz regions being the first to which attention will be given. Much of his statement is of great interest, and may be quoted in full. He said:—"The general destitution and the dearth of engineering materials have not permitted progress much beyond the excavating and layout stage, but considerable pioneer work has resulted. A hydro-electric scheme, the Kashir generating station, to supply Moscow and a number of adjacent counties, is being rushed forward day and night, for it is decreed that all factories in Moscow will use electric power. A temporary district station on the Shatour marshes is helping the Bogorodsky transmission station to illuminate Moscow. The electric station at Sudakovsk works has been restored, and the works at Tula are receiving the required power. Seven industrial districts of the Moscow basin are shortly to receive electricity from the Shatour and other stations with the object of obtaining 1,000,000 tons of coal per annum."

In the Petrograd district electrification is being carried out (according to an abstract of his address) at an intensified pace; the Ontkin works are being reconstructed and a new station commenced on the Viazen marshes. On the River Svir (the Svir Volkhov station) a huge hydro-electric plant is in hand for the supply of the Northern districts of the capital. Simultaneously, dredging of the Svir is going on under the Mariinsk waterway project of connecting the Volga with the Baltic. In the Donetz basin the electricity works, reduced to a deplorable state in the fighting with Denikin, are already recovering, and at the end of February last thirty stations, with a total energy of 190,000 kw., were working in three of the chief districts, while 3,000 motors of 122,240 total horse-power have been repaired and put to use. In the Kizelovsk coal district, in the Ural, great efforts are being made to finish the electricity works by eighteen months hence. Nor is it only industrially the electrification goes on. Thousands of cottages are receiving light, and in the Kieff district the workers' quarters are lighted free of charge.

Modern Bridges.

Motorists will hear with regret, and engineers with interest, that the old timber bridge at Muskham, on the Great North Road, over the river Trent, is to be replaced by a bridge of reinforced concrete. The timber structure, which is one of the most picturesque in England, was built in 1652, and, with the exception of necessary repairs, remains substantially as built. It appears, according to the old records of Nottinghamshire, that the bridge was built at the joint cost of the county and the landowner who was responsible for its upkeep. Now, I understand, the Notts County Council will be the sole owners of the new erection, and will in consequence be responsible for any repairs necessary. The well-known durability of reinforced concrete work renders this responsibility merely of a nominal character, as little is likely to have to be done to the bridge for the next hundred years or so. The new structure, which will cost about £50,000 to erect, will have two arches, each of 100 ft. in span, and at either end of the bridge two flood openings of 22 ft. 6 ins. span will carry off any flood water in the event of overflow of the stream. The road over the bridge will be about 39 ft. clear, the over-all width of the bridge being 42 ft.

Whilst on the subject of bridges, mention may be made of the fact that the new railway over-bridge recently constructed to carry an extension of the Bode Belgica over the ceinture railway in Brussels exhibits, according to the engineering supplement of *The Times*, a type of design which is somewhat unusual, if not altogether novel. The problem for solution was to span the railway in such a manner as to provide the requisite head-room for railway traffic without involving an inconvenient gradient on the roadway above. The conditions made it necessary to provide a centre span of not less than 80 ft., with two outer spans, making up a total length of about 148 ft. in all, and to limit the centre span to 5 ft. in depth.

The design accepted by the Belgian State Railways provided for a cantilever girder 147 ft. 7 ins. long, composed of a central span of 82 ft. supported by piers on each side of the railway lines, and two projecting cantilever spans of 32 ft. 9 ins., one at each end. The weight of the latter, serving to reduce very considerably the positive bending moment at the middle of the centre span, facilitated the task of keeping the thickness of the latter within the required limit and simplified the construction of the two abutments by diverting the load to the main piers.

When undergoing official tests after completion, the bridge proved to be entirely satisfactory under rolling loads, the vertical movement at the end of the projecting cantilevers being negligible. The success of this bridge has induced the State railway authorities to adopt the same type of design for an overhead footbridge, with a central 82 ft. span, at Blaton railway station.

Portable Engines.

The portable steam engine has always been popular in agricultural districts and in countries where work of an occasional character has to be undertaken in localities some distance apart, and for many years the engines of this type made by Messrs. Marshall, Sons and Co., of Gainsborough, have been held in deservedly high esteem. The firm have now placed on the market a new range of portable engines, and also of semi-portable engines of the single-cylinder, simple saturated steam types. It appears that this comprises six sizes of power unit, ranging from 9 to 39 brake horse power economical load. These yield respectively from 13 to 50 brake horse power maximum continuous load, and one of the most generally useful sizes, and one which has given exceptionally good results in practice, has a cylinder of 8½ ins. diameter, with a stroke of 12 ins., giving an indicated horse power of just over 32 and a brake horse power of rather over 30½. The engine is remarkably smooth-running, and the consumption of coal, taking this on a 13,500 British thermal unit value, is only 2.33 lbs. per brake horse power hour at full load. It is pointed out that, eliminating ash and slate, the coal consumption would be only 2.2 lb., or, were coal of the highest quality used, only just over 2 lbs. per brake horse power hour.

Other details given show that the water consumption of the engine was correspondingly low, being just over 20 lbs.

per brake horse power hour, or rather more than 8½ lbs. per pound of coal.

The boilers, which are worked at a steam pressure of 150 lbs. per square inch, are of the multi-tubular standard locomotive type, and are fitted with the well-known patent fire box designed and made by the firm. In this the fire box crown is not fitted with girder roof stays nor suspension bolts, but has two corrugations rising diagonally from each angle of the side plates and intersecting over the fire box crown plate. These corrugations, which give remarkable strength and rigidity to the structure, are pressed in the sheeting in a press which carries out the work without bringing any undue stress on the crown plate. In this way, and by the adoption of a scientific design and an up-to-date and efficient means of carrying it into effect, a flat plate is given a degree of strength which, as a matter of fact, it would be difficult to equal by any other means. The obvious advantages possessed by this form of crown plate are that there are no obstructions to retard or even tend to retard the free circulation of the water, and that the crown itself is kept free from scale and other deposits from the feed water. Further, the heating area is increased at the very point where an increase is most desirable; that is, at the point where it is of the greatest evaporative value. Instead of the usual heavy stays running lengthwise in the boiler, corrugated tube plates and reinforced front plates are used, and it goes without saying that every joint is made with scrupulous care, and the plating and every fitting are of the highest possible quality of material. The barrel of the boiler is heavily lagged to prevent loss of heat by radiation, and the working barrel of the cylinder is surrounded by steam at boiler temperature.

Electric Power.

A scheme has been sanctioned by the Ontario Government by which a further half-million horse power is to be taken from Niagara on the Canadian side. This will practically double the existing output of the Canadian Niagara hydro-electric power house. The new works will utilise the head of 327 feet between Lake Erie and Ontario, and the means adopted might well be followed by engineers in other countries where water power of considerable volume but comparatively low fall is available. An open power canal of about 13 miles in length is to be constructed, of which about four miles will be an existing waterway reconstructed, the additional nine miles leads having to be excavated. Electrically-driven excavators will be used for removing the material and cutting the channel, and the work will no doubt be put in hand immediately.

Aluminium in Power Work.

For some years past aluminium has been employed in place of copper for a good deal of electrical work, and now that economy in every department of power supply is of such importance, the pamphlet just issued by the British Aluminium Co. is of more than ordinary interest and value. The company say, and rightly, that the substitution of bare copper rod or cable for insulated cable is only a half measure of economy, and that to secure the full advantage aluminium rod or bar should be substituted for the copper itself. They summarise the advantages of copper as compared with aluminium as being an appreciable saving in first cost, a considerable reduction in the weight to be carried, greater resistance to the corrosive effects of the atmosphere, and a reduced temperature rise for equal current-carrying capacity. It is said that on the latter basis an aluminium conductor of the same resistance and length as one of copper will have a cross-sectional area greater in the ratio of ten to six, but owing to the lower specific gravity of aluminium the weights of the two conductors will be roughly as one to two. The increased surface area of an aluminium conductor plays an important part in regard to temperature rise, as the temperature of a base conductor depends on the amount of surface exposed to radiation as well as on the heat generated within it. An aluminium bar, by reason of its greater perimeter, will have a considerably lower temperature rise than a copper bar of the same resistance carrying an equivalent current. Of course, aluminium has not the same tensile strength as copper for a given cross-sectional area, but as a conductor of larger diameter has to be employed when aluminium is used, the tensile strength in actual practice works out at about the same.

Whitsun Motoring.

My friend Mr. Stenson Cooke has just supplied me with the following interesting statistics regarding Whitsuntide motoring. He says that the reports received by the Automobile Association from the road patrols concerning their work during the three days covering the Whitsuntide holidays confirm the prevailing impression that the number of motor vehicles on the road constituted a record for a Bank Holiday. The patrols distributed over England, Wales, and Scotland assisted, by giving road information, 2,549 members. They helped 681 motorists whose vehicles had break-

downs, and rendered assistance in connection with twenty-six accidents.

In connection with other roadside troubles, 506 motorists benefited by the personal assistance of the road patrols, and 433 car and motor-cycle owners availed themselves of mechanical first-aid assistance provided by patrols and the association's fleet of road service outfits—motor-cycle combinations carrying tools and other supplies necessary for dealing with minor mechanical troubles on the road. In addition, the patrols used their first-aid wallets in ten cases of personal injuries. The eight roadside fuel-filling stations erected by the A.A. were widely used by motorists for replenishing their fuel and water tanks and inflating their tyres.

RAW SILK IN TURKEY.

The 1921 crop of cocoons in the Broussa district is estimated at 350,000 kilos, as against 3,185,859 kilos in 1912-13, says an American Consular report. Before the war 83 filatures of 4,873 spindles were in operation in the same field. At present only five mills are running. Several causes have prevented the restoration of the Broussa silk industry, among them being the destruction during the war of nearly 80 per cent. of the mulberry trees, which were cut down for fuel; the lack of capital for reconstruction purposes; the fluctuations of the silk market; and the general disturbed condition of the country. French silk operators still dominate the Broussa silk market and advance funds to the growers. The machinery used in the mills is obsolete.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—Business has been fairly brisk, currants providing the one exception. The market in this commodity has been very dull, and it is evident that stocks in the country are going into consumption very slowly. Sultanas are scarce, and rates are hard in view of the steady demand. Supplies of figs are rapidly being taken up at advancing prices. Good business has been done in Persian dates.

Sugar.—Home refined is unaltered. West Indian crystallised has come to business at 54s. to 56s. 6d., and American granulated is unchanged at 61s. 6d. Czechoslovakian was sold at 32s. Futures are: June, 26s.; July, 25s. 6d.; August, 22s.; September, 21s. 6d.; October, 19s.; November, 18s. 3d.; December, 17s. 9d. to 18s.

Coffee.—Prices have been rather irregular. East India bold coloury is quoted at 97s. to 99s., a decline of 9s.; bold grey-greenish at 97s. 6d. has risen 12s.; and peaberry is quoted at 83s. to 90s. 6d. Costa Rica bold to good bold greenish has been done at 105s. to 122s., a decrease of 3s. 3d.; and peaberry is 118s. 6d. to 135s. 6d. Nairobi ordinary bold to good bold greenish is 91s. to 96s. 6d.; medium, 97s. 6d. to 82s.; and peaberry 75s. Futures market is steady. Quotations are: May, 40s.; July, 40s.; September, 41s.; December, 41s. 9d.; March, 42s.

Oilseeds.—A firm tone has prevailed. Indian linseed is 1s. up at 18s. Rapeseed has risen with Toria at 20s. 6d.; bold Ferozepore at 19s.; and brown Cawnpore at 18s. 6d.; increases of 1s., 6d., and 2s. respectively. Cottonseed is firm with Bombay at 9s. 9d., a decrease of 9d., and the Egyptian black variety 3d. up at 12s. 9d.

Oils.—The market has been very unsteady. Linseed oil has shed 9s. at 20s. Rape oil is higher, with crude at 52s. and refined at 60s., an increase of 3s. in both cases. Refined cotton oil is unchanged at 42s., while Egyptian crude at 34s. is the same, but deodorised is 1s. up at 48s. Turpentine has risen 1s. during the week to 100s.

BULGARIAN TRACTOR TRIALS.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, May 10.

Trials of agricultural ploughs and tractors were held last week at Knyjo, near Pleven, with the object of enabling the Government to select the most efficient and best adapted machine for use throughout the country. About thirty entries were received, but only ten machines arrived in time, and it is possible that a further series of trials will be held next Sunday. Great Britain was well represented, but it is to be feared that the Central European countries, with their low exchanges, will stand the best chance.

COMPANY NOTES AND REPORTS.

Banca Natiunei.

The report of this bank shows gross profits of 22,757,454 lei, and net profits of 15,819,808 lei. The allocation to reserve was 2,372,971 lei, a dividend of 22 per cent. was declared, and 25,667 lei were carried forward.

British Cotton-seed Products.

The balance-sheet of the British Cotton-seed Products as at March 31 shows the following items:—Debit: Issued capital, £229,664; sundry creditors and other credit balances, £2,787; total, £232,451. Credit: Patent rights at cost, £117,500; purchase of leasehold premises, plant and machinery, etc., £18,087; office furniture, £192; investments, £68,853; cash, £4,783; research and development, £2,249; preliminary expenses, £18,796; profit and loss account, £1,991; total, £232,451.

Constantinople Telephone.

After providing for the interest on obligations and debt certificates and debiting the 5 per cent. interest on share capital, the full amount of amortisation, together with reserves for renewals, etc., the accounts for 1920 show a loss of £118,431, which makes a total deficiency of £174,025.

The prohibition of the export of mine props from Tunis has been provisionally suspended.

According to the *Trgovinski Glasnik*, in 1920 fourteen new factories were established in Yugoslavia, with a total capital of 48,300,000 dinars, and twenty-six new companies were registered, with a total capital of 168,400,000 dinars.

The May list (compiled by the National City Company) of securities of interest to those holding dollar funds in America may be obtained on application to the London Office, National City Company, 4, London Wall Buildings, E.C.2.

The Bulgarian Press Bureau has issued a communiqué denying the statement made by a Budapest newspaper that the Bulgarian Minister of Commerce has declared to the Inter-Allied Commission of Reparations in Sofia that Bulgaria will not be in a position to fulfil any of the reparation clauses before May 1, 1923.

ROUMANIAN CROP PROSPECTS.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 12.

During almost two months we have had exceptionally dry and windy weather. Spring seeding had to be interrupted, the soil being too hard, and the autumn sowings were in danger. The anxiety was general and intense, as a deficient crop in present circumstances would have been a serious misfortune.

Fortunately, the drought came to an end at the eleventh hour, and during the last fortnight we have been enjoying the long-desired rain throughout the whole country. The autumn sowings now look very promising, and spring seeding is being carried on most vigorously. It is estimated that no arable land will remain uncultivated. Greater Roumania is justified in looking forward to an abundant crop, which will enable large exports of grain in the autumn.

PRUNE INDUSTRY OF BOSNIA.

An interesting article appeared recently in the *Trgovinski Glasnik* dealing with the production of prunes, the most important industry of Bosnia. The writer says:—

There was an average crop in 1920. The fine weather in the autumn during the drying of the prunes had a favourable effect on the quality of production. The prunes were well dried, 105 of those of average quality weighing half a kilo. At the opening of the season the price of prunes was, on the market of Brichko, for example, from 3 to 3.50 dinars a kilo. These prices fell later to 2, 2.50, and 2.75 a kilo, according to the demand.

1,633 wagon loads, each weighing 10,000 kilograms, were brought into the various Bosnian markets up to April 1 last, and 1,537 wagon loads were exported. In addition, 211 wagon loads of prune pulp were received in the markets, and 169½ exported.

The destinations of the exports (the figures representing wagon loads) were:—Other provinces of Yugoslavia, 521; Germany, 614; Austria, 213; Italy, 98; Hungary, 39; Great Britain, 24; Switzerland, 19; Belgium, 7; and Denmark, 2. Nine-tenths of this quantity were probably afterwards exported abroad.

610 wagon loads were exported packed in boxes of 25 kilos., and a smaller quantity in boxes of 5 and 12 kilos. The remainder has been delivered in sacks. The exporters have found, as previously, that only those prunes packed in boxes can safely be sent abroad. The export has, however, been adversely affected by the bad state of rail and river communications, and the sudden increase in the export tariff in the middle of the season contributed to smaller sales.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the three weeks ended April 29:—

The sales of opium during the last three weeks amount to seventy-one cases, from 625 piastres per oke and ending at 790 piastres for extra druggists' manufacturing qualities. The equivalent in sterling is from 9s. to 11s. per lb. The market closes very firm, with an upward tendency. The exchange to-day is weak at 540 piastres per pound sterling for cheque and 0.73 dollars for one Turkish pound of 100 piastres. The arrivals to date are 1,317 cases, against 1,575 at same date last year, and our stock to-day in first and second hands is now 1,164 cases.

CZECHOSLOVAK SUGAR EXPORTS.

The Czechoslovak refineries exported 4,950 wagons of refined sugar in February. Of this quantity 16,174 tons went to Hamburg, 12,434 tons to Austria, 11,643 tons to France, 3,734 tons to England, 2,885 tons to Switzerland, 1,335 tons to Yugoslavia, 487 tons to Trieste, 439.7 tons to Roumania, and the remainder to Hungary, Poland, Germany, and Fiume.

The Banco di Roma has opened a branch at Adalia (Asia Minor).

The traffic receipts of the Smyrna-Aidin railway for the week ended May 14 amounted to £11,769.

The Land and Mortgage Company of Egypt recommends a dividend of 6 per cent., less tax.

The Government of Czechoslovakia has sanctioned the formation of a Czecho-Ukrainian bank, with a capital of 6,000,000 kronen.

PERFUMERY and GOOD TOILET GOODS.

Keen Prices for High Quality. Enquiries solicited.

No. 21, "ECLIPSOL" WORKS, BRISTOL.

London Showroom: CITY PRESS CHAMBERS, 149, ALDERSGATE STREET, E.C.1.

LANCASHIRE COTTON.**Steady Tone.**

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

Owing to the Whitsuntide holiday period business during the past week has been practically at a standstill. Tuesday was the only day on which buyers and sellers attended the market, and even then only a small amount of trade was about. The steady tone of the market, however, has been well maintained to-day, but offers generally have been slow in materialising. A favourable feature has been the stability displayed in raw cotton circles. The wages question in the cotton trade is causing a little anxiety amongst traders, but the general opinion is that an amicable settlement will eventually be arrived at. In any case, there are no fears of a strike. The industrial position is not all that could be desired, and it is only natural that the continuation of the coal strike is seriously harassing trade. With regard to cloth, buyers for Egypt have been about, but only occasional sales have resulted. Better advices, however, are being received from the other side. Scattered transactions have taken place for the Levant and Constantinople, but sales of any weight are hardly ever heard of. Generally speaking, a quiet business has been done. Quotations for Egyptian yarns have been well held, but the offtake has not been satisfactory. Users appear to have enough stocks on hand to meet their immediate requirements. The piece goods trade with India has not been of large dimensions, but here and there fair transactions are taking place for Bombay, principally in dhooties and other light goods. Business with China appears to be gradually improving, but offers are still a long way out. American yarns have ruled fairly steady in price, but the offtake has been patchy. Generally speaking, the market all round has been quiet, but now that the holidays are over it is expected that buying will be resumed on a larger scale than has been the case for some time past.

LIVERPOOL COTTON REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 19:—

As was generally anticipated, only a very small inquiry made its appearance during the past week, and business done was on a very limited scale indeed. Many mills were shut down altogether, and the Manchester exchange was practically closed. The tone was depressing, owing to the continuance of the coal strike and the political crisis in Silesia. The latest news to hand indicates a resumption of negotiations in the coal dispute, but it is early yet to disseminate optimism on this account. An interesting feature of the present situation is that several mills have had their furnaces adapted for oil fuel at small cost, and the results are reported to be very satisfactory. Slightly more c.i.f. business has transpired, the recent weakness in Alexandria having tempted a few bold spirits to cable out bids. The tendency of prices here is again downward, particularly for Sakellaridis. Manchester reports have been lifeless. Total sales, 500 bales. Quotations of upper are reduced 25 points, and Sakellaridis and brown are reduced 50 points on the week. Fully good fair Sakel, 16.00d.

The traffic receipts of the Egyptian Delta Light Railways for the week ended April 20 amounted to £E10,167; total for year, £E18,974. For the corresponding period of last year the receipts amounted to £E11,048 and £E22,928 respectively.

SUDAN AGRICULTURAL NOTES.

(FROM OUR OWN CORRESPONDENT.)

KHARTOUM, April 17.

It is reported from Berber Province that wheat cultivation at Bouga has been most successful. Most of the wheat is being stocked by the natives, but small quantities were sold forward at PT 270 to PT 300 per ardeb of 420 rottles.

Considerable cotton cultivation is reported at Hassa, the yield being estimated at 4 kantars per feddan. Types grown here are American and Sakellarides. Owing to the distance from Berber and the lack of a siding, the railway authorities have arranged to load trucks on the spot. Cotton on Um Tereifi Island is reported as being very good. Picking has been successful on Zeidan Island.

At Damer wheat fell to PT 375 per 420 rottles, barley was PT 115 per 315 rottles, Sakia and Dhurrah Hamra PT 150, Dhurrah Feterita PT 127, and maize PT 120 per 380 rottles. Trade in live stock has been very slack, only 251 head of cattle and 3,391 sheep being sold in Damer market during March, average prices being PT 675 and PT 128 per head respectively. There has been no demand for camels, and prices have fallen accordingly.

EGYPTIAN CROPS.

The *Bulletin* of the Egyptian Ministry of Agriculture gives the following particulars of crop conditions in April:—

Cotton.—The weather was, on the whole, favourable, though changeable. The water supply was ample; in some localities, however, there was a shortage, due, apparently, to the rush to sow during March. In such localities the irrigation authorities took steps to relieve the situation. Ploughing, sowing, and watering the late crop, and hoeing and resowing the early-sown areas were being carried out during the month under review. A considerable amount of resowing has taken place in early sowings. Germination, except in early-sown fields, is satisfactory. Practically all the areas destined for cotton have now been sown. Very slight attacks of cut-worm, *Prodenia*, aphid, and sore-shin have been reported from some districts.

Wheat.—The weather was generally favourable. The condition of the plants is satisfactory, and the crop is rapidly reaching maturity. Rust and smut are reported from all provinces, the damage done being insignificant, except in Daqahliya province, where the attack was particularly severe. Very slight attacks of eel-worm in Sharqiya, saw-fly in Beni Suef, and aphid in Qena and Aswan are also reported. Harvesting has commenced in limited areas in some very early-sown fields. The yield is expected to be slightly above the average.

Barley.—Harvesting, thrashing, and winnowing are actively taking place. The attacks of rust and smut are reported to be insignificant. The yield is expected to be slightly above the average.

Beans.—Harvesting is general in Lower Egypt, while the bulk of the crop in Middle and Upper Egypt has been harvested. The attacks of rust and blight reported last month have since developed in Sharqiya and Qalyubiya, but the damage caused by these, as well as by broomrape, is believed to be less serious than last year. The yield is expected to be below average.

Onions.—The crop is in the last stage of growth in Lower Egypt, while harvesting is now general in Middle and Upper Egypt. The unfavourable weather in Qena during the ripening period has affected the crop. On the whole, the yield appears to be a little below the average.

Bersim.—The weather was suitable in Lower Egypt, Beni Suef, Asyut, and Garga, but rather unfavourable in other provinces of Middle and Upper Egypt. The water supply was ample, except in some localities where the demand for water for the cotton crop was heavy. The fourth cut was being taken in some provinces and drees-making continued. The crop is healthy and its condition is normal.

Sugar Cane.—Planting of the new crop was general during the month under review.

Millet (Séfi).—Ploughing, sowing, and watering were general. The area intended for this crop is expected to be larger than last year.

JAFFA ORANGE TRADE.

A report of the Imperial Ottoman Bank states that the number of cases of oranges exported from Jaffa during March was 66,400 for Liverpool and 97,800 for Egypt, Constantinople, and Smyrna. These consignments were made at from 4s. to 5s. per case.

It is regarded as being unlikely that France will receive as much corn from Roumania as has been contracted for.

According to the *Journée Industrielle*, the Roumanian Government is preparing to modify the Customs tariff with a view to protecting the native iron and steel industry, which is suffering from a lack of foundry coke.

The Algerian Exhibition Fair, which was opened on April 20 by the French Minister of Marine, has proved a great success. Among the numerous exhibits were agricultural tractors and machines of British, French, and American manufacture, this being the most important section of the fair.

MARKET FOR RUBBER GOODS IN TURKEY

No rubber goods of any sort are manufactured in Turkey. Previous to the war rubber tyres and other automobile accessories were supplied by Germany and Austria, but America, England, and France have supplanted the aforesaid countries since the Armistice, with America rapidly taking the lead and France closely following, says an American Consular report.

Distribution in general is conducted as with other accessories—i.e., importers sell directly to the wholesalers, commission men, and large retailers, giving a slight discount according to the quantity purchased. The demand for rubber tyres is proportionate to the automobiles now in use in Constantinople. Their number is increasing continuously. The most popular sizes are 30 by $3\frac{1}{2}$ ins. and 30 by 3 ins.

The demand for rubber boots and shoes is limited to overshoes of a light type. Heavy goloshes and boots are practically unsaleable in this market. The terms of payment are the same as for all merchandise—namely, cash. America and England seem to have supplanted Russia in supplying rubber shoes to Constantinople.

There is also a good market here for raincoats, rubber soles and heels, toys, etc. Raincoats are imported mostly by large department stores from England, France, and Germany, the principal importers being the same as for rubber shoes. Rubber soles and heels have only recently been introduced in this market, but they have been received with favour by the local population because the city's hilly and uneven streets are very trying to the feet.

CURRENT PRICES.

General Produce.—Bacon, 138s. 6d. cwt.; butter, 179s. cwt.; cheese, 138s. cwt.; chillies, 97s. 6d. cwt.; eggs, 15s. 9d. per 120; cloves (Zanzibar), 9½d. lb.; cocoa (Ceylon good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 116s. 6d. cwt.; coffee (East India bold), 115s. cwt.; coffee (Mocha longberry), 92s. 6d. cwt.; coffee (Santos superior), 54s. cwt.; ginger (washed Cochin), 42s. 6d. cwt.; hams, 132s. cwt.; lard, 70s. 7½d. cwt.; nutmegs (110's to 80's), 11d. lb.; pepper (Singapore black), 3½d. lb.; pepper (Muntok white), 8½d. lb.; raisins (Valencia), 110s. cwt.; currants (Vostizza), 77s. cwt.; sultanas (Smyrna), 135s. cwt.; sugar (granulated), 62s. 7½d. cwt.; sugar (No. 1 cubes), 67s. cwt.; sugar (white Java), 59s. cwt.; sugar (West Indian crystallised), 55s. 6d. cwt.; sago (small pearl), 25s. 9d. cwt.; sago flour, 14s. 9d. cwt.; rice (Rangoon No. 2), 16s. 9d. cwt.; rice (bran Rangoon), £5 12s. 6d. ton; tea (Indian), 6½d. lb.; tea (Ceylon), 6½d. lb.; tea (Java), 3½d. lb.; wheat (Australian), 81s. 10½d. qr.; wheat (English white), 89s. 6d. qr.; wheat (La Plata), 77s. 6d. qr.

Chemicals.—Acids: Boric, 71s. 6d. cwt.; oxalic, 10d. lb.; citric, 2s. 6d. lb.; tartaric, 1s. 8½d. lb.; ammonia (sulphate), £20 5s. 6d. ton; arsenic (white powdered), £46 10s. ton; benzole (standard), 2s. 11½d. gallon; bleaching powder (35 per cent.), £20 10s. ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 139s. cwt. Rubber: Plantation (No. 1 crêpe), 10d. lb.; smoked sheet, 9d. lb.; fine hard Para, 10½d. lb.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Bicycles.—The Director-General Postal Administration, Alexandria, invites tenders for the supply of a bicycle and 20 to 30 tricycles. Specification can be obtained from the Egyptian Government Agent, Queen Anne's Chambers, Westminster, S.W.1. June 1.

Crane Chains.—The Inspector, First Circle of Irrigation, No. 6, Sharia Tewfik, Cairo, invites tenders for the supply of two 1-in. diameter Admiralty test BBB crane chains, 11 metres long each, two 1½-in. diameter Admiralty test BBB crane chains, 9 metres long each, to be supplied to Irrigation Office at Shubra by July 30, 1921.—June 11.

General Stores.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of general stores required for the second half-year 1921-1922. June 13.

General Stores and Clothing.—H.M. Commercial Agent for Egypt reports that tenders will be received by the Director of Stores, Frontier Districts Administration, Alexandria, for the supply of general stores and clothing. The tenderer must have an agent resident in Egypt. June 14. (D.O.T.)

Rope, Etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of ropes, canvas, etc., required for the second half of the financial year 1921-1922. June 15.

Yugoslavia.

Dynamos, etc.—The Commercial Secretary to H.M. Legation at Belgrade reports that he has received an inquiry from a local contractor in regard to plant, etc., required for the electrical lighting of a town in Yugoslavia. The inquirer states that he is desirous of obtaining offers from United Kingdom firms for two dynamos of 40 kilowatts each and 50 kilometres of overhead cable, etc., for the supply of current to about 1,200 houses. The name and address of the inquiring firm may be obtained on application to the Department of Overseas Trade, 35, Old Queen Street, S.W.1.

Motor Boats.—The Commercial Secretary to H.M. Legation at Belgrade reports a call for tenders for the supply of motor-boats, to be used for inspection purposes on the Danube and its confluent. The boats must carry five persons and be fitted with petrol motors of 20 to 30 h.p., and have a maximum draught of 50 centimetres. Movable covers to form cabins must be fitted. Hulls may be of wood or metal, and if of wood must be oak or pitch pine. Prices should be quoted for six or ten boats. Date of delivery, speed of boats in calm water, fuel consumption, drawings and photographs, and all other necessary particulars must be sent with tenders. Prices must be quoted f.o.b. works or port of despatch, and, in addition, cost of transport between works or port of despatch and Belgrade or Galatz. These last quotations (for transport) will not be binding on the contractor, but should be estimated from inquiries made from different transport agencies. The contractor whose offer is accepted must deposit, if a subject of Yugoslavia, 10 per cent., if a foreigner, 20 per cent. of the total value of the contract. It is also necessary that tenders bear a 10 dinar duty stamp.—June 4 (D.O.T.).

Dredgers, etc.—The General Direction of Waterways, Department of the Yugoslavian Ministry of Agriculture and Waters, invites tenders for the supply of two chain bucket dredgers, one tug boat, and eight lighters provided with means for discharging contents downwards through hull. The successful tenderer must deposit, if a Yugoslavian subject 10 per cent., if a foreigner 20 per cent. of the total value of the tender. All tenders must bear a 10 dinar duty stamp, and should be addressed to the General Direction of Waterways, 81, Krunaka ulica, Belgrade. June 6 (D.O.T.).

India.

The High Commissioner for India invites tenders for the supply of screw couplings. The conditions of contract may be obtained on application to the Director-General of Stores, India Office, Whitehall, S.W.1. June 2.

Pipe Lines.—The Bombay Corporation invites tenders for the construction of about 105 miles of steel and reinforced concrete pipe lines, 72 in. to 57 in. in diameter (sections 2 and 3). July 26.

Metals.—The Madras and Southern Mahratta Railway Company invites tenders for the supply of metals (antimony, brass, copper, lead, and zinc). May 31.

The Czechoslovak authorities have decided to abolish the system of import and export licences, with very rare exceptions, as from June 1.

Travellers to the Near East

Can obtain all information as to the journey from the Manager, **Continental Enquiry Office,** Victoria Station (S.E. & C.R.), S.W.1.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, May 7.

The market continues in a state of stagnation. The preparations made in view of the resumption of hostilities in Anatolia have led to the tightening of the restrictive measures on both sides, so that the trade of Constantinople even with the neighbouring localities is interrupted. Consignments of goods for Roumania have relieved the congestion to a certain extent, but the sales have mostly been effected at a loss. We anticipate the despatch of merchandise to the Caucasus by Novorossisk and Batoum, although normal conditions are far from being established there. The financial stringency continues.

As regards manufactures, the sales of the week have been insignificant, despite the approach of the holidays. Prices continue to fall.

Produce: Sugar.—The fall in prices goes on as the result of offerings from Java, where the crop is good. Holders here are in consequence trying to dispose of their stocks, which amount to about 2,000 tons. Quotations are:—Java, July shipment, £29-30 per ton; Dutch, £39-40 per ton; in Customs, £T34½-35 per 100 kilos.

Rice.—The demand on the markets of Marseilles and Rangoon has stopped the decline in values. The price here is Ps.17 per oke.

Coffee.—The market is weak, with a tendency to fall.

JAFFA.

The report for March states:—Compared with the previous month, the market in cereals has been marked by a certain animation as a result of the permission granted by the local government for the export of the surplus stock. The approaching crops promise to be good, the climatic conditions having been favourable for agriculture up to the present.

As regards manufactures and cotton goods, the situation is practically unchanged, this being due to the position in the European markets.

Following the fall in the price of olive oil at Smyrna, this commodity has declined on our market. The jar of olive oil of 16 okes is now quoted at PT.150. Holders in this region, hoping for an increase in price shortly, are retaining their stocks.

BANK OF SOFIA.

ON 'CHANGE.**Business Very Restricted.**

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday Night.

With the coal strike still with us, any appreciable improvement in the various markets is scarcely to be looked for. During the past week a dull tone has prevailed in nearly every group, and no doubt the same tale will have to be told until a settlement is reached.

In the gilt-edged group the 5 per Cent. War Loan has been a firm spot, and is closing at 88½. Consols are steady at 47½, a rise to-day of ½, while Funding Loan and Victory Bonds are respectively 71½ and 79½. The Sudan 5½ per Cent. Loan stands at 93, a premium of 1, while the new Indian loan is at a premium of 3 15-16.

Industrials have presented a neglected appearance. Business is down to the smallest dimensions, and it is evident that would-be buyers intend to hold their hands until the situation is less obscure. The result of the prevailing inactivity is to give an irregular aspect to quotations, in many cases there being a further decline on the week. The Shipping section has been rather firm, with P. and O. deferred at 339.

Oils have been dull, with the exception of one or two shares, but this market should not be long in showing activity in view of the increasing utilisation of the commodity. When the revival comes it is to be expected that there will be an appreciable rise in the leading counters. There is nothing new to be said with regard to Rubbers, which will continue to stagnate until there is a world trade revival.

Near Eastern securities have generally been firm, Egyptian Guaranteed 3 per cent. are 67½, Greek Guaranteed 2½ per cent. 1898 66½, at which there are buyers, while Turkish Guaranteed 4 per cent. 1855 are 71.

Greeks have been dull. The 5 per cent. 1881, and the 5 per cent. 1884 Loans are 38, while the 5 per cent. 1890 closes at 39. Fundings are 36, and the 1910 Loan is as low as 29. The 5 per cent. 1914 Loan is 34, while the 1902 Loan is 35.

Land shares have been weak. Beheras are 8½, while the preference shares are 3. Anglo-Egyptian Land Allotments are unaltered at 3½, and Egyptian Consolidated Lands are 1s., at which there are sellers. Delta Lands are 6s. 9d., Gharbieh Lands are 1½, and New Egyptians are 22s. 6d. Union Foncières are 2½, and Sudan Plantations are 3½.

Oils have been rather featureless. Anglo-Egyptian are 1½, Phoenix are 12s., and Roumanian Consolidated 13s. 9d. Burmahs have been done at 7, while Steaua Romana have come to business round 15s.

Among Miscellaneous descriptions Abyssinian Corporations are 2s., while Alexandria Waters are 6½, at which there are sellers. Morums are unchanged at 11s., while Egyptian Salt and Soda are 28s., and Egyptian Markets 18s.

Banks have been steady. Agricultural 3½ per cent. Bonds are 51, while the 3½ per cent. Guaranteed Bonds are 53. Imperial Ottoman Banks are 9, at which there are buyers, National Bank of Egypt are 17½, while Land Bank of Egypt are 5.

TRADE OF PERSIA.

The total imports of Persia in 1919-20 amounted to 629,792,656 krans, as compared with 476,286,793 krans in 1918-19. Total exports also showed an increase with 367,817,353 krans, as against 270,868,943 krans. Imports from the whole of the British Empire showed an increase of 65,197,576 krans over the figures for 1918-19. The principal increases were in cotton and other piece goods, cotton yarns, and clothing, etc. Decreases were recorded in sugar, tea, spices, and rice.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on May 5 were as follows:—Agricultural Bank of Egypt, £41; Alexandria Water Co., Ltd., £6 9-16; Anglo-American Nile Steam, £3; Associated Cotton Ginners, £23-32; Banque d'Orient, Fr. 59; Behera Ord., £E8; Behera Priv., £3 3-16; Bonded Stores, £9 15-16; Brasseries d'Egypte, Fr. 115; Building Lands of Egypt, £11-16; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com. d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 7,700 ex; Credit Foncier Egyptien, Fr. 587; Credit Foncier 1885 Oblig., Fr. 322; Credit Foncier 1903 Oblig., Fr. 228; Credit Foncier 1911 Oblig., Fr. 229; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 75; Eaux du Caire Jousance, Fr. 100; Egypt and Levant S.S. Ord., 27s. 7½d.; Egyptian Delta Light Railways, £4½; Filature Nationale d'Egypte, £10½; Gabbari Lands, £9-32; Immeubles d'Egypte Soc. an des., £5 1-16; Khedivial Mail S.S. Co. Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2½; Kom Ombo Ste. An. de Wadi, £4½; Kom Ombo Ste. Fondateur, £35; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 41½; Menzaleh Canal Navigation, Pt. 274 ex; Nungovich Hotels, £6½; Ramleh Railway, £1 25-32; Salt and Soda, 27s. 9d.; Tram. d'Alexandrie Priv., Fr. 38½; Tram. d'Alexandrie Div., Fr. 52; Union Foncière d'Egypte, £2 5-32; Egypt Hotels, £2 3-64; Urbaines et Rurales, £3.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 16:—

During the week ending May 7 light to moderate rain has fallen. Crop prospects fair to good generally, except in North-West Frontier Province and unirrigated areas of the Punjab, where more rain badly wanted. Bombay cotton market firm; fine M.G. Oomra, May, Rs. 267; July, Rs. 285. Cotton arrivals from September 1 to May 6 were 1,985,000 bales, as compared with 2,543,000 bales during the corresponding period of the last year. In Bombay piece goods market wholesale demand remains fair, but retail inquiry improving, particularly in prints and dyed goods. Calcutta jute and gunny markets unchanged. Weather for new jute favourable, and plants growing well. Weeding in some districts nearly completed. Rangoon Paddy arrivals fallen off during last week owing to railway strike, but rates firm at Rs. 195 to Rs. 198 per 100 baskets of 46 lb. each. With regard to white rice, no business in specials, which quality millers unwilling to sell; but rates for small mills quality ranging from Rs. 495 to Rs. 510—May delivery—per 100 baskets of 75 lb. each. At tea sale on May 10 offerings in good quality teas were few, being mostly of unattractive clearing up nature. 811,869 packages sold to date at an average price of five annas two pias per lb. Next sale will be on May 31. Survey of Ghughli-Chuiraha Railway in Gorakhpur district in the United Provinces—11 miles on metre gauge—by Bengal and North-Western Railway Co. sanctioned. No change in bank rates.

Union Foncière d'Egypte.—Dividend of 3s. per share, payable June 1.

The National Bank of Turkey has opened an agency at Pera, Constantinople.

Suez Canal Company.—The dividend on the ordinary shares for 1920 has been fixed at 243.851 frs. net (about £5 6s.).

As a result of the great success of the Prague Industrial Fair, the Czechoslovak authorities have decided to establish an Orient Fair at Bratislava (Pressburg), Czechoslovakia's principal port on the Danube.

Egyptian Markets.—First five per cent. debenture coupons No. 45 falling due June 1 are payable at the Anglo-Egyptian Bank, Ltd., 27, Clements Lane, London, E.C.4, at the face value, and at the branch offices of the Anglo-Egyptian Bank, Ltd., at Cairo and Alexandria, at the current rate of exchange.

SHIPPING INTELLIGENCE.

GERMAN GOODS IN ALLIED BOTTOMS.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, May 10.

While at Varna last week I visited the Customs and found there a great quantity of merchandise, mainly from Great Britain, Italy, and Germany. As regards the goods from Germany, it is interesting to note that almost all German merchandise destined for Constantinople and the Black Sea ports is carried by the "Franco-British" line of steamers. This line has not been long inaugurated, and it is rather ironic that, while Allied traders in Bulgaria are finding it increasingly hard, owing to the rate of exchange, to sell their goods, the ships flying the Allied flag are weekly transporting ex-enemy goods to the Balkans.

A great improvement has recently taken place in the time taken by British goods to reach this country, and last week a tractor, intended for the trials, accomplished the journey from Liverpool to Varna in nineteen days.

CORINTH CANAL RECEIPTS.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, May 7.

There was an increase in the profits of the Corinth Canal Company in 1920, the figures being 1,444,000 drachmæ, as against 1,081,400 drachmæ in 1919. The dividend is raised to 3.50 drachmæ, as against 3 drachmæ in 1919.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. *Olympia*, for Bombay [taking cargo for Karachi and coast ports] (Liverpool, May 31).

Anchor-Brocklebank Line.—S.s. *Masirah*, for Calcutta (Birkenhead, June 8); s.s. *Imani*, for Port Said, Colombo, Madras, and Calcutta (London, June 18).

Bibby Line.—S.s. *Herefordshire*, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, June 8).

Clan Line.—S.s. *Clan MacTavish*, for Colombo, Madras, and Calcutta (Birkenhead, June 9).

Cunard Line.—S.s. *Tyria*, for Gibraltar, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool and Manchester, June 1; Glasgow, June 6; Swansea, June 8).

Ellerman Line.—S.s. *Egyptian*, for Gibraltar, Malta, and Alexandria (Liverpool, June 8); s.s. *Belgravian*, for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, June 11); s.s. *Gerano*, for Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool, June 16).

Ellerman's "City" Line.—S.s. *City of Exeter*, for Bombay and Karachi (Birkenhead, May 27); s.s. *City of Manchester*, for Calcutta (Birkenhead, June 3); s.s. *City of Alexandria*, for Bombay and Karachi (Birkenhead, June 25).

Ellerman's "Hall" Line.—S.s. *City of Baroda*, for Bombay, Karachi, and the Punjab (Liverpool, June 3).

Ellerman's "Westcott and Lawrence" Line.—Regular sailings fortnightly to the Mediterranean, Egypt, and Levant ports.

Glen Line.—S.s. *Glenamoy*, for Port Said, Penang, Port Swettenham, Singapore, etc. (London, June 2); s.s. *Glenade*,

for Port Said, Penang, Port Swettenham, Singapore, etc. (London, June 16); s.s. *Glentara*, for Port Said, Penang, Port Swettenham, Singapore, etc. (London, June 30).

Harrison Line.—S.s. *Electrician*, for Calcutta (Liverpool, June 2); s.s. *Professor*, for Port Said, Port Sudan, Aden, Mombasa, etc. (Glasgow, June 2; Birkenhead, June 9); s.s. *Patrician*, for Calcutta (Liverpool, June 18).

Henderson Line.—S.s. *Arracan*, for Port Said and Rangoon (Birkenhead, June 1); s.s. *Henzada*, for Port Said and Rangoon (London, June 15).

Holt Line.—S.s. *Teiresias*, for Port Said, Penang, Port Swettenham, Singapore, etc. (Birkenhead, June 2).

Johnston Line.—A steamer will sail from Liverpool on June 11 for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila.

Maindy Line.—S.s. *Maindy Transport* for Antwerp and Moroccan ports (London, middle of June).

Moss Line.—S.s. *Sitra*, for Gibraltar, Algiers, Malta, and Alexandria [transhipping to Moroccan, Cyprus, and Syrian coast ports] (Liverpool, May 28); s.s. *Siptah*, for Gibraltar, Malta, Piræus, Syra, Smyrna, Salonika, and Constantinople (Liverpool, June 18).

Papayanni Line.—S.s. *Bosnian*, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, June 25).

P. and O. Line.—S.s. *Novara*, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, June 3); s.s. **Karmala*, for Bombay (London, June 3); s.s. **China*, for Bombay (London, June 10). *Taking cargo for Gibraltar, Port Said, and Aden (with transshipment at Bombay) for Indian coast and Persian Gulf ports.

P. and O. British India Line.—S.s. **Hatimura*, for Colombo, Madras, and Calcutta (London, June 4); s.s. **Trefusis*, for Bombay and Karachi (London, June 4); s.s. **Tanfield*, for Bombay and Karachi (London, June 18); s.s. **Mashobra*, for Colombo, Madras, and Calcutta (London, June 24); s.s. **Merkara*, for Bombay and Karachi (London, July 1); s.s. **Mandala*, for Colombo, Madras, and Calcutta (London, July 8). *Taking cargo for Port Said, Suez, and Aden; †taking cargo for Persian Gulf and Malabar coast ports.

Prince Line.—S.s. *Soldier Prince*, for Tunis, Malta, and Alexandria [taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Lattakia, Alexandretta, Mersina, and Cyprus ports] (Manchester, June 3).

FOREIGN EXCHANGES.

There have been some interesting movements in the exchanges during the week. New York and Teheran are unaltered at 4.00 dollars and 51 kranas to the £ respectively, but Belgrade has shown a decided step towards parity, improving 13 dinars during the week. Athens has been weak, and so far the official control has not succeeded in stabilising the rate. Sofia is also a shade weaker. On the other hand, Bucharest has continued to improve, and is now 227, as against 230 last week.

Country.	Method of Quoting.	Parity of Exchange.	Latest Quotations
Alexandria	Piastres to £	97½	97½
Athens	Drachmæ to £	25·22½	74·25-74·75
Belgrade	Dinars to £	25·22½	120-125
Bombay	Sterling to Rupee	24d.	1·3½-1·3¾
Bucharest	Lei to £	25·22½	226-228
Calcutta	Sterling to Rupee	24d.	1·3½-1·3¾
Constantinople	Piastres to £	110	493-513
New York	Dollars to £	4·86½	4·00-4·00½
Paris	Francs to £	25·22½	45·60-45·65
Prague	Kronen to £	24·02	269-272
Romé	Lire to £	25·22½	71¾-72
Sofia	Levas to £	25·22½	323
Teheran	Kranas to £	50	51
Vienna	Kronen to £	24·02	1,500-1,600
Warsaw	Marks to £	20·43	3,500-3,550

In some cases quotations are nominal.

OIL OUTPUTS.

Anglo-Egyptian.—Week ended May 13, Gernsah, 58 tons (previous week, nil); Hurgada, 3,588 tons (against 3,608 tons).

Profits in Foreign Exchange Dealings.

An expert writer has compiled for us a series of Articles explaining Foreign Exchange transactions from the English Investors' point of view. The writer explains the Exchange value of the English £, shows an actual transaction resulting in 60 per cent profit, explains the profit possibilities of the French franc, the German mark, the Italian lire, &c. This Article will be sent free of charge by

NOTES OF THE WEEK.

Greece and the Dardanelles.

Greece is entitled to sympathy over the anomalous attitude of the Allied Powers. As the Athens Government shrewdly points out in a Note with regard to the neutralisation of the Dardanelles, Constantinople and the Straits have been occupied as a consequence of the war, and that occupation is now cited as a ground for the neutralisation in a continuation of the war undertaken at the Allies' request. The weakness in the argument is that the war and any mandate given by the Powers to Greece came to an end logically, if not officially, with the London Conference. From that point the Greek Government has been acting on its own initiative, but it has a grievance in the fact that the Allied Powers have not made their attitude clear, nor used their authority to end an impossible situation. It is not fair to Greece, owing to the Powers' pique against King Constantine, to leave her to retrieve her mistake alone. The present indeterminate state of affairs is benefiting no one, while it encourages the Kemalists to proceed to extremes.

The Need of a Policy.

We are unwilling, however, to believe that it is too late to secure a real settlement in the Near East. Angora has taken a step farther towards Moscow; Mustapha Kemal Pasha has dismissed Bekir Samy Bey, and has installed as his Grand Vizier General Fevzi Pasha, who headed the successful mission to the Soviet Government. But the alliance between Turks and Bolsheviks is purely artificial and a temporary expedient. For all their fulminations against the Allies in general, and the British in particular, the Kemalists want peace and settled conditions. But while we offered them terms in London, we allowed the Greeks to attack them, and at the root of the anti-British outbursts is the belief that Great Britain is helping the Greeks. The truth is, that the British Government is doing nothing in regard to the Greco-Turkish War, and both parties are as aggrieved by inaction as they would be by a definite line of policy in one direction or another. But whereas such a policy might bring the present chaotic state of affairs to an end, the habit of *laissez faire* merely aggravates it.

India and Angora.

Much has been heard during the last few years of the closeness of the ties with which Moslem India considers itself bound to Turkey, and a Moslem deputation has even journeyed all the way to England to protest against

the terms of the Treaty of Sèvres. In so doing Indian Moslems have associated themselves with Angora almost more than with Constantinople, under the impression no doubt that Mustapha Kemal Pasha and his followers stood more actively for the policy of a regenerated Turkey when once the country and people had been given a fair chance on an independent basis. The news, therefore, that an Indian has been put to death by the Angora authorities on the charge of espionage is calculated to make an unpleasant impression on Indian Moslem opinion. Of the details of the case little is likely to be known. Mustapha Saghir claimed to be an Indian sympathiser with the Turks; he came under the suspicion of the British authorities in Constantinople, but was allowed to proceed to Angora on the self-imposed task of bridging the gulf between the Nationalists and the British. The object was a worthy one, and to our knowledge has appealed to more than one Moslem British subject. But at Angora Mustapha Saghir was held to be a spy, and, in spite of the fact that no state of war exists between Turkey and Great Britain, was condemned to death and executed on May 24. Just as the general actions of the Angora Administration are causing in England a revulsion of feeling against the Nationalists after their skilful diplomacy in London, so, it would be imagined, this judicial murder will affect the attitude of Moslem India towards them. Once more it may become necessary to distinguish between the real Turkey and a handful of officials who grasp the reins of power. Until the latter acquire political sense and aspire to efficiency in administration Turkey, it is to be feared, will continue to suffer for the sins of her rulers.

The Cyprus Agitators.

The letter from our Cyprus Correspondent, which appears on another page, gives some particulars of the latest phase of the Union-with-Greece movement in that island. Our Correspondent draws attention to one of the weakest in the many weak points in the agitators' case: the refusal of the Greek members to attend the Council, where they could legitimately oppose any measures to which they object—such as that for the suppression of seditious publications. Apparently the fear of losing the occupation which has afforded them so much pleasure, and has enabled them to make such prolonged tours abroad under the most comfortable conditions, has caused the leading agitators to say good-bye to any sense of humour they ever possessed, or they would surely see how illogical is their attitude in this respect. It is to be hoped that the Government will not for a minute consider the request for a special commission to inquire into the situation. It has its accredited

representative on the spot, supported by able officials, and he and they are well able to keep it informed as to the real state of affairs. There is therefore no justification at all for incurring the expense of a Commission.

The Narodny Club.

In commenting upon the passing of the Draft Constitution by the Yugoslav Assembly, our Zagreb Correspondent referred to the Narodny Club's protest against it and even against the authority of the Assembly itself. The protest was not a very effective one; for, as that experienced politician M. Pashitch promptly pointed out, it was decidedly belated; and though the protestants might argue that they could not have expressed their considered opinion on the Draft Constitution earlier, no such argument could apply to the standing of the Assembly. Moreover, it is useful to remember that the Narodny Club cannot by any means claim to represent the whole of the Croats; for there are Croat members of the Democratic Party who voted for the Constitution, as did also the Mohammedan Croats of Bosnia. The protest, in fact, seems singularly futile, and the attitude of those who made it is, as our Correspondent suggests, hard to understand. Yet it is not to be doubted that the party contains many members whose patriotism is quite above suspicion. Probably they take the view that the country is not ripe for centralisation, and regret the disappearance of the old form of Home Rule, of Ban and Diet. It is to be hoped that the future will show their misgivings to have been entirely misplaced, and that they will soon find it possible to work wholeheartedly with their fellow Yugoslavs.

Fall of Zia ed-Din.

For some time past there have been signs that all was not well with the Persian Cabinet. Two or three portfolios changed hands quite recently, and there were other indications that Seyyid Zia ed-Din was finding his task more difficult as time passed and the first enthusiasm of the people for his policy began to fade away. Now, less than three months after taking office as Prime Minister, he has been dismissed by the Shah, and is reported to be going to Baghdad—where, it may be noted, a number of other Persian politicians and officials have from time to time drunk the waters of exile before him. According to the most trustworthy reports available at the time of writing, his fall has been brought about by Colonel Riza Khan, who advised the Shah that he was no longer trustworthy, and probably took the necessary precautions to make sure of his advice being accepted. In fact, it looks very much as if the Minister for War has brought off his third *coup*; and it is perfectly clear that he is at the present time virtually Dictator. It is reported that "he now has the support of some elements which were opposed to the reforms introduced by the late Prime Minister"; a fact which will arouse no surprise.

Underlying Causes.

In what way Zia ed-Din was regarded as being untrustworthy by the commander of the Cossack Division is not definitely stated, but it seems that the Cossacks were more impatient to get rid of the British officers and the foreign advisers than was the Prime Minister. The Soviet's representative is reported to have protested against the presence of British officers with the Persian force at Resht, and perhaps the transfer, temporarily, of some officers from South Persia to the North may have had something to do with the business; but it can only have been a minor contributing cause, and the probability is that the real clash was between military impetuosity and civilian caution in the matter of getting rid of the foreign advisers, with a considerable spice of personal jealousy thrown in. That those ex-officials and Ministers who have suffered by the vigorous operations of the new Democratic broom have contributed *con amore* to the success of this latest *coup* is not to be doubted, but it remains to be seen how far they will be able to benefit by it. For the sake of Persia, and especially of its southern trade, it is satisfactory to note that so far no disposition has been shown to demand the withdrawal of the British officers from the South

Persia Rifles. That force is young, and it has had its trials and its bad moments; but it has done some remarkably good work, too; and if its officers are given a chance we may confidently expect to see it made in time into a really first-class machine.

The Sikh Shrines in the Punjab.

The acute difficulties which have arisen regarding the wealthy endowments of the Sikh shrines in the Punjab are not going to be settled as promptly as was at first anticipated by the Government, and there is some reason to expect that this particular dispute may develop into a controversy over religious property in general, almost the thorniest question which confronts the Indian people. The story of the Punjab case is briefly that the reform party among the Sikhs, being dissatisfied with the management of the endowments, organised a movement to seize the property by force, some of the ecclesiastics in possession decided to meet violence with violence, and in one case much blood was shed in circumstances which shocked the whole country. The Government brought up an emergency Bill to appoint a Board of Commissioners with wide powers over the endowments in dispute, and hoped to pass the measure in April. Opposition however developed, the Bill was postponed for a month in the hope of securing unanimity, and when the appointed day drew near an announcement was issued which suggests that the Bill is dead, though it can still be brought before the legislature "if, after further discussion, it appears advisable."

"Proximus Ardet."

The real interest of the question lies in the nature of the opposition which developed so rapidly. The Sikh Reformers opposed the Bill because the Board of Commissioners was not packed in favour of their views, an attitude common enough in India, and indicating only the political backwardness of those who adopt it; but, apart from those immediately concerned, it became evident that both Moslems and Hindus regarded the interference with endowments as a dangerous precedent. Both communities have rich endowments of their own, and if the management of the Sikh shrines comes under public scrutiny to-day, nobody can doubt that the religious property of the whole country must sooner or later pass under some form of public control. That object is openly aimed at by many politicians, but it has not yet secured much popular support, and it has to contend with the hostility of the ecclesiastical organisations. It is quite possible, therefore, that by-and-by Hardwar and Benares may be drawn into the political field, and that the provincial legislatures may for a time be divided into parties on definitely religious lines. We should be sorry to see this happen until the legislatures have found their feet more firmly, for religious politics usually mean troubled waters, but reformers are not likely to be daunted by that consideration, and the possibility is one to bear in mind.

A Question of Taste.

It was announced last week that Mr. Oscar Asche had purposed producing "the spectacular play 'Mecca'" at a London theatre, but that the Lord Chamberlain refused to pass the play unless the title were altered, on the ground that it might wound the susceptibilities of the Moslem community. The Lord Chamberlain's decision has been criticised by a gentleman interested in the production, who professes his utter inability to understand it, and points out that it has been produced (under his own direction) in the United States. This gentleman's inability will not be shared by many people who have travelled in Moslem lands, and who know how extraordinarily susceptible is Moslem feeling at the present time. The United States have not to consider that feeling as the British Empire has and—very rightly—does. In any case, good manners should surely prompt us to avoid wounding anybody's feelings if possible; and just as we should not expect a British presentation of "The Mikado" in Japan, or in any Far Eastern British colony, so we do not expect to see a "spectacular play" of the modern type put on in London with a title likely, in such association, to cause pain or annoyance to any of our Moslem fellow subjects.

THE WEEK AT HOME.

LONDON, Monday Evening.

Coal and Oil.

The coal conference has taken place. But nothing happened. It had been hoped that the informal discussions of the week before last, over which such elaborate secrecy was maintained, would have worked out the preliminary details of a settlement, but the parties were no nearer to an agreement than before when they met openly face to face. Neither had any fresh proposals to offer, both were in an equally bad temper, and it was evident that the deadlock would continue if left to themselves.

The Government, therefore, made certain proposals for a temporary settlement during which work should be resumed, to be followed by a conference which would consider permanent terms. There the matter stands at the moment. It cannot be said that the proposals are hopeful; it looks as though neither owners nor miners care a jot about the public interest, and are only concerned with ruining each other.

Meanwhile oil continues its advance; after two months' coal stoppage the train service is being improved, thanks to the conversion of electric plants and locomotives to oil. It is probable that oil will be retained as a permanent source of power, or at least as an alternative. Some business men, however, point out that it will render the financing of our trade with America more difficult, as a great part of our industrial oil will be imported from the United States, and from the point of view of national defence our increased dependence on sea-borne power is not altogether reassuring.

Ireland.

When the preliminary signs of a concordat between Ulster and Sinn Fein were announced two or three weeks ago, it was anticipated that the extremist elements of Sinn Fein would do their best to wreck any chance of a settlement by a further outbreak. The prophecy was correct. Last week the beautiful Custom House at Dublin, a triumph of Irish architecture, was burnt down by an armed gang, and the fire-station was also seized, in order to prevent the flames being put out. This act of political arson, however, has over-reached its mark; it has revolted many of the Sinn Feiners, and been roundly condemned by the Nationalists.

The Ulster Parliament has now been elected, and forty out of fifty-two members are Unionists. There are widespread stories of personation and corruption, but these probably apply to both sides. British Liberals are surprised and rather disappointed at the result, for it has always been their contention that the Unionist majority in Ulster would be rather small. The figures show that the partition of Ireland was the only possible policy at the moment. The construction of any form of national union will be a long and difficult process, but Ireland now has her fate in her own hands. She can no longer logically blame England for her troubles. But no doubt she will continue to do so.

More Postal Trouble.

The new Post Office charges announced last week will cause trouble. A postcard is now to cost three-halfpence, which is three times the pre-war rate; far too much. The public will take the remedy in its own hands, write fewer postcards, and the revenue will diminish. The newspaper rates have again been increased, which ensures a bad Press; and the Sunday service, which has made the country tolerable for week-enders, will be dropped—also the Sunday collection, which makes the Monday post useless. The bureaucratic idea is to make the public pay more for less service—a hopeful proceeding. It is proposed to make these changes operative without a debate in Parliament—which shows that bureaucracy is tyrannical as well as incompetent. Well may the advocates of nationalisation pray to be saved from their friends.

The Theatrical Slump.

The London theatres are in a deplorable condition this summer, and the coal strike seems to have given

them the *coup de grace* by cutting off suburban patrons. But the trouble has been growing for a long time past, and coal, as somebody with a taste for mixed metaphors remarked, is only the last straw of a sea of troubles. Rents have increased; so have salaries and wages. The limelight man, the stage carpenter, the "noise without" man, and all the invisible accessories want more money; the fiddler and the big drum want more; the supers want more: the leading lady (who already earned more than a Cabinet Minister) likewise demands her war bonus. But the public objects to pay more—mainly because the average show is so poor. The result is that the theatre is largely a subsidised industry, run by rich men as an amusement—not a healthy state of affairs. The decline in quality dates from the war, when audiences were anything but critical and wretched pieces ran for months without a change. Those days have gone for ever, and the theatre will have to reform itself if it is to improve its status. There is a great deal of talk, most of which is mere grumbling, but no substantial remedy is proposed.

Emigration.

One result of the European upheaval of 1914-18, and the Labour upheaval of 1918-21 is an increase of emigration. It is the historic remedy of England, which appears at the top of every wave of unrest—men of all classes are beginning to go to the colonies and protectorates. It is usually an exodus of young bachelors, although some take their wives, and others take other people's wives; and it is mainly the enterprising and energetic who do not quite fit into the routine work at home. There is no concerted or official plan of emigration, and it is by no means all directed to British possessions; South America, China, and other foreign countries are coming in for a good share. The movement has been foreseen by those familiar with English history, and it is now gathering momentum every day.

Sport.

The country seems to have forgotten its troubles in a mania for sport. This week the Derby will be run, to the accompaniment of motor-charabancs and an aeroplane patrol. Last week the American golfers, who announced their intention to come, see, and conquer, were eliminated one by one; so also were our champions, and an unknown local player won the day. At cricket we seem fated to be less fortunate. The first Test Match opened on Saturday, and England made a miserable show at the Trent Bridge ground. The Australian bowling was altogether too good for our men, and in the hundredth match of the series the Mother Country was where the Germans wanted to put her—in the dust. If the High Command at Berlin had produced an Armstrong and a Gregory instead of a Hindenburg and Ludendorff, the "break through" would possibly have been accomplished.

A Profiteer Story.

A successful profiteer recently went to buy another new motor. His eye rested longingly on various sumptuous cars with a superfluity of glass windows, but all were sold. But at last he saw in the distance the very thing he wanted—large, conspicuous, and, above all, plenty of glass, so that the mere pedestrian could see the profiteer in all his glory as he sat within. "I'll

Leaders of the World's Office Equipment and Filing Systems.

THE Shannon LIMITED

Head Offices:—
ROPEMAKER ST., LONDON, E.C.

Succursale au Caire, EGYPT. TEL. 1966. P.O.B

have that," he said, with the decision proper to great captains of industry. "I'm afraid it's hardly suitable," protested the suave but disconcerted motor showman. "Whatyer mean—can't I buy what I like?" said angrily the profiteer, justly infuriated by the suggestion that his taste was not of the best. "Well, you see, sir," stammered the showman, "I mean it is hardly suitable just yet. It is—the fact is—if you will forgive my mentioning it—it's a motor-hearse." It may have been the same profiteer who was advised by an artistic friend to buy a replica of the Venus de Milo for his drawing-room. When the replica of the famous statue arrived and was displayed, the recipient could not conceal his wrath; he forthwith wrote a strong letter to the railway company complaining that, owing to their carelessness, the two arms had been broken, and putting in a heavy claim for damage in transit. The railway company paid up. They, in turn, made a claim on the insurance company. And the insurance company paid up.

The Week's Books.

"The Memoirs of Count Witte" (Heinemann) are the remains of a posthumous autobiography. The Russian statesman's papers were ransacked after his death, and a good deal has no doubt disappeared, but much of permanent interest remains. Witte was the first great Liberal statesman who held office in Russia, and he was consequently hated and opposed by many enemies, but as the author of the first constitution of 1905 his memory is secure. It is interesting to note from these records that the Tsar's rescript of August, 1898, inviting the nations to discuss the abolition of war, was only a move in the political game against Austria, in consequence of the decision of that Power to re-arm her artillery at a moment inconvenient to Russia.

On the day when he left office in 1915, Lord Haldane, following a well-tryed example, sat down to write a book. It has occupied his leisure hours since then, and now appears as "The Reign of Relativity" (Murray). It does not follow Einstein from the wilderness of

philosophy into the refreshing oasis of the higher mathematics—indeed, it studiously avoids that aspect of the question—but it is a general summary of the principle of relativity in the universe. Perhaps the most interesting pages are those near the end, when Lord Haldane elaborates his views on ethics—with a shrewd glance at politics—and religion. Apparently the chief practical lesson that the ex-Chancellor has learnt from life is toleration—a commodity which is unfortunately not greatly in demand at the present moment. Those who appreciate a clear discussion of the Hegelian philosophy—I am afraid their numbers are not great—will appreciate certain of the middle chapters of this work.

"A History of Psychology" (Allen and Unwin), by G. S. Brett, a professor of Toronto, is the kind of book that may be either hopelessly dull or very interesting. I confess that I opened it with some trepidation. But Mr. Brett is not only an authority on his subject—he has also an admirable style and an incisive judgment. His two volumes (there is already a third, first published some ten years ago as an introduction to the subject) should become a standard work.

The many friends of "T. A. B. Second Earl Brassey" (Murray) will be glad to possess a memoir of a very diligent and upright public man who hardly obtained during his lifetime the recognition that he merited.

I have found entertainment in a new novel, "Simon Called Peter" (Constable), by Robert Keable. Simon is a padre. He falls in love. He spends a honeymoon with the lady in a London hotel. On the last morning, when going back to the front, he asks her to marry him, but she refuses. The mixture of sex and religion is sure to be popular; the hero discusses the cosmos and camisoles with equal gusto, but I think he really knows more about tea-gowns than theology. OCELLUS.

A Greek official *communiqué*, dated May 25, says:—"We have dispersed concentrations of irregulars at Ghiordiz and captured munitions, grenades, and telegraphic material in the village of Koyadjik, 15 kilometres from Ghiordiz. Calm prevails on the rest of the front."

The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

Also:—
THE "UNIVERSAL"
CIGARETTE MACHINE.

THE NEAR AND MIDDLE EAST

(From Our Own Correspondents.)

EGYPT.

CAIRO, May 14.

Prince George's Visit.

During the past week we have been honoured by the presence of H.R.H. Prince George, who is serving on H.M.S. Iron Duke, and who, together with a number of officers and midshipmen, paid a flying visit to Cairo. They stayed at Shepherd's Hotel, and diligently did all the sights. On the day of his return to Alexandria Prince George lunched at the Residency.

The Political Situation.

Outwardly the political situation has not undergone much change during the past week, but there is every indication that the Cabinet has further consolidated its position. While strictly adhering to regular procedure in all its actions, the Cabinet is dealing very firmly with the situation. For example, shortly after Zaghloul Pasha's return the Committee of Government Officials decided to offer him a banquet, but when Zaghloul Pasha proceeded to attack the Cabinet in such an un-called-for and violent manner these officials were informed that they must not participate officially in an entertainment to a man who had put himself into opposition with the Government on such a purely personal question as the presidency of the Official Delegation and had calumniated it in such a brazen fashion. They were, moreover, warned that if they persisted in their intentions they would run the risk of very serious consequences. The tea party duly took place, nine out of the twelve members of the Officials' Committee were present, and some of them delivered most violent attacks on the Cabinet. The latter at once took action against the nine offending officials, some of whom had engineered the 1919 strike and had ever since then been responsible for the restlessness in the Administrations. These nine men have been suspended from their posts, and are being brought before a Council of Discipline for their disregard of superior orders and their official participation in a political demonstration. Their partisans at once tried to organise a strike amongst Government officials, but so far the two or three meetings held for this purpose have not been productive of agreement on this point.

The Press Censorship.

Meanwhile, the Government has issued a statement to the effect that as from to-day the Press censorship will be removed. The censorship, a preventive one, was instituted in April last year, owing to the fact that immediately after the departure of the Milner Mission a certain section of the vernacular Press began to publish articles which were of a nature to disturb the public peace. It has been very lightly applied since, and in view of popular feeling on the question the Cabinet has done very wisely to obtain its suppression and thus redeem one of the pledges it gave on taking office.

In the same declaration the Cabinet states that it is doing its best to secure the early removal of the military régime. The abolition of martial law, about which there has been so much wild talk in local circles, cannot, of course, take place until a properly constituted legislative body is set up in Egypt to pass an Act of Indemnity protecting officials from the result of their actions under martial law, and legalise various measures which are now being applied in virtue of Proclamation. Its application in the ordinary administration of the country can, however, be considerably attenuated in the sense that recourse would only be had to it in cases where military interests are directly affected. It is in the direction of bringing about a return to the common law régime and a cessation of the introduction of legislation by Proclama-

tion that the efforts of the Cabinet are being made. An illustration of this has quite recently been forthcoming in the promulgation of the Agricultural Rent Law, the application of which to foreigners would a year ago have been secured by Proclamation, whereas the normal procedure of obtaining the assent of the Mixed Courts is being followed, and as a consequence for the time being the law applies only to Egyptian subjects.

Irrigation Projects.

Sir Lee Stack, Governor-General of the Sudan, and his staff arrived in Cairo this week. They are very shortly proceeding to London, where important financial questions connected with the execution of the development works have to be discussed. It is stated that owing to the increase in working costs and price of material the cost of these development works will greatly exceed the original estimate, and it is in order to make some arrangement for the provision of the extra money that Sir Lee Stack and Sir Edgar Bernard, his Financial Secretary, are going to England thus early in the year. The same question arises in connection with the irrigation projects which are to be carried out by Egypt on the White Nile and at Nag Hamadi, etc., in the case of which the expenditure will amount to £E12,000,000, as compared with £E5,000,000 originally estimated. The Minister of Public Works, who has recently paid an extensive visit to the Sudan, has submitted a note to the Council of Ministers approving of these schemes and urging their execution without delay, and the Ministry of Finance is examining the question of how the funds are to be provided in view of the almost complete disappearance of the reserve fund.

The country has learnt with pleasure that the Institute of Civil Engineers has for the second time conferred the Telford Gold Medal on Sir Murdoch McDonald, this time for his paper on "The Discharges of the Nile," written in collaboration with Mr. Hurst, head of the Physical Service. This honour may be regarded as a further refutation of the criticisms levelled at the Adviser to the Ministry of Public Works during the recent controversy.

The Anglican Community.

My attention has been drawn to a clerical error which crept into the account of the meeting of the Anglican Community reported in the issue of April 28. In that account it is stated that Sir F. T. Rowlatt and Mr. A. P. Bolland had been appointed sub-deans and people's wardens, whereas the correct facts were that Canon Horan has been appointed sub-dean, Sir F. T. Rowlatt sub-dean's warden, and Mr. A. P. Bolland the people's warden. The error obviously occurred through the omission of an apostrophe in "sub-deans" and the word "respectively" after "wardens."

THE SUDAN.

KHARTOUM, May 5.

Tribal Gathering and Sports at Kassala.

March 31 last was a red-letter day for Kassala Province, inasmuch as the first gathering of the tribes was held at Khashm el Girba on this date, under the auspices of the Province Governor, assisted by the officer commanding the district, and other officials.

The Shukria and Lahawin turned up in full force under the command of their Nazir Umum, Sheikh Aawd el Kerim Abdulla Abu Sin. Proceedings commenced in the morning with a parade of the whole of the camelry of the tribes, some thousand odd men participating, under the leadership of the Nazir Umum and the two Wakil Nazirs—Hamed Mohamed Abu Sin, and Ahmed Hamed Abu Sin, each khot being represented by its Sheikh. In view of the fact that these wild tribesmen have never been subjected to discipline or military training, they made a wonderful show, and kept extraordinarily good alignment, both in the slow march past and the final trot past the saluting base. It must have been fully apparent to the onlookers that here was excellent raw material which only required a short training to

turn out troops that would be infinitely superior to the Egyptian *anfar*.

In the afternoon races and sports were held, the Shukria pulling off the fifteen and ten mile races amidst tremendous enthusiasm from their backers; the short race round the parade ground was won by the Lahawiin champion. After the races there was a show of gorgeously decorated "utfas" the large saddles specially employed in carrying the harem). Proceedings were brought to a close by a series of native dances. The gathering was an indisputable success, and it is hoped that the procedure may be made an annual event.

GREECE.

ATHENS, May 17.

A Council of Ministers.

At the conclusion of last Friday's sitting of the National Assembly a Council of Ministers was held at the Ministry of Justice, under the presidency of M. Gounaris. The Council at first discussed the question of the exchange, and decided to prohibit strictly the export abroad of Greek bonds, gold, and jewellery. An order to that effect was signed during the meeting and forwarded the same evening to all the custom authorities in the country, who were at the same time instructed to search all passengers leaving Greece. The Council then discussed the question of the large stocks of unsold tobacco lying both in this country and abroad. It was resolved to instruct Greece's representatives in the countries concerned to approach the Governments of the latter with a view to exchanging tobacco with products of those countries necessary for this market. It is hoped in that way to reduce considerably the amount of money which would necessarily have to be exported for the purchase of supplies from foreign markets.

The Council of Ministers next proceeded to discuss the military situation. It was decided that, with the exception of those belonging to the 1903, 1904, 1912, and 1913a classes, none of the men belonging to the

classes recently called up should be granted temporary exemption; all men now employed at the War Office and other auxiliary services would, without any exception or distinction, be sent to the front immediately after the reservists of the two older classes, 1903 and 1904, had presented themselves. The Prime Minister pointed out that by the adoption of the above measures the majority of those Civil Servants now employed at the various Ministries, who had been granted exemption, would have to don their khaki uniforms and proceed to Asia Minor without delay. Thus, from the Ministry of Finance out of 1,076 men liable to military service, only 150 belonging to the older classes will remain. The same applies to the Ministry of Agriculture, where very few of the 420 clerks will remain at their posts. Emphasising the necessity of these measures, M. Gounaris declared that the war would not be of a long duration; three months at the very most would see the end of it.

Bulgarians in Thrace.

The High Commissioner at Adrianople has issued an official *communiqué* denying most emphatically the allegations published recently in the Bulgarian Press to the effect that numerous Bulgarians were expelled from Thrace after having previously been ill-treated by the Greek authorities. The *communiqué* goes on to say that, with the exception of a very small number of persons, whose expulsion was considered absolutely necessary owing to the discovery of secret Bulgarian organisations in Thrace, the information published in the Sofia Press was devoid of any truth.

Miscellaneous News.

The ex-Governor of the island of Chio, M. G. Papandreou, was condemned to one and a-half years' imprisonment for the publication in the *Patris* of an article entitled "The King and the Nation." In his article M. Papandreou invited the King to abdicate. The editor of the *Patris*, M. Lambrakis, has been released.

Last Sunday the Roumanian students of the School of Fine Arts and their professor, M. Stefanescu, proceeded by special train to Olympia in order to visit the antiquities there.

The new international postal tariff will come into force throughout Greece on Monday next (May 16).

The Government is contemplating the creation of three additional Ministries, viz., of Posts, Telegraphs, and Telephones, of Public Treasure, and of Railways.

A decree has been published in the *Official Gazette* granting a pension of 346 drachmae per month to M. A. Romanos, formerly Greek Minister in Paris.

YUGOSLAVIA.

ZAGREB (undated).

The Croatian Plot.

Readers of THE NEAR EAST will doubtless remember the news of the arrest of Dr. Accurti and his wife on the grounds of plotting with Hungary for the separation of Croatia from Serbia and the rather sensational statements about conspiracies across the frontier and understanding between these parties and all the enemies of Yugoslavia.

The case for the prosecution is now complete. Altogether there are nineteen prisoners, practically all with Slavonic names, who were engaged in the plots. The case for the prosecution is that during the years 1919 and 1920 the prisoners were in direct or indirect communication with the so-called "Croatian Committee" in Budapest and Vienna—that is, with representatives and members of the "Croat Legion," which are revolutionary bodies with the purpose of destroying the union between Croatia and Serbia. They were working with the Frankovist, or Separationist party, and they proposed to bring this party into active operation in the territory of the kingdom. They were in close touch with Ivan Frank, in Vienna, who gave his name to this party. Their wives were in the plot, and one took a letter in cipher to Budapest to the "Croatian Committee" and to other agents at Graz. Madame Accurti was in direct touch with Captain Ferencz Horvath, chief of the Hungarian spying organisation in Budapest, whom she kept posted regarding the state of politics in Croatia. A mass of documents, many in cipher and others in invisible ink, are in possession of the authorities. This case will throw a flood of light upon the machinations of the enemies of the union, men who always looked to Vienna and

Budapest as the source of honour and wealth, and are ruined by the union. It also illuminates the success of the Raditch movement among the simple peasants of Croatia. The evidence given by a witness named Marchinka dispels the suggestion that the plotters were actuated by any patriotic motives; for he describes the suggested partition of the country, which recalls the dreams of Berlin. Italy was to get Fiume and the country as far as Liubliana, and another big chunk of Slovenia up to Zidani Most. Hungary was to get Medjumurje and Prekomurje and a big piece of the Bachka. The Bulgars were in the pie, too, for they were to get Drinopolje, Montenegro, Cattaro, the *sanjak* of Novibazar and some other places. Albania's share was to be Kossovo and Skadar; Bosnia was to be independent, with an outlet at Split; while Germany was to have free transit across the Danube into the Balkans, and Hungary across Croatia to Fiume. The Voivodina was to be an independent republic under the protection of Bavaria, with Srem attached, and Croatia to be an independent republic of much reduced dimensions.

The chief prisoner is a retired university professor, and most of his associates are small tradesmen, innkeepers, commercial travellers, artisans, though one is described as a "complete philosopher."

When the union was proclaimed, a number of disappointed and discontented spirits left the country and found a refuge at Graz and in Hungary. In May, 1919, they formed a Croatian revolutionary association. The leader was Dr. Ivan Frank, a former solicitor in Zagreb, and the membership included several landowners and officers, who saw that they had everything to lose by the destruction of the old regime and nothing to gain. In March, 1920, they moved their headquarters to Budapest, where they naturally found a congenial soil among the Magyar irredentists. From there were pulled all the threads in the plot against the union which have been revealed from time to time.

Dr. Frank posed in the eyes of Europe as the representative of the Croat people, with Raditch as his right-hand man. He had plenty of money at his disposal, doubtless supplied by Hapsburgist sympathisers, Hungarians, and, possibly, the Fascist party in Italy. In the latter part of 1920 they formed a Croatian Legion in Hungary from discontented Yugoslavs and men whom they seduced by fair tales on their way home from Russia, where they had been prisoners of war. The idea was to wait till a favourable moment and then make a raid across the Drave, raise Raditch's simple, misled peasants, and "liberate" Croatia from the Serbs. The resultant Croatian republic would remain the handmaiden of Hungary. A headquarters camp was formed at Koszeg, and later moved to Zaia-Egerszeg. Their agents were very active in the country fomenting discord and spreading disruptive propaganda. From time to time arrests have been made, such as that of Dr. Accurti and his wife, which have shown that the Yugoslav police, who are very competent, have their eyes wide open.

BULGARIA.

SOFIA, May 23.

Relations with Yugoslavia.

The situation regarding Yugoslavia has considerably improved during the last week, and the meeting between M. Pashitch, the Serbian Premier, and M. Dimitroff, Bulgarian Minister of the Interior, on May 24 at Belgrade will, it is hoped, help to clear the air yet further. It is satisfactory to record that all the sheep were handed over to Serbia a few days ago, and that the Inter-Allied representatives present noted that the Serbian and Bulgarian officials were on quite cordial terms. On the 21st, at the instance of the Serbians, the Bulgarian Government arrested a well-known man who was Military Governor of Nish during the war.

Mr. Lloyd George's Speech.

Internal affairs remain the same, and the chief topic of conversation has been Mr. Lloyd George's speech on the Allies' policy in Silesia. This has created a great impression, and all the local newspapers have been commenting on the apparent change in policy of the British Prime Minister. His speech has, however, been unanimously applauded, and belief in the English sense of justice, which has been rather inclined to lapse in this part of the world during the last few years, is once more in the ascendant.

The policy of England in the Near East has been the subject of much harsh criticism in Bulgaria, as it was not possible for the people to realise until comparatively recently the position that we were in. Our news did not reach the country owing to our newspapers not being

on sale, and even if a few did manage to drift through, they were always three to four weeks old. Now this is all changed, and one is able to buy an English paper five or six days after its appearance in London. The same remark applies to wireless news, which is now coming through in sufficient quantities to give the public at least some information on affairs at home.

It is said that we never trouble to make sufficient propaganda in foreign countries, but in times of peace it seems open to question whether the simple policy of telling the truth and thus letting the simple facts be known is not the best one.

I do not think we have lost ground in Bulgaria, and yet we have not tried very hard to gain any ground. The only matter in which it would appear advisable for us to take steps is the affair of the clearing house for Bulgarian debts. It is to be hoped that we shall do away with this institution, and thus enable an increase of trade between the two countries to take place.

The Fete of SS. Cyril and Methodius.

To-morrow, May 24 (May 11, Old Style), will be celebrated the annual fête of the two patron saints, Cyril and Methodius. It was these two brothers who, in the ninth century, instituted the Cyrillic alphabet. Their fête is observed in all Slav countries, but it is the greatest of all fête days here, and is essentially a literary one. A solemn *Te Deum* is held outside the New Cathedral, and throughout the country there are processions of schoolchildren, speeches, and other functions.

General.

M. Stambolisky has so far recovered that this morning, in company with M. Athanassof, Minister of Railways, he left for the provinces.

The King has signed a decree on the 20th convoking the *Sobranje* for June 1.

CYPRUS.

NICOSIA, May 14.

Greek Denunciation of Local Government.

The Greek Press publishes the memorial of the Greek Members of Council to the Secretary of State regarding the events of April 7 (Centenary celebrations). It gives at length its own version of the occurrences, laying all the blame on the Government and the police! The Government, it states, desiring to justify its attitude, pushed forward enrolment of police, and brought soldiers from Egypt, who paraded the streets of Nicosia with machine guns. But these are not the only matters that have roused the conscience of the community. "Draconian laws" have been passed by the official and Turkish Members of Council. (This refers chiefly to a recent law to facilitate the suppression of seditious publications.) Martial law remains in force, under which a distinguished journalist (M. Katalanos) has been arrested and expelled from Cyprus, without any order of a court. It accuses the administration of desiring to set up "a tyranny foreign to the liberal principles of the British nation," which recalls the odious times of Turkish subjection. The "people" find only one object in the late arbitrary proceedings, viz., that of stifling the national sentiment. If this be so, the Government action can only tend to alienate the people, and invite disorder. It concludes by asking that a special commission may be sent to hold an inquiry, in order that H.M. Government may be enlightened as to the real state of affairs.

There could not be a greater distortion of the actual situation. Not the least amazing point is the reference to measures passed by the English and Turkish members by Greeks who refuse to attend the Council, where such measures could be opposed by them. Hitherto, aided by the Church and Press, they have had their way entirely, the people

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1" to 3" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to :—

taking their "political" opinions ready made from them.

On the other hand, there appears to be at last some trace of opposition to this leading element. There are, of course, many in the towns who disagree with the senseless course that has been taken; but they have not possessed the courage of their opinions. One paper, it is true, the *Herald* (Kiryx), at first opposed the tactics of non-cooperation, but it subsequently changed its views and followed the current. It has long been a matter of speculation how long the public would tamely submit to such dictation, since the "policy" is not only a distinct violation of duty towards voters representing a majority of the population, but is, if anything, a hindrance to their own professed aims. The underlying supposition is that the British Government, becoming weary of a persistent agitation, will allow the island to be cut adrift.

The agitators still completely ignore the real political situation, as ruled by the Allied Governments. The *Aletheia* (Truth) has published an article and letters which openly indicate that the methods which the Greek Councillors have adopted, far from being acceptable, are strongly condemned by some. If the Press emerges from a generally one-sided campaign, and publishes free and honest expressions of opinion like this, some good should be done.

ALBANIA.

TIRANA, May 22.

False Reports.

Papers outside Albania seem to be publishing a great deal of nonsense, which undoubtedly emanates from Greek sources, regarding the situation here. Albania is represented as having become a field for Kemalist intrigue, as preparing to attack Greece, as putting Greeks to death at Koritza, and so forth. Such reports are false from beginning to end, and people here are surprised that they can obtain any credence at all. There is no understanding between Albanians and Turks, or between Albania and Turkey. It is true that Albania is organising a force of militia, about 10,000 strong; but it will serve as a mobile gendarmerie, and is not intended as a menace to anyone.

As to the incident at Kortcha (Koritza), the plain facts are as follows:—Towards the close of last month some Albanian Orthodox Christians celebrated Mass in the Albanian language in the church of St. George. This procedure was displeasing to the bishop, Mgr. Jakov; but the Albanians persisted in using their own tongue in the church referred to. There was, however, neither struggle nor scene, neither any woundings nor any death. Nor is it true that Albanian Moslems and Catholics became mixed up in the business.

Greco-Albanian Frontier.

Without any good reason, Greece has magnified this small incident, and has seized upon it as a pretext for closing the frontier and for placing under arrest Albanians who happened to be in Greece for family or business reasons. Among those arrested are Hussein Vroni, a cousin of the President of the Council and Deputy for Berat, and Fehim Leskovig, Prefect of Elbasan, who were both at Janina on family visits. It is also reported here that the Greek authorities are taking rigorous proceedings against the Albanians of the Chameria.

At Chimarra.

Chimarra—the ancient Acrocerania—numbers seven villages; the inhabitants are tenacious, brave, and enjoy a certain prosperity, being skilful traders and good sailors. The Chimarriones, although Albanians, were rather Greco-philic, Greek propaganda having been very active in their country. Recently, however, a deputation of Chimarra notables waited upon the Prefect of Valona to inform him that their people intended to have no more to do with Greek politics. Albanian gendarmes are now established in Chimarra, and the Albanian flag is flying there.

The League of Nations.

Your readers may remember that Albania complained to the League of Nations against Serbian action in Albanian territory, and demanded that the Yugoslav troops should be withdrawn from that territory. It is now announced here that the League has decided to consider the Albanian representations at the next sitting of its Council, which will take place in mid-June at Geneva.

The Gaekwar of Baroda has presented two elephants to the Zoological Gardens, and they are at present on their way to Calcutta to be shipped to London as soon as transport can be arranged. Exact particulars have not yet reached London, but it is expected that the elephants are young females, suitable for riding. The Maharaja of Cooh Behar, who is a Fellow of the Zoological Society and son-in-law of the Gaekwar of Baroda, knew that the London Gardens were at present short of riding elephants, and it was at his suggestion that the generous gift was made.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

May 24.—Mr. Montagu informed Sir John Rees that negotiations between the Government of India and the Ameer of Afghanistan were still proceeding at Kabul, and that it would be impossible to make any statement regarding the results so far achieved.

Mr. Harmsworth informed Mr. Ormsby Gore that the Egyptian Delegation will consist of the following: Adly Yeghen Pasha, President of the Council of Ministers, who would also be President of the Delegation; Hussein Rushdy Pasha, Vice-President of the Council of Ministers; Ismail Sidky Pasha, Minister of Finance; Mohammed Shafik Pasha, Minister of Public Works; Ahmed Talaat Pasha, ex-Minister and President of Native Court of Appeal; Youssef Soliman Pasha, ex-Minister. The exact date of their departure from Egypt had not yet been fixed.

Mr. Harmsworth informed Commander Kenworthy that the British troops in Persia were in process of withdrawal, and that their rearguard is now at Kerind.

Lord Robert Cecil asked whether the Anglo-Persian Agreement had come definitely to an end, or whether it was in a state of suspended animation indefinitely. Mr. Harmsworth replied: "I think it can be regarded as having lapsed."

Answering Capt. Terrell regarding the present situation in Mesopotamia, Sir L. Worthington Evans stated that the country had been quiet during the last three months with the exception of slight tribal unrest in the Nasiriyeh area and among the Surchi Kurds, which have called for military demonstrations on a small scale.

Mr. Harmsworth informed Mr. Wignall that the British Consul-General at Smyrna had received a protest against the action of the Greek authorities in conscripting Ottoman subjects in Asia Minor for the Greek Army, and that he had duly transmitted the protest. Representations had been made as a consequence of this protest both to the Greek Government at Athens and to the Greek High Commissioner at Constantinople.

May 25.—Mr. Lyle Samuel asked a question regarding the present military situation in Asia Minor, and whether any negotiations in the direction of peace had taken place between Greece and Turkey. Mr. Chamberlain replied that the British Government had no information beyond what had appeared in the newspapers, and that he was unaware of any negotiations that had taken place between Greece and Turkey.

May 26.—Mr. Harmsworth informed Mr. Ormsby Gore that Lord Allenby reported on Tuesday night, May 24, that fourteen Europeans had been killed and sixty-nine wounded during the recent disturbances in Alexandria. Only one British subject (a military policeman) was injured, and had subsequently died. No anti-foreign outbreaks had been reported from other places in Egypt. Lord Allenby had constituted a Court of Inquiry to investigate the origin of instigation of these racial riots. On the motion for the adjournment, Mr. Harmsworth informed Lord Winterton that according to telegrams which were despatched from Egypt late on Wednesday night, many of the statements that had appeared in the Press regarding the degree of disturbance and number of casualties in Alexandria had been exaggerated. On Wednesday night Alexandria was reported quiet under military administration. The provinces were also quiet, but most of the telephone lines to Cairo had been cut between Alexandria and Damanhur. Mr. Harmsworth then communicated to the House a summary of Lord Allenby's *communiqué* dealing with the general political situation in regard to the Egyptian delegation.

Albanian commissions will visit Athens and Belgrade to discuss with the respective Governments questions awaiting settlement between Albania and her neighbours.

Persian works of art, the property of Sir Walter Townley, K.C.M.G., of Windsor, formerly H.M. Minister at Teheran, will be sold at Sotheby's on June 29 and following day. The collection includes early pottery from excavations made by the owner in the neighbourhood of the ancient city of Khar. It comprises specimens of gold and other ornaments, enamel, metal work, lacquer, embroideries, carpets, rugs, and illuminated MSS., ancient and modern.

PRESS ON THE NEAR EAST.

The Turkish Point of View.

The special correspondent of the *Manchester Guardian* continues, in the issue of May 23, his examination of the Græco-Turkish problem. He endeavours to discover the Turks' attitude:—

The point of view of the Turks (who when it comes to the point are all Nationalists) needs to be put in England. The Greek case has had many able advocates, and has found a sympathetic public brought up on the tradition of the Greek War of Independence. But the "bloody tyranny of the Turk" is not a formula that fits a situation in which Greek armies are invading Turkish territory and Turkish towns and villages are getting burnt. The less widespread pro-Turk tradition seems to me also to be behind the times. It, too, is an old tradition which took shape about the period of the Crimean War, and has not kept pace with recent changes. About a year ago I heard a distinguished British soldier, speaking in England about the outlook in the Middle East, remark that "we must buttress the British Empire on the support of two friendly Moslem Powers, Turkey and Afghanistan." I do not know how the Afghans feel, but I am sure that this officer, if he found himself in Constantinople, would be startled to discover how little the Turks reciprocate the feeling he entertains for them. There is an idea, rather prevalent in the British Army, that the Turk is like the Gurkha or the Pathan—a simple soul with a primitive psychology, fierce when provoked, but easy to manage when well treated and humoured. I suppose this comes from handling Turkish peasants as kavasses or gendarmes, but it is certainly not true of the Turkish educated and governing class. For good or ill, they are not at all unsophisticated, and at present they certainly do not love us. Why should they? Before the war we made an *entente* with their most formidable enemy, Russia. During the war we destroyed their Asiatic Empire by detaching the Arabs from them and beating their army. And since the Armistice we have till recently supported the Greeks. Their present hostility is really inevitable; yet it has been a shock to me to realise, since my arrival in Constantinople, how intense it is. Though always polite, they keep one at a distance, in marked contrast to the Turks in Smyrna. I imagine the reason for the difference is that in Smyrna the military occupation is by another nation, while here it is by ourselves. The foreign military occupation of a large and overcrowded city inevitably creates ill-feeling. There are many personal complaints about the system of requisitioning houses, there are the deportations to Malta, and there is wounded national pride. For all these reasons it is both difficult for English people to learn the Turkish point of view and important for them to understand it.

The principal points in the Nationalist programme are all, I think, expressions of one fundamental motive—the desire to be on an equality with Western nations. Equality does not mean identity. The Turkish nation has certain traditions that are better than those of many other nations, and, like every nation, it does not under-estimate the number of its special virtues. Mere imitation of the West has led the Turks into many pitfalls already. But I think the Turkish consciousness is feeling its way towards something better than that. It aspires to a moral equality supplemented by the common ground of custom necessary for international relationships. If I am right in this diagnosis, then the present attitude of the Turkish governing class, however violent and intransigent some of its manifestations may be, is at least profoundly different from the attitude of its predecessors, who simply regarded Moslems as inherently superior to Christians and thought it right to assert

this superiority by force. No doubt this old prejudice still has a strong hold on the Turkish mind, probably a stronger hold than the complementary prejudice about Christian superiority has upon our own. Nevertheless, it is a hopeful sign if the dominant party in Turkey are basing their policy on a new ideal which, if genuinely accepted and translated into practice, would make satisfactory relations between Christian and Moslem peoples possible for the first time in history. At any rate, it seems worth trying to meet the Turks on such ground by attempting to work towards this ideal from our side.

Moreover, he does not find the Turks more practical than their Christian neighbours, and states his opinion that in the actual claims of the Nationalist Government at Angora (which are almost universally approved by the politically-conscious part of the Turkish nation) there is nothing fanatical. In conclusion he says:—

The last point I want to make about the Turkish national movement is that it is sincere. None of the Turks with whom I have spoken are light-hearted about the present war, nor do they regard it as an investment that will bring in a return or as a satisfaction to their national vanity. They are all war-weary. They know quite well that their treasury is bankrupt, that half Stambul is burnt down, that the only provinces untouched by the Great War are being ravaged by this one, and that the courtyard of every mosque is crowded with refugees. They do not disguise from themselves that this war after ten years of war is a disaster for their nation, yet, rightly or wrongly, they do believe that they have no choice but to wage it. I have found this spirit among reserve officers who had all been from four to six years on active service, and several of whom now found themselves prisoners for the second time. "We want peace," they said with unmistakable conviction, "but the war cannot stop so long as Greece occupies Smyrna." I have heard the same feeling expressed in other forms; for instance, "We accept the consequences of defeat up to a point, but not when they are a death sentence." But the most characteristic expression of the Turkish attitude seems to me to be the following:—"You must either exterminate us or treat us as equals." Clearly we do not intend the first of these alternatives, but in that case is not the only reasonable policy to choose the other?

Constantinople.

In the *Nineteenth Century* of May Mr. R. B. C. Sheridan writes on "The Sacrifice of Greece," or "The Story of a Scrap of Paper." Having attributed the revision of the Treaty of Sévres to that "large percentage of unthinking persons in all the Entente countries who have a sneaking regard for the Turk," to the "great army of cosmopolitan financiers known to be favourable to Turkey," and to the pro-Turkish interests of the populations of India, he proceeds to state that the "main blot in the original treaty, the provisional retention of the Sultan in Constantinople, is now confirmed and rendered more obnoxious and intolerable, if possible, than before."

No student of Near Eastern questions who, having a clear perception of the racial and religious issues at stake, is justified in expressing an opinion, can possibly expect a Turkish Constantinople to be a durable feature in the Near East. The city never has been, and never can be, accepted by the Balkan nations as a Mahomedan capital. Writers who emphasise the importance of retaining it as the seat of the Khalifate ignore, or perhaps are unaware of, the fact that it has for over one thousand years longer been the seat of the Œcumenical Patriarchate of the Orthodox Church. While the Greek and Armenian populations of the city (counted in hundreds of thousands) are obliged to call themselves subjects of the Sultan, and might, under the revised proposals now offered to the Greeks and Turks, be left at the mercy of a Turkish soldiery inflamed by their diplomatic mastery over their victors in the Great War, it is idle to speak of a lasting settlement. Neither in its traditions, which are superabundantly Christian and Greek, nor in its geographical position as the capital of Thrace, can it be said to be linked with the Ottoman race, whose future is in Anatolia. To leave under the Turkish flag both the city of Constantinople and the great cathedral of St. Sophia is to violate the ideals for which we entered the war, and to which the Armenians and Greeks (who probably still, after centuries of deportations and massacre, form a majority of the population) looked confidently for deliverance. As long as this city remains the adopted seat of the Khalifate it will inevitably serve as the symbol of Turkish imperialism and encourage the Ottomans, who must have expected to lose it, to persist in their hopes of renewed expansion, and to rely upon the well-tried expedient of massacre whenever opportunity offers or can conveniently be created.

To saddle the League of Nations with a Turkish Constantinople at the outset of its career, and to expect it to maintain that complexion for the town in the face of the displeasure of the Christians of the Balkan peninsula, is to doom the League to discredit and impotence.

British troops are to be withdrawn from the islands of Lemnos, Imbros, and Tenedos, in the Ægean.

The Ottoman Congress, which meets annually, has concluded its sessions at Lausanne after discussing the emancipation of women and the introduction of modern hospitals into Turkey, and means to persuade Turkish youths to frequent foreign universities.

I.—"THE DIARY OF A YEOMANRY M.O." By Captain O. Teichman, D.S.O., M.C., Royal Army Medical Corps (T.F.). (London: Fisher Unwin. 12s. 6d.)

II.—"STORIES OF THE EAST." By Leonard Woolf. (Richmond: The Hogarth Press. 3s. net.)

I.—AN M.O. IN PALESTINE.

Most of us have by this time made our own classification of the literature of the Great War, dividing the myriad books composing it into certain broad sections of which the most familiar are, first, the apologia of unsuccessful generals; next, the printed treacheries of disloyal public servants; and, last but not least, the mass of personal impressions, good, bad, and indifferent, of minor actors in the great world tragedy. "The Diary of a Yeomanry M.O." deserves to be placed among some of the best books in the third category, and not the least of its merits is to be found in its simple directness of style, which gives to the narrative just that baffling touch of realism one always associates with Defoe. As one reads the author's plain, straightforward descriptions of the battles in which he took part, one is irresistibly reminded of the "Memoirs of a Cavalier," and one feels that if Defoe had been recalled from the Shades to tell the story of the war in Palestine he would have given us something much on the lines of the "Diary of a Yeomanry M.O." In recording his personal experiences day by day during four years of hard service in the field, the author was probably quite unaware that he was making a serious contribution to the history of the Great War, but he has succeeded in doing so, nevertheless, and his book deserves the close attention of all who seek accurate information regarding the series of operations which, opening on the Suez Canal with the repulse of the invading Turkish armies, ended in Syria with the downfall of the Ottoman military power.

This war diary starts at Gallipoli in the later phase of the campaign, when the author arrived with his regiment, the Worcestershire Yeomanry, and the rest of the dismounted cavalry division which earned undying laurels in the battle of the 21st of August, 1915. The massacre of that splendid division in its advance on Chocolate Hill deprived the army of a host of its very finest fighting men, and their sacrifice was barren of military results; but who, after reading the lyric passage in Sir Ian Hamilton's despatches quoted by the author, in which is described this glorious episode in the history of the British Army, could say these brave men died in vain? As long as the fighting spirit of our race survives, the tradition of the disciplined heroism of the Yeomanry division at Chocolate Hill will be preserved as something typical of our national military genius. A few days after taking part in this memorable battle the author was severely wounded, and perhaps nothing in the book brings home to one more forcibly the unspeakable horrors of modern war than his simple account of his removal from the firing line to the beach through an inferno of bursting shells. A year later he was destined once more to tread the *Via Dolorosa*—this time on the Egyptian front—when, wounded before Katia on the day following the battle of Romani, after undergoing the agony of a long ride with a broken leg, he went through the terrible ordeal of a night journey in a "hospital train" of a pattern unknown on the Western front, to which for sheer suffering even Mesopotamia at its worst could hardly produce a parallel. One realises, as one reads the author's record of the daily events on the Palestine front in the long campaign which culminated in Lord Allenby's final victory, the extraordinary difficulty of the operations and the magnitude of the task achieved. Many and bad mistakes were sometimes made by generals and lesser luminaries; oftener than not the luck was dead against us, but one never detects in the pages of this diary the slightest indication that the author, any more than a host of men less observant and thoughtful serving with him, doubted for a moment the ultimate success of our enterprise. One wonders whether it was so with the enemy. Certainly, in 1916, when his command of the air was absolute, and when, after defeating us at Gaza, he enjoyed the advantages of position and superiority in numbers, he had surely every reason for hoping that the end of the war would find him with his grip on Palestine unshaken, even if his experiences at Romani and on the Canal the year before might have raised doubts in his mind as to the possibility of his achieving the conquest of Egypt. Our army, however, learned its business thoroughly in those painful years, notably the cavalry, which, it is easy to see from the author's chronicle of its daily work, very soon reached the highest standard of efficiency, and when the antagonists came to close grips in 1917 they were very well matched. The Turks and their German and Austrian allies put up a good fight to the last, and it will redound to the credit

of our arms for all time that we were ultimately victorious over an enemy of the quality we encountered in Palestine.

Returning home in June, 1918, the author was not destined to take part in Lord Allenby's final advance, and his next experience of fighting was on the Italian front, where he served with the 22nd Infantry Brigade in the operations on the Piave in the last days of the war. This Italian chapter of his book is not devoid of interest, and gives a good account of the capture of the island of Papadopoli by our troops; but it does not seem to fit in well with the rest of the narrative—one cannot succeed in associating the author with infantry fighting after following him through three years of cavalry warfare, and it is quite painful to think of him away from his beloved regiment, the Worcestershire Yeomanry. The regiment still exists, but it lies, we believe, under sentence of death, like most of its fellows in the Territorial Cavalry, and it is not unlikely that the "Diary of a Yeomanry M.O." may be fated to serve as the obituary notice of a very gallant regiment of horse. We hope this may not come to pass; but even if the name of the Worcestershire Yeomanry disappears from the Army List, it will be long before its exploits in Palestine are forgotten; and long after the Tank has been relegated to the museum, we know there will be men living responsive to the glamour of the mounted arm to whom this book will irresistibly appeal. Among these, one likes to think, will be some proud to claim descent from the West Country Paladins of the last crusade whose deeds in Palestine have been so faithfully recorded by the author.

E. H. B.

II.—TALES OF CEYLON.

The author of this book, who was for several years in the Ceylon Civil Service, has here written three curiously unequal stories. In the first, "A Tale Told by Moonlight," there is such poor, hackneyed psychology as almost to check desire to read the other stories. Its raconteur is the usual travelled man who denies the romantic novelist's conception of love; and he explains the rarity of the real existence of love by taking as exceptional what is, in fact, a stock case with decadent realists. One really cannot understand why, if love can occur in a Colombo brothel, it should not also have occurred in many similar institutions.

But in the second tale, "Pearls and Swine," there is a very fine and keen art. Mr. Woolf's pictorial gifts are intense, amounting to genius, and this story of a degenerate white man dying of delirium tremens in the pearl fishery equals the work of Conrad. The setting of it is not too happy—it is the outcome of a heard conversation between an ignorant English stock-jobber who wished to rule the East with a "strong hand" and an equally foolish arch-deacon, who wished—without violence, of course—to "awaken" the Eastern peoples—for it acquires a political significance which detracts from it as a work of pure art. This astonishingly vivid story, in which the picture of the fishery literally paints itself before the reader's eyes, could and should have stood by itself; but for its cadre it would be a masterpiece.

There is a quiet and unexpected humour in the third tale—"The Two Brahmins." We like well the whimsical malice with which the losing of caste and the subsequent efforts to negate it are related; and here again is shown the extraordinary sharpness of the author's pictorial vision. Mr. Woolf is a writer of considerable gifts, and at times he rises to much beauty and justness of expression. His second story will certainly live in the memory, and it is all the more pity that this in particular should have been rather carelessly printed.

MUSICAL NOTES.

Koussevitsky.

Of the genius of M. Koussevitsky's conducting in Russian music I have written before, but it was very strikingly proved at the first Russian Festival Concert given at the Queen's Hall on May 27. There are to be three of these concerts, and at them we are promised the performance of some of the best Russian works, in particular some of the symphonies of Scriabin, the composer about whose orchestral compositions M. Koussevitsky knows more than anyone else in the world. This conductor has in his interpretation of Slav works an irresistible and unique fascination; there are in his readings that vivid intensity, that noble and childlike simplicity, and that elemental vigour which are at the bottom of his nation's soul. He could have chosen no happier things in which to display his genius than Moussorgsky's "Night on the Bare Mountain," the introduction to "Khovanchina," and Liadoff's "Kikimora." These realistic paintings pulsate with a weird, unearthly beauty; their other-world attraction comes as with the overwhelming loveliness of Roerich's pictures. In Moussorgsky particularly M. Koussevitsky showed to what heights the individual Russian spirit, basing its efforts on common-folk experience, may attain. The next two concerts of the series—to be given on June 3 and 10—will be attended with very curious interest.

The Catterall Quartet.

This string quartet, which plays chiefly in the North of England, comes to London too seldom, for its performances at Miss Marjorie Sotham's concert at the Wigmore Hall on May 24 were notable. There could be no mistaking their enthusiastic reverence for Brahms' Quartet in A minor (Op. 51, No. 2) or for Mozart's Quartet in G minor; and, though occasionally lacking the tone, balance, and finish of some other combinations better known in the South of England, they played with such spontaneity as to leave an unusual impression. It is true that their attack was a little hard, especially the leader's, and that they were not skilful in tossing melodies from one instrument to another (an absolute essential in Mozart), but they gave us the spirit of the thing, a fact which cannot be too gratefully recognised. Mr. Arthur Catterall is a most accomplished violinist, and it was a thousand pities that his exquisitely musical sense was so poorly supported by Miss Sotham at the pianoforte in Busoni's sonata (Op. 36a). Miss Sotham has very much to unlearn in the matter of pedalling and of tone; at present she is far too ambitious.

A New Trio.

The marked increase in the number of combinations in chamber music is a welcome sign in London musical life, but a new trio—consisting of Mlle. Kontrovitch (violin), M. Ostcharkoff (cello), and M. Krish (pianoforte)—which played at the Wigmore Hall on May 26 has very far to develop in the essential matter of balance and unanimity before it can take an assured place. Without any doubt, the violinist is an artist, and the 'cellist appeared to be both capable and refined; but whether M. Krish will ever subordinate his rather unpoetical individuality for the sake of an ensemble I doubt. They played three trios—Jongen's in B minor, a tuneful, very British thing in one movement by Norman O'Neill, and Brahms' in C major. Jongen's work is well set out for the instruments (particularly it gave M. Ostcharkoff a chance to display his excellent tone), but it is dull, for there is little development in it. The Brahms is just one of those compositions that his opponents may worthily seize upon and hold up to tepid scorn (and I am not sure that M. Ostcharkoff did not think so too).

The Negro Tenor.

To listen to a recital by Mr. Roland Hayes is to have an uncommon musical experience. For not only does he sing operatic stuff extremely well, but he sings his own negro "spirituals" in an unforgettable way. His keenness and passion for the tunes of his folk are obvious; and it may interest readers to know that his ambition is to collect the folk-songs of his people in Africa, particularly, I believe, in West Africa and in the Sudan. At his concert at the Wigmore Hall on May 27 he sang, so that one will always remember them, "Every Time I Feel the Spirit," "Shout All Over God's Heaven," "Sometimes I Feel Like a Motherless Child," and "I'm a-Singing with a Sword (Bible) in My Hand"; and among numerous encores, the strangely moving "Go Down, Moses." That a certain sentimentality and over-stressed emotion should occasionally creep into his interpretations is perhaps inevitable, but he is a singer of indubitable genius.

ANDANTE.

It is officially reported that in Mesopotamia a new road from Baiji by Fatha (123 miles north of Baghdad) to Shergat (50 miles south of Mosul) has now been completed along the right bank of the Tigris.

PERSONAL AND GENERAL.

TO-DAY.

June 2 (New Style).
May 20 (Old Style).
Ramadan 25, 1339, of the Moslem Calendar.
Iyar 25, 5681, of the Jewish Calendar.

Queen Olga of Greece has arrived in Paris from Athens.

Lord and Lady Inchcape have returned to London from Paris.

Lord and Lady Howard de Walden have returned to London from East Africa.

Mr. T. Hohler, British High Commissioner in Hungary, has arrived at 4, Albemarle Street.

Sir Gerald Strickland and the Misses Strickland have returned to 24, Eaton Place from Malta.

Lieutenant-Colonel Sir A. T. Wilson sailed for Canada on May 25 in the s.s. Empress of Britain.

The Maharani of Baroda and Prince D. Gaekwar of Baroda have left Claridge's Hotel for Paris.

The Maharaja of Kapurthala has laid a wreath on the tomb of the Unknown Soldier at the Arc de Triomphe.

The American Ambassador was last week visited by the Bulgarian Minister and the Roumanian Chargé d'Affaires.

The Bulgarian Minister in London left London last week for Brussels to present his letter of credence to the King of the Belgians.

The Hon. Lady Lloyd is expected to arrive in London from Bombay to-day. Her address will be 14, Bryanston Square, W.1.

The annual Burma dinner is being held to-day (June 2) at Princes Galleries, Piccadilly. Mr. Harvey Adamson, K.C.S.I., will preside.

General Wrangel will arrive in Yugoslavia towards the end of this week, and will take up his residence about 30 miles north of Belgrade.

Monsieur Michel Boeresco, Roumanian Minister in London, has had conferred upon him the insignia of a Commander of the Star of Roumania.

The Prince Regent of Yugoslavia, who has arrived in Paris from Belgrade, will visit several of the French seaside resorts before leaving for England.

The annual meeting of the Indian Church Aid Association is to take place on June 22 in the Hoare Memorial Hall at the Church House, Westminster.

The annual Sikh Brigade dinner will be held this year on June 13. All inquiries should be made to Major H. R. Hadow, United Service Club, Pall Mall.

The Colonial Secretary, Mr. Winston Churchill, is to be the guest of the British Cotton-growing Association at a banquet in the Midland Hotel, Manchester, on June 7.

Cables received in London on May 25 announced that Sir Murdoch MacDonald, Adviser to the Egyptian Ministry of Public Works, has resigned, and that he has left Egypt for England.

Major J. Carey Evans, I.M.S., whose appointment as surgeon on the Staff of the Viceroy we recently announced, has proceeded to Simla with Mrs. Carey Evans, daughter of Mr. Lloyd George.

SCHOOLS & TUTORS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., are in close touch with all the leading educational establishments in England for boys and girls, and are able to advise parents where to find early vacancies. Their knowledge of these establishments, for the majority of which they supply the teaching staffs, extends over 20 years and they are thus in a position to give information and advice difficult to obtain elsewhere.

An explanatory booklet "On the choice of a School" will be sent post free on application.

TRUMAN & KNIGHTLEY, LTD.,
61-62, CONDUIT STREET, LONDON, ENGLAND.
Phone: Mayfair 1063-1064.

The annual dinner of the Indian Political Service Dinner Club will be held at the Grand Hotel on June 15. Applications for tickets should be addressed to Mr. Austin Low, C.I.E., 54, Parliament Street, S.W.

At a reception held on May 25 on board H.M.S. Iron Duke, off Jaffa, the guests included the Emir Abdullah, who was invited to remain on board until the vessel reached Haifa.

A marriage has been arranged, and will take place shortly, between Lieut. Edward Watson, R.N., son of the late Francis Watson, of Colombo, and Mrs. Watson, and Freda Margaret, daughter of Dr. and Mrs. Harrison, 6, Swan Walk, Chelsea.

The members of the Commission appointed to inquire into the recent disturbances in and near Jaffa by the High Commissioner of Palestine are Sir Thomas Haycraft, the Chief Justice; Mr. H. C. Luke, Assistant-Governor of Jerusalem; and Mr. Stubbs, of the Legal Department.

A marriage is arranged, and will shortly take place in Jerusalem, between James, youngest son of the late Rev. James Lee Warner, Thorpland Hall, Fakenham, Norfolk, and Margaret Elizabeth, eldest daughter of the late Rev. A. M. Hewlett and Mrs. Hewlett, of Horsham, Sussex.

Countess Curzon of Kedleston, who was received by the Serbian Minister and Mme. Gravitovitch and Mrs. Curvington Wilde, opened last week an exhibition and sale of artistic articles from Serbia and Bosnia at 5, Cromwell Road, the object being to revive industries which the war suspended. Sir Arthur Evans, Mrs. Seton-Watson, and the Hon. Lady Whitehead have lent various antique articles of interest. The display was an interesting one, and attracted a good deal of attention.

An engagement is announced between Kathleen, younger daughter of the late Captain T. A. Fischer, of the Indian Army, and of Mrs. Fischer, 11, Zenobia Mansions, Queen's Club Gardens, West Kensington, and Mr. Louis Campbell Byrne, D.S.O., M.C., the Royal Dublin Fusiliers, eldest son of Dr. Benjamin Byrne, New Malden, Surrey.

The engagement is announced between Captain Philip Bateman, London Irish Rifles and R.A.F., son of the late Alfred George Bateman and Mrs. Bateman, of 7, Queen Anne Street, and Feltham Court, Middlesx, and Marie Louise Blanc, eldest daughter of Mme. Irène Procopiu, Lady-in-Waiting to H.M. the Queen of Roumania.

The following have been nominated to the Indian Civil Service under the Indian Civil Service (Temporary Provisions) Act, 1915: Lieut. G. G. Hooper, M.C., and Captain A. S. Larkin, Bengal; Captain A. V. Askwith, Punjab; Captain R. P. Ward, M.C., D.F.C., Bihar and Orissa; Major G. H. Forty, M.C., Central Provinces. Captain A. H. Seymour and Lieutenant G. N. Martin are allotted to Burma.

Our Cyprus Correspondent writes (May 14):—

The Chief Secretary, Mr. C. Fenn, has left for England on leave.

Major W. H. Flinn, O.B.E., has been appointed as Assistant to the Chief Secretary.

Dr. E. Corsellis, D.M.O., will act as Chief Medical Officer.

Mr. W. A. Bowring is appointed Inspector of Fisheries, and Mr. C. F. Lee as Assistant Postmaster.

Captain W. Bradburn, L.C.P., is appointed Visitor of the Central Prisons.

The Duke of Connaught was present at the dinner given (on May 27) in honour of Viscount Chelmsford by the India Office at Claridge's Hotel. Among those present were:—The Lord Chancellor, Lord Lytton, Mr. Churchill, Lord Inchcape, Lord Donoughmore, Sir George Roos-Kepell, Sir George Barnes, General Sir Edmund Barrow, Sir Hamilton Grant, Sir Murray Hammick, Sir George Lowndes, Lieutenant-Colonel H. Austin Smith, Lieutenant-Colonel R. Verney, Mr. Alan Parsons, Captain A. Lascelles, Mr. S. K. Brown, Mr. Goodenough, Sir Malcolm Seton, Mr. Sheppard, Mr. Charles Roberts, Mr. E. S. Montagu, Mr. Chamberlain, M. S. Sastri, Lord Cromer, Mr. H. A. L. Fisher, Lord Stamfordham, Sir Robert Horne, Sir Sahibzada Abdul-Quaijun, Lord Meston, Sir Charles Bayley, Sir Archdale Earle, Mr. Howard, Mr. Aftab, Sir J. Brunyate, Syed Ameer Ali, Sir William Meyer, Sir Sankaran Nair, and Lord Pentland. Lord Curzon of Kedleston, Lord Morley of Blackburn, and Mr. Balfour were unavoidably prevented from attending.

APPOINTMENTS, ETC.

M. Delyanni, Greek Consul-General in London, having been transferred to a similar post at Tunis, M. D. Inglessis, acting Secretary to the Greek Legation, will take charge of the Consulate.

The King has been pleased to approve the appointment of Mr. Samuel Wilberforce, I.C.S., to be a Puisne Judge of the Lahore High Court in succession to Mr. L. H. Leslie Jones, I.C.S., who is retiring from the Bench.

Pending confirmation of the newly-created Moslem Council, the High Commissioner of Palestine has appointed Haj Amin Husseini Effendi to be Acting Grand Mufti of Jerusalem. His Eminence is brother of the late Grand Mufti, Kamil Husseini Effendi, who died on March 20 last.

OBITUARY.

The death of Mr. Herbert Barfield, general manager of the Ottoman Railway from Smyrna to Aidin, is announced in a Reuter telegram from Smyrna.

The death has occurred, at the age of 79, of Admiral of the Fleet Sir Arthur Knyvet Wilson, V.C. He entered the Navy in 1855, and served as a midshipman in the Algiers during the Crimean War, receiving the Crimean and Turkish medals with the Sebastopol clasp. He assisted at the bombardment of Alexandria in 1881, and in 1884 was present with the Naval Brigade at El Teb, where he won the Victoria Cross. His extremely distinguished career included service in many other waters.

M. MILENKO VESNITCH.

M. Vesnitch, Yugoslav Minister in Paris, died suddenly in that city last Saturday, May 28, from heart failure. The loss will be a very heavy one for his country; for he had served it faithfully and well both at home and abroad over a long period of years; and his reputation as a diplomatist was deservedly high. He was Serbian Minister in Rome for three years and then (1904) in Paris. In 1912 he was one of the Serbian representatives for the negotiations for the Peace of London; a few years later he was in Washington on a special mission; and just a year ago he became Prime Minister of Yugoslavia and held the position for about six months. But all these labours may be said to have been merely temporary, and it was in Paris that most of his work was done. Nevertheless, in taking office as Prime Minister at a time when political rivalries were acute and party manœuvring had brought about a deadlock, he probably served his country better than in any other way. As our Belgrade Correspondent made clear, his tact and suavity carried him and Yugoslavia through troubles and over difficulties which had proved too much for the more robust methods of other politicians, and he was able to see the newly-united kingdom safely past what looked at one time a very awkward corner. He was of a type that is rather rare in the Balkans, and his loss will be regretted not only in Yugoslavia but in all circles interested in that region.

SUMMER PALACE HOTEL,

(C. CORTELLETO, Mng. Proprietor),
GIYMENOPOULO, RAMLEH.

EGYPT'S LIMITATIONS.

In all probability a variety of causes helped to produce the recent riots in Alexandria. A pro-Turkish demonstration, which irritated the Greeks of the Hamamil quarter, may have started the outbreak, but it is evident that there was a quantity of inflammable material in the town, on which the demonstration acted as a spark. The Greeks had to bear the brunt of the attack, as they would be the first to be encountered by a mob emanating from that part of Alexandria, and, if it be true that they used their revolvers rather prematurely, they would naturally be singled out for vengeance. But there was clearly some organisation behind the rioting, which was directed against foreigners in general. Even if the hand of Angora were discernible, it would not have been attracted there, unless the ground had been regarded as being particularly suitable. At the root of the trouble, therefore, is the ferment into which Egypt has been thrown by the quarrel between the Prime Minister and Zaghloul Pasha. In this duel neither the local British authorities nor the British community have any part, and inasmuch as Zaghloul Pasha has protested against his policy being styled inflammatory it may be as well to recall the course of events. Some two years ago misgivings did exist among Egyptians in regard to the intentions of Great Britain for the future government of the country. A draft constitution had been drawn up without reference to Egyptian opinion, which was considered by an important section of the educated classes as falling short of legitimate Egyptian aspirations. The issue then was between the Egyptians and the British, and the only method of urging their case that commended itself to the former was to indulge in disturbances throughout the country aimed at the British inhabitants and the British troops. It may not have been a wise policy to adopt; but at least it had precedent behind it. To-day, however, it is not a question of Great Britain's thwarting Egypt's wishes—an agreement was negotiated and accepted by Zaghloul Pasha himself to form the basis of the new treaty which will determine Egypt's future status. When, after accepting the terms of the agreement, he sought to introduce fresh reservations, the British Government showed its readiness to meet him by declaring publicly its recognition that the term Protectorate had to be abandoned. At the present moment, therefore, there is no real grievance between Zaghloul Pasha or the Egyptians and Great Britain. The issue is solely and entirely between Zaghloul Pasha and the Egyptian Prime Minister as to the composition of the delegation which is to negotiate the final terms of the treaty between Great Britain and Egypt. But in the furtherance of his cause Zaghloul Pasha has encouraged a recrudescence of the disturbances that served his purpose two years ago. His followers—now almost exclusively students and a street mob—have resorted to the same tactics. He protests,

however, that the painful events in Alexandria have nothing to do with politics, and asks that a nation should not be condemned on a fortuitous incident. Whatever local colouring the Alexandria riots may have taken, there can be little doubt that behind them was in part the same influence that led to the riots in Tintah, and has organised demonstrations in Cairo and elsewhere. Moreover, it is not a question of condemning the Egyptian nation. The sympathies of all thinking people go out to it at this time; blame is reserved for a leader who does not hesitate to enlist the low passions that can be found in most nations and to prejudice the future of the country in the furtherance of a personal quarrel with one of his own countrymen.

Great Britain, it would be well for Zaghloul Pasha and the half-baked students who do his bidding to understand, is not concerned with the composition of the delegation that is to negotiate the treaty between the two countries. That is Egypt's affair. Zaghloul Pasha's protestations fall somewhat flat in view of the fact that he was invited to be a member of the delegation. If he had accepted, no one would have thought of suggesting that the delegation had not the country's confidence or was not qualified to speak on its behalf. Egypt to-day is disturbed from one end to another, and Egyptian blood is being shed in the streets of various towns simply because the vanity of Zaghloul Pasha was hurt at his not being offered the leadership of the delegation, which had of necessity to go to the Prime Minister. He has taken advantage of his popularity to make with the unthinking section of the people a national issue of a purely personal question. That way lies neither statesmanship nor patriotism, and it is not a matter for surprise that the saner among his own followers as well as all level-headed onlookers have lost faith in a man who can serve his country so ill. Zaghloul Pasha would have the world believe that only a delegation in which Egypt as a whole has full confidence can negotiate a treaty with any prospect of success. The contention does not hold water. The outlines of the treaty have already been agreed upon by Zaghloul Pasha himself; all that remains to be done is to fill in the details in accordance with the principles laid down in London. Those principles have been accepted by the Egyptian people as a whole, and no one would have thought of challenging Adly Pasha's right to head the delegation which is to draw up the final treaty if Zaghloul Pasha had not done so from mere personal jealousy.

It is inevitable that the events at Alexandria should be considered in many quarters in the light of the proposed change in the status of Egypt. The recently formed British Union has pointed out in a memorandum to the High Commissioner that, as the experiment of leaving Egyptians in control, which was rightly made, has proved a failure, in that the disturbances could not be quelled by the Egyptian police and army, the duty of maintaining order rests with the British Government. Behind this obvious contention there is the *a fortiori* argument that the duty of protecting Europeans will be still more incumbent upon Great Britain when the experiment of leaving Egyptians in control is made on a much larger scale. Unfortunately, those who are inspiring the unrest do not realise that they are prejudicing the very cause that they have at heart. It matters not who forms the delegation to negotiate the treaty when every thinking person, whether Egyptian or not, must realise that Egypt's case has lost ground since Zaghloul Pasha returned to the country. It is conceivable that there should be a point in connection with the unrest at which the British Government might have to take up the attitude that it must postpone indefinitely the treaty negotiations. We do not believe that such a point has yet been reached; but the action of Zaghloul Pasha suggests that he would rather face that eventuality than abandon his personal quarrel with the Egyptian Cabinet.

THE RIOTING IN EGYPT.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, May 22.

Zaghloul's Responsibility.

Unfortunately the forecast made in my letter of April 30 that as a consequence of Zaghloul Pasha's attitude we should in all probability again have demonstrations and trouble has been realised this past week, which has witnessed scenes in Cairo and Alexandria reminiscent of what took place two years ago. The details will have already been conveyed to you by cable. There is, therefore, little need for me to describe them here; but they are deserving of some serious comment.

In the minds of all sensible people, be they Europeans or Egyptians, there is not a shadow of doubt that Zaghloul Pasha and his supporters are responsible for the disturbances that have taken place. Ever since his return we have had demonstrations. These at first consisted in the main of students, and the Government scarcely interfered with them. But as the political situation developed as a result of Zaghloul's disagreement with the Cabinet, and as his attacks assumed a more and more violent tone, so the character of these demonstrations changed. Students took less and less active part in them, and the majority of the participants have been riff-raff and the scum of the cities. When they became a direct menace to the public security the Government had to take severe action to preserve the public peace; and its first relatively lenient measures having had no restraining effect, the authorities have had to have recourse to force and firearms in the interest of the community at large, whose welfare was seriously menaced.

Whether the student demonstrations could be regarded as an outward sign of public feeling in regard to the political controversy is a matter which permits of argument, but no sensible-minded man would maintain for one moment that the scenes which we have witnessed during the past week had any connection with the political situation, beyond the fact that they were deliberately organised by those who have every interest in making the position of the Cabinet untenable. The "demonstrations" which took place here and in Alexandria consisted in the main of roughs and the low-class element. There was, it is true, a sprinkling of the student class, but they were very much in the minority, and their role seemed to be to efface themselves as soon as the mob had been sufficiently excited. The fact that these demonstrators came armed with all manner of weapons, and that instead of trying to "demonstrate" in the recognised fashion they deliberately attacked the Police and the Caracols is clear evidence that it was a thoroughly organised attempt to create a sort of revolution and bring about, if possible, the overthrow of the Government.

The Mob's Idol.

It is idle for Zaghloul to repudiate all responsibility. There are his speeches and his interviews to prove that he has been steadily inciting the country against the Cabinet, and the serious feature in his own personal attitude during the past week has been the series of telegrams addressed to the Sultan in which by implication, clearly understood by the people, with whose mentality he has been well acquainted since the days of "Arabi," he has endeavoured to draw the Sultan into the political arena.

That his opposition to the Cabinet can only be personal is self-evident from the letter proposing the formation of the Official Delegation addressed by Adly Pasha to the Sultan, in which the Premier makes clear that the objects for which the negotiations are to be undertaken agree with all the conditions which up to a short time ago Zaghloul himself imposed as essential, with the exception of the presidency. Since it was Zaghloul who said he must himself control the Official Delegation, and since until he voiced this view nobody had dreamed of any other President but Adly, it follows that Zaghloul's opposition to the Cabinet is at bottom due to the refusal to accept his point of view; though since then he has characteristically increased his demands, including the

definite abolition of the Protectorate before any negotiations are entered upon.

What makes Zaghloul's attitude all the more unpardonable is his abuse of the position he holds amongst the masses. He knows that a large proportion of the population has blind confidence in him. They are not in the habit of reasoning; they have come to identify him with the claim for complete independence, which they believe means personal liberty and in fact an "Eldorado" for themselves; and they think he can do no wrong. The responsibility reposing on Zaghloul is therefore all the greater, and he cannot absolve himself of the accusation that because of personal ambition he has taken advantage of the childlike confidence which the large mass of his uninstructed fellow countrymen have in him and has deliberately set himself to throw the country into a state of anarchy in order to bring about the downfall of the Cabinet and gratify his *amour propre*.

Europeans' Attitude.

The events of the past weeks have not unnaturally alarmed the foreign communities, although the latter have not directly suffered. When, however, with British control still here, such scenes as have been witnessed are possible, one can understand that the foreign residents are now more than ever disinclined to view with a favourable eye the prospects of a self-governing Egypt without the guarantee afforded by the presence, though in their barracks, of British troops. Indeed, the tactics adopted by Zaghloul and his supporters have done the Egyptian cause more harm than anything else could have done. This is recognised by the more far-seeing and instructed Egyptians, who have appealed to him to express his disapproval of these mob demonstrations. But, far from disapproving, Zaghloul, in his latest communication to the Sultan, has tried to explain away these regrettable incidents by imputing the blame to the Government, whom he accuses of preventing the people from giving expression to their disapproval of the Cabinet and support of himself. The falsity of these allegations is patent to all who have inquired into the matter and who realise the true facts of the situation.

Zaghloul's attitude and what has happened during the past week have, indeed, constituted a challenge to authority which no self-respecting Government can ignore, and the Cabinet is, in the opinion of all European residents, as well as well-advised Egyptians, fully justified in taking the extreme measures which it proposes to take. Apart from the necessity of avoiding the risk that such riots might rapidly develop into attacks on the European element, there is the obvious fact that any weakness or concessions at this juncture would mean that Zaghloul would become dictator and mob-law his hand-maiden.

The Cabinet recognises that it is only by restoring order and enforcing respect for the Government that the confidence in the ability of the Egyptians to manage their own affairs, which the events of the past five weeks had shaken, can be re-created: and in its measures to attain this end it stands assured of the support of the whole European community and of every rationally minded Egyptian.

THE LATE BISHOP BLYTH.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Many of your readers may like to know that a memorial is to be placed in St. George's Collegiate Church, Jerusalem, in memory of the late Bishop Blyth. It will consist of a carved oak altar, for which, as well as for the reredos and sanctuary paneling, beautiful designs are prepared.

Bishop Blyth always acted on the basic principles which underlie the Anglican Communion. He set his face steadily against proselytising from the Eastern Churches, and in consequence soon obtained their goodwill. The "great work which he did in bringing together East and West" is borne witness to by British administrators. None of the buildings which he erected were injured by the Turks during the war. He did much to push men forward towards the Christ-like ideal of "doing to others as we should like them to do to us," and remembering that "those who are not against us are for us."

Any of the undersigned will gladly receive donations. They should be sent to 12, Warwick Square, London, S.W.1. Cheques should be crossed "Bishop Blyth Memorial Fund."—We are, etc.,

R. S. COPESTON,	REGINALD WINGATE,
CHARLES GORE,	ATHELSTAN RILEY,
C. J. RIDGEWAY,	D. S. MARGOLIOUTH,
LLEWELLYN H. GWYNNE,	BERESFORD POTTER,
E. M. BICKERSTETH.	

THE CARAVANSERAI.

*Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultan after Sultan with his Pomp
Abode his Hour or two, and went his way.*

—OMAR KHAYYAM.

The following incident was described in the *Balkan News* during the campaign in Macedonia. The A.P.M. and some military police were searching a Greek village for stolen British uniforms and other Government property. In the absence of the *mukhtar*, the village priest received them, and offered every assistance, thus greatly facilitating their task. He pressed them to search his house, too, so that there should be no charge of favouritism; and, of course, they came across nothing. The worthy priest then led them to his outbuildings, and insisted on their searching thoroughly, even in his loft. To open the door of the loft the old pop's wife climbed up a ladder in advance, thus innocently revealing, to the astonished gaze of the A.P.M. and his men a pair of British cavalry riding breeches beneath her ample skirts! What happened to the lady, her husband, or the garments, I am unable to say.

A friend tells me that an Anglo-Greek, whose knowledge of his ancestral language was derived more from English public schools than from his motherland, was engaged as officer interpreter with a brigade operating in Macedonia during the war. He had occasion to write an official note to the local Greek gendarmerie officer, which he managed in Greek of the classical style until he came to the signature. "What the dickens is the Greek for liaison officer?" he asked himself, and looked up the expression in a dictionary. But such works contain pitfalls for the unwary, and the astonished Hellene came hurrying to call upon the British officer who signed himself:

ὁ ἀνομικὸς τῶν ἀνεπιτρεχόντων σχέσεων

That is—"Officer of Illicit Connections."

Here is a charming specimen of "English as she is wrote." A Serbian interpreter employed with a native labour battalion in the Salonika force sent the following delightful chit to his O.C.: "Sr kepten—Plis tis leber men nugodno tabaka ken ai tek sam end meches for tis chaps. ef yu van. In san ir Respekli Zhivojin," which, being interpreted, means: "Mr. Captain.—Please. These labour men have got no tobacco. Can I take some and matches for these chaps. If you want [i.e., wish].—I am, yours respectfully, Zhivojin."

I heard the other day a new version of a story which I seem to remember hearing, in another form, many years ago in Constantinople. In case it may be new to some readers, I give it. A certain angelic visitor came to earth, and had during his stay three servants: a Frank, a Jew, and an Armenian. His mission on earth completed, he wished to reward these three; and accordingly called them to him, one at a time. First came the Frank, who when asked to choose a gift for himself, promptly replied: "Power." "Good," said his master. "Power is yours henceforth." Next he called the Jew, who quickly asked: "Is there any Money in it?" "Yes, you may have Money, if you wish for it." "Then I choose Money." "So be it." And last came the Armenian. "What have the others chosen?" he asked; and was informed regarding their selections. For a moment he looked downcast, and murmured: "Money's gone!" Then he brightened up. "All I ask," said he, "is a little knowledge." "Very good indeed! Certainly you shall have it. What do you desire to know?" "Which of the other two has the Money." And there can be no doubt that the tale accurately depicts the view of the average Turk, Kurd, or Arab, regarding the three races.

THE KING EDWARD STATUE.

Their Majesties the King and Queen visited the Burton Foundry at Thames Ditton on Saturday afternoon to inspect the equestrian statue of King Edward VII. by Sir Thomas Brock, R.A., which is to be erected at New Delhi. Their Majesties congratulated the sculptor on his work, pronouncing the likeness to be excellent, and they also complimented Mr. Burton on the successful way in which the work had been cast in bronze.

NEWS IN BRIEF.

Half the employees in the China Mill at Bombay resumed work last week after being on strike since May 17.

Mamduh Chocket Bey, the representative of the Anatolian Government to Azerbaijan, has arrived in Baku.

Bulgarian business men have been invited to take part in the national fair which is to be held in Gotheburg, July 4 to 10.

Rakheem Seapot (50), an Indian seaman, was sentenced at West Ham Police Court recently to thirty-one days' imprisonment for being in the unlawful possession of opium.

It is declared in Athens that complete agreement exists between Serbia and Greece on the subject of Albania, and that the Albanians will shortly send a delegation to Athens.

The Albanians, says Reuter, have presented a fresh ultimatum to the town of Chimarra, demanding that it shall accept Albanian control of the Customs and shall fly the Albanian flag.

Information has been received in London to the effect that the Kemalist Turks have surrounded the Armenian stronghold of Zeitun, in the eastern Cilician mountains, forty miles north of Marash.

The Rome correspondent of the *Morning Post* writes (May 27):—The Commission for Cultural Relations between Italy and Yugoslavia, appointed under the Treaty of Rapallo, has begun its sittings here. The respective chairmen are Senator Ruffini, who presided over the Congress of Oppressed Nationalities in 1918, and Count Louis Voynovitch, of Ragusa, who represented Montenegro at the London Conference of 1913.

At the annual meeting of the League of British Jews, held at 38, Fitzroy Square, W., lately, the following resolution was carried unanimously:—"That the Executive of the League be instructed to approach the Government with a view to obtaining a modification of Clause 129 of the Treaty of Sevres, so as to prevent any British subject from being compelled to surrender his citizenship as a consequence of his residence in Palestine."

Dr. Weizmann, the Zionist leader, and Professor Albert Einstein, who are on tour in America, lately visited Boston, where a great Jewish demonstration took place, at which 200,000 dollars (£50,000) were promised for the Palestine Foundation Fund, and 20,000 dollars (£5,000) for the Hebrew University in Jerusalem.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Handicapping Trade.

The proposed new postal increases came as a shock to the business community. While no hopes were entertained that there would be a move in the direction of pre-war rates in the immediate future, the view was universally held that there would be no further increase. However, the Post Office now anticipates a heavy deficit, and, as is the way of bureaucrats, can conceive no better way of meeting it than by a further rise in rates. Most people looking at the swollen establishment of the Post Office would imagine that there was another and a more obvious alternative; but evidently economy will only come into serious consideration when all other things fail, and meanwhile, unless better counsels prevail—a not impossible contingency in view of the attitude of the business world to the proposals—commerce is to be further handicapped at a time when it is essential that it should be as free as possible from unnecessary restrictions.

Effect of Proposals.

The most serious aspect of the proposals is their probable effect on our foreign trade. It is impossible to justify the additional tax on enterprise entailed in the increase in the foreign letter post, and from the point of view of revenue it would undoubtedly be a far sounder policy to decrease the rates. Another and a more vital question is raised by the increase in the rates for printed matter. The extension of British trade enterprise depends very largely on the circulation of trade journals and newspapers abroad, and the result of this increase will inevitably be that there will be a reduction in the distribution of these publications abroad, with a corresponding effect on trade. One can only suppose that this aspect has escaped the attention of those responsible for the proposal, otherwise the policy would be unintelligible, and it is to be hoped that in this respect at least wiser counsels will prevail.

Export Credits.

A further development of the British export credits scheme is marked by a Bill which has just been introduced by the Board of Trade under the title "Overseas Trade (Credits and Insurance) Amendment Bill." The scheme as it stands at present is designed to further the development of trade with countries which have suffered through the war, such as Poland, Czechoslovakia, and the Balkan countries, and under the Act of 1920 £26,000,000 may be utilised for this purpose, of which up to the present it appears that only £8,000,000 has been required. Presumably because the Ter Meulen scheme has been officially approved, it would appear that the authorities consider that the time is coming when it will be necessary to find a wider field for the British scheme, and the new Bill proposes to enlarge its scope to include all parts of the British Empire, including Protectorates and mandated countries.

Why?

Whether an export credits scheme can render any considerable service to Imperial trade as a whole would seem to be a matter for considerable doubt; though I imagine that it might prove useful in connection with the development of trade with the mandated territories. But—and this is the crux of the position—if I am right in assuming that the adoption of the Ter Meulen scheme is the reason for this step, it can only be said that the authorities are taking things very much for granted. I have dealt at length with the Ter Meulen project in recent issues, and I do not propose now to recapitulate my views regarding it. But I must say that when, as apparently is the case in the present instance, the adoption of a scheme depends on the energy with which voluntary propaganda is carried on, it is, at any rate, somewhat optimistic to assume that it will come into operation at all on a considerable scale.

Burmah Oil.

The proposed final distribution on the ordinary shares of the Burmah Oil Company of 4s. per share, free of tax, making 30 per cent. for year, marks a considerable reduction on last year's dividend, which amounted to 50 per cent. It has to be remembered, however, that a year ago the ordinary share capital was increased by a bonus share

distribution from £2,857,500 to £5,143,500, and the dividend is actually equal to 54 per cent. on the original capital. At last year's annual meeting the chairman emphasised the point that it would be impossible to maintain the rate of dividend on the increased share capital, which, of course, prepared shareholders for a considerable reduction. Besides the reduction of the dividend, it is proposed to reorganise and increase the preference share capital. There are at present two classes of preference shares, both 6 per cent., but of the denomination respectively of £1 and £10.

Increase of Capital.

It is proposed to raise the yield on both classes to 6½ per cent. and to divide the £10 second preference shares into £1 shares, thus making them a first preference issue, though the existing holders will have certain rights reserved to them. It is further proposed that power should be taken to create an additional £1,000,000 first preference shares, and that the authorised capital should be increased by the creation of £5,000,000 8 per cent. preference shares, the bulk of which it is proposed to issue in the immediate future. The new capital is required in consequence of the rapidity with which the company's business has developed, but it strikes one as rather surprising that the eventuality was not foreseen at the time of the issue of the bonus shares. The Burmah Oil Company is, of course, in an exceptionally favourable position, since, apart from its own properties, it has a one-third interest in the Anglo-Persian Company, from which it is certain to derive increasingly satisfactory results as the years go on, and during the past twelve months it has further strengthened its position by the acquisition out of revenue of the preference and ordinary shares of the Assam Oil Company at £2 per share. In the circumstances it is perhaps not surprising that the reduced dividend and the proposed new issue of shares should have had little appreciable effect on the quotation of the company's shares.

An Interesting Scheme.

The depreciation of the drachma has naturally had an effect on Greece's purchasing power abroad, and with a view to overcoming this difficulty the proposal has now been mooted that endeavours should be made to exchange the large stocks of unsold tobacco in Greece and abroad for goods which the country requires. This, in other words, is the proposal of barter as a remedy for the exchange. There is much to be said in favour of the project, if it were feasible, but it has yet to be explained how barter can be effected between countries without a common basis (i.e., money) by which values can be fixed. The merchant selling at this end will still want payment in sterling, and Greece will still have difficulty in selling enough goods to obtain that sterling. There is, indeed, in regard to tobacco the further difficulty that at present stocks of tobacco here and elsewhere are very large, and the problem will be to find a customer for the tobacco from whom at the same time they can draw the required supplies.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

GREECE.

ATHENS, May 17.

The Depreciation of the Drachma.

The sudden and rapid depreciation of the drachma at the beginning of this week was a phenomenon in the financial history of Greece. It seems almost incredible that at 3 p.m. on one day the pound sterling should be worth 72 drachmæ, and that at noon on the following day it should jump up to 95 drachmæ. That these figures were not in any way an indication of the actual value of Greek currency was proved a few hours later.

As stated above, at twelve o'clock the banks were buying pounds at 95 drachmæ, while privately as much as 105 drachmæ were offered. At 3 p.m. the banks would not give more than 90 drachmæ, and at 3.30, with the exception of one solitary bank which for about a quarter of an hour was buying at 85 and subsequently reduced the rate to 80, the remainder would not give more than 78. One bank refused point blank to buy pounds!

What was the cause of this financial crisis? Some—and these represent the majority—attribute it to speculation, which has been rife of late, and others to the financial boycott of Greece by the Allies. The latter opinion is shared by M. Eftaxias, a member of the Constituent Assembly and ex-Governor of the National Bank of Greece.

The Government, realising the seriousness of the situation, and in order to prevent a repetition of last Monday's financial panic, decided to take exceptionally drastic measures. While the Government papers announced in large type letters that the Allies had consented to allow Greece to draw the unused credits in England and America granted to M. Venizelos's Government, hurried Councils of Ministers and conferences with the bank directors, the president of the Commercial Syllogue and other financial authorities followed one another. Long discussions ensued at which everybody volunteered to give advice and all sorts of remedies—most of them impracticable—were suggested. The Government finally came to the conclusion that speculation was the main cause of the trouble, and it was decided that the banks should be invited to form a "Consortium," which would concentrate in its hands the entire import and export movement of moneys, bonds, etc. The Bill will be voted at to-morrow's sitting of the National Assembly, and I hope to be able to give full particulars of the scheme next week.

Trade with Egypt.

The value of the goods exported to Egypt during January amounted to £E116,575, as against £E164,803 during the corresponding period last year. The imports from Egypt to Greece during the same month amounted to £E18,494, as against £E50,780 in January, 1920. The following are the principal goods exported to Egypt during January:—Olives, £E16,069; olive oil, £E9,237; cognac, £E2,241; apples and pears, £E4,590; wines, £E4,563; resin, £E1,528; dry figs, £E1,730; soap, £E2,735; cheese, £E5,752; tobacco, £E59,886. The value of tobacco exported in January, 1920, was £E130,962. The principal goods imported from Egypt were the following:—Cotton, £E2,162; hides, £E3,400; sesame, £E4,572; phosphorus, £E2,184.

SYRIA.

BEYROUT, May 13.

The Beyrout Fair.

Since the arrival of General Gouraud the work on the Beyrout Fair has been pushed on energetically. All the buildings of the fair, the pavilions in the Garden of the Place des Canons, the restaurant north of the old Seraglio, and the monumental archways at the entrances of the fair, are designed in fine Moorish style, and at night, when brilliantly lighted with electricity, these scattered groups of buildings, together with the numerous stands in Allenby Street, look like a fairy city, strongly reminiscent of city fairs in France. As a Frenchman said, it is a little corner of France. The Gallicising process is especially noticeable in the transformation of the bare old Moslem cemetery north of the Seraglio into a trim esplanade, with an elegant restaurant where the military band performs every afternoon. The site is unique, dominating the harbour and the hills; and at night, with the glittering lights of the warships and merchantmen, the scene is strikingly beautiful.

It is now being realised that it was the personal influence of General Gouraud that brought the fair into being, and that it was thanks to his personal interest rather than to the expected economic results that so much money and energy have been spent on this undertaking, to which the French Government has accorded the importance usually conferred on European exhibitions. Thus M. Fernand David, Senator of the Haute Savoie and an ex-Minister, has been delegated by M. Briand, the French Premier, and by M. Dior, the Minister of Commerce, to represent the French Government, while M. Grandguillot, Director of the Offices of the Levant, has been appointed by the Minister of Commerce to act as his delegate at the fair, which thereby acquires an official character.

M. and Mme. Fernand David, Deputy and Mme. Soulié, and other visitors of distinction have, since their arrival by the s.s. Sphinx, been entertained by the High Commissioner, the Governor-General of the Greater Lebanon, the President and members of the Administrative Commission, by a group of Syrian notables, and by the Syrio-Lebanese Touring Club, an offshoot of the Touring Club de France, which aims at developing the unique resources of the Lebanon as a summer and health resort. The fair seems to have been meant more as a *trait d'union* between France and Syria than as a purely economic undertaking. It is what might be called a *reclame*, and, politically speaking, it has been, from the point of view of its promoters, a success. Everything has been done to contribute to this result. Thus there have been reduced fares from and to Marseilles, exemption from Customs duty of exhibited goods, special railway trains to and from the interior with reduced return tickets, also special motor services, etc.

Economically speaking, if we are to believe the comments of the Press, the venture would appear to be also a success, and yet so far there have only been 35,000 visitors. According to some private statements, however, some of the representatives of French firms have done such poor business that they have packed up and returned. Of course, this is a far from propitious time. A world crisis like the present one weighs very heavily on a poor country like Syria, which for the last two years has been importing large quantities of goods and exporting next to nothing. It is said that the fair may be resumed in the autumn, when economic conditions may be more normal.

BULGARIA.

SOFIA, May 23.

The Financial Position.

May is now drawing to a close, and the leva, which made a feeble upward spurt ten days ago, is back again at 325 levas to the £1. Speculators have only one fact to go on, and that is the performance of the leva last year; twelve months ago it was approximately what it is to-day, but during June and July it steadily rose until about the middle of July it reached 170, from whence it went as steadily back again to its present rate. The rise last year was attributed to the good harvest, and as the 1921 crop promises to be equally good, it is to be hoped a rise will soon ensue.

But what is concerning the leading financiers of the country is that day by day Bulgarian capital is slowly leaving the country. Some goes out in lawful ways, some in unlawful ways, and in the first category may be mentioned the capital that foreign banks are collecting in

deposit receipts and other forms of banking business. The bank "Bulgar-Italian," founded only some two years ago, has deposit receipts amounting to 200 million levas. Where do all these levas come from? The answer is simple. They are levas which the average Bulgarian is afraid to entrust to a purely Bulgarian bank. He fears that his money may be expropriated in some shape or form. It would seem that this matter should interest the Reparations Commission, whose duty it is to exact money from the country. They will not be able to succeed in their task if present developments continue.

ALBANIA.

TIRANA, May 22.

Discovery of Coal.

North-east of Tirana the discovery has been made of extensive coal-bearing seams, which it is hoped will prove to be very rich. The existence of lignite in Albania has been known for a long time, but this is the first time that coal has been found.

Goods Needed.

British traders will be interested to know that Albania needs cotton and woollen goods, leather goods, glassware, and hardware. The country also requires agricultural machinery, such as carts, reapers, small threshing machines, pumping machines, also paper and printing machinery.

The printing industry, which is of very recent origin in Albania, is growing, and already twelve papers are appearing in various towns.

END OF

RATORIUM.

We give below the text of the Bulgarian Law bringing the Moratorium to an end.

1. The Law of the Moratorium of July 28, 1914, amended and completed by the Law of October 24, 1914, and by the Temporary Order of September 26, 1915, is hereby revoked, and the run of the periods of terms, which were suspended, are revived from the date on which the law shall enter into operation.

Note 1. No interest shall be paid during the moratorium period for the moratorium obligations towards private banks and persons from July 28, 1915, till the date on which this Act shall enter into force. Note 2. All moratorium obligations

agreed to be paid in gold shall be paid in gold bank-notes instead, instead.

2. Debtors who have suffered in property through the war, invalids (disabled soldiers), and heirs of debtors, killed in the war, who have not got enough means to pay at once all their obligations which are now required to be paid, may be granted a postponement by the court, according to the amount of their debts and their means of payment; but this postponement must not delay the complete payment of their debts for more than one year after the date on which payment was due.

3. The appeal for postponement of payment is to be addressed to the court at which the creditor has addressed his request for payment of his claims, and which is entitled to pronounce a judgment. The appeal could be made to the Judiciary Sheriff, charged with collection of the debts, who, after arranging all that is necessary to safeguard the creditor's claims, but without undertaking any other executionary actions, shall transmit the appeal to the court which has issued the executory judgment order. In this case the appeal for postponement of payment is to be considered and decided by the court, which is obliged to do this at its first sitting, before beginning to consider any other cases, and after hearing both sides, if they have appeared, giving a judgment only on evidence, which has been produced at that particular sitting. The decision of the court shall be final, and there shall be no further appeal.

4. This law is to enter into force at the expiration of three months' time after the date of its publication, and in regard to prisoners of war—in six months after the date of their return and in no case earlier than that.

Note.—With regard to payments of debts of Bulgarian nationals due in Allied and Associated countries, according to the Treaty of Peace of Neuilly, this law enters into force from the date of its publication in the *State Gazette*. Postponement of payment and the way in which this is to be done is left free to voluntary agreement between debtors and creditors.

We order this Law to be stamped with the State Seal, and to be published in the *State Gazette*, and to be put into force. The Ministry of Justice is being charged with the execution of this Law.

Issued in Tzarska Bistrizta, May 6, 1921.

(Signed) BORIS III.

The annual meeting of the Association of British Chambers of Commerce, which was postponed owing to the coal strike, is to be held on June 16 and 17.

Mr. Alfred Silley, trading as Messrs. Silley and Co., of Constantinople, has admitted his son, Mr. Cecil C. Silley, as a partner, and the firm will henceforth be known as Alfred C. Silley and Son.

OIL IN EGYPT. POLICY OF THE GOVERNMENT.

In the now almost forgotten period before the war, when coal was readily available at a cheap price, there was no necessity for countries which lacked that fuel to concern themselves unduly as to whether or not they possessed extensive oil deposits, and the policy pursued in Egypt as regards petroleum mining was restricted until recent years to the grant of authorisations to prospect for petroleum in specified areas. This policy, it is pointed out in a recently issued brochure,* was based upon the consideration that petroleum mining is an extremely speculative venture except in well-proved fields, and it is generally recognised that such an enterprise is not one upon which a government can properly embark. The position was vitally altered, however, when coal became neither cheap nor accessible, and when developments at the Hurgada field threw a different light on the prospects of the discovery of oil in Egypt in adequate quantities, and the Government's policy has accordingly gradually developed from a passive attitude to undertaking the actual prospecting for oil itself.

When the work of development was left entirely to mining companies the Government was assured of a substantial return without any risk in the event of oil being found in paying quantities. The nature of the risk of loss may be estimated from the fact that the capital expended by mining companies without result before the war is believed to have amounted to not less than three-quarters of a million. On the other hand, private enterprise in regard to the search for a commodity such as oil is bound to have its limitations, for companies cannot continue to prospect indefinitely without results, while a government is in a specially favoured position to carry out the work, and it is not handicapped as regards expenditure. For a country situated as is Egypt it is essential, in view of developments, that the search for oil should be carried on without delay and over as wide an area as possible. For that result, Government participation is essential.

In the past there has been criticism of the policy of the Government in limiting prospecting areas, and in refusing to acquiesce in a monopolistic position being attained by any particular group. It is maintained that this policy has been fully justified by experience, and that the areas accorded under licence for prospecting have been ample, but that the Government has throughout maintained the greatest objec-

tion to considerable tracts of unexplored territory being steadily squatted on by companies on the plea that these areas provided hypothetical petroliferous reserves. A certain uneasiness has been aroused among companies already engaged in the search for petroleum in Egypt by the decision of the Government to undertake prospecting itself, the view being taken that the arrival of the Government in the prospecting field limits the already restricted territory available for investigation, and that the Government will retain the best areas for itself. Needless to say, there is no foundation for this view. So far an almost negligible portion of land in Egypt has been thoroughly examined for petroleum, and it scarcely needs demonstration that the Government for many years to come will need all the assistance that mining companies can give it in the task of developing the country's oil resources. In brief, public enterprise here cannot be a competitor of private enterprise.

As a matter of fact, so far from limiting the activities of mining companies, the Government's participation will have the effect of increasing the area for enterprise, for the Government's research organisation will in the course of time explore the whole extent of Egyptian territory in preparation for prospecting whether by the Government or by companies. Naturally, the Government, in its research operations, will mark down certain areas for its own investigation, but it is obvious that the extent of territory that it can undertake thoroughly to prospect in a reasonable time is very limited, while, as a result of its research work, mining companies will have at their disposal increasing information as regards the localities most favourable to the occurrence of petroleum.

The Note points out that Egyptian opinion still displays considerable hostility to and suspicion of foreign companies, chiefly on the grounds that they have often acquired a monopolistic position and have made unduly large profits. It is emphasised that it is of the first importance to the country that Egyptian opinion should realise that the aid of a certain number of first-class mining companies is indispensable if an exhaustive search for petroleum is to be conducted throughout Egyptian territory. Doubtless, it is added, the benefits accruing to the country if a mining company finds petroleum are not so great as if it is found by the Government itself; but the benefits are none the less considerable. Moreover, it is infinitely preferable that petroleum should be found by mining companies operating in Egypt than that its discovery should be long postponed or should not take place at all.

OIL OUTPUTS.

Anglo-Egyptian Oilfields production for the week ended May 20: Gensah 52 tons, Hurgada 3,349 tons.

EXECUTOR AND TRUSTEE DUTIES UNDERTAKEN.

ENGINEERING TOPICS.

By our Engineering Representative.

Electric Cranes.

Present methods of production, and the growth and development of machine and engine designs and construction have caused the electric crane to become increasingly popular in all foundries and engineering workshops, where large masses of material, heavy castings and similar weighty or bulky bodies have to be moved.

There are a number of electric cranes and appliances of a similar nature in use; but practically all possess their principal features in common, in that they consist broadly of three units—the bridge, trolley and cage, containing the actual winding machinery controls and accommodation for the operator. The bridge is composed of the truck ends, the necessary girders, and the bridge equipment, in addition to which there are the electric winding motors and the footwalks. All of these demand attention from the "safety first" point of view, and the safety features which safeguard the workmen are now consequently a recognised part of the design. Naturally, one of the first steps towards safety is to see that all parts bearing strain are properly proportioned and that no part of either the crane itself or its mechanism is likely to break down. Taking the footwalk first, it is essential that it should be floored with stout boards which cannot be displaced and which are amply strong, and that it should be fitted with stout hand-rails and secondary rails, so spaced that no person could squeeze his body between them. The floor boards should be protected on either side with a stout iron angle piece running all round the footwalk, and at the least 6 in. in height to prevent tools or loose parts being kicked off the walk into the shop below. The question as to the provision of footwalks on either side of the girder can only be determined by reference to the particular crane and its purpose. Generally speaking, double footways are seldom necessary, but where they are, owing to the design of the crane, their provision is imperative.

As regards the trolley, which comprises the trolley sides, gears and gear boxes, the winding drums, and the electric motors, the greatest safety feature is the limit switch, although the totally enclosed gears are of almost equal importance. Mr. N. Prakken has laid it down that the safest type of upper limit switch is that which opens the hoisting motor circuit through a relay. This switch consists of a weight, a cable, a weighted sheave, and a connection box. An insulated arm that closes the relay circuit by the weight attached to the cable is mounted on the weighted sheave shaft. One of the hoisting cables passes through a loop fastened to the suspended weight. Irrespective of the swinging of the load, the load block in its upper travel will carry the suspended weight upwards, allowing the weighted sheave to open the relay circuit. This, in turn, opens the motor circuit and brings the machinery to rest.

The cage contains the controllers, resistance grids, switchboard and foot control and other levers to start and stop the bridge. A new safe location has been found for the grid resistances which are mounted on a sub-floor underneath the floor of the cage. This floor is provided with trap-doors by means of which the grids can be inspected if required, and the switchboard is placed at the back of the cage, in a closed case. The doors of this are large enough to admit a workman, but by virtue of the enclosure it is impossible for him to stumble and fall to the floor beneath. There is no possibility of even the most heedless or careless of men getting into any position where there might be the risk of an accident.

One of the chief troubles in the past has been to find a method by which the crane could not be started whilst under inspection or repair. Accidents have happened in the past, to men engaged on such work, by thoughtless workmen who have switched on the current without stopping to make certain that all was clear. Just as in the past many a man has been scalded to death with live steam through the action of some brainless mate who has opened the connection between a live boiler and one under repair, so has many a man been killed or maimed by someone throwing over the motor controller without thinking. Now many methods, all of them good in their way, have been adopted to prevent any accidents of the kind occurring. One of the best of these is the breaking of the main electrical circuit in three different places by means of sockets, and closing these with plugs so as to provide the necessary continuity. When repair work is necessary it is usual to send a gang of three men on to the crane, one to repair and overhaul each of the three main parts. The three plugs are removed and one given to each man with the instruction that he is to replace it in position as soon as his share of the work is over. In this way the main cable cannot be made "alive" until all the plugs are in place, which would show that each man had finished his task and was out of the way.

Another method is to place the main switch in an iron-clad case and to keep it locked, entrusting the key to some responsible person on whom dependence may be placed. In the case of a temporary breakdown it is the duty of the crane attendant to report the matter to the maintenance man, who has to visit the key keeper to get the current cut off. As soon as the repairs are completed he is informed and it is his duty to see that everything is clear before he unlocks the case and switches on the current. To the writer this method appears to have little to commend it; there seems no adequate reason for a maintenance man to trouble to report a minor breakdown to the key keeper, and in all probability he would attempt to carry out the repair whilst the current was on rather than go to any trouble over finding a man to unlock a main switch case.

Imported Motor Cars.

I am informed that, as the result of representations made by the Automobile Association to His Majesty's Customs, the association is able to announce that the Commissioners of Customs and Excise are now prepared to allow chassis imported with temporary seats, for the purpose of having bodies built in England, to be admitted on the production of triptyques issued by the Automobile Association or on the deposit of duty. A further important concession is that the cars may be used for touring purposes in this country before re-exportation. The triptyque can be discharged or the duty refunded, as the case may be, when the car is re-exported, provided that the period for which the car is left in England does not exceed that of the validity of the triptyque.

A Combination Tool.

A useful tool for dealing with refractory tyre valves of either the Schrader or the standard type has been recently placed on the market, and from what I have seen I should say there are many times in the life of a motorist when the possession of such a tool would save a good deal of annoyance. Everyone has experienced the difficulty of dealing with a bent or knocked-up valve stem, when pliers, however carefully used, either slip or accentuate the damage. The new tool is specially designed to meet any kind of valve trouble, and by its aid the rubber pin with its holder or the centre plunger can be removed, the seating recut or trued-up, the thread recut on any part of the valve, or the nuts run through with a tap to ensure an easy fit.

Impulse Starters.

Several types of impulse starters are now on the market, and as the modern tendency appears to be setting in the direction of inducing car sales by cutting down costs to a minimum, it is possible that on next year's models the electric starter may be found absent, in which case the impulse starter may fitly take its place. In its simplest form such a starter consists of an arrangement of dogs, ratchets, and a clock spring, and the principle on which it works is that under its action, when the engine is stopped, the armature of the magneto is held back from the clearance gap in the polepieces, so that the lines of force are unbroken. The spring mentioned, which is fairly strong, is under tension, and when the starting handle is moved up once or twice and the cylinders have been filled with mixture, the release of a catch or button flicks the armature smartly over the dead point and produces as hot a spark as it is capable of giving out. It is said that even with dirty plugs good results are obtainable.

SPECIALLY PACKED FOR EXPORT.

One of these little appliances, known as the S.A. impulse starter, has just been placed on the market by Messrs. Brown Bros., and forms what might be called, a standard fitment to any magneto. It is easily fitted, and occupies no more space than the ordinary magneto coupling. The construction is so simple that it appears to me unlikely that any part would get out of order, and once the engine is started the action is that of an ordinary coupling. In order to prevent any misapprehension, it may be emphasised that the appliance is of a mechanical and not of an electrical nature, and that neither accumulators, batteries, nor any other source of electric energy is required with it. Concisely stated, the action of this impulse starter is as follows. The magneto armature is temporarily arrested by the action of pulling the pawl into engagement with the armature plate, which is attached to the armature spindle. The action of arresting the rotation of the armature causes the spiral spring inside the starter to be wound up, and as a result energy is stored in the spring until such time as the cam on the cam-casing disengages the pawl from the armature plate. As soon as this disengagement takes place, the energy stored in the spring imparts a rapid impulse to the magneto armature, which is equal to revolving the armature at about 500 revolutions per minute. This naturally produces an intense spark, which will fire even the weakest mixture. The pawl-operating mechanism is so arranged that immediately the engine revolves under its own power the pawl is thrown out of action. The design of the pawl is such that it is impossible for the impulse starter to come into operation after the engine is running, due to the pawl being arranged in such a manner that it comes under the magnetic influence of the magnets of the magneto, which holds it in position until such time as it is operated by the pull button provided.

Aerial Photography.

Photographs from an aeroplane have presented a new aspect of the science of photography. The results are interesting and novel in effect. I have just received an aerial view showing the great Rolls-Royce works at Derby, which clearly illustrates the vast capacity of this great factory. This factory holds the distinction of having produced the car which has become known as "the best in the world," and the aero engines which hold the wonderful records for reliability, having flown across the Atlantic and from England to Australia, India, and South Africa.

The first aerial flight in the Republic of Honduras has now been effected by a British pilot on a British aeroplane. The machine was a "Bristol Fighter," a type famous in the annals of the air war, and now being extensively converted to use in commercial aviation. The route traversed was between San Pedro Sula and Tegucigalpa, a distance of some 200 miles, and the time occupied in the flight was 1 hour 37½ minutes, an average speed of 110 m.p.h. It is interesting to record that in the course of the flight an altitude of 18,000 ft. was attained.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to March 31 (new style January 14 to April 13), 1921.

	Monopolies, tobacco, stamps, stamped paper Naxos emery.	Piræus Customs.
	Drachmæ.	Drachmæ.
Gross receipts, March, 1921	4,611,619.90	5,245,396.00
Do. do. 1920	5,332,765.90	5,989,892.45
Estimated receipts for 3 months (Law of Control)	7,225,000.00	2,675,000.00
Actual receipts for 3 months, 1921	14,444,687.87	13,714,902.65
Actual receipts for 3 months, 1920	14,520,101.70	15,818,315.90
Difference between estimated and actual receipts for 3 months	1921 +7,219,687.87	+11,039,902.65
	1920 +7,295,101.70	+13,143,315.90

NOTE.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1/5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Uniforms and Boots.—The Secretary-General, Arsenal, Alexandria, invites tenders for the supply of uniforms and boots for second six months 1921-22. July 5.

Grey Cotton Calico, Brushes, Khaki Cotton Handkerchiefs.—The Egyptian War Department invites tenders for the supply of (1) calico, cotton, grey (50,000 yards), June 9; (2) handkerchiefs, cotton, khaki, June 13; (3) brushes (blacking, brass and polishing), June 13. Particulars can be obtained from the Inspecting Engineer, Egyptian Government, Queen Anne's Chambers, Westminster, S.W.1.

Clothing.—The Direction-General of Customs, Alexandria, invites tenders for the supply of clothing required for the personnel of the Customs Administration for the winter of 1921-1922. June 15.

Oils and Paints.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of oils and paints required for second six months of the financial year 1921-1922. June 27.

Timber.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of timber required for second six months of the financial year 1921-1922. July 12.

The Sudan.

Pumping Machinery.—The Superintending Engineer, Department of Agriculture, Sudan Government, Atbara, invites tenders for the supply and erection of pumping machinery, consisting of Diesel or semi-Diesel engines and direct-coupled centrifugal pumps capable of lifting 1,200 litres of water per second against a static head, varying between 2.5 and 8 metres, and the latest date for delivery of machinery at Khartoum North is to be February 28, 1922. June 30.

ENQUIRY BUREAU.

Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge. Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."

ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.

No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.

Agents Wanted Abroad.

ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

110. An engineer-architect in Bulgaria would like to get in touch with British manufacturers of flour-milling machinery who are prepared to consider the opening-up of business in Bulgaria.

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

112. An Alexandria firm wish to enter into business relations with United Kingdom firms dealing in the following exports:—Beers and stout; salmon, sardines, tinned fruit and vegetables; coconut oil; gunny bags; pepper, rice, flour and soap.

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114. Importer in Karachi (India), travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers, and exporters. Specialities:—Exports: Medicinal herbs, dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples, with prices and terms.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—Only a small business has been done in currants, and prices are accordingly easier. Sultanias have been in strong request at firm rates. Apart from these commodities there has been little doing in the market.

Sugar.—Home refined is unchanged. West Indian crystallised has come to business at 53s. to 56s., and American granulated is unaltered at 61s. 6d. Czechoslovakian has been done at 32s.

Coffee.—The futures market has been steady. Quotations are:—May, 40s. 6d.; July, 42s.; September, 42s. 6d.; December, 43s. 6d.; and March, 43s. 9d.

Oilseeds.—A firm tone has prevailed. Indian linseed at 18s. 6d. has gained 6d. Rapeseed is steady, with Toria unchanged at 20s. 6d. and bold Ferozepore 6d. up at 19s. 6d. Cottonseed is unsteady, with Bombay at 10s. 9d., an increase of 1s., and the Egyptian black variety 3d. lower at 12s. 6d.

Oils.—Prices have been variable. Linseed oil is 12s. up at 32s. Rape oil is higher, with crude at 54s. and refined at 62s., increases of 2s. in both quotations. Refined cotton oil at 42s., Egyptian crude at 34s., and deodorised at 48s. are unchanged. Turpentine has shed 7s. during the week at 93s.

ABUNDANT DHURRAH CROP.

(FROM OUR OWN CORRESPONDENT.)

KHARTOUM, May 5.

Kassala Province reports that, as a result of the abnormal flood in the Gash last year, crops are unprecedentedly abundant. The dhurra crop has been exceptionally good, as evidenced by the following official returns (in ardebs) from the various districts, the corresponding figures for 1920 being given in brackets:—Kassala, 150,000 (40,000); Gedaref, 85,000 (40,000); Meftaza, 85,000 (12,670); Butana, 36,000 (4,000); Gallabat, 8,000 (14,000); total, 365,000 ardebs, as compared with 110,670 ardebs for 1920.

It will be remarked that the results from Gallabat are 6,000 ardebs less this year, in spite of the abnormal amount of water available. This very disproportionate yield is attributed to the "Andat," which caused enormous damage in all districts where the rainfall exceeded 50 inches. Certain areas in the Kassala and Gedaref districts were also affected, but not to so great an extent.

ALBANIAN HARVEST OUTLOOK.

(FROM OUR OWN CORRESPONDENT.)

TIRANA, May 22.

This year's harvest is expected to be very poor, as a result of the drought, and it is feared that there will be a famine. Much of the country, of course, produces practically nothing. Fortunately, the plain of Muzéké has not been greatly affected. The production of olives is almost nil.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 23:—During the week ended May 14 crop prospects fair to good generally, except in Punjab and North-West Frontier Province, where rain is badly wanted. Bombay cotton market steady. Fine M.G. Oomra May Rs. 259, July Rs. 273. Cotton arrivals from September 1 to May 13, 1921, were 2,067,000 bales as compared with 2,664,000 during the corresponding period of the last year. Bombay piecegoods market quiet. Calcutta jute and gunny market quiet but steady; jute mills have extended the four days' short time working agreement up to end of September. The original period was to expire on June 30. Gunny market unaffected. Rangoon paddy arrivals fair by boat but nothing coming in yet by rail; prices firm at Rs. 203 to Rs. 206 per 100 baskets of 46 lb. each. White rice has considerably advanced in prices, 10,000 tons specials having been sold at rates from Rs. 505 to Rs. 525 per 100 baskets of 75 lb. each, for June and July delivery. The imports in February, 1921, were 2,500 lakhs of rupees, which fell to Rs. 2,400 lakhs in March, and again rose to Rs. 2,600 lakhs in April. There has been no change in the exports during these three months, they being steady at Rs. 1,800 lakhs. This was a drop from the January figure of Rs. 1,900 lakhs, but in that month the imports were Rs. 3,100 lakhs. No change in bank rates.

EXPORT to ROUMANIA

Agent with first-class references wishes to act as agent for British firms. English correspondence.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 10½d. lb.; citric, 2s. 6d. lb.; tartaric, 1s. 8½d. lb.; ammonia (sulphate), £20 5s. 7½d. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 11½d. gallon; bleaching powder (35 per cent.), £20 10s. ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 138s. 6d. cwt. Potassium: Bichromate, 9½d. lb.; chlorate, 5½d. lb.; caustic, £47 10s. ton; nitrate, £54 ton; permanganate, 1s. 9d. lb.; prussiate yellow, 1s. 2½d. lb.; sulphate (90 per cent.), £22 10s. ton. Sodium: Crystals, 150s. ton; bicarbonate, £11 ton; bichromate, 6½d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 10s. ton; hyposulphite, £23 10s. ton; prussiate, 7½d. lb.; nitrate, £19 10s. ton; glycerine (crude, 80 per cent.), £105 ton; glycerine (industrial, 125 per cent.), £155 ton; sulphate of copper, £32 10s. ton; sulphate of iron, 150s. ton; lemon oil, 3s. 2d. lb.; quinine, 3s. 6½d. oz.; red lead, £39 ton; white dry lead, £42 15s. ton; white ground lead, £53 5s. ton.

Metals.—Aluminium, £150 ton; antimony (English Regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £74 13s. 9d. ton; copper (electro), £75 15s. ton; gold bars, 102s. 9½d. oz.; iron (No. 3 Cleveland), 130s. ton; hematite (mixed number), 160s. ton; galvanised sheets (24 G.), £22 ton; lead (soft foreign), £24 1s. 3d. ton; manganese Poti, 1s. 3½d. unit; molybdenite, 50s. unit; nickel, £190 ton; platinum, 340s. oz.; plum bago, £27 10s. ton; quicksilver, £11 2s. 6d. bottle; silver bars, 33½d. oz.; spelter (G.O.B.), £27 12s. 6d. ton; tin (standard), £182 ton; tin plates (20 by 14), 26s. 3d. box; wolfram, 12s. 10½d. unit; zinc sheets, £36 10s. ton.

Hides and Skins.—Ox and heifer: (first), 90 lbs. and up, 8d. lb.; 80 to 89 lbs., 8d. lb.; 70 to 79 lbs., 8d. lb.; 60 to 69 lbs., 7½d. lb.; 59 lbs. and under, 6d. lb.; (second), 90 lbs. and up, 6½d. lb.; 80 to 89 lbs., 6½d. lb.; 70 to 79 lbs., 6½d. lb.; 60 to 69 lbs., 6½d. lb.; 59 lbs. and under, 4½d. lb. Cows: (first), 60 lbs. and up, 6½d. lb.; 59 lbs. and under, 6½d. lb.; (second), 60 lbs. and up, 4½d. lb.; 59 lbs. and under, 4½d. lb. Bulls: (first), 3½d. lb.; (second), 2½d. lb.; casualty hides, 3½d. lb.; kips (first), 5d. lb.; (second), 4d. lb.; (third), 3d. lb. Calcutta Market.—Prices in rupees per 20 lb.—Arsenic hides (cows): Agras, 5.8 to 11; Durbhargas, 4 to 5; Patnas, 3 to 4. Salted cows, 2.8 to 5. Arsenic hides (buffalo), 2.8 to 7. Skins.—Calf, 6 to 8 per 20 lb.; goat, 200 to 240 per 100 pieces. Morocco.—Butcher's sheepskins (wool) are quoted at 120 to 130 frs. per 100 kilograms.

Miscellaneous.—Cotton (American), 8.15d. lb.; linseed (La Plata), £16 2s. 6d. ton; rape (Toria), £20 ton; soya beans, £11 17s. 6d. ton; palm kernels, £20 12s. 6d. ton; cotton (Egyptian), £12 7s. 6d. ton. Oils: Linseed, £31 10s. ton; soya, £34 ton; cotton (crude), £34 10s. ton; olive (Levant), £82 10s. ton; ground nut, £38 15s. ton; palm, £34 5s. ton; rape (crude), £50 10s. ton; petroleum, 2s. 3½d. gallon; turpentine (American), 99s. 6d. cwt.

THE WINE INDUSTRY OF YUGOSLAVIA.

According to a memorandum submitted to the Ministry of Commerce and Industry, states the Belgrade journal *Epoha*, the area of vines under cultivation in the Serb, Croat, Slovene Kingdom is as follows (in hectares):—Serbia, 34,322; Croatia and Slavonia, 47,852; Bosnia and Herzegovina, 5,900; Vojvodina, 63,244; Dalmatia, 63,424; Slovenia (a) Carnolia 9,837, (b) Styria 62,252—72,089. Total area, 286,831. The annual production of wine is five to six millions of hectolitres, of which three millions are required for home consumption, leaving a surplus for export of a value of 1 milliard of dinars.

GENERAL
MERCHANDISE

COTTON AND COTTON GOODS.**SUDAN OUTLOOK.**

(FROM OUR OWN CORRESPONDENT.)

KHARTOUM, May 5.

The estimated cotton crop is given as 45,000 cantars of 100 rottles, which is expected to yield some 665 tons of lint. The types being cultivated are Sakellaridis and Affi-Assili. The lack of communication by rail is sorely felt in these regions, which are practically entirely dependent on camel transport, so that the problem of moving the crop is somewhat difficult. Arrangements have, however, been made to transport 345 tons of lint to Suakin and Atbara by land, and the balance by barges, as soon as the River Atbara rises sufficiently. The cotton is of good quality, and some of the samples are of exceptionally long staple.

The Government have been occupied for some time with the question as to whether a larger area of land can be cultivated in the Gash region, and as a result of recent surveys it is estimated that it is fully possible to place a total area of 200,000 feddans under cultivation in this district. The present scheme of irrigation has been found to be unsatisfactory, and a very large amount of reconstruction is now in progress. It is hoped that the new works will be fully completed by the beginning of June, in ample time for the floods of next season.

MANCHESTER REPORT.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

The conditions prevailing throughout the market during the past week can be described as quiet. Although a fair inquiry has been about actual transactions have been few and far between. The continuation of the coal strike is the one big factor that has had to be reckoned with, and it is a sheer impossibility to report any increased activity until the miners are back at work, for with the present shortage of fuel it is not possible for manufacturers to guarantee dates of delivery. The wages question in the cotton trade is not causing any great amount of uneasiness, and although the operatives have definitely refused to accept the proposed reduction on present-day wages of about 6s. in the pound, it is expected that the dispute will be settled without reverting to either a strike or a lockout. With regard to cloth, buyers for Egypt have been about, but only occasional sales have resulted. Reports from the other side have been distinctly better, but no increased business can be reported until the labour situation here is much brighter. Shippers to the Levant and Constantinople have been slow in raising rates, and only isolated transactions of small weight have occurred. Quotations for Egyptian yarns have been well held in price, but the offtake has not been satisfactory. Spinners, however, are not losing any ground. It is reported that a large order has been placed for extra hards for the Near East. Cloth inquiry for India, although it has been fairly extensive, has not resulted in many actual transactions. Sales have taken place chiefly for Madras and Bombay. Recent reports from China have been a little more encouraging, but buyers have been slow in entering into contracts. South America still lags behind. Prices for American counts have remained steady, but the offtake has been patchy.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended May 26:—

The stagnation noticeable in our market during the past few weeks still prevails owing to the many adverse factors, political and industrial, which rule the situation at the moment. It would seem, however, as if we were on the eve of developments at last. The fact is no secret that many spinners have large requirements to meet, and are only waiting for a definite assurance of fuel for their mills before they start buying. We do not, however, look for any boom in prices. The public is tired of booms, and there is plenty of cotton here immediately available, and still more in Egypt, to meet anything but a very extraordinary demand. The political situation in Egypt has latterly become very serious, and it is possible, if this state of things continues for any length of time, and the settlement of the coal dispute coincides with it, we might see a disposition locally to push up the price of the raw material beyond its actual level. If this occurs, we advise holders to take advantage of it and meet the inquiry, as we hold the view that order in Egypt will be speedily restored, and with an uninterrupted flow of cotton to this country prices would be bound to react. The Alexandria General Produce Association reports that the new crop, both in Upper and Lower Egypt, is now doing well after a somewhat late start, the area sown being approximately 25 per cent. less than last year. In Upper Egypt an increased quantity of Zagora cotton has been planted, to the detriment of the pure Ashmouni seed, and in Lower Egypt Sakellaridis has been almost universally sown. The spot inquiry here has been of a very meagre description, and has been almost entirely confined to Sakellaridis about type 39. Prices have remained very steady. Thirty bales of Sudan cotton changed

hands at about 12½d. Manchester reports, considering everything, have been quite encouraging, and rather more c.i.f. business has been transacted. Total sales, 600 bales (four days). Quotations unchanged. Fully good fair Sakellaridis, 16,000.

EGYPTIAN COTTON.

Reuter's Agency states that the Egyptian Council of Ministers, in response to requests from practically all the provincial councils, proposes to extend for a further two years the law limiting areas sown with cotton to one-third of each owner's holding. The effect of this law will be to establish triennial rotation, which is advantageous both to the yield and the quality of the cotton.

CZECHOSLOVAKIA'S CLOTHING TRADE

During the last six months Prostějov, the chief centre of the Czechoslovak clothing industry, has exported goods to the value of over sixty million crowns. The largest consignments were sent to Yugoslavia, Hungary, Poland, and Roumania, but Austria, Holland, Turkey, Egypt, and Greece also made considerable purchases. For some time the clothing trade has been very brisk, and large orders have been placed, especially in Slovakia. A "Free Syndicate for the Clothing Industry" has just been established at Prostějov. It is under the management of the Czechoslovak Commercial Bank, and provisionally comprises six large undertakings with an aggregate capital of about 100 million crowns. The chief aims of this syndicate will be to carry on trade with the Balkan countries, and its activities in this direction will be facilitated by the fact that the Czechoslovak Commercial Bank is in close touch with Roumanian and Yugoslav banks.

FRENCH CHAMBER OF COMMERCE AT SOFIA.

On May 19 a French Chamber of Commerce was opened at Sofia in the presence of Count de Cherisey, President of the Inter-Allied Commission, the Bulgarian Minister of Finance, General de Fourtoul, head of the Military Commission, M. Charlot, delegate of the French bondholders, and many French and Bulgarian notabilities. M. Georges Picot, French Minister in Bulgaria, made an eloquent speech, expressing the general satisfaction at the realisation of a cherished plan. "We all," he concluded, "wish peace in this country. Whoever attempts to work against this peace will be strongly opposed by France and the Allies. France and Bulgaria shall work together to pacify the Balkans."

GREEK EXPORT PERMITS.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, May 17.

The Ministry of Supplies has authorised the export abroad, excepting to Bulgaria and Albania, without previously obtaining a permit from the Ministry, of all local and European products, with the exception of sheep, cattle, goats, salt, flour, bread, boots and shoes, haddock, petrol, condensed milk, rusks, potatoes, cereals, wool, sugar, pastries, fuel of any description including charcoal, coffee, metals, rice, paraffin oil, matches, poultry, gunpowder, cheese, butter, and eggs. Goods in transit which were originally destined for other countries may be exported without special permits.

FOREIGN EXCHANGES.

Country.	Method of Quoting.	Parity of Exchange.	Latest Quotations
Alexandria	Piastres to £	97½	97½

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

DAMAS, March 31.

The abundant rain and the cold during the present month have benefited the cereal crops, and strong hopes are now entertained that there will be a good harvest.

Some arrivals of wheat and barley from Palestine of a quality inferior to the production of our country have had the effect of reducing prices here by 10 per cent.

The commercial situation is much the same as in the previous month. Our merchants hope for the resumption of relations between Syria and Anatolia which will give rise to a movement profitable to Syria.

STAMBOUL, May 14.

No improvement can be recorded, and the depression continues. The sharp fluctuations in the exchange in the last few days have had an unfavourable effect on commerce. In consequence of large consignments of merchandise made to Roumania that market has become congested with goods, and sales have notably diminished.

Prices of manufactures continue to fall. Sales and arrivals are insignificant. The want of supplies is very marked in Anatolia, but the present situation prevents transactions.

Produce.—Sugar.—The Java crop is reported to be very good, and as offerings are numerous prices continue to fall. The quotation for June-July shipment from Java is £25 per ton, but importers hesitate to deal even at that rate. A vessel has arrived from Amsterdam with 1,000 tons of sugar, and another is on its way from Hamburg with 50 wagons. Dutch sugar has fallen to £37-38 per ton. The rate for sugar in Customs is £T31 per 100 kilos.

Coffee.—The price continues to fall, and buyers are holding aloof. Rio No. 1 is offered at 50s.

Rice.—The demand is maintained, and prices are sustained. The quotation for prompt shipment from Marseilles is 98-100 francs per 100 kilos, while Rangoon is quoted at £16 per ton.

Oil.—Prices continue to decline. Quotations are Ps.300-310 the bidon, and Ps.20 per oke for oil in barrels.

MAMOURET-UL-AZIZ.

The report for March states:—During the month 1,500 marten skins and 1,200 fox skins were exported, representing a total value of £T2,500. There is nothing else to record in the way of exports.

Dullness and Irregularity.

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday Night.

There have been no particularly favourable developments during the past week, and as a settlement of the coal strike is not yet in view, it is not surprising that markets should for the most part present a dull and featureless appearance. Here and there bright spots have been in evidence, pointing to the probability of buoyant markets as soon as better conditions obtain.

Gilt-edged stocks are closing on a rather weak note. War Loan Fives are 88½, Victory Bonds 79½, and Consols 46½. The Indian 7 per cent. Loan is now 311-16 premium, while the Sudan 5½ per Cents. are 92½. *En passant*, it may be noted that Ceylon will be issuing a loan here in the near future. Foreign bonds have been fairly firm, in particular Japanese issues.

Industrials have been very irregular, and the firm spots have been few and far between. Oils have been rather dull, but this characteristic is bound to be merely a passing phase, and it is certain that there will be a general and appreciable improvement once business begins to improve. Interest in mining shares is concentrating on the West African group, and there is talk of an approaching boom in these shares, this being inspired presumably by the reported discoveries of gold. Rubbers continue to stagnate, and I shall be surprised if the market does not see much lower values yet before the tide turns. Certainly this is no time to enter this market.

Near Eastern securities have been firm. Egyptian Guaranteed 3 per cent. are 67½, while Greek Guaranteed 2½ per cent. 1889 are 66½, at which there are buyers, and Turkish Guaranteed 4 per cent. 1855 are 71.

Greek shares are lower on balance. The 5 per cent. 1881 and the 5 per cent. 1884 loans at 37 are each a point down, while the 5 per cent. 1890 is a like amount lower at 38. Fundings are unchanged at 36, and the 4 per cent. 1910 Loan is unaltered at 29. The 4 per cent. 1902 Loan is 1 down at 34, but the 5 per cent. 1914 Loan is unchanged at 24.

Land shares have been featureless. Beheras are unchanged at 8½, while the preference shares are the same at 3. Anglo-Egyptian Land Allotments at 3½, Egyptian Consolidated Lands at 1s., Egyptian Delta Lands at 6s. 9d., Gharbieh Lands at 1½, and New Egyptians at 22s. 6d. are all unchanged. Union Foncières at 2½ are the same as last week, but Sudan Plantations are ¼ lower at 2½.

Oils have been weak. Anglo-Egyptians have shed 1-16 at 113-16, while Phoenix at 11s. 6d. are 6d. lower. Rumanian Consolidated are unchanged at 13s. 9d., and Steaua Romana are the same at 15s., but Burmahs are ½ lower at 6½.

Among Miscellaneous descriptions Abyssinian Corporations are 2s., while Alexandria Waters are also unchanged at 6½. Morums are 1s. lower at 10s., and Egyptian Markets at 18s. 6d. are 6d. lower, but Egyptian Salt and Soda are unchanged at 28s.

Banks have been firm. Agricultural 3½ per cent. Guaranteed Bonds at 51 and the 3½ per cent. Guaranteed Bonds at 53 are unchanged. Imperial Ottoman Banks are 9, National Bank of Egypt 17½, and Land Bank of Egypt 5.

According to official statistics, Czechoslovak imports for the third quarter of 1920 amounted to 12,408,250 quintals. The exports during the same period amounted to 15,893,493 quintals.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on May 13 were as follows:—Agricultural Bank of Egypt, £4 1-16; Alexandria Water Co., Ltd., £6½; Anglo-American Nile Steam, £27½; Associated Cotton Ginners, £4½; Banque d'Orient, Fr. 52½; Behera Ord., £E7 13-16; Behera Priv., £3 3-16; Bonded Stores, £9 15-16; Brasseries d'Egypte, Fr. 100; Building Lands of Egypt, £11-16; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com. d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 7,700 ex; Credit Foncier Egyptien, Fr. 600; Credit Foncier 1835 Oblig., Fr. 226½; Credit Foncier 1903 Oblig., Fr. 229; Credit Foncier 1911 Oblig., Fr. 232; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 76; Eaux du Caire Jouissance, Fr. 101; Egypt and Levant S.S. Ord., 28s.; Egyptian Delta Light Railways, £4½; Filature Nationale d'Egypte, £10½; Gabbari Lands, £11-32; Immeubles d'Egypte Soc. an des., £5 1-16; Khedivial Mail S.S. Co. Fondateur, £33 9-16; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 43½; Menzaleh Canal Navigation, Pt. 225 ex; Nungovich Hotels, £6½; Ramleh Railway, £1 25-32; Salt and Soda, 27s. 6d.; Tram. d'Alexandrie Priv., Fr. 38V; Tram. d'Alexandrie Div., Fr. 50V; Union Foncière d'Egypte, £2 15-16; Egypt Hotels, £2; Urbaines et Rurales, £2 15-16.

COMPANY NEWS IN BRIEF.

An interim dividend of 10s. per share has been declared on the shares of the Nile Storage Company.

The directors of the Egyptian Markets announce a final dividend of 5 per cent., less tax, for year 1920 on ordinary shares, payable forthwith at the Anglo-Egyptian Bank, 27, Clements Lane, E.C.

The directors of the Oriental Telephone and Electric announce a further dividend of 6 per cent. on ordinary, free of tax, making 10 per cent. for year 1920, plus a bonus of 2 per cent., free of tax.

The British Overseas Bank announce an interim dividend at the rate of 6 per cent. per annum, less tax, for half-year to April 30 last on "A" ordinary shares.

The net profit of the Tata Industrial Bank for the year ended March 31 was Rs.22,97,481, plus Rs.3,08,324 brought in. The directors have transferred to reserve Rs.10,00,000, provision for income-tax and super-tax Rs.3,74,156, and recommend a final dividend of 10 annas per share, free of tax, carrying forward Rs.2,20,004.

The Franco-Romanian Petroleum announce a dividend of 20 per cent., making 100 lei per share. Shareholders have the option of taking up dividend in cash or in new shares in proportion of one new share for five old ones.

The profit of the Anglo-American Nile and Tourist Company for the year to March 31, after providing for depreciation and maintenance, was £E5,786,399 mil., less dividend of 4½ per cent., leaving £E29,297, plus amount brought forward, £E8,571,822, making £E8,601,119. Supplementary dividend of 2 per cent. absorbs £E2,558,712; forward, £E6,042,407.

Astra Romana.—At the general meeting at Bucharest on June 6 an increase of the capital from 135 to 270 million lei will be proposed.

The Imperial Bank of Persia announces an interim dividend for the half-year ended March 20 at 3s. per share, free of tax, payable June 15.

The P. and O. Banking Corporation recommends dividend of 3½ per cent., less tax, for the nine months to March 31, equal to 5 per cent. per annum.

The traffic receipts of the Smyrna-Aidin Railway for the week ended May 21 amounted to £11,521.

The traffic receipts of the Egyptian Delta Light Railways for the week ended April 30 amounted to £E10,343; total for year £E29,317. For the corresponding period of last year receipts amounted to £E11,895 and £E34,823.

The sixteenth annual meeting of the shareholders of the British Cotton-growing Association will be held at the offices of the Association, 333-350, Royal Exchange, Manchester, on Tuesday, June 7, at 3.15 p.m.

of Accounts.

SHIPPING INTELLIGENCE.

PIRÆUS CUSTOMS RECEIPTS.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, May 19.

The receipts of the Piræus Customs during April (O.S.) amounted to 5,095,764.10 drachmæ in paper and 207,010.65 drachmæ in gold. Compared with the receipts during the corresponding period last year, there is a decrease this year of 1,579,674.80 drachmæ in paper and 269,486.50 drachmæ in gold.

SHIPPING AT THE PIRÆUS.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, May 19.

There were 502 arrivals of various steamers at the Piræus during April (O.S.) of the following nationalities:—Greek, 416; Italian, 35; British, 21; Roumanian, 6; American, 4; French, 3; Russian, 3; Swedish, 2; Egyptian, 2; Inter-Allied, 2; Dutch, 2; German, 2; Norwegian, 1; Spanish, 1; Danish, 1; Belgian, 1. The number of sailing vessels which entered the port during the month was 484, and of these two were Italian and one Inter-Allied.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Massilia, for Bombay [taking cargo for Karachi and coast ports via Bombay] (Liverpool, June 13).

Anchor-Brocklebank Line.—S.s. Masirah, for Calcutta (Birkenhead, June 15); s.s. Imani, for Port Said, Colombo, Madras, and Calcutta (London, June 18).

Bibby Line.—S.s. Herefordshire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, June 8).

Clan Line.—S.s. Clan MacTavish, for Colombo, Madras, and Calcutta (Birkenhead, June 9); s.s. Clan Robertson, for Bombay and Persian Gulf (Birkenhead, June 9).

Cunard Line.—S.s. Tyria, for Gibraltar, Malta, Patras, Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool and Manchester, June 1; Glasgow, June 6; Swansea, June 8).

Byron Steamship Line.—A steamer will sail from Liverpool on June 10 and June 24 for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila.

Ellerman Line.—S.s. Andalusian, for Gibraltar, Malta, and Alexandria (Liverpool, June 8); s.s. Belgravian, for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, June 11); s.s. Gerano, for Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool, June 18).

Ellerman's "City" Line.—S.s. City of Newcastle, for Calcutta (Birkenhead, June 17); s.s. City of Alexandria, for Bombay and Karachi (Birkenhead, June 25).

Ellerman's "Hall" Line.—S.s. City of Baroda, for Bombay, Karachi, and the Punjab (Liverpool, June 3).

Ellerman's "Westcott and Laurance" Line.—Regular sailings fortnightly to the Mediterranean, Egypt, and Levant ports.

Glen Line.—S.s. Glenamoy, for Port Said, Port Swettenham, Singapore, etc. (London, June 2); s.s. Glenade, for Port Said, Port Swettenham, Singapore, etc. (London, June 16); s.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, June 30).

Harrison Line.—S.s. Electrician, for Calcutta (Liverpool, June 2); s.s. Professor, for Port Said, Port Sudan, Aden, Mombasa, etc. (Glasgow, June 2; Birkenhead, June 9); s.s. Gladiator, for Calcutta (Liverpool, June 18).

Henderson Line.—S.s. Arracan, for Port Said and Rangoon (Birkenhead, June 1); s.s. Henzada, for Port Said and Rangoon (London, June 15).

Holt Line.—S.s. Teiresias, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 3); s.s. Cyclops, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 10); s.s. Keemun for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 10); s.s. Eumæus, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17); s.s. Calchas, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17).

Johnston Line.—S.s. Portinglis, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, June 11); a steamer will sail from Liverpool on July 9 for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila.

Maindy Line.—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, early June); s.s. Maindy Transport, for Antwerp and Moroccan ports (London, end of June).

Moss Line.—S.s. Siptah, for Gibraltar, Malta, Piræus, Syra, Smyrna, Salonika, and Constantinople (Liverpool, June 18).

Papayanni Line.—S.s. Asturian, for Malta and Alexandria [taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, and Cyprus] (Liverpool, June 18); s.s. Bosnian, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, June 25).

P. and O. Line.—S.s. Novara, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, June 3); s.s. *Karmala, for Bombay (London, June 3); s.s. *China, for Bombay (London, June 10); s.s. Nellore, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London June 17). *Taking cargo for Gibraltar, Port Said, and Aden (with transhipment at Bombay) for Indian coast and Persian Gulf ports.

P. and O. British India Line.—S.s. †Hatimura, for Bombay, Karachi, Colombo, Madras, and Calcutta (London, June 4); s.s. †Mashobra, for Colombo, Madras, and Calcutta (London, June 24); s.s. *Merkara, for Bombay and Karachi (London, July 1); s.s. †Mandala, for Colombo, Madras, and Calcutta (London, July 8). *Taking cargo for Persian Gulf and Malabar Coast ports; †taking cargo for Port Said, Suez, and Aden; ‡taking cargo for Persian Gulf, Malabar Coast ports, Port Said, Suez, and Aden, also calling at Port Sudan.

Prince Line.—S.s. Soldier Prince, for Tunis, Malta, and Alexandria [taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Lattakia, Alexandretta, Mersina, and Cyprus ports] (Manchester, June 3).

NEW STEAMSHIP LINE.

Messrs. Stephandis, Denas and Co., of 17, State Street, New York City, general agents of the American-Black Sea Line, have inaugurated a new service of steamers between New York, the Piræus, and Constantinople.

Motor-omnibus services in Algeria now operate over 5,840 miles. The Alexandria Autumn Horticultural Show is to be held on November 5 and 6.

An Italian company is inaugurating an aerial passenger and mail service between Brindisi, Corfu, Crete, Derna, and Alexandria.

Arrangements have been made by the Italian State Railways for through bookings from London to Bombay by the Trieste Lloyd Line.

It is reported that a Dutch-German company will shortly organise an aerial service between Constantinople and Berlin by way of Sofia and Belgrade.

Four hundred and twenty-one thousand four hundred and forty-seven tons of coal were imported into Alexandria from January 1 to April 30 last, of which 54,126 tons were Welsh, 12,918 tons Scotch, and 354,403 tons other qualities. For the corresponding period of last year 39,260 tons were imported.

The Simplon-Orient Express now comprises through carriages daily between Calais, Paris, and Constantinople, and Paris and Bucharest; between Paris and Athens on Mondays, Wednesdays, and Fridays; from Athens on Mondays, Wednesdays, and Saturdays; and daily between Ostend and Constantinople via Milan.

NOTES OF THE WEEK.

The Boulogne Meeting.

If as a result of its meeting at Boulogne next week the Supreme Council comes to a right decision in regard to the Turkish question, the merit will belong to France. But we should prefer to see the right thing done from a proper appreciation of the problem rather than from motives of self-interest. As far as the French press allows us to judge, the reason actuating the French Government in standing by the Turkish Nationalists and in refusing the resources of the Allies to be placed at the disposal of the Greeks is that thereby French interests will be promoted better than by any other policy. If there is foundation for the report that the British Government is anxious to help the Greeks to try further conclusions with the Turks, it must be admitted that such a course is in the interests of neither Great Britain nor Greece, and does not hold out the prospect of establishing peace on any footing, permanent or otherwise, in the Near East. It is difficult, therefore, to understand how such a proposal could be made, and we shall hope to find that there is no truth in the statement that it is to be formally submitted to the Supreme Council.

Bulgaria and Yugoslavia.

Any step that makes for good relations between the various Balkan States is to be welcomed, as their future, individually and collectively, depends on their pulling together and by some form of co-operation, political and economic, advancing abreast on the road to material prosperity. It is, therefore, good news that a member of the Bulgarian Cabinet, M. Dimitroff, Minister of the Interior, and M. Stambolisky's right-hand man, has met M. Pashitch, the Prime Minister of Yugoslavia, in Belgrade, and has expressed himself satisfied with the exchange of views. Diplomacy in the Balkans does not invariably feed upon honeyed words, and, although M. Pashitch has not in the past adopted towards the Bulgarians the uncompromising attitude of his military party, he would have belied his reputation if he had not told M. Dimitroff just what Serbia thought of her neighbour. There is some reason to suppose that the verbal assurances of Bulgaria's intentions and the proofs of the correctness of her attitude given by M. Dimitroff appealed to M. Pashitch, just as similar statements and ocular evidence have satisfied the Great Powers that Bulgaria is fulfilling her undertakings.

A Hopeful Augury.

Hitherto the only danger spot in the Balkans since the signature of the Treaty of Neuilly has been Serbian mistrust of Bulgaria, which has been so carefully nourished by false reports that for a few days there was the risk that the Serbians would attempt an armed invasion of Bulgaria to exact "sanctions" on lines applicable to a recalcitrant and aggressive Germany. Belgrade apparently overlooked how these fits of nerves on the part of a people fourteen million strong dealing with a neighbour one-third as numerous would be regarded in Europe, and for the saner views that now prevail the Yugoslav State may be thankful to the lead given them by its Western Allies, and to the steady influence of Croats and Slovenes, who do not countenance the extreme attitude of the Serbs. It is to the credit of the Yugoslav Government that a formal *démenti* has now been given to some of the cruder Serbian reports about Bulgaria's hostile acts and intrigues. This, with the meeting between M. Pashitch and M. Dimitroff will, it is to be hoped, mark the opening of an era of better relations between the two countries. We do not overlook the past causes for bitterness—by no means acting on one side only—and do not advocate any attempt to force the pace in regard to the re-establishment of the sense of comradeship which existed before 1885, the year of the Battle of Slivnitza; but it is desirable that there should be a complete absence of pinpricks and "nerves" on both sides, in order that the strong pull of common interests and economic interrelation may have free scope in the joint interests of both countries.

The Little Entente.

The visit of M. Take Jonescu, Roumanian Foreign Minister, to Belgrade is expected to round off the understanding known as the Little Entente by a formal alliance between Roumania and Yugoslavia. When the question was first mooted, the Roumanian Government could not see its way to entering into an agreement as hard-and-fast as that which bound Czecho-Slovakia and Yugoslavia, and M. Take Jonescu himself favoured a more comprehensive *entente* which would include Poland and Greece. The more practical course to adopt was to form the nucleus first and allow it to expand when circumstances were favourable. This course would now seem to have commended itself to Bucharest, and if the Yugoslav Government is able to accept the Roumanian proposals, the Little Entente, in the form of a triangular agreement between Czecho-Slovakia, Roumania, and Yugoslavia, will have become a force

to be reckoned with in Central and South-Eastern Europe. We trust, and believe, that its activities will be wholly in the cause of peace.

A Lull in Egypt.

There has been no rioting either in Cairo or in Alexandria since May 23, the date on which the British military authorities were called on to restore order in the latter city. Zaghloul Pasha's supporters would seem to be busy in the provinces, whence deputations and telegrams continue to arrive in support of him and his pretensions; but it looks as if the storm has blown over, for the time being, at any rate. It would be too much to hope that the extremists are learning wisdom, but it may be that they are acquiring caution; and if the Government maintains a firm attitude, and its supporters show a little more courage in making their views public, the situation will soon become nearly normal again. Unfortunately, while "demonstrations" of the marching-mob type have not been in evidence for the past fortnight, another weapon in the extremists' armoury has been refurbished up and given another trial; for, on June 1, in Cairo, an attempt was made upon the life of Bedr ed-Din Bey, of the Egyptian Public Security Department. The would-be assassins failed to achieve their purpose, but it is unsatisfactory to have to record that at the time of writing no arrest has been made in connection with the outrage. Bedr ed-Din Bey took an active part in breaking up and bringing to trial the so-called "Vengeance Gang," so that the reason for selecting him for the attempt is not far to seek.

Zia ed-Din's Successor.

The suddenness with which Ministers may rise and fall at the caprice of their royal masters has long been a favourite theme of Oriental stories; and the fate of Zia ed-Din and his successor suggests that it may hold its own for some time yet with the professional storytellers of the bazaars and coffee-shops. True, those entertaining gentlemen may, if they wish to keep up to date, have to introduce a new character—the Power-behind-the-Throne—but Prime Ministers and Grand Viziers appear to be no more secure in office than they were in the dim and distant pre-democratic days. A few short weeks ago Seyyid Zia ed-Din became Prime Minister of Persia, at the bidding (we were told) of the Shah (who was prompted by Colonel Riza Khan), and all good Persians, having agreed that the Anglo-Persian Agreement must go, settled down to develop, so to say, on the most approved democratic lines. To-day Zia ed-Din is in Mesopotamia, and possibly not at all sorry to have got safely across the Persian frontier; and his successor in office is Kayam es-Sultaneh, an ex-Governor of Khorassan, who was lately cast into prison, with a great many other officials, big and small, on charges of peculation. The Teheran correspondent of *The Times*, in forwarding the news, remarks that the situation is somewhat anomalous, as the new Prime Minister's official accounts are "still being examined in Meshed, the capital of his former satrapy." The comment is almost unchallengeable.

Persia and Gt. Britain.

These sudden changes of Minister can hardly tend to the benefit of Persia, but, after all, they concern chiefly the Shah and his subjects; and Great Britain is evidently determined to follow a policy of not interfering in any way in the country's internal affairs. But in the present state of the Orient we cannot afford to play into the hands of our opponents, the Bolsheviks, at any point; and it is to be hoped that those responsible for our policy in that part of the world will keep a close watch not only on the main developments, but also on the personal details, which count for so much in Oriental countries. The Teheran correspondent quoted above reports that Mushaver el-Mamalik will probably become Persian Foreign Minister, and adds that it was largely due to his having imbibed Moscow with the belief that Seyyid Zia ed-Din was a pronounced Anglophil that the latter fell from power. The correspondent goes on to show that the Mushaver el-Mamalik's undoubtedly unfriendly feeling towards this country must be attributed to the lack of consideration

shown him by British statesmen and diplomatists in 1919, when he was in Paris for the purpose of submitting Persia's case to the Supreme Council. Into the merits or demerits of that case there is no need to go; but it is obvious that no harm could have been done by treating Mushaver el-Mulk with ordinary courtesy; and if *The Times* account is correct, it is equally obvious that he was not so treated. It seems to have been much the same story as that of Rushdi Pasha's request to be received in London, the refusal of which did so much to bring about the trouble in Egypt; and it may cost us very dear. For Mushaver el-Mamalik, who has been to Moscow since then as special envoy, has learned to look to Moscow for help and guidance, and is likely to do so in the future also.

Sedition in India.

The announcement made last week by the Government of India furnished on the whole a satisfactory reply to those critics who have been asking whether the statesmanlike sentiments uttered by Lord Reading at Simla were to be translated into action, or whether inflammatory talk was to be overlooked and punishment reserved for its dupes. The explanation of the apparent inactivity is that the Government had actually determined to prosecute Mahomed Ali and Shaugat Ali, the leaders on the Moslem side of non-co-operation, but that action was suspended in view of a remarkable statement which those gentlemen issued to the Press. The gist of the statement is that they never intended to incite anyone to violence, but, having been convinced by their friends that some of their speeches might be read in that sense, they apologise for what they may have said, and undertake to avoid similar expressions in future. The realisation of the effect of their speeches, which were widely reported in India, has taken some time, but the non-co-operation movement as a whole has not been characterised by that rapidity of intellectual perception which is so common in most Indian circles, and perhaps we may hope that the practice of clear thinking, now that it has started, may be cultivated with vigour and success.

The Indian Frontier.

If it cannot be said that the speakers in the House of Lords threw much fresh light on the question of the Indian frontier, the debate of last week served at least to emphasise the fundamental elements of the situation. For tranquillity on the frontier we require cordial relations between a tranquil India and a tranquil Afghanistan, and it cannot be said that even one out of these three conditions is in existence at the present moment. The political unrest in India is quite sufficient to set the tribes thinking that the good old days have returned. Afghanistan will not be tranquil until the menace of the new Russia is finally removed; and the negotiations at Kabul still drag their slow length along. The duration of these adverse conditions cannot be predicted and so long as they continue there is nothing for it but to maintain a vigilant watch, and, as opportunity serves, to extend and strengthen the communications with our outlying posts. A time may perhaps come when the tribes shall decide for modern civilisation, but at present they seem to appreciate only its most lethal weapons, and in that respect India is bound to retain the lead, however costly it may be.

Burma.

The members of the Standing Joint Committee of Parliament have dealt with the question of Burma very much on the lines we recently suggested. The provision of a constitution has become an urgent matter now that the Indian provinces are so handsomely equipped, and the Committee press for immediate legislation to establish the principle of dyarchy, leaving the division of subjects and the rules for the franchise to be worked out after further inquiries on the spot. On the other hand, they clearly see no reason for hastening the decision of the question whether Burma shall continue to form part of the Indian Empire, and they have expressed no opinion on the matter beyond the suggestion that dyarchy will introduce no fresh obstacles, and may conceivably facilitate ultimate separation, if that course

should prove to be desirable. We trust the Government will act on the lines laid down by the Committee, and so give Burma a chance of saying what she wants; when she has spoken, it will be time enough to settle the question of separation, in regard to which her wishes are really the most important factor.

Mount Everest.

Even at this distance from the scene of operations, imaginations must be stirred by the opening of the campaign for the scientific conquest of Mount Everest, the highest peak of the mountain mass between Nepal and Tibet. The undertaking is amply justified by the hope of adding to the world's stock of knowledge, for the maps of that part of the country are somewhat vague, and we should not ourselves care to express a confident opinion on the question where Nepal ends and Tibet begins; but the interest for ordinary people lies chiefly in the mere physical achievement, the hope of establishing a new and final "record" in terrestrial altitude. If that hope is realised, possibly this year but more probably in 1922, it will be the result of teamwork of a very high order. Members of the Alpine Club and Tibetan coolies, British sappers and Chinese mules, all have their parts to play; the organisation appears to be perfect, and what is wanted now is just that turn of fortune which can be deserved but cannot always be commanded.

Indian Honours.

So far as India is concerned, the Birthday Honours List may be described as conventional. A reasonable number of High Court judges receive well-earned knight-hoods; the higher ranks of the Indian Orders are filled chiefly by Members of Council, Princes, or political notabilities, and the lower by a selection, on the whole satisfactory, of secretaries, heads of departments, and officials serving in various provinces and states. In the unofficial world, the outstanding names are Sir Percy Newson, the Governor of the Imperial Bank of India, who becomes a baronet, and Sir Arthur Pickford, of Calcutta, whose knighthood has been earned by a large amount of public work. The military list of the Order of the Bath contains a rather larger proportion than usual of officers who are serving, or have recently served, in India; and, taking the *Gazette* as a whole, it may perhaps be said that the claims of public service have been adequately but not extravagantly recognised.

THE WEEK AT HOME.

LONDON, Monday Evening.

More Industrial Trouble.

There was a time when England was the workshop of the world. We are now rapidly approximating to a stage in which we propose to live by refusing to take in each other's washing. Coal is followed by cotton, and there are rumours of engineering troubles to come. The only people who are really busy are the reporters, who describe the appearance of industrial towns without any industry, and the professional sportsmen, who play to vast crowds who are out of work, either voluntarily or compulsorily. The train service improves, thanks to oil, but fewer people than ever are travelling, and the deficit on the railways, which will have to be met by the Government, steadily increases.

Political economy has been banished to Saturn for the time being and we read every day in every leading article that we are ruined. Then one turns to the financial pages, and discovers that new issues are coming out every morning, and are reasonably well subscribed—which looks as though the captains of industry and the investor did not quite believe these apocalyptic imaginings.

The main trouble in most trades concerns the cuts in wages. Here I cannot think that Labour is very wisely led. When factories are running at a loss, it is clear that the employer does not mind a lock-out or a strike very much; he loses very little by closing down. In bad times the policy for Labour is to make the best terms it can consistently with keeping its job, but, above all, to keep its job; it is in good times that it can afford

to risk its job, because higher wages merely come out of the consumer's pocket. One of the mistakes Labour has made is in not recognising that it is the consumer who has really gone on strike.

It must be admitted that those who hoped for a higher ethical standard in industry have been disappointed. For two years after the war Labour delivered ultimatums to the employers; now the employer is delivering ultimatums to the employees. A little more goodwill on both sides would have avoided these things; in the trades where the goodwill has been shown—and they are many—matters are going on well. Naturally one does not hear very much about them, because the news element is lacking.

The Coal Subsidy.

The root of the coal trouble remains the same as before; the miners are still hankering after a larger subsidy. But there was a very unpleasant episode last week, when it was reported that the Government had threatened compulsory arbitration to settle the dispute. The public would prefer voluntary to compulsory arbitration, but if the two parties show no inclination to come to terms, there would not necessarily be any objection to a touch of compulsion to bring them to their senses.

As it happens, however, the Government made no such threat, and those who spread the report must have known that it was untrue—unless one accepts the only alternative theory, that they were incompetent to understand the English language. However, the report stiffened the resistance of the miners, as it was presumably intended to do, and the hopes of settlement diminished. It is to be assumed that the Miners' Federation understand their own business better than the outsider, but the prolongation of the dispute now that it is clear that better terms cannot be obtained from either Government or owners strikes one as very doubtful policy. The miners must be in a desperate financial position, and the funds of the Union are apparently exhausted. The owners have lost nothing, as there was no prospect of profit for them for some months; the real loss has fallen on the community, and its actual extent will only be measurable when next year's Budget is introduced. It will be interesting to see who pays the taxes in 1922.

Oil Fuel.

The new oil-driven locomotives are working well. Here and there the driver or stoker does not quite understand the new fuel, and feeds the furnace with too much; as oil requires oxygen to make it burn, the result is that it gives off clouds of smoke. One day last week I happened to be on an express train on the Great Eastern Railway where this happened; the slower we went the more smoke we raised, until at last we produced the finest smoke-screen I have ever seen in war or peace;

even a barrister fighting a losing case in the law court, could hardly have raised so stupendous a fog. But coming back to town a day or two later the stoker had got used to the job; the smoke had vanished, and only the smell remained, as a novel attraction of the breakfast-car.

Parliamentary Expenses.

Members of Parliament are not to have their travelling expenses paid after all. After a rather acrimonious debate, in which Labour and Independent Liberal fought each other like cat and dog—a joy to the unregenerate Tories who saw the “progressive” parties biting off each other’s tails—the railway vouchers were rejected; and the exemption from income tax was also negatived. But this was dropped for a reason; members are to be allowed to charge their expenses against their salaries, and it does not require much prescience to see that they will contrive to make their expenses total the full £400 a year. I doubt if the means justifies the end, and it certainly involves the income-tax collectors in endless trouble, for the ordinary man is not allowed to deduct his expenses, and he will argue that if the Inland Revenue can turn a blind eye to the politician’s bills, it should in equity do the same to the man who pays the politician.

Quite clearly the law as to expenses will have to be altered. Nobody is allowed to charge travelling expenses except Members of Parliament, but schoolmasters are, I believe, allowed to charge books purchased for the purpose of their studies as necessary expenses. On the other hand, journalists are not, either because they get review copies or because the Government thinks they know too much already. A clergyman told me that he deducted his bookseller’s bill from his income tax, and the assessor said he would allow it if the parson could prove they were theological works necessary for edification in the pulpit; but, as the wily tax-collector knew full well, they were works on fly-fishing—and even the plea that parsons were fishers of men did not melt his heart.

The Derby.

There were no trains to Epsom this year. The crowd, therefore, went by road, by motor, bicycle, trap, or on foot. The police were rather afraid of blocks in the traffic, particularly at Ewell, where the street is narrow, but an airship flew overhead and reported the congestion to the officers below by wireless telephone. The day was perfect, the great race was exciting—won by a neck—and the innovation of the King going down, like everyone else, by road, was immensely popular. It will probably become a regular feature of the Epsom week.

The Cricket Disaster.

England was soundly and solidly beaten in the first Test match, by ten wickets, and by all reports our men made so wretched a show that they were lucky to get off as lightly even as that. We were outclassed in batting, bowling and fielding; our men looked like losing from the start, and to judge by the shaking of heads in the pavilion we shall never win another game. There can be no doubt that we have struck a really bad patch, but half the trouble is that our men are so impressed with the strength of the Australians that they do themselves less than justice. It might almost be better to pick an eleven that had never met the Australians at all—a team composed largely of University men, who are not at all overwhelmed with the prestige of their opponents. Such an eleven could hardly do worse than our picked men, and it might do better.

Australians v. Champion County.

Nothing daunted by the fact that the Armstronglians had beaten Surrey, the M.C.C., Cambridge University, and the first English Test team, and drawn with Yorkshire, I regarded the “Lord’s” fixture on Saturday, June 4, 6, and 7 as the equivalent of a Test Match, and saw some astonishing cricket. The match was over with an hour to spare on the Monday, and thirty-two wickets had then fallen for 404, less 30 extras. Middlesex gave a sorry batting exhibition, scoring 111 and 90 in their two innings, and the Armstronglians won comfortably, without any batting “to write home about,” by eight wickets. Oddly enough, the losing side produced the two highest individual scores of the match—Hearne 45 and Hendren 35. The question of the cricket-day

in England is whether the Armstronglians’ bowling is to prove invincible this tour. Up to date, Armstrong, by himself, appears sufficient to unhinge the nerves of any eight or nine batsmen in any Test or county side. His record for this match was 17 overs, 9 maidens, 33 runs, 8 wickets, and he was so childlike and bland over it all that he might have been a Chinaman instead of the greatest cricket-captain since “W. G.” It is well to mention that our visitors’ victory was received without the trace of a grumble, and with a vast amount of self-depreciatory chaff. “I’ll larn ye to be a toad.”

The Birthday Honours.

Some rude person recently compared the honours list to a tar-spraying machine on the public highway, it is becoming so difficult to escape it; this appears to apply more particularly to the owners of Coalition newspapers in the provinces, among whom a perfect epidemic of titles breaks out periodically. The latest list is no exception to the rule, but, apart from these victims to public duty, there are no noteworthy names in the new nobility, although Lords Curzon and Birkenhead each take a step upward in the peerage. The stage, however, laments that there are no actors in the Birthday Honours; it had almost come to expect one new knight of the footlights a year.

Church Reunion.

Projects for the reunion of the Churches are still under discussion. The various branches of Wesleyan Methodists are debating a return to uniformity; and last week a meeting was held in Scotland to debate the reunion of the different Scottish Churches, whose fissiparous tendencies were very marked in the nineteenth century. This particular conference was attended by the Archbishop of Canterbury, who discussed at some length in a very able speech the possibility of co-operation between the English and Scotch churches. His advice amounted to this: Go forward, but go slow. There are a good many prejudices and vested interests to be overcome, and this is a matter in which persuasion offers the only possibility of success.

Liberal Disunion.

The politicians might reasonably take a leaf out of the ecclesiastical book, for in the Liberal Party the breach between Independents and Coalitionists gets steadily worse. The National Liberal Club is purging itself of most of its Coalitionists, and matters have now come to such a pitch in that respectable institution that if a member’s second cousin ever spoke to a Coalitionist the whole family is suspect; few indeed in a once-democratic institution are considered as *sans reproche* by the autocratic committee. But at the Reform the sheep and the goats sleep happily side by side.

The policy of exclusion and ostracism may be politically wise, although one doubts it; these drastic remedies are rather apt to weaken the system. But from the financial point of view they must be disastrous. Most of the clubs are in debt, some have great difficulty in carrying on, and new members are the rarest of rare birds. The fact is that entrance fees and subscriptions have been put up too high; the annual whip-round to make up the inevitable deficit has become a nuisance; the old members are dying off; and the young men about town are looking out for jobs. Apart from that, the high cost of wines and smokes has reduced the coffee-room takings and even the card-room revenue has fallen off.

OCELLUS.

The following is an extract from *The Times*:—

Distinctive stamps are again to be supplied for use by the British post offices in Turkey, under civil administration, presumably in the form of the present home series overprinted or surcharged as before. The British Post Office at Constantinople was originally established during the Crimean War, but owing to the inefficiency of the Turkish postal service was continued for the convenience of British residents in the Ottoman capital. Since the Armistice a number of the British post offices in Turkey have been reopened under military control, but until now special stamps have not been provided. The four known copies of the rarest British postage stamp, the 10d. (Emblems watermark) of 1867, a copy of which sold at auction for £260 recently, was issued from the British Post Office at Constantinople, whence was dispatched the whole of the small supply printed in error on the obsolete Emblems watermarked paper instead of the normal Spray of Rose. All show the cancellation “C” in a barred circle.

THE NEAR AND MIDDLE EAST

(From Our Own Correspondents.)

ROUMANIA.

BUCHAREST, May 18.

By-Elections.

The Parliamentary vacation, which has lasted for a whole month, has come to its end. Parliament reopened on the 16th inst. The first two sittings were mostly taken up with the usual preliminaries. Many of the members residing in the province have not yet returned to the capital. It must be acknowledged that the politicians have not been idle during this vacation; they have been very busily engaged in party propaganda, in view of the two by-elections which have taken place during this time. The first one—for a seat in the Lower Chamber—which took place last week at Orevitza, Banat, was more or less of local importance. The contest, although very keen, was only between the Government candidate and one of the National Transylvanian party. The result was 2,800 votes for the former, who was elected, to 2,300 for the latter.

Far more important was the by-election for a seat in the Senate, which took place on the 15th inst. at Constantza. There were four candidates, amongst whom we must specially mention M. Al. Marghiloman, the chief of the Progressist Conservatives, and M. Const. Bratiano, the brother of M. I. Bratiano, chief of the Liberals. The two other candidates, although of only recent political standing, have been fully supported by their friends. Needless to say, great activity has been displayed by all parties during the last few weeks. The result of the ballot was:—

	Votes.
M. C. Bratiano (Liberal)	4,000
M. Al. Marghiloman (Progressist)	3,700
M. Sachetti (Federationist)	3,000
M. Gherghel (Government Party)	1,800

Communism.

A fraction of the Socialist party formed a Communist group. They held a congress, in which they passed a resolution affirming their unconditional affiliation to the Third International of Moscow. The Government considered this declaration to be seditious and against the security of the State, and ordered that all those who signed it—73 in all, including Members of Parliament—should be arrested. There were among them also some Transylvanian Magyars, on whom were found Hungarian Irredentist manifestoes. This movement is supposed to be financially supported by Budapest and Moscow, for obvious reasons.

In consequence of the political treaty concluded between Roumania and Czecho-Slovakia, the negotiations concerning the definite fixation of the frontier in Marmoreash have been resumed at Prague. The Minister for Foreign Affairs now announces that Roumania has obtained a rectification of the frontier, gaining over 150 square kilom., and a large number of villages, and over 7,000 inhabitants.

A Turf Scandal.

Last Sunday, when the Roumanian Derby was run, the turf was the scene of a scandal. The two horses which were the favourites of the public, being heavily

backed, were easily defeated, remaining at a great distance behind the others. The public, suspecting foul play, protested violently, causing a great tumult. An examination made at once by a veterinary surgeon disclosed the fact that the two horses had been given a very large quantity of very cold water just before being led out to the race, which, of course, made them unfit for the contest. The police have so far arrested one trainer and one jockey.

BULGARIA.

SOFIA, May 24.

The Bomb Outrage.

In my previous letter I mentioned a procession of school-children organised each year on the Fête of SS. Cyril and Methodius. As the children were passing to-day along the Boulevard Dondoukoff a small bomb was thrown by someone whose identity has until now remained a mystery. As a result of this brutal outrage eleven children were taken to hospital with bad wounds, and another twenty adults and children were slightly hurt. The incident naturally caused a sensation, and was attributed at once to the Communists, who a few days previously had announced their intention to use force. As a consequence of the affair the crowd went in a body to the local Communist Club and gutted the whole premises.

SOFIA, May 31.

Up to the time of writing the author of the recent bomb outrage has not been caught, and the affair promises to remain one of the many Balkan mysteries. Two of the victims have died as a result of the wounds inflicted on them, and public feeling throughout the country has been greatly aroused over the senselessness of the crime. Many theories have been advanced regarding the identity of the criminal, who is supposed in turn to be a Russian Communist, an ordinary Anarchist, a dismissed Bulgarian school teacher, and so on, while it is even said that the Government itself was responsible for the outrage, with the object of discrediting the Communists in the minds of the general public. There is nothing to prove the truth of the above theories, but one cannot help imagining that even the Communist Party would not be so ill-advised as to approve an act which had as its sole aim the deaths of innocent children and spectators.

It is, however, certain that the Communists have become very unpopular throughout the country, and a great many of their leaders have been thrown into prison. To-day, May 31, is the fête of the poet Boteff, generally styled as the "Revolutionary Poet," but no parallel incidents have marred the holiday.

Relations with Yugoslavia.

The feeling between Bulgaria and Yugoslavia is growing gradually better, and although the interviews between M. Pashitch and M. Dimitroff have not yet taken place, owing to the illness of the former, it is to be hoped that it will eventually help to smooth out matters. One is awaiting with a certain interest the result of the struggle in Asia Minor between the Nationalists and the Greeks, and if it should go unfavourably to the latter, it is to be feared that in the autumn a recrudescence of *komitaji* activity will take place in Thrace, and this activity will be following on Serbian relations with Greece over the much vexed question of Salonika. As it is, there are reports of great activity on the part of the Turks in Eastern Thrace, and this may well lead into a more general movement later on.

There is no reason why Yugoslavia and Bulgaria should remain on bad terms for long; it is only the recent war that has made the situation strained. They have no economic quarrels, and, as nationals, being both Slavs, are closely allied. A *rapprochement* is very greatly to be desired.

The Customs House.

Having heard a great deal about the system in vogue at the Sofia Customs, and wishing to see personally if all that had been told me was true, I went down one morning last week in order to claim a small box which had arrived from England. I knew one of the Controllers personally, and he gave me all possible facilities, so that I might speedily adjust the affair. Thus, at about 11 o'clock, I began my rounds, and until 12.15 was busily engaged in filling up various forms and satisfying officials that I really

was the person whose name was on the invoice; at this period it was necessary to adjourn for lunch, as the *douane* closes from 12 to 2.

Returning shortly after 2 o'clock, I spent 2½ hours visiting innumerable offices, answering innumerable questions, and watching clerks going through abstruse calculations. A good deal of this work was mere checking, and, finally, at about a quarter to five, when I sat in my phaeton with the small box beside me, I wondered if it had all been worth while, and whether I would not have been better to go without the contents of the box. I want, however, to make it quite clear that all the officials I came in touch with were very polite, and there was no attempt at obstruction; but it is the system, which is approximately the same that was in use in Russia before the war, that is at fault. For example, as far as could be seen, no use was made of copying paper, and thus right away the work is doubled or even trebled, and one shudders to think what the cumbersome machinery of the Customs must cost Bulgaria each year. One has read in the papers lately that an import duty is shortly to be imposed on certain goods entering Great Britain, and one can only hope that for the peace of mind of the average citizen the system at home will be as simple as is consistent with accuracy.

General.

M. Karadjoff, Director of the Consortium, has resigned, and has been replaced by M. Georghieff, also a Deputy.

Owing to lack of money, the Government have decided to postpone the issue of new banknotes.

For a long time the lives of pedestrians in Sofia have been considerably endangered by the great speed that automobiles indulged in, but a somewhat crude, though eminently satisfactory, measure has been adopted. If a gendarme sees a car going too fast, he fires a rifle shot in the air above it; if it does not stop, he fires a second shot at the wheels; and, as all the gendarmes are not first-class marksmen, the result can be imagined.

TURKEY.

CONSTANTINOPLE, May 23.

East or West?

The most important event that has occurred since the failure of the last Hellenic offensive is the change in the Nationalist Administration of Angora. When Bekir Sami Bey resigned, despite all Nationalist assertions to the contrary, it was clear that the balance of political power had changed in Anatolia, and that the moderate policy of the Nationalist delegate to the London Conference had been repudiated. When the entire Nationalist Council also resigned, it became evident that a political crisis had occurred which involved deeper issues than the confidence or otherwise of the Great National Assembly in Bekir Sami Bey's conduct of affairs during his stay in Europe. For some time it has been a secret for no one that a bitter struggle has been in progress in Anatolia between the advocates of a moderate policy and the powerful group of Unionist Extremists whose principal obsession is a bitter hatred of Great Britain. There is now no question as to what has happened during the last few weeks, for the delirious hostility of the Anatolian press to Great Britain is in itself sufficient evidence of the triumph of the Extremists. The question at issue was recently summed up by Yunus Nadi Bey in a leading article in his paper *Yeni Gun*, when, under the heading "East or West," the pursuance of an "Asiatic policy" was asserted to be the sole means of ensuring the liberty and independence of the nation. Like the pro-German policy of the Unionists, the "Asiatic policy" is simplicity itself. It consists of sitting on the tail-board of the red chariot of Bolshevism, in the hopes of being carried in triumph over the mangled remains of the British Empire, just as the Unionists hoped that the chariot of the Hun War Lord would carry the Crescent to Cairo and Calcutta. The appointment of Yusuf Kemal Bey, who successfully carried out the negotiations for an alliance between Angora and Moscow, as Foreign Commissioner in place of Bekir Sami is also of ominous portent, and it is to be feared that there is no longer any room for doubt that yet again, as in October, 1914, the die has been irrevocably cast. Once again the gamblers are in control, and another period of bloodshed is inevitable.

Among the first-fruits of the revolution (for that is what the change amounts to) have been the impossible

demands of the Angora Administration that the Turkish southern frontiers should be extended to include Alexandretta and Aleppo, and that all French privileges in the provinces of Sivas, Mamouret ul Aziz, and Diarbekir shall be cancelled. Already the good friends of the Nationalists—the Italians—have been called upon to renounce their claims to preferential treatment in the area ear-marked for Italian enterprise by the Sevres Treaty, and if nothing much has been said about the renunciation by Great Britain of Palestine and Mesopotamia, it is because that is regarded as a *sine qua non* part of the programme.

The result may be regarded as a triumph of Bolshevik diplomacy, for there can be very little doubt as to which hand has been pulling the strings.

The Hellenes in Anatolia.

The much-advertised third offensive has not even yet been commenced in Anatolia, and as time wears on it becomes doubtful whether it will be commenced at all. As might have been foreseen complications are multiplying upon the long frontier which stretches from the Adriatic to the Black Sea, and in the newly conquered territory in Europe. It has become patent to the most enthusiastic partisan of Pan-Hellenism that Greece cannot possibly carry out the task of subduing Anatolia without considerable material and moral assistance, and that even then it would be no easy undertaking. Two years ago, the few who had the courage to condemn the Anatolian adventure were stigmatised as traitors to the cause of Christianity and civilisation, but it has been proved abundantly that those who were convinced that certain powerful interests would form an insuperable obstacle to the realisation of the dream of Pan-Hellenism had judged the situation far more accurately than even M. Venizelos himself. Could the situation to-day be more satisfactory from the point of view of those who are opposed to Hellenic expansion upon economic and political grounds? Was it so difficult to understand that there would be opposition, apart from anything the Turks might be able to do? Was it not also quite manifest

that the necessity of preserving an united front against the arch enemy in the West would prevent that opposition from being overcome? Has the situation changed materially? Perhaps the Hellenes are waiting to see whether Europe will yet realise that union and force are quite as necessary to ensure peace in the East as in the West. In a sense the situation is slightly more hopeful in this respect, for as has been indicated above, the Nationalists have thrown down the gauntlet to the Allies separately and collectively, and the only alternative to accepting the challenge is abject surrender, or something very near it, and almost equally dangerous. Perhaps now that the very interests which ruined the dream of M. Venizelos are themselves menaced, there will be a change of policy, but it is extremely doubtful, for there are reasons to believe that the situation in Europe is not so entirely unconnected with the Near Eastern Question as many so naively imagine. There are no water-tight bulkheads in the foreign policy of any Government.

Brigands and Komitajis.

When is a brigand not a brigand? When he commits arson, rape, and murder for the greater glory of his nation or creed. He then becomes a noble *komitaji*. Three or four days ago a combined force of French and Turkish gendarmerie rounded up a fine crowd of some hundreds of these Balkanic Bayards in the neighbourhood of Hademkeuy, but there are still plenty left to maintain the highest traditions of Balkan chivalry. About the same time a Commission of Enquiry sent by the Allied authorities to the Yalova district, which received honourable mention in THE NEAR EAST last year, reported that although there had been some exaggeration, Moslem complaints were not altogether unfounded. As a matter of fact, if Shelley had been on that Commission he might have stated that "Hell is a place very much like Yalova."

PORT SAID.

PORT SAID, May 16.

The Canal Bridge.

One of the most significant things which has been announced lately in this part of the world is that the railway bridge across the Canal which connected the Egyptian Railway system with the desert railway and Palestine has been completely removed, and that now the Canal Company can get on with the much-needed dredging in that part, which they have not been able to do for nearly seven years. Passengers to and from Palestine now walk across the floating bridge between the east and west stations at Kantara, but goods are brought across without breaking bulk by means of a floating transporter, which can take two or three trucks at a time.

A Late Season.

Everyone is commenting on the extremely late season here. We had half a day's heavy rain squalls last week, and many of the trees in the place are not showing a single sign of life, although we are practically within a month of Midsummer Day. Few men are in summer clothing, though of course a good many of the ladies are; but then they are always more robust in the way of being able to do without clothes than men are.

Coal, Oil, and Sailors.

The coal strike at home is having a considerable effect on the number of ships passing through, and those using oil are congratulating themselves. A large new installation will soon be in working order here, of which more anon. Owing to the slump in shipping, it will probably not be long before there are drastic reductions in wages, which are now at such a height that a ship, except in rare instances, cannot possibly pay expenses. Overtime payment aboard the ship for the crew, which was wrung from the owners, owing to their shameful exploiting of the sailor in years gone by, has been equally abused by the sailor now that he has got it. A beginning has been made, for an American ship recently came through here with the overtime clause deleted from the articles. However, things can never go back to the bad old times when responsible ship's officers were getting in pay less than what is an "out-of-work donation" now.

At present the Iron Duke, the flagship of the Mediterranean Fleet, is in port, but is leaving shortly for Jaffa and Haifa, where the crew will have an opportunity of visiting the Holy Land.

CYPRUS.

NICOSIA, May 18.

The Greek "Unionists."

The Greek leaders, having despatched their memorial referred to last week, will now probably await a reply before proceeding to any fresh manoeuvre. It is the first time that the Greek "Unionists" have ventured on so audacious a step as this last, in accusing the Governor and local government to the Colonial Office. The reply of the Secretary of State will no doubt be, as all sensible persons anticipate, such as the circumstances and the nature of the document call for. If any Commission were sent to the island (not, of course, as a result of the memorial, but for any other reason), it would probably arrive at conclusions and recommendations very different from those which the memorialists profess to desire. The present is manifestly a time when the efforts of all leading men should be earnestly devoted to promoting the material interests of the island. Had the Greek members of Council worked honestly and loyally with the Government, there can be little doubt that they would have given much valuable help in legislation, instead of obstructing the course of business during, say, the last twenty years. As a writer in a local paper has remarked, the Legislative Council is not the place in which political questions are to be dealt with, nor is the High Commissioner the person from whom the Cypriots await a solution of their "national question." The Greek members have persisted in the attempt to make the Council an arena for the introduction of political propositions and wranglings.

The Holy Synod.

This body is again divided against itself. Owing to some differences that arose, the Bishop of Kyrenia has been for some time excluded from its meetings. It was hoped that these would be settled, and the Bishop was invited by a telegram from the Archbishop to attend a recent meeting. He complied, but, unfortunately, fresh difficulties arose, and the "scandal" still continues, to the regret of his flock and of the Orthodox Church in general.

General News.

The Indian troops that were quartered at Limassol have left, being relieved by a detachment from Egypt. The Government is importing a supply of silver coins, especially of 1s. and its fractions, and the paper currency, which is in a deplorable condition, is to be withdrawn.

ASIA MINOR.

SMYRNA, May 23.

The Smyrna British colony entertained Mr. Van Uijé Petersée, Dutch Consul-General, and his collaborators, Counts Edmond and Daniel de Hocheplid, to a luncheon in the Cercle de Smyrne on May 20, to show their appreciation of the work done by the Dutch Consular staff for the welfare of British subjects while under the protection of the Dutch Consulate-General.

Sir Harry H. Lamb, K.C.M.G., representative of the British High Commissioner, as chairman, in suitably proposing the toast of Mr. Van Uijé Petersée, called upon Mr. Herbert Whittall, who recalled the excellent and tactful help which the British colony had derived from Mr. Van Uijé Petersée and his collaborators. The toast was enthusiastically drunk. His British Majesty's Consul Gary leading the singing of "For He's a Jolly Good Fellow." After Mr. Van Uijé Petersée and Count Edmond had suitably responded, and emphasised the fact that their work for the British colony was rendered comparatively easy and certainly very agreeable by the untiring efforts of Mr. Herbert Whittall and his committee (members of the British colony), Mr. L. Le Bouvier proposed the health of Mr. Herbert Whittall, which was enthusiastically received by the representatives of both colonies. In reply, Mr. Whittall expressed his profound appreciation of the kind manner in which the toast had been received, and after eulogising the work done by members of his committee, especially by Mr. Frank Hatton and Mr. Alfred Hadkinson (whose healths were also drunk), he took this opportunity to place on record the fact that the ex-Governor-General of Smyrna, Rahmi Bey, had in innumerable ways throughout the trying period of the war assisted the British colony to the very limit of his power. The company present loudly cheered this grateful recognition of a Turkish statesman who has always been a friend to the Smyrna British colony.

An Afghan Mission, under Mohammed Vali Khan is visiting Europe to announce the forthcoming coronation of the Ameer and to invite the European States to enter into diplomatic relations with Afghanistan.

BENGAL UNDER LORD RONALD SHAY.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—A volume reproducing the speeches delivered in 1920-1 by the present Governor of Bengal is an exception to the rule that political oratory in book form is "stale, flat, and unprofitable." They cover an immense extent of ground. The political revolution now in progress, village self-government, sanitation, Buddhism, co-operation—these burning questions and many others are handled with insight and broad sympathy. His Excellency's view of the Khalifate agitation cannot fail to interest your readers. Addressing a Mohammedan Association in July last, he said:—

You have reminded me that the fate brought upon Turkey by the folly of those who persuaded her to throw in her lot with the enemies of our common empire is a source of profound sorrow to the Mohammedans of India; and I hasten to say that I have the deepest sympathy with every Moslem in Bengal whose heart is stricken with grief at the thought of his co-religionists in their hour of abasement and trial. But I cannot for a moment sympathise with those who are seeking to induce the Moslems of this country to set foot upon a path which, while it cannot possibly lead to any amelioration of the fate of Turkey must inevitably end in leading them down the slope of disaffection to ultimate disaster.

The Mohammedans of Bengal, numbering 24,000,000 at the last census, are ordinarily peaceable folk; but ignorance, credulity, and high emotional capacity render them liable to fits of unreasoning fury when the cry "Religion in Danger!" is raised. These characteristics are played upon by designing men, whose falsehoods Lord Ronaldshay had no difficulty in demolishing. For example, it was rumoured on the strength of newspaper statements that the Sheikh-ul-Islam had been deported by the British from Constantinople. As a matter of fact, the banishment of an undesirable who had once filled that high office was demanded by the *Turkish Government*. Another statement of the kind gained wide currency; it was that the sacred Kaaba at Mecca had been destroyed by British guns. Lord Ronaldshay told his hearers that the Kaaba has been damaged and nine worshippers slain by a shell from the citadel, wherein a *Turkish* garrison was besieged by the Sherifian troops. Well might he ask:—

Who is best discharging his duty towards God and Man—he who moves over the land, stirring the muddy waters of hatred and strife, or he who fearlessly and honestly performs the duty which lies to his hand, co-operating gladly with all who have for their object the welfare of their fellow-men?

Bengal, under Lord Ronaldshay's rule, has made far greater strides than during the preceding quarter of a century; and turns a deaf ear to agitators who aim at rendering Britain's position in India untenable.—I am, etc.,

London, June 6.

F. H. S.

THE DODECANESE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—On March 1 the Island of Kastellorizo, with a population of 12,000 Greeks, was ceded to Italy by France according to the spirit of the ill-fated Sèvres Treaty and the Triune agreement on the Dodecanese. Italy, however, has not evacuated the Twelve Islands, although the Greek flag is rehoisted in the Dodecanese, and Dodecanesian passports are available "until the cession to Greece." Patriotic feeling has never been so high in the Dodecanese as it is now, and the islanders are not only preparing for a hearty God-speed ceremony on the day when the Italian Army will leave the Dodecanesian shores, but they have also opened a fund for the Greek wounded in the Anatolian War, to which Rhodes alone subscribed more than 200,000 drachmas.

This much-delayed evacuation is incomprehensible to the Dodecanesians. When in October last the Italian Minister at Athens, Signor Montania, was approached by the Dodecanesian Delegation with reference to the cession of the islands he answered emphatically: "We are on the eve of the evacuation." We are still waiting for this doubtful "veillée de bonheur."

Count Sforza wrote recently in the centenary number of the *Manchester Guardian*, May 5:—"Italian influence is in no way to be construed as meaning oppression to other people's rights." We gladly welcome this promising news, and hope that this new orientation of the Italian Government may bring nearer the day when the Dodecanese will cease to wait and see and to watch and pray for her national re-establishment, the union with Greece.—I am, etc.,

THEODORE D. MOSCONA,

Dodecanesian Delegate at the Peace Conference.
32, Oxford Street, Manchester, June 2, 1921.

DALMATIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—In the article entitled "Some Notes on Dalmatia" of your number for May 19 your Zagreb Correspondent has made a slight mistake in the second column, 36th line—that is, he has written Vladika Peter II. instead of Vladika Peter I. Sveti (the Holy). Vladika Peter the Second (or better known as Vladika Rade), successor to the latter since 1830, was indeed a "great poet and soldier," but he could not have taken part in the war against Napoleon I., which is concerned, as he was born five years after this war took place.—I am, etc.,
D. VASILYEVITCH,
26, Park Road, Glasgow, May 22, 1921.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

May 30.—Sir Philip Lloyd Greame informed Sir Charles Yate that a revised table of British consular fees had now been approved, under which the majority of fees would be raised by amounts varying from 50 per cent. to 100 per cent., and in addition it had been decided to levy a surtax of 25 per cent. on all the fees.

May 31.—Mr. Montagu informed Sir Charles Yate that up to April 30, 23,925 men were attested in the auxiliary forces in India; this total excluded men who are enrolled but have not yet attested; the proposed strength of the Force is 32,000.

June 1.—Mr. Harmsworth informed Mr. Ormsby Gore that the political situation in Teheran is at present somewhat unstable, but that he had no information to suggest any intention on the part of the Persian Government that they proposed to dispense with the services of British technical officials who had proceeded to Persia following the Anglo-Persian Agreement of 1919. The representative of the Russian Soviet Government had recently arrived in Teheran, and the Government of Persia appeared to be temporarily in the hands of a military dictator. The Persian Government were endeavouring to raise and train a suitable force for the maintenance of internal order, and intended to take over the force hitherto known as the South Persia Rifles.

Mr. Harmsworth informed Mr. Ormsby Gore that the latest information regarding the political complexion of the Angora Government is that the extremists are in the ascendant. It is in close touch with the Russian Soviet Government; but that there was no information to show that the recent hanging of a British Indian subject was the result of Russian representations.

Mr. Harmsworth informed Sir John Rees that everything possible was being done to absorb the Armenian refugees in Mesopotamia who are capable of colonising the healthier districts. The remainder will be repatriated as soon as some reasonable guarantee of their personal safety has been received. The Assyrian refugee camp at present costs approximately 400,000 rupees a month. It is hoped to dispose of this camp at an early date, partly by repatriation and partly by allotting them land for settlement. The sum of £9,700 a month is being incurred on the maintenance of those Russian refugees under British control in camps in Egypt, Cyprus, and Tuzla, near Constantinople, and there is a further charge of £10,000 a month for those Russian refugees who have been taken over by the Serbian Government.

June 2.—The Prime Minister informed Mr. Ormsby Gore that the agenda of the next meeting of the Council of the League of Nations at Geneva on June 17 includes the question of the definition of the "A" (ex-Ottoman territories) and "B" (African) Mandates.

The Prime Minister informed Sir Frederick Banbury that he had hoped that as a result of the negotiations with Turkish representatives in London early in the spring it would have been possible to ratify a treaty of peace with Turkey. He regretted, however, that subsequent developments had rendered this course impossible; in these circumstances he did not think it possible to adopt the suggestion that a proclamation should be issued declaring the termination of the War could be made immediately, but it was clear that if agreement was much longer postponed there must be an official declaration on the lines indicated.

In reply to a question by Mr. Ormsby-Gore, asking whether any offers of assistance had been made by the British or any of the Allied Governments to the Greek Government by way of furnishing munitions or technical assistance to the Greek forces in North-Western Anatolia for the protection of Constantinople against a possible advance by Angora troops, the Prime Minister stated that the answer was, so far as His Majesty's Government were aware, in the negative. The British Attaché at Athens had

been invited to visit the Greek front in Asia Minor, and may by now have proceeded there.

Mr. Harmsworth informed Sir William Seager that when in March last His Majesty's Government concluded a formal agreement with Bekir Sami Bey for the mutual exchange of prisoners they confidently assumed that the Angora Government appreciated the moral obligation, admitted and observed by all civilised States, to honour the signature of its representative. In pursuance of the agreement so signed we had released forty out of the sixty-four Turkish internees at Malta. He regretted to have to inform the House that the British prisoners were still detained by the Angora Government, and His Majesty's Government are reluctantly compelled to admit that their confidence in the good faith in the Angora Government has so far been misplaced. His Majesty's Government will make every effort to secure the release of the thirty-two British prisoners of war still in the hands of the Angora Government, and pending their release the remaining twenty-four Turks named in the agreement will be detained at Malta.

Mr. Harmsworth informed Sir William Seager that the recent disturbances in Egypt were confined to the cities of Cairo and Alexandria. They began in the former city on May 18, and continued on the two following days. Order was restored on the evening of May 20, and has been maintained since. British troops were not called out in Cairo. The Cairo casualties amounted to:—Killed, 5 natives; wounded 133, including 100 Egyptian police and 14 Egyptian soldiers. Disturbances began in Alexandria on May 20, when two Egyptian police stations were burnt and the police were compelled to fire on the mob. Order was not restored until the night of May 22, when collisions occurred in the Hamamil quarter between Egyptians and Europeans. On the following morning the Egyptian police were no longer able to control the situation, and handed over to the British military authorities, by whom order was restored. There have been no further outbreaks. The total casualties in Alexandria were:—Killed, 68 Egyptian natives, 1 British soldier, 1 Maltese, 1 French civilian, 3 Italians, 13 Greeks. The wounded included 30 Egyptian police, 5 Jews, 2 Maltese, and 64 other Europeans, of whom 46 were Greeks.

Mr. Edward Wood informed Mr. Cairns that the Commission of Inquiry into the recent Jaffa disturbances had commenced its investigations. The Commission of Inquiry consists of the Chief Justice of Palestine, with two other British officials of the Palestine Government, and it is assisted in its labours by three prominent Palestinian notables, one Christian, one Jew, and one Mohammedan.

THE CARAVANSERAI.

*Think, in this batter'd Caravanserai
Whose Doorways are alternate Night and Day,
How Sultan after Sultan with his Pomp
Abode his Hour or two, and went his way.*

—OMAR KHAYYAM.

Bulgaria is honouring greatly the memory of the late Mr. J. D. Bouchier in issuing stamps bearing his portrait, and I cannot recall any instance of a private individual being so honoured before. But it is a graceful act, and displays well that gratitude which is, I am told by those who ought to know, such a well-marked feature of the Bulgarian character. I have been amusing myself by thinking of other British subjects who might be honoured in similar fashion by other Balkan States. Dr. Seton Watson or Sir Arthur Evans might, I think, be selected by Yugoslavia, and Sir Arthur Croft by Greece. Had Montenegro retained its independence it would surely have chosen that warm-hearted champion, Mr. Alex. Devine. No British name occurs to me in connection with Roumania, but I could suggest several in connection with Turkey if I let my fancy rove so far afield. As to Mr. Bouchier's portrait, I cannot help wondering whether his famous ear-trumpet will be part of the composition. For my part I simply cannot think of him apart from that aid to hearing, which he could—and did!—use so effectively in argument, putting it away with a snap when he felt that he had "bowled out" an opponent. Did not one of the best of his obituary notices insist that the trumpet, or his deafness, had been responsible for many open-air conferences, since no statesman ever felt safe in discussing matters with "J. D. B." unless he had a clear field around him? And, after all, the ear-trumpet would be in a way a sign of honour, since it would remind us how much the great correspondent accomplished in spite of his infirmities. To have fathered the Balkan Alliance in spite of that drawback was, indeed, an achievement.

The rather vivid blue which now seems to be the fashionable colour for ladies' hats appeals to me very strongly, because it brings back pleasant memories. For it is the same colour that you notice in the gorgeous jays of Mesopotamia. The blue on the wings of our own English jays is a beautiful shade, but there is not much of it, and nobody would call it brilliant. But the jay of Mesopotamia is a truly magnificent sight as he wheels and flashes in the fierce sunshine. His plumage seems to be all blue and burnished to perfection, so that even our bright kingfisher

would look almost dowdy by comparison with him. And to see some score or more of these Irakian jays whirling and dipping round one of the few elevations to be found on those level plains is a sight never to be forgotten. The golden oriole, too, is a wonderfully effective bird, and when you get some of his kind mingling with the blue jays the effect is particularly beautiful. It is to be hoped that the Mesopotamian Government will take—or has taken—steps to prevent the extermination of these lovely birds. The country has none too many natural beauties, and it should protect all those it has.

The Indian papers have been making merry over a postal clerk's valiant attempts to do his duty. Finding an unaddressed envelope containing an invitation card to a function at a club, he instructed the postman to try "R.S.V.P.," Esq., at the said club. The letter was, of course, returned again, and he then had a shot at "Sir Dash and Lady Blank" (real names given), who were giving the entertainment, sending the card again to the club; and this time it found a resting place. For my part, I can only admire the conscientious way in which the sorting clerk, or whatever he should be called, grappled with his problem. It may comfort him to know that the cabalistic mysteries observed by worshippers of the great god Etiquette puzzle people in this country at times. To my own knowledge, a young Englishman once left a card on a friend, who was rather surprised to read on it "P.P.C.," for he had not heard anything of the caller's intention to leave the place. A little later, meeting the card-leaver, he expressed his surprise, when the other, in turn, became perplexed. Eventually it transpired that the card-leaver had understood that "P.P.C." stood for "Pardon personal call"—whatever that may mean.

An American who was in Cairo during some of the worst rioting of two years ago, was telling me the other day of some of the curious things he saw, and giving me his views on our relations with Egypt. "It is," he said, "a lovely thing that England"—he really did say "England," not Great Britain, please!—"that England is trying to do, but, in my opinion, it simply can't be done. The Egyptians just aren't ripe to govern themselves; and, if you leave them to try to do it, there will be a most dreadful mess." Then he went on to say that we had made our worst mistake in trying to give the Egyptians an education along European lines rather than seek to develop them on Oriental lines. They do not feel any gratitude for what we have done, in this way at any rate; and use their "education" to attack us. The gentleman referred to assured me that he had himself heard one of the *ulema* addressing a crowd in English, and pointing out that it was the British who had "taught us to value liberty," and that now they (the Egyptians) meant to have it; that it was we who had given them ideas about democracy and so forth, and that these ideas were bearing fruit in the scenes then in progress, etc., etc. The crowd, said my informant, was enjoying the jibes and jeers immensely.

And then my American friend went on to say how splendidly our soldiers had behaved throughout that trying period. At one time, in particular, he noticed some cavalry, dismounted, drawn up across the end of a square—the Abdin Square, I think he said. There were about forty of them, and a crowd of the lowest of the low Egyptians was parading up and down before them, insulting them in every way. Particularly my friend noticed some women of the street who were brandishing Egyptian flags right in the faces of the soldiers and going through pantomime, which was—well, what one would expect from women of their calling. "Your soldiers," said the American, "were just fine. They stood like rocks. I tell you, our men would never have done it. They just would not have stood it." Of course, our soldiers' conduct was only what one would expect of them, but the praise from a quite disinterested quarter was good to hear. "Here's to you, Tommy Atkins"—and to Brother Jonathan, too.

MUSICAL NOTES.

A Week of Bach.

That Mr. Harold Samuel should devote a whole week to the keyboard works of Bach, and that in six recitals he should be followed with curious and increasing interest by discriminating audiences are a tribute both to the pianist's excellence and to the high favour in which Bach now stands. The whole effort was the most delightful expression of the æsthetic awe that descends when composer, interpreter, and listener are at one; for to hear Mr. Samuel play with loving ease the works of the composer whom one is always tempted to call, after hearing him exquisitely done, the greatest of musicians, was indeed a real and rare experience. During the Fantasia in C Minor, for instance (which he played on May 31), the Wigmore Hall became a paradise; before such part-playing as there was in this the critic curled up and hastily and very willingly changed into the ordinary humble immortal, impotent but to bless. It would be as superfluous to comment on a certain hardness in Mr. Samuel's touch as it would be to note the manifold beauties of his tone-colour or the splendid flexibility of his rhythm; for we are unreservedly grateful to him.

Pouishnoff, Gabrilowitch, and a Spanish Pianist

The shadows which the coal strike have cast over this country became longer than ever for me when I was forced, in order to catch a train, to leave M. Pouishnoff's last recital this season at the Queen's Hall on June 2 before it was over. One has ceased to marvel at this pianist's technique; it is what he builds upon it that holds us. He might have had better tone in Bach's Chaconne in D minor which Busoni has laid out for the modern pianoforte, but otherwise his performance in this extraordinarily difficult work was superb. Again, he might perhaps have introduced a shade more variety of treatment in the repetitions of the theme in Mozart's Larghetto in A major, but the soft silkiness of his touch was exquisite. Nothing, however, could have surpassed his interpretation of Chopin's Ballade in F minor; all the fears which inevitably affect one that Chopin's music is losing in interest were blown miles away by M. Pouishnoff's gorgeously clear playing in this. And the exceptional width of his vision, which has characterised all his programmes, was strikingly proved by his playing of Moussorgsky's "Hopak" after the Chopin; it was the dream followed by the reality, the one a web of colour spun by unearthly hands, the other a dance by living feet.

M. Ossip Gabrilowitch, who has been in London before, gave the first of three pianoforte recitals at the Wigmore Hall on June 3; the other two are to take place at the same hall on June 13 and June 28. He is a pianist of considerable achievement. Into the first movement of César Franck's "Prelude, Chorale, and Fugue," he introduced a beautifully high style of playing; one does not often hear its poetic power so unostentatiously and convincingly brought out as it was by him. But the work as a whole was rather marred by hasty climaxes and wrong notes in the fugue. Again, he commenced Beethoven's sonata in D major (Op. 10) with rare promise; his notes in the *presto* movement were spick and incisive; but in the *largo* and *menuetto* his rhythm was too "correct" and rigid, though how freely crisp he could let it become was shown in the *rondo*. In twelve of Chopin's preludes he played with excellent tone, but his *rubato* seemed affected, for the degree of time which had to lapse before the right hand should play its melody after the left hand had done its work seemed monotonously calculated. However, M. Gabrilowitch is much above the ordinary level of pianists, and if I have harped more on his faults than his virtues, it is because his intentions are high enough to warrant criticism. In his unaffected style of playing there is much charm.

Señor Montoriol-Torres, whose recital was at the Wigmore Hall on June 2, is described as the "famous Spanish pianist," but one rather wonders whence he derived his fame. For, briefly, he is a long way from understanding the technique of his instrument. If he could only have realised how blurred his bad pedalling was making his tone in Beethoven's "Waldstein" sonata, we could have forgiven him his wrong notes; and if only his rhythm had been more like what one would expect from a native of his country we could have pardoned him his lapse of memory. Again, in Chopin's B flat minor sonata his conception was confined to the phrase, and it was really only in three dances of Granados that his sense of colour and rhythm was at all brought into play.

A New 'Cello Sonata.

It is true that the term sonata is now taken to mean almost anything, but to string a suite of light fancies together and to call it a sonata, which is what Fernand le Borne has done in the work that Miss Yvonne Morris and Miss Kathleen Long played at the Æolian Hall on June 2, is surely stretching things too far. This sonata, which has

for the titles of its movements such lucid words as "Désirs," "Prière," "Amour," "Souvenirs," was well played by the pianist, but the 'cellist's intonation and rhythm were by no means good. Miss Morris has, however, both fair tone and spirit, and will certainly improve.

Mr. Ingo Simon.

This fine vocalist's second recital was given at the Wigmore Hall on May 31, when, however, I was able to hear only one group of Italian airs. There was the same easy mastery which I before noted, particularly in an exquisite anonymous composition of (probably) the sixteenth-century "O leggiadri occhi belli"; indeed, Mr. Simon's pure style informed all that I heard him in except Monteverde's "Lasciatemi morire," in which there was excessive use of a gloomy *portamento*.

A Spanish Violinist.

We were given to understand at the violin recital which Señor Angel Grande gave at the Wigmore Hall on June 4 that trouble with his strings made two things necessary—a very late start and very uncertain intonation. The first mischance thus involved was unfortunate for me, for it meant my missing the very things I had gone to hear—three new pieces by Moreno Torroba. What I did hear was not greatly moving. Any sonata is impossible as a piece of chamber music with the unsympathetic Mr. Krish at the pianoforte, though Señor Grande showed that he understood some of the rich beauty of César Franck's over-played work; a Bach fugue unaccompanied was rhythmically shaky; and the three pieces of Luis Lloret—"Cataluna," "Gallegada," and "Zambra," which the violinist introduced to London—were poor in construction if refreshing in conception. The "Gallegada," in which there appeared to be extensive use of Moorish methods, was the most attractive.

Miss Doris Barr.

It is, I know, objectionable to refer to a young artist as "promising," but that is certainly the trouble with Miss Doris Barr, whose third vocal recital was given at the Æolian Hall on May 31. She showed a nice and enterprising taste in the choice of her programme, which is a great point in her favour. But what she needs most to improve is her rhythm; for it was her failing in this that made it impossible for Gerrard Williams to accompany well his own fine songs, "Idyll" and "An Inconsequent Ballade," and even the usually imperturbable Mr. O'Connor Morris was led into errors in Martin Shaw's "Summer." Miss Barr had to assist her a young tenor, Mr. Edward Nichol, with whose selection of songs there was not much wrong. His singing of them, however, rather destroyed one's premature interest.

A Mis-Timed Effort.

At the Wigmore Hall on May 27 two young ladies, Miss Jessie Lyall and Miss May Tritton, essayed to give a recital for two pianos. At best such a scheme is ambitious: at worst it is a martyrdom. And there was, indeed, something heroic in the unbowed efforts of Mr. Alan D. Bush to keep together, in a Bach concerto for two pianos, an extremely heterogeneous force of strings flanked by the two recitalists; yet all that can be charitably said of it is that the recruits had been asked too soon (or offered) to do public battle. Things were little better when Miss Lyall and Miss Tritton had alone at their mercy Schumann-Debussy and Saint-Saens, though it was sometimes not unamusing to find one's fancy for the course nearly a bar behind before the end of the race.

ANDANTE.

THE ARAB HORSE SOCIETY.

A council meeting was held on Tuesday, May 24, at the Grosvenor Hotel. Mr. S. G. Hough was elected President for this year, and Captain the Hon. George Savile Vice-President—i.e., President in 1922. Lady Wentworth was elected patroness of the Society.

It was decided to hold an endurance test for Arab and Arab-bred horses for five days, commencing September 26 next. Entries to be made to the Secretary. The Arab stallion presented by H.H. Emir Faisal to Lord Hartington was accepted on his pedigree. Arrangements were made for publishing the Arab-bred Register this year, entries for which close on August 1 next.

The following members were elected:—Frank J. Adamson, Mrs. Frank Adamson, M. D. Bannister, Brig.-General O. B. B. Smith Bingham, C.M.G., D.S.O., Lieut.-Colonel M. Borwick, D.S.O., J. M. Browne, Miss P. Bowen Colthurst, Major E. Owen Davies, Captain R. Fowler, Major-General J. R. Harman, C.B., C.M.G., D.S.O., Mrs. R. C. Hopkins, C. J. Hutchison, H. Langley-Smith, Sydney W. Leech, Major R. Lomer, Colonel F. Mussenden, P. W. Pegge, H. J. Preston, Captain George Sale, F. K. Selby, Colonel F. Sterling, D.S.O., M.C., F. C. Stephens, Captain F. C. Thorn, Thomas J. Timmis, Captain L. Williams, Charles Wood. The following were elected Governors:—Mrs. F. Bromwich, Captain T. A. Clarke, S. G. Hough, Captain J. Leigh, Lieut.-Colonel P. D. Stewart, D.S.O., and Comte de Zogheb.

NEAR EAST BOOKSHELF.

- 4.—"HITTITE SEALS: With Particular Reference to the Ashmolean Collection." By D. G. Hogarth, Keeper of Ashmolean Museum. (Oxford: The Clarendon Press. 43 13s. 6d. net.)
- 11.—"THE POST-OFFICE OF INDIA AND ITS STORY." By Geoffrey Clarke. (London: The Bodley Head. 16s. net.)

I.—HITTITE GLYPHTIC ART.

Hittite archæology is still in a very undeveloped stage; and though it has made considerable strides since the days when Burton published the Hamath inscription and Wright produced his "Empire of the Hittites," we have still to speak of the gaps in our ignorance rather than of the gaps in our knowledge. Compared with what we know of the early Egyptians and Babylonians, we still know hardly anything about the Hittites. They were evidently a vigorous people, with a lot of character of their own, for they were instrumental in destroying the First Dynasty in Babylonia; they gave the great Rameses II. himself a very bad time at Kadesh; and they were a thorn in the flesh to Tiglath-Pileser. Their power extended over the greater part of Asia Minor, and their influence was felt not only in Syria and Palestine, but—as indicated above—in distant Babylonia, if not in Egypt. It is suggested that they were related to the Hyksos, and though the relation is not scientifically established, it may yet be so; and it is also held that they were the forerunners of the Armenians. Their period may be put roughly at between 2000 B.C. and 600 B.C.; but whence they came originally, or what were the precise limits of their power at any particular time, it is still impossible to say. Excavations now in progress, and the results of those carried out before the war but not yet made available for study, will probably throw fresh light upon the subject, but at present there are very few bright patches on a sea of darkness.

In his Preface the author modestly refers to his book as "a pioneer effort to classify Hittite glyptic." A pioneer effort it was bound to be, in the nature of things; but the work has been extremely well done, and is likely to stand the test of time. Mr. Hogarth's theories and deductions may be modified by future discoveries; but, on the other hand, it does not seem probable that they will be entirely upset, or even largely disproved, so carefully has he weighed his evidence and so thoroughly studied the available material. His classification seems to us to be very good, and his nomenclature is likely to obtain a permanent footing in the branch of science dealt with. The book, it may be noted, was completed and in the hands of the printers early in 1915, but the war period was not favourable to the publication of archæological or artistic treatises, and the author has been wise in not further delaying the appearance of this volume for the sake of incorporating the additional matter rendered available since that date. It will certainly hold its own with anything that has been published on the subject thus far; and the catalogue and description of the Ashmolean Collection (chapters II. and III.), on which the work is based, will be extraordinarily valuable to students. The illustrations of cylinder and seal impressions, whether in the text or in the plates, are wonderfully clear; and it must have entailed much work to secure such good impressions as those here photographically reproduced.

Mr. Hogarth tells us that "the earliest Hittite sphragistic implement was the roller-seal or cylinder," and that "for a considerable period, in Syria at least, it remained the only one." That it was borrowed from Babylonia appears to be established, and the influence of Babylonian art is distinctly visible in many examples. But gradually the Syrian seals began to develop a character of their own—more simple, to become shorter and thicker, to show traces of a different technique. Mr. Hogarth attributes this detachment of North Syria from Babylonian culture to some extent to Egyptian influence. Then comes a great change: the ousting of the cylinder by the "stamp seal," which appears to have been brought about by what would to-day be described as "the popular demand." "Stamps in Syria," we read (p. 104), "from first to last were cheap seals used by the common folk; but in Cappadocia, during the fourteenth and fifteenth centuries, they were probably the only sphragistic implements used by any one who was not royal or in high office." Later, Mesopotamian art regained its influence over the Hittite seal-cutters; but, we are told, it was now Assyria, not Babylonia, that inspired them. Moreover, there were two other influences at work: the Ramesside Egyptian and the late Minoan, which made themselves felt through the Levantine fringe of the Hittite area, particularly Cilicia. "Here an eclectic art of *Mischkultur* kind seems to have developed, less in debt to Mesopotamia than was the Syrian glyptic, and more to Egypt, Cyprus and Crete." New types of stamp-seals

continued to be produced, among them the Conoid and the Scaraboid, which appear to have supplanted all other shapes by the end of the ninth century.

The way in which Mr. Hogarth links up his divisions of forms and types with the various waves of invasion that swept over the Hittite region is very interesting and convincing. It is impossible here to follow him in detail; but, as we have said above, his work is based on careful investigation of most of the material at present available, his deductions appear to us to be sound, and those for whom the work is primarily intended are indeed under an obligation to the author. Moreover, he has handled the subject so that a book which might easily have been intensely "dry" and uninteresting is in fact quite the reverse. The admirable illustrations add greatly to its value and interest. While many of the seals shown are crude both in conception and in execution, others have real æsthetic value. The Carchemish cylinder illustrated on page 52, for example, is highly decorative in effect, and some of the specimens figured in the plates (e.g., Nos. 165, 182, 184, 186, 231) are undeniably artistic. The conventional designs are not to be compared with those of Ancient Egypt; but the work as a whole appears to be freer and more vigorous.

II.—THE POST-OFFICE OF INDIA.

The annual reports of the Post Office of India have great value for the statistician, and are useful works of reference; but their literary value is purely negative. Nor can we imagine any normal layman reading them by way of recreation. The appearance of a book on the history of the Indian Post Office, written by one who is, though he conceals the fact, head of that department, did not of itself produce in us any pleasurable anticipations of an intellectual feast.

Yet it would hardly be an exaggeration to say that this is just what Mr. Clarke does provide us with. We cannot too much admire his skill in avoiding statistical dreariness, while at the same time keeping clear of the temptation to give us a mere popular, and therefore perfectly useless, sketch of his subject. Such literary skill is not too common among Indian officials, and is specially to be commended when the subject dealt with is one which has had the most important consequences to not less than one-fifth of the human race. The popular sketch generally owes its origin to a writer who has not taken the trouble to ascertain or study his facts, and the amount of valuable paper that has been worse than wasted on such productions is beyond calculation. The author, who has buried himself in his subject, and has exhausted all means of study and research available, too often produces mere literary penmanship. It is, therefore, most fortunate that this task has fallen, in the shape of a labour of love, into the hands of one who combines the ability of a careful and learned expert with the light touch of an interesting exponent and the gift of selecting essentials from the mass of facts at his disposal.

His account of the gradual development of the Post Office of India from what Warren Hastings very properly called "a labyrinth of obscurity" into the existing very highly specialised congeries of branches, touching every part of the life of India, is worked out with much clarity in eighteen chapters, none of them long and all admirably arranged to avoid overlapping. To these are added a chapter on Indian philately, and a number of appendices, of which that summarising the work of the Indian Field Post Office from 1867 to 1912 is of special value. It may be mentioned that the splendid work done by the Indian Post Office in connection with the Great War is treated in the body of the book. Throughout the work we are agreeably surprised to find that the individuals who, at the head, have carried on the torch are hardly mentioned, while the debt of India to its postmen, runners, and other too often neglected humbler servants is handsomely recognised.

The illustrations add to the interest of the book, though we could have dispensed with some of the portraits of high officials, whose presence rather jars with the impersonal touch mentioned above. A page or two reproducing a few specimens of the apparently hopeless addresses which the Indian postal official has habitually to wrestle with would have been more interesting. It need hardly be added, considering the name of the publishing house, that the "get-up" of the book is excellent, though we were sorry to find that a few more pages had not been spared for a more complete index.

We presume that the entire absence of reference to the telegraph side of the Indian Post Office is intentional. This might have been justified if the history had not come down to the present day. As it is, we cannot but regret that no account is given us of the important events which led to the amalgamation of the two branches and of the methods by which this amalgamation has been worked.

PERSONAL AND GENERAL.

TO-DAY.

June 9 (New Style).
May 27 (Old Style).
Shauwal 3, 1339, of the Moslem Calendar.
Sivan 3, 5681, of the Jewish Calendar.

Viscountess Ednam has arrived in Paris from Bombay.

The Aga Khan arrived in London last week from Paris.

The Raja of Rajpipla has arrived, and is staying at the Ritz Hotel.

The Hon. Lady Lloyd has arrived at 14, Bryanston Square from India.

Lady Ratan Tata has arrived at York House, Twickenham, from India.

The Hereditary Prince and Princess of Kapurthala have arrived in Paris from Bombay.

Queen Olga, mother of King Constantine, and lately Regent of Greece, has left Athens for Paris.

Mrs. Philip Martineau has arrived at 12, Upper Berkeley Street from visiting the King and Queen of Roumania.

Colonel C. H. L. Meyer and Mrs. Meyer, of Bombay, are in residence at 7, Park Lane, W.1. Telephone, Mayfair 7136.

The General Council of King George's Fund for Sailors have recently allocated a grant of £500 to the Missions to Seamen, Bombay.

The Maharao of Cutch, who is to represent the Indian Princes at the forthcoming Imperial Cabinet meetings, has arrived in London.

The Sultan called in state on June 3, states the Cairo correspondent of *The Times*, at the Residency to present his congratulations on the occasion of the King's Birthday.

On May 31 the Czecho-Slovak Minister in Belgrade presented to M. Pashitch, the Serbian Prime Minister, the War Cross awarded him by the President of the Czecho-Slovak Republic.

Dr. Milan Stojadinovitch, Assistant Director of the British Trade Corporation in Belgrade, has been elected as Honorary Professor of Financial Science in Belgrade University.

The Duke of Connaught visited Walker's Galleries, New Bond Street, last week, to view the water-colours of Egypt, Algeria, and neighbouring places, by Lieutenant-Colonel Engleheart.

In the course of a visit to the Aisne battlefields, the Maharaja of Indore placed some flowers on the grave of Quentin Roosevelt, the son of the late President of the United States.

The engagement is announced of Mr. R. W. Bullard, C.I.E., son of the late Charles Bullard and of Mrs. Bullard, of Walthamstow, Essex, to Miriam Catherine, fourth daughter of the Master of Balliol and Mrs. A. L. Smith.

Our Cyprus Correspondent writes (May 18):—

Mr. C. C. Gerahty has been appointed President of the District Court of Famagusta.

Mr. J. C. McCaskie, P.D.C., Famagusta, has been granted leave till October 21.

A message from Washington states that Princess Bibesco, wife of the Roumanian Minister, has signed a contract with a New York magazine to write short stories dealing with life in Washington diplomatic circles. She will devote the whole of the summer to writing.

Sir James Robert Dunlop-Smith, K.C.S.I., K.C.V.O., of 25, Ovington Square, Chelsea, S.W., Political A.D.C. to the Secretary of State for India, who died on April 24, intestate, has left personal property of the value of £10,721. Letters of administration are granted to his daughter, Janet Dunlop-Smith, one of the next-of-kin.

Canon Dudley Cary Elwes, rector of All Souls Roman Catholic Church, Peterborough, and brother of the late Mr. Gervase Elwes, was presented at Peterborough last week with the insignia of the Knights of Malta and a cheque for 200 guineas by his congregation and by musical friends in celebration of his silver jubilee as priest.

The engagement is announced between Commander A. D. W. Smith, Royal Navy, R.N. Staff College, Greenwich, only son of the late Arthur J. Smith, M.R.C.S., L.R.C.P., of Kurseong, Bengal, and Mrs. Childe, of Cranleigh, Kent Road, Southsea, and Phyllis, elder daughter of Captain Frederic C. Dreyer, C.B., C.B.E., Royal Navy, Director of the Gunnery Division, Admiralty Naval Staff, and Mrs. Dreyer, 35, Bury-Road, Alverstoke.

The Cairo correspondent of *The Times* writes (June 1):—In a letter accompanying the final list of Warriors' Day subscriptions, which in Egypt, the Sudan, and Palestine amounted to £11,000, Lord Allenby says that its organisers must be proud of the result, which is due to the generosity not only of the British but also of foreign communities. He adds that the local branch has already had valuable assistance in securing employment for ex-Service men.

The Prince of Wales was present at the annual dinner of the Indian Cavalry Club, held at the Victoria Hotel on June 2. The dinner was very largely attended. General Sir George Richardson, K.C.B., occupied the chair, and among others present were:—General Sir John Nixon, G.C.M.G., Major-General W. B. James, C.B., Major-General J. C. Stewart, C.B., Brigadier General W. H. Fasken, C.B., Colonel C. B. Stokes, C.I.E., Colonel G. Gwyn Thomas, C.M.G., Colonel Clive Wigram, C.B., Colonel C. E. Stack, and Mr. Austin Low, C.I.E., hon. secretary.

Our Smyrna Correspondent writes (May 22):—

Seldom has Bournabat, suburb of Smyrna, seen a prettier wedding than that of Miss Eileen Wilkin to Mr. Duncan G. Wallace, R.N.R., on May 19. The church was beautifully decorated by the young ladies of the village; the bride, a charming girl, fair as a lily, looked like a fairy among the garlands of white roses; and the bridegroom, resplendent in blue and gold, was in picturesque contrast to the sombre khaki-uniformed Major Johnston, who acted as best man. The happy couple passed under an arch of cutlasses, held by men who had served with the bridegroom on H.M.S. Adventure; and the journey to the house of Mrs. Charlton Whittall, the grandmother of the bride, was enlivened by the sailors dragging the carriage and cheering the happy pair. The reception was also a brilliant success. The speeches of the Best Man, the Bridegroom, Mr. Gary, the British Consul, and Mr. Wallace Turrell were very witty, and were thoroughly appreciated by the hundred guests. About 6 p.m. the newly-wedded pair drove off in a flower-bedecked car to their home in Bairacli, at the head of the Smyrna Gulf.

The Calcutta dinner was held at the Hotel Cecil on May 31. Mr. J. C. Shorrocks presided, and Sir Arthur Lawley was the guest of the evening. The company of 200 included:—The Persian Minister (for many years Consul-General for Persia at Calcutta), Lord Carmichael, Mr. Syed Ameer Ali, Sir William Meyer (High Commissioner for India), Sir H. P. Burt, Sir Robert Carlyle, Sir John Cumming, Sir Frank Carter, Sir Duncan Carmichael, Major Sir George Dolby, Sir Lorraine Dunbar, Sir Archdale Earle, Sir Robert Fulton, Sir Stephen Finney, Sir George Godfrey, Sir H. Holmwood, Sir John Hewett, Major-General G. F. A. Harris, Sir R. Highet, Sir Charles Kesteven, Sir James Leigh-Wood, Mr. T. McMorran, Sir C. C. McLeod, Mr. A. P. Muddiman (President of the Council of State, India), Mr. A. D. Pickford (the administrative head of the Boy Scout movement in India), Mr. N. C. Sen, Sir C. Stevenson-Moore, General A. E. Sandback, Colonel Sir Buchanan Scott, Sir Montagu Turner, Sir James Walker, Mr. Walter Davies (hon. treasurer), and Mr. E. W. Bowrey (hon. secretary).

APPOINTMENTS, ETC.

M. Michel Frangopoulos has been appointed Commercial Attaché to the Greek Legation.

Mr. Walter Sidney Shaw, Puisne Justice of the Supreme Court, Ceylon, has been appointed Chief Justice of the Straits Settlements.

Sir Claude Hill, who was formerly Finance Member of the Viceroy's Council in India, has taken up the post of Secretary-General of the League of Red Cross Societies at Geneva.

The appointment of General Lord Byng, G.C.B., K.C.M.G., M.V.O., to be Governor-General and Commander-in-Chief of the Dominion of Canada, has been hailed with peculiar satisfaction in Egypt.

OBITUARY.

The death is announced from Simla of Khan Bahadur Gulam Martara Khan, who was Oriental Secretary to the British Mission at Kabul.

The death is announced in a Vienna sanatorium of General Peter Michitch, who distinguished himself while commanding a Serbian division at the time when the Salonika front was broken.

Our Smyrna Correspondent writes (May 25):—

Mr. James Langdon, of the firm of Rees and Co., and the senior member of the Smyrna American colony, died suddenly last night, following a paralytic stroke.

The death has occurred, at the age of eighty-one, of Colonel John Herschel, late Royal Engineers. He entered the Bengal Engineers in 1856, but did not land in India until after the Mutiny. Almost at once he was appointed to the Great Trigonometrical Survey, and he served in that department for nearly thirty years, being at the time of his retirement in 1886 Deputy-Superintendent. He was a member of the Senate of Calcutta University.

The death is announced from Samos of Mr. William Roger Paton, who had lived for some time on the island. In his earlier years, says *The Times*, he had done some interesting archaeological work in Greece, in particular at Assarlik, in Caria, and at Cos, where he collected a number of inscriptions and published them in a book to which the late Bishop Hicks of Lincoln supplied a preface. Another work of his was a selection of pieces translated into English verse from the Greek Anthology, and he had recently completed the translation in five volumes, for the Loeb Classical Library, of the whole of Greek anthology.

FUNERAL OF M. VESNITCH.

The funeral of M. Vesnitch, the Yugoslav Minister in Paris, who died at Paris on May 28, took place on May 31. The Prince Regent of Serbia, a representative of President Millerand, M. Bonnefoy, Minister of Justice, representatives of all the other Ministers, the members of the diplomatic body, Marshal Petain, Sir Thomas Barclay, Vice-President of the International Institute of Law, and a large number of French and foreign personages were present. Military honours were rendered. The body has been placed provisionally in the crypt of the Rue Daru Church, pending its removal to Belgrade.

SIR RICHARD BURTON.

The centenary of the birth of Sir Richard Francis Burton, the explorer and Orientalist (1821-1890), will be marked by the establishment of an annual memorial lecture on the lines of the Sir George Birdwood Memorial Lecture, and a committee has been formed to collect funds. The lecturers are to be experts on the countries in which Burton was interested. The Duke of Connaught is the patron, and Sir Richard Temple is chairman of the committee, which includes Sir F. Younghusband, Sir Percy Sykes (by whom the scheme was originated), Lord Reay, Sir H. H. Johnston, Lord Desborough, Mrs. Rendall, and Sir C. Hercules Read, with Mr. N. M. Penzer as hon. secretary and Captain Campbell Thompson as hon. treasurer. The Royal Asiatic Society has offered the use of its premises for meetings, and the first meeting, to issue an appeal, will be held on June 14.

The London office of the Italian State Railways and Steamship Lines announces that the Trieste Lloyd Line (Lloyd Triestino) has effected an important acceleration in its fast weekly service to Alexandria. The voyage from Trieste now occupies 73 hours, and from Brindisi only 48 hours by oil-driven liners.

NEWS IN BRIEF.

King Constantine's name day was celebrated throughout Greece on June 3.

Slight sniping and attacks on pickets are reported in Waziristan, according to an official telegram from India dated May 26.

On Saturday, May 28, the anniversary of the declaration of Azerbaijan independence, was celebrated by members of the Azerbaijan colony in London.

It is stated in a telegram from Rangoon that the strike on the Burmah railways has come to an end, nearly all of the men having asked to be reinstated unconditionally.

The Greek Government has introduced a Bill increasing King Constantine's allowance by 1,300,000 drs. (about £18,500), and doubling the allowance granted to the Queen Dowager.

The Roumanian naval division, states a Reuter telegram from Bucharest, has adopted Sulina as its base. The Roumanian warships and the dockyard material and staff have arrived at that port.

Delegates from all the national societies except those of Portugal and Yugoslavia will attend the fifth International Conference of the Union of League of Nations Societies at Geneva on June 10.

News has reached Paris that recalcitrant Berber tribes in the Middle Atlas region, south of Mequinez, have been defeated, with serious losses, by Moors friendly to the French. No French troops were engaged.

According to a telegram received in London from the Indian Revenue and Agricultural Department, scarcity is becoming more intense in Chagai and Upper Zhob, and distress in the Marri and Bugti countries (Baluchistan) is increasing.

It is reported from Tiflis that numerous Kurd, Tartar, and Armenian detachments, headed by the well-known Kurd Sultanov, have entered the town of Shousha, thus liberating from the Bolsheviks the whole Karabagh district.

A delegation sent by the Azerbaijan "Independence Salvation Committee" in Switzerland is to visit Turkey, Persia, India, Egypt, and Afghanistan to acquaint Moslem opinion with the hardships of the Azerbaijan population under Bolshevik rule.

It is announced that the head of the Persian delegation recently in Moscow, who is now in Paris, is leaving shortly for the Caucasus for the purpose of concluding a political and economic agreement between Persia and the Soviet Republics of Azerbaijan, Georgia, and Armenia.

The Special Correspondent of *The Times* in the Middle East reports that Teheran is full of krans, of good silver and full weight, minted in Russia from dies prepared in the reign of Muzaffer ed-Din Shah, and that forty mule-loads of this silver are now on the way to the Soviet Legation from Moscow.

The Roumanian Ministry for the Interior has published a notice to the effect that the Central Roumanian Commission for War Requisitions has fixed January 1, 1922, for the liquidation of all questions in connection with requisitions. It is stated that any claimants who do not take action before this date will lose their rights.

A morning glory seed, reputed to be 5,000 years old, has been brought to Baltimore and planted in the garden of Mrs. W. Champlin Robinson, in Green Spring Valley. The seed is one of twelve found in the hands of a mummy of a young Egyptian girl, which was recently removed to the United States. Ten of the seeds have already been planted, and all of them germinated.

Owing to the destruction at Kut-el-Amara of all official records belonging to General Townshend's force in April, 1916, difficulty is being experienced in preparing the official history. Officers or others who possess any records (diaries, letters, sketches, etc.) regarding any phase of the operations during the period from the battle of Kut in September, 1915, to the surrender in April, 1916, or who can assist the historian from their memory of events are invited to communicate with the Secretary, Historical Section, Committee of Imperial Defence, 2, Whitehall Gardens, S.W.1.

THURSDAY, JUNE 9, 1921.

THE ANGORA PROBLEM.

There is to be a further meeting of the Supreme Council during the coming week, and, although the Upper Silesian question may stand first on the programme, the settlement of the Near East will again come up for discussion. Both in France and in Greece it is confidently believed that the British Prime Minister intends to urge the Council to agree to active support being given to the Greeks in their campaign against the Turkish Nationalists. Before any such discussion is taken, we trust that the Allied representatives will consider the effects of their action, not only for a month or two ahead, but also for the years to come, and endeavour to follow out in their minds the scheme to its logical conclusion. There can be no doubt that Angora stands committed to a definitely anti-British policy, and already Great Britain has a heavy score to settle with the Kemalists. British prisoners are being detained in violation of an agreement under which Turkish subjects imprisoned in Malta have been liberated; a British ship in Turkish waters has been boarded by Nationalist officials, who seized, maltreated, and took away by force some of the passengers; and now British shipping has been forbidden to approach Turkish harbours under Nationalist jurisdiction. No country can remain indifferent to these studied insults, and no one will contend that the British Government is not within its rights in demanding satisfaction from the Angora administration. But there is no reason why Great Britain should delegate to the Greeks the work of bringing the Nationalists to reason. On the other hand, there are cogent arguments against such a course. If, therefore, the British quarrel with Angora can be settled only by war, it must be war between Great Britain and Turkish Anatolia. The Allied Powers can be notified of the fact, but there should be no question of making the matter an Allied concern, still less of delegating another Power to undertake a punitive campaign against the Turks on Great Britain's behalf.

If the Supreme Council, at its next meeting, decides that the Greeks are to be helped in their war against the Nationalists, it must be on the merits of the Greek case, and Great Britain's quarrel with the Angora authorities ought not to influence the decision. This view is urged from no desire to spare the Turks. A substantial Nationalist defeat at the hands of British troops would probably prove the salvation of Turkey, but that the British Government shrinks from the cost of such an undertaking is no justification for asking the Greeks to do the work for us. An entirely different set of conditions and principles is introduced when it comes to a struggle between Greeks and Turks. In the first place, it is perfectly true that the Greeks were authorised by the Supreme Council to land at Smyrna and to undertake a campaign against the Turks. But the policy that prompted that proceeding broke down completely, and when it was shown to be a hopeless failure it was abandoned in favour of a conference in London, at which both Turks and Greeks were invited to be present. The

renewal of the campaign after the Conference was the work of the Greeks alone; it was undertaken in the conviction that the capture of Angora would be at the most a three months' enterprise, and that thereafter all further trouble with the Turks would be eliminated. Whether the Supreme Council was cognisant beforehand of the Greeks' intentions we do not know; at all events no definite steps were taken to prevent a renewal of the war between the two combatants. Greece need not be overblamed for her miscalculation; it was, perhaps, a natural one, and behind it was the belief that she was acting in the Allies' interests as well as in her own. The worst disservice that could be done to the Greeks to-day would be to encourage them to persevere in their mistake. If their original line of argument had been sound, it would have been unanswerable. The elimination of the Turkish Nationalists and the bringing of the whole of Asia Minor into line with Constantinople was an excellent policy, if feasible. The Greek delegates to London were confident that it was feasible, and would listen to no suggestions that there was a possible flaw in their reasoning. The event has proved them wrong, and if now they obtained sufficient help from the Allies to enable them to take Angora, all the world knows—and presumably the Supreme Council as well—that they would not thereby settle the Turkish question. It is beyond Greece's power with her eight million population to coerce and keep in subjection ten million Turks established for the most part in the Anatolian highlands and with the door to Central Asia, with its twenty to thirty million Moslem inhabitants, open to them. Clearly, Greeks and Turks will have to remain in the world side by side, and the only statesmanlike course to pursue to-day is to devise the most suitable *modus vivendi* for them, and to see that both parties adhere to it.

This point of view, we are well aware, will not be popular in Greece, either with the supporters of the present régime or with Venizelists, for the mere rumour of the possibility of a change in the British Government's attitude towards the Greek war with the Turks has inspired both sections of the nation with fresh hopes. But the main reason why Greece cannot imagine any solution of the Greco-Turkish question apart from an appeal to arms, with the resources of the Allies at her disposal, is that she cannot conceive a Turkey differing from the pre-war Ottoman Empire, or, for that matter, European politics being conducted on other lines than the old system of international hostility and intrigue. Whatever views the Supreme Council, as at present constituted, may hold on the subject, we are confident that the enlightened opinion of Europe will not tolerate indefinitely a return to pre-war conditions. There is no need to anticipate the early introduction of the Millennium, but at least it should be possible to arrange without any world mobilisation that the smaller nations shall not be for ever disturbers of the world's peace. The mishandling of the whole Near Eastern question by the Supreme Council is responsible for the Angora situation to-day, and unless the Allies are anxious for a new war in Anatolia, only one course is open to them: they must recall the Greek offensive and offer reasonable terms, which exclude the placing of any large body of Turks under Greek jurisdiction. If these reasonable terms are rejected, the sooner the Allied campaign against the Nationalists begins the better; but Greek troops should not be employed. When Mustapha Kemal has been dealt with, Greeks and Turks will still have to live side by side because trade is the life-blood of the Greeks, and they will always be found on the Turkish sea-coast, as they are to be found on the Egyptian, English, and American littorals. Any further embitterment of Greco-Turkish relations, therefore, should be avoided, and the Greeks, as a result of the Allies' new policy, should have reasonable ground for anticipating that the Turks with whom they will thereafter have to deal will at least be an improvement on pre-war Turkey, and will be a people with whom normal, if not actually cordial, relations are possible. But if there is to be peace in the Near and Middle East, the Allies and not the Greeks must deal with Angora. It is Greece who stands to gain most from peace.

EGYPT AND THE SUDAN.

UNJUSTIFIABLE EGYPTIAN PRETENSIONS

(FROM OUR OWN CORRESPONDENT.)

KHARTOUM, May 8.

In view of the very great stress laid in the Egyptian Press and in the speeches of Saad Pasha Zaghoul, and even of such so-called moderates as Abdul Aziz Bey Fahmy, upon the "Reservation" demanding that the Sudan should be regarded as an integral part of Egypt, the recent articles by Lutfi Bey El Sayed, himself a member of Zaghoul's Delegation, which were published in the popular paper *Al Ahaly*, in the first half of March last, are of very considerable interest, as showing the type of argument upon which the Egyptians base their claims to the Sudan Provinces.

Lutfi Bey El Sayed gives his articles the title of "A General Memorandum on the Sudan, from the Political Point of View," and divides his argument into six chapters, summing up his conclusions in the seventh. In Chapter I., "The Sudan is a Part of Egypt," the writer maintains that the very existence of Egypt is entirely dependent on the Nile, and claims that all territory traversed by this great river forms part of Egypt. The territory claimed by him includes much of the country that now forms part of the Belgian Congo, Kenya Colony and Uganda, lands which were totally unknown to the Pharaohs, and an infinite distance beyond the farthest march of the Khedivial armies. He continues by delving into the history of Ancient Egypt; but as events of 5,400 years ago can have no possible influence on problems of the twentieth century, there is no necessity to follow him in detail, the more especially as his historical quotations would appear to be wilfully distorted to serve his own ends.

In Chapters II. to V. the author gives us his version of the events which took place in the Sudan from the outbreak of the Mahdi's revolt to the Battle of Omdurman and the Fashoda incident, blissfully ignoring the fact that the Mahdia was essentially a revolt against Egyptian misgovernment. Proceeding, he endeavours to show that after the annihilation of Hicks Pasha's army, Lord Cromer, in true Machiavellian vein, advised the Egyptian Government to evacuate the Sudan, with a view to reconquering the country in the near future and making it a British possession. He makes no mention of the fact that this unfortunate general requested the Egyptian Government to furnish him with 6,000 Regulars and a war-chest of £E120,000 for the purposes of his expedition; he appears to have forgotten the fact that this very reasonable demand was turned down, and that it was only due to the efforts of Sir Edward Malet that Hicks was eventually given £40,000 and 3,000 Egyptian troops with which to carry out his ill-fated march against the Mahdist force. Does this bear out the Satanic policy of Lord Cromer? On the contrary, it would appear to the politically unversed layman that the Khedivial administration were deliberately prepared to sacrifice the Sudan Provinces for a trifle of £E120,000. Emin Pasha, one of the most able administrators in the service of the Khedives, was deliberately left to his fate, in spite of the fact that Equatoria at that time was the sole district comparatively free from the poison of Mahdist propaganda. The cost of the relief expedition was mainly borne by foreigners, and only a minute proportion of the total outlay was made good by the Egyptian Government, notwithstanding the fact that the numbers of Egyptian officials in Equatoria with their families ran into hundreds.

Lutfi Bey El Sayed for the purposes of his argument

makes it an irrelevant fact that the flame of revolt, fanned by the injustice and corruption of Egyptian rule and the sanctioned cruelties of the slave trade, reached to such an intensive pitch that it could never have been suppressed by the Khedivial Government, even with the very considerable support afforded by Great Britain. Furthermore, he suppresses the fact that even with the aid of British troops it was all the Egyptian Army could do to stem the invasion of Egyptian territory at Assuan, after retiring to the frontier proper at Wadi Halfa in 1885. In a similar vein he shows the reconquest of the country as an exploit of Egyptians, with the support of a small proportion of British troops, the share of the Sudanese regiments in the campaign being completely ignored, as is the fact that, in every action where Egyptian conscripts were unsupported by either British or Sudanese detachments, they ran like rabbits before the Mahdist hordes.

Amazing stress is laid upon Egypt having evacuated such outlying garrisons as those of Massawa and Zeila, which are shown as having been reft from Egypt by Great Britain for her own gain or that of her friends. He even goes so far as to specify Zanzibar, a station that was never in Egyptian occupation, as an addition to Great Britain's thefts. He makes much of Uganda and the Belgian Congo being provinces filched from Egypt, utterly oblivious of the chronicled adventures of Baker, Emin, Stanley, and many other early explorers, wherein he would be enabled to correct his vain imaginings as to how far any of the country in the basin of the Great Lakes was at any time in the effective occupation of the Government of the Khedives.

Emin Pasha, writing from Wadelai on October 25, 1887, makes no bones about the corruption of Egyptian Administration. Even the unfortunate official in Equatoria was subjected to extortion on the part of the Khartoum Government. On taking up his appointment as Governor of the Province he was astounded to find that the district for many years had shown an annual deficit of £E30,000. In three years under his rule, this was transformed into a surplus of revenue over expenditure of £E1,200.

In times of Khedivial rule the Sudan was invariably regarded as a penal colony for all ranks guilty of peculation—that is to say, too flagrant peculation—in subordination, etc., much as East Africa was regarded by the Imperial German Government, and the unfortunate inhabitants were subjected to the whims and caprices of a set of discredited officials of the worst type, utterly devoid of moral worth or the milk of human kindness. Is it credible that in twenty years the "nature of the beast" has changed to such an extent that he can rule and administer an uneducated and childlike population in a just and equitable manner? Any resident in the Sudan will express his opinions on the subject more forcibly than politely. As a result of very bitter experience no Egyptian official can be allowed untrammelled administrative powers. The result is invariably a deficit in public funds or a minor revolt on the part of the unfortunates he administers.

Hard facts of history and experience are bitter pills to swallow, but it is amazing what wonderful fairy stories a gullible public will digest with their eyes shut. The Sudani of to-day may possibly have grievances of a minor character, but he is not vastly enamoured of history, and cares not a jot for academic arguments in the realms of International Law. He is very much aware of what he has seen with his own eyes and what his fathers have declared unto him, and, having suffered bitterly under Egyptian misrule, he has no inclination whatsoever to repeat the harrowing experience.

PURE SCOTCH

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1½" to 3" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

AMERICAN MACHINE & FOUNDRY CO., LTD.,
CANBURY PARK ROAD, KINGSTON-ON-THAMES, ENGLAND.

Egypt.

The *New Statesman* of May 28, in an article called "Our Choice in Egypt," endeavours to put forward the puzzled attitude of the British public over the latest outbreak in Alexandria. The author views with dismay the refusal of Zaghloul Pasha to touch the Adly Cabinet. He says:—

We confess that we find it extremely difficult to discover any convincing grounds for Zaghloul's attitude. Both Adly and Rushdi, though they may not have co-operated with the Zaghloul party on every occasion, have proved their good faith and their whole-hearted attachment to the cause of Egyptian freedom. Nobody who knows anything about Egyptian affairs could describe them as tools of the British Government—still less of Sultan Fuad, who, as any street-sweeper in Cairo knows, is not capable of employing any Egyptian of consequence as his tool. Moreover, it is but a short time since Zaghloul himself was expressing complete confidence in Adly.

And he proceeds to state that "it is hard to resist the conclusion that this deplorable hitch is mainly a question of personal pique." But he expresses his profound hope that reactionaries in this country will not make capital from the recent riots, and "postpone the whole question till things have settled down." To allow the triumph of the party, in the British Government and outside it, which is opposed to the freeing of Egypt would, he believes, be fatal. For—

To picture the evolution of a struggle between "moderates" and "extremists," led respectively by Adly and Zaghloul, is to see Egyptian affairs all askew. There will no irreconcilable split; there is no antagonism between "moderates" and "extremists," for the simple reason that, though there exist, no doubt, large differences of opinion about details or about methods, there are, in the sense in which the word is understood by our reactionaries, no "moderates" in Egypt. The position which Adly holds at this moment was not attained by him because he set himself in opposition to Zaghloul and his Nationalists, but precisely because he believed himself, and was believed by everybody else, to see eye to eye with them. He has been invited to come to this country to settle the problem of Egypt at the earliest possible moment. If we should now show signs of drawing back, Adly's Ministry would not last a week. He and all Egypt would be united against us. On the narrowest grounds of political expediency, therefore, we trust there will be no weakening of the British Government's resolve to carry out their undertaking—in the letter and in the spirit, and without any procrastination. So far from using the dissensions of Egyptian leaders as an excuse for delay, we ought to make every effort that is within our power to compose these dissensions and to hasten the negotiations. And, finally, on larger grounds, we would repeat what we have said before in these columns, that a just and generous treatment of Egypt is vital alike to the future of the British Empire and to the peace of the world.

And in conclusion, after saying that our legitimate interests in the East must depend in the future on the goodwill of Egypt, he writes:—

Is there anybody so mad as to suppose, looking back on the history of the last two and half years, that we shall secure anything at all—except hatred and bloodshed and an enormous expenditure—by treating Egypt as a sort of glorified Salisbury

Plain? That is one of our alternatives. The other is to enhance our honour and our prestige by binding a free Egypt to us in the ties of genuine amity. If there is a risk in it, it is a risk which is worth taking. And we do not believe that, after honestly facing the facts, any Englishman, save a general who cannot see beyond the War Office or a politician who cannot see beyond next week, will hesitate to take it.

On the same subject a writer in the *Outlook* of May 28 takes up an individual line. After pointing out that the whole trouble bears, to the native Egyptian mind, a personal rather than a political character, he states that "the vital factor in the situation is the attitude of the students."

They are the extremists in Egyptian politics. They would like all the foreign officials removed in order that they may secure their posts. They are now giving their support to Zaghloul, who has evidently sold his conscience for it. A victory for Zaghloul, therefore, will be a victory for these young firebrands; with it will disappear any hope of the amicable working of the schemes suggested by the Milner Mission, any hope of the retention of a reasonable percentage of British officials in an independent Egyptian administration, any hope of an administration honest and friendly enough for us to tolerate. That, at least, is the personal view of one who has lived in Egypt for many years. The behaviour of the Egyptian student on the political "ramp" must be seen to be believed. It is impossible that he should be allowed to govern his unhappy country.

He concludes with suggesting that there are two possible ways out of the difficulty.

Yeghen Pasha, who already has the support of most of the former leaders of Egyptian opinion, may succeed in collecting a party in the provinces strong enough to resist the pressure of the student-led mobs of Cairo and Alexandria. In spite of the daily assurances of the *Times* correspondent in Cairo, this seems at present to be extremely unlikely. Alternatively, Zaghloul Pasha may succeed in bringing his youthful followers to heel. He has no personal liking for anarchy. As Minister of Education under Sir Eldon Gorst, he was, for an Egyptian, a strict disciplinarian. Politically, there can be no great difference between his views and those of Yeghen Pasha, since both agree in the main with Lord Milner's proposals. If Zaghloul can achieve this it will simply be a question of effecting an entente between the Sultan and his British advisers on the one hand and the ex-Minister on the other. . . . In these circumstances, it should not be impossible for the Anglo-Egyptian authorities to arrive at an understanding with the Pasha. It may safely be predicted—unless Egypt has altered inconceivably during the past year or two—that he is only waiting for them to make a move. Of course, we can go on producing rival pashas indefinitely—Rushdi, Mohamed Said (who nearly lost his life over it), Yeghen, and so on—all men of an ability at least equal to Zaghloul's. But if the students, the only numerous class in Egypt that is also articulate, are determined to have none of them, we shall merely be wasting our time.

The *Spectator* of May 28, on the other hand, has a different point of view from either of the above journals. In an article entitled "The Meaning of the Egyptian Riots," it finds occasion to exploit its theories of mass psychology. After showing that the Fellaheen were not in the riots this time, it says:—

The trouble now is between rival political factions in the Egyptian towns. No doubt the rising is in an ultimate sense directed against Great Britain, and even against the presence of any Europeans in Egypt, but if as a result of the rioting one faction comes to the conclusion that it is too weak to fight the other faction, and the local police meanwhile keep order impartially, there is no reason why the riots should spread. The cause of the disturbances is easily explained. Zaghloul Pasha's followers are dissatisfied with his exclusion from the mission which is about to visit London and discuss the future of Egypt. Zaghloul represents the extremists, and he is settling himself to break down the authority of the Prime Minister, Adly Pasha, who under the revenges of time has become comparatively a moderate.

It points out the "fanaticism" of Zaghloul Pasha's followers, and continues:—

The best we can hope for is that the rising will turn out to be a good thing in the long run, because it will separate the reasonable people from the barbarians and the fanatics and will show that the latter are only a weak minority. It is impossible to contemplate this new Egyptian trouble without reflecting how much alike fanatics are all over the world. To rational-minded people it is obvious that when a Government is willing to grant self-government up to the limits of the capacity of those who demand it, by far the most important thing—indeed, the only thing that matters—is for the recipients of self-government to prove that they can work it and benefit by it. Once that proof is given everything else will follow as a matter of course, provided that there is no desire on the part of the aforesaid Government to withhold full self-government for some capricious reason.

The article, after likening Mr. Gandhi to Zaghloul Pasha, expresses, rather despairingly, the trust that the British Government will adopt a strong and clear policy.

We hope that when Adly and Rushdi are in London the Government will make it clear beyond a shadow of a doubt what Egypt can obtain and what she can not. At present fanaticism is under strong temptation to say: "One more riot, a few more murders, and the English will clear out bag and baggage and leave not a wrack behind."

BIRTHDAY HONOURS.

The Birthday Honours List is again a long one. Lord Curzon becomes a Marquis, Lord Oranmore and Browne becomes an Irish Privy Councillor. The following names taken from the List will be of special interest to readers of THE NEAR EAST. They are given as they appear in the official lists:—

BARONET.—Newson, Sir Percy Wilson.—Partner in Jardine, Skinner and Co., Calcutta, President of Bank of Bengal, 1920. Governor of Imperial Bank of India, 1921. President of Central Board of Imperial Bank of India, Simla, 1920. Made generous gifts to the Government of Bengal for the purposes of education.

KNIGHTS (INDIA).—Ayyar, Mr. Justice Theagamaja Ayyar Sadasiva, Diwan Bahadur, Puisne Judge of the High Court, Madras. Teunon, Mr. Justice William, I.C.S., Puisne Judge of the High Court, Calcutta, Bengal. Tudball, Mr. Justice William, Indian Civil Service, Puisne Judge of the High Court, Allahabad, United Provinces. Khan Bahadur Muhammad Israr Hasan Khan, C.I.E., Judicial Minister, Bhopal State, Central India. Pickford, Alfred Donald, Esq., senior partner, Messrs. Begg, Dunlop and Co., Calcutta, Bengal. Holberton, Edgar Joseph, Esq., C.B.E., manager, Bombay-Burma Trading Corporation, and lately President of the Chamber of Commerce, Burma. Kothari, Jehangir Hormasji, Esq., O.B.E., landlord, Sind, Bombay. Rai Bahadur Seth Bisheshar Das, banker, Nagpur, Central Provinces.

ORDER OF THE BATH.—G.C.B. (MILITARY DIVN.): Willcocks, Gen. Sir James, G.C.M.G., K.C.B., K.C.S.I., D.S.O. (Colonel of the Loyal R. N. Lancers). Cox, Gen. Sir Herbert Vaughan, K.C.B., K.C.M.G., C.S.I., Retd. Pay, I.A.

K.C.B. (MILITARY DIVN.).—Carnegy, Maj.-Gen. Philip Mainwaring, C.B., Retd. Pay, I.A.

C.B. (MILY. DIVN.).—Stewart, Col. Cosmo Gordon, C.M.G., D.S.O., Commander, Allahabad Brigade Area. Macmullen, Col. Cyril Norman, C.M.G., C.I.E., D.S.O., I.A., Brigade Commander, 17th Indian Inf. Brigade. Coleridge, Col. John Francis Stanhope Duke, C.M.G., D.S.O., I.A., Gen. Staff Offr., 1st Grade, Headquarters, I.A.

STAR OF INDIA.—G.C.S.I.—Nawab of Rampur, Colonel His Highness Alhijah Farzand-i-Dilpazir-i-Daulat-i-Inglishia, Mukhlis-ud-Daula Nasir-ul-Mulk Amir-ul-Umma Nawab Sir Muhammad Hamid Ali Khan Bahadur, Mustaid Jung, G.C.I.E., G.C.V.O., Honorary Aide-de-Camp to His Majesty the King-Emperor.

K.C.S.I.—Todhunter, Charles George, Esq., C.S.I., I.C.S., member of the Executive Council, Madras. Wheeler, Sir Henry, K.C.I.E., C.S.I., I.C.S., member of the Executive Council, Bengal.

C.S.I.—Raja of Mahmudabad, Raja Sir Muhammad Ali Muhammad Khan, Khan Bahadur, K.C.I.E., Home Member, U.P. Govt. Holland, Robert Erskine, Esq., C.I.E., Political Dept., Govt. of India, Agent to the Governor-General in Rajputana and Chief Commissioner of Ajmer-Merwara. Beville, Lieutenant-Colonel Francis Granville, C.I.E., Political Dept., Govt. of India, Agent to the Governor-General in Central India. Innes, Charles Alexander, Esq., C.I.E., Indian Civil Service, Sec. to the Govt. of India, Commerce Dept. Hallifax, Charles Joseph, Esq., C.B.E., Indian Civil Service, Financial Commissioner, Punjab. Cooke, Colonel (Temporary Major-General) Herbert Fothergill, C.B., D.S.O., Ind. Army, D.A.-G., Adjutant-General's Branch, Army H.Q. Proes, Ernest Marinus, Esq., Chief Engineer and Sec. to Govt., Public Works Dept., Bombay. Harris, Leonard Tatham, Esq., I.C.S., Agency Commissioner, Madras. Banerji, Albion Rajkumar, Esq., C.I.E., I.C.S., First Member of the Executive Council of the Maharaja of Mysore. Glancy, Reginald Isidore Robert, Esq., C.I.E., I.C.S., Political Dept. of the Govt. of India, Sadar-ul-Maham, Finance Dept., the Nizam's Govt. Gourlay, William Robert, Esq., C.I.E., I.C.S., Private Sec. to the Governor of Bengal. Wigram, Colonel Kenneth, C.B., C.B.E., D.S.O., Ind. Army, Commandant, 2nd Battalion, 2nd King Edward's Own Gurkha Rifles (Sirmoor Rifles), late Director of Staff Duties, General Staff Branch, Army H.Q. Das, Rai Bahadur Major-General Dewan Bishan, C.I.E., Revenue Minister, Jammu and Kashmir State, Srinagar.

ORDER OF THE INDIAN EMPIRE.—K.C.I.E.: Sheppard, William Didsbury, Esq., C.I.E., late I.C.S., member of the Council of India. Porter, Ludovic Charles, Esq., C.S.I., C.I.E., O.B.E., I.C.S., Finance Member, U.P. Govt. Dew, Lt.-Col. Armine Brereton, C.S.I., C.I.E., Political Dept., Govt. of India, Agent to the Governor-General and Chief Commissioner in Baluchistan. Khan, Nawab Khan-i-Zaman, Chief of Amb. N.-W. Frontier Province. Khan, Nawab Haji Fateh Ali, Kazilbash, C.I.E., Lahore, Punjab. Khan, Raja Muhammad Nazim, C.I.E., Tham or Ruler of Hunza, Gilgit Agency, Kashmir. Edwards, Maj.-Gen. William Mice, C.B., C.M.G., I.M.S., Director-General, I.M.S. Maconochie, Evan, Esq., C.S.I., I.C.S., Agent to the Governor in Kathiawar, Bombay. Urs, Sardar Mysore Kantaraj, C.S.I., Mysore Civil Service, Dewan of Mysore. Willcox, Col. William Henry, C.B., C.M.G., M.D., F.R.C.P., late Medical Adviser to the Civil Administration in Mesopotamia.

KAISAR-I-HIND MEDAL.—The King has made the following awards of the "Kaisar-i-Hind Medal for public services in India" of the First Class:—Davies, the Rev. Canon Arthur Whitelife, Principal, St. John's College, Agra, U.P. Kaye, George Rusby, Esq., Curator, Bureau of Education, Govt. of India. Neston, the Rev. William, Professor and Bursar,

Madras Christian College, Madras. Garu, M. R. Ry. Diwan Bahadur Duruseti Seshagiri Rao Pantulu, President, Godavari District Board, Madras. Muir, the Rev. Ernest, missionary and doctor, Bengal. Das, Sri Gadahar Ramanuj, Mahant of Emar Math, Puri, Bihar, and Orissa. Yain, Lee Ah, Esq., an elected member of the Rangoon Municipal Committee, Burma.

IMPERIAL SERVICE ORDER.—COMPANIONS—HOME CIVIL SERVICE: Knecht, George Theodore, Esq., Head of Establishments, Rules and Accounts Branch, Friendly Societies Registry. Williams, Griffith John, Esq., Senior Inspector of Mines, Mines Dept. Heap, Miss Annie Alice, Supt., Exchange Staff, London Telephone Service, G.P.O. Harvey, William, Esq., Chief Clerk in Department of Prison Commission for Scotland. Sheridan, Francis Stephen, Esq., B.L., Chief Clerk, Congested Districts Board (Ireland).

INDIAN CIVIL SERVICE.—Hasted, William Anderson, Esq., Director of Survey, Madras. Baw, Maung Hla (1), Esq., K.S.M., District Judge, Prome and Tharrawaddy, Burma. Teyen, Charles St. Leger, Esq., Assistant Secretary, Finance Department, United Provinces Secretariat. Avargal, M. R. Ry. Rao Bahadur Paruvakattil Narayana Menon, Secretary to the Commissioner of Revenue Settlement, Survey, Land Records, and Agriculture, Madras. Gillmore, Henry Bryan, Esq., Deputy Registrar High Court of Judicature, Lahore, Punjab. Neal, Major William Daniel, Indian Medical Department, Assistant to the Superintendent, Medical College Hospital, Bengal. De Silva, Joseph Balthazar, Esq., Personal Assistant to the Military Secretary to His Excellency the Governor of Bombay.

IMPERIAL SERVICE MEDAL.—The King has awarded the Imperial Service Medal to Hari Charan, Jemadar in the Legislative Dept. of the Govt. of India, in recognition of long and meritorious service.

COLONIAL OFFICE LIST.

C.M.G. :—Benjamin Horsburgh, Esq., Controller of Revenue, Island of Ceylon.

KNIGHTS BACHELOR.—Lieut.-Col. Wyndham Henry Deedes, C.M.G., D.S.O., Civil Secretary to the Administration, Palestine. Ponnambalam Ramanathan, Esq., K.C., C.M.G., nominated Unofficial Member of the Legislative Council of the Island of Ceylon.

IMPERIAL SERVICE ORDER.—COMPANION: John Smith Erbynn, Esq., Chief Clerk, Ashanti Political Service.

FOREIGN OFFICE LIST.

K.C.M.G.—Sir Charles Stewart Addis, Kt., manager of the Hong Kong and Shanghai Banking Corporation, for valuable services to His Majesty's Government in connection with finance in China.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

Bulgarian Loans.

Particulars were issued last week of the scheme proposed by the Bulgarian Government for the payment of the coupons and drawn bonds of the Five per Cent. Loan of 1902 and the Four and a-Half per Cent. Loan of 1907 in French francs, which is recommended by the Corporation of Foreign Bondholders for acceptance. Provision is made for the liquidation of bonds drawn for redemption since September 29, 1915, until March 14, and of all outstanding coupons. It is proposed that coupons on the 1902 Loan shall be paid at the rate of 12½ francs each, and that the coupons on the 1907 Loan shall be paid at the rate of 11.25 francs each, while the drawn bonds of both loans will be paid up at the rate of 500 francs per bond. Payment will be made in all cases at the current rate of exchange less income-tax. The bonds are of the face value of £19 16s., so that their realisation will mean a considerable loss to bondholders at the present rate of exchange. The offer is open until April 1 of next year, and holders are, therefore, in a position to delay taking a decision on the chance that the franc will improve considerably before that date.

New Postal Charges.

It is hardly possible to write too strongly with regard to the proposed new postal charges. Cheap postal facilities are essential to commercial enterprise, a fact which is fully recognised by our competitors, but the authorities here have evidently not learnt this lesson, otherwise the Post Office would never be permitted to impose what is in effect a tax on trade endeavour. Publicity is the very soul of commerce, and without newspapers, catalogues, and similar mediums our business men would have a very difficult task in foreign markets. Henceforward, if the proposals pass, all the ways in which they can draw attention to their commodities will be to a large extent restricted. The foreign circulation of newspapers will be affected; it will be impossible to send catalogues on a large scale, and letters will have to be kept down in number. And for what? To meet a deficit due mainly to the swollen establishment of the Post Office—a deficit which, if precedents in other countries are anything to go on, will simply be increased by the higher rates which traders cannot afford to pay.

The Alternative.

This week Mr. Kellaway is to give his defence of the proposals in the House of Commons, and it will be interesting to see what sort of a case he can make out for a tax on business enterprise, and what explanation he can offer for not taking the obvious course to meet the deficit by reducing expenses and also by decreasing rates, a process which experience has proved to pay. He has had an opportunity during the past few days—quite a number, to be precise—of learning the opinion of commerce on the increases, and if public opinion still counts for anything it is possible that at the eleventh hour the proposals may be modified. But, judging by his speech in reply to a deputation from the printing and allied trades, such a contingency is not very likely. Still, much will depend on the attitude of the House, and if there is evidence of determined opposition to the measures, then all things may be possible.

The Cotton Position and the Conference.

At a time when the cotton trade is passing through a period of acute depression the second World Cotton Conference is to meet, and its agenda suggests that the result of the Conference should be to throw a flood of useful light on many of the most pressing problems which confront the industry. The position as regards Lancashire is dealt with in broad outline elsewhere in our columns. It is assumed—indeed, it is certain—that in due course there will be a demand for all that Lancashire can produce, and the real problem is the question of the supply of the raw commodity. Lancashire is dependent on America for the bulk of her supplies, and unless the efforts now being made to develop cotton cultivation within the Empire are completely successful, it is obvious that a time will come when Lancashire will have to go short. That prospect cannot be contemplated with equanimity.

Empire Cotton-Growing.

The report of the British Cotton Growing Association, extracts from which will be found on another page, gives a satisfactory account of the work accomplished during the past year. In 1919 the amount of cotton grown in new fields in the Empire under the auspices of the Association was 79,600 bales of 400 lb. For last year the estimated total is 106,000 bales. When it is borne in mind that the work of the Association is carried on in circumstances of more than ordinary difficulty, it will be realised that this marked increase constitutes a very notable advance. Unfortunately, we are still very far from the ideal of a self-supporting Empire as far as cotton is concerned, and if that ambitious project is to be realised in the near future, it is essential that the work of the Association should receive the most whole-hearted support of all interested in the industry. There is ample land within the Empire suitable for the crop, and for the general welfare it is essential that every effort should be made to see that it is utilised.

The Ceylon Loan.

The expected Ceylon Loan was forthcoming this week in the shape of an issue of £3,000,000, bearing interest at 6 per cent., and offered for subscription at 97. The previous Ceylon issue was made in 1914, the amount then offered being £1,000,000 Four per Cent. stock at 99. The terms of the present issue were nothing like so favourable as those of the recent Indian loan, but, all the same, the loan was oversubscribed on the day of issue, thus bearing out the view I expressed at the time that the Indian Loan could have been raised at a lower rate.

P. and O. Bank's Report.

A very satisfactory initial report is forthcoming from the P. and O. Banking Corporation, Ltd. The accounts cover the nine months ended March 31, which will henceforward be the date on which the company's financial year will end. For that period the profit amounted to £73,290, after writing off preliminary expenses totalling £57,680, £31,250 of which was met from premium on shares, setting aside £53,600 for taxation, and providing for bad and doubtful debts, etc. It is proposed to utilise this to pay a dividend of 5 per cent. less tax, absorbing £66,449, and to carry forward £6,846.

New Rupee Loan.

This week the terms were announced of a new Indian rupee loan which takes the form of six per cent. five and ten year bonds at par, free of Indian income tax. The bonds will be issued at Rs. 100, and subscription to the issue may be in the form of either cash or Indian War Bonds maturing in 1921 and 1922. Subscriptions in cash can be made between June 20 and July 30, both days inclusive; but the 1921 War Bonds will be received up to October 29, and the 1922 War Bonds up to September 15. Indian Treasury bills will also be accepted in payment of subscriptions up to July 30 at a discount of 4 per cent. per annum on the unexpired portion of the currency of the bills. Applications in the form of cash or War Bonds will be received in London by the Imperial Bank of India.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

YUGOSLAVIA.

ZAGREB (Undated).

The Proposed Internal Loan.

The proposed 500 million dinar internal loan has a good press. In a leading article the *Politika* welcomes the suggestion on the grounds that it will put the communications of the country on a thoroughly sound footing, which is a vital necessity to the proper development of the economic resources of Yugoslavia. The *Politika* is confident of the feasibility of the scheme, pointing out that private deposits in the National Bank are constantly increasing and loans diminishing, so that there are ample funds available, that the Prva Hrvatska Shtedionica, of Zagreb, has nearly a quarter of a million dinars on deposit and current account, while the First Serbian Agricultural Bank has 17 millions, and that there is plenty of money in Liubliana. In the early part of 1919, when things were far from settled, the Government made a successful issue of bonds of 300 million krone, and there are believed to be about three milliards and 700 million dinars in circulation. Politically, now that the Constitution has been passed in principle, the floating of such a loan would have a most valuable and steadying influence on all parties and would strengthen the union. The proceeds will be expended on doubling existing single lines, on harbour facilities and improving main roads. The construction of new lines will be postponed until financial conditions have improved.

Forecast of New Taxes.

Substantial increases in taxation are expected in the forthcoming Budget. It is anticipated that octroi duties will be heavily increased, and many new taxes introduced. All advertisements and notices will be taxed, and stamp duties and all fiscal charges increased. Death duties are to be introduced on a sliding scale, that is, a small tax on inheritance from father to son, and from husband to widow, but substantial in the case of more remote relationship, even up to a third of the capital value of the property. Finally, Customs duties and the tax on turnover are to be raised.

BULGARIA.

SOFIA, May 26.

British Creditors and the Moratorium.

In connection with the raising of the Moratorium a deputation of Sofia business men has made the following proposal with regard to the settlement of debts owed by them to British firms: "That all Bulgarian firms should deposit an amount in leva in the creditor's name at a local bank, which would be selected by the creditor. This sum to be two, three, or even four times, but not more than four times, the leva equivalent of the sterling debt at pre-war rates of exchange. That this sum should be held for the creditors in the local banks for a period not exceeding three years, during which or by the close of which the debtor will cover himself by purchases of sterling currency, as occasion presents itself, in order that by the closing date of the period—if not before—the whole debt should have been met in sterling; the interest on the deposit in the bank to remain the property of the creditor." If the British creditors concerned insist on being paid in

full to-day, it is to be feared that as the current rate is 326 levas to the £1 there will be many bankruptcies, and thus the debts will not be paid at all. This action would also greatly tend to bring about an atmosphere prejudicial to British trade. In the light of the conditions, it would seem that the above proposal is worthy of serious consideration by British creditors.

ROUMANIA.

BUCHAREST, May 18.

Heavy Import Duties.

A Commission is actively at work at the Ministry of Finance on a tariff on imported goods, which will probably come into force on June 1. The present taxes will be increased by from 50 to 500 per cent., and even more, according to the articles. The aim of the administration is, besides creating large revenues for the State, to protect some home industries, especially in Transylvania and the Banat.

A Capital Levy?

According to the projected new fiscal law, a tax of 10 per cent. will be imposed on all liquid capital in the shape of Roumanian banknotes. In order to be able to carry out this measure, it is proposed to issue a new type of paper money to replace that at present in use. The conversion will be at the rate of 100 lei to 90 of the new issue.

Financial Position Improving.

The Ministry of Finance announces that by applying the provisionally voted one-twelfth of the Budget for the month of April, he succeeded in satisfying all the requirements of the State for that month, without needing to apply to the National Bank for a fresh loan. It is the first time since the Armistice that this happy result has been obtained, which is due primarily to the great curtailment of expenditure, which, at the Ministry of War alone, amounts to 1,200 millions a year.

General News.

The Ministry of Agriculture announces that the outlook of the coming crop is very satisfactory.

The National Bank has resumed the withdrawal from circulation of the remaining portion of the Banca Generala notes issued by the German authorities during the occupation. This time, instead of calling in the whole amount within a limited and short time, the bank will gradually receive them in the course of its daily transactions.

Some German firms are refusing to send to Roumania the goods previously bought and paid for by Roumanian merchants. The bone of contention is the 50 per cent. import tax imposed by the Allies, to which the Roumanian Government has adhered. The German merchants maintain that this tax should either be borne by the buyers or the transaction be cancelled and the money refunded by them.

CYPRUS.

NICOSIA, May 18.

The Economic Position.

The papers lament the "terrible plight" of all classes owing to the prevailing state of trade in all branches. It affects merchants, producers, and town workers alike. Harvest prospects are fortunately good, but it is urged that there is little hope in the outlook and that the only relief at present would come from a relaxation of the regulation which prohibits the export of cattle and olive oil, of which there is an abundance far in excess of the island needs. At the same time, although villagers are feeling the pinch in some parts owing to the fall in all prices of agricultural produce, there does not appear to be any outward or visible change in the towns, where—in spite of the calls for economy—life appears to go on much as usual. The Cypriot peasants, many of whom have done exceedingly well in late years, are generally improvident; though probably not more than the rural classes in most countries.

ASIA MINOR.

SMYRNA, May 24.

A Greek Firm.

Messrs. Stradi, Cassimati and Co., one of the prominent Greek firms in Smyrna dealing in iron, steel, and general hardware, have called together their creditors, and have submitted a balance-sheet showing liabilities amounting to £190,000 and assets estimated at £160,000, and have asked that an arrangement may be made for the benefit of the firm's creditors. It is expected that the creditors will appoint a liquidator to collaborate with one of the members of the firm to arrive at a settlement.

Death of Mr. Barfield.

Mr. Herbert Barfield, general manager of the Ottoman (Aidin) Railway Company, died suddenly last night. He had been in indifferent health for some time, but the end came with startling suddenness, and much sympathy is expressed for Mrs. Barfield, who has been ill for a considerable time. The death of Mr. Barfield is a great loss both to the Aidin Railway Company and the entire British colony.

LEATHER IN MESOPOTAMIA.

Since the beginning of the war the number of hide and skin producing animals in Mesopotamia has been reduced at least 50 per cent. (says a recent American consular report). No reliable statistics can be had, but it is estimated that the percentage of reduction applies equally to all classes. Notwithstanding the larger number of animals slaughtered during the past few years, the local tanners say that fewer hides have been brought to the tanneries and that those brought were of an inferior quality. The fact that more hides and skins have been taken to Europe raw during this period than formerly may account for the decreased supply. The tanneries are not running at full capacity, but in view of the present state of the market for such products there seems to be no serious shortage. Practically nothing in this line is being exported or imported at the present time.

The local tanning industry has undergone no changes during the war. The tanning process is very simple, and is carried on without the aid of any kind of machinery or modern equipment. Almost all the tanning of Mesopotamia is done at Baghdad. The tanneries here are divided into two main groups. One group of about forty is devoted to the tanning of sheep and goat skins. Another group of about 60 tans only cow, buffalo, and camel hides. The former turned out in 1920 approximately 500,000 sheep and 100,000 goat skins and the latter 60,000 cow, 10,000 buffalo, and 2,000 camel hides. The first group has turned out as many as 800,000 sheep skins and 200,000 goat skins in the course of a year. The best of the tanned skins, amounting to about 80 per cent. of the output, have been going to Europe, and the rest coloured and used locally for making slippers, etc. The tanned hides are mostly used locally in the manufacture of shoes and other leather goods. During the past few years 600 or 700 bales of sole leather and from 3,000 to 4,000 feet of fancy leather have been imported yearly. The best of the sole leather comes from France, and the balance from India.

There are many shoemakers in Baghdad, but no large establishments. These small manufacturers buy their daily supply from a few larger leather dealers. Fairly respectable looking shoes are turned out, but they do not have the wearing qualities expected of imported shoes. They are, however, much less expensive, and are adapted to the tastes of the larger body of consumers. A great deal of shoddy leather is used in making coloured slippers, which are still in greater demand than any other kind of footwear. Owing to the low rate of the rupee exchange and decreasing demands, practically no purchases are being made by local merchants. The general decline in prices of raw material has caused exportation to be almost entirely discontinued. Consequently there are quantities of hides and skins accumulating in this market.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Pantaloon.—The Egyptian War Department invites tenders for the supply of Bedford cord pantaloons. Particulars can be obtained from the Inspecting Engineer to the Egyptian Government, Queen Anne's Chambers, Westminster, S.W.1. June 17.

Antimony, etc.—Tenders are invited by the Government Press, Bulaq, Cairo, for the supply during 1921 of: Antimony, best refined, 5,100 kilos.; lead, pure, in pig, 18,800 kilos.; tin, in rods or ingots, 3,300 kilos. The material is required for making type, and must be guaranteed as virgin metal by the tenderer. Tenders must be addressed to the Controller of Printing and Stationery, Old Ismailia Palace, Sharia Qasr el Aini, Cairo, and it is stipulated that the tenderer must be a person residing in Egypt or must have a representative in Egypt. Each tender must be accompanied by a provisional deposit of 2 per cent. in money of the total value of the offer. Only Post Office orders or cheques on local banks will be accepted. June 30 (D.O.T.).

Yugoslavia.

Furniture, etc.—Tenders are invited for the supply of: 1, furniture; 2, silver and gold plate; 3, glass, crystal and porcelain; 4, household linen; 5, liveries; 6, motor-cars; and 7, coaches, required for the Royal Palace in Belgrade. Tenders should be submitted to the "Direction de la Cour, Belgrade," and marked, "Offre pour l'achat des effets necessaires." The goods are to be delivered not later than October 15 next. June 15 (D.O.T.).

Chloride and Creosote.—The Ministry of Communications invites tenders for 40,000 kilos. chloride zinc in powder and 700,000 kilos. creosote. Tenders must bear the usual tax stamp and be accompanied by a bank guarantee for 20 per cent. of the value of the tender, and should be addressed to Section Economique du Ministère des Chemins de Fer.—June 22.

Petrol and Benzine.—The Ministry of Roads and Communications invites tenders for 1,370,000 kilos. of petrol and 848,000 kilos. of benzine, and various quantities of lubricating and sundry oils. Tenders must be accompanied by a bank guarantee for 20 per cent. of the total value of the tenders, and bear the usual 10 dinar stamp, and be addressed to: La Section Economique du Ministère des Voies et des Communications.—June 24.

Rainproof Cloth.—The Serbian State Railways invites tenders for the supply of wagon covers made of rubber or rainproof cloth. No quantity specified. Tenders, with samples of cloth, to be submitted to the Section Economique de la Direction des Chemins de l'Etat à Belgrade, and bearing a tax stamp for 10 dinars, and accompanied by a bank guarantee for 80,000 dinars.—June 30.

Tarpaulins.—The Direction of State Railways in Belgrade invites tenders for the supply of 500 tarpaulins as follows:—(a) 300 must be 10 metres long and 8 metres wide. On the "length" sides there must be 11 metal holes, on the "width" sides 9, with corresponding number of fastening ropes, each 1.20 metres long. (b) 200 must be 6 metres long and 4 metres wide, the "length" sides having 7 metal holes and the "width" sides 5, with the corresponding number of ropes, 1.20 metres long. The tarpaulins must be made of impregnated cloth. Samples have to be submitted by the tenderer. Delivery is to be made within two months of the signing of the contract, and all charges and duty paid. The offers, which must be provided with a duty stamp, must be addressed to the "Generalna Direkcija Zeleznica," Belgrade, in a sealed envelope. On the envelope must be written, "Ponuda za Nabavku Musena" (Offer for the Supply of Tarpaulins). Payment in cash on delivery. June 30 (D.O.T.).

WORLD COTTON POSITION.

OUTLOOK FOR LANCASHIRE.

Next week will see the opening of the second World Cotton Conference, which commences at Liverpool on June 13, and terminates at Manchester on June 22. The first was held at New Orleans two years ago, and was instituted as a result of a visit to this country of an American delegation, the view being taken that such a gathering would prove of considerable utility in view of the problems confronting the cotton trade as a result of the abnormal conditions created by the war. The conference fully justified its aims, a permanent organisation was formed, and now we have the second conference, which meets at a time when the conditions and general position of the industry give rise to perhaps even greater anxiety than was the case in 1919.

Then the main questions at issue were the relation of the supply of cotton to the prospective demand that was looked for as soon as trade began to right itself, and the probable course of commercial reconstruction. To-day the situation is complicated by a variety of circumstances which could not possibly have been foreseen two years ago. The expected trade boom arrived, and Lancashire for a time was in the hey-day of prosperity, but it ended as suddenly as it began, because the world's markets available to traders were not yet able to absorb the normal amount of commerce, and because the best efforts of the economists and financiers have failed to overcome the stultifying effects of the adverse exchanges of the impoverished countries of Europe. And so we have been witnessing all the consequences of over-production without the causes, such as unemployment and half-time labour, while it is as certain as anything is that vast potential markets exist in every direction for cotton goods if only conditions would make them available to the industry. This is not to say that if by some miracle the exchanges touched parity to-morrow the markets concerned would again be immediately accessible to the same extent as before the war. Obviously that would be absurd. But if, for instance, as the result of good harvests, a large export of minerals, or for some other similar reason certain exchanges became normal, it is certain that a demand would be forthcoming in due course from these countries. It has been said that if the inhabitants of Africa could be persuaded to have one shirt apiece, we should have to go short. In present circumstances, if the purchasing power of the world could be restored to its pre-war position, this might conceivably be the case also, for cotton goods are among the things that are indispensable in our civilisation, and people will have them if they can have anything, and as, so far as can be judged, the temporary "boom" did no more than take the edge off the post-war demand, it can be anticipated that the trade revival, when it comes, will be a very real recovery indeed.

If, however, producers are justified in looking forward to a time when their mills will be running at full pressure in a vain endeavour to supply the demand, their optimism cannot but be tempered with the fear lest the supplies of raw material prove inadequate. Unfortunately, there is a very real possibility that this may prove to be the case. It is no new problem. It has been before the industry for years, but circumstances of late have tended to accentuate its gravity. The position has been dealt with in detail in these columns from time to time, and there is no necessity now to do more than outline the main facts of the case. Owing to our failure in the past to develop cotton-growing within the Empire until the establishment of the British Cotton-Growing Association, this country is mainly dependent on America for its cotton supplies. Now the American crop has gradually been decreasing, while the proportion of it utilised in America has been constantly on the increase, mainly as the result of the rapidly growing use of it for tyres. To complicate the position further from the Lancashire point of view, there is the unpleasant fact that America has also been steadily increasing her consumption of Egyptian cotton. It can be seen from this brief survey that there is a very real prospect that in a time of

normal demand Lancashire's requirements may not be met. Thanks to the activities of the British Cotton-Growing Association, the area under cotton within the Empire is being constantly extended, but though great progress has been made, our home-grown supplies of cotton even now form only a small proportion of our requirements, and apart from the fact that for many reasons the development of cotton cultivation must be a gradual process, the economic conditions of to-day would appear to limit the area that can be devoted to the crop.

One effect of the "slump" was naturally to depress the price of cotton, which had risen to record figures, and is now at a level at which it is unremunerative to the grower. That is a factor which presents itself from time to time in regard to all crops, but its incidence in the present case is particularly serious in view of the economic changes brought about by the war. While cotton is round about the 1914 figure, the cost of living stands at something like 150 per cent. above the pre-war level. It is not surprising in the circumstances that cultivation should be decreasing in favour of more remunerative crops. In America, as always happens when the price falls to an exceptionally low level, growers are giving up the crop on a large scale, and it is to be anticipated that the next crop there will be very small. Within the Empire the effect is naturally to make it exceedingly difficult to enlarge the area under cotton.

This question of the remunerative character of the crop is one of the gravest with which the industry is faced. There is little doubt that as soon as conditions are normal the world will be able to absorb far more than the pre-war output of cotton, and that cultivation will require to be constantly increased. As things are, there appears to be no prospect of this if cotton is to be regarded as a crop that will pay in some years and that must be avoided in others. If the problem is not solved, there can be no reasonable prospect in present circumstances of the adequate extension of cotton cultivation within the Empire, and that means that Lancashire will continue to depend in the main on the American crop, with the absolute certainty that the time will come when the surplus of that crop available for export will be quite inadequate to meet her wants. In the face of that prospect it is obvious that every effort must be made to find a way out of the *impasse*. This country may be able to do without its coal exports in the last resort, but it cannot do without them and cotton goods, one of the mainstays of its trade, and our staple article of export to many markets. The only practical solution would appear to lie in the adequate utilisation of the residual fibres of the cotton seed, which can be used for many commercial purposes. It has been established that the by-products can be sold to advantage, and it would appear that their use in years when the price of cotton is low would just make the necessary difference to the cultivator, while in good years his profits would be accordingly increased. Certainly only by some measure on these lines will it be possible to safeguard the Lancashire industry and to ensure the even supply of cotton that is to be desired.

NEW SHILLING CURRENCY.

In the House of Commons on June 2, Mr. Wood, in reply to a question by Colonel Wedgwood, stated that the new shilling currency to be introduced into the British colonies, protectorates, and mandated territories of East Africa would be divided into cents, a cent being the hundredth part of a shilling. The new shilling would be the standard coin, and legal tender for any amount. The size would be larger than that of the English shilling and less than that of the Indian rupee. The present 50 cents coin would be replaced by the new shilling, and the old 5 cents coin would be used as the future 10 cents coin. The estimated value of the present subsidiary coinage, i.e., 1, 5, and 10 cent pieces, now in circulation was approximately 1,000,000 rupees.

ENGINEERING.

Insulation Points.

An interesting point in connection with the insulating materials used in winding armature and field magnet coils and other electrical apparatus has just been brought to my notice. The material most commonly employed in the preparation of these is shellac, which is soluble and may be carried in solution by liquids of the alcohol family. Paraffin wax is also used, this being soluble in naphtha and other light hydrocarbons under certain conditions, and in addition there are other materials, as bitumen, which can be carried in solution by somewhat similar coal tar derivatives.

Some little time ago the makers of a special kind of insulating material were informed by one of their largest customers that their insulating compound was not giving complete satisfaction, and, in addition, was becoming brittle and breaking away from the material to which it was applied. Upon visiting the company's winding-room and examining the machines, it was found that the bodies of the coils were in first-class condition, but that the insulation of alternate leads was brittle. It was found that this condition was due to the fact that the winders were marking every other lead with a stock insulating compound of another colour in order that they might keep account of the work done more readily. This stock compound had a different insulating base, and was composed of a different liquid solvent, and the two insulations, that and the special kind supplied by the big firm, were mutually destructive.

Taking the types of insulating material mentioned above, it appears that when solutions of them are applied in successive coats as insulation on a winding or other part of a piece of electrical apparatus, the result is a composite but non-homogeneous layer, which will give trouble sooner or later. The two parts of the layer will not only have no affinity or adhesiveness towards each other, but will be mutually repellent and injurious. Thus it is not possible to mix shellac and paraffin wax together, and it is also impossible to produce a flux or solvent that will dissolve the two together and make a uniform, fast and durable mixture. These two different solids in suspension or solution in a plastic mass in which they are free to flow will separate out in exactly the same way as certain dissimilar liquids, and any exposure to heat, as in the ordinary use of the electrical apparatus in which the insulation is employed, will cause chemical disturbances to be set up that will eventually destroy the insulation altogether.

Oil and Coal.

There is an old adage that it is an ill wind that blows no one good, and there is no doubt that the coal strike has hastened the development of oil-burning apparatus and has shown those engineers who had some doubts on the matter that oil is a serious rival to coal. Many power stations, according to *Electrical Industries*, are installing and using oil burners. At Lots Road, the power station which supplies energy to the District and Tube railways and to a number of tramway services, sixteen boilers have been equipped, and the coal saving is calculated at 320 tons per 20-hour day, or, roughly, 115,000 tons per annum. Owing to the proximity of the river, the oil is being pumped direct from barges into a storage tank, which feeds the boiler installations. Less

than three weeks were occupied in putting the equipment into service. Similar changes have been made in the tramway power stations at Leeds, Hull, and elsewhere. Experiments in oil burning have also been carried out at the Swansea power station. In a recent interview, an official of the Shell-Mex Co. stated that practically every electricity undertaking in the country is seriously studying the possibilities of oil at the present moment. Some are actually using the fuel, some are conducting experiments, and others are in the enquiry stage. Railway companies, he claimed, are rapidly realising the value of oil, both for use at power stations associated with electric services and for the direct firing of steam locomotives. A few days ago it was stated that two main-line railways were negotiating for the equipment of their power stations for electrically-driven trains with Scarab oil-burning apparatus. Commenting upon this marked development, the paper in question stated that all this activity leads, of course, to the speculation whether the adoption of oil burning is likely in any case to be permanent. The oil champion asserts that in London oil fuel is more economical than coal and that all the indications point to the conclusion that London is going over permanently to oil. This forecast is probably coloured by a commercial hope, but the present necessity of using oil may well lead to its retention as an auxiliary or a stand-by even where it is not regularly used. At the Crown Point station in Leeds, for example, the oil burners are used to supplement coal firing, the automatic stokers being regulated to give the slowest possible feed of coal. We may also recall that at Hereford, where Mr. Kerr burns coke breeze, oil burners are used to help the station over the peak. What would happen to the price of oil if all the power stations in the country used it continually, we should not like to say, although the Shell-Mex and other oil companies would probably be very eloquent on the subject. Mr. Kerr is one of the few central station engineers who can snap their fingers at both coal and oil. He has stored enough coke breeze to last him several months, and, as the fuel is not liable to spontaneous combustion, he has had to face none of the difficulties about laying in a stock of coal. Successful burning of coke breeze is, however, a rare art.

Special Steel Saws.

It appears that a special quality of tungsten steel is now being made use of in the construction of the "Diehard" hacksaw blades manufactured at Sheffield by the well-known firm of Thomas Firth and Sons. The addition of the necessary percentage of tungsten to the steel is claimed to increase not only the durability, cutting power, and working speed of the saws, but also to add considerably to their life. The firm have just issued a list giving the sizes and other particulars of the saw blades obtainable, and containing a number of valuable hints to users. It appears that for soft machinery steel, the cutting speed recommended is 100 strokes or about 50 ft. per minute, and for annealed tool steel 70 strokes or about 35 ft. per minute. These speeds, it should be noted, are with lubricant; where dry cutting is the practice, the speed should not exceed 60 strokes or 30 ft. per minute. A further note points out a fact that has been known for years to most engineers, which is that cast iron should be cut without a lubricant; but no doubt this will be a tip of some value to the new school of post-war engineers, who use emery for bearings and make nuts fit by the simple process of hitting them with a hammer. With steel, a cutting compound should be used when possible. Soluble oil is suitable, but the solution should not be strong, and should be made alkaline by the addition of soda. As regards pitch, the number of teeth suggested as generally correct for hand blades varies from 14 to 1 in. for mild steel and cast iron, and 16 for general workshop use up to 22 for brass, 28 for tubing, and 32 for thin tubing and sheets.

The Fiat Company.

After being closed for one month, work has been resumed in the Fiat factory under the original management and on the conditions imposed by the directors. The revolutionary movement which burst forth last September appears to have completely died out, for in the recent Italian elections the Communist leaders at Turin, who were workers in the Fiat factory, and were responsible for the disturbances, were defeated by overwhelming majorities.

Working conditions were not really involved, the outbreak being of a political nature and engineered by a small group of extremists. The mass of the workers recognised this, and after volunteering to return to the factory on the conditions laid down by the management, they showed their disapproval of the extremists by overthrowing them at the general elections.

Reports have been circulated in a certain section of the Press that a dominating interest in the Italian Fiat Company has been secured by the German financier Hugo Stinnes. This statement is entirely incorrect, for Stinnes has no connection, either directly or indirectly, with the Fiat Company, the capital of which is entirely in Italian hands.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—Business continues to be very restricted. There is little demand for currants, and prices are again lower on balance. Sultanas have been in good request at increasing rates, and supplies of this commodity are now becoming short. Figs have been in fair demand, and Persian dates have also been in request.

Sugar.—Home refined is in good demand at unchanged prices. West Indian crystallised is 1s. down at 53s., to 56s., and American granulated at 61s. has lost 6d. Czechoslovakian came to business at 32s., while white Java is quoted at 23s. Quotations are:—June-July, 20s. 6d.; August, 20s.; September, 17s. 6d.; October, 16s. 3d.; November, 15s. 9d.; December, 15s.

Coffee.—Prices have been firm, Costa Rica, bold to good bold greenish, has been done at 114s. 6d. to 119s. 6d., and medium from 102s. 6d. to 109s. Nairobi bold greenish made 38s. 6d., medium from 65s. to 70s., and small from 52s. to 56s. 6d. Futures market steady. Quotations are:—July, 42s.; September, 42s. 6d.; December, 43s. 3d.; March, 44s.

Oilseeds.—A firm tone has characterised the market. Indian linseed is 3d. up at 18s. 9d., and La Plata at 17s. is unchanged. Rapeseed has risen with Toria at 20s. 6d., bold Ferözepore at 19s. 6d., and brown Cawnpore at 18s. 6d., increases of 6d. in each case. Cottonseed is again lower, with Bombay at 10s. and the Egyptian black variety at 10s. 3d., decreases of 9d. and 2s. 3d. respectively.

Oils.—There has been little change in prices. Linseed oil is 3d. up at 32s. 3d. Rape oil is unchanged, with crude at 54s., and refined at 62s. Refined cotton oil at 42s., and deodorised at 48s., are unchanged, but Egyptian crude has gained 1s. at 35s. Turpentine has dropped 8s. during the week to 85s.

DRIED FRUIT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows for the fortnight ending June 2:—

Currants.—Since our last report stocks have been replenished by further supplies per Asturian and Tyria. Excellent qualities of Zante and Gulf formed a good proportion of these, and being packed in wood and the market bare of these descriptions an active demand was looked for. Unfortunately, business has been at a standstill to a great extent, for though the trade is undoubtedly short of good fruit, this fact is insufficient to counteract the paralysing and blighting influence of the coal strike which drags on week after week. There is no particular alteration to record in the outlook, traders continuing their waiting policy, pending a settlement of labour troubles. Where sales took place prices were slightly in buyer's favour, but holders display wonderful confidence under the circumstances, realising that buyers are carrying no stocks, so that an immediate resumption of activity is expected to coincide with the termination of the coal strike. Total arrivals from commencement of season to date 24,100 tons.

Quotations are: Pyrgos and Amalias, 60s. to 65s.; Patras, 65s. to 70s.; Zante, 70s. to 80s.; Gulf and Panariti, 70s. to 80s.; Vostizza, 82s. to 95s. Bosnian has commenced discharging 1,200 tons.

Valencia Raisins.—A few fine selected quarter boxes realised 120s.

Sultanas.—Prices have continued on their upward course, the principal business being in Afghans, the red variety selling from 95s. to 100s., and up to 107s. for a specially bright parcel. Yellows sold at 110s. to 125s. Of Smyrna only a few lots remain and quotations are 130s. to 170s. for fine. Greeks sold at 137s. 6d.

Figs.—Slow at 55s. for genuine quality.

BULGARIAN TRACTOR TRIALS.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, May 23.

The tractor trials are still dragging on, but it is thought that of the machines which have already demonstrated the Italian "Fiat" and British "Saunderson" stand the best chance of success.

The Commercial Bank of Morocco have declared a dividend of 8 per cent.

A new bank has been formed at Bucharest with the title "Banque Maritime Roumaine," with a capital of ten million lei.

The traffic receipts of the Smyrna-Aidin Railway for the week ended May 28 amounted to £10,273.

The Sudan Government have decided to reduce the wages of all labourers working for Government departments, and at Makwar and Jebel Aulia.

The Indian and General Investment Trust recommends final dividend on preferred stock at rate of 5 per cent. per annum, and final dividend on deferred stock at rate of 12 per cent. per annum, making 10 per cent.

The traffic receipts of the Egyptian Delta Light Railways for the week ended May 10 amounted to £10,335—total for year ££39,652. For the corresponding period of last year receipts amounted to ££11,989 and ££46,812 respectively.

CURRENT PRICES.

General Produce.—Bacon, 133s. 6d. cwt.; butter, 185s. cwt.; cheese, 128s. 6d. cwt.; chillies, 120s. cwt.; eggs, 17s. per 120; cloves (Zanzibar), 9½d. lb.; cocoa (Ceylon, good to fine), 78s. 6d. cwt.; coffee (Costa Rica), 115s. 6d. cwt.; coffee (East Indian, bold), 112s. 6d. cwt.; coffee (Mocha, longberry), 93s. 6d. cwt.; coffee (Santos superior) 54s. cwt.; coffee (Nairobi), 100s. cwt.; lard, 68s. 6d. cwt.; hams, 124s. cwt.; ginger (washed Cochin) 37s. 6d. cwt.; nutmegs (110's to 80's) 10½d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok, white), 8½d. lb.; raisins (Valencia), 105s. cwt.; raisins (Sultana, Smyrna), 140s. cwt.; currants, 79s. cwt.; sugar (granulated), 61s. 7½d. cwt.; sugar (No. 1 cubes), 65s. 1½d. cwt.; sugar (white Java), 58s. cwt.; sugar (West Indian crystallised), 53s. 3d. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 15s. 9d. cwt.; rice (Rangoon No. 2), 16s. 9d. cwt.; rice (bran Rangoon), £6 2s. 6d. ton; cinnamon (firsts), 1s. 4½d. lb.; mace (fair Singapore), 1s. 2½d. lb.; tea (Indian, common to good common), 5½d. lb.; tea (Ceylon, common to good common), 6½d. lb.; tea (Java, common to good common), 4½d. lb.; wheat (Australian), 83s. 6d. qr.; wheat (English white), 95s. qr.; wheat (La Plata), 82s. 1½d. qr.; barley (malting), 67s. 6d. qr.; oats (English), 41s. qr.; oats (La Plata), 30s. 9d. qr.; maize (La Plata), 55s. 1½d. qr.; flour, 68s. 6d. sack.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 8½d. lb.; 80 to 89 lb., 8½d. lb.; 70 to 79 lb., 8½d. lb.; 60 to 69 lb., 7½d. lb.; 59 lb. and under, 6½d. lb. Ox and heifer (second), 90 lb. and up, 7d. lb.; 80 to 89 lb., 6½d. lb.; 70 to 79 lb., 6½d. lb.; 60 to 69 lb., 6½d. lb.; 59 lb. and under, 4½d. lb. Cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 7d. lb.; (second), 60 lb. and up, 5d. lb.; 59 lb. and under, 4½d. lb. Bulls (first), 4½d. lb.; bulls (second), 3½d. lb. Kips (first), 6½d. lb.; (second), 5d. lb.; third, 3½d. lb.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 10½d. lb.; citric, 2s. 6d. lb.; tartaric, 1s. 8½d. lb.; ammonia (sulphate), £20 5s. 7½d. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 11½d. gallon; bleaching powder (35 per cent.), £21 10s. ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 139s. 6d. cwt. Potassium: Bichromate, 9½d. lb.; chlorate, 5½d. lb.; caustic, £47 10s. ton; nitrate, £54 ton; permanganate, 1s. 9d. lb.; prussiate yellow, 1s. 2½d. lb.; sulphate (90 per cent.), £22 10s. ton. Sodium: Crystals, 145s. ton; bicarbonate, £10 10s. ton; bichromate, 6½d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 10s. ton; hyposulphite, £23 10s. ton; prussiate, 7½d. lb.; nitrate, £18 11s. 3d. ton; glycerine (crude 80 per cent.), £105 ton; glycerine (industrial, 125 per cent.), £155 ton; sulphate of copper, £32 ton; sulphate of iron, 150s. ton; lemon oil, 3s. 2d. lb.; quinine, 3s. 7½d. oz.; red lead, £39 ton; white dry lead, £42 15s. ton; white ground lead, £51 15s. ton.

Metals.—Aluminium, £150 ton; antimony (English Regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £74 15s. ton; copper (electro), £76 10s. ton; gold bars, 104s. 0½d. lb.; iron (No. 3 Cleveland), 130s. ton; hematite (mixed number), 160s. ton; galvanised sheets (24G), £22 ton; lead (soft foreign), £23 19s. 3d. ton; manganese Poti, 1s. 3½d. unit; molybdenite, 50s. unit; nickel, £187 10s. ton; platinum, 365s. oz.; plumbago, £25 ton; quicksilver, £11 2s. 6d. bottle; silver bars, 34d. lb.; spelter (G.O.B.), £27 17s. 6d. ton; tin (standard), £180 17s. 6d. ton; tin plates (20 by 14), 26s. 3d. box; wolfram, 12s. 9d. unit; zinc sheets, £36 10s. ton.

Miscellaneous.—Cotton (American), 8.27d. lb.; linseed (La Plata), £16 12s. 6d. ton; rape (Toria), £20 7s. 6d. ton; soya beans, £11 12s. 6d. ton; palm kernels, £20 ton; cotton (Egyptian), £12 10s. ton. Oils: Linseed, £32 ton; soya, £34 ton; cotton (crude), £34 ton; olive (Levant), £82 10s. ton; ground nut, £40 10s. ton; palm, £34 10s. ton; rape (crude), £53 10s. ton; coconut (Ceylon), £48 3s. ton; petroleum, 2s. 1d. gallon; turpentine (American), 94s. 6d. cwt. Shellac (T.N. second orange), 407s. 6d. cwt.; shellac (A.C. garnet), 310s. cwt.; rosin (American), 21s. cwt.; copra (Ceylon), £30 15s. ton; copra (Straits F.M.S.), £29 7s. 6d. ton; tallow (Australian mutton), 33s. 6d. cwt.; tallow (Australian beef), 34s. 6d. cwt. Plantation Rubber (No. 1 crêpe), 8½d. lb.

COTTON AND COTTON GOODS.

PROMOTION OF COTTON GROWING.

The report of the British Cotton Growing Association for the past year shows a record of steady progress. There was a surplus on the year's working of £56,468, after making full provision for depreciation, income-tax, and corporation profits tax, and the deficit of income and expenditure account, which stood at £57,927 at December 31, 1919, has been turned into a surplus of £9,811. The Council regard it as particularly gratifying that notwithstanding that very large sums of money have been expended over many years in pioneer and propaganda work, the capital of the Association remains intact. The immediate outlook, however, is not so satisfactory, as a high price was guaranteed to the native cultivators in Nigeria up to June 30, 1921, and the Council have also considered it advisable to purchase a large quantity of the 1920-21 Uganda crop at a price which would not unduly discourage the native growers.

As regards the production of cotton, the results for 1920 are eminently satisfactory. The estimated amount of cotton grown in new fields in the British Empire in 1920 amounted to 105,800 bales, as against 79,600 bales in 1919. The report points out with reference to the Empire Cotton Growing Corporation that the terms of the draft charter and by-laws have been practically settled, so that there may be no delay when once assent to the voluntary levy of 6d. per bale of 500 lb. has been obtained from the industry as a whole. The Committee intend to recommend to the Corporation, when formed, the appointment of Sir James Currie, K.B.E., C.M.G., as director, and of Colonel C. N. French, C.M.G., as assistant director.

MANCHESTER REPORT.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, June 6.

The failure of the employers and the operatives to adjust wages has come as a surprise in the market, but the rupture is now complete and the stoppage of production has taken place. In well-informed quarters it is estimated that work will not be resumed for three or four weeks. The position of affairs is now being investigated by the Ministry of Labour. Trade for the time being is in a state of chaos. Holders of stocks of yarn and cloth are holding more firmly to prices. So far there has not been any rush on the part of buyers to secure supplies. The offtake in Egyptian cotton remains poor. No crop news of any importance has come through since a week ago. In Egyptian yarns only a small trade continues to be done. Quotations at the moment are quite nominal. In cloth for Egypt the undercurrent of inquiry continues fairly healthy, and some shippers are more eager to place orders with manufacturers. A few lines have also been booked for Constantinople. Operations for India have been restricted. Most of the inquiry has been for Bombay. Better mail advices are now being received from China, and it is reported that stocks in Shanghai are being reduced. A few more offers have been about for standard makes. There has been very little activity for South America. Manufacturers believe that the lock-out will put the market on its feet. American yarns for home use have remained quiet at late rates. Business continues to be done in bundles for India and the Near East.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended June 2:—

The past week unfortunately has shown no improvement on the many bad ones which have preceded it. The inquiry for cotton, spot c.i.f., has been miserably poor, and when any new feature does make its appearance it generally proves a depressing one—as witness the recent uncertainty with regard to the outcome of the cotton spinners' wages conference. Considerable disappointment is felt here that nothing has yet materialised in the way of a settlement of the coal dispute. This would appear to be the key to the situation, and in the meantime—*faute de mieux*—we can only wait and hope. The small inquiry still continues to centre chiefly round Sakellaridis—fully good fair to good—though a slight hardening in the Upper basis is noticeable this week.

PERFUMERY and GOOD TOILET GOODS.

LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for April:—

Business during the past month has been very slack, and all markets were quiet. Merchants have been placing very small demands, and are content to wait until better days. It is hoped, however, that the improvement of the Turkish exchange during the latter half of the month may brighten the local markets somewhat. Enquiries were received from Greece and Anatolia, but little business was effected owing to difficulties of transport. It is interesting to note that an exhibition of Agricultural implements will be held during July under the auspices of the Ministry of Commerce and Agriculture. Trials will be held and awards given to those machines which pass the tests. The cost of living in Constantinople for a native person of moderate means has dropped considerably since last month.

There is a great deal of small shipping held up in the port on account of the stagnation in the market here and the blockade by the Greeks of the Turkish ports on the Black Sea. Some activity is shown in the traffic to Roumania owing to better transport facilities in that country, and also to the fact that she has begun to export goods. Traffic with Bulgaria during the month has shown an improvement.

Produce.

Flour.—Arrivals during the month were between 9,500-10,000 tons from Egypt and America, at prices varying from £21 to £22 per ton c.i.f. Constantinople. The market has remained steady, and local demand continues strong. Stocks on hand are about 5-6,000 tons.

Barley.—About 1,000 tons have arrived from Roumania and Russia for the local market at prices between 8½ to 8¾ piastres per oke. Smyrna and the ports on the Sea of Marmora have taken up all exports. Crops in Roumania are very promising and good results are expected.

Sugar.—Arrivals amounted to 100 tons only from Holland and France. During the month the price rose from £40 per ton c.i.f. for crystallised to £45, and from £50 to £55 for cubes, owing to the absence of fresh imports. Stocks in hand are about 1,000 tons, and about 1,200 tons are expected. The market closed weak, but fortunately stocks are not big.

Rice.—The demand has been well maintained, but merchants are refraining from passing fresh orders. About 7,000 sacks arrived from France and Rangoon, but stocks here are not large, and no big consignments are expected.

Coffee.—Stocks are fairly low, and small arrivals are expected. Merchants are not making fresh orders, and are very reserved. Demand is weak, and ordinary qualities in transit are offered at 20 to 21 piastres the oke.

COUNCIL OF ADMINISTRATION OF THE OTTOMAN PUBLIC DEBT.

NOTICE TO HOLDERS OF THE OTTOMAN FOUR PER CENT. UNIFIED CONVERTED DEBT.

The Council of Administration of the Ottoman Public Debt inform holders of the Unified Debt that, in accordance with Article No. 1 of the Décret-Annexe, and without prejudice to their rights under that Article, they have decided to authorise the PAYMENT in London of the sum of 1s. 3d. on account of each half-yearly Coupon of 8s. to Allied and Neutral holders who are in possession of overdue Coupons due March, 1915, to March, 1920, inclusive.

The provision for the payment of this amount is in the hands of the Imperial Ottoman Bank, London Agency.

Holders are invited to present the above-mentioned Coupons before the 1st September, 1921, at the Imperial Ottoman Bank, 26, Throgmorton Street, E.C.2, either direct or through the intermediary of any of the under-mentioned Establishments:—

Imperial Ottoman Bank, 7, Rue Meyerbeer, Paris.
Banque de Paris et des Pays Bas, Paris.
Comptoir National d'Escompte de Paris, Paris.
Crédit Lyonnais, Paris.
Société Générale pour favoriser le Développement du Commerce et de l'Industrie, Paris.
Société Générale de Crédit Industriel et Commercial, Paris.
Crédit Mobilier Français, Paris.
Banca d'Italia, Rome.
Banca Commerciale Italiana, Rome.
Banque de Bruxelles, Brussels.
Banque de Paris et des Pays Bas, Brussels.
Banque Centrale Anversoise, Antwerp.

In exchange for the Coupons, accompanied by a declaration of nationality, holders will receive, at the same time as the cash payment, receipts representing their rights.

These decisions are not applicable to holders presenting only Coupons due March, 1919, September, 1919, and March, 1920, either separately or together.

Constantinople, 8th April, 1921.

With reference to the foregoing advertisement, the Imperial Ottoman Bank give notice that they are prepared to receive on and after the 18th instant the above-mentioned Coupons, listed on forms which can be obtained on application. The cash payment is subject to deduction of Income-tax and 2d. per receipt for stamp duty.

It will be a convenience if holders will present Coupons through their bankers.

IMPERIAL OTTOMAN BANK, 26, Throgmorton Street, E.C.2.

14th May, 1921.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

ALEPPO.

The report for March and April states:—The market remains quiet. The approaching crop of cereals promises to be particularly abundant in some of the neighbouring districts, but it is considered that the total yield of the crops of this region will be 20 per cent. less than that of the previous year. It is estimated that there will also be a decrease of 50 per cent. in the production of butter and the raising of cattle. As long as communications with the interior continue to be interrupted, it is impossible to expect trade to recover. The new wool season is commencing. The yield is below that of the previous year because of the decreased number of cattle. The exportation of the products of this region is practically at a standstill.

ADANA.

The report for April states:—As a result of the uncertainty of the political situation and of the world trade depression the position here is one of complete inactivity. A large part of the 1920-21 cotton crop is still here. Despite various offers made by Italian, Greek, and Smyrna merchants no transactions have been carried out. The exports of the month consist of 600 bales of cotton for Smyrna and Salonika. As regards imports there has been a certain amount of activity during the month. The railway between Alexandretta and this town, which has been interrupted since the events of July, 1920, has been repaired, and is open for use. It is estimated that the forthcoming harvest of cereals will give a yield of 40 per cent. of that of the past year.

MAMOURET-UL-AZIZ.

The report for March states:—

As regards agriculture, the month has been dry, and the outlook for the approaching harvest will not be good if the conditions are the same in April. As a result of the position, wheat has risen 20 per cent., but the rise has now been stopped by arrivals of flour from Sivas.

The fall in the prices of manufactures has not yet made its effect felt here, because the merchants, nearly all of whom hold old stocks, are to some extent in agreement not to dispose of their goods at Constantinople prices, which would entail serious losses for them. They are also abstaining from giving fresh orders, so there is no movement in imports at the moment.

ON 'CHANGE.**Dull Tone Prevails.**

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday Night.

There has not been much change in the general market position during the past week. With the coal strike still lingering on, and the prospects of a settlement somewhat indefinite, there is a strong disposition on the part of buyers to hold aloof.

Gilt-edged stocks have declined to weakness. War Loan Fives are 9-16 down at 87 11-16, while Victory Bonds have shed $\frac{1}{8}$ at 78. Consols at 46 are $\frac{3}{4}$ down. The new Indian loan is now at a premium of 3. The Ceylon loan, to which I drew attention last week, has proved an enormous success, and shows very plainly that money will always be forthcoming for a sound security.

Industrials have been rather firmer during the week, Iron and Steel shares displaying a favourable tone. Oils have been rather quiet, but a demand has developed for one or two lines, notably Oil Trusts, which have been quite a feature of the market to-day. Rubbers are better on a trifling improvement in the raw commodity.

Near Eastern securities which rank as Government stocks have been firmer. Egyptian Guaranteed 3 per Cent. are $\frac{3}{4}$ up at 68 $\frac{1}{2}$. Greek Guaranteed 2 $\frac{1}{2}$ per Cent., 1889, are unchanged at 66 $\frac{3}{4}$, and Turkish Guaranteed 4 per Cent., 1855, are the same at 71.

Greek shares are mostly unchanged. The 5 per Cent., 1881, and the 5 per Cent., 1884, loans at 38 are each a point up. The 5 per Cent., 1890, is also that amount up at 39. Fundings are unchanged at 36, and the 4 per Cent., 1910, loan is unaltered at 29. The 4 per Cent., 1902, loan is 34, and the 5 per Cent., 1914, loan is 36.

Land shares have been weak. Beheras are $\frac{1}{2}$ down at 8, but the preference shares are unchanged at 3. Anglo-Egyptian Land allotments at 3 $\frac{1}{4}$, and Egyptian Consolidated Lands at 1s. are unchanged, as are Egyptian Delta Lands at 6s. 9d. and Gharbich Lands at 1 $\frac{1}{4}$. New Egyptians are 6d. down at 22s., while Union Foncières at 2 $\frac{1}{2}$ have shed $\frac{1}{4}$, and Sudan Plantations are 1-16 down at 2 13-16.

In Oils, Anglo-Egyptian are unchanged at 1 13-16, but Phoenix at 10s. 9d. are 9d. lower. Roumanian Consols are 3d. down at 13s. 6d., but Steaua Romanas are 1s. up at 16s. Burmahs are 3-16 up at 6 11-16.

Banks have been firm. Agricultural 3 $\frac{1}{2}$ per Cent. Bonds and the 3 $\frac{1}{2}$ per Cent. Guaranteed Bonds are unchanged at 51 and 53 respectively. Imperial Ottoman Banks are $\frac{1}{4}$ down at 8 $\frac{1}{2}$, but National Bank of Egypt are $\frac{1}{8}$ up at 17 $\frac{3}{4}$. Land Bank of Egypt have shed 1-16 at 4 15-16.

Among Miscellaneous descriptions, Abyssinian Corporations are unchanged at 2s., while Alexandria Waters have gained $\frac{1}{8}$ at 6 $\frac{1}{2}$. Morums are 10s., and Egyptian Markets remain at 18s. 6d. x. Egyptian Salt and Sodas are 6d. down at 27s. 6d.

Sir George Curtis, member of the Bombay Government from 1916 to 1921, will deliver an address before the Royal Society of Arts on Friday afternoon on "The Development of Bombay." The chair will be taken by Sir William D. Sheppard, member of the Council of India.

Alexandria Water.—Final dividend of 6 $\frac{1}{2}$ per cent., payable June 15, making 10 $\frac{1}{2}$ per cent. for year; £14,506 for depreciation on buildings, machinery, etc.; £718 for depreciation on materials; £4,000 for depreciation on securities; £4,883 subsidy to staff; £2,417 gratuity to staff; £489 to employees' relief fund; £3,000 provision for compensation claims; £4,400 provision for corporation profits tax.

COMPANY NOTES AND REPORTS.**Delhi Electric Trams.**

The report of Delhi Electric Tramways and Lighting Company for 1920 states that gross receipts from tramway undertaking totalled £16,642, and electric supply undertaking £40,048. Both branches were affected by labour troubles during latter part of year. Combined undertakings show net revenue of £22,266, as compared with £20,429 in 1919. Profit, including profit on exchange, after charging general expenditure in London and Delhi and Debenture interest, was £31,325, plus brought forward £1,362, together £32,687, less depreciation of plant and equipment £10,000, renewals reserve £7,500, reserve for British and Indian taxation £4,000, leaving £11,187. Dividends of 8 per cent. per annum upon Preferred and Participating shares, less tax, recommended, and dividend of 1s. 6 $\frac{1}{2}$ d. per share on Ordinary shares, less tax, carrying forward £982. Expenditure on maintenance during year (with the exception of special renewals, amounting to £2,535) has been charged to revenue. Additions to plant amounted to £7,703. Meeting, Basildon House, Moorgate Street. E.C., June 16, noon.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated May 30:—

During the week ending May 21 general crop prospects unchanged. Bombay cotton market steady; fine M.G. Oomra July Rs.277; Bombay cotton arrivals from September 1, 1920, to May 20, 1921, were 2,132,000 bales, as compared with 2,766,000 bales during the corresponding period of the last year. Bombay native piecegoods merchants' association have rescinded their resolution passed on December 7 last prohibiting members from purchasing foreign piecegoods either by indent or otherwise until Government changed their exchange policy; but they have confirmed their resolution of December 22 to postpone payment for goods imported until exchange rate rose to two shillings, with this addition, that a penalty of 51 rupees would be imposed on members who settled contracts below the two-shilling exchange rate. An agreement is proposed binding signatories not to settle contracts below that rate, under penalty of 25,000 rupees. Calcutta jute and gunny markets remain steady but very dull. No change in bank rates.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on May 30 were as follows:—Agricultural Bank of Egypt, £4 1-16; Alexandria Water Co., Ltd., £6 $\frac{1}{2}$; Anglo-American Nile Steam, £2 11-16; Associated Cotton Ginners, £23-32; Banque d'Orient, Fr. 52; Behera Ord., £E7 13-16; Behera Priv., £3 3-16; Bonded Stores, £99; Brasseries d'Egypte, Fr. 75; Building Lands of Egypt, £11-16; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin et Com. d'Egypte, £1; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 780 ex; Credit Foncier Egyptien, Fr. 598; Credit Foncier 1885 Oblig., Fr. 317; Credit Foncier 1903 Oblig., Fr. 224 $\frac{1}{2}$; Credit Foncier 1911 Oblig., Fr. 226; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eau du Caire Capital, Fr. 77 $\frac{1}{2}$; Eau du Caire Jouissance, Fr. 101 $\frac{1}{2}$; Egypt and Levant, S.S. Ord., 28s.; Egyptian Delta Light Railways, £4 $\frac{1}{2}$; Filature Nationale d'Egypte, £10 $\frac{1}{2}$; Gabbari Lands, £11-32; Immeubles d'Egypte Soc. an des., £5; Khedivial Mail S.S. Co. Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2 $\frac{3}{4}$; Kom Ombo Ste. Ane. de Wadi, £4 13-32; Kom Ombo Ste. Fondateur, £33 9-16; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 43; Menzaleh Canal Navigation, Pt. 230 ex; Nungovich Hotels, £6 $\frac{1}{4}$; Ramleh Railway, £1 25-32; Salt and Soda, 27s. 9d.; Tram. d'Alexandrie Priv., Fr. 37V; Tram. d'Alexandrie Div., Fr. 48V; Union Fonciere d'Egypte, £2 7-32; Egypt Hotels, £2; Urbaines et Rurales, £2 27-32.

BRITISH TRADE CORPORATION

Established for the Assistance of British Trade by the Insurance of Accounts.

SHIPPING INTELLIGENCE.

NEW DANUBE COMPANY.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 18.

The local Press announces with great satisfaction that the "River Syndicate" and "Danube Navigation" companies have decided to form a new navigation company in Greater Roumania, with a capital of 10 million lei, to operate on the Roumanian section of the Danube, under the title of "Societatea Anglo-Romano de Navigatiune pe Dunare" (Anglo-Roumanian Navigation Co. on the Danube). The object of the company will be to increase the passenger and goods traffic at the Roumanian ports on the Danube.

PIRÆUS SCHEME ABANDONED.

According to an American Consular report, the plan for the extension of the harbour of the Piræus, for which 40,000,000 drachmæ were to be expended, has been abandoned because of reduced shipping, the critical financial condition, and the opposition of dock labourers of the Piræus.

QUICKER ITALIAN SERVICE TO EGYPT.

The London office of the Italian State Railways and Steamship Lines announces that the Trieste Lloyd Line (Lloyd Triestino) has effected an important acceleration in its weekly service to Alexandria. The voyage from Trieste now occupies 73 hours and from Brindisi 48 hours by oil-driven liners of the well-known Helouan class. Egypt can thus be reached from London in under five days.

FORTHCOMING SAILINGS.

Anchor Line.—S.s. Massilia, for Bombay [taking cargo for Karachi and coast ports] (Liverpool, June 11).

Anchor-Brocklebank Line.—S.s. Mandasor, for Calcutta (Birkenhead, June 15); s.s. Imani, for Port Said, Colombo, Madras, and Calcutta (London, June 18); s.s. Masirah, for Calcutta (Birkenhead, June 29).

Bibby Line.—S.s. Gloucestershire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, June 22).

Byron Steamship Line.—A steamer will sail on June 24 from Liverpool for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila.

Clan Line.—S.s. Clan Macindor, for Colombo, Madras, and Calcutta (Birkenhead, June 23).

Cunard Line.—S.s. Brescia, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Salonika, and Constantinople (Glasgow, July 2); s.s. Phrygia, for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Swansea, July 12).

Ellerman Line.—S.s. Belgravian, for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, June 11); s.s. Gerano, for Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool, June 16).

Ellerman's "City" Line.—S.s. City of Manchester, for Calcutta (Birkenhead, June 17); s.s. City of Alexandria, for Bombay (Birkenhead, June 25). A steamer will sail on July 1 from Birkenhead for Calcutta.

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

Glen Line.—S.s. Glenade, for Port Said, Port Swettenham, Singapore, etc. (London, June 16); s.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, June 30).

ANCHOR LINE

FIRST-CLASS PASSENGERS ONLY.

LIVERPOOL to BOMBAY.

KARACHI (via Bombay) calling at Gibraltar and Egypt.

LARGE STEAMSHIPS. UPPER DECK CABINS.

FITTED WITH ELECTRIC FANS.

RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

MASSILIA, ABOUT JUNE 18;
OLYMPIA, ABOUT JULY 16;
SCINDIA, ABOUT AUGUST 13.

ANCHOR LINE (HENDERSON BROTHERS), LTD.,

16, Gracechurch Street, London, E.C.3.

Glynn Line.—S.s. Riposto, for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, middle of June).

Harrison Line.—S.s. Gladiator, for Calcutta (Liverpool, June 18).

Henderson Line.—S.s. Henzada, for Port Said and Rangoon (Birkenhead, June 15); s.s. Amarapoor, for Port Said and Rangoon (Birkenhead, June 29).

Holt Line.—S.s. Cyclops, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 10); s.s. Keemun, for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 10); s.s. Eumæus, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17); s.s. Calchas, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17).

Johnston Line.—S.s. Portinglis, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, June 11); a steamer will sail from Liverpool on July 9 for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila.

Maindy Line.—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, June 17); s.s. Maindy Transport, for Antwerp and Moroccan ports (London, end of June).

Moss Line.—S.s. Siptah, for Gibraltar, Algiers, Malta, Piræus, Syra, Smyrna, Salonika, and Constantinople (Liverpool, June 18).

Papayanni Line.—S.s. Asturian, for Malta and Alexandria [taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, and Cyprus] (Liverpool, June 18); s.s. Bosnian, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, June 25).

P. and O. Line.—S.s. Nellore, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, June 17); s.s. *Morea, for Bombay (London, June 24). *Taking cargo for Gibraltar, Port Said, and Aden (with transshipment at Bombay) for Indian coast and Persian Gulf ports.

P. & O. British India Line.—S.s. +Mashobra, for Colombo, Madras, and Calcutta (London, June 24); s.s. *Merkara, for Bombay and Karachi (London, July 1); s.s. +Mandala, for Colombo, Madras, and Calcutta (London, July 8). *Taking cargo for Persian Gulf and Malabar coast ports; †taking cargo for Port Said, Suez, and Aden.

A dividend of 200 lei per share is payable on the shares of the Petrol-Block in Bucharest.

It is announced that Mr. C. D. M. Hindley, Agent, East Indian Railway, has been appointed chairman of the Calcutta Port Trust. It is reported that a group of Roumanian financiers have bought the deposits of bauxite at Bihor for 40,000,000 lei.

The artificial silk industry in Czechoslovakia, says an American consular report, is making unusual progress. Four concerns, with a total capitalisation of 130,000,000 crowns, have been established.

FOREIGN EXCHANGES.

An interesting feature of the exchanges this week has been the improvement in the Greek rate, which at 62.50-63.50 drachmæ to sterling is 2.50 lower. Prague is five points better at 260-270 kronen, but Sofia has risen a point to 324, while the Constantinople rate is considerably weaker. The Bucharest quotation has also expanded a little.

Country.	Method of Quoting.	Parity of Exchange.	Latest Quotations
Alexandria	Piastres to £	97½	97½
Athens	Drachmæ to £	25.22½	62.50-63.50
Belgrade	Dinars to £	25.22½	120-125
Bombay	Sterling to Rupee	24d.	1.3½-1.3¾
Bucharest	Lei to £	25.22½	230-235
Calcutta	Sterling to Rupee	24d.	1.3½-1.3¾
Constantinople	Piastres to £	110	514-534
New York	Dollars to £	4.86½	3.86-3.87½
Paris	Francs to £	25.22½	46.75-47.05
Prague	Kronen to £	24.02	260-270
Rome	Lire to £	25.22½	73.50-75.00
Sofia	Levas to £	25.22½	324
Teheran	Krans to £	50	50½
Vienna	Kronen to £	24.02	1,600-1,700
Warsaw	Marks to £	20.43	3,900-4,100

In some cases quotations are nominal.

Profits in Foreign Exchange Dealings.

An expert writer has compiled for us a series of Articles explaining Foreign Exchange transactions from the English Investors' point of view. The writer explains the Exchange value of the English £, shows an actual transaction resulting in 60 per cent profit, explains the profit possibilities of the French franc, the German mark, the Italian lire, &c. This Article will be sent free of charge by

NOTES OF THE WEEK.

Mr. Winston Churchill's Speech.

At the time when these pages are passing through the press, it is expected, Mr. Winston Churchill will be announcing to the House of Commons some of the results of the Cairo Conference and expounding the intentions of His Majesty's Government in regard to Mesopotamia and Palestine. No surprise announcements are expected. The main lines of British policy have already been laid down, but the personal attention which Mr. Churchill and the Middle East Department can give to the subject is all to the good. In Mesopotamia the last effects of the misguided disturbances have been removed, it is to be hoped, by the proclamation of an amnesty. All is now ready for the Arab administration and an Arab defence force, both of which must be evolved gradually and carefully, and cannot expect to spring ready equipped from the ashes of Turkish misrule. The first step is the appointment of an Arab ruler. In regard to Palestine also caution must be the order of the day. The British Government is committed to a policy of keeping the peace between the different sections of the community. If in the past an attempt has been made to force the pace in the matter of immigration, the recent riots have provided a salutary warning which will not have been lost on the keenest Zionist.

The Little Entente.

The terms of the treaty between Czecho-Slovakia and Roumania, signed at Bucharest on April 23, show that the agreement is concerned solely with Hungary, except in so far as each country binds itself not to conclude a treaty with a third without notification to the other contracting party. At the same time, there is a constructive clause in the agreement. Article IV. provides that "in their common endeavours to maintain peace, both Governments agree to reach an understanding upon questions of foreign policy in connection with relations with Hungary." The mere ostracism of Hungary will not meet the situation in Central and South-Eastern Europe. It may be a necessary preliminary, in view of recent events in that country, but from this negative stage it should be possible eventually to pass to a more positive one. The further agreement between Roumania and Yugoslavia may be expected to be couched on similar lines, although it will probably have reference to Bulgaria as well as Hungary. In his conversations M. Take Jonescu, Roumania's Foreign Minister, lays special stress on the literal observance of the Peace Treaties. He will not, however, have overlooked the fact

that by common consent the Treaty of Sèvres has had to be modified, and if one Treaty can be improved upon it is probable that others may also be susceptible of judicious modification. There is no indication that the Supreme Council had a monopoly of wisdom in Paris, where it worked under great difficulties. All that is required to-day is that each treaty connected with the peace of Europe should embody terms that have the best chance of providing a permanent settlement on the best lines; it will be immaterial, thirty or fifty years hence, whether those terms were finally drafted in 1920 or 1921.

Proximus Ardet.

With the arrival of King Constantine at Smyrna the struggle between Greece and Turkey must shortly enter upon a new phase. If the Allied Powers still hold aloof and maintain an attitude of studied indifference, which might be in keeping if the combatants were located in South America instead of near the fulcrum of the British Empire, the Greek army will presumably launch a fresh attack. The utmost that it can hope to achieve is a victory that will drive the Turks farther away from Smyrna, and it may be anticipated in Athens that in the strength of such a success the Allies will modify their present views regarding the Treaty of Sèvres and will confirm the Greeks in the territory awarded them. What effect the additional financial burden is likely to have on the economic future of Greece can only be surmised. No doubt, if all went well, the Allies would be asked to make themselves responsible for a considerable part of Greece's indebtedness, but in view of the attitude of the Allied Powers, collectively and individually, towards Greece, it would seem as if the Greek Government were risking a great deal on a single throw.

A Policy of Pique.

It is at least a possible alternative to a rapid Greek victory that another stage of stalemate may intervene, whether the Turks have to evacuate Angora or can maintain their ground at Eskişehir. Under such conditions Greece would have no special claim on Allied generosity, and her financial position would, indeed, be parlous. A Turkish victory, on the other hand, would be hardly less disastrous to the Allies than to Greece, because it might confirm the Angora authorities in a demeanour which must spell indefinite unrest in the Near and Middle East. In all the circumstances, therefore, it is difficult to understand how the Allied Powers can stand by with folded arms and allow a situation to become more and more prejudicial to all interests concerned. The pressing need for a policy in the Near East, which has been persistently urged in these pages, has now been taken up

in other quarters. But much damage that could have been avoided has already been done. A sound step was taken when Turks and Greeks were brought to the London Conference. It was, however, immediately stultified by the childish pique that allowed the Greeks to attack the Turks. Rather than accord King Constantine the official recognition entailed in requiring him to do their bidding, the Allied Governments held aloof and virtually forced him to a course which he imagined would reinstate him in their good books. For the mere possibility that King Constantine might ride to his own fall, and so free them from an awkward diplomatic surrender, the Allies were prepared to see the ferment in the Near East perpetuated and the healing of the world's war wounds still further postponed.

Back to First Principles.

A candid exchange of views between the Allied Powers and Greece a few months ago would have saved the Near East much misery, and would have prevented some of the world's resources that have escaped the destructiveness of the long war from being squandered now. It would seem, however, that the Allied Powers have not even brought themselves to contemplate the renewal of normal relations with Greece, for they have maintained in Athens representatives closely identified with the Venizelist regime, who, the more able and qualified as diplomatists they may be, find it the more difficult to enter into friendly association with King Constantine. So long as this attitude is maintained there can be no settlement of the Near East. Greece is necessarily at a disadvantage, for her view of what may or may not be her real interests is tinged by the natural desire to rehabilitate herself in the eyes of the Allies. She is now concerned to establish the false premise on which the Treaty of Sèvres was based, that Greek rule over Turks offers a peaceful settlement that is impossible with Turkish rule over Greeks. All those with first-hand knowledge of the Near East know that peace is incompatible with either method for many years to come.

Better News from Egypt.

News received from Egypt during the past week has been quite as satisfactory as could be expected. The details of the deplorable outbreak at Alexandria have become known, with the inevitable result; the Europeans in Egypt, and their friends in other countries are naturally alarmed and anxious as to the future; and it looks as if those Egyptians who do not favour Zaghloul Pasha's pretensions are at last realising that, unless Egypt is to lose the substance for the shadow, it behoves them to rally to Adly Pasha and his Cabinet, and to show that the students and other noise-producers are not all Egypt. At any rate, the Prime Minister is reported to have been kept quite busy in receiving influential deputations from the provinces; and after the Bairam reception at the Palace he was almost overwhelmed by callers, amongst whom were many of the most influential landowners and notables. Demonstrations of this character, which show, and are intended to show, that men with a real stake in the country are determined—we must again add “at last!”—to mark their disapproval at least of the Zaghloulites' methods, will do something to counteract the harm done to Egypt's cause by the recent riots. But Adly Pasha and his colleagues will inevitably find it much harder work now than it would have been before to convince the British people that Egypt is ripe for self-government.

Misplaced Sensitiveness.

In the circumstances it is certainly unfortunate that anything said by a British Minister should add to the Egyptian Cabinet's difficulties and afford Zaghloul Pasha a pretext for another “vigorous protest.” But nobody outside Egypt would think for one moment of blaming Mr. Churchill for speaking as he did at Manchester on the situation in Egypt. In face of what happened at Alexandria it is self-evident that the moment to withdraw our troops from Egypt has most decidedly not come yet. The letters from our Cairo Correspondent which we publish this week show the view taken by the

British and other foreign communities; and, after all, the first duty of the British Government, as of any other European Government, is towards its own subjects. The Egyptian mob may howl out catch phrases about the last of the foreigners being out of Egypt within a year; but if it endeavours to get rid of them by massacre and outrage it cannot expect much sympathy outside Extremist circles; and Mr. Churchill did well to make the European view of the case clear. It is to be noted that condemnation of the outrages is expressed even more strongly in other countries than it is here. No one acquainted with the true facts would accuse the Italians of favouring the British at the expense of the Egyptians; but some of the sternest rebukes for the latter have come from Italy. Thus, a correspondent of the *Corriere della Sera*, previously favourable to Egyptian aspirations and critical of British rule, is quoted by the Milan correspondent of *The Times* as writing: “The Egyptians have now proved that they are not yet worthy of the absolute independence which they are claiming”; and *Il Secolo* expresses regret for “our abuse of the British, our sympathies ostentatiously shown for the Egyptians.” The Egyptians must blame not Mr. Churchill but another orator, nearer home, for their troubles.

The Outlook in Persia.

The composition of the new Persian Cabinet is announced, and the Prime Minister has issued a statement regarding its intentions. The Government, he says in effect, hope to concentrate its attention on internal reform, and the fact that he has himself taken the portfolio of the Interior is, perhaps, another indication to the same effect. With its neighbours and other Powers Persia will seek to maintain friendly relations, and she realises that her geographical position “entails on her the obligation of remaining neutral.” This programme, if somewhat lacking in originality, is unexceptional; and the fact that the former Russian Bank, lately transferred to Persia, is to be constituted the State Bank of Persia, may mean the beginning of brighter days, financially, for the country—though it is hard to believe it. But there are two clouds on the horizon already: the Sardar Sipah (better known as Colonel Riza Khan), Minister for War, is reported to be finding himself somewhat lonely in the new Cabinet; and the Soviet troops at Enzeli have been ordered to remain there by the Soviet Minister. Whether either of these clouds is likely to spread must be a matter of speculation.

The Antiquities of Palestine.

The Government of Palestine has made a good beginning in the matter of protecting the antiquities of the country from injury by unskilled excavators and from removal from the country of their origin. The first of these measures will not be challenged by any competent critic, and the regulation regarding export will be equally well received if it be wisely administered. We take it that there will be no objection to the exportation of antiquities of the commoner kind, and that in regard to more valuable specimens replicas at least will be presented to any scientific body that may have been instrumental in their discovery or recovery. Otherwise the incentive to undertake excavations will be considerably weakened, or, rather, the difficulty of securing funds for the carrying on of such work will be greatly increased; for though the excavators themselves may be, and generally are, satisfied with making discoveries, the public to whom they must look for financial support always wants to see some tangible result of the work. It is noticeable that the American Universities are showing much activity in the matter of Palestinian excavations. Mr. Fisher has by now probably begun work at Beisan—a virgin and wonderfully promising site—on behalf of Pennsylvania; while Megiddo has been set aside for Chicago, and fresh work at Samaria will be undertaken by Harvard. The French, too, are active once more. It is to be hoped that the work of our own admirable Palestine Exploration Fund at Askalon will be generously supported by the public.

THE WEEK AT HOME.

LONDON, Monday Evening.

The Dawn of Settlement.

The industrial situation shows signs of improvement. The Government's intimation to the miners a week ago that the offer of a subsidy would expire in a fortnight has helped to restore reason in the coal camp. Both owners and miners, having lived so long on the tax-payer, were aghast at the idea that the ten millions might after all not be transferred from the pocket of John Bull to King Coal, and instant preparations were made to compose the family feud before the time ran out. Negotiations which had before been impossible were now conducted in a friendly spirit. Proposals which could not be modified were suddenly revised. The positively final concessions were mysteriously stretched a little further by a new interpretation; the lion lay down with the lamb, and both decided that, *faute de mieux*, they would milk that patient ass, the British public, before it ran altogether dry. Cynics declare that in the modern world, when thieves fall out honest men have to pay them an extra war bonus, but no doubt that is an exaggeration. The fact is that there need have been no fight at all if there had been more goodwill on the two sides; but while Mr. Hodges talked of destroying capital and the coal-owners offered a wage which could not be defended in public one could hardly look for charity in the coal trade.

Cotton and Engineering.

The cotton people, who have also fallen out, look like composing their differences within a few days. The employers seem to have regretted their *non-possumus* attitude—in this case it was they who broke off the negotiations—and, as orders are said to be mounting up, there is every inducement to make peace. The engineering dispute is a more open matter, and here again the actual issue is complicated by personal antagonisms and suspicions.

Anti-Dumping.

It has been a very bad week for the Government. The Anti-Dumping Bill may be sound or unsound, but we could wish that the Cabinet Ministers who are piloting it through the House sounded more convinced of its merits. After all, it is their baby, but they talk about it as though they happened to find it by accident on the doorstep and adopted it out of their kindness of heart in spite of its ugly face. Mr. Fisher, for instance, cheerfully admitted that Protection was poisonous, like strychnine, but suggested that in small doses both Protection and strychnine are excellent tonics. At any rate, most of the Coalition Liberals are swallowing the tonic with wry faces, while their old allies, the Wee Frees, assure them of their approaching demise, and like the wicked man in the parable, proclaim that the inheritance will be their own.

An Election Surprise.

The Coalition have also lost heavily in the country. At St. George's, Hanover Square—reputed the safest seat in the kingdom—the Government nominee was beaten, although in Sir H. Jessel they had secured a very strong candidate; Anti-Waste was the only plank in the victor's platform. At Heywood, in Lancashire, a Government majority of ten thousand in 1918 was converted into a Labour victory—an astonishing landslide. It is understood that Labour won on cotton; there is very strong feeling in Lancashire at the lock-out by the employers, which has locally, at any rate, quite upset the Government's calculation that the coal stoppage meant the end of Labour victories for another twelvemonth.

Economy in a Flood.

More serious than any by-elections, however, is the financial situation, which the Government are at last taking seriously. The coal trouble has made it certain that 1922 will not show the surplus that Sir Robert Horne budgetted for, but a heavy deficit; if it leads to real economy in Whitehall, however, it will be a blessing in disguise. Staffs are being cut down in the depart-

ments, and the process will now be expedited; the Ministry of Health, which has been the worst spend-thrift, is being curbed at last. Ambitious schemes are sternly jettisoned, and the Ministry of Agriculture has confessed to an extraordinary reversal of policy.

An Agricultural Revolution.

Last year Lord Lee carried through a scheme for a farmers' bonus on cereals; the project was part of a large agricultural policy which was combined with a minimum wage for labourers. A four years' guarantee was given. The whole policy has now been hastily abandoned, in the interests of economy. It may save the Exchequer a fair amount of money; but it is not a good thing for a Government to turn its principles inside out over the week-end.

Its effect on the constituencies is bound to be unfortunate. The policy was always unpopular in the towns, which could not see why the farmer should have a subsidy; but its reversal is too much like a death-bed repentance to be accounted for righteousness by the urban voter. In the country it will have the unique consequence of antagonising both the farmers, who lose the subsidy, and the labourers, who lose the minimum wage. Farmers are hardly likely to vote Labour in any case, but Hodge, who has woken up of late, is rather attracted by Labour, and will probably put his money on that particular political horse.

The Labour organisation has been generally averse from running candidates in rural districts in the past, for it is only recently that trades unionism has really taken root in the village, and political Labour has neither understood nor been interested in the soil, its candidates coming from shop and factory rather than farm. It will probably revise its attitude now. It will have a good deal to learn in this respect; as a matter of fact, the eight hours' day is an absurdity on a farm, with its seasonal variations of work, and the Labour leaders would be wise if they recognise the fact.

But they can do useful work in exposing the wretched housing conditions of the peasantry, in stopping the growing habit of ejecting them from their cottages to accommodate week-enders from town—an intolerable scandal—and in attempting to lessen the petty tyranny that still exists in the villages, and increasing the social amenities. If they could make the life of the countryside a little brighter they might incidentally succeed in making the country as moral as the towns.

Coalition Discontent.

While these things are happening in the country, it is natural that there should be a good deal of discontent at Westminster. Sir W. Joynson-Hicks, a Unionist who has kicked over the traces before, has again been airing his grievances. He thinks that the real fault of the Government is in attempting to pull the coach all ways at once, and he piles up a formidable list of complaints. It is quite clear that Mr. Bonar Law's definition of the whole duty of a Coalitionist—to keep Labour out—is no longer accepted, and it would not be very surprising if Mr. Chamberlain had soon to quell an incipient mutiny. One or two more Labour victories, however, would quickly restore harmony within the Government ranks. There is nothing like the tie of common funk for keeping men together when every other bond of sympathy has failed.

The Prime Minister.

Probably the team will pull together better when the Prime Minister returns. He has been away at Chequers with a severe chill for some days, and has had to cancel his engagements. In the seclusion of that retreat he would be more than human if he could repress a chuckle at the noise that breaks out as soon as his back is turned, and the instant silence that greets his resumption of authority. Politicians are very like schoolboys after all.

I notice that Mr. Garvin, who makes our flesh creep every Sunday in the *Observer*, is pessimistic about the future of the Coalition. He is very impressed by the attempts to unite Independent Liberalism and Labour, and he thinks that the Opposition have a majority in the country. The Government, according to him, have already lost the North, and, by abandoning agriculture, they are now in process of losing the South.

One would be more impressed by this diagnosis were it not that Liberalism and Labour, in theory and in practice to-day, are as capable of mixing as oil and water; political Labour is by no means so united in private as it professes to be in public, and it is quite capable of doing things which will frighten the voter away for another six months or a year.

Its future, however, is not entirely in its own hands, and for this reason: it is definitely committed to nationalisation of the great industries. The country as a whole, which saw the blunders resulting from official control, and decided that this was very much the same thing as nationalisation, determined that private enterprise was the better policy, and agitated for the removal of control and economy of staffs in Whitehall, to the discomfiture of Labour. If prices continue to go down, the public will make up its mind that private enterprise is justified; but if coal, gas, light, and other things go up again as a result of the removal of control, it would not take very much profiteering in the necessities of life to turn votes back towards nationalisation and municipalisation of essential industries.

That controversy has never yet been fought out in full on a large scale, although we had some foretaste of it twenty years ago on the London County Council. But it would be a profound mistake for politicians to believe that the public has definitely settled convictions. It is waiting on events, which it is watching carefully, and at present opinions are divided.

The next great political controversy in this country will be on the State versus private enterprise, with Labour on one side and the Coalition on the other. It will take a good many years to settle, and probably neither side will gain a complete victory in principle, although both will win elections. At present the issue is confused; those who are anti-Coalition necessarily vote Labour, but a good many do so on the anti-waste and not the nationalisation issue. If Labour came into power, the anti-waste vote, which is a purely negative political attitude, would at once be ranged against them, on account of their nationalisa-

tion policy, and they would lose ground as rapidly as the Coalition. It is that fact which renders the immediate future so uncertain, while the ultimate controversy is assured.

Will Crooks.

The death of Will Crooks was the occasion of a universal tribute of respect from King to beggar-boy which many a Prime Minister might envy. He was, in fact, a kind of uncrowned king, judge, and priest rolled into one for his own district of Poplar, where he lived and died; and few men ever had so great a moral influence. One story that is told of him indicates his position better than any formal comment. One night a little girl called at his house—a dingy villa in Gough Street, Poplar—and left this message with Mrs. Crooks: "Please, mum, father's took to drink again, and mother says, will Mr. Crooks come round and give him a good hiding."

I knew him well, and never heard him say an evil word of anybody, although he was always ready to tell a story against himself. He worked hard during the war at recruiting speeches up and down the country; but what really broke him was the terrible sight of a bomb falling on a party of small children in his own neighbourhood in 1917. He was never the same man again after that.

The Second Test Match.

Ambition should be made of sterner stuff than the English cricketers at Lord's on Saturday. The Australians topped our first innings score with seven wickets in hand, and "the rest was silence"—or would have been if the sketch-writers had not had their salaries to earn and their columns to fill. The rumour that the M.C.C. is looking for a new Gibbon to write the history of the Decline and Fall of English Cricket is not confirmed, and the suggestion that England should be allowed fifteen men to the Australians' eleven, or three innings to their two, is repudiated. But we look like coming to that before the season is over.

OCELLUS.

The "U.K." CIGARETTE MACHINE.

Designed to make round, oval or Egyptian cigarettes with creased edges of any desired diameter or length with wide or narrow pasted laps, and by an interchange of parts also crimped cigarettes.

IN DAILY USE THROUGHOUT THE NEAR & MIDDLE EAST.

Embodies the following advantages:—

Works satisfactorily with any kind of tobacco. Apparatus supplied for printing cigarettes in one or two colours or one colour and bronze. Manufactures and tips cigarettes at one and the same time. Automatically sorts the cigarettes. Apparatus for pasting with starch or liquid paste as required. Fitted with device for stripping waste cigarettes or cigarette rods.

Also:—

THE "UNIVERSAL" CIGARETTE MACHINE.
THE "S.A." DOUBLE CIRCULAR KNIFE AND TOOL GRINDER.
"S.M." DOUBLE AUTOMATIC CIRCULAR KNIFE GRINDING MACHINE.
AUTOMATIC CIGARETTE-WASTE STRIPPING MACHINE.

United Cigarette Machine Co., Inc.
59, Holborn Viaduct,
LONDON, England.

(From Our Own Correspondents.)

EGYPT.

CAIRO, May 29.

A Repetition of 1882 in Alexandria.

Little did I imagine when I posted my letter last week, dealing with the disgraceful disturbances which had taken place in Cairo and Alexandria, that within twenty-four hours Alexandria would have become the scene of events rivalling those that took place in 1882 and brought about our occupation of the country. Exactly how the trouble arose is not clear, and the unravelling of the tangle of contradictory evidence must be left to the Court of Enquiry which has been appointed. The fact remains, however, that a row took place between Europeans and Egyptians in the low-class quarter of the "Hamamil" and that it developed into an anti-European outbreak, which it took the Egyptian police and Egyptian infantry between them until 3 a.m. to quell.

Next morning there was a recrudescence of trouble in the "Hamamil" and adjacent quarters, and at an early hour the foreign Consuls, who already in the previous week had protested, made a formal appeal to the authorities for protection for their nationals. A large crowd of Italians and Greeks followed them up, but on the way an altercation appears to have taken place between them and the natives, whereupon the anti-European outbreak spread right over the town, and not a single European who ventured into the streets escaped molestation.

According to trustworthy eye-witnesses the scenes were indescribable. The low-class Egyptians were worked up to a high state of fury, and performed most brutal acts, their excitement being undoubtedly increased by the reckless way in which some of the Europeans, mainly Greeks, fired off their revolvers; while looting and incendiarism went on at every opportunity, there being at one time over twenty fires in one small area. In other words, the whole of the low-class element, which is notoriously bad in Alexandria, ran amok, and the Egyptian police and the Egyptian troops were powerless to stem the wave of murder and rapine which threatened at any moment to sweep over the better-class European quarters. The authorities had indeed no alternative but to call for the assistance of the British troops; and the appearance of the latter, though their number was relatively small, was sufficient to stop the panic which had seized the European population and to cause the Egyptian mob to pause in its anti-European orgy.

Such in brief is the story of what took place in Alexandria on the morning of May 23. The local Press has been full of the most gruesome accounts of the excesses committed by the mob. In many cases they appear highly coloured; but when one recalls the authenticated story of what took place in 1882, and bears in mind the cruel behaviour of the natives in Upper Egypt to a party of our officers in March, 1919, one can quite credit that the low-class element of Alexandria perpetrated brutal excesses. Calm has now been restored in that city, which is fast assuming its normal appearance and where business is being resumed. But the British troops are still patrolling the streets, and it is unlikely that they will be withdrawn for some little time owing to the nervous state of the European communities.

Meanwhile, Zaghloul Pasha, to whose inflammatory incitement of the people and encouragement of unpeaceful demonstrations is due the state of excitement which rendered possible the Alexandria disasters, has issued an appeal to the people to desist from hostile acts towards foreigners even if the latter are the first aggressors; and has followed this by another document, disapproving of demonstrations. This pronouncement from the head of the "Wafd" comes, unfortunately, somewhat late, and would have served a far more useful

purpose if it had preceded instead of following events which he now recognises have caused most serious prejudice to the realisation of the country's aspirations.

Indeed, the Alexandria events, which are but the outcome of the campaign conducted by Zaghloul, for purely personal reasons, against the Cabinet during the past month, can have but one very definite result—viz., that all idea of entrusting the protection of the foreign communities to the Egyptians must now be abandoned and British garrisons will henceforward have permanently to be maintained—at any rate, in the centres where there are important colonies. Whatever the British community might acquiesce in—and a strong protest made by the British Union shows that they are alive to the dangers—the foreign colonies will certainly never agree to the removal of British troops who alone saved them last Monday from massacre.

The utter inability of the Egyptian police and troops to quell a serious disturbance has been definitely proved. With an example before their eyes of what might happen, if for some reason or another under the new régime trouble were to arise not merely between the low-class European and Egyptian elements in Alexandria, but between Egyptian factions themselves, the foreign colonies are absolutely justified in demanding not only that British troops shall be kept in Egypt, but that British control shall be maintained over the public security. Far-seeing and intelligent Egyptians realise that the Alexandria events have administered the death-blow to their hopes of internal autonomy, and they view with some misgiving the negotiations, which they admit have now been rendered exceedingly difficult.

Meanwhile there is no prospect of any reconciliation between Zaghloul Pasha and the Cabinet, and an eloquent appeal by the High Commissioner to all parties to compose their differences has fallen on deaf ears as far as Zaghloul Pasha is concerned; for barely had the appeal been issued in the Press than he replied with a statement in which, while acknowledging the hand of friendship which Great Britain extended through her representative, he declared that only the resignation of the Cabinet or the appointment by a National Assembly of a delegation in which the nation would have confidence could settle the existing differences. While the Alexandria events and the responsibility which it is now obvious Zaghloul must bear in respect of their effect on the future prospects of Egypt have caused more people to veer round towards the Cabinet, Zaghloul still maintains his hold on the less responsible and uneducated mass of the population; and since by means of his satellites he continues to exercise a coercive influence over the responsible element, I am afraid it will be some little while yet before the latter can feel itself free to come out in the open and, by giving the Cabinet the necessary public support, enable the official delegation to leave.

British Community's Protest.

The following is a copy of the protest (referred to above), which was handed to the High Commissioner by the British Union in Egypt. It is dated May 25, 1921:—

At a Council meeting of this Union the present position in Egypt was viewed with the gravest concern.

A trial of control by Egyptians has rightly been made, but

Leaders of the World's Office Equipment and Filing Systems.

THE Shannon LIMITED

Head Offices:—
ROPEMAKER ST., LONDON, E.C.

Succursale au Caire, EGYPT. TEL. 1966. P.O.B. 849

unfortunately has proved a failure. Now that it has been definitely proved that the Egyptian Police and Army are incapable of quelling serious disturbances, the British, as the Protecting Power for Europeans in this country are called upon to keep order with sufficient British forces, to be maintained, if necessary, at the expense of Egypt, and this in the performance of our duty to all the inhabitants, including Egyptians.

The assumption that during the past thirty-nine years the Egyptians had been trained to restrain their fanatical and anti-European tendencies as exhibited in 1882, has been proved up to the hilt to be a fallacy.

The members of the Council emphatically express the opinion that any paltering now with the responsibilities assumed by the British Government when they occupied the country can only lead to further excesses. The duty of the British Government is to foresee events and maintain order, not merely to restore it after it has been disturbed.

The time has passed for any further shirking of responsibilities and the inadequate safeguarding so-called British Empire interests only. Such a course cannot be followed under the peculiar conditions existing in Egypt, where all European Powers look to Great Britain as the protector of their nationals residing in this country.

There can be no question that Europeans, on what they considered a British guarantee, now realise that their confidence has been misplaced, and there is an ever-increasing distrust of Great Britain as trustee of their lives and property.

In plain words, the feeling among Europeans is that a continuation of the policy of non-interference, which would involve further risk to human life, which Great Britain is here to protect, would simply entail the stain of blood-guilt, for which the British nation would assuredly call to account those responsible for the deliberate choice of such an ethically indefensible policy.—(Signed) W. E. KINGSFORD, President.

CAIRO, June 5.

The King's Birthday.

The King's Birthday was celebrated in Cairo by a large reception which the High Commissioner and Lady Allenby gave to the British community and Diplomatic Corps at the Residency; while in Alexandria a similar reception was held by Consul-General and Mrs. Alban. A noteworthy event of the day was the visit paid by the Sultan to the Residency. His Highness called in state, and was received with full military honours, his visit lasting nearly an hour.

The Alexandria Riots.

During the past week Alexandria has been quiet, and life there has returned to normal. Egyptian police and troops have taken over the patrolling of the streets, but the control of the city is still in the hands of the British military authorities. The Court of Inquiry appointed by the High Commissioner has opened, and has heard a number of important witnesses, but as it is what is known as a "closed" Court very little information is available as to its progress. It is believed that the amount the Egyptian Government will have to pay for damages will be very heavy.

A great deal of discussion is going on in the local Press on the questions of how the troubles started and which element in Alexandria was responsible for the first act of violence on the Sunday evening, and again on the Monday morning; and unmistakable efforts are being made to fasten responsibility on the low-class foreign element, with the object of mitigating the effects of the troubles. While, however, the elucidation of these facts is very important they do not affect the principle at stake, which is the preservation of public order and the protection of the lives and property of foreigners.

The Egyptian Government is responsible like any other Government for public security and the protection of human lives and property. In the case in point it was not able to quell a disturbance which had broken out between certain elements of the population; it had to call in the assistance of British troops to prevent an

anti-European outbreak developing into a European massacre; and, such being the case, it is impossible to contemplate entrusting the maintenance of order and the protection of foreign lives and property to Egyptian forces until the Egyptian Government has proved its capacity in this respect. Very strong representations have been made on the subject to the High Commissioner by such important bodies as the British Union, the British Chamber of Commerce, the French Chamber of Commerce, the Italian Colonial Federation, the Mixed Court Bar, etc. There is little doubt from the fact that the Italian and Greek Governments have instructed their Diplomatic Agents to demand that adequate steps shall be taken in this respect that whatever their sympathies may hitherto have been towards the realisation of the Egyptian aspirations the foreign colonies *in toto* will stoutly oppose any withdrawal of British troops, and their Governments will support them.

The Political Situation.

Meanwhile the local political situation remains outwardly unchanged. There are, however, signs that the Cabinet is obtaining more and more support; for deputations comprising all the leading notables have come during the past week from such important provinces as Assiut and Gharbia in order to assure the Cabinet of its support, and there are clear indications that those of the responsible and intellectual classes who for considerations of sentiment or friendship supported Zaghloul have been frightened by the extremes to which he has gone, and are throwing in their lot with the Cabinet.

The cases of the nine officials who were suspended for active participation, against the orders of the Cabinet, in one of the tea parties organised in favour of Zaghloul Pasha are now being dealt with. It is in a way regrettable that the Cabinet did not constitute one Council of Discipline to deal with all the nine instead of leaving each man to be dealt with by the ordinary Council of Discipline constituted in his own Administration, for it looks very much as if contradictory verdicts will be obtained. Thus, a judge of the Native Court has been acquitted by the Native Court of Appeal sitting as a Council of Discipline, while a lecturer of the School of Law accused of exactly the same offence has been condemned by his Ministerial Court of Discipline to a fine of one month's pay. We shall probably end by having as glaring an inequality of treatment by the various Councils of Discipline as has taken place in the past when men of different nationality accused of the same crime have been dealt with by their respective Consular Courts. One of the remaining seven officials has now been dismissed by order of the Council of Ministers because while awaiting trial by his Council of Discipline he deliberately aggravated his offence by delivering a speech violently attacking the Cabinet at a banquet which was given in honour of the nine suspended officials by their sympathisers.

YUGOSLAVIA.

ZAGREB, June 7.

Ministerial Differences.

The past week has been full of political interest. There has been a series of Ministerial resignations and secessions from the different parties. First, Dr. Velizar Yankovitch, Minister of Communications, resigned, and, in spite of all M. Pashitch's persuasive efforts, declined to reconsider his decision. Dr. Yankovitch is a prominent Radical, a connection of M. Pashitch, and an astute politician. He was Minister of Agriculture and Commerce in the Salonika Government, and has held several portfolios since then, including Finance. Two things occasioned his resignation: one a personal matter, which led to a question in the House, and the other a thing which to us seems trifling—that is, the inscription of the names of railway stations in Cyrillic as well as in Latin letters. Now it is useless to put up Cyrillic in Slovenia, as at Liubliana, Celje, and Maribor, where nobody can read it and it is quite unnecessary, and it was resented as a manifestation of the "Greater Serbia" policy. Fortunately, no attempt was made to do it in the Bjelovar, Krizevce, and Varazhdin districts of Croatia, for these are the stronghold of Raditch's party, and Cyrillic

inscriptions would certainly have led to disturbances. The authorities doubtless remember the riots when the Hungarians put up notices in Magyar in purely Croat districts some years ago, and the irritated people raided the stations and pulled the offending notices down. Besides, what is sauce for the goose is sauce for the gander, and there are no Latin inscriptions in Serbia, except on the international line Belgrade-Nish, and there they are not in the Latin spelling of the Slav names, but in French.

Moslem Ministers Withdraw.

But this resignation is a personal matter. More serious was the withdrawal of Dr. Spaho and Dr. Karakehmedovitch, the two Mohammedan Ministers, who complained that M. Pashitch was not keeping his bargain with their party. This meant a serious reduction of the not-overwhelming Government majority, and M. Pashitch exerted every effort to satisfy the "Turks," as the Orthodox Serbs always call their Mohammedan fellow-Nationals. At length, they agreed to stay in the Cabinet provided they received 60 million dinars compensation for their losses under the agrarian reform, and in a very short period; that they have a Mohammedan head of their department in the Ministry of Religions, and one or two smaller matters of detail. These proposals, which in themselves seem not unreasonable, M. Pashitch agreed to. The principle of enforced purchase of land has always been recognised by the Serbians, and years ago, when they dispossessed their enemy, genuine Turkish landowners, they compensated them; therefore, it is but reasonable that they should do at least as much for their Mohammedan fellow-Serbs.

But the fact has roused a storm of protest among the Serbs of the Banat; for the Government cannot discriminate between races, and, consequently, a number of Democrats from the Voivodina have withdrawn from the Democrat Club in protest, as the Democrats support the Radicals in the Coalition, but these members are pledged to a policy of confiscation from the frankly enemy Magyar and German landowners of their district. A number of Radicals in Bosnia have also withdrawn from the Radical Club as a protest against the concession to their Mohammedan rivals.

There is accordingly a serious crisis on the knotty question of agrarian reform. This would have been overcome without undue difficulty had the question arisen a few years ago, but to-day there is so strong a democratic and socialistic spirit abroad that any concession to the landed class is hotly resented. The matter will be a severe test on even M. Pashitch's experienced and elastic statesmanship.

Another Resignation.

When the resignation of the Mohammedan Ministers was read to the Radical Club, there was an angry scene, and the members accused the Minister of Agrarian Reform, M. Uzunovitch, of being the cause, so he promptly resigned. The consequence is that the Coalition had to face the resignation of four Ministers in a few days. M. Pashitch's diplomacy and patience eventually prevailed on three of them to withdraw their resignations, but Dr. Yankovitch refused to yield, for his action was based rather on personal than on political grounds. It is a very critical moment for the Government to be in difficulties. The Constitution, although accepted in principal, is not yet out of the melting-pot. The question of agrarian reform bristles with difficulties, and the rift between the two schools of thought, the Centralists and the Federalists, is constantly growing wider. The latter have strong support in Croatia especially, in the Narodny Club, in Raditch's party, in the Slovene Clericals; and the large Yugoslav Colony in the United States is exerting itself to persuade the American Government to bring pressure upon Belgrade in favour of the federal system. Besides that, it is believed that European Powers are interested, and would welcome a system which would render possible a Danubian Confederation which would at the same time settle the Hungarian problem, and finally exclude any possibility of either the return of the Hapsburgs, or the union of Austria with Germany. Then, relations with Italy are not finally cleared up. Dr. Ninchitch has resigned the chairmanship of the Yugoslav delegation

for negotiating the commercial Treaty with Italy, and public opinion is strongly stirred here on the question of the Gulf of Barosh, a legacy on the unhappy problem of Fiume.

It is earnestly to be hoped that the Government will overcome its difficulties, which are, in fact, enough to test the quality of the most experienced politician, especially as all branches of the Yugoslav people are very downright and positive, knowing what they want and intending to get it. As they hate compromise, and usually get what they want in the long run, it will be interesting to see how they work it out when they are divided among themselves.

Distinguished Visitors.

Fortunately, there are more pleasant and concrete things to attract the attention. The visit of M. Dimitroff, the Bulgarian Minister, and his interview with M. Pashitch, is a very promising sign, and we may now look for happier relations between the two countries. The Serbs, of course, cannot easily forget what the Bulgars did during the occupation, but the Croats and Slovenes are more independent, and the Czechs are said to be exercising their friendly offices as mediators. It is noteworthy that M. Dimitroff visited Prague before calling at Belgrade. What transpired at the highly interesting interview between M. Dimitroff and M. Pashitch is not known, but the Bulgar sent a very cordial telegram to Belgrade from the frontier. It should be remembered that M. Pashitch is a native of the Timok district, near the Bulgarian frontier, and that his mother-patois, as spoken in that district, is a step on the way of transition to Bulgarian. It is not so many years since his enemies dubbed him a Bugarash, that is, a pro-Bulgar.

Another interesting visitor is M. Také Jonescu, who arrived with his staff in a special train, and has a very warm welcome at Belgrade. Great importance is naturally attached to this visit, and in well-informed circles it is believed that its object is the signature of a military convention between Roumania and Yugoslavia, with the object of strengthening the Little Entente and guaranteeing the execution of the Peace Treaties.

Welcome Gold.

Another pleasant incident has been the arrival in Belgrade and deposition in the vaults of the National Bank of ten millions of gold krana, being the Yugoslav share in the liquidation of the Austro-Hungarian Bank. Besides this, a commission has proceeded to Paris to receive six million gold marks as an instalment of the war indemnity due to Serbia.

GREECE.

ATHENS, May 29.

The Situation in Asia Minor.

"There is nothing new to report." This is how General Papoulas' *communiqués* have been worded for over six weeks now. The papers have ceased publishing accounts and descriptions of battles, and are instead devoting much space to the Anglo-French difference with regard to the Silesian question. There is no doubt, however, that the Greeks are feverishly preparing for the new offensive. Transports full of troops have been leaving Piræus and other ports for Smyrna almost daily, and, in spite of the secrecy maintained, it is known that the preparations are practically at an end now, and that the new offensive will be launched at a very early date.

The Turks have also been very quiet of late. From all accounts they, too, are making hasty preparations to defend their positions against the forthcoming Greek

onslaught. According to all indications, the idea so much discussed in the Turkish Press of Constantinople of a Kemalist offensive has been abandoned. On the other hand, Turkish irregular bands have been extremely active of late, particularly in the part of Thrace still belonging to Turkey. Armed forces are again reported to be overrunning the country and terrorising the Christian populations, and pillage of Greek villages is of daily occurrence. But the activities of the Kemalists are not confined to Thrace and Asia Minor. In the island of Mitylene the Greek authorities have arrested a number of Turks who had been putting into circulation Angora newspapers. Documents of an incriminating nature were found in their possession, as well as a number of rifles. It was also established that collections in aid of Mustapha Kemal were made amongst the Moslem population of the island.

The Late King's Child.

The christening of the daughter of the late King Alexander and his wife, Madame Aspasia Manos, took place last week at the Palace Chapel of St. Andrew. In addition to King Constantine, who acted as the child's godfather, Queen Sophie, the Dowager Queen Olga, and the young Princesses Irene and Catharine were present at the ceremony. The little girl was given the name of Alexandra. After the service Madame Manos returned with her daughter in a Royal carriage to her residence in Boulevard King Constantine, where she was joined shortly afterwards by the Queen. Queen Sophie appears to be very fond of her unfortunate son'smorganatic wife, and spends many hours in her company.

The British Soldiers Interred at Imbros.

On the occasion of the exhumation of the British soldiers who had been buried at the island of Imbros during the Great War, a Te Deum was celebrated by the Metropolitan of the island in the presence of the local authorities. A detachment of British troops rendered the military honours. At the conclusion of the ceremony the Metropolitan delivered a speech eulogising the exemplary behaviour of the British troops in the Near East and the excellent work they had done during the war.

General News.

Colonel Makkas, who held the post of Quartermaster-General in September and October last year under the Venizelist régime, has been arrested on a charge of fraudulently appropriating 2 million drachmae in connection with an order placed abroad by the Greek Government for flour.

The restaurant proprietors in Athens have intimated to the Prefect of Police that they have decided to reduce the prices of meals.

The Minister of Public Assistance has opened a credit of 1 million drachmae in favour of the Greek refugees from the Caucasus now in Salonika.

ROUMANIA.

May 23 (10).

"Independence Day."

The Roumanian National Fête in commemoration of the War of Independence and the proclamation of the Kingdom was duly celebrated with all the customary pomp and splendour. The religious service at the Cathedral was conducted by the Primate of the Roumanian Orthodox Church in the presence of the King, Queen, and all the Royal Family, the Diplomatic Corps, all members of the Cabinet, many ecclesiastical, military, and civil high dignitaries, Members of Parliament, etc. General Badoglio, the envoy of the King of Italy, was also present with his suite.

This ceremony was followed by the traditional parade before the King of all troops garrisoned in Bucharest, who were heartily cheered by an enthusiastic crowd. The streets were beflagged and profusely decorated with the national colours. Military bands played in different parts of the town, and the principal streets were beautifully illuminated in the evening.

An Italian Mission.

General Badoglio, chief of the Italian General Staff, has arrived here, as mentioned above, accompanied by a military suite. This distinguished officer has been entrusted by his

Sovereign with the mission of conferring on the King and Queen the decoration for Military Valour, and on the towns of Bucharest, Galatz, and Jassy the Cross of War. At the same time he will confer other medals on distinguished officers of the Roumanian Army. His visit is to be considered as a demonstration of sympathy on the part of the King of Italy and his people for the Roumanian Sovereign and nation.

The General is the guest of the King at the Royal Palace. The presentation of the medal to the King and Queen took place at the Palace, and that for the city of Bucharest was presented at Carol Park. In both cases the ceremony was very impressive and imposing. A State banquet was given by the King at the palace in honour of the mission, and His Majesty has conferred on General Badoglio the Order of the Roumanian Crown and the Order of Michael the Brave (II. Class). The members of the suite have also been decorated.

BUCHAREST, May 25.

Political.

Contrary to anticipation, the Bill for the financial reforms has been brought before Parliament for immediate discussion; but in order to expedite the transaction of Parliamentary business, it has been decided that the first three days of the week shall be devoted to the discussion of the Agrarian Reform and the other three to the Financial and Fiscal Bill. There will be two supplementary night-sittings, reserved exclusively for the communications, questions, and interpellations.

Replying to an interpellation, the Minister of the Interior justified the imprisonment of the Communists, stating that he possesses evidence of their conspiracy against the safety of the State, and that this will be proved when the case comes before the Courts.

In connection with the frauds which are alleged to have been perpetrated in the Supplies Department, the Minister of Finance declared that a rigorous inquiry is being carried on under his own supervision, and that any offender—however high his position—will be dealt with with the fullest severity of the law.

The Senate had this week under discussion the professional Syndicates Bill. M. Grigorovici, from the Bukovina, and a moderate Socialist and distinguished

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

⅜" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1" to 3" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

CHRISTIANIA, STOCKHOLM, TUNIS.

Parliamentarian, declared that he would not propose any amendments, as he is convinced that the Government is determined to pass the Bill without any modification. M. Trancu Jasi, the Minister for Labour, replied that M. Grigorovici is mistaken, as he (the Minister) accepted in the Lower House all the amendments, which complete the ideas aimed at in the text. The law was passed with 75 votes to 5.

The Socialist leaders who a few months ago were sentenced to five years' penal servitude for an attempt to provoke a general strike have now had their sentences reduced to only one year's imprisonment. Amongst them there were some Members of Parliament, who, in consequence of undergoing imprisonment, have lost their seats.

BULGARIA.

SOFIA, June 4.

The Government's Position.

On June 1 M. Dimitroff, Minister of the Interior, returned from his visits to Prague and Belgrade. At the former place he attended the "Green," or "Peasant," International, and came away highly impressed with the progress this movement is making. He only stopped twenty-four hours at Belgrade, on his way back to Sofia, but on the morning of the 30th had an interview, lasting approximately an hour, with the Yugoslav Prime Minister, M. Pashitch. The conversation between the two Ministers was of a general character. M. Dimitroff was at pains to impress on the Yugoslav Premier the sincerity of the Bulgarian Government regarding its relations with the neighbouring countries, and especially with Yugoslavia. M. Pashitch, who appears to have taken up a somewhat patronising tone throughout, whilst holding out hopes of a *rapprochement* in the not too distant future, and admitting that it was not so much with the present Government that Yugoslavia found fault, insisted on the necessity for stern measures being taken against the continuance of any form of *Komitaji* activity on the frontier. It is possible, however, that the interview will do good in bringing the two countries into touch. In the end, two Slav nations such as Yugoslavia and Bulgaria will surely find it advisable in their mutual interests to form at least a defensive alliance.

It is now announced that M. Dimitroff will not proceed to Washington, but that the King and M. Stambolisky will visit the United States during the coming autumn.

Whilst interviewing the Prime Minister two days ago I asked if he would make a statement regarding the future policy of the Government, and got the firm reply: "Our policy is loyally to carry out the terms of the Peace Treaty, and at all costs keep the peace in the Balkans in so far as we are concerned." If only it were possible to give as much praise to the internal policy of the Government as to the external policy, it would, indeed, be a flattering portrait of the Agrarians that would be presented; but—and it is a very big but—the internal situation, economically and financially, is, as a result of the measures either passed or proposed to be passed by the Sobranje, becoming worse every day.

The New Measures.

The new laws are numerous, but it will be sufficient here to cast a glance at one or two of the more important. The proposals for the taxation on capital are so framed that once the law is put into execution it will probably greatly curtail, if not entirely put an end to, many banks, limited companies, insurance associations, and the like.

The new internal loan of 6 per cent. is, on the face of

it, a farce, as money is so scarce that no one would dream of investing it in this fashion; but a clause which specifies that anyone liable to capital tax will be exempted from the aforesaid tax, up to the amount they have invested in the 6 per cent. loan, may prove a considerable asset.

Regarding the much-advised "*obligation des gages*" and the agricultural bank, I shall have more to say in my next letter. It is generally understood amongst competent authorities here that the Reparations Commission, whilst respecting all the rights and wishes of the Government regarding financial measures, will strenuously oppose any legislation which has as its aim the raising of a forced loan in Bulgaria, and there for the moment we may leave the situation.

Life in Sofia.

Sofia, which usually possesses an excellent climate, has of late come near to losing its reputation, for during May and the first few days of this month we have had nothing but heavy rain alternating with thunder and hail storms.

To a casual observer the town appears very little changed from what it was a few years ago, but in reality a great many changes are gradually taking place. Sofia is spreading itself without realising the fact, and the amount of building that is going on in the outskirts of the town is not inconsiderable. In the matter of amusements it still remains one of the most staid and respectable capitals in Europe, and for a foreigner who stays at an hotel for a few days on his way through to Constantinople, the town, indeed, appears a dreary place. Hotel accommodation is difficult to find, all the leading hotels having a good proportion of their rooms permanently occupied by different foreigners.

Communication with Paris and London is now beginning to approach the pre-war system, and from June 1 there is a daily Simplon express. Unfortunately this train runs by way of Belgrade, Trieste, and Milan, and thus adds on twenty-four hours to a journey which was fatiguing enough in pre-war times when the route lay through Vienna.

ASIA MINOR.

SMYRNA, May 26.

Last evening an audacious burglary was perpetrated at the British Consulate-General here, the present residence of Sir Harry H. Lamb, K.C.M.G., representative of the British High Commissioner. The thieves apparently waited till the gardener left, about dusk, and entered the dining-room from the back garden and carried off a quantity of table linen and silver. Fortunately, the intruders were evidently disturbed, and they left behind them valuable cutlery which was also on the table. This is the first time a robbery has taken place in a Consulate in Smyrna.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

GREAT BRITAIN AND THE NEAR EAST.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I wonder if Lord Curzon ever finds time to read *THE NEAR EAST*? If not, I trust that it is someone's job at the Foreign Office to make press cuttings weekly for his lordship's information. Your notes which have appeared from time to time always contain sound advice, and your leader on the Angora problem this last week leaves little to be desired. You have also given us in the same issue extracts from an excellent article which has appeared in the *New Statesman* on the recent outbreak in Egypt. Mr. Lloyd George may perhaps be forgiven for his failure to understand the Turks or Mohammedans in general, but Lord Curzon has made the Near and Middle East a lifelong study. With an expert at the Foreign Office, it is a mystery to me why the whole question has been so mishandled. Look where you will—Egypt, Palestine, Persia, Mesopotamia and Turkey—you find the same failure to gauge the Nationalist movement. But the greatest blunder of all was, of course, the Mandate to the Greeks to suppress the Turkish Nationalists in Asia Minor. When, too, this mistake was recognised and the Turks and Greeks were summoned to a conference in London, what could have been feebler than allowing the Greeks to attack the Turks again pending the decision of the Powers as to what extent the Turkish Treaty requires modification? With our fleet at Smyrna cutting the Greek line of communication we might have dictated any terms we thought fit; the Grecian Government was powerless to act. Instead of orders, we contented ourselves with merely giving advice, and M. Venizelos is once more busy in London! It is heartbreaking, too, when we think that, notwithstanding Italy's action in Tripoli in 1911, Italy is now regarded by the Turks as their best and only friend in Europe and England as their worst enemy.—I am, etc.,

COLES PASHA.

June 11, 1921.

THE MEETING OF THE TURKISH CONGRESS AT LAUSANNE.

The third annual Congress of the Turks took place recently at Lausanne. The Congress discussed the present situation in Turkey, and decided to send telegrams to several statesmen. One was sent to Mr. Lloyd George, expressing the hope that the Turkish people, which has no claims inimical to British interests, will have his support in its struggle for liberty and existence. Among other telegrams despatched was one congratulating the Christian Turks of Anatolia upon the foundation of an independent national Turkish church.

During three days' sittings the Congress discussed certain social questions and reforms. It was decided to work for the complete modernisation of the country, for the complete emancipation of Turkish Woman and for raising her social level, and for the complete adaptation of modern institutions to the Turkish State. It was further decided to endeavour to secure the decentralisation of administration in Turkey and to begin a campaign to induce the Turkish youth to come in greater numbers to the universities of the West.

GALLANTRY IN IRAK.

The King has approved of the following reward to the under-mentioned officer, in recognition of gallantry and devotion to duty in Mesopotamia:—

BAR TO THE DISTINGUISHED FLYING CROSS:—Flying Officer Dudley Lloyd Evans, M.C., D.F.C., R.A.F. (Distinguished Flying Cross gazetted December 3, 1918).—For gallantry, skill, and devotion to duty on November 1, 1920, while accompanying another machine on reconnaissance. Owing to engine trouble the second machine, with pilot and observer, had to make a forced landing in hostile country. A party of mounted Arabs at once started firing at the observer, who was dismantling a Lewis gun. On seeing this, Flying Officer Evans landed at great peril to himself, took both officers on his already loaded machine, and, getting off with much difficulty, returned to Headquarters.

SCHOOLS & TUTORS.

Messrs. TRUMAN & KNIGHTLEY, Ltd., are in close touch with all the leading educational establishments in England for boys and girls, and are able to advise parents where to find early vacancies. Their knowledge of these establishments, for the majority of which they supply the teaching staffs, extends over 20 years and they are thus in a position to give information and advice difficult to obtain elsewhere.

An explanatory booklet "On the choice of a School" will be sent post free on application.

TRUMAN & KNIGHTLEY, LTD.,

Phone: Mayfair 1063-1064.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

June 6.—Mr. Harmsworth informed Sir S. Hoare that the Hungarian Peace Treaty does not come into force until the ratifications of three of the principal Allied and Associated Powers and of Hungary have been deposited. So far, only Great Britain's ratification and those of Italy and Hungary have been sent to Paris and are ready for deposit. He did not know when the French Government was expected to ratify the Treaty.

Mr. Wood informed Colonel Wedgwood that the Commission of Inquiry into the Jaffa riots consists of Sir Thomas Haycraft (the Chief Justice of Palestine), who is presiding over the Court of Inquiry; Mr. Luke, Assistant District Governor of Jerusalem; and Mr. Stubbs, of the Legal Department.

June 7.—In reply to a question by Mr. Mosley, Lieut.-Colonel Stanley stated that the number of British and Indian troops now employed in Constantinople, Egypt, Palestine, and Mesopotamia are as follows:—Constantinople, British 5,200, Indian 5,500; Egypt, British 13,800, Indian 3,200; Palestine, British 4,400, Indian 10,800; Mesopotamia (including force withdrawn from North-West Persia), British 10,000, Indian 50,000.

Mr. Wood stated in reply to a question by Earl Winterton that some of the grievances of the white staff in all departments of the Mesopotamian railways as regards their pay, ration allowances, housing accommodation, etc., had been redressed. He fully appreciated the importance of dealing expeditiously with these questions, and he was asking the High Commissioner whether some machinery could not be set up for the adjustment of grievances satisfactory both to the Administration and to the staff.

Mr. Wood further informed Earl Winterton that he would again look into the question of the dissatisfaction of white railway workers in Mesopotamia owing to the fact that the value of the rupee in sterling was now worth so much less than it was in the spring of 1920. A pledge had been given by the High Commissioner to review the whole question within two or three months. That pledge was given—he thought—on February 10, and would be adhered to.

June 8.—In reply to Lieut.-Commander Kenworthy, Mr. Harmsworth stated that the attention of the British Government had been called to reports of excesses committed by Greeks in the district of Yalova, on the Sea of Marmora, of which Moslems were the victims. An Allied Commission of Inquiry proceeded to that district in May, and its report substantiates the fact that grave excesses occurred. Representations based on the report have been made to the Hellenic Government.

June 9.—Mr. Harmsworth informed Sir J. D. Rees that the late Persian Government informed the British Government's Minister at Teheran on May 3 that the Persian Transport Company's road concession had been cancelled owing to the company's failure to comply with its terms and to the expiration of the agreement. As the company deny these allegations the matter is still under discussion. No other British concessions have been cancelled by the Persian Government.

Mr. Harmsworth stated in reply to Mr. A. Herbert that he had no precise information beyond that he had already given with regard to the Albanian families living within the frontiers of 1913 who had been forcibly deported to Nish by the Serbians.

Mr. Harmsworth informed Mr. Swan that the Egyptian Government on taking office had expressed the conviction that under existing circumstances it would soon be possible to withdraw martial law. Unfortunately, these hopes had not materialised, and recent events that had taken place plainly indicated that the time for the withdrawal of martial law had not yet arrived. Martial law in Egypt was imposed by the British authorities.

In reply to Mr. Ormsby Gore, Mr. Harmsworth stated that he certainly thought that if there had not been martial law and British troops in Egypt a much larger proportion of the Greek and Italian population of Alexandria would have been massacred.

Mr. Chamberlain, in reply to Mr. E. Harmsworth, stated that the Commander-in-Chief of the Mediterranean Station, Admiral Sir John de Robeck, in the Iron Duke, with the Ajax, Pegasus, Surprise, Stuart, and some destroyers, was due at Constantinople on June 15 for about a month's stay. This is merely in accordance with the programme of a cruise which included ports on Egyptian and Palestine coasts, Cyprus, and Smyrna. It is possible that the date of arrival at Constantinople may need amendment owing to the fact of a visit being paid to Rhodes and Samos. The programme was arranged towards the end of April last. In regard to the policy of the British Government as to whether they intend to support King Constantine of Greece against the Turkish Nationalists, the question was under consideration.

Mr. Chamberlain, replying to Mr. A. Herbert, stated that the British Government are not convinced of the advisability of publishing at present the Report of the International Commission which has been investigating Greek atrocities on the Turkish population in the Yalova district, but intend to consult the Governments who, with them, were represented on the Commission.

Mr. Harmsworth, in reply to Mr. Lunn, stated that he had no information with regard to a delegation from Assiut to Lord Allenby, but that the British Government's High Commissioner for Egypt recently received a resolution signed by some 20,000 inhabitants of Assiut Province declaring their confidence in the present Ministry to carry on negotiations with Great Britain.

NEAR EAST BOOKSHELF.

- I.—"STUDIES IN ISLAMIC MYSTICISM." By Reynold A. Nicholson. Litt.D., LL.D. Lecturer in Persian in the University of Cambridge. (The University Press, 24s. net.)
- II.—"A SHORT HISTORY OF ANTIOCH." By E. S. Bouchier, M.A. (Oxford. Basil Blackwell, 12s. net.)

I.—A PERSIAN SAINT.

Islam is stirred to its depths by a reform movement known as Sufism, which took root in Persia during the ninth century of our era. It has many analogies with the later developments undergone by Christianity. In both cases we find a denial of constituted authority and a subjective attitude towards revelation as opposed to acceptance of iron-bound tradition. Sufism presupposes profound culture and an abnormal degree of the religious instinct. He who possesses both experiences a cataclysmic "conversion." The scales fall from his eyes; he becomes penetrated with a sense of the unity of all created things, and longs for absorption in the universal godhead. The first steps upwards are detachment from worldly affairs and utter self-abnegation. The convert abandons friends and fortune for the sordid life of a hermit or homeless wanderer. At length his storm-tossed soul finds peace in the knowledge that he has attained to perfection. A higher stage is reached by the elect few. They realise the sterility of quietism, and feel that true religion has a positive side. The perfect mystic abides in God, and yet "goes out towards all created things in a spirit of love, in virtues, and in works of righteousness." Under the stimulus of social duty he seeks the busy haunts of men, and strives to impart to others that peace which he enjoys by dint of self-abnegation. Although orthodox Islam is more tolerant of dissent than any Christian Church, yet Sufis cannot abjure their fathers' creed without losing prestige and influence. Hence their persistent efforts to prove that they are interpreters of the Prophet's esoteric teachings. The attempt is fraught with failure, Mohammedanism being based on authority and tradition, while Sufism asserts the right of private judgment, and the phases it assumes vary with the adept's idiosyncrasy. Moreover, the pantheism immanent in the Sufi's belief cannot be brought into harmony with the Islamic conception of free will. If God be omnipresent and omnipotent, it follows that every human action is subject to His control. Sufism, therefore, ignores the dogma of future reward and punishment without overtly opposing it.

This attitude towards revealed religion is admirably explained in a work on "Islamic Mysticism" by Dr. Reynold A. Nicholson, who lectures on Persian in the Cambridge University. His study of a highly esoteric subject begins with a biography of the greatest of ancient mystics, Abu Sa'id by name, who lived in the tenth and eleventh centuries of our era. It ranks with the "Confessions of St. Augustine" as a psychological revelation of the emotional and intellectual stages traversed by a man of genius in his eager quest of truth. The quatrains which bear Abu Sa'id's name resemble those commonly attributed to the more famous Omar Khayyam, in that it is an anthology of poems produced at widely different periods. Dr. Nicholson, indeed, doubts whether any of them were really the work of his Islamic saint. He is less sceptical with regard to certain apothegms which have been handed down to us by a long succession of Abu Sa'id's disciples. In one of them Dr. Nicholson has discovered the origin of Sir William Jones's well-known "Lines to an Infant Newly-born":—

On parent's knees a naked, new-born child,
Weeping thou sat'st while all around thee smiled;
So live, that sinking in thy long last sleep,
Calm thou mayst smile while all around thee weep."

This is a rhymed version of Abu Sa'id's wise saying:—"Thou wast born weeping, whilst thy folk smiled. Endeavour to die smiling while thy folk weep."

In chapter two Dr. Nicholson expounds the cardinal doctrines of Sufism, and the rest of his book is devoted to the poetry of an Arabian and a Persian mystic. It is worthy of study by all who seek to follow the later phases of Mohammedanism.

F. H. S.

II.—ANTIOCH.

Although the rise and fall of Antioch bears much resemblance to that of many vanished cities of the East, its history contains chapters of peculiar interest, one, of course, relating to its distinction as a cradle of Christianity, with which its annals were so intimately associated.

It was founded in 300 B.C. by Seleucus Nicator, in honour of his father Antiochus, a distinguished officer of Philip II. of Macedon. The site was but a few miles from Daphné, where Alexander, charmed by its beauty, erected a temple to Zeus. It became the capital of the Seleucid Syrian dominion, the strongest of those formed out of Alexander's Empire, and the seat of its civil government. It was on the left bank of the Orontes in a fertile valley, about 20 miles from the sea. Its rise was rapid. Seleucus and his successors carried out the policy of Alexander, which aimed at Hellenizing the Asiatic dominions. The city was soon adorned with splendid buildings, with temples, theatres, baths, fountains, colonnades, and garden villas; while vineyards, orchards, gardens and olive groves extended westward to Daphné, a name always associated closely with this Antioch: for Seleucus founded at least 16 towns of that name. New quarters were soon added. The city became a rich centre of trade with China, India, Arabia, and all parts of the East. In its mixed population of Macedonian warriors, Greek settlers and Orientals, the Jews had equal rights with the Greeks. The city walls, built by Antiochus Epiphanes, were a conspicuous feature, and, with the later Byzantine fortifications, withstood the historic sieges of the Middle Ages. The people became notorious for their luxury and love of pleasure, holding festivals throughout the year. The language chiefly spoken was Greek, Aramaic being little used. The city long enjoyed autonomy. In 83 B.C. it fell before the Armenian Tigranes. When, in 64 B.C. Syria became a Roman province, the link with Greece was almost broken. Immunity from taxes was conferred by Pompey and Caesar. Under the Emperors many marks of favour were bestowed; but the people were fickle and turbulent, and at times incurred punishment for seditious outbreaks. Under Septimius Severus Antioch was degraded to the rank of a village. Under Diocletian, though only the capital of Coele-Syria, it was still regarded as the metropolis of the East. It remained always a place of great commercial importance, North Syria being the resort of European merchants. The development of Christianity coincided with a period of intellectual activity, especially as Alexandria and Palmyra. A university system provided schools of philosophy, logic, rhetoric and theology, while painting, sculpture and music were cultivated. In 540 the city was destroyed by Chosroes, and it was rebuilt by Justinian, who named it Theopolis. In 638 Antioch fell to the Arabs, and Islam superseded Christianity. The Romans were expelled from Syria, and Damascus became the capital. In 969 it was recovered for Byzantium, a Count of the East (Comes Orientis) supervising the Asian provinces. In 1081 the Seljuk Turks occupied the city, and held it until the advent of the Crusaders, when we see Antioch under Norman-Italian princes, supported by an army drawn from all parts of Europe. "If the civilisation of Syria was hybrid under the Seleucids and Romans, the contrasts presented by the ensuing centuries are still more startling." The city suffered much from earthquakes, in one of which 250,000 are said to have perished. Mr. Bouchier has given us very interesting glimpses of "the life, manners, and interests of this great centre of population." The sketch ends in 1268, when it was captured and sacked by the Egyptian Sultan Bibars. Henceforth it became little more than a village. In 1517 it passed to the Ottoman Turks.

An appendix on the famous mint of Antioch is contributed by the Rev. E. A. Sydenham. Excavations should perhaps some day yield interesting results.

According to reports from Baku, twenty Moslem working men have been shot by the Bolsheviks for agitating against the Soviet Government.

HINDUSTANI SELF - TAUGHT AND GRAMMAR.

By CAPTAIN C. A. THIMM.

Hindustani Text Revised by J. F. BLUMHARDT, M.A., M.R.A.S.

Sold by all BOOKSELLERS. Write for Prospectus and Catalogue No. 25.

London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.4.

SECOND EDITION.

THOROUGHLY REVISED AND ENLARGED.

A History of Persia

By Brigadier-General Sir PERCY SYKES, K.C.I.E., C.B., C.M.G., Second Edition, thoroughly Revised and Enlarged. With 7 maps and 193 illustrations. Two vols. 8vo. 23 10s. net.

"* Since the first edition of this work was published much has happened in Persia, and the stirring events of the Great War are now recorded. The history is thereby brought up to date, but the entire text of the original book has also been thoroughly revised in the light of the latest knowledge."

MACMILLAN & CO., LTD., LONDON, W.C.2.

PERSONAL AND GENERAL.

TO-DAY.

June 16 (New Style).
June 3 (Old Style).
Shawwal 10, 1339, of the Moslem Calendar.
Sivan 10, 5681, of the Jewish Calendar.

Lord and Lady Inchcape returned to London from Paris last week.

Lord Hardinge of Penshurst gave a small dance at the British Embassy in Paris on June 8.

The Duke of York and the Aga Khan lunched on June 9 with Lady Cunard at 5, Carlton House Terrace.

Mr. Lewis Haslam, M.P., Mrs. Haslam, and Miss Haslam have arrived at 8, Wilton Crescent, S.W., from India.

During the night of June 5 a son and heir was born to the Ameer of Afghanistan. There have been great rejoicings in Kabul.

M. Nicolas Misu, the newly-appointed Secretary to the Roumanian Legation at Rome, left London last week for Italy to take up his post.

Yesterday, at the anniversary meeting of the Central Asian Society, Sir Michael O'Dwyer lectured on "India's Influence on her Mohammedan Neighbours."

The Crown Prince of Japan is expected in Bucharest very shortly, the visit being in the nature of a return visit for that which Prince Carol paid to Japan last year.

The Princess Kamala Devi Gaekwar of Baroda will hold a reception of Indian ladies at her residence, 15, Cleveland Gardens, Lancaster Gate, on June 23, at half-past three o'clock.

On June 14, under the auspices of the Royal Asiatic Society, Dr. Robert P. Blake (of Harvard University) read a paper entitled: "Sources of the History of Georgian Ecclesiastical Literature."

Lady Willingdon has arrived at 5, Lygon Place, Grosvenor Gardens, S.W. (Telephone, Victoria 1851), from Government House, Madras, India. Lady Willingdon will be returning to Madras at the end of July.

A marriage has been arranged, and will shortly take place, between Captain A. E. Freeland, Surveys of Egypt, and Maud, youngest daughter of Thos. L. Plunkett, D.L., Portmarnock House, Co. Dublin.

We regret to learn from our Zagreb Correspondent that the health of King Peter is giving rise to some anxiety, and that the Prince Regent has been recalled to Yugoslavia. As we go to press it is announced that His Majesty is slightly better.

The Central India Horse Regimental Dinner will be held at 8.15 p.m. on Friday, June 24, at the Hotel Cecil. Application to attend should be sent as soon as possible to Air-Commodore D. Pitcher, Room 810, Air Ministry, Kingsway, W.C.2.

The engagement is announced of Neville A. Dyce Sharp, Physician to H.B.M.'s Legation, Adis Ababa, Abyssinia, son of Mr. William Sharp, of Wray Common, Reigate, and Flora, eldest daughter of Mr. and Mrs. A. R. Macdonald, of Watnish, Skye.

The engagement is announced between Captain L. H. W. Crockwell, 3rd Sappers and Miners, Bombay, third son of Mr. and Mrs. G. Crockwell, Torquay, Devon, and Hazlitt, only child of Mr. Seymour Burt, Indian Police, Bengal, and Mrs. Seymour Burt.

Writing from Beyrout on May 28, H. E. Abdelkader El-Dana, ex-Mayor and ex-President of the Chamber of Commerce, says:—Yesterday, at two in the afternoon, five men-of-war anchored off this port, having on board H.R. Highness Prince George of Great Britain, who honoured our city by coming on shore.

General Gouraud gave him a Royal reception, and he was saluted from land and sea. The troops were lined up on the quay for his inspection, the military bands playing the British National Anthem. On H.R.H. entering the city, the people crowded the streets, giving him a rousing welcome.

The annual general meeting of the Indian Church Aid Association will take place at the Hoare Memorial Hall, Church House, Westminster, on Wednesday, June 22, at 3 p.m. The speakers are to be Mr. W. H. Arden-Wood, C.I.E., and the Rev. Richard Gee, M.A. (S.P.G.).

The annual dinner for officers who served with the Aden Field Force will be held at the Trocadero Restaurant on Saturday, June 25, at 7.30 p.m. Applications for tickets should be made before June 20 to Lieut.-Colonel R. de V. Williams, Leafield, Gibson's Hill, Norwood, S.E.19.

The marriage has been arranged, and will take place in September, between Gerald Durie Moore, youngest son of the late Mr. T. H. Moore, of Bombay, and of Mrs. Moore, 10, Lansdown Place East, Bath, and Eileen Marion Bowes, only daughter of Mr. and Mrs. Elliott, Northfield House, Bath.

The first annual meeting of the Czech Society of Great Britain will be held at 18, Cadogan Gardens, S.W.3 (by kind permission of Sir Samuel and Lady Maud Hoare), on June 21, at 3 p.m. Sir Samuel Hoare will be in the chair, and the speakers will include the Czechoslovak Minister, Lord Dunsany, and Mr. W. A. Appleton.

Our Bucharest Correspondent writes (May 25):—On Wednesday last Sir Herbert and Lady Dering gave a soirée at the British Legation, which the King honoured with his presence. It was attended also by the foreign representatives and their wives, and by many Roumanian political notabilities. Dancing was continued till half-past two, when the King left.

A marriage has been arranged, and will take place in Bombay, between Clive Noble Rich, only son of Mr. and Mrs. Howard Rich, of Thornbury, Glos., and grandson of the late Colonel F. H. Rich, R.E., of 17, Queen's Gate Terrace and Castle Connel, Ireland, and Muriel, daughter of Mr. and Mrs. William Bacon, of Lindfield, and granddaughter of the late William Bacon, Lunces Hall, Wivelsfield, Sussex.

Our Sofia Correspondent writes:—Sir Arthur Peel, accompanied by Colonel Baird, the British Military Attaché, returned on June 3 from a tour in the provinces. Amongst the places visited were the Rila Monastery and the Valley of Roses.

A notable social event was the marriage of M. V. Duneff, son of the ex-Minister of Finance, to Miss Calcheff, which was celebrated here on June 3.

The following decorations have been conferred by the King of Roumania in recognition of war services:—

The Crown of Roumania.—Grand Officer.—Rear-Admiral Sir A. F. Everett, K.C.M.G., K.C.V.O., C.B. Commander.—Capt. F. E. Massy-Dawson, D.S.O., R.N. Chevalier.—Sub-Lieut. G. Marsden, R.N.V.R.

Order of the Star of Roumania.—Chevalier.—Lieut. T. P. Ryan, O.B.E., R.N.R.

M. Venizelos has agreed to join a small committee of eminent persons which is being formed to assist the Council of the Federation of League of Nations Societies, and it is hoped that he will be able to visit various countries on behalf of the Federation for the purpose of stimulating interest in its activities. He has announced his intention of beginning this work at an early date. Among other probable members of this committee are Lord Robert Cecil, M. Viviani, Dr. Nansen, and Signor Ruffini.

A Cyprus correspondent writes:—On May 24 an unusual and interesting ceremony took place at Larnaca, a statue of the ancient philosopher Zeno of Kitium having been presented to the municipality by M. L. Z. Pierides in memory of his father, Z. D. Pierides, a leading citizen and merchant of the town for many years. The statue, which has been erected on a piece of ground facing the public gardens, was unveiled by the High Commissioner, who came down from Nicosia and made a most felicitous speech. There was a very large gathering at the ceremony, all the leading officials, local dignitaries, and townspeople being present, and also the Boy Scouts and school-children. After the ceremony a reception, which was held at the club by His Excellency, was largely attended.

Larnaca has always stood out from the other towns of the island on account of the unity among its inhabitants—no matter what their nationality—when matters affecting the welfare of the town are concerned, and the civic spirit is strong among the citizens. The kindness of His Excellency in consenting to visit the town on Empire Day was very greatly appreciated by the whole of the inhabitants.

The annual gathering of the Indian Police Dinner Club took place at the Grand Hotel, Trafalgar Square, on June 7, Mr. F. M. H. Vincent, C.I.E., in the chair. There was a large attendance, including Mr. H. A. Close, C.I.E., Mr. C. Hughes Hallett, Mr. E. C. Ryland, C.I.E., Mr. P. F. de la F. Sherman, Mr. D. M. Straight, C.I.E., Mr. A. C. Stewart, Mr. C. A. Tegart, C.I.E., Major J. A. Wallinger, and Mr. Austin Low, C.I.E., honorary secretary.

The King has given orders for the following appointments on the recommendation of the Government of India, for valuable services in Waziristan:—

K.C.B. (MILITARY DIVISION).

Climo, Major-General S. H., C.B., D.S.O., I.A.

C.B. (MILITARY DIVISION).

Leslie, Major and Brevet-Colonel (T./Brig-Gen.) W. S., C.M.G., D.S.O., 31st Punjabis, I.A.; Tytler, Colonel (T./Brig-Gen.) H. C., C.M.G., C.I.E., D.S.O., I.A.

C.S.I.

Gordon, Lieut.-Colonel (temp. Brig-Gen.) J. L. R., C.B., I.A.; Lindsay, Colonel H. A. P., C.M.G., C.B.E., S. and T. Corps; Profeit, Colonel C. W., C.M.G., D.S.O., A.M.S.

K.C.I.E.

Skeen, Major-General A., C.M.G., I.A.

C.I.E.

Campbell, Colonel (temp. Brig-Gen.) G. P., C.B.E., R.E.; Crosthwait, Lieut.-Colonel H. L., R.E., Survey Department; Latimer, C., Esq., Indian Civil Service, Deputy Commissioner, Dera Ismail Khan; Lucas, Colonel (temp. Brig-Gen.) F. G., C.B., C.S.I., D.S.O., I.A.; Payne, Lieut.-Colonel E. H., Military Accounts Department; Steele, Major (temp. Lieut.-Col.) C. E. B., O.B.E., S. and T. Corps; Stodart, Colonel T., I.M.S.; Conway-Gordon, Major (temp. Lieut.-Col.) E. C. W., 3rd Skinner's Horse; Hudson, Lieut.-Colonel (actg. Col.) C., D.S.O., I.M.S.; Ross, Lieut.-Colonel H., 1/103rd Mahratta Light Infantry; Watt, Lieut.-Colonel D. M., D.S.O., 1st K.G.O. Gurkha Rifles, attd. 2/5th Gurkha Rifles, F.E.; Ikbal Muhammad Khan, Lieut.-Colonel, Bhopal Imperial Service Lancers.

APPOINTMENTS, ETC.

Rear-Admiral John Ince has been appointed to be Rear-Admiral-in-Charge and Admiral Superintendent of his Majesty's Dockyard, Malta, in succession to Rear-Admiral Brian H. F. Barttelot, to date November 1, 1921.

The King has been pleased to make the following appointments:—

Major E. B. B. Hawkins, D.S.O., to be H.M. Consul for Southern Ethiopia, to reside at Magi (August 13, 1920).

Mr. L. B. Graffney-Smith, to be H.M. Vice-Consul at Jeddah (December 21, 1920).

Mr. W. B. Heard, to be H.M. Consul for all the Coast Line of Egypt east of Damietta Light, the Governorates of the Suez Canal, and of Suez, the maritime portion of the Mudiria of Kenah, and the Sinai Peninsula, to reside at Port Said (February 24, 1921).

Sir H. H. Lamb, K.C.M.G., to be H.M. Consul-General at Smyrna (March 19, 1921).

OBITUARY.

The death of Dr. Kellas, a member of the Everest Expedition, occurred at Kempajong on June 5. He was engaged in experimenting in the use of oxygen at high altitudes.

BIRTHDAY HONOURS.

The following names were unavoidably held over from our list of Birthday Honours last week:—

C.I.E.—Jukes, John Edwin Clapham, Esq., I.C.S., Joint Secy., Finance Dept., Govt. of India. Burdon, Ernest, Esq., I.C.S., Financial Adviser, Military Finance. Khan, Nawab Muhammad Ahmad Said, M.B.E., M.L.C., of Chhitari, Bulandshahr, District, U.P. Martindell, Herbert Edward West, Esq., Chief Engr. and Sec., P. W. Dept., Burma. Montgomerie, Alexander, Esq., I.C.S., Sec., Political Dept., Bombay. Abbott, Evelyn Robins, Esq., I.C.S., Commissioner, Multan Divn., Punjab. Smith, James Cowlshaw, Esq., I.C.S., Magistrate and Collector, U.P. Thomas, Percy Beart, Esq., Insp.-Gen. of Police, Madras. Cunningham, John Richard, Esq., Director of Public Instrn., Assam. Cox, Stephen, Esq., M.B.E., Chief Conservator of Forests, Madras. Crump, Leslie Maurice, Esq., I.C.S., Political Dept., Govt. of India, lately Political Agent, Phulkian States, Punjab. Briscoe, Hugh Kynaston, Esq., I.C.S., Collector of Cuttack, Bihar and Orissa. Nevill, Temp. Lt.-Col. Henry Rivers, O.B.E., I.C.S., I.A., R. of O. A.A.G., Army Hq. Deare, Lt.-Col. Benjamin Hobbs, I.M.S., Principal, Med. Coll., Calcutta, Bengal. Scott, Henry Vernon Barstow Hare, Esq., Indian Police, Deputy Director, Central Intelligence. Church, Robert William, Esq., Mining Engineer to the Railway Bd. Heath, Maj. Lewis Macclesfield, M.C., Commandant, Seistan Levy Corps. Lang, Maj. Lionel Edward, M.C., late Commandant, Seistan Levy Corps. Ram, Rai Bahadur Milkhi, Senior Vice-President of the Municipal

Committee, Lahore, Punjab. Damle, Rao Bahadur Kesho Govind, Pleader, Vice-Chairman of the District Board, Akola, Central Provinces. Mackison, James Walls, Esq., Executive Engineer, Bombay Municipality, Bombay. Playfair, Arthur Lambert, Esq., of Dibrugarh, Assam. Sen, Rai Bahadur Babu Abinash Chandra, Member of Council, Jaipur State, Rajputana. Modi, Maganlal Thakordas Balmukandas, Esq., merchant, Bombay. Banerjee, Doctor Mohendra Nath, medical practitioner, Principal, Carmichael Medical College, Belgatchia, Bengal.

NEWS IN BRIEF.

The Afghan Mission under Mohammed Vali Khan has arrived in Paris.

A Society for the Prevention of Cruelty to Animals has been revived in Jerusalem under the presidency of Sir Herbert Samuel.

It is officially announced that in future the designation of the British troops in Constantinople will be "The British Army in Constantinople."

Sir William Manning, Governor of Ceylon, in opening the Reformed Legislative Council of Ceylon, forecast the introduction of an income-tax.

An interesting collection of papers relating to the new constitution of Malta has been published as a White Paper [Cmd. 1321, price 1s. 6d. net.].

According to reports from Constantinople, Armenians are helping the insurgent Tartars in the Karabagh against the Soviet Government of Azerbaijan.

Our Sofia Correspondent, writing on June 4, says that rumours are beginning to circulate there once again regarding the much-talked-of Bolshevik invasion of Bulgaria.

Musa Kasim Pasha Hussein is leading a deputation, elected by the Moslem and Christian Arab Congress of Palestine, to lay the Arab case before the British public.

Delegates to the American Zionist Organisation at Cleveland (Ohio) pledged their loyalty and allegiance to the World Zionist Organisation and their whole-hearted support to the Palestine Foundation Fund.

The Cairo correspondent of *The Times*, writing on June 9, reports:—"A fatal flying accident occurred at Heliopolis yesterday, when Flying Officer Milbourne Coombs, D.F.C., crashed in a D.H.10."

It is reported from Cairo that the Egyptian railway shop strikers have, with the exception of twenty ringleaders, been reinstated without loss of rights, on condition that they work conscientiously in the future.

The principal article in the defensive Treaty between Czechoslovakia and Roumania, now published at Prague, provides that if Hungary should make an unprovoked attack on either party the other party shall assist the attacked party.

Scurvy has broken out among the Assam tea coolies, who, as the result of extremist agitation, left their work and set out for their homes in Central India, and are now stranded at Chandpur. The death-rate among them is increasing.

According to a telegram to the *Pioneer* the British withdrawal from Persia is now complete, but, owing to the instability of the situation, 1,000 Russian troops remain at Enzeli. Official Russian assurances have been given, however, that the withdrawal will soon be resumed.

It is reported that the insurgents in Daghestan, north of Azerbaijan, on the Caspian, operating under Said Bey, a grandson of the Circassian patriot Shamyi, have captured a number of guns, machine-guns, rifles, and ammunition from the Bolsheviks, and hold most of the inland districts.

As the various political parties at Fiume have found it impossible to reach an agreement, they appealed to the Italian Government to intervene. The Government has accordingly appointed Major Foschini High Commissioner at Fiume, with the object of bringing back the city to normal conditions under an established constitution.

SUMMER PALACE HOTEL,

(C. CORTELETO, Mng. Proprietor).

GIYMENOPOULO, RAMLEH.

This Hotel is situated near the Beach. Open all the Year.
Every Modern Comfort. American Bar, Restaurant,
Bathing Cabins on the Beach. Billiards.
Daily Concerts on the Verandah.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.

OPEN ALL THE YEAR ROUND—

NIKOSIA—Cyprus Palace Hotel.

LIMASSOL—Olympus Hotel.

FAMAGUSTA—Savoy Hotel.

LARNACA—Majestic Hotel.

FOR SUMMER SEASON—

TROODOS—Olympus Hotel.

5,000 feet above sea level. Open from May till October.

Perfect situation. French and English Cuisine. Moderate Terms.

Excursions to Mount Troödos.

For Tickets and further Particulars, apply

NAJEM HOURY & SONS, Limassol, Cyprus.

Proprietors of "The Army and Navy Stores."

THURSDAY, JUNE 16, 1921.

INDIA IN THE EMPIRE.

We have recently been able to record a definite, if slight, improvement in the internal situation in India, and we think it may now be said that the immediate outlook is hopeful. Much, indeed, depends on the course of the season during the next three months; for it cannot be repeated too often that in India the popular response to agitation, whatever its objects may be, is determined very largely by the economic circumstances of the moment. Bad crops, like those of last year, mean increased pressure on the least stable elements of the population, and undoubtedly tend to enhance the general unpopularity of the administration; a good season means a marked extension of well-being, resulting in an unresponsive audience for agitators; and should the summer and autumn prove favourable, there are grounds for hoping that the transition from natural but unreasoning excitement to steady effort may make rapid progress, alike in the fields of politics and economics. Whatever the future may have in store, the present situation is not such as to require detailed examination, and to-day we propose to glance at a group of questions affecting the position of India in the Empire, which, important as they are, have, in this country at least, been overshadowed by more spectacular events. The occasion is appropriate, for we are once again witnessing that recurring miracle, the gathering of the Imperial Cabinet, when representatives of the original British stock meet to discuss affairs, not only with descendants of their inveterate enemies, whether French or Dutch, but also with the spokesmen of India, so recently a Dependency, and still a repository of distinctive political traditions. India's transitional constitution is conspicuous in the present Cabinet: if the Secretary of State stands for the element of external control, familiar to Indians from the experience of nearly a thousand years, he has by his side an Indian politician who enjoys the confidence of an elected Legislature, and an Indian Prince, a type of that absolute kingship which is the most firmly rooted institution in the country. With this combination we are justified in expecting that each of the various Indian points of view will be effectively put forward, and that the claims on which they are agreed will be vigorously pressed.

Judging, however, from the preliminary announcements, it does not appear that Indian questions will claim an unduly large share of the Cabinet's attention. The policy of Imperial Preference is shortly to be investigated by an Indian Commission, and for the present India cannot take any definite line in a discussion of that subject. The problems of Defence are still, we understand, before a special committee. The thorny topic of Imperial organisation concerns India less directly than the Dominions, for the obvious reason that her relations with England are already clearly defined; and what India asks for at the present juncture is not so much any concrete measures as a frank and cordial recognition of the rapid growth of national self-consciousness and national self-respect. Some such recognition was accorded at the previous Cabinet in the adoption of the principle of mutual exclusiveness—that is to say, that India is entitled to exclude from her territory the inhabitants of those Dominions which exclude Indians from theirs, and the arrangement, unsatisfactory as it may be from the practical standpoint, has undoubtedly produced a good effect on Indian sentiment. At the present time the question of the treatment of Indians in the

Dominions is clouded by bitterness only in the case of South Africa, and in that case we incline to the view that a reasonable accommodation is possible. If, as we hope, the difficulty is removed in the course of the present discussions, the remaining questions of status arise not with the Dominions but with the Dependencies. The official papers recently published disclose an unfortunate difference between the Colonial Office and the Government of India regarding the arrangements to be made in East Africa. The Colonial Office accepted the principle of racial segregation for application to certain areas in the colony of Kenya: Lord Chelmsford's Government protested strongly against this decision, the protest is backed by the unanimous voice of educated opinion throughout India, and we have Mr. Montagu's assurance that it came as a reinforcement of views he was already urging. The principle is advocated mainly upon sanitary grounds; the opposition to it rests almost wholly upon Indian sentiment, which regards the case as a test of the position of India in the Empire; and it would scarcely be possible to overrate the effect in India of its ultimate acceptance. We have very little sympathy with those writers who decry the Colonial Office on every possible occasion. Of late years, at any rate, its strength has lain largely in its recognition of the force of local sentiment, and it is this very fact that, in our opinion, renders necessary some arrangement which shall ensure equal regard in its decisions for the sentiment of other portions of the Empire. Various other points are in dispute between India and the Dependencies, in East Africa and elsewhere, but practically all of them appear to be susceptible of reasonable adjustment. The principle of racial segregation is, however, one which India will never be brought to accept, and it appears to us to be desirable that alternative methods of safeguarding the health of the inhabitants should be explored by some impartial authority.

In regard to all these questions the essential point is that Dominions and Dependencies alike should realise the political importance of the sentiment to which we have referred, not insisting on its precise correlation with concrete facts, but accepting it as a fact in itself, and as a fact which dominates the field of Indian politics. Its growth is quite recent. Indians have, unwisely, as we think, neglected in the past to secure adequate publicity for their views outside their own country, and we have no doubt that in many portions of the Empire the change is still very little appreciated; but it is a reality for all that, and communities of predominantly British origin may fairly be urged to display in regard to it the British virtue of recognising facts. But at the same time it is the duty of those Indian leaders who have pressed for recognition of the sentiment in question to set to work, more earnestly than they have yet done, to bring that sentiment into closer relation with other facts of Imperial significance. They claim to have developed the great asset of national self-respect. To establish that claim they must prove that they have deserved the respect of others, for until they have reached that stage their self-respect would be described more justly as self-conceit. They have to face the fact that in several cases Indians are unpopular abroad. When a man is unpopular in the society he frequents it is rarely the society that is to blame, and while Indians may justly urge the existence of prejudice in the case of some communities, the fact that unpopularity has grown with experience demonstrates that other causes besides prejudice have been at work. It is no part of our present purpose to indicate those causes in detail; our contention is that, while all possible regard should be paid to the new-born Indian sentiment, Indians themselves should be busy in studying, with a view to their removal, the causes of their unpopularity abroad. As yet they seem scarcely to recognise the magnitude of their claim on other portions of the Empire. We have urged that, large as it is, that claim should be generously conceded, and we urge also that the Indian leaders should now set to work to make its justification manifest to the world. It is along these lines, and along them only, that we can hope to realise the great Imperial synthesis of which this month's conferences are but a faint foreshadowing.

THE SHOE.

By John Bashan.

It was a sick, dishevelled little man that the caique spilled out on the beach of this island off the Asia Minor coast, and whom the crew left with such scant parley. For all his smallness he was fleshy, with dark, restless eyes and a never-ceasing fund of gesture when speaking. At present he was profoundly miserable, shivering in the breeze that had sprung up with the first light before the dawn, and the little that he could see of his surroundings seemed even worse than it had appeared from the sea.

The island itself was rugged and forbidding; the path that he would have to ascend steep and loose of surface. For a moment he looked longingly at the caique, fast disappearing towards the mainland, and, in spite of the open dislike and contempt of the crew, wished himself safe aboard her. Then the thought of the treasure that was the aim and end of his journey came to the rescue, and he ascended the path a little less wearily, a little less forlornly, until, finding a comfortable, sheltered spot, he settled down to await the full daylight.

For a time he lay in a semi-drowsy state of reflection, and his dreaming was not unpleasant. For a few days he was safe, and whereas the bones of his friends of fifty months earlier were bleaching among the rocks outside his native city, unburied, and deserted now even by the carrion crow, he was alive and free, a *yuzbashi* in the Turkish Army, and had even in various ways succeeded in amassing a certain amount of money. For long, timorous, shaking months he had managed to steer a true and careful course between the Scylla of undue leniency towards his Christian co-religionists and the Charybdis of being held up as an example of how the ill-treatment of Christians was in nearly every case the much-to-be-deplored work of their Christian notables. Above all, the next twenty-four hours should see him a comparatively rich man, and then he need never return to his own land of danger.

Presently he slept.

When he awoke, it was with a scream of fear. Nothing around was moving, except a fly which buzzed indignantly away. For all the mid-day sun, his dream had left him cold and shaking, and his face was greasy and furrowed, like some white ointment once used and then forgotten. Once again he had lived the day of fear, just after he had made himself safe with the authorities. Once again he had watched from behind his *jalousies* that long, carefully shepherd procession, surrounded by the cruelty of primitive man, but directed from afar by a policy so thorough that it had even considered the insurance policies of its victims. And not very far away were the rocks that were to be their last sight of this earth, the rocks where the three Germans had made their meal among the bones eighteen months later.

He had sat again all day at a table, drinking coffee, whilst a hush hung over the city, he who had dared do no other wise than sit in public as befitted a free man; and he had felt the awful terror of that moment when the doorkeeper of the Kaimakam's house had dropped into a seat opposite, complaining with more than usual profanity that he was tired, and then recounting, as a man describes a day's shooting, the number he had killed with his own hand.

When he had recovered from his dream, he began the weary walk to his destination, stumbling over loose stones, cursing the stubborn thorns of the overgrown path. Sometimes he rested for a few minutes; yet, as if goaded and rowelled by some invisible spur, ever he staggered onwards again. Towards evening he entered the village.

There was almost complete silence in the winding streets, the silence of the setting sun. A curtain fluttered in one of the windows, but the grass was knee-high in the streets. Once he stumbled over the portion of a shattered bed and the few rags of a shredded mattress. A door blew to behind him. A half-starved dog slunk in the shadow of a wooden house that was falling apart, as a stranded ship melts away after a storm.

He was too tired, and it was too late to do anything that night, so he entered the open door of one of the

better houses, stumbling once again on the threshold. With a curse he kicked a small, light object towards the far side of the room. Then he lit a couple of candles and began to look round. On the table were the powdered remains of an interrupted meal; the floor was strewn with broken furniture. After a light supper he arranged a place to sleep, and made himself comfortable for the night.

But somehow sleep would not come. The quest of the morrow obsessed his mind, and not unnaturally his thoughts turned to Azazian, to whom the treasure had belonged, whose whole fortune it represented, except for certain bribes with which Azazian had bought a few more doubtful weeks of life for his family, the only survivor of which now was Takui, a pretty little girl of eight summers, who had been spared from over a hundred children on account of her good looks, and who was now in the household of Raouf Bey, where she would be looked after. What was more natural, therefore, than that he should make himself safe with the money of his friend.

So he dreamed on, vainly waiting the sleep that would not come, until, feeling a cold draught from the direction of the door, he raised himself on one elbow and looked round, to find two luminous green eyes gazing at him. He sprang up, clutching wildly at his breast, only to trip over the same small object that had made him stumble when he first entered the house. His heart, so often tortured by a spirit that saw death in an unaccustomed politeness, failed, and he fell amongst the remnants of that abandoned mid-day meal, which crashed to the ground with him.

The dog, disappointed in his desire for human society, slunk away to further loneliness.

* * * * *

A week before these events took place, the hidden hoard of Azazian had been taken on board a British motor launch to be administered for the benefit of a prematurely grave-eyed little girl named Takui, who had not long before been brought to Constantinople by a British Relief Officer. At the end Azazian had doubted his friend, and had succeeded in ensuring by other means the welfare of his child, should she survive the massacres.

The officer who had recovered Azazian's hoard had entered the same open house in the course of his exploration of the village, and had picked up the small object that had twice entangled the feet of the would-be robber a week later. To him it had appeared the most pathetic of all the evidences of hasty flight and unbridled looting. It was a small baby's shoe.

THE JEWS AND PALESTINE.

In the Assembly of the Church of Scotland in Edinburgh recently the report of the Jewish Mission Committee was submitted by Mr. J. P. Sym. The Rev. Dr. MacLean Watt, in moving the adoption of the report, said we would not escape the Jew. He stood in the way of progress of every nation and every religion in the wide world, and especially in the way of that religion that was founded by a child of the race. We dared not turn from these people. The Rev. James Muir, Kirkoswald, in seconding, said the great hour had struck for that great people, and an avenue had been opened up by the victory of General Allenby for a return to a place among the nations. Professor Kay, St. Andrews, said the Old and New Testaments did not warrant the statement that Palestine was the natural home of the Jew. Declarations of that kind did harm. Those ideas encouraged Jewish immigrants to Palestine to assume their right to displace the Moslem and Syrian and Christian population. A fourth of His Majesty's subjects were Moslems, and had as many of the virtues of Father Abraham as any branch of the family. He thought that while the Assembly would encourage benevolent action towards the Jews in every land it was also anxious to do no injustice to either Moslem or Christian inhabitants of Palestine, and who had been in possession for centuries. He moved an addendum to the report on those lines, and this was accepted, after which the report was adopted.

An Agreement between Great Britain and Norway relating to the suppression of the Capitulations in Egypt has just been published, at the price of 1d., by H.M. Stationery Office (Cmd. 1285). By this Agreement Norwegian Nationals will enjoy the same treatment as British nationals in respect of the administration of justice and public liberties, including rights in regard to property, the liberal professions, commerce, and taxes. Treaties in force between Great Britain and Norway are to apply also to Egypt.

PRESS ON THE NEAR EAST.

Palestine To-day.

The *Morning Post* of June 10 contains an article on "Palestine To-day," written by "a distinguished City man, well known in commercial circles, who made a pilgrimage to Palestine for Easter." The writer of the article had known the country well under Turkish rule, and noted profound changes on his last visit. Noting first the change in the character of the people, who once were debonaire and careless, and are now "grim, sullen, and brooding," and next, "the overwhelming military display which one meets on all sides at Jerusalem," he turns to high politics. On this subject he says:—

Zionists evidently hope to maintain their grip on Palestine in two ways, first, by Jewish immigration; second, by Jewish predominance in the Government. Now it certainly looks as though the first were already doomed to failure, and it is clear, therefore, that increasingly greater stress will be laid on the second. I personally doubt the accuracy of the official immigration figures recently published by the Secretary of the Zionist organisations, but they undoubtedly show that Zionist immigration is not proceeding at the rate expected, or at a rate sufficiently high to justify the maintenance of a force of some 16,000 British troops for their protection from the people of the country, or, indeed, to justify at all the alienation of the latter's formerly pro-British sympathies. We are told that only 10,000 have come, and that of this number some 3,000 have already left again. The immigrants who do come seem, notwithstanding the assurance of his Majesty's Government that they would be carefully selected, to be of a not particularly desirable class, for they are mostly from the ghettos of Poland and Russia, and are so dirty in their habits and Bolshevik in their ideas that they are a great offence to the people of Palestine, who are, by the way, a very clean and homely people. Indeed—and this is most significant—many Jews who emigrated to Palestine are going back again. Palestine is, of course, an agricultural country, but, compared with Europe or America, its productivity falls far behind, and, naturally, those who have done agriculture in their own countries find they can do better for themselves by going back. Moreover, the staple agriculture of Palestine is cereal cultivation, and though the Jewish immigrant may take up garden cultivation such as oranges, olives, etc., he has no great liking for the hard labour of a cereal crop. I met a Warsaw tailor who said he had come for agriculture, and this is a characteristic type of these immigrants who have no real knowledge of agriculture at all.

He proceeds to give the Christian and Moslem opinion of Sir Herbert Samuel, dilates on the increase in the number of Jews in the Civil Service, and then gives his verdict on British policy in Palestine:—

The military force in the country is costing the British taxpayer about eight millions a year, and it is probable that owing to the recent anti-Zionist riots at Jaffa this sum will have to be increased in the present year. It is understood that the Government now proposes to reduce the garrison by the formation of a national Defence Force for the preservation of internal order, consisting of one battalion of Christian and Moslem Arabs and one of Jews, paid for by local revenues. To demonstrate the feasibility of this scheme a humorist among the local officials suggested that the Jewish unit might be quartered at Nablus, the old Neapolis, a town so fanatically Moslem that Jews are turned back from entering.

It is difficult to grasp the seriousness of the situation created by Zionist immigration and the appointment of a Zionist High Commissioner without seeing it. The salvation of Palestine would be for a representative party of British members of Parliament to visit the country independently, and not like Mr. Churchill under Zionist auspices, and gauge for themselves what Zionism means in practice. Palestine is about the size of Wales, and has a comparable population if the coalfields are excluded. What would happen in Wales if the Peace Conference decided to colonise it, say, with Hebrews, repressed the civil population with a force of Americans, laid it down that the economical development of the country was to be placed in the hands of Hebrews, and gave to Welshmen no real voice in the government of their fatherland? The picture is not an exaggerated one of Palestine of the present day. The country is being goaded into desperation, and the association of Great Britain with this unfortunate experiment is doing incalculable and irretrievable harm to our prestige and reputation throughout the whole Moslem world.

The article concludes with a reference to the fact that the Christian world is moved by these events in Palestine, and the final sentence is:—

Mr. Balfour is said to have justified Zionism as an interesting experiment, but, as a Haifa Arab, who had evidently heard of this remark, said to me, "You do not allow a surgeon to try experiments even on one human body. Why, then, should you experiment on a whole nation?"

Turkey, Russia and Europe.

In the *Morning Post* of May 30 is an article called "Angora's New Friend," in which the "unholy and artificial alliance" between Russia and Turkey is stated to be "a striking testimony to the failure of the Allies in dealing with a problem which is of paramount importance to all

of them." But still the war between Kemal and the Greeks continues:—

Neither side has been particularly successful in their successive offensives, but as the Kemal troops are being reinforced, as moreover, they are beginning to menace the Greek lines of communication by fomenting disturbances in the rear of the Greek Army, and as the moral of King Constantine's forces seems, according to some reports, to be on the decline, it looks as if the balance were beginning to dip in favour of the Turks. But as long as the Anatolian war continues, the Bolsheviks are bound to be masters of the situation. They appear to be urging the Kemalists to turn their attention to Mesopotamia, while they themselves are reported to be ready for a move on Persia. We do not wish to exaggerate the military strength of Trotsky, but it is clear that the Bolsheviks, working through the Kemalists, may shortly cause the British Empire serious trouble in the Middle East. We therefore venture to draw attention to the following considerations: In the first place, the Allies ought at once to sink their differences and concentrate on a common policy in the Middle East. The Treaty of Sévres is dead, and the dream of M. Venizelos is shattered. Italy, it is well known, is anxious to return to that policy of an Anglo-Italian entente on all Mediterranean issues which existed before the war. Another effort ought, therefore, to be made to bring to an end this ruinous warfare in Anatolia by securing from Greece concessions which would satisfy Turkish pride and establish the complete independence of Turkey, economic as well as political, in Asia Minor. The three Powers, each acting on their own initiative, cannot do it, but united on a common policy they can. But they cannot do it on the basis of the Treaty of Sévres. In the second place, the desire of the Bolsheviks to worry this country in a vital part of its dominions is only too evident, though there may be perhaps some difference of opinion as to their capacity to do so. Therefore, we hope that the Government may again revise that ill-omened policy which led to the signing of the trade agreement with Lenin. There can be no compromise, no accommodation with the Bolsheviks. They are our bitter enemies, and recent events in Angora have confirmed what ought to have been to our rulers a self-evident truth.

Second Thoughts.

After all, we are to be spared the most objectionable of the proposed new postal charges. Mr. Kellaway came down to the House in a very different mood from that in which he faced the various deputations of protest in the previous week. Then he was unable to hold out any hope that the proposals would be modified, but he was able to tell the House that the Government had decided to abandon the tax on business enterprise abroad, and that a committee of business men is to be appointed to consider what economies can be effected in the working of the Post Office. For this *volte face* the united opposition shown by the Press and the business community is responsible. But it should not have been necessary to teach the authorities the lesson that the welfare of the whole country depends upon the development of our overseas trade. Now that men like Mr. Selfridge are to have a voice in the management of the Post Office there is ground for hope that the alterations will not stop short at the revoking of a tax that should never have been proposed, and that before very long we shall see a reduction in the charges for letters, telegrams, and telephoning.

Deceptive Tractor Trials.

It is an unfortunate fact that trials of tractors in the Near East are very often apt to be misleading. The object of a trial is to discover the tractor best suited to the country, but the conditions under which trials are held do not lead to that result. The demonstrations are carried out by highly-skilled men, under whose handling presumably the best machine takes the first place. Now, it very frequently happens that the winning machine is an exceptionally complicated piece of mechanism, and, while this would be immaterial were skilled hands always available, it matters a great deal seeing that the tractor has to be operated by practically unskilled labour. As it will not answer to such handling the result is that the market may be lost, though there may have been tractors competing which could be driven by inexperienced men, but which, because of their simplicity of design, were not able to give quite as good results as the more elaborate machines. It is satisfactory to note that one of the two machines that have done best in the recent tractor trials in Bulgaria is the Saunderson, which is very easy to operate, and is, therefore, specially fitted for the country.

Egypt's Financial Position.

The Budget Note of Mr. Dowson, the Acting Financial Adviser to the Egyptian Government, which is dealt with elsewhere in these columns by our Cairo correspondent, gives anything but a promising view of the financial outlook for Egypt. There was a deficit on the last financial year of £E12,900,000, which has been debited to the reserve funds, and these, allowing for the depreciation of securities, have been reduced to £E3,000,000. National food subsidies and emergency coal purchases are mainly responsible for this situation, which has been rendered much more serious by the continued low price of cotton. Mr. Dowson, however, takes a rather hopeful view of the position. He points out that the country is estimated still to possess £100,000,000 in accumulated resources, and is, therefore, in a position to meet the existing conditions. His conclusion is that the financial position of the country is fundamentally healthy, and that so long as its vital resources are not impaired it should overcome its immediate difficulties.

Effect on Irrigation Schemes.

It was obvious that as in this country circumstances would demand retrenchment on an extensive scale wherever possible, and Mr. Dowson anticipates the necessity for the severest economy on public and private account, and holds out little hope of the early resumption of irrigation work. This is one of the most serious aspects of the position. The welfare of Egypt is bound up with the development

of irrigation, and its cessation will seriously retard the economic progress of the country, while putting out of court any prospect of the extension of cotton growing in the near future. It may be noted that it has been decided to stop the works begun at Gebel Aulia, which would require £12,000,000, an amount which is now, of course, quite out of the question; while the Egyptian Cabinet is also in favour of stopping the work on the Mekwar reservoir and the Gezira canal. It is quite possible, however, that the period of economic depression which is looked for may be much shorter than is anticipated. Almost everything depends on cotton, and the price of that commodity in turn depends on the general economic outlook. Circumstances seem to be arising which would tend to create a position in which, if there should be a great demand for cotton goods, there would be a corresponding response in the price of cotton. Then the situation would be fundamentally altered, though in no circumstances is it probable that there will be a return of anything approaching the prosperity that Egypt has enjoyed in recent years.

The World Cotton Conference.

If it does nothing else, the World Cotton Conference, which opened at Liverpool on Monday, will fulfil a very useful service in drawing attention to the various problems with which the industry is faced to-day. Altogether some twenty-five papers are to be read, and these ranging from the question of increasing the production in America and of cotton growing within the British Empire to financing cotton importing and the possibilities of the exact reporting and forecasting of the cotton crops cover practically the whole field of endeavour in the trade. Chief interest attaches to the papers on cotton growing, for, while there is at the present time anything but a shortage of cotton, it needs no demonstration that a time will come when the world will require all the cotton that can be grown. Obviously the interests of the industry demand that when that time arrives an adequate supply of cotton shall be available. Unfortunately cotton is not now a paying crop, and as Mr. de Segundo points out in our columns this week with regard to the American crop, it is impossible to persuade farmers to plant cotton at a cost of 25 cents per lb. when there will only be a return of 12 cents per lb. That is the principal problem before the industry.

The Rubber Exhibition.

I must confess to a feeling of disappointment at the Rubber Exhibition, and so far as I can judge I am far from being alone in that respect. It struck one as being on the whole dull and unimaginative. There were a number of interesting exhibits, but too few to relieve the general monotony, and I should have thought that as the exhibition included allied tropical products a good deal more might have been made of this side of it. Of course, it must be admitted that rubber scarcely lends itself to display, but one could not help thinking that this great industry had not done itself justice in this exhibition.

COMMENTATOR.

BANK OF ROUMANIA LIMITED

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

GREECE.

ATHENS, May 29.

The Tobacco Crisis.

One of the most serious problems which the Greek Government is now trying to solve is the question of tobacco. I pointed out in one of my recent letters that thousands of okes, representing the production of 1918, 1919, and 1920, have remained unsold, and it is evident that unless the recent decision of the Government to attempt to exchange tobacco for the products of other countries proves successful, this industry, which has hitherto brought so much money into the country, will be entirely ruined.

The production of tobacco in Old Greece and the Aegean Islands amounted to 15,270,000 okes in 1919, and to 14,105,000 okes in 1920, making a total of 29,375,000 okes. At the end of 1919 the amounts which remained unsold, either in the hands of the producers and merchants or lying on consignment abroad, amounted to 18,478,000 okes. This last figure includes the unsold tobacco of the 1918 crop. Of the 14,105,000 okes produced in 1920, 11,668,000 okes remained unsold. The fact that 11,123,000 okes were left in the hands of the producers themselves shows the seriousness of the situation. Out of the 16,865,000 okes which remained unsold from the 1919 crop, only 6,670,000 okes are in the hands of the producers; 6,965,000 okes are lying on consignment in foreign markets, and the remainder is in the hands of the merchants here. These figures do not include Macedonian tobacco, very little of which remains unsold.

Miscellaneous.

M. Polyvios Lekos, a Greek who has recently returned from Tokio, has been appointed official representative in the Balkan Peninsula for 120 of the leading industrial and export firms in Japan. These firms have sent to M. Lekos seventy cases containing various samples of Japanese goods, which will now be exhibited in Athens.

A Royal decree has been published in the official *Gazette* authorising the import from abroad of carbonate of soda.

The Bulgarian Chamber of Commerce at Sofia has asked the Greek Legation there for the names and addresses of three important Greek firms importing cereals into Greece and exporting olives, olive oil, and soap.

At a meeting of the Greek shipowners it was decided to increase the fares of the passenger boats by 50 per cent., with effect from to-morrow.

Owing to the shortage of coal in the Piræus market, as a result of the requisitioning of all available stocks by the Government, the price of Greek lignite has increased considerably.

EGYPT.

CAIRO, June 5.

Adverse Trade Position.

The Egyptian Customs statistics for the first quarter reveal a very disquieting state of affairs. Not only is there a general diminution in traffic, but the trade balance has swung very heavily against Egypt. Thus, while imports during the three months totalled £E19,396,509, as compared with £E20,545,180 a year ago, exports only came to £E6,546,037, as against £E50,555,666 at the same date in 1920. There is, therefore, an adverse trade balance of £E12,800,000 as compared with one of £E30,000,000 in favour of Egypt a year ago.

The main imports during the quarter were:—Wheat, £E1,218,424; wheat and maize flour, £E4,354,809; coal, £E1,926,731; cotton textiles, £E1,408,844; manufactured iron and steel, £E871,725; barley, £E605,089; and tobacco, £E555,748, the principal increase being under wheat, flour, and coal, the most important decreases being in textiles, which fell off by over £E4,000,000. Under exports, the only item of importance was raw cotton (£E4,757,996), which was just 10 per cent. of the value of the first quarter of 1920, the quantity being a little under half. Other important exports were cottonseed.

The share of the United Kingdom under imports fell very considerably, the proportion being about 25 per cent., as against just under 50 per cent. France and the United States increased their share, the latter by 400 per cent., mainly due to wheat and maize flour imports. The position under exports showed a slight improvement, the United Kingdom's

share being 50 per cent., as compared with 35 per cent. Nearly half the cotton went to Great Britain.

The unfavourable trade position reported above is, of course, what was to be expected from the general depression in the cotton market and the slump in local commerce. Until the situation in both the latter respects improves we must expect a continuation of the adverse trade balance, and as there appears little prospect of a revival until next spring we must not be surprised if the current trade year takes a large slice out of the credit balance which Egypt still possesses abroad out of the favourable trade balances of the later war years.

The Irrigation Projects.

A fortnight ago I referred to the difficulties which the Egyptian Government was experiencing in regard to the Upper Nile irrigation projects, owing to the rise in the cost of the work. This week the Council of Ministers definitely decided to suspend the construction of the dam at Gebel Aulia, on the White Nile, and merely to authorise such work during the current year as might be necessary to consolidate what has already been done; while as regards the works on the Blue Nile the Egyptian Government has agreed to allow the Sudan Government to continue them on the understanding that it does so on its own responsibility, and that no more than 300,000 feddans are to be developed in the Gezira.

Although this decision was not altogether unexpected, it was hoped that some way out of the difficulty would be found. The wording of the decision makes it evident, however, that the Cabinet has been prompted more by political than by financial considerations. In fact, the Cabinet makes it clear that the resumption of the works will be dependent on the result of the negotiations in London. It is true that the financial situation is such as might not, under ordinary conditions, justify the undertaking of such a liability as the White Nile Dam constitutes; but, after all, the liability had already been accepted when the work was started, and in view of the urgent need of the works and the far-reaching benefits which they would confer on Egypt one cannot help feeling that with a little more courage, the Egyptian Government could have continued the work, especially as the money is not required all at once, and the work is of such an immediately remunerative nature.

ROUMANIA.

BUCHAREST, May 25.

Criticism of Financial Reforms.

The Bill for the financial reforms has now come before Parliament. The first notable speech on it was made by Professor I. Raducanu, a member of the Opposition, who has studied the whole question thoroughly. His criticism was substantial and dispassionate, and was listened to with great attention by the whole House. His remarks may be summarised as follows:—He regards the tax on turnover as ineffective; the more so as the State has not at hand the adequate administrative personnel, and, further, it hampers commerce and industry. In his view it would be better if the reform were made by degrees in order to avoid a disturbance in the economic life. He foresees that the financial measures will have as a result the maintenance of high prices, expensive living, and the disorganisation of economic life, thereby drying up the revenues of the State.

He complains that there are too many taxes proposed at one time, and advocates an organic and productive system. He believes that it would have been better, if one part only of the project had been proposed. Finally, he doubts whether the Minister of Finance will be able to carry out his scheme, as he takes too much from the individual property, which, after all is said and done, constitutes the basis of the State.

Another member who also spoke about the high taxation said that the whole project had not been sufficiently studied, and that it should have been drafted by a commission of qualified men, instead of being the work of one single person, however capable; and urged that the Minister should accept all reasonable amendments proposed during the debates.

General News.

The Minister of Finance is about to close a contract with a Swiss firm for the coining of money of 50 and 25 centimes,

to the value of fifteen million lei of the former and five million of the latter.

The management of the sample-fair at Prague have arranged for a train carrying samples of all Czechoslovak products, which will first visit the towns of Roumania and afterwards proceed to the other towns of the Near East.

A very large quantity of material necessary for aviation has arrived from abroad.

A delegate of the German Government has arrived in Bucharest to discuss the question of the war debts.

Active preparations are being made in Bucharest for the exhibition and sample-fair of all produce and manufactured goods of Greater Roumania, which will be opened at Park Carol on August 14.

The *Monitor Official* publishes the following export taxes which have come into force since the 14th inst.:—0.50 lei per litre on wine, and the following per waggon of 10,000 kilos benzine, light, 6,000 lei; benzine, heavy, 5,200 lei; petroleum, 2,000 lei; motorine and other light oils, 2,800.

BULGARIA.

SOFIA, June 4.

The Outlook.

The financial position is disquieting and the leva is still dropping. To-day it touched the record low level of 750 levas to 100 francs, while for sterling one could get from 340 to 343 levas. Meanwhile from all over the world come stories of record harvests, and it is difficult to see how the Consortium can for long manage to justify its existence. Hostile criticism is pouring in from all parts, and foreign buyers coming to Sofia do not seem to be able to get any satisfaction out of it. One has only got to look at the situation in Constantinople, where American flour holds the market, to realise what a long way down the commercial hill Bulgaria has gone, and, of course, this factor reacts immediately on the financial position.

The very large hold French interests are gaining in this country is only known and realised by a few people to-day. Many leading banks and insurance companies have recently become affiliated to similar French concerns. The reason for this movement is easy to see. The Bulgarian fears the Government may pass legislation which will materially affect his chances of livelihood.

Naturally, the first thing that occurs to an Englishman is why we do not interest ourselves also in the country. Excellent openings abound there, and the opportunities of success offered to an English bank are very considerable. But it must be started soon to give it an equal chance of success with Allied institutions.

CYPRUS.

NICOSIA, May 24.

Electric Lighting of Nicosia.

Differences have existed for some years between the municipality and the electric lighting company, and a new contract has now been arranged. It has been decided to double the capital of the company, to purchase a dynamo of 60 h.p. now at Mersina, and to import another similar one. The hours of lighting will be diminished on nights when the moon allows this economy. The fees payable to the company are to be reduced.

TRADE OF DAMASCUS.

H.M. Consul at Damascus, in a recent report, states that the market is at present still rather over-stocked with most commodities, and the steady rise in the rates of the Egyptian (and, consequently, the English) pound to local gold has resulted in British goods bought previously fetching smaller prices in Syria than in the United Kingdom. At present most orders are going to countries where the exchange is low—Germany, Austria, and Italy. It is thought, however, that when stocks are exhausted there may again be a limited demand for good quality United Kingdom goods. It is not possible to compete in the cheaper qualities. The following is a list of goods which the Consul has furnished as being most likely to find a sale in Damascus, and he suggests that United Kingdom exporters interested may care to furnish him with catalogues dealing with these lines for distribution to local commission agents and display in the waiting-room at the Consulate:—Motor-cars, lorries, and accessories; cycles, motor cycles, side-cars, and accessories; electric light fittings and shades; safes, cash and deed boxes; tools; wood-fuel portable kitchen ranges made with piping and on the same principle as heating stoves (that is, not intended to be built into the wall); heating-stoves burning wood; stirrups, bridles, and bits; cartridge-loading requisites; boots and shoes of good quality; toilet preparations; table glass and crockery of good quality. Catalogues, which should preferably be printed in French, should be addressed direct to H.M. Consul, British Consulate, Damascus.

TENDERS INVITED.

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Pantaloons.—The Egyptian War Department invites tenders for the supply of Bedford cord pantaloons. Particulars can be obtained from the Inspecting Engineer to the Egyptian Government, Queen Anne's Chambers, Westminster, S.W.1. June 17.

Bookbinding Cloth.—The Egyptian Government Press invites tenders for the supply of 4,600 metres of bookbinding cloth. Tenders will be received by the Controller of Printing and Stationery, Cairo. June 30 (D.O.T.).

Metal.—The Controller of Printing and Stationery, Old Ismailia Palace, Cairo, invites tenders for the supply of 27,200 kilos of virgin metals for printing type. June 30.

Clothing, etc.—The Ministry of the Interior, Egypt (Lunacy Division) invites tenders for the supply of clothing and household requisites to the Abbasiya and Khanka Asylums. Tenders, on the proper form and accompanied by a provisional deposit of 2 per cent., are to be submitted to the Lunacy Division, Abbasiya. July 11 (D.O.T.).

Calcium Carbide.—The Egyptian Postal Administration at Alexandria invites tenders for the supply of 15,000 kilogrammes of calcium carbide for acetylene gas light plants. Quotations should comprise free storage at the sole risk of the contractor and free delivery (by periodical partial supplies during the year) at 62 railways or river stations specified.—(D.O.T.), July 15.

Beans, etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 150 kilos beans, 150 kilos barley, and 4,000 kilos tibia, required for four months commencing August, 1921. July 16.

Silk.—The Central Stationery Stores, Cairo, invites tenders for the supply of silk for the Hejaz. July 23.

Yugoslavia.

Disinfectants.—The Ministry of Communications, Belgrade, invites tenders for the supply of the following disinfecting materials:—40,000 kilos of pink chloride powder (without iron supplements and without free chlorohydrogen acid); 700,000 kilos of creosote (with the following specifications: minimum 5 per cent. of phenol, cresol, and their "homologues"; it should be liquid at 15 degrees C.). In the offers, which must bear a ten dinars duty stamp, prices must be stated all charges paid Belgrade or port. They must be enclosed in a sealed envelope and addressed "Ekonomsko Odelenje Ministarstva Saobracaja." On the envelope should be written "Ponuda za licitaciju pinkhlorida i creozota." June 22 (D.O.T.).

Oil.—The Ministry of Communications, Belgrade, invites tenders for the supply of the whole or part of the following:—799,500 kilos of locomotive and wagon lubricating oil for summer use; 931,500 kilos of locomotive and wagon lubricating oil for winter use; 770,000 kilos of cylinder lubricating oil; 422,000 kilos of cylinder oil for overheated steam; 340,000 kilos vegetable (colza) oil for illumination; 706,000 kilos of oil for Diesel motors; 35,000 kilos of oil for dynamo engines; 25,000 kilos of oil for cleaning; 8,000 kilos of cylinder oil for Diesel motors; 10,000 kilos of machine oil for Diesel motors; 1,200 kilos of special oil for mechanical instruments; 1,370,000 kilos of petroleum; 484,000 kilos of petrol. A deposit of 10 per cent. for S.C.S. subjects, and 20 per cent. for foreigners has to be made before or on the date of tendering. Offers must bear a ten dinar duty stamp. Offers should be enclosed in a sealed envelope addressed to the "Ekonomsko Odelenje, Ministarstva Saobracaja," with the inscription: "Ponuda za licitaciju petroleuma." June 24 (D.O.T.).

Iron Wire, etc.—The Ministry of Posts and Telegraphs invites tenders for the supply of 130,000 kilos iron wire, covered zinc, 4 mm. dia.; 5,000 kilos galvanised iron wire, 2 mm. dia. for connection; 80,000 kilos curved transporters (Type 2); 80,000 kilos isolators No. 2. Tenders must bear a tax stamp for 10 dinars, and must be accompanied by a bank guarantee for 20 per cent. They should be sealed and addressed to the "Direction Economique du Ministere des Postes et des Telegraphes," bearing the word "Offre." Tenders must be submitted to the Chancellor's Office of the Section Economique du Ministere des Postes et des Telegraphes, 73, Rue Deligradska, Belgrade, before 11 a.m. on June 27.

Copper Sheets, etc.—The Ministry of Posts and Telegraphs invites tenders for the supply of 5,000 copper sheets for underground conductors; 1,000 metres "Bergmann" pipes; 3 dynamometres iron wire, dia. 3 mm.; 3 dynamometres iron wire, dia. 3 mm.; 3 dynamometres bronze wire, dia. 3 mm.; 3 dynamometres bronze wire, dia. 4 mm. Tenders must be submitted to the Chancellor's office of the Section Economique du Ministere des Postes et des Telegraphes, 73, Rue Deligradska, Belgrade, before 11 a.m. on June 27.

Wire, Etc.—The Ministry of Posts and Telegraphs of Yugoslavia invites tenders for the supply of the following material:—(1) 18,000 kilos of iron zinc wire, 80,000 curved carriers, and 80,000 porcelain insulators; (2) 250 complete sets of tools; (3) 3 light motor vans (half closed). Tenders close June 29, June 30, and July 6 respectively (D.O.T.).

THE FINANCES OF EGYPT.

DRASTIC ECONOMY NECESSARY

(FROM OUR CAIRO CORRESPONDENT.)

The note on the Budget, which is usually published on April 1, has been delayed this year because, as is explained by Mr. Dowson, the Acting Financial Adviser, it was deemed desirable to obtain a more accurate statement than is usually necessary of the actual financial position of Government at the termination of the preceding financial year. The details now given confirm the unofficial statements in circulation regarding the difficulties which the financial authorities have encountered in drafting the new Budget.

Mr. Dowson sketches the effect on Egypt of the sudden fall in the price of cotton, which constitutes the country's principal product and the great bulk of her export. Although the agricultural population have suffered very severely, they are the very classes which had been able to accumulate profits practically untouched by taxation during the boom, and cultivators have in the majority of cases been able to hold their stocks without financial assistance. This is clearly brought out in the section devoted to Government intervention, where it is stated that the special measures taken by the Government, to meet the demand for assistance, such as facilities for ginning and storing without sale, attempts to foster agricultural societies, advances on cotton, purchase of cotton from small cultivators, etc., have been taken little or no advantage of.

The Financial Adviser refers to the pressure brought to bear on the Government, in proportion as cotton prices dropped, to take action to maintain the market price, but most of the proposals submitted were economically unsound and highly speculative, and the Government had to restrict its intervention to the measures already mentioned, to which must be added the restriction of the cotton-growing area.

The general drop in prices has very seriously affected Government finances, for when revenue falls off expenditure cannot naturally be immediately reduced to a corresponding extent, and the Government has in consequence been faced with the prospect of a deficit in the State accounts. The Acting Financial Adviser points out that during the years of high prices considerable additions were made to the reserve fund until, on March 31, 1920, it stood at over £E17,000,000, and that it has been collected and maintained solely that it may be drawn upon in time of serious financial set-back. He considers, therefore, that drafts on it to meet the deficit in question are legitimate finance. The reserves had, in fact, been reduced to about £E3,000,000 at the end of March, 1921, owing to depreciation in stock of £E1,175,000, and to a deficit on the year 1920-1921 of £E12,900,000.

The latter item is due to a certain extent to high cost of living allowances to public servants, but mainly to national food subsidies and emergency coal purchases, and Mr. Dowson defends the policy underlying these three heads of abnormal expenditure. Government servants had to have some relief from the very serious position in which they were placed by the increased wealth of the agricultural masses and the consequent raising of the cost of living. It was eminently desirable to maintain food supplies at reasonable prices for the masses, not only to save a famine, but also to avoid the political effect to which in a country like this famine might give rise; and in view of Egypt's dependence for fuel on supplies from abroad and the need thereof for agricultural pumps and transport the Government had in the general interest to take steps to guarantee the necessary supplies. On the whole, one is inclined to agree with the action taken on these lines, but at the same time there is no doubt that sufficient foresight and care were not taken in the purchase of the quantities necessary; otherwise such a loss as £E12,000,000 would surely have been avoided.

An interesting section of the note is that devoted to the question of scientific research and its value to the economic life of Egypt. Mr. Dowson indicates the lines upon which such research could be most usefully prosecuted, and is of

opinion that the importance of such work is so great and failure may be so dearly paid for that no consideration of politics, persons, or race should be allowed to hamper its steady prosecution. Amongst the subjects advocated by him are: the factors that cause and regulate rainfall within the catchment basin of the Nile, which must be essentially understood before the accumulated waters of the river can be utilised to the best economic extent; cotton production, in connection with which every assistance and encouragement must be given to the utmost scientific research so as to enable the country to maintain its lead in superiority of quality and increase in yield; the prevention of disease, which has an economic importance to the Egyptian public, which depends for its wealth on manual labour in the fields; the extension of fisheries; the prospecting for petroleum so as to render Egypt less dependent on foreign markets for fuel supplies; and the proper collection and collation of statistics so as to assist scientific research and the proper economic development of the country. Mr. Dowson adds a warning that while scientific research on these and kindred subjects should be prosecuted without delay, the lessons resulting therefrom are largely dependent upon the education of public opinion, and should only be applied very gradually in advance of such opinion.

As already announced, the Budget for the current year is balanced by a draft on the reserve of £E1,981,000, which, after allowing for certain important receipts, will reduce the reserve funds to about £E2,500,000. Much will depend on the efforts made by the Departments to save money during the year, for there exist heavy arrears of maintenance and renewals as a legacy of the war, which can only be accomplished as the resources of the country and the imperative needs of its current life permit. Naturally, this rebuilding should take precedence of all new undertakings, though it is to be hoped that means will be found to continue the urgently needed irrigation works and to carry out a scheme of such economic importance as the establishment of the State university which, together with the irrigation works, has had to be postponed for lack of funds. The Financial Adviser foresees that the essential calls for expenditure during the next decade will exceed public revenue, and the outlook is certainly an anxious one, in view of the restrictions placed at present on the Government's power of taxation. The removal of this limitation will undoubtedly relieve matters, but Mr. Dowson gives a warning that too great hopes must not be placed upon the possibilities of an increase in the public revenues as a result.

In regard to the execution of work which is urgent and has to be postponed, Mr. Dowson replies to those who have advocated the raising of the requisite money by public loan. He points out that during the past half century Egypt's indebtedness has been a serious obstacle in the path of her national welfare and progress, and he considers that it would be imprudent to pledge any further the future revenues of a country whose national wealth depends upon a single staple commodity.

Incidentally, Mr. Dowson very rightly deprecates the continuance of the policy of State interference in the field of commerce and economics, the time for which has now passed. In this respect one cordially agrees with him, as also in his remark that whatever lessons research may give only the nation as a whole can apply the knowledge thus gained in the detailed manner and on the wholesale scale necessary for success.

He points out that while the large excess of imports which has resulted from the fall in cotton prices has, together with other factors, made considerable inroads on the net accumulated resources of the country acquired during and since the war, these have only been reduced by a third, and they are still estimated at upwards of £E100,000,000. One-third is represented by notes in the hands of the people, more than one-third is deposited in the banks, while the balance is represented by direct investments not only in foreign but largely in Egyptian securities purchased abroad. During the last year large blocks of Government and other Egyptian securities have, in fact, been transferred to Egyptian account, and at least one-third of the Public Debt is held in or by Egypt.

As he says, a country which has not increased its debt during the war, but has, on the contrary, repaid a considerable portion of it, and built a credit balance on the other side, is in a position to withstand even such a severe shock as the present. He adds that the country must be prepared for a period of depression which may prove a very severe one, as her national income has been reduced almost to pre-war level, while the prices of her purchases from abroad have not fallen in the same proportion. This situation will involve drastic retrenchment in expenditure, and even distress and loss in individual cases; but one must agree with him that the financial position of the country is fundamentally healthy, and that there are just grounds for expectation that, so long as its vital resources remain unimpaired, it will surmount its immediate difficulties and continue to enjoy prosperity, though possibly on a more modest scale than during the recent period of unexampled inflation.

THE COTTON CRISIS.

I.—THE AMERICAN CROP POSITION.

By E. C. de Segundo, A.M.I.C.E.

The world cotton position—and pre-eminently the cotton position in Great Britain—is largely, if not entirely, dominated by the character of the American cotton crop, because just that type of cotton which constitutes from 70 per cent. to 80 per cent. of the requirements of our Lancashire spinning mills is at present almost exclusively grown in the United States, although there are large areas throughout the British Empire where climate and soil are suitable for the cultivation of this variety of cotton, and the untiring efforts of the British Cotton Growing Association, extending over a number of years, have shown beyond doubt that the British Empire could easily produce all the cotton of the various grades needed for the maintenance and development of our spinning industry. With characteristic indolence we have allowed matters to drift, and have taken for granted that we should always be able to draw supplies of suitable grades at suitable prices from the United States. This sense of false security has, no doubt, been fostered by the well-intentioned efforts of American cotton growers, notably at the Cotton Conference held in 1907 at Atlanta (Georgia), at which both American and European cotton manufacturers were assured that they could rely with confidence upon the American cotton belt producing all the cotton required by the world's ever-increasing demands, and that the opening up of other cotton fields was unnecessary. At the same time, however, American manufacturers made it clear that their intention was greatly to develop the cotton spinning industry in their own country, the Director of the United States Bureau of Agriculture stating that he looked forward to the time when the greater part of the American cotton crop would be worked up in American spinning mills, so that the United States should retain the large profits accruing from the further manipulation of the raw cotton at present exported by the United States. This forecast has been in a great measure realised, the proportion of the American crop spun in American mills, which in 1907 was about 38 per cent., having reached nearly 60 per cent. in 1917-18, although it is now a little lower. But the American cotton crop has not, on the whole, increased since 1907, when it was 13,500,000 bales. Including the bumper crop of 16,000,000 bales in 1912, the average crop since 1907 has not been much over 13,000,000 bales.

Now, these statistics do not, of course, tell us the whole story. The quantity of cotton available for export depends not only upon the proportion retained in America for spinning purposes, but upon the actual size of the cotton crop. It is conceivable that if the American crop be largely reduced for one reason or the other, the quantity available for export might—other things remaining the same—approach zero. One of the unfortunate effects of the world-war has been radically to alter the economic relations upon which prices and values were established before the war. Most of us, and in particular manufacturers, formed the idea that owing to the decreased production of commodities during the war there would of necessity be an unprecedented demand for all manufactured products on the conclusion of hostilities. Few seemed to bear in mind the axiom that for every seller there must be a buyer, and few realised that the world would be left immeasurably poorer after the war than before. It is certainly the fact that in the spring of 1920 there was every appearance of a boom in trade and industry in this country, and manufacturers redoubled their efforts to produce goods in anticipation of the expected post-war demand. The promise of the spring of the year 1920 was short-lived, and while it is as yet early days to form a reasoned judgment, there seems little doubt that the increase of the Bank rate to 7 per cent. in April, 1920, and the increase by 50 per cent. of the excess profits duty, in direct contravention of what the business community had been led to expect, severely checked all enterprise and activity in trade. The position to-day is that manufacturers are overstocked with goods produced at high prices, which can only be slowly absorbed because the purchasing power of the world, as a whole, has been very considerably reduced. Clearly production has had to be severely curtailed, with the natural result that the demand for raw materials has diminished and prices have fallen away.

Perhaps the most sensational fluctuation in prices has taken place in the case of cotton, which at one time during the war reached a price in this country comparable only with that during the American Civil War. Since July, 1920, the price of cotton in the United States has declined from 43 cents to 12 cents per lb., and the American cotton industry is to-day in a very parlous state. In spite of recent reductions in the cost of labour, the average cost of growing cotton in the United States is stated to be about 25 cents per pound this season. It does not call for the wisdom of a Solomon to forecast the inevitable effect of

this upon the forthcoming American cotton crop. You cannot expect any sane person deliberately to grow cotton at 25 cents a pound with the prospect of selling it at 12 cents, and, even should a few enthusiastic speculators be optimistic enough to think that "somehow or other" the price of cotton must rise greatly during the next few months, it is not probable that the banks and other financial interests in the United States will be over anxious to finance the planter in the circumstances as we know them to-day. That the forthcoming American cotton crop will be considerably reduced is inevitable, but it is not so easy to say to what extent. The most optimistic estimates point to a reduction of 30 per cent., the least optimistic to a reduction of 50 per cent., as compared with the last crop.

Opinions upon the immediate effect of a short cotton crop in America on the British industry are sharply divided. The carry-over of cotton last year is stated to have been the largest on record, and it is estimated by some authorities to be as high as 15 million bales.

It is all very well for optimists to say that the world is screaming for commodities of all kinds, and to argue that in increased production lies the way to economic salvation. These good people again forget that it is of little avail to produce commodities at a price the buyer one wishes to attract cannot afford to pay. After all, money is only a sign, as Montesquieu has told us, and, in ultimate analysis, the world's trade is based upon the principle of barter. It is manifestly a condition *sine qua non* of the rehabilitation of our export trade in cotton goods that our spinners be placed in a position to obtain their raw material, and the necessary labour and power, on terms and conditions that will enable them to put their manufactured products upon the market at prices within the reach of buyers. The British cotton spinning industry is one of the largest and most important of our staple industries. The value of cotton goods exported (before the war) was about £114,000,000, or about one-quarter of the value of our whole export trade. Our very existence as a first-class Power depends upon the rehabilitation and maintenance of our export trade, for only by this means can we continue to pay for the enormous quantity of foodstuffs we have to import annually. The deplorable conflicts in the coal industry have already deprived the country of a considerable portion of her revenue, and the vital necessity of maintaining our exports of cotton goods has become doubly acute. There should no longer be the slightest doubt in the minds of anyone having this country's interests at heart of the absolutely vital necessity of producing, within the Empire, the supplies of cotton required for our spinning industry. But no one, within the British Empire or without, will grow cotton unless it pays in competition with other crops. Hence, any means by which the revenue derived from the cultivation of the cotton plant can be increased will naturally operate as an inducement to the planter to grow cotton. Many ways have been pointed out whereby efficiency in the growing of cotton can be promoted, but most, if not all, of these methods involve organisation and time for development. It is, therefore, interesting to note that in last week's issue of THE NEAR EAST attention was drawn to one way that lies close to our hand, namely, by turning to adequate account the hitherto neglected residual fibres retained by the majority of varieties of cottonseed after ginning. I propose to deal with this subject in a future article.

Applications from intending exhibitors at the Prague Industrial Fair, which is to be held in the autumn, have been so numerous that the committee have been obliged to reject several hundred applicants, and also to restrict the space previously reserved. About 200 French firms, as well as large numbers from Belgium, the United States, and Japan, will be represented.

ENGINEERING TOPICS.

By our Engineering Representative.

The New Bridge.

The rebuilding work in connection with Southwark Bridge was commenced about ten years ago, but, like several other pieces of engineering work not of immediate importance, it was suspended on the outbreak of war. At the earliest opportunity after the armistice work was recommenced, and the new bridge was crossed by a carriage for the first time a few days ago when the King, who was accompanied by the Queen, drove to Southwark after performing the opening ceremony.

The new bridge, whilst making no pretence towards originality from an engineering point of view, either as regards design or methods and material used in construction, is nevertheless a very fine piece of work, and one of which all concerned may well be proud. In its way it is as fine an achievement as the widening of Blackfriars Bridge, a task which was beset with many difficulties unknown to and not realised by the general public.

most conspicuous mark of that process of evolution which has changed the complete self-contained city of the past into what it is to-day. . . .

The point in H. M.'s reply lies in the regarding of the river as the chief highway of the City. Our forefathers were wise in so doing. As time was not of chief consideration they gained immensely by the use of the water for light passenger and cargo-carrying craft. They did their business largely by skiff and wherry when the opposite side of the river had to be visited, and the unspoken thought at the back of H. M.'s mind may have been a query as to why it is not possible to-day to make greater use of the magnificent waterway as a means of communication. Granted that time was of little value in the old days compared with its worth to-day, are we not driven to the admission that, just as the value of time has increased so has the efficiency of our engineering devices. In that case it would seem to be that our neglect of our river arises either from lack of apprecia-

THE NEW SOUTHWARK BRIDGE.

(Photograph taken by kind permission from Messrs. J. Spicer's wharf.)

[Near East Special.]

The chief difference between the old and the new bridge is that, whilst originally three cast-iron arches carried the whole of the traffic, in the new design the load is taken up by five steel arches built of steel specially selected, after exhaustive tests for the purpose. The new bridge will be able to carry considerably more traffic, both foot and vehicular, than the old, as will be realised when it is pointed out that the width of the roadway has been increased from 29 to 35 feet, and the footpaths on either side are 10 feet in width instead of just over 6 ft., as in the case of the older structure.

It was not, however, by reason of its inadequacy to carry the traffic that the old bridge was superseded. The design of the approaches was faulty in the extreme, the gradients leading to the bridge on either side, and the curvature of the structure itself being such that it was a matter of difficulty to get heavy horse-drawn loads up the slopes. The arrangement of the arches, too, was such as to interfere unduly with river traffic, and in both these respects considerable improvements have been made. The new arches, although more in number, offer less obstruction, and the gradients have been reduced by no less than 7 feet, the bridge being now quite as easy for traffic as either Blackfriars or Waterloo.

Engineers will find a certain amount of food for thought in the reply of the King to the address handed him by the Lord Mayor. He said: "Nowhere in the world is there a traffic problem equal in importance and difficulty to that which is presented by the site and construction of the City of London. Every day more than a million people have to be brought into this famous square mile and taken out again, and provision must be made for an immense circulation of goods between warehouses, factories, and railway stations. One of the chief difficulties in the smooth working of this huge traffic is the division of London into two parts by the river. . . . For many centuries our ancestors could rest content with one bridge, because they regarded the river not as a barrier, but as the main highway of the City. The gradual increase in the number of Thames bridges is the

tion of the facilities it affords or from a lack of knowledge as to how to make use of them.

The Motor Show.

The proposal, or, rather, the intention of the Society of Motor Manufacturers and Traders is to hold the forthcoming Automobile Show in two sections, as last year, one being housed at Olympia and the other at the White City.

So far as my information goes, there is considerable dissatisfaction amongst those exhibitors who were allotted space at Shepherd's Bush last November, and something approaching the nature of a revolt is threatened. Candidly, I do not wonder at it. Readers of THE NEAR EAST will remember my criticisms of last year's arrangements, which were faulty in the extreme. The White City side of the Show was singularly neglected by the public, and not even the attraction of being hustled into queues, marshalled about by youths in authority, and driven like trippers through West London in charabancs between Olympia and Shepherd's Bush seemed to appeal to them. True, some of the more adventurous, perhaps feeling something of the enthusiasm and the daredevil spirit of those who go slumming, essayed the journey, but I think they were comparatively few in number. Evidently the English love of wild adventure is dying out.

The White City section of the exhibitors have already held a meeting to consider their position, and I understand that they are sending a deputation to the Society of Motor Manufacturers and Traders in order to make a dignified but at the same time vigorous protest. Their view, which is undoubtedly correct, is that the White City Show is looked upon by the public as being of a secondary character, and that in consequence it does not attract either the class or number of visitors that go to Olympia. As a result, they have no chance against their older-established rivals, who are able to exhibit their products at the more popular section.

It is not that the White City had any reason to complain as to the quality of the exhibits; the whole point is not that the choice was poor or unfair, or that exhibitors there were shut out of the fold, as it were. The point simply is that, as I said at the time, Olympia would certainly be visited first, and after that very few members of the public would trouble to go down to Wood Lane. It is admitted by all in the trade that what may be termed the old brigade of motoring firms—the Rolls-Royce, Napier, Wolseley, Lanchester, Vauxhall, Daimler, Darracq, Renault, and others who have been pioneers of a great industry, and who have made painstaking and untiring efforts to build up the trade—should have pride of place; but in saying that one gives away the whole position. By admitting that Olympia is undoubtedly the best venue one tacitly admits the White City's inferiority, and it is at that point on which emphasis is being laid by the more discontented. At the White City there were such well-known firms as Hispano-Suiza, Packard, Spyker, Farman, Vandys, Argyll, Jarrott, Chenard-Walcker, Metallurgique, and a host of others whose exhibits were not seen by the public to the anticipated extent. The entire light car section of the industry suffered by the aloofness of the visiting public, and it must be admitted that it is not in the interests of the British motor trade that so important a branch should be side-tracked, so to speak.

The alternatives are the holding of the show at a more suitable locality, where every car can be displayed to advantage, and where ample ground is available for demonstration purposes; where unlimited visitors can be accommodated, and where the immense growth and development of the motor business can be appreciated, or by the holding of the show in two sections at two distinct dates. The ideal place for the exhibition is not far away, and, as I said to the S.M.M.T. last year, "Get back to the Crystal Palace." There is no building in Europe more suitable in every way. No matter what arrangements have to be cancelled, or contracts broken, or penalties paid, the Crystal Palace is the place for the 1921 Show, and the sooner the S.M.M.T. recognise the fact and commence their preparations the better.

Oil or Coal.

It is interesting to note that the coal strike has had the result of inducing a large number of firms to substitute oil fuel for coal. Not only has this course been adopted by the majority of the largest power-producing concerns, but throughout the north of England, particularly in Sheffield and district, it is being used with marked success for heating steel, small forgings, raising steam and, in at least one instance, as the fuel for steel melting furnaces.

I hear that a Sheffield firm, the Lawton Machine Tool Company, are specialising in a new oil burner that can be adapted immediately. It is simple in design and construction, is so reasonable in cost, and so quickly and cheaply installed, that there appears no reason whatever why every works that has a Lancashire, Cornish, marine, or other type boiler should not immediately fit one of these burners to each furnace. I gather that the only part that fits in the furnace is a half-inch tube, which goes through a hole in front of the furnace just above the doors; and a small tank, rectangular, circular, or any shape that will contain from 30 to 500 gallons, can be rested on the top of the boiler, so that the oil can be fed by gravity to the burners.

A fitter who has a small tank and a length or so of half-inch piping can equip a boiler furnace within the space of one or two hours; and the apparatus, when not in use, does not interfere with the original methods of stoking with coal fuel. Thus the oil service may either be used for emergency only or for constant purposes. The cost of oil is possibly slightly higher, power for power, than that of coal, but there is no trouble in stoking and no waste in ashes or cost of removing clinker. I hear that several Sheffield firms have already had their boilers fitted with the Lawton burner, and express complete satisfaction at the results obtained.

A Rolls-Royce Note.

Lord Reading, the recently appointed Viceroy of India, is a keen motorist and a discriminating "judge" of good cars. Before sailing to take up his viceregal duties his lordship purchased one of the latest Rolls-Royce cars, with limousine body, which presents a remarkably handsome appearance, and has peculiarly graceful lines. In Lord Reading's progress from city to city the Rolls-Royce will be a fitting equipage to carry the man who represents the King Emperor of India, and will assuredly impress the Indian population.

The T.T. Races.

I hear that in connection with the daily service of steamers to the Isle of Man between Liverpool and Douglas which is being run during the week the Automobile Association has arranged for A.A. patrols to assist motor cyclists embarking at Liverpool.

EMPIRE COTTON GROWING.

GRANT OF £1,000,000.

Mr. Winston Churchill, Secretary of State for the Colonies, made a notable speech on the occasion of the dinner of the British Cotton-Growing Association at the Midland Hotel, Manchester, on June 7, at which Lord Derby presided.

Reviewing the progress that had been made by the British Cotton-Growing Association, he said that small beginnings had developed into a considerable enterprise. Jungles which bloomed in their pristine exuberance had now turned into cotton plantations which were sending every year substantial cargoes of useful and even of superior cotton to the Lancashire mills. The Northern Nigerian Railway, which they planned together—even in that very hotel—which Lord Derby, the father of the chairman that night, pressed upon the Government of the day—was now prosperous and carrying a heavy traffic. A railway in East Africa which he applied for in vain in 1906 was now at work, and a whole new cotton-growing province had sprung into being. That province, which did not exist a few years ago as an economic entity, exported to Lancashire last year more than twelve times the total Imperial production of cotton when he was last at the Colonial Office.

Those achievements were gratifying and encouraging, and in the main they vindicated the work of Mr. Joseph Chamberlain, Lord Rosebery, and others to whom was owed the acquisition of those fertile African possessions. But although the progress had been constant, it had been on a comparatively small scale. The cotton produced within the British Empire was only one-fortieth of what was needed to keep the mills of Lancashire in full activity. Nearly three-quarters of their whole supply still came from the United States. On that they must for years and generations count. But he wished to draw attention to two adverse and even menacing tendencies. First of all, they owed a great debt to the United States. It prejudiced their exchange and made buying from without less profitable than purchasing within their own bounds. In the second place, the United States itself was consuming a very high proportion of its own cotton crops, and, one must feel, would go on increasingly to do so. Even though the American cotton supply was continually extended, the surplus available for foreign export, upon which the life of Lancashire depended, would only be obtained in competition with ever-increasing domestic demand in the United States. That was a formidable fact, and a realisation of its existence had led to the formation of that association.

Cheapness of production was essential to the continued industrial power and survival of Great Britain, and particularly to the Lancashire cotton industry. The great Eastern markets which Lancashire served to such a great extent contracted almost instantaneously when prices were unduly raised to the native consumer. The native consumer quite easily did without the product. They were not in the position of compelling him to take the product. Cheapness required a steady and abundant supply of raw material. They could not obtain a steady and abundant supply of raw material without numerous and various sources of origin, so that the climatic conditions in one part of the world should be averaged out against the climatic conditions of another. In no other way could they insure against exceptional variations of nature or against the manoeuvres of speculation. Much had already been done, but it was little compared with what might have been done or with what yet remained to be done.

The neglect to develop the tropical possessions of the Crown was one of the most extraordinary features, to his mind, in the history of the last twenty years. Let them give those great, fertile, teeming, virgin countries the scientific, modern, technical apparatus and the transport facilities they required, and they would return a plentiful reward for every pound invested in them. Every pound would go out to those countries, and could only go out, in the shape of the products of British labour, and for every pound would come back raw materials such as cotton, rubber, fibre, and half a dozen other things, by which the industries of Great Britain would be nourished and revived and strengthened for the future that lay before them. It was a process that benefited everybody, and he would like to testify to the fine attitude of the British Cotton-Growing Association in keeping their word so strictly to the natives of West Africa in regard to the purchases of cotton which had been undertaken, without any doubt or question, although at a very great sacrifice.

He applied this principle of inter-Empire trade to the whole scope of the British Empire. Within the circle of the British Empire they found almost everything that they required for their great central world-wide industry here. Let them develop it. Let them establish ties and connections here and there across the world with those who were united to them by political association within the circle of the Empire. That was not to say that they should exclude all those great and varied branches of commerce into which British enterprise and Lancashire enterprise had penetrated, and without which they could not maintain themselves at their present altitude. But he did say they ought actively to push and develop and foster the growth of inter-Imperial trade, whether in their tropical Crown dependencies or their great self-governing dominions.

They had lately become responsible for two other countries, Palestine and Mesopotamia, and they would do their duty by them. But he did not hesitate to say, speaking as the Colonial Secretary, that he grudged the enormous military expenditure which these new acquisitions had demanded of them. He wished they could reduce that expenditure. He would do his very best

to cut it down, and he hoped to show them by deeds, by actions which spoke louder than words, that before a year was out it would be a substantial cut. But in Africa the population was docile and the country fertile; in the Middle East the country was arid and the population ferocious. A little money went a long way in Africa, and a lot of money went a very long way in Arabia. His efforts would be directed in the sense which these cryptic observations indicated.

The second source of cotton supply was Egypt and the Sudan. All their affairs there were hampered by the political instability and uncertainty which prevailed, and which ought to be terminated, and would be terminated, he hoped, before very long. Their relations with Egypt must undergo a change in character. They must do all in their power to secure an honourable status for the Egyptian people, and one which would render their co-operation with the British Empire easy and simple to them. These were matters of great consequence to Lancashire. Egyptian cotton was second only in quantity to that of the United States, and superior in quality. He was bound to say that he did not regard their great work in Egypt as finished. He did not think the time had yet come when the British armies should withdraw and be relegated to living upon condensed water on the banks of the Suez Canal while the mobs of Cairo and Alexandria made short work of the European and foreign populations, and of the great constructive toil and achievement which forty years of British administration had secured.

The funds of the British Cotton-Growing Association had been placed on a much more durable foundation by decisions which they had taken and carried out. The levy of sixpence a bale on the cotton imported into the country for the purpose of developing cotton-growing within the British Empire had now acquired the assent of 90 per cent. of the spindles of Lancashire. The Government had promised £50,000 a year, conditional upon this contribution, this act of self-determination on their part, and this year in the estimates of the Board of Trade £50,000 was taken as the first of five yearly instalments. But it happened that during the war they became co-operators with the Egyptian Government in the transportation and marketing of their cotton, in order to secure the sale of the cotton, which otherwise would have been interrupted by the dangers of the sea and the savage submarine warfare. Out of this joint operation between Britain and Egypt £4,000,000 of profits were made, and it was agreed that this should be divided between the two countries. On consideration, however, the Government had decided to devote £1,000,000 of its £2,000,000 to the care of those who had been injured or had suffered from the conditions of forced labour which were imposed during the war upon large classes of the Egyptian population. It had been decided to devote the other £1,000,000 to the fostering of cotton-growing within the British Empire.

Sir Montagu Webb has been elected chairman of the Karachi Chamber of Commerce.

A catalogue and reading-room has been opened by the Government in Palestine for the benefit of the general public, and catalogues are requested from business firms in Great Britain. Catalogues may be printed in English, Arabic, Hebrew, or French, and should quote prices.

There were exhibits from 100 firms at the 13th International Automobile Exhibition at Prague, which closed on June 5, seven nations being represented. Ten firms exhibited motor-cycles, while accessories were shown by 33 firms, mostly from foreign countries.

FOREIGN EXCHANGES.

Country.	Method of Quoting.	Parity of Exchange.	Latest Quotations
Alexandria	Piastres to £	97½	97½
Athens	Drachmas to £	25'22½	60'50-61'50
Belgrade	Dinars to £	25'22½	125-130

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—Business has been rather better than in the previous week. Currants have been in fair request. The supply of sultanias is very inadequate, and rates are again higher. The demand for Persian dates continues. Figs are going into consumption rapidly, and stocks are being depleted.

Sugar.—Home refined has been in fair request at the official rates. West Indian crystallised is down 5s. at 48s. to 54s., and American granulated at 50s. 9d. is 1s. 3d. lower. Czecho-Slovakian has shed 6d. at 31s. 6d.; while white Java at 22s. has dropped 1s. Quotations are:—June-July, 19s.; August, 18s.; September, 18s.; October, 15s.; November, 14s. 6d.; October-December, 15s.; and December, 14s. 6d.

Coffee.—Futures market has remained steady. Quotations are:—July, 42s.; September, 43s. 3d.; December, 44s. 3d.; and March, 44s. 9d.

Oilseeds.—A firm tone has prevailed during the week. Indian linseed has gained 1s. 3d. at 20s. and La Plata 2s. at 19s. Rapeseed is lower, with Toria at 20s., and bold Ferozepore at 19s. 6d. down in both cases, while brown Cawnpore at 18s. 6d. is unchanged. Cottonseed is higher, with Egyptian black 1s. up at 11s. 3d.

Oils.—There has been very little change in prices. Linseed oil is 2s. 3d. up at 34s. 6d. Rape oil is unaltered, with crude at 54s. and refined at 62s. Refined cotton oil at 42s. and deodorised at 48s. are the same, but Egyptian crude has gained 6d. at 35s. 6d. Turpentine during the week has shed 11s. to 74s.

VINES DAMAGED BY RAIN.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, May 29.

According to a telegram received from Smyrna by the Ministry of Agriculture, the heavy rains which fell recently in that region caused a damage of about 15 per cent. to the vines in the districts of Magnesia and Kasamba. On the other hand, the rains in the Oushak region will prove very beneficial to the production of cereals.

ROUMANIAN AGRICULTURISTS' DEMAND.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 25.

In view of the large crops of wheat, barley, oats, beans, etc., that are expected, the big landowners and agriculturists intend to ask the Government to allow the export of the new crop to be entirely free, as in pre-war times. This would bring about a rapid and considerable improvement of the exchange.

According to official data the aggregate area put under cultivation in the month of April alone amounts to 1,143,025 hectares.

THE CYPRUS HARVEST.

(FROM OUR OWN CORRESPONDENT.)

NICOSIA, May 27.

The barley harvest has been completed in the plains, and the wheat is being reaped. It is still too early to speak of the carob crop and the vines, but the outlook is so far favourable.

The s.s. Aquitania, which burnt oil as fuel, has beaten the s.s. Mauretania, which was burning coal, in a race across the Atlantic by the big margin of 29 hours.

A Yugoslav industrialist is negotiating on behalf of a syndicate with Czechoslovak manufacturers to form a limited company for the purpose of establishing a textile industry in Yugoslavia.

The annual meeting of the British-Armenian Chamber of Commerce will be held at the London Chamber of Commerce on June 29 at 3 p.m. Prior to the meeting a luncheon will be held at the Cannon Street Hotel.

H.M. Chargé d'Affaires at Tangier states that, according to accounts in the local press, it was announced at the meeting of the Mazagan Chamber of Commerce, held on May 13, that the egg Consortium would be abolished as from May 15, after which date there would be no restriction in the price of eggs.

Profits in Foreign Exchange Dealings.

An expert writer has compiled for us a series of Articles explaining Foreign Exchange transactions from the English Investors' point of view. The writer explains the Exchange value of the English £, shows an actual transaction resulting in 60 per cent profit, explains the profit possibilities of the French franc, the German mark, the Italian lire, &c. This Article will be sent free of charge by

THE WINE INDUSTRY OF CYPRUS.

Association of Manufacturers.

(FROM OUR OWN CORRESPONDENT.)

A movement which has been in progress for some time has now taken definite shape, in the formation of an Association of Wine Manufacturers in the Limassol district—the chief producing area. In order to place Cyprus wines on a higher footing, an entire rebuilding of the whole industry would be necessary. Many years ago a French expert was invited to report on the vines, with a view to the adoption of better methods of cultivation. And again, some ten years ago, a Commission was appointed by the High Commissioner, Sir Charles King-Harman, to report on the industry. But the results have been in each case disappointing, as very little practical effort has been made to give effect to the conclusions arrived at. The present co-operative movement has been brought about among the people themselves, and is a welcome and interesting sign of progress. It does great credit to the promoters, and ought, if well directed, to lead to decidedly good results for a large class of agriculturists now suffering from a fall of prices and general depression.

Whether, in the present state of the world wine trade, Cyprus produce could be so improved as to find new and better markets outside the island is very doubtful; but that there is need for very great improvement in connection with the qualities supplied to existing markets, and everything connected with a strangely neglected business, there can be no question. The object of the Association is to protect the village producers from unfair profiteering on the part of the merchants, to free the wines and spirits from adulteration, which now seriously affects the trade, to teach better methods of vine cultivation, to improve the general system of manufacture, and to facilitate the transport and disposal of wines. The capital of the company, which will probably be soon increased, is fixed at £10,000. The headquarters will be at Limassol, with agencies at Alexandria, Cairo, and Port Said. About 2,500 manufacturers, representing sixteen villages, recently met at Omodhos, one of the largest villages, and approved the draft articles of association. The number of wine villages joining (there are over sixty in the district) is rapidly increasing. The Government warmly supports the movement, and the Agricultural Department has taken an active part in promoting it. The board of directors is to consist of twelve members, to be replaced annually, one of whom will be a Moslem, as many of the Turkish villagers have joined the Association.

With regard to the merchants, who are generally also moneylenders, no doubt the complaints of the villagers as to unfair dealing are largely justified. There are hard and unscrupulous dealers in all branches of trade, here as elsewhere. On the other hand, there are those who deal fairly, and some of the merchants have done a great deal for the improvement of wines and spirits, and the state of the trade, backward as it is, is very different from what it was some years ago, especially as regards red wines and spirits. Progress, however, has been very partial and uneven, and it is time that energetic steps should be taken, having regard to the bad reputation which Cyprus wines in general have acquired in late years, owing not only to careless manufacture, but also to the increase of adulteration in many forms. The strongest complaints have been received from Egypt and elsewhere that quantities ordered have been quite different in quality from the samples submitted. A fair start has now been made, and it is hoped that the movement will continue to be well directed and will be successful.

BRITISH INTERESTS IN EGYPT.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—I understand neither politics nor diplomacy. But those at home who do, and who perchance have business interests in Egypt as well, will be well advised to lift the veil and try and foresee approaching events.

Because, should the British troops leave Egypt and the public security be left to the care of Egyptian Police, supported by the Egyptian Army, then such a panic in prices will ensue as will reduce the commercial status of Alexandria to that of Brindisi, and that of Egypt generally to that of Tunis, within an incredibly short period.—I am, etc.,

CURRENT PRICES.

General Produce.—Bacon, 130s. 6d. cwt.; butter, 171s. cwt.; cheese, 132s. cwt.; chillies, 120s. cwt.; eggs, 18s. 6d. per 120; cloves (Zanzibar), 9d. lb.; cocoa (Ceylon, good to fine), 79s. 6d. cwt.; coffee (Costa Rica), 118s. cwt.; coffee (East Indian, bold), 113s. 6d. cwt.; coffee (Mocha, longberry), 93s. 6d. cwt.; coffee (Santos, superior), 55s. cwt.; coffee (Nairobi), 97s. 6d. cwt.; lard, 68s. 6d. cwt.; hams, 124s. cwt.; ginger (washed Cochin), 37s. 6d. cwt.; nutmegs (110's to 80's), 10½d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok, white), 8½d. lb.; raisins (Valencia), 105s. cwt.; raisins (sultana, Smyrna), 140s. cwt.; currants, 80s. cwt.; sugar (granulated), 61s. 7½d. cwt.; sugar (No. 1 cubes), 63s. 6d. cwt.; sugar (white Mauritius), 57s. 6d. cwt.; sugar (West Indian crystallised), 52s. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 16s. 3d. cwt.; rice (Rangoon, No. 2), 16s. 9d. cwt.; rice (bran, Rangoon), £6 2s. 6d. ton; cinnamon (firsts), 1s. 4½d. lb.; mace (fair Singapore), 1s. 2½d. lb.; tea (Indian, common to good common), 6½d. lb.; tea (Ceylon, common to good common), 6½d. lb.; tea (Java, common to good common), 3½d. lb.; wheat (Australian), 82s. 6d. qr.; wheat (English white), 94s. 6d. qr.; wheat (La Plata), 84s. 6d. qr.; barley (malting), 67s. 6d. qr.; oats (English), 44s. 6d. qr.; oats (La Plata), 30s. 9d. qr.; maize (La Plata), 51s. 6d. qr.; flour, 68s. 6d. sack.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 10½d. lb.; citric, 2s. 6d. lb.; tartaric, 1s. 8½d. lb.; ammonia (sulphate), £17 5s. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £19 ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 139s. cwt. Potassium: Bichromate, 9½d. lb.; chlorate, 5½d. lb.; caustic, £45 10s. ton; nitrate, £54 ton; permanganate, 1s. 9d. lb.; prussiate yellow, 1s. 2½d. lb.; sulphate (90 per cent.), £21 ton. Sodium: Crystals, 145s. ton; bicarbonate, £10 5s. ton; bichromate, 6½d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 10s. ton; hyposulphite, £23 10s. ton; prussiate, 7½d. lb.; nitrate, £18 11s. 3d. ton; glycerine (crude, 80 per cent.), £105 ton; glycerine (industrial), 1260 per cent.), £155 ton; sulphate of copper, £32 ton; sulphate of iron, 150s. ton; lemon oil, 3s. 2d. lb.; quinine, 3s. 7½d. oz.; red lead, £39 ton; white dry lead, £42 15s. ton; white ground lead, £51 15s. ton.

Metals.—Aluminium, £150 ton; antimony (English Regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £16 16s. 3d. ton; copper (electro), £76 10s. ton; gold bars, 105s. 11½d. oz.; iron (No. 3 Cleveland), 130s. ton; hematite (mixed number), 160s. ton; galvanised sheets (24 G), £22 ton; lead (soft foreign), £22 7s. 6d. ton; manganese Pot., 1s. 3½d. unit; molybdenite, 48s. 9d. unit; nickel, £185 ton; platinum, 365s. oz.; plumbago, £25 ton; quicksilver, £11 2s. 6d. bottle; silver bars, 34d. oz.; spelter (G.O.B.), £27 1s. 4d. ton; tin (standard), £172 5s. ton; tin plates (20 by 14), 25s. 3d. box; wolfram, 12s. 7½d. unit; zinc sheets, £36 10s. ton.

Hides and Skins.—Ox and Heifer (first), 90lb. and up, 8½d. lb.; 80 to 89 lb., 8d. lb.; 70 to 79 lb., 8½d. lb.; 60 to 69 lb., 7½d. lb.; 59 lb. and under, 6½d. lb.; (second) 90 lb. and up, 7d. lb.; 80 to 89 lb., 6½d. lb.; 70 to 79 lb., 6½d. lb.; 60 to 69 lb., 6½d. lb.; 59 lb. and under, 4½d. lb.; Cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 7½d. lb.; (second) 60 lb. and up, 5d. lb.; 59 lb. and under, 4½d. lb.; Bulls (first), 4d. lb.; (second) 3½d. lb.; Kips (first), 6d. lb.; (second) 5d. lb.; (third) 3½d. lb.

Miscellaneous.—Cotton (American), 8.25d. lb.; cotton (Egyptian), £12 ton; linseed (La Plata), £17 2s. 6d. ton; rape (Toria), £20 ton; soya beans, £12 10s. ton; palm kernels, £19 15s. ton. Oils: Linseed, £32 5s. ton; soya, £34 ton; cotton (crude), £34 5s. ton; olive (Levant), £82 10s. ton; ground nut, £40 15s. ton; palm, £34 ton; rape (crude), £54 10s. ton; coconut (Ceylon), £47 5s. ton; petroleum, 2s. 2d. gallon; turpentine (American), 83s. 9d. cwt. Shellac (TN, second orange), 397s. cwt.; shellac (AC, garnet), 310s. cwt.; rosin (American), 21s. cwt.; copra (Ceylon), £30 15s. ton; copra (Straits F.M.S.), £29 7s. 6d. ton; tallow (Australian mutton), 33s. 6d. cwt.; tallow (Australian beef), 35s. cwt. Rubber: Plantation (No. 1 crepe), 8½d. lb.; smoked sheet, 7½d. lb.; fine hard Para, 10½d. lb.

ALEXANDRIA WATER.

The revenue of Alexandria Water Company for year ended March 31, 1921, was £202,841, against £190,781 previous year. The revenue from Port supply increased by £1,903. The contract for purchase of liquid fuel into which company entered in 1920, and which in the long run has been beneficial, is still in force, and has prevented company from obtaining any material benefit from the recent general fall in price of fuels. £14,505 has been written off as depreciation of machinery and other wasting assets, but it has not been thought necessary to provide for new machinery paid for during year but not yet put into service. The board have deducted £4,000 to meet part of the depreciation in securities, which they have placed to provision for depreciation of securities account. £4,400 has been provided for corporation profits tax and £3,000 for compensation claims, leaving, after deducting interim dividend of 4 per cent. paid, £42,000, from which should be deducted 6 per cent. on capital of £600,000, £36,000, leaving £6,000, of which one-half is due to municipality, £3,000, and other half to shareholders, which represents 6d. per share, making a total dividend of 10s. 6d. per share.

COTTON AND COTTON GOODS.

RESTRICTION OF EGYPTIAN AREA.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, June 5.

The Council of Ministers has this week decided to extend for a further two years the restriction imposed on the cotton area in regard to this year's crop. This measure will thus prohibit the general mass of cultivators from putting more than one-third of their land annually under cotton during the period 1921-1923. The extension of the restriction for a further two years will afford the land a much needed rest, for there is no doubt that many estates have during the past few years been overcropped with cotton, and it is a well-known fact that while the ideal is once every third year, the planting of cotton on the same land more than once every two years means deterioration for the land as well as the crop.

GOVERNMENT GRANT FOR COTTON GROWING.

Mr. Churchill's speech at the dinner of the British Cotton Growing Association, in the course of which he announced the decision of the Government to make a grant of £1,000,000 for the fostering of cotton growing within the Empire to replace an annual subvention, will be found on page 728.

MANCHESTER REPORT.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

Events in the market during the past week have been overshadowed by the continuance of the coal strike, and also the strike in the cotton industry. It is impossible for any development to take place until the industrial situation is much brighter. At the moment of writing roughly half a million cotton operatives are locked out as a result of declining to accept a reduction on present-day wages of 5s. 1d. in the £. Although the dispute has been in progress for a week, the general opinion is that an amicable settlement will be arrived at some time this week. In the meantime business drags itself wearily along. In the cloth section a fair inquiry has been met with for India, but the bids generally have been impracticable. Evidently the dealers out there think they can go on purchasing goods at low prices for ever and anon. Only a miscellaneous trade has been done for the remaining outlets of the Near East. Egyptian yarns have been well held in price, but the off-take has been patchy. Cloth inquiry for India has been about, but actual transactions of any weight have been few and far between. Nevertheless, here and there fair sales have occurred for Bombay and Madras. The position with regard to China appears to be improving, and recent reports from that outlet show that it will not be long before a revival of buying takes place. South America still lags behind. American counts have not met with an extensive demand, but prices have ruled steady. In export numbers bundles of moderate weight have again gone through for India.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended June 9:—

It is difficult to write on this subject. There is no change in the situation to report since last week, except, perhaps, that affairs have drifted from bad to worse. A small—very small—enquiry persists for the hand-to-mouth requirements of the few mills which are still running, but business is on such a small scale that it is almost impossible to gauge the true value of cotton on the spot. Until the industrial clouds which overhang the country are cleared away, it is useless to expect anything else. As we write, the outcome appears hopeful in all directions, but negotiations are very protracted, and it is impossible to forecast the date of settlement. On the whole, the market here rules very steady, and Manchester reports show no signs of panic, but rather indicate a spirit of quiet and expectant optimism. C.i.f. business is entirely neglected. To-day, for the first time for many years, "No business reported" was the official pronouncement on the Egyptian spot. Total sales for the week 250 bales, which includes 30 bales Sudan. Quotations are unchanged. Fully good fair Sakellaris 16.00d.

It is reported that the production of attar of roses in Bulgaria during 1920 amounted to 1,000 kilograms.

A number of Italian banks are beginning operations in Yugoslavia, and among these the Banca Commerciale Italiana is opening branches at Belgrade and Agram.

BRITISH COTTON-GROWING ASSOCIATION.

The annual meeting of the British Cotton-Growing Association was held on June 7 at the offices in the Manchester Royal Exchange, the Earl of Derby, President of the Association, being in the chair.

Lord Derby, in moving the adoption of the report and the statement of accounts, said that he thought that from a financial point of view the accounts might be taken as eminently satisfactory. After making an allowance for income-tax they carried forward a balance of £67,738 which, after making good their previous deficit, left a credit balance of £9,811. Dealing with the various spheres of activity, he said that in Mesopotamia, the Association had erected a ginners near Baghdad. A fair amount of cotton was being grown by the Government, and also by several independent cultivators. There was no doubt that that country offered great possibilities, not only for cotton, but also for other products. Before any big results could be achieved, however, some money would have to be spent on irrigation and transport. It was gratifying to note that during the whole of the troubles of the past two years the Association's staff had been plodding along, and had not suffered any accident. When people talked glibly of evacuating Mesopotamia, they should bear in mind that it was a possible vast field for cotton growing, and at the cheap rate so valuable for this district. In India the lease of 7,500 acres of land on the Khanewal Canal in the Punjab district had been completed, and part of the land was now under cultivation with winter crops. It was hoped to commence direct operations within a year, and if results were satisfactory it should go far to stimulate the production of long-stapled cotton in this neighbourhood.

The total amount of cotton produced in new fields in the British Empire during 1920 was 105,800 bales, of an estimated value of £3,617,300, as compared with the previous record in 1914 of 82,350 bales of a value of £1,044,750. As to the future, there was no doubt that in Nigeria, and also in many other places, they had got to the point where no very large increase could be looked for without additional transport facilities and largely augmented agricultural departments. In Nigeria larger and better harbour and wharfage were required at Lagos and Port Harcourt. It was also necessary to push on with the completion of the eastern railway from that port. Moreover, additional railways were required to open up important centres 200 to 300 miles distant, the only means of transport at present being by canal or donkey. The Association had taken up these matters with the Government, but unfortunately at the moment it was not possible to press any desired scheme owing to the world-shortage of money.

The new Empire Cotton-Growing Corporation had come into being. The levy of 6d. per bale had been agreed to by the trade, and very shortly the Corporation should be in possession of funds so as to carry out their programme, a part of which was to supply trained experts and attach them to the Colonial Agricultural Departments for work in connection with cotton growing. Without such assistance he feared that it was not possible for very much progress to be made, as the Colonial Governments had not the funds to provide large agricultural staffs for any one purpose. He might also mention that the work of the Empire Cotton-Growing Corporation would in no way clash with the work of the Association. In the early stages, and in all fields, commercial work in connection with the provision of markets for the growers' cotton, of ginners for ginning the cotton, and merchanting the same were absolutely essential. This had chiefly been the work of the Association since it handed over its agricultural experts to the Government many years ago, and the Association would continue on these lines, always working in close co-operation with the Empire Cotton-Growing Corporation.

Mr. James M. Thomas seconded the resolution, which was carried unanimously.

HEMP AND FLAX INDUSTRIES OF YUGOSLAVIA.

The most highly developed of the textile industries of Yugoslavia are the hemp and flax industries, according to the *Beogradski Dnevnik*. The area annually sown with hemp, it states, approximates to 42,000 hectares, and with flax to about 50,000 hectares. The annual production of hemp is 18,000,000 kilograms, and of flax 800,000 kilograms. The country possesses thirty factories for these industries, and their annual production is about 1,000 wagons of hemp and 300 wagons of flax. In addition, these factories prepare 600 wagons of a special kind of hemp called "peasant hemp" in the province of Backa, and 100 wagons of the same product in Southern Serbia. The hemp and flax industries have great difficulties to contend with on account of the small number of spinning mills, and producers are obliged to export the raw material, which mostly goes to Komoran in Hungary. Domestic consumption is estimated at 20 per cent. of the total production, the remaining 80 per cent. being available for exportation, chiefly to Austria, Czechoslovakia, France, the United Kingdom, and the United States. The country also produces 200 wagons of hemp seed, which is approximately the quantity required for home cultivation.

From January 1 to the end of April, 421,447 tons of coal were imported into Alexandria. Of this total, 54,126 tons were Welsh, 12,918 tons were Scotch, and 354,403 tons other qualities.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 6:—

Markets.—(a) Cotton and Piece-goods.—Bombay cotton market firm. Fine M.G. Oomra July Rs. 302, September Rs. 317. Bombay cotton arrivals from September 1, 1920, to May 27, 1921, were 2,186,000 bales, as compared with 2,853,000 bales during the corresponding period of the last year. Bombay piece-goods market quiet, but stocks in warehouses are estimated to be steadily decreasing.

(b) Jute and Gunny.—Calcutta jute and gunny markets show some improvement; good inquiry for heavies with buyers of cornsacks up to Rs. 35 per 100 bags for the season.

(c) Rice and Paddy.—Rangoon Paddy arrivals poor. Prices steady at Rs. 203 to Rs. 206 per 100 baskets of 46 lbs. each. In White Rice there has been fairly large business since last week. Small Mill qualities rose to Rs. 535 per 100 baskets of 75 lbs. each for May-June delivery. Specials followed advance, and large mills sold about 8,000 to 10,000 tons for June delivery at Rs. 520 to Rs. 522.8.0, and for July at Rs. 525.

(d) Tea.—At last tea sale of the season held on May 31, offerings were mostly poor and uninteresting, the majority of invoices being common tea from Sylhet and Cachar. Tone of sale better, and only commonest grades were not inquired for and sold at extremely low prices; all other kinds dearer, especially Pekoes, which advances three pices per pound. 833,997 packages sold to date at an average price of five annas one pie per lb. New season opening sale June 14.

New jute weather and prospects continue very favourable, and plants growing well. A spell of strong sunshine wanted in Northern Bengal. Imperial Bank of India Rate—5 per cent. from June 2.

All India Crop Forecasts—1920-21.—Wheat (third forecast), 25,127,000 acres, 6,596,000 tons. Linseed (final forecast), 2,234,000 acres, 269,000 tons. Rape and mustard (final forecast), 4,912,000 acres, 848,000 tons.

THE SALONIKA MARKET.

An Imperial Ottoman Bank report from Salonika for March and April states:

—The new crop of cereals is expected to give a yield of about 30 per cent. less than that of the previous year. Prices are: Wheat, 1.65—1.73 drachmæ; maize, 0.90—0.95 drachmæ; barley, 1.10—1.15 drachmæ. There have been no transaction in cocoons. The old stock is unsold, and the nominal price per oke is 30—32 drachmæ.

DEPRESSED MARKETS.

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday Night.

The position remains much as before. Business continues to be restricted to the smallest possible dimensions, and there are at present no indications of the return of public interest. When the coal strike is out of the way, however, it may be expected that before long a brighter tone will be in evidence.

Gilt-edged stocks have been dull. War Loan Fives are $\frac{3}{4}$ down on the week, while Consols have shed $\frac{1}{4}$ at 45 $\frac{1}{2}$. The Indian loan is now 2 $\frac{1}{2}$ premium, while the new Ceylon loan is $\frac{1}{2}$ premium.

An irregular tone has been in evidence among Industrials. On the prospects of a settlement of the coal strike Iron and Steel shares have been rather firmer. Shipping securities have been dull, P. and O. deferred closing at 332. Oils have been weak, owing to the lack of demand, while Rubbers, as usual, have been weak and irregular.

Near Eastern securities have been weak. Egyptian Guaranteed 3 per cent. are $\frac{3}{4}$ up at 69, but Greek Guaranteed 2 $\frac{1}{2}$ per cent. 1889 are $\frac{3}{4}$ down at 66, while Turkish Guaranteed 4 per cent. 1855 have shed 1 at 70.

Greek shares have been firm. The 5 per cent. 1881 loan is 2 up at 40, while the 5 per cent. 1884 loan has gained a point at 39. The 5 per cent. 1890 at 40 is 1 up, but Fundings are $\frac{1}{4}$ down at 35 $\frac{1}{2}$. The 4 per cent. 1910 loan is unaltered at 29, while the 4 per cent. 1902 loan remains at 34. The 5 per cent. 1914 loan is, however, $\frac{1}{4}$ up at 36 $\frac{1}{2}$.

In Land shares Beheras have lost $\frac{3}{4}$ at 7 $\frac{1}{2}$, but the preference shares are unchanged at 3. Anglo-Egyptian Land Allotments at 3 $\frac{1}{2}$ and Egyptian Consolidated Lands at 1s. are unchanged, but Egyptian Delta Lands are 3d. down at 6s. 6d., while Gharbieh Lands have shed $\frac{1}{4}$ at 1 $\frac{1}{2}$. New Egyptians are 6d. down at 21s. 6d., while Union Foncières at 1 15-16 xd are 1-16 down. Sudan Plantations have been a firm spot, and are closing 3-16 up at 3 $\frac{1}{4}$.

In Oils Anglo-Egyptians are 5-32 lower at 1 21-32. Phoenix have, however, gained 1s. at 11s. 9d. Roumanian Consolidated are unchanged at 13s. 6d., as are Steaua Romanas at 16s. Burmahs are 1-32 firmer at 6 21-32.

In Banks Agricultural 3 $\frac{1}{2}$ per cent. Bonds and the 3 $\frac{1}{2}$ per cent. Guaranteed Bonds are unchanged at 51 and 53 respectively. Imperial Ottoman Banks are $\frac{1}{4}$ down at 8 $\frac{1}{4}$, but National Bank of Egypt are 3-16 up at 17 9-16. Land Bank of Egypt have lost 1-16 at 4 $\frac{1}{4}$.

Among Miscellaneous descriptions Abyssinian Corporations are unchanged at 2s., while Alexandria Waters remain at 6 $\frac{1}{2}$. Morums are 10s., and Egyptian Markets 18s. 6d. xd. Egyptian Salt and Sodas are 6d. down at 27s.

COMPANY NEWS IN BRIEF.

The Delhi Umballa Kalka Railway Company have declared a dividend for the half-year ended March 31, 1921, of 6 per cent., together with bonus of 1 per cent., on ordinary stock, payable, less tax at 3s. 9d., July 25.

The Rohilkund and Kumaon Railway Company have declared an interim dividend for the half-year ended March 31, 1921, of 4 per cent., together with bonus of 1 per cent., on ordinary stock, payable, less tax at 3s. 11d., July 25.

The Bengal and North-Western Railway Company, after placing, as usual, £35,000 to sinking fund, have declared an interim dividend for the half-year ended March 31, 1921, of 4 per cent., together with bonus of 1 per cent., on ordinary stock, payable, less tax at 3s. 9d., July 25.

OIL NOTES AND NEWS.

Oilfields of Egypt.

The directors of the Oilfields of Egypt, Ltd., in a recent circular, state that after consultation with, and at the suggestion of, Mr. Cunningham Craig and the company's consulting engineers, they have decided to vary in some measure the drilling programme previously agreed upon. This variation has been adopted partly for technical reasons and partly to comply with the requirements of the Egyptian Government.

The latest advices from the field indicate the following position:—Ras Dhib.—On Mr. Cunningham Craig's recommendation, work on No. 1 hole has been suspended, for the reason that geological information obtainable from deepening this well could be more suitably gained at shallower depth at a new site located by him. Well No. 2 has been drilled through the upper limestone formation, and is now down 549 ft. From the gas and oil indications encountered the field manager has expressed the opinion that oil may be found in fair quantity at the base of the Miocene series, and that drilling should be continued if necessary to reach the Nubian sandstone. Well No. 3: The plant and machinery are on the site ready for immediate drilling by the mud flush system. Well No. 4: Drilling has been commenced on this location, and the hole is down 162 ft. It is proposed to drill either or both wells Nos. 3 and 4 to sufficient depth to test the limestone in the Miocene, and subsequently, if found desirable, to continue the holes into the Nubian sandstone, which is expected to be met with at from 1,200 to 1,500 ft.

Ras Bahar.—Instructions have been given to erect a heavy rig for deep drilling on a carefully selected site on this section. The consulting engineer in Egypt reports very favourably on the rapidity with which operations have so far been carried on, particularly having regard to the great difficulties experienced in the earlier stages in connection with transport of plant, machinery, fuel, and water. Unless serious unforeseen delays or accidents occur, the directors consider that the financial resources of the company should be quite sufficient to complete the work at Ras Dhib and Ras Bahar as recommended by their consultants.

It is announced that the Greek Government have decided to establish a Ministry of the Treasury under the direction of M. Bonissios.

SHIPPING INTELLIGENCE.

A PORT FOR POLAND.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, May 25.

It is proposed to grant Poland shipping facilities in the port of Braila. Roumania expects thereby to attract a portion of Poland's foreign trade, which would otherwise gravitate towards Danzig. It will be somewhat similar to the existing convention between Italy and Yugoslavia as regards Trieste. The opposition is against this concession.

FORTHCOMING SAILINGS.

Anchor-Brocklebank Line.—S.s. Imani, for Port Said, Colombo, Madras, and Calcutta (London, June 18); s.s. Masirah, for Calcutta (Birkenhead, July 2).

Bibby Line.—S.s. Gloucestershire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, June 22); s.s. Lancashire, for Rangoon (London, June 25); s.s. Oxfordshire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, July 6).

Byron Steamship Line.—A steamer will sail on June 24 from Liverpool for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila.

Clan Line.—S.s. Clan Macindor, for Colombo, Madras, and Calcutta (Birkenhead, June 23).

Cunard Line.—S.s. Cypria, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Salonika, and Constantinople (Swansea, July 2; Glasgow, July 6; Liverpool, July 11); s.s. Brescia, for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, July 12).

Ellerman Line.—S.s. Gerano, for Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool, June 16).

Ellerman's "City" Line.—S.s. City of Manchester, for Calcutta (Birkenhead, June 17); s.s. City of Exeter, for Bombay and Karachi (Birkenhead, June 25); s.s. City of Karachi, for Calcutta (Birkenhead, July 4).

Ellerman's Westcott and Laurance Line.—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

Glen Line.—S.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, June 30); s.s. Glenariffe, for Port Said, Port Swettenham, Singapore, etc. (London, July 14).

Glynn Line.—S.s. Riposto, for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, middle of June).

Harrison Line.—S.s. Gladiator, for Calcutta (Liverpool, June 22); s.s. Collegian, for Calcutta (Liverpool, July 9).

Henderson Line.—S.s. Amarapoora, for Port Said and Rangoon (Birkenhead, July 13).

Holt Line.—S.s. Atrous, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17); s.s. Calchas, for Port Said, Port Swettenham, Singapore, etc. (Glasgow, June 17); s.s. Keemun, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 17).

Johnston Line.—S.s. Dromore for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, July 20).

Maindy Line.—S.s. Maindy Transport, for Antwerp and Moroccan ports (London, end of June).

Moss Line.—S.s. Siptah, for Gibraltar, Algiers, Malta, Piræus, Syra, Smyrna, Salonika, and Constantinople (Liverpool, June 21); s.s. Amasis, for Gibraltar, Algiers, Malta, and Alexandria [taking cargo for transhipment to Moroccan, Algerian, Cyprus, and Syrian coast ports] (Liverpool, June 29).

Papayanni Line.—S.s. Asturian, for Malta and Alexandria [taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, and Cyprus] (Liverpool, June 18); s.s. Bosnian, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, July 1).

P. and O. Line.—S.s. *Morea, for Bombay (London, June 24); s.s. *Caledonia, for Bombay (London, July 1). *Taking cargo for Gibraltar, Port Said, and Aden (with transhipment at Bombay) for Indian coast and Persian Gulf ports. S.s. Sicilia, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, July 15).

P. and O. British India Line.—S.s. †Mashobra, for Colombo, Madras, and Calcutta (London, June 24); s.s. *Merkara, for Bombay and Karachi (London, July 1); s.s. †Mandala, for Colombo, Madras, and Calcutta (London, July 8). *Taking cargo for Persian Gulf and Malabar coast ports; †taking cargo for Port Said, Suez, and Aden.

Prince Line.—S.s. Scottish Prince, for Tunis, Malta, and Alexandria [taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Lattakia, Alexandretta, Mersina, and Cyprus ports] (Manchester, June 28).

CZECHOSLOVAK CREDIT FOR ROLLING STOCK.

A bill providing for a credit grant of 540 million crowns to the railway administration for the purchase of rolling stock in 1921 has been submitted to the Czechoslovak Chamber of Deputies. The accompanying application in support of the bill points out that in the course of this year the railways still require 27 locomotives with tenders, and 4,140 carriages. The grant suggested in the bill would cover the cost of about 63 locomotives and 5,860 carriages. By the end of 1926 it will be necessary to purchase about 1,050 locomotives and 50,000 carriages.

The traffic receipts of the Smyrna-Aidin Railway for the week ended June 4 amounted to £9,067.

It is reported that the asbestos mines on Mt. Troodos have been sold to an English company for £125,000.

The profit of the Bengal Coal Company for the half-year ended April 30. (including Rs. 1,70,000 brought forward) was Rs. 16,14,000. A dividend at the rate of 65 per cent. per annum was proposed, setting aside Rs. 2,23,000 for depreciation, paying Rs. 97,500 for commission, etc., placing Rs. 2,00,000 to reserve, and carrying forward Rs. 1,18,500.

ENQUIRY BUREAU.

Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge. Replies should be addressed "The Enquiry Bureau, The Near East, 1, Devonshire Square, London, E.C.2."

ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.

No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.

Agents Wanted Abroad.

ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2," when they will be re-directed to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.

109. A reliable firm of Egyptian hand-made cigarette manufacturers and exporters desire to get into touch with British firms importing Egyptian cigarettes.

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114. Importer in Karachi (India), travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers, and exporters. Specialities:—Exports: Medicinal herbs, dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples, with prices and terms.

NOTES OF THE WEEK.

The Reported Death of King Peter.

We deeply regret to hear by private advices from Yugoslavia, as we go to press, that the illness of King Peter of the Serbs, Croats, and Slovenes has terminated fatally. Writing on June 14, our Correspondent in Yugoslavia was able to quote the official assurances that King Peter was out of danger, and this circumstance will necessarily prompt the hope that the later report is, happily, incorrect. The gravest anxiety, however, was felt immediately the aged monarch was taken ill, as it was clear that his general condition left much to be desired, and the official bulletins were far from convincing. Although he had ceased to take an active part in State affairs, the loss to the country is rendered the more pathetic as it occurs within a few days of the ratification of the new Constitution of the kingdom of the Serbs, Croats, and Slovenes—the coping-stone to aspirations entertained, indeed, before he came to the throne, but peculiarly identified with, and brought to realisation during, his eventful reign.

The Paris Discussions.

The meeting of the Supreme Council that was expected to take place at the end of last week has been postponed, and in its place the Marquis Curzon has paid a visit to Paris, in order to discuss with the French Government the Near Eastern problem. On this subject, unhappily, British and French official opinion has been divided; but in the case of the Near East, in contradistinction to other questions, events and the stern logic of facts show a disposition to assert themselves in a manner that makes it increasingly difficult to adhere to a wrong policy, however sincere the conviction with which it was originally supported. If, therefore, as a result of the Paris discussions, the two Governments are once more agreed on a Near Eastern programme, it is to be hoped that it will be based not on a mere diplomatic compromise, but on the actual requirements of the situation. There can be no real settlement, if the problem is approached from the standpoint of the extent to which France can give way on the one hand and Great Britain on the other. The problem turns on certain stubborn facts, not on French or British predilections, and until these are faced the end of the world-war will not have been reached.

A Fresh Start.

It must be admitted that French policy has come nearer than British policy to the requirements of the situation, but one of the reasons why it has failed to win the support to which it was entitled is that it was

inspired by motives which commanded no respect. The British Cabinet, confronted with the bankruptcy of Turkish government over the debatable territories of the Near East, decided that the substitution of Greek rule was the only possible alternative, and one that must necessarily introduce a better state of affairs. France acquiesced in the transfer of alien populations to Greek rule, because it was made a personal favour to M. Venizelos, and enabled her to gratify her spite against King Constantine. When M. Venizelos fell, she showed no hesitation in throwing Greece over, and encouraged Nationalist Turkey to abandon an attitude of reasonable protest for a show of aggressive unreason. It is probably equally hard for both Governments, British and French, to admit their mistakes, for the personal element is so intimately concerned. If, however, peace is to be restored in the Near and Middle East, personal considerations must be eliminated. Both parties have so much ground to abandon, not with a view to finding a middle line of action, but to coming together again on an entirely new line, that the process may well be regarded as satisfying the sacred cause of compromise.

Proffered Openings.

In the meantime the renewal of the Greek offensive, which in the matter of solicitous bulletins resembles a distinguished patient in *extremis* rather than a pending military operation, has been postponed. If we may judge from the remarks of the French Press, the contention of THE NEAR EAST for many weeks past that Great Britain and France ought not to allow any further hostilities to take place in Asia Minor now commends itself to the French Government, and we trust that, as a result of Lord Curzon's visit to Paris, it will form the basis of the new Allied programme. The obstacle of Nationalist intransigence is not overlooked; but it is possible that there is some discrepancy between the fulminations of the Angora Press and the innermost wishes of Mustapha Kemal's Government. The new mission of Bekir Sami Bey points to this possibility. It is by no means certain that even with a French negotiator at Angora British or Allied intentions are clearly understood. Most probably indignation over the Greek attack, which would be considered as out of the question if Allied support or connivance were not behind it, tinges the whole Nationalist outlook, making Angora see red and causing it to approve even of the Moscow shade of that colour.

A Change of Tactics.

The public in Great Britain and France, which has been asked both by the Governments and the bulk of the Press to regard Turks and Greeks alike as hope-

lessly unreasonable, is gradually coming round to the belief that the fault does not lie exclusively with the two Eastern peoples. The conduct of the Allied Governments towards Greece has not had reason, good manners, or fair play to commend it, and King Constantine's Government has virtually been driven into the course of action now deprecated. As for the Turks, having been exasperated by being subjected to and then attacked by the Greeks, they were presented with the spectacle of Great Britain and France at cross-purposes in their proposed settlement of the Near East. Angora would hardly have been human, it would certainly not have been Turkish, if it had not reverted to the traditional policy of the Orient. If the Allied Powers would conform to the ordinary canons of diplomacy in their dealings with Greece—recognising her legitimate ruler, receiving her accredited representatives instead of maintaining ostentatious touch with members of the political opposition, and sending to her as their own representatives diplomats personally acceptable to the Government—and if they maintained a united front towards Turkey, while presenting terms of peace which can be morally justified and offer a practical settlement, there would be no need to despair of an amicable and speedy adjustment of the Near East problem.

France and the Emir Faisal.

Nothing better illustrates the one-sided view that our French Allies adopt on most international problems than the comments in the French Press on Mr Churchill's announcement that the British Government has decided to put no obstacle in the way of Emir Faisal's candidature for the rulership of Mesopotamia. Stress is laid on the enmity between France and the Emir Faisal, and it is regarded as a grievance that the latter should be "restored in Mesopotamia." The more accurate way of looking at the matter would be to remember that it was France who made war upon the devoted ally of Great Britain, after he had assisted in the conquest of Palestine and Syria, and had received from both the French and British Governments definite promises. General Gouraud's action in Syria was a flagrant breach of these promises, and the ultimatum which preceded the downfall of the Emir Faisal may have been couched in as forceful terms as the Austro-Hungarian ultimatum to Serbia in 1914; but its statements were no more convincing than its notorious prototype. Syria does not happen to be in Europe, and the world is too occupied with other matters to be concerned overmuch with the fate of an Arab chieftain. The French Press, we cannot help thinking, would be better advised to congratulate France on the prospect of a worthy position having been found for a victim of her high-handed action, and on her own escape from a possible cause of permanent unrest in Syria, as a result of the British sense of fair play.

The Egyptian Delegation.

If there has been any change at all in the situation in Egypt during the past week, it has been for the better. Adly Pasha and his Cabinet continue to receive expressions of confidence from representative bodies and influential Egyptians, and the Premier has announced that the official delegation will leave Egypt for London about July 1, confident that the majority of reasonable and responsible opinion is behind the Ministry, and prepared to support negotiations along the lines it has indicated. Another hopeful sign is that an appeal for unity has been addressed to the nation by the ex-Grand Mufti, Sheikh Bekhit, the Sheikh el-Bakry, and many of the leading *ulema*, who refer to the invaluable services of Adly Pasha and of Rushdy Pasha, and praise their capability and their conscientiousness. The appeal suggests that while the official delegation should work for attainment of the national desire, the people can co-operate with Zaghloul Pasha's delegation for the purpose of effecting unity until the General Election. In the circumstances, it was probably advisable to include the reference to the masses' idol, and in other respects the appeal is both wise and timely; while the standing of the signatories should secure its being received with respect.

Zaghloul Pasha's Manœuvres.

Meanwhile Zaghloul Pasha appears to have made up his mind that as he cannot prevent the official Delegation

from coming to London, he will do his best to make things as unpleasant as possible for them here; and he is reported to be sending two of his lieutenants to Europe, for purposes that may be easily guessed. He has, however, had two rather nasty points scored against him: Adly Pasha has exposed one of his methods of securing public support by sending to the provinces printed telegrams which were subsequently wired back to him as expressions of "local opinion"; and the Sheikh el-Bakry, referred to above, whose house was used during his absence to hold a meeting of protest against Mr. Churchill's Manchester speech, has let it be known that he was not aware that the meeting would take on a tone hostile to the Premier. At this meeting Zaghloul Pasha is reported to have said that "if through pressure by the European Powers British troops remained in the country, Egyptian relations with European residents would become strained." This kind of thing may go down with his Egyptian audiences; but it almost inevitably makes people over here recall Stephenson's remark when asked whether it would not be a bad thing if his steam-engine collided with a cow, "Aye," said the great engineer, tersely, "bad for the cow!" Zaghloul and some of his supporters, who seem to spend much time in passing foolish resolutions and telegraphing them to the Press of foreign countries, might do worse than try to get the Egyptian cow and the European steam-engine into true perspective.

Unfortunate Georgia.

M. Jordania, President of the Republic of Georgia, arrived in this country last week, and it is to be hoped that his presence in our midst will arouse sympathy for his unhappy country and eventually lead to some action being taken on its behalf. For the past three months Georgia has been in the hands of the Bolshevik hordes, and it is almost superfluous to add that its condition is now deplorable. It put up an extraordinarily good fight against the attacks of Soviet Russia, and it certainly deserves a better fate than the one that has overtaken it. Its chief fault has been its failure to co-operate with Armenia and Azerbaijan, though it does not seem to have played its cards very well with the Kemalists; and in the future the desirability of some form of federation will doubtless become apparent to the three Caucasian republics. At present, however, there is no chance of anything of the kind. The first thing to be done is to gain a hearing from the Great Powers; and this, it is understood, is what M. Jordania is now endeavouring to do on behalf of Georgia. He has a good case, for the independence of Georgia, both *de facto* and *de jure*, has been formally recognised by the Allies, while no such recognition has been accorded to Soviet Russia; and that is—or should be—worth something to M. Jordania. Moreover, the British Government need not hesitate to take any action on behalf of Georgia for fear that it would arouse the wrath of Labour by so doing. On the contrary, Labour should surely support such action. For M. Jordania is founder and leader of the Socialist party in Georgia, and his country is—or was before the Bolsheviks arrived—a model Socialist State. Labour, therefore, could hardly refuse to support it in its struggle against the tyranny of Bolshevism, unless it is prepared to be labelled Bolshevik itself.

India and the Dominions.

An interesting suggestion was made last week by the Maharao of Cutch, the representative of the Indian Princes at the Imperial discussions now in progress, who urged that some of the statesmen of the Dominions should come to India and realise for themselves the rapidity of the political advance, and also the strength of feeling on the question of status, a subject to which we referred in our leading article last week. We believe that at the present juncture such visits might do an incalculable amount of good, and we trust it may be possible to arrange them in spite of the obvious difficulties of time and distance. These difficulties, it must be remembered, do not affect all the Dominions alike. It is a far cry from Canada to India, but Australia and South Africa are more conveniently situated, and a little money spent on speeding up transport might enable visitors from

Melbourne or Cape Town to spend Christmas in Calcutta and travel at least as far as Delhi, two centres which should serve as samples of Indian politics. If that could be done, and, perhaps a little later on, return visits could be made by some of India's popular Ministers, the effect on Imperial relations would be even greater than what can be looked for from periodical meetings in London.

Direct Inter-Imperial Relations.

Closely allied to this subject is the idea, which has recently been again mooted, that India and the Dominions should exchange resident representatives, something intermediate between full-fledged ambassadors and mere commercial agents, charged with the duty of interpreting local sentiment to their Governments. There are, of course, weighty bureaucratic objections to this proposal. The representatives, it is said, would not find enough work, and at the same time their activities might prove inconvenient to the denizens of Downing Street and Whitehall. Both objections are valid, but, in our judgment, by no means conclusive. An Australian, for instance, at Delhi might not have enough files to keep him tied to his office-table like his neighbours, but he might be well worth his salary for all that; and surely it is better that possible causes of friction should be adjusted amicably on the spot than that they should be sent home in despatches charged with passion, to be disposed of eventually by an overworked Cabinet. For our part, we think the experiment well worthy of a trial; at the worst, it could do little or no harm, while with well-chosen representatives it might do a great deal to ease the working of the great Imperial machine.

THE WEEK AT HOME.

LONDON, Monday Morning.

The Coal Ballot.

The result of the ballot on coal was disconcerting to everybody. It had been assumed, both by the miners' leaders and by the Government, and also by the press and the public, that there would be a vote in favour of resumption of work; for it is known that after ten weeks' stoppage the miners are in desperate financial straits, and the terms offered were certainly better than those originally fixed by the owners, although less than those demanded by the men. For all that, and despite the fact that the subsidy depended on a resumption of work, there was large majority in every coal-field but one—and that one the least important—in favour of rejecting the terms offered.

The vote needs explaining, and so far it has not been explained—it has only been explained away, which is not quite the same thing. The idea that, say, another month or two of stoppage would secure better terms for miners may be the underlying motive; if it is, it is likely to be a grave error. The miners' leaders are known to hold the opinion that they have done the best they could in the circumstances—they have not indeed by any means been utterly routed, as the owners have made at least three several advances over their first ultimatum. But the miners' leaders did not demand a vote in favour of resumption; they left it open to the men. They are being blamed for this in some quarters, but I cannot see that any blame attaches to them on that score. It would simply have made the ballot a farce to have issued instructions. After all, if one has democracy, one must put up with the inconveniences of democracy—one of which is that voters are permitted to vote which way they like. And if the leaders had advised the men to vote for resumption, I doubt whether their advice would have been followed, as the result would have been that they would have lost whatever authority they possess.

The situation is now uncertain, and full of difficulty for both employers and employed—and to a less extent for the general public. All the pits will be open for work. In some cases, especially in the smaller and more isolated mines, work will be resumed; but it is unlikely that this will be general. There may be some trouble between the large minority which wants to resume work and the majority which does not, and this will make the position very difficult. Many of the leader-writers are

propheying exactly what will happen, but their predictions have been so signally falsified during the past few days that one doubts the reality of their inspiration. In the meantime the train service is again steadily improving.

Sinn Fein in England.

There has been another outbreak of Sinn Fein outrages, in England this time. Armed men in motor-cars have attacked lonely signal-boxes on the railways, bound and gagged or shot the signal-men, and burnt the records or damaged the instruments and driven away. This is an attack, not on a Government but on society; it is not politics but anarchy. The plot was evidently carefully planned, as the attacks were simultaneous and the method of operation the same in each instance; the object can only have been the spreading of terror, perhaps the wrecking of trains and loss of life.

It is curious how deeply rooted this primitive idea of "frightfulness" (which the Germans after their manner reduced or raised to a definite science) persists. Experience shows that it always fails to achieve its end, and merely rouses anger against the perpetrators. It is significant that no repudiation of these methods comes from Sinn Fein leaders, which must be taken as an indication that they either do not or dare not disapprove. So long as that is their position, they will merely alienate any sympathy which their political objects might otherwise have had in this country.

In any event, their attitude in Ireland is not calculated to encourage those Independent Liberals and others who, from old sympathy with Ireland, have done their best to defend Sinn Fein before English audiences. The Southern Irish Parliament exists, but Sinn Fein, with an overwhelming majority of its members, is doing nothing to work it; in the Ulster Parliament its minority has abstained from attendance, and the official Sinn Fein policy is to boycott Ulster industry, and to refuse any dealings with Ulster banks. This senseless procedure will certainly do Ulster some harm, but it will be more hurtful to Sinn Fein and to Ireland as a whole.

The island needs unity and abstention from politics more than anything else; but this simply stereotypes partition, and makes destructive politics the main industry. The hopes of a concordat, which were evoked by the recent meeting between Sir James Craig, the Ulster Prime Minister, and Mr. de Valera, are therefore fading. If, as some hold, the latter is essentially a Moderate, he is unable to restrain his own instruments, and has become a tool of the tools he has used. Many a revolutionary leader has suffered the same fate.

A Clerical Feud.

An ecclesiastical battle is impending. It is announced that next week an assembly of Evangelical and High Church clergy is to hold a three days' confer-

ence to demonstrate "the Fundamental Truths" of Christianity. Demonstrations on behalf of truth usually resolve themselves into demonstrations against somebody's error, and in the present case the victims are Dean Inge and Canon Barnes, who are accused of going over to the enemy and giving up the doctrine of Scriptural inspiration, which is to be reaffirmed. Dr. Wace, the aged Dean of Canterbury and the old opponent of Huxley, is the most notable figure among the protestors, and he is to read a paper on the historicity of Genesis.

The meeting will probably be followed by a Broad Church demonstration in defence of the audacious Dean and the explosive Canon. The humble layman will probably think that questions of historical fact can best be left to the study, and that the problems of philosophy and science are debated to better advantage by philosophers and scientists than by indignant clergy. At the same time, I am not sure that the position of Canon Barnes is logically tenable. By giving up the fall of man, he seems to have placed himself in a difficult position as a Churchman. The trouble with the Dean is that he has publicly spoken of some of his own cloth as bigots and reactionaries, and, being hit, they hit back again.

As a mere outsider, one would suggest that if our divines were to cease quarrelling over the already ancient controversies as to Pentateuchal accuracy, and to try to introduce the reality of Christian goodwill into the social, and more particularly the industrial, life of this country, they would be doing both Church and State a better service.

The Einstein Lecture.

Professor Einstein delivered his long-promised lecture before London University last week, and Lord Haldane, who has adopted both the Professor and his theory, presided over the function. The explanation of Relativity was in German; but although I can understand that tongue and have, at least, thought I understood the main principle of relativity in English, I will confess that the combination of relativity and German was too much for me. Others who declared themselves entranced by the clarity of the exposition were no doubt more intelligent than I.

Professor Einstein is a pale man with long black hair and thoughtful eyes. He looks like a first violin in an orchestra—he is a connoisseur of music as well as a mathematician—and his manner of speaking is naturally that of the lecturer, not the orator. He seemed a little shy of his audience, and I doubt if he really likes being lionised. Let us hope he was impressed by the journalistic sense of relativity. The high-brow newspapers gave him a column to the three columns of the Test Match; the popular Press gave his photograph and three lines and six columns to the Test Match.

A Second Test.

There was a general sense of relief that England saved the innings defeat in the second Test Match at Lord's—so low have we fallen that an eight wickets' licking is considered better than we had any right to expect. It is said that there will be drastic alterations for the third match at Leeds—if we lose that we lose the rubber. It is as much a question of nerves as anything. The Australians are a magnificent team, but not better than England teams in the past; if our men could take things more lightly and show less reverence to the visitors' attack they might almost snatch a victory. They play well enough in county matches, but the moment they see an Australian bowler they tremble at the knees, and begin to wish they were back in the pavilion. To do them justice, their wish is quickly fulfilled. Woolley is, so far, the only exception.

Doctors versus Dentists.

As though we had not enough troubles on hand, there is war to the knife, or rather to the teeth, between doctors and dentists. Every doctor, of course, admits that if everybody went to a properly qualified dentist as a matter of course every six months there would be far less disease, but the controversy has broken out over a side issue. Are bad teeth the result of indigestion, or is indigestion the result of bad teeth? One party says one thing, the other asserts the opposite; and *amour*

propre and the reputation of two great professions are directly involved. If bad teeth are the cause of indigestion, then the dentist is in fault—unless he puts it on the patient; if indigestion is the cause of bad teeth, then the doctor is the villain of the piece.

To the mere ignorant journalist it would seem that the existence of such a controversy reveals limitations of knowledge in both parties. Certainly doctor and dentist often disagree. I know of cases in which the medico has advised the patient to have all his teeth out as a cure for rheumatism or what-not, while the dentist has refused on the ground that the teeth were perfectly sound, and that the doctor must have made a wrong diagnosis. The truth of the matter probably is that sometimes bad teeth make bad tummies, and sometimes the process is reversed.

The Week's Books.

"Impressions and Comments, Second Series" (Constable), by Havelock Ellis, is a continuation of the series of short essays in diary form on art, life, and war which first delighted readers some years ago. In his last pages Mr. Ellis seems to hint that this is his farewell to the world of letters; but we may hope for yet a third series from his gifted pen.

"The Psychology of Everyday Life" (Methuen), by James Drever, is a brilliant study of ordinary phenomena by one of the most competent exponents of modern psychology. It is a relief to get away from the abnormal in this subject to the average healthy man's experiences and impressions.

In "The Psychology of Day-Dreams" (George Allen), by Dr. J. Varendonck, we enter the region of psycho-analysis again. The book has the inevitable introduction by Professor Freud, and all the technical impedimenta of the new fashion; but it does not impress me.

"The Analysis of Mind" (George Allen), by Bertrand Russell, does not impress one so much as the same author's "Introduction to Mathematical Philosophy." It has one merit which most psychological books lack—its wit; and one virtue—it applies a destructive analysis to some of the absurdities of psycho-analysis. But Mr. Russell is not certain that consciousness exists—he has already stated this view—and he conceives of the universe as neither mind nor matter, but a "neutral stuff" out of which both are constructed. This view has, of course, been frequently formulated in America; one would like some evidence of the existence of this non-mental and dematerialised "stuff," and the construction of some hypotheses as to the manner in which it has been converted into, let us say, you and me, and St. Paul's Cathedral and the Pope. Mr. Russell only says that the pudding is there—his other works show he thinks it a pretty bad pudding—and it isn't made in the way we thought. But what the ingredients are he doesn't even tell us in the index.

ROUMANIA.

BUCHAREST, June 1.

In Parliament: Agrarian Reform.

All parties are agreed on the fundamental principle of the proposed agrarian reforms. There are, however, two points, and not the least important ones, on which the Government and the Federationist Opposition are at variance: the extent of land to be expropriated, and the price to be paid to the expropriated landowners. The Bill provides that, for the moment, only two million hectares should be expropriated, leaving only 250 h. of arable land, as a maximum, for any one landowner, and that the price to be paid should be based on the pre-war regional rental of the land, multiplied by *forty*, of which half will be paid in annuities by the peasants who receive the land, and the other half will be borne by the State.

The Opposition contends that only 100 h. of arable land should be allowed to belong to any one person, and all the rest should be expropriated and passed on to the peasants, at the price of rental aforesaid, multiplied by twenty only.

All the speeches made this week have been more or less explanatory of these conflicting views.

The discussions this week have been rather unfavourable for the Minister of Finance. The speakers did not use any new arguments, but reiterated the old ones, that the proposed taxes exceed the contributive power of the taxpayers; that the whole production of the country will be absorbed by the taxes; that the text of the Bill is indistinct, its mode of application impracticable for lack of the necessary administrative fiscal personnel, and so on.

As the Budget has not yet been passed, a monthly vote on account has been granted for June.

The Parliamentary session has again been extended for a month, until June 28. At one of the sittings a visit was paid by General Badoglio and his suite. The members of both houses had assembled in the Lower Chamber, where the General was officially received with great demonstrations of welcome. The Speaker and prominent representatives of the different parties addressed the General, expressing sympathy and affection for the elder Latin sister, and recognition of Italy's help towards the realisation of the Roumanian national ideal. The General was visibly moved, and made a fitting reply. He and his suite have left for Galatz and Jassy to confer on those two towns the Cross of War.

The Senate, Cattle and Timber.

A very important debate has taken place in the Senate regarding the supply of cattle in Transylvania and in the Old Kingdom. There is a superabundance of cattle in the former province, and the price of meat has fallen to 2 lei a kg. wholesale and 4 lei retail; and the cattle-breeders are on the verge of ruin. In the Old Kingdom, on the other hand, cattle are scarce and meat costs 16-20 lei a kg. The logical course would be to transport from one province to another. But in the first place there is the continued transport difficulty, and in the second the wholesale butchers' trust simply refuses to buy cattle in Transylvania, with the obvious object of maintaining high prices here. The Government promised to remedy both evils. Meanwhile, the cattle-breeders in Transylvania are clamouring for free export of their surplus cattle, for which there is a great demand in Central Europe, the buyers being willing to supply the necessary rolling-stock. As these exports have to pass through Hungary, that State claims, as compensation, nothing less, than a frontier rectification. The Government hopes to overcome this obstacle diplomatically, and has decided to allow the export of oxen over six years old and of cows over eight years, on paying the export tax of 20 per cent. *ad valorem* and 2 per cent. commission tax. This measure will, however, only alleviate the

congestion; and, on account of insufficient pasture land, the cattle are suffering very much.

The timber trade in Transylvania, also, is sustaining heavy losses, through lack of adequate means of transportation. Immense quantities of timber are lying in the forests, and a portion of it is rotting. The Senator for Bukovina affirms that in his province also the situation regarding both cattle and timber is unsatisfactory.

Bratiano Centenary.

The centenary of the great Roumanian statesman, Ion C. Bratiano, is being celebrated in the principal towns of the country. On this occasion his body, which has been resting for the last thirty years in a provisional tomb, has solemnly been transferred to a chapel, specially built for the purpose, on the family estate at Florica. Prince Carol represented the Royal Family at his ceremony; the Primate conducted the religious service, and the Government was represented by the Minister of Public Works. There was a large attendance of political notabilities and delegations from many parts of the country. Several speeches were made, extolling the high merits of the late illustrious statesman, and recalling the great services he rendered to the country during his fifty years of patriotic activity.

The refusal of the Senate to send a delegation to this commemoration is not to be considered as a slight upon the memory of the great statesman. It is merely a momentary political incident. The present majority did not wish to give the ceremony the character of a national celebration for fear of their opponents, the Liberal party, using it politically.

A Widespread Plot.

A great sensation has been caused by the discovery of a vast plot at the Petroscheni coal-mines in Transylvania. The Magyar element which was employed there had secretly organised an irredentist conspiracy. They had made all the necessary preparations, with the intention of destroying the mines and blowing up all the bridges and tunnels of the coalfield region. The outrage was planned for execution on the day of the arrival in Bucharest, from Greece, of Prince Carol and his bride. The director, engineer, doctor and lawyer of the mine are implicated and arrested. One of the principal organisers, Maderspiech, a large landowner, stabbed one of the detectives whilst being taken into custody. Many others have been arrested, among them former officers in Horthy's army. Large quantities of arms, explosives and some syringes with strong poison, have been discovered. The correspondence and documents which have been seized prove the connection of this conspiracy with the headquarters of the Irredenta in Budapest.

BULGARIA.

SOFIA, June 11.

At the present time public interest is chiefly concerned with internal affairs, and once again party politics are to the fore. M. Stambolisky, who writes over the pen-name of "Stambol," has made two vigorous onslaughts on the Opposition parties through the medium of the Agrarian journal *Zemledelsko Zname*. He points out that the Agrarian Party stands solid for a Bulgaria-for-the-Bulgarians policy, while some of the most prominent members of the Opposition would like to see the country influenced by foreign Powers.

What prompted the Prime Minister to open up a fresh campaign against the Opposition is not quite clear. If, however, as many people think, he fears that the policy of the Opposition members referred to above is to intrigue with foreigners, then, in the light of relations between Russia and Bulgaria during the past thirty or forty years, he has ample justification for his action. It is not Russian influence that he fears, no doubt, but that of another Great Power, whose aspira-

tions in the Orient are too well known to need further reference here. The policy of this Power has lately tended towards a close *rapprochement* with Bulgaria; and if this should fail to secure the support of the Government it might well be that Opposition support would be sought. The Opposition parties, though loyal to their country, are always on the look-out for means of returning to power, or even of improving their position; and thus they might become instruments of a foreign Power's policy.

The country is not yet sufficiently awake to the seriousness of a situation which, although still remote, might one day bring about a serious crisis. At the same time it would seem that the peasants, although they may grumble against the Government over a few points, are not likely to forsake the Agrarians for another party.

From the British point of view the situation is decidedly interesting, for we are in the position of a perfectly impartial observer; and in the long run we may come to be regarded as the one stable figure in European politics.

France, Bulgaria, Serbia.

A speech made by M. Georges Picot at the opening of the French Chamber of Commerce at Sofia on May 19 has raised a veritable storm of protest in the Belgrade Press. Commenting on the French Minister's statements, the *Tribuna* says, *inter alia*:—

France must know that it was Bulgaria who broke the peace in the Balkans, and only for that reason does her representative in Sofia now say that France and Bulgaria will together keep the peace. When one talks of peace in the Balkans, it is the Balkan States themselves that have the last word in the matter, and not our French friends. It is much more important to us than to France that peace should be maintained in the Balkans. If, as one is forced to believe, M. Picot spoke with the force and authority of the Quai d'Orsay behind him, the effects of his declaration may well be far-reaching, as the time for a *rapprochement* between Yugoslavia and Bulgaria is not yet, and the latter country may well find herself in the position of having to choose between the nations. She would like to take both, but at present that is impossible.

TURKEY.

CONSTANTINOPLE, June 7.

How the Flood-tide was Missed.

Before these lines are in print, in all probability the tide will once again be flowing strongly against the Turks. For this the Nationalist leaders themselves, and the Nationalist leaders alone, will be to blame. Never has a conquered nation been afforded such a magnificent opportunity of re-establishing its fortunes as the Turkish nation during the last few months; but the leaders of a docile and unperceiving people have refused to take the tide at its flood. By this time the world has learnt that Angora has definitely committed itself to the same policy of bitter and uncompromising hostility to the Allies, and Great Britain in particular, as was espoused with such ardour by the Unionists. Bekir Sami Bey has, indeed, started off on another tour in Europe, but this time he cannot possibly expect the slightest importance to be attached to his overtures. Hitherto, although the mask was not absolutely impenetrable, the true friends of the Turks—and they are by no means few in number—were reluctant to believe that the Nationalist leaders could be guilty of such folly as to reject deliberately the unexampled opportunity offered to them of a reconciliation with Great Britain. To-day it is impossible to ignore the truth, for the Nationalists have deliberately struck at the hand which was held out to them. How has this

been brought about? What has become of the moderate party which Bekir Sami Bey represented, and with which Mustapha Kemal himself was believed to sympathise? The answer to that question involves a reference to the history of the Nationalist movement during the last twelve months, and the activities of the Unionist leaders during the same period. At first Mustapha Kemal and the Nationalist leaders would have nothing whatever to do with Talaat, Enver, and the other members of the Committee of Union and Progress who had fled to Europe. The latter, therefore, concentrated all their efforts upon acquiring a preponderating influence with the Bolsheviks in regard to matters Turkish; and at the same time they made careful plans for what might be termed the peaceful penetration of the Anatolian Administration. The brains of the whole scheme undoubtedly were Talaat's, and success had been practically obtained already when he was assassinated. To such an extent has Unionist influence honeycombed the Nationalist Administration that at the present time Mustapha Kemal could not retain his position for twenty-four hours without the support of those who were once prominent members of the Committee. Thus, the Vice-President of the new "National Defence Party," formed by Mustapha Kemal to conjure the danger presented by the sudden onslaught of the extremists, is Sherif Bey, of Adrianople, one of Talaat's favourites, who was furnished with a document bearing the Unionist leader's own signature to save him from arrest for embezzlement of the funds of the Brusa Municipality. Mustapha Kemal owes his position to-day to the circumstance that he is supported by Unionists who are as undesirous as himself of witnessing the return of the exiles, who would promptly seize all the spoils for themselves, and would reward only those who had been consistently faithful. On the other hand, as Unionists, the bulk of Mustapha Kemal's supporters know they are compromised in the eyes of Europe, and realise that a reconciliation with the Allies would involve their consignment to permanent and well-merited obscurity, if nothing worse. Hence the dangerous onslaught when there seemed to be some prospect of a reconciliation crowning the undoubtedly sincere efforts of Bekir Sami Bey, despite the opposition of certain of his colleagues. The structure of the so-called Moderate Party was suddenly revealed in all its weakness, and once again in the kaleidoscopic history of Turkey, national interests were subordinated to personal interests and ambitions. There is no longer any mystery concerning the situation among the Nationalists: there are no moderates worth mentioning, and no extremists. The strife amongst the ædiles of Anatolia is but the squabbling of vultures over the corpse of the Turkish nation. How long it will be before the Old Gang return to Turkey depends upon the success attending Mustapha Kemal's efforts to stem the flowing tide of their agents. He has succeeded in holding off the released internees from Malta for the moment, but it may be predicted with comparative certainty that the reign of the Nationalist dictator is drawing to a close. The Bolsheviks have in all probability already selected his successor, and have possibly fixed the moment for his return to the limelight. Now that Talaat is dead, who will oppose the candidature of Enver?

The Greeks.

Meanwhile, the Greeks have been steadily pushing forward their preparations, which, it is understood, this time include asphyxiating gas and flame-throwers. It is to be hoped that they will not forget wire-cutters! So far as material and numbers are concerned, there seems to be little need for doubting the complete superiority of the Hellenes over their opponents; but, unhappily, political factions are still making havoc of the moral of the army. Constantinist and Venizelist passions are raging with unabated ferocity, and it is difficult to say which side is more to blame. A few months ago, the Royalist officer Dragoumis was murderously attacked, and on the evening of June 4 a Royalist officer shot two Venizelist officers, of whom one was killed outright, in the open street. If such occurrences are possible in the capital, what must be the state of affairs in Anatolia? Feeling is, indeed, running very high again, and the nervous tension generated by

the period of expectancy since the last Greek offensive has almost reached bursting point. There is little doubt that within the next week or so important events will take place. The Greek army cannot sit upon its haunches for ever. The Greek fleet has received permission to take action against Turkish shipping in the Black Sea, and it is generally believed that after the return of General Harington, the effect of the policy pursued by the Nationalists towards Great Britain will be manifested in unmistakable fashion. This time, the British Government will have the support of practically the entire British colony in Turkey if it decides to take drastic measures—but those measures must not be half-hearted as hitherto. The Sultan himself and a considerable body of conservative Turkish opinion would support such action provided that the final settlement would be made without rancour, and if justice were tempered with that mercy which should characterise civilised victors.

YUGOSLAVIA.

ZAGREB, June 14.

The King's Illness.

Great anxiety has been felt on account of the illness of King Peter. The first news was alarming; that His Majesty had inflammation of the lungs and a high temperature, a dangerous thing at his advanced age. It was reported, and then contradicted, that the Regent had been recalled by wireless, and finally it was announced that His Royal Highness had arrived back in Belgrade, accompanied by Princess Helen and Prince Arsene, his uncle, younger brother of the King. Later bulletins are more reassuring, but one must be prepared for the worst, since King Peter is 77 years of age, and his health, far from robust during the past eight years, cannot have been improved by the trying years of exile and the terrible retreat through Albania.

The Political Crisis.

The political crisis is not finally solved, although the Press makes relatively little of it. The Peasant Party has decided not to abandon the Constituent Assembly, although they have resolved to vote against clauses 42 and 43, which deal with agrarian reform. As a matter of fact M. Pashitch has to choose between the Peasants' Party and the Mohammedans, for their views and interests are irreconcilable. The Communists have followed the example of the Narodny Club, and left the Assembly. The example seems catching, for it looks as though before long the whole Opposition will walk out and leave the majority to pass their resolutions at their ease.

Foreign Policy.

M. Take Jonescu returned to Bucharest by river to Turnu-Severin. Before his departure he was entertained at a number of official and semi-official banquets, and decorated with the Star of Kara George, First Class. The understanding with Roumania is of great importance, sealing the Little Entente; and is, in fact, a reminder to the Powers that the Secession States are vigorous entities and quite prepared to defend their own interests, which are fundamentally opposed to the French policy of a Danubian Confederation and restoration of the Hapsburgs or revival of the Austro-Hungarian Monarchy in however garbled a form. It also implies a united front against former enemy States, in respect of which all members of the Little Entente have similar interests. All are afraid of Hungary, while Roumania's sentiments towards Bulgaria are much the same as Serbia's.

But Yugoslavia stands alone in its dealings with Italy. Belgrade shows no disposition to meet Rome half-way in the matter of the Gulf of Barosh, for Yugoslavs feel that they have given away quite enough in the Treaty of Rapallo. Fortunately, it seems that the evacuation of Shibenik (Sebenico) is proceeding smoothly and rapidly, but it is probable that the Government will issue a formal *dementi* to statements in the Italian Press of an understanding on the Barosh question. Dr. Trumbitch has done well to define his position a little more clearly, for he is so prominent a man that he can scarcely keep to a

lonely furrow at this critical moment. In his latest speech he insists on the necessity of absolute national union and of avoiding rivalry and jealousy between the "intelligentsia" of the towns, and the peasants of the villages, who are the backbone of the country. He does well, too, to remind his hearers that Croats need no more be afraid of Serb hegemony than Serbs of being drowned out by the Croats; no one branch of the Yugoslav people is strong enough to be able to dominate the others. The tactlessness of some Serb officials has certainly alienated many Croats, and there is undoubtedly a growing feeling in favour of decentralisation; but still, no serious Yugoslav can entertain the idea of a breach of the union.

ALBANIA.

TIRANA, June 2.

Relations with Yugoslavia and Greece.

Colonel Ali Riza Kolonia, who, as reported in my letter of April 28, was sent to Belgrade on a mission to Yugoslavia, returned to Tirana yesterday, the mission having failed. This is the third time that the Albanian Government finds itself faced by a refusal on the part of Yugoslavia to open up pourparlers. One mission was sent last year to Belgrade, and another sought to open up conversations at Scutari with the Serbian agent, M. Mishitch. On each occasion the Serbians have declined to go on with the negotiations, seeing that Albania was bent upon maintaining her neutrality; for M. Pashitch claims that one must be either the ally of Yugoslavia or else her enemy.

The difficulties with Greece have not taken on an acute character, but still remain in a state of simmer, so to say. The Albanian request to the League of Nations, that Yugoslav and Greek troops may be compelled to evacuate her territory, appears to have caused annoyance to Greece, who is reported to have refused the League's invitation in the first place. But in the end the Athens Government decided to send delegates to Geneva. The Albanian delegate, Monseigneur Fan Noli, left Durazzo yesterday evening.

Parties in Parliament.

Already two parties have been formed in Parliament: The People's Party (*Populloré*), led by Mgr. Fan Noli, and

the Progressist (*Perparimtare*) Party, whose leader is M. Mehdi Frasheri, Minister of the Interior. There are also some deputies who wish to form an Independent Party. A point worth mentioning is that the Progressist Party appears to be more conservative than its rival; but we must wait for the debates on the new measures proposed to learn the real tendencies of the parties.

Albanian Representative for London.

As most of your readers are doubtless aware, Albania has hitherto been represented in Paris and in London by delegations. I learn that Dr. Michael Tourtoulis, one of the four members of the Supreme Council, has just been appointed Albanian Minister Plenipotentiary in London. Dr. Tourtoulis is known for his Anglophile sentiments. His nomination and the mission entrusted to him are of good augury for the future of Albania, and it is hoped here that official relations between the two Governments will enter on a normal and very friendly era.

Methodist Mission in Albania.

Messrs. Blake, Jones, and Frank Baker, of the Methodist Mission of America—which has its headquarters in New York—arrived in Albania a few days ago. The Mission desires to establish a college in Albania, also a model farm. It is understood that the college would make a beginning with a technical school, and that various faculties would be added later on. Choice has just been made of Valona as the centre of activities of the Mission, and an agreement between it and the Government seems to be on the point of being concluded. The schools will be under the control of the local government.

CYPRUS.

NICOSIA, May 25.

More Memorials.

It would seem that the "union" leaders are not even yet weary of framing and submitting memorials, although their monotony is certainly tedious to many readers, and must be trying to officials of the Colonial Office. Replies should, however, presumably present little difficulty, since they, too, can hardly do more than repeat what has been quite definitely said already. The only new feature in the Greek dispatches—if it is new—is that it is now the practice to send copies to the Foreign Office at Athens, in the hope, no doubt, that the Greek Government will give its support and make representations accordingly to the British Government. A memorial signed by villagers is to be sent to the High Commissioner for transmission to London, and a copy of it to the Hellenic Government is to be taken to Athens by the acting Greek Consul, M. Artemis. Yet another protest regarding the deportation of M. Katalanos and other matters is also to be forwarded from the Secretary of State. That the Cypriot Greek Councillors should persist in imagining that the present is a time for proposing that Greece should be saddled with the administration of Cyprus shows how utterly blind they are to the actual situation, as viewed by any except those of their little insular circle of busybodies.

The Legislative Council.

The High Commissioner has summoned the Council to consider several draft laws, including one to deal with the improper use of gold and silver coins, and another to amend the law (of 1889) relating to the marriage of British subjects other than Cypriot British subjects, which the new status of the island renders necessary.

A Moslem has written to the Limassol paper *Aletheia* (*Truth*) to contradict a statement that for forty years the Turkish members of Council had invariably voted with the British official members. This, he says, is a very erroneous assertion. The Turks have always voted for measures which they have honestly believed to be for the real benefit of the island, and have often joined forces with the Greeks, e.g., in advocating measures for economy.

General News.

A large number of lands situated within the delimited State forests, but recognised as private properties, which had been placed under Government protection, have now been declared free of such care and control. They are mostly in the Famagusta district.

The results of the island census should be of interest, and are expected to show a very satisfactory increase. Public health is good, and does credit to Government vigilance and to the quarantine restrictions which are observed against Egypt, Greece, Turkey, Asia Minor, and Syria, on account of plague, cholera, smallpox, and typhus.

Athletic sports are being held in various parts of the island, and have succeeded to a good football season, now very popular, during which a number of matches have been played between the military garrison and various clubs and schools of the different communities.

GREAT BRITAIN AND THE MIDDLE EAST.

MR. CHURCHILL'S STATEMENT.

In the House of Commons on Tuesday, June 14, Mr. Winston Churchill, Secretary of State for the Colonies, made his long-expected statement regarding British policy in the Middle East. He said:—

I must make my starting point this afternoon the obligation and responsibility into which this country has entered in the Middle East, and which, in accordance with the policy of the Government, I am endeavouring to discharge. During the war our Eastern Armies conquered Palestine and Mesopotamia. They over-ran both these provinces of the Turkish Empire, and in order to gain the support of as many of the local inhabitants as possible, pledges were given that Turkish rule should not be reintroduced in those regions. In order to gain the support of the Arabs against the Turks, we, in common with our Allies, made during the war another series of promises to the Arabs of the reconstitution of the Arab nation, and, as far as possible, of a restoration of Arab influence and authority in the conquered provinces. In regard to Palestine, a third promise of a very important character was made on behalf of the Government by the Lord President of the Council on November 2, 1917. It was that Great Britain, if successful in the war, would use her best endeavours to establish a Jewish national home in Palestine. Under decisions arising out of the Treaties of Versailles and Sèvres, we have accepted before the world the position of Mandatory Power over Palestine and Mesopotamia. We are at this moment in possession of these countries; we have destroyed the form of government which existed there, and we must endeavour to do our duty in a sober and honourable manner. We cannot lightly repudiate these undertakings; we cannot move our Armies hastily to the coast and leave the population a prey to anarchy and confusion of the worst description. It is no use consuming time and energy at this stage in debating whether we were wise or unwise in contracting that obligation. We were bound to make a sincere and resolute effort to redeem it; and whether the course be popular or unpopular, it is the only course which any British Government or British House of Commons would in the end find itself able to pursue.

The obligation was, Mr. Churchill continued, not an unlimited one. A point might be reached when we should have to declare that we had failed, and that we were not justified in demanding further sacrifices from the British taxpayer; that the condition of our finances or our military resources were such that we could do no more. That would be a very humiliating and melancholy confession to have to make, and, after giving the most careful consideration to the whole subject, he did not think it would be true to say, at the present time, either that we had failed or that our resources did not enable us to discharge our obligations. On the contrary, he believed that it was our duty to persevere, and he hoped that by persevering we might find an honourable and inextricable and ultimately a prosperous issue from our affairs. But if we were to avoid the shame of failure to bring our enterprises to a satisfactory conclusion, the only key lay in the reduction of expenditure on those countries within reasonable and practicable limits.

He found it impossible from the War Office to enforce the military reductions in Mesopotamia, because they depended absolutely upon political action exercised by other departments. He therefore pressed most strongly that the Middle East should be placed under a single Minister, directly responsible to Parliament, and having a separate Estimate presented to Parliament. The Middle East Department was set up under the Colonial Office in December last, and after being pressed most strongly by the Prime Minister, he agreed to accept the post of Colonial Minister.

Finding it impossible to arrange by telegram for the reduction of expenditure, he convened a conference at Cairo of the British authorities concerned in the affairs of the Middle East. At that conference conclusions were unanimously reached which, if they succeeded, would achieve the essential conditions of reduction that he had set before himself as the paramount object. At any rate, within the whole Arabian peninsula they had a

single clear policy upon which all the authorities, military and civil, were agreed.

At the Armistice there were in Mesopotamia and Palestine over 700,000 persons (soldiers, followers, and refugees) upon our pay list and ration strength. Counting in battalions, the Army numbered 175 battalions. During the financial year 1919-20 the expenditure upon these two countries was between 70 and 80 millions sterling. At the beginning of the financial year 1920-21 the numbers had been reduced to 250,000, or a scale of 70 battalions, and the expenditure fell to 40 millions sterling. Owing to the outbreak of the rebellion in Mesopotamia last year two divisions had to be brought back from India, and the present financial year opened with a total of 200,000 persons on our pay lists in Palestine and Mesopotamia, or, not counting 30,000 refugees, a military force of 48 battalions. When all the reductions decided upon by the Government had been effected there would still be an estimated expenditure this year of 35 millions sterling. At the Cairo conference he had the help of the most able soldiers responsible on the spot, as well as representatives of the General Staff, and no violence had been done to responsible military opinion. It was determined immediately to reduce the garrison in Mesopotamia from a 33-battalion scale to a 23-battalion scale, and that reduction would be completed by July 15. They also decided upon a further prospective reduction, after October 1, to a 12-battalion scale; upon the immediate disposal of surplus stores in Mesopotamia, and upon a reduction in the number of horses from 47,000 on April 1 to 17,000 on August 1—a large number of them having to be destroyed, as they could not be transported elsewhere or provided with decent homes among the natives—and also upon a large reduction in the number of followers and native labour. All this would effect a total saving of £5,500,000, with an additional saving of £500,000 obtained by a further scrutiny of the estimates. Against these savings there were to be set certain other charges, representing a total of nearly £2,000,000, making a net total reduction of £4,500,000.

While he was still at Cairo the Cabinet decided that the War Office should anticipate the result of the savings up to a sum of over £4,000,000, and the Army Estimates were presented to Parliament on that basis; and as a consequence the actual net reduction which he was able to submit to the House that day amounted only to a further £379,000 over and above the £4,250,000. The total expenses of these two countries during the present year were therefore not £35,000,000 but £27,250,000. If the arrangements they were making were successful, and if the policy which rendered them possible were carried out, and if their anticipations were not overthrown by events, he expected and proposed that the Estimates for 1922-23 for the normal current expenditure of both Palestine and Mesopotamia would not exceed £9,000,000 or £10,000,000. If this further saving of approximately £18,000,000 could really be achieved, it would constitute a very considerable relief to the British taxpayer.

Let them now see what was the policy and what were the methods by which they hoped to achieve this enormous reduction in military strength and expenditure, while at the same time carrying out the obligations and pledges into which they had entered. He would take Mesopotamia first. In June of last year the High Commissioner of Mesopotamia was directed by His Majesty's Government to announce the early setting up of a distinct Arab Government under an Arab ruler. That declaration they had already, to a very great extent, carried out. A Provisional Government, which had been in existence for a good many months, had been formed by Sir Percy Cox, under the headship of the Nakeeb of Baghdad. It was their intention to replace this Provisional Government, in the course of the summer, by a Government based on an Assembly elected by the people of Irak, to instal an Arab ruler acceptable to the Assembly, and to create an Arab Army for national defence. They had no intention of forcing upon the people of Irak a ruler not of their own choosing. At the same time, as the Mandatory Power, they could not remain indifferent in a matter so vital to them. He thought he was right in leaving these matters entirely in the hands of Sir Percy Cox, who was a great believer in the Arabs, who was acquainted with every aspect of Arab politics, and was accustomed to deal with the Arab notabilities. He hoped that under his guidance the people of Irak would make a wise and at the same time a free choice.

He felt it necessary, in consultation with his advisers, to state quite plainly the view which the British Government took of what would be the best choice of ruler. There were two possible policies. One was to keep the Arabs divided, which had been done with some success by the Turks; the other was the sincere fulfilment of the pledges we gave to the Arabs during the war. If we were to endeavour so to shape Arab affairs in the sense of giving satisfaction to Arab nationalists, we should find the very best, in fact the only, structure to build around which was available was the house and family and following of the Shereef of Mecca. It was King Hussein who, in the crisis of the war, declared war on the Turks and raised the Arab standard. Around that standard gathered his four notable sons, of whom Emir Abdullah and Emir Faisal were perhaps the best known, and the notabilities of the Arab world. With them at our side we fought. With them at our side Lord Allenby hurled the Turks from Palestine. Both the Emir Abdullah and the Emir Faisal had great influence in Irak. Both among the military and the religious classes. The adherents of the Emir Faisal in Irak had sent him an invitation to Mesopotamia to present himself to the people and to the Assembly which was soon to gather; and King Hussein had accorded his son permission to accept the invitation. The Emir Abdullah had re-

nounced his claims. He (the speaker) had caused Emir Faisal to be informed, in answer to his inquiry, that no obstacle would be placed in the way of his candidature, that he was at liberty to proceed forthwith to Mesopotamia, and that, if he was chosen, he would receive the countenance and support of Great Britain. The Emir Faisal was now on his journey to Mesopotamia, where he would arrive in about ten days. They must then see how opinion formed itself, and what was the view of the National Assembly when it was elected. He could not attempt to predict the course of events, but he did not hesitate to say that if the Emir Faisal should be acceptable to the people and to the Assembly, that solution would be one which offered, in the opinion of the highest authorities on whom he was relying, the best prospects of a happy and prosperous outcome.

There had lately arisen, however, in Irak, and particularly in the Busreh province, a considerable movement in the direction of continuing British rule. That reflected great credit on Sir Percy Cox; but we could not continue those direct responsibilities. He could not say with regard to Mesopotamia that there were primary direct strategic British interests involved. The defence of India could be better conducted from her strategic frontier. Our policy in Mesopotamia was to reduce our commitments and extricate ourselves from our burdens, while at the same time honourably discharging our obligations and building up an effective Arab Government which would always be the friend of Britain and, he would add, the friend of France. We were leaning strongly towards what he might call a Sherifian solution, both in Mesopotamia and Trans-Jordan, where the Emir Abdullah was now in charge. We were also giving aid to the Shereef of Mecca, whose finances had been grievously affected by the interruption of pilgrimage, in which our Mohammedan fellow-subjects were so deeply interested, and which we desired to see resumed. The repercussion of this Sherifian policy on other Arab chiefs must be carefully watched. In the vast deserts of Arabia there were powerful nomadic tribes at the head of which was a remarkable chief Ameer Ibn Saud who had long been in a state of warfare with King Hussein and his neighbours generally. A large number of his followers belonged to the Wahabi sect which bore, roughly speaking, the same relation to orthodox Islam as the most militant forms of Calvinism would have borne to Rome in the fiercest times of the religious wars. This sect professed a life of exceeding austerity, and what they practised themselves they ruthlessly enforced on others. They held it as an article of duty as well as of faith to kill all who did not share their opinions, and to make slaves of their wives and children. Women had been put to death in Wahabi villages for simply appearing in the streets, and it was a penal offence to wear a silk gown. Men had been killed for smoking cigarettes, and as for the hatred of alcohol, the most energetic supporter of the temperance cause in this country fell far behind them. Austere, intolerant, well-armed, and blood-thirsty, in their own region they were a distinct factor which must be taken into account. They had often been, and they still were, very dangerous to the holy cities of Mecca and Medina and the whole institution of the Pilgrimage. Their chief had shown himself well disposed towards Great Britain, and was in intimate relations with Sir Percy Cox. The Government had arranged to continue the subsidy of £60,000 a year, together with a lump sum of £20,000, which was the cost of a single battalion of infantry. This subsidy would be paid monthly in arrears, contingent on the maintenance of peace and order externally. It must be understood that the granting of this subsidy gave the chief the power to establish that order on which control depended. We should pay only in so far as good behaviour was assured. If injury was done, a deduction would be made from the subsidy of the aggressor, and would be handed over as compensation to the victim. King Hussein had expressed his willingness to enter into negotiation with this chief. If we were successful in our plans, by the end of the financial year the Arab ruler and Government would be installed in Baghdad.

Before Sir Percy Cox left Baghdad he intimated to the Turks that, in anticipation of the plebiscite which was provided for them in the Treaty of Sevres, he would continue to administer Kurdistan direct. The Kurds did not appreciate the prospect of being ruled by the Arab Government. They had instituted inquiries throughout the Kurdish area, and the result had been to confirm the view that the people of Southern Kurdistan would only accept union with Irak if they were dealt with by the High Commissioner direct. Therefore Sir Percy Cox would perform a dual function in regard to Irak and Kurdistan. He trusted that under his influence Southern Kurdistan and Irak would be drawn closer together; but in the meantime they were developing the principle of Home Rule for Irak within the general area of Mesopotamia at the same time as they were developing the general self-government of Mesopotamia. In proportion as the Arab Government grew strong and efficient they would hope to reduce the forces they had in that country, even below the limit he had mentioned, till ultimately the main, if not the whole, responsibility for order would be assumed by the Arab ruler and Government, with the possible assistance of the Kurdish levies, which would furnish a most valuable bulwark against infiltrations from Kemalist or Bolshevik sources. When the Arab Government had been set up and a ruler chosen they were prepared to enter into negotiations with that ruler to enable them to readjust their relations with Mesopotamia upon a treaty basis—that was, recognising in a much more direct form the independence and still further disengaging ourselves from the problems, burdens, and responsibilities of these embarrassing regions. About £1,252,000 of the £7,000,000 or £8,000,000 of the normal cost of military and aviation arrangements for Mesopotamia was for the Air Force, and the rest for levies and certain subsidies.

The Committee might ask if he guaranteed that these arrangements would actually work and would permit the great reductions in the garrisons to be made without leading to a renewal of disorder and of war. He could give no guarantee. All he could say was that he believed they were the best arrangements that could be contrived, that they had gathered behind them a very general measure of support among the experts, military, civil, and aerial, who had been concerned in making them. The High Commissioner was prepared to go forward on that basis, and the military authorities were in accord. If they succeeded they would relieve the Exchequer of an immense burden and ultimately lead up to a condition where the country would be self-supporting. The carrying out of that policy would require great skill and prudence as well as resolution from Sir Percy Cox and from the military and civil authorities concerned.

The Arab Army was already partly formed under Ja'afar Pasha, the Mesopotamian Secretary for War, who had a most dramatic career. He began by fighting against us in the Dardanelles and received the German Iron Cross. Then he commanded the Army of the Senussi against us in the Western Desert. He won two battles against us, but the third went amiss from his point of view, and he was wounded and pursued by the Dorsetshire Yeomanry; and finally he was caught and imprisoned in the Citadel at Cairo. In trying to escape, the rope by which he was endeavouring to descend from the walls broke, and he was precipitated into the ditch. While in hospital he read in the papers that the Shereef of Mecca had declared war on the Turks, and immediately he saw he was on the other side. As the result of representations to the Arab leaders at Mecca, he was given a command, and distinguished himself greatly in the next two years. He was finally given the command of St. Michael and St. George by Lord Allenby in a hollow square of British troops, composed almost entirely of the Dorsetshire Yeomanry, which had ridden him down. Such was the personality of the Mesopotamian Minister of War.

The cost of the Arab Army would be defrayed from Mesopotamian revenue, but there were in addition Arab levies which would be gradually absorbed into the Arab Army, as well as Kurdish and Assyrian levies, which he had endeavoured to form out of the refugees who had long enjoyed our hospitality. This force was engaged in taking over and holding the stations from which British troops had been withdrawn. Behind these levies and the Arab Army there would stand at the end of the year about twelve battalions of British infantry. These, with their auxiliary units, would be sufficient to hold the vital communications of Baghdad and the river communications which connected it with the sea. Last of all, there were arrangements for maintaining public security by means of a powerful air force. There were at present six squadrons of aeroplanes in Mesopotamia, and next year two more would be added.

The air service was in reserve, but they hoped by its agency to be able to keep in amicable touch with the troops of the local centres and to ward off in good time movements of unrest, to sustain and if necessary relieve detached posts, to keep political officers in close relation with their districts, and to maintain a reasonable degree of order in the country. There was also a squadron of the Air Force in Palestine, and three squadrons in Egypt. Arrangements were being made which would make it possible for aeroplanes to fly regularly to and fro across the desert between Baghdad and Cairo. Once this route across the desert had been marked out, and it was possible for it to be flown in the regular course of affairs, the whole of the Air Force in Mesopotamia could be speedily transported to Palestine or Egypt or vice versa and be sent to reinforce the Air Force in Mesopotamia. That might be the means of securing the total reduction of the aggregate number of squadrons they would have to employ. He was counting on friendly sentiment in the desert; he had every reason to believe they would get it. Arrangements could be made to fly a certain number of commercial aeroplanes, which could carry mails and possibly passengers, and incidentally afford a most valuable link in the chain of Imperial communications.

He turned to Palestine. At the present time the problem there was more acute than in Mesopotamia, but it was a much smaller problem in a military sense. The only cause of unrest in Palestine arose from the Zionist movement and from our promises and pledges in regard to it. But for those promises and that movement the British garrison maintained in Palestine could be sensibly reduced. At the end of last year our forces there were reduced from a ration strength of 16,000 to one of 7,000, giving a combatant strength of 5,000. That was the number there at the present time. He could not hold out any hope of diminishing that force in the immediate future. On the contrary, it was possible it might require some slight reinforcement. The total cost to which we were put on this account in Palestine last year was £6,500,000, and this present year it would be £4,500,000. But of that £4,500,000, £2,000,000 represented the repatriation and demobilisation charges on the very large body of Indian troops which had now evacuated the country. The expense of the British military garrison would be £2,500,000 next year. It was not quite fair to say that that expense could all be reduced if, for instance, they had not got Palestine, because the bulk of the troops in Palestine were regular British units, and if they were not stationed in Palestine it was probable that they would be stationed elsewhere, unless this House were to embark on a further policy of disbanding the pre-war units of the British Army. But still, there it was, and he was not at all minimising the difficulties of the problem.

Let them see how they stood towards the Jews and the Arabs of Palestine. Mr. Balfour's declaration, endorsed by the Supreme Council of the Allies at San Remo and incorporated in the draft mandate, would shortly come before the League of Nations. The

difficulty about the promise of a national home for the Jews in Palestine was that it conflicted with our regular policy of consulting the wishes of the people of a mandated territory and giving them representative institutions as soon as the people were fitted for them. With such institutions they would certainly veto all further Jewish immigration. Numerous and vexatious though the difficulties were, he believed that with coolness, patience, and a little good fortune we should be able to find our way. The British Empire had been built up by optimism, by positive assertions rather than bare negations. There were in Palestine 500,000 Moslems, 65,000 Christians, and about 65,000 Jews. The Jewish immigration and propaganda had greatly excited and alarmed the Arab population, who feared that Jews would come principally from Central Europe, and especially Russia, in scores of thousands, swamp them, push them off their land, and eventually gain control of the country's institutions and defence. Those fears were quite illusory.

The Zionists, in order to obtain the enthusiasm and support which they required, were bound to state their case with the fullest ardour and hope, and it was those declarations which alarmed the Arabs. Sir Herbert Samuel, a skilful, experienced, Liberal politician, was also a most ardent Zionist, and he (Mr. Churchill) was following with confidence Sir Herbert's actions and giving him all possible support in his difficult task. Sir H. Samuel had lately had made a further declaration to the people of Palestine stating his interpretation of the words "a national home" as used in the pledge given by the British in 1917 to be that the Jews, who were scattered throughout the world but whose hearts were always turned to Palestine, would be able to come there and develop the country to the advantage of all its inhabitants. There was really nothing for the Arabs to be frightened about. Jewish immigration was being watched as regards both numbers and character. No Jews would be brought in beyond the number which could be provided for by the expanding development of the resources of the country. At present it was greatly under-populated. Anyone who had seen the work of the Jewish colonies established in Palestine during the last 20 or 30 years would be struck by the results shown, and he defied anybody who had seen that work not to feel that the British Government, having taken up their present position, could not cast it aside and allow it to be brutally and rudely overturned by fanatical attacks of the Arab population. With a proper development of the resources of Palestine, and if capital were available for the creation of irrigation works on the Jordan, there would be, year by year, new means of a good livelihood for a moderate number of Jewish immigrants, and that would inure to the well-being of the whole community. We could not agree to allow the Jewish colonies to be wrecked and future immigration to be stopped without definitely accepting the position that the word of Britain no longer counted in the East. If representative institutions were conceded to the inhabitants of Palestine, some definite arrangement would have to be made to safeguard within reasonable limits the immigration of Jews into the country.

In Trans-Jordan, where there were no British troops, a state of continuous disorder had prevailed for the last two years. It was necessary to bring that region under some form of settled government, not only from our point of view, but from that of the French. We had had recourse to the good offices of the Emir Abdullah, with whom he had a long conference at Jerusalem. The Emir had undertaken to maintain order in Trans-Jordan and to restrain hostile action against the French. The British Government were assisting the Emir, and an air squadron and a few armoured cars were available for his support. So far those arrangements had been successful. The Emir Abdullah had maintained an absolutely correct attitude, both towards us and the French, and if he found it necessary to lay down the charge which we had persuaded him to take up, he trusted it would be possible to find another Arab ruler who would assume it.

The general policy which we are pursuing, Mr. Churchill continued, is in no way opposed to the interests of France. On the contrary, it is the surest method open to us of securing France from disturbance in Syria by Arab influences with which she has unhappily disagreed. There is, unfortunately, an undercurrent of recrimination among the French and British officials in the Middle East. This does not extend to those in responsible positions on either side, and will, I am sure, be firmly repressed by superior authority wherever it manifests itself. It would be deeply injurious to both if France and Great Britain should be unable to act together in the Middle East. It would be absolutely fatal to our joint interests if the impression were to continue, as it has done during the last two years, that one country was indifferent to Arab aspirations and the other especially opposed to the Turks. In such a way we should unite all the forces in these lands in hostility against us at the time when we wished to reduce our military forces and the heavy expense to which both countries are put thereby. If we wish to maintain our position and discharge our responsibilities in the Middle East, England and France must act together and pursue a policy of appeasement and friendship towards both Turks and Arabs.

The policy he had been endeavouring to explain was animated throughout by a sincere desire to establish a solid community of interests between the Arabs on the one hand, and Great Britain and her Allies on the other. But all these efforts would be frustrated and brought to naught unless we could combine with that a peaceful and lasting settlement with Turkey. It was not to be expected that such a settlement could be reached by the exhibition of absolute powerlessness on the part of Great Britain and France. We must have the means of defending our vital interests; we must show that we possess these means, and that, in the last resort, we are capable of using them. Otherwise there

was no limit to the extent of the humiliation and maltreatment which will be inflicted on those victorious Allies. If we showed ourselves incapable of defending ourselves, we should not get that peaceful settlement which was our goal.

The paramount object which we must pursue, are pursuing, and have pursued for many months, said Mr. Churchill, has been to secure a real and lasting peace with Turkey. It is only upon the basis of such a peace that the prospect I have held out of substantial abatements in the heavy charges which will fall on both countries can be realised. I am bound to bring this matter before the House, as it is fundamental to the whole of the argument I have made and the policy we are endeavouring to pursue. Such is the counsel which I respectfully offer to the Committee. I cannot say with certainty that the unknown future which lies before us will enable this policy of reduction and of peace to be carried out with complete satisfaction, but I do believe that the measures we are taking are well calculated to that end, and I advise the Committee to give us their support in the difficult and delicate process of reduction and of conciliation which lies before us, and on which we are already definitely embarked.

PRESS ON THE NEAR EAST.

Mr. Churchill's Speech.

Below we give some extracts from various articles which appeared on June 15, the day following Mr. Winston Churchill's speech on the Middle East.

The *Daily News* hails the speech with general praise. It says:—

In his picturesque and lively survey of the whole Middle East problem yesterday Mr. Churchill did at least succeed in laying down a policy. After the two years of planless drift that followed the Armistice, that in itself is something. But it is due to the Colonial Secretary to go further and give him credit for making himself responsible not merely for a policy, but for a sound policy. The Middle East means more than Palestine and Mesopotamia, but it means these two countries pre-eminently, and of the two Mesopotamia is the more perplexing problem. Palestine is strategically much more simple to handle; it is in a more advanced state of political development, and since the Balfour declaration of 1917 as the national home for the Jews, one of the main planks in our Palestinian policy has been laid down in the eyes of the world. In regard to Mesopotamia, the dangers and the responsibilities are much greater. Since the Armistice nearly every conceivable mistake that could be made has been made. Being pledged, at any rate, since the acceptance of the mandate for Mesopotamia, to set up an Arab government and confine our part to what is described as "administrative advice and assistance," we proceeded to tie down a nomadic tribal population under an army of bureaucrats on the Indian Civil Service model, with the result that the military expenditure involved in holding down a country theoretically almost autonomous amounted to roughly £35,000,000 a year. All that Mr. Churchill, or Sir Percy Cox, or Colonel Lawrence, or all three, in co-operation, is going to change. An Assembly is to meet and choose its own ruler. Its choice will apparently be free, though Mr. Churchill yesterday gave a strong lead in favour of the Emir Feisal, who would beyond doubt prove more effective than any other probable candidate. Apart from that—though it is not legitimate to press this consideration very far—the fact of Feisal's relationship to his brother Abdullah and his father Hussein would make for stability in the East in other regions than Mesopotamia. Whatever the choice of Mesopotamia may be, two declarations made by the Colonial Secretary are much to be welcomed. We are not under any circumstances going to stay and rule Mesopotamia ourselves, and we are not going to regard Mesopotamia as a strategic frontier of India.

The *Times*, on the other hand, is more critical, commenting on Mr. Churchill's "bold attempt to reconcile his schemes for the administration of Mesopotamia, Kurdistan, and Palestine with the exigencies of our financial situation." It continues:—

His whole argument is too hypothetical to admit of summary acceptance or rejection, and his assurances are qualified by so many "ifs" and "buts" that they fail, at first sight, to carry conviction. His speech leaves an impression that he is building upon foundations dangerously unstable, and that he is incurring contingent liabilities which, should they eventuate, this country might not be able to sustain. There is, moreover, a disconcerting air of topsy-turvydom about his structure. While we agree with his conclusions that it would be absolutely fatal to the joint interests of England and France were they unable to act together in the Middle East, and that a real and lasting peace with Turkey must be a principal object of our policy, we cannot affect to feel confidence in a Middle Eastern policy obviously inspired by the very influences which encouraged friction between France and England in the Middle East, and failed from the beginning to perceive that, as regards the Arab world and Turkey, the substantial interests of the two countries are coincident. The British force which he proposes to maintain in Mesopotamia seems too large to be compatible with a sound financial policy, and too small to be effective in case of trouble, despite air patrols and provision for reinforcement by aeroplane. Upon the question of Palestine many of his statements were sound, some less sound, and others, in our view, erroneous. We

doubt, in particular, whether he has really understood the meaning of the Zionist movement or the nature of the difficulties that have been created in Palestine, or the consequences of Sir Herbert Samuel's failure to deal energetically with them.

The *Daily Telegraph* does not in any way criticise the proposals, and appears generally to approve of them.

The *Morning Post* entitles its article "Arabia—Felix aut Infelix," and proceeds sharply to criticise British policy in Palestine, for "that policy is, as we need hardly explain, a Jewish policy."

Now Mr. Winston Churchill admits—and, indeed, it would be idle to deny—that "there was more danger of trouble in Palestine than there was in Mesopotamia." And he admits also—that also cannot be denied—that "the cause of unrest in Palestine, and the only cause, arose from the Zionist movement." But when he goes on to say that "there is really nothing for the Arabs to be frightened about," he is not perhaps upon such firm ground of veracity. It may be true that Jewish immigration is now being, as he says, "carefully watched and controlled"; but the position is that the Arabs of Palestine have been put under a Jewish Government; and that the Jews have boasted that Palestine is to become "as Jewish as England is English."

It proceeds to enumerate certain Arab grievances, and concludes:—

Such, then, is the Arab case; and what does Mr. Churchill oppose to it? There is really nothing which he opposes to it but vague reassurances, and the statement that a considerable British garrison is to be kept in Palestine. Our garrison in Mesopotamia is to be reduced because there we are in harmony with the native population; but, so far as we can gather, there is no prospect of any substantial reduction in the garrison of Palestine. And we see that Zionists are demanding that no Arab units are to be raised for the Palestine Defence Force, but that Palestine is to be held by a "British garrison, including a strong Jewish contingent." Palestine, in fact, is to be held under a military heel—not exactly a "Modernist" policy, we should have thought—and dangerous also, since the Arabs of Palestine are part of that Moslem world with which England has no desire to quarrel.

The *Manchester Guardian*, which begins by calling Mr. Churchill "a politician with whom no Government seems able to dispense," sets out, before judging the speech, our commitments to the Arabs, and finds that our motives in Mesopotamia, though mixed, were not unworthy. Its final paragraph contains a suggestion:—

Is it now too late to find a better course than simply scuttling from Mesopotamia, confessing our failure, cutting our losses, and abandoning our undertakings? Mr. Churchill thinks there is a middle way. In a speech notably careful, for him, he estimates that we can bring down our Mesopotamian expenditure next year from its present swollen figure of some twenty-eight millions to nearer ten, if the work of policing and organising the country can be taken off our hands by the Arabs themselves, and if we can settle them under a ruler of their own choice whom they will respect and obey. For this post Feisal has been approached, and the consent of his father, King Hussein, has been obtained to his candidature. A national assembly of Irak will shortly be held to choose a ruler. If they elect and follow Feisal the whole prestige of the Shereefian family will be vested in the new kingship, and a hopeful step towards a united Mesopotamia will have been taken. That, in brief, is Mr. Churchill's plan and hope for lightening our burdens and carrying out our promises in that land. It ignores one overshadowing consideration which his critics were quick to remember. If we continue to back and to establish the Arab, and if France, on the other hand, aims in the Middle East mainly at accommodating the Turk, we may yet find ourselves in honour bound to assist Feisal, or whoever rules Mesopotamia, against the invasion from the north of a Pan-Turkish Kemalist army seeking to profit by the division in European counsels on Middle Eastern questions and to restore Turkey's rule once more from the Levant to the Persian Gulf. Mr. Churchill's plan is the ideal one, no doubt, and all of us will hope that it may prove feasible. But even he unfolded it with an unusual lack of decision and was bogged in a welter of "ifs" as he advanced. A more practical view will not fail to realise that it is not by the enthroning of Feisal, or the slow transference of government to the Arabs, that the future of Mesopotamia can be assured. For that a common policy towards the Turk by France and England is the essential.

MUSICAL NOTES.

The British Music Society Congress.

Last year, when the British Music Society held its first congress, I mentioned in this journal how good an institution it is to join, especially for foreign readers who may find it difficult to keep in touch with recent musical developments in this country; and now that the second Congress week has come and gone, I should like once more to impress upon readers the advisability of joining the Society.

During the week June 13 to June 18 many things were done, most of them good and a few bad. Nothing could have been better, for instance, than to get Mr. John Coates to give the first of three historical song-recitals under the auspices of the Society, for if there is anyone who can demonstrate how far advanced musically England was in Tudor, Elizabethan, and Stuart times it is this inimitable singer. Mr. Coates does indulge in a few illegitimacies, but nobody minds, so rarely refreshing is his personality. Again, no one, so well as Mrs. Gordon Woodhouse, who with the English Singers gave a recital of old English music, can prove the supremacy of English keyboard compositions in the sixteenth and seventeenth centuries, for her harpsichord playing is faultless. And, further, what modern English composers have already achieved in the writing of chamber music was convincingly shown by the English String Quartet in works of Bridge, Hurlstone, and Vaughan Williams. (This concert, by the bye, was made memorable by some extraordinarily fine playing by Miss Marjorie Hayward and Mr. Harold Samuel in the first two movements of Ireland's first violin sonata, a work which normally seems much inferior to the second.) But on the other hand there were mistakes. The first was in the orchestral concert consisting wholly of British works, for owing to insufficient rehearsal the orchestra was not well enough acquainted with the works, with the unlucky result that Eugene Goossens' "The Eternal Rhythm" seemed too long and Holst's "The Planets" wearisomely commonplace. (Incidentally, it will need a very different performance from that which Mr. Adrian Boult was able to secure from the British Symphony Orchestra to convince me that "The Planets" has many of the epoch-making ideas that are claimed for it. However, this is not the place to discuss the merits and demerits of the work.) Another and more serious error was the inclusion, at an orchestral plebiscite concert, of some American music by J. A. Carpenter, W. Damrosch, and McDowell, and of Mr. Damrosch as its conductor. Mr. Damrosch is no conductor, and for the mysterious sake of international courtesies we had better leave it at that. But it will take Mr. John Alden Carpenter a very long time to live down the impression he has caused by the creation of a series of the most tiresome puerilities, called "Adventures in a Perambulator." Stuff turned out by American machinery and interpreted by an American mechanic is not the thing to convince people that the British Music Society has that earnest purpose which we know it to have, and we hope profoundly that in future years such erring gallantries will be omitted.

Stravinsky.

A great opportunity arose during the past week of making up one's mind about Stravinsky—possibly the most discussed composer of our time—for at the Queen's Hall on June 7 Mr. Eugene Goossens conducted "Le Sacre du Printemps" and on June 10 M. Kussevisky the "Symphony for Wind Instruments," which is written to the memory of Claude Debussy. Before the "Sacre" Mr. Goossens had given us glorious performances of the "Spanish Fantasy" of Berners (the last movement of which, the Pasodoblé, was done with unforgettable brilliance), Ireland's prelude, "The Forgotten Rite," and Ravel's overlong "La Valse"; yet fine as all these things were, they were overshadowed by the Stravinsky. It is useless to quarrel with Stravinsky's method (or with anybody's, for that matter), for here undoubtedly was a personality, sometimes inspiring, sometimes awful, and sometimes unpleasant. The rhythmic genius of the work one is tempted to call unparalleled; certainly it was the rhythm and little else that moved one. One cannot like or dislike such work, for one's ordinary feelings are not touched. If one can imagine verse written with the primitive vigour of C. M. Doughty, with the directness of Bart Kennedy, and with the curiously individual perversities of Rimbaud, one might get somewhere near the "Sacre"; but one will be wiser after hearing Mr. Goossens conduct it again at the Queen's Hall on June 23.

In speaking of the "Symphony for Wind Instruments," one can be bolder, however imperfectly it may have been played. For in this work it is the methods of the composer which distract the attention, because there are no results worth considering. Here the passion for independence, and the pernicious desire (instead of the inevitable impulse) for

unprecedented sounds, have led Stravinsky to create an incomprehensible series of noises. One is inclined to think that he has reached a stage, well known in the history of some geniuses, which his admirers may call prophetic, but to which others may give a less charitable name, a stage where the wilful coincides with the purposeless.

A Novel Concerto.

There is probably no English composer who has further explored the combinations of unusual timbres than Arthur Bliss, who himself conducted his new concerto for piano-forte and tenor voice at the Wigmore Hall on June 11. In this concerto the voice is given words of fine sound but of no meaning, and the whole thing is to be regarded as abstract music. Now Bliss has been too successful in his past researches (and notably in the second rhapsody, in which soprano and tenor voices are used instrumentally) for this, his latest effort, not to be taken as he means it; but, all the same, it proved impossible at the first hearing not to listen for the words of the voice, to the consequent detriment of the experiment. In time, no doubt, one could listen to the voice merely as a producer of sound, like the other instruments. The combination of voice, piano-forte, strings, and percussion was brilliantly made, with that joyously keen impulse which Bliss possesses abundantly. Repetition of the work, which is certainly merited, alone can show whether the use of words, which, of course, helps the voice, helps also the larger scheme. I rather think that they will prove to be a distraction, and that wordless syllables would have been better.

Mr. Arthur Rubinstein.

Of this young pianist's ability in modern, and especially in Spanish, music I have often written in high praise. He has an exuberance of life which is very exciting, if not moving; and his technical command is particularly great in colour and in tone. His playing at his last recital at Queen's Hall on June 11 of a study and prelude of Szymanowski, and then of this composer's "Serenade de Don Juan" was extremely lucid, and, besides forcing home the inexplicable neglect of the Pole in this country, showed us that the later Szymanowski is no more like the earlier one than the later Rachmaninoff is like the composer of the C sharp minor prelude. It appears that pianists still love to play Liszt's "Liebestraum" and the "Mefisto" waltz, and I had to hear Mr. Rubinstein in them to listen to his Chopin polonaise. But the great classics suffer in this pianist's romanticising hands; and he is essentially an artist of to-day, to interpret the composers of to-day (or of a recent yesterday).

Two Singers.

Miss Ethel Frank, the American soprano, whose last recital was at the Queen's Hall on June 9, is a singer of quite uncommon refinement and perception. Moreover, she does not share with many American artists a lack of judgment in song, and for the most part her programmes are irreproachable. Her singing of Bach, Buononcini, and Mozart was delightfully fresh and reverent; and two new "Hindoo Poems" of Delage she sang with a reserve of power that at once characterised her as a musician. The "Naissance de Bouddha" is a fine song, and it was exquisitely given.

On a different plane is the singing of Miss Jenny Sonnenberg, a South African contralto, whose recital was at the Wigmore Hall on June 9. She has a voice of good volume and quality, but her breath control is comparatively weak, with the result that her words sometimes wobble. Her choice of four Strauss songs was difficult to comprehend, so sugary, so gusty, and so outworn were they: as a display of her undoubted emotional ability one would have sufficed. There was a falling off in three songs of Debussy, and her final group of English songs, which included the cheap ballad, "Lullaby," of Frederic Keel, and three of the art ballads of Frank Bridge, was scarcely chosen for its musical worth.

A Week of Scriabin.

During the past week there were no fewer than four recitals wholly devoted to the pianoforte works of Scriabin—a striking testimony to the popularity of the Russian composer in this country—though I was able to go to but one of them. That given by the pupils of George Woodhouse at the Wigmore Hall on June 9 I was particularly sorry to miss, for in it Miss Eurydice Draconis, the Greek pianist whose Scriabin recital last year was a notable event, was playing the fourth Sonata. At the Aeolian Hall, on June 9, Dr. Eaglefield-Hall lectured authoritatively on Scriabin's works, and Miss Katherine Heyman, an American pianist, played representative works of Scriabin's three periods. Miss Heyman has excellent technique; her gradations of tone are beautiful, and her appreciation of the formal originality of Scriabin's work is unusually developed. In particular, her performance of the eighth Sonata was very good indeed.

ANDANTE.

KING PETER OF THE SERBS, CROATS AND SLOVENES.

In King Peter, news of whose death reaches us as we go to press, there has passed away one of the most romantic figures of modern times, and one of the most picturesque monarchs of history. A thorough democrat, grandson of that strange character, Kara George, who was a fierce, illiterate, tempestuous peasant, but a patriot and a military genius, King Peter was the personification of the intense patriotism of his people; and even during the long years of exile he never missed an opportunity of furthering the cause which he had at heart, the freedom of his beloved compatriots, in which he employed both sword and pen. In this respect he was in striking contrast with the representatives of the rival dynasty. The brilliant debauchee King Milan and his obstinate and tyrannous son Alexander held mediæval views of the Throne, and were in many ways comparable to our Charles II. and James II. The history of their reigns is one of subservience to Austria-Hungary and oblivion of the high national ideals which are always the characteristic of the Serbian people, in spite of all their faults. But the eighteen years of King Peter's reign is a period of unceasing and strenuous endeavour and sacrifice for that very ideal. In many respects his reign recalls that of his predecessor, George Brankovitch, for both were called to the Throne late in life; both spent their declining years in fighting with all their power against enemies on all sides; and both spent many years in exile, when their country was overrun by enemy hordes, finding refuge abroad—George fleeing from the Turks to Dubrovnik (Ragusa), Peter from the Austrians and Bulgars to Salonika. And both knew that the Magyars were really their most dangerous foe.

Peter Karageorgevitch was born on June 20, 1844, at Belgrade, the eldest son of the then reigning Prince Alexander. Doomed to exile by the accession of the Obrenovitch dynasty, he went to Geneva in 1858 to be educated, and three years later to France, graduating at the military academy of Saint Cyr. In 1864 he received a commission in the French Army, and three years later passed Staff College. When the Franco-Prussian war broke out he fought as a French officer, was taken prisoner by the Germans, but succeeded in escaping by a bold dash into a river, which he swam, in mid-winter, among a shower of bullets. On rejoining the French troops he was rewarded with a Staff appointment.

Five years later there broke out at Nevesinje, in Herzegovina, the rising against the Turks, which was the first step towards the liberation of that rocky province. Peter could not resist an opportunity of fighting for Serbs on Serbian soil, and hurried off to raise a band of *komitajis*, which he led under the name of Peter Mrkonjitch. When the rising was crushed, he was hunted, with a price on his head, and his life was saved by some simple peasants, who gave him food and shelter. The old couple are still living, and last year the aged King sent them his greetings, with a memorial plate to insert in the wall of the old house.

A long period of peace now lay before the young soldier. He divided his time between Vienna, Paris, and the French Riviera, and in 1883 moved to Cettigne, where he married Princess Zorka, the eldest daughter of the then Prince Nicholas. King Peter was thus brother-in-law of the present Queen of Italy, and of the Grand Duke Nikolai Nikolaievitch of Russia. Princess Zorka died in 1890, leaving two sons and a daughter—that is, Prince George, the eldest son, who resigned his rights in favour of his younger brother, Prince Alexander, and Princess Helena, who married the Grand Duke Constantine of Russia, who was murdered by Bolsheviks, and has one son.

After the death of his Consort, Prince Peter went to Geneva, where he lived quietly until 1903, when the hideous but beneficial revolution of May exterminated the Obrenovitch dynasty, thus wiping away the Royal blood feud that had been the curse of the country for three generations. On June 2 of that year the National Assembly invited Prince Peter to the Throne, which he mounted on June 12, and was crowned at Belgrade on September 8 of the following year.

With his accession a new epoch opens in Serbian history. In striking contrast with the autocratic and tyrannous régime of Alexander, King Peter was a most conscientious and strictly constitutional Sovereign. Army reforms were instituted, and preparations made for the campaign of liberation. The first step was the emancipation from the tutelage of Austria-Hungary by an economic war, which was followed in 1912 by the Balkan Alliance and the cleansing of the country of the Turks, and by the consequent Bulgar War, where the Bregalnitsa atoned for the disgrace

of Slivnitsa, the Obrenovitch's unhappy war, just as Kumanovo and Monastir avenged Kossovo.

Then came the Great War where little Serbia stood alone exposed to the onslaught of the Austrian and Magyar armies. The story has often been told how, in November, 1914, the Serbs, outnumbered and driven back to the heart of the country beyond Kosmaj, began to despair, when the old King emerged from the solitude to which he had retired after the Bulgar war. He came himself into the trenches and issued the following order: "As King and Commander-in-Chief of the Army, I release from his oath everyone to whom it is hard to fight and shed his blood for his fatherland. Whoso will, let him return in peace to his home. I remain here with those who prefer to die rather than let the enemy put our hearths to fire and sword." Then turning to a soldier near him he took his rifle and started firing at the enemy lines. Needless to say, the word went round like wildfire that the king was in the trenches with the men; the Serbs sprang forward, and sent the astonished enemy in full retreat, which rapidly turned into a rout, hurrying back to the Save; and King Peter entered his capital in triumph before the last shots were fired at the retreating Austrians, who had held the city a bare fortnight.

When, in 1915, the massed artillery of the Central Powers and the attack by the Bulgars on the flank compelled the Serbs to tread the *via dolorosa* through Albania, through snow and ice, the old King went with his army, riding on an ox-cart. Many a time the primitive conveyance was in danger of falling into the frozen torrents as they crossed the high-angled, Turkish bridges, without a parapet and floored with ice; but the devotion of his men brought him through, and in spite of his years and his rheumatism, the tough old monarch safely reached Greek territory, where he found rest and refuge. During those three years of exile he let his beard grow in token of mourning, and so few who saw him in Salonika recognised in the old gentleman with flowing white beard the smart and dapper prince of earlier years. In those days his martial bearing had made a favourable impression on the Turks, who are good judges of a man, when he paid a visit to Constantinople, being in striking contrast to that of his rival Ferdinand of Bulgaria, who required two orderlies to hold his horse.

After the liberation he was crowned "By the Grace of God and the Will of the People, King of the Serbs, Croats and Slovenes," though the young Crown Prince Alexander filled the office of Regent. Thus King Peter lived to see the consummation of his life's work, the emancipation and union of his people, for which he had worked in three wars, and also in peace, when, in order to educate his folk to the idea of liberty, with its privileges and responsibilities, he exchanged the sword for the pen and translated into Serb John Stuart Mill's "On Liberty."

THE RICHARD BURTON MEMORIAL LECTURE FUND.

The first meeting of the committee was held on June 14, at the rooms of the Royal Asiatic Society, 74, Grosvenor Street, kindly lent for the occasion. Sir Richard Temple being unable to attend, the chair was taken by Brig.-General Sir Percy Sykes, K.O.I.E., C.B. It was resolved that an appeal should be made forthwith to the Press for support, and that steps should be taken to bring the movement to the notice not only of the United States, but also that of foreign countries, including especially France and Italy, in which Burton had many friends and admirers. It was decided that an annual lecture should be delivered, and that the lecturer should be some person who had distinguished himself, or herself, in contributing to our knowledge of those countries in which Burton was particularly interested. Also that a bronze medal should be struck, which, together with suitable remuneration, would be presented to the lecturer; and perhaps to others, for services that may be rendered.

While there has been some controversy on a few matters connected with Sir Richard's writings, there can be no disagreement whatever as to the fact that as an explorer, linguist, and contributor to science and literature, he had few, if any, equals in modern times. Already in 1885, when he was not yet 45, at a dinner given to him by the Anthropological Society, Lord Stanley said truly that "into a life of less than 45 years Captain Burton had crowded more of study, more of hardship, and more of successful enterprise and adventure than would have sufficed to fill up the existence of half a dozen ordinary men." The pilgrimage to Mecca and Medina alone would have immortalised his work. But this included also explorations in Harar, Somaliland, East Africa, Dahomy, the Cameroon Mountains, the Land of Midian, the Country of the Mormons, Brazil, and Iceland, in addition to work done during the years at Trieste, that "polyglot settlement of Austrians, Italians, Slavs, Jews, and Greeks." His merits were inadequately recognised during his lifetime, and it is time that justice were rendered to them by the present generation. The movement now referred to is a step in the right direction.

PERSONAL AND GENERAL.

TO-DAY.

June 23 (New Style).

June 10 (Old Style).

Shawwal 17, 1339 of the Moslem Calendar.

Sivan 17, 5681 of the Jewish Calendar.

Mr. Arnold J. Toynbee has recently arrived in Sofia.

M. Jordania, President of the Georgian Republic, arrived in London on June 18.

The Bulgarian Minister has returned to London from Brussels.

Sir Cowasjee and Lady Jehangir have arrived from Bombay and are staying at the Hotel Cecil.

Sir Horace Rumbold, British High Commissioner at Constantinople, has arrived at 8, Lowndes Street.

Sir John and Lady Barran have just reached London, through Constantinople, on their return from Egypt and Palestine.

The Nizam of Hyderabad has given the British Red Crescent Society £6,666 for the relief of Moslem refugees in Constantinople from Anatolia and Thrace.

The Queen, attended by Lady Elizabeth Dawson, has visited the Brook Street Art Gallery to view the exhibition by A. B. Cull of "The King's Ships—Burma and the East."

The Right Hon. Frederic John Napier, Baron Chelmsford, G.C.S.I., G.C.M.G., G.C.I.E., G.B.E., has taken the title of Viscount Chelmsford, of Chelmsford, in the County of Essex.

H.H. the Maharaja Sir Chandra Shum Shere Jung of Nepal has contributed 3,000 rupees (nominally about £200) to the funds of the Mt. Everest Expedition, and has wished it every success.

The engagement is announced, and the marriage will shortly take place, between Roderick Llewellyn Baylis, of Delhi, India, and Phyllis, only daughter of Mr. and Mrs. Gordon Baylis, of Westcliff-on-Sea.

Mrs. Alec Tweedie, who has lately spent two years in the East, has made impression-sketches of her journey instead of writing a book. They will be exhibited at the Alpine Gallery on July 2 to July 7 inclusive, including Sunday, from 9 a.m. to 6 p.m.

A marriage has been arranged, and will take place early in July, between Major Frederic Baring Leman, Indian Army, second surviving son of the late George Downton Leman, I.C.S., and of Mrs. Leman, of Raleigh, Bideford, and Kathleen Frances, elder daughter of the late John Henry Clarke and of Mrs. Clarke, of Clifton, Bristol.

The engagement is announced between Colonel Commandant Arthur D. Kirby, C.B., C.M.G., R.A., Headquarters, Eastern Command, India, and Mary Muriel, second daughter of the late William Wilson, of 52, Prince's Gate, S.W., and Las Delicias, Uruguay, and of Mrs. Wilson, Norton Grange, Malmesbury, Wilts, and 15, Princes Gardens, S.W.

Under the leadership of Bishop Gwynne and the Rev. A. Shaw, the Church Missionary Society is making marked progress in the Sudan, the officials, British and African, Christians and Moslems, joining in recognising the excellence of the work being done. In Egypt it is likely that a Christian university centre for higher education will be established.

The marriage arranged between Major Hugh Stuart Glass, M.C., of the M. and S.M. Railway Company, Limited, Madras, and Amy, widow of Captain Leslie Young, 20th London Regiment, and daughter of Mr. and Mrs. David Petrie, of Antwerp and Anningsley Park, Ottershaw, Surrey, will take place at Bangalore, India, on July 4.

A marriage has been arranged, and will shortly take place at Dar-es-Salaam, Tanganyika Territory, between Arthur Stanley Cremer, Colonial Audit Department, second son of the Rev. F. D. Cremer and Mrs. Cremer, Shermanbury Rectory, Henfield, Sussex, and Gwyneth, youngest daughter of Mr. and Mrs. F. H. Ashhurst, 16, Palace Mansions, West Kensington.

The Maharaja Holkar of Indore arrived in London last week. The visit is of a purely personal nature, his Highness wishing to see for himself the conditions in Europe after the war. It may be recalled that the Maharaja was one of the first of the Indian rulers to send troops to the front during the late war, and he also contributed 8,000,000 rupees towards the cost of the war, and subscribed freely to the Red Cross and kindred societies.

The Church Missionary Society will send a delegation to India next autumn for the purpose of investigating the strength of the movement for self-government of the Church in that country. The movement has made such great progress recently that the Society feels that it must be dealt with. The transference of responsibility to Indian shoulders has been C.M.S. policy from the beginning, and much that is progressive can be claimed to have been done already, but the native Christians do not think it enough.

Our Smyrna Correspondent writes (June 6):—

Sir Harry and Lady Lamb held a reception of the Smyrna British Colony in the Consulate-General in honour of the King's Birthday. A large and representative gathering thoroughly appreciated the kindness shown by the host and hostess and their two daughters in entertaining them, and not for many years has the Colony known such gaiety as was seen on this occasion. Sir Harry and Lady Lamb evidently wished the entire Colony to respond to their cordial invitation, as arrangements were made to entertain 400 guests, and though but half that number attended, the "slackers" much regretted their absence from a delightful evening's entertainment.

H.B.M.'s Consul A. B. Geary held an informal reception of the Bournabat British community in the local club on the eve of the King's Birthday, and was ably assisted by Major Johnston (British Liaison Officer with the Greek Army) and Mr. C. E. Winter (manager of the National Bank of Turkey) to entertain the hundred guests who "made merrie" till midnight. A Greek military band provided music for the dancers, and "petits chevaux" helped to amuse those who have escaped the "fox-trotter" craze. Mr. Geary gave an exhibition dance in full Albanian costume, which both startled (at first) and amused his guests.

APPOINTMENTS, ETC.

The Bey of Tunis has appointed Lieut. H. A. Hine, R.N., to be Chevalier of the Order of Nichan Iftikhar.

Prince Michael Soumatoff has been appointed Councillor of the Georgian Legation in London.

The following lecturers to Cambridge University have been appointed by the Board of Indian Civil Service Studies:—Indian Law, Mr. R. H. McLeod, Caius; Indian History, Mr. G. P. Moriarty, Pembroke; Tamil, Mr. J. L. Wyatt, Christ's; Burmese, Mr. L. Allan Goss, Emmanuel; Sanskrit, Mr. Rouse, Christ's; Hindustani, Lieut.-Colonel Phillpott, Caius; Marathi, Mr. R. A. Leslie Moore, Peterhouse; Bengali, Mr. S. N. Das Gupta, Trinity.

OBITUARY.

The death has occurred of Mr. William Warde Fowler, Fellow of Lincoln College, Oxford, the well-known writer on classical subjects.

Major-General George Thorp Onslow, C.B., late R.M.L.I., died last week at the age of sixty-two. His active service included the Sudan, 1884-1885.

Sir William Lawrence Young, Bart., died last week, after a long illness. The family honours devolve upon his brother, Sir Charles Alban Young, K.C.M.G., M.V.O., born in 1865, one time Counsellor of Legation at Teheran.

The death has occurred, at the age of 79, of Mr. Alan Cadell, C.S.I. He passed the I.C.S. examination at the age of nineteen, and his thirty-five years' service was in what are now the United Provinces, which he represented on the Viceregal Legislature for two years before retirement. He rose to be a Divisional Commissioner, to be Commissioner of Excise and Opium Agent, and to be the senior member of the Board of Revenue. In 1895, for ten months before Sir Anthony (now Lord) Macdonnell took charge, he acted as Lieutenant-Governor of the United Provinces.

THE RIOTING IN ALEXANDRIA.

By an Eye-Witness.

The insurrection of May 20—30 was the fifth within my recollection; and in all of them there was a monotonous similarity in the symptoms that preceded the final explosion. Everyone knew what was coming except the Government at Cairo; and if they foresaw the catastrophe they have imitated the ostrich! First, there was an outrageously hostile attitude toward Europeans on the part of students and the lower classes; then an evident want of discipline in the public services. In the first week of May all the cab drivers struck work, by way of protest against the local S.P.C.A. Charges of bribery were brought against British police inspectors; and notices were affixed to the doors of private garages forbidding the use of cars. The Mixed Court of Appeal warned the authorities officially that there was trouble ahead; but nothing was done.

Friday, May 20, began with noisy street demonstrations. The mob seized several municipal carts laden with stores, and used their contents as missiles. Many men paraded the streets armed with clubs and syringes for squirting petrol. Two police-stations were wrecked and burnt, with several European houses; an English sergeant and many Greeks, Italians and Maltese were clubbed to death.

On Monday, May 23, the Norwegian Judge on the Mixed Court of Appeal drove up in his car as usual to the courthouse in Mohammed Ali Square. The head porter advised him to take the car to a garage and accompanied him to one. On returning to the Court in a cab they were set upon and severely beaten. Had not both been exceptionally powerful men they would certainly have lost their lives. One of the Court clerks was killed on his way to office and two were severely wounded. The Judges begged for military help, and telegraphed to the Ministry of Justice that they would close the Court as a protest against the lack of protection. Will it be believed that the police did absolutely nothing to prevent or punish these outrages; and that some of them watched murderous onslaughts on Europeans with apparent unconcern?

However, in the course of the day some British troops arrived and restored a semblance of order. The curfew bell rings at 10 p.m., and should bring the situation home to natives, as it is their Ramadan festival. A military Court of Enquiry is sitting, but we all fear that it will let the culprits off with a warning, as happened in 1919. Meantime, Colonel Taylor, commanding the Sherwood Foresters, and Mr. Ketham, of the Police, have been fired at—the former twice—but no arrests were made. Owing to the abolition of the Press Censorship the most exasperating lies regarding Europeans find currency.

BULGARIAN CABINET CHANGES.

A telegram from Sofia, dated June 15, received by the Bulgarian Legation in London, states that the following changes have been made in the Bulgarian Ministry:—

Minister of War, M. Dimitroff; Railways, M. Boteff; Interior, M. Athanasoff.

PALESTINE EXPLORATION FUND.

The 56th annual meeting of the above Fund, the first public annual meeting, will be held in the rooms of the Society of Antiquaries, Burlington House, London, W., at 4 p.m., on June 29, the Right Hon. Viscount Bryce, O.M., in the chair. Dr. D. G. Hogarth, C.M.G., D.Litt., of Oxford, the chairman of the committee, will give an account of the latest discoveries at Askalon, illustrated by some magic lantern slides. Many of the views are entirely new, as is much of the information he has to give. The Hon. Ormsby-Gore, M.P., has also promised to speak. All interested in Palestine exploration are welcome.

The excavators at Askalon have, says the Jerusalem correspondent of *The Times*, identified and uncovered the famous stoa round the great court built by Herod the Great, and referred to in Josephus as being admirable for its workmanship and grandeur. Statues of Apollo, Venus, and Victory, and also a gigantic image of King Herod himself, were found in the building.

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

NEWS IN BRIEF.

Our Bucharest Correspondent writes (June 1) that pourparlers are being conducted by the Papal Nuncio, Cardinal Marmaggio, and M. Octavian Goga, the Roumanian Minister, with a view to a concordat.

It is officially announced that only the forces in Mesopotamia will continue to enjoy the free postage facilities extended to the forces during the war.

Azerbaijanis in revolt against the Soviet are reported to have refused the amnesty offered to them on condition of serving with the Turkish Nationalists against the Allies on the ground that they are not pro-Islamic and are anti-Bolshevist.

It is announced from Rome that the Italians, in accord with the Rapallo Treaty, have evacuated the second zone of Dalmatia, including Sebenico and Scardona.

On the production at the Schönbrunn Schlosstheater, Vienna, of Mr. Bernard Shaw's play, "Arms and the Man," Bulgarian students made an angry demonstration owing to the author's satirical remarks regarding the habits of their countrymen, the scene of the play being laid in Bulgaria.

By permission of the Orthodox Patriarch of Jerusalem, an Anglican chaplain has baptised an English baby in the Church of the Nativity at Bethlehem, the oldest Christian church in the world. This is the first recorded instance of an English child being baptised there.

The King George V., Capt. B. S. Thesiger, C.B., C.M.G., which had been cruising with the flagship in the Levant, visiting Cyprus, Rhodes, Suda Bay, and other places, has returned to Malta. The latest information from the official lists of movements of ships shows that the force at Constantinople or in the Black Sea or Sea of Marmora includes the battleship Benbow, flagship of Rear-Adm. Sir Richard Webb, the light cruiser Centaur, and the destroyers Sikh, Seraph, Sportive, and Sparrowhawk. The light-cruiser Caradoc was last reported at Alexandria, and the destroyers Serapis and Tuscan at Smyrna, Sepoy at Mudros, and Senator at Port Said. The ships at the base at Malta include the light-cruisers Calypso, Ceres, and Concord, and the destroyers Tumult, Trinidad, Torch, Tribune, Splendid, Spear, and Speedy.

It is announced in Athens that the Adrianople Synod has decided to postpone the election of the new Ecumenical Patriarch of Constantinople in succession to Mgr. Dorotheos, Archbishop of Brusa, who died suddenly in London last March.

In virtue of the agreement recently concluded in Belgrade, the frontier between Roumania and Yugoslavia in the Banat of Temesvar (formerly Hungary) will be fixed by a mixed Commission.

A newspaper, *Tavisupali Sakartvelo* ("Free Georgia"), has been started in Paris to enable Georgians freely to express their political views, such liberty being denied to them in their own country by the Russian Bolsheviks who have occupied it.

Official reports show that 167,000 persons are on famine relief in the Central Provinces, 94,000 in Bombay, and 30,000 elsewhere.

According to the latest news from Kabul the negotiations between the Indian and Afghan Governments are progressing favourably.

The Council of the Order of Advocates (Egyptian Bar) has telegraphed to *The Times* condemning Mr. Churchill's recent reference to the retention of British troops in Egypt, on the ground that it is unfair to make capital out of the Alexandria riots, "the like of which occurs everywhere in civilised countries, particularly in cosmopolitan ports," as foreigners were unmolested elsewhere in Egypt.

A Report from the Commander-in-Chief of India covering the minor military operations of the Indian Army on the North-West Frontier, in South Persia, and in the Yemen between May 1, 1919, and April 30, 1920, has been published as a *communiqué*.

THURSDAY, JUNE 23, 1921.

This issue of THE NEAR EAST, although dated Thursday, June 23, is published on Monday, June 20. Next week's issue will appear on the usual day.

THE PROBLEM OF THE MIDDLE EAST.

Mr. Winston Churchill's speech on the Middle East had had to be postponed for so long a period after the Cairo Conference that much of what he had to say about British intentions in Mesopotamia and Palestine was already common knowledge. He was able, nevertheless, to deal with his subject in a masterly way, and few of those who heard or have read his speech will fail to be inwardly glad that with the creation of a Middle East Department the reproach of floundering in Eastern affairs without any definite policy is at last to be taken from Great Britain. Perhaps Mr. Churchill's most valuable contribution was the emphasis that he laid upon "a peaceful and lasting settlement with Turkey." He has realised, as was not realised by the British representatives at the Peace Conference, that Turkey, Mesopotamia, and Palestine are three links in the Middle Eastern chain. The future of Mesopotamia hangs on an understanding between Great Britain and Turkey, as the peaceful development of Palestine is in turn bound up with an adequate measure of Arab contentment in Mesopotamia. This elementary principle was crudely violated in the Treaty of Sèvres, and had only been imperfectly grasped by the British Government when Turks and Greeks were invited to attend the London Conference—how imperfectly may be gauged from the fact that the Conference broke up without any veto on the renewal of the campaign against Turkey by Greece. It is satisfactory, therefore, to learn from Mr. Churchill that the paramount object that the British Government is now pursuing is "to secure a real and lasting peace with Turkey." If the pursuit has been in progress, as he suggested, "for many months," only since the Cairo Conference has any real knowledge been brought to bear upon it, and there can be no claim of consistency unless and until the threatened Greek offensive has been called off. Even if the Turkish feeling towards the Greeks be regarded outside the Near East as unreasonable and exaggerated, it must be reckoned with in any attempt at a lasting settlement, and to ignore it as the Allied Governments have done all along, and still seem inclined to do, is to sow fresh seeds of unrest.

However satisfactory in theory the arrangements that have been made for the future administration and development of Mesopotamia, they offer no real prospect of achieving success unless they are preceded by "a policy of appeasement and friendship" towards the Turks. No prejudices or sympathies are involved in the statement; it is merely a recognition of hard facts, whether palatable or otherwise. Consequently, with the chances of a peaceful and lasting settlement with

Turkey still unknown, it was inevitable that Mr. Churchill's optimistic picture should be hedged round with many a condition. "If the arrangements we are now making are successful, and if the policy which renders these arrangements possible is carried out, and if it is not interrupted by untoward events . . ." The uncertainties may primarily concern Mesopotamia and its inhabitants, but they have their root in the measure of success attending the efforts to bring about an understanding with Turkey. Given peace and prosperity in Mesopotamia, there may be ground for hope that the Arabs of Palestine will find good cause to reproduce the same conditions in their section of the Arab world. In this connection only shortsightedness can prompt our French Allies to question the wisdom of Great Britain in seeking to introduce within the whole Arabian Peninsula a single clear policy. The desire that still holds in Paris to dragoon the Arabs and to make them subservient to Imperialistic designs is altogether out of date, and we can only wonder that French publicists should openly advocate hostility to the Arabs as a permanent feature of the policy of the Republic. It can only be supposed that the supporters of this policy are under the impression that they will gain favour in the eyes of the Turks by showing their dislike of the Arabs. The theory is a naïve one. If Turkish relations with Great Britain and France are good, the Turks will have no difficulty in keeping in friendly touch with the Arabs, whom they will always hope to find at their side, should emergency arise. On the other hand, if the Allied Powers cannot come to terms with Anatolian Turkey, they can count on permanent unrest in Syria and Mesopotamia, unless they happen to be on a footing of such cordiality with the Arabs that the latter will remain proof against the intrigues or direct incitement of the Turks. French methods are likely to prove too subtle for post-war days. Honesty is going to be the best foreign policy.

Not the least service that Mr. Churchill has rendered by his brilliant speech is to restore Mesopotamia to its proper niche in the British public's interest. For too long its detractors have held the field, taking advantage of a period of stress and depression at home to raise the "Little England" flag on the most unlikely fortresses and to create misgivings that in the face of official uncertainty were not easy to dissipate. Mr. Churchill has helped to clear away these misgivings by producing a definite policy, with a show of conviction and his own driving force behind it. Both the House of Commons and the British public as a whole have been reassured. It is to be hoped, therefore, that the Secretary of State for the Colonies will be given full opportunity to make good in the mandated territories. His clear enunciation of what British policy ought to be would have been an affront to Parliament, if the Cabinet had not intended that immediate effect should be given to it. Its translation into action in connection with the Greco-Turkish imbroglio will, accordingly, be awaited with impatience. But even with the establishment of satisfactory relations with Turkey there will still be obstacles in the way. Arab co-operation must necessarily prove an unstable factor for some time to come, not because the rulers are not to be implicitly trusted, but because the temperament of the people is opposed to any prolonged spell of restraint. British policy must necessarily support the more settled elements of the Arab world. This leaves the fanatic Wahabite followers of Ibn Saoud—the fiercest fighters among the Arabs—to be placated by monetary doles, and in spite of this arrangement reports are current of Ibn Saoud besieging Hail and even of entertaining designs against the Euphrates region. So long, however, as our dealings with the Arabs are in the hands of those who understand them and are sympathetic, there is no reason why with patience we should not win through creditably in the Middle East.

IN SOUTH PERSIA.

MEN AND METHODS.

By "Kalantar."

The so-called Arabs of South Persia are inveterate robbers. Others certainly indulge, and to no mean extent, but the Arab seizes whenever and wherever he can. Frugal and hardy, he knows not the meaning of discomfort or physical exhaustion, and will cover incredible distances in search of plunder.

Of this large and scattered brotherhood the followers of Ahmad Quli have a particularly unsavoury reputation. On the fertile plains under the Hashimabad range they have constructed a circle of massive towers, and here pitched their black tents. A clear, fast-running stream waters their crops of wheat, barley, and gram, and they grow rich; secure in the knowledge that they can, as occasion demands, resist in their towers or, in the face of superior force, pack their tents and loot and scatter to the hills.

The Central Government, pursuing a time-honoured policy of masterly inactivity, turns a deaf ear to complaints against them, while unwelcome attentions from the Ilkhani are averted by discreet presents from their stores of plunder. True, only 100 miles away to the south-east the Idareh-i-janub, as they term the newly formed South Persia Rifles, had built a fort and garrisoned it with 500 infantry and a troop of cavalry, all armed with the deadly Lee-Enfield. It behoved robbers to move in larger bands, and seek their prey further afield. The Arabs did so; but, noticing that the formidable Idareh, no doubt for political reasons, left Hashimabad and its marauders to their own devices, they became bolder.

A column including cavalry, infantry, and guns paid Ahmad Quli a visit, and he behaved himself for six months. But meanwhile trouble was brewing for him, and in quite an unexpected quarter.

A Bakhtiari Governor came to Yezd. Young and comparatively efficient, he heard with patience the complaints of the merchants. How Riza Quli's caravan of 500 camels had been attacked at Anar, two sarwans killed, and 3,000 tomans worth of sugar carried off to swell the ill-gotten pile at Hashimabad. How only 15 days previously, at Shams, 300 donkeys from Bandar Abbas had been seized, their drivers stripped and beaten, and untold yards of valuable cloth taken to the cursed nest of thieves.

Then Mashalla Khan, the head tufangchi, had ridden with a small following to the stronghold. Ahmad Quli had received him hospitably, killed a lamb in his honour, and invited the leading mirs to smoke a kalyan and discuss the monstrous charge. They were prepared to take unlimited oaths that they knew nothing of caravans of sugar or cloth. They would take the tufangchi round the village, he could search their tents, their towers; if he found one piece of stolen goods he could cut off their ears and lay them at the feet of the Governor!

Till far into the night the samovar sent forth its little jets of steam, amber-coloured tea shone in glasses, the smoke of endless cigarettes curled to the ceiling. At dawn the tufangchi started on his 150-mile homeward trek, and, strangely enough, as he crossed the irrigation channel and headed for the yellow plain, already shimmering in the morning sun, three donkeys straggled past, whisking their tails and browsing on the withered scrub; a companion touched Mashalla's arm and pointed: "See the mark on their necks? Haji Hussain's animals!"

A month later a party of five Bakhtiaris, mounted on wiry ponies, literally draped in cartridge belts, and carrying, slung under their armpits, small-bore magazine rifles, rode slowly into the hamlet of Naukand, one farsakh from Hashimabad. In the distance the mule carrying their baggage and servant could be seen nodding his way steadily up the stony track. The dozen or so of primitive hovels were deserted, but behind a patch of cultivation half a mile away a boy shepherd leant on his staff and gazed on the newcomers—their white kullahs and glistening rifle barrels. Mustapha Khan, the Bakhtiari, and his companions dis-

mounted, loosened girths, and led their animals to the weed-choked water channel. The mule ambled in, and the servant produced eggs and the remains of a cold chicken from the depths of a saddle-bag. Meanwhile, the shepherd had bolted out of sight over a neighbouring ridge. In half-an-hour Ahmad Quli heard the news that for the first time in ten years a Bakhtiari had entered his country.

This was a serious matter. Rumours had drifted through from Yezd that a Governor was to be appointed—and a Governor meant taxes. Even a Frenchified Teherani would extort something—but a Bakhtiari!

The mirs were summoned, and a well-armed deputation, led by Ahmad Quli himself, reached Naukand in time to

A Young Wood-Cutter of S. Persia.

see the Bakhtiari mounting for the last stage of their journey. Salutations and handshakes, but no surprise. A carpet was spread, and, as soon as the inevitable samovar and cigarettes had made their appearance, Mustapha explained his mission and handed over an envelope, stamped with the Royal arms and bearing an elaborate seal in blue wax. He had been appointed the Governor's representative. He was to assess taxes, collect them, and generally bring Hashimabad "into line" with the rest of the province. In this letter there was no mention of robbery; but the Bakhtiari's pockets bulged with documents from most of the merchants in Yezd, claiming mountains of merchandise looted over a period of fifteen or twenty years.

After some consultation Ahmad Quli presented his ultimatum. Hashimabad had no need of a Governor. The Arabs recognised one chief only—an Ilkhani of their own blood. If the Bakhtiari insisted on proceeding there would be fighting—anything might happen! From Mustapha Khan—arguments, expostulations, finally angry threats.

GUARANTEED

WHITE HORSE

WHISKY

BY APPOINTMENT.

PURE SCOTCH

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping' so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1½" fitted with No. 2 and No. 3 Morse Taper Shank.

1" to 3" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to:—

AMERICAN MACHINE & FOUNDRY CO., LTD.,
CANBURY PARK ROAD, KINGSTON-ON-THAMES, ENGLAND.

CHRISTIANIA, STOCKHOLM, TUNIS.

With night the Arabs withdrew to their village and posted look-out men in the highest towers.

Dawn next day saw the Bakhtiari winding their way, sullen and disappointed, on the road to Yezd.

II.

It was a Friday when Mustapha Khan and his little band rode into Yezd, and the Friday quiet reigned over the drab town. The domes and arches of the empty bazaar echoed and re-echoed to the clatter of their horses' hoofs. A solitary beggar, propped against the shutter of a stall, waved a cluster of flies from his sightless eyes and whined for alms, while farther on a half-witted darvish, squatting cross-legged at the entrance to a shrine, looked up appealingly at the riders and held out a withered hand.

Possibly, the party had timed their entry for a Friday. Their very return signified defeat, and the flouting by a crowd of ragged beggars, as they termed the Arabs, of the authority of the all-powerful Bakhtiari. In a crowded bazaar they would have to run the gauntlet of scornful glances, and swallow the insult of many a whispered remark.

Leaving the bazaar, and following a dusty lane which wound, snake-like, between high garden walls, Mustapha Khan led his party to the rear of the "palace." From the last halting place, on the previous night, he had sent in word of his approach, and they would be expecting him; but humility, never out of place, must be exaggerated if he would escape the wrath of the Governor.

Dismounting, he handed his rein to a companion and entered a small courtyard, where a dozen tufangchis, wearing the distinctive wide cotton trousers, pleated coat, and white kullah ornamented with the large silver badge, squatted round a brazier and a much-cracked Russian teapot. With true Persian dignity he finished the ritual of salutation, and then proceeded to sound his companions on the state of the Governor's temper.

His Excellency was furious! Not with Mustapha: with the Arabs for defying his representative and lowering his dignity in the eyes of the people.

Thus reassured, and cheered by a rapid consumption of tea, the travel-stained warrior became his usual expansive self, and, in answer to an endless volley of questions, he unravelled a tale of fierce encounters with bodies of Arabs (never less than 300 strong), of days of siege when grass was their only diet, and of weeks of constant watching and sleeplessness. As he warmed to his task the circle of listeners grew ever wider; more carpets were spread, more teapots appeared on the glowing charcoal, and a large bowl of whey passed from hand to hand.

The appearance of the farrash bashi cut short a narrative which might well have held the audience until, at least, the tea and cigarettes gave out. The farrash bashi showed a line of ivory teeth under a drooping black moustache and murmured: "The Governor will see you."

In silence the master of the household led the way by a narrow cobbled path through an arch and into the main courtyard. In the centre of this was a large tank, round whose edges grew roses, pink and yellow. Slender, close-planted poplars sighed in the morning breeze, and cast faint and ever-moving shadows on the white walls of the Governor's apartments.

Mustapha Khan slipped off his shoes, and stepped into the cool of a long, narrow room, the floor of which was covered with a variety of beautiful rugs, mostly work of Kashan and Meshhed. The ceiling was decorated with variously shaped mirrors set in wooden frames.

The tufangchi crossed his hands at his waist and bowed; for at the farther end of the room sat, cross-legged, a small, dapper figure in long pleated coat, black trousers of European pattern, and a black felt kullah. Through a long ebony holder the Governor puffed languidly at a cigarette, and spoke in an undertone to Mullah Ali, his secretary, seated, pen in hand, amid a tumble of papers.

On other days petitioners were interviewed, sentences promulgated, and other official business transacted in the Audience Chamber at the other end of the courtyard. Then His Excellency sat on a gilt chair, and often spoke a few words of French to his Ministers; but on Friday only urgent affairs received attention, and one could be natural and comfortable. He signed to Mustapha to approach, and listened, with half-closed eyes, to the tufangchi's account of his treatment by the Arabs—"impudent, half-naked thieves" he called them. Then he asked a hundred questions concerning their forts, the number of their fighting men, and the nature of their arms. And the secretary watched with his keen black eyes and alternately nodded and shook his head.

When the sun was overhead, and the blue-tiled dome of the madrasah glistened like a giant turquoise, Mustapha Khan bowed himself out of the Governor's presence and joined his companions in the outer court. They were sitting as he had left them, discussing his story and passing conjectures as to the probable action of their master.

That action was simple. The Governor was determined that the Arabs should accept his authority and make amends for their impudence in the past. Mustapha, he admitted, was a good servant, but not the man for a dangerous task; he lacked daring, and was unskilled in the invaluable art of bluff. His following, moreover, had been, undoubtedly, too small for an undertaking against so distant and recalcitrant a body as these Arabs had proved themselves to be. His Excellency would send two "gunmen" this time, backed by twenty sowars, all carrying the most modern rifles and plentifully supplied with ammunition.

Ahmad Khan and Hashim, the leaders he selected, were peculiarly suited for the work in hand. A year previously they had been in the Governor's household at Hamadan filling the lowly positions of farrier and groom. Then trouble

On the Nusaki-Seistan Trade Route: Camel Men from Herat.

had arisen with a neighbouring tribe of Kurds, and in the series of fights which had followed the Bakhtiari's efforts at subjugation these brothers had proved their courage and endurance, and they had been rewarded by promotion to the rank of tufangchi. That they rode borrowed horses and carried inferior rifles was, to this astute Governor, an additional reason for employing them, for, he rightly conjectured that men who have little to lose and are placed within reach of comparative wealth will take heavy risks.

(To be continued.)

CENTRAL ASIAN SOCIETY.

The annual general meeting of the Central Asian Society was held last Wednesday at Burlington House, London, W., the Right Hon. Lord Carnock, P.C., presiding. The report presented by the hon. secretary, Lieut.-Colonel A. C. Yate, showed that the membership had been more than doubled in the one year. An alteration was made in the rule fixing the number of vice-presidents, and these were increased from six to eight. The Earl of Ronaldshay, G.C.I.E., and the Right Hon. Sir Mortimer Durand, G.C.M.G., retired, and there were consequently four vice-presidents elected; these were Colonel Sir Charles Yate, Bart, M.P., Sir Hugh Barnes, K.C.S.I., Lieut.-Colonel A. C. Yate, and Sir Edward Penton, K.B.E. Besides being appointed a vice-president, Lieut.-Colonel A. C. Yate was re-elected hon. secretary, Captain G. C. Stephenson being added as joint-hon. secretary to assist in the ever-growing work of the office. General Sir C. C. Munro, G.C.B., Sir Michael O'Dwyer, G.C.I.E., Major-General Neil Malcolm, C.B., and Miss Ella Sykes were re-elected ordinary members of Council.

Subsequently a lecture was delivered by Sir Michael O'Dwyer, dealing with events in North-West India since the outbreak of war, and the present position of affairs. Speaking of the Khalifate propaganda, he said that one result had been to induce 30,000 poor and ignorant Indian Mohammedans to sell up their worldly goods, abandon their old homes in the land of "the infidel," and seek shelter among their Moslem brethren in Afghanistan. These unfortunate people had suffered untold hardships; it was believed that about 5,000 of them had found only a grave; the rest, after being harried by Afghans and frontier tribes, had gradually drifted back to India, penniless and starving, and had been obliged to appeal to the Government whose protection they had so lightly abandoned to reinstate them in their old homes.

Of the present position in India, he said that next after checking sedition, the settlement of the Turkish question came first in order of urgency. The delay in that settlement had provided the opportunity for certain Indian Mohammedans to pose as more Turkish than the Turks themselves, demanding the restoration of Thrace and Syria to Turkey and dictating the forms of administration to be established in Palestine and Mesopotamia—things which the Turks themselves had never claimed. It was wise and just to take into account the sentiments of loyal Indian Moslems, but we should make it clear that we saw through the designs of those who sought not so much the good of Turkey, or of Islam, as the ruin of Great Britain.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

June 15.—Lord Lamington moved: "That it should be the duty of the Government to inform the League of Nations that the wishes of the people of Palestine had not been consulted as regards the mandate for Palestine, and that therefore Article 22 of the Convention has not been complied with." The question, he said, had gained in force by the remarkable speech made the day before by the Colonial Secretary, who had said: "The difficulty about this promise of a national home for Jews in Palestine is that it conflicts with our regular policy of consulting the wishes of the people in the mandated territories." The right hon. gentleman's phraseology was not exactly correct, because by Article 22 of the Convention it was not a question of whether they wished to consult the wishes of the people, but it was an obligation imposed on the mandatory Power to consult the population interested. The Leader of the House admitted some time ago that the people of Palestine had never been consulted as to who should hold the mandate for their country. In defiance of Article 22 of the Convention, the wishes of the people of Palestine had never been ascertained. If the League of Nations was not so informed, it was possible that trouble might arise in future over the question of the Mandate.

The Duke of Sutherland did not think it would be relevant for the Government to bring the matter to the notice of the League; but they had no desire to evade the question whether Article 22 had been complied with or not. It had already been pointed out that if the question of the Jews were left on one side the Arabs would sooner have to do with the British than with any other foreign nation. Therefore, as far as the selection of the British was concerned, the noble Lord need not have any doubt.

HOUSE OF COMMONS.

June 13.—In response to Viscount Curzon, Mr. Baldwin gave the net profits of the Anglo-Persian Oil Co., after providing for administration expenses, debenture interest, royalties and depreciation, as follows:—

Year ended.	Net profit. (Dr.)	£
1914, March 31		26,711
1915, " "		90,431
1916, " "		85,768
1917, " "		344,110
1918, " "		1,308,558
1919, " "		2,010,805
1920, " "		2,611,165

Mr. Chamberlain informed Col. Archer-Shee that His Majesty's Government had no definite information that the Turkish Nationalists in Asia Minor had been receiving arms and ammunition from the Russian Soviet Government. They had not yet abandoned the hope of bringing about peace between the Greeks and Turks and would lose no opportunity of doing so. In reply to Major Glynn he stated that while the British authorities in Constantinople are under the sole direction of His Majesty's Government, the policy pursued there by His Majesty's Government is determined in concert with the French and Italian Governments. In reply to Commander Kenworthy, he stated that no commitments existed to support Greece against the Kemalists by military or financial means.

Mr. Harmsworth informed Mr. Royce that there were now in camps in Cyprus 590 Russian refugees who left South Russia after General Denikin's defeat. The cost of maintaining these camps is £2,800 per month. There are an additional 72 refugees now maintaining themselves in Cyprus outside the camps. It is impossible to give any definite date on which the camps will be closed, but every effort is being made to bring the obligations of His Majesty's Government to an end.

June 14.—Mr. Harmsworth informed Mr. Lunn that during the recent riots at Alexandria one case of burning alive by the mob has been officially certified. The facts are as follows:—An Italian was set on fire after receiving blows and being stabbed on the chest. The Police Medical Officer of Health has made a statement that the man was still alive when he was set on fire. The Assistant Commandant of Police saw the man burning, and states that when he had extinguished the flames the man was dead. There is also some evidence, which is now being checked, which shows that the mob attempted to burn the corpse of a murdered Greek.

In the afternoon of Tuesday, June 14, Mr. Churchill made his statement on the Middle Eastern situation. (See report.) The motion before the House was that a supplementary sum not exceeding £27,197,000 be granted to His Majesty for salaries and expenses in connection with the Middle Eastern services under His Majesty's Secretary of State for the Colonies, including a grant in aid. Motions for the reduction of this amount by one million pounds were made by Lieut.-Commander Kenworthy and Mr. E. Harmsworth; but these motions were withdrawn and the vote was agreed to without a division. Among those who took part in the debate were Earl Winterton, General Sir Charles Townshend, Colonel Wedgwood, Mr. Ormsby Gore, Lord Robert Cecil, Lord Eustace Percy, Mr. E. Harmsworth, and Lieut.-Commander Kenworthy. Owing to extraordinary pressure on our space this week, we are unable to report their speeches.

June 15.—Mr. Harmsworth informed Sir John Rees that representations had been made by His Majesty's Government to the Greek Government on the subject of Greek outrages which have been found to have been committed in the Iamida area.

Mr. Chamberlain informed Colonel Wedgwood that the

Italians have withdrawn their forces from Adalia. There is no present intention of withdrawing British troops across the Bosphorus, and still less is there any intention of embarking upon military adventures in Turkey.

Colonel Stanley informed Mr. Kenyon that there are now no British troops in Persia beyond a few individual officers lent as instructors to the Persian Army and paid for by the Persian Government.

Colonel Stanley informed Sir Charles Yate that Indian Army officers in Mesopotamia drawing their Indian Army rates of pay are assessed at the Indian, not British, rates of income-tax.

Mr. Harmsworth informed Mr. Ormsby Gore that Sir Murdoch Macdonald had resigned the post of adviser to the Public Works and Irrigation Department of the Government of Egypt when the Egyptian Government found themselves unable to proceed with the White Nile scheme. This decision was due not to any technical unsoundness of the scheme, but solely to the fact that the Egyptian Government learnt recently, and without timely warning, that the cost of the dam and subsidiary works would so greatly exceed the earlier estimates as to place the execution of the project beyond their present financial resources.

June 16.—Mr. Chamberlain informed Viscount Curzon that, apart from the British Naval Mission to Greece, there are no British naval officers attached to the Greek forces either in the Black Sea or elsewhere. Three or four British military officers are sent as *liaison* officers from Constantinople to the Greek Army in Anatolia, whenever the General Officer Commanding-in-Chief at Constantinople considers such attachment desirable. At the present time the British Military Attaché from Athens is visiting the front at the invitation of the Greek Government. No British officers are serving with the Greek Army. No information has been received as to any sinking of munition ships by the Greeks at Batoum.

Mr. Churchill informed Major Glynn that the political control of the Aden Protectorate had been transferred from the Foreign Office to the Middle Eastern Department of the Colonial Office. The transfer of the administrative control of Aden has not yet taken place as certain details connected with the transfer are still under discussion between the Colonial Office and the Government of India.

Mr. Churchill informed Mr. Mosley that the estimated local revenue and expenditure of the civil administration of Palestine and Mesopotamia respectively during the current financial year is: Revenue, ££2,214,017; expenditure, ££2,286,133. To meet the estimated deficit of ££72,066, a surplus balance on revenue account, amounting to about ££75,000, was estimated to be available on March 31 last, in addition to other and larger balances which were ear-marked for capital expenditure.

Colonel Stanley informed Mr. Mosley that the cost in the current financial year of the military occupation of Mesopotamia and Palestine is: Mesopotamia £19,950,000, Palestine £4,271,000, making up the total of £24,221,000 shown in the Army Revised Estimate dated May 30, 1921.

THE EUPHRATES & TIGRIS STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the River Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The Egyptian Market.

It would be well if what the Commercial Agent in Cairo says in his annual report regarding the effect of high prices on the sale of British goods could be brought forcibly to the notice of labour in this country. He states that complaints of the prices demanded for cutlery and machinery have been made on every possible occasion, and that most frequently the cheapest price has obtained the preference over superior quality, "sometimes even in the case of Egyptian Government contracts." Thus, he points out, because the quotations were too high and the date of delivery was uncertain, we have lost large orders for railway material and rolling stock, steel work, dynamos, etc. Clearly it is for labour to say how long this loss of trade is to continue, for until wages are again at an economic level, and the policy of "ca-canny" is a thing of the past, it will be impossible for British manufacturers to compete on equal terms with their rivals in the overseas markets. It is not a question of bringing our prices down to those of our competitors. As Mr. Mulock says in the case of Egypt British goods are admitted to be the best, and what is necessary is for the quotations to be such that will enable buyers to give consideration to quality.

Burmah Oil Company's New Issue.

Subscriptions are now invited by the Burmah Oil Company for an issue of 3,000,000 £1 Cumulative Preference shares. Full details of the offer will be found in the prospectus which appears on pages 764 and 765, together with particulars of the company's extensive interests and recent profits. The company and the Government between them own practically the whole of the ordinary share capital of the Anglo-Persian Oil Company, while it controls the Assam Oil Company, and *inter alia* has a shareholding in the United British Oilfields of Trinidad and an equal interest with the Anglo-Persian Oil Company in a syndicate formed to exploit the petroleum potentialities of Hungary. The new capital is required to meet the cost of the purchase of the shares of the Assam Oil Company and the development of that company's resources, the electrification of the Yenangyoung field, the installation of up-to-date plant at the refineries, a new tank steamer and other purposes. In view of the company's position, it is obvious that the Preference shares constitute a most admirable security, and their attractive yield should ensure an overwhelming response from investors, as the offer is not one that is available every day.

Failure of Beyrout Fair.

From the account given by our correspondent, which will be found on another page, it will be seen that poor fortune has attended France's enterprise in instituting a fair at Beyrout. The business done appears to have been extremely meagre; indeed, in a previous message our correspondent stated that some French firms were so disheartened that shortly after the opening of the exhibition they packed up their goods and returned home. In an effort to make the exhibition more successful the entrance fee was abandoned, but only the amusements sections benefited by the increased number of visitors. The population generally seem to have viewed the undertaking with something akin to hostility, and to this its almost complete failure as a business proposition is to be mainly attributed. Doubtless, in view of present conditions, small hopes were based on the immediate results of the fair, and the French have presumably regarded it in the light of commercial propaganda pure and simple.

Prospects in Anatolia.

No better news is forthcoming regarding the Constantinople market. I received a letter this week the tenor of which is to the effect that no business is possible at the present time. So long as the markets of the interior and South Russia remain practically closed, there can, unfortunately, be no change for the better. The present position is summed up in the writer's statement that firms are find-

ing it all they can do to raise money for the salary list, and that some of the strongest firms would be in difficulties but for their large resources. Still, bad as the situation undoubtedly is, there is the redeeming feature that a recovery when it comes is bound to be rapid. In this connection the writer quotes a recent report to the effect that there are unparalleled opportunities in Anatolia. "The report states," he adds, "that if Anatolia were re-opened again to commerce the warehouses in the capital would be emptied in a week. We must, therefore, pray for that blessed consummation."

Egyptian Cotton Position.

The decision to restrict the area under cotton in Egypt for two more years is from many points of view to be regretted, and it is difficult to see why it should have been deemed necessary. The view that is apparently held is that the large stocks of material on hand, and the possibility that for a considerable period demand will be limited, make it certain that higher prices cannot be looked for, and it is presumably hoped by curtailing the output to give an impetus to prices which they would not otherwise receive. It would have been much better to have allowed free play to the law of supply and demand, for if the crop does not pay it is to be presumed that cultivation will automatically decrease in favour of more profitable crops. Artificial restriction is a double-edged weapon, as Egypt may learn to her cost, for it will simply supply an additional stimulus to the cultivation of the crop elsewhere, while tending to make manufacturers distrustful of Egypt as a source of supply.

Suez Canal Profits.

Despite the trade "slump" which prevailed during the latter half of 1920, the traffic through the Canal during the year showed on the whole a progressive return towards the normal, and even up to the present time it was stated at the recent general meeting that the shipping depression had not had any very serious influence, and that, indeed, there has been an appreciable increase in the tonnage going through. For 1920 the receipts amounted to 267,460,679 francs and the expenditure to 56,612,542 francs, there being thus a surplus of 168,472,665 francs, which with the balance brought forward gave an available surplus of 168,980,578 francs. Of this total allocations to the reserves amount to 143,661,971 francs, and a special reserve of 25,000,000 francs has been constituted in view of the fact that conditions are still far from normal. Thus the increased traffic receipts as compared with the 1913 figures are far from equalling the greater expenditure, and of the year's surplus the profit on exchange accounts for 101,772,711 francs. As regards the nationality of ships using the canal it is satisfactory to note that, as always, the British flag was easily first, representing over 60 per cent. of the whole shipping, a proportion which will no doubt be much greater once conditions here and throughout the world enable the free play of British industrial endeavour.

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

ROUMANIA.

BUCHAREST, June 1.

The Bucharest Fair.

An invitation has been sent by the Roumanian Government to the associations of manufacturers and merchants and also the Press, of the various European countries, to be represented at the opening of the Exhibition and Sample Fair of Roumanian Products, which is arranged to take place on August 14. The French delegation arrived this week. It is composed of twelve persons, headed by M. Fouchet, technical councillor of the French Ministry of Industry. They will visit all the industrial centres of Greater Roumania.

It is rumoured, incidentally, that the opening of this exhibition will be postponed until September 15.

Miscellaneous.

The following official prices have been temporarily fixed for metals (the figures representing lei per kilo): Gold, 24,000; silver, 900; copper, 800; lead, 600; antimony, 800.

Roubles and Austrian and Hungarian crowns are permitted to be freely exported, without any formality whatever.

According to the latest statistics, the number of cattle at present in Transylvania is 1,927,182 against 2,039,390 in 1910.

In compliance with the Treaty of Peace, Bulgaria has begun to return to Roumania the cattle which she took away during the occupation.

The amount of 123 kilos of gold and 2,400 kilos of silver, which has been extracted from the mines of Baia Mare, Transylvania, has been transported to Bucharest and deposited in the vaults of the Ministry of Finance.

The contract for the coining of visionary money to the amount of 20 million lei, has finally been awarded to a Swiss firm. The coins must be delivered by September at the latest.

BULGARIA.

SOFIA, June 11.

Unfavourable Commercial Position.

Whilst not wishing to strike a too pessimistic note, it must be confessed that to-day's commercial situation is not of the brightest. The fluctuations of the leva during the last fortnight have made all merchants, both foreign and Bulgarian, nervous again, and buyers are not willing to give orders. To explain the reasons for this we may quote a specific case. A Sofia merchant needed a large quantity of leather, which he proposed to sell during the coming winter; he considered the prices and samples of an English firm during May, and almost decided to buy. He based his calculations on the leva being 325 or thereabouts to sterling, as it has been since December. Suddenly the exchange falls, and he is faced with the prospect of having to pay 345-350 levas for each £1 worth of the goods he intends to purchase. Naturally enough, he hesitates, and thus the deal is at any rate postponed, and very likely cancelled. He is further inclined to hesitate because in March he bought goods from France when the leva was equal to approximately 20 centimes, but was given two months' credit, and now has to pay his bill when a leva equals 14 centimes. This particular transaction caused him to incur a loss of 60,000 levas. One can, of course, argue that he should not have accepted two months' credit, or should have paid up when he saw that the leva was falling, but the fact remains that while there is the tendency of the leva to drop in relation to the Allied currencies, it is almost impossible to conduct business. With Germany and the other Central Powers, conditions are different, as for close on a year 100 German marks have been equal to between 127 and 135 levas, and buyers, owing to the maintenance of a steady rate, have been covered against loss. Matters undergo such quick changes in the Balkans that all the above must only be taken as representing the

present situation, and it is to be hoped that once the Government decides on giving all possible facilities for the export of cereals and other staple products a welcome improvement in the rate of exchange will take place.

Miscellaneous.

The cost of living in Bulgaria to-day is very high, and it is only in one or two European States, such as Soviet Russia and, to a lesser extent, Poland and Austria, that conditions are worse.

The delivery of animals to Roumania as laid down by the Peace Treaty will take place on June 16. A Bulgarian Commission charged with the work of supervising the handing over of the various beasts has returned from Bucharest, and it has been decided that sheep will be handed over at Rustchuk, horses and mules at Razgrad, and oxen and cows at Varna. The decision of the Roumanian Government allowing the delivery to take place at these three towns is very gratifying to the Bulgarians.

ALBANIA.

TRIANA, June 2.

A New Company.

A company has been established at Boston, Massachusetts, with the title "The American-Albanian Trading Company," with a capital of 50,000 dollars in 10-dollar shares. The capital has been entirely subscribed by Albanians, and it is to be anticipated that it will shortly be increased. The objects of the company include the business of exporters and importers, shipping, and the development of the natural riches of the country. M. Anastas Pandeles, director of the Pan-Albanian Company Vatra of America, and Mr. George Fred Williams, former American Minister at Athens, are the directors of the new company.

CYPRUS.

NICOSIA, May 25.

Cereal Tithes.

An Order in Council directs that the tithes on all cereals (wheat, barley, oats, and vetches) are to be delivered at the Government stores not later than September 30. The British Administration, on taking over Cyprus, promptly abolished the system of taking tithe in kind, and substituted payment in money (on a valuation fixed by local Administrative Councils). But, after an experience of several years, it seemed very questionable whether the patriarchal system of levying in kind was not preferable, both for the people and the Government, and this on trial has certainly proved to be the case. Of course, this is because the old system (under which the tithes were farmed out to the highest bidders) opened the door to numberless abuses and malpractices, which British administration has rendered practically impossible. Only in a few villages perched on remote heights is tithe taken in money, in order to relieve them of transport to distant stores.

YUGOSLAVIA

ZAGREB, June 14.

Financial Discussions in Paris.

Dr. Velizar Jankovich, former Minister of Communications, Dr. Kumanudi, Minister of Finance, and Dr. Drag-Protich, have gone to Paris to discuss the question of Serbia's war indemnity. The deputation has been received by M. Briand, and Serbs are optimistic that they will obtain a better rate of interest than the very much reduced rate announced, and at the same time that they will open negotiations with cosmopolitan financiers for the discussion of a large foreign loan.

THE COTTON CRISIS.

II.—THE INDUSTRIAL VALUE OF RESIDUAL COTTONSEED FIBRES

By E. C. de Segundo, A.M.I.C.E.

In the preceding issue of THE NEAR EAST, I adverted to the comment made in the issue of the 9th inst., regarding the industrial value of the residual fibres retained by cottonseed as a factor in cotton economics generally, and as bearing, in particular, upon the very vital question of the stimulation of the cultivation of cotton within the British Empire.

I have been intimately connected for the past twelve years or more with the problems involved in the recovery of these short fibres in a merchantable condition, and with their application on a commercial scale to the manufacture of paper, explosives, artificial silk, and other cellulose derivatives, and I am glad to accept the invitation of the Editor of THE NEAR EAST to contribute some remarks upon what has been accomplished in this direction to date.

The term "residual cottonseed fibre" is applied, properly speaking, to the short fibres retained by the woolly varieties of cottonseed after ginning and after the removal of the high-grade linters: in other words, to the short fibres adhering to the shell of the cottonseed which constitute the distinguishing feature between the "woolly" and the "bald" varieties.

About 95 per cent. of the world's production of some 12 million tons of cottonseed per annum is of the woolly variety, and retains an appreciable quantity of this short residual cotton fibre. Until comparatively recently, these residual fibres have been entirely wasted, because no means existed for obtaining them in a suitable condition and without injuring the seed in the process.

The residual fibres are rooted in the shell of the seed, to which they adhere very tightly, and the difficulties in the way of recovering them are complex and recondite, because it is essential, for commercial success, that these fibres be recovered free from pieces of the seed-shell or other foreign matter, and at a low cost for power, labour, and superintendence. The first commercially successful residual fibre plant was set to work in the United States of America in 1913, entirely by British enterprise, the machinery being designed for the separation of the decorticated hulls of cottonseed into their component parts of cotton fibre and shell-bran, the latter forming a useful and readily marketable ingredient in the composition of various forms of mixed feed for cattle. Since then, several thousand tons of the hull-fibre produced by these machines have been employed by the Du Pont de Nemours Powder Company, of America, for the manufacture of explosives, and by the Vulcanised Fibre Company, of Wilmington (U.S.A.) for the manufacture of vulcanised fibre, and up to the outbreak of war in 1914, about 2,000 tons had been sold to paper-makers in England, France, and Germany.

During the war a machine was successfully worked out for the recovery of the residual fibres direct from the cottonseed itself. In the discussion upon a lecture at the Royal Society of Arts in 1919, at which a machine was shown in action defibrating cottonseed, Dr. Lawrence Balls referred to this machine as having "achieved what appeared to be the almost impossible operation of removing hairs from a cottonseed." The lint-product obtained by this machine is called "Seed-Lint," to distinguish it from that separated from the decorticated hulls, which is termed "Hull-Fibre." Messrs. Cross and Bevan, the well-known authorities on cellulose and the manufacture of artificial silk, have reported extensively upon both these lint-products. In one of their reports they state:—"We have been able to submit 28 lb. samples of 'seed-lint' to be tested for the manufacture of artificial silk, and the results are entirely satisfactory. We have ourselves tested seed-lint for the production of cellulose acetate and find it fulfils the most exacting requirements."

The conditions obtaining during the war and the economic upheaval which has followed the cessation of hostilities have militated against the development of the use of these fibres on a scale commensurate with their proved and established capabilities. So far, it is only possible to give reliable figures relating to the realisable value of hull-fibre in paper-making. Last year about two tons of hull-fibre produced by these machines in America was worked up into paper by a British papermaker, whose charge for so doing (exclusive of the cost of the hull-fibre) was 1s. per pound. This, of course, included his profit, which cannot reasonably be placed at lower than from 20 per cent. to 25 per cent., or, let us say, 2½d., leaving 9½d. per pound of finished paper as the total cost of conversion of the raw material. Even this figure must be considered high compared to what it should be when manufacturing continuously, because of the special arrangements which had to be made in the paper mill for treating so small a quantity. This paper was valued in the trade at 2s. per pound, and a few reams were in

fact sold to the trade at 2s. 1d. and at 1s. 10d. per pound. The bulk was sold to a firm of wholesale stationers at 1s. 6d. per pound. From independent sources, it has been ascertained that the yield in finished paper of this hull-fibre is at least 70 per cent. The value realised for this hull-fibre in paper thus works out at from £56 to £94 per ton.

The hull-fibre is obtained from the fibrous seed-shells separated out under the American system of manufacturing cottonseed oil and cake, whereunder the seed is split open and the kernel removed and pressed for oil, as distinguished from the British system under which the cottonseed is crushed in its entirety. The American process of decorticating the seed tends to shorten the residual fibres, and the subsequent process of separating the hulls into fibre and shell inevitably results in the admixture with the hull-fibre of a certain amount of fine dust coming from the soft inner lining of the seed-shell. When the residual fibres are removed direct from the seed the mechanical processes involved in decortication, etc., are avoided, and seed-lint is therefore normally a higher-grade product than hull-fibre.

Messrs. Cross and Bevan's analysis of successive samples of "seed-lint" show a cellulose yield of as high as 87 per cent., or within a few per cent. of that yielded by raw long cotton. "Hull-fibre" has given as high as 75 per cent. cellulose.

It is clear that all that has been established regarding the industrial value of hull-fibre applies, *a fortiori*, to seed-lint, because "seed-lint" is the same material as "hull-fibre," but is obtained under conditions which admit of greater average length of fibre and greater freedom from foreign matter being secured.

In the spring of last year a company was formed called British Cotton-Seed Products, Ltd., to acquire the world's patent rights for this cottonseed defibrating machine (excluding the rights for the United States, which were disposed of before the company was formed). The Board of this company include Mr. J. W. Pearson and Mr. N. B. Foster, chairman and managing director respectively of the British Oil and Cake Mills, Ltd., and the shares offered to the public were largely over-subscribed. At the first annual meeting of the company, held recently, the chairman stated that a factory was in course of erection which, when completed, would be capable of defibrating about 20,000 tons of woolly cottonseed per annum. He also stated that negotiations for the sale of the Indian rights to an Indian company were well advanced, and that it was expected that the Indian company would be launched before the end of this year.

It is impossible to quote a fixed figure for the cost of production of this material, because the cost of labour and power varies considerably in the different cotton-growing countries, and no doubt the realisable value of the shell-bran would vary according to whether it were marketed as such or first worked up into a mixed feed for cattle.

The realisable value of the residual fibres is by no means the only benefit accruing to the planter from defibrating the woolly varieties of cottonseed. The cottonseed, as is well known, is imported into Great Britain in very large quantities for the manufacture of cottonseed oil and cattle feeding cake. The presence of the residual fibre upon the seed lowers its market value to the seed crusher, not only because very woolly seed is troublesome to handle in the mill, but because any appreciable quantity of residual fibres reduces the percentage of oil extractable, and, moreover, lowers the food value of the oil-cake, because cotton fibre, being practically pure cellulose, is indigestible and possesses no nutritive properties. The only cottonseed crop produced within the Empire which is readily marketable at a good price for the manufacture of cottonseed oil and cake is that coming from Egypt. This variety of seed is what is termed "bald" or "black." The crop is a comparatively small one, and is much sought after not only by British but by other European cottonseed crushers. The extent to which foreign competition for Egyptian seed affected the British trade may be gathered from the fact that in 1905 94.4 per cent. of the exported Egyptian crop came to British mills, while in 1913 the proportion had sunk to 51.6 per cent., practically the whole of the remainder going to Germany.

Now, there are many woolly varieties of cottonseed, the oil content of which is just as high when defibrated and the quality of the oil just as good as that of the bald Egyptian cottonseed. Many of these varieties, however, are unsaleable in British or European markets on account of their woolliness. I am credibly informed that many thousand tons of such woolly cottonseed are burnt every year in Uganda because, on hygienic grounds, accumulations of cottonseed cannot be tolerated. No doubt the same thing happens in other cotton-growing countries.

Mr. W. H. Himbury, the general manager of the British Cotton Growing Association, has contributed an illuminating paper to the World Cotton Conference, which has just been held in Liverpool and Manchester, on "The Explora-

tion and Development of New Cotton Fields Within the British Empire." In the course of his remarks he refers to the possibilities of cotton growing in India as "enormous," and gives some very interesting details of the practical work done by his Association in the direction of encouraging the cultivation in India of the types of cotton required by Lancashire spinners.

India has a population of over 300,000,000, mostly agricultural. There are from 22,000,000 to 27,000,000 acres under cotton cultivation. Unfortunately, as Mr. Himbury points out, the quality at present grown is, for the most part, only suitable for the coarsest yarns, and is of very little use to Lancashire. He goes on to say that "the present position is that the Agricultural Departments are doing their best, but are sadly understaffed. A little time ago a Special Commission was appointed to report fully on the whole question of cotton growing in India, and we confidently look forward to the necessary reforms being carried out which should ultimately result in a considerable improvement taking place in regard to Indian cotton."

Mr. Himbury also states that "There are some provinces in which longer-stapled cotton (i.e., of 1 in. and over) thrive, viz., in canal colonies of the Punjab and Scind, the Broach district of Bombay, and the Tinnivelly district of Madras, etc., etc., which tracts represent about one-tenth of the cotton area of India."

While the record of progress in British Possessions in Africa given by Mr. Himbury is very satisfactory, and indicates great promise of considerable supplies of suitable cotton being ultimately obtainable from these sources, it would appear that it is to India we must look for any really practical relief in the relatively near future.

India produces between 1,500,000 and 2,000,000 tons of cottonseed per annum, practically all of which is of the woolly variety. The manufacture of cottonseed oil and cake is quite in its infancy in India; in fact, it has been said that so far as this industry is concerned, India is to-day where the United States was forty or fifty years ago. The cottonseed not required for planting is, to a large extent, fed direct to cattle, which—economically speaking—is an exceedingly wasteful method of turning cottonseed to account. In pre-war days considerable quantities of the more lightly fibred varieties of Indian cottonseed were exported annually to British markets, as much as 400,000 tons having been shipped to Great Britain in twelve months. The defibration of Indian cottonseed would result not only in the production of a raw material for the manufacture of high-grade white paper (the greater part of which is now imported by India), but also in increasing the market value of the cottonseed exported for the purposes of the manufacture of oil and cake.

It is not possible to make any accurate estimates of the increased revenue to be derived from the defibration of woolly cottonseed in the country of origin. Such figures can only be arrived at by a careful study of the conditions obtaining in each case. Enough has, however, been said clearly to indicate that the position of the planter can scarcely fail to be improved—and, in some cases, greatly improved—by defibrating the cottonseed before shipment and thereby rendering the seed marketable at a price, in some cases, comparing favourably with that commanded by Egyptian bald cottonseed.

NEW ROUMANIAN EXPORT TAXES.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, June 1.

The following export commission taxes have officially been fixed, and came into force on May 17 (the figures representing lei per wagon of 10,000 kgs.): Rye, 1,000; maize, 300; cornmeal, 300; haricot beans, 360; barley, 420; malt, 420; decorticated rice, 500; oats, 300; millet seed, 300; decorticated millet, 200; bran, 160; old peas, 600; yellow mustard seed, 600; rapeseed, 1,000; ravison, 500; clover seed, 3,000; lucerne seed, 3,000; pumpkin seed, 1,500; linseed, 3,000; oilcakes, 30; sunflower seed, 1,500; wheat-flour (first quality), 2,000; wholemeal, 3,000; rye flour, 1,000; light benzine, 1,000; heavy benzine, 800; light oils, 500; heavy oils, 1,000.

Egypt has recently placed an order for manufactured lumber in British Columbia.

A number of hydro-electric surveys have been undertaken by the Assam Government.

Owing to slackness in the demand for hides and skins large stocks are accumulating at Baghdad.

Mr. W. O. Grazebrook, a partner in the firm of Ogilvy Gillanders and Co., East India merchants, has been elected to a seat on the board of the P. and O. Banking Corporation.

The Postmaster-General announces that the air mail for Morocco now leaves Toulouse at 10.30 a.m. on Tuesdays, Wednesdays, Fridays, and Sundays. The latest time of posting at the G.P.O., London, is 6.30 a.m. and 6 a.m. for printed papers, on Mondays, Tuesdays, Thursdays, and Saturdays.

THE BEYROUT FAIR.

(FROM OUR OWN CORRESPONDENT.)

BEYROUT, May 31.

The Beyrout Fair, which closed yesterday, has been a disappointment from the point of view of immediate results; the amount of orders booked is said to be insignificant. Business at the end slackened so much that the exhibitors clamoured for the suppression of the entrance fee, and this was done, but the visitors, who then came in increased numbers, were mostly attracted to the lottery and games stands. I visited Allenby Street on the day before the fair ended, and was struck with the number of additional stands. I visited one stand where there was a large display of ornamental objects, from small enamelled powder boxes and luminous night watches with exquisite tortoiseshell frames to artificial beads and finished metalware, all the work of one French factory. The representative of the firm, a Frenchman, asked if he had done good business, made an expressive gesture and said: "Fairs and exhibitions have never been a success in themselves."

That the immediate results have been disappointing is clearly shown by the declarations of the manager of the fair in the course of an interview granted to a Press representative. Asked his opinion of the fair and the economic advantages that are expected to result for the trade of the country, he replied: "I do not think I can give you sufficient information on the amount of business done. I know neither the importance of the orders booked, nor the number of bargains concluded. As regards the economic consequences, there is no doubt that the diffusion of goods and of new samples exhibited, the perfected commercial processes that the fair has placed in evidence, will contribute in a large measure to impart a powerful stimulus to the trade of the country, and will facilitate and increase transactions." He stated that the proceeds of the fair had been comparatively satisfactory, but added that he could not make out the extraordinary apathy of the population towards this interesting event, since if the inhabitants of Beyrout, and of Syria in general, really understood what was in their interests they would have flocked in great numbers to the fair. "We have inaugurated this fair to promote the interests and to work for the good of the country, and I repeat, I fail to understand the motives which led some to assume such an attitude of indifference."

ENGINEERING.

(BY OUR ENGINEERING REPRESENTATIVE.)

Refuse Disposal.

Since the days when the question whether refuse destructors could be run economically in conjunction with electric power supply stations excited such discussion, and brought about such differences of opinion in engineering circles, the problem of refuse disposal has always been one of more than usual interest. Recently a number of tests have been made by Mr. J. A. Priestley, the Cleansing Superintendent of Sheffield, as to the best way to deal with such material, and as a result of this work the Corporation put down, a few years ago, a plant large enough to deal with waste matter on a commercial scale. This was strikingly successful in operation, and the work is now being extended considerably.

Under the new system expensive refuse destructors and unsightly dumps are done away with, and the refuse is converted into fertilisers, with valuable by-products for heating, lighting, etc. So far the plant only deals with 40 tons of refuse per day—about one-tenth of the total—but when the extensions referred to are completed over 500 tons of house refuse daily will be handled.

Under the new process the refuse is carefully screened, the whole of the dry material being passed through a series of sieves which separate it into dust, fine cinder, and coarse cinder, leaving an unscreenable residue of rags, vegetable waste, old tins, paper, and other refuse. This residue is sorted, and a fairly large proportion can be put to immediate use, the waste paper, for example, being sent direct to the pulping mills, and the old tins to the briquetting presses in which they are made ready for feeding into the steel furnaces. Rags are sent through a washing machine where they are treated with a strong and antiseptic soap extract, from which they pass to a rinsing machine and a centrifugal drier. It may be mentioned here that the sorting is done in a most methodical way. The "tailings" from the screens fall on to a wide endless belt travelling at a slow speed. The pickers and sorters sit on either side of this and collect the waste as it passes into bins and bags. The vegetable matter only amounts to just over 3 per cent. of the whole refuse, and this is dried and fed into furnaces or used for manure, as the case may be.

It is said that the dust possesses valuable fertilising properties, and that chemical analysis shows it to be equal, if not superior, in nitrogen content to most other chemical manures. Farmers and market gardeners buy it in large quantities, and as it becomes more known the sale is certain to increase. At the moment, the screens turn out more dust than the agricultural industry in the district can absorb, and as a consequence a good deal of it is having to be tipped.

The coarser screenings, a large percentage of which are said to be partially burned coal cinders, is passed through a washing machine by which the lighter portions are washed out of the clinker, pot refuse, stones, shale, and hard core. The larger pieces are sold as fuel to the Corporation electrical undertaking, and it is said that in the aggregate this material has a heating value of about 0.75 per cent. of that of steam coal. The finer particles of cinder, etc., after being washed out of the hard surface, are used for making briquettes, and the rubble, stone, shale, pot, etc., remaining is of considerable value in road making and concrete making. The briquettes referred to are made by adding 8.5 per cent. of pitch and 0.5 per cent. of tar to 91 per cent. of the cinder, and a report shows that the calorific value is no less than 12,730 British thermal units, or equal to that of briquettes made with the ordinary quality of coal dust. At present the Corporation is using practically the whole of the briquettes made in steam-raising at the public baths, and it is of interest to note that at the moment the price of the briquettes, at the Corporation works, is about 30s. per ton.

Large Harbour Contract.

I understand that the large contract for the improvement of the harbour facilities at Lagos has gone to Sir W. G. Armstrong, Whitworth, and Co., on the recommendation of the Crown Agents for the Colonies. The work will be carried out for the Nigerian Government, and will chiefly consist of deepening existing channels so as to give deep-water berthage for ocean-going steamers, and generally improving the dock facilities. Amongst other work a concrete quay wall over 600 yards in length will have to be built, and at least five transit sheds of large size will have to be erected. In addition, a large area of the foreshore will have to be reclaimed, and an immense amount of dredging work carried out. This dredging will be carried out at first to a depth of 26 ft. below low-water level, so as to allow of immediate use of the new wharves, etc., but at the earliest possible moment after completion further dredging to a total depth of 30 ft. below low-water mark will be carried out.

New Cables.

During the past twenty years a number of patented systems of electric light and power wiring and of new forms of insulated conductors have been introduced by our leading firms of electrical manufacturers. The introduction of steel conduit as a protection for electric wires had an adverse effect on the multitude of lead and other sheathed wires that were being introduced, but even to-day a number of them are being used with every success. The new "Go-Clad" system of electric wiring introduced by Messrs. W. T. Glover and Co., Limited, of Trafford Park, needs no additional protection, as a continuous and jointless sheathing of lead alloy is drawn over the insulated conductor, this sheath being screwed at all joints and terminals, in which respect it differs from the majority of special lead-covered systems. It is said that this alloy constitutes a sheath which, although harder, and as such a superior protection to the cables than the lead usually used, is sufficiently ductile to allow the cables and wires to be bent in any required manner, whilst fewer sustaining cleats, etc., are required by reason of its greater rigidity. Ordinary standard switches and other fittings can be used with the system.

INDIAN AND GENERAL INVESTMENT.

The report of the Indian and General Investment Trust for the year to April 30, 1921, states that the directors think it prudent to revert to their former practice and take securities into the balance-sheet at cost price (less what has been from time to time written off them) and rate of exchange at 1s. 4d., which is approximately both the present rate of the rupee and the average cost of funds in the East. This will involve, on a valuation based on prices ruling April 30, the disappearance of reserve account and a deficiency on capital account, though, as the directors anticipate, only temporarily, since the shrinkage of values is not due to any change in the character of securities, but mainly to the Money market considerations. Tea, jute and rubber are perhaps exceptions, but the Trust's holdings in these industries are almost altogether in debentures and good cumulative preference shares, on which any ultimate loss is very unlikely. Gross interest and dividends on investments amount to £37,349 and income-tax deducted or payable direct to £10,685. Provision is also made for corporation tax payable, estimated at £502. Balance on revenue account, after transferring £3,345 to reserve, is £12,485, plus £1,715 brought forward, making £14,200. The directors recommend a dividend on £100,600 deferred stock at 12 per cent. per annum (making 10 per cent.), less tax at 5s. 10d., carrying forward £1,733. Meeting, Winchester House, E.C., June 28, 2 p.m.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

Egypt.

Single Cotton Bed Sheets.—The Egyptian War Department invites tenders for the supply of 500 sheets (bed, cotton, single). Particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, Westminster, S.W.1. June 30.

Clothing, etc.—The Ministry of the Interior, Egypt (Lunacy Division) invites tenders for the supply of clothing and household requisites to the Abbasiya and Khanka Asylums. Tenders, on the proper form and accompanied by a provisional deposit of 2 per cent., are to be submitted to the Lunacy Division, Abbasiya. July 11 (D.O.T.).

Calcium Carbide.—The Egyptian Postal Administration at Alexandria invites tenders for the supply of 15,000 kilogrammes of calcium carbide for acetylene gas light plants. Quotations should comprise free storage at the sole risk of the contractor and free delivery (by periodical partial supplies during the year) at 62 railways or river stations specified.—(D.O.T.), July 15.

Beans, etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 150 kilos beans, 150 kilos barley, and 4,000 kilos tinn, required for four months commencing August, 1921. July 16.

Silk.—The Central Stationery Stores, Cairo, invites tenders for the supply of silk for the Hejaz. July 23.

Yugoslavia.

Electric Meters.—The Municipal Authorities, Belgrade, invite tenders for the supply of 2,500 parts of different electric meters. Tenders must bear the inscription, "Offres des Compteurs," and be addressed to Direction Municipale des Tramways et de l'Eclairage Electrique. June 22.

India.

Picks, Shovels, etc.—Madras and Southern Mahratta Railway Co. invites tenders for the supply of (1) 9,560 picks, shovels, etc.; (2) 17,530 files; and (3) 16 boilers for locomotives. July 5.

Pipe-lines.—The Bombay Corporation invites tenders for the construction of about 105 miles of steel and reinforced concrete pipe-lines, 72 in. to 57 in. in diameter. July 26.

A Copy of this Prospectus has been filed with the Registrar of Joint Stock Companies.

The SUBSCRIPTION LIST will OPEN on MONDAY, 20th JUNE, 1921, and will CLOSE on or before FRIDAY, 24th JUNE, 1921.

THE BURMAH OIL COMPANY, LTD

(Incorporated under the Companies Acts, 1862 to 1900.)

Authorised Share Capital - - - - £10,000,000.

Authorised.	CAPITAL.	Issued or included in the present issue.
£250,000 in 6 per Cent. Cumulative Preference Shares of £1 each	...	£250,000
750,000 in 6 per Cent. Cumulative Second Preference Shares of £10 each	...	750,000
3,000,000 in 8 per Cent. Cumulative Preference Shares of £1 each	...	3,000,000
6,000,000 in Ordinary Shares of £1 each	...	5,150,804
£10,000,000		£9,150,804

The Company has no Debentures or Debenture Stock outstanding.

ISSUE OF 3,000,000 Eight per Cent. Cumulative Preference Shares of £1 each AT PAR

PAYABLE AS FOLLOWS:

2s. 6d. per Share	- - -	on application.
2s. 6d. per Share	- - -	on allotment.
7s. 6d. per Share	- - -	on 29th July, 1921.
7s. 6d. per Share	- - -	on 29th August, 1921.

Applicants who pay up in full on allotment will receive interest at the rate of six per cent. per annum on such prepayments calculated from the date of allotment to the dates when the respective instalments are payable.

The Eight per Cent. Cumulative Preference Shares entitle the Holders to a Fixed Cumulative Preference Dividend at the rate of 8 per cent. per annum, and such Dividend will be paid half-yearly on 30th April and 31st October in each year in respect of the Company's financial year terminating on the preceding 31st December. A full half-year's dividend will be paid on 30th April, 1922, in respect of the period up to 31st December, 1921. These shares rank, both as regards Dividend and Capital, immediately after the Preference Shares and Second Preference Shares and in priority to the Ordinary Shares.

On a winding up the Eight per Cent. Cumulative Preference Shares entitle the holders to have all the assets of the Company remaining after paying the sums due to the holders of the Preference Shares and Second Preference Shares, including a premium of 10 per cent. on the amounts paid up on the Second Preference Shares, together with all arrears of dividend on both classes of shares, applied in repaying the Capital paid up on the Eight per Cent. Cumulative Preference Shares, together with a premium of 15 per cent. on the amounts paid up thereon, or a premium equal to the average premium above par (as certified by the Secretary of the Stock Exchange, Glasgow), at which the Eight per Cent. Cumulative Preference Shares have been dealt in on the market during the six calendar months preceding liquidation, whichever may be the higher, and, in addition, to all arrears or deficiency of Dividend down to the date of the commencement of the winding up.

The total amount of the Eight per Cent. Cumulative Preference Shares to be issued can not exceed £5,000,000, unless with the consent of the holders of the present issue of 3,000,000 shares and of the holders of any additional shares which may be created and issued of the further 2,000,000 Eight per Cent. Cumulative Preference Shares which the Company has reserved right to create and issue.

On a show of hands every member present in person has one vote, and at a poll every member present in person or by proxy has one vote for every share, whether Ordinary or Preference, held by him, except in the case of the Second Preference Shares in respect of which the holders thereof are entitled to ten votes for every such share held by them. The holders of the Eight per Cent. Cumulative Preference Shares have no right to attend or vote, either in person or by proxy, at any General Meeting of the Company or to receive Notice of such Meeting unless where the Meeting is convened for the passing of Resolutions affecting the rights of such Preference Shareholders or when their Preference Dividends for any year ending 31st December are not wholly paid within six months of the expiry of such year.

Subject to the rights of the Preference Shares and the Second Preference Shares and of the Eight per Cent. Cumulative Preference Shares the Ordinary Shareholders are entitled to all the profits and assets of the Company.

Applications from existing Shareholders of the Company made on the special coloured forms provided for such applications will be given special consideration.

Applications will be made in due course to the Committees of the Stock Exchanges, London and Glasgow, for permission to deal in the 8 per Cent. Cumulative Preference Shares now offered.

PROSPECTUS.

The Company was registered on 15th May, 1902, for the purpose of, *inter alia*, acquiring and taking over as a going concern the undertaking and all or any of the assets and liabilities of its predecessor registered under the same name in 1886, which had been working concessions of Petroleum bearing lands in Burma, and carrying on business as producers and refiners of Crude Petroleum and exporters of and dealers in Petroleum products.

The Company holds some 55 square miles on Mining Lease and some 150 square miles on Prospecting Licence from the Government of India, and in addition has perpetual drilling rights over some 500 acres of Fee Simple Land in Assam belonging to The Budderpore Oil Co., Ltd. The Company also controls the Assam Oil Co., Ltd., which holds considerable areas in Assam on Mining Lease and Prospecting Licence from the Government of India.

A 10-inch Pipe Line of some 300 miles, with four pumping stations, connects the Company's main producing Fields in Burma with its extensive Refineries at Rangoon, where the whole range of Petroleum products is manufactured.

The Company owns Tank Steamers of an aggregate of 23,710 tons deadweight, and has contracted with R. and W. Hawthorn, Leslie & Company, Limited, Newcastle-upon-Tyne, for a further Tanker of 10,000 tons deadweight for delivery early next year. The estimated price of this Tank Steamer is £450,000 or thereby. The Company has already paid instalments on account of the price. The ultimate amount of the price under the Contract for this steamer depends upon the cost of labour and material.

At the Ports of Rangoon, Chittagong, Calcutta, Coconada, Madras, Cochin, Marmagao, Bombay, and Karachi the Company possesses large modern installations for the receipt in bulk of its Liquid Products, which are there packed and despatched for distribution through the Company's extensive selling organisation throughout Burma and India.

In Burma and India the Company finds a ready market for its entire production of Kerosene and Jute Batching Oils, and for the great bulk of its make of Lubricants and Greases. These local markets are rapidly overtaking

the Company's production of Petroleum Spirits, but meantime the surplus is being exported to Europe.

Bulk storage of Petroleum Spirits at the four main Indian ports is provided for by the Tank Storage Co. (India), Ltd. The capital of that Company is held equally by the Company and the Asiatic Petroleum Co. (India), Ltd.

Since the incorporation of the Company in 1902 its Crude Petroleum producing and refining operations have been quadrupled, and there has been continuous improvement in the refining processes, in the direction of improving the quality of the finished products, in reducing the cost of production by economies in fuel consumption, and in other directions.

From the Twingone and Beme Reserves of the Yenangyoung Oilfield, embracing an area of only about half a square mile, the Company has hitherto drawn a great part of the Crude Oil required to serve its Refineries; and although there is keen competitive drilling in these Reserves, the Company holds such a commanding position that it confidently anticipates securing considerable quantities of Oil therefrom for many years to come. So assured is the Company of this, and of the possibilities of economies in production in such a concentrated area, that it is at present engaged in the Electrification of the Field at a cost in the neighbourhood of £1,000,000. The Company will be in a position to supply other Companies with electric power and light, and Contracts for such supply have been already entered into with two Companies operating in the Yenangyoung Field. The remainder of the Company's holdings is well protected against competitive drilling, and of these the already proved and producing areas in Burma alone are so extensive as, in the Directors' opinion, to inspire confidence that ample and steady supplies of Crude Petroleum will be available to maintain its refining and marketing operations at their past maximum level for many years to come.

In addition, the Company has during the past few years developed a new, if meantime small, Field on the Budderpore Oil Co., Ltd.'s lands in Assam referred to above. Further, the possibilities of increasing the production of the Assam Oil Co., Ltd., in the same province are considered by the Company's geologists to be favourable.

The Company formed the Anglo-Persian Oil Co., Ltd., and held practically all that Company's Ordinary Share Capital until His Majesty's Government acquired a controlling interest in 1914. His Majesty's Government and the Company now own practically the whole Ordinary Share Capital of that Company.

Most of the Shares in the Assam Oil Co., Ltd., by which the Company recently acquired the controlling Shareholding in that Company, were purchased for cash, but in respect of part of the Shares acquired the consideration was the allotment to the sellers of one Ordinary Share of the Company credited as fully paid for every four and one-half Shares of the Assam Oil Co., Ltd., entailing a total allotment of 7,692 Ordinary Shares of the Company. Of these 7,304 Shares have been now actually allotted.

The Company is also interested in Petroleum in Trinidad through its Shareholding in the United British Oilfields of Trinidad, Ltd., and it has recently acquired an equal interest with the Anglo-Persian Oil Co., Ltd., in a syndicate formed to exploit the Petroleum potentialities of Hungary.

In conjunction with the Tata Iron and Steel Co., Ltd., the Company promoted the Tinplate Co., of India, Ltd., for the manufacture of tinplates in India, of which the Company is a large consumer. Works and Plant are in course of erection at Jamshedpur, Bengal.

The Refineries, Oil Fields, Pipe Line, Tankers, and Tank Installations have been drastically written down in previous years, so that the book figures do not represent anything like real values. The Refining, Transport, Distribution, and Marketing Assets stood in the books at 31st December, 1919, at only £1,044,395, whereas it is estimated these would to-day cost three to four times that amount.

The Company holds 2,374,660 Ordinary Shares of £1 each of the Anglo-Persian Oil Co., Ltd., of which 1,899,728 Shares are fully paid and 474,932 Shares are 1s. paid. The fully paid Shares stand in the Company's books at 11s. 3d. per Share. The present value of these Shares is very considerable, and the already proved great resources of the Anglo-Persian Oil Co., Ltd., and the rapid and enormous development of that Company's operations are sufficient to suggest a greatly increased potential value in these Shares.

On 30th July, 1920, 2,286,000 Ordinary Shares of £1 each of the Company were issued, credited as fully paid, to the holders of the Ordinary Shares of the Company upon the capitalisation of £2,286,000 standing at the credit of General Reserve.

The Book Values of the Company's Assets at 31st December, 1919, less depreciation and after deducting liabilities, amounted to £9,468,827, which by the addition of the estimated net proceeds of the present issue will be increased to over £12,300,000. For the reasons above stated the actual value of the Assets is estimated to be several times in excess of this amount. The Preference Shares now being issued are therefore very fully secured.

The net profits of the Company after providing for Income-tax and making liberal provision for depreciation, but not allowing for Excess Profits Duty (to which the Company is not liable after 31st December, 1920), as shown by the audited accounts, were for the last four years as follows:—

Year to 31st December, 1916	£1,276,584
Year to 31st December, 1917	£2,305,129
Year to 31st December, 1918	£2,814,057
Year to 31st December, 1919	£4,155,937

and, from the cabled figures, the profits for the year ended 31st December, 1920, will, it is estimated, approximately amount to £3,750,000 after writing off £1,150,000 for depreciation and Oil Fields expenditure as compared with £498,856 written off in 1919.

Taking, however, only the profits for the four years ended 31st December, 1919, the average thereof amounts to £2,637,926, which sum would be sufficient, after paying the Dividends on the issued 6 per Cent. Preference and Second Preference Share Capital of £1,000,000 and meeting the Corporation Profits Tax, to cover the Dividend on the £3,000,000 Eight per Cent. Cumulative Preference Shares now being issued more than ten times over.

The Capital to be raised by the present issue is required to refund the cost of the Shares of the Assam Oil Co., Ltd., purchased for cash; to provide the Company's proportion of the capital likely to be required to adequately develop the resources of that Company; to provide the balance of the Company's share of the Capital of The Tinplate Company of India, Ltd.; to pay the balance of the price of the new Tank Steamer above referred to; to meet the balance of the cost of the Electrification of the Yenangyoung Field; to provide for the installation on a large scale of up-to-date plant at the Refineries; to meet the cost of additions and improvements the provision of which had to be held over to a large extent owing to the War, and from which the Directors anticipate substantial economies, increased output, and other advantages; and generally for the purposes of the Company.

The whole of the present issue of Eight per Cent. Cumulative Preference Shares has been underwritten under an Agreement dated 2nd June, 1921, made between the Company of the one part and S. M. Penney and Macgeorge, of Glasgow, and Robert Fleming and Co., of London, of the other part, for commissions aggregating 2½ per cent. on the nominal amount of the Shares now offered. The Directors have agreed to sub-underwrite 115,000 Shares for a commission of 2 per cent.

The only Contracts which may come within the purview of Section 81 of The Companies (Consolidation) Act, 1908, entered into by the Company during the period of two years immediately preceding the date of this Prospectus, apart from Contracts made in the ordinary course of the business of the Company, are:—

1. Agreement between the Company and Robert Millar Edington, dated 30th July, 1920;
2. Agreement between the Company and The Tata Iron and Steel Co., Ltd., dated 12th February, 1920;
3. Two Agreements between the Company and The British Burmah Petroleum Co., Ltd., both dated 2nd and 8th December, 1920.
4. Agreement between the Company and The Indo-Burmah Petroleum Co., Ltd., dated 20th January, 1921;

5. Agreement between the Company and Robert Millar Edington, dated 1st June, 1921; and

6. The said Agreement between the Company and the said S. M. Penney and Macgeorge and Robert Fleming and Co.

Copies of the Contracts above mentioned, of the Company's Memorandum and Articles of Association, and of the Special Resolutions creating or affecting the Eight per Cent. Cumulative Preference Shares now offered and defining the rights attached thereto may be seen at the Offices of the Company in Glasgow and London at any time during business hours while the list remains open.

Applications for the Eight per Cent. Cumulative Preference Shares now offered should be made upon the Form accompanying the Prospectus, and should be sent to either of the Company's Bankers at any of their Head or Branch Offices, together with a remittance for the amount of the Deposit.

Where no allotment is made the Deposit will be returned in full, and where the number of Shares allotted is less than that applied for the balance of the Deposit will be applied towards the amount payable on allotment, and any surplus will be repaid to applicants.

A Brokerage of 1½d. per Share will be paid on allotments made in respect of applications (including applications from existing Shareholders) bearing the Stamp of Bankers, Brokers, or other recognised agents.

Prospectuses and Forms of Application may be obtained at the offices of the Company in Glasgow and London, from the Bankers and their respective Branches, and from Messrs. S. M. Penney and Macgeorge, 24, George Square, Glasgow, and Messrs. Robert Fleming and Co., 8, Crosby Square, London, E.C.3.

Dated 16th June, 1921.

DIRECTORS.

No.....

THE BURMAH OIL COMPANY, LTD.

(Incorporated under the Companies Acts, 1862 to 1900.)

Issue of 3,000,000 Eight per cent. Cumulative Preference Shares of £1 each.

FORM OF APPLICATION.

To the Directors of the BURMAH OIL COMPANY, LIMITED,
175, West George Street, Glasgow.

Gentlemen,—Having paid to your Bankers the sum of £....., being a deposit of 2s. 6d. per share on Eight per cent. Cumulative Preference Shares of £1 each in The Burmah Oil Company, Limited, I/we request you to allot to me/us that number of shares at par, and I/we hereby agree to accept the same, or any less number that you may allot to me/us, upon the terms of the Prospectus dated 16th June, 1921, and subject to the provisions of the Memorandum and Articles of Association of the Company, and I/we authorise you to place my/our name(s) on the Register of Members of the Company in respect of the shares that may be so allotted to me/us.

USUAL SIGNATURE

(Companies can but firms cannot be accepted.)

NAME IN FULL

ADDRESS IN FULL

DESCRIPTION

PLEASE WRITE IN BLOCK CAPITALS.

Date, June, 1921.

An acknowledgment will be forwarded in due course either by Allotment Letter or return of the Deposit.

This form must be filled up and sent entire to The Bank of Scotland, Edinburgh, Glasgow, and London, or The National Provincial and Union Bank of England, Limited, London, or any of their respective Branches, with a cheque payable to Bearer for the amount of the Deposit. Cheques must be crossed, and any alteration from "Order" to "Bearer" must be initialled by the Drawer.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

(FROM OUR OWN CORRESPONDENT.)

Dried Fruit.—Business has shown a distinct improvement during the past week. Currants have been in good request at steady rates. Sultanias continue in strong demand at advancing rates. Persian dates have also been a firm spot and prices are higher.

Sugar.—Home refined has been in good demand at the official prices. West Indian crystallised is 3s. lower at 45s. 6d. to 52s. 6d., and American granulated at 58s. 6d. is 1s. 3d. lower. Czecho-Slovakian at 30s. 6d. has shed 1s. and white Java at 20s. 9d. is 1s. 3d. lower.

Oilseeds.—A steady tone has characterised the market this week. Indian linseed is eighteenpence up at 21s. 6d., and La Plata at 19s. 6d. has gained 5d. Rapeseed is higher, with Toria 1s. 5d. up at 21s. 5d.; bold Ferozepore at 19s. and brown Cawnpore at 18s. 6d. are unchanged. Cottonseed is higher, with Egyptian black at 11s. 9d., an increase of 6d.

Oils.—A slight increase in prices has taken place this week. Linseed oil is 11d. up at 35s. 5d. Rape oil is unaltered, with crude at 54s. and refined at 62s. Refined cotton oil at 44s. and deodorised at 50s. have both risen 2s., and Egyptian crude at 36s. has gained 6d. Turpentine is 7s. up, to 81s.

BULGARIA'S CROPS DAMAGED BY STORMS.

(FROM OUR OWN CORRESPONDENT.)

SOFIA, June 11.

The very heavy hailstorms which fell in different parts of the country a week ago caused great damage to the crops, particularly at Sliven and Gorna Orehovitzh.

OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended May 27:—Since our last circular of April 29 the sales of opium in our market amount to 48 cases of 169 lb., in all, 3,112 lb., and the piastre price paid is about 15 per cent. over and above what was paid during April—viz., Ps. 700 to 790 per lb. as to quality. Besides this, the sterling exchange having dropped further—namely, to Ps. 500-510 per £ sterling—the shilling value of the drug is now 10s. to 11s. 6d. per lb., as compared to 8s. and 9s. 6d. thirty to forty days ago. There is also another factor to be taken into consideration, and this is, no arrivals of any importance come down now from the growing districts, for during the past six weeks only 13 baskets of 169 lb. have come down. The reason is that bankers, owing to the monetary crisis, will not advance any money on the article. The present prices, too, although they have advanced a little lately, are still about Ps. 400 below what the article actually cost the native holder a year or two ago. The exchange to-day is Ps. 510 per £ sterling for cheque and 0.78 dol. for one Turkish pound of Ps. 100. The arrivals are 1,330 cases, against 1,665 at same date last year, and our stock is now about 1,129 cases.

Good crops are anticipated from Roumania this year.

The Tunisian Government have appointed the Credit Foncier d'Algerie et de Tunisie as their commercial representatives in Great Britain.

FOREIGN EXCHANGES.

Country.	Method of Quoting.	Parity of Exchange.	Latest Quotations
Alexandria	Piastres to £	97½	97½

CURRENT PRICES.

General Produce.—Bacon, 131s. cwt.; butter, 182s. cwt.; cheese, 127s. cwt.; chillies, 120s. cwt.; eggs, 17s. 9d. per 120; cloves (Zanzibar), 9d. lb.; cocoa (Ceylon, good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 120s. cwt.; coffee (East Indian, bold), 118s. cwt.; coffee (Mocha, longberry), 94s. 6d. cwt.; coffee (Santos, superior), 56s. 3d. cwt.; coffee (Nairobi), 97s. 6d. cwt.; lard, 75s. 9d. cwt.; hams, 139s. cwt.; ginger (washed Cochinchina), 37s. 6d. cwt.; nutmegs (110s. to 80s.), 10½d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok white), 9d. lb.; raisins (Valencia), 105s. cwt.; raisins (Sultana, Smyrna), 140s. cwt.; currants, 71s. cwt.; sugar (granulated), 60s. 7½d. cwt.; sugar (No 1 cubes), 63s. 9d. cwt.; sugar (white Mauritius), 55s. 6d. cwt.; sugar (West Indian crystallized), 50s. 6d. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 16s. 3d. cwt.; rice (Rangoon No. 2), 16s. 9d. cwt.; rice (bran, Rangoon), £6 7s. 6d. ton; cinnamon (firsts), 1s. 4½d. lb.; mace (fair Singapore), 1s. 2½d. lb.; tea (Indian, common to good common), 6d. lb.; tea (Ceylon, common to good common), 6½d. lb.; tea (Java, common to good common), 3½d. lb.; wheat (Australian), 83s. 3d. qr.; wheat (English, white), 95s. 6d. qr.; wheat (La Plata), 47s. 3d. qr.; barley (malting), 67s. 6d. qr.; oats (English), 44s. 6d. qr.; oats (La Plata), 29s. 9d. qr.; maize (La Plata), 47s. 3d. qr.; flour, 68s. 9d. sack.

Chemicals.—Acids; Boric, 71s. cwt.; oxalic, 10½d. lb.; citric, 2s. 5½d. lb.; tartaric, 1s. 7½d. lb.; ammonia (sulphate), £17 5s. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £19 ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 138s. cwt.; Potassium, Bi-chromate, 9½d. lb.; chlorate, 5½d. lb.; caustic, £45 ton; nitrate, £54 ton; permanganate, 1s. 9d. lb.; prussiate yellow, 1s. 2½d. lb.; sulphate (90 per cent.), £21 ton; Sodium. Crystals. 145s. ton; bi-carbonate, £10 5s. ton; bi-chromate, 6½d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 10s. ton; hyposulphite, £23 ton; prussiate, 7½d. lb.; nitrate, £18 11s. 3d. ton; sulphate of copper, £32 ton; sulphate of iron, 150s. ton; glycerine (crude 80 per cent.), £105 ton; glycerine (industrial 1260 per cent.), £155 ton; lemon oil, 3s. 1½d. lb.; quinine, 3s. 8½d. oz.; red lead, £38 10s. ton; white dry lead, £42 12s. 6d. ton; white ground lead, £51 15s. ton.

Metals.—Aluminium, £150 ton; antimony (English Regulis), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £73 2s. 6d. ton; copper (electro), £78 ton; gold bars, 109s. oz.; iron (No. 3 Cleveland), 130s. ton; hematite (mixed number), 160s. ton; galvanized sheets (24 G), £22 ton; lead (soft foreign), £22 16s. 3d. ton; manganese Poti, 1s. 3½d. unit; molybdenite, 48s. 9d. unit; nickel, £185 ton; platinum, 365s. oz.; plumbago, £20 ton; quicksilver, £10 17s. 6d. bottle; silver bars, 35d. oz.; spelter (G.O.B.), £26 10s. ton; tin (standard), £167 5s. ton; tin plates (20 by 14), 25s. 3d. box; wolfram, 12s. 3d. unit.

Hides and Skins.—Ox and Heifer (first), 90 lbs. and up, 8½d. lb.; 80 to 89 lbs., 8½d. lb.; 79 lbs., 8½d. lb.; 60 to 69 lbs., 7½d. lb.; 59 lbs. and under, 6d. lb.; (second), 90 lbs. and up, 7d. lb.; 80 to 89 lbs., 6½d. lb.; 70 to 79 lbs., 6½d. lb.; 60 to 69 lbs., 6½d. lb.; 59 lbs. and under, 4½d. lb.; Cows (first), 60 lbs. and up, 6½d. lb.; 59 lbs. and under, 7½d. lb.; (second), 60 lbs. and up, 5d. lb.; 59 lbs. and under, 4½d. lb.; Bulls (first), 4d. lb.; (second), 3d. lb.; casualty hides, 3½d. lb.; Kips (first), 5d. lb.; (second), 4d. lb.; (third), 3d. lb.

Miscellaneous.—Cotton (American), 8.40d. lb.; cotton (Egyptian), £11 5s. ton; linseed (La Plata), £18 7s. 6d. ton; rape (Toria), £19 17s. 6d. ton; soya beans, £12 7s. 6d. ton; palm kernels, £19 7s. 6d. ton. Oils: linseed, £34 10s. ton; soya, £35 10s. ton; cotton (crude), £35 15s. ton; olive (Levant), £82 10s. ton; ground nut, £40 5s. ton; palm, £33 5s. ton; rape (crude), £54 10s. ton; cocoanut (Ceylon), £46 15s. ton; petroleum, 2s. 1½d. gallon; turpentine (American), 78s. cwt.; Shellac (TN second orange), 390s. cwt.; shellac (AC garnet), 300s. cwt.; rosin (American), 20s. cwt.; copra (Ceylon), £30 15s. ton; copra (Straits F.M.S.), £29 7s. 6d. ton; tallow (Australian mutton), 33s. 9d. cwt.; tallow (Australian beef), 33s. cwt.; Rubber: Plantation (No. 1 crepe), 8½d. lb.; smoked sheet, 7½d. lb.; fine hard Para, 11d. lb.

NOTICE IS HEREBY GIVEN that the Twentieth Ordinary General Meeting of the Members of THE NEW EGYPTIAN CO., LTD., will be held on Tuesday, the 5th day of July, 1921, at 11 a.m., at the Head Office of the Company, 4, Rue Adib, Alexandria, Egypt, to receive and consider the Annual Statement of Accounts and Balance-sheet and the Reports of the Directors and Auditors thereon; to elect Directors and Auditors; to declare a Dividend, and to transact any other ordinary business of the Company.

The Transfer Books of the Company will be Closed from the 28th day of June to the 5th day of July, 1921, both days inclusive.

Dated this 10th day of June, 1921.

By Order of the Board,

ALFRED W. ALLSWORTH,

Local Secretary and Assistant Manager.

4, Rue Adib, Alexandria, Egypt.

Shareholders who hold Warrants to Bearer are reminded that if they wish to attend and vote at the meeting, either personally or by proxy, they must, three clear days before the day appointed for the meeting, deposit their Warrants at the Head Office of the Company, 4, Rue Adib, Alexandria, or at any of the principal Banks in Alexandria or Cairo, a list of which can be obtained at the Head Office of the Company in Alexandria.

Shareholders in England who desire to vote by Proxy must lodge their Warrants and also their Proxies at the registered Office of the Company in London on or before the 24th of June, 1921.

Will the French Franc Further Improve?

COMPANY MEETINGS.

GHARBIEH LAND.

The report of the Gharbieh Land Company, read at the ordinary general meeting held at Cairo on May 30, states:—

The operations of the past year had left in our hands a disposable balance of £E58,522. It was the first time since 1907 that the company began a year with a surplus of this importance. Until then, it may be recalled, it had been struggling with increasing financial difficulties, which compelled us to reduce considerably the works of improvement, and even at one time to stop them completely.

To meet the most urgent needs it had been necessary for several years to have recourse to short term loans, necessarily very onerous, and which only removed one difficulty to create another almost immediately. It was not till towards the end of 1910 that the means of unifying the debts was found by the issue of 5 per cent. long-term debentures, guaranteed by a mortgage on the Ras-el-Khalig property. The funds which that issue furnished, though very limited, enabled a marked advance to be made in the works, but the war broke out before they were finished, and it then became necessary to restrict them to those that were considered absolutely necessary to avoid losing ground and to turn to the best advantage the results already obtained.

That method of proceeding was assuredly not the most efficacious from the point of view of the development of the property, and it is certain that the entire and uninterrupted application of the initial programme would have given more rapid and more complete results. But in the circumstances already referred to it was impossible to do otherwise without endangering the very existence of the company. It has been by using the greatest prudence in the employment of the company's resources that, despite the almost complete cessation of sales, despite the series of bad crops which have been recorded in our reports for the period, we have been able to avoid the grave dangers which have brought so many other companies to grief, and to prepare the results that 1920 ought at last to permit us to realise in part. These results having testified to the efficacy of the work accomplished, it only remains for us to persevere in the path followed and, so far as our surplus funds permit, we have not hesitated to resume with a new vigour the work necessary for the complete realisation of the value of the property.

Our programme includes a series of new works, such as the levelling and canalisation of lands not yet cultivated; the repair, deepening, and widening of drains and canals; cleansing the land, the construction and enlargement of *esbehs* and of houses for the personnel. It includes, also, the purchase of railway material, tractors, etc. The cost amounts to nearly £E22,000, comprised as follows:—New canals, etc., £E1,123.024; levelling and ploughing, £E6,123.140; *esbehs*, dwelling-houses, etc., £E2,973; general cost of preparing land (proportion of the whole of the expenses of the year), £E5,108.329; Decauville material, £E1,866.780; *sakkiehs*, etc., £E638.076; tractors, £E2,384.447; various, £E1,397.669; total, £E21,615.174.

The property of the company at February 28, 1921, amounted to an area of 6,012 feddans, 1 *kirat*, and 1 *sahmes*, figuring in our books at that date for a total amount of £E366,618.354. The works of irrigation and drainage carried out in 1920-21 consisted principally of the construction of new canals and secondary and tertiary drains on a total length of about 44,600 metres, the deepening and enlargement of old canals and drains on a total length of about 6,480 metres, and the construction of various bridges and culverts. The machines have suffered to a certain extent from the employment of *mazout* of inferior quality, which we have had to substitute for coal as fuel for reasons of economy. Repairs are in progress, which will restore them gradually to a good condition.

The new construction undertaken in 1920-21 included fifty-six houses for cultivators, and six houses for the staff, etc., or, in all, 172 rooms. We have also repaired the pump rooms and twenty-nine old houses. Other works being necessary, we shall carry them out as soon as our funds permit.

The results of the cultivation are far from having attained the forecasts at the commencement of the year. At the time when rents were fixed the price of cotton was well above 100 talaris per *kantar*, and all seemed to indicate that, barring extraordinary events, that price would be maintained at least up to the following crop. Nevertheless, it is not upon this price that we have based the rents of the year. We have prudently preferred to adopt as the basis of calculation the price of 50 talaris, while stipulating that all increases above that price should be subject to division between the tenants and the company, according to a scale determined in advance and accepted by all interested. The slump which was so soon to begin was then not less impossible to foresee than to avert. The price commenced to fall sharply in September, and in less than six months a total fall was to be recorded of nearly 85 talaris per *kantar*.

Tenants and proprietors alike saw themselves threatened with inevitable ruin, and what made the situation still worse for all was that never before had the expenses of cultivation reached such a high level—a level which in the majority of cases surpassed the value of the crop at the prices ruling since December last. The minimum rent of 3.160 feddans leased in 1920 was fixed at £E30,820. According to custom the tenants have delivered to us their cotton; but at the present prices we shall only realise in disposing of it a part of the sums which are due to us. In view of the serious character of the fall we have decided to revise the leases, and to provide for a total reduction

of 30 per cent. of their total. Even with that reduction, we cannot regard as certain the entire recovery of rents and advances which remain to be received, and on that account still a reserve of £E5,000 appears to us to be necessary. With respect to arrears of previous years which, in the present situation, ought to be regarded as irrecoverable, we have deducted the amount under the "provisions for doubtful credits" which already existed in our previous balance-sheets.

The fall in the price of cotton brought about as its immediate consequence the complete cessation of transactions of all kinds. We have, therefore, made no important sales of land in 1920-21. Some small sales were concluded at the commencement of the year for a total area of about 10½ feddans, and left a profit of £E602.

Despite the disappointments resulting from the fall of the price of cotton and of all products of the land, despite the increase of expenses and the large reserves we have had to create for the rents and advances in arrears, the profit and loss account shows for the first time since 1912 a satisfactory surplus. It is true that the amount is not large, and in expressing the hope in our last report of distributing a dividend this year we counted on a much greater surplus, and the most prudent forecasts suggested that that result was certain.

The severe crisis which prevails throughout the entire world at the present time has upset our expectations, and compels us to postpone the date of that distribution. But we have no reason for modifying our opinion as regards the value of the company's assets, which, in our opinion, remain much higher than what one might be inclined to rate them at by basing them on the present price, exaggeratedly low, of the company's shares.

Negotiations were carried on last year with a view to the partial amalgamation of our company with another important company. These negotiations were prolonged for several months, and everything seemed to indicate that it would be possible to arrive at an agreement. The sharp change in the position, and the continuance of the crisis resulting from the fall of cotton constituted an obstacle to the conclusion of the business and put an end to the negotiations.

The profit and loss account, we have said, shows a satisfactory surplus. That surplus is £E3,968.117. The net profits of the year, deduction being made for reductions of rents, reserves for doubtful credits, etc., amount to £E6,128.277, comprised as follows:—Receipts: profits of land development, £E39,013.970; profits on sales of land, £E.602.543; increased value of securities, £E4,142.500; exchange and interests collected or acquired, £E13,254.534; profit on redemption of debentures, £E419.156; recovery of old credits, £E6,000—£E63,432.703, from which has to be deducted reduction on rents (30 per cent.), £E9,250, leaving £E54,182.703. Expenses: Cost of development, £E21,341.832; debenture service, £E13,243.219; interest paid or due, £E479.556; directors' fees for 1919-20, £E1,000; general expenses and sundries, £E5,778.469; decreased value of securities, £E1,150.815; amortisation, £E60.535—£E43,054.426, surplus £E11,128.277, less provision for rents, etc., in arrears, £E5,000, there remains £E6,128.277. Deducting the debit balance of the previous year, £E2,160,0160, there remains a surplus of £E3,968.117, which we propose to carry forward. From this balance there has first to be deducted the directors' fees for 1920-21, £E1,000, which will bring the surplus to £E2,968.117.

The general meeting unanimously approved the balance-sheet and accounts for the company's fifteenth year ended February 28, 1921, decided to carry forward the credits balance of the profit and loss account of £E3,968.117, re-elected as director Abdel Hamid Bey Siufi, and elected Yacoub Bey Sabri to replace the second retiring director, appointed as auditors for the year Mr. F. H. Russell and Mr. J. C. Sidley (of Messrs Russell, Harris and Co., chartered accountants), and fixed the remuneration of the auditors for 1921-22 at £E200.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

MAMOURET-UL-AZIZ.

The report for April states:—There is nothing to record as regards exports. In imports there has been a certain amount of activity, trade being principally in the following articles: coffee, sugar, matches, cigarette papers, shovels, olives, macaroni, leather novelties and footwear, amounting to an approximate total of £175,000.

The climatic conditions of the month have been more favourable than those of the preceding period, but the price of the wheat has not fallen; on the contrary there has been a rapid rise.

DALMATIA WINE INDUSTRY CRISIS.

(FROM OUR OWN CORRESPONDENT.)

ZAGREB, June 14.

There is a serious crisis in the wine industry in Dalmatia. According to statistics, there are still in that province 300,000 hectolitres of wine earmarked for export which cannot leave the country for the old market has gone. Czechoslovakia and Austria buy wine now at Trieste, and Hungary, formerly an important customer, is now excluded. It is difficult to place it in the interior, partly on account of the large local production, partly because of difficulties of transport. The position is serious, as Dalmatia, always a poor country, has been impoverished by the war, and wine is its chief product. The peasants are in distress, as for want of realisation they are short of money, and now the new harvest is coming. One suggestion is to allow the distillation into brandy free of duty, or else to give special rates to facilitate traffic. The Government is making endeavours to place large quantities in Czechoslovakia. It is an excellent opportunity for foreign buyers.

CZECHOSLOVAK IMPORTS AND EXPORTS.

At the general meeting of Czechoslovak import and export company, Dr. Mraz, the director of the Czechoslovak Statistical Office, supplied the following details regarding the foreign trade of Czechoslovakia:

During 1919 the goods imported into Czechoslovakia amounted to 18,378 million metric quintals, while the exports amounted to 56,645 million metric quintals. For 1920 the corresponding figures were 39,040 and 69,022 respectively. The value of the imports for 1919 may be approximately estimated at 6,428 milliards of Czechoslovak crowns, the value of the exports being 5,686 milliards. For 1920 the corresponding figures are 11,394 milliards and 9,584 milliards respectively. The value of cotton imported was 1,083 milliards of crowns, of cereals 1,080 milliards, wool and woollen fibre 782 millions, iron and iron goods 632 millions, food-stuffs, especially flour, 2,751 milliards.

Germany supplied goods to the value of 3,120 milliards of crowns, Austria 1,769 milliards, United States 1,413 milliards, Holland 577 millions, Hungary 498 millions, Italy 476 millions, Belgium 469 millions. The goods exported from Czechoslovakia were distributed as follows: Austria 3,134 milliards, Germany 1,821 milliards, Hungary 630 millions, France 611 millions, Poland 558 millions, Italy 517 millions, and Switzerland 369 millions.

THE WORLD COTTON CONFERENCE.

Among the most notable papers read at the World Cotton Conference, which closes this week, were those by Mr. David R. Croker, South Carolina, on "How can production best be increased?"; by Mr. W. B. Himbury, of the British Cotton Growing Association, on "Cotton-growing within the British Empire"; and by Dr. Lawrence W. Balls, of the Fine Cotton Spinners' Association, on "The possibilities of exact reporting and forecasting of the cotton crop." Below will be found brief summaries of each of these papers.

The American Crop.

On June 13 Mr. David R. Croker dealt with the position of the American crop. He said that it might seem somewhat academic to discuss the means to improve the quality of American cotton and to keep the supply adequate at a time when the world was over-supplied with almost all growths and characters of cotton, and when the cotton producer saw no chance of realising the cost of production out of the present and past year's crops. It must be assumed, however, that world conditions would gradually return to normal, and it seemed inevitable that they would see a great increase in the demand, for cotton fabrics as soon as the millions, now on the verge of famine, again had a surplus beyond food requirements with which to purchase clothing to cover their nakedness. It must be assumed also that the business of cotton production would furnish at least a living for those engaged in it, for otherwise they would be forced into other pursuits.

The subject assigned to him was a dual one, but a study of the factors affecting the quality and the supply of the cotton crop showed that these factors were largely the same. In the great central markets of the world cotton of good grade and staple always brought more than cotton of poor grade and staple, though the "differential" was variable. In the long run the supply would depend on the profitability of the industry. Therefore, as supply depended upon profit, which in turn depended upon quality and yield, the problems of adequate supply and of improved quality were essentially the same.

Even with double the average production per acre, however, at present prices the landowner would not receive a fair return for his investment and supervision, and the cotton labourer would still be paid far less than were the labourers in every other American industry. The cotton world must be made to understand that the South had only been able to raise cotton in the past at prices under 15 cents per pound by paying wages only sufficient to maintain the average labourer and his family in a condition of dire poverty, worse in many cases than the lot of the *ante bellum* slave. At these prices also the returns to the landowner were insufficient to pay him a fair return on his investment, or to provide a decent standard of living for his family. A solution would have to be worked out which would permit reasonable comfort and a decent civilisation for those who raise cotton. This would be necessary if the industry was to advance and if future requirements as to quality and quantity were to be met.

So it seemed quite evident that the price of cotton would have somehow to be brought back to a profitable level, at least for a well-bred product of superior spinning qualities, before any effective steps could be taken to improve further the average quality of the crop, and that the supply would rapidly decrease until this was done. When this was accomplished no difficulty would be experienced in maintaining a steady improvement in the quality and an adequate supply, provided the cotton spinners of the world would continually take an intelligent interest in the efforts of, and co-operate closely with, those who were working along correct lines for the production of superior varieties of greater value alike to grower and spinner, and for the proper handling and marketing of the staple.

Position of the Empire.

Mr. W. B. Himbury read a paper describing the cotton-growing experiments that were being made within the British Empire. He said that before the war there was unquestionably a shortage of cotton. The spinning and manufacturing industries of this

country had at times to close down or work short time, and this had serious consequences to the workers. When the world settled down once more to work and the spindles of the world were again going, that shortage would sooner or later recur, and when it did Lancashire wanted to realise that there were other sources of supply, for it was improbable that insect pests or climatic conditions which might adversely affect the crop in one part of the world would be equally bad in another. Therefore, the growing of cotton in new fields—or not having all the eggs in one basket—was of undoubted importance to the trade. Moreover, it was their duty to do all they could to develop the great tropical regions of their Empire. If the natives of Africa produced cotton they would require manufactured goods in exchange for the cotton. Again, if there was a country teaming with a population of millions who produced nothing, and those millions could be induced to grow cotton or some other crop, surely by getting them to do this they were benefiting not only their own country, but the whole world.

When they started the work they received much valuable help and advice, together with seed, etc., from the State Department of Agriculture in America, to whom they were most grateful. They had much to learn, and they profited by American experience. On the other hand, there were some cases in which their example might usefully be followed. He referred to the baling of American cotton. In America cotton-growing was a great and mature industry, whereas the British cotton-growing industry was in its infancy. Their crop was 100,000 bales last year, but the output was progressive, and the estimate for 1921 was 150,000. This was more than conjectural; the cotton was actually in sight. He thought they would agree that an annual increase of 50 per cent., even from small beginnings, would eventually mean a supply of cotton. He was satisfied that large quantities of suitable cotton could be produced within the Empire, and those new fields which at the moment gave the greatest promise were Nigeria, the Sudan, and Uganda. He predicted that the future Empire cotton zone would be between lines drawn about 15 deg. north of the Equator and 5 deg. south, embracing Northern Nigeria, the Sudan, and Uganda.

Forecasting Crops.

Dr. Lawrence W. Balls, in the course of his paper on the reporting and forecasting of crops, said that crop inspection at present suffered from this impossible condition—it was dependent on the personal opinion of the man who observed the crop. Anybody familiar with the work of a laboratory knew that nobody's personal opinion was worth much. When it came to forecasting, personal opinion was depended on even more. For that system he suggested the substitution of direct observation of what the crop was actually doing. Samples should be taken day by day throughout the season. The number of flowers should be counted and the number of ripe bolls. These samples should be taken from fields throughout the area under cultivation—one field here and one there—and transmitted for comparison and tabulation to a central place. In that way the condition of the crop at any given moment could be determined with extraordinary accuracy. The present system was like trying to use a dictionary from which someone had torn three-quarters of the leaves. Under the system he suggested cotton growing would become a duller business than it was now, and certainly speculation would become "more of a dead cert."

Czechoslovakia's artificial oil industry is flourishing, and the total capital for four factories amounts to over 130,000,000 crowns.

Matches, cigarette papers, and playing cards have recently been taken over by the Bulgarian Government as monopolies.

At an extraordinary meeting of the Alliance Bank of Simla, Ltd., it was resolved to increase the authorised capital to three crores of rupees.

The traffic receipts of the Egyptian Delta Light Railways for the week ended May 20 amounted to £E7,862; total for year, £E47,514. For the corresponding period of last year receipts amounted to £E12,072 and £E58,884 respectively.

The Trieste Lloyd Line have recently recommenced their services from Trieste to Constantinople, Galatz, Braila, and will also, in the near future, establish a line between Trieste and Alexandria.

YUGOSLAV TRADE THROUGH SALONIKA

(FROM OUR OWN CORRESPONDENT.)

ATHENS, June 5.

La Grèce Nouvelle is informed on good authority that an agreement has been concluded between the Consul of Yugoslavia at Salonika and the Governor-General of Macedonia with regard to the utilisation of the port of Salonika for Yugoslavian trade. The particulars of this agreement are as follows:—

1. Custom facilities, by which immediate re-expedition is made possible, are granted for all goods destined for Yugoslavia or arriving from that country.

2. The goods can be stored without previously undergoing the usual formalities, thus avoiding unnecessary expenses and loss of time.

3. The number of wagons available on the Guevgueli-Salonika railway line will be equally apportioned for the needs of the two countries.

La Grèce Nouvelle says that this agreement has created a favourable impression among commercial circles in Belgrade.

FORTHCOMING SAILINGS.

Anchor Line.—S.s. Olympia, for Bombay (Glasgow, June 29, and Liverpool, July 12).

Anchor-Brocklebank Line.—S.s. Masirah, for Calcutta (Birkenhead, July 2).

Bibby Line.—S.s. Gloucestershire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, June 22); s.s. Lancashire, for Rangoon (London, June 25); s.s. Oxfordshire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, July 6).

Byron Steamship Line.—A steamer will sail from Liverpool on June 24 for Patras, Piræus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila.

Clan Line.—S.s. Clan Maciver, for Colombo, Madras, and Calcutta (Birkenhead, June 30).

Cunard Line.—S.s. Cypria, for Gibraltar, Algiers, Malta, Patras, Piræus, Syra, Smyrna, Salonika, and Constantinople (Swansea, July 2; Glasgow, July 6; Liverpool, July 11); s.s. Brescia, for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Swansea, July 12).

Ellerman Line.—S.s. Trentino, for Gibraltar, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna, (Liverpool, July 30).

Ellerman's "City" Line.—S.s. City of Manchester, for Calcutta (Birkenhead, June 24); s.s. City of Exeter, for Bombay and Karachi (Birkenhead, June 27); s.s. City of Karachi, for Calcutta (Birkenhead, July 2).

Ellerman's "Hall" Line.—S.s. City of Rangoon, for Bombay, Karachi, and the Punjab (Liverpool, July 15).

Ellerman's "Westcott and Laurance" Line.—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

Glen Line.—S.s. Glenariffe, for Port Said, Port Swettenham, Singapore, etc. (London, June 30); s.s. Glentara, for Port Said, Port Swettenham, Singapore, etc. (London, July 14); s.s. Glenapp, for Port Said, Port Swettenham, Singapore, etc. (London, July 28).

Glynn Line.—S.s. Riposto, for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, middle of June).

Harrison Line.—S.s. Gladiator, for Calcutta (Liverpool, June 22); s.s. Inventor, for Calcutta (Liverpool, July 9).

Henderson Line.—S.s. Amarapoor, for Port Said and Rangoon (Birkenhead, July 13); s.s. Mandalay, for Port Said and Rangoon (Birkenhead, July 27).

Holt Line.—S.s. Atreus, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 24); s.s. Calchas, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, June 24); s.s. Ningchow, for Port Said, Port Swettenham, Singapore, etc. (Swansea, June 24).

Johnston Line.—S.s. Dromore, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, July 20).

Maindy Line.—S.s. Maindy Transport, for Antwerp and Moroccan ports (London, June 25); s.s. Maindy Tower, for Antwerp and Moroccan ports (London, end of July).

Mass Line.—S.s. Amasis, for Gibraltar, Algiers, Malta, and Alexandria [taking cargo for transshipment to Moroccan, Algerian, Cyprus, and Syrian coast ports] (Liverpool, June 29).

Papayanni Line.—S.s. Bosnian, for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, July 1).

P. and O. Line.—S.s. *Morea, for Bombay (London, June 24); s.s. *Caledonia, for Bombay (London, July 1). *Taking cargo for Gibraltar, Port Said, and Aden (with transshipment at Bombay) for Indian coast and Persian Gulf ports. S.s. Sicilia, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, July 15).

P. and O. British India Line.—S.s. †Mashobra, for Colombo, Madras, and Calcutta (London, June 24); s.s. *Merkara, for Bombay and Karachi (London, July 1); *Taking cargo for Persian Gulf and Malabar coast ports; †taking cargo for Port Said, Suez, and Aden.

Prince Line.—S.s. Scottish Prince, for Tunis, Malta, and Alexandria [taking cargo for Beyrout, Jaffa, Haifa, Tripoli (Syria), Lattakia, Alexandretta, Mersina, and Cyprus ports] (Manchester, June 28).

ON 'CHANGE.

Greek Shares Strong.

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday.

Generally speaking, a dull tone has prevailed during the past week and the latest coal development will scarcely conduce to any greater activity.

Gilt-edged securities have been practically alone in showing anything approaching a cheerful aspect. War Loan Fives are 87½, while Consols are ½ up at 45½. The Indian Loan is now 2½ premium, while the Ceylon Loan is at a premium of ½.

Industrials generally have been depressed, while Oils have been weak, declines taking place in a number of cases. Rubbers have been weaker on developments during the week.

There have been few movements in Near East securities. Egyptian Guaranteed 3 per cent. at 69, Greek Guaranteed 2½ per cent. 1889 at 66, and Turkish Guaranteed 4 per cent. 1855 at 70 are all unaltered.

Greek shares have been stronger. The 5 per cent. 1881 Loan is 3 up at 43, while the 5 per cent. 1884 has gained 4 at 43. The 5 per cent. 1890 at 40½xd. is ½ up, while Fundings are 2½ up at 38. The 4 per cent. 1910 Loan is 1 up at 30, while the 4 per cent. 1902 Loan is a similar amount up at 35. The 5 per cent. 1914 Loan has gained ½ at 37.

In Land shares Beheras are ½ down at 7½, but the preference shares are unchanged at 3. Anglo-Egyptian Land Allotments at 3½ and Egyptian Consolidated Lands at 1s. are unchanged, while Egyptian Delta Lands are the same at 6s. 6d. Gharbieh Lands remain at 1½, but New Egyptians are 1s. 3d. up at 22s. 9d. Union Foncières have shed 1-16 at 1½xd., while Sudan Plantations are a similar amount lower at 3-16.

In Oils Anglo-Egyptian have lost 5-32 at 1½, while Phoenix are 3d. down at 11s. 6d. Roumanian Consolidated are 3d. lower at 13s. 3d., while Steaua Romanas have shed 6d. at 15s. 6d. Burmahs are 3-32 lower at 6-16.

In Banks Agricultural 3½ per cent. Bonds are unchanged at 51, but the 3½ per cent. Guaranteed Bonds are ½ up at 53½. Imperial Ottoman Banks are unchanged at 8½, but National Bank of Egypt are 1-16 up at 17½. Land Bank of Egypt at 4-11-16xd. are 3-16 down.

Among Miscellaneous descriptions Abyssinian Corporations are 2s. Alexandria Waters have gained 1-16 at 6-9-16. Morums are unchanged at 10s., while Egyptian Markets, at 18s. xd., have shed 6d. Egyptian Salt and Soda have gained 9d. at 27s. 9d.

The Czechoslovak Sugar Commission have recently made some large contracts with British and Scandinavian importers. At the last sample fair held at Prague orders amounting to 596,000,000 crowns were booked; 5,000,000 crowns of that total only were from the United Kingdom.

NOTES OF THE WEEK.

The Imperial Conference.

The Imperial Conference has started without any formal agenda, but the opening speeches indicate that India is not likely to take a very prominent place in the set discussions. The most pressing question before the Conference is clearly that of the Pacific, and in regard to it India, unlike Canada and Australia, has no special interests to put forward, her desire being solely for an assurance of continued peace. So far we have been told of only one resolution to be brought forward by the Indian representatives, and, as was inevitable, it relates to the status of Indians in the Dominions. There is, as Mr. Sastri said, no intention of reopening the question of immigration, which was disposed of by the compromise made in 1918: the point now raised is the position of those Indians who, in whatever manner they may have gained admission, are now legally domiciled, and the claim advanced in the resolution is that they should be admitted into the general body of citizens of the Dominion in which they have made their homes. The question is obviously one for friendly discussion, and it is to be hoped that the difficulties in the way of an agreement will not prove to be insuperable.

Indians in the Dependencies.

Another aspect of the complex system of status was touched on by Mr. Churchill in his speech regarding the Colonies and Possessions under his administration, and India will doubtless welcome his enunciation of the principle that "there should be no barrier of race or colour or creed which should prevent any man by merit from reaching any station if he is fitted for it." At the same time Mr. Churchill was careful to point out that such a principle must be very carefully and gradually applied, because of existing local feelings, and of the social stresses which arise when different populations are intermingled. He mentioned that the most difficult question pending just now is in Kenya, to the case of which we recently referred, but he gave no idea of the direction in which a solution is being sought, beyond the somewhat oracular statement that he hoped to find means of overcoming difficulties in the application of the broad principles, and as matters now stand, the public must be content to share his hopes.

The Report of King Peter's Death.

We are glad to give publicity to the following statement received from the Serbian Press Bureau:—

The news published in your issue of June 23 reporting the death of King Peter should be contradicted, as we have just received a telegram from official sources

in Belgrade saying that King Peter is on the way to recovery, and bulletins are published daily.

In publishing the report as it reached us, from a usually reliable source, we gave expression to the hope that the news might prove incorrect. Confirmation from other quarters was lacking, and our own Correspondent in Yugoslavia, in a letter appearing in the same issue, bore witness to contradictory information emanating from official sources. This week he throws further light on the subject by emphasising the serious embarrassment in which the Government would have found itself if King Peter had unhappily died before the ratification of the Constitution. At a time, therefore, of national anxiety, when in addition to the ordinary cares of State the Government had its own political position to consider, the report of the aged monarch's death might well find wide credence before the absence of an official announcement was noticed.

The Allies, Greece and Turkey.

The refusal of the Greek Government to entertain the Allies' offer of mediation has let loose a flood of harsh words against the present rulers of Greece from quarters where no allowance is made for the peculiar position in which those rulers find themselves. It is not to be supposed that any invitation to surrender voluntarily the awards to Greece entailed by the Treaty of Sèvres would ever be accepted by the Greeks; it is certainly too much to expect this action of them when King Constantine has gone to Smyrna and the whole nation has been buoyed up with promises of a victory over the Turks. M. Gounaris's Cabinet has to reckon not only with its political opponents, but also with the military party, whose *amour propre* is at stake after its supersession of Venizelist officers. We do not believe that responsible Greeks imagine it to be possible that Greece should conquer and hold Anatolia, but it will prove easier to bow to the Allies' decisions after one unmistakable victory over the Turks has been registered or after Greece's limitations, when deprived of Allied support, have been more fully appreciated. Much of the present trouble in the Near East is due to the tactless handling of the Greeks, and it is a matter for regret that the Allies' representatives in Athens, however able individually, are debarred by circumstances over which they have no control from the personal touch in their relations with the Greek Court and the Greek Government that often counts for so much in lubricating the wheels of diplomacy.

The Greek Dilemma.

Greece is badly in need at the present time of a disinterested adviser, who will help the country and its rulers to see Greek affairs in their true perspective. We have

no patience with the attempt to penalise a whole people because their view of their own domestic affairs does not happen to coincide with the preconceived ideas of foreigners. Movements are on foot in South-Eastern Europe which have for their ultimate object the introduction of more stable conditions than those established by the settlement which the Allies have sought to impose. It would be better for all concerned if these movements could be taken in concert with Greece rather than in her despite. But, after having been led to regard herself as the determining factor in the Near East, she now finds herself ostracised, and is wasting both her opportunities and her substance in an effort to rehabilitate herself by the only means that she considers available. The result is that, while the world as a whole is advancing politically, Greece is lagging behind. Her whole horizon is still bounded by traditional animosities, whereas every other country is concerned to find occasion to bury hatchets and to help on with a new order of things. The greatest disservice rendered to Greece since the victorious termination of the war was the fastening on her of the obsession of territorial aggrandisement. Her instinct was against it at the time, but having been granted it she now feels compelled to exhaust herself in an effort to retain it.

Bulgarian Cabinet Changes.

Further Cabinet changes in Bulgaria suggest that M. Stambolisky is experiencing the inevitable difficulties that fall to the lot of a Balkan Minister, however powerful the party behind him may have been on his accession to power. As head of the Agrarian or Peasants' Party Bulgaria's Prime Minister has had special obstacles to overcome, particularly since he was forced to abandon a coalition policy and to select his Ministry entirely from his own followers, who lacked experience of office. Hitherto his obvious sincerity and personality have carried all before them, and the rapidity with which he has helped to restore Europe's confidence in the new Bulgaria has impressed even his political opponents. Politics, however, as played in the Balkans, is a restless game, and the temptation to enlist foreign intrigue for personal, or at best political, ends is always strong. Where M. Stambolisky's Government has made mistakes they have generally been based on perfectly good motives, but they have found the Bulgarian people suffering from the many aspects of war's aftermath, and have helped to rally elements formerly at variance with one another to a common opposition against a masterful Premier. It remains to be seen whether M. Stambolisky has not still more up his sleeve than his opponents give him credit for. Certainly no one has thought of challenging his patriotism, and it would be difficult to show that anyone else could have been more successful in inaugurating the right foreign policy for Bulgaria or that the country would gain by changes to-day in its representation abroad.

Italy's Montenegrin Guests.

The disbanding of the Montenegrin Legion at Gaeta marks in all probability the disappearance of the last hope of the Montenegrin Royalists. It has drawn a strong protest from M. Yovan Plamenatz, the late King Nicholas's Prime Minister; and lovers of the picturesque and the romantic will no doubt feel a pang of regret at the disappearance of the Black Mountain as a distinct country. It will also be regretted, for quite different reasons, by certain circles in Italy. But upon the whole the change should certainly make for more stability in South-Eastern Europe, especially if Yugoslavia shows tact in dealing with the Montenegrins and endeavours to obliterate painful memories by generous treatment. By such means will the Montenegrins most readily be persuaded from letting their thoughts turn to a prince across the water.

The Future of Egypt.

The situation in Egypt has undergone no real change in the past week; though Rushdy Pasha, who will take part in the negotiations in London, sailed from Alexandria for Europe on June 22. All the best elements in the nation appear to be rallying strongly to the

support of Adly Pasha and the Government; while Zaghloul Pasha has had the mortification of losing another of his influential supporters, a Coptic member of his Delegation. The decline of his influence has so far exasperated him that he has launched forth into denunciations of the British as the "real adversaries" of Egypt. In view of the hold that he still has upon the imagination of the lower classes this change of tone may lead to serious trouble, and it is to be hoped that the authorities are quite prepared to deal with anything of the kind that may arise. For the rest, it remains to be seen whether Egypt will come to its senses, and, recognising that what Great Britain offers is offered in friendship and voluntarily—not under compulsion—behave accordingly, with gratitude, or whether it will prove that it has made no progress since the days of Arabi: whether it will support the Government and the moderates, or whether it will throw away all in blind obedience to a leader who can, in the last resort, lead it only to defeat, as Arabi, its former idol, did.

The Emir Faisal in Baghdad.

By the time these notes appear the Emir Faisal will probably be either in Baghdad or very near to it. He is to be the guest of the National Government while he is in Mesopotamia, and he is sure of a very warm welcome from the city of Haroun er Rashid and the land in which legends of its prosperity in the days of the Abbasside Khalifs still linger. As far as it is possible to judge from present indications there can be very little doubt that the people of Irak will elect this popular son of King Hussein as their own ruler, or that he will accept the offer if it is made to him; but until the General Assembly has formally made its choice it would be unwise to assume that no other name may be put forward. The Emir Faisal, however, starts with a very strong point in his favour—in the knowledge that his election would be quite agreeable to the Mandatory Power. There is, of course, a strong current of unfriendly feeling towards him in France, feeling which has been frankly expressed quite recently by M. Poincaré, the ex-President; but, on the other hand, M. Briand is reported to have informed the Foreign Affairs Committee of the Chamber that the Emir's position in Irak is a question for Great Britain alone to settle, though France would desire to have a neutral zone between the Syrian frontier and any territory under the Emir Faisal's sovereignty.

A Caucasian Federation?

Azerbaijan, Georgia and Armenia have let it be known that "no treaty, agreement or concession made by any but their national Governments will be considered binding." At the present time, with Bolshevism running riot all over the Caucasus, it may seem that the announcement can have little value; but Bolshevism will not endure, and the three republics may rest assured that their action is understood and approved by Europe and America. More important than this announcement, however, is a second, to the effect that the three young republics just named have, with a fourth, the Republic of Northern Caucasia, entered into an agreement establishing the basis of an economic and political union between them. According to a statement issued from the Georgian Legation, the principal feature of this agreement—which was signed in Paris on June 15, is the creation of a Customs Union for all the Caucasian States; but it aims also at the co-ordination of their foreign policy, and at recourse to arbitration for settling their territorial differences. In view of other agreements entered into by "exiled" governments which have since borne good fruit, it would be foolish to refuse to take this latest *entente* seriously. It may, in fact, prove to be the beginning of that Caucasian Federation which is so much to be desired.

The Persian Mejliss.

After an interval of nearly six years, the Persian Mejliss reassembled on June 22. The opening ceremony was performed by the Shah in person. The Mejliss is likely to be concerned chiefly with the financial problem, which is admittedly acute, for the country has been

living for some months chiefly on royalties paid by the Anglo-Persian Oil Company. The Shah is understood to wish that British financial advisers should tackle the programme; but the Soviet representative opposes the proposal. If it be true, as reported from Athens, that Teheran is endeavouring to conclude an agreement with Angora, it would look as if the influence of Moscow were in the ascendant.

The Prince and India.

The official announcement that the Prince of Wales will visit India in the course of the next cold weather sets at rest—and that in the most satisfactory way—the discussion which has been going on for some months past. Everyone hoped that the visit would take place, but many competent observers feared that the occasion might not be opportune, simply for the reason that the recent propaganda of lawlessness was expected to produce its natural result. The announcement now made must be taken to show that, in the opinion of the Government of India, such fears are groundless, and that is as good a piece of news as we could wish to chronicle. The possibility still remains that another bad season might produce an economic situation in which festivities would be out of place. That shadow, however, threatens everything which is arranged beforehand in India, and we may hope that it will disappear before a steady and persistent monsoon, of the kind which Indians associate with “the good old days,” and which, when it comes, puts everyone, even the politician, in a good temper.

THE WEEK AT HOME.

LONDON, Monday Evening.

A Brighter Outlook.

The industrial prospect is distinctly brighter. The cotton dispute is over, an amicable agreement as to the amount of wages reduction having been arrived at. The engineering difficulty has been averted for the present. As to coal, which some wag has dubbed “that forbidden fruit, the source of all our woe”—after a week of apparent stagnation, negotiations have reopened, and it is again hoped that a settlement is at hand.

Mr. Hodges, in a speech before the Labour Conference at Brighton last week, referred to the coal stoppage as an “epic fight.” But even epics come to an end in time, and although the ballot showed a large majority against resumption of work, the minority was numerous, and those who abstained from voting were presumably anxious to get back if terms could be arranged. It was noticeable that Mr. Hodges, in his very long but well-arranged speech to the other Labour delegates at Brighton, hinted that the miners might have to give way in the end. He asked for sympathy and assistance; the sympathy he got from the trade unions in full measure, but they are not in a position to render much effective financial help. The miners are practically at the end of their resources.

A good many calculations have appeared in the papers as to the losses caused by the strike. The figures, of course, are impressive, but I am not quite so impressed by the competence of the calculators. The fact is, it is impossible to say what the cost has been, and we shall not know for some time. The moment the miners are back at work trade will revive, owing to the accumulation of orders, and there are indications that business will be pretty brisk for some months. Next year will be the difficult time, when the Chancellor of the Exchequer tries to balance his Budget, and finds that three months' revenue out of twelve has dropped out.

It will be difficult to make good the deficiency by more taxation, for already the income-tax is heavily in arrears, and in many cases is being paid out of capital or by overdrafts on the banks. The alternative is to print more paper-money, but that merely means re-inflation and increase of prices, a remedy as bad as the disease. The revolt against high prices is universal: at one of the recent by-elections the Anti-waste candidate is said to have polled the entire women's vote, and

a large part of the men's vote, by the simple slogan of “1914 prices.” But I am afraid disappointment is in store for this constituency.

The King in Ireland.

The King and Queen went to Belfast last week and opened the Ulster Parliament. The whole country appreciated their courage and the admirable speech in which His Majesty pleaded for peace and co-operation in Ireland; the retort of Sinn Fein was to wreck a troop train. It is said that the King has promised to open the Southern Parliament if a single member attends, but there seems unfortunately no likelihood that Sinn Fein will condescend to work its own institutions.

The Government, having recognised the fact, is sending more troops to the South, and it seems probable that what is called Crown Colony Government (although it will be more nearly akin to martial law) will be introduced. However, the latest news as I write is that the Premier has invited Sir James Craig, as representing Ulster, and Mr. de Valera, as representing the rest of Ireland, to a conference in an earnest attempt to compose their unhappy differences. Sir James Craig has already accepted the invitation, and though Mr. de Valera has not yet replied, it is confidently anticipated that he will also take advantage of the Premier's offer.

Political Cross-Currents.

The political seas have been rather choppy of late—no serious storms, but with awkward swells and currents which have disturbed some of the little fishes. Lord Salisbury and Sir W. Joynson-Hicks have been attacking the Coalition because they want it to be a purely Conservative institution, and they resent the presence of Coalition Liberals. The Liberals, on the other hand, have been fraternising with the Independents at a lunch—from which the leaders were significantly absent—and other lunches are to follow, apparently without speeches, but with thoughts, no doubt, too deep for words.

The upshot is uncertain. Somebody has unkindly compared the Liberal Coalitionists to the tail of the Government, and suggested that, like the human tail, its size is diminishing because it is sat on so often. But Liberalism is in unhappy case in these days; it would ally itself with Labour if Labour would have it; but the younger party will no more ally itself with Liberalism than a man will marry his grandmother, and for much the same reason. The one strength of the Liberal Coalitionists is Mr. Lloyd George; for, unluckily for Conservatism, the Unionist party have lost the art of producing leaders. Mr. Bonar Law, now in the South of France, is a splendid second-in-command, but no leader. Mr. Austen Chamberlain is too stiff and formal. The oratory of Sir W. Joynson-Hicks does not cause the great heart of the people to beat faster. The Duke of Northumberland has a few supporters, but while he sees Bolshevism in every bush, he is not taken very seriously.

In these circumstances the renewed talk of a General Election in the immediate future may again be discounted. Labour does not want it for another year, when it thinks it may get a majority; faith being the substance of things hoped for. And a few more Labour wins at by-elections would quickly reconcile the Coalition malcontents to a continuance of the Government; it would make no serious difference to the size of the majority—particularly as the last place in which one looks for a Labour member is in the division lobby—but it would pull the unwieldy masses of the Government's supporters together.

Drought and Sunshine.

The present summer seems at present likely to rival the wonderful season of 1911. Cloudless skies and bright sunshine make the country perfect; every day is warmer and more beautiful than its predecessor. The gardens and fields are magnificent—it is the best year for roses and wheat that one can remember, and the weather historians tell us that nothing like it has been known since 1835, or some such prehistoric date.

But the farmers are unhappy—they generally are. Last year the summer was abnormally wet and cold until September. But the autumn was dry. The winter

was drier. The spring was steadily dry. The six months' deficiency of water, followed by a flaming June, is having serious effects. In Essex, always the driest part of England, the ponds are empty, and even the mud at the bottom is caked and cracked. The hay crop is thin and poor, grass is brown, and roots are small; barley, which wants more rain than wheat, is poor. But the autumn-sown wheat in some favoured places looks almost ready for harvesting. Peas and strawberries are apparently the worst sufferers, and it is too late to save them, for there is no sign of the drought breaking. From previous experience, we may expect things to go on like this for some time, and then in August, when everybody is holiday-making, there will be the sound of abundance of rain, and we can all revel in pessimism to our hearts' content.

Conference, Not Cabinet.

The meetings of the Imperial Conference, which are not being fully reported, are by all accounts discovering no serious differences of opinion among the statesmen of the Empire; and the Press is so busy reporting golf, cricket, polo, tennis, and other sporting contests that small matters like the Imperial Conference and the industrial troubles are sinking to their proper insignificance. But one thing has at least been definitely settled. The attempt of the *Round Table* group of centralists to dub the Conference a Cabinet, which was steadfastly opposed on good constitutional grounds in the Dominions, no longer receives official countenance. Mr. Lloyd George, in his opening address, referred three times to the body as a Conference, and not once did he use the word "Cabinet."

The Polo Tests.

A friend who is a polo expert sends me the following: Although England has lost the International Polo Cup to America in two straight wins, there need be no ground for pessimism as to our prospects of retrieving the Cup at our next meeting. That English polo had suffered great losses through the war in players and ponies our sporting opponents would be the first to admit, and their offer to postpone the tests until this year is proof of their appreciation of this. However, the victors are to be congratulated on a decisive and well-deserved victory. They played the game in a most sportsmanlike manner, went all-out from bell to bell, hit hard, and, what is all-important for winning, shot straight. On the subject of our shooting one can only say it was too deplorably bad to be true.

In the first Test, America scored with eleven shots out of seventeen and England notched only four goals in sixteen fair chances. In the second Test, America took ten out of the twelve openings they were allowed, whereas England, although brilliant combination and fine hitting gave them sixteen fair chances at their enemy's goal (and at least four were "sitters"), failed to exploit their success more than six times. The story of the first Test Match can be told in a few words. England started slowly, missed an early chance of scoring by inches, and did not get into their stride until well on in the second chukker. In the third and fourth periods England were attacking practically throughout, and but for inexplicably bad shooting, should have started the fifth period with a lead of two goals instead of being one down—this, as Mr. Milburn admitted, was the turning point of the match, and for the remaining two periods England were a beaten side.

As an exhibition of high-class polo the first Test Match was disappointing, especially in the case of the English team, who, with the exception of Lord Wodehouse, played much below their true form. This was borne out in the second Test, when the English team pulled out something like their true form in a glorious attempt to keep the Cup in England. Again, however, faulty shooting lost them the match, and the fruit of the brilliant team work, hitting and dash, was thrown away time and again in front of goal. England commenced slowly, and allowed America to get a lead of three goals in the first chukker. Thereafter both sides put up as fine an exhibition of polo as one could wish to see. England dominated the game until the last chukker, but on the few occasions when the Americans

were able to establish the loose game essential to scoring, their attacks ended in success, whereas the high hopes of the English supporters, raised to fever pitch by brilliant mid-field play, were again and again dashed to the ground in front of goal.

The American team are to be congratulated on their fine performance, and undoubtedly the best team won. Major Lockett and his team, though defeated, far from disgraced English polo; indeed, their Homeric struggle to avert defeat in the final Test will long be remembered by all who were lucky enough to see the game.

The Week's Books.

A curiously fascinating work has been produced under the apparently mystic letters "T. B. R." The initials stand for "Travel by Road," and the book is the first issue of a new Bradshaw—a Motor Omnibus Guide to England and Wales. It is a slim volume, but so was the early Bradshaw of Victorian times, which is now a prized rarity of the book-collector; perhaps this first edition of "T. B. R." will some day secure me a fortune in the auction room. It is bound to grow, but a study of its pages makes one realise how great a revolution in transport the motor omnibus has wrought. I suppose there are villages which have never yet seen one, but they must be few and far between. It will soon be possible to ride from one end of England to the other by motor-bus. But I should be sorry to do it.

I am afraid that the rather obscure style, to say nothing of the by no means elementary chemistry and mathematics, of "Biochemistry," by Dr. Benjamin Moore (Edwin Arnold), will repel many readers. But the book is, nevertheless, a work of first-class scientific importance in the difficult and largely unexplored domain between chemistry and biology. Dr. Moore's record of experiments is of profound interest as a study of the development of the organic from the inorganic, and of the factors that tended to evolve life on this (and other) planets. I hope he will forgive me if I say that I found his logarithms sometimes easier to follow than his English. As he is a professor at Oxford, could he not get some fellow-professor with a knowledge of composition to run through the proof-sheets of his next work?

A work that calls itself "Back to Methusaleh" (Constable) is at least comprehensive. When one discovers that it is by Mr. Bernard Shaw, that it is a play, and that it is regarded by the author as "this my beginning of a Bible for Creative Evolution," one knows what one is in for. As a matter of fact, the author is better than his word, for he goes back a good deal further than Methusaleh, who, if not quite young enough to have been one of the earlier subscribers to *THE NEAR EAST*—he died in the year of the Flood—was, at any rate, the last of the long-lived patriarchs. But Mr. Shaw starts with Adam and Eve and the Serpent—unless one reckons his lengthy preface as a substitute for the Creation; as he nowhere remarks that it was produced in fourteen days, one cannot be sure. But I gather that in his opinion humanity has not changed very much. At any rate, Eve in the Garden of Eden hails Adam with a "Coo-ee"—a fact which Milton overlooked. And two of the earlier politicians—politics were evolved quite early, apparently—bear a most suspicious resemblance to Mr. Asquith and Mr. Lloyd George. Presumably an earlier incarnation.

A biography of the Prince of Wales (Nisbet), by Miss Ivy Sanders, seems a little premature after Mr. Shaw on Methusaleh; for the Prince is just 27. But there are already some good stories about him. "One of the idle rich," a Cockney labourer is said to have remarked once when the Prince was hung up on the road. "Rich, perhaps," the Prince is stated to have retorted, "but, hang it all, not idle."

OCELLUS.

JAFFA RIOTS.

We have received from Jaffa a letter referring to the above subject from a correspondent who describes herself as an English girl and signs her letter "A Reader." Unfortunately, she omits to forward her real name and address, and, in accordance with our rule, we are therefore unable to publish her letter.

THE NEAR AND MIDDLE EAST

(From Our Own Correspondents.)

EGYPT.

CAIRO, June 12.

Support of the Adly Cabinet.

Notwithstanding all the alarmist rumours, the Bairam Feast passed off quite peacefully, and throughout the week there has not been a single untoward incident to report. At the same time the Feast has been made the occasion for a remarkable demonstration of support for the Cabinet. The reception, which is usually held by the Sultan on the first day, was exceedingly well attended, particularly by people from the provinces; and after they had finished at the Palace almost everyone without exception repaired to the house of Adly Pasha, where he held a reception the like of which has not been remembered for many years. The Prime Minister's visitors included all the most prominent notables from all over the country, who made no secret of the fact that they had come in order to assure the Cabinet of the support of their people and demonstrate their disapproval of Zaghoul Pasha's policy and methods.

It is amusing to note that arrangements had been made to hold a grand Bairam reception at the "Beit El Ommah" (House of the Nation), as his supporters have arrogantly called Zaghoul Pasha's house. Zaghoul Pasha announced, however, at the eleventh hour that owing to his being in mourning for the lives lost in Alexandria he would not hold the reception, and he issued a message to the nation instead. There is little doubt that he took this decision because his agents had ascertained that, owing to the change in feeling amongst the provincial notables, the projected reception might possibly prove a fiasco.

This welcome demonstration in favour of the Cabinet has been brought about in the first place by the evidence, which is repeatedly forthcoming in one form or another, that the Cabinet is not going to be turned from its purpose; and, secondly, by the persistent manner in which Zaghoul Pasha incites to revolt in everything he publishes. Even in his message of peace to the nation on the occasion of the Feast of Bairam he could not resist using incitative language. The more instructed are obviously beginning to tire of this style of patriotism, and are finding the courage to come out into the open. It will, therefore, be interesting to watch, now that Zaghoul shares are at a discount, whether the steady flow of deputations to the Cabinet will continue as they have done during the past ten days.

A factor which will undoubtedly be for good is the bestowal by the Sultan of the Grand Cordon of the Order of Mohammed Ali or Adly Pasha and of the Grand Cordon of the Order of the Nile on four of the other Ministers. This will set a term to the rumours that have been current of strained relations between the Prime Minister and the Sultan, and together with other factors should conduce to a further consolidation of the Cabinet's position.

Warrior's Day Fund.

The lists for Warrior's Day have now been finally closed, and the total for Egypt comes to £E10,109. This applies only to Egypt and the Sudan; and if Palestine is included the total collected will not fall far short of £E11,000. As the High Commissioner has said in his letter to the Press covering the lists of subscribers, this is a result of which the British community may well be proud. As a matter of fact, this result has come as a stupendous surprise to the organisers, and it is no secret that when the idea of calling for subscriptions for Warrior's Day was first mooted the amount tentatively fixed as a probable total was about £E1,500. This handsome result speaks volumes for the generosity of the British community, and for that of the foreign communities, to whose assistance Lord Allenby pays a warm tribute. It is a curious fact that Cairo heads the lists for Egypt. Considering that most of the community

are people on fixed incomes who suffered fairly considerably as a result of high cost of living brought about by the war, and that the merchant princes of Egypt are concentrated in Alexandria one would have naturally expected that the latter city would have been *facile princeps* on the subscription list. This success also redounds to the credit of the organising committees and of the organising secretary, Colonel Hussey Walsh, and no qualms should be felt in regard to the organising of another Warrior's Day appeal next year.

Egypt as a Winter Resort.

There is no doubt that since the war Egypt has been playing second fiddle to the Riviera and other places of winter resort, which formerly had to bow the knee to this ancient land with its remarkably equable climate and its wealth of sites of interest. Changed circumstances have, of course, a lot to do with it, and the political unrest of the past two years has contributed not a little to scaring away would-be visitors. Nevertheless, even granted that these unfavourable factors were made to disappear, the fact remains that such energetic efforts are being made by other resorts, not only to attract tourists but to discredit Egypt, that unless very active steps are taken the land of the Pharaohs will definitely lose the place which it used to have, and should rightly have to-day. This fact has at last been realised by those interested in the Egyptian tourist traffic, and the Egypt Promotion Association, which did such good work before the war, has now been revived, with a strong local committee. Steps are being taken to organise an extensive advertisement scheme for next winter, as also what one might call a "vigilance service," to counteract the campaign of misrepresentation of the condition of things in Egypt and the Sudan which every year forms part of the advertisement machinery of those interested in pushing other winter resorts.

In this connection I should like to make two suggestions. The first is that the advertisement campaign should be carried out on exceedingly generous lines. If the thing is worth doing at all it must be done on a large scale, and all the known methods of propaganda, such as cinema films, lectures, pamphlets, etc., should be made use of. The expenditure of a few hundred pounds will be of no avail against the success which the other resorts have already achieved, and those responsible for pushing the claims of Egypt should have an almost world-wide organisation and be prepared to spend several thousand pounds per annum on the work, and should receive substantial assistance from the Government, which is equally interested in the question. As a matter of fact, Egypt is in an ideal position in this respect, for both her neighbours, the Sudan and Palestine, are, so to speak, in the same boat. The campaign to promote the tourist traffic of Egypt could be made to do the same for those two countries, and not only could the expense be shared, but the organisation by having this triple backing could be made all the more comprehensive.

The other suggestion is that, having got the tourist here, every effort should be made to use him as a propagandist agent. That is to say, every facility should be afforded him, and prices (travelling, hotel and otherwise) should be of such a nature as to strike him by their moderation. I mention this because I know for a fact

that during the past season the tourists who came here were so staggered by what they had to pay that they said they would never come again, and we can be sure that the account of their experience would not be such as to attract others in subsequent years. The Egypt Promotion Association will therefore have to go very carefully into the question of hotel and other charges; otherwise they will find that their efforts to attract visitors are being stultified by the treatment the latter receive when they come here.

Fatal Flying Accident.

Another regrettable accident took place this week at Heliopolis when a D.H.10 crashed and killed the pilot. This is the eighth fatal accident which has occurred in the Command within the last month or so, and the very regrettable feature about these fatalities is that the officers killed have all been men of great promise and distinguished service.

YUGOSLAVIA.

ZAGREB, June 16.

King Peter's Illness.

The King's illness is causing a great deal of uneasiness, in spite of the more favourable bulletins which are being issued. His Majesty's age, his indifferent health for the past seven years or more, the sufferings and strain of the war, retreat and exile, all tell against the final recovery of the Royal patient, and the most that can be hoped for is but a temporary recovery, although, it is true, seventy-seven is no great age in the Balkans, where tough veterans of well over eighty are by no means rare—witness the irrepressible M. Pashitch himself. But the whole Royal family have been summoned to the bedside, including the King's brother, Prince Arsen, with his son, Prince Paul, as well as the Crown Prince, Prince George, and Princess Helena.

Apart from the question of personal devotion to the aged warrior, his death before the passing of the Constitution would materially increase the difficulties of the Government, for it would involve a modification of the clause establishing the constitutional monarchy with King Peter as the founder of the Karageorgevitch dynasty of the united kingdom, and specific mention of Prince Alexander as sovereign in his place. It must be borne in mind that there is a Republican Party at Belgrade, which, though small, is not unimportant. The Socialists, of course the Communists, and, above all, Raditch's Peasant Party, too, are all against a monarchical form of government. King Peter has struggled so long and fought so hard for the national cause, that it is devoutly to be hoped that he may be spared to see the Constitution passed, and the final legalisation of the great work of union to which he has contributed so much.

But it is too much to hope that he can be spared for long, and then the question of the succession will at once arise; for Prince Alexander, of course, is unmarried and has no direct heirs. The papers last year mentioned as a possible successor the nine-year-old son of Princess Helena, the Regent's sister, whose father, the Grand Duke Constantine, was murdered by Bolsheviks. Another candidate would be Prince Paul, son of Prince Arsen, younger brother of the King.

The Political Situation.

The political situation, outwardly at least, seems calm; but, unfortunately, it is probably the calm that precedes the storm. The position of the Coalition Government is far from strong. The Radicals and Democrats combined are not strong enough without the support of some third party; hence their flirtation with the Mohammedans, who are vigorously exploiting the position to their own advantage. They keep on withdrawing, or threatening to withdraw, unless M. Pashitch gives them more concessions, each of which alienates another section of opinion, such as the Agriculturalists, the Radicals of Bosnia, and the Democrats of the Voivodina, several of whom have already withdrawn from their political clubs. All the opposing parties have either left or are about to leave the Constituent Assembly, which will embarrass the Govern-

ment, who may have difficulty in finding a quorum to carry the resolutions, even if they have no opposition to vote against them.

The Yugoslav Club has issued a manifesto justifying its withdrawal, in which it claims a constitution by agreement, and not by mere majority. If M. Pashitch succeeds in getting his Constitution passed, it is difficult to foresee what will take place if nearly half the country refuse to accept the ruling of the majority and repudiate the Constitution. There is, of course, always the possibility of employing force; but it is unlikely that so artful and experienced a politician as M. Pashitch would resort to such an extreme measure; for it would create a definite breach and divide the Yugoslavs for ever into two hostile camps; whereas to-day there is but a difference of political opinion.

Relations with Italy.

From time immemorial the southern Slavs have been addicted to fighting among themselves like Kilkenny cats, but they close up their ranks against a foreign enemy. Tradition, it is true, persists that Vuk Brankovitch deserted with 10,000 Bosniaks at the fatal Battle of Kossovo, though modern research tends to discredit the popular belief. But if there were a foreign enemy on the scene to-day, it is certain that the Yugoslavs would forget their squabbles, unite against the foe, and then resume their domestic squabbles. One cannot help thinking that the inertness of the Powers in the face of d'Annunzio, and their helplessness in the face of a Zeligowski and a Korfanty, is a dangerous lesson to a high-spirited people who have maintained so dignified and correct an attitude in the face of extreme and prolonged provocation at Fiume. The Croats are indignant at the injustice of the present position of that problem, just as the Slovenes bitterly resent the handing over of nearly half a million of their Nationals to Italy. Here we have tempting opportunities for a military adventure; one that would be popular with all branches of the community, and have a strong justification, with every hope of success. If it were to come to a serious internal division, it is very probable that the authorities would risk a military adventure to distract the attention of the people from home troubles.

The Name of the State.

The domestic problem may be summed up in a very few words. Is it to be S.H.S. or Yugoslavia? This question of the name of the State is the very embodiment of the two opposing currents of opinion. M. Pashitch made a vital question of the name of S.H.S., the Kingdom of the Serbs, Hervats and Slovenes. The Yugoslavs look upon this as a continuation of his policy of a "Greater Serbia" thinly veiled, and object to it. They maintain that in a people so addicted to exaggerated individualism and particularism the mere recognition of the existence of three names is bound to encourage the spirit of provincialism, which is a great danger, while the name of Yugoslavia implies a complete and absolute union with no question of distinction nor of hegemony of any one branch.

There can, of course, be no question of the union being affected. This is an accomplished fact, recognised by the Powers and embodied in the peace treaties. Probably even Raditch recognises this fact, and in his press he always speaks most affectionately of the "brother Serb." But the Slovenes and the Croats will decline to be dictated to by Belgrade, and insist on some form of federalism, with really practical autonomy. Resentment is felt at the idea, attributed to France, of forcing the country into a Danubian Confederation, which would be a kind of revived, half-baked Austria-Hungary again, and the Yugoslavs would resist this. On the other hand, they will listen to an expression of opinion from the United States, where the Yugoslav colony is very numerous, and almost entirely from the Croatian side; for Serbs from the old kingdom were so contented at home that they very rarely emigrated. The colony in America is chiefly from Herzegovina and Dalmatia, where the rocky country could scarcely support its vigorous and manly population. Even in prosperous Croatia, in most villages there are two or three peasants who have learnt to speak some English in America. This colony is by no

means indifferent to home politics, and its influence is in favour of federation. It is interesting in this connection to note that the Government has prohibited the import of Yugoslav papers in Croat and Slovene appearing in Chicago and other American cities. Washington cannot turn a deaf ear to the voice of this colony.

ROUMANIA.

BUCHAREST, June 8.

In Parliament.

In the Lower Chamber the discussion on the agrarian reform proposals has continued, and has produced some not uninteresting comments. The extremists argued that in the interests of national economy all the arable land of the big landowners should be expropriated, alleging that the peasants are not willing to work on landlords' farms. The Moderates demonstrated that after the application of the law only half-a-million hectares out of a total arable area of eight million hectares in the Old Kingdom will be left to the present landlords; and they argued that it would be a great mistake to abolish the landlords' class, who still have very important functions to perform. Again, even if the half-million hectares were distributed, that would not suffice to provide each peasant with land; there would still be a peasant proletariat, unable to find work except on landlords' farms. Moreover, the landlords, restricted to only 250 hectares, will be driven to intensive cultivation, to the great benefit of the country. The question of price and method of payment for the expropriated land is keenly debated.

In regard to the Financial Reform measure the Liberal Party has announced that it will not discuss the reforms until the Government has reduced expenditure to the lowest possible level. M. Stere, Bessarabia, suggested that the burden must not fall entirely on the taxpayer; the State should nationalise oil, take over the National Bank, and create some more monopolies.

The Senate has been occupied with the Control of Education Bill, which it has passed. It has also ratified the commercial treaty with Czecho-Slovakia.

Party Manœuvres.

The Federationist group shows signs of dissolution. The Transylvanian Party were invited by the other components of this group to amalgamate into one strong party, but this they declined to do. The National Transylvanian Committee, composed of 122 members, held a congress at Cluj, decided not to amalgamate with any of the parties of the Old Kingdom, and reserved to themselves freedom to collaborate with any future democratic Cabinet. At the same time they condemned the activity of the present administration, appealing to the King to dismiss the Government and to transfer the power to a national democratic Cabinet. Until that is done the Transylvanians will continue their Parliamentary opposition with the Federationist group.

Various.

The King and Queen paid a short visit to Alba Julia, Transylvania, to see the progress of the preparations for the coming coronation celebration. At her Majesty's suggestion several important alterations will be made.

The Crown Prince of Japan is expected to arrive in Bucharest in the course of this month, to return the visit paid by Prince Carol in Tokio.

The Minister for Foreign Affairs (M. Take Jonescu), accompanied by M. Derussy (Secretary-General of the Ministry), left for Belgrade to sign the treaty recently concluded between the two countries. They will also endeavour to bring about a satisfactory arrangement as to the delimitation of the Banat frontier.

A fresh Communist outrage has been perpetrated in Bessarabia. A railway bridge was undermined with dynamite, and an explosion took place as the train crossed the bridge. The locomotive, two passenger coaches, and five freight cars were completely destroyed, causing many casualties. There were five dead and eight severely wounded. The criminals placed a red flag on the bridge.

GREECE.

ATHENS, June 5.

The Political and Military Situation.

Mustapha Kemal's reported decision to defy the Allies and throw in his lot with Moscow is considered here a splendid omen for this country. The Greeks say that not even the most ardent Philhellene could have helped their cause so effectively as has the Dictator of Anatolia by his reckless action. A political and military alliance between Great Britain and Greece is now considered an absolute certainty, and the Athens Press is giving us news daily of combined action of the British and Greeks in Asia Minor, of an imminent Greek occupation of Constantinople, and the continuous dispatch from British ports to Smyrna of boatloads of ammunition and other war material. One paper—the *Nea Himerá*—went so far as to publish a photograph of the King under which appeared the following wording:—“Constantine XII., King of the Hellenes and Commander-in-Chief of the Anglo-Hellenic forces in the struggle against the Turk!” Optimism is once again running high, the English are everywhere termed “our glorious and powerful allies,” and the drachma has improved considerably. Rumours of the King's recognition by the Great Powers are again rife, and much importance is attached by the public to the visit by His Majesty's Grand Marshal, M. Merkatis, to the British capital. His Majesty's departure for the Asia Minor front has now been definitely decided, and the new big offensive will, to all indications, commence immediately after he has inspected the troops.

Meanwhile the National Assembly is wasting its valuable time in purposeless deliberations, such as Constitutional reforms and the compensation of the so-called victims of the Venizelist régime. The deputies of the Liberal Party, maintaining that this was not the proper time to discuss the latter question, when the nation was facing so many dangers and the financial position of the country was so serious, informed the President of the

Chamber that they had decided to abstain from participating at the sittings of the Assembly at which the project was discussed. The *Athenae*, an independent paper, edited by the well-known deputy, M. Pope, says that the number of applications for compensation which the Government has received up to the present amounts to 22,000, the total amount claimed representing over one thousand million drachmæ!

The King's Name-day.

On the occasion of the King's Name-day (St. Constantine's) a Te Deum was held at the Cathedral on Friday in the presence of the Royal Family, the Council of Ministers, the State officials, and the Foreign Missions to Greece. The foreign diplomatic corps was represented by the Spanish and Roumanian Ambassadors. King Constantine was enthusiastically applauded by the crowds both on his way to and from the cathedral. At night a torchlight procession was organised by the Municipality of Athens, and gala performances were given in most of the theatres.

General News.

The union of the Political Syllogues, as well as the Syllogue of the victims of the Venizelist "tyranny," had decided to organise a demonstration in Athens last Sunday in favour of the release of Tserepis and Kyriakis, who had attempted to assassinate M. Venizelos in Paris last August. This demonstration, however, was not allowed to take place by the Prefect of Police.

According to a telegram received from Adrianople, the trial by court-martial of the nineteen Mussulman conspirators arrested in that town has come to an end. Nine of these were condemned to death, three to two years' imprisonment, and the remaining nine were acquitted.

ATHENS, June 18.

The King's Departure.

Last Saturday afternoon King Constantine, accompanied by the Crown Prince and Princes Andrew and Nikolas, left Phaleron for Smyrna on the cruiser *Lemnos*. On Saturday morning a prayer was offered at the Cathedral for the victory of the Hellenic Armies. The religious ceremony, which was attended by King Constantine, the Queen, and all the Princes and Princesses, was of an exceptionally solemn character. When the Bishop of Athens bestowed his blessing on the King and wished him "God speed," there were tears in the eyes of the latter. On leaving the Cathedral, his Majesty was hailed by the waiting crowds with shouts of "To Constantinople" and "Long live the successor of Paleologos."

Prior to his departure, the King issued the following proclamation:—

I am departing in order to place myself at the head of my Army at that place where for centuries Hellenism has continued to struggle. With the aid of the Almighty victory will crown the struggles of the race which is advancing impetuously to accomplish its mission. Our predominance over there to-day will assure, as in the past, the predominance of our ancestors assured, the realisation of the very highest ideals, of Liberty, Equality, and Justice. Our Armies are guided by the whole history of our race. A history of admirable civilisation which imposes obligations the seriousness of which we are very deeply conscious. We have the right to proclaim our entire ability to accomplish these duties. It is the Greek people who, by its sacred union and incomparable sacrifices, gives us this right.

Confident in divine help, in the dash of my heroic Army, and in the unshakable moral power of the Hellenic "Idea," I am going where the supreme will of the nation is calling me.

Commenting in a leading article on King Constantine's departure, the *Athenae* says that this is an official declaration of Greece to the effect that the territories which have been occupied by the Hellenic armies will never again be abandoned, and that the restoration to the enemy of the territories to be occupied will serve as a compensation for the ratification of the Hellenic rights on Constantinople and the Pontos.

In Memory of the Last Greek Emperor.

On Sunday last (May 30, O.S.) a service was held at the church of St. Constantine in memory of the last Emperor of Byzantium, Constantine Paleologos. Certain of the Ministers and Deputies, the Mayor of Athens, the Principal of Athens University, and many other state officials attended the ceremony. A service

in memory of Constantine Paleologos was also held at Adrianople in the presence of the Governor-General and the civil and military authorities. After the service a telegram was despatched to King Constantine at Smyrna wishing him a triumphant entry into Constantinople.

General News.

Queen Sophie has proceeded to Salonika in order to inspect the military hospitals and the encampments of the Caucasus refugees. Her Majesty is accompanied by Prince Paul.

A telegram was received the day before yesterday from Munich announcing the death there of Demetrius O. Calapothakis, the editor of the *Embros*, one of the oldest Athenian papers.

The Minister of War has called up all the Greeks of Asia Minor belonging to the 1910-1921 classes.

BULGARIA.

SOFIA, June 18.

The Government and its Critics.

Although no new Ministerial appointments have yet appeared in the *Official Gazette*, it is generally understood that a rearrangement of the Cabinet has been made. This rearrangement centres round M. Dimitroff, formerly Minister of the Interior, and latterly nominated as Minister to Washington. As I have already stated, in my letter of April 27, M. Dimitroff did not wish to go to America, and when he returned from his visits to Prague and Belgrade the Cabinet had to face the situation and come to some decision on the matter. After a somewhat heated discussion, it was decided that he should become Minister for War—a post hitherto held by M. Stambolisky, the Prime Minister—while M. Athanassoff, Minister of Railways, should succeed him at the Ministry of the Interior, and M. Boteff, President of the Sobranje, would become Minister of Railways.

As M. Dimitroff is not at all popular with a number of the Agrarian deputies, there was a good deal of opposition to this re-shuffling of the Cabinet, and some of the deputies went so far as to threaten withdrawal of their support from the Government if M. Dimitroff remained a Minister. It seems, however, that M. Stambolisky—to whom M. Dimitroff, an essentially strong character, is very necessary—managed to conciliate the deputies in question. But it is possible that we have not yet heard the last of the subject.

The rearrangement will place MM. Dimitroff and Athanassoff in a very strong position, and there is in the Cabinet itself a group which views with mistrust the power that this combination is attaining. This group is in its infancy, so to say, but it has at its head M. Radoulloff, Minister for Justice, and a very capable and upright politician. He will very probably be supported by M. Tourlakoff and M. Draghieff, who, although not in the Cabinet, commands a certain following. Among the deputies who are opposed to M. Dimitroff are two well-known Agrarians, MM. Thomoff and Manouloff; so it will be seen that the opposition is not lightly to be ignored.

All this cannot fail to have its influence upon the Opposition parties, and to lend them encouragement; but M. Stambolisky, with his well-known powers of persuasion—peaceful and forceful, as occasion may require—should be able to clear the air once again, and to bring his recalcitrant followers back to the fold. Whatever his critics may say, it would be a bad thing for the country if M. Stambolisky were to fall from power just now, for there are too many cross-currents in the political world to permit of the formation of another Cabinet, without him at its head.

General News.

An Italian-Bulgarian Fête is being celebrated here to-day.

The marriage of the daughter of M. Stambolisky to M. Boyadjieff, Secretary to the Bulgarian Legation at Paris, will take place next week.

The Reparations Commission has now practically completed the revision of the Budget, and at the end

Speed up your Tapping & Drilling Operations.

Every time a machine is stopped for changing a tool, so much time is taken up which can be utilised in uninterrupted production by employing :—

WAHLSTROM AUTOMATIC DRILL CHUCKS.

Tools can be instantaneously changed without stopping the spindles, and are centred automatically.

The tool cannot slip, consequently the shanks are never damaged, the design of the chuck being such that the greater the resistance the greater the grip.

No collets, sockets, keys or wrenches are needed.

Various sizes standardised to take tools from 1½" diameter down to 0" and suitable for either straight or taper shanks.

THE WAHLSTROM AUTOMATIC TAPPER.

Automatically introduces the oscillating movement of Hand Tapping so necessary with hard materials to avoid numerous tap breakages, *but at ten times the speed.*

There are no springs to get out of order, the movement being absolutely mechanical.

← A turn of this knob immediately produces continuous rotation for tapping soft materials.

Reverse motion for withdrawing the tap is automatically and instantaneously secured at increased speed on raising the spindle.

Made in two sizes :—

½" to 1" fitted with No. 2 and No. 3 Morse Taper Shank.

1" to 1½" fitted with No. 3 and No. 4 Morse Taper Shank.

Full particulars upon application to :—

AMERICAN MACHINE & FOUNDRY CO., LTD.,

of the month the Government will consider the criticisms and alterations suggested, which are believed to be very numerous.

TURKEY.

CONSTANTINOPLE, June 15.

A Brilliant Occasion.

The review of the British Forces of Occupation held last Saturday in honour of the King's Birthday, although somewhat belated owing to the absence of General Harington, was one of the most successful affairs of its kind that has been seen in Constantinople since the Armistice. Of course, all the "High Life" was present, and considerable enthusiasm was evinced when Admiral de Bon was presented with the insignia of his British Orders in place of the originals, which were unfortunately destroyed. The general smartness of the British military and naval forces awakened universal admiration, the artillery and the mounted band of the 20th Hussars attracting especial attention. The only regret was that there were not more of them.

The Recoil.

The most eloquent testimony of the insincerity of Kemalist propaganda has been afforded by the Kemalists themselves; for no sooner had it become possible that the British Government might reconsider the proclamation of neutrality than the Kemalists quite forgot that they had been loudly asserting the unreality of that neutrality and promptly changed their tune. It would, nevertheless, be extremely unwise to believe that the Angora camarilla is prepared to come to a peaceful arrangement with the Allies. It is true that ten British subjects have been released, but for the release of the rest the liberation of the war criminals is demanded, in addition to that of the Malta internees, as specified in the agreement concluded with Bekir Sami Bey. A similar game is being played with the French and the Italians; for the agreements concluded with both those Governments have been rejected by the Great National Assembly, and new proposals are to be put forward for discussion. It is the ancient stock-in-trade of Turkish diplomacy to play for time when hard pressed, and the Kemalists are proving themselves adepts in that particular line. The general lines of Kemalist policy are now perfectly clear; for despite the rabidness of the campaign against the British in the Anatolian Press, it has become clear that the Angora Administration was seriously perturbed by the possibility of a reversal of British policy in regard to the conflict with the Greeks. The principal preoccupation of Kemalist diplomacy at the present moment is to prevent the Allies—and Great Britain in particular—from assisting the Greeks, who, it is confidently believed, will sooner or later be driven from Anatolia if left to themselves. Once the Greek army is out of Anatolia, the Kemalists consider that the Allies may be defied with impunity, as neither singly nor collectively would they undertake another war which would involve the employment of a considerable army. So long as there is a Greek army in Anatolia, the Allies—or the British, at least—possess a hammer which, if wielded by a powerful and skilful arm, could be utilised with deadly effect, and against which the only ultimate defence would be an appeal to the Red armies of Soviet Russia. This would by no means suit the book of Mustapha Cromwell, who is determined to keep his "friends" at arm's length, treaty or no treaty. His "friends" would prefer to see him burn his boats as soon as possible, and very nearly succeeded recently, but the deluge of warnings sent to Angora from Constantinople and Europe brought about a sudden realisation of the danger, and resulted in the quick recoil of the past week.

The Central Government.

Following the example of their friends in Angora, the Central Government has remodelled itself. The Stamboul Cabinet is now about as pro-Nationalist as any Stamboul Cabinet could be, with the gratifying result that at last the Allies have some slight lever enabling

them to exert pressure upon Angora. For although the Kemalists have recorded their indifference to Stamboul, except as a "city containing a few monuments of a glorious past, and a few souvenirs, some bitter and some sweet," there is not the slightest doubt that many a sigh is breathed in secret for the perfumed gardens of the sapphire Bosphorus and the aesthetic delights of Tokatlian's and the Pera Palace Hotels. Besides, under the Tewfik Pasha administration, Stamboul has become quite a useful and important ganglion of the Nationalist organisation. Not only is it a most valuable centre for information and correspondence, but advantages of a more material nature are procurable now that a friendly administration is in power and the Allies are neutral. There is, therefore, good reason to believe that the Angora administration would prefer to avoid a change in the present state of affairs, if possible, which, as already remarked, gives the Allies rather more "pull" than they had before, when Damad Ferid Pasha was Grand Vizier of the Bosphorus.

Offensive Prospects.

King Constantine has gone to Smyrna, and it is widely believed, mostly by the Greeks, that an offensive is going to be started very soon. The Turkish Press is almost on the verge of hysteria with anticipation, and asserts every day that the Nationalist army is absolutely confident of victory. The Greeks (*genus* Constantinist) declare that the King has been received with the utmost enthusiasm in Anatolia, and are trying hard to persuade themselves and the rest of the world that this time the British will be behind them and with them. The Turks stoutly refuse to believe that the British could possibly take such a grave step because of such a trifling incident as the piratical and murderous attack upon the s.s. Palatina. The controversy is not only amusing, but somewhat flattering so far as the British are concerned. Whether the advertised offensive is imminent or not, King Constantine himself is probably the only human being who could say—if, indeed, he has any idea. The truth of the matter is that neither side is able to contemplate an offensive with moderately certain chances of success.

Allied Policy.

Despite the wide divergences in regard to the Turkish question that have grown up among the Allies since the Armistice, there can be little doubt that neither the French nor the Italians would care to relinquish the very valuable economic and commercial advantages conferred upon them by the Treaty of Sèvres. The Nationalists will certainly not agree to the clauses in question at the present moment, and if they agree to negotiate it is only with the object of gaining time, as explained above. On the whole, it may not be disadvantageous to the Allies to give them what they want; for in spite of appearances, the Allies are now in a stronger position than they were last December. The Kemalist belief that they are capable of driving the Hellenic army out of Anatolia may be regarded as a complete illusion, although the Hellenic army, in its turn, is incapable of driving the Kemalists back to the Persian frontier—if, indeed, beyond Eskişehir. At the same time, however, there can be little doubt that the strain of the financial and economic position is beginning to tell upon the Nationalists, and it is apparent that they are only able to maintain their armies in the field by the most extraordinary efforts. Thus, as time goes on, the position of the Allies is likely to become stronger without their being obliged to take any very exceptional measures against the Nationalists, in concert with the Greeks or otherwise. The Greeks are unlikely to throw up the sponge for a multitude of reasons, but their position is also becoming increasingly difficult. Hence it is possible that the time is approaching when both sides will reconsider their first verdict concerning the proposals made by the Allies at the London Conference, and, for once in a way, the policy of masterly inactivity which has distinguished Allied policy towards Turkey since the Armistice will have scored a success. Certainly, to attack the Kemalists at the present moment would be to play the Bolshevik game, and would be a grave mistake, despite the provocation received.

CORRESPONDENCE.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

INDIA IN THE EMPIRE.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Surely the first step in the consolidation of the Empire is to recognise the solidarity of the British race wherever found. The British made the Empire and only the British can maintain it. Without the British the Empire falls to pieces. You cannot build upon a lie, and until we recognise and give due weight to this self-evident truth, all thinking and talking about Empire is vain.

The position of India is entirely different. Whatever unity India has she owes to the British. Before the British took charge of her, India was simply a writhing, struggling mass, torn by internecine warfare and bruised by cruel invasions. The British healed the wounds, improved her communications by roads and railways, and gave her a common language, that English language which was the only language understood by all the Members of Parliament at Delhi.

Moreover, India cannot defend herself. She lies open to invasion from the Afghans and Pathans on the north-west and from the Ghurkas on the north-east, and many of the finest regiments in her army are recruited from potential enemies. The magic of the British name, the personality of British officers subdues these fierce barbarians, but what would be the fate of an Indian Colonel who took command of a battalion of Pathans? These things should make India modest. "Educated India," as it is called, is but a drop in the ocean (less than 2 per cent.) of the vast multitudes who populate the sub-continent; and, if we are to hand over the government of these multitudes to "educated India," that government will rest not on the consent of the masses, but on the bayonets of British soldiers. The thing is a sham.

How great a sham it is is shown by the fact that the planters in Behar are at this moment in terror of their lives. A rising is imminent. The Behar Light Horse have been warned for duty. The planters have been advised to send their wives and children out of the province. The Government are making preparations (though, apparently, they do not realise that the British in the outlying plantations are in a trap) to suppress the insurrection, and are hoping, perhaps against hope, to prevent it from occurring. But during the last two years this sort of thing has been constantly happening. I met the other day a young Englishman who, with his partners, had narrowly escaped being murdered by their coolies in Orissa—two other planters, neighbours of theirs, had actually been done to death. Indian women can go anywhere in England in perfect safety, free from violence and free from insult.

That is because England is a civilised country. Englishwomen in India have to fly for their lives for fear of insult and violence and death and worse than death. That is because India is still in many respects a savage and barbarous land. How can there possibly be real, genuine equality between India and the Dominions? It may suit the politicians to believe a lie, but it will not suit the people of Britain, nor of the Dominions, nor of India herself.—I am, etc.,

C. POTNTZ SANDERSON.

3, Clarence Parade, Southsea.

GREEKS AND ALBANIANS.

To the Editor of THE NEAR EAST.

Sir,—The Greek newspapers are bitterly attacking the Albanians for a supposed aggression of the Albanian population of Kortha (Koritsa) against the so-called Greeks of that city! Their fertile imagination is fabricating fights and murders, pillage and violence, fire and oppression!

They are far from truth, and they know it. It was natural enough that the Christian Albanians of Kortha should want the service in the Church to be conducted in Albanian during the Passion Week and Easter, Sunday. But Bishop Yakovos, who has been working hard as a Greek political agent in Kortha, objected to it. The Albanians insisted, and the Bishop had to give in. Then two Albanian priests, recently come from America, conducted the religious service in Albanian. No fighting took place, neither had the Albanian officers or the Mohammedan population of the city anything to do with this affair.

The Greek newspapers now ask for "the restoration of the Greek Church to the Greeks of Koritsa." They also write: "The Albanian Government is recruiting soldiers from the Greeks of Durazzo and Tirana." Up to now the Greeks have been content in claiming that Southern Albania (or Northern Epirus, as they call it) is inhabited by Greeks, but now they go further; they tell us that Tirana and Durazzo are peopled by Greeks, too!! As a matter of fact, there is not a single Greek in Kortha and Tirana, and only one Greek (a cigar maker by profession) in

Durazzo; but there are Orthodox Albanians (i.e., having the same religion as the Greeks, but of Albanian nationality) in all three towns.

The Greeks know it very well, but they do not want to put any difference between nationality and religion as regards the Orthodox Albanians. If all Orthodox Albanians must be Greeks, why should the Roumanians and the Russians not be Greeks? They, too, are Orthodox by religion. It is, of course, absurd to maintain that religion determines the nationality of a people.

It is true that the Orthodox Church of Albania is still under the Greek Patriarchate of Constantinople, as it was during the Turkish régime in Albania, but this does not at all show that the Orthodox Albanians are Greeks. We (Orthodox Albanians) are trying to—and shall—have an independent Church of our own, as the Roumanians, the Serbians, and the Greeks of Greece proper have. Why should we not?

Let not the Greeks try to deprive us of our nationality just because we are weaker. We have done much for them in the past; let them be grateful for it.

Hoping you will have the kindness to give this letter of mine a place in your honourable paper.—I am, etc.,

VASIL ANDONI.

Robert College, Constantinople, May 30, 1921.

THE SITUATION IN ANATOLIA.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—Amidst the unhealthy excitement brought into being by propaganda, military operations, and the insidious direction of public opinion into channels of passion and prejudice, peoples' minds are apt to warp, the imagination is distorted and wrong perspectives are gained. Such, evidently, is the case with Western Anatolia. The European Press has been furnished with minute details of the barbarities committed by the Turks, their misgovernment and their callous treatment of subject races. On the other hand, we have occasionally read harrowing accounts of the misery and destitution into which numberless Moslems have been plunged as a direct result of the Greek occupation. The vicious circle is thus maintained while, apparently, the situation viewed from a common standpoint of the inhabitants—Christians and Moslems alike—is entirely lost sight of or else deliberately ignored.

Now, what is this situation, and how does it promise to develop should the lines presently followed be persisted in?

One and all, I believe, will agree in defining the present state of affairs as deplorable. Smyrna, hitherto an important and prosperous trade centre, is presently comparable to a once healthy but now broken down athlete who has seen better days, and who still continues to live in the past. That part of the city's natural hinterland which has been redeemed (sic) is wallowing in a slough of uncertainty and unrest, while beyond the Greek zone we have the Nationalist administration which, naturally, is blind to everything but its immediate military requirements. Such, briefly, is the actual state of affairs. The future rises gloomy and threatening from amidst this chaos.

Assuming even the total realisation of one party's aspirations, it is difficult to admit that this will provide a solution calculated to serve the best interests of the country. For to impose by force of arms as a ruling caste those who for centuries have been a subject race is an experiment gratifying to political and military leaders, but assuredly doomed to failure. Yet it is clear that the present tendency is forcibly to establish a state of affairs wherein the Moslem will be obliged to choose between emigration or domination by his quondam *Rayah* subjects. History indicates that he will choose the former alternative, and this, it is feared, is the consummation mostly desired by the rulers elect.

On the other hand, the pressure of Moslem thought leans towards the rehabilitation of the Turk and his firm establishment and consolidation in Asia Minor. This pressure is a hard fact, and may not be ignored, but the prospect of the complete attainment of its objective will awaken apprehensions in all thinking men whose experience of purely Turkish administration is ripe and free from prejudice.

The clash of these two currents, ambitions or ideals—call them what you will—has assumed concrete form on the battle fronts of Western Anatolia. Turk and Greek—Moslem and Christian—are in the throes of a death struggle, while, outside the ring, their respective supporters are actively engaged in stimulating the energies and moral of the combatants. Unhappily, however, in all this excitement—in the heat of this supreme effort—not a moment's consideration has been devoted to the state and condition of the arena.

The contemplation of the struggle in this light awakens feelings of the deepest concern. Impartial observers of current events out here are unanimous in concluding that a continuation of the struggle will inevitably bring about what both parties commenced by averring it to be their sole object to avoid.

The entire country is being ravaged; whole villages are being sacked, and the clock of progress and reconstruction has already been set back many years.

Such is the irony of human inconsistency, fostered by military ambition and political greed, that each combatant is now openly declaring that the victor shall come into a heritage only of lands laid waste and populations massacred or dispersed and utterly destitute.

May not the force of these arguments be brought home to the adversaries? Or have the lessons taught by the great war failed to prove a deterrent from this sinful system of resorting to arms with all its accompanying misery and distress?—I am, etc.,
DISILLUSIONED.

Smyrna, June 16, 1921.

EGYPTIANS SUPPORT ZAGHLOUL PASHA.

We have received from H.H. Prince Aziz Hassan a telegram dated June 24, stating that a meeting, over which he presided, was held in Cairo on June 21, and was attended by many thousands of people, including Ulema, representatives of the Christian communities, notables, merchants, lawyers, doctors, officials, and others. The meeting was held in honour of various officials who had "shown courage and firmness in defending liberty." It also expressed confidence in Zaghoul Pasha, and passed several resolutions. One of these resolutions expressed lack of confidence in the Ministry, and protested energetically against "its arbitrary acts in connection with officials, which threatened their liberty." Another expressed mistrust of the Official Delegation, "formed against the will of the nation and unable to represent it." The third expressed confidence in Zaghoul Pasha's Delegation, and others protested against officials of the Administration signing expressions of confidence in the Government and against attacks made upon peaceful citizens during the demonstrations of last May.

THE ROYAL SOCIETY OF ST. GEORGE.

On Wednesday, June 22, an inaugural luncheon was held of the City of London branch of the Royal Society of St. George. The Society, of which H.R.H. the Prince of Wales is president, was founded in 1894, with, amongst others, the object of encouraging and strengthening the spirit of patriotism amongst all people of English birth and origin throughout the world, of furthering English interests by every possible means, of promoting and encouraging the physical culture of the English people.

Mr. Stanley Machin, J.P., chairman of the Executive Council, was in the chair, and the guest of honour was the Rt. Hon. Viscount Birkenhead. After the usual loyal toasts had been duly honoured, the Vice-Chancellor proposed the toast of "England." In the course of a witty and forceful speech, the Lord Chancellor remarked that he was not one of those who held and expressed pessimistic views of the future of the Empire in general and England in particular. He likened our country to a human body recovering, after a very severe operation, from the mercifully deadening effect of the anæsthetic. As it struggled back to a consciousness of its normal life, it was racked and stabbed by the agonising pains of industrial unrest, bad trade, and the dying attacks of the disease which had lately threatened its existence. A study of our country's history, however, showed that we had successfully weathered worse crises before, and he felt sure that the final historian of our times would record that our generation had handed down to its successors the fair name of our Empire certainly unsullied and possibly a little embellished.

EGYPTIAN ANTIQUITIES.

An exhibition of antiquities discovered at Tell-el-Amarna during the excavations organised by the Egypt Exploration Society during the winter of 1920-21 will be held in the rooms of the Society of Antiquaries at Burlington House from July 5 to 13 inclusive. It will be open free to the public daily from 10 a.m. to 5 p.m. Tell-el-Amarna, the capital of Akhenaten, the monotheistic king of Egypt, who reigned about 1370 B.C., was being excavated by the Germans before the war, and many valuable and interesting specimens of the peculiar art of the period were found by them. The site has now been given to the Egypt Exploration Society, and their first post-war expedition was superintended by Prof. T. Eric Peet, the holder of the Brunner Chair of Egyptology at Liverpool. Prof. Peet will give a lecture on the season's work in the rooms of the Royal Society, Burlington House, on Thursday, July 7, at 8.30 p.m. Further information can be obtained from the Secretary, Egypt Exploration Society, 13, Tavistock Square, W.C.2.

The statement regarding the replacement of M. Karadjoff, Director of the Consortium, by another deputy is hereby contradicted.

PRESS ON THE NEAR EAST.

Italy and Asia Minor.

An article in the *Glasgow Herald* of June 10 deals with the withdrawal of Italian troops from Asia Minor, which, it says, amounts to an abandonment of the Italian position under the Treaty of Sèvres; and the policy of conciliation, as consummated in the agreement between Bekir Sami Bey and Count Sforza, is shown to be futile as applied to the Turks.

It is possible that in due course, apart from anything a Greek offensive may or may not achieve, a joint Franco-Italo-British naval blockade may curb the arrogance of Kemal and his associates. But Angora propaganda to the effect that France and Italy have been expelled from Asia Minor will undoubtedly create an impression in the world of Islam which no naval demonstration short of laying Stambul in ruins is likely to obliterate. Our own sole consolation—a somewhat selfish one—is that although we too are closely involved in the Turkish tangle, we have not at any rate made the mistake of definitely occupying any part of Asia Minor, and are consequently unhampered by the necessity of having at a critical juncture to decide between an undignified evacuation and the costly despatch of heavy reinforcements.

Serbia, France and Bulgaria.

Our Sofia Correspondent sends us the following free translation of an article which appeared in the Bulgarian journal, *Preporetz*, the organ of the Democrats. It is in reference to M. Picot's speech, a brief report of which was given in THE NEAR EAST of June 2.

At this moment, when people are talking of a new phase in Serbo-Bulgarian relations, it is not without interest to reproduce what is written in one of the most influential Belgrade newspapers. The subject is the remarkable speech which the French Minister, M. Georges Picot, made at the opening of the French Chamber of Commerce at Sofia on May 19, in which he did not hesitate to announce that the Allies wish for peace in the Balkans; that they will not allow anyone to violate this peace; and, finally, that France and Bulgaria will work together for the establishment of peace in the Balkan peninsula.

In commenting on this speech, *Tribuna* (the Belgrade paper in question) is frankly grieved that France, instead of looking to Serbia and her other Balkan Allies for assistance, casts her eyes on a country which until yesterday was an enemy of them all. The paper writes:—"For us here in the Balkans we must take it, after these announcements, that the French Republic has looked far and has found in the Bulgaria of to-day a true and loyal helper in her Balkan politics. From this, we, the rest of the Balkans, must draw the logical conclusion. It is true that everyone has the right to choose his friends and allies as he pleases, and we make no objection against the choice of Bulgaria by France, as that is a matter for her diplomacy and her interests. But all the same, we cannot preserve silence when an official makes declarations in the name of his Government—declarations like these that greatly affect us."

"We Serbians are hurt by these declarations from the French Government, for France must know that it was Bulgaria who disturbed the Balkan peace. It is a very odd fact that the diplomacy of one of the most important countries of human freedom should regard the 'bloody and untruthful Bulgaria' as her help and ally in order to make peace in the Balkans. We are being disillusioned about France, and she is sinking in our estimation. For some time we have felt in Serbia that our French friends have changed their attitude towards their faithful Serbian ally. In connection with this it may be noted that a very important and widely-read Swiss newspaper recently stated that

the Great Powers were treating their small Serbian allies like a poor orphan. Until the present moment we have regarded this as a temporary lapse. To-day, however, we cannot pass over the sad fact which the disloyal and unwise tying of knots with treacherous Bulgaria that France is now accomplishing has caused. This grieves us very much, but we have had so many trials and misfortunes to endure that we can suffer this latest one. But when, however, it is a question of peace and order in the Balkans, then it is we, the Balkans, who have the last word, and not our French friends. We Serbians do not fear the Bulgarians; even when they were stronger than we we did not fear them, and to-day we are in a position to keep Bulgaria quiet and to preserve peace and order. To us the preservation of peace in the Balkans is much more important than it is to France."

The Claims of the Turks.

The *New Statesman* of June 18, in an article called "The Claims of the Turks," pays tribute to the "qualities of decision and imagination" in Mr. Winston Churchill's recent speech, and proceeds to discuss the possibility of peace with Turkey. First of all—

We must stop this war. But what are we to do? It is, of course, idle to pretend that we can get out of the mess as easily as we got into it. There are, however, as it seems to us, three principles which ought to guide our policy, which are, indeed, absolute conditions of a firm settlement in the Near East. In the first place, we must hold rigorously to the neutrality which the Government professes. We must not, on any pretext, support Greece with a man or a penny in this violent adventure. There will doubtless be many Greeks, and there may be a few Englishmen, who will call this refusal of aid a betrayal. It is nothing of the sort. Greece may perhaps be justified in laying a large part of the responsibility for her sufferings on Mr. Lloyd George and those rash Philhellenes, who started her last summer on the path of militarism in Asia. But for her present position, and any unfortunate consequences which may flow from it, not even Mr. Lloyd George can be blamed. After the Conference in London a few months ago the Greeks were clearly warned that they were to expect no assistance from us if they took aggressive action. They took aggressive action, and they brought disaster on their own heads. If they choose to incur the same risks a second time, let them cherish no illusions about our possible intervention on their behalf.

But, granted that the British people are resolute, as they undoubtedly are, for neutrality, and that they are able to keep their shuffling Government from any covert infraction of it, neutrality will obviously not carry us very far. We need to apply a second, and a positive, principle if this conflagration is to be put out. That means a definite and wholehearted attempt to conciliate Turkey. From the earliest negotiations in Paris in 1919, down to the abortive Conference of London last March, most of our politicians and publicists have been playing with fantasies in the Near East. They have misjudged their men and miscalculated their chances; they have poured out oceans of twaddle about Constantinople and the Caliphate; they have frightened themselves with Bolshevik bogies all over Asia; they have mistaken the rising of the Turkish nation for an outbreak of brigandage; they have seen Athens at one moment as the capital of Alexander the Great, and at the next as a new Hohenzollern Potsdam. They have handed out generous slices of the Ottoman pie to themselves and their friends. One thing only they have consistently forgotten—the rights of the Turkish people. It is true that a recognition of these rights had begun to creep into the minds of British statesmen at the time of the London Conference, and some attempt was made to repair the grosser blunders and injustices of the Treaty of Sévres.

The people of this country are in no mood to wage war against Kemal for the benefit of King Constantine—nor even, we may add, to save Mr. Lloyd George's face. Neither are we morally entitled to resist Turkish claims, unless they prove extravagant, which, so far as we know, they are not. The Turks want a revision of the Treaty of Sévres, which will give them the possession of Anatolia (with a proper régime for the Greeks in Smyrna), of Constantinople (with proper international safeguards for the Straits), and of that part of Thrace which Mr. Lloyd George used to call "the homeland of the Turkish race." They are justified in making these claims, and we believe that the vast majority of the British people, and probably even of the members of the British Government, consider that they are justified. Why, then, are the claims not to be conceded? There are only two reasonable explanations. One is that there are commitments, economic or political, to persons or groups or nations, which require the suppression of Turkey. If that be so, let Mr. Lloyd George make them public, and we venture to say that public opinion will demand their instant abandonment. The other possible explanation is that we are afraid that any strengthening of Turkey would be a menace to the general peace. That, too, is an illusory fear. Neither Turkey, nor anybody on her behalf, is asking for a restoration of the Ottoman Empire. It is not suggested that Turkish misrule should be re-established over its former victims. But it is plain that the Turks should be allowed to rule themselves, and it may well be that in the course of a few years we shall make the remarkable discovery that they can manage this business in a perfectly creditable way. There are, in point of fact, worse governments in Europe at this moment than the Government of Angora, and worse statesmen than Mustapha Kemal. In any case, whether they do it well or ill, the Turks will govern themselves, and we cannot prevent them save at a cost which no one is willing to incur. As for Turkey becoming again a danger in the East, there is only one sound guarantee against that, which is that we and France and Italy should find a new basis for a common policy in the Aegean and in Asia Minor.

MUSICAL NOTES.

Eugene Goossens and Stravinsky.

There is no man more representative alike of England's creative and interpretative ability at the present time than Eugene Goossens, whose second orchestral concert of contemporary music was given at the Queen's Hall on June 23. For not only is he a very notable composer—his symphonic poem, "The Eternal Rhythm," has magnificent stuff in it—but his readings of Berners' "Spanish Fantasy," of Ravel's "La Valse," and, above all, of Stravinsky's "Le Sacre du Printemps," proved him to be a conductor, in modern music at any rate, of most unusual brilliance. After this concert there will be no bar to his claim to universal attention. The "Spanish Fantasy" I liked even more than when I heard it a week previously; its mirth is thrillingly infectious. Of Ravel's "La Valse" the sinuous, glittering rhythms were splendidly captured; but even so this artificial intoxication was prolonged too far. There was a little too much CO₂ about the work. And by the notorious "Sacre" of Stravinsky I still remain unconvinced; for the physical appeal which much of it undeniably makes grows less with its repetition. Its rhythmic genius no one would dream of disputing, and it is certainly good to have been shown so strikingly the opposite side of music to the romantic. But since the greatness of the "Sacre" lies in its rhythms and sonorities, and since its technical merits appear chiefly in its exploration of the substance of sound—in its ambition, that is, to be utter as opposed to sublime—it is a work which, laden with experimental tricks as it inevitably is, palls (with me, of course, that is) with repetition.

Violinists.

When first I heard Miss Winifred Smith (it was in the Elgar Sonata), it was obvious that her gifts were well above the average, and the impression was confirmed in a pleasant recital which she gave, with Mr. Vivian Langrish at the pianoforte, at the Wigmore Hall on June 7. Her intonation is exceptionally good, and her serious intentions were manifest in some capable performances of Bax, Malipiero, and Szymanowski. Her playing of the Bax "Legend" was particularly good, and with sympathies so wide as she shows herself to possess she should do well.

I do not know how many notes there are in the Japanese octave, but there were not a few foreign to the Western ear in M. Kenzo Satow's violin recital at the Wigmore Hall on June 10. His tone was rich enough, his technique was fluent enough, but his intonation! I meant to hear two Japanese works of his own composition, but Wieniawski's concerto in D minor and two Beethoven romances diverted the attention. The playing of Madame Setsuko at the pianoforte consisted of the depressing, sometimes rightly, of the notes as they were printed.

The capital virtue of Mlle. Valentina Crespi, who gave a recital at the Aeolian Hall on June 21, is a sincere belief in the value of what she is playing, whether that be the heavily cast concerto of Sibelius or the trivial "Valse Bluettes" of Drigo. Her technique is fairly facile, but she is given to wandering in her intonation and in her rhythm (though in the last respect she was not much helped by Mr. Percy Kahn at the pianoforte).

Mme. Blanche Marchesi.

The name of Marchesi is famous to all the singing world, and the song recital which Mme. Blanche Marchesi and some of her pupils had prepared at the Aeolian Hall on June 22 was a demonstration of the soundness of the Marchesi method of teaching. Mme. Marchesi has very individual ideas of interpretation, some of which (as in Schubert's "Erlkönig" or in Franck's "La Procession") one could not agree with; but there is no doubt that she is a great authority. Technically her pupils showed to great advantage, though no good would be done by pretending that one could hear any of the words of Miss Phyllis Archibald in Bemberg's "La Mort de Jeanne d'Arc," or that "When the King went forth to War" of Koeneman, which Mr. Mosley sang, is anything but a very poor song indeed. The first part of the recital was really more a personal triumph for Mme. Marchesi than for her pupils.

M. Toscha Seidel.

This famous young Russian violinist made his first appearance in England at the Queen's Hall on June 15, when, unfortunately, I was able to hear him only in the Vitali chaconne. Without doubt his general technical equipment is exceptionally fine and his tone and finish excellent, but whether he is, like Kreisler, the real musician, or, like Heifetz, first and last a consummate violinist, it would not be fair to judge. For the rich depth of his tone alone he is worth going to hear.

ANDANTE.

NEAR EAST BOOKSHELF.

I.—"NILE AND JORDAN." By G. A. F. Knight, M.A. (London: James Clarke and Co., 1921. 36s.)

II.—"RUPERT BROOKE AND SKYROS." By Stanley Casson. (London: Elkin Matthews. 6s. net.)

I.—NILE AND JORDAN.

This elaborate work, an account of the "Archæological and Historical interrelations between Egypt and Canaan from the earliest times till the fall of Jerusalem in A.D. 70," is one of astonishing industry and research. Through 500 closely-printed pages the author gathers together the information diffused through some seventeen hundred books and journals, and presents in a connected narrative the long and tangled history of Egypt and Palestine over some seven millenniums. Such a work is bound to provoke criticism, for, unless the writer is to be content merely to enumerate a mass of conflicting views, he must give his own conclusions. Thus, on all points of detail, probably no one student will agree, but Mr. Knight is most scrupulous in giving authorities for all his facts. For the student who wishes to balance other views against those of the writer the ample bibliography and countless footnotes offer every facility.

The book is by no means a mere compilation. The writer has a clear and vivid style, and many of his terse descriptions of persons and places are excellent. For those who wish to obtain a comprehensive general impression of the historical setting of the Old Testament the work will well repay a careful reading. The results of excavation and other archæological research all over Egypt and Palestine are here worked into the historical narrative in a most successful manner. To many, who find archæological reports too technical for their significance to be appreciated, this method will be a revelation of the extent and importance of this newly acquired knowledge. What is elsewhere diffused through archæological reports from many sites is here placed in its historical setting. To many this work will be valued for the fresh understanding which it gives to the Old Testament, and the history of Israel; indeed, without some such historical background much of the literature of the Old Testament has no meaning—with it the whole purpose of sacred history becomes significant. Probably the author will fall foul of the two extremes of Biblical critics, as his position is a *via media*, but for the ordinary reader that matters not at all. As has been said, the author invites criticism from the earnest student.

Amidst such an exhaustive study it is only possible here to refer to a few points of interest. The author takes the view, now perhaps increasingly held, that the Exodus took place considerably earlier than the XIX. Egyptian dynasty, and that Thothmes III., not Rameses II., was the "Pharaoh of the Oppression," and Amenhotep II., not Merenptah, was the Pharaoh of the exodus. The strongest argument against the older popular view is the famous Merenptah-Stele discovered by Petrie at Thebes in 1896, where it states that "Israel is wasted, he hath no seed." The conquests of the Khabori, recorded in the Tel el-Amarna tablets, are here accepted as those of the Hebrews, now arriving from their wanderings; but, however much this may agree with chronology it is difficult—and here scarcely attempted—to square this invasion with that described in the Old Testament under Joshua.

The archæological discoveries which have demonstrated two Jewish temples in Egypt—rivals of the Jerusalem temple—are of ethnic interest. First, at Elephantine papyri were discovered showing that on that island there had been a Jewish temple for over a century, which had all the appointments for sacrifice of the great temple in Jerusalem. It had been built in the lifetime of Cyrus the Great, but in the 14th year of Darius II. heathen Egyptian priests destroyed it completely. One of the papyri contains an appeal from the Egyptian Jews to Palestine for permission to re-erect the temple. The whole incident opens up most important and interesting questions.

The second temple of which we have knowledge belongs to a later period. When the persecutions of Antiochus Epiphanes drove many of the Jews to Egypt, Onias IV., the son of Onias III., the Jerusalem high priest, obtained permission from Ptolemy VII. to build in Leontopolis in the Delta a temple after the model of that in Jerusalem. Petrie found its remains in the form of an "artificial mound, six acres in extent and 70 feet high to the platform, placed at the north-east corner of the old Egyptian town, just as the temple stood on the north-east of the older city of Jerusalem. There was an imitation Mount Moriah, a Kidron Valley, a Tyropæan Valley running through the city, a staircase running up from the valley to the temple on the model of the steps which formed 'the ascent by which the King went up into the house of the Lord,' a castle of Antonia, a Bezettia quarter and a new town to the north of the old." The temple itself was built on the exact proportions of that in

Jerusalem, but smaller; the altar was similar and priests and abundant sacrifices were maintained by revenues accruing from endowments from surrounding districts.

The significance of Egypt and all it stood for to the great prophets of Israel is strikingly illustrated by copious extracts from their writings, which in their correct historic setting are pregnant with new meaning. The troubled times between the death of Alexander the Great and the destruction of Jerusalem are described with considerable detail and the intimate connection of Palestine and Egypt is well illustrated. The reader is here too constantly referred to contemporary Jewish literature—the Apocrypha, Josephus and other Jewish writings.

The book has been published largely at the expense of a generous grant made by the Carnegie Trust for the Universities of Scotland, and in spite of its size is a wonderfully light book to hold. Suitable illustrations would have much added to its attractiveness, but would perhaps have made its price prohibitive. A good map of the Nile Valley is inserted.

E. W. G. M.

II.—RUPERT BROOKE.

There is no lover of English literature who does not know the story of Rupert Brooke, and who did not regret his early death in death in 1915; it is by a wide public, therefore, that Mr. Casson's words upon the poet's resting-place will be read. Many do not know where Skyros is, and those few who do will know little about the island, even though it be one of those corners of "a foreign field that is for ever England."

In April, 1920, Mr. Casson brought to Skyros the monument that now stands over Brooke's grave, and his little book is a description of what the island was and is, and of how he performed his reverent act. He begins by reminding us that Skyros was very early the home of the legendary heroes—Achilles, Theseus, and so on—and proceeds to display his classical learning in the pleasantest manner. In this wild island, the chief production of which are marble and flocks, there are but few inhabitants, and those, because of the pirates, not on the coast, so that the valley of Tris Boukes Bay, where Brooke's tomb lies, is "a lonely valley in a lonely bay, with none but shepherds and storm-bound sailors to see it." It is good, however, to read that, despite this loneliness, the valley is covered with wild flowers. "Pale blue anemones, orchids, rock hyacinths, and sombre russet fritillaries star the turf, while everywhere is the scent of wild thyme and mint that grows thick between the bushes of wild olive." Is it not a fit place for an English poet?

Brooke's tomb was consecrated (according to the rites of the Greek Church) by a monk of the monastery of St. George, so that, as the final sentence of the volume puts it, "For once St. George of Skyros and St. George of England have met on common ground."

Mr. Casson's essay, which first appeared in the *London Mercury*, and is reprinted, with one omission and a few additions, is beautifully produced, and is greatly enriched by some delightful woodcut illustrations of Phyllis Gardner.

PERSONAL AND GENERAL.

TO-DAY.

June 30 (New Style).

June 17 (Old Style).

Shawwal 24, 1339 of the Moslem Calendar.

Sivan 24, 5681 of the Jewish Calendar.

Sir M. M. Bhownaggee has returned from his Indian tour.

Viscount and Viscountess Milner have returned to Sturry Court.

The Earl of Shannon has arrived in England from India, and is at 18, Ovington Gardens, S.W.3.

Sir Francis and Lady Elliot have arrived at the Stanhope Court Hotel, Stanhope Gardens, South Kensington.

It is officially announced that the Prince of Wales is to visit India during the coming cold weather, arriving in Bombay in November.

Field-Marshal Lord Plumer, who recently underwent an operation in a London nursing home, is making good progress towards recovery.

The Commission to delimit the boundaries of the British and French mandates in Syria has now been constituted. Colonel Newcombe will be the British representative.

It is stated that the King of Roumania proposes to visit Paris, London, Brussels, and Rome this summer, and that he may also extend his visit to include the United States.

Sir Charles Ernest Low, K.C.I.E., was married last week at the Chapel Royal, Savoy, to Helen Ada, second daughter of the late Captain E. K. E. Spence, of the Indian Staff Corps.

General Gouraud, the French High Commissioner in Syria, has arrived in Damascus on a tour which will be extended to Deraa, Kuneitra, Palmyra, Homs, Hama, and Aleppo.

A marriage has been arranged, and will take place shortly, between Mr. Julian A. R. Young, only son of Lieut.-Colonel Julian Young, Indian Army, retired, and Margaret, eldest daughter of the Rev. W. Perowne Holmes, of the Rectory, Porlock, Somerset.

The marriage of Lieut.-Colonel Robert Loraine, D.S.O., M.C., and Winifred Lydia, elder daughter of Sir Thomas and Lady Strangman, of Bombay, now at 12, Cork Street, W., will take place on July 14 at St. George's, Hanover Square, at 2.30 p.m.

The marriage between Lieut.-Colonel J. H. S. Allen, I.A.R.O., and Kathleen, youngest daughter of the late Mr. and Mrs. Westropp-Dawson (born Lathom), and adopted daughter of the Hon. Mrs. J. W. Harris, took place at Canterbury on June 22.

The engagement is announced of Hubert Vincent Gough, Royal Irish Fusiliers, second son of Mr. and Mrs. Hugh George Gough, of Dinard, formerly of Hyderabad, and Norah Mary Dorien, eldest daughter of Mr. and Mrs. G. H. Stanley Clarke, of Cromer, Bournemouth.

Our Cyprus Correspondent writes (June 6):—

M. Halid Bey, District Judge at Famagusta, who has been studying at Gray's Inn, has been called to the Bar in London, and is now returning to Cyprus.

Mr. W. A. Russell, King's Advocate, has left for England on leave. Mr. B. Dickenson acts as Puisne Judge.

A marriage has been arranged between Lieutenant John Pilditch, R.N., only son of the late John Jarvis Pilditch, and nephew of Sir Philip Pilditch, M.P., of Bartropps, Weybridge, and Cecil Ruth, only child of the late Captain C. P. Down, Indian Army, and Mrs. Down, and granddaughter of Colonel Marshall, 6, Chester Place, W.2.

The engagement is announced, and the marriage will take place at the end of July, between Major Hastings Ismay, D.S.O., 21st Cavalry (Frontier Force), younger son of the late Sir Stanley Ismay, K.C.S.I., and Lady Ismay, and Laura Kathleen, only daughter of Mr. and Mrs. H. G. Clegg, of Wormington Grange, Broadway, Worcestershire.

The marriage of Mr. Alexander W. Cowe, head of the Near East Department of the Federation of British Industries, and late of Constantinople and Athens, to Miss Gwendolen E. Marsh, until lately a member of the staff of the International Labour Office of the League of Nations, Geneva, took place at St. Luke's, Redcliffe Square, S.W., on June 15.

At the British Embassy, Constantinople, on May 11, the marriage took place of Major O. H. van Millingen, C.S.I., Army of the Black Sea, to Mme. Anastassia Akimoff, daughter of the late Lieut.-General Laboutin, of the Imperial Russian Army. Major O. H. van Millingen is a nephew of the late Professor Alexander van Millingen, M.A., D.D., the Byzantine archæologist and writer, of Robert College, Constantinople.

Our Athens Correspondent writes (June 5):—

Prince Andrew, with his wife, Princess Alice, and their two daughters, arrived at Corfu and took up their abode at the villa "Mon Repos." Prince Andrew, who is a Brigadier-General in the army, has asked the Minister of War for permission to proceed to the Asia Minor front.

Colonel Sir Frederick Halliday, chief of the British Police Mission to Greece, has left Athens for London on a short holiday.

A marriage has been arranged between Captain Patrick Grant, Q.V.O., Corps of Guides (Indian Army), eldest son of Colonel H. G. Grant, C.B., late Seaforth Highlanders, and Mrs. Grant, Balvraid Lodge, Tomin, Inverness, grandson of Field-Marshal Sir Patrick Grant, and Irene Madeleine, widow of Lieut.-Colonel Donald Wood, the Rifle Brigade, and youngest daughter of the late Mr. H. T. Ross, Superintendent of Madras Police, and Mrs. Ross, of 30, Norton Road, Hove.

Captain John K. im Thurn, C.B.E., who relinquished last week the post of Director of the Signal Department at the Admiralty, has been appointed with effect from June 21 to the light cruiser Ceres, of which he will assume command at Malta shortly. He succeeds Captain H. O. Reinold, whose two years in the ship have nearly expired. The Ceres is one of the six vessels in the Third Light Cruiser Squadron of the Mediterranean Fleet, now commanded by Rear-Admiral Sir Reginald Tyrwhitt.

Her Highness the Princess Kamala Devi Gaekwar of Baroda held an "At Home" last week at 15, Cleveland Gardens for ladies interested in the Indian Women's Education Association. Her Highness made a speech on the subject, and amongst other speakers were:—Mrs. Patrick Villiers Stuart (in the chair), Miss Balchandra, B.A., on "The Student's Point of View"; Viscountess Chelmsford, on "The Present-Day Conditions"; Miss Anson (for Lady Baden Powell), on "The Guides' Part in Education." Lady Carmichael proposed the vote of thanks.

Bishop MacInnes, the Anglican Bishop in Jerusalem, has cabled his regret that his name was not added to the recent appeal for a personal memorial to the late Bishop Blyth in St. George's Collegiate Church, Jerusalem, which he trusts will receive the support not only of the late Bishop's personal friends, but of all those Church men and women who value the work which the Bishop did to establish and maintain relations of Christian charity with the Orthodox and other branches of the Church represented in Jerusalem. The Archbishop of Canterbury and many others have already responded to the appeal.

The Governor-General of the Sudan has approved the formation of an advisory body to be called the Scientific Research Committee (a) to co-ordinate the scientific work (other than medical) in the Sudan as far as possible, (b) to advise on any matters dealing with scientific questions which may be referred to it, (c) to collect and distribute scientific information of local interest. This committee, which will have the Director of Education as chairman, will consist of the Director, W.T.R. Laboratories, the Government Bacteriologist, Botanist, Chemist, Entomologist and Geologist as members. Dr. Joseph, the Government Chemist, will act as Secretary.

APPOINTMENTS, ETC.

The Rev. Arthur Higgins, curate at St. Peter's, Harrow, has been appointed English Chaplain at Capri. He was ordained nine months ago at the age of sixty-five. He has been round the world nine times.

OBITUARY.

The Cairo correspondent of *The Times* reports the death last week of Sir Charles de Rocca Serra, Legal Adviser to the Egyptian Cabinet, 1912-20, and afterwards appointed honorary Sultania Counsellor in recognition of his distinguished services.

Professor Morris Jastrow, of the University of Pennsylvania, has died at the age of sixty. He was a recognised authority on Semitic languages and literature, and wrote several books on the religion of Assyria and Babylonia and kindred topics. He was a contributor to many encyclopædias, including the *Britannica* and the *Jewish*.

With the regretted death, at the age of 83, of Mr. Robert Johnson Moss, Alexandrian society loses one of its oldest and most greatly esteemed members, and the Anglo-Egyptian business world a pioneer and a pillar of integrity. To his many charming characteristics the late shipowner added a very generous heart, and many younger Anglo-Egyptians of both sexes and "generations" of His Majesty's Army and Navy can never forget the delightful hospitality of his Ramleh home.

The death occurred on June 26 of Sir Robert Nathan, formerly of the Bengal Civil Service. Entering the Indian Civil Service from Cambridge in 1888, he became, in 1895, Under-Secretary to the Financial and Commercial Department of the Government of India, and two years later to the Home Department, of which he became Deputy-Secretary later. In 1902 he acted as secretary to the Indian Universities Commission. After a period as private secretary to the Viceroy, Sir Robert Nathan was appointed in 1907 Commissioner of the Dacca Division, and in 1910 officiating chief secretary to the Governor of Eastern Bengal and Assam. He also acted as president of the Dacca and Patna Universities Committees. He was the author of the official History of Plague in India and of works on the progress of education. Sir Robert Nathan was created a C.I.E. in 1903, a C.S.I. in 1911, and K.C.S.I. in 1919.

The death has occurred of Rear-Admiral Sir Massie Blomfield at the age of eighty-six. Admiral Blomfield's name will always, says the *Morning Post*, be closely associated with Egypt, as from 1879, after twenty-five years' service in the Royal Navy, he assumed duty under the Egyptian Government, which he continued to serve loyally for twenty-nine years. With the late Earl of Cromer and others he performed much of the "spade-work" which laid the foundations of Egypt as the prosperous country we know to-day. He entered the Navy in 1848, and served throughout the Crimean War. Retiring from the Navy as a captain in 1873, he was employed under the Admiralty for another three years as a member of the Torpedo Committee. In 1879 he was selected for the newly-instituted post of Comptroller of the Port of Alexandria. Sir Massie's outstanding work in connection with the Port of Alexandria was its development into a port in fact, instead of in name only; the great breakwater of which remains as tangible evidence of what he accomplished. During his period of service in that country he successfully held the posts of Comptroller of the Port of Alexandria, Deputy Controller of Egyptian Ports and Lighthouses, and Controller-General, finally retiring in 1908 as Director-General of Ports and Lighthouses. His great services were recognised by the award of the K.C.M.G. and the Order of the Osmanieh and Medjidie from the Khedive. After his retirement from the Egyptian Service he interested himself in archaeology and in the Boy Scout movement.

TURKEY AND GREECE.

A meeting was held last week at the Connaught Rooms to protest against the Greek atrocities in Asia Minor, and to urge the restoration of peace between Great Britain and Turkey. It was presided over by Lord Lamington, and the speakers included Lieutenant-Colonel Aubrey Herbert, M.P., Viscount Curzon, M.P., General Conyers Surtees, M.P., and Captain E. H. Griffin. A number of pro-Venizelists, including Sir Arthur Crofield, endeavoured unsuccessfully to address the meeting.

M. Mayromichaelis, the Hellenic Minister of Marine, has returned from Smyrna to Athens.

Local levies acting for the Government have seized 226 rifles and some ammunition which had been brought to Khamisiya (Nasriyeh district of Mesopotamia) from Nejd.

Representatives of the exiled National Governments of Georgia, Armenia, Azerbaijan, and Northern Caucasus, in a treaty signed in Paris on June 15, agreed to co-ordinate their foreign policy, accept obligatory arbitration on the subject of their territorial disputes, and to establish a Customs Union. This agreement will come into force after the collapse of the existing Soviet Administrations, which are subordinated to Moscow, and the subsequent restoration of the National Governments in these States.

"SAVRITI."

On June 23 and 24 two special performances were given at the Lyric Theatre, Hammersmith, of Gustav Holst's opera, "Savriti." From the purely musical side much might be said in praise of the work and something in praise of the performance: for the simplicity of Holst's scoring (the only instruments being two string quartets, a double bass, two flutes, and a cor anglais), and the certainty of his effects were remarkable. But, apart from technicalities, the story of Savriti, taken from "The Mahabharata," makes a universal appeal, for it is, in mystically Indian effect, really the old tale of the triumph of Love over Death. Savriti, the most beautiful of Indian women, is visited by Yama, the King of Death, who threatens to take away the life of her husband, Satyavan; but, moved by her eloquent pleading for life, Death relents, and wife and husband are at the end left together.

The opera, which is in one act, was extremely well received. The hidden orchestra was admirably conducted by Mr. Arthur Bliss, the part of Death was impressively taken by Mr. Clive Carey, and Savriti was, except for an occasional forcing of tone, excellently portrayed by Miss Dorothy Silk. But most memorable of all was the beautifully apt setting in which the late Mr. Lovat Fraser had conceived the whole thing. "Savriti" was preceded by three of Holst's hymns from the "Rig Veda," which are written for female voices and harp. The choice of these things was good enough, but their performance was another matter.

NEWS IN BRIEF.

M. Venizelos has arrived at Aix-les-Bains, Savoy.

Five thousand men employed by the Buckingham Mill Company, Madras, have struck work in sympathy with the workmen of the Carnatic Mill.

A memorial to the officers, non-commissioned officers, and men of the I. W. T. (R. E.) was unveiled in the Garrison Church, Busreh, on May 8, by Col. Commandant Nepean. The Bishop of Persia performed the dedication.

The Rome Correspondent of the *Morning Post* telegraphs that the *Giornale d'Italia* publishes from its Albanian Correspondent an attack on what is styled British political and commercial propaganda in Albania.

According to the *Temps* (Paris), the Moroccan chief, El Moktar el Tuzani, a bitter adversary of France, has surrendered to the French Commandant at Taza.

The Council of the League of Nations has left the consideration of the Albanian question to the Conference of Ambassadors, which is at present dealing with the matter.

A statement having been made in the Turkish Press that an Albanian officer had been invited to serve in the Kemalist Army, the Albanian Assembly, in a resolution, has called upon the Albanian Government to declare that the Albanian people has no connection with Turkey.

M. Briand has informed the Foreign Affairs Committee of the Chamber that the Emir Faisal's position in Irak is purely a British question. The French Government only desired certain guarantees, such as having a zone adjacent to the frontier of Syria which would be outside the sovereignty of the Emir.

On June 22 the bodies of two Bulgarian poets, who had died abroad, were buried at Sofia. They were Pentcho P. Slaveikoff, who sang the Bulgarian struggle for independence, 1874-77, and Petko Todoroff, one of the creators of the modern Bulgarian drama.

Yussuf Kemal Bey, the Turkish Nationalist Minister for Foreign Affairs, embarked last week at Adalia on an Italian destroyer for Brindisi, says an Athens Reuter message.

Great activity is reported on the part of the insurgent Osetes and Daghestanis in the Northern Caucasus, where many railway bridges on the Vladikavkaz line have been blown up.

SUMMER PALACE HOTEL,

(C. CORTELLETO, Mng. Proprietor),
GLYMENOPOULO, RAMLEH.

This Hotel is situated near the Beach. Open all the Year.
Every Modern Comfort. American Bar, Restaurant,
Bathing Cabins on the Beach. Billiards.
Daily Concerts on the Verandah.

NAJEM HOURY'S CYPRUS HOTELS COMPANY.

OPEN ALL THE YEAR ROUND—

NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
LARNACA—Majestic Hotel.

FOR SUMMER SEASON—

TROODOS—Olympus Hotel.

5,000 feet above sea level. Open from May till October.
Perfect situation. French and English Cuisine. Moderate Terms.
Excursions to Mount Troodos.

For Tickets and further Particulars, apply

THURSDAY, JUNE 30, 1921.

GREECE, TURKEY, AND THE ALLIES.

The immediate result of Lord Curzon's discussions with the French Government was the dispatch of an Allied Note to Greece to inquire whether the Hellenic Government would be willing to accept the mediation of the Allied Powers for a settlement of Greek and Turkish differences. Scrupulously avoiding anything in the nature of an ultimatum, the Note, it is understood, expressly left to Greece a free hand in regard to acceptance or refusal; but in the event of her rejecting mediation the Allies, it was indicated, could assume no responsibility for eventual developments in the situation in the Near East. If Greece decided in principle to accept mediation, the Allied Governments would make known the conditions on which they hoped to secure an understanding between the two belligerents, and the prospect was held out that the Allied Governments would know how to bring about a cessation of hostilities on the part of Turkey and obtain Turkish acceptance of the terms that they were prepared to recommend. The Greek reply is contained in a lengthy communication, which sets forth the Greek conception of the position in Asia Minor. The situation, it is pointed out, is not the result of an accidental and isolated conflict, but is in reality a continuation of the world-conflict. By defending the traditional aspirations of Hellenism Greece has the conviction that she is defending at the same time the rights of the civilised world in the Eastern Mediterranean; she has reached the point of being able to impose the decisions taken in common accord with the Allies which originally induced her to proceed to the military occupation of Asia Minor; military considerations alone must guide her conduct and her decisions, and every delay of the operations beyond the date and limits indicated by the military chiefs would be prejudicial to Greece and compromise the military situation to her disadvantage. For these reasons the Greek Government is unable to accede to the Allies' proposals, which would necessarily entail a suspension of hostilities. The reply is calculated to be received with greater satisfaction in Greece than elsewhere; but its tenour was determined when the Allies raised the subject of mediation in the form of an offer to the Hellenic Government.

By accepting of its own volition an Allied offer of mediation, M. Gounaris's Cabinet would have placed an effective weapon in the hands of its political opponents. Smyrna and Thrace were gained for the country by M. Venizelos, and to tolerate their loss by any other means than *force majeure* would never be forgiven politically, however well satisfied individually the people might be to exchange them for more practical and immediate advantages. The Allied Governments meant well, but the necessity of a compromise has stultified their good intentions. It was, no doubt, apparent

in Paris that Allied intervention was the only way out of the Near Eastern dilemma. The desire on the part of one or more of the three Powers to gild the pill for Greece led to the offer being made to the Hellenic Government in the form that it actually took. The pains and penalties of rejection were clearly set forth, but the mistake made, if the Allies wanted to bring about a settlement, was to throw the onus on to King Constantine and his advisers. Few Governments would be heroic enough to place themselves in a false position by acceptance in such circumstances. M. Gounaris will have argued that a solution of the Turkish question is as essential to the Allied Powers as it is to Greece. Provided that the Greek army can withstand a Turkish attack, his Government has little or nothing to lose by rejecting the Allies' offer, whereas acceptance must necessarily entail political suicide. Rejection, indeed, will enable the patriotic drum to be beaten with considerable effect, and already echoes of the pounding may be heard. "Other countries have reconquered their liberty and independence; why should Greece be prevented from liberating her own kith and kin as well? She can fight successfully for her rights, and will not shrink from the necessary sacrifice." If, as seems possible, the Greek army can contrive to withstand a Turkish attack, the only sacrifice entailed is the printing of more paper money, and the Greek Cabinet may have a shrewd suspicion that in the Allied countries economic considerations are playing at least as large a part in the desire for a Turkish settlement as they are in Greece, to say nothing of the possibility of the Allies having to help to redeem the depreciated currency. Great Britain and France cannot tolerate an indefinite period of stalemate in Greco-Turkish relations, and after rejection of their offer the next move will still be with them.

In our issue last week the hope was expressed that the British and French Governments would not aim at some diplomatic compromise, but would base their Near Eastern programme on the actual requirements of the situation. Possibly the offer to Greece was an indispensable preliminary. The desire to avoid wounding susceptibilities has been gratified, and the field is now clear for practical proposals. Greece, it cannot be repeated too often, is entitled to the fullest consideration, but it does not necessarily follow that she has a monopoly of political wisdom and that the solution of the Turkish question proposed by her is the one that answers to her own interests. If there could be no alternative to pre-war Turkey, then there would be no other settlement possible than that already reported to have been carried out in territories where the Greek army was confronted with a hostile Turkish population. So long as the Allies fail to convince the Greeks that they intend to make Turkey a safe place for religious minorities, they cannot expect any Greek Government to meet them half-way in the matter of a Turkish settlement. At the present moment they have only succeeded in embittering Greco-Turkish relations, by placing Turks under Greeks and by giving the Turkish Nationalists fresh opportunity to settle old scores in the old way. No settlement can be arrived at by free consent of the two parties; it must be imposed "from above." The only way to meet Angora, short of an Allied war against Turkey, is to remove Turkish territory from Greek jurisdiction. Greece must be met first by showing that there can be no question of Christian communities being exposed to the pre-war methods of Turkish domination. But she is also entitled to full redress for the mistakes of Allied diplomacy at her expense—the misguided awards of the Treaty of Sèvres, the occupation of Smyrna, the employment of the Greek army as a screen for the weak Allied hold on Constantinople and the Straits, the withholding of recognition from King Constantine and the effect on her economic position of the Allies' political boycott. The situation, therefore, calls for a definite and detailed plan to be submitted simultaneously to the two belligerents, and to be couched in such a form that each party in accepting it can plead *force majeure* and thus disarm the hostile criticism of extremists or political opponents.

IN SOUTHERN PERSIA.

MEN AND METHODS.

By "Kalantar."

III.

The party rode out one starlight night and struck the camel track two miles beyond the town.

Meanwhile, at Hashimabad the Arab shepherd on the hills whistled to his straggling herd, and glanced occasionally into the blue distance towards two ragged peaks which marked the village of Zaitun. It was here that he would first see the little veil of dust thrown up by the horses of newcomers. Not that the tribesmen expected the early return of the Bakhtiari. The latter were doubtless furious at the indignity they had suffered, but Yezd was over fifty farsakhs from Hashimabad; the Governor would not risk defeat by sending another handful of men; and the assembly of a force, if this were practicable, would entail months of delay. Truly, Ahmad Quli was a worthy chief! Ten lambs had he distributed among the tribesmen to prepare a feast of rejoicing at the discomfiture of the Bakhtiari. The shepherd broke into a low, droning song, urging his animals

and for three stages they had seen no human being—no one whom they could have commandeered as a guide. On leaving Rud-i-Safed, two stages from their destination, they had almost abandoned hope of making a surprise entry when fortune favoured them: they sighted an old man hustling along a donkey two miles off the track. A couple of sowars, kicking their ponies into a mad gallop, soon headed off the aged woodcutter and brought him to their party.

Trembling with terror at the sight of so large a body of armed men (he computed the party at 100 rifles at least), he eventually explained that he belonged to the little community which had tilled the soil at Hashimabad village for many generations, long before the Arab had come to rob and plunder. Here was a heaven-sent guide! Ahmad Khan, in a few words, explained that he wanted to enter the village on that very night, and by a track which would keep them clear of all Arab forts and encampments. The old man hesitated, looked in the gathering dusk at a cluster of distant foothills, and began a long tale of woe. He was old, the track was faint and difficult to follow, the distance twelve farsakhs at least. The Bakhtiari unfastened a whip from the pommel of his saddle. The villager glanced up, saw it, and, giving his donkey a blow on the quarters, led them off on a narrow sheep track. Ahmad Khan and Hashim rode beside the guide, while the remainder of the party, in groups of two or three, ambled behind, exchanging gruff sentences on the prospects of the expedition.

AT PARIZ.

This village, of about 800 inhabitants, lies in a picturesque valley 30 miles north of the important town of Saidabad. It is situated about 7,500 feet above sea level, and its climate is almost perfect. In the well-watered valley, poplars, walnuts and cypress trees flourish, and a dozen varieties of fruit are grown, including grapes and excellent peaches. In any Eastern country it would attract attention as a summer residence, and by the dwellers on the vast bare plains of the Asian plateau it is spoken of as Paradise.

down the slopes towards a little star of fitful flame, where the womenfolk cooked beside the goat-hair tents.

On this evening Ahmad Quli sat with his brothers, and the kalyan passed from hand to hand. He talked of the Bakhtiari. A week earlier a grain merchant from Zaitun had brought stories of Bakhtiari preparations, and Ahmad Quli had thought it wise to pack his most valued possessions and send them by night to a cave in the hills. "Would they really come?" "The grain merchant had surely lied!" Anyway, he could depend on his followers. Once again he would flout the Bakhtiari, and this time there would be bloodshed. His own Ilkhani had sent a special messenger from Shiraz with a letter of congratulation and a promise of support. What need to worry oneself? Only fools and cowards worried. The issue was in the hands of Allah.

Now, at ten o'clock on the very night that Ahmad Quli made these conjectures the Bakhtiari brothers commenced the last stage of their march. They had long since decided that their best chance of entering Hashimabad unopposed lay in leaving the main track and following by night one of those minute paths which cross and recross, like strands of a spider's web, even the most desolate wastes in this inhospitable land. Some of these tracks were beaten by herds, following in single file to a water-hole, some by hewers of wood, others by qasids, or messengers, who carry food and water on their backs and travel by "short cuts" at five miles an hour.

To follow any of these tracks with safety requires local knowledge. But the Bakhtiari knew nothing of this region,

At midnight they dismounted for half an hour near a pool of brackish water, ate a few mouthfuls of bread, and watered their ponies. A rug was spread, and the leaders stretched themselves out and lit cigarettes. They were now in a more hopeful frame of mind than at any time since leaving Yezd, for their guide had told them of the fort of Hashimabad with its four high towers and many loopholes. It was situated half a farsakh from the nearest Arab fort and possessed two wells of sweet water. Of the Arabs and their movements he knew little. Rumours of the Bakhtiari's return were certainly in circulation, but no one expected them so soon. With lighter hands and jauntier bearing the Bakhtiari once more swung themselves into the saddle to finish the last stage of this weary trek.

Two hours before dawn they crossed a river-bed and passed under a hill on whose crest glimmered the red star of a shepherd's fire. A mile farther on the path led into a patch of cultivation, then through a collection of deserted huts. A dog barked, and a thread of golden light escaping through the chinks of a door told them that they had reached the village—that their journey was over.

The guide halted and laid a hand on Ahmad Khan's rein. "This," he said, "is Hashimabad. That black mass is the fort." That morning Bakhtiari horses shook their heads over the mangers of the fort, and a white patch on each tower showed where a Bakhtiari tufangchi peered over the parapet towards the Arab encampments.

In a clean upper room looking on to the courtyard Ahmad Khan unwound his puttees and, smiling at Hashim, remarked: "This time we've come to stay!"

IV.

In a room of the fort at S— two officers, pencil in hand, pored over a map. Beside them lay a telegram, containing in half-a-dozen lines a *résumé* of the situation at Hashimabad and orders to proceed at once to the rescue of the Bakhtiari, and to take measures for the protection of the Hashimabadis.

For three days past the C.O. had been expecting these orders, for rumours of fighting in the robber stronghold had been circulating in the bazaar with increasing frequency, and that very morning a messenger from Zaitun had brought the Governor a letter telling of Arab revenge on the Hashimabad villagers for their share in the death of Ahmad Quli and his brother.

At S— the dispatch, at a few hours' notice, of parties varying in strength from ten to 100 rifles was a common occurrence; for the town lies on the borders of a robber district, and hardly a week passes without its report—very often false—of a band of robbers having been seen in the vicinity. These small pursuit parties used to slip away very quietly, with their transport of a dozen or so of donkeys, carrying two blankets for each man and three or four days' rations. But the present movement was a larger affair: there would be one company of infantry and two troops of cavalry, and as the hundred odd miles to Hashimabad was to be covered by forced marches, every available donkey would be taken for mounting the infantry.

The telegram was received at 10 a.m., and until early afternoon, when the column marched out, the barrack square presented a scene of feverish activity. Here two men laboured under the weight of a pair of leathern water-carriers, there a squad placed boxes of ammunition ready for loading, while outside the regimental stores a platoon fell in to receive khaki kullahs, issued only for work in the field, and water-bottles.

At midday the cavalry marched out, and at the same time the drivers, uttering strange cries to keep their animals together, ushered 250 donkeys into the fort. The process of marshalling these animals in their correct places among the loads, already roped and laid out in neat lines, is accompanied by shouts, choruses of oaths, and the sound of heavy blows. One of the six animals allotted to Abdul, the son of Hassan, notices that his driver is busy adjusting a load-roping, and wanders off in a most wilful manner to rub noses and perhaps to exchange a friendly kick with Said Riza's white donkey mare. "Pidar-i-sag!" shrieks Abdul, while the Said murmurs a string of quite unrepeatable adjectives, and gropes wildly for his staff. Meanwhile the offending ass, guided by unerring instinct, deftly avoids a furious blow, and returns, calm and triumphant, to his allotted place among the loads. Similar little comedies are enacted a hundred times over in every corner of the square, and one despairs of moving before the sun slides out of sight over the edge of the plain and the eastern night spreads her golden-starred mantle over the rugged hills and the vast, silent wastes.

This confusion, however, hides a deal of hard and skilful work, and at the end of half-an-hour a bearded charvadar reports his animals loaded and ready to start. Word is passed to the Persian officer standing by his company on the parade ground. A sharp word of command, the rattle of arms brought to the slope, and the men move off in a dense cloud of dust.

The British officers climb the massive south tower of the fort to watch the column go and to see whether they can pick up the cavalry in the gathering dusk. An occasional cry floating back from the hurrying drivers and the plaints of an ungreased water-wheel are the only sounds that break the perfect silence—the silence of vast and empty spaces. The west wind has died away, and the "dust-devils," tired of chasing each other over the plain, have settled to form yet another layer of sand on the scrub-covered dunes. The shadows under distant hills are changing from purple to black. Far away to the north a thin cloud of moving dust shows that the cavalry is nearing Firuzeh, their halting-place for the night. On hill slopes twenty miles distant shepherds' fires twinkle like golden stars. Twilight gives place suddenly to a clear but moonless night as they descend the echoing steps, and, mounting their sturdy Persian ponies, canter after the column.

V.

With the first streak of dawn the last animal of the convoy stumbled on to the camping-ground at Firuzeh. The infantry were asleep in their tents, the cavalry in the rooms of a dingy old caravanserai, and, with the prospect of thirty miles to cover before the next dawn, no one was roused until 10 a.m. At that hour the O.C. column, accompanied by the N.C.O. in charge of supply arrangements, proceeded into the village to inquire about the purchase of forage and meat. An atmosphere of suppressed excitement pervaded the straggling bazaar. The shoemaker had laid aside his awl and had gone across the street to smoke a pipe with the coppersmith, while beside the fruitteller's stall

a dozen bearded camel men, seated in a circle, glanced shyly at the intruders and exchanged whispered conjectures. On the flat roofs squatted groups of women, shrouded from head to foot in blue or white chadars, while in the kadhuda's courtyard two mullahs, half a dozen merchants, and all the village greybeards disputed as to the strength of the "army" which had arrived in the night.

The kadhuda himself, infirm and bleary-eyed from a too frequent indulgence in opium, had certain information that the force numbered 1,000 rifles and 200 sabres! His own son, who had only now returned from S—, had heard it from the Governor himself. There could be no doubt about it. The merchants murmured assent and sipped their tea. The mullahs fumbled with their beads.

Further conversation was interrupted by the C.O., who stepped into the courtyard. Immediately the company rose and bowed, while he shook hands with the kadhuda and murmured the usual greetings. Followed a conference on the question of supplies, during which the guests slipped away unostentatiously. In half an hour all was arranged, and the kadhuda's numerous retainers were scouring the village to procure the promised supplies.

As the C.O. prepared to depart his host murmured, "You are going to punish the Arabs? Year before last they carried off fifty of my donkeys from the Kuh-i-Darakht. I have little left now. You will get them back for me?"

And at every village en route the C.O. heard a similar tale. From one place 200 goats and sheep had been taken four years previously; at another two aged brothers pleaded, with tears in their eyes, for the return of five cows robbed from their very doorstep only two months before. A few bolder spirits even followed the column to watch the course of events and to be ready, should opportunity offer, to claim, on the spot, their property, and, possibly, that of others!

At noon the cavalry moved out, and at 4 p.m. the infantry, their every movement followed by 500 pairs of wondering eyes, began their thirty-mile trek.

The route lay across a type of country known to the Persian as "dasht," an open plain entirely devoid of trees, and, for long stretches, even of withered scrub. The surface is hard and strewn with small black pebbles. The desert lark and lizard are the only inhabitants of this sea-like waste. Woe betide the unlucky traveller who wanders off the beaten track in this inhospitable region! Unacquainted with the few and distant landmarks, he will cover miles of ground in a frantic attempt to regain the path, and eventually sink exhausted to die of thirst. Robbers know the landmarks, and they cross this waste carrying large skins of water in order to approach unobserved the flocks that graze on the hill slopes.

An hour before sundown on the day of this march the west wind blew with such fierceness that long stretches of the track were completely hidden, and the animals, dazed and half blinded by a hail of gravel and sand, turned tail to wind and refused to move. At dawn the column left the "dasht" to traverse, first, a region of low hillocks, and then a belt of scrub, on the northern edge of which could be discerned the domed roofs of Deh Nau.

Within a very few moments of entering the caravanserai the men were asleep on the mud floors, and the patient donkeys, tethered in groups and eased of their loads, after twelve hours' continuous marching, were enjoying a well-earned rest. From S— to Hashimabad is reckoned at 106 miles. Of this distance forty-five miles had been covered in thirty-six hours.

(To be continued.)

BABYLONIAN GEMS.

The Story-Maskelyne collection of ancient gems, the property of Mr. W. E. Arnold Forster, of Zennor, near St. Ives, Cornwall, will be sold at Sotheby's on July 4 and following day. The collection was formed between 1860 and 1899, by Mr. Story-Maskelyne, who was Keeper of the Mineral Department of the British Museum from 1857 to 1879. The collection contains fine specimens of all periods from the early Babylonian and Mycenaean to the late Roman and Sassanian; it is especially rich in Greek gems of the fourth and fifth century. Many were shown at the Burlington Fine Arts Club in 1903, and have been illustrated in various works. The gems are, for the most part, mounted in gold rings.

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

June 20.—Mr. Harry Brittain asked whether the Government had made approaches to the Zionists throughout the world with a view to their assuming the full financial responsibility with regard to Palestine. If not, whether such approaches would now be made. Mr. Wood replied that the answer to both parts of the question was in the negative. As long as this country continued to act as the Mandatory Power in Palestine His Majesty's Government considers that it is incumbent upon them to accept the responsibilities, financial or otherwise, which such a position involves.

Mr. Ormsby-Gore asked whether work has ceased on both the Blue and White Nile dams; what was the original estimate for the cost of the two dams respectively and the present estimated cost; how much money had actually been spent to date on each dam; and what is the financial liability in respect of either falling upon the British Treasury under the Sudan Loan Act of 1919? Mr. Harmsworth replied that work on the White Nile dam has been suspended, but work is proceeding on the Blue Nile weir. According to information recently submitted to the Egyptian Government, the White Nile dam was summarily estimated in 1914 to cost ££1,000,000, but this estimate was made before any complete examination of the site had been effected. In 1918 the figure was revised to ££1,700,000, and in 1919 to ££2,200,000. The latest estimate for the dam itself, exclusive of subsidiary works which its construction would involve, amounts to ££5,700,000. The Blue Nile weir and Gezira canalisation project was estimated in 1916 to cost ££2,550,000, and in 1919 this estimate was revised to ££3,500,000. The latest estimate amounts to ££8,252,800. Actual expenditure up to March 31 last on the White Nile dam amounted to about ££556,000; that on the Blue Nile weir and canalisation scheme will amount on June 30 to about ££3,264,000. No financial liability in respect to the White Nile dam is incurred by the British Treasury. The contingent liability of H.M. Government in respect of the guarantee under the Sudan Loan Act, 1919, of interest on loans raised by the Sudan Government, is £350,000 sterling per annum.

Mr. Wood informed Sir John Rees that it was proposed that the capital value of such parts of the railways in Palestine as were constructed by the British military authorities shall be made a charge against the Palestine Government. The properties in question had not yet been valued. With regard to the Kantara-Rafa section, which runs through Egyptian territory, the Egyptian Government have not yet agreed to take over the section in question. The matter is still under discussion.

June 21.—Sir L. Worthington Evans informed Colonel Burn that during the period from January 1, 1921, to May 31 last, 4,572 horses, 1,794 mules, and 43 bullocks were destroyed in Mesopotamia. All these animals were unfit either for retention or sale. An offer had been received from a shipowner to transport 10,000 horses now in Mesopotamia from Beyrout to France or England. This offer was receiving consideration.

Mr. Chamberlain informed Mr. Aubrey Herbert that the provisions of the Treaty of Sèvres for guaranteeing the freedom of the Dardanelles do not contemplate the exclusion of the warships of any Power from navigating those waters. There could accordingly be no question, even if the Treaty were already operating, of preventing the passage of Greek men-of-war.

Mr. Chamberlain informed Mr. Aubrey Herbert that the question of fixing the frontiers of Albania had never come before the League of Nations. It had been referred for settlement to the Conference of Ambassadors at Paris by agreement between the British, French, and Italian Governments. Meanwhile the Albanian Delegation in Paris had appealed to the Council of the League of Nations to compose certain local differences that had arisen between Albania and her Serb and Greek neighbours.

Mr. Lambert asked for the total cost to the British Exchequer caused by the British occupation of Mesopotamia and Palestine for the years 1919 and 1920 respectively. Mr. Hilton Young replied that in the financial year 1919-20, during which demobilisation was proceeding, the total expenditure on Mesopotamia and Palestine together was estimated at between £70,000,000 and £80,000,000. He estimated the expenditure during the past financial year (1920-21) as about £40,000,000.

Mr. Harmsworth informed Sir Harry Brittain that no definite allocation of railway stock between the Succession states of the ex-Austro-Hungarian Empire had been settled. The movement of engines and goods wagons across the frontiers of the Succession States is not yet proceeding freely, but provisional arrangements have been made on the basis of the status quo, to render rolling stock the ownership of which is disputed available both for internal and international traffic. Austria, Hungary, and Roumania have entered into an agreement whereby the interchange of rolling stock between these countries is regulated.

Answering further questions regarding the sale and destruction of horses in Mesopotamia, Colonel Stanley informed Major Wheler that, in addition to those destroyed, there had been sold during the period from January 1, 1921, to May 31 last, 1,364 horses, 3,077 mules, and 621 bullocks, at an average of £30 per head. It is also proposed to hand over to the civil government 4,107 dairy cattle and 3,800 horses, the latter being for the use of the Arab army and levies. The Commander-in-Chief is allowed full discretion with regard to the disposal of all animals, subject to the instructions which have already been issued, that animals are not to be sold to natives unless there is good reason to suppose that they will be properly cared for.

June 23.—Mr. Chamberlain made the following statement regarding Lord Curzon's recent visit to Paris:—

In default of a meeting of the Supreme Council which cannot for the moment be arranged, the Foreign Secretary went to

Paris in order to exchange views with Monsieur Briand upon the principal questions which are at present concerning Great Britain and France, notably the position in the East and in Silesia. Prolonged and friendly conversations took place between them, and the Italian Ambassador joined the Conference when questions of Allied policy or Allied action were involved. It was felt by all the parties to be desirable that a renewed attempt should be made to terminate hostilities in Asia Minor and to conclude a peace between Turkey and the Allies. With this object in view it was decided to send a telegram to the Greek Government, to which the assent of the Italian Government was given, offering the services of the Allied Powers. The conviction was expressed in this communication that whatever might be the immediate result of a renewal of conflict between the Greek and Turkish forces in Asia Minor there was not to be found therein the prospect of any enduring pacification of the East or of a solution compatible with the real interests and ultimate capabilities of either party. In these circumstances the Allied Governments informed the Greek Government that they felt they were only discharging an international duty as well as an obligation of friendship in stating that they were prepared to attempt the task of conciliation if the Hellenic Government were disposed to place its interests in their hands. Should the Greek Government decide that it was not prepared to accept outside intervention or advice, the Allied Powers could not persevere in an action that would obviously be fruitless. In such a case the responsibility for the consequences of renewed struggle would rest upon the Greeks themselves. On the other hand, should the Hellenic Government decide in its own interests to accept the intervention of the Powers, the latter were prepared to state the terms upon which their assistance would be proffered, and, in the event of these being accepted, to approach the Turkish Government with a view to the immediate suspension of hostilities and to negotiations for the conclusion of peace. The Greek Government were invited to return a prompt reply to this proposal.

THE LEAGUE OF NATION'S ANNIVERSARY.

At the second anniversary of the League of Nations, which was celebrated in Hyde Park on June 25, the peoples of the Near East were well represented. Bodies of many different nationalities in London took part in the rally, including Georgians, Yugoslavs, Bulgarians, Italians, Czechoslovaks, Ukrainians, Roumanians, and Persians. Among the high personages attending the function were the Bulgarian Minister, M. Stancioff, and the Serbian Minister, M. Gavrilovitch; and the foreign speakers included M. Chedo Miyatovitch (Yugoslavia), M. D. Mamartcheff (Bulgaria), M. Pochobradsky (Czechoslovakia), M. Gugushvili (Georgia), M. Manzi Fe (Italy), Hajji Mirza Isphani (Persia), M. Mitrani (Roumania), and M. Olesnitsky (Ukraine).

THE LAST OF THE FUNGS.

(FROM OUR KHARTOUM CORRESPONDENT.)

A comparatively unknown but very picturesque character is that of the present chief representative of the Fung dynasty of Sennar, now residing at Abu Geilan. He was born in 1835, and is the grandson of the last Fung Sultan, Badi, who was forced to surrender to the troops of Ismail Pasha at Wad Medani in 1821. At the age of 21 he, with his family, accompanied his uncle, Taj el-Din (a son of the Sultan Badi), and the Mek Adlan of Singa, another grandson of the Sultan Badi, to Cairo. In 1863 he again performed the arduous journey to Cairo, in those days a matter of many weeks, and had the privilege of being received by Queen Victoria. In the historic defence of Sennar against the Dervish hordes he was second in command of the Fung troops, under his uncle Taj el-Din, distinguishing himself by his personal valour and generalship. He was seriously wounded on this occasion, and for a long time did not recover from the grief occasioned him by the loss of his eight sons, who fell in the severe fighting that then took place. Lord Kitchener, upon the reoccupation of the Sudan, specially noted him for reward in consideration of his conspicuous loyalty to British rule, and bestowed upon him a robe of honour. He does not occupy any official position under the Sudan Government, but in spite of his advanced age is most punctilious in paying his respects to the governing authorities upon every possible occasion.

Where Doorways are alternate Night and Day,
How Sultan after Sultan with his Pomp
Abode his Hour or two, and went his way.*

—OMAR KHAYYAM.

Apropos of the note in "English" from a Serbian interpreter to his O.C., which I reproduced in these columns recently (June 2), here is another specimen sent me by a kind correspondent. It was written by a Greek who sought employment with our forces during the war, and I give it in all its native beauty: "Sir,—I am refuse from Constantinople. I am brother the Cocho's, who is in your work for nine months. I speec the greek, frensh, turkish and a little English self editent. Also I am student of the university greek. Well founded in mayself. What can I to execute the duty the adjutant's. I beg you if you ple-ase and you have necessity the adjutant's, to accept me in your work. Willing. Peter D——." The "refuse from Constantinople" is indeed a delightful touch!

In its summary of the day's news the other day *The Times* placed an Egyptian item under the heading "Imperial." Apparently the energetic Zaghoul has not "spotted" this error (?) (yet); for we have heard nothing of any protest from him against it.

The following was reprinted in the *Balkan News* from a Yorkshire paper: "Messrs. The ——— Fish Trawling Co. Dear Sirs,—Enclosed please find p.o. value 2s. Send me basket of fish value 2s., as per advt. Do not send me cod, hake, plaice, or flukes, but send some middle cut salmon, a few lobsters and make up weight with oysters.—Yours, etc., ——— Secretary, Officers' Mess." To which the reply was: "Your p.o. to hand. It is a pity you did not send another tanner, as then you could have had the ——— trawler.—Yours, etc., The ——— Fish Trawling Co." Without vouching for the truth of the story, I would suggest that the writer of the reply must himself have been in the Army before he joined the ——— F.T.C.

The story of the Indian Post Office clerk whose valiant efforts to trace "R.S.V.P., Esq.," to his lair I recorded the other day, has reminded a correspondent of another case on similar lines within his own experience. He writes: "Some years ago, when I was well in the Indian back-blocks, I had occasion to send a parcel to Norwich. I sent it by peon to the local post-office together with the usual forms (yellow, green, blue, etc.), all duly filled in, but most carelessly omitted 'England' from the address. Post-haste came the following reply: 'Most deeply regret no country named Norwich is shown in Indian Postal Guide. Shall I try Norway?—Ram Lal, sub-postmaster.' The *cy-pris* doctrine is not, in India, at least, confined to lawyers."

I observe that at the Richmond Horse Show a number of metropolitan police appeared as (I quote the *Morning Post*) "wild sons of the desert, some mounted and some on foot, with blackened faces, wearing flowing Arab cloaks of the brightest hues, surmounted by turbans, gorgeous puggarees, and the more prosaic fez," etc., etc. Now I do not know why the police should have had black faces if they wanted to appear as Arabs; for though you do find blacks among the Arabs, they are no more true Arabs than the Irishman's kittens that were "born in an oven" were "loaves." Again, I never heard of Arabs wearing "puggarees"; though they may have taken to them quite lately. Probably the writer meant kefiyehs, the really "gorgeous" folded square of silk, cloth, or cotton that the Arab wears, held in place by the *agal*, or coil of camel-hair, or wool. But what I decline to believe at any price is that any *real* Arab would wear a fez (as a fez—that is without a turban or folded cloth round it) under any conditions. This costume, combined with the "weird dances, contortions," and so forth, of which the report makes mention, may be the policeman's "conception of the part," but it is not mine; and I venture to think that it is not that of anybody who knows the Arab. For all that, I am sure the police gave a good show; for they are a splendid set of men, for whom I have a great admiration. Only I expect that most of them know only the "street" variety of Arab.

A correspondent writes: "The following is an attempt at the reproduction of a speech made by a Macedonian who had learnt 'English' in America. It is recorded as accurately as possible, only the blasphemies and swear-words omitted. It was delivered at lightning speed.

"Men no good men.. What's the matter me? Working all day, hurry up! Hurry up! By G.! there'll be trumbles! Dat man no right. Got one man Turk men. That me no toikin good: every man right good.

no sick, no ting. Me Macedonian good man. I one right, die men. You no good officer toikin for me: bread all right, boys! Three timekeeper, no vershtay: what's the matter? Timekeeper me gone for me time-check in America-country. Here me eat the bread of the English king: blagaj me know: copreden for me job: tumach lie me: me fight: I toikin, me all right. I got 30 men. Eat the bread of the English king. One fool talk, come back all right: him come back for me."

My correspondent adds: "Toikin probably means talking: vershtay is obviously from the German; copreden probably means comprehends: blagaj is from Serb for paymaster; and tumach is Serb for interpreter." On what occasion the flood of oratory was poured forth, or to what purpose, I am quite unable to say. Perhaps some readers may amuse themselves trying to solve the puzzle during their summer holidays.

CORSAIR.

ENGLISH IN ROUMANIA.

The following paragraph is taken from the *Times Educational Supplement* of June 18.—

The Roumanian Government recently showed their appreciation of the value of the English language by a regulation making it a compulsory subject in all *lycees*. This regulation remains to some degree ineffective, owing to the want of a sufficient number of adequately prepared Roumanian teachers of English and to the depreciated currency which renders it impossible to invite English teachers to Roumania. The Government has now, however, taken another step in order that Roumanians may learn something about English. It has invited Professor Craigie, co-editor of the Oxford English Dictionary, to pass a month or so in the summer in Roumania to organise a pioneer summer school for English in Transylvania and to lecture on English. As is well known, Professor Craigie has originated a new method of teaching English pronunciation—namely, to reduce English to the level of a phonetic language by the use of a small number of accents and signs. This method commends itself strongly to Roumanians, accustomed as they are to accents in their own language. Mr. A. R. Wright, vice-president of the Folk Lore Society, will also visit Roumania, bearing greetings from various learned societies in England to the Roumanian Academy and to other Roumanian societies. It is hoped that the visit of Professor Craigie and Mr. Wright may not be an isolated event, but may lead to closer intellectual relations between England and Roumania, and to frequent interchange of visits among their savants.

NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

The Industrial Outlook.

After being prolonged since the end of March, it would appear probable that the coal strike is at last drawing to a close; but optimism at this outcome is unhappily tempered by the fear that the general resumption of industry may suffer a further and almost equally serious postponement as a result of a dispute that has arisen in the engineering trades over the reduction of wages. One can only trust that wiser counsels will prevail, and that this further calamity will be averted. Labour has only to look in any direction to see the results of its present policy, and the futility of high wages if it is impossible to produce goods at a price at which they can be sold. If a strike in the circumstances could force the consumer to pay, there might be something to be said for the use of the weapon; but, as it is, it is simply an attempt to avoid the inevitable, and its only result is to place the whole community at an added disadvantage as compared with other countries. The present position is aptly illustrated by the news published in the last few days of two further contracts that have been lost. In the one case the contract was for steel axles for India. America obtained it with a tender 30 per cent. below the offers of British firms. The other contract was for 10,000 tons of steel rails for Australia, and this went to the Continent, British firms being hopelessly under-quoted. Unless this process is to be indefinitely repeated we must produce more cheaply, and for that two things are necessary—a greater spirit of sacrifice on the part of Labour and an abandonment of the “ca’ canny” policy.

Burmah Oil Profits.

The announcement with regard to the dividend for 1920 made a few weeks ago showed that the Burmah Oil Co. had continued its successful progress. Details of the year's working are now forthcoming in the shape of the preliminary profit statement, which shows that the profits have risen from £4,654,784 in 1919 to £4,891,476. This time the chief allocation is in respect of depreciation, while there is a considerable reduction of the amount placed to the general reserve. The dividend of 30 per cent., as against 50 per cent., involves a distribution of £1,543,050, as against £1,428,750, on account of the bonus share issue. There is a considerable increase in the carry-forward at £2,142,184, but of this sum it is estimated that no less than £1,935,000 will be absorbed by the excess profits duty and the corporation profits tax.

Egyptian Hotels.

As the tourist season was not far removed from being a complete failure, the report of the Egyptian Hotels can only be regarded as being uncommonly satisfactory. The profits for the year ended April 30 were £56,675, as compared with £58,736 for 1919-20, and £36,500 for 1918-19. After the deduction of administrative charges, the profit amounts to £55,249, as against £56,200, and with the balance brought forward the available total is £64,200. The allocation to reserve and the dividend of 25 per cent. are unchanged from last year, but the carry forward of £9,100 is slightly higher than before. The company now appears to be in a fairly strong position, and provided conditions enable the normal resumption of the tourist traffic, shareholders should have little ground for dissatisfaction.

India and Export Credit.

While the suggestion I advanced recently that the extension of the application of the export credit scheme to British Possessions was to be attributed to the belief that the introduction of the Ter Meulen scheme rendered a wider sphere of operations necessary if the British scheme was to be retained is no doubt the accurate explanation, it is none the less hopelessly inadequate. For one thing, the Ter

Meulen scheme has yet to be applied, and as I have pointed out, its adoption may be a very long process indeed. For another, it is difficult to see what possible service the scheme can render, except in the case of trade with the mandated territories. But once its operation has been extended to British Possessions, there can be no case for the exception of any territory, however futile the scheme may be, and one can therefore sympathise with the spirited protest of Sir Manackjee Dadabhoy, Governor of the Imperial Bank of India, on the exclusion of India from the scheme, though it is impossible to follow him in his gloomy prognostications as to what will be the fate of British trade with India without the export credits scheme. I gather that the view is that the scheme will be useful in tiding over the time until the rupee reaches the magical 2s. But few people now believe that that parity can be attained, and in the circumstances it is to be regretted that anything should be said which can by any stretch of imagination be interpreted as lending support to that view.

The G.I.P.

The past year was not altogether a satisfactory one for the Great Indian Peninsula Railway Company. The gross receipts have again increased, though to a smaller extent than before, but working expenses have continued to rise, mainly as a result of the higher cost of labour, and the net result shows a deficit of Rs.13,99,000, as against the previous surplus of Rs.1,73,10,900. As a result there is no balance from the working of the line to provide any addition to the guaranteed dividend of 3 per cent., but from funds in hand the directors are paying an extra 1 per cent., making 4 per cent. for the year, as against 7 per cent. At the general meeting the chairman referred to the unfavourable trade position during the past year, and said that he could not say anything very encouraging at the moment as regards the current twelve months. He hoped, if the monsoon was favourable, for a considerable improvement before the end of the year, but the higher cost of working and the greatly increased cost of coal would again affect their yearly accounts.

Cable Delays.

Once more the question of cable delays has arisen, complaints being frequent in the last few weeks regarding the shortcomings of the service to India. An official explanation of the position is now forthcoming. It appears that the cables between Suez and Aden were stopped for a few days during May by magnetic storms, the result being a great accumulation of messages. Then during the whole of that month, owing to a cable of the Commercial Pacific Company being out of action, all the traffic between America and the Far East was diverted to the Eastern Telegraph Company's cables. These happenings took place at a time when renewal work was being carried out on this company's cables in the Red Sea. Hence the delays which are causing so much annoyance to the business community here.

Commerce and Industry.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

ROUMANIA.

BUCHAREST, June 8.

The Roumanian Treasure at Moscow.

The gold reserve of the National Bank, the jewellery and other valuable objects, which were entrusted to the Czarist Government for safe keeping in 1917, and were deposited in the vaults at Moscow, were till now supposed to have been misappropriated by the Soviet Government. The Soviet Commissary Litvinov, in a letter recently addressed to the Roumanian Commercial Attaché in Italy, declares in the name of Krassin that the treasure exists intact, and its restitution is dependent on the conclusion of the negotiations for an economic treaty which are in progress between the two Governments. In connection with this, at the request of the Moscow Government, the Roumanian delegation will meet the Soviet representative, M. Karakon, at Warsaw, instead of Reval, as previously arranged.

Miscellaneous.

The Custom House dues collected in April from imports and exports amount in round figures to 151 millions, compared with 13 millions for the corresponding month in 1920.

The tax on the export of tobacco leaves has been reduced by 1 per cent., and the export tax has been fixed at 10 per cent. *ad valorem*.

The negotiations between the Roumanian and Hungarian delegations for the regulation of the passenger and freight traffic between the two countries are being continued at Biharspusok, in Hungary.

A fair will be held at Cluj in Transylvania from July 15 to August 15, at which samples of all hand-made economic and industrial products from all workshops in Greater Roumania will be exhibited.

Counterfeit 500-lei banknotes, made in Russia and Poland, are being circulated; they are to be easily detected, the paper being coarse and the filigrane indistinct. A printing press for such notes has also been discovered in Berlin.

BUCHAREST, June 15.

Financial Reforms.

The outstanding feature of this week's proceedings in Parliament was the speech of M. Titulescu, Minister of Finance, in reply to the various criticisms of his Bill. He analysed all the objections raised against his scheme in Parliament and the Press, and disposed of most of them. His speech, which lasted nearly five hours, was most illuminating, and the whole House listened to it eagerly and marked its conclusion with enthusiastic applause, in which the public joined.

I propose to reproduce some of the most important statements made by the Minister. "Our pre-war national debt, he said, was 1.7 milliards of lei; to-day it reaches 27 milliards, of which four milliards represents our quota of the public debt of the former Austro-Hungarian Monarchy. Of the 27 milliards, our external debt is about five milliards, reckoning the lei at par, which represents one-fifth of our total debt; but if we take the present value of the lei, then the external is equal to the internal debt. The coupon of the external debt is 400 million francs. The redemption of our external debt must be postponed until the value of the lei rises.

"Besides this expenditure, we must make the necessary sacrifices for the development of the resources of New Roumania; we need railways, those of little Roumania being insufficient. Our future budgets will be increased for two causes—the extraordinary budget on account of the expenditure for reconstruction, and the ordinary on account of the rise in salaries. The ordinary budget will be covered by ordinary revenues, and the extraordinary with extraordinary resources, derived from the exploitation of the national riches.

"It would be a misfortune if deflation were to take place rapidly. Conditions of values have been established on the basis of the present circulation, which, if shattered, would cause disaster. A capital invested at present in industry would vanish if the lei were to rise suddenly.

"I do not aim at covering the deficits in one single year, but they must be eliminated from the ordinary budgets. The programme for reconstruction ought to be carried out within the ensuing seven years. The system of taxation until now was antiquated and unjust; it consisted of 90 per cent. indirect revenues and 10 per cent. direct; that means that the poor paid as much as the rich. My scheme is based on direct taxation on capital and income.

"The taxation on capital will not tend to reduce the capital possessed in 1914, but that made since, even if

made in the most honest way. I will strike hard at those who profited with roubles, crowns, commodities, permits, etc., and, last but not least, at the fortunes made by public officials. I refuse to make any reduction in the quotas imposed on fortunes made during and after the war; I have, of my own accord, lowered the quotas imposed on the banks, even below those proposed by their representatives, in order not to affect trade and industry."

Miscellaneous.

A large number of locomotives have arrived here from Austria. Many are expected soon from Czechoslovakia.

On account of the very heavy arrivals of foreign goods, 4,000 loaded wagons are blocking the principal lines and stations in Transylvania.

The Bucharest Municipal Council has resumed the negotiations with a group of English bankers for a loan of 150 million lei to be raised in London for the town of Bucharest.

It is proposed to reduce the export tax for cattle to 100 lei per head instead of 20 per cent. *ad valorem* and the commission tax to 20 lei. The export tax for pigs will also be 20 lei per head.

The Roumanian Government has been officially informed by the Inter-Allied Reparation Commission at Sofia that the first cash instalment to be paid by Bulgaria on account of the War Indemnity has been fixed for July 1.

M. Jan Vatrube, the vice-president of the Prague sample fair, has been delegated by his Government to go to Roumania to make the necessary preparations for the train with samples which will shortly visit the principal towns of Roumania.

Seven boxes containing gold crowns to the value of 14,300,000 gold francs have arrived here from Vienna. This sum represents a portion of the amount arising from the liquidation of the Austro-Hungarian Bank, which was allocated by the Paris Reparation Commission to Roumania.

The Manufacturers' Union have petitioned the Prime Minister urging the necessity of immediately putting in application the new customs tariff, as very large quantities of goods are being imported, which will be sufficient for the next two years, thus imperilling home industries, without, however, being of any benefit to the consumer, while the State will lose the increase in the import duty.

GREECE.

ATHENS, June 5.

Shortage of Labour in Thessaly.

The Inspector of Agriculture in Thessaly has applied to the Government for the immediate supply of labour, pointing out that if this is not done at once the crops will be entirely destroyed owing to the shortage of hands in the province. The Ministry of Agriculture has wired to the agricultural authorities at Salonika to arrange for the immediate dispatch to Thessaly of a large number of Caucasian refugees.

Ploughs for the Caucasian Refugees.

On being informed that the Ministry of Agriculture contemplated ordering 1,000 ploughs in Czechoslovakia for distribution among the refugees from the Caucasus, the Greek Chamber of Commerce in Athens protested to the Government at preference to foreign firms over local manufacturers. The Chamber of Commerce points out in its letter that in other countries, in addition to the special laws protecting home industry, the Government, as a rule, prefers to place orders locally, even though the prices quoted be 15 to 20 per cent. higher than those of foreign competitors.

ATHENS, June 18.

Control of the Exchange.

At a meeting held early this week at the National Bank, the Ministers of Finance and National Economy, the Governor of the National Bank, and the directors of the Bank of Athens, the Orient Bank and the Ionian Bank, examined for the last time the measures which would ensure the working of the Consortium.

The Committee of the Syndicate of Banks consists of M. Iliascu, of the Bank of Athens; M. Georgiadis, of the Ionian Bank; and M. Criezis, of the National Bank; and will be presided over by the Minister of Finance or by the Minister of National Economy. This committee will fix the rate of exchange every afternoon for the following day. For the time being only the banks participating in the formation of the syndicate will be authorised to operate in foreign exchange. These banks are those mentioned above.

Any person desirous of obtaining a cheque on a foreign bank must submit an application to one of the four banks. This application will be examined every evening by the committee, and on the following morning the client will know whether this has been passed or rejected. Travellers and persons, members of whose families reside abroad, will be granted foreign currency up to the amount of 1,000 drachmæ on presenting a signed application. The rate of exchange will be identical throughout the country. Sub-committees are being formed in all the principal towns in the provinces for the purpose of examining the applications submitted.

The Moratorium and Houses.

At a house tenants' meeting held at the Municipal Theatre it was decided to submit a memorandum to the Prime Minister demanding:—(1) The prolongation of the moratorium on houses for a further period of five years. (2) No increase whatsoever to be authorised on the present rents. (3) The families of tenants now serving in the army to be fully protected. (4) Cancellation of the moratorium article which gives permission to the landlord to eject his tenant under the pretext of demolishing or repairing his house.

Bulgarian Cattle for Greece.

The Inter-Allied Commission at Sofia has notified the Greek Government that the handing over to Greece of the Bulgarian cattle, in conformity with the Treaty of Neuilly, will commence on June 26 at Nevrokop. The first instalment will consist of 6,000 sheep, which the Government has decided to distribute to the populations of Eastern Macedonia.

BULGARIA.

SOFIA, June 18.

Need for an English Bank.

Although the proposed tax on the reserve capital of banks has been the subject of much adverse criticism in local banking and financial circles, none of the foreign banks here attach much importance to the matter. These banks are for the most part doing very good business. Thus the Italian-Bulgar Bank, which I mentioned some weeks ago, has in the fourteen months ended December 31 conducted operations totalling seven milliards of levas.

It is true that to-day we cannot sell great quantities of merchandise to Bulgaria because of the great difference in the rate of exchange, but the presence of a British or an Anglo-Bulgarian bank would give a much-needed impetus to trade between the two countries. It would help Bulgarians in opening credits in England, giving guarantees and doing all the work which goes to constitute the business of the commercial side of a bank.

If French, Italians, and Austrians, to mention but a few of the foreigners engaged in the transaction of banking business at Sofia, can obtain good results—some of them astonishingly so—then surely we can do the same.

At present, owing to the financial policy of the Government, everyone is looking for a sure and safe place in which he can invest his capital, and here again the opening for an English bank is obvious. At any rate, it would seem that British bankers might with advantage visit the country and make a complete examination of the situation as it affects their interests.

Tradition dies hard, and a considerable mass of the Bulgarian people still regard Great Britain as the nation that counts, and it is by finance and commerce that one can most readily justify this view.

The Consortium.

This institution is still very active, and during the last few days has sold about 2,000 wagons of wheat to Greece and Austria, and also a few hundred wagons of maize and rye to the latter country. The reduction of the export duties on cereals by a half will, it is hoped, enable further and bigger sales to be undertaken, and pending the intervention of the Reparations Commission in the matter the position of the Consortium remains very strong.

It is proposed to draft a law in the immediate future by which the export of wheat, rye, maize, and barley will be controlled by the Consortium, whilst the export of other cereals will be conducted by private traders. This does not very materially affect the position, as the remaining cereals do not constitute a very large proportion of the agricultural wealth of the country; oats, with an annual average production of 264,753 tons during the period 1906-1910, being the most important.

Considerable changes in the personnel of the Consortium are anticipated, but it is not the intention of the Government to abolish the institution, always provided that strong

outside pressure is not brought to bear on them. A view held by a number of disinterested persons is that it would be advisable to allow both the Consortium and private traders to function during a certain period, and peasants would thus be able to choose between the two, and at the end of the period the Government would be able to judge by results whether the Consortium is a success or not.

The Consortium will have as the foremost plank in its defence the construction of wheat elevators, which will be done out of the accrued profits. In this connection the Consortium claim to have made since the beginning of the year fifty million levas clear profit, of which 25 per cent. goes to the elevators, and to this has to be added 90 per cent. of the preceding profits, which amounted to 150 million levas, so that large funds are now at the disposal of the Government for the development of the industry.

YUGOSLAVIA.

ZAGREB, June 16.

Improving Conditions.

The harvest promises to be a great success. The country is prosperous, and the peasants are well off and contented. Foreign buyers from Germany, Austria, and Italy have been pouring money into their pockets, and there is no lack of food. The wine crop appears to promise to rival that of 1917, and communications, though still leaving much to be desired, have improved immensely.

General News.

The krone notes of the Austro-Hungarian Bank are now definitely obsolete in Yugoslavia, and have been proclaimed officially as valueless. The dinar is now the official currency throughout the country.

A Commission has proceeded to Wiesbaden to take over railway material which the Germans took away from Serbia and have not yet returned.

CYPRUS.

May 25.

As regards the asbestos mines on Mount Troodos, the sale of which to an English company for £125,000 was announced, it was stipulated that there should be a delay of three months, during which experts may inspect and report on the mines.

The traffic receipts of the Smyrna-Aidin railway for the week ended June 18 amounted to £45,424.

A new railway line is to be built between Nandyal and Roilkuntha in Madras, at a cost of Rs. 12,50,000.

The strike at the Union Dock and the British India Steam Navigation Company's workshop at Howrah, in which 5,000 coolies were involved, is now at an end.

The British Burmah Petroleum Co. has declared an interim dividend at the rate of 12½ per cent. per annum, free of tax, payable July 8, to shareholders on books June 21.

At the PERA AGENCY a complete installation of small safes is at the disposal of clients on favourable terms. The Bank has Agents in all the principal Cities of Europe, America, and the Far East, and has Correspondents throughout the World.

Every description of Banking business, in all its Financial and Commercial branches, undertaken.

Business Houses trading with Turkey can insure Foreign Exchange with the Bank. Banks, Commercial Houses and others having interests in Turkey are invited to apply for terms.

Manufacturers and Merchants may address their enquiries to the Head Office for Trade Lists of Importers and Exporters.

THE LEBANON SILK INDUSTRY.

DEVASTATING EFFECTS OF THE WAR.

Among the provinces of the once Turkish Empire, what is now known as the Greater Lebanon has perhaps suffered most through the war, notably through the practical ruin of the silk-growing and spinning industry, the greatest of its internal resources. The total exports of raw silk from Beyrout and Tripoli before the war ranged between 3,000 and 4,000 bales of 100 kilos each per year. During the few years preceding the war, owing to the growing scarcity of labour resulting from emigration, the owners of mulberry plantations found it more remunerative and less trouble to grow the orange instead of the mulberry tree, and many mulberry fields were transformed into orange groves, so that in the last year before the war the lowest average export was recorded, viz., about 3,000 bales.

During the war a great number of mulberry plantations in the plains round about Beyrout perished through want of care, and in many cases, especially in the essentially Maronite district of Kesrawan, most seriously affected by famine, the owners were reduced to cutting down their trees, having no other resources with which to stave off starvation for a time. In that ill-fated district the famine-stricken inhabitants ended by tearing down the wooden roofs, doors, and windows of their dwelling-houses in their desperate efforts to save their lives. There the once flourishing silk industry was absolutely ruined. The consequence was that the total silk crop last year hardly came to 700 bales! The silk crop from the plains round Beyrout and Tripoli represents about one-third of the total crop of the Lebanon.

It is sad to see that so far there is no sign of an organised effort to revive this industry, which was once the mainstay of the Lebanon peasant, and without organised help and official patronage there would be little chance of this being achieved, as may be seen from the following comparison drawn up by an expert between the yield of a Syrian feddan of land (about 2½ acres) before and after the war. In 1914 the feddan, which was worth about 56,000 Turkish piastres gold, was sufficient to raise six boxes of silkworm seed of 25 grains each. The box produced 30 okes of cocoons, which were sold at an average price of 20 piastres gold. The gross revenue was, therefore, 3,600 piastres, and the net income, after deducting cost of seed, price of manure, and the share of the tenant farmer, which amounts to one-quarter of the yield, came to 1,762 piastres, which represents about 3 per cent. on the capital. Since the war, however, owing to the impoverishment of the soil through lack of manure, only two boxes of seed have been raised per feddan, and the quality of the silk has been inferior, as the worms have been fed on the leaves of weakened trees. The oke was sold at 30 piastres gold, but the high cost of labour, which has more than doubled, and the difficulty and high cost of transport, left a deficit in the final balance. The gross proceeds of 1,800 piastres, after deducting price of seed and the quarter share of the tenant, left a net income of 1,270, but if the price of the indispensable minimum of manure were to be also deducted, there would be a deficit of 1,230 piastres gold.

It is hoped that the French authorities, as soon as they have settled more urgent and important problems, chiefly of a military nature in the interior, will take a practical interest in this industry, which so far has been a preserve of their own.

It was thanks to Government help that the orange groves of Jaffa, so seriously affected by the war, have been saved, and are now on the way to complete revival, as in a couple of years it is estimated that the pre-war level of exports will be reached. Facilities for the supply of petroleum for the motors at the beginning of the occupation, the granting of advances to the orange grove proprietors at a very moderate rate of interest, the supply of cattle and seed-corn to the farmers, as well as financial help to the villages for carrying out water distribution schemes in Palestine are so many examples of the Anglo-Saxon faculty of organisation and common sense. The achievements of the French in similar fields of activity in their colonies encourage the hope that it will not be long before the territory under their mandate in Syria and the Lebanon will receive similar benefits.

To relieve the serious plight of the mulberry grove owners, the establishment of land credit banks has been suggested; but, so long as the project of the cadastral survey remains in the domain of possibility, land mortgage and credit banks will move very warily. Unfortunately, the cadastral survey of the Lebanon is said to be an undertaking involving much time and expense, and it may be some years before it is carried out.

INDIAN TIMBERS AND PAPER MATERIALS.

Inquiries into the possibility of increasing the utilisation of Indian timbers in this country, and of making use of Indian paper materials, have been carried out in connection with the Indian trade inquiry undertaken by the Committee for India of the Imperial Institute, and the reports have just appeared in a volume published by Mr. John Murray under the title, "Reports on Timbers and Paper Materials" (price 4s.).

Hitherto the exports of timber (other than teak) from India have been relatively small, owing chiefly to the existence of a large local demand. It is considered, however, that there would be an opening for an extended export trade to the United Kingdom in certain hardwoods, which would be of value for decorative and other purposes, and are at present little known in this country. The characters and uses of a number of such timbers are described.

In the section on paper materials, a general statement is given as to the world's pulp and paper-making industry, special reference being made to the position in India. Details are included as to the possibility of utilising Indian bamboos and savannah grasses for paper-making, and the opinion is expressed that in these two materials India possesses valuable resources which occur under circumstances not unfavourable for their commercial development. It is considered that the immediate aim in the development of an Indian paper-pulp industry, which should receive every encouragement from the Government of India, should be to reduce, and finally to replace (as far as possible) by Indian supplies, the large amount of pulp and paper imported into that country. It is believed that the replacement of imports by Indian produce would be quickly followed by a surplus production which would be available for export.

SUDAN LOAN SERVICE.

In the House of Commons last week Mr. Ormsby-Gore asked the Chancellor of the Exchequer whether the sum of £350,900 per annum had been received to date from the Sudan Government in respect of the guarantee given by the British Government under the Sudan Loan Act, 1919, or whether any charge in respect of guaranteed interest had fallen on the British Treasury; whether it was now anticipated that, owing to the under-estimation of the cost of the Blue Nile dam and Gezireh schemes, the contingent liability of the British taxpayer would become an actual one; and, if so, to what extent?

Sir R. Horne: I have no reason to suppose that the Sudan Government will not continue as hitherto to meet the interest payments as they fall due, without recourse to the British Government guarantee.

Mr. Ormsby-Gore: Does that mean that the Sudan Government have a surplus revenue over expenditure this year?

Sir R. Horne: It means that the income which will ultimately be yielded upon the undertaking will be sufficient not merely to cover interest upon capital, at present expended, but also upon the capital that may be further required.

Earl Winterton: Is the right hon. gentleman aware that this undertaking has earned no money and is absolutely brought to an end; and is he aware that the Sudan Government has never had a surplus, but has had the greatest difficulty in making ends meet?

Sir R. Horne: I did not say that they had a surplus. I said that the income they will make when the undertaking is in working order will be more than sufficient to pay the interest on capital expenditure, and on any further capital that may be required.

Earl Winterton: Is the right hon. gentleman aware that it was announced the other day that the undertaking was held up altogether, and that it is not in a revenue-bearing position? What is going to be done meanwhile?

Sir R. Horne: I have not learned that there is any difficulty in raising the necessary capital.

The Roumanian Government have established at Hamburg an agency which will collect quotations and tenders from firms desirous of transacting business with Roumanian concerns.

The Yugoslav Government are considering the reduction of import duties on certain French goods with a view to the encouragement of French capitalists to undertake road and railway construction.

The Greek Government propose to waive or decrease the import duties on the necessary material and machinery for housing purposes and to exempt those who will build new houses from land tax and house duty.

It is announced that at the last sitting of the Superior Customs Board of Prague the following export taxes were fixed:—Maize 1,500, barley 2,000, and millet 500 lei per wagon. Wicker work articles are exempted from taxation.

A trade note from Sofia emphasises the unsuitability of English as the language to be used in correspondence with Bulgarian traders. German is used by most of our competitors for the market, and is generally understood by merchants in Bulgaria who, failing this, would prefer to receive communications in French.

BRITISH CONSULAR REPORTS.

I.—EGYPT.

We give the following extracts from the recently issued report of Mr. E. H. Mulock, H.M. Commercial Agent, Cairo, on the economic and financial situation of Egypt in 1920:—

The year 1920 has been a memorable and in many ways a phenomenal one in Egypt's economic and commercial history. It has been a year of crises, beginning with one on the Cotton Bourse in March, followed by the commercial crisis dating from April, a wheat crisis, a coal crisis, and finally the present cotton crisis. It has seen not only the rise of cotton futures and spot prices to a high watermark, which will probably remain an unbroken record, but also a sixfold drop therefrom to a figure which is only slightly more than 50 per cent. of the prices prevailing when this record season opened. It has witnessed a deadlock in the internal movement of imported manufactures simultaneously with wild speculation in cotton and land. It has seen a record cotton acreage, followed by legislative restriction of cultivation to one-third of each cultivator's holding. It has produced a record Budget and Note issue, and experienced the transformation of the exceptionally favourable trade balance of 1919 into an adverse balance of trade, as the result of foreign trade figures, especially imports, which upset all previous averages and surpass all former records. It has thus been a year of sensational developments, fluctuations and contrasts, and the factors in the economic situation of Egypt which the vagaries of cotton call forth have changed, and are still changing, with such bewildering suddenness that an appreciation of the situation that is true at the time of writing may be entirely falsified by the time these lines are in print.

Thus the prosperity of Egypt's finances in the early part of 1920 has given place to a condition of things which calls for retrenchment and economy on the part of the Egyptian Government in order to meet the deficit which began to manifest itself as the result of the working of the first five months of the financial year, while the fall in cotton prices, which has been continuous since March, 1920, is reflected in the monthly reduction of the Note issue from £E67,300,000 at the end of December, 1919, to £E37,200,000 at the end of January, 1921, thus adversely affecting the revenue accruing to the Government thereon. This latter figure is below the lowest level attained in 1919, viz., £E39,900,000 in July of that year, to which it fell from £E45,500,000 in January, and from which it rose to £E67,300,000 in December.

It should be borne in mind that public finance in Egypt can never be more than a superficial and incomplete index to the wealth of the country so long as the bulk of that wealth remains untapped, for a variety of reasons which are outside the scope of this report; also that, even if these obstacles to taxation were to be removed an appreciable but indeterminate portion of the country's wealth will always defy taxation, viz., the gold and notes concealed by the fellaheen, who distrust banks, in the soil and other hiding places, the secret of whose location is only known to, and sometimes dies with, its owner.

There are, therefore, considerable difficulties in the way of assessing the country's purchasing power, and although record import figures in 1920 are to some extent a gauge thereof, the trade slump dating from April, 1920, through which the country is passing, and which, though primarily the outcome of the world's commercial crisis, has been intensified in Egypt by wild speculation in, and overstocking of, manufactured goods, particularly yarns and textiles—which had since the Armistice commanded high prices and a ready market—would appear to indicate that the purchasing power of Egypt has been overestimated by those who based their calculations on the income likely to accrue to the country from the record-priced cotton crop of 1919-20, and on a continuation of high prices in the 1920-21 cotton season.

Bankruptcies, especially among importers of cotton piece goods, have been frequent, and the Mixed Courts are choked with

lawsuits brought against firms and merchants who have refused to take up consignments. The tendency of the importer during 1920 to keep his goods in the bonded warehouses rather than risk a fall in prices by putting them on the market has hardened the eventual consumer's resolution to hold out for the fall in prices, which he foresaw must come about when merchants realised that they must cut their losses and put their goods on the market at a sacrifice in order to raise money for the repayment of loans from the banks. The latter are in turn suffering the consequences of having, during the boom of high prices and quick profits, advanced money to speculators on a very narrow margin.

The fellaheen, who constitute so large a portion of the element of eventual consumers of yarns and cotton piece goods, cannot afford to buy so long as they are embarrassed by the difficulty of paying rents of agricultural lands which are disproportionate to the low price of cotton at present prevailing, regulated as they are to some extent by land values which are really artificial, having soared to fantastic heights during the frenzied speculation in cotton land, arising out of the boom in cotton prices, both spot and futures, which characterised the 1919-20 season. In many cases they have been fixed for three years on the basis of cotton at \$150, the results of which, when it stands at only \$30, are obvious.

Pilion v. Sakellarides.

The cultivation in Arizona of "Pima" or American-Egyptian cotton has been so successful that it bids fair to oust Sakellarides, so far as quality is concerned, from its pride of place in the eyes of the American spinner, and, if cultivated on a sufficiently extensive scale, to enable him to dispense with the finest grade of Egyptian cotton, except in so far as he needs it to make up such small remaining balance of his requirements as may be necessitated by slight shortages of the "Pima" crop.

In the meantime, the smallness of the demand from the United Kingdom spinners is an equally conspicuous feature of, and important factor in, the present cotton crisis, and one of the many dangers of its undue prolongation is that Egyptian cultivators may come to the conclusion on a large scale that it is not worth their while to grow Sakellarides, which no longer commands much higher prices than other inferior grades of cotton, but that the cultivation of some more prolific variety, such as Pilion (which, according to some authorities, produces 5-6 kantars per feddan, as against 3-3½ of Sakellarides), would be more remunerative, and therefore a far more attractive commercial proposition from their point of view.

Pilion first leapt into prominence in July, 1920, owing firstly to the fear that it might oust Sakellarides because of its more prolific yield and secondly to the danger of its affecting the purity of Sakellarides by admixture or hybridisation, either at the ginneries or, if planted too close together, of the seeds of the two varieties, owing to the similarity in colour. The controversy that raged round the rival merits of these two varieties, as also the protests and appeals made to the Egyptian Government, culminated in the passing of a Law, No. 41 of October 26, 1920, prohibiting the mingling of any two varieties of either cotton or cotton seed.

The supremacy of Sakellarides for the spinning of the finer counts might well become a matter of indifference to the Egyptian cultivator (who is at liberty to grow any variety he chooses), if tangible proof of its appreciation by the spinner in the form of brisk demand and an attractive margin of difference in prices were lacking for long. For instance, on February 25, 1921, the spot prices for Pilion were \$15½-16, as compared with only \$20-20½ for Sakellarides, whereas on October 29, 1920, the former stood at \$54-55 as against \$73-74 for the latter. It is also significant that previous to the latter date Pilion was never quoted separately at all, but was included under the general heading "Other Varieties." In other words, the remedy for abnormal decreases of acreage, increased cultivation of inferior and more prolific short staple varieties at the expense of Sakellarides, and any other actual and potential developments dictated by the financial aspect of the cotton situation that alarm the spinners, lies in their hands primarily and is afforded by the maintenance and promise of a good demand and prices that will, without being abnormal, furnish the necessary incentive to the grower.

Motor Tractor Trials.

That the activities of the Ministry of Agriculture are not confined to scientific research and experiments, or to the development of the cotton industry only, is shown by their enterprise in holding motor tractor trials of an international nature during the last four days of December, 1920. The report of the judges has not yet been made public. American tractors provided 50 per cent. of the twenty-six entries. The United Kingdom was represented by the Austin, Wallis Glasgow and Saunderson tractors, and the Crawley Agri-motor. The remaining machines were of French, German, Italian and Austrian manufacture. The soil of the locality where these trials were held, viz., near Benha, is comparatively light, and it will be interesting to see how the various tractors behave on the heavy land near Damanhour, where further trials are to be held in April.

It is unfortunate that this exhibition of the capabilities of rival motor tractors in the cultivation of Egyptian soil should have coincided with a period when the purchasing power of likely buyers has been reduced to its lowest ebb, but these tractor trials have been on the tapis for so long during 1920 that their postponement would have involved considerable financial loss to those manufacturers who showed sufficient enterprise to compete. It must also be remembered that it is only between the months of November and March that tractor trials can usefully be held on a large scale in Egypt. At all events purchasers will postpone judgment on, and choice of, the particular types of tractor

BRADBURY, WILKINSON & Company, Limited.

that they think will suit them until the concluding trials are over and the judges' reports on both sets of trials are published.

It is to be hoped that by then the trade slump will have eased somewhat, since, as will be seen below, price rather than quality is the principal consideration in determining purchases of machinery and other goods by native buyers.

Trade.

The year 1920, with its attendant commercial crisis, has proved very unfortunate for many firms both in the United Kingdom and in Egypt, as owing to (1) the enormous stocks held in the Egyptian bonded warehouses; (2) the present shortage of ready money due to the cotton crisis; (3) the number of small local manufacturers of various classes of goods which sprang into being during the war and are now, naturally, competing with United Kingdom products; and (4) the increase in the number of firms of doubtful character who are the usual aftermath of war, local agents have been unable to place orders for stocks on their hands, thereby causing, in many instances, great delay in payment of consignments from the United Kingdom and a loss of reputation in the eyes of the British exporter.

Small importers, who were in the habit of transacting business, in most cases in a perfectly straightforward way, by means of the C.O.D. parcel system, are now, owing to inability to raise money, refusing to accept such parcels, thereby involving a loss to the United Kingdom exporter and arousing his suspicion of firms in Egypt, as the Postal authorities are compelled to return parcels which are not claimed within fifteen days.

Larger men were refusing to withdraw their consignments of goods from the Customs, in view of the high prices charged by British exporters which will, in most cases, be unable to compete with foreign products if there is any market at all. Complaints in regard to the high prices demanded for cutlery of all kinds and machinery by the British exporters, whose goods are admitted to be the best on the market, are made on every possible occasion, and in the majority of cases it is the cheapest price that is preferred to superior quality of material, sometimes even in the case of Egyptian Government contracts. Large orders for railway material and rolling-stock, steel work, dynamos, etc., have thus gone to foreign firms because the British quotations have been too high, added to the fact that the date of guaranteed delivery was not satisfactory.

On the other hand there was a rush of deliveries throughout 1920 of various kinds of goods, particularly cotton piece goods, in the case of the United Kingdom, resulting in such appalling congestion of the Customs sheds, quays and bonded warehouses from April to October that all the available space was soon overflowing, and various buildings in the town, as well as sheds evacuated by the military authorities had to be rented or taken over by the bonded warehouses with the permission of the Customs Administration. The latter did what it could to relieve the pressure by holding daily sales at a 30 per cent. reduction, but it was principally due to a steady falling off of imports from August onwards that an improvement became possible at the end of October, after which the congestion became easier, until by February, 1921, it had become a thing of the past.

Exports of Algerian esparto amounted to 5,000 tons last year, compared with about 3,000 tons annually during the war and 10,000 tons before its outbreak.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to April 30 (new style January 14 to May 13), 1921.

	Monopolies, tobacco, stamps, stamped paper, Naxos emery.	Piræus Customs.
	Drachmæ.	Drachmæ.
Gross receipts, April, 1921.....	6,073,519'39	4,040,245'00
Do. do. 1920.....	6,096,246'48	5,359,646'00
Estimated receipts for 4 months (Law of Control)	9,633,333'33	3,566,666'67
Actual receipts for 4 months, 1921	20,518,206'66	17,755,147'65
Actual receipts for 4 months, 1920	20,616,348'18	21,177,961'90
Difference between estimated and actual receipts for 4 months	1921 +10,884,873'33	+14,188,480'98
	1920 +10,983,014'85	+17,611,295'23

NOTE.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1/5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893.

The products of the sales of Naxos emery have been paid in paper drachmæ since August, 1920. In the case of the Piræus Customs, the receipts in gold are included in the above statement at par.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned:—

[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]

Egypt.

Clothing, etc.—The Ministry of the Interior, Egypt (Lunacy Division) invites tenders for the supply of clothing and household requisites to the Abbasiya and Khanka Asylums. Tenders, on the proper form and accompanied by a provisional deposit of 2 per cent., are to be submitted to the Lunacy Division, Abbasiya. July 11 (D.O.T.).

Boots and Gymnastic Shoes.—The Egyptian War Department invites tenders for the supply of boots (infantry and cavalry) and canvas gymnastic shoes. Tenders and specifications may be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, Westminster, S.W.1, and samples may be seen at the same address. July 15.

Calcium Carbide.—The Egyptian Postal Administration at Alexandria invites tenders for the supply of 15,000 kilogrammes of calcium carbide for acetylene gas light plants. Quotations should comprise free storage at the sole risk of the contractor and free delivery (by periodical partial supplies during the year) at 62 railways or river stations specified. July 15 (D.O.T.).

Beans, etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 150 kilos beans, 150 kilos barley, and 4,000 kilos tinn, required for four months commencing August, 1921. July 16.

Yugoslavia.

Motor-Vans.—The Yugoslav Ministry of Posts and Telegraphs invites tenders for the supply of three (half-closed) light motor-vans. July 6.

Telephone Material.—The Ministry of Posts and Telegraphs, Belgrade, invites tenders for the supply and delivery of telephone material of various kinds. They should bear a 10 dinars duty stamp, and should be addressed, "Ekonomsko Odeljenje Ministarstva Posta i Telegrafa," Belgrade. A deposit of 20 per cent. of the total value of the tender is required from foreign firms. It is almost essential that United Kingdom firms competing for Government contracts in Yugoslavia should do so through an agent in that country. July 13 and 14 (D.O.T.).

India.

Steel Rails, etc.—The India Office invites tenders for the supply of steel rails and fishplates. (Spec., Director-General of Stores, Whitehall.) July 5.

Sleepers, etc.—The G.I.P. Railway Co. invites tenders for the supply of (1) cast-iron pot sleepers, (2) tiebolts, gibs, and cotters; (3) steel fishbolts and chairbolts; (4) helical springs; (5) spare parts of carriages and wagons (buffers); (6) spring steel; (7) linoleum; (8) plate glass; and (9) galvanised corrugated sheets. Specifications from the Secretary, 48, Copthall Avenue, £1 for 1, 2, 4 and 5; 10s. for 3, 7, 8 and 9; and 7s. 6d. for 6. July 5.

Steel Springs, etc.—The India Office invites tenders for the supply of steel springs and chilled cast-iron wheels for rolling stock. (Spec., Director-General of Stores, Whitehall.) July 8.

Springs, etc.—The India Office invites tenders for the supply of laminated springs, steel screw spikes, steel fishbolts, and dog spikes. (Spec., Director-General of Stores, Whitehall.) July 12.

Steel Bearing Plates, etc.—Tenders are invited by the Bombay, Baroda, and Central India Railway Co. for the supply of: (1) steel bearing plates; (2) spring steel; (3) wood screws, nails, split pins, etc. Specification £1 for 1 and 2, and 10s. each for No. 3. Secretary, The White Mansion, 91, Petty France, S.W.1. July 15.

Steel Underframes, etc.—H.E.H. the Nizam's Guaranteed State Railways Co., Ltd., invites tenders for the supply of: (1) 11 steel underframes for bogie carriages (metre gauge); (2) 44 pairs of wheels and axles for the above. (Specifications 10s. each.) Secretary, Winchester House, 50, Old Broad Street, E.C.4. July 15.

Bulgaria.

Telegraph and Telephone Material.—The Bulgarian Department of Posts, Telegraphs, and Telephones invites tenders for the supply and delivery of various tools, instruments, and materials for the current financial year. It is desirable that United Kingdom firms competing for Bulgarian State contracts should do so through agents resident in the country. July 11 (D.O.T.).

Telegraph and Telephone Material.—The Bulgarian Department of Posts, Telegraphs and Telephones invites tenders for the supply and delivery of various tools, instruments and materials, for the current financial year. July 11 (D.O.T.).

Cotton Waste and Machine Oil.—The Bulgarian State Railways, Sofia, invites tenders for the supply and delivery of: 100,000 kgs. coloured cotton waste, 2,000 kgs. white cotton waste, 100,000 kgs. cotton pieces, 600 tons machine oil, 300 tons wagon oil, 300 tons cylinder oil (ordinary), 20 tons cylinder oil (special), 200 tons impure petrol. July 15 (D.O.T.).

Malta.

Turbo-Alternator.—The Government of Malta invites tenders for the supply of 1,000 kw. steam turbo-alternator, 2,200-2,500 volts, single-phase, 100 cycles. Particulars can be obtained from the Crown Agents for the Colonies, 4, Millbank, S.W.1. July 7.

ENGINEERING TOPICS.

By our Engineering Representative.

An Austin Record.

I hear that the Alexandria-Cairo motor record has been broken by one of the famous Austin "Twenty" models, of the coupé type, driven by Mr. A. L. Benachi, who is well known in cotton circles in Alexandria. He made the journey, without an involuntary stop, in 5 hours 27 minutes, the best record previously being 5 hours 30 minutes, running time. It is only fair to add, however, that the previous record took no account of stops for engine trouble, tyre cooling, and replenishment of supplies of oil, fuel, and radiator water, so that Mr. Benachi's performance was evidently one of which he has every reason to be proud. Incidentally, I may say that the road between Alexandria and Cairo only dates from Lord Kitchener's time, and does not in the least resemble the Portsmouth road or the Great North road. In fact, it has been described as being little, if any, better than a camel track. It is full of pot-holes, very narrow, and has a surface of loose earth, which in winter is a sloppy mud, and in summer a fine, penetrating dust. A ditch, designed and used for irrigation purposes, runs on either side, and in many places it is an actual canal, with steep, unguarded banks. As the road is seldom used for vehicular traffic, there is great need for care in driving, as it is used by the natives as a highway for camels, donkeys, oxen, flocks of sheep, and also as a chicken-run. Motoring at anything like speed on this road must be a somewhat nerve-trying performance.

The Engineering Industry.

The peculiar position existing in the British engineering industry has been ably set forth by Mr. D. A. Bremner, of the British Engineers' Association. He points out that, although that body, being a purely trade association, confines its activities to the promotion of the commercial interests of the engineering industry, and plays no part in labour disputes or wages negotiations, it is vitally interested in their effects upon output costs of production and selling prices. As representing the commercial side of the industry—i.e., the side concerned with the profitable disposal of the products of their joint labours—he says it may claim to speak alike in the interests of employer and employed.

The present situation in the engineering trades is so grave, and the consequences to the nation threaten to be so serious, that the Council feel it their duty to present the following facts and reflections for the earnest consideration of all engaged in the engineering industry, both masters and men, and of every thinking citizen. Even before the national stoppage of work in the coal mines, a critical situation was developing rapidly in the engineering industry, because our costs of production were far too high in relation to the purchasing power of an impoverished world, in which many prospective customer countries were further restrained from buying by adverse exchanges entailing insupportable losses.

A contributory cause of our loss of trade was the ability of the United States, Germany and Belgium to undersell us. To the extent that Germany has been able to produce and export, the depreciation of her exchange has enabled her to quote prices with which the British engineering manufacturer could not possibly compete. In a lesser degree this also applies to Belgium.

In spite of the strenuous efforts of directors and managers, of which we have abundant evidence, our engineering firms are quite unable to secure the volume of business required to replace the orders executed during the last six months or now rapidly approaching completion. The fact is that although the world is in urgent need of vast supplies of products of engineering industry, to make good the losses due to the war and to increase the future rate of wealth production, these supplies cannot be ordered until prices are brought within the purchasing power of the customer. This applies even to the home market, where many big schemes are being held in a state of suspense because of the prohibitive cost of carrying them into execution at present prices. To the extent that our competitors can undersell us they will not only capture the overseas trade, but also invade our defenceless home market.

It must not be imagined that the resumption of coal mining will, by itself, revitalise the engineering industry, even though the settlement be on terms consistent with a low enough price for industrial coal. It cannot be too clearly and widely understood that the engineering industry has no chance of recovery unless and until a substantial reduction has been made in the costs of production. This is the problem to be solved, and failing its solution other considerations will be of little more than academic interest.

At some time in the not very distant future masters and men in the engineering trades will be compelled by the pressure of stern necessity to compare their differences and agree upon a *modus vivendi*. All their thoughts and energies

will be needed for the task of saving the industry by which they live. Delay in making this great constructive effort will merely increase the amount of leeway to be painfully and laboriously recovered, and imperil the chances of ultimate success.

Coal and Castings.

The use of coal in foundries for certain purposes appears to be a necessity, and although it is true that oil fuel can do practically all that can be done by coal in the way of smelting and annealing, and all the other operations in which heat plays a part, there is one essential in which, at present, oil does not give anything like efficient results. In almost every foundry devoted to the production of grey iron castings, coal, in a powdered form, is used as a facing to the moulds. It is mixed with the sand, which comes in contact with the pattern in varying proportions, which range from one part of coal to six of sand in the case of heavy castings up to one part in thirteen for light work. The gas evolved by the combustion of the coal dust, as soon as the molten metal comes into contact with it, forms a cushion between it and the sand of the mould, and so prevents the metal from burning into it. A limited number of small castings are produced in moulds in which no coal facing is used, but the great majority of casting users insist upon being supplied with clean, smooth products, and this feature so far necessitates the use of special coal. To such an extent is coal used for this purpose that in some of the largest foundries devoted to motor-car castings 200 tons of coal are ground to powder and used in the sand. A conservative estimate places the entire consumption of sea-coal facing in trans-Atlantic foundries at over 25,000 tons per month.

A Warning.

Owing to an extraordinary oversight on the part of the authorities responsible for drawing up the "log books," or registration books, for motor-cyclists, no provision was made therein for entering the frame and engine numbers of the machines. The various county authorities are now sending round the following notice to motor-cyclists:—"The motoring associations have represented to the Ministry of Transport that the accidental omission from the first issue of motor-cycle registration books of provision for insertion of frame and engine numbers will facilitate traffic in stolen cycles. The recipient is requested to send on the omitted numbers, and also to enter them in his own registration book."

Scientific Methods.

There is no doubt that there is ample room for the adoption of more highly scientific methods in our foundries and our engineering and metal-working shops. To-day nearly every large foundry depends, or should depend, on the chemist for the synthetic control of the iron charged into the cupola, and the smaller establishments where the output does not justify keeping up a chemical laboratory recognise that it is necessary to know the composition of the various consignments of raw material delivered to them, and would be thankful indeed if the pig iron manufacturers would supply them with analyses of all consignments. Dr. Stead said some little time ago that few can conceive what prejudice existed a few years ago in the minds of those who controlled the mixing of metals in the iron foundries. These gentlemen did not realise that, although the fractures of the pigs they used might be the same in different consignments from any single firm of pig-iron makers, the composition might vary to a marked extent, and that corresponding variations would occur in the castings. At one works where advice was given how to prepare synthetically suitable meltings from local iron to replace more expensive material imported from a distance, the foreman expressed the view that the expert was a "dangerous man." In more than one establishment it is beyond doubt that when a chemist was introduced and his advice taken, something was done to obtain a bad result. This sounds almost incredible, but is nevertheless true. Before real progress could be made the foreman had to be replaced by men who were less prejudiced.

That cast iron of almost any desired properties could be produced, given the necessary varieties of raw pig irons, has been proved long ago, even in the early 'seventies, by one firm which synthetically produces almost every kind of iron required, such as white iron suitable for carburising in the manufacture of crucible steel, iron having all the properties of cold blast iron, iron suitable for the manufacture of chilled rolls, malleable castings, and so on; but this was only possible because, from the inception of the work, chemical assistance was freely employed. It is now generally admitted that the peculiar properties of every brand of iron are due to differences in composition.

NEAR EAST MARKETS.

LONDON PRODUCE REPORT.

Dried Fruit.—A rather quieter tone has been in evidence in the market than in the previous week. Currants have been in moderate request at somewhat lower rates. The demand for sultanas continues, and prices are rising. Persian dates are moving off well at slightly harder prices.

Sugar.—Home refined has been steady at the official rates. West Indian crystallised is eighteenpence lower at 45s. to 50s. 6d., and American granulated at 56s. is 2s. 6d. down. Czecho-Slovakian at 28s. has shed a like amount. Quotations are:—June, 18s.; July, 17s.; August, 16s. 6d.; September, 16s.; October, 15s. 3d.; November, 15s., and December, 14s. 10½d.

Coffee.—Futures have remained firm. Quotations are:—July, 38s. 6d.; September, 39s.; December, 40s.; March, 40s. 6d.

Oilseeds.—A rather weak tone has prevailed. Indian linseed has lost 1s. 6d. to 20s., and La Plata at 18s. 9d. has dropped 9d. Rapeseed is higher, with bold Ferozepore 1s. 3d. up at 20s. 3d., and brown Cawnpore also 1s. 3d. up at 19s. 9d. Toria is unchanged at 21s. 5d. Cottonseed is lower, with Egyptian black at 11s., 9d. lower.

Oils.—Prices have declined. Linseed oil at 34s. 5d. is 1s. down. Rape oil is lower, with crude at 52s. and refined at 62s., decreases of 2s. in both cases. Refined cotton oil at 44s. and deodorised at 50s. are unaltered, while Egyptian crude at 37s. 3d. has risen 1s. 3d. Turpentine remains the same at 81s.

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for April:—

Gum.

Kordofan Province.—12,562 kantars were sold in El Obeid market during April, as against 13,628 kantars during the same month last year, at an average price of 656 m/ms. per kantar of 100 rottles (45 kilos.). 6,148 kantars were sold at Nahud at an average price of 300 m/ms. the kantar. The amount sold at Um Ruaba was 2,829 kantars, as against 1,218 kantars last year, the average price being 600 m/ms. per kantar. At Rahad 2,683 were sold at prices ranging between PT50 and PT70 the kantar, as against 848 kantars during April last year.

Cotton.

Kassala Province.—The total crop for the season is estimated at 45,000 small kantars. The cotton market commenced early in March, and 372 bales have been despatched to Suakin and 138 to Atbara direct. It is estimated that the crop will yield about 665 tons of lint; of this amount it is hoped to transport 285 tons to Suakin and 60 to Atbara direct by camel, leaving 320 tons to be dispatched by barge from Sasareib to Atbara during the flood. The Inspector of Agriculture reports as follows:—“All the cotton from throughout the Delta is sakellaridis. This year both quality and quantity appear to be very satisfactory. The plants are healthy and free from ‘Asal’ attack, and although a certain amount of damage was done by cold snap at the end of January, the quality and quantity of the crop seems to have been little affected.”

Red Sea Province.—Cotton is being brought in in large quantities, and the majority has been bought at a price of £2,835 per kantar of 315 rottles.

Wheat.

Halfa Province.—The barley crop for March is almost all in, and is very good in quantity and quality. The wheat crop is late but good. The wheat crops of April are being harvested in Halfa District, and the yield is reported fair to moderate. Barley crops are good.

Berber Province.—What is probably a record crop of wheat, and to a lesser extent of barley and beans (Egyptian) has been successfully harvested. The price of wheat was PT300 per ardeb of 420 rottles (189 kilos), and of barley PT90 per ardeb of 315 rottles (142 kilos).

Darfur Province.—The El Fasher wheat crop is, on the whole, good, but owing to the unusual hot spell experienced during the past month the late-sown wheat has almost entirely failed.

(To be concluded.)

Two companies of Berlin have combined with the object of working the Palestine market and that of neighbouring countries. Government control over the sale of alizarine dyes in Bengal has now been withdrawn.

Sleeping and restaurant cars are attached to the train leaving Kantara at 0.45 on Mondays, Wednesdays, and Fridays for Haifa and Jerusalem, and from Haifa at 5.30 and Jerusalem at 6 on Tuesdays, Thursdays, and Saturdays, also on the 4.50 train from Kantara on Tuesdays, Thursdays, and Saturdays, and from Haifa at 5.30, and Jerusalem at 6 on Mondays, Wednesdays, and Fridays. Restaurant cars are available on the train leaving Jerusalem at 6 for Jaffa, and from Jaffa at 12.45 for Jerusalem.

HOPEFUL ROUMANIAN OUTLOOK.

(FROM OUR OWN CORRESPONDENT.)

BUCHAREST, June 8.

In consequence of the favourable prospects of the coming crop for all cereals, the grain trade has been freed from all restrictions throughout the interior of the country.

During April the following quantities of cereals were exported (the figures representing tons of 1,000 kg.): Wheat 3,349; flour, 4,315; rye, 2,272; barley, 21,244; oats, 10,290; maize, 145,451.

On account of the decline in prices in the western grain markets, exporting firms have obtained a reduction of the export taxes, which are now as follows per 10,000 kg.: Barley, 2,000 lei; oats, 1,200; maize, 1,500; beans, 1,000; millet, 500.

CURRENT PRICES.

General Produce.—Bacon, 131s. cwt.; butter, 182s. cwt.; cheese, 97s. cwt.; chillies, 125s. cwt.; eggs, 20s. 3d. per 120; cloves (Zanzibar), 9d. lb.; cocoa (Ceylon, good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 122s. cwt.; coffee (East India, bold), 118s. cwt.; coffee (Mocha, longberry), 94s. 6d. cwt.; coffee (Santos, superior), 56s. 3d. cwt.; coffee (Nairobi), 100s. cwt.; lard, 77s. 6d. cwt.; hams, 161s. 6d. cwt.; ginger (washed, Cochinchina), 35s. cwt.; nutmegs (110's to 80's), 10½d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok, white), 9d. lb.; raisins (Valencia), 105s. cwt.; raisins (sultana, Smyrna), 145s. cwt.; currants, 71s. cwt.; sugar (granulated), 59s. 7½d. cwt.; sugar (No. 1 cubes), 62s. 9d. cwt.; sugar (white Mauritius), 54s. 6d. cwt.; sugar (West Indian, crystallised), 49s. 6d. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 15s. 9d. cwt.; rice (Rangoon No. 2), 16s. 7½d. cwt.; rice (bran, Rangoon), £6 14s. ton; cinnamon (firsts), 1s. 3d. lb.; mace (fair Singapore), 1s. 1½d. lb.; tea (Indian, common to good common), 8½d. lb.; tea (Ceylon, common to good common), 9½d. lb.; tea (Java, common to good common), 5d. lb.; wheat (Australian), 82s. 10½d. qr.; wheat (English, white), 96s. 6d. qr.; wheat (La Plata), 85s. 6d. qr.; barley (malting), 67s. 6d. qr.; oats (English) 47s. 6d. qr.; oats (La Plata), 29s. qr.; maize (La Plata), 47s. 9d. qr.; flour, 70s. sack.

Chemicals.—Acids: Boric, 71s. cwt.; oxalic, 9½d. lb.; citric, 2s. 5½d. lb.; tartaric, 1s. 7½d. lb.; ammonia (sulphate), £17 5s. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £19 ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 139s. cwt.; Potassium: Bi-chromate, 9½d. lb.; chlorate, 5½d. lb.; caustic, £39 ton; nitrate, £54 ton; permanganate, 1s. 8½d. lb.; prussiate yellow, 1s. 2½d. lb.; sulphate (90 per cent.), £21 ton; Sodium: Crystals, 145s. lb.; bi-carbonate, £10 5s. ton; bi-chromate, 6½d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 ton; hyposulphite, £21 10s. ton; prussiate, 7½d. lb.; nitrate, £18 8s. 9d. ton; glycerine (crude, 80 per cent.), £105 ton; glycerine (industrial, 1260 per cent.), £127 10s. ton; sulphate of copper, £31 10s. ton; sulphate of iron, 150s. ton; lemon oil, 3s. 1½d. lb.; quinine, 4s. 0½d. oz.; red lead, £37 10s. ton; white dry lead, £42 5s. ton; white ground lead, £50 12s. 6d. ton.

Metals.—Aluminium, £150 ton; antimony (English Regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £72 ton; copper (electro), £78 ton; gold bars, 109s. 3½d. oz.; iron (No. 3 Cleveland), 130s. ton; hematite (mixed number), 160s. ton; galvanised sheets (24G), £22 5s. ton; lead (soft foreign), £22 6s. 3d. ton; manganese Poti, 1s. 3d. unit; molybdenite, 48s. 9d. unit; nickel, £185 ton; platinum, 365s. oz.; plumbago, £20 ton; quicksilver, £10 17s. 6d. bottle; silver bars, 35d. oz.; spelter (G.O.B.), £27 ton; tin (standard), £168 7s. 6d. ton; wolfram, 12s. 9d. unit; zinc sheets, £36 10s. ton; tin plates (20 by 14), 25s. 3d. box.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 8½d. lb.; 80 to 89 lb., 8½d. lb.; 70 to 79 lb., 8½d. lb.; 60 to 69 lb., 7½d. lb.; 59 lb. and under, 6d. lb.; (second) 90 lb. and up, 7½d. lb.; 80 to 89 lb., 7½d. lb.; 70 to 79 lb., 7d. lb.; 60 to 69 lb., 6½d. lb.; 59 lb. and under, 5d. lb.; Cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 7d. lb.; (second) 60 lb. and up, 4½d. lb.; 59 lb. and under, 4½d. lb.; Bulls (first), 4½d. lb.; (second) 3d. lb. Calcutta market prices in rupees per 20 lb.: Arsenic hides (cows), Agrad, 9 to 13; Durbhangas, 9.8 to 11.8; Patnas, 7 to 8; Salted cows, 3 to 7. Arsenic hides (buffalo), 3 to 8. Skins: Calf, 8 to 10 per 20 lb.; goat, 235 to 290 per 100 pieces.

Miscellaneous.—Cotton (American), 8.40d. lb.; cotton (Egyptian), £11 11s. 3d. ton; linseed (La Plata), £18 10s. ton; rape (Toria), £20 ton; soya beans, £12 12s. 6d. ton; palm kernels, £19 7s. 6d. ton. Oils.—Linseed, £34 12s. 6d. ton; soya, £35 ton; cotton (crude), £36 ton; olive (Levant), £82 10s. ton; ground nut, £40 ton; palm, £32 15s. ton; rape (crude), £54 10s. ton; cocoanut (Ceylon), £46 4s. 6d. ton; petroleum, 1s. 10d. gallon; turpentine (American), 78s. 6d. cwt.; shellac (A.C. garnet), 290s. cwt.; shellac (T.N. second orange), 382s. 6d. cwt.; rosin (American), 21s. cwt.; copra (Ceylon), £29 15s. ton; copra (Straits, F.M.S.), £28 6s. 3d. ton; tallow (Australian mutton), 34s. 3d.; tallow (Australian beef), 35s. cwt. Rubber.—Plantation (No. 1 crepe), 8½d. lb.; smoked sheet, 8d. lb.; fine hard Para, 11d. lb.

Anglo-Egyptian Oilfields.—Production week ending June 17: Gamsah, 34 tons; Hurghada, 3,140 tons.

COTTON AND COTTON GOODS.

POSITION IN THE SUDAN.

(FROM OUR OWN CORRESPONDENT.)

KHARTOUM, June 9.

Red Sea Province.—Reports to hand during the month of May state that cotton has been brought into the Tokar market in good quantities, some 5,000 kantars (of 100 rattles) being dealt with there daily. There has been a certain amount of difficulty in respect to the insurance of unginced cotton for transport on the Tokar-Trinkitat Light Railway, but it is understood that this matter is in course of being satisfactorily arranged. Sales from April 2 to 28 were as follows (in kantars):—First class, 43,665; second class, 19,423; third class, 692; total, 63,780.

Kassala Province.—Cotton ginning returns from the Government factory at Kassala give a total of 9,434 kantars handled, producing 3,010 kantars of lint. The total cotton marketed during April amounted to 18,418 kantars. The factory has been running at its maximum capacity for sixteen hours daily from the middle of March last. The present installation can only deal with a maximum of 40,000 to 45,000 kantars in the season. Transport between Kassala-Atbara and Kassala-Suakin is reported to be operating satisfactorily.

MANCHESTER REPORT.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Monday.

As was generally expected, the settlement of the wages question in the cotton industry has resulted in a firm tone being established in the market. After a three weeks' stoppage the Lancashire mills are now at work, though not on full time; the Masters' Federation are shortly to consider the state of trade, but it is not anticipated that they will recommend the mills working a full week. During the past week quite an extensive inquiry has been dealt with, and some useful lines from stock have been cleared. With regard to the outlets of the Near East, Egypt has been the principal buyer, but no big sales have been registered. Occasional transactions have taken place for the Levant and Constantinople. Quotations for Egyptian counts have been well held, and prices are tending to stiffen. The turnover, however, has been nothing to boast about. The piece goods inquiry for India has tended to broaden, but some very poor offers are still being cabled over. At the same time some useful sales have taken place, chiefly in light goods for Calcutta. Shippers to China have not been altogether idle, and encouraging sales have taken place, principally in bleaching descriptions. South America still lags behind. Users of American yarns have shown no increased disposition to replenish their stocks, but prices have continued firm. Taking the market all round, the position at the moment is extremely favourable, and the opinion is fairly prevalent that should the coal strike be settled within the week the trade will commence to move upwards towards a period of increased activity. All traders believe that we have turned the corner towards better times.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended June 23:—

We regret that no favourable change in the general situation has yet occurred to influence this market. The one bright feature this week has been the obstinate way in which prices have held up in face of the bitter disappointment experienced at the commencement of the week. At a time when the result of the miners' ballot was still in doubt, prophets were not lacking who foretold dire calamity to the market should the coal strike continue. "Egyptian cotton at eightpence" was a phrase frequently heard. Well, the strike continues, unfortunately, and the net result to-day is a decline of one halfpenny. Contracts certainly suffered more of a set-back, but at the worst they declined little over one penny, and are now only 30 points from where they were this time last week, and they look quite healthy. Manchester, whilst unable to report very much doing at the moment, reiterates what it has already pointed out not once but many times, as to the volume of business piling up and waiting until that happy time arrives "after the (coal) war," when contracts can be booked without the ubiquitous strike clause being included, and some certainty of delivery can be guaranteed. Business in Liverpool has been of a most meagre description, the demand having dwindled almost to the vanishing point. Fifty bales a day has been the rule, and the figures speak for themselves. Thirty bales of Sudan were moved, at what price is not known. A slight improvement in c.i.f. business has been noted. Total sales 250 bales. Quotations generally are reduced $\frac{1}{2}$ d. per lb. F.G.F. Sakel 15.50d.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 13:—During the week ending June 4 rainfall nearly general in Burma and Bengal and light to moderate elsewhere; since that date the monsoon has been fairly active in Burma, and in the south of the peninsula it is extending on the west coast. Crop prospects fair to good generally, except in Punjab and North-West Frontier Province, where more rain badly wanted. Weather again favourable for new jute crop in Northern Bengal. Some damage done by excessive rainfall. Sowings recommended in Daisee district, but acreage under jute there expected greatly reduced during this season.

Bombay cotton market steady. Fine M.G. Oomra, July Rs.298, September Rs.311. Bombay cotton arrivals from September 1, 1920, to June 2, 1921, were 2,242,000 bales, as compared with 2,942,000 during the corresponding period of the last year. Bombay piece-goods market quiet, but steady. Stocks of piece-goods in Bombay Port Trust warehouses on April 30 last were 76,689 packages, as compared with 86,082 packages on March 30 last. Calcutta jute market very dull, with prices a little weaker. Hessians firmer, owing to bazaar demand, but no overseas inquiry; heavy goods steady to firm, with continuing fair demand for Cornsacks. Rangoon paddy arrivals fair by boat. Railway strike being over, increased arrivals expected by rail. Rates steady at Rs.201 to Rs.204 for rail and Rs.204 to Rs.206 for boat, for 100 baskets of 46 lb. each. White rice market declined in earlier part of the week, and fair quantities of small mill and meedung qualities sold from Rs.515 to Rs.530 per 100 baskets of 75 lb. each. Specials fell to Rs.510, but quickly recovered, and are now at Rs.517.80 to Rs.522.80 for June-July delivery.

Construction of metre gauge railway from Gadwell, on the Nizam's State Railway, to Kurnool, on the Madras and Southern Mahratta Railway (forty miles) by Nizam's Government sanctioned. No change in bank rates.

A later cable, dated June 20, states:—

During the week ending June 11 rainfall heavy in Burma, Assam, Eastern Bengal, Bombay, and West Madras Coast, and light to moderate elsewhere. Since that date monsoon again active in the peninsula and central parts of the country. Crop prospects fair to good generally, but more rain urgently wanted in the United Provinces of Agra and Oudh, Punjab, and North-West Frontier Province, and also in Bihar and Orissa. Rainfall somewhat in excess and spell of bright weather would be beneficial. Flooding has occurred in some very low fields where cutting has commenced, but loss expected to be small, as average height of plants is 7 ft. Daisee sowings proceeding slowly.

Bombay cotton market steady to firm during earlier part of last week, but easier later. Fine M.G. Oomra July Rs. 312, September Rs. 329. Bombay cotton arrivals from September 1, 1920, to June 9, 1921, were 2,321,000 bales, as compared with 3,015,000 bales during the corresponding period of the last year. Bombay piecegoods market shows some improvement in both wholesale and retail inquiries. Certain staple styles getting short of stock and necessarily prices for these firm, but stocks of certain styles in whites, such as nainsooks, very heavy. Local goods moving steadily, demand for local fancies being good and clearances satisfactory. Calcutta jute market very dull, with prices unchanged. Hessians quiet, but steady. Heavy goods steady, with some small inquiry for heavy C's. Rangoon paddy arrivals good by boat and fair by rail. Prices have firmed up, and are Rs. 207 for rail, and Rs. 207 to Rs. 212 for boat, for 100 baskets of 46 lb. each. In white rice business is fairly brisk both in specials and small mill quality. Fair quantities of former sold at prices ranging from Rs. 517½ to Rs. 545 per 100 baskets of 75 lb. each for July delivery. At first tea sale of new season on June 14 offerings were only from Dooars, Terai, and Darjeeling. Dooars very good, Terai good, and Darjeeling irregular. Prices were 3 to 6 pies dearer for all common grades. Tippy kinds also dearer. Good liquoring, Broken and Fannings met with keen competition, and realised very high prices: 7.276 packages sold at sale at an average price of 8 annas 3 pies per lb.

OIL NOTES AND NEWS.

Burmah Oil.

The preliminary accounts of the Burmah Oil Company for 1920 show that the profit was £4,891,476, as against £4,654,794 in 1919. The sum of £1,153,753, as against £498,856, is reserved for depreciation; £195,000, as against £1,291,000, is placed to general reserve; and £20,000, as before, is allocated for insurance reserve. A final dividend is proposed of 4s. per share, free of tax, making 30 per cent. for the year on an increased capital, and £2,142,184 is carried forward, subject to excess profits duty, as against £1,536,994 in 1919, also subject to this liability.

Anglo-Persian Oil Dividend.

The transfer books of the Eight per Cent. Cumulative First Preference shares of the Anglo-Persian Oil Company will be closed from July 4 to July 16, inclusive, for the preparation of dividend warrants in respect of the cumulative dividend at the rate of 6 per cent. per annum for the half-year ended March 31, 1921, and the 2 per cent. participating dividend for the year ended that date, both payable July 30. The participating dividend is paid six months earlier than usual in accordance with the circular issued to shareholders in February last. The fixed dividend of 8 per cent. on the above shares will in future be payable half-yearly.

COMPANY MEETINGS.

GREAT INDIAN PENINSULA RAILWAY COMPANY.

Outlook for Current Year.

The 143rd half-yearly general meeting of the stockholders of the Great Indian Peninsula Railway Co. was held on June 24, at the company's offices, 48, Copthall Avenue, E.C.

The Chairman (Sir Charles H. Armstrong), in moving the adoption of the report, pointed out that, while the statistics of the railway were for a full year, the London accounts were for six months only. This was in accordance with the company's Act, and with the arrangement lately concluded with the Secretary of State. The year under review had not been as satisfactory as he had hoped, and owing to a variety of circumstances, mostly adverse, they did not show the same steady progress as in the past. Gross earnings had increased by only 1.48 per cent., and the improvement was mainly due to larger receipts under the head of sundries. Although the number of ordinary passengers carried was over 39,500,000, or about 3,750,000 in excess of the previous year, the receipts from trouping fell off considerably, and the net result in coaching was a decrease of nearly 5 lakhs of rupees. Goods earnings, on the other hand, increased by about 6½ lakhs, or 0.83 per cent., as compared with the previous year. Working expenses were higher, however, by over two crores of rupees, and the net result, after the inclusion of all interest charges, was a deficit on the 3 per cent. guaranteed by the Secretary of State of 13.99 lakhs, which was equal to one-fifth per cent. on the capital expenditure of the line. From funds in hand the directors were, however, declaring a dividend of 1 per cent., in addition to the guaranteed interest of 1½ per cent. for the six months, which made a total for the year of 4 per cent., against 6 per cent. and 1 per cent. bonus distributed a year ago. The export trade of India had been greatly hampered during the twelve months by the inability of continental markets, owing to their general impoverishment and low exchanges, to purchase raw materials, such as cotton and oil seeds, in which they were very largely interested.

As regarded the current year, he could not say anything very encouraging at the moment. Passenger fares had lately been increased more or less up to the limits allowed. The rate for coal had also been brought, he hoped, on to a paying level. In other directions rates had been increased to some extent, but even with these advances their gross receipts did not so far show any material advance on the figures of a year ago. He was hoping, if the monsoon was favourable, and the progress of the rains was so far satisfactory, for a considerable improvement before the end of the year, but the higher cost of working and the greatly increased cost of their coal supplies would again affect their yearly accounts.

The report of the Indian Railway Committee was likely to be issued during the summer, and its financial recommendations were being awaited with considerable interest. With the best will in the world, it was impossible for an Indian railway to keep ahead of its traffic if funds for necessary improvements and extensions were not forthcoming. He hoped this question of an improved system of finance would form the main recommendation of the Indian Railway Committee, for without a sufficiency of funds no system of railway management could be really successful.

Mr. J. E. Dallas (managing director) seconded the motion, which was carried unanimously; and the proposed dividend was also approved, on the motion of the Chairman, seconded by Mr. J. F. Finlay, C.S.I.

At the twenty-first annual meeting of the annuitants, which was held previously, the chairman stated that a year ago he mentioned that there was considerable depreciation on some of the investments, and the position to-day was very much the same as at that time. As a set-off against this depreciation, they were now able to invest on a much more favourable basis. The total amount to be invested every year was over £500,000, and on the average they were able to get a return of about 6 per cent., which, after deduction of income-tax, gave about 4 per cent. net, against 2½ per cent., the basis on which the fund was formed. The average return on the whole of the investments was £3 19s. 10d., and the average net yield, after deduction of income-tax, £2 18s. 3d.

The Doars Tea Co. declare a dividend of 3½ per cent. on preference (7s. per share), being moiety in respect of 1920, less tax.

The Empire of India and Ceylon Tea Co. declare a dividend of 2½ per cent. on preference (5s. per share), being moiety in respect of 1920, less tax.

The traffic receipts of the Egyptian Delta Light Railways for the week ended May 31 amounted to £E8,205; total for year, £E55,719. For the corresponding period of last year, receipts amounted to £E11,015 and £E69,889 respectively.

Constantinople Telephone—Coupons on six per cent. obligations and six per cent. certificates due July 1 are payable on or after that date at the Imperial Ottoman Bank, 26, Throgmorton Street, E.C.2, where listing forms can be obtained.

COMPANY NOTES AND REPORTS.

Mortgage Company of Egypt.

The report of the Mortgage Company of Egypt for the year ended March 31 states that after providing for interest on the 4½ per cent. first-charge debentures and on temporary loans, and applying a sum of £1,500 in writing down the value of the freehold premises of the company in Cairo, the accounts show a profit for the year of £80,310 2s. 3d. Deducting the amount of the dividend paid and accrued on the 5 per cent. preferred shares to March 31, 1921, viz., £50,000, there remains a balance of £30,310 2s. 3d. Adding the amount brought forward from last year's account, £52,939 2s. 3d., there is available for distribution a total sum of £83,249 4s. 6d., which the directors propose to allocate as follows:—(1) To payment of a dividend of 12 per cent., being 3s. per share, on the amount paid up on the ordinary shares, £30,000; (2) to general reserve, £10,000; leaving a balance to be carried forward to the next account of £43,249 4s. 6d. The price of cotton, which was very high at the commencement of the period under review, fell rapidly during the year, and the consequent check to the prosperity of Egyptian agriculture resulted in a large increase in the applications for loans and a falling off in the collection of instalments. The amount invested in first mortgage, increased from £2,589,083 to £2,877,848, and the instalments in arrear from £111,158 to £240,238. Any losses which may arise under the latter head are considered to be fully provided for in the reserve for bad debts. During the financial year the company purchased a further £136,400 nominal of its 4½ per cent. first mortgage debentures, of which £53,780 nominal have been cancelled, and the remainder, £82,620 nominal, are held in investment account. Sir Henry Babington Smith, G.B.E., K.C.B., C.S.I., the Hon. A. H. Mills, and Captain R. G. Westropp, directors of the company, retire by rotation, and, being eligible, offer themselves for re-election. Meeting, Cannon Street Hotel, E.C.4, to-day, 12.15.

Egyptian Hotels.

The report of the Egyptian Hotels for the year ending April 30 states that after charging all expenses in connection with the working of the hotels the profits were £56,675 4s. 4d., as compared with £58,736 17s. 6d. for 1920. After providing for the charges payable in London and Cairo, the accounts show a profit of £55,249 9s. 2d.; the balance of undivided profit brought forward from last account is £8,950 9s. 5d.; from this has to be deducted depreciation of plant, fixtures, and fittings at hotels, £3,118 4s. 11d.; leaving an available balance of £61,081 13s. 8d. The directors recommend the payment of a dividend of 5 per cent. per annum on the preference shares for the year to April 30, absorbing £5,750; the payment of a dividend on the ordinary shares of 25 per cent. for the year, which will absorb £31,250; to place to special reserve £15,000; leaving a balance to be carried forward of £9,081 13s. 8d. Since the close of the company's financial year the business of Shepherd's Hotel has been satisfactorily maintained. The director retiring is Sir William B. Peat, C.V.O., who offers himself for re-election. The auditors, Messrs. Turquand, Youngs, and Co., retire, and offer themselves for re-election. Meeting, 11, Ironmonger Lane, E.C., to-day, at 11.30 a.m.

Great Indian Peninsula Railway.

The report of the Great Indian Peninsula Railway Co. for the year ended March 31, 1921, states that the gross receipts totalled Rs.13,83,04,893, and net revenue was Rs.3,18,80,321, a decrease of Rs.1,91,60,673. The gross earnings of the railway totalled Rs.12,81,81,819, and net earnings were Rs.2,91,33,269. Total interest charges absorbed Rs.3,05,32,324, leaving deficit of Rs.13,99,055, compared with a surplus of Rs.1,73,10,955 the previous year. From reserve funds the directors have decided to pay a dividend of £1 per cent., in addition of £1 10s. per cent. for half-year guaranteed by the Secretary of State for India. Capital expenditure during the year amounted to Rs.2,29,97,905.

The Bombay-Baroda Railway.

The net earnings of the Bombay-Baroda and Central India Railway Company for the year to March 31 totalled Rs.3,18,20,361, a decrease of Rs.1,07,21,438 compared with the previous year. Coaching traffic shows an increase of Rs.21,53,500 on broad gauge and Rs. 12,42,902 on metre gauge; goods traffic, an increase of Rs.8,34,661 on former and a decrease of Rs.9,79,011 on latter; sundries, an increase of Rs.6,89,590 on broad gauge and decrease of Rs.43,281 on metre gauge; and telegraph, decrease of Rs.6,052 on former and Rs.15,932 on latter. Out of Rs.6,27,608 due to the company in respect of 1920-21, Rs.2,91,434 was remitted to England in December, 1920, producing £20,415, and the balance is, in view of the present low rate of exchange, being retained in India on deposit. Directors recommend a final dividend of 2 per cent. (of which about 1 per cent. will be paid from the balance at credit of stockbrokers' revenue account), making 6 per cent., compared with 7 per cent. for 1919-20. Meeting, Cannon Street Hotel, E.C., to-day, noon.

Travellers to the Near East

Can obtain all information as to the journey from
Continental Traffic Department,
Victoria Station (S.E. & C.R.), S.W.1.

SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

STAMBOUL, June 11.

The improvement in business noted in previous weeks has again been checked, Anatolia having ceased buying. The consumption of stocks consigned to Roumania goes on gradually, but at more and more reduced prices.

Sales are limited to those for local consumption. The marked rise in sterling has embarrassed merchants who had given orders for seasonable commodities.

Produce.—Sugar: Prices continue to fall for Java and for American. It is reported that there have been offers of Java June-July at £22-23 per ton, and for August-September at £18-19. Despite the fall, buyers are maintaining a reserved attitude. Quotations are: Java, £23-24; American, 11 dollars per 100 kilos; Dutch, £34-35 per ton. Disposable here is quoted at £37-38 per ton.

Rice.—There has been a rapid improvement as a result of large purchases that have been effected. Rangoon f.o.b. Port Said is £17 per ton, and Saigon No. 1 is £16. Here Saigon is quoted at 13 to 14 piastres per oke.

STAMBOUL, June 18.

The consumption of stocks is proceeding slowly. Wholesale prices continue to fall. Imports consist chiefly of flour and colonial produce; those of manufactures are negligible.

Taking advantage of the determination of retailers to maintain the high prices, a great number of stallholders are established on the public road, who buy for immediate resale goods of an inferior quality. These sales have led to a small improvement of business.

Produce.—Sugar: Offers at reduced prices from the principal producing centres continue, but buyers are still holding aloof, and will not take more than small quantities for fear of a new fall in prices.

Coffee.—The market is firm, and a rise of two to three piastres is to be recorded.

Oil.—The fall in prices continues. The bidon sells at Ps.300 for first quality and Ps.280 for second quality.

Exports.—There has been some business in mohair. About 2,000 bales have been sold at prices ranging from 55 to 65 piastres per oke. The stock here is down to 3,000-3,500 bales. Twenty cases of opium have been also sold—druggist at Ps.800 per oke, fine at Ps.1,000-1,050.

PANDERMA.

The report for May states:—The forecasts of the yield of the forthcoming crop of cereals continue to be very optimistic. Up to the present their yield (maize excepted) is estimated at from three to four times greater than that of the past year, and the quality is expected to be excellent. As regards maize, while the forecasts are all very satisfactory, the harvest being far off, it is too early yet to give a definite opinion. As a result of the favourable climatic conditions, the crop of cocoons in the neighbourhood of this town is reported to be much better than that of the previous year. There is nothing to record as regards trade.

(FROM OUR OWN CORRESPONDENT.)

LONDON, Monday Night.

As a result of political developments of the past few days, markets are showing a much more cheerful tone, and it is obvious that it would not take very much now to bring about a marked revival in certain lines.

Gilt-edged stocks have been very firm. War Loan Fives are $\frac{1}{2}$ up at 88 $\frac{3}{4}$, while Consols have gained $\frac{1}{4}$ at 46 $\frac{1}{2}$. Victory Bonds are 77 $\frac{1}{2}$, while the Funding Loan is 71 $\frac{3}{4}$. India Sevens are now at a premium of 3 $\frac{1}{4}$, while the Ceylon Loan is $\frac{1}{2}$ premium. It is understood that a loan will shortly be forthcoming for the port of Calcutta, and anticipations make the issue a 7 per cent. one at 94, which would seem a not unreasonable estimate if India has to pay 7 per cent.

Another possible loan in the future is one for Bucharest. Some time ago negotiations were in progress, but without result; but now, as recorded by the Bucharest correspondent of THE NEAR EAST, they have been resumed, and provided conditions favour them, as they will do, the issue may this time be successful. The difficulty obviously is the rate at which the loan can be raised. The investing public, as a result of the constant disturbances of recent years, is not very partial to Near East issues, and through lack of interest is, unfortunately, not in a position to be able to discriminate between those that are good and those that are not, and so cities like Bucharest, which ought to be able to raise a loan on really reasonable terms, may have to pay an exceptional rate for the accommodation.

Business has been restricted in Industrials, and there has been so far no sign of the awakening of public interest. For that we must await the definite termination of the coal strike and a settlement of the dispute with the engineering trades. Oils have been somewhat unsteady, and in many cases the shares are lower on the week. Rubbers continue to be very depressed, and in view of developments and the probability that two or even three years may elapse before the industry recovers, shareholders are naturally wondering whether there will not be a number of reconstructions in the intervening period.

Near Eastern securities have been steady. Egyptian Guaranteed 3 per Cent. at 69, Greek Guaranteed 2 $\frac{1}{2}$ per Cent., 1889, at 66, and Turkish Guaranteed 4 per Cent., 1855, at 70 are unchanged.

Greek shares have continued firm. The 5 per Cent., 1881, has gained a point at 44, also the 5 per Cent., 1884, at 44. PALESTINE-MESOPOTAMIA AIR ROUTE.

It is announced that a new air route has been opened up across the desert between Palestine and Mesopotamia. The new route is about 590 miles in length, starting from Ramleh, the main R.A.F. aerodrome in Palestine, and passing through Amman, in Transjordan and Kasrazrak, where landing-grounds have been prepared, and proceeding thence across the Arabian desert to Ramadie, on the Euphrates, and on to Baghdad. The last few intermediate ground stations for use in case of forced landings will shortly be completed. The distances between the principal stations are as follows:—Ramleh-Amman, 65 miles; Amman-Kasrazrak, 55 miles; Kasrazrak-Ramadie, 400 miles; Ramadie-Baghdad, 60 miles.

Established for the Assistance of British Trade by the Insurance
of Accounts.

SHIPPING INTELLIGENCE.

PACKING OF GOODS FOR VARNA.

H.M. Vice-Consul at Varna reports frequent cases of petty pilfering in the port enclosure during the last few months. In the majority of instances the pilfering arises from insecure packing, resulting in the wrenching away of a loose plank, the bursting of a seam, etc. It would, therefore, appear desirable that exporters of goods to Varna should be aware that it is essential that such goods be strongly packed, more especially as the risk of pilferage is increased by the considerable length of time at present taken to clear goods through the Customs (one to three weeks are normally necessary owing to insufficiency of staff).

IMPORTANCE OF SALONIKA.

An interesting article on the port of Salonika appeared in a recent issue of the *Economiste d'Athènes*. Emphasising the importance of Salonika from a pro-Balkan standpoint, the writer declares that the port has many advantages compared with Constantinople owing to the depth and expanse of the gulf and the protracted situation of the port. As regards communication with the East, it can compete successfully with Constantinople, as it is nearer such ports as Smyrna, Alexandria, the Piræus, Trieste, Marseilles, and Algiers by some 250 kilometres. Salonika's chief advantage, however, lies in its central situation in the Balkan Peninsula, which should enable it to strengthen its commercial influence on all important producing centres in the Balkans, from many of which Constantinople is remote. The commercial relations between Constantinople and certain portions even of the Eastern Balkans have been considerably weakened during the last few years.

The Salonika-Alexandria route is destined, in the view of the writer, to become the favoured trade route, being the shortest and cheapest, from Central Europe and the Balkans to the Far East, and it behoves the Greek State to set about effecting the improvements to the port of Salonika which are necessary to enable it to play its part worthily.

FORTHCOMING SAILINGS.
